DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 27th April 1883.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 24th APRIL 1883.

GENERAL REMARKS.—There has been some rain in most districts of the Madras Presidency and in several parts of Bengal. In the Bombay Presidency there has been heavy rain in parts of Dharwar, but elsewhere the fall has been slight. Assam still continues to record more or less heavy showers. Slight rain is also reported from a few districts of the Punjab, from Mysore and Coorg, from the Nizam's territories, and from Nepal. No report has been received from British Burma for the week under notice.

In the Madras Presidency the harvest of sugarcane, cotton, paddy, and dry grains still continues and general prospects are good. Threshing of *rabi* crops has commenced in the Bombay Presidency; land is being prepared for *kharif* sowing, and sugarcane planting still continues in places. Ploughing is in progress in Bengal proper, but cultivation of autumn crops is retarded owing to an insufficiency of rain. The *rabi* harvest has been completed in the North-Western Provinces and Oudh and has generally yielded a good outturn. In the Punjab the harvest continues in most districts and a good outturn is expected. In the Central Provinces threshing and winnowing of *rabi* crops still going on. In Assam ploughing for *aus* is being pushed on and sowing has commenced. In Mysore crop prospects continue good, and coffee blossoms and rice ears setting in Coorg. In the Nizam's territories the reaping of *tabi* crops has been nearly completed and *kharif* preparations are in hand. In Rajputana and the Central India States the harvest in most places has been completed, with a fair outturn.

Public health is generally good, though in Bengal and the North-Western Provinces scattered cases of cholera are reported, and small-pox prevails in some districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(April 25th)		
Bellary ...	·16 (average of two stations).	Standing crops generally good; harvest sugarcane and cotton, yield average.
Kurnool ...	.....	Standing crops in good condition; harvest paddy and cotton, outturn paddy 9 annas, cotton 6 to 12 annas; small-pox and cattle-disease continue in parts.
Ganjam ...	·31 (average of nine stations).	**Standing crops cotton and summer *ragi* thriving; cholera in parts; fever, small-pox, and cattle-disease continue.**
Kistna ...	.....	Standing crops fair, but castor, later crops, and cotton diseased in parts; harvest horse-gram, castor, chillies, cotton, *varagulundu*, &c., yield three-eighths to three-quarters; small-pox continues; cattle-disease abating.
Chingleput (Madras) ...	.....	Standing crops in good condition; harvest paddy, &c., yield half; small-pox and measles continue; cattle-disease in parts.
Coimbatore ...	·34 (average of eleven stations).	Standing crops in good condition; harvest paddy, outturn above average; cholera, fever, and cattle-disease continue in parts; fever mild in general.
Tanjore ...	·92 (average of five stations).	Standing crops in good condition; harvest paddy, *cholum*, *ragi*, gingelly seed, and chillies, outturn below average; cholera in parts.
Madura ...	·85 (average of seven stations).	Standing crops failing in parts; harvest paddy; fever and cholera in parts.
Malabar ...	·91 (average of thirteen stations).	Third crop paddy progressing; small-pox in all taluks; fever and cattle-disease in parts.
Travancore ...	1·49	Cultivation in progress; small-pox and fever continue. *General Remarks.*—No rain in Kistna, Kurnool, and Chingleput; general prospects good.
Bombay—(April 25th)		
Kurrachee ...	.....	Small-pox decreasing in Kurrachee, but prevalent in five quarters, 1 fresh case, 2 deaths from 15th to 19th, total to latter date 470 cases, 117 deaths, 71 remaining sick; disease also in four villages in district, 10 cases, 1 death; fever in six talukas; cattle-disease in three talukas; wheat, red rice, and *bajri* in Kurrachee 22, 32 and 34 lbs., in Dadu 34 and 48 lbs., in Tatta 24, 32 and 40 lbs., and in Sujawal 32, 36 and 40 lbs. per rupee respectively.
Hyderabad ...	.....	Threshing of *rabi* crops commenced; gram crops reported to have suffered from insects in Moro and Naushahro; small-pox in eight talukas, 2 cases in Mirgar jail; fever in five and cattle-disease in eight talukas; wheat 24, *bajri* 39, *juari* 48, red rice 26, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Planting of sugarcane and sowing of maize continue; cattle-disease and cholera in Sanand; heat excessive; wheat 27½ and *bajri* 31 lbs. per rupee.
Baroda ...	.....	Sowing of summer crops in progress; sugarcane in good condition; small-pox in Naosari and Baroda; cattle-disease in Kadi; *bajri* 29 and common rice 26 lbs. per rupee.
Surat ...	.....	Preparations for *kharif* crops continue; small-pox in Balsar, Pardi, and Surat, daily average 3 deaths in Surat; *juari* 42 and *nagli* 49 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik ...	.....	Cholera continues, 34 deaths in Násik, 27 in taluka, 12 in Niphad taluka; wheat 28½, *bajri* 33½, and rice 25 lbs. per rupee.
Colaba (Bombay) ...	.....	Average abnormal temperature 2° warm; vapour in air in excess of normal; abnormal wind southerly, except on 21st and 22nd when wind was normal.
Poona ...	.....	Public health good; *bajri* 43 and *jvari* 54 lbs. per rupee, in Poona *bajri* 37 and *jvari* 48 lbs. per rupee.
Ahmednagar ...	.....	Threshing of *rabi* crops continues; cholera in Parner and Rahuri talukas; cattle-disease in Parner and Karjat talukas; *jvari*—maximum 72 lbs. per rupee in Parner, minimum 51 lbs. in Sangamner; *bajri*—maximum 60 lbs. per rupee in Jamkhed, minimum 37 lbs. in Sangamner.
Sholapur ...	·8	Cattle-disease in some villages of Sholapur taluka only; *juari* 64 lbs. 12 tolas, and *bajri* 56 lbs. 12 tolas per rupee.
Dharwar ...	Rain throughout the district—·73 in Nargund, heavy in six talukas, slight in others.	Harvesting of late crops nearly completed; cotton picking in progress; scarcity of drinking-water still continues in eight villages of Nargund; cattle-disease and small-pox in one taluka; fever in two talukas; rice minimum 30 and *juari* 45 lbs. per rupee.
Kanara ...	Yellapur, ·91; Hallial, ·17; Supa, ·28.	Second crop rice harvesting completed in Karwar, continues in other talukas on coast; planting sugarcane and preparing ground for monsoon crop; small-pox in three talukas and fever in two; common rice in Karwar 12⅔ seers per rupee, in district average 15⅛ seers per rupee; weather hot and cloudy.
Rajkot ...	.....	General health good; weather warm; measles in Rajkot town; cholera disappeared from Katda Nayani; small-pox in Dhrol; *bajri* 29 and *juari* 36 lbs. per rupee.
		General Remarks.—Rain in the Southern Mahratta Country, heavy in parts of Dharwar; scarcity of drinking-water in parts of taluka Nargund in Dharwar continues; locusts in parts of Ratnagiri, Satara, and Belgaum; cholera in a few places; small-pox and cattle-disease in some districts.
Bengal—(April 25th)		
Chittagong ...	·42	Weather sultry until 21st, since which rainy and stormy; prospects of crops good; prices stationary; cholera reported from thana Cox's Bazar; cattle-disease still continues.
Dacca ...	1·02	Harvesting of safflower and barley nearly completed; prospects of standing crops not good for want of sufficient rain.
24-Pergunnahs (Calcutta) ...	.....	No crops on the ground; prospects seem fair; low lands being prepared for *amun* paddy; price of common rice stationary; public health on the whole good, though cases of cholera reported from Barrackpore sub-division.
Moorshedabad ...	*Nil*	Land being prepared for *aus* paddy; rain much wanted; a few cases of small-pox and cholera reported.
Rajshahye ...	*Nil*	A north-wester on one day and slight rain on another, weather cooler; early rice sprouting; indigo greatly injured by drought; cholera still in parts of the district.
Burdwan ...	·6	One shower at head-quarters, weather dry, elsewhere rain much wanted; cases of cholera and small-pox reported.
Rungpore ...	2·38	Weather cloudy; prospects of crops favourable; cases of cholera reported from thana Mahiganj.
Bhagálpur ...	*Nil*	Prospects good; rain wanted, especially for indigo; public health good.
Purneah ...	·07	Prospects of crops brighter from the fall of rain on two days; ploughing carried on briskly; public health fair.
Patna ...	*Nil*	East winds prevailing; harvesting of *rabi* crops still going on; public health good.
Durbhunga ...	*Nil*	Produce of *rabi* crops rather less than promise; rain wanted for sowing crops; prices rising slightly; public health fair.
Hazáribágh ...	*Nil*	Weather very hot; no crops on the ground; mango promising; small-pox reported from certain thanas; general health good.
Cuttack ...	*Nil*	Weather hot, with high wind; ploughing in progress; *dalua* rice and wheat being harvested; public health good; scattered cases of cholera reported.
		General Remarks.—Slight rain fell in several places in Bengal proper during the week, the fall was pretty fair in Rungpore and Cooch Behar, where prospects are said to have somewhat improved; there was also a fair shower in Calcutta last night, more rain is still much wanted in almost all parts of Bengal proper and in Bhagálpur division in several places; cultivation of autumn crops is retarded and in some indigo, *boro* rice and other standing crops are languishing; scattered cases of cholera continue to be reported from several districts and of small-pox from some; cholera and fever still prevalent in Nudeea.
N. W. Provinces and Oudh—		
Benares (April 24th)	No rain	Weather seasonable; isolated cases of cholera reported from both tahsils; health of cattle good; prices steady.
Allahabad („ 25th)	.....	Heat above normal and wind easterly, ending in a slight duststorm; mild small-pox still prevailing; *arhar* fallen; all other prices rising slightly.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. Provinces and Oudh—*contd.*		
Gorakhpur (April 23rd)	.....	Weather fine; crops all reaped, outturn good; measles and small-pox prevalent; prices easy.
Jhánsi („ „)	.....	Weather hot and seasonable; *rabi* outturn on the whole satisfactory; supplies sufficient; prices stationary; small-pox amongst children and cattle-disease are on the decrease.
Agra („ 24th)	No rain	Weather cloudy; *rabi* harvest continues; fever in four and small-pox in five parganas; general health good; prices stationary.
Bareilly („ „)	No rain	Harvest completed; prices almost stationary; health of people and cattle good, except in parts of two tahsils.
Meerut („ „)	.....	Heat increasing, easterly wind from 23rd; harvest almost over and grain being threshed; wheat and barley 16 annas, gram and mustard 10 annas; health good; price of wheat fallen to 23 seers.
Kumaun („ „)	No rain	Wheat crops somewhat injured; general health good; a few cases of small-pox; cattle-disease continues; prices rising.
Lucknow („ „)	No rain	Strong hot wind; *rabi* harvest over, outturn satisfactory on the whole; general health good.
Partabgarh („ „)	.....	Prices steady; outturn in wheat and barley poor, owing to frost; *sawan* being cut; general health good.
Sitapur („ „)	.....	The *rabi* is now all cut, outturn above average; small-pox bad in Sitapur tahsil.
Fyzabad („ „)	No rain	*Rabi* nearly harvested; *sawan* and indigo being sown; market well supplied with food-grains; small-pox in part of district.
Rae Bareli („ 23rd)	.....	Wind easterly since yesterday; *rabi* cut, outturn reported good; small-pox and fever continue; prices almost stationary.
Cawnpore („ 24th)	No rain	Small-pox and fever in town and four parganas; *rabi* crops harvested; no cattle-disease; markets well supplied with grain; prices stationary.
Farukhabad („ „)	.....	Weather seasonable; prices steady; small-pox and fever are still lingering in parts of the district; cattle-disease reported from two tahsils.
		General Remarks.—There has been no rain during the week over the greater part of the province; the *rabi* harvest has been completed and the outturn is generally good, but prices as a rule remain stationary; small-pox is reported from several districts and is bad in Sitapur tahsil; isolated cases of cholera have occurred in Benares district.
Punjab—(April 24th)		
Delhi ...	.....	Health fair; reaping in progress, average yield expected; prices falling.
Hissar ...	.....	Health good; harvesting continues, expected outturn good; prices stationary.
Umballa ...	.....	Health good; harvesting in progress, outturn expected to be below the average; prices stationary.
Jullundur ...	Slight rain	Health good; harvesting in progress; prices steady.
Amritsar ...	.....	Slight hail fell in the Tarn Taran tahsil, but did no injury to the crops; health good; harvest prospects good; slight fall in prices.
Lahore ...	.....	Slight rain; harvesting commenced, good outturn expected; slight fall in prices.
Ferozepore ...	.....	Health good; harvesting continues; prices fluctuating.
Sialkot ...	.....	Health good; harvesting commenced; prices stationary.
Rawalpindi ...	Slight rain	Fever in Kahuta and cattle-disease in Murree continue; slight fall in prices.
Peshawar ...	·40	Health good; *rabi* harvest completed; preparations being made for *kharif* sowings; prices stationary.
Mooltan ...	.....	Health and crop prospects good; prices stationary.
Dera Ismail Khan ...	Slight rain	Health good; crop prospects fair; prices steady.
		General Remarks.—Slight rain in a few districts; health and harvest prospects generally good; harvesting in progress in most districts.
Central Provinces—		
Nagpur (April 25th)	.....	Days hot, nights cool; prospects good; small-pox prevails slightly; prices stationary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1st MAY 1883.

GENERAL REMARKS.—Rain has fallen more or less throughout the Madras Presidency; standing crops are reported in good condition and the harvest outturn is generally fair.

In the Bombay Presidency heavy rain is again reported from the Southern Mahratta Country; preparations for *kharif* has begun in some districts; scarcity of drinking-water still continues in parts of Dharwar. In the Bengal Presidency the rainfall has been general throughout the Province; it has been very beneficial for standing crops and has greatly facilitated the cultivation of autumn crops. Considerable damage is reported to have been caused to the mango crop by the hail and high wind of the past week. In the North-Western Provinces and Oudh there has been slight rain in two districts; the outturn of the *rabi* harvest is reported to have been good. Slight rain is also reported from four districts of the Punjab; the harvest is well in hand and a good outturn is expected.

There has been no rain in the Central Provinces, but prospects are good; winnowing is in progress in several districts, and preparations for *kharif* sowings have begun in places. In Assam there has been good rain in all districts; paddy is being cut in one district and ploughing and sowings are in progress. In Mysore and Coorg there has been rain in all districts and standing crops are in good condition. In the Nizam's territories preparations for *kharif* still continue. In the Central India States and Rajputana prospects continue generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 2nd)		
Bellary ...	·89 (average of six stations).	Standing crops generally good; harvest sugarcane, yield average.
Kurnool ...	·44 (average of five stations).	Standing crops good; harvest second crop paddy, yield 9 to 12 annas; small-pox and cattle-disease continue in parts, latter more general.
Ganjam ...	·53 (average of eight stations).	Standing crops cotton and *ragi* thriving; cholera and cattle-disease in parts; fever and small-pox continue.
Kistna ...	·61 (average of two stations).	Standing crops good; harvest castor, *ragi*, Bengal gram, *varagu*, and maize, outturn $\frac{3}{8}$ to $\frac{3}{4}$; cholera continues in parts; cattle-disease abating.
Chingleput (Madras) ...	.....	Standing crops good; water available; harvest paddy, &c., yield half; small-pox continues in parts.
Coimbatore ...	·25 (average of twelve stations).	Standing crops good; harvest paddy in parts, outturn above average in two and average in one taluk; cholera, fever, and small-pox continue in parts; fever more general.
Tanjore ...	.....	Standing crops good; harvest paddy, *cholum*, and gingelly seed, outturn below average; cholera continues.
Madura ...	·92 (average of three stations).	Standing crops fading in parts; fever and cholera continue in parts.
Malabar ...	1·21 (average of thirteen stations).	Preparations for first crop commenced in several taluks; third crop progressing in parts; fever, cholera, and cattle-disease continue in parts; small-pox in all taluks.
Travancore ...	3·52	Ploughing and sowing in progress; fever continues. *General Remarks.*—No rain in Chingleput and Tanjore; general prospects good.
Bombay—(May 2nd)		
Kurrachee ...	*Nil*	Strong monsoon winds and great duststorm; small-pox decreasing in Kurrachee and prevalent now in the following localities,—Bagdadi lines, old town Sadr Bazar quarters, 1 fresh case, 2 deaths from 20th to 27th April, total to latter date 471 cases, 119 deaths, remaining sick 34; disease in twelve villages in districts, 52 fresh cases, 17 deaths, 60 remaining sick; river at Kotri on 30th 5 feet 8 inches against 7 feet 6 inches on same date last year; fever in seven talukas; wheat, red rice, and *bajri* in Kurrachee 26, 32 and 36 lbs., in Sehwan 30, 38 and 46 lbs., in Sakro 16, 34 and 38 lbs., and in Jati 20, 40 and 40 lbs. per rupee, respectively.
Hyderabad ...	.....	Threshing of *rabi* crops still continue; *kharif* operations have commenced; *matar* (peas) crop is reported to have suffered from insects in Moro and Sakrand, wheat from mildew in Shahdadpur; small-pox in eight and fever and cattle-disease in five talukas; wheat 24, *bajri* 39, *juari* 48, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Cholera and cattle-disease in Sanand continue; wheat 26½ and *bajri* 20 lbs. per rupee.
Baroda ...	.....	Sugarcane planting in Kadi in progress; small-pox in Vijapur, Nausari, and Baroda city; *bajri* 28 and common rice 24 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	.....	Preparations for *kharif* continue; small-pox in Surat, daily average deaths 3; *juari* 42 and *nagli* 51 lbs. per rupee.
Násik ...	.....	Cholera continues, deaths in Násik 44, in taluka 150, in Sinnar 14, in Igatpuri 3, and in Peint 13; wheat 27, *bajri* 32, and rice 23¾ lbs. per rupee.
Colaba (Bombay) ...	.....	Abnormal temperature rose from 1° warm on 25th to 2° warm on 27th, and then gradually fell to 1° cool on 1st; vapour in air slightly in excess of normal from 25th to 29th, afterwards normal; abnormal wind northerly on 29th and 30th, wind normal on all other days.
Poona ...	.....	About 50 cholera cases in Purandhar, Junnar, Indapur, and Bhimthadi talukas, 26 fatal; *bajri* 42 and *juari* 53 lbs. per rupee, in Poona *bajri* 37 and *juari* 48 lbs. per rupee.
Ahmednagar ...	.....	Threshing of *rabi* crops nearly finished; cholera in Parner, Sangamner, and Rahuri talukas; cattle-disease in Parner and Shrigonda talukas; *juari*—maximum 72 lbs. per rupee in Parner, minimum 48 lbs. in Sangamner; *bajri*—maximum 60 lbs. per rupee in Jamkhed, minimum 39 lbs. in Akola.
Sholapur ...	.....	Cholera in one or two villages of each taluka of the district, out of 92 cases, 35 fatal; cattle-disease in Sholapur and Malsiras talukas; *juari* 64 lbs. 16 tolas and *bajri* 55 lbs. 3 tolas per rupee.
Dharwar ...	Rain general; 2 inches in Petta Nargund; heavy in seven and slight in four talukas.	Harvesting of late crops almost completed; cotton picking in progress; scarcity of drinking-water still continues in eight villages of Petta Nargund; cattle-disease and small-pox in one and fever in two talukas; rice minimum 24 and *juari* 45 lbs. per rupee.
Kanara ...	Karwar, 1·61; Sirsi, 2·45; Hallial, 2·14.	Second crop harvest nearly completed on coast, preparing ground for monsoon crop; sugarcane plants springing up; small-pox in three talukas and fever in two; common rice in Karwar 12¼ seers per rupee, in district average 15 seers per rupee; weather cloudy.
Rajkot ...	.....	General health good; weather seasonable; one case of cholera reported in Rajkot, cholera reappeared in Katda Nayani and disappeared from Malia; small-pox in Dhrol and Godka; measles in Rajkot; *bajri* 30 and *juari* 36 lbs. per rupee.
		General Remarks.—Rain general in the Southern Mahratta Country; preparation for *kharif* began in some districts; scarcity of drinking-water in patta of taluka Nargund in Dharwar continues; locusts in Ratnagri, Satara, and Kolaba; cholera in Ahmedabad, Násik, Poona, Ahmednagar, Sholapur thana, and Satara; small-pox and cattle-disease in some districts.
Bengal—(May 2nd)		
Chittagong ...	3·41	Weather rainy, with high wind at intervals; prospects of crops improving; prices steady; cholera and cattle-disease not yet abated; small-pox and cow-pox reported from Garjania.
Dacca ...	5·03	Harvesting of *boro* paddy going on, of barley nearly completed; rain has done much good to standing crops and to ploughing and sowing.
24-Pergunnahs (Calcutta)	Alipore 2·78	No crops on the ground; low lands being prepared for *amun* paddy; prospects appear fair; public health good; a few cases of cholera reported from Barrackpore sub-division and other parts of district.
Moorshedabad ...	·25	Land being prepared for *aus* paddy; more rain still wanted; isolated cases of small-pox and cholera reported.
Rajshahye ...	.....	Rain has been of advantage, more still wanted.
Burdwan ...	2·96	Rain has done much good; ploughing proceeding; health tolerable; fever and cholera still reported.
Rungpore ...	4·82	Rain has done much good; prospects of crops favourable; public health good.
Bhagálpur ...	·57	Prospects good; rain very beneficial to young rice and indigo, more wanted; mango crop considerably damaged by high wind; public health improving.
Purneah ...	1·06	Ploughing going on; more rain wanted; health good.
Patna ...	·16	*Rabi* crops cut; sugarcane growing splendidly; a good deal of cholera in Patna city, sporadic cases reported from Barrh sub-division.
Durbhunga ...	·70	Rain has done much good to standing crops; prices rising slightly; health fair.
Hazáribágh ...	*Nil*	Clouds are seen now and then; weather very hot for the season; mango crop doing well, but rain would do good; small-pox and cattle-disease still reported from the interior; general health good.
Cuttack ...	*Nil*	Weather hot, with strong south wind; ploughing in progress; harvesting of *dalua* rice nearly over; cotton and castor in flower; public health good.
		General Remarks.—There has been more or less rain almost throughout these provinces, accompanied with high wind and in some places with hail; rain has been very favourable for standing crops and has greatly helped cultivation of autumn crops, but more is still wanted in some parts,—on the other hand high wind and hail are said to have caused considerable damage to mango crop; harvesting of *boro* paddy has commenced; sporadic cases of cholera still reported from several places and of small-pox from some; cholera cases are said to be rather numerous in Nuddea, Cooch Behar, and a few other places; fever in Nuddea on the increase.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (May 1st)	No rain	Weather very warm; no sickness of men or cattle; prices steady; outturn of harvest good, except mustard.
Allahabad („ 2nd)	.....	Weather very hot and dry; slight cholera in tahsil Handia; prices steady.
Gorakhpur (April 30th)	.....	Short thunderstorm at close of week, which has done some damage; threshing going on, outturn good; some small-pox prevalent; prices easy.
Jhánsi („ „)	.....	Weather very hot; harvesting over; supplies abundant; prices fluctuating; small-pox amongst children continues; cattle-disease of a mild type continues.
Agra (May 1st)	No rain	Weather cloudy; *rabi* harvesting continues; fever in four and small-pox in five parganas; general health good; prices stationary.
Bareilly („ „)	Slight partial shower	Outturn of harvest good; general health good.
Meerut („ „)	No rain	Heat increasing; harvest over, excellent outturn; new wheat coming into market for report; health good; prices easy.
Kumaun („ „)	Rain in parts of district.	Rain has done much good; *rabi* being reaped; crop good in some parts, but on the whole poor; prices stationary, and health fair; cattle-disease still prevalent.
Lucknow („ „)	No rain	East winds; *rabi* harvest completed, outturn satisfactory on the whole; public health good.
Partabgarh („ „)	.....	Prices steady; sugarcane being planted out; general health good; cattle-disease in a mild form reported in three tahsils.
Sitapur („ „)	.....	Prices stationary; small-pox still bad in Sitapur tahsil.
Fyzabad („ „)	No rain	*Rabi* nearly harvested; heat increasing; small-pox in three tahsils; condition of cattle good; prices stationary.
Rae Bareli (April 30th)	.....	Weather seasonable, wind easterly; health of people and condition of cattle good; prices slightly rising.
Cawnpore (May 1st)	No rain	Small-pox and fever in town and five parganas; *rabi* harvested; markets well supplied with grain; prices slightly risen.
Farukhabad („ „)	.....	Weather seasonable; prices steady; health generally good, but small-pox still lingers in parts; a few cases of cattle-disease reported.
		General Remarks.—Rain is reported to have fallen in Bareilly and Kumaun, elsewhere the weather has been warm and seasonable; some damage has been caused by thunderstorm in Gorakhpur; the outturn of the *rabi* harvest has been good; slight cholera is reported in tahsil Handia, and small-pox prevails in a considerable number of districts.
Punjab—(May 1st)		
Delhi ...	.....	Health fair; a few cases of cholera in the district; harvesting nearly over; slight rise in prices.
Hissar ...	.....	Weather seasonable; health good; harvesting continues, expected outturn good; prices falling.

Jullundur ...	.....	Health good; harvesting in progress; prices steady.
Amritsar ...	·20	Health good; harvesting in progress; prices steady.
Lahore ...	.....	Harvesting continues, good outturn expected; health good; prices steady.
Ferozepore ...	·80	Health good; some damage has been caused to crops in nine villages of the Ferozepore tahsil; prices rising.
Sialkot ...	.....	Health fair; crops being threshed; prices falling.
Rawalpindi ...	·30	A few cases of fever in Kahuta tahsil; outturn of harvest above the average; prices steady.
Peshawar ...	.....	Health good; preparation being made for *kharif* sowings; prices stationary.
Mooltan ...	.....	Health and crop prospects good; prices stationary.
Dera Ismail Khan ...	Slight rain	Health good; harvesting in progress; prices stationary.
		General Remarks.—Slight rain in three districts; health and harvest prospects generally good.
Central Provinces—		
Nagpur ...	.....	Weather very hot, with occasional clouds; prospects good; preparations for *kharif* sowings begun; health good; prices steady.
Jubbulpore (May 1st)	.....	Weather very warm; reaping finished; winnowing in progress; small-pox prevalent; wheat 21 and rice 14 seers per rupee.
Saugor (April 30th)	.....	Weather warm and close; winnowing continues; prices steady; health fair.
Seoni ...	.....	Weather very warm and cloudy; winnowing progressing; prices stationary.
Hoshangabad ...	.....	Weather seasonable; winnowing continues; small-pox prevalent; wheat 15 and rice 10¾ seers per rupee.
Raipur (April 28th)	.....	Heat intense; land being prepared for rice sowings; small-pox prevalent; cattle-disease in all tahsils; prices rising.
Sambalpur („ 26th)	.....	Weather very warm; sugarcane promising; health good; prices stationary.
Khandwa ...	.....	Weather hot and clear; prospects good; small-pox prevalent; wheat 16, *juari* 19, and rice 16 seers per rupee.
		General Remarks.—Weather hot and cloudy occasionally; prospects good; prices steady; small-pox in a few districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(April 25th)		
Akyab ...	*Nil*	Total rainfall 1·35 inches; 16 deaths from cholera in town, 12 in district; slight cattle-disease in one township.
Rangoon ...	*Nil*	Total rainfall 4·53 inches; 5 deaths from small-pox, otherwise public health good.
Bassein ...	.....	Public health good in town; 15 deaths from cholera in district; 14 deaths of cattle in one township.
Prome ...	.....	Public health good.
Amherst (Moulmein) ...	*Nil*	Total rainfall 2·69 inches; public health and health of cattle in Moulmein and district good.
Toungoo ...	.....	Total rainfall 2·26 inches; 3 deaths from small-pox in town and 3 in district, otherwise public health good.
		General Remarks.—Except some fatal cases of cholera in Akyab and Bassein districts and of small-pox in Rangoon, public health of province satisfactory; cattle-disease insignificant.
British Burma—(April 26th)		
Akyab ...	2·53	Total rainfall 3·18 inches; 11 deaths from cholera in town, 7 in district, otherwise public health good; cattle-disease in one township.
Rangoon ...	*Nil*	Total rainfall 4·53 inches; 3 deaths from small-pox, otherwise public health good.
Bassein ...	.....	Three deaths in town and 20 in district from cholera, otherwise public health good.
Prome ...	·52	Total rainfall ·52; public health good.
Amherst (Moulmein) ...	*Nil*	Total rainfall 3·69 inches; 5 deaths from cholera in one township, otherwise public health and health of cattle in Moulmein and district good.
Toungoo ...	2·30	Total rainfall 4·56 inches; 2 deaths from small-pox in town, otherwise public health good.
		General Remarks.—Except a little cholera and small-pox here and there, public health is satisfactory; a few deaths from cattle-disease in several districts; weather sultry.
Assam—(May 2nd)		
Gauhati ...	1·55	Weather getting hot; cholera and cattle-disease reported from interior of the district; river rising; *ahu* crops doing well.
Sylhet ...	2·84	*Boro* paddy being cut, good outturn expected; cultivation for *aus* and *amun* crops going on apace; sowings commenced; cholera still bad in places.
Cachar ...	1·58	Weather very hot; ploughing for *dumahi* and *asra* crops commenced; 10 deaths from small-pox, and deaths of 36 cattle from cattle-disease reported from Kotigora; common rice 21$\frac{5}{16}$ seers per rupee; general health somewhat improved by the break in the weather.
Dibrugarh ...	0·21	Weather warm; prospects of *ahu dhan* good; cholera still reported.
Mysore and Coorg—(May 2nd)		
Bangalore ...	·45	Standing crops in good condition; prospects of season favourable.
Mysore ...	·55	Standing crops in good condition; prospects of season favourable.
Mercara ...	2·25	The showers have brought out the coffee and cardamom blossoms in North Coorg; the *vysakh* rice crop in Surlabimut-nad is coming well into ear, and paddy has been sown in Zelsavershime; prices of food-grains stationary; fever prevalent in Mercara taluk and small-pox in Padinalknad.
		General Remarks.—Rain in all districts ranging from 2·81 to 1·50; standing crops in good condition; public health generally good; prospects of season favourable; no material change in prices of grain.
Berar & Hyderabad—(May 2nd)		
Amráoti ...	.....	Weather hot; ploughing operations in progress; wheat 16 and *juari* 26 seers per rupee.

Jeypore	.....	First harvesting completed, outturn average; health good; prices steady.
Bhurtpore ...	.....	No report received.
Ulwur (May 1st)	.....	Health good; cholera in one tahsil; crops gathered; prices steady.
Nepal—(April 26th)		
Katmandu ...	1·94	Prospects good; intermittent rain and thunderstorm during the past week.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 3rd May, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble J. W. Quinton.

SUCCESSION CERTIFICATE BILL.

Major the Hon'ble E. BARING moved that the Bill to amend the law relating to certificates granted under Act XXVII of 1860 (*An Act for facilitating the collection of debts on successions and for the security of parties paying debts to the representatives of deceased persons*) be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir Steuart Bayley, the Hon'ble Mr. Hope and the Mover.

The Motion was put and agreed to.

Major the Hon'ble E. BARING also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

BENGAL TENANCY BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Hon'ble Mr. Gibbon be added to the Select Committee on the Bill to amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 10th May, 1883.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

SIMLA;
The 3rd May, 1883.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

Nº 19.} CALCUTTA, SATURDAY, MAY 12, 1883.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8th MAY 1883.

GENERAL REMARKS.—Heavy showers have again fallen in Assam and good rain is also reported to have occurred throughout Bengal proper. In Madras rain has fallen more or less throughout the Presidency. In the Bombay Presidency heavy rain is reported from parts of Dharwar and slight showers from three other districts. In Mysore and Coorg rain has fallen in all districts. Elsewhere there has been no rain to report for the week under notice. No report has been received from British Burma.

The harvest of certain crops continues in the Madras Presidency, with an outturn either fair or below average; general prospects are good. In the Bombay Presidency preparations for *kharif* are in progress in several districts; cotton picking is nearly completed; sugarcane is doing well. Ploughing and sowing are now in full progress in Bengal; crops on the ground are doing well and the harvesting of *boro* paddy is in progress; prospects are good, but rain is still much wanted in parts of Bhagalpur division and in Cuttack. The *rabi* harvest in the North-Western Provinces and Oudh has yielded a good outturn; sugarcane is being planted and indigo sowings have commenced in some districts. In the Punjab, the *rabi* harvest still continues and is yielding a good outturn generally; threshing has commenced in one district. The outturn of the *rabi* harvest in the Central Provinces is reported excellent; threshing and winnowing are still in active progress. In Assam considerable damage has occurred from floods caused by the heavy rain of the past week. In Mysore and Coorg standing crops are in good condition; land is being ploughed for the rice crop in Mercara. In the Nizam's territories preparations are in progress for *kharif* sowings. In the Central India States and Rajputana prospects continue generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 10th)		
Bellary ...	·55 (average of six stations).	Standing crops good; harvest sugarcane, yield average.
Kurnool ...	·7 (average of six stations).	Standing crops good; outturn paddy, yield twelve annas; small-pox and cattle-disease in parts, latter more general.
Ganjam ...	·59 (average of twelve stations).	Standing crops cotton and *ragi* thriving; fever and small-pox continue; cholera in parts; cattle-disease abating.
Kistna ...	·4 (average of four stations).	Condition of standing crops not reported; harvest castor, indigo, and *ragi*; small-pox general; cattle-disease slight.
Chingleput (Madras) ...	.....	Standing crops good where water available; harvest paddy, yield half; small-pox continues in parts.
Coimbatore ...	·76 (average of thirteen stations).	Standing crops good; harvest paddy in parts, yield above average; cholera, fever, small-pox, and cattle-disease continue in parts.
Tanjore ...	.....	Standing crops good; harvest paddy, *cholum*, and gingelly seed, yield below average; cholera continues.
Madura ...	·39 (average of three stations).	Standing crops fading in parts; harvest paddy in parts; fever and cholera continue in parts.
Malabar ...	·93 (average of eleven stations).	Sowing first crop commenced in parts, third crop progressing; small-pox in all talukas; fever and cattle-disease in parts.
Travancore ...	.....	Cultivation progressing, yield last crop, Trivandrum division average; fever continues.
		General Remarks.—No rain in Chingleput, Tanjore, and Travancore; general prospects good.
Bombay—(May 9th)		
Kurrachee ...	.....	Small-pox now prevalent only in Bagdadi lines, Karachi, 14 patients remaining on 5th, 3 fresh cases, no deaths since 27th April, total to 5th May—cases 474, deaths 119; disease in twelve villages in districts, 40 fresh cases, 7 deaths, 36 remaining sick; Kotri on 7th, 8 feet 4 inches against 7 feet 7 inches corresponding date last year; *rabi* harvesting completed; fever in talukas; cattle-disease and pleuro-pneumonia in two talukas; red rice, and *bajri* in Karachi 24, 32 and 36, in Manjhand 28, 32 and 48, in Ghorabari 20, 44 and 44, and in Shahbander 22, 44 and 44 lbs. per rupee respectively.
Hyderabad ...	.....	Threshing of *rabi* crops nearly completed; *kharif* operations in progress; small-pox and fever in seven and cattle-disease in six talukas; wheat 24, *bajri* 39, *juari* 48, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Manuring operations commenced in some talukas; public health good; wheat 27 and *bajri* 30 lbs. per rupee.
Baroda ...	.....	Sugarcane in good condition; cotton picking and sowing of summer crops in progress in Kari Division; small-pox continues in Baroda city; *bajri* 28 and common rice 24 lbs. per rupee.
Surat ...	.....	Preparations for *kharif* continue; small-pox in Surat abating, average death 1; *juari* 42 and *sáyli* 49 lbs. per rupee.
Násik ...	.....	No report received.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	A few drops of rain on the morning of 3rd.	Temperature normal; vapour in air slightly in defect of normal on 2nd and 3rd, afterwards normal; abnormal wind northerly.
Poona ...	.....	Cholera continues in Poona and four other talukas, 127 cases, 35 fatal; *bajri* 41 and *juari* 51 lbs. per rupee, in Poona *bajri* 39 and *juari* 43 lbs.
Ahmednagar ...	.....	Threshing of *rabi* crops completed; cholera in Parner, Kopergaon, Sheogaon, and Newasa talukas; preparation of land for the next season in progress; *juari*—maximum 72 lbs. per rupee in Jamkhed, minimum 48 in Akola; *bajri*—maximum 60 lbs. per rupee in Jamkhed, minimum 33 in Nagar.
Sholapur ...	·29 at Sangola	Cholera in a few villages in each taluka of the district, out of 128 cases, 52 fatal; cattle-disease in Malsiras taluka; *juari*—62 lbs. 6 tolas and *bajri* 54 lbs 1 tola per rupee.
Dharwar ...	Rain in all talukas except Navalgund, Bunkapur and Ron—·13 in Nargund; heavy in Dharwar, Ranibennur, and Karajgi; slight in others.	Harvesting of late crops and cotton picking nearly completed; locusts in Dharwar and Nargund; scarcity of drinking-water still continues in eight villages of petta Nargund; cholera in a village of Kalghatgi; cattle-disease and small-pox in one and fever in two talukas; rice—minimum 24 and *juari* 47 lbs. per rupee.
Kanara ...	Karwar, ·7; Sirsi, ·71; Kumpta, ·50; and Hallial, ·22.	Second crop harvest completed; preparing ground for monsoon crops; sugarcane plants healthy; 3 deaths from small-pox in Sirsi, it continues at Karwar and Sidapur; fever in two talukas; common rice in Karwar 12½ seers per rupee, in district average 15½ seers per rupee; weather cloudy and hot.
Rajkot ...	.....	General health good; weather hot; measles in Rajkot; cholera appeared in Amran, Und, Navanagar, and Morvi, no cases in Kotda Nayani; *bajri* 29 and *juari* 35 lbs. per rupee.
		General Remarks.—Slight rain in the Southern Mahratta Country, heavy in parts of Dharwar and in parts of the Nargund taluka of this district, however scarcity of drinking-water continues; preparation for *kharif* in progress; locusts in parts of Dharwar, Belgaum, Satara, Ratnagiri, and Colaba; cholera in Poona, Ahmednagar, Sholapur, and Thana; small-pox, fever, and cattle-disease in some districts.
Bengal—(May 9th)		
Chittagong ...	4·03	Weather rainy, with strong south-easterly wind; prospects of crops good; prices stationary; cholera still continues; cattle-disease abating.
Dacca ...	3·83	Prospects of standing crops good; harvesting of *boro* paddy and *cheena* going on, of barley nearly completed.
24-Pergunnahs (Calcutta)	Alipore ·74	Low lands being prepared for *amun* paddy; sowing of early rice and jute commenced; price of common rice stationary; public health on the whole good.
Moorshedabad ...	·96	Prospects of *boro* paddy favourable; fields being still prepared for *aus* paddy; health generally good.
Rajshahye ...	.....	More rain in east than at head-quarters, weather again sultry; preparation for crops going on.
Burdwan ...	3·8	Ploughing going on everywhere; rain still wanted in Ranegunge; cholera cases reported from various parts.
Rungpore ...	3·48	Prospects good; sowing in progress in some places; weeding of early rice going on; public health good.
Bhagálpur ...	*Nil*	Want of rain beginning to be much felt, especially for paddy and indigo; public health good.
Purneah ...	·83	Prospects of crops improved by rain; ploughing going on everywhere; health good.
Patna ...	*Nil*	Collection of cotton and castor going on; sugarcane growing splendidly; 6 cases of cholera reported from Mokameh in Barrh subdivision.
Darbhunga ...	*Nil*	Mango damaged by storm; crops doing well; ploughing well begun; prices rising a little; cholera reported; health otherwise good.
Hazáribágh ...	*Nil*	Weather very warm; no crops on the ground; small-pox and cattle-disease still reported; health generally good.
Cuttack ...	*Nil*	Weather very hot, with constant high wind; want of rain much felt; public health generally good.
		General Remarks.—Good rain fell again this week throughout Bengal proper, but elsewhere the fall was slight, and partial rain has improved prospects of standing crops, and has been very beneficial for ploughing and sowing which are now in full progress; want of rain much felt in parts of Bhagálpur division and in Cuttack and Hazáribágh; harvesting of *boro* paddy proceeding; rain has been also good for public health, though reports of sporadic cholera are still received from several places; in Nuddea fever and cholera, and in Bongong Sub-division of Jessore cholera are said to have decreased; scattered cases of small-pox still reported from Patna and Chota Nagpore divisions.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (May 8th)	No rain	Weather seasonable; health of cattle good; prices steady.
Allahabad („ 9th)	.....	High west winds and great heat; slight small-pox and local cholera as before; *mohwa* crop over average outturn; prices generally steady; rice risen.
Gorakhpur („ 7th)	.....	Weather fine; harvest nearly over, outturn average; mango crop injured by storms of previous week; health fair; some cattle-disease; prices easy.
Jhánsi („ „)	.....	Strong hot wind; harvesting over, the outturn is estimated at 16 annas in Mau, Garotha, and Jhánsi parganas and 14 annas in pargana Moth; prices fluctuating; health good; cattle-disease continues.
Agra („ 8th)	No rain	*Rabi* harvesting continues; fever in three and small-pox in four parganas; general health good; prices rising slightly.
Bareilly („ „)	No rain	Harvest operations nearly finished; prices generally stationary; health good.
Meerut („ „)	.....	Weather seasonable; harvest over; grain coming into market; health good; prices stationary.
Kumaun („ „)	No rain	Weather warm; wheat being cut; wheat poor on elevated places, but better in irrigated and moist lands; prices rising; general health good; cattle-disease continues.
Lucknow („ „)	No rain	Weather very hot; *rabi* harvest completed, outturn satisfactory on the whole; sugarcane being planted out; general health good.
Partabgarh („ „)	.....	Prices stationary; indigo being sown; slight small-pox reported in Kunda tahsil; general health good.
Sitapur („ „)	.....	Supplies plentiful; prices slightly higher; variable winds; small-pox still bad.
Fyzabad („ „)	No rain	Planting of sugarcane nearly completed; small-pox in four tahsils; a few cases of sporadic cholera in the district; condition of cattle good.
Rae Bareli („ 7th)	.....	Weather seasonable; harvest over; slight cholera in tahsil Dalman; fever and small-pox abating; prices stationary.
Cawnpore („ 8th)	No rain	Small-pox extending from town to district; *rabi* crops harvested; foot-and-mouth disease in two parganas; markets well supplied with grain; prices stationary.
Farukhabad („ „)	.....	Weather seasonable; health of people good, but small-pox still lingers; markets well supplied.
		General Remarks.—There has been no rain, and the weather has been warm and seasonable everywhere; slight cholera is reported from Allahabad, Fyzabad, and Rae Bareli, and small-pox and cattle-disease continue in a number of districts; sugarcane is being planted out and indigo sowings have commenced in some districts; prices generally steady have risen in a few districts.
Punjab—(May 8th)		
Delhi ...	.....	Cholera continues; outturn of harvest at the average; slight rise in prices.
Hissar ...	.....	No report received.
Umballa ...	No rain	Health good; harvesting in progress, outturn expected to be below the average; prices stationary.
Jullundur ...	No rain	Health good; harvesting in progress; prices slightly rising.
Amritsar ...	.....	Health good; crops being gathered; slight fall in prices.
Lahore ...	No rain	Health good; prices stationary.
Ferozepore ...	No rain	Health good; crops being cut; prices stationary.
Sialkot ...	.....	Health fair; crops being threshed; prices stationary.
Rawalpindi ...	No rain	A few cases of fever in Kahuta tahsil; outturn of harvest above the average; slight fall in prices.
Mooltan ...	No rain	Health good; crops being reaped; prices stationary.
Dera Ismail Khan ...	No rain	Health good; harvesting in progress; prices steady.
Peshawar ...	.....	Health good; prices fluctuating.
		General Remarks.—Health and harvest prospects generally good.
Central Provinces—		
Nagpur (May 9th)	.....	Weather hot; *rabi* harvest good; health good; prices steady.
Jubbulpore („ 8th)	.....	Weather very warm; threshing and winnowing in progress, outturn excellent; small-pox prevalent; prices stationary.
Saugor („ 7th)	.....	Weather warm and cloudy occasionally; winnowing continues; prices steady; health good.
Seoni ...	.....	Weather very hot; winnowing nearly completed; price of wheat slightly fallen, of rice stationary.
Hoshangabad ...	.....	Weather hot and cloudy; winnowing continues; health good; small-pox—131 cases, 4 deaths; wheat 15 and rice 10¾ seers per rupee.
Khandwa ...	.....	Weather hot; preparation for *kharif* sowings in progress; small-pox—190 cases, 12 deaths; wheat 16, *juari* 24, and rice 15 seers per rupee.
Raipur (May 5th)	.....	Weather cloudy and close; small-pox slight; prices steady.
Sambalpur („ 3rd)	.....	Weather hot during the day, cool at nights; health good; common rice 56 seers per rupee.
		General Remarks.—Weather hot and close, cloudy occasionally; threshing and winnowing in progress; small-pox prevalent in some districts; outturn of *rabi* harvest excellent, but prices range high, owing to large export.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—(May 9th)		
Gauhati ...	4·99	Rain and thunderstorms daily; river rising; cholera at Hajoo and cattle-disease in mouzahs Betwa and Suki; crops coming up well.
Sylhet ...	10·58	*Boro* paddy harvest going on; cultivation and sowing of *aus* and *amun* commencing; cholera increasing; cattle-disease reported; the Loobah river in destructive flood, and the Sarma has risen to its full height in a few days.
Cachar ...	15·50	Weather very wet, incessant rains from Saturday night accompanied with heavy squalls; river full, having risen 33½ feet in four days; Barkhola bazar swept away; floods reported chiefly in the north, where much damage done; great improvement in public health.
Dibrugarh ...	5·25	Weather rainy; prospects of *ahu* crop good; cholera still reported; cattle-disease reported from North Lakhimpur sub-division.
Mysore and Coorg—(May 9th)		
Bangalore ...	·19	Standing crops in good condition; prospects favourable.
Mysore ...	3·11	Prospects good.
Mercara ...	1·48	Thunderstorms unfavourable to coffee blossoms in North Coorg, but it is forming berry in South Coorg; lands being ploughed for rice crops; public health good; prices stationary.
		General Remarks.—Rain in all districts, from 1·30 to 3·44; standing crops in good condition; prospects of season fair; public health generally good; no material change in prices.
Berar & Hyderabad—(May 9th)		
Amraoti ...	.....	Weather hot; ploughing operation in progress; wheat 16 and *juari* 26 seers per rupee.
Akola ...	.....	Weather hot; land being prepared for *kharif* sowings.
Hyderabad ...	.....	No report received.
Central India States—(May 9th)		
Indore ...	.....	Weather seasonable, nights cool, high wind prevailing; health good.
Morar (Gwalior) ...	.....	Health good; heat increasing; small-pox still continues in Gwalior.
Sutna ...	.....	Weather hot and seasonable; health good.
Rutlam ...	.....	No report received.
Neemuch ...	.....	Weather hot; public health good.
Goona ...	.....	Weather very warm; health good; wheat 24 seers.
Bhopal ...	.....	Weather hot; prospects and public health good.
Agar ...	.....	No report received.
Nowgong ...	.....	Weather seasonable; public health good.
Manpur ...	.....	No report received.
Rajputana—		
Abu (May 9th)	.....	Weather windy and cool.
Sirohi („ 6th)	.....	Fair amount of water in wells; health good; weather hot, but not oppressive.
Marwar („ 4th)	.....	Tanks all empty, water obtained from wells with difficulty; small-pox and fever still prevail; crops almost cut; hot winds blowing; prices stationary.
Meywar („ „)	.....	Wells and tanks fair.
Sankah ...	.....	Good crops harvested.
Harowti (May 5th)	.....	Nights cool; health good; prices falling.
Jhallawar („ 2nd)	.....	Weather hot; small-pox in some districts.
Ajmere („ 8th)	.....	High winds, seasonable.
Jeypore („ „)	.....	Average harvest secured; health good; prices stationary.
Bhurtpore ...	.....	No report received.
Ulwur (May 8th)	.....	Health good; cholera continues in one tahsil.
Nepal—(May 3rd)		
Katmandu ...	·10	Prospects good; weather cool and cloudy.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR 1881-82.

Nos. 164-761, dated Simla, the 30th April 1883.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Letter from the Government of the Punjab, No. 14121, dated 20th March 1883, forwarding copy of the Revenue Report of Irrigation Works in the Punjab for 1881-82, and of the Resolution by that Government reviewing the Report.

OBSERVATIONS.—The total capital outlay incurred up to the end of the year under review amounted to ₹5,47,57,368; the gross revenue assessed to ₹39,31,566; the maintenance charges, direct and indirect, to ₹17,47,245, and the net revenue to ₹21,84,321, or 4 per cent. on the total capital expenditure to the end of the year, excluding the capital cost of the Muzaffargarh Canals, which is not known. Deducting from the total capital outlay ₹2,89,56,192, expended upon the Sirhind and Swat River Canals which had not come into operation during 1881-82, the net assessed revenue yields a return of very nearly 8½ per cent. on the balance, which represents the total capital cost of the canals which actually irrigated during the year. The surplus of accumulated net revenue over accumulated interest charges payable up to the end of the year amounted to ₹ 1,82,27,075.

2. The following statement compares the assessments of 1881-82 with those of the three previous years :—

Canals.	Assessments.			
	1881-82.	1880-81.	1879-80.	1878-79.
	₹	₹	₹	₹
Bári Doáb	13,53,590	15,19,068	13,85,454	10,71,772
Western Jumna	11,44,440	10,29,669	13,13,685	11,71,994
Inundation Canals	14,33,536	10,95,551	7,34,778	6,34,918
Madhupur Workshops	...	...	...	225
Total .	39,31,566	36,44,288	34,33,917	28,78,909

The decrease on the Bári Doáb Canal was due to the season being unfavorable for irrigation. The hope expressed by the Local Government that the revenue of the Western Jumna Canal had reached its lowest figure in 1880-81 and would thereafter improve, seems likely to be verified. The large increase under the head of Inundation Canals was mainly caused by an indirect credit of ₹2,38,483 on account of enhancement of land revenue due to the Muzaffargarh Canals, for which nothing was allowed in the returns of the previous year, but there was also an increase of ₹75,000 in the canal revenue assessed on the Upper Sutlej Canals, due to the excellent administration of the officer in charge of them.

3. The working expenses, including indirect charges, amounted to—

Canals.	Working Expenses.			
	1881-82.	1880-81.	1879-80.	1878-79.
	₹	₹	₹	₹
Bári Doáb	5,10,565	4,22,718	5,02,288	5,14,358
Western Jumna	4,31,163	4,08,254	4,75,632	4,16,069
Inundation Canals	8,05,517	8,84,252	6,47,511	6,18,480
Madhupur Workshops	...	...	14,361	16,412
Total .	17,47,245	17,15,224	16,39,792	15,65,319

The increase of expenditure on the Bari Doab Canal occurs under all heads except "Refunds" and "Indirect charges," and that on the Western Jumna Canal mainly under "Extensions and Improvements" and "Establishment." The decrease of expenditure on Inundation Canals is entirely due to a large decrease of ₹1,35,453 on the Lower Sutlej and Chenab Canals, the expenditure on all others having increased.

4. The net assessed revenue after deduction of all working expenses amounted to—

Canals.	Net assessed Revenue.			
	1881-82.	1880 81.	1879-80.	1878-79.
	₹	₹	₹	₹
Bári Doáb	8,43,025	10,96,350	8,83,166	5,57,414
Western Jumna	7,13,277	6,21,415	8,38,053	7,55,925
Inundation Canals	6,28,019	2,11,299	87,267	16,438
Madhupur Workshops	...	...	—14,361	—16,187
Total .	21,84,321	19,29,064	17,94,125	18,13,590

The net assessed revenue of the Bári Doáb Canal yielded 5·42 per cent.; that of the Western Jumna Canal 8·6 per cent.; and that of the Inundation Canals, for which Capital and Revenue Accounts are kept, 31·25 per cent. on the total capital outlay (direct and indirect) to the end of the year under review.

