Opening Balance £	...	...	41,055	...	132,100*	...	...	63,547*	42,139	278,841
GRAND TOTAL £	...	...	133,707	...	61,628	...	...	105,123	613,188	1,513,646

* These balances differ from the closing balances of last year's account by £65,034 and £10,777, respectively, for corrections since made. The difference under Bengal is owing to the non-inclusion in the Account of 1881-82 of the Capital Account transactions of the Calcutta Port Commissioners. That under Madras is due to the late adjustment of the cost of a steamer to debit of the Port Fund.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR 1882-83.

No. 82 I.—Fort William, March 7, 1884.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of the Punjab, No. 575 I., dated 29th January 1884, forwarding the Revenue Report of Irrigation Works in the Punjab for 1882-83, and of the Resolution by that Government reviewing the Report.

OBSERVATIONS.—The total capital outlay incurred up to the end of the year under review amounted to R5,79,25,118; the gross revenue assessed to R39,67,862; the maintenance charges, direct and indirect, to R19,49,060; and the net assessed revenue to R20,18,802, or 3·48 per cent. on the total capital expenditure to the end of the year. If, however, R3,16,43,868—the capital outlay on the Sirhind, Swat River and other canals, which had not come into operation during 1882-83—be deducted from the total capital outlay, the net revenue will be found to yield a return of very nearly 8 per cent. on the balance.

The surplus of accumulated net revenue over accumulated interest charges payable up to the end of the year amounted to R1,82,78,867.

2. The assessments of 1882-83 are compared below with those of three previous years :—

CANALS.	ASSESSMENTS. 1882-83.	1881-82.	1880-81.	1879-80.
	R	R	R	R
Bari Doab	13,12,256	13,53,590	15,19,068	13,85,454
Western Jumna	14,22,785	11,44,440	10,29,669	13,13,685
Inundation Canals	12,32,821	14,33,536	10,95,551	7,34,778
Madhupur Workshops	. . .	. . .	. . .	. . .
TOTAL	39,67,862	39,31,566	36,44,288	34,33,917

The large increase of revenue on the Western Jumna Canal is very satisfactory, but is almost counterbalanced by the decrease on the Inundation Canals. The revenue of these canals was, however, abnormally high during 1881-82, as explained in the review of the operations of that year.

3. The working expenses, including indirect charges, amounted to—

Canals.	Working expenses.			
	1882-83.	1881-82.	1880-81.	1879-80.
	₹	₹	₹	₹
Bari Doab	5,29,573	5,10,565	4,22,718	5,02,288
Western Jumna	4,71,794	4,31,163	4,08,254	4,75,632
Inundation Canals	9,17,693	8,05,517	8,84,252	6,47,511
Madhupur Workshops	. . .	. . .	. . .	14,361
Total	19,49,060	17,47,245	17,15,224	16,39,792

The increase in cost of maintenance of the Inundation Canals occurs on the Upper and Lower Sutlej and Indus Canals. Of the total amount of this increase, ₹94,885 were incurred on special clearances, excavations and repairs, and ₹36,121 on establishment charges arising principally from the constitution of the Derajat Circle of superintendence.

4. The net assessed revenue, after deduction of all working expenses, amounted to—

Canals.	Net assessed revenue.			
	1882-83.	1881-82.	1880-81.	1879-80.
	₹	₹	₹	₹
Bari Doab	7,82,683	8,43,025	10,96,350	8,83,166
Western Jumna	9,50,991	7,13,277	6,21,415	8,38,053
Inundation Canals	2,85,128	6,28,019	2,11,299	87,267
Madhupur Workshops	. . .	. . .	. . .	—14,361
Total	20,18,802	21,84,321	19,29,064	17,94,125

The increase in working expenses, combined with the falling off in the income, has told most unfortunately against the net revenue derived from the Inundation Canals.

The net assessed revenue of the Bari Doab Canal returned 5·04 per cent., that of the Western Jumna Canals 10·75 per cent., and that of the Inundation Canals, for which Capital and Revenue Accounts are kept, 11·46 per cent., on the total capital outlay incurred up to the end of the year; the corresponding percentages of 1881-82 having been 5·42, 8·6, and 23·38 respectively.

5. The areas irrigated during 1882-83 and three previous years were as follows:—

Canals.	Acres irrigated.			
	1882-83.	1881-82.	1880-81.	1879-80.
Bari Doab	353,615	368,002	433,080	393,317
Western Jumna	374,243	300,545	265,551	310,686
Inundation	955,414	1,019,178	867,246	516,341
Total	1,683,272	1,687,725	1,565,877	1,220,344

On the Western Jumna Canal the area of sugarcane watered was 80 per cent., and that of wheat 47·4 per cent. in excess of that of the previous year. Of the

total area irrigated by the canals of the Punjab during 1882-83, 593,437 acres, or 35·25 per cent., were under wheat, the area and proportion of wheat irrigation during the previous year having been 602,860 acres and 36 per cent.

6. The following statement of duty done by the water entering the heads of the Bari Doab and Western Jumna Canals shows a marked improvement in the "rabi" duty of the latter canal:—

Canals.		1882-83.		1881-82.		1880-81.		1879-80.	
		Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
	Per cubic foot per second.								
Bari Doab	Acres	53·8	103·9	64·9	143·4	54·8	144·6	59·7	117·7
	₹	160·4	333·2	196	320	161·7	319·6	172·5	259·3
Western Jumna	Acres	66·0	101·0	67·6	65·8	62·4	62·8	79·6	61·6
	₹	210·0	221·0	295	205	178·5	138·2	248·4	134·9

7. The maintenance charges per acre irrigated are compared below:—

Canals.	Per acre irrigated.			
	1882-83.	1881-82.	1880-81.	1879-80.
Bari Doab	1·49	1·39	0·97	1·27
Western Jumna	1·26	1·43	1·53	1·53
Inundation	0·99	0·79	1·02	1·25
On whole area	1·15	1·03	1·09	1·34

The decrease in rate of maintenance per acre on the Western Jumna Canal is entirely due to the increase in area of irrigation on that canal.

9. The balances of canal revenue remaining uncollected on the 1st of April 1883 amounted to ₹42,992-8-6 out of a total demand of ₹18,91,588-8-6; those of April 1st, 1882 and 1881, having amounted to ₹63,044 and 1,82,622 respectively.

Order.—Ordered, that copies of this Resolution and of the Report, and of the Resolution by the Punjab Government, be forwarded to the Secretary of State, and to the Finance and Commerce and Revenue and Agricultural Departments of this Government for information.

Also, that copies of this Resolution be forwarded to the Government of the Punjab for information and guidance.

Also, that copies of this Resolution and of the Report, and Resolution by the Punjab Government be forwarded to the Local Governments and Administrations and Officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, Public Works Department.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department, for communication to the Resident at Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also, that this Resolution, and the Resolution by the Local Government, with a few selected tables, be published in the Supplement to the *Gazette of India*.

By order,

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department, No. 574 A-I.—dated 29th January 1884.

READ—

Revenue Report of the Chief Engineer, Irrigation Works, Punjab, for the year 1882-83.

RESOLUTION.—The result of the working of the Punjab Canals for the year 1882-83 is not so favorable as for the previous year. The net revenue on the Capital invested is by assessments 3·60 and by collections 3·12 as compared with 3·99 and 3·52, which are the corresponding figures for 1881-82.

2. The area irrigated was 1,683,272 acres, which is practically identical with the 1,687,725 acres measured in the previous year. The improvement noticed last year in the areas irrigated by the Western Jumna Canal still continues, but there is a slight decrease in the figures for the Bári Doáb Canal The Upper Sutlej Series of Inundation Canals alone show a sensible decrease in area; that recorded in the last Report was abnormal.

3. The Capital invested by Government in the Punjab Canals amounted, at the close of the year, to ₹4,75,07,604, to which must be added ₹1,04,17,514 contributed by Native States to the Sirhind Canal.

4. The total money invested was therefore ₹5,79,25,118, of which ₹24,15,767 have been expended on a Protective Work, *viz.*, the Swat River Canal, which is not yet completed.

Rupees 8,55,648, which represents the cost of surveys for new projects, is not included in the above total; this amount having, under orders received from Government of India, been classed under the head of "Works for which neither Capital nor Revenue Accounts are kept."

5. The Capital expenditure has been increased during the year by ₹25,29,414; but although there has been no addition to the canals in operation, the accounts for the year show a surplus of ₹51,792 after paying working expenses and interest charges on all the money invested by Government in canals in this Province. The total surplus receipts now amount to ₹1,82,78,867.

6. There was an addition of ₹5,31,032 to the Capital of permanent canals in operation. The total Capital invested is ₹2,43,76,076. The gross revenue collected during the year was ₹25,92,115; the working expenses, ₹10,01,367; and the interest charge, ₹9,22, 048. The profit was therefore ₹6,68,700, giving a percentage of 2·74 on the Capital invested; the corresponding figure for the previous year being 3·43.

7. There is a decrease of ₹15,863 in the Capital Account of the Inundation Canals in operation, with which is included the Mádhopur Workshops; the decrease is due to the sale of stores from the Workshops. At the close of the year the Capital invested was ₹19,05,174. There is no Capital Account for the Muzaffargarh Canals.

8. The revenue collected during the year under review amounted to ₹10,17,763; the working expenses were ₹7,91,034; and the interest charges, ₹73,313, leaving a net profit of ₹1,50,416, or 7·89 per cent. on the Capital.

9. The revenue assessed for the year was ₹10,12,467, and the net profit ₹1,45,120, or 7·62 per cent. after paying all charges.

10. The following table shows the areas irrigated on Permanent and Inundation Canals for five years:—

CANAL.	1882-83.	1881-82.	1880-81.	1879-80.	1878-79.
Permanent	727,858	668,547	698,631	704,003	726,018
Inundation	955,414	1,019,178	867,246	516,341	692,261
TOTAL	1,683,272	1,687,725	1,565,877	1,220,344	1,418,279

There is a considerable increase on the Western Jumna Canal, and the areas of the previous year are fairly maintained on all the Inundation Canals, except the Upper Sutlej.

11. Referring to paragraph 9 of Government of India's Review of the Revenue Report for last year on the subject of the cost of collecting canal revenue, further enquiries show that the charges in the Delhi Division of the Western Jumna Canal may be reduced to some extent, but that there is no prospect of reductions in any other Divisions.

12. Surveys and estimates for Inundation Canals from the Sutlej, Chenab and Ravi rivers were in progress during the year. All three projects have since been submitted, and work has been commenced on the provisional sanction granted by the Government of India to the estimates.

83. Surveys for a canal to Montgomery from the Ravi were also completed before the hot weather set in. An estimate has been framed, and the financial prospects of the scheme are now undergoing further investigation.

14. The Sirhind Canal was formally opened by His Excellency the Viceroy on the 24th November 1882. The construction of distributaries and the completion of unfinished branches have been in progress during the year. Water was distributed by temporary arrangements to a small area during a lengthened break in the monsoon.

WESTERN JUMNA CANAL.

15. The area irrigated by this canal has again largely increased, and the acreage assessed is now nearly equal to that measured in 1878-79.

16. The collections and assessments show a profit, after defraying all charges and interest, of 4·75 and 7·07 respectively; the percentages for the previous year were 6·06 and 4·92.

17. The working expenses amounted to ₹1·26 per acre; the cost in the previous year was ₹1·43. The cost of establishment was ₹0·70 per acre, as against ₹0·80 in 1881-82. The decrease in these rates is entirely due to the increase in the area irrigated.

The balance of profits at the credit of this canal at the close of the year was ₹2,64,74,527.

BARI DOAB CANAL.

18. The area irrigated by this canal was 353,615 acres, being 14,387 acres less than in the previous year. The kharif was good, and the decrease in the rabi is, as explained in paragraph 37 of the Chief Engineer's Report, due to copious rainfall at seasons very favorable to the cultivators. Several of the kharif distributaries alluded to last year are now under construction, and as they can also be used during the rabi whenever water is not required in the upper part of the Doáb, it is expected that by their assistance the available supply will be fully utilized even in seasons similar to that under review.

19. The net profit from the collections of the year amounts to 1·59, as against 2·03 per cent. in the previous year. The profit calculated on assessments is 1·12 per cent.; that of the previous year was 1·58. The charges and interest to the debit of the canal at the close of the year amounted to ₹58,32,086.

20. The charges for establishment and working expenses amounted to ₹0·670 and 1·50 per acre respectively, as against ₹0·628 and 1·390 in the previous year. The differences are partly due to the diminished acreage, but mainly to the constitution of a new Circle, and to expenditure on permanent training works at the head of the canal.

21. There is a satisfactory decrease in the balance of revenue uncollected, which amounted to ₹23,282 at the close of the year, as compared with ₹35,387 at the same period of the previous year.

UPPER SUTLEJ INUNDATION CANALS.

22. The result of the working of these canals during the year under review was a loss of 0·17 per cent. on the Capital invested. In the previous year

the net profit was 6·46 per cent. The accumulated interest and other charges that remained unpaid at the close of the year amounted to R6,21,089.

23. It was remarked in the last review that the area assessed in that year was the largest on record; it amounted to 179,578 acres; the assessments of the present year are based on an area of 129,102 acres, which as a total compares favorably with all preceding years except the last. The receipts will, however, be considerably less owing to the large percentage of rabi crops, which are assessed at comparatively low rates. The decrease in kharíf area was due to the late rise of the river.

LOWER SUTLEJ AND CHENAB CANALS.

24. The profit on these canals was 179·57 per cent.; in the previous year the profit was 205·93 per cent.

25. The share of land revenue credited to the canals in this and in the previous year was R3,07,837 and R3,05,203 respectively. It will be seen from paragraph 75 of Chief Engineer's Review that the decrease is only apparent. The balance at the credit of these canals now amounts to R44,82,085.

26. The area irrigated, 362,975 acres, is again in excess of the largest previously recorded (1881-82) when 346,278 acres were measured. The increase was confined to those canals which are fed by the Chenab river; there was an early rise and late fall in the bed of that river, and the rainfall was copious and timely.

27. Owing to the increase in area, the cost of cultivation to the irrigators was 1·47 per acre, as against 1·50 in the previous year.

INDUS INUNDATION CANALS.

28. The accounts show a loss of 14·13 per cent. from the working of these canals during the year under review. The balance of interest unpaid at the end of the year was R3,38,586.

29. The losses incurred in previous years by the inadequacy of contributions by the irrigators towards the cost of clearing these canals have been still further reduced, and now amount to R29,080. The uncollected contributions amount to R53,564.

30. The unfavorable result of the operations for the year is principally due as explained in paragraph 88 of the Chief Engineer's Report, to expenditure incurred in banking out the Indus. There were constant floods in the river, and its encoachments on the right bank were most serious. There was also an increase in establishment charges from the reconstitution of the Derajat Circle of Superintendence.

31. The area irrigated was 190,620 acres, or 182 acres less than in the previous year; the area is nevertheless one of the largest on record.

MUZAFFARGARH INUNDATION CANALS.

32. There was delay in obtaining complete figures for the share of land revenue which should be credited to these canals and the accounts are therefore imcomplete. From the figures given in paragraph 106 of the Chief Engineer's Report, it will be seen that the actual balance of profit was R1,83,095 or R4,128 more than in the previous year.

33. The area irrigated was 259,385 acres, as against 248,593 acres in the previous year. The actual increase from year to year is not large, but it is satisfactory as an indication of steady progress. The cost of irrigation to the cultivators was R1·32 per acre, as against R1·37 in the preceding year.

SHAHPUR INUNDATION CANALS.

34. The net profit from the working of these canals was 2·87 per cent. on the Capital invested, which does not compare favorably with the 33·85 per cent. profit in the previous year. There has apparently been some delay in realizing water-rates, which will be corrected in the ensuing year.

35. The balance of profit to the credit of these canals amounts to R35,174.

36. The area irrigated during the year was 12,632 acres, or 1,109 acres more than in the preceding year.

37. A scheme for the improvement of these canals is under consideration, but no action will be taken on it until the receipts of orders on a project for the irrigation of the Rechna Doáb, which was lately submitted for the orders of Government of India.

GENERAL.

38. A classified statement of crops irrigated in each Canal Division is appended to Chief Engineer's Report.

39. This Report is submitted two months later than the date specified in Government of India's No. 94 I, dated 13th March 1883, owing to unexpected delays in passing the papers through the Press. Steps will be taken to ensure the submission of future Reports on the proper date.

By order of the Hon'ble the Lieutenant-Governor,

R. HOME, *Colonel, R.E.,*
Joint-Secy. to Govt. Punjab, P. W. D.,
Irrigation Branch.

* Passed down to supplement Agra Canal supply.

Executive Engineer, Northern Division, Ganges Canal, reports that the demand was heavy throughout the early part of the month, but slackened off towards the end of the month. The second and third waterings are in progress. There was no rain during the month.

Executive Engineer, Meerut Division, Ganges Canal, reports that there was a very heavy demand for water for rabi crops during the month, but, owing to the reduced supply allotted for this Division, less new irrigation has been effected than would otherwise have been the case.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports that the estimate is probably under the mark; that there was a heavy demand for water, and that the supply was deficient.

Executive Engineer, Aligarh Division, Ganges Canal, reports that the supply in the canal has been less than the demand since the 11th of January.

Executive Engineer, Narora Division, Lower Ganges Canal, reports that the demand was very brisk during the month, and much more irrigation could have been done but for the heavy tatils imposed on account of abnormally low supply in the river.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that there was a strong demand for water throughout the month, but that the supply was much below the requirements. Had more water been available, the area irrigated would have been much larger.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports that the increase over the area irrigated in January, 1883, is due to the dryness of the season.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that no rain was recorded during the month, and that water was in great demand, and that the low supply in the canal for half the month restricted the irrigated area.

Executive Engineer, Eastern Jumna Canal, reports that the increase over last year is entirely in "wheat" and "other food grains," and that is due to the early close of the rainy season and the continued drought since. The demand for water is in excess of the available supply. Crops within reach of irrigation are doing very well.

Executive Engineer, Agra Canal, reports that the canal was closed on the 24th for three days during showery weather, in order to open the diversion for the new weir; the demand met with some difficulty towards the end of the month.

Executive Engineer, Rohilkhand Canals, reports that water was in great demand for rabi first and second waterings, and for sugar paleo when rabi irrigation was done; the supply does not nearly meet the demand except on the Lower Baigul and Baror, where the areas secured are only average ones; on the other branches the areas are below the average on account of the short supply. The area under rabi is everywhere less than usual this year.

Executive Engineer, Dun Canals, reports that, owing to there being no Christmas rain, canal water was in considerable demand during January, although many cultivators held off in hopes of rain. The rivers in the Dun were unusually low.

No remarks from the other divisions.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF REGULATION REPORTS FOR THE YEAR 1882-83.

No. 12 438—450.

Extract from the Proceedings of the Government of India, in the Home Department (Public),—dated Calcutta, the 8th March 1884.

READ—

Home Department Resolution No. 36—1174 to 1185, dated the 1st September 1883, reviewing the Registration Reports of the several Provinces for the year 1881-82.

Read also—

The Registration Reports of the several Local Governments and Administrations for the year 1882-83.

RESOLUTION.

OBSERVATIONS.—The statement annexed shows for the several Provinces the total number of registrations, the receipts and expenditure of the Registration Department, and the aggregate value of property transferred by registered documents in the years 1880-81 to 1882-83, as well as the proportion of registration offices to area and population. The total number of documents registered increased from 1,355,120 in 1881-82 to 1,389,885 in the year under review. The receipts of the Department rose from Rs. 24,12,603 to Rs. 24,58,746, and the expenditure from Rs. 15,70,977 to Rs. 16,32,364. There was thus compared with the previous year an advance of 34,765 in the total number of transactions, of Rs. 46,143 in the receipts, and of Rs. 61,387 in the expenditure of the Department. The percentage of expenditure on receipts advanced from 65·1 to 66·3.

The registrations affecting immoveable and moveable property were as follows :—

	Number of registrations affecting immoveable property.			Number of other registrations.	Grand Total.
	Compulsory.	Optional.	Total.		
1881-82	756,928	398,349	1,155,277	199,843	1,355,120
1882-83	764,763	429,808	1,194,571	195,314	1,389,885

	Affecting immoveable property.	Affecting moveable property.	Total.
	Rs.	Rs.	Rs.
1881-82	37,87,06,786	4,96,71,005	42,83,77,791
1882-83	37,72,54,064	4,54,06,714	42,26,90,778

The following figures show the aggregate value of property transferred by registered documents during the years 1881-82 and 1882-83 :—

2. *Madras.*—The total number of registrations in the Madras Presidency has again risen, being 435,381 for the year under review against 427,402 for 1881-82, representing an advance on last year of 7,979 documents, or 1·8 per cent. The operations were more than double the number recorded 10 years ago. The following figures

compare the transactions under the chief heads for 1881-82 and 1882-83:—

	Affecting immoveable property.		Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.			
1881-82 ...	218,680	175,103	32,718	901	427,402
1882-83 ...	215,953	188,408	30,051	969	435,381

As to registrations affecting immoveable property, it will be seen that, although they increased as a whole by 10,578 or 2·7 per cent. as compared with the previous year; those of a compulsory character fell by 2,727, or 1·2 per cent., while those of an optional character advanced by 13,305, or 7·5 per cent. At the same time registrations affecting moveable property declined by 2,667 or 8·7 per cent. Under wills and authorities to adopt, there was an increase of 68, or 7·5 per cent. The decreases which occurred are ascribed by the Inspector General to decisions of the High Court and the Board of Revenue declaring that the registration of Court sale and Revenue sale certificates is unnecessary, and to the prevalence of cholera, small-pox, and unusual floods in some districts which deterred people from pursuing their ordinary avocations. Other causes which are mentioned as having tended to retard the expansion of the operations of the Department are the occasional searches made by the Revenue authorities in the registers in connection with license tax enquiries; the want of privacy in offices held inside taluka cutcherries; the objections of karnams, who are invariably the identifying witnesses called by villagers, to appear frequently as such in the taluka offices. As an instance of the apparently trifling circumstances which affect the popularity of registration it is stated by the Inspector General that, where, on the absence of a Sub-Magistrate who was *ex-officio* Sub-Registrar, the duties were conducted by a Head Clerk, parties refused to appear before him to register their documents.

The following table compares the operations under the heads of sales and mortgages of immoveable property and of leases:—

	Instruments of sale and mortgage affecting immoveable property.		Leases (Book I).	
	Compulsory.	Optional.	Compulsory.	Optional.
1881-82 ...	168,912	141,871	30,815	20,510
1882-83 ...	161,677	149,264	34,361	22,056.

In instruments of sale and mortgage of properties valued at Rs. 100 and upwards, the decline in the number of registrations was 7,235, or 4·2 per cent.; while, on the other hand, the increase in the transactions relating to instruments of this class affecting properties under Rs. 100 was 7,393 or 5·2 per cent. The increase of over 5,000 in the number of leases registered is satisfactory. The number of perpetual leases registered was over 2,500. There was also a rise in the number of deeds of gifts. The transactions under both these heads have been steadily rising during the last five years.

The largest number of optional registrations in Book I were effected in the Districts of Calicut, Tellicherry, Tinnevelly, Madura, and Tanjore.

The advance in optional registration relating to immoveable property is gratifying. The percentage of this increase during the last five years has been, as compared with the year previous, 39, 44, 47, 49, and 50 respectively. This steady advance is ascribed to the wider knowledge which prevails of the utility of the provisions of Section 50 of the Registration Act. In the opinion of the Inspector General and

of the Madras Government there is still a large field open to the department for the expansion of its operations in the direction of optional registration. As regards registrations affecting moveable property, there was an increase in the number of deeds of sale and a falling off in the number of bonds registered. The operations under these heads were, respectively, 1,293 and 19,516 in 1881-82, against 1,525 and 18,742 in 1882-83. The decline in the number of bonds registered is attributed to the factitious increase which occurred last year in consequence of the large number of persons belonging to the process establishments of the civil courts who were required to execute security bonds. The number of wills presented has steadily risen from 636 in 1878-79 to 969 in the year under review.

The aggregate value of the transactions of the year fell from 1,255 lakhs of rupees in 1881-82 to 1,215 lakhs of rupees in 1882-83, or by 3·1 per cent. This decline was due to the falling off in the value of transactions relating to moveable property, the decrease under which head amounted to 40 per cent. The value of immoveable property affected advanced by 1·6 per cent. The value of lands transferred by sales increased by almost 60 lakhs of rupees, and under perpetual leases by ¼ lakh, while the value of lands subjected to encumbrances by mortgages was less by 28 lakhs of rupees than during the previous year. This is ascribed to the more favourable state of the season generally, and the more prosperous and independent position of the landowners.

The receipts of the Department amounted to Rs. 5,74,710 against Rs. 5,82,951 in 1881-82. The expenditure rose from Rs. 4,81,603 in 1881-82 to Rs. 5,50,353 in the year under review. The surplus was thus only Rs. 24,357 against Rs. 101,348 in 1881-82, and the percentage of expenditure to receipts 96 against 82·8 in the previous year.

The decision of the Local Government not to impose any fee on the optional registration of court sale certificates, and the gratuitous registration, in consequence, of such certificates has naturally caused a decline in the gross receipts. As to the expenditure, it is explained that the salaries of Registrars and Sub-Registrars showed a large increase, owing both to the employment of additional officers and to the revised scale of salaries that was brought into force during the year. The number of Sub-Registry Offices was increased from 269 in 1881-82 to 285 in 1882-83; and 31 Revenue officials who were *ex-officio* Sub-Registrars were replaced by special officers. The expenditure on office buildings was large compared with the expenditure of preceding years. That on new works amounted to Rs. 45,169 against Rs. 17,305, the expenditure of the previous year. Hitherto the Department has found accommodation in the District Revenue Offices. As this has proved not only inadequate, but inconvenient both to the registration officials and to the public, separate buildings are now being erected throughout the Presidency.

The Government of India concur with the Madras Government in congratulating the Inspector General and officers of the Registration Department of that Presidency on the careful and efficient administration which has produced the very gratifying results to which the foregoing figures testify.

3. *Bombay.*—The number of registrations was 84,903 in 1882-83 as compared with 78,446 in 1881-82, thus exhibiting a satisfactory increase of 8·2 per cent. Optional registrations exhibited the greatest increase, the number having risen from 18,799 in 1881-82 to 22,281

in 1882-83, or 18·5 per cent. The compulsory registrations rose from 59,647 to 62,622, or nearly 5 per cent. The proportion of optional to total registrations was 26·3 per cent. in the year under review, while in the previous year it was 23·9 per cent.

The figures are not so large as those reached in the years between 1878-79 and 1879-80; the Inspector General attributes this mainly to the operation of the Deccan Agriculturists Relief Act of 1879 in four of the districts of the Presidency. The Act withdraws from the Department a number of transactions which would otherwise fall to be dealt with by it.

The following figures compare the particulars of registration effected during the years 1881-82 and 1882-83:

	Affecting immoveable property.			Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.	Total.			
1881-82 ...	59,647	14,567	74,214	3,521	714	78,449
1882-83 ...	62,622	17,643	80,265	3,910	728	84,903

The substitution of Special Sub-Registrars for *ex-officio* Sub-Registrars, which was carried out in the year under review, has had a beneficial effect in stimulating the extension of registration. The Inspector General observes—"the returns show that registration in most of these newly constituted offices has remarkably increased." In the Presidency proper there is now only one *ex-officio* Sub-Registrar; but in Sind there are still 16 of this class whom it is hoped to replace gradually by special officers. The system of registration by a peripatetic agency, to which reference was made in last year's review, has not been tried yet, but effect is to be given to the measure in four districts during the current year. The report of the results of the scheme will be awaited with interest by the Government of India.

The greatest increase under the head of compulsory registration took place in the registration of deeds of sale of immoveable property of the value of Rs. 100 and upwards, the number of documents having risen from 21,829 in 1881-82 to 23,749 in 1882-83, or by 9 per cent., while the value of the property to which the deeds relate was greater by 20 per cent. Deeds of mortgage of immoveable property of the value of Rs. 100 and upwards were but slightly in excess of those in the previous year (27,551 as against 27,251 in 1881-82). There was a material increase in the number of perpetual leases registered. With regard to optional registrations affecting immoveable property, the number of deeds of sale of less value than Rs. 100 was greater by over 20 per cent. than in the previous year; the number of documents registered during the years 1881-82 and 1882-83 being, respectively, 7,347 and 8,857. This was, however, accompanied by a falling off in the aggregate value of the property dealt with. There was also an increase of 21 per cent. in the number of registrations of deeds of mortgage of immoveable property of less value than Rs. 100, and of nearly 17 per cent. in the value of the transactions. The increase in compulsory registrations affecting real property is accounted for by the abandonment of the practice of executing several documents regarding the same transaction in order to bring them out of the class of documents which the law requires to be registered. The existence of such practices points to the necessity of providing greater facilities for registration. It is observed that the Government of Bombay have exposed the mistake of supposing that no action on the part of the Department can increase the number of compulsory registrations.

No direct causal connection could be traced between the favourableness of the season and the increase or decline of the operations of the Department. It is, however, noted as a "coincidence that, in all the districts in which there was material decrease in registration, the season was favourable, while those in which there were the greatest increases the crops suffered either from an unseasonable rainfall or from locusts." The proportion of documents relating to immoveable property, the registration of which is optional, was still comparatively small. The Government of India are glad to observe that the Government of Bombay have under consideration the opening out of new offices, and that they have directed attention to the inconvenience caused to the people by the requirement on the part of the officers of the Department of unnecessarily strict evidence of the identity of parties to documents presented. It is by removing artificial obstacles of this kind that the popularity of registration can be fostered.

Instruments relating to real property registered in the year under review and the previous year, classed according to their subject-matter, were—

	1881-82.	1882-83.
Houses	25,916	28,825
Lands	36,660	39,751
Houses and lands	10,265	10,917

There was nearly the same increase in the registration of instruments relating to houses as in those relating to land.

Bonds were the only class of documents in the registration of which there was a falling off. As optional registration increased generally, it is inferred that there was a falling off in the number of bonds actually executed. Although the number* of bonds was smaller than in the previous year, the aggregate amount for which they were executed was larger.

* 1881-82.		1882-83.	
No.	Value. Rs.	No.	Value. Rs.
920	3,27,239	888	3,89,305

The registrations of a miscellaneous character rose from 1,790 to 2,078. The number of copies of certificates of sale filed in accordance with the amended Section 89 of the Act was 6,320 in 1882-83 compared with 6,184 in the year 1881-82, and the number of certificates under the Land Improvement Act was 85 against 24. The number of Wills registered was 728 or 2·4 per cent. more than in the previous year. No "authority to adopt" was registered during the year.

Under the Parsi Marriage Registration Act 618 marriages were registered as against 466 in 1881-82. Only one marriage was registered under Act III of 1872.

The aggregate value of the property assured is shown below:

	Immoveable property.	Moveable property.	Total.
	Rs.	Rs.	Rs.
1881-82 ...	4,55,40,800	21,16,650	4,76,57,450
1882-83 ...	4,78,42,817	22,30,397	5,00,73,214

The average registration fees for the different classes of documents in the year under review and the previous year were as follows:

	Compulsory.	Optional. Moveable.	Optional. Immoveable.	For all classes.
	Rs. As. P.	Rs. As. P.	Rs. As. P.	Rs. As. P.
1881-82 ...	2 3 7	1 14 6	0 7 11	1 14 2
1882-83 ...	2 2 6	1 13 9	0 7 8	1 12 8

The total receipts of the Department rose from Rs. 2,46,870 in 1881-82 to Rs. 2,56,513 in 1882-83, while the expenditure increased from Rs. 2,12,014 to Rs. 2,22,839. There was thus a surplus of Rs. 33,674 in the year under report as compared with Rs. 34,855 in the previous year. There was an increase of receipts in 14 districts and a decrease in 11, and in the only districts in which the income did not exceed the expenditure the deficit was only Rs. 5,132. The increase in the expenditure was chiefly due to the substitution of special for *ex-officio* Sub-Registrars.

4. *Bengal.*—The results of the working of the Registration Department in Bengal during the year 1882-83 show an improvement compared with 1881-82, the total number of registrations having exceeded by 18,057, or 3·36 per cent., the number in the preceding year, though it is still below the totals of the years 1878-79 to 1880-81, which were as shown in the margin. The following figures exhibit the number of compulsory and optional registrations regarding immoveable property, as well as the number of other registrations effected during the year under review as compared with the operations in 1881-82 :

1878-79	599,151
1879-80	609,109
1880-81	556,233

	Affecting immoveable property.		Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.			
1881-82 ...	303,823	132,475	99,004	1,782	5,37,084
1882-83 ...	307,609	146,521	99,092	1,919	5,55,141

It will thus be seen that the increase was general, optional registration affecting immoveable property contributing the most towards the increase, *viz.*, 14,046 documents, or 10·6 per cent. Taken as a whole, the figures show that compulsory registrations advanced by 1·2 per cent. and optional registrations by 6·1 per cent.

As regards compulsory registration, there was a rise in the number both of deeds of sale, and of deeds of mortgage of immoveable property of the value of Rs. 100 and upwards registered during the year. The number of transactions belonging to the former class was 41,337 during the year 1882-83 against 38,022 in 1881-82; and the number belonging to the latter class was 44,798 against 42,787, thus representing an increase of 8·7 per cent. and 4·7 per cent. respectively. The number of perpetual leases registered again fell from 74,639 in 1881-82 to 70,764 in 1882-83, or by 5·1 per cent., the number for 1880-81 having been 102,512. On the other hand, the number of term leases registered rose from 140,287 in the previous year to 141,156 in the year under review. Save in one district (Pubna), the grant of perpetual leases throughout the country generally appears to be steadily falling off. The Inspector General is unable to determine the exact cause of this declension, but he adds—"Bad crops may affect the number for that year, or even a succession of years. All that can safely be inferred is that landlords are generally averse from parting with their interest in the land, and that only needy or embarrassed proprietors resort to the granting of these leases." The Lieutenant-Governor still holds to the opinion, expressed in the Resolution of the Government of Bengal on the Registration Report for 1881-82, that neither landlord nor tenant is willing to bind himself in perpetuity by any agreement so long as there is any uncertainty about the final form which the rent laws will take. The increase in the number of term leases, though not large in the aggregate, is, in the opinion of the Lieutenant-Governor, sufficient to show a continued recourse to registration of such leases, and that it may be now accepted as a fact that

the removal by Act I of 1879 of the exemption from stamp duty of certain kinds of cultivators' leases has not had the prejudicial effect on the registration of such documents which was anticipated.

The disproportion of leases to counterparts, although the ratio exhibited a slight increase in 1882-83 as compared with the previous year, being 26·78 per cent. against 26·66 in 1881-82, was still marked. In view of the extraordinarily inequitable kabooliyuts registered in Mymensing, the Inspector General has done well to insist on registering officers satisfying themselves that the parties to such documents clearly understand their nature and contents.

Turning, next, to optional registration relating to immoveable property, it is observed that there were increases under all the following heads, viz., under sales* of the value of less than Rs. 100 of 9,025 (11·2 per cent.); under mortgages† of the same value, of 3,429 (8· per cent.); under leases‡ for one year and less, of 644 (16·5 per cent.); and under miscellaneous§ documents, of 948 (16·6 per cent.). There was a considerable decrease in the transactions under the two first heads in the Sonthal Pergunnahs, which fact the Lieutenant-Governor attributes to the ruling of the civil courts restricting the sale of cultivating tenancies.

1881-82.	1882-83.
* 80,244	89,269
† 42,655	46,084
‡ 3,890	4,534
§ 5,686	6,634

The number of wills presented was 1,891 as compared with 1,756 in 1881-82. Only 28 "authorities to adopt" were registered.

The aggregate value of property transferred by documents registered relating to immoveable property was Rs. 10,86,35,971 in 1882-83 against Rs. 11,23,06,932 in 1881-82; and that in the case of moveable property was Rs. 1,87,77,613 in 1882-83 against Rs. 1,79,43,253 in 1881-82. The value in the first case thus fell by 3·2 per cent.; while that in the second case rose by 4·4 per cent.

The financial results of the Department resulted in a larger surplus to the provincial revenues. The total receipts during the year amounted to Rs. 9,48,104 against Rs. 9,11,920, an increase of nearly 4 per cent. over last year's income. The expenditure decreased from Rs. 4,98,514 to Rs. 4,95,180, or by ·66 per cent. The surplus was thus Rs. 4,52,924 against Rs. 4,13,406 in the previous year; or deducting book debts for stationery, printed registers, and printing charges, there was a net surplus of Rs. 3,93,004 as compared with Rs. 3,58,269 in 1881-82. The Government of India regret to observe that there was again a decrease in the number of Registry Offices open. At the close of the year under review, there were 25 fewer offices than in 1876-77. It is satisfactory to note that during the year nine sub-divisional offices were converted into rural offices under special officers. The Government of India concur with Mr. Rivers Thompson in regretting the comparative neglect of the important duty of inspection. They agree with His Honour that in no department is constant inspection more necessary. There is very great room for the expansion of the operations of the department in the Lower Provinces; and if this cannot be done, the surplus must be reduced by decrease of fees.

The operations under the Muhammadan Marriage Registration Act this year show a slightly better result; the total number of registrations being 8,081 against 7,857 in the previous year, *i. e.*, an increase of 2·8 per cent.; of this number 5,068 registrations related to marriages, 2,247 to divorces other than Kholas, and 766 to Kholas. The working of the Act still appears to be far from satisfactory, and the Governor General in Council shares the hope expressed by the

Lieutenant-Governor that it will be possible to adopt measures to make the Act more popular, in accordance with the recommendations of the Committee which sat to revise the rules and procedure under the Act.

5. *North-Western Provinces and Oudh.*—There was again a falling off in the total number of registrations effected in the North-Western Provinces and Oudh compared with the previous year. The figures were 184,394 in the year 1881-82 and 183,457 in the year under review.

The following statement compares the work done during the past two years:—

North-Western Provinces.

	Affecting immoveable property.		Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.			
1881-82 ...	73,721	33,092	31,015	731	138,559
1882-83 ...	75,335	33,721	28,475	812	138,343
		Oudh.			
1881-82 ...	18,897	12,550	14,156	232	45,835
1882-83 ...	18,316	11,953	14,573	272	45,114

From the above comparison it will be seen that while the number of registrations in the North-Western Provinces, both compulsory and optional, affecting immoveable property, increased, the transactions relating to moveable property declined; the former having advanced by 2,243 instruments, or 1·3 per cent., and the latter having fallen off by 2,540 documents, or 8·1 per cent. In Oudh there was a declension, under both heads, in the operations relating to immoveable property, of 1,178 instruments, or 3·4 per cent. On the other hand, there was a slight increase in the number of instruments affecting moveable property of 417 registrations, or 2·9 per cent. Taking the figures as a whole, both in the North-Western Provinces and Oudh, compulsory registrations rose from 92,618 in 1881-82 to 93,651 in 1882-83, or by 1,033 instruments (1·1 per cent.), and optional registrations fell from 91,750 in 1881-82 to 89,787 documents, or by 1,963 (2·1 per cent.). Perpetual leases increased slightly in the North-Western Provinces, but were fewer in Oudh than in the previous year. The majority of these leases are said to affect property situated in towns.

Of the registered documents affecting immoveable property, the registration of 69·1 per cent. in the North-Western Provinces and of 60·5 in Oudh was compulsory. The percentage of optional to the total number of registrations was 45·5 in the North-Western Provinces and 59·40 in Oudh. The decrease of over 2 per cent. in this ratio in the North-Western Provinces is attributed mainly to the marked falling off in the registration of instruments having reference to agricultural advances. The Inspector General's report shows that there has been great divergence between the two Provinces in this respect during the past six years. The comparatively large number of compulsory registrations in the North-Western Provinces is attributed to the larger number of instruments affecting immoveable property of considerable value, and to the comparatively small number of documents affecting moveable property executed in the North-Western Provinces as compared with Oudh. Instruments of mortgage of immoveable property of small value were relatively more numerous in Oudh than in the North-Western Provinces. The same is the case with respect to obligations for the payment of money and to other documents of a miscellaneous nature. Inquiry is to be made into the causes of this difference between the usage of the two Provinces. The Inspector General is inclined *primâ facie* to explain the

divergence by the fact that fewer cultivators in Oudh have land on the security of which they can raise money. His Honour the Lieutenant-Governor has observed that the transactions appear to be agricultural and not merely commercial, since they are numerous in purely agricultural districts, and has desired that the class to which they belong should, as far as possible, be clearly ascertained. The Government of India will await the result of the promised enquiry.

It is remarkable that an increase of registration of all kinds took place in the eastern districts; and in noticing this increase as compared with the western districts, the Inspector General assigns as its causes—(1) the unsatisfactory rice harvest of 1882 and (2) the tendency to substitute formal for informal documents in the districts where the preparation of a record-of-rights is in progress or is contemplated. The Inspector General also observes that the sale of general stamps points to the same conclusion. While agreeing that the causes assigned account for a part of the increase in the eastern districts and giving due weight to the second reason, the Lieutenant-Governor draws attention to the fact that the increase in these districts was not confined to documents affecting immoveable property, for no appreciable increase took place in the number of term-leases, and the increase under obligations for the payment of money and other documents affecting moveable property was, with few exceptions, confined to these districts and to Saharanpur. It is possible, therefore, His Honor adds, that in these districts there was a general increase of business transactions of all kinds, not solely due to the inferior rice harvest and the preparation of the record-of-rights.

The number of wills presented increased from 987 in the previous year to 1,063, while "authorities to adopt" declined from 26 to 21.

The aggregate value of the property affected by the instruments registered during the year increased in the North-Western Provinces, being Rs. 5,48,13,000 against Rs. 5,45,88,000 in the previous year; in Oudh the value declined from Rs. 1,82,38,000 to Rs. 1,77,17,000.

The following statement shows the receipts and expenditure of the Department compared with 1881-82:

North-Western Provinces.

	Receipts. Rs.	Expenditure. Rs.	Surplus. Rs.
1881-82 ...	2,58,177	1,41,602	1,16,575
1882-83 ...	2,65,568	1,44,289	1,21,279
	Oudh.		
1881-82 ...	82,947	45,332	37,672
1882-83 ...	81,924	45,421	36,503

There was thus an increase in the receipts in the North-Western Provinces of Rs. 7,390; and in Oudh a decrease of Rs. 1,023. The expenditure rose both in the North-Western Provinces and Oudh—by Rs. 2,687 in the North-Western Provinces and by Rs. 89 in Oudh. The surplus, taking the figures for the North-Western Provinces and Oudh, was Rs. 1,57,782 in 1882-83 against Rs. 1,54,247 in 1881-82; and the percentage of expenditure to receipts was 54·6 in the year under review against 54·7 in the previous year.

The Inspector General in the concluding portion of his Report has discussed the merits and demerits of the system of *ex-officio* and special Sub-Registrars; officers of the former class being more generally employed in the North-Western Provinces and of the latter class in Oudh. His opinion, in which the Local Government concur, is on the whole in favour of special officers: and proposals are under consideration for bringing the system into more general effect in the

North-Western Provinces. The portion of the Inspector General's Report in which this subject is discussed brings out very clearly in the opinion of the Government of India the necessity of allowing adequate remuneration to the officers of the Department. The officers on whom the duties of registration at present devolve are either ill-paid or absorbed in other work. To this circumstance must be ascribed in great part the declension of registration in the North-Western Provinces and Oudh. The true remedy is the appointment to the Department of zealous, effective, and capable men. Nor are the means for this wanting. The receipts of the Department, of which nearly 50 per cent. at present lapse to the provincial revenues, are sufficient to place the organization of the Department on a sound and improved footing. The provision for the people of adequate facilities for registration is the first charge on the departmental income. The Government of India has repeatedly pointed out that registration receipts are not to be considered a source of profit by the Local Governments.

6. *Punjab.*—The decline in the operations of the Registration Department, which commenced in 1878-79 when the number of documents registered was 77,138 against 84,952 in the previous year, has continued. In the year under review, the number of transactions was 63,565 against 67,398 in 1881-82, representing a decrease of 3,833 documents, or of 5·6 per cent. The following figures compare the registrations effected during the years 1881-82 and 1882-83:

	1881-82.	1882-83.
Compulsory	43,795	41,508
Optional	23,603	22,057

	Affecting immoveable property.					
	Compulsory.	Optional.	Total.	Affecting moveable property.	Wills and authorities to adopt.	Total.
1881-82 ...	43,795	12,352	56,147	10,964	287	67,398
1882-83 ...	41,507.	11,290	52,797	10,391	377	63,565

The falling-off was most noticeable in the case of documents relating to immoveable property, the number of registrations under which head declined by 3,350, or 5·9 per cent., being 2,288 under the head of compulsory and 1,062 under that of optional registration. The decrease was mainly confined to sales and mortgages of agricultural land: the registrations relating to such transactions compared with those of the previous year being as follows:

	1881-82.			1882-83.		
	Compulsory.	Optional.	Total.	Compulsory.	Optional.	Total.
Sales, agricultural ...	8,297	1,711	10,008	7,173	1,505	8,678
Mortgages, ditto ...	21,641	5,626	27,267	20,161	5,079	25,240
	29,938	7,337	37,275	27,334	6,584	33,918

There was thus a falling-off of 1,330 in the number of sales and 2,027 in that of mortgages. The variations under other classes of documents were unimportant.

It is observed that from the year 1877-78 to the close of the year 1880-81 there was a steady rise in the number of compulsory registrations, while from that year there has been a fall. These results the Lieutenant-Governor agrees with the Inspector General of Registration in ascribing directly to the state of the seasons; the advance in the number of such registrations up to the year 1880-81 having corresponded with a period of depression and occasional scarcity, and the subsequent decline being simultaneous with an

advance in the general prosperity of the country and full harvests. It is added that the decrease of sales and mortgages of land in some districts was also partly due to the liberal advances made to agriculturists for the purpose of purchasing ploughing cattle and seed-grain, and under the Land Improvement Act.

The steady diminution in optional registration which has characterised the last few years continued. The number of such operations which reached 45,057 in the year 1877-78 fell to 22,057 in the year under review, and was less by 1,546, or 6·5 per cent., than in 1881-82. Of the total number recorded during the year 11,290 were optional registrations relating to immoveable property, being 1,062 fewer than in the previous year. The falling-off in this class of transactions is attributed in part to the security furnished by the mutation of names in the revenue records, which fact naturally makes people unwilling to undergo additional expense and trouble in registering deeds of transfer without gaining additional advantage thereby. The Lieutenant-Governor has at present under consideration the advisability of amalgamating the procedure of attestation in a registry office with the mutation of names in revenue records. With regard to the optional registration of documents of the miscellaneous class, the Lieutenant-Governor believes that, as the registry offices in the Punjab are both numerous and accessible, the decline cannot be due to causes connected with the provision of facilities for registration. His Honor is therefore disposed to ascribe the falling-off to the fact that the people find that the advantages conferred by registration do not compensate for the trouble and expense involved in the process. The Government of India are not, however, prepared to accept this conclusion unreservedly. The facilities for registration, to which the people are entitled, do not consist merely in the establishment of numerous offices locally accessible. It is also essential that in these offices there should be officials who are able to devote the requisite time and attention to applicants. Optional registration cannot be expected to advance so long as parties who wish to register their documents are able to secure no more than the distracted attention of a revenue official already overburdened with other duties, and then frequently only after long waiting. The experience of provinces where registration has made the most rapid progress proves that, wherever special officers of zeal and efficiency are appointed, even in the most unpromising localities, the people show the greatest readiness to take advantage of the system, being then assured that the operation can be conducted without trouble or delay. The Government of India are satisfied that no real or satisfactory progress will be made, nor the just claims of the people met until the Department is organized on a separate and independent footing.

The number of wills presented rose from 287 in 1881-82 to 376 in the year under review. Only one "authority to adopt" was registered.

The aggregate value of the property affected by the documents registered during 1882-83 fell to Rs. 2,40,51,282—Rs. 2,19,34,595 relating to immoveable property, and Rs. 21,16,687 to moveable property and other miscellaneous transactions. As compared with the previous year these figures represent a decrease of 21 lakhs in the total aggregate, 15 lakhs under real property, and 6 lakhs under moveable property. It is observed that, although there was a considerable reduction in the number of agricultural sales, the value of the land transferred was nearly the same as in the previous year, and the average value of each assurance rose from Rs. 491 to Rs. 546. Agricultural mortgages which fell in number also declined in value.

The average amount secured on simple bonds fell from Rs. 421 to Rs. 364.

The neglect of the important work of inspection to which it is observed the attention of the Lieutenant-Governor has been attracted is not satisfactory.

The income of the Department fell from Rs. 1,74,146 in 1881-82 to Rs. 1,65,142, or by 5·1 per cent. The expenditure fell considerably, being Rs. 86,652 against Rs. 1,06,256 in 1881-82, representing a decrease of Rs. 19,604, or 18·4 per cent. The surplus remaining was thus Rs. 78,490, or Rs. 10,600 more than last year. This is accounted for by the reduction, as compared with 1881-82, of Rs. 20,900 in the charges for remuneration to registering officers, arising principally from the withdrawal of allowances to Sub-Registrars in charge of treasuries at sadr stations.

7. *Central Provinces.*—The results of the year's operations are, on the whole, satisfactory. The total number of registrations was 22,304 against 20,048 in 1881-82, representing an increase of 11·2 per cent.

The following figures contrast the registrations under the principal heads with those of the previous year:

	Affecting immoveable property.			Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.	Total.			
1881-82 ...	11,481	4,774	16,255	3,665	128	20,048
1882-83 ...	13,693	4,788	18,481	3,673	150	22,304

The number of transactions relating to documents, of which the registration was compulsory, advanced by 2,212 documents, or 19·2 per cent. Optional registration remained virtually stationary. The rise in the number of compulsory registrations was mainly due to an increase in the number of instruments of mortgage of the value of Rs. 100 and upwards, and of leases other than perpetual compulsorily registered. Instruments of mortgage of the value of Rs. 100 and upwards rose from 6,017 to 7,040. The increase was most conspicuous in the Districts of Narsinghpur, Wardha, Hoshangabad, and Jubbulpore, all centres of trade, and in the District of Betul. With regard to the first four districts, the Chief Commissioner remarks that, though harvests were good, the export trade was dull; and agriculturists consequently did not benefit so much from the good harvests as they might have done. The increase in the number of these deeds registered is further attributed to the effect of the provisions of Section 59 of the Transfer of Property Act (IV of 1882), which renders registration of mortgage deeds of immoveable property securing a debt of over Rs. 100, necessary not only for purposes of evidence, but also to give validity to such transactions.

The increase in the number of leases which the law requires to be registered was large. The number of transactions under this head was 3,379 against 2,408 in the previous year, representing an increase of 40·3 per cent. This rise, the Chief Commissioner remarks, seems to be pretty generally attributed to a desire to prevent the acquisition by tenants of occupancy-rights at the time when the Tenancy Bill should become law. The Chief Commissioner, however, considers that if the increase in the number of leases may be safely held to establish anything, it shows (1) that the Bill (which has now become law) has been pretty widely discussed by the agricultural classes; and (2) that as the value of occupancy rights becomes realised, greater efforts are made by landholders to prevent their growth.

The number of miscellaneous operations increased from 6,562 to 7,350, or by 12 per cent. The number of wills presented rose from

121 in 1881-82 to 146 in the year under review; the number of "authorities to adopt" registered fell from 7 to 4.

The refusals to register numbered 159, or 7 more than last year; 31 appeals were preferred as compared with 40 in the previous year, of which 10 were dismissed as against 20 in 1881-82. It is observed that the Chief Commissioner is not thoroughly satisfied with the smallness of the number of refusals to register. At the same time he is not disposed to seek an explanation in the fact that the bulk of the work falls on *ex-officio* Sub-Registrars, who, being burdened with other duties, have less time for accurate or thorough enquiry into the cases that come before them. The Government of India are inclined to regard a small number of refusals as a defect on the right side. Experience shows that in many cases registering officers decline to register on grounds into which it is not their province but that of the civil court to investigate. The matter, it is observed, is to form the subject of enquiry, and the Government of India will await the result of the investigation. The comparative neglect of the important duty of inspection is matter of regret.

The income of the Registration Department increased from Rs. 62,363 in the previous year to Rs. 68,508, or by Rs. 6,145 (9·8 per cent.), and the expenditure from Rs. 28,449 to Rs. 29,123, or by Rs. 674 (2·3 per cent.); the surplus, therefore, was Rs. 39,385 against Rs. 33,874 in 1881-82, or more than Rs. 5,511, or by 16·1 per cent. than last year. The percentage of expenditure to receipts fell from 45·6 in 1881-82 to 42·5 in the year under review.

The Government of India are glad to observe that the Chief Commissioner, in view of the financially prosperous state of the Department, has resolved to take into consideration the question of the extension of registration offices in the Province.

8. *British Burma.*—The operations of the Registration Department again show an advance. The number of transactions rose to 8,025 from 6,844 in the previous year, being an increase of more than 17 per cent.

The following table compares the figures for 1881-82 and 1882-83:—

	Affecting immoveable property.		Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.			
1881-82 ...	5,396	314	1,101	33	6,844
1882-83 ...	6,237	471	1,283	34	8,025

The above figures show that the number of registrations affecting immoveable property increased by 998, or 17·4 per cent.; and that the number of transactions relating to moveable property advanced by 182, or 16·5 per cent. Compulsory registrations rose from 5,396 to 6,237, or by 15·5 per cent., and optional from 1,415 to 1,754, or by 23·9 per cent. Deeds of sale (2,858) and deeds of mortgage (2,923) formed 86·2 per cent. of the total number of documents affecting immoveable property.

The aggregate value of property transferred by registered documents in which the value was shown rose from 83½ lakhs in 1881-82 to 87½ lakhs of rupees in 1882-83. The figures are as follows:—

	Affecting immoveable property. Rs.	Affecting moveable property. Rs.
1881-82	67,21,433	16,24,246
1882-83	64,07,389	23,43,729

The advance on last year, it will thus be seen, was due to an increase in the value of moveable property, which, during the year under report, was more by Rs. 7,19,484 (44·2 per cent.). The value of the immoveable property affected decreased by Rs. 3,14,044, or 4·7 per cent.

The receipts of the Department increased from Rs. 16,341 in 1881-82 to Rs. 17,755 in the year under review, or by 8·6 per cent. The expenditure also increased from Rs. 9,628 to Rs. 9,940, or by 3·2 per cent. The excess of receipts over expenditure was due to the large surpluses at Rangoon, Akyab, Moulmein, and Bassein, which were respectively Rs. 31,971, 1,014, 1,404 and 861. The Commissioner of Arakan ascribes the carelessness on the part of some of the Myokes in performing their functions as Sub-Registrars to the fact that, as the extra work brings them no pecuniary return, they have no motive either to master the duties of the office or to take any interest in their performance. This statement requires explanation. As the Chief Commissioner observes, these officers are entitled to participate in the registration fees up to a limit of Rs. 50. With a view of removing inconvenience arising from the periodical absence of Sub-Divisional and Township Officers, the Chief Commissioner has had under consideration the appointment as Sub-Registrars of school-masters and employés of the Postal Department. The Government of India agree with the Chief Commissioner that the plan is impracticable.

