

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (May 10th)	·17	Weather seasonable; winds high; weather cooler than usual.
Sirohi („ 7th)	.....	Tanks and wells fair; health good; warm days; hot winds prevail.
Marwar („ 5th)	.....	Plenty of water in tanks and wells; health good; weather clear; winds sharp; heat unusually moderate; nights still cool; weather abnormal; prices falling; crops harvested.
Meywar ...	.....	Deaths from cholera decreasing.
Harowti (May 6th)	Kotah, ·10; Deoli, ·42; elsewhere drops.	Dust-storms on Tuesday night from north-west and on Saturday night from north, latter followed by rain; weather sultry, close; wind variable; small-pox abating; some fever prevalent.
Jhallawar („ 3rd)	·02	Tanks and wells low; small-pox abating.
Ajmere („ 9th)	Few drops	Dust-storms and thunder; few cases of small-pox and cholera reported in district.
Jeypore („ „)	Few drops	Dust-storms; prices stationary; health good.
Ulwur („ 10th)	.....	Harvesting finished; slight rain; health good; no material fall in prices.
Nepal—(May 4th)		
Katmandu ...	·73	Weather showery, with heavy wind and much thunder at times; on 1st there was a hail-storm, which did serious damage to the crops in the valley of Katmandu.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 11th May, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble C. P. Ilbert, M.A.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.

CENTRAL PROVINCES LOCAL RATES BILL.

The Hon'ble MR. CROSTHWAITE moved that the Hon'ble Mr. Hope be added to the Select Committee on the Bill to provide for the levy of Rates on land in the Central Provinces.

The Motion was put and agreed to.

CENTRAL PROVINCES TENANCY BILL.

The Hon'ble MR. CROSTHWAITE also moved that the Hon'ble Mr. Plowden be added to the Select Committee on the Bill to consolidate and amend the law relating to Agricultural Tenancies in the Central Provinces.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 18th May, 1882.

SIMLA;
The 11th May, 1882.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE FOURTH QUARTER OF 1881.

No. 397 R. T., dated Simla, 4th May 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Circular No. 9 Railway, dated 16th May 1881.

" " " " " 158 R. T., dated 17th February 1882.

Read also—

Returns of Accidents to Trains, &c., on the open lines of Railways in India for the quarter ending 31st December 1881.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, with an increase of 801½ miles, or 8·98 per cent., in the open mileage, and of 1,400,577 miles, or 17·91 per cent., in the train mileage, the number of accidents to trains, rolling stock, permanent-way, &c., shows a decrease of 14, or 2·14 per cent. The numbers chiefly vary on the following Railways:—

	Increase.	Decrease.
East Indian Railway, including the State branches worked by it	...	17
South Indian	...	43
Great Indian Peninsula	17	...
Bombay, Baroda and Central India	12	...
Rajputana	44	...
Punjab Northern	...	15
Indus Valley and Kandahar	...	24

2. The reduction on the East Indian Railway mainly took place under "Collisions between goods trains or parts of goods trains," "Goods trains or parts of goods trains, engines, &c., leaving the rails," and "Trains running over cattle," the numbers under these heads being *nil* against 13, 4 against 8,

and 13 against 16, respectively. There were, on the other hand, 9 cases of collisions between "Passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line" against 2.

3. The large decrease on the South Indian Railway was due to there being only 27 cases of "Trains running over cattle" against 46; 1 of "Passenger trains or parts of passenger trains leaving the rails" against 5; and 1 of "Goods trains or parts of goods trains, engines, &c., leaving the rails" against 8.

4. The total number of accidents on the Great Indian Peninsula Railway, including the State lines worked by it, was more by 17: under "Fire in trains" there were 13 cases against *nil*; under "Failure of axles" 3 against 1; and under "Other accidents" 5 against *nil*. The number of accidents from "Trains running over cattle" decreased from 16 to 9.

5. On the Bombay, Baroda and Central India Railway the number of accidents increased by 12, owing principally to the number of accidents from "Goods trains or parts of goods trains, engines, &c., leaving the rails," being 8 against *nil*.

6. On the Rajputana Railway the increase appears under several heads, especially under "Trains running over cattle," "Trains running over obstructions on the line," and "Failure of couplings." The accidents under these heads numbered 33 against 12, 9 against *nil*, and 8 against 2, respectively.

7. The number of accidents on the Punjab Northern State Railway decreased by 15, as there were no cases of "Passenger trains or parts of passenger trains leaving the rails" against 8; 1 of "Trains or engines travelling in the wrong direction through points" against 5; 1 of "Trains running over obstructions on the line" against 5; and 6 of "Fire in trains" against 9. There were, however, 6 cases of "Other accidents" against 3; and 3 "Failures of machinery, springs, &c., of engines" against *nil*.

8. On the Indus Valley and Kandahar State Railways the number diminished from 153 to 129, as there were no cases of "Collisions between goods trains or parts of goods trains" against 8; 6 of "Goods trains or parts of goods trains, engines, &c., leaving the rails" against 14; 41 of "Trains running over cattle" against 54; and 28 "Failures of machinery, springs, &c., of engines" against 30. The number of "Fires in trains," however, increased from 20 to 26; and of "Other accidents" from 1 to 7.

9. The casualties resulting from accidents to trains, &c., were among passengers 18 injured against 1, and among servants 5 killed and 16 injured against 1 killed and 2 injured. The largest number appears to have occurred on the Great Indian Peninsula Railway, where 13 passengers and 7 servants were injured. Three of the 7 servants and the 13 passengers were injured by No. 54 up passenger train running into No. 44 down goods outside the distant signal at Chinchvad on the 26th October 1881. The injuries were mostly of a trivial nature, and the Driver and Guard of the goods train and the Assistant Station Master, who were to blame, have been suitably punished.

10. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby:—

	Number of Accidents.	Number of Passengers and others.		Number of Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line	18	...	13	...	3	...	16
Collisions between goods trains or parts of goods trains	17	...	...	...	...	...	...
Passenger trains or parts of passenger trains leaving the rails	13	...	...	...	...	...	...
Goods trains or parts of goods trains, engines, &c., leaving the rails	72	...	...	...	...	...	...

	Number of Accidents.	Number of Passengers and others.		Number of Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Trains or engines travelling in the wrong direction through points	13	...	...	...	...	...	...
Trains running into stations or sidings at too high a speed	1	...	5	...	...	...	5
Trains running over cattle on the line	191	...	...	...	...	...	...
Do. do. over obstructions on the line	38	...	...	...	...	...	...
Trains running through gates at level crossings	14	...	...	...	...	...	...
The brusting of boilers or tubes, &c., of engines	52	...	...	...	...	...	...
The failure of machinery, springs, &c., of engines	62	...	...	...	...	...	...
The failure of machinery, springs, &c., of tyres	4	...	...	1	5	1	5
The failure of machinery, springs, &c., of wheels	2	...	...	...	...	...	...
The failure of machinery, springs, &c., of axles	12	...	...	...	...	...	...
The failure of machinery, springs, &c., of couplings	17	...	...	...	...	...	...
Broken rails	8	...	...	...	...	...	...
The flooding of portions of permanent-way	8	...	..	...	..	...	...
Slips in cuttings or embankments	1	...	...	...	...	...	...
Fire in trains	56	...	...	...	...	...	...
Fire at stations or involving injury to bridges or viaducts	5	...	...	...	...	...	...
Other accidents	36	...	...	4	8	4	8
Total	640	...	18	5	16	5	34

11. The number of "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line" increased from 16 to 18, of which 9 alone occurred on the East Indian Railway.

12. There were 17 cases of collisions between goods trains or parts of goods trains, of which 6 occurred on the Sind, Punjab and Delhi Railway.

13. The number of cases in which goods trains or parts of goods trains, engines, &c., left the rails was the largest on the Sind, Punjab and Delhi Railway, being 18 out of a total of 72.

14. There were 191 cases of trains running over cattle against 208, 41 of which occurred on the Indus Valley Railway against 54; 33 on the Rajputana Railway against 12; 27 on the South Indian Railway against 46; 14 on the Madras Railway against 10; and 13 on the East Indian Railway against 16.

15. The number of accidents from trains running over obstructions on the line increased from 24 to 38, of which 9 occurred on the Rajputana Railway against *nil*; and 5 on the Sind, Punjab and Delhi Railway against 3.

16. There were 52 cases of bursting of boilers or tubes, &c., of engines against 30, of which 36 occurred on the Sind, Punjab and Delhi Railway.

17. The failure of machinery, springs, &c., of engines increased by 16; 28 occurred on the Indus Valley and Kandahar State Railways against 30; 9 on the Sind, Punjab and Delhi Railway against 6; 5 on the Tirhoot Railway against 1; and 5 on the Wardha Coal Railway against 2.

18. There were 4 cases of failure of tyres, of which 1 occurred on the East Indian Railway; 2 on the Sind, Punjab and Delhi Railway; and 1 on the Bombay, Baroda and Central India Railway.

19. Axles failed in 12 instances, of which 6 alone occurred on the Eastern Bengal Railway.

20. The number of cases of failure of couplings increased by 6; 8 occurred on the Rajputana Railway against 2, and 3 on the East Indian Railway against 1, with small increases and decreases on other lines.

21. There were 56 cases of fire in trains against 47, of which 13 occurred on the Great Indian Peninsula Railway against *nil*, 26 on the Indus Valley and Kandahar State Railways against 20.

22. The casualties to passengers from causes other than accidents to trains, &c., were—

	Killed.	Injured.
From falling between carriages and platforms	2	1
Falling on to the platform, ballast, &c., when getting into or out of trains	2	3
Falling out of carriages during the travelling of trains	6	13
Other accidents	1	3
	11	20

23. The accidents to servants in the employ of railways or of contractors whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were—

	Killed.	Injured.
During shunting operations	2	12
Falling off engines, vans, wagons, &c.	3	13
Coming in contact with over-bridges, &c., during the travelling of trains	...	3
Coming in contact, whilst shunting, with vehicles, &c., standing in adjoining lines	1	...
Getting on or off trains, engines, &c.	2	6
Whilst loading, unloading, or sheeting	...	10
Whilst braking, spragging, or choking wheels	...	1
Whilst working at cranes or capstans	...	3
Whilst working on the permanent-way or in sidings	3	4
Whilst walking along the line on the way home or to work	3	2
Whilst walking, crossing, or standing on the line	10	7
Whilst passing between vehicles	1	1
Whilst attending to the machinery of engines, cleaning them, &c.	...	4
Whilst attending to gates at level-crossings	1	1
Falling or being caught between vehicles and platforms	...	1
Falling off ladders, scaffolds, platforms, &c.	...	5
Whilst coupling or uncoupling wagons	4	3
Miscellaneous	3	18
	33	94

24. Of other persons killed and injured by running trains, &c., one was killed whilst passing over the line at level-crossings, 31 killed and 10 injured whilst trespassing on the line, 5 committed suicide, and 2 killed and 1 injured from miscellaneous causes.

25. The following table shows the total number of persons killed and injured from causes connected with the working of trains as compared with those in the previous corresponding quarter:—

	4TH QUARTER, 1880.		4TH QUARTER, 1881.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	...	1	...	19
„ misconduct or want of caution	8	23	11	19
Servants.				
From causes beyond their own control	2	8	6	34
„ misconduct or want of caution	32	68	32	86
Others.				
Whilst passing at level crossings	2	...	1	...
Trespassers including suicides	25	8	36	10
Other persons	1	2	2	1
	70	110	88	169

26. In addition to the above, 10 persons are reported to have been killed and 71 injured in yards, workshops, &c., and 137 passengers to have met death in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—The attention of the Governments and Officers concerned should be invited to the increase in the number of accidents from "Fire in trains" and from "Failure of axles" on the Great Indian Peninsula Railway; the comparatively large number of "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line" on the East Indian Railway, as well as the failure of axles on the Eastern Bengal Railway; the large number of accidents from "Goods trains or parts of goods trains, &c., leaving the rails" on the Bombay, Baroda and Central India Railway; and the large increase in the number of accidents from "Trains running over cattle," "Trains running over obstructions on the line," and from "Failure of couplings" on the Rajputana Railway.

ORDER.—Ordered, that this Resolution be forwarded to the Governments, Administrations and Officers noted in the margin for information and guidance, together with copies of the Abstract Returns compiled by the Government of India.

Madras, Bombay, Bengal, North-Western Provinces and Oudh.
Central Provinces, British Burma and Hyderabad.
Director General of Railways.
Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that these papers be forwarded to the Government and Administrations marginally noted for information, and that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Punjab, Assam, Rajputana, Central India, and Biluchistan.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

F. S. STANTON, *Colonel, R.E.*,
Deputy Secretary to the Govt. of India.

TABLE No. I.

GENERAL TOTAL.

NUMBER of PERSONS reported during the Fourth Quarter of 1881 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control and ACCIDENTS happening otherwise.

TABLE

ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c., on the several RAILWAYS open for Traffic in INDIA during the Number of RAILWAY

No. 4.

Fourth Quarter of 1881, distinguishing the different Classes of ACCIDENTS, the Number of PASSENGERS and OTHERS, and the SERVANTS Killed or Injured thereby.

RAILWAYS.	1. Collisions between passenger trains, or parts of passenger trains.	2. Collisions between passenger trains, and goods or mineral trains, engines and vehicles standing foul of the line.	3. Collisions between goods trains, or parts of goods trains.	4. Collisions between light engines.	5. Passenger trains, or parts of passenger trains, leaving the rails.	6. Goods trains, or parts of goods trains, engines, &c., leaving the rails.	7. Trains or engines travelling in the wrong direction through points.	8. Trains running into stations or sidings at too high a speed.	9. Trains running over cattle on the line.	10. Trains running over obstructions on the line.	11. Trains running through gates at level-crossings.	12. The bursting of boilers or tubes, &c., of engines.	13. The failure of machinery, springs, &c., of engines.	14. The failure of tyres.	15. The failure of wheels.	16. The failure of axles.	17. The failure of brake apparatus.	18. The failure of couplings.	19. The failure of tunnels, bridges, viaducts, culverts, &c.	20. Broken rails.	21. The flooding of portions of permanent-way.	22. Slips in cuttings or embankments.	23. Fire in trains.	24. Fire at stations, or involving injury to bridges or viaducts.	25. Other accidents.	Total all Classes.	NUMBER OF PASSENGERS AND OTHERS.		NUMBER OF SERVANTS.		TOTAL ALL CLASSES.		Mean miles of Railway open.	Number of Passengers carried.	Train mileage of all descriptions. Executive Engineer, Northern Division, Ganges Canal, reports that no irrigation was effected during the month.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that the rabi crops are nearly all cut, and that "paleo" for indigo is progressing.

Executive Engineer, Rohilkhand Canals, reports that there was a slight demand for filling tanks for domestic purposes, watering cattle, &c.

The following additional kharif irrigation was effected during the month.

GENERAL RULES FOR THE CONDUCT OF ALL ELECTRIC TELEGRAPHS LICENSED UNDER THE TELEGRAPH ACT TO TRNASMIT "PAID MESSAGES" FOR THE PUBLIC.

Nos. 203-35T., dated Simla, 2nd May 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read the following :—

Indian Telegraph Act, I of 1876.
Resolution No. 707—12R., dated 24th June 1868.
" (Foreign Department) No. 194, dated 13th March 1869.
" Public Works Department, No. 125—28, dated 7th March 1871.
" " " " No. 144—50 T., dated 12th March 1874.
" " " " No. 169—90 T., dated 31st May 1881.
" " " " No. 58—103 A. T., dated 26th July 1881.
Letter No. 240T., dated the 16th July 1881, from the Government of India, Public Works Department, to the Director General of Telegraphs.
Letter No. 553 T., dated the 2nd November 1881, from the Director General of Telegraphs, to the Secretary to Government, Public Works Department.
Resolution, Public Works Department, No. 410—42 T., dated 14th November 1881.

RESOLUTION.—In the Resolution of the 14th of November 1881 it was stated that "the Government of India is willing and anxious to forward any scheme for developing and facilitating communication by telegraph, so far as this can be done without risk to the interests of the general tax-paying community; but in the interests of that community, it is essential that the telegraph service should be self-supporting."

2. In accordance with this Resolution, the attention of the Government of India has been drawn—

I—to the relation which the railway telegraphs should bear to the Imperial Telegraph System, in so far as they may be permitted to be the carriers of public messages; and

II—to the economy that must result in the combination of the maintenance of the Government and railway telegraphs whenever practicable.

3. The State Railway Telegraph Rules of 1874 were designed—

Primarily—To make the railway telegraph lines subsidiary and auxiliary to the Government Trunk System; and as such, they were allowed to retain certain shares of the receipts, varying in proportion to the distances messages were carried.

Secondarily—To provide for the construction and maintenance, by the Government Telegraph Department, of all telegraph lines and apparatus which might be required by the State Railways.

4. The experience of working these rules for over 7 years has shown that, however justly they were designed, on the principle of the division of receipts varying in proportion to work, such differential division has, in practice, caused an amount of account-keeping not justified by the sums involved.

5. The Director General of Telegraphs has represented, that the shares of receipts in favour of railways under the above rules are out of all proportion to the work done, and has urged, therefore, that, in future, all telegrams should be regarded as appertaining to the Telegraph Department, on the principle in force in England, by which railway telegraphs act only as agents for the Government system, and receive merely a fixed commission for carrying each message.

6. The Governor General in Council, however, whilst admitting the force of the Director General's arguments and the equity of his proposals, is nevertheless desirous, in the interests of the senders of telegrams, that railways should be encouraged to carry public telegraphic messages, to as great an extent as is compatible with the proper use of their telegraphs for the primary purpose of railway traffic; and has therefore decided, after duly considering

the present revenue of the Government Telegraph Department, to waive the claims of the latter to a share of the receipts; in the anticipation that any loss thereof will be more than compensated for by the effect of the additional facilities thus given to the public.

7. With this object, and also to simplify account-keeping, to ensure uniformity of procedure, and to develop telegraphic communication, it is resolved—

I—to extend to canal telegraphs also the privilege of carrying telegraphic messages for the general public;

II—that in future, every railway or canal, or other duly licensed telegraph office, at which a message may be tendered for despatch, shall retain the value of the message it sends, excepting such amounts as have to be again disbursed under the rules, for instance, for reply paid, post registered messages, &c.;

III—that there shall be but one public telegraph message system throughout India, applicable to railway, canal or any other telegraphic system licensed to carry messages for the public; and

IV—to provide for economical maintenance, the principle enunciated in Resolution, Public Works Department, Nos. 125—28T. of the 4th March 1871, that the maintenance of Government and railway telegraphs should be combined and vested in the Telegraph Department whenever practicable, is re-affirmed, and is now extended to canal telegraphs.

8. The accompanying sets of rules, *viz.*,—

I—General Rules relating to the conduct of all Electric Telegraphs licensed under the Telegraph Act to transmit "Paid messages" for the public,

II—Rules relating to the provision and maintenance of Electric Telegraphs for the use of railways and canals,

are therefore published, and are to come into force on the 1st of June 1882.

I.

General Rules for the conduct of all Electric Telegraphs licensed under the Telegraph Act to transmit "Paid messages" for the public.*

The Governor General in Council is pleased, under the provisions of Act I of 1876, entitled an Act to amend the law relating to Telegraphs in India, to prescribe the following Rules for the conduct of all Electric Telegraphs, other than those appertaining to the Government Telegraph Department, established or maintained within British India by any Company or person licensed under the above Act to transmit "Paid messages" for the public:—

Government Telegraph officers allowed on railway premises.

1. The licensed telegraph authorities shall allow all officers, inspectors, artificers, workmen and others employed by the Government Telegraph Department, in the construction or repair of the lines of telegraph within their boundaries to enter on their premises, and shall give such persons all reasonable facilities for travelling and for transporting material along the lines.

Instruments to be approved of by Telegraph Department.

2. The instruments in the licensed offices shall be of a pattern approved by the Government Telegraph Department.

Licensed offices to be connected with Government offices when desired.

3. The Government Telegraph Department may, at its own expense, connect any of its own offices by wire with any licensed Telegraph Office, and the licensed authorities shall afford every necessary facility for establishing and maintaining the connection, and for the interchange of messages thereby.

Signalling staff of licensed Telegraph Offices to be controlled by Railway authorities, &c.

4. The signalling staff of each licensed Telegraph Office shall be wholly and exclusively controlled and paid by the licensed authorities, but shall be amenable to the penal clauses of the Telegraph Act No. I of 1876, in the same manner as if they were employés of the Government Telegraph Department.

* *N.B.*—For the purposes of these rules, telephones and their apparatus are at present *not* included in the term "Electric Telegraphs."

Government system to be adopted for instruments, tariff, &c.

5. The system adopted in the Government Telegraph Department in respect of instruments, forms connected with public messages, receipt, transmission and check of messages, alphabet and code signals, shall be adopted and strictly followed by every licensed Telegraph Office, so far as the Government Telegraph Department may require.

Inland messages.

6. Inland messages, not relating to the business of the licensed authorities, shall, with due regard, in the case of railways, to the necessities of their traffic, be received at any licensed Telegraph Office when open, under the following conditions:—

Inland messages.

(*a*) They shall be transmitted to their destination by the quickest route, whether that be by Government or licensed Telegraph wires; and shall be received, charged for, despatched and delivered without undue delay, under the General Rules and Rates for Inland Telegrams sanctioned by the Governor General in Council from time to time.

Fees for inland messages.

(*b*) The fees paid for all inland messages shall be retained by the Administration receiving them, except in the cases of deposits for "Prepaid replies," "Postage," "Registration," and "Express charges," the amounts of which will be credited in account by the Government Telegraph Check Office to the Paying Office, and debited to the Receiving Office.

(*c*) The Telegraph Offices of any intermediate or terminal Railway, Canal or other Administration will be bound to forward or deliver messages passing on to its wires free of charge, except what may be due to it under (*b*).

Foreign messages.

7. Foreign messages may be accepted by licensed Telegraph Offices specially authorized to receive them, and must be received, charged for and despatched under the Rules and Rates for Foreign Telegrams, sanctioned by the International Telegraph Convention and in force for the time being. For the transmission of foreign messages, except in the case of those for Ceylon and Upper Burmah, licensed Telegraph Offices will be credited in account by the Government Telegraph Check Office with the sum of two annas a word, and debited with the full charge of the message. In the case of messages for Ceylon and Upper Burmah, the licensed Telegraph Office share will be half an anna per word.

Fees for foreign messages.

Payments by cash or stamps optional.

8. Inland or foreign messages tendered for transmission at a licensed Telegraph Office may be paid for either in cash or by affixing Government telegraph stamps, at the option of the sender:—

Use of postage stamps.

(*a*) Messages received at a licensed Telegraph Office by post from a place where there is no Telegraph Office may be paid for by postage stamps.

Credits for telegraph or postage stamps.

(*b*) Whenever telegraph or postage stamps may be used for the payment of messages, the Office receiving them will be credited in account by the Government Telegraph Check Office.

Message drafts to be sent to Check Office.

9. Drafts and copies of any messages, not on the business of the licensed authorities, received at, or transmitted from, any of their Offices, shall be forwarded post-paid to the Government Telegraph Check Office if demanded, under instructions which shall be issued by the Director General of Telegraphs in India.

Complaints and refunds.

10. Complaints respecting messages and applications for refunds should be addressed to the Government Telegraph Check Office, Calcutta.

Message drafts to be preserved for six months.

11. To admit of the investigation of complaints, the licensed authorities are to provide for the preservation of all message drafts for a period of six months, at the expiration of which term, unless previously demanded under Rule 9, they must be transmitted, post-paid, to the Government Telegraph Check Office, Calcutta. They may, however, be sent to the Check Office immediately after audit of the accounts of the Telegraph Office concerned.

Service messages to be sent free.

12. Messages on the service of the Government Telegraph Department shall be transmitted, without charge, to or from all licensed Telegraph Offices.

Order of transmission of messages.

13. Private and State messages shall, as a rule, be sent as directed in the Rules and Rates for Inland Telegrams; but a State message marked "clear the line" or "precedence" shall take precedence of all other messages. Provided that if sent by any Railway Telegraph Office, its transmission shall be consistent with the safe working of the railway traffic.

Director General of Telegraphs in India may inspect licensed Telegraph Offices.

14. The Director General of Telegraphs in India, or any officer deputed by him, may at any time inspect any licensed Telegraph Office, or messages sent from, or received at, any of them; and the licensed authorities shall give all facilities for such inspections, and shall submit for inspection any books or accounts connected with the working of their telegraphs, or any originals or copies of messages sent or received, which the Director General or such officer may require.

II.

Rules relating to the provision and maintenance of Electric Telegraphs for the use of Railways and Canals.

To what Railways and Canals applicable.

1. These rules are applicable to all railways and canals which are the property of the Government of India, and to such other railway, canal or telegraphic systems as the Governor General in Council may order to be governed by them.

Construction and maintenance of lines vested in Government Telegraph Department.

2. The construction, maintenance and repair of the lines shall be vested in the Government Telegraph Department, the officers of which shall be permitted to erect and maintain posts and wires, and other appurtenances of a telegraph, within the railway or canal, fences or other boundaries, to such an extent as, under the orders of the Director General of Telegraphs, may be required.

Wires to be leased by Government to railways or canals.

3. The Government Telegraph Department will supply to the authorities of each railway or canal, for their exclusive use, as many wires as the Government of India may consider necessary for the proper working of the system, at a fair rent, to be fixed from time to time by the Governor General in Council.

Supervision, supply and maintenance of apparatus.

4. The technical supervision of Railway or Canal Telegraph Offices, the supply, regulation and repair of apparatus, shall be undertaken by the Government Telegraph Department on payment of an annual sum to be fixed from time to time by the Governor General in Council.

Control of Railway or Canal Telegraphs so far as used for its own purposes.

5. Each railway or canal shall work the wires rented to it, so far as they may be used for its own traffic or train signalling purposes, subject to the general control of the Government of India.

To the Department of Finance and Commerce
" Foreign, Home, Military, and Legislative Departments.
" Department of Revenue and Agriculture.
" Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department.
" Chief Commissioners, Central Provinces, British Burma, Assam and Coorg.
" Resident at Hyderabad.

ORDER.—Ordered that copy of this Resolution and enclosures be communicated to the Departments of the Government of India and the Local Governments and Administrations noted in the margin, for information and guidance.

Also, that a copy of this Resolution be forwarded to the Director General of Telegraphs for information and guidance.

Also, that the Resolution and enclosures be published in the *Gazette of India*, and that copies be communicated to the Chambers of Commerce in Bengal, Madras, Bombay, Rangoon, and Karachi.

By order,

W. S. TREVOR, *Colonel, R. E.*,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th MAY 1882.

GENERAL REMARKS.—Good rain has again fallen in the extreme south-west of the Madras Presidency, and there has been rain also in nearly all the districts of that Presidency, of the Mysore State, of Coorg, and of British Burma. In the Nizam's Territories there has been only slight rain, and in Berar none. In the Bombay Presidency light showers have been reported from two or three districts, and in the Central Provinces from three places. In Central India and Rajputana slight rain fell in most of the States, accompanied almost everywhere with dust-storms, thunder, and hail. In the Punjab rain has occurred in some places—comparatively heavy in two districts. In the North-Western Provinces and Oudh some rain has fallen in nearly every district. In Bengal, Assam, and Burma more or less heavy rain is reported in almost all districts.

Harvest operations are still in progress in some Provinces—as, for instance, in parts of Bengal and Assam, where the reaping of spring rice is yielding a good average outturn in some tracts, and a very good one in others; in the Punjab, where the *rabi* harvest is yielding a good outturn; in the Madras Presidency, where the reaping of certain crops is giving an average yield; and in the Mysore State, where the harvest of sugarcane and paddy is still in progress.

Standing crops are said to be good or fair in the Madras Presidency, fair in the Mysore State except in some limited places, where they have withered, and much improved in Bengal by the recent rainfall and the fair weather since set in. In the North-Western Provinces and Oudh the recent rain has somewhat injured melons and mangoes, but have benefited sugarcane and indigo. In Assam tea is reported to be doing better than hitherto, and in Coorg rain has been most beneficial for the coffee crop.

Ploughing and sowing are progressing in some parts of the Madras Presidency, and are being vigorously pushed on in Bengal. In the Bombay Presidency, in the Central Provinces, in Berar, in Mysore, in Coorg, and in Assam, preparation of land for the *kharif* crops is progressing. Rain is urgently wanted in Dharwar, and the want of drinking-water is felt there and in the Nizam's Territories.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 17th)		
Bellary ...	1·55 (in one station)	Standing crops good; harvest paddy and sugarcane, outturn average; fever and small-pox in parts.
Kurnool ...	·93 (in one station)	Harvest of paddy, yield below average; small-pox and cattle-disease in parts.
Ganjam ...	2·07 (average of fifteen stations).	Standing crops, paddy, cotton, and gingelly, thriving; small-pox and fever prevalent; sporadic cholera in parts; cattle-disease exists.
Kistna ...	·89 (average of five stations).	Fever, small-pox, and guinea-worm in parts; cattle-disease continues.
Chingleput (Madras) ...	.....	Standing crops good where irrigated, bad elsewhere; harvest wet and dry crops, outturn below average; agricultural operations progressing; small-pox in parts; a few cases of cholera.
Coimbatore ...	1·41 (average of fifteen stations).	Standing crops generally good; harvest paddy and dry crops, yield paddy above average, dry, average; small-pox, fever, and cholera in parts.
Tanjore ...	·27 (average of three stations).	Standing crops good; harvest of dry grains, yield average; a few cases of cholera.
Madura ...	·03 (average of seven stations).	Standing crops dry fair; harvest paddy, outturn about average; cholera slight in parts.
Malabar ...	·29 (average of ten stations).	Sowing first crop continues; fever, small-pox, cholera, and cattle-disease in parts.
Travancore ...	3·94	Ploughing and sowing progressing; harvest of second crop paddy, outturn average; fever prevalent.
		General Remarks.—No rain in Chingleput; general prospects fair.
Bombay—(May 17th)		
Kurrachee ...	.....	Weather sultry; river at Kotri on 15th, 7 feet 3 inches, same as on corresponding date last year; fever in five talukas; small-pox in three talukas; prices—wheat, red rice, and *bajri* in Kurrachee 22, 40 and 33, in Tatta 24, 44 and 48, in Dadu 32 and 40, in Shahbandar 44 and 40, and in Jahi 18, 48 and 48 lbs. per rupee respectively.
Hyderabad ...	·03 on 12th at Mora	River rising; *kharif* operations commenced generally; slight fever in six talukas; heavy dust-storm on evening of 12th here, but no damage reported; wheat 25, *juari* 44, *bajra* 40, red rice 32, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Preparations for the next season progressing; health good; wheat 27 and *bajra* 30 lbs. per rupee.
Baroda ...	.....	Land being prepared for rainy season; health good; *bajri* 29 and common rice 23 lbs. per rupee.
Surat ...	.....	Preparation for cultivation continues; *juari* 38 and *nagli* 51 lbs. per rupee.
Násik ...	.....	Public health good; *bajri* 41½, wheat 31, and *juari* 67 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	.....	Temperature normal; vapour in air normal; abnormal wind northerly; distant lightning on 16th.
Poona ...	.....	Five cholera cases in two villages of Indapur, 4 fatal; slight cattle-disease in Indapur and Khed talukas; average prices—*bajri* 45 and *juari* 56¾ lbs., in Poona *juari* 47¾ and *bajri* 39 lbs. per rupee.
Ahmednagar ...	.....	Land being prepared for next season; water-supply in taluka Parner failing; *juari*—maximum 96 lbs. in Jhamkhed, minimum 54 in Newasa; *bajri*—maximum 66 lbs. in Jhamkhed, minimum 48 in Kopergaon; slight cattle-disease in Karjat and Newasa talukas.
Sholapur ...	.....	Cattle-disease in Sholapur, Sangola, and Malsiras; cholera 3 cases, 1 fatal in Karmala; *jowari* 73 lbs. 4 tolas, *bajri* 56 lbs. 9 tolas per rupee.
Dharwar ...	Slight rain in Dharwar, Gadag, and Kalghatgi.	Weather cloudy; rain urgently wanted everywhere; ground being prepared for *kharif* sowings; scarcity of drinking-water in eight talukas; public health good; rice 22 and *juari* 53 lbs. per rupee; flight of locusts passed through Dharwar and Hubli.
Kanara ...	Sirsi, ·88; Hallial, ·17	Harvesting second crop completed on coast; sugarcane plants healthy; preparing ground for monsoon crop; cattle-disease in three talukas; small-pox in Bhatkal and Sidapur subsiding; common rice in Karwar 12 seers, in district 14½ seers per rupee; weather cloudy and showery.
Rajkot ...	.....	Weather hot; 2 new cases of cholera in Rajkot town and 2 in Khakrechi, Und, Malia, and Dhrol; *bajri* 25 and *juari* 29 lbs. per rupee.
		General Remarks.—*Rabi* harvest completed; preparation of land for *kharif* begun; slight rain in Khandesh and Kanara, urgently wanted in Dharwar; scarcity of drinking-water in one taluka of Ahmednagar and eight of Dharwar; slight fever and cattle-disease in a few districts; cholera in Rajkot, Poona, Sholapur, Satara, and Belgaum.
Bengal—(May 17th)—		
Chittagong ...	0·29	Weather seasonable; prospects of crops good; prices stationary; cholera still continues; small-pox abating; general health good.
Dacca ...	1·02	Rain ceased and sultry weather recommenced, this after rain will advance prospects considerably; harvesting of spring (*boro*) paddy almost completed, yield about fourteen annas; public health good.
24-Pergunnahs (Calcutta)	0·98	Lands being prepared for early and winter (*amun*) crops; recent rain has done much good; prices of common rice stationary; general health good, isolated cases of cholera being only reported from Barripur, Dum-Dum, Barrackpore, and Baraset sub-divisions, and a few cases of small-pox from Dum-Dum and Barrackpore.
Moorshedabad ...	3·04	Rain has improved prospects of crops, and agricultural operations are going on with much activity; mild cholera still lingering in Bhagwangola police station and elsewhere.
Rajshahye ...	0·43	Autumn (*aus*) and winter (*amun*) rice and jute greatly improved by rain; cholera and fever as before.
Burdwan ...	1·76	Weather seasonable; ploughing continues; cholera still reported.
Rungpore ...	0·30	Weather warm; prospects of crops favourable; prices of food-grains stationary; public health good.
Bhagálpur ...	1·47	Lands being prepared for rice sowings; cholera much abated.
Purneah ...	1·65	Prospects of crops good; sowing of autumn (*bhadoi*) crops still going on; cholera abating.
Patna ...	1·08	Harvesting of *China millet* over; sugarcane promising well; cholera and small-pox still reported from Behar sub-division.
Durbhunga ...	0·43	Weather hot; sowing of rice begun; prices stationary; cholera bad in Tajpur, but decreasing in Durbhunga town and Sadr sub-division.
Hazáribágh ...	*Nil*	Weather warm; fields being prepared for next season; small-pox and a few sporadic cases of cholera reported from the interior.
Cuttack ...	2·1	Reaping of spring (*boro*) rice completed; ploughing progressing; cholera prevalent in the interior.
		General Remarks.—Fair weather after recent heavy rain, which has been very beneficial to crops now on the ground and to ploughing and sowing operations, which are now vigorously proceeding; harvesting of spring (*boro*) rice almost completed, with good average outturn; cholera abating in many places; small-pox still lingering in some; public health generally fair.
N. W. Provinces and Oudh—		
Benares (May 16th)	*Nil.*	Harvest operations for the *rabi* crops have been finished; sugarcane is being irrigated; health of man and cattle good; bazars are well supplied with food-grains, and prices are steady.
Cawnpore („ „)	0·4	Rain has been beneficial to indigo and sugarcane; outturn of extra crops good; no disease prevalent, except fever in five parganas; prices nearly stationary.
Allahabad („ 17th)	Slight rain in Manjhanpur.	*Sawan* (millet) and sugarcane being irrigated; mangoes much damaged by late storm; melons in market; cholera in district as reported last week not increased, city very healthy; prices risen slightly; grain imported from the south.
Gorakhpur („ 16th)	.....	Rain on 10th and 11th, succeeded by fine weather; early rice being planted out; grain abundant; prices stationary; cholera decreasing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Jhánsi (May 15th)	.....	East winds prevail; weather stormy and unsettled, with occasional showers; a slight fall of hail is reported in two parganas; fields are being manured for *kharif* sowings; prices stationary; slight cattle-disease in pargana Jhánsi.
Agra („ 16th)	Rain fell in four parganas from 0·2 to 0·7.	Fever and small-pox continue in city; general health good; prices rising.
Farukhabad („ „)	1·0 in two tahsils and less elsewhere.	East wind all the week, with storms; prices rising; general health good.
Bareilly („ „)	Rain general on 10th, 11th, and 14th; average fall, 1·7.	Weather extremely cool and pleasant for May; harvest over; sugarcane and indigo have much benefited from the rain; prices rising; health good.
Meerut („ „)	Meerut, 0·4; Mowana, 0·6; elsewhere, less.	Heavy storm occurred on the night of the 13th; health of men and cattle good; supplies ample; prices stationary or slightly rising.
Kumaun ...	.....	No report received.
Lucknow (May 16th)	Sadr, 1·2; Maliabad, 0·4; Mohanlalganj, 0·2.	Melons have been much injured by the rain, but sugarcane is benefited; prices slightly risen; barley selling at 28 seers per rupee; public health fair; a few cases of cholera reported from the interior.
Partabgarh („ „)	Some rain in tahsil Patti on 10th.	There is still a good deal of fever in the district; sugarcane and *sawan* being irrigated; weather cool for this time of the year.
Rae Bareli („ 15th)	Rainfall on 10th—Sadr, 0·2; Digbijaiganj, 3·1; Dalamau, 0·7; Salon, 0·2: 11th May—Dalamau, 0·1.	Wind easterly; weather cloudy and cool; general health fair; prices almost stationary.
Sitapur („ 16th)	0·5 on 10th; 0·2 on 14th.	Winds easterly; cholera abating; prices steady.
Fyzabad („ „)	Sadr, 0·7	Cholera still prevalent.
		General Remarks.—Some rain fell nearly in every district, which injured melons and mangoes, but benefited sugarcane and indigo; prices rising slightly; cholera continues in Fyzabad and Allahabad, but is decreasing in Gorakhpur and Sitapur; a few cases have been reported from Lucknow; small-pox continues in Agra, and is abating in Moradabad; a few cases of cattle-disease are reported from Moradabad and Jhánsi.
Punjab—(May 16th)		
Delhi ...	·30	Health fair; small-pox continues in city; prices fluctuating.
Hissar ...	Slight drizzling rain	Weather cloudy; harvesting and winnowing continue; prices stationary; health good.
Umballa ...	No rain	Threshing of *rabi* crop finished; prices stationary; health fair.
Jullundur ...	No rain	Threshing continues; prices steady; health good.
Amritsar ...	No rain	Winnowing in progress; prices fluctuating; health good.
Lahore ...	No rain	Crops and health good; prices stationary.
Ferozepore ...	1·00	Crops being cut and gathered; prices fluctuating; health good.
Sialkot ...	No rain	Crops cut; prices stationary; health good; cattle-disease has appeared.
Rawalpindi ...	1·00	Crops being cut; prices falling; health good.
Peshawar ...	Slight rain	Prices falling.
Mooltan ...	No rain	Harvesting in progress; *kharif* crops being sown; prices stationary; health good.
Dera Ismail Khan ...	·30	Crops being reaped; prices stationary; health good.
		General Remarks.—Harvesting still in progress; prices generally steady; health good; slight rain in a few districts.
Central Provinces—		
Nagpur (May 17th)	·15	Weather hot, with dust-storms; ground being prepared for *kharif* sowings; measles still prevalent; 3 cholera cases; cattle-disease prevalent; prices rising; exports 9,902 bags (of ?).
Jubbulpore ...	·12	Weather cloudy and warm; *kharif* ploughings continue; cholera and small-pox prevalent; wheat 20 and rice 12 seers per rupee.
Saugor (May 15th)	.....	Weather warm and cloudy; threshing continues; land being prepared for *kharif*; prices rising.
Seoni ...	·42	Weather cool, storms daily; small-pox, cholera, and cattle-disease prevalent; prices steady.
Khandwa ...	Slight rain	Weather cloudy and warm; small-pox prevalent; prices rising; wheat 17, *juari* 26, and rice 12½ seers per rupee.
Hoshangabad (May 16th)	.....	Weather hot; winnowing continues; small-pox prevalent; wheat 16, rice 9, and *juari* 27 seers per rupee.
Raipur („ 13th)	Occasional showers	Mornings cool, day sultry; land being prepared for *kharif*; cholera still prevalent; rice 38 and wheat 31 seers per rupee.
Sambalpur („ 11th)	.....	Weather cloudy and cool at nights, with heavy dew; land under preparation for *kharif*; cholera abating; rice 49 seers per rupee.
		General Remarks.—Weather cloudy, with slight showers of rain and high winds; land being prepared for *kharif* sowings; cholera, small-pox, and cattle-disease prevalent; prices rising in some districts, on the whole continue easy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma— (May 13th)		
Akyab ...	·03	Total rainfall 3·73 inches; two deaths from small-pox in Akyab town and Akyaylat; disease prevailing in four townships, otherwise public health good; slight cattle-disease in four townships, severe in one township.
Rangoon ...	1·05	Total rainfall 4·21 inches; one fatal case of cholera and two fatal cases of small-pox, otherwise public health good.
Bassein ...	2·69	Total rainfall 4·98 inches; two deaths from cholera in Bassein town, otherwise public health good.
Prome ...	1·00	Total rainfall 2·05 inches; six deaths from cholera in Prome town, total to date 204; disease also in district.
Amherst (Moulmein) ...	.....	Public health in Moulmein and district good.
Toungoo ...	·11	Total rainfall 2·32 inches; seven cases of small-pox, four of which fatal in Toungoo town, otherwise public health good; slight cattle-disease in Thagaya township.
		General Remarks.—Cholera in Thayetmyo and part of Shwegyeen, and continues in Prome but has abated; small-pox still in Akyab and Toungoo but has decreased, with exception of a few scattered cases of cholera, public health otherwise good; cattle-disease severe in part of Akyab; rains appear to have set in.
Assam—(May 17th)		
Gauhati ...	1·37	Weather very hot; prospects of crops good; a few cases of cholera still at Gauhati and in part of the north of the district, but appears to have ceased at Barpeta.
Sylhet ...	1·60	Cultivation of *aus* and *amun* paddy rather backward; *boro* paddy out-turn very good in some parts; tea doing better.
Cachar ...	·22	Weather very warm; ploughing for crops continues; sowing of *dumahi* and *murali* crops commenced in some places in Hailakandi; common rice 30½ seers per rupee; eight cases of cholera reported from Lakhimpur.
Dibrugarh ...	·75	Weather hot; prospects of *aus* paddy good; ploughing for *sali dhan*; cattle-disease still reported; district healthy.
Mysore and Coorg— (May 17th)		
Bangalore ...	1·66	Most of the wet crops have withered; sugarcane harvest continues, also of *vysakh* paddy in ten taluks; health good; prices unchanged.
Mysore ...	½ to 4 inches in all taluks.	Ploughing commenced; standing crops in fair condition; prospects favourable; *ragi* 20 seers per rupee; cholera continues in the town and parts of the district.
Mercara ...	1·33	Rain most beneficial for coffee crop and agricultural operations; price of *ragi* and gram has risen, of rice stationary; small-pox prevalent in many parts of the province.
		General Remarks.—Rain has fallen more or less all over the Mysore State; land being ploughed; pasturage improving; prospects generally fair, and public health also on the whole fair; prices show upward tendency.
Berar & Hyderabad— (May 17th)		
Amráoti ...	.....	Weather hot, cloudy and stormy; fields under preparation; prices of wheat 18 and *juari* 36 seers per rupee.
Akola ...	.....	Weather hot; ploughing in progress.
Hyderabad ...	·42	*Tabi* reaping continues; want of water felt in some taluks; fever and cattle-disease prevail in places; prices of wheat 17, rice 10, white *juari* 24, yellow *juari* 28, and *tur* 27 seers per current sicca rupee.
Central India States— (May 17th)		
Indore ...	No rain	Weather hot and cloudy; health good.
Morar (Gwalior) ...	·12	Weather warm; health good; small-pox on the decrease; prices stationary.
Sutna ...	.....	Weather cool; cholera at Rewah.
Rutlam ...	.....	No report received.
Neemuch ...	·18	Small-pox abating; weather hot; high winds; prices rising.
Goona ...	.....	Wheat 24 seers per rupee; crops and health good; small-pox prevalent; weather cloudy.
Bhopal ...	.....	A few thunder showers with high wind from south-west; prospects good, but wheat harvest of Bhopal light; small-pox still prevalent.
Agar ...	·84	Health and prospects good.
Nowgong ...	·10	Public health good; weather cool and pleasant, but unseasonable; prices stationary.
Manpur ...	.....	Weather cloudy and warm, with occasional high wind; harvesting of wheat continues; prices steady.

SUPPLEMENT TO

The Gazette of India.

№ 21.} CALCUTTA, SATURDAY, MAY 27, 1882.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

CIVIL WORKS.

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR THE YEAR 1880-81.

Nos. 149-57 T., dated Simla, the 13th April 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Director-in-Chief, Indo-European Telegraph Department, No. 279, dated 24th August 1881.

OBSERVATIONS.—The Capital Account has been increased during the year by £276-4-9 only, and stood at the end of the year approximately at £1,154,429-4-9.

2. The receipts amounted to £88,474-12-10, showing an increase of £7,330-5-11 over those of the previous year; most of the increase being due to increased receipts from the common purse arrangement. In the Administration Report of 1879-80 the Director-in-Chief reported that the earnings for that year, subject to correction, were £82,710-16-3, the difference between this amount and the sum now reported as the earnings of that year, or £81,144-6-11, should be explained at an early date. In submitting future accounts all such differences should invariably be explained.

3. The expenditure of the year was £73,113-2-10, being somewhat higher than the normal expenditure of the previous year, owing to increased cost of repairs.

4. The net balance of the year's revenue over working expenses amounted to £15,361-10-0; but this does not include the earnings of the *Patrick Stewart*, for services rendered to other departments, amounting to £1,078-6-0, and the value of the *Amberwitch*, £4,000 transferred to the Marine Department. Including these items the net revenue is increased to £20,439-16-0, representing a profit of £1·77 per cent. on the capital outlay.

5. Considerable damage was done to the lines in Persia by the storms during the winter, which was exceptionally severe, and the cost of repairs has been consequently somewhat heavier than usual; but, on the other hand, the wilful damage done to the lines was only of a trivial nature.

6. The general results of the year's operations are very satisfactory, so far as the working of the Telegraph service and the efficiency of the lines are concerned, and the Government of India concurs in the commendations by the Director-in-Chief of the staff, through whose exertions such good results have been obtained. But the financial condition of the administration requires careful consideration. The Government of India notes with approval that efforts are being made to increase the traffic, and it may be noted that some reductions have been made in the cost of working since the Report under review was written.

7. The total revenue is the largest that has been earned since the alternative route *viâ* Suez was completed, and there seems to be a fair prospect of the revenue increasing; but as yet it does not yield an adequate return on the capital invested, and endeavours must not be relaxed to secure such a diminution of working expenses as shall, without risking efficiency of the service, leave a fair balance for interest on the capital invested.

8. The figures quoted in the Report relating both to the Capital and Revenue Accounts differ somewhat from those in the annual accounts submitted by the Examiner of Telegraph Accounts: this is unavoidable as the figures shown in the Administrative Accounts are the actual earnings whether received or not, and the actual expenditure incurred whether paid or not. On the other hand, the Financial Accounts exhibit the transactions which actually occur during the year. It is manifest, therefore, that the two sets of figures can never agree.

9. The differences between the two sets of figures are brought out in the subjoined statement:—

	As per Administration Report.	As per Finance Accounts.	Difference. More.	Difference. Less.
	£	£	£	£
Capital Expenditure—				
During the year 1880-81	276	290	...	14
To end of 1880-81	1,154,429	1,153,755	674	...
Revenue Receipts—				
During the year 1880-81	88,475	84,219	4,256	...
Revenue Expenditure—				
During the year 1880-81	73,113	69,632	3,481	...

The difference of £14 under Capital expenditure during the year 1880-81 is explained to be due to approximate figures having been entered in the Administration Report, while the Finance Accounts contain actuals. The difference under Capital expenditure to end of 1880-81 is partly due to the difference of £14 shown above, and partly to certain adjustments of previous year's expenditure. The difference under Revenue receipts is due to the Administration Report dealing with net revenue from messages earned by the Department for the complete year; while the Finance Accounts bring to account the actual receipts of the year, whether pertaining to the year alone or to previous years. The difference under Revenue expenditure is partly due to adjustments, subsequent to the submission of the Administration Report, and partly to the refund from common purse to other Telegraph Administrations, being treated in the Administration Report as reduction of receipts, while in the Finance Accounts it has been treated as expenditure.

Order.—Ordered, that a copy of this Resolution be forwarded to the Director-in-Chief, Indo-European Telegraph Department, for information and guidance.

Also, that copies of the Report and Resolution be forwarded to the Department of Finance and Commerce, and to the Foreign, Military (Marine), Home, and Revenue and Agricultural Departments for information.

Also, to the Government of Bombay, and to the Director General of Telegraphs in India for information, and to the Publisher of the *Gazette of India*, for publication in the Supplement to the *Gazette*.

Ordered further, that the Report and Resolution be forwarded to the Secretary of State for the information of Her Majesty's Government.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

No. 279, dated 24th August 1881.

From—Lieut-Col. J. U. Bateman-Champain, R. E., Director-in-Chief, Indo-European Government Telegraph Department,

To—The Secretary to the Government of India, P. W. Dept.

I beg to submit the following Administration Report of the Indo-European Government Telegraph Department for the year ending 31st March 1881, and I class my observations in the same order and under the same general heads as those in last year's statement:—

CAPITAL.

2. In my Report for 1879-80, the Capital Account was stated to be approximately, on 31st March, £1,154,333-0-3, which figure was subsequently corrected to £1,154,153. On the 31st March 1881, the account stood, subject to slight modifications, at £1,154,429-4-9, showing an increase during the year of £276-4-9 to the Capital Account of the Department. Full particulars are given in the Appendix A.

Capital Account, Appendix A.

REVENUE.

3. The receipts during the year amounted to £88,474-12-10 which, compared wtih £81,144-6-11, received during the previous year, shows an increase in 1880-81 of £7,330-5-11, of which sum £7,244-12-9 is due to our increased receipts from the common purse.

Revenue Account for 1880-81, Appendix B.

4. The expenditure of the year was £73,113-2-10, but in order to compare this properly with the previous year's figures, it is necessary to eliminate from that year's expenditure the large abnormal debit, transferred from Capital Account of £26,534-12-10, part cost of the new departmental steamer *Patrick Stewart*. The normal expenditure for 1879-80 is then seen to be £68,175-4-11, showing an increase to expenditure in 1880-81 of £4,937-17-11, the principal items of difference being as follows:—

Expenditure for 1880-81.

	Increase. £	Decrease. £
1. Repairs	3,725	...
2. Establishment	...	753
3. Tools and Plant	...	1,141
4. Cable Steamer and Marine charges	834	...
5. Advertising and Agencies, (2 years)	994	...
6. Stores for Turkish Government, cost since recovered	959	...
7. Public Works charges	181	...
	6,693	1,894

The remaining differences are unimportant.

I should point out that items 5 and 6 are not *bonâ fide* expenditure during the year. The charges for advertising, &c., are for previous years, while the cost of the stores lent to the Turkish Government has since been repaid, so that the real increase was not £4,937-17-11, but £2,984-17-11.

5. The net balance of the year's Revenue Account is £15,361-10-0, and shows an improvement upon last year, allowing for the abnormal entry above referred to of £2,392-8-0.

Net gain on year.

ADMINISTRATION ACCOUNT.

6. The following items, for which I am not authorized to take credit under Revenue, although in fairness due to that account, are—

Extra earnings.

	Rs.
Earnings of *Patrick Stewart*	10,783
Estimated value of *Amberwitch* transferred to Marine Department without charge	40,000
	50,783
	or
	£ 5,078-6-0

This amount if credited to our Revenue Account would increase the balance for 1880-81 to £20,439-16-0, even if the temporary loan to the Turkish Department of £959 be included in the year's expenditure.

7. With regard to the item entered as "Value of the *Amberwitch*," I have already ventured to point out to the Government of India that, in accordance with the order by which the cost of the new ship was actually deducted last year from our departmental earnings, the proceeds of the sale of the old ship were, on the other hand, to be credited. In consequence, however, of the *Amberwitch* having been transferred to another branch of the service and not sold, an inaccurate impression of the real financial results of our working is given by the figures I have to submit.

Transfer of *Amberwitch*.

8. Para. 4 of the Government of India Resolution on my last year's Report clearly lays down that the sale proceeds of the *Amberwitch* will be credited to our revenue, yet by letter No. 2348., Marine Department, dated Simla, 4th May 1881, this ruling is nullified, and the Marine Department obtains for nothing a ship for which this Department paid.

LINES, MAINTENANCE AND REPAIRS.

9. The lines which constitute the Persian Division have been practically unaltered since my last annual Report was submitted. No extensions have been carried out nor are any in contemplation, and the outdoor work of the Inspectors has been confined to repairs.

No change in Persian Division.

10. Lieutenant-Colonel Smith observes that wilful damage to the poles and wires has been only of a trivial nature, not greater than probably occurs on telegraph lines in other countries.

Decrease of wilful damage in Persia.

11. In the Persian Gulf Division owing to the abandonment of our station on the small Island of Henjam and the consequent joining up of the Jashk-Bushire gutta-percha cable, the length of the latter has been very slightly increased. From Fao *viâ* Bushire-Jashk and Gwadur to Karachi the total amount of gutta-percha cable is now 1217·37 nautical miles. The India-rubber cable between Bushire and Jashk measures the same as last year, *viz.*, 498·46; the total of our submarine wires being therefore 1715·83 nautical miles.

Present length of Persian Gulf cables.

12. The annual Report submitted by Mr. Mance, the Engineer and Electrician, contains so much information which may be of great value to all engaged in submarine telegraphy, that I forward it as received with the following general remarks.

Mr. Mance's Report.

13. It will be seen that the eletrical condition of the cables is, as compared with the insulation at the beginning of the year, decidedly satisfactory.

Insulation of cables.

14. There were 12 deep sea faults, 11 of which have been successfully repaired. The twelfth developing itself on the Bushire-Jashk gutta-percha section on the 26th March, just after our repairing vessel, the *Patrick Stewart*, had sailed for

Faults in cables during 1880-81.

Bombay for alterations to diminish her rolling. After much consideration, and acting under the advice of Mr. Ffinch and Mr. Mance, I decided not to recall the ship, but to postpone repairs to the gutta-percha and trust to the India-rubber cable to carry our traffic.

15. Happily the confidence reposed in the latter has been justified by the results, and even when both the cables of the Eastern Company became interrupted in June and July of the current year, the whole of the telegraphic business between Europe and India and the Far East was satisfactorily transmitted by our single India-rubber cable with very little delay indeed.

Remark on recent break of both Eastern cables.

16. The history of the recent unusual pressure on this Department is not, however, to be entered upon here, but will be related in the Report for the year 1881-82.

17. All these 12 deep sea faults except one occurred on the same section of cable and are ascribed to the corrosion of the guard wires causing breaks where the cable happens to rest on uneven ground.

Cause of faults.

18. Mr. Mance's tests for discovering the situation of an interruption have been singularly accurate, the average distance between the calculated and the actual position being only about a quarter of a mile.

Accuracy of tests.

19. During the year under review the (Hooper's) India-rubber cable has given no trouble at all. Its insulation is rather variable owing to the existence of a very minute defect which does not, however, interfere in any way with the working.

Condition of India-rubber (Hooper's) cable.

20. The value of the Brown and Allan relay now regularly used on our main circuit has even exceeded our expectations, and during the past year a formal agreement was entered into with the inventor to allow of our employing as many as we wish over our Persian Gulf Division. Owing to a slight misunderstanding during my absence from England, some delay (referred to in Mr. Mance's Report) took place in shipping the additional instruments wanted, but the difficulty was overcome on my return, and the Department is now completely supplied. Mr. Mance has devised a new system of translation for use with this relay, and has thus increased the signalling speed in a marked degree.

Brown and Allan relay.

21. During the year the new cable factory at Manora was completed, and I was much pleased with the building and with the new machinery when I inspected the place in January last. Fifty-five miles of old cable were thoroughly overhauled and made almost as good as new. The effect of the establishment of these works will be that at a comparatively small annual outlay for wire and taping, we shall gradually renew the cables which are now respectively 18 and 12 years old.

Cable work at Manora-Karachi Harbour.

22. The Mekran Coast land line has been greatly improved by the extended use of the oil insulators introduced by Messrs. Johnson and Phillips. The length of this section is now 680 miles, carrying 1,360 miles of wires, the slight addition to the length of last year being due to a diversion which has been carried out between Karachi and Ormara. Formerly, the line zigzagged up the lofty Malan Cliff close to the sea, and accidents were somewhat frequent and repairs most difficult to effect.

Length of Mekran land line.

23. The route selected by Mr. Newnham, the Assistant Superintendent in charge, after a careful survey of the country, cuts out more than 50 miles of the old line and runs inland. It is slightly longer, but much more accessible than the former route. Mr. Ffinch speaks most warmly of Mr. Newnham's exertions and of the great advantage of the change from the Malan. In order to save expense, the diversion was carried out slowly during three seasons, and almost entirely by the permanent staff employed on the line. Both the Assistant Superintendents on the Mekran Coast Telegraph, Messrs. Newnham and Pierce, have been very assiduous and successful in their labours to improve this important section.

Diversion of land line at Malan Cliff.

INTERRUPTIONS.

24. The winter of 1880-81 was one of almost unexampled severity all over Persia, and, notwithstanding the efforts of our maintenance staff, the interruptions were, in com-

Unprecedented severity of season in Persia.

parison with previous years, numerous and of long duration. In December, large tracts of country, especially in the south, were literally flooded by continuous heavy rain which not only washed down many telegraph poles but made travelling impossible. In the alluvial plain of Persepolis the damage to our line was very serious, and as nearly all the bridges over the narrow deep streams were carried away, repairs to the line were most tedious and difficult to effect. In one place near Bushire the Inspector succeeded in restoring communication through one wire by arranging relays of men to hold up the posts until the water subsided sufficiently to admit of their being replaced. In the case of another break near Shiraz, the Inspector had to open his way at considerable risk through the deep drifts of snow by driving bullocks in front of him. Heavy rains all over Persia were succeeded by snow and hard frost, so that the wires were literally broken down by the weight of the icicles and frozen snow, and it is not surprising that the interruptions to traffic, that is to say when all three wires were disabled, amounted in the aggregate to 7 days 19 hours and 55 minutes. In the previous year they were but 4 hours and 40 minutes. The interruptions of 2 wires amounted to 8 days 12 hours 45 minutes as compared with 2 days 23 hours 24 minutes, and of 1 wire to 19 days 15 hours 21 minutes compared with 13 days 4 hours 9 minutes in 1879-80.

Interruptions in Persia.

25. I can from personal observation assert that the increased interruptions were not due to diminished activity or attention on the part of the staff, nor to decay of the posts or wires, but solely to the disastrous weather which prevailed.

26. In the Persian Gulf through communication was not once interrupted during the year under reveiw. The gutta-percha Bushire-Jashk cable was however broken for 175 days 15 hours, and has in fact only been mended in August 1881. It might have been put right when we pleased, but the alternative India-rubber cable was well able to carry all our business, and as stated above, our vessel, the *Patrick Stewart*, had been ordered into dock at Bombay just as the last cable defect in the Gulf was developed.

Interruptions in Gulf.

27. The Mekran land line was out of order for 169 hours 10 minutes, chiefly in consequence of landslips at the Malan Cliff, which dangerous place is now avoided by the Buzi diversion mentioned in para. 23.

Interruptions on land line, Mekran Coast.

28. The total interruptions to traffic on the Teheran route amounted during 1880-81 to 14 days 18 hours 47 minutes, of which 6 days 22 hours 52 minutes are chargeable to the Indo-European Company's section between London and Teheran, and 7 days 19 hours 55 minutes to our own Persian Section between Teheran and Bushire. The Turkish lines were broken for 147 days 4 hours and 16 minutes.

29. It may therefore be pointed out that, notwithstanding the bad breaks in Persia, the Indo-European "through" line was interrupted in 1880-81 rather less than the preceding year, *viz.*, 14 days 18 hours 47 minutes, as compared with 15 days 14 hours 27 minutes as entered in para. 24 of my last year's Report.

Interruptions on through line somewhat less than last year.

TRAFFIC.

30. The rules and tariffs of the London International Convention came into force on the 1st April 1880, and remained in operation during the year.

London Convention in force.

31. In the tariffs the only alteration affecting India was an increase of 10 centimes to the terminal rate which, having been unsuccessfully applied for at the Rome Conference in 1872 and at the St. Petersburg Conference in 1875, was at length accorded at the London Conference of 1879. To meet this increase in India the British Post Office and the English Companies raised their collection in the United Kingdom from 4*s*. 6*d*. to 4*s*. 7*d*. per word, although the former amount would have sufficed to cover the revised charge of fcs. 5·60. The raising of the collection at the English end of this lines was opposed by this Department, but without success.

Slight change of tariff.

Total revenue.

32. In 1880-81, as stated above, our receipts were £ 88,475 made up as follows:—

	£
Earnings	69,192
Profit from common purse	18,887
Miscellaneous	396
TOTAL	88,475

This is actually the largest revenue to the Department since the rival Suez line was completed.

Remarks on proportion of work done by the two main systems.

33. Although the earnings, £ 69,192, are some £ 5,000 in excess of those of last year, the proportion of messages carried by the Department has not kept pace with the business done *viâ* Suez. The Eastern Company have one enormous advantage over ourselves in the circumstance of their owning special offices in Liverpool and Manchester besides those in London, with wires from those important cities to the metropolis. The conveniences thus offered to the mercantile public are great, and since the close of the year under review, the whole question has been carefully considered by the Indo-European Company and myself, and with the approval of the Secretary of State, measures will shortly be adopted which will, we hope, tend to improve our earnings and lessen the profit we now derive from the joint purse.

34. Last year we earned 80 per cent., this year 78 per cent., of our total revenue.

Remarks by Mr. Brasher.

35. In relation to this question of why the Red Sea line succeeds in obtaining more than its former share of the public patronage, Mr. Brasher, after enumerating several reasons, observes that "the Eastern Company's Association with the Extension Company is so close that the latter gives it practically all the Far East traffic. The Indian Government having from the outset granted to the Extension Company the privilege of an unconditional free label across India, the Extension Company takes advantage of it to label all its traffic *viâ* Suez. By International rules, it is the senders of the telegrams who ought to place the labels on their messages, the Administrations having only the reversion of this right if the senders fail to make use of it.

"I do not know what was the intention of Government in granting the free label to the Extension Company, without a guarantee that it must be written by the senders and at their own free will; but in the days of our strongest competition with the Eastern Company, conclusive evidence used to be laid before the Indian Telegraph Department that residents in the Far East were not allowed the power to label their homeward messages by any other than the Eastern route. No effective action was, however, apparently taken on this evidence, and the same state of things still exists up to the present day.

"The fact of messages coming home from the Far East *viâ* Suez, leads to messages going out to the Far East *viâ* Suez, and the quasi-monopoly of the Far East traffic thus secured to the Eastern Company has given to that Company a great deal of Indian traffic also, for merchants and banks doing business with India and beyond naturally prefer to send all their messages by one route and so avoid multiplying their accounts. The remedy, so far as practicable, would be for Government to withdraw the right of way across India for the label on Far East messages except where it was added by the sender. Free transmission should apparently be for the public label only, and not for that of the Extension Company. Messages not labelled by the public should be sent home from India by the route working best, in accordance with Reg. XXXVIII of the London Convention.

"As its association with the Extension Company's lines beyond India gives the Eastern Company an enormous advantage in the East, so the possession of Branch Offices at Manchester and Liverpool, with special wires to London, gives it the bulk of the provincial traffic of the United Kingdom, for no merchants will use the omnibus lines of the Post Office where special wires exist and are available for their service.

"The only means of recovering our share of the provincial traffic of the United Kingdom will be for the Indo-European route also to rent special wires to Manchester and Liverpool, and this is being done."

36. It may be interesting to note that prior to the establishment of the Indo-European and the Eastern Companies in 1870 when the entire traffic passed by the lines of this Department and across Turkey, the average number of paid words per annum was about 755,000.

Number of paid words which passed during year.

37. The number, counting the traffic *viâ* the Persian Gulf and *viâ* the Red Sea combined, has increased to 3,187,211 during 1880-81, of which 2,303,721 were transmitted by the Eastern Company and 883,490 by ourselves. There were besides messages between the several Gulf stations, between Persia and Turkey, &c., which are distinct from the joint purse messages and which raise the total number of paid words from 883,490 to 924,292.

38. During the year moreover 612 Government press messages or 43,851 words of the net value of Rs. 38,369-12 were despatched from Karachi to the Resident at Bushire without charge to Government.

39. Mr. Herbage in his Report gives the following table of the annual growth of the traffic over the Gulf cables during the past four years which shows that since 1877-78 there has been the very substantial increase in—

	Per cent.
Messages	70½
Number of words	55½
Net receipts	74
Gross value	79

Year.	Number of messages.	Containing words.	Net receipts to the Persian Gulf Section.	Gross value of traffic.
			Rs. A. P.	Rs. A. P.
1877-78	29,363	601,523	3,72,672 8 0	9,04,949 14 0
1878-79	35,645	701,826	4,46,070 14 0	10,97,976 3 0
1879-80	42,487	872,796	6,01,023 4 0	13,97,687 1 0
1880-81	50,059	924,292	6,48,080 4 0	16,19,846 11 0

Speed of transmission.

40. The mean rate of transmission between London and Karachi was highly satisfactory: the average time occupied being precisely the same as last year, *viz.*, 39 minutes; the time between London and Calcutta *viâ* Teheran was 1 hour 18 minutes against 2 hours 22 minutes *viâ* Suez where the traffic was, as already stated, much heavier.

Irregularity of the working *viâ* Turkey.

41. The working *viâ* Turkey has been irregular and unsatisfactory as compared with that of last year. This may be accounted for in great measure by the severity of the winter and the heavy floods between Baghdad and Bussorah.

Accuracy of the signalling.

42. The accuracy of the signalling has been decidedly good. The errors made on the Persian Gulf Section were 0·301 per cent. of the words transmitted. Lieutenant-Colonel Smith's return for Persia has not been made out on a correct principle: errors classed as "extremely trivial" not having been noted at all. I have drawn Colonel Smith's attention to this matter and have instructed him in future to enter *every* mistake, no matter how insignificant in appearance.

Remarks by Mr. Herbage.

43. Mr. Herbage concludes his annual letter as follows:—

"The Report for 1879-80 showed most satisfactory results in traffic, speed and accuracy, and although during the year under review our transactions have not developed in the same proportion as in the preceding year, yet they are in all particulars favourable and progressive, and may be briefly summarized under one head."

INCREASE.

	1880-81 compared with 1879-80.	1879-80 compared with 1878-79.	Total increase for past 2 years.
Number of messages	17¾ %	19 %	36¾ %
Number of words	6 %	24 %	30 %
Net receipts, Persian Gulf Section	7¾ %	34 %	41¾ %
Gross value of traffic	23 %	27 %	50 %

Objection rather generally entertained to one of the new Convention Rules.

44. Under this heading "Traffic" I may allude briefly to one of the new rules of the London Convention which is considered faulty by the Indian Department and my own. I refer to Reglement XIX relating to rectifying messages. It would be inconvenient to enter fully into the matter here, and I will content myself with stating that I am now in communication with the Indian Department and the London Companies on the subject, and I hope some method may be devised of removing the difficulty which at present certainly exists.

INSPECTIONS, &c.

Lieutenant-Colonel Smith's inspections in Persia.

45. At the beginning of the year Lieutenant-Colonel Smith, the Director, had just returned from his inspection of the lines between Teheran and Bushire, and in the autumn he accompanied me again, returning to his head-quarters in January 1881. Mr. Ffinch visited the Mekran land line and its stations in September 1880, and subsequently in January he and I inspected all the cable and land line offices from Fao to Karachi.

Mr. Ffinch in Persian Gulf.

Mr. Palmer's inspection of the Head Office at Karachi.

46. During the year Mr. Palmer, the Examiner of Telegraph Accounts, was good enough to visit Karachi at my request, and he examined very closely the system of accounts and the various forms in use. He suggested some valuable modifications of the latter and since his inspection, we have been able to do away with a considerable amount of clerical work at the Gulf head-quarters. Mr. Palmer afterwards informed me that he was much pleased with the way in which the work was carried on at Karachi.

Journeys of Director-in-Chief during 1880-81.

47. My own journeys during 1880-81 were as follows:—In May I received orders from the Secretary of State to proceed to Constantinople to re-open negotiations with regard to the Fao line of telegraph. The idea was to work the wire which connects Constantinople with the Persian Gulf cable at the cost of the joint purse. Difficulties, however, arose soon after I had commenced talking the matter over with the Turkish Director General, but they were by no means raised by the latter. The English Companies who are with this Department parties to the joint purse, withdrew their consent to aid in the project unless certain terms (which had no direct connection with Turkey) were granted them by the Government of India. These terms not being considered reasonable, it was decided that I should abandon the attempt, and I accordingly returned to London at the end of July.

48. In October I started once again for Teheran travelling out by Russia and the Caspian Sea. On this occasion, instead of landing at the usual port of disembarkation, Enzelli, I left the steamer at Meshed-i-Sar, considerably further east than the former place, having availed myself of the opportunity of seeing the Russian stations of Krasnovodsk, Chikishlar and Ashouradeh on my way.

49. A full account of my journey was addressed to the Under Secretary of State on the 22nd April 1881, and a copy forwarded to you on the 27th with my note No. 190.

50. It will therefore be unnecessary for me to describe my inspection at any length in this Report.

51. Colonel Smith marched with me from Teheran on the 21st November, and we continued our travels in company along the line until the 28th December. A severe attack of illness brought on by the cold and wet obliged Colonel Smith to turn back when nearly at the end of the journey. On the 31st I succeeded, after some difficulty, in reaching Bushire.

52. Here I was met by Mr. Ffinch and the cable steamer *Patrick Stewart*, and I visited all the offices at Fao-Bushire, Henjam (then being dismantled), Jashk, Charbar, Gwadur and Ormara, eventually reaching Karachi on the 18th January 1881. Thence I proceeded to Calcutta, where I remained about a fortnight, during which time I had the honor of fully discussing with yourself the several matters connected with this Department which required consideration. I then returned to England, where I arrived on the 10th March.

ESTABLISHMENTS.

Changes effected in Persian staff.

53. In Persia some changes in the Establishment were made during the year. Lieutenant Wells, R.E., was appointed Assistant to the Director, and the two Superintendentships were done away with. On this point Lieutenant-Colonel Smith writes as follows:—

Lieutenant-Colonel Smith's observations.

"In the old arrangement the line was divided into two Divisions, each under a Superintendent, who had charge both of the line maintenance and of the offices, and who

prepared and submitted all the accounts of the Division. The local traffic accounts and checking of messages were specially provided for in the budget. The survivor of the two Superintendents, Mr. Daniell, having become supernumerary, as specially sanctioned by Government, I gave him, under the new organization, charge of all the expenditure accounts, also of the local traffic accounts and the checking of messages. Each expending officer keeps an imprest account, and one general account of expenditure for the whole Department is prepared by Mr. Daniell, and submitted monthly to the Examiner of Telegraph Accounts. The line maintenance is placed under the Assistant Director, and the offices under the Assistant Superintendents. The new organization will, I have every reason to believe, work well."

54. In the Gulf Division no changes worthy of special remark were introduced during the year. Some reductions were made as soon as Henjam Station was closed, and proposals for further economies have been submitted for the approval of Government.

DEPARTMENTAL STEAMERS.

Improvements in the *Patrick Stewart*.

55. The cable steamer *Patrick Stewart* has, as shown in Appendix D, been very busy throughout the year. I spent 14 or 15 days on board in January, and was exceedingly well pleased with the vessel's accommodation and equipment. As I have had occasion to report to the Government, the excessive rolling in a cross sea was the great defect of the ship, and I am now happy to state that the measures adopted by the Bombay Marine authorities have completely fulfilled their object, and I learn from Captain Bishop that the ship is now perfectly steady and comfortable.

56. The *Amberwitch* was transferred to the Marine Department, and the steam barge *Rose*, no longer wanted, was sold to the Karachi Harbour Board for Rs. 10,000.

STORES.

Expenditure of material in the Persian Gulf.

57. During the year 1880-81 very little was expended in Persia under the head of Stores. But, owing to the great number of interruptions on the cables, an unusual quantity of material was used in the Gulf Division.

At the close of the previous year —

	Rs.
The balance of stores in hand was	2,56,652
The receipt during the year 1880-81	47,034
TOTAL	3,03,686
The issues amounted to	1,11,652
Leaving a balance of	1,92,034

to be carried forward on the 31st March 1881. Including the outlay of cable on the Henjam Diversion, 47·11 knots of gutta-percha cable were laid during the year and 2·54 of India-rubber, leaving a stock in hand of 41·94 knots gutta-percha and 14·77 India-rubber.

Remarks on recent breaks of both the Eastern cables. These, however, occurred in 1881-82.

58. The conduct of the staff has been, generally speaking, excellent, and I shall on a future occasion point out how well the duties of the Department were carried on during the recent interruption of the Eastern Company's system. One of that Company's cables was broken early in June 1881, and, not long afterwards, the second was also interrupted, so that the whole of the traffic between India and the West was for a time thrown on our lines. Notwithstanding the fact that one of our cables was out of order at the same time, the work of some 700 to 800 messages per diem was carried on by the remaining single conductor with gratifying efficiency. Much credit for these results is due to Captain Gabler, acting for Mr. Ffinch, and especially to Mr. Mance.

Conduct of staff.

59. Lieutenant-Colonel Smith, R.E., in Persia and Mr. Ffinch in the Persian Gulf, with their Assistants, have performed their duties during the past year in a thoroughly satisfactory way, while Mr. Mance and Captain Bishop have been almost constantly engaged in the arduous work of cable repairs. To all these officers as well as to Mr. Brasher, to Mr. Herbage, and their Assistants, my thanks are due for the results above set forth, which show, I think, that the history of 1880-81 has been the most encouraging, so far, in the annals of the Indo-European Telegraph Department.

APPENDIX A.

INDO-EUROPEAN GOVERNMENT TELEGRAPH DEPARTMENT.

Summary of Expenditure on Capital Account to 31st March 1881 (prepared partly from telegrams).

APPENDIX D.

The work done by the *Patrick Stewart* during the year is detailed below—

Date. From			Date. To			Particulars.
April	1,	1880	April	15,	1880	Proceeded to Persian Gulf and repaired fault in the Henjam-Bushire Section of the India-rubber cable. Returned to Karachi.
„	16,	„	„	27,	„	Lying at Karachi.
„	28,	„	May	1,	„	On passage to Bombay, carrying stores and passengers.
May	2,	„	„	3,	„	Discharging stores and passengers.
„	4,	„	„	14,	„	Docked for scraping, painting ship's bottom, drawing stores. Hauled out of dock.
„	15,	„	„	21,	„	Employed in taking in iron ballast, Government stores, specie, &c.
„	22,	„	„	25,	„	On passage to Karachi.
„	26,	„	July	6,	„	Lying at Karachi.
July	7,	„	„	16,	„	Proceeded to Persian Gulf and repaired fault in the Jashk-Henjam Section of the gutta-percha cable. Returned to Karachi.
„	17,	„	Sept.	10,	„	Lying at Karachi.
Sept.	11,	„	„	29,	„	Proceeded to Persian Gulf and repaired 3 faults—one in the Jashk-Henjam Section and two in the Henjam-Bushire Section, also carrying stores and passengers to the stations. Returned to Karachi.
„	30,	„	Oct.	31,	„	Lying at Karachi.
Nov.	1,	„	Nov.	3,	„	On passage to Bombay, carrying stores, troops, followers, passengers and mails.
„	4,	„	„	12,	„	Discharging stores, &c. Hauled into dock, cleaning and painting the ship's bottom, drawing stores, &c.
„	13,	„	„	14,	„	Hauled out of dock. Coaling and preparing for sea.
„	15,	„	„	20,	„	On passage to Karachi *viâ* Pusnee and Ormara, bringing the Deputy Director from Pusnee.
„	21,	„	Dec.	4,	„	Lying at Karachi, taking in cable, stores, &c., preparatory to leaving for the Persian Gulf.
Dec.	5,	„	Jan.	18,	1881	Proceeded to Persian Gulf with the Deputy Director on annual tour of inspection and reliefs for stations. Repaired Henjam-Bushire Section of cable. Proceeded on special duty to Behrein with the Political Resident in the Persian Gulf. Proceeded to Fao with the Director-in-Chief and returned to Karachi, calling at all the stations.
Jan.	19,	1881	Feb.	7,	„	Lying at Karachi.
Feb.	8,	„	„	24,	„	Proceeded to Persian Gulf; repaired one section of cable and carried out the Henjam diversion; returned to Karachi calling at Jashk for passengers.
„	25,	„	Mar.	11,	„	Lying at Karachi, removing cable gear, &c., preparing to proceed to Bombay. Refitting ship to proceed to Gulf to repair cable.
Mar.	12,	„	„	17,	„	Proceeded to Persian Gulf, and repaired Gwadur-Jashk Section of gutta-percha cable; returned to Karachi.
„	18,	„	„	20,	„	Lying at Karachi, receiving in stores, &c.
„	21,	„	„	23,	„	On passage to Bombay, carrying stores, troops, &c.
„	24,	„	„	31,	„	Discharging stores, &c., awaiting admission into dock for repairs and alterations (which took place 21st April).

J. U. BATEMAN-CHAMPAIN, *Lieut.-Col., R.E.,*
Director-in-Chief.

The 25th August 1881.

APPENDIX E.

ADMINISTRATION REPORT, 1880-81.

The Engineering staff has been as fully occupied in repairing the cable both on shore and at sea as during the preceding year. The number of faults removed from the cable during deep sea repairs is exactly the same as in

1879-80, but there has been in addition the diversion of the cable from the Henjam Station, and an amount of work at Manora far in excess of that carried out during any previous year.

FAULTS.

2. The total number of faults which occurred during the year on all sections of the cable was—

12 deep sea faults,
and
4 faults in harbour and camp cables.

3. The faults in the Karachi Harbour cables require but little comment. Three were caused by the perishing of the gutta-percha core in dry ground and one by a bugla anchoring close in shore, and fouling the cable with her grapnel. These faults were repaired without difficulty, and required only a trifling expenditure of cable.

4. The whole of the deep sea faults were caused by corrosion of the guards at points where the cable rested on an uneven bottom. In the majority of cases the core of the cable has gradually stretched at a weak place in the iron sheathing until the copper conductor has parted inside the percha. This is a description of fault with which we are now tolerably familiar. Wherever these interruptions occur, it is invariably noticed that the cable has only been touching the ground at intervals of from ten to thirty yards. The growth of marine life *round* the cable proves this conclusively. As a general rule, these irregularities in the bottom are extremely shallow, and the strain on the cable necessary to prevent it resting fairly on the bottom must therefore have been considerable. As wire after wire of the outside guards perishes by the corrosion which always takes place when the cable is not resting in the mud, the remaining wires straighten themselves out under the strain, and the core must of necessity stretch to accommodate itself to the elongation of the outer covering. If the strain on the cable as it rests at the bottom does not exceed three hundredweights, no fracture will occur unless the cable is exposed to some chafing action, but should the strain approach four or five hundredweights, the core, directly it loses the support of the iron guards, must either stretch or break. A length of two or three feet will stretch as much as four or five inches before the copper conductor parts, and after this occurs, the percha will occasionally stretch for two or three inches additional before giving way. This being the case, it may easily be understood that many such weak places might exist at which the tension has been relieved and reduced below the breaking strain by a slight elongation of the core, and, if at such points, no chafing action subsequently occurs, the cable, either imbedded in mud or protected by a growth of shell fish, may remain without further injury for an indefinite period.

INTERRUPTIONS.

5. The following interruptions have occurred on the various sections during the past year:—

Fao-Bushire.—Communication always perfect.
Bushire-Jashk (India-rubber).—Communication always perfect.
Gwadur-Manora.—Communication always perfect.
Jashk-Gwadur.—Interrupted 6 days 19 hours.
Bushire-Jashk (old gutta-percha).—Interrupted 175 days 15 hours.

6. The latter length includes what was formerly designated the Bushire-Henjam and Henjam-Jashk sections. The number of faults which occurred in this section was eleven (the same as during the previous year). But the unusual length of time during which this cable has been interrupted is due chiefly to the fact that, to avoid the necessity for such frequent repairing expeditions, the work was occasionally deferred for a while to enable two or more faults to be removed during the same trip. The last interruption occurred a few days before the end of the official year, and this fault, which is in the neighbourhood of Mussendom, still exists in consequence of the cable ship *Patrick Stewart* being under alterations in Bombay and not available for work. One

line, however, is, and has always been, in perfect order during interruptions on the alternative section, and no stoppage of traffic has occurred on the cables during the year. As a matter of fact, perfect communication between Karachi and Bushire has now been maintained continuously on the Persian Gulf Line for upwards of thirteen years.

7. As the Bushire-Jashk cable is now, in consequence of the extensive diversion carried out in February last, altogether removed from the island of Henjam, in the vicinity of which the ground has proved to be very unfavorable for a cable, it is to be hoped that interruptions on this circuit will be less frequent in future.

REPAIRS AND DIVERSIONS.

8. The twelve deep sea faults necessitated nine distinct repairing operations in the execution of which and carrying out the diversion of the Henjam cable the engineering staff made six journeys with the repairing vessel *Patrick Stewart*, traversing during the year over 9,000 miles and being absent from headquarters 82 days. The particulars of the various repairs are shown in Appendix B, to which the following details may be added with advantage:—

	Knots.
The average difference between the assumed and actual position of the faults was	·25
Average extent of cable disturbed during the year in repairing each fault	2·25
Average amount of cable expended from stock in the removal of each fault	2·40
Average amount, each repair, of old cable left on the ground unrecoverable	·45
Average amount, per fault, of good cable recovered fit for re-use at sea	·55
Average, per repair, of cable recovered useless for sea work and only fit for stripping for sake of core	1·25
Average quantity of good core in long pieces recovered, per fault	·30

Much of the cable recovered during the Henjam diversion had only been down a short time, and is consequently fit for re-use at sea.

9. The average amount of cable disturbed to repair each fault during 1879-80 was 1·79 knots; during 1880-81 the average was 2·25 knots, and this will probably increase with succeeding years, as the increasing age of the cable will render it advisable to make more extensive renewals than formerly at every repair.

HISTORY OF THE CABLES DURING 1880-81.

Fao-Bushire, 152·61 knots.

10. This section has given no trouble whatever, and its insulation remains unaltered.

BUSHIRE-JASHK (GUTTA-PERCHA CABLE).

504·19 knots.

11. This cable, at the time of the last annual Report, was divided at the island of Henjam, into two sections, designated the Bushire-Henjam and Henjam-Jashk cables; their lengths being respectively 362·1 and 142·71 knots. On the 11th December the island was abandoned as a telegraph station, and the cables joined direct a short distance from the beach, thus cutting off the station from telegraphic communication. During the month of February the course of the cable was diverted to the southward of the island in order to avoid the unfavorable ground in the immediate vicinity of the station, where frequent interruptions have occurred. About 8 miles of cable to the eastward of Henjam and 12 miles to the west were picked up during the diversion, and 18 miles expended from stock to relay the line by a more direct route to the southward of the island. As a good deal of the cable recovered will be fit for re-use after repair, the diversion may be considered as having been effected without any cost to Government. The station of Henjam was useless so far as any assistance to the working of the cables is concerned, while, looked at from an engineering point of view, the removal of the cable to better ground will be a decided benefit. One fault existed in this section at the commencement of the year, and one now remains unrepaired in consequence of the absence of the

repairing steamer, but eleven fresh defects occurred during the year 1880-81, six being to the east of Henjam and five to the west towards Bushire. Notwithstanding the numerous repairs, the insulation of this section, just previous to the development of the last fault, stood at 215 megohms per knot, being a little higher than the combined insulation of the two sections during the corresponding month for 1879-80.

BUSHIRE-JASHK (INDIA-RUBBER).

498·46 knots.

12. No repairs have been necessary in connection with this section. Its insulation, although usually equal to that of the gutta-percha sections, is variable in consequence of the existence of a very minute defect, too small to be localised or to interfere in any way with the working.

JASHK-GWADUR (GUTTA-PERCHA).

272·01 knots.

13. This section was interrupted for six days in consequence of a fault which occurred off Charbar. As the alternative circuit (the land line) was in good working order during this period, no stoppage to traffic occurred. The cable at this part of the line appeared in fair order excepting near the locality of the fault where the ground appeared uneven.

GWADUR-MANORA (GUTTA-PERCHA).

270·56 knots.

14. No repairs have been necessary in this section.

HARBOUR CABLES, Nos. 1, 2 AND 3.

15. But four faults have occurred during the year. Some repairs to the camp cables having become necessary under the Sind, Punjab and Delhi Railway near the Karachi Office, advantage was taken of the opportunity to lengthen the iron piping put down some years ago under the original line of rails. Since that time the width of the railway at this point has nearly doubled in consequence of the addition of sidings. To reach the cables it was necessary to open a trench under the rails ten or twelve feet deep. To avoid this tedious operation in future, the pipe has been lengthened and the two ends brought just beyond the limits of the railway. Lengths of core have been substituted for cable and fresh pieces can be inserted in a few hours, whenever necessary, by simply opening the ground at each end of the pipe, which at these points is within two feet of the surface.

16. The other work done in connection with these cables has been unimportant.

CABLE LAND LINES.

17. Communication between the cable houses and offices is now generally maintained through the land lines insulated with Johnstone and Phillips fluid insulators, and carefully protected with lightning guards. It is proposed also to erect short land lines over such sections of the Manora cables, where it is impossible to avoid the dry sand in which cable rarely lasts more than three or four years. These short highly insulated land lines have hitherto answered very well in connection with the line and give much less trouble than the under-ground cables laid in dry soil between the offices and cable houses. If eventually the land lines are found unsatisfactory in consequence of atmospheric disturbances, it will be advisable to substitute a system of leads conducted through pipes which can always be kept filled with water in the manner recommended by Mr. Latimer Clark.

18. A new form of cable house has been adopted on the West Bay at Gwadur; instead of being buried outside, the slack cable is coiled in a well to which the sea water has access immediately under the flooring, so that the ends can be cut at any time without any trouble.

19. Attention has been given to the improvement of the lightning guards and a new form of lightning guard clamp has been designed, less liable to damage in exposed positions than the present platinum spirals.

ELECTRICAL-WORKING TESTING.

20. No change has been made in the system of testing the lines. The positions of faults have been determined with accuracy, and the electrical condition of the cable compares on the whole satisfactorily with its insulation at the date of the last annual Report (Appendix C). The Brown Allan relay has been in continuous use on the main circuit throughout the year, and has given every satisfaction. It is to be regretted that more of these valuable instruments have not been available for work, as two are urgently required for the second cable between Bushire and Jashk.

21. The question of Duplex telegraphy for the Persian Gulf cables has again been carefully considered and fully reported on, but in consequence of the traffic being mostly in a continuous stream in one direction at the same time, it has been considered advisable for the present to devote our attention more particularly to increasing the speed of our ordinary direct working. A new system of translation, especially adapted to the requirements of the Brown Allan relay, has been designed to provide for the contingency of our being obliged to increase the working capacity of the line by the introduction of translation at Jashk; and as soon as additional relays are supplied, the carrying capacity of the line will be considerably increased.

EXPENDITURE OF CABLE AND CABLE IN STOCK.

22. The usual statement of cable in stock is given in Appendix D. Our shore end cable in hand has increased to 9 miles in consequence of the recoveries during the Henjam diversion. The reserve of main cable has decreased 22·19 knots, leaving only 30 8 miles of cable in stock. As nearly the whole of this has been either submerged or in the tanks at Manora for more than 17 years, it cannot be expected to be in very good condition. Re-serving it with Johnson and Phillips taping has strengthened it to a certain extent and enabled us to handle it with great facility, but it contains many joints, numerous splices, hundreds of petty repairs, and the sooner it is laid the better. The quantity of short pieces in hand has also decreased considerably, 4·38 knots of the best having been selected and carefully repaired to form a portion of the Henjam diversion, in the laying of which plenty of slack was allowed, and no strain whatever put upon the cable. The stock of good India-rubber cable remains the same, there having been no work in connection with this section, but some short pieces which tested bad, and of which the sheathing was in very indifferent condition, have been condemned and struck off charge.

23. During the repairs of the twelve faults, 28·64 knots of cable were laid, and as a set-off, 6·54 miles of the cable picked up was fit for re-use, showing a net expenditure on account of repairs during the year of 22·1 knots.

24. In carrying out the Henjam diversion the amount of fairly good main cable recovered about equalled that expended from stock, while the 4·38 knots of short pieces expended have been replaced by the much more valuable shore end cable now brought on charge as recovered during the diversion.

MANORA.

25. A very convenient cable factory has been erected during the year, and the cable machinery obtained from England for the purpose of re-serving the core of our present cable with new iron sheathing has been erected in readiness to commence the manufacture of new cable. This work will be taken in hand as soon as the examination, repair and taping of all the old cable on hand is completed. The taping machinery, which binds together and strengthens old cable by the application of a double serving of tarred tape, has been in

active work, upwards of 55 miles having been re-served during the year. The introduction of this machinery has proved of the greatest value; but for its assistance many miles of old cable would have been lost, as, in consequence of its increasing age, it becomes impossible to handle it without developing fresh defects at every weak place in the iron guards. The serving of tarred tape prevents this in a very great measure, and the cable passes over the paying out drum without injury. It must be remembered that, although wanting in the strength of new cable, our old stock, once safely laid on favorable ground with a fair allowance of slack, is practically as good as the best. Before passing through the taping machine, the cable is carefully cleaned and every defective place in the guards repaired. The taping therefore of the abovementioned 55 miles represents three or four months' work for the greater portion of the Manora establishment.

26. A small set of stone lascars' quarters, containing four rooms, has been built in substitution of the previous mat huts which required renewal, and a commodious black-smiths' shop has been erected in place of the old one pulled down to allow of the new factory being built.

27. The new landing place, outside the groyne fronting the telegraph compound, has been completed, and the embankment leading to it considerably strengthened. Advantage is being taken of the height of the new Bunder to deliver, through iron piping, the water required by the establishment, direct from the water boats into the tank shed and houses occupied by the European subordinates.

28. The telegraph works were inspected by His Excellency the Viceroy duing his visit to Karachi in November last, and subsequently by Sir James Fergusson, the Governor of Bombay; on the latter occasion the new cable machinery was in a sufficiently advanced state towards completion to allow of the various stages in cable-making being shown experimentally.

STEAM BARGE "ROSE."

29. This vessel has been extensively used during the year for the embarkation of troops at Karachi, under the superintendence of the Port Department, to which she has now been transferred on sale for the sum of Rs. 10,000. Her services have not been required by the Telegraph Department for some years past, and her transfer will result in a saving of the stores and labor required to keep her in thorough order.

GENERAL REMARKS.

30. In a brief statement (Appendix E) the number of faults is shown which have occurred during the past ten years in each section of the cable. The sudden increase in the interruptions on the Bushire-Jashk gutta-percha cable which is observable during the last two years, coupled with the absence of any signs of such deterioration in the other sections, points to the conclusion that the ground on which it rests is not so favorable for the life of a cable as at other parts of the line. It is extremely fortunate that the India-rubber cable, which throughout its course, is laid only a few miles distant from this section, has for a long time given no trouble whatever, although now submerged for more than eleven years. This should encourage us to hope that much of the ground on which the Bushire-Jashk percha cable is laid may be of an equally favorable character, and that, although breakages at various points will be comparatively frequent while the remaining bad places are developing themselves, there will, after a time, as soon as the weak points are brigded over by the insertion of good cable, be a freedom from further interruptions.

GOVERNMENT OF INDIA.

MILITARY DEPARTMENT.

REVIEW OF MILITARY STORES EXPENDITURE FOR 1879-80.

The following is published for general information:—

Memorandum by the Accountant General, Military Department, No. 1763, dated the 15th August, 1881.

The following review of the expenditure of stores in the Military Department is submitted to Government in compliance with the orders issued in Financial Department Resolution No. 1267, dated the 21st July 1871. The Government of India had then under consideration the control which should be exercised over the indents, estimates and accounts of stores obtained from England, and decided that in addition to the checks provided by the existing system of store account and audit, a review of the annual expenditure should be prepared:—

"9. A review of this kind should be in sufficient detail to show the amount and the increase or decrease of expenditure of each of the several classes of stores; the causes of increase or decrease in the expenditure of the several articles should be explained and their cost compared with that of previous years. Instances in which the price of the more important articles obtained from England or purchased locally has exceeded former prices should be carefully noted, and also whether any extra expense or any considerable inconvenience has been incurred from unnecessary delay in supplying stores indented for on England. If there is any reason to believe that the cost of any article has been higher than it would have been if procured in some other way, it should be stated. The additional expenditure caused by the introduction of new kinds of stores or new articles of equipment, or by changes of pattern involving the condemnation of the existing stock of old pattern, should be distinctly shown, and any possible measures of economy suggested."

