FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

SIMLA,
The 8th July 1884.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 9th July, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

KHOJÁ SUCCESSION BILL, 1884.

The Hon'ble MR. ILBERT introduced the Bill to amend and define the law of Testamentary and Intestate Succession to Khojás, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Gibbs, Quinton, Barkley and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Bombay Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

PANJÁB COURTS' BILL, 1884.

The Hon'ble MR. BARKLEY moved that the Bill to amend the law relating to Courts in the Panjáb be referred to a Select Committee consisting of the Hon'ble Messrs. Gibbs and Ilbert, the Hon'ble Sir Steuart Bayley, the Hon'ble Mr. Quinton and the Mover, with instructions to report in two months.

The Motion was put and agreed to.

AGRICULTURISTS' LOANS BILL, 1884.

The Hon'ble SIR STEUART BAYLEY presented the Report of the Select Committee on the Bill to amend and provide for the extension of the Northern India Takkáví Act, 1879.

The Council adjourned to Wednesday, the 23rd July, 1884.

SIMLA;
The 10th July, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9th JULY 1884.

GENERAL REMARKS.—In the Madras Presidency rain fell in all districts during the past week, but more is still wanted in several places, more especially in Bellary and Madura. In Mysore and Coorg the rainfall is still insufficient; in the former province more rain is urgently needed for young plants. Almost all districts of the Bombay Presidency report slight rain during the week, but more rain is much wanted generally throughout the Presidency for the *kharif* sowings. In the Berars and Hyderabad the fall has again been light, and also throughout the Central India and Rajputana States. Heavy rain continues in all districts of the Central Provinces, and a break would be beneficial in the southern districts where sowings are impeded. Rain has been general, though somewhat light, in the North-Western Provinces and Oudh and in the greater part of the Punjab. In British Burma the rainfall is nearly up to the average, and good falls are reported from the Assam districts. In Bengal the rainfall has been general, but insufficient for transplanting operations.

The report of the Meteorological Department, dated the 10th instant, shows a cessation of rain in Northern India, but heavier falls on the west coast and over the Dekkan and also in Burma.

Harvesting is still in progress in Madras, and the condition of standing crops is generally fair. Ploughing and sowing for the *kharif* continue throughout the country, but are backwards in parts of Bombay, North-Western Provinces and Oudh, and Punjab for want of rain. Cotton plants are above ground in the Berars and cotton sowing is in progress in Nagpur. In Assam and Bengal the prospects of the standing crops are good, but more rain is wanted for transplanting operations in the latter province. In Assam the prospects of tea are improving.

Cholera and small-pox are abating in the North-Western Provinces and Oudh and Punjab, and the public health is generally good.

Prices are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 9th)		
Bellary ...	·29 (average)	More rain much wanted. 13 deaths from cholera.
Kurnool ...	·15 (average)	Progress of sowing arrested from want of rain. Small-pox and cattle-disease in parts.
Ganjam ...	1·31 (average)	Small-pox generally prevalent; fever in one taluka.
Kistna ...	·67 (average)	River rising 1·75 feet over anicut. Small-pox and fever in places; one death from cholera.
Chingleput (Madras) ...	·43 (average)	Standing crops fair, but in want of rain in parts. Harvest paddy, yield half the average. Small-pox generally prevalent; 19 deaths from cholera.
Coimbatore ...	·14 (average)	Standing crops generally fair, but in want of rain in parts. Harvest dry crops outturn below average. Fever and small-pox in parts; 8 deaths from cholera.
Tanjore ...	·07 (average)	Standing crops generally good, but in want of rain in parts. Freshets in the Cauvery low. Harvest paddy and cotton outturn below average. 778 deaths from cholera.
Madura ...	·12 (average)	Standing crops fading from want of rain. Small-pox slight in parts; 3 deaths from cholera.
Malabar ...	4·91 (average)	Transplanting of paddy progressing. Small-pox slight in 8 talukas and fever in three; three deaths from cholera.
Travancore ...	1·44	Fever prevalent; nine deaths from cholera; small-pox declining. *General Remarks.*—General prospects moderate.
Bombay—(July 9th)		
Karachi ...	.....	Weather cloudy; rain expected; river falling, 13 feet 3 inches on 7th against 14 feet 8 inches on same date last year. Fears entertained for cultivation. Fever in 5 talukas. Cattle-disease in Ghorabari. Small-pox in 14 villages in districts; 20 fresh cases, 4 deaths, 16 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Sehwan 32, 32 and 40, in Sakro 16, 28 and 36 and in Sujawul 32 and 36 pounds per rupee, respectively.
Hyderabad ...	.....	River at Kotri on 7th, 13 feet 3 inches against 14 feet 8 inches on same date last year. Small-pox in 7, fever in 1, and cattle-disease in 1 taluka. Prices of grain steady.
Ahmedabad ...	·11	Total rainfall 1·93. Rain urgently wanted. One cholera case in the city which was fatal. Wheat 29 and *bajri* 32 pounds per rupee.
Baroda ...	·03	Total rainfall 1·21. Cholera suddenly increased in Baroda city; 88 deaths. Sowings, retarded for want of rain. Prices—*bajri* 25 and rice 20 pounds per rupee.
Surat ...	.....	Rain wanted. Sowing progressing. *Juari* 29 and *nagli* 39 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik ...	Slight rain on 7th	Prospects uncertain. Public health generally good. Small-pox in parts of Sinnar, Chandor and Kalvan. Cattle-disease in Kalvan. *Bajri* 28¼, wheat 34½ and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain daily except on 5th; total of week 1·79.	Total rainfall to date 15·22 being 11·37 below average. Abnormal temperature 2° warm to 1° cool; vapour in air somewhat excessive; abnormal wind from south-east on 7th and 8th.
Poona ...	Light showers in 6 talukas; 2·22 rain in Naval; none at Sirur.	Sowing of rice and *nagli* in Junnar, Khed, Purandhar and Naval in progress. Rain wanted for sowing other crops throughout the district. *Bajri* 33 and *juari* 36, in Poona *bajri* 26 and *juari* 27 pounds per rupee.
Ahmednagar ...	No rain in Rahuri, Kopargaon, Karjat and Jamkhed; very slight in other talukas.	Sowing of *kharif* delayed and anxiety is felt by cultivators for want of rain. Scarcity of fodder in Parner and Jamkhed. Cattle-disease in Newasa and Kopargaon. *Juari*—maximum 60 pounds in Sangamner, minimum 36 in Parner; *bajri*—maximum 48 in Akola, minimum 46 in Parner.
Sholapur ...	·48; Barsi, ·78; Madha, ·30; Pandharpur, ·44; Sangola, ·13 and Malsiras, ·83.	*Kharif* sowings retarded for want of rain which is urgently needed. *Juari* 39 pounds 3 tolas and *bajri* 40 pounds 13 tolas per rupee.
Dharwar ...	1·94 in Banyal; 1·86 in Kalghatgi; 1·22 in Mugud; less than 1·0 in Bankapur, Kod, Karajgi, and Hubli; none in Eastern talukas, excepting in Hangal Kalghatgi, Kod and Mugud Petta.	Sowing operations mostly at a standstill owing to absence of rain though ground has been prepared. Rain very badly wanted everywhere both to enable lands to be sown and to remove the scarcity of drinking-water, which is increasing. Cholera still prevalent and continues to be severe in Karajgi, Gadag and Navalgund talukas. Prices showing an upward tendency, *juari* and rice being maximum 74 and 39 pounds and minimum 47 and 26 pounds per rupee, respectively.
Kanara ...	Karwar, 5·69; Kumpta, 2·70; Sirsi, 9·13; and Haliyal, 2·60.	Total rainfall 27·69. Planting cardamom plants above ghât; rice common—in Karwar 12 seers, district average 15 seers per rupee. Small-pox—in Karwar, 2 cases; Sirsi, 2; Siddapur, 1; Kumpta, 8 deaths; Bhatkal, 5; and Haliyal, 1.
Rajkot ...	·83; no rain in Bohilvad.	Total rainfall 8·85. General health good. Weather cloudy. Fever continues in Navanagar. *Bajri* 31 and *juari* 40 pounds per rupee.
		General Remarks.—Slight rain in parts of a few districts; badly wanted for sowing operations in almost all districts. River falling in Sind. Cholera in parts of nine districts. Fever, cattle-disease and small-pox in several districts.
Bengal—(July 9th)		
Chittagong ...	5·37	Weather seasonable. Prospects of crops favourable. Prices steady. Cholera continues. Cow-pox reported.
Dacca ...	3·62	Cutting of jute commenced. *Sali* paddy being sown. Prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	1·13	Transplanting of *amun* going on on low lands. Prospects of crops good. Prices of common rice varies from 13 to 16 seers per rupee. General health good. Cattle-disease still prevalent in Diamond Harbour and Bahsirhat sub-divisions.
Moorshedabad ...	·22	Weather hot and sultry. Paddy transplanting at a standstill. *Aus* not coming on well. Other crops doing well. Heavy and general rain would be beneficial.
Rajshahye ...	2·76	Weather cloudy and windy. Prospects of crops generally favourable. Health fair.
Burdwan ...	·12	Rain wanted everywhere for transplanting *amun*. Prospects of crops will suffer if there be no heavy rain shortly.
Rungpore ...	2·98	Weather cloudy with occasional rain. Prospects of crops favourable. Price of rice from 3 to 4 rupees per maund. Public health fair.
Bhagalpur ...	1·72	Standing crops doing well. Paddy being transplanted. Prospects of crops good. Rice 13 seers 14 chittacks per rupee.
Purneah ...	8·63	*Aghani* crops being transplanted. Prospects of crops good. Weeding still going on. Common rice 16 seers per rupee. Health fair. River rising.
Patna ...	4·14	*Bhadoi* sowings going on everywhere. Rain wanted for transplanting paddy. Public health generally good.
Durbhunga ...	2·83	Agricultural prospects good. *Bhadoi* crops coming on very well. Manufacture of indigo commenced. Prices stationary. Public health good.
Hazaribagh ...	2·78	Weather seasonable. Cultivation of *bhadoi* and paddy progressing. Prices of food-grains continue high. Small-pox reported from certain places, otherwise public health good.
Cuttack ...	1·6	Weather seasonable. Young *sarad* and *beali* doing well. Sowing of paddy still going on in some places. Price of rice rising. Scattered cases of cholera reported everywhere.
		General Remarks.—The rainfall has been general, but insufficient and consequently transplanting of *amun* has been affected. Heavy and general fall of rain will facilitate agricultural operations. Standing crops generally doing well. Prices of food-grains almost stationary. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares . (July 8th)	1·5 to 3·8	Sowing in progress. Cholera and small-pox slight. Prices stationary.
Allahabad („ „)	Abundant rain during the week, 7·1 (average).	*Kharif* crops being sown. Prospects excellent. Health very good everywhere. Prices stationary.
Gorakhpur („ 7th)	3·7 at Sadr.	Rice sowing going on. Public health good. *Prices steady.*
Jhansi („ 9th)	2·6	Monsoon appears to have fairly set in. Ploughing and sowing commenced. Prices stationary. Cholera continues. Grazing will soon be sufficient.
Agra („ 8th)	*Rain in six parganas,* ·3 to 2·1.	*Kharif* sowings continue. General health good. Cholera very slight. Prices steady.
Bareilly („ „)	Rain in varying amounts averaging 1·7.	Rice sowings begun. Prices slightly rising. Public health good.
Meerut („ „)	Only showers in Meerut, Hapur and Baghpat.	Wind generally easterly changed to west to-day. Weather very close and hot. Agricultural operations stopped for want of rain. Cane and indigo being irrigated. Health generally good; but small-pox reported in Baghpat. Prices unchanged.
Kumaon („ „)	Good rain all over the district.	Crop prospects good. Cholera decreasing; a few cases of small-pox, otherwise health good. Prices stationary.
Lucknow („ „)	1·7 to 2·9 during the week.	Total rainfall insufficient. *Kharif* sowing in progress. Health of people and cattle good. Markets well supplied. Prices slightly risen.
Partabgarh („ 4th)	1·5 to 2·2 during the week.	Early rice being sown and *mukha* being planted out. Bazaars well stocked. Small-pox abating.
Sitapur („ 8th)	Satisfactory rain has fallen throughout the district, ·6 to 6·0.	Sowings are approaching completion. No sickness reported. Prices stationary.
Fyzabad („ „)	2·5 to 3·1 during the week.	Sowing of *kharif* crops going on. Public health and condition of cattle good.
Rae Bareli („ 7th)	1·9 to 3·3	Fields are being ploughed, and prepared for *kharif* crops. Cholera disappearing. Prices steady.
Cawnpore („ „)	Fair amount of rain in nearly all parganas.	Ploughing and sowing commenced. Health of people and cattle good.
Farukhabad („ 8th)	Rain varying from ·4 to 2·9 during the week.	*Kharif* sowings in progress. Health good. Condition of cattle fair. Markets well supplied.
		General Remarks.—Rain has been general though more is needed at Moradabad, Meerut and Aligarh; ploughing progresses everywhere; sowings are retarded in above districts. Markets well supplied. Fodder supply in Jhansi is improving; small-pox and cholera are disappearing and the health of the people and condition of cattle is good.
Punjab—(July 8th)		
Delhi ...	.....	A few cases of cholera. Prices rising.
Hissar ...	.....	Health good. *Kharif* operations rapidly progressing. Condition favourable. Cattle-disease in Sirsa abated. Prices steady.
Umballa ...	4·10	*Kharif* sowings in progress. Health good. Prices stationary.
Jullundur ...	·90	Health good. *Kharif* ploughing progressing. Prices stationary.
Amritsar ...	Rain on night 7th.	Health good. Prices stationary.
Sialkot ...	1·50	Health good. Small-pox in city abating. *Kharif* sowings commenced. Prices falling.
Ferozepore ...	.....	Health good. *Kharif* ploughings in progress. Prices almost stationary.
Lahore ...	·30	Health good. Slight rise in prices.
Rawalpindi ...	·40	Health good. Prices falling.
Mooltan ...	.....	Health and crop prospects good. Prices fluctuating.
Dera Ismail Khan ...	.....	Health good. Prospects fair. Prices stationary.
Peshawar ...	1·10	Health fair. Prices falling.
		General Remarks.—Rain in many districts, but more is needed. Cholera in Delhi and Kangra; small-pox abating in Sialkot city; elsewhere the health of the province is generally good. *Kharif* ploughings and sowings in progress.
Central Provinces—(July 9th)		
Nagpur ...	5·78	Weather wet. Prospects good. Rain very seasonable. Rice sowings completed; *juari* and cotton being sown. Small-pox and cattle-disease declining. Prices steady.
Jubbulpore ...	8·92	Weather cloudy. Sowings continue. Wheat 26, and rice 13 seers per rupee. Health good.
Sangor ...	5·74 on 8th July	*Kharif* sowings rather backward in some parts owing to excessive moisture. Small-pox slight. Prices steady.
Seoni ...	4·05	Rain almost continuous, break much needed. Some cattle-disease and small-pox prevails. Prices slightly risen.
Hoshangabad ...	·97	Weather seasonable. *Kharif* sowings progressing. Health good. Wheat 21 and rice 9 seers per rupee. Small-pox, 12 cases.
Khandwa ...	2·26	Weather cloudy. Sowings in progress. Wheat 21¾, *juari* 22½, and rice 13¾ seers per rupee.
Raipur ...	7·68	Break wanted. Rice and *kodi* being sown. Public health good. Rice 23½ and wheat 28 seers per rupee.
Sambalpur ...	Heavy rain on 7th July. 2·40 on 5th July	Weather cloudy. Prospects and health good. Common rice 26 seers per rupee.
		General Remarks.—Weather seasonable, a break needed in the Southern districts where sowing is impeded by rain.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—(July 9th)		
Akyab (July 5th)	9·19	Total rainfall 65·95.
Rangoon („ „)	7·13	Total rainfall 34·07. One death from cholera.

Katmandu ...	2·88	Weather hot and close. More rain needed for the rice.

No. 298 (Surveys), dated Simla 11th July 1884.

The following Rules are published for general information :—

Rules for the admission of apprentices in the Mathematical Instrument, Photographic, and Lithographic and Engraving Offices of the Survey of India Department, Calcutta.

With the sanction of the Government of India, a certain number of European and Eurasian apprentices will be entertained in the above offices to be trained in the different branches of instrument-making, of Photography, and of Lithography and Engraving.

In the Mathematical Instrument Office, the number of appointments will be 3; in the Photographic Office, 4; in the Lithographic Office, 2; and in the Engraving Office, 4.

Applicants selected for employment will be entertained under the following conditions :—

I.—They must not be less than 14 nor more than 16 years of age. In special circumstances the Surveyor General will exercise his discretion as to the limit of ages.

II.—They must be able to read and write well, and have a fair knowledge of simple arithmetic; for the Photographic Office any knowledge of chemistry or photography, and for the Lithographic Office a knowledge of drawing, will be a recommendation.

III.—They will be required to serve as apprentices for a period of five years.

IV.—The rates of pay will be as follows :—

1st year	Rs.	10
2nd „	„	15
3rd „	„	20
4th „	„	30
5th „	„	40

per mensem.

V.—The above-mentioned increments will only have effect if the apprentice's conduct be in every way good, and his progress, in the particular trade he may be in training for, satisfactory.

VI.—From the pay for the first three years 10 per cent. will be deducted and paid into the Government Savings Bank to be held as a security that the apprentice will conduct himself properly and serve out his full time. The aggregate amount with the accrued interest will be forfeited if the apprentice leave the service without permission of the Surveyor General being first obtained, or if he misconduct himself so seriously as to entail his dismissal. Should, however, the apprentice serve the full five years and conduct himself to the satisfaction of Government, he will receive the total amount so deducted with the interest accruing upon it.

VII.—Each apprentice on being entertained shall sign such form of indenture as Government may require him to sign as security for the due performance of his obligations. The form of indenture is under preparation.

VIII.—In addition to the rates of pay specified above, apprentices will not be entitled to any other allowances for clothing, board, or lodging, nor does the Government guarantee them permanent employment at the end of their apprenticeship or at any time.

IX.—Apprentices must abide by the standing orders of any of the offices of the Survey of India in which they may be under training, and must duly observe the hours of attendance and working. They will be liable to discharge at the discretion of the Surveyor General, should they not make sufficient and satisfactory progress in the particular trade they are in training for, or be guilty of any misconduct. Absence without leave will render them liable to loss of pay, and if constantly repeated, to discharge and the forfeiture of any sums that may have accrued to them under Rule VI.

X.—Applicants should in the first instance address themselves to the Assistant Surveyors General in charge of the above offices, their applications being accompanied by any testimonials as to their character and qualifications they may be able to obtain. The names of selected candidates will be submitted to the Surveyor General for approval.

XI.—Before final appointment selected candidates will have to serve three months on probation. If after this period they appear likely to be useful, they will be taken on the strength of the office as apprentices under the foregoing rules, and their pay and service will count from the date of their commencing their probation. Probationers whose work is unsatisfactory will not receive pay for the time of their probation, and may be discharged at any time within the three months at the discretion of the Assistant Surveyor General in charge of the office in which they may be serving.

No. 90 Met.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department (Meteorology),—dated Simla, the 11th July 1884.

Summary of the Weather Reports for June 1884.

During the past month the weather has been variable. In the first half of the month the humidity of the atmosphere was much below the average at nearly every station in India, and during the first 10 days the only rain of any importance was in Assam, Bengal, and Burma. On the 12th, however, moderate rain fell on the Malabar coast, and by the 16th had extended northward as far as Bombay, where $1\frac{3}{4}$ inches of rain fell during a slight south-south-east gale. On the 19th rain became pretty general throughout the country, the only exceptions being portions of Bundelkund and the North-Western Provinces, Sind, and Central India. On the 20th over 3 inches of rain fell at Bombay. On the 22nd, however, the rainfall on the west coast was checked and the break spread gradually from the west coast to a very large part of India. Towards the close of the month precipitation was slight in most places and had almost entirely ceased in Gujarat, Central India, Rajputana, and on the plains of the Punjab and North-Western Provinces. Rain continued, however, in the Central Provinces and Lower Bengal; and whereas a decided deficiency was shown by most places, the rainfall of these two provinces was slightly in excess of the average.

The rain of the 10th or 11th was unaccompanied by any general increase of moisture in the atmosphere; but about the 17th and 18th the humidity rose suddenly and in many places continued excessive; in others, and more particularly in the Peninsula, the air again became dry towards the close of the month. At stations on the Bombay and Malabar coasts there were about 8, at Poona 4, and at Sholapur 2 days only on which the humidity was above the average of June.

An abnormal distribution of pressure existed during the greater part of the month in the shoulder of high barometer, which extended northward over Central India and Rajputana, and this was accompanied by an unusual northerly component in the winds of North-Western India; but along the west coast where the rainfall deficiency was greatest (amounting to 17 inches at Cochin), the mean distribution of pressure was not very different from the average.

The variations of temperature have been somewhat irregular. The means of the whole month show an excess of 2° or 3° in Sind, the Berars, Central India, some stations in the Central Provinces, and over the Peninsula generally, but in Northern India the mean temperature was below the average. In the earlier part of the period the maximum temperatures at the Upper India stations were high, ranging from 110° to 118°; but about the middle of the month, coincidently with the setting in of more general rain, there was a fall lasting for several days. Towards the close of the month, however, the thermometer in some places again rose above 110°. The highest recorded reading in the shade, which was also the highest of the season, was 122° at Jacobabad on the 9th.

The following table summarises the rainfall returns under the divisions adopted in the weather resumés previously issued :—

Districts.	Average rainfall in June.	Difference of the rainfall of June 1884 from average June fall.
North and West Punjab	1·38	—0·01
South Punjab, North-Western Provinces, and Behar ...	5·80	—0·87
Assam	20·55	—8·57
East Bengal	17·95	—0·43
Lower Bengal and Orissa	10·41	+0·41
Central Provinces	8·12	+2·23
Rajputana, Central India, and Berars	4·98	—1·26
Sind and Gujarat	3·01	—0·40
Bombay	16·96	—8·03
Madras	7·14	—2·77
Mysore	14·79	—5·73
Ceylon	7·52	—0·07
Burma	24·71	—2·26

WILLIAM LISCOMBE DALLAS,
Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the above Summary be printed in the Supplement to the *Gazette of India*.

E. C. BUCK,
Secy. to the Govt. of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO
The Gazette of India.
Nº 29.} CALCUTTA, SATURDAY, JULY 19, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

* Passed down to supplement the Agra Canal supply.

Executive Engineer, Northern Division, Ganges Canal, reports—Sugar and indigo most largely cultivated. River has met all calls on it during the month. Weather very hot with strong west wind.

Executive Engineer, Meerut Division, Ganges Canal, reports—Heavy demand for sugar and indigo during the whole of the month.

Executive Engineer, Aligarh Division, Ganges Canal, reports—The demand was very strong throughout the month. Frequent closures (two days in a week) of all distributaries were necessary in the first half of the month to pass on the supply required by the Lower Ganges Canal.

Executive Engineer, Narora Division, Lower Ganges Canal, reports—Indigo being cultivated with the greatest energy, and notwithstanding the abnormally low supplies during April and the first two weeks of May, there are signs that this crop will be cultivated in larger areas than in last year's. Supply after 15th May unlimited.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—Strong demand for water throughout the month. Supply very low up to 13th; after that date it is of water available. The total area up to date is 2,000 acres in excess of the area recorded up to the same date of the previous year; the increase is only apparent and is due to more accurate recording of the irrigation done.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports—The increase is entirely in indigo; there has been a slight decrease in sugarcane owing to losses last year.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports—Indigo cultivation largely extended on the tail distributaries.

Executive Engineer, Eastern Jumna Canal, reports—There was a full demand at the end of the month. The increase over last year is rather equally distributed by sugarcane, indigo, and miscellaneous crops have the largest share.

Executive Engineer, Agra Canal, reports—Notwithstanding continued low supply, the area reported is more than 70 per cent. in excess of that reported at the end of May 1883. This is owing to (1) earlier fasl, (2) extension of indigo cultivation, (3) new distributaries, (4) general drought.

Executive Engineer, Rohilkhand Canals, reports—Water for sugarcane has been in great demand throughout the month, and it was with difficulty that the demand has been met so far. With early rains all the sugarcane can be saved and will turn out well, but if rains are late in coming much sugar must be lost, as the rivers are all very low, and the area that has been irrigated is larger than usual.

Executive Engineer, Dún Canals, reports—Demand was good at beginning of month and heavy towards end. Supply very insufficient in Baijpur Canal, fair in others. Decrease in area of sugarcane owing to low prices obtained for last year's produce. Paleo for 2nd class rice well in hand. Weather hot and sultry. Rain—Debra *nil*, Bhogpur 0″, Ambari 8″.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS OF FASL KHARIF IN THE PUNJAB FOR 1884-85 UP TO 31st MAY 1884.

CANAL DIVISION.	WATER DISTRIBUTED DURING MAY 1884. Depth in Canal at Regulating Gauge. Full Supply.	Actual throughout.	Gross Consumption, Cubic Feet per Second. Estimated full Supply.	Actual Average throughout.	NAVIGATION RETURN, CANAL. Principal Items of Traffic. Up.	Down.	LAND IRRIGATED (APPROXIMATE). Zila.	Acres.	RAINFALL. Average.	During Month.	CHIEF CROPS (APPROXIMATE). Name.	Area in Acres.	REMARKS.
Bari Doab Canal. 1st Division	4·9	3·88	3,073·60	1,319	. .	. . .	Gurdáspur . .	7,892	0·9	0·6	Cotton . . .	15,225	On the Bári Doáb Canal the supply was sufficient for the requirements and the demand moderate. The canal was closed for five days during the month for repairs to crate weir at Dhariwá and Babiáli. There is a decrease of 2,075 acres as compared with the corresponding period of the preceding year, which is attributed to the closure above alluded to.
2nd Division, Main Branch, Lower	4·6	2·90		700	. .	. . .	Amritsar . .	16,500	0·98	0·1	Rice . . .	191

(*a*) Exclusive of 17 miles, Poradah Section, worked by Eastern Bengal Railway.
(*b*) Tiptur Extension.
(*c*) Excludes expenditure on Hajeepur Extension.
(*d*) Rupees 84,390 is exclusive of R9,799 expended on survey and R4,466 on construction in the Tiljirgah Division, Tirhoot State Railway Extension.
(*e*) A portion of this line has been constructed from Grants from Imperial Revenues at a cost of R12¼ lakhs.
(*f*) The difference between the mean and open mileage is due to the inclusion in the former of 3·34 miles which is twice worked over.

* Interest has not been calculated on the Capital outlay of lines constructed from R as the State incurs no liability for interest thereon.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th JULY 1884.

GENERAL REMARKS.—Rain has fallen in varying quantities all over the Madras Presidency, but it has been deficient in the Ceded Districts and in the south. In most districts the crops are in want of rain. In Mysore rain continues to be insufficient, and the deficiency is beginning to be felt everywhere. There was heavy rain in Coorg in the week under report, but it is still insufficient for planting operations. In the Bombay Presidency rain has fallen in all districts and has been beneficial for the *kharif* sowings which have been resumed everywhere, except in parts of the Deccan and Southern Mahratta Country where more rain is needed. In the Berars and Hyderabad and in the Central India and Rajputana States the rainfall has been heavier than that of last week. Heavy rain is still reported from the Central Provinces, and is proving unfavourable in places for the *kharif* and cotton sowings. At Khandwa damage to the railway is reported. Good rain has fallen in most districts of the North-Western Provinces and Oudh, but in some places the fall was light and more is urgently needed. In the Punjab there was rain in many districts, but the fall is still insufficient. In British Burma the weather continues to be seasonable. In Assam the fall has been below that of last week. In Bengal rain continues to be general, though it has been insufficient in places for agricultural operations. In the Behar districts the fall was generally heavy, and a break in Sarun and Hajipore would be beneficial.

In his report for the 17th instant, the Meteorological Reporter to the Government of India states that rain is reported from by far the greater part of the country, the only regions without any rain being a portion of the Carnatic and the provinces of Behar, the Punjab, and Sind.

Harvesting continues in Madras, and standing crops are generally in fair condition. *Kharif* sowings are in progress in Bombay, North-Western Provinces and Oudh, Punjab, the Central Provinces, and other parts of the country. Cotton sowings are in progress in Bombay and the Central Provinces and have been completed in the Berars. In Sambalpur the weather is very unfavourable to cotton. In Assam reaping of the *aus* crop and the transplanting of *sali dhan* is in progress. The prospects of tea are generally good. In some places in Bengal the prospects of the *bhadoi* and *aghani* crops are reported to be remarkably good. The *aus* paddy is coming into ear in some districts and has been nearly harvested in Dacca. Jute and sugarcane are doing very well, and the condition of other standing crops is generally good. In Central India prospects are good, but in Rajputana doubtful.

Cholera and small-pox are generally prevalent everywhere, and the mortality from the former in Tanjore continues to be high. Prices show a slight tendency to rise.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 16th)		
Bellary ...	·20 (average)	More rain urgently needed. 42 deaths from cholera.
Kurnool ...	·76 (average)	Progress of sowing arrested from want of rain in parts. Small-pox and cattle-disease in parts.
Ganjam ...	1·95 (average)	Fever and small-pox slight.
Kistna ...	1·62 (average)	River rising 4 feet over anicut. Small-pox, fever and cattle-disease in places.
Chingleput (Madras) ...	·70 (average)	Standing crops fair, but in want of rain in parts. Harvest paddy, yield half the average. Small-pox prevalent; 51 deaths from cholera.
Coimbatore ...	·15 (average)	Standing crops generally fair, but in want of rain in five talukas; harvest dry crops outturn below average. Fever and small-pox in parts.
Tanjore ...	·12 (average)	Standing crops generally good, but in want of rain in parts. Freshets in the Cauvery very low. Harvest paddy in one taluka; outturn below average. 922 deaths from cholera.
Madura ...	·15 (average)	Standing crops fading from want of rain. Small-pox slight in parts; 9 deaths from cholera.
Malabar ...	6·54 (average)	Transplanting of paddy nearly over. Small-pox slight in eight talukas; fever in 3; 3 deaths from cholera.
Travancore ...	3·04	Standing crops, paddy thriving. Fever prevalent and small-pox in parts.
		General Remarks.—General prospects moderate. Rainfall deficient in Ceded districts and in the South.
Bombay—(July 16th)		
Karachi ...	Slight showers of rain in Karachi.	More rain expected. River on 14th, 15 feet 3 inches being 1 foot 2 inches less than on corresponding date last year. *Kharif* transplanting in progress. Rats doing some damage in Tatta and *keeon* worm and *rura* insect in Shahbander. Fever in 3 and cattle-disease in 4 talukas; small-pox in 14 villages in districts; 17 fresh cases, 2 deaths, 18 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 26, 30, and 32, in Manjhand 28, 29 and 38, in Ghorabari 22 and 34, in Jati 20, 30 and 32 pounds per rupee, respectively.
Hyderabad ...	Slight rain on 14th	*Kharif* cultivation in progress. River at Kotri on 14th, 15 feet 3 inches against 16 feet 5 inches on same date last year. Sky cloudy and more rain expected. Small-pox in 9, fever in 3, and cattle-disease in 1 taluka. Prices of grain steady.
Ahmedabad ...	1·31	Total rainfall 3·24. Sowing operations commenced. One cholera case in the city. In Parantij 9 cholera cases of which 2 fatal. Wheat 29 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	3·86	Total rainfall 5·07. Cholera continues in city Baroda; 155 deaths; it prevails in Baroda, Jarod, and Dabhoi Mahals. Sowing operations generally in progress. Prices—*bajri* 27, and rice 20 pounds per rupee.
Surat ...	7·22; good rain throughout the district.	Total rainfall 11·57. Sowing and transplanting progressing. *Juari* 31 and *nagli* 39 pounds per rupee.
Nasik ...	Good rain throughout; maximum rainfall in Malegaon, 6·07; minimum in Sinnar, 1·56.	*Kharif* sowings will shortly commence. Public health generally good. Small-pox and cattle-disease in Kalvan. Prices—*bajri* 28½, wheat 34½ and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain daily, heavy on 13th and 14th; total of week 12·36.	Total rainfall to date 27·58 being 5·01 below average. Abnormal temperature 2° warm to 3° cool.
Poona ...	Seasonable rain in part of the district, maximum fall at Khed Kala, 3·60; minimum at Sirur, ·45.	More rain wanted. *Kharif* sowings begun in all talukas, except Sirur, Purandhar, and Bhimthadi. Prices—*bajri* 33, and *juari* 35 pounds; in Poona, *bajri* 27, and *juari* 28 pounds per rupee.
Ahmednagar ...	2·79 in Jamkhed; 1·94 in Akola; 1·83 in Sangamner; 1·40 in east of the talukas of Kopargaon and Parner; 1·18 in Karjat; ·80 in east of the talukas of Sheogaon and Nagar, less amount in the remaining talukas.	More rain wanted for *kharif* sowings. Slight cattle-disease in Nevasa. *Juari*—maximum 60 pounds in Sangamner, minimum 24 in Karjat; *bajri*—maximum 48 in Sangamner, minimum 36 in Kopargaon.
Sholapur ...	·93; Barsi, ·66; Madha, ·42; Kamala, ·20; Pandharpur, ·08; Singola, ·25 and Malsiras ·13.	*Kharif* sowings not commenced for want of moisture, except in a few villages in Barsi and Malsiras. Rain urgently needed. *Juari* 39 pounds 19 tolas, and *bajri* 40 pounds 23 tolas per rupee.
Dharwar ...	Fair rain has fallen everywhere, except in Navalgund and Gadag talukas including the Pettas; maximum in Hangal, 3·82; in Majund, Ranibennur, Karajgi, Dharwar, and Kalghatgi above 1·0; elsewhere less.	More rain required specially in eastern talukas. Sowing of rice resumed, but that of *juari* retarded for want of sufficient moisture. Prospects slightly improved by the week's rainfall. Cholera in all talukas; will subside if heavy rain falls which is also required to supply the deficiency of drinking-water.
Kanara ...	Karwar, 10·52; Kumpta, 13·0; Sirsi, 5·22; Haliyal, 1·10.	Total rainfall 38·21. Rice plants 1 foot high on coast. Common rice in Karwar 12 seers; district average 15 seers per rupee. Small-pox in Sirsi; sixteen cases in Karwar, one death; in Kumpta six and Haliyal one. Fever in Yellapur.
Rajkot ...	4·75	Total rainfall 13·60. General health good. Sowing of *bajri* and *juari* completed in some places. Cotton sowing in progress. *Bajri* 31 and *juari* 39 pounds per rupee.
		General Remarks.—Rain throughout the presidency. *Kharif* sowing operations resumed, except in parts of the Deccan and Southern Mahratta country where more rain is needed. River low in Sind. Prospects generally improved. Cholera in parts of eleven districts; fever and small-pox in parts of ten districts; cattle-disease in seven districts.
Bengal—(July 16th)		
Chittagong ...	2·3	Weather fine with occasional showers of rain. *Amun* paddy being sown; prospects of crops good. Prices stationary. Cholera and cattle-disease continue.
Dacca ...	1·38	Harvesting of *aus* nearly over and that of jute going on; sugarcane thriving; *amun* being transplanted; prospects of crops good. Water rising gradually. Public health good.
24-Pergunnahs (Calcutta)	2·50	Transplanting of *amun* paddy going on. Prospects of standing crops good. Price of common rice stationary. Public health good. Cattle-disease prevails in Bussirhat and Diamond Harbour sub-divisions. Rivers rising.
Moorshedabad ...	2·25	Rain on two days of the week though little fell in sub-divisions. Easterly winds prevail and sky clearing. Rain still wanted for transplanting. *Bhadoi* on low lands in ear, and indigo, jute and sugarcane doing well. Public health good.
Rajshahye ...	1·27	Prospects of crops generally favourable. Health good.
Burdwan ...	1·74	Rain still insufficient. Transplanting retarded. Threatened injury to paddy on high lands no longer exists.
Rungpore ...	·86	Weather hot. Prospects of crops favourable. More rain wanted. Price of rice from 3 to 4 rupees per maund.
Bhagalpur ...	2·33	Standing crops doing well; rice 13 seers 14 chittacks per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	3·76	*Bhadoi* crops very good; *aghani* being transplanted; common rice 16 seers per rupee. Health fair. Rivers full.
Patna ...	2·20	Sowing of *bhadoi* crops progressing well; everywhere more rain required for paddy transplanting.
Durbhunga ...	·99	*Bhadoi* crops very promising; transplanting of paddy going on. More rain, however, wanted. Prices failing slightly. Public health good.
Hazaribagh ...	·85	Weather cloudy and sunny alternately. Sowing of paddy and *bhadoi* crops going on. Prices of food-grains continue high. Small-pox in one thana, otherwise public health good.
Cuttack ...	3·05	Weather hot and fair. Young *sarad* and *beali* plants growing well; transplanting of *sarad* commenced in some places. Common rice 15 to 16 seers per rupee in town. Scattered cases of cholera in the interior, otherwise public health good.
		General Remarks.—Rain fell through the province, but it was insufficient chiefly in the Bengal districts where agricultural operations have consequently been impeded to some extent. The rainfall in the Behar districts was heavy, except in Bhagulpore, Maldah, Sonthal parganas and the Southern part of the Patna district; a temporary cessation of rain in Sarun and in the Hajipore sub-division of the Mozufferpore district would do good. Prospects of *bhadoi* and *aghani* crops in some of the districts of Behar are remarkably good. *Aus* paddy is coming into ear in some districts, though the crop has been nearly harvested in Dacca. Jute and sugarcane look very well. Condition of other standing crops generally good. Prices of food-grains almost stationary, though slight fluctuations exist in few districts. Cholera and small-pox have not totally disappeared, otherwise public health good.
N. W. Provinces and Oudh—		
Benares (July 14th)	2·4 to 4·1	Weather seasonable. Ploughing and sowing going on. No sickness of man or beast. Prices rising slowly.
Allahabad („ „)	Showers daily during the week.	Sowings in progress and rice being transplanted; agricultural prospects excellent. Health very good. Prices stationary.
Gorakhpur („ 12th)	Local showers	Cloudy weather with a high east wind. Rice sowings nearly completed. 3 cases of cholera on Nepal border. Prices steady.
Jhansi („ 15th)	Fair amount of rain in all the parganas, except Jhansi.	Sowing in progress. Prices rising. Cholera abating. Grazing still scarce.
Agra („ 13th)	Rain in five parganas, ·3 to 1·1.	Sowings continue. Cholera very slight in one pargana only. Prices steady.
Bareilly („ 14th)	Very slight and partial rain.	Rice sowings retarded. Prices rising. Health of men and cattle remains good.
Meerut („ „)	Rain during the week in parts ·3 to 1·2; slight local showers elsewhere.	Wind easterly; sky cloudy; weather hot and oppressive. No damage to crops so far. Cholera in Sarowa tahsil and in Hapur. Supplies sufficient. Prices steady.
Kumaon („ „)	Slight but sufficient rain during week.	Prospects good. Prices rising. Cholera almost disappeared; a few cases of small-pox and cattle-disease in a few places.
Lucknow („ 14th)	Good and general rain during the week; ranging from 2·6 to 3·6.	*Juar, kodon, sawan* and *arhar* sown. Fields are being prepared for *bajra* and *mothi*. Condition of people and cattle good. Enough supplies in stock. Prices stationary.
Partabgarh („ 11th)	1·6 to 8·7	*Kharif* ploughing and sowings in full progress. Bazars well stocked. Small-pox still prevalent.
Sitapur („ 14th)	Fair rain; averaging from 1·0 to 2·2 has fallen throughout the district.	Wind generally from the east. No cattle-disease. Prices steady.
Fyzabad („ „)	Rain varying from ·7 to 2·8.	Sowing of *kharif* crops nearly completed. Public health and condition of cattle good.
Rae Bareli („ 12th)	Rain general and favourable all over the district.	Ploughings and sowings going on. Cattle-disease reported from tahsil Rae Bareli. Markets well stocked. Prices steady.
Cawnpore („ 14th)	Rain favourable during the week from ·5 to 4·3.	*Kharif* sowings continue. Prices almost stationary. Health of people and cattle good.
Farukhabad („ „)	Partial showers during the week; no general rain.	*Kharif* sowings continue. Health good. Prices steady.
		General Remarks.—Good rain has fallen in most districts. In Aligarh, Saharanpur, Bareilly, Moradabad and Farukhabad the rainfall was light and more is urgently needed. *Kharif* operations are in progress. Prices are rising in Benares, Bareilly, Moradabad, Aligarh and Kumaon, elsewhere they are almost stationary. Markets are well supplied. Public health and condition of cattle good.
Punjab—(July 15th)		
Delhi ...	·10	Cholera continues. Prices almost stationary.
Hissar ...	.....	Rain much wanted in Rohtak district. Health good. *Kharif* operations in progress. Prices rising in Sirsa district.
Umballa ...	.....	Health good. *Kharif* sowings in progress. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Jullundur ...	·40	More rain wanted. Health good, except that there is small-pox in a few villages. *Kharif* ploughings progressing. Prices steady.
Amritsar ...	·80	Health good. *Kharif* sowings commenced. Prices fluctuating.
Sialkot ...	1·0 at Riah and 2·0 at Pasrur.	Health good. *Kharif* sowings progressing. Prices falling.
Ferozepore ...	·50 at City, ·40 at Sadr, 2·50 at Jira, and 1·10 at Moga.	Health good. *Kharif* sowings in progress. Prices stationary.
Lahore ...	·50	Health good. Prices stationary.
Rawalpindi ...	·40	More rain wanted. Health good, except slight fever in two tahsils. *Kharif* sowings in progress. Prices falling.
Mooltan ...	.....	Health and condition of crops good. Prices stationary.
Dera Ismail Khan ...	.....	Health good. Prospects fair. Prices stationary.
Peshawar ...	.....	Health good. Prices falling.
		General Remarks.—Rain in many districts, but more is wanted. Cholera in Delhi and Kangra, small-pox in villages adjacent to Jullundur city, and slight fever in two tahsils of the Rawalpindi district, elsewhere the health of the Province is generally good. *Kharif* ploughings and sowings in progress.
Central Provinces—(July 16th)		
Nagpur ...	7·08	Weather rainy. Prospects good. Health good. Prices steady. *Juari* sowings and rice transplanting in progress.
Jubbulpore ...	2·69	Weather showery and inclined to break; *kharif* and cotton sowings in active progress. Health generally good. Wheat 25 and rice 12 seers per rupee. Trade slack.
Saugor ...	1·78 on 15th July	Sowings in progress. Small-pox slight. Prices steady.
Seoni ...	2·59	Sowings retarded owing to excessive moisture. Break needed. Cattle-disease and small-pox prevalent. Prices stationary.
Hoshangabad ...	3·25	Weather seasonable. Sowings progressing. Health good. Wheat 21 and rice 9 seers per rupee.
Khandwa ...	4·03	Two diversions on Great Indian Peninsula Railway have been washed away. Some grasshoppers have appeared and enquiries are being made about them. *Kharif* sowings continue. Wheat 21¾, *juari* 24½ and rice 14¼ seers per rupee.
Raipur ...	8·65	**Sowings retarded owing to heavy rain. Health good. Prices rising. Break is wanted.**
Sambalpur ...	6·97	Weather cloudy and close. Prospects unfavourable especially in regard to cotton owing to constant heavy rain. Health good. *Katmon* rice 26 seers per rupee.
		General Remarks.—Rain has fallen generally throughout the Provinces, the fall having been heavy in the Southern and Eastern districts. Sowings are in places retarded, and a break is needed.
British Burma—(July 16th)		
Akyab (July 12th)	.....	Cattle-disease in four townships.
Rangoon („ „)	5·70	Total rainfall 40·57. No cholera or small-pox.
Bassein („ „)	8·13	Total rainfall 34·96. Some cattle-disease.
Amherst (Moulmein) „)	14·44	Total rainfall 63·98. Cattle-disease prevalent.
Toungoo („ „)	·98	Total rainfall 25·36.
Kyoukphyoo („ „)	9·04	Total rainfall 75·49.
Sandoway („ 5th)	16·93	Total rainfall 62·78.
„ („ 12th)	.....	No report received.
Hanthawaddy („ „)	.....	No report received.
Henzada („ „)	2·79	Total rainfall 31·73. Some small-pox in town.
Thayetmyo („ „)	1·25	Total rainfall 12·54. Slight small-pox and cholera. Cattle-disease still prevalent.
Shwaygyin („ „)	6·55	Total rainfall 47·78. Three cases of small-pox in town.
Tavoy („ „)	11·63	Total rainfall 55·57. Two deaths from small-pox.
Pegu („ „)	.....	No report received.
Tharrawaddy („ 5th)	3·07	Total rainfall 29·85. Some small-pox and cholera.
„ („ 12th)	6·50	Total rainfall 36·35. Cholera reported as prevalent in 3 townships.
Prome („ „)	2·49	Total rainfall 18·42. Small-pox and cholera prevalent in district.
Thonegwa („ „)	5·73	Total rainfall 42·71. Slight small-pox and cholera.
Mergui (June 28th)	7·80	Total rainfall 37·97.
„ (July 5th)	5·15	Total rainfall 42·12.
		General Remarks.—Rainfall continues seasonable. Public health good. Slight cholera and small-pox in parts but nowhere severe.
Assam—(July 16th)		
Gauhati (July 15th)	·36	Weather hot. Gathering of *aus* nearly finished. Rain wanted to facilitate ploughing operations of *sali*; prospects of tea not good. Cholera prevalent in portions of districts.
Sylhet ...	·94	Tea prospects better. Paddy crop promises very well but more water is now required.
Cachar ...	2·53	Weather very warm. Reaping of *aus* and transplanting of *sali* crops progresses. Common rice 14⅜ seers per rupee. Prospects of tea better. Outturn much behind than last year. Red spider diminishing; blight not increasing. Cholera and small-pox abated.
Dibrugarh ...	3·27	Weather hot. Transplanting of *sali dhan* progressing; prospects of tea good. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(July 16th)		
Bangalore ...	·34; slight rain has fallen throughout the province, Kolar, ·30; Tumkur, ·32; Shimoga, ·47; Kadur, ·44.	Deficiency of rain is being felt everywhere. Sowing of dry crops retarded. Public health good.
Mysore ...	·15	
Mercara ...	12·69	Though the rain has been heavier during the week at Mercara, the monsoon continues to be light and scarcely sufficient for fresh planting; elsewhere weeding proceeding on coffee estates.
Berar & Hyderabad—(July 16th)		
Amraoti ...	3·98	Weather cloudy. Cotton sowing completed. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	3·07	*Kharif* sowing in active progress.
Hyderabad ...	1·81 (average)	Total rainfall from 1st January 7·16. Rainfall of week sufficient to commence *kharif* sowing, but insufficient for *rabi* sowing. No water received in tanks. General health good. Prices—wheat 14¼, coarse rice 9, white *juar* 16, yellow *juar* 19¾ and *tur* 18 seers per current sicca rupee.
Central India States—(July 16th)		
Indore ...	2·94	Total rainfall 8·42. Health and prospects good. Sowing continues.
Morar (Gwalior) ...	0·8	Total rainfall 3·2. Health good, 4 fatal cases of cholera in Lashkar.
Sutna ...	2·87	Health and prospects good.
Neemuch ...	0·89	Public health good. More rain expected, weather cloudy.
Goona ...	0·71	Weather cloudy. Health good.
Agar ...	0·98	Weather cloudy. Health and prospects good. Hopes of grass supply much improved.
Sehore ...	0·76	Weather rainy. Prospects of crops and public health good.
Nowgong ...	5·09	Total rainfall 14·54. Weather seasonable. *Kharif* prospects good. Public health fair.
Manpur ...	2·5; the falls of the 11th, 12th, and 13th has been general throughout the agency.	Total rainfall 4·1. The cultivators were in great anxiety for the rain without which the sowing of *kharif* crops could not be continued and the rain commenced on the evening of the 11th instant. Health is good.
Rajputana—(July 16th)		
Abu (July 16th)	1·23	Total rainfall from 1st June 8·56. Weather seasonable; rain much below average.
Sirohi („ 13th)	No rain	Tanks dry; wells fair. Health good. Sowing operations not yet commenced. Weather warm and close. Rain wanted.
Marwar („ 11th)	No rain	Prolonged break causes anxiety. About 15 days water in tanks. Health good. Ploughing still in progress. Weather warm and sultry. Prices stationary.
Meywar („ 14th)	·20	Tanks and wells fair. Health good. Crop prospects improved. Prospects of more rain falling.
Harowti („ 12th)	Deolee, ·01; Kotah, ·60; Tonk, 1·27.	Weather cloudy. Sowings in progress. More rain wanted. Winds high but fitful. Health good. Prices risen.
Jhallawar („ 11th)	1·38	Sowings in progress. Health good.
Ajmere („ 15th)	·06	Rain much required. Grass and cattle suffering; sharp attack of cholera in city.
Jeypore („ „)	·13	Weather cloudy. Sowing in progress. Cholera reported from district towns, otherwise health normal.
Ulwur („ „)	Average ·22	Crops suffering. Weather cloudy and close. Health good.
Nepal—(July 10th)		
Katmandu ...	1·73	Weather close and heavy. Rice is nearly all transplanted. More rain is needed.

Circular No. 85 Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Exhibitions),—dated Simla, the 11th July 1884.

Read—

Report on the Indian Department of the Amsterdam Exhibition of 1883 by J. R. Royle, Esq., Executive Commissioner of India.

Read also—

Circular No. 76Ex., dated the 24th June 1884, from Revenue and Agricultural Department, to Local Governments and Administrations forwarding copies of the Report.

RESOLUTION.

The report above cited describes the share taken by the Government of India in the Amsterdam Exhibition of 1883, and contains an interesting account of some of the commercial results that have attended the Exhibition. These are recorded at paragraphs 29 to 49 of the report, and the Government of India hopes that the measures taken to further the interests of India will have an important bearing on the future development of trade between India and the continent of Europe. The Government of India also notes with satisfaction that the steps taken by the Calcutta Tea Syndicate for bringing Indian tea prominently to notice at the Exhibition are likely to lead to a wide extension of the trade in this commodity both in Holland and on the continent.

The thanks of the Government of India are due to the officers and private gentlemen named in the appended list, who rendered important assistance in the work connected with the contribution of samples, &c., to the Exhibition. More particularly the Government of India would desire to acknowledge the services of the following gentlemen :—

Babu Mahendra Nath Bhattacharjya, Deputy Magistrate and Deputy Collector, Bogra.

H. W. I. Wood, Esq., Secretary to the Chamber of Commerce, Calcutta.

J. S. Gamble, Esq., Conservator of Forests.

F. Duthie, Esq., Superintendent, Saharanpur Botanical Gardens.

Babu L. P. Barman, Superintendent, Government Farm, Cawnpore.

Surgeon-Major G. Bidie, Curator, Government Central Museum, Madras.

Major J. C. Walker, Conservator of Forests, Madras, and all other Madras Forest Officers.

The Government of India has already acknowledged, through the Secretary of State, its sense of the great zeal and ability displayed by Mr. J. R. Royle as Executive Commissioner for India at the Amsterdam Exhibition.

ORDER.—Ordered, that a copy of this Resolution be printed and distributed to the Local Governments and Administrations noted on the margin, and be published in the *Gazette of India* for general information.

D. M. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 21st July 1884.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd JULY 1884.

GENERAL REMARKS.—There was rain in all districts of the Madras Presidency, but, except in Ganjam, Kistna and Malabar, the fall was light. In Mysore slight rain fell during the week and in Coorg there has been a break in the monsoon, which is unfavourable for agricultural operations. In Bombay there was rain throughout the Presidency, but more is still needed in parts of Poona, Sholapur, Nasik, Ahmednagar, Belgaum, Dharwar, and Kaladgi. In the Berar and Hyderabad there has been good rain, and in the Rajputana and Central India States the rainfall has been heavier than that of last week. In the Central Provinces there was heavy rain in Raipur, Jabalpur, and Hoshangabad, but elsewhere the fall was lighter than that hitherto recorded. A further break would, however, be beneficial for young crops and for the *kharif* sowings. In the North-Western Provinces and Oudh, there was rain in most districts, but the fall was generally a light one, and more is needed in several places. In the Punjab there has been a decided increase in the rainfall and prospects have improved. The rainfall continues seasonable in British Burma, but in Assam is still somewhat insufficient. In Bengal the fall, except in a few districts, was generally light, and more rain is wanted everywhere, especially in Beerbhoom and Durbhunga.

The report of the Meteorological Department for the 24th instant shows no material change in the Dekkan, or in the Madras Presidency, where the rain is still deficient. Rain, however, has been general in Northern and Central India.

Harvesting continues in some districts in Madras, but the outturn is below the average. Standing crops are in want of rain in several districts. *Kharif* operations are in general progress in Bombay, the North-Western Provinces and Oudh, Punjab, and the Central Provinces. In places in the North-Western Provinces and Oudh they are, however, retarded by want of rain, while in the Central Provinces a break in the rains would be beneficial for them. In Assam reaping of *aus* and transplanting of *sali* crops continue, and the prospects of tea are more favourable. In Bengal transplanting operations have been retarded by want of rain; the prospects of standing crops are still good, and harvesting of *aus* and cutting of jute have commenced in places. In Central India and Rajputana prospects have been improved by the recent rainfall.

The public health is generally good. In Tanjore the mortality from cholera continues high.

Prices are generally stationary, with local fluctuations.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 23rd)		
Bellary ...	·39 (average)	More rain urgently needed. 25 deaths from cholera.
Kurnool ...	·47 (average)	Rain still insufficient. Small-pox and cattle-disease in parts.
Ganjam ...	2·08 (average)	Fever and small-pox slight; one death from cholera.
Kistna ...	2·69 (average)	River rising 8 feet over anicut. Small-pox, fever and cattle-disease in places; one death from cholera.
Chingleput (Madras) ...	·03 (average)	Standing crops fair, but in want of rain in parts. Harvest paddy, yield half the average. Small-pox prevalent; 103 deaths from cholera.
Coimbatore ...	·01 (average)	Standing crops suffering from want of rain. Harvest dry crops outturn below average. Fever in 2 talukas; two deaths from cholera.
Tanjore ...	·05 (average)	Standing crops generally good, but in want of rain in parts. Freshets in the Cauvery 2 to 7 feet. Harvest paddy and indigo outturn below average. 838 deaths from cholera.
Madura ...	·21 (average)	Standing crops fading from want of rain. Small-pox slight in parts; 16 deaths from cholera.
Malabar ...	4·54 (average)	Cultivation of first crop progressing. Small-pox slight in eight talukas, fever in three; 2 deaths from cholera.
Travancore ...	·78	Standing crops paddy suffering from want of rain. Fever prevalent; small-pox declining.
		General Remarks.—General prospects good in Northern Sircars. Rain very deficient in Ceded and Southern districts.
Bombay—(July 23rd)		
Karachi ...	1·43; average of 9 other stations, 1·19.	More rain expected. River at Kotri on 21st, 3 feet 6 inches lower than on corresponding date last year. Fever in 3 and cattle-disease in 3 talukas; one case of small-pox in Karachi on 16th, imported from Hyderabad; disease also in 9 villages in the districts. 10 fresh cases, 5 deaths, 7 remaining sick. Prices—wheat, red rice and *bajri* in Karachi 26, 30, and 32, in Kotri 30 and 34, in Tatta 26, 30 and 32, and in Shahbandar 20, 30 and 34 pounds per rupee, respectively.
Hyderabad ...	Rain in 13 talukas; averaging 0·86.	*Kharif* good, but lowness of river impedes extension of cultivation. River at Kotri on 21st, 14 feet 4 inches against 17 feet 10 inches on same date last year. Small-pox in 6, fever in 4 talukas and cattle-disease in 1 taluka. Wheat 28, *bajri* 35, *juari* 38, red rice 26 and white rice 20 pounds per rupee.
Ahmedabad ...	4·64	Total rainfall 7·88. Sowing operations continue. In Parantij 7 cholera cases of which 1 fatal. Wheat 30 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	3·28	Total rainfall 7·14. Cholera abating in city, in Baroda 99 deaths. Sowing operations in progress. Prices—*bajri* 27 and rice 20 pounds per rupee.
Surat ...	2·88	Total rainfall 14·15. Sowing and transplanting progressing; *juari* 30 and *nagli* 40 pounds per rupee.
Nasik ...	Rain throughout	More rain wanted in places. Sowing and transplanting in progress. Public health good. Rare cases of small-pox in Kalvan. Prices cheapening. Wheat 37, *bajri* 31 and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain on 4 days; total of week 3·84.	Total rainfall to date 31·42 being 7·72 below average. Abnormal temperature 2° cool to 3° warm.
Poona ...	Rain in all talukas; maximum 5·46 at Khaikala; minimum 0·51 at Indapur.	Sowings begun in all talukas. More rain wanted. *Bajri* 33 and *juari* 35, in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	1·57 in Akola; 1·11 in Jamkhed; 0·92 in Karjat; 0·77 in Parner; 0·75 in Sangamner; scanty in other talukas, except Shrigonda and Sangamner.	More rain wanted only in a few villages of each taluka. *Juari*—maximum 60 pounds in Sangamner, minimum 34 in Karjat; *bajri*—maximum 48 in Sangamner, minimum 36 in Parner.
Sholapur ...	0·89; Barsi, 1·18; Madha 1·25; Karmala, 1·30; Pandharpur, 0·38; Sangola, 0·82 and Malsiras 0·36.	*Kharif* sowing only commenced here and there in all talukas, except in Sholapur, Sangola and Pandharpur, where no sowings have been made. Rain much needed. *Juari* 39 pounds 23 tolas and *bajri* 39 pounds 1 tola per rupee.
Dharwar ...	3·23 in Hangal; 2·39 in Kalghatgi; nearly 2·0 in Hubli and Bankapur; 1·61 in Dharwar and Kod, elsewhere less than 1·0.	Rice sowing completed; and sowing of early *juari* in progress, except in Navalgund, Gadag and Ron and part of Ranibennur where more rain is required; rice crops benefited by the rainfall. Cholera abating in Karajgi and Gadag talukas, but severe in Dharwar and Hubli talukas. Scarcity of drinking-water still continues to be felt in parts of the district. Rice 32 and *juari* 57 pounds per rupee.
Kanara ...	Karwar, 5·76; Kumpta, 7·97; Sirsi, 9·28; Haliyal, 5·75.	Total rainfall 43·97. Transplanting rice plants. Common rice in Karwar 12; district average 15 seers per rupee. Small-pox in Karwar, 4 cases, in Supa 10, in Mugud 1, and in Siddapur 3; in Kumpta 4, in Sirsi 3 and in Haliyal 2 deaths.
Rajkot ...	1·56	Total rainfall 15·16. General health good. Weather cool and showery. *Bajri* 32 and *juari* 40 pounds per rupee.
		General Remarks.—Rain throughout the presidency. *Kharif* sowing in progress in all districts. More rain still needed in parts of Poona, Sholapur, Nasik, Ahmednagar, Belgaum, Dharwar, and Kaladgi. River continues to fall in Sind. Scarcity of drinking-water still continues in parts of Dharwar. Cholera in parts of nine districts. Fever, cattle-disease and small-pox in a few districts.
Bengal—(July 23rd)		
Chittagong ...	3·73	Weather seasonable. Prospects of crops fair. Prices steady. Cholera and cattle-disease continues.
Dacca ...	2·0	Cutting of jute continues; *roachia* and *shail* paddy being sown. Prospects of crops good.
24-Pergunnahs (Calcutta)	3·50	Transplanting of *amun* paddy going on. More rain wanted in Baraset, Dum-Dum and Bussirhat sub-divisions. Prospects of standing crops favourable and price of common rice varies from 12½ to 16 seers per rupee. Fever as usual in this season prevails in Barrackpore. Public health, otherwise good. Cattle-disease abating. Rivers rising.
Moorshedabad ...	0·34	Weather hot and dry. Standing crops though folding out are making little progress and the season will be a backward one.
Rajshahye ...	1·05	More rain wanted for *aus* and *amun* crops. Prospects favourable. Public health fair.
Burdwan ...	0·61	Rain still insufficient for transplanting purposes. Seedlings healthy.
Rungpore ...	0·31	Weather cloudy. Prospects of standing crops good. Prices of rice from 3 to 4 rupees per maund. Malarious fever prevails.
Bhagalpur ...	0·92	Transplanting of paddy going on. Prospects of crops good. Rice 13 seers 14 chittacks per rupee.
Purneah ...	0·38	Transplanting progressing. Rain wanted. Prospects of crops very good. *Cheena* and early *bhadoi* being harvested with good outturn; common rice 16 seers per rupee. Health fair. Rivers fairly high.
Patna ...	1·05	*Bhadoi* sowing going on. Rain wanted for transplanting of paddy. *Cheena* promising. Cholera prevails.
Durbhunga ...	0·1	Prospects yet good. Rain badly wanted for *bhadoi* crops and paddy. Prices stationary. Public health good.
Hazaribagh ...	3·08	Weather rainy and sunny alternately. Prospects of *bhadoi* crops seem good, but more rain wanted for paddy seedlings. Prices of food-grain continue high. A few cases of small-pox and cholera reported, otherwise public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	2·06	Weather changeable. Prospects of paddy good. Price of rice stationary. Scattered cases of cholera reported, otherwise public health good.
		General Remarks.—Some rain fell, but more is wanted almost everywhere specially in Beerbhoom and Darbhanga. Transplanting of *amun* is consequently not going on satisfactorily in all districts. The rainfall was heavy in Jajpore and damaged *aus* and *amun* paddy to some extent. Prospects of standing crops still good. Harvesting of *aus* has commenced in some places; jute being cut in Dacca and Mymensingh. Prices almost stationary. Public health good, though cholera and fever prevail in a few districts.
N. W. Provinces and Oudh—		
Benares (July 21st)	2·0 to ·90	Agricultural operations in full swing; crops sown; sugarcane promises well. Prices fluctuating slightly.
Allahabad („ „)	Average fall of ·6 during week.	A break since 16th which has been useful for sowing. Weather very sultry and cloudy. Health excellent. Prices stationary.
Gorakhpur („ 29th)	Some rain during earlier part of week laterly fine.	Public health good. Rice sowings completed. Prices steady.
Jhansi („ 22nd)	Average rainfall ·5	More rain is wanted. Weeding of crops commenced. Cotton and *juar* germinating. 45 deaths from cholera. Grazing becoming sufficient.
Agra („ 19th)	Rain in all parganas from ·6 to 3·7.	More rain much needed. Sowings going on. Cholera very slight. Prices steady.
Bareilly („ 21st)	Partial and insufficient rain.	Sowings somewhat retarded. Prices slightly rising. Health of men and cattle good.
Meerut („ „)	Rain previously in every tahsil, except Bapur, but not enough for requirements.	Every prospects of more rain; wind easterly. Crops on dry lands backward. Cholera continues in Sarawa not of virulent type; two cases in Hapur town. Prices steady.
Kumaon („ „)	Heavy rainfall on 18th.	Weather showery. Crop prospects good. Prices stationary. A few cases of small-pox, otherwise health fair; cattle-disease still prevalent.
Lucknow („ „)	·6 of rain during the week at Lucknow.	Rain much wanted. Small *juar* and rice are being sown; the crops already sown have germinated well. Condition both of men and cattle good. Markets well supplied. Prices stationary.
Partabgarh („ 18th)	Average rainfall for the district ·6.	The partial break in the rains has been most beneficial for *kharif* sowings. Prices stationary. Small-pox still bad in Patti tahsil.
Sitapur („ 21st)	There has been but little rain except, in tahsil Beswar where the fall was ·6.	East wind throughout the week. Rain wanted for rice. No sickness reported.
Fyzabad („ „)	No rain	Prospects of *kharif* crops good. Public health and condition of cattle good.
Rae Bareli („ 19th)	Fair rainfall all over the district.	Sowings nearly completed. Few cases of cholera and cattle-disease reported. Markets well stocked. Prices almost stationary.
Cawnpore („ 21st)	Slight and partial showers during week.	Agricultural prospects so far good, but rain urgently wanted. Prices stationary and health of people and cattle good.
Farukhabad („ „)	Slight showers in 3 tahsils.	Rain urgently needed. Crops being irrigated. Health of people good.
		General Remarks.—A fair amount of rain has fallen in most districts, but more is much needed in Lucknow, Sitapur, Bareilly, Moradabad, Agra, Farukhabad, Jhansi, Aligarh, Meerut and Cawnpore. *Kharif* operations have generally made good progress, but are retarded in the above districts by scarcity of rain. Prices are rising slightly in Bareilly and Aligarh. Markets are well supplied. Public health and condition of cattle are good.
Punjab—(July 22nd)		
Delhi ...	1·70	Cholera continues. Prices slightly rising.
Hissar ...	·10	No rain in Sirsa, where it is much needed. Health good. Prices show rising tendency.
Umballa ...	4·30	Health good. *Kharif* sowings in progress. Prices slightly falling.
Jullundur ...	4·0	Health good, except small-pox in certain villages. *Kharif* sowings commenced. Prices falling.
Amritsar ...	4·20	Health good. *Kharif* sowings in progress. Prices slightly rising.
Sialkot ...	3·0	Health good. Rice being transplanted. Prices stationary.
Ferozepore ...	2·80 at Moga; ·10 at Zira.	Health good. *Kharif* sowings in progress. Prices fluctuating.
Lahore ...	4·50	Health good. Prices stationary.
Rawalpindi ...	1·0	Health good, except a few cases of small-pox in Attock tahsil; cattle-disease in one tahsil. *Kharif* sowings in progress. Prices fluctuating.
Mooltan ...	·70	Health good. Prices fluctuating.
Dera Ismail Khan ...	1·50	Health good. Prospects improved. Prices stationary.
Peshawar ...	·30	Health good. Prices slightly rising.
		General Remarks.—Good rain has fallen throughout the province, except in Sirsa; and prospects are improving in the South-East. Cholera in Delhi and small-pox in a few villages in the Jullundur district and in the Attock tahsil, Rawalpindi district, elsewhere the health of the province is generally good. *Kharif* sowings in progress. Prices fluctuating.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(July 23rd)		
Nagpur ...	3·10	Weather cloudy, but little rain during the close of the week. Public health good. Prices steady.
Jubbulpore ...	8·77	Weather rainy and cloudy almost throughout the week. Heavy and continuous rain since 18th has prevented sowings in low lands. Break wanted. Wheat 24 and rice 12 seers per rupee.
Saugor ...	2·19 on 22nd July	Sowings well advanced. Small-pox slight. Prices steady.
Seoni ...	2·10	Weather wet rendering sowings impossible; rice transplanting commenced. Cattle-disease slight. Prices steady.
Hoshangabad ...	4·44	Weather cloudy and showery. Small-pox continues. Insect resembling locusts but smaller; described by the people as *popta*, have appeared in several villages of Kalibhet and Rajburelly, but no damage has been done. Enquiry about them is being made. Wheat 21 and rice 9 seers per rupee.
Khandwa ...	1·47	Weather cloudy. *Kharif* sowings continue. Locusts have all been destroyed by rain. Wheat 21¾, *juari* 24½ and rice 12½ seers per rupee.
Raipur ...	6·15	Rain continuous. Complaints general about damage to rice sown by excessive moisture. *Kodo* sowing retarded. Health good. Prices steady.
Sambalpur ...	.....	No report received.
		General Remarks.—Heavy rain in Raipur, Jabalpur and Hoshangabad. Break would do good to young crops and make further sowings possible. Health generally good.
British Burma—(July 23rd)		
Akyab (July 19th)	9·30; for previous week, 9·82.	Total rainfall 85·07. Slight cholera reported. Cattle-disease still prevalent.
Rangoon („ „)	2·80	Total rainfall 46·17.
Bassein („ „)	3·27	Total rainfall 38·23. Cattle-disease still continues.
Amherst (Moulmein) „)	7·87	Total rainfall 71·86. Some small-pox in district.
Toungoo („ „)	3·25	Total rainfall 28·61.
Kyoukphyoo („ „)	.....	Some cattle-disease.
...doway („ 12th)	11·27	Total rainfall 74·05.
„ („ 19th)	4·13	Total rainfall 78·23.
Hanthawaddy („ „)	.....	No report received.
Henzada („ „)	4·16	Total rainfall 35·89. Cholera prevalent.
Thayetmyo („ „)	2·48	Total rainfall 15·02. Slight small-pox in town.
Shwaygyin („ „)	2·71	Total rainfall 50·49.
Tavoy („ „)	.....	No report received.
Pegu („ 12th)	3·17	Total rainfall 41·71. Some cholera.
„ („ 19th)	4·08	Total rainfall 45·79. Two cases of small-pox; dysentery prevalent.
Tharrawaddy („ „)	6·40	Total rainfall 42·75. Cholera slightly prevalent.
Prome („ „)	2·80	Total rainfall 21·22. One death from small-pox in town. Cholera prevalent in district.
Thonegwa („ „)	2·71	Total rainfall 45·42. Slight cholera in district.
Mergui ...	.....	No report received.
		General Remarks.—Slight cholera and small-pox here and there, but nowhere severe. Rainfall continues seasonable.
Assam—(July 23rd)		
Gauhati ...	1·15	Weather hot. Gathering of *aus* not over. Rain much wanted for *sali* cultivation. Prospects of tea and rice crops not good. Fever very prevalent.
Sylhet ...	2·07	Want of rains greatly felt. Prospects of tea and other crops favourable. Public health good.
Cachar ...	4·80	Weather warm. Reaping of *aus* and transplanting of *sali* crops progressing. Prospects of tea improving. Generally traces of red spider disappearing. Blight not increasing. Common rice 15½ seers per rupee. No report of cholera or small-pox.
Dibrugarh ...	·08	Weather very hot. More rain wanted for *sali dhan*. *Ahu* crops suffering from blight in North Lakhimpur. Public health good.
Mysore and Coorg—(July 23rd)		
Bangalore ...	·14; slight rain has also fallen throughout the province; Tumkur, ·17; Shimoga, 1·73; Kadur, 1·04.	Crops generally suffering for want of more rain. Scarcity of fodder being felt in parts. Prices of food-grains rising. Prospects unfavourable. Public health good.
Mysore ...	·15	
Mercara ...	2·51	Unexpected break in the monsoon which has retarded agricultural operations. A few cases of small-pox at Virjendrapet.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar & Hyderabad—(July 23rd)		
Amraoti ...	2·25; Light showers almost daily.	Sowings in progress; cotton thriving. Wheat 20, and *juari* 30 seers per rupee.
Akola ...	5·68	Weather cloudy. Sowings progressing.
Hyderabad ...	3·48 (average)	Total rainfall from 1st January 10·64. *Kharif* sowings commenced throughout country; *abi* sowings also have commenced where tanks have received water. No sickness. Prices—wheat 14, coarse rice 10½, white *juar* 15, yellow *juar* 20¼ and *tur* 21 seers per current sicca rupee.
Central India States—(July 23rd)		
Indore ...	4·23	Total rainfall 12·65. Plentiful rain having fallen prospects are good. General health continues good.
Morar (Gwalior) ...	2·25	Total rainfall 5·45. Health good, 5 fatal cases of cholera in Lashkar.
Sutna ...	3·39	Health and prospects good.
Neemuch ...	0·79	More rain still urgently required and is expected to fall. Weather somewhat cloudy. Public health good.
Goona ...	1·25	Crops and grass backward. Health and prospects good.
Agar ...	4·35	One death at Agar from cholera last week. Prospects good.
Sehore ...	5·62	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	·7	Total rainfall 15·24. Ploughing and *kharif* sowing progressing. Weather seasonable. Health good.
Manpur ...	.....	No report received.
Rajputana—(July 23rd)		
Abu (July 23rd)	11·53	Weather now showery with heavy clouds.
Sirohi („ 20th)	1·82	Tanks full. Health good. Sowing commenced. Monsoon fairly set in.
Marwar („ 18th)	·27	Water for few days only in Jodhpore city tanks. Health and crops good, but require more rain. Weather very cloudy. Reports from districts very favourable; but at Jodhpore rain insufficient. Prices stationary.
Meywar („ 20th)	3·10	Tanks and wells fair. Health and crops good. Weather showery.
Harowti („ 19th)	Deolee, ·43; Kotah, ·77; Tonk, ·72; Shahpura, ·98. Supplementary good fall on night of 20th in Deolee.	Weather cloudy. Prospects improved. Rain much required in parts. Fodder scarce. Health good. One fatal case of cholera in Agency.
Jhallawar („ 18th)	2·15	Crop prospects and health good.
Ajmere („ 22nd)	3·52	Prospects much improved. Health also improved.
Jeypore („ „)	·22	Rain much below average; deficiency causing anxiety. Prices rising. Few cases of sporadic cholera in capital.
Ulwur („ „)	·58 (average)	Crops and cattle suffering. Health good.
Nepal—(July 17th)		
Katmandu ...	1·90	Weather unusually hot. More rain is needed. Prospects of crops fair.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 23rd July, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

AGRICULTURISTS' LOANS BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Report of the Select Committee on the Bill to amend and provide for the extension of the Northern India Takkávi Act, 1879, be taken into consideration. He said:—

"When I obtained permission in January last to introduce this Bill, I explained that the objects which we had in view were, first, to remedy an omission in the original Act under which the process for recovering an original loan did not extend to the recovery of costs and interest; secondly, to enable the Bill to be extended to other provinces at the option of Local Governments; and, thirdly, to provide for loans being made to village-communities or associated agriculturists, and to facilitate their settling among themselves the shares in which such loans should be recovered. The Report of the Select Committee shows what alterations have been made in the first draft of the Bill in addition to securing these three objects, and the alterations are all very small ones.

"We have made the Bill of its own vigour applicable to Bombay, and have at the same time repealed two sections of the local Act, XV of 1880, which cover very much the same ground as our own Bill. This we have done at the request of the Bombay Government and its legal advisers. We have also endeavoured to meet a suggestion of one of the Hon'ble Judges of the Madras High Court that costs incurred in the process of recovery should be recovered in a single procedure, together with the interest and cost of the loan. We have also made a minor alteration in section 6 of the Bill providing that joint applicants should be at liberty to sign or mark the distribution-paper either themselves or by an authorised agent.

"These are the alterations which have been made in the Bill; but we have received some other suggestions and criticisms which I think call for a brief notice to explain why we have not been able to adopt them. First came from British Burma a suggestion that the Bill should be extended so as to include loans to fishermen, and from the Panjáb the suggestion that the Bill should be made to cover loans to distressed artisans and others. We have not seen our way

to accepting either of these suggestions, and for the same reason, namely, that the scope of the Bill is different in regard to its objects. The object of the law is to enable Government to lend money on easy terms, and to recover, by a summary process, loans made for specific purposes—either for the relief of distress or for the purchase of seed and cattle—to specific people, namely, the owners and occupiers of arable land. The general policy of encouraging frequent resort to such loans has not been uncontested on economical grounds and as tending to pauperization, and it may be admitted that they should be made somewhat sparingly and in exceptional cases; but the real justification of the policy itself seems to me to be the position of Government as the great landlord of the country, and the direct bearing which the welfare of the cultivator has on its revenues. This argument would not apply with the same force to other industries, and there is no justification for Government, as part of its ordinary revenue-procedure, making loans to fishermen which would not equally apply to weavers, spinners, miners or silversmiths, who none of them stand in the same direct relations to Government as do the great bulk of the agricultural population of the country. We have therefore, after full consideration, rejected this proposal as beyond the scope of the Bill and outside the special circumstances which justify it. Nor have we been able to accept a suggestion put forward by the Ajmer authorities that Government might authorise loans being made for the purposes of this Bill by private persons, and recover them as arrears of revenue. A similar proposal, when it was introduced into the Bill relating to loans for agricultural improvements, was not accepted by the Secretary of State; and while the principle which is really at issue in connection with the scheme for agricultural banks is still under the consideration of the Secretary of State, I think it would be premature to introduce it into a measure of the kind now under consideration.

"There was a further suggestion from the Government of the Panjáb—that the distribution-paper—that is, the paper which shows the shares in which the joint loans are to be recovered from the borrowers—should be signed by the *lambardár*, or headman, for the whole village instead of requiring the signature of each recipient. This was proposed as a matter of administrative convenience, and it had something to be said for it; but the majority of the Committee thought that it would be dangerous to accept a paper so signed as evidence as to the responsibility of each individual, especially as the distribution-paper is to be conclusive evidence in Court. If it is not made conclusive evidence, the paper will be of very little value; and it seemed to us that all we could do was to provide that the borrower should be at liberty to affix his mark to the distribution-paper by an agent instead of personally. Nor on consideration, is the necessity for the lambardár's interference very apparent; the Bill does not deal with large loans for improvements in which a whole village may very probably be interested, but with small loans for seed and cattle, which are for the most part matters of individual concern. Doubtless, on some occasions, as in the case of famine, it might be desirable to administer loans for the relief of distress through the village-organization collectively, but we think that what we have proposed will go far to meet the difficulties of the case; and, even if it does not, it is better to accept the inconvenience involved than to adopt a dangerous precedent which is contrary to the usual practice and theory of legal documents in India. I may mention here that this section has been introduced specially with a view to the coparcenary villages of the Panjáb, and it is not anticipated that, save to meet exceptional cases, it will be found applicable elsewhere than in Northern India.

"We have also received some criticisms from the British Indian Association. They object to the Bill being made applicable to Bengal, and say that if the Bill is made so applicable the rayyats will not use it and that no one will apply for loans. We do not apply the Bill *proprio vigore* to Bengal; we merely say that the Local Government may extend it by notification to Bengal if it please, and the Local Government say that in cases of severe distress it will be necessary to have some such law. The British Indian Association are evidently under a misapprehension on this subject, for, in reference to the famine of 1874, they assume that the loans have been recovered with ease and without

recourse to much litigation; but, as a matter of fact, the Bengal legislature were obliged, in 1875, to pass a special law, *pro hac vice*, for the recovery of advances made in the previous year; and the procedure adopted was in fact the same as this—to make them recoverable under the Certificate Act, VII (B. C.) of 1868. Of course this procedure might be repeated on each occasion and a fresh law passed, but it seems to me to be a much simpler process to have the law laid down once for all. Of course, if no one applies for a loan, no harm is done. But, although they take that objection, they go on to take another not quite consistent with it. The British Indian Association seem to be under great dread that in some way the grant of loans to tenants may prejudice the landlords, and they ask if it is intended that the lands of the owners should be liable to sale for the debts of the rayyats. I do not quite understand how such a misapprehension can possibly have arisen,—probably from omission to examine closely the meaning of the words 'recovered as arrears of land-revenue,'—but clearly nothing but the tenant's own property or his surety's can be proceeded against. What will actually happen will be this. The law for the recovery of arrears of land-revenue in Bengal is contained in Act VII (B. C.) of 1880—called the Public Demands Act. Under that Act, the Collector, when the arrear is due, and after enquiry, issues a certificate which may within a year be contested in the Civil Court. That certificate has the force of a decree of the Civil Court and will be executed against either the moveable or immoveable property of the debtor, and, as such, it will prejudice the landlord's claims neither more nor less than any other decree of Court.

"This I think disposes of the more important objections in the letter from the Hon'ble Kristodás Pál, the Secretary of the Association; and I may perhaps be allowed to take this opportunity of expressing the regret with which we have heard of our colleague's severe illness, and how glad we are to learn that he is now out of danger. For myself I agree with him in thinking that the Bill is less applicable to Bengal than to any other province in India, and under ordinary circumstances I should not like to see it frequently applied to Bengal; but cases may occur in which the Government may have to take upon itself the duty of relieving distress by making loans for the recovery of which it is necessary to have some procedure, and I think we may safely leave it to the discretion of the Local Government to extend the Act or not as it thinks necessary."

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

SETTLEMENT-OFFICERS' (PANJÁB) DECISIONS VALIDATION.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill for the validation of decisions passed on appeal by certain Settlement-officers in the Panjáb.

The Council adjourned to Wednesday, the 30th July, 1884.

SIMLA;
The 25th July, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

* Not sold.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th JULY 1884.

GENERAL REMARKS.—There has been slight rain throughout the Madras Presidency, but more is still wanted in the Ceded and Southern Districts. In Mysore the fall has again been light, and the deficiency is beginning to cause some anxiety in the province. The rains have set in again in Coorg and there was a good fall during the week under report. In the Bombay Presidency rain was general, but more is still urgently wanted in parts of the Dekkhan, especially in Dharwar. Rain has fallen in varying quantities throughout the Berars, Hyderabad, and the Central India and Rajputana States. Heavy rain continues to fall in the Central Provinces, and a break is needed. In the North-Western Provinces and Oudh most districts have had rain, but more would be beneficial, especially for the early rice. Good rain continues to fall in the Punjab. In British Burma the rainfall is still behind that of last year. In Assam and Bengal the fall has been heavier than that recorded last week, but more would be beneficial for transplanting operations in both provinces.

Harvesting continues in two districts of the Madras Presidency, and standing crops are generally in want of rain. *Kharif* sowings continue in Bombay and the Punjab; in the former they have been retarded in places either by too much rain or by a deficiency of rain. In the North-Western Provinces and Oudh and in the Central Provinces *kharif* sowings have been mostly completed, and in the latter province weeding operations are in hand, but they are retarded by the heavy rain. In the Central India and Rajputana States prospects have much improved by the recent rain. In Assam the transplanting of *sali* crops and the reaping and gathering of the *aus* crop are in hand. Harvesting of early paddy and jute has commenced in some places in Bengal.

Cholera is prevalent in most provinces. The mortality in Tanjore was again heavy, and in Dharwar there were also many deaths.

Prices show a slight tendency to rise in some places in Bengal; otherwise they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 30th)		
Bellary ...	·28 (average)	More rain urgently needed. 45 deaths from cholera.
Kurnool ...	·42 (average)	Insufficient rain in places. Small-pox and cattle-disease in parts.
Ganjam ...	·78 (average)	Small-pox slight in 2 talukas; 2 deaths from cholera.
Kistna ...	1·14 (average)	River 7·75 feet over anicut. Small-pox, fever, and cattle-disease in places; 13 deaths from cholera.
Chingleput (Madras) ...	·11 (average)	Standing crops fair, but in want of rain in parts. Harvest paddy, yield half the average. Small-pox prevalent; 99 deaths from cholera.
Coimbatore ...	·03 (average)	Standing crops suffering from want of rain; harvest dry crops, outturn about average Fever in two talukas.
Tanjore ...	·44 (average)	Standing crops generally good, but in want of rain in parts. Freshets in the Cauvery one to six feet. 998 deaths from cholera.
Madura ...	·10 (average)	Standing crops fading from want of rain. Small-pox slight in parts.
Malabar ...	3·03 (average)	Insufficient rain in parts. Cultivation of first crop progressing. Small-pox slight in eight and fever in two talukas; 7 deaths from cholera.
Travancore ...	·14	Standing crops paddy in ear suffering from want of rain. Fever prevalent; small-pox in parts. *General Remarks.*—General prospects good in Northern Sircars. Rainfall still deficient in Ceded and Southern districts.
Bombay—(July 30th)		
Karachi ...	2·03; average of 12 other stations, 2·46.	River at Kotri on 28th, 15 feet 7 inches being 3 feet less than last year. Fears entertained for crops unless river rises. Fever in 6 and cattle-disease in 3 talukas, some loss in Ghorabari and Shahbandar. Small-pox in 7 villages in districts, 5 fresh cases, 2 deaths, 5 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Dadu 36 and 44, in Sakro 16, 28 and 34, and in Mirpur Batoro, 22, 30 and 32 pounds per rupee, respectively.
Hyderabad ...	Rain in 11 talukas; averaging 1·69.	River at Kotri on 28th, 15 feet 7 inches against 18 feet 7 inches on same date last year. Small-pox in 5 and fever in 2 talukas; cattle-disease in 1 taluka. Prices of grain steady. Complaints of defective water-supply in Badin and Begotando.
Ahmedabad ...	7·30	Total rainfall 15·18. Crops thriving; transplanting of rice commenced. Cholera in the city, 20 cases, of which 15 fatal; in Parantij, 1 case fatal. Wheat 30 and *bajri* 32 pounds per rupee.
Baroda ...	6·19	Total rainfall 13·33. Cholera abating in city, in Baroda 10 deaths. Young locusts appeared in Songad near Khandesh. Prices—*bajri* 27 and rice 21 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	5·12; maximum fall during the week in Chikáli, 12·68; minimum in Olpiad, 0·12.	Total rainfall 19·57. Sowing retarded in certain places for want of break; transplanting progressing. *Juari* 29½ and *nagli* 41 pounds per rupee.
Nasik ...	Good rain throughout.	Prospects improved. Sowing and transplanting vigorously progressing. Public health generally good. Small-pox in some villages of Kalvan. Wheat 37, *bajri* 31, and rice 27 pounds per rupee.
Colaba (Bombay) ...	Rain daily; heavy on 25th; total of week, 7·22.	Total rainfall to date 38·64, being 5·82 below average. Abnormal temperature 2° warm to 2° cool. Abnormal winds feebly cyclonic from 23rd to 27th having gradually backed from north-north-east to south-west.
Poona ...	Rain in all talukas: maximum 8·88 at Khadkala; minimum 0·59 at Sirur.	More rain wanted in eastern division. Sowing in progress. Prices—*bajri* 29 and *juari* 30; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	3·35 in Akola; 2·08 in Sangamner; 1·65 in Koperguon, 1·20 in Parner; slight in other talukas.	More rain urgently wanted. Sowing of *kharif* in progress in all parts of the district. *Juari*—maximum 60 pounds in Sangamner, minimum 33 in Karjat; *bajri*—maximum 18 in Sangamner, minimum 30 in Koperguon.
Sholapur ...	0·41; Barsi, 0·28; Madha, 0·34; Karmala, 0·23; Pandharpur, 0·13 and Sangola, 0·11.	*Juari* 39 pounds 3 tolas and *bajri* 38 pounds 10 tolas per rupee. Rain urgently needed especially on account of grazing. *Kharif* outturn must now be very poor.
Dharwar ...	Maximum at Hubli, 1·33; at Mugud, 1·15; at Kalghatgi, 1·07; at Bankapur, 0·67; at Gadag, 0·60; at Hangal, 0·38; at Kod, 0·28; at Mundargi and Ranibennur, 0·15; and at Karajgi, 0·05; none in Navalgund, Nargund and Ron.	Sowing at a standstill in Navalgund, Nargund, Ron, Gadag, and Ranibennur; *juari* sowing in progress elsewhere, but young crops in Mundargi and Karajgi are withering. Heavy and immediate rain required in almost all talukas, but especially in the black soil talukas on the east. Scarcity of drinking-water is becoming more widespread. Cholera prevails throughout the district, out of above 600 cases during the week, about 150 fatal. Average prices—*juari* 57 and rice 32 pounds per rupee.
Kanara ...	Karwar, 2·64; Kumpta, 4·09; Sirsi, 4·33 and Haliyal, 1·78.	Total rainfall 46·61. Rice common in Karwar 12 seers; district average 14½ seers per rupee. Small-pox in Karwar 1 case; in Bhatkal 8, in Sirsi 8, in Haliyal 3, and in Supa 10, in Bhatkal 1 death, and in Siddapur 1; 1 death from cholera at Mugud attacked in Dharwar district.
Rajkot ...	9·06	Total rainfall 24·22. General health good. Crops injured in some places by heavy incessant rain. Cholera in one village of Nawanagar. *Bajri* 33 and *juari* 42 pounds per rupee.
		General Remarks.—River still low in Sind. Rain throughout the presidency; more rain urgently needed in parts of Sholapur, Ahmednagar, and Dharwar. Sowing operations retarded in parts of Surat and Broach owing to continuous rain; and in parts of Poona, Satara, Kaladgi, and Belgaum from insufficient rain. Cholera in parts of 12 districts; fever and small-pox in parts of 9 districts, and cattle-disease in 4.
Bengal—(July 30th)		
Chittagong ...	3·72	Weather warm, with occasional showers. Prospects of crops fair, but more rain wanted. Early paddy being harvested. Prices stationary. Cholera and cattle-disease continue.
Dacca ...	1·52	Jute and early paddy being cut; *aman* crops thriving; prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	4·44	Transplanting *aman* paddy going on everywhere; prospects of *aus* paddy, jute, and sugarcane favourable. Price of common rice varies from 12 seers 5 chittacks to 16 seers per rupee. Public health good. Rivers rising.
Moorshedabad ...	0·74	Weather cool for the time of the year, with easterly winds and occasional showy rain. Rainfall continues deficient, and prices consequently rising. Transplanting stopped; seedlings withering in some places; *aus* in ear, but looks poor and thin. Rain much wanted.
Rajshahye ...	1·73	Harvesting of *aus* commenced in certain places; prospects of crops continue good. More rain wanted for transplanting of *aman* seedlings. Public health good.
Burdwan ...	1·61	Rain still insufficient for planting purposes. *Aman* seedlings are still healthy, but will soon be too big for successful transplanting; prospects of crops becoming gloomy; sugarcane doing well everywhere.
Rungpore ...	3·57	Weather hot and cloudy. Prospects of crops fair. Price of rice from 3 rupees 4 annas to 4 rupees 8 annas per maund. Malarious fever prevails.
Bhagalpur ...	4·19	Prospects of crops good; rice 13 seers 14 chittacks per rupee. Public health good.
Purneah ...	0·3	Prospects of crops undecided. Rain wanted. Transplanting proceeding where practicable; common rice 16 seers per rupee. Public health fair. The Ganges rising again.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Patna ...	0·08	Rain wanted for transplanting of paddy. Sugarcane looks well. Cholera prevails.
Durbhunga ...	0·08	Paddy transplanting stopped for want of rain; *bhadoi* looking pale. Prices stationary. Public health good.
Hazaribagh ...	1·67	Rain and sunshine alternately. Prospects of *bhadoi* and paddy seem good, but more rain wanted for the latter; prices of food-grains continue high. Cholera and small-pox reported from certain places, otherwise public health good.
Cuttack (July 29th)	0·93	Weather hot and cloudy. *Bali* in ear in places, *sarad* being transplanted and growing well. More rain wanted. Price of rice stationary. Public health generally good, though a few cases of cholera reported from interior. Rivers subsiding.
		General Remarks.—The rain that fell during the week has benefited agricultural operations as well as standing crops, but more rain is urgently wanted in some districts for transplanting paddy. Harvesting of early paddy and jute has commenced in some districts. The insufficient fall of rain in some districts has somewhat affected the prospects of crops and has caused a slight rise in price of rice; elsewhere prospects good and prices stationary. Public health good, though cholera and malarious fever prevail in few districts.
N. W. Provinces and Oudh—		
Benares (July 28th)	From ·4 to 1·3	All crops sown, except late rice for which rainfall in parts is insufficient. Prices rising.
Allahabad („ „)	Fair rain during week	More rain expected. Prospects excellent. Health very good. Prices nearly stationary.
Gorakhpur („ 26th)	No rain	Rain much needed for early rice. Health good. Prices steady.
Jhansi („ 29th)	2·4 (average)	More rain is wanted, especially in pergunnah Jhansi and Moth. Seed sown germinating well. 65 deaths from cholera. Fodder becoming sufficient.
Agra ...	.....	No report received.
Bareilly (July 28th)	Fair amount of rain, but remarkably capricious in distribution.	Rice sowings have suffered. Markets easy. Health of men and cattle good.
Meerut („ „)	Rain in every tahsil during week, 1·1 to 2·5.	Wind easterly and prospects of more rain. Crops flourishing. So far, cholera still continues in Saraja, but of mild type; has disappeared in Happur. Prices steady.
Kumaon („ „)	Moderate rain, but sufficient for the crops.	More rain required in pergunnah Ghor for transplanting rice. General health good; cattle-disease continues. Prices stationary.
Lucknow („ „)	From ·4 to 3·2	Rain much wanted for young crops. Health of people and condition of cattle good. Markets well supplied. Prices stationary.
Partabgarh („ 25th)	2·5 registered at the Sadr on 24th believed to have been general throughout a large portion of the district.	Prospects good. Small-pox bad in the eastern portions of the district. Prices stationary.
Sitapur („ 28th)	Rain throughout the district, but not heavy.	Wind variable during the week. More rain is urgently wanted. General health good.
Fyzabad („ „)	From ·4 to 1·9	More rain wanted. Prospects good. Public health and condition of cattle good.
Rae Bareli („ 26th)	.....	A break in the rains. Weather occasionally cloudy. *Kharif* crops germinating well. General health good. Markets well stocked. Prices remain almost unchanged.
Cawnpore („ 28th)	Beneficial rain has fallen.	Prospects improved by the recent rains. Prices steady. Health of people continues satisfactory. Some cattle-disease in pergunnah Bithour and Ghatampur.
Farukhabad („ „)	No rain in Sadr tahsils, in others varying from ·4 to 3·3.	More rain urgently needed. Health of people good. No material change in prices.
		General Remarks.—Rain has fallen in every district, except Gorakhpur, but more is urgently needed; specially for early rice which is suffering in places. Prospects are otherwise good. Markets are well supplied and prices are generally stationary. Small-pox is bad in Partabgarh, but the public health generally is good and the condition of cattle satisfactory.
Punjab—(July 29th)		
Delhi ...	2·10	Still a few cases of cholera. Prices falling.
Hissar ...	.....	Health good. Prospects fair. Prices falling.
Umballa ...	·90	Health good. *Kharif* sowings in progress. Prices stationary.
Jullundur ...	5·10	Health good. *Kharif* sowings progressing. Prices steady.
Amritsar ...	·90	Health good. Prices falling.
Sialkot ...	·50	Health and prospects good. Prices falling.
Ferozepore ...	1·40 at City; ·80 at Sadr; 1·30 at Zira; 2·20 at Mega; and ·10 at Muktsar.	Health good. *Kharif* sowings in progress. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Lahore ...	2·50	Health good. Prices fluctuating.
Rawalpindi ...	2·90	Health good. *Kharif* sowings in progress. Prices rising.
Mooltan ...	No rain at Sadr, but ample in district.	Health good. Prospects of *kharif* crops favourable. Prices almost stationary.
Dera Ismail Khan ...	·40	Health good. Prospects improved. Prices rising.
Peshawar ...	·50	Health good. *Kharif* sowings in progress. Price of wheat rising and of other grains falling.
		General Remarks.—Good rain has fallen in nearly every district. A few cases of cholera in the Delhi district and in Kotgarh, Simla district; elsewhere the health of the province is generally good. *Kharif* sowings progressing and prospects improving.
Central Provinces—(July 30th)		
Nagpur ...	2·83; slight rain throughout the week	Break required, although young plants have not suffered. Fever and cattle-disease prevail. Prices steady.
Jubbulpore ...	13·47	Rain very heavy, almost double the quantity that fell last year during the same period. Weeding stopped, embanked fields full of water; cotton sowings approaching completion.
Saugor (July 29th)	4·95	*Tilli* sowings continue; weeding delayed on account of excessive moisture. Small-pox slight. Prices steady.
Seoni ...	4·28	Rice transplanting progressing. Other operations stopped by continuous rain.
Hoshangabad ...	4·78	Weeding continues. The late floods slightly damaged the crops on the banks of rivers. Enquiry about locusts in progress. Wheat 21 and rice 9 seers per rupee. 40 cases of small-pox.
Khandwa ...	3·45	Weather cloudy. Sowings nearly completed. Locusts have disappeared. Wheat 21½ and rice 12½ seers per rupee.
Raipur ...	8·87, of which 4·85 fell on Wednesday, the 30th instant.	Rice and *kodon* sowing continues; early rice thriving, but break much needed. Health good. Rice 23 and wheat 28 seers per rupee.
Sambalpur ...	4·15	Rains are seasonable, and prospects and health good. Common rice 26 seers per rupee.
		General Remarks.—Heavy rain is impeding weeding operations. Break is much needed. Health good.
British Burma—(July 30th)		
Akyab ...	20·27	Total rainfall 105·34. Small-pox and cholera still exist.
Rangoon ...	4·90	Total rainfall 18·07.
Bassein ...	3·99	Total rainfall 12·22. Cattle-disease still continues.
Amherst (Moulmein) ...	1·20	Total rainfall 83·85. Small-pox still prevalent in district.
Toungoo ...	7·11	Total rainfall 35·72. Cattle-disease very prevalent.
Kyoukphyoo ...	21·23; for previous week, 5·19.	Total rainfall up to date 102·91.
Sandoway ...	20·40	Total rainfall 98·63.
Hanthawaddy ...	.....	No report received.
Henzada ...	10·65	Total rainfall 46·54. 30 deaths from cholera; slight small-pox.
Thaeytmyo ...	2·08	Total rainfall 17·10. Cholera prevalent in one township; slight small-pox in town.
Shwaygyin ...	8·21	Total rainfall 58·70. Fever and dysentery prevalent in district.
Tavoy (July 19th)	8·07	Total rainfall 63·64. Two cases of small-pox.
„ („ 26th)	17·70	Total rainfall 81·33.
Pegu ...	8·29	Total rainfall 54·08. One case of small-pox in town.
Tharrawaddy ...	10·30	Total rainfall 53·05. 125 deaths from cholera.
Prome ...	0·93	Total rainfall 22·15. 71 deaths from cholera in district.
Thonegwa ...	4·52	Total rainfall 49·94. Some cholera and small-pox.
Mergui (July 12th)	13·38	Total rainfall up to date 72·28.
„ („ 19th)	4·80	
„ („ 26th)	10·38	
		General Remarks.—Cholera in the Henzada, Tharrawady and Prome districts; elsewhere public health good; cattle-disease prevalent in parts. Rainfall up to date rather behind last year.
Assam—(July 30th)		
Gauhati ...	2·62	Weather hot. Gathering of *aus* almost finished. Rain much wanted for *sali* cultivation; prospects of tea and rice crops not good. Fever very prevalent.
Sylhet ...	4·71	State and prospects of crops favourable. Public health fair.
Cachar ...	5·38	Weather very warm. Reaping of *aus* and transplanting of *sali* crops continue; common rice 16 seers per rupee; prospects of tea good. Red spider gone. Blight not increasing. Health good.
Dibrugarh ...	4·61	More rain wanted for transplanting *sali dhan*; prospects of tea good. Cholera and cattle-disease reported.
Mysore and Coorg—		
Bangalore ...	·28; Shimoga, ·37; Kadur, ·53; none reported in other districts.	Deficiency of rain causing anxiety everywhere, especially in Maidan talugs, where as a rule *ragi* not yet sown, and standing crops of other kinds are beginning to wither. Water and fodder becoming scarce in these talugs unless good rain falls in two weeks. Prospects bad. Public health good. Prices rising.
Mysore ...	.....	
Mercara ...	6·77	Monsoon set in again. Transplantation of rice proceeding.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar & Hydorabad—		
Amraoti ...	1·59	Weather rainy. Cotton plants thriving; *jvari* sowings completed; wheat 20 and *jvari* 24 seers per rupee.
Akola ...	2·26	Weather cloudy and rainy. *Kharif* sowings completed.
Hyderabad ...	5·67	Total rainfall from 1st January 16·18; copious showers have fallen during week. *Kharif* sowings commenced all over country. No [illegible]. Prices as last week, wheat 14, coarse rice 10½, white *jvari* 15, yellow *jvari* 20½ and *tur* [illegible] seers per current sicca rupee.
Central India States—(July 30th)		
Indore ...	5·82	Total rainfall 18·47. Health good and prospects, owing to the plentiful rainfall, excellent.
Morar (Gwalior) ...	1·39	Total rainfall 7·47.
Sutna ...	2·50	Health and prospects good.
Neemuch ...	1·91	Weather cloudy. Public health good, except a case of cholera on the 29th instant. Crops doing well. Prices of food-grains stationary.
Goona ...	5·23	Grass and crops improving. Health good.
Agar ...	3·40	Health and prospects good.
Schore ...	5·7	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	4·69	Total rainfall 19·33. *Kharif* prospects favourable. Weather seasonable. Public health fair.
Manpur ...	6·50	Total rainfall 4·75. The sowing operations have been finished between the 14th and 27th of the month. 14 cases of cholera are reported to have occurred in Jhabua territory, and three persons are reported to have died.
Rajputana—(July 30th)		
Abu (July 30th)	10·18	Heavy rain, with thunder and lightning during the week, still threatening.
Sirohi („ 27th)	2·28	Tanks and wells good. Health good. Crop prospects good. Fair rain.
Marwar („ 25th)	·45	No water in Jodhpore city tanks. Health good. Crops doing well. Weather very cloudy. Copious rain reported from districts; but very little rain in Marwar and Jodhpore city. Prices stationary.
Meywar („ 27th)	2·42	Tanks and wells good. Health good. Crop prospects very good. Weather seasonable. Prices falling.
Harowti („ 26th)	Deolee, 2·10; Kotah, 1·11.	2·40; Kotah, Shahpura, Weather seasonable. Crops and grass prospects much improved. Health good.
Jhallawar („ 25th)	5·33	Health and prospects good.
Ajmere („ 29th)	1·25	Prospects fairly satisfactory. Cholera disappearing.
Jeypore („ „)	1·24	Prospects improved. Prices fallen. 10 cases of cholera in district health otherwise good.
Ulwur („ „)	1·57	Prospects greatly improved. Prices falling. Health good.
Nopal—(July 24th)		
Katmandu ...	2·71	Weather hot and close. Copious rain would much improve the rice crop.