5. The statement of areas irrigated, which is given in paragraph 5 of the Resolution of the Punjab Government, shows a large and satisfactory increase in the area watered by the Inundation Canals.

On the Western Jumna Canal the area under sugarcane was 50 per cent., and that under cotton nearly 40 per cent. greater than that watered during the previous year.

Of the total area irrigated by the canals of the Punjab during 1881-82, 602,860 acres, or 36 per cent., were under wheat.

6. The statement given below shows a slight improvement in the duty done by the water entering the heads of the Bári Doáb and Western Jumna Canals—

Canals.		1881-82.		1880-81.		1879-80.	
		Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
	Per cubic foot per second.						
Bári Doáb . .	Acres .	64·9	143·4	54·8	144·6	59·7	117·7
	₹ .	196	320	161·7	319·6	172·5	259·3
Western Jumna . .	Acres .	67·6	65·8	62·4	62·8	79·6	61·6
	₹ .	295	205	178·5	138·2	248·4	134·9

7. The maintenance charges per acre irrigated are compared below—

Canals.	Per acre irrigated.			
	1881-82.	1880-81.	1879-80.	1878-79.
Bári Doáb	1·39	0·97	1·27	1·57
Western Jumna	1·43	1·53	1·53	1·04
Inundation Canals	0·79	1·02	1·25	·88
On whole area	1·03	1·09	1·34	1·10

8. The cost of measuring irrigated areas and of preparing demand statements is given in paragraph 17 of the Resolution by the Local Government, and enquiry is being made into the possibility of reducing charges under this head.

9. From paragraph 18 of the Resolution by the Local Government it appears that the charges for collection of canal revenue include cost of measuring and assessing the irrigated areas. This was not understood when the Local Government was asked to reduce the charges to 5 per cent. on the revenue collected. From the figures given by the Government of the Punjab it would, however, appear that it may be found possible to reduce the charges on this account on the Western Jumna Canal from 8·17 to 6·50, or 7·0 per cent.

10. The balances of canal revenue remaining uncollected on the 1st of April 1882 amounted to ₹63,044-8-5 out of a total demand of ₹19,84,313-7-2. The balances uncollected on the 1st April 1881 amounted to ₹1,82,622, and those of 1879-80 to ₹64,262.

ORDER.—Ordered, that copies of this Resolution and of the Report and of the Resolution by the Punjab Government be forwarded to the Secretary of State and to the Finance and Commerce and Revenue and Agricultural Departments of this Government for information.

Also, that copies of this Resolution be forwarded to the Government of the Punjab for information and guidance.

The Governments of Madras, Bombay, Bengal and North-Western Provinces and Oudh, Public Works Department.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department, for communication to the Resident at Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also, that copies of this Resolution and of the Report and Resolution by the Punjab Government be forwarded to the Local Governments, Administrations and Officers noted in the margin for information.

Also, that this Resolution, the Resolution by the Local Government, and the Chief Engineer's Report, with a few selected tables, be published in the Supplement to the *Gazette of India*.

By order,

HENRY A. BROWNLOW, *Colonel, R.E.*,
Deputy Secretary to the Government of India.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department, No. 1411I., dated 20th March 1883.

READ—

Revenue Report of the Chief Engineer, Irrigation Works, Punjab, for the year 1881-82.

RESOLUTION.—The result of the working of the canals in the year under review again shows an improvemennt on that of the previous year. The net revenue of the works in operation in excess of all charges, including interest, by assessments, is 3·99, against 3·52 in the previous year, and by collections 4·61, against 8·78, but the last figure was the result of abnormal credits.

2. The area irrigated has increased from 1,565,877 acres in the last year to 1,687,725, notwithstanding that there was a falling-off in the Bári Doáb Canal of 65,078 acres. There was an increase of 34,994 acres in the Western Jumna Canal, and this shows that the cultivators on that canal are resuming much of the irrigation that had been temporarily abandoned.

3. The Capital invested by Government in the Punjab Canals amounted to R4,49,78,190, in addition to which R97,79,178 has been contributed by Native States for the Sirhind Canal, so that the total cost of the Punjab Canals has been R5,47,57,368.

4. The above includes R18,25,106 spent on the Swát River Canal classed as a Famine Relief Protective Work, and excludes R8,55,648 which had been expended on surveys made some years ago for new canal projects, and which Government of India have ruled in para. 2 of their Resolution No. 65-66 A-I, dated 5th April 1882, should be classed as works for which neither Capital nor Revenue Accounts are kept.

5. The returns from the canals in operation by collections amounted to R5,05,981 in excess of all charges for working expenses and interest, so that there was a profit of R1·13 per cent. on the Capital invested by Government, including that locked up in the Sirhind and Swát River Canals, which are not yet in operation.

Up to date the receipts have exceeded the whole of the charges by R1,82,27,075.

6. Of the permanent canals in operation, the Capital amounted at the end of the year to R2,38,45,044, of which R4,43,224 had been spent during the year.

7. The gross revenue collected during the year was R26,63,251; the working expenses R9,41,728; the interest charges R9,03,267; and the profits R8,18,256, or 3·43 per cent. on th Capital invested, against 7·56 per cent. in the previous year.

8. But the latter included adjustments on account of previous years; deducting these the percentage was only 2·29 or 1·14 less than the year under review.

9. The realizations on account of the lease of water-power continue to exhibit a satisfactory increase, as will appear from the following:—

	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.	1876-77.
Western Jumna Canal.	16,366	18,952	6,108*	112*	11,648	15,287
Bári Doáb Canal .	71,669	64,029	45,759	45,504	35,290	38,542
TOTAL .	88,035	82,981	51,867	45,616	46,938	53,829

* The receipts in these years on Western Jumna Canal were abnormally low, for reasons explained in previous reports.

This revenue is almost entirely due to the rentals paid for the native flour mills, the single exception being the sugar works near the head of the Bári Doáb Canal. During the year, however, the Egerton Woollen Mills were established on the same canal, and enquiries have been since made by the Manager of a Company composed entirely of native capitalists who propose to utilize for ice-making and general purposes the water-power that is still available at the tail of the Delhi Branch of the Western Jumna Canal.

10. The Capital invested in the Inundation Canals in operation, with which is included the Mádhopur Workshops, at the end of the year, was R19,21,037, being R33,446 less than at the commencement of the year; this was due to a decrease in the suspense balances and principally to the sale of stores collected in the Mádhopur Workshops. This does not include the Muzaffargarh Canals, for which no Capital Account is kept.

11. The gross revenue amounted to R10,82,287, the working expenses to R6,37,753, and the interest to R74,299, so that the profit was R370,235, or 19·27 per cent. after paying all charges.

12. By assessments the gross revenue would amount to R10,86,804, and the profit to R3,74,752, or 19·51 per cent.

13. Although not pertaining to the year under review, it may here be remarked that the extension of the system of Inundation Canals from the great rivers of the Punjab, referred to in para. 14 of the observations of the Government of India in the Revenue Report for 1880-81, has received attention, and that three Divisions have been constituted for the purpose of preparing projects in detail for the construction of Inundation Canals from the Sutlej, Chenab and Ravi Rivers, of which the two former are far advanced, and will shortly be submitted for the sanction of the Supreme Government.

14. Surveys of the Ravi in connection with the project for a canal in the Montgomery District are also in progress.

15. The following table shows the area irrigated in the last five years :—

Canal.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
Permanent	668,547	698,631	704,003	726,018	774,962
Inundation	1,019,178	867,246	516,341	692,261	549,511
Total	1,687,725	1,565,877	1,220,344	1,418,279	1,324,480

On the permanent canals there has been a satisfactory increase of 34,994 acres on the Western Jumna Canal, which is, however, more than balanced by a decrease of 65,078 acres on the Bári Doáb Canal, the cause of which is explained in detail in the Chief Engineer's report. The increase on the Inundation Canals is due to the favorable conditions of the rivers.

16. As directed in para. 8 of Government of India's Review of the Revenue Report of 1880-81, classified statements of crops irrigated in each Canal Division have been appended to Chief Engineer's report.

17. The cost per 100 acres of measuring the irrigated areas and preparing the demand statements was as follows :—

	1881-82.	1880-81.	1879-80.
Western Jumna Canal	2·53	2·34	2·05
Bári Doáb ,,	2·95	2·68	3·03
Inundation ,,	1·18	1·45	1·69

The possibility of effecting some reduction in the amount of these charges is referred to in paras. 18 and 40 of Chief Engineer's report, and will not be lost sight of.

18. The cost of collecting the canal revenue for four years is as follows :—

	1881-82.			1880-81.			1879-80.			1878-79.		
	Total Revenue.	Charges for collection.	Percentage.	Total Revenue.	Charges for collection.	Percentage.	Total Revenue.	Charges for collection.	Percentage.	Total Revenue.	Charges for collection.	Percentage.
	R	R	R	R	R	R	R	R	R	R	R	R

Shahpur	25,003	...	...	7,597	...	...	11,491	...	...	15,542	...	...
Other Works	...	...	...	...	...	...	...	...	...	3,600	395	...
Total Inundation Canals	16,58,084	43,817	2·64	13,82,457	38,442	2·78	7,15,104	25,184	3·52	7,19,817	29,275	4·07
Grand Total	43,21,315	2,38,944	5·53	49,79,119	2,22,765	4·47	33,12,777	2,32,815	7·03	29,92,965	2,05,195	6·85

There appears to be no possibility of reducing the cost of collection, which includes that of measurement to the limit of 5 per cent. proposed by the Government of India in para. 12 of its review of last year's report. The low percentage shown in 1880-81 was abnormal, in consequence of the inclusion in the accounts of considerable arrears of revenue on jágír lands. The figures for and 1878-79. The fees paid to Lambardárs and Patwárís amount to 5 per cent. on the direct water-rate, which in a normal year may be taken at 70 per cent. of the gross revenue, so that these fees would of themselves amount to 3·5 per cent. It has been shown in the preceding para. that the cost of measurements vary from 2·5 to 3 per cent., and the salaries of the superior and inferior Revenue establishment form the balance of the charges under this head.

WESTERN JUMNA CANAL.

19. The area irrigated by this canal has increased by 34,994 acres, which justifies the hope expressed in last year's report that the depression under which this canal has suffered for the last few years from causes that have been explained in previous reports was only temporary, and that there would be a steady expansion of the area under cultivation.

20. The collections of the year give a profit of 6·06 per cent. and the assessments 4·92. The profit by assessments is less than that by collections owing to large arrears of water-rent having been collected during the present year. These percentages are net results after paying interest.

The percentage on collection last year, excluding that due to adjustments on account of arrears of revenue on jágír lands, was 3·59, and on the assessments 3·81.

21. The working expenses were R1·43 per acre irrigated against 1·54 in the previous year, and the establishment charges 0·80, against 0·86.

22. After deducting all charges, the balance at credit of this canal at the end of the year was R2,60,53,432.

BARI DOAB CANAL.

23. The area irrigated by this canal was 368,002 acres, being a decrease of 65,078 acres; this is mainly due to an unfavorable season. It is hoped that the construction of kharíf rájbahás, two of which have recently been sanctioned, will lead to greater stability in the revenue of this canal in future years.

24. The collections of the year show a net profit of R2·03, against R1·64 per cent., which was the normal profit in the previous year.

25. The assessments give a net profit of R1·58, against 2·72 in the previous year. The charges and interest unpaid at the end of the year were reduced to R60,79,691.

26. The charge for establishment is 0·623, against 0·526 per acre irrigated in the previous year; and the working expenses 1·39, against 1·01. Both these rates are necessarily higher than those of the previous year, owing to the decrease in the area of irrigation.

27. The balance uncollected at the end of the year has been reduced from R43,204 to 35,387, but there is still room for reduction in the amount of outstandings.

UPPER SUTLEJ INUNDATION CANALS.

28. The net profit on these canals was 6·46 on the Capital, against 0·53 in the previous year. The accumulated interest unpaid at the end of the year was R6,20,114.

29. The area irrigated was 221,982 acres; but deducting from this the area on which remissions have been granted on account of flooding and river spill irrigation, the area finally assessed was 179,578 acres; this is largely in excess of the greatest gross area ever before irrigated. The steady increase in the area irrigated from these canals is very satisfactory, and can only be attributed to the improvements in administration that have been effected by the Executive Engineer in charge.

LOWER SUTLEJ AND CHENAB CANALS.

30. The profit on these canals was R205·93 per cent., against 179·97 in the previous year.

31. The amount of land revenue was R3,07,837, against R3,09,687 in the previous year. The balance at credit of these canals, after paying interest and all other charges, was R42,83,575.

32. The area irrigated was 346,278, which is 14,639 acres in excess of the largest previously recorded (1878-79).

33. The cost of cultivation to the irrigators was R1·51 per acre, against 1·76 in the previous year, the decrease deing due to the irrigation of a larger area.

INDUS INUNDATION CANALS.

34. The profit on these canals was 15·86, or excluding an adjustment of R98,525 on account of arrears of land assigned to Jágírdárs, 1·94 on the Capital, against 3·44 per cent. in the previous year.

35. From the above causes the balance of interest unpaid was reduced from R4,21,594 to R3,09,329.

36. There was a profit to Government on the half share of the clearance rates of R7,598, which reduces the loss on this account up to date to R30,104; the balance uncollected under this head was R51,552.

37. There was an increase of R4,591 in Maintenance charges, which is due to an abnormal expenditure on silt-clearances and in watching embankments; and in Establishment of R17,415, owing to adjustment of Direction charges in the previous year.

38. The area irrigated was 190,802 acres, being 26,417 acres in excess of that in the previous year; 22,338 acres more than the average of the previous nine years, and only 18,000 acres less than that for 1878-79, which is the greatest on record.

MUZAFFARGARH CANALS.

39. The amount credited to these canals during the year on account of land revenue for previous year was R2,29,046.

40. The accounts for the year show a profit of R4,08,013; but omitting the above credit, the profit is R1,78,967.

41. The area irrigated was 248,593 acres, being 8,687 acres more than the previous year, and 67,770 acres than the year 1879-80. The cost of the irrigation to the cultivators was 1·37, against 1·80 in the previous year.

42. These favorable results are attributable to improvements in management since the transfer of these canals to the Irrigation Department.

SHAHPUR CANALS.

43. The profit on these canals was 33·85 on the Capital invested, against a loss of 2·45 per cent. in the previous year.

44. At the end of the year the balance of profit in excess of all charges including interest was R34,010.

45. The area irrigated was 11,523 acres, being 2,388 acres in excess of the previous year. The great increase in the profits of these canals during the year under review is largely due to the thorough clearances effected under the directions of an officer who was specially deputed for the purpose.

By order of the Hon'ble the Lieutenant-Governor,

R. HOME, *Lieut.-Colonel, R.E.,*
Joint-Secy. to Govt., Punjab, P. W. D., Irrigation Branch

CHIEF ENGINEER'S REVENUE REPORT FOR THE YEAR 1881-82.

WESTERN JUMNA CANAL.

The expenditure during the year was R4,57,657, which raised the Capital invested to R82,92,972 at the end of the year.

It consisted of—

	R
Works (net after deduction of receipts and suspense balances)	3,27,963
Establishment	1,01,839
Tools and Plant	6,287
TOTAL	4,36,089
Indirect charges	21,568
TOTAL	4,57,657

2. Of the expenditure on works, R17,617 was spent on the Main Line; R19,908 on the New Main Line; and R2,30,634 on the New Delhi Branch including the Hánsi and Bútána Branch; R1,017 on the Okla Navigation Channel; R61,641 on Distributaries and R173 on Drainages. The establishment charge was 30·7 on the gross expenditure on works.

3. The heavy percentage of establishment on works is due to the lapse of more than a lakh of rupees from the grant for the year. The causes which led to this short expenditure were to a great extent unavoidable. Objections raised by the Municipal Committee of Delhi to the proposed alignment of and disposition of spoils from the Okla Navigation Channel were only overcome late in the year, and work was consequently for some time in abeyance. There was also short expenditure on distributaries owing to delay in the submission of detailed estimates.

4. The Revenue Account is as follows:—

EXPENDITURE.	R	R	RECEIPTS.	R	R
Extensions and Improvements		24,465	Water-rates	8,67,013	
Maintenance and Repairs		1,16,867	Owners' rates	2,56,191	
Compensation		4,895			11,23,204
			Miscellaneous		78,046
Establishment—			TOTAL		12,01,250
Direction	27,654		Enhanced land revenue in districts where owners' rates are not yet in force—		
Executive	1,11,385			R	
Revenue	68,002		Karnal Districts	5,113	
Fees on collection	33,249		Hissar do.	46,824	
		2,40,290	Umballa	1,395	
Tools and Plant		4,277	Assigned land	5,059	
Refunds of Revenue		636			58,391
TOTAL		3,91,430	Deduct credited in access in previous year	20,303	
Indirect charges—					38,088
Leave and Pension allowances		39,733	TOTAL		12,39,338
Total Working Expenses		4,31,163			
Balance, Profit		8,08,175			
TOTAL		12,39,338			

The balance of receipts is thus R8,08,175, or 9·74 per cent. on the Capital invested.

5. The interest charge for the year amounts to R3,05,377. Deducting this the net profit of the year is R5,02,798, or 6·06 per cent. on the Capital. The accumulated profits at credit of the Canal is R2,60,53,432.

6. The improvement is due in a great measure to the realization of arrears as noted in a subsequent para., but the increase in area irrigated during the year under review affords good grounds for expectation that the improved rates of interest will be maintained.

7. Of the expenditure under maintenance R24,465 was on account of extensions and improvements; R8,006 of this was on account of the Canal office at Delhi; R8,334 on the Juah jhíl drain; and the remainder in petty items.

8. The cost of repairs calls for no special remarks, as it is rather less than in the preceding year.

9. The following table shows the working expenses for the last five years:—

Particulars.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
	R	*R*	*R*	*R*	*R*

Rate per acre, including Book charges	1·43	1·54	1 53	...	...
Establishment, rate per acre	0·80	0·86	0·94	0·66	0·52

10. There is an increase under the head of establishment due to the larger collections during the year under review. The other items of expenditure in the above table call for no remark. Owing to the increase in area irrigated there is a corresponding diminution in the rates per acre.

11. The balance uncollected at the end of the year was R23,700, against R1,30,365 in the previous year.

12. The previous paras. refer to actual cash transactions of the year, dealing with assessments (a table of which is given below for 5 years), the result

shows profit for the year of 8·60 per cent. excluding, and 4·92 including the interest charges.

13. The increase of nearly a lakh of rupees in water-rate from irrigation and more than half a lakh from owner's rates show that the anticipations of last year's report (para. 13) have been realized.

14. Nearly all the items of miscellaneous revenue show a satisfactory increase. The principal items are—receipts for rafting of timber, on which there is an increase of R11,440; sales of water, R2,660; and of other canal produce, R1,102. There is a satisfactory decrease of R1,441 under the head of Fines. The Superintending Engineer explains that the falling-off in receipts from 'water-power' are due to the water being required for irrigation, and from 'miscellaneous' to the small tenders for saltpetre earth on the Hánsi Canal.

15. The table below shows the details of the working of the canal for the last five years:—

„ rájbahás per acre irrigated	0·09	0·07	0·06	0·04	0·04

16. There was a falling-off in rabbi area in the Hánsi Branch, due to the unusually large area under kharíf crops in the previous year, but the decrease in this division was more than compensated for by an increase of nearly 90 per cent. in the areas of the two other divisions.

The decrease of irrigated area is attributed to the introduction of owner's rates in the Umballa district.

There was very little rain in Karnál, Delhi and Rohtak Districts during the months of September and October, and the increase of rabbi irrigation in the Karnál and Delhi Divisions is due to this cause.

17. The following table shows a comparison of the areas of the principal crops grown during the last five years :—

Particulars.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sugar-cane	36,294	23,846	46,973	44,006	42,135
Rice	43,376	48,372	44,076	48,383	34,733
Cotton	60,485	44,213	63,201	76,286	65,989
Wheat	98,335	93,644	103,470	140,374	206,361

There is an increase in all the more valuable crops except rice; the area under sugar-cane is 50 per cent., and that under cotton nearly 40 per cent. greater than in the previous year. There is no doubt that the people have become better acquainted with the new system of assessment and are resuming their usual cultivation.

18. Cost of measurement and preparation of demand statements was—

Division.	Measurements. Kharíf. Commenced.	Kharíf. Completed.	Rabbi. Commenced.	Rabbi. Completed.	Cost and area measured. Kharíf. Area and amount.	Kharíf. Rate per 100 acres.	Rabbi. Area and amount.	Rabbi. Rate per 100 acres.	Demand statement. Last batch submitted. Kharíf.	Last batch submitted. Rabbi.	Kharíf. Cost.	Kharíf. Rate per 100 acres.	Rabbi. Cost.	Rabbi. Rate per 100 acres.
	1881.	1881.	1882.	1882.	Acres. ₹	₹	Acres. ₹	₹	1882.	1882.	₹	₹	₹	₹
Karnál Division.	15th Sep.	9th Nov.	1st Mar.	22nd April	168 13,541	1·23	166 9,030	1·36	14th Jan.	6th June	41	·30	42	0·47
Hánsi ditto	1st „	7th Dec.	1st Feb.	24th „	813 85,937	0·94	949 68,879	1·37	1881. 19th Dec.	1st „	495	0·57	410	0·59
Delhi ditto	25th June	14th Oct.	16th Jan.	15th May	1,731 66,153	2·54	1,351 54,916	2·46	1882. 12th Jan.	6th July	751	1·10	693	1·26
Whole Canal	...	...	...	...	2,712 167,721	1·61	2,465 132,824	1·84	...	...	1,381	0·76	1,145	0·86
Average of 5 years	...	...	...	...	2,707 161,828	1·49	2,302 175,579	1·31	...	...	1,077	0·59	976	0·56

The percentage of cost of measurements and preparation of demand statements on the acreage irrigated is for the whole canal 2·53. The circumstances of the three Divisions are not alike, the high charges are in the Delhi Division, and the necessity for them is under investigation.

19. The value of crops irrigated during the year amounted to ₹95,58,979, against ₹90,46,039, in the previous year.

20. The table of rain-fall shows that the rain-fall during the earlier months of the kharíf did not differ perceptibly either in amount or distribution from the corresponding period of the previous year, so that as before mentioned the improvement in area must have been due to other causes. The marked

deficieney of rain during September, October, November and December caused increased demand for water for the rabbi crops.

BÁRI DOÁB CANAL.

22. There was an expenditure of R6,939 on Works; R1,741 on Establishment and Tools and Plant; and R369 on account of Indirect charges against the Capital Account; but there was a decrease of R23,462 in the suspense balances and receipts which reduced the Capital Account by R14,413. The Capital invested at the end of the year amounted to R1,55,52,072.

23. The Revenue Account is as follows:—

EXPENDITURE.			RECEIPTS.	
	R			R
Extensions and Impprovements		37,108	Water-rates	10,13,421
Maintenance and Repairs		1,80,879	Miscellaneous	1,15,265
Compensation		5,889

Direction	22,202		Water-advantage rate	2,95,227
Executive	1,11,491			
Medical	1,557			
Revenue	50,144			
Fees on collection	43,732			
Special Field Survey	52			
		2,29,178		
Tools and Plant		5,069		
Refunds		3,015		
TOTAL		4,61,138		
Book Charges—				
Leave and Pension allowances		49,427		
Total Working Expenses		5,10,565		
Balance Profit (being 5·87 on Capital invested)		9,13,348		
TOTAL		14,23,913	TOTAL	14,23,913

24. This shows a balance profit of R9,13,348, or R5·87 on the Capital invested, against R8·71 in the previons year; but the latter profit included R2,24,138 water-advantage rate for 1879-80, and R2,08,745 on account of arrears for jágír lands.

25. The interest charge for the year is R5,97,890, so that the net revenue, after paying all charges, is R2·03 per cent., against 4·39 in the previous year according to the year's account, but deducting the arrears 1·64 per cent. The balance of unpaid charges and interest at the end of the year was R60,79,691.

26. The sum of R37,108 spent on extensions and improvements includes R7,807 for improving inspecting bungalows; R14,286 for construction and improvement of mills; R6,893 on an inlet and outlet for Egerton Woollen Mill channel; R3,859 on drainage syphons; R1,844 on water-course heads; R2,396 on improvement of cross communications; R505 on Mádhopur Station roads; and R68 on petty items.

27. In maintenance and repairs there is an increase of R29,837, due principally to heavy repairs on the falls and weirs; rebuilding the Luliáni weir; extensive silt-clearances on the lower part of the Main Branch Lower; demarcating canal lands, and to cost of bunds and cuts in connection with the Chakki torrent.

28. There is an apparent increase of R14,559 in Establishment charges, which is due to the Direction charges being abnormally low in the last year, owing to an adjustment of the charges for the previous year.

29. The following table shows the detailed cost of Establishment for five years:—

	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.

The profit on assessments of the year under review are less than those calculated on either collections or assessments of the previous year. The collections of 1880-81 were swollen by arrears of land revenue, and the assessments were for a year very favorable for irrigation operations. The Superintending Engineer reports that during the current year the seasons were most unfavorable to the spread of canal irrigation. The total rain-fall of the year was about 60 per cent. in excess of the average, and moreover the distribution of the rain was such as to exactly suit the wants of the cultivators. There were good spring rains; and the monsoons set in early in June and continued without long breaks till the middle of September; and there was also a copious and well distributed rain-fall in January and February at the only time of the whole year when there appeared any good hope of increasing the irrigated area, *viz.*, towards the close of the kharíf, when there was a partial cessation of the rains, a failure of supply occurred and put all extensions out of the question, and even endangered the crops already irrigated. The failure of the supply was due to the river at Mádhopur having set over to the Kashmir side. This necessitated the construction of a bund, which involved a heavy expenditure both of money and of time. It is to be hoped that the system of sunken bars (which was commenced last cold weather, and will now be vigorously pushed on) will, when completed, obviate any repetition of the failure above adverted to.

31. The owner's rate or land revenue dependent on the canal for the year is as follows:—

Area in each Class.		*R*	*R*
1,605	Acres @ 1-8 . . . =	2,159	
	„ „ half rates . . =	124	
			2,283
4,582	„ „ 1-4 . . . =	5,569	
	„ „ half rates . . =	80	
			5,649
25,944	„ „ 1-2 . . . =	26,237	
	„ „ half rates . . =	1,466	
			27,703
179,797	„ „ 1 . . . =	1,60,896	
	„ „ half rates . . =	9,450	
			1,70,346
156,074	„ „ 12 annas . . =	1,03,499	
	„ „ half rates . . =	6,778	
			1,10,277
368,002	Average rate 0·86, or 13 annas 9 piees per acre		3,16,258

32. There is a decease in the water-rate assessed of R1,48,792, and in the land revenue of R11,035, due to a less area having been irrigated, as explained in para. 30. Under Miscellaneous revenue the decrease has been R5,651, due mainly to less receipts from Plantations, Fines and Miscellaneous. The decrease in Plantations to a smaller demand for fuel during the year; that under Fines to a change of nomenclature, as much of what used to be credited under this head is now classed as water-rates. The decrease under Sundry collections is due to the abnormal inflation of that item in the previous year by the sale of land and material to the Egerton Woollen Mills Company. There is a satisfactory increase in the receipts from water-power; the receipts during the present exceed those of the previous year by R 7,640.

33. The following table compares the several items for five years:—

Items.		1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
		R	*R*	*R*	*R*	*R*

35. The causes of the falling-off in area irrigated, as compared with 1880-81 have already been explained in para. 30. The decrease is most noticeable in the kharíf, and is due to the unfortunate change in the course of the river at a critical time. The works now in hand will, it is believed, be sufficient to prevent a recurrence of a failure of supply. Notwithstanding seasonable winter rains, the rabbi area compares not unfavorably with the average of previous years. It is believed that when the river is brought under control, the irrigation of this canal will become more uniform, and that even in bad seasons it may be expected to reach 350,000 acres. Considerable

attention is therefore now paid to the construction of works for ihe control of the river and to the strengthening of the rapids on the upper part of the canal.

36. The following table shows the cost of maintenance per mile of both canal and distributaries for five years :—

	1881-82.		1880-81.		1879-80.		1878-79.		1877-78.	
	Miles.	Cost.	Miles.	Cost.	Miles.	Cost.	Miles.	Cost.	Miles.	Cost.
		₹		₹		₹		₹		₹
Canal . .	388·5	113	388·5	56	388·5	90	199·5	164	199·5	652
Rájbaha . .	862·0	37·3	862·0	41·4	862·0	46	706	37	706	61

The increased cost of maintenance of canal channel was explained in paragraph 27.

37. The percentage of each class of crop is given below :—

CLASS.	1881-82.		1880-81.		1879-80.		1878-79.		1877-78.	
	Area.	Per cent.	Area.	Per cent.	Area.	Per cent.	Area.	Per cent.	Area.	Per cent.
Class I. . .	12,707	3·5	12,397	2·8	10,718	2·7	8,746	2·6	6,339	2·3
„ II. . .	33,261	9·0	45,093	10·4	43,166	11·0	37,114	11·4	24,705	9·3
„ III. . .	228,646	62·1	265,858	61·4	239,052	60·8	217,065	66·3	156,884	58·8
„ IV. . .	91,855	25·0	107,268	24·8	98,502	25 0	62,515	19·1	72,536	27·2
„ V. . .	1,533	0·4	2,464	0·6	1,879	0·5	2,118	0·6	6,531	2·4
TOTAL .	368,002	100	433,080	100	393,317	100	327,558	100	266,995	100

The Superintending Engineer justly remarks that in classes III., IV. and V. the proportion has remained nearly the same, that there has been a considerable increase in class I., and a corresponding decrease in class II. This is only what might have been expected, as the cultivation of class I. (sugar-cane) extends over so long a period that it is almost certain to require canal irrigation at some period or other of its growth, whereas in the case of class II. (rice) there will necessarily be much less need for canal-water in a year of such heavy monsoon rains as that under review.

38. The proportion of flow to lift irrigation for the last five years is shown in the following table, which shows that the percentage is practically constant :—

CROPS.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.	REMARKS.
Kharif	92·97	92·10	91·70	91·87	91·90	Flow.
Rabbi	85·91	86·04	85·90	84·94	85·78	Do.

39. The area of the principal crops grown is shown below for the last five years:—

Crops.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
Rice	32,582	44,594	42,772	36,719	24,245
Cotton	28,712	23,314	25,913	23,036	10,545
Sugar-cane	12,707	12,397	10,718	8,746	6,339
Wheat	178,743	219,838	197,865	171,936	136,279

The decrease in rice and wheat is due to favorable rains; the increase in cotton to the state of the market. Sugar-cane shows a very slight increase; this last crop remains so long in the ground that when once planted it can hardly escape being watered at some time or other during the year.

40. The cost of measurements and preparation of demand statements was as follows:—

	COST AND AREA MEASURED.				DEMAND STATEMENTS.					
	Kharif.		Rabbi.		Last batch submitted.		Kharif.		Rabbi.	
	Area and amount.	Rate per 100 acres.	Area and amount.	Rate per 100 acres.	Kharif.	Rabbi.	Cost.	Rate per 100 acres.	Cost.	Rate per 100 acres.
		R		R				R		R
1st Division . .	659·79 31,789	2 07	666·33 45,795	1·45	18 Nov.	12 May	709·56	2·22	963·01	2·10
2nd „	1,280·32 95,083	1·35	1,748·34 195,335	·89	14 Dec.	24 May	1,683·59	1·77	3,139·73	1·60
Whole Canal . .	1,940·11 126,872	1·53	2,414·67 241,130	1·00	...	...	2,393·15	1·88	4,102·74	1·70
Average for five years .	1,598 125,90[illegible]	1·27	2,144 231,882	·92	...	...	2,334	1·85	3,733	1·61

The cost of measurements and of the subsequent preparation of demand statements for the year under reriew was nearly R3 per cent. on the acreage. This small increase on the figures for the previous year is due to the irrigation of an unfavorable year being always more difficult to bring to book; the percentage is higher owing to the area measured being smaller. The subject of the cost of measurements is receiving attention, and it may be expected that some economy will be effected.

41. The balance outstanding on 1st April was R35,387, as against R43,204 in the previous year.

42. The value of the crops grown under irrigation is estimated at R1,02,91,555.

43. The following table shows a comparison between the rain-fall of the last two years, and shows how very unfavorable the seasons were for canal irrigation:—

	Gurdaspur.					Amritsar.		Lahore.

UPPER SUTLEJ DIVISION INUNDATION CANALS.

45. The Capital at the end of the year amounted to R5,78,400, being less than that of the previous year by R98. This was caused by a reduction of suspense balances.

46. The Revenue Account for the year is as follows:—

EXPENDITURE.	R	R	RECEIPTS.	R
Extensions and Improvements		1,815	Water-rates	15,710
Maintenance and Repairs		45,168	Owners' „	5,140
Establishment, Direction	4,631		Miscellaneous	4,230
Ditto Executive	22,213		TOTAL	25,080
Ditto Medical	657			
Ditto Revenue	7,641		Fluctuating Land Revenue	1,24,004
Fees on collection	642			
		35,784		
Tools and Plant		347		
TOTAL		83,114		
Book charges—				
Leave and pension allowances		7,689		
Total Working Expenses		90,803		
Balance profit (being 10·07 per cent. on Capital)		58,281		
TOTAL		1,49,084	TOTAL	1,49,084

47. The interest charge amounts to R20,892, so that the profit of the year is 6·46 in excess of all charges, including interest. The balance of interest unpaid is R6,20,114.

48. The working expenses amounted to R83,114 exclusive of the book charges. This is R2,614 less than the charges for the provious year, and is due to the scarcity of labor for the clearances at the head of the Khánwah Canal; the work was consequently unfinished at the close of the official year.

49. Including the book charges the working expenses amounted to R90,803, against R90,426 in the previous year.

50. The above statements are based on the collections of the year. If the assessments be taken as the basis of calculation, there is a great improvement, as they amount to R2,55,731, an increase of R1,06,647. The profit would then be R28·51 per cent. excluding and R24·90 per cent. including interest.

51. A comparison between the assessments of the two last years is given in the following table:—

	1881-82. AREA IRRIGATED. Flow.	Lift.	TOTAL.	Amount.	1880-81.	DIFFERENCE. More.	Less.
DIRECT WATER-RATES, LAHORE DISTRICT.							
Class I	1,725	101	1,826	929			
„ II	2,891	1,031	3,922	1,968			
„ III	9,270	3,617	12,887	6,511			
„ IV	37,554	1,507	39,061	19,531			
„ V	366	21	387	193			
TOTAL	51,806	6,277	58,083	29,132	24,233	4,899	

	Amount.	1880-81.	DIFFERENCE. More.	Less.
I. Fixed water-rate, Montgomery District	149	149	...	
II. Owner's or water-advantage rates	21,319	6,272	15,047	
	50,600	30,654	19,946	
V. Receipts from plantations	...	...	...	
VI. „ other canal produce	2,374	1,942	432	
IX. „ rent of buildihgs	180	180	...	
X. „ fines	426	162	264	
XI. Miscellaneous	1,250	1,084	166	
TOTAL V TO XI	4,230	3,368	862	
Fluctuating Land Revenue	2,00,901	1,46,621	54,280	
GRAND TOTAL	2,55,731	1,80,643	75,088	

52. From the above table it appears that there was an increase of R4,899 in the water-rate; R15,047 in the water-advantage rate; and R54,280 in the fluctuating land revenue of the Montgomery District, which was due to the river having been favorable to the extension of irrigation from the Katora Canal, and to the excellent working of the Upper Sohag Canal.

The charges in miscellaneous revenue are so small as to call for no special remarks.

53. The area irrigated during the last five years is shown in the following table:—

YEARS.	LAHORE. Kharif.	Rabbi.	TOTAL.	MONTGOMERY. Kharif.	Rabbi.	TOTAL.	GRAND TOTAL.
1881-82	18,830	39,253	58,083	62,352	101,547	163,899	221,982
1880-81	20,295	28,192	48,487	59,951	46,098	106,049	154,536
1879-80	10,621	15,233	25,854	46,368	27,255	73,623	99,477
1878-79	16,355	18,380	34,735	67,902	30,324	98,226	132,961
1877-78	6,380	10,738	17,118	38,244	25,823	64,067	81,185

The area irrigated in 1880-81 was described in the report for that year as the largest then on record; it is again exceeded by that of the year under review. Remissions from various causes have reduced the area finally assessed to 179,578 acres, which is still largely in excess of the gross measurements of any previous year. The large increase during this year is mainly due to the water from the canals at times of high flood in the river reaching many villages which do not ordinarily obtain water.

54. The statement below compares the areas of the principal crops grown in the last five years:—

CROPS.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
Rice	14,825	20,701	18,220	17,471	7,380
Cotton	16,829	8,441	5,716	34,835	15,906
Sugar-cane	129	109	96	155	129
Jowár	6,350	5,868	5,908	1,955	4,925
Wheat	93,098	47,519	19,952	25,714	18,934

The decrease in area under rice is said to be due to the cultivators fearing a repetition of the losses which accrued through the failure of supply in the

previous year. The early rise of the river was favorable for the cultivation of cotton. The principal increase is, as in the previous year, in the area under wheat.

55. The incidence on the area of the fluctuating land revenue in the Montgomery District during the last five years has been as follows :—

		1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
Kharif	R / Acres	1,13,788 / 62,352 = 1·8	1,06,957 / 59,951 = 1·8	87,603 / 46,366 = 1·8	1,26,767 / 67,902 = 1·9	65,096 / 38,244 = 1·7
Rabbi	R / Acres	87,113 / 1,01,547 = 0·9	39,664 / 46,098 = 0·9	23,540 / 27,255 = 0·8	24,792 / 30,324 = 0·8	20,798 / 25,823 = 0·8
Whole year	R / Acres	2,00,901 / 1,63,899 = 1·2	1,46 621 / 1,06,049 = 1·4	1,10,603 / 73,623 = 1·5	1,51,559 / 98,226 = 1·5	85,894 / 64,067 = 1·3

56. The following table shows the area of each class of crop for three years :—

	1881-82.	1880-81.	1879-80.
Class I.	14,939	20,795	18,269
„ II.	22,848	13,406	8,336
„ III.	42,591	45,434	39,564
„ IV.	138,422	73,256	31,646
„ V.	3,182	1,645	1,662
TOTAL	221,982	154,536.	99,477

57. The following table gives some details of the working of these canals for the last four years :—

		1881-82.	1880-81.	1879-80.	1878-79.
Duty per cubic foot of supply	Kharíf	66·2	62·7	31·4	45·7
	Rabbi	189·0	165·4	162·8	116·8
	Year	209·8	138·7	69·2	90·4
Income per cubic foot of supply.	Kharíf	100·7	91·5	50·9	73·3
	Rabbi	143·4	119·9	119·3	81·5
	Year	217·5	153·5	85·9	114 8
Cost of Maintenance	Per cubic foot of supply	73·7	75·3	76·1	64·1
	„ acre irrigated	0·35	0·54	1·09	0·7
	„ mile of canal	173·6	225·3	233·5	192·5
	„ „ of Rájbaha	35·1	30·4	73·38	70·79

58. The duty per cubic foot of mean supply shown in the table attached to the last para. is based on the assumption that kharíf irrigation has ceased at the end of August. The date is an arbitrary one, but is as good as any other that can be assumed, the fact being that irrigation for both crops is to a great extent simultaneous. A large rabbi crop, owing to its taking less water than an equal area of kharíf sowings, swells the duty and the income per cubic foot of discharge. The cost of maintenance is low for reasons which have been stated in a previous para.

59. Cost of measurements and preparing demand statements :—

Districts.	Measurements. Kharíf. Area.	Cost.	Per cent.	Rabbi. Area.	Cost.	Per cent.	Demand statements. Kharíf. Area.	Cost.	Per cent.	Rabbi. Area.	Cost.	Per cent.
		R			R			R			R	
Lahore & Montgomery	81,182	590·12	0·72	140,800	886·12	0·63	81,182	539·63	0·66	140,800	711·37	0·50

The increase in cost of preparing demand statements for the kharíf is due to the large number of objections to the measurements and to separate returns having been prepared of unauthorized irrigation. Both these subjects have received attention, and measures have been taken to obviate their recurrence to the same extent in future.

60. The dates on which measurements were commenced, completed and announced are given below :—

	Lahore. Kharíf.	Lahore. Rabbi.	Montgomery. Kharíf.	Montgomery. Rabbi.
Commenced	1st Sep. 1881	1st Dec. 1881	1st Sep. 1881	19th Dec. 1881
Completed	26th Nov. 1881	10th Mar. 1882	6th Dec. 1881	25th Mar. 1881
Announcement completed	...	...	27th Jany. 1882	28th May 1882

61. The Superintending Engineer reports that the causes of delay in completing the irrigation assessments of this year were as follows :—

The very large area to be measured and assessed; the enormous number of *tanzahs* or objections to assessment put in by the irrigators, and which needed to be enquired into in detail; a more careful mode of measuring than heretofore used was insisted upon this year; additional irrigation occurring after the kharíf measurements had been commenced; the temporary Amins employed in the Lahore District were with one exception new men without experience of the work; and lastly, a prominent cause of delay in completing the assessments was the very inadequate strength of the Revenue staff consisting of one Dárogha and two Náib-Zilahdárs. The Local Government has now (September 1882) sanctioned a very considerable increase to the temporary establishment, and although the value of this increase will very probably not become apparent during the year 1882-83, which, so far as irrigation is concerned, is practically closed, it is hoped that the benefit will be apparent in 1883-84, and the strain on the establishment will, at any rate, be sensibly lightened.

62. The following are the dates on which demand statements were submitted to the Deputy Commissioners :—

Canal Division.	British Territory. Zilah.	Tahsil.	Kharíf.	Rabbi.
Upper Sutlej Division Inundation Canals.	Lahore	Kasúr	16th Feby. 1882	16th May 1882.
		Chunián		
	Montgomery	Dipálpur	29th Jany. 1882	30th May 1882.
		Pákpattan		

63. The value of crops grown under irrigation is estimated at R 34,38,002.

		66,805		
Tools and Plant		282		
Refunds of Revenue		70		
Statute labor		1,94,231		
Total		3,37,754		
Book Charges—				
Leave and Pension allowances		13,519		
Total Working Expenses		351,273		
Balance profit, or 209·84 per cent. on Capital invested		2,31,046		
Grand Total		5,82,319	Grand Total	5,82,319

68. From the above it will appear that the balance of profit was R2,31,046, or R209·84 per cent. on the Capital invested; or, after deducting the interest charges of R4,305, R205·93 per cent. The total sum at the credit of the canals, after paying all charges, is R42,83,575.

69. The Zar-i-nágha expenditure consisted of—extensions and improvements R235 for making maps of the canals; maintenance and repairs, R64,390, which is R10,270 less than the previous year; the decrease is due to the failure of contractors to complete their work in time for payment during the year under review.

70. The amount of Imperial repairs was R11,741, or R179 in excess of last year.

71. In the Establishment charges there is a decrease of R24,996 on the previous year, due principally to an adjustment of the Direction charges in the accounts of last year.

72. In the Miscellaneous revenue there is an increase of R9,100, which is due to large sales of wood, a large number of trees having been cut down in widening the Pakhtúwah Canal.

73. There is a decrease of R2,56,870 on the land revenue credited; this is due to arrears of revenue on account of land assigned to Jágírdárs having been included in the accounts of the previous year; omitting this sum the amount for the year is R3,07,837, as against R3,09,687 in the previous year, the decrease of R1,850 being due to the collection of arrears during the previous year. R3,353 were remitted during the year. The Superintending Engineer explains that the remissions were only due in part to the failure of a proper supply in the canals, and that many of them were made on account of "poverty of the owner," or because he had elected to cultivate some other part of his estate.

74. The following table compares the items of miscellaneous revenue for five years:—

	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
V.—Receipts from plantations	30	55	136	35	13
VI.— „ „ other canal produce	14,007	4,871	6,874	5,049	5,894
IX.—Rent of buildings	171	174	...	...	45
X.—Fines	714	432	16	105	344
XI.—Miscellaneous	561	851	367	847	272
TOTAL	15,483	6,383	7,393	6,036	6,568

75. The Zar-i-nágha account is as follows:—

	R	R
Balance on 1st April 1880-81	2,39,658	
Realized during the year	56,511	
		296,169
Deduct expenditure—		
1 A.—Extensions and Improvements	235	
1 B.—Maintenance and Repairs	64,390	
III.—Fees on collection	1,642	
		66,267
BALANCE ON 1ST APRIL 1882		2,29,902

76. The following table shows in detail the attendance of laborers during the last two years:—

Particulars.	1881-82.			1880-81.			Difference.	
	Sutlej.	Chenab.	TOTAL	Sutlej.	Chenab.	TOTAL.	More.	Less.
Called out	343,364	168,205	511,569	392,680	181,979	574,659	.....	63,090
Present	260,229	127,039	387,268	307,673	142,412	450,085	.....	62,817
Remitted to Panchayats	19,424	11,574	30,998	16,797	10,828	27,625	3,373	.....
TOTAL	279,653	138,613	418,266	324,470	153,240	477,710	...	59,444
Actual absentees	63,711	29,592	93,303	68,210	28,739	96,949	...	3,646

77. The number of chhers called out has been necessarily diminished by Rule 21 of the Revised Rules for the management of the Canals in the Mooltan District; and the actual number of absentees is therefore 3,646 less than in the previous year; but the percentage of absentees, instead of decreasing as was expected under the operation of that rule, has increased from 16·9 to 18·2. The following table shows the percentages for the last five years:—

	Present.	Remitted.	Absent.	Fine in rupees.	REMARKS.
1881-82	75 70	6·10	18·20	69,748	
1880-81	78·30	4·80	16·90	48,474	
1879-80	79·77	5·17	15·06	40,864	
1878-79	78·72	4·74	16·54	48,305	
1877-78	78·94	5·87	15·19	36,127	

The sum levied on absentees is high, but the increase in cash realizations over that of the previous year is mainly due to the working of Rule 21 under which R23,096 were received in commutation of labor at the rate of six annas per man. If this sum is deducted from the total, the sum received from fines proper at 8 annas per head amounts to only R46,652, which is R1,822 less than the corresponding amount of the previous year. As this was the first year of the working of the new rule, no fair conclusion can be drawn of its effect; but in the opinion of the local officers the loss of labor which it involves in a country where few men work willingly is likely to delay the work of clearing the canals.

78. The value of labor supplied was—

		R
Sutlej Canals		97,586
Chenab „		47,640
		1,45,226
Zar-i-nágha or fines on absentees	R 46,652	
Commutation of labor	„ 23,096	
		69,748
Share of land revenue		3,07,837
Water-rates		143
		5,22,954

or for 346,278 acres nearly R1·51 per acre, against 1·76 in last year and 1·71 in 1879-80.

79. The areas of the principal crops irrigated are given below for the last five years. Rice is the only crop in which there is a decrease compared with the last year. There is an extraordinary increase in millet and indigo, and a steady one in wheat. The area fit for the growth of sugar-cane is limited

to the vicinity of Shujabad, and varies but little from year to year. Turnips are chiefly grown for feeding cattle during the winter when forage is scarce and difficult to obtain.

Crops.	Area in Acres.				
	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
Indigo	65,569	34,612	6,891	41,474	69,322
Cotton	36,923	32,496	25,290	37,806	28,280
Rice	15,411	16,691	10,169	12,605	9,197
Sugar-cane	3,133	3,098	2,924	3,295	3,473
Millet	52,823	49,960	38,017	45,295	39,307
Wheat	104,935	98,678	80,898	89,188	51,686
Turnips	25,290	22,187	24,835	20,419	23,894

80. The areas irrigated and the proportion of flow to lift irrigation is shown in the following table for the last five years:—

	1881-82.		1880-81.		1879-80.		1878-79.		1877-78.	
	Area in acres.	Per cent.	Area in acres.	Per cent.	Area in acres.	Per cent.	Area in acres.	Per cent.	Area in acres.	Per cent.
Flow	288,682	83·4	235,212	78·6	221,747	82·7	270,785	81·7	226,599	79·6
Lift	57,596	16·6	64,072	21·4	46,293	17·3	60,845	18·3	58,081	20·4
Total	346,278	...	299,284	...	268,010	...	331,639	...	284,680	...

The total irrigation is 46,994 acres in excess of last year and 14,639 acres in excess of the largest previously recorded, that for 1878-79. The increase in area is due to the favorable rise of the rivers Sutlej and Chenab, which gave early waterings for the kharif and late ones to the rabbi. The high water not only continued longer, but the rise itself was greater than in the previous year.

81. The measurements for this year were again made by the Civil Establishment Patwáris; R1,555 was paid to them as fees, and the total cost, including check measurements, was R2,715, against R2,413 in the previous year, the increased cost being due to the increased area measured.

82. The following statement shows rain-fall at principal stations in the Mooltan District:—

INDUS INUNDATION CANALS.

84. The Capital Account at the end of the year was R7,07,822, being R3,524 less than at the end of the previous year owing to a reduction in the suspense balances.

85. The Revenue Account was as follows:—

EXPENDITURE.

	R	R
Extensions and improvements		4,591
Maintenance and Repairs		99,591
Establishment—		
Direction	10,265	
Executive	42,700	
Medical	704	
Revenue	11,608	
Fees on collection	2,523	
		67,800
Tools and Plant		539
Total		1,72,521
Book Charges—		
Leave and Pension allowances		13,501
Total Working Expenses		1,86,022
Balance Revenue (being 19·75 per cent. on Capital expended)		1,39,859
Grand Total		3,25,881

RECEIPTS.

	R	R
Clearance rates collected		57,113
Miscellaneous		12,745
Total		69,858
Land Revenue for the year	1,57,498	
Arrears on account of land assigned to Jágírdárs	98,525	
		2,56,023
Grand Total		3,25,881

86. The balance of profit from the above is R1,39,859, or R19·75 per cent. on the Capital invested; or, after deducting the interest charges, R27,594, 15·86 per cent. But this includes R98,525 on account of arrears of land revenue assigned to Jágírdárs; deducting this amount also the profit, after paying the interest charges, is R1·94 per cent. The unpaid balance of interest at the end of the year is R3,09,329.

87. The sum expended on extensions and improvements during the year consisted of the purchase of the Fazalwah Canal for R5,000, petty item of R6, and a writeback on account of the regulator on the Gámúnwála Canal of R415.

88. The expenditure on repairs was R4,591 in excess of last year, and is due to a larger expenditue on silt-clearances, and to the necessity for prolonged watch and ward on account of the greater height of the river on the embankment; on this last item, R7,643 was expended, against R4,779 in the previous year.

89. The cost of the establishment was R17,415 more than in the previous year, due to the adjustment of Direction charges in that year. There was a reductiom of R1,671 in the cost of Executive establishment.

90. The clearance rate for the year was . . . R 54,000

The expenditure was on—

	R	R
I.—Half cost of clearance	40,560	
II.— ,, of establishment for supervising work	1,123	
III.— ,, of repairs to banks	968	
IV.—Whole cost of water distribution establishment	1,983	
V.—Half cost of measuring establishment	1,768	
		46,402
Balance profit to Government		7,598

against R13,126 in the previous year; this reduces the loss to Government up to date to R30,194, but there is still a balance uncollected of R51,552.

91. There is an increase in the miscellaneous revenue of R5,838 over the previous year, due principally to the share of produce of the Massúwah Canal being R5,410, and of the Dhundi Canal R4,187, against R3,039 and 458 in the previous year.