2. The first of the series of store reviews submitted to Government under the foregoing orders was for the year 1874-75. The materials for the preparation of these reviews were at that time very incomplete. Reports were not received from all departments or from all presidencies, nor were such as were received prepared on any uniform system, and it was evident that improvement in the form and matter of the departmental reports would be a work of time. Subsequent experience showed the desirability of issuing precise instructions for the preparation of these reports, and in the year 1878 definite orders were issued regarding the submission of two reports for each department in each presidency—one by the administrative head of the department to be styled "Administration Report," and the other by the examiner of accounts to be styled "Financial Review."

3. The reports since received show a marked improvement, but they are still far from complete, and exhibit many inaccuracies and imperfections in points of detail, which it will take some time to remedy; the transactions of the military store departments are multifarious, and comprise issues not only for military purposes but also to civil departments, local governments, native states, municipalities, and private individuals.

4. It may be here noted that revised rules for the calculation of stock book rates of Europe stores and of stores of local production or manufacture have recently been issued, which it is hoped will tend to greater accuracy in the conclusions to be drawn from these reviews, while at the same time they will reduce and simplify the work of the account department. An improved system of factory accounts has also been introduced on the recommendation of the late special committee on ordnance, of which Major-General Napier Campbell was the president.

5. As regards the expenditure of stores during the year under review, it is necessary to state at the outset that the normal rate of expenditure has been greatly disturbed by the movement of troops from all three presidencies owing to the war. The accounts are also, it is feared, to a considerable extent, inaccurate and incomplete from the same cause, and they are, moreover, much in arrears, especially in Bengal.

6. In the early part of 1877-78 the Home Government directed that, in the existing unfavourable rate of exchange, every effort should be made to reduce the payment for stores in England by substituting articles of local

production or manufacture for articles imported from England wherever this could be done with economy and without sacrificing efficiency. With the view of further relieving the store department of the India Office of petty detail, supplementary orders were issued, authorising certain stores to be obtained locally or direct from Europe, or America, through manufacturers or private agents. These instructions have since been modified in so far that all stores required from Europe must be obtained through the India Office alone, and not through private agents or by direct negotiations with home manufacturers; but the orders regarding the substitution of local products and manufactures for imported stores continue in force.

7. During the early part of this year the Government also had under consideration the question of the utilisation for army purposes of goods manufactured in the jails, and issued orders that the jails should have preference over the local markets whenever they were prepared to furnish goods at rates equal to, or not exceeding, those demanded by local contractors or traders.

8. The two statements appended to the report show—

I.—The cash expenditure in England and in India for the five years ending 1879-80.

II.—The receipts and issues in India during the same period and the store balances at the commencement and end of each of these years.

9. The following abstracts prepared from these statements exhibit the expenditure in each department for all India:—

10. The figures given as the cash expenditure differ considerably from the figures given as issues in the stock returns. An explanation of the causes of this difference was given in the review for 1878-79, and for facility of reference is reproduced here:—

"The figures for the cash expenditure differ so materially from those given as issues in the stock returns that some explanation of the discrepancy seems necessary. The cash expenditure represents simply the payments made in each year for stores, and which obviously will not correspond with the consumption of stores in the same period. Moreover, the payments for stores received in one year frequently run into the accounts of the following year; and, in the case of Europe stores, even supposing that the purchases were intended for immediate consumption, the stores paid for in one year might, owing to the date of its arrival, appear in the Indian stock accounts as the expenditure or issues of the following year. Further, in the stock accounts the stores are valued at stock-book rates, which include freight, landing, and other contingent charges, and this alone, if no other differences existed, would give divergent figures from the actual cash outlay. Again, in the case of ordnance stores, the Indian cash expenditure includes only purchases of camp equipage and of timber, coal, and other stores for arsenals, magazines, and factories; while the stock-book rates are based on valuations of the manufactured articles, which include labor and other subsidiary charges, direct and indirect, connected with the manufacture. It is thus apparent that the two sets of figures cannot correspond, even approximately."

11. The causes of increase or decrease in the expenditure of the several departments in the three presidencies are explained in detail in the latter part of this review. The following *resumé* of the course of the expenditure, the cost of the supplies and of the circumstances affecting the supply and the consumption of stores, will give a general view of the operations of the year in comparison with those of past years, following the plan indicated in the orders quoted in paragraph 1 of this report.

12. The prices paid generally for all stores, metals, &c., obtained from Europe compare favourably with the prices paid in the preceding year. The rise in the price of quinine will be noticed presently. The prices paid for local stores were also generally lower than in the previous year.

13. The supply of stores from England was made with punctuality and despatch, and no inconvenience resulted from any delay. Small purchases of Europe stores were made in the local markets to meet emergent demands on account of the war at a cost in excess of that at which they could have been imported, but this was unavoidable. The sanctioned reserves provide a sufficient margin for all ordinary requirements.

	Cash expenditure in England and in India.
	£
1875-76 ...	91,311
1876-77 ...	108,419
1877-78 ...	94,715
1878-79 ...	102,901
1879-80 ...	88,709

14. *Medical stores.*—The total cash expenditure during 1879-80 amounted to £88,709, which, it will be observed, is considerably lower than the expenditure in the four preceding years (*vide* margin). The cash expenditure represents, however, the payments for stores made during the years and not the actual consumption of stores in those periods. The issues of stores during the same period are given in the margin. The expenditure of 1875-76 was affected by the Perak expedition and the cholera and fever epidemics in Madras; that of 1877-78 by the famine in Madras; while the expenditure of the two last years of the series has been affected by the Malta and Kabul expeditions.

Years.	Europe stores.	Indian stores.	Total.
	£	£	£
1875-76 ...	102,796	23,865	126,661
1876-77 ...	96,116	23,346	119,462
1877-78 ...	93,618	29,162	122,780
1878-79 ...	87,746	33,476	121,222
1879-80 ...	78,982	42,237	121,219

15. The greater portion of this expenditure occurs in the civil departments, the demands from which are continually increasing owing to new dispensaries being opened out every year. The expenditure of medical stores for military purposes, including issues to the value of £18,747 for the army in the field, amounted to only £58,280 out of a total expenditure of £121,219. In the preceding year (1878-79) the military expenditure amounted to £54,604, of which £16,665 was extraordinary or due to the Kabul and Malta expeditions. The expenditure would doubtless have been greater, but for the partial substitution of the cinchona febrifuge (a local preparation) for quinine. The former is now extensively used in civil dispensaries, also in native military hospitals, the issues of quinine being limited to one-fourth of the quantity required, the remaining three-fourths being made up by the cinchona febrifuge. Experiments have also been made in view of ascertaining the effect of this febrifuge on British troops, but the results obtained are not as yet of so decided a character as to justify its adoption in European hospitals.

16. The extension of the use of the cinchona febrifuge is the most important point connected with the expenditure on medical stores. The price of quinine, which ranged from £4-6-9 to £5-9-4 per lb. in 1876-77, has been rising steadily ever since that year and reached £8-15-0 per lb. in 1879-80.

The price of the febrifuge is only Rs. 20 per lb. The expenditure of quinine and of the cinchona preparations during the last four years was as follows:—

Years.	Bengal.		Madras.		Bombay.		India.	
	Quinine.	Cinchona febrifuge.	Quinine.	Cinchona febrifuge.	Quinine.	Cinchona febrifuge.	Quinine.	Cinchona febrifuge.
	lbs.	lbs.	lbs.	lbs.	lbs.	lbs.	lbs.	lbs.
1876-77 ...	2,634	632	501	...	960	94	4,035	726
1877-78 ...	1,288	2,542	892	1,817	679	320	2,859	4,679
1878-79 ...	1,303	2,690	848	1,383	495	1,054	2,646	5,127
1879-80 ...	1,577	4,573	555	755	559	1,474	2,691	6,802

These figures show the great progress that has been made in the use of the cinchona alkaloids in place of quinine, and the large saving that has resulted in consequence.

17. The drugs, chemicals, surgical instruments and hospital appliances used in the department are mostly obtained by indent on England, but many drugs of local production are being gradually substituted for the imported articles. Several of the more important medicines of the British pharmacopœia are being cultivated in the three presidencies. Many of the indigenous drugs are being tried in the Calcutta hospitals and elsewhere to ascertain their therapeutic value. Considerable progress has also been made in the local manufacture of the simpler kinds of surgical instruments and in the repair of old instruments; and when the manufactories at the medical store depôts have been properly equipped, further progress in this direction may be looked for. The gain resulting from these measures has not been estimated in all three presidencies, but the reports received from Bombay show that a gain of about Rs. 9,584 resulted from the manufacture at the store depôt of medicines and instruments hitherto obtained from England, and a gain of about Rs. 30,902 from the substitution of indigenous drugs for those hitherto imported.

18. In any comparison of the cost of imported and local supplies it must prominently be borne in view that imported supplies involve the maintenance of reserves, extra storage accommodation and establishments, and a certain amount of waste and deterioration, so that, even if the rates of local supplies are slightly higher than those of imported stores, the former will still be the most economical.

19. *Malt liquor and commissariat stores.*—The cash expenditure in England and in India on account of malt liquor is given in the margin, and shows a considerable decrease in the year under review. The large reduction in the home expenditure, and the increase in the Indian expenditure, were due to the more extended use of hill beer in the Bengal Presidency, the particulars of which will be noticed further on. The expenditure of malt liquor during the last two years was, however, seriously disturbed by the movement of troops to Afghanistan, as malt liquor is not issued to troops on the line of march.

Years.	Expenditure in England.	Expenditure in India.	Total.
	£	£	£
1875-76 ...	271,760	41,527	313,287
1876-77 ...	240,360	75,491	315,851
1877-78 ...	164,822	96,565	261,387
1878-79 ...	121,376	92,163	213,539
1879-80 ...	76,552	96,783	173,335

20. The cash outlay for commissariat stores (*vide* margin) shows a considerable increase owing to the supplies required for the war. Some of these supplies were of an unusual character owing to the nature of the field of operations, namely, horse biscuits, portable food, German meat biscuits, compressed vegetables, consolidated soups, and the like.

1877-78 ...	25,615	135,030	160,645
1878-79 ...	35,244	113,503	148,747
1879-80 ...	47,180	149,512	196,692

21. The issues from stock are given in the margin, but these figures are of little use in reviewing the store expenditure, as they do not represent the entire expenditure of the department, but only of such articles as are kept in stock. These again vary considerably, as in times of scarcity, or anticipated scarcity, certain articles not ordinarily kept in stock are laid in as a measure of economy, or even necessity, for the purpose of feeding troops, horses, and cattle. Articles issued direct by contractors to the troops are not included, as they are not passed through the store books.

Years.	Europe stores.	Indian stores.	Total.
	£	£	£
1875-76 ...	552,668	331,664	884,332
1876-77 ...	469,044	387,870	856,914
1877-78 ...	365,757	316,216	681,973
1878-79 ...	310,174	301,538	611,712
1879-80 ...	277,505	361,259	638,764

22. The large increase of late years in the use of locally brewed malt liquor is a prominent feature in the expenditure of this department in the Bengal presidency, and there are grounds for hoping that in course of time the supply for the Madras army may also be procured locally. The hill beer is generally liked and in some cases preferred by the troops to English beer. The indents on England for malt liquor for the Bengal presidency have in consequence been much reduced in recent years. In 1880-81 no malt liquor was required from home for the Bengal presidency, and the demands on England for 1881-82 and 1882-83 amount to only 12,400 and 7,300 hogsheads respectively.

23. A three years' contract (for the years 1880, 1881 and 1882) was entered into with the local brewers for the supply of malt liquor at the stations of—

Agra.	Muttra.
Agra Fort.	Ranikhet.
Fatehghur.	Umballa.
Delhi.	Chakratta.
Roorkee.	Kasauli.
Landour.	Dagshai.
Amritsur	Jutogh.
Meerut.	Kangra.
Subathoo.	Bhagsu.
Solon.	Meean Meer.
Simla.	Dalhousie.
Jullundur.	Mooltan.
Bareilly.	Dera Ismail Khan.

Sitapur.	Murree.
Naini Tal.	Campbellpore.
Morar.	Peshawar.
Fort Gwalior.	Nowshera.
Jhansi.	Attock.
Ferozepore.	

The total quantity to be supplied in the three years is 97,750 hogsheads.

24. The prices paid in England for malt liquor for the three presidencies and the charges for freight are as follows:—Bengal, price £ 2-2-11 per hogshead of ale in 1879-80 against £2-13-0 in 1878-79; freight £0-5-10 per hogshead in 1879-80 against £0-4-9¾ in 1878-79; Madras, price £2-7-6 per hogshead of ale in 1879-80 against £ 2-14-6 in 1878-79; freight £ 0-10-9 in 1879-80 against £0-13-3½ in 1878-79; Bombay, price £2-8-4 per hogshead of porter in 1879-80, and freight £0-9-8.

25. The higher prices paid for malt liquor for Madras and Bombay are due to the period of shipment for those presidencies, the brewers charging more for malt liquor which they have to keep in stock for some time after the brewing season is over. The higher freights charged for shipments to those presidencies is due to the average rates for Madras and Bombay including despatches to Cannanore, Rangoon, Kurrachee and Aden, for which ports high rates are charged by shipowners, while the malt liquor for Bengal is all consigned to Calcutta, for which port favourable rates of freight are always available.

26. The rates for hill beer include the cost of carriage to canteens, the supply being made direct to regiments. The saving from its use varies with

the rate of exchange and with the prices paid for malt liquor in England. The saving on the quantity 97,750 hogsheads contracted for was originally estimated at about 13 lakhs of rupees, but the price of English malt liquor has since fallen considerably, and the saving at present rates would amount to about $3\frac{1}{4}$ lakhs of rupees.

27. Rum is supplied in Bengal by Messrs. Carew and Co., of Rosa Factory, Shajehanpur, at the rate of Rs. 1-3-0 per imperial gallon, including the cost of casks, and also including carriage to certain points on the line of railway. In Madras, by Messrs. Binny and Co., at Rs. 1-1-3 per gallon against Rs. 1-1-7 in the preceding year. In Bombay, by Messrs. Carew and Co., the Bengal contractors, at Rs. 1-7-0 per gallon delivered free of carriage at most stations against Rs. 1-7-8 in 1878-79.

28. As remarked in last year's report, an important change was made during 1878-79 in the system of supply of malt liquor and rum to British troops in India, with a view to discouraging the use of alcoholic drinks in the army, and generally of improving the *morale* of the soldier by reposing greater trust in his common sense and self-respect.

29. The following figures, showing the consumption of malt liquor and rum in the three presidencies, will indicate the effects of the new canteen system :—

Years.	Malt liquor per man per diem.			Rum per man per diem.		
	Bengal.	Madras.	Bombay.	Bengal.	Madras.	Bombay.
	Pints.	Pints.	Pints.	Drams.	Drams.	Drams.
1877-78	1·44	1·59	1·5	·55	·65	·47
1878-79	1·45	1·66	1·4	·50	·37	·47
1879-80	1·63	1·75	1·44	·49	·22	·30

30. In the Madras presidency, where the new system has been generally introduced, the consumption of rum has decreased by about two-thirds, while malt liquor has increased by only about 10 per cent.

In Bengal and Bombay the new system was only in partial operation during 1879-80; and although a slight decrease is shown in the consumption of rum and a slight increase in malt liquor, these figures must be taken with reserve, as the expenditure in those presidencies was considerably affected by the movement of troops on service, when rum only was issued, and this accounts for the increased receipts for rum as shown in the following paragraph. The experiment thus far, however, continues to work very satisfactorily.

31. In the following statement is shown the receipts obtained from the sale of malt liquor and rum in the three presidencies during the last five years :—

Years.	Bengal.		Madras.		Bombay.		India.	
	Malt liquor.	Rum.	Malt liquor.	Rum.	Malt liquor.	Rum.	Malt liquor.	Rum.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1875-76 ...	18,99,169	4,71,642	5,80,741	1,28,489	5,53,002	1,51,969	30,32,912	7,52,100
1876-77 ...	18,59,915	4,18,156	5,37,646	1,28,114	5,16,944	1,39,275	29,14,505	6,85,545
1877-78 ...	17,11,866	3,57,953	5,26,209	1,19,640	5,28,792	1,27,140	27,39,867	6,05,043
1878-79 ...	16,06,556	3,24,148	6,81,285	76,940	5,14,523	1,14,489	28,02,364	5,15,577
1879-80 ...	15,70,312	4,17,442	7,38,691	51,667	6,09,852	77,054	29,18,855	5,46,163

32. The sale of beer at 3 annas the quart under the former system of supply entailed a heavy annual loss to the State, as that price did not cover the cost of the liquor including incidental charges, sea and inland transport, &c. The increase of the price to 4 annas a quart raises the receipts by 33 per cent., so that, adopting Rs. 29,15,761 as the average annual receipts from the sale of malt liquor during the three years preceding 1878-79, the saving effected by the introduction of the new canteen system may be estimated at Rs. 9,71,290 per annum.

33. With one or two trifling exceptions, *Indian* tea is used at all stations in India. In Bengal, it was obtained at an average rate of annas 8-$6\frac{1}{4}$ per lb. against annas 8-$1\frac{1}{2}$ pie in 1878-79; in Madras, at annas 9 per lb. against annas 9-3 in 1878-79; and in Bombay, at annas 9-11 per lb. against annas 10-4 in 1878-79.

34. *Ordnance stores.*—The cash expenditure in England and in India, and the issues from stock in India, are shown in the following statement :—

Years.	Cash expenditure.			Issues from stock.		
	In England.	In India.	Total.	Europe stores.	Indian stores.	Total.
	£	£	£	£	£	£
1875-76	480,468	238,270	718,738	403,673	963,490	1,367,163
1876-77	505,267	188,848	694,115	499,671	972,406	1,472,077
1877-78	555,062	187,817	742,879	556,461	1,009,031	1,565,492
1878-79	264,885	261,423	526,308	601,074	1,365,653	1,966,727
1879-80	214,759	231,426	446,185	340,859	1,110,651	1,451,510

35. The large increase during the last two years in the expenditure of Indian stores was due chiefly to large purchases of tents and other requirements in connection with the campaign. The very large reduction in the issues of Europe stores was due to the exceptionally heavy expenditure on changes of equipment,—the issue of Martini-Henry rifles to British troops, Sniders to Native troops, substitution of rifled guns for smooth-bores in the artillery, &c.,—having been mainly completed in the previous years.

36. There is still, however, a considerable expenditure to be incurred in guns, carriages, and ammunition for the armaments of forts in India, but it may be hoped that the expenditure on ordnance stores may continue at the reduced figure in the year under review, or even at a still lower rate, and that the exceptionally heavy expenditure of the previous years will not be repeated. There is a constantly recurring expenditure, of which no doubt much is absolutely necessary, owing to the frequent changes, alterations and additions of equipment which take place every year. On this point it seems desirable to reproduce here an extract from the store review of 1876-77.

'Changes are of course necessary, more especially at home, to keep the army in an equally efficient state with the armies of other powers, and even to put it in a better position in that respect, so that superiority of arms and equipment may compensate for inferiority of numbers.

'The annexed extract from a report by a Committee of the House of Commons puts the question very clearly and forcibly, and is quoted here to show the necessity for a careful scrutiny of all proposals for change :—

"Para. 59. The defences of the Thames were re-armed about eight years ago; they are being re-armed again, and some of the former guns have never been mounted during the period between the changes. Reserves of naval stores have been returned from foreign stations, new, but quite obsolete.

"60. The progress of scientific discovery and invention renders a certain amount of waste and loss in this way unavoidable. The important question, however, remains for consideration whether, in some cases, what may appear to be a promising novelty, in the shape of a new pattern, is not too hastily adopted, and a large expenditure involved by a department which a very brief experience might prove to have been altogether unnecessary. Such a case would appear to have been in the mind of the late Controller of the Navy, who, when before the Committee, stated that on one particular occasion several hundreds of a particular pattern of gun were manufactured for the gunboats in the navy, not one of which was mounted.

"61. In the Clothing Department of the Army, the continuous change of patterns is complained of as a serious addition to the cost."

'It is the more necessary to draw special attention to this point, as proposals for changes of equipment, pattern, &c., are often unaccompanied, and in some cases necessarily so, by any very accurate estimate of cost, and are not therefore subjected to the same strict scrutiny as proposals for extra establishments, pay, &c., where the element of cost is brought into more direct prominence.'

37. These views are confirmed by the following extract from a letter addressed to the Government of Madras by Sir Neville Chamberlain, the Commander-in-Chief in that presidency, in connection with the question of the abolition of the saddle contract fund in the Madras cavalry :—

"Should Government entertain this measure, it will, of course, be necessary for all new saddles, as required, to be furnished by the State, but His Excellency believes this to be preferable to the course now pursued, for circumstances have come under his knowledge to show that saddles condemned by another branch of the service as being of obsolete pattern have been bought up as serviceable saddles for the light cavalry.

"It is the opinion of Sir Neville Chamberlain that throughout the mounted branches of the service, on the introduction of a new pattern of equipment, much money has been wasted by allowing equipment in use, whether serviceable or not, to be condemned wholesale, merely to admit of uniformity, instead of the new pattern being introduced by degrees as the old became unserviceable. His Excellency feels sure no continental nation would ever attempt to encounter the cost of such a system."

38. The substitution of brown leather for buff accoutrements for the Native army in India is expected to result in a considerable saving of expenditure, as the brown leather can be manufactured in India at a cost of about 10 annas per lb., while the buff leather has to be procured from England at a cost of about Rs. 2 per lb. The question of its further introduction for the British army in India is still under consideration. Indian-made leather belting for driving machinery is now used in all Government mills and factories in place of imported belting.

39. The new equipment regulations for the army and the code of regulations for the ordnance department, sanctioned on the recommendations of the special committee on ordnance, will effect a considerable reduction in the reserves of ordnance stores hitherto kept up, especially in small arm ammunition, guns, carriages and ordnance ammunition. A reduced scale of siege trains and ammunition was prescribed during the year.

40. During the year Rs. 55,000 was paid to Mr. Morris for his invention, by which the metal cases of fired ball cartridges are utilised for the local manufacture by regiments of blank cartridges, hitherto supplied from the small arm ammunition factories. The saving by the use of this invention is estimated at Rs. 1,20,000 per annum for all India.

41. Under the orders of Government in the Financial Department, stores issued to civil departments, except for such services as are paid out of provincial revenues, are now written off the books of the Military Department without any corresponding credit from the civil department. The effect of this change is to cause a considerable diminution in the army receipts and in the civil charges.

42. *Clothing stores.*—The cash expenditure and the issues from stock in India of clothing stores were as follows :—

Years.	Cash expenditure.			Issues from stock.		
	In England.	In India.	Total.	Europe stores.	Indian stores.	Total.
	£	£	£	£	£	£
1875-76 ...	235,171	11,615	246,786	259,348	9,375	268,723
1876-77 ...	254,290	8,252	262,542	210,415	9,300	219,715
1877 78 ...	357,701	7,066	364,767	215,940	5,287	221,227
1878-79 ...	218,602	5,843	224 115	307,244	7,035	314,279
1879-80 ...	315,164	12,708	327,872	362,394	27,404	389,798

43. The expenditure of clothing stores in the alternate years of cloth and serge manufacture does not ordinarily vary to any great extent. The increased expenditure of the last two years was due to large quantities of warm clothing having been made up for troops and followers in Afghanistan. The large increase in the consumption of Indian stores was due to emergent purchases in the local markets on account of the war, and not to any extended utilisation of local products and manufactures, for it was found that neither the jail nor the other local manufactures were able to compete either in quality or in price with imported stores.

44. Almost the whole of the stores are obtained from England, the local supplies consisting chiefly of packing materials and small miscellaneous stores.

45. The machine-made boots sent out from England were again reported to have worn badly, and had in some cases to be replaced by a fresh supply of hand-made boots. The imported knee-boots having been found to deteriorate very rapidly, owing, it was believed, to the nature of the dye used, it has been decided to send them out, of brown leather, uncolored.

46. *Marine stores.*—The expenditure is reviewed in some little detail in the latter portion of this review. The accounts were kept under a somewhat incomplete system in previous years, and are still in a transition state. The imported marine stores consist of metals, paints, canvas, oils, ropes (partially), coal (partially), chain cables, &c., while the local stores consist of timber, coals, ropes, &c.

G. CHESNEY, *Colonel*,
Secretary to the Government of India.

I.

Statement shewing the cash expenditure on Stores in England and in India during the years 1875-76 to 1879-80, for each of the several Military Departments in the three Presidencies.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN RAJPUTANA FOR THE YEAR 1880-81.

Nos. 124-132 I., dated Simla, the 26th April 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 2826S., dated 14th November 1881, from the Agent, Governor General, and Chief Commissioner, Rajputana, and its enclosures, the Revenue Report, and a Memorandum on the Report by the Chief Commissioner.

OBSERVATIONS.—The rainfall of 1880 in Ajmir and Merwara was, on the whole, below the average and unfavorable for purposes of storage. Although more or less rain fell during each of the months of July, August, and September, the intervals between the falls were occasionally very long, and only 14 falls were registered of more than 2″ in 24 hours. As the supply of the tanks is entirely dependent on heavy or continuous rain, they were only partially filled, and the small amount of water which was stored was still further reduced by the necessity for irrigating the "kharif" crops. The supply was therefore quite insufficient to meet the demand during the "rabi."

2. The direct outlay on Capital Account during the year under review amounted to Rs. 13,239, and the total direct outlay on Capital to the end of the year was Rs. 14,37,033. The total Capital outlay to end of the year, including all direct and indirect charges, amounted to Rs. 14,93,470.

3. The gross revenue assessed amounted to Rs. 79,434 during 1880-81, the average of the two previous years having been Rs. 89,795, the working expenses, inclusive of indirect charges, amounted to Rs. 40,635, the average of the two previous years having been Rs. 59,879, including all charges.

4. The net profit from the *assessed* revenue amounted therefore to Rs. 38,799, or very nearly 2½ per cent. on the total Capital outlay of all kinds to the end of the year. If the Revenue *receipts* for the year 1880-81 be taken into consideration instead of the assessments, the net profit amounted to Rs. 53,809*, or 3·6 per cent. on the Capital outlay to the end of the year. The low returns upon outlay are due to the comparatively unprofitable character of the new tanks, for the net assessed revenue of the old tanks during 1880-81 amounted to Rs. 45,004,† or 5·91 per cent. on the Capital outlay of Rs. 7,61,138, while the working expenses of the new tanks exceeded the gross assessed revenue by Rs. 6,205.‡

5. Although the benefit to the country resulting from the construction of these tanks must not be measured entirely by the returns shown in a Revenue Report, yet the figures given in the conclusion of the preceding paragraph point to the necessity of keeping down establishment charges as much as possible. The parallel instituted in the note of the Superintending Engineer between the establishment charges of the irrigation tanks in Ajmir and Merwara and those of the Ganges and Eastern Jumna canals cannot be admitted as sound, because the maintenance of the works and water-supply, the distribution of the water, and measurement and assessment of irrigated land are incomparably more difficult and complicated on the latter than on the former class of works, and no fair comparison can be drawn between them in respect of the establishment required for efficient maintenance and control.

6. Observations should be continued on the effect of the new tanks on the spring level in the neighbouring wells. The standard of comparison adopted in paragraph 34 of the Commissioner's Report (the area irrigated from the wells) is an excellent practical test of the benefit derived, but, as other causes than the spring level in a well might affect the area irrigated from it, direct measurements of the water level should also be made.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Agent, Governor General, and Chief Commissioner, Rajputana, for information and guidance.

Also, that copy of the Resolution and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and to the Punjab, in the Public Works Department, for information.

Also, that a copy of the Resolution and of the Report be forwarded to the Revenue and Agricultural Department and to the Department of Finance and Commerce for information.

Also, that the Resolution and Memorandum by the Agent, Governor General, together with the statement of general financial results compiled by the Examiner of Public Works Accounts, be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy be forwarded to Her Majesty's Secretary of State for India for information.

HENRY A. BROWNLOW, *Colonel, R.E.,*
Deputy Secretary to the Govt. of India.

Memo. by Colonel C. K. M. WALTER, Officiating Chief Commissioner, Jeypore, on the Ajmir and Merwara Irrigation Revenue Report, 1880-81.—Dated 17th November 1881.

As this Report refers to a period prior to my advent to officiate as Chief Commissioner, and as it has reached me very late (22nd October), I shall only briefly notice one or two points in the Commissioner's Report.

2. In paras. 28 and 29 of the Report a lengthy reference is made to the remarks of my predecessor. The Government of India had asked* for an early report on "the actual number of wells the supply in which is wholly or mainly dependent on the tanks." In the Revenue Report of last year the Commissioner gave a statement which he introduced in the following language:—

* Public Works Department Nos 409—171, dated 17th December 1879.

"The following statement purports to give the number of wells and irrigated area which is supposed to have benefited by the construction of the new large tanks only. It is prepared by the Superintendent of Irrigation, and I give it for what it is worth, but I am not prepared to endorse it as correct. The new Ladpura tank will most likely benefit, by percolation, the 39 new wells constructed below that dam, but without the tank the wells would probably have existed and have done well. The reason for their construction is quite independent of the tank, and no one can possibly apportion the benefits which they have and will derive from the accidental situation of the tank."

3. The tone of the paragraph was not calculated to inspire a belief in the accuracy either of the statements or conclusions. When therefore the Commissioner said that "without the tank the wells would probably have existed," and at the same time gave no reason for the conclusion, the Chief Commissioner very naturally remarked that in the absence of any reasons he did not attach much weight to it.

4. The Commissioner now gives his reasons; I cannot say they are conclusive. It appears to me equally probable that if the conditions favorable to the construction or existence of a tank had not been present, these wells would not have been constructed even with the assistance given. And under any circumstances that these wells have benefited by the construction of the tank, is a point about which there is not, so far as I know, the slightest doubt.

5. In Commissioner's para. 32, he has assumed that the Chief Commissioner, in his last year's memorandum, overlooked the order quoted in the margin of that paragraph. I cannot discover the smallest grounds for this assumption. In the discussion on rules regarding the management of new tanks, the order was never lost sight of; indeed new tank rule 27 was a direct consequence of that concession. In recent time the order was alluded to in connection with the proposed Mohamee Tank.

6. I am aware that it is not desirable in an annual administration report to allude to any subject not directly connected with the transaction of the year under review. The Commissioner's attention will be again directed to the rule on the subject.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 18th May, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
Major-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble C. P. Ilbert.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.
The Hon'ble W. W. Hunter, LL.D., C.I.E.

JHÁNSÍ ENCUMBERED ESTATES BILL.

The Hon'ble MR. CROSTHWAITE presented the final Report of the Select Committee on the Bill to provide for the relief of Encumbered Estates in the Jhánsí Division of the North-Western Provinces.

The Hon'ble MR. CROSTHWAITE also applied to His Excellency the President to suspend the Rules for the Conduct of Business. He said:—"My Lord, I think I may state briefly why we make this request, and why the passing of this measure has been so long delayed. The Bill has been a long time before the Council. It was first introduced by Mr. Bazett Colvin in 1880; but the measure then brought forward differed very materially from that now presented to the Council. The principal feature in that measure was a system of management under which the Revenue-officers undertook to manage the encumbered estates and to pay off the claims that might be proved against them from the profits. Now, I believe I am right in saying that my hon'ble friend Mr. Colvin himself never thoroughly approved of this measure, and that in the Select Committee it did not meet with entire assent. The consequence was that some correspondence ensued between the Legislative Department and the Government of the North-Western Provinces, and during that correspondence Mr. Colvin, taking up the lines suggested by the Government of India itself in the letter written to the North-Western Provinces Government in March, 1879, drafted a new Bill, which he submitted to the Local Government. The Local Government approved of this Bill and sent it up here. This was the beginning of the present measure.

"Then, Mr. Colvin did not come to Simla to attend the Council in 1881, and the consequence was that the Legislative Department had no one to whom they could refer for the details regarding the substantial part of the measure; and so the matter drifted on until December of last year, when I took charge of the Bill from the Hon'ble Mr. Rivers Thompson with his and Your Excellency's consent. The passing of the Bill has thus been delayed for a considerable time.

"Now, when we consider that one of the essential parts of this measure is to call in claims, to cut down interest and to go behind present compacts and agreements, it will be evident to the Council that any delay in the matter must be very injurious and hurtful. The persons concerned have long known—for the matter has been under discussion for the last six or seven years—that such

a proposal is contemplated; and we have lately received a letter from the North-Western Provinces Government, enclosing a report from the Commissioner of Jhánsí, from which it appears that the money-lenders are pressing their claims and doing their best to anticipate the Bill by selling up the very men whose interests we wish to secure.

"It appears to me that no more need be said to shew the necessity for departing from the usual course and for passing the Bill today."

His Excellency THE PRESIDENT said:—"I think that quite sufficient grounds have been advanced for suspending the Rules of Business in this case. There is an additional circumstance which has led to some delay in the matter to which my hon'ble friend did not advert, namely, that it was necessary in the last stage of the Bill to refer it home for the sanction of the Secretary of State. We have now received that sanction by telegram; and, as everything connected with the measure is completed, and all the persons interested appear to be agreed to it in its present form, and as, moreover, it deals with circumstances so exceptional and so difficult, I think we are justified in passing the Bill without delay. I may explain that some of the defects of the Bill as it was originally introduced struck my hon'ble friend now the Lieutenant-Governor of the Panjáb when he was a member of Council; and a note of his on the subject led me to look carefully into the matter, when I certainly agreed with the view of it which His Honour then took, namely, that the Bill as introduced into the Council early in 1880 was not framed in a manner which was likely to secure its satisfactory working. My hon'ble friend Mr. Colvin also shared the same opinion. Under these circumstances, the whole of the Bill was recast—an operation which took a considerable time, especially as it involved financial considerations of no small importance. I am very glad, however, that the matter has now been brought to a satisfactory conclusion, and I have therefore no hesitation in declaring that the Rules are suspended."

The Hon'ble MR. CROSTHWAITE then moved that the final Report be taken into consideration. He said:—

"I need not occupy the time of the Council by discussing the necessity of this measure. For some years past the Government of India has admitted in the plainest manner that the state of the Jhánsí Division was a discredit to the British Government and a blot on the administration. The Bill now before the Council is substantially the same as that drafted by Mr. Bazett Colvin in 1881, and Mr. Colvin followed as closely as possible the suggestions made by the Government of India in the Revenue Department in a letter to the North-Western Provinces Government, No. 152, dated 14th March, 1879.

"I will explain in a few words the character of the measure which I am asking the Council to pass. The main provisions of the Bill are three—

"The Bill provides, in the first place, for the calling in and investigation of all claims against the embarrassed zamíndárs.

"A special Judge is to be appointed for this duty, and to him are given very large powers in dealing with the claims. In this part of the Bill the provisions of the Dekkhan Agriculturists' Relief Act have been followed.

"There is no doubt that contracts and agreements of old standing will be interfered with in an arbitrary manner, very much being left to the discretion of the Judge. Speaking for myself, I think that such a measure needs to be supported by very strong reasons. One of the main objects and the best result of a system of law is the education of the people in habits of honest and upright dealing. Nothing can be worse than to give men to understand that whatever engagements or compacts they enter into may be set aside at the will of a Judge—who will relieve them from burdens they have voluntarily undertaken, and save them from the just consequences of their own recklessness. There are, however, conditions in which every Court of equity will interfere, and I think the circumstances of the present case justify the course of action which we contemplate.

"In the first place, it is clear from the reports before us that the parties have never been on equal terms. The Jhánsí peasant is a very ignorant man, and intellectually far inferior to the Marwári money-lenders with whom he deals; and I am afraid it must be admitted that these latter gentlemen have not always shown a due regard to the interests of their clients, but have been too ready to take advantage of their weakness, ignorance and need.

"In the next place, the peculiarity of the present case is this: A great part of the embarrassment of the zamíndárs is due to old debts contracted when there was no such thing as property in the soil, and when the money was advanced on purely personal security, and carried therefore a very high rate of interest. Now, it is well known that an Indian money-lender—or, indeed, any money-lender—dealing on such terms seldom calculates on recovering his principal directly, but trusts rather to what he can squeeze out of his debtor in the way of an exorbitant interest year by year. The money-lenders did not care to take ulterior measures. In fact, there were no ulterior measures to take, as, even if under the Native Government they had ousted the raiyat and taken his land, they would have merely gained a right to cultivate at an assessment or rent which left little profit.

"What happened is thus described by Mr. Jenkinson, an officer of high reputation in the North-Western Provinces, who settled the district in 1867. He says:—

"'The money-lenders kept the names of their clients on their books, allowing the original loans to increase year by year by the addition of interest and compound interest and by renewing the bonds from time to time. In this way sums which have been originally insignificant have swollen into enormous amounts; and now' (that was in 1867) 'the money-lenders, seeing that a settlement has been made on liberal terms, and their property is secure, are eager to get the estates of their debtors into their own hands.'

"I think that statement is sufficient to justify the interference we contemplate.

"Well, having reduced the claims against the zamíndár in this arbitrary but, as I trust you will think, not inequitable manner, the next step is to deal with the residue of them.

"My Lord, the Government has been ready to acknowledge its responsibility in this matter; and it has come forward in a liberal manner to do what is possible for these unfortunate men.

"It has been decided to advance to the zamíndár a sum equal to six times the annual profits from his land, on the security of his rights in the land. If that sum is enough to pay the claims certified against him, they will be paid off, and the money recovered from the zamíndár with five per cent. interest by instalments extending over ten years.

"If it is not enough, then his rights in the land must be sold. Unless there is a higher bid—a thing very unlikely to happen in Jhánsí—the Government will purchase the property at a sum equal to ten times the annual profit. The zamíndár will then be a tenant of his sir-land, holding under the auction-purchaser, whether Government or a private person, at a beneficial rent.

"It may be asked, why does the Government propose to purchase the land, since the position of the zamíndár as an ex-proprietor will be the same whether Government or a private person purchases his rights? This is a question I am bound to answer.

"There are several reasons for the course we have adopted. In the first place, it is evident that, as many estates will be thrown into the market, the value of this kind of property would fall; and the creditors would perhaps get only a portion of their dues. As the Government has determined to deal somewhat arbitrarily with the claims, it is perhaps only fair to take measures to prevent the depreciation of the value of the property which is to satisfy the just debts. That is one reason.

"Another reason is that the Government intends to do much more for such of the zamíndárs as are intelligent and deserving than appears on the face of the Bill. If the property is bought, as we hope in most cases will happen, by the Government, it is intended to use the zamíndár as an agent for the management of such land as may be in the hands of tenants, and for the collection of their rents, and to degrade him as little as possible. He will, in fact, be restored as near as may be to his former position either of

headman and Government agent in the village, or of a raiyat cultivating under Government. His income may be nominally somewhat less than it was before, and he will have no property in the soil which he can sell or mortgage; but he will be free from debt, and will only be responsible for his own rent and so much of the rents of others as he may collect.

"Last, but not least, we have other people to think of besides the zamíndár. There are the tenants or cultivators of the land. There is nothing in the reports to show what proportion of land is cultivated by the zamíndárs themselves, and what proportion by tenants under them. The average area of the properties with which we have to deal is said somewhere in the reports to be about 40 acres. It is not probable, therefore, that the tenantry are a very numerous body, but there will, nevertheless, be perhaps two or three for every zamíndár, and it is necessary and right to look after their interests. Until we took their headmen and interposed them between the cultivators of the soil and Government, the cultivators were the raiyats of Government, paying their rent to Government. There is no doubt that in making landlords out of the village headmen we degraded the raiyats, and subjected them to the demands and caprices of a needy landlord. By purchasing the property it will be possible to restore the raiyats to their old position, to fix their rents for the term of settlement and give them a more secure tenure of their holdings.

"I think, My Lord, these reasons are sufficient to justify the unusual action of Government in coming forward to purchase these properties.

"For my own part, I think it is a course which has a great deal to recommend it. It is a course which I should like to see adopted elsewhere, and on a larger scale, and which I have long advocated as the best method of preventing the evils which too commonly arise in this country from the transfer of land from the old agricultural to the commercial classes.

"I think I have now sufficiently explained the scope of the measure. The Bill, it cannot be denied, is a confession of error. We propose to spend a large sum of money, not to improve the land or open communications or add in any way to the wealth of the country, but merely in order to place these Jhánsí zamíndárs back in the same position in which we found them when we annexed their country. And in the meantime, during the five and twenty years which have elapsed, have these men of Jhánsí had a happy time? Have they had cause to bless us? I am afraid not. The interim has been chiefly spent in making them pay revenue when they had not the means, and in harassing them for arrears which they could not pay. It is written in the records of the Board of Revenue.

"But if the Bill is a confession of error, it is also an attempt to repair the mistake and to atone for an unintentional wrong. And that is why I dwell upon this matter, because I am afraid that the Bill, if the matter is left to it alone, will not be successful. I will not enter into a discussion as to the causes which have led to such disastrous results. Such a discussion, although of great practical value, would take a long time, and could hardly be brought to an issue here. But I feel bound to say this much, that, having seen the flourishing state of the Central Provinces, where the same system existed under Native rule, and where we pursued exactly the same course, I cannot admit that those persons are right who attribute the greatest share in the effects which we deplore to what they call 'the fatal gift of proprietary right.' The possession of the proprietary right, no doubt, was a condition which enabled these men to obtain money. But it was not the cause of their requiring it.

"We ought to look to our revenue system and our revenue administration. It is on record that after the Mutiny we compelled these men to pay again to us the revenue which had already been collected from them by the rebels. It also appears that, in 1868-69, when there was a severe drought and a scarcity approaching to famine, scant consideration was shown to them; and if this was done under such circumstances, what chance is there that they met with more liberal treatment when suffering under minor and less conspicuous difficulties? It is quite true that, during the last decade, since their state has become known, and their inability to pay has been recognised, the Government has dealt with them in a liberal manner. But it is a fault in our system that such knowledge comes too late, and that we hardly ever remit revenue or revise an assessment until the mischief has been done.

"The truth is that agriculture in Jhánsí is a precarious business; and this fact should be recognised. In introducing the Bill, Mr. Bazett Colvin said:—

"'In conclusion, I have only to say that the importance of modifying the revenue system of Jhánsí and of adjusting it for the future in some way to the variations in the annual produce of the harvest has not escaped the attention of the North-Western Provinces Government, and the question, I believe, is now under consideration and discussion. Personally, it seems to me that no scheme for relieving the distress of the proprietors in Jhánsí can be permanently successful which does not provide for this.'

"This was said by Mr. Colvin in February, 1880.

"In conclusion, I have to say exactly what Mr. Colvin said. I believe that, until the revenue-system is altered, there is no security against the recurrence and extension of the Jhánsí difficulties; and I believe also that the matter is still under the consideration of the Local Government."

The Hon'ble MR. PLOWDEN said:—"I should experience very unqualified satisfaction in aiding in the passage of this Bill through the Council, were it not for the fact that I cannot but deplore the great delay that has taken place in putting the Bill before the Council. The Hon'ble Member in charge of the Bill has stated that, of these two Bills which were brought before the Council, the first was brought forward in 1880; and he has referred also to the fact that the consideration of this measure of relief for the embarrassed zamíndárs in the Jhánsí Division has been before the Local Government and the Government of India for some six years. In turning to one of the Revenue Administration Reports of the North-Western Provinces for 1876-77, I find that the Deputy Commissioner of Jhánsí, who was responsible for the administration of the district, remarked, so far back as 1876, that the transfer of property in his district 'was probably checked to some extent by the inquiries which had been made into the indebtedness of the landholders, these inquiries having, it appears, led them to hope that a scheme for the liquidation of their debts was under consideration.'

"In very singular contrast to this is the passage cited by my hon'ble friend, which may be seen in the paper submitted to the Council containing Mr. Kaye's remarks to the Board of Revenue not two months ago. He says:—

"'The introduction of an Encumbered Estates Act for Jhánsí has been discussed for years. It is perfectly well known that such an Act may be passed any day. Similar Acts affecting other parts of the country have been passed, and the money-lending class thoroughly understand how their interests are likely to be affected when the Jhánsí Act becomes law. Naturally, they are doing all they can to protect themselves beforehand, and are foreclosing mortgages and executing decrees which would otherwise have been allowed to run on. For the same reason they are unwilling to grant fresh loans; and landholders, who at other times would have been able to raise money to stave off pressing claims, are unable to do so. So far, the action taken with reference to the contemplated Bill has had but one result, and that is to ruin a considerable number of the very class it is designed to serve.'

"Now, My Lord, I have noticed this matter, because I think that this measure cannot be considered to be a remedial measure: it is simply a measure of relief intended to put the landholders on a footing different from that on which they rest at present, and to place them on somewhat the same footing as they were before they began to borrow money to pay their arrears of revenue. But I think it necessary that some attention should be drawn to the fact that the position of these persons is due more to the pressure to recover the revenue for which they are responsible than to any other cause; and, this being the case, it is within the power of the Local Government to adopt a line of action which shall prevent a recurrence of the unfortunate results which the present Bill is designed to relieve.

"These results have, I believe, occurred simply because, in times of drought and scarcity, the landholders have not been able to pay their revenue, though they have been called upon again and again to 'stump up'; and it is impossible for these men, with the very small resources at their command, to yield to the Government pressure in this matter without at the same time encumbering their estates very largely. If now the Local Government will adopt the line of action of allowing revenue which from scarcity or any other cause the landholders cannot pay to lie over for a short period,

at the same time taking interest while the payment is deferred, they will, I think, assist the landholders to a material extent.

"I shall certainly support the Bill, though, as I have said before, I am sorry for the delay which has occurred in placing it before the Council."

His Excellency THE PRESIDENT said:—"With respect to the delay that has taken place, I should like to make one or two further remarks. I of course have no personal experience of the delay which took place before the time when I came out here two years ago. At that time the position of the matter was this.

"The Bill as originally brought in—which, as my hon'ble friend Mr. Crosthwaite has explained, was a very different Bill from the present one—was then before the Council. It was under reference to a Select Committee, who went into it very carefully, and, as I have already explained, towards the end of the time when we were at Simla in 1880, Sir Charles Aitchison spoke to me upon the subject, if I mistake not. At all events, he recorded a note in which he expressed doubts as to the propriety of adopting the Bill in the form in which it then stood. As soon as I was able to resume business at Calcutta after my illness, I looked carefully into the matter. It seemed to me that the views put forward by Sir Charles Aitchison were very just, and I conferred with Mr. Bazett Colvin upon the subject at the commencement of last year. He then said that he should himself have preferred a Bill upon the lines of the present Bill rather than upon those on which it was introduced under Lord Lytton's Government, and I then requested him to draw up the Bill in the form which he thought that it should assume. That Bill involved a very important principle, that of advances upon the part of the Government—a principle which it is impossible to adopt all over the country, because of the enormous cost; and it therefore required to be considered with very great care, in order that we might see whether the circumstances of Jhánsí would justify the adoption of such a measure as clearly exceptional in its character. Well, Mr. Colvin prepared his draft, conferred with Sir George Couper on the subject, sent up the draft here, and it was then very carefully considered by the Financial Department. My hon'ble friend Major Baring very handsomely accepted the principle for this particular case, thinking that there were sufficiently exceptional grounds for doing so. The measure was, therefore, in fact, in a condition in which it might have been passed last session at Calcutta, if it had not been necessary, under the orders of the Secretary of State, to refer it home to him before passing it. He lost no time in considering the matter, and in conveying his sanction to it by a telegram; and it is on that telegram that we are now acting. I mention these facts merely to show that the subject is one of a very difficult character, requiring to be treated with very great care; and that, although there has been more delay than would have been desirable, the matter has not been neglected, and that the delay has not been the result of any carelessness on the part of the Government in regard to it, but may truly be said to have arisen from the intrinsic difficulty of dealing with a question of this kind as we propose to deal with it in this Bill. I think the public should understand that that is the position of the case.

"With regard to the question of the alteration of the revenue system, referred to by my hon'ble friends Mr. Crosthwaite and Mr. Plowden, that is a question which I will not attempt to discuss upon the present occasion. I can only say that it is a matter of great importance, and that it is receiving the careful consideration of the Government."

The Motion was put and agreed to.

The Hon'ble MR. CROSTHWAITE then moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 1st June, 1882.

D. FITZPATRICK,

Secretary to the Government of India,

Legislative Department.

SIMLA;

The 18th May, 1882.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd MAY 1882.

GENERAL REMARKS.—There has been general rain throughout the Madras Presidency, indicating the approach of the south-west monsoon. Good rain also fell in the Mysore State, in Coorg, in the Southern Mahratta Country, and parts of the Bombay Deccan. In British Burma and in Orissa the rainfall has been lighter than last week. In the Nizam's Territories very little rain fell, and there was none in Berar. In the Central Provinces slight showers occurred in some districts and heavy rain in Sambalpur. In Assam there was some rain in two districts. In Bengal, in Central India and the Rajputaná States, in the North-Western Provinces and Oudh, and in the Punjab, slight showers fell in a few places. Madras and the Punjab are the only provinces in which harvest operations are still going on. In the Punjab the harvest is confined to the northern districts.

General prospects are favourable on the whole throughout the country. In the Madras Presidency standing crops are in fair condition, and agricultural operations are progressing. In the Mysore State standing crops have much improved, and ploughing here and in Coorg is in active progress. Ploughing is also progressing in the Nizam's Territories and Berar and in the Bombay Presidency. In the Central Provinces and the Punjab sowings for the autumn crops have commenced in parts. In the North-Western Provinces and Oudh sugarcane and indigo are on the whole in good condition. In Bengal and Assam ploughing and sowing are in progress generally, but cultivation is reported to have been impeded in Sylhet by heat and drought.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 24th)		
Bellary ...	1·63 (average of 8 stations).	Standing crops good; harvest paddy and sugarcane, yield about average.
Kurnool ...	·79 (average of 8 stations).	Standing sugarcane and indigo crops suffering for want of water; harvest paddy, outturn below average; small-pox in one taluk; cattle-disease in parts.
Ganjam ...	·99 (average of 13 stations).	Standing crops, paddy, cotton, gingelly and sugarcane, thriving; small-pox and fever prevalent; sporadic cholera in parts; cattle-disease exists.
Kistna ...	1·11 (average of 12 stations).	Fever, small-pox, and guinea-worm in parts; cattle-disease continues.
Chingleput (Madras) ...	·70 (average of 2 stations).	Standing crops good where water available, withering elsewhere; harvest wet and dry grains, yield below average; agricultural operations progressing; small-pox and cattle-disease in parts.
Coimbatore ...	2·35 (average of 16 stations).	Standing crops generally good; harvest wet and dry crops, outturn wet above average; small-pox, fever, and cholera in parts.
Tanjore ...	2·32 (average of 12 stations).	Standing crops generally good; harvest dry crops, outturn average; few cases of cholera.
Madura ...	1·66 (average of 10 stations).	Standing crops fair; harvest paddy, yield good; cholera in parts.
Malabar ...	10·93 (average of 14 stations.	First crops seeds wasted away in parts; fever, small-pox, cholera, and cattle-disease in parts.
Travancore ...	4·31	Ploughing and sowing progressing; fever prevalent. *General Remarks.*—General prospects good.
Bombay—(May 24th)		
Kurrachee ...	Slight showers in three talukas.	River at Kotri on 22nd, 8 feet 7 inches against 10 feet 7 inches on corresponding date last year; cattle-disease in one taluka; fever in seven talukas, and small-pox in Kurrachee, Jati and Ghorabari talukas; *rabi* harvesting not quite over; *kharif* operations commenced; wheat, red rice, and *bajri* in Kurrachee 22, 40 and 33, in Dadu 32 and 40, in Tatta 24, 44 and 48, and in Shahbandar 20, 56 and 48 lbs. per rupee, respectively.
Hyderabad ...	·14	River rising; *rabi* outturn on an average 12 annas to the rupee; *kharif* operations general average; slight fever in six talukas; wheat 25, *juari* 44, *bajri* 40, red rice 33, and white rice 22lbs. per rupee.
Ahmedabad ...	.....	Preparations for next season progressing; slight cholera in Viramgaum taluka; wheat 27 and *bajra* 30 lbs. per rupee.
Baroda ...	.....	Weather hot; health good; *bajri* 30 and common rice 23 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	.....	Preparation for cultivation continues; *juari* 35 and *nagli* 55 lbs. per rupee.
Násik ...	1·49	Public health good; *bajri* 41½, wheat 31, and *juari* 67 lbs. per rupee; heat intense.
Colaba (Bombay) ...	.....	Temperature normal; vapour in air normal; abnormal wind northerly; distant lightning on 18th.
Poona ...	Slight showers at Poona.	*Bajri* 46 and *juari* 57 lbs. per rupee; in Poona *bajri* 39 and *juari* 47¾ lbs. per rupee.
Ahmednagar ...	Nagar, ·11; Sangamner, ·09; Akola, ·14.	Water-supply in taluka Parner failing; *juari*—maximum 96 lbs. in Jhamkhed, minimum 51 lbs. in Newasa; *bajri*—maximum 66 lbs. in Jhamkhed, minimum 45 in Kopergaon.
Sholapur ...	Sholapur, ·58, total 1·11; Sangola, 2·60; Pandharpur, ·39; Malsiras, ·16; Madha, ·09; Karmala, ·15.	Cattle-disease in Sangola and Malsiras, slight in Sholapur; cholera 6 cases, 1 fatal in Karmala; *juari* 72 lbs. 18 tolas; *bajri* 56 lbs. 10 tolas per rupee.
Dharwar ...	Rain throughout district; heavy in Bankapur; above 5·00 in Mandargi and Hangal; above 4·00 in Kalghatgi; nearly 3·00 in Mugad, Hubli, Navalgund, Gadag, Karajgi, and Ron; above 1·00 in Dharwar, Waragund, Ranibennur and Kod; less than 1·00, maximum, Bankapur 5·13; minimum, Ranibennur ·50.	More rain urgently wanted in Dharwar, Navalgund, Gadag, Karajgi, and Kod; ground being prepared for *kharif* sowings; scarcity of drinking-water still felt in five talukas; cholera in a village of Karajgi taluka, 15 cases, 5 fatal; rice 23 and *juari* 53 lbs. per rupee; locusts seen in Dharwar almost daily.
Kanara ...	Kumpta, ·84; Sirsi, 3·82; Yellapur, ·18; Supa, 1·90; Hallial, ·75.	Harvesting second crop completed; preparing ground for monsoon crop; small-pox and cattle-disease subsiding; common rice in Karwar 14 seers per rupee, in district average the same; weather clear.
Rajkot ...	.....	Weather hot; 20 cholera cases in Navanagar taluka, 10 fatal; it has disappeared from Rajkot and Malia towns but slightly prevails in Jetpur, in other places general health good; *bajri* 24 and *juari* 28 lbs.
		General Remarks.—Preparation of land for *kharif* begun; rain in the Southern Mahratta Country; heavy in some parts of Dharwar, more urgently required in others; rain also in Ahmednagar, Sholapur, and Satara, and slight showers in Kurrachee and Hyderabad; scarcity of drinking-water in five talukas of Dharwar and one of Ahmednagar; cholera in Belgaum, Satara, and parts of Kattywar.
Bengal—(May 23rd)—		
Chittagong ...	*Nil*	Weather hot; rain much wanted; prospects and yield of crops good; cholera very prevalent almost all over district; small-pox continues; prices stationary.
Dacca ...	*Nil*	*Boro* paddy being harvested, yield fourteen annas; prospects of crops good.
24-Pergúnnahs (Calcutta)	*Nil*	Sowing rapidly progressing on low land, high lands being prepared; prospects of crops fair; prices stationary; public health generally good; isolated cases of cholera reported from Barripur, Busseerhaut, and Dum-Dum sub-divisions.
Moorshedabad ...	*Nil*	Prospects of early sown paddy favourable; agricultural operations continue; average prices—rice 23 seers per rupee; cholera prevails mildly in some places.
Rajshahye ...	*Nil*	Prospects fair; more rain wanted; *boro* rice being harvested; cholera abating.
Burdwan ...	*Nil*; Culna, ·45	Prospects fair, but rain wanted; health fair, but cholera reported from Raneegunge sub-division.
Rungpore ...	·40	Weather very hot; prospects of crops favourable; some cholera still reported; prices stationary.
Bhagálpur ...	·01	Prospects of crops good; rice 22¾ seers per rupee.
Purneah ...	*Nil*	Prospects of crops very fair; sowing still going on; health improved; common rice 20 seers per rupee.
Patna ...	*Nil*	Fields being ploughed for paddy; sugarcane promising well; cases of cholera and small-pox reported from Hilsa and Behan thanas, respectively.
Durbhunga ...	*Nil*	Indigo and sugarcane continue promising; prices stationary; cholera continues in town and district without change.
Hazáribágh ...	*Nil*	Weather very hot; ploughing continues; cattle-disease and small-pox reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	1·32	Ploughing in progress; sowing commenced; cholera somewhat abated in interior.
		General Remarks.—More or less rain in some districts; rain still wanted in others, specially in Chittagong and Maldah; prospects of crops good; ploughing and sowing continue; public health generally good; cholera and small-pox continue in some places; cholera bad in Chittagong; cattle-disease still lingers in one or two districts.
N. W. Provinces and Oudh—		
Benares (May 23rd)	*Nil*	Weather hot, with strong winds, which for the last four days have been westerly; no agricultural operations are being carried on, except irrigation of sugarcane; health of men and cattle in the district generally good, but there has been some disease among the commissariat cattle; markets well supplied with foodgrains; prices steady.
Cawnpore („ „)	*Nil*	Extra crops fair; prospects of indigo and sugarcane good up to date; fever continues; prices slightly risen.
Allahabad („ 24th)	*Nil*	Fruit trees of all kinds suffered greatly from the storm of the 7th, mango yield will be very scanty everywhere; in Phulpur melons utterly destroyed; *sawan* and *china* (millets) being cut; cholera decreasing in the interior, 92 cases occurred of which 57 proved fatal, against 115 attacks with 75 deaths in the previous week; city healthy; cattle healthy; prices rising; gram and barley imported from the south.
Gorakhpur („ 23rd)	Some rain on the east of the district.	Weather fine; early rice being planted out; cholera decreasing, sporadic cases only occur now; fever increasing; prices stationary.
Jhánsi ...	.....	No report received.
Agra (May 23rd)	*Nil*	Indigo and sugarcane being irrigated; fever and small-pox continue in city; general health good; prices rising slightly.
Farukhabad („ „)	*Nil*	Hot west wind throughout the week; health good; prices still rising.
Bareilly („ „)	*Nil*	Weather normal; sugarcane and indigo much improved; markets well supplied; prices rising; small-pox prevalent, especially in Bareilly city.
Meerut („ „)	*Nil*	Heat increasing, steady west wind; health of man and cattle good; supplies sufficient; prices stationary.
Kumaun („ „)	Good rain in early part of the week.	Weather hot and seasonable after the rain; small-pox and measles, as well as cattle-disease, still prevalent; prices stationary.
Lucknow („ „)	*Nil*	Weather very warm; wind easterly and westerly; prices of foodgrains stationary; markets well supplied; 6 deaths from cholera reported, 5 in city and 1 in the interior.
Partabgarh („ „)	*Nil*	Prices rising principally in Kunda tahsil; a little cattle-disease reported; sugarcane and *sawan* (millet) being irrigated.
Rae Bareli („ 22nd)	*Nil*	Weather rather more seasonable; hot west wind blowing for the last four days; general health good; prices slightly rising.
Sitapur („ „)	*Nil*	Heat great; winds westerly.
Fyzabad („ „)	*Nil*	No report received.
		General Remarks.—Good rainfall in Kumaun and slight rain in two other districts; weather warm, hot winds set in; prices rising; cholera decreasing in Allahabad, Gorakhpur, and Lucknow; some small-pox in Bareilly, Agra, and Kumaun; cattle-disease continues in Kumaun, a few cases reported from Benares and Partabgarh.
Punjab—(May 23rd)		
Delhi ...	No rain	Preparations for *kharif* commenced; small-pox continues in the city; general health fair; prices fluctuating.
Hissar ...	No rain	Weather stormy; *rabi* harvested; prices stationary; health good.
Umballa ...	No rain	Prices steady; health fair.
Jullundur ...	No rain	Wheat being threshed; prices rising; health good.
Amritsar ...	·30	Wheat being winnowed; health good; prices steady.
Lahore ...	·20	State of crops satisfactory; health good; prices of foodgrains rising.
Ferozepore ...	·40 in district	Crops being harvested; health good; prices steady.
Sialkot ...	·20	Rinderpest increasing in Zaffarwal tahsil; health good; prices stationary.
Rawalpindi ...	2·00	Crops being cut; health good; prices steady.
Mooltan ...	No rain	*Rabi* being harvested; *kharif* being sown; health good; prices stationary.
Dera Ismail Khan ...	No rain	*Rabi* nearly all cut; *kharif* sowings in progress; health good; prices have a downward tendency.
Peshawar ...	No rain	*Rabi* crops being cut; slight fever; prices stationary.
		General Remarks.—Rain has fallen in Amritsar, Ferozepore, Sialkot, and Rawalpindi; general health good; prices generally steady.
Central Provinces—		
Nagpur (May 24th)	Slight rain	Weather cloudy, frequently with duststorms; fields being ploughed for *kharif* sowings; small-pox slightly prevalent; prices rising.
Jubbulpore („ 23rd)	Slight rain	Weather cloudy and hot; *kharif* ploughings continue; cholera and small-pox prevailing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces— *contd.*		
Saugor (May 22nd)	·24	Weather stormy and close; land under preparation for *kharif* sowings; prices rising.
Seoni („ 23rd)	·20	Weather cloudy, with occasional showers; ploughing progressing; cholera, small-pox, and cattle-disease prevalent: prices steady.
Hoshangabad („ „)	.....	Weather hot, cloudy, and stormy; *kharif* ploughings begun; wheat 14 seers per rupee.
Raipur („ 20th)	.....	Weather cloudy, with storms; land being ploughed for *kharif* sowings; few cases of cholera; rice 31 and wheat 38 seers per rupee.
Sambalpur („ 18th)	Heavy rain	Weather stormy; *kharif* preparations going on; cholera abating; rice 54 seers per rupee.
Khandwa („ 23rd)	.....	Weather hot and cloudy, with duststorms; small-pox prevalent; wheat 17 seers per rupee.
		General Remarks.—Weather cloudy and warm, with slight showers; land under preparation for *kharif* sowings; cholera and small-pox still prevalent; prices generally steady.
British Burma—		
Akyab (May 24th) ...	For week *nil*; total 3·73.	One death from small-pox in Akyab town and 3 in district, otherwise public health good; slight cattle-disease in three townships, severe in one township.
Rangoon ...	For week 1·03; total 5·24.	Public health good.
Bassein ...	For week ·52; total 5·50.	One death from cholera in Bassein town, otherwise public health good.
Prome ...	For week ·02; total 2·07.	Two deaths from cholera in Prome town, a few cases in district, otherwise public health good.
Amherst (Moulmein) ...	.....	Public health in Moulmein district good; cattle-disease prevalent in three townships.
Toungoo ...	For week 1·25; total 3·57.	Eight cases of small-pox, of which 4 fatal in township, otherwise public health good.
	.....	*General Remarks.*—A few cases of cholera in Prome, Henzada, Thayetmyo, and Shwegyeen, slight small-pox in Akyab and Toungoo, otherwise public health satisfactory; cattle-disease severe in Naaf township of Akyab district and prevalent in parts of Amherst; light rainfall over the province generally.
Assam—(May 24th)—		
Gauhati ...	*Nil*	Weather very hot; prospects of crops good; cholera still at Gauhati and in northern parts of district.
Sylhet ...	1·26	Cultivation impeded by heat and drought, earlier in the season it was impeded by excessive rain; cultivation this season hardly successful; cholera, small-pox, and cattle-disease still reported; tea doing fairly well.
Cachar ...	*Nil*	Weather intensely warm; ploughing and sowing *dumahi* and *murali* crops continue; 2 cases of cholera reported from sadr station; rain much wanted; common rice 24⅝ seers per rupee.
Dibrugarh ...	1·20	Weather hot; prospects of *aus* paddy good; ploughing for *sali* paddy; cattle-disease still reported; public health good.
Mysore and Coorg— (May 24th)—		
Bangalore ...	2·61	*Vysakh* paddy and sugarcane being harvested; young sugarcane in good condition; public health good; prospects favourable; pasturage and water-supply much improved; prices almost stationary.
Mysore ...	3·75	Standing crops thriving; prospects good; rain abundant in town and district; cholera abating except in Malvali taluk; prices unchanged; prospects favourable.
Mercara ...	2·94	Good falls of rain throughout the province; in north Coorg paddy and *ragi* are being sown, in south Coorg rice fields are being ploughed; small-pox still prevalent.
		General Remarks.—Good rainfall throughout the Mysore State; ploughing operations in active progress; prospects generally good; condition of standing crops improved; prices slightly fallen in some districts.
Berar & Hyderabad— (May 24th)—		
Amráoti ...	.....	Weather hot and cloudy; fields under preparation; prices of wheat 18 and *juari* 36 seers per rupee.
Akola ...	.....	Ploughing operations progressing.
Hyderabad ...	·32	*Tabi* reaping concluded; preparation of ground for *kharif* crops continue; scarcity of water still felt in some talukas; fever prevails in two talukas and cattle-disease in one; prices—wheat 16½, rice 10½ white *juari* 23½, yellow *juari* 27¾, and *tur* 26½ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States— (May 24th)—		
Indore ...	.....	Weather seasonable and somewhat cooler; health good; prices of wheat and other grains are rising.
Morar (Gwalior) ...	*Nil*	Weather warm and stormy; health good; wheat 18, gram 22, *bajra* 18, and *juar* 22 seers per rupee.
Sutna ...	.....	No report received.
Rutlam ...	.....	No report received.
Neemuch ...	·56	Cholera has appeared, but is not as yet of a distinctly epidemic type.
Goona ...	·04	Crops fair; health good; small-pox prevailing; wheat 23 seers per rupee.
Bhopal ...	·26	Duststorms from south-west frequent; prospects good; small-pox diminishing.
Agar ...	.....	Weather cloudy and warm; health good.
Nowgong ...	·22	Weather stormy and unsettled; public health good; cholera and small-pox prevalent in places.
Manpur ...	Slight showers on 19th.	Weather hot; harvesting of wheat and ploughing of land for *kharif* continue; wheat 15½, gram 17¾, *juar* 19½, and *macca* 25 seers per rupee.
Rajputana—		
Abu (May 24th)	.....	Weather seasonable; days hotter, nights cooler; occasional cloud.
Sirohi („ 20th)	·02	Tanks and wells fair; health good; high wind prevailing.
Marwar („ 19th)	·13	Plenty of water in tanks and wells; health good; weather cloudy, frequent showers; prices stationary; crops gathered.
Meywar („ 20th)	·38	Tanks and wells good for time of year; health good; crops harvested; some cases of cholera occurred in districts; none at Oodeypore.
Harowti („ „)	Deoli, ·28; Kotah, ·20; Tonk, ·18.	Weather unsettled, with occasional duststorms; some fever in Kotah, otherwise health good; prices risen.
Jhallawar („ 17th)	·10	Small-pox still continues, otherwise health good.
Ajmere („ 23rd)	·12	Weather more settled; general health good.
Jeypore („ „)	·60	Weather cloudy, easterly winds; prices stationary; health good.
Bhurtpore ...	.....	No report received.
Ulwur ...	.....	No report received.
Nepal—(May 18th)		
Katmandu ...	·5	A perceptible increase in temperature during the past week.

T. C. HOPE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th MAY 1882.

GENERAL REMARKS.—There has again been rain throughout the Madras Presidency, but in parts not sufficient as yet for the requirements of the crops. More or less rain has also fallen in the Mysore State and in Coorg; also in the Southern Mahratta Country and other parts of the Bombay Presidency. In Berar, in the Nizam's Territories, and in the Punjab there has been no rain; while slight showers have occurred in two districts of the Central Provinces, in three districts of the North-Western Provinces and Oudh, and in a few States of Central India and Rajputana. In Assam and British Burma good rain has again fallen; and in Bengal more or less heavy showers have been reported from most districts.

General prospects in the Madras Presidency, in the Mysore State and in Coorg are favourable; sugarcane and paddy are being harvested in parts, and ploughing and sowing are progressing. Preparations for the *kharif* sowings are also in progress in the Nizam's Territories, in Berar, in the Bombay Presidency, and in the Central Provinces; and, excepting parts of three districts of Bombay and some parts in the Nizam's Territories where scarcity of water is felt, prospects in these Provinces are good on the whole. In the Punjab the *rabi* harvest still goes on in the northern districts, while in parts the autumn crops are being sown. In the North-Western Provinces and Oudh agricultural operations are, as is usual at this period, almost at a standstill, pending the arrival of the rains. Sugar and indigo, the main crops on the ground, are being irrigated, and are doing well. In Bengal the rainfall of the week has been beneficial for agriculture; ploughing and sowing are progressing favourably, and standing crops are thriving. In Assam also agricultural operations are in active progress, notably in Sylhet, where heavy rain has fallen. In British Burma ploughing in some places has begun.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 31st)		
Bellary ...	1·06 (average of seven stations).	Standing crops good; harvest paddy and sugarcane, yield paddy below average, sugarcane average; fever and small-pox in parts.
Kurnool ...	·26 (average of five stations).	Standing sugarcane and indigo suffering from want of water; small-pox and cattle-disease in parts.
Ganjam ...	·78 (average of eight stations).	Standing wet and dry crops thriving; fever and small-pox prevalent; cholera in parts; cattle-disease exists.
Kistna ...	·65 (average of four stations).	Fever, small-pox, and guinea-worm in parts; cattle-disease continues.
Chingleput (Madras) ...	·63 (average of two stations).	Standing crops good where water available, withering elsewhere; harvest wet and dry grains, outturn below average; agricultural operations progressing; small-pox in parts.
Coimbatore ...	1·71 (average of fifteen stations).	Standing crops generally good; harvest wet and dry crops, outturn wet, below average, dry, average; cholera, small-pox, and fever in parts.
Tanjore ...	1·02 (average of eleven stations).	Standing crops generally good; harvest cotton, gingelly and chillies, yield average.
Madura ...	·47 (average of five stations).	Standing crops fair; cholera in parts.
Malabar ...	1·59 (average of thirteen stations).	Sowing first crop progressing; small-pox, fever, cholera, and cattle-disease in parts.
Travancore ...	·27	Ploughing and sowing progressing; fever prevalent.
		General Remarks.—General prospects good.
Bombay—(May 31st)		
Kurrachee ...	Slight showers in four talukas.	River at Kotri on 29th, 8 feet 4 inches against 12 feet 2 inches on same date last year; fever in eight talukas; small-pox in Kurrachee, Tatta, and Ghorabari talukas, 4 cases fatal in Tatta and Ghorabari; *rabi* harvesting not quite over; *kharif* operations commenced; wheat, red rice, and *bajri* in Kurrachee 22, 36 and 34, in Sehwan 30, 56 and 48, in Sakro 16, 32 and 44, and in Jati 18, 52 and 44 lbs. per rupee, respectively.
Hyderabad ...	.....	River fallen a little; *kharif* operations commenced throughout the district; hot winds, with much dust; slight fever continues in five talukas; wheat 25, *juari* 45, *bajri* 40, red rice 33, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Preparations for season continue; cholera—in Viramgaum 74 cases, 25 deaths, total 133 cases, 59 deaths; wheat 27 and *bajri* 29 lbs. per rupee.
Baroda ...	.....	Land being prepared for rainy season; health good; *bajri* 30 and common rice 23 lbs. per rupee.
Surat ...	.....	Preparation for cultivation continues; *juari* 36 and *nagli* 50 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik ...	No rain	Great scarcity of water in Yeola and other places; *bajri* 36 and wheat 28½ lbs. per rupee.
Colaba (Bombay) ...	.....	Temperature normal; vapour in air normal; abnormal wind northerly and strong on 28th; distant lightning on 29th and 30th instant.
Poona ...	·70	Thunderstorm on 28th and 29th; slight cattle-disease in taluka Khed; *bajri* 44 and *juari* 56 lbs. per rupee, in Poona *bajri* 37 and *juari* 45 lbs. per rupee.
Ahmednagar ...	Nagar, ·03	Water-supply in taluka Parner failing; *juari*—maximum 96 lbs. in Jhamkhed, minimum 54 in Kopergaon; *bajri*—maximum 66 lbs. in Jhamkhed, minimum 45 in Kopergaon.
Sholapur ...	Sholapur, ·15; total 1·26; Karmala, 12; Pandharpur, ·33; Sangola, ·08; Malsiras, ·11	Cattle-disease slight in Malsiras, Sangola, Madha, and Sholapur; cholera—6 cases, 1 fatal in Karmala; *juari* 72 lbs. 2 tolas, *bajri* 55 lbs. 33 tolas.
Dharwar ...	Rain throughout district—above 3·00 at head-quarters; above 2·00 in Gadag and Kod; above 1·00 in Navalgund and Kalghatgi; elsewhere less than 1·00: maximum Dharwar, 3·22; minimum Mugad, ·07.	More rain wanted in Mugad and Gadag; preparation of ground for *kharif* sowing going on vigorously; scarcity of drinking-water only in Mugad and Gadag; cholera decreasing, 2 cases fatal, 10 of last week recovered; rice 22 and *juari* 54 lbs. per rupee.
Kanara ...	Karwar, 1·10; Kumpta, ·74; Londore, 1·85; Sirsi, 2·90; Hallial, ·71.	Preparing ground for monsoon crop; cattle-disease and small-pox subsiding; fever in two talukas; common rice in Karwar 14 seers, in district average 14¾ seers per rupee; weather cloudy and hot.
Rajkot ...	.....	Weather getting hotter; cholera in Navanagar, Dhrol, Virpur, and Jetpur talukas; *bajri* 25 and *juari* 35 lbs. per rupee. *General Remarks.*—*Kharif* preparations in progress; good rain in Southern Mahratta Country and Satara, slight in Kurrachee, Poona, and Sholapur; scarcity of drinking-water in two talukas of Dharwar, one of Ahmednagar, and also in parts of Násik; slight fever, cattle-disease, and small-pox continue in some places; cholera in Ahmedabad, Sholapur, Satara, Belgaum, Dharwar, and parts of Kattywar.
Bengal—(May 30th)—		
Chittagong ...	3·90; heavy showers on the 29th.	Weather seasonable; transplanting of autumn rice going on; prospects of crops good; prices steady; cholera and small-pox not yet abated.
Dacca ...	5·42	Yield of spring rice about fourteen annas; prospects of autumn and winter rice and jute good.
24-Pergunnahs (Calcutta)	2·67	Ploughing continues; sowing of early rice going on; rain wanted in Basirhat sub-division; prices of common rice stationary; public health generally good; cholera still exists in parts of Barripur sub-division.
Moorshedabad ...	2·24	Prospects of crops favourable; rain has done much good; harvesting of *boro* rice commenced; sporadic cases of cholera in Lalbagh; public health otherwise good.
Rajshahye ...	0·82	Prospects fair; more rain wanted; prices stationary; cholera and fever decreasing.
Burdwan ...	1·25	Prospects of crops favourable; cases of cholera reported from various parts of the district.
Rungpore ...	1·84	Prospects of crops favourable; prices of food-grains stationary; public health good.
Bhagálpur ...	1·39	Ploughing going on; more rain wanted.
Purneah ...	*Nil*	Prospects of crops very good; sowing still going on; health improving.
Patna ...	*Nil*	Rice and autumn crops sowing going on; sugarcane promising well; cholera and small-pox still prevailing in Behar sub-division.
Durbhunga ...	0·16	Weather cloudy and cool; cultivation going on well; indigo good; prices stationary; cholera abating.
Hazáribágh ...	0·10	Weather very hot; fields being prepared everywhere, but more rain much wanted; some small-pox about; general health good; cattle-disease still reported.
Cuttack ...	0·12	Ploughing and sowing in progress; cholera decreasing. *General Remarks.*—Rain fell in most of the districts during the week, which is beneficial for agricultural purposes; ploughing and sowing proceeding favourably, and standing crops are doing well; more rain however wanted in some districts; harvesting of spring rice continues; with good average outturn; cholera much abated; small-pox exists in places in Behar, Chota Nagpore, and Chittagong; cattle-disease reported in some places.
N. W. Provinces and Oudh—		
Benares (May 30th)	No rain, except a sprinkle which succeeded a strong dust-storm on the evening of the 20th.	No agricultural operations going on, save irrigation of sugarcane; health of men and cattle generally good; one or two isolated cases of cholera reported in the city; the markets well supplied with food-grains; prices steady.
Cawnpore („ „)	*Nil*	Outturn of extra crops fair; prospects of indigo and sugarcane continue good; fever prevalent; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Allahabad (May 31st)	*Nil*	Weather very hot, east wind and cloud; cholera increasing in district chiefly north of Ganges; water in wells and tanks very low in many places; prices rising; wheat and gram exported to east; barley and gram imported from south.
Gorakhpur („ 30th)	*Nil*	Weather hot and fine, east wind; sporadic cholera and small-pox still continue; early rice being planted; prices stationary.
Jhánsi („ „)	Slight showers of rain	Weather hot, with passing clouds; manuring of fields continues; markets well supplied; prices rising; small-pox amongst children decreasing; cattle-disease continues, but in a mild form.
Agra („ „)	*Nil*	Sugarcane and indigo irrigation continues; fever and small-pox in city and three other parganas; general health good; prices almost stationary.
Farukhabad („ „)	*Nil*	Wind chiefly east; health of people good; prices still rising.
Bareilly („ „)	*Nil*	High east wind and dust-storms, without rain.
Meerut („ „)	*Nil*	Heat excessive; wind variable; occasional small dust-storms; health of men and cattle good; supplies still scanty, except in Meerut town, where large imports received from Punjab; prices stationary or rising slightly.
Kumaun („ „)	.....	Heavy storm nearly daily; some sickness, small-pox and measles, prevails; crops nearly harvested; *kharif* preparations going on; cattle-disease reported in three *pattis*; prices stationary.
Lucknow („ „)	*Nil*	Weather very hot; prices rising; mango crop scanty; irrigation of sugarcane going on; a few cases of cholera reported.
Partabgarh („ „)	*Nil*	Prices still continue to rise; sugarcane and *sawan* being irrigated, one crop of the latter has been cut; cholera still continues.
Rae Bareli („ 29th)	*Nil*	Weather seasonable; heat intense; wind shifting easterly from last Friday; cholera in three tahsils; prices stationary.
Sitapur („ 30th)	*Nil*	Great heat and storm yesterday, now cooler.
Fyzabad („ „)	Slight rain yesterday, with high easterly wind and dust.	*General Remarks.*—Slight rain in two districts; heat intense; wind variable, but chiefly easterly, with occasional storms; prices rising slightly; cholera is reported from Benares, Gorakhpur, Lucknow, Rae Bareli, and Partabgarh, and is increasing in Allahabad, chiefly north of the Ganges; some small-pox in five districts; cattle-disease in Kumaun, Moradabad, and Jhánsi.
Punjab—(May 30th)		
Delhi ...	No rain	Health fair; small-pox continues in city; prices stationary.
Hissar ...	No rain	Weather seasonable; health good; prices stationary.
Umballa ...	No rain	Health fair; prices steady.
Jullundur ...	No rain	Wheat being winnowed; health good; prices falling.
Amritsar ...	No rain	Grain nearly housed; health good; prices rising.
Lahore ...	No rain	Heat intense; health good; prices stationary.
Ferozepore ...	No rain	Crops being gathered; health good; prices steady.
Sialkot ...	No rain	Rinderpest decreasing; health good; prices steady.
Rawalpindi ...	No rain	Crops cut; prices falling.
Mooltan ...	No rain	Crops being garnered; *kharif* sowings still in progress; health good; prices steady.
Dera Ismail Khan ...	No rain	*Kharif* sowings in progress; health good; prices stationary.
Peshawar ...	No rain reported	Prices show a downward tendency. *General Remarks.*—No rain has fallen throughout the province during the last week; health good; prices of food-grains generally steady.
Central Provinces—		
Nagpur (May 31st)	.....	Weather cloudy and windy; *kharif* ploughing continues; prices easy.
Jubbulpore („ 30th)	.....	Weather hot and clear; *kharif* ploughings continue; cholera and small-pox prevalent; wheat 19 and rice 12 seers per rupee.
Saugor („ 29th)	·06	Weather cloudy and hot; land for *kharif* being prepared; prices rising.
Seoni („ 30th)	·03	Weather hot and cloudy; cholera, small-pox, and cattle-disease prevalent; prices have risen.
Khandwa („ 31st)	.....	Weather hot and windy; *kharif* ploughing continues; small-pox prevalent; wheat 14, *juari* 22½, and rice 11½ seers per rupee; prices rising.
Hoshangabad („ 30th)	.....	Weather hot and cloudy; ploughing continues; small-pox prevalent; wheat 14, rice 9, and *juari* 21 seers per rupee.
Raipur („ 27th)	.....	Weather cloudy and hot; *kharif* sowings commenced; cholera abating; rice 35 and wheat 30 seers per rupee.
Sambalpur („ 25th)	.....	Weather sultry; *kharif* lands under preparation; public health good; rice 49 seers per rupee. *General Remarks.*—Weather hot and cloudy, with occasional high winds; *kharif* ploughings continue; cholera, small-pox, and cattle-disease prevalent; prices on the whole easy.
British Burma—(May 27th)		
Akyab ...	9·35	Total rainfall 13·08; one death from cholera in Akyab town and two from small-pox in district; cattle-disease in five townships, severe in one.
Rangoon ...	4·22	Total rainfall 9·46; public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Bassein ...	4·07	Total rainfall 9·57; public health good; ploughing commenced in some *kwins*.
Prome ...	2·57	Total rainfall 4·64; a few cases of cholera in district, otherwise public health good.
Amherst (Moulmein) ...	.....	Five deaths from cholera in one township, otherwise public health in Moulmein and district good; cattle-disease still prevalent in one township.
Toungoo ...	6·50	Total rainfall 10·07; 11 cases of small-pox, of which 6 fatal in Toungoo town; slight cattle-disease in one township. *General Remarks.*—Some small-pox still in Toungoo; only a few cases of cholera here and there; public health generally satisfactory; cattle-disease prevalent in Akyab; rain general; ploughing already begun in some places.
Assam—(May 31st)		
Gauhati ...	4·62	Cholera still in places, but has almost left Gauhati and Barpeta; *aus* rice doing well.
Sylhet ...	8·88	Rain has given an impetus to *amun* and *aus* cultivation; cholera, small-pox, and cattle-disease still reported; tea doing well.
Cachar ...	8·89	Weather very wet; ploughing and sowing of *dumahi, murali,* and *asra* continue; common rice 21 $\frac{5}{10}$ seers per rupee; 4 cases of cholera from Sadr and 10 from Lakhimpur reported.
Dibrugarh ...	1·69	Weather showery; prospects of *aus* paddy good; ploughing for *sali* paddy; cattle-disease still reported; public health good.
Mysore and Coorg—(May 31st)		
Bangalore ...	.....	Young sugarcane crops in good condition; harvesting of *vysakh* paddy and sugarcane continues; *haraka*, gingelly, and lamp-oil seeds being sown; prospects favourable; prices unchanged.
Mysore ...	3·49	Standing crops in good condition; *kar, ragi, cholum,* &c., being sown; prospects good; prices stationary.
Mercara ...	1·65	Sowing of *ragi* and paddy proceeding in the Nanjarajpatna and Yelusavishime taluks; recent showers have caused a late blossom on the coffee estates on Sampaji ghât; small-pox still prevalent. *General Remarks.*—Rain has fallen more or less throughout the Mysore State; crops are in good condition; pasturage is improving; ploughing operations are in active progress; prices are favourable; cholera abating in Mysore town; a few sporadic cases in the Hassan district.
Berar & Hyderabad—(May 31st)		
Amráoti ...	.....	Weather hot; ploughing operations continue; wheat 18 and *juari* 36 seers per rupee.
Akola ...	.....	Land being prepared for *kharif* sowings.
Hyderabad ...	.....	*Tabi* reapings concluded; ground being prepared for coming *kharif* crops; scarcity of water and fodder for cattle is felt in some places; fever and cattle-disease prevail in places; prices—wheat 16, common rice 10¼, white *juari* 21½, yellow *juari* 26½, and *tur* 26¼ seers per current sicca rupee.
Central India States—(May 31st)		
Indore ...	·67	Weather clear; no immediate signs of the monsoon; prices steady; health good.
Morar (Gwalior) ...	No rain	Heat intense; health good.
Sutna ...	·01	Health good.
Neemuch ...	.....	Cholera still continues, but the outbreak is not a severe one; hot winds; prices rising.
Goona ...	.....	Health and prospects good; wheat 21 seers per rupee.
Bhopal ...	.....	Weather hot; small-pox diminishing.
Agar ...	Slight showers	Health good.
Nowgong ...	.....	Weather hot and sultry, with dust-storms; health good; small-pox prevalent; prices stationary.
Manpur ...	Slight rain on 26th	Weather cloudy and hot; prices of wheat 15, gram 17¼, *juar* 19¾, and *makka* 22½ seers per rupee.
Rajputana—		
Abu (May 31st)	.....	Weather rather warm; high winds; slightly foggy mornings.
Sirohi („ 28th)	.....	Tanks and wells fair; health good; high winds.
Marwar („ 26th)	.....	Plenty of water in tanks and wells; health good; weather clear; intense heat; winds sharp; clouds disappeared; prices fluctuating, with tendency to rise.
Meywar („ 27th)	.....	Tanks and wells fair; health good; ploughing commenced; clouds and high winds.
Harowti („ „)	Deoli, 0·7; Kotah, 0·4; Tonk, 0·16; Shahpura, ·35	Dust and thunder storms daily, with showers and hail; winds variable; heat great.
Jhallawar („ 24th)	.....	Small-pox still continues; weather cloudy and sultry.
Ajmere („ 30th)	.....	Weather seasonable; some cases of small-pox in Todgarh; hot winds blowing.
Jeypore („ „)	.....	Weather seasonable; prices stationary; health good.
Bhurtpore ...	.....	No report received.
Ulwur (May 31st)	.....	Health good; high hot winds; wells low.
Nepal—(May 25th)		
Katmandu ...	No rain	Weather much hotter; rain impending.

Nº 23.} CALCUTTA, SATURDAY, JUNE 10, 1882.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 31st May, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Major-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.
The Hon'ble W. W. Hunter, LL.D., C.I.E.

PANJÁB UNIVERSITY BILL.

The Hon'ble MR. ILBERT, on behalf of the Hon'ble Mr. Gibbs, moved for leave to introduce a Bill to establish and incorporate the University of the Panjáb. He said:—

"As the principles of this Bill have been long under consideration, and as its provisions will have to be carefully considered in Select Committee, I think it will suffice if, on the present occasion, I state very shortly the circumstances which have led to its introduction and the main objects at which it aims.

"It appears that, in the year 1869, the Governor General in Council sanctioned the establishment at Lahore of an institution, which was at first styled the Lahore University College, but which subsequently took the name of the Panjáb University College. This sanction was stated to have been given in accordance with the recommendations of the Lieutenant-Governor, and in part fulfilment of the wishes of a large number of the chiefs, nobles and influential classes of the Panjáb. The special objects of the Lahore University College were stated in its original Statutes to be—

"'(1) to promote the diffusion of European science, *as far as possible*, through the medium of the vernacular languages of the Panjáb; and the improvement and extension of vernacular literature generally;

"'(2) to afford encouragement to the enlightened study of Eastern classical languages and literature; and

"'(3) to associate the learned and influential classes of the Province with the officers of Government in the promotion and supervision of popular education.'

"I am reading now from the *Panjáb Government Gazette* of the 23rd of December, 1869—

"'The above are the special objects of the institution; but at the same time every encouragement will be afforded to the study of the English language and literature, and in all subjects which cannot be completely taught in the vernacular, the English language will be regarded as the medium of examination and instruction.'

"The College was to have the power of conferring, after examination, certificates of proficiency in literature and science, but was not to be a University, and was not to have the power—and has not the power—of granting degrees of the same kind as those granted by the Universities of Calcutta, Bombay and Madras. However, expectations were held out by the Government that, if the institution met with due success, it might hereafter be raised to the status of a University.

"Well, the institution grew and prospered. It received, from time to time, very large sums of money from the nobles and influential classes of the Panjáb, and it has increased in numbers and in the efficiency of its education. Under these circumstances, the Government have come to the conclusion that the institution has attained that degree of success which would warrant effect being given to the expectations held out at the time of its establishment; and it is determined, in accordance with what appears to be the almost universal wish of those natives of the Panjáb who are interested in education, to constitute a University for the Panjáb. That is the object of the Bill which I am now asking leave to introduce.

"The Bill establishes the University, and confers upon it the powers of a body corporate. It provides for the transfer to the University of all the property at present held by or in trust for the University College. It deals with the constitution of the University, and provides that the Governor General, for the time being, shall stand to it in the relation either of a patron or visitor—the exact term is not yet settled; that there shall be a Chancellor, who is to be the Lieutenant-Governor of the Panjáb for the time being, a Vice-Chancellor and a body of Fellows. These Fellows are to be of three classes—first, the holders, for the time being, of certain offices, who are to be *ex officio* Fellows; secondly, persons appointed by the Chancellor as being eminent benefactors of the Panjáb University, original promoters of the movements in favour of the Panjáb University College, or persons distinguished for attainments in literature, science or art, or by zeal in the cause of education; and, thirdly, the representatives for the time being with the Government of the Panjáb of such independent Native Chiefs as the Lieutenant-Governor may, by notification in the Gazette, specify. The Schedule to the Bill contains a list of the persons who are to be deemed to be the first Fellows appointed under the Act. Then there are provisions as to the Senate and matters connected with it. There is a power given to the Senate to appoint and remove all examiners, officers and servants of the University. The Bill empowers the Senate to confer certain degrees; but it restricts the exercise of the power to confer the degrees of Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine and Master of Civil Engineering until the Governor General has given his assent to the exercise of the power. Then there is a further temporary provision enabling the Senate to confer like degrees in the case of persons who may have passed during the month of May in this year such examinations of the Panjáb University College as may correspond to the degree examinations of the Panjáb University. Finally, there is a power to the Senate to levy fees, a power to confer honorary degrees in certain cases, and a power to make bye-laws generally in all matters regarding the University.

"This is an outline of the Bill which I ask leave to introduce."

The Motion was put and agreed to.

INDIAN PORTS ACT AMENDMENT BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to exempt certain vessels from the Indian Ports Act, 1875, section 38.

PETROLEUM BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill to modify temporarily certain provisions of the Petroleum Act, 1881. He said:—

"This is a temporary and provisional measure, the object of which is to meet certain unexpected difficulties which have suddenly arisen in connection with the provisions of the Petroleum Act, VIII of 1881. That Act regulates the conveyance, transport and storage of petroleum and other inflammable oils, and it draws a distinction between two kinds of petroleum—one kind which is called 'dangerous petroleum,' and another kind which I may call 'ordinary petroleum.' Then petroleum is defined in the Act as including various kinds of liquids, such as rock-oil, Rangoon-oil, kerosine, and so on; but it does not include any oil used for lubricating purposes, and having its flashing point at or above 250° of Fahrenheit's thermometer. And then follows an explanation as to what is meant by the flashing point of petroleum. The flashing point means 'the lowest temperature at which the petroleum yields a vapour which will furnish a momentary flash or flame when tested with the apparatus and in the manner described in the schedule' of the Act, and that schedule describes elaborately the test to be applied and the mode of applying it. Then comes the definition of 'dangerous petroleum.' It is defined as meaning 'petroleum having its flashing point below 73° of Fahrenheit's thermometer.'

"Now the difficulty which has arisen is this. It appears that communications received by the Government of India by telegraph within the last two or three weeks afford ground for apprehending that petroleum which, when tested in America and elsewhere in the manner prescribed by the Petroleum Act, 1881, flashes at a point above 73° Fahrenheit may, when tested in the same manner on its arrival here, flash at a point below 73° Fahrenheit, and consequently have to be placed under the restrictions to which 'dangerous petroleum' is subject. These restrictions are of course much more stringent than those which apply to 'ordinary petroleum.' It has been suggested that this is probably due, not to any want of care on the part of those applying the test in either country, but to the difference of climate. Steps have been taken with a view to having the matter fully inquired into; but as this will take some time, and as it is but fair that importers should in the meanwhile be relieved from the hardship to which they are exposed, it is proposed for the present to exclude from the class of dangerous petroleum all petroleum covered by a certificate granted at the place of export and of such a description that, in the opinion of the Governor General, it may be accepted as proving that the petroleum it refers to, if tested at the place of export according to our method, would be found to have a flashing point above 73° Fahrenheit.

"Well, the object of the Bill is to provide temporarily, if this should be found necessary, for the admission of petroleum of this particular kind under the direction of the Governor General, pending the prosecution of further experiments as to what is the best test to apply; and as the Bill is short, I will ask the Secretary to read it to the Council."

MR. FITZPATRICK, the Secretary, having read the Bill,

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill. He said:—

"Perhaps I may take this opportunity of stating that the Bill is introduced to the Council at the special request of the Secretary of State. It may be necessary that it should become law within a short space of time; but I do not propose on the present occasion to apply for a suspension of the Rules of Business in order to carry the Bill through the Council now. The introduction of the Bill will place it at such a stage as will enable us to pass it into law at the earliest opportunity, should the necessity for doing so arise."

His Excellency THE PRESIDENT said:—"I think that the course which my hon'ble friend proposes to adopt is the correct one. Some representations in respect to this Bill have been made to the Government of India only quite recently—in the course of yesterday; and, although the Bill is introduced at the request of the Secretary of State, I think the circumstances are not such as to justify its being passed with the extreme rapidity which would result from the suspension of the Standing Orders of the Council. The introduction of the Bill will have brought it to such a stage as will admit of its passing, if necessary, at the next sitting of the Council. That I think will be sufficient to meet all the requirements of the case, and will give the public and the Government a somewhat longer time to consider the nature of the arrangements to be made under it."

The Hon'ble MR. ILBERT asked for leave to postpone the Motion that the Bill be taken into consideration, and the Motion that the Bill be passed.