* Passed down to supplement the Agra Canal supply.

Executive Engineer, Northern Division, Ganges Canal, reports—Demand heavy throughout the month. A fall of rain between the 19th and 23rd relieved sugar and indigo. Rice crops however drew largely on water. The bunds gave on the 17th June. River high. Supply well under control.

Executive Engineer, Meerut Division, Ganges Canal, reports—Full demand during the first half of the month, reduced demand after rainfall in the third week, and demand increasing during the last few days of the month.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—Rain fell on 22nd and 23rd, after which demand ceased until the end of the month.

Executive Engineer, Aligarh Division, Ganges Canal, reports—The demand was slack after the 23rd June, when the monsoon broke; the rainfall on that date varied from a faint drizzle at some stations to 4·6 inches at Gangagarh.

Executive Engineer, Narora Division, Lower Ganges Canal, reports—Increase of 50 per cent. under indigo as compared with same month of previous year. This crop is ousting all others from cultivation. Supply ample during month.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—Strong demand for water up to the 19th, when there was a fairly general fall of rain over the division; from the 19th to the end of the month the demand was slack; slight decrease in area irrigated up to date, due to short supply available at commencement of fasl.

Executive Engineer, Cawnpore Division, Lower Ganges Canal—shows a decrease of 110 acres as compared with last year.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports—Very strong demand for water up to 19th, when slight rain fell and the monsoon may be said to have burst, but the rain up to end of month was very slight and partial. The slight decrease in area to end of June was due to low supply at beginning of fasl.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports—Good supply in canal, but weather cloudy during last half of month, so much new irrigation was not secured.

Executive Engineer, Eastern Jumna Canal, reports—The excess over last year is the result of a small rise in everything excepting sugarcane. Rain on 11th, 19th, 20th, and 21st nearly stopped all demands, except for rice *paleo*.

Executive Engineer, Agra Canal, reports—Irrigation ceased for the time on 23rd. Excess irrigation over last year's has been explained before.

Executive Engineer, Rohilkhand Canals, reports—From ¼" to 1¼" of rain fell on 10th and 11th, which eased the demand, did much good to the sugar and allowed kharif ploughings to commence. Rain set in very mildly on 18th and stopped all demand for sugar. There was fair rain on 23rd, 24th, since which date a long break. Water in great demand now for rice. Supply in rivers somewhat improved, but falling again.

Executive Engineer, Dún Canal, reports—Demand heavy at beginning of month for rice (*2nd class*) *paleo*, when weather was hot, though cloudy. Rain set in on 17th, when demand for all other crops but 1st class rice ceased. Break in the rains at end of month allowed ploughing operations to be actively carried on, but was the cause of a decrease in the much wanted water-supply on all canals. A slight increase in total area irrigated over corresponding month of last year.

Collector of Hamirpur states that the estimate of irrigation effected in June is blank.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

(*h*) Total receipts from 1st April to 5th July 1884.

SIMLA, FRED. FIREBRACE, *Major, R.E.,*

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6th AUGUST 1884.

GENERAL REMARKS.—There has been rain in all districts of the Madras Presidency, but the fall has again been slight, and more is wanted everywhere. In Mysore slight rain fell throughout the Province, and prospects, though still uncertain, have somewhat improved. Heavy rain fell in Coorg during the week. In the Bombay Presidency there was good rain in most districts, and prospects have generally improved. More rain is however wanted in Sholapur, Dharwar and Kaladgi. Rain has been general in the Berars and Hyderabad and throughout the Central India and Rajputana States. From the Central Provinces heavy rain continues to be reported, especially in Jubbulpore, Hoshangabad, and Saugor; a break in the weather is greatly needed. Rain again fell in all districts of the North-Western Provinces and Oudh, but it was insufficient in Benares, Gorakhpore, Lucknow, and parts of Sitapur, where more is much wanted. In the Punjab there was a fair amount of rain in most districts. Seasonable weather continues in British Burma. In Assam the rainfall has been below that of previous weeks, while an insufficiency is also reported from Bengal.

The last report, dated the 7th instant, of the Meteorological Department reports heavy rain at Mussoorie and other hill stations and slight showers in the Eastern Punjab. Elsewhere the country north-westward of a line from Surat to Lucknow is rainless at present.

Harvesting continues in some districts of the Madras Presidency, with outturns below the average. The standing crops are in want of rain in most places. *Kharif* sowings continue in the Bombay Presidency and in the Punjab, and in the former transplanting and weeding are also in hand. In the North-Western Provinces and Oudh the condition of the *kharif* crops is generally satisfactory. In the Central Provinces the heavy rain, if it continues, is likely to be injurious to the standing crops; weeding, which was in progress in places, is still retarded by the excessive moisture. In the Central India and Rajputana States the prospects of the standing crops are good. Early rice is being reaped in Assam and Bengal, and transplanting of late rice is going on. In parts of Bengal transplanting operations are retarded by insufficient rain, which has also affected standing crops to some extent in many districts.

The public health is generally good. In Tanjore there has been a decrease in the mortality from cholera.

Prices are generally stationary, with local fluctuations.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Aug. 6th)		
Bellary ...	·35 (average)	More rain urgently needed. 28 deaths from cholera.
Kurnool ...	·16 (average)	More rain wanted. Small-pox and cattle-disease in parts.
Ganjam ...	·96 (average)	Small-pox slight in two taluks; 5 deaths from cholera.
Kistna ...	1·37 (average)	River rising 12·25 feet over anicut. Standing crops generally good. Small-pox, fever, and cattle-disease in places; 13 deaths from cholera.
Chingleput (Madras) ...	1·10 (average)	Standing crops fair, but in want of rain in parts; harvest paddy, yield half the average. Small-pox prevalent; 48 deaths from cholera.
Coimbatore ...	·23 (average)	Standing crops everywhere suffering from want of rain; harvest dry crops, outturn below average. Fever and small-pox in parts.
Tanjore ...	·06 (average)	More rain much wanted in parts. Standing crops generally good. Rivers 1 to 5 feet. Harvest paddy in parts, outturn below average. 653 deaths from cholera, which is decreasing.
Madura ...	·01 (average)	Standing crops fading from want of rain; harvest *cholum* in one taluk, yield below average. Small-pox slight in parts; 3 deaths from cholera.
Malabar ...	6·34	Insufficient rain in parts. Standing crops, first crop paddy growing. Small-pox slight in 8 taluks, fever in 2; 8 deaths from cholera.
Travancore ...	1·32	Standing crops paddy in ear suffering from want of rain. Fever prevalent; small-pox in parts. *General Remarks.*—General prospects good in Northern Sircars. Rain deficient and prospects doubtful in Ceded and Southern Districts.
Bombay—(Aug. 6th)		
Karachi ...	No rain; average of 14 other stations, 1·64.	River rising on 4th, 17 feet 5 inches against 15 feet 5 inches on same date last year. Fever in 3 talukas; cattle-disease in 5 talukas, some deaths in Shahbandar and Ghoraibari. Worms in crops in Tatta, Mirpur Botoro, and Sujawal. Small-pox in 6 villages, in the districts there have been 19 fresh cases, with 1 death, 7 remaining sick. Prices of wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Sehwan 32, 24 and 40, in Ghorabari 22 and 32, and in Sujawal 30 and 36 pounds per rupee, respectively.
Hyderabad ...	Rain general; averaging 2·83.	River at Kotri on 4th, 17 feet 5 inches against 15 feet 5 inches last year. Small-pox in 4 talukas. Prices somewhat higher. Sowings of *bajri* and *til* continue; crops flourishing.
Ahmedabad ...	7·50	Total rainfall 22·68. Crops healthy; transplantation of rice continues. 8 cases of cholera have appeared in the city, of which 5 have proved fatal; in Parantij also there has been a fatal case. Wheat 29 and *bajri* 30 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	11·92	Total rainfall 25·25. Cholera continues in a mild form in the city, in Baroda there has been 13 deaths. Sowing operations continue. Locusts have disappeared from Songad in Khandesh. Prices—*bajri* 27 and rice 21 pounds per rupee.
Surat ...	·48; maximum fall in Pardi, 6·19; minimum in Olphad, 1·85.	Total rainfall 20·5. Seeds first sown have been damaged in certain places by excessive moisture; resowing commenced; transplantation nearly completed. *Juari* 30 and *nagli* 41 pounds per rupee.
Nasik ...	Good rain throughout, succeeded by break.	Crops in good condition; sowing and transplanting vigorously progressing. Public health good. Wheat 27, *bajri* 31, and rice 21 pounds per rupee, respectively.
Colaba (Bombay) ...	·93	Total rainfall to date 39·57, being 8·60 below average. Light showers daily. Abnormal temperature 1° cool to 2° warm; abnormal wind southerly till 1st, afterwards northerly.
Poona ...	Abundant rain has fallen in the west; and at Poona, maximum in district, 1·79 in Khadkala; minimum ·81 in Indapur.	More rain is wanted eastwards. *Kharif* sowings not begun in 22 villages of Indapur, elsewhere either finished or in progress. Rice crops flourishing. *Bajri* 34 and *juari* 35 pounds per rupee. In Poona—*bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	In Akola, 5·63; Sangamner, 2·48; Parner, 1·23; Kopargaon, 1·8; Rahuri, 1·4; Jamkhed, ·91; slight rain has fallen in other talukas.	More rain is urgently wanted. Sowing of *kharif* in progress in places where there has been a sufficient rainfall. The want of fodder for cattle is being felt. *Juari*—maximum 60 pounds in Sangamner, minimum 35 in Karjat; *bajri*—maximum 48 in Sangamner, minimum 30 in Kopargaon.
Sholapur ...	93; Barsi, ·61; Madha, 1·9; Karmala, ·73; Pandharpur, ·38; Sangola, ·35, and Malsiras, ·73.	*Juari* 38 pounds 18 tolas and *bajri* 38 pounds per rupee. Rain still urgently wanted. Season for *kharif* sowings now past; hardly any sowings have been made; a little grass is available for cattle since recent rain.
Dharwar ...	Maximum at Mugud, 7·0; at Dharwar and Hangal nearly 5·0; at Kalghatgi, 3·59; Bankapur and Kod above 3·0; Hubli, Karajgi, and Ranibennur above 1·0; at Navalgund, Nargund, Gadag, and Mundargi less than ·65; at Ron, *nil*.	Rain is very badly wanted in the last-mentioned talukas as sowing operations are retarded, and scarcity of drinking-water is increasing. Rice crops have much benefited by the heavy fall in other talukas, and the scarcity of water also has been partly removed. *Juari* sowing and planting of chillies are in progress, where there has been enough rain. Cholera slight; small-pox, fever, and measles prevail. Prices are stationary.
Kanara ...	Karwar, 6·82; Kumpta, 7·81; Sirsi, 12·76 and Haliyal, 7·12.	Total rainfall 53·43. Common rice in Karwar 12 seers; district average 15 seers per rupee. Weeding continues in rice fields. Small-pox in Karwar, Kumpta, Honawar and Sirsi, but not much in Siddapur, Mugud and Haliyal; 2 deaths in Haliyal from small-pox, 4 deaths from cholera in Mugud near Dharwar frontier.
Rajkot ...	·07	Total rainfall 24·29. General health good; prevailing diseases—fever and diarrhœa. *Bajri* 32 and *juari* 42 pounds per rupee.
		General Remarks.—River rising and prospects generally improved in Sind owing to sufficient rain. Heavy rain stopped and sowing operations resumed in Gujarat; abundant rain in parts of Deccan and Southern Mahratta country, but much wanted in some talukas of Sholapur, Dharwar, and Kaladgi. Cholera in parts of 11 districts; fever and small-pox in a few places.
Bengal—(August 6th)		
Chittagong ...	5·8	Weather warm, with occasional showers. Prospects of crops fair; harvesting of *aus* nearly completed with 12-anna outturn. Prices stationary. Cholera and cattle-disease continue.
Dacca ...	1·73	Harvesting of early paddy and jute continues. Prospects of crops and public health good.
24-Pergunnahs (Calcutta)	.....	Transplanting of *amun* going on rapidly everywhere. Prospects of crops good; common rice 12½ to 16 seers per rupee. Public health generally good, but stray cases of fever and cattle-disease reported. Rivers rising.
Moorshedabad ...	2·71	Weather hot and sultry. Recent rain saved seedlings for the present and allowed transplanting to be proceeded with, but more rain wanted. A good deal of *aus* being cut and the ear rubs out better than was expected. Public health good.
Rajshahye ...	·55	Prospects of *aus* and *amun* generally good. More rain wanted for *amun*. Public health good.
Burdwan ...	2·77	Insufficient rain prevents transplanting of *amun* crops; insufficient but speedy rain will materially improve them.
Rungpore ...	·16	Weather hot and cloudy; rain very much wanted. Rice 3 rupees 6 annas to 4 rupees 8 annas per maund. Malarious fever prevailing.
Bhagalpur ...	1·58	Transplanting of paddy stopped for want of rain in greater parts of district; prospects of crops good. Prices of rice stationary.
Purneah ...	·39	More rain required for crops. Transplanting much checked. Common rice 14 seers per rupee. Public health fair. Rivers half full.
Patna ...	·47	*Bhadoi* crops and paddy seedlings suffering from want of rain. Cholera still reported from interior.
Durbhunga ...	·14	Rain very badly wanted for transplanting paddy and *bhadoi* crops. Prices stationary. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Hazaribagh ...	3·87	Weather variable. Prospects of crops seem good, except in Hazaribagh, Huntingunge, and Semaria thanas for want of rain. Prices of food-grains continue high. Small-pox and cholera reported from certain places, otherwise public health good.
Cuttack ...	2·87	Weather seasonable. *Beali* being weeded, *sarad* being replough-ed and growing well. More rain wanted. Price of rice almost stationary. Public health good. Scattered cases of cholera and cattle-disease reported from interior.
		General Remarks.—The rainfall during the week was again insufficient and has retarded transplanting and affected standing crops to some extent in many districts. Though prospects are still good, more rain very urgently wanted almost in every district. Harvesting of early paddy and jute continues in some places, and moderate outturn expected. Prices of rice rising slightly in some districts. Public health good.
N. W. Provinces and Oudh—		
Benares (Aug. 4th)	1·0 (average)	More rain required. Prospects of sugarcane and *kharif* crops good; late rice sown. Slight cholera and fever. Prices fluctuating.
Allahabad („ „)	Rain in every pargana during the past week.	*Kharif* crops doing well, and prospects excellent. Health excellent. Prices slightly rising.
Gorakhpur („ 2nd)	Some rain in north-west of district; none elsewhere.	Early rice in urgent need of rain. Health good. Prices steady.
Jhansi („ 5th)	Good rain all over the district.	Crops in a flourishing state. Prices falling. 70 deaths from cholera.
Agra („ 2nd)	Rain in all parganas from ·5 to 1·6.	Sowings continue. Cholera in Jagnere and Etmadpur circles. Prices steady.
Bareilly („ 4th)	Over 3·0 of rain on the 3rd.	Fine rice not sown, otherwise crops flourishing. Markets easy. Health of men and cattle good.
Meerut („ „)	From ·8 to 4·5; all the district has had good rain.	Crops flourishing. Health good, but cholera still continues in Sarawa. Prices steady.
Kumaon („ „)	Good rain in parts, but not general.	Crop prospects fair. Health good; a few cases of small-pox; cattle-disease somewhat increasing. Prices steady.
Lucknow („ „)	·5 to 2·1	Rain much wanted. Rice especially is suffering; *bajri* and *mothi* are being sown. Condition both of men and cattle good. Markets well supplied. Prices stationary.
Partabgarh („ 1st)	Average during past week 1·5.	Prospects good; *mothi* and *bajri* being sown. Prices almost stationary. Bazars well stocked.
Sitapur („ 4th)	General rain from ·7 to 2·9 fell throughout the district on night of 2nd August.	More rain is still wanted in Misrikh and Sidhauli. General health good. Prices slightly rising.
Fyzabad („ „)	·8 to 4·6	Weather occasionally cloudy. Prospects good. Prices stationary. Public health and condition of cattle good.
Rae Bareli („ 2nd)	A fair amount of rain has fallen all over the district.	*Kharif* crops coming up well. Health of men and condition of cattle good. Markets well stocked. Prices slightly rising.
Cawnpore („ 4th)	Rain in every tahsil from ·7 to 2·2.	Prospects favourable. Public health good; slight cattle-disease in pargana Akbarpur.
Farukhabad („ „)	Rain in all tahsils	Prospects much improved. Health of people good. Prices stationary.
		General Remarks.—Rain again fell in all districts, but in insufficient quantities in Benares, Gorakhpur, Lucknow and parts of Sitapur, where more rain is urgently needed. *Kharif* prospects generally are satisfactory. Markets are well stocked, and prices continue almost stationary. Cholera and small-pox still prevail in some places, but the general health of the people is good.
Punjab—(August 6th)		
Delhi ...	2·40	Cholera abating. Prices falling.
Hissar ...	Fair rainfall during the week, except in parts of Sirsa.	Health good. Prices steady.
Umballa ...	6·0	Health good. *Kharif* sowings completed. Prices stationary.
Jullundur ...	2·70	Health good, except small-pox in a few villages. *Kharif* sowings progressing.
Amritsar ...	.....	No report received.
Sialkot ...	3·50	Health good. Prices falling.
Ferozepore ...	·90 at City; 1·10 at Sadr; ·20 at Moga; ·60 at Zira; and 2·0 at Muktsar.	Health good. *Kharif* ploughings in progress. Prices fluctuating.
Lahore ...	·70	Health good. Prices stationary.
Rawalpindi ...	1·0	Health good. Slight rise in prices.
Mooltan ...	2·50	Crops and health good. Prices stationary.
Dera Ismail Khan ...	·20	Health good. Prospects improved. Prices stationary.
Peshawar ...	.....	Health good. *Kharif* sowings nearly completed. Prices stationary.
		General Remarks.—Rain has fallen in most districts. Cholera in Delhi city and in Kotgarh, Simla district, abating; small-pox in a few villages in the Jullundur district, elsewhere the health is good. *Kharif* sowings progressing, and prospects in the south-east improving.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(August 6th)		
Nagpur ...	5·80	Continuous rain likely to injure *juari* and cotton, unless early break occurs; *juari* sowings retarded. Fever and cattle-disease prevail. Prices slightly risen.
Jubbulpore ...	7·35	Rain still heavy, break needed. Upland crops in good condition, those in lowlands are suffering; sowings continue; weeding retarded. Wheat 24 and rice 12 seers per rupee.
Saugor (August 5th) ...	10·13	Weeding retarded, owing to heavy and continuous rain. Isolated cases of small-pox reported. Prices steady.
Seoni ...	6·19	Rain daily, break urgently needed to admit of weeding being proceeded with. Prices stationary.
Hoshangabad ...	13·55	Crops thriving. Enquiry about locusts being made. Wheat 21 and rice 9 seers per rupee.
Khandwa ...	1·78	Weather cloudy. Sowings completed. Prospects good. Wheat 21¾, *juari* 26½, and rice 11¼ seers per rupee.
Raipur ...	1·60	Continuous rain. Rice in low lands damaged by excessive moisture; *kodon*, cotton, and *tilli* being sown. Fever prevalent. Prices steady.
Sambalpur ...	4·28	Weather seasonable. Prospects and health good. Common rice 25½ seers per rupee. *General Remarks.*—Rain very heavy in the Jubbulpore division and in Hoshangabad. Weeding impeded by excessive moisture, break urgently needed. Health good. Prices steady.
British Burma—(August 2nd)		
Akyab ...	8·79	Total rainfall 114·13. A few cases of cholera and small-pox; cattle-disease prevalent.
Rangoon ...	6·81	Total rainfall 54·88. One case of small-pox and one of cholera.
Bassein ...	9·03	Total rainfall 51·25. Cattle-disease prevalent in two townships.
Amherst (Moulmein) ...	14·20	Total rainfall 98·05. Small-pox prevalent in 4 townships.
Toungoo ...	8·37	Total rainfall 44·09.
Kyoukphyoo ...	20·39	Total rainfall 122·4.
Sandoway ...	9·59	Total rainfall 128·23.
Hanthawaddy ...	.....	Some cholera in one circle.
Henzada ...	7·09	Total rainfall 53·63. 15 deaths from cholera in town and 7 in district; cattle-disease prevalent.
Thaeytmyo ...	3·26	Total rainfall 20·36. Slight small-pox in town; cholera prevalent in one township.
Shwaygyin ...	10·0	Total rainfall 68·70. Cattle-disease prevalent in several circles.
Tavoy ...	.....	No report received.
Pegu ...	7·85	Total rainfall 61·13. One death from small-pox; diarrhœa and dysentery prevalent.
Tharrawaddy ...	7·50	Total rainfall 65·55. Slight small-pox and cholera; several cases of cattle-disease.
Prome ...	4·27	Total rainfall 26·42. Some cholera and small-pox in town; 60 deaths from cholera in district.
Thonegwa ...	5·25	Total rainfall 55·17. Some cases of cattle-disease; slight cholera in district.
Mergui ...	.....	No report received. *General Remarks.*—Cholera and small-pox in many places, but not severe; some cattle-disease.
Assam—(Aug. 6th)		
Gauhati (Aug. 5th) ...	·05	Weather unusually hot. Rain wanted to facilitate ploughing operations for *sali* corps; sugarcane doing well; tea prospects and public health improving.
Sylhet ...	1·08	Crop prospects not favourable. Public health fair.
Cachar ...	3·22	Weather very warm. Reaping of *aus* crops progresses. Common rice 16 seers per rupee. Prospects of tea good. Blight confined within narrow limits. Health good.
Dibrugarh ...	.....	Weather hot. Rain still wanted for transplanting *sali dhan*; prospects of *ahu dhan* good. Public health good.
Mysore and Coorg—(Aug. 6th)		
Bangalore ...	·15; slight rain has fallen all over the province since last report.	Rain insufficient for sowing purposes. Prospects continue uncertain, but more hopeful than before. Weather cloudy and monsoonish. Water-supply and pasturage in Mulnad district barely sufficient. Prices—rice from 11 to 14 seers and *ragi* from 28 to 56 seers per rupee. Grain in large quantities being exported by rail from Polar towards Calicut and Coimbatore. Public health good.
Mysore ...	·37	
Mercara ...	14·65	Floods in the Cauvery. Agricultural prospects have improved with the return of the monsoon which is general throughout the province.
Berar & Hyderabad—(Aug. 6th)		
Amraoti ...	2·46	Weather cloudy. Cotton plants thriving. Break required for weeding. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	3·96	Crops in good condition. Break needed.
Hyderabad ...	1·67 (average)	Total rainfall from 1st January 17·85. Sowing of *abi* and *kharif* crops progressing. General health good. Prices—wheat 14¼, coarse rice 10¾, white *juari* 16½, *yellow juari* 19¾, and *tur* 18¾ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(August 6th)		
Indore ...	·71	Total rainfall 19·18. Sufficient rain has fallen up to date; a break is now desirable. Health good. Prices steady.
Morar (Gwalior) ...	1·48	Total rainfall 8·92. Cholera in Lashkar and Gwalior.
Sutna ...	4·18	Weather wet. Prospects and health good.
Neemuch ...	2·84	Weather cloudy. Crops doing well. One case of cholera.
Goona ...	3·4	Health and prospects good.
Agar ...	1·41	Total rainfall 13·27. Prospects good. Two cases of cholera in Agar city.
Sehore ...	5·49	Total rainfall 18·38. Weather cloudy. Prospects of crops and public health good.
Nowgong ...	4·95	Total rainfall 24·28. *Kharif* crops good. Weather seasonable. Public health good.
Manpur ...	4·0	Total rainfall 19·75. A break in the rains was essential and since the last three days the weather shows signs of a break. Crops are in good condition. Public health good.
Rajputana—(August 6th)		
Abu (Aug. 6th)	23·12	Total rainfall nearly 55·0. Heaviest rain fell on the 30th and 31st July. Weather still very cloudy, windy and threatening; a break in the weather is wanted.
Sirohi („ 3rd)	9·80; rain every day during the week.	Tanks and wells good. Health good. Crop prospects good. Remarkably heavy storms of rain and thunder on the night of the 30th July.
Marwar („ 1st)	4·02	Five months' water brought into Jodhpore city. Tanks full. Health good. Crops thriving; prospects vastly brighter. Prices stationary. Reports from districts equally favourable.
Meywar („ 3rd)	3·73	Tanks and wells good. Health good. Crop prospects very good. Weather seasonable.
Harowti („ 2nd)	Deolee, 8·02; Tonk, 3·07; Kotah, ·38; Shahpura, 4·18.	Weather cloudy and seasonable. Weeding of crops commenced. Health good. Prices fallen.
Jhallawar („ 1st)	4·28	Health good.
Ajmere („ 5th)	2·35	Weather seasonable. *Kharif* sowings progressing. Cholera decreasing.
Jeypore („ „)	·55	Crops need more rain. Few cases of cholera still reported. Prices stationary.
Ulwur („ „)	1·61	Prices falling. Health good. Prospects good.
Nepal—(July 31st)		
Katmandu ...	1·76	Weather hot and close. Crops in want of rain.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 6th August, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

THE HON'BLE KRISTODÁS PÁL, RAI BAHADUR.

On the Members of Council taking their seats, His Excellency THE PRESIDENT made the following remarks:—"Before we proceed to consider the business upon the List before us, I am sure that my hon'ble colleagues will allow me to express my deep regret at the lamented death of Rai Bahadur Kristodás Pál, which has taken place since the last meeting of the Legislative Council. By this melancholy event we have lost from amongst us a colleague of distinguished ability, from whom we had on all occasions received assistance, of which I readily acknowledge the value. He has been taken from us in the prime of life, when his powers were at their best, and when we might have hoped that he would still for many years to come have been permitted to devote himself to the service of his country with the same energy and patriotism as had hitherto marked his career. Mr. Kristodás Pál owed the honourable position to which he had attained to his own exertions. His intellectual endowments were of a high order; his rhetorical gifts were acknowledged by all who heard him, and were enhanced when addressing this Council by his thorough mastery over the English language. He will long live in the remembrance of his countrymen; and it is with feelings of sincere sorrow that I pay this last tribute to the memory of one who was so well entitled to be regarded as a worthy representative of the intellect and eloquence of the race to which he belonged."

SETTLEMENT-OFFICERS' (PANJÁB) DECISIONS VALIDATION BILL.

The Hon'ble MR. ILBERT moved that the Bill for the validation of decisions passed by certain Settlement-officers in the Panjáb be referred back to the Select Committee. He said:—"The object of this Motion is merely to give the Select Committee an opportunity of considering some formal alterations which have been suggested to me since the date of their Report, which would, I think, effect an improvement in the form of the Bill, and which could not be very conveniently made by amendments moved in Council."

The Motion was put and agreed to.

INDIAN TELEGRAPH ACT, 1876, AMENDMENT BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to facilitate the construction of Telegraphs, and to amend the Indian Telegraph Act, 1876. He said:—

"The main object of this Bill is to empower the Governor General in Council, or any company or person licensed by him under the Indian Telegraph Act of 1876, to place and maintain lines of telegraph under, over, along, across, in or upon property belonging either to private persons or public bodies. The determination to bring forward this Bill has arisen out of the fact that it has recently come to the attention of Government that, as the law at present stands, the Governor General in Council and his licensees have no power to place and maintain lines of telegraph upon the land of municipal or other similar bodies or of private persons. In England the requisite powers have been conferred on the Post Master General, who works and maintains the telegraphs in that country, and it appears to us to be necessary that similar powers should be enjoyed here. The power given in the Bill will operate to prevent, on the one hand, any Government officer from violating private rights when erecting the telegraphs, and, on the other hand, any private person from offering unnecessary and unreasonable obstruction to those who are carrying out operations intended for the public convenience.

"The present opportunity has also been taken to make two amendments in the Indian Telegraph Act, which were found from experience to be necessary.

"The first of these amendments has for its object the regulation of telegraph lines constructed by the Government, but leased to companies or individuals by whom they are worked. We have a very large and increasing class of such lines along our railways, the system being that the Government owns the whole of the plant of the telegraphs, and that it leases them to the Railway-administrations for the actual working. The position of these lines under the present Telegraph Act is far from clear, and the object of the amendment proposed in section 8 of the Bill is to put them on much the same footing as licensed lines.

"The object of the second amendment, made by section 9 of the Bill, is to prescribe penalties for the breach by licensees or lessees of the rules made under section 8 for the conduct of their telegraph. In such cases, as the Act now stands, the only remedy is to revoke the license or lease; but this course would in most cases cause such great public inconvenience that it is impracticable."

The Motion was put and agreed to.

FUNCTIONS (LIEUT.-GOVERNOR, N. W. P.) VALIDATION BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to legalise the discharge by the Lieutenant-Governor of the North-Western Provinces of certain functions assigned to the Governor General in Council. He said:—

"The object of this Bill is merely to legalise the existing practice in accordance with which certain functions which under some unrepealed Regulations and Acts ought strictly to be discharged by the Governor General in Council are in fact discharged, and much more conveniently discharged, by the Lieutenant-Governor of the North-Western Provinces. The functions in question are not of a very important character, one of them, for instance, being the power to sanction the allowances and establishment of the dároghas of certain stone-quarries, and to fix the rate of duty payable in respect of stone taken from the quarries. That is a power which, I think, might be very conveniently delegated to the Local Government."

The Motion was put and agreed to.

TRANSFER OF PROPERTY ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the Transfer of Property Act, 1882. He said:—

"The chief object of the Bill which I am asking leave to introduce is to remove a doubt which has been entertained as to the effect of the exemption

clause in the Transfer of Property Act. When this important measure was before the Select Committee, it was apprehended that there were certain classes of the community to which some of its provisions might be unsuitable, and accordingly a power was given to Local Governments, with the previous sanction of the Governor General in Council, to make exemptions from the operation of particular sections of the Act.

"The sections to which the power of exemption applies are those which relate to transfer by an ostensible owner (section 41); to the mode of effecting a transfer of property by sale (section 54, paragraphs 2 and 3), mortgage (section 59), lease (section 107), and gift (section 123); and to the effect of a power of sale in a mortgage (section 69). And the form of exemption adopted was copied, with some modifications, from the Indian Succession Act, which enables (section 332) the Government to exempt from the operation of the whole or any part of the Act, either prospectively or retrospectively, the members of any race, sect or tribe in British India to whom the provisions of the Act might be considered inapplicable.

"Now, this was an excellent precedent to follow; but I cannot help thinking that the Select Committee, when adopting it, did not sufficiently advert to the difference between the rules of the Succession Act and those of the rules of the Transfer of Property Act to which the power of exemption was to apply. It is easy enough to make a personal exemption from the rules of succession, and to say that some of those rules shall not apply in the case of succession to a particular person or class of persons. But it is not so easy to make a personal exemption from rules which require the observance of certain formalities in the case of a sale, mortgage, lease or gift of land. According to the generally recognised principles of what is called private international law, formalities of this kind are regulated by the law of the place where the property is situate, and are not affected by the personal law of any party to the transaction. What, for instance, would be the effect of saying that a rule which requires the sale of land to be made only by a registered instrument shall not apply to Bhils? Would it apply where the vendor is a Bhil, or where the purchaser is a Bhil, or where any party to the transaction is a Bhil, or only when all parties to the transaction are Bhils? So, again, is it only intended to apply where litigation ensues; and in that case is the intention to exempt the person who wishes to enforce the contract, or the person against whom the contract is to be enforced, or both? Plausible reasons may be suggested, and indeed have been suggested in the papers which have come before me, for adopting any one of these views; but I do not think any lawyer could say with complete confidence which of them would be the correct view.

"The difficulty of construing this section was raised very shortly after the Act came into operation by Mr. Elliott, the Chief Commissioner of Assam, who was anxious to exempt from some of the provisions of the Act certain classes of the population under his government, and more especially the wild tribes on the eastern frontier of Assam, but who was not at all sure what would be the effect of his exercising the power of exemption given to him by section 1 of the Act.

"When the question came before me my own opinion was that the best way out of the difficulty would be to make the power of exemption local and not personal, so far at least as it applies to the sections which prescribe the formalities of transfer. Mr. Elliott, however, would have preferred a power to exempt from the operation of those sections not persons or places, but *transactions* to which members of any race, sect, tribe or class whom it might be desirable to exempt were parties; and as to sections 41 and 69 (which relate to sales by ostensible vendors, and to powers of sale in mortgages), he did not see why the power of exemption was needed in their case at all.

"I felt bound to admit that a local exemption would not give precise effect to the intentions of the Select Committee, and I shared Mr. Elliott's doubts as to the reasons for including sections 41 and 69 in the exemption clause. And under these circumstances, considering that the Act had so recently come into operation, and that I had not had the advantage of taking part in any of the deliberations which preceded its passing, I thought it was only due to the eminent persons by whom it was framed, and to the Select Committee who had

bestowed so much pains on bringing it into its present shape, to take the opinion of Local Governments before proposing any specific amendment in the law.

"The result of the reference to Local Governments has been to elicit a great difference of opinion as to the form which the exemption clause should assume, whether it should be purely local or purely personal, or partly local and partly personal; and further, if it is made personal, whether it should apply where any of the parties to the transaction is a member of the exempted class, or only where all of them belong to that class. But the general effect of this conflict of opinions on my mind is to confirm the view which I had previously entertained, that the best and simplest way out of the difficulty is to make the exemption from the provisions as to formalities of transfer local, and that any other form of exemption would not only give rise to difficult legal questions, but would facilitate forms of fraud which it is the object of the Act to make impossible, or at least difficult.

"In the view that there should be some kind of local exemption, I think I may claim the support of Sir Charles Turner, whose opinion, as that of one of the three Law Commissioners to whom the Transfer of Property Bill was referred, is entitled to great weight, and I am certainly supported by Mr. Justice Muthusami Aiyar, who has written an interesting Minute on the subject, and by Mr. Robert Crosthwaite, who was acting as Secretary in the Legislative Department when the Bill was before the Select Committee, and who may therefore be presumed to be acquainted with the reasons which induced them to insert the exemption clause now in the Act.

"As to the extent of the local exemption, one point appears to be clear, namely, that the sections prescribing the formalities of transfer should not extend to tracts of country in which the Registration Act is not in force. The sections in question presuppose the existence of a Registration Law, and are scarcely intelligible without it; and it can, I think, only have been through an oversight that they were extended to areas where that Act is not in operation.

"Should we go further, and exempt from the operation of those sections any part of the country where the Registration Act is in force? Sir Charles Turner appears to doubt whether we should, and suggests, as an alternative, that the kind of protection now afforded to certain classes of agriculturists under the Dekkhan Relief Acts should be extended to other classes of persons, by making them incompetent to convey any interest in land by a written instrument unless the instrument is executed in the presence of an officer of Government, who should be required to explain its effect. In other words, instead of relaxing formalities in the case of these classes, he would require the observance of additional formalities. With all deference to his high authority, I think the balance of argument is against the adoption of this suggestion. In the first place, any attempt to superadd a personal to a local exemption is open to the objections which have been urged against granting purely personal exemptions. In the next place, although I do not deny that members of uncivilized and ignorant classes are exposed to risk of fraud when they engage in transactions with persons of superior intelligence, though perhaps not of superior morality, yet there does not appear to be anything which shows that this particular risk was in the view of the Select Committee when they framed the exemption clause now under consideration. There may be, in my opinion there are, cases in which a contract should not be legally binding, unless it is executed under sufficient safeguards against fraud. The English Legislature has recognised this principle in its legislation on the subject of bills of sale (to select one out of many instances), and English Courts of Equity constantly act on it where such relations exist between the parties as afford ground for the presumption of undue influence having been exercised. But such cases, as the illustrations which I have referred to clearly show, are not confined to transactions relating to land, or to transactions to which one of the parties is a member of an uncivilized race; and on the whole I think it is best to deal with them, not in the manner suggested, but by special legislation, where the need for such legislation is shown to exist.

"On the other hand, I think that it would be convenient to have a power of exempting from the operation of some of the provisions of the Act certain tracts to which the Registration Law extends. For instance, Sir Henry Ramsay has strongly pressed upon me the expediency of exempting Kumaun, where I believe the Registration Act is in force. I am quite aware that the Transfer of Property Act is not the only Act of the Legislature which Sir Henry Ramsay has desired to exclude from Kumaun, and I fully understand the jealousy with which legislation of the kind is regarded by a man whose long and eminently successful administration affords one of the most conspicuous instances of what may be done in a backward district by a strong, conscientious and capable ruler when left very much to his own devices and untrammelled by laws and regulations. But without committing myself to Sir Henry Ramsay's views on legislation generally, it does seem to me probable that there are tracts of country where the mass of the population are not ripe for those provisions of the Transfer of Property Act which require all transfers of property above a certain value to be in writing and registered, and which in the case of petty transactions make writing obligatory unless the transfer is accompanied by delivery; and this appears to be the opinion of the Government of the North-Western Provinces, who desire to have the power of exempting certain tracts of country within the area under their administration, including, I believe, not only Kumaun, but certain other hill tracts. The amending Bill proceeds on the view that such a power is advisable, and proposes to give a power to grant local exemptions from those sections which prescribe the formalities of transfer.

"The power will doubtless be cautiously exercised, and I should point out that it may be so exercised as to exclude certain portions from the exempted area. For instance, provisions which may be considered unsuitable to Kumaun generally, may be suitable enough to Naini Tal.

"This is all that I need say at present about sections 54, 59, 107 and 123, the sections which prescribe the formalities to be observed in cases of sale, mortgage, lease and gift.

"To sections 41 and 69 different considerations apply. Section 41 enacts that a transfer of property by its ostensible owner shall not be void by reason only that the transferor was not authorized to make it, provided that the transferee after taking reasonable care to ascertain that the transferor had due powers has acted in good faith.

"This section is based on the principle that where one of two innocent persons must suffer from the fraud of a third party, the loss should fall on him who has created or could have prevented the opportunity for the fraud, and that in such cases hardship is caused by the strict enforcement of the general rule that no one can confer a higher right on property than he himself possesses. This principle is generally recognized in the jurisprudence of all civilized nations, and lies at the bottom of such legislation as the English Factors Act; but I am inclined to agree with Sir Charles Turner in thinking that it involves a refinement of equity which is perhaps hardly required for, or suitable to, the very simple transactions between members of uncivilized races, and which they might fail to appreciate. Accordingly I propose to give power to exempt from the operation of this section any property within a particular area in which a member of any specified race, sect, class or tribe is interested. As the section deals not with the formalities of transfer, but with the capacity to transfer, the objections to a form of exemption which is to some extent personal do not apply.

"As to section 69, there does not seem to be any reason why it should be included in the general exemption clause; but, on the other hand, it does seem to require amendment in itself.

"The object of the section was to set at rest what had been previously a moot question, namely, whether, under the law of British India, a mortgagee could sell under an express power of sale without the intervention of the

Courts. The section says that such a power of sale shall be valid in certain cases, namely,—

(*a*) where the mortgage is an English mortgage (*i.e.*, in the ordinary English form), and neither the mortgagor nor the mortgagee is a Hindu, Muhammadan or Buddhist;

(*b*) where the mortgagee is the Secretary of State in Council;

(*c*) where the mortgaged property or any part of it is situate within the town of Calcutta, Madras, Bombay, Karáchí or Rangoon:

but it does not go on to say that the power shall not be valid in other cases.

"I propose to make clear what seems on the whole to have been the intentions of the framers of the section by declaring the cases in which the power of sale is not to be valid. And as Mr. Justice Muthusami Aiyar has pointed out that there are other classes which it is even more necessary to exclude from the operation of the exceptional provision than Hindus, Muhammadans and Buddhists, I propose to add words giving a power to exclude such classes.

"These are the principal amendments which I propose to make in the Act. There is however one further amendment, which, though of minor importance in itself, opens up questions that are of considerable importance.

"There is a section in the Act which declares that nothing in the Act is to be deemed to affect the provisions of any enactment not thereby expressly repealed. And Mr. Elliott asked how this declaration was to be reconciled with certain sections which appeared to him to affect the provisions of the Registration Act. Under the Registration Act certain instruments relating to property of less than Rs. 100 in value *may* be registered, and, if registered, have priority over unregistered instruments. Under section 54 of the Transfer of Property Act all instruments of sale *must* be registered to have any effect at all. Where the value of the property is less than Rs. 100, you may sell by mere delivery; but if you wish to rely on a written instrument, you must register it; and the question is whether the latter of these provisions does not affect the former. The answer depends on the meaning which you attach to the term 'affect.' As used in legislative language, it usually means affect *in malam partem*, derogate from, wholly or in part. In this sense the Transfer of Property Act does not affect the Registration Act. What it really does is to supplement it by rendering certain instruments compulsorily registrable which were only optionally registrable before. And I propose to insert in the amending Bill words which will make this clear.

"Now this is, as I have said, a minor matter, but it raises the question as to the relations to each other of these two important Acts, and as to the extent to which the passing of the Transfer of Property Act has superseded the necessity for making some of the amendments which have from time to time been suggested in the Registration Act.

"The Registration Act is an Act which has been frequently tinkered, and which from the nature of the case it is almost impossible to make thoroughly satisfactory, and therefore I am not particularly anxious to undertake the task of further amending it. But I fear that it will be necessary before long to take action on the suggestions for its amendment which have for some time been pressed on the Legislative Department, and the close connection of some of those suggestions with the parts of the Transfer of Property Act which I am proposing to amend will, I think, afford a sufficient justification for my referring to them briefly now.

"One of the proposals which has been laid before us is pretty radical in its character, for it goes to the root of the matter, and suggests that our whole system of registration is wrong, and that what we ought to aim at is a registration, not of instruments or documents, but of titles. Now this question of registration of instruments or assurances *versus* registration of titles has been the subject of controversy in England among those learned in the conveyancing craft during the last half century or so. On the one hand, a system of registering assurances has been in force in two counties in England—Middlesex and Yorkshire—ever since the reign of Queen Anne, and has also been in

force for a long while in Ireland and Scotland, and has worked with more or less success. In Middlesex I can undertake to say that it has worked very badly. On the other hand, Sir Robert Torrens has introduced into the Australian colonies a system of registering titles which appears to have been a conspicuous success, and which has therefore naturally suggested the expediency of its introduction elsewhere. Both Lord Westbury and Lord Cairns have passed Acts providing for registration of titles somewhat on the Torrens' system; but both these Acts, though framed with great ability, have, I am sorry to say, remained almost dead-letters. It has been suggested that in India a system of registering of titles might be conveniently engrafted on the system of revenue registration, which looks rather to the man in possession than to the way in which he got into possession, and that we should thus avoid a double system of registration under the Revenue Acts and under the Registration Acts.* My own opinion, however, for what it is worth, is that, though registration of titles is preferable in theory to registration of assurances, it is not compatible with a complicated system of titles. It is mainly for this reason that I believe it has failed in England, where titles are complicated by settlements, and I fear that it would fail in India, where there are even greater complications arising out of Hindu family law.

"Our present system of registering instruments has obtained firm possession of the field, has on the whole worked fairly well, and is recognized as the basis of such important pieces of legislation as the Transfer of Property Act; and under these circumstances it would be a strong measure to upset it altogether. Whether an economy may not be effected by combining the functions of the staff employed under the Revenue Acts and of that employed under the Registration Acts is an administrative question into which I need not enter.

"Assuming then that instruments and not titles are to be registered, there is a feature of the existing Registration Act to which strong exception has been frequently taken by high authorities, and that is what is known as optional registration, the system, namely, under which instruments of a certain class are allowed, but not required to be registered, are given a legal effect without registration, but, if left unregistered, are liable to be overridden by a registered instrument of later date. Sir Richard Garth has repeatedly inveighed against the system as inducing and facilitating fraud, and a high authority on the other side of the peninsula has recently used equally strong expressions about it. 'The present law,' says Mr. Maxwell Melvill in a note which I read the other day, and which I hope he will excuse me for quoting in this connexion, though it was written with reference to a different subject 'which makes the registration of certain instruments optional, but invalidates them when they come into competition with registered instruments of a later date, is a trap for the unwary, and has unfairly deprived thousands of innocent mortgagees and private owners of their property.'

"Among the numerous difficult questions to which the system of optional registration has given rise, one of the most difficult is as to the effect of notice of an unregistered transaction on the rights of a person who claims under a registered instrument. There is a section of the Registration Act (section 50) which says that when a deed of which the registration is optional is registered, it shall have priority over any unregistered deed relating to the same property. This is in fact the inducement to register such deeds. But supposing that a man who claims under a deed so registered had, at the time of entering into the transaction on which the deed is based, notice of the existence of another unregistered deed, earlier in date, and inconsistent with his claims, what then? Is he still to have priority, notwithstanding the notice? On this question there is a vast number of decisions, which are collected in the various editions of the Registration Act (the edition which I happen to have consulted is a handy little book brought out this year by Mr. Cuddalore Ramachandra Aiyar, a Subordinate Judge in North Malabar), but the upshot of them is that the Madras High Court would allow the claimant under the later registered deed to assert his priority, notwithstanding notice, whilst the other High

* This suggestion has the support of Mr. Justice Field. See "Landholding and the Relations of Landlord and Tenant," p. 405, note 9.

Courts, and I believe the Chief Court of the Panjáb, hold the opposite view. I have had some correspondence on this subject with Sir Charles Turner, and he has been kind enough to send me a note, in which he has reviewed the history of the successive Registration Acts, and has defended with much force the view taken by the Madras High Court as to the operation of the present Act. I quite agree with him that if the doctrine of notice is carried to the extravagant lengths to which it was formerly carried by English Courts of Equity, and under which what was called constructive notice was made to include, not only what a man actually knows, but what he and various other persons connected with him could, should, or might have known,—I quite agree that if the doctrine is carried to this length, it is fatal to any system of registration. But a much more reasonable view of what amounts to notice has been taken of late years by the English Courts, and notably by Lord Cairns in a well known case in the House of Lords (*Agra Bank* v. *Barry*). It is certainly desirable, as Sir C. Turner admits, that the law administered in the several provinces should be made uniform by legislation, and that it should be expressly declared whether the doctrine of notice is to be applied by the Courts, and if so, to what extent. It may be found possible so to define the term for the purpose of the Registration Act as to get rid of what is called constructive notice, and to confine the doctrine to cases where there is such a knowledge of a previous transaction as shows that the person claiming under a subsequent registered deed is obviously trying to take advantage of his own fraud; but the work of framing a definition which would draw the line precisely at the right point would be a matter of considerable difficulty.

"In the meantime it should be borne in mind that we have already in our Statute Book a definition of notice and a declaration of its legal effects. The definition section of the Indian Trusts Act (section 3) explains that a person is said to have 'notice' of a fact when he actually knows that fact, or when, but for wilful abstention from inquiry or gross negligence, he would have known it, or when information of the fact is given to, or obtained by, his agent, under the circumstances mentioned in the Indian Contract Act, 1872, section 229. And the Act goes on to enact (section 91) that—

'Where a person acquires property with notice that another person has entered into an existing contract affecting that property, of which specific performance could be enforced, the former must hold the property for the benefit of the latter to the extent necessary to give effect to the contract.'

"I am not aware whether the effect of this section on the Registration Act has been fully considered; but it certainly cannot be left out of account in any legislation which may be necessary—and I fear legislation will be necessary—to reconcile the conflicting decisions of the High Courts.

"Of course if you could get rid of optional registration altogether, many of the difficulties to which I have referred would vanish. And I understand Sir Richard Garth* to be of opinion that, so far as transfers by sale are concerned, the evils arising out of optional registration have been removed for the future in those parts of India to which the Transfer of Property Act already extends, and are capable of being removed by a simple extension of that Act to other provinces, such as Bombay, to which the Act may be extended by the Local Government. For, under section 54 of the Transfer of Property Act, there is no such thing now as a transfer by writing of immoveable property unless that writing is registered. There may be an oral transfer by way of sale of a possessory interest under Rs. 100 in value, but any sale in writing, whether under or over Rs. 100, must be registered. However, leases and mortgages stand on a different footing, and as to them the law of optional registration still prevails.

"The remedy which is usually suggested is to extend the range of compulsory registration to instruments relating to property of less than Rs. 100 in value. The chief objection to this proposal appears to be that the obligation to register petty transactions would impose great expense and hardship in cases where a registry office is not available within a reasonable distance. There may be—I dare say there are—parts of the country to which this

* See his remarks in *Narain Chunder Chuckerbutty* v. *Dataram Roy*, I. L. R., 8 Cal., at p. 612.

objection would not apply, and the suggestion which I should be disposed to make is that the Registration Act should be amended in such a way as would empower Local Governments to make registration of small transactions relating to land compulsory in those areas in which, in their opinion, the people are prepared for general registration and there is machinery available for registering such transactions without unnecessary expense and inconvenience to those concerned. In this way the range of compulsory registration might be carried out in a gradual and experimental manner. Of course the registration fees charged on petty transactions would have to be very light.

"And it is worth considering whether, in the class of cases to which compulsory registration is considered inapplicable, we should allow an unregistered instrument to have any legal effect whatever, whether in fact we should not extend and generalize the principle which I understand to be embodied in section 54 of the Transfer of Property Act.

"These points will have to be fully worked out when the Registration Act comes up for amendment; but I suggest them for consideration now, because of their close and obvious connexion with the enactment which I am asking the leave of the Council to amend."

The Motion was put and agreed to.

PANJÁB MUNICIPAL BILL.

The Hon'ble MR. BARKLEY presented the Report of the Select Committee on the Bill to make better provision for the organization and Administration of Municipalities in the Panjáb.

The Council adjourned to Wednesday, the 20th August, 1884.

SIMLA;
The 8th August, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

No. 203T., dated 14th August 1884.

RESOLUTION—By the Government of India, Public Works Department.

Revised Form of License for Telephone Companies in India.

Read—

Despatch from Her Majesty's Secretary of State for India, No. 26, dated 13th September 1883, and enclosures.

Public Works Department Resolution No. 303T., dated 25th October 1883.

OBSERVATIONS.—His Excellency the Governor General in Council is pleased to publish, for general information, the revised form of license for the working of Telephones in India referred to in paragraphs II and V of Public Works Department Resolution No. 303T. of 25th October 1883.

FORM OF LICENSE FOR A TELEPHONE EXCHANGE.

1. In exercise of the powers conferred by section 4 of the Indian Telegraph Act, 1876 (Act I of 1876), the Governor General of India in Council herein referred to as the Governor General in Council is pleased to grant the following license to the

Telephone Exchange Company (hereinafter referred to as "the Licensees").

2. The Licensees may establish and maintain Telephones, Telephone Exchanges and open Telephone Offices for a term of _____ years from the _____ day of _____ 188 , within the following limits, namely (*here set out the limits*)

3. The Licensees may establish and maintain for that term Telephone wires connecting—

(*a*) the Central Exchange of the Licensees with the District Exchanges of the Licensees;

(*b*) the Offices of Subscribers within the said limits with a Telephone Exchange of the Licensees;

(*c*) the open Telephone Offices of the Licensees with a Telephone Exchange of the Licensees;

(*d*) with the permission in writing of the Governor General in Council, a Telephone Exchange of the Licensees with the Office of a Subscriber situated beyond the said limits;

(*e*) with the permission in writing of the Director General of Telegraphs in India, a Telephone Exchange of the Licensees with a Government Telegraph Office within the said limits.

4. When the Licensees have in accordance with the provisions of this license established a Telephone Exchange within the said limits, they may establish, maintain and let on lease for the said term or any part thereof private Telephone wires connecting the office of any person situated within the said limits with another office of the same person or with the office of any other person situated within those limits or, with the permission in writing of the Governor General in Council, with another office of the same person or with the office of any other person situated beyond those limits.

5. The Licensees may use and work the said Telephones, Telephone Exchanges, open Telephone Offices, Telephone wires and private Telephone wires and suffer the same to be used and worked for the following purposes, namely,—

(*a*) for the purpose of enabling Telephone messages to be transmitted direct as follows, namely,—

(*1*) from or to any Subscriber at an Office occupied by him, either to or from any other Subscriber at an Office occupied by him, or to or from any person at an open Telephone office,

(*2*) in pursuance of the Telegram Subscription Rules made under the Indian Telegraph Act, 1876, and for the time being in force, from or to any Telegram Subscriber at an office occupied by him to or from a Government Telegraph Office,

(*3*) in pursuance of the Agency Subscription Rules made under the Indian Telegraph Act, 1876, and for the time being in force, from or to any Agency Subscriber at an office occupied by him to or from a Telephone Exchange,

(*4*) in the case of private Telephone wires, from or to any lessee of the same at one of the offices with which the private Telephone wire is connected to or from the other of those offices:

Provided that such messages relate only to the business or private affairs of such subscribers or lessees, or one of them; and

(*b*) for the purpose of transmitting in either direction between a Telephone Exchange and any other Telephone Exchange or the Office of any Subscriber or any open Telephone Office, or a Government Telegraph Office or between the offices with which a private Telephone wire is connected, service messages relating to the establishment from time to time of Telephonic connections by means of the said Telephone Exchanges or the said private Telephone wire, or to the working or repair of the said Telephones, Telephone Exchanges, open Telephone Offices, Telephone wires or private Telephone wires.

6. The Licensees shall, within a period of 180 days next following the date on which this license is granted, establish in working order at least one Telephone Exchange within the said limits, and, if they fail so to do, this license shall become revocable by the Governor General in Council.

7. This license shall not confer on the Licensees any right to lay or place any supports, wires or other Telephone apparatus or appliances in or over, upon or under, any land, ground, street, road, harbour, foreshore, river or place within the said limits, but any permission for that purpose required by the Licensees shall be obtained by them at their own expense from the person or persons, body or bodies corporate, legally entitled to grant the same.

8. This license cannot be assigned, transferred or otherwise disposed of, and in the event of any attempt being made on the part of the Licensees to assign, transfer or dispose of the same, or of any order being made by any Court for winding up the Company of the Licensees, or of any resolution being passed by the Company of the Licensees requiring it to be wound up voluntarily, or of the dissolution of the Company of the Licensees by any means whatsoever, this license shall *ipso facto* cease and determine.

9. (*a*) The Governor General in Council may at any time, by twelve months' previous notice in writing, terminating on the

day of 189
day of 189
or the day of 189

signify to the Licensees his intention to purchase the undertaking in respect of which this license is granted.

(*b*) If any such notice is given, the Licensees shall sell and convey to the Government the said undertaking, including all immoveable property and all rights in, over or in respect of the same, and all plant, material, apparatus and appliances, suitable to and used by them for the purposes of the said undertaking.

(*c*) The price to be paid by the Governor General in Council for such purchase shall be the then value of the property rights, plant, material, apparatus and appliances mentioned in clause (*b*), exclusive of any allowance for past or future profits of the undertaking or good-will, or any compensation for compulsory sale or withdrawal of the present concession or other consideration whatsoever, and shall be determined by two arbitrators—one to be appointed by the Governor General in Council and one by the Licensees, and in a case of a difference of opinion by an umpire, to be appointed by the arbitrators before they enter on the business of the reference.

(*d*) In the event of any such purchase, the Governor General in Council may revoke the license hereby granted.

10. This license is granted subject to the conditions set forth in the first schedule hereto annexed, and shall be revocable by the Governor General in Council on the breach of any of those conditions.

11. It shall be in the absolute discretion of the Governor General in Council to grant or refuse to the Licensees the privilege of connecting their Telephonic circle with any other circle; but in the event of such privilege being granted the trunk line will in all cases be erected, maintained and owned by the Government and let to the Licensees at such rent and on such conditions as the Governor General in Council may, from time to time, determine.

12. Nothing in this license shall confer upon the Licensees any exclusive right or privilege or prevent the Governor General in Council from doing through his own servants, or granting a license to any other person or body corporate to do, anything which the Licensees are authorized to do by or under this license.

13. All words and phrases used in this license and in the first schedule hereto annexed shall, unless there is something repugnant in the subject or context, be construed in accordance with the definitions and rules contained in the second schedule hereto annexed.

Secretary to the Government of India,

Public Works Department.

Dated the *day* *of* *188*

First Schedule.

Conditions of the License.

1. The Licensees shall not establish or maintain any Telephones, Telephone exchanges, open Telephone offices, Telephone wires, or private Telephone wires, except as permitted by their license.

2. The Licensees shall not use or work any Telephone, Telephone exchange, open Telephone office, Telephone wire or private Telephone wire established or maintained by them, or suffer the same to be used or worked, except for the purposes specified in their license.

3. (*1*) The Licensees shall pay to the Director-General of Telegraphs in India, herein referred to as the Director-General, on account of the *Government of India*, the percentages specified in the 3rd clause of this condition (and hereinafter called royalties) of all sums of

money paid or by virtue of any contract payable to them by any subscriber, lessee or other person—

(*a*) in respect of the hire, maintenance, working or use of any Telephone, Telephone exchange, open Telephone office, Telephone wire or private Telephone wire, or any part or parts thereof;

(*b*) in respect of the right or permission to transmit Telephonic messages by means of any Telephone, Telephone exchange, open Telephone office, Telephone wire or private Telephone wire; or,

(*c*) in respect of any services rendered to a subscriber under the Agency Subscription Rules made under the Indian Telegraph Act, 1876, and for the time being in force; or,

(*d*) otherwise in respect of Telephonic messages transmitted by means of any Telephone, Telephone exchange, open Telephone office, Telephone wire or private Telephone wire, or otherwise howsoever in relation to any Telephone, Telephone exchange, open Telephone office, Telephone wire or private Telephone wire, or any part or parts thereof, established under their license.

(*2*) The royalties shall be payable whether the sum of money is a gross sum or is payable periodically, or is paid in the shape of a fee for the temporary use of any Telephone exchange or Telephone by means of an open Telephone office, or is paid in the shape of rent, for the lease of any private Telephone wire.

(*3*) The royalties shall be 5 per cent. of the gross amount of every sum of money paid or payable to the Licensees as aforesaid, except when that sum is payable wholly or partly in respect of a Telephone wire or private Telephone wire situate partly beyond the limits specified in the license, in which case the royalty shall be 6 per cent.

4. Every royalty payable under the last foregoing condition shall become due so soon as the sum of money in respect of which it is payable, or by the amount of which it is regulated, is paid or is by virtue of any contract payable to the Licensees.

5. (*1*) The Licensees shall, at all times, keep at their principal office within the limit specified in their license a book or books in which they shall, so far as may be practicable enter—

(*a*) the names, addresses and occupations of all subscribers and lessees for the time being;

(*b*) the sums of money from time to time paid, and agreed to be paid, respectively, by those subscribers and lessees or by any other persons in respect of any of the matters specified in condition 3;

(*c*) the date at which every such sum of money was paid or became payable;

(*d*) the nature of the consideration for the payment thereof; and

(*e*) all such other particulars as the Director-General may, from time to time reasonably require.

(*2*) The Licensees shall preserve at their principal office, as aforesaid, all contracts between the Licensees and subscribers or lessees.

(*3*) The Licensees shall permit the Director-General and his officers, from time to time, and at all reasonable times, to inspect the said book or books and contracts, and to make copies thereof and extracts therefrom.

6. The Licensees shall, within seven days after the expiration of every calendar month, render to the Director-General a statement in writing showing—

(*a*) the amounts of all sums of money which, during the month, have been paid, or become payable, by subscribers or lessees or other persons;

(*b*) the names, so far as may be practicable, of the subscribers or lessees or other persons in each case;

(*c*) the date on which every such sum of money was paid, or became payable;

(*d*) the nature of the consideration for the payment thereof; and

(*e*) such further particulars as the Director-General may, from time to time, reasonably require.

7. (*1*) All accounts between the Director-General and the Licensees relating to the royalties payable hereunder shall be settled quarterly up to the 31st day of March, the 30th day of June, the 30th day of September and the 31st day of December in every year.

(*2*) The accounts for each quarter of a year shall be rendered by the Licensees to the Director-General within fourteen days after the expiration of the quarter.

(*3*) The balance due to the Director-General in respect of any quarter of a year shall be paid by the Company to the Director-General within twenty-eight days after the expiration of that quarter.

8. If a Telephone exchange of the Licensees is, with the permission of the Director-General, connected with a Government Telegraph office, for the purposes of the Telegram Subscription Rules made under the Indian Telegraph Act, 1876,—

(*a*) the wires and apparatus by means of which the Telephone exchange is connected with the Telegraph office, including the instruments placed in the Telegraph office, and all wires and apparatus either in substitution therefor or in addition thereto by which connection is, for the time being, made, shall be maintained by the Licensees at their own cost; and

(*b*) the wires and apparatus shall be appropriated for the exclusive use of the Director-General, but shall remain the property of the Licensees, and shall at all times be maintained in efficient working order by the Licensees:

Provided that, if in the opinion of the Director-General or any of his officers the wires and apparatus are or become insufficient for the due and expeditious transmission of the communications sent to or from the subscribers, the Licensees shall, after receiving a notice in writing from the Director-General so to do, forthwith erect and appropriate in the manner aforesaid such additional wires and apparatus between the Telegraph office and the Telephone exchange as the Director-General or his officers may deem necessary, and as may be specified in such notice, and such wires and apparatus shall be erected in such a manner as the Director-General or his officers direct and approve of.

9. The Licensees shall, in the event of any of their Telephone exchanges being connected with a Government Telegraph office for the purposes of the Telegram Subscription Rules made under the Indian Telegraph Act, 1876, comply with all the said rules for the time being in force, and duly account for all money received under the same on account of the *Government*.

10. The Licensees shall, in the event of any of their Telephone exchanges being utilized as an agency for the receipt and delivery of subscribers' telegrams intended for transmission or transmitted over the wires of the Government Telegraph Department under the Agency Subscription Rules made under the Indian Telegraph Act, 1876, comply with all the said rules for the time being in force.

11. Except messages intended for transmission, or that have been transmitted over the Government Telegraph wires, under the Agency Subscription Rules made under the Indian Telegraph Act, 1876, and for the time being in force, no written message or messages other than oral shall be collected or delivered at any Telephone exchange or office of the Licensees, or at the office of any subscriber or lessee.

12. No money or other valuable consideration shall, in respect of the receipt, transmission or delivery of any Telephonic message by means of any Telephone exchange or private Telephone wire established hereunder, be, or be promised to be, paid or given to any subscriber or lessee by any person whomsoever, whether a subscriber, lessee or not.

13. The Licensees shall, in every agreement with a subscriber or lessee, make due provision for the observance of the two last foregoing conditions, and reserve to themselves the fullest discretion to rescind the agreement on any infringement by the subscriber or lessee of either of those conditions.

14. (*1*) The Licensees shall, seven days at least before connecting the office of any subscriber or intending subscriber with any Telephone exchange, or an office of any lessee or intending lessee with another office of that lessee or with the office of any other person within the limits specified in their license, deliver a notice in writing of their intention so to do at the office of the Director-General, or to such officer as the Director-General may appoint to receive the notice.

(*2*) The notice shall contain—

(*a*) the name, address and occupation of the subscriber or lessee, or intending subscriber or lessee, to whom the notice relates;

(*b*) a copy of the engagement and condition entered into and agreed to by the subscriber or lessee under the last foregoing condition; and

(*c*) full particulars of the situation of the office or intended office to which the notice relates, and of the line or route in which it is intended to lay the Telephone wire or wires for establishing the connection, and of the manner in which, and the houses and buildings (if any) on or by means of which, it is intended that such wire or wires shall be supported.

(*3*) Notwithstanding anything in the foregoing portion of this condition, the Director-General may at his discretion grant permission for the connection to be established within a less period than seven days.

15. The posts and other Telephonic apparatus and appliances of the Licensees shall be so *erected* and placed as not to interfere with the convenient erection, maintenance or use of, or to expose to risk of damage, any posts, wires or other Telegraphic or Telephonic apparatus or appliances under the charge of the Director-General which may, from time to time, exist, or any posts, wires or other Telegraphic or Telephonic apparatus or appliances which it is probable that he may have occasion to erect; and accordingly no posts, wires or other Telephonic

apparatus or appliances shall be erected, fixed or placed by the Licensees, in pursuance of any such notice as aforesaid or otherwise, without the approval or consent in writing of the Director-General or an officer authorised by him in that behalf.

16. In the event of any posts, wires or other Telephonic apparatus or appliances of the Licensees which may already have been erected or placed with the consent of the Director-General interfering with the erection or playing of any posts, wires or other Telegraphic or Telephonic apparatus or appliances which the Director-General may, during the continuance of the said license, have occasion to erect, the Licensees shall, within thirty days after written notice has been given at their principal office situated within the limits specified in their license, remove such posts, wires or other Telephonic apparatus or appliances to another situation approved by the Director-General; and the reasonable expenses incurred by the Licensees in the removal shall be reimbursed by the Director-General.

17. In case any Telephone wire or wires of the Licensees shall, by reason of the neglect of the Licensees to maintain the same properly fixed and in good repair, or from any other cause whatever, interfere with the working of, or damage, any Telegraph or Telephone wire or wires under the charge of the Director-General, any officer generally or specially empowered by the Director-General in this behalf may, if the Licensees do not forthwith remove their said Telephone wire or wires, or sufficiently repair and refix such wire or wires to his satisfaction, so as to prevent any further interference with, or damage to, the wires under the charge of the Director-General, or if for any other reason he thinks it necessary for the public service, remove or repair and refix such wire or wires of the Licensees as aforesaid; and the Licensees shall on demand pay to the Director-General the cost of refixing and repairing the Telegraph or Telephone wire or wires under the charge of the Director-General which shall have been interfered with, or damaged, as aforesaid, and the cost of any removal or repair and refixing by such officer of their said wire or wires.

18. The Director-General and his officers and agents may, from time to time, and at all reasonable times, enter on any office of the Licensees and, so far as the Licensees can give permission, on any subscriber's or lessee's office, for the purpose of inspecting the Telephones and other Telephonic instruments and appliances fixed in those places.

19. The Licensees shall not move their Telephone exchanges without the previous consent in writing of the Director-General.

SECOND SCHEDULE.

Interpretation.

(1) "Subscribers" means those companies, firms and persons from whom the Licensees receive subscriptions, and with whom they enter into contracts in relation to connecting their offices by means of Telephone wires with a Telephone exchange.

(2) "Lessees" means those companies, firms and persons, whether subscribers or not, to whom the Licensees lease any private Telephone wire established by them.

(3) "Office" whether used with reference to the licensees, a subscriber, a lessee or any other person, includes any house, warehouse, factory, building, vessel or place occupied by the licensees, subscriber, lessee or other person.

(4) "Telephone" includes any apparatus by means of which any articulate sounds can be conveyed to a distance by the agency of electricity, galvanism or magnetism.

(5) "Telephone wire" includes any metallic connection between two Telephones or between one Telephone and a Telephone exchange.

(6) "Telephone exchange" means any contrivance, instrument, apparatus or appliance to which two or more "Telephone wires" may be attached, and which is used for the purpose of temporarily establishing from time to time, as occasion may require, a direct connection between any two of such Telephone wires, and includes a "central Telephone exchange" and a "district Telephone exchange."

(7) "Central Telephone exchange" means either the only Telephone exchange belonging to the Licensees within the limits specified in their license, or, if more than one Telephone exchange is established by the Licensees within those limits, the central or principal apparatus with which one or more district Telephone exchanges may be connected.

(8) "District Telephone exchange" means a Telephone exchange other than a central Telephone exchange with which two or more subscribers' offices are connected by means of Telephone wires, and which itself is connected by means of one or more Telephone wires with a central exchange or with another district exchange.

(9) "Open Telephone office" means any building or place in or to which may be contained or attached a Telephone which is connected by means of one or more Telephone wires with a Telephone exchange and which may be used by persons other than those hereinbefore described as "subscribers," for communication with subscribers, and may also be used by subscribers for communication with other subscribers.

(10) "Private Telephone wire" means a "Telephone wire" connecting the office of one person with the office of another person, or one office of a person with another office belonging to the same person, without being itself connected with a "Telephone exchange;" and

(11) A Telephone exchange shall not be deemed to have been "established" until not less than ten companies, firms or persons have severally paid to the Licensees a sum of money in respect of the use of the Licensees' exchange for a period of not less than twelve calendar months.

TELEPHONE EXCHANGE.

Telegram Subscription Rules.

Whereas a Telephone Exchange may, with the permission of the Director-General of Telegraphs in India, be connected by means of one or more Telephone wires with the central Government Telegraph office within the limits within which it has been established, to the intent that the subscribers may be enabled to communicate directly with that Telegraph office; in exercise of the powers conferred by sections 7 and 8 of the Indian Telegraph Act, 1876, the Governor General in Council is pleased to make the following rules prescribing the regulations, conditions and restrictions according to which all messages and signals communicated to a Government Telegraph office by the subscribers to a Telephone exchange connected with a Government Telegraph office, or received for transmission to such subscribers, shall be transmitted.

1. These rules may be called the Telegram Subscription Rules, 1884.

2. Any subscriber to a Telephone exchange connected as aforesaid with a Government Telegraph office shall be entitled to communicate direct with the Telegraph office by means of the Telephone exchange and the connecting Telephone wires on payment to the Director-General of Telegraphs in India (herein referred to as the Director-General) of a yearly sum of sixty rupees, which shall be paid in advance on the first day of January in each year:

Provided that, if a subscriber desires to institute his direct communication with the Telegraph office on any other date than the first day of January, he shall in respect of the then current year be required to pay in advance a proportionate part only of the said sum of sixty rupees.*

3. When a Telegram addressed to such a subscriber as aforesaid (herein referred to as a Telegram subscriber) is received at the Telegraph office, it shall at the discretion of the Director-General or his officers either be delivered in the manner provided in the "Rules and Tariff relating to the transmission of Telegraph Messages in India," made under the Indian Telegraph Act, 1876, and for the time being in force, or be transmitted to the Telegram subscriber by means of the Telephone exchange if it can be so transmitted with reasonable speed, and in that case the Telegram subscriber shall accept such transmission in place of the delivery of the Telegram in the manner provided by the aforesaid Rules and Tariff.

4. Telegrams received from a Telegram subscriber at the central Telegraph office by means of the Telephone exchange shall, at the option of the Telegram subscriber, be forwarded to their destination by the Government Telegraph, or be forwarded by post as ordinary letters, or, if the address of delivery is within a reasonable distance from the Telegraph office, by special messenger:

Provided that a Telegram subscriber shall not be entitled to transmit more than one Telegram at a time to the Telegraph office by means of the Telephone exchange, nor shall the Telephone exchange be used for the transmission of press messages.

5. A Telegram subscriber shall pay to the Director-General in respect of every such Telegram forwarded from the Telegraph office by Telegraph the same sum for transmission, Prepaid Replies, Postage, Registration and Express Charges (if any) as would be payable by the sender if the Telegram had been handed in at the central Telegraph office as an ordinary Telegram.

6. A Telegram subscriber shall pay to the Director-General in respect of every such Telegram forwarded from the Telegraph office by post as a letter the ordinary postage payable on the letter.

7. A Telegram subscriber shall pay to the Director-General in respect of every such Telegram delivered from the Telegraph office by special messenger a sum of two annas if the address of delivery is within the limits of the free ordinary delivery of Telegrams from the Telegraph office, and in all cases the same sum as would be payable for "Express Charges" in respect of an ordinary Telegram delivered from the Telegraph office at the same address.

8. All sums payable by a Telegram subscriber in respect of Telegrams forwarded as aforesaid from the Telegraph office shall be paid in advance by means of a deposit with the

* The annual payment of sixty rupees to the Director-General is to be in consideration of the services of the Telegraphist attending to the Telephone exchange connection in the central Telegraph office and of the other services to be rendered and expenses to be incurred by the Director-General.

Telegraph officer in charge of the Telegraph office, who shall not be required to forward any such Telegram unless the sum for the time being in his hands on account of the deposit is sufficient for the payment of the amount payable in respect of the Telegram.

9. All accounts in respect of Telegrams forwarded or delivered as aforesaid on behalf of a Telegram subscriber from the Telegraph office shall be settled monthly up to the first day of each calendar month.

10. A Telegram subscriber may pay the sum payable by him to the Director-General in accordance with Rule 2 to the Licensees of the Telephone exchange to which he is a subscriber, as the agents and on behalf of the Director-General, and the receipt of the Licensees shall be a good discharge for any sum so paid.

The said Licensees shall act as agents of the Director-General for the purpose aforesaid, and shall receive all sums which may in accordance with the said rule be tendered to them by the subscribers as such agents, and shall pay the same to the Director-General immediately on the receipt thereof or at such other times as may be agreed upon between the Director-General and the Licensees.

11. The Secretary of State in Council or the Director-General shall not be subject to any liability by reason or on account of any failure, delay or mistake in or about the transmission, receipt or delivery of any Telegram under these rules, whether arising from the default of the Licensees or of any officer of the Government Telegraph, or otherwise.

12. If any sum payable under Rule 2 or any other money which is for the time being due from a Telegram subscriber under these rules is in arrear or unpaid for twenty-one days after it ought to be paid, the Director-General may by notice in writing debar the subscriber from participating in the advantages of these rules from the date of the service of the notice:

Provided that the fact of a subscriber being debarred from participating in the advantages of these rules shall not affect the right of the Director-General to recover from the subscriber any money which may be in arrear and unpaid.

13. Any notice to be given by the Director-General under these rules may be signed by the Chief Officer of the Division of Telegraphs within which the Telephone exchange with which the subscriber's office is connected is situated, and may be served by sending it by post in a registered letter to the subscriber at his office.

TELEPHONE EXCHANGE.

Agency Subscription Rules:

WHEREAS a Telephone exchange may, with the permission of the Director-General of Telegraphs in India, be utilized as an agency through which subscribers' Telegrams intended for transmission or transmitted over the wires of the Government Telegraph Department may be received and delivered by the officers of that Department. In exercise of the powers conferred by sections 7 and 8 of the Indian Telegraph Act, 1876, the Governor General in Council is pleased to make the following rules prescribing the regulations, conditions and restrictions according to which all messages and signals received or deliverable through the agency of any such Telephone exchange shall be transmitted:—

1. These rules may be called the Agency Subscription Rules, 1884.

2. If a subscriber to a Telephone exchange desires to employ the Licensees of the Telephone exchange as his agents through whom his Telegrams intended for transmission or transmitted over the wires of the Government Telegraph Department may be received or delivered by the officers of that Department, he shall address the following form of request to the Director-General of Telegraphs in India (herein referred to as the Director-General):—

"I hereby request the Director-General of Telegraphs in India, until further notice, to deliver to the Telephone Exchange Company, Limited, at their central Telephone exchange situated in the town of for transmission to me by means of the Telephone exchange of that Company, all Telegrams address to me at that may be received by means of the central Government Telegraph office in that town, and to transmit all Telegrams received from the said Company at such Government Telegraph office as the Director-General may by order in writing appoint for transmission on my account; and I hereby agree to pay to the Director-General the sum of twelve rupees per annum in advance on the day of in each year for the registration of special instructions to the effect above-mentioned."

Signed .....

3. During the continuance of the period for which such a subscriber as aforesaid (herein referred to as an Agency subscriber) is registered at the Telegraph office as desirous of having his Telegrams delivered to, and received for transmission from, the Licensees of the Telephone exchange to which he is a subscriber, the Licensees—

(*a*) may receive messages transmitted to a Telephone attached to the exchange from the office of the subscriber and intended to be further transmitted on behalf of the subscriber by means of the Government Telegraphs, and

(*b*) may as the agents of the subscriber commit the messages to writing on appropriate messages forms to be provided by the Director-General, and

(*c*) may deliver the forms by messenger at such Government Telegraph office as the Director-General may by order in writing appoint for that purpose, to the intent that the forms may be transmitted from the office as Telegrams.

4. All charges which under the "Rules and Tariff relating to the transmission of Telegraph messages in India" made under the Indian Telegraph Act, 1876, and for the time being in force, should be paid by the sender of a Telegram shall be paid by Telegraph stamps attached to the message form on which any such message as aforesaid is written before the delivery of the message form at the Telegraph office.

5. (*a*) On the delivery by the Director-General at the office of the Licensees of a Telegram addressed to any Agency subscriber, the Licensees may transmit the Telegram to the subscriber's office by means of their Telephone exchange.

(*b*) The time at which the transmission takes place shall be entered on the message form on which the Telegram was delivered at the office of the Licensees.

(*c*) All message forms delivered by the Director-General at the office of the Licensees on any day shall at the end of the same day be returned by the Licensees to the central Telegraph office in the town in the order in which they were delivered at the office of the Licensees.

6. The Licensees shall not retain a copy of any telegram transmitted by or to any of their subscribers under the operation of these Rules.

7. In case of any breach, non-performance or non-observance by or on the part of the Licensees of any of the stipulations and conditions hereinbefore contained or contained in the aforesaid Rules and Tariff relating to the transmission of Telegraph messages in India, the Director-General may by notice in writing revoke and determine the permission granted under these Rules as from the date of the service of the notice.

8. Any notice to be given by the Director-General under these Rules may be signed by the Chief Officer of the Division of the Telegraphs within which the Telephone exchange of the Licensees is situated, and may be served by sending the same by post in a registered letter to the Licensees at their office.

ORDER.—Ordered, that copies of the Resolution be forwarded to the Secretary of State, with reference to His Lordship's Despatch No. 26, dated 13th September 1883; to the Departments of the Government of India and to the Local Governments and Administrations noted in the margin for information and guidance; also to the Director-General of Telegraphs for information and guidance and communication to the Agents of the several Telephone companies in India, and to the Publisher of the *Gazette of India*, for publication in the Gazette Supplement.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. 94 Ex.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Museums and Exhibitions), under date Simla, the 6th August 1884.

RESOLUTION.

Read the following:—

No. 201, dated Calcutta, the 16th July 1884.

From—The Acting Consul for Austria and Hungary,

To—The Secretary to the Government of India, Foreign Department.

ADVERTING to my official intimation anent the *General National Exhibition* to be held at *Budapest* (Hungary) in 1885, namely, No. 68, dated 5th March and No. 102, dated 26th March, I have to-day the honor to transmit under cover a translation of a further communication received from the Imperial and Royal Austro-Hungarian Minister for Foreign Affairs, No. $\frac{2908}{9}$, dated Vienna, 1st June, relative to concessions granted to intending foreign exhibitors in the charges for railway fare and sea transport, the latter on the part of the Austro-Hungarian Lloyds Steam Navigation Company and Hungarian Steam-ship Company "*Adria*."

TRANSLATION.

IN continuation of the circular issued from this side, dated 5th February, as per No. $\frac{563}{9}$, concerning the *Hungarian National Exhibition* to be held next Year at *Budapest*, the Imperial and Royal Ministry for Foreign Affairs have the honor to acquaint the Imperial and Royal Mission, for intimation to the Imperial Indian Government, that the concessions in freight granted on the part of the railway and steam-ship companies, on behalf of this undertaking, consist in the following:—

A.—RAILWAYS.

1. The Austrian and Hungarian lines for *small parcels* for transport *inward* as well as *return* transport, francs 16*xr.* Austrian Vaente for each 100 kilograms and per kilomètre is charged as uniform rate, and to this is still to be added on each line a manipulation tax of francs 2*xr.* per 100 kilograms and 3 per cent. for transport duty.

With *wagon loads* for transport *inward* as well as *return* transport francs 13*xr.* as uniform rate per kilomètre is charged for each 100 kilograms according to actual weight per wagon, however, at least for 8,000 kilograms.

As with such wagon loads no manipulation tax has to be paid, the loading and unloading of goods has to be effected at the expense of the sender, respectively exhibitor.

The minimum amount of freight for each wagon-load is fixed as francs 3 *a. v.*, which minimum amount is even to be paid if, according to the freight rates granted for smaller quantities, a lower amount of freight should result.

Those goods of large dimensions entered as return goods are despatched per 100 kilograms and kilomètres at the uniform rate of freight of francs 32*xr.* with goods of larger dimensions entered in wagon-loads, and if the rate is paid for per at least 8,000 kilograms, only francs 13*xr.* as uniform rate will be charged per 100 kilograms and kilomètres.

For the return-transport those exhibition objects partake of this advantage only in case of their being unsold during the exhibition and destined to be returned to the original station of despatch.

These freight advantages count only up to the railway stations at Budapest.

For the transport of the exhibition objects from these railway stations to the exhibition grounds on the eventually to be laid rails a moderate special rate will be charged according to local circumstances.

2. For the transport of the exhibition goods to Budapest the full rate of freight is charged according to tariff, where against the return-transport of goods which remained unsold at the exhibition will be granted *freight-free* on the same route on the part of the following lines:—

In Germany.

The Prussian State Lines.
„ Nadhabaut-German Railway.
„ Werra Line.
„ Hessen-Ludwig Line.
„ Main-Neckar Railway.
„ Netherland-Rhinish Railway.

In Holland.

The Dutch Railway Company.

In Russia.

The Line Merko-Brest.
„ „ Orel Witelsk.
„ „ Dimoborg.

In France.

The Compagnie du Chemin de Fer du Nord.

B.—Donau Steam-ship Transport.

The Imperial and Royal first privileged Donau Steam-ship Company have granted for all exhibition goods, the transport of which is effected by the ships of the Company, a reduction in freight of 50 per cent.

C.—Relative to Sea transport.

The Hungarian Steam-ship Company "*Adria*" having granted to those exhibitors who ship their goods on board the vessels of the Company from the seaports:—

Bordeaux,
Rouen,
Hans,
Dublin,
Glasgow,
Leith, and
Middlesborough,

a reduction of 25 per cent. on the existing ruling rates of freight.

D.—Provisional Exemption from Duty.

The Royal Hungarian Ministry for Finance have, *vide* Rescrifr, *dated 18th February 1884*, No. 1569, granted provisional exemption from duty for all foreign goods arriving for the *Budapest National Exhibition of 1885* up to their being transported back at the latter end of March 1886, and entrusted the Royal Hungarian Chief Custom House in Budapest with the pending manipulation of duty, according to Government procedure.

The Hungarian Ministry of Finance have further ruled that all Custom Houses of the Austro-Hungarian Custom territory are to direct all such goods on arrival for Custom House treatment untouched and unopened to the Royal Chief Custom House at Budapest.

By way of facilitating this procedure, it is at the same time permitted that the goods arriving from abroad are to be treated by the official deputed by the Chief Custom House in such a manner that this official may fill up the *Goods* and *Contents Sheets* arriving with the goods with the descriptions according to tariff and revision of the goods, and thus complete the duty manipulation on the basis of these thus completed goods sheets.

Furthermore, it has still been permitted by the Hungarian Ministry for Finance that with these exhibition goods, instead of the prescribed security in cash, the solvability of the National Exhibition Committee will be accepted as basis of the Government procedure.

E.—The Return of Goods free of Duty.

Of all goods sent for exhibition to Budapest, but having remained unsold are to be transported back to their place of despatch, has thus far been granted by the German, Dutch, English, Italian, Belgian, French, and North American Governments.

Finally one, is an exception, concession in freight held in prospective by the *Austro-Hungarian Lloyd.*

Vienna, 1st June 1884.

No. 2813I., dated Simla, the 24th July 1884.

Endorsed by Foreign Department.

TRANSFERRED to the Revenue and Agricultural Department for disposal, in continuation of the endorsement from this office No. 1255I., dated the 12th April 1884.

No. 107 Met.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorological),—dated Simla, the 14th August 1884.

READ—

Summary of the Weather Reports for July 1884.

The weather of July has been, on the whole, of the normal monsoon type.

In the Punjab (excepting the Indus Valley), in the North-Western Provinces (except at Jhansi, Allahabad, and Benares), and in Rajputana, barometric readings have been generally above the average, while in all other parts of India, with a few local exceptions, they have been below it. During the earlier portion of the month, a shoulder of high pressure, extending northward from Guzerat, occupied the greater part of Rajputana, the Punjab and North-Western Provinces, and was probably connected with the deficiency of the rainfall in that region, presently to be noticed. Two cyclonic storms of the usual monsoon type traversed the country during the month. The first was developed on the 8th and 9th over the head of the Bay of Bengal, and travelled thence to the west or west-north-west. Its centre lay near False Point on the 10th, near Cuttack on the 11th, near Jubbulpore on the 12th, near Deesa on the 13th, and near Hyderabad (Sind) on the 14th. The second storm was also developed over the head of the Bay, the first notice of its appearance being given on the 15th. It then lay to the eastward of False Point, whence it travelled to Gopalpore on the 16th, to Raipur on the 17th, and to Seoni on the 18th, after which date it disappeared.

The rainfall reports show that, in the earlier portions of the month, the area within which the rains were fully established was somewhat restricted. Over the greater part of the plains of the Punjab, as well as in Rajputana, Sind and Guzerat, rain of any consequence was almost entirely wanting during the first fortnight; as was also the case in some parts of the Carnatic, in Madura, Mysore, the Ceded districts of the Madras Presidency, and the Deccan. By the 16th, however, a change set in. Rain-bearing winds spread suddenly over Guzerat, and subsequently extended to Rajputana and the Punjab. From the 20th to the end of the month, the rains were general and abundant, with the exception of the Madras Presidency, at the more southern and central stations of which the weather was fine and the rainfall slight or altogether absent. The heaviest falls of rain were—7 inches at Naini Tal and Raipur on the 1st; 7 inches at Moulmein on the 10th; 8 inches at Bombay on the 14th; 6 inches at Mount Abu on the 21st; 7 inches at Jubbulpore on the 23rd; 8 inches at Pachmarhi and 7 inches at Akyab on the 24th; 6 inches at Rajkot on the 27th; 6 inches (according to some reports 14 inches) at Umballa on 30th; and 10 inches at Mount Abu on the 31st. Notwithstanding these large local falls, the general rainfall of the country has been below the average for July. Such is the case in the north of the Punjab and at Simla and Delhi; in the North-Western Provinces, with the single exception of the hill station of Naini Tal; in Assam everywhere; and in Bengal the only stations showing an excess are Darjeeling, Purneah, and Saugor Island. In Central India and Rajputana, at the west coast stations (excepting Bombay and Goa), and over the whole of Madras, also, the rain has been below the average, and only in Burma, the Central Provinces, the Berars, Guzerat, and the Central Punjab has it been above it. At Raipur more than 25, and at Jubbulpore more than 18, inches above the average has fallen.

Owing to the fine weather during the first half of the month, the temperature was rather high in the Punjab, Rajputana, and Sind. At Peshawar 114° was registered on the 2nd, and at Jacobabad 113° on the 3rd. A rapid fall occurred with the setting in of the rains, but the high temperatures of the first fortnight were not entirely compensated by the subsequent low readings, and the monthly mean in the north and west of the Punjab was somewhat above the average, though in most other parts of the country it was a little below it.

The variations in the amount of humidity in the atmosphere agree approximately with the distribution of rainfall, the principal regions of excessive humidity being the Central Provinces and Guzerat, where also the rainfall was above the average.

The following table summarises the rainfall returns under the divisions adopted in the previous summaries:—

Districts.	Average rainfall in July.	Difference of the rainfall in July 1884 from average July fall.
	Inches.	Inches.
North and West Punjab	5·05	—0·33
South Punjab, North-Western Provinces, and Behar	13·43	—3·27
Assam	17·28	—6·09
East Bengal	17·68	—6·57
Lower Bengal and Orissa	13·71	—0·41
Central Provinces	16·37	+7·34
Rajputana, Central India, and Berars ...	10·04	—0·52
Sind, Guzerat	6·32	+2·98
Bombay	19·23	—1·01
Madras	7·26	—2·33
Mysore	23·65	—8·17
Ceylon	5·63	—3·47
Burma	27·83	+1·35

W. L. DALLAS,
Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the above Summary be printed in the Supplement to the *Gazette of India*.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th AUGUST 1884.

GENERAL REMARKS.—In the Madras Presidency the rainfall for the week under report has been heavier than that recorded for some time past, and prospects have been improved. Rain has fallen throughout Mysore, and there is no longer anxiety for the crops. In South Coorg more rain is wanted. Rain fell throughout the Bombay Presidency, but more is still needed in parts of the Deccan and Southern Mahratta Country. In the Berars and Hyderabad the rainfall has been slight, but the crops continue in good condition. There was good rain in most of the Central India States, particularly in Nowgong, where 23 inches fell. In the Rajputana States the rainfall has been generally light, but the prospects of the crops both in these and in the Central India States are good, save in Neemuch and Jeypore. Heavy rain is still reported from the Central Provinces and is proving injurious to the crops; a break is greatly needed. Good rain has fallen everywhere in the North-Western Provinces and Oudh; in the Jhansi district some 50 houses have been washed away by the overflowing of the Dhassai river. In the Punjab rain fell in seven districts; more is wanted in Peshawar. Good rain has fallen in Assam, but in Bengal it was again insufficient and has affected the prospects of the standing crops as well as retarded transplanting operations.

The last report of the Meteorological Department, dated the 14th instant, states that rain has fallen over Burma, Assam, Northern Bengal, the North-Western Provinces and in the north of the Central Provinces, as well as along the west coast and in Madras.

Harvesting continues, with poor outturns, in four districts of the Madras Presidency; the recent rains have revived the standing crops and sowings are also being vigorously pushed on. *Kharif* sowings are retarded in places in the Bombay Presidency for want of rain; elsewhere prospects are favourable. In the Punjab, North-Western Provinces and Oudh, the Central India States, and the Berars the *kharif* crops are in good condition. In the Central Provinces *juari* and cotton have been injured in places by the heavy rain which also retarded weeding. In Bengal early rice and jute are being harvested, with an estimated average outturn. In Assam the reaping of *aus* and the transplanting of *sali* crops continue.

Cholera and small-pox are generally prevalent in all provinces, but the public health is on the whole good.