The statistics of the several divisions show that the advance in the transactions of the Department was common to all the divisions except Tenasserim, where the falling-off was only nominal. In the Arakan, Pegu, and Irrawaddy Divisions, the increase was, respectively, 3·7, 33·4, and 22·5 per cent. as compared with the previous year. Notwithstanding this satisfactory progress, the operations of the Department are far from being so extensive in British Burma, considering its size and importance, as they might be. This result must be ascribed, in part at least, to the causes mentioned by the Commissioner of Arakan (Colonel Baden), and the Deputy Commissioner of Bassein (Mr. St. Barbe). The latter officer writes—

> As regards immoveable property transfers generally take the form of a simple usufructuary mortgage by parole agreement, a thugyi's register being the only record and a thugyi's revenue receipt the chief evidence.
>
> Transactions connected with the loan of money and the pledge of goods are occasionally embodied in a document, but this is considered ample precaution without having recourse to registration as well. Outside the large towns where land is of value, and where there is a considerable foreign population, it may be questioned whether the Burmese will ever see the use of the system, which they regard simply as a security against fraud, so long as their present standard of honesty is maintained in their dealings one with another.

On the other hand, as the Chief Commissioner remarks,—"The diffusion among the people of a knowledge of the law, the improvement of communications, and the provision of increased facilities for obtaining registration and for the purchase of commercial stamps, will be accompanied, as a natural result, by a steady increase of the work of the Registration Department."

9. *Assam.*—There was an increase in the total number of documents registered, from 12,163 in the previous year to 14,316 in the year under review, or by 17·7 per cent. The following figures compare the number of registrations with the number for the year 1881-82 :—

	Affecting immoveable property.		Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.			
1881-82 ...	6,818	2,870	2,376	99	12,163
1882-83 ...	7,769	3,783	2,639	125	14,316

It will thus be seen that the advance is common to all classes of documents. The number of registrations affecting immoveable property, under the head Compulsory, rose as compared with the previous year by 951, or 13·9 per cent., while under the head of Optional, relating both to moveable and immoveable property, the increase was 1,201, or 22·4 per cent. Of the total number of registrations, 11,364 were effected in the Surma Valley (Sylhet and Cachar Districts) and but 2,952 in the rest of the Province. The increase (22·4 per cent.) in Sylhet, as compared with the previous year, is ascribed to the abnormal sales of stocks of rice held over in 1881-82 in the hope of a rise of prices. The expectation was not realised, and the holders were obliged to sell from inability to keep their stocks out of the market any longer.

The number of leases of all kinds registered was 1,768, being a net increase over the previous year of 20 per cent. The increase occurred almost entirely in the district of Sylhet. With regard to the registration of leases in Assam, the following remarks are recorded by the Chief Commissioner :—

> "3. The number of leases registered in the Sylhet District has increased from 1,096 to 1,441, but still remains less than the number (1,557) registered in 1880-81. In two cases out of three, it is the *kabúliyat*, or acceptance, that is registered, and not the lease. In only 5 per cent. of the total number of such registrations in the Sylhet District were the lease and the acceptance registered together. The analysis of the statistics collected during the test survey of certain village groups in Sylhet, so far as that analysis has gone, tends to show that in the most populous parts of the district the number of tenants is not less than the number of proprietors, and on this assumption only one tenant in fifty appears to be protected by a registered lease. Goálpára, as a district of large zemindárs, comes next to Sylhet in the number of registered leases, though at a long interval, and here the registration of leases has been growing less common during the last four years, having steadily decreased from the number of 316 in 1879-80 to 195 in 1882-83. Leases are comparatively rare among the petty mirásdárs of Cachar. In the five upper districts of the Assam Valley, the number of leases registered throws no light upon the extent to which the relation of landlord and tenant prevails, except perhaps in the Kámrúp District, where nearly all the *láckhiráj* lands attached to temples are said to have by this time been leased out in perpetuity. It has been observed in former reports that this is a system which at once relieves the managers of the trouble of administering their estates, and furnishes a convenient means of raising ready money, a fine being the invariable condition of leases of this kind. In the last four years 257 perpetual leases have been granted in Kámrúp, of which 106 were registered in 1880-81, and only 38 in 1882-83. Fifteen perpetual leases have been registered in Darrang and 5 in Sibságar within the same period. The registration of leases in Upper Assam, however, seems to have been reduced to a minimum in the year under report, when the total number of leases registered was 14 only, against 129 in 1879-80."

While there was an increase in the number of instruments registered, the aggregate value of the transactions assured decreased from 43½ lakhs to 40½ lakhs, due to a decline of 6 lakhs in the value of real property, and an enhancement of 3 lakhs in the value of transactions affecting immoveable property.

The receipts of the Department increased from Rs. 25,134 in 1881-82 to Rs. 26,414 in 1882-83, or by 5·1 per cent., while the expenditure fell from Rs. 16,620 to Rs. 16,552. The surplus was thus Rs. 9,862 against Rs. 8,515 in the previous year. Nearly the whole

of the surplus was contributed by the single district of Sylhet, where the gross surplus (exclusive of charges on account of the Inspector General's office) was Rs. 10,593.

The Government of India are glad to observe that the Chief Commissioner has issued instructions that, where the Registering Officers have other duties to perform, they should be relieved of such duties, and has called attention to the effect which delays in completing registration have upon the popularity of transactions with the Department.

10. *Coorg.*—The number of documents registered was 575, or one less than the total of last year, of which 512 related to immoveable property, and 63 to moveable property. No wills were registered. The aggregate value of the transactions registered fell considerably, being for the year under review Rs. 9,74,902 against Rs. 13,28,929 in 1881-82, thus exhibiting a decrease of Rs. 3,54,027. The falling-off occurred in the value of immoveable property registered, which was Rs. 4,60,747, or 40·84 per cent. of the aggregate value; this decline is attributed by the Inspector General to the depreciated value of coffee estates, which has deterred bankers from making advances on block loans. The value of moveable property increased from Rs. 2,00,895 to Rs. 3,07,615, *i.e.*, by 53·1 per cent., the rise being considered by the Inspector General indicative of the greater indebtedness of the people consequent on a short coffee crop. The reasons adduced by the Inspector General for the decrease and increase respectively in the value of immoveable and moveable property registered appear, as observed by the Chief Commissioner, open to doubt. The Chief Commissioner thinks that the decrease must apparently be due in the main simply to difference in area and natural value of the property affected, as the falling-off is due, not to a difference in the number of transactions, but to the much smaller aggregate value of immoveable property affected by deeds of sale and deeds of a miscellaneous kind. Similarly, the Chief Commissioner considers that unless the Inspector General's explanation is formed on actual examination of the documents, the increase in the value of moveable property registered must also be put down to some other cause than the one assigned, as the statistics show that the increase is not under the head of obligations for payment of money but under that of other documents. The receipts of the Department fell from Rs. 4,204 in 1881-82 to Rs. 3,270 in 1882-83, or by 22·2 per cent. The expenditure on the other hand rose from Rs. 1,669 to Rs. 1,715. The percentage of expenditure on receipts was 52·4 against 39·7 in 1881-82, and the surplus was Rs. 1,556.

11. *Hyderabad Assigned Districts.*—The number of deeds registered during the year, excluding those registered in the Cantonment of Secundrabad, increased from 20,390 in 1881-82 to 21,836, or by 7 per cent. The following statement compares the figures for the two years, 1881-82 and 1882-83:—

	Affecting immoveable property.		Affecting moveable property.	Wills and authorities to adopt.	Total.
	Compulsory.	Optional.			
1881-82 ...	13,809	4,776	1,772	33	20,390
1882-83 ...	14,904	4,887	2,010	35	21,836

The increase was common to all classes of documents, but is most noticeable in compulsory registrations relating to immoveable property. The number of additional documents registered under this head was 1,095, representing an increase of 7·9 per cent. The number of optional registrations during the year increased by 352 or by 5·3 per cent.

The aggregate value of property affected increased from Rs. 45,69,690 to Rs. 48,92,284, or by 7 per cent.; Rs. 45,48,453 being the value shown in documents relating to immoveable and Rs. 3,43,830 in those relating to moveable property, against Rs. 42,36,328 and Rs. 3,33,361, respectively, in 1881-82.

The receipts* of the Department increased from Rs. 47,550 to Rs. 50,838, or by 6·9 per cent; the expenditure from Rs. 29,290 to Rs. 30,300, or by 3·4 per cent. The surplus was thus Rs. 20,538, and the percentage of expenditure to receipts 59·6 against 61·5 in 1881-82.

* These figures include those of the Cantonment of Secundrabad.

It is gratifying to observe that 5 new rural offices were opened during the year under review. The question of the substitution of special officers to relieve Tahsildars and Honorary Magistrates is under the consideration of the Resident with a complete scheme for the re-organization of the Department.

In Secundrabad the number of documents registered was 382 against 375 in 1881-82. The receipts increased from Rs. 1,208 to Rs. 1,230, and the expenditure decreased from Rs. 685 to Rs. 679.

12. *General Remarks.*—The following statement shows for the several Provinces the general results of the operations of the Registration Department during the year under review:—

Province.	Number of registrations per 1,000 of population.	PERCENTAGE OF INCREASE OR DECREASE OF TOTAL NUMBER OF COMPULSORY AND OPTIONAL REGISTRATION OVER PREVIOUS YEAR.				Percentage of registrations affecting immoveable property to total number of registrations during the year.	PERCENTAGE TO TOTAL NUMBER OF REGISTRATIONS DURING THE YEAR OF		PERCENTAGE OF INCREASE OR DECREASE OF						Number of offices not self-supporting.
		COMPULSORY.		OPTIONAL.					RECEIPTS.		EXPENDITURE.		SURPLUS.		
		Increase.	Decrease.	Increase.	Decrease.		Compulsory.	Optional.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.

Hyderabad Assigned Districts.	8·3	7·9	...	5·3	...	90·5	68·2	31·8	6·9	...	3·4	...	12·4	...	8

The number of registrations per 1,000 of population was, as in previous years, greatest in Madras (13·9), Bengal (7·9), and Berar (8·3),

and smallest in the Central Provinces (2·2), and British Burma (2·1). The provinces which made an advance* are Madras (from 13·7 to 13·9), Bombay (from 4·7 to 5·1), Bengal (from 7·7 to 7·9), Central Provinces (from 2·0 to 2·2), British Burma (from 1·8 to 2·1), Assam (from 2·5 to 2·9), and Berar (7·6 to 8·3). In Oudh there was a decline from 4·02 to 3·9, and in the Punjab from 3·5 to 3·3. In the North-Western Provinces and Coorg the proportions remained the same (4·2 and 3·2 respectively).

* The proportions for the year 1881-82 are here re-calculated on the figures of the recent census, and therefore differ slightly from those shown in the review for the year 1881-82.

Compulsory registrations showed an advance in all Provinces except three, viz., Madras, Oudh and the Punjab. The increase was greatest in the Central Provinces, British Burma and Assam, where the percentage respectively was 19·2, 15·5 and 13·9. The largest decline under this head of registrations was in the Punjab where it fell by 5·28 per cent. In optional registrations seven Provinces show an increase and four a decrease. The most marked advance was in Bombay (18·5 per cent.), British Burma (23·4 per cent.), and Assam (22·4 per cent.); and the largest falling off in the Punjab (6·5 per cent.).

The percentage of registrations affecting immoveable property was, as in previous years, largest in Bombay (94·5), and Madras (92·8), and smallest in Oudh (67·1), and the North-Western Provinces (78·8).

Registrations were most evenly distributed under the heads of compulsory and optional in Madras, Bengal, the North-Western Provinces, and Assam. The number of compulsory registrations largely exceeded those of the optional class in Bombay, the Punjab, Central Provinces, British Burma, Coorg and Berar. In Madras and Oudh optional registrations exceeded those of the compulsory class.

The gross receipts as in the previous year increased in seven provinces and declined in four. The provinces which show the largest advance being the Central Provinces (9·8 per cent.), British Burma (8·6 per cent.), and Assam (5·1 per cent.). The decrease was most marked in Coorg (22·2 per cent.) and in the Punjab (5·1 per cent.).

The expenditure increased in eight and decreased in three provinces, the increase being most marked in Madras (14·2 per cent.), and the decrease in the Punjab (18·4 per cent.).

The net surplus on the operation of the year rose in seven provinces and declined in four; the largest proportional increase having occurred in the Punjab (15·6 per cent.), the Central Provinces (16·1 per cent.), British Burma (16·4 per cent.), Assam (15·8 per cent.), while the decrease was most marked in Madras (77· per cent.).

The number of offices which were not self-supporting was largest in Bombay (64), Madras (53), Punjab (49), and North-Western Provinces (35).

The total of the aggregate value of property transferred by registered documents declined by nearly 57 lakhs.

In the usual statement appended to this Resolution has been inserted for the first time a table showing the proportion of registration offices to area and population in each Province. Taking the leading Provinces, the largest proportion of offices to area was in Oudh and the North-Western Provinces and in Madras, and the smallest proportion in Bengal. The highest average population

served by each registration office was in Bengal (one office to 213,988 inhabitants) and in the North-Western Provinces (one office to 148,727 inhabitants). The Provinces in which the people were best served in this respect were Bombay (one office to 266,348 inhabitants) followed by Oudh, Punjab, and Madras.

13. The Government of India observe that the reports of the year under review testify on the whole to satisfactory progress as compared with the preceding few years. During that period the operations of the Department in the various provinces, with one or two important exceptions, had been of a stationary or retrograde character. **The ground relinquished has not in every case been again fully occupied; but the Government of India trust that the Department generally has now entered on a course of permanent and steady advance. The improvement during the year under review was common to all the provinces except the North-Western Provinces, Oudh and the Punjab.**

The Government of India have so recently in reviewing the reports of the previous year explained the causes which in their opinion affect the popularity of registration and retard the expansion of the operations of the Department that it is unnecessary to do more than invite renewed attention to the observations then recorded. The Governor General in Council is glad to perceive from the reports of the year under review that some progress is being made in carrying out the policy therein indicated, and that Local Governments are now recognizing their duty to provide for the public as complete facilities as the funds at their disposal for this purpose will permit, so that those who have dealings with the Department may get their business done without trouble or delay.

In Madras, where special agency and detached office accommodation has already been provided on a more liberal scale than in any other province, **the year under review saw a still further extension of the system. In the Presidency of Bombay special Sub-Registrars were appointed in every office except one, and the decided improvement which took place in registration during the year is** mainly attributed to the introduction of this measure. In the North-Western Provinces, the Central Provinces, British Burma and Assam, schemes for the opening out of new offices or the relief from other work of the establishment employed on registration duties have either been approved or are under consideration. In Bengal, a few sub-divisional offices were converted into special rural offices, but the Government of India regret to observe the considerable number of registry offices which were closed altogether.

While calling attention to the great improvement to be expected from an extension of special departmental agency, the Government of India desire to impress upon the Local Governments and Administrations the fact that this expectation will not be realized unless the officers employed be assigned competent salaries, and the staff be organized in such a way as to offer sufficient prospects of promotion and advancement. In no other way can zealous, efficient and contented men be attracted to the Department.

It is observed that in several provinces the work of inspection has been performed by the superior officers of the Department in a perfunctory manner. Constant inspection is of very great importance in the Registration Department, and the Government of India trust that Local Governments will take steps to provide against its neglect.

Every extension of registration is a matter for congratulation as implying greater security of title and diminished litigation and leading in the end to reduced State expenditure on law and justice.

ORDER—Ordered, that a copy of this Resolution be forwarded to all* Local Governments and Administrations and to the Foreign and Revenue and Agricultural Departments for information.

* Madras.	Central Provinces.
Bombay.	British Burma.
Bengal.	Assam.
N.-W. Provs. & Oudh.	Coorg.
Punjab.	Hyderabad.

Ordered also, that the Resolution be published in the *Gazette of India*.

(True Extract.)

A. MACKENZIE,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th MARCH 1884.

GENERAL REMARKS.—There has been slight rain during the week in two districts of the Bombay Presidency, in four of the North-Western Provinces and Oudh, in parts of Central India, Rajputana and the Central Provinces, and in parts of Assam. In the Punjab slight rain has fallen throughout the Province, with the exception of the Hissar Division.

Harvesting continues in the Madras Presidency and in Mysore, and standing crops are generally good.

The *rabi* harvest is in progress in the Bombay Presidency and in the Central Provinces, and has begun in the North-Western Provinces and Oudh, where prospects are on the whole fair.

In the Punjab prospects are generally good, except in the Hissar and Umballa divisions, where the crops are suffering from want of rain. In Central India and Rajputana the crops are in fair condition.

In Bengal the *rabi* crops are expected to yield a tolerable average, and sugarcane which is still being reaped in a few places is giving a fair outturn. In some districts land is being prepared for next year's crops. In Assam the crop prospects are favourable, and sowing is in progress in the Kamrup district. Cholera is abating in the Madras Presidency, but small-pox continues prevalent in the North-Western Provinces and Oudh, and in British Burma; in other provinces the public health is on the whole good.

Prices are generally steady, but show an upward tendency in parts of the North-Western Provinces and Oudh and Bengal.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Mar. 12th)—		
Bellary		Standing crops poor owing to short rainfall and disease; *harvest*—sugarcane, yield average; cotton, *cholum*, pulse, paddy, and wheat below average.
Kurnool		Standing crops fair; harvest—*cholum* and cotton, yield below average; cattle-disease in 6 taluks.
Ganjam		Standing crops, pulse, and sugarcane good.
Kistna		Standing crops generally good; harvest—*varagu* and horse-gram, yield below average; fever and small-pox prevalent; cattle-disease in places; 5 deaths from cholera in two taluks.
Chingleput (Madras)		Standing crops generally good; harvest—paddy, yield below average; small-pox prevalent, except in one taluk; cholera abating, 12 deaths.
Coimbatore		Standing crops generally good; harvest—paddy and *cholum*, yield about average; fever and small-pox in parts; 12 deaths from cholera.
Tanjore		Standing crops good; harvest—paddy, dry grains, and pulse, yield below average; cholera abating, 159 deaths.
Madura		Standing crops fair; harvest—paddy, yield about average; small-pox prevalent in parts; 38 deaths from cholera.
Malabar		Harvest—second crop paddy over; small-pox and fever slight; 38 deaths from cholera.
Travancore		Cultivation over for the year; two deaths from small-pox at Trivandrum.
		General Remarks.—General prospects good.
Bombay—(Mar. 12th)—		
Kurrachee	Slight rain in Kurrachee on 9th.	River at Kotri on 10th, 3 ft. 5 inches; one fresh case of small-pox in Kurrachee on 8th, total 55 cases, 9 deaths; disease also in 27 villages in district, 42 fresh cases, 4 deaths, 43 remaining sick; fever in 11 and cattle-disease in 6 talukas; loss of 65 buffaloes and 30 cows and bullocks; prices—wheat, red rice, and *bajri* in Kurrachee 26, 30 and 32; in Dadu 32 and 40; in Tatta 24, 32 and 36; and in Sujawal 22, 26 and 40 lbs. per rupee, respectively.
Hyderabad	Slight rain at Tando and Mahomed Khan on 9th.	Harvest commenced in Badin; river at Kotri 3 ft. 4 inches on 8th March, against 2 ft. 8 inches on same date last year; small-pox in 11, fever in 6, and cattle-disease in 6 talukas; wheat 26, *bajri* 34, *jowari* 33½, red rice 25, and white rice 21 lbs. per rupee.
Ahmedabad		Cotton-picking and reaping of *rabi* crops in progress; slight fever in Viramgaum and Sanand; small-pox in Gogo, 6 deaths; slight cattle-disease in Parantej; wheat 26 and *bajri* 30 lbs. per rupee.
Baroda		Public health fair; cattle-disease in Kheraloo; cotton-picking in progress; cotton and *rabi* crops in good condition; prices—*bajri* 31¼ to 32½, and rice 23 to 24¼ lbs. per British rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Surat		Cotton crops slightly suffered from insects in Bardoli and Chikhli, other crops healthy; slight fever in Bulsar and Pardi; *jowari* 38 and *nagli* 41 lbs. per rupee.
Nasik		Reaping of *rabi* crops continues; public health generally good; small pox in parts of Nasik, Sinnar, Malegaon, and Peint talukas; *bajri* 28, wheat 34½, and rice 24 lbs. per rupee.
Colaba (Bombay)		Abnormal *temperature* 0° to 3° *warm*; *vapour in air normal*; abnormal wind northerly till 10th, afterwards southerly.
Poona		*Rabi* reaping in progress; small-pox in 3 talukas; prices—*bajri* 36, and *jowari* 38 lbs. per rupee; in Poona *bajri* 32 and *jowari* 35 lbs. per rupee.
Ahmednagar		Public health good; reaping of *rabi* in progress; *bajri*—maximum 49 lbs. per rupee in Jamkhed, minimum 36 lbs. in Kopargaon; *jowari*—maximum 60 lbs. in Sangamner, minimum 39 lbs. in Shrigonda.
Sholapore		Reaping operations in progress throughout the district; *jowari* 39 and *bajri* 42 lbs. per rupee.
Dharwar		*Harvesting of wheat and cotton-picking in progress*; small-pox in 7, fever in 2, and cattle-disease in 5 talukas; scarcity of drinking-water in Navalgund and Gadag talukas; rice 29 to 40 and *jowari* 49 to 79 lbs. per rupee.
Kanara		Sugarcane harvest above ghat; second crop rice plants healthy; small-pox in 5 talukas, 1 death in Karwar; cattle-disease in 3 talukas and fever in 2; common rice in Karwar 14¾ seers per rupee; in district average 15½ seers; weather hot.
Rajkot		General health good; small-pox still prevalent in the province; cotton-picking in progress; *bajri* 30 and *jowari* 38 lbs. per rupee.
		General Remarks.—Slight rain throughout Sindh and in parts of Khandesh and Belgaum; *rabi* harvest in progress; standing crops slightly damaged by insects in parts of Surat and Upper Sindh frontier, and by rust in parts of Shikarpur; scarcity of drinking-water in two talukas of Dharwar and one of Kaladgi; slight cholera in parts of Broach, Tanna, Colaba, and Ratnagiri; fever, small-pox, and cattle-disease in several districts.
Bengal (Mar. 12th)—		
Chittagong	*Nil*	Days warm, nights and mornings cool; prospects of crops favourable; prices stationary; public health good; cow-pox continues at Ukhia.
Dacca	*Nil*	Prospects of crops continue favourable; public health good.
24-Pergunnahs	(Not received)	Prospects of winter crops promising; price of common rice stationary; public health good, though cases of small-pox reported from Barisat sub-division.
Moorshedabad	*Nil*	Mornings cool, and days hot; crops promise well and expected to yield a good outturn; harvesting of *kalai* and tilseed nearly over; a few cases of small-pox in thanah Gora-Bazar.
Rajshahye	*Nil*	Weather very hot; outturn of winter crops generally good; rain wanted for rice cultivation; public health good.
Burdwan	*Nil*	Weather getting warmer; prospects of crops unchanged; prices stationary; public health fair.
Rungpore	*Nil*	Weather seasonable; state and prospects of crops continue unchanged; land being prepared for *aus* paddy; prices of food-grains stationary; small-pox at head-quarters; public health otherwise good.
Bhagulpore	*Nil*	*Rabi* crops good in some parts and in others very poor; a good deal of *cheena* sown lately; *mohua* crops not so good as usual; mango trees blossoming freely; rice 13 seers 12 chittacks per rupee; prospects not good; small-pox continues.
Purneah	*Nil*	Prospects of crops fair; some poor sowing of late rice progressing in low lands; tobacco harvesting; common rice 15 seers per rupee; public health fair.
Patna	*Nil*	Prospects of *rabi* fair; mustard and peas being harvested; small-pox still reported from Behar and Sadr sub-division.
Durbhanga	*Nil*	*Rabi* being harvested; tobacco, *rahar*, and poppy doing well; prices stationary; small-pox lingering in town; public health generally good.
Hazaribagh	*Nil*	Weather getting warm; wheat and barley being cut; ploughing continues for the next season; prices continue high; small-pox seems to be abating in the Hazareebagh town; health generally good.
Cuttack	*Nil*	Weather warm; *dalua* and cotton growing well, wheat being reaped; ploughing commenced for next year's crops; price of rice little higher than before; public health good.
		General Remarks.—Hot weather setting in; there has been no rain during the week, but rain would facilitate preparation of land for early rice; *rabi* crops expected to yield a tolerable outturn; sugarcane which is still being reaped in a few places is giving a fair outturn; prices of food-grains generally stationary, though in a very few places they have an upward tendency; land being prepared in some districts for next year's crops; small-pox prevailing in many districts; cholera reported from some districts, otherwise public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares . (Mar. 11th)	*Nil*	Wheat, peas, and barley cut, outturn ¾ths of full average; small-pox increasing in the city; prices stationary, except of barley and gram which are rising.
Allahabad („ 12th)	*Nil*	*Rabi* crops being cut; heat rapidly increasing; health generally good; prices stationary.
Gorakhpur („ 9th)	*Nil*	Small-pox prevalent; harvesting has commenced; prices rising.
Cawnpore („ 11th)	*Nil*	Weather occasionally cloudy; crops being reaped; small-pox continues, but general health of people good, and no sickness among cattle; prices lower.
Jhansi . („ 10th)	*Nil*	Weather occasionally cloudy; crops in pargana Jhansi have suffered slightly for want of rain; health good and labour plenty; cattle-disease is reported from pargana Jhansi.
Rai Bareilly („ „)	Slight rain at Sadr on the 9th inst.	Weather occasionally cloudy; state of crops fair; small-pox continues; markets well stocked; prices steady.
Agra . („ 11th)	*Nil*	Irrigation going on; high winds injurious to crops; gram being cut; fever in two and slight small-pox in three parganas; prices steady.
Bareilly . („ „)	. . . .	Weather cloudy; rain wanted; markets well supplied; condition of cattle normal; health of people good.
Meerut . („ „)	Slight rain	Health good; supplies ample; prices stationary; fodder still scarce.
Kumaun . („ „)	Some rain	Crops greatly benefited by rain, and operations for the ensuing *kharif* much aided; general health good; cattle-disease continues; prices stationary.
Lucknow („ „)	·10 on 5th	Strong winds; sky often cloudy; reaping commenced; *sawan* and sugarcane are being sown; condition of people normal and of cattle good; markets well supplied; prices steady.
Partabgarh („ „)	. . . .	*Rabi* crops are everywhere ripe, but reaping is delayed till after *holi*; small-pox still prevalent.
Farukhabad („ „)	Slight showers in some parts of the district.	Weather cloudy; barley and peas being cut; prospects fair.
Sitapur („ „)	. . . .	*Sarson* and barley already in the market; prospects indifferent; wheat somewhat dearer, otherwise prices unchanged.
Fyzabad („ „)	*Nil*	Weather cloudy and hot; wheat and barley nearly ripe, peas being cut; health generally good, but there is some small-pox; condition of cattle good.
		General Remarks.—There has been slight rain in several districts, and beneficial fall in Kumaun and Saharanpur; the *rabi* harvest has begun, and prospects are on the whole fair; small-pox continues in many districts, but the public health is otherwise good; prices are generally steady, but show a partial rise in Gorakhpur, Benares, and Sitapur.
Punjab—(Mar. 12th)—		
Delhi . . .	·1	Small-pox continues; prices stationary.
Hissar . . .	*Nil*	Health good; crops perishing through want of rain; prices steady.
Umballa . . .	·5	Health good; *rabi* crops suffering from want of rain; prospects below average; prices stationary.
Jullundur . . .	·2	Health and crop prospects good; prices steady.
Amritsar . . .	·2	Health good; prices stationary.
Lahore . . .	Slight rain	Health and condition of crops good; prices steady.
Ferozepur . . .	·2	Health and state of crops good; prices almost stationary.
Sialkot . . .	·5	Crop prospects and health good; prices falling.
Rawalpindi . . .	3·5	Health and crop prospects good; prices fluctuating.
Peshawar . . .	·4	Health and crop prospects good; prices stationary.
Mooltan . . .	·1	Health good; crop prospects favourable; prices almost stationary.
Dera Ismail Khan .	·3	Health and crop prospects good; prices almost stationary.
		General Remarks.—Slight rain has fallen throughout the province, except in the Hissar division; health good, except in the Delhi district; crop prospects also generally good, except in the south-east where the crops are perishing from want of rain.
Central Provinces—		
Nagpur .(Mar. 12th)	. . . .	Weather cloudy and hot; prospects good; *rabi* crops being harvested; public health good; prices stationary.
Jubbulpore .(„ „)	0·34	Weather cloudy and close; crops in fair condition; pulses and linseed being reaped; health good; wheat 25, and rice 13 seers per rupee.
Saugor .(„ 11th)	. . . .	Weather cloudy; prospects favourable; *rabi* harvest commenced; health good; prices steady.
Seoni .(„ 12th)	0·10	Weather cloudy; reaping progressing; health good; wheat 25 and rice 17 seers per rupee.
Hoshargabad(„ „)	. . . .	Weather hot, nights cool; harvesting in progress; fever prevalent; wheat 21, rice 11, and *juari* 30 seers per rupee.
Sambalpur .(„ 8th)	. . . .	Weather warm and cloudy; prospects good; common rice 29¼ seers per rupee.
Raipur .(„ 12th)	. . . .	Weather hot, nights cool; prospects favourable; *rabi* crops being cut; rice 21 and wheat 25 seers per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provs.—*contd.*		
Khandwa .(Mar. 12th)	. . . .	Weather warm and occasionally cloudy; reaping progressing: 8 cases of cholera, 6 deaths; prices steady, wheat 16, and *juari* 22½ seers per rupee.
		General Remarks.—Weather continues cloudy; *rabi* harvesting in progress.
British Burma—(8th March)—		
Akyab . . .	. . . .	Public health and health of cattle good; [redacted] paddy in Naaf about 52,000 baskets more than last year; [redacted] other townships about one-fourth.
Rangoon . . .	. . . .	Sixty-six deaths from small-pox; price of paddy Rs. 80 per 100 baskets.
Bassein . . .	. . . .	Report not received.
Prome . . .	. . . .	Small-pox in Prome town; health of cattle good; estimated outturn of paddy 2,060,000 baskets, of which 5,000 have been sold to date; price of paddy Rs. 75 per 100 baskets.
Shweygyin . . .	. . . .	Two cases of small-pox in town; cattle healthy; outturn of paddy 2,400,000 baskets; quality good, full grained.
Kyoukphyu . .	. . . .	Report not received.
Sandoway .(Mar. 7th)	. . . .	Public health good; price of paddy stationary; 63,200 baskets of paddy stored away in northern and southern townships.
Do. .(„ 8th)	. . . .	Public health good; weather warm; price of paddy Rs. 60 to 70 per 100 baskets; 55,000 baskets of paddy cropped in southern township, of which 22,000 sold to date; quality good.
Tharrawaddy . .	. . . .	Public health and health of cattle good; 17,000 baskets of paddy sold to date in Hlaing township; price of paddy Rs. 75 to 85 per 100 baskets.
Do. . . .	. . . .	Two deaths from small-pox; cattle healthy; 613,996 baskets of paddy sold to date; price of paddy Rs. 70 to 82 per 100 baskets.
Pegu . . .	. . . .	Small-pox still continues in Pegu town; cattle healthy; price of paddy Rs. 75 per 100 baskets.
Thonegwa . . .	. . . .	One death from cholera and 10 from small-pox reported; 11 deaths of cattle in Thonegwa township; total estimated outturn of paddy in 4 townships 1,971,980 baskets; price of paddy Rs. 80 to 85 per 100 baskets.
Henzada . . .	. . . .	Three deaths out of 41 cases of small-pox in Henzada town; 65,000 baskets of paddy sold during the week.
Thayetmyo . .	. . . .	Public health good; 78 deaths of cattle reported; price of paddy Rs. 95 to 100 per 100 baskets.
Amherst (Moulmein) .	. . . .	Small pox prevalent in district; price of paddy stationary; price of paddy stationary; report from Moulmein town not received; price of paddy Rs. 86 per 100 baskets.
Toungoo . . .	. . . .	Public health good; about one-fourth of the paddy has been sold; price of paddy Rs. 50 per 100 baskets.
Tavoy . . .	. . . .	Small-pox prevalent in town, and southern and western townships; 210,000 baskets of paddy sold to date; price of paddy Rs. 55 to 59 per 100 baskets.
Mergui .(Feb. 23rd)	. . . .	Total rainfall 1·40; public health and health of cattle good; paddy at Rs. 70 per 100 baskets.
Do. .(Mar. 1st)	0·50	*General Remarks.*—Small-pox continues in Pegu, Irrawaddy, and Tennaserim; health of cattle good, except in Thayetmyo.
Assam—(Mar. 12th)—		
Gauhati .(Mar. 11th)	No rain	Weather getting warm; wind blowing; sowing of *ahu* seeds in progress; slight cholera prevalent.
Sylhet . . .	*Nil*	State and prospects of crops good; small-pox prevalent in all subdivisions; a few cases of cholera reported from Molvi Bazar, Karimganj, and Hobiganj.
Cachar . . .	0·13	Weather warm; common rice 14½ seers per rupee; no report of small-pox and cholera.
Dibrugarh . . .	0·79	Weather cool; small-pox lingers in the town.
Mysore and Coorg—(Mar. 12th)—		
Bangalore . . .	. . . .	Crops generally in good condition; planting of sugarcane and harvesting of *Kartick* paddy progressing; prospects favourable; public health good; no material change in prices.
Mysore . . .	. . . .	
Mercara . . .	. . . .	Work on coffee estates over for the season; coolies leaving; price of food-grains has fallen slightly; public health generally good.
Berar & Hyderabad—(Mar. 12th)—

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 14th March, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of Bengal, C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G.
The Hon'ble H. S. Thomas.
The Hon'ble Kristodás Pál, Raí Bahádur, C.I.E.
The Hon'ble Mahárájá Luchmessur Singh, Bahádur, of Darbhangá.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble Amír Alí.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble R. J. Reynolds.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.

BENGAL TENANCY BILL.

The Hon'ble SIR STEUART BAYLEY presented the Preliminary Report of the Select Committee on the Bill to amend and consolidate certain enactments

relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal. He said:—

"In presenting the Committee's report I desire to explain to the Council that the revised Bill is printed, and that the Report has been considered and passed and duly signed by the members of the Select Committee. But it was only yesterday that the final revision of the Report by the Committee was completed. Some members of the Committee desire to record minutes of dissent; and, as it seems right that their dissents and the Report itself should be published together, the publication both of the amended Bill and of the Report will, at their request, be postponed for a fortnight to give them time to mature their minutes of dissent."

The Council adjourned *sine die*.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

FORT WILLIAM:
The 14th March, 1884.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.

Establishment.

EXAMINATION QUALIFYING FOR ADMISSION TO THE SUBORDINATE ACCOUNTS BRANCH.

No. 42 A.—E., dated Fort William, the 13th March 1884.

RESOLUTION.—By the Government of India, Public Works Department.

The necessity for raising the standard of the examination prescribed for appointment as Accountants, 4th grade, in the Public Works Department, having been brought under consideration, the Government of India is pleased to decide that the examination will in future comprise the following subjects. The full number of marks and the minimum number to be obtained in each in order to pass are noted opposite each subject:—

	Full marks.	Minimum to pass in each subject.	
Arithmetic	240	160	
Book-keeping	100	50	
Mensuration	60	30	
Writing	100	50	
Dictation	100	50	
TOTAL	600	400	Total minimum required in all papers collectively.

2. The examination will in future be annual, and will be held by the Principal of the Thomason College, Roorkee, at the end of November and by the Principal of the Civil Engineering College, Howrah, on the first Monday in June. The examination will be conducted either at the College or by an Examiner or Deputy Examiner of the Public Works Department, Account Establishment, as may be most convenient to the candidate.

3. Applications for examination papers must be sent through the officer with whom it may be arranged to conduct the examination, and must reach the Principal of the College not later than 30 days before the date fixed for the examination.

4. All applications should be accompanied by a fee of rupees ten and by the following certificates duly signed by the applicant's immediate superior or

the instructor under whom he has been educated or some other superior under whom he has been brought up or to whom he may be well known; failing which applications will not be registered:—

I.—Certificate of good character (This certificate must have reference to the two years immediately preceding the application);

II.—Certificate that the candidate is under 25 years of age if he is not in Government employ;

III.—Certificate that the application is in the candidate's handwriting.

5. It must be distinctly understood that the passing of this examination does not give any claim to appointment, and passed candidates should not apply to the Accountant General, Public Works Department, for employment, but to the Examiner of Accounts, under whom they desire to be employed.

6. The first examination under this Resolution will be held by the Principal, Thomason College, Roorkee, in November 1884, and by the Principal, Civil Engineering College, Howrah, on the first Monday in June 1885.

ORDER.—Ordered, that this Resolution be communicated to the Governments of Bengal and North-Western Provinces and Oudh for information and communication, respectively, to the Principals of the Colleges concerned for guidance, and to the Accountant General, Public Works Department, for information and guidance, with the request that he will arrange to have the necessary paper in book-keeping for the Roorkee Examination set and the solutions examined by an Account Officer of the Public Works Department.

Ordered also, that it be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

Telegraph.

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1882-83.

No. 80 T., dated Fort William, 10th March 1884.

Read—

Letter No. 569 T., dated 24th January 1884, from the Director General of Telegraphs, together with its enclosure, the Administration Report of the Indian Telegraph Department for the year 1882-83.

RESOLUTION.—During the year under review no change was made in the rates for inland telegrams.

2. This was the first year in which the system of dividing telegrams into the three classes of "Urgent," "Ordinary" and "Deferred" was in operation for the whole period. This system had been in force during the concluding 3 months of the previous year, and the beneficial results, which were then apparent, have continued to display themselves. The total number of telegrams increased by 11¼ per cent. over the number sent in the previous year; and the number of inland private messages, which really offer the best test of the popularity of the new system, increased by nearly 15 per cent.

3. In consequence of the cheaper rates for "Deferred" messages, coupled with the fact that the majority of the State messages (56·06 per cent.) are classed as "Deferred," the total value of inland messages treated during the year, in spite of the increased number of telegrams, was slightly less than the value of those treated in the previous year, the figures being R19,96,448 and R20,15,331, respectively.

4. There was, however, an increase of 7·10 per cent. in the number of foreign telegrams treated in India, consequent, mainly, on the operations in

Egypt, which was sufficient to increase the value of this class of traffic from R11,95,669 in 1881-82 to R12,79,160 in 1882-83, so that the gross value of all paid messages was—

	R
In 1882-83	32,75,608
In 1881-82	32,11,000

5. The total receipts from all sources by the Telegraph Department during the year amounted to R41,57,239 as compared with R38,54,212 in the previous year, the working expenses being—

	R
1882-83	33,39,442
1881-82	32,35,644

so that the net revenue was—

	R
1882-83	8,17,797
1881-82	6,18,568

The former figures give 2·77 per cent. on the total capital of R2,94,68,019 which had been expended up to the end of the year by the Telegraph Department on works other than telegraphs for military purposes.

6. The average speed of transmission of messages on trunk lines decreased slightly, owing probably to the increase in the number of messages.

7. The increase in the mileage of lines and wires was slightly less during the year under review than in the preceding one. The number of departmental offices increased from 292 to 314; of these, 56 were worked by non-departmental agency, 9 being in the hands of Post Masters.

8. It is satisfactory to notice that although the number of Signal Offices increased by more than 7 per cent., and the number of messages by more than 11 per cent., the cost of the signalling establishment, including the Check Office and a proportion of the Office of Direction and Accounts, only increased by R13,069, or by ½ per cent. The cost of establishment for each office has decreased from R8,164 in 1881-82 to R7,634 in 1882-83.

9. The cost of "Line maintenance" increased during the year from 13·6 rupees per mile of line to 14·3 rupees. This is due to the fact that more extensive repairs are now necessary on the older lines.

10. Some statistical tables referring to telephone lines are attached to the report under review, but no mention is made of telephone operations in the body of the report. The Government of India desires that, in future, reference may be made to the progress and efficiency of telephone exchanges in the hands of Government and of Companies, giving such information as may be thought desirable or interesting concerning the number of subscribers, the extent of the lines, and the general administration of the Companies which have licenses from Government.

11. There has been a slight increase in the percentage of complaints. There is a steady decrease in the interruptions on the departmental lines, which is a satisfactory indication of the efficiency of the department.

ORDER.—Ordered, that a copy of this Resolution and of the Report be forwarded to the Secretary of State, and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon and the Commissioner in Sind.

Madras, Bombay, Bengal, North-Western Provinces and Oudh, Punjab, Central Provinces, British Burma, Assam, Hyderabad, Central India, Rajputana and Biluchistan.

Also to the Foreign Department for communication to the Resident at Mysore and Coorg.

Also that a copy of this Resolution be forwarded to the Director General of Telegraphs for information and guidance.

Also that a copy of this Resolution and of the Report and Appendices A, B and F be forwarded to the Home Department of the Government of India for information, and be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

ADMINISTRATION REPORT
OF
THE INDIAN TELEGRAPH DEPARTMENT
FOR
1882-83.

THERE was considerable activity in the operations of the Department during the year 1882-83. The number of paid messages transmitted was 1,799,179, being 185,804 (equal to 11½ per cent.) more than the previous year; 722 miles of line and 2,978 miles of wire were added to the system, raising the totals to 21,324 and 61,314 miles respectively, and 22 new Departmental and 96 new Railway Telegraph Offices and Training Classes were opened during the year. Eight hundred and ninety Railway Telegraph Offices, inclusive of 13 Training Classes, were supervised and technically managed by the Department, and 1,646 miles of wire, not the property of Government, were maintained.

2. The receipts from all sources amounted to Rs. 41,57,239, and the expenditure to Rs. 54,48,054, showing a net expenditure of Rs. 12,90,815. Excluding the "Capital" expenditure which amounted to Rs. 21,08,612, there was a net revenue of Rs. 8,17,797.

REVENUE AND EXPENDITURE.

3. The total net capital expenditure of the Department during the year, shown in Diagram B, amounted to Rs. 21,08,612, and the capital account stands at the close of the year 1882-83 at Rs. 2,94,68,019.

4. The following is an Abstract Revenue Account for 1882-83, with corresponding figures for 1881-82 :—

EXPENDITURE.	1881-82.	1882-83.	RECEIPTS.	1881-82.	1882-83.
	Rs.	Rs.		Rs.	Rs.
Repairs of Lines	1,82,110	2,27,592	Message Revenue earned	32,11,001	32,75,608
Direction	1,66,082	1,56,281	Receipts from State Railways for Interest, Maintenance of Lines and Offices.	4,21,177	6,05,413
Accounts	39,351	39,988			
Superintendence	6,83,778	6,99,283	Receipts from Guaranteed Railways.	97,714	97,224
Line Maintenance	1,50,880	1,91,303			
Check Office	45,667	49,375	Claims against Guarantors	54,202	99,011
Signalling	17,39,681	18,28,708	Sale of Books, Gazettes, &c.	16,171	17,248
Minor Undertakings	14,680	13,638	Miscellaneous	9,210	18,961
Non-Departmental Offices	1,81,776	1,07,693	News-free and other *pro formâ* Message Revenue.	43,737	43,774
Telegraph Stamps	9,432	10,221			
Other Items	22,207	20,360			
TOTAL	32,35,644	33,39,442			
NET PROFIT	6,18,568	8,17,797	TOTAL	38,54,212	41,57,239

5. A clear idea of the progress which has been made will be obtained from the following table and from the diagrams A., B, and C. annexed to this report:—

Heads of Financial Results.	1871-72.	1872-73.	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.	1882-83.

TRAFFIC.

6. A return of the number and value of Inland and Foreign Messages under the sub-heads of 'State' and 'Private' will be found in Appendix B., the percentage being as follows:—

Class.	Inland.		Foreign.		Total.	
	No.	Value.	No.	Value.	No.	Value.
State	14·12	18·62	0·30	1·45	14·42	20·07
Private	66·10	42·33	19·48	37·60	85·58	79·93
Total	80·22	60·95	19·78	39·05	100·00	100·00

The following summary gives the actual increase and decrease, as compared with the corresponding figures for the previous year:—

Class of Messages.	Actual. Increase. Inland. No.	Inland. Amount. Rs.	Inland. Amount. A.	Foreign. No.	Foreign. Amount. Rs.	Foreign. Amount. A.	Net. No.	Net. Amount. Rs.	Net. Amount. A.	Decrease. Inland. No.	Inland. Amount. Rs.	Inland. Amount. A.	Foreign. No.	Foreign. Amount. Rs.	Foreign. Amount. A.	Net. No.	Net. Amount. Rs.	Net. Amount. A.
State	7,895	...	...	1,203	7,254	4	9,098	...	...	...	88,661	5	...	...	...	...	81,407	1
Private	154,300	69,778	7	22,406	76,236	2	176,706	1,46,014	9	...	...	...	...	...	...	...	...	...
Net	162,195	...	...	23,609	83,490	6	185,804	64,607	8	...	18,882	14	...	...	...	...	...	...

These figures are reproduced below in the form of percentages of the respective increases and decreases:—

Class of Messages.	Percentage. Increase. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.	Decrease. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.
State	3·21	...	28·18	18·02	3·63	...	...	12·69	...	...	...	11·02
Private	14·00	5·30	6·82	6·59	12·96	5·90	...	...	...	...	...	...
Net	12·66	...	7·10	6·98	11·51	2·01	...	0·93	...	...	...	...

7. The total number and value of Paid messages, as compared with the previous year, was as follows:—

Year.	State. No.	State. Value. Rs.	A.	Private. No.	Private. Value. Rs.	A.	Total. No.	Total. Value. Rs.	A.
1881-82	250,106	7,38,716	12	1,363,269	24,72,284	0	1,613,375	32,11,000	12
1882-83	259,204	6,57,309	11	1,539,975	26,18,298	9	1,799,179	32,75,608	4

Showing a very satisfactory increase as regards Private messages, while State message traffic exhibits a numerical increase, but decreased value.

Inland Traffic.

8. The following analytical return of Inland traffic shows the actual and proportionate number and value of Urgent, Ordinary, Deferred and Local messages for the whole year under review. The return includes messages (excluding press messages) tendered at offices of this department only:—

Year.	Class.	Urgent. No.	Urgent. Value. Rs.	Ordinary. No.	Ordinary. Value. Rs.	Deferred. No.	Deferred. Value. Rs.	Local. No.	Local. Value. Rs.	Total. No.	Total. Value. Rs.	Average cost per message. Rs.
1882-83	State	78,620	3,75,481	27,430	30,926	138,546	1,97,345	2,494	1,635	247,090	6,05,377	2·450
	Private	70,759	1,89,453	672,298	8,46,976	353,954	2,55,291	6,677	2,209	1,103,688	12,93,928	1·172
	Total	149,379	5,64,933	699,728	8,77,902	492,500	4,52,636	9,171	3,834	1,350,778	18,99,305	1·406
Percentage of Traffic	State	31·80	62·02	11·10	5·10	56·06	32·58	1·04	0·30	100·00	100·00	...
	Private	6·40	14·64	60·90	65·44	32·06	19·72	0·64	0·20	100·00	100·00	...
	Total	11·06	29·74	51·80	46·22	36·45	23·82	0·69	0·22	100·00	100·00	...

Comparing these numbers with those for the three months of the previous year during which the new tariff was in force, the following results are shown:—

State.

	1881-82.	1882-83.
Local	0·65	1·04
Deferred	62·70	56·06
Ordinary	7·12	11·10
Urgent	29·53	31·80

Private.

	1881-82.	1882-83.
Local	0·43	0·64
Deferred	22·03	32·06
Ordinary	72·64	60·90
Urgent	4·90	6·40

No change in the rates for Inland Telegrams was made during the year 1882-83.

9. The growth of Inland Traffic since the year 1872-73 is shown in the following Statement:—

YEAR.	STATE.						PRIVATE.						TOTAL PAID MESSAGES.					
	Number.	Value.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.		Number.	Value.	Percentage of *number* compared with previous year. The abnormal *numerical* increase in Inland private messages, unaccompanied as it is by an equal rise in *value*, must be attributed to the cheapened rates for "deferred" messages: to the same cause is attributable the decreased value, notwithstanding increased number of State messages.

Foreign Tariff, &c.

10. No change was made in the rates for telegrams to Europe during the year: the following were the principal events of importance in connection with international communication:—

April 1882.—Cable laid between Emden and Valentia by the German Union Telegraph Company.

May 1882.—Tariff to North America by the Anglo-American and Direct United States Telegraph Companies, raised from Frcs. 1·25 to Frcs. 2·50 per word. This had effect from 22nd May 1882.

July 1882.—Egyptian land lines interrupted between Suez and Alexandria from 11th July 1882.

August 1882.—Eastern Telegraph Company laid a cable from Alexandria to Port Said on 12th August 1882. Tariff to Port Said *viâ* Teheran-Malta-Alexandria increased by 4 annas per word in addition to rate to Egypt. French-American Telegraph Company equalised their tariff with those of the Anglo-American and Direct United States Telegraph Companies, with effect from 25th August 1882.

September 1882.—Suez route to Europe *viâ* Port Said reported right on 28th September 1882.

October 1882.—Cable laid between Malta and Tripoli on 30th October 1882.

November 1882.—Tariff between India and North America by the American Telegraph and Cable Company withdrawn from 1st November 1882. Rates only applicable between Great Britain and North America.

December 1882.—Communication with Central America and alternative route to South America opened by the cables of the Central and South American Telegraph Company *viâ* Galveston.

Foreign Traffic.

11. The number and value of combined State and Private message traffic continue to increase: the percentage of increase, as compared with previous years, is as follows:—

YEAR.	Percentage of increase, compared with previous years.	
	No.	Value.
1873-74	12·72	7·33
1874-75	15·75	6·24
1875-76	8·87	8·21
1876-77	22·44	5·34
1877-78	38·14	27·28
1878-79	5·28	0·42
1879-80	18·56	16·82
1880-81	29·52	17·47
1881-82	12·14	1·62
1882-83	7·10	6·98

12. Appendix C shows the percentage of number of messages between India and places to the westward, by each route, since 1871-72. The comparative results, for the last three years, have been as follows:—

	1880-81.	1881-82.	1882-83.
Viâ Suez	74·44	33·91	50·79
„ Teheran	23·52	61·62	47·20
„ Turkey	2·04	1·47	2·01

The Suez route was interrupted in July and August 1881, and in July, August and September 1882.

13. The following return of Foreign traffic corresponds with that given in paragraph 9 for Inland traffic:—

YEAR.	STATE.						PRIVATE.						TOTAL.					
	Number.	Indian share of charge.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.		Number.	Indian share of charge.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.		Number.	Indian share of charge.	Percentage of *number* compared with previous year.		Percentage of *value* compared with previous year.	
			Increase.	Decrease.	Increase.	Decrease.			Increase.	Decrease.	Increase.	Decrease.			Increase.	Decrease.	Increase.	Decrease.
		Rs.						Rs.						Rs.

1881-82	4,270	40,237	...	0·95	...	32·53	3,28,132	11,55,432	12·33	...	3·44	...	3,32,402	11,95,669	12·14	...	1·62	...
1882-83	5,473	47,491	28·18	...	18·02	...	3,50,538	12,31,669	6·82	...	6·59	...	3,56,011	12,79,160	7·10	...	6·98	...

The large increase in the number and value of Foreign State messages is due to the despatch of troops from India to Egypt. Foreign private traffic shows also a steady increase in number and value.

14. Diagrams A and B give the number and value respectively of Inland and Foreign paid messages, from year to year, as far back as the record is available.

15. Appendix D is a classified abstract of Signal Offices, according to the amount of traffic originating at each, for the past ten years.

16. Appendix E shows the number of Signal Offices in each Division open at the end of 1882-83. The following were opened and closed during the year:—

Opened.	Date.	Closed.	Date.
Dinagepore	24th April.	False Point (Jumboo) (Hukitollah called False Point)	25th April.
Rampore Bauleah	Ditto.		
Serajgunge	Ditto.		
Chupra	4th May.	Pir Chowkey	27th Ditto.
Hutwah	6th Ditto.	Ruksoul	10th July.
Revelgunge	Ditto.	Perambur (Madras)	15th Ditto.
St. Thomé (Madras)	15th Ditto.	Ranikhet Cantonment	10th November.
Saidapet (Madras)	Ditto.	Bettiah	16th February.
Chetput (Madras)	22nd Ditto.	Motihari	Ditto.

Abstract.

Worked by Post Masters	7
" " Clerks	1
" " Lighthouse-keeper	39
" " Soldiers	
Total worked by non-Departmental Agency	56
Worked by Departmental Agency	258
TOTAL	314

18. At the following stations the postal duties were, at the close of the year, being performed by the Telegraph Masters:—

Myanoung.
Kelat.
Silghat (Kaliabar).
Meesa.
Doom-Dooma.
Dunsiri Mukh.

Complaints.

19. In Appendix F will be found particulars of all the complaints received from the public during the year, those in which this Department was concerned being separated from those chargeable to Railway or Foreign Telegraph Lines. The figures for the preceding year are, for facility of comparison, given in antique type.

20. As regards the complaints in respect of messages lost, delayed or erroneously transmitted on the lines of this Department, 600 in number, 411 were admitted and 189 rejected. The gross number of complaints, including those rejected as groundless, was 0·32 per thousand messages as against 0·28 during the previous year. The increase is due in a great measure to the very difficult Code words used in commercial messages. It is found that of the errors made in Foreign messages 89 per cent. are in Code words.

21. Every encouragement is given to senders to submit complaints, and it by no means follows that an increase in the proportion of complaints indicates a falling off in the efficiency of the service: it has been remarked that native senders, as they acquire greater familiarity with the telegraphic rules and procedure, and with the readiness of the Department to give redress, become year by year less indifferent to loss, delay or mutilation of their telegrams.

22. Complaints regarding messages which were promptly and correctly transmitted over the lines of this Department, but which were lost, delayed or mutilated on the lines of other administrations were 489 in number, of which 290 were admitted and the remainder were either found groundless or had not at the close of the year been completely investigated. The gross number of complaints, including those rejected, averaged 8·9 per thousand messages against 7·3 in the preceding year.

Speed of Transmission.

23. The average time occupied in the transmission of messages for the past four years was as follows:—

	1879-80.		1880-81.		1881-82.		1882-83.	
	H.	M.	H.	M.	H.	M.	H.	M.
Calcutta to Kurrachee	1	10	1	22	0	55	1	24
Kurrachee to Calcutta	0	45	0	59	0	41	1	
Calcutta to Bombay	1	13	1	6	1	1	1	
Bombay to Calcutta	1	4	1	1	1	3	1	
Calcutta to Madras	1	27	1	14	1	9	1	6
Madras to Calcutta	1	27	1	15	1	13	1	18
Madras to Bombay	0	48	0	49	0	45	1	
Bombay to Madras	0	40	0	45	0	44	1	
Bombay to Kurrachee	0	43	0	53	0	45	1	
Kurrachee to Bombay	0	37	0	48	0	40	0	51
Rangoon to Calcutta	3	15	2	9	1	23	1	27

NOTE.—The speed of transmission for the last 16 years is shown in Diagram C.

News-free Messages.

24. The number and value of news-free messages, such as mail steamer reports, as compared with the previous year, have been as follows:—

	No.	Value.
		Rs.
1881-82	746	42,193
1882-83	895	42,818

Traffic with Railway Telegraphs.