Leave was granted.

The Council adjourned to Wednesday, the 7th June, 1882.

SIMLA;
The 31st May, 1882.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

RESOLUTION.

The papers read in the preamble contain the replies furnished by the Local Governments to the requisition of the Government of India for statistics of sugar cultivation in the territories subordinate to them. The information thus received has been summarised in an appended statement, which exhibits the area under sugar in British India and Burma, with the average yield per acre, and the estimated value of the crop.

2. The area under sugarcane is returned at 1,922,283 acres. In addition to this, 168,262 acres are under the date palm, 14,100 acres under the palmyra palm, and 2,930 under the cocoa palm, all of which yield sugar.

3. A comparison of the returns now submitted with the figures given in an extract from the *Produce Markets Review*, to which the Secretary of State drew the attention of the Government of India in 1879, shows that in the latter the area under sugar cultivation in British India is somewhat understated. Excluding Bengal, and omitting the area under the date palm and other sugar-yielding trees, the returns furnished give 1,737,925 acres of sugarcane in British India against 1,603,383 acres shown in the *Produce Markets Review*. For

Bengal, however, the conjectural estimate of 1,400,000 acres, which that journal puts forward, is seven times in excess of the 184,258 acres at which the Government of Bengal returns the area under sugarcane. Nor is the assumption on which the estimate is based a correct one. The area of Bengal is, it is true, double that of the North-Western Provinces; but a large portion of the Province is unfitted for the production of the sugarcane, or is better fitted for the cultivation of rice, jute, and other valuable staples. The tabular statement furnished by the Local Government shows that in the great Province of Orissa less than 4,000 acres are under sugar, and in several other divisions the cultivation is equally limited. Nearly half the entire area of 184,258 acres appertains to the Patna Division, a tract which adjoins and which resembles in climatic and other conditions the North-Western Provinces.

5. **No accurate statistics are available for the Native States of India; but the information before the Government of India is to the effect that very little sugarcane is grown in their territories. Rajputana and Central India are known to draw their supplies of sugar from the North-Western Provinces and the Punjab. In some parts of the Hyderabad State sugarcane is one of the staple crops, but the produce is probably not more than enough for the requirements of the population. For Mysore the returns furnished by the Chief Commissioner for 1878-79, when the Province was still under British administration, show an area of 12,694 acres under sugarcane and 29,093 acres under date palm.**

6. The acreage returns for British India may be taken as approximately accurate, with the exception of those for Bengal. The absence of agricultural statistics for that Province of a reliable character has been frequently brought to notice, and is prominently mentioned in the Report of the Famine Commission. How this defect may best be remedied is a question into which His Excellency the Governor General in Council does not propose to enter into in this Resolution. It is, however, very probable that the sugar cultivation of Bengal is understated in the present returns. The estimate made by the* Famine Commissioners on the best available evidence was over one million acres, and though the data on which this estimate was framed are not given, the Commissioners had exceptional opportunities for arriving at a correct conclusion.

* Famine Commissioners' Report, Appendix I, page 40.

7. In regard to outturn less reliance is to be placed on the figures now submitted. They are avowedly estimates of average yield; and the yield depends so greatly, not only on soil and climate, but on the character and thoroughness of the cultivation, that any attempt to arrive at an average by any method short of actual appraisement of the gross outturn of a province must be open to distrust. The estimates furnished by the several Local Governments are of this imperfect nature. This partly explains the discrepancies which they exhibit. In the North-Western Provinces, where considerable attention has been paid to agricultural statistics, the estimated yield in the several districts is variously returned between 15 and 22 cwts. of sugar per acre: for the Punjab a single estimate of 19 cwts. 1 qr. is furnished. In Bengal the average, where estimated in molasses, varies from 6 cwts. to 32 cwts., and from 2 cwts. to 28 cwts. when computed in sugar. For the Bombay Presidency the average is given at 19 cwts. of sugar, though the district returns are as conflicting as those of Bengal. An average of 4½ cwts. per acre is given for the Central Provinces; but in all probability this is much below the mark. The figures supplied by the other provinces are of the same character; and they are in many cases accompanied by explanatory notes, which show that these statistics of produce should be accepted with caution. The notes attached to the Bombay returns are especially instructive, as they furnish strong evidence that the statistics of produce supplied by the village officers are much under the real truth In the case of sugar cultivation, satisfactory estimates are exceptionally difficult to obtain, owing to the various ways in which the raw produce is disposed of. The usual process is to extract the juice by means of a simple stone or wooden mill. It is then boiled until it becomes crude or undrained sugar. If the process is carried further, the ultimate result is a small proportion of refined sugar and a large proportion of molasses. But the

greater portion of the sugar produced in India never goes beyond the unrefined stage; and in estimating the average produce it is usual to refer to sugar of this class. In some of the returns, however, where the estimate is extremely low, it is probable that the outturn in refined sugar is taken.

8. Imperfect as the information is, it is sufficient to establish the broad fact that an acre of sugar-land in India yields on an average considerably more than the 8 cwts. of unrefined sugar, at which the *Produce Markets Review* estimates the outturn. A careful memorandum has been prepared on the subject of sugar cultivation in Bengal by the firm of Messrs. Burrows, Thomson, Mylne and Company. This firm are large landowners in the district of Shahabad, and have devoted much care to improving the indigenous methods of sugar cultivation and manufacture. The Behea sugar-mill invented by them has undoubtedly proved a great success, and is gradually taking the place of the Native implement. In the memorandum alluded to $1\frac{1}{10}$ or $1\frac{1}{5}$ tons of crude sugar is stated to be the average yield of an acre of carefully cultivated land. This corresponds closely with the average of 22 cwts. given for many districts in the North-Western Provinces and Oudh, and the Government of India is inclined to think that it is as close an estimate as can be made. Though considerably less than the 2 or $2\frac{1}{2}$ tons which a sugar plantation in the West Indies is said to yield, it does not evidence such extreme inferiority in the sugarcane cultivation of this country as the *Produce Markets Review* would seem to imply. On the contrary, the cane is cultivated with considerable skill and great industry, and the profits are very considerable. Exceptional intelligence and capital are, however, engaged in the industry in the West Indian Colonies; and, apart from this, the climatic conditions of India are probably less favourable to the cane.

9. The mode of manufacture practised in India is sufficiently described in the note on the subject prepared by the Department of Agriculture in the North-Western Provinces, and in the memorandum of Messrs. Burrows, Thomson, Mylne and Company above alluded to. The Native methods of expressing the juice and manufacturing sugar are of extreme rudeness and simplicity, and in many respects inefficient and wasteful. Some improvement has, however, been effected in respect to sugar-mills; and the establishment of large sugar refineries in various parts of the country will gradually tend to better methods of manufacture. But the profits of the Native sugar-grower and manufacturer are large as it is; and crude Indian sugar, though unsaleable in the London market, finds a ready sale among the Native community. The price has risen rapidly within the last decade, as Messrs. Burrows, Thomson, Mylne and Company's memorandum shows; and in the markets of Northern India at the present date the wholesale price of undrained sugar or *gur* is Rs. $4\frac{1}{2}$ to Rs. 5 the cwt. In the returns for Bengal much higher prices than the above are shown against many districts; but in these cases, as already noticed, the produce has been returned in refined sugar, and the price of that description of sugar is given.

10. It is very difficult to arrive at the total annual production of sugar in British India. Accepting the returns of area under cane, and assuming the average yield to be somewhat under $1\frac{1}{10}$ tons of crude sugar the acre, the country has a gross production of about 2,000,000 tons. To this must be added the produce of 168,262 acres of palm trees, which may be set down at 150,000 tons. The foreign trade returns show that the supply is not equal to the demand. The quantity of Indian sugar exported to England, Ceylon, and elsewhere has considerably fallen off within the last five years, as the figures marginally noted, which give the value of the total sugar exports from Indian ports for the years 1876—81, will show. On the other hand, the sugar imports have risen from £403,556 in 1876-77 to £1,611,157 in 1880-81. The greater part of this sugar comes from Mauritius, and its consumption appears to be confined to the Bombay Presidency, where comparatively little cane is as yet grown.

1879-80	205,871
1880-81	311,750

11. The gross export of sugar in 1880-81 was 534,174 cwts., and the gross imports 986,321 cwts. The net import was therefore about 23,000 tons.

But as the export was confined to raw sugar, while the imports are refined sugars, the excess of the imports over the exports is greater than appears from these figures. In explanation of the dependence of India on other sugar-growing countries, it would appear that many parts of India are unfitted for the cultivation of the cane. The Bombay Presidency has to supply itself from Mauritius; and Rajputana and Central India consume the surplus produce of the North-Western Provinces and the Punjab. The increasing import and the decreasing export do not indicate the decadence of the industry in India. The area under cane has largely increasd in Upper India through the development of canal irrigation, and is reported to be extending from the same causes in Bombay. More sugar is produced in India than formerly; but the demand is much greater. Not only has the increasing prosperity of the people increased the average consumption, but sugar is now borne by rail into tracts where the cane is not cultivated, and which were formerly very scantily supplied. The profitableness of the industry is seen in the high price which the Indian cultivator can obtain for his produce; and all the evidence before the Government of India leads it to the belief that the capital invested in sugar cultivation in India is steadily increasing.

ORDER.—Ordered, that the Resolution read above be published in the Supplement to the *Gazette of India*.

APPENDIX I.

Abstract of statistics furnished in the paper read in the preamble.

Provinces.	Areas under cultivation. Sugarcane.	Date palm.	Palmyra.	Cocoanut.	Average yield of coarse sugar per acre.	Total actual produce of coarse sugar (*gur*).	Average price per cwt. of coarse sugar.	Total value in rupees.	Remarks.

APPENDIX II.

Sugar production in the North-Western Provinces and Oudh.

The area under sugarcane in the North-Western Provinces and Oudh, and the annual outturn of raw sugar.

The total area under sugarcane in the North-Western Provinces and Oudh amounts to about 1,067,000 acres, the average outturn from which is not above 25 maunds of undrained sugar (*gur* or *rab*) per acre, worth about Rs. 4-8 per maund. The total value of the annual produce is therefore about 12 crores of rupees. It is believed that this is less than half what might be obtained if the pressing out of the cane-juice and its boiling were conducted on the same principles as in the English colonies of Mauritius or the West India Islands. In proof of this belief, comparison may be made between a very careful estimate of the average outturn of sugar in the Shahjahanpur district and a very low estimate of the average outturn in West Indian and Mauritius plantations; and it must be noted that, since Shahjahanpur is one of the best sugar-producing districts in these provinces, the outturn given for it is considerably in excess of the average for the whole of the provinces, while it is believed that the figures shown for West India sugar production are considerably below the average. The comparison is therefore to the advantage of these provinces, yet it is noticeable how enormous is the loss of produce and money it points to.

The smallness of the outturn on the acreage as compared with that obtained in the West Indies and Mauritius.

2. The average outturn of sugar in the Shahjahanpur district was estimated by Mr. G. Butt, Settlement Officer, in the year 1872, as follows:—

Comparison between the East Indian and West Indian outturn.

The Shahjahanpur district taken as a type of the sugar-producing area in these provinces.

	Maunds.	Per acre. Percentage on— Cane.	Juice.	Undrained Sugar (rab).
Cane	518	...	...	...
Juice	259	50	...	...
Undrained sugar (*rab*)	55	10·6	21·2	...
or				
Compost (*gur*)	50	9·6	19·2	...
Dry sugar (*khand*)	15	2·9	5·8	27·2
Molasses (*shira*)	33½	6·4	12·8	61·

The outturn of dry sugar obtained in Shahjahanpur, and the proportion it bears to the cane-juice.

Now, leaving out of account the fact that the average produce of *cane* in Mauritius or the West Indies is nearer 810 maunds per acre than 518 maunds, and assuming the outturn of cane to be the same as that in Shahjahanpur, we have the following outturn of sugar obtained from the cane by European colonists:—

Compared with that obtained in the West Indies and Mauritius.

	Maunds.	Per acre. Percentage on— Cane.	Juice.
Cane	518	...	...
Juice	336	65 (*instead of* 50)	...
Dry sugar (answering to *khand*)	31	6 (*instead of* 2·9)	9·2 (*instead of* 5·8)
Molasses (answering to *shira*)	10	2 (*instead of* 6·4)	2·9 (*instead of* 12·8)

The two striking points of difference are—

The two leading shortcomings in the extraction of the juice and its boiling as practised in these provinces.

(i)—The much larger amount of juice extracted from the *cane* in the West Indies than in India, which is 65 per cent. on the weight of cane instead of 50.

The loss which these provinces sustain from imperfect manufacture.

(ii)—The fact that the weight of dry sugar obtained is three times the weight of the molasses, while in India the molasses amount to more than twice the dry sugar. The outturn of dry sugar per acre is 16 maunds more than in these provinces, while the outturn of molasses is 23½ maunds less. Taking Rs. 10* per maund as the price of dry sugar and Rs. 1-8 per maund as the price of molasses, the loss which these provinces experience each year may be estimated at Rs. 124-12-0 per acre, or over 13 crores of rupees on the whole area under sugarcane.

The imperfect crushing of the cane and only partial extraction of the juice.

3. Taking first into consideration the loss which results from pressing the cane insufficiently and extracting less than the full quantity of juice, it is doubtful whether much improvement can be looked for, except from the introduction of expensive crushing machinery in which the canes are pressed by steam or water power instead of by human or bullock labor as at present. Up to a comparatively recent date (50 or 60 years ago) the quantity of juice expressed in the West Indies was not much above half the weight of the cane, or 50 per cent. instead of from 70 to 85 per cent. as is the case now. The improved machinery which has effected this change is costly and complicated, and requires a larger capital to work than is at the disposal of the cultivators or sugar-boilers of this country. The iron roller mill patented

* This is the price taken by Mr. Butt, but is an extremely low one.

by Messrs. Mylne and Thompson of Bihea (more particular mention of which will be made further on) does not seem to give much improvement in this direction, and the juice expressed by it has been proved in experiment not to exceed in *quantity* that expressed by a good native mill, although it is vastly superior in quality. Until, indeed, very powerful and costly machinery be used, it appears that from 50 to 55 per cent. of juice is the most that can be expected, and this amount is as a rule now extracted from the cane.

Imperfect processes of manufacture resulting in the production of molasses instead of crystalised sugar.

4. It is with regard to the loss which results from obtaining so little dry sugar as compared with molasses that most improvement may be looked for. It is certain that were the process of sugar-boiling absolutely perfect there would be no molasses at all, but the whole produce would be in dry crystallised sugar. In other words, instead of the return per acre being—

			Rs.	A.	P.
Dry sugar, 15 maunds, worth	...	...	150	0	0
Molasses, 33½ „ „	...	...	50	4	0
Total	...		200	4	0

it would be—

Dry sugar, 40 maunds, worth	...	...	400	0	0

It is important to remember that the loss of Rs. 200 which results from molasses being formed instead of sugar is entirely due to imperfections in the boiling process. In the Mauritius and West Indies some of those imperfections have been removed by recent discoveries: others are still unremoved and hence *some* molasses are invariably formed, though their quantity only amounts to 2 per cent. on the cane juice instead of the 12·8 per cent. to which it amounts in these provinces. This is of itself sufficient to show how far native Indian sugar-boilers are behind European colonists.

The remedies of a simple character, which are advocated.

5. The notes which follow this abstract deal with the remedies of a simple nature which may be employed in this country to increase the yield of dry sugar as compared with that of molasses. It must be remembered that the good results obtained in the West Indian colonies are due in great measure to the use of expensive machinery and refining processes, and that, until these are adopted in this country, the same degree of success cannot be looked for. At the same time, it is the opinion of many men practically acquainted with the subject that a great deal of the loss in Indian sugar-boiling results from errors in the process followed which can very easily be altered, and it is with alterations of a simple and inexpensive nature that the following notes are concerned. They have no pretence to being exhaustive, and are published with the object of stimulating experiment quite as much as of affording instruction.

The two chief causes which contribute to the formation of molasses.

6. The two causes which appear to contribute most in native sugar-boiling towards the formation of molasses at the expense of crystallised sugar appear to be—

(i) **the acidification of the cane-juice before it is boiled;**
(ii) **the overboiling of the cane-juice.**

(i) The acidification of the cane-juice.

7. (i) *The acidification of the cane-juice.*—Cane-juice rapidy acidifies if exposed to the air and the warmer the air is, the more difficult it is to prevent this. Hence it is that so poor an outturn of sugar is obtained from juice which is expressed and boiled late in the season. It is important, therefore, that the raw juice should be exposed to the air as little as possible, and should be transferred to the boiling-pan with the smallest possible delay. Cutting up the cane into small pieces before pressing it (as is necessary in working with the native *kolhu*) promotes acidification, since the juice contained in each few inches of cane is more or less exposed to the air through the open ends of the pieces. By the Bihea iron roller mill the canes are pressed whole, and one cause of acidification is therefore done away with. Another cause which hastens acidification is the presence in the juice of vegetable acids, which are due in great part to the *grinding* process to which the canes are subjected in the *kolhu* instead of the clean *nip* which is sufficient to expel the cane-juice. By the trituration of the *kolhu* substances other than the cane-juice are pressed out in large quantities, while the even pressure of the roller mill drives out a much less proportion of them. Hence the juice which is expressed by the Bihea roller mill is invariably cleaner and better coloured than that expressed by the *kolhu*. But in any case it is most important that the juice should be strained through a linen cloth as soon after being pressed out as possible, and it is much recommended that the vessel into which the juice runs from the mill should be fumigated before each use by being held inverted over a burning sulphur match. This is said to give excellent results.

Causes of acidification, and remedies for them.

8. The acidification which results from exposure to the air, or the admixture of foreign substances, may to some extent be corrected by the use of alkalies, such as lime and carbonate of soda, or by clearing the juice by letting fine earth sink through it. Lime is generally employed by European sugar-boilers in the proportion of ½ per cent. on the weight of juice. The juice should be warmed after the lime has been added, but in no case heated to boiling point and the crust which rises to the surface should be removed. The action of the carbonate of soda (*sajji-matti*) which is sometimes used by native sugar-boilers is somewhat similar, but it is not to be recommended so much as lime. Cane-juice is purified by earth, by adding sifted earth to it before boiling and allowing the earth to sink through it. The juice may then be drawn off through holes in the side of the vessel, so as to avoid disturbing the earth when it has once settled.

(ii) Over oiling of the cane-juice.

9. (ii) *Overboiling of the cane-juice.*—This is probably the chief source of the uncrystallized molasses, and is the danger most difficult to guard against. It is more or less

avoided in European factories by the use of machinery through which the cane-juice is boiled in a vacuum and the water evaporated and sugar crystals formed at a much lower temperature than is possible if the boiling-pan is exposed to the air. In default of the vacuum-pan various suggestions are made in the appended notes which are not always in unison. For instance, the use of a *deep* pan is recommended by one person of experience, while another ascribes the superior quality of Bihia sugar to the *shallow* pans which are in general use there. The best of all systems appears to be that adopted in some parts of these provinces by the wealthier sugar-boilers, in which five pans instead of one are used. The pans are arranged in a row over a long furnace, each pan being on a little lower level than the one to the right of it, and the pans decreasing from right to left in size, as well as in the heat which is applied to them. The juice is first of all poured into the largest pan, heated but slightly, and then transferred by a ladle from pan to pan down the series till it is finally concentrated in the smallest and hottest pan. This is the system still followed in some West Indian plantations, and although far inferior to the processes which have resulted from recent discoveries, is still much superior to the single boiling-pan, whether it be deep or shallow, which is used over so large a portion of these provinces.

Synopsis of the reforms proposed.

10. The modifications in the process of extracting and boiling the juice which appear therefore to be most recommended are—

(*a*) the substitution of a roller mill (such as the Bihia) for the *kolhu*, and crushing the canes in whole lengths instead of in pieces;
(*b*) greater cleanliness in all the vessels used for receiving the juice from the mill;
(*c*) fumigating with sulphur the vessel into which the juice runs from the mill;
(*d*) straining the juice;
(*e*) mixing ½ per cent. of lime with it before boiling, heating it slightly, and removing the crust which forms;
(*f*) boiling the juice in five pans instead of one.

The Bihia roller mill.

11. The Bihia mill is the most effective roller mill of all which have as yet been experimented with by this Department. Its high price (Rs. 90 to Rs. 100) has been the chief bar to its adoption hitherto, although in districts where the stone *kolhu* (costing Rs. 60) is used the difference in price is not so very great, and will be more than repaid by the saving in labor and better quality of outturn which the Bihia mill affords. The saving in labor may be put at 8 annas a day, since two men and one bullock can easily take the place of the three men, two boys, and two bullocks required to work the *kolhu*. If the mill be worked steadily for three months in the year, a saving of 8 annas a day represents a total annual saving of Rs. 45, which would in two years pay the price of the Bihia mill. The difference in the quality of produce from juice expressed by the Bihia mill and *kolhu* is so great that in the Shahabad district of Bihar (in which the Bihia mill has been bought by thousands) compost (*gur*) made from the Bihia mill juice sells in the market at from 10 to 12 per cent. more than compost made from *kolhu* juice. That these advantages are gradually becoming appreciated may be judged of from the fact that the total number of these mills now working in Upper India is considerably over 9,000.

[illegible] advantages in [illegible] labor.

[illegible] in giving sugar of [illegible] quality.

Results of experiment with the Bihia mill.

12. Numerous experiments have been made to compare the working of the Bihia mill with that of the *kolhu*. The results vary very much, since the form of *kolhu* used differs a great deal in different parts of the provinces. Thus, the Bihia mill is found to work rather slower than the large *kolhu* used in the Meerut and Rohilkhund divisions, while it can easily beat the small wooden *kolhu* of the Allahabad division or the stone *kolhu* of Benares and Bihar. I subjoin the record of an experiment made by a native gentleman, Pundit Ajudhiya Parsad, of Indalpur, in the Shahjahanpur district, which is the most complete that has been received by this department:—

Description of mill.	Quantity of cane pressed.	Time taken.	Weight of waste and juice.	Refuse eliminated by straining.	Scum removed during boiling.	Quantity of undrained sugar (*rab*) which was produced.
	Mds. s. c.	Hrs.	Mds. s. c.	Mds. s. c.	Mds. s. c.	Mds. s. c.
Bihia roller mill ...	9 22 8	11	5 27 8	0 2 0	0 4 8	1 2 0
Kolhu	9 22 8	8	5 18 0	0 4 8	0 8 0	0 38 0

The results of this experiment show that the Bihia roller mill as compared with the powerful wooden *kolhu* used in the Shahjahanpur district—

(i) takes 37 per cent. more time to crush cane;
(ii) expresses 4 per cent. more juice;
(iii) gives juice containing 55 per cent. less refuse and yielding 43 per cent. less scum in boiling;
(iv) gives 10 per cent. more sugar.

If we may apply the result of this experiment to the total production of sugar in these provinces, it follows that by the substitution of the Bihea roller mills for the *kolhu* now used, the total annual produce would be increased by the value of nearly a crore and quarter of rupees.

June 10th, 1880.

J. B. FULLER,
Asst. Director, Dept. of Agriculture and Commerce.

APPENDIX III.

Memorandum on Sugar Cultivation.

Compared with Mauritius and West Indies, the cane cultivation here is of a very primitive kind, and leaves much room for improvement. Excepting in Lower Bengal, air and light is excluded from the growing canes by the gradual growth of the leaves which are allowed to remain, as they wither and dry, thus forming a dense mass into which little sun, light, or air can penetrate. In addition to this, the soil is freely and frequently irrigated, and never dug or loosened round the roots after the cane reaches a height of about three feet.

On this side of India it is the universal custom to plant or lay the cane cuttings in plough furrows about 18 inches apart, within a few inches of the surface, and hence the dense mass of leaves referred to.

In Mauritius, where cane cultivation is conducted with the greatest care and on the best known principles, the custom is the reverse of that which obtains in India. The climate of the island is more moist, and showers more frequent than in India; yet the cane-cuttings are laid deeper in the ground, and greater care taken to protect them from heat and drought. The method is as follows:—

The surface of the field is cleaned of grass and weeds with the hoe; the weeds laid, in lines four feet apart; lines of holes are dug between the rows; each hole is about 15 inches long and 9 or 10 inches deep and wide. A 9-inch space of earth is left between each hole. These holes are carefully made of a rectangular form with perpendicular sides, the earth being laid on the rows of grass and weeds.

Three cane-cuttings are laid in each hole and covered with about two inches of finely prepared earth, mixed, if necessary, with manure. This filling is repeated as the cane grows, till a ridge is formed round the cane roots leaving the ground hollow in the spaces between the ridges. All weeds and dry leaves are carefully removed or disposed of in such a way as to admit as much light and air into the field as possible. The earth round the roots is kept clean and loose. The number of cane-cuttings planted per acre in the usual native way is 16,000 and by the Mauritius 16,500, so that a better style of cultivation is secured with no loss of space.

In Lower Bengal we have observed that the dry leaves are utilised to tie round the standing canes in small lots, thus giving support to them, and access of air and light through the field.

A small experiment on the Mauritius method has been made by us at Bihea during the past year. Though on poor sandy soil, and though we were not able in this instance to give the attention needful to secure its being carried out to our satisfaction, the improvement in the appearance of the cane is so marked that the cultivators who have seen it will not believe that it is the common "mangoo" or small cane of the country, and contend that it must be some other large jât (or species). This cane is not yet ready for crushing, and comparisons as to weight of cane, weight and quantity of gur per acre, have yet to be made. There seems to be little doubt that, if a more rational method of cane cultivation were to take the place of the primitive and careless custom which obtains so generally, a very great improvement in quality and quantity would be secured.

The sugar industry of India is domestic in all its stages. Each cultivator, who has a bit of land suitable for growing sugarcane in rotation with other crops, cultivates a little plot varying from half an acre to three acres year by year, expressing the juice and converting into gur (concrete sugar) on or near the field, and selling on the spot or in the nearest bazars, much as in England and other places each small farmer threshes his own corn for market. For the gur there is a ready sale at prices which leave a handsome profit to the cultivator, and with which no central factory could compete.

Improvements in manufacture, when suggested to the people in a suitable form, do not seem to be hopeless. The Bihea Cane Mill has been gradually introduced into their confidence and has entirely superseded the native mill in this district. Its recommendations are simplicity of construction, efficiency, portability small cost in proportion to the greater quantity and better quality of the work done, and its suitability to their domestic method of manufacture. By it the canes are passed whole between vertical rollers, while for the native mill they have to be cut into lengths varying from quarter of an inch to 18 inches. The surfaces thus exposed become at once areas of fermentation, which quickly increases with exposure to the air, and the heat of the evaporating pan causing progressive destruction of the granulating quality in the juice, the quality and appearance of the gur being also much deteriorated. The introduction and adoption of the Bihea Mill by the people of this and neighbouring districts may be taken as a practical recognition by them of the loss sustained in quality by cutting the cane into small pieces, and of the gain as regard time and cost of crushing effected by the new machine. It may also be considered a first step in the direction of substantial improvement in these particulars. This is also recognized in the bazars by the higher price given for the mill gur over that from the kolha or native machine. Marwaree

merchants from the Bombay side seem to have already become aware of the commercial value of the improvement, as they have during the last three years come in considerable numbers to this district to purchase mill gur direct from the cultivators who produce it. As a machine by which the small farmer may convert the juice of his cane into a marketable concrete sugar, the shallow open pan in use in this district is much more satisfactory, and produces a far better article than the deeper pans of the North-West Provinces and those districts in Lower Bengal where concrete is made. It is saucer-shaped and very shallow, so that the evaporation of the juice is effected with a minimum risk of over-boiling or burning. The next essential step in improvement is cleanliness. For this purpose the appliances already in the hands of the people are sufficient. We have recently paid considerable attention to this very necessary matter, and have induced some of our tenants to adopt the following method :—

1st.—To wash out carefully after each filling the "churwees" or earthen vessels which receive the juice as it runs from the mill.

2nd.—To invert them over sulphur fumes for a few minutes before again using them, thus removing the germs of fermentation.

3rd.—To strain the juice as it falls into these vessels.

4th.—To defecate the contents of the evaporating pans by adding a little castor-oil, bruised castor seeds or other substance to the boiling liquor to coagulate and bring the scum to the surface, when it is carefully removed. The result of this simple and easy addition to their usual process is everywhere a surprise to the people themselves, who seem to have no idea of the deleterious effect of dirty vessels, and consequently of a constant state of active fermentation of the contents. The improvement is so considerable as to change the appearance and greatly improve the quality of the gur.

The people now begin to see that improvement is possible by means well within their reach without in any way interfering with their domestic system of manufacture or religious prejudices, and say they are ready to supply any demand which may be made for the clarified gur thus produced.

The district of Shahabad, where these improvements are in progress, is a very small portion of the cane-growing area of India with its 250,000,000 of cultivators as estimated in the paper from the *Produce Market Review*. What is being done here indicates that, without any such revolution as would be required to supplant the domestic manufacture, very great improvement may be effected. This having been established to the acknowledged benefit of the cultivators themselves in these districts, it remains only to extend similar tuition and assistance to other cane-growing districts to bring about similar results.

With improved machinery on a small scale, if the experiment does not prove successful, it will not involve very much loss or disappointment. We have for several years been trying whether cane can be profitably purchased and worked off at a central factory. Though cane has been plentiful, the distance for carriage limited, and the cultivators our own tenants, yet the price demanded by the growers, and which they can realize by making it into gur, does not encourage a continuance of the experiment.

The Rosa Sugar Works at Shahjahanpur, though situated in a cane-growing country, have not found it advisable to make arrangements for crushing cane and making refined sugar direct from the juice. They are now buying gur in this district, some three hundred miles from their works.

In our efforts in the direction of improvement, we have endeavoured to avoid the bias of foregone conclusions, and, as far as possible, to meet an unrecognised and unexpressed want in the domestic system which we found universally prevalent around us. The progress made has therefore been necessarily tentative and slow, and the area influenced comparatively limited. But it is sufficient to show that the cultivators are ready to receive suggestions of improvement, if of such nature as to be within their means combined with the instructions and assistance needful to enable the people to carry them out. We need only mention in proof of this that, during the last seven years, the cultivators have voluntarily applied for and purchased upwards of 9,000 Bihea cane mills, their total outlay for which has amounted to not less than Rs. 6,30,000.

To ensure the successful introduction of this machine, it has been necessary to teach the purchasers how to manage and use it, and to inspire them with confidence and give assurance that repairs and renewals needed, as well as accidental breakages, would be promptly dealt with.

From the traffic returns of the East Indian Railway, we find that since 1872, when the introduction of this machine commenced, the quantity of gur exported by rail from the district of Shahabad has increased from 51,400 to 1,63,000 maunds (*i.e.* from 34,000 to 3,08,000 cwts.), or nine times as much, the average yearly increase being 1,61,000 maunds or 107,000 cwts. The price of gur from 1872 to 1876 averaged Rs. 2-15-0 per maund, the increase being an addition to the income of the cane cultivators of Rs. 4,73,000 yearly, or for the last five years Rs. 23,65,000, and during the last three years the price has advanced to an average of

Rs. 3-9-0 per maund, giving a yearly increase of Rs. 5,73,562, or during the three years a sum of Rs. 17,20,000, making a total of Rs. 40,80,000 added to the earnings of the cultivators of this district during the last eight years.

The export by rail in 1872 being 51,407 maunds and produce per acre 39 maunds (= 28½ cwts.), the area under cane for this would be 1,804 acres; the average exports by rail for the years 1877, 1878 and 1879 being 4,18,103 maunds, the same rate of produce gives 14,477 acres, and adding for local consumption and export other than by rail quarter more, the total is 18,100 acres under cane, or about 32 square miles.

As cane cannot be grown in Shahabad without irrigation, the bulk of this very considerable increase of area under cane is, as far as cultivation is concerned, doubtless due to the canals. But from a manufacturing point of view, the Bihea Cane Mill claims the credit of having enabled the increase to be worked off within the time available in each season for getting the crop ready for the market, and of having at the same time greatly improved the quality and thus attracting purchasers from Bombay and other distant markets.

The cane cultivators all confess that they could not have thus extended their cane patches had they been obliged to depend on the old native machine for working off the crops. As similar increase in rate of production may not be desirable or possible in all the cane-growing districts of India, it is needless to offer any statement as to what might be the comparative results from such increase.

A like improvement in quality is, however, quite possible without in the least interfering with the domestic methods of manufacture, and affecting, as it does, the welfare and comfort of many millions of families depending on, and devoted to, agriculture; the fact of the possibility of such an improvement merits the careful consideration of Government, as well as of private individuals interested in the welfare of the ryots.

From 1864 to 1871 the average price of gur in this district was Rs 2-8-6 per maund. The average from 1872 to 1876 was Rs. 2-15-0 per maund. From 1877 to 1879 Rs. 3-9-0 per maund, the last being an increase of Re. 1 over the first period and Rs. 10 over the second. During the present season 1879-80 the price to date is about Rs. 4 per maund, being Rs. 1-8 increase over the first period ending in 1871.

It might, therefore, be safe to assume that a permanent rise of Rs. 1-4 per maund has been obtained. Suppose the average yearly export by rail does not exceed 4,20,000 maunds, and allowing a fourth more for local consumption and exports other than by rail, the total will be 5,25,000 maunds, and Rs. 6,56,000 yearly added to the agricultural wealth of the district by improvement in manufacture only.

"Hunter's Statistical Account of Bengal" gives the area of Shahabad at [illegible] measured by area the yearly increase is Rs. 1-4 per square mile. "Chambers' Encyclopædia" gives the area of British India with Oudh and Berar as 866,000 square miles. If over the whole area a proportionate increase of earnings were worked out by improvement only, the total gained would be Rs. 12,95,92,000.

The 32 square miles under cane (18,100 acres) is only ·73 of the area of the district.

We also enclose a sheet of comparative results, with notes of reference, which may be interesting and useful.

REMARKS ON THE FIGURES OF THE COMPARATIVE STATEMENT ANNEXED.

2. *Outturn of actual sugarcane per acre without leaves and succulent tops.*—The average in the best sugar-producing countries would appear to be from 25 to 30 tons per acre. In Shahabad, and probably other of the cane districts of India, the yield at present might be said to range at from 15 to 20 tons in really good seasons, and the latter return would be looked upon as very unusual.

N.B.—The Jugdispore estate outturn of cane from 9 acres of thoroughly and richly manured land (see Abstract) gave something short of 17 tons per acre; owing to the absence of canal water in June and July, and the difficulty of well irrigation, a portion of the area under cane was very inferior. However, even with thorough irrigation it is not likely that the yield would *have attained 20 tons per acre.*

3. The available data do not suggest any remark, save that it appears that the yellow cane grown in North Peru was originally imported from India, and that, whereas in India 22 to 24 lbs. of this cane will give one gallon of juice only, 11 lbs. of the same cane (presumably acclimatised) will produce a like quantity of juice in North Peru; but the gallon of juice got from the 22 lbs. gives 2 to 2¼ lbs. raw sugar, while the gallon obtained from 11 lbs. cane in Peru only yields 1·35 or 1⅛ lbs. sugar. This luxuriance is doubtless owing to richness of soil and *cheapness of guano* manure.

4. *Outturn of raw sugar per acre.*—In noted sugar-producing countries = 2½ to 3 tons per acre.

In Straits of Singapore = 3 tons per acre.

In vicinity of Calcutta = 2 tons per acre.

In Sindh (N. W. India) 1 $\frac{1}{10}$ tons per acre.

In Shahabad (Jugdispore estate experiments) $\left\{\begin{matrix}1\frac{1}{5}\\1\frac{1}{10}\end{matrix}\right\}$ tons per acre.

Deductions from data 2 (outturn of actual canes) and 4 (outturn of raw sugar) per acre.

It appears from the foregoing that Shahabad (and probably all India) yields half the weight of canes per acre, and half the weight of extract or product per acre of that produce in noted sugar countries; amongst the reasons for this are doubtless the following:—

(*a*) Absence of natural moisture or thorough and continuous artificial irrigation to produce luxuriant plants.

(*b*) Absence of very high cultivation, thorough manuring, and scientific rotation to produce rich saccharine juice in luxuriant crops.

5. *Description of outturn.*—This invariably means the crude product, containing the true or actual sugar, as well as molasses.

6. *Tons of cane per ton of outturn.*—Shahabad compares very favourably with some other countries, of which the data were availabe, *e.g.*—

Barbadoes	...	...	... 8	tons cane per ton of extract.
Antigua	...	...	... 10	,, ,,
Martinique	...	...	... 13	,, ,,
Australian	...	...	... 15	,, ,,
Shahabad	...	...	... 11	,, ,,

Deduction.—The quality of the Shahabad cane-juice, *i.e.*, its sugar-producing power, is very fair.

7. *Pounds of actual canes per gallon of juice.*—The available data are—

				lbs.
Porto Rico (Spanish colony)	...	...	...	= 10·67
Peru (North)	...	...	...	= 11·00
Shahabad (Jugdispore estate) (1)	...	...	...	= 124·00
Do. do. (2)	...	...	...	= 22·75
Do. do. (3)	...	...	...	= 22·50

Deduction.—The Shahabad canes are much drier than the others; that is, they contain less water. Hence, supposing a gallon of juice to be equally rich in all cases, double the weight of cane (entailing presumably double the labor) would have to be squeezed in Shahabad to give an outturn equivalent to that of Porto Rico or Peruvian canes. It will, however, be seen below that a gallon of Shahabad juice gives 25 to 50 lbs. more extract than that of some other countries.

8. *Raw sugar or extract per gallon of juice.*—The tabulated available data are—

Jamaica	...	...	...	1·00	lbs. per gallon.	
Antigua	...	...	...	1·00, 1·82, 2·00	,, ,, ,,	
Demerara	...	...	...	1·40, 2·19	,, ,, ,,	
Porto Rico	...	...	...	1·60	,, ,, ,,	Average = 1·50
North Peru	...	...	...	1·35	,, ,, ,,	
Natal	...	...	...	1·82, 1·92	,, ,, ,,	
Queensland	...	...	...	1·12, 1·50	,, ,, ,,	
Shahabad	...	...	...	2·00, 2·25	,, ,, ,,	= 2·12

Deductions.—The Shahabad juice gives at least 50 lbs. more of extract or raw sugar than the average of seven other countries.

9. *Extract of cane per* 100 lbs. *of cane-juice.*—The data collected show—

Barbadoes	...	...	lbs. 18 to 21 per 800 lbs. of cane-juice.
Shahabad	...	...	,, 19 to 22 ,, ,, ,,

Deductions.—**The above figures confirm the richness of the Shahabad juice.**

10. *Raw sugar or extract per* 100 lbs. *of plant canes*—

Barbadoes	...	...	13	lbs. extract per 100 lbs. canes.
Martinique	...	...	$7\frac{3}{4}$	,, ,, ,, ,,
Porto Rico	...	...	$9\frac{1}{4}$	,, ,, ,, ,,
Egypt	...	...	$8\frac{1}{2}$	,, ,, ,, ,,
Queensland	...	...	8 to 9	,, ,, ,, ,,
Shahabad	...	...	$8\frac{3}{4}$ to $9\frac{3}{4}$	,, ,, ,, ,,

The above also confirm the fair quality of the Shahabad cane-juice.

11. *Gallons of cane-juice per acre.*—Unfortunately the data are scanty, otherwise there would probably be additional proof that Shahabad sugarcane needs more moisture than it gets in order to prove luxuriant.

General Remarks.

2. The outturn of canes per acre is half that of other countries. This can only be increased by higher cultivation, rotations, manuring and irrigation. But so long as there is an abundance of cane land which will yield an average crop, giving an amount of crude sugar or gur, returning handsome profits to the cultivator of Rs. 50 to Rs. 100 per beegha for an outlay of Rs. 20 to Rs. 25, which is equal to Rs. 80 to Rs. 150 per acre for an outlay of Rs. 32 to Rs. 38, so long will the Indian cultivator rest content with the present outturn. What makes him additionally contented is the fact that, though the outturn per acre may have remained stationary, yet the cash returns per acre, owing to rise of prices, have been increased 35 to 50 per cent. within the last ten years. Besides the cultivator, others participate in the present profit from cane cultivation as it exists, *viz.*, the landowner, who gets a higher land rent for cane crops than for other staple products; the itinerant broker or "bepari," who makes a comfortable swing by buying gur on the cultivator's field and selling it at a small profit at neighbouring bazars; and the "chini" manufacturer or refiner who supplies, with handsome profits to himself, pure refined sugars to wealthy natives, who would not touch English manufactured sugars because refined with blood and bone charcoal.

To the majority of these classes, cultivators, landowners, brokers, and refiners, the return from cane cultivation and sugar manufacture, *as it now exists*, is handsome enough to satisfy them and prevent them from, if they were individually capable, attempting any improvements: they are confirmed in their conservatism and mistakes because of the rapid rise in prices.

6. **The richness of Shahabad cane-juice is confirmed by the figures. What is wanted is an increase of crop per acre, with no diminution of the richness of the juice. If there be a heavier crop, but a poorer juice, there can be no gain, but probably loss; for more work and wage is entailed in cutting, carting, squeezing, and evaporating watery cane than firm, concentrated cane. The drier the cane and more concentrated the juice, the less labor and expense in extracting.**

7-8. The yellow Indian cane exported from India to Peru, compared with existing Shahabad cane, gives better results at less expenditure of cane in Peru, *e.g.*,—

Yellow Indian cane in Peru.				Shahabad cane.
Cane per gallon of juice, lbs.	11·00	...	...	22 to 24
Extracts ,, ,, ,,	1·35	...	...	2·0 to 2·25

22 lbs. of cane would give 2·70 lbs. in Peru, whereas in Shahabad that gives 2·25 only.

The conclusion appears to be that the natural dryness of the Shahabad climate affects the yield of juice per pound of cane.

But this same cause concentrates the juice to such an appreciable extent, that while in Peru one gallon of juice will give of extract only 1·35 lbs. in Shahabad the yield as per data is 2·00 to 2·25; therefore excess extract per gallon of Shahabad juice = ·65 to ·90, so that it appears that while there is a very great initial saving in Peru in the weight of cane, and labor for carting or carrying and squeezing it (the cane yielding more juice than in Shahabad), yet in evaporation and concentration and saving of fuel Shahabad would seem to have a great advantage.

9. The concentration of the Shahabad juice and its greater density are confirmed by the figures in column 9 of the tabulated data.

10. Equal weights of Shahabad cane give nearly as much extract as any in the "table," except Barbadoes, which yields 4 per cent. more extracts.

Yield of cane per acre would not be increased without a more forcing system of cultivation, that is by plenty of manure and a method of irrigation which will force the plant upwards instead of as at present (with a uniform flow irrigation by submersion) tending to close in the root and keep the canes down.

The question of imported manure could not be entertained for a moment owing to its great cost. Not for many years, if ever, would it pay the Bengal cultivator to import costly manures. The manurial substances which exist ready to hand are very limited in quantity.

The question of manure might be solved by growing a luxuriant green crop on the cane fields, cutting it down and allowing it to rot and decompose on the land. The delay necessary for decomposition would probably be an objection.

In lieu of manuring, the Indian ryot knows very well the advantage of an open fallow, whereby the soil is turned up and allowed to "weather," that is, to absorb nutritious ingredients from the atmosphere. But save in rare cases, where the ryot is strong, has a number of relations or assistants, and three or four pairs of plough-bullocks, to cultivate thoroughly, he seldom finds time to take advantage of suitable opportunities for turning over the soil thoroughly.

The Indian ryot knows that sugarcane and paddy seedlings put down in lands that have been "weathered" always give much heavier and healthier crops. Irrigation also might be improved; that is by small parallel channels skirting the roots instead of a general flow of water completely submerging the field as at present.

The 28th February 1880. L. H. MYLNE.

Available data regarding Sugarcane in various countries and the manufactured products from it collected from various sources.

The 10th February 1880. L. H. MYLNE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6th JUNE 1882.

GENERAL REMARKS.—More or less rain has continued to fall throughout the Madras Presidency; though still insufficient in one or two places. In Coorg the rain has been too heavy for agricultural purposes. From the Mysore State also good rain is reported.

There has also been rain in the Berars and throughout the Bombay Presidency proper, and in several districts the fall has been very heavy. Indications of the monsoon are also reported from the Central Provinces, where slight rain has occurred in some districts. British Burma has continued to receive rain in almost all districts. In Assam there has been too much rain in some parts. In Bengal good rain has fallen in all districts. In the North-Western Provinces and Oudh good rain has occurred in two districts, and smaller quantities fell in most other places. In the Central India and Rajputana States showers are reported from several places. In the Punjab a little rain has occurred in three dirtricts.

Excepting one or two limited tracts, where either more rain is required or too much has fallen at once, agricultural prospects seem on the whole to be favourable throughout the Madras and Bombay Presidencies, as well as in Mysore, in Coorg, and in Berar; and ploughing and sowing are progressing. Ploughing has also commenced in the Nizam's Territories and in the Central Provinces. In Assam ploughing and sowing continue, and in one district (Sylhet) a sudden rise of the rivers is endangering the late sown rice on the lowlands. In Bengal prospects are favourable in all districts; early rice and jute have already been sown; sugarcane and indigo are doing well; and ploughing and sowing for *kharif* crops are progressing rapidly. In the North-Western Provinces and Oudh sugarcane is being irrigated in parts, and preparation of land for the *kharif* has begun in a few districts. In the Punjab the outturn of the late *rabi* crops is being garnered in some districts, and in others *kharif* operations have begun.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(June 7th)		
Bellary ...	1·05 (average of six stations).	Standing crops good; harvest paddy and sugarcane, outturn paddy below average, sugarcane average; fever and small-pox in parts.
Kurnool ...	·51 (average of ten stations).	Standing sugarcane and indigo suffering from want of water in parts; small-pox and cattle-disease in parts.
Ganjam ...	·56 (average of two stations).	Standing wet and dry crops thriving; small-pox, fever, and cholera prevalent; cattle-disease exists.
Kistna ...	·99 (average of eleven stations).	Fever, small-pox, and guinea-worm in parts; cattle-disease continues.
Chingleput (Madras) ...	·70 (average of five stations).	Standing crops good where water available, withering elsewhere; harvest paddy, yield below average; agricultural operations progressing; cholera and small-pox in parts.
Coimbatore ...	·78 (average of eleven stations).	Standing crops generally good, but *cholum* attacked by insects in parts; harvest paddy and dry grains, yield paddy below average, rest average; cholera, small-pox, and fever in parts.
Tanjore ...	·46 (average of nine stations).	Standing crops generally good; harvest chillies, outturn average.
Madura ...	·79 (average of eight stations).	Standing crops fair; fever and cholera in parts.
Malabar ...	2·82 (average of fourteen stations).	Sowing first crop nearly over in parts; small-pox, cholera, fever, and cattle-disease in parts.
Travancore ...	2·29	Ploughing and sowing progressing; fever prevalent. *General Remarks.*—General prospects good.
Bombay—(June 7th)		
Kurrachee ...	No rain	River at Kotri on 5th, 8 feet 11 inches against 10½ feet on corresponding date last year; small-pox in Kurrachee town; wheat, red rice, and *bajri* in Kurrachee 22, 40 and 36, in Dadu 32 and 40, in Tatta 24, 46 and 48, and in Jati 20, 52 and 44 lbs. per rupee, respectively.
Hyderabad ...	.....	River rising; *kharif* operations general throughout the district; hot winds with much dust still continue; nights cool; slight fever in three talukas; wheat 24, *juari* 45, *bajri* 40, red rice 34, and white rice 22 lbs. per rupee.
Ahmedabad ...	1·46	Cholera—in Viramgaum 203 cases, 106 deaths, total 336 cases, 165 deaths; slight cholera in Sanand and Daskrohi; wheat 26 and *bajri* 29 lbs. per rupee.
Baroda ...	·87	Health good; *bajri* 30 and common rice 23 lbs. per rupee.
Surat ...	3·90	Preparation for cultivation continues; cholera in Surat, 1 death; *juari* 32 lbs. per rupee.
Násik ...	Heavy rain in all talukas—average fall, 4·61; maximum Igatpuri, 9·64; minimum Kalwan, 1·64.	Small-pox at Trimbak; *bajri* 33½ and wheat 28½ lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	Rain every day, except on 1st; heavy from 2nd to 4th; rainfall of week, 18·47.	Total rainfall to date 18·61, being 16·29 above average; average abnormal temperature *nil* on 31st and 1st, 7° cool from 2nd to 4th, and 3° cool on 5th and 6th; vapour in air normal, except on 6th when it was excessive; storms on evening of 31st and from morning of 1st to morning of 4th; abnormal wind very strong from south-east from morning of 1st to morning of 3rd; wind normal on 5th and 6th; lightning on 31st, thunder and lightning on 3rd and 4th, and continued thunderstorm on the night of the 5th.
Poona ...	Rain throughout district—maximum at Junar, 6·53; minimum at Purandhar, 2·19.	*Bajri* 41¾ and *juari* 55½ lbs. per rupee, in Poona *bajri* 36¾ and *juari* 43½ lbs. per rupee.
Ahmednagar ...	3·00 to 4·00; rain fell in most parts of district.	A flight of locusts passed through Nagar and Parner talukas; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 45 in Kopergaon; *juari*—maximum 84 in Jhamkhed and minimum 54 in Kopergaon
Sholapur ...	Slight rain throughout district; ·45 in Sholapur; total rainfall 1·71	Slight cattle-disease in Sholapur, Sangola, and Malsiras; cholera, 4 cases, 1 fatal in Karmala; damage by locusts to *bagayet* crops except in Borhi and Karmala; *juari* 72 lbs. 8 tolas and *bajri* 55 lbs. 23 tolas per rupee.
Dharwar ...	Rain in all talukas—maximum at headquarters, 5·32; minimum at Hangal, ·48.	More rain wanted in Kod and break desired in Dharwar and Bankapur talukas; sowing of *kharif* crops commenced; scarcity of drinking-water still felt in Kod; cholera and locusts disappeared; public health good; rice 22 and *juari* 54 lbs. per rupee.
Kanara ...	Karwar, 13·64; total, 14·74; Kumpta, 3·57; Sirsi, ·64; Hallial, 1·84; rain fallen throughout district.	Preparing ground and sowing monsoon crop on coast and above Ghât; sugarcane thriving; small-pox slight at Bhatkal, but continues at Sidapur and in some villages of Sirsi, 4 cases in Kumpta; fever slight in two talukas; common rice in Karwar 12 seers, in district average 13¾ seers per rupee; weather rainy and squally.
Rajkot ...	Thunderstorm with little rain on 1st and 2nd.	Weather cloudy and oppressive; cholera in Navanagar, Gondal, Kotdasanjani, Vadia, and Jedpur; *bajri* 25 and *juari* 29 lbs. per rupee.
		General Remarks.—*Kharif* preparations in general progress; rain throughout presidency proper, heavy in several districts, ranging from 12 to 22 inches in the Konkan; scarcity of drinking-water in one taluka of Dharwar; slight cattle-disease, fever, and small-pox continue in some places; locusts in Sholapur; cholera in Sholapur, Satara, Belgaum, Ahmedabad, and parts of Kathiawar.
Bengal—(June 6th)—		
Chittagong ...	5·61; heavy showers throughout the district.	Weather hot; transplanting of autumn rice going on; prospects of crops good; prices steady; cholera and small-pox continue.
Dacca ...	4·90	Jute, rice, and sugarcane growing fast; fields wet.
24-Pergunnahs (Calcutta)	1·05	Lands being prepared for autumn and winter crops; sowing of early rice and jute progressing; prices of common rice stationary; public health generally good; cholera abating in Barripur subdivision.
Moorshedabad ...	2·11	Rain done much good; autumn crops promise well; harvesting of spring rice still going on; sporadic cases of cholera reported.
Rajshahye ...	1·44	Prospects of rice and jute promising; spring rice being harvested, outturn fair; cutting of *sesamum* begun; a few cases of cholera and fever reported.
Burdwan ...	0·83; rain heavy at Kálná and Kátwá, and slight at Ránigunj.	Prospects of crops favourable; cholera increasing.
Rungpore ...	6·90	Prospects of crops favourable; public health good.
Bhagálpur ...	0·78	Ploughing going on; prospects much improved by rain; cholera abated.
Purneah ...	2·50	Prospects favourable; sowing of autumn crops progressing; public health better.
Patna ...	0·92	Sowing of rice and autumn crops going on; cholera still prevalent in Barrh and Behar subdivisions, and small-pox in the latter.
Darbhunga ...	2·28	Prospects of crops very good; cholera abating in some and increasing in other places, bad near railway.
Hazáribágh ...	2·20	Weather hot and cloudy; late rain has done much good in aiding ploughing operations; general health good, with the exception of a few cases of small-pox in the interior.
Cuttack ...	1·03	Ploughing and sowing in progress; cholera prevalent.
		General Remarks.—Good rain in all the districts during the week; prospects favourable; ploughing and sowing progressing rapidly; early rice and jute were already sown, and sugarcane, *china*, and indigo doing well; *china* ready for harvest; harvesting of spring rice continues, with fair average outturn; public health improved; cholera and small-pox generally much abated.
N. W. Provinces and Oudh—		
Benares (June 6th)	0·8 in Chandausi; 0·6 in Benares.	Heavy duststorm followed by rain on the 1st, causing considerable damage to trees and houses, weather since cloudy and close; rain appears to be imminent; sugarcane being irrigated; health of man and cattle generally good; few cases of cholera reported in the city and in pargana Narwan; markets well supplied with food-grains; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Cawnpore (June 6th)	Average rainfall over 0·6.	Rain beneficial to sugarcane and indigo; outturn of extra crops good; fever continues; prices slightly risen.
Allahabad („ 7th)	Showers in five tahsils during the week; to-day monsoon apparently broken; heavy rain since 5 A.M., with thunder.	Great heat; clouds gathering during the last three days, which culminated in to-day's rain; cholera increasing, chiefly north of Ganges; city healthy; cattle in good health; prices rising.
Gorakhpur („ 6th)	0·8; storm and rain on the night of the 4th.	Weather sultry; cholera slightly increased; field operations progressing; prices steady.
Jhánsi („ 5th)	Occasional light showers.	Heat excessive; thunderstorm at Sadr on the 4th; prices rising; small-pox in pargana Jhánsi, health otherwise good; cattle-disease is reported from pargana Mau.
Agra („ 6th)	*Nil*	Fever and small-pox continue in city and three parganas; general health good; indigo and sugarcane being irrigated; prices stationary.
Farukhabad („ „)	High east wind last night with a little rain.	Very sultry; health of man and cattle good; prices still rising.
Bareilly („ „)	*Nil*	Sky cloudy and rain threatening; people and cattle in good condition.
Meerut („ „)	Slight rain on 3rd, with duststorm.	Weather hot, wind changing almost daily from east to west; health of man and cattle good; supplies sufficient; exports from Ghaziabad to Delhi and Sardhana to Cawnpore; prices stationary.
Kumaun („ „)	Good rain last evening.	Weather cool; measles in some places; general health good; cattle-disease continues; prices stationary.
Lucknow („ „)	0·4 at Sadr; slight shower at Maliabad.	Wind easterly, with occasional storms; prices rising; cholera is reported from the city and the interior, a fatal case occurred in the cantonment.
Rae Bareli („ 5th)	*Nil*	Heat great, wind variable—one day east, another west; heavy clouds; cholera and cattle-disease reported from three tahsils; prices rising.
Partabgarh („ 6th)	Rain fell on 1st and again on the 5th.	Field being manured for *kharif* sowings; weather cool; prices steady; cholera increasing.
Sitapur („ „)	1·2; rain on the night of the 5th; 0·2 at Biswan.	
Fyzabad („ „)	Slight rain on Sunday at Sadr.	Sugarcane being irrigated; fields for *kharif* crops under preparation; cholera reported in the interior.
		General Remarks.—Good rain in Allahabad and Kumaun, smaller quantities fell in most other districts, which have benefited indigo and sugarcane; wind variable, with occasional storms; *kharif* sowings have commenced; prices rising in Lucknow, Rae Bareli, Allahabad, Cawnpore, Jhánsi, and Farukhabad, elsewhere stationary; cholera is reported from Benares, Fyzabad, Lucknow, and Rae Bareli and is increasing in Gorakhpur, Allahabad, and Partabgarh; some small-pox in Agra and Moradabad, and cattle-disease in Kumaun and Jhánsi.
Punjab—(June 6th)		
Delhi ...	·70	Health fair; small-pox continues in city; slight rise in prices of wheat and gram.
Hissar ...	No rain	Heat intense; sporadic small-pox at Hansi; prices stationary.
Umballa ...	·40	Health fair; prices of food-grains rising, especially wheat and gram.
Jullundur ...	·10	Health good; sugarcane sown; prices rising.
Amritsar ...	No rain	Health good; grain nearly housed; prices steady.
Sialkot ...	No rain	Health good; rinderpest abating; prices falling.
Rawalpindi ...	No rain	Health good; crops being garnered; prices rising.
Lahore ...	No rain	Health good; prices stationary.
Ferozepore ...	No rain	Health good; crops being harvested; prices fluctuating.
Mooltan ...	No rain	Health good; *rabi* crops being housed; *kharif* sowings in progress; prices fluctuating.
Dera Ismail Khan ...	No rain	Health good; *kharif* sowings in progress; prices steady.
Peshawar ...	No rain	*Rabi* crops cut and removed; health good; prices fluctuating.
		General Remarks.—Rain has fallen in the Delhi, Umballa, and Jullundur districts; health of the province generally good; prices of food-grains fluctuating.
Central Provinces—		
Nagpur (June 7th)	Some rain	Weather cool and cloudy; ground being prepared for *kharif* sowings.
Jubbulpore ...	.....	Weather cloudy and oppressive, *kharif* ploughings continue; cholera and small-pox prevalent; wheat 19 and rice 12 seers per rupee.
Saugor (June 5th)	.....	Weather hot, cloudy, and stormy; land being prepared for *kharif*; prices rising; health good.
Seoni ...	·23	Weather cloudy; cholera, small-pox, and cattle-disease prevalent; prices slightly risen.
Khandwa (June 6th)	·29	Weather close and cloudy; *kharif* preparations in progress; small-pox prevalent; prices stationary; wheat 14, *juari* 22½, and rice 11½ seers per rupee.
Hoshangabad ...	Sharp shower on 5th	Weather hot and cloudy; ploughing continues; small-pox prevalent; rice 9, wheat 14½, and *juari* 22 seers per rupee.
Raipur (June 3rd)	·70	Weather cloudy, with occasional duststorms; rice sowings progressing; health good; rice 35½ seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces— *contd.*		
Sambalpur (June 1st)	·45	Weather sultry, with thunderstorms; *kharif* lands being prepared; public health good; rice 52 seers per rupee. *General Remarks.*—Slight rain in most districts; weather cloudy, with indications of approaching monsoon; *kharif* ploughing general; public health improving; cholera and small-pox still prevalent in few districts; prices easy.
British Burma— (June 3rd)		
Akyab ...	1·67	Total rainfall 14·75; four fresh cases of small-pox in Akyab town; cattle-disease severe in Naaf.
Rangoon ...	2·73	Total rainfall 12·19; public health good.
Bassein ...	2·26	Total rainfall 11·83; one death from cholera in town, otherwise public health good.
Prome ...	0·70	Total rainfall 5·34; one death from cholera in Prome town and a few cases in district.
Amherst (Moulmein) ...	.....	One case of cholera in Gyaing Salween, otherwise public health good; cattle-disease continues in three townships; ploughing commenced.
Toungoo ...	2·58	Total rainfall 12·65; *small-pox in town and district, otherwise public* health good; slight cattle-disease in one township. *General Remarks.*—Small-pox in Toungoo; cholera in Thayetmyo, some scattered cases in a few other districts, otherwise public health good; cattle-disease in Akyab and Amherst.
Assam—(June 7th)		
Gauhati ...	1·98	Weather very hot; prospects of crops good; cholera abating.
Sylhet ...	8·50	Sudden rise of rivers jeopardises the late sown *amun* in low lands; cultivation proceeding rapidly; tea doing well; cattle-disease, cholera, and small-pox about.
Cachar ...	7·46	Weather changeable; incessant rainfall except on 5th and 6th, when the heat was very great; sowing of crops continues; common rice 26½ seers per rupee; 5 cases of cholera from Silchar, 3 from Lakhimpur, 6 from Halakhandi, and 2 from Kotgora reported.
Dibrugarh ...	1·15	Weather hot; prospects of *aus* paddy good; ploughing for *sali* paddy; cattle-disease still reported; public health good, except a few cases of small-pox in the North Lakhimpur subdivision.
Mysore and Coorg— (June 7th)		
Bangalore ...	·23	High winds prevailing and weather monsoonish; crops in good condition; prospects favourable; public health good; prices generally stationary.
Mysore ...	.....	Monsoon apparently broken very quietly; standing crops in good *condition*; prospects fair; prices unaltered.
Mercara ...	10·90	Monsoon set in on 2nd instant; rain in the week too heavy for agricultural *operations*; *prospects are good*; public health is good. *General Remarks.*—Rain has fallen more or less throughout the Mysore State; crops are in good condition and agricultural operations are progressing; prices are favourable; public health good; cholera decreasing in Mysore town.
Berar & Hyderabad— (June 7th)		
Amráoti ...	1·20	Ploughing operations continue; wheat 18 and *juari* 36 seers per rupee.
Akola ...	.....	Weather warm and cloudy; land under preparation.
Hyderabad (June 7th) ...	.....	Ground being prepared for coming *kharif* crops; scarcity of water and fodder is still felt in places; guinea-worm, fever, and cattle-disease prevail in a few talukas; prices of wheat 16, rice 10½, white *juari* 21½, yellow *juari* 26½, and *tur* 26½ seers per current sicca rupee.
Central India States— (June 7th)		
Indore ...	1·16	A good shower has fallen; health good; prices easy.
Morar (Gwalior) ...	No rain	Heat intense; health good; prices stationary.
Sutna ...	·21	Sky cloudy; health good.
Rutlam ...	.....	No report received.
Neemuch ...	·15	Cholera has disappeared; weather hot and high winds; prices rising.
Goona ...	No rain	Weather cloudy; health and prospects good.
Bhopal ...	·42	Weather hot; health good.
Agar ...	.....	Weather cloudy and hot; health good.
Nowgong ...	·38	Weather hot; public health good; small-pox prevalent.
Manpur ...	.....	Weather cloudy and hot, with occasional high wind; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (June 7th)	0·46	Close and sultry weather; slightly foggy.
Sirohi („ 4th)	.....	Tanks and wells fail; health good; high wind prevails.
Marwar („ 2nd)	.....	Plenty water in tanks and wells; health good; weather very hot; wind variable; clear sky; prices rising slowly; *rabi* crops harvested.
Meywar („ 3rd)	Slight shower	Tanks and wells fair; health good; ploughing commenced; cholera in district; weather sultry.
Harowti („ „)	Deoli, ·09; Kotah, ·05	Some deaths from vomiting and purging among workpeople at Panwar near Deoli, but disease stated not to be cholera; weather stormy, and wind generally westerly; water low; prices still rising.
Jhallawar (May 31st)	·04	Small-pox still lingering; weather sultry; tanks and wells low.
Ajmere (June 6th)	·12	Heat increasing; fever and diarrhœa.
Jeypore ...	.....	No report received.
Bhurtpore ...	.....	No report received.
Ulwur (June 6th)	.....	Health good; prices stationary; weather cooler.
Nepal—(June 2nd)		
Katmandu ...	4·58	Weather cool and cloudy; rain intermittent.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

BESTOWAL OF HONORARY RANK OF ASSISTANT ENGINEER ON SELECTED CIVIL UPPER SUBORDINATES OF THE PUBLIC WORKS DEPARTMENT.

[illegible] No. 1123 P.W.D., dated 1st June 1882.

RESOLUTION—By the Government of India, Public Works Department.

The Governor General in Council has had under consideration the question of improving the social status of deserving Civil Upper Subordinates of the Public Works Department, by conferring on them some distinction similar to that enjoyed by Military Upper Subordinates. Deserving men of this latter class are rewarded by having Honorary Commissions conferred on them, but there is no corresponding distinction given to Civil Upper Subordinates. Applications, which have from time to time been received from local authorities, have led the Governor General in Council to believe that the bestowal of the Honorary rank of Assistant Engineer on deserving Civil Upper Subordinates will be highly appreciated by those on whom it is conferred; also that the hope of attaining to the position will have a good effect on the Upper Subordinate class generally. In this view it has been decided to confer the Honorary rank of Assistant Engineer on selected Civil Upper Subordinates under the following rules:—

i.—The proportion of Civil Upper Subordinates on whom the distinction of Honorary Assistant Engineer is conferred may be 6 per cent. of their total number on each list with an addition of one for any fraction. The promotions will be made by Local Governments and Administrations, but in the Military Works and Railway Branches, by the Government of India, in the Military Department, on the recommendation of the Inspector General of Military Works, and in the Public Works Department on the recommendation of the Director General of Railways.

ii.—The selections for the Honorary distinction must be confined to the grades of Sub-Engineers.

iii.—The subordinates promoted as above will be borne as substantive on the list of Upper Subordinates, and in italics on the list of Engineers of the grade to which they are appointed, with the words "Honorary rank" in the column of remarks. The promotion being

purely Honorary, and given solely with the view of improving the social status of the recipient, the pay and other allowances of Honorary Assistant Engineers will be those of their substantive Departmental rank.

The honorary promotion need not necessarily be accompanied by any change of duty.

2. Similarly, the same proportion of Civil Accountants may be selected from the 1st and 2nd grades for honorary promotion to Assistant Examiners. These promotions will be made by the Government of India on the recommendation of the Accountant General, except in Madras and Bombay, where those Governments may make the promotions.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab, in the Public Works Department.
The Chief Commissioners, Central Provinces, British Burma, Assam, and Coorg.
The Resident, Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Beluchistan.
The Accountant General, Public Works Department.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways, Calcutta, Lahore and Lucknow.

ORDER.—Ordered, that a copy of the above Resolution be forwarded to the Local Governments, Administrations and Officers marginally noted for information and guidance.

Also to the Military Department, for communication to Inspector General of Military Works.

Ordered also, that it be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.,*
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

Nº 24. CALCUTTA, SATURDAY, JUNE 17, 1882.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the* GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the* GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 7th June, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Major-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.
The Hon'ble W. W. Hunter, LL.D., C.I.E.

PORTS ACT AMENDMENT BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to exempt certain vessels from the Indian Ports Act, 1875, section 38, be taken into consideration. He said:—

"The original object of this Bill was very limited. It was merely to exempt certain Native vessels in Bombay harbour from particular provisions of the Act as to compulsory pilotage. The Bill was referred to a Select Committee, and, whilst it was in that stage, an application was made to exempt pleasure-yachts from liability to harbour-dues. It appeared on enquiry that pleasure-yachts are exempted from such dues, not only in English waters, but, as I understand, throughout European waters, and that the amount now levied in respect of these dues in British Indian waters is so trifling as not to compensate for the trouble and annoyance caused by the levy. Under these circumstances, we have, on the recommendation of the Government of India in the Financial Department, added a section amending the Indian Ports Act in such a way as to exempt pleasure-yachts throughout British India from the payment of port-dues, and we have amended the title of the Bill in such a way as to make it correspond to its extended scope."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

PETROLEUM BILL.

The Hon'ble MR. ILBERT also moved that the Bill to modify temporarily certain provisions of the Petroleum Act, 1881, be taken into consideration. He said:—

"This Bill, as I stated on the occasion of the last meeting of the Council, was introduced in compliance with the request of the Secretary of State, and

for the following reasons: It will be remembered that under the Act of 1881 the dangerous quality of petroleum is ascertained by a certain chemical test, which is described in the schedule to the Act, and is commonly known as Abel's test. Now, Professor Abel has recently advised the Secretary of State that conditions of climate make the test provided by the Act of 1881—his own test be it remembered—so uncertain as to be inapplicable in India. That is a very serious statement, and it is one which appears to shake the scientific foundations on which the Act of 1881 rests; and, if it is to be accepted as sound, it is difficult to avoid the conclusion that the Act of 1881 is unsuitable, and ought to be amended as soon as possible. Under these circumstances, and in order to meet certain cases which, as it was alleged, involved considerable hardship under the existing law, the Secretary of State suggested the expediency of passing forthwith a short temporary measure admitting petroleum on certificates granted at the port of departure. In deference to this suggestion, and to the opinion of the eminent scientific authority on which it was based, we prepared and introduced the present measure.

"It will be observed that this measure is temporary, provisional, and, above all things, permissive. It is temporary, as it is contemplated that it shall, after passing, continue in force only until the first day of January, 1883, or until such later date as the Governor General in Council may by notification direct. It is, on the face of it, provisional, as it is only intended to make provision for what is to be done pending certain further scientific inquiries considered necessary. Finally, it is permissive, as it does not come into operation of its own force, but merely enables the Governor General in Council to accept certain tests other than those provided by the Act of 1881, if on inquiry he is satisfied that they are sufficient.

"Further than that we were not prepared to go. We thought that we might with safety go so far, not intending to bring the Act into operation at once, but merely to take power to modify the Act in such a way as should be found suitable if on enquiry it was considered expedient to do so. Notwithstanding the passing of the Act, we should still have had to decide in our executive capacity what effect should be given to it. However, various representations have been made to us; we are instituting further inquiry, and, on the whole, we think it expedient not to proceed, even legislatively, with the measure in such a way as to produce the appearance of undue hurry; and in particular we are anxious to consult and obtain the opinion of such bodies as the Calcutta Chamber of Commerce. I shall, therefore, only move that the Bill be taken into consideration, and I do not propose to move that the rules for the conduct of business be in any way suspended.

"The Bill will be published in the ordinary course."

Major the Hon'ble E. BARING said:—"I merely wish to say that I entirely approve of the postponement of this measure. It deals with a question which is new to myself, and possibly to other Members of Council. I think that, before it is passed into law, both this Council and the public should have some further time to consider its provisions."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT asked for leave to postpone the Motion that the Bill be passed.

Leave was granted.

The Council adjourned to Wednesday, the 14th June, 1882.

D. FITZPATRICK,

Secretary to the Government of India,

Legislative Department.

SIMLA;
The 7th June, 1882.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th JUNE 1882.

GENERAL REMARKS.—The monsoon has been progressing rapidly up the western coast, and most of the provinces which usually benefit thereby have received rain: thus the Bombay Presidency, part of the Nizam's Territories, the Berars, part of the Central Provinces, and the Central India and Rajputana States record more or less heavy rainfalls. From the Bay of Bengal the monsoon is now gaining strength, and more or less rain has fallen in all parts of Orissa and the Central Provinces districts bordering thereon, as well as in all parts of Bengal proper and Behar (excepting the Patna district and Durbhunga). British Burma, too, has received heavy rain. In Southern India the rains have continued heavy in Coorg, on the Malabar Coast, and in Travancore, and fair in the greater part of the Madras Presidency and of the Mysore State. In the Mulnad portion of Mysore, however, the fall has been heavy.

In Assam the southern districts continue to receive heavy rainfall, and other parts comparatively less. In the North-Western Provinces slight rain has again fallen in nearly every district; and in the Punjab four districts have had rain.

General prospects are favourable throughout the country; crops where on the ground are doing well; and ploughing and sowing almost everywhere are progressing satisfactorily. These operations are, however, retarded somewhat in parts of the Mysore State and in some of the southern districts of Bombay by too much rain. In the Madras Presidency two districts need more rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(June 14th)		
Bellary ...	·67 (average of seven stations).	Standing crops good; harvest paddy and sugarcane, yield of paddy below average, of sugarcane average; small-pox and fever in parts.
Kurnool ...	·42 (average of six stations).	Standing sugarcane and indigo suffering from want of water in parts; cattle-disease in parts.
Ganjam ...	·37 (average of ten stations).	Standing (wet and dry) crops thriving; small-pox, fever, and cholera prevalent; cattle-disease exists.
Kistna ...	·61 (average of nine stations).	Small-pox and cattle-disease in parts.
Chingleput (Madras) ...	·38 (average of two stations).	Standing crops good where water available; agricultural operations progressing; cholera, small-pox, and cattle-disease in parts.
Coimbatore ...	·84 (average of eleven stations).	Standing crops generally good, but *cholum* slightly attacked by insects in parts; harvest *cholum* and gingelly, outturn average.
Tanjore ...	·27 (average of five stations).	Standing crops generally good; harvest gingelly and chillies, outturn average.
Madura ...	·56 (average of five stations).	Standing crops fair; fever and cholera in parts.
Malabar ...	20·82 (average of fourteen stations).	Sowing of first crops nearly over in parts; small-pox, cholera, and fever in parts.
Travancore ...	7·26	Ploughing and sowing nearly over; fever slightly prevalent. *General Remarks.*—General prospects good.
Bombay—(June 14th)		
Kurrachee ...	No rain	Weather cloudy and sultry; river at Kotri on 12th 13¾ feet, same as on corresponding date last year; fever in eight talukas; cattle-disease in Ghorabari; rice planting going on in Jerruck and Shahbandar divisions; water much wanted in Mirpur Botoro and Sujawal talukas; some damage to crops in Khathatappa by crabs and turtles; wheat, red rice, and *bajri* in Karachi 22, 40 and 30, in Sehwan 28, 48 and 48, in Ghorabari 16, 48 and 48, and in Sujawal 18, 48 and 48 lbs. per rupee respectively.
Hyderabad ...	Rain on 8th at Tandabago, 1·10.	River rising steadily; *kharif* operations general; hot winds still continue; wheat 24, *juari* 44, *bajri* 41, red rice 34, and white rice 22 lbs. per rupee.
Ahmedabad ...	(*Vide* remark column, which apparently includes rainfall of the week under report.)	Total rainfall 6·56; cholera—in Viramgaum 192 cases, 83 deaths, in Sanand 7 cases, 2 deaths, in Dhakroi 58 cases, 17 deaths; ploughing commenced; wheat 26 and *bajri* 29 lbs. per rupee.
Baroda ...	3·57	Total rainfall 4·44; sowings of rice commenced in Nausari; slight cholera in parts of Kari division; *bajri* 29 and common rice 23 lbs. per rupee.
Surat ...	4·26	Total rainfall 8·16; sowing commenced in places; 3 cholera deaths in Surat; *juari* 35 and *nagli* 32 lbs. per rupee.
Nasik ...	Average rainfall, 3·09; Nasik, 4·85; Igatpuri, 12·65; minimum in Yeola, 2·55.	Weather wet and windy; small-pox in Trimbak; *bajri* 33 and wheat 24 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	Rain every day except on 9th; heavy on 11th; total of week 5·74.	Total rainfall to date 24·35, being 16·27 above average; abnormal temperature 2° cool from 7th to 10th, 5° cool on the 11th and 12th, and 3° cool on 13th; vapour in air in excess of normal on 7th, afterwards normal; gale on 11th and 12th; wind normal on 7th and 8th; abnormal wind strong from south-east on 9th and 10th, and from south-west from 11th to 13th; lightning and thunder on 11th.
Poona ...	Rain throughout district; maximum 4·36 at Indapur; minimum 1·05 at Purandhar.	Sowing operations progressing; *bajri* 41¼ and *juari* 55¼ lbs. per rupee, in Poona *bajri* 36¾ and *juari* 43½ lbs. per rupee.
Ahmednagar ...	Rain throughout the Collectorate—maximum at Jhamkhed, 6·09; minimum at Rahuri, 1·55.	Sowing of rain crops commenced in Nagar, Shrigonda, Sangamner, and Akola; large flight of locusts visited Kopergaon, Sangamner, and Parner; slight cattle-disease in Nagar and Newasa; cholera in Parner, 10 attacks, 2 deaths; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 45 in Kopergaon; *juari*—maximum 84 in Jhamkhed, minimum 44 in Kopergaon.
Sholapur ...	Maximum rain in Sholapur, 11·40; minimum in Malsiras, 3·50; good rain throughout.	No fresh cholera cases; *juari* 72 lbs. 9 tolas and *bajri* 53 lbs. 33 tolas per rupee.
Dharwar ...	Rain in all talukas—maximum in Hangal, 6·40; minimum in Rannibennur, 1·45.	Break desired in Dharwar, Bankapur, Hangal, Kalghatgi, and Kod, where sowing is retarded; public health good; rice 22 lbs. per rupee.
Kanara ...	.....	No report received.
Rajkot ...	·65	Weather cloudy; cholera in Nawanagár, Gondal, Dhrol, Kotdasangam, Jetpur; Bagusra and Junagad; *bajri* 25 and *juari* 28 lbs. per rupee.
		General Remarks.—Rain throughout Presidency proper, heavy in the south, retarding sowing operations; slight fever and cattle-disease continue in a few districts; flights of locusts in Ahmednagar and Satara; cholera in Belgaum, Kaladgi, Satara, Ahmednagar, Ahmedabad, and parts of Kathiawar; prices generally steady.
Bengal—(June 14th)—		
Chittagong ...	Rain all over the district, 3·63.	Weather seasonable; transplanting progressing; cholera and small-pox continue; cattle-disease prevalent in some localities; prices somewhat higher.
Dacca ...	0·95; rain commenced on 12th.	Weather stormy; crops progressing as before; spring rice harvest estimated at 14 annas.
24-Pergunnahs (Calcutta)	5·34	Lands being prepared for early and winter rice and other crops; sowing in low lands progressing; late rain has done much good; prices of common rice stationary; health good.
Moorshedabad ...	1·30	Prospects of crops favourable; early rice still being sown in some places; elsewhere young plants flourishing; lands being prepared for winter sowings; public health generally good.
Rajshahye ...	1·06	Weather cloudy and showery; prospects of paddy and jute favourable; *sesamum* being cut; cholera and fever still reported; weather virulent.
Burdwan ...	1·05; general rain	Cultivation going on well; prospects favourable; health fair.
Rungpore ...	0·67	Prospects of crops favourable; sowing of winter rice going on; public health good.
Bhagálpur ...	1·01	Prospects good; paddy being sown; lands being prepared for sowing autumn crops; general health good, though many cases of cholera reported from Umulpur.
Purneah ...	0·40	Crops improved by rain, especially indigo; weather, mixed sunshine and cloud, favourable; weeding and sowing of winter rice proceeding; health improved; cattle-disease reported towards south-east; rivers rising.
Patna ...	*Nil*	Clouds threatening; rice and other autumn crops sowing proceeding; *china* and sugarcane doing well; cholera prevalent in Behar and Barrh sub-divisions and small-pox in Behar.
Durbhunga ...	*Nil*	Weather cool, east wind with clouds; crop prospects good; cholera abating fast in many places, but still bad in Tajpur.
Hazáribágh ...	2·60	Weather cloudy and showery for last three days; ploughing and sowing continue; a few small-pox cases still reported, health otherwise good; cattle-disease reported.
Cuttack ...	4·65	Rain proved beneficial; sowing still progressing; rivers in flood; cholera disappearing.
		General Remarks.—More or less rain in all parts of the province during the week except in Patna and Durbhunga; prospects everywhere very favourable; early rice, jute, and other autumn crops being sown; early sowings doing well; sowing of winter rice also commenced in some districts; sugarcane, indigo, and other crops in the ground progressing; spring rice harvest almost finished, general outturn good; cholera much diminished; sporadic cases of small-pox and cattle-disease still reported from a few districts.
N. W. Provinces and Oudh—		
Benares (June 13th)	Benares, ·20; Chandauli, ·40; no rain in Gungapur.	Weather burning; week hot, with heavy clouds; no agricultural operations in progress save irrigation of sugarcane; health of men and cattle generally good, though isolated cases of cholera are reported in city and in mauza Salempur and tahsil Chandauli; bazars well supplied with food-grains; prices rising slightly.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Cawnpore ...	.....	No report received.
Allahabad (June 14th)	Rain has fallen all over district.	Sky cloudy, heavy rain evidently impending; cholera decreasing in district, city continues healthy; a little cattle-disease, but not serious; prices stationary.
Gorakhpur („ 13th)	.....	Great heat prevails; weather cloudy, but little rain; cholera continues; ploughing in progress; prices slightly risen.
Jhánsi („ 12th)	·16 rain fell last night, and more is expected.	Ploughing commenced; markets well supplied; prices rising; small-pox amongst children is reported in pargana Jhánsi, otherwise public health is good; a few cases of cattle-disease in three parganas.
Agra („ 13th)	Rain in all parganas, from ·10 to 3·60.	*Kharif* sowings commenced; fever and small-pox continue in city and three parganas; general health good; prices rising.
Bareilly („ „)	Rain set in on 11th, with general fall of 2·00.	Weather now clearing up; sowings have begun.
Meerut („ „)	Meerut, ·50; Ludhiana, ·70; Ghaziabad, ·70; Mowana, ·80; Bagpat, ·90; Hapur, ·90.	Weather excessively sultry till Saturday, when a violent storm at night cooled the air, sky again clear, with west winds; health good; supplies sufficient; prices stationary.
Kumaun („ „)	Some rain	Weather cloudy; some measles and small-pox of mild type; cattle-disease continues; prices rising slightly.
Lucknow („ „)	A few showers	Wind easterly; weather cloudy and close; markets well supplied; prices rising; cholera increasing in city.
Partabgarh („ „)	Rain fell at Khunda on 7th and 11th; the rains appear to have regularly set in.	Prices steady; ploughing commenced; cholera continues about the same.
Sitapur („ „)	No rain beyond slight sprinkles.	Weather often cloudy; winds generally easterly but variable.
Fyzabad („ „)	·80	Sugarcane being irrigated; sowing of *dhan* and *khoda* commenced; cholera decreasing.
Rae Bareli („ 12th)	.....	Weather cloudy and sultry, wind shifty, mostly from the east; cholera in two tahsils; prices slightly rising.
Farukhabad („ 13th)	Slight showers in four tahsils.	Sky still cloudy; health of men and cattle good; prices fallen slightly.
		General Remarks.—Some rain fell in nearly every district, varying from slight showers to 5·40; *kharif* ploughing and sowing begun; markets well supplied, but prices rising slightly; cholera continues in Benares, Gorakhpur, Rae Bareli and Partabgarh, has increased in Lucknow, and decreased in Allahabad and Fyzabad; cattle-disease prevalent in Kumaun, a few cases reported from Allahabad and Jhánsi.
Punjab—(June 13th)		
Delhi ...	1·4	Health fair; prices stationary.
Hissar ...	Rain required	Weather stormy; small-pox continues at Hansi; prices stationary.
Umballa ...	No rain	Preparations for *kharif* sowings in progress; health fair; prices gradually rising.
Jullundur ...	About 1·6	Health good; prices steady.
Amritsar ...	No rain	Grain garnered; health fair; prices steady.
Sialkot ...	Slight rain	Health good; prices falling.
Lahore ...	No rain	Weather cloudy; health good; prices stationary.
Ferozepore ...	No rain	*Rabi* crops harvested; health good; prices of grain and barley gradually rising.
Mooltan ...	No rain	*Kharif* sowings still in progress; health good; slight rise in the price of barley.
Rawalpindi ...	4·3	Crops being garnered; health generally good; prices slightly fluctuating.
Dera Ismail Khan ...	No rain	*Kharif* sowings in progress; prices stationary.
Peshawar ...	No rain	Health good; prices steady.
		General Remarks.—Rain has fallen in the Delhi, Jullundur, Sialkot, and Rawalpindi districts; health of the province generally good; prices of food-grains generally steady.
Central Provinces—		
Nagpur ...	4·41	High winds; *kharif* sowings commenced; prices stationary.
Jubbulpore ...	6·19	Weather cloudy and cool; cholera and small-pox prevalent; rice 12 and wheat 19 seers per rupee.
Saugor (June 12th)	Slight rain	Weather close; land for *kharif* still under preparation; prices rising; health good.
Khandwa („ 14th)	6·03	Weather cloudy and stormy; *kharif* sowings commenced; small-pox prevalent; prices stationary; wheat 14 and *juari* 22½ seers per rupee.
Seoni ...	5·12	Cholera and small-pox prevalent; cattle-disease abating; prices risen; rice 13 and wheat 19 seers per rupee.
Hoshangabad (June 13th)	3·94	*Kharif* sowings commenced; small-pox prevalent; rice 9, wheat 14, and *juari* 24 seers per rupee.
Raipur („ 10th)	4·95	Rice sowings carried on briskly; health good; prices stationary; rice 35½ and wheat 30 seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces— *contd.*		
Sambalpur (June 8th)	·60	Weather cloudy and showery; rice-fields under preparation; health good; rice 49 seers per rupee. *General Remarks.*—Weather cloudy and pleasant, with heavy rain in most districts; preparations for *kharif* sowings continue; cholera and small-pox abating; prices easy.
British Burma— (June 10th)		
Akyab ...	10·94	Total rainfall 25·69; 2 deaths from small-pox in town, disease still slightly prevalent in one township, otherwise public health good; cattle-disease severe in two townships.
Rangoon ...	2·63	Total rainfall 14·82; 1 death from small-pox, otherwise public health good.
Bassein ...	11·87	Total rainfall 23·70; public health good; a few deaths from cattle-disease in two townships.
Prome ...	2·61	Total rainfall 7·95; no deaths from cholera in Prome town, but a few deaths in district.
Amherst (Moulmein) ...	16·19	Total rainfall 39·75; public health good; cattle-disease has abated in one township, continues in another.
Toungoo ...	2·29	Total rainfall 14·94; seven deaths from small-pox in town, but no fresh cases, otherwise public health good; twelve deaths from cattle-disease in one township. *General Remarks.*—Small-pox is slightly prevalent in Akyab and Toungoo, and cholera more or less in a few places; public health is generally good; cattle-disease is severe in Akyab; prevalent in Amherst and a few other districts; ploughing has become general.
Assam—(June 14th)		
Gauhati ...	·34	Weather very hot, but has cooled down during the last two days; more rain wanted; prospects of crops continue favourable; cholera abated.
Sylhet ...	6·64	Cultivation proceeding; *amun* pretty well sown; *murali* nearly all sown; *aus* a little sown; *sali* nurseries mostly ready; cholera still reported; tea doing well.
Cachar ...	8·92	Days hot and sultry, nights rainy; more than half of *dumahi* and *murali* crops sown; 2 cases of cholera reported from Lakhimpur; common rice 26¾ seers per rupee.
Dibrugarh ...	0·47	Weather hot; prospects of *aus* paddy good; ploughing for *sali* paddy in progress; cattle-disease still reported; public health good, except a few cases of small-pox in the North Lakhimpur sub-division and a few cases of cholera in the Sadr sub-division.
Mysore and Coorg— (June 14th)		
Bangalore ...	·42	Drizzling rain at intervals; young sugarcane in good condition; *poonji* ready; *harka*, gingelly, and lamp-oil seeds and ground-nuts sown in places; prospects favourable; no material change in prices.
Mysore ...	1·50	Light monsoon, with high winds; standing crops in good condition; prices fair.
Mercara ...	29·29	Rain heavy and continuous during the week; the Cauvery, with its tributaries, in full flood; vacancies in coffee estates being filled up by transplantation; prospects of season good; health good. *General Remarks.*—Rain has fallen throughout the Mysore State; agricultural operations retarded in the Mulnad owing to excessive rainfall; 4·54 inches at Hassan, above 3·39 inches at Chickmangalur; crops in good condition; prospects good; prices satisfactory; public health generally good; cholera continues slightly in the Yedattore and Ashtagram taluks of Mysore district.
Berar & Hyderabad— (June 14th)		
Amráoti ...	2·91	Cotton sowing commenced; prices—wheat 18 and *juari* 36 seers per rupee.
Akola ...	1·03	Weather warm; cotton sowing begun.
Hyderabad ...	1·82	Total rainfall from 1st January 5 inches; ground for coming *kharif* crop being still prepared; tanks have received small quantity of water; high south-west winds prevail; health in general improving; prices—wheat 16½, coarse rice 10, white *juari* 24½, yellow *juari* 29, and *tur* 28¾ seers per current sicca rupee.
Central India States— (June 14th)		
Indore ...	8·04	The monsoon has regularly set in; health good and prices steady.
Morar (Gwalior) ...	·70	Health good.
Sutna ...	·32	Public health good.
Rutlam ...	.....	No report received.
Neemuch ...	·15	Public health good.
Goona ...	1·29	Weather cloudy; wheat 21 seers per rupee.
Bhopal ...	1·05	Storms from south-west; ploughing for *kharif* active; health good.
Agar ...	Some rain on 13th	More rain required for sowing; health good.
Nowgong ...	1·11	Severe thunderstorm on 3rd; health good.
Manpur ...	6·75	Sowing of *makka* commenced; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (June 14th)	2·02	Weather close, sultry, cloudy, and foggy.
Sirohi („ 11th)	·20	Tanks and wells fair; health good; great storm on 7th.
Marwar ...	.....	No report received.
Meywar (June 10th)	1·41	Tanks, wells, and health good; ploughing commenced; monsoon burst on 3rd; thunderstorms daily.
Harowti („ „)	Deoli, ·10; Kotah, 1·24; Shahpura, ·88.	Weather cloudy, close; heat great; health good, but indifferent in some villages about Deoli; some cholera cases reported.
Jhallawar („ 7th)	·52	Small-pox still continues.
Ajmere („ 13th)	·12	Sickness about.—2 cases of cholera in Ajmere and cases reported in villages around.
Jeypore („ „)	·57	Weather cloudy; easterly winds; few sporadic cases of cholera and small-pox in districts, otherwise health good.
Bhurtpore ...	.....	No report received.
Ulwur (June 14th)	Good rain on 11th	*Kharif* sowings commenced; health good.
Nepal—(June 9th)		
Katmandu ...	·90	Weather hot and close.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that there was a heavy demand for indigo sowings and that the supply was short of demand.

Executive Engineer, Agra Canal, reports that the canal was closed for repairs and clearance of weeds from the 5th to 13th April, inclusive.

Executive Engineer, Rohilkhand Canals, reports that every drop of water is being used up for sugar irrigation and that the rivers are all very low.

Allahabad,
The 29th May 1882.

G. H. D. WALKER,
Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 14th June, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Major-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.
The Hon'ble W. W. Hunter, LL.D., C.I.E.

PANJÁB UNIVERSITY BILL.

The Hon'ble MR. GIBBS introduced the Bill to establish and incorporate the University of the Panjáb, and moved that it be referred to a Select Committee consisting of His Honour the Lieutenant-Governor, the Hon'ble Messrs. Ilbert, Crosthwaite and Hunter and the Mover. He said :—

"In accordance with the permission which was obtained for me by my hon'ble and learned friend Mr. Ilbert, I now beg to introduce this Bill.

"The Bill has been drawn with as much care as was possible from the information which we have on record; it has also been deemed advisable to follow as closely as we could the form of the Acts already on the Statute-book, and under which the Universities of Calcutta, Madras and Bombay have been founded. The Bill, in accordance with the usual practice, will be printed and published, and we shall no doubt receive the benefit of public criticism upon it.

"There are some points which will doubtless require very considerable care on behalf of the Select Committee, before they arrive at a conclusion on the final form it should take; but these are points which I need not notice in detail on the present occasion.

"The Objects and Reasons published with the Bill will give the public a very general, and at the same time clear, statement of the intention of the Government in bringing in this Bill. My hon'ble and learned friend Mr. Ilbert, in applying for leave to introduce the Bill, shortly stated the circumstances which had led to it, and I do not think that I need now do more than allude to one or two points which have been decided upon since permission to bring in the Bill was granted by the Council.

"Of those points, the first I may mention is that, owing to difficulties of a legal nature which might arise, it has been found necessary to provide in general terms that the University is founded under the patronage of the Governor General, but without stating that the Governor General may be 'patron' or 'visitor.'

"The term 'patron' is not one generally used regarding Universities, while the term 'visitor,' which is a University term, might give rise to some rather difficult and abstruse questions as to the power of a visitor of a University in this country, as compared with Universities at home—especially the Royal University lately established in Ireland.

"With regard to the appointment of Fellows, a further clause has been introduced, providing for some who may be chosen by the Senate and submitted by them to the Chancellor for his approval. This is an advance on what is the law at present with regard to the other Indian Universities; but I think it is a step in the right direction, and it is certainly one regarding which I should

not be surprised if, before long, applications are not made by other Universities to introduce a similar provision. There is a strong feeling that some Fellows should be nominated by the Senate for approval by the Chancellor.

"In the Bombay University, of which I was Vice-Chancellor for nine years, this was to a certain extent arranged by the understanding that the Vice-Chancellor should send in a list of names every year to the Chancellor of those gentlemen who had distinguished themselves particularly with regard to the University, and whose fitness for the position of Fellow was peculiarly known to the Senate and the governing body of the University.

"I would further observe that it was at first suggested, with regard to the appointment of a Chancellor and Vice-Chancellor, that the Governor General should be the Chancellor, and the Lieutenant-Governor the Vice-Chancellor. This was objected to in the Home Department, on the ground that by this means we should have two ornamental officers at the top; while the Vice-Chancellor should in all Universities be the principal guiding officer, and should be chosen from that class of the Fellows who are sure to be present during the greater portion of the year at the seat of the University, and who, therefore, by his constant attendance, will secure the continuity of the work in accordance with the principles on which the University is founded. This, it was considered, would not be the case if an officer to be called the Vice-President of the Senate was to be chosen. His Excellency the Viceroy concurred in this view, and thought—especially as he would in ordinary circumstances be very seldom present to take part in the meetings of the University—it was better for him to take the rôle of Patron to the University, and that, while the Lieutenant-Governor is the proper person to be Chancellor, the Vice-Chancellor should be chosen, as above stated, from those officers who are peculiarly fitted for that post.

"I may also notice that the Bill as drafted certainly does not go into those details which perhaps the public might expect to find in it; but it has been found by experience that it is never advisable to put into a Bill what can be better provided for by rules and bye-laws, which may be made from time to time, and may require alteration.

"If an opposite course were adopted, no trivial alteration could be made in any of those rules and bye-laws without recourse to the Legislative Council, which would be extremely troublesome.