In Bengal the price of rice is rising slightly; elsewhere prices are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Aug. 13th)		
Bellary ...	·87 (average)	More rain needed. 26 deaths from cholera.
Kurnool ...	1·49 (average)	More rain wanted. Standing young crops much benefited by recent rain; prospects improving. Small-pox and cattle-disease in parts.
Ganjam ...	·66 (average)	Cholera slight in parts.
Kistna ...	1·49 (average)	River rising, 14·35 feet over anicut. Standing crops generally good. Small-pox, fever, and cattle-disease in places; 24 deaths from cholera.
Chingleput (Madras) ...	·85 (average)	Standing crops fair in all taluks, but in want of rain in parts; harvest paddy, yield half the average. Small-pox prevalent; 40 deaths from cholera.
Coimbatore ...	·41 (average)	Standing crops suffering from want of rain in 8 taluks; harvest dry crops, outturn below average. Fever and small-pox in parts.
Tanjore ...	·77 (average)	More rain wanted in parts. Standing crops generally good. Rivers rising 2 to 9 feet. Harvest paddy in parts, outturn below average. 579 deaths from cholera, which is abating.
Madura ...	·30 (average)	Standing crops fading from want of rain; harvest *cholum* in one taluk, yield below average. 8 deaths from cholera.
Malabar ...	5·40 (average)	Rain nearly sufficient for standing crops and first crop of paddy fair. Small-pox slight in 8 taluks, fever in two; 7 deaths from cholera.
Travancore ...	1·31	Standing crops of paddy ripe in parts. Fever generally prevalent; small-pox in parts.
		General Remarks.—General prospects good in Northern Sircars, improving in other parts. Standing crops reviving under the rains of the week, extent cultivated to July much below normal, but sowings now proceeding vigorously in most districts.
Bombay—(Aug. 13th)		
Karachi ...	No rain; average of 6 stations, 0·68.	River at Kotri on 11th, 17 feet 3 inches against 15 feet 5 inches on corresponding date last year. Transplanting generally over. Rain in 3 talukas. Cattle-disease in 4 talukas; worms in 2 talukas; rats in Shahbandar and Mirpur Botoro; small-pox in 4 villages in the districts, 2 fresh cases, both recovering. Prices—wheat, red rice, and *bajri* in Karachi 24, 30, 32, in Manjhand 28 24, and 38, in Tatta 26, 28, and 32, and in Jati 20, 30, and 32, pounds per rupee, respectively.
Hyderabad ...	Rain at Kandiaro on 3rd and 4th August aggregating 0·90.	River at Kotri on 11th, 17 feet 3 inches against 15 feet 5 inches on corresponding date last year. Sowing of *bajri*, *til*, and *mung* continues; crops flourishing in taluka Sakrand; slight damage by worms reported. Small-pox in 5, fever in 2, and cattle-disease in 2 talukas. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	1·12	Total rainfall 23·80. Crops healthy. Cholera in the city, 3 cases fatal, in Parantij 7 cases, of which 3 fatal. Wheat 29 and *bajri* 31 pounds per rupee.
Baroda ...	0·67	Total rainfall 25·92. Cholera continues in city, in Baroda there has been 9 deaths. Sowing operations in progress, but retarded in Korinar owing to excessive rain. Prices—*bajri* 27 and rice 21 pounds per rupee.
Surat ...	0·11; maximum fall in Pardi, 1·07; minimum in Olpbad, 0·06.	Total rainfall 20·16. Sowing nearly completed. *Juari* 30 and *nagli* 40 pounds per rupee.
Nasik ...	.....	Rain wanted in parts. Crops in good condition; sowing completed in places. Public health good. Wheat 37, *bajri* 31, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Slight rain on 5 days, total of week 1·13.	Total rainfall to date 40·70, being 10·14 below average. Abnormal temperature 2° warm; monsoon wind weak.
Poona ...	Rain in Mával and Junnar, maximum 1·88 in Khadkala, minimum in Junnar, 1·30; slight showers in Indapur, Khed, Purandhar, and Haveli; none in Bhimthadi and Sirur.	More rain wanted eastward. Sowing nearly completed, except in a few villages in Indapur, where it is not begun. *Bajri* and *juari* 33 pounds per rupee; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	No rain in Shrigonda, Karjat, Rahuri, and Akola; very slight in the other talukas.	More rain is urgently wanted. *Kharif* crops sown in Shrigonda are withering for want of rain; in Parner and in Akola they are in fair condition; in other talukas they are likely to suffer if the scarcity of rain continues. *Bajri*—maximum 48 pounds in Sangamner, minimum 30 in Kopargaon; *juari*—maximum 60 in Sangamner, minimum 33 in Karjat.
Sholapur ...	1·13; Barsi, ·05; Madha, ·07; Karmala, ·01; Pandharpur, ·06; and Sangola and Malsiras, no rain.	*Juari* 37 pounds 31 tolas and *bajri* 37 pounds 32 tolas per rupee. Weather sultry and heavy. Clouds giving hope of rain which is much needed.
Dharwar ...	Maximum at Kod, 3·0; at Hangal, 2·41; at Kalghatgi, Bankápur, Gadag, and Hubli nearly 1·40; at Ron, Ranibennur, Karajgi and Mugud, 1·20; at Dharwar, ·58; at Mugud, ·22; at Navalgund and Margund, ·01.	In Navalgund, Nargund, and Gadag talukas sowing of early crops retarded for want of rain; seeds being sown in dry ground in Ron taluka; rice and garden crops are good. Cholera in all talukas. Average prices—*juari* 59 and rice 32 pounds per rupee.
Kanara ...	Karwar, 3·55; Kumpta, 8·05; Sirsi, 11·94 and Haliyal, 5·11.	Total rainfall 57·08. Common rice in Karwar 12 seers, district average 15 seers per rupee. Small-pox in Kumpta, 3 deaths; in Haliyal 1 and in Mugud 1; 3 cholera cases in Mugud, of which 1 fatal.
Rajkot ...	·01	Total rainfall 24·30. General health good; fever and diarrhœa still prevalent. Crops in good condition. *Bajri* 33 and *juari* 42 pounds per rupee.
		General Remarks.—Rain throughout the presidency. Prospects generally good. More rain still needed in parts of the Deccan and Southern Mahratta Country. Crops withering in a few places in Ahmednagar and Kaladgi, and sowing retarded in parts of Dharwar and Belgaum for want of sufficient rain; crops slightly damaged by worms in parts of Hyderabad. Cholera and small-pox in parts of ten districts; fever and cattle-disease in a few places.
Bengal—(August 13th)		
Chittagong ...	3·21	Weather hot. More rain wanted. Prospects of crops still fair; transplanting of *amun* commenced. Prices stationary. Cholera and cattle-disease continue.
Dacca ...	1·09	Early paddy and jute being cut. Damage is apprehended to paddy crop, owing to unusual fall of river.
24-Pergunnahs (Calcutta)	2·67	Early paddy being harvested with about 12 annas outturn; transplanting of *amun* going on. Rain still insufficient in certain places. Prices of common rice almost stationary. Cattle-disease almost abating; fever prevalent in Bussirhat. Rivers rising.
Moorshedabad ...	·07	Weather hot and dry. *Amun* suffering much from want of rain. Outlook gloomy. Public health good.
Rajshahye ...	1·0	Harvesting of *aus* continues. Transplanting of *amun* going on. Prospects good. Public health good.
Burdwan ...	3·72	Rain still insufficient. Prospects of crops still doubtful.
Rungpore ...	5·68	Weather cloudy. Harvesting of *aus* and jute continues. Malarious fever prevailing. Prices of rice from Rs. 3¼ to 4½ per maund.
Bhagalpur ...	·05	Want of rain beginning to be badly felt all over the district, both for *bhadoi* crops and paddy; prospects gloomy. Rice 12 seers 10 chittacks per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	·14	Crops still suffering from want of sufficient rain; farming operations impeded in consequence. Common rice 14 seers per rupee. Health fair. Rivers rising
Patna ...	1·45	More rain wanted both for *bhadoi* and transplanting of paddy, which has not yet commenced. Prices of grains rising. Cholera and fever in interior.
Durbhunga ...	·61	*Bhadoi* crops generally withering; transplanting of paddy stopped. Prices gradually rising. Public health good.
Hazaribagh ..	3·39	Weather variable. Prospects of *bhadoi* crops good; transplanting of paddy going on in lowlands, but more rain wanted for transplanting on highlands. Prices of food-grains continue high. Cholera and small-pox reported from certain places, otherwise public health good.
Cuttack ...	1·40	Weather seasonable. Weeding of *sarad* progressing; *beali* in ear and in some place ripening. Price of rice almost stationary. Public health generally good; a few cases of cholera and cattle-disease reported from interior.
		General Remarks.—The rainfall during the week was again insufficient almost throughout the province, and has affected prospects of crops and retarded transplanting; harvesting of early paddy and jute has commenced in some districts, and the outturn is estimated generally at from 10 annas to 12 annas. Price of rice rising slightly. Public health generally good, though malarious fever is prevalent in Rungpur and a few cases of cholera and small-pox reported from 4 or 5 districts.
N. W. Provinces and Oudh—		
Benares (Aug. 11th)	3·0	*Kharif* crops, including late rice, improved by rain. Cholera and fever linger. Prices rising slightly.
Allahabad („ „)	Abundant rain over the district.	Young *kharif* crops in splendid condition. Prospects excellent in every way. Public health very good in city and district. Prices nearly stationary.
Gorakhpur („ 9th)	5·6 at Sadr; good rain everywhere.	Crops good. Some sporadic cholera in east.
Jhansi („ 12th)	Heavy rain during last week.	By flooding of river Dhasan, 43 houses in Mougah and 9 huts in Khera have been washed away. Crops looking well. Prices falling. 69 deaths from cholera. Health of cattle good.
Agra („ 9th)	From ·9 to 3·6; rain in all parganas.	Sowings continue. Standing crops in good condition. Cholera continues in one or two circles and has again appeared in Agra city. Prices steady.
Bareilly („ 11th)	Ample rain	Crops in excellent condition. Market very slightly falling. General health good.
Meerut („ „)	Good rain all over district on 10th instant.	Crops flourishing. Health good, but the so-called cholera in Sarawan still continues. Prices steady.
Kumaon („ „)	Very heavy rain since the 6th all over district.	Prospects good. Prices steady. Health fair. Cattle-disease still prevalent.
Lucknow („ „)	1·0 to 2·1 during the week.	Weather cloudy. East wind. *Bajri* and *moth* and *mash* are being sown. More rain wanted for the rice and *juari* crops. Condition both of men and cattle good. Markets well supplied. Prices stationary.
Partabgarh („ 8th)	2·0 (average for the district).	Crops coming on well. *Makka* almost ripe. Prices stationary. Small-pox continues in parts.
Sitapur („ 11th)	Fair rain has fallen in all tahsils, but Sidhauli, where ·3 fell.	Winds variable. Crops are doing well. More of the *sawan* crops have been lost.
Fyzabad („ „)	1·0 to 1·7 during the week.	*Kharif* crops coming up well. Health of men and condition of cattle good. Markets well stocked.
Rae Bareli („ 9th)	Fair amount of rain	Rain unevenly distributed. Crops look well in some places. Irrigation from tanks and *jhils* going on. General health good. Prices steady.
Cawnpore („ 11th)	Good rain throughout the district.	Prospects favourable. Prices steady. Health of people and condition of cattle good.
Farukhabad („ „)	Rain in all tahsils, varying from 2·5 to 4·8.	Cattle-disease in Akbarpur has disappeared. Prospects favourable. Health good. Prices remain stationary.
		General Remarks.—Good rain has fallen everywhere, and crop prospects are now favourable. Markets are well supplied, and prices remain on the whole stationary. Slight cholera continues in a few districts, but the general health of the people and the condition of cattle are good.
Punjab—(Aug. 13th)		
Delhi ...	8·20	*Kharif* prosperous. Prices almost stationary.
Hissar ...	.....	Health good. Crops flourishing. Prices falling.
Umballa ...	9·20	Health good. *Kharif* crops thriving, yield expected to be good. Prices stationary.
Jullundur ...	·10	Five cases of cholera in and near Jullundur, of which 3 ended fatally. *Kharif* sowing progressing.
Amritsar ...	4·0	Health good. Prices fluctuating.
Sialkot ...	Rain at Riah and Pasrur tahsils.	Health and prospects good. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Ferozepore ...	.....	Health and state of crops good. Prices of wheat and *juari* falling and of other food grains stationary.
Lahore ...	.....	Health good. Prices steady.
Rawalpindi ...	1·80	Health good. Prices slightly rising.
Mooltan ...	.....	Health and crop prospects good. Prices stationary.
Dera Ismail Khan ...	.....	Health and crop prospects good. Prices stationary.
Peshawar ...	·19	More rain is wanted. Health good. *Kharif* sowing completed. Prices of wheat and barley rising owing to export; prices of other food-grains stationary.
		General Remarks.—Rain in many districts. Slight cholera in and near Jullundur, elsewhere the health of the province is generally good. Crop prospects good, and prices of food-grains steady.
Central Provinces—(August 13th)		
Nagpur ...	3·60	Rain continues heavy. *Juari* damaged and full area not sown. Fever prevalent. Prices steady.
Jubbulpore ...	3·35	Weather cloudy; break urgently wanted. *Dhan* and cotton sowings completed, other sowings continue; weeding in progress. Crops on first class soil poor. Prices steady.
Saugor (August 12th) ...	4·78	Continued rain has injured *juari* and cotton in places, weeding also backward. Few cases of small-pox. Prices steady.
Seoni ...	2·52	Rain continuous; break urgently needed. Cattle-disease increasing. Prices stationary.
Hoshangabad ...	6·34	Weather cloudy and rainy; break much wanted. Wheat 21 and rice 9 seers per rupee.
Khandwa ...	.....	Weather cloudy. Weeding commenced; cotton in Burhanpur slightly damaged by excessive moisture; prospects good. Wheat 21¼, rice 14, and *juari* 26¼ seers per rupee.
Raipur ...	2·27	Occasional breaks have been beneficial. Sowing of *kodon* and cotton retarded by heavy rain. Rice 23 and wheat 28 seers per rupee. Health good.
Sambalpur ...	2·12	Weather seasonable. Prospects favourable. Fever prevalent. Common rice 25¼ seers per rupee.
		General Remarks.—Continuous rain is doing injury to crops and preventing weeding; break much needed. Prices steady. Health good.
British Burma—(August 9th)		
Akyab ...	2·70	Total rainfall 116·83. Some cholera and small-pox in districts; cattle-disease prevalent in four townships.
Rangoon ...	4·05	Total rainfall 58·93. Two cases of cholera in town.
Bassein ...	4·0	Total rainfall 55·25. Slight small-pox and cholera in one circle; some cattle-disease in three townships.
Amherst (Moulmein) ...	9·11	Total rainfall 107·16.
Toungoo ...	1·59	Total rainfall 45·59.
Kyouk-phyoo ...	7·71	Total rainfall 130·29. A little cholera in one village.
Sandoway ...	8·25	Total rainfall 136·47. Slight disease among plough cattle.
Hanthawaddy ...	.....	Ploughing and sowing progressing.
Pegu (August 9th)	7·59	Total rainfall 68·72. Diarrhœa and dysentery prevalent. Agricultural prospects better than last year.
Tharrawaddy ...	4·10	Total rainfall 64·65. Some cholera in district; a few cases of cattle-disease.
Prome ...	0·45	Total rainfall 26·87. Slight cholera in town and district; slight small-pox; cattle-disease in two townships.
Thonegwa ...	3·12	Total rainfall 58·31. Slight small-pox and cholera in one township; some cattle-disease.
Henzada ...	3·93	Total rainfall 57·56. Cholera prevalent in town and district; some cattle-disease.
Thayetmyo ...	0·26	Total rainfall 20·62. Cholera reported prevalent in one township; slight small-pox and cholera in town.
Shwaygyin ...	4·0	Total rainfall 72·7. Slight cattle-disease in one circle.
Tavoy (August 2nd)	9·04	Total rainfall 90·38.
„ („ 9th)	12·9	Total rainfall 103·28. Slight small-pox.
Mergui („ 2nd)	9·80	Total rainfall 82·08.
		General Remarks.—Cholera and small-pox abating, public health and health of cattle generally good. Ploughing and sowing progressing. Rainfall in most places normal.
Assam—(August 13th)		
Gauhati ...	3·78	Weather hot. More rain much wanted for *sali* cultivation; prospects of tea not good; sugarcane doing well. Fever very prevalent.
Sylhet ...	9·29	More rain required.
Cachar ...	4·99	Weather warm. Reaping of *aus* and transplanting of *sali* crops continue. Common rice 15½ seers per rupee. Prospects of tea good. Health good.
Dibrugarh ...	3·31	Weather seasonable. Transplanting of *sali dhan* progressing; prospects of *ahu* crops good; tea doing well. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(August 13th)		
Bangalore ...	·28	Standing crops in fairly good condition. Ploughing and sowing operations in progress.
Mysore ...	·24; Kolar, 1·41; Tumkur, 1·56; Shimoga, 3·25; Kadur, 2·40.	Crops failing for want of more rain; elsewhere in the province prospects have improved, owing to general rainfall. Prices show a tendency to fall. Public health good.
Mercara ...	4·11	More rain needed in South Coorg for transplanting rice. Labour in abundance.
Berar & Hyderabad—(August 13th)		
Amraoti ...	·50	Weather clear. *Kharif* crops in good condition. Weeding commenced. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	·39	Crops in good condition. Weeding operations commenced.
Hyderabad ...	1·40 (average)	Total rainfall from 1st January 19·25. *Rabi* and *kharif* crops prospering. No sickness. Prices—wheat 14¾, coarse rice 10½, white *juari* 16½, yellow *juari* 19½, and *tur* 19 seers per current sicca rupee.
Central India States—(August 13th)		
Indore ...	0·3	Total rainfall 19·21. Weather seasonable. Agricultural prospects favourable. Health good.
Morar (Gwalior) ...	4·53	Total rainfall 13·45. Cholera abating.
Sutna ...	3·75	Health and prospects good.
Neemuch ...	*Nil*	Total rainfall 8·62. Rain is much wanted now; water in the river and wells very low. Cholera abating; public health otherwise good. Prices of food-grains falling.
Goona ...	7·11	Total rainfall 24·47. Health and prospects good.
Agar ...	0·1	Prospects good. Cholera on the decrease.
Sehore ...	2·99	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	23·52	Total rainfall 47·80. *Kharif* prospects good. Weather seasonable. Public health good.
Malpur (Bhopawar) ...	*Nil*	Total rainfall 19·75. Crops and public health good.
Rajputana—(August 13th)		
Abu (Aug. 13th)	1·61; rain during the whole week.	Weather very cloudy and windy; break needed.
Sirohi („ 10th)	No rain during the week.	Condition of tanks, wells, health, and crops good. Weather cloudy and cool. More rain wanted.
Marwar („ 8th)	·10	Five months' water in Jodhpore city tanks. Health good. Crops thriving. Weather cloudy, but little rain. No need of rain at present. Prices stationary.
Meywar („ 10th)	No rain during the week.	State of tanks, wells, and health good. Crop prospects very good. Weather seasonable.
Harowti („ 9th)	Deolee, ·03; Tonk, ·22; Kotah, ·03.	Weather cloudy and close; more rain required. Two fatal cases of choleraic diarrhœa in Tonk, otherwise health good.
Jhallawar („ 8th)	·49	Weather cloudy. Health and prospects good.
Ajmere („ 12th)	No rain	Break in the rains. Prospects and health good.
Jeypore („ „)	·13	Rain much needed. Occasional cases of cholera. Prices stationary.
Ulwur („ „)	·64 (average)	Prices falling. Health good.
Nepal—(Aug. 7th)		
Katmandu ...	1·96	Weather slightly cooler. Prospects fair. More rain needed.

E. C. BUCK,
Secy. to the Govt. of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

№ 34.] CALCUTTA, SATURDAY, AUGUST 23, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF [illegible] *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

* Mandua.

(*a*) Wheat, jowar, and salt (wholesale) rising. (*b*) Gram falling; jowar rising. (*c*) Gram falling.
(*d*) Wheat, barley, rice, bajra, jowar and gram falling. The great fall in bajra is due to the harvest prospect being improved in consequence of good rainfall.
(*e*) Barley, bajra, jowar, gram and salt falling. (*f*) Wheat, barley, rice and gram falling. (*g*) Wheat, barley, bajra and gram falling; maize and gur rising.
(*h*) Barley, bajra, jowar, gram and maize falling. (*i*) Rice, bajra, jowar and salt (wholesale) rising; gram falling.
(*j*) Barley and jowar rising; wheat, rice, gram, maize, gur and salt (wholesale) falling. (*k*) Wheat and salt (retail) rising; barley, jowar, gram and maize falling.
(*l*) Wheat falling.

PRICES CURRENT OF FOOD-GRAINS THROUGHOUT INDIA FOR THE 2nd HALF OF JULY 1884 —*continued.*

† For 15 days.

G. F. E. S. NEILL, *Major, M.S.C.,*
Under-Secy. to the Govt. of Bengal,
P. W. Department.

The 29th July 1884.

* For 11 days.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20th AUGUST 1884.

GENERAL REMARKS.—Rain fell in varying quantities in all districts of the Madras Presidency, and, except in a few places where the drought continues, prospects have much improved. In Mysore there has been very little rain again, and the condition of the standing crops is critical; sowings have also been retarded owing to the deficiency of rain. In Coorg there has been a fair amount of rain, and prospects are on the whole good. In the Bombay Presidency moderate showers fell in most districts, but the rainfall is insufficient in parts of the Deccan and Southern Mahratta Country, where, in some places, the young crops are suffering from drought. In the Berars and Hyderabad the rainfall has been slight, but the crops are doing well. There was rain generally throughout the Central India States, but more is wanted in several places. In Sutna over 13 inches fell during the week, and the town of Rewah was flooded and sustained considerable damage. In Nowgong also the total rainfall has been very great. In the Rajputana States the rainfall of the week under report was slight, and more is wanted in Sirohi, Harowti, Ajmere, Jeypore, and Ulwur. In the Central Provinces the rainfall has not been so heavy as that hitherto recorded; there have been occasional breaks, allowing weeding and ploughing, but a longer break is still required. Good rain has fallen in all districts of the North-Western Provinces and Oudh, and crop prospects are generally excellent. In the Punjab there was slight rain in a few districts, but prospects continue good. There was heavy rain in the Assam districts, over 18 inches being registered at Sylhet. In Bengal the rainfall was heavier than that of last week, and the prospects of the crops have been improved in places, and transplanting has been resumed; on the whole, however, prospects are not satisfactory, and more rain would be beneficial.

The last report of the Meteorological Department, dated the 21st instant, states that rain has generally fallen throughout the Punjab, the North-Western and Central Provinces, Central India, Burma, and along the Western Coast. In Bengal and Madras the rain has been light and partial; in Rajputana it has fallen only at Jeypore and Mount Abu; while in Sind, Guzerat, and the Bombay Deccan the only station reporting rain is Ahmedabad.

Agricultural operations remain for the most part unchanged. Harvesting continues in Madras. *Kharif* sowings have been completed in the Bombay Presidency, and are still in progress in the Punjab. In the Central Provinces preparations for *rabi* are in progress. In Bengal harvesting of *aus* and jute is in progress; the outturn of the former is estimated between 8 to 12 annas. Indigo manufacture has commenced in Sarun, but the yield is poor. In Assam reaping of the *aus* crop has been completed, and transplanting of *sali dhan* is in progress. The prospects of tea are good.

Cholera and small-pox are slightly prevalent in most provinces, but the public health is generally good. Prices are generally stationary, with local fluctuations.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Aug. 20th)		
Bellary ...	·07 (average)	More rain urgently needed. Standing crops withering. 8 deaths from cholera.
Kurnool ...	·18 (average)	More rain wanted. Standing crops fading in parts. Small-pox and cattle-disease in places.
Ganjam ...	1·51 (average)	Small-pox slight and cholera in parts.
Kistna ...	·82 (average)	River 4·85 feet over anicut. Standing crops generally good. Small-pox, fever, and cattle-disease in places; 49 deaths from cholera.
Chingleput (Madras) ...	2·96 (average)	Standing crops fair, but in want of rain in parts; harvest paddy, yield half the average. Small-pox prevalent; 43 deaths from cholera.
Coimbatore ...	·17 (average)	Standing crops suffering from want of rain in 9 taluks; harvest dry crops, outturn below average. Fever in parts.
Tanjore ...	1·00 (average)	Standing crops good. Rivers 2 to 7 feet. Harvest paddy in parts, outturn below average. 308 deaths from cholera, which is abating.
Madura ...	·70 (average)	Prospects improving in parts, elsewhere indifferent, and crops fading from want of rain; harvest *cholum* in one taluk, yield below average. 42 deaths from cholera.
Malabar ...	1·01 (average)	Rain insufficient for standing crops. First crop of paddy generally fair; harvesting commenced in parts. Small-pox slight in 8 and fever in 3 taluks; 9 deaths from cholera.
Travancore ...	.....	Standing crops of paddy ripe in places, but failing generally in most parts from want of rain. Fever abating; small-pox in parts.
		General Remarks.—General prospects good in Northern Sircars, and much improved in other parts, except Bellary, Anantapur, parts of Madura, Tinnevelly, and Coimbatore, where drought continues.
Bombay—(Aug. 20th)		
Karachi ...	No rain	River at Kotri on 18th, 17 feet 8 inches against 16 feet 7 inches on corresponding date last year. Fever in 3 talukas; some cattle-disease in 4 talukas; blight, worms, and rats in Tatta and Mirpur Botoro; small-pox in 3 villages in the districts, 2 fresh cases, 2 deaths, 1 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Kotri 32 and 36, in Sakro 16, 28, and 32, and in Shahbander 22, 32 and 32 seers per rupee, respectively.
Hyderabad ...	.....	Weather cloudy. River at Kotri on 18th, 17 feet 8 inches against 16 feet 7 inches on corresponding date last year. Crops good. Small-pox in 4, measles in 1, fever in 3, and cattle-disease in 1 taluka. Prices of grain steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	0·05	Total rainfall 23·85. Crops healthy. Cholera in the city—3 cases, of which 1 fatal, in Parantij 1 case fatal. Wheat 29 and *bajri* 31 pounds per rupee.
Baroda ...	0·04	Total rainfall 25·96. Cholera has nearly disappeared in city Baroda, 4 deaths. Sowing operations completed. Prices—*bajri* 28 and rice 22 pounds per rupee.
Surat ...	0·04	Total rainfall 20·20. More rain wanted; young crops suffering for want of it. *Juari* 30 and *nagli* 41 pounds per rupee.
Nasik ...	.....	Rain wanted in Niphad, Yeola, Nandgaon, Kalvan, and Baglan. Crops in good condition; sowings nearly completed. Public health good. Wheat 37; *bajri* 31, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain daily, except on 19th; total of week 3·07.	Total rainfall to date 1·77, being 10·69 below average. Temperature, vapour in air, and wind, all normal.
Poona ...	Rain at Khadkala, 5·24; light showers in 6 talukas; none in Bhimthadi.	Crops withering for want of rain at Indapur, Bhimthadi and Sirur, doing well elsewhere. *Bajri* 33 and *juari* 35; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	No rain in Rahuri and Koparg:on, very slight in the other talukas.	Crops are reported to be withering in all the talukas, except Parner, Sangamner, and Akola for want of rain. *Juari*—maximum 60 pounds in Sangamner, minimum 35 in Sheogaon; *bajri*—maximum 48 in Sangamner, minimum 30 in Koparg.on.
Sholapur ...	0·39; Barsi, ·48; Madha, ·52; Karmala, ·24; Pandharpur, ·10; Sangola and Malsiras none.	*Juari* 37 pounds 28 tolas and *bajri* 37 pounds 32 tolas per rupee. Rain greatly needed. Fodder becoming scarce. General prospects bad.
Dharwar ...	Rainfall slight; maximum in Hangal, ·45; in Navalgund, Bankapur, Ranibennur, Karajgi, Kalghatgi, Mandargi and Mugud Pethas none.	Rain urgently required in all talukas. Rice and other early crops good, except in Hangal and eastern talukas, where they are suffering from drought. Cholera in all talukas, rather severe in Dharwar and Ron. Prices stationary.
Kanara ...	**Karwar, 2·59; Kumpta, 4·98; Sirsi, 1·59; and Haliyal, ·53.**	**Total rainfall 59·67. Common rice at Karwar 12 seers, district average 15 seers per rupee. Small-pox—2 deaths in Kumpta; cholera—3 cases, in Mugod 1 death and in Sirsi 2 deaths.**
Rajkot ...	0·07	Total rainfall 24·37. General health good. Weather warm and cloudy. Fever and diarrhœa still prevalent; cholera in Mandvi, Und, and Navanagar. *Bajri* 35 and *juari* 48 pounds per rupee.
		General Remarks.—Slight rain in all parts of the Presidency, except Sind; more rain needed in parts of the Deccan and Southern Mahratta Country. Young crops withering for want of rain in parts of Poona, Ahmednagar, and Kaladgi; prospects on the whole good. Cholera in parts of 13 districts; fever, cattle-disease, and small-pox in a few districts.
Bengal—(August 20th)		
Chittagong ...	2·68	Weather seasonable. More rain wanted. Prospects of crops good, and transplanting of *amun* continues; harvesting of *aus* completed. Prices stationary. Cholera and cattle-disease reported.
Dacca ...	2·17	Harvesting of early paddy and jute continues; prospects of crops generally favourable. Water rising.
24-Pergunnahs (Calcutta)	2·44	Prospects of standing crops good; *aus* being harvested with about 12-anna outturn; transplanting of *amun* going on rapidly. Rain done much good. Price of common rice varies from 12¼ to 15¼ seers per rupee. Public health generally good; cattle-disease reported from Bussoerhat sub-division. Rivers as usual in this season.
Moorshedabad ...	2·38	Weather cloudy and rainy. Prospects of *amun* much improved by recent rain, but seedlings in many places almost too big to be transplanted; *aus* on highlands a poor crop, hardly worth cutting; on *churs* in the north much of this crop and of jute has been flooded by recent rise of river. Public health good.
Rajshahye ...	3·6	Weather cloudy. *Aus* suffered considerably from scanty rain, more rain wanted for *amun*. Public health good.
Burdwan ...	2·43	Good rain at Raneegunge, elsewhere just enough to keep things going. Transplanting going on, but under disadvantages.
Rungpore ...	1·36	Weather hot and cloudy. Prospects of crops fair. Price of rice varies from Rs. 3¾ to 4½ per maund.
Bhagalpur ...	·82	More rain wanted for transplanting of paddy; *bhadoi* crops being cut, and outturn expected not to exceed eight annas. Rice 12 seers 10 chittacks per rupee.
Purneah ...	4·1	Prospects of *bhadoi* crops 8 to 12 annas and those of *aghani* very bad; transplanting almost stopped. Coarse rice 14 seers per rupee. Public health fair. Ganges and Kusi high.
Patna ...	4·01	*Bhadoi* crops promising; transplanting of *amun* commenced in some places. Cholera and fever reported from the interior.
Durbhunga ...	·35	*Bhadoi* crops suffering very much from drought in places, and transplanting impeded. Prices rising. Some cases of fever, and otherwise public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Hazaribagh ...	7·71	Weather seasonable. Prospects of *bhadoi* crops good in some places; transplanting of paddy going on. Prices of food-grains stationary. Cholera and small-pox reported from certain places, otherwise public health good.
Cuttack ...	3·84	Weather cloudy and warm. *Beali* ripening; *sarad* being weeded; prospects of crops good. Price of rice stationary. Public health generally good.
		General Remarks.—The rainfall during the week somewhat improved prospects of crops in many places and enabled transplanting to go on, but more rain still wanted and prospects on the whole not favourable; harvesting of *aus* commenced in many districts with estimated outturn between 8 to 12 annas, and that of jute continues in some places. In Sarun indigo manufacture commenced, but yield is disappointing. Price of rice rising slightly in some places. Public health generally good.
N. W. Provinces and Oudh—		
Benares (Aug. 18th)	Over 5·0	Rain has improved all crops; prospects of late rice now good. Cholera and fever still linger. Prices stationary.
Allahabad („ „)	6·4 (average)	Prospects extremely good. Health of people and cattle remarkably good. Prices stationary.
Gorakhpur („ 16th)	Plentiful rain, especially in the east; 5·2 at Sadr.	Crops promising. Some cholera in east of district. Prices stationary.
Jhansi („ 19th)	1·2 to 3·1	*Kharif* crops are doing well and require fair weather. Prices stationary. 191 deaths from cholera; cattle in good condition.
Agra („ 16th)	From ·3 to 3·4; rain in all parganas.	*Kharif* prospects satisfactory. Slight cholera continues in 3 mortuary circles and Agra city. Prices falling slightly.
Bareilly („ 18th)	Abundant rain	Harvest prospects excellent. Prices still falling slightly. General health good.
Meerut („ „)	Good rain during week.	Crops flourishing everywhere; indigo cutting commenced. Cholera still in Sarawa, one case in Sagur; much fever in Mowana; cattle-disease in one village in Sardhana. Prices steady.
Kumaon („ „)	Good rain	Prospects good. Health fair. Cattle-disease prevalent. Prices stationary.
Lucknow („ „)	Good and general rain during the week, varying from 5·1 to 6·6.	Prospects favourable. Condition both of men and cattle good. Increase of cholera in city. Markets well supplied. Prices stationary.
Fartabgarh („ 15th)	**Rain during the week from 1·9 to 4·2.**	**Prospects excellent. General health good. Prices almost stationary.**
Sitapur („ 19th)	Abundant rain, averaging 5·7 has fallen throughout the district.	Prospects are excellent.
Fyzabad („ 18th)	1·5 to 5·2 in the week	Prospects good. Public health and condition of cattle good.
Rae Bareli („ 16th)	A good and continuous rainfall all over the district.	Weather cloudy. A break in rains needed. Crops promising. General health good. Markets well stocked. Prices falling.
Cawnpore („ 18th)	General and abundant rain during past week; 10·0 at Cawnpore.	Isolated cases of cholera in Bhaginpur and Dinapur and slight fever, otherwise public health good. Crops flourishing, and prices show a tendency to fall.
Farukhabad („ „)	Rain in all tahsils	Prospects favourable; indigo being cut. General health good. Prices inclined to fall.
		General Remarks.—Ample rain has fallen in all districts. Crop prospects are generally excellent; indigo-cutting has commenced. Markets are well supplied and prices show a tendency to fall. Cholera continues in a mild form in a few districts, and has increased in Jhansi. The general health of the people and the condition of cattle are good.
Punjab—(Aug. 20th)		
Delhi ...	.....	*Kharif* prospects good. Prices falling slightly.
Hissar ...	.....	Good rain has fallen in the Rohtak district, but none in Hissar and Sirsa. Health good. Prices falling.
Umballa ...	1·0	Health good. Crops thriving, yield expected to be good. Prices stationary.
Jullundur ...	.....	Rain wanted. Health good. *Kharif* sowings in progress. Prices falling.
Amritsar ...	·50	Health and crops good. Prices falling slightly.
Sialkot ...	·50	Health and prospects good. Prices falling.
Ferozepore ...	.....	Health and state of crops good. Prices almost stationary.
Lahore ...	·40	More rain is wanted. Health good. Prices stationary.
Rawalpindi ...	3·0	Health good. *Kharif* sowings in progress. Prices stationary.
Mooltan ...	.....	Health and *kharif* prospects good. Prices stationary.
Dera Ismail Khan ...	.....	Health and crop prospects good. Prices almost stationary.
Peshawar ...	.....	Rain wanted. Health good. Prices rising.
		General Remarks.—Rain in a few districts, but more is wanted. Health generally good. *Kharif* sowings in progress; prospects good. Prices fluctuating.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(August 21st)		
Nagpur ...	·40; after a short break slight rain has again commenced.	Land being ploughed up for *rabi* sowings. Fever and cattle-disease in some places. Prices steady.
Jubbulpore ...	2·55	Weather cloudy and showery. Cotton and other crops suffering from excessive rain. Fields full of water. Break very much needed. Weeding backward. Wheat 23 and rice 12 seers per rupee. Health good.
Saugor (August 19th) ...	·45	Weather cloudy. Weeding still backward. Fair weather very necessary. Health good. Prices steady.
Seoni ...	·27	Break continued up to 19th, allowing weeding and ploughing to progress. Open weather still urgently wanted. Cattle-disease slight; fever in Seoni; 4 deaths from small-pox.
Hoshangabad ...	.....	Weather rainy and cloudy. Prospects fair. Wheat 22 and rice 9 seers per rupee.
Khandwa ...	.....	Weather cloudy. Weeding continues. Prospects good. More rain wanted. Cotton recovered. Health good. Wheat 22, rice 14, and *juari* 27 seers per rupee.
Raipur ...	1·53	Weather cloudy, with occasional breaks. Weeding progressing; cotton sowings retarded by excessive rain. Health good. Prices steady.
Sambalpur (August 16th)	11·48	Rice transplanting in progress; prospects good. Fever prevalent; cattle-disease reported. Common rice 25½ seers per rupee.
		General Remarks.—There have been occasional breaks allowing weeding and ploughing to progress, but a longer break is still wanted. Prospects fair. Health good.
British Burma—(August 20th)		
Akyab (Aug. 16th)	13·68	Total rainfall 130·51. Slight small-pox and cholera in parts; cattle-disease in three townships.
Rangoon („ „)	5·56	Total rainfall 64·49. Slight cholera.
Bassein („ „)	7·97	Total rainfall 63·22. Slight cholera in one township; slight cattle-disease in parts.
Amherst („ „) (Moulmein)	12·78	Total rainfall 119·04. Cattle-disease reported in one township; a few deaths from small-pox. Crops damaged in parts by floods.
Toungoo („ „)	5·44	Total rainfall 51·03.
Kyoukphyoo („ „)	21·58	Total rainfall 151·87.
Sandoway („ „)	8·96	Total rainfall 145·43.
Henthawaddy („ „)	.....	No report received.
Pegu („ „)	5·24	Total rainfall 73·96. Slight dysentery in town.
Tharrawaddy („ „)	5·6	Total rainfall 70·25. Cholera reported prevalent in one township; a few cases of cattle-disease.
Prome („ „)	2·37	Total rainfall 29·24. Slight cholera prevalent.
Thonegwa („ „)	4·02	Total rainfall 62·33. Prospects of crops good.
Henzada („ „)	4·30	Total rainfall 61·86. Slight cholera, small-pox, and some cattle-disease prevalent.
Thayetmyo („ „)	1·75	Total rainfall 22·37. Cholera reported, prevalent in parts.
Shwaygyin („ „)	7·38	Total rainfall 80·08.
Tavoy („ „)	10·44	Total rainfall 13·72. Slight small-pox prevalent.
Mergui („ „)	...	No report received.
		General Remarks.—Public health generally good; slight cholera in several districts. Weather seasonable.
Assam—(August 20th)		
Gauhati ...	8·59	Weather seasonable. Rain sufficient for *sali* cultivation. Prospects of tea good. Fever very prevalent.
Sylhet ...	18·62	Rain has improved prospects, more still wanted.
Cachar ...	7·43	Weather warm. Reaping of *aus* crops finished, outturn about one-eighth more than last year; transplanting of *aus* crops progressing. Common rice 16 seers per rupee. Prospects of tea and health good.
Dibrugarh ...	2·81	Weather seasonable. Transplanting of *sali dhan* progressing; tea doing well. Cattle-disease reported from North Lakhimpur sub-division; public health good.
Mysore and Coorg—(August 20th)		
Bangalore ...	·06	Standing crops generally reported to be withering; sowing operations at a standstill in many places.
Mysore ...	·04; Kolar, 1·19; Tumkur, 9·0; Shimoga, 4·5; Kadur, ·04.	Standing crops getting worse throughout the province. Rain has been generally scanty. Crops still suffering in parts, especially in the Maidan talukas, for want of more rain; seeds have been sown in a few talukas only; prospects very uncertain. Health good.
Mercara ...	1·86	*Ragi* coming into ear; although a small coffee crop is expected, the estates are in fine condition.
Berar & Hyderabad—(August 20th)		
Amraoti ...	.....	Weather cloudy. Crops in good condition; weeding in progress. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	0·55	*Kharif* crops in good condition; weeding operations progressing.
Hyderabad ...	·77 (average)	Total rainfall from 1st January 20·02. *Kharif* crops prospering; *abi* sowings progressing. Tanks have received a considerable quantity of water. No sickness. Prices—wheat 14½, course rice 11, white *juari* 16½, yellow *juari* 19½, and *tur* 19 seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(August 20th)		
Indore ...	0·14	Total rainfall 19·35. Rain is now wanted. The grass crop promises to be below average, otherwise prospects are fair. Health good.
Morar (Gwalior) ...	3·16	Total rainfall 16·61. Prospects good. Cholera in Lashkar and city decreasing.
Sutna ...	13·87	Flood in town of Rewah on 16th, no loss of life, but considerable damage to houses and property. Fine weather required for crops. Health good.
Neemuch ...	No rain during last week.	Rain much needed. Water-supply insufficient. Public health good. Crops are suffering for want of rain.
Goona ...	1·93	Health and prospects good.
Agar ...	0·5	More rain is urgently required.
Sehore ...	0·73	Weather cloudy. Prospect of crops and public health good.
Nowgong ...	2·78	Total rainfall 50·58. If rain continues, it is feared that considerable damage will be done to the *kharif* crops. Public health good.
Manpur (Bhopawar) ...	*Nil*	Prospects good. Rain is required to replenish wells and tanks.
Rajputana—(August 20th)		
Abu (Aug. 20th)	·13	Break in rain very opportune, weather now cloudy and close, which is an indication of more rain shortly.
Sirohi („ 17th)	No rain	Tanks and wells full. Health and prospects of crops good. Fine cool weather. More rain wanted.
Marwar („ 15th)	·04	About 4 months' water in Jodhpore city tanks. Health good, and crops in good condition. Weather cloudy, but no rain. Temperature low, indicating remote chances of rain. Prices stationary.
Meywar („ 17th)	·05	Tanks, wells, and health good. Prospects of crops very good. Weather seasonable.
Harowti („ 16th)	Deoli, ·01; Kotah, ·12; Shahpura, ·13.	Rain urgently needed; weather cloudy. 14 fatal cases of cholera in Tonk, elsewhere health good.
Jhallawar („ 15th)	·22	High west wind. Health and prospects good.
Ajmere („ 17th)	No rain	Weather cloudy; rain much wanted. Cholera has re-appeared.
Jeypore („ 19th)	·02	Weather cloudy; rain much needed. A few cases of cholera still reported. Prices stationary.
Ulwur („ „)	·60	Rain much wanted in three tahsils. Health good.
Nepal—(Aug. 15th)		
Katmandu ...	4·63	Weather cooler and more seasonable. Prospects of crops fair.

E. C. BUCK,

RESOLUTION.

In Home Department circular letter No. 3986-96, dated 31st August 1869, it was decided that Civil Surgeons should attend personally on all Uncovenanted officers, being at the head-quarter station of the district, whose appointments are notified in the official gazette by the Government of India or by any Local Government or Administration. As no general rules have been laid down regulating the gazetting of appointments, it is found that in one Province subordinate officers, in consequence of being gazetted, are entitled to attendance from the Civil Surgeon, while in another Province officers of the same class who are not gazetted are not so entitled. It appeared to the Government of India that a general ruling entitling all officers drawing a pay of Rs. 250 and over, whether gazetted or not, to the attendance of Civil Surgeons would be a better arrangement, and remove all cause for dissatisfaction in this respect, and the opinions of Local Governments and Administrations were invited on the subject.

2. From the replies read in the preamble, it appears that the rule proposed by the Government of India meets with very general approval. The Governor General in Council is accordingly pleased to decide that all officers of Government in the Bengal Presidency living at the head-quarter station of a district and drawing a salary (as defined in the Codes of the Financial Department) of Rs. 250 and over, whether gazetted or not, shall in future be entitled to gratuitous medical attendance at their own residences from Civil Surgeons. Gazetted officers drawing less than Rs. 250 a month will no longer be entitled to the gratuitous medical attendance of a Civil Surgeon. The only exceptions to the rule now laid down will be probationers appointed under the

Statutory Civil Service Rules and Assistant Superintendents of Police who, though drawing a salary of less than Rs. 250 a month, will still be entitled to the personal attendance of the Civil Surgeon.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations (except Madras and Bombay) for information and guidance;

that a copy be forwarded to the Government of Madras for information; and

that a copy be forwarded to the Government of Bombay for information, with the remark that the Government of India see no sufficient reason to make an exception in favour of mamlutdars in Bombay when the corresponding officers—tahsildars—in all other Provinces are not to be exceptions to the rule.

Ordered also, that a copy of this Resolution be forwarded to the Surgeon General with the Government of India for information and for the issue of further necessary orders, and to the several Departments of the Government of India for information; and that the Resolution be published in the *Gazette of India* for general information.

A. MACKENZIE,
Secretary to the Government of India.

* Passed down to supplement the Agra Canal.

Executive Engineer, Northern Division, Ganges Canal, reports—Fair rain fell during the month, and even demand in rice almost ceased after the 20th July; there has, however, been a break and rice is again calling for water. River high; no very heavy floods.

Executive Engineer, Meerut Division, Ganges Canal, reports—Fair demand during the first half of the month for kharif crops generally, but for rice only during the second half, and this demand was confined to the 1st sub-division.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—Demand general until the 20th, after that water was only taken for cane and indigo. Good rain fell in most parts of the division on the 30th and 31st.

Executive Engineer, Aligarh Division, Ganges Canal, reports—The quantity of rain registered during the month was below the average and unequally distributed; water was taken in some villages for cotton and maize not previously irrigated.

Executive Engineer, Narora Division, Lower Ganges Canal, reports—No new irrigation during July, the areas shown being arrears from previous month.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—There has been a partial demand for water up to the end of the month, when it ceased entirely. Average rainfall 4·3 inches, maximum 6·2, and minimum 2·9. The decrease compared with last year is due to the short supply in April and May.

Executive Engineer, Cawnpore Division, Lower Ganges Canal—Shows an increase of 666 acres as compared with the same period last year.

Executive Engineer, Etawah Division, Lower Ganges Canal Shows a decrease of 2,426 acres as compared with July 1883, and reports—There was good rain during the month and little new irrigation was secured.

The falling off in area was almost entirely in sugarcane, owing to the losses on this crop last year. There is a slight increase in indigo.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports—Rain rather slack at beginning of month, but good rain everywhere subsequently. Crops irrigated and unirrigated, doing very well.

Executive Engineer, Eastern Jumna Canal, reports—The demand below Baraut was very heavy for all crops up to 23rd, when rain fell. Further rain on 29th and 30th stopped all demand except for rice. Between Saharanpur and Baraut steady demand for all crops, from 6th to 23rd, afterwards for rice and sugar only. Above Saharanpur demand only for rice throughout the month. Excess over last year due to earlier rain and subsequent break.

Executive Engineer, Rohilkhand Canals, reports—From 1st to 9th it rained more or less every day, but only enough for sugar and grain crops, and then there was a break up to the 19th. There was good rain during the last 10 days of the month, and some small floods came down. Owing to insufficient rain the area under rice this year is much smaller than usual. The area irrigated during month is "late kharif" and previous irrigation "early kharif." Water was in great demand for rice throughout the month.

Executive Engineer, Dún Canal, reports—Good rain throughout the month. Rice sowings almost finished.

Deputy Commissioner of Jhánsi and Collector of Hamírpur, report that no irrigation was effected during the month of July 1884.

ALLAHABAD,
The 13th August 1884.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3rd SEPTEMBER 1884.

GENERAL REMARKS.—Rain has fallen throughout the Madras Presidency, but, except in Malabar, it has been insufficient in all districts. In Mysore agricultural prospects have been somewhat improved by the rain which fell during the week under report, but in the eastern half of the province the outlook is still very unpromising. Heavy rain still continues to fall in Coorg. There was good rain in all districts of the Bombay Presidency, and agricultural prospects have been much improved. In parts of Poona, Nasik, Sholapur, and Dharwar more rain is still required for the crops. Rain has fallen throughout the Berars and Hyderabad, and standing crops are in good condition. General rain is reported throughout the Central India and Rajputana States and agricultural prospects are generally very favourable. In the North-Western Provinces and Oudh good rain has again fallen in all districts; in some places the fall has been excessive, and a break would be beneficial. There was a fair amount of rain in most districts of the Punjab, and crop prospects are good. Rainy weather continues to prevail in the Central Provinces, where a break is necessary to permit of weeding and ploughing. In the Assam districts, there was good rain during the week, and the prospects of standing crops and of tea are good. In Bengal agricultural prospects are fair, but the rainfall is still insufficient, and more is wanted for transplanting of rice.

The last report, dated 4th instant, of the Meteorological Department, states that rain is reported from Assam, Bengal (except Behar and Orissa), the Central Provinces, Central India and Rajputana, and the west coast; that elsewhere there is little or none reported and that in the North-Western Provinces and Oudh it has almost ceased.

Harvest operations continue in a few districts of the Madras Presidency. In the Bombay Presidency the *kharif* crops have been injured in parts of the Upper Sind Frontier by excessive rain; sowing for the *rabi* has commenced in places. The *kharif* prospects in the North-Western Provinces and Oudh and Punjab are good. Weeding and transplanting are in progress in the Central Provinces. In Bengal the transplanting of *amun* is backward, owing to insufficient rain; and in many districts the young plants are reported to be suffering. Harvesting of the *bhadoi* and of *aus* and jute are in hand.

Cholera is reported from most provinces, and fever is very prevalent in places in Bengal.

Prices are generally stationary, with local fluctuations, or exhibit a slight tendency to fall.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Sept. 3rd)		
Bellary ...	·66 (average)	Rain insufficient. Standing crops generally withering; pasture and water scanty.
Kurnool ...	1·31 (average)	More rain wanted. Prospects improving. Small-pox and cattle-disease in parts.
Ganjam ...	1·96 (average); some rain since end of week.	Standing crops in want of rain. Small-pox and cattle-disease slight; cholera in parts. Prospects improving.
Kistna ...	·96 (average)	River 4·40 feet over anicut. Standing crops generally good. Rain needed in parts. Small-pox, fever, and cattle-disease in places; sixty deaths from cholera.
Chingleput (Madras) ...	·06 (average)	Standing crops fair, but in want of rain in parts; harvest paddy and *ragi*, yield half the average. Small-pox generally prevalent; 41 deaths from cholera.
Coimbatore ...	·33 (average)	Standing crops suffering from want of rain; harvest dry crops, outturn below average. Fever and small-pox in parts; the condition of cattle is deteriorating from want of fodder.
Tanjore ...	·12 (average); heavy rain since end of week.	Standing crops not flourishing generally for want of rain. Rivers 1 to 6 feet. Harvest paddy and *cholum*, outturn below average. Cholera abating, 94 deaths. Freshets in rivers. Prospects improving.
Madura ...	·07 (average)	Prospects tolerable in parts, elsewhere indifferent, and crops fading from want of rain. 70 deaths from cholera.
Malabar ...	13·47 (average)	Sufficient harvest of first crop paddy commenced in parts; operations for second crop cultivation progressing. Small-pox slight in 8 taluks and fever in 2; 4 deaths from cholera.
Travancore ...	4·06	Standing crops paddy being reaped in parts, but failing generally for want of rain at proper season. Fever and small-pox in parts.
		General Remarks.—General prospects fair, except in Ceded Districts, parts of Madura and Coimbatore, where drought continues.
Bombay—(Sept. 3rd)		
Karachi ...	Good showers of rain on 30th August; average of 6 other stations, ·95.	River very high on 1st, 19 feet against 13 feet 3 inches on same date last year. Fever in 4 talukas; some cattle-disease in Kotri and Shahbandar; small-pox in 4 villages in the districts; 13 fresh cases, 2 deaths, 10 remaining sick. Prices—wheat, red rice and *bajri* in Karachi 24, 30 and 32, in Sehwan 36, 32 and 40, in Tatta 26, 28 and 32, and in Mirpur Batoro 22, 31 and 32 pounds per rupee, respectively.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Hyderabad ...	Rain in 6 talukas, averaging ·64; heavy rain in Hyderabad on 9th and 31st.	Sky still cloudy. River at Kotri on 1st, 18 feet 11 inches against 13 feet 2 inches last year. Crops good. Fever in 4, small-pox in 3, and cattle-disease in 1 taluka; measles in Hyderabad city. Wheat 28, *bajri* 38, *juari* 38, red rice 26, and white rice 20 pounds per rupee.
Ahmedabad ...	2·75	Total rainfall 27·17. Crops healthy. Cholera in the city, 13 cases, of which 10 fatal, in Viramgaum 10 cases, 1 fatal; in Parantij 2 cases fatal. Wheat 29 and *bajri* 32 pounds per rupee.
Baroda ...	5·21	Total rainfall 31·39. Health fair. Crops damaged in Khamandal Prices—*bajri* 28, and rice 22 pounds per rupee.
Surat ...	2·85	Total rainfall 23·26. More rain wanted in places for rice crops; prospects improved. *Juari* 29 and *nagli* 42 pounds per rupee.
Nasik ...	.....	Rain throughout the disrtict, but more wanted in Sinnar, Yeola and Nandgaon. *Kharif* sowing completed; crops look healthy. Public health generally good; small-pox and cattle-disease in Kalwan. Wheat 34½, *bajri* 31, and rice 17 pounds per rupee.
Colaba (Bombay) ...	Rain daily, very heavy on 29th; total of week, 9·2.	Total to date 55·21, being 4·8 below average. Abnormal temperature 1° warm to 2° cool. Vapour in air excessive. Abnormal wind feebly cyclonic from 27th to 30th; monsoon wind very strong on 1st and 2nd.
Poona ...	Rain throughout the district; maximum 3·27 in Khadkala, minimum ·99 in Junnar.	More rain wanted in Purandhar, Bhimthadi, and part of Haveli. Crops withering in some villages of Haveli. *Bajri* 33 and *juari* 35 pounds per rupee; in Poona *bajri* and *juari* 30 pounds per rupee.
Ahmednagar ...	Nagar, 6·25; Rahuri, 5·92; Newasa, 4·25; Jamkhed, 3·39; Parner, 2·88; Shrigonda, 2·42; Karjat, 2·32; Kopargaon, 1·90; Sheogaon, 1·57; Sangamner, 1·15; Akola, ·88.	Rain beneficial to the *kharif* crops, wherever sown. Want of fodder is being felt. *Rabi* sowing in progress in Newasa. More rain wanted for *rabi* sowing. Fever in Sheogaon. *Juari*—maximum 54 pounds in Sangamner, minimum 35 in Sheogaon; *bajri*—maximum 42 in Sangamner, minimum 36 in Sheogaon.
Sholapur ...	2·34; Barsi, 2·51; Madha, 3·6; Karmala, 3·3; Pandharpur, 2·74; Sangola, ·98; Malsiras, ·95.	*Juari* 37 pounds 38 tolas and *bajri* 37 pounds 37 tolas per rupee. Matters slightly improved by rainfall, but more rain urgently needed.
Dharwar ...	Kalghatgi, 7·9; Hangal, 4·77; Bankapore, 2·59; Mugud, 2·62; Kod, Karajgi, Ranibennur and Hubli more than 1·0; Nargund, ·64; Gadag, Mundargi, and Ron below ·30; and Navalgund none.	Cotton and other late crops are being sown, except in Gadag, Ron, and Navalgund taluks, where sowing operations are retarded for want of rain. Rice and other early crops are good. Cholera abating. Prices stationary.
Kanara ...	Karwar, 14·96; Kumpta, 21·52; Sirsi, 11·8 and Halyal, 4·21.	Total rainfall 81·74. Common rice in Karwar 12; district average 15 seers per rupee. Small-pox, 3 deaths in Kumpta, 3 in Bhatkal, and 2 in Sirsi; cholera, 1 death in Mugud.
Rajkot ...	8·33	Total rainfall 33·79. General health good. Crops excellent. Cholera is prevalent in a few places. *Bajri* 36 and *juari* 47 pounds per rupee.
		General Remarks.—Rain throughout the P residency. Agricultural prospects much improved. More rain still needed in parts of Poona, Nasik, Sholapur, and Dharwar. *Kharif* crops injured in parts of the Upper Sind Frontier by excessive rain and storm. Cholera in parts of the districts; fever, cattle-disease and small-pox in a few places.
Bengal—(Sept. 3rd)		
Chittagong ...	2·1	Weather seasonable. Prospects promising; transplanting continues. Prices stationary. Cattle-disease still reported; general health good.
Dacca ...	·99	Jute harvesting continues; prospects of crops on lowlands good. Water rising; more rain wanted.
24-Pergunnahs (Calcutta)	4·48	*Aus* being harvested with about 12-anna outturn; jute steeping going on; sugarcane doing well; transplanting of *amun* nearly finished; prospects good. Common rice 11½ to 15 seers per rupee. Fever as usual in the season, otherwise public health good. Rivers rising.
Moorshedabad ...	1·34	Weather hot. *Aus* being still cut; transplanting of *amun* continues. Irrigation being resorted to, where practicable. Rain still wanted. Public health generally good.
Rajshahye ...	·28	Weather cloudy. Harvesting of *aus* continues. Rain urgently wanted. Public health good.
Burdwan ...	1·39	Rain urgently wanted everywhere. Prospects of paddy bad everywhere. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Rungpore ...	1·58	Weather hot and cloudy. Prospects of crops fair. More rain wanted. Price of rice Rs. 3½ to 4¼ per maund. Malarious fever prevails.
Bhagalpur ...	·57	*Bhadoi* harvesting continues and yields a 4-anna outturn, where finished; later *bhadoi* suffering from want of rain; prospects not good. Rice 12 seers 10 chittacks per rupee.
Purneah ...	2·2	Transplanting rendered possible by rain, and it is going on in the north. Common rice 14 seers per rupee. Some cattle-disease and much fever. Mahanadi high.
Patna ...	1·3	Harvesting of *bhadoi* being pushed on; transplanting stopped for want of rain. Cholera still prevalent, except in Barh.
Durbhunga ...	3·17	Paddy being transplanted in some places. More rain still very much wanted. *Bhadoi* being harvested with an average outturn of 8 annas. Prices stationary. Public health good.
Hazaribagh ...	1·41	Weather seasonable. Transplanting continues, but more rain wanted in places for the purpose; some *bhadoi* crops being harvested; prospects seem good. Cholera and small-pox still reported from a few thanas, otherwise general health good.
Cuttack ...	2·27	Weather cloudy. Prospects of *beali* crops good; *sarad* on high lands partially damaged for want of sufficient rain. Price of rice falling slightly. Public health generally good, excepting a few cases of cholera in the town.
		General Remarks.—There has not yet been a sufficient rainfall in any districts in the province, except Julpiguri, and prospects of *amun* crops in consequence unfavourable; transplanting of which is backward and the young plants are beginning to suffer in many districts; *bhadoi* harvesting commenced in some districts, with a fair outturn; harvesting of *aus* and jute continues. Prices unsteady. Cholera still reported from a few districts and fever is very prevalent in Rungpore, Bogra, Hooghly, and Nuddea.
N.-W. Provinces and Oudh—		
Benares (Sept. 1st)	Average rainfall over 2·5.	Crops, including sugarcane and late rice, doing well. Prices fluctuating slightly. Cholera lingers in the city; cattle mouth-disease in Katebir.
Allahabad („ „)	1·0 during the week	Crops flourishing; a bumper *kharif* crop is assured. Prices stationary. Health excellent.
Gorakhpur (Aug. 30th)	Fair rain varying from 1·6 to 4·3 throughout district.	Prospects good. Cholera decreasing, except in Deoria. Prices falling.
Jhansi (Sept. 2nd)	.....	Crops on moor and *kabar* soil are suffering from excessive rain. Prices [illegible]. Cholera continues.
Agra (Aug. 30th)	50 to 3·0 [illegible]	Early prospects good. Prices falling slightly. Cholera now very slight.
Bareilly (Sept. 1st)	Good rain during week.	Crops flourishing. Prices falling. Health good on the whole.
Meerut („ „)	Rain heavy, but local showers during the week.	Crops flourishing everywhere; early rice being cut. Prices falling. Fever prevalent; cholera reported in tahsil Ghaziabad.
Kumaon („ „)	.....	Partial break in the rains. Crop prospects excellent. Prices stationary. Health fair; cattle-disease still prevalent.
Lucknow („ „)	·2 to 1·8	Weather continues cloudy. Crops doing very well. Market well supplied. Prices stationary. Health of people good; slight cholera prevails in the city; condition of cattle good.
Partabgarh (Aug. 29th)	·20 at Kunda	Crops coming on very well. General health good. Prices stationary.
Sitapur (Sept. 1st)	.....	There has been a partial and beneficial break during the week. Crops are doing well. Some cases of cholera reported.
Fyzabad („ „)	1·3 to 3·1	Prospects favourable. Market well stocked. Condition both of men and cattle good.
Rae Bareli (Aug. 30th)	.....	Weather cloudy; wind variable; a break in the rains. *Kharif* prospects promising. General health good. Markets well supplied. Prices show a tendency to fall.
Cawnpore (Sept. 1st)	·20 to 3·8 rain during week.	Prospects fair; crops in pargana Bilhaur injured by excessive rainfall. Prices steady. Health good; few cases of fever in parganas Bilhaur, Dirapur, and Narwal.
Farukhabad(„ „)	Rain in all tahsils during week.	A break would be beneficial to the crops. Fever increasing, and a few cases of cholera have occurred.
		General Remarks.—Rain again fell in all districts during the week. Crops are flourishing, but in a few places the rainfall has been excessive and a break is needed. Markets are well supplied, and the prices of food-grains show a tendency to fall. Cholera and fever still linger in places, but the general health of the people is still good, and the condition of cattle generally satisfactory.
Punjab—(Sept. 3rd)		
Delhi ...	5·80	*Kharif* prospects good. Prices falling.
Hissar ...	Good rain in Sirsa, showery in Rohtak.	Rain required in Fazilka and Hissar. Slight fever prevalent. Prices falling.
Umballa ...	1·60	Health fair. *Kharif* crops thriving, yield expected to be good. Prices gradually falling.
Jullundur ...	·40	One case of cholera. Prices falling.
Amritsar ...	1·20	Prices falling.
Sialkot ...	2·0	Health and prospects good. Slight fall in prices.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Ferozepore ...	1·0 at City; 2·40 at Sadr; 1·70 at Muktsar; 3·30 at Moga; and 4·30 at Zira.	Health and state of crops good. Prices steady.
Lahore ...	1·0	Health good. Prices almost stationary.
Rawalpindi ...	2·30	Health and prospects good. Prices almost stationary.
Mooltan ...	·50	Health and crops good. Prices nearly stationary.
Dera Ismail Khan ...	·5	Health and prospects good. Prices stationary.
Peshawar ...	·80	Health good. Prices falling.
		General Remarks.—Moderate rainfall in nearly every district. General health and crop prospects good. Prices show a falling tendency.
Central Provinces—(September 3rd)		
Nagpur ...	4·82	Weather rainy. Prospects good, though somewhat damaged by rain. Fever, small-pox, and cattle-disease prevalent in some places. Prices steady. 5,042 bags of grain exported.
Jubbulpore ...	8·7	Weather again cloudy, with heavy falls. Crops bad in low lands; weeding approaching completion. Break wanted. Prices unchanged. Health good.
Saugor (Sept. 2nd) ...	2·40	Weather cloudy. Weeding in hand. Fair weather much needed. Health fair. Prices steady.
Seoni ...	6·55	Weather wet. Rice transplanting completed; weeding and ploughing stopped by heavy rain. Cattle-disease increasing and prices have slightly fallen.
Hoshangabad ...	6·21	Weather cloudy and rainy. Prospects fair. Break much wanted for weeding, and few persons preparing land for *rabi* sowings. Wheat 22 and rice 9 seers per rupee. Small-pox 15 cases, of which 4 fatal.
Khandwa ...	1·91	Weather cloudy and showery. Prospects and health good; cattle-disease slight. Wheat 22, rice 13¾, and *juari* 28 seers per rupee.
Raipur ...	4·6	Weather cloudy and rainy. Weeding and transplanting of rice in progress; *kodon*, pulses and cotton damaged by excessive rain. Fever prevalent. Prices steady; common rice 23 and wheat 28 seers per rupee.
Sambalpur ...	.....	No report received.
		General Remarks.—Break still needed, especially in northern districts, where the weather does not permit of weeding and ploughing; prospects fair. Health good. Prices steady.
British Burma—(Sept. 3rd)		
Akyab (Aug. 30th)	8·6	Total rainfall 142·77. Cholera prevalent in town and district; small-pox in parts, and a few cases of cattle-disease.
Rangoon („ „)	2·28	Total rainfall 68·65.
Bassein („ „)	2·95	Total rainfall 72·41.
Amherst („ „) (Moulmein)	5·67	Total rainfall 130·67.
Toungoo („ „)	1·86	Total rainfall 55·28.
Kyoukphyoo („ „)	4·6	Total rainfall 163·09.
Sandoway („ „)	2·79	Total rainfall 165·87.
Hanthawaddy („ „)	...	No report received.
Pegu („ „)	...	No report received.
Tharrawaddy („ „)	5·70	Total rainfall 81·35. Small-pox and slight cholera prevalent in one circle, and cattle-disease in three townships.
Prome („ „)	0·79	Total rainfall 31·14. Slight cholera and cattle-disease in one township.
Thonegwa („ „)	3·66	Total rainfall 69·78. A few cases of cattle-disease.
Henzada („ „)	4·11	Total rainfall 69·94. Slight cholera and a few cases of cattle-disease.
Thayetmyo („ „)	1·35	Total rainfall 24·02.
Shwaygyin („ „)	4·83	Total rainfall 90·67.
Tavoy („ „)	3·91	Total rainfall 121·71.
Mergui („ „)	...	No report received.
		General Remarks.—Public health and health of cattle good; cholera almost disappeared, except in Akyab.
Assam—(Sept. 3rd)		
Gauhati ...	1·41 fell during the week ending 1st instant.	Weather cool. Sowing of *sali* commenced; prospects of *boro* paddy and tea good; sugarcane doing well. Isolated cases of cholera reported from Barpetta; public health fair.
Sylhet ...	7·06	Crop prospects, tea included, now generally good.
Cachar ...	6·24	Weather warm. River Barak falling gradually. Transplantation of *sali* crops stopped in some low-lying villages, owing to heavy fall in last week. Common rice 12¾ seers per rupee; prospects of tea good. Health good.
Dibrugarh ...	2·23	Weather hot. Transplanting of *sali dhan* nearly finished. Prospects of tea good. District healthy.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(Sept. 3rd)		
Bangalore ...	·10	The recent rain throughout the district has partially revived the withering crops
Mysore ...	1·34; Shimoga, 6·9; Chicknagalur, 5·68; Kolar, ·22; Tumkur, ·61; more or less rain has fallen throughout the province.	Standing crops slightly recovered from effects of drought; sowing in progress in parts; prospects of harvest have improved; but are still very unpromising in the eastern half of Mysore, where also drinking-water and pasturage are becoming scarce. Public health good.
Mercara ...	11·96	The heavy and continuous rain, which has fallen during the week has proved very favourable to agricultural operations.
Berar & Hyderabad—(Sept. 3rd)		
Amraoti ...	3·31	Crops in good condition; weeding completed. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	1·65	*Kharif* crops in good condition.
Hyderabad ...	2·40	Total rainfall from 1st January 22·85. Standing crops in good condition; grass plentiful. No sickness. Prices—wheat 14¾, coarse rice 12, white *juari* 16½, yellow *juari* 20¾, and *tur* 18½ seers per current sicca supee.
Central India States—(Sept. 3rd)		
Indore ...	1·15	Total rainfall 24·75. Agricultural prospects at present are very favourable. The rain during past week which has been general throughout Central India, has been most beneficial in helping to fill tanks and wells. Health good.
Morar (Gwalior) ...	5·43	Total rainfall 26·12. Prospects good. A break in the rains would do good. Cholera disappeared from Lashkar and city Gwalior.
Sutna ...	1·16	Health and prospects good.
Neemuch ...	3·01	Weather cloudy. Prospects much improved. No cholera.
Goona ...	7·50	Break much wanted. Health and crops good.
Agar ...	2·78	Weather cloudy. Health and prospects good. No cholera.
Sehore ...	2·99	Weather cloudy. Prospects of crops and health good.
Nowgong ...	1·59	Total rainfall 59·65. *Kharif* prospects good. Health good; cholera in some parts of Bundelkhand.
Manpur (Bhopawar) ...	2·60	Total rainfall 23·85. Prospects and health good.
Rajputana—(Sept. 3rd)		
Abu (Sept. 3rd)	21·04; very heavy rain above 16 inches on 1st and 2nd.	Total rainfall 85·17. Stormy weather and very cloudy still.
Sirohi (Aug. 31st)	2·95	Tanks, wells, and health good. Crop prospects seasonable.
Marwar („ 29th)	1·0; more copious rain in districts.	Above 6 months' water in Jodhpore city tanks. Health good. Crops excellent. The rain is sufficiently abundant for present crops, though further falls will vastly benefit *rabi* cultivation. Temperature high and close, indicating further rains. Prices falling.
Meywar („ 31st)	5·56; last week rainfall 6·72.	Tanks, wells, and crop prospects very good. Health good. Weather seasonable.
Harowti („ 30th)	Deoli, 3·10; Tonk, 2·67; Kotah, 4·06; Shahpura, 2·92; rainfall for previous week 2·65.	Weather rainy. Prospects everywhere much improved. Cholera in Tonk decreasing, elsewhere health good.
Jhallawar (Aug. 29th)	1·72	Weather sultry. Health good. Tanks and wells not full.
Ajmere (Sept. 2nd)	3·38	Cholera still prevalent in Ajmere. Prospects excellent.
Jeypore („ „)	4·59	Weather monsoony. Prices stationary. Cholera abating.
Bhurtpore ...	...	No report received.
Ulwur (Sept. 2nd)	2·29 (average)	Prospects ood; *rabi* preparations commenced. Prices falling. Health good.
Nepal—(Aug. 28th)		
Katmandu ...	2·96	Weather cooler and more seasonable. Prospects fair.

(1) In this case the comparison has been made with the figures shown in half-yearly statements of Irrigation operations for Rabbi 1883-84, and not with those entered in the annual statement of Irrigation and Rainfall for 1882-83, as the former give the correct acreage for 1882-83.
(2) Represents the rainfall on the Upper Sutlej Canals in the Lahore District.

R. HOME, *Colonel, R.E.,*
Joint Secretary to Government, Punjab, P. W. D.,
Irrigation Branch.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10th SEPTEMBER 1884.

GENERAL REMARKS.—The rainfall continues insufficient over the Madras Presidency (the Malabar Coast excepted), and the crops in the districts bordering on Mysore and in Madura and Coimbatore are in a very backward condition. In the eastern portion of Mysore the state of the crops is reported to be critical, though prospects have slightly improved in the province. Pasture is scarce in Bellary and Coimbatore and parts of Mysore. Rain is also wanted in the Deccan and Southern Mahratta Country, while in Shikarpur and Ahmedabad the crops have been damaged by excessive wet. In two districts the want of fodder is much felt. Throughout Hyderabad, Berar, Central India, and Rajputana the prospects are favourable, though in some localities a break in the rains would be beneficial. The same remark applies to the Punjab and the North-West Provinces and Oudh. In the Central Provinces there has been heavy rain during the week, causing floods and much damage to standing crops, especially in Seoni. Prospects have somewhat improved in Bengal with recent general rain, but more is much needed in Behar and Orissa; and the transplanting of rice is retarded. The tea plants in Cachar are reported to have been attacked by the tea bug and red spider, and floods have done some injury to rice; otherwise prospects are favourable in Assam. In Burma the crop prospects are also favourable.

The latest report of the Meteorological Department (dated 11th instant) shows that the rainfall is confined to the North-West Himalaya, Darjeeling, Lower and Western Bengal, the Central Provinces, and the west coast of the peninsula.

Harvesting of paddy, *cholum*, *ragi*, and other crops are in progress in Madras, and the *kharif* harvest has commenced in Northern India, where the land is also being prepared for the *rabi*. Weeding is much impeded in the Central Provinces by excessive rain. The *aus* rice harvest is not yet completed in Bengal, and the transplanting of seedlings for the next crop cannot be carried out in several district till more rain falls.

Small-pox and cholera are present in most Provinces, but the latter is prevalent only in Akyab Patna, Ahmedabad, and parts of Madras. The usual autumnal fever is reported from Assam, Bengal, and the North-West.

Prices are falling in the Punjab and North-West Provinces, while in Bengal they are fluctuating.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Sept. 10th)		
Bellary ...	·06 (average)	Standing crops generally withering. Pasture and water scanty.
Kurnool ...	·09 (average)	More rain wanted. Standing crops good in four eastern taluks. Some small-pox and cattle-disease.
Ganjam ...	1·59 (average)	Rain insufficient for paddy. Slight small-pox and fever; sporadic cholera in one taluk.
Kistna ...	·40 (average)	River 8·10 feet over anicut. Standing crops generally good. Rain needed in parts. Small-pox, fever, and cattle-disease in places; 57 deaths from cholera.
Chingleput (Madras) ...	·64 (average)	Standing crops fair, but rain wanted. Harvest paddy and *ragi*, yield half the average. Small-pox generally prevalent; 66 deaths from cholera.
Coimbatore ...	·05 (average)	Standing crops suffering from want of rain; harvest dry crops, outturn below average. Fever in parts of one taluk. Fodder scarce. Cattle suffering.
Tanjore ...	1·09 (average)	Standing crops generally good, but in some places not flourishing for want of rain. Rivers 2 to 9 feet. Harvest *cholum*, outturn average. 94 deaths from cholera.
Madura ...	·41 (average)	Prospects tolerable in 3 taluks, elsewhere crops fading from want of rain. 17 deaths from cholera.
Malabar ...	3·20 (average)	First crop paddy being harvested in places; operations for second crop cultivation progressing. Slight small-pox in 6 and fever in 3 talukas; 4 deaths from cholera.
Travancore ...	1·78	Harvesting of paddy over in parts, yield scanty. Fever and small-pox in parts; 4 deaths from cholera.
		General Remarks.—General prospects fair, except in Ceded Districts, parts of Madura and Coimbatore, where rain is still deficient.
Bombay—(Sept. 10th)		
Karachi ...	2·84; total on 1st January, 7·31; average fall last week of 9 other stations, 1·95.	River at Kotri on 8th, 17 feet 10 inches against 14 feet 1 inch on same date last year. Fever in Shahbandar. Rats and *rura* insects in Tatta. Cattle-disease in 3 talukas; small-pox in 6 villages in the districts; 18 fresh cases, 4 deaths, 20 remaining sick. Prices—wheat, red rice and *bajri* in Karachi 26, 30 and 34, in Manjhand 28, 24 and 40, in Sakro 16, 22 and 32, and in Jati 16, 30 and 32 pounds per rupee, respectively.
Hyderabad ...	1·92 on 6th and 7th; average in 8 talukas, 1·60; sky still overcast.	River at Kotri on 8th, 17 feet 10 inches against 13 feet 7 inches last year. Crops good, but slight damage by rain apprehended. Small-pox in 3, fever in 9, and cattle-disease in 4 talukas. Prices of grain steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	2·90	Total rainfall 30·7. Slight damage to *bajri* in Parantij and cotton crops in Veramgam by excessive rain, other crops healthy. Cholera in the city, 5 cases, of which 4 fatal, and in Viramgam 32 cases, 13 fatal. Wheat 30 and *bajri* 32 pounds per rupee.
Baroda ...	4·64	Total rainfall 36·3. Cholerah as appeared in Siddapur and Bijapur. Crops are in fair condition. Prices—*bajri* 28 and rice 22 pounds per rupee.
Surat ...	7·21	Total rainfall 30·47. Flood decreasing. Young crops healthy. *Juari* 29 and *nagli* 41 pounds per rupee.
Nasik ...	Good rain throughout the district.	Crops flourishing; land being prepared for *rabi*. Public health generally good. Wheat 34½, *bajri* 31, and rice 17 pounds per rupee.
Colaba (Bombay) ...	Total of week, ·77; total to date, 55·98, being 5·83 below average.	Abnormal temperature 6° to 8° cool. Vapour in air normal. Abnormal wind westerly till 7th, afterwards gradually backed to south.
Poona ...	Rain in 5 talukas; maximum 6·22 in Khadkala, minimum ·46 in Purandhar; none in Sirur, Bhimthadi and Indapur, where more rain is wanted.	*Bajri* 33 and *juari* 34 pounds per rupee; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Akola, 1·54; Shrigonda, Sheogaon, and Rahuri, none; very slight in other talukas.	More rain urgently wanted in Rahuri, Shrigonda, and Karjat, where the *kharif* crops are reported to be withering. *Juari* sowing in progress in all talukas, except Shrigonda, Jamkhed, Kopargaon, and Akola; great want of fodder is felt throughout the district. Slight cattle-disease in Parner; fever in Sheogaon. *Juari*—maximum 54 pounds per rupee in Sangamner, minimum 33 in Karjat; *bajri*—maximum 48 pounds per rupee in Sangamner, minimum 33 in Shrigonda.
Sholapur ...	·40 at Barsi and ·10 at Madha; Karmala, ·09.	*Juari* 36 pounds 32 tolas and *bajri* 36 pounds 32 tolas per rupee. Prospects worse all over the district. Little or no grass; *kharif* crops hopeless.
Dharwar ...	Mugud, maximum ·75; Dharwar, Hangal, and Kod nearly ·65; Ron, ·53; Hubli, Ranibennur, and Kalghatgi, nearly ·40; Nargund and Karajgi, ·20; Gadag, ·6; Navalgund, Mundargi, and Bankapur, none.	Rain urgently required, especially in black soil talukas. Cotton sowing in progress, except in Navalgund, part of Gadag, Karajgi, and Ron talukas, where it is retarded for want of rain. Rice and *juari* crops are good, except in Bankapur, part of Hangal, and Navalgund talukas, where they are suffering from drought. Cholera abating. Prices of food-grain stationary.
Kanara ...	Karwar, 1·40; total 83·14; Kumpta, 4·91; Sirsi, 4·27; Haliyal, 1·51.	Common rice in Karwar 12 seers; district average 15 seers per rupee. Rice plants in ear on coast; plucking cardamoms commenced up-country. Small-pox—1 death in Kumpta, 12 deaths in Sirsi; cholera, 9 cases in Mundgod and 4 deaths.
Rajkot ...	·14	Total rainfall 33·93. Weather warm and cloudy. General health good; fever and diarrhœa in some villages; cattle-disease at Manekvada. *Bajri* 36 and *juari* 46 pounds per rupee.
		General Remarks.—Rain sufficient in Sind, Guzerat, Nasik, Khandesh, and the Konkan, but slight in other parts of the Presidency; more urgently wanted in most districts of the Deccan and Southern Mahratta Country. *Kharif* crops in parts of Shikarpur and the Upper Sind Frontier, and *bajri* and cotton in parts of Ahmedabad slightly damaged by excessive rain; young crops withering for want of rain in 3 talukas of Ahmednagar and 1 of Belgaum. Want of fodder much felt in Sholapur and Ahmednagar. Preparations for *rabi* sowing commenced in three districts. Cholera, fever, small-pox, and cattle-disease continue in several districts.
Bengal—(Sept. 10th)		
Chittagong ...	7·71	Weather seasonable. Prospects of crops fair; transplanting still continues. Prices stationary. Sporadic cases of cattle-disease still reported.
Dacca ...	4·58	Cutting of jute and *aus* paddy continues; sowing of *kalai* commenced; prospects of crops good. Water rising.
24-Pergunnahs (Calcutta)	11·73	Prospects of *amun* paddy satisfactory, *aus* paddy being cut and outturn is estimated at 12 annas. Transplanting of *amun* nearly finished; jute being cut and steeped; sugarcane doing well. Price of common rice varies from 11½ to 15½ seers per rupee. Public health generally good, fever as usual in this season. Rivers rising.
Moorshedabad ...	2·04	Weather stormy and latterly fine. *Aus* cutting about finished, with at most an 8-anna outturn. With good rain this and next month, *amun* may be an 8-anna crop; but in no case has full amount been planted out, and in some villages only 2-anna crop transplanted. Scarcity of water is apprehended. Prices rising. Prospects critical.
Rajshahye ...	3·87	Rain has done good locally. *Aus* harvesting nearly finished. Health good.
Burdwan ...	6·58	Crop prospects generally dubious, but improved by recent rain; prospects unfavourable in four thanas, much land being untransplanted. Price of rice falling very slightly.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Rungpore ...	1·08	Weather hot and cloudy. Transplanting of *amun* much checked and delayed for want of sufficient rain. Prices of food-grains rising. Malarious fever prevails.
Bhagalpur ...	·21	Harvesting of *bhadoi* almost over with poor outturn; outturn of *marwa* good, but prospects of *amun* not so. Rice 12 seers 10 chittacks per rupee.
Purneah ...	·61	*Aghani* prospects very poor, except in the north; tansplanting progressing fairly. Common rice 14 seers per rupee. Much fever. Large rivers rather high.
Patna ...	·08	*Bhadoi* harvesting continues; paddy already transplanted is suffering from want of rain. Cholera prevalent in Behar and Dinapore sub-divisions.
Durbhunga ...	·73	*Bhadoi* being harvested, outturn 6 to 8 annas; paddy badly in need of rain. Prices falling slightly. Public health good.
Hazaribagh ...	2·02	Weather seasonable. *Bhadoi* harvesting continues, and prospects of paddy continue unfavourable in most thanas owing to scanty rain. Cholera and small-pox reported from some thanas, otherwise public health good.
Cuttack ...	3·98	Weather very wet. Outturn of *beali* about average; *sarad* being weeded. Heavy rain has done much good. Rivers rising fast and may cause damage. Price of rice little higher. Fever and few cases of cholera reported.
		General Remarks.—The rainfall of the week, which was general and in some places heavy, has improved prospects of *amun* paddy, but the rain is still insufficient in many districts, and transplanting of *amun* paddy is delayed, and young plants on high lands are suffering. Rain badly wanted in many districts, especially in those of Behar and Orissa. Prospects on the whole not favourable. *Aus* harvesting continues generally with moderate outturn; jute steeping going on and sugarcane doing well. Price of rice is falling slightly in some districts and rising in others. Fever is prevalent in some districts and cholera still prevails in Patna.
N.W. Provinces and Oudh—		
Benares (Sept. 8th)	1·0 (average)	*Kharif* crops and rice flourishing; *sawan* cut; ploughing for *rabi* commenced. Cholera and fever slight in city. Prices fluctuating slightly.
Allahabad („ „)	Heavy rains in early part of the week.	Weather most beneficial to all crops; breaks during last four days. *Kharif* crops coming into market. Prices beginning to fall. Health excellent.
Gorakhpur („ 6th)	Light showers	Crops promising. Cholera still prevalent in the Deoria tahsil, almost none elsewhere. Prices stationary.
Jhansi („ 9th)	.....	A break in rain would be beneficial, the crops in marsh soil having suffered from excessive moisture. Prices rising. Cholera continues.
Agra („ 6th)	Rain in all parganas from ·7 to 6·6.	Slight cholera continues. *Kharif* prospects good. Prices steady.
Bareilly („ 8th)	.....	Weather seasonable. Prices slightly falling. One or two cases of cholera; health otherwise good.
Meerut („ 9th)	General rainfall throughout district on 2nd, other heavy showers also.	A welcome break has commenced. Crops flourishing. Fever and ague prevalent; cholera in Dasna. Prices falling.
Kumaon („ 8th)	Slight but sufficient rain.	Crop prospects good; early millets and rice being reaped in valleys. Some fever, otherwise health fair. Prices stationary.
Lucknow („ „)	1·1	Prospects favourable; *sawan, kodon, kakun,* and large *juari* are being cut in places. Condition both of men and cattle good; slight cholera in city and district. Supplies sufficient. Prices stationary.
Partabgarh („ 5th)	Rainfall for the district from 2·1 to 3·1.	*Sawan, makra,* and early rice being reaped. General health good. Prices stationary.
Sitapur („ 8th)	.....	The break in the rain still continues. *Sawan* is being cut and prospects remain favourable.
Fyzabad („ „)	·5 at Sadr; none elsewhere.	Prospects favourable. Condition of people and cattle good. Markets well stocked.
Rae Bareli („ 6th)	.....	Weather cloudy; wind variable; a break in the rains. Crops flourishing. Health of men and condition of cattle good. Supplies abundant. Prices almost stationary.
Cawnpore („ 8th)	·3 to 4·3 of rain during week.	Prospects fair; some injury to crops in parganas Bilhaur and Narwal from heavy rainfall. Fever prevalent.
Farukhabad („ „)	1·5 (average), but last four days have been fine.	A break is much needed. Fever increasing; no other sickness. Prices stationary.
		General Remarks.—General rain during the week. The *kharif* harvest has commenced; prospects are excellent, and prices have begun to fall. Excepting some seasonable fever and slight cholera the public health is everywhere good.
Punjab—(Sept. 10th)		
Delhi ...	2·60	Health fair. Prices almost stationary.
Hissar ...	.....	Health good, but moderate autumn fever. Crops flourishing and maturing; *rabi* ploughings commenced. Prices falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Umballa ...	·20	Fever prevailing throughout the district. Crops flourishing, yield expected to be good. Prices gradually falling.
Jullundur ...	1·40	Crops in good condition. Slight fever about. Prices falling.
Amritsar ...	5·8	Health good. Prices falling.
Sialkot ...	3·0	Prospects and health good. Prices falling.
Ferozepore ...	Rain at City, ·60; at Zira, ·40 and at Muktsar, ·80.	Health and state of crops good. Prices stationary.
Lahore ...	2·20	Health good. Prices stationary.
Rawalpindi ...	1·70	*Kharif* prospects good in six tahsils and average in one. Health good. Prices falling.
Mooltan ...	·70 at Sadr	Health and crops good. Prices nearly stationary.
Dera Ismail Khan ...	.....	Slight rain. Health and prospects good. Prices stationary.
Peshawar ...	·40	Health good. Prices falling.
		General Remarks.—Rain has fallen in nearly every district. Fever exists in the Hissar division and in the Umballa and Jullundur districts, elsewhere the health of the province is good. Crop prospects are good. Prices are on the whole falling.
Central Provinces—(September 10th)		
Nagpur ...	3·85	Weather clear. Prospects good, except of *juari* and *tur* which have suffered from continuous rain; ground being prepared for *rabi* sowings. Fever and cattle-disease prevalent, also some small-pox. Prices steady.
Jubbulpore ...	5·22	Weather cloudy. Crops bad in low lands; weeding continues; Wheat 24 and rice 12 seers per rupee. Health good.
Saugor (Sept. 9th) ...	2·0	Weather cloudy. Weeding impeded owing to excessive moisture, and break is anxiously looked for. Health fair. Prices steady.
Seoni ...	9·0; 6·09 on the 6th instant.	Rain causing great damage to *til*, pulse and cotton; break urgently wanted. Cattle-disease increasing. Prices firm.
Hoshangabad ...	.....	No report received.
Khandwa ...	7·99; severe storm and heavy rain on the 7th instant.	Trains detained by floods. Wheat 22, rice 13¾, and *juari* 28 seers per rupee. Prospect good.
Raipur ...	.....	Weather rainy, with occasional breaks. Weeding continues. Fever prevalent. Rice 23 and wheat 28 seers per rupee.
Sambalpur ...	7·89; heavy rain on 6th.	A full rice harvest expected. Fever and cattle-disease prevalent. Common rice 26½ seers per rupee
		General Remarks.—Rain still heavy, especially in northern districts; break anxiously looked. Prospect fair. Health good, and prices steady.
British Burma—(Sept. 10th)		
Akyab (Sept. 6th)	17·74	Total rainfall 160·51. Cholera still prevalent in town and districts, small-pox in two circles; cattle-disease in two townships.
Rangoon („ „)	4·40	Total rainfall 73·05.
Bassein („ „)	5·83	Total rainfall 78·24.
Amherst („ „) (Moulmein)	9·38	Total rainfall 140·05.
Toungoo („ „)	6·79	Total rainfall 62·07.
Kyoukphyoo („ „)	...	No report received.
Sandoway („ „)	...	No report received.
Hanthawaddy („ „)	...	No report received.
Pegu („ „)	Week ending 30th August, 4·59; total 87·0; week ending 6th September, 4·45; total 91·45.	.....
Tharrawaddy („ „)	...	No report received.
Prome („ „)	1·88	Total rainfall 33·02. Slight cholera in district.
Thonegwa („ „)	...	No report received.
Henzada („ „)	4·64	Total rainfall 74·58.
Thayetmyo („ „)	2·95	Correct total to date 26·13. Slight cattle-disease in one township.
Shwaygyin („ „)	...	No report received.
Tavoy („ „)	9·97	Total rainfall 131·68.
Mergui („ „)	.....	No report received.
		General Remarks.—Except for cholera in Akyab and to some extent in Prome, public health good; health of cattle also good. Crop prospects favourable.
Assam—(Sept. 10th)		
Gauhati ...	·35 fell during the week ended 9th instant.	Weather seasonable. Prospects of tea and *sali* crops good; sugarcane doing well. Fever very prevalent.
Sylhet ...	0·70	Prospects generally good. More water required for rice in Habiganj and Sonamganj.
Cachar ...	1·53	Weather warm. Transplanting of *sali* crops nearly finished, but some of it damaged by the late flood. Common rice 16 seers per rupee. Prospects of tea not good. Assam bug and red spider have again appeared. Health good.
Dibrugarh ...	0·25	Weather cool. Transplanting of *sali dhan* finished and tea doing well. District healthy.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(Sept. 10th)		
Bangalore ...	0·48	Crops progressing in parts owing to the recent rain, but in other places prospects have not improved.
Mysore ...	0·67	Prospects have slightly improved, but condition of crops still indifferent. Very little rain has fallen. Crops on the western side of the province in fair condition, but towards the east they are generally in a critical condition, and the cattle are suffering from want of sufficient fodder. Public health good.
Mercara ...	2·35	Cardamoms and *ragi* crops about to be harvested. Prices stationary. Small-pox spreading at Verarajendrapett.
Berar & Hyderabad—(Sept. 10th)		
Amraoti ...	6·48	Weather cloudy. Crops flourishing everywhere. Wheat 20 and *juari* 30 seers per current sicca rupee.
Akola ...	1·83	*Kharif* crops thriving; *rabi* preparation commenced.
Hyderabad ...	·23 (average)	Total rainfall from 1st January 24·08. Weeding of standing crops continues. Rain wanted in one taluka. No sickness. Prices—wheat 14¾, coarse rice 11½, white *juari* 16½, yellow *juari* 20¾, and *tur* 18½ seers per current sicca rupee.
Central India States—(Sept. 10th)		
Indore ...	3·59	Total rainfall 28·34. The rainfall, though somewhat capricious, has on the whole been favourable throughout Malwa. The *kharif* and grass crops promise to be average ones. Health is good, though there are a few sporadic cases of cholera.
Morar (Gwalior) ...	1·30	Total rainfall 27·42. Health and prospects good.
Sutna ...	3·16	Fever prevalent. Prospects good.
Neemuch ...	1·81	Total rainfall 13·23. Weather cloudy and cold. Agricultural prospects good. Cholera in Neemuch city.
Goona ...	1·2	*Mukka* and *juari* suffering from continuous rain, a break much wanted.
Agar ...	2·2	Total rainfall 22·48. Weather cloudy. Health and prospects of crops good.
Sehore ...	5·21	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	3·28	Total rainfall 62·93. *Kharif* prospects impaired by much rain. Cholera in various parts of Bundelkhand and Bhopawar.
Maipur (Bhopawar) ...	4·75	Total rainfall 39·60. Crops and health good. Prices of food-grain low.
Rajputana—(Sept. 10th)		
Abu (Sept. 10th)	10·98	Weather cloudy occasionally, clear and seasonable.
Sirohi („ 7th)	4·84	Tanks, wells, health, and crops prospects good. Weather cool and cloudy, if more rain falls, crops will be damaged.
Marwar („ 5th)	5·93	Rain incessant during week; break required; further falls being likely to damage existing crops and old buildings. In Jodhpore city and towns still raining; Jodhpore city, tanks also full; sufficient water for whole year. Fever prevails to some extent. Crops good. Prices falling.
Meywar („ 7th)	3·54	Tanks, wells, and crop prospects very good. Health good. Weather seasonable.
Harowti („ 6th)	Deoli, 2·91; Tonk, 4·66; Kotah, 1·45 and Shahpura, 4·19.	Prospects fair. Cholera in Tonk abating; a few cases reported in Bundi State.
Jhallawar („ 5th)	Partial shower	High wind from south-west.
Ajmere („ 9th)	6·96	Tanks nearly full. Prospects excellent. Prices fallen. Health improved.
Jeypore („ „)	9·11	Prospects favourable. Cholera continues in districts; few sporadic cases in capital. Prices steady.
Ulwur („ „)	7·26 (average)	Prices falling. Wheat 20½, barley 27½, *bajri* 23, *juari* 22½, and gram 24½ seers per rupee. Fever in two tahsils; health good.
Nepal—(Sept. 4th)		
Katmandu ...	·84	Weather showery and warm. Crop prospects fair.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 10th September, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

The Hon'ble J. Gibbs, C.S.I., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.

The Hon'ble J. W. Quinton.

The Hon'ble D. G. Barkley.

BURMA STEAM-BOILERS AND PRIME-MOVERS BILL, 1884.

The Hon'ble MR. ILBERT introduced the Bill to amend the Burma Steam-boilers and Prime-movers Act, 1882, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Gibbs and Quinton and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *British Burma Gazette* in English and in such other languages as the Local Administration might think fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 24th September, 1884.

SIMLA;
The 11th September, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RULE AS TO THE MODE OF EXECUTING TRANSFERS OF PROPERTY PLACED BY THE GOVERNMENT OF THE NORTH-WESTERN PROVINCES AND OUDH UNDER THE MANAGEMENT OF A MUNICIPAL BOARD.

No. 110.

Extract from the Proceedings of the Government of India in the Home Department (Municipalities), under date Simla, the 9th September 1884.

Read—

A letter from the Government of the North-Western Provinces and Oudh, No. $\frac{514}{IX-20}$, dated the 28th July 1884.

RESOLUTION.

In exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Cap. fifty-nine, section two, the Governor General in Council is pleased to empower the Lieutenant-Governor and Chief Commissioner of the North-Western Provinces and Oudh to make and incorporate in the rules framed under clauses (*e*) and (*l*) of section 64 of the North-Western Provinces and Oudh Municipalities Act, 1883, the following rule as to the mode of executing transfers of property placed by the Local Government under the management of a municipal board:—

Rule.

Every transfer of property placed by the Local Government under the management of a board shall, unless the Local Government in any case otherwise direct, be made by an instrument under the common seal of the board, signed by the Chairman and a Secretary, and expressed to be so signed on behalf of Government and, where these rules require such sanction, with the previous sanction, as the case may be, of the Collector or Deputy Commissioner of the District or of the Commissioner of the Division or of the Local Government.

ORDER.—Ordered, that this Resolution be communicated to the Government of the North-Western Provinces and Oudh, and be published in the Supplement to the *Gazette of India*.

A. MACKENZIE,
Secretary to the Government of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

№ 38.} CALCUTTA, SATURDAY, SEPTEMBER 20, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 1st QUARTER OF 1884.

No. 840 R. T., dated Simla, 9th September 1884.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 933 R. T., dated 27th August 1883.
" " " " " 485 R. T., dated 2nd June 1884.

Read also—

Returns of accidents to trains, &c., on the open lines of Railway in India for the quarter ending 31st March 1884.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling stock, permanent-way, &c., shows a decrease of 90 or 12·57 per cent. against an increase of 498 miles or 4·93 per cent. in the open mileage, and of 67,719 miles or 0·66 per cent. in the train-mileage. The following are the Railways on which the fluctuations chiefly took place :—

	Increase.	Decrease.
East Indian	. .	30
South Indian	. .	18
Great Indian Peninsula	. .	38
Bombay, Baroda, and Central India	10	. .
Punjab Northern	. .	23
Indus Valley	. .	53
Rajputana-Malwa	28	. .
Northern Bengal	. .	18

2. The decrease on the East Indian Railway was mainly due to the number of accidents under "goods trains or parts of goods trains, engines, &c., leaving the rails" being only 1 against 9, that under "trains running over cattle on the line," 8 against 18, and that under "other accidents," *nil* against 6.

3. On the South Indian Railway the number of cattle accidents diminished from 43 to 23.

4. Of the decrease of 38 accidents on the Great Indian Peninsula Railway, 11 occurred under "goods trains, or parts of goods trains, engines, &c., leaving the rails," 16 under "fire in trains," and 10 under "other accidents."

5. The largest increase on the Bombay, Baroda, and Central India Railway took place under "other accidents," the number of cases shown under this head being 25 against 18.

6. On the Punjab Northern State Railway there was a satisfactory decrease under "fire in trains," the number of cases having been only 1 against 25.

7. On the Indus Valley State Railway the number of cattle accidents decreased from 33 to 22, "the failures of machinery, springs, &c., of engines" from 35 to 13, and "fires in trains" from 25 to 16.

8. The increase on the Rajputana-Malwa Railway principally occurred under "trains running over cattle on the line."

9. On the Northern Bengal Railway there was no noticeable variation under any particular heads.

10. The total number of accidents on the Calcutta and South-Eastern Railway shows an increase of 2 only, but it appears from the details that while the number of cattle accidents rose from 8 to 20, the number of miscellaneous accidents was *nil* against 7.

11. The casualties resulting from accidents to trains, &c., were among passengers, *nil* against 4 injured, and, among servants, 1 killed and 11 injured, against 2 killed and 6 injured. In a case of derailment of a material lorry, caused by the sudden application of the brake at the Bhore Ghât reversing station, Great Indian Peninsula Railway, 6 servants of the Company were more or less injured.

12. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby:—

Description of Accidents.	Number of Accidents.	Number of Passengers and others.		Number of Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains or parts of passenger trains	2	. .	. .	. .	. .	. .	. .
Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line	9	. .	. .	. .	1	. .	1
Collisions between goods trains, or parts of goods trains	22	. .	. .	. .	1	. .	1
Collisions between light engines	4	. .	. .	. .	1	. .	1
Passenger trains, or parts of passenger trains, leaving the rails	15	. .	. .	. .	. .	. .	. .

Description of Accidents.	Number of Accidents.	Number of Passengers and others.		Number of Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Goods trains, or parts of goods trains, engines, &c., leaving the rails	69	. .	. .	. .	. .	. .	. .
Trains, or engines travelling in the wrong direction through points	21	. .	. .	. .	. .	. .	. .
Trains running into stations or sidings at too high a speed	1	. .	. .	. .	. .	. .	. .
Trains running over cattle on the line	210	. .	1*	. .	. .	. .	1*
Trains running over obstructions on the line	23	. .	. .	. .	. .	. .	. .
Trains running through gates at level crossings	19	. .	. .	1	1	1	1
The bursting of boilers or tubes, &c., of engines	21	. .	. .	. .	. .	. .	. .
The failure of machinery, springs, &c., of engines	43	. .	. .	. .	. .	. .	. .
The failure of tyres	5	. .	. .	. .	. .	. .	. .
Ditto of wheels	1	. .	. .	. .	. .	. .	. .
Ditto of axles	6	. .	. .	. .	. .	. .	. .
Ditto of brake apparatus	1	. .	. .	. .	. .	. .	. .
Ditto of couplings	34	. .	. .	. .	1	. .	1
Broken rails	4	. .	. .	. .	. .	. .	. .
The flooding of portions of permanent-way	1	. .	. .	. .	. .	. .	. .
Fire in trains	53	. .	. .	. .	. .	. .	. .
Fire at stations, or involving injury to bridges or viaducts	5	. .	. .	. .	. .	. .	. .
Other accidents	57	. .	. .	. .	6	. .	6
Total	626	. .	1*	1	11	1	12

* Not Passenger.

13. The number of cattle accidents was the same as in the corresponding quarter of 1883, but it appears that there were decreases of 10, 20, 8, and 11 on the East Indian, South Indian, Great Indian Peninsula, and Indus Valley and Kandahar Railways, and increases of 24 and 12 on the Rajputana-Malwa and Calcutta and South-Eastern State Railways, respectively.

14. Of 21 cases of "bursting of boilers or tubes, &c., of engines," 9 occurred on the Indus Valley and 7 on the Rajputana-Malwa Railway. On the Sind, Punjab, and Delhi Railway there was a large decrease under this head, the number reported being 1 only against 11 in the 1st quarter of 1883.

15. The number of cases of "failures of machinery, springs, &c., of engines" decreased from 66 to 43 or by 23, of which the largest number 22 is due to the Indus Valley Railway.

16. The couplings failed in 34 instances, of which 6 took place on the Sind, Punjab, and Delhi, and 14 on the Rajputana-Malwa Railway.

17. All the 4 cases of "broken rails" occurred on the Rajputana-Malwa Railway, but, as compared with the corresponding quarter of the previous year, there has been a reduction of 6 accidents.

18. The cases of "fire in trains" decreased from 95 to 53, or by 44 per cent. As already noticed, the decrease principally took place on the Great Indian Peninsula, Punjab Northern, and Indus Valley Railways.