25. Appendix G shows the number and Departmental share of the value of messages exchanged with State and Guaranteed Railways during the past nine years; the following is an abstract of the result for the year under report and the previous three years:—

PARTICULARS.	1879-80.		1880-81.		1881-82.		1882-83.	
	No.	Value.	No.	Value.	No.	Value.	No.	Value.
		Rs.		Rs.		Rs.		Rs.
Total exchanged with State Railways	40,994	56,188	72,135	77,529	107,664	1,10,934	102,808	78,803
Total exchanged with Guaranteed Railways	99,213	1,40,554	98,510	1,31,898	78,640	83,005	54,999	48,935
TOTAL TRAFFIC EXCHANGED WITH RAILWAYS	140,207	1,96,742	170,645	2,09,427	186,304	1,93,939	157,807	1,27,738

The decline shown for the year under review is due to the change introduced with effect from the 1st January 1883, under which messages exchanged with licensed telegraphs do not come into the accounts, each administration retaining its own collections. The figures for 1882-83 represent, therefore, the results of 9 months only of that year. The value of messages transferred to railways, &c., during the last quarter of the year is merged in the general message revenue of the Department, while that of messages transferred by Railways, &c., to this Department no longer affects the receipts of the latter. The change of system will render it unnecessary to include this return in future reports.

Press Messages.

26. In Appendix H will be found the number and value of the Press messages sent during each month of the year. Comparing the figures with those of the preceding year, the following result is shown:—

	No.	Value.
		Rs.
1881-82	7,941	40,975
1882-83	10,832	40,553

Notwithstanding a numerical increase of 36 per cent. there is no increase in value, a result which is due to the more liberal tariff introduced on the 1st January 1882, under which 8 words more in Ordinary and 28 words more in Deferred Messages can be sent per rupee than was the case under the Press Tariff previously in force.

Undelivered Messages.

27. The number of messages not delivered to the addressees, and the causes of the non-delivery, were as follows:—

	No.
1. Not found; address insufficient	1,489
2. Not found at address given	1,737
3. Address changed in transmission	64
4. Left station; new address not known	400
5. Left India	135
6. Left for original station	1,123
7. Returned by Dead Letter Office	1,011
8. Addressee or the address given unknown	133
9. Refused	142
10. Other reasons	286
TOTAL	6,520

The proportion of messages not delivered was 3·1 per thousand against 2·7 for the previous year: it will be observed that the Telegraph Department is powerless to effect the delivery of messages in the face of most of the reasons assigned above.

Interruptions on Departmental Lines.

28. A steady decrease is observable under this head, as will be seen from the following statement:—

	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.	1882-83.
Total number of interruptions	386	350	310	300	285	275
Aggregate duration, hours	5,790	4,910	3,900	3,200	2,736	2,530
Average duration, „	15	14	12·6	10·7	9·6	9·2
Interruptions per every 100 miles of wire	0·92	0·80	0·59	0·54	0·51	0·48

29. In the above statement are included the following interruptions due to extraordinary causes:—

May 1882.—Between Bassein and Diamond Island, lasting 212 hours. Wire broken in numerous places by over forty trees, which were blown down during a storm.

July 1882.—Between Bellary and Gadag, lasting 142 hours. Flood in the Toongabhudra river unprecedentedly high.

July 1882.—Between Mercara and Tellicherry, lasting 122 hours. Unprecedented floods in the Cauvery river; posts entirely submerged, and span carried away.

August 1882.—Between Badani and Rajanpur, lasting 136 hours. Very heavy floods in Upper Sind.

September 1882.—Between Bombay and Surat, lasting 84 hours. Lines washed away with North Poorna bridge.

December 1882.—Between Nellore and Guntoor, lasting 255 hours. Country inundated; three spans washed away; lines greatly damaged by floods.

December 1882.—Between Nellore and Madras, lasting 106 hours. Country inundated; spans washed away; lines greatly damaged by floods.

January 1883.—Between Naini Tal and Ranikhet, lasting 134 hours. Line broken in twelve places; caused through heavy fall of snow.

January 1883.—Between Kasauli and Simla, lasting 140 hours. Lines damaged by an unprecedented fall of snow.

January 1883.—Between Mussooree and Chakrata, lasting 160 hours. Line damaged by heavy fall of snow.

February 1883.—Between Mussooree and Chakrata, lasting 348 hours. Line damaged by unprecedented fall of snow.

March 1883.—Between Balasore and Cuttack, lasting 102 hours. Byturnee river span broken by violent storm; 5 standards broken and several blown over; lines much damaged.

Signalling Establishment.

30. There were 1,059 Departmental Telegraph Masters and Signallers, and 174 soldiers employed in signal offices at the close of the year: in addition to these, there were 7 clerks in civil offices, 9 Post Masters and 1 Lighthouse-keeper employed in Telegraph duties. The number of soldiers trained in telegraphy during the year was 90, while 96 more were under training at the close of the year.

Pensioned	1
Struck off strength of Department	5
Dismissed	8
Resigned	6
Deaths	7
Total	27

The casualties among the Departmental signalling staff during the year have been 27 in number (against 39 during the previous year) due to the causes marginally noted.

EXTENSIONS OF LINES AND WIRES AND LINE MAINTENANCE.

31. Appendix I is a classified list of all telegraph lines in India and Burmah on the 31st March 1883. The following are the total mileages of line, wire and cable contrasted with those existing on the same date in 1882 :—

	Line miles.	Wire miles.	Cable miles.
1881-82	20,602	58,219	117·5
1882-83	21,324	61,184	130

32. In addition to the above, the Department maintained 416 miles of line and 1,646 miles of wire, the property of Railway Companies, particulars of which are given in Appendix J.

33. The following are the principal works which were carried out in each division during the year 1882-83 :—

Arakan Division.

34. The substitution of Prussian porcelain for iron-hooded insulators on No. 10 wire between Tounghoop and Akyab was completed, and the usual annual repairs, which included the replacing of 303 decayed posts by new ones, were carried out.

Assam Division.

35. The erection of a wire for the use of the Assam Railway and Trading Company on existing departmental supports from Dibrugarh to Doom-Dooma, 46 miles, was completed; the doubling of the wire from Julpigori to Dhubri was commenced, and the construction of a new line along the north bank of the Brahmapootra from Dhubri to Goalpara (via Jogigopa) was in progress, the cable, 3,049 yards in length, to connect the latter with the main line at Goalpara, was successfully laid across the river at Jogigopa. Short telephone lines were erected at Shillong, Gauhati and Sibsagar to connect at the first-mentioned station, the Residency, Secretariat and the Personal Assistant's offices, and at the two latter the Deputy Commissioner's bungalow, with their respective kutcheries. Private lines were also erected in the station of Dibrugarh connecting the several offices of the Assam Railway and Trading Company locally.

The route for a line to connect Tura in the Garo Hills has been inspected by the Chief Superintendent, and an estimate prepared for its construction.

Bellary Division.

36. The line from Bangalore to Tumkur, 41 miles, was reconstructed with 4 wires along the route proposed for the extension of the Mysore State Railway, and a short line of 12·5 miles with 1 wire was constructed from Nova Goa to Cola, to be joined on to the line under construction by the West of India Portuguese Railway Company. The reconstruction of the line from Bellary to Hospett along the Southern Mahratta Railway was in progress.

Bengal Division.

37. The work of doubling the carrying capacity of the line, by replacing single by coupled posts between Sealdah and Raneegunge, 119·5 miles, which was in progress at the close of the last official year, was completed, and the portion leading into the Raneegunge Office, 2·84 miles, only remained incomplete. The reconstruction with coupled posts of the section Allahabad to Naini, 5 miles, was completed, and that of the section Naini to Moghalsarai, 91 miles, with coupled rail posts and coupled B. C. D. and C. D. posts was commenced and finished for 50 miles. The suspension of an extra wire from Calcutta to Barrackpore, 17·25 miles, which had been commenced during the previous official year, was completed, and an additional wire erected from Biddabatty to Raneegunge, 105·75 miles; the latter was connected with the spare wire through Burhee to Moghalsarai, and a new wire, which had been completed in 1881-82, from Moghalsarai to Allahabad. New single-wire lines for the use of the Bengal Central Railway from Dum-Dum to Goberdanga, 32 miles, and from Ranaghat to Bongong, 20 miles, were erected, and the extension of the latter along the Railway from Bongong to Khoolna was in progress. A second wire was subsequently added to the sections Dum-Dum to Goberdanga and Ranaghat to Bongong. The line from Sealdah to Sonarpur along the Calcutta and South-Eastern State Railway was reconstructed, and the construction of the section Mugrah to Diamond Harbour, 12·8 miles, along the railway extension, was finished, completing the line from Sealdah to Diamond Harbour along the railway, on which an extra wire was subsequently suspended and the old line, 21 miles, along the road dismantled. A single-wire line for 4 miles was erected for the Baidyanath [illegible] Railway Company between [illegible] on the East Indian Railway and Deoghar. A new line for 25 miles, with 3 wires along the Tirhoot State Railway, from Dulsingserai to Samaria Ghat, was constructed, and the old line, 17·75 miles, from Dulsingserai to the Ganges bank, dismantled. A new single-wire line for 3·9 miles for the Tirhoot State Railway was constructed from Samaria Ghat to the new steamer ghat, and an additional wire for 1·75 miles was erected from Dulsingserai to the new diversion at Basaria. The line from Jamalpore to Sahebgunge, 81 miles, was reconstructed, and the East Indian Railway wires were transferred to the Departmental supports, and the Railway line on this section dismantled. From Khana to Sahebgunge, 144 miles, every second post was cross-stayed and the suspension of an extra wire on the line Agra to Ghaziabad, a distance of 130·5 miles, was very near completion at the close of the year. The Muttra-Hathras State Railway telegraph was connected by wire with the East Indian Railway at Muttra. Much has been done during the year to improve the insulation of the East Indian Railway wires; a large number of broken and defective insulators throughout the lines have been replaced by O. P. P. or Siemen's No. 8a insulators, and the train signal wires for 23 miles between Madhupur and Giridih has been re-insulated. The re-insulation of the entire East Indian Railway wires has been commenced, and that of the section Howrah to Khana Junction was nearly complete at the close of the official year. The line Segowlie to Ruksoul was dismantled, together with the branches which were led into the Segowlie, Bettiah, and Motihari Offices, and the cutting out of ingot joints on the East Indian Railway lines between Allahabad and Cawnpore was carried out. A system of telephones was put up for the Comptroller General at Calcutta, connecting No. 1, Harrington Street, with 55, Park Street, and 166, Dhurrumtollah, and the latter again with No. 1, Dalhousie Square, and the Treasury Buildings.

Several alterations and additions to the telephone lines in Calcutta were made, which resulted in an increase of 13·5 in line and 52·9 in wire mileage.

Bombay Division.

38. The line from Manmad to Bhusaval Junction, 114 miles, with 6 wires, was transferred from the Bombay to the Nagpur Division during the year. A third wire, 59 miles, was suspended on existing supports of the section Hotgi to Beejapur for the use of the Southern Mahratta Railway, and the extension of the line to Gadag along the railway alignment was in progress at the close of the official year. In connection with the latter work, a span was erected across the Kristna river. The supports on the Departmental main line between Dadur and Callian, 28 miles, were doubled, and the Bombay, Baroda and Central India Railway main wire from Dadur to Surat was re-insulated. A single-wire line for 20 miles along the Gaekwar of Baroda's Railway was constructed from Miyagam to Dabhoi for the use of that railway. Alterations were effected in the Ahmedabad town lines and the 900-lb. wire in those lines was removed, and a lighter wire substituted. An additional wire was put up for the Nizam's State Railway for 2·4 miles on existing supports between Hossein Saugor Junction and Secunderabad. The town lines at Sholapore were re-constructed, and a wire erected between the Sholapore Office and the Office of the Executive Engineer, Southern Mahratta Railway. Wires were led into the stations recently built at Lunidhar, Dhoraji and Jolia. A telephone line was put up connecting the Central Office at Bombay with the local office at Mazagon, and other additions were made in the Bombay town lines, as well as to the telephone lines for the local mercantile firms. A telephone exchange was opened in the Bombay Town Hall, by which 11 local military offices were connected with each other, and a separate telephone line, connecting the Commissary General's Office with the Prince's Dock, was put up. The Commander-in-Chief's residence at Poona was connected by telephone with the Offices of the Quartermaster General and the Adjutant General. Telephones were substituted for the A. B. C. instruments used by the Port Trust, in the Lighthouse and the Sailor's Home, and the latter institution was placed in telephone communication with the Port Trust Secretary's Office in Elphinstone Circle. The Lighthouse and the Meteorological Observatory at Colaba were connected with the Central Office and worked by telephone.

British Burmah Division.

39. The construction of the line from Rangoon to Tonghoo along the Sittang Valley State Railway, which was completed up to Pegu last year, was in progress, and the section, Rangoon to Pegu, 47 miles, was brought into circuit, and the old road line from Hlaw-ga Railway Junction to Pegu dismantled. The construction of the line from Tavoy to the Siamese Frontier, which was undertaken during the year, was nearly completed by the 31st March 1883. Two new local lines were erected in Moulmein to connect the Central Office with the offices at Moopoon and Dinewoonquin. One A. B. C. instrument and two telephone lines were put up for the local mercantile firms in Rangoon and two in Moulmein, and three electric bell circuits completed in Rangoon for the Municipality. Two new cables were laid across the Rangoon river to replace the old ones which failed, and the cable across the Bassein creek, which was under-run and found corroded in several places, was repaired and relaid.

Dacca Division.

40. The erection of a third wire from Barrackpore to Chittagong, was completed during the year, and in connection with it a new cable was laid across the Meghna. The section of the line, Comilla to Chittagong, was cross-stayed, and the No. 10 line re-insulated. The reconstruction of the Barrackpore-Poradaha line with coupled standards was commenced and 48 miles completed by the end of the year. In connection with it an extra wire was erected from Barrackpore to Alamdanga, 79 miles, and an additional cable laid between Sara and Damukdia, to afford improved communication with Assam, to which Division it will ultimately be extended. A temporary bamboo line between Dacca and Mymensingh, for the Dacca-Mymensingh State Railway, was commenced, of which 42 miles were completed at the close of the year. The 18 miles of bamboo line between Parbatipur and Dinagepore were taken down on the completion of a 2-wire permanent line on B. C. posts along the Railway, and the reconstruction of the line between Nattore and Rampore Bauleah on iron-wood posts was commenced. A new local line, 1·5 miles, was erected for Departmental use between Darjeeling and Jellapahar, and two private telephone lines were erected, one for 1·5 miles at Naraingunge and the other 10·5 miles between Dacca and Naraingunge. At all Railway crossings between Poradaha and Silligori, the thicker wire was replaced by No. 6 I. G. wire.

Ganjam Division.

41. A second wire on the telephone circuit was put up on the 9 miles of supports between the Lighthouse and the Postal Telephone Office at False Point, placing the Lighthouse in communication with the False Point as well as the Cuttack Office, and the line was extended from the old to the new Post Office at Hukitollah (False Point). An earth-wire was erected for the telephone circuit, from Cuttack to Simlibund Junction, whence the line branches off to False Point. The No. 7 wire on sections, Berhampore to Chicacole, 97 miles, and Chicacole to Bimlipatam, 45 miles, was re-insulated, and a new line for 6 miles with 4 wires was erected from a point near Berhampore to Gopalpore. The Subarnarekha river crossing was reconstructed and the span wires across the Cortillier river on the section, Madras to Nellore, were shifted to the supports erected on the bridge. In addition to the ordinary maintenance repairs carried out during the year, 120 miles of line of the section, Guntoor to Madras, which sustained heavy damages caused by the floods in the Pennar river on the 30th November 1882, were repaired and put in order.

Indore Division.

42. The erection of a second wire from Morar to Indore and that of a third wire from Khandwa to Ajmere for the Railway, which were in progress at the close of the last official year, were completed. Simultaneously with the latter work the adding, and latterly the cross-staying of posts between Rutlam and Neemuch were [illegible] Superintendent's Office, and telephone lines were erected for the Political Agent in Central India and the Rajah of Dewas. Besides minor alterations at the Nusseerabad Railway Station, the wire spans across the Berach river, on the Neemuch-Nusseerabad section, were carried on the bridge.

Madras Division.

43. A telephone exchange was established in Madras for the Madras Government, by which, the Government Houses at Madras and Guindy and six other public offices in the locality intercommunicate through the office of the Chief Secretary in the Fort. A single wire line for 1·7 miles was erected between Coonoor and Wellington, and another, in telephone circuit, for 8·7 miles from Coonoor to Kotagiri. Two additional wires were put up on the existing posts from the South Indian Railway Station, Villupuram, to the east bank of the Gingee river, 16·6 miles, and a new line erected from the latter to Pondicherry to complete the loop. The Government and Railway Telegraph Offices at Trichinopoly, Tanjore and Madura were connected by wire, and the old loop line from Cuddalore to Pondicherry dismantled.

Malabar Coast Division.

44. A new line from Calicut to Devalla, 62 miles, with 1 wire, and another from Tirur Railway Station, 28 miles from Calicut to Malliapooram, 17·5 miles, with 1 wire, were constructed during the year; and an extra wire placed on existing supports from Calicut to Tirur Railway Station. A second wire was erected from Palamcotta to Tinnevelly, and the span on the Pane Mangalore improved. The cutting out of ingot joints on sections, Tellicherry to Palamcotta, and Mysore to Mangalore, was completed, and the whole of these lines, together with the section, Palamcotta to Tinnevelly, re-insulated.

Nagpur Division.

45. The line from Bhusaval to Manmad, 114 miles, was transferred from the Bombay to the Nagpur Division. The extension of the line from Dongargurh along the Nagpur and Chatisgarh State Railway, which was erected up to Musra, 8 miles, by the 31st March 1882, was completed to Raj Nandgaon, a distance of 11·5 miles by 10th April 1882 and a line was constructed along the alignment of the future Railway from Raj Nandgaon to Raipur, 42·5 miles, on B. C. supports with 6″ brackets and backs, O. P. P. insulators and one wire. An extra wire was erected from Itarsi to Hoshungabad, 11 miles, for Departmental use, and a 3-wire line, 46 miles in length, constructed from Hoshungabad to Bhopal, 2 wires for the use of the Bhopal State Railway and one for Departmental use. A single wire line, 23·5 miles, was erected from Bhopal to Schore, and a loop line, to connect the Telegraph Office at the former, was erected from the main lines at Bhopal. The Kotwali at Jubbulpore was connected by wire with the Jubbulpore Office, and an extra wire erected from Jubbulpore to Pipariya, 111 miles, and joined on to the wire to Itarsi, thus giving a separate wire for the section Jubbulpore to Hoshungabad. On the sections, Kanhan Bridge to Seoni and Seoni to Jubbulpore, 5 feet Z tops with B caps were fitted on all ¾ standards which had no wood tops, and the brackets lowered to prevent contact.

A return wire was erected on the telephone lines in Nagpur, as the earths did not answer well; and the line from Koka Junction to Koka Quarry dismantled. The maintenance repairs carried out in the Divisions during the year included the replacement of 4,250 whole-hooded insulators by O. P. P. insulators and 19 decayed standards by sound ones. The span over the Wanna river on the Wardha Coal State Railway was broken by a heavy flood, and the wires transferred to the Railway Bridge.

Oudh and Rohilkhand Division.

46. A new line was constructed from Farukhabad to Kaimgunge, 19 miles, with 2 wires, for the Cawnpore and Farukhabad Provincial State Railway extension, from Farukhabad to Hathras Road. Another line for 12 miles with one wire was erected from Nanou to Aligarh, for the Irrigation Department. Two new telephone lines were erected, one at Naini Tal for the Public Works Department Secretariat, half a mile in length, and the other at Benares for the Oudh and Rohilkhand Railway, for which 1·1 mile line was erected and ·58 mile of an old disused cable across the Ganges brought into use. The telephone line at Cawnpore for the Cawnpore and Farukhabad State Railway, was doubled and increased by ·2 miles of line and 4·12 miles of wire.

Punjab Division.

47. The reconstruction of the line from Tarnaul to Peshawar along the Punjab Northern State Railway was completed up to Peshawar Cantonment in January 1883, but owing to the unfinished state of the Railway bridge over the Indus at Attock, the line between the bridge and the station of Khairabad was not permanently constructed. A line from Murree to Kuldana, 2 miles with 1 wire, was constructed which, completed the Gully Military lines and placed the Gully Military offices in communication with Murree. Alterations were made in the Rawalpindi Station lines and the telephone lines in Rawalpindi and Lahore. The line from Lala Musa to Bhera was extended, 11 miles further, along the Railway to Kheora; 976 cross feet were fitted to the posts between Lahore and Jhelum, and a double line to work electric bells, was put up across the Jhelum Railway bridge, which has proved of great use to the proper working of the bridge traffic. A single wire line for 35 miles was erected between Raiwind and Gundasingwalla Serai, a place on the bank of the Sutlej, opposite Ferozepore. A telephone line for His Highness the Rajah of Chamba was put up between Chamba and Dalhousie, and a 4th wire was erected on existing supports between Amritsar and Ludhiana, 85 miles, so as to give 4 wires throughout from Umballa to Lahore to meet the increased traffic on the line caused by the late war in Egypt. A line on iron rails, 12 to the mile, 35 miles long, from Doraha

to Rupar along the Sirhind Canal, was erected for the use of His Excellency the Viceroy during the opening by him of the canal; in connection with which an additional wire was suspended on departmental supports from Doraha to Ludhiana to work to Rupar. For the convenience of the Sind, Punjab and Delhi Railway a second wire was added between Doraha Railway Station and Rupar and a telephone line, 3 miles in length, was constructed from Doraha to Manpur for the canal authorities. A wire was put up on the Rawalpindi-Tarnaul posts to connect the Rawalpindi Railway Station with the Traffic Superintendent's Office, and the 5th wire between Golra station and the old Tarnaul station was dismantled. A new single-wire line was constructed on wooden posts from Jullundur to Hoshiarpur, 25 miles. The line from Amritsar to Batala was reconstructed with 4 wires along the Amritsar-Pathankote Railway, and extended to Pathankote during the year. The reconstruction of the line from Umballa to Simla was commenced and was nearly completed by the end of the official year; a fourth wire was added and the number of posts on the section, Umballa to Kalka, increased from 17·6 to 24 per mile, and a double line of posts erected from Kalka to Simla, each set carrying two wires. The Guggur span was made perfect by substituting for an ordinary wire a fourth steel wire similar to the other 3 wires in use. A branch line with 1 wire was erected on wooden posts from Kasauli to Solon, 10 miles in length, and a 5th wire added to the section, Meerut to Ghaziabad.

Rajputana Division.

48. A permanent line of 88 miles, with 2 wires, was erected from Rewari to Hissar for the Rewari-Ferozepore State Railway, and the temporary line constructed last year from Rewari to Dadri 34·5 miles, as also that from Dadri to Hissar, 55 miles, which was put up during the current official year, were dismantled. A temporary uninsulated one-wire line was constructed from Hissar to Ferozepore, 155·25 miles. A 3rd wire was erected on existing posts from Ajmere to Nusseerabad, 14·25 miles, and the line from Ajmere Railway Station to the new Junction, Rajputana-Malwa Railway, 5 miles, was reconstructed. A short temporary uninsulated line of 3 miles with 1 wire was erected for the use of the Rewari-Ferozepore State Railway from Dadri to Kapuri Quarry, and a return wire, 2·6 miles, suspended throughout the Rajputana-Malwa Railway Telephone system in Ajmere.

Sind Division.

49. The suspension of an extra wire on existing posts between Sukkur and Kotri, 227 miles, was completed shortly after the close of the official year, by which means Quetta is placed in direct communication with Deesa and Bombay. Two new local lines were erected at Kurrachee to join the central office with the Kiamari and cantonment branch offices. A temporary loop, 16 miles in length, with two wires, was erected between Dadur and Rindli, and the line, Nari Bank to Pir Chowkey, reconstructed. The ¾ standards between Bareji and Umerkote were cross-stayed, and the insulation of the section from Kurrachee to Hyderabad improved. The Government and Railway offices at Sibi were connected by wire, as also the general Railway offices with the Sukkur Bunder Station.

Beluchistan Sub-Division.

50. The semi-permanent line up the Hurnai route, which had been completed by the 31st March 1882, to Sharigh, was extended to Kach, a distance of 36 miles, which completes the alternate route from Quetta to Sibi. The section Sibi to Rindli was reconstructed along the Railway, and 7 miles of the line between Koondlani and South Kirta had to be shifted in consequence of the construction of the new military road up the Bolan Pass. The lines throughout this sub-division were thoroughly repaired during the year.

STATE, GUARANTEED, AND SUBSIDIZED RAILWAY TELEGRAPHS.

51. A return showing the number of Telegraph offices and the extent of line and wire maintained for State, Guaranteed, and Subsidized Railways, to-

gether with the capital expended by this Department on behalf of each Railway, is included in Appendix J of this report.

STORES AND WORKSHOPS.

52. The following are the items of expenditure under this head during the year:—

	Rs.
Purchase of Stores in India	1,83,772
London Stores, including freight and landing charges	7,73,837
Workshop and Press	2,61,664
Store-keeping	95,655
Superintendence	28,670
Stationery received from the Superintendent, Government Stationery, and value of printing done by the Superintendent, Government Printing, without charge	34,171
TOTAL	13,77,769

53. The value of the outturn from workshops was Rs. 4,77,343 and from Press Rs. 37,532 against Rs. 3,69,800 and Rs. 35,976 of the previous year.

CALCUTTA,
The 21st December 1883.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

INTERNATIONAL EXHIBITION TO BE HELD AT BUDAPEST IN 1885.

No. 41 Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department,—dated Calcutta, the 18th March 1884.

MUSEUMS and EXHIBITIONS.

RESOLUTION.

READ the following—

No. 18, dated Calcutta, the 5th March 1884.

From—A. RITZ, Esq., *Acting Consul for Austria and Hungary,*

To—*The Secretary to the Government of India.*

THIS Consulate having received by the last Austrian Lloyd Steamer from the Imperial and Royal Austrian Minister for Foreign Affairs at Vienna some printed papers, relating to the "General National Exhibition" to be held in 1885 at Budapest (Hungary), opening day 1st May 1885, requesting me to forward these documents to the Indian Government with a prayer on my part kindly to give these documents the widest publication, in order to secure, if possible, the participation of Indian Exhibitors in that Exhibition, I have the honour to forward herewith five forms each of the respective Government Notifications on the subject, *viz.*:—

I of General Regulations;
II of International Section;
III of Form of application;

and shall feel extremely obliged by giving this official communication your earliest and best support in the interest of Indian commerce.

General Regulations for the International Section of the General National Exhibition at Budapest, 1885.

(III. Special Exhibition.)

I.—The Objects and the Direction of the Exhibition.

Simultaneously with the General National Exhibition to be held in the year 1885 at Budapest, and within its own precincts, will be organised a Special Exhibition to which all Motors, Engines, and Tools for artisans, also all Agricultural Machines and Implements of the latest and most improved construction, and important patented Inventions and Improvements will be admitted, from all countries.

A Special Committee has been intrusted with the immediate management of the affairs of this Special Exhibition, who will communicate with the Exhibitors in the name of the General Commission of the General National Exhibition. Only the General Commission retains the right of accepting the Applications and the rents for space, as well as the decision of doubtful questions, also all that belongs to the general management of the Exhibition.

II.—Permanence of the Exhibition.

The Special Exhibition, as well as the General National Exhibition, will be opened at Budapest on the first day of May 1885, and closed on the 15th day of October 1885.

III.—Object of the Special Exhibition.

The object of the Special Exhibition is to promote the improvement and development of the smaller trades, by exhibiting all the resources by means of which they can be improved sufficiently to compete with the powerful wholesale Manufacturers, and properly occupy the place designed for them by nature; and especially to promulgate in Hungary, and in the adjacent countries to the East and South, the progress that has been made in Western and

Northern countries, in the manufacture of Machines and Implements of Husbandry, together with their inventions and improvements; to offer opportunities for Inventors to bring their Machines, Tools, Improvements, or Inventions before the Public; to encourage the improvement of Motors, Engines, Tools, as well as Agricultural Implements; and to advance the realisation of new Industrial ideas; finally, to bring Consumer and Producer, Contractor and Inventor, into closer connection, for their mutual advantage.

The better to realise this project, arrangements have been made that, as far as possible, all machines to be exhibited, shall be erected in such a manner that they, in conformity with the Regulations contained in the Special Rules, may be set in motion on the Exhibition premises.

IV.—Grouping of Objects.

The Special Exhibition comprises the following First and Secondary Classes:

FIRST CLASS (A).—*Motors (Engines), Work Machines, and Tools for Artisans and the Smaller Trades.*

I.—SECONDARY CLASS.

Engines to be set in motion.—By Gas, Water, Steam, Hot air, Electricity, Carbonic gas, Carbolhydrogen, &c.

II. SECONDARY CLASS.

1. Machines and Tools for working in Wood.—For Joiners, Turners, Carpenters, Wheelwrights, Coopers, Lastmakers, all wooden-ware and toy makers.

2. Machines and Tools for Working Metals.—(*a*) For Blacksmiths, Locksmiths, Gunmakers, Cutlers, Zinkworkers, Carriagemakers, &c., &c. (*b*) For Boilermakers, Coppersmiths, Tinsmiths, &c., &c. (*c*) For Braziers, Brassfounders, Plumbers, and Gasfitters, &c., &c. (*d*) For Goldsmiths, Silversmiths, Goldbeaters, Jewellers, &c., &c.

3. Machines and Tools for the Production of the following Articles:—Tacks, Screws, Bolts and Rivets, Pegs, and Needles.

4. Machines and Tools for Mechanicians.—For Watchmakers, Scalemakers, Mechanicians, Instrument manufacturers.

5. Machines and Tools for the working in Leather.—For Tanners and Curriers, Saddlers, Trunkmakers, Shoemakers, Glovers, &c., &c.

6. Machines and Tools for the Consumption of Tissues, Spinning and Weaving of Textiles.—(*a*) Sewing Machines, Knitting Machines, Worsted Machines. (*b*) Looms of all descriptions, Looms for girths, hoses, &c., &c. Machines for shearing cloth, &c., &c. (*c*) Thread Spinning machines, Combing machines for hemp and flax, &c., &c. Machines for Ropemakers.

7. Machines and Tools for Hatters.

8. Machines and Tools for Brushmakers.

9. Machines and Tools for Potters and all Sorts of Earthenware.—(*a*) For Potters, Glass grinders and blowers, for the Production of Cement. (*b*) For the working of stones.

10. Machines and Tools for working in Bones and Horn.—For Buttonmakers, Combmakers, Turners in bone, &c., &c.

11. Machines and Tools for the Production of Victuals and Food.—(*a*) For Millers, Bakers, Confectioners, Preservers. (*b*) For the Production of Ice. For the Production of Artificial Mineral Waters, &c. For the Production of Sparkling Beverages.

12. Machines and Tools for Multiplying Trades.—For Printers, Lithographers, Photographers, Typefounders.

13. Machines and Tools for Bookbinders, Fancy workers in Leather and Paper, &c.

14. Transmissions, as far as is necessary, for the driving of Machines on Exhibition.

REMARKS.—Besides Machines of the Secondary Classes, all such articles may also be exhibited, which have been produced by these Machines on Exhibition, provided they have not been worked otherwise.

FIRST CLASS (B).—*Agricultural Machines.*

These Machines are only admitted to the Exhibition, if they be of the newest and most improved construction, or if they show essential alterations.

FIRST CLASS (C).—*Inventions and Improvements.*

All Inventions are accepted, if secured by the Patent still in force of any Country at the time of Exhibition.

The grouping of objects belonging to First Class C will be carried out only after all Exhibitors have sent in their applications, as it has been reserved to the Special Committee to place them in groups and divisions according to their nature.

In this First Class C not only perfected objects, but also their models, will be admitted.

V.—Certificates.

In the Special Exhibition no Prizes will be awarded by a Jury.

During the permanence of the Exhibition, however, a Technical Scientific Commission of Experts will be constituted, based on regulations hereafter to be issued; which Commission

will examine the Articles exhibited, and will issue Certificates in the name of the General Commission.

VI.—Reduction of Tariffs and Fares.

The Special Committee will take the necessary steps to procure favourable reductions of Tariffs and Fares on all Lines throughout the Austro-Hungarian Territory; as well on the carriage of all objects to the Exhibition as, if necessary, on their return journey.

VII.—Duty free.

The importation of objects free of duty has already been provided for by the Act of 1882, §. 10, Article XVI.

The Royal Hungarian Ministry of Agriculture, Industry, and Commerce will claim the assistance of the Imperial and Royal Ministry of Foreign Affairs, to endeavour, whenever it shall be found necessary, to pass free of duty, to their respective countries, all exhibited articles which have not been eventually sold during the Exhibition.

VIII.—Protection of Patent-Rights.

Should an Exhibitor claim the privilege of having his patent-rights protected, he must send in a petition, enclosing vouchers, properly filled out, to the Royal Hungarian Ministry of Agriculture, Industry, and Commerce, before sending in his objects.

Further particulars as to the steps to be taken, can be obtained from the Special Committee on either verbal or written applications.

IX.—Applications.

Applications must be written on special Forms, which will be forwarded to Applicants in duplicate, free of charge, by the Special Committee, which Forms must be filled out properly, written clearly, and filed at the Office of the General Commission, at latest, by the last day of February 1884. The said General Commission will be answerable for a prompt and quick despatch of all applications and will pay every attention to the Correspondence with Exhibitors.

Exhibitors of Inventions and Improvements must annex to their Application an authenticated duplicate of their patent.

X.—Applications for each First Class.

Exhibitors, intending to exhibit in several "First Classes," must file two vouchers for each and every class.

XI.—Acceptance and admittance.

With regard to objects announced for exhibition, the Special Committee has to decide whether they will be accepted or not, as far as the object of the special Exhibition is concerned; but as a superior court the General Commission has the right of final decision. Neither the Commission nor the Committee are obliged to give reasons for refusal. To facilitate the examination of the applications, every application must be accompanied by a drawing with detailed explanation, and, with regard to machines, it must be stated how much water, steam, gas, and how much driving power is required.

In case of acceptance of objects for Exhibition, the Exhibitor will receive a Certificate of Admittance within 30 days after filing his application.

XII.—Rent for Space.

The rent for space has been settled as follows:—

(*a*) Entirely covered localities per □m. floor area at 12 fls. Aust. Curr.
(*b*) Ditto ditto per □m. floor and wall at 9 fls. Aust. Curr.
(*c*) Entirely covered localities per □m. wall surface at 4.50 fls. Aust Curr.
(*d*) Half covered localities per □ meter area 4.50 fls. Aust. Curr.
(*e*) In the open air per □m. 3.—fls. Aust. Curr.

The height of objects to be exhibited in the localities (*a*) and (*b*) must not be more than 3 meters, otherwise an extra rent must be paid.

No space less than a meter can be hired.

Half the rent has to be sent in to the General Commission of the Exhibition, after receiving the Certificate of Admittance, and the other half, at latest on the 15th day of July 1884.

If the rent be not paid in due time, the General Commission is entitled to dispose otherwise of the place claimed. If the first part of the rent has been paid, and the applicant does not exhibit, or should withdraw, no money will be returned.

If, after the placing of articles, it should appear that more space had been occupied than stated in the application, the difference must be paid up to the 1st of June 1885.

Exhibitors raising buildings on an open space, after receiving the permission of the Special Committee, must make special agreements with said Committee, as regards the rent to be paid. Likewise where complicated Erections are put up, special agreement must be entered into with the Special Committee.

XIII.—Propelling power and its Transmission.

The propelling power (water, steam, gas) and the transmission from the main shaft for putting in motion machines, will be given free of cost and be at the disposition of the Exhibitor; yet the expenses of mounting and keeping in proper order of all the gear for transmission from the main shaft, must be borne by the Exhibitor.

The time of motion during the Exhibition will be fixed by the Special Committee at the proper time.

All Steam Engines will be examined before they are put in motion by the Special Committee at the expense of the Exhibitor.

XIV.—Supervision and tending of Machines in motion.

The keeping in motion and the supervision of the machines on Exhibition can be given in charge of hired men, or can be done by representatives of the Exhibitors; in which case the appointed persons have unconditionally to conform with all the regulations of the Special Committee. On the other hand, the Committee will take care to appoint skilful machinists, and these appointed men of the Committee will take charge, for a moderate remuneration, of the putting in gear and the conduct of work intrusted to them by the Exhibitor.

The arrangement for the mounting and putting in motion of machines will be fixed by the Special Committee on receipt of application, upon which the Exhibitors will receive more particulars about the pullies and the belting to be furnished.

XV.—Transport of Objects.

All articles to be exhibited will be sent free to Steamship or Railway Stations of Budapest. Particulars about addressing and marking of parcels will be sent in due time to the Exhibitors. The transport of articles from the Stations to the Exhibition grounds, or if necessary on their return, will be entrusted by the Special Committee, and at the charge of the Exhibitor, to some forwarding and commission house, which will have to charge as moderate rates as possible.

Boxes and other materials for packing will be taken care of during the time of the Exhibition without any charge whatsoever.

XVI.—Directions concerning the Packing.

The use of good boxes and careful packing of objects is always to the interest of the Exhibitor.

Inside and on the top of every box should always be placed instructions concerning the unpacking, raising, and mounting of objects; besides these, a list of all parts or numbers of pieces contained in every parcel.

Those sides, which are to be opened, should not be nailed but screwed down.

In one box only objects belonging to one group can be packed.

XVII.—List of Objects. Sending in.

Before forwarding Articles, bills of delivery must be sent in to the Special Committee, enclosing all particulars. Blank forms will be supplied, without special application from Exhibitors.

All objects for Exhibition must be sent in between February 1st and March 1st 1885, and all must be arranged in their proper places by the 20th April, at the latest. This circumstance should be taken into consideration, especially where the objects require much time for erection.

XVIII.—Objects to remain on Exhibition.

No object exhibited will be permitted to be removed before the Closing of the Exhibition, that is, before the 15th October 1885, except with the permission of the General Commission. All articles produced by permission of the Commission on the premises being excepted.

XIX.—Decorations, Cases, &c.

With regard to Decorations, Cases, Tables, and Shelves, the general rule is, that they be erected by the Special Committee, according to the prescribed uniformity, at the expense and in conformity to the wishes of the Exhibitor, on moderate conditions. If the Committee should consent to the use of special tables, cases, &c., then a drawing of the same must be sent in in time for examination. The same refers to plans and drawings of Pavilions or other buildings to be erected in the open air.

XX.—Rails or Palings.

The Exhibitors have to fence in with rails or palings all articles on exhibition, for the protection of themselves and the public. On demand, the Committee is willing to supply the same, at the expense of the Exhibitor.

XXI.—Care taking and Cleaning.

The General Commission will provide trustworthy persons for the custody and cleaning of the articles exhibited, for which service a moderate fee will be charged to Exhibitors. No guarantee or compensation will be given for losses or damages happening on the premises.

XXII.—Fire Insurance.

The General Commission will undertake to insure all objects against fire, at a premium in proportion to the stated value in the application.

XXIII.—Copying and Photographing Objects.

No object on exhibition can be copied or photographed, without the permission of the General Commission, and the assent of the Exhibitor.

The General Commission reserves the right of having photographical groups taken, for the purposes of sale.

XXIV.—Commercial Agents.

The Special Committee will provide active and experienced Agents, to act as the Commercial Representatives of Exhibitors. The place at which to apply for Agents will be found noted in the form of Application.

Exhibitors, represented by their own agents, are requested to announce them, in time, to the Special Committee.

XXV.—Selling Objects exhibited.

The Exhibitor must state in the Form of Application, whether the object exhibited be for sale or otherwise. If for sale they can be labelled "For Sale" with the price attached.

XXVI.—Tickets for Agents of Exhibitors.

Free Tickets will be issued to all Agents and employés of Exhibitors during the continuance of the Exhibition. The tickets only to be used by those in whose name they are issued.

Abusing this privilege, the owner of the ticket loses all rights of free admission.

XXVII.—Special Catalogue.

A Special Catalogue will be issued for the International Section of the Exhibition.

It is at the option of Exhibitors with regard to admission in the Catalogue, to supply, besides the Name of their Firms, and the objects exhibited, in good time, to the Special Committee, any Statistical or Descriptive data of their productions, inventions, and trades, in as concise a form as possible; the Special Committee reserving the right either to shorten or revise them.

Drawings and Sketches, only in special cases, will be received into the Catalogue by the Special Committee. For exact Advertisements in the Catalogue, cheap tariffs will be arranged.

Besides Exhibitors, such persons who have especially distinguished themselves in the manufacture of articles on exhibition, may be mentioned in the Catalogue.

XXVIII.—Shops for repairs.

On the Exhibition grounds, as far as room will allow, shops, properly fitted for all kinds of repairs, will be erected, where all necessary repairs of objects exhibited, can be carried out by the mechanics appointed by the General Commission, at a very moderate price.

XXIX.—Balancing Accounts.

The balancing of Accounts between the Exhibitor and the General Commission will take place three months after the opening of the Exhibition.

XXX.—Subsequent Publications.

Further special Regulations, and any other publications concerning the Exhibition, issued by the Special Committee, will be either forwarded direct to the Exhibitors, or through the Agents who will be nominated in the different countries.

XXXI.—Acceptance of Regulations.

Every Exhibitor, on sending in his Application, must accept in his own name and that of his representatives and employés, the Regulations cited above, and submit to all further directions which may be issued by the General Commission, or in their name by the Special Committee.

The General Commission of the General National Exhibition, at Budapest, 1885.

MATLEKOVITS, *President.*

COUNT EUGEN ZICHY, *Second President.*

International Section of the General National Exhibition at Budapest, 1885, for Motors, Working Machines, and Tools for Artisans; as well as for Agricultural Machines of the latest and most improved constructions, and also for important Patented Inventions and Improvements.

In conformity with a Bill submitted to the Hungarian Legislature by Count Paul Széchényi, Royal Hungarian Minister of Agriculture, Commerce, and Industry, the Bill No. XII of 1883 has been passed for the purpose of instituting a "General National Exhibition" to be held at Budapest, the same having received the sanction of His Apostolic Majesty the Emperor Franz Joseph the First, King of Hungary.

By this Act the General National Exhibition to be held in the year 1885 at Budapest, has not only been placed under the patronage of the Hungarian Government, but has been declared a National question; the Government being invested with the direction of the Undertaking, to propose and organise the same.

A General Commission has been appointed by the above-named Minister and intrusted with the immediate management of the affairs of the Exhibition.

The General Commission is composed of the following Members:—President, Dr. Alexander Matlekovits, Secretary of State; Second-President, Count Eugen Zichy, President of the National Industrial Society; Director, Dr. Julius Schnierer, Counsellor of the Ministry.

It has been decided and decreed by the General Commission, in consideration of the limited character of the Exhibition, it being intended to produce as complete and faithful a picture as possible of the productions and handiworks of Hungary, to organise simultaneously with the General National Exhibition, and on the same precincts, a separate International Exhibition of Motors and working Machines, Tools, and Implements for Artisans and Traders, as well as Agricultural Machines of the latest and most improved constructions, and all important Patented Inventions and Improvements.

It has accordingly been taken into consideration to propose the participation of Foreign Countries in this Special Exhibition, and to make arrangements for the exhibition of their superior productions.

The General Commission in coming to this decision has been chiefly guided by the consideration of the importance which must be ascribed to the exhibiting of Machines and Tools, as well as the latest Inventions in the construction of Agricultural implements, as prime factors in the sphere of Industry and Agriculture.

In consequence of the magnitude and rapidity of progress in the sphere of Technics and Communication, a change has taken place in the industrial productions of Hungary, similar to that which has been wrought in the Northern and Western States of Europe. For the last Decennium the greatly improved means of communication, and the great increase of International intercourse, have exposed Hungary to the competition of the more advanced Foreign Industry; on the other hand a very important tendency has appeared, for raising Industrial Establishments on a very large scale, by the more intensive application of the powers of nature, and a more extensive employment of the principle of division of labour, which tendency is thrusting the smaller artisans rapidly into the background. With regard to the wholesale production of cheap manufactured goods not only is it a pressing necessity, but perhaps the most important problem of the political economy of our times, to find ways and means of saving the smaller industries from certain extinction, to preserve and advance the material welfare of craftsmen, by enabling them to fill up the place in the circle of Industrial Productions, which the large manufacturing establishments, wanting in individual character, and bent on only wholesale production, are unable to occupy.

In order to solve this highly important question of political economy, it is essentially requisite to put into the hands of intelligent and assiduous craftsmen, such motors or perfected working machines and tools as are at the disposition of the wholesale producer, or that the methods and implements used by the wholesale producer may be so modified as to be used by handicraftsmen, and put into motion as easily and cheaply as by the wholesale manufacturer. Should this succeed, then the regeneration of the humbler trades is to be hoped for, and that they may be able to exist even side by side with the powerful wholesale manufacturer, since innumerable and important branches of industrial production exist, which can only be cultivated by individual hand power, and must always remain in the hands of mechanics.

These general points are the main cause which have induced the General Commission to organise a Special Exhibition of Machines and Tools for Mechanics in the precincts of the General National Exhibition at Budapest. It is the intention of the General Commission to bring before the public all such machines in motion, in order that the public may judge for themselves, and be convinced of their advantage.

Hungary, notwithstanding her Industrial advancement, still remains an Agricultural country. Consequently the production of Agricultural Machines forms the most important branch of her machine industry. Now there is no doubt, this branch of industry has lately made very satisfactory and noteworthy strides, and the Exhibition will, consequently, give a complete picture of the result. Notwithstanding, it is not only in accordance with the general object of the Exhibition, but it is also desirable that an opportunity should be offered to foreign manufacturers to bring such Agricultural machines of their own making to the Exhibition which can show some important ameliorations or innovations. By admitting such machines to the Exhibition, the Commission thinks to render an important service, not only to the country itself, but also to the manufacturer concerned, as well as to industry in general.

As the representation of the progress made in Industrial Undertakings is the main object of Exhibitions, the progressive Inventions and Improvements have naturally taken a leading position in all great Exhibitions, at least so far as their importance, adaptability, and usefulness are verified and protected by being patented by some one country. In Exhibitions a mechanic is principally enabled to have an insight, not only into what has already been attained, but also into what has been attempted; the Capitalist is enabled in the Exhibition to look for the best possible means of investing his Capital in some useful and profitable industrial concern; and finally, the Inventor or Patentee himself will be enabled to avail himself of the opportunity for the propagation of science and the appreciation of his invention in the widest circles of society, which the Exhibition offers.

The General Commission are justified, in considering as well founded and deserving of support, the bringing of these three branches of Industry into one special Section of the Exhibition, by the insight into the progress and development which their union will simplify.

It is perfectly natural that this Special Section of the Exhibition must be of an International character, since the Industrial productions of Hungary proper are only the commencement of the creating power mentioned above, and consequently the objects to be exhibited are mostly, if not exclusively, to be expected from Foreign Countries which are in a more progressive state.

The General Commission have the hope that the Foreign exhibitors of Engines, Tools, and Agricultural implements, as well as the possessors of Foreign patents, will embrace the opportunity offered them, the more so as every possible facility will be given them to profit by not only the general advantages which the Exhibition may offer, but also by the prospect of having opened up to them a market not only in Budapest and Hungary, but farther abroad, which will bring them into closer connection with the neighbouring countries on her eastern and southern frontiers, and give them the opportunity of carrying on large business transactions.

With regard to the important question of the International Section of the Exhibition, above alluded to, the General Commission have intrusted a Special Committee with the management of the affairs of this section.

This Special Committee will consider it their duty to secure the success of the Special Exhibition in every possible manner, and to facilitate to the utmost the representation of exhibitors at the Exhibition.

The printed Rules, Regulations, Communications, &c., &c., of the Special Committee will, on demand, be forwarded; and may also be obtained from agencies appointed in the more important cities, as well as at all the Austro-Hungarian Consulates.

Issued at the Meeting of the General Commission of the General National Exhibition 1885, held at Budapest on the 16th of August 1883.

MATLEKOVITS, *President.*

COUNT EUGEN ZICHY, *Second President.*

The Members of the abovenamed Special Committee to be as follows:—

PRESIDENT.

COUNT EUGEN ZICHY, *Second President of General Commission.*

VICE-PRESIDENT.

DR. NIKOLAUS V. SZVETENAY, *Royal Counsellor, Member of G. C.*

SECRETARY.

JOHANNES JÓNÁS, *Draftsman of the Chamber of Commerce.*
EDMUND MIKLÓS, *Director of the Budapest Elevators.*

MEMBERS.

EMIL ASBÓTH, *Professor of the Royal Joseph Polytechnic in Budapest.*
KARL HEGEDÜS, *Director of the National School of Industry.*
DR. KARL HERICH, *Counsellor of Section in the Ministry of Agriculture, Commerce and Industry.*
LADISLAUS LÁNG, *Machine Manufacturer, Budapest.*
DESIDER NAGY, *Professor of the R. Joseph Polytechnic in Budapest.*
AUGUST PILCH, *Professor of the R. Joseph Polytechnic in Budapest.*
BELA SCHLICK, *Director of the Schlick Iron Foundry, Budapest.*
ADOLF TÓRÓCZY, *Director of the Custom House in Budapest.*
STEFAN VERDERBER, *Sub-Director of the Royal State Railway.*
F. H. ZIFFER, *Director of the Hungarian Spinning Company.*
KARL ZIPERNOVSKY, *Director of the Ganz Electrotechnic Manufactory, Budapest.*

The address of the Office of the Special Committee is Budapest, Hungary, IV., Maria Valeria U. 12, II. em.

International Section (III. Special Exhibition) for Motors, Working Machines, and Tools for Artisans; as well as for Agricultural Machines of the latest and most improved constructions, and also for important Patented Inventions and Improvements.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 17th March 1884.

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASONS AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th MARCH 1884.

GENERAL REMARKS.—Except in Ganjam, no rain is reported from the Madras and Bombay Presidencies. Slight showers fell in some districts of Bengal and the North-Western Provinces, though more rain is much wanted in Bengal for the cultivation of early crops, and in Gauhati for *ahu* cultivation.

The standing crops are on the whole fair in the Madras Presidency, and the harvest yield is expected to be an average one. The *rabi* harvest is nearly completed in several districts of the Bombay Presidency. It is in progress in other parts of it, as also in Bengal, the North-Western Provinces, and in Berar, and gives promise of a fair outturn.

Small-pox is reported from many districts of Madras, Bombay, the North-Western Provinces, Bengal, and Burma, but the public health is otherwise on the whole good.