"The consequence is that power is taken in this Bill, as in the other University Acts, to give power to the Senate, with the permission of the Lieutenant-Governor, as Chancellor, and the final sanction of the Governor General in Council, to make bye-laws for meeting all the necessary duties which the University has to carry out, with regard to the appointment of Examiners, the nature of the examinations, the degrees and diplomas which may be acquired, and the manner in which those degrees are to be conferred.

"The only other matter which I need notice is with respect to the appointment of the Select Committee to whom the Bill is to be referred. The names on the list are those of His Honour the Lieutenant-Governor of the Panjáb, and of my hon'ble friends Messrs. Ilbert, Crosthwaite, Hunter, with the Mover.

"The choice has been made of these gentlemen because we think that in the person of the Lieutenant-Governor we shall have an able representative of what is required for the Panjáb; while Mr. Hunter, as specially representing education in general, and the Commission now sitting in particular, will be a most useful member; as will also be Mr. Ilbert, who represents, if I may say so, the English Universities; and Mr. Crosthwaite, whose knowledge of the country and the wants of the people is perhaps not exceeded by any other member of Council."

The Motion was put and agreed to.

The Hon'ble MR. GIBBS also moved that the Bill and Statement of Objects and Reasons be published in the *Panjáb Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 21st June, 1882.

SIMLA;
The 14th June, 1882.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20th JUNE 1882.

GENERAL REMARKS.—The monsoon has continued to give heavy rain in the extreme south-western tracts of Southern India, including within its range Malabar, Travancore, Coorg, and a portion of the Mysore State. The Madras Presidency generally has continued to receive a fair rainfall, the noticeable points in the week's report being that the Chingleput and Madura districts have received none, while Coimbatore has enjoyed a good fall. In the Bombay Presidency also rain has continued general and has been extremely heavy in parts.

In Central India, the Nizam's Territories have received less rain than in the preceding week, while it has continued copious in the Berars and in most districts of the Central Provinces, especially in Jubbulpore and Sambalpur. Fair rain has also fallen in the Central India and Rajputana States.

In Northern India, Assam and Bengal, including Orissa and Behar, have continued to receive more or less heavy rain; and it has also been more or less general in the North-Western Provinces and Oudh. In the Punjab, where the monsoon seems hardly as yet to have penetrated, a little rain fell in six districts. In British Burma the rains continue heavy, as is usual.

General prospects are favourable throughout the country: ploughing, sowing, and in places the transplanting of young crops, are progressing rapidly, and standing crops are doing well. The only exceptions to the general favourable aspect are the want of more rain in two districts of the Madras Presidency, in parts of the Nizam's Territories, in the Punjab, and in two districts of Assam; and the excess of rain in Coorg and in part of Mysore, and probably in Malabar.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(June 21st)		
Bellary ...	·47 (average of six stations).	Standing crops good; harvest paddy, outturn below average; fever and small-pox in parts.
Kurnool ...	·23 (average of four stations).	Standing sugarcane and indigo require water in parts; agricultural operations progressing; cattle-disease in parts.
Ganjam ...	·70 (average of six stations).	Standing wet and dry crops not thriving for want of rain; small-pox, fever, and cholera prevalent; cattle-disease slightly exists.

The 3rd June 1882.

D. M. BARBOUR,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27th JUNE 1882.

GENERAL REMARKS.—The monsoon which was noticed in last week's report as not having as yet reached the Punjab does not appear to have made any marked progress during the week under report either in that Province or in Sind, though strong monsoon winds are reported at Kurrachee. Slight showers have, however, fallen in a few districts of the Punjab. In the Rajputana States rain is reported from two places only. In the North-Western Provinces and Oudh very little rain is reported during the week, and westerly winds prevail. In Behar, Bengal, and Orissa, as well as in Assam, more or less rain has continued to fall in all districts, except in Moorshedabad, where however the fall was exceptionally heavy in the preceding week.

Rain is reported from most of the Central India States and in the Central Provinces. In the Bombay Presidency, in Berar, and in the Nizam's Territories a break, more or less marked, has occurred. In Mysore and Coorg also there was less rain than in the preceding week. In the Madras Presidency the fall has been lighter than in the preceding week.

In British Burma heavy rain has continued to fall.

Ploughing, sowing, and transplanting of rice are favourably progressing as a rule throughout the country, and standing crops where they exist are generally doing well.

No excess of rain is reported anywhere, except in Sylhet. On the other hand, insufficient rain is reported in four districts of the Madras Presidency, in part of Mysore, the Nizam's Territories and Berar, in some districts of the North-Western Provinces and Oudh, and throughout the greater part of Rajputana and the Punjab.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(June 28th)		
Bellary ...	·15 (in one station)	Standing crops—wet good, dry require rain; harvest paddy, yield below average; fever and small-pox in parts.
Kurnool ...	·03 (in one station)	Want of rain much felt; standing sugarcane and indigo require water in parts; cattle-disease in some places.
Ganjam ...	·52 (average of sixteen stations).	Standing wet and dry crops not thriving for want of heavy rain; fever, small-pox, and cholera prevalent; cattle-disease exists.
Kistna ...	·46 (average of five stations).	Small-pox slightly and cattle-disease generally prevalent.
Chingleput (Madras) ...	·67 (average of three stations).	Standing crops good where water available; agricultural operations progressing; small-pox, cholera, and cattle-disease in parts.
Coimbatore ...	·23 (average of six stations).	Standing crops generally good, though *cholum* slightly attacked by insects in parts; harvest dry crops, outturn below average; small-pox and fever in parts.
Tanjore ...	·10 (average of four stations).	Standing crops generally good; harvest paddy, outturn below average; cattle-disease slight in parts.
Madura ...	·31 (average of seven stations).	Standing crops fail in parts; harvest *cholum*, yield about average; fever and cholera in parts.
Malabar ...	3·92 (average of thirteen stations).	Sowing first crops progressing; small-pox, cholera, and fever in parts.
Travancore ...	2·82	Ploughing and sowing over; fever slightly prevalent. *General Remarks.*—General prospects good.
Bombay—(June 28th)		
Kurrachee ...	No rain	Strong monsoon winds; river at Kotri on 26th 15 feet 11 inches, against 15¾ feet on corresponding date last year; fever in five talukas; crabs doing some damage in Tappa, Ghorabari taluka; wheat, red rice, and *bajri* in Kurrachee 22, 36 and 34, in Dadu 32 and 40, in Ghorabari 16, 48 and 44, and in Jati 18, 48 and 44 lbs. per rupee, respectively.
Hyderabad ...	.....	River still rising; *kharif* operations continue; fever in one taluka; wheat 25, *juari* 44, *bajri* 40, red rice 34, and white rice 29 lbs. per rupee.
Ahmedabad ...	7·54	Cholera—in Ahmedabad city 70 cases, 30 deaths, in Dhakroli 13 cases, 10 deaths, in Sanand 7 cases, 1 death, in Dhanduka 27 cases, 23 deaths, in Viramgaum 41 cases, 22 deaths; ploughing continues; sowing commenced; wheat 26 and *bajri* 29 lbs. per rupee.
Baroda ...	1·25	Total rainfall 7·12; sowing of *kharif* continues; slight cholera in Kadi division; want of rain felt in Amreli; general health good; *bajri* 29 and rice 23 lbs. per rupee.
Surat ...	1·71	Total rainfall 9·91; sowing and transplanting progressing; *juari* 35 and *nagli* 51 lbs. per rupee.
Násik ...	Igatpuri, 5·34; Peint, 3·35; slight showers in three talukas; no rain elsewhere.	Early sowing crops doing well; *bajri* sowing will commence shortly; locusts in several talukas; no sickness; *bajri* 36, wheat 24, and rice 24 lbs. per rupee.
Colaba (Bombay) ...	1·69	Total rainfall 27·07, being 7·07 above average; average temperature normal; vapour in air normal; wind normal from 21st to 25th; abnormal wind northerly on 26th and 27th.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Poona ...	Slight showers in two talukas.	Break in weather during the week; sowing progressing; *bajri* 40¼ and *juari* 55 lbs. per rupee, in Poona *bajri* 36¾ and *juari* 43½ lbs. per rupee.
Ahmednagar ...	Newasa, ·70; Parner, ·07; no rain in other talukas.	Sowing of *kharif* in progress in Parner, Shrigonda, and Kopergaon; cattle-disease in Nagar and Karjat; cholera in Parner, 11 cases, 4 deaths; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 45 in Kopergaon; *juari*—maximum 90 lbs. in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	Slight rain throughout.	No deaths from cholera; *kharif* sowing progresses; *bajri* 54 lbs. 19 tolas and *juari* 73 lbs. 17 tolas per rupee.
Dharwar ...	Slight rain in Gadag, Bankapur, Hangal, Kod, and Ron.	Sowing of *kharif* crops almost completed; young crops look well public health good; rice 22 and *juari* 55 lbs. per rupee.
Kanara ...	Karwar, ·27; total, 33·63; Kumpta, ·98; Sirsi, ·89; Hallial ·46.	Sowing operations continue above Ghât; rice plants healthy on coast; small-pox and cattle-disease subsiding; common rice in Karwar 12 seers, in district average 13¼ seers per rupee; weather cloudy and showery.
Rajkot ...	No rain	Weather hot and cloudy; cholera in some places in Halar and Sorath; *bajri* 24 and *juari* 29 lbs. per rupee.
		General Remarks.—Ploughing in general progress; sowing completed in some places; break in the weather in most districts, retarding operations in a few; locusts in Khandesh, Násik, and Satara; slight fever and cattle-disease in a few districts; cholera in Belgaum, Satara, Ahmednagar thana, Ahmedabad, and parts of Kathiawar.
Bengal—(June 28th)—		
Chittagong ...	8·38; heavy rain in all parts of districts.	Prospects of crops satisfactory; transplanting going on; prices steady; cholera, small-pox, and cattle-disease still continue.
Dacca ...	4·75	All crops doing well.
24-Pergunnahs (Calcutta)	1·12	Sugarcane, jute, and early rice promising well; prospects fair; low lands being cultivated for *amun* rice; health of people and cattle generally good; sporadic cholera reported from Baraset subdivision; rivers rising.
Moorshedabad ...	*Nil*	Standing crops doing well; ploughing for *amun* rice rapidly progressing; public health generally good.
Rajshahye ...	·98	Prospects of crops favourable; prices stationary; cholera and fever unchanged.
Burdwan ...	2·11	Prospects of crops favourable; health fair.
Rungpore ...	5·85	Prospects of crops good; prices of food-grains stationary; public health good.
Bhagálpur ...	·97	Prospects of crops good; sowing of autumn crops rapidly progressing; Ganges risen very much; a few cholera cases reported daily.
Purneah ...	3·16	Prospects of crops very good; weeding continues; health fair; rivers rising.
Patna ...	2·54	Prospects of *bhadoi* crops good; *cheena* and sugarcane doing well; cholera and small-pox still reported from Behar sub-division.
Durbhunga ...	3·61	Weather cooler and cloudy; crop prospects good; indigo manufacture begun; cholera abating.
Hazáribágh ...	3·15	Weather cloudy and seasonable; prospects of crops good; prices of food-grains unchanged; general health good.
Cuttack ...	·34	Sowing completed; *beali* crops being harrowed; cholera still reported.
		General Remarks.—More or less rain in all districts, except Moorshedabad, during the week; present prospects generally excellent; agricultural operations in full progress; all standing crops thriving well; cholera generally much abated, but still prevalent in parts of Orissa and elsewhere; much fever reported in Darjeeling terai; public health on the whole fair.
N. W. Provinces and Oudh—		
Benares (June 27th)	·1 in Benares tahsil	Weather close; clouds sometimes appear, but are scattered away by storms and west winds; *kharif* crops sown; rain urgently needed; health of men and cattle generally good; bazars well supplied with food-grains; prices steady.
Allahabad („ 28th)	·4 at Handia; ·1 at Meja; heavy rain to-day.	Cholera decreasing; prices slightly risen.
Gorakhpur („ 27th)	.....	Weather very hot; west wind changed to east to-day; rain wanted; cholera decreasing; sowings in progress; prices steady.
Jhánsi („ 26th)	·6 in Jhánsi; ·11 in Garotha.	A break from 20th; ploughing and sowing of *kharif* crops in progress; prices rising; health generally good; no cattle-disease.
Agra ...	Rain in two parganas only—·20 in one and ·30 in the other.	More rain needed throughout district; *kharif* ploughings and sowings continue; fever and small-pox continue in city and two parganas; general health good; prices stationary.
Bareilly (June 27th)	No rain since 20th.	Weather extremely hot but seasonable for *kharif* ploughing; cotton and maize being sown everywhere, but hardly enough rain for rice sowings; everything else is as usual.
Meerut („ „)	Occasional showers, with very partial rain.	Strong west wind throughout the week; rain wanted; cane and indigo flourishing, but other sowings have been postponed; health good; supplies scanty; prices rising very slightly.
Kumaun („ „)	Alternate rain and sunshine.	Weather seasonable; crops flourishing; cattle-disease still prevails; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Rae Bareli (June 26th)	.....	A break in the rains, winds westerly; fields are being prepared for *kharif* sowings; cholera continues in two tahsils, but is on the decrease; prices rising.
Cawnpore („ 27th)	Average rainfall ·15	Rain beneficial to crops already sown; sowings in progress, but sky again cloudless and weather sultry; general health good; prices slightly risen.
Farukhabad („ „)	No rain	*Kharif* sowings in progress; prices steady; fever prevalent.
Lucknow („ „)	No rain, except ·10 at Sadr on 20th.	Sky clear; strong west winds; more rain wanted; supplies abundant; prices rising; no cattle-disease; cholera in city decreasing.
Partabgarh („ „)	.....	Prices rising; rain wanted badly; sky cloudy at times; heat very great; cholera increasing.
Sitapur („ „)	Average ·7	Hardly any rain since 20th, winds variable, now easterly.
Fyzabad („ „)	No rain	Sowing of *dhan* going on; cholera decreasing.
		General Remarks.—Very little rain during the week; winds chiefly westerly; weather sultry; more rain wanted; prices rising slightly, but supplies plentiful, except in Meerut; cholera increasing in Partabgarh, but has decreased elsewhere; cattle-disease continues in Kumaun.
Punjab—(June 27th)		
Delhi ...	·20	More rain wanted; health fair; slight fall in prices of gram and *bajri*.
Hissar ...	No rain reported, but wanted.	Health good; prices of food-grains fluctuating.
Umballa ...	No rain, but wanted	Health fair; prices of food-grains daily rising.
Jullundur ...	·14	Health good; prices stationary.
Amritsar ...	·70	Health fair; slight fall in price of barley.
Sialkot ...	·50	Health good; prices steady.
Lahore ...	Slight rain	Health good; prices stationary.
Ferozepore ...	·60	Health good; *kharif* ploughings commenced; prices steady.
Rawalpindi ...	No rain	*Kharif* crops good; fever in Rawalpindi, measles in Pindigheb; slight fall in prices of Indian-corn and gram.
Mooltan ...	No rain	Crops and health good; slight fall in prices of barley and millet.
Dera Ismail Khan ...	No rain	*Kharif* crops good; health good; prices fluctuating.
Peshawar ...	No rain	Health fair; prices rising.
		General Remarks.—Slight rain has fallen in the Delhi, Jullundur, Amritsar, Sialkot, Lahore, and Ferozepore districts; health generally good; fever still reported in Rawalpindi, and measles in Pindigheb; prices of food-grains generally are fluctuating.
Central Provinces—		
Nagpur (June 28th)	·26; heavy rain to-day.	Weather cloud and sultry; prices stationary.
Jubbulpore ...	1·71	Weather cloudy at times; ploughing continues; sowings commenced; cholera and small-pox prevalent; wheat 12 seers per rupee.
Saugor (June 26th)	2·22	Clear weather, facilitating sowing operations, which are in full swing; health good.
Seoni ...	·73	Ploughing facilitated by break in the weather; cholera and small-pox prevailing; prices stationary.
Hoshangabad (June 27th)	·21	Ploughing continues; *kharif* sowings progressing; small-pox prevalent; wheat 14 seers per rupee.
Khandwa („ „)	·25	Weather cloudy and stormy; *kharif* sowings in progress; rain wanted; small-pox prevailing; wheat 14 seers per rupee.
Raipur ...	.....	No report received.
Sambalpur (June 22nd)	1·31	Weather cloudy and cool; early sowings damaged by heavy rains; health good; rice 56 seers per rupee.
		General Remarks.—Weather cloudy and close; rain has fallen in most districts, but not sufficient to benefit sowings; which have begun; cholera and small-pox still prevalent in the Jubbulpore division; prices steady.
British Burma—(June 24th)		
Akyab ...	5·44	Total rainfall 68·90; small-pox slightly prevalent in one township, otherwise public health good; cattle-disease severe in two townships; ploughing commenced.
Rangoon ...	3·17	Total rainfall 21·16; 11 deaths from cholera, otherwise public health good.
Bassein ...	4·46	Total rainfall 41·38; 7 deaths from cattle-disease in Bassein township; ploughing general.
Prome ...	2·09	Total rainfall 11·58; 1 death from cholera in Prome town and 8 in districts; some cattle-disease in two townships; ploughing not yet commenced for want of rain.
Amherst ...	10·52	Total rainfall 69·65; public health good both in Moulmein and district; cattle-disease still prevalent in two townships.
Toungoo ...	4·19	Total rainfall 23·75; no deaths from small-pox in town; public health generally good.
		General Remarks.—A few scattered cases of cholera and a little small-pox in Akyab, otherwise public health good; cattle-disease continues prevalent in some parts of Akyab and Amherst, slight in several other districts; season generally favourable; ploughing backward in Tharrawaddy and Prome for want of rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—(June 28th)		
Gauhati ...	4·02	Weather seasonable; fever in the interior and at Barpetta; prospects of crops continue favourable.
Sylhet ...	9·87	Spring paddy reported being cut; transplanting of *bajri* finished; some damage done by flood in lowlying lands; more sun wanted for tea; cholera still reported.
Cachar ...	4·75	Weather very hot, with occasional rains; sowing of *dumahi* and *murali* crops nearly finished; cultivation of *sali* crop commenced; tea doing well; common rice 21 $\frac{5}{16}$ seers per rupee; 7 cases of cholera from Lakhimpur and 1 from Katigora reported.
Dibrugarh ...	4·72	Weather showery; ploughing for *sali dhan* in progress; cattle-disease still reported; public health generally good.
Mysore and Coorg—(June 28th)		
Bangalore ...	·30	Crops in good condition; sowing operations delayed for want of sufficient rain; prospects of public health good; rice 11, *ragi* 26, and horse-gram 29¾ seers per rupee.
Mysore ...	·04	Standing crops in good condition; prospects fair; rice 11½, *ragi* 21, and horse-gram 26¾ seers per rupee.
Mercara ...	2·40	The break in the monsoon is favourable to agricultural operations; rice-fields are being ploughed and sown; the *ragi* crop in the Naujarajapatna taluk is doing well; coffee-berries have formed; public health is good.
		General Remarks.—Little rain has fallen in the Mysore State since last report; prospects are generally favourable and public health good; pasturage sufficient; prices show a slight upward tendency.
Berar & Hyderabad—(June 28th)		
Amráoti ...	Rain much needed	Sowings retarded for want of rain; wheat 18 and *juari* 36 seers per rupee.
Akola ...	.....	Weather warm and sultry; cotton sowing continues.
Hyderabad ...	No rain	Sowing of *kharif* crops postponed on account of break in weather; fever and cattle-disease prevail in one taluk; prices—wheat 14, rice 7½, white *juari* 19¾, yellow *juari* 23, and *tur* 24 seers per current sicca rupee.
Central India States—(June 28th)		
Indore ...	·08	Weather hot and cloudy; sowings have been almost completed; some further rain is desirable; health good and prospects generally favourable.
Morar (Gwalior) ...	1·62	Health good; prices stationary.
Sutna ...	1·03	Sowing commenced; health good.
Rutlam ...	.....	No report received.
Neemuch ...	·35	Weather cloudy and hot; public health good.
Goona ...	1·05	Prospects good; weather cloudy.
Bhopal ...	2·3	Weather cloudy; prospects good.
Agar ...	No rain	Sowing going on; health good.
Nowgong ...	13·61(?)	Health good; cholera in Baoni.
Manpur ...	No rain	*Makka* crop looking well; public health good; wheat has risen to 15 from 17¾ seers per rupee.
Rajputana—		
Abu (June 26th)	1·69	Weather clear, with light clouds and cool breeze.
Sirohi („ 25th)	.....	Tanks dry; wells fair; health good; high winds prevail.
Marwar („ 23rd)	.....	Plenty of water in tanks and wells; health good; clear strong south-west winds prevail, such an abnormal state of weather is to some extent alarming, prices rising rapidly in consequence.
Meywar („ 24th)	.....	Tanks, wells, and health good; sowing operations progressing; weather very suitable for sowing.
Harowti („ 24th)	.....	High west wind, weather clear; ploughing operations retarded owing to break; rain much needed; health indifferent; few cases of cholera at Tonk and Shahpura.
Jhallawar („ 21st)	.....	Weather cloudy and windy; health good.
Ajmere („ 27th)	No rain	Cholera abating in Ajmere; sky cloudy.
Jeypore („ 27th)	0·23	Wind variable; weather cloudy; health good.
Bhurtpore ...	.....	No report received.
Ulwur (June 28th)	.....	Strong south-west wind; rain much wanted for *kharif* sowings; health good.
		General Remarks.—Rain wanted for *kharif* operations.
Nepal—(June 22nd)		
Katmandu ...	2·16	Seasonable weather.

SUPPLEMENT TO

The Gazette of India.

№ 27.} CALCUTTA, SATURDAY, JULY 8, 1882.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

LEVY OF MUNICIPAL TAXES IN CANTONMENTS.

The following revised Order is published for general information:—

[NOTE.—To supersede the Order issued in the Home Department, Nos. 1-38—52, dated the 24th April 1880].

No. 163.

Extract from the Proceedings of the Government of India in the Home Department (Municipalities), under date Simla, the 18th November 1881.

Read—

Section 24 of Act III of 1880 (The Cantonments Act, 1880).

ORDER.

In exercise of the power conferred by section 24 of Act III of 1880 (The Cantonments Act, 1880), the Governor General in Council is pleased to declare that, in any cantonment situated in British India which may have been, or may in future be, brought under the operation of a Municipal Act, the following classes of persons shall, when on duty in such cantonment, be exempted from the operation of taxes of the following kinds:—

Persons exempted.

All persons exclusively in military employ or belonging to any department directly attached to the Army or to the Public Works Department, Military Branch, being persons subject to the Army Discipline and Regulation Act, 1879, or the Indian Articles of War.

Taxes from the operation of which exemption is granted.

(1) Municipal taxes on salaries.
(2) Municipal taxes on professions, trades, callings, offices, or appointments.
(3) Municipal taxes on horses, mules, or ponies kept for military duty.
(4) Municipal tolls leviable on any ferry or road in respect of animals or vehicles kept or used for military duty.

2. In further exercise of the power conferred by the same section, the Governor General in Council is pleased to prohibit the levy, in any cantonment in British India, of any municipal tax whatsoever on public property, such as animals or vehicles.

3. In this Order the expressions "municipal tax," "municipal taxes," and "municipal tolls" include any tax or toll imposed by virtue of the provisions of a Municipal Act under the operation of which any cantonment may have been, or may in future be, brought.

A. MACKENZIE,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4th JULY 1882.

GENERAL REMARKS.—The week under report has been characterised by more or less good rain throughout the whole country, the notable exceptions being Sind and parts of the Punjab.

In the Madras Presidency and Coorg, and parts of the Mysore State and of the Bombay Presidency rain, has been more abundant than in the preceding week. The Nizam's Territories and Berar and the greater part of Rajputana have also at last enjoyed good rain. In the Central Provinces, Central India, Bengal, Assam, and the North-Western Provinces and Oudh the monsoon continues to gather strength.

Prospects are generally good throughout the country. Standing crops and seedlings are doing well in most parts, and *kharif* operations are, as a rule, actively progressing throughout the country. The rainfall during the past week has been of much benefit. Rain is, however, still urgently needed in parts of the Punjab and Sind, and more would be beneficial in certain tracts, among which Agra, Orissa, parts of three districts of the Bombay Presidency, part of Mysore, and one district of Madras are the most noteworthy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(July 5th)		
Bellary ...	1·11 (average of six stations).	Standing wet crops good; harvest paddy, outturn below average; fever in parts.
Kurnool ...	1·08 (average of nine stations).	Season much improved by recent rain in six taluks, more rain wanted in two taluks; cattle-disease in parts.
Ganjam ...	1·31 (average of fifteen stations).	Standing wet and dry crops require rain; fever, small-pox, and cholera prevalent; cattle-disease exists.
Kistna ...	1·54 (average of thirteen stations).	Small-pox and slight cattle-disease prevalent.
Chingleput (Madras) ...	·84 (average of nine stations).	Water-supply running short; standing crops good where water available; agricultural operations progressing; harvest wet and dry grains, yield below average.
Coimbatore ...	·38 (average of seven stations).	Standing crops generally good, though slightly attacked by insects in parts; harvest *cholum*, outturn average; small-pox and fever in parts.
Tanjore ...	1·52 (average of nine stations).	Standing crops generally good; cattle-disease slight in parts.
Madura ...	·66 (average of six stations).	Standing crops fair; harvest *cholum*; fever and cholera in parts.
Malabar ...	2·20 (average of fourteen stations).	Sowing of first crops progressing; small-pox, fever, cholera, and cattle-disease in parts.
Travancore ...	1·38	Ploughing and sowing over; fever slightly prevalent. *General Remarks.*—General prospects good.
Bombay—(July 5th)		
Kurrachee ...	Passing showers of rain at Kurrachee on 3rd.	River at Kotri on 3rd, 15 feet 5 inches against 14½ feet on same date last year; fever in seven talukas; damage by turtles and crabs continues in Garho and Kutha tapas; rice transplanting still going on; wheat, red rice, and *bajri* in Kurrachee 24, 38 and 34, in Sehwan 28, 46 and 48, in Tatta 24, 46 and 40, and in Mirpur Botoro 20, 54 and 48 lbs. per rupee, respectively.
Hyderabad ...	.....	River falling somewhat; *kharif* operations continue; fever in two talukas; weather cooler; wheat 25, *juari* 44, *bajri* 40, red rice 32, and white rice 22 lbs. per rupee.
Ahmedabad ...	No rain	Ploughing and sowing progressing; cholera—in Ahmedabad city 38 cases, 21 deaths, in Dhakroli 8 cases, 8 deaths, in Viramgaum 114 cases, 74 deaths, and in Sanand 11 cases; wheat 26 and *bajri* 29 lbs. per rupee.
Baroda ...	1·31	Total rainfall 8·43; want of rain felt in Amreli and Kari Divisions; cholera continues in Kari Division; *bajri* 29 and common rice 23 lbs. per rupee.
Surat ...	2·98	Total rainfall 12·89; sowing mostly completed; *juari* 35 and *nagli* 50 lbs. per rupee.
Násik ...	Peint, 4·41; Igatpuri, 2·53; Malegaon, 2·04; Nandgaon, 1·72; few showers elsewhere.	More rain urgently wanted; early crops doing well; *bajri* sowing commencing; locusts in six northern talukas causing anxiety; health good; *bajri* 36, wheat 24, and rice 24 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	Rain every day, heavy on 1st, 2nd, and 3rd; rainfall of week, 7·90.	Total rainfall to date 34·97, being 10·29 above average; average abnormal temperature *nil* from 28th to 30th, afterwards 5° cool; vapour in air normal; abnormal wind northerly till 30th, then gradually changing to east, north-east on 3rd; wind normal on 4th.
Poona ...	Rain in two talukas—maximum 2·26; minimum ·45.	Sowing operations retarded for want of rain; locusts like insects in four talukas; *bajri* 41¾ and *juari* 56½ lbs. per rupee, in Poona *bajri* 36¾ and *juari* 43½ lbs. per rupee.
Ahmednagar ...	Rainfall—maximum at Sheogaon, 6·19; minimum at Sangamner, ·02.	Sowing of *kharif* in progress in Nagar, Parner, Shrigonda, Rahuli, and Kopergaon; rain much wanted in Sangamner, Akola, and in parts of Kopergaon; cattle-disease in Nagar, Karjat, and Parner; cholera in Parner—4 attacks, 1 death; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 42 in Kopergaon; *juari*—maximum 90 lbs. in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	·73	Total rainfall 14·06; 20 deaths from cholera; *kharif* sowing progressing; *bajri* 54 lbs. 38 tolas and *juari* 72 lbs. 23 tolas per rupee.
Dharwar ...	Rain in all talukas; maximum in Gadag, 1·75; minimum in Hubli, ·13.	Rain urgently wanted in Navalgund, Rannibennur, and Karajgbi, and more wanted also in Mandargi and Hangal; sowing of paddy completed, that of early *juari* and other *kharif* crops commenced; public health good; rice 22, and *juari* 56 lbs. per rupee.
Kanara ...	12·76; total 46·39; Kumpta, 3·03; Sirsi, 1·17; Hallyal, ·44.	Sowing operations continue above ghât; rice plants healthy, and transplanting on coast; slight small-pox in Sidapur and Sirsi; cattle-disease subsiding; common rice in Karwar 13 seers, in district average 13 seers per rupee.
Rajkot ...	1·14	Total rainfall 1·97; weather cloudy; cholera prevalent in some places; *bajri* 24 and *juari* 29 lbs. per rupee.
		General Remarks.—Sowing in general progress; rain partial; much required in a few places; locusts in Khandesh, Nasik, and Poona; slight fever and cattle-disease in a few districts; cholera in thana Satara, Belgaum, Ahmedabad, and parts of Kathiawar.
Bengal—(July 5th)—		
Chittagong ...	0·93	Weather hot, with occasional rain, more rain wanted; prices unchanged; cholera, small-pox, and cattle-disease continue.
Dacca ...	0·1	Rice, sugarcane, and jute growing fast; *aus* rice being reaped, estimated yield five annas.
24-Pergunnahs (Calcutta)	0·09	Sugarcane, jute, and early paddy doing well; high land being prepared for winter paddy; prices of common rice stationary; public health generally good; river rising.
Moorshedabad ...	3·30	Prospects of both autumn and winter rice favourable; late rain has done much good; public health generally good.
Rajshahye ...	2·72; Nator, 6·10	Prospects of paddy and jute good; prices unchanged; some cholera and fever still reported.
Burdwan ...	0·45	Prospects of crops favourable; cholera reported from thanas Ausgram and Sahibganj, otherwise public health good.
Rungpore ...	6·29	Weather seasonable; prospects of crops favourable; autumn rice being cut in several places; transplanting of winter rice going on; prices of food-grains stationary; general health good.
Bhagálpur ...	2·23	Prospects of crops good.
Purneah ...	1·23	Prospects of crops good; weeding progressing; health fair; Ganges fallen.
Patna ...	2·73	Prospects of crops good; sowing of autumn crops going on; cholera and small-pox still prevalent in the Behar sub-division.
Durbhunga ...	2·94	Prospects of all crops good; cholera disappearing slowly everywhere.
Hazaribágh ...	3·05	Weather sultry and cloudy; prospects of autumn crops good; general health good.
Cuttack ...	0·41	Autumn rice progressing well; rice being weeded; more rain wanted; cholera disappearing.
		General Remarks.—Rain fell in all districts during the week, though in some the fall was slight; cultivation of late rice progressing favourably, but wants more rain in some places; in some districts transplanting of late rice going on; early rice and jute doing well; in Behar sowing of autumn crops proceeding; sugarcane and indigo promising well; cholera said to be very prevalent in Birbhoom, but has abated in other districts; cases of small-pox still reported from a few districts: fever reported from some places in Central Bengal and from Gya and Chumparun; cattle-disease prevalent in Hooghly.
N. W. Provinces and Oudh—		
Benares (July 4th)	1·4; Chandauli, 1·9; Gangapur, 2·9.	*Kharif* sown, but on account of the want of rain in the early part of this and last week some loss is anticipated; markets well supplied; prices steady; health of man and cattle good.
Allahabad („ 5th)	Good rain	*Kharif* ploughing and sowing in progress; rising crops in good condition; prospects very good; prices slightly fallen.
Cawnpore („ 4th)	2·3 (average of whole district).	Weather cloudy and close; prospects of *kharif* excellent; sowings continue; prices almost stationary; general health good.
Gorakhpur („ „)	Rain all over the district, especially at the Sadr.	Rice coming up well; prices steady; cholera abated.
Jhánsi („ 3rd)	0·7; Man, 0·7; Moth, 0·8; Garotha, 0·1.	Sufficient rain throughout the district for present purposes; sowing of *jowar*, *kodo*, &c., progressing; prices of food-grains fluctuating; health good; no cattle-disease.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Agra (July 4th)	Rain in six parganas during the week, from 0·1 to 1·5.	More rain needed; slight fever in two parganas and small-pox in one; prices slowly falling.
Farukhabad („ „)	Light and partial showers.	*Kharif* sowings in progress; indigo and sugarcane promising well; prices steady.
Bareilly („ „)	Bareilly city, 3·0	Weather cloudy since rain of Sunday, with showers off and on; rain not equally distributed throughout the district, and in western parganas more is wanted; agricultural operations are going on with vigour; crops coming up well; more rain required for rice sowing in about three-fourths of the district.
Meerut („ „)	Rains commenced, occasional in every tahsil during the week; heavy rain to-day.	Ploughing and sowing begun generally; health good; supplies sufficient; prices stationary.
Kumaun („ „)	Light rain in early part of the week, much heavier towards the end.	Crops flourishing; slight measles amongst children; cattle-disease still in parts; prices stationary.
Lucknow („ „)	1·3; Maliabad, 0·3; Mohanlalganj, 0·4.	Sky cloudy, with east wind, every appearance of more rain; supplies abundant; prices falling; cholera decreasing in city.
Rae Bareli („ 3rd)	Dalamau, 0·9; Digbijaiganj, 0·7; and also in parts of tahsils Salon and Rae Bareli, but not at the tahsil head-quarters.	Heavy clouds daily; *kharif* sowings going on; prices stationary; cholera decreasing.
Partabgarh („ 4th)	Kunda, 2·6; slight showers at Sadr.	Wind easterly; sky cloudy; cholera decreasing.
Sitapur („ „)	Birwar, 5·6; 2·5 average at Sadr.	Wind easterly; prospects good.
Fyzabad („ „)	1·6	Sowing of rice going on; cholera prevalent in parts of district.
		General Remarks.—Good rain, sufficient for present purposes, throughout the provinces; prices rising slightly in Aligarh and Saharanpur, elsewhere stationary or falling; slight fever in Agra, and small-pox in Agra and Moradabad, otherwise health good; cholera decreasing; cattle-disease continues in Kumaun.
Punjab—(July 4th)		
Delhi ...	·80	Health good; prices of food-grains rising.
Hissar ...	Slight drizzlings of rain during the week.	Rain most urgently required; health good; prices rising.
Umballa ...	1·60	Ploughings for *kharif* sowings in progress; health good; prices rising.
Jullundur ...	2·50	Health good; prices rising.
Amritsar ...	No rain	Slight rise in prices of wheat and gram; health fair.
Sialkot ...	1·0; 2·0 in Zaffarwal tahsil.	Health good; prices falling.
Lahore ...	No rain	Health good; weather cloudy and windy; prices stationary.
Ferozepore ...	20 in the Zira tahsil	*Kharif* ploughings commenced; health good; prices stationary.
Mooltan ...	No rain	Crops and health good; prices rising.
Rawalpindi ...	·10	*Kharif* crops in progress; fever in Rawalpindi; measles in Pindigheb; prices rising.
Dera Ismail Khan ...	.....	No report received.
Peshawar ...	No rain	Weather extremely hot; health good; prices falling.
		General Remarks.—Rain has fallen in the Delhi, Umballa, Jullundur, Sialkot, Ferozepore, and Rawalpindi districts; slight drizzlings are reported from Hissar, where rain is most urgently required; health good, but fever is still reported in Rawalpindi and measles in Pindigheb; prices of food-grains generally are rising.
Central Provinces—		
Nagpur (July 5th)	Heavy showers	Weather close and cloudy; *kharif* prospects good; prices steady.
Jubbulpore ...	1·42	Weather cloudy and hot; sowings continue; cholera and small-pox prevalent; wheat 17 seers per rupee.
Saugor (July 3rd)	1·05	Sowing operations progressing favourably; prices steady; general health good.
Seoni ...	5·73	Rain daily since first; transplanting of rice in progress; cholera and small-pox prevalent; severe cattle-disease in one tahsil.
Khandwa ...	2·8	Weather close and cloudy; sowings continue; prices stationary; wheat 21 seers per rupee.
Hoshangabad ...	1·91	*Kharif* sowings continue; small-pox prevailing; wheat 14 seers per rupee.
Raipur (July 1st)	1·93	*Kharif* sowings nearly completed; cholera prevalent; prices unchanged; rice 40 seers per rupee.
Sambalpur (June 29th)	·37	Weather hot and bright; rice sowing in active progress; health good; rice 56 seers per rupee.
		General Remarks.—Weather cloudy and very close; rain general, heavy showers in Seoni district; *kharif* sowings progressing actively; cholera and small-pox still reported from several districts; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(July 1st)		
Akyab ...	4·93	Total rainfall 73·83; small-pox slightly prevalent in two townships, otherwise public health good; cattle-disease severe in one township; ploughing progressing.
Rangoon ...	3·02	Total rainfall 24·18; 1 death from cholera, otherwise public health good.
Bassein ...	3·46	Total rainfall 44·84; public health good; some cattle-disease in two townships; much sunshine by day and heavy showers at night; young plants in nurseries suffering from sun; ploughing progressing.
Prome ...	0·25	Total rainfall 11·83; 4 deaths from cholera in town and a few cases in district; ploughing backward in one township for want of rain.
Amherst ...	3·13	Total rainfall 72·78; public health good both in Moulmein and district; cattle-disease in three townships.
Toungoo ...	3·67	Total rainfall 27·12; no deaths from small-pox in town, but 23 in one village in the Karen hills, otherwise public health good.
		General Remarks.—Cholera prevalent in Thonkwa and part of Hanthawaddy, a few cases in two or three other districts; some small-pox in Akyab and Toungoo, otherwise public health good; cattle-disease continues in Akyab and Amherst, some also in Sandaway, Tharrawaddy, Bassein, Thonkwa, and Shwaygyeen; want of rain complained of in Prome, Tharrawaddy, and Thonkwa.
Assam—(July 5th)		
Gauhati ...	1·22	Weather seasonable; public health good in the station, also improving in the interior; *aus* rice crops doing well; cattle-disease reported from the interior.
Sylhet ...	3·27	Prospects of crops good; state of public health also good.
Cachar ...	3·83	Weather very hot; sowing of *dumahi* and *murali* crops finished in some parts of the district; ploughing for *sali* crop progresses; common rice 24¾ seers per rupee; 6 cases of cholera and 1 case of small-pox reported from Katigora.
Dibrugarh ...	·4	Rainfall better in Lakhimpur, Sadiya, and Jaipur hill, defective at Dibrugarh; ploughing much retarded in consequence; cattle-disease has been very severe all over the district and seems to be extending; Bengali cattle and buffaloes have escaped partially, in some villages there is not a buffalo left alive; public health good.
Mysore and Coorg—(July 5th)		
Bangalore ...	·80	Standing crops in good condition; sowing operations of dry crops in active progress, but more rain required for wet cultivation; prospects favourable; public health good; prices stationary.
Mysore ...	.....	Crops in good condition, but more rain wanted; prospects fair; health good; rice and *ragi* risen ½ seer per rupee.
Mercara ...	10·11	The monsoon has again set in; transplanting of coffee seedlings proceeding; rice is being sown; the *ragi* crop in Naurajapatna taluk is being weeded; the coffee crop on Sampaji ghât and the cardamum crops have suffered from previous heavy rain; prospects of season and public health good; slight fall in prices.
		General Remarks.—Rainfall from 5 to 79 cents reported in districts; agricultural operations recommenced; prospects of season generally favourable and public health good; fever and small-pox prevalent in parts; standing crops in good condition; prices—rice 11 to 16 and *ragi* 20 to 32 seers per rupee.
Berar & Hyderabad—(July 5th)		
Amráoti ...	1·48	*Kharif* sowings progressing; wheat 18 and *juari* 36 seers per rupee.
Akola ...	1·72	Sowing of *juari* commenced, that of cotton over.
Hyderabad ...	1·51	Total rainfall from 1st January 7 inches; *kharif* sowings recommenced; taluks have received small quantity of water; fever and cattle-disease prevail in two taluks; prices—wheat 14½, coarse rice 9¾, white *juari* 22½, yellow *juari* 25½, and *tur* 26½ seers per current sicca rupee.
Central India States—(July 5th)		
Indore ...	3·64; constant rain	Prospects of the *kharif* crops exceedingly favourable; health good.
Morar (Gwalior) ...	·47	Health good.
Sutna ...	2·73	Cholera at Rewah.
Rutlam ...	.....	No report received.
Neemuch ...	3·0	Health good; prices falling.
Goona ...	1·04	Health and prospects good; weather cloudy.
Bhopal ...	.....	Weather cloudy; health good.
Agar ...	2·07	Health and prospects good.
Nowgong ...	·26	*Kharif* sowings commenced; health good.
Manpur ...	2·25	Weather cloudy; sowing of *kharif* finished; health good; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (July 5th)	3·48	Weather cloudy and sultry.
Sirohi („ 2nd)	Slight rain	Tanks dry; wells fair; health good; weather cloudy and hot.
Marwar (June 30th)	.....	Water in tanks and wells plentiful; health good; lands have been ploughed and seeds sown where sufficient rain previously fell; weather abnormally hot, close, and cloudy, but no immediate prospects of rain; prices stationary with tendency to rise.
Meywar (July 1st)	0·41	Tanks, wells, and health good; prospects very good; rain fell in time to save young crops.
Harowti („ „)	Deoli, 2·58; rain general	Ploughing operations vigorously pushed on; weather cloudy; tanks and wells filling; few cases of cholera in Tonk, elsewhere health good; prices fallen.
Jhallawar (June 28th)	1·99	Sowings progressing; health good.
Ajmere (July 4th)	1·59	Few cases of cholera; atmosphere damp.
Jeypore („ „)	1·61	Sowings begun; prices steady; health good.
Bhurtpore ...	.....	No report received.
Ulwur (July 5th)	.....	*Kharif* sowings want rain; health good.
Nepal—(June 29th)		
Katmandu ...	1·03	Transplanting of rice is being rapidly carried on; weather seasonable.

Irrigation.

REVENUE REPORTS OF IRRIGATION WORKS IN THE NORTH-WESTERN PROVINCES AND OUDH FOR 1880-81.

Nos. 208-22 I., dated Simla, the 29th June 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Secretary to the Government of the North-Western Provinces and Oudh, No. 1150I., dated 6th May 1882, and enclosure, being the Revenue Report of Irrigation Works in the North-Western Provinces for 1880-81, and a Resolution of His Honor the Lieutenant-Governor reviewing the Report.

OBSERVATIONS.—The capital expenditure during the year under review amounted to Rs. 21,60,535, and the total outlay on Capital Account to Rs. 6,49,59,486 up to the end of 1880-81. Of this amount Rs. 5,93,89,821 have been expended on Productive Public Works, and Rs. 55,69,665 on works of irrigation and navigation chargeable to Provincial Funds.

2. The total amount of interest on capital cost of works of all kinds during the year amounted to Rs. 26,80,296, and the accumulated balance of interest charges remaining unpaid at the end of the year to Rs. 84,08,747. The unpaid balance was reduced by Rs. 3,52,297 during the year under review, the unpaid balance at the end of the year 1879-80 having been Rs. 87,61,044.

3. The actual receipts from all sources amounted to Rs. 49,38,705, the total receipts for the year 1879-80 having amounted to Rs. 53,58,105. The decrease in amount of revenue actually collected during 1880-81 is due to the collections on account of the very large "rabi" irrigation of 1878-79 (which are shown as receipts of 1879-80) having been much in excess of those on account of "rabi," 1879-80, which appear in the receipts of 1880-81.

4. A juster estimate of the results of the year's operations will, however, be obtained by a comparison of its assessed revenue with that of previous years, although the transfer of the two terminal divisions of the Upper to the Lower Ganges Canal, and the rapid extension of irrigation on the latter make fair comparison either of results obtained from the two great canals or of total results

very difficult. The assessments of 1880-81 are compared below with those of the two previous years:—

Year.	Direct revenue assessed.	Indirect share of land revenue.	Total.
	Rs.	Rs.	Rs.
1880-81	44,94,306	9,50,747	54,45,053
1879-80	37,26,528	9,65,955	46,92,483
1878-79	42,47,274	10,77,701	53,24,975

When it is remembered that 1878-79 was a year of drought in the North-Western Provinces, when the rains commenced late and ceased early in September, the effect on the revenue of the new channels and extensions is very apparent.

5. The working expenses, including indirect charges, amounted to—

Year.	Working Expenses.
	Rs.
1880-81	19,06,112
1879-80	18,39,611
1878-79	16,12,172

The increase in cost of maintenance during 1880-81 is partly due to increase of maintenance charges on the new canals and extensions, and partly to the heavy outlay on repairs necessitated by the extraordinary floods of September 1880. The increase would have been much greater, but for a large decrease in establishment charges amounting to Rs. 2,17,106, due to the large reductions in the Engineer establishment carried out at the close of the previous year.

6. The net assessed revenue, after deduction of all working expenses for each of the three years, amounted to—

Year.	Net revenue.	Percentage on capital outlay to end of year.
	Rs.	
1880-81	35,38,941	5·45
1879-80	28,52,872	4·54
1878-79	37,12,803	6·11

The Lower Ganges Canal has, however, not yet had time to come into full operation, and the influence of its capital and maintenance charges is very considerable in reducing the percentage of net returns on capital invested.

The percentage of net revenue of 1880-81 upon capital outlay to end of 1880-81 upon the more important canals amounted to—

Upper Ganges Canal	5·14 per cent.
Lower Ganges Canal	4·58 „
Eastern Jumna Canal	25·26 „
Agra Canal	3·15 „

7. The areas irrigated are compared below for 1880-81 and the two previous years:—

Canals.	1880-81.	1879-80.	1878-79.
	Acres.	Acres.	Acres.
Upper Ganges	664,927	596,259	806,368
Lower Ganges	583,471	*402,365	*419,555
Eastern Jumna	235,862	240,233	291,950
Agra	141,405	57,197	123,578
Other Works	107,031	104,351	95,200
TOTALS	1,732,696	1,400,405	1,736,651

* Irrigation of the Cawnpore and Etawah Terminal Division deducted from the Upper and added to the Lower Ganges Canal in these years to facilitate comparison.

The great increase of irrigation on the Agra Canal occurred principally in the "rabi" of 1880-81, a strong demand having been met by a good supply in the river. The increase on the Lower Ganges Canal is due not only to the new channels which began to work during the "rabi" of 1880-81, but to the good and steady supply of water furnished by the Narora head to the Cawnpore and Etawah Terminal Divisions of the Upper Canal, which have been transferred to the Lower one. The average proportion of kharif to rabi irrigation during the three years 1878-79 to 1880-81 was very nearly 2:3; but it is expected that, as the irrigation of indigo is developed on the Lower Ganges Canal, the proportion of kharif irrigation will be increased. 13⅓ per cent. of the irrigated area was double cropped during 1880-81, the proportion having been almost exactly the same during the previous year.

8. The irrigating duty done and water-rate earned by each cubic foot per second of water entering the canal head, were as follows:—

Canal.	1880-81.		1879-80.		1878-79.	
	Acres.	Rs.	Acres.	Rs.	Acres.	Rs.
Upper Ganges	173	436	189	460	239	579
Eastern Jumna	233	664	231	671	248	741
Agra	135	367	64	186	127	356

Uncertainty about correctness of the volumes shown as entering the head of the Upper Ganges Canal prevents much reliance being placed on the figures given for that canal.

A like uncertainty has led to the exclusion of the Lower Ganges Canal from the table, but no time should be lost in clearing up all doubts on the subject of the volumes discharged by these two most important canals.

The effect of the uncertain hot weather supply and the high water-rates in force on the Agra Canal is very apparent in the sudden drop in the value of a cubic foot of water in the year of good rainfall, 1879-80.

9. The maintenance charges per acre irrigated are given below for the four principal canals and the whole area irrigated:—

	Per acre irrigated. Maintenance charge, 1880-81.
Upper Ganges Canal	1·33
Lower Ganges Canal.	0·75
Eastern Jumna Canal	0·92
Agra Canal	1·55
Whole area irrigated	1·10

The close coincidence of the maintenance rate per acre irrigated with that obtained in the Punjab for the same year (Rs. 1·09) is remarkable. Extraordinarily heavy floods, however, entailed unusual outlay upon repairs of the Upper Ganges, Eastern Jumna, and Agra Canals.

10. The gross receipts under head of "Navigation" during 1880-81 were Rs. 27,832 against Rs. 27,978 in the previous year; but the net income was Rs. 16,048 against Rs. 4,262 of 1879-80, owing to reduction of expenditure. Some particulars are given below of the traffic during 1880-81 and the two previous years:—

	1880-81.	1879-80.	1878-79.
Average number of boats plying	270	259	259
Average load of each boat . . . mds.	431	440	437
Number of rafts	525	358	401
Total tonnage . . . tons	65,322	60,914	73,231
Total ton-mileage . . . „	7,899,401	7,531,624	10,687,507

The passenger traffic is quite insignificant, only 83 passengers having been registered during 1880-81.

The Government of India will be glad to hear of the completion of the connection between the Ganges Canal and the Sind, Punjab and Delhi Railway by the proposed siding at Muradnagar.

11. The cost of collecting the canal water-rates as given on page 13A of the Report, *viz.*, 3·30 per cent. of collections made in the districts watered by the Upper Ganges Canal, is very moderate. A similar return should either be furnished for all canals, or a general statement be given in the Chief Engineer's review, showing all charges in the Civil Department on account of canal collections. The statement in paragraph 6 of the Chief Engineer's review for 1880-81 gives only the amounts paid as fees to patwaris and lumbardars, omitting charges on account of establishment and contingencies.

12. The state of the uncollected balances is especially satisfactory in respect of the nominal balances outstanding on account of years previous to 1880-81.

13. The reports furnished on the effects of the various drainage works which have already been carried out are very interesting, and observations should be continued on the spring levels and areas affected by "reh" in the canal-irrigated tracts.

ORDER.—Ordered, that a copy of this Resolution and of the Report and Resolution by the Local Government be forwarded to the Secretary of State and to the Finance and Commerce and Revenue and Agricultural Departments of the Government of India for information.

The Governments of Madras, Bombay, Bengal, and the Punjab.
The Chief Commissioners, Central Provinces, British Burmah, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also, that a copy of this Resolution be forwarded to the Government of the North-Western Provinces and Oudh, Public Works Department, for information and guidance, and to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information, and to the Foreign Department for communication to the Government of Mysore.

Also, that this Resolution and the Resolution of the Local Government be published in the Supplement to the *Gazette of India*.

H. A. BROWNLOW, *Colonel R.E.*,
Deputy Secretary to the Govt. of India.

No. 883 I., dated Allahabad, the 6th April 1882.

RESOLUTION—By His Honor the Lieutenant-Governor, N.-W. Provinces and Oudh.

The area irrigated during the year was 1,732,695 acres, or only 4,000 acres less than that watered in 1878-79, when the demand for irrigation was abnormally high on account of the drought.

The value of the crops grown on the above area is estimated at nearly 561 lakhs of rupees, or an average of Rs. 33 per acre.

2. The net income was Rs. 35,38,941 or 5·45 per cent. on the total invested capital of Rs. 6,49,59,486, the interest charge on this amount being Rs. 26,80,296; there was thus a clear surplus of Rs. 8,58,645 after paying all expenses.

Considering that 237 lakhs of the above capital is sunk on the Lower Ganges Canal, a work which is still incomplete and as yet contributes inadequately to the revenue, the Lieutenant-Governor considers that the financial results of the year may be looked on as very satisfactory.

3. Sir George Couper also notes with satisfaction the improvement in the returns of the Agra Canal, and is glad to hear that the prospects of this work are better than they were considered to be in 1879.

4. Benefit has on the whole been derived from the drainage works undertaken during the last few years, especially in the Meerut and Aligarh Divisions. The effect produced in the lower districts by these artificial increments to the natural floods must be carefully watched, and His Honor desires that this point will receive most serious consideration.

J. G. FORBES, *Lieut.-Colonel, R.E.*,
Joint Secy. to Govt., N.-W. Provinces and Oudh, P. W. D., Irrigation Branch.

RESOLUTION.

1. The proposal to grant passports to pilgrims from India to the Hedjaz, which had previously occupied the serious attention of the Government of India in connection with the question of alleviating the hardships attending the journey, was revived by an enquiry from Her Majesty's Government in July 1875, whether the Government of India could suggest any means of mitigating the sufferings of the poorer class of Muhammadans who undertook the pilgrimage. Her Majesty's Consul at Jeddah was at that time in favour of introducing a system similar to that pursued by other Governments of granting upon certain conditions a passport to every pilgrim.

2. The Government of India took the subject into careful consideration, and after consulting the Local Governments decided that, with the strongest desire to relieve the discomforts and sufferings to which at present pilgrims to Mecca are subjected, it was unadvisable to impose upon their movements any restrictions which might be liable to misconstruction. A reply was accordingly sent to the Secretary of State on the 2nd July 1877, to the effect that, in concurrence with the views of the local authorities, the Governor General in Council was opposed to any direct interference on the part of Government with what is considered to be a religious obligation by a large section of the Muhammadan community in India, and accordingly deprecated the introduction of a system of passports or licenses, or any other similarly restrictive arrangements.

3. In consequence of this determination, no further action was then taken in the matter, and the question remained in abeyance until July 1880, when the Government of India received an intimation from the Secretary of State that the Turkish Government had issued orders requiring passports in future for all passengers and pilgrims arriving in Jeddah, whether Turkish or Foreign subjects, and announcing that those who came unprovided with such documents would be liable to be repelled from the ports of the Hedjaz.

4. It therefore became necessary, in order to prevent Indian pilgrims from encountering the risk of being turned back on their arrival in Turkish ports, that the Government of India should take measures to provide their Muhammadan subjects with passports, and it only remained to consider how best to give effect to the requirements of the Turkish Government without interfering more than was absolutely necessary with the freedom of movement and action previously enjoyed by Indian pilgrims. With this object a circular was sent to Local Governments and Administrations explaining the Regulation published by the Porte, and asking for opinion upon the following points:—

(i) the question of charging a small fee on passports in order to raise a fund to be devoted to giving assistance to needy and impoverished pilgrims;

(ii) the plan of issuing passports, not only at the ports of embarkation, but also in every district in British India, and in the Native States;

(iii) the necessity of appointing pilgrim agents at Indian seaports to facilitate the embarkation of pilgrims, and to afford them all possible information and aid.

5. The reports received in reply made it clear that, although a small minority, including some Muhammadan gentlemen of position and experience, were in favour of levying a fee upon each passport issued, the weight of opinion was opposed to such a measure, not only as being liable to misinterpretation, and calculated to give rise to erroneous impressions, but also on the ground that it would still further increase the already heavy expenditure which the pilgrimage entails. In deference to these views it has been decided that passports shall be distributed, in the form annexed to this Resolution, free of any charge; and also, for similar reasons, that no deposit or other guarantee of the ability of the grantee to discharge the cost of his journey in Arabia or of his return journey shall be exacted by this Government.

6. Further, with a view to making the new Turkish regulations as little irksome as possible to natives of India proceeding to the Hedjaz on pilgrimage, it has been resolved that passports shall be unconditionally given to every intending pilgrim not only at the ports of embarkation, but also at the central stations of every district in British India, and at the head-quarters of all Political Agencies in Native States. Thus it will be left to the option of the pilgrim to take his passport either in his own district or at the port from which he starts, as he may find most convenient.

7. With regard to the proposal to appoint pilgrim agents at the several ports of embarkation, it has been represented to the Government of India that, as a general rule, the local authorities empowered to carry out the provisions of the Native Passenger Ships Act (No. VIII of 1876) can satisfactorily discharge the duties that would devolve upon these officers. With this opinion the Governor General in Council concurs. But in consideration of the very large numbers of pilgrims who annually embark at, and return to, Bombay, and the necessity of making some special arrangements to meet their requirements, it is proposed to appoint a Protector of Pilgrims at that port. He will be a Muhammadan, and will work in subordination to the Commissioner of Police. His duties will be to issue passports to all applicants; to aid them in procuring the necessary equipment for the voyage; to bring to notice the existence of any epidemic disease among them; and generally to give them all the information and assistance within his power in respect of every matter connected with their pilgrimage. The Bombay Government will be requested to make proposals for the pay and establishment of this officer whose employment on this special work will only be necessary for a portion—about 6 months—of the year.

8. The last point which has engaged the attention of the Government of India in connection with this subject is the question of providing passports

and making arrangements for the subjects of other Governments, *e.g.*, natives of Kashgar, Russian Turkistan, Afghanistan, &c., who embark for Mecca from Indian ports, similar to those introduced for the benefit of British Indian subjects. The numbers of this class of pilgrims are not large, and it has been ascertained that in their passage through British territory they have uniformly comported themselves in quiet and orderly fashion. At the same time they have no right to represent themselves as British subjects, or to receive passports as such. Nevertheless, in accordance with the rules and principles which always guide the action of the Government in such matters, it has been determined to facilitate the embarkation of such foreigners at Indian ports, and possibly their debarkation at those in the Red Sea, by granting them informal passes in the form appended to this Resolution as form B. These passes will not be compulsory, and their issue will be subject to the payment of a small fee of Rs. 2. They will be granted on application at Bombay by the Protector of Pilgrims; at other ports by the Commissioner of Police. It should be clearly explained at the time of issue that they impose no responsibility upon the Government of India in regard to the holder, nor can that Government in any way guarantee their recognition by the officials of the Turkish or any other Foreign Government.

9. The forms of passport to be granted to Indian subjects, and of the informal pass for aliens, are marked respectively A and B, and are appended to this Resolution. The latter, which is translated into both Urdu and Arabic, needs no remarks. On the reverse of the former explanatory instructions are printed in the same languages for the guidance of the pilgrims and the information of all concerned. These instructions are simple and self-explanatory. In the column for "General Remarks" attention may be drawn to the social position of persons of rank receiving passports. This may prove useful to them in the Hedjaz.

10. In order to secure as far as possible that Indian pilgrims to the Hedjaz are properly treated after landing, and to assist them in making arrangements for their return passage, the Governor General in Council has, with the approval of the Secretary of State, decided to appoint a Muhammadan gentleman to act as Vice-Consul at Jeddah. It is anticipated that this officer will take up his duties before the commencement of the next pilgrim season.

ORDER.—Ordered, that a copy of the above Resolution be forwarded to all Local Governments, Administrations and to the several Departments of the Government of India for information and guidance. Also that it be published in the *Gazette of India* and in all local Gazettes for general information. Local Governments are requested to arrange for its early translation and publication in all Vernacular Gazettes.

2. Local Governments are also requested to apply without delay for as many copies of the passports and passes as they may require to the Officiating Secretary to the Government of India in charge of the Home Department at *Calcutta*.

PILGRIM'S PASSPORT.

GOVERNMENT OF INDIA.

Name (in English and Urdu).	Father's name.	Residence.	Occupation.	Age.	*Distinctive Marks.	General Remarks.

* To be filled up for male pilgrims only.

This Passport, issued by the authority of the Viceroy and Governor General of India in Council, Requests and Requires all those whom it may concern to afford the person above-named going on pilgrimage to the Hedjaz all needed assistance and protection.

By Order of the Governor General of India in Council,

Countersigned at _____

this ____ *day of* _____ *188* ___

(Sd.) _____

Magistrate or Commissioner of Police, or Political Agent.

Secretary to the Government of India, in the Home Department.

NOTICE TO PILGRIMS.

1. The British Government having been informed by the Turkish Government that the authorities in the Hedjaz will not allow pilgrims from British India to land without a Passport, this Passport is issued to enable pilgrims to comply with the orders of the Turkish Government.
2. This Passport is supplied on request made by or on behalf of the intending pilgrim, but no fee is charged for issuing the same.
3. The British Government does not undertake to bring back pauper pilgrims from the Hedjaz.
4. The British Government has no desire to interfere with the liberty of the pilgrims, but warns its subjects that they should not undertake the pilgrimage if they have not sufficient pecuniary means for the expenses of the journey to the Hedjaz and back to India.
5. On arrival at Jeddah the holder of this Passport should present it to the British Consul for registration.
6. This Passport having been granted solely for the convenience of the pilgrim, the holder thereof is entitled to apply to the British Consul at Jeddah for assistance in case of difficulty.
7. For the convenience of pilgrims not knowing English, this Passport is accompanied with a full translation of this notice in Urdu and Arabic.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th JULY 1882.

GENERAL REMARKS.—The rainfall of the week has been general throughout the country (excepting the Madras Presidency, from which no reports have been received). In Coorg the rainfall has been excessive; in the Mysore State extremely heavy in parts and sufficient everywhere; in the Bombay Presidency heavy in some places, good in others, and light in a few talukas of three districts; in the Nizam's Territories fair; in Berar good; in the Central Provinces good everywhere and heavy in two districts; in the Central India States good on the whole; in Rajputana good in parts and insufficient in one State; in the Punjab good in some districts, fair in others, and none in Peshawar; in the North-Western Provinces and Oudh heavy in Rohilkhand, good or fair in other districts, and light in the eastern tracts; in Bengal good nearly everywhere, though light in one or two places; in Assam good in all districts, though in one more is wanted; in British Burma good generally, but in some localities apparently still short.

General prospects are satisfactory on the whole. In Coorg the *ragi* crops are being weeded and paddy, where not flooded, is doing well; in the Mysore State standing crops are in good condition and sowings are in progress; in Berar and the Nizam's Territories the sowing of *kharif* crops is either progressing or completed; in the Bombay Presidency sowings have mostly been completed and in some places transplantation has commenced; in the Central Provinces the *kharif* sowings have been completed in parts and continue in others, and the transplanting of rice is progressing in the eastern districts; in the Central India and Rajputana States ploughing and sowing are progressing; in the Punjab *kharif* sowings continue in some districts, and have commenced in others; in the North-Western Provinces and Oudh the *kharif* crops have come up well in places and sowings are still in progress in others; in Bengal the sowing of the autumn crops is still going on in Behar, elsewhere the transplanting of winter rice on low lands is proceeding, and sugarcane, early rice, and jute are doing well; in Assam and British Burma ploughing and sowing are still in active progress.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—(July 13th)		
Kurrachee ...	.....	No report received.
Hyderabad ...	Rain in seven talukas, average ·89.	River again rising; wheat 25, *juari* 44, *bajri* 39, red rice 32, and white rice 22 lbs. per rupee; small-pox in Khandirao taluka.
Ahmedabad ...	14·03	Sowings progressing; cholera—in Ahmedabad city 16 cases, 7 deaths, in Sanand 4 cases, 2 deaths, in Viramgaum 8 cases, 5 deaths; wheat 27 and *bajri* 29 lbs. per rupee.
Baroda ...	5·00	Total rainfall 13·46; sowings in progress; transplantation of rice commenced in places; public health good; cholera abating in Kari division; *bajri* 30 and common rice 21 lbs. per rupee.
Surat ...	7·09	Total rainfall 19·98; sowings mostly completed; transplantation progressing; cholera—1 death in Chorasi; *juari* 39 and *nagli* 51 lbs. per rupee.
Násik ...	Igatpuri, 21·50; Peint, 5·63; Malegaon, 4·00; very slight in Niphad, Zeola, and Sumar; good showers elsewhere.	Rain much wanted in Niphad, Zeola, and Sumar; crops doing well; locusts continue; wheat 34, *bajri* 36, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	Rain every day, heavy on 8th; rainfall of week 8·02.	Total rainfall to date 42·99, being 14·38 above average; average abnormal temperature 3° cool from 5th to 8th, afterwards 1° cool; vapour in air normal; wind normal on 5th and 11th; abnormal wind from south-west from 6th to 10th.
Poona ...	Rain in seven talukas—maximum, in Poona, 2·43; minimum at Indapur, ·23.	Slight damage done to young crops by locusts in Khed taluka; *bajri* 42¾ and *juari* 55½ lbs. per rupee, in Poona *bajri* 36¾ and *juari* 43½ lbs. per rupee.
Ahmednagar ...	Sight rain, general	More rain wanted; cattle-disease in Nagar and Karjat; cholera—in Parner 9 cases, 4 deaths, in Shrigonda 23 cases, 8 deaths; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 42 in Kopergaon; *juari*—maximum 90 lbs. in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	1·75	Total rainfall 15·81; cholera—27 cases, 5 deaths; *kharif* sowings still in progress; *bajri* 56 lbs. 5 tolas and *juari* 74 lbs. 8 tolas per rupee.
Dharwar ...	Good rain everywhere, except Mundargi.	More rain wanted in Mundargi to enable sowings to be completed; break required in Dharwar, Bankapur, Hangal, and Kalghatgi; young crops thriving; slight ague in Dharwar and Mundargi, and cattle-disease in Bankapur and Hangal; rice 22 and *juari* 57 lbs. per rupee.
Kanara ...	Karwar, 11·54; Kumpta, 10·73; Sirsi, 15·45; Hallyal, 5·01.	Total rainfall 57·93; transplanting and weeding in rice-fields; sowings in *kumri* lands in progress; rice plants in low lands and swamps injured by excessive rainfall on coast; slight small-pox at Sirsi; cattle-disease subsiding; fever in two talukas; common rice in Karwar 13, in district average 13½ seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Rajkot ...	.....	No report received. *General Remarks.*—Sowing mostly completed; transplantation commenced in some places; rain general, heavy in some districts, but wanted in parts of Nasik, Ahmednagar, and Dharwar; locusts in Khandesh, Nasik, and Poona; cholera in Satara, Ahmednagar, Sholapur thana, Ahmedabad, and parts of Kathiawar.
Bengal—(July 12th)		
Chittagong ...	4·63	Weather hot, with occasional rain; transplanting of rice going on; prices steady; cholera, small-pox, and cattle-disease still prevail.
Dacca ...	2·21	All crops doing well, and rice being reaped in some parts, yield about 10 annas.
24-Pergunnahs (Calcutta)	4·04	Prospects appear fair; sugarcane, early rice, and jute doing well; transplanting of winter rice commenced; high lands being prepared; price of common rice stationary; public health generally good.
Moorshedabad ...	1·32	Prospects of crops favourable; sowing of winter rice finished; transplanting commenced in low lands; health generally good.
Rajshahye ...	0·66	Prospects of crops favourable; fever and cholera still reported.
Burdwan ...	4·08	Prospects of early crop good; rain wanted for late rice, especially in Katwa subdivision; health fair, but cases of cholera reported.
Rungpore ...	2·35	Weather hot and cloudy; early rice being harvested; transplanting of late rice still going on; sugarcane promising well; prices of food-grains stationary; public health good.
Bhagálpur ...	0·67	Prospects of crops favourable; sowings still going on in places; lands being prepared for the transplantation of rice; in some places transplanting has been commenced.
Purneah ...	0·29	Prospects of crops fair; weather suits weeding; health fair.
Patna ...	0·27	Prospects of crops good; autumn sowings going on; a few cases of cholera still reported from Barrh and Behar subdivisions.
Durbhunga ...	0·10	Strong east wind; transplanting of paddy commenced; more rain wanted; cholera abating.
Hazáribágh ...	2·22	Weather cloudy and rainy; autumn crops promising; a few cases of cholera and small-pox reported; general health good.
Cuttack ...	4·69	Autumn and winter rice crops being weeded; cholera still reported. *General Remarks.*—Rain fell in all districts during the week; prospects generally favourable, but more rain is wanted in some places for cultivation of winter rice, especially on high lands; transplanting of winter rice on low lands proceeding; sugarcane, early rice, and jute promising; in Behar sowing of autumn crops still going on; cholera has almost disappeared from many places, but is still prevalent in Birbhoom, Chittagong, and Sonthal Pergunnahs; fever is said to be increasing in parts of Nuddea, but is abating in Darjeeling Terai.
N. W. Provinces and Oudh—		
Benares (July 11th)	Benares, 1·0; Chandauli, 1·5; Gungapur, 2·1.	*Kharif* sowing is being carried on; not sufficient rain to plant rice; health of cattle good; health of men generally good; isolated cases of cholera reported from both tahsils; markets well supplied; prices steady.
Cawnpore („ „)	Average over 2·4	Crops thriving; weather cloudy; prices unchanged; with the exception of a few cases of cholera, general health good.
Allahabad („ 12th)	Ample rain, average 4·7.	Rising crops much benefited by rain; prospects very good; sickness much diminished; prices stationary.
Gorakhpur („ 11th)	Sadr, 1·7; Padrauna, 5·0	Great heat; sowing favourable; prices stationary.
Jhánsi („ 10th)	Garotha, 5·1; Mau, 1·1; average district, 3·5.	Weather cloudy and close; sowing and ploughing in progress; crops germinating well; prices stationary; health good.
Agra („ 11th)	In all parganas from 2·5 to 9·4.	Slight fever in one pargana only; general health good; prices stationary.
Farukhabad („ „)	1·8 to 4·3 in all tahsils.	Health of man and cattle good; sowings have come up well; prospects good.
Bareilly („ „)	16·0, of which 10·0 fell on night of 6th.	Heavy floods, but damage not excessive; rice prospects now good; health good.
Meerut („ „)	General rain throughout the district.	Rain sufficient for ploughing and sowing, which are in progress everywhere; health of man and cattle good; crops thriving; supplies sufficient; prices of wheat risen in Meerut and Ghaziabad, other prices stationary.
Kumaun („ „)	Continuous rain during the week.	*Kharif* promising; a few cases of small-pox; cattle-disease decreasing; prices stationary.
Lucknow („ „)	Lucknow, 2·0; Mohanlalganj, 1·6; Malihabad, 0·9.	*Kharif* crops being sown; prices stationary; cholera in city decreasing.
Rae Bareli („ 10th)	Sadr, 4·8; Dalamau, 0·5; Salon, 0·5; Digbijaiganj, 1·2.	*Kharif* sowings continue; health of people and cattle good; cholera decreasing; prices almost stationary.
Partabgarh („ 11th)	General rain throughout the district.	Crops coming on nicely; prospects good; general health good; cholera has decreased considerably.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Sitapur (July 11th)	Sitapur, 2·1; Sidauli, 2·9; Biswar, 0·6; Misrik, 0·3.	Wind easterly; prices slightly rising.
Fyzabad („ „)	1·9.	Sowing of *kharif* crops nearly finished; cholera at Fyzabad and Ganda only. *General Remarks.*—Rainfall general throughout the Provinces, heaviest in Rohilkhand, but lighter in eastern half; floods in Bareilly; prospects generally good; prices steady; general health fairly good; cholera decreasing; cattle-disease decreasing in Kumaun.
Punjab—(July 11th)		
Delhi ...	8·0	Health good; slight rise in price of barley.
Hissar ...	Rainfall good	Health good; prices falling; prospects bright.
Umballa ...	3·0	Health good; prices stationary.
Jullundur ...	1·70	Health good; prices rising.
Amritsar ...	3·60	Health fair; prices stationary.
Sialkot ...	2·0	Health good; prices steady.
Lahore ...	.....	No report received.
Ferozepore ...	2·20	*Kharif* ploughing and sowing commenced; slight rise in price of gram.
Mooltan ...	Drizzling rain at Sidar	Health and crops good; prices stationary.
Rawalpindi ...	·80	*Kharif* crops in progress; fever in Rawalpindi and measles in Pindigheb; slight fall in price of gram and barley, increase in price of Indian-corn.
Dera Ismail Khan ...	Nearly ·60	Health and prospects good; prices fluctuating.
Peshawar ...	.....	Health fair; *kharif* sowings commenced; prices stationary. *General Remarks.*—Rain has been general, except in Peshawar; health is good, but fever continues in Rawalpindi, and measles have not yet left Pindigheb; there is no marked increase or decrease in price of food-grains.
Central Provinces—		
Nagpur ...	11·43; rainy and damp	Prospects good.
Jubbulpore (July 11th)	9·15	Weather cloudy and rainy; sowing operations progressing favourably; cholera and small-pox prevailing.
Saugor („ 10th)	2·25	Season favourable to all sowings; prices steady; general health good.
Seoni („ 11th)	5·85; heavy rains	Rice transplanting progressing; cholera abating; mortality among cattle still continues; wheat 18 and rice 15 seers per rupee.
Khandwa ...	2·36; rainy	*Kharif* sowings progressing; small-pox prevalent; wheat 14 seers per rupee.
Hoshangabad (July 11th)	Heavy rain on 10th and 11th.	Weather cloudy; small-pox prevalent; wheat 15 seers per rupee.
Raipur („ 8th)	3·17; light showers till Thursday night, when there was heavy rain.	*Kharif* sowings almost completed; rice 34 seers per rupee.
Sambalpur ...	.....	No report received. *General Remarks.*—Weather cloudy and damp; rain has fallen in all districts, especially heavy at Nagpur and Jubbulpore; *kharif* sowings continue, and are completed in some parts; cholera and small-pox still reported; prices generally steady.
British Burma—(July 8th)		
Akyab ...	10·97	Total rainfall up to date 84·80 inches; 2 deaths from small-pox in town, 3 from cholera in district, otherwise public health good; cattle-disease severe in two townships; ploughing progressing.
Rangoon ...	4·11	Total rainfall 28·29 inches; public health good.
Bassein ...	2·24	Total rainfall 47·08 inches; cholera in district, otherwise public health good; cattle-disease in district.
Prome ...	3·65	Total rainfall 15·48 inches; 4 deaths from cholera in town and some cases in the district; slight cattle-disease in one township.
Amherst (Moulmein) ...	4·14	Total rainfall 76·92 inches; public health good both in Moulmein and district; cattle-disease prevalent in three townships; sowing half finished, delayed through late short fall of rain.
Toungoo ...	2·50	Total rainfall 29·92 inches; 1 death and 2 cases of small-pox in town, otherwise public health good. *General Remarks.*—Some cholera in Prome, Henzada, and Bassein, and a few cases elsewhere, otherwise public health satisfactory; cattle-disease in Arakan and Pegu divisions, and in Bassein, Amherst, and Shwaygyeen districts; rainfall short in some places; sowings going on.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—(July 12th)		
Gauhati ...	1·61	Days hot, more rain wanted; lands prepared for *sali* crops; public health good.
Sylhet ...	4·84	Prospects of crops favourable; splendid weather for tea; a few cases of cattle-disease, cholera, and small-pox reported.
Cachar ...	3·08	Weather very warm and sultry; sowing of *dumahi* and *murali* crops finished; ploughing for *sali* crops continues; common rice 21 5/16 seers per rupee; tea doing well; no more cholera cases reported.
Dibrugarh ...	5·97	Weather hot; ploughing for *sali dhan* in progress; few cases of cholera reported from Harmoti tea garden; cattle-disease still reported.
Mysore and Coorg—		
Bangalore ...	·85	Standing crops in good condition; prospects favourable.
Mysore ...	3·0	Crops in good condition.
Mercara ...	39·50	Excessive rain during week, as much as 12·50 gauged on the 7th and 10·33 the day before; heavy landslips on ghât roads, cart traffic with Mangalore suspended; water in Cauvery river at Fraserpett rose to 30 feet, and passed through the spandrils of bridge, telegraph line washed away; paddy where not flooded doing well; *ragi* crops being weeded; prices stationary; public health good.
		General Remarks.—Rain has fallen generally throughout the Mysore State; heavy floods in the Cauvery, Hemavaji, and Zegachi rivers; the Tongabadra in the Shimoga district has overflowed its banks in many places; standing crops everywhere in good condition; agricultural operations in active progress; *ragi, Kartik* paddy, *balar*, &c., being sown; prospects favourable; prices—*ragi* 25½ seers per rupee in Bangalore, 20 seers in Mysore, 23 to 36 in Shimoga, 32 to 44 in Chitaldrug; public health good.
Berar & Hyderabad—(July 12th)		
Amráoti ...	3·28	Sowing of all *kharif* crops, except *juari*, completed; wheat 18 and *juari* 36 seers per rupee.
Akola ...	3·27	*Juari* sowings continue; *kharif* prospects good.
Hyderabad ...	1·50	*Kharif* sowings progressing; tanks have received small quantity of water; fever and cattle-disease prevail in some places; prices—wheat 15, common rice 10, white *juari* 23¾, yellow *juari* 27, and *tur* 25 seers per current sicca rupee.
Central India States—(July 12th)		
Indore ...	2·39; rain constant, though light.	Prospects good.
Morar (Gwalior) ...	4·07	Health and prospects good; prices stationary.
Sutna ...	1·94	Weather cool; health good.
Rutlam ...	.....	No report received.
Neemuch ...	1·43	Health good; *kharif* being sown.
Goona ...	3·26	Prospects good.
Bhopal ...	.....	No report received.
Agar ...	2·57	Health and prospects good.
Nowgong ...	2·21	Sowings almost completed; health good.
Manpur ...	6·0	
Rajputana—		
Abu (July 12th)	10·94; overcast, with rain.	
Sirohi (July 9th)	2·0	Tanks, wells, and health good.
Marwar („ 7th)	0·49	Plenty water in tanks and wells; health good; ploughing partial; weather monsoonish, but no general copious fall yet; prospects of rain imminent; prices stationary, with tendency to fall.
Meywar ...	.....	No report received.
Harowti (July 8th)	Deoli, 2·12; Tonk, 1·54; Shahpura, 0·82.	Cholera at Shahpura, but abating at Tonk.
Jhallawar („ 5th)	2·20	*Kharif* sowings progressing; health good.
Ajmere („ 7th)	4·86	Ploughing and sowing proceeding satisfactorily; health fairly good.
Jeypore („ 11th)	0·9	Prices slightly fallen; health good.
Bhurtpore ...	.....	No report received.
Ulwur (July 12th)	0·39	Wells filling; *kharif* sowings continue; health good.
Nepal—(July 6th)		
Katmandu ...	2·76	Total rainfall from January 1st to June 30th, 17·99; transplanting of rice is being rapidly carried on; weather seasonable.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 12th July, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding.*
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. W. Hunter, LL.D., C.I.E.

BIKRÁMA SINGH'S ESTATES BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to confirm and give effect to an award made by His Excellency the Viceroy and Governor General regarding certain matters in dispute between Sardár Bikráma Singh and the Kapúrthhala State. He said:—"This is a measure which in England would be classed as a private Bill. Its object is simply to confirm and give effect to an award made for the purpose of settling certain family disputes that arose in this way. An estate in Oudh was conferred by Government on Sardár Bikráma Singh in recognition of his services during the mutiny. The Sardár allowed the settlement of this estate to be made in the name of his brother, the then Rájá of Kapúrthhala. He was afterwards dispossessed by the Rájá, and the Civil Courts held that he could not recover possession. Subsequently, Rájá Kurruck Singh of Kapúrthhala consented to reopen the case, and by agreement the question was referred to Sir Henry Davies, the Chief Commissioner of Oudh, for his decision as arbitrator. He delivered an award on the 6th of January, 1871. This award provided that the Rájá should pay five lákhs of rupees to certain persons on trust to purchase land within the province of Oudh and deliver it to the Sardár. It then went on to settle the land in a certain manner, giving a reversion, or remainder, in certain events, to the Rájá of Kapúrthhala; but serious difficulties having arisen as to its meaning and effect in this respect, the Kapúrthhala State and the Sardár consented that the matter should be considered and decided by His Excellency the Viceroy. His Excellency accordingly considered the case, and, on the 3rd of March, 1881, gave an award finally determining the rights of the Sardár, his heirs and the Rájá in the land purchased, or to be purchased, by the trustees appointed under Sir Henry Davies' award. It was anticipated by His Excellency at the time he made this award that legislation would be needed to give effect to it; and this has turned out to be the case. The present Bill has accordingly been prepared to confirm the award, and make such supplementary provisions in matters of detail as may appear necessary in order to give due effect to it."

The Motion was put and agreed to.

BRITISH BURMA STEAM-BOILERS BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to provide for the inspection of Steam-boilers and Prime-movers attached thereto in British Burma.

The Council adjourned to Wednesday, the 2nd August, 1882.

D. FITZPATRICK,

Secretary to the Government of India,

Legislative Department.

CIVIL WORKS.

Irrigation.

REVIEW OF THE ADMINISTRATION REPORT OF IRRIGATION WORKS IN MADRAS FOR 1880-81.

No. 228-35 I., dated Simla, the 1st July 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Administration Report of Irrigation Works in Madras for 1880-81.

OBSERVATIONS.—It is stated in the report that, owing to the want of agreement between the financial and revenue years, the figures representing income and areas irrigated during 1880-81 can only be given approximately in some cases, while in others even approximate information on these points is not available. Final figures are therefore given by districts in a tabular statement for 1879-80 only, and in the body of the report the expenditure is given for 1880-81, while the income and irrigated areas are given for 1878-79 and 1879-80. Under these circumstances the report cannot be considered a review of the operations of the Irrigation Department during 1880-81, and must rather be regarded as a general statement of the latest financial particulars of the works available at the time the report was written.

In acknowledging the Administration Report of 1878-79, it was pointed out by the Government of India that no useful comparison of results is possible when the charges are shown for one year and the revenue for another; and the Government of Madras was requested to ensure the exhibition in future of outlay and income for the same year, as is done in the Revenue Reports submitted by all other Local Governments. Even admitting the want of agreement between the revenue and financial years, the Government of India is unable to understand why the outlay of the financial year should not be compared with the income of the revenue year corresponding most nearly with it, instead of the income of a previous financial year with which the outlay has no connection whatever; and it is hoped that this may be done in future.

The Supreme Government is unaware of any valid reasons against the completion of the revenue returns required for the purposes of this report within four months of the close of the revenue year, so that the review of outlay during any financial year, and of the income during the nearest corresponding revenue year, ought to be with the Government of India within eight months of the close of the former. The present report was received twelve months after the close of the year to which it nominally refers, and two years after the expiry of that for which final figures are given.

2. The Productive Public Works of irrigation and navigation in the Madras Presidency contain the following systems:—

(1) Godavari Delta system.
(2) Kistna Delta system.
(3) Pennar anicut Delta system.
(4) Kavari Delta system.
(5) Srivaikuntham anicut.

Capital and Revenue Accounts are also kept for the three following systems of irrigation, although they are not classed as Productive Public Works:—

(1) Chambrambakam tank.
(2) Palar anicut system.
(3) Palandori anicut system.

All irrigation works which are under the charge of the Irrigation Department and yield direct revenue, except those last enumerated, are classed as irrigation and navigation works, for which neither Capital nor Revenue Accounts are kept. Up to the end of 1880-81, 61 works had been placed in this class. The remaining works of irrigation are divided into two classes—"Imperial" and "Minor,"—the former class being maintained by the Public Works Department, and the latter by the villagers under the control of the Revenue Department.

3. The latter class may be taken generally as including all tanks irrigating less than 200 acres, excepting such as, from their circumstances or position, may affect the safety of towns or important public works, and require therefore to be retained under professional care and supervision. Where it may be found necessary to maintain any minor tank in better order than has hitherto been the custom, it is proposed either to make a suitable grant-in-aid, or to allow a moderate remission of assessment as compensation for extra work done.

Intelligent upper subordinates, or men of that class, are to be appointed as Tank Inspectors, in order to give the Collectors the assistance necessary for the proper supervision of these works.

4. The direct capital expenditure incurred upon Productive and other works of irrigation and navigation up to the close of 1879-80 amounted to Rs. 1,99,35,764 as detailed in margin.

	Rs.
Productive Public Works . .	1,76,39,862
Irrigation and navigation works for which Capital and Revenue Accounts are kept . . .	22,95,902
TOTAL .	1,99,35,764

The indirect capital outlay to the end of the same year is not known.

The maintenance charges of 1879-80 amounted to Rs. 9,47,893, exclusive of charges in the Civil Department for collection of land revenue due to irrigation works, which are not known, and the gross revenue to Rs. 2,13,28,862 assessed on an irrigated area of 5,489,297 acres.

5. During 1880-81 the rainfall of the south-west monsoon was generally much below, and in some cases remarkably less than, that of the preceding year; indeed, in some districts the normal relation between the south-west and north-east monsoons was completely reversed. The area irrigated in the Godavari and Kistna Deltas fell somewhat below the high figures which had been reached in previous years, owing partly to a fall in the price of rice, and partly to plentiful and seasonable rain, which enabled the cultivators in many cases to dispense with artificial irrigation. In the southern districts a cyclone, which occurred on the 21st of November 1880, caused very heavy floods and a great amount of injury to works.

The area irrigated during 1880-81 by the eight systems specified in paragraph 2 is stated in the report to have amounted to 1,783,345 acres; but the details are not given. The revenue assessed on this irrigated area is stated at Rs. 78,94,094, giving an average rate of Rs. 4·46 per acre.

6. The Delta of the Godavari is irrigated by a system of navigable canals, aggregating at present 458 miles in length. When completed the total length of canal channel will be about 503 miles. The canals are supplied by a weir, constructed across the river at a point 33 miles from the sea, the length of the weir crest being 3,938 yards, and its height 38 feet above mean sea level. The total estimated capital cost of the system is about 111 lakhs of rupees for direct charges only, the direct capital outlay to end of 1880-81 having been Rs. 89,20,776. The estimated area of ultimate irrigation is about 607,000 acres, and the area actually irrigated during 1880-81 was 526,585 acres.

The average revenue dependent upon the weir is stated as being somewhat in excess of 25 lakhs of rupees; and the maintenance charges of 1880-81 amounted to Rs. 4,45,447, including indirect charges for collection in Civil Department. The maintenance charges of 1879-80 amounted to Rs. 5,32,501.

The above figures do not, however, agree with those submitted in the report which accompanied the final revised estimate of the Godavari canals. There the position of the works at the end of 1880-81 is stated as follows:—

	Rs.
Direct receipts	16,96,919
Indirect receipts	1,63,393
TOTAL .	18,60,312
Direct maintenance charges	4,24,878
NET EARNINGS .	14,35,434

	Rs.
* Direct charges . . .	88,90,371
Indirect „ . . .	17,57,342
TOTAL .	1,06,47,713

Accepting these figures as correct, the net revenue yielded a return of 13·3 per cent. on the capital outlay to the end of the year, which is given in the same report as amounting to Rs. 1,06,47,713.*

The license fees for boats are—

	Rs.
For cargo boats, per ton	2
1st class passenger boats, per ton	4
2nd class passenger boats, per ton	2

The above fees free the boats on all canals in the Delta during the whole of the calendar year. Unlicensed boats pay 4 annas a ton for a single trip.

The navigation receipts and charges of 1880 are compared below with the average receipts and charges of the four previous years:—

	Receipts.	Charges.	Excess charges.
	Rs.	Rs.	Rs.
Average of years 1876 to 1879, inclusive .	50,357	65,972	15,615
1880	51,315	76,301	24,986

The charges were abnormally high during the year, owing to silt clearances and renewals of lock-gates.

Some further particulars connected with the navigation are given below:—

	1879.	1880.
Total number of boats plying	1,254	1,189
Registered tonnage of cargo boats . . .	22,037	18,225
Rafts passed through head locks . . .	4,070	4,340
Mileage of canal open for navigation . . .	458	458
Ton mileage	10,779,647	8,663,277
Estimated value of cargoes . . .	Rs. 3,76,64,673	2,88,84,509

The freshes in the Godavari commenced early in June, and the water rose over the weir crest on the 28th June. The maximum flood of the year rose to a height of 7 feet over the crest of the weir on 19th September 1880, the maximum rise of 1879 having been 12 feet on 27th August, and the highest yet recorded 15·25 feet in 1861.

7. The Kistna Delta system of canals is not in such an advanced state of completion as that of the Godavari, only 277 miles of canal having been finished out of an intended total of 348 miles. The canals are supplied by

a weir thrown across the river Kistna at a point where the channel is confined by low rocky hills on either banks. The length of weir crest is therefore only 1,280 yards, its height above mean tide level being 45 feet, and its distance from the sea along the river 60 miles. The total estimated capital cost of the completed canals is Rs. 139 lakhs for direct charges only, the direct capital outlay to end of 1880-81 having been Rs. 55,59,084, including Rs. 2,98,541 expended on the Commamur canal. The area of irrigation ultimately attainable is estimated at 470,000 acres, the area now irrigated being 274,573 acres. The ultimate revenue is estimated at about 14 lakhs of rupees, the revenue now dependent upon the canals being rather more than 9 lakhs of rupees. The maintenance charges amounted during 1880-81 to Rs. 3,94,573, inclusive of Rs. 61,200 charged for collection in the Civil Department.

The net returns, therefore, yielded about 10 per cent. upon the direct capital outlay to the end of 1880-81.

The license fees for boats differ from those in force on the Godavari only in charging Re. 1 instead of Rs. 2 per ton on cargo boats.

The navigation receipts and charges of 1880 are compared below with the average receipts and charges of four preceding years :—

	Receipts.	Charges.	Excess charges.
	Rs.	Rs.	Rs.
Average of years 1876 to 1879, inclusive	18,266	30,079	11,853
1880	23,834	41,787	17,953

Further particulars of the navigation are given below, as for the Godavari :—

	1879.	1880.
Total number of boats plying	719	834
Registered tonnage of cargo boats	12,842	13,142
Rafts passed through head locks	1,245	1,062
Mileage of canal open for navigation	257	257
Ton mileage	1,854,678	3,230,187
Estimated value of cargoes	Rs. 66,31,909	64,63,571

The supply of water in the river during 1880-81 was rather uncertain, and during September 1880 the raising of the weir crest by a dry stone wall was commenced, but the water rose again shortly afterwards, and a number of small freshes kept up the supply. The highest flood of the year rose to 9·41 feet on the weir crest, the highest recorded having risen to 19·46 feet above weir crest in 1874. There was heavy rain in the Delta during November, which swamped some low-lying lands owing to the insufficient capacity of the drainage channels.

8. The Pennar Delta works were originally designed to supply irrigation to 64,000 acres of land, but the greatest area yet irrigated was 58,159 acres in 1870-71, and the average may be taken as 55,000 acres with a consolidated assessment of about 2 lakhs of rupees, of which nearly one-half is stated to be increase due to the works.

There is apparently no capital account for these works owing to want of completion estimates. During 1878-79 56,446 acres were irrigated, the increase of land revenue due to the works amounted to Rs. 1,43,768, and the charges on Revenue Account to Rs. 47,717. During 1880-81 the charges on Revenue Account amounted to Rs. 31,558; the area of irrigation is not given, but the crops are stated to have suffered from too much rain.

9. The Kavari Delta works have been constructed in order to regulate the distribution of the flood waters of the Kavari river over the districts of Tanjore and Trichinopoly. They consist of a weir and regulating dam, constructed at the head of the island of Seringham, about 10 miles west of Trichinopoly, across the Coleroon and Kavari rivers, the two branches into which the Agunda Kavari is divided by the island; also of certain escapes from the Kavari back to the Coléroon, of which the principal is the "Grand Anicut," or waste weir, at the lower end of the Seringham island, and of regulators across the Vennar and other spill channels, which branch off from the Kavari to the south and south-east.

The direct capital expenditure to the end of 1880-81 amounted to Rs. 10,17,174, and a further estimate, amounting to Rs. 6,88,000 for direct

charges only, has lately been provisionally sanctioned by the Government of India for the completion of the regulating works on the Kavari in the Tanjore district. The latest information regarding these works is given below :—

Year.	Acres irrigated.	Land revenue due to works.	Revenue charges.
		Rs.	Rs.
1878-79	805,033	8,47,722	1,00,352
1879-80	814,366	9,04,202	75,391

The average net Revenue of 1878-79 and 1879-80 therefore amounted to very nearly 77½ per cent. upon the direct capital outlay to end of 1880-81.

During the cyclone of November 1880 the rivers rose to a very unusual height, and flooded large areas of the country, injuring especially the crops irrigated from the Vennar and its branches.

10. The Srivaikuntham weir is thrown across the Tambrapurni river in the Tinnevelly district, about 16 miles from the sea. The works dependent on it provide not only for direct irrigation of the adjoining land, but for the supply of existing tanks in which the water is stored for use during the intervals between the freshes.

Estimates for the completion of the project have not yet been received by the Government of India, but the amounts sanctioned up to date aggregate Rs. 11,53,027 for direct expenditure only, and the direct capital outlay to end of 1880-81 amounted to Rs. 12,23,392.

The latest particulars available for these works are as follows :—

Year.	Acres irrigated.	Land revenue due to works.	Revenue charges.
		Rs.	Rs.
1878-79	19,324	33,723	68,105
1879-80	19,971	46,676	32,539

The revenue of 1878-79 was, therefore, Rs. 34,382 less than the revenue charges, and the net revenue of 1879-80 yielded a little more than 1 per cent. on the direct capital outlay to end of 1880-81. The completed works were originally expected to irrigate 32,000 acres. During 1880-81 the south-west monsoon failed in the Tinnevelly district, and the supply in the Tambrapurni fell short of the demand for water. For more than six weeks the water level at the weir never rose above one foot on the sill of the head sluices; but in November it rose to 10·42 feet above weir crest—a height only 1 33 feet lower than that of the flood of December 1877, the highest on record.

11. The Chambrambakam tank is a large reservoir, about 14 miles from Madras, which has been formed by enlarging an old Native tank. It covers 5,729 acres, or 8·95 square miles of ground, and contains 2,779 millions of cubic feet of water. The direct capital outlay to the end of 1880-81 amounted to Rs. 6,13,013, and a further expenditure of about Rs. 25,000 will be required to complete the works. The revenue charges of the year were Rs. 8,069, inclusive of Rs. 4,032 charged for collection of revenue in the Civil Department. No recent particulars of the area irrigated by, and increase of land revenue due to the tank, are apparently available; but it is estimated that it irrigates about 15,660 acres, yielding a return of Rs. 67,942.