19. The casualties to passengers from causes other than accidents to trains, &c., were—

	Killed.	Injured.
From falling between carriages and platforms	3	2
Falling on to the platform, ballast, &c., when getting into or out of trains	. . .	2
Whilst crossing the line at stations	1	. . .
Falling out of carriages during the travelling of trains	6	10
Other accidents	1	3
TOTAL	11	17

20. And the accidents to servants in the employ of Railways or of contractors, whilst performing duties connected directly with the transit of passengers and goods, from causes other than accidents to trains, &c., were—

	Killed.	Injured.
During shunting operations	6	11
Falling of engines, vans, wagons, &c.	2	9
Coming in contact with over-bridges, &c., during the travelling of trains	. . .	2
Coming in contact, while shunting, with vehicles, &c., standing in adjoining lines	1	. . .
Getting on or off trains, engines, &c.	3	9
Whilst loading, unloading, or sheeting	1	14
Whilst braking, spragging, or chocking wheels	. . .	4
Whilst working at cranes or capstans	1	5
Whilst working on the permanent-way or in sidings	. . .	4
Whilst walking along the line on the way home or to work	1	1
Whilst walking, crossing, or standing on the line	9	3
Whilst passing between vehicles	1	2
Whilst attending to the machinery of engines, cleaning them, &c.	1	2
Falling or being caught between vehicles and platforms	. . .	1
By falling of lamps, wagon doors, timber, weights, &c.	1	2
Whilst coupling or uncoupling wagons	3	7
Miscellaneous	4	18
TOTAL	34	94

21. Of other persons killed and injured by running trains, &c., 2 were killed whilst passing over the line at level-crossings; 21 were killed and 4 injured whilst trespassing on the line; 9 committed suicide; and 2 were killed and 5 injured from miscellaneous causes.

22. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1883:—

	1st QUARTER, 1883.		1st QUARTER, 1884.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	. . .	4	. . .	1
From misconduct or want of caution	6	27	11	16
Servants.				
From causes beyond their own control	4	11	3	11
From misconduct or want of caution	35	71	32	94
Others.				
Whilst passing at level-crossings	4	2	2	. . .
Trespassers, including suicides	24	4	30	4
Other persons	2	4	2	5
TOTAL	75	123	80	131

23. In addition to the above, 8 persons are reported to have been killed and 34 injured in yards, workshops, &c., and 97 passengers to have met death in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—The satisfaction of the Government of India should be communicated to the authorities concerned at the decrease in the number of accidents on the East Indian, South Indian, Great Indian Peninsula, Punjab Northern, and Indus Valley Railways, and especially the decrease under "trains running over cattle on the line" on the South Indian Railway, and "fire in trains" on the Great Indian Peninsula and Punjab Northern Railways. The attention of the Director General of Railways should be invited to the

increase under cattle accidents, and the large number of "failures of couplings" on the Rajputana-Malwa Railway.

ORDER.—Ordered, that this Resolution, together with the Abstract Returns compiled by the Government of India, be forwarded to the Governments, Administrations, and Officers noted in the margin for information.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor General for Rajputana, Central India, and Beluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 16th September 1884.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 17th SEPTEMBER 1884.

General Remarks.—In the Madras Presidency the rainfall was again light, and the prospects of the crops continue unfavourable in the Ceded Districts and in parts of Madura and Coimbatore. Rain still holds off in Mysore, and the prospects of the crops in most districts are very bad. Fodder is also becoming scarce. In Coorg prospects are favourable. In parts of the Deccan and the Southern Mahratta Country rain is still insufficient; elsewhere in the Bombay Presidency there has been good rain, and in parts it was excessive and crops have been slightly damaged. In the Nizam's territories, the Berars, and the Central India and Rajputana States prospects are very good. There was rain throughout the North-Western Provinces, Oudh, and the Punjab, and prospects are good.

The heavy rain which continues in the Central Provinces is injuring the crops in places; and a break would be beneficial. In Bengal rain is still insufficient, and more is very much wanted in many districts. Good rain fell in three districts of Assam, but more is wanted in Gauhati. The last report of the Meteorological Department, dated 18th instant, shows that rain is confined to the western, central and southern parts of India, to Burma, and to Eastern Bengal.

Harvesting is in progress in a few districts of the Madras Presidency. *Kharif* prospects are good in the North-Western Provinces and Oudh and the Punjab. Preparations for the *rabi* are in progress in Bombay and the North-Western Provinces and Oudh. In Bengal transplanting of *amun* is still going on, and the *aus* harvest continues.

Cholera, small-pox, and fever are prevalent in most provinces. Prices are rising in Bellary and Kurnool and are fluctuating in Bengal. In the North-Western Provinces and Oudh they show a tendency to fall; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Sept. 17th)		
Bellary ...	·12 (average)	Standing crops generally withering. Pasture and water scanty. No improvement. Prices rising.
Kurnool ...	·49 (average)	Prospects somewhat better, but prices rising. Some small-pox and cattle-disease.
Ganjam ...	2·09 (average)	More rain wanted. Transplantation in progress. Fever, small-pox, and cholera in parts.
Kistna ...	·91 (average)	Standing crops generally good; harvest gingelly, outturn poor. River 5·60 feet over anicut. Small-pox, fever, and cattle-disease in places; 45 deaths from cholera.
Chingleput (Madras) ...	·04 (average)	Insufficient rain. Standing crops generally fair; harvest paddy and *ragi*, yield half the average. Small-pox generally prevalent; 44 deaths from cholera.
Coimbatore ...	·09 (average)	Standing crops wet good in 5 taluks, elsewhere withering; dry crops fading; harvest dry crops, outturn below average. Slight small-pox and fever. Fodder scarce. Cattle suffering in parts.
Tanjore ...	·50 (average)	Standing crops generally good. Rivers 1 to 8 feet. Harvest paddy and *cholum*, outturn average. 78 deaths from cholera.
Madura ...	·70 (average)	Prospects tolerably good in 3 taluks, elsewhere crops fading from want of rain. 25 deaths from cholera.
Malabar ...	1·11 (average)	First crop paddy being harvested, outturn fair; operations for second crop cultivation progressing. Slight small-pox in 7 taluks and fever in 3 taluks; 30 deaths from cholera.
Travancore ...	·21	Operations for second crop cultivation progressing. Fever and small-pox in parts; 4 deaths from cholera. *General Remarks.*—General prospects fair, except in the Ceded Districts, parts of Madura and Coimbatore, where drought continues, and prospects are unfavourable.
Bombay—(Sept. 17th)		
Karachi ...	·27; average of 15 other stations, 1·88.	River at Kotri on 15th, 15 feet 10 inches against 14 feet 10 inches on same date last year. Fever in 4 talukas and cattle-disease in 5 talukas. *Kharif* crops coming into ear in places. Slight shocks of earthquake felt at Sujawal, Mirpur Botoro and Jati on 3rd and 4th, duration 3 seconds to 5 minutes; no damage done. Small-pox in 10 villages in districts, 7 fresh cases, 2 deaths, 14 remaining sick. Prices—wheat, red rice and *bajri* in Karachi 26, 30 and 34, in Kotri 30 and 36, in Ghorabari 22 and 32, and in Shahbandar 20, 32 and 32 pounds per rupee, respectively.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Hyderabad ...	Rain in 7 talukas; average 1·07.	River at Kotri on 14th, 15 feet 4 inches against 15 feet last year. Crops slightly damaged through rain. Small-pox in 3, fever in 7, and cattle-disease in 2 talukas.
Ahmedabad ...	·26	Total rainfall 30·33. Slight damage to *bajri* and *juari* in Dholka by flood, to cotton crops in Dholira, and to *bajri*, *juari*, and cotton crops in Viramgaum by excessive rain; other crops healthy. Cholera in the city, 4 cases fatal, in Parantij 1 case, and in Viramgaum 16 cases, 9 fatal; fever and cattle-disease in Dholka. Wheat 31 and *bajri* 32 pounds per rupee.
Baroda ...	1·43	Total rainfall 37·46. Cholera in Dehgam and Vijapore mahals. Crops in fair condition. Prices—*bajri* 28 and rice 22 pounds per rupee.
Surat ...	2·38	Total rainfall 32·85. *Juari* crops injured by floods in some villages of the Olphad taluka; healthy elsewhere. *Juari* 30 and *nagli* 41 pounds per rupee.
Nasik ...	Rain throughout the district.	Crops flourishing; land being prepared for *rabi*. Public health generally good. Wheat 37, *bajri* 33½, and rice 17½ pounds per rupee.
Colaba (Bombay) ...	Light rain daily; total of week, 2·58.	Total to date 58·56, being 5·71 below average. Abnormal temperature 2° to 0° cool; vapour in air somewhat excessive; abnormal wind southerly from 10th to 12th.
Poona ...	At Khandalla, 2·64; light showers in 6 talukas; no rain in Bhimthadi.	Crops withering for want of rain, and scarcity of fodder felt in the Eastern Division. *Bajri* 32 and *juari* 33; in Poona, *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	In Kopargaon, 1·32; Sangamner, 1·17; Jamkhed, ·73; none in Shrigonda, and slight in remaining talukas.	Owing to a scanty rainfall the *bajri* crop is reported to be withering in Shirgonda; more rain is urgently wanted for the *kharif* already sown. *Rabi* is being sown in all the talukas, except Jamkhed, Kopargaon, and Akola, with the hope that more abundant rain will fall hereafter. Want of fodder for cattle is much felt everywhere, except in Akola. Slight fever in Sheogaon; cattle-disease in Parner. *Bajri*—maximum 48 pounds per rupee in Akola, minimum 33 in Shrigonda; *juari*—maximum 54 pounds in Akola, minimum 33 in Karjat.
Sholapur ...	·92; Barsi, ·4; Madha, ·39; Karmala, ·1; Pandharpur, ·44; Sangola, ·21; Malsiras none.	*Juari* 33 pounds and *bajri* 32 pounds 30 tolas per rupee. Slight rainfall of no benefit to crops. Grass prospects slightly better.
Dharwar ...	Navalgund, maximum ·53; Bankapur, ·46; Dharwar and Ron nearly ·20; Kod, Hangal and Hubli, nealy ·10; none in the rest of the district.	Sowing of cotton in eastern talukas is retarded; elsewhere in progress. All standing crops urgently require rain; there are signs of early rainfall. Cholera abating, except in Navalgund and Bankapur talukas. Slight rise in prices (average); *juari* 55 and rice 31 pounds per rupee.
Kanara ...	Karwar, 1·78; total 84·02; Kumpta, 1·19; Sirsi, 1·8; Haliyal, ·14.	Common rice in Karwar 12 seers; district average 15¼ seers per rupee. Small-pox—7 deaths in Kumpta, 4 deaths in Sirsi, and 1 death in Supa; cholera—2 deaths in Sirsi and 2 in Mundgod.
Rajkot ...	1·20; total 36·13	General health good. Weather cloudy. Cholera in Dhoraja; fever and diarrhœa in some villages in Wrath Prant. *Bajri* 38 and *juari* 50 pounds per rupee. *General Remarks.*—Rain throughout the Presidency. Crops slightly damaged by excessive rain or floods in parts of Hyderabad, Shikarpur, Upper Sindh Frontier, Ahmedabad, and Surat. More rain still wanted in parts of the Deccan and Southern Mahratta Country. Scarcity of fodder in Sholapur, Ahmednagar, and Kaladgi. Cholera in parts of 11 districts; fever, cattle-disease, and small-pox continue in several places.
Bengal—(Sept. 17th)		
Chittagong ...	·19	Weather hot. Transplanting nearly finished. Prices stationary.
Dacca ...	·50	*Mung* and *kalai* being sown; prospects of crops on low lands good. Water decreasing.
24-Pergunnahs (Calcutta)	.....	Prospects of standing crops very good; *aus* being cut, with about 12-anna outturn; harvesting of *aus* and cutting and steeping of jute going on; transplanting of *amun* finished. Price of common rice stationary. Fever in Barrackpore, health of the district generally good. Rivers rising.
Moorshedabad ...	·48	Jute being cut and is a fair crop, but there is a scarcity of water for steeping it in; prospects of *amun* are worse owing to continued dry weather. Fever in thana Khargaon; public health otherwise good.
Rajshahye ...	·05	Weather hot. More rain still wanted for *amun*; *aus* harvest over with 6 to 8-anna outturn. Public health fair.
Burdwan ...	·63	Rain urgently wanted. Crop prospects entirely dependent on continuance of the rains; transplanted paddy still healthy, though extremely backward, and some land is still being planted out, but much must remain untilled. Price of rice stationary.
Rungpore ...	5·17	Weather hot; more rain still wanted. Prices of food-grains rising. Malarious fever prevalent.
Bhagalpur ...	·09	Prospects of *aghani* paddy not good and much land remains fallow, and paddy planted out is withering in places. Rice 12 seers 2 chittaks per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	·48	*Aghani* prospects generally bad; paddy on high lands promises to be a failure; transplanting where possible over. Common rice 13 seers per rupee. Fever prevails. Ganges falling.
Patna ...	*Nil*	Harvesting of *bhadoi* crops being pushed; condition of paddy unsatisfactory, owing to deficient rainfall. Cholera prevalent in Behar Sub-division.
Durbhunga ...	·13	*Bhadoi* being harvested; paddy transplanting over. Rain badly wanted. Prices falling, except rice. Public health good.
Hazaribagh ...	2·09	Weather warm and close. *Bhadoi* being harvested; prospects of paddy little improved by recent rain and more rain is required. Cholera and small-pox still reported from certain thanas; general health good.
Cuttack ...	1·46	Weather hot. *Beali* being harvested with average outturn, *sarad* crops growing well. Price of rice stationary. Scattered cases of cholera reported. *General Remarks.*—More rain is very much wanted in many districts, and prospects of *amun* crops are on the whole not at all favourable, and are specially bad in 8 or 9 districts. Transplanting of the crop is still going on in many places; harvesting of *aus* continues. Price of rice unsteady. Public health generally good.
N.W. Provinces and Oudh—		
Benares (Sept. 15th)	Under 1·0	Crop prospects good. Slight fever and cholera in city. No sickness of men and cattle in district. Prices falling slightly.
Allahabad („ „)	No rain during week	Break of great value to the ripening crops and for preparation of land for the *rabi*; *kharif* crops coming into market. Prices slightly falling. Health excellent.
Gorakhpur („ 13th)	No rain	Rice harvest commencing; prospects good. Cholera still prevalent in Deoria tahsil. Prices stationary.
Jhansi („ 16th)	.....	The crops have suffered in some places from excessive rain. Prices falling. Cholera abating; fever reported from Man and Garotha.
Agra („ 13th)	Rain in five parganas from ·1 to 1·5.	*Kharif* ripening; *rabi* ploughings have begun. Prices steady. Slight cholera continues.
Bareilly („ 15th)	Showers	Weather bright. Prices steady. Cholera in city increasing.
Meerut („ „)	General rainfall throughout district.	A break required. Crops flourishing; early rice cut. Average outturn seasonable. Fever prevalent, otherwise health good. Prices easy.
Kumaon („ „)	Slight showers now and then.	Crops very good; early millets and rice being reaped. General health good, except a few cases of typhus; cattle-disease continues. Prices stationary.
Lucknow („ „)	Rain continues 1·9 to 2·0 during the week.	State of crops very good; *sawan*, *kodon*, and *kakun*, are being cut. Supplies abundant. Prices steady. Slight cholera in the city, and in the district condition of cattle good.
Partabgarh („ 12th)	No rain reported during the week.	*Kakun*, *makka*, and *sanai* being cut; prospects excellent. Prices falling. General health good.
Sitapur („ 15th)	Little rain has fallen, except in tahsil Biswan.	Rain is required for the *mash* sowings, in other respects the state of the crops is very favourable.
Fyzabad („ „)	·5 to 2·0 during the week.	Crops doing very well. Markets well supplied. Health of people and condition of cattle good. Prices stationary.
Rae Bareli („ 13th)	1·1 during the week	Weather cloudy; wind variable. Crops flourishing. Some cases of fever reported. Supplies abundant. Prices almost stationary.
Cawnpore („ 15th)	·1 to 2·0 of rain during the week.	Prospects fair; some injury to crops in parganas Bilhaur, Shurajpore, and Narwal. Fever and ague prevalent; few cases of cholera reported from 3 parganas.
Farukhabad(„ „)	Average 1·3 of rain during the week.	Crops promising. Prices stationary. No sickness, except usual fever. *General Remarks.*—The rains are slackening. *Kharif* harvest progresses and prices tend to fall. Prospects are good and public health normal.
Punjab—(Sept. 17th)		
Delhi ...	4·30	Fever prevailing. Harvest prospects good. Prices falling.
Hissar ...	.....	Fever prevalent in Hissar and Rohtak; cattle-disease in Rohtak. Crops maturing fast, good yield expected, probably in most places above average. Prices falling.
Umballa ...	6·20	*Kharif* crops flourishing; *makka* being harvested, yield expected to be good. Fever throughout the district. Prices stationary.
Jullundur ...	1·90	Slight fever. Crops good. Prices stationary.
Amritsar ...	.....	Health good. Prices falling.
Sialkot ...	4·0	Health good. Harvest above average expected. Prices falling.
Ferozepore ...	3·40	Health good. Probable yield of *kharif* crops good. Prices falling.
Lahore ...	·20	Health good. *Kharif* outturn expected. Prices stationary.
Rawalpindi ...	2·30	*Kharif* prospects good in six tahsils and average in one. Health good; cattle-disease in one tahsil. Prices falling.
Mooltan ...	5·50	Crops and health good. Prices stationary.
Dera Ismail Khan ...	·10	Health and *kharif* prospects good. Prices stationary.
Peshawar ...	·40	Health good. Prices fluctuating. *General Remarks.*—Rain in many districts. Fever in the Delhi, Hissar, Rohtak, Umballa, and Jullundur districts; elsewhere the health of the province is good. *Kharif* prospects good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(September 17th)		
Nagpur ...	3·4	Rain continues. Prospects fair; *juari* damaged in places. Ground being prepared for *rabi*. Fever somewhat prevalent; small-pox in one and cattle-disease in 2 tahsils. Prices steady.
Jubbulpore ...	2·75	Weather showery, but likely to clear. Weeding continues. Prices stationary.
Saugor (Sept. 16th) ...	2·71	Weather very wet. *Kharif* crops, except rice and *kodo* in bad way; *rabi* ploughings delayed. Health fair. Prices steady.
Seoni ...	2·36	Rain almost continuous, break urgently needed. All agricultural operations stopped. Cattle-disease still reported. Prices reported to fall.
Hoshangabad ...	5·22	Crops suffering from incessant rain. Fever prevalant; one case of small-pox. Wheat 21 and rice 10 seers per rupee.
Khandwa ...	.....	Weather cloudy. Prospects and health good; fields being prepared for *rabi*. Prices steady.
Raipur ...	1·26	Weather cloudy and rainy. Crops suffered in places from excessive rain; weeding continues. Fever and dysentry in Raipur town. Prices steady.
Sambalpur ...	4·63	Weather cloudy. Prospects of rice very good. Fever and cattle-disease prevail. Prices unchanged. *General Remarks.*—Rain almost general. Crops have suffered; prospects fair. Health generally good. Prices steady.
British Burma—(Sept. 17th)		
Akyab (Sept. 13th)	1·78	Cholera still prevalent, but somewhat less severe. Total rainfall 162·29.
Rangoon („ „)	1·0	Total rainfall 74·05.
Bassein („ „)	3·07	Total rainfall 81·31.
Amherst („ „) (Moulmein)	3·84	Total rainfall 143·89.
Toungoo („ „)	1·29	Total rainfall 63·36.
Kyonkphyoo („ „)	.....	No report received.
Sandoway („ „)	.....	No report received.
Hanthawaddy („ „)	.....	No report received.
Pegu („ „)	.....	No report received.
Tharrawaddy („ „)	.....	No report received.
Prome („ „)	0·6	Slight cholera. Total rainfall 33·62.
Thonegwa („ „)	.....	No report received.
Henzada („ „)	0·5	Slight cholera and small-pox in town. Total rainfall 75·08.
Thayetmyo („ „)	0·22	Total rainfall 26·35.
Shwaygyin („ „)	.....	No report received.
Tavoy („ „)	3·79	Total rainfall 135·47.
Mergui („ „)	.....	No report received. *General Remarks.*—Public health for most parts good, and weather seasonable.
Assam—(Sept. 17th)		
Gauhati ...	·50; rain during the week ended 16th instant.	Rain wanted. *Sali* paddy being still transplanted; prospects of tea good; sugarcane doing well. Public health fair.
Sylhet ...	3·01	State and prospects of crops favourable. Public health good.
Cachar ...	4·58	Weather warm. Fields damaged by the floods are being replanted. Common rice 16 seers per rupee. Prospects of tea not favourable. Health good.
Dibrugarh ...	3·65	Weather hot. Prospects of *sali* crops fair. District healthy.
Mysore and Coorg—(Sept. 17th)		
Bangalore ...	0·92	Standing crops slightly improved, owing to recent rain, but prospects bad, as crops will now be very short.
Mysore ...	No rain	Crops indifferent. General rain still holds of, and prospects are very uncertain. Crops reported withering in most districts, and fodder is becoming scarce. Public health good.
Mercara ...	1·88	The cutting of the *ragi* and picking of the cardamom crops have commenced, yield fair; transplantation of rice completed. Prices have fallen slightly.
Berar & Hyderabad—(Sept. 17th)		
Amraoti ...	1·59	Weather cloudy with occasional rain, crops in good condition. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	4·85	Prospects good. *Rabi* preparations continued.
Hyderabad ...	·76 (average)	Total rainfall from 1st January 24·84. *Kharif* and *abi* crops prospering. Cholera broken out in one taluka; in others general health good. Prices—wheat 14½, coarse rice 12, white *juari* 16½, yellow *juari* 20½, and *tur* 19 seers per current sicca rupee.
Central India States—(Sept. 17th)		
Indore ...	0·5	Total rainfall 28·39. Weather apparently gathering up for more rain; one heavy shower would do good. Prospects excellent at present. Public health here and in Central India generally good, though there is a little sporadic cholera in some parts.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—*contd.*		
Morar (Gwalior) ...	0·37	Total rainfall 27·79. Prospects good. Fever bad in Morar.
Sutna ...	1·40	Fine weather required for *kharif* crops. Fever prevalent.
Neemuch ...	0·19	Agricultural prospects favourable. Prices of food-grain falling. Wheat 24 seers per rupee.
Goona ...	1·31	A long break much wanted.
Agar ...	0·20	Health good. Prospects favourable. Prices falling.
Sehore ...	2·28	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	1·42	Total rainfall 64·35. *Kharif* prospects damaged by excessive rain; public health generally good, but cholera reported in some parts of Bandelkhand.
Manpur ...	4·0	Total rainfall 32·60. Crops good. Cases of cholera in Burwani.
Rajputana—(Sept. 17th)		
Abu (Sept. 17th)	5·62	Weather still cloudy, but seasonable.
Sirohi („ 14th)	·97	Tanks, wells, health, and crop prospects good. Weather cloudy and cool.
Marwar ...	.....	No report received.
Meywar (Sept. 14th)	·96	Tanks, wells, and crops prospects very good. Health good. Weather seasonable.
Harowti („ 13th)	·13; Deoli, ·43; Kotah, ·17; Tonk, 1·45; and Shahpura, 1·39.	Weather seasonable. Prospects good. Cholera in the town of Tonk, in the town and district of Bundi, and a few cases in the Kotah district.
Jhallawar („ 12th)	·80	Crops and health good.
Ajmere („ 16th)	·72	Prospects excellent. Health good. Prices falling.
Jeypore („ „)	·23	Crop prospects favourable. Health fair. Prices stationary.
Ulwur („ „)	1·30	Prospects very good. Health good. Prices continue falling.
Nepal—(Sept. 11th)		
Katmandu ...	3·32	Weather cooler. Prospects fair in the hills. The rainfall in the Terai is reported to be deficient and there may be partial scarcity, if more rain does not come soon.

No. 125 Met. 27-9.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorological),—dated Simla, the 19th September 1884.

Read—

Summary of the Weather Reports for August 1884.

Except at a few stations in the north-west of India the barometer has been generally low in the past month. The depression has been most strongly marked in Orissa, Ganjam, and the Central Provinces in the east, and in Guzerat and Sind in the west. Otherwise, with the single exception, shortly to be noticed, the relative distribution of pressure has been fairly in accordance with that which is usual at the time of year. In August there exists, as a general rule, a broad band of relatively low barometer stretching from the Indus Valley south-eastward to Behar, but, in the present month, this normal band was divided into two portions and formed two distinct areas of low pressure, one lying over Behar and Chutia Nagpur, the other over the Indus Valley. This change in the distribution of pressure coincided with a considerable variation of the winds from their normal character and consequently of the weather of Northern India.

Of travelling cyclonic disturbances, such as usually appear during the summer monsoon, there have been no examples of importance during the present month.

Temperature has been a little above the average at most of the Carnatic and Deccan stations and locally at a few places in Northern India also, but in general the temperature of the month has been below the average. In the Punjab and North-Western Provinces the changes of temperature have been sudden and considerable, but in other parts of the country the departures from the mean have as a rule been slight and gradual.

The humidity of the atmosphere has been slightly in excess over Northern and Central India, but in the peninsula the amount of moisture has shown either a slight deficiency, or, as on the Bombay coast, an almost exact agreement with the average.

The rainfall returns display considerable variations in the amount of precipitation. In the Punjab, with the exception of Murree, Rawalpindi, Simla, and Delhi, there has been more or less deficiency on the average, while over nearly the whole of the North-Western Provinces, on the contrary, there has been excessive rain. At Allahabad, however, a region of deficient rainfall commences, and from that station eastwards, in Behar, Bengal, and as far as Burma, the present month has been one of general deficiency. Over the central parts of the country the departures from the average were very irregular, ranging from an excess of 12 inches at the stations of Jubbulpore and Sutna to a deficiency of 5 inches at Khandwa. Rajputana, like the Punjab, has had a somewhat scanty rainfall, while Sind and Guzerat, though deficient on the mean of all stations, show irregularities similar in character to those of the more central parts of the country. On the west coast from Ratnagiri southwards, as well as at the inland stations of Belgaum, Mercara, Madura, Salem, and Wellington, the rainfall has been above the average, but both on the coast to the north of Ratnagiri and at almost every peninsula station to the east of the Ghauts, the amount of rain has been below the average of the month.

The largest total fall in the month has been 42 inches at Mercara, and there were 38 inches at Moulmein, 34 inches at Ratnagiri and Akyab, 32 inches at Mangalore, 30 inches at Karwar, and 27 inches at Goa and Simla. According to the data the largest number of wet days, 27, occurred in Burma and on the west coast, while the Central Provinces had 25 and Bengal (excluding Behar) and the North-Western Provinces 23.

Very heavy falls of rain were experienced in the west on the 28th and 29th, and in the North-West Himalaya and neighbouring region on the 7th, 10th, and partially on the 12th.

The following table sums up the rainfall returns under the divisions adopted in the weather summaries previously issued. It will be noticed that the deficiency reported from Behar and mentioned in the text is masked in the table by the excessive rain which has fallen in the North-Western Provinces and similarly the excess which is shown in Bombay, Madras, and Mysore is due to the heavy rain which occurred within a limited portion of the west coast and not to general excess over the whole region:—

Districts.	Average rainfall in August.	Difference of the rainfall of August 1884 from average August fall.
	Inch.	
North and West Punjab	5·20	—0·09
South Punjab, North-Western Provinces, and Behar ...	11·02	+ 2·24
Assam	11·32	+ 3·45
East Bengal	16·31	— 8·20
Lower Bengal, Orissa	13·46	— 5·04
Central Provinces	12·07	+ 2·60
Rajputana, Central India, and Berars	10·01	+ 1·39
Sind, Guzerat	5·48	— 1·63
Bombay	19·04	+ 2·25
Madras	6·51	+ 0·27
Mysore	11·42	+ 3·86
Ceylon	4·99	— 3·80
Burma	22·89	— 3·12

W. L. DALLAS,
Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the above Summary be printed in the Supplement to the *Gazette of India*.

E. C. BUCK,
Secretary to the Government of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

Nº 39.] CALCUTTA, SATURDAY, SEPTEMBER 27, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 24th SEPTEMBER 1884.

GENERAL REMARKS.—In the Madras Presidency the rainfall of the week has been heavier than that hitherto recorded and prospects have generally improved. In Coimbatore and Madura, however, the crops are still suffering from want of rain and in the former district fodder is becoming scarce. There was slight rain throughout Mysore and the condition of the crops has been slightly improved, but prospects still continue unfavourable. In Coorg the weather continues to be very beneficial to the standing crops and a good *ragi* harvest is expected. Good rain has fallen in most parts of the Deccan and Southern Mahratta Country and prospects have much improved. In several Deccan districts, however, more rain is still wanted for the young crops. There was rain throughout the Berars and the Nizam's territories and the Central India and Rajputana States, and prospects continue very good. In the North-Western Provinces and Oudh the rains are reported to be breaking up, and in the Punjab also there has been little or no rain during the week under report. In both Provinces prospects are good. In the Central Provinces there has been a slight break, but it was not of sufficient duration. Crops have been damaged in places by excessive rain, but prospects continue good. In Bengal the rainfall continues insufficient, and the prospects of the *amun* paddy are unfavourable. Rain is wanted in all the Assam districts for the *sali* crop and for tea.

The last report of the Meteorological Department, dated the 25th instant, shows that in the North-Western Provinces, except at one or two places in Bengal, the Central Provinces, the Berars, Central India, Bombay and Burma, rain has been general and in places heavy.

Harvesting continues in a few districts of the Madras Presidency. The earlier *kharif* crops are being cut in parts of Bombay and ploughing and sowing for the *rabi* have also commenced in Bombay, North-Western Provinces and Oudh, Punjab, and the Central Provinces. In the North-Western Provinces and Oudh and Punjab the *kharif* prospects are very favourable. In Bengal it is feared that transplanted paddy will be much damaged in many districts if heavy rain does not fall before long. The *bhadoi* harvest is in progress and sugarcane is doing well.

The public health is generally good, though cases of cholera, small-pox, and fever are reported in most Provinces.

Prices are rising in Bengal and falling in Madras; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Sept. 24th)		
Bellary ...	·84 (average)	Pasture scanty. Prices falling owing to rainfall.
Kurnool ...	2·17 (average)	Prospects improving. Prices generally falling. Some small-pox and cattle-disease prevalent.
Ganjam ...	2·18 (average)	Standing crops paddy thriving; transplantation in progress. Fever, small-pox, and slight cholera prevalent.
Kistna ...	3·11 (average)	Standing crops generally good; harvest dry crops, outturn below half the average. River 4·50 feet over anicut. Small-pox, fever, and cattle-disease in places; 14 deaths from cholera.
Chingleput (Madras) ...	2·47 (average)	Standing crops generally fair; harvest paddy and *ragi*, yield half the average. Small-pox generally prevalent; 23 deaths from cholera.
Coimbatore ...	·23 (average)	Standing crops wet, good in 5 taluks and fading in 3; dry crops fading everywhere; harvest dry crops, outturn below average; fodder scarce; and cattle suffering in parts.
Tanjore ...	·17 (average)	Standing crops generally good. Rivers 1 to 5 feet. Harvest wet and dry crops, outturn average. 84 deaths from cholera
Madura ...	·05 (average)	Prospects fair in 3 taluks, elsewhere crops fading from want of rain. 11 deaths from cholera.
Malabar ...	1·88 (average)	First crop paddy being harvested, outturn fair; transplanting operations for second crop cultivation progressing. Slight small-pox and fever prevalent; 14 deaths from cholera.
Travancore ...	2·08	Operations for second crop cultivation progressing. Fever and slight small-pox prevalent; 2 deaths from cholera.
		General Remarks.—General prospects fair, except in Ceded Districts, Coimbatore and parts of Madura; improved in Ceded Districts; prices falling.
Bombay—(Sept. 24th)		
Karachi ...	·7; average of 8 other stations, ·57.	Weather sultry. River at Kotri on 22nd, 15 feet 8 inches against 12 feet 3 inches on corresponding date last year. Fever in 6 and cattle-disease in 4 talukas. *Kharif* harvest commenced in places. Small-pox prevalent in 6 villages in the districts; 4 fresh cases, no deaths, 13 remaining sick. Prices—red rice, wheat and *bajri* in Karachi 24, 30 and 36, in Sehwan 36, 32 and 40, in Sujawal 26, 34 and 36, and in Tatta 26, 30 and 36 pounds per rupee, respectively.
Hyderabad ...	1·05 on 22nd	River at Kotri on 22nd, 15 feet 8 inches against 12 feet 3 inches in last year. Weather unsettled. Crops good; *juari* attacked by worms and *bajri* by blight in Sakrand; *rabi* operations under preparation. Small-pox in 3, fever in 12, and cattle-disease in 3 talukas. Wheat 29, *bajri* 41, *juari* 40, red rice 26, and white rice 20 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	3·85	Total rainfall 31·18. *Bajri*, *juari*, and cotton crops more or less damaged by excessive rain, other crops healthy. Cholera in the city, 2 cases fatal, and in Parantij 1 case fatal, in Viramgaum 3 cases; fever and cattle-disease in Dholka. Wheat 32 and *bajri* 34 pounds per rupee.
Baroda ...	5·59	Total rainfall 43·5. Crops in fair condition, but damaged in parts by excessive rain. Cholera continues in Dehgaon. Prices—*bajri* 28 and rice 22 pounds per rupee.
Surat ...	2·54	Total rainfall 35·39. Young crops thriving; *juari* 31 and *nagli* 41 pounds per rupee.
Nasik ...	Maximum in Nandgaon, 7·6; minimum in Sinnar, ·70.	Good rain throughout the district. Crops flourishing; land being prepared for *rabi*. Public health generally good. Wheat 37, *bajri* 33½, and rice 17½ pounds per rupee.
Colaba (Bombay) ...	Total of week, 4·86	Total to date 63·42, being 3·23 below average. Rain daily, except on 18th, heavy on 21st. Abnormal temperature 0° to 3° cool. Vapour in air normal. Abnormal wind generally backed from north-north-east on 17th to south on 23rd.
Poona ...	Maximum 2·53 at Khadkala; minimum at Poona, ·45.	More rain urgently wanted eastwards, but young crops reported to be improving in Indapur and Baramati; scarcity of fodder felt in east. *Bajri* 32 and *juari* 33; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Jamkhed, 4·55; Nagar-linch, 4·35; Karjat, ·96; Rahuri, 1·89; Kopargaon, 1·56; Shrigonda, 1·45; Nevasa, 1·33; Sheogaon, 1·31; Parner, 1·19; Sangamner, ·66; Akola, ·20.	The rainfall has been beneficial to the *kharif* crops. Sowing of *rabi* is in progress in all the talukas, except Jamkhed and Akola, where it will commence after a week. Slight fever in Sheogaon. *Bajri*—maximum 51 pounds in Sangamner, minimum 35 in Karjat. *Juari*—maximum 54 pounds in Akola and minimum 33 in Karjat.
Sholapur ...	Sholapur, 1·43; Barsi, 4·38; Madha, 2·73; Karmala, 1·8; Pandharpur, 1·60; Sangola, 2·98; Malsiras, ·77.	*Juari* 33 pounds 3 tolas and *bajri* 32 pounds 20 tolas. General prospects improved; *rabi* sowing in progress, but more rain wanted.
Dharwar ...	Gadag, 3·50; Ron, 3·10; Kalghatgi, 1·6; Kanajgi and Mugud Petha, ·60; Hubli, ·45; Kankarpur, ·40; Hangal, Kod, and Mundargi, ·32; Dharwar, Nargund, and Ranibennur nearly ·20; Navalgund, ·04.	Rice and other early crops are good, but require good rain; cotton sowing in progress in eastern talukas, except Navalgund, where it is retarded for want of rain. Cholera abating everywhere, except in Navalgund. Average prices—rice 32 and *juari* 57 pounds per rupee.
Kanara ...	Karwar, 2·52; Kumpta, 2·33; Sirsi, ·77; Haliyal, ·13.	Total rainfall 87·44. Common rice in Karwar 15 seers; district average 15 seers per rupee. Rice plants healthy. Small-pox—2 deaths in Kumpta and 4 deaths in Sirsi.
Rajkot ...	2·52	Total rainfall 37·65. General health good. Weather warm and cloudy. Fever in some villages. Crops damaged from excessive fall of rain in some parts of the Sorath Prant. Cholera still continues in Dhoraji and appeared in other places. *Bajri* 38 and *juari* 54 pounds per rupee.
		General Remarks.—Good rain in most districts of the Deccan and Southern Mahratta country. Prospects much improved; more rain still wanted in parts of Poona, Sholapur, Satara, Dharwar, Belgaum, and Kaladgi. Crops injured by excessive rain in parts of Ahmedabad, Panch Mahal, Shikarpur, Baroda, and Rajkot; *kharif* harvest commenced in parts of Karachi and Shikarpur, and *rabi* sowing in parts of Hyderabad, Shikarpur, Upper Sind Frontier, Nasik, and Ahmednagar. Cholera, fever, small-pox, and cattle-disease continue in several districts.
Bengal—(Sept. 24th)		
Chittagong ...	2·42	Weather hot. Prospects of crops favourable; transplanting finished. Prices steady. General health good; a few sporadic cases of cholera.
Dacca ...	·58	Damage to crops apprehended for want of water.
24-Pergunnahs (Calcutta)	·93	Prospects of *amun* paddy good; *aus* being cut with 12-anna outturn; *amun* transplanting finished and jute being cut and steeped. Price of common rice 11½ to 15½ seers per rupee. Public health generally good.
Moorshedabad ...	·16	Weather hot and sultry. Prospects steadily deteriorating and prices rising; sowings of *thalai* progressing in *dearah* lands.
Rajshahye ...	·56	Weather cloudy and showery. Prospects of *amun* paddy very uncertain. Price of rice rising; and health fair.
Burdwan ...	·55	Rainfall recently at Sadr benefiting crops. Prospects of crops moderately favourable in Culna and Raneegunge, elsewhere less so. Price of rice rising slightly.
Rungpore ...	·16	Weather cloudy; more rain wanted. Prospects of *amun* paddy unfavourable owing to want of sufficient rain. Prices of food-grains rising. Malarious fever prevails.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Bhagalpur ...	·03	*Bhadoi* harvest almost over in south, but still going on in north, with an estimated outturn of 8 annas. Prospects of *aghani* paddy unfavourable. Rice 12 seers 10 chittacks per rupee.
Purneah ...	·30	Owing to slight rainfall, prospects of crops not improved. Common rice 13 seers per rupee. Fever in some places.
Patna ...	·45	Harvesting of *bhadoi* crops continues with 8 to 12-anna outturn. Rain badly wanted for paddy crops. Public health good, except in Behar sub-division, where cholera prevails.
Durbhunga ...	1·84	*Bhadoi* harvesting over with average outturn of 8 annas. Paddy suffering from want of rain. Prices falling owing to new *bhadoi* crops coming into market. Public health generally good.
Hazaribagh ...	·26	Weather warm. *Bhadoi* harvest continues. Want of rain more or less generally felt for paddy. Cholera and small-pox abating; general health good.
Cuttack ...	2·11	Weather cloudy. *Sarad* crops promising well. Price of rice almost stationary. Cholera broken out violently at Banki; scattered cases in town also.
		General Remarks.—Owing to insufficient rain prospects of *amun* paddy becoming unfavourable day by day, and if heavy rain does not fall shortly, the plants already transplanted will be much damaged in many districts; sugarcane doing well; *bhadoi* harvest progressing. Prices rising. Public health generally good; cholera is prevalent in the Behar sub-division of the Patna district and in Banki and in Cuttack, the outbreak in the latter is violent.
N. W. Provinces and Oudh—		
Benares (Sept. 23rd)	Average rainfall under 1·0.	Fever in city only. Prospects of *kharif* crops good; ploughing for *rabi* commenced. Prices fluctuating slightly.
Allahabad („ „)	Rain in all tahsils, varying from ·8 to 5·3.	Bright sunshiny weather during week, benefiting all crops. Prices beginning to fall. Health excellent.
Gorakhpur („ 20th)	.....	A few showers of rain wanted. Rice being reaped. Cholera decreasing. Prices stationary.
Jhansi („ 23rd)	.....	Weeding of crops in progress; prospects fair. Cholera still continues, but in a mild form. Prices stationary. Health of cattle good.
Agra („ 20th)	Rain in five parganas from ·1 to 2·9 during week.	*Kharif* ripening and forward crops being cut; *rabi* ploughings going on. Cholera now very slight. Prices steady.
Bareilly („ 22nd)	.....	Cholera slightly increasing in city, 10 deaths on 14th. Everything else satisfactory.
Meerut („ „)	Rain everywhere, excepting Baghpat, but less heavy.	Crops thriving. Ague and fever prevalent; cholera at Hapur, Dasna, and Meerut. Prices easy and still falling.
Kumaon („ „)	Thunderstorm and showers.	Rice and millets being reaped; *rabi* ploughing commenced. Fever rife in valleys; cattle-disease continues. Prices stationary.
Lucknow („ „)	Rain from 1·6 to 3·4 during week.	Rice is nearly ripe; *hewat* crops splendid; fields are being prepared for *rabi* sowings. Condition both of men and cattle good. Supplies sufficient. Prices steady.
Partabgarh („ 19th)	Rainfall for the district 3·5	Early rice being reaped; prospects excellent; prices almost stationary. General health good.
Sitapur („ 22nd)	No rain during week, except in Misrikh tahsil.	State of crops favourable; rice and millet being cut.
Fyzabad („ „)	·7 to 1·0 during week	*Sawan*, *kakun*, *kodon*, *juari*, and *marwa* are being cut. Supplies abundant. Prices steady.
Rae Bareli („ 20th)	2·1 of rain during week at Sadr.	Weather sometimes cloudy. *Kharif* crops flourishing. *Makka*, *kakun*, and *dhan* in some places are being cut. Some cases of fever reported. Supplies abundant. Prices slightly falling.
Cawnpore („ 22nd)	·1 to 3·3 of rain during week.	Prospects fair; some injury to crops on low lands in pargana Bilhaur. Fever and ague prevalent; few cases of cholera reported from two parganas.
Farukhabad(„ „)	Rain in all tahsils, but chiefly light showers, none has fallen for 4 days.	Crops promising. Fever general; no other sickness. Prices stationary.
		General Remarks.—The rain seems to be nearly over. *Kharif* prospects are promising; ploughing for the *rabi* has commenced. Markets are well supplied, and prices are nearly stationary. The usual seasonal fever and cholera prevail, but the general health is good.
Punjab—(Sept. 24th)		
Delhi ...	.....	Fever continues. Expected yield of *kharif* above average. Prices falling.
Hissar ...	.....	Fever prevalent; cattle-disease in Golghata, district Rohtak. Expected harvest in Sirsa and Rohtak above average; in Hissar from 12 to 14 annas.
Umballa ...	.....	Fever very prevalent throughout the district. *Makki* being harvested; other *kharif* crops flourishing, yield expected to be above average; grain sowing commenced. Prices gradually falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Jullundur ...	.....	Health and crops good. Prospects of coming harvest very favourable. Prices stationary.
Amritsar ...	.....	Health good. *Rabi* being sown. Prices stationary.
Sialkot ...	1·0	Health good; a few cases of rinderpest and anthrax in the Sialkot and Daska tahsils. Harvest expected to be above average. Prices stationary.
Ferozepore ...	·60 at city; ·80 at Sadr	Health and probable yield of *kharif* good. Prices stationary, with the exception of that of wheat which has risen.
Lahore ...	.....	Health and expected yield of harvest good. Prices almost stationary.
Rawalpindi ...	·90	Health good; cattle-disease in three tahsils; expected yield of harvest above average in four tahsils, average in two, and inferior in one. Prices falling.
Mooltan ...	.....	Health and expected yield of *kharif* good. Prices fluctuating.
Dera Ismail Khan ...	.....	Health good. Expected yield of harvest above average.
Peshawar ...	.....	Expected yield of cotton crop good, of *mukki* average. Prices stationary.
		General Remarks.—Rain in a few districts. Fever in the Delhi and Umballa districts and in the Hissar division; elsewhere the health of the Province is generally good. *Kharif* prospects, on the whole, very favourable.
Central Provinces—(September 24th)		
Nagpur ...	3·21	Weather rainy. Prospects of crops failed; rice good, *juari* somewhat damaged; *rabi* preparations in progress. Fever and small-pox in Nagpur and Raintak tahsils. Prices steady.
Jubbulpore ...	1·25	Weather clear and warm. Weeding completed; rice in ear; break beneficial, though late; cotton crops poor. Wheat 24 and rice 13 seers per rupee.
Saugor ...	1·95 on 23rd	Weather fair for last 8 days. Rice and *kodo* good; other crops damaged by excessive rain; preparations for *rabi* in hand. Health fair. Prices steady.
Seoni ...	3·47	Frequent heavy showers; hot intervals. Prospects of rice good, other crops indifferent; no preparation for *rabi* possible yet. Prices easy. Cattle-disease increasing.
Hoshangabad ...	2·36	Weather cloudy. *Kharif* crops suffering, break much wanted. Fever prevalent; and small-pox 15 cases. Wheat 21 and rice 10 seers per rupee.
Khandwa ...	2·89, heavy rain on night of 22nd.	Weather cloudy and close. *Juari*, *til*, and cotton damaged in Burhanpur tahsil; other crops doing well, break wanted; *rabi* preparations in progress. Health good. Rice 15, wheat 23, and *juari* 27 seers per rupee.
Raipur ...	1·23	Weather sultry, with occasional showers. Weeding progressing; prospects fair. Fever and cattle-disease prevalent. Prices stationary.
Sambalpur ...	2·58 on 20th	Strong sunshine with occasional heavy showers. Prospects of rice excellent. Fever, bowel complaint, and cattle-disease prevalent. Common rice 22½ seers per rupee.
		General Remarks.—There has been a slight break, but not sufficient. Some crops damaged, but prospects continue good. Small-pox in one district. Prices steady.
British Burma—(Sept. 24th)		
Akyab (Sept. 20th)	0·53	Cholera still prevalent in town and district, and a few cases of cattle-disease. Total rainfall 162·82.
Rangoon („ „)	2·19	Total rainfall 76·24. Some cholera in town.
Bassein („ „)	5·35	Total rainfall 86·66.
Amherst (Moulmein) („ „)	15·99	Total rainfall 159·88.
Toungoo („ „)	3·19	Total rainfall 66·55.
Kyouk-phyoo ...	.....	No report received.
Sandóway ...	.....	No report received.
Hauthawaddy ...	.....	No report received.
Pegu (Sept. 13th)	1·28	Total rainfall 92·73.
„ („ 20th)	5·10	Total rainfall 97·83.
Tharrawaddy ...	.....	No report received.
Prome (Sept. 20th)	8·27	Total rainfall 35·89. Slight cholera.
Thonegwa ...	.....	No report received.
Henzada (Sept. 20th)	4·96	Total rainfall 8·04. Cattle-disease in two townships.
Thayetmyo („ „)	2·34	Total rainfall 28·69. Crops promising in parts. Rainfall deficient in parts.
Shwaygyin ...	.....	No report received.
Tavoy (Sept. 20th)	14·15	Total rainfall 149·60. Slight small-pox.
Mergui ...	.....	No report received.
		General Remarks.—Public health good. Crop prospects for the most part very good.
Assam—(Sept. 24th)		
Gauhati ...	No rain	Weather hot; rain wanted for *sali* and tea cultivation. Occasional cases of cholera reported from Barpetta. Sugarcane doing well. Public health fair.
Sylhet ...	·39	State and prospects of crops same as in previous week. More rain wanted; a heavy storm on 17th.
Cachar ...	·10	Weather warm. Transplanting of *sali* crops finished. Common rice 16 seers per rupee. Prospects of tea not favourable. Rain much wanted. Health good.
Dibrugarh ...	*Nil*	Weather hot. *Sali* crops well in low lands. More rain is wanted. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(Sept. 24th)		
Bangalore ...	·12 to 1·41 has fallen over the province during the last week.	Standing crops in parts have slightly improved in consequence, but more rain is generally needed; prospects continue unfavourable.
Mysore ...		Public health generally good; a few cases of cholera reported. Prices of food-grains almost stationary.
Mercara ...	4·80	Monsoon lasting longer than usual; favourable to standing crops. A good *ragi* crop being cut. Prices stationary.
Berar & Hyderabad—(Sept. 24th)		
Amraoti ...	3·68	Weather rainy and cloudy, break wanted. Crops in good condition. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	1·55	Weather rainy. Crops in good condition.
Hyderabad ...	2·53 (average)	Total rainfall from 1st January 27·37; excessive rainfall has damaged the standing *kharif* crops; *rabi* crops prospering. General health fair. Prices—wheat 14½, coarse rice 12, white *juari* 16½, yellow *juari* 20½, and *tur* 19 seers per current sicca rupee.
Central India States—(Sept. 24th)		
Indore ...	5·80	Total rainfall 34·19. Weather cloudy. Health and prospects good.
Morar (Gwalior) ...	0·45	Total rainfall 28·24. Prospects good. Fever still severe in Morar.
Sutna ...	1·34	Weather hot; fever prevalent.
Neemuch ...	0·64	Total rainfall 20·06. Health and prospects good. Weather sultry.
Goona ...	2·33	Partial break in the rains.
Agar ...	4·15	Weather warm. Health and state of crops good.
Sehore ...	3·76	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	2·57	Total rainfall 66·92. *Kharif* prospects damaged by excessive rain. Public health generally good.
Manpur ...	4·50	Total rainfall 37·10. Crops good. Slight cholera in Burwani.
Rajputana—(Sept. 24th)		
Abu (Sept. 24th)	·63	Weather cloudy and sultry, passing showers now and then with heavy thunder.
Sirohi („ 21st)	·28	Tanks, wells, health, and crop prospects good. Weather fair.
Marwar („ 19th)	No rain during week in Jodhpore city; but good showers reported in districts.	City tanks all full. Fever still prevails. Crops in good condition. Weather oppressively close and warm. Prices stationary with tendency to fall.
Meywar („ 21st)	1·99	Tanks, wells, and crops very good. Health fair. Weather seasonable.
Harowti („ 20th)	Deoli, ·22; Tonk, ·06; Kotah, 1·85.	Weather cloudy and close. Indian-corn being harvested. Slight cholera in Tonk and Bundi towns, Bundi and Kotah districts. Prices falling.
Jhallawar („ 19th)	1·96	Health and prospects good. Indian-corn being cut.
Ajmere („ 23rd)	No rain	Land being prepared for *rabi*. Health good.
Jeypore („ „)	·59	Crop prospects favourable. Prices steady. Health fair.
Ulwur („ „)	1·33	*Rabi* preparations going on. Prices of *juari* and *bajri* grain falling. Health good.
Nepal—(Sept. 18th)		
Katmandu	·55	Weather seasonable. Prospects fair in the hills. More rain needed in the low lands.

HOME DEPARTMENT.

JUDICIAL.

ALTERATION OF THE MODE OF VALUING SUITS RELATING TO REVENUE-PAYING LAND FOR THE PURPOSE OF DETERMINING THE JURISDICTION OF THE VARIOUS GRADES OF CIVIL COURTS.

The following letter is published for general information :—

No. 1260, dated Simla, the 26th September 1884.

From—A. MACKENZIE, Esq., Secy. to the Government of India, Home Dept.,

To—The Chief Secretary to the Government of Madras.

I am directed to acknowledge the receipt of your letter No. 449, dated the 15th February 1883, regarding the question of altering the mode of valuing suits relating to revenue-paying land for the purpose of determining the jurisdiction of the various grades of Civil Courts.

2. Under section 14 of the Madras Civil Courts Act, No. III of 1873, when the subject-matter of any suit or proceeding is land, a house, or a garden, its value is, for the purposes of the jurisdiction conferred by that Act, fixed in the manner provided by the Court-fees Act, 1870, section 7, clause V.

3. The following are the rules under the last-quoted Act by which the computation of court-fees is regulated :—

(1) permanently settled land paying annual revenue to Government, which forms an entire estate or a definite share of an estate, or forms part of such an estate and is recorded in the Collector's register as separately assessed with such revenue, is valued at ten times the revenue so payable ;

(2) temporarily settled land paying annual revenue to Government, where it forms an entire estate or a definite share of an estate, or forms part of such estate and is recorded as aforesaid, at five times the revenue so payable ;

(3) land wholly or partially exempted from the payment of such revenue, or charged with any fixed payment in lieu of such revenue, where net profits have arisen therefrom during the year next before the date of presenting the plaint, at fifteen times such net profits ;

(4) land forming part of an estate paying revenue to Government, not being a definite share of such estate, and not separately assessed as above mentioned, at the market value of the land.

4. In the communication from the High Court at Madras submitted to this Department with your letter No. 316, dated the 1st May 1882, it was represented that in the Madras Presidency the effect of the above artificial system of valuation is to cause suits relating to land to be greatly undervalued, the result being that District Munsifs, while nominally disposing only of suits valued at Rs. 2,500 or less, are in fact deciding cases which involve much higher values. The High Court expressed an opinion that the market value of the land should be adhered to as the true criterion of valuation for purposes of jurisdiction in all cases ; but, as there might be practical difficulties in the way of ascertaining this value, the Court suggested that the principle provided in the Court-fees Act should continue to be followed, the multiples being increased twofold and fixed under the first of the three foregoing rules at 10, 20 and 30 times the revenue or net profits, respectively. This proposal received the concurrence of the Government of Madras, who recommended legislation for the purpose of giving effect thereto.

5. It was intimated to the Madras Government in this office letter No. 1570, dated the 23rd October 1882, that, before deciding what measures should be taken in order to place on a more satisfactory footing the system under which

suits of the nature described are at present valued for the purpose of determining the jurisdiction of the Civil Courts in the Madras Presidency, the Governor General in Council had deemed it advisable to consult other Local Governments and Administrations on the subject generally, with the view of ascertaining the systems followed in this respect in the several provinces, and of determining whether a uniform scheme of valuation of land cannot be adopted throughout British India for the purposes of court-fees as well as for the purposes of jurisdiction.

6. From the replies received to this reference it appears that, while the Civil Courts Acts of the several Provinces, unlike that in force in Madras, prescribe no special rules for fixing the value for jurisdiction of the subject-matter of land suits, but simply define the limit of the jurisdiction of each grade of Court by the money value of the subject-matter in suit, thus leaving the market value to be the strictly legal criterion, a practice has sprung up generally in the inferior Courts of accepting, in the absence of any express provision of law to the contrary, the court-fee valuation for purposes of jurisdiction also. The generally admitted result is that land suits are in consequence much undervalued and disposed of by Courts not duly competent to try them. It is agreed by the great majority of the authorities consulted that the prescription of some artificial mode of fixing valuation for jurisdiction would prove of great advantage, and that, if a mode founded on the principle adopted in the Court-fees Act should be accepted, a fair average approximation to the market value of temporarily and permanently settled lands respectively might be secured by doubling the multiples of 5 and 10, by which the fees on suits for such lands are computed. In the case of lands falling under the third of the classes enumerated in paragraph 2 *supra*, the weight of opinion seems to be in favor of considering the multiple therein mentioned as securing a fair approximation to the market value of such lands.

From the foregoing statement must be excepted the Bombay Presidency, where, under rulings of the local High Court, the jurisdiction of Civil Courts in regard to suits for land is reported to be determined in each case solely by the market value of the land.

7. The Government of India agree with the generally expressed opinion that it is extremely desirable to introduce some simple mode of valuing land suits for purposes of jurisdiction—some mode which will give a fair approximation to the true criterion of market value. It would no doubt be the most logical course to adhere, as Sir C. Turner recommends, to the true market value as ascertained in each individual case. But the practical objections to such a course are weighty, and indeed irresistible. In default, some artificial measure capable of easy application must be devised. The simplest means of effecting the object in view is, the Government of India consider, to adopt and apply the principle of the Court-fees Act, which has received legislative sanction in Madras and has established itself in practice in most of the other Provinces, but to alter the multiples so as to bring the value thus determined into as close accord as possible with true market value. As the market value of land varies considerably in the different provinces, and even in different districts of the same province, it has been suggested to the Government of India that a rule to secure the end proposed would most appropriately be laid down somewhat to this effect, that, for the purpose of determining the jurisdiction of the Courts in all suits relating to land, the Local Governments shall have power to declare from time to time in each district what multiple of the land revenue payable to Government in the case of revenue-paying lands, and what multiple of the profits or what rate per acre in the case of revenue-free lands, most nearly represents the market value; that the rate so declared shall remain in force for ten years; and that such valuation, so long as it remains in force, shall be accepted by the Courts.

8. It would be evidently convenient as well as expedient that there should be one and the same mode both for the purpose of court-fees and for that of jurisdiction, and this object will be kept in view when the Court-fees Act comes under amendment. But as it is uncertain when the Government

may be able to undertake a revision of this Act, and as it is desirable that the anomalies in the pecuniary jurisdiction of the Courts, brought to notice, should be removed, it has been considered advisable to confine any modification which may be introduced in the present law and practice to points which do not raise any financial issues. In the meantime, I am to enquire whether the suggestion above referred to commends itself to His Excellency the Governor of Madras in Council and to the Honourable the Chief Justice and Judges of the High Court at Madras.

No. $\frac{20}{1261\text{-}69}$.

Copy forwarded to the Local Governments and Administrations noted in the margin, with a request for early report as to whether there are any substantial objections to the course proposed.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 25th September, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

MARRIAGE LICENSES VALIDATION BILL.

The Hon'ble MR. ILBERT moved that the Bill for the validation of certain licenses to solemnize marriages granted to Ministers of Religion under Act XXV of 1864 be taken into consideration. He said:—

"The object of this Bill is, as clearly appears from the preamble, to remove from the existing Christian Marriage Acts a flaw which, if it were allowed to remain and if its existence became generally known, might cause cruel hardship to innocent persons. The Bill has been circulated for opinion, and its provisions have met with general approval. The only suggestions for its amendment which I need notice here are contained in papers from Mr. Justice Mahmúd of the Allahabad High Court and from Mr. Justice West, the latter of which did not reach me until yesterday.

"Mr Justice West remarks that, while the Bill makes a necessary provision for the case of Ministers licensed under Act XXV of 1864, a similar provision seems equally requisite, or may be so, for the case of Ministers licensed under Act V of 1865 and celebrating marriages without a fresh license under Act XV of 1872. But it will, I think, be found that this latter case is already covered by the second paragraph of section 2 of Act XV of 1872, which saves licenses granted under the Act of 1865 though not licenses granted under the Act of 1864. Mr. Justice West also suggests that Ministers should be commanded to do all things required by the Act in force when they celebrate any marriage. If the meaning of this suggestion is that a marriage under the licenses with which the Bill deals should not be valid unless the conditions are observed which under the Act in force are essential to the validity of the marriage, then I think it is clear that this would be the effect of the Bill as drawn.

"And, lastly, both Mr. Justice West and Mr. Justice Mahmúd suggest that, if the Bill is to be made retrospective, as we propose to make it, there should be savings in favour of civil rights acquired under the law as it stands, and of persons who through the retrospective operation of the Bill, may become bigamists subject to punishment, though, when actually married the second time, their first marriages were substantially void.

"Mr. Justice Mahmúd refers, as a precedent for such a saving clause, to the legislation proposed for altering the law as to marriage with a deceased wife's sister. But I should point out that there is a material difference between the objects of such legislation and the objects of the present Bill. It is one thing to make legal marriages which were intentionally made illegal, and are notoriously illegal, and quite another thing to declare the effect of the existing law to be what it was undoubtedly intended to be, and what it is generally believed to be. A much closer parallel to the present Bill is to be found in numerous other English Statutes which have been passed for similar purposes. The Statute which is most closely analogous is perhaps one which was passed in 1868 (31 & 32 Vic., c. 61) for validating marriages solemnized before persons acting as Consuls. This Act does not contain a saving clause. Then a large number of Statutes have been recently passed for curing such formal defects as the insufficient publication of banns or the celebration of marriages in a wrong building. I find that the great majority of these Statutes contain no saving clause, and that the very few exceptions may be accounted for by special circumstances, such as the fact that litigation had taken place or was still pending with reference to the questions which the Act was intended to set at rest, or that the validity of the marriages to be legalized was notoriously a matter of general doubt, on grounds quite different from the technicalities of Statutes. For instance, there had, I believe, before the passing of an Act of 1879, been great and general doubt about the binding efficacy of marriages solemnised before officers of Her Majesty's Navy, and this doubt was not confined to lawyers. In such exceptional cases there has been occasionally a proviso that the enactment shall not render valid any marriage which before the passing of the Act had been declared invalid in a Court of competent jurisdiction, or any right dependent on the validity or invalidity thereof, or render valid any marriage where either of the parties has before the passing of the Act and during the lifetime of the other party lawfully intermarried with any person.

"But in the present case there is not the slightest ground for believing that the validity of any marriage contracted under the licenses with which we propose to deal has ever been questioned in a Court of law, and it is extremely improbable that any person has married again on the faith of his first marriage being held invalid in consequence of the flaw which we are now seeking to remove. In fact, the knowledge or suspicion that there is such a flaw has been probably confined to an extremely small number of legal experts. If there be any person so astute as to have discovered the flaw, and so unscrupulous as to have taken advantage of it, I think we should do no substantial injustice by leaving him to the mercy of the Criminal Courts. The nominal sentence which would probably be passed on him would be far from commensurate with his moral deserts, and he might count himself, as big mists go, a remarkably fortunate man. But on the whole I think that the extreme improbability of any case having occurred for which a saving clause is required fully justifies us in following the precedent which is supplied by the vast majority of English Statutes *in pari materiâ*, and in not inserting any such clause. I have therefore not proposed to make any amendment in the Bill as introduced."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill be passed.

The Motion was put and agreed to.

STRAITS SETTLEMENTS EMIGRATION ACT, 1877, REPEAL, AND EMIGRATION ACT, 1883, AMENDMENT, BILL.

The Hon'ble SIR STEUART BAYLEY moved for leave to introduce a Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883. He said:—

"The Bill which I am now asking for leave to introduce is not very complicated in its machinery; but it brings to a close a controversy which has been going on in a sort of triangular way between three Governments for the past twelve years—the Straits Settlements Government, the Madras Government and

the Government of India. Under the Emigration Law of 1872, emigration to the Straits Settlements was free for the most part of India, and, under the more recent Act of 1883, the Straits are expressly excluded by the definition of 'emigration,' but from Madras it has always to a certain extent been controlled; however, from the greater part of India there is no emigration to the Straits; the only emigration of importance is from Madras, and, when the Emigration Act of 1872 was under consideration, the Straits Settlements Government were moving the Government of India to allow emigration to go free and unrestricted, and the Madras Government were anxious to maintain the same system towards the Straits as was in force with respect to other Colonies. The Government of India rather inclined, I think, at that time to the Straits Government, but acted as judicibus bottle-holder, and finally the controversy for the time being was settled by the compromise which Sir Arthur Hobhouse proposed, and which took effect, after a very long incubation, in the shape of Act V of 1877, which I am now asking leave to repeal. The difference between the system which was brought in under Act V of 1877 and that in force in the different Colonies is this: as a rule in the case of Colonial emigration the emigrant enters into a contract in this country with the Agent of the Colonial Government, and the Government takes upon itself the responsibility of feeding him and conveying him to the colony, and does not attempt to recover those expenses from him. Under the system of Act V of 1877 the Straits Government was entirely unwilling to take upon itself that responsibility, and for very good reasons I think. The consequence was that the emigrant had to depend for the necessary advances to cover those expenses upon the individual employer of labour with whom he contracted. Then the question arose, how was that money to be recovered? The Government of Madras objected to the emigrant starting life in a new colony with the burden of the debt of those advances upon him, and the Colonial Government did not in the least see why their general tax-payers should be taxed in order to pay the expenses of the labourers of a small class; the result was that a curious conflict of law came about. The Straits Ordinance which was supposed to enforce our law made those advances recoverable, and provided for their recovery. Section 16 of our Act provided that all contracts made for the recovery of such advances from subsequent wages were illegal and void. Each Government legislated according to its own view, and, notwithstanding the provision in the Straits Ordinance of 1876, Act V of 1877 was passed. None the less from that day to this these illegal contracts have been enforced, and the money advanced has been recovered.

"The other provisions of Act V of 1877 referring to the incidence of control are not very important. They provide for a three years' indenture, maximum hours of labour, minimum wages and the protection of the Protector, the latter being an officer appointed by the Madras Government, but drawing his salary and receiving his orders from the Straits Government. When the Act was introduced, Sir Arthur Hobhouse was apparently not very strongly impressed in its favour, and what he said about it was this:—

'He confessed that he was in hopes that, when a sufficient law had been passed on the other side of the water, nothing would have been found necessary on our side beyond the mere removal of the shackles placed on emigration by the Act of 1871.'

"But he accepted the opinion of the Madras Government, and consequently Act V of 1877 became law. At the same time, Sir Andrew Clarke, who as Governor of the Straits had made himself personally acquainted with the conditions of the problem, said:—

'There was no doubt that the Tamil population of the Straits were in a better condition than their countrymen whom they had left in India; great numbers of them were well-to-do, with large properties; and anything which would check that emigration from the coast of India was undesirable, at the same time that it would cripple and reduce the large industries in sugar and other tropical staples which were valuable to that part of the country and to interests both English and Indian.'

"These were the circumstances under which Act V of 1877 was passed. But the controversy did not end here; it has been going on at intervals ever since; and especially the necessity for reconciling the Indian Act with the Straits law has been continually urged upon the Government. An inquiry was

held in the Straits, and very complete information was obtained regarding the coolies who emigrated there, and on the whole the inquiry was very satisfactory, and it was in these circumstances that the matter came again before the Government of India a little more than two years ago. The question had then to be entirely reconsidered, for it appeared that side by side with this system of protected emigration under our law there had grown up another system of free and unrestricted emigration of coolies who found their own way across from Madras to the Straits and paid their own passage as passengers. Most of them were helped by advances received from the chetties and contractors, who took their chance as to the possibility of recovering those advances from the wages of the labourers on the other side; and, to show how strong that system was, I find that the figures given during the enquiry of 1882 showed 20,000 free emigrants in recent years as against 5,000 emigrants who had gone under our law; and in that particular year the protected emigrants were 850 as against 5,000 who had gone free. In other words, while we had taken great pains to discourage and repress free emigration, that system had the logic of facts on its side, and showed remarkably successful results as against our restrictions, and the main tendency of our law had been to drive away the business from the port of Negapatam, where it was supervised by the Madras Government, to the French port of Karikal, where it was under no supervision. When, therefore, the papers came before the Government of India, they saw that Act V of 1877 was a failure, and they cast about them to see if some *modus vivendi* could not be effected between the two systems which would secure for the Madras Government that their emigrants would be protected in the Straits, and for the Straits Government that there should be no restriction in regard to the coolies leaving Madras. The Straits Government undertook to meet the Madras Government half way, and to provide an adequate system of protection when the emigrants got to the Straits. It seemed that there was no apparent impossibility in reconciling those two objects, but it would have been obviously hopeless within a reasonable time to bring a three-cornered controversy of this kind to a result in writing, and so the Government decided to depute Mr. Buck to see what he could do towards effecting a speedy settlement of the matter in person. This mission he successfully accomplished. He first visited Madras, to ascertain the points on which they mainly insisted; and with their views in his possession he proceeded to the Straits, laid the matter before the Government there, and got them to agree to pass an Ordinance incorporating the points which the Madras Government insisted upon; and we have now before us the terms of the Ordinance which they have framed. This Ordinance the Madras Government have accepted as sufficient, and they are now willing that we should withdraw the restrictions imposed upon emigration by Act V of 1877. The effect of these arrangements will be that there will be no interference whatever with the embarkation of emigrants; the emigrant will be registered, and a complete nominal roll of all the emigrants going in one ship will be made by the Agent, handed over to the master of the vessel, upon whom there is the responsibility of delivering that nominal roll to the authorities at the Straits, and of admitting no further emigrants on board. All this requires no fresh legislation; it can be done by executive authority under the Passenger Ships Act. No contract will be entered into on this side of the water, but when the emigrant arrives at the Straits he will enter into his contract under the supervision of the officer appointed by the Straits Government. I may mention that one alteration to be effected is this, that the Protector hitherto appointed by the Madras Government, but paid by and receiving his orders from the Straits Government, will in future be appointed by the Straits Government, while the Madras Government will have the power to send an officer from time to time to the Straits to inspect and report, who will have full legal powers of entry and examination.

"The protection after arrival is dealt with by the Straits Ordinance. It is confined primarily to those who contract for employment on agricultural labour, but the Straits Government has power to make the Ordinance applicable to other classes of labourers.

"Recovery of advances made to assist emigrants is provided for, but only to the maximum extent of 12 dollars and at the rate of one dollar a month.

"The Ordinance also provides for a minimum scale of wages, which vary according to sex and age and to the length of service in the Straits; the term of indenture is three years, which is the old term. The other provisions of the Ordinance as to protection on the spot, that is to say, the provisions as to house-accommodation, hospital-accommodation, rations, medical inspection, inspection by the Agent, penalties for desertion and neglect, penalties for offences against the emigrant—all these follow very much the lines of our own legislation and are considered adequate.

"The Madras Government are satisfied with the action of the Straits Government, and having secured, as Sir A. Hobhouse said, efficient protection on the other side of the water, we may, I think, safely abstain from further ineffectual interference with the freedom of emigration on this side."

The Motion was put and agreed to.

BURMA GAMING BILL.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma.

BURMA LOCAL SELF-GOVERNMENT BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to amend the law relating to Local Self-government in British Burma.

RANGOON WATER-WORKS BILL.

The Hon'ble MR. ILBERT asked for leave to postpone the presentation of the Report of the Select Committee on the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

Leave was granted.

PANJÁB COURTS BILL.

The Hon'ble MR. BARKLEY presented the Report of the Select Committee on the Bill to amend the law relating to Courts in the Panjáb.

BENGAL TENANCY BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Hon'ble Peári Mohan Mukerji be added to the Select Committee on the Bill to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 2nd October, 1884.

SIMLA;
The 1st October, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1st OCTOBER 1884.

GENERAL REMARKS.—There was rain in all districts in the Madras Presidency during the week, and prospects are improving, except in Bellary, Anantapur, and parts of Madura and Coimbatore. In Mysore prospects have improved in Bangalore, but elsewhere in the province they are still unfavourable. More rain is greatly needed, and the crops, except in the Mulnad, are generally reported to be withering. In Coorg heavy rain continues to fall and has been injurious to cardamoms and coffee on the Ghats. Good rain has fallen throughout the Deccan and Southern Mahratta Country, excepting Dharwar, and the *kharif* crops have been much benefited. More rain is wanted in Dharwar and Belgaum, in the Malsiras taluka of Sholapur, and in the eastern talukas of Poona and Satara. In the Berars and the Nizam's territories, and in the Central India and Rajputana States, there was good rain and prospects are good. Heavy rain fell during the week in most districts of the North-Western Provinces and Oudh, and some damage has occurred to crops in many places. In the Punjab there was rain in many districts, and *kharif* prospects are very favourable. In the Central Provinces the heavy and continuous rain has caused damage to all crops, except rice, and a break is much needed. In Bengal the rainfall of the week has somewhat improved the prospects of *amun* paddy, but they are still unfavourable in many places, and the crops on high lands in some districts have been seriously injured by the drought. Harvesting of *aus* and jute continues. In Assam there was generally good rain in all districts, and the prospects of the crops are good. More rain is still needed in Gauhati for the *sali* crop and for tea. In British Burma crop prospects are excellent.

The latest report of the Meteorological Department, dated 2nd instant, states that rain has been general in the North-Western Provinces, in Lower Bengal, Orissa, the Central Provinces, Central India, along the west coast, and in Burma. In Behar, Eastern Bengal, the Carnatic, the Deccan, Khandesh, the Berars, Guzerat, and Sind there is either no rain reported or the falls are unimportant.

In Madras harvesting of wet and dry crops continues in a few districts. Ploughing and sowing for the *rabi* have commenced in Bombay, Bengal, North-Western Provinces and Oudh, Punjab, the Central Provinces, and in the Central India States. The prospects of the *kharif* crops are generally good throughout the country.

The public health is generally good. Prices are fluctuating in Madras, Bengal, and the Central Provinces; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 1st)		
Bellary ...	·03 (average)	Pasture scanty. Prices slightly rising.
Kurnool ...	·36 (average)	Prospects improving. Prices generally falling. Small-pox in 3 and cattle-disease in 2 taluks.
Ganjam ...	2·71 (average)	Prospects improved. Small-pox, cattle-disease, and cholera in parts.
Kistna ...	1·26 (average)	Standing crops generally good; harvest dry crops, outturn below average. River 4·50 feet over anicut. Small-pox, fever, and cattle-disease in places; 33 deaths from cholera.
Chingleput (Madras) ...	·31 (average)	Standing crops generally fair; harvest wet and dry crops, yield half the average. Small-pox in 4 taluks; 89 deaths from cholera.
Coimbatore ...	·09 (average)	Standing crops wet, good in 5 taluks, elsewhere fading; dry crops withering; harvest dry crops, outturn below average; fodder scarce.
Tanjore ...	·45 (average)	Standing crops generally good. Rivers 1 to 5 feet. Harvest wet and dry crops, outturn average. 89 deaths from cholera.
Madura ...	·28 (average)	Prospects fair in 3 taluks, elsewhere crops fading from want of rain. 18 deaths from cholera.
Malabar ...	1·88 (average)	First crop paddy being harvested, outturn fair; operations for second crop cultivation progressing. Slight small-pox in 7 and fever in 2 taluks; 5 deaths from cholera.
Travancore ...	2·89	Operations for second crop cultivation progressing. Fever, small-pox, and cholera in parts.
		General Remarks.— General prospects fair and improving, except in Bellary, Anantapur, parts of Madura and Coimbatore, where prospects continue unfavourable.
Bombay—(Oct. 1st)		
Karachi ...	No rain during last week; average of 3 stations ·23.	River at Kotri on 29th, 12 feet 10 inches against 10 feet 3 inches on same date last year. Fever generally prevalent; cattle-disease in 6 talukas, some slight loss in Tatta and Ghorabari; small-pox in 10 villages in the districts; 18 fresh cases, 1 death, 15 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 25, 30 and 36, in Manjhand 28, 24 and 40, in Mirpur Batoro, 22, 36 and 36, and in Sakro 16, 32 and 40 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 29th, 12 feet 10 inches against 10 feet 3 inches last year. Slight damage to crops by rain, and fierce winds is apprehended in Hyderabad, Badin, Mirpur, Tando, Alahgar, Shahdadpur, and Naushahro. *Juari* and *bajri* in Sakrand, and *til* in Moro attacked by blight; fever in 10, small-pox in 3, and cattle-disease in 4 talukas. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	1·30	Total rainfall 35·48. *Bajri*, *juari*, and cotton crops more or less damaged by excessive rain; other crops healthy. Cholera in the city, 1 case fatal, and in Viramgaum 2 cases, 1 fatal; fever and cattle-disease in Dholka. Wheat 31 and *bajri* 33 pounds per rupee.
Baroda ...	4·62	Total rainfall 47·67. Crops injured in Naosari and Kadi divisions by excessive rain. Public health fair. Cholera continues in Dehgaon. Prices—*bajri* 28 and rice 22 pounds per rupee.
Surat ...	3·51	Total rainfall 38·90. Young crops healthy. *Bajri* ready for cutting; *juari* 31 and *nagli* 41 pounds per rupee.
Nasik ...	Maximum at Igatpuri, 13·82; minimum at Yeola, ·86; good rain throughout the district.	*Kharif* crops flourishing; *rabi* sowing commenced. Public health good; 4 attacks and 1 death from cholera in Nasik town. Wheat 37, *bajri* 38½ and rice 17½ pounds per rupee.
Colaba (Bombay) ...	Rain daily, except on 29th; heavy on 25th and 26th; total of week 8·06.	Total to date 71·48, being 3·46 above average. Abnormal temperature 1° warm to 5° cool; vapour in air somewhat excessive; abnormal wind strong from south-west on 24th and 25th.
Poona ...	Maximum 5·70 at Khadkala; minimum at Purandhar ·19.	Rain in 6 talukas. Light showers in Indapur and Bhimthadi. Partial failure of *kharif* crops in Eastern division where rain is now urgently wanted. *Bajri* 31 and *juari* 33, in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Nevasa, 2·50; Akola, 1·96; Sangamner, 1·95; Rahuri, 1·40; Kopargaon, 1·34; Sheogaon, 1·10; Parner, 1·5; Jamkhed, ·55; slight in Nagar, Shrigonda, and Karjat.	The rainfall has been beneficial to the *kharif* crops and to the *rabi* sowing which has been completed in the Nagar taluka. Slight fever and ague in Akola. *Juari*—maximum 54 pounds in Akola, minimum 44 in Karjat. *Bajri*—maximum 48 pounds in Akola, minimum 36 in Shrigonda.
Sholapur ...	Sholapur, 1·21; Barsi, 2·38; Madha, ·72; Karmala, ·89; Pandharpur, ·43; Sangola, 1·55; Malsiras, ·11.	*Juari* 34 pounds 14 tolas and *bajri* 34 pounds 27 tolas. Sowing in progress and generally prospects improved, except in Malsiras, where rain is much needed.
Dharwar ...	Dharwar, ·76; Kalghatgi and Mugud, ·55; Bankapur, Hubli, [illegible] nearly 33; Kod, [illegible] Kundgol, Hirebennur and Karajgi, ·8; Navalgund, Nargund, and Gadag, Mundo, and Ron none.	Want of rain general. Early crops are suffering from draught in parts of the districts; fodder becoming scarce in eastern talukas. The sky is cloudy. Cholera abating. Prices of food-grains—rice 20 and [illegible] 34 pounds per rupee.
Kanara ...	Karwar, 4·22; Kumpta, 5·14; Sirsi, 2·19; Haliyal, ·71.	Total rainfall 91·66. Common rice in Karwar 15 seers; district average 15½ seers per rupee. Rice crops ripening on coast. Small-pox—9 deaths in Kumpta, 2 in Sirsi, and 1 in Siddapur; cholera 2 deaths in Sirsi last week.
Rajkot ...	1·43	Total rainfall 39·8. General health good; fever prevalent in some places; cholera at Dhoraji. Crops washed away by excessive rain in some villages of Junagad. *Bajri* 37 and *juari* 52 pounds per rupee.
		General Remarks.—Good rain throughout the Deccan and Southern Mahratta country, excepting Dharwar. *Kharif* crops much benefited. More rain wanted in Dharwar and Belgaum, in the Malsiras taluka of Sholapur, and in the eastern talukas of Poona and Satara. Scarcity of fodder in parts of Dharwar and Belgaum; crops slightly damaged by excessive rain in parts of Gujarat and the Konkan. Cholera in parts of 11 districts; fever, small-pox, and cattle-disease continue in several districts.
Bengal—(Octr. 1st)		
Chittagong ...	2·02	Weather hot with occasional showers of rain. Prospects of crops good. Prices steady. Sporadic cases of cattle-disease reported; public health good.
Dacca ...	1·03	Jute still being cut, *mung* and *kalai* being sown. Damage to crops apprehended owing to decrease of water. More rain wanted. Public health good.
24-Pergunnahs (Calcutta)	3·44	Prospects of *amun* crops, sugarcane, and jute generally good. Outturn of *aus* will be below the average. Jute being steeped. Prices of common rice varies from 13 to 15½ seers per rupee. Public health generally good, but some cases of fever and cattle-disease still continue in certain places.
Moorshedabad ...	3·55	Weather cool and cloudy; the rain has saved for the time all *amun* that was not past harrowing; ploughing for *rabi* crops in full swing. Prices slightly easier. Public health good.
Rajshahye ...	2·06	Weather cloudy, more rain still wanted. Prospects of *amun* paddy uncertain. Prices rising in Nowgong. Health fair.
Burdwan ...	1·42	Continued useful showers. Prospects slightly improved, and rice somewhat cheaper; crops, however, are backwards and scanty.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd*		
Rungpore ...	2·0	Prospects of crops unfavourable. Prices of grains gradually rising, coarse rice selling at 4 rupees per maund. Malarious fever prevails.
Bhagalpur ...	3·58	A great quantity of land was not planted, and some of the paddy on high lands withered; *kulthi* extensively sown; prospects hopeful. Rice 12 seers 10 chittacks per rupee.
Purneah ...	3·16	Prospects of crops much improved. Common rice 13 seers per rupee. Fever prevalent in some places.
Patna ...	3·16	Harvesting of *bhadoi* crops going on generally with fair outturn. In the *muffasal* the rain was very beneficial, but more is yet wanted. Health good.
Durbhunga ...	3·91	Late rain improved paddy; lands being prepared for coming *rabi*. Prices stationary. Health good.
Hazaribagh ...	·05	Weather warm and seasonable. *Bhadoi* harvesting continues; paddy doing well, but requires rain in places. Health generally good.
Cuttack ...	·8	Weather cloudy and rain saved crops which are promising well. Prices of rice stationary. Sporadic cases of cholera reported.
		General Remarks.—The rainfall of the week has generally improved prospects of *amun* paddy; they are still, however, unfavourable in many places, and the crops on high lands in some districts have been seriously injured. The quantity of lands transplanted with *amun* is much below the average this year, owing to insufficient rain in time; harvesting of *aus* and jute continues; cultivation for *rabi* crops commenced in some districts. Prices of rice rising in places. Fever prevails in several districts, otherwise health generally good.
N. W. Provinces and Oudh—		
Benares (Sept. 29th)	Average rainfall 3·5	No sickness of men or cattle. Rain has improved late rice. Prices stationary. *Kharif* crops good average.
Allahabad („ „)	Heavy rain averaging 3·9	Slight damage to *bajri*, otherwise most beneficial. Health excellent. Prices falling.
Gorakhpur („ 27th)	Heavy rain at end of week.	Prospects excellent. Cholera decreasing. Prices falling.
Jhansi („ 30th)	.....	Prospects on the whole fair, but damage to crops apprehended from excessive rain; *til* and *bajri* flourishing. Prices stationary. Cholera abating.
Aligarh („ 29th)	Rain throughout the district during the week.	Cholera reported from Aligarh, Atrauli, and Sikandra tahsils; fever of an ordinary type throughout the district. The rains during the week have caused injury to the crops to a certain extent. Prices show rise in *juari* and fall in *makki*.
Agra („ 27th)	Rain in all parganas from 2·0 to 3·8.	*Kharif* being cut. Heavy rain and weather cloudy and unpropitious. *Rabi* ploughings continue. No cholera reported since 23rd; fever prevailing in all parganas. Prices steady.
Bareilly („ 29th)	.....	Cholera decreasing. Crops, &c., good.
Moradabad („ „)	Average rainfall 1·7; heavy rain still falling.	*Bajri, moth*, and cotton reported to be injured by rain. Fever very prevalent; few cases of cholera.
Meerut („ „)	·8 to 2·0; still raining	Inopportune and calculated to injure *bajri* and cotton. Fever and ague very prevalent; sporadic cholera in Hapur, Meerut, and Garhmukhtesar. Prices steady.
Kumaon („ „)	More or less rain during latter part of week; heavy rain since yesterday.	Rice and the crops, where reaped, will be damaged. A good deal of fever. Prices stationary.
Saharunpur („ „)	1·0 to 1·6	Rain is now doing more harm than good. Several deaths from fever in Deoband. Prices almost stationary; markets well stocked. Some cattle-disease in Saharanpur, Deoband, and Nalsur.
Lucknow („ „)	6·0 to 7·9	Strong wind and rains on the 26th, 27th, and 28th. *Kharif*, especially *bajri* and *juar* crops injured by the last heavy fall; *mash* in Tarai too slightly sufferred. Condition both of men and cattle good. Supplies sufficient. Prices slightly rising owing to incessant rain.
Partabgarh („ 26th)	Average rainfall for the district slightly over 1·0.	General health good; slight cattle-disease reported. *Bajri* and *juari* have been slightly damaged by the late rain. Prices stationary.
Sitapur („ 29th)	6·0 to 8·0 rain has fallen throughout the district from the 26th.	Considerable damage said to have been done to *mash*, millet, and *bajri* crops, otherwise the fall for the *rabi* sowings will be most beneficial.
Fyzabad („ „)	5·7 to 12·5 during the week.	Weather cloudy. Rice being reaped; prospects excellent. Prices almost stationary. General health good.
Rae Bareli („ 27th)	Rainfall during the week 3·4 at the Sadr.	General rain throughout the district, more rain not needed. Health of men and condition of cattle good. Supplies abundant; prices stationary.
Cawnpore („ 29th)	1·1 to 4·7 of rain during the week.	Crops on low lands injured by excessive rainfall. Fever and ague prevalent; few cases of cholera reported from two parganas.
Farukhabad(„ „)	12·1 have fallen; in the other tahsils the fall varies from 3·0 to 7·0.	Much damage done to crops by the heavy rain of the past 6 days in Kanauj. Fever continues.
		General Remarks.—Heavy rain fell during the week and some damage has occurred to crops in most districts. Prices generally continue stationary. Condition both of men and cattle is good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—(Oct. 1st)		
Delhi ...	4·10	Fever continues. Crops injured by rain; west wind and sunshine wanted; *rabi* sowing retarded. Slight fall in prices.
Hissar ...	Rain continual in Hissar.	*Kharif* harvesting commenced in Hissar; weather favourable for *rabi* ploughings; harvest prospects excellent. Cattle-disease prevalent in Rohtak.
Umballa ...	1·90	Fever very prevalent throughout the district. *Makki* harvested, other *kharif* crops flourishing; yield expected to be above average; grain sowing commenced. Prices gradually falling.
Jullundur ...	·60	Health and crops good. *Rabi* ploughings commenced; prospects of coming harvest favourable. Prices stationary.
Amritsar ...	.....	Health good. *Rabi* crops sown. Prices fluctuating.
Sialkot ...	1·0	Health good. Harvest above the average expected. Prices stationary.
Ferozepore ...	.....	Health and probable yield of crops good. Prices falling.
Lahore ...	.....	Health good. Expected outturn of *kharif* good. Prices stationary.
Rawalpindi ...	2·30	A few cases of fever, otherwise health is good. Expected *kharif* outturn above average in two, average in four tahsils, and below average in one tahsil. Prices falling.
Mooltan ...	.....	Fever prevailing. Expected yield of *kharif* good; *rabi* ploughings commenced. Prices stationary.
Dera Ismail Khan ...	.....	Health good. Expected yield of coming harvest above average.
Peshawar ...	·70	Slight fever prevalent. *Kharif* prospects good. Prices falling.
		General Remarks.—Rain in many districts. Fever prevalent in Delhi, Mooltan, and Umballa districts; few cases also in Rawalpindi and Peshawar; elsewhere health is generally good. *Kharif* prospects very favourable, but the recent rain has injured the crops in the Delhi district.
Central Provinces—(October 1st)		
Nagpur ...	1·92	Weather cloudy with occasional showers. Cotton and *juari* somewhat damaged. Health generally good; cattle-disease in Ramtek tahsil. Prices stationary.
Jubbulpore ...	4·2	Weather cloudy and showery; break since yesterday. State of crops unchanged. Wheat 25 and rice 14 seers per rupee.
Saugor (Sept. 30th)	2·74	Crops much damaged by wet; *rabi* ploughings at standstill. Health fair. Prices rising.
Seoni ...	3·48	Rain almost continuous during week; fine weather urgently required for all crops. Cattle-disease increasing. Prices steady.
Hoshangabad ...	7·17	Weather cloudy and rainy, break earnestly looked for. Rice fair, other crops suffering. Fever prevalent and few cases of small-pox. Wheat 21 and rice 10 seers per rupee.
Khandwa ...	1·24	Fine weather much wanted. Cotton, *til*, and *juari* damaged. Health good. Rice 13, wheat 23, and *juari* 27 seers per rupee.
Raipur ...	3·25	Weather clear; bright sunshine. Rice doing well; cotton, *kodo*, and *til* damaged. Fever prevalent. Prices steady.
Sambalpur (Sept. 27th)	3·82	Rain and sunshine alternately. Rice excellent, cotton and other crops bad. Fever and bowel-complaints common; cattle-disease in north common. Rice 29¾ seers per rupee.
		General Remarks.—Rain still continuous and has caused damage to all crops, except rice. Health generally good. Prices stationary or falling.
British Burma—(Oct. 1st)		
Akyab (Sept. 27th)	12·17	Total rainfall 174·99. Some cholera still in town and district; cattle-disease in 3 townships. Crops thriving well.
Rangoon („ „)	6 53	Total rainfall 82·77. Slight cholera and small-pox.
Bassein („ „)	3·01	Total rainfall 89·67. Slight cholera in town; cattle-disease increasing in 2 townships.
Amherst (Moulmein) („ „)	10·39	Total rainfall 170·27. General appearance of crops good.
Toungoo („ „)	1·89	**Total rainfall 68·44.**
Kyoukphyoo ...	.....	No report received.
Sandoway ...	.....	No report received.
Hanthawaddy ...	.....	No report received.
Pegu ...	.....	No report received.
Tharrawaddy ...	.....	No report received.
Prome (Sept. 27th)	2·96	Total rainfall 37·95. Slight cholera in town and district. Crops promising.
Thonegwa ...	.....	No report received.
Henzada (Sept. 27th)	3·18	Total rainfall 83·22. Slight cholera and cattle-disease in one township. Crop prospects good.
Thayetmyo („ „)	1·81	Total rainfall 30·51.
Shwaygyin ...	.....	No report received.
Tavoy (Sept. 27th)	6·58	Total rainfall 156·18. General appearance of crops good.
Mergui ...	.....	No report received.
		General Remarks.—Slight cholera here and there and decreasing in Akyab, otherwise public health good; health of cattle good. Crop prospects excellent.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(Oct. 1st)		
Gauhati ...	1·13, rain during the week ending 30th ultimo.	Weather seasonable. Rain needed for *sali* and tea cultivation; sugar-cane doing well. Public health fair.
Sylhet ...	2·84	State and prospects of crops fair. Cholera on the increase in the Chhatak thana.
Cachar ...	3·13	Weather warm. Prospects of *sali* crops and tea good. Common rice 15¾ seers per rupee. Health good.
Dibrugarh ...	4·35	Weather hot. *Sali* crops growing well in low lands. More rain is wanted. Public health good.
Mysore and Coorg—(Oct. 1st)		
Bangalore ...	3·66 in Bangalore; in all other districts average rainfall during past week ·20.	Condition of crops and prospects of season improved. More rain greatly needed. Crops, except in the Munnad, generally reported to be withering; pasturage scarce in parts; prospects unfavourable. Public health fair. Prices show an upward tendency.
Mysore ...		
Mercara ...	4·43	Cardamoms and coffee on the Ghats have suffered from continuous rain. Change expected.
Berar & Hyderabad—(Oct. 1st)		
Amraoti ...	2·15	Weather cloudy and rainy. Crops in good condition. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	4·58	Weather rainy, break needed. Crops in good condition.
Hyderabad ...	1·34 (average)	Total rainfall from 1st January 28·72. *Kharif* crops slightly damaged; *ahi* crops prospering. General health good. Prices—wheat 14, coarse rice 12½, yellow *juari* 20, white *juari* 16¼, and *tur* 18¾ seers per current sicca rupee.
Central India States—(Oct. 1st)		
Indore ...	2·2	Total rainfall 36·21. The rainy weather at this season of the year quite abnormal Crops around Indore slightly damaged by excessive moisture; prospects of *rabi* excellent. Health good.
Morar (Gwalior) ...	1·65	Total rainfall 29 89. Prospects good. Fever still in Morar.
Sutna ...	2·48	
Neemuch ...	2·54	Weather cloudy. Health good.
Goona ...	2·23	Break much wanted. Crops suffering.
Agar ...	1·12	Prices fallen. Prospects of crops and public health good.
Sehore ...	2·8	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	3·73	Total rainfall 70·65. *Kharif* prospects damaged and *rabi* sowings interfered with by excessive rain. Public health good; cholera reported in some parts of Bundelkhund.
Manpur ...	3·70	Total rainfall 40·80. Crops and health good. Wells and tanks filled.
Rajputana—(October 1st)		
Abu (Oct. 1st)	1·07	Weather occasionally cloudy with showers, now clear and seasonable.
Sirohi (Sept. 28th)	·54	Tanks, wells, health, and crop prospects good. Weather seasonable.
Marwar („ 26th)	·04	Good showers in districts. In Jodhpur city tanks all full. Some fever still prevails. Crop prospects good. Weather very cloudy, close, and warm. Prices stationary.
Meywar („ 28th)	1·78	Tanks and wells very good. Health fair. Crop prospects good. Fine weather needed.
Harowti („ 27th)	Deoli, ·12; Tonk, ·16; Shahpura, ·58; previous week 1·40.	Weather cloudy. Some fever, otherwise health good.
Jhallawar („ 26th)	1·32	Health and prospects good.
Ajmere („ 30th)	·36	Weather cloudy. Prospects and health excellent.
Jeypore („ „)	1·47	Weather still cloudy. Prospects and health fair. Prices stationary.
Bhurtpore ...	.....	No report received.
Ulwur (Oct. 1st)	.....	Rain injuring crops. Fever in five tahsils.
Nepal—(Sept. 25th)		
Katmandu ...	2·06	Weather seasonable. Prospects fair, except in the Terai, where more rain is needed.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY ESTABLISHMENTS.

EMPLOYMENT OF NATIVES AS DRIVERS AND SHUNTERS.

Circular No. XXIV Railway, dated Simla, 13th September 1884.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Railway Circular No. XVI, dated the 5th July 1883.

Read also—

Reports on Native Drivers and Shunters employed on the several Railways in India for the year 1883.

OBSERVATIONS.—The reports received for the year 1883 show that the numbers of Natives employed as drivers and shunters have increased from 327 and 304 to 391 and 325 respectively. No returns have been received from the Mysore, Darjeeling-Himalayan and Assam Railways, and it is probable that no facilities yet exist on these lines for the training of Natives for such employment.

2. The extracts given below show the progress made in the numbers employed, and the system of training which has been adopted on the several Railways.

3. In his letter to the Agent, the Locomotive Superintendent reports as follows:—

East Indian Railway.

"I beg to report that on 31st December 1883, we had a staff of 236 Native drivers and shunters employed in working goods and ballast trains on the usual sections of the main line, as well as mail and mixed trains on the Gya State line, and mixed trains on all the branch lines of the Undertaking.

"This number is 14 short of what we had in the same class in December 1882, and is chiefly due to reductions in grade caused by slackness of traffic during the latter part of the year. It may be remarked, however, that the 14 men in question were not lost to the service but remained *in reserve* ready for utilisation as train drivers at any moment, and in fact were promoted early this year to their former standing as soon as the traffic admitted of it.

"Very great care and discrimination continued to be exercised in selecting men for promotion to the grade of engine-drivers, none but intelligent and duly qualified men being selected for that work, the condition as to their possessing a technical knowledge of the parts of a locomotive, coupled with a proficiency in one of the vernaculars, being, as usual, a *sine qua non*, as regards their employment on the foot-plate.

"The traffic having continued slack for some time past has prevented our recruiting our staff of Native drivers with *fresh* accessions from the lower ranks, but we possess the necessary element though the opportunity for promotion may be wanting.

"Daily instruction continues to be given at all the locomotive running sheds on this line between Howrah and Ghaziabad, at set intervals during the day as well as in the evenings (as the men can be spared from their work), and these schools are appreciated by the Native staff in general, though I must point out that at large centres, such as Howrah and Asansol, we have great difficulty in inducing men in the lower grades to attend to daily instruction, seeing that in the neighbouring jute-mills, warehouses and collieries, &c., they can readily obtain employment and earn the same amount of wages, if not more, without the obligation of attending school after hours, or submitting to any demands on their spare time.

"Further, at stations, where the Locomotive staff are not provided with quarters *close to the running shed*, and have to live away in the bazar, it is a matter of considerable difficulty to get the men to attend school after they are once released from work. Notwithstanding these drawbacks, the attendance at the Native adult schools during the year was maintained at a fair average, and the teachers were fully employed.

"I have pleasure in enclosing a memorandum showing the number of Natives (with their respective rates of pay) on our running shed staff on 31st December 1883, compared with the number on 31st December 1882, as also a statement showing the saving effected through the employment of Native drivers from April 1875 up to 31st December last, from which it will be seen that the total amounted to over thirty-one lakhs on the latter date."

Comparative Statement of Natives employed in the several Running Sheds on the 31st December 1882 and 31st December 1883, with their Rates of Pay.

December 1882.	December 1883.
Native Drivers.	*Native Drivers.*
17 Branch Drivers @ 0-11-0 per day.	21 Branch Drivers @ Rs. 21 per month.
108 Main line Drivers @ 0-12-0, 0-14-0, and 1-0-0 per day.	95 Main line Drivers @ Rs. 22-8, 26, and 30 per month.
125	116
Native Shunters.	*Native Shunters.*
53 Shunters @ 0-9-0 and 0-9-6 per day.	50 Shunters @ Rs. 17 and 18 per month.
72 Assistant Shunters @ 0-8-0 and 0-8-6 per day.	70 Assistant Shunters @ Rs. 15 and 16 per month.
125	120

Saving in the Cost of Drivers, Shunters, and Firemen's Wages effected through the Introduction of Native Drivers and Shunters, &c., from April 1875.

4. The Locomotive Superintendent in his letter to the Agent and Manager, Madras Railway, reports as follows:—

Madras Railway.