Prices are steady in the North-Western Provinces and Bengal, though they continue high in the latter Province.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Mar. 19th)—		
Bellary		Standing crops poor, owing to short rainfall and disease; harvest—sugarcane, yield average; *cholum* and cotton below average.
Kurnool		Standing crops fair; harvest—*cholum* and cotton, yield below average; small-pox in two taluks; cattle-disease in six.
Ganjam	Average ·02	Small-pox slightly prevalent, except in one taluk.
Kistna		Standing crops generally good; harvest—*ragagu* and horse-gram, yield below average; fever and small-pox prevalent; cattle-disease in places; 9 deaths from cholera in two taluks.
Chingleput (Madras)		Standing crops generally good; harvest—paddy, yield below average; small-pox prevalent; cholera abating, 11 deaths.
Coimbatore		Standing crops generally good; harvest—paddy, yield average; dry grains about average; fever and small-pox in parts; 22 deaths from cholera.
Tanjore		Standing crops generally good, but suffering from want of rain in one taluk; harvest—paddy, dry grains, and pulse, yield below average; cholera abating, 62 deaths.
Madura		Standing crops fair, except in two taluks; harvest—paddy, yield average; small-pox prevalent in parts; 35 deaths from cholera.
Malabar		Third crop paddy cultivation progressing in two taluks; small-pox and fever slight; 11 deaths from cholera.
Travancore		Cultivation not commenced; one death from small-pox at Trivandrum.
		General Remarks.—General prospects good.
Bombay—(Mar. 19th)—		
Kurrachee		Weather sultry; river at Kotri on 15th, 3 feet 6 inches against 2 feet 9 inches on same date last year; fever generally prevalent; cattle-disease in five talukas; loss of 27 buffaloes and 18 cows and bullocks in Mirpur Batoro and Tatta; 6 fresh cases of small-pox in Kurrachee since 8th, no death; disease also in 26 villages in district, 26 fresh cases, 2 deaths, 52 remaining sick; prices—wheat, red rice, and *bajri* in Kurrachee 24, 30 and 32; in Schwan 32 and 36; in Sakro 16, 28 and 36; and in Mirpur Batoro 22, 34 and 32 lbs. per rupee, respectively.
Hyderabad		Wheat attacked by mildew in Sakrand; river at Kotri on 14th, 3 feet 5 inches against 2 feet 9 inches on same date last year; small-pox continues in 11 talukas, fever in 4, and cattle-disease in 7 talukas; wheat 26½, *jowari* 37½, *bajri* 34, red rice 26, and white rice 21lbs. per rupee.
Ahmedabad		Cotton-picking and reaping of *rabi* crops continue; slight fever in Sanand; small-pox in Dhrangadra; wheat 26 and *bajri* 30 lbs. per rupee.
Baroda		Public health fair; small-pox has made its appearance in Kheratu and Visnagar Mahals in Kadi division; harvesting of *rabi* commenced in some parts of Amreli division; cotton-picking in progress; prices—*bajri* 31 to 32 and rice 24 to 25 lbs. per British rupee.
Surat		*Rabi* harvest commenced in places; slight fever in Bulsar and Pardi; *jowari* 36 and *nagli* 42 lbs. per rupee.
Nasik		Reaping of *rabi* crops nearly completed; public health generally good; small-pox in parts of Nasik, Chandor, Malegaon, and Kalwan talukas; *bajri* 28, wheat 31½, and rice 24 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay)		Abnormal temperature 3° to 0° warm; abnormal wind southerly and moist on 12th.
Poona		Reaping of *rabi* nearly completed; slight small-pox in five talukas; prices—*bajri* 35 and *jowari* 37 lbs. per rupee; in Poona *bajri* 32 and *jowari* 35 lbs.
Ahmednagar		*Bajri*—maximum 48 lbs. per rupee in Jamkhed, minimum 36 lbs. in Shrigonda; *jowari*—maximum 60 lbs. in Songamner, minimum 35 lbs. in Karjat.
Sholapore		Reaping of *rabi* crops almost completed throughout district; *jowari* 39 and *bajri* 41 lbs. per rupee.
Dharwar		Harvesting of wheat nearly completed; cotton-picking in progress; small-pox in 7, fever in 2, and cattle-disease in 5 talukas; scarcity of drinking-water in some villages of Navalgund and Gadag talukas; rice 29 to 40 and *jowari* 52 to 79 lbs. per rupee.
Kanara		Second crop rice plants healthy; small-pox prevalent in district; 26 deaths in Kumpta, 8 in Honore, and 1 in Supa; cattle-disease and fever in Supa and Sirsi; common rice in Karwar 14¾ seers per rupee: in district average 16 seers.
Rajkot		General health good; weather hot; small-pox still prevalent; *bajri*, 31 and *jowari* 39lbs. per rupee.
		General Remarks.—*Rabi* reaping nearly completed in Nasik, Poona, Sholapur, Satara, and Kaladgi, in progress in other districts; wheat crop attacked by mildew in parts of Hyderabad; scarcity of drinking water in two talukas of Dharwar and one of Kaladgi; cholera in parts of Broach, Tanna, Colaba, and Kaladgi; small-pox in many districts; fever and cattle-disease in several.
Bengal (Mar. 18th)—		
Chittagong	1·64	Weather alternately cloudy and fair; prospects of standing crops good; cow-pox still reported; prices stationary; general health good.
Dacca	1·7	Gathering of pulses continues; prospects of crops and public health good.
24-Pergunnahs	*Nil*	Gathering and storing of grains finished; price of common rice stationary; public health generally good, though isolated cases of cholera reported from Barrakpore sub-division.
Moorshedabad	*Nil*	Weather hot with strong westerly winds during first part of the week harvesting of wheat, barley, and gram going on; *boro* paddy being transplanted in the Kandi sub-division; except a few cases of cholera and small-pox, public health good on the whole.
Rajshahye		Weather hot; *rabi* being harvested with good outturn; public health fair.
Burdwan (Sudder)	0·2	Outturn of *rabi* crops all round four annas only; health generally good.
Culna	0·19	
Rungpore	0·01	No fresh case of small-pox; prospects of crops continue good; prices of food-grains stationary; rain much wanted; public health good.
Bhagulpore	*Nil*	Peas, linseed, and *khesari* being cut; wheat, barley, and other *rabi* crops ripening fast; rice 13 seers 4 chittacks per rupee; prospects of crops not good; a case of small-pox reported.
Purneah	*Nil*	Weather—hot days and cold nights; prospects of crops fair, but rain urgently wanted for paddy sowings; common rice 14 seers per rupee; public health good.
Patna	*Nil*	Prospects of *rabi* crops generally fair; harvesting of mustard and peas going on; fever and small-pox prevalent.
Durbhanga		Weather seasonable; wheat, barley, mustard, and peas being harvested; fields being prepared for sowing *mung* and *cheena*; prices high, but stationary; small-pox still prevalent in the sudder station.
Hazaribagh	*Nil*	Weather clear and getting warmer daily; cutting of *rabi* crops continues; prospects of mango and *mohua* crops good; prices continue high; small-pox reported from several thanas of the Giridi sub-division; cattle-disease reported from some thanas; general health good.
Cuttack		A few drops of rain; weather warm and cloudy; land being ploughed; wheat being reaped; estate of *dalua* rice and other miscellaneous crops good; no change in the price of rice; public health good.
		General Remarks.—Slight rain fell in some of the reporting districts during the week; rain is generally much wanted for cultivation of early crops; in Bankura it is said that want of drinking-water is much felt; harvesting of *rabi* crops and sugarcane is still proceeding in some districts; prices are generally stationary, but high; there is small-pox reported from many districts, but it is prevalent in Howrah, Patna, and Sarun; cow-pox has appeared in Bogra, and it is still reported from Chittagong; cholera has made its appearance in several parts of Bengal Proper.
N. W. Provinces and Oudh—		
Benares (Mar. 18th)	*Nil*	Weather hotter; barley and wheat cut; estimated outturn 11 annas small-pox increasing in the city; prices falling.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W.P. & Oudh—*contd.*		
Allahabad (Mar. 19th)	. . . . .	Heat increasing rapidly with strong west wind; *rabi* harvest in progress; health good; prices stationary.
Gorakhpur („ 16th)	. . . . .	Small-pox and measles still prevalent; *rabi* reaping in progress; outturn below average; prices rising.
Jhansi . („ 17th)	. . . . .	*Rabi* crops mostly ripe; harvesting commenced; prices stationary; health of people good; slight cattle-disease in pargana Jhansi.
Agra . („ 18th)	Very slight shower on 15th.	Irrigation continues; gram and barley being cut; fever in three and small-pox in four parganas; prices steady.
Bareilly . („ „)	. . . . .	Windy days; crops slightly withered in consequence; market steady; health good.
Meerut . („ „)	. . . . .	No change; weather getting hotter; high west wind; occasionally cloudy; prices half a seer easier.
Kumaun . („ „)	Rain on 14th and 15th	Ploughing for *kharif* in progress; health fair, a few deaths from typhus; cattle-disease continues; prices stationary.
Lucknow („ 20th)	*Nil*	Strong winds; some of the new *rabi* grain is in market; *sawan* and sugarcane are being sown; condition of people and cattle good; markets well supplied; prices steady.
Partabgarh („ 18th)	. . . . .	*Rabi* crops being cut; *sawan* sowings going on; small-pox very prevalent.
Sitapur („ „)	·03 at Sadr only	The outturn especially in Sitapur tahsils will be indifferent; prices steady; small-pox on increase in Sitapur tashil, also in Biswan and Misrikh.
Fyzabad („ „)	*Nil*	Sky often cloudy; *rabi* crops are everywhere ripe; harvesting commenced; condition of people normal and of cattle good
Rai Bareilly („ 17th)	. . . . .	Weather often cloudy; strong winds; harvesting of *rabi* crops has commenced; small-pox continues; supplies abundant; prices steady.
Cawnpore („ 18th)	·03 in Rasulabad pargana on 15th, and slight drizzling in two other parganas.	Harvest proceeding, and sugarcane and extra crops being sown; health of people good, but small-pox still lingers.
Farukhabad („ „)	. . . . .	Barley and peas being cut; wheat nearly ripe; prospects fair.
		General Remarks.—Slight showers have fallen in several districts, and there was rain on two days in Kumaun; the *rabi* harvest is progressing, and prospects are fair in most districts; but in Saharunpur half the unirrigated crop is reported lost; small-pox is still prevalent; fodder is scarce in Saharunpur and Moradabad, prices in general are steady or slightly fluctuating.
Punjab	. . . . .	No report received.
Central Provinces	. . . .	Ditto.
British Burma— (15th March)—		
Akyab	. . . . .	Public and cattle health good; estimated outturn of paddy 20,699,935 baskets, of which 4,768,250 have been sold to date; price Rs. 25 to 30 per 100 baskets; Akyab basket is one-half of Rangoon basket.
Kyoukphyu (Mar. 8th)	. . . . .	Public and cattle health good; large supplies of paddy coming into market; price Rs. 20 per 200 baskets.
Ditto („ 15th)	. . . . .	Same as last week, but paddy at Rs. 18.
Rangoon	. . . . .	Seventy-nine deaths from small-pox; price of paddy Rs. 82 and 85 per 100 baskets.
Sandoway	. . . . .	Public health good; weather warm; price of paddy Rs. 60 to 70 per 100 baskets.
Hanthawaddy . . .	. . . . .	Public health and health of cattle good; price of paddy Rs. 75 to 85 per 100 baskets.
Bassein . (Mar. 8th)	. . . . .	Seven deaths from cholera and 6 deaths from small-pox; price of paddy Rs. 70 to 80 per 100 baskets.
Ditto . („ 15th)	. . . . .	Twenty-seven deaths from cholera, 8 from small-pox, and 75 deaths of cattle reported; price of paddy Rs. 75 to 80 per 100 baskets.
Pegu	. . . . .	Small-pox continues in Pegu town to a limited extent; cattle healthy price of paddy Rs. 75 to 83 per 100 baskets; cultivators unwilling to sell at these rates.
Prome	. . . . .	Four deaths from small-pox in town; cattle healthy; estimated outturn of paddy 7,834,000 baskets, of which 979,200 baskets have been sold to date at Rs. 80 per 100 baskets.
Tharrawaddy . . .	. . . . .	Eleven cases of small-pox reported from 3 townships; 15 deaths of cattle reported in Gyobingouk township; 984,753 baskets of paddy sold to date; price of paddy Rs. 75 to 83 per 100 baskets.
Amherst (Moulmein)	. . . . .	Nineteen deaths from small-pox and one from cholera reported; price of paddy increased 5 per cent.; report from Moulmein town not received.
Shwegyin . . .	. . . . .	Small-pox reported from some villages; price of paddy Rs. 70 to 75 per 100 baskets.
Toungoo . . .	. . . . .	Public health good; price of paddy Rs. 70 per 100 baskets.
Tavoy	. . . . .	Small-pox prevalent in town and in central and western townships; 220,000 baskets of paddy sold to date; price Rs. 55 to 59 per 100 baskets.
Thonegwa . . .	. . . . .	Thirteen deaths from cholera; price of paddy Rs. 85 per 100 baskets.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burmah—*contd.*		
Henzada . . .	. . . .	Nine deaths from small-pox in town; 63,000 baskets of paddy sold during week.
Thayetmyo . . .	. . . .	Two cases of small-pox in town; cattle-disease still prevalent on western side; not enough paddy cropped for local consumption; people importing grain from other districts; price of paddy Rs. 70 to 90 per 100 baskets.
Mergui . . .	. . . .	Report not received.
		General Remarks.—Small-pox prevalent, except in Arrakan; cholera reported in Bassein, Thonegwa, and Amherst; some cattle-disease in Thayetmyo and Shweygyin.
Assam—(Mar. 19th)—		
Gauhati . . .	*Nil*	Weather getting hot; windy days; rain much wanted for *ahu* cultivation; cholera prevalent in portions of the district.
Sylhet . . .	1·16	State and prospects of crops good; cattle-disease reported from South Sylhet, and cholera from South Sylhet and Habiganj; small-pox still prevalent in some parts of the district.
Cachar . . .	5·0	Weather rainy for the first four days; a very severe storm with hail on the night of the 15th; severe damage to some tea-gardens; common rice 14¼ seers per rupee; eleven deaths reported from small-pox.
Dibrugarh . . .	2·55	Prospects of crops good; public health good.
Mysore and Coorg . .	. . . .	No report received.
Berar & Hyderabad— (Mar. 19th)—		
Amraoti . . .	. . . .	Weather hot; *rabi* harvesting in progress; wheat 16 and *jowari* 26 seers per rupee.
Akola . . .	. . . .	*Rabi* crops are being harvested; prospects good.
Central India States .	. . . .	No report received.
Rajputana . . .	. . . .	Ditto.

* Passed down to supplement the Agra Canal supply.

Executive Engineer, Northern Division, Ganges Canal, reports that the division was heavily tatiled during the month on account of low supply in the canal; second and third waterings of rabi and paleo for the next sugar crop was done. There was no improvement in river supply.

Executive Engineer, Meerut Division, Ganges Canal, reports that there was a very heavy demand for water during the month of rabi crops. Only a small area of new irrigation was effected, as the supply was only sufficient to keep up the existing irrigation.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports that owing to the deficiency of water in the main canal no new irrigation could be attempted. Every effort was and is being made to complete the irrigation of that already done. The mean daily discharge of the distributaries in the division equals 477 cubic feet.

Executive Engineer, Aligarh Division, Ganges Canal, reports that the demand for water during the month was enormous, and great difficulty was experienced in meeting the demand with the small supply in the canal.

Executive Engineer, Narora Division, Lower Ganges Canal, reports that this estimate is probably 10 per cent. below the actuals, and that the supply was very short.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that there was a strong steady demand throughout the month, but unfortunately the supply available was very little over half the requirements. The increase as compared with last year is due entirely to the dry season, and would have been very much greater had more water been available.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports that the increase over the area irrigated in the corresponding month of previous year would probably have been greater but for the low supply in the river.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that the weather was cloudy, with a few light showers: owing to low supply for half the month little new irrigation was effected.

Executive Engineer, Eastern Jumna Canal, reports that the increase is entirely in wheat; no rain, westerly winds, very heavy demand, and an insufficient supply of water. The river sank below the zero of the Khara gauge. Unirrigated crops going off.

Executive Engineer, Agra Canal, reports that the supply was insufficient. Some outlying crops will be lost, but prospects of outturn are generally good.

Executive Engineer, Rohilkhand Canals, reports that no rainfall was recorded during the month. There was a steady demand for rabi second and third waterings and for first watering at the canal tails. There was a general demand for sugar paleo, especially towards the end of the month. About 2,500 acres have been watered for sugar. The supply being much below average, and rabi taking two and three waterings, the result is a smaller rabi area than last year.

Executive Engineer, Dun Canals, reports that there was slight rain at the beginning and end of the month, but not sufficient to reduce demand for canal water to any appreciable extent.

No remarks from the other divisions.

NOTE.—In addition to the above 1,712 acres of sugarcane (kharif) were irrigated by the Rohilkhand Canals.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

ALLAHABAD,
The 19th March 1884.

SIMLA,
The 7th April 1884.

R. A. SARGEAUNT, *Major, R.E.,*
Offg. Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9th APRIL 1884.

GENERAL REMARKS.—Rain has fallen heavily in Cachar and Sylhet and parts of Upper Assam, and in smaller quantities along the Malabar Coast. Slight showers have also occurred in parts of Bombay, Mysore, Central India and the Punjab, and at Dacca in Bengal, and Lucknow.

The standing crops in the Madras Presidency continue generally favourable, but the outturn of those recently harvested has for the most part been below the average. In Coorg rain is much needed for the coffee blossoms, and prospects are bad owing to low prices. In Bombay the harvesting of the *rabi* has been completed in several districts. A scarcity of drinking-water exists in parts of Dharwar and Kaladgi. In Hyderabad and Berar harvesting operations are still in progress, and in the Akola district preparations have commenced for the ensuing *kharif*. In Central India and Rajputana reaping is nearly over, and prospects are fair; but there is a scarcity of water in Marwar. In the Punjab the *rabi* harvest has begun in three districts. Prospects continue generally satisfactory, except in the south-eastern districts where the crops on unirrigated land have failed. In the North-Western Provinces and Ondh strong west winds have prevailed, and the weather has been unusually warm. A scarcity of water and fodder exists in some places. The *rabi* harvest is not yet over. In the Central Provinces the *rabi* is being threshed, and preparations for *kharif* ploughings are reported from one district.

Rain is much needed throughout Bengal for the cultivation in progress, and drinking-water is scarce in several districts. Dry west winds have prevailed and done much damage to silkworms and the mango crop. The *rabi* harvest is nearly over. In Assam the weather has been stormy and rainy. Cultivation is in progress, and prospects are satisfactory; but rain is needed in Gauhati, where none has fallen. In Burma the rice crop has been reaped and no agricultural operations are going on.

Cholera and small-pox continue prevalent in most provinces, particularly in Bengal. Small-pox has abated in Rangoon.

Prices are generally stationary.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Madras—(April 9th)		
Bellary (April 5th)	·03	Harvest sugarcane, yield average ; *cholam* and cotton below average.
Kurnool („ „)	.....	Standing crops fair; harvest cotton, yield about half. Fever in one taluka, Small-pox in four, and cattle-disease in six talukas.
Ganjam ...	.....	Small-pox slight in two talukas.
Kistna ...	.....	No report received.
Chingleput (Madras) ...	.....	Standing crops good. Harvest paddy, *cumbu*, and *cholum*, yield below average. Small-pox prevalent ; 3 deaths from cholera.
Coimbatore ...	.....	Standing crops generally good. Harvest paddy, yield average in 4 talukas, and below average in three. Fever and small-pox in parts ; 5 deaths from cholera.
Tanjore ...	.....	No report received.
Madura ...	.....	Standing crops fair, except in two taluks. Paddy harvested in 2 talukas, yield average. Small-pox prevalent in places ; 3 deaths from cholera.
Malabar ...	.....	No report received.
Travancore ...	1·06	Ploughing begun. Fever in Trevandram, and small-pox in other parts. *General Remarks.*—General prospects good.
Bombay—(April 9th)		
Karachi ...	No rain	River at Kotri on 6th 5 feet 7 inches against 2 feet 10 inches on same date last year. Fever in five talukas. Cattle disease in six talukas. Preparations for *kharif* going on. No fresh case of small-pox in Karachi since 23rd ; one death. Disease also in 19 villages in districts ; 72 fresh cases ; no deaths, 46 remaining sick. Prices—wheat, red rice and *bajri* in Karachi 24, 30, and 32, Dadu 36 and 40, Sakro 16, 28, and 36, and Sujawal 34 and 36 respectively.
Hyderabad ...	.....	Wheat harvest in progress. River at Kotri on 7th 5 feet 10 inches against 3 feet on same date last year. Weather warm. Small-pox in 10, fever in 3, and cattle disease in 4 talukas. Wheat 26, *bajri* 34½, *juari* 38, red rice 26, and white rice 20 pounds per rupee.
Ahmedabad ...	.....	Cotton picking and harvesting of *rabi* crops continue. Fever in Sanand, Parantij, and Viramgam ; small-pox in Dhobra, Modasa Viramgam, and Parantij. Wheat 27 and *bajri* 31 pounds.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	.....	Measles in Amreli and Baroda Divisions; chicken-pox in Navsari; cattle disease and small-pox in Kherralu. Harvesting of *rabi* and cotton picking continue. Prices—*bajri* 32 and rice 24 pounds.
Surat ...	.....	*Rabi* harvest progressing. Cholera in Surat and Pardi 22 cases, 13 deaths. *Juari* 36, and *nagli* 42 pounds.
Násik ...	.....	Reaping of *rabi* crops completed. Public health generally good Small-pox in parts of Nasik, Sinnar, Dindori and Kalvan talukas. Seven deaths from cholera in Nasik city during past fortnight. *Bajri* 31, wheat 34½, and rice 21.
Colaba (Bombay) ...	.....	Abnormal temperature 3 degrees warm to 1 degree cool: vapour in air excessive on 5th and 6th. Abnormal wind northerly on 2nd.
Poona ...	·60 on the 4th	Harvesting of *rabi* nearly completed. Small-pox in 6 talukas. Prices—*bajri* 34 and *juari* 35; in Poona *bajri* 29 and *juari* 28, pounds.
Ahmednagar ...	·59	Public health good. Reaping of *rabi* finished in parts; threshing in progress; *bajri* maximum 48 pounds in Sangamner, minimum 35 in Karjat; *juari* maximum 60 in Sangamner, minimum 24 in Karjat.
Sholapur ...	Slight rain in Barsi, Karmala and Sangola talukas.	Reaping operations completed. Weather hot. *Juari* 41 and *bajri* 42 pounds per rupee.
Dharwar ...	Slight rain in Dharwar, Gadag and Bankapore.	Harvesting of wheat almost over; cotton picking in progress. Small-pox in 9, fever in 1, and cattle disease in seven talukas. Cholera in a village of Navalgund, 2 fresh cases, 3 fatal. Scarcity of drinking water in some villages of Nawalgund, Gadag and Dharwar. Rice 29 to 40 and *juari* 55 to 79 pounds per rupee.
Kanara ...	1·11 in Sirsi.	Second crop rice plants ready for harvest on coast. Locusts from Karwar taluka have gone towards Supa. Small-pox continues; 33 deaths in Kumta and five in Sirsi; cattle disease and fever in four talukas. Rice common Karwar 13⅛; district average 15 seers per rupee. Weather hot and cloudy.
Rajkot ...	Slight shower of rain on 3rd.	General health good. Weather hot. Small-pox still prevalent in the province. *Bajri* 32 and *juari* 39 pounds per rupee.
		General Remarks.—Slight rain in most districts of the Deccan and Southern Maratha country, and in parts of the Upper Sind Frontier. *Rabi* reaping completed in Nasik, Sholapur, and parts of Ahmednagar. Scarcity of drinking water continues in three talukas of Dharwar and one of Kaladgi. Cholera in 8 districts; fever, small pox and cattle disease in some districts.
Bengal—(April 2nd)		
Chittagong ...	*Nil*	Weather seasonable. Prospects of crops good. Prices of food grains unchanged. Cattle disease prevails; cholera reported from Cox's Bazar, otherwise general health good.
Dacca ...	·05	Sowings of early rice, *til* and *jute*, going on. Prospects of crops continue favourable. Many cases of cholera in Harirampore.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of crops unchanged. Land is being prepared for the cultivation of *aus* and *amun* paddy. Prices of common rice stationary. Cholera and small-pox abating. Public health generally good.
Moorshedabad ...	*Nil*	Weather hot, with strong westerly winds. Rain much wanted for sowings of *boro* and *aus* paddy, and cultivation of sugarcane and mulberry; water has in many places to be brought from a distance. Cholera prevails in the town of Rangpore, and in Thannas Jellinghee and Mirzapore.
Rajshahye ...	*Nil*	Weather hot; rain sadly wanted for paddy sowings. Cholera reported from several police stations.
Burdwan ...	*Nil*	No crops of importance on the ground; *rabi* outturn four annas. Rain wanted for sugarcane and *til*.
Rungpore ...	*Nil*	Weather hot. Wheat and pulses being harvested; cultivation of *aus* paddy in some places collected; prospects of crops continue good. Prices of food grains stationary. Thermic diarrhœa has appeared in the town.
Bhagálpur ...	*Nil*	*Rabi* harvest almost completed; *cheena*, the only standing crop, flourishing well; the *mung* and *rabi* sown in low lands in the north does not promise well. Rice thirteen seers and fourteen chattacks per rupee.
Purneah ...	*Nil*	*Rabi* yield fair in the north, but bad in south. Sowings in great part delayed, but those in low lands have germinated. Rice 14 seers per rupee. Public health fair.
Patna ...	*Nil*	*Rabi* harvesting almost completed. Small-pox still reported from Behar and Sudder Sub-divisions.
Durbhunga ...	*Nil*	*Rabi* harvesting nearly completed. Rain urgently wanted for *mung*, *cheena*, indigo and paddy sowings. Price of rice rising, that of other grains stationary. Public health generally good.
Hazáribágh ...	*Nil*	Weather clear and hot. Falling of *mohwa* flowers continue; mango promises well; *rabi* harvest over. Preparations for next sowings continue. Small-pox still reported from the Giridi sub-divisions. Public health generally good.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	*Nil*	Weather hot. *Dalna* ripening, in some places being cut. Ploughing progressing. Common rice selling at from 18 to 24 seers in town, and 22 to 30 seers in interior. Public health good.
		General Remarks.—There was no rain throughout the province, except a nominal fall at Dacca, which is one of the reporting districts, and a slight shower in Mymensing. Rain is very much wanted for cultivation everywhere, and in many districts for drinking purposes also; *rabi* harvest nearly completed everywhere. *Dalna* paddy in Orissa ripening, and in some places harvesting commenced. *Mohwa* flowers in Chota Nagpore continue to fall. Prices of food grains generally stationary. The dry, scorching heat of the west wind has killed about five-eighths of the mulberry silk worms, and has destroyed about seven-eighths of the mango crop in Maldah Cholera and small-pox prevalent in almost every district of Bengal proper; cholera is still bad at Sara in Patna, and Harrirampore in Dacca.
N. W. Provinces and Oudh—		
Benares (April 9th)	No rain ...	Weather hot. Bazars well supplied. Prices stationary. Small-pox continues in the city, and some cases of cholera are reported.
Allahabad ...	.....	Hot weather set in. *Rabi* harvesting nearly completed. Prices slightly rising. Water scarce in places. Small-pox of mild type prevails, otherwise district healthy.
Gorakhpur ...	No rain ...	High winds. Harvest up to expectation. Small-pox prevalent. Prices slightly falling.
Jhansi ...	„ ...	Harvesting of *rabi* nearly over. Prices stationery. Health of people and cattle good.
Agra ...	„ ...	Harvest in progress. Fever and small pox abating. Prices steady.
Bareilly ...	.....	Harvest progressing. Prices of *bajra* and *juar* rising. Health generally good. Weather very windy and hot.
Meerut ...	No rain ...	High west wind, nights cool. Harvest half finished. Health good. Fodder scarce. Prices easier.
Kumaon	„ ...	Prices stationary. General health good. Typhus cases decreasing; cattle disease continues.
Lucknow ...	Slight showers on the morning of the 7th in Thasils Lucknow and Mohunlalgunge.	Threshing and winnowing in progress; outturn fair; markets well supplied. Prices almost stationary. Condition of people fair. Condition of cattle good.
Partabgarh ...	.....	Prices steady. Harvesting nearly completed. Small-pox very bad.
Sitapur ...	No rain.	Strong westerly wind during the week. Scarcity of fodder reported. Markets freely supplied. Prices steady.
Fyzabad ...	„	Weather growing hotter; strong west wind continues. Sugarcane being planted. Small-pox still continues. Prices steady. No cattle disease.
Rae Bareli ...	.....	Weather hot; strong west wind continues. Harvest proceeding. Supplies abundant. Prices stationary. Small-pox continues.
Cawnpore ...	.....	Weather clear and warm. *Rabi* nearly all cut, and sugarcane being sown. Health of people and cattle good. Prices steady.
Farukhabad ...	.....	West wind blowing. Harvest nearly over. Prices stationary. No cattle disease. Health of people fair.
		General Remarks.—Slight rain fell in Lucknow. The weather is still very hot, with strong west winds. The harvest is in progress. Markets are well stocked, and prices generally are stationary. Scarcity of fodder is reported from some places, and there is also a little cattle disease. Small-pox is still prevalent in places, but the general health is good.
Punjab—		
Delhi (April 9th)	.....	Small-pox continues. Reaping commenced. Prices also are stationary.
Hissar („ „)	.....	Health good. *Rabi* crops being harvested. Canal yield poor, and *barani* almost nil. Prices slightly rising.
Umballa („ „)	.....	Health good. *Rabi* crops suffering. Prospects below average. Prices stationary.
Jullundur („ „)	.....	Health good. *Rabi* harvesting commenced. Cotton sowings continue Prices steady.
Amritsar („ „)	.....	Health good. Prices fluctuating.
Sialkot („ „)	.....	Health and crop prospects good. Prices stationary.
Ferozepore („ „)	.....	Health good. State of crops good, except at those places where crops were damaged by hailstorm. Prices stationary.
Lahore („ „)	Slight rain ...	Health and crop prospects good. Prices falling.
Rawalpindi („ „)	·3 ...	Health and *rabi* prospects good. Prices fluctuating.
Mooltan ...	Drizzle at Sadr ...	Health and condition of crops good. Prices fluctuating.
Peshawar ...	·8 ...	Health and *rabi* crops good. Prices stationary.
		General Remarks.—Slight rain in one or two districts. Health generally good. Crop prospects also generally good, except in the south-east. Harvesting has commenced in the Delhi, Hissar, and Jullunder districts.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Central Provinces—		
Nagpur (April 9th)	.....	Weather clear and hot. Prospects good. *Rabi* harvest completed. Public health good. Cattle disease prevails in Nagpur and Umrer. Prices steady.
Jubbulpore („ „)	.....	Weather cloudy and close. Reaping and threshing in progress. Health good. Wheat 26 and rice 12 seers per rupee.
Saugor („ 8th)	.....	Weather cloudy and hot. *Rabi* harvest nearly completed; threshing in progress. Health good. Prices steady.
Seoni („ 9th)	.....	Heat increasing. Threshing in progress. Prices stationary.
Hoshangabad („ „)	.....	Weather seasonable and occasionally cloudy. Winnowing in progress. Fever prevalent; small-pox 9 cases, 1 death. Wheat 22, and *juari* 30 seers per rupee.
Khandwa („ „)	.....	Weather warm, night cool. Reaping continues. Preparations for *kharif* ploughing in progress. 21 cases of cholera, 10 deaths. Prices steady; *juari* 22½ seers per rupee.
Central Provinces— *contd.*		
Raipur (April 9th)	.....	Weather hot, nights cool. *Rabi* crops almost gathered in; threshing of wheat and gram commenced. Small-pox in Drug. Rice 25 and wheat 26 seers per rupee.
Sambalpur („ „)	.....	Weather warm and cloudy, nights cool. Prospects good. Public health good. Common rice 29 seers per rupee.
		General Remarks.—Prospects good; threshing and winnowing in progress. Cholera continues in Khandwa.
British Burma— **(April 5th)**		
Akyab ...	.....	Public health good; 3 deaths of cattle. Price of paddy Rs. 23 to 30 per 100 baskets.
Rangoon ...	.....	Thirteen deaths from small-pox. Price of paddy Rs. 95 to 100 per 100 baskets.
Bassein ...	.....	Fifteen deaths from cholera and five from small-pox; 53 deaths of cattle. Price of paddy Rs. 85 to 90 per 100 baskets.
Amherst (Moulmein) ...	.....	Ten deaths from small-pox; all deaths not reported. Disease prevalent; 24 deaths of cattle. Price of paddy increased 5 per cent. In Moulmein town only a few cases of small-pox. Price of paddy Rs. 95 per 100 baskets.
Toungoo ...	.....	Public health good. Price of paddy Rs. 70 per 100 baskets.
Kyoukphyoo ...	.....	Public and cattle health good. *No change* in price of paddy.
Sandoway ...	.....	Public and cattle health good. Weather warm.
Hanthawaddy ...	.....	Public health good; Slight mortality among cattle in Hmawbi township. Price of paddy Rs. 80 to 90 per 100 baskets.
Pegu ...	.....	Report not received.
Tharrawaddy ...	.....	One death from small-pox; 46 deaths of cattle. Price of paddy Rs. 80 to 96 per 100 baskets.
Prome ...	.....	Two deaths from cholera, and one from small-pox in town; cattle healthy. Price of paddy Rs. 80 per 100 baskets.
Thonegwa ...	.....	Twenty-four deaths from cholera, and 12 deaths from small-pox; 7 deaths of cattle. Price of paddy Rs. 80 to 85 per 100 baskets.
Henzada ...	.....	Six deaths out of 49 cases of small-pox in town; 3 deaths in Kyangin. Price of paddy Rs. 85 to 98 per 100 baskets.
Thayetmyo ...	.....	Eight deaths from small-pox; 36 deaths of cattle. Price of paddy Rs. 80 to 95 per 100 baskets.
Shwaygyin ...	.....	Twelve cases of small-pox in town, and a few others all over the district; cattle healthy. Paddy at Rs. 70 to 75 per 100 baskets.
Tavoy ...	.....	Report not received.
Mergui (March 22nd & 29th)	.....	Public and cattle health good.
		General Remarks.—Small-pox still prevalent over the province, but abated considerably in Rangoon. Cholera in Bassein and Thongwa; cattle in good health. Price of paddy keeping steadily up.
Assam—		
Gauhati (April 9th)...	*Nil*	Weather dry and hot, but mornings and evenings continue cool High winds commencing about noon, and approaching in afternoon to a gale blowing during the week; rain wanted for agricultural operations. Cases of small-pox reported from Shastra and Barpetta. Ploughing operations for the *aus* in progress. Cholera reported in some mouzahs of the district.
Sylhet („ „)	2·77	State and prospects of crops good. Cholera and small-pox still prevalent.
Cachar („ „)	3·44	Weather rainy nightly; severe storms at times, accompanied by very large hail stones. Ploughing for *dumahi* and *mirali* crops commenced in some parts of the district. Common rice 16 seers per rupee. 24 deaths from cholera, and 20 from small-pox reported.
Dibrugarh („ „)	4·02	Public health fair.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Mysore and Coorg— **(April 9th)**		
Bangalore ...	Slight rain yesterday.	
Mysore ...	·25	Weather seasonable. Crops in good condition. Prospects favourable. Small-pox prevalent in parts; public health otherwise good. Prices stationary.
Mercara ...	·04	Notwithstanding the large crop sent to market coffee prospects are very dismal owing to fall in price by one-third. Rain much needed. Expected blossom has suffered in parts of the country from want of showers. Prices stationary.

PUBLIC WORKS [illegible]

IRRIGATION BRANCH.

IRRIGATION OPERATIONS OF THE NORTH-WESTERN PROVINCES FOR THE KHARIF SEASON 1883-84.

No. 488I., dated 22nd February 1884.

RESOLUTION—By the Government of the North-Western Provinces and Oudh.

Read—

Statements A., B., and C. 18, showing irrigation operations, for kharif 1883-84, of canals in the North-Western Provinces.

OBSERVATIONS.—The kharif season of 1883-84 (from 1st April to 30th September 1883) began unfavourably. [illegible] irrigation, as the rainfall in January and March [illegible] to be carried out without canal water, and the late rabi threw back the indigo sowings. In June the demand for water was on the increase till the latter portion of the month, when the monsoon broke generally. During July the demand for water on the Eastern Jumna Canal was heavy, and failure of rain in August created a general demand.

2. The returns show a satisfactory increase in irrigated area of 86,837 acres over last year's totals, which were the highest then on record. The increase in assessments, however, amounts to R8,731 only, as the increase under acreage is chiefly on account of 4th class crops, which pay the lowest water-rate.

3. Table I shows the areas of the principal crops for the past four years :—

TABLE I.

	1880.	1881.	1882.	1883.
	Acres.	Acres.	Acres.	Acres.
Sugarcane	135,292	164,569	197,978	154,725
Rice	135,570	101,755	96,357	106,443
Bájra and juár	43,266	4,141	5,104	35,770
Maize	89,274	22,376	33,411	89,101
Other food-grains	9,207	6,887	5,982	13,399
Fodder crops	7,924	4,554	9,930	18,885
Fibres	63,680	63,247	49,722	88,395
Dyes	194,983	319,992	316,872	294,408
Miscellaneous	20,943	18,504	24,354	24,621
TOTAL	700,139	706,025	739,410	825,747

There is a falling off of 43,253 acres in sugarcane owing to the market being overstocked from the plentiful supply of the previous year. The falling off in indigo, 22,464 acres, is due to the late rabi, which prevented more extensive sowings. The defect under these two staple kharíf crops has been made up by the large increase under cotton, rice, maize, bájra, and other inferior grains. This was the result of the deficiency of rain towards the end of the season when cultivators, to save their crops, were compelled to take canal water.

4. Table II compares by canals the irrigated areas for the two years 1882 and 1883 :—

TABLE II.

CANALS.	1882.	1883.	More.	Less.
	Acres.	Acres.	Acres.	Acres.
Upper Ganges	335,570	384,118	48,548	
Lower Ganges	199,115	203,677	4,562	
Agra	52,263	73,436	21,173	
Eastern Jumna	112,483	117,958	5,475	
Rohilkhand	32,663	39,333	6,670	
Dún	5,520	5,293		227
Bijnor	1,678	1,707	29	
Hamírpur Lakes	76	170	94	
Jhánsi Lakes	42	55	13	
TOTAL	739,410	825,747	86,564	227

There is again a large increase on the Upper Ganges Canal, which is fairly distributed over all divisions excluding the Northern, which has almost the same area as in the previous year. The Lower Ganges Canal shows a small increase of 4,564 acres. This practically represents the advance of the new divisions, as the increase in the Etáwah Division is met by a decrease in the Cawnpore Division.

The prospects of the Agra Canal appear to be decidedly improving.

The increase on the Eastern Jumna Canal is principally under maize and cotton.

On the Rohilkhand Canals the great increase under rice makes up for the decrease under sugarcane and other crops.

5. Table III gives the assessments on account of occupiers' rate for the last four years :—

TABLE III.

	1880-81.	1881-82.	1882-83.	1883-84.
	₹	₹	₹	₹
Upper Ganges	9,09,785	9,69,853	11,01,884	11,11,826
Lower Ganges	4,15,906	4,92,948	5,11,884	4,89,448
Agra	98,055	1,68,898	1,57,621	1,97,823
Eastern Jumna	3,99,757	4,29,219	4,55,995	4,38,560
Rohilkhand	46,857	33,527	32,800	32,174
Dún	17,115	15,752	16,839	15,302
Bijnor	4,781	5,378	3,019	3,760
Bundelkhand	479	131	116	628
TOTAL	18,92,735	21,15,706	22,80,290	22,89,021

The rate per acre, ₹2·77, is less than that of the previous year, when it was ₹3·08. This is due to the decrease in area under sugarcane, which is a 1st class crop.

6. On the whole, the steady extension of the irrigated area and the increase in the total sum of assessments, are signs of good management and careful departmental supervision.

ORDER.—Ordered, that copies of this Resolution be submitted to the Government of India; that it be circulated as usual to other Governments, and to Local Departments; and that it be published in the *Government Gazette, North-Western Provinces and Oudh.*

By order of the Hon'ble the Lieut.-Govr., N.-W. P., and Chief Commr. of Oudh.

J. G. FORBES, *Lt.-Col., R.E.,*
Joint-Secy. to Govt., N.-W. P. and Oudh,
P. W. D., I. B.

PUBLIC WORKS DEPARTMENT.

RAILWAY CONSTRUCTION.

COST OF CERTAIN METRE GAUGE RAILWAYS

No. 265 R. C., dated Simla, the 9th April 1884.
OBSERVATIONS—By the Government of India, P. W. Dept.

Read—

Tabulated Statement showing the cost of certain Metre Gauge Railways.

OBSERVATIONS.—This statement gives the mileage cost under the main heads of construction of 16 Metre Gauge Railways. In seven cases the figures give actual results for completed lines, some of which have been open for several years, *e.g.*, the Rajputana-Malwa Railway.

2. The figures are interesting as showing how the capital cost varies with the nature of the country traversed and the amount of traffic to be dealt with; the effect of the former appears chiefly under the head "Construction of line," and the effect of the latter comes mainly under "Rolling Stock."

A heavy traffic, however, also increases the outlay on permanent way, owing to the provision of the additional sidings and crossing stations required to work it. The cost of buildings and appliances in like manner depends to a great extent on the traffic to be accommodated.

3. The mileage cost of the Northern Bengal Railway, *viz.*, Rs. 78,260, is the heaviest of those for which actual expenditure has been given in the statement. **This is due to the large amount of waterway and the heavy banks on a large portion of the line; the fencing too is more complete than** that of other open lines.

The varying cost of the main head "Ballast and Permanent Way" is due partly to varying prices of rails, and partly to distance of the line from port where the material is landed.

The Cawnpore-Farakhabad Railway, on the other hand, has cost only Rs. 36,486 per mile, but this line runs through an extremely easy country, as may be judged from the small amount under "Construction of line." The provision of rolling stock, moreover, is sufficient only for a moderate traffic.

4. The Rajputana-Malwa Railway, having a length of 1,118 miles, naturally passes through a country of varying features, and having been at work for several years with a good traffic, may be taken as a fair representative of metre gauge lines. But owing to the large reduction in the price of iron and steel during the last few years, this line could now be built and equipped up to its present standard at a less cost than that shown in the statement.

5. It may be inferred from a study of the past, in connection with the present price of materials, that a metre gauge line fully equipped and complete in all essentials for a traffic equivalent to receipts varying from Rs. 100 to Rs. 200 a mile per week, can be constructed through a country of average configuration at a cost varying from Rs. 40,000 to Rs. 80,000 per mile.

ORDER.—Ordered, that these remarks and the tabulated statement be published in the Supplement to the *Gazette of India* for general information.

R. A. SARGEAUNT, Major, R. E.,
Offg. Under Secretary.

Accompaniment to P. W. D. No. 265 R. C. of the 9th April 1884.

Statement showing the actual and estimated mileage cost of Metre Gauge Railways in India under main heads, exclusive of cost of stores in stock and other suspense items.

Actual figures are for 31st March 1883.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	.....	Measles in Amreli town and in Baroda and Naosari divisions. Chicken-pox in Naosari and small-pox in Amreli division. Slight cholera in Vilaeiha taluka in Naosari division. One death is reported to have occurred in the city of Baroda. Harvesting of *rabi* crops and cotton picking in progress and completed in Amreli division. Prices *bajri* 32 to 33 and rice 23½ pounds per British rupee.
Surat ...	.....	*Rabi* harvest progressing. Cholera in Surat, 40 cases; 28 fatal. *Juari* 34 and *nagli* 45 pounds per rupee.
Násik ...	.....	Reaping of *rabi* crops completed. Public health generally good. Small-pox in parts of Sinnar, Dindori, and Kalvan talukas. No cattle-disease. Seven deaths from cholera in Násik taluka during the week. *Bajri* 31, wheat 34½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	.....	Temperature normal. Vapour in air normal. Abnormal wind southerly on 9th, northerly from 11th to 14th.
Poona ...	.....	Reaping of *rabi* completed. Prices *bajri* 33 and *juari* 34; in Poona *bajri* 28 and *juari* 26 pounds per rupee. Two fatal cholera cases in Haveli taluka.
Ahmednagar ...	.....	Public health good. Reaping of *rabi* finished, except at Parnar; threshing continues. *Bhajri*, maximum 48 pounds in Sangamher, minimum 35 in Nagar. *Jowari*—maximum 60 in Sangamner, minimum 35 in Karjat.
Sholapur ...	.....	Reaping of *rabi* crops completed throughout the district. Weather hot, with clouded sky. *Jowari* 43 and *bajri* 42 pounds per rupee.
Dharwar ...	.....	Weather cloudy. Harvesting of wheat completed, that of late *jowari* commenced. Cotton picking in progress. Fever in 3, cattle-disease in 5, and small-pox in 10 talukas. Cholera in a village of Nawalgand; no fresh cases. Scarcity of drinking water in some villages of Dharwar, Nawalgand and Gadag talukas. Rice 29 to 40 and *jowari* 52 to 79 pounds per rupee.
Kanara ...	.....	Second crop rice harvest commenced. Locusts in great numbers in Ankola taluka; measures taken to destroy them. Small-pox subsiding in Kumea, 5 deaths in Honore and 4 in Sirsi. Cattle disease and fever in Ankola and Yellapur taluka. Common rice in Karwar 13⅛, district average 15½ seers per rupee. Weather hot.
Rajkot ...	.....	General health good. Weather hot. Small-pox less prevalent in some parts. *Bajri* 31 and *jowari* 39 pounds per rupee.
		General Remarks.—Slight rain in parts of Upper Sind frontier. Scarcity of drinking water continues in 3 talukas of Dharwar. *Rabi* harvest completed in Nasik, Poona and Sholapur; in progress in other districts. Cholera in parts of nine districts. Small-pox in almost all districts. Fever and cattle-disease in a few.
Bengal—(April 16th)		
Chittagong ...	·46	Days hot, with south-westerly wind at intervals. Nights cool. Prospects of crops good. Prices of food-grains stationary. Cholera and cattle-disease continue.
Dacca ...	·47	Sowing of early paddy and jute going on. Prospects of crops continue favourable. Cholera still prevailing in Harirampore.
24-Pergunnahs (Calcutta)	.....	Lands being ploughed for *aus* and *amun* crops, but rain is urgently required in parts for the cultivation of these crops. Prices of common rice stationary. Public health generally good, though cholera and small-pox is reported from many parts, especially in the suburbs.
Moorshedabad ...	·29	Rain with hail fell on the 8th and 11th instant, slightly damaging mango. Rain hardly enough to soften the ground. More rain much wanted. *Boro* paddy in lowlands doing well. Cholera very bad in thanas Goas and Jellingee.
Rajshahye ...	Rajshaye, *nil*; Nattore, ·20; Nowgong, ·20.	Weather very hot. Rain is urgently wanted. Paddy sowings continue. *Boro* paddy in lowlands promises fair. Outturn of *cheena* good. Cholera general.
Burdwan ...	Raneegunge, ·35	No important crops on ground. Rain is urgently wanted.
Rungpore ...	1·15	Weather hot. Thermic diarrhœa still prevalent. Prospects of crops good. Prices of food-grains stationary.
Bhagalpur ...	*Nil*	*Cheena* only standing crop, promises well. *Mung* and paddy in low lands do not promise well. Rice 13 seers and 14 chittaks per rupee. Prospects of crops not good. Small-pox still prevalent, chiefly in Bhagalpur town.
Purneah ...	*Nil*	Mangoes dropping off. Paddy not germinating. Rain much wanted. Wheat fair in north, very poor in south. Common rice 14 seers per rupee. Public health fair.
Patna ...	*Nil*	*Rabi* harvest over. Rain wanted for *mung* and *cheena*. Few cases of cholera reported from Barrh and Patna city. Small-pox still very prevalent.
Durbhunga ...	*Nil*	*Rabi* harvest over. Agricultural operations stopped for want of rain. Price of rice rising. Public health fair.
Hazaribagh ...	*Nil*	Weather clear and hot. No crops on the ground. Prices of food-grains stationary. General health good.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	*Nil*	Weather fair, but excessively hot. *Dalua* ripening and in some places being cut. Ploughing progressing. Price of rice almost stationary. Cases of small-pox reported from Kendrapara. Public health otherwise good.
		General Remarks.—Rain fell in some districts and is still much wanted everywhere. No important crops on the ground. Mango crop considerably damaged for want of rain. *Mahua* is an excellent crop this year in Chota Nagpore. Cholera and small-pox still prevail, but the former is very bad in Goas and Jellinghee thanas in Moorshedabad and at Sara in Pubna. Prices of food-grains generally stationary, but price of rice rising in Durbhunga.
N. W. Provinces and Oudh—**(April 16th)**		
Benares (April 15th)	No rain ...	Hot wind blowing. Sugarcane being planted. Prices stationary. Small-pox and cholera in places in the city.
Allahabad („ 16th)	.....	Hot weather fairly set in. *Rabi* harvest completed. Winnowing and threshing in progress. Melons in market. Sugarcane fields being irrigated. Prices slightly falling. General health good. Cattle generally healthy, but water and fodder scarce.
Gorakhpur („ 13th)	No rain ...	High westerly wind blowing. Harvesting nearly finished; outturn up to expectation. Prices rising.
Jhansi („ 14th)	.....	Weather growing hotter. *Rabi* harvest completed. Prices nearly stationary. Bazaars well supplied. A slight outbreak of small-pox in Jhansi pargana only. Cattle-disease has nearly disappeared. Measures for relief not needed, but want of water for drinking felt in some places.
Agra („ 15th)	No rain ...	Harvest progressing. Prices stationary. Fever and small-pox abating. Slight sporadic cholera in the city.
Bareilly („ „)	.....	Strong west wind blowing. Crops cut. Market steady. Health generally good.
Meerut („ „)	A thunderstorm on the 13th; ·20 rain in Baghput and a drizzle in Sirdhana and Meerut.	Harvest approaching completion early this year. Fresh fodder available. Prices as last week. Health good.
Kumaon („ „)	No rain ...	At times weather cloudy. *Rabi* prospects poor. *Kharif* sowing progressing. Prices stationary. A few cases of typhus and small-pox prevalent. Cattle-disease continues.
Lucknow („ „)	.....	Strong wind blowing and dust throughout the week. Threshing and winnowing in progress, outturn good. Prices slightly falling. Market well stocked. Condition of people normal. Condition of cattle good.
Partabgarh („ „)	.....	Hot west winds blowing. Threshing operations in full swing. *Sawan* ripening. Prices fairly stationary. Small-pox very prevalent.
Sitapur („ 16th)	.....	Strong westerly wind blew during the greater part of the week. The outturn of most grains said to be greatly below average, but prices keep steady.
Fyzabad („ 15th)	No rain.	Strong west wind continues. Weather hot. Threshing and winnowing in progress, outturn fair. Bazaars well supplied. Prices stationary. Small-pox in parts of district.
Rae Bareli („ 14th)	.....	Weather getting hotter. Scarcity of water in wells reported. Cutting of *rabi* crops nearly finished. Prices stationary. Markets well stocked. Small-pox prevalent.
Cawnpore („ 15th)	.....	Weather clear. Temperature increasing. Crops all cut. Threshing and winnowing in full swing. Sugarcane, indigo, and extra crop being sown. Prices stationary. Health of people and cattle good.
Farukhabad („ „)	.....	Harvest over, except in a few villages. Average outturn expected. Prices remain stationary. No cases of cattle-disease reported. Health of people fair.
		General Remarks.—There was a slight fall of rain in the Meerut district. High westerly winds continue. Harvest is nearly finished, and sugarcane and indigo are being planted. Prices are rising in Gorakhpur, but falling slightly in Lucknow and Allahabad. Elsewhere they are almost stationary. Small-pox is still prevalent in a few districts and slight cholera is reported from Benares and Agra, but the general health continues good. Cattle-disease has nearly disappeared in Jhansi, but it continues in Kumaun, otherwise cattle are generally healthy, though fodder and water are scarce in places.
Punjab—**(April 16th)**		
Delhi (April 15th)	.....	Reaping in progress. Prices almost stationary. Smallpox continues.
Hissar („ „)	.....	Health good. Prospects unchanged. Prices steady.
Umballa („ „)	.....	Health good. *Rabi* being harvested. Prospects below average. Prices stationary.
Jullundur („ „)	.....	Health good. *Rabi* harvesting continues. Sugarcane weeded. Cotton sown. Prices steady.
Amritsar („ „)	.....	Health good. Prices fluctuating.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Punjab—*contd.*		
Sialkot („ „)	.....	Health and harvest prospects good. Barley being cut. Prices falling.
Ferozepore („ „)	.....	Health good. State of crops good, except where damaged by hail-storm. *Rabi* being cut. Prices fluctuating.
Lahore ...	·2	Health and state of crops good. Prices steady.
Rawalpindi ...	·4	Health and *rabi* prospects good. Prices fluctuating.
Mooltan ...	.....	Health and condition of crops good. Prices fluctuating.
Dera Ismail Khan	·13	Health good. Prospects fair. Prices almost stationary.
Peshawar ...	·2	Health and *rabi* prospects good. Prices steady.
		General Remarks.—Slight rain in four or five districts. Health generally good. Crop prospects also generally good except in the south-east. Harvesting continues in Delhi, Hissar, and Jullundur districts, and has commenced in the Umballa and Ferozepore districts.
Central Provinces— (April 16th)		
Nagpur	.....	Weather clear and hot. Prospects good. Cattle-disease and small-pox prevail to some extent. Prices steady.
Jubbulpore	.....	Weather clear and warm. Harvesting continues. Health good. Prices unchanged.
Saugor (April 15th)	.....	Weather cloudy and hot. Threshing operations and general health good. Prices steady.
Sconi	·017	Weather cloudy occasionally. Threshing progressing. Prices of wheat slightly fallen. Price of rice stationary.
Hoshangabad	.....	Weather seasonable with high winds occasionally. Winnowing in progress. Fever prevalent. Small-pox 23 cases, with one death. Wheat 21, rice 11, and *juari* 30 seers per rupee.
Khandwa	.....	Weather warm. Nights cool. Reaping nearly completed. Preparations for *kharif* sowings in progress. Cholera 8 cases, with 4 deaths. Wheat 16, rice 12½, and *juari* 22½ seers per rupee.
Raipur	.....	Weather hot. Nights cool and pleasant. Threshing continues. Public health good. Prices fluctuating. Common rice 23 and wheat 30 seers per rupee.
Sambalpur („ 12th)	.....	Weather warm. Prospects good. Public health good. Common rice 29 seers per rupee.
		General Remarks.—Cholera continues in Khandwa, and small-pox is reported from Hoshungabad and Nagpur, but public health is generally speaking good. A very large export has commenced in linseed, but the wheat trade continues dull.
British Burma— (April 16th)		
Akyab (April 12th)	.....	1 death from cholera. Cattle healthy. Price of paddy Rs. 20 to 30 per 100 baskets.
Rangoon („ „)	.....	7 deaths from small-pox and 7 from cholera. Price of paddy Rs. 95 to 108 per 100 baskets.
Bassein („ „)	.....	3 deaths from cholera and 2 from small-pox in town. Price of paddy Rs. 90 per 100 baskets.
Amherst (Moulmein) („ „)	.....	Small-pox still prevalent, but no reports of death received. Price of paddy unchanged. In Moulmein town a few cases of small-pox. Price of paddy Rs. 95 per 100 baskets.
Toungoo („ „)	.....	Public health good. Price of paddy Rs. 70 per 100 baskets.
Kyoukphyoo („ „)	.....	No report received.
Sandoway („ „)	.....	Public health good. Weather warm. Price of paddy Rs. 60 to 80 per 100 baskets.
Hanthawaddy („ „)	.....	Public health good. Slight mortality among cattle in Hmawbi township. Price of paddy Rs. 85 to 100 per 100 baskets.
Pegu („ „)	.....	Report not received.
Tharrawaddy („ „)	.....	4 deaths from small-pox. 32 deaths of cattle reported. Price of paddy Rs. 80 to 96 per 100 baskets.
Prome („ „)	.....	1 death from cholera and 10 from small-pox in town. Cattle healthy. Price of paddy Rs. 88 per 100 baskets.
Thonegwa („ „)	.....	27 deaths from cholera and six from small-pox. Price of paddy Rs. 90 to 95 per 100 baskets.
Henzada („ „)	.....	5 deaths from small-pox in town and 3 deaths from cholera in district. Price of paddy Rs. 95 to 100 per 100 baskets.
Thayetmyo („ „)	.....	1 death from cholera in town.
Shwaygyin („ „)	.....	A few cases of small-pox still all over the district. Cattle healthy. Price of paddy Rs. 70 to 75 per 100 baskets.
Tavoy („ 5th)	.....	2 deaths from small-pox in town, disease confined to town and Central and Eastern townships. Price of paddy Rs. 57 to 62 per 100 baskets.
Tavoy („ 12th)	.....	2 deaths from small-pox in town. Price of paddy Rs. 58 to 63 per 100 baskets.
Mergui („ „)	.....	Report not received.
		General Remarks.—Some cholera in Pegu, Arakan and Irrawaddy Divisions; small-pox still prevalent, but severity of epidemic greatly decreased. Cattle healthy except in Hanthawaddy and Tharrawaddy. Price of paddy in parts slightly rising.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Assam—		
Gauhati (April 16th)...	No rain.	Weather dry and hot, but mornings cool. Small-pox still reported from Shastra Parbetta. Rain wanted. Sowing of the *aus* in progress. Cholera on the decline.
Sylhet („ „)	3·51	Crop prospects good; *boro dhan* promises to be a heavy crop if harvesting be not interfered with by excessive rainfall.
Cachar („ „)	Weather rainy with hail on night of 13th to 15th, also severe storm on night of the 15th. Rainfall 6·19.	Ploughing for *dumahie* rops progressing; common rice 12 13/16 seers per rupee. 10 deaths from cholera and 13 from small-pox reported.
Dibrugarh („ „)	7·27	***Ahu dhan* being sown. Public health good.**
Mysore and Coorg— (April 16th)		
Bangalore ...	·24	Standing crops in good condition. Season prospects and public health good.
Mysore ...	·07 Kolar ·31, Kadur ·70.	Crops good; prospects fair; standing crops in good condition. Sugarcane is being milled in all districts. Prospects of season and public health good.
Mercara ...	·27	Coffee blossom showers very partial; coffee market still much depressed; no demand; quotations nominal.
Berar & Hyderabad— (April 16th)		
Amraoti ...	.....	Weather hot. *Rabi* harvest completed. Preparation for ensuing *kharif* commenced. Wheat 20 seers and *juari* 30 seers per rupee.
Hyderabad ...	·32	Standing crops have been damaged by hail in one taluka, in others crops are in good condition. Cholera in one taluka. Prices wheat 14¾, coarse rice 11, white *juari* 16½, yellow *juari* 20¼, and *tur* 19 seers per current sicca rupee.
Akola ...	.....	*Rabi* crops almost gathered in. Preparations for ensuing *kharif* in progress.
Central India States—		
Indore ...	.....	Weather normal. Prospects favorable. Health good. Prices steady.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 17th April, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble D. G. Barkley.

NEW MEMBER.

The Hon'ble MR. BARKLEY took his seat as an Additional Member.

SUNDRY BILLS.

The Hon'ble MR. ILBERT moved that the Hon'ble Mr. Barkley be added to the Select Committees on the following Bills :—

To amend the law relating to Local Self-government in British Burma.
To amend the Legal Practitioners' Act, 1879, and the Indian Stamp Act, 1879.
To amend the Burma Courts Act, 1875.
For the validation of decisions passed on appeal by certain Settlement-officers in the Panjáb.
To make better provision for the organization and administration of Municipalities in the Panjáb.