92. The share of land revenue for the year is R1,57,498, against R1,57,953 in the previous year.

93. The area irrigated during the last five years has been as follows:—

1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
190,802	164,385	144,337	208,888	171,604

94. The comparison between the irrigated area of the year and that in previous year is given below:—

Crop.	1881-82.	1880-81.	Difference.
Kharíf	128,782	121,075	+ 7,707
Rabbi	62,020	43,310	+18,717
Total	190,802	164,385	+26,417

In addition to the area shown above as irrigated, an area of 10,811 acres was flooded with waste water during the kharíf, and this brings the total up to 201,613 acres. This is the best on record, with the exception of the year of

great floods, 1878-79, but a larger area came to maturity during 1881-82, as no damage was done by the floods and inundation which in 1878-79 destroyed a large proportion of the crops. The area flooded by waste water for the growth of grass is very nearly the same as in the previous year, being only 20 acres less. It will be seen from the table that the increase in area was chiefly in the rabbi, when the river was far more favorable than in the beginning of the season. On the whole, this was a most favorable year for these canals. There were few such changes in the river as necessitate the construction of new heads. The floods were high but not dangerous, and there was no damage to crops by inundation either from the river or from the hill torrents.

95. The rain-fall was more than in the previous year at Dera Gházi Khan and Rájanpur. A comparison for the last five years is given below of the principal stations :—

Name of Station.	1881-82.	1880-81.	1879-80	1878-79.	1877-78.
Sanghar	2·3	4·2	4·0	12·8	7·0
Dera Gházi Khan . . .	7·1	5·5	2·95	9·37	6·1
Rájanpur	1·9	1·7	0·5	4·8	2·8

96. The area of the principal crops grown is shown below for the last five years :—

Crops.	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.
Jowár and Bájra (millets) .	49,591	44,738	33,460	33,117	24,203
Wheat	57,759	41,451	45,876	62,402	37,479
Cotton	32,492	30,103	24,250	22,643	35,158
Indigo	17,317	10,815	5,598	6,697	28,711
Rice	12,284	12,976	11,197	10,143	11,245

From this it will be seen that there was a large increase in all the crops, except rice, in which there was a slight decrease of 692 acres.

97. The following table shows the area watered by each canal during the last four years :—

No.	Name of Canal.	1881-82.	1880-81.	1879-80.	1878-79.
1	Massúwah	3,628	2,842	2,305	2,588
2	Mánka	35,811	27,710	19,880	29,824
3	Kot Dáúd	3,762	3,936	3,728	3,165
4	Shoria	29,771	33,138	29,667	27,487
5	Kastúri	20,181	17,633	15,610	15,250
6	Dhingána	18,811	20,407	19,120	19,025
7	Chibri	7,545	4,210	5,640	7,290
8	Sahiba	14,389	10,927	8,812	11,571

	Total .	190,802	164,385	144,337	166,524

There is a falling-off in the area under the Kot Dáúd, Shoria and Dhingána Canals, which was due to the unsatisfactory state of the river at their heads. The Mánka and Núr ran for nearly the whole year to the great benefit of the cultivators, as no charge is made for the additional waterings which they thus obtain.

98. The percentage of flow to lift irrigation for the last four years is given below :—

Years.	Kharif.			Percentage.		Rabbi.			Percentage.	
	Flow.	Lift.	Total.	Flow.	Lift.	Flow.	Lift.	Total.	Flow.	Lift.
1881-82 . .	114,157	14,625	128,782	88·6	11·4	55,957	6,063	62,020	90·2	9·8
1880-81 . .	108,834	12,241	121,075	89·9	10·1	39,702	3,608	43,310	91·6	8·4
1879-80 . .	87,718	8,893	96,611	90·8	9·2	45,786	1,940	47,726	95·9	4·1
1878-79 . .	125,635	11,810	137,445	91·4	8·6	69,056	2,387	71,443	96·7	3·3

99. The measurements were conducted by the District Patwáris, and the rates per acre for the last eight years were—

Years.	Percentage.
1881-82	1·63
1880-81	2·48
1879-80	2·62
1878-79	2·23
1877-78	2·18
1876-77	2·49
1875-76	2·54
1874-75	2·34

The measurements were commenced on 5th October 1881 and finished on 11th March 1882, the time occupied being 158 days, against 120 in last year; the actual area measured was 201,614 acres, against 175,217 in the last year; the reduced cost was due to the measurements having been made wholly by map instead of almost entirely by chain as in previous year.

100. The cost of preparing the revenue papers during the year was 0·16 per 100 acres, against 0·19 in the previous years.

101. The following statement shows the rain-fall at the principal stations in the Dera Gházi Khan district :—

Name of Month.	Sanghar.	Dera Gházi Khan.	Jámpur.	Rájanpur.

MUZAFFARGARH INUNDATION CANALS.

103. This is only the second regular report on these Canals which were taken over by this Department at the commencement of last year; and the information is consequently not so complete as that available for the other Inundation Canals.

104. The following is the Revenue Account:—

EXPENDITURE.		₹	RECEIPTS.	₹
Maintenance and Repairs		22,685	Miscellaneous	196
Establishment—			Contributions from Zar-i-nágha	15,902
Direction	₹ 9,287		Value of Statute labor	92,150
Executive	,, 18,890		Total	1,08,248
Revenue	,, 13,552		Land Revenue—	
	41,729		For current year ₹ 2,38,483	
Tools and Plant	488		Do. 1880-81 ,, 2,29,046	
Statute labor	92,150			4,67,529
Total	1,57,052			
Book Charges—				
Leave and pension allowances	10,712			
Total Working Expenses	1,67,764			
Balance profit	4,08,013			
Grand Total	5,75,777		Grand Total	5,75,777

105. In the balance profit is included ₹2,29,046 on account of Land Revenue for previous year; deducting this sum the net profit for the year is ₹1,78,967, and the total profit to date ₹3,64,968. Of the expenditure on Maintenance and Repairs, ₹6,783 is from Imperial Funds, and is principally on account of the establishment for supervising statute labor; the balance ₹15,902 is from the Zar-i-nágha Fund, of which ₹4,735 is on account of expenditure during last year, which was adjusted in the accounts of this year.

There is an increase of ₹5,098 in the Establishment charges as compared with the previous year. Of this sum ₹857 is on account of Direction, due to an increased expenditure on Maintenance and Repairs; ₹1,558 to variations in the Executive Establishment; and ₹2,683 under Revenue is due to the employment of 12 additional Mírábs, and to an increase of travelling allowances.

106. The following table compares the different items of Miscellaneous Revenue for two years:—

	1881-82.	1880-81.
VI.—Receipts from other canal produce	62	...
XI.—Miscellaneous	134	25
Total	196	25

107. The Zar-i-nágha account is as follows:—

	₹	₹
Balance transferred from Civil Department in February 1882	51,832	
Realized during March 1882	1,684	
		53,516
Deduct—		
Expenditure during the year		15,902
Balance on 1st April 1882		37,614

108. The following gives a detail of the attendance of laborers for two years :—

Particulars.	1881-82.			1880-81.			Difference.	
	Indus.	Chenab.	Total.	Indus.	Chenal.	Total.	More.	Less.
Called out	323,544	69,643	393,187	323,379	68,511	391,890	1,297	...
Present	254,753	54,622	309,375	292,798	55,751	348,549	...	39,174

	292,900	61,262	354,162	292,798	55,751	348,549	5,613	...
Remitted on Maáfi	126	47	173	...	...	...	173	...
Ditto to Panchávats	8,308	3,802	12,110	8,517	3,433	11,950	160	...
	301,334	65,111	366,445	309,315	59,184	360,499	5,946	...
Actually absent	22,210	4,532	26,742	22,064	9,327	31,391	...	4,649

109. The following table compares the percentages of statute labor present and absent, and the fines levied for the same period :—

Years.	Present.	Remitted.	Absent.	Fines. in rupees.	Remarks.
	Per cent.	Per cent.	Per cent.		
1880-81	88·94	3·05	8·01	15,696	
1881-82	90·08	3·12	6·80	13,371	

The value of labor supplied, and the cost of irrigation to cultivators, taking the rate of 4 annas per man, was—

	R	R
Indus Canals	73,225	
Chenab Canals	15,315	
		88,540
Zar-i-nágha fines on absentees, at 8 annas per man	...	13,371
Share of land revenue for the year	...	2,38,483
Actual cost to cultivators	...	3,40,394

or for 248,593 acres at 1·37 per acre.

110. The areas of the principal crops irrigated are given below for two years :—

Name of Crop.	1881-82.	1880-81.
Sugarcane	5,163	4,618
Rice	35,491	37,128
Cotton	23,741	25,638
Wheat	66,562	69,449

111. The following table compares the area irrigated for two years :—

Crops.	1881-82.	1880-81.
Kharíf	134,350	123,380
Rabbi	114,243	116,526
	248,593	239,906

The increased area is due to the better state of the rivers, and to extension of irrigation to new lands.

112. The following table shows the rain-fall at the three principal stations in the district :—

Name of Month.	Muzaffargarh.	Alipur.	Sanáwan.	Remarks.

SHAHPUR INUNDATION CANALS.

114. There was no change in the Capital Account during the year; the amount is R40,739.

115. The Revenue Account is as follows:—

EXPENDITURE.	R	RECEIPTS.	R
Maintenance and Repairs	9,057	Water-rates.	25,003
Establishment, Direction	499		
Tools and Plant	4		
Total	9,560		
Book Charges—			
Leave and Pension allowances	95		
Total Working Expenses	9,655		
Balance Revenue	15,348		
Grand Total	25,003	Grand Total	2003,5

The balance of Revenue was R15,348, or 37·67 per cent. on a Capital of R40,739; deducting the interest charge of R1,555, the net profit is R33·85 per cent.

116. The balance at credit of the canals at the end of the year was R34,010.

117. The area irrigated was 11,523 acres, against 9,135 in the previous year; this was due to better silt-clearances, and to the frequency of floods in the Jhelum river.

118. An officer was deputed during the cold season of 1881-82 to these canals who saw the clearances carried out and effected some necessary improvements in their channels; he also investigated the state of some of the district canals and suggested extensions and improvements of several of them.

119. The annexed statement gives the result of the past five years for the canals under the charge of this Department:—

	1881-82.	1880-81.	1879-80.	1878-79.	1877-78.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFFIC.

OFFICERS BY WHOM THE PERIODICAL INSPECTIONS OF THE SEVERAL RAILWAYS ARE TO BE MADE.

Circular No. X Railway, dated Simla, May 4, 1883.

Read again—

Public Works Department Circular No. 16 Railway, dated the 19th June 1878.
" " " " No. XV Railway, dated the 2nd February 1881.
" " " " No. XXXVII Railway, dated the 6th September 1881.
" " " letter, No. 500 R.E., dated the 18th July 1882.

OBSERVATIONS.—Owing to the rapid expansion of railways, a redistribution of the charges of the several Consulting Engineers as regards inspection of new lines previous to their being opened for traffic, the half-yearly inspection of open lines, and the investigation into accidents, has been rendered desirable.

RESOLUTION.—The Governor General in Council is accordingly pleased to rule, in supersession of all previous orders, that from the 1st July 1883, the circles of inspection shall be formed as follows, the Consulting Engineers performing the abovementioned duties on all those railways stated against their names :—

	Railways on which inspections are to be made.	*New lines to be inspected previous to opening.*
(*a*) Consulting Engineer for Railways, Madras (subject to the concurrence of the Government of Madras).	Madras South Indian Mysore Nizam's	All railways in the Madras Presidency, Mysore, and districts to the south of the Tongabhadra river, and all the branches and extensions of the lines enumerated in previous column.
(*b*) Consulting Engineer for Railways, Bombay (subject to the concurrence of the Government of Bombay).	Great Indian Peninsula Dhond and Manmad Berar Branches Bhopal Wardha Coal Bombay, Baroda and Central India Patri Salt Branch. Gaekwar of Baroda's Bhavnagar-Gondal Rajputana-Malwa including sections of the Rewari-Ferozepore as opened Jodhpore Nagpur-Chhattisgarh Southern Mahratta	All railways in the Bombay Presidency excepting Sind and all branches and extensions of lines enumerated in the previous column, and also all new lines forming junctions with the same.
(*c*) Consulting Engineer for Guaranteed Railways, Calcutta.	East Indian Patna-Gya Dildarnagar-Ghazipur Sindia Eastern Bengal Calcutta and South-Eastern Northern Bengal Nalhati Tirhoot Dacca-Mymensing Assam* Kokilamukh Darjeeling-Himalayan Bengal Central Deoghur Bengal and North-Western Tarkessur	All railways in Bengal, British Burma,* and Assam,* and all branches and extensions of the lines enumerated in previous column, and also all new lines forming junctions with the same.

* Investigation of accidents to be specially arranged for (see paragraph 3).

	Railways on which inspections are to be made.	*New lines to be inspected previous to opening.*
(*d*) Consulting Engineer for Guaranteed Railways, Lahore.	Sind, Punjab and Delhi Amritsar-Pathankot Indus Valley and Kandahar Punjab Northern Pindi-Murree Rewari-Ferozepore (first inspection previous to opening only).	All railways in the Punjab and Sind, and all branches and extensions of the lines enumerated in previous column, and also all new lines forming junctions with the same.
(*e*) Consulting Engineer for Guaranteed Railways, Lucknow.	Oudh and Rohilkhand Bareilly-Pilibhit Rohilkhand-Kumaon Cawnpore-Farakhabad Hathras-Muttra-Achneyra Bengal and North-Western	All branches and extensions of the lines enumerated in previous column, and also all new lines forming junctions with the same.

2. Railways which are opened subsequent to the issue of these orders will come within the circle of the officer who makes the inspection previous to opening, unless special orders are passed to the contrary.

3. As regards railways in British Burma and Assam, the Chief Commissioners of those provinces will each nominate an officer independent of the Railway Department of the province to perform the duties of Government Inspector for the investigation of accidents, and the periodical inspections in Burma will be conducted under the orders of the Chief Commissioner.

4. The Consulting Engineers are also empowered to depute the powers with which they are vested by this Resolution to any of their Deputies who have been duly appointed by Government to act as Deputy Consulting Engineers.

5. In special cases where it may be deemed inexpedient by the Local Administration to adhere strictly to these orders, such as the inspection of small additions to the railway in Burma, the orders of the Government of India should be taken in each instance.

ORDER.—Ordered, that this Resolution be forwarded to the Governments, Administrations and Officers marginally noted for information and guidance.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, British Burma, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Beluchistan.
The Director General of Railways.
The Consulting Engineers for Guaranteed Railways.

Ordered also, that this Resolution be forwarded to the Home Department for information, and that it be published in the Supplement to the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary.

Executive Engineer, Northern Division, Ganges Canal, reports that owing to a fair rainfall in the early part of March all rabi irrigation ceased. The total area irrigated is less than that brought in last rabi, owing to the heavy crop of sugar which had to be maintained.

Executive Engineer, Meerut Division, Ganges Canal, reports that there was no irrigation of rabi crops effected during the month, the increase being an arrear of February. The rajbahas were run three-fourths supply mostly into escapes, to ease off the Jani escape, to allow the people on the banks to carry on their agricultural operations more readily.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports that there has been no rabi irrigation during the month; the 7,084 acres increase are differences between actual measurements and assumed area by shudkar. Indigo paleo commenced on the 22nd.

Executive Engineer, Narora Division, Lower Ganges Canal, reports that rain fell on several days and all over the Division up to the 12th. After that there was a high west wind, but that the weather looked unsettled, and that these causes prevented demand from being anything but trifling in amount.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that the new irrigation done this month is nearly exactly the same as that done in March 1882, the falling off in the total area irrigated is apparently due to the more favourable cold-weather rains this year.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports that a heavy rain fell throughout the Division during the first 10 days of the month, which practically closed rabi irrigation. Kharif paleo was carried on towards the end of the month to a very moderate extent.

Executive Engineer, Etáwah Division, Lower Ganges Canal, reports that the decrease, *viz.*, 13,127 acres, on the area irrigated during the corresponding period of last year is principally due to a large area having been sown with light crops in the kharif which was not cultivated in rabi. The chief crop hindering rabi cultivation was arhar, of which an unusually large area was sown.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that no new rabi irrigation was effected and that alterations are due to more correct estimates, that about 1,000 acres paleo for sugarcane and indigo were also done during the month, and that showers, accompanied by slight hail, were reported from several stations in the beginning of the month.

Executive Engineer, Eastern Jumna Canal, reports that wheat is 18,000 acres short of last year. Every other crop has increased. The falling off of wheat was explained last month. Practically there has been no new irrigation this month. Regarding the *kharif* area irrigated during this month, Executive Engineer remarks that patrols and amins had been kept busy over the early completion of the measurements, and that the reported area is believed to be far short of the actual area watered for cane-planting.

Executive Engineer, Agra Canal, reports that demand continued up to the end of March, a considerable area of late sown gram requiring water very late in the season, and that generally there is slight increase over last rabi.

Executive Engineer, Rohilkhand Canal, reports that there was no demand whatever for water, except very slightly on the Paha Canal. The heavy rain on 12th March enabled the cultivators to sow their sugarcane without any assistance from the canals. Last year about 10,000 acres of sugarcane paleo had been reported by the end of March; this year canal water was not required for paleo.

* Most of this was escaped through distributaries.

[NOTE.—For kharif area see separate statement.]

D. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 10th May, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.

His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble W. W. Hunter, LL.D., C.I.E.

The Hon'ble J. W. Quinton.

NORTH-WESTERN PROVINCES AND OUDH LOCAL BOARDS BILL.

The Hon'ble MR. QUINTON moved for leave to introduce a Bill to provide for the constitution of Local Boards in the North-Western Provinces and Oudh. He said:—

"My Lord—I have the honour to move for leave to introduce a Bill to provide for the constitution of local bodies in each district of the North-Western Provinces and Oudh, to administer the expenditure of that portion of the rates levied on land which is applicable to local purposes in that district, and of the income accruing from certain other sources of revenue which may from time to time be made applicable to like purposes.

"The object of the Bill is to give effect to the views of the Government of the North-Western Provinces and Oudh on the subject of local self-government as enunciated in the Resolution of that Government, dated Lucknow, 5th December 1882, and published, together with the letter of the Home Department conveying the general approval of the Government of India of Sir Alfred Lyall's proposals, in the Local and Imperial Gazettes during the same month.

"The law at present in force in the North-Western Provinces and Oudh does not admit of these proposals being fully carried out. The levy of rates in the united Provinces is authorised by Acts III and IV of 1878. Those Acts prescribe rigidly the proportions in which the rates levied under them are to be allotted by the Local Government to each district, and direct the appointment of district committees for the purpose of assisting in determining how the allotments shall be applied, and in the supervision and control of the expenditure of such allotments; but they leave the appointment of the district committees and the definition of their functions and authority altogether in the hands of the Local Government; they allow of the number of members of each committee being so small as six, and of half even of this small number being Government officers; and they enable the Local Government to divert to general provincial objects all balances of the annual allotments remaining unexpended at the close of each year.

A

"The duty, therefore, devolves on me of asking from the Council leave to introduce Bills which will remove these obstacles to giving effect to the Resolution interposed by the existing law, and substitute for it enactments under which the proposals of the Local Government can be brought into operation.

"With a few exceptions, on which I need not dwell, as there will be ample opportunity for discussing them in Committee, the Bill embodies and throws into legislative form the recommendations of the Resolution.

"Those proposals have been the subject of long and careful deliberation with the Government of the North-Western Provinces and Oudh. During the rainy season of last year, under instructions from His Honour the Lieutenant-Governor and Chief Commissioner, District and Divisional Officers put themselves in communication with the leading non-official gentlemen of their respective charges, including the members of municipal and district committees. Meetings were held at tahsíls by Collectors or their Assistants, and at head-quarter stations by Commissioners. The points on which the Government wished for information were fully discussed at these meetings and elsewhere, and the outcome of the meetings and discussions was a mass of reports filling more than 300 closely printed pages. In August, the Lieutenant-Governor convened a large committee at Naini Tal, presided over by the Senior Member of the Board of Revenue, and having on it as members three Commissioners of Divisions, four District Officers, the heads of the Police and Educational Departments, two officers of the Secretariat, one of whom—Mr. Woodburn—had been a Deputy Commissioner of long experience and great efficiency in Oudh, and four distinguished Native gentlemen, one of them—the Hon'ble Rájá Sivá Prasád—a Member of this Council.

"To this Committee were referred for consideration and report the Resolutions of the Government of India on the subject of local self-government and the orders of the Local Government on the subject of those Resolutions, the reports of Divisional and District Officers to which I have above alluded, and a draft Bill embodying such provisions of Acts III and IV of 1878, and Act XV of 1873, as seemed *primâ facie* applicable to the new arrangements.

"The report of this Committee is dated the 30th September, and its labours are thus characterised by the Local Government :—

'To this Committee Sir Alfred Lyall is much indebted for clear and well-reasoned conclusions upon all the principal matters referred for deliberation, especially upon the methods best adapted in the present circumstances of the country for carrying out the policy of local self-government as declared by His Excellency the Governor General in Council.'

"Then followed the Resolution of the 5th December recorded by the Local Government, accepting, with certain modifications, most of the recommendations of the Committee. Bills were drafted to effect the necessary legislative changes, which when finally approved of were forwarded to the Government of India; but the Council towards the close of the Calcutta session was so much occupied with more pressing business, that there was no time available for the consideration of those measures; and I am only now in a position to introduce the Bills as revised by the Legislative Department.

"The North-Western Provinces and Oudh Local Boards Bill, as its preamble already quoted sets forth, provides for the constitution of local bodies, in supersession of the existing district committees, to administer the expenditure of that portion of the rates levied on land which is applicable to local purposes in that district, and of the income accruing from certain other sources of revenue which may, from time to time, be made applicable to the purposes.

"The first, and perhaps most important, point dealt with is the constitution of these boards.

"Power is given by section 3 to the Local Government to divide, for the purposes of the Act, each district into sub-districts, which will generally correspond with tahsíls; and section 4 establishes for each sub-district a local board having authority over that sub-district, and for each district a district board having authority over the entire district (cantonments and municipalities excepted); while sections 23 and 24 define the relations of local boards to district boards, and the mode in which control by the former is to be exercised

by the latter. The arguments in favour of this are stated by the Local Government in the following passage which I extract from the Resolution of December, 1882 :—

'But for the Provinces generally, the Lieutenant-Governor quite agrees with the arguments in favour of making the area of each subordinate board's jurisdiction conterminous with a tahsíl; and this plan has accordingly been adopted. On the one hand, the formation of representative boards for the chief subordinate divisions of each district will ensure better knowledge of, and attention to, local wants, more regular attendance at board meetings, closer supervision over the departments under local management, and prompter and more effective execution of local works, than is possible with a single district board meeting only at head-quarters. On the other hand, to make separate and independent units of local administration within each district would tend to break up piecemeal the organisation of the district; and while increasing the necessity for, would throw serious difficulty in the way of, the constant exercise of central direction and control. For it must be admitted that there is little or no prospect of obtaining for sub-divisional boards throughout the Provinces, or even in different parts of many districts, an equal standard, or anything like a level, of general intelligence and working capacity. To set up all these boards as separate administrative bodies would be to accept the risk of great and confusing variety in the results of their administration—a risk that would be greatest in the remote and backward tracts where intelligence and energy are often most required, and where these qualities are of course least likely to be available on the spot. The business of settling matters of finance and adjusting public interests between the several sub-divisional boards concerned in them would cause much correspondence, and would lead to the multiplication of petty offices, with the probable consequence of wasting much money and time on establishments, and in the preparation, submission and scrutiny of returns and reports. The plan of making the central district board an aggregate of the sub-divisional boards is, on the contrary, in many ways favourable to the adjustment of the mutual relation between the various subordinate boards and between them and the central board; while it appears to be the best arrangement for maintaining a consistent and systematic administration of local affairs throughout the district. Moreover, upon no other system could the minor bodies generally rely upon securing the membership of the leading men within their jurisdiction; while lastly, the plan has the great advantage of reducing to a minimum the necessity for official superintendence and interference. If the sub-divisional boards were independent, the expedient of placing them in different classes for the purpose of graduating their powers according to the circumstances and conditions of different parts of the Provinces and of districts would in the beginning probably be unavoidable. But all such intermediate classifications are apt to affect the simplicity of the broad groundwork and fundamental principle of self-government; and the Lieutenant-Governor infinitely prefers that the district board, which will be by far the best judge of the claims and capabilities of each section of its own body, should delegate the proper degree of power and allot the requisite amount of funds to each interior circle. It will be for the district board, as composed of members representing all parts of the district, to act, after full consultation, upon the system thus sketched out, and to draw up a scheme explaining the arrangements made for distributing the work of local administration to its various subordinate boards, and adjusting their mutual relations.'

"I may add that the tahsíl is in the North-Western Provinces the smallest unit of revenue-administration; that its area is rarely altered; that it is well known to all residents within it; and that it corresponds generally with the boundaries of the topographical division of the country known as parganas.

"The constitution of local bodies being thus provided for, the next step was to determine the method of appointing the members of these boards. Sections 5 and 6 lay down the following broad rules:—At least three-fourths of the members of each local board must be persons residing or owning landed property, or carrying on trade or business, in the sub-district, and must be *chosen by election*. The remaining fourth may be appointed directly by the Local Government.

"As to the mode of election, Sir Alfred Lyall writes in paragraphs 7 and 8 of the Resolution :—

'Whether, and to what extent or proportion, the membership of the boards should be determined by election was specially referred for inquiry and opinion to all the districts of the Provinces; the point was discussed in every district with the result described in the district and divisional reports; and, as is shown in the Committee's report, it was closely debated by the Provincial Committee. The large towns are much alike everywhere; they are always centres of comparative wealth and intelligence; they form constituencies easily represented, and their administration is always open to public observation and criticism. But the ordinary Indian districts possess none of these characteristics, and, as far as can be judged from these papers, the balance of Native opinion preponderates decidedly against the unrestricted introduction into them of the elective system. Such a step certainly appears inadvisable at the present time, when the state of society varies so widely in different parts of the country, when the

whole principle of self-government is novel and imperfectly understood, and when the practice of general election is not only unknown outside the towns, but is apparently not in accord with the feelings and ideas of those classes of the community that have the largest interest in local self-government, and to whom we must look for its success. It is manifest that local self-government—meaning a system of administration by the gratuitous exertions of persons best acquainted with the characteristics of the neighbourhoods in which they are interested, and possessed of means, leisure and public spirit enabling and impelling them to devote themselves to that administration—cannot be initiated and developed into real independence except by the co-operation of these classes, represented by men who can lead and will be trusted by the community at large. This is how all systems of local representation have begun in all times and countries; so that it would be remarkable if in such a country as India the best way of beginning were found to be by popular suffrage. That the services of such men could be secured by open election, that they themselves would seek election or would generally allow their names to be submitted for the purpose, seems from all the information hitherto collected to be questionable. If, therefore, we find that the views and prepossessions, as far as they have been elicited, of persons qualified to form a judgment on the best mode of initiating local self-government in the extensive districts of these Provinces are largely in favour of leaving at the outset the constitution of the local boards more or less in the hands of the Government, there seems to be no sufficient reason for endeavouring, almost on the spur of the moment, to invent any such elective machinery as would necessarily raise numerous and various questions of franchise and voting rights, and all the practical difficulties inseparable from the attempt to adjust an arbitrary system to the diverse circumstances of the country. In short, the solid and universally recognized fact that local self-government depends absolutely for its success upon the character and ability of those to whom it is entrusted has led the Lieutenant-Governor and Chief Commissioner to the conviction that, in inaugurating the policy in the districts, a system of careful and consultative nomination by Government of the electoral body is preferable to election by untried and unfamiliar methods. Sir Alfred Lyall believes that this conclusion is supported by the judgment, and conforms to the present wishes of a large majority of the people.

'Having regard, then, to the extreme importance of placing in competent hands the duties and responsibilities of district administration in the beginning of what is avowedly an experiment, and to maintain the continuity of existing arrangements which imply (in such matters as, for example, education and sanitation) a standard of civilisation in advance of the average intelligence and culture of Native society, the Lieutenant-Governor and Chief Commissioner has decided to adopt in principle the recommendation formulated in the 9th paragraph of the Provincial Committee's report. The Committee proposed that the Government should nominate for each tahsíl an electoral body which should elect a certain number of its members to form the tahsíl of sub-divisional board. They advised also that a minimum qualification (on the basis of land-revenue or license-tax assessment) should be fixed, and that details might be left to be settled by local officers. But the differences in the distribution of the population, of wealth and of property in land between and within different districts are so large and manifold, that, after much examination of the question, it has been found impracticable to fix any comprehensive qualification for election purposes, much less to devise methods of canvassing and election that would be everywhere applicable or universally acceptable. The only comprehensive plan that can be laid down at the first introduction of the system is to determine, with reference to the area, revenue and tenures, population, wealth, and to other conditions and special features of each sub-division, how many persons, not being salaried officers of the Government, would fairly represent its inhabitants and interests. The district officer must then be empowered to prepare in each district the measures that may be most convenient and appropriate to its circumstances and peculiarities for ascertaining how many suitable persons are available in its sub-divisions and how they can best be chosen. The proceedings taken will be reported to the Government, and the lists of electors that are drawn up will be duly placed on record. As soon as the lists are complete, the electors will be asked to return from among their own body, by such method as may seem appropriate or necessary, the members of the sub-divisional board, who will hold office for a term of three years.'

"A section will be found in the Bill enabling the Local Government to introduce this system; and any abuse of the power conferred in the direction of limiting the number of electors is guarded against by the proviso that the persons entitled to vote at the election of a member of a local board shall not be less than twenty-five. In addition to the elected members, at least one-fourth may be directly appointed by Government. This principle, my Lord, has been already accepted by the Council in the case of the Central Provinces, and the reasons for it were put forth with great eloquence and force in the debate on the Local Self-Government Bill for those Provinces on the 12th of January last, by the Hon'ble Sayyad Ahmad Khán, a Native gentleman whose ripe experience, broad views, sympathy with his countrymen and disinterested and successful efforts for their enlightenment must always attach the highest weight to his

opinions. I shall read to the Council merely the concluding words of the hon'ble member's speech on the subject:—

'In a country like India, where caste-distinctions still flourish, where there is no fusion of the various races, where religious distinctions are still violent, where education in its modern sense has not made an equal or proportional progress among all sections of the population, I am convinced that the introduction of the principle of election, pure and simple, for representation of various interests on the local boards and the district councils, would be attended with evils of greater significance than purely economic considerations. So long as differences of race and creed and the distinctions of caste form an important element in the socio-political life of India, and influence her inhabitants in matters connected with the administration and welfare of the country at large, the system of election, pure and simple, cannot be adopted. The larger community would totally override the interests of the smaller community, and the ignorant public would hold Government responsible for introducing measures which might make the differences of race and creed more violent than ever.'

"Section 6 of the Bill provides that ordinarily the district board shall consist of *all* persons who for the time being are members of the local boards of the sub-districts comprised in that district. This provision is in accordance with the views of the Local Government and of the Provincial Committee, who consider that under any other system leading Native gentlemen would not consent to take office, and that any distinction drawn, or supposed to be drawn, in point of position and dignity between membership of the local board, on the one hand, and the district board on the other, would certainly occasion much unpleasantness, besides inducing an element of friction which is manifestly undesirable in the public interests. Power has, however, been reserved to the Local Government to direct that local boards shall elect delegates to represent them on the district board—a power to be exercised in cases when the district board constituted in the ordinary way would be too numerous a body for the efficient transaction of business.

"I need not detain the Council with the details of the arrangement made in sections 7 to 12 respecting the term of office, the resignation and removal of members of the boards, the filling of casual vacancies and such matters, which will doubtless be fully discussed in Committee, but pass on at once to the provisions for the appointment of chairmen of the local and district boards.

"It is quite clear that, in a board composed mainly of non-official members new to the work, much of its efficiency will depend on the choice of a chairman, whose functions will be to hold the balance among parties and to guide discussions, and with whom will practically rest the initiation and control of ordinary business. As regards local boards, the Bill is in accordance with the views of the Local Government, which allows them to elect one of their members to be chairman for one year. A majority of the Provincial Committee considered that it would be sufficient for boards to elect a chairman at each meeting, but His Honour the Lieutenant-Governor was of opinion that some element of permanency in the office of president of the local boards would be necessary at first for the proper transaction of business, and in order to preserve continuity of administration and uniformity of procedure. Fresh elections of chairmen at each meeting of the board would open a door to much change and contention, since any decided difference of opinion on matters before the board might lead to a contest at each meeting over the election of a chairman.

"The appointment of a chairman to a *district* board is, however, a matter of much greater importance, and has everywhere been warmly debated. The views of Sir Alfred Lyall have been expressed on it at some length, and I give them in his own words. They have been substantially thrown into legal form in the 14th section of the Bill:—

"'Upon the third point of importance in the constitution of the district and sub-divisional boards, namely, the appointment of their chairman, the Lieutenant-Governor and Chief Commissioner observes that the question of the chairmanship of the district board was the subject of prolonged discussion by the Provincial Committee. Their finding coincides in principle with the opinions and prepossessions generally elicited by the district inquiries, and recorded in the district and divisional reports. Of the four Native members of the Provincial Committee, three strenuously insisted upon the necessity for maintaining by law the chief District Officer as chairman of the district board. The fourth—a gentleman of large property and influence in the district—held a different opinion; though it may be added that, while he is said to be exceedingly well fitted for the chairmanship, he had nevertheless declined the office in his

own district on the grounds of indifferent health, want of leisure and residence at a distance from head-quarters; and the district and divisional reports, which, in the Lieutenant-Governor's opinion, evince on the part of the writers a most satisfactory disposition to interpret the genuine feeling and wishes of the people, indicate clearly that the main current of Native opinion runs decidedly toward maintaining the position of the chief District Officer at the head of local affairs, until some experience in the transaction of public business and the management of committees has been gained by leading members of the Native community. It is, beyond doubt, expedient that the district board should be exempt from official pressure and unnecessary interference; but the Lieutenant-Governor is confident that in these Provinces all District Officers are thoroughly prepared to give every facility and aid to the policy of the Supreme Government, and to promote whatever measures may be adopted for its introduction. There is accordingly, in Sir Alfred Lyall's opinion, no reason why due weight should not attach to the able and impartial reports of the officers best qualified to inform and advise their Government when they declare that the Native community, so far as it has been consulted, has expressed itself very widely in favour of retaining for the present the District Officer as chairman of the district board. It seems that the District Officer is preferred and trusted in the existing complexion of local affairs and feelings for sound and practical reasons. There can be no question that the experience and business habits of an official chairman will at first be of great assistance to the district boards; and there must also be borne in mind the strong probability that the boards will for a time need much direction and advice, possibly even admonition and control; especially where distinctions of creed or caste, or other differences, still keep alive the germs of antagonism among sections of the Native community.

* * * * *

'But * * * the middle course recommended by the Committee in the 12th paragraph of their report, which course the Lieutenant-Governor and Chief Commissioner has decided, with a slight amendment, to adopt, will further test the wishes of the country, and will allow time for opinion to form and show itself among the district boards themselves. The Committee recommend that the District Officer shall be *ex-officio* chairman of the district board, except when the board, on application made to the Government by a majority of the members, receives permission to elect a non-official chairman from their own body. The Lieutenant-Governor and Chief Commissioner agrees to the principle, with this modification, that, as soon as all the members of the district Boards shall have been chosen, or at some time before the end of the present official year, they shall be invited to assemble for the purpose of deciding whether they wish to proceed to the election of a non-official chairman, or whether they will leave their chairman's appointment in the hands of the Local Government.

* * * * *

"This concludes all the remarks which it seems to me necessary at present to offer on the constitution of the district and local boards. Section 25 of the Bill provides for the appointment of joint committees of two or more district boards for any purposes in which they may be jointly interested—a provision necessary to secure the due consideration of projects which affect large tracts of country.

"The duties to be performed by district boards will be found [illegible] in section 22 of the Bill. These principally consist of the maintenance, construction, repair and maintenance of public roads, wells, tanks, [illegible] pounds, schools, hospitals, dispensaries and other public institutions of a local nature. The district boards will delegate to the local boards the power to deal with all or any of these matters within their respective jurisdictions, and thereby, it is hoped, secure the application to such duties of that knowledge and local interest which should prove the best guarantee for their efficient fulfilment, controlled by the wider experience of the larger body. I may mention here that section 60 of the Bill amends the Northern India Ferries Act of 1878 by inserting a new section enabling the Lieutenant-Governor and Chief Commissioner to direct that any ferry shall be managed by the district board, and that its proceeds, in whole or in part, shall be paid into the fund.

"For the performance of these duties, boards are empowered to employ their own servants, under certain restrictions deemed necessary to prevent extravagance and inefficiency; and by section 35 of the Bill provision is made for the possession of funds to meet the charges which such duties involve.

"Immediately on their constitution they will receive the allotments made to the district which remain unexpended, and in future such allotments, the amounts of which [illegible]

are prescribed by law, will be made over to them, and with the proceeds of the other sources of revenue enumerated in section 35 will constitute a district fund at the disposal of the district committee. Under the present system, there is practically no district fund, for all balances unexpended at the close of the year are swept into the general Provincial Exchequer, and the districts are left with empty treasuries until they receive fresh allotments. This will be no longer possible, and the district committees will be able to carry on their administration from year to year with an accurate knowledge of their financial condition. Their revenues will not at first be large, and an important part of them will consist of assignments made from the general provincial funds; but it will doubtless be in the power of the boards to augment them to some extent by closer supervision of the management of the other sources of income enumerated; and, as they prove their fitness to administer the funds at their disposal, the Local Government will not be backward in increasing its assignments.

"The next point of importance in the Bill is that of control, and on this, I am happy to say, there is no necessity for me to dwell. The principle has been adopted by the Council in the Central Provinces Local Self-government Bill, and the reasons for insisting on it were urged by my hon'ble friends Messrs. Ilbert and Crosthwaite with unanswerable force in the debate on that measure. Their speeches are fresh in the ears of the Council.

"In this Bill the powers of control reserved to the Local Government are almost identical with those conferred upon the Chief Commissioner by the Central Provinces Act, with the exception that, in case of any single resolution, order or act of the committee being in excess of the powers conferred upon it by law, we enable the Commissioner of the Division and the Local Government to deal with such in the same manner as with proceedings likely to lead to a serious breach of the peace, or to cause serious injury or annoyance to the public or to any class or body of persons; *i.e.*, the Commissioner may in such a case suspend action, and, if he does so, must forward the order, with a statement of his reasons for making it, to the Local Government, which may thereupon rescind the order, or direct that it continue in force with or without modification, permanently or for such period as it thinks fit. I am aware that, under the general law of the land, [illegible] might be obtained by any person interested [illegible] powers; and it is no doubt, true that section 42 of the Bill enables the Local Government, with the previous approval of the Governor General in Council, to supersede a board if it exceed its powers; but recourse to a Court of law is not a remedy likely to command itself to an ignorant and apathetic population, and supersession is a penalty to which the Local Government would naturally wish to resort only as an extreme measure, and one the frequent application of which it would be reluctant to put in force.

"The last point with which I need trouble the Council refers to the provisions of section 50, which enable the Local Government to except a district or any part thereof from all or any of the provisions of this Bill to which it considers that they are unsuited. The North-Western Provinces and Oudh extend over an area of 100,111 square miles, nearly equal to, and contain a population of [illegible],000, far in excess of, that of the United Kingdom. They comprise 49 districts with a mean density of population per square mile, varying from 894 in [illegible] to 62 in Garhwal, inhabited by heterogeneous races characterised by [illegible] of customs and religions and habits of thought, and stages of civilization ranging from the learned and accomplished Pandits of Banáras and [illegible] of Lucknow to the boors of Bundelkhund, the wild tribes of the [illegible] and the barbarous Tharus of the Taráí.

"It is impossible to assume that for such various races any one form of [illegible] government will be equally suited or that intelligent non-official agency can be found in every district of these broad Provinces; and for exceptional cases of this nature sections 50, 51 and 52 are meant to provide. They do not [illegible] deprive the residents of all voice in the management of their affairs, and they require that even here district committees must be appointed; but, following the present law, they leave the nomination of members of such

committees altogether in the hands of Government, subject to the restriction that one-half shall be owners or occupiers of land or residents in the district; and they do not require, as elsewhere, the establishment of local boards. A similar power unaccompanied by the restriction I have pointed out is given to the Chief Commissioner by the Central Provinces Act."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India*, and in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES AND OUDH MUNICIPALITIES BILL.

The Hon'ble MR. QUINTON also moved for leave to introduce a Bill to make better provision for the Organization and Administration of Municipalities in the North-Western Provinces and Oudh. He said:—

"My Lord, I have the honour to move for leave to introduce a Bill to make better provision for the Organisation and Administration of Municipalities in North-Western Provinces and Oudh.

"Municipalities in these Provinces are at present constituted, and guided in the performance of their duties, by the provisions of Act XV of 1873. That enactment confers upon the Local Government very full powers as to the appointment of ordinary and *ex officio* members. It leaves to the Government to determine absolutely in the case of every municipality in the united Provinces whether the members shall be chosen by election or nominated by Government; and it further enables the Government to appoint as *ex officio* members one-third of the whole committee. The manner of election, where elections are allowed, is under the Act regulated solely by the Local Government, without any obligation of consulting the persons most concerned, and casual vacancies among the members are filled up by the same authority, or are not filled up at all, at its pleasure.

"Further, the Local Government may appoint the president or vice-president of every committee (section 10), and may unconditionally cancel, suspend or limit any of the proceedings, bye-laws or rules of the committees, and abolish (section 29) any tax imposed by them. Section 34 of Act XV of 1873 imposes on the municipality the duty of providing for the maintenance of a police-establishment *without any limitation*, the effect of which has been to throw on municipalities a larger portion of the cost of police maintained within municipal boundaries for the preservation of the peace and the prevention and detection of crime.

"The Resolution of the Government of the North-Western Provinces and Oudh, to which I have referred in my remarks on the Local Boards Bill, proposes an extension of local self-government in municipalities incompatible with these provisions of the present law, and this Bill has been drawn up to give effect to those proposals by substituting for Act XV of 1873 an enactment which will bestow upon the residents of areas in which it is in force a much larger measure of control over municipal administration than they now possess.

"The provisions of the Bill are the result of the same consultative and deliberative measures on the part of the Local Government as those which I have already described in my remarks on the Local Boards Bill. They are based on the inquiries of District and Divisional Officers, considered and weighed by the Provincial Committee, whose conclusions have been accepted with certain modifications by the Local Government.

"I proceed to notice some of the more important points of the Bill, premising that the substantive provisions of Act XV of 1873 have been rarely

departed from unless when it was necessary for the purpose of giving effect to the proposals of the Resolution of the 5th December, 1882, though opportunity has been taken to make the arrangement of the sections clearer, and to remedy what appeared to be defects in their wording.

"The first chapter, which is of a preliminary character and deals with the application of the Act to fresh places and to those in which Act XV of 1873 is already in force, need not detain us; but Chapter II, on the organisation of municipal boards, is of more importance. Municipal and local boards are to consist of members partly elected and partly nominated; and I need not repeat what I have already said when asking leave to introduce the Local Boards Bill as to the reasons for preferring this system to the more logically symmetrical one of election, pure and simple.

"The principal residents of the areas into which the Act is to be introduced are to be convened in public meeting by the Magistrate or the Deputy Commissioner, for the purpose of preparing and submitting within a definite time proposals for determining the system of representation and election to be established in the municipality. The points for their consideration are enumerated in section 9; and it is only after it has weighed the proposals of the residents on those points that the Local Government can exercise the power conferred upon it of making rules to regulate elections.

"The provisions for the term of office of members of the board, for their resignation and removal, for filling casual vacancies among them, for the incorporation of the boards and such matters are analogous to those of the Local Boards Bill, and call for no remarks from me on this occasion.

"The appointment of chairman is a subject which here also has given rise to considerable discussion. It must be borne in mind that, under the system of appointment of members introduced by this Act, the boards will no longer contain the strong *ex officio* element which has hitherto formed part of municipal committees, and that in the absence of this the appointment of an efficient chairman becomes a matter of the first importance. The Provincial Committee considered that it would be a mistake to insist on the universal chairmanship of the district officer, who has, they state, hitherto been always chairman of the board; but they went on to say "there is a strong feeling among those interested that in municipalities of the more important kind, where large funds are raised and spent, where the responsibilities are therefore onerous, and where there are considerable cantonment settlements, such as is the case in most of the larger municipalities in these Provinces, it is very necessary to have a thoroughly reliable president, vigilant, capable and unwearied in watching the great interests at stake, and that, so far as present experience goes, such a president can only be found in the person of the district officer. It was in this view that the Native members proposed that the district officer should be *ex officio* chairman of all municipal boards at the head-quarters of districts, leaving it to outlying municipalities to elect their own official or non-official chairmen as they pleased." The majority of the Committee, which included all the Native members, finally recommended that, except in certain cases to be specified by Government, in which the district officer should be *ex officio* chairman, every municipality should be permitted to elect its own chairman, who might be official or non-official, as the electors choose. This recommendation was accepted by the Lieutenant-Governor, and has been embodied in section 18 of the Bill, which allows of the election of any person as chairman, subject to the approval of the Local Government, except in municipalities exempted from the operation of this section by notification in the official Gazette.

"The rules for the appointment of vice-chairmen and for filling up casual vacancies in the offices of chairman and vice-chairman, for the appointment of joint committees, for the conduct of business, for the record of the board's proceedings, and the communication of those proceedings to the Magistrate of the district, are similar to those of the Local Boards Bill or to the present Municipal Act.

"Sections 33 and 34 give to municipal boards full powers as to the appointment of officers and servants, except the secretary, whose appointment, if an

outsider, is subject to the sanction of the Commissioner, and, if a Government servant, to that of Government. With boards consisting mainly of non-official members and presided over by a non-official chairman, the efficiency of their administration will depend very much on their possessing a capable secretary, and it is to provide an additional guarantee for this that the sanction of the Commissioner is required to the appointment. If the board wish for the services of a Government officer, they must, of course, obtain the sanction of Government to his being so employed.

"Chapter III—Taxation and municipal fund—is substantially the same as the corresponding sections of Act XV of 1873. The only addition made to the taxes leviable with the sanction of the local boards is a tax on boats moored within municipal limits, which seems to have been omitted by an oversight. The sections prescribing the procedure to be adopted in imposing taxes have been re-drafted and made, it is hoped, clearer.

"Chapter IV enumerates the powers and duties of municipal boards, and the opportunity has been taken of re-casting the provisions of Act XV on the subject, so as to exhibit the duties of the boards in their order of obligation.

"The primary charge on the municipal fund is a police-establishment. The law on this subject is very vague. Section 34 of Act XV of 1873 runs as follows:—

'Every committee shall provide in the first place from its funds, for the maintenance of the police-establishment in the municipality.

'The municipal police shall be appointed under such Act of the Governor General in Council as may be applicable to the town, and their number shall be fixed by the committee, in consultation with the Inspector-General of Police, subject to the final decision of the Local Government.'

"The effect of this section has been to throw upon municipalities the charges for police used not only for municipal purposes, but for the prevention and detection of crime. The conclusions of the Local Government on the subject are given in the 17th paragraph of the Resolution of the 5th of December, which runs as follows:—

'17. The first of the questions to be considered is the extent to which municipal funds may fairly be relieved of police-charges, and the method of adjusting the charges for which they are fairly liable. The question was discussed by the Provincial Committee, and the unanimous conclusion of the Committee is stated in the 27th paragraph of their report:—

'"The preservation of peace and the prosecution and detection of crime are duties for which municipal revenues can hardly be said to be fairly liable, as these duties seem to devolve more equitably on the central Government of the country than on the scattered municipal towns. But the cost of watch and ward, including under this term such additional duties of a miscellaneous kind (*e. g.*, the enforcement of sanitary rules and the regulation of intra-municipal traffic) as clearly appertain to municipal police, appears to be *the* one of all others that can with most fairness and propriety be debited to municipal funds, and paid for by the people whose interests and property are the immediate objects of the guardianship of the *chaukidári* force."

'The conclusion is supported by the analogy of small towns under Act XX of 1856 and of rural villages, where the watchmen are paid, not from the general revenues of the country, but from funds raised locally,—in the former by a house-tax levied for the purpose under the Act, in the latter by the local cess levied from landholders along with the land-revenue under Act III of 1878. The principle stated by the Committee appears incontrovertible. For since the inhabitants of small towns and landholders in villages, in accordance with the long-established custom and law of the country, are required to pay for the services of the watchmen who remain on watch at night, who report crime, and who are empowered to challenge and arrest thieves and persons carrying suspicious property within their beats, there is no reason why the inhabitants of the larger towns (in many of which Act XX of 1856 was formerly in force) should, merely through the transformation of the town into a municipality, be altogether exempted from the charge. It is true that many municipalities have, in addition to the legitimate cost for watch and ward, been required to share the cost of the Provincial police employed within their limits; but this arrangement, which is manifestly unfair, will be cancelled; and it now remains only to determine how the legitimate charge for watch and ward is to be computed and adjusted. In a few municipalities, the town watchmen as a distinct body have been abolished, their places being taken by regular police, who form one force, and are paid on the same scale, with the district police stationed within the municipality; while in the majority of the municipalities the town watchmen form a separate body, wear a distinctive uniform, and, not being liable for service outside their own town, are paid, like the watchmen, in small towns and villages, at lower rates than the regular police. The Lieutenant-Governor and Chief Commissioner prefers the latter system, because it marks off a separate body of men for municipal service; but he directs that the question be considered by municipal boards in consultation with the Magistrate of the district and the Inspector General of Police, and that each board be left to decide which system it will adopt.'

"These conclusions have been embodied in sections 44-48 of the Bill.

"The sections of Act XV of 1873 on nuisances have been re-cast so as to throw together all the provisions respecting the jurisdiction of the board, and to bring them into harmony with the Penal Code and the new Code of Criminal Procedure.

"The control sections in Chapter V are similar to those in the Local Boards Bill, and I need not weary the Council by repeating the reasons for their adoption. They fall short in some respects of the powers given by Act XV of 1873 to the Local Government, to cancel, suspend or limit any of the acts, proceedings, bye-laws or rules of any committee, but provide otherwise for the occurrence of default, excess or abuse of powers, as, *e.g.*, by the supersession of the board in certain extreme cases—a penalty to which existing municipalities are not legally liable.

"Ample powers are given to the Local Government under section 60 to frame forms and to make rules on matters connected with their business, to which the boards will be bound to adhere.

"Chapter VI contains provisions on miscellaneous matters taken generally from the existing Act.

"Chapter VII empowers the Local Government to exempt municipalities from the operation of the provisions of the Act respecting election. The reasons for this latter provision will be found in those diversities of race, habits, modes of thought and civilization which are to be found in the wide territories and vast populations under the sway of His Honour the Lieutenant-Governor and Chief Commissioner on which I have touched in my observations on the Local Boards Bill.

"Section 68 finally enables the Local Government to withdraw any local area, with the previous sanction of the Governor General in Council, from the operation of this Act or of Act XV of 1873. Experience has shown that the present Municipal Act has sometimes been put in force in small towns where there were no materials for local self-government, no intelligent non-official agency, and where municipal administration, with the taxation that necessarily follows in its train, was unpopular and uncalled for. It is not to be expected that such cases will not occasionally occur again, and changes of circumstances in the progress of years may, in respect of certain towns, bring about the same result. It is expedient to provide at once a remedy which may be legally applied when such conditions manifest themselves. The section has been framed with this object; but, as the withdrawal of a privilege once conferred is open to a more invidious construction than the withholding of that privilege in the first instance, the exercise of the power by the Local Government is made subject to the previous sanction of the Governor General in Council. By this limitation it is intended to secure for the proposal full consideration from more than one point of view."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India*, and in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 17th May, 1883.

ABSRTACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC. CAP. 67.

The Council met at Government House, Simla, on Thursday, the 17th May, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble J. W. Quinton.

NORTH-WESTERN PROVINCES AND OUDH LOCAL BOARDS BILL.

The Hon'ble MR. QUINTON moved that the Bill to provide for the constitution of Local Boards in the North-Western Provinces and Oudh be referred to a Select Committee consisting of Major the Hon'ble E. Baring, the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Mr. Hunter and the Mover.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES AND OUDH MUNICIPALITIES BILL.