"Natives of good physique and possessing a fair knowledge of English are sent out as second firemen on the engine to pick up their trade as all other trades are picked up, by constantly practising it, and as soon as they are fit they are promoted respectively to first firemen, shunters and drivers.

"The following table shows the number of men of each grade in employ and their rates of pay on the 31st December for the last three years:—

	On 31st December 1881.		On 31st December 1882.		On 31st December 1883.	
	Number of men.	Rate of pay per day.	Number of men.	Rate of pay per day.	Number of men.	Rate of pay per day.
Drivers	...	...	1	Rs. 1-8	2	Rs. 1-4 to 1-8
Shunters	2	Rs. 1-2 to 1-4	3	Rs. 0-12 to 1-2	4	„ 0-12 to 1-2
Specially engaged firemen .	6	„ 0-4 to 0-8	8	„ 0-6 to 0-8	15	„ 0-6 to 0-8

"During the year 1883 twenty-one English-speaking firemen, selected from among many candidates, were engaged with a view to their being promoted in the course of time to drivers. A moonshee was also provided at Madras to teach, free of cost, some of the old and experienced Native firemen who already knew a little English, so that these might learn enough English to understand the time-tables and usual telegrams.

"The difficulty experienced in the last report, *viz.*, the want of pluck or strength on the part of these men to stand the work, has been experienced again this year, and out of twenty-one selected men, engaged since the 1st January 1883, twelve had disappeared within two months as follows:—

4 lost heart at the last moment and failed to join.
3 left after doing a day's work.
2 absconded after working one month.
2 absconded after working two months.
1 resigned after working two months.

12"

5. On the South Indian Railway there were 18 drivers on salaries ranging from Rs. 20 to Rs. 30 per mensem, and 16 shunters from Rs. 12 to Rs. 18 per mensem, as against 12 drivers on salaries varying from Rs. 17 to Rs. 30 and 19 shunters from Rs. 12 to Rs. 20 per mensem during 1882. The system for training Native lads remained the same as reported previously.

South Indian Railway.

Comparative Table showing Numbers employed.

	1882.	1883.

Shunters	19	16
Total .	31	34

6. Extract from the Locomotive Superintendent's letter No. $\frac{A.489}{D.4305}$, dated the 2nd April 1884, to the Agent of the Company:—

Great Indian Peninsula Railway.

"I have to say that this office letter No. $\frac{A.514}{D.4305}$ of 14th April 1883 may be considered as the annual report for the year under review, as our system has undergone no change whatever, and has been fully explained in my report quoted above. I herewith send you a statement* giving the information required, and from which it will be seen that there has been a steady improvement in the training of Natives of this country to serve as engine-drivers."

* This statement includes Turners, Firemen and Augwallahs, who are not shown in the comparative table which follows.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers Shunters	60	79
TOTAL	60	79

7. The Locomotive Superintendent states that the scale of pay and promotion in force was the same as in January 1883, but the Agent adds that the question of pay for these classes of employés is under his consideration in communication with the Agent of the Great Indian Peninsula Railway Company.

Bombay, Baroda, and Central India Railway.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	23	24
Shunters	8	12
TOTAL	31	36

8. In his report to the Agent the Locomotive Superintendent states that "three Native firemen were promoted to pilotmen in 1883 on a consolidated pay of Rs. 30 per mensem each, and have thus far worked tolerably satisfactorily, but it should be borne in mind that they were engaged and have been working during the slack season; therefore their energies have never sufficiently been put to the test to admit of my giving an opinion as to their fitness under pressure of work or during an emergency."

Eastern Bengal Railway.

Shunters	*Nil*	3	These are pilotmen.
TOTAL	*Nil*	3	

9. In submitting the report on Native drivers, the Consulting Engineer observes as follows:—

Sind, Punjab, and Delhi Railway.

"The Locomotive Superintendent's report is valuable, as showing how the variation in the price of coal affects the question of the rate of pay in regard to economy of fuel. At the same time there is no reason why the Native driver should not in time learn to be as economical of fuel as the European.

"The Consulting Engineer has several times expressed his opinion to the Locomotive Superintendent that, if an increase of pay would tempt a superior class of men to take service as drivers, it would be desirable to give it, as the present rate of pay is decidedly low for the skilled labor required. The present opinion, however, seems to be that a higher rate of pay would not attract a better stamp of men, and that it is better to offer inducements to them to educate themselves and to train their sons at as early an age as possible.

"Mr. Sandiford, the Locomotive Superintendent, has taken considerable interest in his schools and in the training of Native drivers generally, and the question as regards this line may safely be left in his hands."

The Locomotive Superintendent's report referred to above is as follows:—

"The total number of Europeans and Eurasians has now fallen to 88, and the number of Natives risen from 547 to 636. The once numerous class of European and Eurasian firemen has all but disappeared, which, considering that till lately they were the material from which drivers were made, is significant. The actual number of Natives employed as drivers has risen from 10 to 30, and this number is now capable of expansion, the men employed as shunters being practically drivers, and so used within station limits. The larger number of Native firemen also give more men to draw from.

DESIGNATION.	31st December 1882.		31st December 1883.	
European drivers	63		59	
„ shedmen	3		3	
„ firemen	12	105	4	88

„ shunters	36		27	
„ firemen	229	547	299	636
„ cleaners and jemadars	272		280	
GRAND TOTAL	652		724	

"Comparing the European staff as at present constituted with that required before Natives were introduced, it will be seen that, instead of 74, there would have been 104 drivers, or taking the whole European class "88" together, they would require to be increased to 214; a clear saving of the difference in pay between 126 Natives and that number of Europeans, which cannot be taken at less than Rs. 1,50,000 for the twelve months under review. The Native drivers now form about 30 per cent. of the total number employed; 95 per cent. of the firemen are Natives, and all the shunters. Further increase in traffic must be met by development of the Native element in the staff.

"*Effect on working.*—The general results on the whole have been satisfactory. A very considerable saving in expenditure has been made, and, although more expensive than European enginemen in fuel, stores and repairs, the men are improving, and if only more diligent in attending in school would leave little to be complained of. Confidence, which can only be gained by experience, will work its own progression.

"When the short time this movement has been under way is taken into consideration, the progress and outlook is highly satisfactory, and tested by the levelling rule—economy—has given excellent results.

"*Training.*—The system followed is that described in a previous report. The most promising men are selected from among the staff and trained as firemen, shunters and drivers, rising through the different grades; and as all Natives in connection with the train service are offered every inducement to attend school, and in addition, are especially rewarded when they display aptitude, it is believed the best men come to the front. Although so far successful as to have produced the men now working, the advancement made in education is not great, and can only be traced to the class of men from which the staff is drawn being extremely illiterate. They are capable of acquiring the purely mechanical knowledge absolutely necessary to allow of their employment on locomotives, yet make very little progress in the school provided for their mental training. Efforts have been made to induce the better class of Natives to join, but up to the present the greasy duty and laborious nature of the occupation has deterred them from doing so. But Locomotive Superintendent feels that a weak point is the lowness of education, which, although to be regretted and combated, is not surprising and can only be overcome by perseverance. The total number of scholars on the roll was 198 for the 12 months, the average attendance 78, and of these—

36 can read a little English,
32 „ „ vernacular,
130 are learning the alphabets and spelling.

"Remuneration offered has not differed from that in force during 1882 and detailed in last report—

Native drivers, „ shunters, „ jemadars	Rs. 20, 25, 30
„ firemen	„ 8, 10, 12, 14
„ cleaners	„ 7 to 10
„ fuel coolies	„ 6 to 10

"As the seduction of cheap labor is likely to mislead, it may be useful to formulate the condition and extent to which it can be carried on purely commercial grounds. The following illustration can be applied to the exact circumstances of any case. Taking the total emoluments of a European and a Native at Rs 300 and Rs. 50 respectively, it is evident that the European must be prepared to save Rs. 250, before he can compete with his rival, allowing other advantages, if any, not to be considered. Applied to a few different districts the cost of fuel on which is given, and for example, say, a driver runs on an average 2,500 miles per month:—

	Rs.	
Fuel on the East Indian Railway	costs 2·15	per ton of coal.
„ „ Eastern Bengal Railway	„ 8·37	„ „
„ „ Great Indian Peninsula Railway	„ 12·81	„ „
„ „ Sind, Punjab, and Delhi Railway	„ 19·39	„ „
„ „ Punjab Northern State Railway	„ 28·61	„ „
„ „ Rajputana-Malwa Railway	„ 22·42	„ „

Then on East Indian Railway a European driver would have to save more than a Native by lbs. 104 per train mile.

,,	Eastern Bengal Railway	do.	do.	26·75	do.	do.
,,	Great Indian Peninsula Railway	do.	do.	17·49	do.	do.
,,	Sind, Punjab, and Delhi Railway	do.	do.	11·55	do.	do.
,,	Punjab Northern State Railway	do.	do.	7·83	do.	do.
,,	Rajputana-Malwa Railway	do.	do.	9·63	do.	do.

"In Bengal, Rs. 250, the amount by which the European is handicapped, will purchase 116 tons of coal, so that on the above mileage a man would have to save that quantity (over 100 lbs. per mile run). On the Punjab Northern State Railway Rs. 250 will only purchase $8\frac{3}{4}$ tons of coal, and on the same mileage the European need only save 7·83 lbs. per mile to stand level with the Native. These examples abundantly prove that in Bengal and places where fuel is cheap, at the present rates of labor, Europeans cannot compete with Natives at all, while in districts where fuel is very expensive the difference between the men is reduced to conditions where the highly skilled European can easily excel his less careful and expert rival.

"*Conduct.*—The general conduct of the men in the execution of their work has been satisfactory. They have been attentive and gave little trouble."

In forwarding the above report to the Consulting Engineer, the Agent makes the following remarks:—

"It is said that, by the introduction of this movement, the substitution of Natives in lieu of Europeans in the Running Department is saving at the present time at the rate of $1\frac{1}{2}$ lakhs rupees annually, but paragraph 8 points out that beyond a certain limit it may not, on commercial grounds, be prudent to extend the system.

"The East Indian Railway has always been held up as the initiator of cheap (Native) labor, and the system has largely developed on that line, but it is the low rate at which their fuel is obtained which enables them to extend the measure. In fact, to save 10 per cent. in the price of labor, the East Indian Railway can afford to consume 20 per cent. extra fuel, whereas on this Railway, where fuel is nine times the cost of what it is on the East Indian Railway, we can afford to pay 37 per cent. extra wages to save 10 per cent. of fuel.

"Now at present the Native driver is certainly more than 12 per cent. more extravagant in fuel than the skilled European, but, as his services are confined to such work as will not admit of his unskilfulness affecting the revenues of the Company, it does not much matter.

"That it is quite possible for the Native to become as adept as the trained European I have no doubt, but it will take time, and I would much rather see a steady healthy development of the system than a rapid growth which might land both men and masters in difficulties.

"On the Punjab Northern State Railway, where fuel is 13 times more expensive than on the East Indian Railway, Native labor would never pay, and as a matter of fact there are very few Native drivers on that line."

10. In his letter No. $\frac{A}{453}$ of the 11th July 1884 the Locomotive and Carriage Superintendent reports as follows:—

Oudh and Rohilkhand Railway.

"I beg to report that on the 31st December 1883 we had 32 Native drivers and 42 shunters on the line, and they have given general satisfaction. There is nothing special to report on them. The men who have lately come forward as shunters and drivers are more educated than the older hands; and in most cases they have found it to their interest to try and learn to read and write some language."

Shunters	40	42
TOTAL	69	74

11. In his letter No. 432, dated the 21st January 1884, to the Director General of Railways, the manager reports as follows:—

Punjab Northern Railway.

"Native drivers are now working all trains on the Salt Branch (main line), Khewra Extension, Khusalgarh and Sialkot Branches, or a total of 180 miles. Before the Attock Bridge was opened the line from Khairabad to Peshawar was worked by Native drivers, but this has been discontinued since the engines have run through from Rawalpindi to Peshawar.

"All shunting on the line is done by Natives.

"All firemen on the line are Natives.

"The proportion of Native to European drivers on the line on the 31st December 1883 was 1 to 3.

"The general results of the employment of Natives as drivers, shunters, and firemen continue to be satisfactory."

Comparative Table showing Numbers employed.

	1882.	1883.

Shunters	5	7
TOTAL	16	21

12. The following is the report of the Locomotive Superintendent on the subject:—

Indus Valley Railway.

"There has been no change in the system of training reported last year: the classes for English at Sukkur and Jacobabad continue to be attended fairly, but the progress in learning has not been so satisfactory as could be wished. Only one Native driver has been found able to pass a sufficiently good examination in English to entitle him to the additional Rs. 5 per month allowed by the rules. The progress of the class at Jacobabad is on the whole better than at Sukkur, which is to be attributed to the facts that the Kandahar Branch line is not affected by the heavy traffic on the main line, which causes irregular attendance, and that the school room is close to the engine shed and to the Native quarters, so that the men can be readily found out and collected at any hour that is most suitable; whereas in Sukkur the school room is at a very considerable distance from both the quarters and the shed, and the men, who unfortunately are ready enough to find any excuse for not attending the school, find this one ready made. It also precludes the shed clerk from getting to it in the middle of the day, which is often a convenient time for collecting the men together. It is strongly recommended that a class room with the necessary rough furniture be provided near the engine shed, and that prizes be offered as an inducement to the scholars to improve. But it cannot be lost sight of that the small progress made is mainly due to the fact that no persons of any good social standing, and very few of any education at all offer for the employment.

"Out of a total number of 139 on the muster roll, 122 have attended the classes, and the daily attendance averages 50.

"There are 10 Native drivers employed on the following rates of pay:—

1 on Rs. 45 per month
3 on ,, 40 ,, } consolidated,
1 on ,, 35 ,,
2 on ,, 1 per day
3 on ,, 0-14 ,, } with overtime,

and 13 Native shunters on the following rates:—

1 on Rs. 35 per month, consolidated,
2 on annas 13 per day
10 on ,, 12 ,, } with overtime.

"One of the best drivers has been lost on account of being connected with a robbery, and one of the shunters has had to be reduced to fireman for carelessness.

"Three of the drivers are working goods trains between Sukkur and Radhan, and seven on the mail trains between Rindli and Ruk, and on the fast local service between Jacobabad and Sukkur.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	8	10
Shunters	12	13
TOTAL	20	23

"The increase of the staff continues to receive the most careful attention, and men are pushed on as soon as they show themselves to be reliable and skilful."

The Manager states that the question of building a school at Sukkur is under discussion with the Locomotive Superintendent.

13. In his letter No. 2251E., dated the 17th June 1884, to the Director General of Railways, the Manager reports as follows:—

Rajputana-Malwa Railway.

"*System of training adopted.*—The Locomotive Superintendent reports that a school has for some short time past been maintained at Phalera, where Native boy shunters and drivers attend as their duties allow. Besides being taught to read and write at the school, the present and any new rules and orders for working the traffic are explained to them.

"*Numbers employed.* -The following statement compares the numbers employed respectively on the 31st December 1882 and 31st December 1883 :—

	On 31st December 1882.	On 31st December 1883.
Drivers	13	18
Shunters	31	41
TOTAL .	44	59

"*General Remarks.*—The relative advantages and disadvantages of employing this class of labor are summed up as follows by the Locomotive Superintendent:—

"*Advantages.*—Lower salary paid to Native drivers as compared with that paid to Europeans

"*Disadvantages.*—(1) Larger consumption of coal and stores, the ratio of coal consumption of Native drivers to Europeans per engine mile being as 34·7 to 29·64, which becomes a serious consideration owing to the high cost of coal on this line.

"(2) Ignorance of the English language, in which language the line clear messages and any endorsements are written; this being so, the driver has to trust to the statements of the guard and station master.

"(3) In cases of accidents Natives are less ready of resources than Europeans. The percentage of loss of time in the case of Natives is 126 against 39 in that of Europeans, and the percentage of engine failures is 43 for Natives and 16 for Europeans.

"In conclusion I have the honor to state that, all things considered, there is no advantage to be gained in the employment of Natives as drivers and shunters on the Rajputana-Malwa Railway.'

14. The Manager of the Wardha Coal and Nagpur and Chhattisgarh State Railways in Central Provinces. Railways states as follows :—

"As reported last year, *vide* this office No. 5554M., dated 28th December 1882, schools for training Native lads for enginemen and shunters were not opened either for the Nagpur and Chhattisgarh or the Wardha Coal State Railway. On the former it was not necessary to establish such a school, as the requirements of the line could be met from other sources; and the Wardha Coal line being so short (only 45 miles), new men were not required; hence the necessity of establishing a school at any expense is not warranted; as, however, none of the firemen and shunters now on this line can read or write in any language, the Assistant Manager has recently opened a school for teaching them to do so in their vernacular.

"As required by Government of India Circular No. 1 Railway of 1882, a statement of the number of Native drivers and shunters employed on both these lines during the busy season of 1882-83, showing also the corresponding numbers employed during 1881-82, is enclosed.

"The statement shows an increase of the number of Natives on both lines; and on the Nagpur and Chhattisgarh, there were, during the period under reference, several men, who, although Europeans by name, were either East Indians or Natives.

"General character and the ability of the men employed on the Nagpur and Chhattisgarh State Railway are given in Locomotive Superintendent's letter No. 4025 of 31st July 1884 (copy enclosed).

"The four men on the Wardha Coal line were engaged shunting in the colliery sidings and Warora Station yard; one of them was, until recently, allowed to drive goods trains on the main line, but as he cannot read any language this has been discontinued."

Statement of Native Drivers and Shunters employed on Nagpur and Chhattisgarh and Wardha Coal State Railways during the busy Seasons of 1882-83 and 1881-82.

The following is an extract from the letter of the Locomotive and Carriage Superintendent, reporting on the Native drivers and shunters employed on the Nagpur and Chhattisgarh State Railway during the year 1883, referred to in the Manager's letter :—

"Driver J. Manuel was appointed on this line as a Native shunter on Rs. 25 per mensem on the 7th March 1881, and from 1st January 1883 was promoted to driver on Rs. 30. During the year he was employed in shunting at the station yard, and occasionally in driving local trains between Nagpur and Kamptee. He works fairly well as a shunter, but, being unable to read or write in any language, he is not likely to be employed as a main line driver.

"Driver Khandoo Baloo was appointed as a fireman on Rs. 11 per mensem on the 1st of April 1880, and promoted to driver on 1st May 1882 on Rs. 20, and further promotion to Rs. 30 on the 1st January 1883. During the year he worked as driver of local trains between Nagpur and Kamptee, and occasionally on goods trains on main line. He can read and write a little, and may eventually become a good engineman.

"Driver Mancherjee Framjee was appointed on Rs. 60 per mensem on the 29th January 1883 and worked on goods trains on the main line, but was dismissed on the 23rd May 1883 for allowing his boiler to run so low in water as to drop the lead plug. He can read and write English.

"Shunter Gulab was appointed on Rs. 18 per mensem on the 1st January 1882, and promoted to Rs. 25 on the 1st January 1883. During this time he was employed in yard shunting and driving local trains between Nagpur and Kamptee, and occasionally goods trains on the main line. He was fined ¼ month's pay on the occasion of a collision, on the 7th April 1883, between his and another engine at Amgaon station, as he had not got his head lamp lighted; also fined ⅛ month's pay on the 6th April 1883 for careless and violent shunting in Nagpur station. He can read time tables and line clears. He resigned his appointment in May 1883.

"Shunter Doctor was appointed on Rs. 32 per mensem on the 8th December 1882, and was employed in yard shunting. He is pretty well up in his work and has on one or two occasions run local trains between Nagpur and Kamptee. He can read and write English.

"Shunter Inayat Hossain was appointed on Rs. 20 per mensem on the 16th March 1883, and discharged on the 19th August 1883 on account of reduction of establishment. He was employed in yard shunting and local trains between Nagpur and Kamptee. He can read very little except time tables and line clears, and cannot write.

"Shunter Cawagee Pestonjee was appointed as a fireman on Rs. 15 per mensem on the 23rd November 1881, and promoted to shunter on Rs. 30 on the 1st January 1883. He was employed in shunting at the station yard and driving local trains between Nagpur and Kamptee, and occasionally goods trains on the main line. He can read and write English. He resigned on the 24th June 1883.

"Shunter P. Baloo was employed as a fireman on Rs. 11 per mensem on the 24th November 1880, and promoted to shunter on Rs. 18 on the 1st December 1882. During the year he was employed in yard shunting and driving Raj-Nandgaon local trains and occasionally goods trains on the main line. He can read very little except time tables and line clears, but is likely to become a good engineman."

In submitting the above reports the Chief Commissioner remarks that he is not quite satisfied that as much as possible has been done to train Native lads as drivers and shunters, and that immediate attention will be given to the matter.

15. Bengal Provincial Railways. The Government of Bengal has issued the following Resolution, No. 1329R.E., dated the 25th March 1884, on the subject :—

"OBSERVATIONS.—In Resolution No. 1023R.E. of the 28th February 1883, noted above, it was stated: 'The progress made in the employment of Native drivers and shunters is considered on the whole satisfactory. The real difficulty still is to obtain men with the necessary qualifications, and to overcome the aversion the men have to attend the night schools provided for them.

* * * * * *

"'They should, however, be employed to the fullest extent on goods trains, and the Lieutenant-Governor trusts that the officers in charge of lines will not relax their efforts to see that this order is carried into effect.'

"2. The reports for the year 1883 show that the following progress has been made in the employment of Native drivers and shunters on the railways under the orders of this Government :—

Northern Bengal State Railway. 16. "The Locomotive Superintendent reports as follows :—

"'There are now two teachers attached to the school—one to teach Bengali and the other Hindi.

"'The numbers of pupils on the rolls are 25, of whom five learn Bengali and twenty Hindi: the average daily attendance is 12.

"'The comparative statement showing the number of Native drivers employed in the various grades during the year 1882-83, and the salaries drawn in each grade, is as under :—

1882. Grade. Rs.	No. of men.	Salary. Rs.		1883. Grade. Rs.	No. of men.	Salary. Rs.	
20 to 40	1	38	7 drivers, 9 shunters, and 1 assistant shunter.	20 to 40	1	38	12 drivers, 7 shunters, and 1 assistant shunter.
	1	30			1	30	
	1	26			1	28	
	3	24			3	26	
	4	22			1	24	
	3	20			3	22	
	2	17			5	20	
	1	16			1	18	
	1	14			3	16	
					1	14	

"'Of the 12 drivers, one was transferred from this Railway to the Calcutta and South-Eastern State Railway line in May last; two are employed in the Kaunia and Dharlla Railway line; and two in running trains in the Rungpore Branch, and seven in the main line, working goods trains.

"'The seven shunters are employed as yard shunters at Saidpur, Sara, and Siliguri.

"'The assistant shunter is employed at this station.

"'All these men, except one, are working in a satisfactory manner. They are regular in attendance.

"'The two drivers of the Kaunia and Dharlla Railway line have been awarded a reward of Rs. 5 each at the end of last half-year for keeping their engines clean and in good order.'

17. "The Assistant Locomotive Superintendent states as follows in his letter No. 632D., dated 30th December 1883, to the Manager:—

Tirhoot State Railway.

"'The number of of men employed for the years 1881, 1882, and 1883 compare as follows:—

Grade.		1881.	1882	1883.
Drivers . . .	Rs. 15 to 40	...	2	5
Shunters . . .		3	2	5*
Assistant shunters .		...	1	2
		3	5	12

"'From these figures you will see that the number of available enginemen and shunters has been doubled in the last year. You will also note that we have now eight men capable of working trains, and two others who should be fit to go out on the line in another six or eight months' time.

"'No alteration in the mode of supplying men has been made during the year, the old rule of promoting cleaners to firemen, firemen to shunters, and shunters to drivers having been pursued, each man undergoing a careful examination before he is promoted to shunter, and again when he is promoted to driver. At the present time there are some five men having worked their way up to posts of first firemen and shed tindals, who are fit to be promoted to shunters whenever they may be required, two of whom are now actually employed in shunting in the Somastipur yard during the present increase in the number of working trains.

"'As regards the progress made to teach the men to read and write, a night school has been started here since March last, and a schoolmaster purposely employed to conduct the same. The attendance has been satisfactory on the whole

"'During the year eight failures have occurred to engines under the charge of Native drivers. Since the 1st of this month no Europeans have been employed on goods, local or material trains, the work having been entirely and satisfactorily performed by Natives; an up and down local, an up and down goods, two ballast and one material train having been regularly running.

"'It is therefore clear that our present staff of Native enginemen is sufficient for our requirements until the line opens out or the traffic increases; and I consider that they have performed the work allotted to them for the year in question in a satisfactory manner.'

Calcutta and South-Eastern and Nalhati State Railways.

18. "The Locomotive Superintendent reports:—

"'Arrangements have been made to establish a night school on the Calcutta and South-Eastern State Railway, similar to that established at Saidpur, with a view to give a rudimentary education in Bengali and Hindi to these men, as well as to the workshop apprentices.

"'The comparative statement showing the number of Native drivers employed in various grades on the Calcutta and South-Eastern and Nalhati State Railways during the year 1882-83, and the salaries drawn in each grade, is as under:—

Calcutta and South-Eastern State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs	No. of men.	Salary. Rs.	
20 to 40	3	30	20 to 40	1	34	7 drivers, 4 shunters, and 1 assistant shunter.
	1	20		2	30	
				2	24	
				2	20	
				4	15	
				1	12	

"'The seven drivers are employed in running trains.

"'Of the four shunters, one died in June last, and the three are employed as yard shunters at Calcutta and Diamond Harbour.

"'The assistant shunter is employed at Calcutta.

Nalhati State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs.	No. of men.	Salary. Rs.
20 to 40	2	30	20 to 40	2	30
	1	15		1	15

"'All these men have given little trouble. They are regular in attendance and careful in the performance of their duties.

"'Three drivers of the Nalhati line, and two of the Calcutta and South-Eastern State Railway line, can read and write.'

"RESOLUTION.—The large increase in the number of Native drivers and shunters employed during 1883, as compared with the number during 1882, and the favorable reports, with referenc

* Three of these men are actually working trains at the present time.

to the attendance of the men and the satisfactory performance of the duties entrusted to them, are a sufficient proof that the training of Natives for employment on locomotive engines has now passed beyond the experimental stage, and that the difficulties at first experienced in carrying out the measure have been fairly overcome.

"It is noted, however, that the men are as yet employed only on goods, local or material trains, and though, with the class of men now obtained, this limitation may be advisable for the present and for some time to come, the Lieutenant-Governor trusts that every endeavour will be made to obtain the services of a class of men of somewhat superior intelligence, who, with the necessary experience, might reasonably be expected to become competent for the working of fast mail trains. With that object in view, the night schools now provided (the attendance at which is still somewhat unsatisfactory) should be made as efficient as possible by granting prizes for regular attendance, and by regulating the pay of the men on promotion according to the result of their examination."

19. The following is an extract from the report of the Locomotive Superintendent:—

North-Western Provinces and Oudh Provincial Railways.

"Lads of about 13 years of age are engaged and employed in assisting Native workmen in the workshops, and as engine cleaners in the running shed. They are compelled to attend school from 7 to 9 A.M. daily, Sundays excepted.

"A school was started on a small scale at the Cawnpore workshops in the month of March last with seven lads on the roll, and before the end of the year their number increased to 14. The average daily attendance was 10·2. Those of the lads who are constant in attendance during the whole period of school's existence made a very fair progress in reading Urdu, Nagri, and English, and some of the elder ones can write a little.

"A trial was again made in giving good encouragement to several youths of the better class to train for drivers, all of whom liked the free school attendance but got tired of work, and in a few days all disappeared."

20. The Locomotive Superintendent in his letter to the Manager reports as follows:—

Burma State Railway.

"I have the honor to acknowledge receipt of your endorsement No. 1831-6 E. R. of 18th July 1884, forwarding British Burma Public Works Department No. 4519, dated 17th July 1884, and in reply to state that the night school organised at Rangoon and alluded to in my No. 1205 of 18th April 1883, when writing on the same subject now under notice, has been abolished for the following reasons:—

"(1) that the Natives attending the school gradually decreased in number;

"(2) the schoolmaster having resigned his appointment through his having obtained a more lucrative one.

"Steps have, however, since been taken to reorganise the school in conjunction with the Traffic Department in order to train Natives as brakesmen, guards, and drivers.

"During the last busy season two ballast trains have been successfully worked on the open lines by Natives, and it is my intention to put these men in charge of goods trains north of Latpadan during the next busy season. I regret to state that the skilled firemen who are entertained during

* These numbers do not correspond with those shown in the Report for 1882. Please see foot-notes to the general statement inserted in this Resolution.

the busy season generally leave this line for India during the slack season, consequently the training and promotion of these men to shunters or drivers have been hindered.

"We have now six shunters and two head jemadars who are able to do shunting, and I hope to make a more favorable report on this matter in my next.

"None of the Karen lads have as yet been sent out firing for reasons already explained in paragraph 8 of my last report.

"In conclusion I beg to state that every effort is being made to meet the wishes of the Local Government on the subject."

1st half-year, 1884	16	3*	1*	* 1 promoted to driver at end of March.

His Highness the Nizam's Railway.

22. The Locomotive Superintendent states that no change has been introduced in the system of training Natives as engine-men since the submission of the last report.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	4	5
Shunters	2	1
TOTAL	6	6

(*a*) Two of these men are head jemadars who are able to do shunting.

RESOLUTION.—From the foregoing observations the numbers of Native drivers and shunters employed on the several Indian Railways appear to be as follows :—

RAILWAYS.	Drivers.		Shunters	
	1882.	1883.	1882.	1883.
East Indian	125	116	125	120
Guaranteed.

TOTAL	327	391	304	325

(*a*) Pilotmen.
(*b*) Employed during the busy seasons of 1882 and 1883.
(*c*) The number of drivers shown in the previous return was 5 and that of shunters 8.
(*d*) Four shunters were shown in the return for 1882 as employed on both the Tirhoot and Patna-Gya State Railways. The latter Railway is now worked by the East Indian Railway Company.
(*e*) Three of these men are actually working trains at present time.
(*f*) Two of these men are head jemadars who are able to do shunting.

2. The Government of India notices with satisfaction that there has been an increase of 64 in the number of Native drivers and of 21 in the number of Native shunters, and that the subject of training Natives for such employment continues to receive the attention of the authorities concerned.

ORDER.—Ordered, that this Resolution be communicated to the Governments, Administrations and officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor-General for Rajputana, Central India, and Biluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.
The Accountant General, Public Works Department.

Ordered also, that this Resolution be published in the Supplement to the *Gazette of India*.

F. FIREBRACE, *Major, R.E.*,
Under-Secretary.

Add difference between the quantity passed down by 1st Circle, 1,629, and quantity acknowledged by 2nd Circle, 725, due to closure of canals at different periods			904	
				4,029
Deduct drainage water				143
				5,773

* Passed down to supplement the Agra Canal.

Executive Engineer, Northern Division, Ganges Canal, reports—Very good rain during the month. Canal closed for repairs on afternoon of 9th. River high. All crops very good.

Executive Engineer, Meerut Division, Ganges Canal, reports—In the 1st sub-division there was a light demand for water for rice during the first week but after the heavy rain on the 9th and 10th all demand ceased.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—There was slight demand on two rajbahas up till 8th, when rain fell and all demand ceased.

Executive Engineer, Aligarh Division, Ganges Canal, reports—Heavy and general rain on the 3rd of August stopped demand for water entirely.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—There has been no demand and plentiful rain throughout the division all through the month. The decrease compared with last year is due to the plentiful rain compared with last year, and is almost entirely under the head of Other food-grains.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—An increase of 1,938 acres in indigo, which is the chief irrigated crop in this division. Food-grains have fallen off owing to the successively heavy rain, *i.e.*, 25·4 inches in August, against 3·3 in the same month last year.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports—Abnormally heavy rain throughout the month, and consequently no water was taken for irrigation of rain crops. There has been an increase in indigo, but a falling off in sugarcane, as explained last month.

Executive Engineer, Eastern Jumna Canal, reports—The ample rainfall stopped all demand after the 10th August: hence the decrease in area. The decrease is chiefly in rice and other food-grains. There is an increase in sugarcane and indigo. Crops in low lands injured by excessive rain. Demand for crops previously irrigated commenced on 27th August.

Executive Engineer, Agra Canal, reports.—With the exception of one distributary, Shergarh, no irrigation was effected during August. The excess of escaped volume over supply entering division is explained by a quantity of water entering the canal by inlets, &c.

Executive Engineer, Rohilkhand Canals, reports—A very wet month; not much demand for water. Moderately heavy floods came down most of the rivers on the 16th and breached most of the earthen dams. Crops are looking very well.

Collector, Bijnor, Executive Engineer, Dun Canals, Deputy Commissioner, Jhansi, and Collector of Hamirpur, report, that—no irrigation was effected during the month of August 1884.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

G. F. E. S. NEILL, *Major, M.S.C.*,
Under-Secy. to the Govt. of Bengal, P. W. Department.

The 16th September 1884.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 2nd October, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

STRAITS SETTLEMENTS EMIGRATION ACT, 1877, REPEAL, AND EMIGRATION ACT, 1883, AMENDMENT, BILL.

The Hon'ble SIR STEUART BAYLEY introduced the Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883, and moved that it be circulated for opinion.

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

BURMA GAMING BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma be taken into consideration. He said:—

"We have not made many alterations in this Bill. The authorities of British Burma do not think it necessary to make the game of *ti* a lottery within the meaning of the Penal Code, and consequently we have omitted the section to which my hon'ble friend Mr. Barkley took exception on the introduction of the Bill.

"The Chief Commissioner has suggested one or two minor amendments, all of which we have adopted with one exception. He suggests that we should extend the meaning of the term 'common gaming-house' by adding to the words 'house, walled enclosure, room or place' the words 'enclosed or unenclosed.' It is difficult to say precisely what the word 'place' would or would not include in this connection. The English Courts, in construing similar expressions in the English Lottery Acts, have given the word a very wide interpretation, and their decisions, though not binding on the Indian Courts, would probably be looked to

as a guide. But I think that the addition proposed by the Chief Commissioner would extend the meaning of the term 'common gaming-house' further than we are warranted in extending it, would be inconsistent with the mode in which the expression is used throughout the Act of 1867 and would lead to confusion. Nor is the addition necessary, because under the Bill the professional gambler can be punished wherever he carries on his operations. And there is a section of the Act of 1867 under which light but sufficient penalties can be imposed on ordinary players in places like highways. We have, however, altered the language of this section so as to give it a somewhat wider range in British Burma than elsewhere."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

BURMA MUNICIPAL BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to amend the law relating to Local Self-government in British Burma be taken into consideration. He said:—

"This measure has been for some time before a Select Committee, and it will be seen that there are some considerable differences between the Bill as introduced and the Bill as now amended. These differences are due mainly to three causes.

"In the first place, we have confined the scope of the measure to municipalities proper. The original Bill contained a provision inserted on the advice of the Chief Commissioner, Mr. Bernard, and of Mr. Crosthwaite when officiating in his place, which enabled the Local Government to include within the limits of a municipalty not merely a town but also any tract of country adjoining a town. The object of this provision was to meet the requirements of certain rural tracts until such time as it might be found possible to establish a system of local boards for rural districts.

"But it appears from the papers which have been submitted to us that on fuller consideration the weight of opinion is against the attempt to include in one municipality urban and rural tracts, and that the difficulty of framing provisions suitable both to town and to country is greater than had been anticipated. Accordingly we have adopted Mr. Bernard's recommendation that the Bill be confined, like other Municipal Acts, to urban tracts, the matter of local government in rural tracts being left to be dealt with hereafter.

"In the next place, we have followed the precedent set in the new Panjáb Municipal Act by substituting for a power to make bye-laws about nuisances detailed provisions on that subject. We submitted for the consideration of the Chief Commissioner the clauses for that purpose which had been settled by the Select Committee on the Panjáb Bill; and it is with his full approval that they have been inserted with a few modifications suggested by local circumstances. There is, as in the Panjáb Act, a power to exempt a municipality from such of the provisions as may be considered unsuitable to small places.

"And, lastly, we have further availed ourselves of the labours of the Committee on the Panjáb Bill by adopting several of the modifications and additions which had been suggested and approved in the course of the long discussions on that Bill. Most of these amendments are of minor importance, and, as they are noticed in our report, I need not dwell on them now. I will only say that they have not been adopted without full communication with the Chief Commissioner.

"There is, however, one section to which, as it deals with a subject of some importance, and as it does not follow quite the same lines as the provisions on the same subject in other Municipal Acts, I ought to direct the attention of the Council.

"By a section in the original Bill municipal committees were required to make grants-in-aid to schools in accordance with rules made by the Local Government. For this we have substituted a section specifically appropriating to

educational purposes the income from schools and all sums acquired by the committee or board for educational purposes, and further requiring the assignment for educational purposes of such sum annually, not being more than five per cent. of the gross annual income of the municipality, as the Local Government may direct. This section is, in the opinion of Mr. Bernard, indispensable for the purpose of carrying out the educational policy which has recently been established in British Burma, and under which municipalities, whilst relieved of police-charges, are required to provide for the maintenance of local schools. The same policy, as the Council are aware, has been carried out, or is in course of being carried out, in other parts of India, and the way in which it is carried out is usually to strike a bargain with the municipality and not to relieve it of its police-charges except on condition of its undertaking burdens for other objects. It may possibly be that, when Burma municipalities were relieved of their police-charges, sufficient care was not taken to impose a similar stipulation, or to make its meaning clear; but, however this may be, it appears from the papers which were laid before the Committee that in the case of one municipality practical difficulty has been experienced in securing the due appropriation of sufficient funds to educational purposes, and it is to meet difficulties of this kind that this section has been introduced."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

RANGOON WATER-WORKS BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

PANJÁB COURTS BILL.

The Hon'ble MR. BARKLEY moved that the Report of the Select Committee on the Bill to amend the law relating to Courts in the Panjáb be taken into consideration. He said:—

"As little more than three months have elapsed since leave was given to introduce this Bill, I need not repeat the explanation I then gave of the purposes for which it was proposed to alter the law relating to Courts in the Panjáb; but, before proceeding to notice the changes in substance which the Select Committee have made in the Bill, it may be well to mention, as there seems to have been some misunderstanding on this point in some quarters, that the reference in the preamble to the previous sanction of the Secretary of State was not intended to preclude discussion of the principles involved in the Bill, but only to show that, in continuing the jurisdiction of the Chief Court over European British subjects in capital cases, this Council would not be exceeding the limits placed upon its legislative powers by section 22 of the Indian Councils Act, 1861, and section 46 of the Statute of 3 & 4 Wm. IV, c. 85. Possibly the words were not necessary, as the jurisdiction in question was conferred on the Chief Court in 1866; but when the Act constituting the Chief Court, which was passed in that year, was repealed and this jurisdiction continued by Act XVII of 1877, the sanction of the Secretary of State was recited in the preamble of that Act, and we have followed the same course in the present Bill, lest the omission of the words should give rise to misapprehension.

"Coming now to the changes made in the Bill by the Select Committee, the only point I need notice in the preliminary chapter is the power which the definition of 'small cause' gives to the Chief Court, with the sanction of the Local Government, to add for the purposes of appeal other classes of suits to those which are made cognizable by Small Cause Courts by Act XI of 1865. A power of this nature was proposed to be taken in section 42 of the Bill as introduced, the reason being that, while it appeared desirable to divide suits into two classes for the purpose of determining the course of appeal,

the definition of the suits cognizable by Small Cause Courts contained in section 6 of Act XI of 1865 did not form an altogether satisfactory basis for this division, and it was therefore thought expedient to provide a means of effecting the division on a different basis. It is probable that, when the Mufassal Small Cause Courts Act comes to be amended, it may not be necessary to retain this power; and in the meanwhile the definition adopted by the Select Committee indicates how the power is intended to be exercised by excluding those classes of suits in which the Presidency Small Cause Courts have not jurisdiction.

"In the chapter relating to the Chief Court, the principal change is that the proviso to the first sub-section of section 8 is now framed so as not to restrain the Chief Court from making rules allowing one Judge of the Court sitting alone to reverse any order within the meaning of the Civil Procedure Code. This was thought more convenient than to specify in the Bill the classes of orders which a single Judge might or might not be allowed to reverse.

"Section 19 of the original Bill has been omitted, as it appeared to be sufficiently provided for by sections 25 and 647 of the Civil Procedure Code, and a change in the language of section 12 has made it unnecessary to retain section 32, while it was thought that section 33 and a part of 31 would find a more appropriate place in a Bill amending the Civil Procedure Code than in that now before the Council.

"In the chapter relating to the Subordinate Civil Courts, the designations of those Courts have been changed so as to meet the wishes of the Local Government and give effect to the suggestions of a number of the officers whose opinions on the Bill were invited. The District Judge appeared to be a more appropriate title than the Assistant Judge for the officer whose Court will be the principal Court of original jurisdiction in a district, and who will control the other Courts of the district and hear appeals from them in certain cases; and it was thought better to retain the title of Munsif, which is borne by a large number of the officers who preside over Courts of first instance, than to designate the Courts of these officers as Courts of Subordinate Judges of particular grades.

"With regard, however, to the importance of some of the functions which the legislature has vested in the District Court, which in other Provinces is the highest Court subordinate to the High Court, section 23 makes the Divisional Court for the purposes of the Indian Divorce Act the District Court for all districts comprised in the division, and enables the Local Government to direct that any other functions of the District Court of any district should be exercised by the Divisional Court. The Bill as introduced made the Divisional Court the District Court, but provided for cases in which the powers of the District Court might more conveniently be exercised by a local Court by enabling the Local Government to confer any of the powers of a District Court upon a Deputy Commissioner or Assistant Judge. Under the section as now framed the same result may be attained, though it will be reached by a different route.

"A more important change is that the Divisional Court may consist of one or more Judges, the Bill as introduced having provided for its consisting in all cases of two Judges at least. The constitution of Appellate Courts subordinate to the Chief Court and consisting of more than one Judge is an experiment to this extent at least that we have hitherto had no experience of how such Courts may be expected to work; and, in addition to this, the sanction which has been given for the appointment of 13 Divisional Judges would not admit of the constitution of more than six Courts of two Judges each, unless some of the Judges are appointed in addition to other duties—an arrangement which may not always be found convenient. It therefore seemed desirable to give greater elasticity to the Bill by allowing a Divisional Court to consist of one Judge if, with reference to the circumstances of the case, the Local Government thinks this expedient or necessary. When it consists of more than one Judge, the Chief Court is enabled by section 24 to make rules for the exercise of the powers of the Court by one or more of the Judges, subject to a proviso similar to that which limits the exercise of the powers of the Chief Court by one Judge of that Court.

"As in the case of the Divisional Judges, the District Judge may be an officer holding that appointment in addition to other duties; for instance, the Deputy Commissioner of the district. This is necessary, as, while the scheme sanctioned by the Secretary of State for India provides 23 officers, any of whom, if considered fit to control the Subordinate Courts, might be appointed District Judge of one or more districts, some of the officers at present available for these appointments have not the training and acquirements which would admit of their being entrusted with advantage with the control of Subordinate Courts; and there are also some districts the judicial work of which is not enough to employ a separate District Judge, while they are not favourably situated for union with neighbouring districts for judicial purposes. As an instance of districts of this class I may mention Kohat, which is separated from Peshâwar, the district with which it has most affinity, by a pass situated in independent territory.

"The officers who could not be invested with controlling powers over all the Courts in a district will still be available as Subordinate Judges, and in addition to their original jurisdiction, which will be without limit as to value or amount, unless the Local Government thinks fit to impose a limit, they may be invested with the appellate jurisdiction of a District Court.

"The Chief Court is also enabled, by section 29, to authorize any District Court to transfer certain classes of proceedings which must be instituted before a District Court to a Court subordinate to it, and to withdraw them from such Court. The largest of these classes is that of applications for certificates for the collection of debts due to the estates of deceased persons—applications which are very numerous in some districts and which in most cases relate to comparatively small amounts of money. A more important class, however, is that of applications relating to the guardianship of minors, which numbered 375 in 1883, more than one-third of this total occurring in four districts.

"A power has also been taken, which may be convenient in outlying tracts, such as Kulu, where sub-divisional officers are posted, for District Courts, with the sanction of the Local Government, to delegate to a Subordinate Judge certain powers of control and transfer of business.

"While we have abstained from dealing with the mode of determining the value of suits for purposes of jurisdiction, which, in cases relating to land, is often very different from the value assessed for the purposes of the Court-fees Act, we have added a definition of 'value,' declaring it, in accordance with what has always been held by the Superior Courts where the pecuniary limits of jurisdiction are in question, to be the amount or value of the subject-matter of the suit; and we have by section 32 enabled the Chief Court, with the previous sanction of the Local Government, to regulate the jurisdiction over suits the subject-matter of which does not admit of being valued in money, such as suits relating to marriage or divorce, and suits for injunctions and for some other kinds of specific relief. This will provide a means of preventing Courts of the lowest grades from adjudicating upon suits the question involved in which is really of great importance, though, as no money-value can be fixed, they cannot be said to be beyond the pecuniary limits of the jurisdiction; and, as is pointed out in the Report of the Select Committee, the course of appeal will also in some measure depend upon the directions which may be given under this power.

"One of the greatest changes in the law which was proposed in the Bill as introduced consisted in the restrictions which it put on the right of appeal; and no part of the Bill has given rise to more discussion both in the public Press and in the opinions which have been received through the Local Government. The effect of the provisions of the chapter relating to appellate jurisdiction, as it originally stood, was that both the second appeals allowed by the general law, and the further appeals given in certain cases by the Panjâb Courts Act now in force, were taken away, while the Judges of the Divisional Court were empowered to permit a further appeal to the Chief Court when they were unable to concur in the decree to be passed, or when some question of law of custom or of general interest was involved, if they thought the case of sufficient importance

to justify a further appeal. After considering the objections raised in various quarters to these restrictions upon appeals from appellate decrees, the Select Committee has come to the conclusion that a further appeal must be allowed as of right in certain cases, one of which, that of a Divisional Court consisting of a single Judge, was not contemplated in the original Bill. In this case a further appeal is given if the decree in the original suit is varied or reversed by the Divisional Court, unless when the original suit was a small cause not exceeding Rs. 500 in value. This differs from the present law only in fixing a higher limit of value than Rs. 50 for the small causes, in regard to which no further appeal is admitted. The further appeal when the Judges of the Divisional Court differ as to the decree to be passed is also given as of right, and not made subject to the permission of that Court; and a further appeal is also given in all suits exceeding Rs. 500 in value or which directly involve claims to property exceeding that value. In cases of smaller value, not being small causes, a Judge of a Divisional Court is still enabled to permit a further appeal to the Chief Court, when he can certify that a question of law or custom or of general interest is involved, and that the case is in his opinion of sufficient importance to justify a further appeal. A period of thirty days has been prescribed within which this certificate must be applied for, unless sufficient cause can be shown for not presenting the application within that period.

"The next chapter, which transfers to Revenue Courts the jurisdiction now possessed by the Civil Courts in certain classes of cases, has been objected to in some quarters, especially by members of the legal profession. This transfer was, however, recommended by a Committee which sat at Lahore in 1882, of which one of the Judges of the Chief Court was president, and several other officers of great experience, including another Judge of the Chief Court and the Financial Commissioner, were members; and they made this recommendation 'after careful consideration of the agency in the Panjáb best fitted for the disposal of suits relating to land.' Of the many Judicial and Revenue Officers whose opinions have now been obtained, only one has objected to the proposed transfer; and as the classes of suits specified are those which can be most satisfactorily dealt with by officers possessing revenue experience, and exercising authority in revenue matters, and the procedure will be the same as if they were tried in the ordinary Civil Courts, unless so far as the Local Government, with the previous sanction of the Governor General in Council, may by rule prescribe any modification of that procedure, the transfer of jurisdiction does not appear to be open to any serious objection, but on the contrary has a good deal to recommend it. It is to be remembered also that it has not been proposed to deprive Tahsíldárs or Assistant or Extra Assistant Commissioners, by whom these cases will ordinarily be decided in the first instance, of their civil jurisdiction; and the officers trying the cases will therefore be officers who could have tried them if they had continued to be cognizable by the Civil Courts. The main difference then will be that the trial of these cases by officers possessing revenue experience will be secured, and that the appeals will lie to the superior Revenue authorities and not to Civil Courts of appeal.

"We have added one class of cases, namely, suits relating to boundary-disputes where the boundary has previously been determined by a Court or Revenue-officer, to those transferred to the Revenue Courts, as a local inspection is often necessary before such suits can be properly decided, and Revenue-officers in the course of their ordinary duties would have greater facilities for such an inspection than the more stationary Civil Courts.

"We have, however, qualified the transfer of jurisdiction by adding a power to the Local Government, after consulting the Chief Court, to direct that suits of any of the classes specified arising in any local area should be heard by the Civil and not by the Revenue Courts.

"We have also empowered the Local Government to bar appeals from the decrees of Assistant Commissioners in suits of certain of the classes specified when the claim is of a pecuniary nature and does not exceed one hundred rupees in amount, and no question of title or question the importance of which extends beyond the subject-matter of the particular suit is involved.

"Instead of section 49 of the original Bill, which provided for staying proceedings when a question of proprietary title or of the existence of the relation of landlord and tenant between the parties was involved, to enable the decision of a Civil Court upon the question to be obtained, as, on considering the criticisms which have been made on that section, there appeared to be objections to the course proposed, we have adopted a section (54) founded on section 208A of the North-Western Provinces Rent Act, 1881, but differing from that section in requiring the sanction of a superior Revenue Court to be obtained before a party is directed to sue in a Civil Court, and in not obliging the Revenue Court to decide the question against the party directed to sue if he fails to institute the suit within the time allowed for the purpose, though it is enabled to do so if it thinks fit. The first of these changes will furnish a check upon improper orders being passed under this section, such as an order directing a civil suit to be brought to decide a question which the Revenue Court might properly decide for the purposes of the suit before it, or directing a party to sue to establish his title to property when he might safely rely on his possession and leave any person contesting his title to sue him. The second leaves to the Court a discretion similar to that which it has under section 158 of the Civil Procedure Code. If, for example, the person directed to sue is advised that it would not be advisable for him to institute a civil suit within the time allowed for the purpose, he may apply for leave to withdraw the suit pending before the Revenue Court with permission to sue again, and that Court may then refrain from deciding the question and pass an order under section 373 of the Code. These changes to a great extent remove the objections which I felt to adopting the section as it stood in the North-Western Provinces Act, and there may be some cases, for instance, where a question of the fact or the validity of an adoption incidentally arises in a rent-suit, in which the power given by it will be useful.

"We have added another section (55) enabling the Financial Commissioner to make a reference to the Chief Court of the same nature as that which a subordinate Civil Court whose decree would be final may make under section 617 of the Civil Procedure Code. He will thus have the means of obtaining the decision of the Chief Court on difficult questions of law or usage having the force of law or of the construction of documents arising before him.

"We have not thought it necessary to retain section 58 of the original Bill, relating to the revisional jurisdiction of the Financial Commissioner, as he will have the powers of revision given by Part VII of the Civil Procedure Code in all cases falling under this chapter. It must be remembered that this chapter does not deal with all revenue jurisdiction, but only with jurisdiction in cases transferred by it from the Civil to the Revenue Courts; and, therefore, though a more extensive revisional authority may be required in some revenue-proceedings, it is not necessary to provide for this in the Bill now under consideration.

"Section 52, which provides for the appointment of a second Financial Commissioner and the distribution of business between the persons appointed to that office, is the only one which applies to any other business than what is cognizable by Revenue Courts under this chapter, it being necessary to arrange for the distribution of all the business of the Financial Commissioner when two officers are appointed to that office.

"We have not thought it necessary to retain section 63 of the original Bill, relating to consultations between the two Financial Commissioners, as, though such consultations may be useful to prevent the risk of conflicting decisions, there is no legal difficulty in the way of their being held when it appears advisable.

"The sections relating to special Settlement Courts, which have been placed in a separate chapter, as they provide for the transfer of the jurisdiction both of Civil and of Revenue Courts, are substantially unchanged.

"In the concluding chapter, the first section which calls for notice is section 70, which in part takes away the wider revisional jurisdiction given by section 622 of the Civil Procedure Code as amended in 1879 and re-enacted in 1882.

No such restriction was contemplated when the Bill was introduced, it having then been thought that the extension of the revisional jurisdiction went far to render the second appeals given by the Code of Civil Procedure unnecessary, and that the main question was how far the further appeals given by the local law could be restricted. The effect of the Bill as introduced, so far as second appeals under the Code were concerned, would therefore have been to substitute a power of revision in the discretion of the Court for a second appeal as of right, and the only restriction which it was proposed to place on applications for revision, which, as had been pointed out by the Committee which sat at Lahore in 1882, were often unnecessarily made, was to increase the court-fee chargeable on the application when the value of the matter in dispute exceeded twenty-five rupees.

"It was pointed out, however, that very different views of the scope of section 622 as amended in 1879 had been taken by the High Courts of Bombay and Allahabad, and that, as the Bill would increase the number of possible applicants for revision, not only by the number of persons deprived of a second or further appeal to the Chief Court, but also by the number of persons deprived of a further appeal to a Commissioner's Court, there were serious objections to relying upon section 622 as a substitute for the second appeals now allowed by law, while any modification in the direction of the wider interpretation might have the effect of giving what would be practically equivalent to a second appeal in cases where the law does not at present allow a second appeal.

"The result, indeed, of the modification made in 1879 had been greatly to increase the number of applications for revision, which rose to 707 in 1883, from about half the number in 1878, and are, it is understood, still continuing to increase.

"It was suggested by Mr. Justice Plowden, the Senior Judge of the Chief Court, with, I believe, the concurrence of his colleagues, that it would be better to cut down section 622 to its original dimensions by omitting the words added in 1879, and to give further appeals in most of the cases in which an appeal from an appellate decree is now allowed, refusing them only where a Divisional Court had heard the appeal in a suit of the small cause class not exceeding Rs. 500 or at most Rs. 1,000 in value.

"The Select Committee, however, while it decided to give a further appeal in all cases exceeding Rs. 500 in value, was unwilling to allow appeals from appellate decrees in other cases as freely as at present; and, as the principal source of difficulty in interpreting section 622 was found in the power given to the High Court to interfere on the ground that the Lower Court had acted illegally, it determined to withdraw this power, without further amending that section. The result of course will be that, when a Court whose decree is final has decided contrary to some positive rule of law, but cannot be said to have erred as to a question of jurisdiction, or to have acted with material irregularity, there will be no power to interfere; and the section, therefore, can no longer be held to cover the same ground which is at present covered by the law of second appeal.

"The increase in the court-fee on applications for revision has been objected to in some quarters, but this was recommended by the Lahore Committee of 1882, and was approved by all the Judges of the Chief Court last year; and, though there may be something to be said for reducing the court-fee now charged on particular classes of suits in Courts of first instance, there seems to be no good reason why a person applying to the highest Court of the Province for an order varying or setting aside the final decree of a lower Court should be allowed to do so without paying more than the fee prescribed for an ordinary petition to the Court. The increased court-fee may be some check upon applications which are often made without sufficient grounds, and is unlikely to have the effect of preventing applications when a real grievance exists which a Court of Revision can redress. When the application is successful, the Court is also empowered to direct a refund of so much of the fee as it thinks fit.

"I may now proceed to refer to a few of the suggestions put forward by critics of the Bill with which we have not dealt.

"It has been suggested that power should be taken in the Bill to appoint a qualified native of India to the Chief Court. This suggestion must have been made under a misapprehension of the effect of the present law, which the Bill follows in this respect. The only qualification prescribed by law is that one of the Judges must be a Barrister of not less than five years standing, and there is no legal obstacle to the appointment of a Native Judge either to the Chief Court or to any other Court under the Bill when a vacancy exists. But the passing of the Bill will not create any vacancies. It will merely enable a certain number of existing appointments to be replaced by a similar number of new appointments, while the same officers must be employed.

"It has similarly been suggested that what ought to have been aimed at was an improvement of the Courts of first instance. That this is an object to be aimed at no one will be disposed to deny, though the defects of these Courts have certainly been exaggerated. But the improvement of these Courts, as of Courts of any other grade, must be gradual, and it has not been shewn that any legislation is needed for this purpose. What is required is strict supervision by controlling authorities and care in selecting fit persons for new appointments or for promotion to higher grades, and this no legislation can secure. So far as my own experience goes, I have reason to believe that improvement in these Courts has been going on and is likely to continue, and that for the last ten years there has been more reason to doubt the competency of some of the Courts of a superior grade for the functions which they are called upon to exercise than there has been to doubt that of the great majority of the Courts of first instance.

"Another suggestion has been that an appeal should be given from the order of one Judge of the Chief Court rejecting an appeal to the Court; but, though apparently any order of a single Judge of one of the High Courts may be appealed against, a Judge of one of those Courts may be empowered by rules not merely to reject appeals but to exercise any appellate jurisdiction vested in the Court, and there is no reason to believe that appeals from orders rejecting appeals are often preferred or entertained. And it would be by no means con-

[redacted]

"When I explained the provisions of the Bill on moving for leave to introduce it, I did not think the occasion an appropriate one for expressing any opinion of my own on the various changes in the law which it was proposed to make. Apparently this has led some of the critics of the Bill to assume that it was entirely in accordance with my own views. The Bill, however, was, as I stated at the time, based upon recommendations made by your Lordship's Government to the Secretary of State for India; and I think I may now properly mention that, before those recommendations were sent home, I had recorded my dissent from some of the proposals relating to the appellate system on which they were based. Though the provisions of the Bill on this subject have been modified in Select Committee to a much larger extent than under the circumstances I could have anticipated, and the changes made are in my opinion almost all for the better, I cannot say that it is even yet all that I could wish.

"I am [redacted] to be able to give effect, [redacted] dance with his own views, but at the same time I think it necessary to guard myself against being supposed to approve of all the changes in the law which this Bill will effect.

"I have never concealed my opinion that the constitution of the Divisional Benches proposed by this Bill involves a waste of power, and, though I look upon the greater liberty of appeal from their decisions now allowed as an improvement, this only makes the waste of power more apparent. As the Bill now stands, however, this Government will be at liberty to appoint a single Judge to the Divisional Court [redacted] in any case in which it thinks proper to do so.

C

"A more serious objection to the Bill is that, having regard to the nature of the duties of the District Courts, whose appellate decisions are in cases of the nature of small causes made final, these Courts are at present as a class, notwithstanding individual exceptions, the weakest Courts we have, and any improvement in them must necessarily be gradual. Most of the Judges of the Chief Court had agreed to the proposal of the Lahore Committee that their decisions should be made final in small causes not exceeding Rs. 100 in value; but they are now made final in small causes not exceeding Rs. 500 in value. This, however, was agreed to by the Local Government last year after ascertaining the opinions of the Judges, and there was therefore no ground to hope for any change on this point, especially as second appeals in small causes not exceeding Rs. 500 in value are not allowed elsewhere in India.

"The finality in these cases in other provinces has, however, since 1879 been subject to a wider power of revision than will hereafter exist in the Panjáb; and the one respect in which I think the Bill has been altered for the worse is that, in amending section 622 of the Civil Procedure Code, that section was not made to cover cases where any substantial portion of the appellate decision is opposed to law or to any usage having the force of law. I presume that, where the Appellate Court has failed to determine any material issue of law properly raised before it, it will be held to have failed to exercise a jurisdiction vested in it, or to have acted with material irregularity. At the same time it is only because the right of appeal has been so largely restricted that I do not like the simultaneous restriction of the power of revision. I think that, if the suggestions for the improvement of the system of appeal made at a late stage by the Chief Court could have been accepted, section 622 might properly have been cut down to its original dimensions.

"It is no secret that one object of the recommendations made by your Lordship's Government last year was to reduce the work of the Chief Court. There seems to be an impression in some quarters that the Judges of that Court were opposed to this being done, and not merely to the particular plan which has been devised for the purpose. That this impression is mistaken is shown by the fact that the Judges in 1882 made proposals to effect the same object, which have been only partially accepted.

"I may be asked what the effect of the Bill as it now stands upon the work of the Chief Court is likely to be. My answer is that this cannot be foretold with much precision, but that the transfer of certain classes of cases to the Revenue Courts, which was originally proposed by some of the Judges, will certainly effect a considerable reduction. Of the appeals disposed of in 1883 nearly 12 per cent. related to occupancy-rights, one of the classes to be transferred, but nearly half of these belonged to a large group of cases from a single village. From information collected by Mr. Rivaz as to the classes of cases in which appeals were preferred to Commissioners and Deputy Commissioners in 1883, I gather that in 30 per cent. of the cases which, if the appellate system established by the new law had been in force, would have been appealable to Divisional Courts the appeal will now lie, if at all, to Revenue Courts. This may be above the average, and the same proportion may not apply to the appeals to the Chief Court after deducting those which will no longer lie, especially as most of these cases would be under Rs. 500 in value; but there will clearly be a substantial reduction from this cause of the number of cases in which an appeal would lie on certificate.

"Only 3 per cent. of the appeals decided by the Chief Court in 1883 were for money or moveable property not exceeding Rs. 500 in value, but there were at least 1,326 other cases (including of course a large proportion of the revenue cases) in which under the provisions of the Bill no appeal would lie to the Chief Court unless on certificate or when the Judges differ. This leaves at most 1,462 cases in which an appeal would lie as of right under the provisions of the Bill, and, as in 1883 disposals exceeded institutions, the number of appeals as of right in the course of a year would fall short of this. Some addition would be necessary for first appeals over Rs. 5,000 in value which would lie direct to the Chief Court instead of, as at present, to Commissioners, but many

of these cases have hitherto come before the Chief Court as second or further appeals. On the other hand, there will no doubt be some increase both in references under section 617, Civil Procedure Code, and in applications for revision, as the number of final appellate decrees in the Lower Appellate Courts, and therefore the number of cases in which these references or applications may be made, will be largely increased by the provisions of the Bill.

"On the whole, while there is more certainty of a large diminution of work in the Chief Court owing to the transfer of jurisdiction in certain classes of cases to Revenue Courts, than there is of much diminution of work owing to the changes made in the law of appeal and revision, it may fairly be anticipated that there will be some decrease arising from each of these causes, and that the civil judicial business will be considerably reduced."

His Honour THE LIEUTENANT-GOVERNOR said:—

"This is now the third time within ten years that extensive and radical changes have had to be made in the general administration and the judicial machinery of this province. With the restoration of peace and good order after the mutiny, the rapid development of the country and the enormous increase of material wealth and prosperity that followed, it very soon became evident that the old non-regulation machinery was no longer able to cope with the demands upon it. From that time to the present day there has been a growing and recognized necessity, arising on the one hand from the general progress of the province and on the other from the ever-increasing elaborateness and precision of our laws, for a more complete separation of judicial from executive functions, and for a closer approximation of our general administration to the system prevailing in our older provinces.

"Unfortunately, every time the much-needed reforms in this direction have been attempted, financial difficulties have intervened to prevent the complete acceptance of measures which experience had shown to be desirable, and to preclude the establishment once for all of what the Secretary of State described as 'a vigorous executive and an efficient judicial service in one of the most important Provinces of India.' The consequence has been a resort to makeshifts and temporary expedients, with the result that, as I have said, we are now for the third time within ten years forced to review our whole judicial and administrative arrangements, and to make extensive and very important changes. I need not, in this Council, point out how detrimental to the welfare of the people, to the interests of the province and the Government, and to the efficiency of the Courts of Justice, the unsettlement and uncertainty of law, procedure and agency caused by such recurring changes must necessarily be.

"The measures recently sanctioned by the Secretary of State to which this Bill is intended to give effect, so far as the sanction of the legislature is necessary for the purpose, are a greater advance than has ever been made before. But it would be sanguine to expect they will effect all that is needed. On the face of them they are incomplete. The financial grant has on this occasion been very liberal. Still we must, I fear, admit in the present case also that the financial and administrative conditions, necessarily imposed, have once more forced us to be content with measures which, though on the whole a great improvement on the existing state of things, are not free from objection, and are not acceptable to many to whose opinion the greatest weight is deservedly attached both by Government and the public.

"While therefore I welcome this Bill and the executive measures out of which it has arisen as a great boon to the province, I think it inevitable that, ere very long, further steps will have to be taken to improve the Subordinate Courts and to effect a more complete separation between the judicial and executive agency than we have been able to attempt under existing conditions. I by no means concur in the sweeping condemnation of the Lower Courts in which some critics of this Bill have indulged. At the same time I am too well aware how much they need to be reformed and improved. Hitherto the Judges of these Courts, on whose shoulders the bulk of the judicial work of the province falls, have had no adequate career opened up to them; and of this one thing I am sure, that no great improvement in the quality of the

Subordinate Courts is to be looked for until all obstacles are removed which intervene to bar the advancement of the Judges of these Courts from the lowest to the highest judicial offices, from the humble but honourable post of Munsif to the Bench of the Chief Court itself. It is in my estimation one of the merits of this Bill that it creates no obstacles to such a career, and that, so far as its provisions are concerned, there is nothing to prevent Native Uncovenanted Judges who distinguish themselves by knowledge of law and by skill and intelligence in the interpretation and application of it from rising to the highest judicial offices in the Province. For reasons which it would be out of place to enter upon here, it has not been possible at present to do all in this direction I could have wished. But it is matter for congratulation that, in connection with the present measures, the Secretary of State has declared it to be competent to the Lieutenant-Governor, with the approval of the Government of India, to appoint to district judgeships Natives in the Uncovenanted Service who show such eminent merit as to warrant giving them special promotion; and it is my intention to make a recommendation to the Government of India accordingly shortly after this Bill becomes law.

"As regards the details of the Bill, it is perhaps unnecessary that I should detain the Council with any remarks. The hon'ble the Law Member and my hon'ble colleague in charge of the Bill can speak on these with greater weight and authority than I can pretend to do. It will be sufficient for me—with reference to the very strong, and, I may say, for the most part valid, objections raised to the provisions of the original Bill, which largely curtailed the right of appeal—to express my satisfaction that the Bill has been so materially modified as substantially to meet the most important of those objections, and to state my opinion that, in this respect, the Bill as it now stands meets the reasonable requirements of the case."

The Hon'ble MR. ILBERT said :—

"It was hardly to be expected that a measure which reorganizes the Civil Courts of a province, and which affects, or may be held to affect, the interests of a profession which is nothing if not critical, should pass without a good deal of unfavourable criticism; and this Bill has met with its fair share of criticism, favourable and unfavourable. Much of the criticism has been very sound and useful, and we have thankfully availed ourselves of it for the purpose of making alterations in the Bill which I hope and believe will be found to be material improvements. But some of it has been directed not against the detailed provisions of the Bill but against its principles, and has embodied proposals which we found ourselves unable to accept.

"Now this is not the proper stage for discussing the principle of a measure before the Council; but, with reference to some of the observations which have reached us since the date on which this Bill was referred to a Select Committee, I may be permitted to remind the Council what the objects of this measure are, and what were the circumstances and conditions under which the general scheme of administrative reorganization of which this Bill only forms a small part was framed and brought forward.

"The main objects of this Bill are, I take it, two. One is to effect a further separation between executive and judicial functions than exists at present in the province. The other is to improve the machinery for administering justice in the Civil Courts.

"Now, we have been told that in separating executive from judicial functions under this Bill we have not gone far enough, and that we have left to the Revenue Courts classes of business which might more appropriately and satisfactorily be disposed of in the ordinary Civil Courts. To this objection there are several answers. In the first place, we were afraid to heap more work on the Civil Courts, which are already overburdened. In the next place, many of the questions which we leave to the Revenue Courts, such as questions relating to the enhancement of rent, are only of a quasi-judicial character, and all of them require for their satisfactory determination knowledge of a kind which Revenue and Settlement Officers may from their peculiar experience be specially expected to possess, and which the Judges of Civil Courts would not always—perhaps do not as a rule—possess. Then, if we have not gone quite so far as some of our friends would wish us to go, we have at least made a very great step in advance, and have assimilated in principle the system of judicial organization to that which prevails in what are known as the regulation provinces. And, lastly, we have inserted in the Bill a provision enabling a still further step to be taken if it should be found practicable and expedient to take it. I refer to the provision in section 45 which enables the Local Government to transfer certain classes of suits from the cognizance of the Revenue Courts to that of the Civil Courts.

"It must be borne in mind that this process of separating executive and judicial functions is a process which can only be carried out by gradual advances. In the earliest stage of a province like the Panjáb it is, as my hon'ble friend Mr. Barkley pointed out in moving for leave to introduce this Bill, inevitable and indispensable that large powers of various kinds should be concentrated in the hands of the same officer; as time goes on a further separation of functions becomes practicable and expedient; but even in the most advanced provinces we are hampered by serious financial and administrative difficulties in our efforts to give full effect to a principle which is, and I hope will always be, steadily kept in view.

"I now turn to the proposals for reorganizing the Civil Courts. And, in dealing with this branch of the subject, I must admit that our critics have one enormous advantage over us. They are not tied and fettered as we, the members of the Executive Government, are, by sordid considerations based on money. They are free to suggest and advise whatever they think best, and to criticize unsparingly anything which falls short of their standard of excellence. We are in a much less fortunate position. We are not living in a Republic of Plato, but in a country with limited resources. We have to cut our coat according to our cloth, and in providing an outfit for a province like the Panjáb the material at our disposal is not superfine broadcloth, but homely *patu*, and a scant supply of that.

"Let me remind my hon'ble friend Mr. Barkley and those other gentlemen who did me the honour of attending last autumn a conference on the scheme out of which this Bill arose, and whose valuable assistance on that occasion I take this opportunity of most thankfully and gratefully acknowledging—let me remind them what was the problem which we had to face, and what were the conditions under which we were allowed to approach it. The main fact with which we had to deal was that the Chief Court was hopelessly encumbered with work, and I may add that a very great part of the work with which it was encumbered was of an extremely petty character. And the problem was how to relieve them of their excess of work. But we did not approach this problem as free agents. We did not hold the purse-strings. We had behind us an authority, indeed two authorities, which dictated to us the maximum amount which we were to spend, though they left us considerable liberty within those limits. Those authorities were the Finance Department and the Secretary of State. I may remark in passing that the part which my hon'ble friend Sir Auckland Colvin, or whoever happens for the time being to hold his office, usually plays in the legislative discussions over which I have the honour to preside is the useful but not always popular part of Jorkins. I hope, however, he will not suppose that by ascribing to him this part I wish to shift exclusively on to his shoulders the responsibility for resisting popular proposals on economical grounds. There is no country in the world where it is more difficult to resist pressure for increased administrative expenditure than India; there is no country in the world where it is more important to resist that pressure. Our principal advisers are energetic and enthusiastic officials, sincerely anxious to do good and honest work, but crippled at every turn by the want of means. But the great mass of tax-payers is unrepresented, and the resources on which we can draw are limited and inelastic. Therefore, when the Finance Minister of the day takes a firm stand on economical grounds, he may always count on my honest support.

"Well, to return to our problem. There were before us two modes of relieving the Chief Court from its pressure of arrears. One was to increase its staff, the other was to reduce its work. A temporary addition had already been made to the numbers of the Chief Court, but we were told that a permanent increase was not under existing circumstances admissible, at all events (for I presume that this qualification may be inserted) not until other modes of relief had been tried and failed. As I have said, I do not wish to cast the responsibility for this decision exclusively on the Finance Department nor on the Secretary of State. There are obvious objections to increasing an expensive structure in its most expensive part. And you do not always add to the efficiency of the controlling authority by increasing its numbers. His Excellency the Commander-in-Chief will bear me out in saying that you may have too much even of that valuable commodity—Generals. I know it has been said that there ought not to have been any financial difficulty in the matter, because the accounts of the administration of justice in the Panjáb show a balance of receipts over expenditure, and that balance was enough to provide an adequate solution of our problem. Now, I do not know how far we can rely on the calculations which have been made as to this excess of receipts over expenditure, but I am quite willing to admit that I do not consider a surplus from court-fees a satisfactory source of revenue; and if my hon'ble friend Sir A. Colvin can see his way to dispense with it or to devise a satisfactory substitute for it, he will earn the gratitude of the country. But the practical question is, under existing circumstances, not whether this particular branch of Panjáb revenues shows a surplus, but whether on the Panjáb revenues as a whole there is such a surplus as would suffice for the extra expenditure which we wanted to meet. And I am afraid that His Honour the Lieutenant-Governor would reply—I see that he does reply—to this latter question with an ominous shake of the head.

"This then was how matters stood. Our mode of relief was negatived on financial grounds, and we had to make the best we could of the other mode. Not a satisfactory position you may say, but after all not worse than that of the hard-worked administrators all over this country who are daily engaged in the thankless task of making bricks without straw.

"How then were we to check the flow of petty appeals which was deluging the Chief Court? Few subjects have been more exhaustively discussed in India than the system of appeals, and we were not likely to be able to add much to all that had been said or written on the subject. On one or two matters of principle we were all pretty well agreed. One was that partial appeals were objectionable, and that where an appeal was granted the Court ought to be in a position to deal with the whole case. On the number of appeals which should be allowed in the same case there was less agreement. One appeal we agreed should always lie in ordinary cases, but no one ventured to defend on principle the present system of the Panjáb, which has been aptly described as 'sifting cases through a succession of bad Courts in the hope that they will come right in the end,' though there were some who were sceptical about the possibility of substituting anything better under existing circumstances. But all were agreed that, if greater finality was to be given to the decisions of Courts of First Appeal, something must be done towards strengthening those Courts. How then were they to be strengthened? The only feasible scheme that was suggested was to make provision for enabling an Appellate Judge to call in a colleague to his assistance—in fact, to provide for the constitution of Appellate Benches; and this was the suggestion which was ultimately adopted. The proposal has, as is natural enough, been a good deal canvassed on grounds good, bad and indifferent. Among the latter I may be permitted to class certain arguments which have a false mathematical ring about them. For instance, we have been told that as two negatives do not make an affirmative, so two unsound judges do not make a sound one, and again that the notion that greater aggregate power will result from the adoption of our proposals is almost on a par with the idea that the product of $\frac{1}{2} \times \frac{1}{2}$ is an increased quantity. I have myself far too much respect for Panjáb Judges to speak of them as negative or even as fractional quantities, and I do not quite know what would be the effect of multiplying one Judge by another. But, I suppose, I may safely assume that in the Panjáb as elsewhere the

product of 1+1 is an increased quantity, and, passing from the abstract to the concrete, that for a good many purposes two men are better than one. Do those purposes include the hearing of appeals? There are persons, whose opinions are entitled to much respect,—for instance, as you have just now heard, my hon'ble friend Mr. Barkley,—who will tell you that they do not, and that if you place two Judges to sit together one of them will content himself with saying ditto to the other. I have often heard this opinion expressed by Indian Civilians, and not the least competent among them; and it may perhaps be accounted for in their case by the fact that the training and experience which form and develope their most valuable qualities, the necessity which they are constantly under of acting alone and on their own responsibility, makes them less inclined to sit and act—perhaps less fitted to sit and act—in consultation with others. They undervalue the assistance with which they have learnt to dispense. There must, one would think, be some special reason for the prevalence of this opinion among Civilians, for there is certainly a very general prejudice among lawyers—a prejudice which I myself share—in favour of having appeals disposed of by a Bench. There may be Judges so strong as to need no assistance from a colleague, or so opinionated as to be incapable of deriving assistance from him, or so weak as to be unable to assert their own opinions against him, or so indolent as to let him bear their share of the work. But, taking the ordinary run of men, say Tom, Dick and Harry, who are neither much better nor much worse than their neighbours, or, I will add, than each other, I believe that an appeal from Tom to Dick and Harry sitting together is more satisfactory than an appeal to Dick or Harry sitting alone. It is more satisfactory to the suitor, who, if the decision is reversed on appeal, feels that the view which has prevailed is at all events that of the majority. It is more satisfactory to the Judge of first instance, who will often think, and may be entitled to think, that his own opinion is as good as the unaided opinion of the Judge above him. It is more satisfactory to the Court of Appeal, whose members have the advantage of consulting each other and clearing their minds by mutual argument before overruling the Court below.

"I believe then that if Benches can be satisfactorily constituted for hearing first appeals, it is desirable to constitute them. Can they be so constituted in the Panjáb? That is a question which it is rather for the Lieutenant-Governor to answer than for me, and it is a question which I understand—he will correct me if I am wrong—he has unhesitatingly answered in the affirmative. The provision under which Benches may be constituted has, as Mr. Barkley has pointed out, been given an experimental form, and I think that the experiment is, to say the least, worth trying.

"Having constituted the Courts of First Appeal, whether by Benches or otherwise, in what cases and to what extent should finality be given to their decisions? That is an extremely difficult question. I am aware that the Chief Court has won, and deservedly won, the confidence of the people of this province, and that any limitation on the right of access to it is not likely to be popular. I am aware also that the Chief Court is gradually doing a most useful and important work in comparing with each other the numerous laws and customs or alleged customs which come before it from different parts of the country, and in endeavouring to ascertain and formulate the common principles which underly their apparent variety. They are doing in this way the work which was done for England some six centuries ago by the King's Court,—the *Curia Regis*,—and by means of which the common law of England has been developed into a logical and consistent whole. For these reasons I am reluctant to limit the right of appeal to the Chief Court, especially in cases which involve important questions of law or custom. On the other hand, it must be borne in mind that the great mass of the cases which come before the Court—a large proportion I believe of those which under the existing system find their way up to the Chief Court—are of the most petty and simple description, involving no important question of law or custom whatever, and requiring for their disposal nothing more than a little common sense and patience. Having regard to the means at our disposal, are we justified in allowing the time of the most expensive Courts to be

occupied with cases of this description? As has been often said, no man has a right to unlimited draughts on judicial time and judicial power. To grant an unlimited right of appeal is not fair to the general tax-payer, and is a cruel kindness to the suitor himself. I am told by those on whose authority I am entitled to rely that among many classes of the Panjáb it is a point of honour to prosecute an appeal, however hopeless may be the case and however trifling may be the stake, to the utmost, and notwithstanding the knowledge that even if the appeal is successful the costs to be paid will far outweigh the stakes. The unsuccessful suitor feels himself disgraced if he does not carry his appeal as far as the law will allow him to go, and it is not until recently that he has, with the help of his legal advisers, found out how very far that is. If the law would in such cases interpose a friendly obstacle to his further progress in the path of appeal, his honour would be satisfied and his pocket would be benefited.

"I hold then that we are justified, both in the interest of the general tax-payer and in the interest of the particular suitor, in placing some limitation on the right of second appeal, and that this limitation may reasonably be framed with reference both to the nature of the suit and to the value of its subject-matter. About the particular limits to be selected there will naturally be much difference of opinion. The Committee have concurred with the view of the Local Government that the limitations on the right of further appeal proposed by the original Bill probably exceed the real requirements of the case, and it will have been seen that we have proposed to make some very important extensions of that right beyond the limits so fixed. In the case of ordinary money-claims, suits of the class called in the Bill small causes, where the value does not exceed Rs. 500, we think that one appeal should suffice, and that there should be no further appeal. In this, as Mr. Barkley has reminded us, we only follow the general law as laid down by the Civil Procedure Code for the rest of the country. In other cases we make the right of second appeal depend on the value of the suit and on the constitution of the Court by which the first appeal is heard. If the value exceeds Rs. 500, there is an absolute right of further appeal. If the Appellate Court consists of a single Judge, and he reverses or varies the decision of the Court below, then, there being one Judge against one, there is a further appeal. If, again, the appeal is heard by a Bench of two and the two do not agree, there is a further appeal. And, lastly, any one of the Judges composing a Bench may certify a case for appeal if in his opinion there is a question of law or custom or of general interest involved, and the case is of sufficient importance to justify a further appeal. We hope that this power will be exercised in such a way as to allow of all really important cases of law and custom finding their way up to the Chief Court.

"But, having settled the limitations on the right of appeal, we had to encounter another formidable difficulty. We were told that any limitation which might be imposed on this right would be illusory, because in cases where an appeal was barred a way would be found to the Chief Court under section 622 of the Civil Procedure Code, which provides for revision of the proceedings of inferior Courts. Now, it certainly was not the intention of the framers of that section that it should simply give a right of appeal in another form; but there is some reason for believing that the words which were inserted in the section in 1879 have obscured the line which was originally drawn between the class of cases in which an appeal was to lie and the class of cases in which the power of revision was to be exercisable. On referring to the Report of the Select Committee which inserted those words I find that they did so with some hesitation, for they remark—'The change is a serious one, and must be understood as made tentatively.' These doubts have been justified by the difficulty which some of the High Courts have found in interpreting the addition. Thus, the Allahabad High Court has construed the new words in such a way as would, if it were logically carried out, render nugatory any limitation on the right of appeal. The most careful consideration to which they have been subjected has been in the Bombay High Court, where Mr. Justice West in a very recent judgment has gone into the subject with all the thoroughness

which characterises his work, and has drawn a useful and instructive comparison between the revisional jurisdiction of the several High Courts and the analogous superintending and visitatorial jurisdiction exercisable by the English Court of Queen's Bench, and its successor the High Court of Justice, under the prerogative writs of certiorari, mandamus and prohibition. Whilst insisting, very properly, on the necessity for such a jurisdiction, he remarks on the tendency which has manifested itself in recent times to confine its exercise within somewhat narrower limits than heretofore.

'In India, as in England,' he says, 'the grant of a rule under the extraordinary jurisdiction is discretional, and the power should be used only to sustain, and not further to disturb, the regular course of judicial administration, to prevent distortions or sham applications of the law, but not to promote uncertainty and restlessness, by an over-nice scrutiny of proceedings that aim at promptness rather than refinement.'

"He wisely abstains from an attempt to define precisely cases in which the power ought to be exercised, for, as he says, 'what is abnormal cannot be provided for precisely by rules'; but he makes it clear that in his opinion the jurisdiction under section 622 of the Code is an extraordinary jurisdiction, to be exercised only in extraordinary cases, and he lays down certain general principles as a guide to the discretion of the Court in exercising it. It is evident, however, that the word 'illegally' as used in the section has been a stumbling-block to him, and that he has found some difficulty in reconciling its presence with what he conceives—and, if I may venture to express an opinion, rightly conceives—to be the general scope of the jurisdiction exercisable under the section. For, as he says, 'in one sense every erroneous decision or order is illegal;' in other words, every slip on a question of law or fact would justify the interference of the High Court, which is very much the view that was taken by the late Chief Justice of the Allahabad High Court.

"Now, of course this judgment is not binding on the other High Courts, but it is the most instructive and exhaustive exposition that is to be found of the section with which we are dealing, and it is certain to be referred to whenever the meaning and intention of the section comes up to be considered in the Panjáb Chief Court or elsewhere.

"The limitations which we have considered it necessary to place on the right of appeal in the Panjáb make it eminently desirable that we should if possible prevent the revision section from being interpreted in such a way as to make those limitations nugatory. We have very carefully considered whether and how this can be effected; and the conclusion to which we have come is that we ought to strike out the word 'illegally' on which the advocates of the wider interpretation mainly rely. It is impossible to predict how a section which is of necessity expressed in wide and general terms will in practice be interpreted, but we believe that the omission of this word will materially facilitate the adoption of those views as to the scope and intention of the section which are to be found in the judgment of Mr. Justice West.

"I am sorry to have had to detain the Council so long on such a dry and technical subject, but I was anxious to show that we had not overlooked or made light of the serious difficulties which surround the subject with which we have had to deal.

"In conclusion, I will only say that I hope this measure will be accepted as what it is, namely, an honest endeavour to improve the administration of civil justice in the Panjáb to the extent to which our existing means allow us to improve it. It is an essential part, but only a part, of a much wider scheme for improving the administration of the province—a scheme which has been under consideration for many years, which makes reforms that are, and long have been, urgently required, but the introduction of which, if we were to wait until all possible objections to each of its features were removed, would be deferred until the Greek Kalends, or whatever day corresponds in the Indian calendar to that fleeting date."

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY moved that in section 48, clause (*b*), for the words "amount or value of the subject-matter of the suit" the words "value of the suit" be substituted.

He explained that no previous notice had been given of this amendment, but that its object was merely to make an improvement in the language of the section which did not affect its substance in any way, the definition of "value" which had been added to section 3 having rendered the retention of the longer expression unnecessary.

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY also moved the following amendments which he explained were necessary to make the law as to the court-fees payable on applications for revision under section 622 of the Civil Procedure Code the same in the Court of the Financial Commissioner as in the Chief Court :—

(1) That in section 71, after the words "Chief Court" the words "or the Court of the Financial Commissioner" be inserted.

(2) That in section 72, the word "Chief" be omitted.

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 9th October, 1884.

SIMLA;
The 9th October, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8th OCTOBER 1884.

GENERAL REMARKS.—There was good rain in some districts of the Madras Presidency and prospects continue to improve, except in Bellary, Anantapur, and parts of Coimbatore and Madura where the south-west monsoon has generally failed. In Mysore there was more rain during the past week than has been recorded for some time past, and prospects are said to have improved, though the crops are generally in a very backward condition. In Coorg the south-west monsoon is breaking up, and in one taluk the *ragi* harvest has been a good one. Rain is again reported to have fallen throughout the Deccan and Southern Mahratta Country, but more is urgently wanted in several places. General prospects in Bombay are good.

In the Berars, the Nizam's territories, and in the Central India and Rajputana States the prospects of the crops continue good. Heavy rain continued to fall in most districts of the North-Western Provinces and Oudh during the week under report, causing extensive damage to the cut and standing crops, and retarding *rabi* operations. In the Punjab *kharif* prospects are very favourable, except in the Shahpur district. In the south-east of the province some damage has been caused to the crops by the recent rain. In Bengal the prospects of the *amun* paddy have been generally much improved by the rainfall of the week; and if rain falls in the end of October, a fair harvest will be ensured in many districts. In Assam agricultural prospects are generally good.

The last report, dated 9th instant, of the Meteorological Department states that little or no rain has fallen.

There is not much change to record in agricultural operations. Harvesting continues in Madras, and *rabi* operations are generally in progress throughout the country.

Cholera, small-pox, and fever are prevalent in most provinces; but the public health is generally good.

Prices are generally stationary, with local fluctuations.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 8th)		
Bellary ...	·55 (average)	Pasture scanty. Prices rising.
Kurnool ...	2·01 (average)	Standing crops good; sowings of cotton and white *cholum* progressing. Some small-pox and cattle-disease prevalent.
Ganjam ...	2·62 (average)	Small-pox, cholera, and cattle-disease prevalent.
Kistna ...	3·01 (average)	Standing crops, outturn below average. River 7·40 feet over anicut. Small-pox, fever, and cattle-disease in places; one death from cholera.
Chingleput (Madras) ...	1·41 (average)	Standing crops generally good; harvest wet and dry crops, yield half the average. Small-pox in 3 taluks; 67 deaths from cholera.
Coimbatore ...	·18 (average)	Standing wet crops good in 5 and fading in 3 taluks; dry crops want rain everywhere; harvest dry crops, outturn below average. Cattle suffering from want of fodder.
Tanjore ...	·92 (average)	Standing crops generally good. Rivers 1 to 6 feet high. Harvest wet and dry crops, outturn average. 55 deaths from cholera.
Madura ...	·15 (average)	Prospects fair in 3 taluks; elsewhere crops fading from want of rain. Pasture scanty. 20 deaths from cholera.
Malabar ...	3·33 (average)	First crop paddy being harvested, outturn fair. Slight small-pox and fever; 9 deaths from cholera.
Travancore ...	·04	Fever and small-pox prevalent; 6 deaths from cholera.
		General Remarks.—General prospects fair except in Bellary, Anantapur, and parts of Coimbatore and Madura, where south-west monsoon has generally failed; elsewhere prospects are improving.
Bombay—(Oct. 8th)		
Karachi ...	No rain; average of 9 other stations ·64.	River at Kotri on 6th, 13 feet 2 inches against 9 feet 1 inch on same date last year. Fever in 9 talukas; cattle-disease in 5 talukas. Loss of 30 buffaloes, 127 cows and bullocks, and 120 sheep and goats. Harvesting going on. Small-pox prevalent in 9 villages in the districts, 13 fresh cases, no deaths, 12 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 28, 30, and 36; in Kotri 30 and 36; *jute* 24, 30, and 32; and in Ghorabari 22 and 32 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 6th, 13 feet 2 inches against 9 feet 1 inch last year. *Kharif* harvesting commenced; *juari* and *bajri* in Hala attacked by blight, and *til* in Moro by worms. Fever in 9, cattle-disease in 4, and small-pox in 3 talukas. Prices of grain steady.
Ahmedabad ...	.....	*Bajri* and *juari* in Dholka, and *modassa* and cotton crops in Dhandhuka, slightly damaged by rain in other talukas; *kharif* crops ready for reaping. Cholera in Viramgaum, 2 cases fatal, in Parantij, 1 case fatal; fever in Dholka. Wheat 31 and *bajri* 33 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	.....	Public health fair. Cattle-disease in Vadnagar. Crops in fair condition. Prices—*bajri* 33½ and rice 23 pounds per rupee.
Surat ...	1·01	Total rainfall 39·91. Crops healthy. Slight fever in Pardi taluka. *Juari* 30, and *nagli* 49 pounds per rupee.
Nasik ...	Rain throughout the district.	*Kharif* crops flourishing; *rabi* sowing in progress. Public health generally good. 6 attacks and 6 deaths from cholera in Nasik; small-pox in Kalvan. Prices cheapening; wheat 40, *bajri* 33½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Light showers on three days; total of week ·20.	Total to date 71·68, being 2·45 above average; abnormal temperature 0° to 1° cool; vapour in air defective; wind normal; thunder and lightning on 6th and 7th.
Poona ...	Good fall of rain at Poona on 6th.	Light showers in six talukas during the week, but none at Junnar; more rain urgently wanted eastward. No improvement in *kharif* prospects; *rabi* sowing begun in eastern division; and in Junnar, *bajri* 32, and *juari* 33; in Poona, *bajri* 28, and *juari* 30 pounds per rupee.
Ahmednagar ...	Sheogaon 1·10; Nagar, ·66; Jamkhed, ·58, none in the remaining talukas; very slight in Parner, Shrigonda, Karjat, Sangamner, and Akola.	Sowing of *rabi* in progress in all talukas except Nagar, where it is completed; *kharif* crops are in good condition. More rain would be beneficial. Slight fever in Sheogaon. *Juari* maximum 54 pounds in Sangamner, minimum 35 in Sheogaon; *bajri* maximum 54 pounds in Sangamner, minimum 30 in Shrigonda.
Sholapur ...	Sholapur, ·85; Barsi, ·51; Madha, none; Karmala, ·73; Pandharpur, 1·47; Sangola, ·57; Malsiras, ·23.	*Juari* 34 pounds 4 tolas and *bajri* 34 pounds 24 tolas per rupee. General prospects poor unless heavy rain fall shortly in Malsiras; prospects decidedly bad.
Dharwar ...	Maximum in Navalgund, 2·78; Kalghatgi, 1·30; Mundargi, ·96; Ron ·90; Gadag and Kod, ·40; Mugud, Bankapur, and Ranibennur, ·25; Dharwar, Hubli, and Karajgi, ·10; Nargund, none.	More rain urgently required throughout the district. Rice and *juari* crops good; but they will suffer from drought if rain does not fall shortly in eastern talukas; scarcity of fodder is being felt; and cattle from Karajgi taluka are being removed to western talukas. Cholera abating. Rice 30 and *juari* 52 pounds per rupee.
Kanara ...	Karwar, 1·70; Kumpta, 7·6; Sirsi, 3·72; Haliyal, 1·13.	Total rainfall 93·36. Common rice in Karwar 15; districts average 15½ seers per rupee. Small-pox, 1 death in Supa. Rice plants in ear above Ghats; rice harvest on coast.
Rajkot ..	*Nil*	Weather warm; general health good. Fever in some places; cholera continues in Dhoraji. Sowing of late crops commenced in Halar; *bajri* 38 and *juari* 52 pounds per rupee.
		General Remarks.—Rain throughout the Deccan and Southern Mahratta Country; more rain urgently wanted in several places. General prospects unchanged. *Kharif* harvest in progress in parts of Sind, Kaira, Khandesh, and Ratnagiri; *rabi* being sown in parts of seven districts. Fever general, cholera, small-pox and cattle-disease in parts of several districts.
Bengal—(Oct. 8th)		
Chittagong ...	·53	Weather cool. Prospects of crops good. Prices stationary. General health good; cattle-disease still reported.
Dacca ...	1·23	Harvesting of *aushini* paddy began; damage to crops anticipated owing to want of water; *mash*, *kalai*, and mustard being sown.
24-Pergunnahs (Calcutta)	2·31	Harvesting of *aus* paddy going on with an estimated outturn of 12 annas; prospects of *aman* paddy and sugarcane good; land being prepared for *rabi* crops. Price of common rice 11½ to 15½ seers per rupee. Public health generally good; fever as usual in this season in Barrackpore.
Moorshedabad ...	1·68	Weather cloudy and cool owing to general rainfall. Prospects of *aman* crop improved; in some parts progress made in transplanting, and if rain continues outlook will be more hopeful. Weather for *rabi* crops favourable. Rice 12 to 13 seers per rupee. Public health good.
Rajshahye ...	1·34	Rain done some good, but long drought has considerably prevented the transplanting of *amun*. Health fair.
Burdwan ...	·25	Prospects of crops in Cutwa and Ranigunge improved by late rain, especially in the latter; elsewhere still doubtful and in some thanas bad.
Rungpore ...	4·16	Weather fair; rain too late for much improvement in prospects of crops. Coarse rice selling at Rs. 4-4-0 per maund. Malarious fever prevalent.
Bhagalpur ...	5·95	Prospects of late paddy improved, and a fair harvest may now be expected. Rice 12 seers 10 chittacks per rupee.
Purneah ...	7·68	Rain done much good to standing crops; ploughing for *rabi* progressing. Common rice 15 seers per rupee. Very much fever. Ganges very high.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Patna ...	·31	Harvesting of *bhadoi* nearly completed; late rain done much good to standing paddy. Cholera still reported from Behar sub-division.
Durbhunga ...	3·83	*Rabi* being sown; late rain improved prospects of paddy. Prices falling. Public health good.
Hazaribagh ...	1·80	Weather bright and seasonable. Harvesting of *bhadoi* crop nearly over; early paddy being cut in places; prospects generally fair. Public health good.
Cuttack ...	1·39	Weather seasonable. Cutting of *beali* completed with average outturn; early *sarad* ripening; late *sarad* promising well. Price of rice stationary. Cholera rather bad in some parts of the district; cases of typical fever reported also.
		General Remarks.—The rainfall of the week has much improved the prospects of *amun* paddy generally, and rain in latter end of October will ensure fair harvest in many districts, but in a few more rain is still needed at present; harvesting of *bhadoi* crops and *aus* paddy and jute going on; lands are being prepared for *rabi* crops. Price of rice rising still in certain places. Cholera still prevalent in parts of 5 districts and fever in some.
N. W. Provinces and Oudh—		
Benares (Oct. 6th)	Average rainfall over 2·0.	Rice improved; *bajra* slightly injured by rain. Slight fever. Prices falling.
Allahabad („ „)	2·1	Rains now over apparently; sky clear. Land being prepared for *rabi*. Health excellent. Prices falling.
Gorakhpur („ 4th)	10·2 at Sadr; much heavier rain in north and east.	Fine weather wanted. Cholera decreasing. Prices stationary.
Jhansi („ 7th)	.....	Some damage done to *kharif* by excessive rain. Ploughings for *rabi* commenced. Prices fluctuating. Fever prevalent; cholera decreasing.
Agra („ 4th)	Rain in all parganas, from 4·5 to 15·0.	The heavy rain has done damage to the *kharif* and deferred *rabi* ploughings. Prices steady. Fever very prevalent in all parganas.
Bareilly („ 6th)	.....	Rain has done considerable damage; a few villages along Ramganga completely flooded. Health, &c., good.
Meerut („ „)	Extraordinary rain on 29th, 30th and 1st; rainfall from 4·7 to 13·2.	Great damage to crops, buildings, and roads. Fine weather now, with westward wind. Fever very prevalent; cholera—19 cases in Hapur, 5 deaths, 7 cases in Meerut, 2 deaths. Prices steady.
Kumaon („ „)	Heavy rain between the 29th and the 3rd.	Cut rice has been somewhat injured in valleys; stalks of millets used as food for animals, have also been injured. General health good. Cattle-disease continues. Prices stationary.
Lucknow („ „)	Rain continued during the first five days of the week from 1·7 to 3·3.	*Juari*, *bajari* and *mash* crops damaged by the late heavy fall. *Rabi* sowings also delayed in consequence. No disease in men or cattle. Supplies ample. Prices steady.
Partabgarh („ 3rd)	Average rainfall for the week a little over 3·5.	*Bajri* and *juari* have been injured by the late heavy rain. General health good. Prices almost stationary.
Sitapur („ 6th)	.....	The harvest crops of *bajri*, *mash* and *tilli* are said to have suffered considerably by the late rains; but the mischief will probably be greatly repaired by the fair weather which set in on the 4th October.
Fyzabad („ „)	2·6 rain at Sadr and 2·0 to 4·4 elsewhere.	*Kharif* crops are being cut. Public health and condition of cattle good.
Rae Bareli („ 4th)	Rain all over the district.	Weather cloudy; wind variable. *Bajri*, *juari* and *mothi* somewhat injured by rain. Supplies abundant. Prices almost stationary.
Cawnpore („ 6th)	From 3·5 to 9·6 of rain fell during week.	Complaint general that crops have been injured by heavy rain. Fever and ague prevalent; and few cases of cholera in paragana Bhognipur. A little cattle-disease in paragana Ghatampur.
Farukhabad („ „)	Average rainfall of the week 6·4.	Rain now ceased, but much damage has been caused to crops, and many houses have fallen. The Gunga and Ramganga are in flood; and the low land in Aligarh tahsil is inundated. Fever increasing. Prices stationary.
		General Remarks.—There was heavy rain in most districts during the week; doing extensive damage to the cut and standing crops, and retarding *rabi* operations. Markets are well stocked, and prices so far show but slight variations. The health of the people and condition of cattle continue normal.
Punjab—(Oct. 1st)		
Delhi ...	3·0	Fever prevalent. Expected yield of *kharif* above average. Slight rise in prices.
Hissar ...	Rain at Rohtak	Excessive rain has done damage, but average or full crop expected in most places. Fever very prevalent; some cattle-disease in Rohtak.
Umballa ...	4·0	Fever still very prevalent throughout the district; *mukka* and rice being harvested; other *kharif* crops promising though much damaged by late rain; yield expected to be above average; gram sowing in progress. Prices gradually falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Jullundur ...	.....	Crops and health good. Prospects of coming harvest favourable; *rabi* ploughing commenced. Prices stationary.
Amritsar ...	.....	Health and *kharif* prospects good; *rabi* crops sown. Prices of grain and rice rising; other prices stationary.
Sialkot ...	·50	Health good. Harvest expected above average. Prices falling.
Ferozepore ...	·10 at Sadr	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices fluctuating.
Lahore ...	.....	General health good. Fair *kharif*; *rabi* prospects fair. Prices falling.
Rawalpindi ...	·70	Expected yield of *kharif* harvest above average in two and average in five tahsils. Fever in three and cattle-disease in three tahsils. Prices falling.
Mooltan ...	.....	Fever prevailing in the district. Expected yield of *kharif* harvest good. Prices fluctuating.
Dera Ismail Khan ...	.....	Health and prospects good. Expected yield of *kharif* harvest above average.
Peshawar ...	.....	Slight fever prevalent. *Kharif* prospects good. Prices of wheat and *makka* stationary, of *juar* rising, of rest falling.
		General Remakrs.—Rain in many districts. Fever prevalent in the Delhi, Umballa, Ferozepore, Rawalpindi, Mooltan, and Peshawar district, and in Hissar division. Elsewhere the health of the province is good. Cattle-disease in the Rohtak district, and in three tahsils of the Rawalpindi district. *Kharif* prospects very favourable, except in the Shahpur district; but the recent rain has done damage to the crops in the south-east of the province; *rabi* sowings commenced in many districts. Prices of food-grains fluctuating, but with a falling tendency.
Central Provinces—(October 8th)		
Nagpur ...	·5	Weather clear. Prospects improving; *rabi* sowings commencing; *juari* somewhat damaged. Fever prevalent; small-pox and cattle-disease in parts. Prices steady.
Jubbulpore ...	1·71	Weather clear and cool, break beneficial. Reaping of rice commenced; poor outturn of cotton and other crops anticipated. Prices stationary.
Saugor (Oct. 7th)	·67	Weather clear for the last four days. Crops damaged; *rabi* sowings delayed from excessive moisture. Health fair. Prices rising.
Seoni ...	·21	Weather clear since 1st. Land being prepared for *rabi* sowings; rice prospects fair; wheat 30 and rice 16½ seers per rupee.
Hoshangabad ...	.....	Rice being harvested; cotton and other crops damaged by excessive rain; land being prepared for *rabi*. Fever prevalent. Wheat 22 and rice 10 seers per rupee.
Khandwa ...	·82	Break beneficial. Prospects and health good. Prices falling.
Raipur ...	1·47	Weather clear and warm. Land being prepared for *rabi*. Fever prevalent. Prices falling.
Sambalpur (Oct. 4th)	.....	Weather clearing. Rice excellent; other crops more or less injured Fever and cattle-disease prevalent. Common rice 26¼ seers per rupee.
		General Remarks.—There has been a general and beneficial break which will admit of *rabi* sowings commencing. Fever rather prevalent. Prices steady.
British Burma—(Oct. 8th)		
Akyab (Oct. 4th)	1·45	Total rainfall 176·44. Cholera still prevalent in town and district.
Bassein („ „)	3·64	Total rainfall 93·31. Cattle-disease in two townships.
Rangoon („ „)	1·84	Total rainfall 84·61.
Amherst („ „) (Moulmein)	2·34	Total rainfall 172·61. Prospect of crops good.
Tavoy („ „)	1·24	Total rainfall 157·42. Prospect of crops good.
Pegu (Sept. 27th)	5·81	Total rainfall 103·64. Season most favourable. Prospects everywhere better than last year.
„ (Oct. 4th)	8·38	Total rainfall 112·02.
Henzada ...	2·11	Total rainfall 85·33. Slight cattle-disease in one township.
Prome ...	.....	Crop prospects good. Season most favourable.
Thoungoo ...	1·33	Total rainfall 69·77.
Thayetmyo ...	0·22	Total rainfall 30·73.
		General Remarks.—Cholera still prevalent in parts of Arakan; elsewhere public health particularly good, health of cattle generally good. Crop prospects still excellent.
Assam—(Oct. 8th)		
Gauhati ...	1·25; rain during week ending 7th instant.	Mornings and nights cool, days hot. Prospects of crops and tea not very satisfactory. Cholera in the vicinity of Barpetta reported; public health fair.
Sylhet ...	2·55	State and prospects of crops, including tea, favourable. Cholera in Chhatak thana; public health good on the whole.
Cachar ...	6·49	Weather warm. Prospects of *sali* crops and tea good; common rice 15¼ seers per rupee. Public health good.
Dibrugarh ..	1·64	Weather cool. Prospects of *sail* crops fair. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(Oct. 8th)		
Bangalore ...	4·33	Standing crops much improved. Prospects more favourable.
Mysore ...	Slight rain in nine talukas; general rain, from ·54 to 2·72, has fallen in other districts.	Condition of crops and prospects of season still unfavourable. Prospects may be said to have improved, but crops generally in very backward condition. Public health good. Some cases of cholera have been reported. Prices stationary.
Mercara ...	1·99	*Ragi* crops in Nanjarajpatna taluk nearly all harvested; outturn good. South-west moonsoons breaking up at last; wind has varied.
Berar & Hyderabad—(Oct. 8th)		
Amraoti ...	1·77	Weather cloudy; breaks for four days. Crops in good condition; wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Weather cloudy. Prospects of crops good; cotton beginning to flower.
Hyderabad ...	Average rainfall during the week 1·2.	Total rainfall from 1st January 29·74. Standing crops good. No sickness. Prices—wheat 14, coarse rice 12, white *juari* 16½, yellow *juari* 20, and *tur* 19 seers per halli sicca rupee.
Central India States—(Oct. 8th)		
Indore ...	0·35	Total rainfall 36·56. Agricultural prospects excellent. Health good. Cold weather commencing with signs of close of the monsoon.
Morar (Gwalior) ...	2·79	Total rainfall 32·68. The late rains have somewhat injured the *bajri* crops. Fever prevalent. Nights cool. *Rabi* sowing commenced.
Sutna ...	3·94	Weather clear and dry. Health and prospects good.
Neemuch ...	0·15	Total rainfall 22·75. Public health good. *Makka* being reaped.
Goona ...	.....	Weather clear. Health good. Total rainfall 40·73.
Agar ...	0·59	Health and prospects good.
Sehore ...	3·04	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	1·96	Total rainfall 72·61. *Kharif* prospects damaged and *rabi* sowings interfered with by excessive rain. Public health good.
Manpur (Bhopawar) ...	1·97	Total rainfall 39·51. Fever increasing in Manpur; some cholera in Dhar territory, otherwise public health good.
Rajputana—(October 8th)		
Abu (Oct. 8th)	.....	Weather clear, cool, and seasonable.
Sirohi („ 5th)	·30	Tanks, wells, health, and crop prospects good. Fine weather; cool at night.
Marwar („ 3rd)	.....	In Jodhpore city tanks are all full. Fever still prevails. Crops in good condition. Clear week; getting cool. Prices stationary, with tendency to fall.
Meywar („ 5th)	.....	Wells and tanks very good. Health fair. *Makka* harvested.
Harowti („ 4th)	Tonk, ·15; Shahpura, 1·29; Kotah previous week, 1·77.	Crops ripening. Weather fine. Health good.
Jhallawar („ 3rd)	1·64	Late rain caused harm to *makka* and delayed *rabi* sowings.
Ajmere („ 7th)	No rain	Prospects and health excellent.
Jeypore („ „)	*Nil*	*Kharif* harvesting commenced; good outturn expected. Prices steady. Fever prevalent.
Bhurtpore ...	.....	No report received.
Ulwur (Oct. 7th)	3·24 (average)	Preparations for *rabi* in progress. Fever very prevalent.