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY moved that the Hon'ble Mr. Barkley be added to the Select Committees on the following Bills, namely :—

To amend the Sindh Incumbered Estates Act, 1881.
To amend and provide for the extension of the Northern India Takkáví Act, 1879.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 1st May, 1884.

SIMLA;
The 18th April, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

PROPOSED PENSION SCALE AND PROVIDENT FUND FOR ENGINEER ESTABLISHMENT.

No. 449, dated the 18th April 1884.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

Paragraphs 12 and 18 of a despatch from the Right Hon'ble the Secretary of State, No. 18, dated 22nd March 1883, regarding the improvement of the pension scale and the proposed institution of a Provident Fund for the Civil Engineers of the Public Works Department.

RESOLUTION.—With the sanction of the Secretary of State, the following improved scale of ordinary pensions for the European Civil Engineers of the superior Engineering Branch of the Public Works Department and those who may be transferred from that branch to any other branch of the Department has been adopted :—

No. of years' service.	Sixtieth parts of average emoluments.	Subject to a maximum of	
10	20	1,000	On medical certificate.
11	21	1,400	
12	22.	1,800	
13	23	2,200	
14	24	2,600	
15	25	3,000	
16	26		
17	27		
18	28		
19	29		
20 to 24	30	4,000	Without medical certificate.
25 and upwards		5,000	

All officers now in the Department will, at the time of retirement, be allowed the option between the above scale and the pensions allowable under present rules.

2. The following special additional pensions are also authorised, as rewards of approved service, for those officers who serve in the high and responsible positions of Chief and Superintending Engineers :—

	Extra pension over and above that allowable under the scale of paragraph 1.
To those who have served three years as Chief Engineers or who may have been graded as such	... Rs. 2,000 per annum.
To those who may have served three years as Superintending Engineers	... „ 1,000 „

3. The above rules will apply, without further interpretation, to classes I, II, and III (1) of Schedule B of the Civil Pension Code. How far they may be applied to other European Engineers is a matter regarding which orders must for the present be reserved.

4. The institution of a voluntary Provident Fund for all Civil Engineers of the Department on the following basis is sanctioned:—

(1) The contribution to be 5 per cent. on salaries to all subscribing to the fund, with voluntary contributions of a further 5 per cent.

(2) Compound interest at 4 per cent. on such payments to be annually credited by Government to each officer subscribing.

(3) The sum which will thus accumulate to the credit of an officer to be his absolute property to be handed over to him unconditionally on quitting the service, or, in the event of his death before retirement, to his legal representatives.

5. The new rules regarding pension embodied in the first 3 paragraphs of this Resolution will apply with retrospective effect from the 1st May 1883 to all classes of Civil Engineers to whom they are applicable.

Subscriptions to the Provident Fund may be made, under instructions that will issue hereafter, with effect from the 1st April 1884.

ORDERED, that copy of the above Resolution be forwarded to the Public Works Department for information and guidance, and published in the Supplement to the *Gazette of India*.

D. M. BARBOUR,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RESOLUTION REVIEWING THE REVENUE REPORT OF IRRIGATION WORKS IN SIND FOR THE YEAR 1882-83.

No. 107, dated 10th April, 1884.

RESOLUTION—By the Government of India, Public Works Department.

Revenue Report of Irrigation Works in Sind for 1882-83.

Read—

Letter from the Government of Bombay, No. 43 W.I.—93, dated 5th March 1884, submitting Revenue Report of the Irrigation Department in Sind, for 1882-83 and Resolution of the Government of Bombay thereon.

OBSERVATIONS.—The total capital outlay of all kinds incurred up to the end of 1882-83 amounted to Rs. 95,80,121, of which sum Rs. 62,32,677 were expended on Productive Public Works, and the balance on Ordinary Irrigation Works for which Capital and Revenue Accounts are kept.

2. The gross assessed revenue from all sources amounted to Rs. 29,48,986;* the maintenance charges direct and indirect, to Rs. 13,51,184, and the net revenue to Rs. 15,97,802. The net actual receipts from Productive Irrigation Works returned 4·25 per cent. and those from Ordinary Irrigation Works for which Capital and Revenue Accounts are kept 12·95 per cent. on the capital outlay incurred up to the end of the year.

		Rs.
* Water share of land Revenue	...	32,52,517
Deduct average before improvement	...	4,40,327
Balance	...	28,12,190
Add Hakaba and Miscellaneous	...	1,35,511
Agricultural receipts	...	1,285
Total Rs.	...	29,48,986

3. The total area cultivated under the canals during the year amounted to 1,673,293 acres, including "Jaghir" land; the area of cultivation on which revenue was assessed amounted to 1,508,292 acres, and the Irrigation share of net consolidated assessment to Rs. 32,52,517, giving an average rate of Rs. 2·16 per acre. On the Ghár Canal, where the average rate of net assessed revenue has risen steadily from Rs. 2·43 per acre in 1879-80 to Rs. 3·14 per acre in 1882-83, it is explained that the increase is due to the introduction of the revised settlements under which there has been a slight increase in the rates of assessment, and men pay fairly for all land cultivated. The Irrigation share of net consolidated assessment during 1882-83, although nearly 4½ lakhs of rupees higher than the average of the previous 6 years, is about a lakh of rupees less than that of 1881-82, the decrease being due mainly to remissions on account of damage done to the crops by floods and rats in the Haidarabad and Karachi Collectorates.

4. The total expenditure on maintenance and revenue charges, excluding Rs. 1,40,485, outlay on improvements and extensions charged to Revenue Account amounted to Rs. 13,63,679, or 40·23 per cent. of the Canal revenue, giving a cost of maintenance per acre irrigated of Rs. 0·82, the corresponding outlay of 1881-82 having been Rs. 13,73,011 and the rate per acre Rs. 0·86.

5. The irrigating duty obtained from the water varied from 24 acres per cubic foot per second on the Fuleli with a discharge of 6,366 cubic feet per second to 62 acres on the Desert Canal with a discharge of 1,300 cubic feet per second.

6. The Government of India trusts that measures will be taken by the Government of Bombay to ensure a more punctual submission of this report in future.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Government of Bombay in the Public Works Department for information.

Also that a copy of this Resolution of the Report and of the Resolution by the Government of Bombay be forwarded for information to the Governments noted in the margin in the Public Works Department.

Madras, Bengal, North-Western Provinces and Oudh, and the Punjab.

Also that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay be forwarded to the Department of Finance and Commerce and to the Revenue and Agricultural Department for information, and to the Publisher of the *Gazette of India* for publication in the Gazette Supplement.

Also that a copy of this Resolution be forwarded to Her Majesty's Secretary of State.

Nos. 43—93W. I. Resolution by the Government of Bombay, Public Works Department,—Irrigation, dated Bombay Castle, the 5th March 1884.

Letter from the Superintending Engineer for Irrigation in Sind, No. 93, dated 12th January 1884.

Submits, with his remarks, the Annual Revenue Report of the Irrigation Department in Sind for 1882-83.

Endorsement by the Commissioner in Sind, dated 28th January 1884.

Forwards the above report with his observations thereon.

RESOLUTION.—The inundation of 1882 was the highest on record. It was nevertheless on the whole a favourable one.

2. The steady general increase in the area of Kharif cultivation is satisfactory.

3. The increase of cultivation and revenue in Upper Sind, especially in the Frontier Districts, is highly satisfactory. The Desert and Begari Canals worked well and carried an abundant supply of water throughout the season.

4. The Sukkur Canal shows marked improvement notwithstanding the serious difficulties it had to contend with owing to flood water having crossed and re-crossed it between Sukkur and Aladadanee. Every endeavour should be made to ensure the Rabi supply in this canal as recommended by the Commissioner in Sind, timely notice of the same being given to the people.

5. The Eastern Nara Canals are reported to be now at their worst. A decrease of cultivation and revenue is recorded. The protective embankments are, however, well advanced and the land is recovering from the floods of past years. The works will now begin to show a gradual but steady increase up to their full capabilities, when the supply channel at Rohri should be deepened to ensure a proper Rabi supply for all the existing canals in this system.

6. The percentage of cost of establishment in 1882-83 works out to 25·55 on the expenditure incurred on maintenance and repairs for the whole Province: and that of expenditure on revenue to 40·23: and the cost of maintenance per acre of cultivation to 13 annas.

7. The total expenditure on maintenance and repairs and revenue charges during 1882-83 amounted to Rs. 13,63,679.

8. The total area of cultivation was 1,673,293 acres and the canal revenue Rs. 33,89,313.

9. The necessity for escapes on the Fuleli Canal is very apparent, much injury having been caused by rain and flood canal water to the rice lands. It is hoped that the surveys which have been ordered will lead to some practicable remedy being devised.

10. It is satisfactory to learn that the embankments on both banks of the river in the Karachi District are being restored and strengthened. No time should be lost in making all these bunds staunch so that full benefit may be derived from the new settlements now being introduced into this part of Sind.

11. Government observe with much satisfaction the commendation bestowed by the Commissioner in Sind upon the officers of the Irrigation Department in paragraph 8 of his memorandum, dated 28th January 1884.

12. Every endeavour must be made to ensure the more punctual submission of this report in future years. Much of its value is lost when it falls so far out of date.

13. Copies of the report, of the Commissioner's endorsement thereon, and of the review of this Government, should, as usual, be forwarded to the Government of India and the Secretary of State.

Remarks by the Commissioner on the Revenue Report on Irrigation Works in Sind for the years 1882-83.

PUBLIC WORKS DEPARTMENT.

Commissioner's Office, Camp Garhi Yasin, 28th January 1884.

Submitted to Government.

2. The inundation of 1882 was, the Superintending Engineer states, the highest on record, and throughout the inundation season the river was higher than usual. The Kashmor bund fortunately stood this severe trial, though at times the cause of much anxiety; but the continuation of this bund from the Begári to Sukkur was breached and caused serious flooding over a large area, besides sweeping away a considerable length of the Indus Valley State Railway. South of Lárkhána also floods swept across a part of the Shikárpur district, and here also considerable damage was occasioned. In Lower Sind too breaches in the protective embankments were numerous, and very serious losses were suffered by the cultivators. In the Shikárpur Collectorate the flood waters permitted of extensive rabi cultivation, which recouped many cultivators and also Government for the losses to kharíf crops; but in Lower Sind the same compensation was not possible and the cultivators undoubtedly lost heavily, although remissions were granted. In spite of these disasters the year must be considered a favourable one on the whole, as is apparent from the table in the Superintending Engineer's third paragraph. In this table, however, there is an error; the irrigation share of the assessment for 1881-82 should have been shown as Rs. 33,10,233, not Rs. 33,57,557, as this latter sum includes Rs. 17,324 on account of village cesswhich should not have been included; but even if this deduction is made, the revenue for that year is still in excess of that for 1882-83. The revenue for 1881-82 as shown is, however, misleading owing to the inclusion in the sum entered of the assessment on a large area of fallow lands which was afterwards remitted; and had the system of excluding these lands from the revenue settlement which is now followed been in force last year, the revenue for 1882-83 would have been in excess of that for 1881-82. The Superintending Engineer correctly refers to this change in the method of treating fallows as explaining a decrease in the revenue from the Hyderabad district, but he does not seem to have known that the same cause explains the decrease in the Karáchi District also.

3. The table in paragraph 4 of the report shows clearly the increase or decrease in each division, and shows that the largest increase occurred in the Ghár Canals. This is attributed to the introduction of the revision settlement; but although a considerable part is due to this cause, an important share is also to be attributed to the Ghár having provided a really good supply of water during the year. It is hardly correct to lay it down (as has been done in this paragraph) that "an increased rate of Re. 1 per acre has been imposed on all rice grown on land assessed "for dry crops": the rice rate on such lands varies according to circumstances and depends on the settlement rates on rice lands of the same description as those on which rice is grown, though not assessed for it; in many cases the rate is less than that stated. All lands on which rice is regularly grown have, however, in the revision settlement been assessed as rice lands, and thus for the first time, as pointed out by Colonel LeMesurier, have contributed revenue in proportion to the supply of water they have consumed, and this undoubtedly is one of the main causes of the large increase in assessment in this District.

4. The remissions granted during the year were large as was to be expected with such heavy floods. The total (Rs. 2,11,706) shown in paragraph 5 does not correctly represent the remissions it was necessary to grant in consequence of floods, as some claims owing to pressure of work were not disposed of by Collectors till after the close of the revenue year. The Superintending Engineer has referred to a sum of Rs. 12,685 so granted; but other claims in the Shikárpur District, amounting to Rs. 33,187, have not been mentioned. These together make the remissions granted just after the close of the year Rs. 45,872, and the actual remissions out of the year's revenue Rs. 2,57,578.

5. The Superintending Engineer has stated the condition of each of the principal canals so clearly that it seems unnecessary for the Commissioner to add anything regarding them. He may mention, however, that the increase in cultivation referred to in paragraph 19 is a sign of the success of the Kashmor bund and of the improvements of late years to canals. The increase, the Commissioner is glad to state, is even more marked this season, and he believes it will continue for some years, until the lands devastated by the floods from Kashmor, now fortunately shut out, have again been brought under cultivation. The maintenance of the Kashmor bund is of such immense importance that its security should, if possible, be assured. The effects of its giving way are too serious to contemplate without alarm, and, therefore, as the Superintending Engineer states in paragraph 23 that "at one time fears were entertained that it would not stand," the conclusion naturally is that even yet the bund is not quite what it should be and that it should be further raised. Whatever the cause, it is beyond question that of late years the river has been subject to higher freshes than formerly, and it cannot be a wise course to trust to no higher flood than that of last year coming down in future. The continuation of the Kashmor bund to the south of the Sukkur-Begári bund is evidently still far from being in an effective condition. There were 86 leaks, 3 of which became breaches, which were the cause of serious losses to the people as well as to Government. It is to be hoped that this bund will be strengthened before next inundation.

6. The Commissioner would also draw particular attention to the remarks regarding the Sukkur Canal. This canal, as shown in paragraph 28 was much improved during the year, and the results are becoming apparent along the whole line of the canal. The Commissioner has recently been along several parts of this canal, and was glad to see that even now, at the end of January 1884, a good supply is flowing up to the tail of this canal. If this supply can only be maintained in future years, and timely notice is given to the cultivators, the area of rabi cultivation will be largely extended. A good supply of water for rabi cultivation would be an incalculable blessing to the cultivators of the district, and it is to be hoped that every endeavour will be made to improve it.

7. Colonel LeMesurier in paragraph 31 draws attention to the manner in which rabi cultivation has hitherto been treated in the Canal and Revenue Accounts. This some time ago attracted the attention of the Commissioner, who altered it from the present year 1883-84, and in future when lands classed as kharíf are cultivated as rabi, both the area under such cultivation and the assessment thereon will appear under the head of rabi, so that the inconvenience complained of by the Superintending Engineer has ceased to exist.

8. The particulars given regarding the different canals show that they worked well on the whole. The history of the year includes details of many floods, and this, it need, scarcely be said, means much trying work to officers of the Irrigation Department at the most trying season of the year, and involved much exposure in intense heat—heat such as is hardly known in other parts of India, and much credit is due to the officers of the Irrigation Establishment for their exertions.

9. In the latter part of the 51st and in the following paragraphs the effects of the floods in Lower Sind are referred to, and the large loss of revenue in consequence of the floods is detailed. The Commissioner has on several occasions urged on Government the necessity of more completely embanking this part of Sind, and some funds have now been granted for the purpose, so that he trusts that such losses as are described in the present report may never again be experienced. Colonel LeMesurier attributes too much of the loss to the old system of leases, for, as the Commissioner satisfied himself last year when in the Sháhbandar District, a very large part of the leased lands are now under the Bigoti system, the old holders of leases having at their own request been allowed to relinquish them, as owing to constant floods and damage to canals they preferred to pay on their cultivation only. There is very little rabi cultivation in these districts, as they are not well suited for this class of cultivation. Wheat is blighted by the heavy fogs that prevail for months in the spring, and even barley rarely flourishes really well. The losses have been due to actual damage from floods, and in but a very slight degree to the old leases. Temporary settlements have already been introduced into some of the tálukas in this division, and will be general in a year or two. This change makes it all the more necessary to maintain the canals and embankments in good order.

H. N. B. ERSKINE,
Commissioner in Sind.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	.....	Cotton-picking continues. Fever in Viramgam, Sanand, and Parantij; small-pox in Gono, Viramgam, and Parantij. Wheat 27 and *bajri* 31 pounds per rupee.
Baroda ...	.....	Small-pox and measles in Amreli town and in Baroda. Harvesting of *rabi* in progress in Kadi. Prices—*bajri* 33 and rice 23 pounds per rupee.
Surat ...	.....	*Rabi* harvest progressing. Cholera in Surat, and Chorasi and Bardoli talukas. Seventy-four cases and 40 deaths reported. *Juari* 36½ and *nagli* 42½ pounds per rupee.
Nasik ...	.....	*Rabi* crops reaped. Public health generally good. One death from cholera reported in Nasik taluka during the week and 5 in Igatpuri during the last fortnight. Small-pox in parts of Nasik, Sinnar, Dandori, Malegaon, and Kalwan talukas. Cattle-disease in parts of Kalwan. *Bajri* 31, wheat 34½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	.....	Abnormal temperature 1° to 2° cool. Vapour in air defective on 16th and 17th. Abnormal wind northerly on 22nd. Distant lightning on 22nd.
Poona ...	.....	Slight small-pox in Jamkhed, Purandhar, and Haveli talukas. Prices—*bajri* 30 and *juari* 32; in Poona *bajri* 28 and *juari* 26 pounds per rupee.
Ahmednagar ...	.....	*Bajri*—maximum 48 pounds in Jamkhed, minimum 36 in Nagar; *juari*—maximum 60 in Akola and minimum 39 in Nagar.
Sholapur ...	·46; Barsi, ·24; and Karmali, ·10.	Weather hot. *Juari* 43 and *bajri* 42 pounds per rupee.
Dharwar ...	Slight rain	Weather cloudy. Harvesting of late *juari* and cotton-picking in progress. Fever in three, cattle-disease in five, and small-pox in ten talukas; cholera reported in a village of Navalgund taluka, 2 fatal cases, out of 3 fresh ones, have occurred. Scarcity of drinking-water in some villages of Dharwar, Navalgund, and Gadag talukas. Rice 28 to 40 and *juari* 52 to 80 pounds per rupee.
Kanara ...	.....	Second crop of rice harvest continues. Locusts disappearing at Akola. Small-pox continues, 3 deaths reported in Honore and 2 in Sirsi. Cattle-disease in three talukas and fever in six. Common rice at Karwar 13½, in district average 15⅓ seers per rupee. Weather hot.
Rajkot ...	.....	General health good. Weather hot. Small-pox still continues. *Bajri* 31 and *juari* 38 seers per rupee.
		General Remarks.— Slight rain has fallen in parts of Hyderadad, Upper Sind Frontier, Sholapur, Dharwar, and Kaladgi. *Rabi* reaping continues in several districts. Crops damaged in two talukas of Hyderabad by worms and high winds. Small-pox generally prevalent. Cholera in parts of seven districts. Fever in eleven and cattle-disease in thirteen districts.
Bengal—(April 23rd)—		
Chittagong ...	4·49; heavy downpour on Saturday and Sunday nights.	Weather variable. Hail and thunderstorms on Saturday and Sunday nights, damaging standing crops to a certain extent. Cholera and cattle-disease linger, but cases are rare. Prices of food-grains steady.
Dacca ...	2·14	*Boro* paddy harvesting begun. Sowings of *amun*, *aus*, and jute going on. Prospects of crops good. Sporadic cases of cholera reported in several parts.
24-Pergunnahs (Calcutta)	·86	Land being prepared for *aus* and *amun* crops. Price of common rice stationary. Cholera and small-pox abounding in the interior. Cholera prevalent in the suburbs.
Moorshedabad ...	·08	Sowings of *aus* much behindhand, but little going on generally. Cholera abating.
Rajshahye ...	·81	Weather cloudy and cool. Rain has been beneficial. More rain hoped for. Jute plants doing well in Nowgong. Cholera very general.
Burdwan ...	·69	No important crops on ground. Rain will facilitate agricultural operations.
Rungpore ...	·81	Weather hot. *Aus* and jute still being sown. No fresh cases of chicken-pox reported. Prospects of crops good. Prices of food-grain falling slightly.
Bhagalpur ...	No rain	Prospects of crops not good. Rice 14 seers and 14 chittacks per rupee.
Purneah ...	·6	Prospects of crops slightly improved by the rain, more rain wanted. Ploughing and sowings progressing vigorously. Common rice 14 seers per rupee. Public health fair.
Patna ...	No rain	*Rabi* harvesting over; *cheena* growing well. Small-pox and cholera still prevalent.
Durbhunga ...	No rain	Agricultural operations almost quite stopped for want of rain. Prices rising. Public health fair.
Hazaribagh ...	No rain	Weather clear and hot. No crops on the ground. A few cases of cholera and small-pox reported from Giridhi sub-division. General health good.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	2·0	Weather warm and cloudy, with strong south wind. *Dalua* ripening and being cut in some places. Cotton growing well. Ploughing progressing. A few cases of cholera and small-pox reported from interior, otherwise public health good.
		General Remarks.—Rain has, more or less, fallen in almost all districts of Bengal Proper and Orissa. A slight shower of rain fell in a few districts of Behar. Manbhoom in Chota Nagpur had a nominal shower. Rain is still wanted almost everywhere. In a few districts a scarcity of drinking-water is felt. *Rabi* harvesting over, *boro* harvesting commenced. Sowings of *aus* and *amun* crops and of jute begun in some places. Prices of food-grains almost stationary. Cholera and small-pox abating, but the former is still bad at Sara in Pubna.
N. W. Provinces and Oudh—(April 23rd)—		
Benares (April 22nd)	No rain	Sugarcane being irrigated. Small-pox decreasing; cholera still in city. Prices fairly steady.
Allahabad („ 23rd)	.....	Threshing and winnowing still in progress. Hopes of very good mango crop; *mahua* fair, but not so good. Health fair, though there is still a good deal of small-pox about, but not of a virulent type. Prices rising slightly.
Gorakhpur („ 21st)	No rain	High winds at first from west, latterly from east. Harvesting completed. Small-pox still very prevalent. Prices slightly falling.
Jhansi („ 22nd)	.....	Harvesting over. Prices of food-grain rising. Health of people and cattle good. No signs of distress. Scarcity of drinking-water is felt in pargana Jhansi. Fodder is also scarce.
Agra („ 21st)	No rain	Harvesting continues. Fever and small-pox abating. Sporadic cholera in three parganas. Prices steady.
Bareilly („ 22nd)	.....	Harvest outturn short. Market fairly steady. Occasional cattle-disease, otherwise health good.
Meerut („ „)	No rain	Cloudy, with duststorm. Harvest almost finished. Estimated outturn—wet 12 annas, dry 2 to 4 annas. No sickness or distress. One case of doubtful cholera in Sirdhana. Prices steady.
Kumaon („ „)	.....	Rain much wanted for *kharif*. Some cases of typhus, otherwise health good. Cattle-disease continues. Prices stationary.
Lucknow („ 23rd)	Some showers on the night of 21st.	Hot high winds. *Rabi* nearly gathered. Health of people normal, cattle good. Market well stocked. Prices stationary.
Partabgarh ...	.....	No report received.
Sitapur (April 22nd)	.....	Westerly winds have prevailed for the most part during the week. Outturn of crops is reported bad in Sitapur tahsil, but an average yield is expected elsewhere. The bazars are being well supplied. General health good.
Fyzabad („ „)	No rain	Threshing and winnowing in progress. Outturn good. Markets well stocked. Small-pox in three tahsils and cholera in parts of district. Condition of cattle good.
Rae Bareli („ 21st)	.....	Harvest nearly over. Small-pox prevalent. Isolated cases of cholera reported. Supplies abundant. Prices stationary.
Cawnpore („ „)	.....	Weather slightly cloudy and close. Threshing and winnowing proceeding. New grain being freely brought into the market. General health of people good.
Farukhabad („ 22nd)	.....	Cloudy at times during week. Duststorm last night. Average yield from *rabi* expected. A few cases of small-pox in two tahsils, otherwise health fair. Prices stationary.
		General Remarks.—No rain fell during the week, except in Lucknow. The harvest is nearly finished. Prices are falling in Gorakhpur, but rising in Allahabad, elsewhere they are steady. Small-pox is still prevalent in some districts, and there is also some cholera in the cities of Benares and Agra, but the general health continues good. There is still some cattle-disease in Kumaon and Bareilly. Scarcity of fodder is felt in places, but the condition of the cattle generally is good.
Punjab—(April 22nd)—		
Delhi ...	.....	Small-pox continues. Reaping almost completed. Prices almost stationary.
Hissar ...	.....	Health good. Tanks drying up. Cattle suffering. Harvest being gathered, yield poor. Prices average.
Umballa ...	.....	Health good. Crops being harvested, yield expected to be below average. Prices stationary.
Jullundur ...	.....	Health good. *Rabi* being harvested, cotton and sugarcane sowings completed. Prices steady.
Amritsar ...	.....	Health good.
Sialkot ...	.....	Health good. Harvest prospects average. Prices have fallen.
Ferozepore ...	.....	Health good. Crops being harvested.
Lahore ...	.....	Health good. Prices stationary.
Rawalpindi ...	.....	Slight rain. Health and *rabi* prospects good.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Punjab—*contd.*		
Mooltan ...	Drizzle at Sadr	Health and crop prospects good.
Dera Ismail Khan ...	.....	Health good. Crop prospects fair. Prices steady.
Peshawar ...	.....	No report received.
		General Remarks.—Rain in one or two districts. Health generally good. Harvesting commenced in a few districts. Prices on the whole steady.
Central Provinces—(April 23rd)—		
Nagpur ...	.....	Weather hot and occasionally cloudy. Crop prospects good. Small-pox and measles prevail in some places, and a few cases of cholera occurred in Kamptee. Prices steady.
Jubbulpore ...	.....	Weather warm. Nights cool. Reaping approaching completion. Threshing and winnowing in progress. Health good. Wheat 26 and rice 12 seers per rupee.
Saugor (April 22nd)	.....	Weather cloudy and hot. Threshing and winnowing continues. Isolated cases of small-pox in Saugor and Rehli. Prices steady.
Seoni ...	.....	Weather hot. Threshing in progress. Cattle-disease and small-pox reported. Prices stationary.
Hoshangabad ...	.....	Weather hot and windy. Nights cool. Winnowing in progress. Fever prevalent. Wheat 21, rice 11, and *juari* 30 seers per rupee.
Khandwa ...	.....	Weather warm and occasionally cloudy. Reaping nearly completed. Preparation for *kharif* sowings in progress. Six cases of cholera, 3 deaths. *Juari* 22½, rice 12½, and wheat 16 seers per rupee.
Raipur ...	.....	Weather hot. Mornings cool. Threshing almost finished. Public health good. Cow-pox and foot-and-mouth disease prevail amongst cattle in Simga and Drug. Prices falling. Common rice 25 and wheat 31 seers per rupee.
Sambalpur ...	.....	Weather warm, cloudy, and windy. Storms on Tuesday and Thursday. Prospects good. Public health good. Common rice 29 seers per rupee.
		General Remarks.—Cholera still in Khandwa, but [illegible]t, it has also appeared in Kamptee; excepting for small-pox in some districts, health may be said to be good. Ploughing for *kharif* sowings have commenced in a few districts.
British Burma—(April 23rd)—		
Akyab (April 19th)	0·10	Total rainfall 0·64. Public health and health of cattle good. Price of paddy Rs. 23 to 24 per 100 baskets.
Rangoon („ „)	.. ...	One death from cholera and 8 from small-pox. Price of paddy Rs. 95 to 106 per 100 baskets.
Bassein („ „)	.....	Seven deaths from cholera in the first half of April and 35 in the second half of March; 97 deaths from small-pox in town. Cattle-disease still prevalent. Price of paddy Rs. 80 to 90 per 100 baskets.
Amherst (Moulmein) („ „)	0·31	Total rainfall 0·60. Small-pox still prevalent. Price of paddy unchanged. In Moulmein town only a few cases of small-pox have occurred. Price of paddy Rs. 97 per 100 baskets.
Toungoo („ „)	0·73	Total rainfall 1·07. Public health good. Price of paddy Rs. 70 per 100 baskets.
Kyoukphyoo („ „)	0·22	Total rainfall 0·24. Public and cattle health good.
Sandoway („)	0·02	Total rainfall 0·02. Public and cattle health good. Weather warm.
Hanthawaddy („ „)	.....	Public and cattle health good. Price of paddy Rs. 90 to 100 per 100 baskets.
Pegu („ 12th)	.....	Public health good. Cattle healthy. Price of paddy Rs. 95 per 100 baskets.
Do. („ 19th)	.....	No report received.
Tharrawaddy („ „)	.....	No report received.
Prome („ „)	0·12	Total rainfall 0·12. Five deaths from small-pox in town. Cattle healthy. Price of paddy Rs. 85 to 90 per 100 baskets.
Thonegwa („ „)	0·09	Total rainfall 0·19. Thirty-one deaths from cholera and 8 from small-pox. Price of paddy Rs. 90 to 95 per 100 baskets.
Henzada („ „)	.....	One death from small-pox in town and 7 from cholera in districts. Price of paddy Rs. 97 to 105 per 100 baskets.
Thayetmyo („ „)	0·01	Total rainfall 0·6. Public health good. Five deaths of cattle.
Shwaygyin („ „)	2·08	Total rainfall 2·10. A few cases of small-pox still reported. Cattle healthy. Price of paddy Rs. 70 to 75 per 100 baskets.
Tavoy („ „)	.....	No report received.
Mergui { („ 5th)	.....	Public health good. Cattle healthy. Price of paddy Rs. 62 per 100 baskets.
{ („ 12th)	.....	*General Remarks.*—Small-pox and cholera still present in the Bassein and Thonegwa districts, but milder than before; elsewhere health both of man and beast good. Weather hot. Prices of paddy keeping up.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Assam—(April 23rd)—		
Gauhati (April 22nd)	0·10	Weather dry and hot, but mornings cool. Small-pox still reported from Shastra Barpetta. Rain much wanted. Sowing of *ahu* paddy nearly finished. Cholera still prevalent in portion of the district.

Bhurtpore ...	.....	No report received.
Ulwur (April 22nd)	.....	Crops being harvested. Health good.
Nepal—		
Nepal ...	*Nil*	Weather seasonable. Prospects fair.

INFORMATION RELATING TO THE BUDAPEST EXHIBITION OF 1885.

Circular No. 49 Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, the 22nd April 1884.

RESOLUTION.

Read the following :—

No. 103, dated Calcutta, 26th March 1884.

From—A. RITZ, Esq., Acting Consul for Austria and Hungary,

To—The Secretary to the Government of India, Foreign Department.

In continuation of my last letter, No. 68, dated 5th instant, relating to the General National Exhibition to be held at Budapest in 1885, I have the honour to inform you that, according to a further official communication received from the Imperial and Royal Minister for Foreign Affairs, dated Vienna, 5th February last, by yesterday's Austrian Lloyd's steamer, the time for application for space in that Exhibition has been extended up to the end of April 1884, and that, with regard to the rent for space, the following modifications have been decided upon :—

(1) that the first third of the respective taxes be paid to the Hungarian National Bank on receiving the certificate of admittance;

(2) that the next third of those taxes be paid likewise up to the end of June 1885; and that

(3) the last third be paid in the same way before the close of the Exhibition, but under all circumstances before removal of the exhibits.

No. 1255I., dated Simla, 12th April 1884.

Endorsed by the Foreign Department.

Transferred to the Revenue and Agricultural Department for disposal.

Government of Madras.
" " Bombay.
" " Bengal.
" " the N. W. Provinces and Oudh.
" " the Punjab.
Chief Commissioner, Central Provinces.
" " British Burma.
" " Assam.
Secretary for Berar to the Resident, Hyderabad.

ORDER.—Ordered, that the above be published for general information in the Supplement to the *Gazette of India*; also that copies be forwarded to the several Local Governments and Administrations noted in the margin for publication in the local Gazettes.

E. C. BUCK,
Secretary to the Government of India.

Printed and Published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd APRIL 1884.

GENERAL REMARKS.—Rain has fallen in varying quantities in British Burma, Assam, and Bengal during the past week. Showers have also occurred in Madras, Mysore and Coorg, and in parts of Bombay and Sind. In Central India, North-Western Provinces and Oudh, and Punjab there has been no rain.

Standing crops continue in good condition in Madras and Mysore, and prospects are unchanged. The *rabi* harvest is still in progress in several districts of the Bombay Presidency. Locusts are disappearing from Kanara. Some injury has been done by worms and high winds to the crops in parts of Hyderabad (Sind). In Berar the *rabi* harvest has been completed, and the land is being prepared for the *kharif*. In Central India and Rajputana prospects are good, and the crops have for the most part been cut. In the Punjab harvesting has commenced, but has not yet extended to all districts. Prospects are favourable in the northern districts, but in the south-east of the province the *rabi* on unirrigated lands has proved a failure, and the cattle are suffering in some districts from scarcity of fodder and water. In the North-Western Provinces and Oudh reaping is almost over, and threshing and winnowing are in active progress. Unirrigated crops have given a poor outturn. Markets are reported to be well stocked. Fodder is scarce in some tracts, but the condition of the cattle is generally good. In the Central Provinces ploughing for the *kharif* has commenced, and except in a few districts, the *rabi* has been gathered.

The recent rain in Bengal has facilitated agricultural operations, but more is needed everywhere for the sowing of the autumn rice crop which has already commenced in some places. The *boro* or winter rice crop is now being harvested. In Assam rice sowings are in progress, but rain is still much wanted in Gauhati. In British Burma preparations for the ensuing rice crop have not yet commenced.

Small-pox continues generally prevalent, but it is abating in Bengal and Burma. Cholera is reported in most provinces, but severe only at Sara, in the Pubna district, Bengal.

Prices are on the whole keeping steady.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Madras—(April 23rd)—		
Bellary ...	Average ·02	Harvest of sugarcane, yield average; *cholum* and cotton below average.
Kurnool ...	.....	Standing crops fair. Harvest of paddy and cotton, yield below average. Small-pox and cattle-disease in parts.
Ganjam ...	Average ·01	Fever and small-pox prevalent.
Kistna ...	.....	Standing crops good. Small-pox prevalent; cholera, fever, and cattle disease in places.
Chingleput (Madras) ...	.....	Standing crops good, except in one taluk. Harvest of paddy and *cholum*, yield below average. Small-pox prevalent; 23 deaths from cholera reported.
Coimbatore ...	Average ·05	Standing crops generally good. Harvest of paddy and *cholum*, yield about average. Fever and small-pox reported in parts.
Tanjore ...	.....	Standing crops generally good. Harvest of paddy, *cholum*, gingelly and cotton, yield below average. 65 deaths from cholera reported.
Madura ...	Average ·06	Standing crops fair, except in two taluks. Harvest paddy, yield average. Small-pox prevalent in some taluks; 11 deaths from cholera reported.
Malabar ...	Average ·09	Third crop of paddy is approaching maturity. Small-pox slight in all taluks; fever in three talukas; 9 deaths from cholera reported.
Travancore ...	.....	Cultivation commenced. Fever and small-pox prevalent at outstations. *General Remarks.*—General prospects good.
Bombay—(April 23rd)		
Karachi ...	No rain	River at Kotri on 20th, 6 feet 7 inches against 4 feet on same date last year. Fever in seven talukas. Some cases of cattle-disease reported in five talukas. Preparations going on for *kharif*. One fresh case of small-pox in Karachi on 12th instant, none reported since, total to date 71 cases, with 10 deaths; disease in 23 villages in districts, 68 fresh cases reported, with 5 deaths, 77 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32; in Manjhand 28, 28 and 38; in Tatta 24, 32 and 36; and in Jati 22, 32 and 36 pounds, per rupee, respectively.
Hyderabad ...	Slight rain at Hyderabad on 19th and at Sakrand and Naushahro on 18th.	Damage to grain in Moro and Naushahro estimated at 12 and 4 annas in the rupee, respectively, owing to worms in the former and high winds, with dust, in the latter taluka. Storm at Sakrand at Naushahro on 18th. River at Kotri on 21st, 6 feet 8 inches against 4 feet 1 inch on same date last year. Small-pox in eight, fever in three, and cattle-disease in six talukas. Wheat 26, *bajri* 34, *juari* 38, red rice 26, and white rice 20 pounds per rupee.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	.....	Cotton-picking continues. Fever in Viramgam, Sanand, and Parantij; small-pox in Gono, Viramgam, and Parantij. Wheat 27 and *bajri* 31 pounds per rupee.
Baroda ...	.....	Small-pox and measles in Amreli town and in Baroda. Harvesting of *rabi* in progress in Kadi. Prices—*bajri* 33 and rice 23 pounds per rupee.
Surat ...	.....	*Rabi* harvest progressing. Cholera in Surat, and Chorasi and Bardoli talukas. Seventy-four cases and 40 deaths reported. *Juari* 36½ and *nagli* 42½ pounds per rupee.
Nasik ...	.....	*Rabi* crops reaped. Public health generally good. One death from cholera reported in Nasik taluka during the week and 5 in Igatpuri during the last fortnight. Small-pox in parts of Nasik, Sinnar, Dandori, Malegaon, and Kalwan talukas. Cattle-disease in parts of Kalwan. *Bajri* 31, wheat 34½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	.....	Abnormal temperature 1° to 2° cool. Vapour in air defective on 16th and 17th. Abnormal wind northerly on 22nd. Distant lightning on 22nd.
Poona ...	.....	Slight small-pox in Jamkhed, Purandhar, and Haveli talukas. Prices—*bajri* 30 and *juari* 32; in Poona *bajri* 28 and *juari* 26 pounds per rupee.
Ahmednagar ...	.....	*Bajri*—maximum 48 pounds in Jamkhed, minimum 36 in Nagar; *juari*—maximum 60 in Akola and minimum 39 in Nagar.
Sholapur ...	·46; Barsi, ·24; and Karmali, ·10.	Weather hot. *Juari* 43 and *bajri* 42 pounds per rupee.
Dharwar ...	Slight rain	Weather cloudy. Harvesting of late *juari* and cotton-picking in progress. Fever in three, cattle-disease in five, and small-pox in ten talukas; cholera reported in a village of Navalgund taluka, 2 fatal cases, out of 3 fresh ones, have occurred. Scarcity of drinking-water in some villages of Dharwar, Navalgund, and Gadag talukas. Rice 28 to 40 and *juari* 52 to 80 pounds per rupee.
Kanara ...	.....	Second crop of rice harvest continues. Locusts disappearing at Akola. Small-pox continues, 3 deaths reported in Honore and 2 in Sirsi. Cattle-disease in three talukas and fever in six. Common rice at Karwar 13½, in district average 15⅝ seers per rupee. Weather hot.
Rajkot ...	.....	General health good. Weather hot. Small-pox still continues. *Bajri* 31 and *juari* 38 seers per rupee.
		General Remarks.— Slight rain has fallen in parts of Hyderadad, Upper Sind Frontier, Sholapur, Dharwar, and Kaladgi. *Rabi* reaping continues in several districts. Crops damaged in two talukas of Hyderabad by worms and high winds. Small-pox generally prevalent. Cholera in parts of seven districts. Fever in eleven and cattle-disease in thirteen districts.
Bengal—(April 23rd)—		
Chittagong ...	4·49; heavy downpour on Saturday and Sunday nights.	Weather variable. Hail and thunderstorms on Saturday and Sunday nights, damaging standing crops to a certain extent. Cholera and cattle-disease linger, but cases are rare. Prices of food-grains steady.
Dacca ...	2·14	*Boro* paddy harvesting begun. Sowings of *amun*, *aus*, and jute going on. Prospects of crops good. Sporadic cases of cholera reported in several parts.
24-Pergunnahs (Calcutta)	·86	Land being prepared for *aus* and *amun* crops. Price of common rice stationary. Cholera and small-pox abounding in the interior. Cholera prevalent in the suburbs.
Moorshedabad ...	·08	Sowings of *aus* much behind hand, but little going on generally. Cholera abating.
Rajshahye ...	·81	Weather cloudy and cool. Rain has been beneficial. More rain hoped for. Jute plants doing well in Nowgong. Cholera very general.
Burdwan ..	·69	No important crops on ground. Rain will facilitate agricultural operations.
Rungpore ...	·81	Weather hot. *Aus* and jute still being sown. No fresh cases of chicken-pox reported. Prospects of crops good. Prices of food-grain falling slightly.
Bhagalpur ...	No rain	Prospects of crops not good. Rice 14 seers and 14 chittacks per rupee.
Purneah ...	·6	Prospects of crops slightly improved by the rain, more rain wanted. Ploughing and sowings progressing vigorously. Common rice 14 seers per rupee. Public health fair.
Patna ...	No rain	*Rabi* harvesting over; *cheena* growing well. Small-pox and cholera still prevalent.
Durbhunga ...	No rain	Agricultural operations almost quite stopped for want of rain. Prices rising. Public health fair.
Hazaribagh ...	No rain	Weather clear and hot. No crops on the ground. A few cases of cholera and small-pox reported from Giridhi sub-division. General health good.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	2·0	Weather warm and cloudy, with strong south wind. *Dalua* ripening and being cut in some places. Cotton growing well. Ploughing progressing. A few cases of cholera and small-pox reported from interior, otherwise public health good.
		General Remarks.—Rain has, more or less, fallen in almost all districts of Bengal Proper and Orissa. A slight shower of rain fell in a few districts of Behar. Maunbhoom in Chota Nagpur had a nominal shower. Rain is still wanted almost everywhere. In a few districts a scarcity of drinking-water is felt. *Rabi* harvesting over, *baro* harvesting commenced. Sowings of *aus* and *amun* crops and of jute begun in some places. Prices of, food-grains almost stationary. Cholera and small-pox abating but the former is still bad at Sara in Pubna.
N. W. Provinces and Oudh—(April 23rd)—		
Benares (April 22nd)	No rain	Sugarcane being irrigated. Small-pox decreasing; cholera still in city. Prices fairly steady.
Allahabad („ 23rd)	.....	Threshing and winnowing still in progress. Hopes of very good mango crop; *mahua* fair, but not so good. Health fair, though there is still a good deal of small-pox about, but not of a virulent type. Prices rising slightly.
Gorakhpur („ 21st)	No rain.	High winds at first from west, latterly from east. Harvesting completed. Small-pox still very prevalent. Prices slightly falling.
Jhansi („ 22nd)	.....	Harvesting over. Prices of food-grain rising. Health of people and cattle good. No signs of distress. Scarcity of drinking-water is felt in pargana Jhansi. Fodder is also scarce.
Agra („ 21st)	No rain	Harvesting continues. Fever and small-pox abating. Sporadic cholera in three parganas. Prices steady.
Bareilly („ 22nd)	.....	Harvest outturn short. Market fairly steady. Occasional cattle-disease, otherwise health good.
Meerut („ „)	No rain	Cloudy, with duststorm. Harvest almost finished. Estimated outturn—wet 12 annas, dry 2 to 4 annas. No sickness or distress.
Kumaon („ „)	.....	One case of doubtful cholera in Sirdhana. Prices steady. Rain much wanted for *kharif*. Some cases of typhus, otherwise health good. Cattle-disease continues. Prices stationary.
Lucknow („ 23rd)	Some showers on the night of 21st.	Hot high winds. *Rabi* nearly gathered. Health of people normal, cattle good. Market well stocked. Prices stationary.
Partabgarh	.....	No report received.
Sitapur („ 22nd)	.....	Westerly winds have prevailed for the most part during the week. Outturn of crops is reported bad in Sitapur tahsil, but an average yield is expected elsewhere. The bazars are being well supplied. General health good.
Fyzabad („ „)	No rain	Threshing and winnowing in progress. Outturn good. Markets well stocked. Small-pox in three tahsils and cholera in parts of district. Condition of cattle good.
Rae Bareli („ 21st)	.....	Harvest nearly over. Small-pox prevalent. Isolated cases of cholera reported. Supplies abundant. Prices stationary.
Cawnpore („ „)	.....	Weather slightly cloudy and close. Threshing and winnowing proceeding. New grain being freely brought into the market. General health of people good.
Farukhabad („ 22nd)	.....	Cloudy at times during week. Duststorm last night. Average yield from *rabi* expected. A few cases of small-pox in two tahsils, otherwise health fair. Prices stationary.
		General Remarks.—No rain fell during the week, except in Lucknow. The harvest is nearly finished. Prices are falling in Gorakhpur, but rising in Allahabad, elsewhere they are steady. Small-pox is still prevalent in some districts, and there is also some cholera in the cities of Benares and Agra, but the general health continues good. There is still some cattle-disease in Kumaon and Bareilly. Scarcity of fodder is felt in places, but the condition of the cattle generally is good.
Punjab—(April 22nd)—		
Delhi ...	.....	Small-pox continues. Reaping almost completed. Prices almost stationary.
Hissar ...	.....	Health good. Tanks drying up. Cattle suffering. Harvest being gathered, yield poor. Prices average.
Umballa ...	.....	Health good. Crops being harvested, yield expected to be below average. Prices stationary.
Jullundur ...	.....	Health good. *Rabi* being harvested, cotton and sugarcane sowings completed. Prices steady.
Amritsar ...	.....	Health good.
Sialkot ...	.....	Health good. Harvest prospects average. Prices have fallen.
Ferozepore ...	.....	Health good. Crops being harvested.
Lahore ...	.....	Health good. Prices stationary.
Rawalpindi ...	.....	Slight rain. Health and *rabi* prospects good.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Punjab—*contd.*		
Mooltan ...	Drizzle at Sadr	Health and crop prospects good.
Dera Ismail Khan ...	.....	Health good. Crop prospects fair. Prices steady.
Peshawar ...	.....	No report received.
		General Remarks.—Rain in one or two districts. Health generally good. Harvesting commenced in a few districts. Prices on the whole steady.
Central Provinces—(April 23rd)		
Nagpur ...	.....	Weather hot and occasionally cloudy. Crop prospects good. Small-pox and measles prevail in some places, and a few cases of cholera occurred in Kamptee. Prices steady.
Jubbulpore ...	.....	Weather warm. Nights cool. Reaping approaching completion. Threshing and winnowing in progress. Health good. Wheat 26 and rice 12 seers per rupee.
Saugor (April 22nd)	.....	Weather cloudy and hot. Threshing and winnowing continues. Isolated cases of small-pox in Saugor and Rehli. Prices steady.
Seoni ...	.....	Weather hot. Threshing in progress. Cattle-disease and small-pox reported. Prices stationary.
Hoshangabad ...	.....	Weather hot and windy. Nights cool. Winnowing in progress. Fever prevalent. Wheat 21, rice 11, and *juari* 30 seers per rupee.
Khandwa ...	.....	Weather warm and occasionally cloudy. Reaping nearly completed. Preparation for *kharif* sowings in progress. Six cases of cholera, 3 deaths. *Juari* 22½, rice 12½, and wheat 16 seers per rupee.
Raipur ...	.....	Weather hot. Mornings cool. Threshing almost finished. Public health good. Cow-pox and foot and mouth disease prevail amongst cattle in Simga and Drug. Prices falling. Common rice 25 and wheat 31 seers per rupee.
Sambalpur ...	.....	Weather warm, cloudy, and windy. Storms on Tuesday and Thursday. Prospects good. Public health good. Common rice 29 seers per rupee.
		General Remarks.—Cholera still in Khandwa, but slight; it has also appeared in Kamptee, excepting for small-pox in some districts, health may be said to be good. Ploughing for *kharif* sowings have commenced in a few districts.
British Burma—(April 23rd)		
Akyab (April 19th)	0·10	Total rainfall 0·64. Public health and health of cattle good. Price of paddy Rs. 23 to 24 per 100 baskets.
Rangoon („ „)	.. ...	One death from cholera and 8 from small-pox. Price of paddy Rs. 95 to 106 per 100 baskets.
Bassein („ „)	.....	Seven deaths from cholera in the first half of April and 35 in the second half of March; 97 deaths from small-pox in town. Cattle-disease still prevalent. Price of paddy Rs. 80 to 90 per 100 baskets.
Amherst (Moulmein) („ „)	0·31	Total rainfall 0·60. Small-pox still prevalent. Price of paddy unchanged. In Moulmein town only a few cases of small-pox have occurred. Price of paddy Rs. 97 per 100 baskets.
Toungoo („ „)	0·73	Total rainfall 1·07. Public health good. Price of paddy Rs. 70 per 100 baskets.
Kyoukphyoo („ „)	0·22	Total rainfall 0·24. Public and cattle health good.
Sandoway („)	0·02	Total rainfall 0·02. Public and cattle health good. Weather warm.
Hanthawaddy („ „)	.....	Public and cattle health good. Price of paddy Rs. 90 to 100 per 100 baskets.
Pegu („ 12th)	.....	Public health good. Cattle healthy. Price of paddy Rs. 95 per 100 baskets.
Do. („ 19th)	.....	No report received.
Tharrawaddy („ „)	.....	No report received.
Prome („ „)	0·12	Total rainfall 0·12. Five deaths from small-pox in town. Cattle healthy. Price of paddy Rs. 85 to 90 per 100 baskets.
Thonegwa („ „)	0·09	Total rainfall 0·19. Thirty-one deaths from cholera and 8 from small pox. Price of paddy Rs. 90 to 95 per 100 baskets.
Henzada („ „)	.....	One death from small-pox in town and 7 from cholera in districts. Price of paddy Rs. 97 to 105 per 100 baskets.
Thayetmyo („ „)	0·01	Total rainfall 0·6. Public health good. Five deaths of cattle.
Shwaygyin („ „)	2·08	Total rainfall 2·10. A few cases of small-pox still reported. Cattle healthy. Price of paddy Rs. 70 to 75 per 100 baskets.
Tavoy („ „)	.....	No report received.
Mergui { („ 5th) („ 12th) }	.....	Public health good. Cattle healthy. Price of paddy Rs. 62 per 100 baskets.
		General Remarks.—Small-pox and cholera still present in the Bassein and Thonegwa districts, but milder than before; elsewhere health both of man and beast good. Weather hot. Prices of paddy keeping up.

Presidency or Province and District.	Rainfall for week under Report.	State of agricultural prospects.
Assam—(April 23rd)—		
Gauhati (April 22nd)	0·10	Weather dry and hot, but mornings cool. Small-pox still reported from Shastra Barpetta. Rain much wanted. Sowing of *ahu* paddy nearly finished. Cholera still prevalent in portion of the district.
Sylhet ...	2·02	Crop prospects generally fair. Public health only indifferent.
Cachar ...	1·75	Weather warm. Ploughing and sowing of *dumahi* crops continue. Common rice 12 $\frac{13}{16}$ seers per rupee. 25 deaths from small-pox and 18 from cholera reported.
Dibrugarh ...	1·20	Weather hot. *Ahu dhan* being sown. Public health fair.
Mysore and Coorg—(April 23rd)—		
Bangalore ...	·04	Crops continue in good condition. Prospects favourable. Public health good.
Mysore ...	·13	
Mercara ...	·72	Prices of coffee continue very low. Markets overstocked. Blossom. Showers have fallen, but are partial.
Berar & Hyderabad—(April 23rd)—		
Amraoti ...	.....	Weather hot. Preparations for *kharif* sowings in progress. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	*Rabi* harvest completed. Land being prepared for *kharif* sowings.
Hyderabad ...	.....	Standing crops prospering. Cholera still prevails in one taluka. Prices—wheat 14½, coarse rice 10½, white *juari* 16, yellow *juari* 20, and *tur* 18¼ seers per current sicca rupee.
Central India States—(April 23rd)—		
Indore ...	.....	Weather cloudy. Nights still cool. Health good. Prices falling slightly. Prospects generally favourable.
Morar (Gwalior) ...	.....	Fever prevailing in Lashkar. Prices stationary. Weather seasonable.
Sutna ...	.....	Weather clear and seasonable. Prospects good.
Rutlam ...	.....	No report received.
Neemuch ...	.....	Weather seasonable. Health good. High winds.
Goona ...	.....	Health good. Harvesting nearly over. Wheat 26 seers per rupee.
Bhopal ...	.....	[illegible]
Agar ...	.....	Health and prospects good.
Sehore ...	.....	Weather seasonable. Health and prospects good.
Nowgong ...	.....	Weather hot. Health fair; a few isolated cases of small pox.
Manpur (Bhopawar) ...	.....	Health good. Wheat harvesting in progress.
Rajputana—		
Abu (April 23rd)	.....	Weather seasonable. Cold at night; days cool.
Sirohi („ 20th)	.....	Tanks dry. Wells fair. Health good. Crops cut. Weather seasonable.
Marwar („ 18th)	.....	Water in Jodhpore city obtained from Ranisagor tank and wells. Health good. Crops all harvested. Weather clear. Heat increasing. Prices stationary.
Meywar („ 20th)	.....	Tanks, wells, health, and crops prospects good. Weather sultry and cloudy.
Harowti („ 19th)	.....	Weather cloudy. Heat great. Some small-pox. Prices stationary.
Jhallawar („ 18th)	.....	Weather seasonable. Health good.
Ajmere („ 22nd)	No rain	Heat increasing. Health good.
Jeypore („ 22nd)	.....	Rabi harvest completed; yield about average. Prices steady. Health fair.
Bhurtpore ...	.....	No report received.
Ulwur (April 22nd)	.....	Crops being harvested. Health good.

INFORMATION RELATING TO THE BUDAPEST EXHIBITION OF 1885.

Circular No. 49 Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, the 22nd April 1884.

RESOLUTION.

Read the following:—

No. 103, dated Calcutta, 26th March 1884.

From—A. RITZ, Esq., Acting Consul for Austria and Hungary,

To—The Secretary to the Government of India, Foreign Department.

In continuation of my last letter, No. 68, dated 5th instant, relating to the General National Exhibition to be held at Budapest in 1885, I have the honour to inform you that, according to a further official communication received from the Imperial and Royal Minister for Foreign Affairs, dated Vienna, 5th February last, by yesterday's Austrian Lloyd's steamer, the time for application for space in that Exhibition has been extended up to the end of April 1884, and that, with regard to the rent for space, the following modifications have been decided upon:—

(1) that the first third of the respective taxes be paid to the Hungarian National Bank on receiving the certificate of admittance;

(2) that the next third of those taxes be paid likewise up to the end of June 1885; and that

(3) the last third be paid in the same way before the close of the Exhibition, but under all circumstances before removal of the exhibits.

No. 1255I., dated Simla, 12th April 1884.

Endorsed by the Foreign Department.

Transferred to the Revenue and Agricultural Department for disposal.

ORDER.—Ordered, that the above be published for general information in the Supplement to the *Gazette of India*; also that copies be forwarded to the several Local Governments and Administrations noted in the margin for publication in the local Gazettes.

E. C. BUCK,

Secretary to the Government of India.

Government of Madras.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th APRIL 1884.

GENERAL REMARKS.—Rain has fallen generally throughout Bengal and continues to be heavy in Assam. In British Burma there has been rain in several places. In the Madras Presidency and in Mysore and Coorg rain has fallen in all districts. Slight showers have also occurred in parts of Bombay, Hyderabad, and the North-Western Provinces, and in one district of the Central Provinces. No report has been received from the Punjab.