If the estimate prove to be correct, the net returns will be about 9 per cent. on the total direct capital outlay.

12. The Palar anicut is thrown across the river of that name near the town of Arcot in the North Arcot District. It is 2,600 feet long, and supplies channels, which water about 37,000 to 38,000 acres of land.

The direct capital outlay to end of 1880-81 amounted to Rs. 16,57,191, and a further outlay of Rs. 20,000 to Rs. 25,000 will be required to complete the works. The revenue charges of 1880-81 amounted to Rs. 56,786, including Rs. 16,200 charged for collection of revenue in the Civil Department.

The latest particulars of irrigated area and revenue due to the works are given below:—

Year.	Acres irrigated.	Land revenue due to works.	Revenue charges.
		Rs.	Rs.
1878-79	34,032	1,01,643	8,612
1879-80	37,754	1,02,258	36,476

The average net revenue of 1878-79 and 1879-80, therefore, yielded about $4\frac{3}{4}$ per cent. on the direct capital outlay to the end of 1880-81; and if Rs.1,02,000 may be assumed as representing with fair accuracy the gross annual revenue due to the works, the net revenue of 1880-81 yielded very nearly $2\frac{3}{4}$ per cent. on the direct capital outlay to the end of the year.

During 1880-81 the tanks dependent on the Palar anicut received a good supply of water.

13. The Pelandorai anicut is constructed across the Vellar river, and supplies water for the irrigation of about 50 villages in South Arcot.

The direct capital outlay to end of 1880-81 amounted to Rs. 2,90,262, and a further expenditure of about Rs. 32,000 will be required to complete the works. The revenue charges of the year amounted to Rs. 12,464.

The revenue and irrigated areas of 1878-79 and 1879-80 are given below:—

Year.	Acres irrigated.	Increase of land revenue due to works.	Revenue charges.
		Rs.	Rs
1878-79	2,430	2,657	32,454
1879-80	3,460	6,245	17,041

This does not seem to be a very prosperous undertaking. The flood in the Vellar of the 22nd November 1880 was the highest on record, and did much damage to the anicut head works and dependent channels and tanks.

14. The direct outlay during 1880-81 upon irrigation works, for which neither Capital nor Revenue Accounts are kept, amounted to Rs. 5,63,461 against a grant of Rs. 11,24,059.

Rs. 64,005 were also spent during the year on works, not exceeding Rs. 2,500 each in value, apparently for the improvement of tanks, classed as "Imperial," and Rs 4,76,079 were expended on repairs of these tanks against a grant of Rs. 5,13,287.

On repairs of the tanks classed as "Minor," and placed under charge of the Revenue Department, Rs. 87,078 were expended during 1880-81, against a grant of Rs. 1,46,500.

It is explained that the short outlay on "Imperial" works was chiefly due to the inefficient state of the Public Works establishment, resulting from insufficient strength and frequent transfers; that on "Minor" works to incomplete organisation of the arrangements for carrying out the work.

The provision of waste weirs for these works appears to be still very inadequate.

15. The direct outlay upon agricultural works during 1880-81 amounted to Rs. 2,85,682 against a grant of Rs 2,80,783. These works consist of river embankments and works for river conservancy and drainage.

16. In addition to the usual percentage of General Establishment charges, the whole cost of the following special establishment is debited to Irrigation:—

(1) Establishment of Chief Engineer for Irrigation.
(2) Water Regulation, Navigation, and River Conservancy establishment.
(3) Temporary Survey Establishment.
(4) Special Establishment for revenue investigations.

The cost of establishment of Chief Engineer for Irrigation was wholly debited to works of irrigation and navigation (No. 33), as the debit to Capital Account of Productive Public Works (No. 38) on account of general establishment was equivalent to the percentage sanctioned by the Government of India.

The total cost of establishment for water regulation, navigation and river conservancy was Rs. 1,10,132 during 1880-81 against an expenditure of Rs. 1,13,788 during the previous year.

The total cost of the temporary survey establishment amounted to Rs. 23,071 during the year.

A special establishment, costing Rs. 13,832 for the year, was employed in ascertaining the revenue due to irrigation in the Kavari Delta and under the Pennar, Pelandorai, Palar, and Srivaikuntham anicuts, and the Chambrambakam Tank. The investigation was completed for the Srivaikuntham anicut system, and nearly so for the other works, except those in the Kavari Delta.

17. It would add greatly to the utility of the report if all figures relating to expenditure and income were shown in the report and tabulated statements for the several *classes of works* enumerated in paragraph 2 of this review, instead being arranged *by districts* for all classes of works together, as in the tabular statement on page 42 of the report.

18. The Madras Irrigation and Canal Company's works consist of a weir across the Toombudra river and head works at Sunkesala, 17 miles above the town of Kurnool, and of a canal for irrigation and navigation from Sunkesala to Cuddapah, 190 miles in length.

The total direct expenditure on Capital Account to the end of 1880-81 amounted to Rs. 1,16,69,077.

Owing to a variety of causes the returns from irrigation have hitherto been insufficient to cover even the working expenses of the canal, except in the famine years of 1876-77 and 1877-78, during which there was a considerable extension of irrigation, but this increase has not since been maintained, the rainfall having been quite sufficient for the cultivation of the dry crops which are grown on most of the land commanded by the canal.

The revenue charges on account of maintenance, establishment, general and home management, and compensation, amounted to Rs. 1,39,324 during 1880-81, showing a satisfactory reduction on the expenditure of 1879-80 on the same account, Rs. 2,35,662. The charges for home management were reduced from Rs. 1,63,548 during 1879-80 to Rs. 32,263 during 1880-81.

The gross revenue credited during 1880-81 amounted to Rs. 74,356, but this amount includes an item of Rs. 10,615 on account of "interest and profit on mortgage," and the revenue from irrigation and special water-rate was only Rs. 60,089 in 1880-81, compared with Rs. 1,67,056 in 1879-80. 17,798 acres of land were irrigated during 1880-81, 18,656 acres having been watered during 1879-80.

Excluding charges for penalty, interest, and town supply, the revenue assessed on the area irrigated in 1880-81 amounted to Rs. 56,920, giving an average rate of Rs. 3·20 per acre.

Owing to want of capital required for the completion of navigation works, and purchase of boats, navigation of the canal was not commenced until 1st October 1880. The working expenses of navigation amounted to Rs. 18,390 and the receipts to Rs. 5,783 during the year.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Government of Madras for information and guidance.

Also that a copy of the Resolution be forwarded to the Local Governments and Administrations marginally noted for information.

The Governments of Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab, in the Public Works Department.
The Chief Commissioner, Central Provinces.
The Agent to the Governor General for Rajputana.

Also that a copy be forwarded to the Publisher of the *Gazette of India* for publication in the Supplement to the Gazette.

HENRY A. BROWNLOW, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

ORDERS ON REVENUE REPORT OF IRRIGATION WORKS IN BOMBAY (EXCLUDING SIND) FOR 1880-81.

No. 237—50 I., dated Simla, the 7th July 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, No. 118 W.I.-269, dated 9th May 1882, forwarding the above.

OBSERVATIONS.—The capital outlay of all kinds during the year amounted to Rs. 2,22,388 and the total direct and indirect capital outlay to end of 1880-81 to Rs. 1,32,74,996.

2. The interest charges during 1880-81 amounted to Rs. 5,64,076, and the unpaid balance of accumulated interest at the end of the year to Rs. 53,86,110.

3. The assessed revenue of all kinds amounted to Rs. 2,30,652, and the maintenance charges to Rs. 1,47,995.* The net revenue was therefore Rs. 82,657 and yielded 0·62 per cent. return on the capital outlay to the end of the year.

* Indirect charges for leave and pension allowances not included in this sum.

4. Although the percentage of net revenue upon capital outlay was so small, the returns of the year under review were on the whole decidedly encouraging. The area irrigated during the year was very nearly 75 per cent. larger than the average area of the four preceding years, the area of "kharif" irrigation having been 120 per cent. and of "rabi" irrigation 37 per cent. in excess of the corresponding averages of the four preceding years.

5. The assessed revenue did not however increase in a similar proportion, as the increase occurred chiefly in the class of cereals (millet, rice, pulses and wheat) which pay the lower water rates. The average water rate per acre therefore fell from Rs. 8·39 per acre in 1879-80 to Rs. 6·01 per acre in 1880-81. Although the increase in the irrigated area of sugarcane was not nearly so marked as that under cereals, a very steady and satisfactory increase is perceptible in the area of this crop watered from the Government canals and tanks. The increase in irrigation of cereals having been due to a temporary cause, deficient and late rainfall, too much reliance should not be placed on it, and every effort should be made to secure permanence of supply by pushing on the construction of all storage reservoirs, which may be found economically feasible.

6. Fair progress is however being made in this respect, as it appears from the report that out of twelve systems of canal irrigation, three are already provided with storage works, for one, they are under construction, for two, the estimates are under consideration, for three more, surveys and estimates are in progress, and for another, a site for a reservoir has been found, leaving only two for which no such works have as yet been proposed.

7. Two very serious causes of the unremunerative character of these irrigation works lie in the high rate of maintenance charges, which are in many cases out of all proportion to the returns obtained from the works, and in the great loss of water by percolation from the canal channels. The Government of India is glad to see that the Government of Bombay is endeavouring to reduce the maintenance charges, although it is hardly satisfactory to find that they continued to increase during the year under review. The necessity for the large increase of nearly 20 per cent. in outlay upon repairs and of more than 28 per cent. on establishment charges should have been explained more fully than it has been. The revenue charge for establishment amounts to nearly 49 per cent. of the outlay upon works and repairs and ought to be reduced without any further delay, as the duties involved in supervising the irrigation of 34,500 acres must have been almost nominal. There is no apparent reason why the cost of establishment employed on the main canals should vary from Rs. 59 per mile on the Jamda canal to Rs. 164·5 per mile on the Rewari canal and from Rs. 32·7 on the Ekruk Tank to Rs. 72·6 on the Maini Tank. Again the establishment employed on irrigation is shown as varying in cost from Re. 0-11-2 per acre on the Ojhar canal to Re. 1-9-5 on the Hathmati without any explanation of the causes of the difference.

8. If the loss by percolation and the volumes utilised have been correctly returned from the Palkher canal it would apparently be worth while spending a very considerable sum on stanching the channel. In the table on page 67 of the Chief Engineer's Report it is shown that an average volume of 10·38 cubic feet per second was lost by percolation during the year, only 4·44 cubic feet per second having remained available for irrigation. But the revenue assessed on the area irrigated by the latter volume amounted to Rs. 5,704 and the value of 1 cubic foot per second was therefore Rs. 1,282. Supposing a like demand to exist for the water lost, it may be taken as being worth at least Rs. 12,000, and it would pay well to spend Rs. 50,000 on saving it. It would not perhaps be necessary to puddle the bed in so expensive a manner as was done on the Hathmati canal, and the sum might suffice to stanch the whole of the 11 miles on which the principal loss from leakage occurs. The foregoing calculation however takes for granted the existence of a demand for the whole of the water saved. In any case, the very large proportion of water lost by percolation on this and other canals points to the necessity of full indirect credit being given to the Government Irrigation Works, in all cases where they can be shewn to have improved the irrigation from wells and natural watercourses in their neighbourhood.

9. The report on the supply of water in wells during the late famine, called for by the Government of India in the review of the Irrigation Revenue Reports of 1877-78 and 1878-79, and again in that of the Revenue Report for 1879-80, has not yet been received.

ORDER.—Ordered that copies of this Resolution and of the Report be forwarded to the Department of Finance and to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance; and that copies of the Report and of the Resolution be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department, for communication to Resident at Mysore and Chief Commissioner of Coorg.
The Resident at Hyderabad.
The Agents, Governor General, Central India and Rajputana.

Ordered further, that this Resolution be published in the Supplement to the *Gazette of India*.

T. C. HOPE,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 20th July 1882.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th JULY 1882.

GENERAL REMARKS.—The monsoon has continued to give general rain throughout the country. The fall has been light in most districts of the Madras Presidency, save in the extreme south, where damage from excessive rain is reported. In Coorg the rainfall has again been heavy, and in Mysore and in the Nizam's Territories and Berar sufficient. In the Bombay Presidency the rain has been very heavy in some parts (including Sind), and good or fair in others; in the Central Provinces good in some districts and excessive in others; in the Central India and Rajputana States and in the Punjab good almost everywhere; in the North-Western Provinces and Oudh good in a few districts and light generally; in Bengal heavy towards Orissa, good in Bengal proper, and light in Behar; in Assam light in some places, fair in others; and in British Burma heavy in two districts and good in others.

There are, however, a few limited tracts from which no rain has been reported during the week under report, notably the Tanjore district in Madras, the Kolar district in Mysore, and Umballa in the Punjab.

General prospects, where not affected for the time being by excessive rain or flood as in Tanjore, Kanara, Hoshangabad, Coorg, and Dibrugarh, or by insufficient rain as in Chingleput or in parts of two districts of Bombay and of four districts in Bengal, are very favourable, as sowing operations are nearly complete and the young crops are doing well. The harvest of jute in Bengal promises to be a good one; and generally sugar and indigo are doing well throughout Northern India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(July 12th)		
Bellary ...	1·18 (average of eight stations).	Standing wet crops good; harvest summer paddy, yield below average; fever in parts.
Kurnool ...	2·29 (average of nine stations).	Improvement in season continues; cattle-disease in parts; standing crops fair.
Ganjam ...	2·64 (average of twelve stations).	Standing summer paddy and dry crops reviving; fever, small-pox, and cholera prevalent; cattle-disease exists.
Kistna ...	1·92 (average of thirteen stations).	Small-pox and cattle-disease slight.
Chingleput (Madras) ...	·87 (average of eleven stations).	Standing crops good where water available; harvest paddy and dry crops, outturn below average; agricultural operations progressing; cattle-disease in parts.
Coimbatore ...	·71 (average of fourteen stations).	Standing crops generally good; harvest dry crops, yield about average; small-pox and fever in parts.
Tanjore ...	·26 (average of four stations).	Standing crops generally good, though require rain in parts; harvest paddy, yield below average; cattle-disease slight.
Madura ...	·25 (average of three stations).	Standing crops fair; harvest *cholum*, outturn below average; fever, cholera, and cattle-disease in parts.
Malabar ...	16·13 (average of fourteen stations).	First crop partially destroyed by heavy rain in parts; small-pox, cholera, and fever in parts.
Travancore ...	3·46	Cultivation affected by incessant rain; fever slightly prevalent. *General Remarks.*—General prospects good.
Madras—(July 19th)		
Bellary ...	·69 (average of seven stations).	Standing crops good; harvest summer paddy, yield below average; fever in parts.
Kurnool ...	·59 (average of six stations).	Season generally favourable; more rain wanted; agricultural operations commenced; cattle-disease in parts.
Ganjam ...	1·43 (average of fourteen stations).	Standing crops not thriving for want of timely rain; fever, small-pox, and cattle-disease continue; cholera prevalent.
Kistna ...	·75 (average of eleven stations).	Cattle-disease exists.
Chingleput (Madras) ...	·34 (average of eight stations).	Standing crops wet and dry good where water available; harvest wet and dry crops, outturn below average; agricultural operations progressing; small-pox slight in parts.
Coimbatore ...	·61 (average of eight stations).	Standing crops generally good, though some dry crops damaged in parts by insects or rain; harvest dry crops, outturn average; small-pox and fever in parts.
Tanjore ...	.....	Standing crops generally good, but damaged in two taluks by flood; harvest paddy, yield below average; cattle-disease slight in parts.
Madura ...	1·50 (average of one station).	Standing crops fair; fever, cholera, and cattle-disease in parts.
Malabar ...	9·36 (average of fourteen stations).	Standing crops generally good; small-pox, cholera, and fever in parts.
Travancore ...	1·33	Weeding paddy-fields continues; fever slightly prevalent. *General Remarks.*—No rain at Tanjore; general prospects good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—(July 19th)		
Kurrachee ...	Kurrachee, 6·63; Manora, 4·93; Jerruck, 10·84; Tatta, 7·48; rain general throughout district.	River at Kotri on 17th, 17 feet against 13 feet 1 inch last year; crabs and turtles doing some damage in 2 tapas of Ghorabari; fever and colds in five talukas; 2 cases of small-pox in Ghorabari taluka; wheat, red rice, and *bajri* in Kurrachee 24, 36 and 32, in Kotri 30, 32 and 44, in Tatta 24, 44 and 44, and in Jati 18, 44 and 44 lbs. per rupee, respectively.
Hyderabad ...	Average rainfall in eleven talukas 5·97; in Hyderabad in 24 hours 12th and 13th the fall was 8·40.	River rose greatly during heavy rain, has since fallen, but is still high; wheat 24, *juari* 44, *bajri* 39, red rice 34, and white rice 24 lbs. per rupee.
Ahmedabad ...	.....	Total rainfall 19·19; sowing continues; cholera has nearly disappeared; wheat 27 and *bajri* 30 lbs. per rupee.
Baroda ...	5·90	Total rainfall 19·36; sowing of *kharif* finished in some places; general health good; *bajri* 30 and common rice 22 lbs. per rupee.
Surat ...	5·45	Total rainfall 25·43; sowing and transplantation nearly completed; break wanted; flood in Tapti; young crops healthy; *juari* 34 and *nagli* 51 lbs. per rupee.
Násik ...	Igatpuri, 20·00; Peint, 13·00; Násik and Kalwan, 3·23; slight in Yeola, Nando and Malegaon; sufficient elsewhere.	All crops doing well; *bajri* still being sown; locusts disappearing; wheat 24, *bajri* 36, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	Rain very heavy on 12th and 17th; total of week, 8·38.	Total rainfall to date 51·37, being 15·10 above average; abnormal temperature 3° cool on 12th and 17th, *nil* on all other days; vapour in air normal; abnormal wind westerly.
Poona ...	Rain general; more wanted in Sirur and Bhimthari talukas; maximum at Mawal, 16·39; minimum at Indapur, ·58.	Young crops healthy; 3 fatal cholera cases in Poona; *bajri* 42¾ and *juari* 56¼ lbs. per rupee, in Poona *bajri* 36¾ and *juari* 47¾ lbs. per rupee.
Ahmednagar ...	Maximum at Akola, 4·53; minimum at Shrigonda, ·16.	Sowing of *kharif* in progress in all talukas, suspended in Karjat and Shrigonda, where rain is urgently wanted; cattle-disease in Karjat; cholera in Parner 8 attacks, 4 deaths, in Shrigonda 8 attacks, 6 deaths; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 42 in Kopergaon, *juari*—maximum 90 in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	·88	Total rainfall 16·69; cholera—70 cases, 25 deaths; *kharif* sowing nearly completed; *bajri* 56 lbs. 32 tolas and *juari* 75 lbs. 3 tolas per rupee.
Dharwar ...	Rain maximum—Hangal, 9·25; Dharwar, 8·11; Bankapur and Kod, above 4·00; Hubli above, 3·00; Navalgund and Karajgi, above 2·00; Ranibennur, Gadag, and Nargund, above 1·00; Ron, ·90; minimum ·30 at Mundargi and Nargund.	More rain wanted in Dharwar, Hangal, Bankapur; excessive rain in other talukas doing much damage to young crops, and break required immediately; slight ague in one taluka and two pettas, and slight foot-and-mouth disease among cattle in Bankapur and Hangal; prices stationary.
Kanara ...	Karwar, 8·00; Kumpta, 13·89; Sirsi, 14·91; Hallial, 5·48.	Total rainfall 65·93; transplanting and weeding in rice-fields continue; sowing in *kumri* lands; excessive rainfall injures plants in low lands; small-pox, fever, and cattle-disease subsiding; common rice in Karwar 11½ seers, in district average 13 seers per rupee.
Rajkot ...	6·46	Total rainfall 12·47; weather cloudy; crops good; cholera in some places; *bajri* 25 and *juari* 20 lbs. per rupee.
		General Remarks.—Sowing mostly completed; transplantation in progress; rain general, heavy in Sind and several districts of the Presidency, where immediate break is required, but more rain is needed in a few talukas of Nasik, Ahmednagar, and Dharwar; cholera in Satara, Sholapur, Ahmednagar thana, and parts of Kathiawar; fever and cattle-disease in a few districts.
Bengal—(July 19th)		
Chittagong ...	2·13	Weather hot, with occasional rain, more rain wanted; cultivation for winter rice going on; prices somewhat high; cholera, small-pox, and cattle-disease still continue; fever has appeared.
Dacca ...	1·48	Weather showery; crops satisfactory; jute harvest commenced.
24-Pergunnahs (Calcutta)	3·67	Early rice, jute, and sugarcane doing well; transplanting of winter rice briskly going on; high lands being prepared; prices of common rice unchanged; health of people and cattle generally good; rivers rising.
Moorshedabad ...	0·90	Transplanting of winter rice has commenced on both high and low lands, but is being somewhat retarded owing to insufficient rainfall; prospects of autumn crops favourable; health of people generally good, except a few cases of fever at Rangamati.
Rajshahye ...	1·50	Prospects of crops favourable; more rain wanted; public health fairly good; prices unchanged.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Burdwan ...	2·21	Prospects fair, but more rain wanted in several parts of the district; public health good.
Rungpore ...	2·33	Weather hot and cloudy; autumn rice being harvested; prospects good; transplanting of winter rice not yet completed; jute and sugarcane promising; prices of food-grains stationary; public health good.
Bhagálpur ...	1·19	More rain wanted for transplanting rice; prospects of autumn crops good.
Purneah ...	0·99	Prospects of crops fair; more rain wanted; weeding continues; health fair; rivers rising.
Patna ...	0·59	Prospects of autumn crops good; transplanting of rice seedlings commenced in Behar sub-division, but more rain wanted; cholera still reported from Behar, Sitao, and Islampur police stations, and small-pox from Giriak outpost.
Durbhunga ...	0·13	Weather hot and cloudy; more rain wanted; prices stationary; cholera has not yet quite disappeared.
Hazáribágh ...	1·85	Weather cloudy, with sunshine at intervals; autumn crops promising; transplanting of autumn rice commenced; cholera and small-pox still reported, but general health good.
Cuttack ...	9·88	Autumn and winter rice being weeded; cholera still reported.
		General Remarks.—Rain fell in all districts during the week, more rain is wanted in several places for transplanting late rice; prospects of jute and sugarcane excellent; early rice is being harvested in some places in Central and Eastern Bengal; manufacture of indigo proceeding generally, with average outturn, except in Durbhunga where the crop is said to be very uneven; cholera still very prevalent in Birbhoom, and cases are also reported from a few other districts; fever has appeared in some districts.
N. W. Provinces and Oudh—		
Benares (July 18th)	Benares, 1·8; Chandauli, 6·3; Gungapur, 1·1.	*Kharif* sowings nearly finished; rice sowings begun in Chandauli tahsil, but owing to want of rain not yet commenced in Benares tahsil; health of cattle good; isolated cases of cholera reported from parts of each tahsil; markets well supplied at moderate prices.
Cawnpore („ „)	Average over 1·4	Weather cloudy and close; prospects of *kharif* continues good; cholera has appeared in Ghatampur and Saih Salimpur; prices stationary.
Allahabad („ 19th)	Average 1·5	Crops flourishing; prices slightly fallen; health good; cholera much diminished in the district.
Gorakhpur („ 18th)	No rain for five days	Sky clear; rain wanted for rice; health good; prices steady.
Jhánsi („ 17th)	Rain from 3·7 in pargana Mau to 9·8 in pargana Jhánsi; average 6·1	Prospects good; sowing of *bajra* and *tili* continues; prices falling.
Agra („ 18th)	Rain in all parganas, from 0·5 to 3·9.	Prices slightly falling; slight fever in one pargana only and a few cases of cholera in another; general health good.
Farukhabad („ „)	Light showers only in four tahsils, moderate fall in the other two.	Prospects good, but in Aligarh tahsil damage has been caused by floods; health good.
Bareilly („ „)	Average 2·0	Weather seasonable; prospects good and little disease.
Meerut („ „)	Occasional light rain	Weather more open during past week; the occasional light rain so far very favourable to agricultural operations, which are in full progress; crops flourishing; supplies sufficient; prices stationary; health good.
Kumaun („ „)	Rain less during the week; three or four days' break.	Crops good; no change in prices; two deaths from *mahamari* disease reported, otherwise health good; foot-disease amongst cattle continues.
Lucknow („ „)	Sadr, 0·7; Maliabad, 0·6; Mohanlalganj, 0·4.	*Kharif* crops sown; *bajra* and *mot* sowing being carried on; cholera reported from tahsil Mohanlalganj, and is again increasing in the city; bazars well supplied; prices steady.
Rae Bareli („ 17th)	Sadr, 2·1; Digbijaiganj, 3·6; Dalamau, 4·2; Salon, 4·4.	Agricultural operations in progress; health of people and cattle generally good; though cholera still continues; prices slightly falling.
Partabgarh („ 18th)	Heavy rain in Kanda tahsil.	Rain wanted in Sadr and Patti tahsil; crops coming on well; prices steady; general health good.
Sitapur („ „)	Rain in all tahsils, but Sidhauli.	More rain required speedily in Sidauli tahsil; prices slightly rising; health generally good; cattle-disease in two tahsils.
Fyzabad („ „)	2·1	Sowings have come up well; cholera still in part of the district.
		General Remarks.—Rain general throughout the Provinces but light except in Jhánsi; agricultural operations still in progress; sowings germinating well, and prospects so far good; prices have a tendency to fall; cholera still continues in eastern districts, but general health fairly good; cattle-disease in Sitapur and Kumaun.
Punjab—(July 18th)		
Delhi ...	4·0	Health good; *kharif* sowings in progress; slight fall in prices of food-grains.
Hissar ...	.....	No report received.
Umballa ...	No rain	*Kharif* sowings in progress; health good; prices steady.
Jullundur ...	2·30	Health good; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*contd.*		
Amritsar ...	3·60	*Kharif* sowings commenced; health good; slight fall in prices of food-grains.
Sialkot ...	3·0	Health good; prices steady.
Lahore ...	2·0	Health good; prices stationary.
Ferozepore ...	1·20	*Kharif* sowings in progress; health good; prices falling.
Mooltan ...	2·30	Health and crops good; slight fall in price of barley.
Rawalpindi ...	2·50	*Kharif* crops good; health good; slight rise in prices of food-grains.
Dera Ismail Khan ...	3·80	Crops greatly benefited; health good; prices falling.
Peshawar ...	1·0	Crops benefited; slight fall in prices of wheat and gram.
		General Remarks.—Rain has been general except in Umballa; health good; prices of food-grains generally are falling.
Central Provinces—		
Nagpur (July 19th)	7·70	Weather cloudy and wet; prospects good; cholera prevalent; prices steady.
Jubbulpore („ 18th)	12·27	Weather cloudy and rainy; sowings approaching completion; cholera and small-pox prevalent; wheat 17 and rice 12 seers per rupee.
Saugor („ 17th)	7·27	Crops progressing favourably; cotton weeding going on; general health good; prices steady.
Seoni („ 18th)	5·17; rain incessant	Rain favourable to rice crops; cholera and cattle-disease prevalent; prices stationary.
Khandwa („ „)	2·24; showery	*Kharif* sowings continue; small-pox prevalent; wheat 14, rice 11½, and gram 23 seers per rupee.
Hoshangabad („ „)	11·49	Heavy rain on 15th instant caused floods; crops damaged; small-pox prevalent; wheat 15, rice 9, and *juari* 21 seers per rupee.
Raipur („ 15th)	5·13	Reploughing rice-fields commenced; cholera prevalent; prices falling; rice 40 and wheat 30 seers per rupee.
Sambalpur („ 13th)	8·15	Weather seasonable; prospects good; rice 52 seers per rupee.
		General Remarks.—Weather continues cloudy and wet; heavy rain has fallen in most districts; sowings continue; prospects favourable; cholera and small-pox still reported; prices steady.
British Burma— (July 15th)		
Akyab ...	19·86	Total rainfall 104·66; 5 deaths from cholera in the district, otherwise public health good; slight cattle-disease in five townships; sowings commenced.
Rangoon ...	4·41	Total rainfall 32·70; 2 deaths from cholera, otherwise public health good.
Bassein ...	4·45	Total rainfall 51·63; 1 death from cholera in the town and 7 in district, otherwise public health good; cattle-disease in part of district; ploughing proceeding.
Prome ...	1·42	Total rainfall 16·90, apparently more rain in district than in the town; 3 deaths from cholera in town and 13 in the district, otherwise public health good; cattle-disease prevalent in two townships; ploughing still very backward, but improving owing to late rain.
Amherst (Moulmein) ...	15·40	Total rainfall 92·32; public health good both in Moulmein and district; cattle-disease prevalent, but not severe in three townships; sowing still goingon.
Toungoo ...	4·45	Total rainfall 34·37; 12 cases and 2 deaths from small-pox in the district, but none in town; cattle-disease prevalent in part of the district.
		General Remarks.—Some cholera in Prome and Tharawaddy, and a few cases in the other districts of Pegu and Irrawaddy and in Akyab; a little small-pox in Tounghoo, otherwise public health good; cattle-disease continues somewhat prevalent; rain more plentiful in places where it was wanted.
Assam—(July 18th)		
Gauhati ...	·60	Days hot; more rain wanted for transplanting operations; public health good; disease reported from the interior.
Sylhet ...	1·45	State and prospects of crops generally good; tea and sugarcane doing well; public health generally good.
Cachar ...	1·45	Weather intensely warm; rain much wanted; state of *dumahi* and *murali* crops and tea good; ploughing for *sali* crops retarded by want of rain; common rice $21\frac{5}{10}$ seers per rupee; 2 cases of cholera reported from Lakhimpur; cattle-disease reported in the Sadr tahsil, some cases also in Nalukandi.
Dibrugarh ...	2·62	Weather hot; ploughing for *sali dhan*; cattle-disease still reported; public health generally good; heavy and sudden flood in the Subansiri carried away houses, and it is said caused the death of 40 coolies on Dirpai garden, cattle also drowned in Bardolooni and Patalipani.
Mysore and Coorg—		
Bangalore ...	·44	Standing crops and seedlings in good condition.
Mysore ...	·25	Crops in good condition.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg— *contd.*		
Mercara ...	18·53	Monsoon continues heavy; the Cauvery again in full flood, many roads impassable, several houses and cattle-sheds have fallen down, many paddy flats in the Padinalkund taluk and on the Mercara plateau are flooded and are injured by landslips; elsewhere crops are doing well; prices stationary; public health good.
		General Remarks.—Rain has fallen abundantly throughout the province, except in the Kolar district where the *ragi* crop is suffering, elsewhere crops generally in good condition; transplanting of paddy commenced in some places; prospects favourable; public health good; fever and murrain abating; prices unaltered; Cauvery river again in high flood.
Berar & Hyderabad— (July 19th)		
Amráoti ...	3·06	*Kharif* crops above ground and in good condition; wheat 18 and *juari* 30 seers per rupee.
Akola ...	4·51	*Kharif* sowings almost completed; prospects favourable.
Hyderabad ...	1·71	Total rainfall from 1st January 10·21 inches; *kharif* crops benefited by the rains of the week; *abi* crops continue to be sown; tanks have received a considerable quantity of water; fever and cattle-disease prevail in places; prices—wheat 16, common rice 11, white *juari* 24¼, yellow *juari* 27½, and *tur* 25 seers per current sicca rupee.
Central India States— (July 19th)		
Indore ...	4·71	Almost continuous rain and drizzle; a break is much wanted, otherwise the *kharif* crop must suffer; health good.
Morar (Gwalior) ...	2·64	Health and prospects good.
Sutna ...	1·85	Weather cloudy and cool; health good.
Neemuch ...	3·13	Public health good.
Goona ...	6·60	Prospects good.
Bhopal ...	·29	Weather cloudy; continuous rain; prospects good.
Agar ...	·69	Health and prospects good.
Nowgong ...	5·19	Prospects very favourable; health fair; prices stationary.
Manpur ...	4·50	Health good; prices stationary.
Rajputana—		
Abu (July 19th)	5·85	Weather cloudy and overcast.
Sirohi („ 16th)	0·06	Tanks, wells, and health good; very little rain up to date.
Marwar („ 14th)	1·01	Fifteen days' water brought into tanks; health good; ploughing almost general; heavy clouds; copious showers reported from districts; prospects good; more rain expected; prices stationary.
Meywar („ 15th)	1·35	Tanks, wells, and health good; prospects very good; weather cloudy.
Harowti („ „)	Deoli, 6·09; Tonk, 1·88; Kotah ·90.	Few cases of cholera at Tonk and Shahpura; prices steady.
Jhallawar („ 12th)	1·89	Prospects favourable; health good.
Ajmere („ 18th)	3·36	Sowings progressing; seasonable weather; few cases of cholera still occurring.
Jeypore („ „)	1·37	Prices stationary; health good.
Ulwur („ „)	3·85	*Kharif* sowings continue; tanks and wells filling; prices of wheat 18, barley 22, *juar* 22½, and gram 21½ seers per rupee; health good.
Nepal—		
Katmandu ...	4·40; Rain almost daily.	Transplanting of rice nearly finished.

Executive Engineer, Meerut Division, reports that the greatest difficulty has been experienced in keeping alive the large area of sugarcane and indigo sown in March and April, and that in many places rice and cotton irrigation has had to be forcibly stopped to permit of sugar being irrigated.

Executive Engineer, Mainpuri Division, reports that there was a strong demand throughout the month for indigo and all kharif crops.

Executive Engineer, Eastern Jumna Canal, reports that there was a steady medium demand up to the 20th of the month, after that a full demand.

Executive Engineer, Rohilkhand Canals, reports that water was in great demand throughout the month for sugarcane; and that the area irrigated this year is larger than usual; whilst the supply in the rivers is below the average. There was rain on the 10th, 11th and 14th, which slightly eased the demand. In the Tarai water is being taken for early rice sowings.

Allahabad,
The 30th June 1882.

G. H. D. WALKER,
Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

(*d*) Due to adjustments made in the Supplementary Return ending 30th June 1881. (*e*) Separate returns for the D. V. and Kandahar State Railways for the first 8 days of July 1882 have been received.

(*f*) Total receipts from 8th April to 15th June 1881. (*g*) Total receipts from 1st April to 17th June 1882.

SIMLA,
The 24th July 1882.

F. FIREBRACE, *Major, R.E.*,
Under Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 25th JULY 1882.

GENERAL REMARKS.—The rainfall has continued to be general throughout the country. In the Madras Presidency it has again been heavy in the extreme south-west, and comparatively light in other parts. In Coorg also it has again been heavy. In the Mysore State it has been heavy in some districts, and light in others. In the Bombay Presidency very heavy in some parts, fair in others; while in the Poona District there has been a partial break. In Berar the rainfall has been fair; in the Central Provinces incessant; and in Central India and Rajputana fully sufficient for present requirements. In the Punjab there has been more or less rain in all districts. In the North-Western Provinces and Oudh there has been sufficient rain everywhere except in Gorakhpur. In Bengal some rain fell in all districts throughout the week, but in parts more is urgently wanted. The rainfall in Assam has been fair in some parts and light in one district. In British Burma it has been more or less heavy in all districts.

General prospects continue favourable throughout India. In British Burma ploughing and sowing are proceeding satisfactorily. In Assam the transplanting of the rice crop has commenced, but more rain is needed in some parts. In Bengal also the transplanting of late rice crop has commenced, and more rain is wanted for this purpose in Bengal Proper and Behar. The prospects of jute and other autumn crops continue favourable; sugarcane also is promising; and the early rice is being cut in parts of Central and Eastern Bengal. In the North-Western Provinces and Oudh the transplanting of rice is proceeding in some parts, and more rain is wanted for this purpose; in other parts the weeding of *juar* and cotton are retarded by excess of rain; generally *kharif* sowings are nearly completed, and indigo and sugarcane promise well. In the Punjab *kharif* sowings continue or are nearly completed, and prospects are favourable.

Prospects are also favourable in the Rajputana and Central India States, but in some places the young maize and millet crops have been damaged by too much rain. An excess of rain is also retarding weeding and transplanting operations in the Central Provinces. In Berar the sowings have been completed, and where already above ground the young crops are in good condition. In the Bombay Presidency sowings have likewise been completed; in several districts the crops have been injured by excessive rain; and in parts of Ahmednagar and Dharwar more rain is needed. In the Mysore State crops are generally flourishing, save where they have been damaged by floods. Coorg again reports floods and consequent damage to the rice, *ragi*, and coffee crops, and loss of cattle.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(July 26th)		
Bellary ...	·32 (average of five stations).	Standing crops generally good, but worm-eaten in parts; agricultural operations progressing; fever in parts.
Kurnool ...	·47 (average of six stations).	Season generally favourable; crops sprouting well; cattle-disease in parts; high flood in Tungabadra.
Ganjam ...	1·0 (average of twelve stations).	Standing crops thriving; fever, small-pox, and cattle-disease exist; cholera prevalent.
Kistna ...	·96 (average of ten stations).	Standing dry crops flooded in five taluks, fair in others; small-pox and cattle-disease in parts; high floods in Kistna river.
Chingleput (Madras) ...	·22 (average of five stations).	Standing crops under larger tanks and channels good; agricultural operations progressing; small-pox, fever, and cholera in parts.
Coimbatore ...	·70 (average of ten stations).	Standing crops generally good, though dry damaged in parts by rain and insects; harvest dry crops, outturn about average; fever and small-pox in parts.
Tanjore ...	·31 (average of two stations).	Crops generally good, though damaged by breaches in three taluks; cattle-disease in one taluk.
Madura ...	·25 (in one station)	Standing crops fair but withering in one taluk; harvest paddy; cholera in parts.
Malabar ...	10·68 (average of fourteen stations).	Standing first crop partially destroyed by heavy rain; small-pox, cholera, fever, and cattle-disease in parts.
Travancore ...	7·53	Paddy-fields being weeded; cultivation affected by incessant rain; fever slightly prevalent. *General Remarks.*—General prospects fair.
Bombay—(July 26th)		
Kurrachee ...	Kohistan, 12·10; Schwan, 4·03; Johi, 4·60; Ghorabari, 3·58; Sujawal, 5·79; Dadu, 2·91.	Fever in two talukas; 2 cases of small-pox at Sujawal; river at Kotri on 24th, 18 feet against 15¼ feet on same date last year; some damage done to rice crops by rain in seven talukas; wheat, red rice, and *bajri* in Kurrachee 24, 36 and 32, in Manjhand 26, 44 and 46, in Sakro 18, 40 and 48, and in Shahbandar 20, 52 and 48 lbs. per rupee respectively.
Hyderabad ...	Rain in five talukas, average 3·42.	River very high; some damage to crops in Badin from heavy rain and in Guni from rain and breaching of the Hajipur bund; wheat 25, *juari* 44, *bajri* 39, red rice 32, and white rice 22 lbs. per rupee, respectively.
Ahmedabad ...	6·04	Total rainfall 25·23; sowings progressing; wheat 27 and *bajri* 31 lbs. per rupee.
Baroda ...	9·68	Total rainfall 29·04; transplanting of rice continues; cholera abating in Khari Division, but increasing in Gackwar's Contingent camp at Manekwara in Kathiawar; *bajri* 20 and common rice 23 lbs. per British rupee.
Surat ...	6·00	Total rainfall 31·43; break commenced; slight damage by excessive rain in some talukas, in others young crops healthy; *juari* 35 and *nagli* 51 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik ...	Igatpuri, 23·91; Peint, 22·47; Dindori, 4·55; Kalwan, 4·10; Nasik, 3·08; least in Nandgaon and Yeola, but sufficient.	Early crops good; *bajri* still being sown; break wanted in places; locusts in Nandgaon; *bajri* 36, wheat 24, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	Rain every day; total of week 2·03.	Total rainfall to date 53·40, being 11·64 above average; abnormal temperature rose from 2° cool on 19th to 1° warm on 25th; vapour in air normal; abnormal wind westerly from 19th to 21st; afterwards wind normal.
Poona ...	.....	Partial break in weather; 4 cholera cases in Bhimthari, 2 fatal; young crops healthy; *bajri* 43 and *juari* 56½ lbs. per rupee, in Poona *bajri* 36¾ and *juari* 47¾ lbs. per rupee.
Ahmednagar ...	1·74 in Akola and from ·49 to ·95 in other talukas.	Total average rainfall of district up to date 10·86, more rain wanted; sowing of *kharif* completed in Nagar and in progress in all other talukas; cattle-disease in Nagar; cholera—in Parner 10 attacks, 2 deaths, and in Shrigonda 36 attacks, 12 deaths; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 45 in Kopergaon; *juari*—maximum 96 lbs. in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	·23	Total rainfall to date 16·92; cholera throughout district except Karmala, 96 cases, 34 deaths; *kharif* sowing almost completed; *bajri* 56 lbs. 12 tolas and *juari* 75 lbs. 8 tolas per rupee.
Dharwar ...	Maximum at Hangal, 8·15; minimum at Mundargi, ·42.	Rivers Tungabadra, Warda, and Kumadmali in flood; some villages in Gadag, Rannibennur, and Karajgi talukas inundated, much damage to houses and property; several tanks burst in Margund and Muridargi *pettas;* more rain wanted in Bankapur, Hangal, Rannibennur, Karajgi, Khalghatgi and Kod talukas; break desired for sowing *juari* and to prevent further damage to young crops; public health good; rice 22 and *juari* 58 lbs. per rupee.
Kanara ...	Karwar, 6·64; Kumpta, 17·00; Sirsi, 24·50; Hallial, 14·48.	Total rainfall 72·77; weeding, transplanting, and sowing *coomrie* lands continue; cattle-disease, fever, and small-pox subsiding; heavy rainfall has damaged rice plants in several places; rivers, tanks, and even roads in low places flooded; some huts washed away but no lives lost; common rice in Karwar 11½, in district average 15½ seers per rupee.
Rajkot ...	1·18	Total rainfall 13·65; weather monsoonish; crops thriving; general health fair; cholera continues in some places; *bajri* 26 and *juari* 30 lbs per rupee.
		General Remarks.—Sowings mostly completed and transplanting in progress; partial break in weather; crops injured by excessive rain in several districts; more rain wanted in parts of Ahmednagar and Dharwar; fever and cattle-disease in a few districts; cholera in Belgaum, Satara, Sholapur, Ahmednagar thana, and parts of Kathiawar.
Bengal—(July 26th)		
Chittagong ...	2·28	More rain wanted; cultivation of winter rice going on; prices stationary; cholera has abated in some places; cattle-disease and fever still continue.
Dacca ...	1·01	Jute and autumn rice being cut; complaints of want of rain for rice on high land.
24-Pergunnahs (Calcutta)	2·04	Prospects of jute, sugarcane, and early rice fair; transplanting of winter rice rapidly going on; public health generally good; rivers rising.
Moorshedabad ...	1·52	Autumn rice promises well, in some places it is being cut; transplanting of winter rice going on; more rain still wanted; some cases of fever at Rangamati; public health generally good.
Rajshahye ...	2·61	Prospects generally favourable, though more rain wanted; jute being cut; health fair; fever and a little cholera still reported.
Burdwan ...	3·21	Weather seasonable, though more rain required for winter rice, especially in Katwa subdivision; public health generally good.
Rungpore ...	0·65	Weather hot; more rain wanted for transplanting of winter rice; condition of other crops favourable; public health good.
Bhagálpur ...	1·38	Autumn crops promise well; more rain required for transplanting rice.
Purneah ...	0·65	Prospects of crops fairly good but rain is badly wanted; no transplanting for want of rain; health fair; Ganges high; Kosi low.
Patna ...	1·08	Prospects of autumn crops good; more rain wanted for transplanting rice; cholera still reported from Barrh and Behar subdivisions.
Durbhunga ...	0·58	Transplanting of rice crops going on very slowly for want of rain, which is urgently required; prices rising; cholera still reported in Sadr and Tajpur.
Hazáribágh ...	5·0	Weather cloudy and showery; transplanting of rice going on vigorously; cattle-disease, cholera, and small-pox still linger; general health good.
Cuttack ...	10·69	Autumn and winter rice crops being weeded and reploughed; sugarcane growing well; cholera still prevalent.
		General Remarks.—Rain fell in all districts during the week; more rain is much wanted in many parts of Bengal proper and throughout Behar for transplanting late rice; in Orissa and Chota Nagpur the fall was sufficient for transplanting; prospects of early rice, jute, and other autumn crops continue favourable; sugarcane also promising; early rice is being cut in places in Central and Eastern Bengal; fever has appeared in a few districts; cases of cholera and small-pox still reported from some districts; public health generally fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares ...	1·6; Chandauli, 3·4.	Report from Gungapur not yet to hand; not enough rain in Benares tahsil for transplanting early rice; health of cattle good; cholera increasing; bazars well supplied.
Cawnpore (July 25th)	Average more than 0·7	Weather cloudy; prospects excellent; a few cases of cholera reported from Ghátompur, Barrh, and Salempur; prices stationary.
Allahabad („ 26th)	Good rain during the week.	Crops flourishing; *bajra* sowings in progress; rice being transplanted; not much sickness for season; prices falling.
Gorakhpur („ 25th)	No rain for twelve days, except local showers.	Crops still green, but rain much wanted; prices rising.
Jhánsi („ 24th)	From 13·1 in pargana Mau to 0·8 in pargana Moth; average 9·0.	Owing to excessive rain weeding of *juar* and cotton in *már* soil being retarded; fine weather wanted; health good; prices fluctuating.
Agra („ 25th)	Rain in all parganas from 0·6 to 3·0.	Indigo, sugarcane, and cotton promise well; and break wanted to facilitate weeding; slight fever in two parganas, and slight cholera in Firozabad; general health good; prices slightly falling.
Farukhabad („ „)	Rain throughout the district.	Prospects good; markets well supplied; health good.
Bareilly („ „)	About 2·0	Weather seasonable; prospects good.
Meerut („ „)	Occasional rain; Meerut, 2·8; Hapur, 3·0; Mowana, 3·8; Sardhana, 2·7; Ghaziabad, *nil.*	Weather seasonable; health good; crops flourishing; imports into markets scanty, but sufficient; generally prices stationary.
Kumaun („ „)	Fair rain	Very favourable weather for crops; 3 deaths from *máhámari* disease; cattle-disease still prevalent; prices stationary.
Lucknow („ „)	Sadr, 1·4; Maliabad, 1·1; Mohanlalganj, 1·3	*Kharif* sowings nearly finished; bazars well supplied; cholera increasing in city and in tahsil Mohanlalganj.
Rae Bareli („ 24th)	Sadr 0·5; Dalamau, *nil;* Digbijaiganj, 0·8; Salon, 0·6.	*Kharif* sown; weeding commenced; prospects good; cholera still continues; no cattle-disease; prices steady.
Partabgarh („ 25th)	General rain throughout the district.	Prices falling; prospects good; cholera still continues in Partábgarh and Patti tahsils.
Sitapur („ „)	Rain just enough to keep ordinary crops in good condition.	Rice suffering for want of sufficient rain; cholera increasing in Sitapur tahsil; slight cattle-disease throughout the district; prices stationary.
Fyzabad („ „)	0·8	Agricultural operations in progress; cholera still continues in three tahsils.
		General Remarks.—Rainfall sufficient, except in Gorakhpur, where rain is much wanted; break wanted in Agra and Jhánsi; prospects generally good; prices stationary; cholera continues in eastern districts and is increasing in Lucknow and Sitapur, otherwise health normal; cattle-disease continues in Sitapur and Kumaun.
Punjab—(July 25th)		
Delhi ...	·60	*Kharif* sowings nearly completed; health good; prices steady.
Hissar ...	1·40 at Sadr	Health good; prices steady.
Umballa ...	·40	*Kharif* sowings in progress; health good; prices steady.
Jullundur ...	1·30	Health good; prices steady.
Amritsar ...	1·40	*Kharif* sowings continue; health good; prices steady.
Sialkot ...	1·50	*Kharif* prospects good; health good; prices steady.
Lahore ...	4·50	Health good; prices steady.
Ferozepore ...	·50 at Sadr	*Kharif* sowings continue; health good; prices rising.
Mooltan ...	4·0 at Sadr	Crops good; health good; prices stationary.
Rawalpindi ...	1·70	Crops good; health good; prices steady.
Dera Ismail Khan ...	.....	No report received.
Peshawar ...	·60	Health fair; prices rising.
		General Remarks.—Rain has fallen throughout the province; health good; prices of food-grains generally steady.
Central Provinces—		
Raipur (July 22nd)	3·45; heavy rain on 20th.	A break since; reploughing of rice-fields carried on; 10 cases of cholera in north-west; prices easy; rice 46 and wheat 29 seers per rupee.
Jubbulpore ...	6·10; incessant rain, heavy at times.	Break needed; sowings continue; cholera prevalent; prices stationary.
Saugor ...	9·13; excessive rain	Cotton and *juar* suffering, other crops favourable; prices steady; health fair.
Seoni ...	5·83; incessant rain	Weather cold and damp; rice transplantation nearly finished; cholera and cattle-disease prevalent; prices stationary.
Hoshangabad (July 25th)	7·65	Standing crops damaged; break needed; small-pox and cholera prevalent; rice 9, wheat 15, and *juar* 24 seers per rupee.
Nagpur („ 26th)	3·07	Break favourable for weeding; *kharif* somewhat suffering from incessant rain; cholera and diarrhœa prevalent.
Sambalpur ...	.....	No report received.
Khandwa ...	4·49	Sowings suffering from continuous rain; break needed; prices steady small-pox prevalent.
		General Remarks.—Incessant rain unfavourable to *kharif;* break much needed for weeding and transplanting operations; cholera somewhat prevalent; prices continue easy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(July 22nd)		
Akyab ...	19·26	Total rainfall 123·92; slight small-pox in part of the district, otherwise *public health good*: cattle-disease in four townships; sowing in progress: early crops good.
Rangoon ...	9·24	Total rainfall 41·91; public health good; ploughing commenced.
Bassein ...	7·95	Total rainfall 59·58; a few deaths from cholera in three townships, otherwise public health good; cattle-disease prevalent in the same townships; ploughing progressing favourably; planting going on in some places.
Prome ...	2·21	Total rainfall 19·11; 3 deaths from cholera in town and 12 in the district; *some* cattle-disease in *three* townships.
Amherst (Moulmein) ...	17·51	Total rainfall 109·83; 5 deaths from cholera in the district, otherwise public health good both in Moulmein and the district; cattle-disease has appeared in two townships, but is decreasing in others; ploughing and sowing still progressing.
Toungoo ...	9·65	Total rainfall 14·02; public health good; cattle-disease prevalent in two townships.
		General Remarks.—Cholera somewhat prevalent in Pegu and Irrawaddy Divisions; public health good; cattle-disease *continues*; rainfall generally abundant; agricultural operations proceeding satisfactorily.
Assam—(July 25th)		
Gauhati ...	1·65	Weather hot; rain much wanted for the transplanting of the *sali* paddy; *aus* being reaped; public health good.
Sylhet ...	2·10	The drought of last three weeks has retarded cultivation of *sali* paddy to a serious extent; tea and other crops suffering; rivers extraordinarily low for time of year.
Cachar ...	1·92	Weather excessively hot; ploughing for *sali* crops nearly finished and transplanting commenced, but rain wanted; state of *chuma* and *murali* crops good; prospects of tea outturn excellent; 1 case of cholera reported from Lakhimpur; no spreading of cattle-disease reported; common rice 21 5/16 seers per rupee.
Dibrugarh ...	0·61	Weather seasonable; transplanting of *sali dhan* commencing; *ahu dhan* being cut; public health generally good, but some cases of cholera in the Sadr subdivision; cattle-disease still reported; 44 emigrants died by the overflooding of the Subansiri.
Mysore and Coorg—(July 26th)		
Bangalore ...	1·18	Standing crops in good condition; generally more rain needed for *ragi* crops and wet cultivation; prospects of season and public health good; price of rice 11, *ragi* 25½, and horse-gram 28¾ seers per rupee.
Mysore ...	·39	Crops flourishing; public health favourable; floods in rivers subsiding.
Mercara ...	10·43	Monsoon continues; Cauvery temporarily unfordable for days together; the heavy rains have done much damage to rice-fields by washing away embankments and nurseries; numbers of cattle have died from exposure; the *ragi* crops in the Najarajpatna taluk and the coffee crops on the Sampajighat and North Coorg have suffered from excessive rain; transplanting of rice commenced; prices stationary; public health good.
		General Remarks.—Heavy rain in Hassan, Shimoga, and Kadur districts; Tungabadra flooded, inundating adjoining fields and plains, causing some damage; crops in good condition; agricultural operations continue; prospects favourable; public health reported good; ruling prices—rice 11 to 12, *ragi* 22 to 40 seers per rupee.
Berar & Hyderabad—(July 26th)		
Amráoti ...	1·24	Crops in good condition; wheat 18 and *juari* 30 seers per rupee.
Akola ...	2·28	Sowings completed; prospects favourable.
Hyderabad ...	.....	No report received.
Central India States—(July 26th)		
Indore ...	2·39	There is at last a break in the rain, and some sunshine may now revive the young maize and millet; health good.
Morar (Gwalior) ...	2·81	Health and prospects good.
Sutna ...	1·19	
Rutlam ...	.....	No report received.
Neemuch ...	9·19	Public health good.
Goona ...	8·04	Prospects fair.
Bhopal ...	8·0	Continuous rain; prospects good.
Agar ...	9·61	Health and prospects good.
Nowgong ...	7·33	Health and prospects good; prices rising.
Manpur ...	4·20	Millet and maize crops damaged by excessive rain; health good; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (July 26th)	15·67	Break since Monday.
Sirohi („ 23rd)	5·60	Weather rainy; health and prospects good.
Marwar ...	.....	No report received.
Meywar (July 23rd)	5·19	Water-supply, health, and crops good; barometer very low.
Harowti („ 22nd)	Deoli, 7·78; Kotah, 4·25; Tonk, 8·94. Previous week's rainfall—in Kotah, 6·60; Shahpura, 4·25.	Cholera at Tonk, some cases in Patan district of Bundi; prospects good.
Jhallawar (July 19th)	11·41	Weather cloudy; crops looking well; health good.
Ajmere („ 25th)	5·65	Tanks full; daily rain; prospects excellent; health only fair.
Jeypore („ „)	5·29	Prices stationary; health fair.
Ulwur („ „)	1·92	Prospects good; health good.
Nepal—		
Katmandu ...	2·16; constant rain	Transplanting of rice finished.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE FIRST QUARTER OF 1882.

No. 725R.T., dated Simla, the 20th July 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution, No. 859 R. T., dated the 22nd July 1881.
Ditto ditto ditto No. 397 R. T., dated the 4th May 1882.

Read also—

Returns of accidents to trains, &c., on the open lines of railway in India for the quarter ending 31st March 1882.

OBSERVATIONS.—As compared with the corresponding quarter of 1881, while the open mileage increased by 409 miles, or 4·3 per cent., and the train mileage by 1,253,479 miles, or 14·3 per cent., the number of accidents to trains, rolling-stock, permanent-way, &c., remained very nearly the same, being 696 against 695. The following are the railways on which the numbers chiefly vary :—

	Increase	Decrease.
Sind, Punjab and Delhi	...	42
Great Indian Peninsula	38	...
Wardha Coal	22	...
Nagpur-Chhattisgarh	12	...
Rangoon and Irrawaddy Valley	..	23
Punjab Northern	...	19
Indus Valley	...	21
Nizam's	...	11

2. The decrease on the Sind, Punjab and Delhi Railway mainly took place under "goods trains or parts of goods trains, engines, &c., leaving the rails" and "miscellaneous accidents." Under the former head there were 13 accidents against 21; and under the latter, 1 against 22.

3. On the Great Indian Peninsula Railway the accidents from collisions between "goods trains or parts of goods trains" increased from 2 to 8; and the cases of "fire in trains" from 9 to 42.

4. Of the increase of 22 accidents on the Wardha Coal Railway, 8 appear under "failure of tyres," and 11 under "fire in trains." The numbers of cases under these heads, during the first quarter of 1881, were *nil* and 1 respectively.

5. On the Nagpur and Chhatisgarh Railway there was no noticeable increase under any particular head.

6. On the Rangoon and Irrawaddy Valley Railway the number of "cattle" accidents decreased from 14 to 4, and the "failures of machinery, springs, &c., of engines," from 11 to 2.

7. On the Punjab Northern and Indus Valley Railways the decrease principally took place under "goods trains or parts of goods trains, engines, &c., leaving the rails."

8. The decrease on the Nizam's Railway was due to the absence of any accident from "fire in trains;" whereas in the first quarter of 1881 there were 10 accidents from this cause on that line.

9. The total number of accidents on the Rajputana-Malwa Railway does not show any large variation, but it appears from the details that collisions of all descriptions decreased from 10 to 1, derailments of passenger trains from 6 to *nil*, and the derailments of goods trains, engines, &c., from 11 to 1, while there were 13 cases of failure of couplings against 8, and 11 cases of failure of machinery, &c., and 8 miscellaneous accidents against *nil* in the corresponding quarter of 1881.

10. The casualties resulting from accidents to trains, &c., were, among passengers, 14 killed and 31 injured, against 9 injured; and among servants, 2 killed and 10 injured, against 3 killed and 15 injured. Of the casualties to passengers, 13 men were killed and 15 injured in an accident on the East Indian Railway at Shikohabad, on the 17th January 1882, caused by an up mail train coming into collision with an up goods train which it was following. There were 13 passengers also slightly injured in an accident on the Bombay, Baroda and Central India Railway, caused through the carelessness of the pointsman by an up mail train colliding with some wagons standing on a siding at the Viramgam station.

11. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby:—

Description of accidents.	Number of accidents.	Number of passengers and others.		Number of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains, or parts of passenger trains	1	...	...	...	...	...	...
Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line	13	13	29	...	3	13	32
Collisions between goods trains, or parts of goods trains	25	...	...	...	2	...	2
Collisions between light engines	7	...	...	...	...	...	...
Passenger trains or parts of passenger trains leaving the rails	17	1	...	...	...	1	...
Goods trains or parts of goods trains, engines, &c., leaving the rails	53	...	...	...	1	...	1
Trains or engines travelling in the wrong direction through points	24	...	...	...	...	...	...
Trains running into stations or sidings at too high a speed	4	...	...	...	...	...	...
Trains running over cattle on the line	202	...	...	...	...	...	...
Trains running over obstructions on the line	26	...	...	...	...	...	...
Trains running through gates at level crossings	17	...	.	2	1	2	1
The bursting of boilers, or tubes, &c., of engines	30	...	...	...	...	...	...
The failure of machinery, springs, &c., of engines	69	...	...	...	...	...	...
The failure of tyres	10	...	...	...	...	...	...
The failure of wheels	1	...	...	...	...	...	...
The failure of axles	10	...	...	...	1	...	1
The failure of couplings	29	...	...	...	...	...	...
Broken rails	8	...	...	...	...	...	...
The flooding of portions of permanent-way	2	...	...	...	...	...	...
Fire in trains	100	...	1	...	...	...	1
Fire at stations, or involving injury to bridges or viaducts	7	...	...	...	...	...	...
Other accidents	41	..	1	...	2	..	3
Total	696	14	31	2	10	16	41

12. The satisfactory feature of the present returns is the decrease from 114 to 53 in the number of derailments of "goods trains, or parts of goods trains, engines, &c." The railways on which these accidents chiefly diminished have already been alluded to.

13. The cattle accidents numbered 202, of which 40 occurred on the South Indian, 29 on the Rajputana-Malwa, and 26 on the Indus Valley and Kandahar Railways.

14. There were 30 cases of the "bursting of boilers or tubes, &c., of engines," against 29. 90 per cent. of these accidents took place on the Sind, Punjab and Delhi and Indus Valley and Kandahar Railways, there being 17 or 57 per cent. on the former, and 10 or 33 per cent. on the latter.

15. The "machinery, &c., of engines" failed in 69 instances, of which 11 were on the Rajputana-Malwa Railway, and 30 on the Indus Valley and Kandahar Railways.

16. The number of "failures of couplings" was the largest on the Rajputana-Malwa Railway, being 13 out of a total of 29.

17. Under "fire in trains" the number of accidents rose from 45 to 100, or by 55, of which 42 occurred on the Great Indian Peninsula Railway, and 12 on the Wardha Coal Railway. On the former there were 42 accidents against 9, and on the latter, 12 against 1.

18. The casualties to passengers from "causes other than accidents to trains, &c.," were—

	Killed.	Injured.
From falling between carriages and platforms	3	2
Falling on to the platform, ballast, &c., when getting into or out of trains	1	5
Whilst crossing the line at stations	2	...
Falling out of carriages during the travelling of trains	4	18
Other accidents	...	1
Total	10	26

And the accidents to servants in the employ of railways or of contractors, whilst performing duties connected directly with the transit of passengers and goods, from "causes other than accidents to trains, &c.," were—

	Killed.	Injured.
During shunting operations	1	8
Falling off engines, vans, wagons, &c.	3	9
Coming in contact with over-bridges, &c., during the travelling of trains	1	2
Coming in contact, whilst shunting, with vehicles, &c., standing in adjoining lines	1	...
Getting on or off trains, engines, &c.	5	7
Whilst loading, unloading, or sheeting	1	14
Whilst braking, spragging, or chocking wheels	...	1
Whilst working at cranes or capstans	1	2
Whilst working on the permanent-way or in sidings	4	2
Whilst walking along the line on the way home, or to work	4	2
Whilst walking, crossing, or standing on the line	9	6
Whilst passing between vehicles	1	...
Whilst attending to the machinery of engines, cleaning them, &c.	...	6
Whilst attending to gates at level-crossings	1	...
Falling or being caught between vehicles and platforms	1	1
Falling off ladders, scaffolds, platforms, &c.	1	1
By the falling of lamps, wagon doors, timber, weights, &c.	...	3
Whilst coupling or uncoupling wagons	3	6
Miscellaneous	4	30
Total	41	100

19. Of "other persons" killed and injured by running trains, &c., 3 were killed and 1 injured whilst passing over the line at level-crossings; 25 killed and 6 injured whilst trespassing on the line; 4 committed suicide; and 2 were killed and 2 injured from miscellaneous causes.

20. The following table exhibits the total numbers of persons killed and injured from causes connected with the working of trains as compared with those in the previous corresponding quarter :—

	1st Quarter 1881.		1st Quarter, 1882.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	2	10	14	29
From misconduct or want of caution	10	19	10	28
Servants.				
From causes beyond their own control	7	26	3	25
From misconduct or want of caution	39	87	40	85
Others.				
Whilst passing at level-crossings	2	3	3	1
Trespassers, including suicides	23	6	29	6
Other persons	6	...	2	2
Total	80	151	101	176
Total Train Mileage during the quarter	8,751,471		10,004,950	

21. In addition to the above, 5 persons are reported to have been killed and 23 injured in yards, workshops, &c., and 170 passengers to have met death in carriages at stations from causes unconnected with the working of trains.

22. The following is extracted from the report by the Government Inspector on the fatal accident, which took place on the East Indian Railway, near Shikohabad, on the 17th January 1882 :—

Para. 20.—From the evidence heard, the facts of the case, so far as for present purposes it is desirable to record them, appear to be as follows :—

21. The morning of the 17th January was very foggy from Jaswantnagar as far as Shikohabad, and its intensity appears to have increased towards the latter station.

23. No. 17 up goods, which was timed to leave Bhadan at 3-36 A.M., actually left that station at 6-35 A.M. On this point there is no conflict of evidence.

24. On leaving Bhadan it had 27 covered goods wagons, one open low-sided wagon (No. 4667), and one brake-van (No. 159) arranged as in the margin.*

* Rear 159 (brake-van), 5109, 7121, 7016, 2075, 7826, 3843, 4168, 6679, 3382, 2511, 7210, 4427, 4556, 6608, 4409, 7831, 7474, 6346, 2639, 6149, 895, 5326, 2956, 2119, 3025, 6874, 5561, and 4667 (open low-sided) in front of train.

25. The gross load, calculated in the ordinary manner at 15 tons per wagon, with 10 tons for the brake-van was 430 tons. The actual gross load above Phaphund, where one wagon was cut off, is said by the District Traffic Superintendent to have been less than 399 tons. This was not stated before the Magistrate, but in reply to a telegraphic enquiry from me, the computed load was 445 tons above that place.

By the working Time-table the time to be occupied by No. 17 up goods in running between the stations of Bhadan and Shikohabad is 38 minutes, and at this timing it should have reached the latter station at 7-13, and the point of collision, as calculated in paragraphs 18 and 19 above, at 7-10.

26. The mail train should have left Bhadan at 5-35 A.M., and reached Shikohabad at 6-3, but it was running late, and did not leave till 7-3, (or 7-5 according to the guard's timing), when it went on a caution message, on which was noted the following calculation :—

No. 1 goods left Bhadan	6-35
Time allowed for run	38
Due at Shikohabad	7-13
No. 1 up mail to leave	7-5
Time allowed for run	29
Due at Shikohabad	7-34

This train consisted of two brakevans and 19 other vehicles.

27. The Train Departure Book of the Bhadan station gives 7-3 as the actual time of leaving, and the Shikohabad Station Book also records this hour as the one signalled from Bhadan. The receipt for the caution message signed by the guard and driver gives 7-3 as the hour, and thus differs from the time on the caution message itself, but the "3" looks as if it had been altered from some other figure. The guard himself gives 7-5 as the hour of starting by his watch, and thinks the figure has been altered on the receipt since he signed it.

28. At a little more than a mile from the Shikohabad station the mail caught up the goods train, and as the fog prevented the driver of the following train seeing the other, the collision occurred, with the results given above as to vehicles.

29. The casualties were five male and five female adults, one boy and one girl, all natives, killed; nine male and three female adults and two girls, all natives, wounded, of whom one has since died. The European guard of the goods train was seriously hurt, but has now nearly recovered. He escaped by jumping out just before the collision. The guard of the mail train was very slightly hurt.

84. A good deal was afterwards said about the driver being bound to exercise his discretion, but the general impression on the part of this witness appeared to be that a driver could not be blamed who did not, under the circumstances named, exceed the authorised pace. The driver himself said that he could not have justified himself to his superior for losing time.

85. As I have endeavoured to show above, I believe he was running in excess of the ordinary speed, but even if he were only running at that speed, I should still think that he had not exercised the caution which the mere receipt of a caution message implies, it being impossible at the time to keep a look out ahead to any practical purpose.

86. I may add here that at the close of the enquiry this driver was committed for trial. Some of the points, now in doubt, will probably then be cleared up.

The driver of the mail train was acquitted by the High Court, Allahabad. The railway authorities, recognising the necessity for a modification of existing rules in the case of trains following in foggy weather, issued a revised working order for the guidance of drivers in such cases.

Resolution.—The attention of the Government, Administration, and Officer concerned should be invited to the large increase in the number of cases of "fire in trains" on the Great Indian Peninsula and Wardha Coal Railways, the large number of "failures of machinery, springs, &c., of engines" on the Indus Valley and Kandahar Railways, the "failures of tyres" on the Wardha Coal Railway, and the "failures of couplings" on the Rajputana-Malwa-Railway.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, British Burma and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India and Beluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Order.—Ordered, that this Resolution be forwarded to the Governments, Administrations and Officers, noted in the margin, for information, together with copies of the returns compiled.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the abstract returns, be published in the Supplement to the *Gazette of India*.

Fred. FIREBRACE, *Major, R.E.*,
Under-Secretary.

TABLE No. I.

GENERAL TOTAL.

NUMBER of PERSONS reported during the First Quarter of 1882 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control, and ACCIDENTS happening otherwise.

INUNDATION CANALS. Upper Sutlej Division	...	...	...	...	...	...	Lahore ...	500	...	...	Detail not available for want of establishment.	...	The increase in the returns of the Inundation Canals is due to the irrigation of the Muzaffargarh Division, which was not included in last year's return. The decrease elsewhere is due chiefly to the late rise of the Sutlej river. In the Lower Sutlej and Chenab Division the Sutlej has been low, but the Chenab Canals worked well on both banks. There is a very large area under indigo.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

MUNICIPAL ELECTIONS IN RANGOON.

No. 287—7R.M., dated Rangoon, 10th July 1882.

From—E. S. SYMES, Esq., Junior Secretary to Chief Commissioner, British Burma,

To—The Secretary to the Government of India, Home Department.

I am directed to submit, for the information of the Government of India, a copy of the papers cited in the margin, on the subject of the recent election of members for the Rangoon Municipal Committee.

General Department Notification No. 38, dated the 26th January 1882.
Letter No. 631½, dated 27th June 1882, from President, Rangoon Municipality.
General Department Notification No. 234, dated the 29th June 1882.
Letter No. 286—7R.M., dated the 10th July 1882, to President, Rangoon Municipality.

No. 38, dated Rangoon, 26th January 1882.

NOTIFICATION—By the Chief Commissioner, British Burma.

I.—Under section 5 of "The British Burma Municipal Act, 1874," the Chief Commissioner directs that 18 of the inhabitants of Rangoon, to be appointed by election, shall be a committee for carrying out the purposes of the said Act in Rangoon.

II.—In addition to the 18 members appointed by election as aforesaid, the number of *ex-officio* members, appointed by the Chief Commissioner under section 7 of the Act, shall be six.

III.—Under section 8 of the Act the Chief Commissioner appoints the Deputy Commissioner of the Rangoon Town District to be President of the Rangoon Municipal Committee.

IV.—Under section 5 of the Act the Chief Commissioner makes the following rules regulating the election of members of the Rangoon Municipal Committee, namely,—

1. The first election held under these rules shall be held on or about the last Friday in the month of May 1882. Every subsequent election shall take place on the dates below mentioned, that is to say,—

the general elections shall take place on or about the last Friday in November 1884 and of every subsequent second year so that the newly-elected members of the committee may take their seats on the 1st January following the date of election;

elections to fill vacancies shall be held on some date following the casualty to be notified by the President, provided that no longer period than 30 days shall elapse between the occurrence of any vacancy and the election. A vacancy shall be held to date from the time that written note of the occurrence of such vacancy may be made by the President in the records of the committee.

2. Members shall be elected to represent the different communities and bodies which compose the population of Rangoon, that is to say,—

		Members.
(*a*)	by the Europeans, Americans, Eurasians, Armenians, Jews, and Parsis shall be elected	5
(*b*)	by the Burmese	5
(*c*)	by the Chinese	2
(*d*)	by the Mussulmans	2
(*e*)	by the Hindus	2
(*f*)	by the Port Commissioners, Rangoon	1
(*g*)	by the Chamber of Commerce, Rangoon	1
	Total ...	18

3. The qualifications for a voter at a municipal election shall be—

that he or she be over 21 years of age;

that he or she be possessed of property within municipal limits to a value of not less than Rs. 500, or pay a monthly rental of not less than Rs. 10, or pay rates and taxes to an amount not less than Rs. 5 a year.

4. Any company registered under the Indian Companies Act, 1866, which has paid up its rates and taxes shall be allowed one vote for any community that it shall declare itself as belonging to; such vote to be given through some duly authorised officer of the company.

5. The qualifications required from a candidate for election shall be—

(*a*) that he be over 21 years of age;

(*b*) that he be a duly enrolled voter for some community;

(*c*) that he shall have paid up all rates and taxes due on his behalf up to the end of the quarter next preceding the date of his offering himself for election;

(*d*) that he shall have been requested to stand by any number of duly registered voters of his community not less than 12; such requisition to be in writing;

(*e*) that he shall be possessed of house property of a value not less than Rs. 5,000, or that he shall rent land or house property within the limits of the municipality of a monthly rental not less than Rs. 50, or that he shall be a payer of rates and taxes to an amount not less than Rs. 60 a year;

(*f*) that he does not hold any paid office under the Municipality.

6. No person shall be qualified to be, or continue to be, a member of the committee who is or who becomes a bankrupt or insolvent, or who is interested (otherwise than as a shareholder in a joint-stock company) in any contract with the committee; and no person who is absent from Rangoon for three months consecutively, or who is sentenced to imprisonment for any non-bailable offence, shall be qualified to continue as a member of the committee. In case of the death, resignation, or disqualification as aforesaid of any elected member of the committee, his successor shall be elected in the manner hereinafter provided, and such elected member shall remain on the committee for the residue only of the term for which the member deceased, resigned, or qualified was originally elected.

7. Each voter shall give one vote for each vacancy among the representatives of the community to which he may belong. But no voter may give more than one vote for any one candidate. Voters of mixed nationality shall be allowed to select either of the two communities with which they are connected in which to vote; but no elector shall vote in more than one community, nor, having recorded himself as belonging to any one community, shall a voter be allowed to change.

8. The President of the municipal committee shall prepare, as accurately as he can, a list of all persons qualified to vote for any community, and also a list of all persons qualified, under clauses (*a*), (*b*), (*c*), (*e*), and (*f*) of Rule 5, to become candidates for election to the municipal committee, and shall publish such lists in at least three issues of two or more of the local newspapers not less than four weeks before the day fixed for each general election. Any person whose name is not on those lists, or whose name is upon a wrong list, may apply, either before the publication of the lists in any year, or within fourteen days of the first publication of such lists, to have his name entered in any list or to have his name transferred from one list, to another. The President, if he sees no valid objection, and if he deems the applicant duly qualified, shall comply with such application. If the President does not deem the applicant qualified, he shall lay the case before an election sub-committee of the outgoing members. If the said sub-committee decide by a majority against the applicant, they shall reject the application, and such rejection shall be final so far as concerns the election next following after the rejection.

9. Votes shall be rendered by means of voting-papers, and the expenses of elections, as may be determined by the President, shall be defrayed by the municipality. The President shall notify, in three or more issues of the English and Vernacular local newspapers, at least 14 days before the day appointed, the date upon which, and the places where, voting-papers can be obtained and where the polls shall be established for the collecting of the voting-papers for each community, and the names of qualified candidates who have obtained for any community the further qualification described in clause (*d*) of Rule 5. On the day fixed the polls shall be open from 8 A.M. until 4 P.M. The papers shall contain in writing the name of the person voting, the community he belongs to, and the candidate for whom he votes. The voting-paper shall be stamped by one of the tellers present and placed in a locked box, and at the end of the day lodged in the municipal office. The President shall appoint gentlemen to act as tellers to watch the ballot during the day of the elections. The boxes shall be strongly fastened with a Chubb's lock, the key of which shall be in charge of the President or Secretary, and the boxes shall be opened and the votes sorted by an election sub-committee of the outgoing municipal committee to be appointed for the purpose.

10. The results of the sorting of the votes shall be published by the President within 48 hours of the closing of the poll. And the names standing highest on the poll for each community shall, subject to any alteration made in accordance with the next following rule, be the elected members for each community.

11. At any time within four days of the day of the poll any qualified voter may make in writing to the President an objection against the vote of any voter being recorded. Such objection shall be considered by the President and the election sub-committee of the outgoing committee. If such objection be held valid by a majority of the election sub-committee, or by one-half the members of the sub-committee and the President, such voter's name shall be expunged from the sorter's list, and if necessary, the order of candidates in the published list shall be modified in accordance with such alteration.

12. If any community shall at any time fail or omit to elect its allotted number of Commissioners, the local Government may appoint one or more Commissioners in place of the number deficient to complete the full number allotted.

13. If an equal number of votes shall be given for any two candidates within any community, and the addition of a vote would entitle any of such candidates to be elected, then such additional vote shall be given by the President.

14. Members chosen to represent the Chamber of Commerce and the Port Commissioners shall be elected in such way as each of those bodies respectively may determine. A certificate under the signature of the Chairman of each body shall warrant the President in [illegible]ing the name mentioned in such certificate in the list of elected members.

15. After the period allowed for objections under Rule 11 shall have expired, the President shall certify to the Chief Commissioner the names of the elected members for each community or body; and the names of the members of the municipal committee for the ensuing term shall be notified in the *British Burma Gazette*.

No. 631½, dated Rangoon, 27th June 1882.

From—K. G. BURNE, Esq., President, Rangoon Municipality,

To—The Secretary to the Chief Commissioner, British Burma.

I have the honour to submit the following report, descriptive of the measures adopted by the Committee and the expenses incurred in giving effect to the scheme for constituting Municipal Boards by election, in lieu of the present system of nomination hitherto observed in this province, and the interest manifested among the different communities of this town, notably the Burmese.

2. As soon as the rules for "Election of members," drafted by the Committee, were approved of by the Local Government, the work of compiling the voters' list was at once commenced, and the lists published without delay.

3. The practice in existence in England for the preparation of voters' lists was *mutatis mutandis* followed here, but a change had to be made on its being pointed out that the system acted on was not in accordance with Rule 8 of the Election Rules.

4. The lists had to be prepared afresh, and republished, but not in time to give the notice required by the same rule.

On this being represented to the Local Government, the election day was postponed from the 23rd of May to the 23rd of June. Although the mistake made in the first preparation of the lists is to be regretted on the score of expense, the postponement may otherwise be regarded with satisfaction, as it gave the people more time to prepare for the coming contest, and considerably more interest was kindled after the second publication than was shewn previously.

5. For purposes of identification the preparation of the lists by wards appears to be preferable to that of separation into communities, as such lists when once correctly made out, and altered from time to time, as occasion may require, would be of great value, not only at election time, but in checking the work of the Thoogyees.

6. As the lists had to be prepared from the assessment rolls in the vernacular, considerable difficulty was experienced in identifying the English and Indian names, owing to the almost impossibility of arriving at any accurate rendering of foreign names into the Burmese character.

7. As regards the names of the European and Burmese communities, few alterations had to be made in the lists, and only in regard to the former.

8. On the whole the lists in English and Burmese were correctly transcribed; and it is curious that although the lists printed in Burmese type at the Burma Herald Press was from the English list, it was not so correct as the latter, thus showing that after a word has been written a few times in different characters the originality, if not entirely lost, is impaired.

9. Simultaneously with the publication of the lists, a time was fixed by the Committee, within which objections might be made to the lists as they stood; and although at first little or no interest was evinced by the general public, a healthier state of things soon set in, and numerous applications were made by persons considering themselves entitled to vote to have their names added to the lists, and a few objections were raised to names already there. The President, aided by an election sub-committee, sat to decide upon all these points.

10. The applications were mostly from a large class of persons resident in Rangoon, and whose names did not appear on the lists, as they neither paid taxes nor rent, but it was contended that they did so indirectly.

The classes were divided into four, namely:—

(1) Employés living rent-free in houses belonging to their employers, such privilege being considered as a part of the salary paid.
(2) Persons chumming together.
(3) Board and lodgers.
(4) Persons residing in clubs.

The claims of the above persons were, after due consideration, admitted under the following conditions:—

(1) *Employés.*—That the monthly rental value of the house belonging to the employer and occupied by the above be not less than Rs. 10, or that the employé's salary be not less than Rs. 100 per mensem.

(2) *Chummeries.*—That persons living together for not less than one month are entitled to vote, provided the rent paid, if equally divided between them, proved sufficient to qualify each person under rule 3 or 5.

(3) *Board and lodgers in private houses or hotels.*—That the stay be not less than one month, and that one-fifth of the charge made for board and lodging in respect to each person is sufficient to qualify under rule 3 or 5.

11. It was also decided that the word "property" referred to in Rule 3 applied to moveable as well as immoveable property, the definition of property as given in the Civil Procedure Code being followed.

It was considered by many that this ruling opened the door for faggot voting; whether it did so, or not, the ruling was, under the circumstances undoubtedly correct, and it was for the President and election sub-committee to decide as to the *bonâ fide* character of each person's claim before admitting the vote. As a matter of fact no advantage was taken of the ruling.

12. Every publicity was given in regard to the measures to be adopted for carrying out the elections; and if any person qualified to vote did not take the trouble to record it, the blame rests upon that person, and not upon the Committee.

13. Under the rules each voter is allowed one vote for each vacancy, among the representatives of the community to which he or she belongs, and as many tickets as there were vacancies in each community were issued; the tickets for each community bore a distinguishing colour.

To suit the convenience of voters, many tickets were issued on application some time previous to the day of the elections; but this led to such extraordinary abuse, that further issue had to be stopped, and all tickets already issued cancelled, and each voter compelled to appear personally at the polling station set apart for his or her quarter, and there to receive one ticket, on the back of which the names of the candidates voted for were written and received back by the tellers.

14. This subsequent alteration met with the entire approval of all right-minded persons, although it was regretted that the change had to be made so shortly before the election day. It had the advantage too of not only checking malpractices, but of making people acquainted with the name of the quarter in which they lived, concerning which many were strangely ignorant.

15. Polling stations were erected at the following places:—

(1) Kemendine.
(2) Junction of Keighly Street and Commissioner's Road.
(3) Junction of Canal Street and China Street.
(4) Ripon Hall.
(5) Poozoondoung.
(6) Municipal Office.

These stations were fixed with due regard to the convenience of voters, and no complaint has been made of the inconvenient distance any voter had to travel to vote.

One voting box was deemed sufficient for all the stations, except the Ripon Hall, where three boxes were placed.

The boxes were secured by Chubb's patent locks.

16. Tellers were appointed for each station, and were assisted by the Thoogyees of the different circles. Rules were drawn up for their guidance.

The Committee sanctioned the disbursement of two goldmohurs a piece to each of the tellers for the duty to be performed, and, taking into consideration the fact that they were in attendance from 8 A.M. to 4 P.M. and again from 4 P.M. until 7-30 P.M., the fee was not excessive, and was well earned by each one.

17. After the second publication of the lists, the Rangoon people began to bestir themselves. A committee was formed by the European community, and canvassing freely carried on.

18. Several meetings, which were largely attended, were held, and they afforded convincing proof of the favour in which the new departure from the hitherto recognised system under which Municipal Government had been carried on was held by the public.

The local press by their criticisms kept up the excitement which waxed warmer as the eventful day approached.

The competition for a seat on the new board was keen amongst the Burmese, whose candidates adopted various means for securing their return, and a free bestowal of money and entertainment of voters was largely resorted to.

19. The tellers were at work punctually at 8 A.M., but the real work of the day did not commence much before noon.

20. Special precautions were taken for preserving the peace. An additional force of constables with three mounted inspectors, Messrs. Molloy, Stuart, and Pusey, patrolled the streets; besides these, four constables were on duty at each of the polling stations to keep order.

21. The police had orders to disarm quietly all persons parading the streets with dahs or other deadly weapons,—a necessary precaution on an occasion of this kind, especially so as rumours were afloat of an intention on the part of certain evil-disposed persons to create a disturbance.

22. The day which was observed as a general holiday, however, passed off quietly; and to the great credit of the town, and the police on duty, no breach of the peace occurred.

23. Commencing from about 10 A.M. until dark crowds paraded the streets, and the polling stations were well patronised by all classes, each voter evincing the greatest eagerness to record his or her vote.

Every man, woman, and child was decked out in holiday attire, and every one brimful of good humour, and bent on making most of the holiday.

24. A large number of hackney carriages were engaged for the occasion at from Rs. 4 to Rs. 5 for the day to convey voters to the poll, and were placarded "Hired for voters only"; this was done by the Burmese as well as the European community, and the drivers reaped a good harvest. Carriages carrying flags and musicians were considered a necessary part of the proceedings.

25. There was a fair number of female voters at the poll bent on exercising "women's rights."

26. They showed themselves to be not one whit behind the men in their attempts at "hocussing" in order to obtain an unlimited number of voting papers; and the same man or woman with solemn countenance applying three or four times over at the ticket window, under the plea of never having received a voting paper, was by no means infrequent, and no doubt afforded amusement enough to them, but not to the tellers.

One case of cheating was brought to notice at the China Street polling station, where a voter was caught *flagrante delicto* changing the name of a candidate voted for for another candidate after his own heart. He had got the ticket from another under some pretext, and his action roused against him strong indignation; and had the police not been there, it is possible he would have been taught a lesson by the crowd.

27. The great crush was at China Street; and it is probable that during the rush which was made shortly before 4 P.M. several were prevented from voting.

28. The accommodation at this station was perhaps hardly sufficient. It would be an advantage to allow the polling stations on the next occasion to be opened at an earlier hour than fixed upon this time or to close later.

29. Immediately on the closing of the poll, the boxes were conveyed to the Municipal Office, and the sorting commenced under the direction of the President and a Member, Mr. Darlington and the Secretary, assisted by the tellers.

The sorting was completed by 7-30 P.M., and the number of votes recorded for each community was shown to be as follows:—

Europeans	...	...	...	...	...	2,062
Burmese	...	...	...	...	...	7,505

The contest lay between the Europeans and Burmese, as the representatives of the other communities were returned unopposed.

30. The result had to be declared within 48 hours, and 5-30 P.M. on the following day, Saturday, was fixed for the publication of the names of the successful candidates, and some time before the appointed hour a large and enthusiastic crowd assembled outside the Municipal Office which was gaily decorated for the occasion, impatient to know "who had got in"

The presence of the band of the 11th Madras Native Infantry helped to enliven the scene.

31. Punctually at 5-30 P.M. the names of the candidates, with the number of votes obtained, were read out in the order gained, and they were as follows:—

European, &c., Community.

C. R. Cowie	366	votes	S. Vertannes	157	votes.
Dr. T. F. Pedley	354	„	Dr. H. Godbier	79	„
J. Stuart	313	„	J. A. Cohen	74	„

Hindoo Community.

Bugwan Doss. | P. C. Sen.

and the successful candidates were loudly cheered.

Each one was prevailed upon to address the crowd, and the utterances of the Chinese Member met with marked approval by all; but as the oration was in Chinese, and none of the Chinese could be detected in the crowd, the pleasure which his appearance on the balcony gave arose more from admiration for his pluck, in addressing so large and mixed an audience, than from any ability to understand what he said.

32. The declaration of the poll brought to an end the first election held in British Burma, and the interest which this trial system has evoked on all sides augurs well for Rangoon, and the day will be remembered as marking a decided step forward in the march of civilisation among the inhabitants of this town.

33. The total cost of the election amounts roughly to Rs. 7,820-13-2. The cost has exceeded, perhaps, first anticipations; but taking into consideration the expense incurred in republishing the lists, and the many other expense incidental to a first election, the expenditure is not excessive, and with material on hand, and experience gained on all sides, the expense on the next occasion should be considerably lessened.

The published lists will not only be a valuable guide when the next election takes place, but will be of some service to the Assessment Committee.

34. A charge of bribery and corruption was brought by certain Members of the Burmese community, some of whom were the defeated candidates, and investigated by the President and Election Sub-Committee and thrown out as groundless.

A scrutiny of the votes has been demanded by one of the European defeated candidates; but besides the above, no complaints have been made, and it is a matter for congratulation that everything in connection with the elections has passed of so well.

35. It is a question for future consideration whether it would not be better to give one community the right to vote for another community, and to make a knowledge of the English language a necessary qualification.

36. It only remains to notice the labours of those who have been instrumental in bringing about the successful result as shown on Friday, 23rd June 1882.

37. To Mr. C. J. Brown, the Secretary to the Committee, the Committee tender their best thanks for the unwearied attention he has given in carrying out their orders. The work has been arduous and trying, and the twice preparation of the lists, comprising 14 large volumes, involved no slight labour, which was cheerfully and creditably performed by Mr. Brown and his subordinates, among whom the head clerk, Mr. Wales, the Akoonwoon Moung Tso, and his assistant Moung Chit, deserve special notice.

The Committee also tender their thanks to Mr. Hall, the Officiating Executive Engineer, for the work done by him.

The Committee also desire to recognise the satisfactory manner in which the tellers, Messrs. Coleman, Lenaine, Wales, Jordan, Ward, Finucane, Riddock, Savage, Moung Shway Tso, Abdool Gunny, Moung Chit, Moung Nyo Htoon, Syad Azim Moideen, Mogan Dass, Moung Po Oung, and Mahomed Ally did their work.

No. 234, dated Rangoon, 29th June 1882.

NOTIFICATION—By the Chief Commissioner of British Burma.

In accordance with the recommendation of the present Municipal Committee of Rangoon, an election has been held of members to represent the inhabitants of Rangoon on the Municipal Committee. The newly constituted Committee will take charge of their duties with effect from such date in the beginning of July 1882 as the President of the Committee can arrange for convening the first meeting of the new Committee. From that date the resignation of the members of the present Committee will be accepted, and the Chief Commissioner takes opportunity to thank the outgoing Committee and their predecessors in office for the great public services they have done to the town of Rangoon and to the Local Government. Among the more important recent acts of the outgoing Committee was their resolution of last autumn, that for the future the municipal affairs of the town of Rangoon should be managed by an elective Committee.

The members of the new Committee are—

1.	Oo Nyon	who were elected by the Burmese community out of 17 candidates and who polled from 955 to 761 votes apiece.
2.	Moung Po Myin	
3.	Moung Myat San	
4.	Moung One Gaing	
5.	Moung Kywet Nee	
6.	Mr. C. R. Cowie	who were elected by the European community out of 11 candidates and who polled from 366 to 291 votes apiece.
7.	Dr. T. F. Pedley	
8.	Mr. J. Stuart	
9.	Mr. Sherlock Hare	
10.	Rev. Dr. J. E. Marks ...	
11.	L. Shain Tuck	who was returned by the Chinese community without contest.

12. No second representative was chosen by the Chinese community.

13.	Mr. P. C. Sen	who were returned without contest by the Hindu community.
14.	Lalla Bugwan Doss	
15.	Aga Ahmed Ispahany ...	who were similarly returned by the Moslem community.
16.	Ibrahim Agjim	
17.	Mr. F. C. Kennedy	who was chosen by the Chamber of Commerce.

18. No representative has as yet been returned by the Port Commissioners.

In accordance with section 7 of the British Burma Municipal Act, 1874, the Chief Commissioner appoints the undermentioned *ex-officio* members of the Municipal Committee, namely,—

		Name of present incumbent.
19.	The Deputy Commissioner of Rangoon. ...	Major M. C. Poole.
20.	The Senior Civil Surgeon of Rangoon.	Surgeon-Major H. Griffith.
21.	The Principal of the Rangoon High School.	Mr. J. H. Gilbert.
22 & 23.	The two Senior Honorary Magistrates of Rangoon, who are at the same time Loogyees of the Shway Dagone Pagoda.	Oo Po Gyee. Oo Po Hnyin.
24.	The Akoonwoon of Rangoon Town District.	Moung Shway Waing.

Under the notification of the 26th January 1882, the Deputy Commissioner of Rangoon will be President of the Municipal Committee of Rangoon until such time as the members of the Committee shall exercise the power of electing one of themselves to be President. From the date of such election being sanctioned by the Chief Commissioner, the Deputy Commissioner, unless he should be chosen by his colleagues to be their President, will be allowed to resign the office of President of the Rangoon Municipal Committee.

No. 286—7R.M., dated Rangoon, 10th July 1882.

From—E. S. SYMES, Esq., Junior Secretary to the Chief Commissioner, British Burma,
To—The President of the Rangoon Municipality.

I am directed to acknowledge the receipt of your letter No. 681½, dated the 27th June, submitting a report of the measures adopted for the recent election of members for the Municipal Committee. I am to express the Chief Commissioner's acknowledgments of the trouble taken by the late Committee in the management of the elections; and to convey his congratulations on the results of the first popular election held in Burma. The interest in the matter displayed by the Burmese is especially gratifying as an earnest of the success likely to attend the planting of popular institutions in this province.

2. Some mistakes inseparable from a first attempt of the kind were no doubt made, and the expense incurred was heavier than might have been expected. The experience now gained will be valuable in showing the way to avoid similar errors on future occasions. At the next election in 1884, the rules for election may perhaps require modification in some particulars. Any representations which the newly elected committee may see fit to make in this regard will receive due consideration.

No. 116, dated Simla, 2nd August 1882.

From—A. MACKENZIE, Esq., Secretary to the Government of India, Home Department,
To—The Chief Commissioner of British Burma.

I am directed to acknowledge the receipt of your letter No. 287—7R.M., dated the 10th ultimo, and enclosures, including a report by the President of the Rangoon Municipality giving an account of the proceedings in connection with the recent election of members for the Municipal Committee of that town.

2. In reply I am to say that the Governor General in Council has perused these papers with much interest, and desires to express his gratification at the success which has attended these elections, which are the first that have been held in British Burma.

3. With reference to paragraph 18 of the report, I am to enquire whether in your opinion any special measures are likely to be required to prevent the payment and treating of voters on future occasions. Possibly the knowledge that such proceedings are not allowable would be sufficient to put a stop to these irregularities on the part of the Burmese candidates, who alone are described as having had recourse to them.

A. MACKENZIE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1st AUGUST 1882.

GENERAL REMARKS.—The rainfall in the extreme south-west of the Madras Presidency and in Coorg has continued to be very heavy. In other parts of the Presidency it has been comparatively light. It has also been light in the Nizam's Territories. In Berar it has been light in the western and heavy in the eastern part. In the Bombay Presidency there has been a partial break in the rains in a few districts, while in others a fair amount of rain has again fallen. In the Central Provinces heavy showers have continued in some districts and fair rain in others.

The Central India and Rajputana States have continued to receive good rain; so also the Punjab and the Rohilkhand, Meerut and Agra Divisions of the North-Western Provinces. In other parts of these Provinces and in Oudh the rainfall has been light. In Bengal rain in varying quantities has fallen in all districts. In Assam the rainfall is reported to be insufficient. In British Burma the falls have been good.

General prospects may be characterised as favourable throughout the country. There is, however, a marked want of rain for rice transplantation in Assam, Bengal, and the eastern parts of the North-Western Provinces. Other crops in the two latter Provinces are doing well. In the Punjab the *kharif* sowings are still in progress in some districts, while in others they have germinated; general prospects are good. In Rajputana and Central India young standing crops have in parts suffered from excessive rain, but prospects are favourable on the whole. In the Central Provinces also the young crops are doing well, and here too a break in the weather is needed for weeding.