Circular No. 108Ex./17-20.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department, (Museums and Exhibitions),—under date Simla, the 2nd October 1884.

Read—

Despatch from Her Majesty's Secretary of State for India, No. 105, dated 31st July 1884.

Despatch to Her Majesty's Secretary of State for India, No. 10, dated 30th August 1884.

Circular No. 102Ex./17-10, dated 5th September 1884, to Local Governments and Administrations.

Despatch to Her Majesty's Secretary of State for India, No. 13, dated 23rd September 1884.

Circular No. 106Ex./17-9, dated 29th September 1884, to Local Governments and Administrations.

Letter to the Government of Bengal, No. 1080Ex./17E-1, dated the 29th September 1884.

RESOLUTION.

The Government of India has accepted, through Her Majesty's Secretary of State, the invitation of His Royal Highness the Prince of Wales to take part in an Exhibition, to be held in London under a Royal Commission in 1886, the purpose of which, in the words of His Royal Highness, is to demonstrate on the fullest scale to the inhabitants of the British Islands the unbounded industrial resources at their command within the limits of Her Majesty's Colonial and Indian dominion.

2. The co-operation of Local Governments and Administrations in this project has already been invited, and the Government is now desirous that the general public throughout India should be made acquainted with the opportunity which will be afforded of displaying in a complete and comprehensive manner the produce, arts, and manufactures of the Empire.

3. The Exhibition will be opened at South Kensington early in May 1886, and all Indian exhibits should arrive in England before the 1st of January in that year.

4. The terms on which space can be granted, and the extent to which it will be available, cannot be made known until the receipt of further instructions from the Royal Commissioners. But it is desirable that provisional applications for space should be sent in by intending exhibitors at as early a date as possible to such address as may be determined by the local authorities. Preference will, therefore, be given to applications received before the 1st of March 1885 on the understanding that the area applied for will not necessarily be attained in full, and that the application may be subsequently withdrawn if the charge for space is not accepted.

5. All communications to the Government of India connected with the Exhibition should be addressed to the Officer in charge, Exhibition Branch, Revenue and Agriculture Office.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations noted on the margin, with a request that it may be published in *Local Gazettes* and communicated to newspapers, Vernacular and English, for general information, and with an intimation of the address to which applications for space should be submitted.

13th October 1884.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 9th October, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble D. G. Barkley.
The Hon'ble J. W. Quinton.
The Hon'ble H. J. Reynolds.

RANGOON WATER-WORKS BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town be taken into consideration. He said:—"The only important alteration made by the Select Committee in the Bill is the omission of the financial clauses. The Committee agree with the Chief Commissioner in thinking that the arrangements for the imposition of a water-rate and for the constitution and management of the water-supply fund can be more conveniently dealt with under the financial sections of the recently passed Municipal Act than under the separate sections which it was originally intended to insert in this Bill."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that in section 2, clause (1), of the Bill the words "and includes the Cantonment of Rangoon and the Central Jail" be omitted. He said that he was informed that the Chief Commissioner considered that these words were not necessary.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN SALT ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN moved that the Bill to amend the Indian Salt Act, 1882, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the second section of the Bill and the second recital in the preamble be omitted. He said:—

"The preamble as originally framed ran thus:—

'WHEREAS it is expedient to exclude the Province of Sindh from the operation of those portions of the Indian Salt Act, 1882, which do not extend by their own operation to the whole of British India;'

and then it went on to say—

'Whereas it is also expedient to remove certain doubts which have been raised as to the meaning of the words 'importation of salt' in section 27 of the same Act, &c.'

And the second section of the Bill was as follows:—

'For the word 'importation' in section 27 of the same Act, the word 'bringing' shall be substituted.'

"The object of these words in the preamble, and in the second section of the Bill, was, as explained in the Statement of Objects and Reasons, and by me at the introduction of this Bill, to remove a doubt as to the meaning of section 27 of the Act, raised by a ruling of the Chief Court in Sindh, which had held that the words 'importation of salt' in that section covered only the bringing in of salt as merchandise for the purpose of commerce and in merchantable quantities; but did not apply to small quantities brought for other purposes. Since the introduction of the Bill, however, it has been brought to the notice of the Government of India that the Chief Court in deciding the later case of the *Crown* v. *Imambux Haji* gave reasons for holding that it would no longer be safe to act on the opinions expressed in the earlier decision; and that importation of salt includes the bringing of salt into British India in the smallest quantities. In other words, the later ruling of the Chief Court in Sindh has annulled the former, and cleared up any doubt that may have existed, and which it was the object of this section (2) to remove, thereby making the section unnecessary."

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 23rd October, 1884.

SIMLA;
The 15th October, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. 129 Met. / 27-10.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 17th October 1884.

Read—

Summary of the Weather Reports for September 1884.

Over the greater part of the country the weather of the past September has been of an exceptionally wet and unsettled character. In August no travelling depressions of any importance made their appearance, while in September it was only for a short period in the middle of the month that the weather was uninfluenced by cyclonic conditions.

The majority of these cyclonic storms were formed over the head of the Bay of Bengal, whence they travelled inland in a west-north-westerly direction. Of these, some appear to have filled up and disappeared on reaching the Central Provinces, while others continued their course beyond. That of the 5th-9th passed right across the country, the centre leaving the Bay of Bengal on the 5th, and passing over Kutch on the 9th. Heavy falls of rain accompanied it in its passage, causing the extensive floods which occurred in the valleys of the Nerbudda and the Tapti in the early part of the month. The storm of the 18th-27th followed a different track. After travelling west-north-westward as far as Khandwa, the vortex suddenly turned northwards, and passed on to Jhansi and Agra, bringing heavy rain to all parts of Central and North-Western India.

In addition to these travelling vortices, small local disturbances originated in Northern Rajputana on the 1st and 2nd, and in Rohilkund on the 29th and 30th. In both cases, but particularly in the latter, heavy rain fell in the surrounding districts.

Assam, Behar, and North Bengal have been quite outside the influence of the disturbances, and, as a consequence, the reports show that the rainfall of the whole of those provinces has been decidedly deficient; all other parts of Northern India, as well as the more central parts of the country, have received much more than their average amount of rain.

Turning to the Peninsula, the returns show that the Konkan and Malabar Coasts have had about four inches more than their average rainfall, but that at the majority of stations in the Dekkan, Mysore, and the Karnatic the fall has been deficient. In Burma the differences from the average have been in general small and unimportant.

The greatest excess above the average occurred at Pachmarhi and Mount Abu, where the month's rainfall has been about 25 inches over the normal amounts; and the greatest deficiency occurred in Purneah and Dinagepore, where it amounted to about 12 inches.

The greatest number of wet days, 26, occurred in Burma. There were 24 in the Central Provinces and 23 on the Malabar Coast; only 11 in North Bengal, 9 in Mysore, and 3 or 4 in Sind. At Bellary rain fell only on 3 days throughout the entire month. In the south of the Peninsula, towards the close of the month, there occurred 3 or 4 days of consecutive rainfall, during which about one inch of rain fell at Tuticorin, after a spell of dry weather which had lasted since May 16th.

On the mean of the whole month, the pressure was slightly above the average over the Upper Provinces and as far east as Behar, but, with a few local

exceptions, it was below the average in Bengal, Burma, the whole of the central parts of the country and the Peninsula, as far south as Madras in the east and Mangalore in the west. To the southward of these stations the barometer again showed a slight excess.

The temperature of the whole month was somewhat in excess in Assam, North Bengal, Behar, Lower Sind, and at several stations in the south of the Peninsula, these being the regions where rain was deficient and the cloud proportion probably slight. Humidity shows the same agreement, being considerably in excess of the average, except in the provinces of Assam, North Bengal, Behar, and the south of the Peninsula.

The following table gives roughly the differences of rainfall from the average in the different districts of India:—

Districts.	Average rainfall in September.	Difference of rainfall of September 1884 from average September rainfall.
	Inches.	Inches.
Punjab, West	2·38	+ 2·34
Punjab, East	4·22	+ 3·57
North-Western Provinces, Trans-Gangetic Stations ...	7·29	+ 3·36
North-Western Provinces, Cis-Gangetic Stations ...	5·34	+ 6·90

British Burma	16·41	+ 1·51

W. L. DALLAS,

Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the above Summary be printed in the Supplement to the *Gazette of India*.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15th OCTOBER 1884.

GENERAL REMARKS.—There was rain in all districts of Madras during the week, and some improvement is noticed in those parts of the Presidency where prospects have hitherto been unsatisfactory. Rain has fallen generally all over the Province of Mysore, and the condition of the crops has been improved. In Coorg prospects continue favourable. Rain is still urgently wanted in several parts of the Deccan and Southern Mahratta Country, and crops are reported to be withering in the eastern talukas of Poona and parts of Belgaum. Fodder is also scarce in several talukas of Dharwar and Belgaum; elsewhere in the Presidency prospects are generally good.

There was no rain in the Central India and Rajputana States during the week, but prospects continue good. In the Berars and Hyderabad the condition of the crops is very favourable.

No rain fell in the North-Western Provinces and Oudh, except in Partabgarh and in the Punjab. In the former the *kharif* crops have been injured in some districts by heavy rain, but in the latter their condition is very favourable. The rains have ceased in the Central Provinces, and the prospects of the *kharif* are fair.

In Bengal the *amun* crop, which has been improved by the late rain, is expected to yield well if there is heavy rain shortly. In Assam prospects are generally good.

The last report of the Meteorological Department, dated 16th instant, states that rain has fallen over the whole of the Madras Presidency, with the exception of the Kurnool, Bellary, and Cuddapah districts, and that slight showers are reported from Mercara and from two districts in British Burma; elsewhere there has been no rain.

Harvesting continues in Madras, and ploughing and sowing for the *rabi* are in progress in Bombay, Bengal, North-Western Provinces and Oudh, Punjab, and the Central Provinces. The *kharif* is being harvested in Bombay and the Punjab.

The public health is generally good. Prices are fluctuating in Bengal and the Punjab; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 15th)		
Bellary ...	·50 (average)	Pasture scanty. Two deaths from cholera.
Kurnool ...	·15 (average)	Standing crops good. Small-pox prevalent in three taluks and cattle-disease in two.
Ganjam ...	·05 (average)	Small-pox, cholera, and cattle-disease prevalent.
Kistna ...	·51 (average)	Standing crops generally good. Harvest dry crops, outturn below average. River 3·55 feet over anicut. Small-pox, fever, and cattle-disease in places; 4 deaths from cholera.
Chingleput (Madras) ...	1·06 (average)	Standing crops generally good. Harvest wet and dry crops, yield half the average. Small-pox in three taluks; 83 deaths from cholera.
Coimbatore ...	2·64 (average)	Standing crops benefited by recent rain; harvest wet and dry crops, outturn average in three and below average in eight taluks.
Tanjore ...	1·60 (average)	Standing crops generally good. Rivers 2 to 8 feet. Harvest wet and dry crops, outturn average. 63 deaths from cholera.
Madura ...	·98 (average)	Prospects fair in four taluks, elsewhere crops unsatisfactory from want of rain. 54 deaths from cholera.
Malabar ...	1·06 (average)	Operations for second crop cultivation progressing. Slight small-pox in seven taluks, and fever in two; 10 deaths from cholera.
Travancore ...	1·40	Second crop paddy progressing. Fever and small-pox prevalent; 2 deaths from cholera.
		General Remarks.—General prospects fair, except in Bellary, Anantapur, and parts of Madura, and Coimbatore. There has been some improvements in these tracts also during the week.
Bombay—(Oct. 15th)		
Karachi ...	No rain; total to date in Karachi, 7·65; Manora, 7·73; Kotri, 9·36; Thana Buta Khan, 7·49.	River at Kotri on 13th, 10 feet 4 inches against 7 feet 11 inches on same date last year. Fever in 9 talukas; cattle-disease in 9 talukas, some loss in 4 talukas; small-pox in 6 villages in the districts, no fresh cases or deaths, 9 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 26, 26 and 40; Dadu 36 and 40; Shahbandur 20, 32, and 32; and Tatta 26, 30, and 36 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 13th, 11 feet 4 inches against 7 feet 11 inches last year. *Rabi* operations in progress. Fever throughout the district; cattle-disease in 4, and small-pox in 4 talukas. Prices of grain steady.
Ahmedabad ...	*Nil*	Reaping of *bajri* commenced in some talukas; crops healthy. Fever in Dholka, Gogo, Dholira, and Viramgaum. Wheat 31 and *bajri* 33 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	*Nil*	Public health fair; cattle-disease in Wadnagar; and crops in fair condition, except in Kotinar and Okhamandal, where they have been damaged by excessive rain; reaping of *bajri* commenced in Kadi division. Prices—*bajri* 34½ and rice 23 pounds per rupee.
Surat ...	*Nil*	Young crops healthy; preparations for *rabi* commenced in places. Fever in Pardi and Mandvi. *Juari* 29 and *nagli* 40 pounds per rupee.
Nasik ...	*Nil*	Weather fair and dry. *Kharif* crops ripening; *rabi* sowing in progress. Public health generally good; 2 attacks and 1 death from cholera at Nasik; small-pox in Malegaon. Wheat 40, *bajri* 33½, and rice 21 seers per rupee.
Colaba (Bombay) ...	*Nil*	Abnormal temperature 0° to 2° warm; vapur in air defective from 11th to 14th; abnormal wind easterly.
Poona ...	Rain in all talukas; maximum 5·0 at Junnad, minimum ·61 at Sirur.	Crops withering in Indapur, Bhimthadi, and parts of Sirur. More rain urgently wanted in the east. 3 deaths from cholera at Kenjal taluka. In Purandhar *bajri* 32 and *juari* 33; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Akola, 2·88; Sangamner, 2·72; Kopargaon, 1·35; Rahuri, 1·7; Nagar, 1·6; Parner, ·86; Newasa, ·75; Jamkhed, none; Shrigonda, Karjat, and Sheogaon, slight.	*Kharif* crops in good condition; harvesting in progress in Shrigonda and Sheogaon; sowing of *rabi* completed in Nagar, Parner, Sheogaon, Rahuri, and Sangamner, and is in progress in the other talukas. More rain would be beneficial. *Juari*—maximum 60 pounds per rupee in Sangamner, minimum 33 in Karjat; *bajri*—maximum 49 pounds in Jamkhed, minimum 35 in Karjat.
Sholapur ...	·6; Barsi, none; Madha, ·19; Karmala, ·31; Pandharpur, ·43; Sangola, ·34; Malsiras, ·98.	*Juari* 33 pounds 18 tolas and *bajri* 33 pounds 20 tolas per rupee. General prospects poor. No signs of more rain, which is greatly needed.
Dharwar ...	Ranibennur, 3·57; Hangal, 3·43; Ron, 2·16; Kod, 1·46; Mugud, 1·16; Nargund, 1·9; Hubli, Gadag, Bankapur, and Karajgi nearly ·35; Mundargi ·10; Dharwar, Navalgund, and Kalghatgi, none.	Sowing of late crops retarded in Hubli, Navalgund, Ranibennur, and Ron talukas for want of rain, which is very urgently required to save the early crops, and enable late crops to be sown. Fodder and water becoming scarce in eastern talukas. Cattle-disease in Mandargi, Petha, and Karajgi talukas are being removed to western talukas; cholera abating, except in Navalgund taluka, deaths 47. Prices rising average; rice 26 and *juari* 41 pounds per rupee.
Kanara ...	Karwar, *nil*; Kumpta, ·21; Sirsi, ·44; Haliyal, ·27.	Common rice at Karwar 15, district average 15½ seers per rupee. Small-pox—2 deaths in Supa; fever in Bhatkal and Sirsi. Rice harvest on coast.
Rajkot ...	.....	General health good. Weather warm. Fever generally prevails; cholera in Dhoraji, Nawangar, and Parbander villages. *Bajri* 38 and *juari* 53 pounds per rupee.
		General Remarks.—Good rain in parts of Ahmednagar, Poona, Dharwar, and Kaladgi; more still urgently wanted in several parts of the Deccan and Southern Mahratta Country. Crops withering in the eastern talukas of Poona and in parts of Belgaum. Scarcity of fodder in several talukas of Dharwar and Belgaum. *Kharif* harvest and *rabi* sowing in progress in several districts. Fever general; cholera in parts of 11 districts; small-pox and cattle-disease in a few places.
Bengal—(Oct. 15th)		
Chittagong ...	·20	Weather very sultry. Prospects of crops good. Prices somewhat low. Sporadic cases of cholera still reported, otherwise general health good.
Dacca ...	*Nil*	Damage to crops apprehended from failure of water and want of rain. Harvesting of *asshini* paddy commenced; cultivation for *rabi* crops going on.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of *amun* paddy good; harvesting of *aus* over, with an outturn of 12 annas; weeding of *amun* going on; lands being prepared for *rabi* crops. Price of common rice stationary. Cases of ordinary fever reported, otherwise general health good. State of river normal.
Moorshedabad ...	1·25; no rain since Saturday night.	Rain of last 3 weeks done much good to *amun*. Northerly winds setting in. *Amun* still requires at least one more heavy shower; in the *kalmatar* or lowlands alone a full yield expected; *kalai* sowings considerably damaged by late unexpected rise in rivers. Ploughing much facilitated by rain.
Rajshahye ...	·03	Weather bright and clear. *Amun* still wants more rain. Prices rising. Health fair.
Burdwan ...	*Nil*	Rain wanted. Prices falling slightly in Ranegunge and Kulna. Prospects in Ranegunge favourable, except in thana Kakra; prospects in Kutwa fair, but dependant on further rain this month; elsewhere not good.
Rungpore ...	*Nil*	Weather fair. Prospects of crops not very favourable. Prices of grains rising. Malarious fever prevalent.
Bhagalpur ...	*Nil*	Late rain greatly improved prospects of standing paddy; more rain will be wanted by the end of the month, and there is every prospect of good *rabi* harvest. A very high flood in the Ganges destroyed a great deal of *kurki* and *kalai*, and will greatly retard *rabi* sowings. Rice selling at 13¼ seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	*Nil*	Prospects of crops much improved since last rain; cultivation for *rabi* crops begun. Common rice 15 seers per rupee. Fever very bad.
Patna ...	·26	Paddy looks well in some places; sowing of *rabi* commenced, but rain still wanted. Cholera in Behar sub-division.
Durbhunga ...	·42	*Rabi* sowings coming on well; paddy crops, though much improved on places, still in need of more rain. Prices stationary. Public health good.
Hazaribagh ...	*Nil*	Harvesting of *bhadoi* completed, except in one or two thanas; prospects of paddy generally fair; lands being prepared for winter crops in some places; sowings commenced. A few cases of small-pox reported; public health generally good.
Cuttack ...	*Nil*	Weather cloudy to-day. Early *sarad* ripening, late *sarad* growing well. Rain urgently wanted. *Rabi* being sown. Price of rice stationary. Cholera in some places.
		General Remarks.—Late rain improved prospects of standing *amun* paddy and if heavy rain falls shortly a good crop expected. *Rabi* sowings commenced; harvesting of *aus* and jute still continues; poppy being sown in Sarun. Price of rice falling slightly in some districts. Fever prevails in several, and cholera still continues in two or three districts.
N. W. Provinces and Oudh—		
Benares (Oct. 13th)	No rain	*Bajri*, *munq*, and *urd* slightly damaged by previous rain; other crops good; sowing for *rabi* has commenced. Slight fever in city and Gangapur. Prices rising.
Gorakhpur („ 11th)	.....	Fine weather, but unusual floods throughout the district, and crops have been damaged in places. Cholera decreasing. Prices stationary.
Fyzabad („ 13th)	No rain in week	Rain now ceased; sky clear. *Rabi* sowings commenced. Health excellent; cattle-disease in part of district.
Lucknow („ „)	No rain	Weather clear; west wind. Fields are being ploughed for *rabi* sowing, in some places it is being sown; crops on low lands damaged by floods. Health of people good; slight cattle-disease reported in tahsil Malihabad. Supplies sufficient. Prices rising slightly in tahsil Mohanlalganj.
Rae Bareli („ 11th)	.....	Weather seasonable; wind westerly; sky clear. *Dhan* and *codo* are being cut. Health of men and condition of cattle good. Prices stationary.
Partabgarh („ 10th)	Rainfall from 0 to 3·0	*Juari* and *bajri* have recovered from the excessive rain. Fever reported as prevalent in Partabgarh and Kunda tahsils. Prices almost stationary.
Allahabad („ 13th)	No rain	Weather bright and clear. *Rabi* sowings beginning in places. Health excellent on the whole. Prices slowly falling.
Cawnpore („ 12th)	No rain fell during the week.	No further injury to crops beyond that already reported. *Rabi* ploughing and sowing in progress. Fever and ague prevalent, and a little cattle-disease in pargana Rasulabad.
Farukhabad („ 13th)	.....	Ploughing for *rabi* commenced; *kharif* crops much injured by recent rain and floods, but the fine weather has been favourable to prospects. Fever prevalent. Prices slightly risen.
Sitapur („ 14th)	.....	The weather has cleared up; and sowings for the *rabi* are progressing, the *kharif* crops are reported not to have suffered much from the late rains.
Bareilly („ 13th)	.....	Damage to crops from floods confined to lands along rivers. *Bajri* injured by rain; other crops good; harvest being cut. Rivers going down, but still far above normal. Slight cholera in a few villages in the interior.
Kumaon („ „)	.....	Weather fair. Millets cut and rice being reaped. General health good, except fever in some valleys in Katauli; cattle-disease continues. Prices stationary.
Agra („ 11th)	No rain during week	*Kharif* being cut, and *rabi* ploughings going on. 1 death from cholera during week. Fever in all pargannas. Prices steady.
Jhansi („ 14th)	.....	Rains over. Prospects fair. Fever prevalent.
Meerut („ 13th)	No rain	West wind; cool nights; hot days; cold weather set in. Crops much damaged by recent heavy rainfall, but amount of damage not yet ascertained. Fever prevalent, and cholera still lingers in Meerut and Hapur. Prices steady.
		General Remarks.—There was no rain during the week, except in the Partabgarh district. The *kharif* crops have been injured in some districts by the late heavy falls; *rabi* sowings in progress. Prices are almost unchanged. The health of the people and the condition of cattle continue normal.
Punjab—(Oct. 15th)		
Delhi ...	.....	Fever prevalent. *Rabi* sowings in progress. Prices rising.
Hissar ...	.....	Fever prevalent. Harvest promises to be average or above. Cattle-disease in one village in Rohtak. Prices show rising tendency.
Umballa ...	.....	Fever still very prevalent throughout the district. *Makki* harvested; rice and *juari* being harvested, yield expected to be above average; sowing of gram, barley, and mustard in progress. Prices stationary.
Jullundur ...	.....	Fever in the district. Prospects of coming harvest favourable; *rabi* ploughings commenced. Prices rising.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Amritsar ...	.....	Health good. Crop prospects good. Prices of wheat and rice rising and of other crops stationary.
Sialkot ...	.....	Health good. Rinderpest in a few villages. *Kharif* harvest above average. Prices falling.
Ferozepore ...	.....	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices fluctuating.
Lahore ...	.....	Slight fever prevalent. *Rabi* prospects fair. Prices stationary.
Rawalpindi ...	.....	Slight fever in two and cattle-disease in three tahsils. Expected yield of *kharif* harvest above average in two, average in four, and inferior in one. Prices falling.
Mooltan ...	.....	Fever still prevailing in the district. Expected yield of *kharif* is average. Prices stationary.
Dera Ismail Khan ...	.....	Health and crop prospects good. Expected yield of coming harvest above average.
Peshawar ...	.....	Slight fever prevalent. *Kharif* prospects good. Prices falling.
		General Remarks.—No rain, with the exception of a slight fall in the Rawalpindi district. Fever very prevalent. *Kharif* prospects very favourable. *Rabi* sowings commenced. Prices fluctuating.
Central Provinces—(October 15th)		
Nagpur ...	*Nil*	Weather clear and cool. Prospects of *kharif* fair; *rabi* ploughing in hand. Fever prevalent, with some small-pox.
Jubbulpore ...	*Nil*	Weather clear and cool. Reaping in upland commenced; *rabi* ploughings commenced. Wheat 25 and rice 13 seers per rupee.
Saugor (Oct. 14th)	*Nil*	Bright sunshine. Rice being cut in places; other *kharif* crops unfavourable; *rabi* ploughing in hand. Fever prevalent. Prices rising.
Seoni ...	*Nil*	Weather clear and cool. *Rabi* sowings commenced. Fever increasing. Prices stationary.
Hoshangabad ...	*Nil*	Weather clear and pleasant. Prospects of *til* and rice fair; cotton not hopeful. Fever prevalent; small-pox 11 cases, 2 deaths. Wheat 22 and rice 10 seers per rupee.
Khandwa ...	*Nil*	Weather clear. Prospects and health good. Prices steady.
Raipur ...	*Nil*	Weather clear and cloud. *Rabi* sowings in hand. Fever prevalent, with slight cattle-disease. Rice 24 and wheat 30 seers per rupee.
Sambalpur (Oct. 11th)	*Nil*	Weather cool; break seasonable. Rice being cut in places. Fever and cattle-disease prevalent. Common rice 28 seers per rupee.
		General Remarks.—Rains have apparently ceased, and cold is setting in. Prospects fair. Prices steady. Fever prevalent; small-pox and cattle-disease in places.
British Burma—(Oct. 15th)		
Akyab (Oct. 11th)	2·51	Total rainfall 178·95. Cholera still prevalent in town. Crops healthy.
Bassein („ „)	1·56	Total rainfall 94·87
Rangoon („ „)	9·02	Total rainfall 84·63. Slight cholera in town.
Amherst („ „) (Moulmein)	0·71	Total rainfall 173·32. General appearance of crops good.
Tavoy („ „)	0·21	Total rainfall 157·63. Prospects of crops good.
Pegu („ „)	2·88	Total rainfall 106·90. Crop prospects good.
Henzada („ „)	1·07	Total rainfall 86·40. Slight cholera in town; cattle-disease in 2 townships. Crop prospects favourable.
Prome („ 4th)	0·30	Total rainfall 38·25. Slight cholera in one township.
„ („ 11th)	0·67	Total rainfall to date 38·92.
Thoungoo („ „)	1·05	Total rainfall 70·82.
Thayetmyo („ „)	0·19	Total rainfall 30·92.
		General Remarks.—Public health generally good. Crop prospects unaltered.
Assam—(Oct. 15th)		
Gauhati ...	No rain during week ending 14th instant.	Days hot; mornings and nights cool. Prospects of tea not good. Rain much needed for *sali* paddy; sugarcane doing well. Public health fair.
Sylhet ...	*Nil*	State and prospects of crops good on the whole. Cholera, small-pox, and dysentery reported from the interior.
Cachar ...	*Nil*	Weather warm. *Sail* crops in some parts of the district destroyed by insects; prospects of tea good. Common rice 13 $\frac{5}{16}$ seers per rupee. Health good.
Dibrugarh ...	*Nil*	Weather cool. Prospects of *sali* crop fair; *matikalai* being sown. District healthy.
Mysore and Coorg—(Oct. 15th)		
Bangalore ...	·41	State of crops and prospects improving.
Mysore ...	2·23	Rain general over the district. Crops and prospects improved. Rain has fallen generally all over the province since last report. Condition of crops and prospects of season are more favourable in consequence. Public health fair. A few cases of cholera continue to be reported. Prices rule about average rate.
Mercara ...	·76	Weather seasonable. Prospects of standing crops favourable.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar & Hyderabad—(Oct. 15th)		
Amraoti ...	.....	Weather clear and cool; *kharif* plants healthy and growing rapidly; cotton in blossom. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	1·42	Crops in good condition; *rabi* sowings commenced.
Hyderabad ...	Average rainfall during the week ·24.	Total rainfall from 1st January 29·98. Reaping of *kharif* crops commenced; *abi* crops prospering. Cattle-disease prevails in one taluka; general health good. Prices—wheat 13, coarse rice 11¾, white *juari* 16½, yellow *juari* 20, and *tur* 19 seers per halli sicca rupee.
Central India States—(Oct. 15th)		
Indore ...	*Nil*	Cold weather has commenced. Agricultural prospects favourable. Health good.
Morar (Gwalior) ...	*Nil*	Total rainfall 32·68. Fever still bad in Lashkar. Cold weather set in.
Sutna ...	*Nil*	Weather cool and clear.
Neemuch ...	*Nil*	Weather seasonable. Health and prospects good. Land being prepared for opium and *kharif*; *mukka* has been almost collected.
Goona ...	*Nil*	Weather clear. Health fair.
Agar ...	*Nil*	Health and prospects good.
Bhopal ...	.....	No report received.
Sehore ...	*Nil*	Weather clear. *Kharif* crops much damaged by late rains. Public health good.
Nowgong ...	*Nil*	Total rainfall 72·61. Public health fair. *Rabi* sowings have been interfered with by excessive rain, but fine weather has been now set in.
Manpur (Bhopawar) ...	*Nil*	Prospects good. Weather somewhat hot. Some fever at Manpur and Burwani; 6 fatal cases of cholera at Rajpur and Burwani; otherwise public health good.
Rajputana—(October 15th)		
Abu (Oct. 15th)	.....	Clouds disappeared. Weather cool and seasonable.
Sirohi („ 12th)	.....	Tanks, wells, and crop prospects good. Some cases of fever; otherwise health good. Weather seasonable.
Marwar („ 10th)	.....	Clouds disappearing. Jodhpore city tanks all full. Fever abating. Crops in good condition. Prices falling.
Meywar („ 12th)	.....	Tanks and wells very good. Health fair. *Mukka* harvested. Weather seasonable.
Harowti („ 11th)	Deoli, ·03; Kotah previous week, ·15.	*Rabi* sowings commenced. Weather seasonable. Health good.
Jhallawar („ 10th)	.....	Nights cold. *Rabi* ploughing commenced. Some fever prevalent.
Ajmere („ 14th)	.....	Health good. Fever prevalent. *Rabi* sowing progressing.
Jeypore („ „)	.....	*Rabi* sowings begun. Fever prevalent; otherwise health good. Prices steady.
Bhurtpore ...	.....	No report received.
Ulwur (Oct. 14th)	.....	*Makka* and *bajri* being harvested. Tanks and wells full. Fever still prevalent. Prices falling.
Nepal—(Oct. 10th)		
Katmandu ...	·49	Weather cooler and clearer. State and prospects of the crops fair.

E. C. BUCK,
Secy. to the Govt. of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

No. 949R.C., dated 22nd October 1884.

RESOLUTION—By the Government of India, Public Works Department.

Assam Railway Surveys.

Read again—

Public Works Department Resolution No. 59R.C. of the 24th January 1884.

Public Works Department Resolution No. 433R.C. of the 30th May 1884.

Read now—

No. 2190, dated 6th August 1884.

From—The Secretary to the Chief Commissioner, Assam, Public Works Department,

To—The Secretary to the Government of India, Public Works Department.

I am directed by the Chief Commissioner to forward for the orders of Government the accompanying Report No. 1527, dated 31st July 1884, by the Engineer-in-Chief, Assam Railway Surveys, detailing the operations in connection with these surveys since November 1883.

2. The estimates and plans detailed in the list appended to Mr. Buyers' Report are also sent herewith.

3. In reference to paragraph 44 of the Report, the Chief Commissioner, I am to say, will be glad if arrangements can be made next season for the investigation of the line between the Dhansiri and the Daiang rivers referred to by Mr. Molesworth, as Mr. Elliott is inclined to concur with that officer in thinking that a practicable line with much less waterway will be found here.

4. In regard to the proposed bridge over the Dhansiri at Golaghat the Chief Commissioner hopes it will be constructed as a combined road and railway bridge. It will be necessary eventually [illegible] and therefore [illegible] might be taken to combine both in one.

5. From paragraph 48 of Mr. Buyers' Report it would appear that the discovery of limestone on the Doegrung river near the village of Murphulani, and another small outcrop on the Nambar nearer the line, was *recently* made. This, I am to say, is *not* so, as the existence of this limestone, as well as the limestone north of the Jamuna river referred to in paragraph 62 has long been known. A kiln was constructed at the first-mentioned spot over two years ago in view to testing the capabilities of this limestone, and orders have already been issued by the Chief Commissioner for the further exploration and testing of this material during the next dry season.

6. In reference to paragraph 49, the Chief Commissioner is of opinion that the line should be taken to Golaghat even if it is out of the way, in view to the development here of a large trade eventually, as noted by the Engineer-in-Chief.

7. The quotation in paragraph 6 in connection with large importation of rice from Assam should be modified, for although there are some quantities, they are not what might strictly be termed large.

8. As regards paragraph 67, the Chief Commissioner strongly objects to the principle of laying a railway on a Trunk Road under any circumstances, and in the case of the line to the east of the Digru river it is proved by the Engineer-in-Chief that the Trunk Road here is wholly unsuitable on professional grounds for a railway, the idea therefore of utilising the road should be abandoned.

9. In reference to paragraph 72 where the Engineer-in-Chief thinks the Dimapur valley route preferable to that along the Trunk Road, the Chief Commissioner, I am to say, considers Mr. Buyers' arguments are sound, and that the Dimapur valley route possesses superior claims.

10. The line of the Dhodur Alli—an old road above Golaghat, and referred to in paragraph 74—is no doubt the best that is obtainable not only on account of its proximity to many of the most flourishing tea gardens in Assam, but because it crosses the rivers at much narrower and more favorable crossings. But the Chief Commissioner objects to the Dhodur Alli itself being appropriated for the railway.

11. In reference to paragraph 79 where the Engineer-in-Chief thinks it desirable to have two parties engaged in the hills during the next season, I am to say that on reference to the Deputy Commissioner's report on North Cachar it is observed that 80 coolies were employed last year by the survey party, a very moderate number, but the District Officer could only supply these by a ten days' rotation, that is it took 240 men a month or 1,200 men in five months to supply this number, a larger period of service would have made them discontented. These facts, I am to say, are brought forward to show the difficulties in supplying labor. Mr. Elliott is most anxious to help the survey in every way, but the population of North Cachar is very scanty, and if double the number of coolies employed last year will be wanted next season it will be a severe tax upon them.

12. In conclusion I am to express the Chief Commissioner's satisfaction at the amount of work done during the past working season, and at the enlarged evidence that the line can be made at or below the original estimate.

ASSAM RAILWAY SURVEYS.

Report on Survey Operations during the season 1883-84.

No. 1527, dated 31st July 1884.

From—The Engineer-in-Chief, Assam Railway Surveys,

To—The Secy. to the Chief Commissioner, Assam, Public Works Department.

I have the honor to forward estimates and plans, as detailed in accompanying list, representing the results of the work accomplished since November 1883, in connection with the Assam Railway Surveys. Explanatory notes are attached to each estimate.

2. *Four divisions formed.*—In expectation of an adequate staff being forthcoming four survey divisions were formed, but when the parties proceeded to take the field it was only found possible to make up two divisions to any thing like a satisfactory strength, and the two which received the preference, as being the most remote and difficult to reach, were the North Cachar Hills and the Lumding Dimapur Divisions.

3. *Distribution.*—Though the Government of India letter No. 981[illegible], dated 2nd November 1883, containing instructions for the season's operations did not reach me until after the staff had been located on their several sections, I had learnt, during my visit to Simla in September, what the nature of those instructions would probably be, and I was thus enabled to make a distribution which proved to be in accordance with what was desired. One party was sent to the North Cachar Hills, two to the Dimapur valley, and the fourth to the branch from the Lumding river towards Gauhati.

4. *Work not generally started until middle of December.*—The various parties left Shillong about the middle of November, some quite unavoidable delay having been incurred in recruiting khalasees, but what with the long march, and detention on the road owing to bad weather, and for the purpose of enlisting jungle cutters, it was the middle of December before three of the parties reached the scene of work and were able to commence operations.

5. *Arrangement for supplies and coolies in the North Cachar Hills made by the Deputy Commissioner and the Sub-Divisional Officer.*—To meet the wants of the party in the North Cachar Hills, Mr. Knox Wight, Deputy Commissioner of Cachar, and Mr. Soppitt, the Sub-Divisional Officer, had collected large supplies of food at Gunjong, the sub-divisional head-quarter's station; a considerable proportion of these were carried up all the way from Silchar. They had also made all arrangements for the coolies required for jungle-cutting. The Executive Engineer, in charge of the hill section, was thereby relieved of much trouble and the assistance rendered by the above officers greatly facilitated his work.

6. *Difficulties in the Dimapur valley on account of coolies deserting.*—For the work in the Dimapur valley a large number of coolies were enlisted in the Kamrup district, but these proved a most unsatisfactory lot, and within a few weeks the bulk of them had deserted. Fortunately the Deputy Commissioner of the Naga Hills was able, from the first to furnish 40 Mekir coolies for the division between the Lumding river and Dimapur, and these did very good work, but on the lower division between Dimapur and Golaghat, where the Executive Engineer was dependent on the Kamrup coolies work, for sometime, came almost to a stand, in consequence of the desertion of the men, and he was only relieved of great anxiety when he succeeded in collecting some Mekirs from the adjacent hills. So far as our experience goes only hill coolies are of any use in heavy jungle.

Food supplied by the Commissariat Department.—The food supply of the men working in the Dimapur valley would have been a matter of difficulty, and would have taken a considerable time to arrange, had it not been for the kindness of Colonel Rowband, the Commissariat Officer at Shillong, in arranging for permission to draw all that was wanted from the Commissariat godown at Dimapur.

7. *No difficulties on the Gauhati branch as regards coolies or supplies.*—On the Gauhati branch there were no special difficulties either as regards coolies or supplies, thanks in a great measure to the assistance of Mr. Primrose, Officiating Deputy Commissioner of Nowgong.

8. *Special difficulties in the way of survey.*—From what has been written above, some of the difficulties in the way of the survey will have been perceived: to these must be added the rough nature of the country and the heavy jungle in parts, the unsettled weather and the unhealthy climate. Progress, therefore, is necessarily slow when compared with what is attainable in more favorable districts, and is obtained at the expense, possibly, of more real hard work, as it certainly is of infinitely greater discomfort and risk. The work of the season may be divided into two main heads (1) Divisional Surveys; (2) Personal Examination of the country apart from these.

DIVISIONAL SURVEYS.

No. I.—Division, North Cachar Hills.

9. *Staff employed.*—The staff engaged on this division consisted of the following officers:—

Mr. E. J. Moore, Executive Engineer.
" H. T. Gwyther, Assistant Engineer.
" J. A. Wallace, " "
" B. A. Maine, Sub-Engineer.

10. *Work started from the watershed between the Mahur and Mupa rivers.*—Work was commenced in the middle of December at the gap in the watershed between the Mahur and Mupa rivers, noted in paragraph 5 of my report on the exploration of the North Cachar Hills during the season 1882-83, and was thence carried northwards into the Mupa valley. I accompanied Mr. Moore from Shillong in order to put him on the right track which he would otherwise probably have had much difficulty in striking.

Reasons for doing this.—My object in starting work from this point was to get an estimate for the section through the Mupa valley which had appeared to me to be on the whole by far the most difficult piece of ground on the proposed line in the hills out of the Jatinga valley.

For some reasons I should have preferred starting work on three divisions from the common point of junction near the Lumding river, but there were practical difficulties in the way of collecting supplies and coolies there, which would have delayed the work, and the season's operations in the hills might have been confined to the section of the country along the Langladisa, in which there are evidently no very great engineering difficulties.

11. *Executive Engineer's instructions.*—Mr. Moore's instructions were, to make a careful survey of the Mupa valley between the point from which he started and the watershed at the head of the Dijakho, and then to lay down a line over this section on which to base an estimate before proceeding to extend the survey farther north, using no gradient more severe than 1 in 70 or curve of smaller radius than about 600 feet.

Tedious nature of the work.—The rough nature of the ground and the heavy jungle rendered this a more tedious operation even than I had expected and with the utmost exertions of himself and staff, it took three months to finish. Upwards of 13 miles of preliminary trial lines were run, and a large number of cross sections were taken necessitating more than 14 miles additional jungle cutting; the final line is about 6½ miles long and there were thus, by the time this was finished, about 35 miles of jungle cut.

12. *Best alignment in the Mupa valley approximately obtained but a slight alteration required in the run upto the Dijakho watershed.*—Mr. Moore considers that he has got very approximately the best line obtainable, but since extending the survey it has been found that it will be advisable to cut through the watershed at the head of the Dijakho at a somewhat lower level, and this will necessitate a slight alteration of the alignment between the crossing of the Boila and Chain 236 and the watershed by throwing it farther down the slope of the hills; this will improve the gradient and it is not anticipated that it will practically affect the estimate one way or the other.

13. *Prominent features of the country.*—It is not necessary to say very much regarding the nature of the ground and the character of the work on this short section beyond what the plan and longitudinal section show for themselves. The country is covered with dense jungle which of course adds greatly to the difficulty of survey; the hill sides have generally steep slopes terminating in places in perpendicular cliffs at the base of which the Mupa runs, and they are cut into deep ravines by numerous small water courses owing to a heavy rainfall working on friable rock and soil.

14. *Best ground along right bank of the Mupa and description of section.*—The preliminary surveys showed that the ground along the right bank of the Mupa is very much better than that along the left bank, and in order to make the most of it, Mr Moore has run his line sharp down to the river from the starting point, with the ruling gradient of 1 in 70, crossing it at chain 95.

Allowing a short piece of level over the bridge, the gradient of 1 in 70 is prolonged for about three-fourths of a mile, and then the line rises and falls, as the ground is most favorable, until the Boila river is reached at chain 236, after which there is a steady ascent of 1 in 70 up to the Dijakho watershed; but as has been already noticed this gradient will be somewhat improved by piercing the watershed at a lower level.

15. *Curves.*—Curves of 573 feet radius (10°) have with one solitary exception been employed; flatter curves could only be introduced at considerable extra cost, and though some

saving could be effected by the introduction of sharper ones it would not probably be so great as to render any such change, which would always operate detrimentally against the working of the line, at all desirable.

I may, however, note that when making the preliminary estimate I fully contemplated the employment of curves of 400 feet radius.

16. *Heaviest work encountered in running up to the Dijakho watershed.*—It will be seen that by far the heaviest work is concentrated in about one mile of the ascent to the Dijakho watershed: here 4 tunnels aggregating 530 lineal yards have been estimated through four spurs.

It may be found advisable to tunnel through the two high spurs near the Mupa, but these have been taken as open cuttings throughout in the estimate.

17. *Mupa and Boila viaducts.*—Two considerable streams the Mupa and Boila are crossed and their ravines are estimated to be spanned by viaducts, in each case, of one central 100 feet with side 40 feet girders, supported on wrought iron cylinders of the pattern given in Indian State Railways Type Drawings E.P. No. 2, filled with portland cement concrete. Trestles formed of these cylinders will not probably be cheaper than ordinary brickwork piers, but they can be more rapidly erected, with less skilled labor, and are preferable in a country subject to violent earthquakes; besides all means by which the use of lime can be economised are to be studied for the carriage of this will be difficult. The question of water way has not had to be considered in these two instances for it is most economical to bridge the entire ravine in both.

18. *Extension of survey to the Langting river.*—After finishing this section Mr. Moore was not able to accomplish more in the season than to examine the country and run trial lines as far as the Langting river, but, from these and cross sections taken in connection with them, a line has been laid down on the plan, and, on the section which this gives, an estimate has been framed which it is believed may be accepted as very approximately accurate.

19. *Country becomes easier on extension.*—It will be seen that after crossing the Dijakho watershed, the work becomes very much lighter, as the contours of the ridges and spurs are more rounded and the slopes comparatively gentle and less fissured.

20. *Obligatory points and gradients.*—There are apparently three obligatory points on this section, *viz.*, at chains 495, 519, and 630 where the line is carried through depressions in spurs thrown out from the main ridge.

Gradients of 1 in 70, with intermediate pieces of level, have been employed, and they suit the line laid down on the plan best, but as the final line will doubtless not follow exactly the same traces, it must not be assumed that the same gradient will rigidly adhered too. Apparently, however, it will be necessary to run down with the gradient of 1 in 70 for about two miles from the Dijakho watershed.

21. *Station sites.*—There is very fair ground for a station about chain 560, the next station south would be in the Mahur valley, about 12 miles distant, and there is no good site between. There may be some difficulty about water here, for the Dijakho runs dry, but probably it may be obtained in the usual way by sinking a well, should this fail it may be pumped up from the Langting. It would give too long a run to place the station by the Langting, and besides this would throw it on to a high bank; but it may be remarked that water is abundant in the Mahur valley, and there will probably be no difficulty at the next station site on the north side, so that it will not be absolutely necessary to make this an engine watering station.

22. *Line taken along western slope of ridge in preference to eastern.*—This section of line runs along the western slopes of a ridge separating the small streams Dijakho and Langdreng both of which flow into the Langting. Mr. Molesworth in his note, dated the 27th March 1884, of his journey across the North Cachar Hills, has remarked that I had suggested the examination of an alternative line, along the eastern side of this ridge, but to gain this it has been found that much heavier work would be entailed for some distance after passing through the Dijakho watershed, and a uniform gradient of about 1 in 70, after it was reached, into the Langting valley.

23. *Comparison of final ad preliminary estimates.*—The estimates, which have been prepared, give the means of testing the accuracy of my preliminary estimate on two very different descriptions of ground.

In paragraph 5 of Report on the exploration of the North Cachar Hills, it will be seen that I took the Mupa valley section as 5½ miles long and estimated the cost at Rs. 1,80,000 per mile. This section is found to be 6·648 miles long and the estimate comes to Rs. 1,80,552 per mile, a very close approximation as regards the mileage rate, but longer by upwards of one mile. This is owing to the difficulty I had in fixing on the map, the exact point where the watershed between the Mahur and Mupa was crossed. The piece from the Dijakho watershed to the Langting is 5·55 miles and the estimate amounts to Rs. 99,109 per mile: this is a portion of the section extending from the Dijakho to the Gireso watershed, of which I estimated the length to be 18 miles and the cost Rs. 1,00,000 per mile, and I allowed for this portion 6 miles scaled from map, *plus* ¼ for curves equal to 7½ miles, so that the true distance and estimate are both within the mark; the mileage rate is very close.

24. *Length of section remaining to be surveyed between the Langting and Lumding junction.*—There probably remain yet nearly 30 miles to connect the survey with the junction point near the Lumding, for the course of the Lumding is quite incorrectly shewn on the map, and the junction of the Langladisa should be further north, so that the valley of the Langladisa is actually considerably longer than would appear; it is, however, an easy valley, and therefore though, being included in the hill section, the length of that will be slightly increased thereby, the estimate will not be affected, for that was taken in this valley at the same mileage rate as the section in the plains, and the mileage of the latter will be correspondingly decreased.

25. *Credit due to staff.*—I could not have had a better man than Mr. Moore for the work in the hills, and his staff have seconded his labors with energy and zeal.

II.—Lumding-Dimapur Division.

26. *Staff employed on the Lumding-Dimapur Division.*—The following staff has been engaged on the survey of this section:—

Mr. T. H. Tyndall, Temporary Executive Engineer.
„ C. J. S. Baker, Assistant Engineer.
„ R. Campbell, „ „

27. *Reasons for fixing the starting point about seven miles west of Dimapur.*—This party started work from the neighbourhood of Dimapur, while another party started at the same time and from the same point to work north towards Golaghat. The point selected by me, on the map, for I had not seen the country, was about seven miles west of Dimapur on the watershed between the head of the Deolao, a tributary of the Jamuna, and a small stream running into the Dhansiri, and the reason for selecting it was that it lay conveniently on a line carried along the apparent watershed between the Dhansiri aud the Jamuna which appeared to offer the best alignment.

28. *This point found unsuitable and therefore abandoned for one nearer Dimapur.*—Mr. Tyndall spent a month in running trial lines from this point, but found, in every direction he tried, the ground so broken, that he moved much closer to Dimapur where the ground appeared to him more favorable. North of the original starting point the ground was much easier, but this change necessitated the abandonment of some work there.

29. *Two traverses run and plans and estimates given for both.*—One traverse it will be seen follows very closely the left bank of the Dhansiri for 19 miles when it turns to the right and terminates on the summit of the ridge forming the watershed between the Dhansiri and the head of the Langpher: another, which has been carried as far as the valley of the Diphu river, a tributary of the Jamuna, leads off from mile 12 on the first, and would be a more direct line for the Lumding junction. Plans, sections and estimates are forwarded for both. The estimates, however, for each are based, not upon the exact traverse, but upon an alignment, laid down upon the plans as nearly as possible coincident with it; and further anticipated improvements in the alignment are shewn by blue lines, the effects of which will be to reduce the distance.

30. *Reasons for failure in completing the survey.*—I regret very much that the party were not able to carry the survey through to the Lumding. The country is no doubt a peculiarly difficult one to survey: the view which the valley presents when looked down upon from the high ranges which surround it is in a measure deceptive, and particularly is this the case with regard to the distant central portions; shrouded in dense forest, its minute features cannot be detected, and the whole appears a slightly undulating plain; no human tracks exist, and to become acquainted with it almost every step must be tediously cut, while even then all knowledge is confined to the narrow trace; owing to these causes difficulties are unexpectedly encountered which necessitate the abandonment of much work. It would be the best plan I believe in a country of this description, utterly unknown, to cut a trace through, in the first place regardless of minor difficulties in the features of the ground, and to make use of this at a base for farther operations; at any rate such appears to me to be the lesson taught by the past season's work.

31. *Farther examination of the country between the Lumding and Dhansiri.*—A certain amount of farther acquaintance has, however, been gained of the country lying between the points up to which the traverses have been carried and the Lumding junction. Mr. Campbell, Assistant Engineer, came across from the Dhansiri to the Lumding, where he met me in April; he descended from the ridge on which the traverse ends near mile 24½, and found himself almost at once in what proved, to his surprise, to be the bed of the Langpher, for this river is not shewn within many miles of this; in fact the map right round from Dimapur to the Dyung is very misleading. Starting from zero of the Gauhati branch survey, we examined the country for some miles east in the direction of the Dhansiri and I found it to be very much the same in its features, as far as we went, as the first few miles of that branch, the section of which may be referred to, in order to get an idea of what a line taken fairly straight through it would be, but which I should think is susceptible of considerable improvement by winding about, as the low ridges, which lie between the Lumding and the Langpher are not continuous, but broken by frequent depressions. The jungle is not quite so dense as it is nearer Dimapur.

32. *Site for junction station.*—About two miles east of zero there is a very good site for a junction station on an open level plateau upwards of one mile long and half a mile broad with good water convenient.

33. *Best line may be got in the direction of the Diphu traverse.*—Mr. Campbell unfortunately fell ill, but I advanced to within ten miles, judging by the map, of the point which the Diphu traverse reached, and this may be taken as the interval as yet unexplored and regarding which nothing is clearly known. I am not at all sure that the best line will not be got in the direction of the Diphu traverse, it ought to be shorter than one taken so far up the Dhansiri as the other traverse has gone, and I saw nothing to favor the idea that an easier line would be got between the end of this and the Lumding junction.

I found a very easy small valley running up from the Langpher which led me on to a watershed which I believe to be the head of the Diphu, but the season was too far advanced for me to carry the exploration farther in this direction, and I was anxious also to see the country above Nowgong.

34. *Estimates.*—It will be seen that the estimate for the 24·56 miles of what, to distinguish it, may be called the Dhansiri traverse, amounts to Rs. 66,564 per mile, while that for 21·87 miles of the Diphu line is Rs. 68,685 per mile. The distance from the end of either traverse to the junction station site near the Lumding is apparently the same, and may be taken at 22 miles. As a preliminary estimate last year, I put down Rs. 80,000 per mile for all the work in the Brahmaputra valley and I have little doubt that this mean rate will amply cover the cost of the section from the Lumding to Dimapur, in fact to work up to it a rate of Rs. 95,000 per mile is available for these 22 miles.

35. *Another season necessary to complete survey.*—It will be necessary to devote another season to the survey of this section, and I can only hope that the line then obtained will be so satisfactory that farther elaboration will be considered unnecessary.

36. *The whole valley under forest but well adapted for cultivation.*—The whole country along the valley between the Lumding and Dimapur is under jungle and there is not a single clearance for cultivation. However, while exploring in April, I met men from the hills on the north prospecting for village sites and on the Lumding, below the Langladisa opposite the Gauhati branch, I found two villages established where last year, there had been none and was informed by one of the men that they had been driven from the south side of the Dyung by tigers, and that they had come there as the soil was good, especially for cotton, and they were no longer so afraid of the Nagas.

I am told that many years ago there was a police outpost on the Langpher, and some villages, all of which were cut up by Nagas. Not a trace of these now exists unless the castor oil plants growing in places denote the sites of former cultivation. There is no apparent reason why cultivation should not extend along the whole of the valley, and it is probable that in the course of time with a railway and security for life and property it will do so.

There are large areas of level ground admirably adapted for tea. A planter with some knowledge of the Dimapur valley told me that the soil was "magnificient," and that with a railway, land will be rapidly taken up for gardens.

37. *No important engineering work so far as the survey extends.*—There is no work of any engineering importance along the Dhansiri traverse. At a few points spurs come down to the river, and at two opposite miles 6 and 19, to avoid these, the traverse has been carried across bends of the river as shown on the plan. I think, however, if the final line is carried along this way that it will be better, and probably cheaper, to cut through these spurs, even at the expense of cuttings 50 or 60 feet deep, than to divert the Dhansiri as shewn, and bank across the old bed.

38. *No large bridges.*—There are no bridges of any importance: the largest consists of only two spans of 40 feet; in fact there is no gathering ground to permit the formation of any large stream, the watershed between the Dhansiri and Diphu being at no great distance.

39. *Flood level in the Dhansiri.*—No flood levels of the Dhansiri could be obtained above Dimapur owing to the entire want of population; the levels shewn have been arrived at by taking the highest recorded flood level at Dimapur, and running this up proportionally to the inclination of the bed of the river; the heights are probably in excess and if so, err on the safe side.

40. *The Diphu traverse.*—The Diphu line after leaving the Dhansiri at the 12th mile, shows a somewhat heavier section and a tortuous alignment, but any line across from the Dhansiri to the Lumding must have a large number of curves to avoid heavy earthwork.

So far as it goes the work cannot be called at all heavy except in the last two miles, but Mr. Tyndall says he was turned by some very rough country in front of him and he therefore went back and carried his survey farther along the Dhansiri. If the distance between the ends of the two traverses and the Lumding junction be equal and the costs the same, the Diphu route would be both shorter and cheaper, as regards total cost, than the Dhansiri.

41. *Hardships experienced.*—This party experienced much bad weather, and worked under greater discomfort than any other; the absence of bamboos and grass in the forest prevented their getting good huts built, and this no doubt partly affected the health of the men. It is I am persuaded through no want of energy that they failed to accomplish the task before them.

III.—Dimapur-Golaghat Division.

42. *Work started on 2nd and 3rd Division simultaneously from a common point.*—It has already been noticed that work was started on this division simultaneously with that on the 2nd division from a common point.

43. *Work accomplished.*—Mr. Clift, the Executive Engineer, had only one Assistant Engineer, Mr. Lilley, to help him, and the difficulties he encountered at the outset, owing to the desertion of his coolies, have already been noticed: it is greatly to Mr. Clift's credit, that, notwithstanding this, he carried a survey through to Golaghat and an alternative, offering a somewhat shorter route into Upper Assam, to near the village of Jamugurigaon, on the right bank of the Daiang.

44. *Remarks on country between the Dhansiri and Daiang river with reference to Mr. Molesworth's proposal to carry the line along it.*—Mr. Molesworth, Consulting Engineer to the Government of India for State Railways, in his note dated the 24th October 1883, on my report on the exploration of the North Cachar Hills, suggested the examination of the country between the Dhansiri and the Daiang rivers on a line which he roughly indicated on the map. This note did not reach me until after work had been commenced, but I may remark that from a simple study of the map, I had in the first place sketched in identically the same line, crossing the Dhansiri at the same point, previous to preparing my report in order to arrive at the through distance to Dibrugarh, but on making enquiries in Shillong, I was informed that the country between the two rivers, was low, flooded during the rains, full of bils and quite impracticable; for these reasons I laid the line down along the left bank of the Dhansiri; but for these objections the line between the two rivers is very obviously the one to take.

After receipt of Mr. Molesworth's note I made further enquiries and all that I was able to learn until I personally visited the Dimapur valley in the end of January, corroborated the above statements; then, when I was at Barpothar, two natives, one of them the mauzadar of the place, the other a shikari, who professed to have shot through the jungle, told me that the bils were confined to the sides of the two rivers and that it was possible to get ground the whole way along the centre above the influence of floods. I have never met any European who has been through this tract of country and as I had to hurry back to meet Mr. Molesworth I had not time to examine it myself. Mr. Clift tells me that the Executive Engineer of the Naga Hills states that it is impracticable. I desired Mr. Clift if possible to cut a trace through, but he could not muster sufficient coolies to undertake the work without abandoning the Golaghat line, along the left bank of the Dhansiri, which was already advanced and which it would have been suicidal to abandon on the meagre and most unsatisfactory reports obtained. It was better to get one line through to Golaghat, which we knew to be practicable, than to run the risk of having nothing to shew, should the general opinion regarding the other route prove to be correct.

45. *Nature of country.*—The length of the line from opposite Dimapur to Golaghat is 45 miles, or nine miles less than the road mileage between opposite points. The valley to within six miles of Golaghat, with the exception of a patch of cultivation at Barpothar, is covered with heavy forest; hence many of the difficulties have been encountered here which have already been enumerated on the 2nd division and it is needless to recapitulate.

The ground is less broken generally than it is south of Dimapur, or rather the belt of level land extends much farther back from the bank of the Dhansiri, but on the other hand the drainage crossed is heavier, in places however low spurs, thrown out from the hills to the west, come down to the river and cannot be avoided. Buried in the jungle are occasional bils, and a considerable amount of work has been lost to get a line avoiding these as much as possible.

The propinquity of a road, with rest houses, has facilitated movements and reduced discomforts and has therefore been a help to the work.

46. *Estimate.*—The estimate amounts to Rs. 65,276 per mile, and includes the cost of a bridge across the Dhansiri at Golaghat of 6 spans of 100 feet supported on cast iron screw piles 2½ feet diameter, the roadway being carried on the bottom boom to allow greater headway with a lower formation, reducing thereby the height of bridge and bank, and the length of gradient of 1 in 150 towards the Golaghat station which is especially desirable.

There is no other bridging of any magnitude, and no special difficulties are anticipated in the foundations; the beds of the streams show either stiff clay or gravel.

47. *Estimate under the preliminary one.*—The estimate is very much less than that of Rs. 80,000 per mile which I took in my preliminary calculation, but, as stated in my report, that was based on Colonel Lindsay's estimate for a line between Gauhati and Goalpara, and not on any personal acquaintance with the country.

48. *Questions affecting rates.*—High rates will have to be given to attract labor into the Dimapur valley, which has an evil reputation for unhealthiness, and to allow for the shortness of the working season. The great bulk of the labor will probably have to be imported from Bengal. These facts have been kept in view in fixing the rates for such items as earthwork, brickwork, and ballast; but the high cost under these heads is partly counterbalanced by the present low price of iron, which affects bridging and permanent-way, and the low figure taken for sleepers which can be obtained in any quantities in the forest through which the line passes.

I must also note that a higher rate would have had to be fixed for brickwork had not a valuable outcrop of nummulitic limestone, sufficient at any rate for all our work in the Dimapur valley, been found on the Doegrung river, near the village of Murphulani, and another smaller outcrop on the Nambor nearer the line; the sites are marked on the index map. It is very probable that a careful examination of the country in this direction may lead to farther discoveries.

The high price of brickwork in Assam is in a great measure due to the absence of limestone, the bulk of the lime used being brought round from Sylhet, and if any large beds are discovered, they would prove very valuable not only to the railway but to the province generally.

Mr. LaTouche of the Geological Survey hopes to be able to spend some time in October or November in examining the ground in this neighbourhood. Small outcrops of coal have been found close to the limestone.

49. *Alternative line by Jamugurigaon.*—The alternative line which crosses the Dhansiri near Barpothar and the Daiang near Jamugurigaon is estimated to cost Rs. 65,776 per mile or Rs. 500 per mile more than the line *viâ* Golaghat, but this is because the cost of the large bridges over these two rivers is distributed over a shorter mileage.

A line taken across here would probably save three miles in the through distance and about two lakhs of rupees, but for various reasons I am not inclined to recommend its adoption, though, without seeing the country above Golaghat, it would be rash to give a decided opinion.

Golaghat is not a place of any great importance at present, but considerable sized boats can get up the Dhansiri so far, during the greater part of the year, whereas they cannot get up as far as Barpothar or Jamugurigaon, and with a railway passing through it, a large trade may in course of time be developed between it and the country lying to the north. A branch line may also in time be desired to the bank of the Brahmaputra and this would be shorter from the Golaghat route, while if limestone should be found in any large quantities near Murphulani, there would be another argument in favor of its adoption.

IV.—Lumding-Roha Division.

50. *Forms portion of Gauhati branch.*—This is a portion of the proposed branch line to Gauhati which would take off from the main line at a point between the Lumding and Langpher rivers. A good site for the junction station has already been indicated about two miles east of zero of this branch survey, but over at least the greater part of these two miles it is probable that the main and the branch lines may best follow a common alignment.

51. *Chainage on plans does not agree with chainage on ground.*—The chainage on the plans and sections is numbered from the Lumding, but this does not follow the order in which the line was surveyed and pegged out.

52. *Only one Assistant Engineer available to start the survey.*—When work was started, only one officer, Mr. Denne, Assistant Engineer, was available, and he commenced operations in the end of November from a point on the Assam Trunk Road about two miles on the Gauhati side of Roha; this is the terminal point on the plans and sections. Mr. Denne worked singlehanded until the end of January when Mr. W. H. Sherman, Executive Engineer, arrived and took over the Division, but by this time the survey had reached the Jamuna river.

53. *Reasons for discrepancy in chainage.*—Mr. Molesworth and I in the middle of February found the survey carried a short way south of the Jari Jan. Up to this point the country is fairly open, what jungle is met with not being very heavy, and as far as the Jamuna there is a considerable population along the banks of the Kopili villages, for some miles, being practically continuous. Towards the Lumding the jungle is heavier, and as it becomes unhealthy late in the season, and the previous year in marching through it I had experienced considerable difficulty with regard to drinking water, I advised Mr. Sherman to move as soon as possible to the Lumding and work back; this he did and in consequence the chainage of the plans does not agree with the chainage marked on the ground.

54. *Only a trial traverse run at Lumding end.*—Mr. Sherman wisely contented himself with running some kind of a line from the Lumding to connect with the survey already done, and time did not permit him to elaborate the work. The estimates, therefore, are for a line which can be very considerably improved at the Lumding end.

55. *Estimates.*—The total length of line from the Lumding to the Trunk Road near Roha is 56·715 miles, the estimate for which amounts to Rs. 40,06,354, which gives a rate of Rs. 70,640 per mile.

Mr. Sherman has also given me estimates for the above divided into two sections; the first extending from the Lumding to the Lanka Jan, 13·10 miles, is estimated to cost Rs. 1,09,404 per mile, but without doubt this can be greatly reduced: the second comprises the remainder of the division, 43·615 miles, the estimate for which gives a mean rate of Rs. 58,997 per mile. The alignment of this last section may possibly be somewhat improved, but with the effect of rather reducing the through distance and total cost than the mileage rate, which is already, considering the high rates of labour, very low, for reasons which will appear.

56. *Description of line.*—Commencing from zero, about a mile north of where the Langladisa joins the Lumding, the line runs for about 4½ miles between the Lumding and Langpher rivers. The distance between these two rivers at zero scales 6 miles, whereas the actual distance is only about two miles: this corroborates what I remarked, in the report on the exploration of the North Cachar Hills, regarding there being some mistake in the position of the Lumding here.

The ground is very undulating, and in the fourth mile a high ridge is cut through. A high and costly bridge over the Langpher is necessitated by the nearness of the crossing to the Dyung the floods of which must affect the tributary for a considerable distance up, owing to the small fall in its bed. I think a great saving can be effected by crossing the Langpher higher up; this would remove the bridge further away from the influence of the Dyung floods, and from my examination of the country in April last, it seemed to me, that the crossing might advantageously be placed so far up as to out flank the high ridge. Between the Langpher and mile 7 the work is light, but from that, onward to the Lanka Jan, near mile 13, the traverse crosses a succession of ridges and ravines at right angles. Immediately to the west of mile 8 there is a large bil, which extends almost to the Dyung; if the line is kept to the east of this bil, as this traverse is there seemed to me no hope of materially reducing the work here, except possibly by extending the line by a circuit more to the east, but as this would apparently only lengthen the line, without reducing the total cost, it is objectionable. It is however very probable that a better line may be got by passing west of the bil.

Between miles 10 and 13 the banks and cuttings are very heavy, but I found that by throwing the line a very little over to the west, the high ridges might be almost entirely avoided and the quantity of earth-work reduced to quite a moderate amount; the line has been taken straight and unfortunately has cut the ridges at their highest points. Up to the Lankha Jan there is uniform forest, but north of this the country opens out, and exploration becomes much easier, while the ground itself is less broken. There is a considerable amount of drainage, flowing from the east and north into the Kopili, crossed between the Lanka Jan and the Jogi (Jori) Jan, which is near mile 28: the line between these streams skirts for some distance the edge of low lying ground, much of which is under rice cultivation about the group of villages bordering the Lalung Bil, to serve which it is proposed to provide a station in the 17th mile.

It will be observed that from mile 28 to the end, only three large bridges are provided and not a single small one, and an inspection of the map is alone almost sufficient to explain the reason; indeed, the three streams which it is proposed to bridge might be blocked were it not for interfering with the boat traffic. It will be seen that the alignment runs between two systems of drainage, connected however by the above three main channels; that the first of these, the Jori Jan, connects with the second, the Jamuna, and that again, through the Titulisar and the Haria, with the Kallang, a loop of the Brahmaputra. The Jori Jan is merely an escape channel of the Kopili, which carries off some of its water to the Kallang as indicated, and there is no doubt that all the water of the Jamuna might be sent down the Titulisar into the Kallang and not allowed to cross the line into the Kopili, to be again crossed between Roha and Gauhati. The third, the Titamari, again is only a short connecting channel between the Kallang and the Kopili, in which the current flows in one direction or the other according as to which of the two rivers happens to be in highest flood.

The highest ground is generally along the edge of the Kopili: when the water spills over the right bank, it finds its way at will by a multitude of depressions into the Kallang but until it tops the bank, the above three channels offer the only means of escape for the Kopili flood in that direction. The railway embankment will confine the flood when it reaches such a height, and leave it only these three means of escape; one of the effects will be to increase the current from the Kopili through the bridges, but it is believed that ample waterway has been allowed to meet this contingency.

The Kopili channel is evidently not large enough to carry off all the water that comes down, and another effect of interfering with the overflow will probably be to increase its capacity, by the action of the water itself in eroding the banks and straightening the course. The flood level marked on the section is the highest of which any record has been obtained; this flood is stated to have occurred 30 or 40 years ago (it may have been in the same year as the great flood in Sylhet and Cachar) and formation has been kept in no place less than 2½ feet above it. The line will intersect a few petty basins, the drainages of which fall into the Kopili under ordinary circumstances, but as their watersheds are said to be with one exception, and it can be diverted below the flood level, no special provision is required to pass the water across the line.

It may be advisable to keep the line at two or three points farther away from the river where this has a set towards it and to prevent further erosion of the river bank by spurs or groynes; I think also the line may be somewhat straightened over the last few miles.

57. I have suggested to the Executive Engineer certain improvements, which it appeared to me, might be made in the alignment of the first thirteen miles, and on these suggestions and his own knowledge of the country farther north, he has marked on the index map in blue an alternative for future investigation, extending from zero to mile 30 near the village of Kumrakata. The effect of this alteration, it is believed, will be to reduce the through distance by 1½ miles and the total mean mileage rate to roughly Rs. 68,000.

The whole of the country, however, between zero and the village of Kumrakata requires further examination, and I have added a dotted blue line shewing a route which I think also should be examined, though native reports regarding the jungle south of the Lalang Bil are not favorable.

58. Mr. Molesworth in his note, dated the 27th March 1884, stated that the cost of the branch from the Lumding to Gauhati should not, in his estimation, come to more than Rs. 66,000 or 68,000 per mile; the estimates accompanying give for the section of 56·715 miles, actually laid out, a rate of Rs. 70,640 per mile as already stated; improvements which are no doubt possible in the alignment will probably bring this down to Rs. 68,000 per mile, but I may mention that I believe that Mr. Molesworth, in making his estimate, allowed Rs. 3,300 per mile less than I have done on the four heads, stations, staff quarters, station machinery and plant, so that if his figures were taken, even on the present alignment his estimate would suffice for this section, and I believe it will be sufficient for the remaining portion to Gauhati with my figures under these heads. Taking into consideration more specially, the high price of labor, I am inclined to think that these figures are not too high, but with the improvements in the alignment which I have indicated, there can, I think, be no doubt, that the branch line can be made for the rate, Mr. Molesworth has stated.

59. *Waterways.*—The largest streams have in the above description been specified. On the present alignment the bridge over the Langpher is by far the largest on the division. It consists of 6 spans of 100 feet, but it has been remarked how it can probably be very materially reduced: three hundred lineal feet waterway would be ample to take all the water of the Langpher itself without doubt, but at the point where the traverse crosses a high bridge is necessary and there is no economy in restricting the waterway for it would throw the abutments into very low ground. The flood level shown on the section is due to the Dyung floods, and has been obtained by working up from the highest flood mark pointed out at the point where the Dyung is joined by the united streams of the Lumding and Langpher about two miles below the line crossing, for owing to the want of population on the Langpher there is no means of obtaining it directly. Both this and the Lumsakhong 5 spans of 40 feet, are properly speaking ravine viaducts.

For the Lanka Jan, Jori Jan and Jamuna, spans of four 40 feet, three 40 feet, and four 60 feet respectively, have been allowed. The Jamuna is provided with a pier abutment at the north end to permit of the bridge being extended if the waterway is found insufficient.

For the Titamari a central span of 100 feet is provided to pass boat traffic and two side spans of 40 feet to take the spill water of the Kopili or Kallang and a road under the west span.

The estimates are for brickwork in piers and abutments, but an alternative estimate has been made for screwpiles in some of the bridges; these would appear to be somewhat more expensive, but if it is found that the use of them will expedite the work, they may be employed without materially affecting the estimate.

In the Langpher bridge, however, it will, I think, be best to adhere to brick piers on account of the danger from drift timber and the probable nature of the foundations.

On the first thirteen miles there are a number of treble 6 feet arched culverts in high banks, which on account of their length of barrel are costly and have therefore been included under "Major bridges." It has not been thought advisable to try and reduce the cost of these by placing them on the slopes of the ravines, as these are steep and as far as can be judged of loose soil, but it is possible that rock may be found closely under lying the soil, and it may then be economical to have recourse to that expedient; it must however be remembered that it is believed the alignment is capable of considerable improvement here, and with this the height of bank, and consequently the length of barrel, would be considerably reduced, and the reason for such an expedient disappear. The Executive Engineer states that he has made a comparative estimate of the cost of a culvert placed on the slope, with a stepped masonry channel to carry the water down to the bottom of the ravine and that he finds it more expensive.

The bridge estimates, both on this and the other divisions, have been prepared from rough sketchs as I have not thought it necessary to incur the delay of making detailed drawings for this preliminary work.

No borings were taken in the beds of the streams, but judging from appearance in each case, it is believed that ample depths have been allowed.

60. *Stations.*—The estimates of this division only make a proportional allowance for the junction station, which is two miles east of zero. The first station is in mile 7, which will give nearly 9 miles run from the junction, but if the line is carried west of the bil referred to, this station will be on the bank of the Dyung and somewhat more favorably situated for picking up the traffic passing along that river. The other stations have been placed with due regard to distance, so as best to serve the country traversed. A station will be required just beyond the terminal point near the trunk road, and it will probably be advisable to give a goods siding from it to the bank of the Titamari to reduce the cost of the carriage of the considerable traffic which this station may expect to draw from the Kallang and the Kopili.

61. It will be seen that the severest gradient adopted on this section, as well as throughout the Dimapur valley, so far as the survey has extended, is 1 in 150 and I hope to be able

to keep to this, which was also the ruling gradient adhered to on the line between Comillah and Cachar, in the Assam valley. The intermediate hill section will, it is believed, require nothing more severe than about 1 in 70.

Local Resources and Labor.

62. The following remarks regarding local resources and labor apply to all the divisions generally. Sandstone is found along the line throughout the North Cachar Hills and also in the hills north of the Langpher, but so far as I have seen, it is generally of very inferior quality, and even were it otherwise the difficulty of procuring quarry men and stone dressers in any number and the high price of lime, would preclude the adoption of rubble masonry in the plains at least.

Brickwork has therefore been generally estimated for.

All the materials for making bricks are plentiful. Lime is however the great difficulty. I have already noticed that limestone has been found in the Dimapur valley, and if the outcrops have been fairly reported upon, they should yield at least enough lime for the work in the Dimapur valley itself. I have heard that limestone exists in a valley north of the Jamuna river, and if this is true, though I have nothing but a vague rumour to the effect at present to go upon, it would come in most useful for the Gauhati branch: otherwise we must hope that the Dimapur valley may be able to furnish it, but failing this we can apparently only look to Sylhet for our supplies both for the work on the branch line and in the North Cachar Hills.

With the Dimapur valley lime, it is probable that sand can be used, where this can be found of good quality, but with the fat Sylhet lime it is customary to use only surkhi, and that slightly underburnt, to render it somewhat hydraulic.

If limestone is found to exist in sufficient quantities in the Dimapur valley, it will be another argument in favor of making the section from Golaghat to the Lumding first as Mr. Molesworth has proposed.

63. The question of labor is also a very serious one for the supply is very scarce in Assam, and the bulk of it will have to be imported, and to introduce the large amount that will be required on heavy railway works, special arrangements will have to be made, necessitating probably the organization of a special recruiting agency.

How to supply food without fail in adequate quantities, and the least possible cost, to [illegible] construction of the central portion of [illegible] the head of the Jatinga to the head of the Langpher, which is farthest from the source of supply of labor, food, and lime should not be put in hand, until the rails have been carried up to the foot of the hills on each side with the exception perhaps of such work as tunnelling, which cannot be pushed beyond a certain point and which might seriously delay the through opening of the line. The estimated rates for the hill work are based on the assumption that this will be done.

64. Assam imports large quantities of rice and of other common articles of food, and the railway during construction will increase the demand; considering this and that very large quantities of railway material will have to be carried up the Brahmaputra, if work is pushed on simultaneously from both ends, and not piecemeal, by sections, from the Chittagong end, which of course would be a very slow way of carrying it out, and I believe would never be contemplated, it would be most satisfactory and economical to establish a small flotilla of steamers to carry every thing required for the line, railway material, food, and laborers. These steamers might return with coal for the Railway in Northern and Eastern Bengal.

The rates which the Steamer Companies at present charge for carriage of iron from Calcutta are exhorbitant. Major Williams informs me that he is paying Rs. [illegible] per maund for carriage of rails to [illegible] if that were made, at such a rate as one-third of [illegible] per rails, would only amount to 13½ annas. The River Companies would have vastly to reduce their rates before it would be as cheap to do the platelaying from Golaghat up the Dimapur valley, for instance, with material carried by them as by telescoping it out from Chittagong, but there are other considerations which would make it pay to do the platelaying from the Northern and at almost any cost.

65. *Remarks connected with the economical and expeditious construction of the line.*—The southern half of the North Cachar Hills Section would no doubt be done with labor, food and materials drawn through Cachar, but the northern half would be most expeditiously and economically carried out had it lines both to Golaghat and Gauhati to draw upon; the former would be invaluable if lime can be got from the Dimapur valley, but labor and food could be most cheaply drawn through the Gauhati branch. If it be a question of which should be preferred, then I should not hesitate to decide in favor of the line from Lumding to Golaghat

both on the grounds that it forms a section of the main line, and that it would be more useful to the province in facilitating greatly communication with the Naga Hills, for the Gauhati branch would be of little use, except towards the construction of the railway until connected with Cachar or extended into Upper Assam, and of course labor and food can be brought round by Golaghat.

It would much facilitate the movement of labor, materials and food in the Dimapur valley, and would besides give confidence to the laborers, if a temporary line were laid down, and with this view immediately, it is decided to start work; arrangements should be made to deliver as soon as possible about 100 miles of rails and fastening at Golaghat, the sleepers for which can be had on the spot.

A few miles of light portable railway can probably be most profitably employed, especially in the hills but such questions may be left for discussion until the survey is farther advanced.

COUNTRY BETWEEN GAUHATI AND THE DHANSIRI RIVER BY THE TRUNK ROAD.

66. *Gauhati Roha-Section.*—I have been over most of the ground between Gauhati and Roha by the Trunk Road twice, the first time being with Mr. Molesworth in February. As a result of these journeys I have marked on the accompanying index map approximately what I think will be found to be the best course for the line. A fairly easy passage can be got through the hills between Gauhati and the Digru river on the continuation of the valley for some distance up which an old road between Gauhati and Sonapur runs. Any heavy work will be confined, by the report of Mr. Denne, Assistant Engineer, who examined it, to a length of about 1½ miles, and nothing worse than a couple of deep, though not long, cuttings will be encountered.

The line on this section only crosses two large streams, *viz.*, the Digru and the Kopili; the Um Jam which is crossed by the Trunk Road being avoided by taking the railway across the Kopili below its confluence. East of this crossing the line would keep between the Kopili and the Kallang, and it may be found best to block all the minor drainage.

There can, I think, be no doubt that the estimate of Rs. 68,000 per mile will be sufficient.

67. *Trunk Road alignment objectionable.*—East of the Digru river the alignment of the Trunk Road has been advocated, but no one with any knowledge of the subject would be guilty of doing this. Of course the ground is that the road embankment is there ready. The road will always be useful in supplying a means of approach to the station. Apart from destroying its usefulness as a road by placing the rails upon it, such policy would be an extravagant one, and seriously increase rather than decrease the total cost of the line, for the road alignment is a very tortuous one, apparently adopted quite regardless of this particular and with a view to save earthwork, bridging not being considered. Even if adopted, it would require in many places, if not generally, to be raised, and in others to be widened, while when the sinuosities had been taken out and suitable curves adapted, probably not much more than half the original road would remain, and, after all, the result would be a longer line and a greater expenditure than there need have been.

As an example of the saving that may be effected in distance, and consequently in cost, I would point out, that when compared with the 16 miles east of Nonkhlao by road, the alignment I have marked is from 3 to 4 miles shorter, crosses only one large stream instead of two, and avoids a large amount of minor drainage.

68. *Reason for not being able to examine country above Golaghat.*—It had been my intention, after setting Mr. Moore to work in the North Cachar Hills, to march from Gauhati up the Trunk Road as far as Dibrugarh, and thence to return by the Dimapur valley and the Gauhati branch. I should thus have seen the whole country above Gauhati, that could come within the scope of my work, but the announcement of Mr. Molesworth's intention to pay a visit to the North Cachar Hills, forced me to alter my plans and left me with only sufficient time to pay a hurried visit to the Dimapur valley before joining him at Gauhati.

69. *Roha-Dhansiri Section.*—As I was particularly anxious to see the country along the Trunk Road between Nowgong and the Dhansiri river, I took it on my return from the Lumding in April, and I may at once state that I was so unfavorably impressed with the portion of it east of Joklabundha, that I am most thoroughly confirmed in the opinion, which I formed on other grounds and expressed in my report on the exploration of the North Cachar Hills, that it would be a mistake to take the railway by this route.

Mr. Ward in the note which he wrote on that report, when Officiating as Chief Commissioner, used as an argument against the line from the Lumding to Roha that it would pass through a swampy country. I therefore did not expect that the line which he advocated along the Trunk Road would be open to this objection at least, and that to a very much greater extent. I doubt very much if the country between Roha and the Lumding is any worse than that between Roha and Gauhati as regards the ratio which marsh or bil land bears to arable; whereas from Joklabundha to the Dhansiri the vast bulk of the narrow strip of land between the hills and the Brahmaputra is a swamp, and as far as I could learn, it is too low for anything to be grown upon it.

70. *Approximate best alignment marked on map.*—In case, however, this route should be eventually selected for a railway, I have drawn on the map the line which I think will approximately be found the best to take.

71. *Description of country between Roha and Dhansiri river.*—Of course the trunk road would not be followed between Roha and Nowgong for that would involve two crossings of the Kallang with heavy bridges. After crossing the Titamari, nearly on the alignment of the present survey to the Lumding, it would diverge north-east, and from the Haria river to about Samagoorie, thirteen miles beyond Nowgong, it would encounter little drainage, as the bulk of this is intercepted by the Nealoie or Neanoye nullah, which runs almost parallel to the direction of the line. Between Nowgong and Samagoorie there is a series of villages, closely linked together, along the east bank of the Kallang; the road follows almost every winding of the river keeping generally close to the bank and between the river and the villages; it is quite unfitted for the railway, for there is scarcely such a thing as a couple of hundred yards of straight upon it; but even were it perfectly straight it would not be worth taking, for I do not suppose it has an average height of bank of so much as two feet, and the railway besides destroying the road would require to be fenced, and then innumerable foot crossings would have to be given to allow the villagers access to the river on which they are dependent for water, in addition to the larger crossings required for trade.

The railway should run some distance behind the villages which form only a narrow belt.

Between Samagoorie and a point about 3 miles beyond Joklabundha, a considerable saving can be effected on the road mileage. There is a cluster of villages along the Kallang for the last five or six miles before Joklabundha is reached, but otherwise the population appears much more sparse after Samagoorie is passed. Soon after leaving Joklabundha jungle is entered upon, and there is scarcely the vestige of a hut to be seen for about 20 miles, the few there are being chiefly about a tea garden, nor is there land suitable for bearing a population. For three or four miles the road twists and turns, cutting through a network of narrow spurs and ravines the bottoms of which are morasses, and runs up and down with very severe gradients: it then passes for about five miles across very low ground, an uninterrupted swamp covered with dense canegrass, skirting the foot of the hills with an average 4 to 6 feet bank; again it crosses for two miles another belt of spurs and ravines and then enters upon another stretch of 4 or 5 miles of swamp. After these twenty miles the character of the country considerably improves; the width of the belt of land between the Brahmaputra and the hill increases; the same swamp continues but there is generally a ledge of fairly level ground along the foot of the hills above the Brahmaputra flood; this ledge is however intersected by numerous small streams which would make bridging a heavy item in the cost of the line; at some points it is only 200 or 300 yards broad, at other it breaks up into ravines or is encroached upon by the swamp running right up to the foot of the hills, but, broadly speaking, the tendency is for the width to increase the farther east we go, and opposite the Diphlu tea garden, I judged the width to be about three miles.

The road generally skirts very near the edge of the ledge or step and is no better than a surface track. The villages are mean and very few and far between. There are four or five tea gardens, but these during their busiest season have easy access to the Brahmaputra by tributary streams, and even were it otherwise they are not worth considering.

72. *Dimapur valley route preferable to that along the Trunk Road apart from question of connection with the Cachar line.*—Such then, broadly considered, is this country through which it has been proposed to carry the railway; a country practically uncultivated, because the ground does not exist fit for cultivation and which must remain so until its surface is raised, if in the meantime the Brahmaputra does not carry it away. If it were a garden teeming with population, with the Brahmaputra to serve it so near, there might yet be grounds for preferring the route by the Dimapur valley, but considering what it is now, and what for an indefinite period it must remain, it appears to me not to have the slightest claim to consideration. Leaving out entirely the question of connection with Cachar, and supposing the problem to be simply the establishment of railway communication between the upper and lower portions of the Assam valley proper, it seems to me that the Dimapur valley route possesses superior claims. No doubt that line is about thirty miles longer, and between the Lanka Jan and Golaghat passes through about 100 miles of forest, with scarcely any population, but the great bulk of it can be brought under cultivation and the soil is admirably suited for tea. The railway would open this country out in a way it can never be opened out otherwise, whereas the other route is already well served by the Brahmaputra and the Kallang. The Naga Hills also would be served. Mr. Ward has stated that to serve the Naga Hills a tramway might be laid along the Dimapur valley from Golaghat or some other point on the railway but with this added, the cost of the scheme he advocated would be greater than that of the direct Dimapur valley. The cost of the Trunk Road line, as it may be called, would certainly not be less mile for mile than that of the alternative.

73. *But this connection must follow, with opinions in its favor.*—But, the feasibility of the North Cachar Hills route having been established, the advantages of the Dimapur valley route cannot be treated independently of the connection with Cachar for that, even if not established at first, is certain to follow. I have already gone into the advantages of that connection and shall not enter upon them again here. I have learnt nothing to make me alter my views, but on the contrary, I am more than ever convinced that they are right. Mr. Molesworth has satisfied himself regarding the feasibility of the route picked out by me through the hills, and has confirmed the advantages of that route over any other while the opinion of any Tea Planters with whom I have had an opportunity of communicating or of explaining the subject, from Nowgong upwards, has been unhesitatingly given in its favor.

I append on this subject copy of an interesting letter, dated 19th July, which I have received from Mr. Phillips, Chief Superintendent of the Assam Tea Company's Gardens, Nazira. Mr. Phillips is, I believe, about the most influential Planter in Assam, and has charge of the largest concern employing upwards of 7,000 imported coolies. As I had not been able to visit Upper Assam above Golaghat, I asked him to favor me with his own opinion and to procure that also of Planters whose tea passes through the hands of Calcutta Agents, as to which scheme, *viz.*, a line to Fakirgunj opposite Dhubri or one to Chittagong and Chandpur, would suit them best and it will be seen that the opinion is quite in favor of the latter.

The Kamrup Planters might (probably would) prefer a scheme that would give them a line to Dhubri, but they are of small account in the consideration of any scheme. The total tea manufactured in Kamrup in 1882 only amounted to 11,475 maunds, and it is doubtful if they had the railway whether they would make any extensive use of it. Part of the tea, though not much, comes from the north side of the Brahmaputra, and that would certainly not take the railway, while in Kamrup generally, the bulk of the garden labor, I am informed, is local and not imported.

74. *The Dadur Ali probably offers the best alignment above Golaghat.*—I have not, as noted, seen any of the country above Golaghat, but all the information I have acquired points to the line of the Dadur Ali, an old road, being the best. The most detailed information on this point is contained in a letter dated the 21st February 1884, addressed by Mr. Phillips, to the Secretary to the Chief Commissioner of Assam, in the Public Works Department. This alignment would carry the railway south of the Trunk Road and of the stations of Jorhat and Sibsagar, and it is claimed for it, that it passes near many of the most flourishing gardens in Assam.

There is evidently an advantage in keeping the railway away from the Brahmaputra, for this will always complete with it for traffic, and by doing so the belt of valley south of the river will be more equally intersected and served than if the railway were to run direct from Golaghat to Jorhat and thence along or near the Trunk Road to Dibrugarh.

The great bulk of the tea gardens I am informed lie south of the Trunk Road.

For these reasons were a line carried by the Trunk Road route between Roha and the Dhansiri, it would be desirable after crossing the Dhansiri to make for Golaghat, or a point near it, and on this account there is not so great a difference between the length of this and the Dimapur valley route as I calculated in my report of last year.

75. *Alternative line between Roha and Dimapur through the Jamuna valley.*—It may be worth mentioning that were it a matter of vital importance, and at the sacrifice of other consideration, to reduce the length of line between Upper and Lower Assam, this might be effected by running direct from Roha to Dimapur by the Jamuna valley: this route would only be very slightly longer than that by the Trunk Road to Golaghat. The Junction Station would in that case be at Dimapur, considering that it is important not to increase the through distance between Upper Assam and Cachar. The two parties, which worked in the Dimapur valley marched by this route, and report that there are no engineering difficulties on it, but I cannot recommend any such scheme and indeed think it would be a very great mistake. The length of line to construct would be about twenty-five miles greater than by the proposed schemes, and all traffic between Lower Assam and Cachar would have to go about seventy miles farther round than it would have to do if the direct route between Roha and the Lumding existed; in fact the tax on this would no doubt be soon found to be so intolerable that the direct line would be demanded; the only benefits it would confer would be to shorten by about two hours the railway journey between Lower and Upper Assam and to reduce the transit charges between the two parts by the amounts due to a saving of something like 20 miles in distance.

76. *Unable to add anything to what has already been written regarding the financial prospects of the line.*—I am unable to add anything to what I have already written regarding the financial prospects of the line which can be of any value. The total registered trade of the Brahmaputra valley during 1880-81 and 1881-82 was stated in last year's report, but it must remain a matter for pure speculation as to what proportion of that trade would be diverted from the river to the railway and to what extent the railway would create fresh trade for itself.