In Madras and Mysore standing crops are in good condition and prospects are generally good. The *rabi* harvest has been nearly completed in the Bombay Presidency. Scarcity of drinking-water is still felt in parts of Dharwar. In Berar the land is being prepared for *kharif* sowings. In Central India and Rajputana prospects are good. In the North-Western Provinces and Oudh the *rabi* harvest is generally over. Sugarcane and indigo are being sown in places. Scarcity of drinking-water and fodder still exists in the Jhansi district. In the Central Provinces threshing and winnowing are well in hand, and preparations for *kharif* sowings have begun.

In Bengal agricultural operations have been benefited by the recent rain, but more is still urgently wanted in several places where sowings are in progress. Prospects of *boro* paddy and sugarcane are good, but the mango crop is reported to have been almost lost. In Assam sowings are in progress. In British Burma preparations for the next rice crop have not yet been resumed.

Small-pox and cholera are generally prevalent, but are abating in Bengal and Burma.

Prices are rising in some districts of Burma, in Durbhunga, and Hazaribagh in Bengal, in Allahabad in the North-Western Provinces, and in Raipur in the Central Provinces; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April 30th)		
Bellary ...	·12 (average)	[illegible] cotton below average.
Kurnool ...	·09 (average)	Harvest of [illegible] cotton below average. Small-pox and cattle-disease in parts.
Ganjam ...	·43 (average)	Fever and small-pox slight.
Kistna ...	·12 (average)	Standing crops good. Harvest of rayi, chillies, and castor, yield below average. Small-pox prevalent; cholera, fever, and cattle-disease in places.
Chingleput (Madras) ...	·60 (average)	Standing crops good, except in two taluks. Harvest of paddy, yield below average. Small-pox prevalent; 5 deaths from cholera reported.
Coimbatore ...	·29 (average)	Standing crops generally good. Harvest of paddy, yield about average. Fever and small-pox reported in parts.
Tanjore ...	.....	Standing crops generally good. Harvest of paddy and dry grains, yield below average. 58 deaths from cholera reported.
Madura ...	·29 (average)	Harvest of paddy, yield average. Small-pox prevalent; 6 deaths from cholera reported.
Malabar ...	·66 (average)	Third crop of paddy about ripening. Small-pox slight in all taluks.
Travancore ...	·176	Cultivation commenced. Small-pox, cholera, and fever reported in parts.
		General Remarks.—General prospects good.
Bombay—(April 30th)		
Karachi ...	[illegible]	[illegible] four talukas; no fresh cases of small-pox reported since 12th; disease in twenty-two villages in districts, 29 fresh cases, with 2 deaths, 47 remaining sick. *Rabi* harvest completed. Prices of wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Kotri 32, 30 and 36, in Sakro 16, 28 and 36, and in Shahbandar 20, 32 and 36 pounds per rupee respectively.
Hyderabad ...	Rain on 17th in Badin taluka.	Preparations for *kharif* cultivation being made. River at Kotri on 28th, 6 feet 11 inches against 5 feet 7 inches on same date last year. Small-pox in eleven, fever in one, and cattle-disease in two talukas. Hail-storm on 17th in Badin taluka. Wheat 26, *bajri* 34½, *juari* 37, red rice 26, and white rice 20 pounds per rupee respectively.
Ahmedabad ...	.....	Cotton-picking nearly over. Fever and small-pox in Viramgaum and Parentij. Wheat 28 and *bajri* 31 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	.....	Cholera in a mild form has appeared in Baroda city, 7 deaths; small-pox in Kheralu and Amreli. Prices—*bajri* 33 and rice 23 pounds per rupee respectively.
Surat ...	.....	*Rabi* harvest progressing. Cholera reported in Surat, Bardoli, and Mandvi talukas, 75 cases, with 20 deaths. *Juari* 36 and *nagli* 44 pounds per rupee respectively.
Nasik ...	.....	Reaping of *rabi* crops completed. Public health generally good; small-pox in parts of Nasik, Sinnar, Malegaón, and Kalvan talukas; 2 deaths from cholera in Igatpuri and 6 in Nandgaon talukas; cattle-disease in Kalvan. Wheat 34½, *bajri* 31, and rice 21 pounds per rupee respectively.
Colaba (Bombay) ...	.....	Abnormal temperature 2° cool to 2° warm; vapour in air defective on 29th; abnormal wind northerly on 27th.
Poona ...	.....	Slight small-pox in Haveli, Jamkhed, and Purandhar. Price of *bajri* 34 and *juari* 35; in Poona *bajri* 27 and *juari* 26 pounds per rupee respectively.
Ahmednagar ...	·50 in Nagar	Weather cloudy. Public health good. Reaping of *rabi* finished; threshing continues in parts. *Bajri*—maximum 48 pounds in Sangamner, minimum 36 in Nagar; *juari*—maximum 60 in Sangamner, minimum 35 in Karjat.
Sholapur ...	·19; at Karmala, ·10; Barsi, ·09; and Pandharpur, ·06.	Total rainfall ·65; weather hot. *Juari* 43 and *bajri* 42 pounds per rupee respectively.
Dharwar ...	Maximum 3·0 in Navalgund and Karajgi; minimum ·04 in Kalghatgi.	Rain fell throughout the district; more wanted in Dharwar and Gadag talukas and Nargund Petha, where scarcity of drinking-water still continues. Harvest of late *juari* and cotton-picking in progress. Small-pox throughout the district; fever in three and cattle-disease in five talukas; cholera continues in a village of Navalgund, 1 case fatal. Rice 28 to 40 and *juari* 52 to 79 pounds per rupee respectively.
Kanara ...	1·36 in Supa	Weather hot and cloudy. Second crop of rice harvested. Locusts in Karwar and Akola talukas. Small-pox decreasing, 12 deaths reported in Kumpta, 5 in Honore, 3 in Karwar, and 1 in Sirsi; cattle-disease in three talukas and fever in five. Common rice in Karwar 13, district average 15 seers per rupee.
Rajkot ...	.....	General health good. Weather hot. Fever in some parts of the province; small-pox still prevalent. *Bajri* 31 and *juari* 39 pounds per rupee respectively.
		General Remarks.—Slight rain fell in parts of ten districts. Scarcity of drinking-water continues in three talukas of Dharwar. *Rabi* harvest nearly completed in most districts. Cholera in parts of Surat, Broach, Baroda, Nasik, Dharwar, and Colaba; fever, small-pox, and cattle-disease continue in several districts.
Bengal—(April 30th)—		
Chittagong ...	2·33	Weather seasonable. Prospects of crops fair; lands being prepared for early paddy. Cholera and cattle-disease still continue. Prices steady.
Dacca ...	3·71	*Boro* paddy being harvested; sowings of *aus*, *amun*, and jute going on; prospects of crops good. Cholera abating in Manickgunge.
24-Pergunnahs (Calcutta)	·26	No crops on ground; land being prepared for *aus* and *amun* crops. Price of common rice varies from 13 to 16 seers per rupee. Public health in mofussil much better than that in the suburbs, where cholera and small-pox still prevail.
Moorshedabad ...	1·91	Weather cool and cloudy; heavy storm on 22nd. Prospects of crops much improved; *aus* sowing progressing. Cholera slightly better, except in the north of district.
Rajshahye ...	2·29	Weather close and cloudy. Rain has done much good. Cholera still general, but somewhat abating.
Burdwan ...	1·51	Rain has materially improved prospects of sugarcane, *til*, and cotton. Ploughing going on throughout. Cholera and small-pox prevailing more or less in every thana.
Rungpore ...	·84	Chicken and small-pox disappearing; cholera reported from Nageswari station in Kurigram sub-division. Price of rice falling slightly.
Bhagalpur ...	·14	Sugarcane and *cheena* doing well; *mung* and paddy seedlings in the north doing well; ploughing going on. Rice 13 seers and 14 chittacks. Small-pox still prevalent in Sadr subdivision.
Purneah ...	·65	Prospects of crops fair. Ploughing and sowing progressing. Common rice 14 seers per rupee. Public health fair; a few cases of cholera among railway coolies. River low.
Patna ...	*Nil*	Crops all gathered. Rain wanted for *cheena* and *mung*. Small-pox and cholera still reported from Behar and Sadr subdivisions.
Durbhunga ...	·5	Rain much wanted for paddy, *mung*, and *cheena*. Prices of food-grains rising. Small-pox, cholera, and cattle-disease reported from a few villages in Madhubani.
Hazaribagh ..	*Nil*	Weather hot and clear; rain much wanted for ploughing of early crops. Prices continue high. General health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	*Nil*	Weather hot and occasionally cloudy. Ploughing progressing. Rain wanted. Price of rice almost stationary. Cases of cholera and small-pox reported from interior.
		General Remarks.—More or less rain fell over almost all districts, benefiting standing crops and agricultural operations; rain still urgently wanted in several places; heavy storm occurred in Moorshedabad and Maldah; the havoc in Maldah was great. Ploughing commenced. Prospects of *boro* paddy and sugarcane good; mango almost lost; sowings of *aus* and *bhadoi* and harvesting of *boro* paddy commenced in some districts. Prices almost stationary. Cholera and small-pox still continue, the former abating in several places.
N. W. Provinces and Oudh—		
Benares (April 29th)	No rain	Weather hot. Cholera and small-pox decreasing; some fever cases reported. Prices moderate. Cattle-disease broken out in pargana Kotahlah.
Allahabad („ „)	.....	No change; hot west wind. Fever and small-pox in district, but not virulent; isolated cases of cholera reported. Water become scarce. Prices rising.
Gorakhpur („ 28th)	Some rain in north	Reaping finished. Small-pox decreasing. Prices show a slight fall.
Jhansi („ 29th)	No rain	Weather growing hotter. *Rabi* harvest all in, supplies sufficient. Prices stationary. Health of people and cattle generally good. General scarcity of drinking-water and fodder nearly everywhere in the district.
Agra („ 28th)	No rain	Harvesting nearly finished. Fever and small-pox abating; slight sporadic cholera in the city. Prices steady.
Bareilly („ 29th)	.....	Harvest completed. Market stationary. Public health good. No cattle-disease.
Meerut („ „)	No rain	High westerly winds. Harvest over; cane and melons sown and progressing. Prices unchanged. Health excellent.
Kumaon ...	.....	No report received.
Lucknow (April 29th)	.....	Heat increasing. *Rabi* nearly gathered, outturn on the average good. Health of people fair and of cattle good. Markets well supplied. Prices steady.
Partabgarh ...	.....	No report received.

Ulwur („ „)		[illegible] small-pox in parts, otherwise health good;
Nepal—(April 24th)		
Nepal	1·73	Weather [illegible], much thunder. Crop prospects good. The rain will benefit the sowings of Indian-corn.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 1st May, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble W. W. Hunter, LL.D., C.I.E.
The Hon'ble D. G. Barkley.

BENGAL REGULATION XIX OF 1810 REPEAL BILL.

The Hon'ble MR. ILBERT moved that the Bill to repeal Bengal Regulation XIX of 1810 within the territories administered by the Lieutenant-Governor of the North-Western Provinces be taken into consideration. He said that the object of the Bill was merely to repeal an old Regulation which in the opinion of the Local Government of the North-Western Provinces was no longer required for those Provinces. The Bill had not been referred to a Select Committee, but it had received the approval of the Local Government.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill be passed.

The Motion was put and agreed to.

LEGAL PRACTITIONERS' BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to amend the Legal Practitioners' Act, 1879, and the Indian Stamp Act, 1879.

BURMA COURTS' BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to amend the Burma Courts' Act, 1875.

The Council adjourned to Wednesday, the 14th May, 1884.

SIMLA;
The 2nd May, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

SIMLA,
The 2nd May 1884.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

THE BENGAL TENANCY BILL, 1884.

No. 784, dated Simla, 5th May, 1884.

From—D. FITZPATRICK, Esq., Secy. to the Govt. of India, Legislative Department,
To—The Secretary to the Government of Bengal.

I am directed to invite your attention to the Preliminary Report (including the dissents) of the Select Committee on the Bengal Tenancy Bill and to the revised Bill, recently published in the *Gazette of India*,* and to request that the Report and the Bill may be taken into consideration by the Government of Bengal as soon as possible, in order that the Government of India may be made acquainted with the views of the Bengal Government on the revised Bill and of those officers whom the Bengal Government may consider it expedient to consult.

2. In concluding their Report, the Select Committee specify several points with which they were unable to deal adequately without further information than that contained in the papers before them. And they state that on some of these points they would be glad to receive the advice both of the Local Government and of the High Court. A separate communication will be addressed to the High Court. The particular questions which the Select Committee wish to be referred to the Local Government are—

(1) Whether, with reference especially to landlords' improvements, it is desirable to empower Revenue-officers to arrange for the cutting of irrigation-channels, the distribution of water and the payment of compensation; and, if so, what form such provisions should take?

(2) Whether the summary sale procedure can be applied to those dependent taluqs the revenue of which was settled direct with Government, though the holders pay it through the zamíndár, who is responsible for its realization. These tenures apparently find no place in the Government registers, and it was proposed that the modified *patní* procedure should be applied to them.

(3) Whether the same procedure can be made applicable also to the recovery of arrears of road-cess and public works cess from rent-free tenure-holders.

(4) Whether any provisions are required in the Bill with respect to tenants of homestead or *bastu* land which is not a part of an occupancy-holding. The Select Committee have omitted Chapter VII of the original Bill, on the ground that it was inapplicable to the very varying conditions attaching to the holdings of such tenants in different parts of the country, and that they had not before them the information requisite to dealing with the questions involved. It is desirable that information of this description should, if possible, be supplied.

(5) Whether the saving of customary and other conditions specifically applied in section 214 of the revised Bill to *utbandí* and *hal-hasilí* tenures should be extended to similar tenures under other names; and whether any special saving is necessary in regard to the special tenures under which land is held in the Chittagong Division.

(6) Whether it would be possible to specify for the purpose of exemption from the pre-emption sections any such transferable occupancy-rights as those in *guzáshta* and *gorá* holdings.

* See *Gazette of India* for 29th March and 5th and 12th April.

(7) Whether it is possible to improve the accuracy of the price-lists which have been published during the past twelve years; and what would be the probable effect of basing a system of enhancement of rent mainly on these lists.

3. To these points the attention of the Government of Bengal is especially invited. It may be that the first of them would require separate legislation; but, as they have been referred at the instance of the Select Committee, it would be desirable that the opinion of the Bengal Government upon them should be given in reply to this letter. I am further to mention some other matters on which either the opinion of the Government of Bengal is particularly required or an expression of the views of the Government of India seems desirable.

4. The first question concerns the sufficiency of the revenue-establishments of the Province to discharge, in addition to their present onerous functions, the numerous duties which, under the revised Bill, will devolve upon them. They are required, for instance, (1) to ascertain the prevailing rate by local inquiry at the instance of a Civil Court before which an enhancement-suit under section 14 is brought; (2) to prepare authoritative price-lists under section 52; (3) to receive deposits of rent (section 73); (4) to appoint officers to superintend the division of the produce where rent is taken by appraisement or measurement (section 82); (5) to decide the respective rights of landlord and tenant to make an improvement, or whether any particular work is an improvement (section 89); (6) to register landlords' improvements, and to record evidence respecting any improvement (sections 91 and 92); (7) to grant permission to measure the holding of a tenant (section 99); (8) to prepare a record-of-rights or to make a settlement of rents (Chapter X); (9) to frame tables-of-rates (Chapter XI); (10) to survey and record a proprietor's private lands (Chapter XII); (11) to determine the incidents of a tenancy by means of a local inquiry at the direction of a Civil Court (section 174). This list does not exhaust the duties delegated to Revenue-officers; but it is sufficiently full to show that the efficient working of the Act will in a great measure depend on the ability of the revenue-establishments to respond to the calls which will be made upon them. Some of the duties,—as, for instance, the preparation of a record-of-rights or of a table-of-rates, or the settlement of rents,—will probably arise only in exceptional localities, and may require the employment of special establishments. Others, however,—such as the registration of improvements or local inquiries into the prevailing rate,—will not improbably be frequent throughout the Province; and the Government of India would like to know whether the existing revenue-establishments can cope with the work, or whether it will be necessary to strengthen them, if the Bill be passed in its present form. In connection with this subject, I am to invite the attention of His Honour the Lieutenant-Governor to paragraph 19 of the Secretary of State's despatch No. 30 of 17th August, 1882, dealing with the question of introducing a system of survey and record-of-rights either generally into Bengal or experimentally into the Patna division. The Government of India is anxious that a complete statement of the Lieutenant-Governor's views and proposals on this subject, and as to the necessity of providing further legislative facilities for it beyond those which are given in the Bill under consideration, should be submitted.

5. Passing from this general question of administrative machinery to the most important alterations made by the Select Committee in the Bill as originally introduced, I am to notice the following points:—

6. *Tenure-holders* (Chapter III).—The description of tenure-holders and raiyats, which is given in Chapter II in place of a definition, is believed to represent substantially the views expressed by the Government of Bengal in its letter No. 972 of 27th September last, although it was not deemed expedient to draw the line between the two classes of tenancies with the precision and definiteness which was there recommended. The Bill, it is understood, requires the Courts, in deciding whether a tenant is a tenure-holder or a raiyat, to look in the first instance to the primary object for which the tenancy was acquired,—whether for collecting rent, or for cultivating the land,—and in doubtful cases directs their attention to local

custom. But in case these issues cannot be adequately ascertained, it provides a presumption, which is doubtless in accordance with existing facts, that holdings exceeding 100 bighás were taken for the former purpose. The Government of India will be glad to learn if these provisions will afford reasonable facilities for meeting what is clearly felt to be a grave practical difficulty in deciding what holdings are, and what are not, tenures. The most doubtful feature of the scheme is the proposed conversion of occupancy-raiyats who sublet more than one-half their holdings, subject to certain exceptions, into tenure-holders (section 37). The object is to bring the subletting raiyat under the more summary sale procedure of Chapter XVI, and at the same time to allow the sub-tenant to acquire occupancy-rights. The Report of the Select Committee in its comments on Chapter V discusses these provisions at some length, and touches on the practical difficulties which may be anticipated to arise. To these remarks the attention of the Government of Bengal is invited. It will be noticed that the converted tenure-holder still remains liable to enhancement of rent as an occupancy-raiyat, though in other respects he acquires the rights and liabilities of a tenure-holder, and is in some ways, especially as to pre-emption and distraint, in a better position than if he had never sublet. The expediency of giving these privileges as part of a scheme for discouraging subletting and the general effect of this distinction should be considered; and it would be well if local inquiries were made as to the practicability of the scheme, and as to the possibility of giving effect to it by means of a system of registration as contemplated by the Bill. The obvious objections that it is difficult to ascertain if a man has sublet half his holding, and that it may be neither to his own interest nor to that of anyone having a knowledge of the facts that he should be registered, require to be carefully weighed and, if possible, overcome.

7. *Raiyats holding at fixed rates* (Chapter IV).—The assimilation of this class of raiyats to tenure-holders with respect to transfer and succession is a provision about which the Select Committee were not unanimous. It has been urged that, while these conditions may very fairly be allowed to raiyats holding at fixed rates under a registered lease or under a judicially declared title, they should not be claimable by raiyats whose right to hold at fixed rates rests only on the statutory presumption. It was the opinion of the Select Committee that no distinction can be drawn in the Bill between these two classes; but it is open to consideration whether some further restriction might not equitably be placed on the twenty years' presumption, in addition to that proposed in the proviso to sub-section (2) of section 61 and in section 122. The Government of India is disposed to think that, subject to restrictions, the presumption should be retained. The presumption was originally enacted in Act X of 1859, in order to facilitate the proof of certain well-recognized rights. To remove it entirely from the Statute-book would throw on the tenant claiming to be a fixed-rate tenant the burden of proving that he had held at the same rent from the time of the Permanent Settlement; and this, in the absence of public and authoritative registers of tenancies, would be equivalent to an absolute bar to every claim of this nature. Other proposals have now been made with a view of limiting the currency of this presumption: they are (1) to provide facilities for registering such tenancies and for deciding the disputed claims to which registration is certain to give rise, and to prescribe that no tenant whose title to hold at fixed rates is unregistered after a certain date, to be fixed by the Act, can claim the benefit of the presumption; or (2) to enact that the presumption shall not continue to run after the passing of the Act, or after some subsequent date, so that the raiyat claiming to hold at fixed rates must, in order to have the benefit of his presumption, be prepared to show that for twenty years previous to the date thus fixed (instead of previous to the date of institution of the proceedings) he has held at an unchanged rate. The attention of the Government of Bengal is requested to these suggestions, as there cannot be a doubt but that the presumption being cumulative, every year renders it less in accordance with the real facts, and also increases the landlord's difficulty of rebutting it.

8. *Occupancy-raiyats* (Chapter V).—A preliminary question is raised by the Select Committee as to the definition of "estate" with reference to

exceptionally large estates, such as those of the Maháráját of Bardwán. The Select Committee also invite attention to the date provisionally given in section 27 (*b*). These points should now be considered by the Government of Bengal.

9. The Select Committee also remark that the main lines of the original Bill in regard to the acquisition of the status of a settled raiyat and the right of occupancy have been retained, while considerable alterations have been made in the provisions relating to the enhancement of the rent of occupancy-raiyats. The whole of this chapter will, no doubt, be fully considered by the Government of Bengal, and the effect of the minor amendments introduced into it should receive careful attention. The presumption introduced in section 26, sub-section (2), is, it is believed, quite in accordance with existing facts. It has been said by a leading opponent of the Bill that 90 per cent. of the raiyats of Bengal have occupancy-rights: the practical difficulty, however, has always been for them to prove these rights. The object of the presumption is to facilitate this proof by throwing the *onus probandi* on the party asserting the case to be an exception from the general rule. From this point of view the Government of India accepts it as an improvement of the Bill. Other important features in the early portion of the chapter are the subdivisions entitled "Restrictions on transfer" and "Restrictions on subletting," and the omission of section 56 of the original Bill, which conferred a right of occupancy on a raiyat let into an occupancy-holding after it had been bought up by the landlord. Of these, the restrictions on subletting have already to some extent been discussed. It is understood that the universality of the practice both in Bihár and in Bengal rendered the prohibition of the practice impossible; and, as the Committee point out, the attempt to place restrictions upon it has been attended with extreme difficulty. It is not probable that any satisfactory solution of the problem can be found in the direction of increased stringency. The provisions of section 56 were very generally condemned in the papers before the Select Committee. The Government of India concurs in the omission of this section from the Bill, though it is obvious that the absence of such a restriction may have the effect of enabling the more wealthy landlords to diminish by purchase the area held by tenants in occupancy-right, and may also afford a means of raising the customary or prevailing rate of rent over the occupancy-area. The former advantage, however, will only remain to the landlord as long as he retains the land in his own cultivation. If he lets it, the ordinary provisions as to the acquisition of occupancy-rights will apply to the incoming tenant; and it is believed that these will be found sufficiently broad for all practical purposes. The possible effect of the omission of the section on the prevailing rate is, no doubt, a more serious consideration. The landlord who buys up the occupancy-right in a holding may either let the land to a non-occupancy-raiyat at any rent he likes (section 56), or to a settled raiyat subject (see section 42) to such enhancement on the rent paid by the late occupancy-raiyat as is permissible under section 41. Should this power be extensively exercised on an estate where the competition for land is keen, the higher rents obtainable for such land by the landlord would eventually tell on the prevailing rent, and would enable the landlord to enhance the rents of the general body of occupancy-tenants on the ground that they were below the prevailing rate of rent. The Government of India is, therefore, prepared to admit that the omission of section 56 may occasionally operate unfavourably towards the occupancy-raiyat by allowing in certain cases (especially in connection with the effect of section 42 on an occupancy-raiyat succeeding to the tenure of a non-occupancy-raiyat) room for the entry of competition-rents. But, admitting this, the Government of India cannot but recognise the force of the objections which were brought against that section of the original Bill from the opposite point of view, and is disposed to think that justice to the landlords required the modification of the Bill in this particular. Your attention, however, will be more specially directed to the effect of section 42 in a subsequent portion of this letter. The only remaining restriction which affects the acquisition of occupancy-rights by the landlord is that in section 28, which declares that the occupancy-right so acquired merges in the superior right of the landlord. It allows the accrual of occupancy-rights by the lapse of time to the new tenant, prevents the legal

complications which would arise from the co-existence of different interests in the same person, and merely affirms what appears to have been assumed by the Judicial Committee of the Privy Council, in the case referred to in Mr. Justice Field's note on this subject, to be the existing law. The section, it will be noticed, applies whether the landlord is the zamíndár or a tenure-holder.

10. The alterations made in the law of enhancement in the latter portion of Chapter V are set out in detail in the Report of the Select Committee, and the Government of India will only direct attention to one or two points. The omission of the section limiting money-rents to a maximum of one-fifth of the gross produce may perhaps give rise to some misgivings, and it may be said that with this section the only absolute check on rack-renting has been removed. On the other hand, many objections have from the first been taken to this provision of the original Bill. It has been condemned as setting up a maximum rate of rent which might possibly be suitable in a particular locality in regard to particular crops, but which would certainly work inequitably as a uniform standard for all classes of crops and in all districts. Thus, in the poorest lands it might leave an insufficient margin for the subsistence of the cultivator, whilst on the best lands it might give him more than he is entitled to get. It has also been condemned as likely to encourage enhancements of rent in all cases in which the rent was below the legal maximum. It has been further condemned as economically vicious, because it leaves out of view the enormously important element of cost of cultivation, and, again, because it professes to lay down as a permanent standard of the maximum rent a proportion of the gross produce which circumstances, such as the increasing pressure of the population, may make it difficult to maintain. But the most serious objections lay in the notorious difficulty of ascertaining by the agency at the disposal of the Courts either the average produce of different classes of land, or the produce of the particular fields of which the rent was in question; and this latter difficulty is greatly increased by the provision that the average gross produce of the field was to be calculated in staple crops, whatever might be the special crop grown on the land in question. The problem has been repeatedly attacked by experts in connection with the land-assessment of temporarily-settled provinces; and the results of their elaborate inquiries have been so conflicting and of so little practical value that the Government of India will not contest the expediency of omitting the gross produce test from the law of enhancement in Bengal. In the Bombay Presidency, experiments have for years past been made by Revenue-officers with the view of ascertaining the proportion borne by the land-assessment to the gross produce. The report of the Director of Agriculture on the experiments for 1882-83 has recently been communicated to the Government of Bengal; it should be referred to as well illustrating the difficulty of the inquiry, and the impossibility of establishing any certain relation between the produce and the rent or revenue. First of all, the produce of particular fields has to be ascertained by actual experiment. Then inquiry has to be made whether the produce is exceptionally large owing to the exceptional character of the cultivation, or exceptionally small owing to previous cropping or accidents of weather. Then comes a difficult inquiry into the prices obtained by the cultivator and the value of the produce. At every stage there is room for much difference of opinion; and the data obtained from the several experiments are too conflicting to lead to any certain conclusion as to the average value of the produce of different classes of land. The same difficulty was felt in the case of the Khúrdá Settlement, which was recently referred for the orders of the Government of India by the Government of Bengal. The Settlement-officer of Khúrdá was certain that his assessment took less than one-fourth of the value of the gross produce; but his estimate, and the data on which it was founded, were considered of doubtful accuracy by the Government of Bengal. But even if average standards of produce could be ascertained, the fact remains that rent bears no fixed relation to the gross produce. The cost of cultivation is quite as important a factor as the gross produce; and if one fact is clearly brought out by inquiry, it is the impossibility of ascertaining the cost of cultivation with any degree of accuracy.

11. These are some of the considerations which have led the Government of India to agree with the Select Committee that the gross produce test should

be abandoned. The Government of India is also inclined to agree with the Select Committee that, failing this test, the most feasible check on rack-renting is to limit the percentage of increase obtainable at any one time on existing rents when rent is enhanced either by private agreement or by suit. There is an additional reason for fixing a limit on the percentage of increase; and this is that, whatever the land can afford to pay, it is certain that under existing circumstances in India the ordinary raiyat cannot bear a very large and sudden increase in his rent without the risk of a material deterioration of his agricultural stock and means of living. Great importance is attached by the Government of India to this consideration, in connection with periodical re-assessments of land-revenue. The propriety of the several percentage limits of enhancement specified in the revised Bill, and also the other incidents which the Bill attaches to agreements out of Court to pay a higher rent, are points which may profitably be considered by the Government of Bengal. In other provinces an increase of 25 per cent. in the course of 30 years' settlement is at the present day looked upon as considerable. The Bill allows what is equivalent to 50 per cent. in this term in most cases, and in some circumstances as much as 100 per cent.

12. Before leaving this subject, I am to invite attention to the provisions of section 42. Fears have been expressed lest the rule under which an occupancy-raiyat let into land hitherto held by a non-occupancy tenant has to pay the same or even under contract an enhanced rent, may have an extensive effect in the direction of raising the prevailing rate of occupancy-raiyats. The landlord, as noticed in paragraph 9, may, on acquiring an occupancy-holding, re-let it to a non-occupancy tenant at a competition-rent. And should it again fall vacant, any occupancy-tenant of the estate, who may then be let in by the landlord, will be bound to pay this rent. The tendency of these provisions to raise the prevailing rate has been urged by Mr. Reynolds in his dissent, and His Excellency in Council would be glad to receive an expression of the Lieutenant-Governor's opinion as to whether the anticipated danger is not such as to require some safeguard, and, should this be the case, in what way it might best be met.

13. The effect of the alterations which have been made in the grounds on which an enhancement-suit can be brought should also receive close attention. The most important points are—(*a*) the restriction of enhancement on the ground of increased productivity to the two separate cases of fluvial action and landlords' improvements; (*b*) the method proposed for determining enhancements on the ground of a rise in prices. In regard to (*a*) it should be considered whether the scheme for registering landlords' improvements which the Bill provides (sections 91-92) is sufficient for the purpose, and whether there are any other cases besides the two specified in the Bill in which enhancement should be allowed on the ground of an increase in the productive powers of the soil. The Government of India is disposed to agree with the Select Committee that this ground of enhancement will be difficult to work except in the special case of landlords' improvements, in respect to which the requisite information can, to some extent, be obtained by means of registration. In regard to (*b*) the explanatory remarks of the Select Committee should be considered. Their intention is that authoritative price-lists of staple food-crops should be prepared by the Local Government, and that in deciding an enhancement-suit on the ground of an increase in prices the Courts should have regard to these lists as indicating a general rise or fall in prices in any local area without any reference to the particular crop grown on the land the rent of which is in dispute. When a general rise has thus been ascertained, it would rest with the tenant to prove any particular causes which may have prevented him from enjoying the full benefit of the rise. The general tendency of these provisions would be that, so far as this particular ground of enhancement is concerned, the standard of rent as expressed in grain would not vary, but the landlord would be protected from the loss now arising from the diminished purchasing power of silver in relation to grain. The Government of India agrees with the Select Committee that these proposals would very materially facilitate the decision of this class of enhancement-cases, and considers also that the zamíndárs are entitled to some substantial improvement in the procedure for obtaining enhancements of rent in such cases. In many parts of

Bengal the rise in prices of recent years has been very considerable, and the complaints of the zamíndárs that under the present law they have been unable to obtain a proportionate increase of rent are admitted to be well-founded. If the present proposals of the Select Committee are calculated to work equitably, the Government of India would be glad to see them enacted, as they go far to redeem the promises which have been made at various times to the zamíndárs. They are, however, not free from difficulties and objections, some of which may here be indicated. The first difficulty will occur in the selection of the staple crop or staple crops for each district, and on this point the opinion of the Government of Bengal and its local officers is very desirable. Is it possible to select in each district one or more staples which are so generally cultivated as to be fairly indicative of the agriculture of the tract? The Select Committee have restricted the staples to food-crops; the objection to the inclusion of other staples such as jute and indigo being that they are grown for export in place of food-crops, and are subject to such great fluctuations in prices as to afford no reasonably stable standard of comparison. If staple crops can be selected, it will then be necessary to ascertain whether trustworthy price-lists for past years exist or can be now prepared, and what arrangements are possible in the future. Assuming that these points can be satisfactorily settled, the practical effect of the proposed method of enhancement should be considered. Is it safe to presume, in the absence of evidence to the contrary, that because the price of the staple crop of a district has increased in that district by 20 or 30 per cent., the gross value of the crops produced on any particular holding has increased in the same proportion? And, if this inference be fair, is it further permissible to assume that the rent may be enhanced in exact proportion to the rise in prices, or should some deduction be made to cover the increased cost of production? An increase in prices, again, may possibly be due to temporary or local causes, as, for instance, recurring bad harvests in the tract itself or in adjoining tracts. Can the price-lists be made to distinguish the permanent from the temporary rise in prices, and the occasions when the tract has benefited from the rise from those when it has suffered, or must this be left to the discretion of the Courts? Lastly, is the fluctuation of prices recorded at the head-quarters of a district or a sub-division a true index to the fluctuations which attend prices obtained by the cultivator in his village? These are some of the questions which require to be considered in connection with the scheme. They point to the impracticability of devising any method of enhancement that can be worked in a purely mechanical way. And this the Bill admits by the provision requiring the Courts not to decree any enhancement which is unfair or inequitable. The question, therefore, which the Government of India would have the Government of Bengal consider is whether this provision is sufficient to guide the Courts in applying the price-lists in enhancement-suits, or whether any other considerations to which the Courts ought to have regard should be more definitely stated in the Bill.

14. The provisions for commuting grain-rents to money-rents also demand attention. In regard to the method of commutation, it would probably be desirable that the officer should ordinarily look to the analogy afforded by the prevailing money-rents for similar land, but that the result should be checked by the average rent which the landlord has hitherto received—in other words, by the test of experience. If the latter alone were to be regarded, it is obvious that, as Mr. Reynolds points out, a deduction should be made for the risks and other burthens which the tenant assumes in undertaking a money-rent; but if the prevailing money-rent is taken as the primary guide, these risks and burthens will *ex hypothesi* have been ordinarily discounted. The provisions, therefore, seem to the Government of India to be fair and equitable; but His Excellency in Council will be glad to receive the Lieutenant-Governor's views on the point.

15. *Non-occupancy-raiyats* (Chapter VI).—The point on which most difficulty will be felt as regards this class of raiyats is the omission from the Bill of all restrictions on the rent which a landlord may demand from the raiyat on his first entry upon a holding. The Government of India, as already said, agrees with the Select Committee as to the necessity for abandoning a maximum rate

of rent fixed in terms of the gross produce, and is inclined also to think that the Bill goes sufficiently far in protecting the non-occupancy-raiyat during the period in which he is acquiring rights of occupancy. The great safeguard for raiyats of this class will lie in the broad basis on which the occupancy-right is constituted by the Bill, and in view of this the Government of India would be prepared to accept the proposals of the Select Committee. But before coming to a final conclusion on the matter, it would be glad to learn the views of the Government of Bengal. The Government of India accepts the proposal of the Committee to give the non-occupancy-raiyat when enhancement is demanded a five years' lease at a judicial rent as a substitute for compensation for disturbance. This provision also serves to some extent to secure the object of the abandoned maximum based on a proportion of the gross produce, and affords the non-occupancy-raiyat a better chance of acquiring occupancy-rights under the 12 years' rule; though, as he remains liable to ejectment at the end of the five years' term, it gives the landlord the opportunity of getting rid of a bad tenant if he chooses.

16. The Lieutenant-Governor's opinion as to the sufficiency of the protection given to under-raiyats in Chapter VII is also requested. It will be remembered that when an occupancy-raiyat by sub-letting becomes a statutory tenure-holder, his immediate tenants become raiyats, and this chapter thereupon ceases to apply to them.

17. *General Provisions as to rent* (Chapter VIII).—The only alteration in this chapter to which the Government of India would specially direct attention is the definition in section 83 of the respective rights and liabilities of landlord and tenant as to the possession of the crop where rent is taken by appraisement or division of the produce. It should be ascertained whether this definition is exhaustive, and whether it conforms to practice and custom. The opinion of local officers, especially in South Bihár, would be valuable as to the sufficiency of the provisions (sections 81—83) which deal generally with produce-rents.

18. *Miscellaneous provisions as to landlords and tenants* (Chapter IX).—The registration-procedure in respect to landlords' improvements which this chapter provides has already been noticed, and another point to which attention is invited is the manner in which the Select Committee have attempted to solve the very difficult question of abandonment by a tenant. The Government of India is disposed to accept the section (section 96) as the fairest way of dealing with the conflicting interests of landlord and tenant in such cases. The Lieutenant-Governor's opinion is further invited to the provision of section 101 (standards of measurement) and to the criticisms of the dissentient members of the Committee on the sections relating to the appointment of managers. The chief objections taken to the sections last mentioned are that the law which they are intended to re-enact is practically obsolete, and that they are unnecessary in the present state of society. On the other hand, the Government of India observes that these provisions were very generally approved by the District-officers who reported on the original Bill.

19. *Record-of-rights and settlement of rents* (Chapter X).—In this chapter the first point which should be considered is whether the powers conferred or conferrable on the Revenue-officer charged with the preparation of the record-of-rights are sufficient for the purpose in view. The Revenue-officer must have authority to compel parties to attend to give evidence, to point out boundaries, and to otherwise assist him in his inquiries. He must also have power to enter upon, survey and demarcate land, and to examine its character and productive powers. Under section 223 the Local Government is competent to confer certain powers on Revenue-officers, and these will probably be sufficient for the purpose, but it would be well if the provisions of the Bill in this respect were carefully examined by an officer versed in settlement-procedure. It should also be considered whether the particulars to be included in the record are stated with sufficient fulness in section 111. As the enumeration there given is not exhaustive, the Local Government in issuing an order under the section would be able, if necessary, to add to or vary it. If, however, there is any obvious omission, it might be well to correct it.

20. The second question concerns the important change which has been introduced into the procedure for framing the record-of-rights. All undisputed

entries will simply be presumed to be correct in any future proceeding between the parties until the contrary is proved. Disputed entries will be decided by the Revenue-officer according to the regular procedure of a Civil Court, and his decision will have the force of a decree. As regards the undisputed entries, the Government of India agrees with the Select Committee as to the undesirability of attaching more than a disputable presumption to them. As to disputed entries, however, the Government of Bengal should consider whether the Revenue-officer is capable of disposing in the manner provided of every class of case which may arise, or whether he should have the power to refer any case of special difficulty or importance to the ordinary Civil Courts. It should also be considered how the proposed appointment of a special Judge or special Judges to hear appeals from the Revenue-officer is likely to work in practice, especially where the paucity of such cases would render it undesirable to appoint a separate officer for the work. The Government of India would like to have some indication of the way in which the Government of Bengal would propose to give effect to this provision. The Select Committee evidently contemplate that the special Judge or Judges should be familiar with the local agricultural system, and should also be judicially qualified for the office. And the point for the Local Government to consider is whether these requirements can be adequately satisfied.

21. Passing now to the sub-chapter *Settlement of Rents*, the Government of India would invite attention to three points—(1) the appellate procedure as described in the Report of the Select Committee; (2) the restriction of the Settlement-officer's powers in regard to the alteration of existing rents; (3) the prohibition of enhancement-suits for a term of 15 years after the preparation of the rent-roll. As regards the first point, the Government of India will not add anything to the remarks of the Select Committee, but would like to have the opinion of the Government of Bengal on the proposal. As regards the second and third points, it will be noticed that the Settlement-officer will exercise no powers with respect to the rents of non-occupancy tenants or of sub-tenants beyond recording existing facts: with respect to the rents of occupancy-tenants and tenure-holders his powers are similarly restricted, unless an application that the rent should be altered is made by either landlord or tenant. But whether any alteration is made or not in the rent of an occupancy-tenant or tenure-holder, the rent recorded by the Settlement-officer is not to be enhanced during a term of 15 years, except on the ground of a landlord's improvement or of an alteration in the area of the holding. This provision has been objected to from the landlords' point of view, and its equitableness should be carefully considered. The obvious advantage of the provision is that it secures the settlement of rents throughout the area by a specially qualified officer with special facilities for dealing with this class of cases; and it can be defended on the ground that, as the landlord is given the opportunity of enhancing by means of a special Court the rent of any occupancy-holding which seems to be held at an unduly low rent, he may be trusted to avail himself of this power, and all rents which he is content to leave as they are may be presumed to be adequate, and as such suitable to be confirmed for a term of years. On the other hand, one of the objections taken is that litigation is stimulated and enhancement-suits forced on, which the landlord would otherwise have been willing to postpone. That there is some force in this must be admitted; but looking to the fact that a settlement of rents will not be undertaken unless the relations between landlord and tenant are unsatisfactory and litigation is impending, the Government of India is disposed to accept the proposals of the Select Committee as, on the whole, most favourable to the true interests of both parties. It may be well to notice that, as the Settlement-officer will have no power to alter the rents of non-occupancy-tenants, the ordinary provisions of Chapter VI as to enhancement will continue to apply to them, notwithstanding a settlement of the rents of the occupancy-tenants. Your attention has already been called in paragraph 4 to the Secretary of State's remarks regarding the general introduction of a survey and record-of-rights, and the Government of India would be glad to learn in what way and to what sort of areas the Lieutenant-Governor thinks it would be expedient to apply the procedure which the Bill provides for making records-of-rights and settlement of rents.

22. *Tables-of-rates* (Chapter XI).—The Select Committee have explained that, though the procedure under this chapter with only a few minor alterations has been retained, its use will probably be confined to special tracts, and it is no longer so important a feature in the Bill as it was in the original draft. The practical utility of the table in any tract is the question which the Government of India would now like the Government of Bengal to consider. Assuming that it is found possible for a Revenue-officer to frame rates of rent for different classes of land, and that these rates are on the whole equitable, it is certain that, if the land can be brought under the right class, the procedure of the Courts will be very greatly facilitated; but there still remains the difficulty that the Civil Court may often have to ascertain by local inquiry to what class or classes of land the holding belongs when a suit to enhance the rent is instituted under section 134. If the land is of fairly even quality, or falls into clearly marked classes, there may be no room for a dispute on this point. But if this is not the case, and the tenant contests the landlord's classification, the local inquiry might be charged with delicate questions of land-valuation, and it is no disparagement of the Civil Courts to say that they have rarely at their command subordinate agents capable of discharging these duties satisfactorily. These difficulties are by no means conclusive as to the inutility of the table-of-rates, but they seem to deserve consideration.

23. *Record of proprietors' private lands* (Chapter XII).—With this chapter should be read section 30, which in its restriction of the accrual of occupancy-rights in this class of lands is understood to be in literal conformity with the existing law. The combined description and definition of this class of lands which the Select Committee have substituted for the definition in the Bill will so far meet the landlords' objections in that they allow greater weight to be attached to local custom by the Court or Officer engaged in determining what are private lands. The assumption also that all land must be either *khámár* or *raiyatí* has been excluded from the Bill. The Government of India is disposed to accept the Select Committee's solution of a very difficult question. It will be noticed that by section 30 the acquisition of occupancy-rights in land recorded as *khámár* or *zeraat* is not prevented when the tenant holds otherwise than on a lease for a term of years or on a lease from year to year.

24. *Distraint* (Chapter XIII).—The Select Committee have substantially retained the provisions of the original Bill with the minor alterations specified in their report. They have not, on the one hand, seen their way to reverting to the procedure of the present law as advocated by the landlords, nor have they accepted the suggestion of the Government of Bengal to abolish distraint altogether with respect to occupancy-raiyats while retaining it in its present form (though with sharper penalties in the case of abuse) for non-occupancy and *korfa* raiyats. The Government of India is satisfied that, if distraint is to be maintained at all, the process can no longer be left to the unsupervised action of the zamíndárs' servants, and the reference to the Courts is an essential safeguard. It would be well, however, for the Government of Bengal to examine what foundation there is for the criticism that the delay caused by obtaining the aid of the Court before the first step to distrain can be taken must deprive the process of its utility. In considering this point the effect of the new provision enabling an *interim* order to be issued by the Court (section 111 (3)) should not be overlooked. As regards the former proposal to abolish distraint in the case of occupancy-tenants, the Government of India is inclined to doubt the universal correctness of the argument that in the saleability of the occupancy-right the landlord has perfect security for his rent. The occupancy-right must vary greatly in value in different districts; and where the population is sparse and land abundant, it may very possibly be unsaleable. It would seem, therefore, that the process of distraint should apply to both classes of raiyats. It has, moreover, been suggested that in the case of an improvident peasantry a remedy against the crop may be a more humane process than the remedy against the land. For these reasons the Government of India would be willing to consider any suggestions for still further improving or cheapening the procedure adopted by the Select Committee, and, with reference to the doubts above expressed as to the effects of delay, commends the question specially to the consideration of the Government of Bengal.

25. *Judicial procedure* (Chapter XIV).—The several questions in connection with this chapter on which the Select Committee specially desire to have the advice of the Bengal Government have already been noticed. The specific proposal put forward by the zamíndárs with the view of shortening the procedure in rent-suits was that a landlord should be permitted to institute a collective suit against any number of tenants belonging to one village by means of a single plaint. The advantages claimed for this procedure appear to be (1) the reduction in the stamp-duty and possibly in pleader's fees; (2) the possible reduction of process-fees, as the notices could be served by one process-server on the same date on all the defendants, and possibly also on the plaintiff's witnesses; (3) the hearing of the cases on the same date. It is obvious that all advantage from this procedure ceases from the appearance of the parties in Court. Each case would have to be heard separately, and would require a separate decree and separate execution-process. The merits of the scheme are thus very limited; but as the zamíndárs have laid much stress on it, the Government of India would like it to be carefully considered by the Government of Bengal. It may, however, be observed that the advantages claimed for the scheme might, to a great extent, be obtained by executive orders under the existing law. The stamp-duty on rent-suits might, for instance, be reduced, and a lower scale of fees prescribed for processes issued on the same day on persons residing in the same village. It must, however, be borne in mind that any proposal to reduce court-fees, either generally or in rent-suits, cannot be considered with exclusive reference to Bengal.

26. The possibility of facilitating the service of the summons might also be considered, and the Government of India, as already mentioned, proposes to ask the advice of the High Court on this chapter. But it will gladly welcome any suggestions which local officers may offer for attaining the object of a speedier and cheaper method of recovering arrears, provided always that it does not jeopardise the raiyat's right to have his case fully heard, and that it does not require him to pay money into Court before his liability to pay is established. The Committee aim at securing an important and very necessary reform by the provision of section 164. It is desirable to know if in the opinion of local officers the section is sufficient to fulfil this purpose.

27. By Chapter XVI the method of summary sale is made applicable to tenures other than *patní* tenures which may hereafter be registered. It is expedient that no time should be lost in considering this scheme for registering tenures, so that, if it be found feasible, it may be introduced into the Bengal Council at an early date.

28. The remaining chapters of the Bill, though they require to be carefully examined by the Government of Bengal, do not call for detailed remark in this letter. There is one point, however, in Chapter XVII *(Contract and Custom)* to which reference may be made. By section 210 (*b*) a raiyat is prevented from contracting himself out of the incidents of the occupancy-right specified in section 31, and among these incidents is the right of transfer. The Government of India has refrained from re-opening in this letter the much-discussed question of the expediency of conferring the right of transfer on the occupancy-raiyat. The question was fully considered by the Government of Bengal in its letter of the 27th September, and the Select Committee have adopted the view there set forth. It has, however, been urged by the zamíndárs that the raiyat might at least be given the power of contracting himself out of this right, and that by means of such a provision a landlord could prevent the acquisition of occupancy-holdings by money-lenders and speculative land-jobbers. Such a provision is open to numerous objections, but the suggestion, as well as the similar suggestion that a raiyat should be allowed to contract himself out of the right to sublet, may be brought to the notice of His Honour the Lieutenant-Governor.

29. In conclusion, I am to request that the reply to this letter may be so sent as to reach this Government not later than the end of August.

No. 785, dated Simla, 5th May, 1884.

From—D. FITZPATRICK, Esq., Secy. to the Govt. of India, Legislative Department,
To—The Registrar, High Court, Calcutta.

I am directed by His Excellency the Governor General in Council to request you to invite the attention of the Hon'ble the Judges of the High Court to the Report of the Select Committee on the Bengal Tenancy Bill, published in the *Gazette of India* on the 29th March and the 5th and 12th April, and especially to paragraph 90 of the Report, in which the Committee state that they would be glad to have the advice of the Hon'ble the Judges on several matters connected with the Bill.

2. The particular points mentioned by the Committee are—

(*a*) What modifications it may be desirable to make, whether by rules or otherwise, in the Code of Civil Procedure, with a view to expedite the trial of rent-suits, and in particular whether it is desirable that landlords should be empowered to institute, by means of a single plaint, suits for arrears against a number of raiyats holding independently of each other.

(*b*) Whether any provision can safely be enacted restricting the right to claim a re-trial when a decree has been given *ex parte*. "We are aware," the Committee say in referring to this point, "that a judge is in no way bound to admit a re-trial unless he is satisfied that the summons failed to reach the defendant or that he was prevented by some sufficient cause from appearing; but the representations made to us are to the effect that the due service of the summons is systematically denied, and that the Courts too readily accept the plea, thus encouraging tactics the only object of which is to interpose delay and to involve the landlord in unnecessary expense in recovering his dues."

"The proposal before us," they continue, "was that *ex parte* suits should not be re-tried except upon the defendant depositing the amount decreed; but we were unwilling to adopt this proposal on the information before us, and desired that it should be referred for the consideration of the Hon'ble Judges of the High Court."

(*c*) A suggestion that a defendant in a suit for arrears should not be allowed to appeal from a decree passed against him except on depositing the amount of the decree.

3. His Excellency in Council desires me to enclose, for the information of the Hon'ble the Judges, some correspondence* which has recently taken place bearing on one of the matters submitted by the Select Committee. It will be observed that the correspondence has not yet been completed, a final reply having still to be received from the Government of Bengal.

4. His Excellency the Governor General in Council would ask the Hon'ble the Judges to give to these questions their careful consideration, as it is important that the Government should have their advice on such matters. It would be convenient if the views of the Hon'ble the Judges could reach the Government of India at an early date, in order that they may be communicated to the Select Committee before the Bill is again taken under consideration by that body; and, as the subject is still under the consideration of the Government of Bengal, I am to suggest that the Hon'ble the Judges may facilitate a decision by forwarding a copy of their reply direct to the Government of Bengal.

I am to add that the Government of India would be glad to receive at the same time any remarks which the Hon'ble the Judges may think fit to offer on the provisions of the Bill as amended by the Select Committee, and I am directed to forward a copy of a letter addressed by His Excellency in Council to the Government of Bengal on this subject.

D. FITZPATRICK,
Secretary to the Government of India.

* From Secretary to Government, North-Western Provinces and Oudh, No. 5A., dated 30th January, 1882, paragraph 5 *et seq.*
From Secretary to Government of India, Revenue and Agricultural Department, to ditto, No. 1006 R., dated 26th October, 1883.
From Under-Secretary to Government, Bengal, No. 716—303 L. R., dated 26th February, 1884, with enclosures.
From Secretary to Government, North-Western Provinces and Oudh, to Secretary to Government of India, Revenue and Agricultural Department, No. 422, dated 3rd March, 1884, and enclosures.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 7th MAY 1884.

GENERAL REMARKS.—Rain has fallen generally in Bengal Proper, Assam, Madras and Coorg, and there have been local showers usually accompanied by thunder-storms in most of the other provinces.

Harvesting continues in the Madras Presidency, and the prospects of the standing crops are good. In the Bombay Presidency the *rabi* harvest is over, except in three districts, and *kharif* operations have commenced in parts. Some damage has been done to the *rabi* crops in Hyderabad by recent rain. In Berar the *kharif* is being sown. In Central India and Rajputana the crops have been gathered; the weather is warm and seasonable, and there have been slight showers at Abu and Ajmere. Harvesting is in progress in the Punjab; *kharif* sowings have also commenced in canal-irrigated lands in the Hissar district. In the North-Western Provinces and Oudh easterly winds have prevailed during the week, and storms accompanied by rain and hail have occurred in several districts.

The *rabi* harvest is over, and markets are generally well supplied. A scarcity of fodder is still felt in places, but the general condition of cattle is reported to be good.

No rain fell in the Central Provinces, though the sky has occasionally been cloudy. The *rabi* crops are being threshed and winnowed, and land is being prepared for the *kharif*.

In Bengal ploughing is in active progress in districts where rain has fallen. Rain is urgently needed in Behar and Chota Nagpore. Harvesting of the *boro* paddy crop has begun, and the early paddy crop is being sown. In Assam agricultural prospects are good, but the weather is unfavourable to tea in Kachar. Indications of the setting in of the south-west monsoon are reported from British Burma.

Mortality from small-pox is abating in Bengal and the North-Western Provinces and Oudh, but the disease is still prevalent in those provinces, Madras, Bombay, and Burma. Cholera is generally slight, except in parts of Bengal and Madras.