In the Bombay Presidency sowings have been almost completed, transplantation of rice crops is in progress, and all crops are doing well, save in parts of the Poona district where more rain is needed. In Berar the *kharif* crops are promising. In the Nizam's Territories they are still being sown. In the Madras Presidency crops have in some districts been somewhat damaged by floods, and in others they require more rain; but general prospects are fair. In Coorg the heavy rains have injured crops, roads, and health; rice transplantation in the more southern parts is proceeding. In British Burma ploughing, sowing, and transplanting are in progress.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Aug. 3rd)		
Bellary ...	·71 (average of seven stations).	Standing crops generally good, but dry partially withering and worm-eaten; agricultural operations progressing.
Kurnool ...	·26 (average of six stations).	Crops sprouting well; rain much wanted; floods in Tungabadra subsiding; cattle-disease in parts.
Ganjam ...	·65 (average of ten stations).	Standing crops thriving; harvest gingelly, outturn poor; small-pox and cattle-disease exist; cholera subsiding.
Kistna ...	·56 (average of eleven stations).	Standing crops fair, but flooded in seven taluks; small-pox and cattle-disease exist.
Chingleput (Madras) ...	·96 (average of nine stations).	Standing crops good under large tanks and channels; agricultural operations progressing.
Coimbatore ...	·52 (average of seven stations).	Standing crops generally good, though dry damaged by rain-floods and insects in certain taluks; dry crops want rain in parts of one taluk; harvest dry crops, yield about average; small-pox and fever in parts.
Tanjore ...	·92 (average of eight stations).	Standing crops generally good, though damaged by breaches in six taluks; cattle-disease in parts of one taluk.
Madura ...	·30 (average of two stations).	Standing crops fair, but withering in one taluk; harvest paddy in one taluk; cholera in parts.
Malabar ...	12·26 (average of fourteen stations).	First crop partially destroyed by heavy rain; cholera, fever, and cattle-disease in parts, small-pox more general.
Travancore ...	5·43	Rice cultivation greatly damaged by floods; fever slightly prevalent. *General Remarks.*—General prospects fair.
Bombay—(Aug. 2nd)		
Kurrachee ...	No rain	Fever in five talukas; 1 case small-pox in Tatta taluka; river on 31st 18 feet 11 inches against 15 feet 7 inches last year; much damage to crops by floods; wheat, red rice, and *bajri* in Kurrachee 28, 36 and 32, in Kotri 30, 32 and 44, in Tatta 24, 36 and 40, and in Mirpur Botoro 22, 44 and 40 lbs. per rupee, respectively.
Hyderabad ...	Rain in seven talukas, average fall 1·31; in Hyderabad 1·96.	River in flood; fever in Mirpur taluka; small-pox in Mandiaro taluka; wheat 25, *juari* 45, *bajri* 40, red rice 31½, and white rice 22 lbs. per rupee.
Ahmedabad ...	·61	Total rainfall 25·84; sowing continues; transplantation of rice commenced in some talukas; in Ahmedabad city 3 cholera cases, 2 fatal; wheat 27 and *bajri* 30 lbs. per rupee.
Baroda ...	·37	Total rainfall 29·41; cholera abating at Manekwara, but has appeared at Amreli; *bajri* 29 and common rice 23 lbs. per rupee.
[illegible] ...	·27	Total rainfall 31·70; break continues; young crops generally healthy; *juari* 44½ and *nagli* 51 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik ...	Igatpuri, 5·93; Peint, 2·89; Nandgaon, 1·50; showers elsewhere.	All crops doing well; locusts in Nandgaon; few cases of cholera in Nasik and Nandgaon; wheat 24, *bajri* 36, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	Rain every day except on 29th; total of week 1·70.	Total rainfall to date 55·19, being 8·79 above average; abnormal temperature fell from 1° warm on 26th to 2° cool on 27th, rose to 2° warm on 29th and again fell to 1° cool on 31st, at which it remained on the 1st; vapour in air normal; wind normal from 26th to 28th, afterwards there were abnormal winds from north-east.
Poona ...	.....	Break in weather continues except in Mawal taluka; more rain wanted in Indapur and Bhimthari; young crops thriving; 2 fatal cholera cases in Bhimthari; *bajri* 45½ and *jowari* 57 lbs. per rupee, in Poona *bajri* 36¾ and *jowari* 47¾ lbs. per rupee.
Ahmednagar ...	Total average rainfall 11·09; Sheogaon ·83; Newasa, ·54; Akola, ·41; very slight rain in Nagar, Parner, Jhamkhed, and Sangamner; none in rest.	Sowing of *kharif* completed in Parner, Shrigonda and Karjat and in progress in seven talukas; cattle-disease in Nagar and Sheogaon; cholera—in Nagar 1 case fatal, in Parner 16 cases, 4 fatal; in Shrigonda 16 cases, 8 fatal; *bajri*—maximum 60 lbs. in Jhamkhed, minimum 48 in Kopergaon; *jowari*—maximum 96 in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	·14	Total rainfall 17·06; cholera as before 148 cases, 59 deaths; *bajri* 56 lbs. 38 tolas and *juari* 77 lbs. per rupee.
Dharwar	Rain at all stations except Navalgund, Nargund, Gadag, and Ron; maximum at Hangal, 1·40; minimum ·42.	Owing to break in weather, sowing of *juari*, &c., resumed; young crops, except where damaged by excessive rain, promising; slight foot-and-mouth disease among cattle in Bankapur, Hangal, and Ron talukas; scarcity of drinking-water in villages of Nargund petta; prices stationary.
Kanara ...	Karwar, 3·95; Kumpta, 5·62; Sirsi, 8·07; Hallial, 1·62.	Total rainfall 76·72; transplanting in rice-fields completed; all plants healthy, except in low lands; sugarcane thriving; general health good; cattle-disease subsiding; common rice in Karwar 11 seers, in district average 14½ seers per rupee.
Rajkot ...	No rain	Weather fine; crops thriving; health good; *bajri* 26 and *juari* 30 lbs. per rupee. *General Remarks.*—Sowing mostly completed; transplantation in progress; partial break in some districts; young crops doing well; fever and cattle-disease in a few districts; cholera in Satara, Sholapur, Ahmednagar, and parts of Kathiawar.
Bengal—(Aug. 2nd)		
Chittagong ...	1·59	More rain wanted; prospects of crops not very promising; cultivation of *amun* going on; prices somewhat high; cholera, small-pox, and cattle-disease not abated.
Dacca ...	·56	Rain still required for paddy and other crops; harvesting of *aus* rice continues; some cholera in town.
24-Pergunnahs (Calcutta)	1·04	Prospects of jute, early rice, and sugarcane good; transplanting of *amun* going on; more rain wanted; prices unchanged; health generally good; a few cases of small-pox amongst cattle reported from Bahraitch subdivision.
Moorshedabad ...	·49	Harvesting of *bhadoi* commenced in some places; transplanting of *amun* going on, but somewhat retarded for want of sufficient rain; fever reported from Gokurm and Rangamati.
Rajshahye ...	·36	Paddy and other crops beginning to suffer considerably from want of rain; harvesting of *kaon* and *aus* paddy commenced; prices rising; fever general; some cases of cholera.
Burdwan ...	·8	Rain wanted throughout the district, especially in Katwa subdivision; cholera reported from parts of Sadr subdivision.
Rungpore ...	·54	Weather hot and dry; transplanting of winter rice at a standstill for want of rain; prospects of other crops good; good crops of jute and early rice being harvested; public health good.
Bhagálpur ...	·32	Rain wanted for transplanting rice; prospects of autumn crops good.
Purneah ...	1·54	Rain much wanted; rice damaged by drought; ploughing for cold weather crops general; health fair; Kosi low, Ganges very high.
Patna ...	·28	A heavy fall in the south; prospects of autumn crops good; more rain required for transplanting rice; cholera still reported from Barrh and Behar subdivisions.
Durbhunga ...	1·42	Rain badly wanted everywhere for transplanting rice; a fair *bhadoi* harvest expected; prices stationary, with inclination to rise; cholera nearly gone.
Hazáribágh ...	1·31	Occasional clouds; *bhadoi* crops promising; more rain wanted for transplanting rice; cholera and small-pox still reported; public health generally good.
Cuttack ...	·92	*Beali* and *sarad* rice being reploughed and progressing well in Jaipur; rivers have overflowed their banks, no damage to crops; cholera disappearing. *General Remarks.*—Rainfall still very deficient in most parts of this province; prospects of late rice generally not very favourable, save in Orissa and parts of Chota Nagpur and in a few other districts where good rain has fallen; transplanting being interfered with, in places it is quite at a standstill; early crops however doing well, but are also in want of rain in some places; fever has appeared in some districts; cases of cholera still reported from some places.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—			
Benares	(Aug. 1st)	Benares, ·6; Chandauli, 1·20; Gungapur, *nil.*	Rain needed for transplanting late rice; health of cattle good; cholera decreasing, but still prevalent in the city and its environs; some complaints of fever in the Gungapur tahsil; bazars well supplied; prices steady.
Allahabad	(„ 2nd)	Very little rain during week.	More rain wanted for transplanting rice; crops however doing very well; some sporadic cholera, but not much considering season; slight cattle-disease reported; prices falling.
Gorakhpur	(„ 1st)	No rain except a few local showers since 4th.	Rice beginning to suffer; rain greatly needed; condition of people good; prices continue to rise; some cattle-disease and cholera prevalent.
Jhánsi	(July 31st)	Rain from 7·0 in Jhánsi pargana to 1·0 in Moth pargana.	Crops in light *rankar* soil promise well, those in *mar* soil being injured by rain; a break is greatly wanted; *tur* and *bajra* still being sown; cholera reported to-day from Gursarailaga.
Cawnpore	(Aug. 1st)	Average rain over 1·30	Weather clear; crops flourishing; cholera continues; prices slightly fallen.
Agra	(„ „)	Rain in all parganas from ·7 to 6·20.	Crops in low lands suffering from continued wet weather; floods reported from west of Fatehpur-Sikri; a break much needed; slight fever in six parganas; cholera somewhat abating in Ferozabad; general health good; prices stationary.
Bareilly	(„ „)	.....	Weather seasonable; prospects good; a few deaths from cholera reported.
Meerut	(„ „)	Meerut, 1·20; Hapur, ·7; Baghpat, 2·70; Mowana, 1·40; Ghaziabad, 1·70; Sirdhana, 1·60.	Weather seasonable and rains opportune; health good; crops flourishing; *rabi* ploughings commenced; prices a little risen.
Farukhabad	(„ „)	Showers in four tahsils; rain lighter.	More rain wanted; prices steady; markets well supplied; health good.
Kumaun	(„ „)	.....	Prospects of crops very good; *mákdmari* in two villages, 11 deaths; cattle-disease less; prices slightly lower.
Rae Bareli	(„ „)	Sadr, 2·80; Dalmau, 2·00; Digbijaiganj, ·6; Salon, 1·80.	Prospects favourable; cholera still continues; cattle-disease has again broken out in tahsil Dalmau; prices stationary.
Lucknow	(„ „)	Lucknow, ·5; Malihabad, 1·20; Mohanlalganj, ·1.	Crops in good condition; weeding commenced; cholera still continues in city and district; prices steady.
Partabgarh	(„ „)	Good rain at Kunda, a heavy shower has fallen at Sadr.	Rain wanted badly at Sadr and north and west of Patti, where crops are beginning to suffer; at Sadr wind easterly; sky clear.
Sitapur	(„ „)	No rain in Sitapur and Sirdhauli, very little in other tahsils.	Rice much injured, also *sawan* in tahsil Sitapur, otherwise crops still fair; cholera much on the increase; supplies plentiful.
Fyzabad	(„ „)	·8	Weeding commenced; weather cloudy; cholera continues; cattle-disease appeared at tahsil Akbarpur.
			General Remarks.—Good rain and prospects excellent in Meerut, Agra, and Rohilkhand divisions, and a break would be beneficial in Agra, elsewhere rains lighter, and more is required, especially in Benares Division, for rice crops; prices on the whole stationary; cholera continues in eastern district, otherwise health good; cattle-disease has again appeared in eastern districts, but is less in Kumaon.
Punjab—(Aug. 1st)			
Delhi	...	4·60	*Kharif* prospects good; health good; prices falling.
Hissar	...	4·0	*Kharif* prospects good; health good; prices stationary.
Umballa	...	1·60	*Kharif* sowings nearly finished; health good; prices steady.
Jullundhar	...	3·0	Health good; prices steady.
Amritsar	...	2·60	*Kharif* sowings continue; prices stationary; health good.
Sialkot	...	3·0	Health good; prices steady.
Lahore	...	8·0	Health good; prices stationary.
Ferozepore	...	1·60	*Kharif* sowings in progress; fall in prices of grain and *juar*.
Mooltan	...	·50	*Kharif* crops good; health good; prices stationary.
Rawalpindi	...	4·0	*Kharif* crops in progress; cattle-disease in tahsils Rawalpindi and Murree and a few cases of measles in Pindigheb; slight rise in price of wheat.
Dera Ismail Khan	...	·70	*Kharif* crops good; health good; prices falling.
Peshawar	...	1·90	*Kharif* sowings in progress; health good; prices falling.
			General Remarks.—Good rain has fallen throughout the province; *kharif* sowings in progress; health good, but a few cases of measles are reported from Pindigheb, and rinderpest has appeared in tahsils Rawalpindi and Murree; prices of food-grains generally are stationary.
Central Provinces—			
Nagpur	(Aug. 2nd)	1·27	Crops promise well, but break required; isolated cases of cholera; prices steady.
Jubbulpore	(„ 1st)	2·93	Weather cloudy, showery; break needed; sowings continue; crops doing well; cholera and small-pox reported; wheat 17 seers per rupee.
Saugor	(July 31st)	4·96	Slight damage to crops by excessive rain; few cases of cholera; prices steady.
Seoni	(Aug. 1st)	1·95	Weather close with showers; cholera and cattle-disease still con... wheat 19 seers per rupee.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces— *contd.*			
Khandwa	(Augst 1st)	·32	Weather cloudy; weeding operations commenced; clear weather needed; cholera slightly prevalent; wheat 12 seers per rupee.
Hoshangabad	(„ „)	2·04	*Kharif* suffering from continuous rain; break needed; small-pox and cholera reported; wheat 15 seers per rupee.
Raipur	...	.....	No report received.
Sambalpur	(July 27th)	4·28	Weather seasonable; prospects of crops and health good; rice 56 seers per rupee.
			General Remarks.—Weather cloudy, with rain in most districts; break needed for weeding purposes; prospects of crops favourable, but slightly damaged from incessant rain; cholera still prevalent, with few cases of small-pox; prices stationary.
British Burma—(July 29th)			
Akyab	...	11·16	Total rainfall 135·08; 15 deaths from cholera in two townships; slight small-pox in two townships, otherwise public health good; cattle-disease prevalent in six townships and severe in four; sowing in progress.
Rangoon	...	2·08	Total rainfall 44·02; public health good; ploughing progressing.
Bassein	...	7·81	Total rainfall 67·39; 1 death from cholera in town and 14 in district, otherwise public health good; cattle-disease in three townships; ploughing and planting out progressing.
Prome	...	1·97	Total rainfall 21·08; 1 death from cholera in town and 89 in the district; cattle-disease much the same; ploughing very backward, especially in one district.
Amherst (Moulmein)	...	3·25	Total rainfall 113·08; public health good, both in Moulmein and district; cattle-disease reported in five townships; ploughing and sowing still going on.
Toungoo	...	2·45	Total rainfall 46·47; 2 deaths from small-pox in district, otherwise public health good; 35 deaths from cattle-disease in district.
			General Remarks.—Cholera prevalent in Prome and Henzada, some also in Akyab, Tharrawaddy, Bassein, and Thonegwa, otherwise public health generally good; cattle-disease continues; rain sufficient except in Prome and Thayetmyo; ploughing, sowing, and transplanting going on well.
Assam—(Aug. 2nd)			
Gauhati	...	3·04	Weather very hot; rain much wanted for transplanting operations; public health good.
Sylhet	...	1·60	Continued drought at this time of year very serious; bad accounts from all parts of the district; prospects gloomy.
Cachar	...	1·85	Weather [illegible] favourable) [illegible] case of small-pox reported from [illegible] and 209 cows by cattle-disease during July [illegible] station; 22 buffaloes and 26 cows now attacked with the [illegible] rain very much wanted.
Dibrugarh	...	1·83	Weather sultry; *aus* paddy being cut; more rain wanted for transplanting *sali* paddy; public health generally good; cattle-disease still reported.
Mysore and Coorg—(Aug. 2nd)			
Bangalore	...	.....	No report received.
Mysore	...	.....	No report received.
Mercara	...	17·3	Total rainfall during July 101·64 inches greater than ever known, proving injurious to roads, crops, and health; rice being transplanted in South Coorg.
Berar & Hyderabad—(Aug. 2nd)			
Amraoti	...	3·23	*Kharif* crops in good condition; wheat 18 and *juari* 30 seers per rupee.
Akola	...	·05	Weather warm and cloudy; *kharif* crops promising.
Hyderabad	...	·45	Total rainfall from 1st January 11·38; *kharif* crops being sown; fever and cattle-disease prevail in some places; prices—wheat [illegible], coarse rice 10, white *juari* 25, yellow *juari* 25½, and *tur* 25½ seers per Halli sicca rupee.
Central India States—(Aug. 2nd)			
Indore	...	2·71	The crops on low-lying grounds have been somewhat damaged by excessive rain, otherwise prospects are favourable; health good.
Morar (Gwalior)	...	2·49	Health and prospects good.
Sutna	...	3·33	Health good.
Rutlam	...	.....	No report received.
Neemuch	...	3·88	Health good; crops thriving.
Goona	...	3·24	Prospects good.
Bhopal	...	·90	Health and prospects good.
Agar	...	·20	Cholera at Rutlam, but disease on the decrease.
Nowgong	...	2·32	Fine weather much wanted; health good; prices stationary.
Manpur	...	·70	Break in rain has proved beneficial to *juar* and *makka* crops; health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (Aug. 2nd)	1·70	Break occasionally ; weather warm.
Sirohi (July 30th)	.....	Wells, tanks, health, and prospects good ; weather clear.
Marwar („ 28th)	2·60	Two months' water in tanks ; wells almost full ; health good ; crops in infancy, but doing well ; weather cloudy ; more rain expected ; prices stationary.
Meywar („ 29th)	0·16	Tanks and wells good ; diarrhœa and dysentery prevail ; crops very good.
Harowti („ 29th)	Deoli, 2·30 ; Kotah, 2·49 ; Tonk, 2·55 ; Shahpura (previous week), 4·25.	Cholera prevalent at Tonk, some cases at Shahpura ; crops suffering from too much rain ; a break in rains needed.
Jhallawar („ 26th)	10·61	Weather cloudy ; *makka* crops damaged from too much rain.
Ajmere (Aug. 1st)	.....	Weather breaking ; prospects good ; cholera still hanging about in Ajmere.
Jeypore („ „)	3·85	Cholera reported in Jeypore city, averaging 4 or 5 fatal cases daily ; prices stationary.
Ulwur („ „)	4·18½	Damage in places from excessive rain, otherwise prospects good, tanks and wells full ; prices—barley, gram, and wheat falling, *juar* and *bajra* steady.
Nepal—		
Katmandu (July 27th)	3·36	The transplanted rice crop is thriving ; rain falls almost every night ; the days are fine but cloudy.

E. C. BUCK,
Secy. to the Govt. of India.

SUPPLEMENT TO
The Gazette of India.

№ 32. CALCUTTA, SATURDAY, AUGUST 12, 1882.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8th AUGUST 1882.

GENERAL REMARKS.—The very heavy rainfall in the extreme south-west of the Madras Presidency and in Coorg has somewhat diminished, although still heavy. In other parts of the Madras Presidency it has continued to be light, except in Ganjam. In Mysore rain fell in varying quantities in all districts. In the Nizam's Territories only light showers occurred. In Berar the rainfall was good. In the Bombay Presidency it was good in some districts and deficient in a few. In the Central Provinces it was generally fair, though heavy in some districts.

In Central India and Rajputana the rainfall was good in some States, light in others, and a break occurred in a few States. In the Punjab there was rain in all but four districts, light, except in Amritsar. In the North-Western Provinces and Oudh good rain fell everywhere, excepting one or two districts. From Bengal rain in varying quantities is reported from all districts. In Assam and British Burma good rain fell in all districts, except Prome.

Agricultural prospects are favourable in both these Provinces; ploughing, sowing, and transplanting are progressing. In Bengal more rain would be beneficial in many parts for autumn crops and the winter rice. In the North-Western Provinces and Oudh the prospects of the *kharif* crops are generally favourable, but here also more rain is needed in some districts. In the Punjab sowings have been completed or nearly so, and prospects are good here as well as in the Rajputana and Central India States. In the Central Provinces a break in the wet weather is still needed for weeding operations in some districts; prospects of the *kharif* crops are favourable.

In the Bombay Presidency sowings have mostly been completed, and rice is being transplanted in some parts; more rain seems wanted in the Deccan. In Berar the cotton and *kharif* crops are in good condition. In the Nizam's Territories also crops are in good condition, but more rain is needed. In Mysore wet cultivation in some parts requires more water, while in others excessive rain has done some damage; but on the whole prospects are favourable here and also in Coorg. In the Madras Presidency standing crops are, with a few exceptions, in fair condition.

The barometer had risen in all parts of Northern India and in the central and western parts of the Peninsula up to the 9th instant, but a slight fall set in on the 10th. The break in the rains, however, continues in North-Western India, where dry weather has set in. Atmospheric conditions somewhat resemble those of August 1880.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Aug. 9th)		
Bellary ...	·48 (average of five stations).	Standing crops good, though dry partially withering and worm-eaten; agricultural operations progressing.
Kurnool ...	·24 (average of two stations).	More rain wanted; young crops fading; cattle-disease in parts.
Ganjam ...	3·45 (average of eleven stations).	Standing crops thriving; fever, small-pox, and cattle-disease continue; cholera subsiding.
Kistna ...	·65 (average of twelve stations).	Standing crops along Kistna damaged, others require rain; agricultural operations progressing; small-pox slight and cattle-disease prevalent.
Chingleput (Madras) ...	·51 (average of eight stations).	Standing crops under larger tanks and channels good; agricultural operations going on; cholera and cattle-disease in parts.
Coimbatore ...	·92 (average of six stations).	Standing crops, paddy promising; dry crops damaged in parts by rain; want of rain felt; insects in some places; harvest dry crops, yield average; fever and small-pox in parts; cholera and cattle-disease has broken out in parts.
Tanjore ...	·38 (average of seven stations).	Standing crops generally good but damaged by breaches in seven taluks; cattle-disease in parts of a taluk.
Madura ...	·37 (average of three stations).	Standing crops fair, though withering in one taluk; harvest paddy and dry crops, outturn average; cholera in parts.
Malabar ...	8·12 (average of fourteen stations).	First crop partially destroyed by heavy rain; small-pox, fever, and cattle-disease in parts; cholera slight.
Travancore ...	3·10	Rice cultivation considerably damaged by floods; fever continues. *General Remarks.*—General prospects fair.
Bombay—(Aug. 9th)		
Kurrachee ...	Manora, ·46; Tatta, 1·46; Dadu, ·63.	River at Kotri on 7th, 19⅔ feet against 16 feet 1 inch on same date last year; fever in four talukas; 5 cases of small-pox in the vicinity of Tatta; crops submerged in many places; rats doing some damage to rice crops in Jati taluka; wheat, red rice, and *bajri* in Kurrachee 23, 35 and 32, in Sehwan 28, 46 and 46, in Sakro 18 30 and 48, and in Shahbandar 20, 48 and 48 lbs. per rupee, respectively.
Hyderabad ...	Rain in twelve talukas, average 1·30.	River still in high flood; fever in Mirpur taluka; wheat 25, *juari* 45, *bajri* 40, red rice 32, and white rice 22 lbs. per rupee; crops damaged by rats in Bago, Tando and Badin talukas.
Ahmedabad ...	1·40	Total rainfall 27·24; sowing of *bajri*, &c., and transplantation of rice continue in Ahmedabad city; 8 cholera cases, 1 fatal; wheat 26 and *bajri* 30 lbs. per rupee.
Baroda ...	1·01	Total rainfall 30·42; sowing of *kharif* and transplantation of rice continue; young crops doing well generally; cholera at Amreli and Manekwara continues in a mild form; *bajri* 32 and common rice 24 lbs. per British rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	·21	Total rainfall 31·91; break continues; crops generally healthy; *juari* 36 and *nagli* 51 lbs. per rupee.
Násik ...	Igatpuri, 7·54; Peint, 4·41; no rain in Baglan or Kalwan; showers elsewhere.	Crops good; *bajri* sowing incomplete in places; locusts in Nandgaon; cattle-disease in a few places; cholera in Násik and Sinnar; wheat 25, *bajri* 38, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	Rain every day; total of week 1·35.	Total rainfall to date 56·45, being 7·36 above average; abnormal temperature *nil* on 2nd, 7th, and 8th, 1° warm on 3rd and 1° cool from 4th to 6th; vapour in air normal; abnormal wind from the south-west on 6th; wind normal on all other days.
Poona ...	.....	Break continues; young crops healthy; 3 cholera cases in Poona, 2 fatal; *bajri* 45 and *juari* 58½ lbs.; in Poona *bajri* 36¾ and *juari* 47½ lbs. per rupee.
Ahmednagar ...	Newasa, ·53; Karjat, ·39; very slight in Nagar, Parner, Jhamkhed, Sheegaon, Sangamner, and Akola; none in the remaining three talukas.	Total average rainfall of the district 11·21; sowing of *kharif* in progress in Jhamkhed, Sheegaon, Sangamner, and Akola and completed in others; rain much wanted; cattle-disease in Nagar, Sheegaon, and Akola; cholera—in Parner 18 attacks and 6 deaths, in Shrigonda 8 attacks and 2 deaths; *bajri*—maximum 66 lbs. in Jhamkhed, minimum 48 in Kopergaon; *juari* maximum 102 lbs. in Jhamkhed, minimum 54 in Kopergaon.
Sholapur ...	·58	Total rainfall 17·64; 109 cholera cases, 48 deaths; rain much needed; cattle-disease in Malsiras taluka; *bajri* 37 lbs. and *juari* 79 lbs. 39 tolas per rupee.
Dharwar	Rain at all stations except Navalgund, Nargund, Ron, and Mundargi; maximum at Dharwar, 1·23; minimum at Rannibennur, ·13.	Rain wanted at Ron, Nargund, and Mundargi; young standing crops good where not damaged by too much rain; *juari* sowing nearly completed; ague in Mugud *petta* and cattle-disease in Bankapur, Hangal, and Ron; maximum and minimum price of *juari* 80 and 54 lbs. and of rice 30 and 18 lbs., respectively; scarcity of drinking-water in Nargund and twelve other villages of the *petta*.
Kanara ...	Karwar, 3·63; Kumpta, 3·68; Sirsi, 2·92; Hallial, 1·36.	Total rainfall 80·35; rice plants healthy except in low lands; crops damaged by heavy rainfall in July in Sirsi, Honawar, and Sidapur talukas; betelnut, cardamum, and pepper crops much injured; landslips in Sidapur burying Rio betelnut garden in Chapparman; many huts on banks of the Sharavati washed away, no lives lost; cattle-disease subsiding; common rice in Karwar 11 seers, in district average 13¾ seers per rupee.
Rajkot ...	·13	Total rainfall 13·78; weather cloudy; general health fair; crops thriving; cholera in some places; *bajri* 27 and *juari* 32 lbs. per rupee.
		General Remarks.—Sowing mostly completed; transplantation in progress; river high in Sind; breaches in Sukkur and Nara canals submerging villages in Sukkur and Nowshera talukas; rains generally abating in Presidency districts and much wanted in Kaladgi, Ahmednagar, Sholapur, and parts of Dharwar; locusts in Násik and Khandesh; fever and cattle-disease in some districts; cholera in Belgaum, Satara, Sholapur, Ahmednaga thana, Kaira, and parts of Kathiawar.
Bengal—(Aug. 9th)		
Chittagong ...	6·29	Weather seasonable; rain has done much good to standing crops; cultivation of *amun* going on steadily; prices stationary; cholera and small-pox still continue.
Dacca ...	2·43	Both jute and rice damaged by falling of rivers; health improving since rain fell.
24-Pergunnahs (Calcutta)	1·26	Prospects of jute, early rice, and sugarcane good; cultivation of winter crops going on, but more rain wanted for transplanting of *amun* paddy seedlings; public health generally good; rivers rising.
Moorshedabad ...	2·08	*Bhadoi* being cut, but much loss has been done to low land crops by rise of rivers, especially in thana Dewanserai; prospects of *amun* were becoming unsatisfactory owing to want of rain, but rain which fell on 5th and 6th has done much good, and will enable cultivators to go on with transplanting operations; fever prevails in Gokuru and Rangamati, and cholera in a few places; cattle-disease in Kalyanganj.
Rajshahye ...	·62; Nattore, ·34	Crops suffering for want of sufficient rain; fever general.
Burdwan ...	·38; Cutwa, ·98; Raniganj, 2·5.	Weather hot and cloudy; rain much wanted; public health generally good; a little cholera in head-quarters subdivision.
Rungpore ...	·80	Weather cloudy and hot; transplanting of winter rice stopped for want of rain; prospects of other crops good; public health good.
Bhagálpur ...	2·41	Late rain has revived rice plants, but more required; autumn crops doing well.
Purneah ...	6·8	Recent rain prevented much further damage; transplanting proceeding; health fair; Kosi rising; Ganges high.
Patna ...	·67	Rain wanted everywhere for transplanting rice; prospects of autumn crops fair; cholera still reported from Barrh and Behar sub-divisions.
Durbhunga ...	Copious rain since night of 5th; 6·64.	All prospects greatly improved; *bhadoi* safe; rice cultivation going on well; cholera in places; prices falling slightly.
Hazáribágh ...	·88	Weather seasonable; *bhadoi* crops look well; transplanting of paddy continues, but more rain wanted; general health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	3·17	Rivers still high; state of crops good; cholera still reported.
		General Remarks.—General prospects in these provinces not very satisfactory owing to scanty rainfall; cultivation of *amun* rice for the most part greatly interfered with, save in Orissa and parts of Chota Nagpur where there has been sufficient rain, and in Durbhunga, Purneah, Chittagong and a few other districts where good rain fell during the week; more rain is also urgently required for autumn crops in many places; fever has appeared in some districts, it is said to be increasing in Nuddea; cases of cholera still reported from some districts.
N. W. Provinces and Oudh—		
Benares (Aug. 8th)	1·20; Chandauli, 2·70; Gungapore, no report received.	Prospects for *rabi* crops generally fair, but in Benares district more rain wanted for transplanting late rice; health of cattle good; some cholera still reported in city, pargana Dehát Amánat, and parts of tahsil Chandauli; fever in Chandauli tahsil; bazaars fairly well supplied; prices steady.
Allahabad („ „)	Little rain	Rain much wanted now both for rising crops and for *bajri* sowings; rice specially requires rain; some sporadic cholera, but not spreading; health on whole good for this season, considering long break in rains; prices falling slightly.
Gorakhpur („ „)	Good rain on 6th all over district.	Rice gone in parts, but the greater part will be saved; health good; prices still rising.
Jhánsi („ „)	Average 3·40	A break of four days in three parganas has benefited crops in *mar* soil; continuous fine weather greatly wanted; uplands being prepared for *rabi* sowing; prices fluctuating; cholera continues in Gursarai, a few cases also reported from two other villages.
Agra („ „)	Rain in six parganas from 2·0 to 1·10.	Some crops slightly damaged in two parganas from excessive rain; a break during week, which was much needed; slight fever in six parganas; cholera abating in Ferozabad; general health good; prices stationary.
Bareilly („ „)	Average 1·70	Weather seasonable; crops excellent; cholera and fever appearing.
Meerut („ „)	Very little rain, more wanted.	Wind westerly greater part of week; rice being irrigated; health good, but fever commencing; crops flourishing; supplies sufficient; prices stationary.
Kumaun („ „)	Good rain on 5th and 6th.	Crop prospects excellent; 10 more deaths from *mahamari*; health good; cattle-disease decreasing; prices decreasing.
Rae Bareli („ 7th)	Sadr, 2·10; Dalman, 5·0; Digbijaiganj, 1·0; Salon, 1·10.	*Kharif* crops promising; cholera still hanging about; some cattle-disease in tahsil Dalman; prices slightly falling.
Lucknow („ 8th)	Sadr, 2·70; Maliabad, 1·20; Mohanlalganj, 1·10.	*Kharif* prospects favourable; weeding going on; more rain wanted for rice crops; prices steady; cholera increasing in district and city.
Partabgarh („ „)	Good rain, 1·45 at Sadr; Ratti, 2·80.	Prospects much improved; general health good; slight cholera at Ratti.
Cawnpore („ „)	Average over 1·30	Weather clear again; crops flourishing; weeding operations in progress; cholera continues in three parganas; prices slightly risen.
Sitapur („ „)	Sidhauli, 2·30; Misrikh, 1·80.	Rain has greatly benefited the crops; Sitapur and Biswan still much need rain; cholera increasing; slight cattle-disease in two tahsils; supplies sufficient. * * * *
Farukhabad („ „)	General rain throughout the district.	More rain required; prices steady; markets well supplied; a few cases of cholera reported from Aligarh, otherwise health good.
Fyzabad („ „)	3·10	Prospects favourable; a little cholera still continues in city and district; cattle-disease in tahsil Akbarpur.
		General Remarks.—Good rain throughout the province, but more is still required in Benares, Allahabad, Sitapur, Farukhabad, and Meerut; *kharif* prospects generally favourable; prices rising slightly in Gorakhpur, Cawnpore, and Saharanpur, elsewhere stationary or falling; cholera continues, and slight fever has appeared in Meerut and Bareilly; cattle-disease continues in Oudh, but is decreasing in Kumaun.
Punjab—(Aug. 8th)		
Delhi ...	1·50	*Kharif* prospects good; health good; slight rise in prices of wheat and gram.
Hissar ...	No rain	*Kharif* sowings continue; health good; prices steady.
Umballa ...	0·20	*Kharif* sowings nearly finished; health good; prices stationary.
Jullundur ...	No rain	Health good; prices steady.
Amritsar ...	4·40	*Kharif* sowings continue; health good; prices steady.
Sialkot ...	0·50	Health good; prices stationary.
Lahore ...	0·50	Health good; prices stationary.
Ferozepore ...	1·80	*Kharif* sowings finished; health good; prices steady.
Mooltan ...	No rain	*Kharif* crops good; health good; prices steady.
Rawalpindi ...	1·50	Rinderpest in Rawalpindi tahsil and measles in Pindigheb nearly disappeared; *kharif* crops good; prices steady.
Dera Ismail Khan ...	0·30	*Kharif* prospects good; health good; prices steady.
Peshawar ...	No rain reported	*Kharif* sowings completed; health fair; prices stationary.
		General Remarks.—Rain has fallen in the Delhi, Amritsar, Sialkot, Lahore, Ferozepore, Rawalpindi, and Dera Ismail Khan districts; rinderpest in Rawalpindi tahsil and measles in Pindigheb have nearly disappeared; health good; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Nagpur (Aug. 9th)	·11	Weeding operations being vigorously prosecuted; cholera spreading in district; prices steady.
Jubbulpore („ 8th)	3·72	Crops suffering from rain; break needed; cholera abating; small-pox prevalent; prices stationary.
Saugor („ 7th)	9·12	Break wanted; slight damage to crops; cholera reported; prices show a tendency to rise.
Seoni („ 8th)	1·50	Weather cloudy; weeding and ploughing progressing; cholera increasing; cattle-disease declining; isolated cases of small-pox; prices stationary.
Khandwa („ „)	1·8, showery	Weeding operations progressing; small-pox reported; wheat 14 seers per rupee.
Hoshangabad („ „)	3·99	Break needed; cholera and small-pox reported; wheat 15 seers per rupee.
Raipur („ 5th)	1·49, slight showers	Weather cloudy; weeding operations going on; crops doing well; fever prevalent; few cases cholera; prices rising; rice 31 seers per rupee.
Sambalpur („ 3rd)	2·43, occasional showers.	Weather close; prospects of crops good; fever slightly prevalent; rice 56 seers per rupee.
		General Remarks.—Weather cloudy, with slight showers; in some districts heavy rain; break much needed for weeding operations; prospects of *kharif* crops favourable; cholera still reported; prices continue stationary.
British Burma— (Aug. 9th)		
Akyab ...	13·81	Total rainfall 148·89; cholera in township; 10 deaths from small-pox in one township, otherwise public health good; cattle-disease severe in one township; sowings nearly completed.
Rangoon ...	6·33	Total rainfall 50·35; seven fatal cases of cholera, otherwise public health good; ploughing completed; crops sown; progress favourable.
Bassein ...	6·79	Total rainfall 74·18; several deaths from cholera in one township, otherwise public health good; cattle-disease prevalent in two townships; ploughing and planting out progressing.
Prome ...	1·77	Total rainfall 22·85; cholera still sporadic in district, but no heavy outbreaks reported; 3 deaths in Prome town; cattle-disease still about; late rains have done much good, and ploughing is reported as progressing; one township still suffering from want of rain.
Amherst (Moulmein) ...	13·51	Total rainfall 126·59; cholera in one township, otherwise public health good both in Moulmein and district; cattle-disease reported in three townships; sowings still progressing.
Toungoo ...	3·94	Total rainfall 50·41; public health good; some cattle-disease in one township.
		General Remarks.—Cholera in Akyab, Tharrawaddy, Prome, and Thyetmyo, and several cases in a few other districts, otherwise public health good; cattle-disease continues; more rain in Prome and Thyetmyo, but not yet enough for all parts of those districts; cultivation prevented in portions of Thonegwa by floods and excessively high tides; agricultural operations generally going on well.
Assam—(Aug. 9th)		
Gauhati ...	8·13	Transplanting operations which were at a standstill recommenced; public health fair; cattle-disease reported from interior.
Sylhet ...	7·83; rain general	Great efforts being made to make up for lost time; some kinds of *aus* paddy being harvested; nip has appeared in tea.
Cachar ...	3·43	Weather cloudy; prospects of tea, *dumahi*, and *murali* crops satisfactory; transplanting *sali* crop continues; common rice $25\frac{3}{8}$ seers per rupee; public health good; death of 6 cows by cattle-disease reported from Lakhimpur.
Dibrugarh ...	3·79	Weather hot; harvesting *aus* paddy; more rain wanted for transplanting of *sali* crop; district healthy.
Mysore and Coorg— (Aug. 2nd)		
Bangalore ...	2·33	Standing crops in good condition; sowing of *ragi*, *dhal* and *hollar* continues; prospects of season fair; public health good.
Mysore ...	·69	Crops in good condition; health good.
		General Remarks.—Rain has fallen copiously in the Kolar, Anumkur, Shooga, and Kadur districts, moderately elsewhere; standing crops generally in good condition in parts of the Hassan and Shimoga districts; crops somewhat injured from excessive rain; sowing operation in active progress; prospects very good; fever, dysentery, and diarrhœa prevalent in parts; prices stationary.
Mysore and Coorg— (Aug. 9th)		
Bangalore ...	1·38	Standing crops are thriving; prospects favourable.
Mysore ...	·93	Crops flourishing.
Mercara ...	9·66	Rain continues; fair weather needed; rice being transplanted; *ragi* doing well; public health and prospects of season good; prices stationary.
		General Remarks.—Rain continues to fall generally throughout the Mysore State; wet cultivation in some parts requires more water, while at others excessive rain has done some damage and is retarding the transplanting of seedlings; in Kolar the rain has been scanty; crops generally in good condition and prospects are favourable; small-pox, fever, and murrain prevail in many places; prices satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Berar & Hyderabad— (Aug. 9th)		
Amráoti ...	1·35	Cotton and *kharif* crops in good condition; prices—wheat 11 and *juari* 30 seers per rupee.
Akola ...	1·72	*Kharif* crops promising; weeding begun.
Hyderabad ...	·20	*Kharif* crops in good condition; *rabi* sowings postponed on account of breaks in weather; prices—wheat 16, common rice $10\frac{1}{4}$, white *juari* $25\frac{1}{4}$, yellow *juari* 30, and *tur* 26 seers per current sicca rupee.
Central India States— (Aug. 9th)		
Indore ...	·28	There has been a very seasonable break which has revived agricultural prospects for the *kharif*; prices are steady; health good.
Morar (Gwalior) ...	·22	Health and prospects good.
Sutna ...	1·0	
Rutlam ...	.....	No report received.
Neemuch ...	2·98	Health good; crops thriving.
Goona ...	2·45	Health good; prospects fair.
Bhopal ...	4·5; light continuous rain.	Prospects good; some cholera exists.
Agar ...	No rain	Prospects good; cholera at Sitaman.
Nowgong ...	4·92	Health and prospects good; prices stationary.
Manpur ...	1·0	*Juari* and *makka* crops estimated at 8 annas in the rupee; health good; prices unchanged.
Rajputana—		
Abu (Aug. 9th)	3·70	High variable winds; weather cloudy.
Sirohi („ 6th)	1·60	Tanks, wells, health, and prospects good.
Marwar („ 4th)	1·73	Four months' water in tanks by recent rains; health good; rising crops excellent; prices falling slowly; weather still cloudy.
Meywar („ 5th)	1·41	Tanks and wells good; health fair; prospects favourable.
Harowti („ „)	Deoli, 1·87; Tonk, 1·66.	Cholera still prevalent at Tonk, otherwise health fair; prospects favourable.
Jhallawar („ 2nd)	1·88	Violent thunderstorms; health good.
Ajmere („ 8th)	.....	Break in weather continues; cholera disappearing, but slight small-pox in Beawar and Todghur; cattle-disease has appeared in last two tahsils; sowing continues.
Jeypore („ „)	0·13	Prices steady; cholera is slightly on the increase in the city.
Bhurtpore ...	.....	No report received.
Ulwur (Aug. 8th)	.....	Break in rain would have been more beneficial but for strong south-west winds; fever and a few cases of cholera reported; prices—wheat, barley, and gram slightly rising, and *bajra* and *juari* steady.
Nepal—		
Katmandu (Aug. 3rd)	1·68	Hot and oppressive weather for the past week; the prospects of the rice crop are so far good.

E. C. BUCK,
Secy. to the Govt. of India.

Circular No. 32Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Exhibitions),—dated Simla, the 28th July 1882.

READ—

Report on the Melbourne International Exhibition of 1881, by James Inglis, Esq., Executive Commissioner of India.

Read also—

Note by E. C. Buck, Esq., President, Melbourne Exhibition Committee.

RESOLUTION.

THE papers cited above describe the share taken by the Government of India in the Melbourne Exhibition of 1880, and the efforts made in connection with this event to establish closer trade relations between India and Australia. They also contain an interesting account of the commercial wants and resources of the latter country, from which the probabilities in favour of a more extensive trade with India may be estimated.

2. The Melbourne Exhibition, as the Report points out, was the first one in which the Government of India took part with the distinct purpose of turning it to practical use. In this connection it is important to note the difference between the functions discharged at such industrial gatherings by

the Government of India and by the Governments of European countries. A European Government may take part in an Exhibition with very little expense and trouble. It may depute an officer to represent it and to arrange the court, but it has little or no concern with the articles exhibited. Private enterprise does all the rest, as the commercial value of an Exhibition is fully recognised among all trades and industries. On the Government of India, however, the whole weight of an Exhibition, from purchasing the exhibits in India to finally disposing of them, falls. Private trade, if left to itself, would do nothing. It results from this that, if the arts and industries of India are to be worthily represented at a foreign Exhibition, the Government of India is put to much greater expense and trouble than the case often justifies.

3. The inertness of Indian trade, the desirability of finding new outlets for it, and the inordinate expense involved in exhibiting its capacities to foreign nations suggested the line of action adopted at the Melbourne Exhibition. It is unnecessary to recapitulate Mr. Inglis' account of the measures taken in Calcutta and Melbourne by the representatives of the Indian Government to draw the two countries together, and excite a mutual interest in their respective capabilities. The establishment of the Tea Syndicate through the agency of the Calcutta Chamber of Commerce was one of the happiest incidents, and the trade organisation thus formed is not unlikely to have a very important effect on the future development of Indo-Australian commerce. A large market for Indian teas has been opened in Australia, and this will lead to the closer commercial relations and improved communications which the report shows to be required.

4. The net expenditure by the Government of India amounted to nearly Rs. 37,000, exclusive of the Rs. 10,000 placed at the disposal of the Tea Syndicate. To the Government exhibits were added the articles contributed by private Indian firms, and a collection of Indian jewelry sent for sale under a Government guarantee. The aggregate value, however, was insignificant in the comparison with the wealth displayed by other countries. The articles exhibited by English firms were valued at three-quarters of a million sterling, while Germany sent upwards of £60,000 worth of jewelry alone. The sales of Indian articles appear from the report to have been small. The probable explanation is to be found in the comparatively high prices asked for Indian art-ware, and in the obvious defects of Indian manufactures. The universal complaint of "want of finish" is noteworthy. It applies equally to the texture of tasar cloths, to the packing and preparation of Indian teas, and to the "drums" in which Indian oils find their way to the Australian market. These defects it is beyond the power of Government to remove, and they constitute a real obstacle to the export of Indian manufacture and raw products even under the most favourable conditions.

5. The prospects of a reciprocal trade between India and Australia are fully summarised in the report. In addition to the tea, jute and rice trades, there appears to be a growing demand in Australia for Indian coffee, spices, oils, and cotton goods. Australia on her side can offer copper, horses, hops, wool, fruit, dairy produce and flour, and possibly ghí. The elements of a very extensive trade can hardly be said even to exist at present, but the increased activity it has shown since the Melbourne Exhibition justifies the action taken by the Indian Government, and encourages the hope that with increased mutual knowledge and more direct steam communication the commercial intercourse between the two countries will improve.

6. The remarks prefixed by Mr. Buck to Mr. Inglis' report are mainly confined to practical suggestions for the management of future Exhibitions, so far as India is concerned. The Government of India concurs in the general tendency of these suggestions, and will see that the experience acquired at Melbourne is not lost. The Government of India also desires to express its fullest acquiescence in the principle stated in paragraph 15 of Mr. Buck's memorandum. The peculiar difficulties which the Government of a backward country like India have to encounter in taking part in a foreign Exhibition, and the disproportionate expenditure involved, have already been mentioned. It is incumbent on the Government of India, should it decide on appearing at any other Exhibitions, to turn the opportunity to practical ends similar to those aimed at at the Melbourne Exhibition.

The thanks of the Government of India are due to Mr. J. Inglis, the Indian Commissioner at Melbourne, for his interesting and valuable report, and for the energy with which he has performed his arduous and important duties; also to Mr. E. C. Buck and to Mr. J. E. O'Conor, the officers who were selected to represent this Government in Australia—the former of whom, with praiseworthy zeal, devoted a great portion of his furlough to furthering the interests of the Indian Section of the Exhibition. The Government of India also desires to commend the services of Messrs. H. H. Locke, J. L. Kipling, C. Browning, the officers who superintended the collection of exhibits in the several Provinces. The kind assistance given by Sir Herbert Sandford, the representative of Great Britain, to the representatives of this country will be acknowledged through the Secretary of State.

ORDER.—Ordered, that a copy of this Resolution be printed and distributed with the Report on the Melbourne Exhibition, and published in the *Gazette of India* for general information.

No. I.—Statistics of Circulation during 1881-82.
„ II.—Statement of Notes issued, received, and cancelled.
„ III.—Statement of Receipts and Expenditure.
„ IV.—Classification of Treasuries according to encashment of Notes.
„ V.—Statistics of Treasury and other Balances on December 31st, 1881.

Other Statements.

No. VI.—Issues and Receipts of Home Notes.
„ VII.—Issues and Receipts of Coin.
„ VIII.—Value of Notes in circulation from 1862.
„ IX.—Details of ditto 1871.

OFFICERS IN CHARGE.

2. Except for the last three days of the year, Mr. J. Westland was Head Commissioner.

Messrs. E. Gay, E. T. Atkinson, and A. C. Tupp were Commissioners in Bombay from 1st to 17th April, 18th April to 24th December, and 25th December to 31st March 1882, respectively, and Mr. H. F. Clogstoun was Commissioner in Madras during the whole year.

ABOLITION OF NAGPUR AND OTHER SUB-CIRCLES.

3. A notable event in the history of the year is the abolition of the sub-circles of circulation at Nagpur, Akola, and Coconada. The permanent circulation at these circles was very small: about six lakhs for Nagpur and three or four for each of the other two; but after the cotton season at Nagpur and Akola, and the export season at Coconada, it was liable to swell to very high figures, and has been over thirty lakhs at each place. The excess over the above-stated minima of six and three lakhs was practically the excess of funds held by the public and the trading classes after the close of the local trading season, which they desired to remove elsewhere, and which might therefore be expected at any time to come in for payment, the law obliging us to prepare to meet the notes both at the sub-circles themselves and at the head offices. This arrangement, however convenient for the local public, was hardly a legitimate burden upon the general currency reserve; and after consulting the Local Governments and commercial authorities it was determined to suppress the local circulation. Nagpur and Akola are now parts of Bombay Circle, and Coconada part of Madras Circle, without any special privileges in the way of double encashment of their notes.

4. The issue of notes at the suppressed sub-circles was discontinued on 15th August 1881, but the offices remained open for encashment of notes up till 31st December. Between these dates the gross circulation diminished from 2,491, 2,442, and 1,665 thousands, to 480, 270, and 286, and a new arrangement was now made. An encashing agency was established at which was placed a treasure chest containing the necessary reserve funds; the agent cashed out of his own resources all local notes brought to him, and recouped himself when he wished by presenting his notes to the currency officer for encashment out of the reserve chest. The Banks of Bengal and Madras were good enough to undertake the "encashing agency" at Nagpur and Coconada respectively, and at Akola it was managed by the local treasury.

5. The separate accounts of the sub-circles were maintained till March 31st, when their balances, both of circulation and of reserve, were transferred to the respective head circle accounts.

6. Currency agencies have, however, been established at all three places for issue and encashment of notes. These differ from sub-circles, chiefly in respect of their being under no legal obligation to issue or to encash, and they practically merely supplement the funds available at the local treasuries for meeting the public convenience in respect of demand for notes or for encashment of them. The funds which they hold, notes and cash together, have a definite limit, so that if the demand for notes exceeds that for encashment, or *vice versâ*, by the amount of the limit, the operation automatically ceases.

PROPOSED BURMA CURRENCY CIRCLE.

7. An attempt was made during the year to legislate for the introduction of a currency circle in Burma. As the law at present stands, no local currency can be introduced in Burma without the condition that the notes shall also be encashable in Calcutta; and the circumstances of the Burma trade are such as to render it impossible to work a currency that is subject to this condition. The object of the legislation was therefore to enable the department to extend its operations to Burma without making them subject to this condition.

8. In the Bill brought before Council for this purpose, opportunity was taken to introduce, at the same time, an amendment of the bullion clauses of the law; which enable the importer of silver to obtain coin immediately out of the currency reserve, whereas the latter can recoup itself only as fast as the Mint can coin. Certain objections were raised to the proposed amendment of the law on behalf of the importers of bullion; these objections are now under consideration. Meantime preparations are being made to open a Currency Department in Burma as soon as the law renders it possible.

ACCOUNTS AND AUDIT.

9. The monthly audits of the accounts have been duly reported, for each office, to the Comptroller General, and the following special audits have also been made:—

Accounts of	Auditing officer.	Date of report.	Period under Audit.
Calcutta . . .	Inspector of Local Accounts.	27th April 1882 .	Jan. to Dec. 1881.
Madras . . .	Ditto ditto .	14th January 1882 .	Ditto.
Calicut . . .	Dr. Cline, Asst. Acct. Genl., Madras.	19th April 1882 .	Sept. 1880 to April 1882.
Bombay . . .	Inspector of Local Accounts.	4th February 1882.	Jan. to Dec. 1881.

The sub-circles of the Bombay circle have not been specially audited owing to the difficulty found in deputing an officer from Bombay for the purpose, but the accounts of the Akola and Nagpur sub-circles for the months of January, February, and March last have been audited by Assistants to the Accountant General, the accounts for those months having been prepared in the head office owing to the abolition of the sub-circles.

CIRCULATION.

10. The following figures show the state of the *net* circulation:—

	Gross Circulation.	Retired by other offices.	Net Circulation.
1st April 1881	13,81,82,675	41,65,310	13,40,17,365
31st March 1882	14,43,08,415	52,36,635	13,90,71,780

It must be explained that a note is in "gross circulation" when it is not yet returned to the original office of issue, but if it has meantime been paid off by another office of issue, and is held by it pending return to the original office of issue, then it has ceased to be in "net circulation," though it is still part of the gross circulation.

11. The details of the net circulation of March 31st, 1882, are as follows:—

	Number of Notes for Rupees.								Total.	
	5	10	20	50	100	500	1,000	10,000	Pieces.	Value.
Calcutta . . .	265,616	929,483	336,807	47,672	105,874	13,461	17,484	1,480	1,717,777	6,88,04,550
Allahabad . . .	13,574	19,889	14,841	11,577	13,175	1,141	5,607	2	79 806	86,57,430
Lahore . . .	15,909	34,698	20,429	12,880	12,200	3,546	2,443	49	101,954	78,95,105
Bombay . . .	124,420	447,462	89,878	53,370	64,963	4,933	10,106	638	795,790	3,50,13,580
Kurrachee . . .	7,486	23,900	9,699	5,486	6,480	753	1,309	...	55,063	30,73,210
Madras . . .	35,219	55,345	31,463	23,246	60,650	4,451	1,499	250	212,123	1,48,10,605
Calicut . . .	8,064	8,772	4,818	3,628	5,120	139	70	26	30,637	13,17,300
Total for Mar. 31st, 1882	470,288	1,519,549	507,935	157,659	268,432	28,404	38,488	2,395	2,993,150	13,90 71,780
Total for Mar. 31st, 1881	429,075	1,425,995	530,582	164,592	261,008	28,362	42,100	1,638	2,883,442	13,40,17,365
Total for Mar. 31st, 1880	418,930	1,383,504	478,469	164,288	271,233	28,069	39,966	874	2,785,333	12,35,77,270

The comparison shows an increase of 11½ lakhs in five and ten-Rupee notes, and of 76 lakhs in ten-thousand-Rupee notes, against a decrease of 36 lakhs in thousand-Rupee notes.

12. From these figures it will be found that the average value of each note in circulation on the last day of the year compared with the past two years was—

	1879-80.	1880-81.	1881-82.		1879-80.	1880-81.	1881-82.
Calcutta Circle . .	36	39	40	Nagpur Circle . .	56	93	...
Allahabad ,, . .	64	85	108	Kurrachee ,, . .	60	66	56
Lahore ,, . .	52	67	72	Madras ,, . .	62	62	69
Bombay ,, . .	56	44	44	Calicut ,, . .	36	61	43
Akola ,, . .	61	109	...	Coconada ,, . .	158	115	...

The chief variation is in Allahabad, and is due to the fact that its circulation was larger in 1882 than 1881 by about twenty lakhs of thousand-Rupee notes, a circumstance which arises out of certain transactions of the Bank of Bengal.

13. The variations in the net circulation of each circle are shown in the following table, omitting 000 :—

Last day of	Calcutta.	Allahabad.	Lahore.	Bombay.	Akola.	Nagpur.	Kurrachee.	Madras.	Calicut.	Coconada.	Total.

(A) Circulation transferred to Bombay on March 31st, 1882.
(B) Ditto ditto Madras ditto.
The figures are more fully given in Statement No. I.

14. On these the following remarks are offered :—

First, for Calcutta, I show for the last two years the figures of the circulation (in lakhs of Rupees) excluding the Reserve Treasury of Government—

Last day of	1880-81.	1881-82.	Last day of	1880-81.	1881-82.
April	563	580	October . . .	665	556
May	539	566	November . . .	745	531
June	586	569	December . . .	728	533
July	567	590	January . . .	644	536
August	540	527	February . . .	579	543
September . . .	585	591	March	587	549

In the last two years the conclusion from the figures thus compiled was "a low range of circulation from April to September, a sudden increase of over 1½ crores in the opening of the cold weather, and a rapid diminution in February." And I attributed these features chiefly to the preparations of the Banks for the cold weather trade, and their subsequent withdrawals of silver for the Burma and other inland trade.

In 1881-82, however, money was for several reasons so dear that the Banks did not prepare their supplies for the cold weather till the demand was upon them, and we find therefore a pretty equable circulation throughout the year.

15. In Bombay the same feature appears as did last year, the circulation outside the reserve treasury rising from 299 in April to 345 in September and November, and then diminishing to 315 in March. A sudden break in the regularity of these figures occurs in the temporary reduction of the circulation, on October 1st, to 309, and is due to the Bank of Bengal exchanging about 20 lakhs of Bombay notes, at Allahabad, for Allahabad notes, thus effecting a remittance from Bombay to Calcutta.

16. The Madras circulation fell from March (115 lakhs) till October (99 lakhs) and then rose till March (126 lakhs)—the same features as were exhibited last year.

17. The following figures show, in lakhs and thousands, the gross circulation in the head circles of notes not exceeding Rs. 100 each :—

Last day of	Calcutta.	Bombay.	Madras.
April 1881.	289·54	148·38	77·01
May „	280·07	153·05	72·58
June „	270·99	153·68	69·38
July „	275·11	153·77	67·96
August „	278·39	159·24	69·71
September „	302·22	154·57	66·77
October „	292·20	162·87	66·94
November „	294·11	159·77	69·80
December „	298·15	160·85	73·77
January 1882	301·24	157·90	75·76
February „	305·94	158·27	82·84
March „	304·73	159·16	86·86

But for the exceptional figure of September, these figures shew as last year a tendency to a minimum about September.

ANALYSIS OF CIRCULATION.

18. The following statement analyses the outstanding on 31st December 1881 by years of issue. As explained in former reports, the amount thus shown is necessarily much greater than the circulation of the date in question, as it includes, among other things, balances of notes held in the currency offices themselves for issue to the public :—

Outstanding of Notes.

Calendar year of issue.	Amount issued in official year.	Value outstanding on 31st December 1880.	Value outstanding on 31st December 1881.
	Rs.	Rs.	Rs.
1862	[illegible]	[illegible]	[illegible]
1863	4,75,91,000	1,17,250	1,10,540
1864	4,53,00,110	(a) 1,22,450	1,19,430
1865	10,10,04,920	1,07,340	1,02,540
1866	26,80,12,150	1,31,930	1,22,630
1867	33,06,49,710	1,65,810	1,29,290
1868	44,00,78,020	2,52,010	1,91,820
1869	49,34,48,480	2,04,000	2,00,750
1870	56,63,62,620	4,10,990	3,43,390
1871	62,25,21,200	3,84,940	3,77,400
1872	57,39,09,525	4,50,885	4,17,140
1873	61,69,24,575	7,08,475	5,80,195
1874	68,25,78,760	9,33,140	7,98,575
1875	62,69,70,815	13,75,040	10,91,920
1876	78,77,51,185	18,73,895	11,45,410
1877	99,52,50,980	33,82,000	18,73,510
1878	86,09,06,930	51,93,050	30,03,440
1879	81,51,93,855	1,79,04,540	59,04,540
1880	85,23,94,490	13,18,09,910	2,19,68,375
1881	71,74,55,450	.....	13,15,58,530
Total .	.....	16,58,73,095	17,03,31,085

(a) Corrected since last year's report by addition of 4,260.

THE RESERVE.

19. The value held against the net circulation upon 31st March 1882 was as follows:—

	Rs.	A.	P.			
SILVER COIN—						
At Calcutta	1,54,31,038	2	7			
„ Allahabad	1,24,39,855	0	0			
„ Lahore	1,61,70,955	0	0			
„ Bombay, including Nagpur and Akola	1,23,41,217	0	0			
„ Kurrachee	37,22,285	0	0			
„ Madras, including Coconada	82,84,105	0	0			
„ Calicut	10,17,095	0	0			
				6,94,06,550	2	7
SMALL SILVER COIN—						
At Bombay	1,00,000	0	0			
„ Kurrachee	40,400	0	0			
„ Madras	11,40,000	0	0			
				12,80,400	0	0
SILVER BULLION—						
At Calcutta	31,02,035	15	1			
„ Bombay	52,82,828	0	0			
				83,84,863	15	1
Invested in Government Securities	.....			5,99,99,965	14	4
TOTAL, AGREEING WITH THE NET CIRCULATION				13,90,71,780	0	0

20. The half-yearly verifications of the above coin and security balances were held as follows:—

	1st half.	2nd half.
CALCUTTA	Feb. 4, 1882	April 29, 1882
Allahabad	Sept. 22, 1881	March 31, „
Lahore	„ 28, „	„ 31, „
BOMBAY	„ 12, „	April 4, „
Kurrachee	„ 30, „	March 31, „
Nagpore	„ 22, „	*
Akola		*
MADRAS	Oct. 5, „	April 1, „
Calicut	Sept. 30, „	„ 14, „
Coconada	„ 29, „	*

* Abolished.

21. The verifications, so far as regards the coin at head-quarters, were all conducted by officers appointed by the Local Government, except at Calcutta, where the officer is appointed by the Comptroller General; and the coin at agencies is certified by the district officers in whose charge it is; but the verification is defective in the following respects:—

(1) Rupees 20,46,000, in transit from Kurrachee to Bombay, was not verified otherwise than by the counting after it arrived.

(2) The encashing chests in the suppressed circles of Nagpur and Akola (Rs. 4,21,295), appear to have been overlooked in the verification.

THE INVESTMENT.

22. Since last report the Investment Account has increased thus:—

	Stock certificate of 4 per cent. of 1842-43.	Purchase price.
Last year's report	6,24,62,900	5,99,24,184 2 4
Purchased on 15th December	74,800 at Rs. 1-5 premium	75,781 12 0
	6,25,37,700	5,99,99,965 14 4

being within 35 Rupees of the legal limit of six crores.

23. The new purchase was as soon as convenient converted into the same form in which we hold the rest of the investment, and the whole is at present

in my custody in the form of certificates of book debt of the Public Debt Office, namely:—

	Rs.	
No. 59 of 4 per cent. Loan of 1842-43 for	5,00,00,000	
„ 72 „ „ „	1,00,00,000	
„ 73 „ „ „	24,62,900	
„ 92 „ „ „	74,800	
		6,25,37,700

The book-value of the whole investment is Rs. 95·94 per cent.

PROFITS OF CIRCULATION.

24. Our account with the Treasury was clear at the date of last year's report. Since then there has fallen due—

	Rs.	A.	P.
A year's interest on Rs. 6,24,62,900	24,98,516	0	0
Interest from 15th December till 1st February, 1 month 16 days, on Rs. 74,800	382	5	0
Total due to Treasury	24,98,898	5	0
TOTAL PAID TO TREASURY	24,98,898	5	0

TRANSACTIONS WITH THE PUBLIC.

Issue and Receipt of Notes.

25. The following are the gross statistics of the year, the details by circle being shown in statement VI:—

	Rs.	Rs.
Gross circulation, April 1881	...	13,81,82,675
ISSUES—		
a—Over the counter	67,74,03,020	
b—At Agencies	77,17,075

TOTAL		85,50,05,590
RECEIPTS—		
d—Over the counter	56,32,79,438	
e—At Agencies	78,93,940	
f—From other currency circles	9,68,73,650	
g—For cash from encashing office	1,15,535	
h—In remittance transactions	4,45,34,615	
		71,06,97,175
Balance, being gross circulation, March 31st, 1882 (*vide* para. 10)		14,43,08,415

EXPLANATIONS.

a and *d*—These are the ordinary issues and receipts in exchange for other notes or for coin.

b and *e*—These are exchange transactions with treasuries, as the agencies do not deal direct with the public, but only enable the treasuries to do so to a greater extent than would otherwise be the case.

f—This figure represents notes cashed at other currency circles from March 16th, 1881, to March 15th, 1882, and returned during the year under report to the circles to which they belong.

g—Is explained in connection with the abolition of the Nagpur, Akola and Coconada sub-circles (para. 4).

c and *h*—These remittances are for the most part payments and receipts of one currency office, in consideration of receipts or payments at another.

COMPARISON—	Issues. Rs.	Receipts. Rs.
1881-82	71,68,22,915	71,06,97,175
1880-81	85,23,94,490	84,04,84,390
1879-80	81,51,93,855	80,79,23,265

26. It is in the "over the counter" transactions that there has been less activity than last year, and it is probably connected with the feature remarked on in paragraph 14—the greater equalness observable in the circulation throughout the year.

27. The aggregate issues and receipts of the several denominations of notes at both offices of issue and agencies during the year were as follows :—

	Number of Notes for Rupees								Total.	
	5	10	20	50	100	500	1,000	10,000	Number.	Value.
Issues	747,597	2,754,372	1,001,018	355,053	720,117	136,765	334,664	17,369	6,066,875	71,68,22,915
Receipts	706,303	2,659,262	1,022,912	362,058	713,104	136,245	337,639	16,494	5,954,017	71,06,97,175
More issues	41,294	95,110	...	...	7,013	520	...	775	144,712	98,68,870
„ receipts	...	...	21,894	7,005	...	...	2,955	...	31,854	37,43,130

28. So far as regards the three head offices, the average number of notes that passed over the counters on each working day during the past three years, and the daily average of cancellations during the same period, has been—

	Notes cashed.			Notes issued.			Notes cancelled.		
	1879-80.	1880-81.	1881-82.	1879-80.	1880-81.	1881-82.	1879-80.	1880-81.	1881-82.
At Calcutta	13,300	14,013	11,877	13,352	14,339	12,112	8,531	9,122	6,925
„ Bombay	4,567	4,932	4,625	4,709	5,265	5,111	2,381	2,624	3,118
„ Madras	1,420	1,732	1,897	1,631	1,708	1,960	927	1,360	1,559

29. The decrease in the figures of Calcutta is owing to a new practice there introduced in the month of August. The operations at the Calcutta office are divided into two parts :—

(1) Notes received from the Bank of Bengal which acts as a clearing-house for the other Banks, receiving and passing on to us the notes they receive out of general circulation, and similarly passing on new and re-issue notes to them—an operation by which the circulation of Calcutta is continually passing under the examination of our currency counters.

(2) Notes received from the rest of the public.

30. In the case of these last, the note receiver's stamp, impressed at the time of receipt at the counter, is a necessary link in tracing the history of the note, so that it was part of the system that all such notes should be cancelled and retained. Enquiry, however, showed that in the case of small notes nothing was really gained by thus preserving to the office facilities for answering enquiries about notes, and abandoning the simple rule of cancelling *all* such notes, we re-issued such as were perfectly clean. The saving (including what arises from a consequent alteration in the practice of the Bank of Bengal in its dealings with the Currency Office) is about 2,000 note-forms a day, value about fifty or sixty rupees.

The offices at Bombay and Madras have always re-issued such notes as were fit for re-issue; but they were relieved by this order from the necessity of recording in their counter registers the names of persons presenting small notes for payment.

31. I need not say we try to be particular about the cleanness of all notes given for re-issue. All attempts at forgery have been facilitated by the fact that dirty notes are in circulation, and though we cannot withdraw such notes, it is greatly to our interest to reduce the number of them as far as possible.

32. The change just noted was introduced concurrently with, and in fact partly hinged upon, another change of procedure, namely, that we refused to note stoppages against notes of 5, 10, and 20 rupees. The public, by unanimous consent, pass these from hand to hand without note or endorsement, and long experience has shown that no person ever gained the slightest advantage by our noting stoppage against them, that is, agreeing to notify to the stopper when and by whom the note was presented for encashment. We now tell people who write to stop notes of small value, that, as we are bound to pay the value of the note to bearer, we cannot take any steps to advertise or enforce their claims.

ENCASHMENT OF FOREIGN NOTES.

33. The following is the foreign note account of the circles in aggregate :—

	Rs.	Rs.
Balance held on April 1st	...	41,65,310
Received over the counter	9,58,37,875	.....
On payment of transfers or drafts issued . .	2,00,000	.....
From other circles	84,01,605	.....
At agencies	4,000	.....
		10,44,43,480
Total .		10,86,08,790
Remitted to the circles concerned		10,33,72,155
Balance held on March 31st		52,36,635
Total .		10,86,08,790

34. The following statement shows the statistics of the encashment of foreign circle notes, giving for the year an aggregate total, as just mentioned, of Rs. 9,58,37,875 :—

Statement of Foreign Circle notes cashed during the year 1881-82.

	Calcutta.	Allahabad	Lahore.	Bombay.	Akola.	Nagpur.	Kurrachee.	Madras.	Calicut.	Coconada.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Cashed by—											
Calcutta . .	...	2,03,50,360 (c)	2,07,39,130 (c)	46,20,685	48,910	1,57,870 30	5,11,290	23,02,585	5,57,635	3,33,115	4,96,15,610

Madras . .	1,81,100	9,770	33,275	20,68,600	5,100	7,855	14,680	...	40,60,260 (c)	10,68,085 (c)	74,48,725
Calicut . .	42,400	3,170	4,645	4,17,205	2,580	2,995	12,325	18,16,865	...	7,125	23,09,210
Coconada . .	18,005	755	950	2,175	5	20	...	4,65,180	4,010	...	4,91,000
Total ...	73,89,075	2,12,30,800	2,34,44,105	1,89,42,705	26,16,685	20,84,205	54,32,605	79,70,430	52,49,740	14,77,525	9,58,37,875

The letter (c) marks the cases in which the foreign notes are legally encashable.

35. The comparison for three years is as follows—

Notes cashed at—	1879-80. Rs.	1880-81. Rs.	1881-82. Rs.
Calcutta	3,81,82,120	3,89,08,405	4,96,15,610
Allahabad	...	5,155	1,47,67,080
Lahore	210	...	16,57,705
Bombay	53,90,775	1,65,13,125	1,92,27,615
Akola	11,09,565	11,030	715
Nagpur	3,88,680	59,215	3,05,295
Kurrachee	13,285	27,540	14,970
Madras	1,31,97,710	50,54,520	74,48,725
Calicut	34,85,590	26,53,800	23,09,210
Coconada	9,47,900	13,55,805	4,91,000
Total .	6,26,65,835	6,45,88,595	9,58,37,875

36. Thus under the requirements of the law, the amount of notes issued by each sub-circle and cashed at its head office were in—

	1879-80.	1880-81.	1881-82.
	Rs.	Rs.	Rs.
Calcutta	85,54,265	1,96,83,500	4,11,89,990
Bombay	24,21,355	53,79,320	86,64,445
Madras	55,29,785	42,22,140	51,28,345
	1,65,05,405	2,92,84,960	5,49,82,780

37. These figures are all very much larger than those of the two preceding years. The difference arises, in a great measure, from causes external to the Currency Department—the state of the money-market, the relations between the markets at Calcutta and Bombay, the activity of trade between Calcutta and the North-West. But the increased accommodation we have given to the public in respect of foreign notes has also in part arisen from our withdrawing the prohibition laid upon the Allahabad and Lahore circles during the Afghan war of using their coin for the encashment of foreign notes.

ISSUE AND RECEIPT OF COIN.

38. The transactions in coin are as follows (for details by circles, refer to statement VII) :—

	Coin.			Small Coin.		
	Rs.	A.	P.	Rs.	A.	P.
Balance, April 1st, 1881 ...	7,20,82,955	7	7	13,99,200	0	0

BALANCE, MARCH 31ST, 1882 (see para. 19)	6,94,06,550	6	8	12,80,400	0	0

	Receipts.	Issues.
	Rs.	Rs.
Comparison, 1881-82 ...	19,99,91,984	20,26,68,389
1880-81 ...	21,29,05,056	19,63,95,076
1879-80 ...	25,95,14,328	24,19,97,198

39. The receipts of coin over the counter have been smaller than last year, a diminution corresponding with that observed in the case of issue of notes.

THE STATE OF THE COINAGE

40. The Government has, during the year, both pursued and further developed its policy of clearing the coin circulation of the country of shroff-marked and under-weight rupees. By Resolution No. 2432, dated 17th August 1881, it accepted, for the present, the burden of their re-coinage, encouraging holders to deliver them to treasuries and currency offices by promising credit at full weight, so as to effect a general purification of the coinage in those places, chiefly the North-West Provinces, the Punjab and Bombay, where the practice of shroff-marking had prevailed and where a large proportion of old rupees was in circulation.

41. The following figures show the receipt of such coin in the currency offices, and the figures practically include treasury receipts also, inasmuch as the treasuries are directed to pass on their receipts to the currency offices, pending their transfer to the Mint for re-coinage.

Statement of shroff-marked, notched, and otherwise defaced silver coin received during 1881-82.

	Shroff-marked.	Notched.	Otherwise defaced.	TOTAL.
	Rs. A.	Rs. A.	Rs. A.	Rs. A.
Calcutta . . .	3,793 0	...	...	3,793 0
Allahabad . . .	34,66,760 0	25 0	59 0	34,66,844 0
Lahore . . .	20,74,000 0	...	...	20,74,000 0
Bombay . . .	75,490 8	889 0	294 12	10,40,969 4
Akola . . .	41 0	163 0	25 0	234 0

Madras . . .	5,719 0	4,29,571 2	98,118 12	5,33,408 14
Calicut . . .	5 0	14 0	20 8	39 8
	68,17,707 8	4,30,667 2	99,307 0	73,47,681 10

Allahabad disposed of its shroff-marked coin by sending 12 lakhs to the Calcutta Mint in December, but at the end of the year it held about 27½ lakhs more ready for remittance. Lahore sent 7 lakhs to the Bombay Mint in December and 13 more had in March been transferred to Bombay and was there held in readiness for the Mint. The Kurrachee receipt of Rs. 2,26,000 had also been sent to Bombay.

42. The following statement shews for the year the operation, throughout India, of the clauses of the Coinage Act which empower treasury and other officers to cut and break coin which does not come up to legal standard.

Statement showing the number of coins cut and broken under the Coinage Act in treasuries throughout India during the calender year 1881.

NAME OF PROVINCE.	Number of treasuries in which coins were cut.	Believed to have lost by reasonable wear more than 2 per cent. in weight.				Believed to be counterfeit.				Believed to have been reduced in weight otherwise than by reasonable wear.				Considered unfit for further circulation by reason of obliteration of device, or for other causes.			
		Rs.	½ Rs.	¼ Rs.	⅛ Rs.	Rs.	½ Rs.	¼ Rs.	⅛ Rs.	Rs.	½ Rs.	¼ Rs.	⅛ Rs.	Rs.	½ Rs.	¼ Rs.	⅛ Rs.

Total of 12 months	59,82,998 0 0	1,53,75,317 0 9
Additional, 1 per mille credited on account of melting fees paid out of Currency Reserve	4,645 2 10	9,492 2 8
Total Receipts	59,87,643 2 10	1,53,84,809 3 5
Total Receipts and Balance	65,79,582 5 5	1,54,03,895 6 11
Mint Certificates realised from Treasury	34,77,546 6 4	1,01,21,067 11 0
Balance of Bullion on 31st March 1882 (see para. 19)	31,02,035 15 1	52,82,827 11 11

45. The receipts for the last four years have been—

	Calcutta.	Bombay.	Total.
	Rs.	Rs.	Rs.
1878-79	1,33,83,139	4,64,75,139	5,98,58,279
1879 80	2,06,60,058	7,24,62,053	9,31,22,111
1880-81	56.21,217	2,55,86,599	3,12,07,816
1881-82	59,87,643	1,53,84,809	2,13,72,452

AGENCIES.

46. The following are the transactions at the agencies :—

	No. of Agencies.	Issues of notes.	Receipts of notes.
Agencies of the Calcutta Circle	15	530,500	537,950
,, Allahabad Circle	5	72,000	44,000
,, Lahore Circle	11	5,788,000	4,523,000
,, Bombay Circle	2	844,585	612,000
,, Madras Circle	2	331,990	865,990
	35	7,567,075	6,593,440

47. The following are the agencies enumerated in the above figures, the new ones being printed in italics :—

Calcutta Circle.	Allahabad Circle.	Lahore Circle.	Bombay Circle.	Madras Circle.
1. Backergunge.	1. Fyzabad.	1. Amritsar.	1. *Nagpur.*	1. *Coconada.*
2. Bhaugulpore.	2. Meerut.	2. Ferozepore.	2. *Akola.*	2. Vizagapatam.
3. Cachar.	3. Moradabad.	3. Kohat.		
4. Chumparan.	4. Roorkee.	4. Mooltan.		
5. Dacca.	5. *Agra.*	5. Peshawar.		
6. Darjeeling.		6. Rawal Pindi.		
7. Hazareebaugh.		7. Simla.		
8. Lohardugga.		8. Umballa.		
9. Monghyr.		9. *Bannu.*		
10. Moorshedabad.		10. *Jhelam.*		
11. Patna.		11. *Dera Ismail Khan.*		
12. Rajshahye.				
13. Sarun.				
14. Shillong.				
15. Sylhet.				

CLAIMS ON LOST NOTES.

48. The following is the statement of lost and mutilated notes paid during the year on bond of indemnity :—

	Nature of Loss	Number of Notes for Rupees								Number.	Value.
		5	10	20	50	100	500	1,000	10,000		Rs.
Half Notes	Lost by post	51	205	124	92	135	16	5	.....	628	85,885
	Lost accidentally	47	104	78	66	118	18	4	.....	435	80,935
	Mutilated	14	44	25	8	12	2	2	.....	102	5,360
		112	353	227	161	265	36	11	.....	1,165	72,180
Whole Notes	Lost by post	...	...	...	...	...	...	...	.....	...	...
	Lost accidentally	...	...	...	...	...	...	...	.....	...	...
	Mutilated	1	1	...	...	3	...	4	.....	9	4,315

* Excluding the "Vingorla" case, Rs. 3,50,000, the figure would be 93,720.

49. During the year the rules for claims on half-notes were reconsidered and revised. Formerly the claims were advertised in the Gazette, and payment made, on bond of indemnity, after two months' time; but experience led us to the conclusion that claims had been admitted, if not wrongly, at least after insufficient enquiry. We now require no advertisement, but we insist upon the claimant giving us as full evidence of his claim as he can, and if the case is accepted, the payment is ordered to be made at the end of six months if no reason to the contrary appear.

50. In the case of claims on lost notes also, the Government reconsidered its rules. The fact of the destruction being accepted, we used to pay the note, invest the amount in Government Securities, paying the interest on bond of indemnity to the claimant. Now, on the one hand, we admit the claim on the proof of extreme improbability that the note will again turn up, without insisting upon absolute proof of destruction; but, on the other hand, we hold the investment absolutely for twenty years, and then hand it over to claimant with its accrued interest on his giving a bond of indemnity.

51. Since these orders were passed a case has occurred which shows that the protection afforded by the new system is advisable.

FRAUD AND FORGERY.

52. No new cases of forgery or fraud occurred during the year, but two more notes (making 28 in all) of the J—9 series of forgeries (see para. 42 of last year's report) were presented for payment in Madras. This forgery has not yet been traced home to any person.

REMITTANCES.

53. The following are the remittances in actual coin made in the course of operations:—

	Rs.
1. Allahabad to Calcutta	36,66,000
2. Allahabad to Bombay	20,00,000
3. Lahore to Bombay	30,00,000
4. Lahore to Kurrachee and thence to Bombay	40,00,000
5. Madras to Bombay	30,00,000
6. Kurrachee to Bombay, in addition to No. 4	10,26,000
7. Nagpur to Bombay	5,00,000
8. Akola to Bombay.	12,00,000
9. Calicut to Madras	10,00,000

54. Of these, the first one and the last four may be said to have arisen from the obligation resting on each head office to cash the notes of its sub-circles, which obliges it to call in the corresponding coin if it is not able to dispose of it otherwise. The encashments of the head office were very much larger than the above figures, which must be regarded only as the balance which it was found necessary to remit in coin.

55. The large remittances from Lahore to Bombay had for their object the better distribution of coin, both currency and treasury, among the provinces. The Afghan war left us with a large hoard of coin at Lahore, gathered there to meet any emergency that might arise. It was found impossible to draw it away by bills, or by encashing foreign notes, for as soon as it went out into circulation, it was found to come back again in some form or other,—for example, Lahore notes were very largely taken by the public for coin, and remitted to Calcutta. The only way to get rid of the inconvenient accumulation at Lahore was by an actual remittance of coin; and it was sent in large quantities to Bombay, both because our reserves were weakest there, and because the remittance from Kurrachee to Bombay could be made by Government steamer.

56. The twenty lakhs remitted from Allahabad to Bombay was a further supply of the Bombay reserve out of the excess left in the Allahabad office, through large quantities of its notes being taken away for encashment at Calcutta.

57. The remittance, marked No. 5, of 30 lakhs from Madras to Bombay, was rather a treasury than a currency operation, though it was conducted by the Currency Department.

58. The remittance from Allahabad to Calcutta was made to serve the double purpose of adjusting the coin reserves, and removing from Allahabad to the Mint the shroff-marked and other defective rupees gathered in the North-West; that is, instead of making the remittance in good coin, it was made in coin which was intended to be immediately passed through the Mint. The same remark applies, in a less degree to the remittances from Lahore and Kurrachee to Bombay.

TREASURY STATISTICS.

59. The transactions in notes at the several treasuries in India during 1879-80, 1880-81 and 1881-82 have been as follows:—

	1879-80.	1880-81.	1881-82.
	Rs.	Rs.	Rs.
Receipts from the public in payment of Government dues.	4,65,63,395	7,96,68,115	8,00,32,905
Do. from the public in exchange for silver	2,90,69,610	3,84,21,600	3,21,81,910
Do. from the public for other notes	14,68,010	90,82,085	32,39,375
TOTAL RECEIPTS	7,71,01,015	12,71,71,800	11,54,54,190
Issues to the public in payment of Government dues	2,59,43,650	4,01,75,835	3,31,34,065
Do. to the public in exchange for silver	3,16 64,455	4,09,53,405	2,91,08,445
Do. to the public for other notes	14,68,010	90,82,085	32,39,375
TOTAL ISSUES	5,90,76,115	9,02,11,325	6,54,81,885

60. The total transactions in notes during the last three years have been as follows (in lakhs of Rupees):—

	1879-80.	1880-81.	1881-82.
Government of India	74	263	172
Lower Bengal	429	426	484
Assam	[illegible]	[illegible]	[illegible]
[illegible] Western Provinces and Oudh	[illegible]	[illegible]	[illegible]
Punjab	[illegible]	[illegible]	[illegible]
Madras	70	[illegible]	[illegible]
Bombay	14[illegible]	11[illegible]	[illegible]
Central Provinces	9[illegible]	9[illegible]	[illegible]
British Burma	14	12	1[illegible]
Hyderabad.	14	19	21
TOTAL	1,361	2,173	1,809

61. Statement IV classifies the Treasuries of the Government of India as follows:—

	1879-80.	1880-81.	1881-82.
Where notes were cashed throughout the year to the extent of the public demand	97	135	155
Where notes were ordinarily cashable, but not always	70	56	30
Where notes were not usually cashable	38	19	20
TOTAL No.	205	210	205

62. Statement V shews the proportion of Treasury and Bank balances which in each province was held in the form of currency notes. The state of the reserve treasuries greatly affects the comparisons in this statement. On December 31st, 1880, they held only 23 lakhs of notes and 52 of coin; on the same date in 1881, they held 142 of notes and 105 of coin.

RECEIPTS AND EXPENDITURE.

63. The receipts and expenditure of the Department is set forth in statement III. They can at present be stated only as approximate figures. I have no correction to report in the figures given under this head in last year's report; that is, though they were then given as only approximate, they were quite correct.

CONCLUSION.

64. I take the opportunity afforded by the re-arrangement of the circles of currency to shew the past history of the Department and of the circulation, in two statements which I have numbered VIII and IX.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN SIND.

No. 277-84I, dated Simla, August 3, 1882.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, No. 155W.I.-337, dated 16th June 1882, submitting Revenue Report of the Irrigation Department in Sind for 1880-81.

OBSERVATIONS.—The Capital expenditure during the year under review amounted to Rs. 2,71,933, and the total outlay incurred under this head up to the end of the year to Rs. 86,90,954, including direct and indirect charges. Of this amount Rs. 22,87,721 have been expended on Productive Public Works and Rs. 64,03,233 on other Irrigation works, for which Capital and Revenue Accounts are kept.

2. The total amount of interest charges payable during the year amounted to Rs. 3,68,442, which was less than the net direct and indirect revenue from works for which Capital and Revenue Accounts are kept by Rs. 2,25,977. The surplus of accumulated net revenue (direct and indirect) over the accumulated interest charges to the end of the year amounted to Rs. 42,01,794.

3. The gross receipts from all sources amounted to Rs. 26,25,894* during the year, the gross receipts of the previous year having been returned as amounting to only Rs. 9,51,705. The difference is mainly due to the revenue from "works for which only Revenue Accounts are kept," having been included in the revenue returns of 1880-81 and omitted from those of previous years. The revenue from these works amounted to Rs. 15,21,815 for 1880-81, and the balance, Rs. 11,04,079, exceeded the corresponding returns of the previous year by Rs. 1,52,374.†

	Rs.
* Water rates, &c. . . .	99,088
Collected with land revenue, . . .	25,26,806
TOTAL .	26,25,894

† Revenue from Productive Public Works and other works for which Capital and Revenue Accounts are kept—

	Rs.
1880-81	11,04,079
1879-80	9,51,705
TOTAL ...	1,52,374

4. The maintenance charges on irrigation works of all kinds amounted to Rs. 12,21,809, and the net revenue to Rs. 14,04,085. The net revenue from works for which Capital and Revenue Accounts are kept amounted to Rs. 5,94,419, and returned 6·84 per cent. upon the Capital outlay to the end of the year.

5. The total area cultivated under canal irrigation was 181,522 acres less than the average of the four years immediately preceding 1880-81.‡ The decrease was entirely caused by the lowness of the inundation of 1880 during the end of August and early part of September, and but for a sudden rise in the flood-level in the middle of September and a seasonable fall of rain, the decrease would have been much greater.

‡Year.

	ACRES CULTIVATED.		
	Kharif.	Rabi.	TOTAL.
Average of 4 years 1876-77 to 1879-80.	1,208,307	350,281	1,558,588
1880-81	1,215,052	162,014	1,377,066
1880-81	+6,745	−188,267	−181,523

6. The irrigating duty done by the water is shown below for the five canals, of which the discharges may be regarded as approximately correct—

Canal.	Average discharge in cubic feet per second.	AREAS OF DIFFERENT CROPS IRRIGATED.				AREAS IRRIGATED.		Total area irrigated.	Area irrigated per cubic foot per second.
		Jowari.	Bajri.	Rice.	Other crops.	By flow.	By lift.		
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Desert . . .	1,088	71,104	3,335	431	725	64,795	10,800	75,595	69·5
Begari . . .	2,260	58,781	231	6,027	6,155	61,962	8,232	70,194	31·0
Sukkur . . .	1,610	18,641	186	22,497	8,236	44,991	4,569	49,560	30·8
Mithrau . . .	944	250	14,458	29,266	6,318	33,015	17,277	50,292	53·3
Fuleli . . .	5,169	6,221	69,127	104,193	15,944	108,361	87,124	195,485	37·8

The high duty obtained on the Desert canal was evidently due to the large proportion of millets (jowar and bajra) irrigated from it; that on the Mithrao canal to the high proportion of lift irrigation and to the careful regulation of the supply in accordance with the demand. On the Begari canal the low duty must have been caused by a supply much in excess of the demand for water, and that on the Fuleli by the very large proportion of rice irrigation to the total area watered.

7. The maintenance charges averaged Re. 0·88 per acre irrigated, the average rate of maintenance on the Punjab inundation canals having been Re. 1·02 per acre during 1880-81, and Re. 1·05 per acre for the three years ending with 1880-81.

8. The cost of collecting the canal revenue, as given in paragraph 9 of the Superintending Engineer's reoprt (Rs. 2,53,162), seems very high, unless the cost of measurement and assessment of irrigated areas is included in the charge for collection.

9. The Government of India is glad to learn that, owing to the growing confidence of the cultivators in Sind in the stability of the protective embankments, and to the effective arrangements for an improved supply of water, there are good grounds for expecting a steady increase in the canal revenue of future years.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Government of Bombay in the Public Works Department for information.

Also, that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay, be forwarded for information to the Governments noted in the margin in the Public Works Department.

Madras, Bengal, North-Western Provinces and Oudh, and Punjab.

Also, that a copy of this Resolution, and of the Resolution by the Government of Bombay, be forwarded to the Department of Finance and to the Revenue and Agricultural Department for information; and to the Publisher of the *Gazette of India* for publication in the Gazette Supplement.

HENRY A. BROWNLOW *Colonel, R. E.,*
Deputy Secretary to the Government of India.

No. 143 W. I.—316, dated 9th June 1882.

RESOLUTION—By the Government of Bombay, Public Works Department,

Read—

Letter from the Secretary to the Government of India, No. 140I., dated 29th April 1882.

ABSTRACT.—In returning for revision the Revenue Report of the Irrigation Department in Sind for 1880-81, forwarded with this Government letter No. 94 W.I.—198, dated 27th March 1882, points out that the figures showing the total direct and indirect receipts of canal revenue for 1880-81, as entered in Table VI. attached to the report, do not agree with those shown by the Examiner in his accounts, the difference between the two sets of figures being Rs. 42,647; again, under the head "Working Expenses," there is a difference of Rs. 1,77,455 between the Examiner's figures and those given in Table IV. of the report. Requests, therefore, that steps may be taken to establish a proper system of intercommunication between the Local Government and the Examiner of Public Works Accounts, in order to avoid such discrepancies in future. The Examiner should lay his accurate figures before the Local Government, and the Government should allow the Examiner the opportunity of checking his figures in the draft report before it is finally printed off. Adds that the Examiner is responsible for supplying correct figures, and these figures, and none other, should be used in the report. The report, herewith returned, should be re-submitted with the necessary alterations as early as possible.

Memorandum from the Examiner of Public Works Accounts, No. H.—72, dated 20th May 1882.

Abstract.—With reference to Government Memorandum No. 278I., dated 12th May 1882, reports as below:—

The figures of the Examiner's accounts, alluded to by the Government of India, with which Tables IV. and VI. appear to have been compared, are apparently those exhibited in the General Abstract of Financial Results appended at pages 36 and 37 of the Revenue Report, and these are in accord with the General Revenue Accounts furnished by the Examiner, to the Superintending Engineer for Irrigation in Sind.

2. The difference under receipts is chiefly due to the Superintending Engineer having included in direct receipts, assessments of Rs. 42,646, on account of water-cess in Khelat Territory, *vide* note at foot of Table III., against which no credits for actual realisations were afforded to this Department in the Treasury Accounts for 1880-81. This amount is not included in the Examiner's figures as water-rates which are treated as direct receipts, are accounted for according to actual realisations in the year in which they are effected and credited to this Department in the Treasury Accounts. Realisations, amounting to Rs. 26,000, on account of the above assessments, have been paid into the Treasury to the credit of this Department, during the year 1881-82, and this will be included in the Revenue Accounts of the canals concerned for that year. It may be here observed that the Superintending Engineer had pointed out the omission of the water-cess in question in the General Revenue Account furnished to him, and its omission was explained in paragraph 1 of the Examiner's No. H.—158 of 28th November 1881 (extract attached). On comparing the Table VI. with the General Revenue Accounts, other slight differences of one or two rupees have been noticed in the figures shown against some of the canals, which it is hardly necessary to detail here. The net total difference is Rs. 42,647, as pointed out by the Government of India, of which Rs. 4,21,646 are on account of water-cess in Khelat Territory, and one rupee on account of minor differences.

3. Table IV. exhibits only direct outlay, and the figures shown under Revenue expenditure includes also outlay incurred on agricultural works, for which neither Capital nor Revenue Accounts are kept, while the Examiner's figures of working expenses include both direct and indirect charges, debitable to Revenue Accounts. The two sets of figures may be reconciled as follows:—

	Rs.	Rs.	Rs.
Direct outlay under Revenue Expenditure as shown in Table IV.			10,44,354
Add—			
Refunds of Revenue debited to Revenue Outlay omitted by the Superintending Engineer, as stated in paragraph 9 of the report,		603	
Outlay from contributions on Revenue Works included by the examiner, but omitted by the Superintending Engineer		6,888	
Indirect charges for collection of revenue by the Civil Department, separately shown by the Superintending Engineer in the last column of Table VII., included by the Examiner in working expenses:—			
As shown in Table VII.	2,53,162		
Deduct—Collection charges for Rs. 42,646 on account of water-rates in Khelat Territory, not taken into account by the Examiner, for the reasons stated in paragraph 2 above	4,265		
		2,48,897	
			2,56,388
			13,00,742

M

Deduct—		
Outlay in agricultural works for which neither Capital nor Revenue Accounts are kept, included in Table IV., *viz.*,—		
Kashmor Bund	54,798	
Kasimpur Bund, included in the expenditure shown against bunds in Rohri	24,135	
		78,933
Total working expenses as per Examiner's Accounts .		12,21,809

4. The Examiner begs to forward, for the information of Government, copy of letter No. H.—16 of 28th ultimo, which he has addressed to the Superintending Engineer after the receipt of the printed copy of the Revenue Report, in which necessary explanation has been afforded for including the charge Rs. 603 on account of refunds in the Revenue Outlay. The expenditure incurred from contributions for constructions of sluices at Kariah heads, &c., on canals has been included by the Examiner in the Revenue Accounts, as hitherto. It has, however, been since settled on a reference lately received from the Executive Engineer, Fuleli division, and with concurrence of the Superintending Engineer that such outlay is not strictly chargeable to Revenue, and accordingly it will be omitted in future Revenue Accounts, as stated in paragraph 3 of the Examiner's letter quoted above.

5. The following points are also noticed with regard to classification and details of expenditure in Table IV.—

(1.) The expenditure on Kashmor and Kasimpur Bunds has been shown under Revenue Expenditure, but it should have been shown separately under the heading "Ordinary Agricultural Works, for which no Capital and Revenue Accounts are kept," as desired in paragraph 9 of Government Resolution No. 482 of 5th September 1881.