Any estimate based on present traffic returns would probably be very soon exceeded.

It is not probable that I should have been in any better position to write on this subject even had I been able to visit the upper portion of the valley and have consulted a large number of the Planters. They are all doubtless eager for the railway, but they could not have enlightened me as to what amount of traffic the railway might attract. I have heard very diverse opinions.

77. *Length and estimate of the Gauhati less than previously assumed.*—I must notice that the length of the branch line from the Lumding to Gauhati will probably be only 111 miles, which at the rate of Rs. 68,000 per mile will give a total cost of Rs. 75,48,000 instead of the figures taken in the report on the exploration of the North Cachar Hills, *viz.*, 122 miles at Rs. 80,000 per mile equal to total cost Rs. 97,60,000.

The estimates have been remarked on elsewhere, but there has been a saving in the distance on the section surveyed, and the alignment I have marked between Roha and Gauhati shows a yet larger proportional one when compared with the Trunk Road mileage, which in the absence of any knowledge of the country was taken.

78. *Opening out tea gardens at the Lumding.*—I would also remark that since writing the above I have received a letter from a Planter, stating that he has been reading the reports on the railway surveys, and that he intends to open out a garden at the Lumding, and asking for a rough sketch of the proposed route so that he may pick out a convenient site. Many others, I have no doubt, will follow his example when they feel assured that the line is to be put in hand.

79. *Suggestions for programme of survey operations during season, 1884-85.*—It remains for me to suggest a programme for next season's operations. Mr. Moore should return to the North Cachar Hills and carry on the survey towards the Lumding while another party should be sent to complete the survey between the Lumding and Dimapur. Mr. Molesworth has recommended that the survey from the Cachar line into the Jatinga valley should be put in hand, and I think that this would be the most useful way of employing a third party. There remains to consider what to do with the fourth party. Judging by what was accomplished in the North Cachar Hills last season, it will take eight years, with only one party each year to complete the survey of the Hill Section, apart from laying down the final line.

I should like to see two parties engaged in the hills, but there are difficulties about coolies, unless, however, the survey is to drag along for years, these difficulties must be faced.

I must remark, however, that two of my parties only consist of one Executive Engineer and one Assistant Engineer each, and for the hill work, it would be necessary to increase the strength, so that if one more Assistant Engineer at least is not forthcoming, it would be better to put the fourth party to survey from Golaghat upwards, and while this was going on the Executive Engineer in charge could detach a subordinate to cut a trace through the forest between the Dhansiri and Daiang rivers north of Dimapur, which it was not possible to get done last season. I trust that early orders may be issued as it takes about two months to make all the arrangements for taking the field, and the working season is short.

80. *Conclusion.*—In conclusion I trust that the services of the staff, who have discharged their arduous duties, to my entire satisfaction amidst much discomfort and with much risk to health may be brought to the favorable notice of the Government of India.

No. 1555, dated 19th July 1884.

From—J. PHILLIPS, Esq., Chief Superintendent, Assam Company,
To—The Engineer-in-Chief, Assam Railway Survey, Shillong.

I have the honor to acknowledge the receipt of your letter No. 1405, dated the 31st May last, and regret that indisposition and press of other work have prevented me replying to it earlier.

2. The subject of your letter is one that must interest most deeply all residents and proprietors of land in this province, and it is pleasing to us all to find that there appears to be good grounds to expect that the Government of India are taking in hand vigorously the question of bringing the province into easy communication with the marts and ports of Bengal, and have at length, as I assume is the case, concluded that the river route is not adapted practically to secure this object which opinion has long been held by residents in the province.

3. You desire me to give you my views as to which of the two routes from Golaghat towards Bengal would be most likely to benefit Tea Planters in Assam, *viz.*, one from Golaghat to Fakirgunj and the other from Golaghat to Chittagong with a branch to Chandpur for delivery of produce for Calcutta.

4. For the conveyance of produce, that is, tea, it has been found that the fewer transhipments it undergoes the better, hence although when the Eastern Bengal Railway was first opened a considerable quantity of tea was sent by that line from Kooshtea, this mode of acceleration has been completely given up owing to the violence the chests received whilst being loaded into and unloaded from the trucks and hackeries in Calcutta. Tea from Assam is now loaded into flats which convey it direct to the jetties in that city, and it is found preferable to put up with the extra time occupied so that the chests may be placed in the warehouses without being injured.

5. Calcutta must be looked upon as the market for the bulk of the crop of tea produced in Assam, Sylhet and Cachar, although some few estates ship their produce direct to England, notably, the Assam Company, Noakacharree Tea Company, Jhanzi Tea Association, Jorhat Tea Company, Meleng Tea Estate, Brahmaputra Tea Company, and some others in this district.

6. Your proposal therefore to deliver the tea for Calcutta at Chandpur, from whence a choice of carriage exists, *viz.*, steamers or native boats, meets entirely all objections that could

be urged against the Chittagong route. The provincial line having a terminus at Fakirgunj would place us in but a little better position than we occupy at present, as from that station to Calcutta, we should still only have steamers offering to carry our cargo, and it is notorious that for the limited business done from Assam there can be no free and open competition, and we will be compelled to pay whatever charges are demanded by the practical monopolists as at present.

7. It is certain that no tea would be sent to Calcutta *viâ* Dhubri or Goalundo by rail.

8. Shippers to England direct will be able to secure cheaper transit from Chittagong to London, as I understand that the port is open all the year round and regularly visited by the British India and other first class Ocean steamers.

Transit through Calcutta entails upon such shippers charges which could be considerably reduced if the business was done at Chittagong, provided freight and insurance from this port is not heavier than from Calcutta.

9. Upwards also, as you point out, the cheap rice and other crops from Sylhet and Tippera would be brought into the province at a lower cost than is paid to bring from Serajgunj.

At present rice from Serajgunj is costing all estates in this district, Rs. 3-4-0 and Rs. 3-8-0 per maund.

10. The connection of Upper Assam with Cachar and Sylhet by direct line has undoubtedly very much to recommend it, more especially as the branch to Chandpur puts us in connection with the Central Bengal and Eastern Bengal Railways which would bring mails, passengers and immigrants more quickly to the province than they could expect to come if the circuitous route *viâ* Dhubri and Gauhati was adopted.

11. Politically there would also be much gained by this line, as administration—military and civil—of all districts and their bordering hill tracts, would be much facilitated by it, and it would then probably be found advisable to attach the Maimensing, Tippera and Chittagong districts to Assam and to administer the affairs of the whole of the Assam valley and the territory south of the Megna and Brahmaputra under one Chief Executive Officer.

12. As regards the financial prospects of this scheme, I think you must obtain information on these out of Assam as residents in the province are, as a rule, so confined in their undertakings as to be able to give little assistance or advice beyond their own little concerns and responsibilities. You can obtain, of course, local information and advice which will be reliable, but, for the broad subject of shewing the financial results from the investment of the capital required to lay down say, 550 miles of railway, you will have to gather your information from experts who have worked in larger fields than Assam, and I could not myself venture any opinion that would in any way aid you.

We have at any rate admittedly vast and valuable resources in the province which only require labor and capital to develop them, and these can only be introduced when communications are improved.

The climate of Upper Assam has everything to recommend it as a residence for Europeans who are able to work with health and energy at all seasons of the year in it, and if this line should become an accomplished fact, there is a moral certainty that great benefits to the province would accrue, and I hope it will be found also that these will compensate investors for the outlay incurred.

Under similar circumstances elsewhere, they have done so, and why should they not in Assam?

I regret that I do not feel justified in going further in my remarks under this head than the foregoing, but will be glad to collect for you such information as you would like to have to consider when you extend your inspection above Golaghat, when I shall be very pleased to lay it before you in Nazira which station you will be passing through or near.

13. I will thank you for any information you may be able to give me regarding the port of Chittagong to make me clear on the point of its adaptability for the business of this Company.

RESOLUTION.—The report, estimates, &c., now submitted to the Government of India relate to the surveys, made during the cold season of 1883-84, of the undernoted sections of the proposed Chittagong-Assam Railway, which comprised—

(1) a few miles of the hilly portion of the line in the Dijako and Mupa Valleys;

(2) the portion of the Gauhati Branch between Lumding Junction and Roha;

(3) the section between Golaghat and Lumding Junction.

The surveys are confirmatory, so far as they go, of the opinions previously expressed as to the feasibility and cost of the proposed railway.

2. As regards the section in the Dijako and Mupa Valleys, while the surveys establish the fact that a feasible line can be obtained in one of the most difficult portions of the hill route, and that the cost will be about the figure previously estimated, the details will have to be worked out with careful cross sections before the line can be finally located. The effect of this will, it is believed, be rather to reduce than increase the estimated cost. These surveys appear also to establish the fact that the western side of the range flanking the Dijako Valley affords a very fair line for a railway.

3. With regard to the surveys between Lumding Junction and Roha, the line from Roha to the 12th or 14th mile from the Junction may be accepted as not capable of any material improvement, but the remaining length will have to be carefully examined. The alignment here is doubtless capable of considerable improvement.

4. The examination of the country between Lumding Junction and Golaghat must be considered as preliminary only; nothing is established beyond the fact that a line with no very heavy work can be obtained between Golaghat and Lumding, but there appears to be very little doubt that further examination will result in a considerable improvement of the alignment.

5. The construction of the section between Golaghat and the Lumding river is of the first importance; it is also necessary that the construction of the sections in the plains, both to the north and to the south of the hilly portion, should be well advanced before the construction of the latter is commenced. In this view Mr. Buyers should be instructed to concentrate work during the coming cold season on the detailed survey of the Lumding-Golaghat section on the one side, more especially on the route previously suggested by the Consulting Engineer for State Railways between the Dhansiri and Daiang rivers, and of the Jatinga Valley and its approaches on the other, withdrawing the staff on the Gauhati Branch which is of minor importance.

ORDER.—Ordered, that this Resolution be forwarded to the Chief Commissioner, Assam, for information and guidance, the plans and sections being at the same time returned.

Also that it be published in the Supplement to the *Gazette of India*, in continuation of Public Works Department Resolution No. 433R.C. of 30th May 1884.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22nd OCTOBER 1884.

GENERAL REMARKS.—There has been a heavy and seasonable burst of the north-east monsoon in the Madras Presidency, and prospects have much improved everywhere, except in Bellary and Anantapur. In Mysore rain has again been heavy and general, and the prospects of the season are now encouraging. There has been good rain in Coorg, and the prospects of the crops are favourable. More rain is still required in parts of Poona, Sholapur, Belgaum, and Dharwar. In the Deccan and Southern Mahratta Country rain was general, excepting in Kaladgi, where it is much wanted. In Nasik and Khandesh the crops have been slightly injured by excessive rain.

In the Berars and Hyderabad and in the Central India and Rajputana States there was little or no rain during the week, but the prospects of the crops are on the whole very favourable. There was no rain in the Punjab and the North-Western Provinces and Oudh during the period under report. In the former province the *kharif* harvest promises to be very favourable. In the North-Western Provinces and Oudh the *kharif* crops are generally in good condition, though they have been injured in some places by excessive rain. In the Central Provinces agricultural prospects are generally good. Except in Cuttack, no rain fell in Bengal during the week. Paddy on high and low lands are still in need of rain. In Assam the prospects of the *sali* crops are fair. Rain is much needed at Gauhati. In British Burma the condition of the crops is generally good, though more rain would be beneficial in a few districts.

The last report of the Meteorological Department, dated 23rd instant, states that showers have fallen in Assam, at Burdwan and Saugor Island, and at some places in the Bombay Presidency, while at most stations in the Carnatic as well as at Bangalore rain has been general.

Agricultural operations remain for the most part unchanged. Sowing and ploughing for the *rabi* are generally in progress throughout the country. The *kharif* is being harvested in Bombay, North-Western Provinces and Oudh, and in the Punjab. Harvest operations are also in progress in some districts of Madras.

The public health is generally good. Prices are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 22nd)		
Bellary ...	·65 (average)	Pasture very scanty.
Kurnool ...	·82 (average)	Standing crops good; sowing of white *cholum* progressing; harvest early cereals, outturn below half. Some small-pox and cattle-disease.
Ganjam ...	·63 (average)	Small-pox, cholera, and cattle-disease prevalent.
Kistna ...	·57 (average)	Standing crops generally good; harvest dry crops, outturn below average. River 2·70 feet over anicut. Small-pox, fever, and cattle-disease in places.
Chingleput (Madras) ...	5·58 (average)	Standing crops good; harvest paddy and *ragi*, yield half the average. Small-pox in 3 taluks; 41 deaths from cholera.
Coimbatore ...	3·60 (average)	Standing crops benefited by recent rain; harvest paddy and *ragi*, outturn about average.
Tanjore ...	6·89 (average)	Standing crops good. Rivers 3 to 10 feet. Harvest wet and dry crops, outturn below average. 46 deaths from cholera.
Madura ...	3·11 (average)	Prospects considerably improved throughout; pasture scanty. 28 deaths from cholera.
Malabar ...	3·53 (average)	Second crop cultivation progressing. Fever and slight small-pox prevalent; 2 deaths from cholera.
Travancore ...	12·21	Second crop cultivation progressing. Fever, small-pox, and cholera in parts.
		General Remarks.—General prospects. Heavy and seasonable burst of north-east monsoon general from Nellore and Cuddapah southward. Prospects much improved and good, except in Bellary and Anantapur. Prices rising in Bellary.
Bombay—(Oct. 22nd)		
Karachi ...	*Nil*; total from 1st January to date at Tatta, 5·13; Jerruck, 9·71; Sakro, 12·96; Kotri and Ghorabari, 8·92.	Fever generally prevalent; diarrhœa of a bad type in Kotri, 12 deaths out of 19 from 15th to 19th, no fresh case since; cattle-disease in 8 talukas, loss of 192 cows and buffaloes, and 60 sheep and goats; small-pox in Moghul, Bim, and Ghorabari talukas, 1 fresh case, 2 deaths, 6 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 26, 28 and 40; in Kotri 24 and 38; in Sujawal 24, 34 and 40; and in Tatta 26, 30 and 36 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 20th, 9 feet 5 inches against 7 feet last year. Fever in 11, small-pox in 2, and cattle-disease in 4 talukas. Prices of grain steady.
Ahmedabad ...	*Nil*	Reaping of *kharif* crops in progress; crops healthy. Fever in Dholka, Gogo, Dholera, Viramgaum, and Parantij. Wheat 31 and *bajri* 33 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	·25	Total rainfall 47·92. Public health good. Harvests commenced in Naosari and Kadi divisions. Prices—*bajri* 34 and rice 23 pounds per rupee.
Surat ...	·1	Total rainfall 39·92. *Kharif* harvest commenced in places; standing crops healthy; preparations for *rabi* progressing. Cholera in Jalalpur taluka, 4 cases, 2 deaths. *Juari* 29 and *nagli* 40 pounds per rupee.
Nasik ...	Rain throughout the district, except in Peint.	Break urgently wanted. Public health good. *Kharif* crops in good condition, but slightly damaged in parts by excessive rain; *rabi* sowing is in progress. Wheat 40, *bajri* 33½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain on 4 days; total of week 1·38.	Total to date 73·6, being 3·10 above average; abnormal temperature 2° cool to 1° warm; vapour in air defective from 15th to 17th; abnormal wind veered from north-east on 19th to south on 21st; thunder and lightning from 18th to 21st.
Poona ...	Good rain—1·0 at Sirur; light showers in 6 talukas.	More rain wanted eastward, where *kharif* crops are not good. Scarcity of fodder in the east. *Bajri* 33 and *juari* 24; in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Nagar, 2·48; Kopargaon, ·71; Parner, ·41; Jamkhed, Sheogaon, Newasa, and Sangamner, none; slight in remaining talukas.	*Kharif* crops are in good condition; harvesting in progress in Haiper, Shrigonda, Jamkhed, Sheogaon, and Kopargaon; sowing of *juari* completed in all talukas, except Akola, where it is just begun. Fever prevalent in Sheogaon. *Bajri*—maximum 48 pounds per rupee in Akola, minimum 36 in Karjat; *juari*—maximum 60 pounds in Sangamner, minimum 34 in Karjat.
Sholapur ...	Sholapur, 2·51; Barsi, ·8; Madha, ·65; Karmala, ·17; Pandharpur, 1·4; Sangola, 1·14; Malsiras, ·60.	*Juari* 33 pounds 28 tolas and *bajri* 33 pounds 9 tolas per rupee. Prospects somewhat brighter. More signs of rain.
Dharwar ...	1·33; Hangal, ·65; Mugud, ·52; Ranibennur, ·32; Bankapur and Ron, ·22; Karajgi and Kalghatgi, ·14; Gadag, ·10; Hubli ·1; none in Navalgund, Nargund, Mandarji, and Kod.	Rain has done some good to crops in Dharwar, Ranibennur, and Hangal talukas; rain urgently required throughout the district. Sowing of late crops retarded in eastern talukas, where also scarcity of fodder is being felt; standing crops suffering from drought. There are still signs of rain, which has been falling, though slightly, since last three days in Dharwar and adjoining talukas. 35 deaths from cholera. Prices rose greatly, but have again fallen; average prices—*juari* 36 and rice 26 pounds per rupee.
Kanara ...	Karwar, ·16; Kumpta, ·73.	Total rainfall 93·52. Common rice in Karwar 15 seers; district average 14¾ seers per rupee. Small-pox, 2 deaths in Kurata; fever in Honavar and Haliyal talukas. Rice harvest continues on coast. Weather cloudy.
Rajkot ...	.....	General health good; weather warm and cloudy; fever generally prevails; cholera in Dhoraji, Upteta, and Jetpur. *Bajri* 38 and *juari* 52 pounds per rupee.
		General Remarks.—Good rain throughout the Deccan and Southern Mahratta Country, excepting Kaladgi where it is much wanted; more rain also required in parts of Poona, Sholapur, Belgaum, and Dharwar. Crops slightly injured by excessive rain in parts of Nasik and Khandesh; *kharif* harvest and *rabi* sowing in progress in most districts. Fever in parts of 14 districts; cholera, small-pox, and cattle-disease in a few districts.
Bengal—(Oct. 22nd)		
Chittagong ...	*Nil*	Weather cooler at nights. Prospects of crops fair. Prices stationary. Sporadic cases of cholera and cattle-disease still continue; general health good.
Dacca ...	*Nil*	Crops generally fair, though injured somewhat by want of rain and subsidence of water; cutting of jute completed and that of sugarcane commenced; pulses being sown. Public health generally good.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of *amun* paddy good; sugarcane doing well; ploughing and sowing of *rabi* crops going on. Prices of common rice stationary. Public health generally good; ordinary fever prevails in the interior. State of river normal.
Moorshedabad ...	*Nil*	Weather seasonable. *Dearah* lands must be resown owing to late rise in rivers. Heavy showers of rain, of which there is no prospect, much wanted for *amun*, condition being worst in thanas Sootee and Mirzapore. Ordinary rice selling at from 12 to 13½ seers per rupee.
Rajshahye ...	*Nil*	Weather very cloudy. Rain still wanted for *amun*. Few cases of cholera reported from Nowgong.
Burdwan ...	*Nil*	*Aus* being reaped; prospects bad if rain holds off. Prices slightly lower.
Rungpore ...	*Nil*	Weather fair. Prospects of crops not very favourable. Prices of food-grains rising. Malarious fever prevalent.
Bhagalpur ...	*Nil*	Prospects of crops good; *rabi* being sown. Prices of rice stationary.
Purneah ...	*Nil*	Prospects of crops fair, except in Motihari and Dhamduka; *rabi* cultivation progressing. Common rice 14 seers per rupee. Much fever. Ganges and Kusi falling.
Patna ...	*Nil*	Sowing of *rabi* crops in full progress; *cheena* looks well; rain wanted for standing paddy. Public health good, except in Bihar subdivision, where cholera still prevails.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Durbhunga ...	*Nil*	Prospects of paddy only moderately fair and not the same everywhere; *rabi* sowing commenced. Prices slightly falling. Public health good.
Hazaribagh ...	*Nil*	Weather cloudy. Paddy on low lands doing well; rain much needed for paddy on high lands; lands for winter crops being prepared. Cases of small-pox in certain thanas, otherwise general health good.
Cuttack ...	·25	More rain expected. Prospects of *sarad* crops good. Sufficient rain fell last week in Kandrapara in parts of Sadr sub-division; rain wanted in Jajpore. Price of rice almost stationary. Public health good.
		General Remarks.—There has been slight rain in Cuttack, Puri, Backergunge, and Mymansingh. Rain very much wanted for paddy on higa lands which has suffered. Paddy on low lands also requires rain. Prices of rice high, but almost stationary. Sowing of *rabi* crops in full progress. Sporadic cases of cholera still reported from nine districts, and fever beginning to be prevalent in several districts. Reports have come in at Nawada of beggars dying of starvation.
N. W. Provinces and Oudh—		
Benares (Oct. 21st)	No rain	The *kharif* crops are all good, including sugarcane and late rice, though *mung*, *bajra*, and *urd* have been slightly damaged by excessive rain, as already reported; sowing for the *rabi* crop is in progress. Health of men good; save a little fever in the city; no cattle-disease. Prices nearly stationary. Bazars well supplied
Gorakhpur („ 18th)	.....	Fine weather; floods subsiding. *Rabi* sowings somewhat delayed by late rains. Cholera decreasing. Prices very slightly rising.
Fyzabad („ 21st)	No rain	Clear weather; west wind. *Rabi* sowing going on. Public health good; cattle-disease in part of district.
Lucknow („ 20th)	No rain	Rice and *kodo* nearly cut; *rabi* crops are being sown. Health of people good, but slight cattle-disease reported in tahsil Malihabad. Supplies sufficient. Prices stationary.
Rae Bareli („ „)	.....	Weather cloudy; wind variable. *Kodo* is being cut; *rabi* sowings in progress. General health good. Supplies abundant. Prices almost stationary.
Partabgarh („ 21st)	.....	*Rabi* sowings in full swing; *bajra* being cut; prospects excellent. General health good. Prices almost stationary.
Allahabad („ „)	No rain	*Rabi* sowings nearly completed. Health good. Prices falling.
Cawnpore („ 20th)	No rain	Weather clear. The cessation of the rains has improved the prospects of the *kharif* crops; *rabi* ploughing and sowings are in progress. Fever and ague are prevalent; no cattle-disease.
Farukhabad („ 21st)	.....	Weather fine; fever decreasing. Ploughing for *rabi* in progress.
Sitapur („ „)	.....	Clear weather; westerly wind. Wheat sowings have commenced, and prospects are favourable. Cholera reported from pargana Misrik.
Bareilly („ 20th)	.....	Condition of crops fair. Market stationary. Slight fever, but cholera disappearing; cattle healthy.
Moradabad („ 21st)	No rain	*Rabi* ploughing in progress; *bajra* and *dhan* being cut. Fever less prevalent.
Kumaon („ 20th)	.....	Weather fine. Harvest all reaped. General health good. Prices falling. Cattle-disease continues.
Agra („ 21st)	No rain	*Kharif* being cut; *rabi* ploughings and sowings going on. No cholera reported during week; but fever very prevalent. Prices steady.
Jhansi („ „)	.....	Prospects fair; cultivation of land for the *rabi* in progress. Prices falling. Cholera stopped, but fever prevalent.
Aligarh („ „)	.....	Weather fine, but rather warm. Slight cholera reported from Atrauli and Sikandrarao; fever prevalent throughout the district. *Kharif* crops considerably damaged by last rain. Prices show fall in *juari* and rise in gram, *bajra*, and *mung*.
Meerut („ 20th)	No rain	West wind; weather seasonable. Hopes entertained that damage by recent rains may turn out less than at first expected. Fever prevalent; cholera continues in Hapur. Supplies sufficient. Prices steady.
Saharanpore („ 21st)	.....	Weather seasonable. Fever abating; cholera has ceased in Deobund. Rice and *makki* being reaped; wheat sowing begun. Little change in prices. Some cattle-disease in Nakur.
		General Remarks.—No rain is reported during the week. Agricultural prospects are good, though damage has, in some places, been caused by the recent heavy rains; ploughing and sowing operations for the *rabi* are in progress. The general health is good, and there is no marked change in prices.
Punjab—**(Oct. 22nd)**		
Delhi ...	.....	Fever prevalent. *Rabi* sowings in progress. Prices of gram and *bajri* rising, and of other food-grains stationary.
Hissar ...	.....	Fever prevalent; cattle-disease in Rohtak. *Rabi* sowings progressing. Prices stationary or rising.
Umballa ...	.....	Fever still prevalent throughout the district. *Makki* harvested; rice and *juari* being harvested; yield expected to be above average; sowing of gram, barley, and mustard in progress. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Jullundur ...	.....	Ordinary autumnal fever prevalent. *Rabi* ploughings commenced; prospects of coming harvest favourable. Prices stationary.
Amritsar ...	.....	Slight fever. Prices almost stationary.
Sialkot ...	.....	Health good. *Kharif* harvest above average, except that of cotton and maize.
Ferozepore ...	.....	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices rising.
Lahore ...	.....	Slight fever prevalent. Crop prospects fair. Prices stationary.
Rawalpindi ...	.....	Fever in five and cattle-disease in one tahsil. Expected yield of *kharif* harvest above average in one, average in four, and below average in one tahsil. Prices falling.
Mooltan ...	.....	Fever still prevailing in the district. Expected *kharif* yield average; *rabi* sowings commenced. Prices steady.
Dera Ismail Khan ...	.....	Health and prospects good. Coming yield above average.
Peshawar ...	.....	Health and *kharif* prospects good. Prices falling.
		General Remarks.—No rain during the week. Fever very prevalent. *Kharif* prospects very favourable; *rabi* sowings commenced.
Central Provinces—**(October 22nd)**		
Nagpur ...	*Nil*	Weather cloudy and close. *Kharif* prospects fair; *rabi* sowings progressing. Fever prevalent. Prices steady.
Jubbulpore ...	·62	Weather cloudy and warm. Reaping of *dhan* commenced; *rabi* sowings progressing. Prices stationary.
Saugor (Oct. 21st)	*Nil*	Bright sunshine. Paddy and *kodo* being cut; *til* and cotton unfavourable; *juari* a little better; *rabi* land under preparation. Fever prevalent. Prices steady.
Seoni ...	·6	Weather hot and cloudy. Reaping of rice and *rabi* sowings commenced. Prices steady.
Hoshangabad ...	*Nil*	Weather cloudy and warm. *Rabi* sowings commenced. Fever prevalent. Prices stationary.
Khandwa ...	·37	Weather cloudy. Cotton, *til*, and *tur* flowering; prospects indifferent. Health good. Rice 14¾, wheat 24¾, and *juari* 30 seers per rupee.
Raipur ...	·55	Weather cloudy and hot. Rice doing well; *kodo* and cotton damaged; *rabi* land under preparation. Prices falling.
Sambalpur (Oct. 18th)	·3	Weather cloudy and warm. Prospects of crops good. Fever prevalent; cattle-disease in one tahsil. Prices stationary.
		General Remarks.—Weather close and cloudy, with slight rain. Prospect of crops unchanged. Health fair. Prices steady.
British Burma—**(Oct. 22nd)**		
Akyab (Oct. 18th)	0·28	Total rainfall 179·23. Cholera still prevalent, in town also, but less severely in districts. Crops healthy.
Bassein („ „)	2·90	Total rainfall 97·77. Cattle-disease in two townships.
Rangoon („ „)	0·10	Total rainfall 84·73.
Amherst (Moulmein) („ „)	0·57	Total rainfall 173·89. Prospects of crops good.
Tavoy („ „)	2·30	Total rainfall 159·93. Slight small-pox and cholera. Prospects of crops excellent.
Pegu („ „)	1·48	Total rainfall 108·39. Crops promising.
Henzada („ „)	0·44	Total rainfall 86·84. Slight small-pox in town. Crop prospects favourable, but in some parts more rain is wanted.
Prome („ „)	1·91	Total rainfall 40·83. Slight cholera in one township. More rain wanted, but plants are in good condition.
Toungoo („ „)	0·18	Total rainfall 71 inches.
Thayetmyo („ „)	0·32	Total rainfall 31·24. Crops generally promising fairly. Harvests will probably be ⅔ of average.
		General Remarks.—Cholera continues in Akyab; slight small-pox in parts, otherwise public health good; some cattle-disease in Irrawuddy Delta. Crop prospects unaltered.
Assam—**(Oct. 22nd)**		
Gauhati ...	No rain during week ending 21st instant.	Weather becoming perceptibly cold; days hot; nights and mornings cool. Prospects of *sali* paddy fair, that of tea not good. Rain much needed at this time. Lands being ploughed for mustard; sugarcane doing well. Public health fair.
Sylhet ...	*Nil*	State and prospects of crops same as last week. Cholera and small-pox still prevalent.
Cachar ...	*Nil*	Days warm; nights cool. Rain much wanted for rice and tea. Health good. Common rice 12¼ seers per rupee.
Dibrugarh ...	0·13	Weather cool. Prospects of *sali* crop fair. District healthy.
Mysore and Coorg—**(Oct. 22nd)**		
Bangalore ...	1·9	Standing crops are improving in condition, and prospects of season are encouraging. Public health good.
Mysore ...	4·0 rain has been general all over the province.	
Mercara ...	4·59	Harvesting of *ragi* and picking of cardamoms have commenced; coffee ripening in parts; prospects of rice crops good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar & Hyderabad— (Oct. 22nd)		
Amraoti ...	1·18	Weather cloudy. Crops in good condition; *rabi* sowings commenced. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Weather cloudy. Crops in good condition; cotton in flower.
Hyderabad ...	Average rainfall during the week, ·84.	Total rainfall from 1st January 30·82. *Kharif* and *abi* crops prospering; more rain will damage standing crops and *rabi* sowings. No sickness. Prices—wheat 13, coarse rice 12, white *juari* 16½, yellow *juari* 20½, and *tur* 19 seers per halli sicca rupee.
Central India States— (Oct. 22nd)		
Indore ...	0·8	Total rainfall 36·64. Weather normal. Health good.
Morar (Gwalior) ...	*Nil*	Total rainfall 32·68. Fever unusually severe both in Morar and Lashkar.
Sutna ...	.....	Weather warm and cloudy. Health and prospects good.
Neemuch ...	*Nil*	Weather seasonable. *Mukka* has been reaped; land is being prepared for opium and *rabi* crops. Public health good.
Goona ...	.....	Health and prospects good.
Bhopal ...	.....	No report received.
Agar ...	0·26	Health and prospects good.
Sehore ...	*Nil*	Weather clear. Prospects of crops and public health good; but *kharif* much injured by late rains.
Nowgong ...	*Nil*	Public health indifferent and fever prevalent. Weather fine and agricultural prospects improving.
Manpur (Bhopawar) ...	*Nil*	Prospects good. 3 fatal cases of cholera in Dhar and 3 in Burwani, of which two fatal; health otherwise good.
Rajputana— (October 22nd)		
Abu (Oct. 22nd)	*Nil*	Weather quite clear, cool, and seasonable.
Sirohi („ 19th)	*Nil*	Tanks, wells, and crop prospects good. Some fever, otherwise health good. Weather seasonable.
Marwar („ 17th)	*Nil*	Jodhpore city tanks almost full. Fever abating. Crops in good condition. Sky cloudless. Nights cool. Prices stationary.
Meywar („ 19th)	*Nil*	Tanks and wells good. Health fair. Sowings commenced. Weather seasonable.
Harowti („ 18th)	*Nil*	Weather cloudy. Nights cold. Sowings progressing. Health good. Prices stationary.
Jhallawar („ 17th)	*Nil*	Total rainfall 31·26. Weather seasonable. Health fair.
Ajmere („ 21st)	*Nil*	Weather seasonable. Sowings proceeding. Health satisfactory.
Jeypore („ „)	*Nil*	Weather seasonable. Sowings progressing. Prices steady. Fever prevalent, otherwise health good.
Bhurtpore ...	.....	No report received.
Ulwur (Oct. 21st)	*Nil*	Cultivation continues. Fever decreasing. Prices falling.

E. C. BUCK,
Secy. to the Govt. of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

№ 44.] CALCUTTA, SATURDAY, NOVEMBER 1, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

(*f*) Total receipts from 1st April to 30th September 1884.

SIMLA,
The 27th October 1884.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

MEDICAL ATTENDANCE ON, AND SUPPLY OF MEDICINES TO, GOVERNMENT CLERKS AND THEIR FAMILIES.

No. $\frac{14}{447\text{-}61}$.

Extract from the Proceedings of the Government of India, in the Home Department (Medical),—dated Simla, 25th October 1884.

Read the undermentioned papers :—

Home Department Circular letter to Local Governments and others, Nos. 3986-3996, dated the 31st August 1869.
Home Department letter to the Government of the Punjab, No. 639, dated 12th October 1875.
Home Department letter to the Surgeon-General, Indian Medical Department, No. 425, dated 27th July 1876.
Home Department Resolution, Nos. 13—632-639, dated 18th December 1879.
Military Department letter to the Surgeon-General, Her Majesty's Forces, No. 689S.C., dated 23rd August 1883.
Military Department letter to the Inspector General of Military Works, No. 88C., dated 25th January 1884.
Letter from Director General of Ordnance to the Military Department, No. 159E., dated 14th April 1884.

RESOLUTION.

The papers read above relate to medical attendance on, and supply of medicines to, Government clerks and their families. Doubts having arisen as to the application of these orders in the case of certain offices, the Governor General in Council is pleased to prescribe the following rules in supersession of all previous orders on the subject, with effect from the 1st January 1885 :—

(1) **All clerks of all Government offices are entitled to gratuitous** medical attendance and medicines for themselves.
(2) All clerks of Army Head Quarters offices are entitled to similar privileges for themselves and their families.
(3) Subject to the above rules, clerks drawing Rs. 250 per mensem and upwards are entitled to the services of the Civil Surgeon, and those drawing less than that amount to the services of the Assistant Surgeon or medical subordinate provided for the purpose, it being understood that, in conformity with paragraph 4 of circular letter, dated 31st August 1869, above quoted, the attendance of the Civil Surgeon should be given in all cases of emergency or of great danger or difficulty, when applied for by the subordinate medical attendant.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations noted in the margin for information and guidance. In places where there is no druggist's shop, medicines may continue to be supplied from the Government Stores;

Bengal
North-Western Provinces and Oudh.
Punjab.
Central Provinces.
British Burma.
Assam.
Coorg.
Hyderabad.

that a copy be forwarded to the Governments of Madras and Bombay for information;

and that a copy be forwarded to all the other Departments of the Government of India and to the Surgeon-General with the Government of India for information.

Also that the Resolution be published in the Supplement to the *Gazette of India* for general information.

A. MACKENZIE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 23rd October, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.
The Hon'ble H. J. Reynolds.

PÁNCH MAHÁLS LAWS BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the law in force in the Pánch Mahál. He said:—"This Bill has been prepared at the request of the Government of Bombay. The territory known as the Pánch Mahál is at present one of the scheduled districts in that Presidency, and the object of this measure is to regulationize it and to assimilate the law in force in it to that in the neighbouring Kaira district."

The Motion was put and agreed to.

OUDH ESTATES ACT, 1869, AMENDMENT BILL.

The Hon'ble MR. QUINTON moved for leave to introduce a Bill to amend the Oudh Estates Act, I of 1869. He said:—

"This legislation is undertaken at the instance of the Government of the North-Western Provinces and Oudh, and of the associated body of the Oudh taluqdárs known as the British Indian Association.

"Act I of 1869 defines the rights of taluqdárs and others in certain estates in Oudh, and regulates the succession thereto. Sections 13 and 20 empower taluqdárs to make bequests of their estates under certain circumstances by wills executed not less than three months before the death of the testator, and registered within one month from the date of their execution. In the Preliminary chapter, 'registered' is defined to mean registered according to the provisions of the rules relating to the registration of assurances for the time being in force in Oudh.

"The practice which has since obtained among Oudh taluqdárs making a will under the Estates Act is to deposit the will in a sealed cover with the registrar; and until lately it was believed that this was all that the law required.

"In 1882, however, a case came in appeal before the Court of the Judicial Commissioner, in which—although the point was not put in issue in the Court of first instance—the Judicial Commissioner held that a will so deposited was invalid, so far as it affected the landed estate, because it had not been registered.

"This judgment was appealed to the Privy Council. Their Lordships ruled that the Judicial Commissioner was right; that under the rules of Act VIII of 1871—the Registration Act applicable—deposit was one thing and registration another; and that a will deposited under the provisions of that Act relating to the deposit of wills was not thereby registered within the meaning of the Oudh Estates Act.

"The Government of the North-Western Provinces and Oudh now urge that the consequences of this ruling are most important, since the procedure that it pronounces to be inadequate has been constantly acted on; and the President of the British Indian Association, in a memorial to the Lieutenant-Governor and Chief Commissioner, asserts that the taluqdárs were never led either by the civil officers or the legal advisers whom they consulted in such matters to suspect that the validity of wills formally deposited in the registration offices under sealed covers could be called in question.

"It is obvious that taluqdárs cannot be expected in future to register their wills open. If this be insisted on, sections 13 and 20 would probably remain a dead-letter.

"Under these circumstances, it is considered advisable to amend Act I of 1869 so as to legalize the existing practice. This is done by the present Bill, and, as the omission to fulfil the requirements of the law which has taken place in the past would seem to have been unintentional and due to a prevalent and hitherto undisputed misapprehension of its meaning, retrospective effect has been given to the amendment, which covers all wills hitherto or at present only deposited and not registered, except wills already declared invalid by judicial decision or being questioned in a suit commenced before the date of the introduction of the Bill."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

EXCISE ACT, 1881, AMENDMENT BILL.

The Hon'ble MR. QUINTON also moved for leave to introduce a Bill to amend the Excise Act, 1881. He said:—

"The Act is itself an Act to amend the law relating to the excise-revenue in Northern India, British Burma and Coorg. The few remarks called for at this stage of the Bill have reference, I would explain, to the North-Western Provinces and Oudh, but, should the Motion be accepted, the other Local Governments to whose territories the Bill is applicable will be given an opportunity of expressing their opinions upon it before the Council is asked to pass it into law.

"It has been prepared, at the instance of the Government of the North-Western Provinces and Oudh, in order to legalize a practice, which has prevailed in those Provinces since 1856, of employing officers of Police above a certain rank as Excise-officers for the prevention of smuggling. With the other branch of the excise-administration, namely, the collection of revenue, Police-officers have no concern whatever.

"Act X of 1871, which consolidated and amended the excise law in Northern India, British Burma and Coorg by its 46th section, corresponding to section 59 of Act XXI of 1856, enabled the Local Governments to confer on officers

of the Police Department powers with respect to the seizure of, and search for, spirituous and fermented liquors and intoxicating drugs of every description, and the arrest of persons found in possession thereof. This power has been fully exercised up to the present time, and on it the Government has to rely for the prevention of smuggling, as no separate establishments are entertained for that purpose. Formerly a functionary styled the Abkárí Dárogha was maintained in each district, but he was found to be more ornamental than useful, and after mature deliberation his office was abolished.

"No doubt as to the legality of the practice arose till a short time ago, when a decision in a criminal case by the Judge of Agra led the Government to look closer into the question, and it then appeared that under the law now in force it was open to argument whether Police-officers could be employed on excise-duties.

"That law, Act XXII of 1881, purported, as I have said, to amend the law relating to the excise-revenue in Northern India, British Burma and Coorg; and its sixth chapter, which treats of officers and their powers, has no provision corresponding to section 46 of Act X of 1871 and section 59 of Act XXI of 1856, to which I have already referred. Section 2 of the Act, it is true, saves all powers conferred under the Excise Act of 1871, but it has been held that this must be read with section 20 of the Police Act, which prohibits the exercise of any authority by Police-officers other than that therein specified, and that nothing short of an Act of the legislature can now legalize their employment as Excise-officers.

"It may be asked, how it comes that so important a point was overlooked for so long by the Government of the North-Western Provinces and Oudh? The answer is that such an effect of Act XXII of 1881 was neither intended nor foreseen when that Act was passed.

"The Statement of Objects and Reasons makes no mention of any alteration of the law as regards the excise-functions of Police-officers; it is not alluded to in the speeches of the Hon'ble Member in charge of the Bill—the then Legal Member; and the Report of the Select Committee is altogether silent upon it. Mr. Whitley Stokes did not include it in the substantial alterations made by the Bill, and appears to have thought that it was a matter to be regulated by executive order, and that any legislative provision on the subject was superfluous. As occasionally happens, an effort to attain brevity brought about obscurity. It is impossible to suppose that a power on which Local Governments mainly relied for preventing injury to the excise-revenue by smuggling was thus taken away by a side wind, or that, if this result of the Bill had been contemplated, it would have been allowed to pass without comment from the Governments affected by it while the Bill was being carried through Council.

"The Bill on the table merely restores to Local Governments the power which they possessed under the previous law, which some of them at least have been exercising up to the present time in the belief that they had never been deprived of it."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette*, the *Panjáb Government Gazette*, and the *Central Provinces* and *British Burma Gazettes* in English and in such other languages as the Local Governments think fit.

His Excellency THE PRESIDENT:—"I should like to ask one question with regard to the Bill. I understand from the remarks of Mr. Quinton that the Bill has been introduced at the request of the Government of the North-Western Provinces and Oudh. I suppose that it will not be extended to the Panjáb, the Central Provinces or British Burma unless the Governments of those Provinces desire that it should be so extended?"

The Hon'ble MR. QUINTON:—"The draft Bill does not provide for that."

His Excellency THE PRESIDENT:—"You mean that before the Bill passes out of Select Committee and comes on finally in Council the views of those Governments will be received?"

The Hon'ble MR. QUINTON:—"Yes, my Lord; certainly."

The Motion was put and agreed to.

INDIAN RAILWAYS BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to amend and consolidate the law regulating the construction and working of Railways. He said:—

"We have at present, as the Council are aware, a certain amount of law relating to railways. This law, however, may be said to be not only of a very scant and meagre nature, but also to relate almost exclusively to the actual conditions of the working of railways as between the Railway Companies and the public; that is to say, it chiefly relates, speaking very broadly, to various acts on the part of one or the other, all of which conduce more or less to the satisfactory carrying on of the railway business from day to day. Besides this, however, there are many other branches of the question which our law—I can only speak broadly in a sketch of this kind—does not touch at all. I may illustrate these branches by mentioning some of them, namely, the nature of the numerous obligations of a Company in constructing a line and also in working it, in order to ensure its safety and convenience; to secure due accommodation for landholders on both sides of the line and protection of their rights; to enforce proper enquiries into the various questions, or the accidents, which may arise; to regulate rates and fares so that the public shall not be at the mercy of the Companies as powerful monopolists; to provide for the systematic keeping of accounts in the interests both of the Government, which, I am sorry to say, still very often has to guarantee the Railway Companies, and also of the shareholders themselves. All these and various other matters, of more or less importance, have hitherto been provided for in the best way possible in the contracts between the Government and the Companies, or by departmental rules and regulations. As between State Railways, however, such matters have been entirely within the discretion of the Executive Government. These contracts have been found in the course of years to be often incomplete or obscure; each new railway which has been established or guaranteed has got for itself a separate contract, the result being that there is a very considerable amount of difference in each regarding matters of the same nature, which ought to be dealt with uniformly in all cases. Besides this, we have been urged by several of the large Railway Administrations to introduce an Arbitration Act for the settlement of differences which occasionally arise between them, owing principally to the large increase in the interchange of railway traffic in India, which is likely still to develop further with the growth of our railway systems. Experience has also shown the necessity for a compulsory reference to arbitration in certain cases, where the continuance of disputes is likely to be prejudicial to the interests of the public.

"This is, I think, a general description of the Bill which I am moving for leave to introduce, sufficient to satisfy the Council that some legislation is desirable.

"As regards the further steps to be taken, I have only to say that it is not contemplated to introduce the Bill at the present time. The rough draft of the Bill has been prepared in the Public Works Department, and all provisions in the existing contracts and in Indian Acts or English Statutes or Bills which appeared suitable have been embodied in it. What is contemplated is that this draft shall be referred to the various Local Governments, Chambers of Commerce and Railway Administrations throughout India before its introduction into the Council. I hope to be able, if the Council agree to the Motion now before them, to introduce a considerably amended draft in the course of the current session at Calcutta, after we have received and considered the various opinions which are to be called for on the measure in the manner I have indicated."

The Hon'ble Mr. Ilbert said:—

"My hon'ble friend Mr. Hope has explained that the draft which he proposes to circulate for criticism is merely a rough draft prepared by the Public Works Department.

"It has not yet been considered in the Legislative Department, and it will have to be very carefully scrutinised in that Department before it is introduced into this Council. I have read the draft somewhat hastily, and have made some suggestions as to the form and arrangement of the clauses; but the Bill raises a good many difficult questions, some of which I should like to have a further opportunity of considering, and which the Council will be in a better position to consider after the draft has received that external criticism to which Mr. Hope has explained that he proposes to submit it."

His Excellency the President said:—

"The remarks that have fallen from my hon'ble friends, Mr. Hope and Mr. Ilbert, will show that in giving my assent to the introduction of this Bill I am in no way committed to any provisions which it may contain, and which, as Mr. Hope has explained, are at present only in rough draft, and therefore not in a condition to be submitted to me. I entirely agree that it is desirable to consolidate and amend the law relating to railways in this country in various ways; and I am very glad to find that Mr. Hope proposes to consult public bodies and persons interested in railways, either as shareholders, managers of companies, or on behalf of the public, before the Bill is introduced into this Council. It will, of course, before its introduction, be submitted to my successor, Lord Dufferin, who will by that time have assumed the office of Viceroy; and for myself I have only to say that I agree that a Bill for consolidating and amending the law regarding railways in India is undoubtedly needed."

The Motion was put and agreed to.

The Council adjourned *sine die*.

Simla;
The 30th October, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29th OCTOBER 1884.

General Remarks.—The north-east monsoon continues to be favourable in Madras, and good rain has again fallen in several districts. In Bellary and Anantapur prospects have now considerably improved, and prices are falling. In Mysore the rainfall was again general, crops are in fair condition, and the prospects of the season are favourable. In Coorg agricultural prospects are good. Good rain fell throughout the Deccan and Southern Mahratta Country during the week under report; standing crops have been much benefited, and general prospects greatly improved. In a few districts the crops have been slightly damaged by excessive rain. In the Central India and Rajputana States and in the Berars and the Nizam's Territories agricultural prospects continue very good. Slight rain fell in a few districts of the Punjab, and the prospects of the harvest are very favourable. Except in the Saugor district, there was no rain in the Central Provinces, where agricultural prospects are generally good. In the North-Western Provinces and Oudh rain fell in a few districts, and prospects are uniformly good. In Bengal rain has been almost general, but was insufficient in many districts. In Tipperah more rain is still much wanted. Rain fell in the Assam districts, and the prospects of the *rabi* crop are generally good. In British Burma the condition of the crops is generally very favourable.

According to the last report of the Meteorological Department, dated 30th instant, rain has fallen generally in South Madras, and showers are reported from Rawalpindi, Rajahmundry, and Moulmein.

There is no change to record in agricultural operations. In Bombay, the Punjab, in places in the North-Western Provinces and Oudh, and in Hyderabad the *kharif* is being harvested, while ploughing and sowing for the *rabi* are generally in active progress throughout the country.

Fever is very prevalent in the Punjab and the Central Provinces, elsewhere the public health is good.

Prices are falling in Bellary and Anantapur in the Madras Presidency; in the Punjab they are fluctuating, and elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 29th)		
Bellary ...	**3·06 (average)**	**Standing crops much benefited. More rain wanted in 4 taluks. 4 deaths from cholera in Alur taluk.**
Kurnool ...	2·59 (average)	Standing crops good; sowing of white *cholum* continues; harvest early cereals, outturn below half. Small-pox in 2 taluks.
Ganjam ...	3·1 (average)	Small-pox and cholera prevalent.
Kistna ...	3·83 (average)	Standing crops generally good; harvest dry crops, outturn below average. River 2·50 feet over anicut. Small-pox, fever, and cattle-disease in places, 5 deaths from cholera in Narasaraopet taluk.
Chingleput (Madras) ...	6·6 (average)	Standing crops good; harvest paddy, outturn half. Small-pox in 3 taluks; 26 deaths from cholera.
Coimbatore ...	1·14 (average)	Standing crops good; agricultural operations progressing; harvest paddy and *ragi*, outturn nearly average.
Tanjore ...	2·76 (average)	Standing crops generally good; harvest wet and dry crops, outturn below average. 40 deaths from cholera.
Madura ...	1·62 (average)	Prospects considerably improved. 127 deaths from cholera.
Malabar ...	·94 (average)	Second crop cultivation progressing. Small-pox and cattle-disease prevalent; slight fever in two taluks; 3 deaths from cholera.
Travancore ...	·14	Cultivation progressing. 5 deaths from cholera.
		General Remarks.—General prospects. North-east monsoon continues favourable. Prospects much improved. Prices falling in Bellary and Anantapur.
Bombay—(Oct. 29th)		
Karachi ...	**No rain**	**Total rainfall from 1st January in Dadu 6·87, in Ketibandar 10·30, and in Mugalbhin 13·56. River at Kotri on 27th, 8 feet 8 inches against 6 feet 9 inches on same date last year. Fever generally prevalent; cholera in Kotri, 69 cases, 38 deaths, also in Johi and Shah Hassan, 19 cases, 13 deaths; small-pox in 5 villages in the districts, 12 fresh cases, no deaths, 9 remaining sick; cattle-disease in 7 talukas, some loss in 5. Rats doing damage in Jati and Shahbandar, and in Manjhand taluka. *Barani* cultivation suffered from insufficient rain. *Makri* insect in Shahbandar. Prices—wheat, red rice, and *bajri* in Karachi 26, 28 and 40; in Sehwan 36, 32 and 36; in Mirpur Batoro 22, 36 and 44; and in Sakro 17, 28 and 48 pounds per rupee, respectively.**
Hyderabad ...	.....	River at Kotri on 27th, 8 feet 8 inches against 6 feet 9 inches last year. *Rabi* operations in progress. A few cases of sporadic cholera in Hyderabad town and suburbs; fever in 12, small-pox in 2, and cattle-disease in 4 talukas. Prices of grain steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	.....	Slight damage to *bajri* in Gogo and Dhandhuka by recent rain; reaping of *kharif* crops in progress, and sowing of *rabi* commenced. Fever in some talukas. Wheat 30 and *bajri* 32 pounds per rupee.
Baroda ...	.....	Public health fair, but fever pretty general everywhere; cattle-disease in Vijapur. Prices—*bajri* 31½ and rice 23 pounds per rupee.
Surat ...	·11	Total rainfall 40·3. *Kharif* reaping commenced; crops healthy; sowing of *rabi* progressing. Fever in some talukas. *Juari* 30 and *nagli* 42 pounds per rupee.
Nasik ...	*Nil*	Weather fair and dry. *Kharif* crops being harvested; *rabi* sowing completed in places. Public health good. Wheat 40, *bajri* 33½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	·64 on 22nd	Total to date 73·70, being 3·47 above average; average abnormal temperature 1° cool. Vapour in air excessive from 22nd to 24th, and very defective from 25th to 28th; wind normal. Thunder and lightening on 22nd and 23rd.
Poona ...	Rain throughout the district, maximum at Purandhar, 8·38; minimum at Sirur, ·86.	State of crops improved by late rains; *rabi* sowing progressing. *Bajri* 32 and *juari* 34; in Poona, *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Rain general throughout the district, varying from 4·47 in Pahura to ·73 in Kopargaon.	Harvesting in progress in Parner, Shrigonda, Jamkhed, Sheogaon, Newasa, Kopargaon, and Sangamner; condition of *kharif* crops good; sowing of *juari* completed in Akola. Fever still prevalent in Sheogaon. *Bajri*—maximum 54 pounds per rupee in Sangamner, minimum 36 in Shrigonda; *juari*—maximum 60 pounds in Sangamner, minimum 36 in Shrigonda.
Sholapur ...	Sholapur, 3·67; Barsi, 5·73; Madha, 1·97; Karmala, 1·65; Pandharpur, 1·88; Sangola, 2·20; Malsiras, 2·29.	*Juari* 34 pounds 2 tolas and *bajri* 32 pounds 29 tolas. Prospects tolerably good, except in Malsiras. Easterly winds set in, and no more rain expected.
Dharwar ...	Gadag, 7·52; Ranibennur, 6·64; Karajgi, 6·33; Navalgund and Nargund nearly 6·0; Mundgod, 4·10; Mundargi and Kod, 2·26; Dharwar, 1·26; Hubli, 1·50; Bankapur and Kalghatgi, 1·14; Hangal, ·89 and 4·50.	Rain has done immense good; rice and other crops which had suffered from drought will improve; sowing of late crops has commenced, except in Gadag taluka, where it is hindered by excess of moisture. Scarcity of drinking-water in eastern talukas has been removed. All danger of famine or necessity for relief works is past. Cholera prevails slightly. Great fall in prices; average prices—*juari* 46 and rice 26 pounds per rupee.
Kanara ...	Karwar, 2·54; Kumpta, 5·81; Sirsi, 2·50; Haliyal, 1·0.	Total rainfall 96·6. Common rice in Karwar 15 seers; district average 14¾ seers per rupee. Rice harvest continues on coast. Weather settled fair.
Rajkot ...	·12	Total rainfall 39·20. General health good. Weather little cold in the morning and hot during the day. Fever generally prevails; cholera in Dhoraji, Kutiana, and Jetpur. *Bajri* 37 and *juari* 54 pounds per rupee.
		General Remarks.—Good rain throughout the Deccan and Southern Mahratta Country. Standing crops much benefited, and general prospects greatly improved; crops slightly damaged by excessive rain in parts of Ahmedabad, Khandesh, Colaba, and Ratnagiri, and by rats and insects in parts of Karachi. *Kharif* harvest and *rabi* sowing in progress in almost all districts. Cholera in parts of 10 and fever in 15 districts; small-pox and cattle-disease in a few places.
Bengal—(Oct. 28th)		
Chittagong ...	6·04	Rain has done immense good to standing crops; prospects favourable. Prices stationary. Cholera still reported, otherwise public health good.
Dacca ...	2·17	Prospects of crops favourable, owing to recent rain; pulses being sown; lands being ploughed for chillies, mustard, and potatoes. Public health generally good.
24-Pergunnahs (Calcutta)	1·68	Prospects of *amun* paddy generally satisfactory; sowing of *rabi* crops commenced; sugarcane doing well. Common rice selling at from 11½ to 15½ seers per rupee. Fever continues in parts of Bassirhat division, otherwise public health good. State of river unusual.
Moorshedabad ...	2·16	Weather cloudy and warm, rough and stormy on 24th and 25th; rain has been general and will do much good, specially to *amun*. Public health fairly good.
Rajshahye ...	2·20; Nattore, 2·46; Nowgong, 1·76.	Weather bright and cool. Rain of 24th, 25th, and 26th will save *amun* to a great extent and facilitate *rabi* sowings. Health fair.
Burdwan ...	1·52; Cutwa, 3·82; Culna, 1·89; Raniganj, 1·47.	Prospects of crops improved by late rain which was general; the outturn of *amun* paddy expected to be about 4 annas; *aus* crop about 8 annas and sugarcane about 12 annas. Prices slightly falling. Public health good.
Rungpore ...	0·51	Weather seasonable. Prospects of crops continue bad. Price of rice stationary. Fever prevalent.
Bhagalpur ...	0·69	Prospects of crops good. Rice selling at 13½ seers per rupee. Some cases of cholera and small-pox in Banka and some fever in the north.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Purneah ...	1·18	Prospects of crops very fair in north, but poor in south; *rabi* sowing progressing. Common rice 14 seers per rupee. Rivers falling. Fever very prevalent.
Patna ...	3·86	Sowing of *rabi* crops and poppy continues; rain benefited standing paddy and *rabi*. Cholera still prevails in Seelao thana in Behar sub-division, otherwise public health good.
Durbhunga ...	4·14	Prospects of standing paddy and early *rabi* sowings improved; late *rabi* sowings partially injured. Prices stationary. Public health on the whole good.
Hazaribagh ...	Slight rain	Weather clear and becoming cool. Prospects of paddy good; sowing of winter crops continues. Public health good.
Cuttack ...	1·02	Weather fair. *Sarad* crops coming into ear; *laghu sarad* ripening; *rabi* crops germinating. Prices of rice almost unchanged. Cholera abating; public health generally good.
		General Remarks.—Rainfall almost general, but insufficient in many districts. Much rain still wanted in Tipperah. Sowing of *rabi* crops going on in many districts and that of poppy and potatoe in a few; prospects of crops generally fair; paddy crops not good in Beerbhoom, Nuddea, and Rungpore. Prices almost stationary. Some cholera and fever prevails in several districts and small-pox in two; public health generally good. It is reported that in Nawada that only 2 or 3 beggars died rather from disease than starvation.
N. W. Provinces and Oudh—		
Benares (Oct. 23th)	2·0 of rain in each tahsil on 25th.	Seeds sown a day or two before the rains, will not germinate, and will have to be resown; sugarcane and rice will all benefit by the rain. Slight fever lingers in the city, otherwise the health of men and cattle good. Prices fluctuate slightly. Grain having fallen; barley and *bajri* having risen in price.
Gorakhpur („ 27th)	Slight rain at the end of week.	*Rabi* sowings in progress. Cholera almost disappeared. Prices stationary.
Fyzabad („ 29th)	Rain during the week from 2 to 7.	*Rabi* sowing in progress. Prices stationary. Health of people and condition of cattle good.
Lucknow („ 27th)	No rain	Weather clear. *Rabi* sowing continues. *Hewat* crops doing well. Supplies sufficient. Prices steady. Health of people good. Slight cattle-disease still reported in tahsil Malihabad.
Rae Bareli („ „)	.....	Weather fine, but occasionally cloudy. *Rabi* sowings in full swing. Health of men and condition of cattle good. Prices almost stationary.
Allahabad („ 28th)	Heavy fall of rain on 25th in 7 tahsils; 3·6 at Sadr; much less in other places.	The fall of rain is most beneficial to all crops. Health excellent. Prices rising slightly owing to demand for seed.
Cawnpore („ 27th)	No rain	Weather clear and cool. *Kharif* prospects fair; *rabi* ploughings and sowings in progress. Fever and ague generally prevalent. A little cattle-disease in pargana Narwal. Prices steady.
Farukhabad („ 28th)	.....	Weather fine. *Rabi* sowings in progress. *Bajri* being cut. Health of people improving.
Sitapur („ „)	.....	Westerly winds prevail. *Rabi* sowings continue. Cholera reported last week has abated.
Bareilly („ 27th)	.....	Crops in good condition. Prices stationary. Fever prevalent; cattle healthy.
Kumaon („ „)	Slight shower once	Weather again clear. *Kharif* crops all cut; ploughing for *rabi* begun. Prices stationary. General health good; cattle-disease continues.
Agra („ 28th)	No rain during week	*Kharif* being harvested and *rabi* being sown. No cholera; fever very prevalent. Prices steady.
Jhansi („ „)	.....	*Mung*, *urd*, and *tili* are being cut; *rabi* ploughing and sowing in progress. Prices show a tendency to fall. Fever prevalent.
Meerut („ 27th)	No rain	Wind mainly west, but shifting occasionally. Fever continues, cholera at Hapur and Meerut. Supplies sufficient. Prices steady.
		General Remarks—Rain in a few districts during the week. Agricultural condition uniformly good. *Rabi* sowings in full progress. Prices steady and health normal.
Punjab—(Oct. 29th)		
Delhi ...	No rain	Reaping commenced. Fever continues. Prices of wheat, barley, *bajri*, and *juari* falling; gram rising and rice stationary.
Hissar ...	.....	Fever prevalent; slight cattle-disease in Rohtak. *Kharif* being harvested and *rabi* operations progressing.
Umballa ...	.....	Fever prevalent, but improvement observable. *Makki* and rice harvested; *juari* being harvested, yield expected to be above the average; sowing of gram, barley, and mustard in progress. Prices of food-grains stationary.
Jullundur ...	.....	Ordinary fever. *Kharif* harvest being reaped and *rabi* ploughings progressing. Prices steady.
Amritsar ...	·10	Slight fever. Harvest in good state. Prices of wheat, barley, and rice stationary; gram and *bajri* rising and *juari* falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Sialkot ...	Rain at Zafarwal, ·2	Health good. Harvest above average. Prices stationary.
Ferozepore ...	·10	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices of wheat, gram, and barley rising.
Lahore ...	·3	General health good. State of crops fair.
Rawalpindi ...	·70	*Kharif* outturn above average in two and average in four tahsils.
Mooltan ...	.....	Fever still prevalent. Expected *kharif* yield average; *rabi* sowings commenced. Prices stationary.
Dera Ismail Khan ...	.....	Health and prospects good. Coming yield above the average and very general.
Peshawar ...	.....	Slight fever. *Kharif* crops being harvested. Prices falling.
		General Remarks.—Slight rain during the week. Fever still prevalent. *Kharif* crops still being harvested, and the yield expected to be generally good; *rabi* sowing commenced in several districts. Prices of food-grains fluctuating.
Central Provinces—(October 29th)		
Nagpur ...	.....	Weather clear and cold. *Kharif* crops in good order; *rabi* sowings in progress. Fever prevalent. Prices stationary.
Jubbulpore ...	*Nil*	Weather clear and cool. Reaping of *dhan* and *rabi* sowings continue. Fever in places. Wheat 25 and rice 14 seers per rupee.
Saugor (Oct. 28th)	He vy rain at Kurai	Paddy and *kodo* being cut; *til*, cotton, and *juari* not matured; *rabi* land under preparation; sowings commenced in places. Fever prevalent. Prices steady.
Seoni ...	*Nil*	Weather clear. *Rabi* sowings progressing; much land dried up through sudden cessation of rain. Prices slightly fallen.
Hoshangabad ...	*Nil*	Weather cloudy. *Rabi* sowings continue. Fever prevalent. Rain wanted. Wheat 22 and rice 11 pounds per rupee.
Khandwa ...	*Nil*	Weather cloudy. Prospects fair Health good and prices stationary.
Raipur ...	*Nil*	Weathers till lately cloudy, now clear. Rice caring; wheat and pulse being sown. Fever prevalent. Prices steady. Wheat 30 and rice 30 pounds per rupee.
Sambalpur (Oct. 25th)	*Nil*	Weather cloudy. Fever and cattle-disease abating. Prospects good. Common rice 28 seers per rupee.
		General Remarks.—Clear weather prevails throughout almost the whole province; the late clouds have disappeared without rain, except in the Saugor district. *Rabi* sowings are in progress, and prospects are generally good. Fever is very prevalent in some districts.
British Burma—(Oct. 29th)		
Akyab (Oct. 25th)	7·07	Total rainfall 186·30. Cholera continues in town and district. Crop prospects good. Season favourable.
Bassein („ „)	3·92	Total rainfall 101·69. Cattle-disease in one township.
Rangoon („ „)	1·93	Total rainfall 86·66. Slight cholera in town.
Amherst (Moulmein) („ „)	1·51	Total rainfall 175·40. General appearance of crops good.
Tavoy („ „)	0·54	Total rainfall 160·47. Prospects of crops excellent.
Pegu („ „)	0·60	Total rainfall 108·99. Crops promising.
Henzada („ „)	2·38	Total rainfall 89·22. Crop prospects favourable; plants strong and healthy.
Prome („ „)	0·47	Total rainfall 41·30. More rain wanted, but plants are growing well.
Toungoo („ „)	1·7	Total rainfall 72·7.
Thayetmyo („ „)	0·79	Total rainfall 32·63½. Crops generally promising fairly.
		General Remarks.—Cholera continues in Arakan; cattle-disease in Bassein; elsewhere health and health of cattle good. Crop prospects unaltered.
Assam—(Oct. 29th)		
Gauhati ...	1·42 during the week ending 28th instant.	Mornings and evenings cool and foggy. Prospects of *sali* crop favourable and that of tea not good. Rain much needed. Sowing of mustard commenced. Public health fair.
Sylhet ...	9·48	State and prospects of crops good. Small-pox, cholera, and fever reported from the interior.
Cachar ...	1·30	Weather wet for first four days. Sowing of winter crops commenced; prospects of *sail* crop and tea fairly good. Common rice 13 5/16 seers per rupee. Public health good.
Dibrugarh ...	0·82	Weather cool. Prospects of *sali* crop fair; mustard being sown. District healthy.
Mysore and Coorg—(Oct. 29th)		
Bangalore ...	1·12	Rain has been very general all over the province, and tanks have received a partial supply. Crops in fair condition and prospects of season favourable. Cattle improving and public health good. Prices stationary.
Mysore ...	1·76; Tumkur, 4·8; and Kadur, 3·52.	
Mercara ...	·99	Harvesting of *ragi* continues; picking of cardamoms retarded owing to rains; coffee ripening; prospects of rice crops favourable. Public health good, except in parts of Nanjarajpatna taluka where fever is prevalent.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar & Hyderabad—(Oct. 29th)		
Amraoti ...	.....	Weather cool. *Kharif* crops thriving; *rabi* sowings progressing. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Weather cool. Crops in good condition; *rabi* being sown.
Hyderabad ...	Average rainfall during the week, ·69.	Total rainfall from 1st January 31·51. *Kharif* crops being reaped; *abi* crops progressing; *rabi* sowings concluded. No sickness. Prices—wheat 13¾, coarse rice 12½, white *juari* 16¾, yellow *juari* 20¾, and *tur* 21½ seers per halli sicca rupee.
Central India States—(Oct. 29th)		
Indore ...	*Nil*	Total rainfall 36·64. Weather warmer. Health good. Prospects of crops excellent.
Morar (Gwalior) ...	*Nil*	Total rainfall 32·68. Fever still in Morar and Lashkar; 2 cases of cholera among Europeans in Morar.
Sutna ...	*Nil*	Weather clear. Prospects good. Fever still very prevalent.
Sehore ...	0·19	Weather clear. Prospects of crops good, but *kharif* much injured by late rains. Health good.
Nowgong ...	0·02	Health good; fever decreasing. Weather fine and agricultural prospects improving.
Manpur (Bhopawar) ...	*Nil*	Prospects good. 3 cases of cholera occurred at Piplaudi and Burwani on the 12th October 1884, and one at Aujar on 13th; none fatal. Sowing of *rabi* crops in progress.
Neemuch ...	*Nil*	Weather seasonable. Sowings of gram, wheat, and opium have commenced. Public health good.
Goona ...	0·80	Health and prospects good. *Rabi* sowings commenced.
Agar ...	0·33	Health and prospects good.
Rajputana—(October 29th)		
Abu (Oct. 29th)	*Nil*	Weather cold and seasonable.
Sirohi ...	.....	No report received.
Marwar (Oct. 24th)	.....	Jodhpur city tank almost full. Fever again prevails. Crops good. Weather close, nights cool. Prices stationary.
Meywar („ 26th)	.....	Tanks and wells good. Health fair. Sowing commenced. Weather seasonable.
Harowti („ 25th)	*Nil*	Weather seasonable. Sowings continue. Fever prevalent, otherwise health good.
Jhallawar („ 24th)	.....	Weather seasonable. Health and prospects good.
[illegible] („ 26th)	.....	[illegible] Fever prevalent.
Jeypore („ „)	.....	Sowings in progress. Prices steady. Health good.
Bhurtpore ...	.....	No report received.
Ulwur (Oct. 28th)	*Nil*	Fever decreasing in parts. *Kharif* crops being gathered.
Nepal—(Oct. 23rd)		
Katmandu ...	Drops	Weather good. State and prospects of the crops fair.

T. W. HOLDERNESS,
Offg. Secy. to the Govt. of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

Nº 45. CALCUTTA, SATURDAY, NOVEMBER 8, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

(*i*) Exclusive of the mileages of Wardha Coal and Mysore State Railways (45+129).

Simla,
the 1st November 1884.

FRED. FIREBRACE, *Major, R. E.*,
Under-Secretary.

SUPPLEMENT TO

The Gazette of India.

Nº 46.} CALCUTTA, SATURDAY, NOVEMBER 15, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

			Chaprowre ditto Tail													
			Etawah ditto Tail													
			Bhognipur ditto Baltrai Escape . . .													
			Deduct drainage water 249 + water received from Upper Ganges Canal .													
			Executive Engineer, Northern Division, Ganges Canal, reports—Late rice was supplied with water during the month. Rainfall not much caused all demands to cease. Grain sown during the last few days destroyed by rainfall and some kharif crops injured. Rice still very high.													
			Executive Engineer, Bulandshahr Division, Ganges Canal, reports—There has been no irrigation during the month; the 5,721 acres increased are difference between actual measurement and assumed area by Shuddur.													
			Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—Average rainfall 1·41 inches.													
			Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—Low supplies of water and closure of Bithur distributary. Decrease on former is due to on 25th and continued until the 3rd and 4th October. All the rivers in very heavy flood and most of the country south of the Tarai submerged. Canal banks much cut about by drainage-breaches. Rice has not suffered much except early rice in parts; makka and cotton damaged; gram and linseed which had been sown is spoilt. No serious damage to canals reported except at Kicha weir, where river set on to left bank above weir and breached into canal. The heavy and late rains will cause delay in rabi sowings, and these will be scarcely any demand for canal water. Much spoilt crop will be sown again.													
			Executive Engineer, Dún Canals, reports—Demand slack during month. Late rain at end of month caused some damage to crops. Rice harvest in progress.													
			Meerut, Bijnor, Jhánsi, and Hamírpur returns reported blank.													
			No remarks from the other Divisions.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RESULTS OF THE MEASURES ADOPTED IN BRITISH INDIA WITH THE VIEW OF EXTERMINATING WILD ANIMALS AND VENOMOUS SNAKES DURING THE YEAR 1883.

Extract from the Proceedings of the Government of India, in the Home Department (Public),—No. 53—1899-1901, under date Simla, the 14th November 1884.

Read—

Home Department Resolution Nos. 48—1618-1628, dated the 3rd November 1883, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India during the year 1882.

Read also the following letters from Local Governments and Administrations submitting returns for the year 1883:—

From the Government of Madras, No. 656A., dated 19th May 1884.
" " of Bombay, No. 1954, dated 7th June 1884.
" " of Bengal, No. 2839J.D., dated 25th September 1884.
From the Government of the North-Western Provinces and Oudh, No. 325—III-201-25, dated 21st June 1884.
From the Government of the Punjab, No. 1759, dated 10th July 1884.
From the Chief Commissioner of the Central Provinces, No. 3376-162, dated 11th July 1884.
From the Chief Commissioner of British Burma, No. 421-13R.R., dated 20th March 1884.
" " " of Coorg, No. 1638-I-202, dated 2nd February 1884.
" " " of Assam, No. 590, dated 16th May 1884.
From the Resident at Hyderabad, No. 1406., dated 2nd May 1884.
From the Chief Commissioner of Ajmere-Merwara, No. 473, dated 20th June 1884.

RESOLUTION.

The statement appended to this Resolution shows for each province the number of persons and cattle killed by wild animals and snakes, and the number of such animals and snakes destroyed, with the amount of rewards paid for their destruction during the year 1883 as compared with the previous year.

2. These figures show that the total number of persons killed has risen from 22,125 to 22,905. By far the largest mortality occurred, as in former years, in Bengal and the North-Western Provinces and Oudh, where the number of persons returned as killed was 10,455 and 6,298 respectively. Of the total number of deaths in all provinces, 20,067 were from snake bite. Of the remaining deaths 956 were caused by tigers, 287 by wolves, 217 by leopards, and 1,139 by "other animals." Under the last head the largest mortality occurred in Bengal, where 420 deaths were caused by "jackals." The correctness of this figure seems to be open to question, and should be verified. In the number of deaths caused by "other animals" in Bengal, some caused by domesticated animals are included. This, as the Local Government has pointed out, ought to have been omitted.

3. The reported loss of cattle by wild animals and snakes amounted to 47,478, or 771 more than in the previous year. The largest loss occurred in Bengal and in the North-Western Provinces and Oudh, where 11,710 and 9,240 head were killed. Madras comes next with 9,099, the Central Provinces with 4,006, and Assam with 3,838, the loss reported from other provinces being comparatively small. Tigers, leopards, and wolves are reported to have killed respectively 16,563, 19,054, and 6,704, while only 1,644 are reported to have been killed by snake bite.

4. A satisfactory increase from 18,591 to 19,890 has taken place in the number of wild animals destroyed, the rewards paid for their destruction having proportionally increased from Rs. 1,26,782 to Rs. 1,52,003.

5. As in previous years, the only provinces which show a large destruction of snakes are Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab. The increase in the number destroyed in the last-named province was from 6,065 to 48,873, and in Bombay from 263,348 to 293,230; but in neither province does there appear to have been any material difference in the number of deaths from snake bite.

The Government of India can add nothing to the general remarks recorded in their Resolution reviewing the corresponding returns of last year. It can only reiterate the earnest hope that Local Governments and Administrations will energetically prosecute whatever practical measures may, under local conditions, seem best fitted to reduce the lamentable loss of life which is yearly caused by wild animals and snakes.

ORDER.—Ordered, that this Resolution be forwarded to Local Governments and Administrations and to the Foreign Department for information, and that it be published in the Supplement to the *Gazette of India*.

Statement showing the results of the measures adopted in British India with the view of exterminating wild animals and venomous snakes during the year 1883.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORTS FOR THE MONTH OF OCTOBER 1884.

No. 143 MET.
27-12.

Extract from the Proceedings of the Government of India Revenue and Agricultural Department, (Meteo.) dated Calcutta, the 21st November 1884.

READ—

Summary of the Weather Reports for October 1884.

The unsettled weather, which characterised September over the greater part of the country, continued, though in a somewhat modified degree, during the early part of October.

The month opened with a heavy downpour of rain over the North-West Himalaya and adjoining parts of the Punjab and North-Western Provinces, due to the small cyclonic vortex which originated in Rohilkand at the close of the previous month. This downpour was apparently heaviest at Naini Tal, where

on the 1st 10·70 inches,
on the 2nd 5·30 do.,
and on the 3rd 3·50 do.

of rain was measured. At this time the seat of lowest pressure lay over Sind, the Punjab, and Rajputana, but subsequently on a rise of pressure in North-Western India it was transferred to Behar and Chutia Nagpur, and there resulted a decided indrought of southerly and easterly winds from the Bay towards Bengal, Behar, and the lower part of the North-Western Provinces. These winds brought rain as far west as Agra and continued until the 4th or 5th. After that date, north-westerly and westerly winds were established all over Northern India. About the 6th rain ceased generally for a time, but

from the 24th to the 27th it again fell rather heavily over Bengal and extended to many stations in Upper India. In Bengal and on the Central Indian Plateau, about the 15th, the wind shifted to north-east and continued to blow from between north and east till the end of the month.

In the Peninsula very unsettled weather prevailed. During the first week the winds were chiefly from the westward, and slight local showers fell; but about the 9th the wind shifted to the ordinary winter monsoon direction, and till the close of the month, north-east winds have held over the whole of the Peninsula with much more than the normal steadiness. The following figures show the exceptional character of the wind during this month:—

Wind resultants.

	Allahabad.	Calcutta.	Bombay.	Madras.	Negapatam.
October 1884 .	N 45° W 44%	N 16° E 47%	N 62° E 68%	N 19° E 37%	N 49° W 23%
October Average	N 50° W 16%	N 48° W 11%	N 25° W 33%	N 35° E 10%	S 47° W 86%

Two travelling cyclonic depressions have been recorded—the first in the neighbourhood of Negapatam on the 16th, whence it travelled to Madura on the 17th and lay off Calicut on the 18th: the second appeared off the coast of the Northern Circars on the morning of the 24th, advanced to Gopalpur on the 25th, and broke up over Lower Bengal or the head of the Bay on the 26th.

The rainfall returns show that, with the exception of Cutch, the Indus Valley, and the stations of Jullunder, Jeypore, Mount Abu, Deesa, and Ahmedabad, rain fell in all parts of the country. In the east of the Punjab, the whole of the North-Western Provinces and Oudh, and in North Behar and Bengal, there was an excess. But on the Central Indian Plateau and eastward in Orissa, Lower Bengal, the Northern Circars, and also in Burma, there was less rain than usual. In Rajputana, the Saugor and Nerbudda Territories, Khandesh, Central India, and as far south as the Deccan, Hyderabad, and the Bellary District, the rainfall, though on the whole in excess, varied very considerably at different stations. On the Conkan and Malabar Coasts it was also irregular, but in the Carnatic there was a general and considerable excess.

The greatest excess was at Naini Tal, where the total rainfall was 18·6 inches more than usual; and the greatest defect at Vizagapatam, where it was 5 inches short of the average.

The mean pressure was above the normal at all stations; most so in North Western India (except at the hill stations where the excess was but slight), and least in the south of the Peninsula. During the first few days there was a general deficiency, but after the first week the barometer rose above the average over the greater part of India, and so continued till the close of the month. In the south of the Peninsula, however, there was a second period of depression between the 17th and 19th, coinciding with the disturbance noticed above.

With the local exceptions of Multan, Silchar, Ratnagiri, Goa, Karwar, Colombo, Rangoon, and Moulmein, the monthly temperature was everywhere below the normal average. In the North-Western Provinces, the western parts of the Central Provinces, Central India, Rajputana, Khandesh, and Hyderabad, the depression continued throughout the month.

Humidity was generally above the average, but in Lower Bengal, Orissa, the eastern parts of the Central Provinces, and on the South Konkan Coast, it was below it.

The following table shows the amount of rainfall according to the districts adopted in last month's report:—

Districts.	Average Rainfall in October.	Difference from the average in October 1884.
	Inches.	Inches.
Punjab, West	0·63	− 0·12
„ East	0·63	+ 1·57
North-Western Provinces, Trans-Gangetic	1·40	+ 4·51
„ „ „ Cis-Gangetic	1·07	+ 3·06
Behar	3·09	+ 0·44
Northern Bengal	5·21	+ 3·08
Assam, Cachar	4·77	− 0·86

SIMLA,
The 15th November 1884.

R. B. BUCKLEY,
Offg. Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE FORTNIGHT ENDING THE 19th NOVEMBER 1884.

GENERAL REMARKS.—Heavy rain fell at Madras and Tanjore during the fortnight under report, and the standing crops have been injured to some extent in both districts. In other parts of the Presidency, the rainfall has been beneficial to the crops, and general prospects are now fair. More rain is still wanted in Bellary and Anantapur. In Mysore the crops are generally in good condition and prospects are favourable. In Coorg the prospects of the rice crop are good; coffee-picking has commenced, and the cardamom crop has yielded an outturn above the average. Little or no rain has fallen in the Bombay Presidency during the fortnight, but agricultural prospects are on the whole good everywhere. In Sholapur and Kaladgi more rain would be beneficial to the *rabi* crop. Prospects continue favorable in the Central India and Rajputana States, and in the Berars and the Nizam's territories. No rain has fallen in the North-Western Provinces and Oudh and in the Punjab since the publication of the last reports, but agricultural prospects continue satisfactory. In the Central Provinces prospects are favourable. In Assam the prospects of the crops are generally good. Except in two or three districts where very slight rain occurred, no rain fell in Bengal during the past fortnight. Prospects are generally good, except in a few places where the *aman* paddy is still backward. In Nalhati not more than a six-anna crop is expected.

There is no change to record in agricultural operations. Harvesting of the *kharif* and ploughing and sowing for the *rabi* continue in progress generally throughout the country.

The public health is generally good, and prices are stationary with local fluctuation.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Nov. 12th)		
Bellary	·04	Standing crops need rain; harvest wet and dry crops yield moderate; one death from cholera.
Kurnool	·56	Standing crops good; harvest early cereals yield below half; small-pox in two taluks.
Ganjam	·008	Small-pox, cholera and cattle-disease prevalent.
Kistna	·07	Standing crops generally good; harvest paddy and *ragi* outturn about half; small-pox, fever, and cattle-disease; 72 deaths from cholera; river 2·15 feet over anicut.
Chingleput (Madras)	14·58	Two villages flooded in one taluk, no loss of life; standing crops good, but in parts of four taluks damaged by excessive rain; harvest paddy yield half; small-pox in three taluks; 12 deaths from cholera.
Coimbatore	1·49	Standing crops good, but dry crops damaged by insects in parts of seven taluks; agricultural operations progressing harvest paddy and *ragi* outturn about average.
Tanjore	12·06	Standing crops damaged by excessive rain in coast taluks; harvest paddy outturn below average; 50 deaths from cholera.
Madura	1·20	Heavy freshets in Vaigai; prospects considerably improved; 18 deaths from cholera.
Malabar	2·45	Second crop cultivation progressing; small-pox and cattle-disease and slight fever in two taluks.
Travancore	3·03	Standing second crop paddy good; 6 deaths from cholera.
		General Remarks.—General prospects improving, but excessive rainfall in coast districts, from Nellore southwards to Tanjore and Tinnevelly; 25 inches at Madras during the week, and upwards of 30 at Cuddalore; floods at Tuticorin; rain still wanted in parts of the Ceded districts.
Madras—(Nov. 19th)		
Bellary	Average ·14	Standing crops need more rain; harvest wet and dry crops, yield below average; 5 deaths from cholera.
Kurnool	„ ·62	Standing crops good; harvest early cereals, outturn below half; small-pox in one taluk.
Ganjam	„ ·04	Small-pox, cholera and cattle-disease prevalent.
Kistna	„ ·79	Standing crops generally good; harvest wet and dry crops, outturn about half; small-pox, fever and cattle-disease; 44 deaths from cholera; river, 2 feet over anicut.
Chingleput (Madras).	„ 6·17	Several tanks have breached; standing crops good, but those on low ground flooded and damaged by rain; harvest paddy, yield below half; small-pox in two taluks; 67 deaths from cholera.
Coimbatore	„ 4·02	Standing crops good; but dry crops damaged by insects and excessive rain in parts of eight taluks; agricultural operations progressing; harvest paddy and *ragi*, outturn about average.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*contd.*		
Tanjore . . .	Average 6·07	Standing crops damaged by excessive rain in coast taluks; harvest wet and dry crops, outturn below average; 37 deaths from cholera.
Madura . . .	,, 1·18	Flood in Vaigai; prospects considerably improved; 17 deaths from cholera.
Malabar . . .	,, 2·44	Standing second crop paddy good; small-pox and cattle-disease slight; fever in two taluks; 3 deaths from cholera.
Travancore . . .	1·08	Standing second crop paddy good; small-pox prevalent; 12 deaths from cholera.
		General Remarks.—General prospects improved and now fair; rain still wanted in Bellary and Anantapur.
Bombay—**(Nov. 5th)**		
Kurrachee . . .	No rain . . .	Total rainfall from 1st January in Johi 6·58, Mirpur Batoro 6·24, and Shahbandar 13·28; river at Kotri on 3rd, 8 feet against 6 feet 5 inches on same date last year; fever generally prevalent; one case of cholera in Kurrachee fatal; total cases and deaths to date in Kotri 79 and 53; Shahhassan 50 and 33; Johi 3; Wali Shah 5 and 4; Guba 5 and 2; Dachar 2 and 1; disease ceased at Shahhassan and Johi; two cases of small-pox in Manora imported from Jedda; disease also in five villages; in the districts 4 fresh cases, 1 death, 3 remaining sick; cattle disease in seven talukas; loss of 26 cows, 15 sheep and goats and 40 buffaloes in five talukas; rats doing damage in Jati and Shahbandar; *keon* worm in Daba and Manjhand; *mokri* insect in Shahbandar taluka; drought in Manjhand taluka; harvesting of *kharif* crops commenced, and good outturn expected; prices—wheat, red rice, and *bajri* in Karachi 26, 28 and 40; in Manjhand 30, 32, and 42; in Ghorabari 22, and 32, and in Jati 24, 30 and 32 pounds per rupee respectively.
Hyderabad . . .	. . . . .	River at Kotri on 2nd, 8 feet 1 inch against 6 feet 6 inches last year; sporadic cholera in Hyderabad, Gidu Bandar, Mohbat and Nowshahro talukas; total number of cases 84, and of deaths 62; fever in 9; small-pox in one and cattle disease in three talukas; wheat 29, *bajri* 42, *jowari* 44, red rice, 26, and white rice 20 pounds per rupee.
Ahmedabad . . .	. . . . .	Reaping of *kharif* and sowing of *rabi* crops in progress; fever in some talukas; wheat 30 and *bajri* 33 pounds.
Baroda . . .	. . . . .	Fever continues; cattle-disease in Vijapur; harvesting of *kharif* and sowing of *rabi* in progress; *bajri* 32 and rice 23 pounds.
Surat . . .	No rain	*Kharif* harvest continues; preparation for *rabi* progressing; fever in some talukas; *jowari* 30 and *nagli* 42 lbs.
Nasik . . .	. . . . .	Weather fair and dry; *kharif* reaping and *rabi* sowing vigorously continued; *til* and *kuliol* in parts of Kalvan suffered owing to excessive rain; public health good; one death from cholera at Nasik wheat 40, *bajri* 33½ and rice 21.
Colaba (Bombay) . .	. . . . .	Abnormal temperature 0° to 2° cool; vapour in air normal; wind normal.
Poona . . .	*Nil*	Reaping of *kharif* and sowing of *rabi* progressing; prices *bajri* 33 and *jowari* 35 lbs. per rupee; in Poona, *bajri* 28 and *jowari* 30 lbs.
Ahmednagar . .	*Nil*	Reaping of *kharif* crops in progress in all talukas; *jowari* crop in good condition; slight cattle-disease in Parner; slight fever in Sheogaon and Akola; *bajri*, maximum 54 lbs. per rupee in Sangamner, minimum 6 lbs. in Shrigonda; *jowari*, maximum 60 lbs. per rupee in Sangamner, minimum 35 lbs. in Karjat.
Sholapore . . .	*Nil*	*Jowari* 36 lbs. 29 tolas, and *bajri* 35 lbs. 31 tolas per rupee; prospects tolerably good; young crops promising well.
Dharwar . . .	Maximum in Ranibennur 3·28, in Karajgi 2·40, in Kod 1·15, in Hangal 1·70, in Bankapur ·59, in Mundarji ·48, and in Hubli ·25; *nil* in other talukas.	More rain required in Dharwar, Navalgund, Bankapur, Kalghatgi, Kod and Ron talukas; rice crops suffered from drought in Dharwar taluka; sowing of late crops in progress; sowing of cotton resumed in Navalgund; slight cholera in Dharwar and Navalgund talukas; *jowari* 50 and rice 28 lbs. per rupee.
Kanara . . .	In Kumpta 8·26 and in Haliyal ·52.	Common rice in Karwar 16 seers per rupee; district average 15¼ seers; rice harvest completed in Karwar, and continues on coast talukas; above Ghat crop ready for harvest; sugarcane and garden produce healthy; fever in Supa taluka; cattle-disease in Karwar taluka.
Rajkot . . .	. . . . .	General health good; weather hot; fever generally prevails; slight cholera in Dhorajat; crops in good condition; *bajri* 38 and *jowari* 56 lbs. per rupee.
		General Remarks.—Rain in Dharwar, Belgaum, Kaladgi and Kanara; more still wanted in six talukas of Dharwar and parts of Kaladgi; general prospects throughout the Deccan and Southern Mahratta Country tolerably good; *kharif* harvest completed in Ratnagiri and part of Kanara; in progress in other districts; *rabi* sowing continues in almost all districts; fever general; cholera in parts of ten districts; smallpox and cattle-disease in seven.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay (Nov. 12th)—		
Kurrachee . . .	*Nil*	Total rainfall to date in Sehwan 8·54, Manjhand 10·86, and in Sajawal 6 55; river at Kotri on 10th, 7 feet 7 inches against 6 feet 2 inches last year; fever generally prevalent; cattle-disease in five talukas; loss of 200 cows and bullocks and 267 buffaloes in Ghorabari and Sakro; cholera ceased at Kotri; disease now in following talukas; total to date in Sajawal 40 cases, 25 deaths; in Mirpur Batoro 68 cases, 48 deaths; in Shahbandar 23 cases, 12 deaths; 2 cases of smallpox in Manora; disease recovering in six villages in districts; 9 fresh cases, 2 deaths, 7 remaining sick; prices—wheat, red rice, and *bajri* in Kurrachee, 26, 28 and 40 lbs.; in Kotri nil, 36 and 42 lbs.; in Shahbander 20, 50 and 50, and in Tatta 26, 34 and 48 lbs. per rupee respectively.
Hyderabad . . .	. . . . .	River at Kotri on 8th, 7 feet 8 inches against 6 feet 3 inches last year; sporadic cholera here and there; 88 persons attacked; 49 died; autumn fevers general; cattle-disease in one taluka; prices steady.
Ahmedabad . . .	. . . . .	Reaping of *kharif* and sowing of *rabi* crops in progress; fever in some talukas; wheat 31 and *bajri* 32 lbs. per rupee.
Baroda . . .	. . . . .	Slight fever still continues; smallpox in Tilakvada; harvesting of *kharif* and sowing of *rabi* continues; prices—*bajri* 33 and rice 23lbs. per rupee.
Surat . . .	. . . . .	*Kharif* harvest and *rabi* sowing progressing; fever in five talukas; *jowari* 31 and *nagli* 42 lbs. per rupee.
Násik . . .	. . . . .	Weather fair; *kharif* reaping continues; *rabi* sowing nearly completed; public health good; wheat 40, *bajri* 33½, and rice 21 lbs. per rupee.
Colaba (Bombay) . .	·60 on 6th instant .	Total rainfall to date 74·30, being 3·61 above average; abnormal temperature; 0°cool to 1° warm; vapour in air excessive on 6th, and defective on 7th; wind normal; thunder and lightning on 6th and 7th.
Poona . . .	Light showers in four talukas.	Reaping of *kharif* and sowing of *rabi* progressing; *bajri* 33 and *jowari* 36 lbs. per rupee; in Poona, *bajri* 30 and *jowari* 33 lbs. per rupee.
Ahmednagar . .	. . . . .	Harvesting of *kharif* crops completed in Parner, and in progress in other talukas; *jowari* crop is in good condition everywhere, except in Sheogaon, where it is withering for want of moisture; more rain would be beneficial to the *rabi* crops; slight fever prevalent in Sheogaon and Akola; slight cattle-disease in Parner; *bajri*—maximum 54 lbs. per rupee in Kopargaon, minimum 36 lbs. in Shrigonda; *jowari*—maximum 60 lbs. per rupee in Sangamner, minimum 35 lbs. in Karjat.
Sholapore . . .	·25	*Rabi* crops promising; more rain required in Madha, Pandarpur, Sangola and Malsiras; *jowari* 37 lbs. 18 tolas, and *bajri* 36 lbs. 36 tolas, per rupee.
Dharwar . . .	Rain at 3 stations only in Bankapur ·44, in Ranibennur ·30 and in Kod ·6.	More rain is required throughout the district; early crops have improved by the late showers; rice is being reaped in Mugud, parts of Hangal, Kalghatgi and Kod; sowing of late crops in progress; cotton crops good; slight cholera in parts of the district; average prices, rice 30 and *jowari* 51 lbs. per rupee.
Kanara . . .	In Kumpta ·3	Common rice in Karwar 16 seers per rupee; district, average 14¼ seers; rice harvest on coast; crop ready for harvest above Ghat; smallpox, 1 death in Sirsi; fever in Supa taluka; cattle-disease in Karwar; weather cloudy and warm.
Rajkot . . .	. . . . .	Mornings cold; general health good; fever prevalent; cholera in Dhoraji; early crops being reaped; late crops in good condition; *bajri* 37 and *jowari* 51 lbs. per rupee.
		General Remarks.—Slight rain in parts of Poona, Sholapore, Dharwar and Belgaum; more still required in parts of Ahmednagar and Sholapore and throughout Dharwar, Belgaum and Kaladgi; *kharif* harvest and *rabi* sowing in progress in several districts; fever general, cholera in parts of ten districts; smallpox and cattle-disease in few places.
Bombay—(Nov. 19th)		
Kurrachi . . .	. . . . .	Kurrachi river at Kotri on 17th, 7 feet 2 inches against 5 feet 7 inches last year; 2 cases of cholera in Rohri, fishing village 12 miles from Kurrachi and 6 from inland talukas; loss of 153 buffaloes and 282 cows and bullocks in Shahbander and Ghorabari; harvesting of *kharif* progressing; small-pox in nine villages in districts, 13 fresh cases, 1 death, 12 remaining sick; at railway station 2 cases, both fatal; in Mirpur Batóro 9 cases, 5 deaths; Shahbander 82 cases, 46 deaths, Jati 11 cases, 4 deaths; Sajawal 34 cases, 31 deaths; fever generally prevalent; cattle-disease in four talukas; prices—wheat, red rice and *bajri* in Kurrachi 26, 28 and 40; in Sehwan 36, 32 and 56, in Sajawal 28, 40 and 44, and in Sakro 18, 22 and 48 lbs. per rupee respectively.
Hyderabad . . .	. . . . .	*Rabi* operations in progress; prospects of crops good; sporadic cholera here and there; fresh cases since last report 21, of which 17 fatal, besides 10 deaths of persons previously attacked; autumnal fever general; small-pox and cattle-disease in three talukas; wheat 28, *bajri* 40, *jowari* 44, red rice 26, and white rice 20 lbs. per rupee; days unusually hot; no cholera in Hyderabad.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad		*Kharif* harvest and *rabi* sowing progressing; fever in some talukas; wheat 30 and *bajri* 33 lbs. per rupee.
Baroda		Fever continues; harvesting of *kharif* and sowing of *rabi* continue; prices—*bajri* 32 and rice 23 lbs. per rupee.
Surat		*Kharif* harvest nearly completed; *rabi* sowing progressing; standing crops healthy; fever in all talukas; *jowari* 31 and *nagli* 42 lbs. per rupee.
Nasik		Public health generally good; reaping of *kharif* crop still continues; *rabi* crops in good condition, wheat 40, *bajri* 34, and rice 21 lbs. per rupee.
Kolaba (Bombay)		Abnormal temperature 0° to 2° cool; vapour in air defective from 14th to 18th; abnormal wind from east-north-east on 15th.
Poona		Cold weather set in; reaping of *kharif* and sowing of *rabi* nearly completed; prices—*bajri* 35 and *jowari* 36 lbs. per rupee; in Poona, *bajri* 30 and *jowari* 32 lbs.
Ahmednagar		Harvesting of *khaur* in progress; *rabi* crops good except in Sheogaon, where slightly damaged from blight; slight fever in Sheogaon and Akola; *bajri*, maximum 51 lbs. per rupee in Akola, minimum 36 lbs. in Shrigonda; *jowari*, maximum 60 lbs. per rupee in Sangamner; minimum 35 lbs. in Kurjat.
Sholapur	Little rain in few villages of Sholapur Taluka.	*Rabi* crops good in Barsi taluka, in others middling; more rain required; cold weather set in; *jowari* 37 lbs. 18 tolas and *bajri* 36 lbs. 29 tolas per rupee.
Dharwar	In Hangal 1·26 Ranibennur ·12 Karajgi ·10 Kod ·21	More rain urgently required throughout the district; rice being reaped; sowing of late *jowari* and wheat completed in Bankapur and Ranibennur, and in progress in others; cotton crops good; slight cholera in Kalghatgi and Ron; rice 22 to 33 and *jowari* 38 to 76 lbs. per rupee.
Kanara	In Karwar ·39 Sirsi ·29	Total rainfall 96·45 inches; common rice in Karwar 16 seers per rupee, district average 14½ seers; preparing ground for second crop in Hanawar; rice harvest above Ghats; small-pox one death in Sirsi; fever in Hanawar and Haliyal talukas; cattle-disease in Karwar subsiding; weather cold.
Rajkot		General health good; weather cool; fever generally prevalent; *bajri* 38 and *jowari* 53 lbs. per rupee.
		General Remarks.—Slight rain in parts of Sholapur, Belgaum, Dharwar and Kaladgi; more still required in these districts for *rabi* crops; *kharif* harvest nearly completed in Surat, Poona, Satara and Kolaba; in progress in other districts; *rabi* sowing continues in several districts; *rabi* crops slightly damaged by blight in one taluka of Ahmednagar; fever general; cholera, small-pox and cattle disease in parts of seven districts.
Bengal—(Nov. 11th)		
Chittagong	*Nil*	Weather cloudy and hot; prospects of standing crops good; prices stationary; cholera still reported.
Dacca	*Nil*	Harvesting of sugarcane continues; prospects of standing crops good; mustard and other winter crops being sown.
24-Pergunnahs	*Nil*	Prospects of *aman* paddy satisfactory, reaping of the crop has begun; sowing of *rabi* crops still going on; common rice selling at from 11½ to 15 seers per rupee; public health generally good; state of river usual.
Moorshedabad	*Nil*	Cold weather has now fairly set in; *amun* paddy, so far as it has been planted out, is now likely to give a good outturn; all *rabi* crops doing very well; public health generally good, but cholera prevails in Moorshedabad city, and there have also been some cases in thana Shamshergunge, in sub-division Jungipore.
Rajshahye	*Nil*	Weather somewhat cloudy; prospects of *amun* paddy and spring crops fairly promising; cholera rather general in Nowgong sub-division.
Burdwan	*Nil*	Prospects of crops in Raneegunge good, Culna fair, Sudder and Cutwa less so, and in some tracts bad; price of rice falling very slightly.
Rungpore	*Nil*	Weather seasonable; prospects of *amun* paddy bad; coarse rice selling at Rs. 3-8 per maund; prices of other food-grains rising; malarious fever prevails.
Bhagulpore	*Nil*	Prospects of *amun* paddy fair, *kurthi* doing well, and *rabi* has germinated splendidly; oilseed crops doing very well; price of rice stationary.
Purneah	*Nil*	Prospects of standing crops, except paddy, good; ploughing for *rabi* crops going on; price of common rice stationary; fever prevalent; rivers falling.
Patna	*Nil*	*Rabi* crops growing well; paddy and *jowar* promising; poppy sowings have been somewhat retarded by late rain; some of the earlier sowings survive, but the majority of fields will have to be re-sown; public health good.
Durbhanga	*Nil*	Paddy getting into ear; *rabi* coming on well; prices stationary; cholera reported from the town.
Hazaribagh	*Nil*	Weather clear and cool; cutting of *amun* paddy commenced; *rabi* crops doing well in places, but the crops are not yet completely sown; coarse rice selling in the town at 16 seers per rupee; general health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack	*Nil*	Weather cloudy; early *sarad* being cut, late *sarad* flowering and promising well; *rabi* crops flowering; price of rice stationary; cases of cholera are reported from several places, otherwise public health good.
Sarun		42,000 bigahs in Alleegunge Sub-Agency, and 24,500 bigahs in Chuprah have been sown with poppy; weather favourable for the cultivation of the crop; seeds coming on well everywhere.
Gya		Poppy sowings nearly completed; young plants doing well, and prospects good, if weather continues favourable; water in some places badly wanted, and a great demand for advances for sinking *kucha* wells.
Monghyr		Sowing of poppy crop going on; early sowings failed owing to extreme heat, the seed is now germinating well; weather more favourable.
		General Remarks.—No rain fell in any of the reporting districts; the cold weather has fairly set in; prospects of standing *amun* paddy generally good, but in Rungpore they are bad, and in Bogra very unfavourable; *rabi* crops doing well; storm and rain in Noakhally and Tipperah caused some damage to paddy plants when flowering; in Chittagong Hill Tracts the recent rain has done much damage to the cotton crop, and has retarded the sowing of mustard; cutting of *amun* paddy has commenced in one or two districts; harvesting of sugarcane continues; price of rice is slightly falling in a few districts, and in others it is almost stationary; public health good, though cholera and fever prevail in some districts.
Bengal—(Nov. 18th)		
Chittagong	·01	Weather seasonable; prospects of crops favourable; prices steady; cholera continues, otherwise general health good.
Dacca	*Nil*	Prospects of crops good; harvesting of *amun* paddy and sugarcane continues; chillies, mustard and other winter crops being sown.
24-Pergunnahs	*Nil*	Prospects of standing crops continue satisfactory; sowing of *rabi* crops nearly finished; harvesting of *amun* paddy and sugarcane has commenced; price of common rice varies from 12 to 15½ seers per rupee; public health generally good; state of river as usual in this season.
Moorshedabad	*Nil*	Weather seasonable; the estimated outturn of *amun* paddy continues, on the whole, a six-anna crop, but here and there only a two-anna crop will be reaped; the six-anna estimate is the general average for the whole district; *rabi* crops generally doing well, but in some quarters they have been damaged by catterpillars; cholera still prevails in and near Moorshedabad city, and there are sporadic cases of the disease elsewhere, but not of a serious type; common rice ranges from 14 seers at Berhampore to 14½ seers in the Jungipore sub-division.
Rajshahye	*Nil*	Weather seasonable; prospects of *amun* paddy and spring crops fairly promising; cutting of paddy has commeneed in parts of the Nattore and Nowgong sub-divisions; fever general; cholera still reported from Nowgong.
Burdwan	*Nil*	Prospects of crops generally unfavourable; price of rice stationary with a tendency to rise in the sudder station.
Rungpore	*Nil*	Weather seasonable; prospects of *amun* paddy bad; tobacco, mustard and potato still being sown; other winter crops doing well; prices of grain rising; malarious fever prevalent.
Bhagulpore	*Nil*	Prospects of paddy fair and those of *rabi* good; rice is selling 13 seers and 14 chittaks per rupee.
Purneah	*Nil*	Paddy crop poor except that on low lands; other crops promise well; ploughing is still going on for *rabi*; common rice 14 seers per rupee; fever prevails over the district; rivers falling.
Patna	*Nil*	Sowing of *rabi* crops continues; paddy and *juar* promising; *rahur* has commenced to flower; public health good.
Durbhanga	*Nil*	Early paddy will be soon ready for cutting; *rabi* coming on well; prices stationary; public health good.
Hazaribagh	*Nil*	Weather cold and pleasant; harvesting of paddy continues; prospects of *rabi* crops good; poppy sowings nearly completed, but hardly half the seeds has germinated owing to scanty water-supply; coarse rice selling at 18 seers per rupee at the sudder station; general health good.
Cuttack	*Nil*	Weather cool; early *sarad* being harvested; prospects of late *sarad* good; *rabi* crops flowering; price of rice falling; cholera continues in some places, otherwise public health good.
Gya		Sowing of poppy almost completed, prospects generally continue very satisfactory, though in some of the eastern villages tank irrigated land is still unsown; advances for sinking *kutcha* wells will be made very soon.
Sarun		Of 75,918 bighas of land engaged for poppy, 74,831 bighas have been sown; plants from first sowings have six and eight leaves, and prospects excellent.
Mozufferpore		Poppy plants germinating well and prospects favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Monghyr . . .	. . . .	Sowings of poppy crop still going on; prospects continue good. *General Remarks.*—No rain fell in any of the districts of the province except in Chittagong, Noakhally and Pooree, where the fall was very slight; weather generally cool; *amun* paddy being harvested in several districts, the prospects of this paddy in Burdwan, Moorshedabad, Rungpore, and Bogra have not improved; in thana Nulhati, in Birbhoom, a six-anna crop is expected, and in Backergunge the crop has sustained some injury by the storm of the 1st instant; prospects elsewhere generally good; winter crops are still being sown and are doing well; fever and cholera prevail.
N.-W. Provinces and Oudh— (Nov. 13th)		
Benares („ 11th)	. . . .	Sugarcane doing well; seed for *rabi* harvest being sown; opium sown and germinating well, as also *rabi* seeds sown previously; no disease of men or cattle; bazars well supplied; prices steady, except barley, which is falling.
Allahabad („ „)	*Nil*	*Rabi* flourishing; health excellent; prices steady.
Gorakhpur („ 10th)	*Nil*	Weather cloudy towards end of week; *rabi* sown and germinating well; prices steady; public health good.
Jhansi („ 11th)	. . . .	*Kharif* crops ripening; sowing of *rabi* in progress; prices fluctuating; fever continues.
Rai Bareily („ 11th)	. . . .	Weather fine, but sometimes cloudy; *rabi* germinating well; general health good; supplies sufficient; prices steady.
Cawnpore („ 10th)	*Nil*	Cold increasing; *kharif* being cut; *rabi* prospects good, and the early sowings have, in parts of the district, germinated; fever and ague prevalent; no cattle-disease; prices steady.
Furrakabad („ 11th)	. . . .	Health of people improving; *kharif* crops being cut; *rabi* sowings have come up well; prices stationary.
Agra (Nov. 11th)	*Nil*	*Kharif* being harvested and *rabi* sowings continue; fever prevalent in all pergunnahs; prices steady.
Bareilly („ 10th)	. . . .	Condition of crops good; prices almost stationary; fever still prevalent; occasional sporadic cholera; cattle healthy.
Meerut („ „)	. . . .	Weather favourable; crops doing well; supplies sufficient; prices steady; sickness much decreasing; no cholera cases reported.
Kumaun („ „)	. . . .	Weather fair; wheat has been sown in many places; prices stationary; general health good; cattle-disease continues.
Lucknow („ „)	. . . .	Weather fair; *rabi* sowing nearly finished; *bajra* is being harvested; maize crop promises well; supplies abundant; health of people good, but slight cattle-disease continues in tahsil Maliabad.
Partabgarh („ 11th)	. . . .	Prices almost steady; *rabi* coming on splendidly; *juar* being cut; general health good; poppy sowings far advanced and are germinating well; prospects favourable.
Sitapur („ „)	. . . .	Westerly winds have prevailed; *rabi* sowings are nearly over and prospects are favourable.
Fyzabad („ „)	*Nil*	Weather fair; *rabi* sowings nearly finished; prices steady; health of people good.
		General Remarks.—There was no rain during the week; the *kharif* is being cut; *rabi* crops, including poppy, are being sown and are germinating well; supplies are sufficient and prices remain steady; the health of the people and the condition of cattle continue normal.
N. W. P. and Oudh— (Nov. 19th)		
Benares (Nov. 18th) .	No rain . .	Prospects of sugarcane good; sowing for *rabi* nearly finished; opium germinating well; no disease of men and cattle; prices fluctuating slightly and inclined to fall; bazars well supplied.
Gorakhpore („ 17th) .	No rain . .	*Rabi* germinating well; opium prospects good; some cholera in Nepal frontier; prices stationary.
Fyzabad („ 18th) .	No rain . .	Weather fine; *rabi* germinating well; general health good; poppy sowings are now rapidly progressing.
Lucknow („ 17th) .	. . . .	Weather fine; west wind; *rabi* sowing continues; *mash*, *mathi* and *juar* crops are being harvested; sugarcane doing well; condition both of men and cattle good; supplies sufficient; prices stationary.
Rae Barelli (Nov. 17th)	. . . .	Weather seasonable; wind westerly; *rabi* sowings completed; crops germinating well; general health good; supplies abundant; prices steady.
Partabgarh („ 18th)	. . . .	Prices falling; *rabi* prospects excellent; general health good.
Allahabad . („ 18th)	No rain . .	Crops flourishing; prices falling; health excellent.
Cawnpore . („ 17th)	No rain . .	Weather cold; *rabi* prospects good; poppy sowings have commenced all over the district, and prospects of crop are favourable in parganas Shiurajpur, Cawnpore, Ghatampore and Narwal; but a loss is anticipated in parganas Rasulabad, Akbarpur, Derapur, and Bhognipur, in consequence of the Ktawah branch of the Ganges canal being unable to supply water for irrigation; fever and ague prevalent; no cattle-disease; prices firm.
Farakhabad („ 18th)	. . . .	Health of people improving; *kharif* crops still being cut; *rabi* sowings have come up well; prices stationary.
Sitapur . („ 18th)	. . . .	Westerly winds still continue; the *hemwant* crops are nearly cut, and the *rabi* sowings are germinating well; no cattle sickness reported, but cholera has not left the district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N-W. P. & Oudh—*contd.*		
Bareilly . (Nov. 17th)	. . . .	Crops good; slight cholera, but decreasing; fever also decreasing; prices falling.
Kumaon . („ 17th)	. . . .	Normal weather; *rabi* sowings progressing; health fair; prices still high; cattle-disease very virulent.
Agra . („ 18th)	No rain . .	*Kharif* nearly cut; *rabi* sowings going on; fever abating; prices steady.
Jhansi . („ 18th)	. . . .	*Kharif* crop being cut; *rabi* prospects good; prices falling; condition of people and cattle good.
Meerut . („ 17th)	. . . .	Weather clear and cold; *kharif* harvest almost completed; cotton crop very fair; *rabi* sowings in progress everywhere; wheat germinated well, and prospects good; fever decreasing; supplies ample, and prices easy.
		General Remarks.—No rain is reported during the week; the weather is seasonable; *kharif* harvest is nearly completed; *rabi* crops, including poppy, are thriving; markets are well supplied, and prices show a tendency to fall; health of the people and condition of cattle, except in Kumaon, where cattle-disease of a virulent type prevails, continue normal.
Punjab (Nov 12th)—		
Delhi	. . . .	Fever still prevalent; reaping almost completed; prices falling.
Umballa . . .	. . . .	Fever still prevalent but abating; *jowar* and *munj* being harvested, yield expected to be above average; wheat sowing commenced; prices stationary.
Jullundur . . .	. . . .	Slight fever; *rabi* sowings commenced; *kharif* crops being cut; prices stationary.
Amritsur . . .	. . . .	Health and crops good; prices almost stationary.
Ferozepore . . .	. . . .	Fever still prevalent; cattle-disease in 3 or 4 villages of the Zira tahsil; probable yield of *kharif* crops good; *rabi* sowings commenced; prices of grain has fallen; prices of other food-grains are stationary.
Siálkot . . .	. . . .	Health good; outturn of *kharif* above average; prices stationary.
Rawalpindi . . .	. . . .	*Kharif* outturn above average in four and average in two tahsils; general health good; cattle-disease in two tahsils; prices falling.
Peshawar . . .	. . . .	Slight fever; *rabi* sowings commenced; rain wanted; prices falling.
Mooltan . . .	. . . .	Fever abating; *kharif* harvested; yield average; *rabi* sowings in progress; prices stationary.
Dera Ismail Khan .	. . . .	Health and prospects good; coming yield of harvest above average.
		General Remarks.—No rain during the week; fever still prevalent in a few districts; *kharif* nearly harvested; *rabi* sowings in progress; prices stationary in some districts and falling in others.
Punjab— (Nov. 19th)		
Amritsar . . .	. . . .	Health and crops good; prices rising.
Sialkot . . .	. . . .	Health good; *rabi* sowings in progress; prices stationary.
Ferozepore . . .	. . . .	Fever prevalent; *kharif* crops being cut; *rabi* being sown; prices fluctuating.
Lahore . . .	. . . .	Health and crops good; prices steady.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EXECUTIVE OFFICERS AND ENGINEERS OF HER MAJESTY'S MARINE IN THE JUNIOR GRADES ENTITLED TO THE PERSONAL ATTENDANCE OF A CIVIL SURGEON WHEN THEY REQUIRE TO BE TREATED ON SHORE.