There is no marked fluctuation in prices. A slight rise is noticed in some districts of the Punjab.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 7th)		
Bellary ...	·22	Harvest of sugarcane, yield average; cotton below average. Cholera sporadic in the west.
Kurnool ...	·05 (average)	Harvest of paddy, yield average. Small-pox and cattle-disease in parts.
Ganjam ...	·30 (average).	
Kistna ...	·01 (average)	Standing crops good; harvest of indigo; castor yield below average. Small-pox prevalent; cholera, fever, and cattle-disease in places.
Chingleput (Madras) ...	.....	Standing crops good, except in two taluks; harvest of paddy, yield below average. Small-pox prevalent; 8 deaths from cholera.
Coimbatore ...	·12 (average)	Standing crops generally good; harvest of paddy, yield about average. Cholera, fever, and small-pox in parts.
Tanjore ...	·02 (average)	Standing crops generally good; harvest of paddy and dry grains, yield below average. 130 deaths from cholera.
Madura ...	·34 (average)	Harvest of paddy, yield average. Small-pox prevalent in parts; 10 deaths from cholera.
Malabar ...	·73 (average)	Third crop paddy ripening. Small-pox slight in all taluks; fever in parts.
Travancore ...	1·17	Cultivation commenced. Fever and cholera in parts; small-pox abating.
		General Remarks.—General prospects good.
Bombay—(May 7th)		
Karachi ...	No rain	River at Kotri on 5th, 6 feet 6 inches against 8 feet on same date last year. Fever in six talukas; some cattle-disease in four talukas; no fresh cases of small-pox in Karachi since 12th April; disease in 22 villages in districts, 42 fresh cases, 8 deaths, 38 remaining sick. *Kharif* preparations commencing. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Dadu 36 and 44, in Ghorabari 22 and 32, and in Sujawal 26 and 36 pounds per rupee respectively.
Hyderabad ...	.....	River at Kotri on 5th, 6 feet 8 inches against 8 feet on same date last year. Small-pox in eleven, fever in three, and cattle-disease in two talukas. Prices of grain steady, except *juari*.
Ahmedabad ...	.....	Cotton-picking completed. Manuring operations commenced in some talukas. Fever and small-pox in Viramgaum and Parentij. Wheat 29 and *bajri* 32 pounds per rupee.
Baroda ...	.....	Cholera continues in Baroda, 24 deaths; measles and small-pox in Amreli. Harvesting of *rabi* completed; cotton-picking in progress. Prices—*bajri* 32 and rice 23 pounds per rupee.
Surat ...	.....	*Rabi* harvest progressing. Cholera in Surat, Chorasi, and Bardoli talukas, 17 cases, 9 deaths. *Juari* 36 and *nagli* 45½ pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik ...	.....	Public health generally good; small-pox in parts of Nasik, Sinnar, Chandore and Kalvan talukas; 6 deaths from cholera in Igatpuri and 1 in Nandgaon taluka during the week. Wheat 34½, *bajri* 31, and rice 21 pounds per rupee.
Colaba (Bombay) ...	.....	Abnormal temperature 0° to 1° cool; vapour in air normal; wind normal.
Poona ...	...\.	Small-pox continues in five talukas. Prices—*bajri* 34 and *juari* 35; in Poona *bajri* and *juari* 26 pounds per rupee.
Ahmednagar ...	.....	Public health good. Threshing continues in parts; preparation of land for next season commenced. *Bajri*—maximum 54 pounds in Akola, minimum 33 in Kopergaon; *juari*—maximum 60 in Sangamner, minimum 35 in Karjat.
Sholapur ...	No rain	Harvest operations completed. Weather hot. *Juari* 13 and *bajri* 12 pounds per rupee.
Dharwar ...	Rain throughout the district; maximum 3·30 in Kod, minimum 0·11 in Dharwar.	More rain wanted in Dharwar and Gadag talukas, and at Nargund Petha where drinking-water is scarce. Harvesting of *juari* and cotton-picking nearly over. Small-pox generally prevalent; fever in three and cattle-disease in five talukas; no fresh cases of cholera in Navalgund. Rice 26 to 40 and *juari* 49 to 79 pounds per rupee.
Kanara ...	.....	No report received.
Rajkot ...	.....	General health good. Weather hot. Fever continues in some parts of the province; small-pox still prevalent. *Bajri* 32 and *juari* 30 pounds per rupee.
		General Remarks.—Slight rain in parts of Dharwar, Belgaum, Kaladgi, Shikarpur, and Upper Sind Frontier. *Rabi* harvest completed, except in three districts; *kharif* preparations commenced in Ahmednagar and Karachi. Cholera in parts of six districts; small-pox generally prevalent; fever and cattle-disease in some districts.
Bengal—		
Chittagong ...	3·81	Weather unsettled. Standing crops somewhat damaged. Cholera and cattle-disease linger, but cases are rare. Prices stationary. General health fair.
Dacca ...	1·46	Sowings of *aman* and *aus* continue; harvesting of *boro* paddy almost completed; prospects of crops good.
24-Pergunnahs (Calcutta)	2·18	No crops on the ground; land being prepared; sowing of early paddy begun. Price of common rice stationary. Cholera and small-pox abating.
Moorshedabad ...	·29	Weather unsettled. Rain threatening. *Boro* paddy being transplanted and *aus* sown. Rice selling at from 13 seers 8 chittacks to 17 seers per rupee. Public health improved, but cholera still continues.
Rajshahye ...	·52	Weather cloudy and cool. Agricultural operations proceeding vigorously. Rain has done much good. Cholera considerably abated.
Burdwan ...	1·17	Agricultural operations continue satisfactory.
Rungpore ...	1·04	Weather cloudy. Prospects of crops good. Prices of food-grains falling slightly. Public health fair.
Bhagalpur ...	·75	*Cheena* being cut in some places; *mung* and paddy seedlings in the north still doing well; *mohua* pickings completed; mango suffered somewhat from hailstorms and high winds. Common rice 13 seers and 14 chittacks per rupee. Prospects of crops improved.
Purneah ...	1·88	Standing crops promise well, but are backward; sowings being completed. Common rice 14 seers. Public health fair.
Patna ...	...	Cotton and castor harvesting per rupee going on. Rain wanted everywhere. A few cases of cholera reported from Barh town.
Durbhunga ...	1·8	Rain has proved beneficial to agricultural operations, but more wanted. Prices stationary. Public health good.
Hazaribagh ...	1·10	Weather clear and hot. Rain has enabled cultivators to commence ploughing. Prices continue high. Public health good.
Cuttack ...	*Nil.*	Weather warm and cloudy at times. Nights cool. Ploughing progressing; lands being manured, but rain wanted. Price of rice stationary. Public health generally good; sporadic cases of cholera reported from the interior.
		General Remarks.—There has been rain in almost all districts of Bengal Proper, especially in the eastern districts; in Durbhunga, Bhagalpur, Purneah, Santhal Parganas, and Hazaribagh the rainfall has been moderate; rain is very urgently wanted in several districts of Behar and Chota Nagpore; the recent rain has facilitated ploughing which is being pushed on vigorously in many districts. *Boro* paddy harvesting and early paddy sowing commenced in some places; mango crop very poor. Prices almost stationary. Cholera and small-pox abating, though in some places they are still prevalent.
N. W. Provinces and Oudh—(May 7th)		
Benares (May 6th)	No rain	Days hot, nights cool. Strong easterly winds. Cane being irrigated. Cholera continues; small-pox decreasing; fever in places. Price steady. Mild cattle-disease in Pargana Kolasah.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Allahabad (May 6th)	.....	East wind, with clouds and threatening of rain. A little cholera of a sporadic kind reported and small-pox of a mild type continues, but general health is good. Prices stationary. Water and grass scarce.
Gorakhpur („ 5th)	Rain fell on 5th	Weather stormy. Crops already reaped, but threshing will be injured. Small-pox decreasing. Prices steady.
Jhansi („ 6th)	.....	Weather becoming hot. Threshing and winnowing of crops over. Prices show a tendency to rise. Health of people and cattle fairly good. Scarcity of water and fodder continues.
Fatehgarh („ „)	Heavy rain on 5th, 1·2 at Kanouj.	East wind for some days; yesterday thunderstorm broke over the district with rain, the heaviest of all reported yet. Health of people fair. Grain nearly threshed out.
Agra („ 5th)	No rain	Harvesting nearly completed. Fever and small-pox in two parganas; slight sporadic cholera in city. Prices steady.
Bareilly („ 6th)	About ·05 on 3rd instant.	Rain beneficial in many respects. Market steady. Public health good.
Almora („ „)	No rain	Some cases of small-pox, otherwise health good; cattle-disease continues. Prices stationary. *Rabi* mostly cut.
Meerut ...	No rain	Frequent duststorms, latterly high east wind. *Rabi* harvest completed; new grain coming into market; export of wheat partly recommenced. Health good. Prices steady.
Kumaon ...	.....	No report received
Lucknow (May 6th)	Occasional slight showers and hail.	East winds. Sky cloudy. Health of people and cattle good. Markets well stocked. Prices steady.
Partabgarh ...	.....	No report received.
Sitapur (May 6th)	.....	Easterly winds and weather cloudy. Bazars plentifully supplied. Prices steady.
Fyzabad („ „)	No rain	Irrigation of sugarcane and sowing of indigo continue. Small-pox and cholera in parts of district; condition of cattle good.
Rae Bareli („ 5th)	.....	Variable winds, hailstorm on the evening of the 3rd said to have extended over a large portion of the district; no reports of damage received yet. *Rabi* harvest completed. Small-pox very prevalent. Prices stationary. Markets well stocked.
Cawnpore („ „)	.....	Weather occasionally cloudy and slight drizzle on 5th. Sugarcane and indigo being watered. Prices steady. Slight sporadic cholera in the city, and in some parganas small-pox still lingers, otherwise health of people good.
Farukhabad ...	.....	No report received.
		General Remarks.—Rain during the week, sometimes accompanied by hail, fell in Gorakhpur, Lucknow Rae Bareli, Cawnpur, Farukhabad, and Bareilly. The harvest is over. Prices steady, except in Moradabad and Jhansi. Small-pox decreasing, save in Rae Bareli, two parganas of Agra and one pargana of Aligarh, where it has exhibited itself in a mild form; slight sporadic cholera in Allahabad, Cawnpur, Agra and Benares, but the health of the people continues good. Fodder is scarce in Moradabad, while a scarcity of fodder and water continues in Jhansi, and is now felt in Allahabad. Cattle-disease continues in Kumaon, and in a milder form in one pargana of Benares, but the general condition of cattle is good.
Punjab—(May 6th)		
Delhi ...	.....	Small-pox abating. Harvesting in progress, yield below average. Prices fluctuating.
Hissar ...		General health good; a few cases of cattle-disease in Rohtak district. *Kharif* sowings commenced on canal irrigated lands. Prices slightly rising.
Umballa ...	.....	Health good. *Rabi* harvesting in progress, yield below average. Prices stationary.
Jullundur ...	.....	Health good. Wheat being threshed. Prices steady.
Amritsar ...	.....	Health good. *Rabi* harvested. Prices almost stationary.
Sialkot ...	.....	A few cases of small-pox in city. *Rabi* harvested and yield very good. Prices falling.
Ferozepore ...	.....	Health good. Harvesting in progress. Slight rise in prices.
Lahore ...	.....	Health good. Prices stationary.
Rawalpindi ...	·01	Health and *rabi* prospects good. Rise in prices.
Mooltan ...	Drizzle at Sadr	Health and crops good. Prices fluctuating.
Dera Ismail Khan ...	.....	Health and crop prospects fair. Prices almost stationary.
Peshawar ...	Slight drizzle	Health good. *Rabi* harvesting in progress. Prices rising.
		General Remarks.—Slight rain in a few districts. Small-pox is slightly prevalent in the Delhi and Sialkot districts, and there is disease among cattle in the Rohtak district and in the Kushab tehsil of the Shahpur district; health in the Dera Ismail Khan district is fair, elsewhere it is good. *Rabi* harvesting in progress.
Central Provinces—(May 7th)		
Nagpur ...	.....	Weather very sultry and cloudy. Ground being prepared for *kharif* sowings. Measles and small-pox slight; cattle-disease in places. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces— *contd.*		
Jubbulpore ...	.....	Weather hot. Threshing and winnowing continue. Health good. Wheat 26 and rice 13 seers per rupee.
Saugor (May 6th)	.....	Weather seasonable. Threshing and winnowing continue. Small-pox slight. Prices steady.
Seoni ...	.....	Weather cloudy and warm. Winnowing and ploughing progressing. Cattle-disease in some parts. Prices of wheat stationary, of rice slightly risen.
Hoshangabad ...	.....	Weather hot and cloudy. Winnowing continues. Small-pox, 15 cases. Wheat 20, rice 11, and *jauri* 20 seers per rupee.
Khandwa ...	.....	Weather warm, with occasional clouds. Prospects good. *Kharif* preparations continue. *Juari* 24, rice 12½, and wheat 16 seers per rupee.
Raipur ...	.....	Weather occasionally cloudy. Land being prepared for *kharif* sowings. Public health good; cattle-disease in Drug, Dhamsari and Sunga, but slight. Prices steady.
Sámbalpur (May 3rd)	.....	Weather cloudy and cooler. Prospects good. Health good. Common rice 29 seers per rupee.
		General Remarks.—Weather hot. Prospects good. Health good; cattle-disease prevails in some parts.
British Burma— (May 7th)		
Akyab (May 3rd)	.....	Seven deaths from small-pox in Naaf circle; 45 buffaloes and 50 cows died in Writtang, west township. Price of paddy Rs. 30 per 100 baskets in town, Rs. 28 to 30 in Naaf, and Rs. 21 to 22 elsewhere.
Rangoon („ „)	*Nil*	Total rainfall 0·31. Six fatal cases of small-pox; no cholera reported. Price of *ngakyouk* paddy Rs. 94 to 95 per 100 baskets and *ngasein* paddy Rs. 98.
Bassein („ „)	.....	Two deaths from small-pox in town; 153 deaths of cattle in Thabong; 6 in Yegyi and 4 in Bassein township. Price of paddy Rs. 90 per 100 baskets.
Amherst (Moulmein) („ „)	0·54	Total rainfall 1·14. Small-pox prevalent in six circles; in Moulmein 1 case of small-pox reported. Price of paddy Rs. 95 per 100 baskets.
Toungoo („ „)	1·0	Total rainfall 2·18. Public health good. Price of paddy Rs. 75 per 100 baskets.
Kyoukphyoo („ „)	*Nil*	Total rainfall 0·55. Fever still prevalent; cattle healthy. No fluctuation in price of food-grains.
Sandoway („ „)	*Nil*	Total rainfall 0·02. Two deaths from cholera in Gwa town and 1 from small-pox in Satthwa circle. Price of paddy Rs 65 to 70 per 100 baskets in central township and Rs. 60 in southern township. Weather warm.
Hanthawaddy („ „)	.....	Ten deaths from cholera in Hmawbi township; health of cattle good. Price of paddy from Rs. 100 to 125 per 100 baskets.
Pegu („ „)	.....	No report received.
Tharrawaddy („ „)	*Nil*	Total rainfall 0·60. Small-pox reported as prevalent in Monyo Gyabingouk and Tapein townships; 11 deaths of cattle in Livinbyin, 61 in Myodwin, 11 in Zegon, and 1 in Mozagyaw circles. Price of paddy from Rs. 92 to 102 per 100 baskets.
Prome („ „)	0·1	Total rainfall 0·31. Three deaths from cholera and 11 from small-pox in town; 4 deaths of cattle in Shwele and 20 deaths in Mahathaman township; price of paddy Rs. 97 per 100 baskets.
Thonegwa („ „)	*Nil*	Total rainfall 1·52. Eleven deaths from cholera in Myoma, 1 in Mgabu, 1 in Tayi circle of Yandoon township, two deaths in Myoma, 3 in Pathine, and 1 in Zayathla circle of Patanaw township; cattle healthy. Price of paddy Rs. 100 to 105 per 100 baskets.
Henzada („ „)	.....	Six deaths out of 23 cases of small-pox in town; 17 deaths out of 30 cases of cholera in Myanoung town, 1 in Gyaungkwi and 1 in Daubi circle. Price of paddy Rs. 100 to 105 per 100 baskets.
Thayetmyo („ „)	0·10	Total rainfall 1·10. Seven deaths from cholera in town, 2 in Allanmyo; 17 deaths of cattle in Pato circle. Price of paddy from Rs. 90 to 110 per 100 baskets.
Shwaygyin („ „)	*Nil*	Total rainfall 2·13. One death from small-pox in town; cattle healthy. Price of paddy Rs. 75 per 100 baskets.
Tavoy („ „)	*Nil*	Total rainfall 0·91. Seven deaths from small-pox in town. Price of paddy Rs. 68 in town and Rs. 62 in district.
Mergui (Apl. 19th)	·08	Total rainfall 1·93. Public health good. Cattle healthy. Price of paddy Rs. 85 to 90 per 100 baskets.
Do. („ 26th)	2·0	Total rainfall 3·93.
		General Remarks.—Cholera and small-pox in various districts, but not serious; health of cattle generally good. Symptoms of south-west monsoon. Price of paddy unchanged.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(May 7th)		
Gauhati ...	2·0	Weather getting hot. Small-pox reported from Shastra Barpetta. Sowing of *ahu* paddy not finished. Prospects good. Public health fair.
Sylhet ...	2·98	Agricultural operation progressing satisfactorily. Small-pox and cholera still reported.
Cachar ...	1·84	Weather unaccountably cool for the season, little tea leaf growing in consequence. Ploughing and sowing of *dumahi* and *murali* crops continue. Common rice 12 13/16 seers per rupee. Nineteen deaths from cholera and 14 from small-pox reported.
Dibrugarh ...	1·09	Weather getting warm. Ploughing for *sali dhan* commenced. Public health good.
Mysore and Coorg— (May 7th)		
Mysore ...	2·65; slight rain has also fallen at Tumkur and Kadur.	Crops in Bangalore and elsewhere in good condition; harvesting of *vysakha* paddy continues in parts; prospects favourable. Small-pox decreasing. Prices steady.
Mercara ...	2·2; heavy showers of rain daily.	Ryots engaged in ploughing their fields. Planters have sustained heavy losses from fall in price of coffee.
Berar & Hyderabad— (May 7th)		
Amraoti ...	.....	Weather close and hot. Preparations for *kharif* sowings progressing. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Preparations for *kharif* sowings continue.
Hyderabad (May 6th)	·22 (average)	*Rabi* crops slightly damaged by rain of week; reaping of *rabi* crops commenced. General health of talukas good; no sickness. Prices—wheat 14¾, white *juari* 15½, yellow *juari* 19, coarse rice 10½, and *tur* 18 seers per current sicca rupee.
Central India States— (May 8th)		
Indore ...	.....	Weather warm; nights cool. Health good. Prospects favourable.
Morar (Gwalior) ...	.....	Weather warm. Health good. Prices stationary.
Sutna ...	.....	Four cases of cholera in Rewah, 2 deaths, no fresh cases since 2nd. Weather hot. Prospects fair.
Neemuch ...	.....	Health good. High winds.
Nowgong ...	.....	Weather hot. Public health good.
Goona ...	.....	Health and prospects good.
Bhopawar (Manpur) ...	.....	Cholera reported from Lowani (Indore) and Manawar (Gwalior), particulars not received; slight cholera reported from Burwani.
Agar ...	.....	No report received.
Sehore ...	.....	Weather seasonable. Prospects and public health good.
Rajputana—		
Abu (May 7th)	·41	Rain yesterday, with thunder and lightning; now clear and pleasant. Weather seasonable.
Sirohi („ 4th)	.....	Tanks dry; wells fair. Health good. Weather cool for the time of year.
Marwar („ 2nd)	.....	Cloudy, with lightning. Few drops on 1st, since clear. Water obtained in Jodhpore city from Ranisur tanks and wells. Health good. Weather warm, but no hot winds yet. Prices stationary, though with tendency to rise.
Meywar („ 4th)	.....	Tanks, wells, and health good. Crops harvested. Weather seasonable.
Harowti („ 3rd)	*Nil*	Weather seasonable, but cloudy. Some fever and small-pox.
Jhallawar („ 2nd)	.....	Weather seasonable. Small-pox less.
Ajmere („ 6th)	·02 on 2nd	Weather seasonable. Health fair.
Jeypore („ „)	*Nil*	Weather cloudy occasionally. Health fair. Prices steady.
Ulwur („ „)	.....	Wells failing. Two cholera cases in Mundowur, 1 ended fatally; fever and small-pox continue in Ulwur tehsil. Weather hot.
Nepal— (May 2nd)		
Katmandu	1·62	Weather stormy, with much thunder and lightning. The recent heavy showers have rather damaged the spring crops; Indian-corn is now being sown.

E. C. BUCK,
Secy. to the Govt. of India.

* Passed down to supplement the Agra Canal supply.

Executive Engineer, Northern Division, Ganges Canal, reports that the demand slackened off towards the end of the month. All sugar paleo done. Rabi crops being cut and outturn of irrigated crops reported good.

Executive Engineer, Meerut Division, Ganges Canal, states that the estimate for this month is considerably under the mark, as information just received gives the result of the total at actual measurements as 130,472 acres. There is however no information with Executive Engineer by which he can classify the area by crops and districts, so the estimate is allowed to stand.

Executive Engineer, Aligarh Division, Ganges Canal, states that the demand was very strong till about the 25th of March, when harvest operations began.

Executive Engineer, Narora Division, Lower Ganges Canal, reports irrigation of kharif very much hindered by closure of Fatehgarh Branch for a fortnight on account of low supply in river.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports that there was strong demand for water up to 20th, after which date demand was slack, owing to harvest operations. Supply was very low, not more than half requirements, and no new irrigation could therefore be done.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports that demand was moderate throughout the month, cultivators being busily engaged with harvest.

Executive Engineer, Etawah Division, reports that there was only a small increase of 140 acres as compared with last rabi.

Executive Engineer, Bhognipur Division, Lower Ganges Canal, reports that no further rabi irrigation was effected.

Executive Engineer, Eastern Jumna Canal, reports that the total increase over last year is 17,000 acres, of which 15,000 is under wheat. The early cessation of rains made the ground so dry that the short supply could not irrigate much more than the wheat within reach; but there been more water there would have been a large area of barley and gram irrigated.

Executive Engineer, Agra Canal, reports that the supply was quite insufficient to bring to maturity the whole area sown with canal water, which is more than 170,000 acres.

Executive Engineer, Rohilkhand Canals, states that early in the month water was still being used for rabi, as well as for sugar "paleo," and that latterly demand was for sugar "paleo" and "kor," and in places for early rice. The supply generally was insufficient to meet demand fully, except on Baror river, where some water was running to waste. Owing to the drought most of the sugar depends on canal water.

No remarks from other divisions.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

R. HOME, *Colonel, R.E.*,

Joint-Secretary to Govt., Punjab, P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 15th May, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble D. G. Barkley.

LEGAL PRACTITIONERS' BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to amend the Legal Practitioners' Act, 1879, and the Indian Stamp Act, 1879, be taken into consideration. He said:—

"**The main proposals of this Bill are two: first, to give certain non-chartered High Courts the power of enrolling advocates of their own; and secondly, to modify the rules as to the persons from whom pleaders are allowed to take instructions.**

"There is a section in the existing Act which confers upon the Chief Court of the Panjáb a power to enrol advocates, and it is proposed by this Bill to confer a similar power on certain other Courts, such as the Court of the Judicial Commissioner of the Central Provinces, which are High Courts within the meaning of the Act, that is to say, which are the highest Civil Courts of Appeal for their provinces. The proposal has been objected to on the ground that it draws an invidious distinction between different classes of legal practitioners, and also on the ground that the vakíls of the chartered High Courts are excluded from the benefit of the measure. Both these objections appear to me to be based on the assumption that the term 'advocate,' as used in the Bill, is synonymous with 'barrister,' and that no persons except barristers are capable of being enrolled as advocates under the Bill. But that is not the case. **If members of Council will look at section 8 of the Bill, they will find that it empowers a High Court, with the previous sanction of the Local Government, to make rules as** to the qualifications and admission of proper persons to be advocates of the Court, and to enrol advocates in accordance with those rules. Under this power if a High Court, having regard to the nature of the business to be conducted, and to all the circumstances of the case, thinks it proper to admit as advocates vakíls of the chartered High Courts, it can do so. And, as a matter of fact, it appears that the Officiating Judicial Commissioner of the Central Provinces intends to make a rule to that effect.

"It is true that, if a vakíl of a chartered High Court is admitted as an advocate under these rules, he may, under the Stamp Act, be compelled to pay a second fee of Rs. 500; but we think that any hardship arising from this cause might be sufficiently met by the power of exemption which may be made by the Executive Government under the Stamp Act.

"It has been pointed out that the provisions of the Bill will, in certain details, not fit in with the judicial system in force in British Burma under the Burma Courts Act. But the Legal Practitioners' Act, which it amends, does not extend to British Burma, and there is no intention of extending it to that Province. Under these circumstances, we do not think it necessary to make any modification in the Bill for the purpose of meeting the peculiar circumstances of British Burma.

"A somewhat similar remark applies to a fear which has been expressed that a section of the Bill will have the immediate effect of repealing Act I of 1846, which is in force in the Presidency of Bombay. The Legal Practitioners' Act is not in force in Bombay, and the repealing section which we propose to insert in the Bill will not take effect in Bombay unless the Local Government extends it under the power conferred by section 1 of the Act.

"So much for the provisions of the Bill relating to advocates. The only other important provision in the Bill is one which qualifies section 13 of the Legal Practitioners' Act by adding a proviso. Under that section a certificated pleader is liable to suspension or dismissal if he takes instructions in any case except from the party on whose behalf he is retained, or a private servant of that party, or some person who is the recognised agent of that party within the meaning of the Code of Civil Procedure.

"The section was aimed at the mischievous class of *quasi*-professional intermediaries or touts who intervened between the pleader and his client. But it was found to produce inconvenience and hardship in certain cases where the client was a pardánashín woman, or was incapacitated by infirmity or old age from instructing a pleader in person, and was not in a position to employ the only intermediaries recognised by the law. Therefore, the Bill proposed, in accordance with a suggestion, which I think came from the Government of the North-Western Provinces, that in such cases the pleader should be allowed to take instructions from the relative of a client. This proposal has, however, been criticised on the ground that it affords no relief in cases where the client has no relative fit to be employed for the purpose. We thought that criticism quite just, but we found a difficulty in meeting it without relaxing the rules to such an extent as to let in the class of persons which it was our object to exclude. Under the circumstances, we think that the best course to take is to adopt the suggestion of the Madras High Court and the Vakíls Association of the Calcutta High Court, that is to say, to allow a vakíl to take instructions from any relative or friend authorised by the client, provided that the friend or relative receives no remuneration for his services.

"The proposals of the Bill under this head have been criticised from an entirely different point of view on the ground that they do not afford any protection to pardánashín women or infirm persons against the fraud that may be practised on them by relatives or others wrongfully assuming authority to instruct a pleader on their behalf or, if invested with such authority, abusing it for their own ends. But I ought to point out that this criticism applies rather to the Act which we propose to amend than to the amendment we propose to make. The section we propose to amend was, as I have explained, directed against a class of *quasi*-professional touts, and it made the pleader liable to suspension or dismissal if he took instructions from his client through any intermediate agent except in certain specified cases. Now, what we propose to do is to add to the number of excepted cases. But neither the Act which we are amending nor the Bill touches the question of the authority which the intermediary must have in order to instruct the pleader, or the mode in which he is bound to perform his duty in instructing the pleader. I am quite aware of the dangers referred to in the papers which we have had before us, and it is possible that legislation may be necessary for the purpose of meeting the malpractices to which our attention has been directed; but no such legislation can be undertaken without further inquiry, and, if it was undertaken, we should probably find that it would have to extend to other cases besides those on which a pleader is retained for the purpose of proceedings in Court. In the meantime, the most effectual safeguard against frauds of this kind is probably to be found in the jealous scrutiny which Courts ought to apply to all cases in which instructions are given either directly or indirectly by pardánashín women and infirm persons.

"We have not seen our way to adopting a suggestion of the Government of Bengal that it should be made necessary for a pleader in every case to declare the name of the person from whom he receives his instructions. We fear that it would be impracticable to carry out this suggestion, because it would, we apprehend, be found that in a large proportion of Muffassal cases it would be hard to say by whom in particular a pleader has been instructed. He often has to collect for himself the materials of his client's case by questioning various members of the family and the neighbours, by searching Court records, and so forth. And it is probable that when any person can be said, in the proper sense of the word, to be 'instructing' a pleader, his connection with the case will not remain a secret.

"The two provisions which I have mentioned were the only important provisions of the Bill as introduced, and remain the only important provisions of the Bill in its amended form. We have adopted one or two suggestions for amending the Act in minor particulars by supplying what appeared to be accidental omissions, such as the omission to confer upon a Judge of a Small Cause Court the same power to suspend, pending inquiry, a pleader or mukhtár who is charged with unprofessional practices as is conferred by the Act on other judicial officers; but we have not thought ourselves justified in extending the very limited scope of the Bill by dealing with any of the larger questions raised in the papers which have been submitted to us. For instance, we have not attempted to touch the vexed question whether barristers, like other legal practitioners, should be made capable of suing their clients and liable to be sued by them. Of course, I am aware that a barrister in this country, where he often receives instructions directly from his client instead of through a solicitor, occupies a somewhat different position from a barrister in England, who has to act through an attorney or solicitor. But I should not think of dealing with so delicate a question as this without consulting the profession generally and ascertaining their views upon the point. Again, we have not thought it proper to act on suggestions for re-opening questions which, after a good deal of discussion, were deliberately settled, in 1879, by the Act we are now amending. Of this kind are the suggestion that the distinction between pleaders and mukhtárs should be abolished; the suggestion that communications to mukhtárs should be made privileged to the same extent as communications to pleaders are under the Evidence Act; and, lastly, the suggestion that we should revert to the old rule which allowed an advocate of a High Court who had abandoned his own province to practise in any part of British India without any preliminary admission. This was a rule which was altered deliberately by the Act of 1879, and which we should not be justified in reversing now without further inquiry. All these questions might fairly be considered on their merits when the time comes for generally recasting the Legal Practitioners' Act, but I do not think that that time has yet arrived."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

BURMA COURTS' BILL.

The Hon'ble MR. ILBERT asked for leave to postpone the Motion that the Report of the Select Committee on the Bill to amend the Burma Courts Act, 1875, be taken into consideration, and the Motion that the Bill be passed. He explained that the Home Office had only yesterday made another suggestion for amending the Bill which he would like to have time to consider.

Leave was granted.

The Council adjourned to Thursday, the 29th May, 1884.

SIMLA;
The 16th May, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

EXPENDITURE ON STORES DURING 1882-83.

No. 117, dated 28th April 1884.

From—The Government of India,

To—The Secretary of State for India.

With reference to paragraph 23 of our Resolution No. 185, dated 10th January 1883, copy of which was communicated with our Despatch No. 88 (Financial), dated 16th April 1883, we have the honour to forward, in original, returns showing the expenditure on stores for the year 1882-83, and the extent to which articles of Indian manufacture were substituted for stores imported from England for the public service in India during the year.

2. From these returns an abstract has been prepared in groups of principal articles, and is appended to this Despatch. The figures in column 4 will show the progress made in substituting articles of Indian manufacture for European stores. The principal articles are the following :—

Building and Engineering Materials, Rs. 83,018.—The Public Works Departments in Madras, Bengal, and the North-Western Provinces and Oudh have largely utilised country-made articles of this class.

Chemical Products and Drugs and Medicines, Rs. 97,251.—This amount is distributed as follows :—

	Rs.
Bengal	43,130
Bombay	17,767
Madras	36,354
...	97,251

Coal and Coke, Rs. 3,54,824.—The most important items composing this amount are—

	Rs.
General and Irrigation Branches of the Public Works Department, Bengal	1,05,619
Nagpur-Chhattisgarh State Railway	69,075
Rewari-Ferozepore State Railway	57,874
Ordnance Department, Bengal	92,252
Mint, Calcutta	3,269
...	3,28,089

Under the authority conveyed in Your Lordship's Despatch in the Public Works Department, No. 20, dated 28th February 1884, the Mint in Calcutta will in future be supplied with coke made by the East Indian Railway Company.

Cordage and Rope of Vegetable Fibre, Rs. 11,517.—About Rs. 6,000 worth of cordage of local manufacture was used by the Public Works Department in Bengal. Cordage and rope made in Calcutta are being tried in the Public Works Department, and if found suitable in respect to price and quality will, we hope, be largely used in future by the public departments.

Cotton and Linen Goods, Rs. 75,927.—The largest purchasers of country articles of this class were—

	Rs.
Bengal Commissariat Department	26,050
Madras Commissariat Department	7,549
Settlement of Port Blair	36,479

Hardware and Cutlery, Rs. 60,459.—The Public Works Departments in Bengal (Rs. 17,042), North-Western Provinces (Rs. 18,877), Bombay (Rs. 4,722), Madras (Rs. 3,331), and Burma (Rs. 3,979) were the principal users of hardware and cutlery made in India.

Leather and Leather Goods, Rs. 20,289.—This item is chiefly made up as follows :—

	Rs.
Bombay Ordnance Department	5,000
Bengal Public Works Department	2,146
Rajputana-Malwa State Railway	7,857

Arrangements have been made to procure ammunition boots made at Cawnpore for the use of regiments in the Bengal Presidency, and the result will be reported in the returns for 1883-84.

Malt Liquor, Rs. 18,24,835.—The British troops over the greatest part of Northern India are now supplied with Indian beer, and endeavours are being made to extend the system in the Bengal Presidency and also in Madras and Bombay.

Metals—Brass, Rs. 1,25,957 ; Iron, Rs. 3,39,676.—The Ordnance Department in Bengal is the only Department which used brass and articles made of brass manufactured in the country. The Public Works and Telegraph Departments largely used iron made in the country.

Paper and Pasteboard, Rs. 3,66,842.—Country-made paper of the value of Rs. 3,45,440 was used in Bengal. Looking to the development which is being taken by this industry, we hope that the consumption of locally-made paper and pasteboard will increase year by year.

Scientific Instruments and Apparatus, Rs. 1,12,596.—These were chiefly supplied from the Telegraph Workshops and from the Mathematical Instrument Maker's Department, Calcutta.

Wood, articles made of—, Rs. 2,62,466.—In this amount is included Rs. 2,09,299 for railway sleepers required for the Rajputana-Malwa State Railway.

Woollen Goods, Rs. 82,850.—This amount is composed chiefly of—

Rs. 21,215 for the Commissariat Department, Bombay.
„ 33,909 for the Commissariat Department, Bengal.
„ 13,870 for the Commissariat Department, Madras.
„ 11,200 for Port Blair.

3. The returns now forwarded are the first of the kind compiled since the declaration by the Government of India in 1881 of their policy of substituting articles of Indian manufacture for imported stores. Owing to the novelty of the returns, and to the fact that in many cases the English prices were not known and a fair comparison of prices could not, therefore, be made, the returns are incomplete in some respects. But we hope that in future returns these defects will be remedied.

Abstract statement compiled from the Annual Returns of Expenditure on Stores for the year 1882-83 referred to in paragraph 24 of Financial Resolution No. 185, dated 10th January 1883.

(1) Description or class of stores.	(2) Value of stores imported through the Secretary of State.	(3) Value of European stores purchased in India under paragraph 3 of Resolution No. 185, dated 10th January 1883.	(4) Value of stores manufactured in India and substituted for stores hitherto imported through the Secretary of State.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. 55 Met.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department (Meteorology), dated Simla, 23rd May 1884.

Read the following:—

Summary of the Weather Reports for the six months November 1883 to April 1884.

The rainfall of the summer monsoon of 1883 ceased prematurely over the whole of Northern India, *viz.*, in the Punjab, early in September; in the North-Western Provinces, about the middle of the same month; and in Bengal, early in October. With the end of the rains the sky became almost clear of cloud, and October was characterised by rather warm weather. This lasted into the early part of November; but before the middle of the month there was a decided change, and at its close the temperature was everywhere lower than is usual at this season.

In the Punjab and North-Western Provinces the deficiency amounted to from 3° to 6°, and in other parts of India to from 1° to 2°. At Sialkot the average deficiency between the 17th and 23rd November was not less than 14°, and during the same week it amounted to about 8° in the Punjab, 6° in the North-Western Provinces and Assam, and from 3° to 5° in most other parts of India.

Except in the Peninsula, the weather of November was generally fine. In Madras there were 13 wet days and in Burma 8; but in Bengal, the Central Provinces, Rajputana, and Sind no rain fell. In parts of the Punjab and the North-Western Provinces, more especially on the hills of the North-Western Himalaya, there was a heavy fall of rain or snow between the 10th and 13th.

The weather of December was of the same type as that which prevailed at the close of November. The temperature was without exception below the average; and the coldest period was between the 17th and 23rd, when, at many stations, the temperature was fully 10° below the average of the season. Of rain there was little or none in North-Western India; but in Lower Bengal an unusual fall occurred on the 4th, 5th, and 6th, coinciding somewhat unfortunately with the ceremonial opening of the Calcutta Exhibition. In parts of Madras and Assam also the rainfall was slightly in excess.

With the new year came a slight change, the temperature of January being somewhat above the average in most parts of Northern India, although in Eastern and Lower Bengal, the Central Provinces, and the Peninsula generally it remained low. There was also a noteworthy exception in the Punjab, *viz.*, at Sialkot, where the coolness noticed in November and December was still maintained. The coldest period was between the 16th and 17th.

There was but little rain. Some fell on the 26th and 27th in the north of the Punjab, and between the 16th and 18th over the central parts of the country, Bombay, Madras, Orissa, and Lower Bengal. The monthly total was considerably in excess of the average in the north of the Punjab, and somewhat so over the central parts of the country and in the Carnatic, but there was none in the south-east of the Punjab, the North-Western Provinces, and Behar.

In February the temperature variations of North-Western India were irregular; but in Bengal, the whole of the central region and the Peninsula, the temperature remained low till near the close of the month, when over the greater part of India it rose rapidly.

The rainfall of February was either *nil* or below the average almost everywhere, the only exceptions being Sind, the north of the Punjab, Eastern Bengal, and Orissa.

The slightly excessive temperature experienced in Northern India in the two preceding months was maintained over a large part of that region through

March, but in the Punjab there was a change, and at the close of the month it had fallen below the average. In the Peninsula and Burma low temperatures held steadily. In the North-Western Provinces and Behar the air was very dry.

The rainfall exceeded the average in the north of the Punjab, in Assam, and in Eastern Bengal, but was below it elsewhere. In the Eastern divisions of the North-Western Provinces, in Behar, and a large part of Madras and Bombay no rain whatever fell during the whole month, and over large tracts of country the deficiency amounted to from ½ inch and 1½ inches.

In April, except in the beginning of the month, any unusual heat was restricted to the North-Western Provinces, the temperature in all other places being below the average. In the Peninsula and Burma there was no change. In the Punjab the temperature was exceptionally low in the early part of the month, but in Bengal the coolest period occurred towards its close. Elsewhere there was a slight deficiency almost throughout.

The air was drier than usual over nearly the whole of India, and the rainfall of the month was scanty in all places, except Assam and Eastern Bengal. Over a large part of the North-Western and Central Provinces, Rajputana, Central India, and Bombay no rain fell.

Regarding the season as a whole, it showed in a striking degree that persistence of distinctive characters which has frequently been noticed in Indian meteorology. The summary shows that temperature fell suddenly and considerably in the second week of November, the change being simultaneous with a heavy fall of snow over an extensive area of the North-Western Himalaya, and that from that time until the end of February in Bengal and intertropical India, the general character of the weather was distinctly cool. In North-Western India, owing to the absence of rain, the temperature of January and February was rather high, and that of March generally so in Northern India. In the Peninsula it was steadily below the average throughout the whole six months.

The rainfall returns show the same continuity of character. The Northern Punjab, Cashmere, and the inner ranges of the North-Western Himalaya, Assam, and Eastern Bengal showed an actual excess of precipitation in most months, while the plains of Northern India generally showed a decided deficiency throughout, and a very extensive area in Western India and another in the Gangetic plain were absolutely rainless.

The following table gives, first, the average fall over the several regions specified in the first column, and, secondly, the departure from that average which has characterised the fall of the present season on the mean of those stations which telegraph the weather daily:—

Districts.	Average rainfall November to April.	Difference in November 1883 to April 1884.
	Inches.	Inches.
North and West Punjab	5·61	+ 1·94
South Punjab, North-Western Provinces, and Behar...	3·44	— 1·92

WILLIAM LISCOMBE DALLAS,
Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the papers be printed in the Supplement to the *Gazette of India.*

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21st MAY 1884.

GENERAL REMARKS.—Excepting a few local showers, there has been no rain during the past week in the North-Western Provinces and Oudh, Punjab, Central Provinces, Central India, Rajputana, and Hyderabad. Rain continues to fall generally over Madras, Bengal, and Assam. Some districts in the southern portion of the Bombay Presidency and towards the Upper Sind Frontier have also had rain. No report has been received from British Burma.

Harvesting is going on in Madras, and standing crops are in good condition. Agricultural operations are in active progress in Mysore. Rain is wanted in Coorg for the *ragi* crop which has been sown. The *rabi* harvest is over in the Bombay Presidency, and the ground is being prepared for ensuing crops in Dharwar and Kanara. *Kharif* operations continue in Berar, and prospects are good in Hyderabad. Hot winds prevail in Central India and Rajputana, and a scarcity of water is felt at Neemuch. Cattle are suffering from want of fodder in Ajmere. The *rabi* harvest is approaching completion in the Punjab; in the south-eastern districts the yield has been poor; elsewhere it promises to be above the average. Great scarcity of pasturage exists in Rohtak and in parts of Dera Ismail Khan, and many cattle have died. Temperature has increased in the North-Western Provinces and Oudh, but the wind continues easterly in several districts. Preparations for the *kharif* are going on. The general condition of cattle is reported to be fair, though fodder is scarce in Moradabad and Jhansi. In the Central Provinces the *rabi* harvest is being winnowed in several districts, and ploughing for the *kharif* is in progress.

In Bengal the rain has slightly damaged the standing crops in some places. More is wanted in Behar, Chota Nagpur, and parts of Orissa. Ploughing and sowing of the *aus* and *amun* crop is being pushed forward; and jute, sugarcane, and *boro* paddy promise well. In Assam sowings are well advanced, and prospects are good.

Cholera and small-pox are still prevalent in the Southern Presidencies, but, with some local exceptions, appear to be abating in Bengal and Upper India.

Prices are rising in the Punjab; elsewhere there is little change.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 22nd)		
Bellary ...	·05 (average)	Sporadic cholera in the west, 14 deaths.
Kurnool ...	·05 (average)	Harvest paddy, yield about average. Small-pox and cattle-disease in parts.
Ganjam ...	·19 (average)	Fever and small-pox slight in one taluk.
Kistna ...	·15 (average)	Standing crops good; harvest indigo, yield below average. Small-pox prevalent; cholera, fever, and cattle-disease in places.
Chingleput (Madras) ...	·04 (average)	Standing crops good: harvest paddy and *ragi*, yield below average. Small-pox prevalent; 3 deaths from cholera.
Coimbatore ...	·71 (average)	Standing crops generally good; harvest paddy and *cholum*, yield about average. Small-pox and fever in parts; 20 deaths from cholera.
Tanjore ...	·06 (average)	Standing crops generally good; harvest paddy and dry grains, yield below average. 225 deaths from cholera.
Madura ...	·40 (average)	Harvest paddy, yield average. Small-pox prevalent; 4 deaths from cholera.
Malabar ...	1·27 (average)	Harvest of third crop paddy continues. Small-pox slight in nine taluks, fever in two.
Travancore ...	·92	Ploughing and sowings almost over. Fever and cholera in parts; small-pox abating. 2 deaths at Trivandrum.
		General Remarks.—General prospects good.
Bombay—(May 21st)		
Karachi ...	.....	River at Kotri on 17th, 9 feet 9 inches against 8 feet 8 inches on same date last year. Fever in seven talukas; cattle-disease in four talukas; some deaths from fever in Tatta. *Mung* coming into ear in places. Small-pox in twenty-seven villages in district, 75 fresh cases, 2 deaths, 65 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Manjhand 28, 28 and 40, in Ghorabari 22 and 32, and in Jati 20, 32 and 34 pounds per rupee respectively.
Hyderabad ...	.....	Average outturn of *rabi* crop reported to be 13 annas 4 pies. River at Kotri on 19th, 11 feet 1 inch against 8 feet 6 inches on same date last year. Small-pox in nine, fever in one, and cattle-disease in two talukas. Prices of grain steady. Heat intense.
Ahmedabad ...	.....	Manuring operations continue. Small-pox in Viramgaum. Wheat 29 and *bajri* 32 pounds per rupee.
Baroda ...	.....	Cholera continues in Baroda, 37 deaths; small-pox in Kheralu; cattle-disease in Kadi division, and measles in Amreli. Harvesting of *rabi* crops completed. Prices—*bajri* 34 and rice 23 pounds per British rupee.
Surat ...	.....	*Rabi* harvest completed. Cholera in Surat, Karachi and Bulsar talukas, 18 cases, 13 deaths. *Juari* 45 and *nagli* 45 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik ...	.....	Public health generally good; a few cases of small-pox in parts of Nasik, Sinnar, Niphad, Chandor, and Kalwan talukas; cattle-disease in parts of Malegaon and Kalwan. Wheat 34½, *bajri* 31, and rice 21 pounds per rupee.
Colaba (Bombay) ...	.....	Abnormal temperature 1° warm to 1° cool; vapour in air excessive from 14th to 16th; abnormal wind southerly on 18th.
Poona ...	.....	Small-pox continues slightly in five talukas. Prices—*bajri* 34 and *juari* 36; in Poona *bajri* and *juari* 26 pounds per rupee.
Ahmednagar ...	.....	Cholera in Kopargaon and Akola talukas, 19 cases, 3 fatal. Threshing nearly completed. *Bajri*—maximum 48 pounds in Akola, minimum 33 in Kopargaon; *juari*—maximum 60 in Sangamner, minimum 35 in Karjat.
Sholapur ...	No rain	Cattle-disease in Pandharpore taluka. *Juari* 44 and *bajri* 43 pounds per rupee.
Dharwar ...	Slight rain in six talukas; maximum ·50 in Hubli, minimum ·03 in Bankapur.	More rain urgently wanted. Ground being prepared for early crops. Scarcity of drinking-water continues in Dharwar, Navalgund, and Gadag. Small-pox generally abating; fever in two and cattle-disease in one taluka; cholera disappeared. Rice 26 to 49 and *juari* 49 to 77 pounds per rupee.
Kanara ...	Supa, ·29 and Haliyal, ·22.	Ground being prepared for monsoon crops; seed sown in some places. Small-pox—11 deaths in Bhatkal, 7 in Kumpta, 2 in Sirsi, 1 in Supa, 1 in Yellapur, and 1 in Karwar; cattle-disease in two talukas. Locusts have disappeared from Karwar and Akola talukas. Common rice in Karwar 13 seers; district average 15⅜ seers per rupee.
Rajkot ...	.....	General health good. Weather very hot. Small-pox and fever still continue in some parts of the province. *Bajri* 31 and *juari* 39 pounds per rupee.
		General Remarks.—Slight rain in parts of Wadwan, Dharwar, Belgaum, Kaladgi, Shikarpur, and Upper Sind Frontier. *Rabi* harvest completed in all districts. Cholera in parts of Surat, Khaira, Broach, Baroda, Tanna, and Ahmednagar; small-pox generally prevalent; fever and cattle-disease in some districts.
Bengal—(May 21st)		
Chittagong ...	2·41	Weather close and oppressive, latterly seasonable. Prospects of crops favourable. Cholera reported from several thanas; cattle-disease continues. Prices stationary.
Dacca ...	·59	Sowings of *amun* and *aus* nearly completed; *cheena* and *kaon* being harvested; harvesting of *til* commenced; prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	·91	Sowings of early rice and jute going on, and in some parts the seeds have germinated; lands being prepared for *amun* crops; prospects of early crops fair. Price of common rice stationary. Public health good, though cholera still reported from the suburbs.
Moorshedabad ...	·31	Weather hot and cloudy. Ploughing for *amun* coming on and sowing commenced in many places; sugarcane, *boro* paddy, and *til* doing well. Prices slightly easier. Public health much improved.
Rajshahye ...	·86	Weather cloudy and rainy. Condition of *boro* paddy generally good; sowings of *aus* and *amun* still going on; prospects of crops generally favourable. Cholera abated.
Burdwan ...	·37	Ploughing continues; sowings of early paddy commenced in places.
Rungpore ...	3·37	Prospects of standing crops good. Public health good.
Bhagalpur ...	1·9	Sugarcane, *mung*, and paddy thriving; ploughing going on briskly; *murwa* and Indian corn being sown; mango crop very much injured by hail. Rice 13 seers and 14 chittacks per rupee. Public health generally good.
Purneah ...	·9	Ploughing general; prospects of crops very good. Common rice 14 seers per rupee. Public health fair.
Patna ...	*Nil*	Weather very hot. Rain wanted everywhere. Harvesting of *cheena* and gathering of cotton pushed on. Cholera and small-pox still reported.
Durbhunga ...	*Nil*	Rain wanted. *Mung* that was early sown being harvested, other crops coming on well. Cholera and small-pox prevail in some parts. Prices high, but generally stationary.
Hazaribagh ...	*Nil*	Weather hot and clear. Ploughing going on, but rain wanted. Prices continue high. Public health good.
Cuttack ...	*Nil*	Weather very hot and cloudy. Ploughing progressing. Rain urgently wanted. Price of rice almost stationary. A few cases of small-pox reported from the interior.
		General Remarks.—Rain fell in almost all districts, in a few it has partially damaged standing crops, and in some it is still urgently wanted. Ploughing has commenced actively; sowing of *aus* and *amun* going on; jute, sugarcane, and boro paddy promise well; *cheena* and *kaon* being harvested in some districts; sowing of *bhadoi* and *aus* over in a few. Prices almost stationary. Cholera and small-pox still reported from some places.
N. W. Provinces and Oudh		
Benares (May 20th)	No rain	Weather hot; wind easterly. Cholera, small-pox, and fever decreasing; mild cattle-disease in Kolaslah. Prices fluctuating slightly.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Allahabad (May 20th)	.....	Weather very hot. Rain of last week had done good to crops, grass, and fruit; irrigation and weeding of cane in progress. Small-pox abating, but cholera increasing in south of Jumna; city healthy. Prices slightly fallen.
Gorakhpur („ 19th)	No rain	Weather hotter. Prices steady. Small-pox decreasing.
Jhansi („ 20th)	.....	Weather very hot. Manuring of fields for *kharif* cultivation commenced. Health good. Scarcity of water and fodder continues.
Agra („ 19th)	No rain	Scarcity of water beginning to be felt. Fever in two and small-pox in three parganas; sporadic cholera continues in city, and some cases also reported from pargana Fatehpur Sikri. Prices steady.
Bareilly („ 20th)	.....	Great heat. Market stationary. Public health remains good.
Meerut („ „)	No rain	Wind easterly for several days, has again changed to west; weather hot, but not unusually. Cane and indigo being irrigated. Health good generally; isolated cases of small-pox, but few deaths. Prices steady.
Kumaon („ „)	No rain registered, but showers have fallen here and there.	*Kharif* sowings progressing. Six cases of cholera in Bhabar; few cases of small-pox. Prices steady. Cattle-disease continues.
Lucknow („ „)	.....	Heat increasing. *Sawan* is being cut. Health of people and cattle good. Market well stocked. Prices stationary.
Partabgarh ...	.....	No report received.
Sitapur (May 20th)	.....	Easterly winds and clouds. Markets keep well supplied, and prices remain steady. One or 2 cases of cholera reported.
Fyzabad („ „)	No rain	Irrigation of sugarcane and indigo is going on. Small-pox and cholera in parts of district.
Rae Bareli („ 19th)	.....	Weather sometimes cloudy; wind variable. Small-pox abating. Supplies abundant. Prices almost stationary.
Cawnpore („ „)	.....	Weather clear and hot; wind chiefly east. Threshing and winnowing over, and prices stationary. Health of people and cattle good; cholera not increasing.
Farukhabad („ 20th)	.....	Indigo sown freely after late rain. Weather seasonable. Slight fever still prevalent, otherwise health good; no cattle-disease. Markets well supplied.
		General Remarks.—A few showers of rain fell in Kumaon only; the weather continues very hot. Markets are well stocked and prices of food-grains remain steady. A scarcity of water is felt in Jhansi and of fodder for cattle in Moradabad and Jhansi. The general condition of cattle is fair; the health of the people generally continues good; small-pox is decreasing, but cholera still prevails in a few places, and has increased in the Allahabad district, south of the Jumna.
Punjab—(May 13th)		
Delhi ...	.....	Small-pox abating. Harvesting completed. Prices almost stationary.
Hissar ...	Useful shower of rain in Jhajjar, district Rohtak.	Health good; cattle-disease and drought in Rohtak, where cattle are beginning to die of hunger. Prices slightly rising.
Umballa ...	.....	Health good. *Rabi* harvested, yield below average. Prices slightly rising.
Jullundur ...	.....	Health of district good, except in the Jullundur cantonment, where small-pox is prevalent. Sugarcane and cotton being irrigated. Prices stationary.
Amritsar ...	5	Health good. *Rabi* outturn good. Prices rising.
Sialkot ...	.....	Small-pox in city still prevalent. Crops being harvested, yield above average. Prices rising owing to export.
Ferozepore ...	.....	Health good. *Rabi* being harvested. Prices rising.
Lahore ...	.....	Health good. Prices stationary.
Rawalpindi ...	3	Health good. *Rabi* outturn above average. Prices rising.
Mooltan ...	Drizzle at Sadr	Health good. *Rabi* nearly harvested. Prices rising.
Dera Ismail Khan ...	.....	Health and crop prospects fair; drought in Thall and Daman, where there has been considerable mortality among the cattle.
Peshawar ...	.....	Health good. *Rabi* being harvested. Prices of wheat, barley, *makka*, and gram are falling, those of rice and *juari* are rising.
		General Remarks.—Slight rain in four districts. Small-pox is abating in the Delhi district, but it is still prevalent in the city of Sialkot; health in Dera Ismail Khan district is fair, elsewhere it is good; many cattle have died on account of the drought in the Rohtak district and in Thall and Daman, in the Dera Ismail Khan district. *Rabi* has been harvested in the south-east of the province, and is in progress elsewhere. Prices are rising.
Central Provinces—(May 21st)		
Nagpur ...	.....	Weather very hot and sultry by day; nights cool. Ground being prepared for *kharif* sowings. Cattle-disease, measles, and small-pox continue in places. Prices of wheat, *juari*, and gram fallen slightly.
Jubbulpore ...	.....	Weather hot. Harvesting approaching completion. Health good. Wheat 27 and rice 13 seers per rupee.
Saugor (May 20th)	.....	Weather cloudy and close. Winnowing continues; land being prepared for *kharif* sowings. Small-pox in Saugor and Rehli. Prices steady.
Seoni ...	.....	Weather very hot. Winnowing nearly completed. Ploughing progressing. Some cattle-disease reported. Wheat 28½ and rice 16½ seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—*contd.*		
Hoshangabad ...	.....	Weather hot. Winnowing continues. Fever prevalent; small-pox, 42 cases. Wheat 20 and rice 10 seers per rupee.
Khandwa ...	.....	Weather hot and stormy. Prospects good; preparation for *kharif* sowings in progress. Fifteen cases cholera, 4 deaths. *Juari* 23½, rice 12½, and wheat 16 seers per rupee.
Raipur ...	.....	Weather very hot, occasionally cloudy: preparations in hand for *kharif* sowings. Public health good; cattle-disease in parts. Prices steady; rice 23 and wheat 32 seers per rupee.
Sambalpur (May 17th)	.....	Weather occasionally cloudy, with high wind. Ploughing in progress. Public health good. Common rice 20 seers per rupee.
		General Remarks.—Weather very hot. Preparations for *kharif* sowings in hand throughout the province. Health fair. Prices steady.
Assam—(May 21st)		
Gauhati ...	·80	Weather hot. River rising. Small-pox still reported from Shastra Barpetta. Sowing of *aus* finished; planting of sugarcane in progress. Cholera in portions of district. Prospects of crops good.
Sylhet ...	5·97	Crop prospects good; Cholera on the increase; small-pox somewhat less virulent.
Cachar ...	6·90	Weather very wet. About half of *dumahi*, *murali*, and *asra* crops sown. Cotton and rice 15 seers each per rupee. 73 deaths from cholera and 7 from small-pox reported.
Dibrugarh ...	4·17; frequent showers	Lands being prepared for *sali dhan*. Cattle-disease still reported; cholera abating.
Mysore and Coorg—(May 21st)		
Mysore ...	·30; slight rain has also fallen throughout the province.	Crops in good condition; agricultural operations in active progress; prospects favourable. Public health good.
Bangalore ...		
Mercara ...	*Nil*	Rain wanted for the *ragi* crop in Eastern Coorg, which has been sown. Prices of food-grains show a tendency to rise; coffee market has also slightly improved.
Berar & Hyderabad—(May 21st)		
Amraoti ...	.....	Weather hot. *Kharif* preparations continue. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Preparation of fields for *kharif* sowings progressing.
Hyderabad ...	.....	Standing crops in good condition. Small-pox prevails in two talukas, Morchal and Asafnagar. Prices—wheat 15, coarse rice 10½, white *juari* 15½, yellow *juari* 19, and *tur* 21 seers per current sicca rupee.
Central India States—(May 21st)		
Indore ...	.....	Heat increasing. Some small-pox, otherwise public health and prospects good.
Morar (Gwalior) ...	.....	Heat intense. Public health good.
Sutna ...	.....	Weather hot and seasonable. Health good.
Neemuch ...	.....	Weather hot. Scarcity of water is much felt in cantonment. Public health good.
Goona ...	.....	Weather hot. Small-pox continues, otherwise health good.
Sehore ...	.....	Weather hot. Prospects and public health good.
Nowgong ...	0·21	Weather excessively hot. Public health good.
Rajputana—		
Abu (May 21st)	.....	Weather seasonable, windy, and rather warm.
Sirohi („ 18th)	.....	Tanks dry; wells fair. Health good. Weather warm and cloudy, and occasional sandstorms.
Marwar („ 16th)	.....	Water obtained in Jodhpore city from Balsur tanks and wells. Health good. Weather clear, heat excessive, sharp hot winds. Prices rising.
Merwar („ 18th)	.....	Tanks, wells and health good. Weather seasonable.
Harowti („ 17th)	Shahpura, 20	Some small-pox.
Jhallawar („ 16th)	.....	*Rabi* harvest completed. Heat great. Health good.
Ajmere („ 20th)	.....	Hot winds. Cattle suffering considerably, except in Merwara, where grass reserves are being fully utilised. Health good.
Jeypore („ „)	.....	Weather seasonable. Prices steady. Health fair.
Ulwur („ „)	.....	Fever in two tahsils, otherwise health good. High hot winds. Prices steady.
Nepal—(May 16th)		
Katmandu ...	1·85	Weather seasonable. State and prospects of the crops good; the Indian corn is generally well up in the hills.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21st MAY 1884.