(2.) Jhali Bund is treated as a part of Ghar Canal per paragraph 10 of the Government Resolution above quoted, and the expenditure incurred on this bund has been accordingly included by the Examiner in the working expenses of that Canal, but the Superintending Engineer has included it in the outlay shown in the Table against bunds in Right Bank.

(3.) Tools and Plant charges are accounted for separately in the Examiner's Accounts, whereas these are included in the Table with those for establishment.

(4.) Under Revenue expenditure, the Superintending Engineer has distributed the establishment charges (including those for Tools and Plant) under works *i. e.*, Extensions and Improvements) and Maintenance and Repairs, but no such distribution is recorded in the Examiner's Accounts, as this is not required to be shown in the Annual Finance or Administrative Accounts.

(5.) Likewise establishment charges for works for which only revenue accounts are kept are recorded in the Examiner's accounts in lump by each division. These have been distributed by the Superintending Engineer over different canals, which appear separately in the Table. As the canals, which are shown separately, are large, the Superintending Engineer has thought it proper to distribute the establishment charges, so as to show the total expenditure on each, and the Examiner has no objection to this being done, but he has no ready means in his office to check the figures without making special calculations.

(6.) In conclusion, the Examiner begs to state that the discrepancies between the Revenue Report and the figures given by his office may be explained by the addition of brief foot-notes to Tables VI. and IV. Instructions may also be issued to the Superintending Engineer to avoid such discrepancies in future by following the figures furnished by the Examiner in the General Revenue Accounts.

Memorandum from the Examiner of Public Works Accounts, No.H.—97, dated 31st May 1882.

Abstract.—With reference to Government Memorandum No. 298I., dated 29th May 1882, returns the Revenue Report of the Irrigation Department in Sind for 1880-81, with the addition of requisite notes in Tables IV. and VI., explaining the differences pointed out by the Government of India; states that it is inconvenient to make any alterations in the printed figures, and trusts that the notes, now made in the Tables, will suffice.

RESOLUTION.—Copy of the report, with the addition of the requisite notes to Tables IV. and VI., should be forwarded to the Government of India, with copy of this Resolution, in reply to their letter No. 140 I., dated 29th April 1882.

2. A copy of the corrected report should also be forwarded to the Commissioner in Sind and to the Chief and Superintending Engineers for Irrigation, for information and guidance.

3. The Superintending Engineer for Irrigation in Sind should be again reminded that the Examiner of Public Works Accounts is responsible for supplying correct figures, and that these figures must invariably be used.

C. J. MERRIMAN, Major-General, R. E.,
Secretary to the Government of Bombay.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15th AUGUST 1882.

GENERAL REMARKS.—There has again been good rain in all districts of Assam and Bengal, excepting Hazaribagh. In the North-Western Provinces and Oudh heavy rain has occurred in the Benares Division and Fyzabad, but there has been little or no rain elsewhere. In the Punjab only three districts have reported some showers. In Rajputana and Central India there has been a little rain in a few States. In the Central Provinces there has been cloudy weather, with occasional showers. Heavy rain in Raipur and Sambalpur. The Bombay Presidency has had rain in varying quantities in almost all districts, the notable exception being parts of the Deccan. The Berars have had no rain. In the Nizam's territories there has been a light fall. Mysore has reported rain in all districts. Coorg continues to receive a comparatively heavy rainfall, though not so heavy as in previous weeks. The Madras Presidency has enjoyed a good light rainfall in all districts, except Malabar where it was heavier. In British Burma there has been heavy rain, especially in Moulmein.

The agricultural prospects are as follows. Excessive rain has somewhat injured standing crops in one or two districts of Madras, in parts of Coorg, in the western tracts of Mysore, and in a few places in the Central Provinces.

A break in the wet weather has improved crops in the Central Provinces and in Jhánsi. Timely rain has improved prospects in parts of Madras, North-Western Provinces and Oudh, Bengal, Assam, and the Nizam's territories, which needed it.

More rain is, however, required in a few districts in Madras and the Deccan and in some of the Rajputana States; also in the larger part of the North-Western Provinces and Oudh and the Punjab.

The rise in the barometer noticed in last week's report was followed by a slight fall, but the general tendency has been towards a rise all over India at the end of the week, and, except around the margin of the Indian area, the pressure has risen above the normal average.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Aug. 16th)		
Bellary ...	1·78 (average of six stations).	Standing crops generally good, though dry partially withering and diseased; agricultural operations progressing.
Kurnool ...	1·17 (average of nine stations).	Prospects improved; standing crops generally benefitted by timely showers; cattle-disease in parts.
Ganjam ...	1·22 (average of thirteen stations).	Standing crops thriving; harvest summer paddy, outturn average; fever, small-pox, and cattle-disease exist; cholera subsiding; transplanting paddy extremely backward owing to insufficient rain.
Kistna ...	·87 (average of nine stations).	Standing crops fair, but require water; fever and cattle-disease prevalent; small-pox slight.
Chingleput (Madras) ...	1·18 (average of ten stations).	Standing crops good under larger tanks and channels; agricultural operations progressing; cholera and small-pox in parts.
Coimbatore ...	·66 (average of eleven stations).	Paddy promising well; dry crops damaged by rain; want of rain felt; insects in some places; harvest dry crops, outturn about average; small-pox, fever, and cholera in parts.
Tanjore ...	·95 (average of twelve stations).	Crops good, except in parts damaged by breaches, withering in parts of one taluk for want of rain; cattle-disease in parts of one taluk.
Madura ...	·51 (average of six stations).	Standing crops fair, though withering in two taluks; harvest paddy, yield below average; fever and cholera in parts.
Malabar ...	7·54 (average of fourteen stations).	First crops generally good; small-pox, cholera, fever, and cattle-disease slight.
Travancore ...	3·54	Paddy crops beginning to ripen; fever continues. *General Remarks.*—General prospects good.
Bombay—(Aug. 16th)		
Kurrachee ...	Kurrachee, 89; Kotri, 2·65; Bulakhan, 1·25; Jerruck, 1·55; Keli, 1·61; Mirpur Botoro 3·0; Sujawal, 4·10; Jati, 2·30 Manjhand, 1·36; Mugulbin, 2·32.	Weather cloudy and damp; strong westerly breeze; fever in four talukas; 4 cases of small-pox in Tatta taluka; freshet from Gaj on 2nd; wheat, red rice, and *bajri* in Kurrachee 22, 36 and 35, in Manjhand 24, 44 and 46, in Ghorabari 18, 44 and 42, and in Jati 20, 40 and 44 lbs. per rupee, respectively.
Hyderabad ...	.....	River still in high flood; fever in three talukas; wheat 25, *juari* 45, *bajri* 40, red rice 30, and white rice 22 lbs. per rupee.
Ahmedabad ...	·08	Total rainfall 27·32; sowing of *bajri*, &c., completed; transplantation of rice continues; in Ahmedabad city 4 cases of cholera, all of which fatal; wheat 27 and *bajri* 31 lbs. per rupee.
Baroda ...	.....	Young crops thriving; cholera increasing at Amreli and decreasing at Manekwara; *bajri* 30 and common rice 24 lbs. per rupee.
Surat ...	·53	Total rainfall 32·44; crops generally healthy; *juari* 35 and *nagli* 52 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik ...	Igatpuri, 2·56; Peint, 1·31; slight showers elsewhere.	Rain much wanted in Yeola and Baglan; sowing nearly completed; crops doing well; locusts continue in Nandgaon; slight cholera in Násik, Sennar, and Baglan; wheat 25, *bajri* 38, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	Rain every day, except on 9th; total of week ·61.	Total rainfall to date 57·06, being 4·56 above average; average abnormal temperature 1° warm; vapour in air normal; abnormal wind from north-east on 9th, 10th, and 11th, from south-west on 15th; wind normal from 12th to 14th.
Poona ...	.....	Young crops suffering as usual from want of rain in Bhimthari, Indapur, and Sirur talukas; 13 cholera cases in Sirur and Bhimthari talukas, of which 6 fatal; *bajri* 45¼ and *juari* 59¼, in Poona *bajri* 36¾ and *juari* 47¾ lbs. per rupee.
Ahmednagar ...	Very slight rain in Akola, Parner, Sheogaon, Nagar, Sangamner, and Rahuri; none in the rest.	Total average rainfall of the district 11·32; from want of rain *bajri* crop is withering in all talukas, except in Jhamkhed and Akola; cattle-disease in Nagar, Sheogaon, and Akola; cholera—in Parner 27 cases, 11 deaths, in Shrigonda 17 cases, 7 deaths, in Sheogaon 2 cases fatal; *bajri*—maximum 66 lbs. in Jhamkhed and minimum 43 in Shrigonda; *juari*—maximum 102 lbs. in Jhamkhed and minimum 54 in Kopergaon.
Sholapur ...	2·30; moderate rain everywhere.	Total rainfall 19·94; cholera more or less throughout, maximum number of cases in Barsi 51, minimum 1 in Malsiras—total cases 160, deaths 65; *bajri* 57 lbs. 3 tolas and *juari* 80 lbs. 37 tolas per rupee.
Dharwar	Good rain in eastern parts of district; Nargund, 4·54; Gadag, 3·33; Mundargi, 3·29; elsewhere—maximum at Hangal, 2·40; minimum at Karajgi, ·33.	Rain wanted in Ron; damaged crops improving by the break; land being prepared for cotton; *juari* sowing almost completed; public health good; cattle-disease in Hangal and Bankapur; prices stationary.
Kanara ...	**Karwar, 5·43; Kumpta, 3·99; Sirsi, 6·01; Hallial, 2·87.**	**Total rainfall 85·78; rice, *ragi*, and sugarcane plants healthy; early rice crop in ear near Karwar; rains abating, and prospects improving; general health good; common rice in Karwar 11 seers, in district average 13¼ seers per rupee.**
Rajkot ...	.....	Weather dry; crops thriving; cholera in some places; *bajri* 26 and *juari* 31 lbs. per rupee.
		General Remarks.—Rain in Kurrachee and floods in Shikarpur; break in weather general in Presidency districts; young crops are doing well, except in Kaladgi and parts of Ahmednagar, Poona, and Násik, where they are withering for want of rain; locusts in Khandesh and Násik; fever and cattle-disease in some districts; cholera in most districts of the Deccan and Southern Mahratta Country and in thana Khaira and parts of Kattiawar.
Bengal—(Aug. 16th)		
Chittagong ...	3·13	Weather seasonable; prospects of crops fair; cultivation of winter rice continues; prices steady; cholera, small-pox, and cattle-disease still prevail.
Dacca ...	3·55	Rain has done good to crops; cholera abating.
24-Pergunnahs (Calcutta)	1·84	Prospects of jute, early rice, and sugarcane continue satisfactory; cultivation of winter crops going on; insufficient rain has retarded transplanting of rice seedlings to some extent, but the crops not unpromising; prices of common rice unchanged; public health generally good; some sporadic cases of cholera reported from Diamond Harbour sub-division.
Moorshedabad ...	**2·97**	Prospects of crops better owing to late rain, but more rain still wanted for transplanting winter rice; autumn rice being harvested; except a little fever, public health fairly good.
Rajshahye ...	1·78; Nattore, 1·54	Rain of 14th will do some good to crops; winter rice being transplanted; fever abating.
Burdwan ...	0·63; Cutwa, 3·55; Culna, 0·89; Raniganj, 2·46.	Prospects of crops somewhat better, especially in Cutwa and Raniganj; fever and cholera reported.
Rungpore ...	3·38	Weather cloudy; transplanting of winter rice resumed; more rain wanted; public health good.
Bhagálpur ...	2·80	Prospects of crops good; rain has done much good to the young seedlings of winter rice.
Purneah ...	6·92	Prospects of crops very much improved; some autumn crops being harvested; transplanting going on vigorously; health fair; rivers high.
Patna ...	6·67	Prospects of autumn crops favourable; transplanting of rice seedlings going on in low lands; prospects better than last week; cholera has not yet disappeared from Barrh and Behar sub-divisions.
Durbhunga ...	**8·87**	Prospects of crops greatly improved; transplanting progressing vigorously; prices stationary; health improved.
Hazáribágh ...	*Nil*	Weather hot and close; autumn crops doing well; rain wanted for transplanting rice; small-pox still reported from one or two thanas, but general health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	1·31	Rivers have receded; prospects of crops excellent; cholera still prevalent.
		General Remarks.—Rain fell in all districts during the week, except in Hazaribagh; general prospects have improved, but rain is still much wanted in many districts; cultivation of winter rice has been resumed, and is progressing favourably where the rain was abundant during the week; early rice and other autumn crops and sugarcane are doing well; early rice and jute are being harvested in some districts, with fair average outturn; sporadic cases of cholera and small-pox still reported from some districts; fever has appeared in some districts, it is increasing in Nuddea, and is prevalent in Backergunge, but is said to be abating in Rajshahye.
N. W. Provinces and Oudh—		
Benares (Aug. 15th)	11·3; Chandauli, 6·6; Gungapore, 4·2.	Sufficient rain now fallen for transplanting late rice; health of cattle good; some isolated cases of cholera are still reported; markets well supplied; prices falling.
Cawnpore („ „)	No rain, except 0·1 in Bilhaur.	Weather somewhat cloudy; prospects excellent, but rain wanted for some crops; cholera increasing; prices stationary.
Allahabad („ 16th)	Hardly any rain during the week, none in five tahsils.	Rain much wanted, especially for *bajri* lately sown; rice much injured by long break; cholera rapidly decreasing in amount and virulence; prices rising.
Gorakhpur („ 15th)	Average 10·0; heavy rain all over the district for the last three days.	Rice crops greatly benefited; prospects good; health fair; slight cholera; prices falling.
Jhánsi („ 14th)	.....	Break in the rains has done good to standing crops, those which looked the worse from excessive rain are reviving; weeding of cotton and *juari* in progress; prices stationary; cholera continues in two villages, but has disappeared in Segowlie; cattle-disease is reported from parganas Jhánsi and Mau.
Agra („ 15th)	No rain	Slight fever continues in six parganas; no cholera now in Ferozabad; general health good; prices slightly falling.
Farukkabad („ „)	Light rain in one tahsil, none elsewhere.	Rain much needed; prices steady; cholera still reported from Aligarh, but there were few fatal cases.
Bareilly („ „)	0·8	Weather hot, but seasonable; crops excellent; cholera on the increase and fever rather prevalent.
Meerut („ „)	Slight shower yesterday.	Hot westerly wind and clear sky till 13th, since then less heat and more cloud; rain much wanted; irrigation commenced where available; health good; supplies sufficient, but prices rising.
Kumaun („ „)	**Rain light**	**Crops very good; health good generally speaking; cattle-disease somewhat less; no change in prices.**
Lucknow („ „)	Sadr, 1·0; Maliabad, 0·5; Mohanlalganj, 0·2.	Crops much benefited by the rain, but more still wanted; rice crop suffering in Mohanlalganj for want of sufficient rain; much sowing going on; cholera still continues in city and district; prices steady.
Rae Bareli („ 14th)	Sadr, 0·3; Digbijaiganj, 1·4.	Cholera on the increase; cattle-disease continues in some villages of tahsil Dalman; agricultural prospects fair; prices stationary.
Partabgarh („ 15th)	.....	Crops doing very well at Kunda and Patti; more rain wanted at Sadr, where *juari* and *bajri* are suffering somewhat from drought; general health fair; cholera in two tahsils.
Sitapur („ „)	Sitapur, 1·1; Sidhauli, 3·3; Biswan, 2·4.	Rain has done much good; rice everywhere improved; cholera still bad; prices slightly rising; markets well supplied.
Fyzabad („ „)	Sadr, 6·5; Akbarpur, tehsil, 5·3; Bikapur, 4·0; Tanda, 4·7.	*Kharif* crops promising; slight cholera at Sadr and tahsils; cattle-disease in tahsils Bikapur and Akbarpur.
		General Remarks.—Heavy rain in Benares division and Fyzabad, prospects much improved there, elsewhere a break in the rains has set in which is beneficial in Jhansi, but is causing injury in other districts; prices on the whole stationary; slight cholera general, except in Meerut division, but is decreasing in eastern districts; fever has appeared in Rohilkhand; cattle-disease continues in Oudh, Jhánsi, and Saharanpur.
Punjab—(Aug. 16th)		
Delhi ...	Rain required	Health fair; slight rise in prices of food-grains.
Hissar ...	.....	Crops suffering from want of rain; health good; prices rising.
Umballa ...	.....	*Kharif* sowings finished; health fair; prices rising; rain required.
Jullundur ...	No rain	Crops withering; health good; prices rising.
Amritsar ...	0·70	*Kharif* sowings completed; health good; prices rising.
Sialkot ...	0·50	Health good; prices rising.
Lahore ...	No rain	Health good; prices stationary.
Ferozepore ...	No rain	Health good; prices stationary.
Mooltan ...	.....	No report received.
Rawalpindi ...	3·90	Health good; prices falling.
Dera Ismail Khan ...	No rain	Agricultural prospects and health good; prices steady.
Peshawar ...	No rain reported	*Kharif* prospects and health good; prices stationary.
		General Remarks.—More rain is required in the Delhi, Hissar, Umballa and Jullundur districts; in Hissar and Jullundur the crops are suffering from want of moisture; the health of the province generally is good; prices of food-grains generally show a tendency to rise.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Nagpur (Aug. 16th)	·18	Weather warm and cloudy; crops much improved by th continued break; cholera reported; prices of grain low.
Jubbulpore („ 15th)	·07	Weather cloudy: break beneficial for weeding operations which are in progress; cholera is abating.
Saugor („ 14th)	.....	Weather clear, favourable to crops; some damage caused by previous wet weather; cholera abating; prices stationary.
Seoni („ 15th)	·50	Break has facilitated weeding; *kharif* crops flourishing; cholera and small-pox prevailing.
Khandwa („ „)	·13	Weather cloudy and close; *kharif* prospects good; cholera prevalent; wheat 14 seers per rupee.
Hoshangabad („ „)	·12	Cloudy, with occasional showers; weeding in progress; small-pox and cholera prevalent; rice 9 seers per rupee.
Raipur („ 12th)	5·87, heavy rain	Weather cloudy and close; *kharif* crops progressing; cholera prevalent; rice 15 seers per rupee.
Sambalpur („ 10th)	9·21, heavy rain	Break much needed; fever prevalent; rice 36 seers per rupee.
		General Remarks.—Weather cloudy and close, with occasional showers; break has facilitated weeding operations; *kharif* crop promises favourably; cholera and small-pox still reported; prices stationary.
British Burma— (Aug. 16th)		
Akyab ...	7·20	Total rainfall 156·09 inches; 4 deaths from cholera in one township, disease also prevailing in another township, small-pox in one township, otherwise public health good; cattle-disease severe in one township; sowing nearly finished.
Rangoon ...	4·37	Total rainfall 54·66 inches; 1 fatal case of cholera, otherwise public health good; progress of crops favourable.
Bassein ...	8·72	Total rainfall 82·90 inches; 27 deaths from cholera in one and 16 in another township, also 1 death in Bassein town, otherwise public health good; cattle-disease in three townships; ploughing and planting out proceeding favourably.
Prome ...	2·31	Total rainfall 25·16 inches; no deaths from cholera in Prome town, but 14 deaths in Mahathaman township, otherwise public health good; ploughing proceeding.
Amherst (Moulmein) ...	15·33	Total rainfall 141·92 inches; public health in Moulmein and district good; cattle-disease still prevalent in three townships; resowing at places where crops destroyed by excessive rain.
Toungoo ...	2·65	Total rainfall 53·06 inches; 1 death from small-pox in town, otherwise public health fair; slight cattle-disease in two townships.
		General Remarks.—Cholera in Akyab, Tharrawaddy, Bassein, Henzada, and Prome and a few cases elsewhere; a little small-pox in Akyab and Toungoo, public health otherwise good; cattle-disease still prevalent in many places.
Assam—(Aug. 16th)		
Gauhati ...	5·03	Rain very opportune and apparently sufficient for transplanting operations; river rising; public health good.
Sylhet ...	6·12	Cultivation for, and transplantation of, *sali* paddy going on rapidly; *aus* paddy being harvested, a better crop than expected; some *amun* in some danger from rapid rise of waters; weather good for tea.
Cachar ...	4·30, rainy	State of *dumahi* and *murali* crops and tea favourable; transplanting of *sali* crops going on; common rice 25¾ seers per rupee; health good; no more cattle-disease reported.
Dibrugarh ...	2·82	Weather seasonable; *sali dhan* being transplanted rapidly; *ahu dhan* nearly harvested; public health generally good; cattle-disease still continues in a few places.
Mysore and Coorg— (Aug. 16th)		
Bangalore ...	1·07	Crops in good condition; prospects favourable.
Mysore ...	2·40	Crops in good condition; prospects favourable.
Mercara ...	6·36	Monsoon continues, but is lighter; transplanting of rice nearly finished; the crop in the north-east Coorg and young coffee plants have suffered from excessive rain.
		General Remarks.—Rain has fallen generally throughout the Mysore State, largest quantity 2·58 at Chickmagalur; crops in good condition, but those on the western side of the State are suffering from excessive rain; propects favourable; public health good; prices satisfactory.
Berar & Hyderabad— (Aug. 16th)		
Amráoti ...	.....	*Kharif* and cotton crops progressing favourably; price of wheat 16 and *juari* 28 seers per rupee.
Akola ...	.....	Crops in good condition; prospects favourable.
Hyderabad ...	2·33	*Kharif* crops benefited; *rabi* sowings recommenced, except in one taluka where there has been very little rain; prices—wheat 15¾, coarse rice 10¼, white *juari* 25¾, yellow *juari* 30, and *tur* 26½ seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States— (Aug. 16th)		
Indore ...	·93	Prospects unchanged; a few cases of cholera in Indore city, otherwise health good.
Morar (Gwalior) ...	No rain	Health and prospects good; rain much needed for crops.
Sutna ...	·03	A few cases of cholera at Sutna; prospects good.
Rutlam ...	.....	From 29th July to 4th August, 34 cases of cholera, of which 18 were fatal.
Neemuch ...	No rain	Public health good; crops thriving.
Goona ...	No rain	Health good; wheat 21 seers per rupee; prospects fair.
Bhopal ...	·07	Prospects of crops good.
Agar ...	.....	The break in the rains continues; prospects good; health at Agar good; prospects of crops good.
Nowgong ...	·01	*Kharif* crops good; prices stationary; cholera still prevalent, and a few cases of small-pox.
Manpur ...	No rain	Health good; prices stationary.
Rajputana—		
Abu (Aug. 16th)	·91	Weather gloomy, with occasional showers.
Sirohi („ 13th)	.....	Tanks, wells, health, and prospects good.
Marwar („ 11th)	No rain	Four months' water in tanks; wells almost full; health good; crops in good condition; weather cloudy; winds sharp; nights cool; prices stationary.
Meywar („ 12th)	No rain	Tanks and wells good; health fair; crops very good.
Harowti („ „)	No rain	Crops good; weeding progressing; cholera prevails, though less at Tonk; weather cloudy and warm.
Jhallawar („ 9th)	2·20	Weather bright; prospects fair.
Ajmere („ 15th)	No rain	Sowing continues; prospects good; health fair, but cholera not quite disappeared.
Jeypore („ „)	*Nil*	Prices stationary; cholera in city slightly on the increase, averaging 6 fatal cases daily.
Ulwur („ „)	.....	The break in the rains continues; rain wanted; prices steady; health fair.
Nepal—		
Katmandu (Aug. 11th)	5·09	Weather cool; outturn of Indian-corn likely to be below average; rice doing well.

Circular No. 95G.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (General),—under date Simla, the 10th August 1882.

Read—

Correspondence regarding an earthquake felt in the Nicobar and Andaman Islands on the 31st December 1881.

Proceedings in the Department of Public Works during 1878-1879-1880 on the subject of seismological observations in India.

RESOLUTION.

In 1877 it was suggested by the Royal Society of Great Britain that a systematic observation of earthquake shocks should be instituted in India through the medium of the principal telegraph stations. The scheme was discussed, but eventually was abandoned owing to circumstances which prevented the Society from co-operating, and no efficient means of observing the phenomena of earthquakes in British India at present exist.

2. The Superintendent of the Geological Survey and the Meteorological Reporter to the Government of India have frequently represented the desirability of establishing at a small number of places some cheap and simple means of taking such observations in future. The Superintendent of the Geological Survey states that a set of instruments of the kind detailed in the margin, which will enable the direction and strength of an earthquake to be approximately recorded, can be procured at a cost of Rs. 105. A shed or small room would also be needed, but the entire cost of the instruments and building would probably not exceed Rs. 250 for each station. By attaching the stations to 1st or

Set of eleven brass cylinders; pillar 6″ square, 7′ long; measuring rod; compass with swinging card; spirit-level; set of eleven wooden pegs and discs.

2nd Class Meteorological Observatories no expenditure would be required on establishment, as the duty of looking after the instruments and registering the results on the occurrence of a shock could be performed by the Meteorological Observer with very little extra trouble.

3. The Meteorological Reporter having been consulted as to these proposals, the Government of India has resolved to sanction a sum of Rs. 2,000 for the purchase of the necessary instruments and the erection of observatory sheds at such meteorological stations in Bengal and Northern India as may be decided on by the Superintendent of the Geological Survey and the Meteorological Reporter to the Government of India in consultation.

The arrangements when completed should be reported by these officers for the information of the Government of India.

ORDER.—Ordered, that a copy of the above Resolution be forwarded to the Superintendent, Geological Survey, and Meteorological Reporter to the Government of India for information and guidance, and to all Local Governments and Administrations,* and the Departments of Finance and Public Works for information.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 16th August, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.

BURMA STEAM-BOILERS AND PRIME-MOVERS BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to provide for the inspection of Steam-boilers and Prime-movers attached thereto in British Burma be taken into consideration. He said:—

"This Bill was introduced by Mr. Stokes on the 2nd of March. Its object is to make provision for the inspection and licensing of steam-boilers and

prime-movers in British Burma, and it is framed on the lines of the Bengal Act, III of 1879, which provides for the inspection of steam-boilers in Calcutta and the neighbourhood.

"The Bill extends, in the first instance, only to the towns of Rangoon, Maulmain, Akyab and Bassein, but there is power to extend it to other parts of British Burma by notification. It has been published three times in the *British Burma Gazette*, and has been commented on by the Chief Commissioner and certain of his officers and others whom he has consulted. The Select Committee have taken into consideration the suggestions made for the amendment of the Bill, and adopted such of them as appear practicable and expedient. There is, however, one suggestion of importance which we have not adopted, and it is this: it is a suggestion of the Chief Commissioner that the Bill should be made applicable to steam-launches. We considered this suggestion, but came to the conclusion that it would be more convenient to provide for steam-launches by the measure now in preparation for the survey of steamers.

"The Report of the Select Committee was presented on the 12th of July, and I presume that it has been in the hands of Members of Council."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill as amended be passed.

The Motion was put and agreed to.

INDIAN RAILWAY ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Hope be added to the Select Committee on the Bill to amend the Indian Railway Act, 1879.

The Motion was put and agreed to.

CENTRAL PROVINCES TENANCY BILL.

The Hon'ble MR. CROSTHWAITE moved that Major the Hon'ble E. Baring and the Hon'ble Sir S. C. Bayley be added to the Select Committee on the Bill to consolidate and amend the law relating to Agricultural Tenancies in the Central Provinces.

The Motion was put and agreed to.

CENTRAL PROVINCES LOCAL RATES BILL.

The Hon'ble MR. CROSTHWAITE also moved that His Honour the Lieutenant-Governor of the Panjáb be added to the Select Committee on the Bill to provide for the levy of rates on land in the Central Provinces.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 30th August, 1882.

SIMLA;
The 16th August, 1882.

IRRIGATION BRANCH.

IRRIGATION OPERATIONS OF THE NORTH-WESTERN PROVINCES FOR THE RABI SEASON, 1881-82 (1st OCTOBER TO 31st MARCH.)

No. 1931 I., dated Allahabad, 2nd August 1882.

RESOLUTION—By His Honor the Lieutenant-Governor, North-Western Provinces and Oudh.

Read—

Statements A. 14, B. 14, C. 14, for Rabi, 1881-82.

OBSERVATIONS.—The season was remarkable for the early cessation of the monsoon rains and for the almost entire absence of winter rain. These circumstances were eminently favourable to a large area of canal irrigation, while the extension of the Lower Ganges Canal increased the field of operations, and it is not therefore surprising that the area, 1,209,823 acres, should be the highest on record, being 177,813 acres more than the area of 1880-81 and 133,871 acres more than that of 1878-79, the last year of drought, and hitherto the largest area irrigated in the rabi harvest.

In comparing the irrigation of 1881-82 with that of the previous years, it must be remembered that the conditions of the two years were much the same in the lower doab, while they differed only in the upper. In both years the winter rains were deficient; but in 1880-81 there were very heavy floods in the middle of September in the Sub-Himalayan districts, which enabled crops to be grown in those districts without canal water. In comparing the two years, therefore, it is not remarkable to find that the great increase in 1881-82 is in the upper tracts, that is in the upper divisions of the Ganges Canal, while the increase in the lower tracts is not so great as might have been expected, and is due to extension of irrigation more than to the differences of the seasons.

2. The following table compares the rabi areas of the four years 1878-79 to 1881-82 :—

Canal.	1878-79.	1879-80.	1880-81.	1881-82.
	Acres.	Acres.	Acres.	Acres.

Hamirpur	1,026	908	442	1,300
TOTAL	1,075,952	844,330	1,032,010	1,209,823

* The Cawnpore and Etáwah branches below Nagiria and Jera at miles 48 and 39 respectively.

In this table the terminal divisions have been separated from the Lower Ganges Canal in order to show clearly the increase on the new canal.

The above table brings out clearly what was stated in para. 1 regarding the effect of the seasons on the areas irrigated in the upper and lower tracts respectively.

The irrigated area of the Upper Ganges Canal is greatly in excess of that of 1880-81, when abundant rain fell late in the autumn, and is naturally much greater than that of a normal year such as 1879-80, but it is almost exactly the same as the area of 1878-79, the last year of drought.

The irrigated area of the terminal divisions varies little from year to year, in fact it may be almost said of them that year by year the area is limited only by the water available; but in the two latter years the increase of area shows that the competition for water was equal, and the increase is doubtless partly due to the additional volume made available by the opening of the Lower Ganges Canal. The slight increase over the previous year of the irrigated area of the Lower Ganges Canal is due to the abnormal amount irrigated in 1880-81 owing to the deficiency of rain in the lower doab, as explained in para. 2, North-Western Provinces Resolution No. 820A., dated 4th July, 1881. The area of nearly 150,000 acres attained in 1881-82, the fourth year of the operations of the canal, may, however, be considered satisfactory.

The irrigated area of the Agra Canal which, as has been remarked in previous reviews, fluctuates, and does not increase as steadily as could be desired, is again less than the areas of 1880-81 and 1877-78, which were nearly equal. The decrease has been in barley and mixed crops.

The irrigated area of the Eastern Jumna Canal is greater than that of the two previous years, in which the autumn rains were more plentiful, but it is much lower than the area of 1878-79. The area of this canal, like that of the terminal divisions of the Lower Ganges Canal, is much less subject to fluctuation on account of the seasons than other canals. The great area of 1878-79 is probably due to the high prices then prevailing after a deficient rainfall of two years. The result of these high prices was to extend the margin at which it becomes profitable to use canal water on inferior land, and so to increase the area of irrigation. These conditions did not, however, prevail in 1881-82, and therefore, although the season was favourable to irrigation, the area is no larger than usual.

The irrigated area of the Rohilkhand Canals is an average one, higher than that of 1880-81, when the heavy floods of September enabled canal water to be dispensed with, but not as high as the area of the two previous years.

There is nothing special to notice about the areas of the other canals and the Bundelkhand Lakes, which vary little from year to year, and are comparatively insignificant.

3. The following table shows the areas of the principal crops irrigated for six successive years :—

	Wheat.	Barley.	Other grains.	Pulses.	Opium and drugs.	Total areas.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1876-77	532,221	110,361	24,821	26,584	12,530	776,358
1877-78	415,659	138,627	59,912	64,328	10,823	729,845
1878-79	586,776	266,472	115,914	66,901	15,371	1,075,952
1879-80	482,703	210,959	83,861	33,401	15,104	844,330
1880-81	545,364	261,813	130,011	55,222	18,309	1,032,010
1881-82	726,332	261,602	102,549	77,238	18,203	1,209,823

The gross increase in wheat alone is 180,968, which exceeds the net total increase for the year, so that the increase is mainly due to the most valuable crop. The following table shows the progress made in wheat irrigation on each of the principal canals for four years, and the percentage of wheat to the whole area for the year 1881-82 :—

Canal.	1878-79.	1879-80.	1880-81.	1881-82.	
				Area.	Percentage of wheat to whole area.
	Acres.	Acres.	Acres.	Acres.	
Upper Ganges Canal	296,106	194,083	228,773	321,868	68
Terminal Divisions	88,553	101,356	113,237	122,135	44
Lower Ganges Canal	5,959	15,078	45,282	87,974	59
Agra	14,521	11,767	27,431	28,206	29
Eastern Jumna Canal	149,834	122,506	111,274	131,891	88
Rohilkhand	24,330	29,979	13,120	26,549	55

The area of barley remains very steady, eighty per cent. of this area belongs to the Lower Ganges and terminal divisions.

4. The following table shows the assessments of the year under occupiers' rates compared with three other years :—

	1878-79.	1879-80.	1880-81.	1881-82.
	Rs.	Rs.	Rs.	Rs.
Upper Ganges	10,04,592	6,68,455	7,61,523	10,21,817
Terminal Divisions	4,86,820	4,67,609	5,03,053	5,45,146
Lower Ganges Canal	37,276	68,537	2,62,339	3,53,130
Agra	2,23,023	96,530	2,86,736	2,59,530
Eastern Jumna Canal	3,76,455	2,99,508	2,71,905	3,17,217
Rohilkhand	32,955	36,796	11,581	28,043
Bijnor	1,358	1,803	2,037	2,069
Dun	10,767	10,044	8,281	9,379
Bundlekhand Lakes	2,469	2,242	1,606	3,046
TOTAL	21,75,715	16,51,524	21,09,061	25,39,377

The owners' rate amounted to Rs. 1,64,405.

ORDER.—Ordered, that the above Resolution be submitted to the Government of India for information, and that it be published in *North-Western Provinces and Oudh Gazette*.

Ordered also, that copies be circulated to the Governments of Bengal, Punjab, to the General Department of this Government, and to the Board of Revenue, for information.

By order, &c.,

J. G. FORBES, *Lt.-Col., R. E.*,
Joint-Secy. to Govt., N. W. P., P. W. D., I. B.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY CONSTRUCTION.

TRADE OF THE COUNTRY TO BE TRAVERSED BY THE PROJECTED LINE OF RAILWAY BETWEEN SITARAMPUR ON THE EAST INDIAN RAILWAY AND NAGPUR ON THE GREAT INDIAN PENINSULA RAILWAY.

Extract from the Proceedings of the Governor General in Council in the Public Works Department, No. 700 R. C., dated Simla, the 16th August 1882.

Read the following papers :—

Note drawn up in the office of the Secretary, Revenue and Agricultural department, on the projected line of Railway from Sitarampur to Nagpur.

The proposed railway from Sitarampur to Nagpur will probably pass through the following districts :—

Districts through which it will pass.
- Manbhum, Lohardaga, Chhota Nagpur Tributary States, } Bengal,
- Raipur, Bilaspur, } Central Provinces,

and will eventually join the Nagpur-Chhattisgarh Railway. These districts, however, do not adequately represent the area the resources of which it will open and the trade of which it will absorb, for through hundreds of miles on either side of the proposed line runs no navigable river or highway of commerce. The district of Singhbhum in Bengal and Sambalpur in the Central Provinces, with the Feudatory States attached to them, will also come under its influence.

Resources still undeveloped.

2. A large part of this country never acknowledged the supremacy of the Hindu or Muhammadan sovereigns of Hindustan, and only thirty years ago it was marked on the English maps of India as the "Unexplored Regions." It is still, therefore, nearly as much a virgin soil for civilised man as the primæval forests on our north-east frontier. Immense tracts of culturable land still lie uncultivated, and the proposed railway is expected to give a great stimulus to its being brought under the plough—an operation already fast progressing owing to press of population in the regulation districts surrounding it on all sides.

Present statistics conjectural.

3. Under these circumstances, the resources of the country through which the railway is to pass cannot, with any degree of accuracy, be measured by the data its present condition affords. Nor are the data now available anything but conjectural; for, except in the matter of population, no effectual attempt to obtain reliable statistics tending to throw light on the condition of the people and the country was ever made; and as is generally the case under such circumstances, the estimates made diffidently always fall much below the actual facts. No instance of this kind more strikingly proves the tendency to under-estimate estimates as the one about the population of the Lower Provinces previous to the general enumeration of 1872; nobody ever ventured to estimate it at more than 40 millions, which was, however, 50 per cent. below the actual number. The figures given in this note must, therefore, be taken with caution, and as giving only a rough idea of the subject.

Expected goods traffic.

4. Besides the passenger traffic which this line may expect from its being the direct line from Calcutta to Bombay, it can count upon a progressive goods traffic fed by three classes of country produce,—agricultural, forest and mineral. The following

statement shows the amount of agricultural produce that may annually be available for export :—

1	2	3	4	5	6	7	8	9	10
NAME OF DISTRICT.	Total area in acres.	Total cultivated area in acres.	Total produce in maunds.	Total population.	Amount consumed as food at 5 maunds per head	Seed, cattle-food, waste and other deductions at 3 maunds per acre.	Balance available for export in maunds.	Total culturable areas still lying waste.	Rate of produce per acre on which calculation is based in column 4.
Hazaribagh . . .	4,493,440	1,318,912	92,32,384	771,875	38,59,375	39,56,736	14,16,273	2,940,457	7
Manbhum . . .	3,149,440	1,812,800	1,26,89,600	995,570	49,77,850	54,38,400	22,73,350	801,900	7
Lohardaga . . .	7,708,160	2,823,738	1,97,66,166	1,237,123	61,85,615	84,71,214	51,09,337	2,570,000	7
Singhbhum . . .	2,494,080	635,648	38,13,888	415,023	20,75,115	19,06,944		1,136,640	6
Chhota Nagpur Tributary States . .	9,868,160	1,973,632	98,68,160	405,980	20,29,900	59,20,896	−1,68,171 19,17,364	3,289,386	5
Raipur . . .	7,606,400	2,324,044	2,32,40,440	1,093,405	54,67,025	69,72,132	1,08,01,283	2,791,040	10
Bilaspur . . .	4,990,720	1,528,960	91,73,760	715,398	35,76,990	45,86,880	10,09,890	1,029,760	6
Sambalpur . . .	2,820,480	720,000	43,20,000	523,934	26,15,170	21,60,000	−4,55,170	568,320	6
Central Provinces Tributary States. . .	6,559,680	2,400,000	1,44,00,000	823,723	41,18,615	72,00,000	30,81,385	2,327,680	6
TOTAL .	49,690,560	15,537,734	10,65,04,398	6,981,131	3,49,05,655	4,66,13,202	2,49,85,541	17,455,183	

5. Of course it is idle to expect that the whole of the agricultural produce shown above as available for export will find its way to the railway. The country is so much cut up by hills and ravines, and so much wanting in good roads, that some time will elapse before its trade will reach the normal standard of a British province. In an agricultural country like India, an inland province may be said to have arrived at such a standard if it can send out with profit at least three-fourths of its surplus produce. Even North-Western Provinces and Oudh, with its network of roads, railways and navigable rivers, have not yet attained such an efficiency in means of communications; for we find that its railways, which monopolise almost all its external traffic, carried in 1879-80 only 14 millions of maunds of agricultural produce out of a total annual surplus of about 50 millions. The proportion must, therefore, be much less in this central tableland.

Want of feeders.

6. But this advantage will be more than compensated by the ample room which agricultural operations have for expansion in this part of the country. Seventeen millions of acres of arable land, or an area larger by two millions of acres than that at present under cultivation, still lie waste, and there can be no doubt that a large part of it will come under the plough as soon as an outlet for the produce is found.* Every encouragement is given to cultivators for taking up new lands; for three years no rent whatever is assessed, and after that time a small amount of progressive rent is fixed. In this way the cultivation is increasing year by year, and would have increased more had not the country been drained of a portion of its enterprising youths to meet the requirements of the tea gardens of Assam, Kachar, Sylhet and Darjiling. In some parts of the tableland the wasteful system of cultivation, known as the *jum*, is practised, in which fresh forest land is cleared every two or three years, allowing the one previously cultivated to relapse to its former state of wildness. This reckless system of agriculture signifies only the existence of an extraordinary amount of spare land in the country.

Arable land lying unused.

7. The principal crops cultivated are the same as in other parts of Bengal and the Central Provinces; rice being the staple crop, with a fair proportion of pulses and oil-seeds. The western part of the plateau grows wheat, barley, Indian-corn, jowar (*Sorghum vulgare*), china (*Panicum italicum*), and other millets. Cotton has

Crops.

* "Fertile lands," write the officers appointed for collecting information for the Famine Commission, "in almost countless acres, lie waiting to be cultivated, which will afford other staples of food besides the treacherous rice**." Central Provinces Famine Report, page 94:—I myself can vouch for the fertility of the soil. In 1865 we took up a large area of land outside the Manbhum town, and after removing the stones that were lying scattered upon it, scratched the ground with the country plough (which here is still lighter than an ordinary country plough) and sowed múng (*phaseolus múngo*) on it. No other care was bestowed upon it, but the result was a bumper crop.

found a congenial home in the Lohardaga and Singhbhum districts and in the black soil of Chhattisgarh, and, as in Bombay, the American war contributed greatly towards the extension of its cultivation. The area under sugarcane is also increasing, and it is said to grow luxuriantly in Gangpar, a tributary State in the Chhota Nagpur Division, from which a large quantity of molasses is exported. A fine quality of tobacco is also grown, chiefly for home consumption, and a large quantity of silk is produced from domesticated *tasar* worms. Tea-planting has been introduced in the Hazaribagh and Lohardaga districts, and the soil is said to be suited for coffee also. Owing to extensive areas of pasture land existing in the country, large quantities of ghi are produced, which are exported to Calcutta. The following figures show the acreage under different crops in districts for which information is available:—

	Raipur.	Sambalpur.	Bilaspur.	Manbhum
Rice	1,217,853	578,609	732,487	768,000
Wheat	240,966	...	64,154	6,400
Other food	535,789	63,717	278,424	416,000
Oil-seeds	168,273	34,563	78,213	32,000
Sugarcane	25,740	7,349	7,012	44,000
Cotton	81,343	35,482	29,502	64,000
Fibres	1,466	...	1,044	32,000
Tobacco	37,311	...	3,074	19,200
Vegetables	4,886	...	3,109	3,200
Others	10,417	...	...	...

Trade.

8. The trade is entirely in the hands of the banjaras, who penetrate to the utmost recesses of the wild country through roads "which," Captain Blunt wrote in 1795, "nothing but the most indefatigable industry could induce him to attempt, and where the straitness of the paths and defiles barely affords a passage for him and his bullocks." Owing to absence of the facilities of export, they find here an inexhaustible supply of grain at cheap rates which they exchange for salt, piece-goods, &c. Trade statistics are not available; but during the year 1880-81 the total trade of the three towns in Chhattisgarh, *viz.*, Raipur, Nandgaon, and Dongargarh, amounted to imports Rs. 46,35,000, exports Rs. 55,72,000, total Rs. 1,02,07,000. The whole of the import trade, which consists chiefly of piece-goods, hardware and salt, will probably be carried by the railway. The annual consumption of salt, at the rate of one-tenth of a maund per head of population, amounts to more than 6,98,000 maunds.

9. The following statement shows the prices (retail) prevailing at the head-quarters of the different districts through which the proposed railway is to pass compared with those prevailing in Calcutta on the one side, and Nagpur on the other:—

Number of seers per rupee of the following articles on 15th April 1882.

NAME OF ARTICLE.	Calcutta.	Hazaribagh.	Manbhum.	Lohardaga.	Singbhum.	Raipur.	Bilaspur.	Sambalpur.	Nagpur.
Wheat	14 9/16	[illegible]	15 9/16	19	24	40	54	27	19 1/8
Barley	26 1/16	27	31	30	32	...	...	...	...
Common rice	20	22	34	26	40	46	52	54	17 1/4
Gram	24 1/16	21	20	20	24	40	60	25	24 1/2
Salt (wholesale) . . .	16	11	11	10	10	4 5/16	...	4 5/16	3 1/2

In the interior of the districts, the wholesale prices at which traders purchase grain are necessarily much cheaper than those shown in the above statement.

Forest products.

10. Various kinds of forest products are found in the jungles, some of which are of great economical value. Jungle roots, leaves, flowers, and fruits afford food to the lower classes for about three months in the year. Fibrous plants are found suitable

for making ropes, and grass for paper. Many kinds of timber, particularly the valuable sál (*shorea robusta*), the ebony and the sisu (*Dalbergia latifolia*), rot in the forests for want of facilities of export. Attempts were made to float them down the rivers, but the difficulties and expenses were too heavy to pay. Nipal formerly supplied sál timber to Lower Bengal, but since the stoppage of this supply a few years ago, Burma teak has taken its place. But even this supply, which is chiefly drawn from the Shan and Karen country in Upper Burma, is said to be getting scarcer day by day. The proposed railway will therefore open a new timber-country, which will probably be able to take possession of this trade until the Government reserved forests in other parts of the country grow up. Sál trees are at present girdled for the extraction of resin, which operation very much deteriorates the value as timber. The dyeing material found in the country consists of the different kinds of myrobalans (*terminalia chebula* and *bellerica*), amla (*emblica officinalis*), gall nuts, khayer (*acacia catechu*) and barks of several trees.* Now, the demand for myrobalans is large both for use in this country as well as for export to Europe.

Australia is also beginning to be a purchaser of this article. Another valuable tree abounds in the jungle, the mahua (*Bassia latifolia*), the wood of which is used for building purposes, the flowers as a nutritous food by the people, and from which the country spirits are distilled, and the seeds yield an oil used for burning, as well as in adulterating ghi, which article it very much resembles. Jungle products chiefly exported are lac, tasar silk, bees-wax, mahua flower, myrobalans, gall nuts, resin, catechu, &c.

Mineral products.

11. The country is very rich in minerals. Coal exists in several places. Iron is found in nodular form in most of the hill ranges, and is smelted in a rude way by the people. Copper was formerly worked, but now abandoned. Gold-dust is found in the sands of the rivers, and has probably given name to the river Subarnarekha, or the "golden streak," and a class of people subsist by washing for it. The other mineral products are lead, limestone, slate, potstone, red ochres, &c.

No. 2314--129, dated Nagpur, 28th June 1882.

From—A. H. L. FRASER, Esq., Offg. Secretary to the Chief Commissioner, Central Provinces,
To—The Secretary to the Government of India, Revenue and Agricultural Department.

I am directed to acknowledge receipt of your letter No. 480 A., dated 25th ultimo, and to submit the annexed Note on the advantages likely to be derived from the proposed railway through Chota Nagpur and the Central Provinces.

2. I am, however, to say that, except perhaps that the greater proximity of Calcutta to the eastern portions of the Chhattisgarh Division may increase the advantages of the through line to them, the advantages indicated in this Note are all likely to accrue to the districts of that division from the Nagpur and Chhattisgarh Railway already taken in hand by this Administration. It is his firm conviction of the reality of these advantages which has induced the Chief Commissioner to devote so much energy to the prosecution of that undertaking.

3. Copy of the returns of traffic for two weeks on the Nagpur and Chhattisgarh State Railway (open as far as Amgaon) are submitted for facility of reference, as showing the present trade on the line.

Note.

The proposed railway from Sitarampur to Nagpur will probably pass through the following districts of the Central Provinces, *viz.*, Sambalpur,

* I myself have seen (in 1865) the terminalia fruits lying unheeded thickly under the trees in the Chhota Nagpur jungles.

Bilaspur, Raipur, and Bhandara. Of Bhandara there is little that need be said. The head-quarters town of that district is only 40 miles from Nagpur. There is no doubt that the agriculture and commerce of this district will benefit from the extension of the line of rail through it. But the benefits to be derived by it will be small indeed compared with those to be derived by the districts of Raipur and Bilaspur. It is the importance of opening up these two districts and meeting the trade requirements of the Chhattisgarh Division that led the Chief Commissioner to push on the Nagpur and Chhattisgarh State Railway, and it is the traffic of this part of the country that will make the proposed railway from Sitarampur to Nagpur pay, as far as the Central Provinces are concerned. The benefits which will accrue to Sambalpur will no doubt also be considerable. But it is impossible to procure at present any statistics on which an accurate estimate of these benefits can be based. It is difficult, too, to estimate how far the railway may supersede the river traffic from Sambalpur. Further, very much of the trade of Sambalpur passes through Bilaspur and Raipur, and it cannot well be treated of separately.

2. Raipur is the largest district in the Central Provinces; and Bilaspur is the third, Chanda with the Sironcha Sub-Division being the second. The following figures for these two districts are interesting. They are extracted from the last Central Provinces Administration Report:—

	Area in square miles.				Population.	Revenue.	
	Cultivated.	Culturable.	Unculturable	Total.		Land.	Gross.
						Rs.	Rs.
Raipur . .	3,553	4,420	3,912	11,885	1,093,405	6,19,255	9,07,833
Bailaspur . .	2,429	1,569	3,800	7,798	715,398	2,80,661	3,98,676

The figures given above under the head "Population" are those of the census of 1872. The figures of last census show the population of the two districts to be 1,405,171 and 1,017,327 respectively.

3. One other set of figures may be extracted from the last Administration Report, *viz.*, the following figures from the Price Current:—

		Wheat.		Gram.		Common rice.	
		Srs.	Chtks.	Srs.	Chtks.	Srs.	Chtks.
Jubbulpore	1879-80	11	0	12	8	12	8
	1880-81	18	0	20	0	16	0
Nagpur	1879 80	10	4	10	0	9	12
	1880-81	14	4	14	12	11	8
Raipur	1879-80	22	8	16	0	20	0
	1880-81	27	0	23	0	23	8
Bilaspur	1879-80	22	0	22	0	28	0
	1880-81	32	0	32	0	39	0

This gives for the last two years the number of seers per rupee in the two districts of Raipur and Bilaspur as compared with the number in the two nearest railway districts; and it shows how, especially in the case of wheat and rice, the prices in Chhattisgarh rule exceedingly low owing to the want of easy communication.

4. As to trade, the returns show that the average export of the principal articles of produce of the two districts from 1864 to 1868 was—

	Wheat.	Rice.	Other grains.	Oil seeds.
	Mds.	Mds.	Mds.	Mds.
Raipur	314,487	170,296	78,937	29,908
Bilaspur	58,957	218,047	6,651	195
Total Maunds	373,444	388,343	85,588	30,103
Total Tons.	13,831	14,383	3,169	1,115

making a total of 32,498 tons, the greater part of which went to Nagpur. The average for the three years 1873—1876 was—

	Wheat.	Rice.	Other grains.	Oil seeds.
Maunds	388,124	413,316	192,315	355,514
Tons	14,375	15,311	7,123	13,167

making a total of 50,176 tons, being an increase of about 54 per cent. in eight years. It is to be borne in mind that this trade was carried on bullock carts or pack bullocks making a journey of, say about two months (going and returning) to the exporting ryots. In later years the figures for different districts are not given; but the export trade of the Central Provinces has greatly increased, and there is no doubt that the Chhattisgarh Division has its fair share of the increase.

5. The inequality of prices still existing shows the possibilities of development in the trade in these articles. Mr. Chisholm, in his settlement report on the Bilaspur District, mentions extraordinary instances of the increase of cultivation under the influence of increased demand for agricultural produce. The response made by the Chhattisgarh Division to the calls on it in the famine years give evidence to the same effect. And in view of the large amount of land still uncultivated in the two districts immediately under consideration, and of the inferior methods pursued in the cultivated area, the Chief Commissioner does not consider that Mr. J. F. K. Hewitt (Commissioner of Chota Nagpur, formerly Settlement Officer, Raipur) was too sanguine when he wrote, "Considering the fertility of the soil of Chhattisgarh, the patience and steady industry of its inhabitants, and the spirit of enterprise among them, already shewn by the large trade carried on under very great difficulties, I have no hesitation in saying that the trade would, within a year or two after the opening of the railway, reach a total of two or three hundred thousand tons a year, and that it would yearly increase."

6. The trade in lac and hides, gur and tussur cocoons is considerable and capable of large increase. The import trade, specially in salt, is very large, even now. It is bound to increase as the country is opened out and the circumstances of the people improve.

7. The forests of Bilaspur and Raipur have been found to be very valuable. Mr. Thomson, a Deputy Conservator of great experience, has recently reported very favourably of them. They are capable of great development, and are likely to become very profitable.

8. The advantages of the railway may be briefly summed up as follows:—

(1) A great granary would be opened out for the supply of the ordinary market and for the prompt relief of any famine-stricken part of India.
(2) Chhattisgarh would be delivered from the fear of famine.
(3) A fertile country eminently fitted for colonization would be opened up.
(4) Facilities for profitable manufactures would be afforded.
(5) The land revenue would be greatly increased.
(6) The line would undoubtedly be profitable as an investment.

Executive Engineer, Meerut Division, reports that the demand was small in Lower Divisions from the 12th June. Hence the Meerut Division was able to raise distributary supply from 790 to 970 cubic feet. This gave great relief as there was a great drought with constant hot wind, and no rain fell till the 28th June, and then only one inch on the average, wholly insufficient for ploughing and sowing.

Executive Engineer, Mainpuri Division, reports that the monsoon commenced on the 11th June, stopping all demand for the remainder of the month, and that there was much less rain in the eastern than in the western part of the division.

Executive Engineer, Agra Canal, reports that the demand was fluctuating, and that but little new irrigation was effected after the rain of the 11th June.

Executive Engineer, Rohilkhand Canals, reports that the rains set in on night of the 10th June. Excessive rainfall of 9 and 10 inches recorded on 7th July, and rivers in east portion of division; the Bahgul, Pangaili, Absara, and Deoha were in extraordinarily high flood, and the whole country between them inundated.

From the 1st to 10th all water was being used up for sugar irrigation. From the 10th to 20th no water was used; during the latter portion of the month water was in demand for rice. Considerable floods came down the hill rivers on 12th and 20th. Excessive rainfall

CLASSIFICATION.

Exhibitors to quote the number in this column.

CLASS I.

FISHING.

Section I.—Sea Fishing.

Division 1 — (1) [redacted]of every description and of all nations used in trawl, herring, long [redacted] hand line, and every other mode or system of fishing, including [redacted]ets, lines, hooks, harpoons, tackle, &c., employed in the same.

Division 2 — (2) [redacted] dredges, crab, lobster, prawn, &c., pots, and other appliances for [redacted]hing fish of this description.

(3) Fishing craft of all nations, models, and representations of the same.

Division 3 — (i) Steam fishing vessels and steam carriers.

Division 4 — (ii) Fishing vessels and boats other than steam vessels.

Division 5 — (4) Ropes and canvas suitable to fishing vessels.

Division 6 — (5) Steam capstans, compasses, barometers, telescopes, lights, lamps, fog horns, systems of signalling at night for fishing fleets and vessels, electric lights, luminous paint, and other equipment of fishing vessels, charts for fishermen.

Division 7 — (6) Models of harbours, piers, and slips for fishing purposes.

Division 8 — (7) Fishing tackle and netting in different stages of preparation, and machinery used for working up the raw material.

Division 9 — (8) Life-boats, their equipment, and life-saving apparatus of every description.

Division 10 — (9) Appliances and methods for breaking the force of the sea at the entrance of harbours and elsewhere.

Division 11 — (10) Methods of communication from the shore to light-ships and fishing fleets by submarine cables.

Division 12 — (11) Methods of protecting submarine cables from injury by fishing operations (illustrated by models and drawings).

Section II.—Freshwater fishing.

Division 13 — (1) Salmon nets and fixed appliances for catching salmonidæ in all their va[redacted]eties.

Division 14 — (2) Salmon rods, reels, lines, artificial flies and baits, gaffs, [redacted]pears, creels, &c.

Division 15 — (3) Trout rods, reels, landing nets, lines, artificial flies, [redacted]baits, baskets, bags, &c.

Division 16 — (4) Pike, barbel, and other coarse fish-rods, reels and tackle, artificial spinning baits, &c.

Division 17 — (5) Traps, nets, bucks, wheels, and all kinds of apparatus for catching eels, lampreys, &c.

Division 18 — (6) Hooks, &c.

Division 19 — (7) Anglers' apparel of every description.

Division 20 — (8) boats, punts, cobles, collapsible, portable, &c., in models or otherwise.

NOTE.—*The above classification is suggested as a convenient one for this class, but it is not intended to exclude any objects which come within the class.*

CLASS II.

ECONOMIC CONDITION OF FISHERMEN.

Division 21 — (1) Apparel and personal equipment.

Division 22 — (2) Food and medicine chests.

Division 23 — (3) Models and plans of dwellings.

Division 24 — (4) Contracts of partnerships; insurances of life, boats, gear, &c.; benefit societies,

CLASS III.

COMMERCIAL AND ECONOMIC.

1.—Preparation, preservation, and utilisation of fish.

(*a*) For edible purposes—

Division 25 — (i) Models of fish-curing establishments; methods of, and models and other representations of, any appliances for drying, curing, salting, smoking, tinning, cooking, &c.

Division 26 — (ii) Fish dried, smoked, cured, salted, tinned, or otherwise prepared for food.

Exhibitors to quote the number in this column.

Division 27 — (iii) All products prepared from fish, such as oils, roes, isinglas, &c.

Division 28 — (iv) Antiseptics suitable for preserving fish for food.

(*b*) For other than edible purposes—

Division 29 — (i) Oils, manures, and other products prepared from fish.

Division 30 — (ii) Methods of, and models and other representations of appliances for, preparing oils and manures from fish.

Division 31 — (iii) Sea and fresh water pearl shells; mother-of-pearl manufactured; pearls sorted.

Division 32 — (iv) Preparation and application of sponges, corals, pearls, shells, and all parts and products of aquatic animals, &c., to purposes useful and ornamental, with specimens.

2.—Transport and sale of fish.

Division 33 — (*a*) Appliances for carrying fish and for preserving fish during transport or otherwise, and models of the same.

Division 34 — (*b*) Models of fish markets, and appliances connected with the same.

CLASS IV.

FISH CULTURE.

Division 35 — (1) Models or drawings of fish hatching, breeding and rearing establishments, including oyster and other shellfish grounds; and all apparatus and implements connected with the same, and for transporting fish and fish ova; food for fry.

Division 36 — (2) Representations illustrative of the development and progressive growth of fish.

Division 37 — (3) Models and drawings of fish passes and fish ladders.

(4) Scientific investigation.

Division 38 — (i) Models and drawing of diseases of fish, with special reference to their origin and cure.

Division 39 — (ii) Processes for rendering streams polluted by sewage and chemical or other works innocuous to fish life (illustrated by models and drawings).

Division 40 — (iii) Physico-chemical investigation into those qualities of sea and fresh water which affect aquatic animals; investigation of the bottom of the sea and of lakes, shown by samples; aquatic plants in relation to fishing, &c.; researches into the aquatic fauna (animals of the several classes preserved in alcohol or prepared, &c.); apparatus and implements used in such researches.

Division 41 — (5) Acclimatisation of fish.

CLASS V.

NATURAL HISTORY.

Aquaria.

(1) Specimens living (marine and fresh water), fresh, stuffed or preserved, casts, drawings and representations of—

Division 42 — (*a*) Algæ arranged according to their various species and localities.

Division 43 — (*b*) Sponges, in their natural state.

Division 44 — (*c*) Corals, in their natural state, polyps, jelly-fish, &c.

Division 45 — (*d*) Entozoa.

Division 46 — (*e*) Mollusca of all kinds and shells not included in Class III.

Division 47 — (*f*) Star-fishes, sea urchins, holothuriæ.

Division 48 — (*g*) Worms used for bait, or noxious; leeches, &c.

Division 49 — (*h*) Perfect insects and larvæ of insects, which are destroyers of spawn or serve as food for fish.

Division 50 — (*i*) Crustacea of all kinds.

Division 51 — (*k*) FISH OF ALL KINDS.

Division 52 — (*l*) Reptiles, such as tortoises, turtles, terrapins, lizards, serpents, frogs, newts, &c.

Division 53 — (*m*) Aquatic and other birds hostile to fish or fishing.

Division 54 — (*n*) Aquatic and amphibious mammalia (otters, seals, whales, &c.) and others detrimental to fish.

Division 55 — (2) Works on Ichthyology. Maps illustrating geographical distribution, migration, &c., of fishes and spawn.

Division 56 — (3) Specimens and representations illustrative of the relations between extinct and existing fishes.

Exhibitors to quote the number in this column.

CLASS VI.

HISTORY AND LITERATURE OF

Fishing—Fishery Laws—Fish Commerce.

Division 57 (1) Ancient fishing implements or their reproductions—models—pictures—books—emblems—charters and seals of ancient fishermen guilds.

Division 58 (2) Fishery laws of different countries,

Division 59 (3) Copies of treaties, conventions, &c., dealing with international fishery relations.

Division 60 (4) Reports, statistics and literature of fish, fishing, and fisheries.

Division 61 (5) Reports on acclimatisation of fish, and of attempts in this direction.

CLASS VII.

LOAN COLLECTIONS.

Collections within the scope of the foregoing classes.

Money Prizes.

The Committee will be prepared to receive and consider the offer of money prizes for any special exhibits or essays connected with the objects of the exhibition.

ESSAYS.

Preliminary notice.

Prizes of £100 will be given for each of the following subjects, *viz.*:—

(1) The Natural History of commercial fishes of Great Britain, with special reference to such parts of their natural history as bear upon their production and commercial use.

(2) Relations of the State with fishermen and fisheries, including all matters dealing with their protection, regulation, &c.

(3) On the possible increase of the supply of fish, and on improved facilities for their economic transmission and distribution.

Conferences are proposed to be held for the purpose of reading and discussing papers on subjects connected with the exhibition.

REGULATIONS.

The Great International Fisheries Exhibition.

LONDON, 1883.

Royal Patronage. 1. A Great International Fisheries Exhibition, under the patronage of Her Majesty the Queen and the Presidency of H. R. H. the Prince of Wales, will be held in London in 1883.

Date. 2. The Exhibition will be opened on the 1st of May, and continue open for a period of not less than six months.

Objects. 3. The principal objects to be admitted are comprised in the annexed classification, which is intended to include all kinds of specimens of fish life, and to illustrate all the modes by which the *marine* and *fresh water* animals of economic value are captured and utilised, together with the commercial, scientific social, historic and legislative aspects of such fisheries.

Rewards. 4. Medals in gold, silver, and bronze, and diplomas of honour, will be awarded by a jury, the composition of which will be settled later.

All expenses to be borne by exhibitors. 5. No charge will be made for space, but exhibitors will have to pay every expense of transit, delivery, fixing, and removing their exhibits, and they must, either personally or by their agents, superintend the reception and installation, and, at the close of the exhibition, the removal of their goods; in default thereof, the Committee reserves to itself the right of doing whatever may be considered necessary, and at the expense of the exhibitor.

Applications. 6. Applications for admission must be made on printed forms, which will be supplied on application; these are to be sent to the General Secretary in London on or before the 1st July 1882, except under special arrangements or concessions.

Allotment. 7. The General Secretary will, before the 1st October 1882, or as soon after as practicable, notify to applicants the decision of the Committee, and will indicate the space, if any, which has been accorded to them, and give to each a number.

With reference to Rule "6," an extension of time till September 1st, 1882, will be granted to distant colonies

Loan Department. 8. Contributors to the Loan Department are requested to communicate with the Secretary, who will supply forms to be filled up by them.

Foreign Countries. 9. The Foreign Correspondents that may be appointed are invited to enter as soon as possible into communication with the General Secretary. The correspondent will be charged with the consideration of all questions relative to the distribution of the space allotted to his country. The Committee will therefore not correspond directly with foreign exhibitors, except in those countries where no correspondent is appointed.

Foreign Countries. 10. The Committee will place at the disposal of foreign correspondents all information and plans that may be useful for their arrangements.

Foreign Countries. 11. The applicants for space from countries in which no correspondent has been appointed will correspond directly with the General Secretary of the Committee.

Railway rates. 12. The Committee will endeavour to obtain, from the various English Railway Companies, special terms for the conveyance of exhibits to and from the exhibition, and should they succeed in doing so such arrangements will be communicated to intending exhibitors.

Railways, &c. 13. The Committee will not interfere in any way between the Railway Companies, the carriers, and the exhibitors, with reference to the despatch, transmission, reception, management, or return of goods exhibited.

Marks on packages. 14. All packages containing goods intended for exhibition must have painted on them the distinctive mark (I.F.E.) in red paint, and they must also have painted on them the name and number of the exhibitor.

Waybills. 15. The waybill accompanying all packages must contain the name of the exhibitor, his number, and address.

Exhibitors or Agents to receive own goods, &c. 16. Each exhibitor must provide, either personally or through an agent for the despatch, transmission, reception, unpacking, and arrangement of his goods, and for the verification of their contents when unpacked. If neither the exhibitor nor his agent be present to receive the packages on arrival at the Exhibition, the carrier will be directed to take them away; but should any goods be deposited in the exhibition premises during the absence of the exhibitor or his agent, the Committee will not be responsible for any loss or damage from whatsoever cause arising.

Foreign packages. 17. Packages from foreign countries must likewise have painted on them in distinctive marks the letters (I.F.E.) in red paint. They must be addressed to the exhibitor himself or his agent. They must all be marked in such a way as to show distinctly from whence they come, the name of the country, and the number of the exhibitor being painted legibly thereon.

Passages. 18. *Exhibition Spaces.*—The space granted to an exhibitor within the building is available for floor space exclusive of the passages for the public.

Show Cases. 19. *Show Cases.*—No particular form or design is prescribed for cases, counters, platforms, &c., but they must not exceed the following heights without the special written permission of the Committee:—

Show cases and partitions, 10 feet above the floor.
Counters ... 3 ,,
Platforms ... 1 foot ,,

Railings. 20. Exhibitors may place railings of a uniform height of 2 feet 6 inches above the floor level. In every instance the railings must be within the area of the "stand," *i.e.*, the space allotted.

Floors. 21. The flooring must not be altered, removed, or strengthened for the convenience of arrangement, except by sanction of the Committee, and at the expense of the exhibitor.

No Obstructions. 22. No exhibitor will be permitted to display exhibits in such a manner as to obstruct the light or vistas through the avenues, or to occasion inconvenience, injury, or otherwise disadvantageously affect the display of other exhibitors.

Decorations. 23. *Decorations.*—In order to ensure uniformity of decoration and general good effect, no exhibitor will be allowed to put up any flags, banners, or other kind of decoration without permission.

Signs. 24. *Signs.*—No sign or name board may be placed otherwise than parallel with the main passages, that is, parallel with the frontage of the respective stands, and should be as near to the back of the space as possible, so as not to interfere with the vista. The signs to be black and gold. All signs must be hung subject to the approval of the Director.

Placards. 25. No printed or written bills may be displayed unless they are neat in design.

Exhibitors' Offices. 26. *Offices.*—Any exhibitor who may obtain permission to erect an office on his allotted space must conform to the following rules:—

The office must not exceed 8 feet in height; must be placed at the back of the stand, unless otherwise sanctioned; and must be painted black and varnished, with gilt beadings.

Empty Cases, immediate removal. 27. The spaces outside the allotments for exhibitors being required for the necessities of circulation, packages and empty cases will not be allowed to remain there. Cases must be unpacked as fast as received, and the empty cases taken away by the exhibitors or their agents. The Committee decline to accept any responsibility with reference to empty cases, which must be at once removed from the building at the expense of exhibitors.

Empty Cases. 28. The Committee will have nothing whatever to do with warehousing or the preservation of empty cases, or reserve any space for the purpose.

Exhibitors to keep Stands clean. 29. Exhibitors will be required to provide all necessary attendance and to keep their stands and exhibits properly cleaned and in good order during the whole period of the Exhibition.

Non-transfer. 30. No exhibitor will be allowed to transfer any allotment, or to allow any other than his own duly admitted exhibits to be placed thereon, except by permission of the Committee.

Exhibitor's Name. 31. All goods exhibited must be in the name of the person who signed the application form.

Selling Price. 32. Exhibitors, being traders, are requested to mark the selling price of the articles exhibited complete, so as to facilitate the judgment of the jury, as well as for the information of visitors.

Non-removal and Perishable Articles. 33. Objects sold cannot be taken away before the close of the Exhibition without the special permission of the Committee. Special arrangements will be made with regard to perishable exhibits.

Water, Gas, or Steam Machinery in motion. 34. Exhibitors of apparatus requiring the use of water, gas or steam must state on applying for admission the quantity of water, gas or steam which they may consider necessary. Those who wish to show machinery in motion must state the rate of speed at which the machine is to be driven. The furnishing of all counter shafting, pulleys, gas, water, steam, &c., must be at the entire expense of the exhibitor, but under the direct control of the Committee or their appointed officer.

Dangerous Substances. 35. All fulminating and explosive substances and all dangerous substances are absolutely forbidden to be sent.

Receptacles. 36. Spirits, alcohol, oils, essences, corrosive substances, and generally all substances which might spoil other articles or inconvenience the public, can only be received in solid and suitable vessels of small size.

Catalogue. 37. The Committee reserve the sole right of compiling a catalogue of the exhibits under regulations which will be duly notified. Each nation will, however, have the right to produce at its own expense, but in its own language only, a catalogue of all the objects in its own Section.

Hand-bills. 38. All hand-bills, printed matter, &c., for gratuitous distribution, connected with exhibits, will be under special regulations and must first receive the approval and permission of the Committee, or the Director, which may be withdrawn at any time.

No Photographs, &c. 39. No article exhibited may be photographed, drawn, copied or reproduced in any manner whatsoever without the special sanction of the Committee.

Non-liability for loss or damage. 40. The Committee will not hold itself responsible for any loss or damage occurring to any exhibit from any cause whatsoever; but while declining any responsibility, it is the intention of the Committee to take such precautions as they deem necessary.

Future arrangement as to Date of Reception and Jury. 41. Future regulations will settle in due time the arrangements for the date of reception, location of goods, tickets of admission for exhibitors and assistants, and the formation and working of the jury.

Right to alter Rules. 42. The right to add to, alter, amend, or expunge any of these rules is reserved by the Committee.

All Rules binding. 43. Both Englishmen and Foreigners in becoming exhibitor declare by so doing their compliance with the whole of these regulations, together with such other regulations as the Committee may issue from time to time.

44. The Committee reserve the right to remove the objects belonging to any exhibitor who shall not conform to the regulations.

Non-liability for Accidents. 45. If any damage or injury shall be caused or occasioned during the exhibition by any exhibited machine, implement, or article to any visitor or other person, or to any officer, servant, or others then and there employed by the Committee of the Great International Fisheries Exhibition, 1883, then the exhibitor to whom such machinery, implement, or article may belong shall indemnify and hold harmless the said Committee from and against all actions, suits, expenses, and claims on account or in respect of any such damage or injury which may be so caused or occasioned.

The Great International Fisheries Exhibition.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22nd AUGUST 1882.

GENERAL REMARKS.—During the week under report more or less good falls of rain have occurred throughout Assam and the Bengal provinces, as well as in most parts of the North-Western Provinces and Oudh, of Central India, and of the Central Provinces and British Burma, in some parts of the Bombay Presidency, in the Nizam's Territories and in Mysore, and the Madras Presidency.

Agricultural prospects continue satisfactory on the whole. In the Madras Presidency and Mysore some districts require more rain. In Coorg a short break in the wet weather has proved beneficial to all crops. In the Nizam's Territories *kharif* crops are prospering. In Berar they and the cotton crops are in good condition, but more rain is required in one taluk. In the Bombay Presidency all crops are progressing favourably, except in parts of five districts where more rain is wanted. In the Central Provinces a partial break in the rains has improved crops. In the Central India and Rajputana States prospects are favourable, but more rain is needed in Alwar, Sirohi, and Marwar. In the Punjab the want of more rain is felt in eight districts, and in three of these very much so. In the North-Western Provinces and Oudh all crops have been benefited by the rainfall of the week, but a further fall would be beneficial everywhere, especially in Oudh. In Bengal also more rain is wanted in some districts, but the recent rain has much improved prospects of all crops. In Assam some rice crops are being harvested and others are being transplanted. In British Burma the progress of crops is satisfactory.

The general tendency of the barometer towards a rise at the end of the preceding week was again, after a few slight variations, followed by a fall which became general on the 22nd and continued the next day.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Aug. 23rd)		
Bellary ...	1·01 (average of four stations).	Standing wet crops good, dry withering in one taluk; agricultural operations progressing.
Kurnool ...	1·0 (average of eight stations).	Young crops reviving by recent rain; more rain wanted; cattle-disease in parts.
Ganjam ...	2·11 (average of nine stations).	Standing crops thriving; rain wanted for transplanting paddy in one taluk; fever, small-pox, and cattle-disease continue; cholera subsiding.
Kistna ...	·42 (average of nine stations).	Crops withering; rain wanted; agricultural operations progressing; small-pox, fever, and guinea-worm in parts; cattle-disease general.
Chingleput (Madras) ...	1·77 (average of eleven stations).	Standing crops good where water available; agricultural operations progressing; small-pox slight.
Coimbatore ...	·88 (average of ten stations).	Standing crops, paddy promising well, dry require rain in parts and damaged by insects in one taluk; harvest dry crops, outturn about average; small-pox and cholera in parts; cattle-disease appearing in three taluks.
Tanjore ...	2·60 (average of twelve stations).	Crops good, except in parts affected by breaches, but withering in parts of one taluk for want of rain; cattle-disease in parts.
Madura ...	·82 (average of six stations).	Standing crops fair in two taluks, but withering in one; harvest paddy and *cumbu*, yield about average; cholera in parts.
Malabar ...	1·15 (average of fourteen stations).	First crops generally good; fever, cholera, small-pox, and cattle-disease in parts.
Travancore ...	·47	Paddy ripening; fever prevalent. *General Remarks.*—General prospects good.
Bombay—(Aug. 23rd)		
Kurrachee ...	No rain	River at Kotri on 21st, 19 feet 11 inches against 16½ feet on same date last year; fever in five talukas; rats doing some damage to crops in two talukas; wheat, red rice, and *bajri* in Kurrachee 22, 34 and 23, in Kotri 30, 32 and 44, in Tatta 23, 36 and 44, and in Mirpur Botoro 20, 48 and 40 lbs. per rupee, respectively; in Sujawal red rice 40 and *bajri* 44 lbs. per rupee.
Hyderabad ...	.....	Crops that have escaped floods good; river falling; fever in four talukas and cough in Hala; small-pox in Hyderabad; wheat 25, *juari* 45, *bajri* 40, red rice 30, and white rice 22 lbs. per rupee.
Ahmedabad ...	·05	Total rainfall 27·37; young *kharif* crops good; transplantation of rice continues; in Ahmedabad city 3 cholera cases, all of which fatal; wheat 28 and *bajri* 31 lbs. per rupee.
Baroda ...	No rain	Total rainfall 30·42; all crops doing well; slight cholera in Contingent camps at Sadr and Manekwara; *bajri* 32 and common rice 24 lbs. per rupee.
Surat ...	·08	Total rainfall 32·52; crops healthy; break continues; weeding progressing; *juari* 35 and *nagli* 54 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik ...	Igatpuri, 3·87; Peint, 3·62; Kalwan, 1·05; slight showers elsewhere.	Rain badly wanted in Yeola, Niphad, Chandar, Malegaon, Baglan, and parts of Sennar; locusts in Malegaon and Nandgaon doing injury; slight cholera in Násik and Sennar; wheat 25, *bajri* 32, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	·17	Total rainfall 57·23, being 1·88 above average; average abnormal temperature 1° warm; vapour in air normal; abnormal wind northerly.
Poona ...	Passing showers in six talukas.	Young crops withering in Bhimthari and Indapur; 22 cholera cases in Sirur and Bhimthari, of which 8 fatal; *bajri* 45 and *juari* 59⅓ lbs. per rupee; in Poona *bajri* 36¾ and *juari* 47¾ lbs. per rupee.
Ahmednagar ...	Jhamkhed, ·32; Parner and Akola, ·19; very slight in Sheogaon, Rahuri, and Sangamner; none in rest.	Total average rainfall of the district 11·40; from want of rain *bajri* and other crops are withering in all talukas except Akola; cholera—in Parner 12 cases, 7 deaths, in Shrigonda 6 cases, 6 deaths, and in Sheogaon 18 cases, 9 deaths; *bajri*—maximum 72 lbs. in Jhamkhed, minimum 48 in Kopergaon; *juari*—maximum 102 lbs. in Jhamkhed, minimum 60 in Kopergaon.
Sholapur ...	1·18; slight rain throughout.	Total rainfall 21·12; no cholera cases in Pandharpur taluka, maximum number of cases in Sangola 43, minimum in Malsiras 3, total number of cases 136, of which 61 fatal; *bajri* 58 lbs. 11 tolas and *juari* 81 lbs. 32 tolas.
Dharwar	Slight rain throughout, maximum ·86.	All standing crops, except in very wet lands, thriving; ground being prepared for sowing cotton and late crops; rice 24 and *juari* 62 lbs. per rupee; ague in Nargund and Mundargi petta, and foot-and-mouth disease among cattle in Hangal.
Kanara ...	Karwar, 1·02; Kumpta, 4·07; Sirsi, 4·41; Hallial, 2·28.	Total rainfall 86·80; rice, *ragi*, sugarcane plants, and garden produce thriving; early rice crop in ear around Karwar; weather clearing; cholera 1 death in Karwar; common rice in Karwar 11 seers, in district average 13½ seers per rupee.
Rajkot ...	.....	Weather dry and warm; rain much wanted; cholera at Rajkot, Moorvi, Bhownagar, and Gondal; *bajri* 27 and *juari* 31 lbs. per rupee. *General Remarks.*—General break continues; rain wanted in parts of Poona, Ahmednagar, Násik, Khandesh, and Kaira; crops doing well generally; locusts in Khandesh and Násik; fever and cattle-disease in some districts; cholera in Satara, Poona, Sholapur, Ahmednagar, Khandesh thana, Kaira, and parts of Kathiawar.
Bengal—(Aug. 23rd)		
Chittagong ...	2·92	Prospects of crops fair; transplanting of winter rice going on; prices stationary; cholera, small-pox, and cattle-disease still prevail; two shocks of earthquake on the night of the 20th.
Dacca ...	3·16	Rain and rising of rivers improving prospects of crops; cholera prevailing.
24-Pergunnahs (Calcutta)	3·35	Prospects of early crops continue satisfactory; transplanting of winter rice making fair progress; more rain would do good; public health generally good; cases of fever reported from Basirhat sub-division.
Moorshedabad ...	4·83	Rain has been general over the district and has much improved prospects of the winter rice; early rice being harvested, some of it has been destroyed in the Jangipur sub-division owing to rise of rivers; except the usual fever, public health is good; cattle-disease in two or three villages of Kandi sub-division.
Rajshahye ...	2·84	Rain has benefited crops; fever prevalent.
Burdwan ...	3·35	Weather seasonable; rain will be of great benefit to rice crops, but it has come too late to allow of much more transplanting; early rice crop good, it is being reaped in some places; sugarcane also good; health generally good.
Rungpore ...	2·28	Weather cloudy and hot; transplanting of winter rice continues; more rain wanted; prospects of other crops favourable; public health good.
Bhagálpur ...	0·65	Autumn crops being harvested, outturn good; more rain required for winter rice; public health good.
Purneah ...	1·61	Prospects of crops much improved; autumn harvest poor; transplanting progressing; more fever prevalent; hill rivers and Ganges high.
Patna ...	1·35	Prospects of autumn crops fair; transplanting of rice seedlings going on, but more rain is wanted in parts; cholera still prevalent in Behar.
Durbhunga ...	2·26	Weather has cleared somewhat; rivers in flood; autumn crops full average; rice prospects good; prices stationary; cholera has not yet disappeared.
Hazáribágh ...	2·45	Weather sultry; autumn crops doing well; rain during the week has been of much benefit in aiding transplanting operations which came to a standstill in several parts of the district; general health good.
Cuttack ...	6·02	Early rice ripening, late rice progressing well; cholera disappearing. *General Remarks.*—Rain fell in all districts during the week; more rain is still wanted in some districts; generally, however, rainfall of this week and of the preceding week has much improved the prospects of the crops; transplanting of late rice is going on fairly; all autumn crops and sugarcane are doing well; autumn harvest is expected to yield a fair average crop, but in some districts it will be rather short owing to deficient rainfall in July; fever is reported from some districts; cholera has again appeared in an epidemic form in Chumparun, elsewhere it has abated and in some places it has almost disappeared.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (Aug. 22nd)	5·0; Chandauli, 3·1.	Every prospect of a good harvest of late rice, as the weather has been favourable for transplanting; *sawan* being cut; all crops have been benefited by the rain; health of cattle good; cholera decreasing; markets well supplied; prices moderate, but rising.
Allahabad („ 23rd)	Abundant and general rain for last three days, and still raining.	The long break in the rains is over; rain has been of great benefit to all crops; prospects excellent; cholera rapidly decreasing, none in city or station; prices nearly stationary.
Cawnpore („ 22nd)	1·4 (average)	Weather rainy and cloudy; crops suffering from want of rain are now reviving; more rain wanted; cholera continues unabated; prices nearly stationary.
Gorakhpur („ „)	Good rain throughout the district.	Crops promising; health fair; prices falling.
Jhánsi ...	1·3 (average)	Weather cloudy; more rain expected; rainfall at the end of the week was most opportune, especially for the crops in *kankar* lands; weeding of *juari* and cotton continues; fields are being prepared for *rabi* sowing for the last three days; no fresh cases of cholera have appeared in mauza Iskil, but it still continues in three villages in pargana Mau and in two villages in pargana Garotha; cattle-disease of a mild type is reported in pargana Jhánsi and Moth.
Agra (Aug. 22nd)	Rain in six parganas from 0·4 to 5·3.	Rain has done much good, but is still needed in one pargana, where none has fallen since 31st July; slight fever here and there, but general health good; prices stationary.
Farukhabad („ „)	Rain has fallen within the week.	Crops suffered from long break in the rains; more rain is required; health of people fairly good; prices steady.
Bareilly („ „)	.....	Weather seasonable; crops very good; cholera bad in Danla and neighbourhood, isolated cases elsewhere; fever on the increase.
Meerut („ „)	Good rain on the 20th —Meerut, 3·8; Hapur, 1·0; Bagpat, 0·7; Mowana, 2·9; Ghaziabad, 0·6; Sirdhana, 3·8.	Crops revived and prospects greatly improved; supplies sufficient; health good; prices recovered from the rise of last week.
Kumaun („ „)	Sufficient rain everywhere, very heavy on outer range.	Crops flourishing; cattle-disease and foot-disease still prevalent; 3 deaths from *mahamari*, otherwise health fair; prices stationary.
Lucknow („ „)	Mohanlalganj, 0·1; no rain in other two tahsils.	Rice crop is suffering from want of rain; sowing of *mash* going on; cholera continues; prices stationary.
Rae Bareli („ 21st)	.....	Break in the rains; *juari* and rice beginning to suffer for want of rain clouds gather and disperse after slight drizzling; cholera still continues; cattle-disease in some villages of tahsil Dalman; markets well supplied; prices rising.
Partabgarh („ 22nd)	Slight rain at Sadr and Patti.	Prices rising slightly; autumn rice has dried up in places; winter rice being planted out in Patti and Kunda; slight cattle-disease in Patti; general health fair; cholera still continues.
Sitapur („ „)	0·2; Misrikh, 0·3	More rain required; cholera very bad; slight cattle-disease in two tahsils; supplies sufficient.
Fyzabad („ „)	Sadr, 0·1; Akbarpur, 0·4; Bikapur, 0·3; Tanda, 1·2.	Prospects good; slight cholera; cattle-disease in part of district.
		General Remarks—Rain more or less heavy in most districts and prospects generally improved, a further fall would be beneficial everywhere, especially in Oudh, where rice is suffering; prices rising in Benares, Rae Bareli, and Partabgarh, elsewhere stationary; cholera still prevalent, except in the Meerut and Agra divisions, and is bad at Sitapur and part of Bareilly; cattle-disease continues in Oudh, Jhansi, Saharanpur, and Kumaun.
Punjab—(Aug. 23rd)		
Delhi ...	·30	More rain wanted; health fair; prices rising.
Hissar ...	Rain most urgently required.	Health good; prices rising.
Umballa ...	1·0	Crops suffering for want of rain; health fair; prices of food-grains stationary.
Jullundur ...	Rain much wanted	Health good; prices steady.
Amritsar ...	Rain wanted	Health good; prices stationary.
Sialkot ...	Rain wanted	Prices unaltered; health good.
Lahore ...	No rain	Health good; prices stationary.
Ferozepore ...	Rain is much needed	Health good; prices slightly falling.
Mooltan ...	No rain	Health good; prices stationary.
Rawalpindi ...	2·50	Crops good; cattle-disease in a few places; prices stationary.
Dera Ismail Khan ...	·20	Fever prevalent; prospects good; prices steady.
Peshawar ...	No rain	Health good; prices stationary.
		General Remarks.—Rain is wanted in the Delhi, Hissar, Umballa, Amritsar, and Ferozepore districts; with the exception of the Dera Ismail Khan district, in which fever prevails, the health of the province is good; prices of food-grains are rising in the Delhi and Hissar districts, and slightly falling in the Ferozepore district; prices in the other districts are stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Nagpur (Aug. 23rd)	·9	Weather cloudy; rain wanted; fever prevalent; cholera reported; prices slightly risen.
Jubbulpore („ 22nd)	1·22	Weather cloudy; weeding continues; *kharif* improved by break; cholera reported; small-pox declining; wheat 19 seers per rupee.
Saugor („ 21st)	·18	Crops doing well; cholera abated; health good; prices steady.
Seoni („ 22nd)	2·48	Weather cloudy, with showers; weeding continues; cholera prevalent; small-pox reported; cattle-disease abating; prices stationary.
Khandwa („ „)	·33	Weather cloudy; prospects of crops good; cholera and small-pox reported; prices stationary.
Hoshangabad („ „)	1·94	Weeding continues; few cases of small-pox; *juari* 17 seers per rupee.
Raipur („ 19th)	2·36	Crops doing well; slight break; cholera and fever reported; prices rising.
Sambálpur („ 17th)	2·38	Prospects of crops good; fever prevalent; rice 56 seers per rupee.
		General Remarks.—Weather cloudy and warm, with slight rain in most districts; crops improved by break; prospects favourable; weeding operations steadily progressing; cholera still reported from most districts; isolated cases of small-pox and cattle-disease; prices steady.
British Burma— (Aug. 19th)		
Akyab ...	6·60	Total rainfall 162·69 inches; cholera in some parts of four townships, otherwise public health good; cattle-disease severe in one township, crops looking healthy.
Rangoon ...	4·55	Total rainfall 59·21 inches; 5 fatal cases of cholera, otherwise public health good; progress of crops favourable.
Bassein ...	4·88	Total rainfall 87·78 inches; public health good; cattle-disease severe in one township; ploughing and planting out far advanced.
Prome ...	2·58	Total rainfall 27·74 inches; 1 death from cholera in town, 28 in one township, and 25 in another; slight cattle-disease in one township; more rain required in two townships.
Amherst (Moulmein) ...	11·01	Total rainfall 152·93 inches; public health good, but in Moulmein and district cattle-disease in four townships; resowing in damaged places still going on; crops healthy, but reduced in area from want of cattle.
Toungoo ...	.....	Telegraph communications interrupted.
		General Remarks.—Cholera in Akyab, Tharrawady, Prome, and Henzada and a few cases elsewhere, public health otherwise good; cattle-disease severe in parts of Akyab and Bassein, and more or less prevalent in most other districts; rainfall generally plentiful, but still short in Prome and Thayetmyo.
Assam—		
Gauhati (Aug. 22nd)	·89	Weather seasonable; transplanting vigorously progressing; prospects of crops and public health fair.
Sylhet („ 23rd)	15·97	*Aman* crop in Nabiganj sub-division wants more rain; elsewhere prospects of crops elsewhere good; public health good.
Cachar („ „)	3·53; weather rainy	Reaping of *dumahi* and *murali* crops commenced; transplanting of *sali* crops progressing; prospects of tea good; cattle-disease ceased; 1 case of cholera reported from Lakhimpur; common rice 24½ seers per rupee.
Dibrugarh ...	4·55	Weather seasonable; transplanting of *sali dhan*; *aus* nearly harvested; public health good; cattle-disease still reported.
Mysore and Coorg— (Aug. 23rd)		
Bangalore ...	·20	Standing crops in thriving condition; *kartik* paddy sown in a few places; prospects favourable.
Mysore ...	·49	Crops in good condition.
Mercára ...	2·0	Short break in the monsoon beneficial to all crops; prospects of season and public health good; prices of food-grains stationary.
		General Remarks.—Slight rain has fallen throughout the Mysore State; dry crops in some districts, especially in Kolar, suffering from want of more rain; wet crops generally in good condition; sowing operations in active progress, *kartik* paddy, *ragi*, horse-gram, *juar*, and *avare* being the principal; prospects fair; public health good; prices compare favourably, in Bangalore rice 10½, *ragi* 26½, and horse-gram 30¾ seers per rupee, in Kolar *ragi* 27 to 30 seers, in Mysore *ragi* 21 3/5 seers, in Chittaldrug *ragi* 30 to 50 seers per rupee.
Berar & Hyderabad— (Aug. 23rd)		
Amráoti ...	.....	Rain wanted; *kharif* and cotton crops in good condition; prices of wheat 16 and of *juari* 28 seers per rupee.
Akola ...	.....	*Kharif* crops progressing favourably; weeding continues.
Hyderabad (Aug. 24th)	1·94	Total rainfall from 1st January 15·85; *kharif* crops prospering in all taluks, excepting Pathur, where there has been no rain during the week; in three taluks there has been copious rainfall and tanks have been replenished; *abi* sowings continue, except in Pathur; cattle-disease in one taluk; prices—wheat 15¾, coarse rice 8¾, white *juari* 25¼, yellow *juari* 31, and *tur* 25½ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States—(Aug. 23rd)		
Indore ...	·15	Cholera in a sporadic form lingers in the Indore city; agricultural prospects continue favourable; prices steady.
Morar (Gwalior) ...	2·05	Health and prospects good.
Sutna ...	1·45	Cholera still at Sutna; prospects good.
Neemuch ...	·70	Health good; crops thriving.
Goona ...	1·89	Health good; prospects fair.
Bhopal (Sirohi) ...	·15	Weather fine; prospects good; some cholera at Bhopal and Karwai.
Agar ...	No rain	Health and prospects good.
Nowgong ...	No rain	*Kharif* crops good; health fair; prices stationary; cholera still prevalent.
Manpur ...	·60	Ploughing of *rabi* fields continues; prices stationary.
Rajputana—		
Abu (Aug. 23rd)	·22	Weather cloudy, close, and occasionally foggy.
Sirohi („ 20th)	.....	Rain much needed; tanks, wells, and health good; weather cloudy, wind high and dry.
Marwar („ 18th)	.....	Rain wanted; four months water in tanks; wells almost full; health good; prospects good; weather cloudy, winds sharp and cool; nights clear; holding off of rain causes much uneasiness; prices rising.
Meywar („ 19th)	·07	Tanks and wells good; health fair; prospects very good.
Harowti („ „)	.....	Prospects favourable; prices fallen; weather cloudy; no cholera reported.
Jhallawar („ 16th)	·73	Weather fine and cool; Shahabad rather unhealthy.
Ajmere („ 22nd)	·90 at Ajmere on 21st	Sowing completed; cholera still in Ajmere districts.
Jeypore („ „)	.....	Weather cloudy, and signs of rain; cholera in city decreasing, average daily deaths four.
Ulwur („ „)	.....	Crops suffering from want of rain; prices steady; health fair.
Nepal—		
Katmandu (Aug. 17th)	2·90; constant rain	Weather cool and cloudy.

Inundation Canals. Upper Sutlej Division	...	...	...	...	...	...	Lahore ...	3,000	...	...		...	The operations of the month show an increase of 14,206 acres as compared with June of last year. There is an increase of 14,474 acres in sugarcane, which is principally in the Delhi District. Rainfall has been favorable in all but the Hissar District. The falling-off in the area irrigated on the Upper Sutlej Inundation Canals is due—1st to late rise of river; 2nd, to delay in opening canals owing to difficulty in obtaining labor for clearances; and 3rd, to slack demand consequent on the large preceding rabi harvest. Demand for water was, however, increasing. There is an increase of 56,202 acres in the Mozaffargarh and Dera Gházi Khan Districts, and a falling-off of 14,522 acres in the Mooltan District. The supply in the Rivers Chenab and Indus has been good. The crops are flourishing, and there has been an increase of indigo cultivation.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RULES FOR THE FILLING UP OF VACANCIES IN THE CLERICAL ESTABLISHMENTS OF THE SECRETARIAT OFFICES OF THE GOVERNMENT OF INDIA, AND THE DEPARTMENTS DIRECTLY ATTACHED TO THEM, BY COMPETITIVE EXAMINATION.

Nos. $\frac{31}{1366-1368}$.

Extract from the Proceedings of the Government of India, in the Home Department (Public),—under date Simla, the 31st August 1882.

Read—

Home Department Resolution Nos. $\frac{31}{1161-66}$, dated the 21st July 1880, on the subject of raising the standard of ability among clerks attached to the Secretariats connected with the Government of India.