No. 18
514—26.

Extract from the Proceedings of the Government of India, in the Home Department (Medical),—under date Calcutta, the 26th November 1884.

Read—

Home Department Resolution No. 12—334-51, dated the 16th August 1884.

RESOLUTION.

The Resolution read directs that, with certain exceptions noted in paragraph 2 thereof, all officers of Government, whether gazetted or not, drawing less than ₹250 a month, will no longer be entitled to the gratuitous medical attendance at their own residences of a Civil Surgeon. The Governor General in Council is further pleased to extend the exception to the case of the Executive Officers and Engineers of Her Majesty's Marine in the junior grades who, though drawing a salary of less than ₹250 a month, will be entitled to the personal attendance of the Civil Surgeon when they require to be treated on shore.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations for information;

that a copy be forwarded to the Military (Marine) Department for information; and

that a copy be forwarded to the Surgeon General with the Government of India for information.

Also, that the Resolution be published in the *Gazette of India* for general information.

(True Extract.)

A. MACKENZIE,
Secretary to the Government of India.

D. M. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch.*)

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE FORTNIGHT ENDING THE 26th NOVEMBER 1884.

GENERAL REMARKS.—With the exception of British Burmah, Madras, Mysore and Coorg, and two districts in the Punjab, no rain is reported for the past week from any of the reporting stations.

The prospects of the *rabi* are good in Bombay, except in one or two districts where more rain is wanted; in the North-Western Provinces and Oudh, the Punjab, the Central Provinces, and in the Berars and Hyderabad. Sowings have been completed or are approaching completion in most Provinces. The *rabi* is also doing well in Bengal, except in two or three districts where the crops have been damaged by insects.

The *kharif* harvest continues in progress generally throughout the country. In Bengal the *amun* paddy is being cut in many districts, a fair outturn being expected in some. In Assam the condition of the standing crops is generally good. Agricultural prospects are favourable in British Burmah, and reaping has commenced in parts. In Madras general prospects are fair, but more rain is wanted in the districts of Bellary and Anantapore, which suffered most this year.

Harvesting is in progress in several districts, but the outturn is below the average. In Mysore the crops are generally in good condition, and prospects are favourable.

The public health is generally good, but slight cholera, smallpox and fever exist in some Provinces.

Prices remain unchanged, except in Bengal and the North-Western Provinces and Oudh, where they show a tendency to fall, and in the Punjab, where they are fluctuating.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Nov. 26th)		
Bellary	Average ·04	Standing crops need more rain; harvest wet and dry crops, yield below average; 3 deaths from cholera.
Kurnool	„ ·04	Standing crops good; harvest cereals, outturn below average; smallpox in 2 talukas; 11 deaths from cholera.
Ganjam	*Nil*	Smallpox, cholera, and cattle-disease prevalent.
Kistna	*Nil*	Standing crops generally good; harvest wet and dry crops, outturn below average; river 3 feet over anicut; smallpox, fever, and cattle-disease prevalent; 29 deaths from cholera.
Chingleput (Madras)	Average 1·86	Some tanks have breached; standing crops good in 2 talukas; in parts of others damaged by rain and floods; harvest paddy, yield below half; smallpox in 3 talukas; 56 deaths from cholera.
Tanjore	„ ·06	Standing crops generally good, but large tracts damaged by late floods and rain; harvest wet and dry crops, outturn below average; 72 deaths from cholera.
Coimbatore	„ ·22	Standing crops good; but dry crops damaged by insects and excessive rain in parts; harvest wet and dry crops, outturn, *wet*, average, *dry*, below average; smallpox in one and fever in 2 talukas; 17 deaths from cholera.
Madura	„ ·25	Prospects considerably improved; 59 deaths from cholera.
Malabar	„ ·10	Standing 2nd crop paddy good; smallpox and cattle-disease slight; fever in 2 talukas; 10 deaths from cholera.
Travancore	*Nil*	Standing 2nd crop paddy good; smallpox prevalent; 12 deaths from cholera.
		General Remarks.—General prospects fair; more rain wanted in Bellary and Anantapur.
Bombay—(Nov. 26th)		
Hyderabad		*Rabi* operations in progress; prospects of crops good; no cholera throughout the district; autumnal fever general; smallpox in 3 and cattle-disease in 5 talukas; wheat 28, *bajri* 40, *jowari* 44, red rice 24, and white rice 20 lbs. per rupee.
Ahmedabad		*Kharif* harvest and *rabi* sowing progressing; fever in some talukas; wheat 31 and *bajri* 32 lbs. per rupee.
Baroda		Fever continues, slight cattle-disease in Kadi taluka; harvesting of *kharif* crop completed; sowing of *rabi* in progress; opium sowing commenced in Kadi division; prices—*bajri* 32 and rice 23 lbs. per rupee.
Surat		*Kharif* harvest nearly completed; *rabi* sowing progressing; standing crops healthy; fever in some talukas; *jowari* 32 and *nagli* 42 lbs. per rupee.
Nasik		Reaping of *kharif* crops nearly completed; *rabi* crops healthy; public health generally good; *bajri* 24, wheat 40, and rice 21 lbs. per rupee.
Colaba (Bombay)		Temperature abnormal; 3° cool from 19th to 21st, rose to 1° warm by the 23rd and fell back to 1° cool by the 25th; vapour in air defective from 19th to 22nd; wind normal.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Poona		Harvesting of *kharif* in progress; *rabi* crops good; prices—*bajri* 34 and *jowari* 37 lbs. per rupee; in Poona *bajri* 30 and *jowari* 33 lbs. per rupee.
Ahmednagar		Harvesting of *kharif* in progress; *rabi* crops good except in Sheogaon and Shrigunda; *jowari* and gram damaged in former, and *jowari* in latter; fever in Sheogaon and Akola; cattle-disease in Kopargaon; *bajri* maximum 51 lbs. per rupee in Akola, minimum 36 lbs. in Nagar; *jowari* maximum 60 lbs. per rupee in Sangamner; minimum 35 lbs. in Karjat.
Sholapore	No rain	*Rabi* crops withering in places excepting Barsi taluka; cotton crops slightly injured in Barsi and very inferior in Karmala taluka; three cases of cholera in Sangola taluka, no deaths; *jowari* 35 lbs. 10 tolas and *bajri* 36 lbs. 20 tolas per rupee.
Dharwar		Rain urgently required throughout the district; rice being reaped, sowing of late *jowari* and wheat completed; cotton crops good; slight cholera in Kalghatgi; rice 26 to 34 and *jowari* 38 to 81 lbs. per rupee.
Kanara		Common rice in Karwar 16 seers per rupee; district average 14¾ seers; rice harvest nearly completed above Ghats; two deaths from smallpox in Sirsi; fever in Honavar, Siddapur, Supa, and Yellapur talukas; weather fair.
Rajkot		General health good; weather cool; fever generally prevalent; *bajri* 37 and *jowari* 52 lbs. per rupee.
		General Remarks.—No rain; *rabi* crops in good condition except in parts of Sholapur and Kaladgi where they are withering for want of rain; more rain also required in parts of Belgaum and Dharwar; *jowari* and gram in two talukas of Ahmednagar and cotton in one taluka of Sholapur slightly damaged; fever general; cholera in parts of six districts; cattle-disease in seven and smallpox in four districts.
N.-W. Provinces and Oudh— (Nov. 27th)		
Benares (Nov. 25th)	No rain	Prospects of opium remain unchanged; irrigation for *rabi* crops is going on, and prospects are good; late rice is being cut in Ganjpur; no disease of men or cattle; bazars well supplied; prices fair.
Gorakhpur („ 24th)	No rain	*Rabi* and poppy all sown and promising well; public health good; prices steady.
Fyzabad („ 25th)	No rain	Prospects of *rabi* crops good; opium has germinated fairly; public health and condition of cattle good.
Lucknow („ 24th)		Weather fine; west wind; outturn of the *kharif* crops good; poppy sowings continue; young *rabi* is being irrigated; condition and health of men and cattle good; supplies sufficient; prices steady.
Rai Barelli („ „)	*Nil*	Weather clear and cold; *rabi* prospects good; health of people and condition of cattle good; supplies ample; prices steady.
Partabgarh („ 25th)	*Nil*	Crops coming on splendidly; prices almost stationary; general health good.
Allahabad („ „)	No rain	Crops flourishing; prices falling; health excellent.
Banda („ 26th)	*Nil*	Weather clear; *kharif* crops being cut; *rabi* sowings continue; prospects good; fever prevalent; no distress.
Ballia („ 25th)	*Nil*	Weather fine; spring crops doing well; health good.
Farakhabad („ „)	*Nil*	*Rabi* prospects good; poppy sowings nearly completed; health of people improving; prices steady.
Sitapur („ „)		West wind during week; *rabi* being irrigated and prospects are favourable; no cattle disease; cholera continues in one tahsil; opium crop reported flourishing.
Bareilly („ 24th)	*Nil*	Crops satisfactory; market falling slightly; fever still prevalent.
Kumaon („ „)	*Nil*	Weather fair; wheat sowings nearly over and germination has begun in some places; general health good with the exception of smallpox and fever in some places; cattle-disease continues; prices stationary.
Agra („ 25th)	No rain	*Rabi* and poppy sowing nearly completed; *kharif* being harvested; fever abating; prices slightly falling.
Jhansi („ „)	*Nil*	*Rabi* crops germinating well; prices falling; condition of people and cattle good.
Meerut („ 24th)	*Nil*	Weather seasonable; spring sowings in progress everywhere; condition of men and cattle good; supplies plentiful; prices steady.
		General Remarks.—Kharif harvest is nearly completed; *rabi* crops including poppy are flourishing, and prospects are very favourable; markets are well supplied, and prices tend to fall; the general health of the people and condition of cattle are good.
Punjab—(Nov. 26th)		
Delhi (Nov. 25th)		Fever abating; harvesting over, outturn about average; *rabi* sowings almost completed; prices fluctuating.
Hissar		Fever prevalent; *kharif* being harvested in Rohtak, yield over average in one and average in two tahsils; *rabi* flourishing.
Jullundar		Rain wanted; health good; *rabi* sowing finished; prospects good; prices steady.
Amritsar		Health good; prices fluctuating.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*contd.*		
Ferozepore		Fever prevalent; *rabi* sown; *kharif* being cut; prices fluctuating.
Lahore		Health and crops good; prices stationary.
Rawalpindi	1·90	Health good; *rabi* sowings in progress; prices steady.
Mooltan		Fever abating; *rabi* being sown; prices stationary.
Dera Ismail Khan		Health and prospects good; coming yield expected to be above average.
Peshawar	·10	Health good; more rain wanted; prices stationary.
		General Remarks.—Slight rain in the Rawalpindi and Peshawar districts; fever still prevalent in a few districts; *kharif* nearly harvested; *rabi* sowing almost completed.
Central Provinces— (Nov. 26th)		
Nagpur		Weather cold and clear; *rabi* sowings progressing favourably, completed in Umrer tahsil; fever and cattle-disease decreasing; prices stationary.
Jubbulpore		Weather clear and cool; reaping of *kodo* and *juar* continues; *rabi* sowings in progress; prospects favourable; prices stationary.
Saugor (Nov. 25th)		*Rabi* sowings in progress; rice, *juar*, and *til* being cut; cotton picking commenced in places; health good; prices steady.
Seoni		Weather cold; threshing of *kharif* progressing; fever and cattle-disease decreasing; prices falling.
Hoshangabad		Weather cool and pleasant; *rabi* sowing continues; rain wanted; fever prevalent; prices stationary.
Khandwa		Weather clear; *rabi* sowings completed; reaping of *kharif* commenced; health good; rice 14¾, wheat 18, and *juar* 24½ seers per rupee.
Raipur		Weather clear and cool; *dhan* and *kodo* being cut; sowing of wheat going on; health good; wheat 36 and rice 23 seers per rupee.
Sambalpur (Nov. 22nd)		Weather cold; rice excellent, except on low lands; cotton and *urad* suffered from rain; *tilli* in many parts poor, other crops very fair; health good; prices stationary.
		General Remarks.—Weather cold; prospects continue favourable; health good; prices steady.
British Burma— (Nov. 26th)		
Akyab (Nov. 22nd)	*Nil*	Cholera still in town and district; crop prospects very good; total rainfall 197·07.
Bassein	1·12	Total rainfall 109·82.
Rangoon	0·15	Total rainfall 89·39.
Amherst (Moulmein).	0·37	Slight cholera; reaping progressing; total rainfall 182·56.
Tavoy	2·81	Prospects of crops very good; reaping of early crops progressing; total rainfall 165·72.
Pegu	1·09	Crops well in ear; prospects favourable; total rainfall 112·31.
Henzada	0·15	Reaping commenced in parts; total rainfall 91·24.
Prome	*Nil*	Crops reported in good condition; slight damage in parts from floods and want of rain; harvest begun; total rainfall 42·49.
Toungoo	*Nil*	General appearance of crops good; total rainfall 74·59.
Thayetmyo	*Nil*	Crops generally promising fairly; total rainfall 33·47.
		General Remarks.—Cholera continues in Arakan and has appeared in Amherst and Moulmein; slight smallpox in parts, public health otherwise good; health of cattle generally good; reaping has begun; crop prospects favourable everywhere.
Assam—(Nov. 26th)		
Gauhati	No rain during the week ending 25th instant.	Weather seasonable; mustard being sown; prospects of *sali* crop not very satisfactory; sugarcane doing well; public health fair.
Sylhet	*Nil*	State and prospects of all crops good; cholera and small-pox still prevalent in the district.
Cachar	*Nil*	Weather cold; reaping of *sali* crops continues; tea season nearly closed; common rice 12½ seers per rupee; nine deaths from cholera reported from Sadar.
Dibrugarh	*Nil*	Weather seasonable; *sali* on high lands poor, on low lands good; *matikalai* and mustard are doing well; cholera reported from North Lakhimpur Sub-Division.
Mysore and Coorg—		
Bangalore	·55	There has not been much rain in the western portions of the province; crops, however, are generally in good condition and prospects favourable; prices satisfactory; public health good.
Mysore	·45	
Coorg	1·10	Rain unseasonable and productive of more damage to standing crops than good; a good rice crop coming into ear; coffee berries improving slowly; picking commenced; slight rise of price in English market; the picking of cardamoms completed; crop good and better prices offering; disagreeable high winds prevailing, causing cold and fever.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Berar & Hyderabad—(Nov. 26th)		
Hyderabad . . .	*Nil*	Reaping of *kharif* crops concluded; reaping of *abi* rice continues; *rabi* crops prospering; no sickness; prices—wheat 12, coarse rice 13, white *juar* 18, yellow *juar* 23, and *tur* 18 seers per *halli* sicca rupee.
Amraoti . . .	. . . .	Weather cool and clear; crops in good condition; cotton-picking continues; wheat 22 and *jowari* 26 seers per rupee.
Akola . . .	. . . .	*Kharif* and *rabi* crops in good condition; cotton-picking progressing.
Central India States—(Nov. 26th)		
Indore . . .	*Nil*	No change since last report.
Morar (Gwalior) . .	*Nil*	Prospects good.
Sutna	*Nil*	Health good,
Goona . . .	*Nil*	Weather cold; health and prospects good.
Sehore . . .	*Nil*	Weather clear; prospects of crops and public health good.
Rajputana—(Nov. 26th)		
Abu . (Nov. 26th)	. . . .	Weather cold and seasonable; fever subsiding.
Sirohee . („ 16th)	. . . .	Good supply of water in tanks and wells; crop prospects and health satisfactory; weather fine.
Marwar („ 21st)	. . . .	City tanks almost full; fever abating; *kharif* being harvested; *rabi* sowings almost completed.
Harowti („ 24th)	. . . .	Weather seasonable; health good.
Jhallawar („ 21st)	. . . .	Weather cold and bright; fever prevalent.
Ajmere („ 25th)	. . . .	Weather seasonable; health good.
Jeypore („ „)	. . . .	Prospects favourable; prices steady; health good.
Ulwar („ „)	. . . .	Prices falling; fever decreasing; wells full.
Nepal—(Nov. 20th)		
Khatmandu . .	*Nil*	Weather seasonable; prospects fair.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REPORT OF SPECIAL CHOLERA COMMISSION.

No. 810, dated Calcutta, the 28th November 1884.

From—Dr. J. M. CUNINGHAM, Sanitary Commissioner with the Government of India,

To—The Secretary to the Government of India, Home Department.

I have the honour to submit, for the information of the Government, a short preliminary report by the English Cholera Commission of the results of their inquiries during their visit to India.

2. Their complete report will be passed through the press when they arrive in England, and submitted to the Under Secretary of State for India.

3. It will be observed that Messrs. Klein and Gibbes' conclusions are altogether subversive of the statements advanced by Professor Koch as to the so-called 'comma bacillus' being the cause of cholera.

Dated Calcutta, the 27th November 1884.

From—DRS. E. KLEIN and HENEAGE GIBBES,

To—The Surgeon General and Sanitary Commissioner to the Government of India.

We have the honour to report that the investigations which we have hitherto carried on in Bombay and Calcutta have yielded the following results :—

1. The statement of Koch that 'comma bacilli' are present only in the intestines of persons suffering from, or dead of, cholera, is not in accordance with the facts, since 'comma bacilli' occur also in other diseases of the intestines, *e. g.*, epidemic diarrhœa, dysentery, and in intestinal catarrh associated with phthisis.

2. The 'comma bacilli' in acute typical cases of cholera are by no means present in such numbers and with such frequency as to justify Koch's statement, that 'the ileum contains almost a pure cultivation of comma bacilli.'

3. The 'comma bacilli' are not present in the tissue of the intestine or elsewhere.

4. The 'comma bacilli' in artificial cultivations, carried out by one of us (E. K.), do not behave in any way differently from other putrefactive organisms.

5. Mucus-flakes of the ileum, taken out soon after death from typical acute cholera, contain numerous mucus-corpuscles, many of them filled with peculiar minute straight bacilli. The same bacilli occur also outside the mucus-corpuscles. They are never missed even when the 'comma bacilli' are.

6. These small bacilli have been cultivated by one of us (E. K.), and they do not behave differently from putrefactive organisms.

These small bacilli are not present in the tissues of the intestine or any other tissue.

7. No bacteria of any kind, and no organisms of known form and character, occur in the blood or any other tissue.

8. A good many experiments have been carried out by one of us (E. K.) with the following results :—

(*a*) Mice, rats, cats, and monkeys were fed with rice-water stools, with vomit, with mucus-flakes of the ileum, fresh and after having been kept for 24 to 48 hours. The animals remained normal.

(*b*) Inoculations with recent and old cultivations of 'comma bacilli,' and the small straight bacilli, as well as with mucus-flakes, were made into the sub-cutaneous tissue, into the peritoneal cavity, into the jugular vein, and into the cavity of the small and large intestine of rabbits, cats, and monkeys; but the animals remained perfectly well and normal.

9. The material which we have had hitherto at our disposal has been very good and abundant, and, as far as the microscopic work goes, we do not think we shall require any more material.

We therefore propose concluding our enquiry by the beginning of December, and hope soon after to return to England.

FORT WILLIAM,
The 4th December 1884.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3rd DECEMBER 1884.

GENERAL REMARKS.—During the past week a fair amount of rain has fallen in Madras, especially in the districts of Chingleput, Tanjore, and Travancore, but none elsewhere in the country.

In Madras harvesting is still in progress, and except in one or two places the standing crops are generally in good condition. In Mysore the crops are good and prospects fair, and in Coorg a good rice crop is expected.

In the Central India and Rajputana States general prospects continue good. In the Berars and Hyderabad cotton is being picked, and the prospects of the *kharif* and *rabi* are favourable.

In Bombay the *kharif* harvest is approaching completion and the *rabi* crops are doing well, except in parts of some districts where they are withering for want of moisture.

In the Punjab and North-Western Provinces and Oudh *rabi* sowings have been nearly finished and are germinating well. The *kharif* harvest continues in progress and agricultural prospects are very favourable.

Rabi sowings continue in the Central Provinces and, where completed, plants are coming up well.

In Bengal the *rabi* crops are generally doing very well; paddy is being harvested in many districts, and cotton is being gathered in the Chittagong Hill Tracts and Hill Tipperah.

In British Burmah the prospects of the rice crop are very favourable.

Cholera and fever prevail in many districts in Bengal; and there has been much mortality from the former disease in Chingleput, Tanjore, and Madura in the Madras Presidency; elsewhere in the country the public health is for the most part good.

Prices show a tendency to fall in Bengal, the North-Western Provinces and Oudh, and in the Punjab; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(3rd Dec.)		
Bellary	*Nil*	Standing dry crops in need of rain; wet crops under tanks generally withering; harvest wet and dry crops, yield below average; 3 deaths from cholera.
Kurnool	Average ·10	Standing crops generally good; harvest early cereals, yield below average; smallpox in 1 taluk.
Ganjam	*Nil*	Smallpox, cholera, and cattle-disease prevalent.
Kistna	. . .	Standing crops generally good; harvest paddy and *ragi*, outturn below average; river 2·45 feet over anicut; smallpox, fever, and cattle-disease prevalent; 16 deaths from cholera.
Chingleput (Madras)	Average 3·15	Standing crops damaged by excessive rain and floods; harvest paddy, yield below half; smallpox in 2 taluks; 43 deaths from cholera.
Coimbatore	„ ·41	Standing crops good; harvest wet and dry crops, outturn wet average, dry below average; fever and smallpox each in 1 taluk; 86 deaths from cholera.
Tanjore	„ 4·02	Standing crops generally good, but greatly damaged by late floods and rain on the coast taluks; harvest paddy and *cholum*, outturn below average; 93 deaths from cholera.
Madura	„ ·53	Prospects considerably improved; 90 deaths from cholera.
Malabar	„ ·52	Standing second crop paddy good, except in 2 taluks; smallpox and cattle-disease, also slight fever in 2 taluks; 6 deaths from cholera.
Travancore	2·46	Standing crops paddy good; smallpox and fever prevalent; 7 deaths from cholera.
		General Remarks.—General prospects fair; rain deficient in Bellary and Anantapur.
Bombay—(3rd Dec)		
Kurrachee	*Nil*	River at Kotri on 1st 6 feet 2 inches against 5 feet 2 inches last year; fever in all talukas; cattle-disease in 3 talukas; loss of 95 buffaloes and 59 cows and bullocks; *rabi* preparations progressing; smallpox in 8 villages, 10 fresh cases, 1 death, 24 remaining sick; cholera in 4 talukas, worst in Jati and Shabander, total to date in former 109 cases, 59 deaths, in latter 150 cases, 102 deaths; prices—wheat, red rice, and *bajri* in Kurrachi 26, 28 and 40; in Shewan 36, 32 and 50; in Tatta 26, 34 and 48, and in Shabander 20, 40 and 50 lbs. per rupee, respectively.
Hyderabad	„	*Rabi* prospects good; autumnal fever general; smallpox in 2 and cattle-disease in 5 taluks; wheat 31, *bajri* 41, *jowari* 42, red rice 26, and white rice 20 lbs. per rupee.
Ahmedabad	„	*Kharif* harvest nearly completed; *rabi* sowing progressing; fever in some talukas; wheat 31 and *bajri* 34 lbs per rupee.
Baroda	„	*Rabi* sowing in progress; opium sowing continues; fever still prevalent; prices,—*bajri* 32 and rice 23 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Surat	*Nil*	*Kharif* harvest and *rabi* sowing completed; standing crops healthy; fever in 6 talukas; *jowar* 32 and *nagli* 44 lbs. per rupee.
Násik	„	Reaping of *kharif* crops almost completed; *rabi* crops in good condition; public health generally good; smallpox in one village of Malegaon taluka; wheat 40, *bajri* 24, and rice 21 lbs. per rupee.
Colaba (Bombay)	„	Average temperature abnormal 1° cool; vapour in air defective on 2nd; abnormal wind from east-north-east on 2nd.
Poona	„	Harvesting of *kharif* nearly completed; *rabi* crops good except in Indapur and Sirur where they are withering for want of moisture; prices—*bajri* 33 and *jowari* 35 lbs. per rupee; in Poona *bajri* 30 and *jowari* 33 lbs. per rupee.
Ahmednagar	„	Harvesting of *kharif* continues; *rabi* crops good except in Sheogaon, Rahuri, and Nagar; *jowari* damaged in Shrigonda; fever in Akola, and cattle-disease in Kopargaon; *bajri* maximum 51 lbs. per rupee in Akola, minimum 36 lbs. in Shrigonda; *jowari* maximum 57 lbs. per rupee in Akola, minimum 35 lbs. in Karjat.
Sholapore	„	*Rabi* and cotton crops as in last report; sky somewhat clouded and weather warm, but now clear and cold; *jowari* 35 lbs. 4 tolas and *bajri* 35 lbs. 16 tolas per rupee.
Dharwar	„	Reaping of rice in progress, that of early *jowari* commenced; late crops withering in Navalgund and Ron for want of sufficient moisture; exotic cotton blighted in 3 talukas; rice 24 to 34 and *jowari* 30 to 74 lbs. per rupee.
Kanara	„	Common rice in Karwar 15 seers per rupee; district average 14¾ seers; rice harvest completed on coast; preparing ground for second crop in Honavar; smallpox, 1 death each in Kumta and Sirsi talukas and Supapetha; fever in Honavar, Siddapur, Yellapur, and Supa talukas; weather fair and cold.
Rajkot	„	General health good; weather cool; fever generally prevalent; cholera appeared in Kotda Sangani; *bajri* 39 and *jowari* 55 lbs. per rupee. *General Remarks.*—No rain; *rabi* crops withering from want of moisture in parts of Poona, Sholapur, Ahmadnagar, Dharwar, Belgaum, and Kaladgi; *kharif* harvest nearly completed in seven districts; in progress in others; fever general; cholera and small-pox in five and cattle-disease in eight districts.
Bengal—(Dec 3rd)		
Chittagong	*Nil*	Weather seasonable; prospects of crops fair; reaping of *amun* paddy continues; prices of food grains stationary; cholera still reported, otherwise general health good.
Dacca	„	Prospects of crops good; *amun* and *roachia* paddy being reaped; cutting of sugarcane continues; sowing of pulses going on; cholera reported from certain parts of the district.
24-Pergunnahs	„	Prospects of standing crops continue satisfactory; paddy is being cut with an outturn varying from 12 to 16 annas; winter crops doing well; price of common rice varies from 12 to 16 seers per rupee; public health generally good; state of river usual.
Moorshedabad	„	Weather bright and cool; *amun* paddy is being harvested; the general outturn for the whole district will be fully 6 annas, possibly more; all *rabi* crops doing well, except *kalai*, which has been partially damaged by caterpillars; prospects of *rabi* crops generally good; price of common rice slightly fallen, *i.e.*, 14 to 15 seers per rupee; public health unusually good, but sporadic cases of cholera occur here and there.
Rajshahye	„	Weather seasonable; harvesting of *amun* paddy continues and a fair outturn is expected; prospects of *rabi* crops generally good; public health fair, though cholera still reported from Rauinagar.
Burdwan	„	Prospects of *amun* paddy unfavourble, those of *rabi* crops improved; price of rice stationary.
Rungpore	„	Harvesting of *amun* paddy continues; other winter crops doing well; price of food grains stationary; malarious fever prevalent.
Bhagulpore	„	Paddy is being cut in places; all standing crops doing well; prospects of crops favourable; price of rice 13 seers and 14 chittacks per rupee.
Purneah	„	Yield of *aghani* crops in the north of the district generally good; little or no crop in the south; prospects of *rabi* crops good so far; sowing of wheat and barley still going on; common rice 16 seers per rupee; much fever and some cattle disease; rivers falling.
Patna	„	*Rabi* crops are growing well; paddy and *jowar* are ripening; flowering of mustard and *rahur* continues; public health good.
Durbhanga	„	Harvesting of paddy has commenced; *rabi* crops coming on well; prices falling; public health good.
Hazaribagh	„	Weather clear and cold; harvesting of paddy continues; prospects of *rabi* crops good; poppy doing well where sufficient water supply is obtainable; price of common rice ranges from 13 to 18 seers per rupee; general health of the town good; some cases of small-pox are reported from the interior.
Cuttack	„	Weather cool and clear; reaping of early *sarad* in progress, late *sarad* ripening; *rabi* and sugarcane crops growing well; price of rice has slightly fallen; cholera abating, otherwise public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Gya		Sowings of poppy completed; young plants doing excellently; prospects generally favourable, but a few showers would be of advantage, specially in two kotees.
Shahabad		Prospects of opium crop good.
Mozufferpore		Prospects of poppy crop favourable; plants look healthy and strong everywhere.
Sarun		In Alligunge Sub-Agency about 4 per cent. of poppy lands has had to be re sown; in Chupra Sub-Agency some damage has been done by grass-hoppers, otherwise weather favourable and prospects excellent.
Chumparun		Weather continues favourable for the growth of the opium crop, sowing of which has nearly been completed; young plants look healthy and prospects are very promising.
Monghyr		Sowings of poppy crop are now completed; plants are doing well; prospects good; weather continues favourable.
		General Remarks.—No rain fell during the week in any part of the Province; harvesting of paddy has commenced in many districts; *rabi* crops are generally doing very well; cotton is being gathered in the Chittagong Hill Tracts and Hill Tipperah; price of rice has slightly fallen in several districts; cholera and fever prevail in many districts and small-pox has appeared in one or two.
N.-W. Provinces and Oudh—		
Benares (Dec. 2nd)	No rain	Prospects of sugarcane good; *rabi*, which is now sown nearly everywhere, is doing well; reports of opium favourable; no sickness of men or cattle; prices inclined to fall.
Gorakhpur („ 1st)	No rain	*Rabi* crops and poppy thriving; public health good; prices steady.
Fyzabad („ 2nd)	No rain	*Mash* and *jarhan* being cut; irrigation of *rabi* crops going on; opium has germinated fairly; prospects good; public health and condition of cattle good.
Lucknow („ 1st)		Weather clear and cold; autumn crops nearly gathered; *rabi* prosperous; poppy germinating well; plants healthy; season favourable; condition both of men and cattle good; supplies abundant; prices stationary.
Rai Barelli („ „)		Weather seasonable; *rabi* crops thriving; general health good; supplies plentiful; prices slightly falling.
Partabgarh („ 2nd)		Condition of the crops very promising; *jarhan* being cut in several places; poppy crops reported to be coming on splendidly; prices nearly stationary.
Allahabad („ „)		Weather cold; sky clear; *rabi* crops in splendid condition; public health good; prices show a tendency to fall.
Ballia („ „)		Weather fine; spring crops doing well; health good.
Banda („ 3rd)		Weather clear; *kharif* crops being cut; *rabi* sowings germinating well; prospects good; fever decreasing; no distress.
Farakhabad („ 2nd)		Health of people fair; *rabi* doing well; prices firm.
Sitapur („ „)		Westerly winds have prevailed during the week; cultivators are irrigating the *rabi* crops; prospects continue favourable; no sickness is reported.
Kumaon („ 1st)		Weather clear and normal; fever and smallpox in some villages and cholera to some extent; in Bhabur wheat has sprung up in many places; cattle-disease in some parts; prices stationary.
Agra („ 2nd)	No rain	*Rabi* coming up well, and is being irrigated; poppy germinating well, and is promising; fever abating; prices steady.
Jhansi („ „)		*Kharif* crops still being cut; *rabi* prospects good; sowing of opium in progress; prices stationary; health of people and cattle good.
Meerut („ 1st)		Weather seasonable; condition of people and cattle good; crops where above ground promising; sowings in progress; supplies sufficient; prices steady.
		General Remarks.—Weather clear and seasonable; crops are thriving and prospects continue very favourable; prices show a tendency to fall.
Punjab— (Dec. 3rd)		
Delhi (Dec. 2nd)		Fever abating; *rabi* sowings completed; prices falling.
Hissar		Fever very prevalent in Hissar, but is declining in Rohtak; *rabi* flourishing; *kharif* is being harvested.
Umballa		*Kharif* crop harvested; yield above average; *rabi* crops thriving; fever abating; prices slightly falling.
Jullundur		Rain wanted; health and *rabi* prospects good; prices stationary.
Amritsar		Health and crops good; prices of wheat and *jowar* rising, of others stationary.
[illegible]ilkot		*Kharif* outturn above average; *rabi* sown; health good; prices falling.
[illegible]rosepore		Fever prevalent; *kharif* being cut; *rabi* sown; prices steady.
Lahore		Health good; prices steady.
Rawalpindi		*Kharif* outturn above average; *rabi* sowings nearly completed; health good; prices nearly stationary.
Mooltan		Health fair; *rabi* sowings in progress; prices fluctuating.
Dera Ismail Khan		Health and prospects good; expected yield of *rabi* good.
Peshawar		Rain wanted; health good; prices stationary.
		General Remarks.—No rain; fever still prevalent; *rabi* nearly sown; prospects good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
entral Provinces—		
Nagpur		Weather unusually cold; *rabi* sowings completed; prospects good; fever and cattle-disease still in places; prices stationary.
Jubbulpore		Weather clear and cold; reaping of rice nearly finished; *rabi* sowings in progress; prospects good; *rice* 16 and wheat 27 seers per rupee; health good.
Saugor (Dec. 2nd)		Weather cold; *rabi* sowings continue; *iowar* being cut; cotton being picked; health good; prices easy.
Seoni		Weather cold; threshing of *kharif* in progress; prices—wheat falling, rice stationary.
Hoshangabad		Weather cool and pleasant; *rabi* sowings completed; *tilli* and cotton have not improved for want of rain; fever prevalent; 7 cases of cholera, 3 fatal; wheat 24¾ and rice 11 seers per rupee.
Khandwa		Weather clear; *kharif* reaping continues; prospects and health good; rice 14¾, wheat 24¾, and *jowar* 24½ seers per rupee.
Raipur		Weather cold; *kharif* being cut; cotton ripened; prospects of *rabi* good; health good; rice 22 and wheat 34 seers per rupee.
Sambalpur (Nov. 29th)		Weather cold; rice good; sugarcane very fair; other crops moderate; health good; cattle-disease decreasing; common rice 29¾ seers per rupee.
		General Remarks.—Weather cold; fever in places; cholera reported from Hoshangabad, Narsingpur, and Chanda; prospects unchanged; prices steady.
ritish Burma— (Dec. 3rd)		
Akyab (Nov. 29th)	*Nil*	Slight cholera still in town and district; some cattle-disease in one township; crops in very good condition and getting ripe in parts.
Bassein („ „)	„	Slight cattle-disease in parts; crops most promising; cold weather set in.
Rangoon („ „)	„	Health good.
Amherst („ „) (Moulmein).	„	Slight cholera in town; reaping progressing.
Tavoy („ „)	„	General appearance of crops good; reaping progressing.
Pegu („ „)	„	Reaping commenced in parts; crop prospects favourable.
Henzada („ „)	„	Reaping progressing; crops promising well, but those on high grounds in parts slightly injured by small rainfall.
Prome („ „)	„	Crops reported to be in good condition.
Toungoo („ „)	„	Health good.
Thayetmayo („ „)	„	Reaping continues; harvest prospects fair.
		General Remarks.—Slight cholera in Moulmein and Akyab; elsewhere health good; slight cattle-disease in Akyab and Bassein; elsewhere health of cattle good; crop prospects good in all districts.
ssam— (Dec. 3rd)		
Gauhati	No rain during the week ending 2nd inst.	Mornings foggy, nights cool; prospects of mustard good; harvest of *sali* crops begun; public health fair.
Sylhet	*Nil*	Prospects of crops good; cholera and smallpox still prevalent.
Cachar	„	Weather cold; reaping of *sali* crops progressing; tea season nearly closed; common rice 13¼ seers per rupee; health good.
Dibrugarh	0·46	Weather seasonable; *sali* crop being reaped; cholera and cattle-disease reported from North Lakhimpur.
ysore and Coorg— (Dec. 4th)		
Bangalore	No rain has fallen in the province.	Crops generally in good condition; prospects fair; prices stationary; public health good.
Mercara	*Nil*	A fine rice crop ripe for the sickle in the Yelsa[illegible]rshime taluk; the coffee-picking season has also commenced; pr[illegible] stationary; much fever in the Nanjarajpatna taluk.
erar & Hyderabad— (Dec. 4th)		
Hyderabad	No rain.	Reaping of *abi* crops continues; *rabi* crops prospering; general health good; prices—wheat 13¾, coarse rice 13, white *juar* 19, yellow *juar* 24, and *tur* 19 seers per current sicca rupee.
Amraoti		Weather cool and clear; crops in good condition; cotton-picking continues; wheat 22 and *jowari* 26 seers per rupee.
Akola		*Kharif* and *rabi* crops in good condition; cutting of *jowari* commenced; cotton-picking continues.
entral India States— (Dec. 3rd)		
Indore	*Nil*	Weather cold and seasonable; health and prospects good.
Morar (Gwalior)	„	Weather seasonable.
Sutna	„	Health good.
Neemuch	„	Sowings of opium and *rabi* nearly completed; weather cold; health good.
Goona	„	Weather cold; health and prospects good.
Agar	„	Rain, health, and prospects good; opium sowings nearly completed.
Schore	„	Weather clear; prospects of crops and health good.
Nowgong	„	Prospects and health good; prices steady.
Manpur (Bhopawar)	„	Prospects good; *rabi* crops rising fairly; opium sowings commenced; health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu . . (Dec. 3rd)	. . . .	Weather seasonable ; cold increasing.
Sirohi . (Nov. 30th)	. . . .	Weather fine ; nights and early mornings cold ; crop prospects and health good ; water supply in some of the tanks scarce.
Marwar . („ 28th)	. . . .	City tanks almost full ; health good ; *rabi* crops promising ; prices stationary.
Harowtee . (Dec. 1st)	. . . .	Weather clear ; prices steady ; health good.
Jhallawar . (Nov. 28th)	. . . .	Weather seasonable ; health and prospects good.
Ajmere . (Dec. 2nd)	. . . .	Health and prospects good.
Jeypore . („ 2nd)	. . . .	Crop prospects favourable ; prices steady ; health good.
Ulwur . („ 2nd)	. . . .	Fever abating ; gram 29, barley 29, *bajri* 29, and *jowar* 33 seers per rupee ; weather seasonable.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 5th December, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I. G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of Bengal, C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.B.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G.
The Hon'ble Mahárájá Luchmessur Singh, Bahádur, of Darbhangá.
The Hon'ble J. W. Quinton.
The Hon'ble R. Miller.
The Hon'ble W. W. Hunter, LL.D., S.C.I., C.I.E.
The Hon'ble H. J. Reynolds.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.

PÁNCH MAHÁLS LAWS BILL, 1884.

The Hon'ble MR. ILBERT introduced the Bill to amend the law in force in the Pánch Maháls, and moved that it be sent to the Government of Bombay for opinion.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Bombay Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

TARIFF ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill to repeal part of section 6 of the Indian Tariff Act, 1882. He said:—

"The Government of Madras recently submitted a draft Bill to consolidate and amend the ábkárí law of the Presidency of Madras for sanction to its introduction in the local Legislative Council, and, on examination of its provisions, it was found that two clauses of one of its sections, imposing a duty on liquor, were, as applied to spirit, *ultra vires* of the local legislature, as the mode of fixing the excise-duty on spirit is determined by section 6 of the Indian Tariff Act, 1882. It was also feared that the penultimate clause of the latter section, by keeping in force under the authority of the Governor General's Legislative Council an unexplored mass of law existing on the 10th March, 1882, might render other provisions of that Bill *ultra vires*.

"This in itself would make it necessary that legislation should be resorted to in the Council of the Governor General, in order to prevent the Madras Bill from being declared invalid; and as, moreover, section 6 of the Tariff Act must seriously hamper any local legislature contemplating legislation like that proposed by the Madras Government, it is proposed to repeal that section, leaving it to the Local Governments to deal with the mode of fixing the duties of excise on spirit, under the other enactments locally in force, subject, so far as any discretion is allowed to them by those enactments, to the general executive control of the Government of India.

"The present Bill has accordingly been prepared. It repeals section 6 of the Tariff Act, except the last clause amending section 1 of Act XVI of 1863, which Act is still in force."

The Motion was put and agreed to.

CARRIAGE OF PASSENGERS BY SEA BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend Act II of 1860, relating to the carriage of passengers by sea. He said:—

"Act II of 1860 contains provisions for the relief and maintenance of distressed and shipwrecked emigrant-passengers, and for forwarding them to their destination when left without their consent at places other than that to which they are bound. The Act was passed under the special authority of an Act of Parliament called 'The Passengers' Act, 1855,' and it required that authority, because it operates in parts of the world beyond the limits of British India. The Passengers' Act, 1855, empowered the Indian legislature to declare that Act or any part of it applicable to the carriage of passenger on any voyage from any ports or places within British India, to be specified in the Act, to any ports or places in any parts of the world whatsoever, to be also specified in the Act. The Council will observe that the terminal ports of the voyage must be specified in the Act, and that no addition can be made to their number without fresh legislation. The Act of 1860 applied the Passengers' Act, 1855, to certain voyages within specified ports, and it naturally named as ports of destination those places to which at that time emigration took place from British India. But since 1860 the number of places to which emigration takes place from British India has largely increased, and the consequence is that there are a number of emigrant-voyages to which the provisions of that Act are not applicable. That is one defect of the Act. Another defect is that the Act speaks of a passenger finding himself, without any neglect or fault of his own, within some colonial or foreign port or place other than that at which he may have contracted to land. But the Indian emigrant does not as a rule contract with the owner or charterer or master of a vessel to be carried to any particular place. In all cases falling under the present emigration law, what happens is that the contract is made by the recruiter with the emigration agent for the colony importing labour. Therefore, strictly speaking, the Indian emigrant cannot be brought under the provisions of the Act. Both these defects were brought to light in a case which recently occurred, and the object of the Bill is to remove them. The Act which it is proposed to amend is a short one, and it will probably be found the most convenient course to repeal the Act and to re-enact it with the necessary modifications."

The Motion was put and agreed to.

TRANSFER OF PROPERTY ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. ILBERT also moved that the Hon'ble Peári Mohan Mukerji be added to the Select Committee on the Bill to amend the Transfer of Property Act, 1882.

The Motion was put and agreed to.

KHOJÁ SUCCESSION BILL.

The Hon'ble MR. ILBERT also moved that the Hon'ble Rao Saheb Vishvanath Narayan Mandlik be added to the Select Committee on the Bill to amend and define the law of Testamentary and Intestate Succession to Khojás.

The Motion was put and agreed to.

At the conclusion of the business before the Legislative Council His Excellency THE PRESIDENT made the following remarks:—

"Before this Council adjourns to this day fortnight, this being the last meeting of the Council during my tenure of office as Viceroy and Governor General of India, I am anxious to avail myself of the opportunity to express my very sincere thanks to the members of this Legislative Council, both past and present, for the very valuable assistance which they have at all times given to the Government of India in connection with the Bills which have been brought before the Council. I very fully and deeply recognise the value of their services in that respect, and I also beg to tender to them my personal acknowledgments for the aid which I have ever received from them in the consideration and discussion of the questions which have engaged the attention of this Legislative Council.

"I may mention that, in accordance with the usual practice, members of the Legislative Council will be permitted to be present when the new Viceroy takes his seat. Lord Dufferin arrives here on Saturday afternoon, the 13th instant,—the arrangements for his reception will be duly notified in the Gazette,—and the members of this Council who may be present to receive him will follow him into this room, where he will take his seat."

The Council adjourned to Friday, the 19th December, 1884.

FORT WILLIAM;
The 9th December, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORTS FOR THE SIX MONTHS—MAY TO OCTOBER 1884.

No. 155 Met., dated Calcutta, the 5th December 1884.

RESOLUTION—By the Government of India, Revenue and Agricultural Department.

Read the following:—

Summary of the Weather Reports for the six months—May to October 1884.

The chief meteorological feature of the six months under review has been the deficiency of the rainfall in parts of the Peninsula and parts of Northern Bengal.

The temperature conditions which existed during April, and which were noticed in the summary for that month, were prolonged into May. These were,

unusual heat over North-Western India, from Multan and Jacobabad eastward to Allahabad, and about the average or a somewhat deficient temperature elsewhere. Although the average temperature was high, the maxima were in no respect unusual, the highest readings recorded being 119° at Jacobabad, 118° at Allahabad, and 117° at Delhi.

With few exceptions, the rainfall of the month was deficient, and in most parts of Central, North-Western, and Western India the whole amount was insignificant. A cyclone, noticed in the May summary, had little more than a local influence on the weather and occasioned no excessive rain except on the Arakan coast.

In June, the south-west monsoon rains set in, but with less than their usual steadiness. The date of their arrival was considerably delayed, and during the remainder of the month they were sporadic and not general. During the first fifteen days the percentage of atmospheric humidity was much below the normal, and except in Eastern India the amount of rainfall was insignificant. Between the 12th and 16th a slight burst of rain occurred along the west coast, and on the 19th rain became fairly general throughout the country. But it was short-lived, and with the exception of Lower Bengal and the Central Provinces, the amount at the close of the month showed a decided deficiency—most marked in Assam and along the west coast. The temperature changes coincided with the variations in the amount and extent of rainfall. In the earlier portion of the month, the day temperatures were high, but fell with the setting in of the rains, and rose again as the weather again became finer and rain less general. The highest reading of the thermometer, 122° at Jacobabad, was 3° in excess of the maximum in May.

In July, the weather was of about the normal monsoon character, except as to the amount of rain, which was generally somewhat deficient. Two cyclonic storms of the type usually developed during the rains passed over the country. Both originated over the head of the Bay of Bengal, the first about the 8th or 9th, the second on the 15th. The former passed right across the country in a west or west-north-west direction, reaching Hyderabad (Sind) on the 14th; the latter only travelled as far as Seoni, where it broke up on the 18th. Up to the 18th or 20th of July the weather bore a close resemblance to that prevailing in the latter part of June, *i. e.*, the rainfall was intermittent, more particularly in Sind, Gujarat, and the central plateau of the Peninsula; but in the latter half of the month rain was general and abundant, and at some stations exceptionally heavy. At Umballa, 14 inches fell on the 30th. At Raipur 25, and at Jubbulpore 18 inches more than the average was measured during the month.

The weather in August was variable. No travelling storms, affecting simultaneously large tracts of country, appeared during the month, and the changes of weather depended more or less on slight local disturbances, the influence of which was restricted to the stations in their immediate neighbourhood. Roughly speaking, the Punjab, Rajputana, the Konkan coast, the whole of the Peninsula to the east of the Western Ghauts, Behar, Bengal, and Burma had less, and the North-Western Provinces and the Malabar Coast more, than the normal amount of rain; while Sind, Gujarat, and the central parts of the country showed large local irregularities. On the 28th and 29th in Western India, and on the 7th, 10th, and 12th in the North-West Himalaya, the amounts of rain were exceptionally large.

Unlike August, the weather of September during almost the whole of the month and over by far the greater part of Northern and Central India was continuously under the influence of cyclonic conditions, and over the whole of that region the rainfall was much above the average. The first important storm was formed over the head of the Bay on the 5th and disappeared over Cutch on the 9th. The second was formed over the head of the Bay on the 18th and broke up near Agra on the 27th. Besides these principal vortices, however, several smaller disturbances appear to have been formed, the chief being that over Northern Rajputana on the 1st and 2nd and that in Rohilkhand on the 29th and 30th. Assam, North Bengal, and Behar were quite beyond the sphere of their influence, and as a consequence, the rainfall of those provinces was very scanty. In the Peninsula, the west coast had an excess of rain, and the central plateau, the Carnatic and Mysore a deficiency. The temperature varied with the distribution of rainfall, being slightly above the average at several stations in

North Bengal, Behar, and the Peninsula, where the rainfall had been slight and the weather fine, and below it elsewhere.

October opened with very unsettled weather. The Rohilkhand disturbance, noticed above, was causing a heavy downpour of rain on the North-West Himalaya, and the adjoining parts of the Punjab and North-Western Provinces; south-easterly and easterly winds were bringing up rain from the Bay to Bengal, Behar, and the lower part of the North-Western Provinces, and local showers were falling over a large part of the Peninsula. However, about the 9th in the Peninsula and about the 15th in Bengal and the Central Indian plateau, the wind shifted to north-east, and on the whole this direction was maintained through the remainder of the month with exceptional steadiness. Except for a few days between the 24th and 27th this change of wind was accompanied by settled weather in Bengal and Central India, but in the Carnatic the weather became very unsettled, and the rain was constant and heavy. Two cyclonic storms were recorded, the first passing across the south of the Peninsula between the 16th and 18th, the second travelling from the coast of the Northern Circars to Western Bengal between the 24th and 26th. Over the greater part of Northern India with Khandish, Saugor and Nerbudda, and the whole of the Peninsula, the rainfall was in excess, but elsewhere it was generally deficient. The temperature with a few local exceptions was low.

On the average of the whole season, the monsoon rains were fairly good, except in parts of the Provinces of Bengal and Assam, and parts of the Peninsula, and in some regions most abundant. Even in Behar, North Bengal, and the Karnool and Bellary districts, where the seasonal total was much below the average, the scarcity which was at one time threatened has to a great extent been relieved by the rains which have subsequently fallen. As regards the two monsoon currents it will be noticed that while the south-west or summer monsoon was not only delayed at its commencement, but for a considerable period subsequent to its commencement was very feeble in character, the north-east or winter monsoon on the contrary broke very early on the Carnatic coast and brought more than the average amount of rain.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

NOTE ON THE FORECAST OF THE MONSOON RAINS, DATED 7th JUNE 1884, AND THE RESULTS.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department, No. (Meteorology), dated Calcutta, the December 1884.

RESOLUTION.—Read a Note on the Forecast of the monsoon rains, dated 7th June 1884, and the results, by the Meteorological Reporter to the Government of India.

Note on the forecast of the monsoon rains, dated 7th June 1884, and the results.

In the supplementary report on the Himalayan Snowfall, dated 7th June 1884, I attempted to forecast the prospects of the past rainy season in the following terms: "I look for a somewhat retarded or a weak and interrupted monsoon in the earlier months, in part or parts of North-Western India, extending possibly but by no means necessarily to the northern portion of the Bombay Presidency and Rajputana. This is the area that experience has shown to be most subject to the anomalous prevalence of dry westerly winds in the monsoon, as it is that of their normal prevalence in the spring. But it is not likely that the whole of this area will be simultaneously affected, and it is equally unlikely, that the conditions now existing will operate through the whole of the monsoon. In many respects the present season resembles the first part of 1876."

It now becomes my duty to compare this forecast with the actual facts.

In the summary of the weather reports for June it is stated: "On the 19th (June) rain became pretty general throughout the country, the only exceptions being portions of Bundelkhand and the North-Western Provinces, Sind, and Central India* * *. On the 22nd, however, the rainfall on the west coast was checked and the break spread gradually from the west coast to a very large part of India. Towards the close of the month precipitation was slight in most places, and had entirely ceased in Gujarat, Central India, Rajputana, and on the plains of the Punjab and North-Western Provinces. Rain continued, however, in the Central Provinces and Lower Bengal, and whereas a decided deficiency was shown by most places, the rainfall of these two provinces was slightly in excess of the average."

The interruption (or retardation) of the rains indicated in this paragraph lasted in the Punjab till the 18th July. Its further history is thus noticed in the summary for that month: "The rainfall reports shew that in the earlier portion of the month, the area over which the rains were fully established was somewhat restricted. Over the greater part of the plains of the Punjab, as well as in Rajputana, Sind, and Gujarat, rain of any consequence was almost entirely wanting during the first fortnight; as was also the case in some parts of the Carnatic, in Madura, Mysore, the Ceded districts of the Madras Presidency, and the Deccan. By the 16th, however, a change set in. Rain bearing winds spread suddenly over Gujarat and subsequently extended to Rajputana and the Punjab. From the 20th to the end of the month, the rains were general and abundant, with the exception of the Madras Presidency."

In the summary for August it is stated: "The rainfall returns display considerable variations in the amount of precipitation. In the Punjab, with the exception of Murree, Rawalpindi, Simla, and Delhi, there has been more or less deficiency on the average, while over nearly the whole of the North-Western Provinces, on the contrary, there has been excessive rain. At Allahabad, however, a region of deficient rainfall commences, and from that station eastwards in Behar, Bengal, and as far as Burma, the present month has been one of general deficiency* * *. Rajputana, like the Punjab, has had a somewhat scanty rainfall, while Sind and Gujarat, though deficient on the mean of all stations, shew irregularities similar in character to those of the more central parts of the country. On the west coast from Ratnagiri southwards, as well as at the inland stations of Belgaum, Mercara, Madura, Salem, and Wellington, the rainfall has been above the average; but both on the coast north of Ratnagiri, and at almost every peninsular station to the east of the ghâts, the amount of rain has been below the average of the month."

In September, the rainfall was abundant in Northern India, except in Behar, Northern Bengal, and Assam, but in the peninsular it was still deficient in the Deccan, Mysore, and the Carnatic.

Hence the predicted retardation or interruption of the rains of the early part of the monsoon in North-Western India was fully justified by the event. After a general burst in the latter part of June the rains of all Western and North-Western India were entirely suspended for three weeks or more, and even up to August they were somewhat defective in the Punjab. But the conditions then existing did not operate through the whole of the monsoon, and the latter months brought abundant rain.

It was observed in the forecast, that the early part of 1884 in many respects resembled the first part of 1876. The circumstances here referred to were that the heavy winter snowfall and the late spring rain and snow were restricted to Kashmir, Chamba, and the Hill States north of the Sutlej, and not as in the previous year to the outer ranges. In 1876, although the rainfall was deficient in the North-Western Provinces, it was in the Deccan, Mysore, the Ceded districts and the Carnatic that the drought was most severe and lasting; and this year also, it is these same parts of the peninsula in which the rainfall has been most deficient up to nearly the end of the monsoon. This is probably more than a mere coincidence; and it is quite possible to suggest reasons why the peninsula should be more affected when there is an unusual amount of snow in Kashmir and the ranges around the Upper Indus, than when it is restricted to the outer Himalaya. But one condition was present in 1876 which was absent in the present year. This is an atmospheric pressure considerably in excess of the average over the whole of the Indian region and a large part of Asia, which has been shown to be due to the condition of the higher strata of the atmosphere. The importance and significance of this feature of the famine years has been pointed out in a paper recently published in the Proceedings of the Royal Society. In its absence, the effect of the Himalayan snows, though marked enough, for a time, would appear to be not lasting.

Nothing was said in the forecast respecting the deficiency of the Bengal rainfall, nor, at present, are the conditions that brought about that deficiency at all well understood.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10th DECEMBER 1884.

GENERAL REMARKS.—No rain has fallen in the country during the week under report except in a few districts of the Madras Presidency.

In the Madras Presidency the condition of the standing crops is generally good except in Bellary, where more rain is wanted. Harvesting continues in several districts, but the outturn is generally below the average. In Mysore and Coorg agricultural prospects are fairly good. Coffee picking has commenced in Coorg, but the berries are ripening slowly.

In the Central India and Rajputana States, the *rabi* crops are in good condition, and agricultural prospects are on the whole very promising. In the Berars and Hyderabad the *rabi* is thriving. The *kharif* is being reaped and cotton picking continues in the Berars.

In the Bombay Presidency the *kharif* harvest is nearly over; the *rabi* sowings are still in progress in many districts; the condition of the standing crops is generally good, but in parts they are suffering from drought.

Rabi sowings have been completed in the Punjab and in the North-Western Provinces and Oudh, and prospects are very favourable. In the districts of Jullundur and Peshawar more rain is wanted for the crops. In the Central Provinces the *rabi* sowings are approaching completion, and the *kharif* is being harvested. Prospects are favourable.

In Bengal *rabi* prospects are good everywhere except in Backergunge, and in parts of the Moorshedábad district where some damage is being caused by insects. The *amun* harvest is in progress, and in some districts a fair outturn is expected.

In Assam the reaping of the *sali* crop has begun and prospects are generally good. In British Burmah the rice crop is being reaped in some districts and prospects are very good.

The public health is generally good; the mortality from cholera in Coimbatore, Tanjore and Madura continues high.

Prices are on the whole stationary except in Bengal and the North-Western Provinces and Oudh, where they show a tendency to fall.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(10th Dec.)		
Bellary	*Nil*	Standing crops, dry and wet, suffering from want of rain; harvest paddy and dry grains, yield below average; 8 deaths from cholera.
Kurnool	,,	Standing crops good, except in one division and in parts of 2 taluks where they are fading owing to absence of dew; harvest early cereals, yield below average; 1 death from cholera.
Ganjam	,,	Small-pox, cholera, and cattle-disease prevalent.
Kistna	,,	Standing crops generally good; harvest paddy and *korra*, outturn below average; river 2·8 feet over anicut; smallpox, fever, and cattle-disease exist; 4 deaths from cholera.
Chingleput (Madras)	Average ·12	Standing crops somewhat damaged by the late heavy rains and floods; harvest paddy, yield about half the average; smallpox in 4 taluks, 48 deaths from cholera.
Coimbatore	,, ·08	Standing crops generally good; harvest wet and dry crops, outturn about average; fever in 1 taluk; 164 deaths from cholera.
Tanjore	,, ·71	Standing crops generally good but damaged by late floods in the coast taluks; harvest paddy and *cholum*, outturn below average; 171 deaths from cholera.
Madura	,, ·01	Prospects considerably improved; 128 deaths from cholera.
Malabar	,, ·10	Standing crops good; smallpox slight, fever severe in 1 taluk; 5 deaths from cholera.
Travancore	*Nil*	Standing crops paddy thriving; smallpox, fever, and cholera exist.
Bombay—(10th Dec.)		*General Remarks.*—General prospects—fair rain, but deficient in Bellary and Anantapur.
Karachi	. . . .	River at Kotri on 5th 6 feet 1 inch against 5 feet 5 inches last year; preparations for *rabi* progressing; fever generally prevalent; cattle-disease in 4 talukas; loss of 300 sheep and goats, 141 buffaloes and 64 cows and bullocks; cholera in the taluks of Karachi, Jati, Ghorabari and Shahbander, worst in Jati; smallpox in 8 villages in the districts, 14 fresh cases, 1 death, 13 remaining sick; prices—wheat, red rice, and *bajri* in Karachi 26, 28 and 40, in Manjhand 32, 32 and 41, in Pakro 18, 32 and 44, and in Sajawal 28, 40 and 42 lbs. per rupee respectively.
Hyderabad	. . . .	*Rabi* prospects good; autumnal fever general; smallpox in 2 and cattle-disease in 4 talukas; wheat 29, *jowari* 40, *bajri* 40, red rice 26, and white rice 20 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad	. . . .	*Rabi* sowing nearly over; fever in some talukas; wheat 31 and *bajri* 33 lbs. per rupee.
Baroda	. . . .	*Rabi* sowing in progress; cotton crops in good condition; opium sowing continues in Kadi division; fever still prevalent; prices—*bajri* 31 and rice 24 lbs. per British rupee.
Surat	. . . .	Standing crops healthy; fever in some talukas; *jowari* 32 and *nagli* 44 lbs. per rupee.
Násik	. . . .	Reaping of *kharif* crops completed; *rabi* crops in good condition; public health generally good; wheat 40, *bajri* 34, and rice 21 lbs. per rupee.
Colaba (Bombay)	. . . .	Abnormal temperature fell from 3° cool on 3rd to 4° cool on 5th, and then rose 1° cool on 9th; vapour in air defective; abnormal wind generally from north-east.
Poona	. . . .	Harvesting of *kharif* completed; *rabi* crops doing well, except in Tirur and Indapur; slight small-pox in Purandhar; prices—*bajri* 33 and *jowari* 38 lbs. per rupee; in Poona *bajri* 32 and *jowari* 35 lbs. per rupee.
Ahmednagar	. . . .	Harvesting of *kharif* continues; *rabi* crops good except in Nagar, Nevasa, Sheogaon, and Rahuri; *jowari* damaged in Srigonda; *bajri* maximum 48 lbs. per rupee in Akola, minimum 36 lbs. in Nagar; *jowari* maximum 60 lbs. per rupee in Sangamner; minimum 33 lbs. in Karjat.
Sholapore	. . . .	*Rabi* crops withering in all talukas except Barsi; fodder generally scarce and insufficiency of well water in Madhu and Samgola talukas; *jowari* 33 lbs. 28 tolas and *bajri* 33 lbs. 35 tolas per rupee.
Dharwar	. . . .	Reaping of rice over, that of early *jowari* in progress; late crops withering in Navalgund, Mundargi, and Ron for want of sufficient moisture; exotic cotton blighted in 3 talukas; scarcity of fodder in Navalgund and Ron, that of drinking water in Nargund Petha; rice 22 to 32 and *jowari* 30 to 74 lbs. per rupee.
Kanara	. . . .	Common rice in Karwar 13 seers per rupee; district average 14¾ seers; preparing ground for second crop on coast talukas; small-pox, 1 death in Kumta taluka; fever in Honavar, Siddapur, Sirsi, Supa, and Yellapur talukas; *ragi* produce is good; weather settled and fair.
Rajkot	. . . .	General health good; weather cool; fever generally prevalent; cholera in Katda Sangani; *bajri* 39 and *jowari* 56 lbs. per rupee.
		General Remarks.—*Kharif* harvest completed in most districts; *rabi* sowing continues in several districts; standing crops generally good, but suffering from drought in parts of Poona, Ahmednagar, Sholapur, Dharwar, Kaladgi and Belgaum; scarcity of fodder and drinking water being felt in parts of Sholapur, Dharwar, and Belgaum; fever general; smallpox in parts of 9 and cholera and cattle-disease in parts of 6 districts.
Bengal—(Dec. 9th)		
Chittagong	. . . *Nil*	Weather bright and cool; prospects of crops fair; reaping of *amun* paddy continues; prices of food-grains stationary; public health good, though cholera still continues.
Dacca	. . . ,,	Prospects of crops good; cutting of paddy and sugarcane continues; pulses and *boro* paddy are being sown; cholera reported from parts of the district.
24-Pergunnahs	. . ,,	Harvesting of *amun* paddy is going on with an outturn decidedly above average; winter crops are doing well; price of common rice varies from 11½ to 17 seers per rupee; public health generally good; cases of fever are reported from the Bussirhat sub-division; state of river is usual.
Moorshedabad	. . ,,	Weather seasonable; cutting of *amun* paddy continues; *rabi* crops are promising, but in some places they are being damaged by insects; new rice is coming into the market; prices easier; there is a little cholera about; but on the whole public health good.
Rajshahye	. . . ,,	Weather seasonable; cutting of *amun* paddy general; outturn fairly satisfactory; winter crops generally good; price of rice improving; public health fair.
Burdwan	. . . ,,	*Amun* paddy is being harvested, the expected outturn is generally poor; prospects of *rabi* crops good; price of common rice varies from 15¼ to 17 seers per rupee; public health good.
Rungpore	. . . ,,	*Amun* paddy is being cut; prospects of other winter crops continue good; prices of food-grains stationary; fever prevalent.
Bhagulpore	. . . ,,	Harvesting of *aghani* paddy has begun and prospects are fair; prospects of *rabi* crops good; new rice is selling at 15 seers 12 chattacks per rupee.
Purneah	. . . ,,	Winter crops good in the north of the district; little or no late paddy in the south; other winter crops promise well; wheat and barley are being sown; price of common rice is 16 seers per rupee; a great deal of fever prevails; rivers still falling.
Patna	. . . ,,	*Rabi* crops are promising well; reaping of paddy still in progress; poppy crop is in a healthy and promising state; public health good.
Durbhanga	. . . ,,	Harvesting of paddy is going on; *rabi* crops continue well; prices of food grains stationary; public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Hazaribagh . .	*Nil*	Weather clear and cold; harvesting of paddy continues; prospects of *rabi* crops generally good; prices of food grains stationary; poppy doing well till now, but water-supply for irrigating the fields scanty; general health good.
Cuttack . . .	„	Weather cool; reaping of early *sarad* still in progress; late *sarad* ripening and in some places it is being cut; prospects of paddy good; price of rice falling; public health generally good; only a few cases of cholera are reported.
Gya	. . . .	Prospects of opium crop excellent; young plants, especially those of earlier sowing, most thriving; heavy dews very beneficial, but in two *kotees* want of water is felt; *kacha* wells are being dug.
Shahabad . . .	. . . .	Prospects of poppy crop continue excellent.
Mozufferpore . .	. . . .	Prospects of poppy crop continue favourable.
Sarun	. . . .	Weather favourable for poppy crop, prospects of which a e excellent.
Monghyr . . .	. . . .	Prospects of poppy crop continue good; plants are very healthy and promising.
		General Remarks.—There was no rain during the week in any part of the province; *rabi* crops are doing well everywhere, except in Backergunge; in parts of the Moorshedabad district they are being injured by insects; in a few districts these crops are still being sown; harvesting of *amun* paddy is in progress, and in some districts a fair outturn is expected; prices of food-grains are generally falling; cholera prevails in many districts and fever in some.
N.-W. Provinces and Oudh— (Dec. 11th)		
Behares (Dec. 9th)	No rain . .	Sugarcane being cut; peas, mustard and gram flowering; *rabi* all sown; prospects good; Assistant Opium Agent reports that opium prospects continue favourable; no sickness of man or cattle; prices rising slightly; bazars well stocked.
Gorakhpur („ 8th)	No rain . .	*Rabi* and poppy everywhere sown and promising well; prices steady; public health good.
Fyzabad („ 9th)	No rain . .	Weather clear and cold; prospects of sugarcane good; poppy germinating well; general health good; prices slightly falling.
Lucknow („ 8th)	. . . .	Weather clear; cold increasing; cultivators busily engaged in irrigating *rabi* and poppy crops; prospects good; condition of both men and cattle good; markets well supplied; prices stationary.
Rai Barelli („ „)	*Nil.*	Weather cold and clear; *rabi* crops in good condition; general health good; supplies ample; prices steady.
Partabgarh („ 9th)	. . . .	Prospects of the *rabi* still very good; no sickness reported.
Allahabad („ „)	. . . .	Weather very cold; *rabi* crops thriving; prospects excellent; health good; prices falling slightly.
Cawnpur („ „)	No rain . .	Weather cold and clear; *rabi* prospects good; poppy sowings completed, except in villages situated near canals; in these the sowings will be finished by about the 10th current; owing to want of water, from 25 to 50 per cent. of the land engaged in these villages cannot be brought under cultivation this season; fever and ague decreasing; a little mouth disease in one pargana; prices steady.
Ballia („ 9th)	*Nil*	Weather clear and seasonable; crops thriving; health of men and condition of cattle good.
Banda („ 10th)	„	Weather clear; *kharif* crops being threshed; *rabi* prospects good; no distress.
Farakhabad („ 9th)	„	Condition of the people generally good; but fever still prevalent in Aligarh and Chibramau tahsils; *rabi* sowings doing well; poppy backward; canal water reported deficient.
Sitapur . („ „)	„	Wind remains westerly; the agriculturists are engaged in irrigating and the crops are doing well.
Bareilly . („ 8th)	. . . .	Weather clear and cold; *rabi* crops promising; prices slightly lower; markets well stocked; fever nearly disappeared; cattle healthy.
Kumaon . („ „)	*Nil*	Weather normal; cholera in Bhabar abating; fever and smallpox in a few villages; general health otherwise good; a large number of cattle have been destroyed by disease in Bholi; cattle-disease prevalent also in other parts; prices stationary.
Agra . („ 9th)	No rain . .	*Rabi* crops and poppy thriving; general health good; prices steady,
Jhansi . („ „)	. . . .	Crops prospering; *kharif* being harvested; supplies plentiful; prices falling; health good.
Meerut . („ 8th)	. . . .	Weather seasonable; condition of cattle, people and crops good; supplies sufficient; prices steady.
		General Remarks.—Weather seasonable; the prospects of the *rabi* are good, and poppy thriving; markets are well supplied, and prices tend to fall; the condition of cattle is normal; the health of the people generally good.
Punjab— (Dec. 10th)		
Delhi (Dec. 9th)	. . . .	Health fair; *rabi* sowings completed; prices falling.
Hissar . („)	. . . .	Fever prevalent in Hissar, but is abating in Rohtak; *kharif* being harvested and winnowed; *rabi* flourishing.
Umballa . („)	. . . .	Fever abating; *rabi* thriving and prospects good; prices falling.
Jullundur . („)	. . . .	Health and crop prospects good; rain wanted; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*contd.*		
Amritsar . (Dec. 9th)	. . .	Health and crops good; prices slightly falling.
Siálkot . („)	. . . .	Health good; crop prospects favourable; prices stationary.
Ferozepore . („)	. . . .	Fever prevalent in Moga tahsil; *kharif* crop being cut and *rabi* sown; prices nearly stationary.
Lahore . („)	. . . .	Health and crop prospects good; slight rise in price of wheat; prices of other food grains stationary.
Rawalpindi . („)	. . . .	Health and *rabi* crops good; prices falling.
Mooltan . („)	. . . .	Health fair; *rabi* sowings in progress; prices steady.
Dera Ismail Khan („)	. . . .	Health and prospects good.
Peshawar . („)	. . . .	Health good; Rain wanted; prices stationary.
		General Remarks.—No rain; fever abating; *rabi* nearly sown; prospects good; prices on the whole stationary.
Central Provinces— (Dec. 10th)		
Nagpur . . .	. . . .	Weather often cloudy; prospects good; *rabi* would be improved by a few showers; fever and cattle-disease in some places; prices stationary.
Jubbulpore . . .	. . . .	Weather clear and cold; reaping of *kharif* continues; *rabi* sowings in progress; prospects and health good; rice 16 and wheat 28 seers per rupee.
Saugor (Dec. 9th)	. . . .	Weather cold; *rabi* sowings nearly finished; young crops where germinated thriving; *jowar* being cut; cotton-picking general; health good; prices steady.
Seoni	. . . .	Weather very cold; threshing of rice progressing; cattle-disease still reported; prices falling.
Hoshangabad . .	. . . .	Weather clear and cold; *rabi* crops doing well; *jowar* being cut; cotton-picking commenced; health good; wheat 24 and rice 12 seers per rupee.
Khandwa . . .	. . . .	Weather clear and cold; *kharif* reaping continues; prospects and health good; prices falling.
Raipur . . .	. . . .	Weather cold with light clouds; reaping of rice nearly finished, yield good except in low lands where crops suffer from too much moisture; yield of *kodo*, *rahar*, and cotton bad owing to heavy rainfall; health good; prices stationary.
Sambalpur . (Dec. 6th)	. . . .	Weather clear and cold; rice being reaped; prospects unchanged; health good; prices stationary.
		General Remarks.—Weather very cold; *kharif* crops being harvested; *rabi* sowings nearly finished; prospects favourable; health good; prices steady.
British Burma— (Dec. 10th)		
Akyab (Dec. 6th)	*Nil*	Slight cholera still in town and district; reaping commenced in some places; crop prospects very good.
Bassein („ „)	„	Slight cholera and some cattle-disease in 1 township.
Rangoon („ „)	„	Health good.
Amherst („ „) (Moulmein).	„	Reaping progressing.
Tavoy („ „)	„	Reaping of early crops completed, outturn very favourable.
Pegu („ „)	„	Slight cholera in 1 township; harvest commenced briskly; crop prospects very favourable.
Henzada („ „)	„	Reaping progressing; crops promise well.
Prome („ „)	„	Some cholera; crops reported in good condition.
Toungoo („ „)	„	Slight smallpox on frontier; prospects of crops good, in some parts slight damage to crops caused by rats.
Thayetmayo („ „)	„	Reaping continues; harvest prospects fair.
		General Remarks.—Slight cholera in Akyab, Bassein, Pegu, and Prome; also slight smallpox in Toungoo; elsewhere public health good; slight cattle-disease in Bassein; elsewhere health of cattle good; no rainfall during week; crop prospects good in all districts.
Assam— (Dec. 10th)		
Gauhati . . .	No rain during the week ending 9th inst.	Mornings and nights cool; harvesting of *sali* crop begun; sowing of mustard almost over; prospect of sugar cane good; public health fair.
Sylhet . . .	*Nil*	State and prospects of all crops good; cholera very prevalent; smallpox appears to be decreasing slightly.
Cachar . . .	„	Weather cold; reaping of *sali* crops continues; common rice 16 seers per rupee; tea season closed; health good.
Dibrugarh . .	„	Weather cold; *sali* dhan being reaped, outturn moderate.
Mysore and Coorg— (Dec. 10th)		
Bangalore } Mysore }	. . . .	Crops in good condition; prospects fair; prices unchanged; public health good; the same remarks also apply generally throughout the province.
Mercara . . .	. . . .	Harvesting of rice crop in the Yelsavirshime tatuk; coffee-picking has commenced generally; but berries are ripening slowly; labour plentiful; colds and fever prevalent owing to high east winds; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Berar & Hyderabad— (Dec. 10th)		
Amraoti . . .	. . . .	Weather cool and clear; cotton-picking continues; crops in good condition; wheat 22 and *jowari* 16 seers per rupee.
Akola . . .	. . . .	*Rabi* crops thriving; reaping of *kharif* crops and picking of cotton continue.
Hyderabad . . .	No rain during this week.	Reaping of *abi* rice continues; lands being ploughed for *tabi* sowings; *rabi* crops prospering; no sickness; prices—wheat 14, coarse rice 13¼, white *juar* 19, yellow *juar* 23¾ and *tur* 18 seers per halli sicca rupee.
Central India States—		
Indore . . .	*Nil*	Weather cold and clear; health good; agricultural prospects favourable.
Morar (Gwalior) . .	„	Prospects good; weather seasonable.
Sutna	„	Health good.
Neemuch . . .	„	Weather cold; *jowar* has been reaped; sowings of *rabi* and opium completed; health good.
Goona . . .	„	Weather seasonable; health and prospects good.
Agar	„	Health and prospects good.
Sehore . . .	„	Weather clear; prospects of crops and health good.
Nowgong . . .	„	*Kharif* harvest is being reaped; health good; prices steady; weather clear.
Rajputana—		
Abu . (Dec.	10th)	Weather cold and windy.
Marwar . („	5th)	Cold increasing; health good; prices stationary.
Harowtee . („	8th)	Weather cold; health good.
Jhallawar . („	5th)	Weather seasonable; health and prospects good.
Ajmere . („	9th)	Slight fever prevalent; prospects good; cold increasing.
Jeypore . („	„)	Weather slightly cloudy; *rabi* crops thriving; prices steady; health good.
Ulwur . („	„)	Health much improved; sowing of *rabi* continues.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REPORT OF SPECIAL CHOLERA COMMISSION.

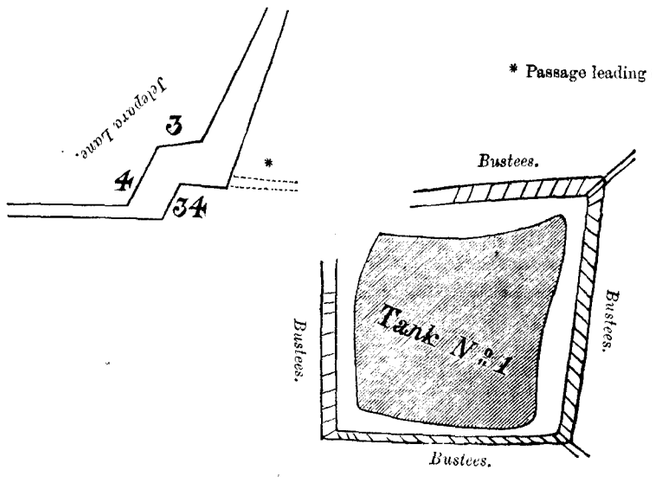
No. 830, dated Calcutta, the 9th December 1884.

From—Surgeon-General J. M. CUNINGHAM, M.D., Sanitary Commissioner with the Government of India,

To—The Secretary to the Government of India, Home Department.

In continuation of my letter No. 810 of the 27th ultimo, I have the honor to submit, for the information of the Government, the accompanying communication from Dr. Klein, and to suggest that it also may be published in the Supplement to the *Gazette of India* for general information.

2. The fact that comma-bacilli have been found in tanks without any case of cholera having occurred among the large number of people using them is an observation of much interest and importance in regard to the relation of comma-bacilli to cholera. The observation has a special interest and importance moreover from the circumstance that one of the tanks in question is the *same tank* as that in which Dr. Koch found comma-bacilli and so hastily concluded that the outbreak of cholera which took place about that time among persons using this tank had been caused by the comma-bacilli it contained.



Dated Calcutta, the 3rd December 1884.

From—Dr. E. KLEIN,

To—The Sanitary Commissioner with the Government of India.

In addition to the short memorandum signed by myself and Dr. Gibbs, which we had the honor to submit to you some days ago, I append here some interesting notes with regard to the relation of comma-bacilli in tank water to cholera in Calcutta, which were collected in conjunction with Dr. D. D. Cunningham.

An outbreak of cholera occurred between 14th and 16th November in three houses in Jelepara lane, in Calcutta. The houses are marked in the subjoined plan as No. 34, No. 3, and No. 4.

In No. 34 occurred three; in No. 3, two; and in No. 4, three cases. Those of No. 34 were the first.

The only condition common to all these houses is this, that in front of them is an opening of the sewer passing under the street.

A passage marked * on the plan leads at some distance to a large tank, No. 1, around which is a number of bustees. The people of these bustees use, as is generally the case, this tank for all kinds of purposes, cess-pools, washing of clothes, utensils, and drinking.

The above three houses Nos. 3, 4, and 34, of Jelepara lane, are inhabited by well-to-do people and they have in their houses a good and pure water-supply of their own, and their inhabitants never come near the tank at all. The water of this tank is very dirty and contains undoubted comma-bacilli, exactly alike those found in choleraic evacuations. Although a large number of the natives living in the bustees surrounding this tank constantly use and drink of this water, no case of cholera has occurred amongst them.

As you are aware from Dr. Koch's official reports to his government, this gentleman visited during his stay in Calcutta (February 13th and 20th, 1884) bustees in Sahib Bagan, amongst the inhabitants of which there occurred, between January 21st and April 27th of this year, a severe outbreak of cholera. These bustees are located around a tank, which for convenience sake may be here called No. 2. There are about two hundred families living around this tank and, as is usually the case, they utilise this water for washing, bathing, cleaning, and drinking purposes. In this water Dr. Koch found the comma-bacilli and he quite arbitrarily concluded that they caused that outbreak of cholera.

I visited this tank lately and found in its water undoubted comma-bacilli; there has occurred, during the whole of November 1884, one single case of cholera, although about two hundred families use the water.

Close to this tank there is another tank, No. 3, and around this live also about two hundred families. As in the former case, the people here around tank No. 3 use the water for all purposes including drinking purposes. The water of this tank is dirty and a sample taken close to the shore revealed undoubted comma-bacilli. There has not occurred a single case of cholera in these bustees during the whole of this year.

It is worth stating that there is a communication between tank No. 3 and tank No. 2, there being a slight flow from the former into the latter. Tank No. 2 receives water from the ice-factory close by.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

MUSEUMS AND EXHIBITIONS.

[To be substituted for the Resolution of the same No. and date.]

Circular No. $\frac{126 \text{ Ex.}}{3C.—37.}$

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, the 5th November 1884.

READ—

List of raw products collected for the Calcutta International Exhibition of 1883-84, compiled by Babu T. N. Mukharji, Officer in charge of the Exhibition Branch, Revenue and Agricultural Department.

RESOLUTION.

AT the request of the Government of Bengal, the Government of India in the Revenue and Agricultural Department undertook to form a collection of the economic products of India for the Calcutta International Exhibition of 1883-84, and the list read in the preamble shows the character and scope of the collection, and the extent to which it may be held to represent the raw resources of the country. The Government of India desires to record its appreciation of the help afforded to it by the officers and private gentlemen named in the appended list, without whose cordial co-operation it would have been impossible in the very limited time allowed to have accomplished the work with any measure of success. More particularly the Government of India would desire to acknowledge the services of the following gentlemen:—

(1) Forest officers of Madras, Bengal, Burma, Assam, and the Central Provinces.
(2) F. Duthie, Esq., Superintendent, Botanical Gardens, Saharanpur.
(3) J. B. Fuller, Esq., Director of the Agricultural Department, Central Provinces.
(4) Babu Lachman Prosad Barman, Superintendent, Government Farm, Cawnpore.
(5) Babu Amba Datt Joshi, of Almora.
(6) Babu Mahendra Nath Battacharjya, M.A., B.L., Deputy Magistrate and Deputy Collector of Bogra.
(7) Dr. Mudin Sharif of Madras.
(8) J. Murray, Esq., Curator, Municipal Museum, Karachi.
(9) Dr. MacDonald, Curator, Victoria and Albert Museum, Bombay.
(10) Babu Ajodhya Prosad, Deputy Magistrate and Deputy Collector, Shahjehanpur.
(11) Major D. G. Pitcher, Assistant Director of the Department of Agriculture, N.-W. Provinces and Oudh.

ORDER.—Ordered that a copy of this Resolution be printed and distributed to the Local Governments and Administrations noted in the margin, and be published in the *Gazette of India* for general information.

Madras.	Punjab.
Bombay.	Central Provinces.
Bengal.	British Burmah.
North-Western Provinces and Oudh.	Assam.

Ordered also, that a copy of this Resolution be forwarded to the Foreign Department for communication to the Agent, Governor General, Rajputana.

Drainage water received from the Upper Ganges Canal	595	
Ditto ditto Lower Ganges Canal	1,326	1,921

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—No irrigation has been effected owing to late and abundant rain.

Executive Engineer, Eastern Jumna Canal, reports—Canal closed the whole month and no demand. The quantities shown irrigated "during month" are really corrections of the previous month's estimates, which were thrown out by the sudden rainfall at the end of the month. The decrease of 24,000 acres as compared with last year is due to the heavy rainfall, 18,000 of it is in "other food grains" and the remainder in rice. Indigo has again increased.

Executive Engineer, Rohilkhand Canals, reports—The rain ended on 4th October with very heavy floods which damaged the rice slightly, cotton, bajra and early-sown gram and linseed. An unusually large area of land is being sown with rice, which is coming on well. No demand for canal water. Most of the canals are closed and only percolation water running. Most of the water shown as entering the division is due to Dhora river.

Northern, Anúpshahr, Meerut, Bulandshahr, Aligarh, Bhognipur, Bijnor, Jhánsi, and Hamírpur returns reported blank.

No remarks from the other divisions.

The following areas were also irrigated for *kharif* in addition to the above during this month:—

Lower Ganges Canal, Narora Division	19,819
Eastern Jumna Canal	93,680
Rohilkhand Canals	31,085
Total	144,584

In addition to the above the following kharif irrigation was also effected:—

Canal.	Sugarcane.	Indigo.	Rice.	Cotton.	Other food grains.	Fodder crops.	Miscellaneous.	Total.
Narora Division, Lower Ganges Canal	618	17,578	1	129	175	19	1,299	19,819
Eastern Jumna Canal	41,064	6,986	29,149	6,121	2,040	4,260	4,061	93,680

(e) Exclusive of the mileage of the Cawnpore-Achnera Railway (133).
(f) Exclusive of the mileage of the Cawnpore-Achnera Railway (243).
(g) Total receipts from 16th July to 17th November 1883.
(h) Total receipts from 1st to 15th November 1884.

FORT WILLIAM,
The 18th December 1884.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

SUPPLEMENT TO

The Fort St. George Gazette

Published by Authority.

FRIDAY EVENING, JANUARY 30, 1857.

TABLE OF DISTANCES.

MILITARY DEPARTMENT.

General Orders by the Right Honorable the Governor in Council.

FORT ST. GEORGE, 30TH JANUARY 1857.

No. **25** of 1857.—With reference to G. O. G. 25th November 1853, No. 244, the Right Honorable the Governor in Council is pleased to publish the following Table of Distances for the guidance of all Departments in regulating charges for travelling batta, and to obviate the necessity of applications to the Quarter Master General's Department for certificates of distance.