2. The Hon'ble MR. QUINTON also moved that the Bill to make better provision for the Organization and Administration of Municipalities in the North-Western Provinces and Oudh be referred to a Select Committee consisting of Major the Hon'ble E. Baring, the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Mr. Hunter and the Mover.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 24th May, 1883.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15th MAY 1883.

GENERAL REMARKS.—Good rain has fallen in some districts of the Madras Presidency, and in Travancore it has been excessive. There has been rain also in nearly all districts of the Mysore State and Coorg and British Burma. In the Bombay Presidency rain is reported from the Southern Mahratta Country, and in the Bengal Presidency from several districts. Elsewhere there has been no rain to report. No report has been received from Assam for the week under notice.

Harvest operations are still in progress in some provinces, as for instance in parts of Bengal, where the reaping of the spring rice and millet is in hand; in the Punjab, where the *rabi* harvest is yielding a good outturn; in parts of the North-Western Provinces and Oudh; in the Madras Presidency, where the reaping of certain crops is giving an average yield; and in the Mysore State, where the harvest of paddy is still in progress. Standing crops are said to be good or fair in the Madras Presidency; good in the Mysore State; and improved in parts of Bengal by the recent rainfall. In the North-Western Provinces and Oudh, the Bombay Presidency, and Central Provinces sugarcane is coming up well; and in Coorg the prospects of the coffee and cardamom crops have been improved by the late rain.

Ploughing and sowing are progressing in parts of the Bombay Presidency, in Bengal, and in the Nizam's territories. In the Bombay Presidency, in the North-Western Provinces and Oudh, in the Central Provinces, and in Berar preparation of land for the *kharif* crops is in hand.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 16th)		
Bellary ...	·8 (average of four stations).	Standing crops good; harvest sugarcane, yield average.
Kurnool ...	.....	Standing crops good; harvest second crop paddy, yield twelve annas; small-pox and cattle-disease continue in parts, latter more general.
Ganjam ...	·4	Standing crops cotton and *ragi* thriving; fever, small-pox, and cholera continue, the last in parts; cattle-disease slight.
Kistna ...	.....	Standing crops good; harvest later maize, onions, and castor; small-pox throughout district; guinea-worm and cattle-disease in parts.
Chingleput (Madras) ...	.....	Standing crops good where water available; harvest paddy, &c., yield half; small-pox and cattle-disease in parts.
Coimbatore ...	·9 (average of eleven stations).	Standing crops good; harvest paddy one taluk, outturn above average; fever, small-pox, and cattle-disease continue in parts, but all subsiding.
Tanjore ...	·46 (average of ten stations).	Standing crops good; harvest *cholum* and gingelly seeds, outturn below average; cholera continues in parts.
Madura ...	3·35 (average of eight stations).	Standing crops fair; harvest paddy in parts; cholera in parts.
Malabar ...	2·22 (average of fourteen stations).	First crop continues in several taluks, third crop progressing in parts; fever and small-pox continue, latter in all taluks.
Travancore ...	19·03	Agricultural operations impeded by excessive rain; fever and small-pox prevail to some extent.
		General Remarks.—No rain in Kurnool, Kistna, and Chingleput; general prospects good.
Bombay—(May 16th)		
Kurrachee ...	.....	Small-pox prevalent only in Bagdadi lines, Kurrachee, 11 patients remaining sick on 12th, 4 fresh cases, no deaths since 6th to 12th May, total to latter date 478 cases, 119 deaths; disease also in seven villages in districts, 15 fresh cases, 1 death, 21 remaining sick; fever in five talukas; cattle-disease in two; river at Kotri on 14th 8⅗ feet, against 7⅕ feet on same date last year; wheat, red rice, and *bajri* in Kurrachee 26, 32 and 36, in Kotri 32, 30 and 40, in Tatta 24, 32 and 40, and in Sujawal 16, 34 and 40 lbs. per rupee respectively.
Hyderabad ...	.....	Threshing of *rabi* crops still continues; *kharif* operations in progress; small-pox in six, fever in three, and cattle-disease in four talukas; wheat 24, *bajri* 39, *juari* 48, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ..	.....	Manuring operations continue; public health good; wheat 27 and *bajri* 30 lbs. per rupee.
Baroda ...	.....	Sugarcane in good condition; small-pox abated in Baroda; *bajri* 29 and common rice 24½ lbs. per rupee.
Surat ...	.....	Preparations for *kharif* continue; small-pox in Surat abating, average death 1; *juari* 42 and *nagli* 49 lbs. per rupee.
Násik ...	.....	Cholera in all talukas except Nandgaon, bad in Násik and Dindori, few cases in other talukas, total deaths 260; wheat 28¼, *bajri* 33¼, and rice 25 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	.....	Average abnormal temperature *nil* from 9th to 12th, afterwards 1° warm; vapour in air slightly in excess of normal; abnormal wind northerly on 9th and 10th, afterwards southerly.
Poona ...	.....	Cholera throughout district, 256 cases, 136 fatal; *bajri* 30 and *juari* 48 lbs. per rupee, in Poona *bajri* 37 and *juari* 43 lbs. per rupee.
Ahmednagar ...	.....	Threshing of *rabi* crops completed; preparation of land for the next season in progress; cattle-disease in Parner taluka; 79 deaths from cholera in Parner, 7 in Shrigonda, 21 in Sheogaon, 4 in Newasa, 7 in Kopargaon, and 1 in Sangamner; *juari*—maximum 72 lbs. per rupee in Jamkhed, minimum 48 lbs. in Kopargaon; *bajri*—maximum 60 lbs. per rupee in Jamkhed, minimum 39 lbs. in Kopargaon.
Sholapur ...	.....	Cholera in 32 villages in the district, out of 211 cases 68 fatal, none in Sholapur city; *juari* 60 and *bajri* 52 lbs. per rupee.
Dharwar ...	Rain in all talukas except Bankapur and Kalghatgi; above 1·0 in Mugad and Kod; slight in others.	Late crops harvest completed; ground being prepared for early crops; scarcity of drinking-water in petta Nargund; locusts in Dharwar taluka; rice minimum 24 and *juari* 47 lbs. per rupee.
Kanara ...	Rain at Kumpta, 1·30; Sirsi, 1·33; Hallial, 1·27.	Preparing ground and sowing seed for monsoon crops; small-pox in three and fever in two talukas; common rice in Karwar 12½ seers per rupee, in district average 14 seers; weather hot.
Rajkot ...	.....	General health good; weather hot; cholera continues in Ambaran, Und, and Navanagar; measles in Rajkot; small-pox in Junagad State and in some of the Sangad thana villages; *bajri* 31 and *juari* 35 lbs. per rupee.
		General Remarks.—Slight rain in Southern Mahratta Country; scarcity of drinking-water in parts of taluka Nargund in the Dharwar district continues; preparations for *kharif* in progress; locusts in Tanna, Ratnagiri, Satara, and Belgaum; cholera in Násik, Khandesh, Ahmednagar, Poona, Sholapur, Satara, and Tanna; small-pox, fever, and cattle-disease in a few districts.
Bengal—**(May 16th)**		
Chittagong ...	9·53	Weather stormy; rainfall unusual for the season; lands being prepared in some places for *aus* crop; mango and other spring crops much injured; prices somewhat risen; cholera and cattle-disease still reported.
Dacca ...	·54	Harvesting of *boro* paddy and *cheena* going on; sowing of rice continues; sudden rise of water has injured prospects of future crops in low lands of two stations.
24-Pergunnahs (Calcutta)	.....	Lands being prepared for *amun* paddy; early rice and jute being sown and sugarcane being planted; price of common rice stationary; public health generally good.
Moorshedabad ...	·08	More rain wanted for ploughing and sowing of *bhadoi* crop in some places; sowings have commenced; health generally good, except cholera in thanas Bhugwangola and Manulla bazar.
Rajshahye ...	.....	Weather at Rampore sultry; more rain wanted in parts; preparation for crops going on.
Burdwan ...	·01; elsewhere *nil*	Rain much wanted; general health fair.
Rungpore ...	·68	Prospects of crops good; cases of cholera reported from here and there.
Bhagálpur ...	.....	Prospects good, more rain wanted for young paddy; public health improving.
Purneah ...	·54	Late sown paddy doing very well, sunshine required for weeding; a little cholera and small-pox reported; public health fair; river Kosi rising.
Patna ...	.....	Strong east wind prevailing, *cheena* and sugarcane growing well; collection of cotton and castor in progress; a few cases of cholera reported from Barrh sub-division.
Durbhunga ...	·28	Weather cool and cloudy, with steady east wind; prospects of crops good; prices stationary; small-pox and cholera reported.
Hazáribágh ...	.....	Weather too hot and sultry for the season; no crops on the ground; cholera and small-pox cases still reported, but general health good.
Cuttack ...	.....	Weather very hot, atmosphere cloudy in morning; want of rain much felt; public health generally good.
		General Remarks.—The late rain has been generally very beneficial in Chittagong and parts of Mymensingh; it was excessive and caused much injury to spring crops; cultivation of autumn crops is going on apace throughout Bengal proper, but elsewhere it is for the most part retarded for want of adequate rain; harvesting of *boro* paddy still proceeding, and that of *cheena* (millet) has commenced; prospects of indigo crop in Behar have improved; cholera continues to be reported from several districts; small-pox still lingers in parts of Chota Nagpore and Patna divisions; there is fever in Nuddea and in two or three other districts.
N. W. Provinces and Oudh—		
Benares (May 15th)	No rain	Weather very warm; no sickness among men or cattle; pirces steady; bazars well supplied.
Allahabad („ 16th)	.....	Weather very hot and sultry; slight small-pox and local cholera; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Gorakhpur (May 14th)	.....	Weather fine; harvest nearly completed, outturn average; health fair; some cattle-disease; prices steady.
Jhánsi („ „)	.....	Weather very hot; harvesting over; prices fluctuating; health of people good, but small-pox still lingers; cattle-disease continues.
Agra („ 15th)	No rain	*Rabi* harvesting continues; fever in four and small-pox in five parganas; sporadic cholera in three parganas; prices stationary.
Bareilly („ „)	No rain	Harvest operations finished; prices almost stationary; general health good, with occasional exceptions.
Meerut („ „)	.....	Weather seasonable; health good; prices steady.
Kumaun („ „)	No rain	Weather warm; wheat almost cut; *kharif* operations require rain; general health good; prices same as last week; cattle-disease continues.
Lucknow („ „)	No rain	Intense heat, east winds; *rabi* harvesting completed; general health good on the whole; occasional reports of cholera.
Partabgarh („ „)	.....	Prices steady; sugarcane coming on fairly; weather hot and steaming; general health good.
Sitapur („ „)	.....	Grain nearly all stored; small-pox abating; a few cases of cholera in Biswar.
Fyzabad („ „)	No rain	*Rabi* all harvested; some small-pox still prevalent; cholera decreasing.
Rae Bareli („ 14th)	.....	Weather seasonable; cholera in a few villages and small-pox in two tahsils; prices stationary.
Cawnpore („ 15th)	No rain	Small-pox diminished in town but extending to district; *rabi* crops harvested; cattle-disease reported in four parganas; prices stationary.
Farukhabad („ „)	.....	Hot winds on most days; health of people good, but small-pox is still reported; markets well supplied; prices steady.
		General Remarks.—The weather has been hot and dry throughout the week; the general health is good, but slight cholera is reported from Fyzabad, Lucknow, Allahabad, Rae Bareli, Sitapur, and Agra; a few districts also report fever and small-pox; prices are generally stationary.
Punjab—**(May 15th)**		
Delhi ...	.....	Health fair; a few cases of cholera; harvesting completed; prices steady.
Hissar ...	.....	Weather seasonable; health good; harvesting continues; prices stationary.
Umballa ...	.....	Health fair; harvesting nearly finished, yield reported to be below the average; prices stationary.
Jullundur ...	.....	Health good; wheat being winnowed; prices slightly falling.
Amritsar ...	.....	Health good; wheat being winnowed; prices slightly rising.
Lahore ...	.....	Health good; prices stationary.
Ferozepore ...	.....	Health good; crops being cut; prices steady.
Sialkot ...	.....	Health fair; crops being threshed; prices stationary.
Rawalpindi ...	.....	Slight fever in Kahuta tahsil; crops above the average; prices falling.
Mooltan ...	.....	Health good; harvesting continues; prices steady.
Dera Ismail Khan ...	.....	Health good; harvesting in progress; prices stationary.
Peshawar ...	.....	Strong winds have caused great damage to fruit trees and standing crops; health good; prices steady.
		General Remarks.—No rain reported; health and harvest prospects generally good.
Central Provinces—		
Nagpur (May 16th)	.....	Cloudy and sultry; land being prepared for *kharif* sowings; small-pox continues; prices slightly risen.
Jubbulpore („ 15th)	.....	Weather very warm; threshing and winnowing continue, outturn very good; small-pox continues; 6 deaths from cholera; wheat 22 and rice 16 seers per rupee.
Saugor („ 14th)	.....	Weather very warm and occasionally cloudy; winnowing continues; prices easy.
Seoni ...	.....	Weather very hot; 1 death from cholera in town; prices stationary.
Hoshangabad ...	.....	Weather seasonable; winnowing continues; ploughing for *kharif* sowing in progress; 3 deaths from small-pox; wheat 15 and rice 10 seers per rupee.
Khandwa ...	.....	Weather hot; preparations for *kharif* sowings continue; 16 deaths from small-pox; wheat 16, *juari* 20, and rice 16 seers per rupee.
Raipur ...	.....	No report received.
Sambalpur (May 10th)	.....	Weather intensely hot; sugarcane thriving; health good; common rice 56 seers per rupee.
		General Remarks.—Weather hot and close; land being prepared for *kharif* sowing; threshing and winnowing continue in some districts; cholera slight in a few districts; small-pox in some districts; prices easy.
British Burma— **(May 5th)**		
Akyab ...	2·26	Rainfall to date 6·14; 4 deaths in town and 32 in district from cholera; public health good; cattle-disease in two townships.
Rangoon ...	1·2	Rainfall to date 4·65; 3 deaths from small-pox, otherwise public health good; price of paddy from Rs. 90 to Rs. 109 per 100 baskets, with a downward tendency.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Bassein ...	*Nil*	Rainfall to date 15·0; 1 death from small-pox in Bassein town, otherwise public health good.
Prome ...	·64	Rainfall to date 1·16; public health good.
Amherst (Moulmein) ...	3·52	Rainfall to date 6·21; public health in Moulmein and district good; severe cattle-disease in Yaglamaing, and 244 deaths of cattle in Wagaroo township.
Toungoo ...	·61	Rainfall to date 5·17; 1 death from small-pox in town, otherwise public health good.
		General Remarks.—Cholera still prevailing in Akyáb, elsewhere public health good; cattle-disease severe in Amherst district; price of paddy continues very high compared with last year; supplies of paddy at Rangoon from interior not so large as expected; weather very hot.
Mysore and Coorg—(May 16th)		
Bangalore ...	·23	Standing crops in good condition; *vysakh* paddy being harvested; prospects good.
Mysore ...	·44	Standing crops in good condition; prospects favourable.
Mercara ...	·09	*Vysakh* rice crop ready for sickle in Surlabimut-nad; sowing of paddy commenced in Zelsavershime and *ragi* in Nanjarajapatna taluk; weather favourable to coffee and cardamom crops; small-pox prevalent in Gadinad and fever in Mercara taluk; prices of food-grains rising slightly.
		General Remarks.—Rain more or less in all districts except Kolar; standing crops in good condition; prospects of season favourable; public health generally good; no material change in prices.
Berar & Hyderabad—(May 16th)		
Amráoti ...	.....	Weather hot; ploughing operations in progress; wheat 16 and *juari* 26 seers per rupee.
Akola ...	.....	Preparations for *kharif* sowings continue; weather hot.
Hyderabad ...	.....	Reaping of *rabi* crops continues; ground being prepared for next season's crops; cholera and small-pox still prevail; prices—wheat 16¾, coarse rice 10, white *juari* 24, yellow *juari* 28, and *tur* 25 seers per current sicca rupee.
Central India States—(May 16th)		
Indore ...	.....	Weather seasonable; there are signs of an early monsoon; health good.
Morar (Gwalior) ...	.....	Health good; heat intense; small-pox still in Gwalior.
Sutna ...	.....	Health good; weather seasonable.
Rutlam ...	.....	No report received.
Neemuch ...	No rain	Weather very hot; high winds; public health good.
Goona ...	.....	Weather very warm; health good.
Bhopal ...	.....	Weather hot and seasonable; crops good; public health good.
Agar ...	No rain	Weather seasonable; high winds; public health good.
Nowgong ...	.....	Weather excessively hot and sultry; public health good.
Manpur ...	No rain	Health good; prices stationary.
Rajputana—		
Abu (May 16th)	.....	Weather windy, but hotter.
Sirohi („ 13th)	.....	Wells fairly full; health good; small-pox in some villages; weather hot; hot winds beginning to blow.
Marwar („ 11th)	.....	Tanks all empty; water obtained from wells with difficulty; health good, but fever and small-pox still prevail; heat very intense and almost unbearable; hot winds blowing; prices stationary; crops almost harvested.
Meywar („ „)	.....	Wells and tanks fair; health good; crops harvested; barometer going down; strong winds.
Harowti („ 12th)	.....	High westerly winds; health good.
Jhallawar („ 9th)	.....	Westerly winds; nights cool; health good.
Ajmere („ 15th)	.....	Weather seasonable; health good.
Jeypore („ „)	.....	Weather seasonable; prices steady; health good.
Ulwur („ „)	.....	Wells low; health good; cholera decreasing.
Nepal—(May 10th)		
Katmandu ...	2·28	Prospects good; weather seasonable.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EDUCATION OF EUROPEAN AND EURASIAN CHILDREN IN INDIA.

No. $\frac{5}{182-191}$.

Extract from the Proceedings of the Government of India, in the Home Department (Education),—under date Simla, the 18th May 1883.

Read again—

Home Department Resolution Nos. 2—56-66, dated the 8th February 1883, on the subject of European and Eurasian education in the Bengal Presidency.

Read also—

Letter from the Government of Bengal, No. 77, dated the 17th April 1883, and enclosure, on the subject of the exclusion of the University Entrance Examination from the schedule of standards for European and Eurasian high schools.

RESOLUTION.

In paragraph 13 of the Resolution read in the preamble, the Government of India approved the proposals of the Committee appointed to draft a Code of regulations for the conduct of European education in the Bengal Presidency, regarding the standards of examination for European and Eurasian schools, except in the case of the final standard for high schools. It was observed:—

The University Entrance Examination is admittedly not a proper standard for schools of this class, and the Government of India direct that it be excluded from the schedule of standards of examination and from Article 27 of the Rules. The final standard for high schools will be that shown as Standard B in the Code submitted by the Committee.

2. Two of the members of the Committee have now represented through the Government of Bengal the practical inconvenience which in their opinion must result from the total exclusion, under the orders quoted of the University Matriculation Examination from the schedule of standards for high schools. After a careful reconsideration of the subject, the Governor General in Council, while holding to the opinion that the University standard examination is ill-adapted to regulate or to test the kind of education which the Government of India wish to see imparted to the class of lads on whose behalf the Government is contemplating additional expenditure of public funds, thinks that considerable weight attaches to the arguments now adduced. His Excellency in Council has accordingly determined to include in the schedule of standards for high schools, as an alternative final Standard A, the University Matriculation Examination supplemented so as to equalize it with the standard prescribed in the former Resolution, which will now become Standard B. The subjects which it has been decided to prescribe, under the alternative Standard A, in supplement of those required by the University Matriculation Examination, are shown in the amended schedule attached to this Resolution.

3. His Excellency in Council has been further pleased to make certain modifications in Article 27 of the Code regarding the payment of instruction grants to managers of schools for pupils passing the final examination by either standard as now prescribed. Articles 26 and 61 of the Code have also been amended so as to conform with the orders contained in this Resolution.

4. Articles 26, 27 and 61 as revised, and the standards of the final examination for high schools as now settled, are appended to this Resolution for information and guidance.

5. It may be necessary hereafter to amend the standard of final examination in the case of pupil teachers so as to bring it into closer correspondence with the final standard for high schools; but for the present, as it is desirable to encourage candidates for teacherships to come forward, no change will be made in Schedule II.

ORDER.—Ordered, that this Resolution, together with the amended Articles and Standards of examination, be forwarded to all Local Governments and Administrations in the Bengal Presidency; to the Public Works Department, and to the Foreign Department for information and communication to the Chief Commissioner of Ajmere and the Agent, Governor General, Central India.

Ordered also, that the Resolution and its enclosures be published in the Supplement to the *Gazette of India*.

Revised Articles 26, 27 and 61 of the draft Code of Regulations for European schools as finally accepted by the Government of India; and revised Schedule I—Final examination for high schools.

26. Scholars in high schools, who have attended 250 full school meetings after passing by Standard VII, may be presented for examination by either of the alternative Standards A and B of Schedule I. The examination in Standard B will be held at the times and places indicated in Chapter VII for the scholarship examination.

27. For scholars passing by either standard, the managers may claim the following instruction grants :—

(*a*) In Standard A—

(1) Rs. 75 for every scholar passing the University Matriculation Examination in three subjects.

(2) Rs. 100 for every scholar passing the University Matriculation Examination in the third division.

(3) Rs. 120 for every scholar passing the University Matriculation Examination in the second division.

(4) Rs. 150 for every scholar passing the University Matriculation Examination in the first division.

(5) Rs. 25 for each pass in the additional subjects in English, in the additional subjects in mathematics, or in an optional subject.

(*b*) In Standard B—

(1) Rs. 80 for every scholar passing in three subjects.

(2) Rs. 120 for every scholar passing in four subjects.

(3) Rs. 160 for every scholar passing in all subjects.

(4) Rs. 25 for each pass in an optional subject.

No grant can be claimed for additional or optional subjects under either Standard A or B for any scholar who fails in the first case (A) to pass the Matriculation Examination and in the second (B) to earn a grant in the compulsory subjects.

61. Anyone who without having served an engagement as a pupil teacher has completed his 17th year, and has passed by either of the final Standards of examination for high schools in Schedule I may, on the recommendation of the Inspector, receive a provisional third grade certificate. After three years' service with credit his certificate shall be made permanent.

SCHEDULE I.

STANDARDS OF EXAMINATION (HIGH).

(Final Examination.)

STANDARD A.	STANDARD B.	
For boys and girls.	For boys only.	For girls only.
Compulsory subjects.		
1. English.—The University matriculation standard, with the addition of a manual of English literature and one of the historical plays of Shakspeare. (The play to be selected by the Department.)	1. English.—The matriculation standard, with the addition of a manual of English literature.	1. The same.
2. Second language. The matriculation standard.	2. French *or* German.	2. The same.
3. Mathematics.—The matriculation standard, enlarged so as to comprise the whole of arithmetic, algebra up to quadratic equations, and the 6th book of Euclid.	3. Arithmetic and Book-keeping.	3. Arithmetic.
4. History and geography.—The matriculation standard.	4. Mathematics.—Algebra up to quadratic equations; Wilson's Geometry, Books I—V (new edition); Mensuration.	4. Elementary Physics, or a third language (French *or* German).
	5. Political Economy. Commercial Geography.	5. A General sketch of European History. General and Physical Geography.
Optional subjects.		
5. French, German, or an Indian vernacular (unless taken up for matriculation).	6. Mechanical Drawing ...	6. Freehand Drawing.
6. Elementary Physics.	7. Elementary Physics ...	7. Music (as in the final examination for pupil teachers, Schedule II).
7. Elementary Chemistry.	8. Elementary Chemistry ...	8. Botany.

A. MACKENZIE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

REPORTS ON THE RECONNAISSANCE FOR A RAILWAY BETWEEN BILASPORE AND SAUGOR, WITH EXTENSION TO JUNCTION ON THE PROPOSED FUTURE BHOPAL-JHANSI RAILWAY.

No. 445 R.C., dated 18th May 1883.

ORDER—By the Government of India, Public Works Department.

Read the following papers :—

(I) Report by Mr. W. G. Newton, Assistant Engineer, on reconnaissance from Bilaspore to Sohagpore.

(II) Report by Mr. A. Penny, Engineer-in-Chief, Saugor-Katni-Bilaspore Railway Survey, on projected line between Kutnee, Umaria and Sohagpore.

(III) Report by Mr. H. Groves, Executive Engineer, on a reconnaissance from Katni *viâ* Damoh to Saugor.

(IV) Report by Mr. H. C. D. La Touche, Engineer-in-Chief, Bundelkhund Railway Survey, on projected line from Saugor to junction with Bhopal-Jhansi Railway.

(V) Abstract of the above Reports, briefly supplemented from other sources.

ORDER.—Ordered, that the above Abstract be published in the Supplement to the *Gazette of India* for information.

Proposed Railway on the 5′ 6″ gauge from Belaspore (in the Central Provinces) to Etawah or a junction point with the future line from Bhopal to Jhansi crossing the East Indian Railway at Katni and running through the Umaria coal-fields and Damoh and Saugor.

The whole length of 352½ miles is for convenience divided into four sections :—

1. Belaspore to Sohagpore, 120 miles.
2. Sohagpore to Katni, 76½ miles.
3. Katni to Saugor, 113 miles.
4. Saugor to junction with Bhopal-Jhansi line, 43 miles.

Section I.
Belaspore to Sohagpore. Length 120 miles.

Starting from Belaspore the line, as at present selected, runs north-north-west up the west bank of the Arpa river. For the first 17 miles the country is well cultivated, the ground rises slightly, and the work of construction will be very light. On the 15th mile a stream called the Samber is crossed, involving a bridge of one 60-feet span. From the 17th to the 22nd mile the line runs through flat rice land, the work being still very light.

From the 23rd to the 30th mile the country is rough and uncultivated, and a good many nullahs have to be crossed.

From the 31st to the 40th mile the line again runs through flat rice land, and the work will be light.

On the 41st mile the Saugor nullah will have to be crossed by a bridge of three 60-feet spans. The approximate height of the line on this mile is about 1,200 feet above sea level, and the country thence rises abruptly to an elevation of about 2,000 feet at mile 55. The Mykal range which borders the Rewah plateau must be crossed at Kusumkhera, which is 300 feet lower than the adjacent hills. Kusumkhera is, however, but 7½ miles distant in a straight line

from the foot of the ascent on the 41st mile, thus necessitating a rise of 66 feet per mile.

If the contour of the hills be followed, the grade might be kept down to 1 in 100 or lighter, but this of course could be done only at the expense of extra mileage.

On this ghât ascent the work will be heavy. Some 6 spans of 60 feet are required to cross the numerous nullahs, besides smaller bridges. From the 53rd mile the work will be much lighter, rise averaging 1 in 132 for the next 8 miles till the line reaches the watershed ridge at the 61st mile.

The country now falls steadily towards Sohagpore, the descent being 425 feet in about 30 miles; the grade in the first 4½ miles is 1 in 150, and of the remaining portions the grades are 1 in 400 and 1 in 550.

From the 63rd to the 76th mile the line will run along the watershed between the Tipan and Alan rivers, and the work will be very light.

In the 77th mile the line crosses the Tipan just above its junction with the Alan. It continues on the north-east bank of the Tipan to the 92nd mile, where it re-crosses that river by a bridge of 6 spans of 60 feet on good rock foundation. This line involves less bridging than one keeping on the south-west bank of the Tipan crossing the Alan on the 76th mile, as there are many nullahs running down from the hills on the west. From the 93rd mile on to near Sohagpore (120 miles) the country is slightly undulating and rather less cultivated. On the 110th mile the Serpa river requires a bridge of four 60 feet spans on excellent foundations.

The stations proposed for this length are—

		At mile
	Bilaspore	0
*	Ghûtka	7½
	Ruttumpore Road	15½
*	Salka	23½
	Atarda	31½
	Khongsara	39½
	Aujnai nullah	46½
	Kusumkhera	53
	Pendra	62
*	Harri	68½
	Khairi	75
*	Jaithari	83½
	Anukpore	92½
*	Deohara	98½
	Burhar	105
*	Udhia	112½
	Sohagpore	120

The major bridging for this 120 miles of line is expected to consist of—

25 spans 60 feet.
14 „ 40 „
4 „ 30 „
3 „ 20 „

The minor bridging has not been estimated in detail, but it will probably be heavy compared with other items of construction.

Section II.
Sohagpore to Katni. Length, 76½ miles.

Almost directly after leaving Sohagpore the line will cross the Moorna nullah by 4 spans of 40 feet, and three miles further on the Basar nullah with 4 spans of 20 feet. At 12½ miles from Sohagpore the crest of the Moorcha Pass is reached. The descent for 3½ miles will not exceed 1 in 123, and in no part does it appear probable that it need be greater than 1 in 100. Fairly easy curves are obtainable, and the average bank and cutting through the Pass may be taken at 6 feet.

* These stations would not at first be used, but would be opened by degrees as the traffic increased.

From the 16th to the 20th mile at Pali there is swampy ground. The average height of bank over this may be taken at 4 feet. And the major bridging will include 2 spans of 40 and 3 of 20 feet.

From the 20th to the 32nd mile (Karheli) not more than $1\frac{1}{2}$ feet of bank is needed, except at the approaches to culverts. For the next 6 miles the line passes over practically level plain to Kalesar ($38\frac{1}{2}$), the first half being covered with jungle, and the second being rich black cotton soil. The bank will average some 2 feet only. The first stream met with is the Johilla river, requiring at least 5 spans of 60 feet each; its bed is stony and firm.

A coal-field prospected by Mr. Hughes, of the Geological Survey Department in 1882, lies near this river, and to work it, it would seem desirable to construct a branch line 3 miles long leaving the main line on the west bank of the Johilla. A short distance beyond the Johilla the line has also to cross the Goorchatt nullah (three 60-feet spans) and further on the Dongahar nullah by one 40 feet span.

Around the villages Umaria and Kalesar lies another valuable coal-field, which might readily be opened out as soon as this Railway is constructed.

From the 40th to the 43rd mile the country is very rough, and an average of 8 feet of bank or cutting is provided for, and two nullahs have to be crossed probably by bridges of 3 spans 40 and 1 span 60 feet.

From 43rd to 53rd mile there is a tolerably even plain, with a falling grade of 1 in 211, requiring no major bridges and but two feet of bank on the average.

At the 53rd mile the Mahanuddi is reached, and a very good crossing for this large river has been found.

Beyond the Mahanuddi the line passes out of the Rewah State, and continues descending with a low bank and only three or four small bridges (40 feet span) to Rupondh, where there is good ground for a crossing station on the 64th mile.

Another 13 miles and Katni on the East Indian Railway is reached, the last length entailing only light bank, from 1 to 3 feet high, and 5 bridges varying from 30 to 120 feet of waterway apiece in small spans.

The junction with the East Indian Railway is at the south-east end of the present station, and will be by a curve of 1,850 feet radius.

It is proposed to place stations at the following sites on this section—

		At mile
	Ghoongootee	... $9\frac{1}{2}$
	Pali	... $20\frac{1}{2}$
*	Barhi	... 30
	Kalesar	... $38\frac{1}{2}$
*	Lora	... $45\frac{1}{2}$
	Chandia	... $51\frac{1}{2}$
	Barwara	... $63\frac{1}{2}$
	Katni	... $76\frac{1}{2}$

The total major bridging on the length from Sohagpore to Katni is taken at—

3	spans of	95 feet.
9	„	60 „
16	„	40 „
25	„	20 „

Section III.
Katni to Saugor. Length, 113 miles.
Height above mean sea level, 1,200 feet.

Katni is left with a curve of 1 mile radius on a falling gradient of 1 in 350; on the second mile the Katni river must be crossed by a bridge of 5 spans of 40 feet. Running on north-west the

* These stations will not at first be required.

Height, 1,280 feet.

watershed between the confluents of the Son and the Ken rivers is reached in the 5th mile. The line then descends past Choonchta through a gap in the

1,230 feet.

Ameerpat ridge, and turns due west to the crossing of the Aloonee river, north of Koondoo at $7\frac{2}{3}$ miles. This bridge will be 4 spans of 40 feet. At $8\frac{3}{4}$ miles the line passes closely to the north of the village of Hardua.

From $9\frac{1}{2}$ to $12\frac{1}{2}$ miles spurs of the Bharair range are crossed, involving light rock cuttings, the material of which will serve admirably for bridging.

At the 19th mile the summit level between the Aloonee and Patna rivers

1,420 feet.

is reached. The line then passes on between Umeria and Mohas south of Bhar-

1,310 feet.

tolla. At $27\frac{1}{4}$ miles the Bhooraina nullah requires 1 span of 60 feet. At 28 miles the line reaches the Patna river, which will be crossed by three spans of 60 feet.

The line now enters the Native State of Pannah at $29\frac{1}{4}$ miles, and rises easily

1,430 feet.

at 31 miles to the summit level between the Patna and Padri rivers, descending to cross the Basata branch of the former at $32\frac{1}{4}$ miles (1 span 60 feet). At $34\frac{1}{2}$ miles the crest of the Bharair range is reached, 1,410 feet above mean sea level. Changing its direction from almost due west to almost due south, the line must here ghaut sharply down the west slope of the range into the valley of the Padri. A drop of 360 feet in $7\frac{1}{2}$ miles (average 1 in 110). The Pannah State is left and the Damoh district of the Central Provinces is entered at Jamoon Chowk at 38 miles.

The $7\frac{1}{2}$ miles from $34\frac{1}{2}$ to 41 are the critical parts of the whole section, and

1,206 feet.

it is possible that an alternative alignment may be hereafter adopted. The work on the line as now proposed will be very heavy, involving 10 feet average **cutting, mostly in sandstone boulders and rock, crossing six ravines, of which two have beds 70 and 140 feet respectively below formation level.**

From Jamoon Chowk the line will continue falling with a gradient of 1 in 100, but with easy curves along the spur, to a low gap or saddle therein near $39\frac{1}{2}$ miles, where a short embankment of 57 feet maximum at 30 feet average depth will be required.

The ghaut incline ceases north of Mopans at 41 miles. At $41\frac{7}{8}$ miles the

1,050 feet.

line arrives at the Padri river (3 spans 40 feet). The line passes on north of

1,160 feet.

Patna, Koomharee and Padri to an obvious tie point at 45 miles, at a saddle in ridge between the Padri river and Chapoor Branch.

At $46\frac{7}{8}$ miles the head of a short ghaut is turned, the line continuing at the ruling gradient and curve down a ravine to Deoree Choti at 48 miles, in order to overcome an abrupt and unavoidable drop of 120 feet in the country in immediate descent to the east bank of the Bearmi river. This ghaut will involve about $\frac{1}{2}$ a mile of rock cutting and ravine work, about 10 feet on an average. From Deoree Choti the line runs south-westerly, and arrives at $49\frac{3}{4}$ at the Sej nullah, requiring two spans of 40 feet. It then passes south of Guriya and along a narrow gorge of the Bearmi river, crossing the Raxa nullah at $51\frac{1}{2}$ miles (north of Ghutera), whence it curves westerly and crosses, at $52\frac{1}{2}$ miles, the

1,040 feet.

Bearmi river, the lowest point in the whole line (1,040) at a capital bridge site requiring 15 spans of 60 feet.

It now runs up easily through a low saddle at $55\frac{1}{2}$ miles near Bandee, then on south of Bilthura to north of Bamhor-Goonjee at 58th mile, where the Saugor black soil plains commence. At 66 miles Damoh is reached, and the line runs on over easy but monotonously undulating fertile black soil plains north of Hirdapur and Khoorassa, and south of Puduria, and at $72\frac{3}{4}$ miles a bridge of 1 span 40 feet is needed.

At 74 miles the line crosses the Dansob-Gurhahatta-Saugor Provincial road, just north of Bansa Tarkhera, and ¼ mile farther on it crosses the Koopra river by 6 spans of 60 feet on hard shale and sandstone. At 80⅔ miles the summit level between Damoh and the Sunar river is reached. At 6⅓ it crosses the Sunar river just south of the town of Belyee, where 9 spans of 60 feet are wanted.

1,150 feet.

1,250 feet.

1,170 feet.

At [illegible] and 89¼ nullahs are crossed, 50 feet of waterway each.

From the latter there is a long steady rise in the country, the line working up north of Chunnowa, and south of Burpani, with easy curves and by no means heavy work, along a long spur north of the Gudhari to 95 miles, where there is a saddle in the range running from the south-east of Abchand to Shahpur.

1,200 feet.

1,420 feet.

The line continues on to another saddle at 100⅞ miles in the ridge between the Sunar and its tributary the Beas. The latter river is crossed at 102⅓ miles by 6 spans of 60 feet.

1,640 feet.

Another saddle is run through at 108 miles north of Gumbheeria in a trap ridge, the watershed between the Beas and Dussan river. The line arrives at the Saugor Cantonment "Mall" ridge at mile 111¼, the height of which is 1,780 feet. The Mall ridge must be cut through to facilitate grade and obtain headway for two cantonment roads over bridges. The line will pass south of the Saugor Church and Race Course, the Jhansi road being crossed at mile 112⅓, the line terminating at mile 113.

1,760 feet.

The total major bridging on this Section will probably be—

4	spans of	150 feet.
2	„	100 „
42	„	60 „
18	„	40 „

The proposed stations on this Section are—

Miles.	Names.	Remarks.
	Katni	It being compulsory to join the East Indian Railway by a shunt and not directly off the main line, accommodation due to an intermediate station is required, as well as one mile of permanent-way for sidings.
8¾	Hurdua	Not urgently required at the outset.
17½	Richtee	Considered necessary at the outset, the more so as the Jokhye-Saugor road here falls in with line of proposed Railway.
27¾	Heerapore	Midway between the important towns of Burgaon and Raipura, which are 4 miles apart.
41⅓	Mohans	One mile south of Koomharee, the principal town of the Padri valley.
52	Ghutera	Not considered urgent at the outset, though it must be eventually useful as tapping the Bearmi valley.
58	Bumpor Goonjee ...	Favorably situated in a fertile and populous valley.
66	Damoh	Head-quarters of a Civil District and a large native town.
74	Bunsa	Crossing of a new provincial road, and situated in a fertile and populous valley.
86	Gurha Kotah ...	A large and important town in the valley of the Sunar.
95⅓	Abchand	On the verge of a fertile plain.
104	Loodhora	In the centre of another.
113	Saugor	Head-quarters of Civil Station, a Military Cantonment and large native town.

IV.

Saugor to Etawah, 43 miles.

On leaving Saugor the line runs nearly due west for the first 8 miles rising to the crest of a spur of the Sutghur hills. It then descends into the Dussan valley, and has to cross the Dussan river at 12 miles by 3 spans of 100 feet each. It would then take a more northerly direction to reach a good crossing at the 22nd and 23rd mile in the ridge of hills forming the watershed between the Dussan and the Narain river, a tributary of the Betwa.

About the 30th mile the Narain has to be crossed, and continuing on over a fairly easy country, a junction would be made with the projected Railway from Bhopal to Jhansi at or near Etawah on the 43rd mile. As yet no levels have been taken along this last Section of the proposed line.

TRAFFIC.

Coal and Iron.

One of the several important objects attained by constructing the proposed Railway will be the opening up of the Rewah coal-fields.

The most important of these, as far as is at present known, lie around Umaria-Kalesar, some 40 miles distant from Katni, at Johilla about 15 miles beyond, and in the Sohagpore basin.

When this line has been constructed, Umaria coal will probably be delivered at Katni at a cost of about Rs. 6-6-8 per ton or less. The coal is said to be nearly equal to the best Bengal coal (Kurharbali).

Rs. 5-0-0 for cutting and raising. This is the present rate at Warora, but the training of local labour may be expected to reduce the cost to that in Bengal, *viz.*, between Rs. 2 and Rs. 2-8.

Rs. 1-6-8 freight over 40 miles at ¼ pie per maund.

At Jubbulpore its cost will be about Rs. 8-7-0 per ton, and at the junction with the Bhopal-Jhansi Railway it can be delivered at Rs. 12 per ton.

The sinking of a shaft at Umaria, and borings in other places, are in progress.

The line may in fact be regarded as essentially a "mineral" one, in addition to any other advantages it may possess. It will supply coal to the whole of any system of railways in Central India and Bundelkhund, to a portion of the future Nagpur-Bengal line, and of the East Indian and Great Indian Peninsula Railways, and probably to the greater portion of the Rajputana State Railway, and other lines to the north-west of Agra. In fact, if judiciously worked, these collieries will ensure a very heavy traffic over this Railway.

Excellent iron ore and stone lime are to be found in the neighbourhood of Katni, and in the Jubbulpore District generally.

Mr. Molesworth, the Consulting Engineer to the Government of India, thus writes on the subject :—

"The Jubbulpore District yields an inexhaustible supply of very rich hematite, containing about 68 per cent. of iron suitable for the manufacture of charcoal iron. The ore is on the surface, and may be obtained cheaply without the cost of expensive mining. It seems probable that the Rewah coal-fields, which have lately been discovered, may have an important influence on the development of an iron industry in this district. There is, moreover, in the neighbourhood, to the north-west of Jubbulpore, manganese ore containing 54 per cent. of manganese; and this would be most valuable in the event of manufactures of steel being undertaken."

General traffic.

The prospects of general traffic on this line are still under careful investigation, but the following information may be accepted provisionally. In addition to coal for the north and north-west, this Railway will carry in ordinary times much grain from the Central Provinces to Upper India, and its value in time of scarcity in any portion of the North-West Provinces, or of the Punjab, will be very great.

On the Bilaspore-Sohagpore Section the total amount of goods carried along the route at present in both directions is said to be 30 tons daily for six months in the year only, but the pilgrims passing through towards Pooree are about 200,000 per annum.

On the second Section, it is stated, that the total traffic from the Sohagpore-Umaria district to Katni does not at present average more than 300 tons per month.

Rice is the bulkiest of the exports from Sohagpore and South Rewah generally; then oil-seeds, millets, ghee and forest produce.

The local traffic prospects on the Section from Katni to Saugor are much more cheering, a large quantity of produce that now comes to Katni direct from Pannah will doubtless take rail at Damoh, or near that place. The actual weight of goods, however, has not been estimated.

From Damoh to Saugor the country is particularly open and fertile, grain cultivation being unbroken from Damoh to the Sunar river, and from the Barapani hills to Saugor.

From the attached abstracts of estimates it will be seen that the cost of construction of the proposed broad guage line is moderate throughout the whole length, averaging Rs. 59,588 per mile, exclusive of rolling stock, for which item it is usual to add Rs. 10,000 per mile. The total estimate is 245½ lakhs.

Construction.

The heaviest works are in crossing the several ranges of hills, notably the Mykal range from Belaspore into the Rewah plateau; the Moorcha Pass in the ridge between the districts of Sohagpore and Singwara; and the Bharair range on the boundary of the Pannah State.

The large rivers that have to be crossed are but few in number, *viz.*, the Tipan (6 of 60 feet), the Johilla (5 of 60), the Mahanuddi (3 of 95), the Patna (5 of 40 feet), the Bearmi (15 spans of 60 feet), the Koopra (6 of 60 feet), the Sunar (9 of 60), and the Dussan (3 of 100), at all of which first class foundations are met with.

Good building stone can be found within easy distance along the line. Kunker nodules of a variety which gives a moderately hydraulic lime are found in abundance near most of the large rivers.

The stone lime of Katni is renowned and is largely exported for use even as far off as Calcutta, and it is also procurable in several other localities, but kunker lime will be mainly used for the construction of the line.

Fuel is plentful, but it is not expected that much timber fit for conversion into sleepers will be procured locally, except in the jungles of the Bhairar range, where saj and teak is plentiful.

Ballast materials of first class quality can be found near the line from one end to the other.

Brick earth for tiles or soorkee is also abundant.

Railway with extension to junction with the proposed line from Bhopal to Jhansi.

Estimated cost of construction of the proposed Belaspore-Katni-Saugor Railway.

Head of Estimate.	Sohagpore to Katni, 76¼ Miles.		Katni to Saugor, 113 Miles.		Saugor to Etawah, 43 Miles.		Average rate per mile.	Total for 352¼ miles.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

IRRIGATION WORKS IN SIND FOR THE YEAR 1881-82.

Nos. 185-92I., dated Simla, 9th May 1883.

[redacted]ON—By the Government of India, Public Works Department.

Letter [redacted] Government of Bombay. No. 68W.I.—145, dated 20th March 1883 [redacted] Report of the Irrigation Department in Sind for 1881-82, and [redacted] of the Government of Bombay thereon.

OBSERVATIONS.—The capital expenditure during the year under review amounted to R3,95,066, and the total outlay incurred under this head up to the end of the year to R90,93,034, including direct and indirect charges. Of this amount, R23,69,777 had been expended on Productive Public Works, and R67,23,257 on other Irrigation Works for which Capital and Revenue Accounts are kept.

2. The gross receipts from all sources amounted to R30,44,828, being nearly 16 per cent. in excess of those for the previous year; the maintenance charges, direct and indirect, to R13,16,203; and the net revenue to R17,28,625. The net revenue from Productive Public Works returned 6 per cent., and that from other Irrigation Works for which Capital and Revenue Accounts are kept 9·15 per cent., on the total capital outlay to the end of the year.

3. The total area cultivated under the canals during the year amounted to 1,601,981 acres, being 7·3 per cent. in excess of that of the previous year, but

the assessed revenue (R34,74,351) was 18 per cent. in excess of that of 1880-81. The disproportion between the increase in the area under cultivation and the assessed revenue is partly due to an increase of revenue on "kharif" lands, but mainly to the revision of settlements which is now going on as the old settlements fall in, and a steady increase in revenue is anticipated from this cause for many years to come.

4. The irrigating duty obtained from the water varied from about 35 to 65 acres per cubic foot per second, and was on the whole rather above the average of the previous year. On the Eastern Nara, on which the average duty was 64·75 acres per cubic foot per second, the duty obtained in irrigation of rice was about 50 acres, and in irrigation of "dry crops" about 120 acres per cubic foot per second.

5. The maintenance charges were considerably above the average of the previous five years owing to the necessity for special clearances of the canals, which had been somewhat neglected in previous years from the greater necessity for completion of flood embankments. The Superintending Engineer states that R7·28 lakhs may be considered as the nominal allowance for the proper maintenance of canals and embankments, and R2·35 lakhs for establishments, making a total of about 9⅔ lakhs of rupees as the ordinary annual allotment required; but this appears to be rather a narrow estimate of requirements, as the average outlay of the 5 years ending on March 31st, 1881, amounts to 11·46 lakhs of rupees. The Commissioner in Sind states that much yet remains to be done, and is confident that, if liberal grants are maintained for a few years longer, the results will be even more satisfactory than those given in the report under review.

6. The revenue charges are given in paragraph 6 of the Superintending Engineer's report as R2,74,070, and amount to 8·82 per cent. on the actual realisations of canal revenue, which are shown in paragraph 10 as amounting to R31,04,939. The charge seems high, unless detailed measurements and assessments are annually made of the irrigated areas.

7. The Government of India agrees fully with the Government of Bombay in considering that no necessity exists for making any alteration in the present method of accounting for the canal revenue, as the share of the land revenue due to the canals is fixed and duly credited to these works in the Administrative Accounts.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Government of Bombay in the Public Works Department for information.

Also, that a copy of this Resolution, of the report, and of the Resolution by the Government of Bombay, be forwarded for information to the Governments noted in the margin in the Public Works Department.

Madras, Bengal, North-Western Provinces and Oudh, and the Punjab.

Also, that a copy of this Resolution, of the report, and of the Resolution by the Government of Bombay, be forwarded to the Department of Finance and Commerce and to the Revenue and Agricultural Department for information, and to the Publisher of the *Gazette of India* for publication in the Gazette Supplement.

Also, that a copy of this Resolution, of the report, and of the Resolution by the Government of Bombay, be forwarded to Her Majesty's Secretary of State.

By order,

H. A. BROWNLOW, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

Extract from the Proceedings of the Government of Bombay, Public Works Department,—
No. 47, W. I.—104, dated 7th March 1883.

Read again—

From the Superintending Engineer for Irrigation in Sind, No. 163, dated 18th January 1883—Submitting, with his remarks, the Annual Revenue Report of the Irrigation Department in Sind for 1881-82.

Endorsement by the Commissioner in Sind, No. 413, dated 27th January 1883—Submitting the above report with his observations thereon.

RESOLUTION.—The inundation of 1881 was on the whole a favorable one, and in its results above the average.

2. The steady increase in the area of *kharif* cultivation, omitting years of flood, is extremely satisfactory, indicating, as it does, that the protective embankments of recent construction are being efficiently maintained, and that ruined lands are again being gradually brought under cultivation.

3. No increase in *rabi* cultivation can be looked for until the existing conditions are somewhat modified by the introduction of a certain quantity of perennial water into some of the canals which will admit of such a system being economically carried into effect.

4. The increase in the Irrigation revenue of over 6¼ lakhs of rupees on the average of the five preceding years is satisfactory proof that the revised system of assessment is already bearing fruit, and further that the additional sum expended since 1879-80 on the maintenance and repairs of canals and embankments has yielded a substantial return.

5. Both the Commissioner and Superintending Engineer for Irrigation in Sind agree that, as the revised system of assessment is extended throughout the province, combined with a liberal grant for canal clearances, the revenue may be expected to increase annually for some years to come.

6. The decrease of revenue on the Eastern Nara for the year under review is fully explained. The protective embankments are now making good progress, and the lands that have been injured by floods will soon be recovered. When complete immunity from floods can be guaranteed, the returns from all the canals under this system will rapidly increase: and the supply channel at Rohri can then be deepened sufficiently to ensure a proper *rabi* supply for the Mithrao and Thar canals.

7. The expenditure on maintenance and repairs for the whole province during 1881-82 was R10,98,941, or R1,58,233 more than in 1880-81. The result of this large additional outlay will be seen in the report for the next year 1882-83.

8. The normal amount required annually for the proper maintenance of the canals and embankments is said to be about R7¼ lakhs, or, including establishment charges, about 9½ lakhs.

9. The percentage of cost of establishment in 1881-82 works out to about 24; that of expenditure on revenue to about 40; and the cost of maintenance per acre of cultivation to 13¾ annas.

10. The Superintending Engineer for Irrigation has correctly interpreted the intention of Government in the 9th paragraph of his report. Credit should be given in the accounts of *all* the canals for the difference of assessment on *jaghir* lands. The Examiner of Public Works Accounts should be requested to revise the General Abstract of Financial Results of Irrigation Works in Sind for, and up to the close of, 1881-82 accordingly.

11. The Commissioner concurs with the Superintending Engineer that the present arrangement of showing the Irrigation share of the consolidated rate under the head *Indirect* in the General Abstract of Financial Results of Irrigation Works is apt to mislead. Government, however, consider that there is no

necessity for any change in the form of keeping the accounts of Irrigation works in Sind which has been ordered by the Government of India.

The value of the canals as Irrigation works cannot be overlooked so long as the share of the land revenue, under the consolidated rate system, due to or dependent on the works, is properly credited in the accounts; and this share has been fixed at 90 per cent.

12. The Commissioner brings prominently to notice the importance of the Kashmor Bund, and the highly satisfactory way in which, under severe pressure, it stood and answered the purposes for which it was constructed. He also records his opinion that the results of all the different canals, as detailed by the Superintending Engineer, are satisfactory. For all these good results, great credit is due to Colonel LeMesurier and the Executive Engineers under his control.

13. Now that the embankments in Upper Sind have been completed and only require to be carefully maintained and watched during the inundation season, those in Lower Sind are being taken in hand. As regards the provision of special funds for the purpose, Government await the receipt of some definite proposals, with detailed plans and estimates, for the necessary works.

14. Copies of the report and of the Commissioner's endorsement, together with the observations of this Government thereon, should, as usual, be forwarded to the Government of India and the Secretary of State.

Extract from the Proceedings of the Commissioner in Sind,—No. 413, dated 27th January 1883.