RESOLUTION.

The Governor General in Council has for some time past had under consideration the question of the best mode of filling up vacancies in the clerical establishments of the Secretariat Offices of the Government of India, and securing a reasonably high standard of qualification among the assistants employed.

2. The recognised difficulty in all Government Offices is to obtain men fit for the superior duties, such as those of drafting, précis-writing, preparing statistical returns, and the like. The pay provided for the superior appointments is in itself sufficient to give adequate remuneration for the proper performance of duties of this class; but the complaint is general that the standard of work done is at present often very inferior. It has been too much the rule to promote men from the lower grades as a matter of course; and as no test of qualification is applied either on admission to those lower grades, or on advancement beyond them, promotion has come to depend at least as much on seniority and the absence of misconduct as upon any merit or positive fitness for superior duty.

3. The Governor General in Council has decided that the first step towards reform must be to draw a marked line of distinction between the superior and inferior classes of appointments, and that for this purpose the Secretariat Clerical Service shall for the future be separated into an Upper and a Lower Division,—the former comprising all appointments the pay of which is Rs. 200 and upwards, the latter all appointments (other than those of mere copyists) the pay of which is below that sum. No clerk will be entitled to promotion from the Lower to the Upper Division as a matter of course, or otherwise than in accordance with the rules laid down in this Resolution.

4. As regards the mode of recruiting both Upper and Lower Divisions, the Governor General in Council has come to the conclusion that the only satisfactory principle to follow is that of free and open competition,* modified as regards the Upper Division by conditions favourable to persons at the present time actually serving in the Lower Division. The plan of filling up vacancies in the Government Offices by competitive examination has worked satisfactorily in the Home Civil Service, and in the few instances where it has been tried in this country. It does away at once with many abuses and difficulties, and seems peculiarly adapted to the circumstances of Indian Offices, the responsible heads of which have necessarily no intimate acquaintance with the personal qualifications of candidates for admission, and are driven to rely upon the

* Except in the case of the appointments of Registrars of Offices, Superintendents of Branches, or Head Assistants, for filling up which an absolute power of selection must remain with the Head of the Office concerned.

partial recommendations of subordinates or the certificates of irresponsible outsiders.

5. It has therefore been determined for the future to hold in Calcutta, and such other places as may be hereafter appointed for the purpose, an examination in January of each year for the purpose of selecting candidates for appointments in the Secretariat Offices of the Government of India. These examinations will be under the management of the Board of Examiners, Fort William, assisted by paid examiners, and acting in communication with the Secretary to the Government of India in the Home Department. The precise dates of the annual examination will be notified in the *Gazette of India* on or before the 30th November previous.

6. The subjects of examination will be the following, all of them being obligatory :—

A.—For Candidates for Appointments in the Lower Division.

	Marks.
1. Arithmetic and Elementary Mathematics* ...	500
2. Geography	250
3. History (English and Indian)	500
4. Handwriting	500
5. English Composition	500
6. Letter-drafting and Précis-writing	1,000

* *i.e.* Algebra up to binomial theorem, and Euclid, Books I—IV.

B.—For Candidates for Appointments in the Upper Division.

1, 2, 3, 4, 5, 6. The same subjects and marks as under *A*, but the standard required will be materially higher.

7. Any special subject of examination prescribed by any particular Department 1,000

No candidate will be allowed any marks in respect of any subject of examination unless he shall be considered by the Examiners to show a competent knowledge of or a real proficiency in such subject. No candidate will be considered qualified who does not obtain at least one-third marks in subjects 4, 5, and 6; and no candidate will be eligible for the Financial Department who does not also obtain at least one-third marks in Arithmetic and Elementary Mathematics.

7. Every candidate for an appointment in the Lower Division must send a written application for permission to appear at the examination to the Secretary to the Board of Examiners between the 15th and 31st days of December (inclusive). The application should be in the form given on the margin, and be accompanied by a fee of Rs. 10, one-half of which will be returned to unsuccessful candidates. With the application must also be forwarded—

[FORM.]

To the Secretary to the Board of Examiners, Fort William.

SIR,

I request permission to present myself at the ensuing examination of candidates for appointments in the Lower Division of Government Clerkships. The fee of Rs. 10 is forwarded herewith.

I am, &c.

(1) Evidence that the candidate is not less than 19 and not more than 24 years of age.

(2) A certificate from a Government Medical Officer of or above the rank of Assistant Surgeon that the candidate is in good health and of sound constitution.

(3) A certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or (when a year or more has elapsed since his education terminated) from some respectable householder, to whom he is well known in private life, and who is himself personally known to the head of some Government Office,—this last fact being certified by the counter-signature of the officer in question.

8. Every candidate for an appointment in the Upper Division must in the same way send a written application for permission to appear at the examination to the Secretary to the Board of Examiners between the dates above specified. The application should be in the form given on the margin, and be accompanied by a fee of Rs. 20, half of which will be returned to unsuccessful candidates. Candidates must forward with the application the evidence of age and certificates of health and moral character prescribed in paragraph 7 above.

[FORM.]

To the Secretary to the Board of Examiners, Fort William.

SIR,

I request permission to present myself at the ensuing examination of candidates for appointments in the Upper Division of Government Clerkships. The fee of Rs. 20 is forwarded herewith.

I am, &c.

9. The number of candidates to be selected by the Examiners for each Division will be notified in the *Gazette of India* by the Home Department on or before the 30th November. This number will be determined, in communication with the heads of the offices concerned, with reference to the number of vacancies existing or estimated as likely to occur within the course of the following year, *plus* a margin of 10 per cent. for casualties. In each year after the first the number of appointments to be notified will be reduced by the number of selected candidates remaining on the list from former years who may not yet have received appointments.

10. Every third vacancy occurring during any year in the upper division of an office may be filled up by the head of the office if he think fit, in accordance with the results of a departmental examination of clerks already in the lower division of the same office. In all such examinations subjects 4, 5 and 6, in paragraph 6 above, shall be compulsory. Vacancies which it is intended to fill up under this paragraph will not be reported as vacancies for the purposes of paragraph 9.

11. As soon as practicable after the open competitive examinations, the Board of Examiners will prepare a list of selected candidates in each Division in the order of merit, up to the number notified under paragraph 9, if so many are found qualified; and this list will be circulated to the heads of the offices concerned. Candidates will be given their choice of Departments as far as possible, and the Board of Examiners will intimate such choice to the head of each office, who will offer the vacant appointments at his disposal to the candidates electing his office in the order in which they stand on the list, and thereafter to the other candidates in the same order, through the Secretary to the Board of Examiners. Priority of selection as between the heads of different offices will be regulated by such orders as the Governor General in Council may from time to time make in this behalf. (In the case of the Foreign Office, the Secretary shall be at liberty to select any qualified candidate on the list.) It will be open to a selected candidate to decline any particular appointment offered him, and his name will not on that account be removed from the list; but no candidate's name shall remain on the list for either division after he has attained the age of 25 years, or for more than two years after the date of his being entered as a selected candidate.

12. The foregoing rules will govern the case of candidates who are not now serving in the offices to which this Resolution applies. Except as provided in paragraph 10, there will in future be no promotion from the Lower to the Upper Division. But any clerks who are at the date of the issue of this Resolution serving in the Lower Division may present themselves at any one examination for vacancies in the Upper Division that may be held in 1883 or 1884; and if they succeed in then obtaining marks indicating a competent knowledge of subjects 1, 2, and 3 (as provided in paragraph 6), and one-third marks in subjects 4, 5, and 6, the Board of Examiners will place their names, in order of merit, on the list of selected candidates drawn up under paragraph 11, above the names of all other competitors, irrespective of the fact that these last may have obtained higher marks in the examination. If a candidate whose name has been placed on the list under the provisions of this paragraph declines the appointment offered him, his name will be removed from the list, and he must

look for promotion only under paragraph 10. The concession made above in favour of clerks now in the Lower Division will sufficiently provide for the case of clerks who entered the inferior grades of the service in past years with the expectation of working their way up to higher appointments. No fees will be charged to candidates presenting themselves under this paragraph, but no such candidate will be admitted to the examination who does not at least 15 days before the date of examination submit to the Board of Examiners a certificate from the head of his office declaring that his conduct while serving in the Lower Division has been satisfactory.

13. All selected candidates receiving appointments will be on probation for twelve months; and if at the close of that period their work has not been found to give satisfaction, they will receive their discharge, and will have no claim to gratuity or compensation on that account. This rule will not apply to clerks selected for the Upper Division who were previously permanent clerks in the Lower Division.

14. Candidates accepting appointments must understand that their future promotion in their Office within the Division to which they belong will depend entirely upon their work and merits. No clerk will have any claim as of right to rise beyond the grade upon which he may have been brought in, though in ordinary course clerks who satisfy the head of their Office will receive promotion to vacancies in the Division as they occur, new entrants being, as a rule, though not as a matter of course, brought in on the lower grades.

15. Transfers from the Upper Division of one Government Office to that of another, or from the Lower Division of one Office to that of another, may be arranged by the heads of the offices concerned; but no transfer by arrangement from the Lower Division of one Office to the Upper Division of another can be allowed in future.

16. These orders will apply to the Secretariat Offices of the Government of India and Departments directly attached to them, such as the Sanitary Commissioner with the Government of India, the Surgeon General with the Government of India, the Inspector General of Forests, the Accountant General, Public Works Department, the Director General of Railways, and the like.

17. On the occurrence of any vacancy hereafter in any office to which this Resolution applies, when no candidate qualified under these rules is available to fill such vacancy, temporary arrangements may be made by the head of the office to carry on the work until the results of the next examination are known.

ORDER.—Ordered, that a copy of the above Resolution be forwarded for information and guidance to all the Departments of the Government of India and to the Heads of Offices* under the Home Department, and that the Resolution be published in the Supplement to the *Gazette of India*.

* Surgeon General with the Government of India.
Sanitary Commissioner with the Government of India.
Secretary to the Board of Examiners.
Registrar of the Calcutta University.

A. MACKENZIE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29th AUGUST 1882.

GENERAL REMARKS.—Rain in varying quantities has fallen in all parts of the country, the only exceptions being Sholapur in the Bombay Presidency, Akola in the Berars, Dera Ismail Khan and Peshawar in the Punjab, Agar, Sirohi and Meywar among the Rajputana and Central India States, and Jalpaiguri in Bengal.

The rainfall of the week has benefited standing crops in all Provinces, and agricultural prospects on the whole are very satisfactory. More rain would, however, be beneficial in parts of five districts of Madras, in a few places in Bengal, in two districts of the North-Western Provinces and Oudh, and in three districts in the Punjab. In Bombay rain is wanted in most districts, in some urgently; locusts are reported in two districts. Prices are generally falling in the North-Western Provinces and Oudh, and the early *kharif* crops are being cut in places.

The barometric pressure has varied considerably during the week, sometimes rising and sometimes falling; but towards the end of the week the general tendency has been towards a fall all over India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Aug. 30th)		
Bellary ...	1·42 (average of six stations).	Standing crops—wet good, dry partially withering; agricultural operations progressing.
Kurnool ...	·96 (average of eight stations).	Crops beginning to wither in parts of five talukas, elsewhere generally good; more rain wanted; agricultural operations progressing; cattle-disease in parts.
Ganjam ...	1·79 (average of sixteen stations).	Rain wanted in two divisions; standing crops thriving; harvest gingelly and cotton, outturn average; fever, small-pox, and cattle-disease continue; slight cholera in parts.
Kistna ...	1·33 (average of twelve stations).	More rain wanted; crops generally recovering; agricultural operations progressing; fever and small-pox slight; cattle-disease throughout.
Chingleput (Madras) ...	1·60 (average of nine stations).	Standing crops good where water available; agricultural operations progressing; small-pox in parts.
Coimbatore ...	1·56 (average of thirteen stations).	Standing crops paddy promises well; dry crops suffer from want of rain and from ravages of insects; harvest dry crops, yield about average; small-pox, fever, cholera, and cattle-disease in parts.
Tanjore ...	1·45 (average of twelve stations).	Standing crops good except in parts damaged by floods; harvest gingelly, yield below average; cattle-disease in parts.
Madura ...	·92 (average of nine stations).	Harvest paddy, outturn fair; cholera in parts.
Malabar ...	·71 (average of twelve stations).	First crop good; small-pox, fever, and cholera in parts.
Travancore ...	1·67	Fever prevalent. *General Remarks.*—General prospects good.
Bombay—(Aug. 30th)		
Kurrachee ...	·32; Manora, ·17; Tanna, ·33; Jerruck, ·34.	River at Kotri on 28th, 18¾ feet against 17 feet 2 inches on same date last year; fever in six talukas; 1 case small-pox in Sujawal; in Tatta crops damaged by excess of water and also by rats in three talukas; wheat, red rice, and *bajri* in Kurrachee, 22, 34 and 33, in Sehwan 28, 42 and 48, in Ghorabari 18, 44 and 40, and in Jati 20, 36 and 44 lbs. per rupee respectively.
Hyderabad ...	Rain in five talukas; average fall ·87.	River falling; small-pox in two talukas; fever in five talukas; wheat 25, *juari* 45, *bajri* 40, red rice 30, and white rice 22 lbs. per rupee.
Ahmedabad ...	·44	Total rainfall 27·81; young *kharif* crops good; transplanting of rice continues; wheat 29 and *bajri* 30 lbs. per rupee.
Baroda ...	·86	Total rainfall 31·28; want of more rain generally felt; cholera prevails at Sidhpur and continues at Amreli, at Sadra Contingent Camp it is mild, and has abated at Manekwara; *bajri* 32 and common rice 24 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	·62	Total rainfall 33·14; crops healthy; break continues; rain wanted; *juari* 36 and *nagli* 52 lbs. per rupee.
Násik ...	Igatpuri, 2·46; Peint, 2·61; slight showers in some talukas, but rain urgently wanted in all.	Young locusts in Malegaon, Baglan, and Nandgaon causing much anxiety; slight cholera in five talukas; crops as yet doing well; wheat 25½, *bajri* 38¾, and rice 28 lbs. per rupee.
Colaba (Bombay) ...	·42	Total rainfall 57·65, being ·18 above average; abnormal temperature 2° warm except on 26th, when it was 1° cool; vapour in air normal; abnormal wind north-east from 23rd to 26th and rest from 27th to 29th.
Poona ...	Rain wanted in eastern talukas.	Twenty-two cases of cholera in Sirur taluka, of which 14 were fatal; *bajri* 49 and *juari* 58 lbs. per rupee, in Poona *bajri* 37 and *juari* 48 lbs. per rupee.
Ahmednagar ...	Sheogaon, ·22; Jhamkhed, ·09; Rahuri, ·05; no rain elsewhere.	Total average rainfall of the district 11·43; *bajri* crops are withering from want of rain in all talukas except Akola; cholera in Parner 3 fresh attacks and 4 deaths, in Sheogaon 2 deaths; *bajri*—maximum 72 lbs. in Jhamkhed, minimum 48 in Kopergaon; *juari*—maximum 102 in Jhamkhed, minimum 60 in Kopergaon.
Sholapur ...	No rain	*Kharif* crops suffering from want of rain; cholera dying out, 69 cases, 31 deaths; *bajri* 58 lbs. 15 tolas, and *juari* 80 lbs. 28 tolas per rupee.
Dharwar ...	Rain at six stations; maximum at Ron, 1·01.	Standing crops thriving but will require rain before long; cotton being sown in some talukas and in others ground is being prepared for it and for sowing late crops; *juari* 56 lbs. and rice 20 lbs. per rupee; public health good; cattle-disease in Hangal.
Kanara ...	Karwar, ·28; Hallial, ·06.	Total rainfall 87·08; rice crops in ear in Karwar; rain wanted; sugarcane and garden produce thriving; fever in two talukas above ghat; common rice in Karwar 11 seers, in district average 13 seers per rupee.
Rajkot ...	1·47	Total rainfall 15·25; weather warm and cloudy; cholera in town and civil station Rajkot and in other places; crops thriving; *bajri* 27 and *juari* 31 lbs. per rupee.
		General Remarks.—Rain wanted in most districts, in some urgently needed; locusts in Khandesh and Násik; fever and cattle-disease in some districts; cholera abating.
Bengal—(Aug. 30th)		
Chittagong ...	0·48	Prospects of crops good, but rain still wanted for transplanting winter rice; prices steady; small-pox, cholera, and cattle-disease still reported.
Dacca ...	1·50	Prospects of all crops good; rivers rising; cholera diminishing.
24-Pergunnahs (Calcutta)	3·02	Prospects of early rice, jute, and sugarcane continue satisfactory; transplanting on low lands nearly finished, more rain wanted for transplanting on high lands; prices of common rice stationary; public health generally good; fever reported from Baraset and Diamond Harbour sub-divisions.
Moorshedabad ...	0·20	Rain done much good to transplanted winter rice and facilitated transplanting, which is still going on; autumn rice being harvested; on the whole public health good; cattle-disease reported from Kandi sub-division.
Rajshahye ...	1·76	More rain wanted for winter rice; cutting of jute nearly finished; fever still reported.
Burdwan ...	2·22	More rain required for winter rice; other crops good; a few cases of cholera reported.
Rungpore ...	0·46	Weather cloudy; prospects of crops favourable, but more rain wanted; public health good, except a few cases of cholera in thana Bhawaniganj.
Bhagálpur ...	1·73	More rain wanted for transplanting winter rice; autumn harvest progressing; crop generally excellent; north-east of district extensively flooded by the Kosi.
Purneah ...	2·63	Prospects of crops only fair generally, in parts very bad; transplanting progressing vigorously, but very late; rivers high; fever prevalent.
Patna ...	2·69	Prospects of autumn crops good; sugarcane looking well; transplanting of rice making fair progress, more rain would do good; cholera abating in Behar.
Durbhunga ...	2·63	Autumn crops slightly below average; rice prospects good; prices stationary; health improving.
Hazáribágh ...	2·77	Weather hot and cloudy; autumn crops promising, and are being reaped in some parts; transplanting of rice in progress; public health generally good.
Cuttack ...	3·74	Reaping of early rice commenced; late rice progressing well; cholera disappearing.
		General Remarks.—More or less rain fell in all districts during the week, except in Jalpaiguri; general prospects of crops much improved; transplanting of late rice is rapidly being completed, but more rain is still wanted for transplanting on high lands in some places; autumn harvest will be rather short in some districts owing to previous want of rain, generally however it is expected to yield a fair average crop; sugarcane crop promising well everywhere; fever prevalent in Nadiya, Purneah, and a few other districts; cholera somewhat abated in Chumparun; cases of cholera and cattle-disease still reported from some places; small-pox still exists in Chittagong, Singhbhum, and Manbhum.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (Aug. 29th)	2·10; Chandauli, 1·30; Gungapur, *nil.*	Weather favourable for crops; *sawan* being cut; health of cattle good; a few isolated cases of cholera and some fever, health otherwise good; bazars well supplied; prices stationary.
Allahabad („ 30th)	Rain general and abundant.	Crops doing well; cholera nearly disappeared; rice fallen, other prices stationary.
Gorakhpur („ 29th)	Plentiful showers throughout the district.	Crops promising; health fair; prices falling.
Jhánsi („ 28th)	Average 3·10	Weather still cloudy; the crops are in a flourishing state, except in pargana Moth, where the *kharif* crops in *mar* soil are suffering somewhat for want of fine weather; rain of last week has done good generally to *kharif* crops and greatly facilitated the bringing of land under *rabi* cultivation; prices falling; supplies sufficient; cholera still continues in pargana Mau and Garotha; cattle-disease reported from pargana Jhánsi.
Agra („ 29th)	Rain in all parganas from ·60 to 7·10.	Slight fever continues, but general health good; prices stationary.
Bareilly („ „)	Rains continue steady	Cholera still bad at Aonla, abating in Bareilly, 1 case in the European Infantry lines.
Meerut („ 26th)	·80; Hapur, ·40; Bagpat ·60; Ghaziabad 2·70.	Weather seasonable; crops thoroughly revived and prospects good; fever reported from all tahsils; supplies sufficient; prices easier.
Farukhabad („ 29th)	General rain	Prospects now satisfactory; prices slightly lower; health fairly good; no sickness, except slight fever.
Kumaun („ „)	1·20	Crops very good; health good; cattle-disease continues in parts; prices stationary.
Rae Bareli ...	2·90; Digbijaiganj, 1·50; Salon, 3·30.	Cholera still hanging about, but on the decrease; cattle-disease in some villages of tahsil Dalmau; agricultural prospects fair; prices steady.
Lucknow (Aug. 29th)	1·80; Maliabad, 2·00; Mohanlalganj, ·60.	Crops much benefited by the rainfall of the 22nd and 25th; more rain wanted to improve the paddy in tahsil Mohanlalganj; prices steady; cholera decreasing.
Partabgarh („ „)	Good rain at Kunda; heavy showers this morning at Sadr.	Prices falling; *makka* sown and *kakoon* being cut; cattle-disease in pargana Atteha and at Patti; cholera has decreased considerably.
Sitapur („ „)	Average 1·10	Rice suffering somewhat in Misrik and part of Biswan; cholera abating; traces of cattle-disease in Misrik; prices slightly fallen.
Cawnpore („ „)	Average 3·90	Rain very beneficial to all crops; prospects excellent; weather still cloudy; cholera decreasing; prices slightly fallen.
Fyzabad („ „)	1·90; Akbarpur 1·20; Bikapure, 1·80; Tanda, 4·20.	Rain has greatly benefited all crops; prospects good; slight cholera in part of district.
		General Remarks.—Good rain throughout the province and prospects good everywhere, except that more rain would still be beneficial for rice in Lucknow and Moradabad; prices generally falling; cholera decreasing, except in parts of Moradabad and Bareilly; the usual autumnal fever has appeared, but is of a mild character; cattle-disease continues in Oudh, Jhánsi, and Kumaun, but is decreasing in Saharanpur.
Punjab—(Aug. 30th)		
Delhi ...	·30	Health fair; prices stationary.
Hissar ...	·30	Health good; prices falling.
Umballa ...	·30	Crops suffering for want of more rain; health good; prices stationary.
Jullundur ...	1·60	Health good; prices falling.
Amritsar ...	·20	Health good; prices slightly falling.
Sialkot ...	·50	Health good; prices rising; more rain wanted.
Lahore ...	1·0	More rain expected; health good; prices stationary.
Ferozepore ...	1·0	Health good; prices stationary; state of crops improved.
Mooltan ...	·60	Fever prevalent; prices stationary.
Rawalpindi ...	·40	Cattle-disease continues; prices stationary.
Dera Ismail Khan ...	No rain	Fever prevalent; prospects good; prices steady.
Peshawar ...	Rain needed	Prospects are good; health good; prices steady.
		General Remarks.—Rain has been general throughout the province, except in the Dera Ismail Khan and Peshawar districts; more rain is needed in the Umballa, Sialkot, and Peshawar districts; with the exception of two or three districts where fever prevails, the health of the province continues to be good; prices of food-grains are rising in the Sialkot district, and falling slightly in the Hissar, Jullundur, and Amritsar districts; prices in the other districts are stationary.
British Burma—(Aug. 26th)		
Akyab ...	8·72	Total rainfall 171·41 inches; slight cholera in three townships and 7 deaths from small-pox in one township, otherwise public health good; cattle-disease severe in one township; prospects of crops good.
Rangoon ...	2·10	Total rainfall 61·31; public health good; crops progressing favourably.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Bassein ...	3·19	Total rainfall 90·97 ; public health good ; 12 deaths from cattle-disease in one township ; ploughing and transplanting continue ; planted paddy looking well.
Prome ...	3·14	Total rainfall 30·88 inches ; 5 deaths from cholera reported from district, otherwise public health good ; more rain has fallen, and harvest prospects are better.
Amherst (Moulmein) ...	3·40	Total rainfall 156·33 inches ; public health good, both in Moulmein and district ; cattle-disease continues in three townships ; resowing still going on.
Toungoo (Aug. 19th)	7·23	Total 60·29 inches ; 3 cases and 1 death from small-pox in town, otherwise public health good ; 13 deaths from cattle-disease in one township.
Ditto („ 26th)	6·74	Total rainfall 67·03 ; 4 cases and 2 deaths from sporadic cholera in one township, otherwise public health good.
		General Remarks.—Cholera in Tharrawaddy and a few cases in three or four other districts, otherwise public health good ; cattle-disease continues ; reports of crops generally satisfactory.
Assam (Aug. 30th)		
Gauhati ...	·62	Weather seasonable ; transplantation in progress ; prospects of crops and public health fair.
Sylhet ...	12·76	State and prospects of crops good ; public health also good.
Cachar ...	4·38	Weather rainy ; more than half of *sali* crops transplanted ; reaping of *dumahi* and *mgrali* crops continues ; prospects of tea good ; common rice 21 $\frac{5}{16}$ seers per rupee ; 1 case of cholera from Lakhimpur, 2 from Sadr reported.
Dibrugarh ...	6·36	Weather rainy ; transplanting *sali* paddy ; *aus* paddy harvested ; cattle-disease still reported ; public health good.
Mysore and Coorg—(Aug. 30th)		
Bangalore ...	2·56	Standing crops thriving.
Mysore ...	2·12	Standing crops in good condition.
Mercara ...	·73	Break in the monsoon continues ; transplanting rice nearly completed ; prospects of season and health good ; prices stationary.
		General Remarks.—Rain has been general throughout the Mysore. State, in Kolar 2·66, in Shimoga ·38 ; crops in good condition ; sowing of *cholum, kar, ragi,* horse-gram, and other seeds in active progress ; prospects favourable ; public health good ; prices ; satisfactory.
Berar & Hyderabad—(Aug. 30th)		
Amráoti ...	1·30	Crops in good condition ; prices—wheat 16 and *juar* 28 seers per rupee.
Akola ...	.....	Rain wanted ; crops doing well.
Hyderabad	1·26	Total rainfall from 1st January 17·11 ; *kharif* crops benefited by rainfall, and are thriving ; rain urgently needed in the Merchall taluk, where there has been no rain during this week ; *abi* sowings continue ; fever prevalent in one taluk and cattle-disease in another ; prices—wheat 15½, coarse rice 10½, white *juari* 25¼, yellow *juari* 30¼, and *tur* 25½ seers per current sicca rupee.
Central India States—(Aug. 30th)		
Indore ...	·30	Prospects continue favourable, except in the city, where cholera has not yet disappeared ; health is good.
Morar (Gwalior) ...	5·19	Health and prospects good.
Sutna ...	2·79	
Neemuch ...	2·70	Public health good ; crops thriving.
Goona ...	6·32	Crops and health good ; wheat 20 seers per rupee.
Bhopal ...	5·56	Prospects good ; cholera still at Bhopal.
Agar ...	No rain	Prospects good ; cholera still in the district, but not generally prevalent.
Nowgong ...	2·67	*Kharif* prospects good ; weather seasonable ; health good ; some cases cholera in cantonments ; prices stationary.
Manpur ...	Occasional slight showers.	Ploughing of land for *rabi* continues.
Rajputana—		
Abu (Aug. 30th)	3·87	Weather cloudy, occasionally clear.
Sirohi („ 27th)	.....	Tanks, wells, and health good ; rain much needed for crops ; weather cloudy.
Marwar („ 25th)	1·0	Four months' water in tanks ; health good ; prospects much improved ; weather cloudy ; prices falling.
Meywar („ 26th)	.....	Tanks and wells good ; health fair ; prospects very good ; sky cloudy ; more rain needed.
Harowti („ „)	Deoli, 4·87 ; Tonk, 9·73	Indian-corn damaged by excessive rain ; cholera reappearing in Tonk since 25th, 10 cases and 5 deaths reported.
Jhallawar („ 23rd)	1·71	Health and prospects good.
Ajmere („ 29th)	3·92	Seasonable rain during last week throughout the district ; fine weather now wanted ; prospects excellent ; health good.
Jeypore („ „)	3·51	Prospects fair ; deaths from cholera in Jeypore city, daily average 5.
Ulwur („ „)	1·73	Rain has done much good ; prices falling ; prospects good ; health fair.
Nepal—		
Katmandu (Aug. 17th)	1·11	Weather cool, cloudy ; occasional thunder showers ; outturn of Indian-corn moderate ; prospects of rice good.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRON WORKS IN RANIGANJ.

Nos. 1-2C.I., dated Simla, 1st September 1882.

Read—

Government of India, Department of Finance and Commerce, Resolution No. 2899, dated 4th August 1882.

OBSERVATIONS.—The Government of India having lately had under consideration an application from a Calcutta firm, representing certain iron matters in England, enquiring what quantity of manufactured iron Government of India would be prepared to take annually from any Company purchasing the Raniganj Iron Works and at what prices, deem it advisable to notify the views on the subject for general information.

2. The Government of India are not disposed to part with the Iron Works in question to any Company which is not in command of a capital of from 40 to 50 lakhs of rupees, and which does not contemplate the manufacture of wrought iron and steel as well as castings. They are moreover not prepared to bind themselves to purchase from the Works more than from 12,000 to 15,000 tons of iron and steel annually for ten years, in the proportions of—

	Percentage.
Steel	30
Cast iron	60
Wrought iron	10
	100

3. It is however probable that a larger quantity would be required until other iron works have been established in other parts of India.

4. The quantity specified is based on a calculation of the average annual consumption of the territory to the north and east of the East Indian Railway from Calcutta to Mogul Serai, which area it is considered the Iron Works at Raniganj might permanently command, irrespective of any foundries that might eventually be established in the Central Provinces and Upper India.

5. In addition to the above, the Raniganj Iron Works Company would have such custom as it could secure from guaranteed subsidised and private Railway Companies and from the general public for the supply of such articles as roof-girders, railings, water pipes ; but in view of the prospect of iron works being opened in other parts of the Empire, such custom would probably not extend permanently much beyond the area above indicated.

6. With regard to price, it is considered that the promoters of any Company should propose to the Government of India the rates at which it would be prepared to undertake contracts for the supply of its manufactures.

7. The rates proposed should consist of a fixed English price *plus* average freight payable in England in sterling, or in India, if the Company should prefer it, after conversion at the current rate of exchange at the time of payment ; also perhaps an addition of Rs. 5 per ton payable in India for Railway freight between Calcutta and the foundry.

ORDER.—Ordered, that copy of this Resolution be forwarded to the Government of Bengal in the Public Works Department for information and guidance ; also that copy be published in the *Gazette of India* for general information.

W. S. TREVOR, *Colonel, R.E.,*
Secretary to the Government of India.

RESOLUTION.

In consequence of representations made to the Government of India that the change in the furlough rules effected in 1868, whereby officers absent on leave retain a lien on their appointments, had resulted in a largely increased number of acting appointments and in frequent changes in the *personnel* of the administrative staff to the detriment of public interests, a circular was issued on the 30th September 1881, asking Local Governments and Administrations to report whether any practical inconvenience had been felt owing to the operation of the rule; and, if so, to state the remedies which might seem to them expedient to secure the effectual removal of such inconvenience.

2. From the replies which have now been received, the Governor General in Council is glad to find that nearly all the local authorities are of opinion that the supposed effect of the rule in question has been much exaggerated and misunderstood, and that the provincial statistics when carefully analysed do not justify the withdrawal of the concession whereby an officer on furlough retains a lien on his substantive appointment or on a substantive appointment of like character and not less pay.

3. At the same time there can be no doubt that in some provinces changes among the administrative, and especially among the district staff, have been more frequent than is at all desirable; and the Governor General in Council is of opinion that something should be done to check this tendency, where it exists, partly by amendment of the rules in some points of minor detail, and partly by the adoption in all Local Administrations of a settled line of policy in working the rules.

4. In the first place the enquiries recently instituted have made it clear that when unduly frequent changes in the *personnel* of the administrative staff occur, they are often not so much the effect of the existing rules as of the manner in which they are worked. Local Governments are sometimes too ready to defer to the personal wishes and inclinations of officers returning from leave; but unless they insist firmly on the principle that an officer must accept whatever appointment suitable to his rank and position in the service may chance to be available on his return, unnecessary changes take place, the public service suffers, and the convenience of other officers, more or less numerous, is sacrificed to meet the wishes of one favoured individual. The Government of India consider it undesirable that frequent transfers among district officers should take place when these can be avoided; and, while fully admitting that it is quite possible to keep an officer too long in charge of the same district, they are of opinion that the local knowledge which a district

officer is expected to possess cannot be acquired unless he remains for a reasonable period in the same appointment. His Excellency in Council is inclined to hold that it would be a distinct advantage to the public service to keep a Magistrate-Collector as a rule for five years in the same district, and that, on the other hand, after a six or seven years' incumbency a change is desirable both for the sake of the officer himself and of the district administration. It should, therefore, be understood that, unless some special circumstances render it desirable to replace an acting officer by a returning incumbent, an officer in the regular line on return from furlough should be posted to such actually vacant office as may happen to be suited to his rank and pay; and, in determining his disposal, the *only* consideration which should be allowed to weigh is the question how his services can best be utilised with the least possible disturbance of existing arrangements.

5. The Governor General in Council considers further that if measures were taken to regulate the times of return of officers from furlough so as to make these coincide better with the times of proceeding on furlough, the principal ground of dissatisfaction with the rules, from an administrative point of view, would disappear. The Local Government should have more power than it at present exercises to regulate the time of an officer's return with reference to the convenience of the public service. It ought, for instance, to be at liberty for this reason to require an officer to take less or (when to his credit) more leave than he applies for (within reasonable limits), on penalty of his forfeiting his lien upon his appointment if he declines to accept the arrangement: thus, if an officer applies for twelve months' furlough, and the Local Government is aware that it will have difficulty in providing him with a suitable appointment on the expiry of that term owing to the simultaneous return of senior men or for other reasons, it should require him to return either after, say, ten months, or fourteen months, as may best suit the requirements of the public service. At present the Government grants, as a matter of course, the precise amount of furlough asked for. It ought to have at least the same discretion in settling the leave-arrangements of its officers that a mercantile firm would exercise in granting leave of absence to its *employés*. Effect may be given to this suggestion from the 1st April 1883.

6. As the rules stand at present a Covenanted Civil Servant is only allowed to take his first furlough after eight years' residence in the country. It appears to the Government of India desirable, both in the interests of the public service and as a concession to its junior officers, that this period should be reduced, and that the first furlough should be admissible after five years' residence. It is for the public advantage that some portion of the furlough that may be earned during a civilian's term of engagement should be taken at the time when his services are of least value. A change in the furlough rules to the effect suggested will be recommended to Her Majesty's Secretary of State for India.

7. It has been brought to the notice of the Government of India that occasionally improper advantage can be taken of the rule as to lien on appointment, by officers who have much furlough to their credit and can easily procure medical certificates. The Governor General in Council thinks it would be a fair rule to lay down that if an officer within two years of his return from furlough again takes furlough on medical certificate he should not retain any lien on his appointment. A change in the furlough rules to this effect will also be recommended to Her Majesty's Government.

8. The points mentioned in paragraphs 6 and 7 are the only matters in regard to which the Governor General in Council thinks any alteration of the present rules to be necessary.

ORDER.—Ordered, that a copy of this Resolution be communicated to Local Governments and Administrations for information and guidance, and that a copy be communicated to the Department of Finance for information and with a view to the necessary reference being made to the Secretary of State on the points mentioned in paragraphs 6 and 7 of the Resolution.

Ordered also, that this Resolution be published in the Supplement to the *Gazette of India*.

A. MACKENZIE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 5th SEPTEMBER 1882.

GENERAL REMARKS.—Good rain has fallen throughout the Madras Presidency; prospects of standing crops are good, and harvesting has commenced in a few places. In Coorg the monsoon has set in again; rice and *ragi* crops are doing well. In the Mysore State, in the Nizam's Territories, and the Berars there has been light rain, except in Hyderabad where it has been heavier; standing crops are in good condition and prospects are favourable. In the Bombay Presidency good rain has fallen in all districts except Guzerat, and has been beneficial to standing crops; parts of the Guzerat division are in need of more rain; locusts are reported from a few places. In the Central Provinces the *kharif* crops have benefited by the recent break in the rains and are promising well; weeding operations are in progress, and occasional showers are occurring.

In Central India and Rajputana rain has been reported from every State, except Sirohi, Jeypore, and the British district of Ajmere, and prospects are favourable everywhere except in Sirohi. Rain has also been general throughout the Punjab, except in Hissar and Peshawar. The North-Western Provinces and Oudh have had more or less good rain in all districts; early crops are being cut, and prospects of all other crops are good; more rain is now wanted in part of Lucknow only. In Bengal rain in varying quantities has fallen in all districts; prospects of the winter rice crops have improved, *jute* and sugarcane are in satisfactory condition, and the autumn harvest is progressing, with promise of a fair average outturn; a little more rain would help the transplanting of the winter rice crop in some places. In Assam the transplantation of the winter and the reaping of the early autumn crops are progressing; rain has been general; tea and sugarcane are doing well.

In British Burma good rain has fallen everywhere except in two districts, where it has been light; agricultural operations are on the whole progressing satisfactorily, except in parts of Prome and Tharrawaddy.

The general fall in the barometer noticed last week was succeeded by a rise which, beginning in Western India, spread over all parts of the country, and was again followed by a steady fall all over India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Sept. 7th)		
Bellary ...	1·18 (average of eight stations).	Standing crops generally good, dry partially withering in one taluk; agricultural operations progressing.
Kurnool ...	**2·40 (average of eight stations).**	**Standing crops generally good; cattle-disease in parts.**
Ganjam ...	**1·14 (average of thirteen stations).**	**Standing crops thriving generally; harvest gingelly, outturn poor; fever, small-pox, and cattle-disease continue; cholera slight.**
Kistna ...	**1·56 (average of thirteen stations).**	**Standing crops recovering, but slightly afflicted by insects in parts; harvest gingelly, yield below average; agricultural operations progressing; small-pox slight and cattle-disease general.**
Chingleput (Madras) ...	1·86 (average of eleven stations).	Standing crops good where water available; agricultural operations progressing.
Coimbatore ...	1·40 (average of fifteen stations).	Standing crops paddy promise well, though *cholum* damaged by insects in one taluk; harvest dry crops, outturn average; fever, small-pox, cholera, and cattle-disease in parts.
Tanjore ...	2·61 (average of thirteen stations).	Crops generally good; harvest dry crops, yield below average.
Madura ...	1·57 (average of ten stations).	Standing crops fair; harvest paddy, yield average; cholera in parts.
Malabar ...	1·86 (average of fourteen stations).	Harvesting first crop commenced; fever, small-pox, and cholera in parts.
Travancore ...	2·64	Harvest progressing; fever slightly prevalent. *General Remarks.*—General prospects good.
Bombay—(Sept. 6th)		
Kurrachee ...	Dadu, 1·23; Keti, ·53; Sehwan, ·34; Thána Bula Khan, ·90; Kotri, ·35; Mirpur Batoro, ·05.	River at Kotri on 4th 16 feet 11 inches, same as last year; crops damaged by excess of water; *keon* worm doing some damage in Manjhand and rats in Mirpur Batoro and Jati talukas; small-pox in two talukas; fever and cold in six talukas; wheat, red rice, and *bajri* in Kurrachee 22, 34 and 32, in Manjhand 24, 36 and 46, in Tatta 23, 32 and 42, and in Shahbandar 20, 48 and 40 lbs. per rupee, respectively.
Hyderabad ...	Rain in nine talukas; average fall, 1·12.	River falling; fever in seven talukas; small-pox in Hyderabad; wheat 25, *juari* 45, *bajri* 41, red rice 30, and white rice 22 lbs. per rupee.
Ahmedabad ...	1·16	Total rainfall 28·97; crops doing well, but more rain urgently wanted; wheat 28 and *bajri* 32 lbs. per rupee.
Baroda ...	1·30	Total rainfall 32·58; cholera at Sidhpur and near Amreli; *bajri* 33 and common rice 24 lbs. per rupee.
Surat ...	·80	Total rainfall 33·94; rain wanted for rice and *bajri*; other crops healthy; *juari* 39 lbs. and *nagli* 53 lbs. per rupee.
Násik ...	Excellent rain in all talukas; maximum in Yeola, 5·45.	Locusts in Nandgaon, Malegaon, Baghlan, and parts of Chandore destroying crops; slight cholera in Násik, Sinnar, Yeola, and Baghlan talukas; wheat 28½, *bajri* 38, and rice 28 lbs. per rupee.
Colaba (Bombay) ...	Rain every day, heavy on 2nd and 5th; total of week, 4·53.	Total rainfall to date 62·18, being 12·92 above average; abnormal temperature fell from 1° warm on 30th to 3° cool on 3rd and then rose to 1° cool on 5th; vapour in air slightly in excess of normal, abnormal wind changed gradually from north-east on 30th to east-south-east on 2nd, was from east on 3rd, and from due north on 5th; wind normal on 4th; thunder and lightning on 4th and distant lightning on 5th.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Poona ...	Rain in three eastern talukas—maximum at Indapur, 6·0; minimum at Bhimthari, 1·65; slight showers in other talukas.	Three cholera cases in Sirur taluka, 2 deaths; *bajri* 47 and *juari* 59 lbs. per rupee, in Poona *bajri* 39 and *juari* 50 lbs. per rupee.
Ahmednagar ...	Maximum at Karjat, 12·09; minimum at Kopargaon, 1·85.	Total average rainfall of the district 15·94; rainfall has been beneficial to *kharif* crops; cholera—4 attacks and 2 deaths in Parner, 6 attacks and 2 deaths in Jhamkhed, in Sheogaon no fresh attacks, 1 death; small insects like grasshoppers are reported to be doing damage to the *bajri* crop in Kopargaon and Rahuri by eating the leaves and heads of the *bajri* plants; *bajri*—maximum 66 lbs. in Jhamkhed, minimum 48 in Kopargaon; *juari*—maximum 96 lbs. in Jhamkhed, minimum 60 in Kopargaon.
Sholapur ...	6·99	Total rainfall 28·11; cholera cases 38, of which 13 were fatal; rain throughout, good for *kharif* crops; *bajri* 59 lbs. 6 tolas and *juari* 80 lbs. 6 tolas per rupee.
Dharwar ...	Rain at all stations—maximum at Hangal, 5·10; minimum at Kalghatgi, 1·60.	The rain has done good to standing crops; cotton sowing still in progress in eight talukas, but retarded in Gadag taluka owing to want of break in Karajgi; ground is being prepared for cotton and other late crops; ague in two and cattle-disease in one taluka; public health good; prices stationary.
Kanara ...	Karwar, 9·92; Kumpta, 3·98; Hallial, 3·65; Sirsi, ·91.	Total rainfall 97·00; rice crops in ear in two talukas; sugarcane and garden produce thriving; fever partial; general health good; common rice in Karwar 11 seers, in district average 13½ seers per rupee.
Rajkot ...	·58	Total rainfall 15·83; weather hot and cloudy; cholera subsiding in Rajkot town and station; crops thriving; *bajri* 28 and *juari* 32 lbs. per rupee.
		General Remarks.—Good rain has fallen, except in Guzerat districts where it is much wanted; locusts in Násik and Khandesh; fever and cattle-disease in some districts; cholera abating.
Bengal—(Sept. 6th)		
Chittagong ...	4·04	More rain wanted in some parts for winter crop; prospects fair; prices somewhat high; cholera and cattle-disease still reported.
Dacca ...	0·75	Prospects of crops good; cholera prevalent.
24-Pergunnahs (Calcutta)	2·06	Prospects of early rice, jute, and sugarcane continue satisfactory; transplanting of *amun* paddy proceeding; more rain wanted; prices of common rice stationary; public health generally good; rivers rising.
Moorshedabad ...	·28	Transplanting of *amun* proceeding; rain still generally wanted in Tandhi sub-division; health of people generally good.
Rajshahye ...	3·40	More rain required; *aus* rice and *kaon* being cut, outturn not very good; jute fair; fever prevalent.
Burdwan ...	Cutwa, 2·31; Raniganj, 1·31.	More rain wanted throughout district; prospects of *aus* and sugarcane good; health generally good.
Rungpore ...	13·23	Prospects of standing crops good; transplanting winter rice progressing; early rice and jute being reaped; public health good.
Bhagálpur ...	3·56	Rain very beneficial; prospects good; outturn autumn harvest good; winter rice still being transplanted; public health good.
Purneah ...	2·43	Late rice poor on high lands and not yet all transplanted; outturn early rice poor; fever prevalent; rivers high.
Patna ...	1·81	More rain wanted in south for transplanting winter rice; *bhadoi* crops promising and are being reaped in some parts; cholera reported from Behar.
Durbhunga ...	11·15	Crop prospects fair; prices stationary; health fair.
Hazáribágh ...	3·85	Weather sultry; *bhadoi* crops doing well; rain wanted for transplanting rice crop in some parts; health generally good.
Cuttack ...	3·42	Early rice being reaped, good crop; late rice promises well; cholera again reported.
		General Remarks.—Rain fell in all districts during the week; prospects of winter rice crop improved, but more rain wanted in some places, particularly in Burdwan and Presidency divisions; transplantation which was delayed for want of sufficient rain is still proceeding in several places; autumn harvest progressing; general prospects of fair average outturn, though in some places injured by want of sufficient rain; fever prevalent in some districts; cholera and cattle-disease exist in some districts, former severe in Chumparun and latter in Hooghly.
N. W. Provinces and Oudh—		
Benares (Sept. 5th)	·10; Chandauli, 1·90	Prospects favourable; health of men and cattle good; no more cases of cholera reported; prices slightly falling; bazars well supplied.
Allahabad („ 6th)	Rain during week in all tahsils except Soraon, abundant in Sirathu and Handia.	Weather is now fine and favourable for the crops; health good, very slight cholera; rice fallen considerably; other prices steady.
Gorakhpur („ 5th)	Abundant rain throughout the district.	Fine weather wanted to ripen the crops; cattle-disease in two tahsils, also some cholera; prices falling.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Jhánsi (Sept. 4th)	Average rainfall 2·0; more or less rain almost every day.	*Kharif* prospects very good; *tili* and cotton in flower; harvesting of minor grains—*kamin, sama,* &c.—commenced; *rabi* lands being ploughed; supplies abundant; prices stationary; 65 deaths from cholera during the week, except in Bhadarwara; no fresh cholera cases for last two days; cattle-disease of a mild nature in Jhánsi.
Agra („ 5th)	Rain in four parganas, from ·10 to ·30.	*Bajri* cutting commenced; slight fever continues, but general health good; prices stationary.
Bareilly („ „)	Rainfall of 28th and 29th ultimo, 9·0.	Clear and fine weather now required for rice harvest; crops excellent; cholera still about, chiefly in rural parts.
Meerut („ „)	Occasional rain	Weather seasonable; crops flourishing; health good; supplies sufficient; prices falling.
Kumaun („ „)	Rainfall of 29th and 30th ultimo, ·90.	Fine weather now; crops excellent; *jhangra* and rice being cut in some places; cattle-disease continues; health good; prices stationary.
Lucknow („ „)	Sadr, 4·10; Malihabad, 5·10; Mohanlalganj, 2·40.	The rains have done good generally to the *kharif* crops; prospects good; more rain wanted in tahsil Mohanlalganj; prices steady; cholera has decreased considerably.
Partabgarh („ „)	Rain fallen in three tahsils.	Crops looking well everywhere; *kudri dhan, makra,* and *kakoon* being cut; slight cattle-disease prevalent; cholera has almost ceased.
Sitapur („ „)	Average rainfall 6·30	*Jarhan* in *ganjar* land promises to be very fine; other rice being cut; sugarcane, *mash,* and crops in general doing well; cholera in three tahsils.
Fyzabad („ „)	Sadr, 6·30; Akbarpur, 1·20; Bikapur, 5·00; Tanda, 2·0.	Prospects good; slight cholera in tahsil Fyzabad.
Rae Bareli („ „)	General rain	Rain favourable for crops; *sawan, kakoon,* and *makra* being cut; cholera still in two tahsils; cattle-disease in some villages of tahsil Dalman; prices almost stationary.
Cawnpore („ „)	Average rainfall over 1·80.	Weather now clear; prospects excellent; cholera declining; prices nearly stationary.
Farukhabad („ „)	General rain during week.	Prospects favourable; prices steady; no sickness, except slight fever.
		General Remarks.—Heavy rain everywhere during the week, and more is now only required in part of Lucknow; a break appears to have set in; prospects good; early crops being cut; prices stationary or falling; cholera still lingers in the parts previously affected, but is decreasing; fever in Farukhabad, Moradabad, Agra, and Aligarh; slight cattle-disease continues in Oudh, Gorakhpur, Jhánsi, and Kumaun.
Punjab—(Sept. 6th)		
Delhi ...	1·5	Health fair; prices falling.
Hissar ...	No rain	Rain fell elsewhere in the division; health good; prices stationary.
Umballa ...	4·30	Health fair; prices of food-grains gradually falling.
Jullundur ...	3·40	Prices falling; health good.
Amritsar ...	4·30	Health good; prices falling.
Sialkot ...	6·0	Health good; prices falling.
Lahore ...	3·70	Health good; prices stationary.
Ferozepore ...	3·40 at Sadr	Health of district and state of crops good; prices falling.
Mooltan ...	Drizzling rain at Sadr	Crop prospects good; prices stationary; fever prevalent.
Rawalpindi ...	2·40	Slight fever in some parts of the district; prices stationary.
Dera Ismail Khan ...	3·10	Fever abating; prices steady.
Peshawar ...	No rain	Health good; prices stationary.
		General Remarks.—Rain has been general throughout the province, except in Hissar and in the Peshawar district; the health of the province is generally good, except slight fever in two or three districts; prices of food-grains are falling in the Delhi, Umballa, Jullundur, Amritsar, Sialkot, and Ferozepore districts, in the other districts they are stationary.
Central Provinces—		
Nagpur (Sept. 6th)	1·60	Weather cloudy; prospects of crops good; cholera reported; prices steady.
Jubbulpore („ 5th)	2·26	Weather cloudy and seasonable; weeding continues; prospects fair; cholera and small-pox continue; prices unchanged.
Saugor („ 4th)	1·96	Crops progressing favourably; public health good; prices steady.
Seoni („ 5th)	3·15	Weather sultry and close; weeding and ploughing progressing; *kharif* promises well; cholera reported; prices steady.
Khandwa („ „)	4·60	Weather cloudy and close; crops benefited by heavy rain; few cases of small-pox and cholera; wheat 16 seers per rupee.
Hoshangabad („ „)	4·42	Weather unusually hot; *kharif* fair; health good; wheat 15 seers per rupee.
Raipur ...	1·75	Weather warm and close; more rain wanted; crops promising; weeding in progress; few cases of cattle-disease and cholera; prices unchanged; rice 40 seers per rupee.
Sambalpur (Aug. 31st)	·02	Crops benefited by break; fever still prevalent; rice 56 seers per rupee.
		General Remarks.—Weather cloudy and close, with occasional showers; recent break beneficial to *kharif* crops, which promise well; weeding operations continue; cholera still reported from most districts; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—		
(Sept. 2nd)		
Akyab ...	3·81	Total rainfall 175·22 inches; 4 deaths from cholera in towns, disease prevalent in five townships; 12 deaths from small-pox in one township and 7 deaths from cattle-disease in another.
Rangoon ...	4·65	Total rainfall 65·96 inches; public health good; crops progressing.
Bassein ...	2·85	Total rainfall 93·82 inches; public health good; 38 deaths from cattle-disease in one township and 9 in another; ploughing and transplanting still going on.
Prome ...	0·66	Total rainfall 32·54 inches; 21 deaths from cholera in one township, none in town; a few cases here and there in district; slight cattle-disease in one township; reports from outstations state that over two-thirds of the usual area has been planted out; more rain is required.
Amherst (Moulmein) ...	2·53	Total rainfall 158·86 inches; public health good both in Moulmein and district; cattle-disease still prevalent in four townships; re-sowing still going on; transplanting nearly completed.
Toungoo ...	2·47	Total rainfall 69·50; public health good. *General Remarks.*—Cholera in Akyab and Prome, and a very few scattered cases elsewhere; small-pox in Akyab, otherwise public health good; cattle-disease continues somewhat prevalent; cultivation to some extent checked in parts of Prome and Tharrawaddy by want of rain; agricultural operations generally going on well.
Assam (Sept. 6th)		
Gauhati ...	·17	Weather seasonable; transplanting of *sali* paddy in progress; public health good.
Sylhet ...	5·14	*Aus* paddy reaped, outturn not yet estimated; *sali* already transplanted; *amun*, sugarcane, and tea doing well; public health good.
Cachar ...	2·95	Weather warm; transplanting of *sali* and reaping of *dumahi* and *murali* crops continues; tea doing well; common rice 21 $\frac{5}{10}$ seers per rupee; no more cholera reported.
Dibrugarh ...	9·09	Weather seasonable; transplanting of *sali* paddy nearly finished; cattle-disease still reported; public health good.
Mysore and Coorg—		
(Sept. 6th)		
Bangalore ...	·77	Dry crops thriving, wet cultivation improving owing to tanks having received supplies of water; prospects favourable.
Mysore ...	1·02	Crops in good condition; prospects fair.
Mercara ...	0·39	Monsoon has set in again; rice and *ragi* crops doing well. *General Remarks.*—Rain continues to fall throughout the Mysore State—in Tumkur 2·29, in Hassan 2·52, Shimoga 3·30, Kadur ·43; crops in good condition; prospects favourable; prices compare favourably—in Bangalore *ragi* 26½, horse-gram 10¼, in Mysore *ragi* 25½, horse-gram 30¼, in Shimoga *ragi* 19 to 39, gram 25 to 40 seers per rupee.
Berar & Hyderabad—		
(Sept. 6th)		
Amráoti ...	**·56**	Crops in good condition; wheat 16 and *juari* 28 seers per rupee.
Akola ...	**1·25**	Prospects of crops favourable.
Hyderabad ...	**5·78**	Total rainfall from 1st January 22·89 inches; tanks have received considerable quantity of water, and standing crops much benefited; cattle-disease prevails in one taluk; prices—wheat 16¼, coarse rice 10¾, white *juari* 26, yellow *juari* 30¼, and *tur* 26 seers per current sicca rupee.
Central India States—		
(Sept. 6th)		
Indore ...	2·83; heavy intermediate showers daily.	Weather sultry; health good; prices are steady and prospects generally favourable.
Morar (Gwalior) ...	·75	Health good; prospects good.
Sutna ...	·71	Prospects good.
Neemuch ...	·90	Public health good; weather seasonable.
Goona ...	2·85	Crops good; fever prevalent in district.
Bhopal (Sehore) ...	4·25	Weather hot and raining alternately; prospects good; cholera lingers at Bhopal.
Agar ...	·50	A few cases of cholera at Agar; agricultural prospects good.
Nowgong ...	2·75	Weather seasonable; *kharif* prospects good; cholera prevalent in the cantonment, otherwise health good; prices stationary.
Manpur ...	2·10	*Makka* and *juar* crops doing well; ploughing continues; health good.
Rajputana—		
Abu (Sept. 6th)	1·09	Weather occasionally clear and cloudy and rather sultry.
Sirohi („ 3rd)	.....	Tanks, wells, and health good; prospects bad; rain much needed.
Marwar („ 1st)	1·20	Four months water in tanks; health good; crops in good condition; cloudy nights, clear and cool, dry, warm, and close; prices falling.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—*contd.*		
Meywar (Sept. 2nd)	·12	Tanks and wells fair; prospects very good; more rain wanted.
Harowti („ „)	Deoli, ·97; Tonk, 1·29 previous week; Kotah, 6·35; Shahpura, 1·92.	Weather fine; prospects favourable; health good; prices steady.
Jhallawar (Aug. 30th)	2·09	Health and prospects good.
Ajmere (Sept. 5th)	.....	No rain; health good; slight fever in Marwar; prospects excellent.
Jeypore („ „)	*Nil*	Prospects favourable; average daily deaths from cholera in city two.
Ulwur („ „)	Rain in five tashils, average ·05.	Prospects good; health fair.
Nepal—		
Katmandu („ „)	.....	No report received.

Circular No. 44Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Exhibitions),—dated Simla, the 2nd September 1882.

Read—

Prospectus of the Boston International Exhibition of 1884.

RESOLUTION.

An International Exhibition of the arts and industries of all nations is proposed to be held at Boston, the capital of New England, America, commencing about April 15th, 1884. The Government of India is not in a position to take any active part in the Exhibition, but will afford all information and facilities in its power to exhibitors who may wish to send their articles to it. With this object it has appointed Babu Trailokya Nath Mukharji, the officer in charge of work connected with Exhibitions, Department of Revenue and Agriculture, Calcutta, to receive any communication on the subject from intending exhibitors.

ORDER.—Ordered, that the above Resolution, with the Prospectus of the Boston International Exhibition, be printed in the *Gazette of India*, and be forwarded to the Local Governments and Administrations noted in the margin for publication in the local Gazettes.

BOSTON INTERNATIONAL EXHIBITION, 1884.

Patrons: THE MASSACHUSETTS CHARITABLE ASSOCIATION, BOSTON.

PRESIDENT:

GEORGE COLLINS LEVEY, *Companion of St. Michael and St. George, Chevalier of the Legion of Honour, Knight Officer of the Crown of Italy, &c., &c.; Secretary to the Commissioners for Victoria at London and Vienna, 1873; Philadelphia, 1876; Secretary and Acting Commissioner, Paris, 1878; Secretary and General Manager to the Melbourne International Exhibition, 1880-81; Executive Commissioner for Victoria at the Amsterdam Exhibition, 1883.*

Vice-President and Treasurer:
E. R. STIMSON, TORONTO.

Bankers:
CITY BANK, THREADNEEDLE STREET, LONDON. | MAVERACK NATIONAL BANK, BOSTON.
COMMERCIAL BANK OF AUSTRALIA, MELBOURNE.

Secretary:
GENERAL C. B. NORTON, BOSTON.

1. It is proposed to hold an International Exhibition in the magnificent buildings of the Massachusetts Charitable Association at Boston, the capital of

New England, commencing about April 15th, 1884, of the arts and industries of all nations. The commercial success which has attended the recent Exhibitions in Australia—including Adelaide, a city with a population of 60,000, and the capital of a colony of 300,000; Perth, with a population of 9,000, the capital of a colony with a population of 30,000; and Christchurch, New Zealand—has induced an association of capitalists to make arrangements for holding a series of Exhibitions throughout the United States and Canada. Buildings large enough for the purpose are to be found in nearly all the large cities. The first Exhibition will be held at Boston in the Spring of 1884. Boston with its suburbs has a population of 450,000, and New England of 4,000,000. The Boston Exhibition will be kept open as long as it proves remunerative to exhibitors and promoters.

2. Applications for space, with full particulars of the intended exhibit, can be forwarded to the Secretary of the Boston International Exhibition, 1884, No. 70, Water-street, Boston, prior to December 1st, 1883, or to the President, whose address up to November 15th, 1882, will be—"Lafayette," East St. Kilda, near Melbourne, Victoria, after which it will be—care of Gibb and Macintyre 7, St. Benet Place, Gracechurch-street, London E.-C.

3. The ordinary charge for space will be two shillings for each of the first twenty square feet, and one shilling for each additional square foot; but Exhibitors desiring a frontage to the main avenue for their cases can obtain it on payment of an additional five shillings per foot of such frontage, irrespective of depth. A passage of from 2 to 3 feet will be left round each case where desired and Exhibitors desirous of having spaces against the wall should mention the fact at the time of application. In cases where the sum to be charged for space will be less than £5, the full amount must accompany the application. Where it exceeds that sum, half may be paid on application, and the other half before the opening of the Exhibition.

4. The general reception of articles in the Exhibition Building will commence about March 1st, and terminate three days before the Exhibition opens, after which date no exhibits can be received, and all vacant spaces will become forfeited.

5. All exhibits must be removed within ten days after the close of the Exhibition, after which time they will be taken away by the Executive, and stored at the risk of the owner.

6. Exhibits will be admitted in bond, and can be sold free of charge so long as they are not removed before the close of the Exhibition; but Exhibitors who wish to make sales with immediate delivery must pay duty in advance, together with a license fee of two pounds ten shillings per week per stand, payable weekly in advance.

7. All fittings, show-cases, shelves, &c., which Exhibitors require must be provided at their own expense.

8. The Executive reserve the right of rejecting any proposed exhibit, and the introduction of dangerous or offensive substances is strictly prohibited.

9. Every precaution will be taken for the safe preservation of all exhibits against theft or fire, but the Executive can take no responsibility for accidents however caused.

10. All Exhibitors will receive a bronze medal and a certificate that their exhibits were admitted to the Boston Exhibition. Under special circumstances gold and silver medals may be awarded upon the recommendation of qualified experts, one-half of whom will be nominated by the Executive, and the other half by the representatives of the foreign Exhibitors.

11. An official catalogue will be published, and no other in the English language will be allowed in the building.

12. For special concessions special arrangements will be made.

13. The Executive reserve the right of lighting the building with the electric light or with gas, keeping open at night, and of altering or amending these Regulations.

14. Responsible Agents will be appointed in all the principal countries of Europe and the East, who will treat with intending Exhibitors, and afford all information.

GEORGE COLLINS LEVEY.
E. R. STIMSON.
CHARLES B. NORTON.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 30th August, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

CENTRAL PROVINCES TENANCY BILL.

The Hon'ble MR. CROSTHWAITE asked for leave to postpone the presentation of the further Report of the Select Committee on the Bill to consolidate and amend the law relating to Agricultural Tenancies in the Central Provinces.

Leave was granted.

DEKKHAN AGRICULTURISTS' RELIEF ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to amend the Dekkhan Agriculturists' Relief Act, 1879. He said:—

"I think that the fact of this being the second application which it has been necessary to make to this Council for the amendment of the Act of three years ago is a very remarkable illustration of the capabilities of language for concealing our thoughts.

"The original Act was framed by draftsmen of unquestionable skill; it was hotly debated on, section by section, in some instances phrase by phrase, while the disputants on both sides understood thoroughly what the words about which they were disputing were intended to mean; and yet we find, when the Act has passed into totally different hands for the purpose of being carried out, that what we deemed plain is found to be obscure; that we are told that when we thought that we were enacting white, we unmistakeably enacted black; and that some points which we deemed the Bill fully provided for are not provided for at all. No doubt we must accept this state of things with a certain amount of humility, perhaps, not unmixed with a slight sense of wrong. However, it would appear that the only course open to this Council is to introduce an amending Act so as to make the original intentions perfectly clear, and while doing this it may legitimately take the opportunity of making any minor improvements in wording and machinery, so long as these are in harmony with the intention of the original measure.

"The alterations which it is proposed to make in the Act, which I ought, perhaps, strictly speaking, to state now, when moving for leave to introduce the measure, are, in the main, three: The first consists of two or three provisions which deal with the subject of redemption. It is proposed that the provisions relating to suits for an account should apply to suits for an account and

redemption where mortgaged property is concerned, and that redemption itself should be allowed to take place though the period fixed for it may not have arrived; moreover, it is desired to carry out the intention of the original Bill, that the instalments contemplated by section 20 should be allowed in redemption-suits as well as in other suits.

"Under the second head is an amendment of sections 21 and 22, so as to carry out the original intention that they should be retro-active, and should apply to all the enormous number of old decrees which were then in existence. In consequence of their having been interpreted not to have retro-active effect, it has occurred first, that whereas we thought that we had put an end to imprisonment for debt, some sixty persons have been imprisoned during the last two years, besides which a considerable number of warrants have been issued but not executed; and secondly, that management by the Collector, which is a suitable measure for dealing with such old cases, has been held to be inapplicable.

"Next, it is proposed to make clear what was always intended, that the Courts, when directing insolvency-proceedings to be instituted, should be able to do so of their own motion, and not simply when they were moved by the judgment-creditor in the suit, who perhaps would be a person interested in the opposite direction.

"These are the three principal alterations which it is proposed to make. Besides these, there are two or three minor alterations or improvements in the detailed machinery, by which it is proposed to make the Act more consistent and harmonious. The first is that of providing for a revision instead of an appeal in all suits to which sections 12 to 15 apply, so as to avoid the anomaly of different controlling authorities dealing with the same subject. Secondly, we propose to allow the conciliators to summon either of the parties in a case who does not make his appearance, and also to limit the certificate which the conciliator gives to a certain fixed time in its operation, so as to prevent its being used as a means of intimidation for an indefinite period. Thirdly, it is proposed to give to the Special Judge power to refer any difficult case that may arise for the opinion of the High Court.

"I have only to say, in conclusion, that these imperfections have very seriously impeded the operation of the Act; more especially have they prevented the working of the compensatory powers it was intended to provide—that is to say, the giving to the creditor all that could reasonably be got out of the debtor's estate by effective management, in lieu of the powers of annoyance and oppression of which he was deprived; and even the principal machinery was not in tolerable working order until last year.

"However, it may be said with confidence that experience has hitherto uniformly shown that, in every instance in which the Act has been able to work fairly, it has worked with great success. At the same time, until complete effect has been given to all its provisions by the amending Bill which I now have the honour to ask leave to bring before the Council, and until a year or two of experience of the whole amended Act has been actually acquired, it cannot be said that even an approach to a fair trial has been afforded to it."

The Motion was put and agreed to.

BRITISH BURMA PILOTS BILL.

The Hon'ble MR. ILBERT moved that Major the Hon'ble E. Baring be added to the Select Committee on the Bill to provide for the grant of licenses to Pilots in British Burma and for investigating certain charges against them.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 6th September, 1882.

D. FITZPATRICK,

Secretary to the Government of India,
Legislative Department.

SIMLA;
The 30th August, 1882.

The Council met at Government House, Simla, on Wednesday, the 6th September, 1882.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble C. H. T. Crosthwaite.
The Hon'ble W. C. Plowden.

CENTRAL PROVINCES TENANCY BILL.

The Hon'ble MR. CROSTHWAITE presented the further Report of the Select Committee on the Bill to consolidate and amend the law relating to Agricultural Tenancies in the Central Provinces.

DEKKHAN AGRICULTURISTS' RELIEF ACT, 1879, AMENDMENT BILL.

The Hon'ble MR. HOPE introduced the Bill to amend the Dekkhan Agriculturists' Relief Act, 1879.

The Hon'ble MR. HOPE also asked for leave to postpone the Motion that the Bill be referred to a Select Committee.

Leave was granted.

The Hon'ble MR. HOPE then moved that the Bill and Statement of Objects and Reasons be published in the *Bombay Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 20th September, 1882.

D. FITZPATRICK,

Secretary to the Government of India,
Legislative Department.

SIMLA;
The 6th September, 1882.

QUESTION OF GIVING GREATER PUBLICITY TO MEASURES UNDER THE CONSIDERATION OF THE GOVERNOR GENERAL'S LEGISLATIVE COUNCIL.

No. 1030-40, dated Simla, the 8th September 1882.

From—D. FITZPATRICK, Esq., Secy. to the Govt. of India, LEGISLATIVE DEPT.,
To—All Local Governments and Administrations.

I am directed to invite ~~the attention of His Excellency the Governor in Council~~ ~~the attention of His Honour the Lieutenant-Governor~~ your attention to the question which has been recently raised in the Legislative Council and in the Press, as to the possibility of giving greater publicity to measures under the consideration of the legislature, and to request that the Government of India may be favoured with any suggestions which ~~His Excellency~~ ~~His Honour~~ you may desire to make for the improvement of the existing procedure generally, and in particular in regard to the points to be presently referred to.

2. I am, in the first place, to observe that more direct steps are already taken by the Government in India than are taken in England to make the Bills before the Legislature known to the public. In Bengal, and it is believed in other parts of India, the vernacular Gazettes are sent to all the courts, and are there read by the Pleaders and Mukhtárs. Public bodies of weight or influence are consulted on Bills of importance. Besides the large Associations to which the Local Government refers direct, there are local Associations which the district officer usually consults. Every district and subdivisional officer is expected, not only to express his own opinion, but also to ascertain the opinions of the Natives around him; and, as a matter of fact, the papers which are printed regarding important Bills commonly contain many valuable opinions from Native Associations and from individual Native gentlemen.

It must, however, be borne in mind that some of the most important Bills which come before the Council, and in particular measures like the great codifying Bills in connection with which this question has arisen, are, no matter how clearly they may be drafted, of such a nature that, even with the aid of the fullest explanations, none but experts can hope to master their contents sufficiently to offer any useful criticism on them. Similar measures meet with but little criticism in England outside professional circles, and in India the prospect of obtaining useful criticisms on measures of this class is much diminished by the difficulties of translation to which I am presently to refer.

3. The Governor General in Council would not have it supposed that these observations are made with any view to deprecating further efforts being made to attain the object desired. He is, on the contrary, fully sensible that it is the duty of the Government to give the largest practicable amount of publicity to legislative proceedings, and to afford the public every opportunity of examining them and expressing an opinion upon them, and he is satisfied that more can be done in this respect than is done at present. The matter is, however, I am to observe, one which is not altogether in the hands of the Government. The Press is the most effective agency for bringing the measures of the Government before the public and securing for them a full discussion. Without its co-operation little can be done; and the first aim of the Government accordingly should be to give the Press all the information in its power as to the object and necessity of any proposed legislation.

4. Bearing this in mind, the first change in the existing practice which is contemplated by the Government of India is the publication of a fuller and more popular Statement of Objects and Reasons, showing why the measure is required, and giving a short history of the circumstances which have led up to it, and an explanation of the effect it is likely to have on the subject-matter and on the people. Pains will in future be taken to make such statements as clear and intelligible to the ordinary unscientific mind as possible; and when the Bill has been brought in, the Bill itself and the Statement of Objects and Reasons and (when this appears desirable) the speech made by the Member in charge in moving for leave to introduce it, will be printed in separate form on cheap paper, so as to be available (with the translations to be presently referred to) for gratuitous distribution to the Press and to such Municipalities, Local Boards and Associations interesting themselves in public questions as it may be considered desirable to supply them to. These papers will further be sold at a low price to the public, and might be made available for perusal without fee at court-houses and kachahrís.

5. The matter of translations is that which next demands attention, and it is by no means so simple. The difficulties of translating the technical wording of our Bills into oriental languages, and especially into such of those languages as are so rude and meagre as to require to be supplemented from the Arabic or Sanskrit, are on all hands admitted to be very great. Whether these difficulties are at present overcome to the full extent to which it is practicable to overcome them the Government of India is not in a position to say. It is alleged by recent critics that they are not, and the point is one which must be inquired into; but however this may be, the Governor General in Council desires that no pains may be spared to make these translations as perfect as the difficulties of the case will permit.

The matter is one which, in the case of most of the languages into which translations are made, must be dealt with directly by the Local Governments; and I am to request that full information may be furnished to the Government of India as to the languages into which Bills, Statements of Objects and Reasons, and Reports of Select Committees are translated in the territories administered by [His Excellency / His Honour / you], as to the nature and cost of the agency by which the work is done, as to the means adopted for testing the accuracy of the work, and as to the quality of the work, and the measures which may be suggested for improving its quality and for ensuring an earlier publication of the translations.

6. As regards translations into Urdu, it has been suggested that it might be advantageous to have translations into that language prepared in the Translating Branch of this Department for distribution to all those parts of British India in which that language is understood. It has been said that, in most parts of the country where the people do not speak any form of Urdu, educated persons are generally able to read Urdu or understand it so as to be able to read it in a transliterated version. If this is the case, and if Local Governments are of opinion that it would be an advantage to have at least one translation available which would be understood by a considerable number of intelligent persons in each Province, and which might be relied on as being as good as the ablest translators could make it, the Government of India would be prepared to make such arrangements in the Translating Branch of this Department as might be necessary to admit of Urdu translations of Bills, Statements of Objects and Reasons and Reports being prepared here for distribution throughout British India. I am accordingly to solicit an expression of opinion on this matter.

7. Assuming the Statement of Objects and Reasons to have been prepared in the manner above indicated, and proper translations of it, and of the Bill, and of any other document it may be desirable to circulate with them, to have been made, the next question that presents itself is that as to the mode in which those documents are to be brought to the notice of the persons whose opinions it is desired to elicit. I have already said that it is the intention of the Government of India to have copies of the English versions prepared here for sale at a low price to the public, and for gratuitous distribution in certain quarters. The same thing will have to be done by the Local Governments in regard to the translations prepared under their orders; but it remains to be considered to what persons or public bodies these documents, as well as the English versions prepared here, should be distributed gratuitously, and what means should be taken to render them readily available for purchase by the public generally. This matter is one to be dealt with by the Local Governments, and I am to request that you will state what steps are at present taken by [His Excellency / His Honour / you] in regard to such distribution and sale, and what additional steps it is proposed to take in order to further the object in view, as for example, by submitting copies of the Bills and the papers connected with them to meetings of persons interested in them or otherwise.

8. I have already intimated that the Governor General in Council attaches the greatest importance to the co-operation of the Press in this important work, and it has been determined that the comments of the Press, English and Vernacular, shall be more closely watched here than they have heretofore been, and that in some cases abstracts of, and in others full extracts from, newspaper articles shall be circulated to members of the Legislative Council in the same way as regular official communications now are circulated. I am accordingly to request that particular attention may be paid to the matter of distributing copies of Bills and the documents connected with them gratuitously to the Press, and that the Government of India may be informed as to what papers, both English and Vernacular, in your Province are of sufficient importance to make it desirable that they should be supplied with copies.

9. It will be remembered, in connection with this portion of the subject, that exception has been taken to the present procedure of the Legislative

Council on the ground that, under that procedure, sufficient time for forming opinions is not allowed, especially to those who are dependent on translations which cannot be brought out for some time after the publication of a Bill; and it has been suggested that a rule of business should be framed which would preclude the Select Committees to which all Bills of any importance are referred from reporting on a Bill until a specified period has elapsed from the date of its publication in the Vernacular languages. Any such hard-and-fast rule would, in the opinion of the Governor General in Council, be altogether unworkable. The time to be allowed in each instance must depend upon all the circumstances of the case; but with a view to imposing a check upon over-haste, it has been determined to make a rule of business to the effect that, when publication in the vernacular has been ordered by the Council (as it always is in the case of any Bill in which the people are interested), the Select Committee shall, in their report, state the date on which the Bill has been published in each language. The result of this will be that, if in any case the Committee propose to proceed with a Bill before any particular section of the community has been allowed the time to form its opinion which would ordinarily be considered sufficient, the fact will be brought prominently to notice, and some special grounds of urgency will have to be adduced in support of the course proposed.

10. With respect to the republishing of Bills as amended in Select Committee, it appears to the Governor General in Council that, as a rule, it is only the first or principal Report of a Select Committee that should be published. It would be impossible to go on republishing every time a Bill was amended during its passage through the Legislative Council. Such a process would indefinitely postpone the final passing of Bills, or would prevent very useful changes, such as are constantly suggested at a late stage of a measure, being introduced, except at the cost of a delay which it might not be worth while to encounter. As regards republication in English, this matter seems to be adequately provided for by the rule of business which requires a Select Committee to report whether in their judgment the Bill has been so altered by them as to require republication.

11. As regards republication in the vernacular languages, it should be stated that, though the rules of business contain no express provision on the point, the more important Bills are at present republished in vernacular as well as in English. The question is, whether this practice should not be extended.

The Governor General in Council considers that, as a rule, when a Bill is of such a nature that the Council thinks it necessary to order it on its introduction to be published in the vernacular, and the Select Committee thinks it has been so altered as to require republication, there should be a republication in the vernacular languages as well as in English. But this, I am to observe, is not always so. It occasionally happens that the alterations in a Bill which lead the Committee to recommend its republication are alterations merely in drafting or in matters of procedure, and that republication is recommended, not because the interests of any persons concerned are supposed to be affected, but simply because, owing to the complication of the subject, or to the danger of there being some flaw which would cause a hitch in the working of the Bill as amended, it is thought desirable to submit it once more to the judgment of experts. In a case of this sort a republication in English is obviously all that is required.

This being so, it appears to the Governor General in Council that it would be impracticable to lay down any hard-and-fast rules, and that the requirements of the case will be best met by adding to the present rules of business a provision to the effect that, when the Committee recommend the republication of a Bill originally published in a vernacular language, the republication shall, as a rule, take place in the vernacular as well as in English, and that, if in any case the Committee do not consider republication in the vernacular to be necessary, they shall give their reasons for that opinion in their Report. When an amended Bill with its accompanying Report is to be republished in the vernacular languages, the Report, it need hardly be said, will be drawn up in the

full and popular style which is to be adopted in the Statement of Objects and Reasons; and the publication, translation and distribution, and the time to be allowed for the formation and communication of opinions, will be governed by the same rules as in the case of an original Bill.

12. In conclusion, I am to inform you that this letter will be published in the *Gazette of India* and communicated to the Press with a view to eliciting suggestions; and I am to request that it may be published also in the local Gazette and communicated to such public bodies and leading members of the Native community as may be expected to give intelligent opinions on the points to which it refers.

I am to request that your reply to this letter may be sent at an early date.

D. FITZPATRICK,

Secretary to the Government of India.

Department of Finance and Commerce,
(Statistical Branch.)

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 12th SEPTEMBER 1882.

GENERAL REMARKS.—No reports have been received from the Madras Presidency, from the Mysore State, from Coorg, or from Guzerat or Sind.

There has been rain in the Nizam's Territories, in the Berars, in the Bombay Presidency, in the Central Provinces, in the greater part of the Central India and Rajputana States, and in most parts of the Punjab, as also in British Burma. The quantity which has fallen varies much. It was specially heavy in the course of the cyclone which passed across the Central Provinces. At Khandwa the fall was very heavy, and also in parts of British Burma, especially at Akyab, Rangoon, and Moulmein. Lighter but widespread rain has also occurred in the North-Western Provinces and Oudh, in Bengal, and in Assam.

Agricultural prospects are on the whole very favourable throughout the country. In British Burma transplanting continues in parts, and crops are making good progress; but floods are doing some damage. In Assam reaping in some parts and transplanting in others are nearly finished; more rain is needed in Gauhati. In Bengal general prospects have improved, the autumn harvest is proceeding and is expected to give an average outturn. More rain is needed on high lands in some districts to finish transplanting. In the North-Western Provinces and Oudh early autumn crops are being reaped. A little more rain would be beneficial in parts of Meerut and Partabgarh. In the Punjab the prospects of the harvest are on the whole good and prices are falling; more rain is needed in the southern part. In the Rajputana and Central India States general prospects are favourable; a break in the wet weather is needed in Indore. In the Central Provinces heavy rain has damaged some *kharif* crops in Khandwa, and more rain would be beneficial in Saugor; but on the whole crops are very promising, and weeding has been completed. In the Bombay Presidency, in Berar, and in the Nizam's Territories prospects are favourable everywhere.

The latest reading of the barometer indicates a rise in Bengal, in the North-Western Provinces, and in the northern parts of the Punjab; and the cyclone which passed across Central India seems to have nearly disappeared after travelling northwards.

[illegible]	[illegible]	[illegible]
Bombay—(Sept. 13th)		
Kurrachee ...	.....	No report received.
Hyderabad ...	.....	No report received.
Ahmedabad ...	.....	No report received.
Baroda ...	.....	No report received.
Surat ...	.....	No report received.
Násik ...	Igatpuri, 12·95; Násik, 10·24; Yeola, 5·25; Niphad, 5·65.	Heavy rain in all talukas; locusts in five talukas; slight cholera continues; wheat 28, *bajri* 38, and rice 28 pounds per rupee.
Colaba (Bombay) ...	.....	No report received.
Poona ...	Rain throughout district—maximum at Mawal, 4·0; minimum at Purandhar, ·40.	Crops healthy; 21 cholera cases in Sirur taluka, 7 deaths; *bajri* 48 and *juari* 60 lbs. per rupee; in Poona *bajri* 41 and *juari* 50 lbs. per rupee.
Ahmednagar ...	Rain throughout the district—maximum at Nagar, 6·40; minimum at Akola, ·94.	Total rainfall of the district 19·58; the rainfall has done good to the *bajri* crop, but in Kopergaon, Sangamner, and Akola insects like locusts are doing damage to crops in some places; cholera in Parner, 1 attack and 1 death; *bajri*—maximum 60 lbs. in Jamkhed, minimum 48 in Kopergaon; *juari*—maximum 60 lbs. in Jamkhed, minimum 60 in Kopergaon.
Sholapur ...	2·11	Total rainfall 30·22; cholera cases 40, deaths 10; crops in good condition; *bajri* 60 lbs. and 2 tolas and *juari* 79 lbs. and 6 tolas per rupee.
Dharwar ...	Maximum at Ron, 3·08; minimum at Bankapur, ·28.	Standing crops good; cotton sowing nearly completed in two talukas, retarded in Ron taluka owing to heavy rainfall, in others still in progress; slight cattle-disease in one taluka; ague in Mundargi petta; public health good; minimum prices—*juari* 40 and rice 11 lbs. per rupee.
Kanara ...	Karwar, 4·28; Kumpta, 7·73; Sirsi, 2·50; Hallial, 1·35.	Total rainfall 101·28; rice crops in ear on coast; garden and other produce thriving; general health good; common rice in Karwar 11 seers, in district average 12¼ seers per rupee.
Rajkot ...	.....	No report received.
		General Remarks.—Good rain in the Deccan, Konkan, and Southern Mahratta Country; reports not received from Sind and Guzerat districts; locusts in Násik, Khandesh, and Ahmednagar; cattle-disease in some districts; cholera abating.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—(Sept. 13th)		
Chittagong ...	3·46	Weather hot; more rain wanted; prospects of crops generally fair; prices steady; cholera and cattle-disease still reported.
Dacca ...	·96	*Aus* harvest nearly completed, estimated outturn 14 annas; jute crop poor; prospects of winter rice good; cholera continues.
24-Pergunnahs (Calcutta)	Alipore, 3·68	Harvesting of early rice and jute proceeding, outturn above; transplantation of *amun* paddy in low lands completed; more rain required for completion on high lands; fever prevalent in Baraset and Diamond Harbour sub-divisions; public health generally good.
Moorshedabad ...	1·64	Transplantation of *amun* proceeding in places, where it had been retarded for want of rain; *aus* harvest nearly finished, outturn fair; mild fever prevalent.
Rajshahye ...	·75	More rain required for *amun* rice.
Burdwan ...	·52; Cutwa, 1·37; Culna, 2·05; Raniganj, 1·0.	*Aus* crop being reaped, outturn very fair; rain urgently required for *amun*; health tolerable.
Rungpore ...	.....	No report received.
Bhagálpur ...	1·74	Transplantation of winter rice still proceeding; prospects good; a second heavy flood from the Kosi has done much damage in north-east of district.
Purneah ...	1·65	Some damage from floods, prospects otherwise improved; transplanting not finished; fever prevalent; nearly all rivers high, many in flood.
Patna ...	·33	Transplantation of paddy seedlings progressing; more rain wanted in Barrh and Behar sub-divisions; prospects of *bhadoi* crops favourable; cholera still reported from Behar.
Durbhunga ...	·37	Weather hot; prospects of crops favourable; prices stationary; public health good.
Hazáribágh ...	2·97	Weather hot and close; reaping of autumn crops continues; rice transplanting nearly completed; general health good, except a few isolated cases of cholera in interior.
Cuttack ...	3·76	Early rice reaped; late rice weeded; sugarcane and other crops doing well; cholera still reported.
		General Remarks.—Good rain in some districts during the week, but in many rainfall was slight; general prospects improved; more rain wanted in several places to finish transplanting, especially on high lands; autumn harvest proceeding; crops expected generally to yield a fair average outturn, though in some districts early rice and jute will be rather short; sugarcane and other minor crops promising; some damage to crops from floods reported in parts of Bhagálpur and Purneah; cholera still exists; in several places, and small-pox in parts of Chota Nagpur; fever prevalent in some districts; on the whole public health fair; cattle-disease prevalent in parts of Hooghly and Cooch Behar, and cases reported in other places.
N. W. Provinces and Oudh—		
Benares (Sept. 12th)	·40; Chandauli, 1·20; Gungapur, ·70.	Weather seasonable and prospects favourable; health of men and cattle good; prices stationary; bazars well supplied.
Allahabad („ 13th)	Rain in tahsils, with stormy weather on 9th and 10th.	Weather now fine and seasonable; cholera disappeared; price of *bajri* fallen and rice slightly; other prices stationary.
Gorakhpur („ 12th)	.....	Rain and high winds towards the close of the week; harvest began; prospects good; some cholera and cattle-disease in parts of the district; prices steady.
Jhánsi („ 11th)	Sadr, 2·70; Man, ·80; Moth, 1·20.	Minor *kharif* crops are being cut, other crops are doing well; prices fluctuating; cholera still continues in four villages of parganas Man and Garotha; cattle-disease disappeared.
Agra („ 12th)	Rain in all parganas from ·50 to 1·0.	*Bajri* and *makka* being cut; insects reported to be causing slight damage to *bajri* and *juari* in three parganas; slight fever continues, but general health good; prices falling.
Bareilly („ „)	.....	Crops excellent; weather seasonable; cholera not much improved; fever prevalent.
Meerut („ „)	Occasional showers	Westerly wind for three days, succeeded by very high easterly wind; crops flourishing, but irrigation is going on in Ghaziabad, where rainfall very insufficient; health good, but fever becoming general, though not of a severe type; prices falling in Meerut and Hapur, but are showing a tendency to rise in Ghaziabad and Sirdhana.
Kumaun („ „)	Slight rain	Weather cloudy, with high wind; rice and millet being reaped; ploughing for *rabi* commenced; health fair; cattle-disease still prevalent; prices stationary.
Lucknow („ „)	Sadr, ·20; Maliabad, ·80; Mohanlalganj, ·20.	Prospects favourable; supplies sufficient; prices falling; cholera decreasing.
Partabgarh („ „)	.....	Prices falling slightly; prospects good; more rain however required at Sadr and Patti; cattle-disease reported in Kunda and Partabgarh tahsils; cholera slightly on the increase.
Sitapur („ „)	Biswan, ·40; no rain in other tahsils.	Rain not needed at present; prices stationary; cholera still in Sitapur, Sidhauli, and Misrikh; prices stationary; slight cattle-disease prevalent.
Fyzabad („ „)	Sadr, ·20; Akbarpur, ·90; Bikapur, ·30; Tanda, ·50.	Crops looking well everywhere; *sawan*, *juar*, *kakoon*, and *marrow* being cut; very slight cholera in tahsil Fyzabad.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Rae Bareli (Sept. 11th)	Sadr, ·70; Digbijaiganj, ·80; Salon, ·30.	Crops looking well; cholera nearly disappeared; cattle-disease of a mild nature at Dalman; supplies sufficient; prices stationary.
Cawnpore („ 12th)	Average over ·60	Weather clear; prospects excellent; maize cut; cholera decreasing; prices stationary.
Farukhabad („ „)	Slight showers during week.	Prospects favourable; fever of a mild type prevalent; prices steady.
Moradabad („ „)	Average ·70	Fever prevalent; cholera continues in Bilari tahsil; prices unchanged.
		General Remarks.—Weather stormy, with light rain during the week; prospects everywhere favourable, though more rain would still be beneficial in parts of Partabgarh and Meerut; prices stationary; cholera decreasing on the whole, but there is the usual autumnal fever in Rohilkhand, Agra, and Meerut divisions; slight cattle-disease continues in Oudh, Gorakhpur, and Kumaun.
Punjab—(Sept. 13th)		
Delhi ...	·90	Health fair; prices stationary; prospect of yield of crops is good.
Hissar ...	Sadr, ·60	Health generally good; prices stationary.
Umballa ...	·30	Health fair; prices of food-grains stationary, but the yield of *makka* and rice is expected to be somewhat below the average.
Jullundur ...	1·90	Health good; prices falling; crop prospects are good.
Amritsar ...	2·90	Health good; prices stationary.
Sialkot ...	·30	Health good; falling tendency in prices; harvest prospects good.
Lahore ...	3·50	Health good; prices stationary.
Ferozepore ...	·30	Health good; prices stationary.
Mooltan ...	No rain	Fever prevalent; prices of food-grains are stationary.
Rawalpindi ...	No rain	Cattle-disease in a few parts of the district; prices show a slight tendency to fall.
Dera Ismail Khan ...	No rain	Price of wheat steady, that of *bajri* is falling.
Peshawar ...	·10	More rain wanted; prices stationary; harvest prospects good.
		General Remarks.—Rain has been general throughout the province, except in Mooltan and Rawalpindi and in the Dera Ismail Khan districts; more rain is wanted in the south of the province; general health continues good; prices of food-grains are falling in the Jullundur, Sialkot, Rawalpindi, and Dera Ismail Khan districts, in the other districts they are stationary.
Central Provinces—		
[illegible] (Sept. 9th)	Heavy rain on 8th.	Weather oppressive; crops promising; weeding operations almost [illegible] and cholera reported, where [illegible]
[illegible]	[illegible]	[illegible]
Sangor („ 11th)	[illegible]	[illegible] prevalent; prices [illegible]
Seoni („ 12th)	2·76; heavy rain since 8th.	Weather cloudy and damp; *kharif* crops in excellent condition; cholera abating; wheat 16½ seers per rupee.
Hoshangabad („ „)	5·58	High winds; prospects of *kharif* crops fair; fever and small-pox reported; wheat 15 seers per rupee.
Nagpur („ 13th)	6·87	Weather wet and stormy on the 9th, 10th and 11th, clear and cool since; prospects good; cholera still reported; prices stationary.
Sambalpur („ 7th)	·50	Weather hot and sunny; coarser rice being cut; fever prevalent; rice 56 seers per rupee.
Khandwa („ 12th)	13·5; heavy rain from 10th.	The heavy rain has damaged some *kharif* crops; cholera and small-pox prevalent; prices stationary.
		General Remarks.—Rain general, especially heavy in districts of the Nerbudda Valley, Nagpur, and Wardah; prospects of *kharif* crops favourable; cholera abating; prices steady.
British Burma—(Sept. 9th)		
Akyab ...	60·7	Total rainfall 181·29; 14 deaths from cholera in town and 24 in district; cattle-disease severe in one township; crop prospects good.
Rangoon ...	12·09	Total rainfall 78·05; public health good; crops making progress.
Bassein ...	7·36	Total rainfall 101·18; public health good; 41 deaths from cattle-disease in one township and 9 in another; ploughing nearly finished; transplanting still going on.
Prome ...	6·23	Total rainfall 38·77; 16 deaths from cholera in one township, otherwise public health good; 4 cases of cattle-disease in one township; harvest prospects better.
Amherst (Moulmein) ...	16·02	Total rainfall 174·88; public health good both in Moulmein and district; cattle-disease still existing in two townships; prospects of crops good; resowing continues; transplanting of crops progressing.
Toungoo ...	2·58	Total rainfall 72·08; 1 death from small-pox in district, otherwise public health good.
		General Remarks.—Cholera prevalent in Akyab, some also in Tharrawaddy, Prome, Henzada, and Tavoy; public health otherwise good; cattle-disease continues; rainfall better in Tharrawaddy, Prome, and Thayetmio; floods doing more or less damage; crop prospects generally satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—		
Gauhati (Sept. 12th)	No rain	Weather very hot; transplanting of *sali* paddy retarded for want of rain, which is much needed now; cattle-disease reported from the interior; public health good.
Sylhet („ 13th)	0·40	State and prospects of crops generally good.
Cachar („ „)	·04	Weather intensely hot; transplanting of *sali* crops nearly finished; about three-fourths of *dumahi* and *murali* crops have been reaped, outturn average; prospects of tea good as far as quantity is concerned; price of common rice 26½ seers per rupee; 1 case of cholera reported from Sadr station.
Dibrugarh („ „)	0·02	Weather seasonable; transplanting *sali* paddy finished; ploughing for winter crops in progress; cattle-disease still reported; public health good.
Berar & Hyderabad— (Sept. 13th)		
Amráoti ...	1·05	Crops in good condition; price of wheat 18 and *juari* 36 seers per rupee.
Akola ...	3·05	Prospects of crops good.
Hyderabad ...	4·68	Total rainfall from 1st January 27·57 inches; tanks have received considerable quantity of water from the week's rain; standing crops everywhere in good condition, except in one taluk where they have been attacked by worms; prices—wheat 16¼, coarse rice 11¼, white *juari* 26½, yellow *juari* 30½, and *tur* 27 seers per current sicca rupee.
Central India States— (Sept. 13th)		
Indore ...	7·78; almost continuous rain.	Unless there is a break, the *kharif* crops must suffer severely, but the season promises favourably for *rabi* sowings; prices have risen slightly owing to difficult communications; health is generally good, though cholera still lingers in Indore city.
Morar (Gwalior) ...	1·26	Health and prospects good.
Sutna ...	·44	Health and prospects good.
Neemuch ...	1·18	Health and crops good.
Ujjain ...	1·26	Crops good; health fair.
Bhopal (Sirohi) ...	0·72	Prospects good.
Agar ...	.....	No report received.
Nowgong ...	0·25	Weather seasonable; *kharif* prospects good; prices stationary.
Manpur ...	5·95	Ploughing for *rabi* crops finished; *juari* crops good; prices stationary.
Rajputana—		
Abu (Sept. 13th)	3·43	Rainy weather, with high winds.
Sirohi („ 10th)	4·0	Tanks, wells, health, and prospects good; weather much cooler.
Marwar („ 8th)	Good showers reported from outstations.	Four months' water in tanks; health and crops good; weather cloudy and sultry, indications of much needed rain; prices falling.
Meywar („ 9th)	2·02	Tanks and wells fair; health good; crops very good.
Harowti („ „)	Deoli, ·26 previous week; Kotah, ·68; Shahpura, ·45.	Prospects continue favourable; some fever about.
Jhallawar („ 6th)	.....	Weather sultry; some cases of cholera in district; cattle-disease in one pargana.
Ajmere („ 12th)	2·27	Seasonable rain throughout district; prospects continue favourable; health fair.
Tonyrra („ „)	1·94	Prospects favourable; health fair; prices firm.
Bikaner („ „)	.....	Prospects good; tanks and wells in good supply; fever prevalent.
Nepal—		
Katmandu ...	.....	No report received.