Read—

Letter No. 163, dated 18th January 1883, from the Superintending Engineer for Irrigation in Sind, submitting Irrigation Revenue Report for the year 1881-82.

Submitted to Government.

2. This report explains fully the revenue results of the year. The inundation of 1881 was a favorable one, though at one time owing to the lowness of the river in July and August, apprehensions were entertained that the crops were likely to suffer serious loss. The timely rise of the river in September removed these fears, and as it continued high, and the canals contained water till a late date, the crops were above the average, and the Irrigation revenue was unusually large, being no less than R6,29,844 in excess of the average of the previous five years. These figures, it must be remarked, refer to assessments, not actual collections.

3. This large increase is attributed by the Superintending Engineer to the introduction of the revised system of assessment, and this, there can be no question, has had a great deal to do with it: but a great deal is also due to the reculitivation of lands, which had been left uncultivated, owing to the successive floods now fortunately kept out by the Kashmor and other protective embankments; and also to general causes, for, as the table in the following paragraph of the report shows, the increase has been very general all over Sind, and not confined to the parts where revised rates have been introduced. Another reason that has largely contributed to the increase has been the state of the Western Nara, one of the largest canals in the Shikarpur and Karachi districts, which in the previous year failed very seriously, owing to the set of the river against its mouth, but which worked satisfactorily during the year. The increase in kharif cultivation has really been considerably larger than the table given in para. 3 shows, for, as Colonel LeMesurier has pointed out, kharif lands flooded, but cultivated with *rabi* crops in seasons of flood, have been entered under the head of *kharif*, because so classed at the time of settlement. The present method of recording cultivation is undoubtedly defective, but this is not the place to discuss how it can best be improved.

4. The improved results described by the Superintending Engineer are also due in no small degree to the endeavours recently made to improve the canals,

and clear them more thoroughly than had been done for long, for, as the Superintending Engineer remarks, he had been compelled in some previous years to neglect clearances in order to obtain funds for protective embankments. The increased expenditure on canals may be said to have commenced in 1879-80, when, as shown in para. 6, R6,87,162 were expended on works. In 1880-81 the expenditure rose to R7,32,956, and in 1881-82 to R8,86,044. The results are now beginning to be apparent, and a return being received which shows the wisdom of placing the canals in thorough order, and keeping them in it. Much yet remains to be done, but the Commissioner is confident that if liberal grants are continued for a few years longer, the results will be even more gratifying than those described in the present report.

5. The Commissioner observes that the Superintending Engineer has throughout used the figures supplied by the Examiner, Public Works Accounts, and as this is what Government has directed, the only figures it is necessary for the Commissioner to draw attention to are those which show consolidated land revenue, as given in Table VII. In this table the consolidated revenue is entered as being R37,65,471. This, unfortunately owing to a mistake, for which the Collectors of Hyderabad and Karachi—not the Examiner—are responsible, is not correct, the correct figure being R37,46,220. The difference represents the village cess levied on land revenue under Bombay Act IV of 1881 in the talukas into which revised settlements have recently been introduced. Instructions have been given to prevent a similar error in future.

6. The Superintending Engineer has, in paras. 14 to 16, raised the question whether the present method of classing receipts under the head of "direct" and "indirect" is suited to Sind. In other Provinces he points out "owners' rate" and "water advantage rate" are entered as indirect receipts, while water rates appear as "direct" revenue; but in Sind 90 per cent. of the consolidated revenue, which includes water rate, is entered as "indirect." The Commissioner agrees with Colonel LeMesurier that the present arrangement is misleading; but on the other hand, the whole 90 per cent. would not, according to the system in force elsewhere, appear under the head "direct" revenue; so that, if what is desired is to have one system in all Provinces, some further change than that suggested by Colonel LeMesurier would have to be made. Whether such a change is really necessary or desirable, the Annual Report is not the place to discuss, and therefore the Commissioner will not further pursue the subject.

7. The Kashmor embankment, in spite of the severe test to which it was exposed, stood well, and it is highly satisfactory to find this very important work answering so admirably.

8. The Superintending Engineer gives, as usual, details for all the different canals: it is not necessary for the Commissioner to review these details; it may suffice to say that the results are satisfactory.

9. The Commissioner is glad to notice that the embankments in Lower Sind are now "being taken up as a whole." The embankments in Upper Sind may now be said to be in good order, but those in Lower Sind still leave much to be desired; and until this has been seen to, and cultivation made less risky, no large increase in revenue can be looked for. Now, too, that revenue survey operations are being rapidly pushed on in Lower Sind, every help should be afforded to cultivators: the old and very faulty lease system will cease, as the settlement is extended, and a very large increase of revenue may confidently be looked for, if only agricultural operations can be carried on in safety. In his 70th paragraph, the Superintending Engineer observes that special funds will be required for the work to be done in Lower Sind, and the Commissioner trusts that Colonel LeMesurier will bring to notice what sums are required, as he fully concurs with that officer in the opinion that there ought to be no cause of complaint of insufficient return for the outlay "as far as the whole district on both banks (of the Indus) south of Jerruck is concerned."

General Abstract of Financial Results of Irrigation Works in Sindh for, and up to the close of, 1881-82.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS OF FASL RABI IN THE PUNJAB FOR 1882-83 UP TO 31st MARCH 1883.

Canal Division.	Water distributed during March 1883. Depth in Canal at Regulating Gauge. Full supply.	Actual throughout.	Gross Consumption, cubic feet per second. Estimated full supply.	Actual average throughout.	Navigation Return Canal. Principal items of Traffic. Up	Down.	Land Irrigated (approximate). Tell.	Acres.	Rainfall. Average.	During month.	Chief Crops (approximate). Name.	Area in acres.	Remarks.
Bari Doab Canal. 1st Division	4·9	4·21	3,073·6	1,114	...	...	Gurdáspur	10,970	0·9	0·1	Wheat	128,889	The Bári Doáb Canal was open during the whole month. The decrease in area irrigated up to date is 28,896 acres as compared with the same period of last year, and 85,668 acres as compared with March 1881. Superintending Engineer states that the decrease is attributed to a considerable area having been sown in this fasl on the dampness left from the irrigation of the previous crop.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22nd MAY 1883.

GENERAL REMARKS.—Slight rain has fallen in varying quantities throughout the Madras Presidency, and in several districts of the Bengal Presidency it has been very heavy. In British Burma and Mysore and Coorg the rainfall has been general, and in the Sylhet and Cachar districts of Assam has been disastrously and unprecedentedly heavy. Slight rain has also fallen in four districts of the North-Western Provinces and Oudh and in two districts of the Bombay Presidency. Elsewhere there has been little or none to report.

In the Madras Presidency standing crops are in good condition, and agricultural operations are progressing. Preparations for *kharif* are in general progress in the Bombay Presidency, and sowing has commenced in places. In the Bengal Presidency cultivation is well in hand, *aus* rice and jute have been sown, and sugarcane planted in several places; the harvesting of *boro* rice and millet is still in progress.

In the North-Western Provinces and Oudh *kharif* operations are going on, and *sawan* and sugarcane are being irrigated in Partabgarh. In the Punjab the *rabi* harvest is almost completed, except in the extreme north-west; prospects are generally good. In the Central Provinces land is being prepared for *kharif* in several districts, and threshing and winnowing of the *rabi* continue in others. In Cachar and Sylhet great damage, though not as yet precisely ascertained, has been done by floods, which are now abating. In Mysore and Coorg standing crops are in good condition, and in the Nizam's territories preparations for *kharif* are general.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 23rd)		
Bellary ...	·1 (average of two stations).	Standing crops generally good; harvest of paddy and sugarcane, outturn average.
Kurnool ...	.....	Standing crops good; harvest second crop paddy, outturn twelve annas; small-pox and cattle-disease in parts, the latter more general.
Ganjam ...	·62 (average of two stations).	Standing crops cotton and *ragi* thriving; fever, small-pox, and cholera continue, the last in parts; cattle-disease slight.
Kistna ...	·31 (average of three stations).	Fever, guinea-worm, and small-pox in parts, the last more general; cattle-disease almost disappearing.
Chingleput (Madras) ...	.....	Standing crops good under larger tanks; harvest of *kar* paddy and *ragi*, outturn one-fourth to three-fourths; small-pox and cattle-disease slight in parts.
Coimbatore ..	·88 (average of thirteen stations).	Standing crops good; harvest of paddy in one taluk, outturn average five; small-pox and cholera continue in parts.
Tanjore ...	.....	Standing crops good; harvest of paddy and flax, outturn below average; cholera slight.
Madura ...	·91 (average of five stations).	Standing crops fair; cholera in parts.
Malabar ...	1·36 (average of twelve stations).	Sowing of first crop almost over in several taluks; harvesting of third crop in parts; fever and small-pox continue, latter in all taluks.
Travancore ...	1·46	Cultivation fairly progressing; fever and small-pox continue.
		General Remarks.—No rain in Chingleput, Kurnool, and Tanjore; general prospects good.
Bombay—(May 23rd)		
Kurrachee ...	.....	Weather sultry; 6 cases of small-pox in Kurrachee, in villages 82 fresh cases; fever in seven talukas; cattle-disease in Shahbandar; river at Kotri on 21st 8 feet 1 inch, against 8 feet 5 inches last year; estimated area of past *rabi* in excess of last year, average realisations about 13 annas in the rupee, might have been better but for blight; prices of wheat, red rice, and *bajri* in Kurrachee 26, 32 and 36, in Dadu 32, 32 and 48, in Sakro 16, 34 and 48, and in Sujawal 26, 34 and 42 lbs. per rupee respectively.
Hyderabad ...	.....	River low; weather sultry; small-pox in eight, fever in four, and cattle-disease in two talukas; prices of wheat 24, *bajri* 39, *juari* 50, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Preparations for *kharif* continue; 4 cases of cholera; prices—wheat 26½ and *bajri* 29½ lbs. per rupee.
Baroda ...	.....	Preparations of land for ensuing season in progress; public health good; weather windy; *bajri* 28 and common rice 24 lbs. per rupee.
Surat ...	.....	Preparations for *kharif* continue; small-pox in Surat abating, average death 1; prices—*juari* 42 and *nagli* 49 lbs. per rupee.
Násik ...	.....	Cholera in all talukas, except Nandgaon, Chandwad, and Igatpuri, deaths 267; locusts have appeared in Igatpuri, Násik, and Yeola talukas; prices—wheat 27, *bajri* 30, and rice 22½ lbs. per rupee.
Colaba (Bombay) ...	Drops of rain on 22nd	Average abnormal temperature 1° warm from 16th to 21st; on 22nd vapour in air normal; abnormal wind northerly on 17th and 18th, southerly and strong on 22nd; wind normal on all other days.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Poona ...	.....	Cholera continues, 238 cases, 124 fatal; small locusts appearing in Junar; prices—*bajri* 40 and *juari* 48 lbs. per rupee, in Poona city *bajri* 34 and *juari* 41 lbs. per rupee.
Ahmednagar ...	.....	Preparation of land for the next season in progress; cholera throughout the district, except Nagar, Jamkhed, and Akola, 80 deaths from cholera; small-pox in some parts of Jamkhed; slight damage by locusts in Sangamner taluka.
Sholapur ...	.....	Cholera in twenty villages, ont of 110 cases, 41 fatal; prices—*juari* 59¼ and *bajri* 51 lbs. per rupee.
Dharwar ...	Slight rain at Gadag and Mandargi.	Paddy being sown in four talukas; scarcity of drinking-water in eight villages of Nargund; small-pox and fever in one taluka; prices—rice minimum 24 and *juari* 20 lbs. per rupee.
Kanara ...	.....	Preparing ground and sowing seed for monsoon crop in low grounds in Karwar and Honore; small-pox in three and fever in two talukas; prices—rice 12½ seers per rupee, in district average 14 seers per rupee.
Rajkot ...	.....	General health good; days hot, nights cool; strong wind, west and south-west, in Rajkot; small-pox in Junagad and Gadka talukas; cholera continues in Ambaran; prices—*bajri* 29 and *juari* 33 lbs. per rupee.
		General Remarks.—Preparation for *kharif* in general progress; scarcity of drinking-water in parts of taluka Nargund in Dharwar district, continues; locusts in Belgaum, Dharwar, Satara, Poona, Ratnagiri, Tanna, and Násik; cholera in Belgaum, Kaladgi, Satara, Poona, Sholapur, Khandesh, Tanna, and Násik; small-pox and fever in a few places.
Bengal—**(May 23rd)**		
Chittagong ...	·61	Weather hot, but stormy; prospects of *aus* crop bad; prices high cholera continues; a few cases of small-pox reported.
Dacca ...	2·32	Harvesting of *boro* paddy almost completed; sowing of paddy and jute and planting of sugarcane going on.
24-Pergunnahs (Calcutta)	·04	Sowing of *amun* paddy on low lands and of early paddy and jute and planting of sugarcane commenced; more rain wanted; public health generally good.
Moorshedabad ...	2·08	Rain very beneficial to crops; sowing of *bhadoi* crops still going on mango crop has suffered from recent storms; except isolated cases of cholera, health of district generally good.
Rajshahye ...	.....	More rain needed; paddy crops coming up; health generally good.
Burdwan ...	·3 Kulna, 1·1; Kutwa, ·23; Raniganj, ·19.	Rain in Kulna done much good, wanted elsewhere; health fair.
Rungpore ...	6·69	Transplanting of winter rice commenced in some places; weeding of *aus* rice prevented by continual rain; general health good.
Bhagálpur ...	·30	Prospects good; young sugarcane and paddy doing fairly; public health good, though sporadic cases of small-pox and cholera reported.
Purneah ...	·98	Crops doing well; sowing and weeding progressing; a few cases of cholera and small-pox reported; general health fair; rivers rising.
Patna ...	*Nil*	Strong east wind still prevailing; collection of cotton and castor going on; sugarcane looks well; cholera reported from Barrh and Behar sub-divisions; outbreak of small-pox reported from thana Silao.
Durbhunga ...	1·14	Cool east wind; prospects of crops good; storm on 20th damaged mangoes; prices stationary; cholera in town and district.
Hazáribágh ...	·15	Weather hot and sultry; no crops on the ground; cholera and small-pox still prevail in certain parts of the district, otherwise general health good.
Cuttack ...	.....	Weather hot; sky overhanging with clouds; ploughing in progress; sowing commenced in some places; public health good.
		General Remarks.—There has been rain in most districts during this week, also the rain has been rather excessive in some parts of Northern and Eastern Bengal, but no great harm has been done, except in Chittagong where prospects of *aus* rice are reported to be bad, and prices are high in consequence; cultivation is progressing, but in many places more rain is still much required; in several places sowing of *aus* rice and jute and planting of sugarcane have been done, and the young plants are growing well; sowing of *amun* rice has commenced in a few districts; harvesting of *boro* rice and *cheena* is still going on; mango has been considerably injured by frequent storms, nevertheless it is expected to yield an abundant crop in several places; in Darjeeling many tea gardens are said to have been infested by red spiders; cholera continues to be reported from several districts; small-pox from some and fever from a few; general health fair; the whole province is, however, fairly good.
N. W. Provinces and Oudh—		
Benares (May 22nd)	No rain	Strong easterly winds; crops good, except mustard; no sickness of men or cattle; prices steady; markets well supplied.
Allahabad („ „)	.....	Excessive heat; wind easterly; not much sickness; water scarce in places; prices rising slightly.
Farukhabad („ „)	.....	Hot west winds for most part of the week, change since yesterday, cloudy and storms; health of people fair, but fever and small-pox continue to be reported; markets well supplied; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Gorakhpur (May 20th)	.....	Weather unbroken; harvest completed; a few cases of cholera and some sporadic cattle-disease; prices steady.
Cawnpore („ 22nd)	No rain	Small-pox diminished in town, extended to district; *rabi* crops harvested; cattle-disease reported in four parganas; prices almost stationary.
Jhánsi („ 21st)	.....	Weather exceedingly hot and dry; harvesting over; prices fluctuating; health good; cattle-disease disappearing.
Agra („ 22nd)	No rain	Hailstorm in two or three villages in Firozabad on 17th; fever in four and small-pox in five parganas; sporadic cholera in three parganas; prices stationary.
Bareilly („ „)	Slight shower	Prices stationary; health good, with some local exceptions.
Meerut („ „)	·3 on 21st at Sadr	Heavy duststorms; health good; prices stationary.
Kumaun („ „)	Good rain	*Kharif* operations still going on; general health good; prices same as last week; cattle-disease continues.
Lucknow („ „)	No rain	Heat intense, wind easterly; prices stationary; occasional reports of cholera and small-pox; general health good.
Partabgarh („ „)	.....	*Sawan* and sugarcane being irrigated; slight small-pox at Kunda; prices stationary; general health good.
Rae Bareli ...	No rain	Weather seasonable; cholera continues; small-pox and fever abating; prices stationary.
Sitapur (May 22nd)	Slight rain in one or two places.	Small-pox decreasing; prices stationary.
Fyzabad („ „)	No rain	Small-pox still reported in three tahsils, and cattle-disease in tahsils Bikapur and Akbarpur.
		General Remarks.—The weather continues hot and dry, but slight showers have fallen in Sitapur, Bareilly, Aligarh, and Meerut, and several districts report hail and dust storms; in Moradabad and Kumaun rain has fallen more heavily; a few cases of cholera are reported from Gorakhpur, Lucknow, Agra, and Aligarh; prices remain stationary as a rule.
Punjab—**(May 22nd)**		
Delhi ...	·5	Health fair; a few cases of cholera; prices steady.
Hissar ...	.....	Small-pox in four tahsils of the Hissar district; harvesting completed, yield at the average; prices rising.
Umballa ...	.....	Health fair; harvesting completed, yield reported to be below the average; prices stationary.
Jullundur ...	.....	Health good; crops being winnowed; prices slightly rising.
Sialkot ...	.....	Measles of a mild type prevalent; crops being threshed; prices falling.
Ferozepore ...	.....	Health good; harvesting in progress; prices steady.
Amritsar ...	.....	No report received.
Lahore ...	.....	Weather cloudy and threatening; health good; prices stationary.
Rawalpindi ...	.....	Cattle-disease in Attock, and slight fever in the Kahuta tahsil; harvesting completed, yield above the average; prices falling.
Mooltan ...	.....	Health good; harvesting continues; preparations being made for *kharif* sowings; prices steady.
Dera Ismail Khan ...	.....	Health good; harvesting in progress; prices slightly falling.
Peshawar ...	.....	Strong winds prevailing; health good; prices steady.
		General Remarks.—No rain reported, except a slight fall in the Delhi district; health and harvest prospects generally good.
Central Provinces—**(May 23rd)**		
Nagpur (May 23rd)	.....	Weather very hot and cloudy; land being prepared for *kharif* sowings; health good; prices steady.
Jubbulpore ...	.....	Weather clear, hot and stormy; threshing and winnowing continue; prices stationary; small-pox continues; prices—wheat 22 and rice 16 seers per rupee.
Saugor ...	.....	Weather very warm, with hot winds and occasional clouds; land being prepared for *kharif* sowings; prices easy.
Seoni (May 22nd)	.....	Unusually hot, cloudy, with occasional duststorms; fields being prepared for *kharif* sowings; prices—wheat 24 and rice 17 seers per rupee; large exports of *pissi* wheat.
Hoshangabad ...	·04	Weather hot and windy; preparations for *kharif* sowings continue; 2 deaths from cholera; prices—wheat 14 and rice 10 seers per rupee.
Khandwa ...	.....	Weather hot; preparations for *kharif* sowings continue; 15 deaths from small-pox; prices—wheat 16, rice 16, and *juari* 20 seers per rupee.
Raipur (May 19th)	.....	Very hot and cloudy; small-pox in some parts.
Sambalpur („ 17th)	.....	Intense heat; sugarcane doing fairly well; health good; common rice 56 seers per rupee.
		General Remarks.—Weather very hot and close; land being prepared for *kharif* sowings; threshing and winnowing continue in some districts; cholera in Wardha; prices easy.
British Burma—**(May 12th)**		
Akyab ...	6·20	Total rainfall 12·34 inches; 2 cases of cholera in town, of which 1 proved fatal, and 1 case in district, otherwise public health good; cattle-disease in one township.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Rangoon ...	2·48	Total rainfall 7·13 inches; 5 deaths from small-pox, otherwise public health good; price of paddy from Rs. 90 to Rs. 92 per 100 baskets.
Bassein ...	4·50	Total rainfall 4·65 inches; 2 deaths from cholera in district, otherwise public health good; 58 deaths of cattle in two townships.
Prome ...	2·23	Total rainfall 3·39 inches; public health good.
Amherst (Moulmein) ...	·45	Total rainfall 6·66 inches; public health in Moulmein and district good; cattle-disease in three townships, and 310 deaths of cattle in Wagarro township.
Toungoo ...	1·77	Total rainfall 6·94 inches; 1 death from small-pox in town, otherwise public health good.
		General Remarks.—Public health good; sharp cattle-disease in Amherst; moderate rain pretty general; price of paddy slightly fallen.
British Burma—(May 19th)		
Akyab ...	2·90	Total rainfall 15·24 inches; 1 death in town from small-pox, and 7 from small-pox and 4 from cholera in district, otherwise public health good; cattle-disease in three townships, severe in Menhya.
Rangoon ...	·49	Total rainfall 7·62 inches; 2 deaths from small-pox, otherwise public health good; price of paddy from Rs. 89 to Rs. 91 per 100 baskets, with a downward tendency.
Bassein ...	·02	Total rainfall 4·67 inches; 31 deaths from cholera in one township, otherwise public health good; 64 deaths of cattle in one township.
Prome ...	·49	Total rainfall 3·88 inches; public health good; slight cattle-disease in two townships, 10 deaths of cattle in district.
Amherst (Moulmein) ...	·95	Total rainfall 7·61 inches; public health in Moulmein and district good; cattle-disease in two townships.
Toungoo ...	·26	Total rainfall 7·20 inches; public health good; 6 deaths of cattle in one township.
		General Remarks.—Sharp attack of cholera in one township of Bassein, otherwise public health good; fairly heavy rain in Akyab, slight elsewhere; great heat in Rangoon; price of paddy has a downward tendency; cattle-disease sharp in parts of Akyab and Amherst.
Assam—(May 17th)		
Gauhati ...	8·54	Heavy rain throughout the week, fears entertained for the *ahu* rice crops; public health indifferent; cattle-disease still prevalent.
Sylhet ...	16·44	Heavy rainfall in north and north-east of district; floods still continue; cultivation in north and north-east at a standstill; public health indifferent.
Cachar ...	.....	No report received.
Dibrugarh ...	0·71	Weather rainy; prospects of *ahu dhan* good; cholera and cattle-disease still reported.
Assam—(May 23rd)		
Gauhati (May 22nd)	4·11	Weather hot; fever and cholera in the district; *aus* crops doing well, but fear about the crops in low lands on account of inundation; cattle-disease still reported from the interior.
Sylhet („ 23rd)	8·07	The floods have been unprecedented for years, especially at this season; fine weather now prevails; damage, it is hoped, not so serious as might have been expected; public health indifferent.
Cachar („ „)	8·67	Rains abated since 20th; river rapidly flowing; stagnant water in low lands slowly decreasing; rice not available; fever and small-pox at Katigora, number of deaths not reported.
Dibrugarh ...	6·33	Weather warm; ploughing for *sali dhan*; prospects of *aus dhan* good; cholera and small-pox abating.
Mysore and Coorg—(May 23rd)		
Bangalore ...	·83	Standing crops thriving; prospects good.
Mysore ...	2·62	Rain general throughout the district; standing crops in good condition; prospects favourable.
Mercara ...	·11	Prospects of season continue to be favourable; no changes to report.
		General Remarks.—Rain in all districts, except in Shimoga; standing crops in good condition; prospects favourable; public health generally good; prices stationary.
Berar & Hyderabad—(May 23rd)		
Amráoti ...	.....	Weather hot; preparations for *kharif* sowing continue; prices—wheat 16 and *juari* 26 seers per rupee.
Akola ...	.....	Weather hot; land being prepared for *kharif* sowings.
Hyderabad ...	.....	No report received.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States—(May 23rd)		
Indore ...	.....	Weather alternately hot and cool, with occasional clouds; health good.
Morar (Gwalior) ...	.....	Health good; heat intense; small-pox still lingers.
Sutna ...	.....	Health good; weather hot.
Rutlam ...	.....	No report received.
Neemuch ...	.....	Weather very hot, high winds; public health good.
Goona ...	.....	Weather very warm; health fair; price of wheat 24 seers per rupee.
Bhopal ...	.....	Weather seasonable; crops and public health good.
Agar ...	.....	Weather hot; a few cases of cholera at Mandesar and Jeora.
Nowgong ...	.....	Weather excessively hot; public health good.
Manpur ...	.....	No report received.
Rajputana—		
Abu (May 23rd)	·11	High wind with dust last night; heavy wind with rain and thunder; weather cloudy.
Sirohi („ 20th)	.....	Water in wells diminishing; health good; very hot, hot winds frequent.
Marwar („ 18th)	.....	Water obtained with great difficulty; small-pox decreasing; crops all gathered; heat intense, hot winds blowing; prices rising.
Meywar („ „)	.....	Tanks and wells fair; health very good; crops harvested; cloudy and windy.
Harowti („ 19th)	.....	Great heat, fierce hot wind; health good; prices fallen.
Jhallawar („ 16th)	.....	Weather sultry; health fair.
Ajmere („ 22nd)	.....	Hot winds; health good.
Jeypore („ „)	.....	Windy and duststorms; health good; prices stationary.
Bhurtpore ...	.....	No report received.
Ulwur ...	.....	No report received.
Nepal—(May 17th)		
Katmandu ...	·46	Agricultural prospects good; weather warm; thunder and lightning constant towards evening.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

PROCEDURE REGULATING THE SUBMISSION BY PUBLIC BODIES OF ADDRESSES TO THE GOVERNMENT OF INDIA.

No. $\frac{20}{697-713.}$

Extract from the Proceedings of the Government of India, in the Home Department (Public),—under date Simla, the 21st May 1883.

Read—

Home Department Resolution Nos. 12—408-424, dated the 16th March 1883, laying down rules for the submission by public bodies of addresses to the Government of India, the first of which is as follows:—

I.—An address, the sole or principal object of which is to promote or oppose a measure of Imperial legislation, or one which bears immediately upon general questions of Imperial policy, may be submitted direct to the Governor General in Council.

RESOLUTION.

The foregoing Rule must be read with, and be held to be subject to, Rule 14 of the Rules for the Conduct of the Legislative Business of the Council, which relates to Bills actually pending before the Council of the Governor General for making Laws and Regulations, and is as follows:—

Communications on matters connected with any Bill before the Council may be addressed either in the form of a petition to the Governor General in Council, or in a letter to the Secretary, and must in either case be sent to the Secretary. Ordinarily such communications will not be answered.

Except in the case of the High Court at Fort William, such communications from courts, officials, or public bodies *shall ordinarily be sent through the Local Government.*

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations marginally noted for information and guidance; that a copy be forwarded to the several Departments of the Government of India for information; and that the Resolution be published in the Supplement to the *Gazette of India* for general information.

Madras.	Central Provinces.
Bombay.	British Burma.
Bengal.	Assam.

Telegraph.

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1881-82.

Nos. 154-170 T., dated Simla, May 15, 1883.

RESOLUTION—By the Government of India, Public Works Department.

Read:—

Letter No. 596T., dated 6th January 1883, from the Director-General of Telegraphs, together with its enclosure, the Administration Report of the Indian Telegraph Department for the year 1881-82.

RESOLUTION.—The year under review has been marked by several important changes, more especially in the inland telegraph tariff.

2. In July 1881, a tariff of two annas a word for each word in excess of the minimum group of six words for the rupee was introduced.

3. This was followed in January 1882, by the raising of the minimum group to eight words for the rupee; and at the same time, in order to admit of messages being dealt with as far as possible in order of urgency instead of entirely in order of receipt, an "urgent" tariffat double rates and a "deferred" tariff at half rates were introduced.

4. It was further ruled that in order to clear the lines during the busy hours of the day and to utilise the lines by night, all "State" messages should be classed as "deferred" unless specially marked "urgent" by the sender.

5. These latter changes have only taken effect during the last three months of the year under review, but it is already evident that the result has been

beneficial. Of the private traffic, 22·03 per cent. was tendered at the cheaper "deferred" rate, but the increase in number of messages which resulted nearly counterbalanced the reduction in tariff; in fact, the net revenue from this source is slightly in excess of that for the previous year, owing to an increase in foreign message revenue.

6. The total net revenue is, however, considerably less than that for the previous year: there was a reduction in number of State messages to the extent of 67,853, chiefly accounted for by the cessation of military operations in Afghanistan; and owing to the order above referred to, under which the State traffic is classed as deferred, the falling off in revenue is considerably greater proportionately than the reduction in numbers. But the loss is nominal not real, and, on the other hand, the gain by freeing the wires for remunerative traffic during the day time is real and substantial.

7. The Government of India has declared the policy that the Telegraph Department must be self-supporting, and the effects of these changes will be carefully noted during the present year. So far as information has reached the Government, there is a fair probability that the growth of traffic under the new conditions will be sufficient before long to warrant a further reduction in tariff, without risking a burden on the general revenues of the country.

8. The operations of the Department have increased considerably during the year; the length of lines was increased by 923 miles, and the length of wires by 3,903 miles: the number of departmental offices was increased by 38; and the number of Railway offices under the supervision of the Department was increased by 114.

9. The importance of increasing the number of offices was dwelt upon in a previous Resolution;* and the utilisation of postal or other agency for working branch offices in places where the traffic would not warrant the employment of highly paid signallers was indicated as the best method of economically securing the extension of operations. The report under review does not show clearly to what extent it has been found practicable to employ such agency, and the Government of India desires that this point may be attended to in future reports.

* Nos. 169-90T., dated 31st May 1881.

10. During the year under review it was decided that private companies should be allowed to undertake telephone operations in cities and towns, and licences for the establishment of telephone exchanges were granted to the Oriental Telephone Company for Calcutta, Bombay, Madras, and Rangoon.

11. The present report shows that the maintenance of the lines and the working of the Department have been continued in a high state of efficiency; the speed of transmission on the trunk lines has in almost every case been increased; complaints against the Department have decreased, and interruptions have been fewer both in number and duration.

12. Before the report for the current year is submitted, the present Director-General, Colonel R. Murry, will have relinquished the charge of the Department which he has so ably administered, and in acknowledging the testimony borne by him to the officers of all grades and subordinates of the Department, the Government of India desires to place specially on record once more its appreciation of the value of the services rendered by Colonel Murray throughout his service, and more especially as Head of the Department during the Afghan war and the recent years of rapid progress and development.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Secretary of State and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon and the Commissioner in Sind.

Madras, Bombay, Bengal, North-Western Provinces and Oudh, Punjab, Central Provinces, British Burma, Assam, Hydrabad, Central India and Rajputana.

Also to the Foreign Department for communication to the Resident at Mysore and Coorg.

Also, that a copy of this Resolution be forwarded to the Director-General of Telegraphs for information and guidance.

Also, that a copy of this Resolution and of the Report and Appendices A, B, and F, be forwarded to the Home Department of the Government of India for information, and be published in the *Gazette of India*.

By order,

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

ADMINISTRATION REPORT

OF

THE INDIAN TELEGRAPH DEPARTMENT

FOR

1881-82.

DURING the year 1881-82 the Department has continued to work at a satisfactory profit, and has yielded to the Government the net revenue of ₹6,18,568; this being the difference between the total earnings and working expenses during the year, the former amounting to ₹38,54,212, and the latter to ₹32,35,644. The above result, satisfactory as it is, shows a less profit than that of the last two years; this being accounted for by the fall of message revenue on the cessation of war in Afghanistan. Notwithstanding this, however, the net profit of 1881-82 is in excess of that of 1878-79, excluding from the latter ₹57,151, the value of free copies of Government and Press messages, which was credited to Revenue up to and including that year, but omitted from the accounts since 1880-81.

2. The number of paid messages was 1,613,375, against 1,642,777* for the previous year; but this slight decrease is more than accounted for by a falling-off in State messages to the extent of 67,853. Private messages show an increase of 38,451.

3. The length of lines was increased from 19,679 to 20,602 miles, and of wire from 54,433 to 58,336 miles. In addition to this, 1,233 miles of wire, not the property of Government, were maintained, as against 1,655 during the previous year; this decrease in the mileage of non-departmental wire being due to the transfer from the Railway to the Departmental posts of the Sind, Punjab and Delhi Railway wires between Mooltan and Lahore, subsequent to the dismantlement of that section of the Company's lines.

4. The number of Departmental Offices increased from 254 to 292, and at the close of the year 794 Railway Telegraph Offices were technically supervised by the Department, as compared with 680 during the previous year.

5. The speed of transmission on the trunk lines has been in almost every case enhanced, as will be seen from the details given in paragraph 27.

* Excluding 13,453 sent from Ceylon.

Complaints from the public on account of non-delivery, errors and delays, show (*vide* paragraph 26) a decrease of 6·37 per cent.

6. The following Summary gives a clear idea of the annual progress made since 1871-72, and Diagrams A, B and C, attached to this Report, show respectively the number, value, and speed of transmission of the messages disposed of year by year:—

Heads of Financial Results.	1871-72.	1872-73.	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.

REVENUE AND EXPENDITURE.

7. The total net capital expenditure of the Department during the year, shown in Diagram B, amounted to ₹13,97,110, and the capital account now stands, at the close of the year 1881-82, at ₹2,73,65,377.

8. The following is an abstract Revenue account for 1881-82, with the corresponding figures for 1880-81:—

Expenditure.	1880-81.	1881-82.	Receipts.	1880-81.	1881-82.
	₹	₹		₹	₹
Repairs of Lines	2,46,756	1,82,110	Message Revenue earned	38,71,179	32,11,001
Direction	1,79,148	1,66,082	Receipts from State Railways for interest, maintenance of lines and offices, &c.	4,08,336	4,21,177
Accounts	48,208	39,351	Receipts from Guaranteed Railways	95,096	97,714
Superintendence	6,31,314	6,33,778	Claims from Guarantors	45,090	55,202
Line Maintenance	1,37,985	1,50,880	Sales of Books, Gazettes, &c.	16,978	16,171
Check Office	44,679	45,657	Miscellaneous	18,465	9,210
Signalling	16,90,818	17,39,681	News-free and other *pro-formâ* Message Revenue	46,498	43,737
Minor Undertakings	12,032	14,680	Total	45,01,637	38,54,212
Non-Departmental Offices	1,51,056	1,81,776			
Telegraph Stamps	6,665	9,432			
Other Items	22,809	22,207			
Total	31,71,470	32,35,644			
Net Profit	13,30,167	6,18,568			

9. From the above it will be seen that the Net Profit for the year amounts to ₹6,18,568, as remarked in paragraph 1, which also explains the falling-off as compared with the previous year.

10. A summary of the financial results obtained in working the Department during the year 1881-82 is given in Appendix A, together with the results of the operations for the last five years.

TRAFFIC.

11. The percentage of Inland and Foreign messages under the sub-heads of 'State' and 'Private' was as follows:—

Class.	Inland.		Foreign.		Total.	
	No.	Value.	No.	Value.	No.	Value.
State	15·24	21·75	0·26	1·23	15·50	22·98
Private	64·16	41·02	20·34	36·00	84·50	77·02
Total	79·40	62·77	20·60	37·23	100·00	100·00

Full details are given in Appendix B, the following summary of which gives the actuals and percentage of increase as compared with the corresponding figures for the previous year:—

Class of Messages.	ACTUAL. Increase. Inland. No.	Inland. Amount. ₹	Inland. Amount. a.	Foreign. No.	Foreign. Amount. ₹	Foreign. Amount. a.	Net. No.	Net. Amount. ₹	Net. Amount. a.	Decrease. Inland. No.	Inland. Amount. ₹	Inland. Amount. a.	Foreign. No.	Foreign. Amount. ₹	Foreign. Amount. a.	Net. No.	Net. Amount. ₹	Net. Amount. a.
State	...	...	...	...	...	...	...	...	...	67,812	5,99,053	5	41	19,408	11	67,853	6,18,462	...
Private	2,427	...	...	36,024	38,442	11	38,451	...	...	...	75,131	2	...	...	...	...	56,668	7
Total	2,427	...	...	36,024	38,442	11	38,451	...	...	67,812	6,74,184	7	41	19,408	11	29,402	6,55,150	7

Class of Messages.	PERCENTAGE. Increase. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.	Decrease. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.
State	...	...	...	...	...	...	21·62	46·16	0·95	32·53	21·34	45·56
Private	0·23	...	12·33	3·44	2·90	...	...	5·39	...	...	...	1·46
Total	0·23	...	12·33	3·44	2·90	...	21·62	25·07	0·95	32·53	1·78	16·94

12. The number and value of *paid* messages, as compared with the previous year, were as follows:—

Year.	State. No.	State. Value. ₹ a.	Private. No.	Private. Value. ₹ a.	Total. No.	Total. Value. ₹ a.
1880-81 (excluding Ceylon, 3 months)	3,17,959	13,57,178 12	13,24,818	25,08,972 7	16,42,777	38,66,151 3
1881-82	2,50,106	7,38,716 12	13,63,269	24,72,284 0	16,13,375	32,11,000 12

It will be observed that the net falling-off is almost entirely due to a decrease of State telegrams, and that the Private message traffic shows a numerical increase. On analysing the slight falling-off in the *value* of Private messages, it is found that Foreign Traffic exhibits a satisfactory increase, while the diminished value of Inland private telegrams, amounting to ₹75,131-2-0,

is fully accounted for by a decrease in Sind, the Punjab and Beluchistan, these being the Divisions most affected by the cessation of military operations in Afghanistan, and in the Indore Division where the opium trade is stated to have been unusually dull.

Inland Tariff.

13. During the year under review, important changes were sanctioned in the rules and rates for inland messages.

Local Tariff.—From the 9th April 1881, a tariff of 4 annas for every six words, with free delivery within a radius of one mile, was experimentally introduced in Calcutta, and this system was on the 4th July extended to the other Presidency towns and to all places having a central and branch telegraph offices.

Charge by the word in excess of the initial group.—From the 1st July 1881, the system of charging by groups of six words was altered in favour of a rate of 2 annas per word for any excess over the minimum charge of one rupee for the first group of six words, but Press and Indo-Ceylon messages continued to be charged by the group.

Introduction of the Urgent, Ordinary, and Deferred classification of State, Private, and Press Inland messages.—With effect from the 1st January 1882, the Government of India sanctioned my proposal to enhance the carrying power of the wires by accepting, at half the ordinary rate, messages to be transmitted when the lines are unoccupied, such 'deferred' messages to be delivered on the morning following their despatch; also to give priority of transmission to telegrams paid for at a higher rate than 'ordinary' traffic. Under this system the tariff adopted was as follows:—

LOCAL messages,—*i.e.*, those tendered during the working hours of a Telegraph Office for transmission in ordinary course within a radius of six miles of a Central Government Telegraph Office.		DEFERRED messages,—*i.e.*, those tendered during the working hours of a Telegraph Office for transmission at night and to be delivered at destination early on the following morning.		ORDINARY messages,—*i.e.*, those tendered during the working hours of a Telegraph Office for transmission and delivery in ordinary course.		URGENT messages,—*i.e.*, those tendered during the working hours of a Telegraph Office for immediate transmission with precedence over ordinary messages.	
First eight words or groups of three figures.	Each additional eight words or groups of three figures.	First eight words or groups of three figures.	Each additional word or group of three figures.	First eight words or groups of three figures.	Each additional word or group of three figures.	First eight words or groups of three figures.	Each additional word or group of three figures.
℞ a.	℞ a.	℞ a.	℞ a.	℞ a.	℞ a.	℞ a.	℞ a.
0 4	0 4	0 8	0 1	1 0	0 2	2 0	0 4

As the Ceylon Government was not prepared to introduce such differential rates, it was decided to treat Indo-Ceylon traffic as *Foreign*, and to apply to it the international system of a word charge.

During the three months of the year under review that this system was in operation, the percentage of traffic disposed of in the several classes was as follows:—

	Private.	State.	Total.
Local	0·43	0·65	0·52
Deferred	22·03	62·70	29·04
Ordinary	72·64	7·12	61·32
Urgent	4·90	29·53	9·12

The figures for the period in question show—

I.—That a numerical increase accrued in Private traffic.

II.—That the mean product per message exhibits a falling-off.

III.—That a slight increase of revenue accrued on Private messages.

IV.—That the order issued by the Government, that all State messages not classed 'Urgent' by the senders should be treated and charged as 'Deferred,' resulted in a slight decrease in the earnings on account of telegrams on the public service.

V.—That 'Urgent' messages had not been numerous enough to decrease the speed of transmission of 'Ordinary' messages.

VI.—That as the 'Urgent' and 'Deferred' systems become appreciated, there is a small but steady increase in the respective proportions of these special classes of messages.

VII.—That the 'Deferred' system has undoubtedly met a public want, and is largely resorted to, while it is an evidence of the differential tariff presenting no difficulty or complication, that this system was at once extensively resorted to by native senders.

Inland Traffic.

14. The following tabular statement shows at a glance the growth of Inland traffic, State and Private, during the last ten years:—

YEAR.	STATE.						PRIVATE.						TOTAL PAID MESSAGES.					
	Number.	Value.	PERCENTAGE OF *number* COMPARED WITH PREVIOUS YEAR.		PERCENTAGE OF *value* COMPARED WITH PREVIOUS YEAR.		Number.	Value.	PERCENTAGE OF *number*, COMPARED WITH PREVIOUS YEAR. 1879-80	290,022	11,86,035	38·69	...	59·45	...	1,037,330	15,32,853	7·57	...	6·87	...	1,327,952	27,19,488	13·13	...	24·84	...
1880-81	314,370	13,98,222	*8·64	...	*9·59	...	1,044,107	14,08,582	*4·82	...	...	*3·64	1,358,477	37,06,804	*5·69	...	*2·33	...
1881-82	346,630	9,99,492	...	*21·62	...	*28·52	1,035,197	12,16,681	*0·82	...	...	*3·66	1,380,375	30,15,331	...	*1·69	...	*23·07

* Excluding Ceylon.

The decrease in number and value of State messages observable in the year under review is traceable to the cessation of military operations in Afghanistan, and this cause has also affected in a lesser degree the figures for Private messages (see paragraph 12).

Foreign Tariff.

15. There was no change in the international rules and rates during the year, so far as the correspondence between India and Europe is concerned; but the laying of an additional cable across the Atlantic in September 1881, by the new 'American Telegraph and Cable Company' at a reduced tariff of Frcs. 1·90 per word, induced the other Companies to lower their rates to Frcs. 1·25 per word.

As already mentioned, Indo-Ceylon traffic was brought under the Foreign Message Rules from the 1st January 1882, and from the 25th of the same month a revised tariff for Press messages between India and Ceylon was introduced.

16. The following is a calendar of the principal extensions of foreign lines and alterations in tariff:—

August 1881.—Tariff to North America by the Anglo-American, Direct United States, and new French-American Companies' cables, reduced from Frcs. 2·50 to 1·25 per word.

September 1881.—A new cable laid from Penzance to Nova Scotia by the American Telegraph and Cable Company, and opened for traffic at Frcs. 1·90 per word.

1st January 1882.—Foreign Telegram Rules and a charge by the word adopted for Indo-Ceylon messages, the rates being:—

From stations west of Chittagong to Ceylon, 3 annas per word.
" east " 4½ "

25th January 1882.—The following charges were adopted for Indo-Ceylon *Press* messages :—

	First 32 words.	Each additional four words.
	₹ a. p.	₹ a. p.
From stations west of Chittagong to Ceylon	1 8 0	0 3 0
„ east „ „	2 4 0	0 4 6

February 1882.—Chinese land line opened from Shanghai to Nankin and Tientsin.

March 1882.—A new cable laid by the Eastern Telegraph Company from Trieste to Corfu.

17. In the number and value of combined State and Private foreign message traffic, there has been an increase, the percentage of which, as compared with previous years, is as follows :—

Year.	Percentage of increase compared with previous years.	
	No.	Value.
1873-74	12·72	7·33
1874-75	15·75	6·24
1875-76	8·87	8·21
1876-77	22·44	5·34
1877-78	38·14	27·28
1878-79	5·28	0·42
1879-80	18·56	16·82
1880-81	29·52*	17·47*
1881-82	12·14*	1·62*

* Excluding Ceylon.

18. Appendix C shows the percentage of number of messages between India and places to the westward, by each route, since 1871-72. The comparative results for the last six years are shown in the following table :—

	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.
Viâ Suez	60·22	79·10	75·04	74·88	74·44	66·91
„ Teheran	37·57	17·72	23·07	22·64	23·52	31·62
„ Turkey	2·21	3·18	1·89	2·48	2·04	1·47

The decrease in the proportion *viâ* Suez, and the corresponding increase *viâ* Teheran in 1881-82, is due to the Eastern Company's cables, Bombay to Aden, having been broken in July and August 1881.

Details of the number and value of messages to, from, and through India by each route will be found in Appendix B.

19. The following return of Foreign traffic corresponds with that given in paragraph 14 for Inland traffic :—

Year.	State.						Private.						Total.					
	Number.	Indian share of charge.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.		Number.	Indian share of charge.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.		Number.	Indian share of charge.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.

* Excluding Ceylon.

The slight decrease in value of State Foreign messages is partially due to their diminished length on the cessation of operations in Afghanistan, and partially to the use of the *Word Code* which was in use for the three last months of the year.

20. Diagrams A and B give the number and value, respectively, of Inland and Foreign paid messages from year to year, as far back as the record is available.

21. Appendix D is a classified abstract of signal offices, according to the amount of traffic originating at each, for the past nine years.

22. Appendix E shows the number of offices, according to their classification, in each Division, open at the end of the year 1881-82. The following were opened and closed during this year :—

Opened.	Date.	Closed.	Date.
Ruthtollah	26th April.	Abdool Rahman	24th April.
Chiplun	26th May.	Kandahar	19th April.
Rajapur	Ditto.	Togh	1st April.

Add—Number of offices opened during 1881-82	46
	38
Number of permanent offices open on 31st March 1882	292

Complaints.

23. In Appendix F is given a synopsis of all the complaints received from the public during the year regarding telegrams, showing separately those affecting this Department only, and those in which Railway or Foreign Telegraph lines were alone concerned. To facilitate comparison with the results of the previous year, the figures for 1880-81 are also given in Antique type.

24. Of complaints affecting this Department only, 446 were received, 294 being admitted, and 152 rejected as groundless. The bulk of the rejected complaints were in respect of alleged non-delivery of messages, the senders erroneously supposing, in default of receiving replies, that their messages had miscarried. The number of admitted complaints during 1880-81 was 314. The year under review, therefore, shows a decrease in the cases of non-delivery, delay, errors, &c., so far as these formed the subject of complaint from the public.

25. The number of complaints received, in which Railway and Foreign Telegraph administrations were concerned, was 352 against 328 in the previous year; of the former number, 206 were admitted, 63 rejected, and 24 were still under investigation at the close of the year.

26. In Departmental complaints admitted, there is a net decrease for the year under review of 6·37 per cent.; in those chargeable to Railways and Foreign Telegraphs, there is an increase of 33·77 per cent.

Speed of Transmission.

27. The average time occupied in the transmission of messages over the long main routes during the year under review and the five previous years, was as follows :—

	1876-77.		1877-78.		1878-79.		1879-80.		1880-81.		1881-82.	
	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.
Calcutta to Kurrachee	0	47	0	41	0	55	1	10	1	22	0	55
Kurrachee to Calcutta	0	44	0	26	0	29	0	45	0	59	0	41
Calcutta to Bombay	1	13	1	14	0	57	1	13	1	6	1	1
Bombay to Calcutta	1	13	1	15	0	59	1	4	1	1	1	3
Calcutta to Madras	1	51	2	28	1	22	1	27	1	14	1	9
Madras to Calcutta	1	56	2	20	1	25	1	27	1	15	1	13
Bombay to Madras	0	46	1	16	0	33	0	40	0	45	0	44
Madras to Bombay	0	48	1	8	0	38	0	48	0	49	0	45
Bombay to Kurrachee	0	47	0	43	0	41	0	43	0	53	0	45
Kurrachee to Bombay	0	47	0	28	0	31	0	37	0	48	0	40
Rangoon to Calcutta	11	49	7	41	2	32	3	15	2	9	1	28

NOTE.—The speed of transmission for the last fifteen years is shown in Diagram C.

News-free Messages.

28. The number and value of news-free messages, as compared with the previous year, have been as under:—

	No.	Value. ₹
1880-81	2,417	43,558
1881-82	746	42,193
Decrease	1,671	1,365

The decrease in number is due to the withdrawal from the free list of the Meteorological Reports of the Bengal Government, those of the Government of India having been similarly transferred to the paying list during the preceding year. The fact that, notwithstanding the numerical decrease, there is no appreciable diminution in value, is traceable to the fact that mail steamer reports being transmitted under the *precedence* signal have, during the last three months of the year, been valued under the "urgent" tariff.

Traffic with Railway Telegraphs.

29. Appendix G shows the number and value of messages exchanged with State and Guaranteed Railways during the past 9 years. A comparison of the figures of the period under report with those of the preceding 4 years shows the following result:—

PARTICULARS.	1877-78.			1878-79.			1879-80.			1880-81.			1881-82.		
	No.	Value. ₹	a.	No.	Value. ₹	a.	No.	Value. ₹	a.	No.	Value. ₹	a.	No.	Value. ₹	a.
Total exchanged with State Railways	28,985	32,339	14½	37,783	43,322	5 1/12	40,994	56,188	5½	72,135	77,528	15⅔	107,664	1,10,934	9½
Total exchanged with Guaranteed Railways	96,225	93,372	15	94,453	95,952	0	99,213	1,40,554	9	98,510	1,31,898	9⅓	78,640	83,005	4⁵
TOTAL TRAFFIC EXCHANGED WITH RAILWAYS	125,210	1,25,712	13½	132,236	1,39,274	5 1/12	140,207	1,96,742	14½	170,645	2,09,427	8 11/12	186,304	1,93,939	14 1/12

The falling-off in 1881-82 under Guaranteed Railways is due to the transfer of the East Indian Railway to the State. There is a corresponding increase under State Railways, plus the increment due to growth of traffic.

Press Messages.

30. Appendix H is the statement of the number and value of paid News messages sent at the reduced Press rates, month by month, during the year. As compared with the previous year, there is a falling-off in number of 257, and in value of ₹ 5,797-11-0. This decrease must be ascribed to the cessation of the military operations in Afghanistan, which, during their continuance, gave an abnormal impetus to lengthy News messages.

Undelivered Messages.

31. The number of undelivered messages during 1881-82 was 4,963, against 5,220 in the previous year. The causes of non-delivery were as follows :—

	No.
1. Not found, address insufficient	1,239
2. Not found at address given	1,539
3. Address changed in transmission	60
4. Left address given, new address unknown	336
5. Left India	105
6. Left for original station	1,048
7. Returned by Dead Letter Office	287
8. Addressee, or address given, not known	91
9. Refused	106
10. Other reasons	152
TOTAL	4,963

The percentage of undelivered messages was 0·27, against 0·28 of the previous year. It will be observed that the causes of the non-delivery in the great majority of the cases were such that the Telegraph Department could not guard against, notwithstanding the careful endeavours invariably made to trace out the addressees.

Interruptions on Departmental Lines.

32. From the following tabular statement it will be seen that there has been a decrease in the total number, average duration, and percentage of interruptions, as compared with previous years :—

	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.
Total number of interruptions	386	350	310	300	285
Aggregate duration, *hours*	5,790	4,910	3,900	3,200	2,736
Average duration, *hours*	15	14	12·6	10·7	9·6
Interruptions per every 100 miles of wire	0·92	0·80	0·59	0·54	0·51

33. The above figures include the following *interruptions due to extraordinary causes:*—

June 1881.—Between Bassein and Diamond Island, lasting 295 hours. Several trees fallen on line during heavy gales, and wire broken in many places. Impossible to get down the river by boat owing to heavy sea; a steam launch had eventually to be hired.

July 1881.—Between Sibi and Gundikunduff, lasting 96 hours. Line washed away by heavy floods, and river for some days was impassable. Two men of working party died of sunstroke.

August 1881.—Between Gundikunduff and Hurnai, lasting 184 hours. Two interruptions: many miles of line washed away. Weather during August was unprecedented.

August 1881.—Between Bassein and Diamond Island, lasting 120 hours. Heavy weather, many posts fallen on line, and wire buried in mud in several places.

August 1881.—Between Bassein and Diamond Island, lasting 157 hours. Wire connections in the Kaboungmhan Cable House maliciously changed.

August 1881.—Between Shoaygheen and Tonghoo, lasting 99 hours. Heavy weather, trees fallen on line in several places, post broken, and wire submerged in a nullah.

September 1881.—Between Ngathineyoung and Bassein, lasting 92 hours. Several trees fallen on line and wire under water in several places. River risen very high, and country on either side flooded for miles inland.

September 1881.—Between Shoaygheen and Moulmein, lasting 97 hours. Wire maliciously cut.

September 1881.—Between Bassein and Diamond Island, lasting 258 hours. Line on ground by fall of a number of large trees; also by interference with Cable Houses at Ngapootan by swarms of ants building nests in the Lightning Dischargers.

January 1882.—Between Dalhousie and Bukloh, lasting 176 hours. Line broken at large span; heavy fall of snow at Dalhousie; heavy rain all the way from Amritsar up to foot of hills; roads blocked, travelling impossible.

February 1882.—Between Dalhousie and Bukloh, lasting 120 hours. Line broken at large span owing to heavy fall of snow.

February 1882.—Between Mussooree and Chakrata, lasting 192 hours. Line broken in several places owing to heavy fall of snow.

Signalling Establishment.

34. There were 970 Departmental and 167 Military Telegraph Masters and Signallers on the strength of the establishment on the 31st March 1882, as compared with 942 and 181, respectively, on the 31st March 1881. Of the Military Telegraph Masters and Signallers, 114 were employed in Departmental and 53 in purely Military Offices. In addition, 109 soldiers were trained in telegraphy during the year, and 62 were under instruction at the close of the year.

Deaths	10
Dismissals	12
Resignations	12
Struck off strength of establishment	3
Transferred to other Departments	2
TOTAL	39

35. The casualties among Departmental Telegraph Masters and Signallers have been 39, as per margin, against 25 during the previous year, a percentage of 4·02 against 2·65.

36. It having been found that the use of the sounder instrument in training classes and signal offices had gradually resulted in a considerable deterioration in the style of signalling, and that the absence of periodical compulsory examinations in this essential qualification of a telegraph operator had led to a falling off in the rate at which a large number of the signalling staff could send and receive messages, recording instruments have been supplied to all training classes, and every Telegraph Master and Signaller is further required

to show annually that he is up to the required standard in transmitting and reading Morse symbols; failing which, stoppage of promotion or reduction in grades, according to circumstances, is ordered. Detailed instructions have also been drawn up for the guidance of instructors in telegraphy, and the steps thus taken to improve the style and speed of signalling show a very favourable result.

Electrical.

37. Mr. C. L. Schwendler was compelled by severe illness to leave India on the 2nd July 1881; from this illness—an affection of the brain—he never recovered, and he died in Germany on the 6th January 1882. Mr. Schwendler's scientific acquirements, and the valuable services he rendered to this Department for a period of nearly fourteen years, are well known to the Government. In his death the Indian Telegraph Department has sustained the loss of an officer whose abilities in his profession were perhaps second to those of no Electrician in the world.

Mr. W. P. Johnston who had previously, on several occasions, ably officiated as Electrician, and who was again acting in that post at the time of Mr. Schwendler's death, has held the appointment to the end of the year.

EXTENSIONS OF LINES AND WIRES, AND LINE MAINTENANCE.

38. Appendix I is a classified list of all Telegraph lines in India and Burmah on the 31st March 1882. The following are the total mileages of line, wire and cable, contrasted with those existing on the same date in 1881:—

	Line miles.	Wire miles.	Cable miles.
1880-81	19,679	54,318	115
1881-82	20,602*	58,219*	117 5*

39. In addition to the above, the Department maintained 448 miles of line and 1,233 miles of wire, the property of Railway Companies, particulars of which are given in Appendix J.

40. The following are the principal works which were carried out in each Division during the year 1881-82:—

Arakan Division.

41. The only new construction work done in this Division was the erection of new telephone lines for Messrs. Mohr Brothers and Bulloch Brothers at Akyab; the former in lieu of the wire previously rented to them, which was suspended on the same posts as the Rangoon main line Morse wires. The length of new line erected is 3·29 miles, and of wire 4·99 miles. The substitution of old pattern Prussian porcelain for iron-hooded insulators was effected from Rue to Tounghoop. The usual annual repairs were carried out, including the clearing of heavy tree jungle; 9 masts and 292 posts (of iron wood), were erected in place of a corresponding number which had become decayed and unserviceable.

Assam Division.

42. The line has been extended from Dibrugarh to Doom Dooma, 44·5 miles, and thence to Sudya, 20·5 miles.

A branch telephone line from Samaguting to Nichuguard and Dimapur, length 13 miles, has been constructed. Extensive repairs and additions were effected to the cable across the Brahmapootra, opposite Dhubri, having been necessitated by the serious erosion of the banks of the river during the monsoon. The erection of a wire for the Assam Railway and Trading Company on the posts of the existing departmental line from Dibrugarh to Doom Dooma, with a branch thence to Makum coal-field, was commenced, and completed along the site of the Railway to the point up to which the earthworks had progressed, *viz.*, 14 miles.

* Including 311 miles of line, 494 miles of wire, and 1·6 miles of cable in telephone circuits.

Bellary Division.

43. The lines from Arkonam to Mysore and from Auspree to Hyderabad, were transferred during the year from the Bellary to the Madras Division. The former section includes the line from Bangalore to Mysore, the reconstruction of which along the Mysore State Railway has been finished. The construction of the line from Kolhapur to Ratnagiri, with branches to Chiplun and Rajapur, has been completed; as also that of a third wire in the section Satara to Kolhapur. The annual repairs included, besides jungle cutting and clearing, &c., reinsulation and the removal of ingot joints; the last-mentioned work has yet to be completed by the removal of the remaining ingot joints in the Bangalore-Bellary Section of No. 7 line.

Bengal Division.

44. The chief works undertaken and completed were the construction of a line from Mozufferpore to Hutwah, 124 miles in length; the addition of two Railway wires to, and the strengthening of, the departmental lines, Khana to Sahebgunge, 143·75 miles; doubling the carrying capacity of the line, by replacing single by double coupled posts, between Sealdah and Raneegunge, 119·853 miles; (56 miles of this were completed at the close of the official year); laying two cables across the River Hooghly; and erecting two wires from Calcutta to Baidyabati, 20·75 miles. A span, 1,890 feet in length, was erected across the River Gunduck, between Hajeepore and Sonepore, the iron masts for which were manufactured at the Telegraph workshops at Alipore (Calcutta). The East Indian Railway lines, besides undergoing the usual maintenance repairs, were strengthened by the addition, in each mile, of six (iron-rail) posts, from near Dumraon to Luckeeserai, 133·5 miles.* Ingot joints were cut out of all the lines between Dinapore and Allahabad, with the exception of the branch from Moghal Sarai to Benares; also between Cawnpore and Agra. **An additional wire from Moghal Sarai to Allahabad, 96·5 miles, was erected; and the line from Khana to Sahebgunge, 144 miles, was dismantled.** On the Calcutta and South Eastern State Railway Extension, the line from Sonarpur to Mugrah station, 15 miles, was constructed; as also a line from Durbhunga to Peepra Ghât, 24·366 miles, on the Tirhoot State Railway Eastern extension. The line from Mozufferpore to Bettiah was entirely reconstructed, being brought from the road to the Railway route, and an additional wire, 77 miles in length, was erected. The suspension of an extra wire from Calcutta to Barrackpore, 17·25 miles, in connection with that under erection in the Dacca Division (paragraph 47), was commenced, but not completed before the end of the year. Besides petty constructions of lines within towns and their suburbs, ten telephone lines were erected during the year, comprising 16·6 miles of wire.

Bombay Division.

45. The section of line from Bombay to Dadar, 7·376 miles, was completely reconstructed, double-coupled posts (Hamilton standards), to carry all the wires connecting Bombay with the rest of India, having been erected along the route of the Bombay, Baroda and Central India Railway. Between Dadar and Kalyan, along the Great Indian Peninsula Railway, that part of the line which traverses salt-water swamps, was reconstructed with double rail-posts. A new line was constructed from Pali to Godhra, 16·971 miles of line and 18·621 of wire. The existing line was transferred from the old to the new Nerbudda bridge. All iron-hooded insulators were replaced by porcelain ones, old pattern Prussian, on the section of No. 9 line between Kalyan and Satara; and the reinsulation of Nos. 11 and 12 lines from Surat to Baroda was nearly completed. The town of Barsi was connected with Sholapur by a line of telegraph, branching off from the main route at Barsi road, 20·61 miles distant from Barsi. A new line was constructed from Hotgi to Beejapur, 59·05 miles, and

* In this and other Divisions, old rails, wherever procurable, from the Railway admiministrations, have been largely used as Telegraph posts, with success both as regards efficiency and economy.

an extra wire, 9 miles, was erected to place Beejapur in communication with Sholapur. Besides petty constructions in towns and their suburbs, additional telephone lines, amounting to 21·755 miles of line and 57·793 miles of wire, were erected.

British Burma Division.

46. The construction of the line connecting Moulmein with Tavoy, 199·75 miles, of which 69 miles of line and 109 of wire were put up in 1880-81, was completed. The construction of the Rangoon-Tonghoo line along the Sittang Valley Railway was commenced at Rangoon and completed up to Pegu, 45 miles. Amongst town line constructions and reconstructions may be mentioned the alterations of the lines in Rangoon, where telephone lines have been erected, comprising 13·294 miles of line and 65·717 of wire; the departmental main lines having been transferred to a new and direct route, and the ABC and telephone wires separated from one another. New cables were laid across the rivers Kemmendine and Irrawaddi at Rangoon and Prome respectively, and an old cable across the latter river was lengthened, and the cable house moved back in consequence of the erosion of the bank. The following lines have been insulated:—Prome to Thyetmyoo; Poungdeh to Myanoung; and Moulmein to Thyethamine. The No. 8 wire Rangoon to Prome, was reinsulated on the result of tests made by the insulator detector.

Dacca Division.

47. A single wire line from Kaunia to Kurigram, 17 miles, was constructed for the use of the Kaunia-Dhurla State Railway. A temporary line was erected between Sultanpur on the Northern Bengal State Railway and Serajgunge, 63 miles; and a similar line from Nattore on the same railway to Rampore Bauleah, 25·25 miles. A private telephone line, 1·75 miles in length, was put up on the Lizziepur Tea Estate at Kurseong. The erection of an additional wire from Barrackpore was in progress; in connection with which cables were laid across the Pudda, Dhullessary and Booragunga rivers. In addition to ordinary maintenance repairs, the alignment was altered for 8 miles of the section, Goalundo to Pangsa; 12 miles remain to be finished; and **all insulators other than porcelain (old or new Prussian pattern) were removed from the two Government wires, Poradaha to Jalpaiguri, and replaced by those** of the above patterns.

Ganjam Division.

48. The first local wire from Midnapore to Cuttack has been reinsulated; as also that from Madras to Bezvada. A second local wire has been erected from Raneegunge to Cuttack, 280·6 miles; and a similar wire from Madras to Bezvada, 261·604 miles. The construction of the line from Jumboo to Hukitollah, which was in progress at the end of 1880-81, was completed.

Indore Division.

49. The erection of a second wire from Morar to Indore, 300·577 miles, was commenced, and completed with the exception of 10·25 miles between Shajapur and Dewas, which section was in progress at the close of the year. An additional wire, for departmental use in connection with the above, was erected from Indore to Khandwa, 86·5 miles. A single wire line was constructed from Mhow to Dhar, 32·7 miles. The erection of a third wire from Khandwa to Nusseerabad, 381·14 miles, for the railway, was commenced, a portion of which between Rutlam and Nusseerabad remained at the end of the year to be completed. An alteration of the alignment of the railway for three miles from Khandwa necessitated the reconstruction of the telegraph lines for that distance.

Madras Division.

50. A line of two wires was constructed from Negapatam to Tanjore, 48·25 miles, and a single wire thence to Trichinopoly, 31 miles; total length, including town lines at Tanjore and Trichinopoly, 82·45 miles of line and

132·4 of wire. The old line from Shiyali to Karikal, 29 miles, was dismantled. An extra wire was erected from Shiyali to Tuticorin, 256·55 miles, necessitating an addition of 1·7 miles of line. From Ootacamund to Devalla a line of 19·32 miles and 38·8 miles of wire was constructed. The Madras Town Local Office lines, comprising 14·55 miles of line and 33·84 of wire, were constructed. The reconstruction of the line along the Mysore State Railway from Bangalore to Mysore, including the suspension of two extra wires between those places, which was in progress at the close of 1880-81, was completed. The maintenance repairs of the line from Bangalore to Vellore included the cutting-out of all ingot joints from that section.

Malabar Coast Division.

51. The reconstruction of the line from Tellicherry to Mercara, which was in progress at the close of last official year, was completed. The other works executed in this Division have been confined to maintenance repairs. The cutting-out of ingot joints between Tellicherry and Palamcotta, and the testing of the line from Cochin to Tellicherry with the insulator detector, with a view to reinsulating the line, were commenced.

Nagpur Division.

52. The extension of the line along the Nagpur and Chhattisgarh State Railway was completed up to Musra, 135·2 miles from Nagpur. Public lines (worked by telephone) were constructed at Warora and Nagpur; the former 1·25 miles of single-wire line for the Wardha Coal State Railway; the latter 1·25 miles of lines and 2·5 of wire for the Nagpur and Chhattisgarh State Railway. The insulation of the main line between Bhusaval and Sconi (*viâ* Nagpur) has been improved by the replacement of all half or whole-hooded insulators by old pattern Prussian porcelain, or perforated hood insulators; and on the local line No. 5 between Bhusaval and Nagpur, 25 per cent. of the whole-hood insulators have been replaced by porcelain ones, old pattern, Prussian.

Oudh and Rohilkhand Division.

53. Lines were constructed from Gopalpore to Nanu, 32 miles, and from Gopalpore to Jeyra, 6·3 miles, for the Irrigation Department, the latter worked by telephone. A line of 1·7 miles was constructed connecting Naini Tal with the Naini Tal Cantonment Office. At Cawnpore a telephone line was constructed for the Provincial State Railway, 2·86 miles of line and 3·14 miles of wire, and another wire was erected for the Cawnpore and Farukhabad State Railway for 1·4 miles from the Bilhaur Station to the Esun Nuddee Bridge. The maintenance repairs included the re-erection of the Kosi river span mast and the substitution of steel strand for iron wire.

Punjab Division.

54. The line from Tarnaul to Peshawar was under reconstruction along the Railway and was near completion at the close of the official year under report. A temporary line from Tarnaul to Attock, 50·64 miles, was constructed, by which Rawal Pindi, Hasan Abdal, Haji Shah, and Attock, were connected. 5·5 miles of wire was erected on the line from Rawal Pindi to Tarnaul. The line, Peshawar to Jamrud (10 miles of line and wire), was constructed, and the temporary line dismantled. Telephone lines connecting the several offices of the Punjab Northern State Railway staff at Rawal Pindi were constructed, comprising 2·71 miles of line and 7·22 of wire; and the Rawal Pindi Railway Station and workshops were connected by a line one mile in length. The whole of the lines in the Lahore Station were reconstructed with wires of uniform gauge (450 lbs. per mile). The line from Miani to Bhera, 8 miles, was reconstructed, and from Bhera to Lala Musa, 62·7 miles, was doubled. The line between Lahore and Mooltan, 207·44 miles, was reconstructed, and the wires of the Sind, Punjab and Delhi Railway telegraph transferred to the posts of the new line: new supports were erected, including 63·12 miles of rail posts; and the old wooden line was dismantled. The

railway line, Amritsar to Lahore, 33·28 miles, was also reconstructed (with ¾ standards), and the old wooden posts dismantled. The old bully-line from Lahore to Ferozepore, 52 miles, and the section of Sind, Punjab and Delhi Railway line from Muzaffarabad to Sher Shah, 3 miles, were dismantled. The Guggur river was crossed by seven strand steel wire in three spans of 1,200 feet each, with supports specially secured to withstand the hill torrents. A system of Government telephone lines was established at Lahore, by which ten public offices intercommunicate through the Government Telegraph Office as an exchange; in addition to which, four Police Offices are similarly connected with the District Superintendent of Police and with one another. A separate private system includes nine Sind, Punjab and Delhi Railway Offices connected for exchange and four other private telephone offices. The various telephone circuits comprise 10·102 miles of posts and 49·152 miles of wire. In Simla, His Excellency the Commander-in-Chief was placed in telephonic communication with the Quartermaster-General's Office and the Intelligence Branch by a flying line composed of 1·9 miles of wire supported on trees.

Rajputana Division.

55. A temporary single-wire line was constructed from Rewari to Dadri, 34·5 miles: a third railway wire was erected on the line from Bandikui to Delhi, 134·5 miles. On the Ajmere-Nusseerabad line, 13·4 miles, a second wire was erected; and the suspension of a third wire on the same section of line was commenced, and was about to be completed at the close of the year. At Ajmere, telephone lines were constructed, one for the railway and one for the Commissioner, comprising 3·34 miles of line and 5·13 of wire. In addition to the ordinary maintenance repairs, the Morar No. 3 wire was reinsulated with porcelain insulators, old pattern, Prussian, from Syeean to Dholpur. Alterations were effected to the Morar Railway Station lines; and the Sojat Quarry line was dismantled.

Sind Division.

56. A line was constructed from Koombri to Badani, 4·4 miles of posts and 6·8 of wire. A single-wire field telegraph line (40 miles) was constructed during the Waziri expedition, which was dismantled on the retirement of the troops, its object having been fulfilled. Improvements were made in the insulation of the Jungshahi-Hyderabad departmental lines; the railway train-wire, Ruk to Sibi; and the Sind, Punjab and Delhi Railway lines, Kiamari to Kotri. The last-named section of line was also strengthened. The line over the Bagatora Hill on the Indus Valley State Railway was reconstructed: 50 miles of the section, Jacobabad to Sibi, was cross-stayed. Twenty-five miles of the old road line, Sukkur to Hyderabad, was dismantled.

Beluchistan Sub-Division.

57. The semi-permanent line which was last year constructed up the Hurnai route was extended from Kochali to Sharigh, a distance of 45·5 miles. A semi-permanent line was also constructed from Killa Abdulla to Kushdil Khan, 28 miles, through the heart of the Pisheen Valley. Subsequently, on our troops leaving Killa Abdulla, Kushdil Khan was connected with Gulistan by a slight alteration of the line. The semi-permanent Pir Chowkey loop was made permanent with iron standards. On the evacuation of Kandahar on the 22nd April 1881, the wire was dismantled as far as Chaman, as the troops marched stage by stage. In the following October, on the withdrawal of our troops from Chaman and Killa Abdulla, the line between those places, 15 miles, was dismantled.

STATE AND GUARANTEED RAILWAY TELEGRAPHS.

58. A return showing the number of Telegraph Offices and the extent of line and wire maintained for State and Guaranteed Railways, together with the capital expended by this Department on behalf of each railway, is included in Appendix J of this report.

STORES AND WORKSHOPS.

59. The following are the items of expenditure under this head during the year:—

	R
Purchase of stores in India	1,95,869
London stores, including freight and landing charges	5,10,941
Workshop and Press	2,16,591
Store-keeping	77,653
Superintendence	32,029
Stationery received from the Superintendent, Government Stationery, and value of printing done by the Superintendent, Government Printing, without charge	44,010
TOTAL	10,77,093

60. The value of the outturn from workshops was R3,69,800 and from Press R35,976 against R3,01,276, and R40,921 of the previous year.

61. On the 3rd June 1881, the charge of the Store Department was relinquished by Major Eckford, R.E., who was obliged to proceed on leave in consequence of illness, which resulted in his death on the 19th August 1881.

By the death of Major Eckford, whose services, extending over a period of 13 years, were principally in connection with the Stores and Workshops, the Department has lost a most talented and energetic officer.

On the 21st June 1881, Mr. C. H. Reynolds was appointed to the charge of the Stores and Workshops, which he continued to hold throughout the year. Under his administration substantial improvements were made in the general working of this, one of the most important branches of the Department.

PERSONAL.

62. Mr. A. J. L. Cappel proceeded on furlough on the 28th March 1881, and Lieutenant-Colonel H. Mallock officiated as Deputy Director-General throughout the year under report; Mr. W. R. Brooke during the same period officiated as Director, Construction Branch.

To the officers associated with me in the Direction, Lieutenant-Colonel H. Mallock, Officiating Deputy Director-General; Mr. J. H. Lane, Director, Traffic Branch; and Mr. W. R. Brooke, Officiating Director, Construction Branch; also to Mr. F. G. Teale who, during the absence of Mr. Lane on privilege leave, acted as Director, Traffic Branch, my best acknowledgments are due for the loyal and able assistance I have invariably received from them, and for the efficient and zealous manner in which the important duties respectively entrusted to them have been carried out.

It also affords me much gratification to place on record my appreciation of the ability and zeal evinced by the majority of the officers of all grades; and to bear testimony to the general good conduct of the members of the subordinate establishment.

CALCUTTA,
The 25th November 1882.

R. MURRAY, *Colonel,*
Director-General.

APPENDICES.

APPENDIX A.

Summary of Financial Results of the Indian Telegraph Department for the year 1881-82.

			To end of previous year.	1881-82.	To end of 1881-82.

D. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch.)

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29th MAY 1883.

GENERAL REMARKS.—Rain has fallen more or less throughout the country during the past week. In the Madras Presidency, in the Punjab, in Assam, in Mysore and Coorg, and in the Rajputana States it has been general, while in Bengal, the North-Western Provinces and Oudh, the Central India States and British Burma there has been rain in many districts. In the Bombay Presidency it has been extremely slight.

In the Madras Presidency the second paddy crop in some districts is being harvested, and in the Punjab the *rabi* harvest still continues in a few districts. Standing crops are reported to be good or fair in the Madras Presidency, good in Bengal and in the Mysore State. Sugarcane is doing well generally in the Bombay Presidency, in the North-Western Provinces and Oudh, and in Bengal, but is said to be suffering from heat in Sambalpur in the Central Provinces. Early rice and jute are thriving in Bengal, and indigo prospects are good. The mango and melon crops have been somewhat damaged at Allahabad by the violent storms of the past week, and crops on the threshing floor in Sitapur in Oudh and in one or two places in the Punjab have also been injured by the recent rain.

Ploughing and sowing continue in parts of the Bombay Presidency, in the Punjab, and in Bengal, and have been resumed also in Sylhet and Cachar as fast as the floods abate. In the Bombay Presidency, in the North-Western Provinces and Oudh, in the Punjab, in the Central Provinces, and in the Nizam's territories preparations for the *kharif* sowings are in general progress.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(May 30th)		
Bellary ...	·15 (one station)	Standing crops generally good; harvest paddy, yield average.
Kurnool ...	1·5 (one station)	Standing crops good; harvest second crop paddy, outturn twelve annas; small pox and cattle-disease in parts, latter more general.
Ganjam ...	·75 (average of fifteen stations).	Standing crops cotton and *ragi* thriving, fever, small-pox, and cholera decreasing; cattle-disease slight.
Kistna ...	·04 (average of three stations).	Small-pox continues in Guntur circle; fever and guinea-worm slight; cattle-disease decreasing in three taluks and disappearing in others.
Chingleput (Madras) ...	1·4 (one station)	Standing crops good where water available; harvest of *kar* paddy and *ragi*, yield three-quarter; small-pox and cattle-disease slight in parts.
Coimbatore ...	1·71 (average of thirteen stations).	Standing crops good; harvest paddy, *cholum*, and *cumboo* in parts, outturn above average in one and average in two taluks; fever and small-pox in parts.
Tanjore ...	.....	Standing crops good; harvest paddy, gingelly seed and flax, outturn below average.
Madura ...	·24 (average of two stations).	Standing crops fair; cholera in parts; cattle good, except in parts of one taluk.
Malabar ...	·97 (average of fourteen stations).	First crop germinating, several taluks harvesting; third crop continues in parts; fever and small-pox continue, latter in all taluks.
Travancore ...	1·07	Cultivation progressing; fever and small-pox continue. *General Remarks.*—No rain in Tanjore; general prospects good.
Bombay—(May 30th)		
Kurrachee ...	*Nil*	Weather sultry; river at Kotri on 28th, 7 feet 6 inches, against 8 feet 5 inches on corresponding date last year; 5 fresh cases of small-pox in Kurrachee from 13th to 25th, no deaths, remaining sick 7; total 483 cases, 120 deaths; disease in eight villages in districts, 71 fresh cases, 1 death, remaining sick 39; fever in six talukas; cattle-disease in Shahbander; *kharif* preparations going on; mango crop attacked by blight; wheat, red rice, and *bajri* in Kurrachee 24, 32 and 36, in Sehwan 32, 40 and 40, in Ghorabari 20, 44 and 44, and in Mirpur Botoro 22, 32 and 34 lbs. per rupee respectively.
Hyderabad ...	In Moro ·35 on 23rd	River low; weather warm and close at night; small-pox in seven, fever in three, and cattle-disease in four talukas; wheat 24, *bajri* 39, *juari* 50, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	2·21	Preparation for *kharif* continues; cholera in Ahmedabad disappeared, the persons last reported have recovered; small-pox in Parantej; wheat 27 and *bajri* 28 lbs. per rupee.
Baroda ...	Slight rain	Weather cloudy; sugarcane in good condition; health good; *bajri* 27¾ and rice 24 lbs. per rupee.
Surat ...	·21	Preparation for *kharif* continues; small-pox in Surat, average death 1; *juari* 43 and *nagli* 49 lbs. per rupee.
Násik ...	Slight rain in Igatpuri and Niphad.	Land being prepared for next season; locusts in Násik, Igatpuri, Sinnar, Dindori, Niphad, and Chandor talukas; wheat 27, *bajri* 30, and rice 22½ lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	Rain on 27th, 28th, and 29th; total of week, ·29.	Total since 1st January ·41, being ·12 below average; abnormal temperature 1° degree cool on 27th, *nil* on 28th, and 1° warm on all other days; vapour in air slightly in excess of normal; abnormal wind southerly from 23rd to 28th and rather strong on 23rd and 28th; wind normal on 29th; distant lighting on 29th.
Poona ...	.....	Cholera cases 636, fatal 278; locusts in seven talukas; *bajri* 37 and *juari* 44 lbs. per rupee, in Poona *bajri* 34 and *juari* 41 lbs. per rupee.
Ahmednagar ...	.....	Cholera throughout the district, except Nagar, Karjat, and Jamkhed; cattle-disease in Parner; small-pox in Jamkhed; *juari*—maximum 72 lbs. per rupee in Jamkhed, minimum 42 lbs. in Akola; *bajri*—maximum 60 lbs. per rupee in Jamkhed, minimum 23 lbs. in Akola; locusts in Shrigonda and Akola talukas.
Sholapur ...	.....	Cholera in twenty villages, out of 117 cases, 47 fatal; *juari* 56½ and *bajri* 54 lbs. per rupee.
Dharwar ...	1·10 in Ron; slight in Nargund, Gadag, and Karajgi.	Rain wanted in other talukas; ground being prepared for early crops; paddy being sown in seven talukas; scarcity of drinking-water still continues in eight villages of petta Nargund; a flight of locusts passed through Hubli taluka; small-pox in Kod and fever in Mundargi; rice minimum 24 and *juari* 45 lbs. per rupee.
Kanara ...	.....	Preparing ground and sowing seed for monsoon crop; sugarcane plants healthy; small-pox in three and fever in two talukas; common rice in Karwar 12⅔ seers per rupee, in district average 13¾ seers.
Rajkot ...	.....	General health good; weather hot and cloudy; cholera continues in Navanagar taluka; *bajri* 29 and *juari* 32 lbs. per rupee.
		General Remarks.—Preparations for *kharif* in progress; slight rain in a few districts, much wanted in the Southern Mahratta country; locusts in Násik, Ahmednagar, Poona, Satara, Ratnagiri, and Belgaum; cholera in Poona, Ahmednagar, Sholapur, Satara, Belgaum, Kaladgi, and Tanna; small-pox and fever in a few places.
Bengal—(May 30th)		
Chittagong ...	2·11	Weather hot and oppressive; prospects of crops fair; prices risen; cholera and cattle-disease continue; fever reported.
Dacca ...	*Nil*	Sowing of paddy, *sessamum*, and *moong* pulse and planting of sugarcane going on; prospects of standing crops not so good, owing to untimely rising of weather.
24-Pergunnahs (Calcutta)	Alipore, ·39	Sowing of *amun* crops on low lands and of early crops going on, but more rain wanted; price of common rice stationary; health of people generally good.
Moorshedabad ...	·84	*Bhadoi* sowing not yet over; *boro* paddy doing well, in some places it is being harvested; except a few cases of cholera here and there, public health generally good.
Rajshahye ...	Rain very partial	East of district has had a good supply; crops doing well; *boro* paddy being harvested; health good.
Burdwan ...	2·4; Raneegunge, ·35; elsewhere, *nil*.	Rain wanted except at head-quarters; prospects of *aus* crop bad in Cutwa sub-division; health generally fair.
Rungpore ...	·10	Prospects of *aus* rice and jute generally good; *cheena* being cut; *kaon* in ear; *amun* being sown; cholera reported from some parts of district, especially from Nilphamari sub-division.
Bhagálpur ...	·44	Prospects of crops good; more rain wanted.
Purneah ...	·07	Crops doing well; weeding and sowing progressing; health fair; a little cholera reported.
Patna ...	*Nil*	No crop in the fields excepting *cheena*; collection of cotton continues; a few cases of cholera reported from Barrh and Behar sub-divisions, cholera epidemic in Behar town; small-pox prevalent in thana Silao.
Durbhunga ...	*Nil*	Crops flourishing; prices stationary; cholera in town and district.
Hazáribágh ...	·95	Weather hot and close; fields being prepared; sowing of paddy commenced; cholera and small-pox still reported; general health good.
Cuttack ...	·80	Weather very hot; atmosphere cloudy; ploughing in progress; sowing of early rice commenced; public health good.
		General Remarks.—There has been rain this week in many parts of these provinces; agricultural prospects are generally favourable, though in several places more rain is still required, and in parts of Northern and Eastern Bengal too much rain has somewhat interfered with the cultivation of low lands in several places; early rice and jute have been sown and sugarcane planted, and the young plants are thriving well in Behar and other places; prospects of indigo crop now reported to be favourable; in Darjeeling tea outturn very uneven; sporadic cholera still reported from several places and small-pox from a few, and fever from two or three districts.
N. W. Provinces and Oudh—		
Benares (May 29th)	Benares, ·30	Sugarcane being irrigated; health of men and cattle generally good; prices steady.
Allahabad („ 30th)	Rain in seven tahsils, averaging ·70.	Violent storms uprooting trees and damaged mango and melon crops on 22nd, 23rd, and 24th, weather still cloudy; cholera in two fresh localities; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Gorakhpur (May 28th)	.....	Local storms in the beginning of the week; sugarcane under irrigation; some scattered cases of cholera and cattle-disease; prices stationary.
Jhánsi („ „)	Mow, 1·10; Garotha, ·20.	Weather cloudy and stormy, with a very slight fall of hail; manuring of fields for *kharif* crops is going on; prices stationary; health good; no cattle-disease.
Agra („ 29th)	·20 to ·80 during week	Indigo and sugarcane being irrigated; fever in three and small-pox in five parganas; sporadic cholera in two parganas; prices stationary.
Bareilly („ „)	Over 1·00 ...	Weather abnormally cold, cloudy, and damp, and shows signs of clearing; markets steady.
Meerut („ „)	Slight rain in all tahsils	Weather cloudy and cool during past week, wind easterly; health good, but slight cattle-disease in Meerut and Bagpat; supplies abundant; prices unchanged.
Kumaun („ „)	Good rain during week	Sun now required; some small-pox, otherwise general health good; prices easier.
Lucknow, („ „)	Lucknow, ·30; Malihabad, ·53.	Wind easterly; prices stationary; occasional reports of cholera and small-pox; general health good.
Partabgarh („ „)	·55 at Sadr; ·40 at Kunda; slight drizzle at Patti.	Prices have fallen slightly; general health good; small-pox still reported from Kunda.
Sitapur („ „)	Rain throughout district; 2·70 at Sadr.	Sugarcane sowings have increased; some damage to grain still in threshing floors in *ganjar* lands; small-pox much less; prices unchanged.
Fyzabad ...	.....	No report received.
Rae Bareli (May 28th)	·09	Weather cloudy; cholera increased and small-pox and fever continue; prices almost stationary.
Cawnpore („ 29th)	Light rain in six parganas.	Temperature lower; small-pox and fever diminished in town and district; *rabi* crops harvested; cattle-disease slight; prices stationary.
Farukhabad („ „)	Occasional showers	Weather quite cool during week and cloudy; health of people good; markets well supplied; prices steady.
		General Remarks.—Rain has fallen all over the province, most heavily in the northern districts; violent storms in Allahabad have damaged the mango and melon crops; cholera seems to be spreading in the Allahabad and Rae Bareli districts, and a few cases are reported from Gorakhpur, Lucknow, Agra, and Almora; prices remain steady.
Punjab—(May 29th)		
Delhi ...		Health fair; no fresh cases of cholera; prices steady.
Hissar ...	Rain throughout the district; 1·1 at Sadr.	Health good; prices fluctuating.
Umballa ...	1·4	Health fair; preparations being made for *kharif* and sugarcane sowing; prices stationary.
Jullundur ...	·54	Health good; *kharif* ploughing commenced; prices steady.
Amritsar ...	1·3	Health good; wheat in field injured to some extent by rain; prices generally steady.
Sialkot ...	·1	Measles abating; crops on threshing floors damaged by rain; prices steady.
Ferozepore ...	·2 at Sadr; 3·2 at Moga.	Health good; harvesting in progress; prices steady.
Lahore ...	2·7	Health good; prices stationary.
Rawalpindi ...	·1	Health good; prices falling.
Mooltan ...	1·1 at Sadr	Health good; harvesting continues; preparations being made for *kharif* sowings; prices steady.
Dera Ismail Khan ...	·76	Health good; harvesting in progress; prices steady.
Peshawar ...	Slight rain	Health good; prices falling.
		General Remarks.—Rain has fallen generally throughout the province; health and harvest prospects good.
Central Provinces—(May 30th)		
Nagpur (May 30th)	·39	Weather cloudy; land being prepared for *kharif* sowings; small-pox continues; cholera in Kotal tahsil; prices steady.
Jubbulpore ...	·24	Weather cloudy; threshing and winnowing completed; prices stationary; small-pox continues; cattle-disease in some places; wheat 22 and rice 15½ lbs. per rupee.
Saugor (May 28th)	1·65	General weather pleasant latterly; ploughing proceeding; prices easy; health fair.
Khandwa („ 29th)	.....	Weather hot, occasional clouds; preparations for *kharif* sowings continue; 19 deaths from small-pox; wheat 16, rice 15, and *juari* 19 lbs. per rupee.
Seoni („ „)	·18 on 29th, with storm.	Twelve deaths from cholera; large exports of wheat; prices stationary.
Hoshangabad ...	.....	No report received.
Raipur (May 26th)	.....	Weather cool latterly; health good; cattle-disease in Sumga and Dhamtari; prices steady.
Sambalpur („ 24th)	·55	Weather hot, storm on 23rd evening; prospects fair; sugarcane suffering from intense heat; health good; prices steady.
		General Remarks.—Rain in some districts; weather close and cloudy; ploughing proceeding; small-pox and cholera in some districts, but slight; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(May 26th)		
Akyab ...	·11	Total rainfall 15·35 inches; 10 deaths from cholera in three townships, otherwise public health good; cattle-disease in one township; 13 deaths from cholera for week ending 19th May not reported.
Rangoon ...	1·50	Total rainfall 9·12 inches; 4 deaths from small-pox, otherwise public health good; prices of *ngakyouk* paddy per 100 baskets 91 rupees with good demand, and of *ngatsain* 90 rupees with few buyers.
Bassein ...	*Nil*	Total rainfall 4·67 inches; 5 deaths from cholera and 7 from small-pox in one township, otherwise public health good; 3 cattle mortality in one township.
Prome ...	1·28	Total rainfall 5·16 inches; 1 death from cholera in district, otherwise public health good.
Amherst (Moulmein) ...	4·33	Total rainfall 11·94 inches; public health in Moulmein and district good; 67 deaths of cattle in Wagaroo township; ploughing commenced in district.
Toungoo ...	·88	Total rainfall 8·08 inches; public health good.
		General Remarks.—Public health on the whole good; cattle-disease in parts of the Akyab, Bassein, and Amherst districts; rainfall irregular, moonsoon not yet general; price of paddy fairly steady.
Assam—(May 30th)		
Gauhati (May 29th)	·53	Weather dry and hot; fever, cholera, and cattle-disease still prevalent in the interior and at the station; some damage to *ahu* paddy on low grounds reported.
Sylhet („ 30th)	0·32	Fine weather; water rapidly failing; cultivation generally resumed; cholera and small-pox reported.
Cachar („ „)	·15	Weather warm; ploughing for *dumahi* crops again commencing in those parts of the district not under water; common rice 11 seers per rupee; a few deaths from small-pox and cholera reported.
Dibrugarh („ „)	0·23	Weather warm; ploughing for *sali dhan;* prospects of *ahu* crops good; cholera reported.
Mysore and Coorg—(May 30th)		
Bangalore ...	·56	Standing crops in good condition; prospects favourable.
Mysore ...	·29	Standing crops in good condition; prospects favourable.
Mercara ...	1·94	Recent rain has been favourable for agricultural operations; paddy has been sown in the Mercara taluk, and is being reaped in the Surlabimut-nad; coffee berries are swelling; price of food-grains stationary; public health indifferent; fever common; small-pox prevalent in Yedar-nad and Gudinad.
		General Remarks.—1·60 at Chickmagalar; standing crops in good condition; prospects favourable; public health generally good prices have slightly fallen.
Berar & Hyderabad—(May 30th)		
Amráoti (May 30th)	.....	Weather hot and cloudy; preparations for *kharif* sowings continue; wheat 16 and *juari* 26 seers per rupee.
Akola („ „)	.....	Weather hot; cultivators busily engaged in preparing land for ensuing season.
Hyderabad („ 25th)	.....	Reaping of *tabi* crops nearly concluded; preparations for coming *kharif* crops continue; cholera and small-pox prevail in some taluks; no cattle-disease; prices—wheat 16¾, coarse rice 10¼, white *juari* 23½, yellow *juari* 29, and *tur* 21½ seers per current sicca rupee.
Hyderabad („ 31st)	.....	Reaping of *tabi* crops nearly concluded; preparations for coming *kharif* crops continue; cholera in mild form in four taluks; small-pox still prevalent; prices—wheat 16½, coarse rice 10, white *juari* 23½, yellow *juari* 28½, and *tur* 25½ seers per current sicca rupee.
Central India States—(May 30th)		
Indore ...	·37	Weather cloudy and cool; health good.
Morar (Gwalior) ...	1·0	Weather cool and cloudy; small-pox decreasing.
Sutna ...	·45	Dust-storms and thunder, weather cooler and cloudy; health good.
Rutlam ...	.....	No report received.
Neemuch ...	2·51	High winds; public health good.
Goona ...	·94	Weather cloudy; health good; wheat 24 seers per rupee.
Bhopal ...		No report received.
Agar ...	2·0	Eight admissions and 5 deaths from cholera reported from Mandsaur; prospects favourable; prices stationary.
Sehore ...	Slight shower	Storm on 25th; crops and public health good.
Nowgong ...	·59	Weather cloudy; heavy dust-storms; public health good.
Manpur ...	.....	No report received.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (May 13th)	6·04	During nights storms with thunder and rain, weather now clear with occasional clouds.
Sirohi („ 27th)	1·10	Tanks nearly full; fair amount of water in wells; health good; hot on 21st and 22nd, from 23rd weather completely changed; storms from north-east with thunder and rain of daily occurrence, at intervals; weather cloudy and cool.
Marwar („ 25th)	1·18	About fifteen days water brought into tanks by recent rains; health comparatively good; crops have been harvested; change in temperature, two storms during nights of 22nd and 23rd, with good fall of rain; cool, hot winds ceased; prices falling.
Meywar („ „)	0·38	Tanks and wells fair; health good; crops harvested; weather monsoonish.
Harowti („ 26th)	Deoli, 1·07; Tonk, 1·52; Kotah, 1·57; Shapura, ·21.	Fierce dust-storm all Tuesday night, rain and high winds since; grain in fields damaged; weather cloudy and cooler; health good.
Jhallawar („ 23rd)	.....	Hot dust-storms; health good.
Ajmere („ 29th)	2·21	After unusually severe heat, constant storms and rains have fallen; health good.
Jeypore („ „)	2·05	Weather cloudy, with variable winds; health good; prices stationary
Ulwur („ „)	0·73	Cotton sowing progressing; cholera continues; prices steady.
Nepal—(May 24th)		
Katmandu (May 24th)	Drops	Prospects good; weather showery and rather close at times.

SUMMARY OF WEATHER CHARACTERISTICS FOR 6 MONTHS, NOVEMBER 1882 TO APRIL 1883, AND NOTES ON THE PRESENT PROSPECTS SUBMITTED BY THE METEOROLOGICAL REPORTER TO THE GOVERNMENT OF INDIA.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department,—Meteorological, No. 48, dated Simla, the 31st May 1883.

Read the following :—

Memorandum on the chief weather characteristics of India during the six months, November 1882 to April 1883, and a Note on the present prospects submitted by the Meteorological Reporter to the Government of India.

RESOLUTION.

Memorandum on the chief weather characteristics of India during the six months, November 1882 to April 1883.

The early days of November were marked by the presence of a large shallow area of deficient pressure over the Bay of Bengal (a feature usually characteristic of the month of October), and the north-easterly and easterly winds which prevailed at this time on the Arakan coast and over the head of the Bay were a portion of the cyclonic circulation around this system. By the 10th, however, the normal distribution of pressure, &c., had set in; the barometer had risen both over the land and over the Bay; and the barometric readings became highest in the Punjab, while the area of deficient pressure slowly receded southward, and was followed by a gradual extension of the north-easterly current. On the 14th, 1½ inches of rain fell at Madras, and from that date onward, the north-east monsoon, now nearly a month late, blew on the Carnatic coast with average strength; within the week following over 6 inches of rain fell at Madras. From the 15th to the 20th, there was a large excess of pressure over the whole of India. This had the effect of pushing so far to the southward the baric minimum on which the Carnatic rainfall depends, as to place all parts of the country except the extreme south outside the area of precipitation. On the 22nd a well-marked cyclonic depression was formed near Ceylon,

and, gradually intensifying, passed over the land on the evening of the 24th, striking the coast between Madras and Negapatam. This centre advanced on a north-westerly course, across the peninsula, occasioning rain as far north as Bengal; and between November 21st and 27th the following amounts were registered :—

	Inches.		Inches.
Vizagapatam	... 8·10	Madras	... 9·89
Masulipatam	... 6·38	Negapatam	... 7·72
Colombo	... 6·97 inches.		

After the disappearance of this depression, the barometer rose; but subsequently a new disturbance appeared near Ceylon, and the distribution, at the close of the month, shewed a large area of high pressure in the north-west, with an area of deficient pressure over Madras, where heavy rain was falling.

The averages of the whole month shew that, notwithstanding the general excess of pressure which existed about the middle of the month, the average pressure was below the mean, except in Sind, Gujarat, the Punjab, and the North-Western Provinces, while the rainfall was above the average except in the same provinces. At Madras itself, the rainfall was remarkably heavy on the 15th and 16th.

On December 1st, the depression noticed at the close of the previous month lay near Masulipatam. During the next two or three days, it gradually spread out and broke up; and, as it disappeared, the rainfall ceased along the Carnatic coast, and the monsoon became unsteady. During the remainder of the month, the changes were generally unimportant, and little occurred worthy of note.

The returns of the whole month shew that pressure was below the mean in nearly all places, except Gujarat, Khandesh, and Burma; but that the deficiency was very uniform. Except in Madras, temperature was above the mean, while the total amount of rain was below the small average of the month even in the Punjab and North-Western Provinces.

In January, the pressure is usually highest in the Punjab and along the Himalayan range; almost equally high over the Central Provinces, slightly lower along the Gangetic valley, and lowest in the neighbourhood of Ceylon. In the month under review, the high pressure over the Punjab was less marked than usual, while, along the foot of the mountains, it was more pronounced, and extended so far eastward and south-eastward as to occasion a considerable excess of pressure over Bengal and Arakan. On the 10th the ordinary cold weather showers occurred in the Punjab and North-Western Provinces; and, on the 15th, a fall of snow commenced at Murree, which subsequently spread to other hill stations. From this date till the close of the month, snow-storms occurred at intervals all along the hill ranges, and the amount of snow at some hill stations was estimated at from 5 to 10 feet. During the greater part of this period, the pressure along the foot of the mountains was high; but, on the 25th, it fell over the Punjab, and the fall of rain and snow over Northern India was intensified. The mean temperature of the month was generally below the average, but the variation was not large, since the excessive temperatures which prevailed at the beginning of the month in a measure counterbalanced the deficiency at its close. The day of greatest cold below the average, over Northern India, was the 29th, when, at some stations in the Punjab and North-Western Provinces, a deficiency of from 15° to 21° on the normal average of the month was registered. The following figures give the mean deficiency for the concluding days of the month in Northern India :—

25th	... 1° 8	29th	... 6° 6
26th	... 3° 5	30th	... 6° 4
27th	... 5° 0	31st	... 6° 3
28th	... 6° 3		

The rainfall was in excess over the greater part of the country, particularly in the north.

In Bengal, the rainfall of the three months, November, December and January, amounted to from 2 to 4 inches.

The February distribution of pressure was not, on the whole, very different from the normal average. During nearly the whole month, the highest pressures lay over the Punjab; and over Orissa on the one hand, and the Western Ghâts on the other, the barometer was relatively low; but on the 16th, 17th and 18th the pressure gave way over the Punjab, and a minimum was formed there. The weather then became generally unsettled, and at Darjeeling early in the month, and in the Punjab more or less throughout, snow falls occurred. The effect of this mass of snow on the slopes of the hills was to increase the difference of temperature, and consequently of pressure, between the hills and the plains, and to render the winds more northerly than usual over nearly the whole of Northern India.

As another consequence, there was a greater depression of temperature over the whole of Northern India, than even during the last fortnight of January, as the following figures, giving the average temperature anomalies of the stations north of the parallel of 24° N. lat., will shew :—

February 1st	... —9° 0	February 5th	... —5° 4
„ 2nd	... —7° 1	„ 6th	... —4° 9
„ 3rd	... —7° 2	„ 7th	... —3° 9
„ 4th	... —5° 9		

In Bengal, the weather, which was fine during the first part of the month, became unsettled at its close, and sharp thunderstorms occurred.

In March, as a general rule, an area of high pressure lies over Sind, the Indus Valley and Rajputana; and an area of low pressure extends from Mysore north-eastward to Nagpore, Orissa and Bengal. With some exceptions, these conditions were fulfilled during the present month. During the first six days, however, the distribution was anomalous, readings being highest in Arakan and lowest in the North-West; but from the 7th to the 16th there was very little departure from the average; and though between the 16th and 19th a low pressure area again appeared over the Punjab, &c., after the latter date the normal conditions became re-established, and lasted more or less decidedly till the close of the month. One principal feature of the month was the slight baric depression, which lay to the northward of Bengal, and apparently occasioned the formation of small thunderstorms, which passed across the province, and produced the somewhat [illegible] rainfall there [illegible] precipitation were also reported [illegible] Provinces, as well as in Bengal and Assam, west districts of the North-West [illegible] and elsewhere the departures were very irregular. Some snow fell at the hill stations and at Quetta. Temperature was below the average everywhere, the deficiency being between 2° and 5° in the Punjab, Sind and Rajputana, between 2° and 3° over the North-Western Provinces and Bengal, and about 0·5° in the south of Madras.

In April also, the average distribution of pressure was fairly well maintained; relatively high pressure having existed on the west coast, and in Arakan, with low pressures over the Gangetic valley and the Central Provinces. Oscillations and slight changes from day to day have occurred, and the centre of the low pressure area has been sometimes in the Punjab, at other times in Behar or the Central Provinces; but the main features noticed above have held throughout. In the south of Madras, however, there existed a slight anomaly in the shape of a persistent low pressure area, which was formed about the 7th, and lasted till close upon the end of the month.

This complication occasioned somewhat irregular winds in the south of the peninsula. In the west and north-west the general wind direction was between west and north-west, over the Bay between south and south-west, and in Assam east; but at times, notably from the 22nd to 24th and on the 28th and 29th, when the low pressure area was most pronounced over the Central Provinces, the east current extended right up the Gangetic valley. Turning to the averages of the month, we find that, except at a few [illegible] stations in the Punjab, and at a few isolated places elsewhere, the pressure was [illegible] below the average of the month, the deficiency being apparently most decided [illegible] Western Bengal and the adjacent parts of the North-Western Provinces. At the same time, temperature has shewn a considerable rise, and though the general deficiency existing during the previous month did not disappear from Arakan and parts of the peninsula and Bengal, the means generally were above the average. The greatest excess

was at Neemuch (5° 1), but Sirsa, Jhansi, Jacobabad and Rajkot shewed an almost equally high departure. Rainfall shewed a deficiency, except in Arakan and Eastern and Lower Bengal, where there was a slight excess; while the deficiency was as much as 6 or 7 inches in Assam, and between ½ and 2 inches in the Punjab and Madras.

Considering the results of the whole six months, the returns shew a slight excess of rainfall in Bengal and the North-Western Provinces (due principally to heavy falls in January) and a heavy excess (due to the November rains) in the north of Madras; but elsewhere, particularly in Assam, there was a deficiency. The past cold season will, however, be principally remarkable for the heavy fall of snow, which occurred along the Himalayan range, and the exceptional cold prevailing during January, February, and March over nearly the whole of India. What influence this mass of snow may exert on subsequent weather is at present problematical.

W. L. DALLAS,

Asst. to Meteorological Reporter to the Govt. of India.

Additional Note.

That the unusually dry weather now prevailing over the North-Western Himalaya, and that which, though less abnormal, characterises the whole of North-Western India at the present time, is an effect of the unusual accumulation of snow, is a conclusion justified by the experience of the last few years; and were it not that the snow is rapidly decreasing under the unobstructed radiation of the sun, there might be some reason, judging from the present limited experience, to anticipate some retardation of the rains in the Upper Provinces, and possibly even in Western India generally. But, on the other hand, the fact that during the months of April and May the atmospheric pressure over the greater part of the country has been below the normal average of the season, is one which, arguing from the same experience, portends favourably for the timely influx of the monsoon. In Bengal it may be said that the present prospects are wholly favourable.

HENRY F. BLANFORD,

SIMLA; *18th May 1883.*

Meteorological Reporter to the Govt. of India.

Since the above note was written, there has been heavy rain for many days on the outer hills, and more or less on the plains of the Punjab, and apparently a very heavy fall of snow on the higher ranges. At the present time, as seen from Simla, the latter are white with snow down to a level of about 11,000 or 12,000 feet. And some 500 feet of the top of the Chor (11,982 feet) is also covered with a snow cap. If, therefore, the mountains of Lahoul, Spiti and other more distant ranges have shared this fall, if it is as extensive as it is apparently heavy on the visible ranges, and if the views which the experience of recent years seems to justify, *viz.*, that an unusual extent and thickness of snow on the Himalaya is productive of dry north-west and west winds in North-Western India, are valid, we must be prepared for a long spell of dry weather and a retarded rainfall in the Upper Provinces. The present season will serve as a test of the validity of the above view.

Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the papers be printed in the Supplement to the *Gazette of India*.

T. W. HOLDERNESS,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 30th May, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

NEW MEMBER.

The Hon'ble D. G. BARKLEY took his seat as an Additional Member.

PANJÁB LOCAL SELF-GOVERNMENT.

The Hon'ble MR. BARKLEY moved for leave to introduce a Bill to make better provision for Local Self-government in the Panjáb. He said:—

"MY LORD, this Bill is one of a series of measures for the development of local self-government, the first suggestion of which is to be found in the Resolution of the Financial Department, No. 8353, dated 30th September, 1881, on the subject of the further decentralization of finance.

"One of these, relating to the Central Provinces, has already become law, and others, relating to the North-Western Provinces, are now under the consideration of this Council. The present Bill is intended to provide for the better constitution of district committees and for the establishment of local boards in the Panjáb. The subject of municipalities and municipal taxation is reserved for separate treatment.

"It may be well to premise that this Bill is not the first attempt to associate the people of the Panjáb, outside of municipal towns, in the management of their own affairs. Before 1871 each district had its road and ferry fund committee, but these committees consisted entirely of officials, European and Native, and had in most cases very limited funds at their disposal. In 1871, financial reasons made it necessary for the Supreme Government, while partially decentralizing finance, to make assignments to Local Governments, falling short of the estimated expenditure of the departments, the charges of which were transferred to them; and one of the consequences of this was the withdrawal of the ferry fund income from local committees, while certain charges previously borne provincially were transferred to them. Further taxation for local purposes thus became necessary, and this was provided for by the Panjáb Local Rates Act, No. XX of 1871, which authorized the imposition of a local rate not exceeding six pies in the rupee of the annual value of land in the Panjáb, the annual value being, for the purposes of the Act, assumed to be double the land-revenue. The tax thus authorized, therefore, fell at the rate of one anna in the rupee, or 6¼ per cent. on the land-revenue; and this was in addition to cesses already imposed

in connection with the settlement of the land-revenue to provide for roads, schools and district-post, which usually amounted to 2½ per cent. more. To control the funds so raised, the Act enabled the Lieutenant-Governor to appoint committees in each district, and this power was exercised by appointing committees, consisting both of official and non-official members, the former being generally appointed *ex officio*, by the name of their office, and the latter by nomination, for a term of two years at a time. In this way a considerable number of the more intelligent and influential inhabitants of districts have, for the last twelve years, been associated with the leading officials in the expenditure of the district funds, and have learnt to take some part in devising and carrying out measures for the general welfare. In some districts more progress has been made in this direction than in others, and indeed in some districts the poverty of the district funds or other local circumstances did not admit of much being done.

"This Bill must, therefore, be regarded, not as the first step towards the introduction of local self-government in the Panjáb, but as intended to facilitate further progress in a direction in which we have for some time been moving. It has been framed to give effect to the proposals for the extension of local self-government explained in the Resolution of the Panjáb Government, No. 1777, dated 7th September, 1882, by conferring upon district committees greater administrative and financial independence, by constituting local boards for areas smaller than districts, by improving the methods of appointing members of local bodies, and by providing for the transfer of additional services to local management and control.

"The Panjáb Local Rates Act, No. V of 1878, by which the corresponding Act of 1871 was repealed, increased the amount of the local rate from six pies to eight pies per rupee of annual value, the additional two pies, being one-fourth of the rate, being credited to the Local Government for the purpose of providing additional funds to be expended for the prevention or relief of famine, while the remaining three-fourths were left to be expended by district committees for the benefit of the districts in which the rate was levied. In addition to the funds thus supplied, other cesses, known as road, school and district-post cesses, are levied by a percentage on the land-revenue, under authority of arrangements made at the time of the settlement of the land-revenue in each district. The road and school cesses are usually levied at the rate of one per cent. each upon the land-revenue, and the district-post cess at the rate of ½ per cent.; but in several districts, and in parts of some other districts, the last of these cesses is not levied at all. The proceeds of the road and school cesses, in addition to three-fourths of the local rate, have hitherto been at the disposal of district committees.

"It has been considered advisable to amalgamate these cesses with the local rate, and to substitute the authority of the legislature for the settlement-arrangements under which they have hitherto been collected. It is, therefore, proposed to repeal Act V of 1878 so far as it affects all districts or portions of districts for which committees or boards may be constituted under the proposed Act; and the opportunity has also been taken to provide legal authority for the local rate now levied on the rates imposed under various names in respect of the improvement of land due to canal irrigation, when such improvement has been excluded from account in assessing the land-revenue. Amongst these rates are the owner's rate under the Northern India Canals Act, the water-advantage rate on the Bari Doab canal, and the proportion of the fluctuating revenue on lands irrigated from canals in the Montgomery district which is credited to canal-revenues. This has been done by amending the definition of annual value in section 2, and a definition of land-revenue has also been added to that section to authorize the levy of the local rate on the dues paid for grazing on Government lands which yield no land-revenue in any other form. These dues form a large item in the revenue realized from some of the districts of the Southern Panjáb, and the amount of the local rate and cesses has hitherto been deducted before the income was credited to Government. The provisions of the Bill now submitted are explained in some detail in the accompanying Statement

of Objects and Reasons, and it will, therefore, probably be most convenient that I should not travel over the same ground, but should confine my remarks to some of the more prominent features of the Bill.

"One of its most marked features is the extent to which, while laying down the general principles which should regulate the constitution and functions of district committees and local boards, it leaves details to be provided for by rules to be from time to time framed by the Local Government. This is rendered necessary by the varying circumstances and requirements of different parts of the province. The constitution of society fundamentally differs in different localities. In some, as amongst the Bilúches of the Deraját frontier, tribal chiefs possess great authority. In others, as amongst the Patháns, while a tribal organization prevails, the tribes are greatly divided into factions at feud amongst themselves, but for certain purposes recognize the authority of tribal councils. In the greater part of the province, the agricultural classes are associated into village-communities which have been compared to small republics; but in the Southern Panjáb and the Hill Districts, the village is often an artificial aggregate of small hamlets or scattered wells, with no natural bond of union. Again, no uniform system which could be devised would be suited at the same time to peaceful and populous districts, in all parts of which some men are likely to be found sufficiently educated and intelligent to take an active interest in promoting public improvements, and to less favourably situated districts, where the population is scattered and sometimes turbulent, and where few such men are likely to be found away from the large towns. To give districts of the latter class such measure of self-government as they are capable of, without unduly fettering the committees and local boards of more advanced districts, considerable latitude must be left to the Local Government to frame such rules as may appear most suitable, having regard to local conditions and requirements. Most progress is likely to be achieved under a system sufficiently flexible to admit of being thus adapted to varying circumstances.

"While we have long had district committees, the local boards proposed to be constituted by the Bill are new bodies, and the Bill provides that these boards should be ordinarily subordinate to the district committee in matters of finance and taxation, matters of common interest, and matters affecting the joint or conflicting interests of two or more boards in the district. In other respects, notifications, to be issued by the Local Government under section 11, will regulate the duties to be entrusted to the committee and the several boards, and the boards will not be under the control of the committee in respect of the matters thus specially made over to them. They may, however, be employed by the committee as its agents in the management of matters placed by such notification under the control of the committee (section 44). When, again, a first class board is considered fitted for greater financial independence, this may be conferred on it by a notification by the Local Government under clause (7) of section 37; and, while such a notification remains in force, the funds at the disposal of the board to which it relates will be treated as a separate district fund, to be accounted for, not to the district committee, but to Government (section 40).

"To admit of the road, school and district-post cesses being amalgamated with the local rate, it has been found necessary to increase the maximum limit of the local rate from eight pies to one anna per rupee (section 13). The local rate and cesses now amount in most districts to 10⅖ pies per rupee on the assumed annual value, which is equivalent to 10⅝ per cent. on the land-revenue. The proposed maximum rate equals 12½ per cent. on the land-revenue, which is 1⅞ per cent. in excess of the total of the present local rate and cesses, but no general increase of local taxation is contemplated. One anna has been adopted as the maximum, partly for the sake of simplicity, and partly because, in some districts, where the land-revenue is small and lightly assessed, it may be found advantageous to have the power somewhat to increase the rate in order to provide funds for purposes clearly for the benefit of the neighbourhood. In other places some reduction of the rate may be desirable, and section 14 enables committees specially empowered for the purpose, and, in the absence of such committees, the Local Government, either to increase or to reduce the rate, so

long as it neither exceeds one anna per rupee of the annual value, nor falls below so many pies per rupee as the Local Government may from time to time direct.

"The result may be explained by the following example. A village assessed at Rs. 600 land-revenue at present pays Rs. 65 on account of local rate and cesses. If the local rate were increased to one anna per rupee of annual value, it would pay Rs. 75, while if it were reduced to ten pies per rupee, it would pay Rs. 62-8, or if it were reduced to eight pies per rupee, it would pay Rs. 50. Under section 26, again, four-fifths of the rate would be credited to the district committee, and the remaining one-fifth, for reasons explained in the Statement of Objects and Reasons, to the Local Government. Leaving out of account charges for collection, the district committee would, in the case supposed, receive Rs. 52 at the present rate, Rs. 60 if the rate were increased to one anna per rupee, Rs. 50 if it were reduced to ten pies per rupee, and Rs. 40 if it were reduced to eight pies per rupee. The amount to be credited to the Local Government would similarly fluctuate as the rate was increased or diminished; and to this extent it would apparently be for the interest of the Local Government to keep the rates high. But that Government must apply the funds thus raised to similar purposes, though not necessarily in the same district, to those to which the district committee or local boards would be at liberty to apply them; and there would be no obstacle to its allotting the increased income due to the increase of the rate to the district which had found it necessary to increase its taxation. If the rate were decreased, the Local Government would simply have smaller funds available for expenditure in the province generally, or in particular districts, for the purposes contemplated by the Act, and it would be obliged to regulate its expenditure accordingly.

"The only other point which need be noted in connection with the subject of taxation is the new power, proposed to be given by section 18 to committees which have been empowered to determine the incidence of the local rate to impose other taxes, either for the purpose of supplementing the income from the local rate, or to enable the committee to reduce the local rate. It is thought that it may be desirable to have the power of taxing classes which at present bear no share of the local burdens, while they are largely benefited by improved communications and by expenditure from district funds for the support of educational and other institutions. But care has been taken to prevent taxation of an arbitrary, oppressive or injurious character, by providing that this power shall be exercised, subject to any general rules or special orders which the Governor General in Council may make on this behalf, and only by committees which have been entrusted with the power of determining the incidence of the local rate, for the proposals already specified, that the taxes imposed must be approved by the Local Government; and that the same procedure as to notice of the proposed tax, and disposal of any objections which may be preferred against it, shall be followed as is prescribed in the case of taxes imposed by municipalities.

"It is necessary to state that none of these powers to impose increased taxation are intended to enable Government to devolve new charges upon local bodies. It is not desirable that the extension of local self-government should be associated a second time with increased taxation; and the danger of the fixed charges of committees and boards being from time to time increased without any corresponding increase of their resources, by their being called upon to undertake new services, has been guarded against by the proviso to section 11, which requires the Local Government, when the control of any new service is transferred to committees or boards, to provide them with such funds or sources of income as both the Local Government and the committee or board may consider sufficient to maintain such service in its existing state of efficiency. If increased taxation should be resorted to in any district, it will therefore be either for the purpose of reducing the burdens on land, or of enabling committees and boards to make better provision than before for objects of a local character already under their management.

"Passing on to the subject of finance, it may be well to explain that the one-fifth of the rates and taxes to be credited to the Local Government under

section 26 is intended to correspond as nearly as may be with the one-fourth of the local rate at present set apart for famine expenditure under Act V of 1878. As the local rate now falls at $8\frac{1}{3}$ per cent. on the land-revenue, the sum now set apart for this purpose is $2\frac{1}{12}$ per cent. If the new local rate should be assessed so as exactly to correspond with the present local rate and cesses, it would fall at $10\frac{5}{6}$ per cent. on the land-revenue, and the one-fifth deducted for Government would be $2\frac{1}{6}$ per cent. Taking the example already given, a village paying Rs. 600 as land-revenue, and Rs. 65 for local rate and cesses, pays Rs. 50 as local rate, of which Rs. 12-8 is set apart for famine-expenditure. The deduction of one-fifth of the new local rate would amount to Rs. 13. But if the new local rate were reduced to 10 per cent., the Government share would be two per cent., and in that case such a village would pay Rs. 60, of which the Government share would be Rs. 12. If it were still further reduced, owing to the substitution of other taxes under section 18, the Government share would diminish in the same proportion, but, under section 26, the Local Government would get a similar share in the new taxes, the proceeds of which had enabled the reduction to be made. It should be borne in mind that the proportion thus to be credited to the Local Government will correspond very closely with a tax at present raised, not for local purposes, but for the relief and prevention of famine throughout the country at large.

"Section 33, clause (*d*), has been inserted to give power to charge the district funds with their proportion of the cost of service rendered to local bodies by provincial establishments. A contribution of 20 per cent. from district funds is at present credited to provincial funds in payment for such services. But this arrangement has its disadvantages, and the Local Government has expressed a hope that, when the duties to be made over to committees and boards are determined, it will be found possible to surrender this contribution, as one of the steps which will have to be taken under section 11 to furnish committees and boards with the necessary funds. In the meantime, it is necessary to take power to charge these services to the local bodies.

"Financial control has been given to committees over boards in the same district, both because the committee is the most suitable body to consider the wants of all parts of the district, and to distribute the funds accordingly, and because to keep proper accounts in English in one central office in each district will be easier and less expensive, than it would be if each local board had to maintain a distinct establishment for the purpose. A portion of the establishment of the committee for other purposes, such as educational inspection and public works, must also be available for the service of the boards. The members of the committee will probably either be the same as the members of the boards in the district, or representatives chosen by them.

"It is, however, proposed that the boards shall have their own funds, consisting mainly of allotments made to them either by Government or by the district committee, and that balances of such funds unspent at the close of the financial year shall remain at their disposal (sections 30 and 31). They will thus be able to complete works for which funds have been allotted when it has been found impossible to work up to the allotment during the year.

"The only other subject which appears to require notice is the power of control over the proceedings of committees and boards which has been reserved to the Local Government and its officers. Sections 49 and 50 give the necessary powers of interference when the proceedings of committees or boards are not in conformity with the Act or with the rules made under it; and the following sections provide for the prevention of acts likely to cause inconvenience to the public, and the execution of works, and the performance of acts necessary for the public safety or welfare, and for cases in which committees or boards have failed in their duty. Sections 55 to 57 provide for cases in which committees or boards have persistently failed to discharge their duties, or have exceeded or abused their powers, or in which other reasons affecting the public interests exist for superseding them. When a committee is superseded, it is provided that a new committee shall be provided by the Local Government as soon as conveniently may be, and when a board is superseded, power is given to the Local Government either to transfer its functions to the committee

or other boards in the district, or to constitute a new board in its place. As local boards are now about to be constituted for the first time, it is desirable to have the power of re-adjusting the limits of their jurisdiction, should it not be found advisable to reconstitute a board for the same local area as that which was administered by a board which had neglected its duties or abused its authority. It is certain that committees and boards will require a good deal of guidance from district and divisional officers, especially until they become accustomed to the discharge of their new duties and thoroughly acquainted with the extent and limits of their powers. The sections relating to the subject of control have been framed with a view to the necessary guidance being supplied, as far as possible, from without; but should any committee at the outset require a degree of help from the district officer, which could not be given, without risk of undue friction and delay of business, in the form of external control and advice, there will be nothing to prevent the Local Government from appointing the Deputy Commissioner *ex officio* chairman, under section 8, on the understanding that he should aim at preparing the committee by degrees to work without him.

"In conclusion, it should not be supposed that the organization of the new local bodies provided for by this Bill will give any immediate relief to district officers or their establishments. The working of these bodies will, for years to come, demand constant vigilance and attention from the district officer, whose duty it will be to assist them by his counsel and advice, to encourage them to an intelligent discharge of their duties, and to give such explanations as may be necessary to enable them to understand the extent and limits of their powers; and at the same time to guard against abuses or neglect of duty on their part, and, in any case in which the intervention of superior authority may appear necessary, to report the circumstances with a view to obtain the necessary orders. He will also have to approve the annual estimates of expenditure, and, when he disapproves, to explain the nature of his objection; he may have to decide disputes between the different local bodies in his district; and he will be the ordinary channel of communication between them and the Commissioner or other superior authorities."

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY also introduced the Bill.

The Hon'ble MR. BARKLEY also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India*, and in the *Panjáb Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

BOMBAY PORT-DUES REDUCTION BILL.

Major the Hon'ble E. BARING moved for leave to introduce a Bill to give power to reduce port-dues in the port of Bombay. He said that the Bill was of the simplest description, and he would only detain the Council a very short time in explaining its provisions. At present, port-dues were levied at the port of Bombay at the rate of two annas a ton, but the Chairman of the Bombay Port Trust had represented that the financial situation of the Trust was such as to allow of a reduction. Such a measure was exceedingly desirable and fully in harmony with the general policy of the Government, which was to remove all obstacles to trade wherever it was possible to do so. There would be found in the Statement of Objects and Reasons a memorandum by the Chairman setting forth the actual financial position of the Trust, but it would not be necessary for him to refer to it in detail. The present proposal was to reduce the rate levied from two annas to $1\frac{1}{2}$ annas per ton, and the general result of this measure would be to relieve the shipping of Bombay to the extent of about half a lakh a year. The Bombay Government desired the reduction, but the law as it at present stood allowed of no lower rate than two annas a ton; hence the object of the proposal was to carry the wishes of the Port Trust and of the Bombay Government into

effect, which could be done by removing the words "not less than two annas a ton" from Schedule I of the Indian Ports Act as it now stood.

The Motion was put and agreed to.

Major the Hon'ble E. Baring also introduced the Bill.

Major the Hon'ble E. BARING also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India*, and in the *Bombay Government Gazette* in English and in such other languages as the Local Government might think fit.

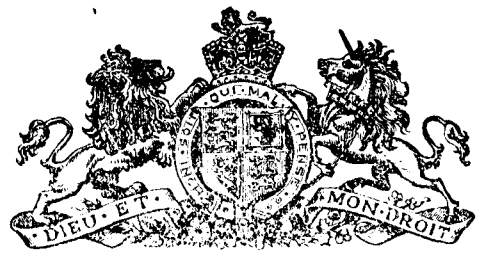
The Motion was put and agreed to.

CENTRAL PROVINCES TENANCY BILL.

The Hon'ble MR. ILBERT moved that the Bill to consolidate and amend the law relating to Agricultural Tenancies in the Central Provinces be referred back to the Select Committee. He said that his object in making this Motion was to give the Committee the opportunity of considering one or two suggestions which had been received since the presentation of the last Report. He did not anticipate, however, that the amendments which they would make would in any way alter the main provisions of the Bill or delay its passing into law.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 6th June, 1883.



D. FITZPATRICK,

Secretary to the Government of India,

Legislative Department.

SIMLA;
The 1st June, 1883.

Printed and Published for the GOVERNMENT OF INDIA *at the Govt. Central Branch Press, Simla.*

SUPPLEMENT TO

The Gazette of India.

Nº 23.] CALCUTTA, SATURDAY, JUNE 9, 1883.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

PRICES CURRENT OF FOOD-GRAINS THROUGHOUT INDIA FOR THE 1st HALF OF MAY 1883.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch.*)

D. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 5th JUNE 1883.

GENERAL REMARKS.—Agricultural prospects continue good in Madras. Rain has fallen in every district, but in small quantities. Harvesting of the second paddy crop has not yet been completed, and the outturn so far appears to have been somewhat below the average. In Bombay rain has been general in the Deccan and Southern Mahratta Country, and preparations for the *kharif* are in general progress. Locusts are reported in the northern districts, and cholera is also prevalent in them. In Mysore and Coorg the standing crops are thriving; a fair amount of rain has fallen, and the public health is good. Throughout the Nizam's territories, the Central Provinces, and Central India rain has also been general, though not heavy, and the land is either under preparation for the *kharif* sowings or is already being sown; the public health is also good. There has been general rain in Bengal, though not everywhere enough to commence sowings for the autumn. The prospects of indigo and sugar-cane continue favourable, and early rice and jute are doing well. Cholera and small-pox are prevalent in several districts. In the North-Western Provinces and Oudh the dry hot weather has re-established itself: hardly any rain fell during the week. Cholera is more or less prevalent in several localities. In the Punjab slight showers fell in most districts: in a few the *rabi* harvest still continues. In Rajputana *kharif* cultivation is progressing, but the rain registered during the week was slight.

In Assam there has been heavy rain in Sylhet, but little elsewhere; paddy sowings continue, and the public health is good. In Burma there has been general and sufficient rain.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 6th)		
Bellary ...	·71 (average of six stations).	Standing crops generally good; paddy harvest, yield average.
Kurnool ...	·25 (average of three stations).	Harvest second crop paddy nearly over, yield half; small-pox and cattle-disease in parts, latter more general.
Ganjam ...	·99 (average of fourteen stations).	Standing crops cotton thriving; fever, small-pox, and cholera decreasing; cattle-disease slight.
Kistna ...	·34 (average of seven stations).	Small-pox general; fever and guinea-worm in parts; cattle-disease slight.
Chingleput (Madras) ...	·4 (average of three stations).	Standing crops good where water available; harvest *kar*, paddy, *ragi*, &c., yield half; small-pox, measles, and cattle-disease slight in parts.
Coimbatore ...	1·13 (average of sixteen stations).	Standing crops good; harvest *cholum*, *cumboo*, and paddy, yield above average in one, average in three taluks; cholera and small-pox in parts.
Tanjore ...	·75 (average of eight stations).	Standing crops generally good, except in one taluk where they suffer for want of rain; harvest paddy and gingelly seed, yield below average; cholera slight.
Madura ...	·91 (average of six stations).	Standing crops fair; cholera in parts.
Malabar ...	2·2 (average of fourteen stations).	First crop progressing in several taluks; harvesting third crop continues in parts; fever and small-pox continue, latter in all taluks.
Travancore ...	1·64	Cultivation progressing; fever and measles prevail.
		General Remarks.—General prospects good.
Bombay—(June 6th)		
Kurrachee ...	.....	Weather cloudy, rain expected; no fresh cases of small-pox in Kurrachee from 26th May to 5th June, no deaths, remaining sick 4; disease in eight villages in district, 47 fresh cases, 3 deaths, remaining sick 48; river at Kotri on 4th 9 feet 9 inches, against 8 feet 5 inches on same date last year; fever in seven talukas; cattle-disease in two talukas; wheat, red rice, and *bajri* in Kurrachee 26, 32 and 36, in Manjhand 22, 32 and 48, in Tanna 24, 29 and 40, and in Jati 20, 32 and 24 lbs. per rupee respectively.
Hyderabad ...	Naushahro ·46 on 24th	Average *rabi* realisations 11 annas 8 pies in the rupee; river rising; small-pox in seven, fever in five, and cattle-disease in four talukas; wheat 25, *bajri* 39, *juari* 58, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Preparations for *kharif* continue; wheat 26¾ and *bajri* 29¾ lbs. per rupee.
Baroda ...	.....	Fields being prepared for ensuing season; health fair; *bajri* 27¾ and rice 24 lbs. per rupee.
Surat ...	1·33	Total rainfall 2·24; preparations for *kharif* continue; small-pox in Surat, average death 1; *juari* 41¾ and *nagli* 47 lbs. per rupee.
Nasik ...	Good rain throughout district,—maximum at Yeola, 4·22; minimum at Baglan, ·77.	Locusts in Dindori, Chandor, Yeola, and Nandgaon, damaging *khoude*, a species of fodder crop; cholera in almost all talukas, 137 deaths; land being prepared for *kharif* and transplanting of *nagli* commenced; wheat 27, *bajri* 28, and rice 22½ lbs. per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	Rain every day, heavy on 4th; total of week 2·78.	Total to date 3·19, being 1·05 above average; abnormal temperature 1° warm on 30th and 31st, *nil* on 1st, 1° cool from 2nd to 4th, and 4° cool on 5th; vapour in air normal; abnormal wind changing from north-north-west to south-east from 30th to 2nd, afterwards from east-north-east; thunderstorm on the nights of 30th and 3rd; thunder and lightning on 1st, 2nd, 4th, and 5th; distant lightning on 31st; strong gale for a short time on the night of the 3rd.
Poona ...	Rain throughout the collectorate,—maximum 4·44 at Sirur, minimum 1·35 at Bhimthadi.	Sowing operations commenced; locusts in six talukas, including Poona; cholera cases 751, fatal 286; *bajri* 36 and *juari* 42 lbs. per rupee, in Poona *bajri* 34 and *juari* 39 lbs.
Ahmednagar ...	Nagar, 2·31; Parner, 5·01; Jamkhed ·78; Sheogaon, ·64; Newasa, 4·86; Rahuri, 1·48; Kopargaon, 1·60.	Cholera throughout the district except Karjat and Jamkhed, deaths 102; cattle-disease in Parner; locusts in Parner and Jamkhed; *bajri*—maximum 54 lbs. per rupee in Jamkhed, minimum 30 lbs. in Kopargaon; *juari*—maximum 69 lbs. per rupee in Jamkhed, minimum 45 lbs. in Kopargaon.
Sholapur ...	1·55	Total rainfall 1·79; *juari* 54 lbs. 29 tolas and *bajri* 49 lbs. 10 tolas per rupee; cholera in five talukas, 163 cases, 71 deaths; locusts pretty general, but little damage done.
Dharwar ...	Rain in seven talukas,—4·0 in one and slight in others.	Sowing of paddy in progress in seven talukas; scarcity of drinking-water still continues in Nargund petta; small-pox in Kod and fever in Mandargi; rice minimum 24 and *juari* 45 lbs. per rupee.
Kanara ...	Karwar, 11·23; Kumpta, 3·43; Sirsi, ·60; Hallial, ·90; rainfall general in the district.	Sowing operations continue; sugarcane plants thriving; small-pox at Karwar, Akola, and Sirsi, 3 deaths; fever subsiding except in Yellapur; cattle-disease partial; common rice in Karwar 12 seers per rupee, in district average 14 seers per rupee.
Rajkot ...	Thunder-storm with strong wind and heavy splash of rain ·10 on 2nd.	General health good; weather hot and cloudy; cholera—2 cases in Morvi and 3 in Navanagar villages, Harbunder town, and its village Delodur; *bajri* 29 and *juari* 35 lbs. per rupee. *General Remarks.*—Rain general in Deccan and Southern Mahratta Country, partial in Gujrat and Sind; preparation for *kharif* in general progress; sowings commenced in a few districts; locusts in Násik, Ahmednagar, Sholapur, Poona, and Ratnagiri; cholera in Násik, Khandesh, Ahmednagar, Sholapur, Poona, Satara, Belgaum and Tanna; small-pox, fever, and cattle-disease in a few places.
Bengal—(June 6th)		
Chittagong ...	3·26	Weather rainy and hot; prospects of crops good; fields being prepared for *aus* crop; prices steady; cholera, fever, and cattle-disease reported.
Dácca ...	·60	Sowing of *amun* paddy, sesamum, and *moong* pulses continues; planting of sugarcane completed; *aus* paddy and jute promising; reaping of *boro* paddy continues.
24-Pergunnahs (Calcutta)	Alipore, 2·45	Sowing of *amun* paddy on low lands and of early rice and jute going on, but more rain required; public health generally good.
Moorshedabad ...	2·63	*Boro* paddy being harvested; *aus* seedlings in good condition; *amun* lands being prepared; public health generally good.
Rajshahye ...	1·33	Crops doing well; health generally good.
Burdwan ...	2·48	Good rain throughout the district; prospects much improved; ploughing general and sowing also being carried on; health fair.
Rungpore ...	1·69	Prospects of crops good; cholera somewhat prevalent in some parts of the district.
Bhagálpur ...	·70	Slight rain during week has done some good to young paddy, but more very urgently required; sugarcane thriving.
Purneah ...	1·40	Prospects of crops fair; weeding progressing; health fair.
Patna ...	·22	Sowing of *bhadoi* crops not commenced for want of sufficient rain; *boro* rice being reaped; cholera and small-pox reported from sub-divisions.
Durbhunga ...	·66	All crops doing well; prices slightly risen; cholera and small-pox in town and country.
Hazáribágh ...	·50	Weather hot and close; sowing of early rice commenced in several parts of the district; cholera and small-pox still reported; health generally good.
Cuttack ...	2·90	Weather cooler and cloudy; sowing in progress; sugarcane growing well; public health good; a few cases of cholera and cattle-disease reported. *General Remarks.*—Rain fell in almost all districts during the week; early rice and jute are doing well; in several places sowing of these crops is still proceeding; sugarcane is growing well and indigo reported to be fair in Behar; cultivation of autumn crops has not yet commenced for want of sufficient rain in many parts; in some districts sowing of *amun* rice is also being carried on; cholera still reported from several districts, it is said to be rather severe in Jalpaiguri and Cooch Behar and in thana Barripore and in Mymensing it is also prevalent; in Darjeeling Terai small-pox still lingers in a few districts.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (June 5th)	·30	Weather seasonable; a few isolated cases of cholera reported; health of cattle good; irrigation of sugarcane continues.
Allahabad („ 6th)	No rain	Weather very sultry; cholera diminished; prices steady.
Gorakhpur („ 4th)	Slight rain	Local storms in the beginning of the week, latterly weather hot and clear; some scattered cases of cholera and a little cattle-disease.
Jhánsi („ „)	Jhánsi, ·10; Garotha, ·20	Weather cloudy and unsettled; manuring of fields continues; prices stationary; health good; no cattle-disease.
Agra („ 5th)	No rain, except a few drops on 5th.	Small-pox in four and fever in two parganas; sporadic cholera in Huzur tahsil only; prices steady.
Bareilly („ „)	Stray showers	Weather hot and cloudy, with east wind.
Meerut ...	.....	No report received.
Kumaun (June 5th)	Rain occasionally	Weather generally fair; *madua* has been nearly sown and rice has sprung up in many places; health good; prices same as last week; cattle-disease continues.
Lucknow („ „)	No rain	Weather fine, with strong easterly wind; prices stationary; great scarcity of water in the city of Lucknow; small-pox abating; cholera increasing.
Partabgarh („ „)	.....	Prices stationary; sugarcane being irrigated; small-pox still reported in Kunda tahsil; general health good.
Sitapur („ „)	.....	Cholera in Thanagaon; cattle-disease in two villages; prices unaltered.
Fyzabad („ „)	·10 at Sadr	Small-pox still reported from three tahsils and cases of cattle-disease in two tahsils.
Rae Bareli („ 4th)	.....	Weather cloudy, wind variable; cholera continues; small-pox and fever abating; prices almost stationary.
Cawnpore („ 5th)	No rain	Small-pox and fever diminished in town and district; prospects of extra crops fair; some cattle-disease in district; prices slightly risen.
Farukhabad („ „)	.....	Clear sky, with occasional hot west wind; health of people fair; markets well supplied; prices steady. *General Remarks.*—The weather continues hot and dry as a rule; though slight rain has fallen in several districts, there is said to be great scarcity of water in Lucknow; cholera is reported from eight districts, is spreading in Lucknow, but abating in Allahabad and Aligarh; six districts report small-pox; prices have not changed.
Punjab—(June 5th)		
Delhi ...	.....	No report received.
Hissar ...	·30	Health good; preparations for *kharif* sowings commenced; prices stationary.
Umballa ...	No rain	Health fair; preparations being made for sowing *kharif* and sugarcane crops; prices stationary.
Jullundur ...	No rain	Health good; *kharif* ploughings progressing; prices steady.
Amritsar ...	·10	Health good; prices almost stationary.
Sialkot ...	.....	Health fair; crops being gathered; prices stationary.
Ferozepore ...	·30 to ·40	Health good; *rabi* harvesting in progress; prices fluctuating.
Lahore ...	·10	Health good; prices steady.
Rawalpindi ...	·90	Health good; prices falling.
Mooltan ...	No rain	*Rabi* harvesting continues; prices stationary.
Dera Ismail Khan ...	50	Health good; threshing in progress; prices steady.
Peshawar ...	Slight rain	Health good; there are however a few cases of small-pox; prices falling. *General Remarks.*—Rain has fallen in most districts; health generally good; *rabi* harvesting continues in a few districts, but has been completed in the others.
Central Provinces—		
Nagpur (June 6th)	2·0	Weather close; land being prepared for *kharif* sowings; small-pox continues; cholera in Katol; prices of wheat and *juar* have fallen.
Jubbulpore ...	·04	Weather stormy and cloudy; 3 deaths from cholera; small-pox continues; cattle-disease in the interior; wheat 22 seers and rice 15 seers per rupee.
Sangor (June 4th)	.....	Weather very hot and occasionally cloudy; ploughing for *kharif* sowings proceeding; prices easy; health fair.
Seoni („ 5th)	·45 at Seoni; 2·0 at Lakhnadon.	Weather cloudy and unsettled; 8 deaths from cholera; cattle-disease in Lakhnadon; prices stationary.
Hoshangabad („ „)	·45; sharp shower on 3rd.	Weather very hot and cloudy, with high winds and dust-storms; preparation of land for *kharif* sowings in progress; 10 deaths from small-pox; wheat 14 and rice 10 seers per rupee.
Nimar ...	1·17 on 4th	Weather cloudy and oppressive; 5 deaths from small-pox, 4 deaths from cholera; prices steady.
Raipur (June 2nd)	Occasional showers; ·61.	Weather cloudy; ploughing for *kharif* sowings commenced; health good; prices inclining to rise.
Sambalpur (May 31st)	·06	Weather hot, with heavy clouds at nights; sugarcane fair; rice-fields being prepared; health good; common rice 56 seers per rupee. *General Remarks.*—Rain general; weather cloudy and close; cholera in Wardha increasing, slight in some other districts; land being prepared for *kharif* sowings; prices generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—(June 2nd)		
Akyab ...	4·58	Total rainfall 19·12 inches: 3 deaths from cholera and 8 from small-pox in district, otherwise public health good; cattle-disease in one township; price of paddy 49 rupees per 100 baskets.
Rangoon ...	2·67	Total rainfall 11·79 inches; public health good; price of paddy 90 rupees per 100 baskets; market quiet.
Bassein ...	1·30	Total rainfall 5·97 inches; 6 deaths from cholera in Thaboung township, otherwise public health good; 26 deaths of cattle in district.
Prome ...	1·26	Total rainfall 6·42 inches; public health good; 50 deaths of cattle in two townships.
Amherst (Moulmein) ...	6·33	Total rainfall 18·27 inches; 1 case of cholera reported in one township, otherwise public health in Moulmein and district good; cattle disease in three townships; ploughing progressing.
Toungoo ...	1·33	Total rainfall 9·41 inches; public health bad. *General Remarks.*—Rain pretty general all over the province; public health good; here and there cattle-disease, but not to any great extent; price of paddy fairly steady both at the ports and in interior.
Assam—(June 6th)		
Gauhati ...	·79	Weather sultry; cholera, fever, and cattle-disease still prevalent in the interior and at the station; prospects of crops good, but some damage done to *ahu* paddy by floods.
Sylhet ...	5·28	Weather seasonable; cultivation in progress; public health not very good; fever prevalent and small-pox still reported.
Cachar ...	Slight rain, 1·69	Weather warm; ploughing for *dumahi* crops continues; soil for sowing the seedlings of *aus* and *sali* crops is being prepared; common rice 16 seers per rupee; a few deaths from small-pox reported from Katigora.
Dibrugarh ...	2·97	Weather warm; ploughing for *sali dhan*; prospects of *ahu* crops good; cholera reported.
Mysore and Coorg—(June 6th)		
Bangalore ...	·12	Standing crops in good condition; prospects favourable.
Mysore ...	·79	Standing crops in good condition; prospects favourable.
Mercara ...	2·37	The monsoon burst on 3rd; rice nurseries are being formed; some loss of coffee trees from borer. *General Remarks.*—Rain more or less in all districts; standing crops thriving; prospects favourable; public health generally good; ruling prices—rice 12 to 15 seers and *ragi* and horse-gram 35 to 40 seers per rupee.
Berar & Hyderabad—(June 6th)		
Amráoti ...	·60	Fields under preparation for *kharif* sowings; wheat 16 and *juari* 26 seers per rupee.
Akola ...	.....	Weather hot and cloudy; preparations for *kharif* sowings continue.
Hyderabad ...	·80	Total rainfall from 1st January, 3·25; preparations for coming *kharif* crops continue; cholera and small-pox prevail in three talukas; prices—wheat 16, coarse rice 10, white *juari* 23, yellow *juari* 29, and *tur* 24½ seers per current sicca rupee.
Central India States—(June 6th)		
Indore ...	·80	The hot weather has practically terminated already; we have had a good shower, and there is every appearance of the monsoon commencing; health is good; ploughing for the *kharif* crop has commenced; prices are steady, but high.
Morar (Gwalior) ...	.....	Health good; weather hot and stormy.
Sutna ...	.....	Weather hot; health good.
Neemuch ...	·22	Public health good; weather hot.
Goona ...	·14	Weather very warm; health fair; wheat 24 seers.
Bhopal ...	1·47	Weather clear, occasional clouds; crops and public health good.
Agar ...	·71	Weather cloudy and hot; health good; land is being prepared for *kharif* sowings.
Nowgong ...	·37	Weather hot; public health good.
Manpur ...	.....	No report received.
Rajputana—		
Abu (June 6th)	.....	Weather clear again, warm when not windy.
Sirohi („ 3rd)	1·10; heavy rain on 27th night.	Tanks full, fair amount of water in wells; health good; weather became cloudy after rain of 27th, but is now clear and very warm.
Marwar („ 1st)	·95; rain general	Month's water in tanks by recent rains; health good; crops almost harvested; temperature much reduced by rains; weather partially cloudy; nights close and sultry; prices rising.
Meywar („ „)	1·52	Wells and tanks full; health very good; crop prospects good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—*contd.*		
Harowti (June 2nd)	Deoli, 1·25; Tonk, ·76; Kotah, ·11; Shapura, 4·85.	Break ended; hot winds again set in; health good; prices stationary.
Jhallawar (May 13th)	1·29; rain general	Health good.
Ajmere (June 6th)	*Nil*	Weather cloudy and uncertain; health good.
Jeypore („ 5th)	*Nil*	Weather normal; prices stationary; some cholera reported from districts, otherwise health good.
Bhurtpore ...	.....	No report received.
Uiwur (June 5th)	Average ·43	*Kharif* cultivation progressing; cholera in three tahsils, is increasing in south-west.
Nepal—(May 31st)		
Katmandu ...	·70	Weather very seasonable; prospects good.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 6th June, 1883.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding.*

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

Major the Hon'ble E. Baring, R.A., C.S.I., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble W. W. Hunter, LL.D., C.I.E.

The Hon'ble J. W. Quinton.

The Hon'ble D. G. Barkley.

PANJÁB LOCAL SELF-GOVERNMENT BILL.

The Hon'ble MR. BARKLEY moved that the Bill to make better provision for Local Self-government in the Panjáb be referred to a Select Committee consisting of Major the Hon'ble E. Baring, the Hon'ble Mr. Ilbert, the Hon'ble Sir S. C. Bayley, the Hon'ble Mr. Hunter, the Hon'ble Mr. Quinton and the Mover.

The Motion was put and agreed to.

CENTRAL PROVINCES TENANCY BILL.

The Hon'ble MR. ILBERT presented the fourth Report of the Select Committee on the Bill to consolidate and amend the law relating to Agricultural Tenancies in the Central Provinces.

The Council adjourned to Wednesday, the 20th June, 1883.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

SIMLA;
The 6th June, 1883.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

REVENUE REPORT OF IRRIGATION WOKS IN BOMBAY FOR 1881-82.

No. 227 I., dated 8th June 1883.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, Public Works Department, No. 106, W. I.—222, dated 8th May 1883, forwarding the above.

OBSERVATIONS.—The Capital outlay, direct and indirect, incurred up to the end of 1881-82 on works in operation amounted to Rs. 1,44,16,011; the interest charges for the year to Rs. 5,41,880, and the accumulated balance of unpaid interest up to the end of the year to Rs. 59,89,373.

2. The assessed revenue of all kinds amounted to Rs. 2,12,313; the maintenance charges, including indirect outlay, to Rs. 1,65,168, and the net revenue to Rs. 47,145, or 0·32 per cent. on the Capital outlay to the end of the year.

3. The following comparative statement of areas irrigated, revenue assessed, and working expenses for 1881-82 and previous years indicates steady progress in these works, which progress is still further brought out by the second table showing the areas of the principal crops irrigated during 1881-82 and the four previous years :—

Year.	Acres irrigated.	Revenue assessed.	Working expenses.	Net assessed revenue.
		Rs.	Rs.	Rs.
1876-77	16,902	1,20,697	93,315	27,302
1877-78	24,536	1,48,975	1,05,940	43,035
1878-79	16,681	1,43,931	1,36,187	7,744
1879-80	21,439	1,79,839	1,25,015	54,824
1880-81	34,495	2,07,494	1,47,995	59,499
1881-82	29,881	2,12,313	1,65,168	47,145

The increase in the working expenses of 1881-82 is due to inclusion in them of Rs. 10,332 on account of indirect charges, which do not appear in the figures for the preceding years; to omission of certain adjustments of establishment charges on the Mutha Canal, and to additional charges on account of three new works—the Khari cut, Bhadalwadi Tank, and Ashti Tank—from which revenue, amounting to only Rs. 791, was realised.

Statement showing area of principal crops irrigated during the years 1877-78 to 1881-82.

Crops.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.
Sugarcane	1,574	1,957	3,375	3,958	4,213
Rice	991	806	1,229	2,202	2,884
Jowar and bajra	7,595	1,998	4,078	12,668	7,565
Wheat	4,957	2,368	3,138	5,168	5,138
Pulses	3,511	4,345	4,882	5,506	5,745
Other crops	5,908	5,207	4,737	4,993	4,333
Total ...	24,536	16,681	21,439	34,495	29,878

The steady increase in the irrigation of sugarcane and rice is very perceptible in the above statement.

4. The following table, giving the incidence per acre irrigated of the maintenance charges incurred in Public Works Department, and of the water-rate and gross revenue assessed during the year, shows that in many cases there is still considerable need for reduction of the former rate :—

Name of works.	Per acre irrigated.		
	Maintenance charges.	Water-rate assessed.	Gross revenue.
	Rs.	Rs.	Rs.
Hathmati Canal	2·83	1·99	2·07
Jamda Canals	5·87	4·11	4·34
Palkher	3·60	4·65	4·71
Ojhar	1·60	2·01	2·04
Bhatadi Tank	1·95	3·79	4·25
Mutha Canals	6·99	6·77	14·71
Ekruk Tank	10·43	3·83	6·00
Rewari Canal	5·65	5·21	5·24
Maini Tank	4·01	4·01	4·02
Krishna Canal	3·31	5·41	5·63

The most satisfactory method of reducing the maintenance charge per acre irrigated is, of course, to increase the area of irrigation, and this will be best attained in some cases by completing storage reservoirs, and, in others, by reducing the loss from percolation in the canals. This loss is in some instances so serious as to render it doubtful whether the construction of a storage reservoir should be undertaken until the loss by absorption can be reduced. For instance, in the cases of the Hathmati and Ojhar Canals, it seems hardly advisable to spend much on storage works so long as two-thirds of the hot weather supply of the canal is lost in leakage.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Department of Finance and Commerce and to the Revenue and Agricultural Department for information.

Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department, for communication to Resident at Mysore and Chief Commissioner of Coorg.
The Resident at Hyderabad.
The Agents, Governor General, Central India and Rajputana.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance, and that copies of the Report and of the Resolution be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

Ordered further, that this Resolution be published in the Supplement to the *Gazette of India*, and that copies be forwarded to Her Majesty's Secretary of State.

No. 106 W.I.—222, dated 8th May 1883.

RESOLUTION—By the Government of Bombay, Public Works Department.

Memorandum from the Chief Engineer for Irrigation, No. 1641, dated 3rd May 1883, forwarding the Annual Revenue Report of the Irrigation Department (excluding Sind) for 1881-82, Part I.

RESOLUTION.—The total capital outlay for the year 1881-82 has been Rs. 3,24,123, bringing the total capital outlay of all kinds to the end of the year up to Rs. 1,14,16,014.

2. Three new works have been added to the number reported on as in operation during the year. The total is now 29.

3. The area irrigated is 29,881 acres, of which only 385 acres are due to the new works.

This shows a falling off for the year of 4,999 acres, although the annual average increase has been maintained.

4. The assessed revenue has, however, continued to rise, being Rs. 2,12,313 for the year against Rs. 2,07,494 in 1880-81. Indirect receipts are excluded.

This result is due to the advance which has been maintained in the higher classes of cultivation—sugar-cane, ground-nut, and rice having increased, while wheat has remained steady, and only jowari and bajri have fallen off.

5. The total working expenses are Rs. 1,65,168 against Rs. 1,47,995 during 1880-81, but the Chief Engineer for Irrigation points out that the increase has been brought about by an error in the adjustment of the establishment charges on the Mutha Canals, and by the charges on the new works added to the list. There is therefore a satisfactory and hopeful improvement in respect of these expenses.

6. The figures showing the areas of land under command and irrigable are still only approximate, although they have been corrected wherever possible, but some of the surveys are still incomplete.

The gross irrigable area was 391,077 acres, and the net irrigable was 277,927 acres, of which latter 29,881 acres, or 10·7 per cent., was actually irrigated. The new works brought into operation within the year have added 169,958 acres to the total of the net irrigable land, but they have not, of course, yet contributed their fair percentage to the irrigation.

7. Storage reservoirs, to which Government look for the development of irrigation on existing works, have been advanced a step.

The Waghad Tank will be completed before next monsoon. The Maladevi project has received sanction, and only awaits the provision of funds. Sites for reservoirs have been discovered or surveyed for all the principal canals.

Two works only remain unprovided—the Chickli and Kulhala Canals; but these are minor works, having under them together in all only 869 acres of irrigable land.

Negotiations with the Municipality of Satara, by which, in connection with their water-supply reservoir at Kas, the Chief Engineer for Irrigation hoped to supplement the hot weather supply to the Krishna Canal, have unfortunately fallen through, so that the proposal for a reservoir on the Tarla, a tributary of the Krishna, must be reverted to.

It is hoped that the Chief Engineer may be able to bring forward a project, which will not be too far beyond the immediate requirements of the canal, on at least some not very extensive enlargement of its present scope.

8. The subject of the loss of water in the canals has received considerable attention from the Irrigation officers, and steps have been taken to observe and reduce leakage wherever the prospects of favorable results seemed to justify the necessary expenditure. The effects of the measures adopted will be noticed next season, but for the present it would be premature to frame any conclusions on the subject. Much of the loss of water observed is due, it is believed, to an excessive economy in the original construction of the works, where single banks were used instead of double, leading to the formation in many places of large shallow ponds above the canal, from the surface of which excessive evaporation takes place in the hot season, and at all times there must be considerable subsoil absorption.

These pools also cause waste of water and of valuable time in refilling them after every closure of the canal.

9. The observations made on wells afford no reliable data so far from which to deduce the proper amount of credit to be given to the canals. Careful measurements and records have been kept, however, in the case of the Nira Canal, of wells in the neighbourhood of the line it takes, and after water has been admitted to the canal the results will be reported on.

10. Outstandings show a very satisfactory diminution this year, being only Rs. 46,674 against Rs. 72,682 in 1880-81.

11. Part II, which will be voluminous this year, as it contains a description for the first time of the works, will follow as soon as it is received from the press.

12. Copies of the Report and of this Resolution thereon should be forwarded to the Government of India and the Secretary of State as usual.

W. S. TREVOR, *Colonel, R.E.,*
Secy. to the Govt. of India.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE FOURTH QUARTER OF 1882.

No. 623 R. T., dated Simla, the 2nd June 1883.

OBSERVATIONS.—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 397 R. T., dated 4th May 1882.

Public Works Department Resolution No. 79 R. T., dated 5th February 1883.

Read also—

Returns of accidents to trains, &c., on the open lines of Railway in India for the quarter ended 31st December 1882.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, with an increase of 299½ miles, or 3·08 per cent., in the open mileage, and of 285,026 miles or 3·09 per cent., in the train mileage,* the number of accidents to trains, rolling-stock, permanent-way, &c., shows a decrease of 11 or 1·72 per cent. The following are the Railways on which the numbers chiefly vary :—

	Increase.	Decrease.
Sind, Punjab and Delhi	...	27
Madras	10	...
Great Indian Peninsula	...	12
Northern Bengal	10	...
Punjab Northern	...	11
Indus Valley and Kandahar	19	...

* The train mileage run on the East Indian Railway is 2,428,344 and not 2,142,863 as shown in Tables 3 and 4. The correct figures were furnished by the Railway Company after the returns had been printed. The total train mileage should accordingly be 9,506,487 and not 9,171,036.

2. On the Sind, Punjab and Delhi Railway, the number of cases in which goods trains or parts of goods trains, engines, &c., left the rails decreased from 18 to 7, and cases of bursting of boilers, tubes, &c., of engines from 36 to 6.

3. The increase on the Madras Railway occurred under "slips in cuttings or embankments," and "fire in trains." The accidents under these heads numbered 6 against *nil*, and 7 against 2, respectively.

4. On the Great Indian Peninsula, and Punjab Northern Railways, there is no noticeable variation in any particular class of accidents.

5. On the Northern Bengal State Railway, the largest increase appears under "goods trains, or parts of goods trains, engines, &c., leaving the rails," the number of cases being 8 against 2.

6. On the Indus Valley and Kandahar State Railway, the "cattle accidents" increased from 41 to 70, whereas the "failures of machinery, springs, &c., of engines," decreased from 28 to 16.

7. The casualties resulting from accidents to trains, &c., show a very satisfactory decrease. Only 1 passenger was injured, and 2 servants killed and 6 injured, whereas, in the corresponding period of 1881, 18 passengers were injured, and 5 servants killed and 16 injured in train accidents. The decrease is mainly due to the fact that, in the corresponding quarter of 1881, 13 passengers and 3 servants were injured in a collision between a passenger and a goods train on the Great Indian Peninsula Railway.

8. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby :—

	Number of accidents.	Number of passengers and others.		Number of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains, or parts of passenger trains	1	...	...	...	...	...	...
Collisions between passenger trains, and goods or mineral trains, engines and vehicles standing foul of the line	9	...	...	...	...	...	...
Collisions between goods trains, or parts of goods trains	23	...	...	1	2	1	2
Collisions between light engines	1	...	...	...	...	...	...
Passenger trains, or parts of passenger trains, leaving the rails	11	...	...	...	...	...	...
Goods trains or parts of goods trains, engines, &c., leaving the rails	68	...	...	...	...	...	...
Trains or engines travelling in the wrong direction through points	8	...	1	...	...	...	1
Trains running over cattle on the line	235	...	...	...	...	...	...
Ditto over obstructions on the line	27	...	...	...	...	...	...
Ditto through gates at level-crossings	7	...	...	...	...	...	...
The bursting of boilers or tubes, &c., of engines	18	...	...	...	3	...	3
The failure of machinery, springs, &c., of engines	43	...	...	...	...	...	...
Ditto of types	2	...	...	...	...	...	...
Ditto of wheels	1	...	...	...	...	...	...
Ditto of axles	10	...	...	...	...	...	...

	Number of accidents.	Number of passengers and others.		Number of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
The failure of brake apparatus	1	...	...	...	...	...	...
Ditto of couplings	27	...	...	1	1	1	1
Ditto of tunnels, bridges, viaducts, culverts, &c.	1	...	...	...	...	...	...
Broken rails	21	...	...	...	...	...	...
The flooding of portions of permanent-way	3	...	...	...	...	...	...
Slips in cuttings or embankments	13	...	...	...	...	...	...
Fire in trains	53	...	...	...	...	...	...
Fire at stations or involving injury to bridges or viaducts	7	...	...	...	...	...	...
Other accidents	39	...	...	...	...	...	...
Total	629	...	1	2	6	2	7

9. The number of collisions between "passenger trains and goods or mineral trains, engines and vehicles standing foul of the line" decreased from 18 to 9, owing to the number of accidents of this class on the East Indian Railway being 1 only against 9 in the 4th quarter of 1881.

10. There were 235 cases of "trains running over cattle" against 191. Of the total number, 70 occurred on the Indus Valley and Kandahar State Railway, 42 on the Rajputana-Malwa System, and 26 on the South Indian Railway. The large number of accidents on the Indus Valley is apparently due to the line not being fenced, and on the Rajputana-Malwa and South Indian Railways the majority of the accidents took place on the unfenced portions of the lines, or on portions where the live fence has not yet grown up.

11. The number of cases of "bursting of boilers or tubes, &c., of engines" diminished from 52 to 18. There was a decrease of 30 on the Sind, Punjab and Delhi Railway alone.

12. The "failures of machinery, springs, &c., of engines" numbered 43, of which 16 occurred on the Indus Valley and Kandahar Railway, and 11 on the Sind, Punjab and Delhi Railway. It is observed, however, that, on the former line, the number of accidents of this description decreased from 28 to 16.

13. There were 27 cases of "failure of couplings," of which 8 occurred on the Sind, Punjab and Delhi Railway, and 7 on the Rajputana-Malwa Railway.

14. The number of cases of "broken rails" rose from 8 to 21, of which 6 were on the Oudh and Rohilkhand Railway, 9 on the Rajputana-Malwa, and 4 on the Muttra-Hathras Railway.

15. Out of a total of 13 "slips in cuttings or embankments," 6 occurred on the Madras Railway, 3 on the Great Indian Peninsula, and 3 on the South Indian. In the corresponding quarter of the previous year, there was only 1 accident under this class.

16. The number of "fires in trains" was the largest on the Indus Valley and Kandahar Railway, being 25 out of a total of 53.

17. The casualties to passengers from causes other than accidents to trains, &c., were:—

	Killed.	Injured.
From falling between carriages and platforms	2	2
Falling on to the platform, ballast, &c., when getting into or out of trains	3	10
Falling out of carriages during the travelling of trains	...	18
TOTAL	5	30

18. And the accidents to servants in the employ of Railways, or of contractors, whilst performing duties connected directly with the transit of passenger and goods from causes other than accidents to trains, &c., were:—

	Killed.	Injured.
During shunting operations	4	16
Falling off engines, vans, wagons, &c.	2	6
Coming in contact with over-bridges, &c., during the travelling of trains	...	1
Coming in contact whilst shunting, with vehicles, &c., standing in adjoining lines.	...	1
Getting on or off trains, engines, &c.	1	6
Whilst loading, unloading or sheeting	1	14
Whilst working at cranes or capstans	...	2
Whilst working on the permanent-way or in sidings	5	3
Whilst walking along the line on the way home or to work	1	1
Whilst walking, crossing or standing on the line	9	8
Falling or being caught between vehicles and platforms	...	1
Falling off ladders, scaffolds, platforms, &c.	...	2
By falling of lamps, wagon doors, timber, weights, &c.	1	2
Whilst coupling or uncoupling wagons	3	5
Miscellaneous	8	19
TOTAL	35	87

19. Of other persons killed and injured by running trains, &c., 1 was killed and 1 injured whilst passing over the line at level-crossings; 19 killed and 10 injured whilst trespassing on the line; 9 committed suicide; and 3 were killed and 2 injured from miscellaneous causes.

20. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1881:—

	4TH QUARTER 1881.		4TH QUARTER 1882.	
	Killed.	Injured.	Killed.	Injured.
PASSENGERS.				
From causes beyond their own control	...	19	...	1
„ misconduct or want of caution	11	19	5	30
SERVANTS.				
From causes beyond their own control	6	34	7	16
„ misconduct or want of caution	32	86	30	77
OTHERS.				
Whilst passing at level-crossings	1	...	1	1
Trespassers including suicides	36	10	28	10
Other persons	2	1	3	2
TOTAL	88	169	74	137

21. In addition to the above 5 persons are reported to have been killed and 29 injured in yards, workshops, &c., and 118 passengers to have met death in carriages and at stations, from causes unconnected with the working of trains.

ORDER—Ordered that these observations, together with copies of the Abstract Returns compiled by the Government of India, be forwarded to the Governments, Administrations, and Officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Assam, and British Burma.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Biluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further that these observations, with the Abstract Returns, be published in the supplement to the *Gazette of India*.

R. A. SARGEAUNT, *Major, R.E.*,
Offg. Under Secretary.

TABLE No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported during the Fourth Quarter of 1882 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control and ACCIDENTS happening otherwise.

* Executive Engineer, Ca... division, Lower Ganges Canal, reports that the decrease, viz., 4,375 acres, is due chiefly to two serious breaches in the Taria distributary which practically closed irrigation for the two running weeks of April; a portion of the decrease is also due to short supply in main... as compared with last year.
Executive Engineer, Etawah ... ion, Lower Ganges Canal, reports that the decrease, 14,201 acres, on the area irrigated last year is due to the fact that the rabi crops were not cut this year as early as last, and consequently the preparation for sowing indigo did not begin so soon.
Executive Engineer, Bhognipur ... vision, Lower Ganges Canal, reports that most of the crops were cut by the first week in April, and full demand for canal water will not begin till May, but there may be a small decrease on the whole.
Executive Engineer, Eastern Jumna Canal, reports that the apparent decrease of 7,000 acres is due to the fact that the rabi crops having matured early, have been cut off without canal water this year. It will be picked up again in May, but there may be a small decrease on the whole.
Executive Engineer, Agra Canal, reports that the irrigation is less than usual owing to very low supply in the Jumna; the Hindan cut could not be opened till the 27th on account of repairs to dam, and canal closed as usual for 10 days from 9th to 18th inclusive. But the chief reason of the decrease is the lateness of the harvest. There was no general demand before 1st May.
Executive Engineer, Rohilkhand Canals, reports that there was scarcely any demand for water during the month, as the rabi harvest was going on. The decrease compared with last year was explained last month.

ALLAHABAD,

Offg. Asst. Secy. to Govt., N.-W. P. & Oudh, P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 12th JUNE 1883.

GENERAL REMARKS.—Rain has fallen in varying quantities during the week throughout the Madras Presidency, in the Deccan and Southern Mahratta Country, in Mysore, the Central Provinces, Bengal, Assam, and British Burma. In the North-Western Provinces, Oudh, the Punjab, and the Central India States the rain has so far been very partial and light, and the weather intensely hot and sultry. Beyond a slight fall at Abu and Jeypore, no rain fell in Rajputana.

There is hardly any change to record in the position of agricultural operations. The harvesting of the second paddy crop has not yet been completed in Madras; preparation for the *kharif* continues in Bombay, the Berars and Hyderabad, the Central Provinces, and Central India, but in the North-Western Provinces and Oudh more rain is wanted for the purpose. In the Punjab the harvesting of the *rabi* crop has been completed except in one district, and sowings for the *kharif* are in progress. More rain is wanted in parts of Bengal for the autumn crops, but the paddy and jute already sown are doing well, as are also indigo and sugarcane. The prospects of the standing paddy crop in Assam are also favourable, and the cultivation of the autumn rice crops is in active progress. Ploughing continues in Burma, and paddy prices are falling.

Cattle-disease is prevalent in many parts of India, but nowhere severe except in parts of Bombay and Burma. Locusts are still reported in the Dekkhan districts.

As usual at this time of the year, fever, small-pox, and cholera prevail; the last appears to be most severe in Bengal, particularly in Jalpaiguri, Cooch Behar, Rungpore, Mymensingh, and Gya.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 13th)		
Bellary ...	·54 (average of seven stations).	Standing crops good; harvest paddy, yield average.
Kurnool ...	·55 (average of seven stations).	Harvest second crop paddy, outturn half; small-pox in four and cattle-disease in five taluks.
Ganjam ...	·89 (average of fifteen stations).	Harvest cotton, outturn poor; fever, small-pox, and cholera decreasing; cattle-disease slight.
Kistna ...	·6 (average of seven stations).	Small-pox in several taluks; guinea-worm and cattle-disease slight.
Chingleput (Madras) ...	1·22 (average of seven stations).	Standing crops good where water available; harvest *kar*, paddy, &c., yield half; small-pox slight in parts.
Coimbatore ...	·65 (average of five stations).	Standing crops good; harvest *cholum*, *cumboo*, and paddy, outturn average; cholera, small-pox, and fever in parts.
Tanjore ...	·56 (average of thirteen stations).	Standing crops generally good; harvest paddy and flax, outturn below average; cholera slight in parts.
Madura ...	·86 (average of two stations).	Standing crops fair; cholera slight in parts.
Malabar ...	7·32 (average of fourteen stations).	First crop progressing in several taluks; harvesting third crop over, outturn average; fever and small-pox continue, latter in all taluks; cattle-disease slight in one taluk.
Travancore ...	2 70	Sowing over; paddy plants coming up well; fever prevails. *General Remarks.*—General prospects good.
Bombay—(June 13th)		
Kurrachee ...	*Nil*	Weather sultry; small-pox disappearing from Kurrachee, only 3 cases remaining in Bagdadi lines; no fresh cases after 7th, when 1 occurred; last death 14th May; total cases 484, deaths 120; disease in three villages in districts, 6 cases, 1 death, remaining 16 cases; fever in eight talukas; cattle-disease in Mirpur Botoro and Shahbandar, 250 sheep and goats and 25 bullocks and cows died in former; river at Kotri on 11th 9 feet 9 inches, against 13 feet 1 inch on corresponding date last year; wheat, red rice, and *bajri* in Kurrachee 26, 32 and 40, in Kotri 28, 30 and 42, in Sakro 16, 30 and 48 and in Shahbandar 22, 40 and 44 lbs. per rupee respectively.
Hyderabad ...	.....	River rising; weather seasonable; small-pox in seven and fever and cattle-disease in three talukas; wheat 24, *bajri* 39, *juari* 48, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Preparation for *kharif* continues; wheat 26 and *bajri* 39 lbs. per rupee.
Baroda ...	1·60	Health good; *bajri* 28 and rice 23½ lbs. per rupee.
Surat ...	·12	Total rainfall 2 36; preparations for *kharif* continue; fever in Pardi; *juari* 41¼ and *nagli* 47 lbs. per rupee.
Násik ...	Good rain throughout the district.	Land being prepared for *kharif* in Igatpuri and Peint; transplanting of *nagli* and rice commenced; cholera throughout the district, except Igatpuri and Chandor talukas; locusts damaging sugarcane and *khoriff* crops; prices as before.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay *contd.*		
Colaba (Bombay) ...	Rain every day: total of week 2·08.	Total to date 5·27, being 1·74 below average; abnormal temperature 6° cool on 6th and 3rd, 9° cool on 7th and 8th, 4° cool on 9th, 2° cool on 10th and 12th, and *nil* on 11th; vapour in air slightly in defect of normal on 6th and 7th, afterwards normal; abnormal wind from south-east, gale of wind from 10th to 12th; thunderstorm on the morning of 7th; thunder and lightning on 8th, 11th, and 12th, distant lightning on 9th.
Poona ...	Rain throughout district—maximum 6·35 at Indapur; minimum 1·45 at Junnar	Locusts disappearing; cholera cases 897, fatal 315; *bajri* 37 and *juari* 52 lbs. per rupee, in Poona *bajri* 34 and *juari* 49 lbs. per rupee.
Ahmednagar ...	Maximum at Karjat 7·40; minimum at Sangamner, 1·86.	Sowing of *tushar* commenced only in Sangamner; locusts still appear in most of the talukas; cholera in all talukas, cases 1,106, deaths 468; *bajri*—maximum 54 lbs. per rupee in Jamkhed, minimum 33 lbs. in Kopargaon; *juari*—maximum 69 lbs. per rupee in Jamkhed, minimum 36 lbs. in Akola.
Sholapur ...	5·69	Total rainfall 7·48; *juari* 53 lbs. 20 tolas and *bajri* 48 lbs. 22 tolas per rupee; cholera 81 cases, 31 deaths.
Dharwar ...	Rain throughout—3·0 in Bankapur; 2·0 in Hangal; 1·0 in seven and slight in two talukas; ·36 in Nargund petta.	Paddy being sown in eight talukas; locusts in Hangal; scarcity of drinking-water in Nargund petta; fever in two talukas; rice minimum 24 and *juari* 45 lbs. per rupee.
Kanara ...	Karwar, 15·39; Sirsi, 6·05; Hallial, 9·59.	Sowing operations continue; sugarcane plants thriving; small-pox at Karwar, Akola, and Sirsi, 1 death; fever subsiding; common rice in Karwar 12 seers per rupee; in district average 13¾ seers per rupee.
Rajkot ...	·32 on 11th	General health good; weather cloudy, hot, and oppressive; cholera appeared in five villages of Morvi, and of bad type in one of Navanagar; *bajri* 28 and *juari* 33 lbs. per rupee. *General Remarks.*—Good rain in the Deccan and Southern Mahratta Country; preparations for *kharif* continue; locusts in Násik, Ahmednagar, Satara, Ratnagiri, and Tanna; cholera in Násik, Ahmednagar, Poona, Tanna, and Belgaum; small-pox, fever, and cattle-disease in a few places.
Bengal—(June 13th)		
Chittagong ...	8·35	Prospects of crops fair; cultivation of *aus* crops in progress; prices stationary; cholera and cattle-disease continue.
Dacca ...	2·15	Sowing of *amun* paddy going on; *aus* paddy, jute, and sugarcane promising; *til* and chillies being harvested; reaping of *boro* paddy completed.
24-Pergunnahs (Calcutta)	Alipore, 1·38	Prospects fair; *amun* paddy on low lands and early paddy and jute being sown; more rain wanted; public health generally good.
Moorshedabad ...	2·28	*Aus* paddy in good condition; sowing of *amun* paddy going on; except a few cases of cholera here and there, public health generally [illegible]
Rajshahye ...	·92	Crops doing fairly; more rain wanted; some fever prevalent; health generally good.
Burdwan ...	1·9	Prospects good; ploughing and sowing being carried on; public health fair.
Rungpore ...	·43	Prospects of crops good; cholera prevalent in some parts of the district.
Bhagálpur ...	1·61	Prospects good; fields being prepared for *bhadoi* sowing; *janera* sown in places.
Purneah ...	·32	Prospects of crops fair; more rain wanted for weeding and raking; slight fever in some parts.
Patna ...	·26	Prospects of standing crops good; cholera reported from Barrh and Behar sub-divisions and small-pox from Behar.
Durbhunga ...	*Nil*	Weather hot, with clouds; crops doing well; indigo wants more rain; prices stationary; cholera still in town and country.
Házáribágh ...	·06	Weather hot and cloudy; sowing of early *rice* and other *bhadoi* crops commenced; cholera said to have appeared in thana Giridi; small-pox also reported.
Cuttack ...	4·37	Weather cooler and cloudy; *sarad* and *beali* crops being sown; cotton being plucked; sugarcane growing well; public health good, a few cases of cholera reported. *General Remarks.*—Rain fell in almost all districts during the week; agricultural prospects are generally fair; cultivation of autumn crops is still proceeding in many parts, but is in want of more rain; *aus* rice and jute have been already sown in many other parts and the young plants are in fair progress; sugarcane also growing well and indigo is fair; sowing of *amun* paddy is going on in some districts; from Cooch Behar reports are not favourable for excessive rain, and from northern parts of Tipperah for floods; cholera is still very severe in Jelpaiguri and parts of Cooch Behar, is prevalent in Darjeeling Terai, in some parts of Rungpore and in almost all sub-divisions of Mymensingh and a bad outbreak has also occurred in Aurungabad sub-divisions of Gya.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (June 12th)	No rain up to 11th, when a heavy shower fell, *viz.*—1·72.	Sugarcane being irrigated; prices rising slightly; health of cattle good; cholera reported from pargana Sheopur in tahsil Benares.
Allahabad, („ 13th)	Sadr, 1·0	Oppressive heat culminating in a heavy thunder shower on morning of 12th; cholera cases more numerous, but not very fatal; prices still very steady.
Gorakhpur („ 11th)	1·20 on 6th	Violent storm during week, weather muggy and hot; a little sporadic cholera and small-pox, also a little cattle-disease; labour in demand; prices slightly rising.
Jhánsi („ „)	.....	Weather cloudy and hot; manuring of fields in progress; prices fluctuating; health good; no cattle-disease.
Agra ...	.....	No report received.
Bareilly (June 12th)	Partial showers	Weather hot; prices rising; health of people and cattle good.
Meerut („ „)	.....	Weather excessively hot, occasional duststorms, wind variable; health good; supplies sufficient; prices unchanged.
Kumaun („ „)	Slight showers	Weather sultry; general health fair; *kharif* operations in progress; cattle-disease continues; prices unchanged.
Lucknow („ „)	No rain	Heat intense, east wind; prices rising owing to large exports; general health good; occasional reports of cholera in the city.
Partabgarh („ „)	Heavy rain on 12th	Prices almost stationary; sugarcane coming on well; water-supply scanty; small-pox at Kunda; general health good.
Sitapur („ „)	Biswan, 1·9; Misrik, ·7.	Prices rising; wheat in usual demand.
Fyzabad („ „)	Sadr, ·6; Akbarpore, 1·6; Tanda, ·6; Bikapur, ·3.	
Rae Bareli („ 11th)	No rain	Weather sultry; cholera continues; scarcity of water in wells; prices almost steady.
Cawnpore („ 12th)	No rain	Small-pox has almost disappeared; cholera reported from one village in Sárh Sálimpur; some cattle-disease; state of extra crops fair; prices slightly higher.
Farukhabad („ „)	.....	Weather very close and sultry, with little or no rain; health of people fair; prices steady; markets well supplied. *General Remarks.*—The week has been intensely hot, accompanied by violent storms in Gorakhpur and Saharanpur, by slight showers in several districts, and by heavier rain in Benares, Fyzabad, Partabgarh, Allahabad, and Sitapur; cholera is reported from Benares, Gorakhpur, Lucknow, Rae Bareli, Allahabad, Cawnpore, and Aligarh; prices are rising in a number of districts, in others are stationary.
Punjab—(June 12th)		
Delhi ...	·20	Health fair; prices almost stationary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 19th JUNE 1883.

GENERAL REMARKS.—During the past week the districts of the Konkan, the Deccan and Southern Mahratta Country, and the Berars have received a sufficient quantity of rain, as also the districts on the eastern coast of the Madras Presidency, including Coorg. In the central and western districts of Madras, in Central India, Rajputana, and Guzerat the rainfall has been slight but general. The monsoon is reported to have set in in Bengal, and a fair amount of rain has fallen over the Central Provinces; but as yet the monsoon current is decidedly weak throughout India. In the North-Western Provinces and Oudh and the Punjab the weather continues unchanged; there has been no rain in the latter province, while in the former the showers have been slight and partial, except in districts bordering on Bengal.

The prospects of the standing crops in the Madras Presidency are generally favourable, but more rain is wanted to prepare the land for future sowings. The same remarks apply to Mysore. Agricultural operations—ploughing and sowing—are in progress throughout the greater part of the Bombay and Bengal Presidencies, Central India, and Rajputana. In Bengal early rice sowings have been completed. In parts of Durbhunga the crops have been spoilt by excessive rain, but generally agricultural prospects have much improved, and the rice, jute, indigo, and sugarcane crops promise well. The prospects of the rice crop in Assam are also good. In Burma ploughing has not yet been finished.

Cattle-disease appears to be less prevalent, but locusts continue to do much damage to standing crops in the Deccan.

Prices are for the most part stationary or have a downward tendency.

Cholera and small-pox are still of general occurrence, and the mortality from the former is severe in parts of Bombay, Bengal, and the Central Provinces.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 20th)		
Bellary ...	·16 (average of three stations).	Standing crops generally good; harvest paddy, yield average.
Kurnool ...	**·02 (one station)**	**Agricultural operations impeded by want of rain; small-pox and cattle-disease in parts.**
Ganjam ...	**·74 (average of fifteen stations).**	**Fever and small-pox decreasing; cholera and cattle-disease slight.**
Kistna ...	·81 (average of six stations).	Small-pox general; fever, guinea-worm, and cattle-disease slight.
Chingleput (Madras) ...	·15 (one station)	Standing crops good where water available; harvest *kar*, paddy, &c., yield half; fever and small-pox slight in parts.
Coimbatore ...	·31 (average of three stations).	Standing crops good; harvest *cholum* and *cumboo* in parts, yield average; cholera, small pox, and fever in parts.
Tanjore ...	·37 (average of four stations).	Standing crops generally good; harvest paddy and flax, outturn below average; cholera slight.
Madura ...	·03 (one station)	Standing crops fair; harvest *cholum*; cholera slight in parts.
Malabar ...	6·6 (average of fourteen stations).	First crop progressing; small-pox in all taluks; fever and cattle-disease in parts, latter slight.
Travancore ...	2 219	Paddy growing well; fever prevails. *General Remarks.*—General prospects good.
Bombay—(June 20th)		
Kurrachee ...	*Nil*	Strong monsoon winds; 3 cases small-pox still in Bagdadi lines, Kurrachee, no fresh case since 12th when one occurred, disease in five villages in districts, 9 fresh cases, no deaths, 11 remaining sick; river at Kotri on the 18th 13 feet 1 inch, against 11 feet 1 inch on same date last year; fever in seven talukas; cattle-disease in Mirpur Botoro, some few deaths; wheat, red rice, and *bajri* in Kurrachee 26, 32 and 40, in Dadu 32, and 48, in Ghorabari 20, 32 and 40, and in Sujawal 26, 34 and 40 lbs. per rupee, respectively.
Hyderabad ...	.....	River rising; boisterous winds; small-pox in eight, fever in two, and cattle-disease in four talukas; wheat 24, *bajri* 39, *juari* 48, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	.....	Total rainfall 3·71; preparations for *kharif* continue; wheat 26 and *bajri* 30 lbs. per rupee.
Baroda ...	·15	Total rainfall 1·75; sugarcane in good condition; sowing commenced in some places; health good; *bajri* 27 and rice 24 lbs. per rupee.
Surat ...	1·78	Total rainfall 4·14; sowing operations commenced; fever in Bulsar and Pardi; *juari* 42 and *nagli* 47 lbs. per rupee.
Nasik ...	Rain throughout the district.	Land ready for *kharif* crops; sowing commenced; locusts throughout the district damaging *nagli* rice and *khonde*; cholera in all talukas except Peint and Malegaon, 300 deaths; wheat 25, *bajri* 28, and rice 22 lbs. per rupee.
Colaba (Bombay) ...	Rain daily except 14th and 19th, heavy on 13th and 18th; total of week 3·67.	Total rainfall to date 8·94, being 4·17 below average; abnormal temperature 4° and 3° cool on 13th and 18th, 1° to 2° warm on all other days; vapour in air normal; abnormal wind from south on 13th, afterwards wind normal; thunder and lightning on 13th, 14th, and 18th.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Poona ...	Rain in seven talukas; maximum at Poona 1·19.	Cholera cases 1,144, fatal 408; *bajri* 37 and *juari* 42 lbs. per rupee, in Poona *bajri* 34 and *juari* 39 lbs. per rupee.
Ahmednagar ...	1·91 in Kopergaon; none in Karjat, Jamkhed, and Rahuri; slight in others.	Sowings of *tushar* crops in progress in all talukas; cholera in Kopergaon, 285 attacks and 114 deaths, in Sangamner 238 attacks and 115 deaths, in Rahuri 212 attacks and 102 deaths, in Newasa 120 attacks and 53 deaths, it is also prevalent in all other talukas, except Karjat, to a less extent; cattle-disease in Karjat; *bajri*—maximum 51 lbs. per rupee in Jamkhed, minimum 22 lbs. in Sangamner; *juari*—maximum 66 lbs. per rupee in Jamkhed, minimum 28 lbs. in Sangamner.
Sholapur ...	1·62	Total rainfall 9·10; *kharif* sowing commenced in places; *juari* 64 lbs. 5 tolas and *bajri* 50 lbs. 14 tolas per rupee; cholera cases 88, deaths 41.
Dharwar ...	Rain at all stations except Navalgund and Nargund; heaviest in Karajgi, 5·49; minimum in Gadag, ·14.	Sowing of paddy and *ragi* proceeding and fields being prepared for sowings of other early crops; small-pox in Dharwar town and fever in two talukas; in parts of Nargund petta scarcity of drinking-water; rice 24 and *juari* 43 lbs. per rupee.
Kanara ...	Karwar, 8·09; Sirsi, 7·87; Kumpta, 12·02; Hallial, 2·30.	Sowing operations continue; sugarcane and cardamom plants thriving; small-pox at Karwar, Kumpta, and Sirsi, 1 death; slight fever throughout the district; common rice in Karwar 12 seers per rupee, in district average 13¼ seers per rupee.
Rajkot ...	.....	General health good; weather cloudy and hot; cholera appeared in Dhrol and in six villages of Navanagar and six of Morvi, 2 cases at Bakharala, Und, and Porbandhar; *bajri* 28 and *juari* 35 lbs. per rupee.
		General Remarks.—Good rain in Konkan, Deccan, and Southern Mahratta Country, slight in Gujerat; sowing generally in progress; locusts in Násik, Khandesh, Tanna, Ratnagiri, and Satara; cholera in Násik, Poona, Ahmdenagar, Sholapur, Khandesh, Tanna, Satara, Kaladgi, and Belgaum; small-pox, fever, and cattle-disease in a few places.
Bengal—(June 20th)		
Chittagong ...	14·39; continuous heavy rain.	High wind at times; prospects of crops continue good; prices stationary; fever and sporadic cholera continue; cattle-disease abating.
Dacca ...	2·63	Sowing of *amun* paddy proceeding; jute, sugarcane, and *aus* paddy thriving; *aus* paddy being harvested in one station; sessamum and chillies being gathered.
24-Pergunnahs (Calcutta)	2·05	Sowing of early crops commenced; fields being prepared for *amun*; more rain wanted; price of common rice stationary; public health generally good.
Moorshedabad ...	1·95	Prospects of crops favourable; *amun* being sown in some places; health of district generally good.
Rajshahye ...	1·41; rains commenced	State of crops good.
Burdwan ...	2·06; good rain throughout district, except in Cutwa.	Prospects good; fields being generally ploughed and sown; small-pox reported from some villages, otherwise public health fair.
Rungpore ...	2·29	Prospects of crops good; transplanting of *amun* going on; *aus* in some places being cut; cholera somewhat prevalent in some parts of district.
Bhagálpur ...	7·43; monsoon has set in.	Prospects much improved by rain; paddy seedling and sugarcane now doing well.
Purneah ...	4·29; rains set in on 15th.	The rain will save paddy and indigo; ploughing and transplanting carried on actively; common mangoes one pice a hundred; public health fair; rivers rising rapidly from cyclone.
Patna ...	12·80	Prospects good; fields being prepared for *bhadoi* sowing; cholera reported from Behar.
Durbhunga ...	15·12	Many crops low; land under water spoilt; rain good for all other crops; fine weather now wanted for cultivation; prices rising slightly; cholera disappearing.
Hazáribágh ...	5·25	Weather cloudy, with passing rain; sowing of rice and *bhadoi* crops begun; cholera and small-pox abating; general health good.
Cuttack ...	4·0	Weather cloudy; sowing of rice in progress; sugarcane being planted; cotton being plucked; public health generally good.
		General Remarks.—The monsoon rains appear to have now generally set in, there has been good general rain during the week, the fall was considerable in Behar and in certain other parts; in Durbhunga low lands are under water and the crops thereon are said to have been spoilt; in Purneah it is said that the rivers are rising rapidly on account of a cyclone; general agricultural prospects however have been much improved by the rain; in Behar sowing of autumn crops is in fair progress; early rice is still being sown in some places, but for the most part the sowing has been finished; this crop, jute, sugarcane, and indigo are generally in good condition; ploughing for *amun* crop is generally proceeding, and in some places sowing is being carried on; the rain has also generally improved the state of public health, though cholera is still very severe in a few localities.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (June 19th)	4·0; Chandausi, 3·7; Gangapur, 2·6.	Weather seasonable; no sickness; prices falling; ploughing for *khari* harvest begun.
Allahabad („ 20th)	1·1 in all tahsils except Sirathu.	Heat still considerable; ploughing begun; cholera still in four tahsils; prices mostly unchanged.
Gorakhpur („ 18th)	·60	Rain set in on 13th, sky cloudy; a little sporadic cholera and some cattle-disease; labour in demand; prices steady.
Jhánsi („ „)	·7 Mau; ·2 Jhánsi; ·2 Moth.	Weather cloudy and stormy; ploughing for *kharif* commmenced; prices stationary; health good; no cattle-disease.
Agra („ 19th)	Rain in all parganas, from ·30 to 2·1.	Fever in three and small-pox in one pargana; sporadic cholera in two parganas; prices steady.
Bareilly („ „)	Partial slight shower	Weather hot; prices stationary; health good.
Meerut („ „)	Occasional drizzle	Weather very hot; frequent duststorms; health good; agricultural operations active; prices show a tendency to rise.
Kumaun („ „)	Occasional showers	Weather very hot; health fair; *kharif* operations going on; cattle-disease continues; prices stationary.
Lucknow („ „)	·4; Mohanlalganj, ·5; Malihabad, slight shower.	Weather sultry; prices rising owing to large exports; occasional reports of cholera in the city; general health good.
Partabgarh („ „)	.....	Prices falling; *juari* and *makra* being sown in Patti; a few cases of cholera reported; general health good.
Sitapur („ „)	·3 in Sidauli	Small-pox still in Sitapur and Misrik; prices fluctuating.
Fyzabad („ „)	·62 Sadr, ·50 tahsil Tanda, ·2 Akbarpur.	
Rae Bareli („ 18th)	1·9 in tahsil Salon	Weather cloudy and intensely hot; cholera continues; prices almost stationary.
Cawnpore („ 19th)	·5 in three parganas	Prospects of indigo good; a few cases of cholera reported; slight disease among cattle; prices stationary.
Farukhabad („ „)	.....	Weather close and hot, with occasional hot west winds, clear sky; health of people fair; rain eagerly expected.
		General Remarks.—Ploughing and sowing for the *kharif* begun; the weather, however, generally continues hot and sultry; the general health is good, but eight districts report cases of cholera; prices are falling in Benares, Partabgarh, and Saharanpur, are rising in Lucknow, and are stationary or nearly so in other districts.
Punjab—(June 19th)		
Delhi ...	No rain	Health fair; prices fluctuating.
Hissar ...	.....	No report received.
Umballa ...	·2	Health fair; preparations being made for sowing *kharif* and sugarcane crops; prices stationary.
Jullundur ...	·4	Health good; sugarcane crop being irrigated; prices steady.
Amritsar ...	No rain	Health good; prices stationary.
Sialkot ...	.....	Health good; *rabi* crops garnered; prices stationary.
Ferozepore ...	No rain	Health good; slight fall in prices.
Lahore ...	No rain	Health good; slight rise in prices.
Rawalpindi ...	No rain	Slight fever in Kahuta tahsil; preparations being made for *kharif* sowings; prices fluctuating.
Mooltan ...	No rain	Health good; *kharif* sowings continue; prices fluctuating.
Dera Ismail Khan ...	No rain	Health good; harvesting in progress; prices steady.
Peshawar ...	.....	Rain much wanted; health good; prices fluctuating.
		General Remarks.—Health generally good; *rabi* harvesting completed, except in the Dera Ismail Khan district; *kharif* sowings commenced in most districts.
Central Provinces—		
Nagpur (June 20th)	5·83	Weather very wet; ploughing continues; cholera and small-pox slight; prices risen slightly.
Jubbulpore ...	4·84	Rain commenced on 14th; weather cloudy and cool; land under preparation for *kharif* sowings; cholera and small-pox prevalent; prices stattonary.
Sangor (June 18th)	1·60	Weather hot at times; ploughing general; cotton sowings commenced; prices steady; small-pox declining.
Seoni („ 19th)	5·87	Monsoon burst on 13th; sowings in progress; 22 deaths from cholera; cattle-disease continues; wheat 23 and rice 15½ seers per rupee.
Hoshangabad („ „)	2·63	Weather hot and cloudy; ploughing continues; sowings commenced; small-pox prevalent; rice 10 and wheat 14 seers per rupee.
Khandwa ...	·33	Weather cloudy and close; sowings stopped for want of rain; 2 deaths from small-pox and 2 from cholera; prices steady.
Raipur ...	.....	No report received.
Sambalpur (June 14th)	3·60	Rain commenced on 11th; sugarcane suffering from heat; tanks generally dry; field operations actively carried on; health good; prices steady.
		General Remarks.—Rain general; weather cooler; cotton and rice sowings begun in places; cholera severe in Wardha; small-pox declining; prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—(June 20th)		
Akyab ...	6·73	Total rainfall to date 37·17; 11 deaths from small-pox, otherwise public health good; cattle-disease severe in one township; ploughing commenced slightly; 16 deaths from small-pox in district between 11th and 31st May now reported.
Rangoon ...	3·00	Total rainfall to date 18·00; 2 cases of small-pox, otherwise public health good; prices of *ngakyouk* paddy Rs. 88 per 100 baskets and of *ngatsain* Rs. 87 per 100 baskets.
Bassein ...	5·51	Total rainfall to date 20·10; 1 death from cholera, otherwise public health good; 2 deaths of cattle-disease in Bassein, 13 in Thaboung, and 6 in Laymyethna townships; ploughing commenced in different parts of the district.
Prome ...	2·39	Total rainfall to date 13·00; public health good; slight cattle-disease in Padoung and Shavaglay.
Amherst (Moulmein) ...	7·04	Total rainfall to date 37·74; public health in Moulmein and district good; cattle-disease in three townships; health of cattle in Moulmein good; about 20 per cent. fields ploughed in the Amherst district and 2,000 acres in Moulmein; ploughing and sowing progressing in Moulmein; good deal of land tilled by hand in Amherst; health of plough cattle good.
Toungoo ...	4·29	Total rainfall to date 18·39; 2 deaths from small-pox in town, otherwise public health good.
		General Remarks.—Public health good; slight cattle-disease in most districts, but nowhere severe except in one township of Akyab; ploughing generally commenced; price of paddy shows still a downward tendency, but very gradual; monsoon general, but the rainfall in parts less than at same period last year.
Assam—(June 20th)		
Gauhati ...	5·71	Weather sultry; fever at Barpeta; cholera and cattle-disease in the interior; prospects of *aus* paddy good, unless there is a sudden inundation.
Sylhet ...	8·53	Crop prospects good in the south of the district; flood damages being elsewhere repaired as rapidly as possible by fresh cultivation; public health still indifferent.
Cachar (Silchar) ...	8·67	Weather hot; cultivation for *sali* and *aus* crops continues; common rice 16 seers per rupee; small-pox abating; general health good.
Dibrugarh ...	6·24	Weather warm; ploughing for *sali dhan*; prospects of *ahu* crop good; cholera abating.
Mysore and Coorg—(June 20th)		
Bangalore ...	·11	Rain needed for standing crops and agricultural operations; public health good; prospects favourable.
Mysore ...	.....	Rain needed for standing crops and agricultural operations; public health good; prospects favourable.
Mercara ...	2·85	Weather favourable for agricultural operations; ploughing for rice fields progressing; rice nurseries and *ragi* crop doing well; bored trees are being removed on coffee estates; labour coming in slowly; public health good; prices pressing.
		General Remarks—No rain in the districts except Shimoga and Kadur; standing crops in good condition; prospects fair; public health generally good; no material change in prices.
Berâr & Hyderabad—(June 20th)		
Amráoti ...	3·68	Cotton sowing continues; wheat 16 and *juari* 26 seers per rupee.
Akola ...	1·21	Cotton sowing progressing.
Hyderabad (June 16th)	1·07	Total rainfall from 1st January 4·32, it rained nearly 2 inches in one taluk in a day, and some of the small tanks have received a supply of water sufficient for drinking purposes; preparations for coming *kharif* crops continue; cholera and small-pox prevail in four taluks; prices—wheat 16, coarse rice 10, white *juari* 27, yellow *juari* 30, and *tur* two seers per current sicca rupee.
Central India States—(June 20th)		
Indore ...	2·02	Weather close and more rain apparently impending; health good; agricultural prospects favourable; prices have a downward tendency.
Morar (Gwalior) ...	·10; showers in district	Health good; weather sultry; ploughing commenced.
Sutna ...	·36; a few showers only	Weather continues hot.
Rutlam ...	.....	No report received.
Neemuch ...	1·34	Weather seasonable; public health good.
Goona ...	2·06	Weather cloudy; health good; wheat 24 seers 8 chittacks per rupee.
Bhopal ...	.....	No report received.
Agar ...	2·97	Weather hot; public health good; land being prepared for *kharif*.
Sehore ...	2·38	Weather cloudy; crops and public health good.
Nowgong ...	·46	Weather hot and cloudy; health good.
Manpur ...	.....	No report received.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—		
Abu (June 20th)	1·18	Weather cloudy but regular; monsoon not set in.
Sirohi („ 17th)	.....	Fair amount of water in tanks and wells; health good; ploughing begun for *kharif* crops; heat not excessive; weather damp and cloudy.
Marwar („ 15th)	·09	A month's water in tanks; health good; ploughing commenced; sky overcast, close, and sultry, indications of rain; prices rising.
Meywar („ 17th)	0·71	Wells and tanks getting low; health very good.
Harowti („ 16th)	Deoli, 1·35; Tonk, ·29; Kotah, 1·37; Shapura, 1·0.	Weather cloudy; heat great; *kharif* sowings commenced; health good.
Jhallawar („ 13th)	1·05	*Makka* sowings commenced; health good.
Ajmere („ 19th)	·95	High winds; *kharif* sowing proceeding; health good.
Jeypore („ „)	1·95	Ploughing active; health fair; prices nearly stationary.
Bhurtpore ...	.....	No report received.
Ulwur (June 19th)	·41	Health good; no deaths from cholera.
Nepal—(June 14th)		
Katmandu ...	·99	Prospects good; sky overcast, occasional showers; weather fairly cool.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EFFICACY OF PERCHLORIDE OF MERCURY IN PRESERVING BOOKS, &c., FROM THE ATTACKS OF WHITE-ANTS AND OTHER INSECTS.

No. 14—475-81, dated Simla, the 9th April 1883.

From—A. MACKENZIE, Esq., C.S., Secy. to the Govt. of India, HOME DEPT.,
To—The Local Governments and Administrations.

In continuation of Home Department Circular Nos. 67—2007-15, dated the 13th December 1881, I am directed to say that the results of experiments which have since been tried for preserving books, &c., from the attacks of white-ants and other insects show that a simple solution of perchloride of mercury (corrosive sublimate) in the proportion of one part by weight of the drug to 144 parts of water is quite as efficacious as any other preparation, while at the same time it is very cheap.

No. 1961, dated Bombay Castle, the 6th June 1883.

From—J. MONTEATH, Esq., C.S., Actg. Under-Secy. to the Govt. of Bombay, GENL. DEPT.,
To—The Secretary to the Government of India, HOME DEPT.

With reference to Mr. Officiating Under-Secretary Forbes' Memorandum No. 483 of the 9th April last, I am directed to forward, for the information of the Government of India, the accompanying copy of a letter* from the Engineer-in-Chief, West Deccan State Railway, reporting the results of certain experiments made by him with a solution of bi-chloride of mercury as a means for the protection of tent dhurries (poles), ceilings of roofs, &c., from the attack of white-ants.

* No. 334, dated 11th May 1883.

Letter from the Engineer-in-Chief, West Deccan State Railway, No. 334, dated 11th May 1883.

"Adverting to Government Resolution No. 835 of 1882, also Nos. 708 and 786 of 1883, where the result of any experiments in the use of a solution of bi-chloride of mercury as a protection against white-ants was ordered to be reported, I have the honor to state that, during the last season, I used the preparation to protect tent dhurries, &c., and found it answer perfectly.

"2. I would also report an experiment on a much larger scale that was at the time considered successful. The ceiling of the roof of the Trichinopoly Station, South Indian Railway, was made with American deal boards soaked in a solution of corrosive sublimate. This was done about 17 years ago. I cannot now remember what the exact cost to the whole roof was, but it was so little as to make the cost of the deal boards come to considerably less than would have been the cost of using teak boarding for the purpose.

"3. I report this under the belief that it is worth the attention of all officers in the Department to consider the small cost that would be necessary to protect timber of all kinds in this way from being destroyed by white-ants, as compared with what would be the cost of renewal, and especially in places where the failure of the timber might lead to serious result."

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

D. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 25th June 1883.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 26th JUNE 1883.

General Remarks.—Rain has fallen during the past week all over the Madras Presidency, but except along the Malabar Coast and in Coorg the fall has been comparatively slight. There has been no rain again in Sind; elsewhere in the Bombay Presidency it has been general, but more is reported to be urgently wanted in some places. The Berars and Hyderabad have received a fair quantity during the week, and showers have fallen throughout the Central India States and Rajputana, but more is also wanted in these tracts.

No report has been received from Burma. In Assam the districts of Lakhimpur and Sylhet have received heavy rains, and in the latter district portions of the recently flooded lands have again been submerged.

In Bengal and the Central Provinces the fall has been general and sufficient, and in Behar it has been excessive. Rain has held off in the North-Western Provinces and Oudh and the Punjab, and the heat has been intense. Latest reports show that in the former Province wet weather has now set in, but the Punjab as yet is practically rainless.

Agricultural prospects remain unchanged in Madras. *Kharif* operations are being actively carried on everywhere; sowings have been completed in parts of Bombay, and have commenced in parts of the Punjab; elsewhere they are in active progress. Heavy rain has injured the jute and rice crops on low lands in Behar, otherwise the prospects in Bengal are very favourable.

Locusts have appeared in parts of Rajputana, and continue to be a source of danger to the coming crops in Bombay. Cattle-disease of a mild type is generally prevalent.

Prices remain stationary, except in the North-Western Provinces where they show a tendency to rise.

The public health is improving on the whole, but the mortality from cholera has been severe in Poona and Ahmednagar and is increasing in Nagpur.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 27th)		
Bellary ...	·38 (average of five stations).	Standing crops generally good; harvest paddy, yield average.
Kurnool ...	2·5 (average of nine stations).	Prospects improved; small-pox and cattle-disease in parts.
Ganjam ...	1·08 (average of sixteen stations).	Fever and small-pox decreasing; cholera and cattle-disease slight.
Kistna ...	2·37 (average of twelve stations).	Small-pox general; fever, guinea-worm, and cattle-disease slight.
Chingleput (Madras) ...	1·7 (average of eleven stations).	Standing crops good where water available; *kar* paddy harvested, yield half; small-pox and cattle-disease slight in parts.
Coimbatore ...	·63 (average of ten stations).	Standing crops good, except *cholum*, in parts; harvest paddy, *cholum*, and *cumboo* in parts, outturn above average; cholera, small-pox, and fever in parts.
Tanjore ...	2·52 (average of twelve stations).	Standing crops generally good; harvest flax, yield below average; cholera slight in parts.
Madura ...	1·12 (average of seven stations).	Standing crops fair; harvest *cholum* in parts; fever slight in parts of one taluk.
Malabar ...	3·57 (average of fourteen stations).	First crops progressing in all taluks; small-pox in all taluks; fever and cattle-disease continue in parts.
Travancore ...	3·015	Paddy growing well; fever prevails. *General Remarks.*—General prospects good.
Bombay—(June 27th)		
Kurrachee ...	*Nil*	1 case of small-pox now remaining in Bagdadi lines, Karachi, total 485 cases, 120 deaths; disease in nine villages in districts, 19 fresh cases, no deaths, 14 remaining sick; river at Kotri on 25th 12 feet, against 15 feet 9 inches on same date last year; Bughar commenced to flow on 15th; fever in five talukas; cattle-disease in Mirpur Botoro; wheat, red rice, and *bajri* in Karachi 26, 32 and 36, in Manjhand 28, 32 and 48, in Tatta 24 and 28, and in Jati 20, 34 and 38 lbs. per rupee respectively.
Hyderabad ...	.....	River low; weather sultry, rain expected; small-pox in seven, fever in one, and cattle-disease in four talukas; wheat 25, *bajri* 39, *juari* 48, red rice 28, and white rice 22 lbs. per rupee.
Ahmedabad ...	·35	Total rainfall 4·06; preparations for *kharif* continue; wheat 26½ and *bajri* 29½ lbs. per rupee.
Baroda ...	·90	Total rainfall 2·65; locusts have appeared in Naosari division; public health good; *bajri* 27 and rice 23 lbs. per rupee.
Surat ...	1·44	Total rainfall 5·51; sowing operations continue; *juari* 42½ and *nagli* 43 lbs. per rupee.
Násik ...	Good rain in Násik and Igatpuri.	More rain urgently wanted elsewhere; transplanting of rice and *nagli* and sowing of *kharif* crops commenced, but owing to fear of locusts not vigorously growing on; in places locusts have damaged *nagli* and rice plants and *khonde* crops; cholera throughout the district except Peint, but abating; wheat 28, *bajri* 28, and rice 22 lbs. per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	Rain on 22nd, 23rd, 25th and 26th; heavy on 26th; total of week 2·80.	Total rainfall to date 11·74, being 7·10 below average; abnormal temperature fell from 2° warm on 20th to 4° cool on 26th; vapour in air normal; abnormal wind gradually veered from north-north-east on 20th to south-west on 26th; gale from 24th to 26th.
Poona ...	Rain throughout the district, maximum 3·18 at Mawal.	Sowing operations in progress; cholera cases 1,217, fatal 456; *bajri* 37 and *juari* 44 lbs. per rupee, in Poona *bajri* 32 and *juari* 30 lbs. per rupee.
Ahmednagar ...	3·07 in Rahuri; 3·05, in Karjat; 2·06 in Parner; and ·64 in Akola; in other talukas above an inch.	Sowing of *kharif* in progress in Rahuri and Jamkhed, and also of *tashar* crops in all talukas except Newasa and Kopargaon; cholera in all talukas, 1,352 attacks, 633 deaths; *bajri*—maximum 51 lbs. per rupee in Jamkhed, minimum 33 lbs in Akola; *juari*—maximum 66 lbs. in Jamkhed, minimum 36 in Akola.
Sholapur ...	1·74	Total rainfall 10·84; *kharif* sowings in progress; *juari* 57 and *bajri* 50 lbs. per rupee; cholera cases 86, deaths 38.
Dharwar ...	Rain very slight; maximum in Hangal, ·81.	Rain wanted everywhere; rice sowings almost completed and young rice crop fair; sowing of *juari*, *sawan*, *ragi*, and other early crops in progress in some places, and elsewhere ground being prepared; public health good; *juari* 56 and rice 29 lbs. per rupee.
Kanara ...	Karwar, 9·78; Kumpta, 3·11; Hallial, ·97 and Sirsi 2·53.	Sowing and transplanting operations continue; rice plants healthy; sugarcane and cardamom plants thriving; small-pox in Karwar, 1 death, and is also prevalent in Akola, Kumpta and Sirsi talukas; slight fever throughout the district; common rice in Karwar 12¼ seers per rupee; in district average 13¾ seers.
Rajkot ...	.....	General health good; weather very hot and oppressive; cholera continues in Dhrol and in seven villages of Navanagar and eight of Morvi; *bajri* 29 and *juari* 36 lbs. per rupee.
		General Remarks.—Rain general in the Presidency but more urgently wanted in some places, none in Sind; sowing completed in Colaba, in progress in other districts; locusts in Násik, Khandesh, Satara, Ratnagiri, and Colaba; cholera in Násik, Khandesh, Ahmednagar, Poona, Sholapur, Tanna, and Belgaum; small-pox, fever, and cattle-disease in a few places.
Bengal—(June 27th)		
Chittagong ...	7·52	Weather seasonable; prospects of crops good; sowing of *aus* rice in progress; prices stationary; cholera and fever still continue; cattle-disease on the decrease.
Dacca ...	·51	Sowing of *amun* rice going on; jute, sugarcane and *aus* rice promising; *aus* paddy being harvested in two stations; harvesting of *sesamum* and chillies going on.
24-Pergunnahs (Calcutta)	1·11	Prospects good; jute and early rice seedlings doing well; transplanting of *amun* rice going on; in some parts of the district high lands being prepared; price of common rice stationary; public health generally good.
Moorshedabad ...	1·98	Young *bhadoi* rice plants doing well; *amun* rice being still sown; public health generally good.
Rajshahye ...	3·89	Sufficient rain; rivers rising fast; crops doing well; *amun* being transplanted in places.
Burdwan ...	3·81	Prospects of crops generally good; some damage to paddy seedlings and sugarcane by excessive rain in Raneegunge sub-division; public health fair.
Rungpore ...	5·81	Prospects of crops good; *keon*, millet, and *aus* rice being cut; cholera still somewhat prevalent.
Bhagálpur ...	5·07	*Bhadoi* sowings going on rapidly; in north heavy floods have done some injury to young seedlings and to indigo, in south rain has done good to indigo; prospects are generally good.
Purneah ...	3·85	Crops on lower lands still submerged; rivers threatening to overflow; public health fair.
Patna ...	11·53	Prospects of crops good; sowing and ploughing going on everywhere; public health good.
Durbhunga ...	2·72	Continuous rain has damaged *mong* pulse, and paddy on low lands under water, also indigo on lower levels; good for all other crops; prices rising slightly; cholera subsiding.
Hazáribágh ...	·76	Weather warm, with passing rain; good rain throughout district; sowing of rice and *bhadoi* crops progressing favourably; general health good.
Cuttack ...	·87	Weather hot and cloudy; sowing of rice crops in progress; public health good; rivers rising.
		General Remarks.—Rain has been general again this week and enough for all present agricultural purposes; the fall in Behar, however, has been excessive for the past two weeks and has caused more or less damage to the crops on low lands in certain parts; in parts of Jalpaiguri and Cooch Behar also early rice and jute are not favourably reported on owing to excessive rain, elsewhere prospects are reported to be very favourable; early rice, jute, and sugarcane are promising and cultivation of *amun* rice is proceeding well; in Behar and other places sowing of *bhadoi* crops is still being carried on; rain has also generally improved the public health; cholera is said to have abated in Jalpaiguri, Cooch Behar, and other places, where it was so prevalent before.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (June 26th)	No rain	Some *kharif* crops planted; sugarcane doing well; no sickness of men or cattle; prices of food-grains slightly fluctuating.
Allahabad ...	1·1	Cholera decreasing, 19 deaths; prices slightly rising.
Gorakhpur (June 25th)	Some rain in south	Weather cloudy throughout week; *kharif* sowings begun; some few cases of cholera and some cattle-disease; prices slightly rising.
Jhánsi („ „)	·1; ·9 in Moth; ·5 in Garotha.	Ploughing for *kharif* commenced; prices rising; health good; no cattle-disease.
Agra („ 26th)	·1 and ·3 in two parganas;	Fever in one and small-pox in two parganas; sporadic cholera in two parganas; prices steady.
Bareilly („ „)	Stray slight showers	Weather cooler; some early sowings begun; prices nearly stationary; health remains good.
Meerut ...	.....	Heavy storm on night of 24th over south of district, but since clear and excessively hot, wind east; health good; prices inclined to rise.
Kumaun ...	Showery and very threatening at times.	Weather hot; health fair; *kharif* operations nearly completed; cattle-disease still prevalent; prices stationary.
Farukhabad ...	.....	No report received.
Lucknow (June 26th)	·1 Maliabad; ·2 Mohanlalganj.	Sky cloudy, east wind; prices rising; cholera in city, but not severe