GENERAL REMARKS.—Excepting a few local showers, there has been no rain during the past week in the North-Western Provinces and Oudh, Punjab, Central Provinces, Central India, Rajputana, and Hyderabad. Rain continues to fall generally over Madras, Bengal, and Assam. Some districts in the southern portion of the Bombay Presidency and towards the Upper Sind Frontier have also had rain. No report has been received from British Burma.

Harvesting is going on in Madras, and standing crops are in good condition. Agricultural operations are in active progress in Mysore. Rain is wanted in Coorg for the *ragi* crop which has been sown. The *rabi* harvest is over in the Bombay Presidency, and the ground is being prepared for ensuing crops in Dharwar and Kanara. *Kharif* operations continue in Berar, and prospects are good in Hyderabad. Hot winds prevail in Central India and Rajputana, and a scarcity of water is felt at Neemuch. Cattle are suffering from want of fodder in Ajmere. The *rabi* harvest is approaching completion in the Punjab; in the south-eastern districts the yield has been poor; elsewhere it promises to be above the average. Great scarcity of pasturage exists in Rohtak and in parts of Dera Ismail Khan, and many cattle have died. Temperature has increased in the North-Western Provinces and Oudh, but the wind continues easterly in several districts. Preparations for the *kharif* are going on. The general condition of cattle is reported to be fair, though fodder is scarce in Moradabad and Jhansi. In the Central Provinces the *rabi* harvest is being winnowed in several districts, and ploughing for the *kharif* is in progress.

In Bengal the rain has slightly damaged the standing crops in some places. More is wanted in Behar, Chota Nagpur, and parts of Orissa. Ploughing and sowing of the *aus* and *aman* crop is being pushed forward; and jute, sugarcane, and *boro* paddy promise well. In Assam sowings are well advanced, and prospects are good.

Cholera and small-pox are still prevalent in the Southern Presidencies, but, with some local exceptions, appear to be abating in Bengal and Upper India.

Prices are rising in the Punjab; elsewhere there is little change.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 22nd)		
Bellary ...	·05 (average)	Sporadic cholera in the west, 14 deaths.
Kurnool ...	·05 (average)	Harvest paddy, yield about average. Small-pox and cattle disease in parts.
Ganjam ...	·19 (average)	Fever and small-pox slight in one taluk.
Kistna ...	·15 (average)	Standing crops good; harvest indigo, yield below average. Small-pox prevalent, cholera, fever, and cattle-disease in places.
Chingleput (Madras) ...	·04 (average)	Standing crops good; harvest paddy and *ragi*, yield below average. Small-pox prevalent; 3 deaths from cholera.
Coimbatore ...	·71 (average)	Standing crops generally good; harvest paddy and *cholam*, yield about average. Small-pox and fever in parts; 20 deaths from cholera.
Tanjore ...	·06 (average)	Standing crops generally good; harvest paddy and dry grains, yield below average. 223 deaths from cholera.
Madura ...	·40 (average)	Harvest paddy, yield average. Small-pox prevalent; 4 deaths from cholera.
Malabar ...	1·27 (average)	Harvest of third crop paddy continues. Small-pox slight in nine taluks, fever in two.
Travancore ...	·92	Ploughing and sowings almost over. Fever and cholera in parts; small-pox abating. 2 deaths at Trivandrum. *General Remarks.*—General prospects good.
Bombay—(May 21st)		
Karachi ...	.....	River at Kotri on 17th, 9 feet 9 inches against 8 feet 8 inches on same date last year. Fever in seven talukas; cattle-disease in four talukas; some deaths from fever in Tatta. *Mung* coming into ear in places. Small-pox in twenty-seven villages in district, 75 fresh cases, 2 deaths, 63 remaining sick. Prices wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Manjhand 28, 28 and 40, in Gharibari 22 and 32, and in Jati 30, 32 and 34 pounds per rupee respectively.
Hyderabad ...	.....	Average outturn of *rabi* crop reported to be 13 annas 4 pies. River at Kotri on 19th, 10 feet 1 inch against 8 feet 6 inches on same date last year. Small-pox in nine, fever in one, and cattle-disease in two talukas. Prices of grain steady. Heat intense.
Ahmedabad ...	.....	Manuring operations continue. Small-pox in Viramgaum. Wheat 20 and *bajri* 32 pounds per rupee.
Baroda ...	.....	Cholera continues in Baroda, 37 deaths; small-pox in Kheralu; cattle-disease in Kadi division, and measles in Amreli. Harvesting of *rabi* crops completed. Prices—*bajri* 34 and rice 23 pounds per British rupee.
Surat ...	.....	*Rabi* harvest completed. Cholera in Surat, Karachi and Valsar talukas, 18 cases, 13 deaths. *Jowari* 45 and *nagli* 45 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik ...	.....	Public health generally good; a few cases of small-pox in parts of Nasik, Sinnar, Nighad, Chandor, and Kalwan talukas; cattle-disease in parts of Malegaon and Kalwan. Wheat 34, *bajri* 31, and rice 21 pounds per rupee.
Colaba (Bombay) ...	.....	Maximum temperature 1° warm to 1° cool; vapour in air excessive from 14th to 16th, abnormal wind currents on 18th.
Poona ...	...	Small-pox continues slightly in five talukas. Prices—*bajri* 34 and *jowari* 36; in Poona city and suburbs 20 pounds per rupee.
Ahmednagar ...	.....	Cholera in Kopargaon and Akola talukas, 19 cases, 3 fatal. Threshing nearly completed. *Bajri*—maximum 48 pounds in Akola, minimum 33 in Kopargaon; *jowari*—maximum 60 in Sangamner, minimum 35 in Karjat.
Sholapur ...	No rain	Cattle-disease in Pandharpore taluka. *Jowari* 44 and *bajri* 43 pounds per rupee.
Dharwar ...	Slight rain in six talukas; maximum ·50 in Hubli, minimum ·03 in Bankapur.	More rain urgently wanted. Ground being prepared for early crops. Scarcity of drinking-water continues in Dharwar, Navalgund, and Gadag. Small-pox generally abating; fever in two and cattle-disease in one taluka; cholera disappeared. Rice 26 to 49 and *jowari* 49 to 77 pounds per rupee.
Kanara ...	Supa, ·29 and Haliyal, ·22.	Ground being prepared for monsoon crops; seed sown in some places. Small-pox—11 deaths in Bhatkal, 7 in Kumpta, 2 in Sirsi, 1 in Supa, 1 in Yellapur, and 1 in Karwar; cattle-disease in two talukas. Locusts have disappeared from Karwar and Akola talukas. Common rice in Karwar 13 seers; district average 15½ seers per rupee.
Rajkot ...	.....	General health good. Weather very hot. Small-pox and fever still continue in some parts of the province. *Bajri* 31 and *jowari* 39 pounds per rupee. *General Remarks.*—Slight rain in parts of Wadwan, Dharwar, Belgaum, Kaladgi, Shikarpur, and Upper Sind Frontier. *Rabi* harvest completed in all districts. Cholera in parts of Surat, Khaira, Broach, Ratgela, Tanna, and Ahmednagar; small-pox generally prevalent; fever and cattle disease in some districts.
Bengal—(May 21st)		
Chittagong ...	2·41	Weather close and oppressive, latterly seasonable. Prospects of crops favourable. Cholera reported from several thanas, cattle-disease continues. Prices stationary.
Dacca ...	·80	Sowings of *aman* and *aus* nearly completed; *chenna* and *boro* being harvested; harvesting of *til* commenced; prospects of crops good. Public health good.
24-Pergunnahs (Calcutta) ...	·91	Sowings of early rice and jute going on, and in some parts the seeds have germinated; lands being prepared for *aman* crops; prospects of early crops fair. Price of common rice stationary. Public health good, though cholera still reported from the suburbs.
Moorshedabad ...	·31	Weather hot and cloudy. Ploughing for *aman* coming on and sowing commenced in many places; sugarcane, *boro* paddy, and *til* doing well. Prices slightly easier. Public health much improved.
Rajshahye ...	·86	Weather cloudy and rainy. Condition of *boro* paddy generally good; sowings of *aus* and *aman* still going on; prospects of crops generally favourable. Cholera abated.
Burdwan ...	·37	Ploughing continues; sowings of early paddy commenced in places.
Rungpore ...	3·37	Prospects of standing crops good. Public health good.
Bhagulpur ...	1·9	Sugarcane, *mung*, and paddy thriving; ploughing going on briskly; maize and Indian corn being sown; mango crops much injured by hail. Rice 13 seers and 14 chittacks per rupee. Public health generally good.
Purneah ...	·9	Ploughing general, prospects of crops very good. Common rice 14 seers per rupee. Public health fair.
Patna ...	*Nil*	Weather very hot. Rain wanted everywhere. Harvesting of *chenna* and gathering of cotton pushed on. Cholera and small-pox still reported.
Durbhunga ...	*Nil*	Rain wanted. *Mung* that was early sown being harvested, other crops coming on well. Cholera and small-pox prevail in some parts. Prices high, but generally stationary.
Hazaribagh ...	*Nil*	Weather hot and clear. Ploughing going on, but rain wanted. Prices continue high. Public health good.
Cuttack ...	*Nil*	Weather cool and cloudy. Ploughing progressing. Rain urgently wanted. Price of rice almost stationary. A few cases of small-pox reported from the interior. *General Remarks.*—Rain fell in almost all districts, but a few it has partially damaged standing crops, and in some it is still urgently wanted. Ploughing has commenced actively; sowing of *aus* and *aman* going on; jute, sugarcane, and *boro* paddy promise well; *chenna* and *boro* being harvested in some districts; sowing of *khadon* and *aus* over in a few. Prices almost stationary. Cholera and small-pox still reported from some places.
N. W. Provinces and Oudh		
Benares ... (May 20th)	No rain	Weather hot; wind easterly. Cholera, small-pox, and fever decreasing, mild cattle-disease in Kolaslah. Prices fluctuating slightly.

ALLAHABAD,
The 5th May 1884.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 28th MAY 1884.

GENERAL REMARKS.—During the past week rain has been general over British Burma, Assam and Bengal proper, and at Rungpore, Akyab and Thonegwa the fall has been heavy. Rain has also fallen over Mysore, Coorg, and the southern districts of the Madras Presidency. Over Central and North-Western India the weather continues dry, and hot west winds are prevalent.

Agricultural prospects are unchanged in Madras; rice and millets are being harvested, and standing crops are in fair condition. Locusts have appeared in Kurnool, and want of rain is felt in Chingleput. In Mysore prospects are favourable, but the *ragi* crop in parts of Coorg has suffered from want of timely rain, and the coffee berries have been injuriously affected by the same cause. *Kharif* sowings have commenced in several districts of the Bombay Presidency. More rain is required in Dharwar, where a scarcity of water is still felt. In Hyderabad the *rabi* harvest is not quite over, but *kharif* preparations are in progress there and in the Berars. In Central India and Rajputana agricultural operations appear to be in abeyance, and water is scarce in Neemuch and Ulwar. The *rabi* harvest is approaching completion in the Punjab, and *kharif* sowings have begun in parts. In the North-Western Provinces and Oudh sugarcane and indigo are being irrigated, and *kharif* sowings continue. Water is scarce in three districts. Winnowing of the *rabi* harvest is nearly finished in the Central Provinces, and fields are being prepared for the *kharif*.

In Bengal standing crops promise well, but rain is urgently wanted in some districts. The *boro* paddy is still being harvested in places. Prospects are generally good in Assam, but rain is needed in parts of Gauhati. In British Burma the monsoon appears to have set in. Considerable damage has been done to stocks of paddy in Akyab by a hurricane which occurred during the preceding week.

Cholera has appeared in the Kangra district of the Punjab, and is on the increase in the Allahabad district; but there has been a general improvement in the health of the northern provinces. Both small-pox and cholera are still prevalent in the southern presidencies.

Prices are on the whole stationary, though local fluctuations are common.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 28th)		
Bellary ...	.....	Cultivation of paddy and sugarcane commenced. Sporadic cholera in the west, 35 deaths.
Kurnool ...	·001 (average)	Harvest of second crop paddy completed, yield about average. Small-pox and cattle-disease in parts. Locusts in two taluks, but not yet numerous.
Ganjam ...	.....	Small-pox and fever slight in parts.
Kistna ...	.....	Standing crops and indigo good; harvest indigo, yield below average. Small-pox, fever, and cattle-disease in places.
Chingleput (Madras) ...	.....	Standing crops fair, but want of rain felt in parts; harvest paddy and *ragi*, yield below average. Small-pox prevalent; 1 death from cholera.
Coimbatore ...	·53 (average)	Standing crops generally good, but *cholum* attacked by insects in two taluks; harvest paddy and *cholum*, yield about average. 7 deaths from cholera.
Tanjore ...	·04 (average)	Standing crops generally good; harvest paddy and dry grains, yield below average. 225 deaths from cholera.
Madura ...	·36 (average)	Harvest paddy, yield average. Small-pox prevalent; 2 deaths from cholera.
Malabar ...	·34 (average)	Harvest of third crop paddy continues. Small-pox slight in nine taluks; fever in two.
Travancore ...	·18	Ploughing and sowing almost over. Fever and small-pox in parts. *General Remarks.*—General prospects fair.
Bombay—(May 28th)		
Karachi	No rain	Strong monsoon winds. River at Kotri on 25th, 10 feet 6 inches against 8 feet 4 inches on corresponding date last year. Fever in six talukas; cattle-disease in Ghorabari and Sujawal talukas. Wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Kotri 32, 30 and 36, in Tatta 22, 30 and 33, and in Shahbander 24, 32 and 36 pounds per rupee, respectively.
Hyderabad ...	.....	*Kharif* operations in progress. River at Kotri on 26th, 10 feet 4 inches against 8 feet 3 inches on same date last year. Small-pox in seven, fever in one, and cattle-disease in two talukas. Prices of grain steady.
Ahmedabad ...	.....	Manuring operations continue. Small-pox in Gogo; cholera in Viramgaum, 1 case fatal. Wheat 29 and *bajri* 32 pounds per rupee.
Baroda ...	.....	Cholera continues in Baroda, 35 deaths; slightly prevalent in Baroda taluka and Khamrej mehal; small-pox in Kheralu; cattle-disease in Debgaum, and measles in Amreli. Harvesting of *rabi* crops completed. Prices—*bajri* 34 and rice 23 pounds per British rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	.....	Preparations for *kharif* crops commenced. Cholera in Surat, and Olphad and Chorasi talukas, 70 cases, 32 deaths. *Juari* 35 and *nagli* 42½ pounds per rupee.
Nasik ...	.....	Public health generally good; a few cases of small-pox in Sinnar and Kalwan talukas; cattle-disease in Malegaon and Kalwan. Wheat 34½, *bajri* 31, and rice 21 pounds per rupee.
Colaba (Bombay) ...		Temperature normal, vapour in air excessive; abnormal wind northerly from 21st to 23rd.
Poona ...	.....	Slight small-pox continues in the Junnar, Purandhar, Bhimthadi, and Haveli talukas. Prices—*bajri* 34 and *juari* 36; in Poona *bajri* 27 and *juari* 28 pounds per rupee.
Ahmednagar ...	.....	Public health generally good; cattle-disease in Newasa, and cholera in Kopargaon taluka, cases 4, fatal 3. *Bajri*—maximum 48 pounds in Sangamner, minimum 36 in Kopargaon; *juari*—maximum 48 in Newasa, minimum 39 in Nagar.
Sholapur ...	No rain	Cattle-disease in Pandharpur taluka. Weather hot. *Juari* and *bajri* 44 pounds per rupee.
Dharwar ...	Ranibennur, ·04 and Karajgi, ·07.	More rain urgently wanted. Ground being prepared for early crops. Drinking-water scarce in Dharwar, Navalgund, and Gadag. Cholera in two villages of Gadag, out of 14 cases, 7 fatal. Small-pox generally abating; cattle-disease in Hangal. Rice 26 to 40 and *juari* 49 to 77 pounds per rupee.
Kanara ...	.....	Weather cloudy. Ground being prepared and seed being sown for monsoon crops in low grounds. Small-pox—24 deaths in Honore, 2 in Sirsi, and 1 in Akola. Sugarcane plants healthy. Cattle-disease in Akola taluka. Locusts appeared in Supa Petha. Common rice in Karwar 13 seers; district average 15 seers per rupee.
Rajkot ...	.....	General health good. Weather very hot. Fever and small-pox prevalent. *Bajri* 31 and *juari* 40 pounds per rupee.
		General Remarks.—Slight rain in two talukas of Dharwar and in parts of Kaladgi and Shikarpur; more rain is needed in parts of Dharwar. *Kharif* sowings commenced in Surat, Khandesh, Satara, Dharwar, Shikarpur, and Hyderabad. Cholera in parts of eight districts; fever, small-pox, and cattle-disease continue in several districts.
Bengal—(May 28th)		
Chittagong ...	*Nil*	Weather seasonable. *Aus* crop being steadily sown in places; prospects of crops favourable. A nor'-wester occurred in parts of Cox's Bazar on 17th instant, damaging houses and trees. Cholera still continues; cattle-disease somewhat abated. Prices stationary.
Dacca ...	2·67	Standing crops doing well; prospects of crops good. Cholera in Manickgunge much abated.
24-Pergunnahs (Calcutta)	·09	Sowing of *aus* paddy and jute going on briskly, and both low and high lands being ploughed for early paddy; much of the seeds of early crops have germinated. Public health generally good.
Moorshedabad ...	·14	Weather seasonable. Ploughing progressing; standing crops continue to do well.
Rajshahye ...	·78	Weather extremely hot. Prospects of *aus* and *amun* paddy continue favourable. Cholera abated.
Burdwan ...	·81	Sowings going on satisfactorily.
Rungpore ...	6·06	Weather hot. Prospects of crops good. Prices of food-grains stationary. Small-pox appears in town.
Bhagalpur ...	*Nil*	Ploughing going on; *bhadoi* crops have been sown in many places; sugar, indigo, *mung*, and paddy doing well. Prices stationary.
Purneah ...	0·2	Prospects of all crops good; weeding progressing. Common rice 14 seers per rupee. Public health fair.
Patna ...	*Nil*	Rain much wanted for spring crops. Cholera and small-pox reported from Barrh, Behar, and Sadr.
Durbhunga ...	*Nil*	Weather sultry, with easterly winds. Agricultural operations progressing. Rain wanted. Prices stationary. Cholera decreasing; few cases of small-pox and fever reported.
Hazaribagh ...	*Nil*	Weather hot and clear. Ploughing retarded for want of rain. Prices continue high. Public health good.
Cuttack ...	*Nil*	Weather hot, occasionally cloudy. Paddy sowings retarded for want of rain. Prices of rice stationary. Sporadic cases of cholera and small-pox reported from interior, otherwise public health good.
		General Remarks.—Rain fell more or less in almost all districts of Bengal Proper; slight fall of rain in a few of the Behar districts; no rain in Orissa and Chota Nagpur; rain is urgently wanted in many places. Ploughing and sowing of early crops going on generally; standing crops doing well; *boro* paddy being harvested in places. Cholera and small-pox continue to be reported, though both the diseases have much abated. Prices of food-grains stationary.
N. W. Provinces and Oudh		
Benares (May 27th)	No rain.	Sugarcane being irrigated; prospects of crops good. Cholera, small-pox, and fever still linger in places; cattle-disease stopped. Prices fluctuating slightly.
Allahabad („ 26th)	.....	Hot west winds; nights cool. Cholera increasing in district, especially in Khairagarh city. Water becoming scarce in wells.
Gorakhpur („ 27th)	No rain.	Weather hot. Prices steady. Small-pox decreasing.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Jhansi (May 27th)	.....	Weather hotter. Health of people and cattle good. Scarcity of fodder and water continues.
Agra („ „)	No rain	Scarcity of water continues. Fever, small-pox, and cholera in three parganas. Prices steady.
Bareilly („ „)	.....	Heat great. Sugarcane in fair condition. Slight rise in wheat and *bajri*. Cattle-disease has appeared in several quarters; public health good.
Meerut („ „)	No rain	Hot westerly winds. Cane and indigo being irrigated, other agricultural operations ceased. Health good; isolated cases of small-pox reported, very few deaths. Supplies sufficient. Prices varying very slightly upwards.
Kumaon („ „)	Sight rain reported from eastern Kumaon.	*Kharif* sowings progressing. A few cases of small-pox, otherwise health good. Water very scarce in Almorah and many villages. Prices stationary.
Lucknow („ „)	.....	Heat intense. *Sawan* is being cut; sugarcane manured. Health of the people and cattle good. Markets well supplied. Prices steady.
Partabgarh („ 24th)	.....	Prices normal. Bazars well stocked. Complaints very general about failure of water-supply. *Sawan* being cut. Small-pox very bad still.
Sitapur („ 26th)	.....	Strong westerly winds. Health of the people good, and prices remain steady.
Fyzabad („ 27th)	No rain	Irrigation of sugarcane going on; *sawan* being cut. Small-pox in three tahsils; condition of cattle good.
Rae Bareli („ 26th)	.....	Weather seasonable; hot west wind blowing. Small-pox lingering in some places. *Sawan* is being cut. Markets well supplied. Prices stationary.
Cawnpore („ „)	No rain	Hot west winds. Sugarcane and extra crops promising. Slight rise in prices. General health of people good, but sporadic cholera and small-pox continue; some sickness among cattle in pargana Rasulabad.
Farukhabad („ 27th)	.....	Weather growing hotter. Health fair. No cattle-disease. No material change in prices.
		General Remarks.—There was only a slight fall of rain during the week in Kumaon. The weather continues very hot, with west winds. The harvest is over; cane and indigo being irrigated. Markets are well stocked, and prices are generally stationary. Complaints of scarcity of water come from Partabgarh, Allahabad, and Jhansi. The general condition of cattle continues good; small-pox still hangs about in many districts, and cholera is increasing in the Allahabad district, south of the Jumna; sporadic cholera is also reported from Cawnpore.
Punjab—(May 28th)		
Delhi ...	.....	Small-pox abating; 4 cases of cholera. Prices almost stationary.
Hissar ...	.....	Health generally good, but there is a little small-pox in the Sirsa district. Prices slightly rising.
Umballa ...	.....	Health good. Prices stationary.
Jullundur ...	.....	Health of district good, but small-pox prevails in the cantonment, and a few cases have occurred in the city and in villages. Sugarcane and cotton being irrigated. Prices stationary.
Amritsar ...	.....	Health good. Prices steady.
Sialkot ...	.....	Health of district good; small-pox in city abating. *Rabi* harvesting in progress. Prices fluctuating.
Ferozepore ...	.....	Health good. *Rabi* harvesting continues. Price of wheat falling; prices of other food-grains stationary.
Lahore ...	.....	General health good. Prices stationary.
Rawalpindi ...	.....	Health good. *Rabi* outturn above average in five and average in two tahsils. Prices slightly falling.
Mooltan ...	.....	Health good. *Rabi* nearly harvested; *kharif* sowings commenced. Prices slightly falling.
Dera Ismail Khan ...	.....	Health good. Drought in Thall and Daman continues.
Peshawar ...	.....	Slight fever prevalent. *Rabi* crops reaped; preparations being made for *kharif* sowings. Prices falling.
		General Remarks.—Small-pox is prevalent in the Sirsa district and in the Jullundur cantonment, and is abating in the Delhi and Sialkot districts; cholera is prevalent in the Kangra district, also 4 cases in Delhi; elsewhere, except in Peshawar, where there is slight fever, health is generally good. Drought continues in Thall and Daman, in the Dera Ismail Khan district. *Rabi* has been harvested in the south-east, and elsewhere it is approaching completion.
Central Provinces—(May 28th)		
Nagpur ...	.....	Weather clear and hot. Fields being prepared for *kharif* sowings. Fever, small-pox, and cattle-disease slight. Prices steady.
Jubbulpore ...	.....	Weather very hot. Harvesting almost completed. Health good. Prices unchanged.
Saugor (May 27th)	.....	Weather hot and clear. Winnowing continues; land under preparation for *kharif* sowings. Small-pox increasing. Prices steady

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces— *contd.*		
Seoni ...	.....	Weather unusually warm. Winnowing approaching completion; ploughing in progress. Cattle-disease continues. Wheat 26½ and rice 16½ seers per rupee.
Hoshangabad ...	.....	Weather hot. Ploughing for *kharif* sowings commenced. Fever prevalent; small-pox 55 cases, 1 death. Wheat 20 and rice 10 seers per rupee.
Khandwa ...	.....	Weather hot and stormy. Prospects good. *Kharif* preparations in progress. Seven cases cholera, 2 deaths. *Juari* 23½, rice 12½, and wheat 16 seers per rupee.
Raipur ...	.....	Heat intense. Land being prepared for *kharif* sowings. Public health good; cattle-disease slight. Rice 24 and wheat 31 seers per rupee.
Sambalpur ...	.....	No report received.
		General Remarks.—Weather very hot and clear. Winnowing approaching completion; fields being prepared for *kharif* sowings. Prices steady.
British Burma— **(May 26th)**		
Akyab (May 17th)	7·20	Total rainfall 10·43. One death from small-pox in Naaf; few deaths of cattle in Writtang, east and west, and in Minbyo township. Heavy storm on Saturday night has probably destroyed over one-half of stocks of paddy throughout the district.
Rangoon („ „)	3·82	Total rainfall 4·13. Two deaths from small-pox; no cholera reported. Price of *ngakyouk* paddy Rs. 95 and of *ngaseing* Rs. 65 per 100 baskets.
Bassein („ „)	2·02	Total rainfall 20·79. Two deaths from small-pox in town, 4 deaths of cattle in Bassein and 33 in Kyaupyau townships. Price of paddy Rs. 90 per 100 baskets.
Amherst (Moulmein) („ „)	·74	Total rainfall 2·63. Four deaths from small-pox in Wangbawe township; no deaths of cattle reported. Price of paddy Rs. 100 per 100 baskets. In Moulmein town public and cattle health good. Price of paddy Rs. 90 per 100 baskets.
Toungoo („ „)	0·73	Total rainfall 2·91. Public health good. Price of paddy Rs. 70 per 100 baskets.
Kyoukphyoo („ „)	0·49	Total rainfall 2·46. Public health and health of cattle good. Weather unsafe. Price of paddy Rs. 90 per 100 baskets.
Sandoway („ „)	1·52	Total rainfall 1·54. One death from cholera in Gwa town. Price of paddy from Rs. 60 to 70 per 100 baskets.
Hanthawaddy („ „)	.....	Public health and health of cattle good. Price of paddy from Rs. 100 to 110 per 100 baskets.
Pegu („ „)	.....	No report received.
Tharrawaddy („ „)	5·40	Total rainfall 6·0. Four deaths from small-pox in Zigon circle; 28 deaths of cattle in Sangwe township, and 7 in Gyobingouk township. Price of paddy from Rs. 95 to 100 per 100 baskets.
Prome („ „)	2·83	Total rainfall 3·14. Thirty deaths from cholera and 8 from small-pox in town; 4 deaths from cholera in Mahathaman township; cattle healthy. Price of paddy Rs. 95 per 100 baskets.
Thonegwa („ „)	10·10	Total rainfall 11·62. Two deaths from cholera in Yandoon, 2 in Patanaw, 2 in Shweylong, and 1 in Pyapon township; cattle healthy. Price of paddy Rs. 100 per 100 baskets.
Henzada („ „)	.....	Total rainfall 4·54. Three deaths, out of 21 cases of cholera, and 7 deaths, out of 20 cases of small-pox in town, 7 deaths from cholera in Zaloom, 5 in Henzada township and 4 in Myanoung town; 1 death from small-pox in Zaloom and 2 in Henzada township. Price of paddy from Rs. 97 to 100 per 100 baskets.
Thayetmyo („ „)	7·38	Total rainfall 3·38. Four deaths from cholera and 3 from small-pox in town, 1 death from cholera in Minae and 3 in Pato circle; 4 deaths from small-pox in Thedaw circle. Price of paddy from Rs. 100 to Rs. 112-8-0 per 100 baskets.
Shwaygyin („ „)	1·45	Total rainfall 2·03. Two deaths from small-pox in Kyaukmau circle; 23 deaths of cattle in Kwingala circle. Price of paddy from Rs. 80 to 85 per 100 baskets.
Tavoy („ „)	1·88	Total rainfall 2·79. Four deaths from small-pox in town; several cases of fever from Siam road. Price of paddy in town Rs. 70, in district Rs. 65 per 100 baskets.
Mergui („ 10th)	0·15	Total rainfall 4·68. Public health good; cattle healthy. Price of paddy from Rs. 85 to 90 per 100 baskets.
Do. („ 17th)	2·55	Total rainfall 7·23.
		General Remarks—Except in Prome and Henzada, where cholera is still prevalent, public health on the whole good; no signs of cattle-disease. Arakan coastal districts suffered from a hurricane, which is reported to have done considerable damage to stocks of paddy in Akyab. Monsoon appears to have fairly set in.
British Burma— **(May 29th)**		
Akyab (May 24th)	1·33	Total rainfall 11·66. Public health good; health of plough-cattle good; many deaths of cattle, especially along coast track and in Naaf, from cyclone. One village washed away and 18 persons drowned, 3 drowned in Moungdo and 1 killed by fall of house. Boats are swamped and 11 men drowned. *Angumasi* stocks of paddy very seriously damaged in Kyadat and coast portions of Rathadaung and in Naaf township, elsewhere damage slight. Price of paddy Rs. 80 in town, elsewhere Rs. 92 and 80 per 100 baskets.
Kangoon („ „)	2·57	Total rainfall 6·70. Public health good. Price of *ngaseing* paddy Rs. 100 and *ngakyouk* paddy Rs. 92 to 95 per 100 baskets.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—*contd.*		
Bassein (May 24th)	1·85	Total rainfall 4·64. Public health good; cattle-disease in parts of the district. Price of paddy Rs. 85 to 90 per 100 baskets.
Amherst (Moulmein) („ „)	1·76	Total rainfall 4·39. Small-pox prevalent in Alaungbwe township; cattle healthy. Price of paddy the same. In Moulmein town public health good; cattle healthy. Price of paddy unaltered.
Toungoo („ „)	1·16	Total rainfall 4·07. Public health good. Price of paddy Rs. 70 per 100 baskets.
Kyoukphyoo („ „)	2·13	Total rainfall 4·59. Public health good; some cattle-disease reported.
Sandoway („ „)	.....	No report received.
Hanthawaddy („ „)	.....	Public health and health of cattle good. Price of paddy Rs. 100 per 100 baskets.
Pegu („ 17th)	4·64	Total rainfall 4·69. Public health good; slight cattle-disease reported. Price of paddy Rs. 95 to 100 per 100 baskets.
Do. („ 24th)	6·85	Total rainfall 11·54. Few cases of small-pox in town; cattle healthy. Price of paddy Rs. 95 to 100 per 100 baskets.
Tharrawaddy („ „)	1·50	Total rainfall 7·50. Public health good; cattle healthy. Price of paddy Rs. 96 to 100 per 100 baskets.
Prome („ „)	0·83	Total rainfall 3·97. Cholera still prevalent in Prome town; some cattle-disease in the north of the district. Price of paddy Rs. 100 per 100 baskets.
Thonegwa („ „)	4·88	Total rainfall 16·50. Cholera here and there; small-pox decreasing. Price of paddy Rs. 100 to 105 per 100 baskets.
Henzada („ „)	5·19	Total rainfall 9·73. Public health fairly good; cattle healthy. Price of paddy Rs. 90 to 100 per 100 baskets.
Thayetmyo („ „)	0·31	Total rainfall 3·69. Slight cholera and small-pox still prevalent in town; cattle healthy.
Shwaygyin („ „)	2·70	Total rainfall 6·93. Public health and health of cattle good. Price of paddy Rs. 85 to 90 per 100 baskets.
Tavoy („ „)	5·63	Total rainfall 8·42. Slight small-pox in town. Price of paddy Rs. 72 in town and Rs. 65 per 100 baskets in district.
Margui („ „)	.....	No report received.
		General Remarks.—Public health good; no cattle-disease of any importance. Monsoon general. Price of paddy keeping up.
Assam—(May 28th)		
Gauhati ...	·64	Weather warm, with occasional rain; more rain wanted. Small-pox still reported from Shastra Barpetta; bowel complaints from Thana Dakhin Bajoli. Prospects of *aus* good. Cholera in portions of district.
Sylhet ...	5·35	Weather sultry. Crop prospects good. Considerable sickness.
Cachar (Silchar) ...	3·22	Weather warm. Ploughing and sowing of *dumahi, murali,* and *aera* crops progressing. Common rice 13⅝ seers per rupee. 18 deaths from cholera and 22 from small-pox reported.
Dibrugarh ...	1·41	Weather hot. Sowing of *ahu dhan* commenced; prospects of *sau dhan* good. Small-pox and cattle-disease reported from North Lakhimpur.
Mysore and Coorg— **(May 28th)**		
Mysore ...	1·90	Rain has also fallen in several parts of the province. Crops in good condition; prospects favourable. Public health good.
Bangalore ...	1·79	
Mercara ...	1·79	The *nysakha* rice crop in the Surlabimatnad is being reaped, yield slightly below the average; the *ragi* seed sown in the eastern portions of Coorg has suffered from want of timely rain; berries are forming on coffee bushes, but are very patchy owing to the partial character of the blossom showers. Prices of food-grains and horse gram have risen owing to small supply brought to market.
Berar & Hyderabad— **(May 28th)**		
Amraoti ...	.....	Weather hot. *Kharif* preparations continue. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Preparations for *kharif* sowings progressing.
Hyderabad ...	.....	Reaping of *rabi* crops nearly concluded; preparations for *kharif* and *rabi* sowings commenced. General health good. Prices—wheat 14¾, coarse rice 11, white *juari* 16¼, yellow *juari* 19¾, and *tur* 20¾ seers per current sicca rupee.
Central India States— **(May 28th)**		
Indore ...	.....	Heat increasing. Health good. Weather seasonable.
Morar (Gwalior) ...	.....	Health good. Weather seasonable.
Sutna ...	.....	Weather hot and seasonable. Health good.
Neemuch ...	.....	Weather very hot. Scarcity of water continues. Public health good.
Goona ...	.....	Heat excessive. No more cases of small-pox reported.
Agar ...	.....	High winds from the west. Health and prospects good.
Sehore ...	.....	Prospects and public health good.
Nowgong ...	.....	Weather very hot and sultry. Public health good.
Bhopowar (Manpur) ...	.....	Prospects and public health good.

Under-Secretary.

SIMLA,

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4th JUNE 1884.

GENERAL REMARKS.—Rain has been general in British Burma, Bengal, and Assam. Slight rain has also fallen in several districts of the Madras Presidency, in Mysore, and in parts of Hyderabad, Wadwan, Ratnagiri, Dharwar and Belgaum in the Bombay Presidency. Some rain fell in a few places in the Central Provinces, in the Central India States, and in Rajputana. In Hyderabad and in the North-Western Provinces and Oudh there was no rain during the week, and in the Punjab slight falls are reported from two districts only.

Harvesting continues in Madras, and standing crops are generally in good condition. Locusts are reported to be increasing in parts of Kurnool, where they are doing some injury to the crops. In Mysore the crop prospects continue favourable, but rain is wanted in Coorg to facilitate agricultural operations.

Kharif sowings are generally in progress throughout the Bombay Presidency; rain is urgently wanted in Dharwar, where the scarcity of drinking-water is still felt. In Berar preparations for the *kharif* are also in hand. In the Central India States and Rajputana hot winds still prevail, and agricultural prospects are generally good. In the Punjab the *rabi* harvest is nearly over and *kharif* operations are in progress. *Kharif* sowings have also begun in the North-Western Provinces and Oudh; water is scarce in five districts. In the Central Provinces winnowing is nearly completed, and ploughing for *kharif* has commenced. In Bengal ploughing and sowing of the *aus* and *amun* crops continue, and paddy and jute are thriving. In Assam sowings are well advanced. Ploughing for the next rice crop has commenced in British Burma.

Cholera and small-pox are reported almost in every province, but the former is abating in Bengal, and the latter in the North-Western Provinces and Oudh and in the Punjab.

Prices are generally stationary. The price of paddy in Burma rules high.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 4th)		
Bellary ...	.....	Cultivation of paddy and sugarcane commenced. Sporadic cholera in the west, 24 deaths.
Kurnool ...	·06 (average)	Rain urgently wanted in parts. Small-pox and cattle-disease in places. Locusts increasing in two taluks and doing harm.
Ganjam ...	·03 (average)	Small-pox and fever slight in parts; 1 death from cholera.
Kistna ...	·12 (average)	Standing crops and indigo good; harvest indigo, yield below average. Small-pox, fever, and cattle-disease in places.
Chingleput (Madras) ...	.....	Standing crops fair, but want of rain felt in parts. Harvest paddy and dry grains, yield below average. Small-pox prevalent; 1 death from cholera.
Coimbatore ...	·86	Standing crops generally good, but *cholum* affected by insects in two taluks; harvest paddy, *cholum*, and *cumbu*, yield about average. Fever in two taluks; 1 death from cholera.
Tanjore ...	.....	Standing crops generally good, but not flourishing for want of rain in parts; harvest paddy and dry grains, yield below average. Small-pox in parts; 272 deaths from cholera.
Madura ...	·07 (average)	Small-pox prevalent; 12 deaths from cholera.
Malabar ...	·56 (average)	First crop paddy germinating in some taluks, elsewhere slightly injured for want of rain; harvest of third crop paddy nearly over. Small-pox slight in nine taluks, fever in two; 8 deaths from cholera.
Travancore ...	·05	Ploughing and sowing over. Weather unfavourable for growth of paddy. Fever prevalent in parts; small-pox abating, 5 deaths at Trivandrum.
		General Remarks.—General prospects fair.
Bombay—(June 4th)		
Karachi ...	No rain	Strong westerly breeze. River at Kotri on 1st, 8 feet 11 inches against 8 feet 9 inches on same date last year. Fever in five talukas; cattle-disease in three talukas, some loss in Tatta; small-pox in nine villages in district, 8 fresh cases, 1 death, 31 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 24, 30 and 32, in Dadu 36 and 44, in Ghorabari 22 and 32, and in Mirpur Botoro 22, 34 and 32 pounds per rupee, respectively.
Hyderabad ...	Slight rain in Hala on 22nd May.	High winds prevailing. *Kharif* cultivation commenced. River at Kotri on 2nd June, 8 feet 8 inches against 9 feet 4 inches on same date last year. Small-pox in seven, fever in three, and cattle-disease in one taluka; measles in Hyderabad town. Prices of grain steady.
Ahmedabad ...	.....	Manuring operations continue. Cholera in Parentij, 5 cases, 2 fatal. Wheat 29 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	.....	Cholera continues in Baroda, 34 deaths; slightly prevalent in Baroda taluka and Kamrej mehal; measles in Amreli; small-pox in Keralu and Dehgaum, and cattle-disease in Dehgaum only. Cultivators preparing land for next season. Prices—*bajri* 32 and rice 22 pounds per British rupee.
Surat ...	.....	Preparations for *kharif* continue. Cholera in Olphad, Chorasi, and Bulsar talukas, 80 cases, 41 deaths. *Juari* 34 and *nagli* 42 pounds per rupee.
Nasik ...	.....	Public health generally good; a few cases of small-pox in parts of Sinnar, Dindori, Chandor, and Kalwan talukas; cattle-disease in parts of Malegaon and Kalwan. Land being prepared for cultivation. Wheat 34½, *bajri* 31, and rice 21 seers per rupee.
Colaba (Bombay) ...	.....	Abnormal temperature 0° to 1° warm; vapour in air normal; abnormal wind southerly on 1st; barometer high.
Poona ...	.....	Slight small-pox in Junnar, Purandhar, Bhimthadi, Haveli, and Mawal talukas. Prices—*bajri* 34 and *juari* 37; in Poona *bajri* 27 and *juari* 30 pounds per rupee.
Ahmednagar ...	No rain, except ·10 in Nagar.	Cholera in Akola, 17 cases, 12 fatal; slight cattle-disease in Newasa. Land being prepared for sowing. *Bajri*—maximum 48 pounds in Sangamner, minimum 35 pounds in Karjat; *juari*—maximum 60 in Sangamner, minimum 35 in Karjat.
Sholapur ...	No rain	Weather cooler. Land being prepared for *kharif* crops. *Juari* 44 and *bajri* 44 pounds per rupee.
Dharwar ...	·20 in Ron	Rain urgently wanted everywhere. Ground being prepared for early crops. Scarcity of drinking-water in Navalgund, Gadag, Bankapur, and Kaladgi. Cholera in Hubli, Gadag, Ranibennur, and Karajgi talukas, 28 fatal, out of 52 cases; small-pox generally abating; fever in 2 talukas; no cattle-disease. Rice 27 to 40 and *juari* 50 to 77 pounds per rupee.
Kanara ...	.....	Weather cloudy. Preparing ground and sowing seed for monsoon crops. Small-pox—15 deaths in Kumpta, 11 in Sirsi, 9 in Bhatkal, and 2 in Akola; slight fever in four talukas; cattle-disease in Akola. Common rice in Karwar 12 seers; district average 15¼ seers per rupee.
Rajkot ...	.....	General health good. Weather very hot. Fever still prevalent; small-pox less prevalent. *Bajri* 31 and *juari* 38 pounds per rupee.
		General Remarks.—Slight rain in parts of Hyderabad, Wadwan, Ratnagiri, Dharwar, and Belgaum; more wanted in Dharwar and Belgaum. *Kharif* sowings in progress in most districts. Scarcity of drinking-water continues in parts of Dharwar. Cholera in parts of nine districts; fever, cattle-disease, and small-pox in several districts.
Bengal—(June 4th)		
Chittagong ...	6·72	Weather sultry and close, latterly rainy. *Aus* being transplanted; prospects of crops favourable. Prices steady. Cholera continues.
Dacca ...	2·71	Prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	2·23	Sowings of *aus* still continue; young plants thriving well; ploughing for *amun* going on; prospects of crops good. Price of common rice stationary. Health generally good.
Moorshedabad ...	·32	Weather hot and sultry. Standing crops doing well; *boro* being harvested. Rice selling at from 13½ to 15½ seers per rupee. Public health fairly good.
Rajshahye ...	3·02	Weather stormy, with heavy rain. Prospect of crops favourable.
Burdwan ...	.....	Sowings going on.
Rungpore ...	.....	No report received.
Bhagalpur ...	1·5	Fine rice 13 seers 14 chittacks per rupee. Ploughing and sowing of *bhadoi* crops going on briskly.
Purneah ...	·91	Prospects very fair; weeding going on briskly. Coarse rice 16 seers per rupee. Public health fair.
Patna ...	·25	More rain wanted. Fields being prepared for *bhadoi* crops; sugarcane growing well. Cholera and small-pox prevail.
Durbhunga ...	·42	*Mung* being harvested; prospects of crops improving; agricultural operations progressing. Prices high. Public health good.
Hazaribagh ...	·5	Weather variable, hot, and cloudy. Rain much wanted everywhere for ploughing operations. Prices continue high. Cholera still prevalent in Chatra town; cholera and small-pox reported from Giridi subdivision, otherwise public health good.
Cuttack ...	*Nil*	Weather hot and cloudy. Paddy being sown. Rain shortly expected. Price of rice has risen a little. A few cases of cholera here and there in the interior, otherwise public health generally good.
		General Remarks.—Heavy rain fell in Chittagong and in some other districts of Dacca and Rajshahye divisions; rain is still much wanted in many districts. Ploughing going on generally; sowings of *bhadoi* crops continue, and those of *amun* have commenced in some places; early paddy and jute thriving; *til*, *kaon*, and *jali* paddy being reaped. Cholera abating; small-pox still reported; fever prevalent in Jessore and Bogra.
N. W. Provinces and Oudh—		
Benares (June 3rd)	No rain	Hot winds. Crops being irrigated; prospects good. Cholera, small-pox, and fever mild. Prices fluctuating slightly.
Allahabad („ „)	.....	Weather exceptionally hot and oppressive. Great scarcity of water in many places. Fruit abundant in market. Cholera in almost every pargana, but number of attacks and deaths diminishing; city very healthy. Prices slightly rising.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Gorakhpur (June 3rd)	No rain	Weather hot and cloudy. Prices steady. Small-pox decreasing.
Jhansi („ „)	.....	Heat increasing. Weather occasionally cloudy. Prices fluctuating. Markets well supplied. Condition of people and cattle pretty fair, but want of fodder and scarcity of water are much felt.
Agra („ 2nd)	No rain	Scarcity of water continues. Fever in four and small-pox in three parganas; cholera in two parganas, but is now abating. Prices steady.
Bareilly („ 3rd)	.....	Prices steady. No increase of cattle-disease; public health fair.
Meerut („ „)	No rain	Weather extremely hot. Sugarcane and indigo being irrigated. Health good. Prices unchanged.
Kumaon („ „)	.....	Very hot, with high winds. *Kharif* sowings nearly completed. Health fair. Water very scarce. Prices stationary.
Lucknow („ „)	.....	Intense heat; east wind. No crops in fields, except sugarcane. Health of people and cattle good. Markets well supplied. Prices continue the same.
Partabgarh (May 30th)	.....	Prices stationary. Land being manured for *kharif* sowings. Hot west winds prevailing. Small-pox slightly on the decrease.
Sitapur (June 3rd)	.....	Strong westerly winds, changing to east in the mornings. Scarcity of fodder. Health of people good. Prices remain steady.
Fyzabad („ „)	No rain	Weather clear and hot, wind chiefly from east. Markets well supplied and prices remain steady. One or two cases of cholera reported.
Rae Bareli („ 2nd)	.....	Heat intense; strong westerly winds. Scarcity of water in wells. Health of people and condition of cattle good. Prices steady.
Cawnpore („ „)	No rain	Weather sultry, with occasional light clouds. Markets well stocked. Prices steady. Sporadic cholera in city, and small-pox continues; foot-disease among cattle in pargana Rasulabad.
Farukhabad („ 3rd)	.....	Weather very hot throughout the week. Health fair. Prices stationary. No cattle-disease.
		General Remarks.—No rain anywhere. Weather continues very hot, with west winds. All crops off the ground, except sugarcane and indigo. Markets well stocked. Prices generally stationary. Water is getting scarce in Rae Bareli, Allahabad, Jhansi, Agra, and Kumaon. The condition of cattle is normal; small-pox is abating; cholera of a mild type still lingers in some districts, otherwise public health is good.
Punjab—(June 4th)		
Delhi ...	.....	Small-pox abating, no fresh cases since 30th May. Prices almost stationary.
Hissar ...	.....	Health good, but there is a little small-pox in Rohtak and Sirsa. *Kharif* operations in progress. Prices slightly rising.
Umballa ...	.....	No report received.
Jullundur ...	.....	Small-pox is abating in cantonment, but cases have occurred in the city and adjoining villages. Sugarcane and cotton being irrigated. Prices steady.
Amritsar ...	.....	Health good. Slight fall in prices of *juari* and *bajri*; prices of other food-grains stationary.
Sialkot ...	.....	Health good; small-pox in city abating. Harvesting operations continue. Price of wheat has fallen slightly.
Ferozepore ...	.....	Health good. *Rabi* harvested. Prices stationary.
Lahore ...	.....	Health good. Prices steady.
Rawalpindi ...	Slight rain	Health good. Prices almost stationary.
Mooltan ...	.....	Health good, *Rabi* harvested. Prices fluctuating.
Dera Ismail Khan ...	0·14	Health good. Drought in Thall and Daman continues. Prices steady.
Peshawar ...	.....	Health good. Preparations being made for *kharif* sowings. Prices fluctuating.
		General Remarks.—Small-pox is prevalent in the Jullundur city and adjoining villages, also some cases in Rohtak and Sirsa; it is however abating in the Delhi district, in the Jullundur cantonment, and in the Sialkot city; cholera continues in the Kangra district; health of the province elsewhere is good, with the exception of slight fever in Farukallaqa, district Shahpur. Drought still continues in Thall and Daman, in the Dera Ismail Khan district. *Rabi* nearly harvested; *kharif* operations commenced.
Central Provinces—(June 4th)		
Nagpur ...	·11	Weather cloudy and sultry. Ploughing continues. Fever, small-pox, and cattle-disease sight. Prices steady.
Jubbulpore ...	·10	Weather cloudy and hot. Harvest completed, outturn not much below average; land under preparation for *kharif* sowings. Health good. Prices unchanged.
Saugor (June 3rd)	·12	Weather very hot. Winnowing nearly finished; *kharif* ploughings in hand. Small-pox prevalent. Prices steady.
Seoni ...	·02	Weather very hot and sultry. Winnowing completed; ploughing progressing. Cattle and small-pox continue. Prices falling.
Hoshangabad ...	.....	Weather hot. Ploughing continues. Fever prevalent. Wheat 20 and rice 10 seers per rupee.
Khandwa ...	.....	Weather hot and windy. Prospects good; ploughing progressing. Cholera—11 cases, 5 deaths. *Juari* 23½, rice 12½, and wheat 22½ seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces— *contd.*		
Raipur ...	.....	Heat excessive. Land being prepared for *kharif* sowings. Public health good. Prices rising. Rice 22½ and wheat 20 seers per rupee.
Sambalpur (May 31st)	.....	Weather close and sultry. Health good. Common rice 29 seers per rupee.
		General Remarks.—Weather very hot and cloudy. Ploughing in progress. Prices steady. Health fair.
British Burma— (June 4th)		
Akyab (May 31st)	5·41	Total rainfall 17·07. Slight small-pox and cattle-disease reported.
Rangoon („ „)	2·82	Total rainfall 9·52. Slight small-pox; no cholera.
Bassein („ „)	2·77	Total rainfall 7·41. Slight small-pox and some cholera and cattle-disease in interior. Ploughing begun.
Amherst (Moulmein) („ „)	9·04	Total rainfall 13·43. Public health good.
Toungoo („ „)	2·69	Total rainfall 6·76. Public health good.
Kyoukphyoo („ „)	3·83	Total rainfall 8·42. Public health good.
Sandoway („ 24th)	4·63	Total rainfall 6·17. Public health good.
Do. („ 31st)	3·15	Total rainfall 9·32. Public health good.
Hanthawaddy („ „)	.....	No report received.
Pegu („ „)	2·36	Total rainfall 13·90. Public health good.
Tharrawaddy („ „)	2·85	Total rainfall 10·35. Small-pox still slightly prevalent.
Prome („ „)	1·89	Total rainfall 5·86. Small-pox and cholera still prevalent.
Thonegwa („ „)	3·17	Total rainfall 12·67. Cholera in two townships.
Henzada („ „)	2·31	Total rainfall 12·04. Cholera and small-pox abating.
Thayetmyo („ „)	0·79	Total rainfall 1·48. Slight cholera; small-pox abating. Ploughing of uplands begun and some maize sown. Rains not thoroughly set in.
Shwaygyin („ „)	2·37	Total rainfall 8·67. Slight cholera in one circle.
Tavoy („ „)	6·24	Total rainfall 14·66. Slight small-pox in town.
Mergui („ 24th)	4·30	Total rainfall 11·53. Public health good.
		General Remarks.—Public health improving; cholera and small-pox abating or disappeared. Rainfall seasonable. Prices of paddy high.
Assam—(June 4th)		
Gauhati (June 3rd) ...	3·30	Weather getting hot. Occasional showers of rain. Small-pox in Shastra Barpetta abating. Prospects of *aus* good; sugarcane doing well. Cholera on the decline.
Sylhet ...	7·37	Good accounts received of tea and paddy. State of public health continues unsatisfactory.
Cachar (Silchar) ...	6·77	Weather warm. Ploughing and sowing of *dumahi* and *murali* crops nearly finished, that of *asra* progressing. Common rice 13$\frac{5}{16}$ seers per rupee. 46 deaths from cholera and 5 from small-pox reported.
Dibrugarh ...	4·97	Weather hot. Prospects of *ahu dhan* good; lands being prepared for *sali dhan*. Cattle-disease and small-pox reported.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF FARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 4th June, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble D. G. Barkley.

BURMA COURTS BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to amend the Burma Courts Act, 1875, be taken into consideration. He said:—

"This Bill does not deal with the large question of reorganizing the Superior Courts of British Burma—a question which, as the Council is aware, has been for some time under the consideration of the Government of India and the Secretary of State. The present position of that question is this. In the year 1882, we sent to the Secretary of State a despatch in which we recommended the creation of a Chief Court for British Burma, and expressed our general approval of a draft Bill for that purpose which had been submitted to us by the Local Government. The Secretary of State, however, did not see his way to the approval of our scheme, and suggested that the objects which we had in view

might be sufficiently met by means of a less fundamental alteration of the existing system. We invited the local authorities to consider the Secretary of State's suggestions, and the replies, which we have received, whilst disclosing much unanimity as to the existence of serious evils which require a remedy, disclose also a somewhat embarrassing difference of opinion as to the particular remedy which is most suitable and practicable. Under these circumstances, it is a task of some difficulty to devise a scheme which will meet the objections urged against our former proposals and at the same time satisfy the reasonable demands and legitimate grievances of the Province. That is the task on which we are at this moment engaged, and I believe that before long we shall send a despatch to the Secretary of State on the subject. In the meantime, however, there are one or two minor defects in the Act of 1875 which, if allowed to remain, will cause considerable difficulty and which it is possible and desirable to remove without waiting until the details of the larger scheme have been matured. It was for the purpose of removing these minor defects that the present Bill was introduced in December last. One of the difficulties arises from the inconsistency between the nomenclature of the different grades of inferior Courts under the Act, and the nomenclature which had been adopted in the recent reorganization of the inferior Executive and Judicial Services. We propose to remove that difficulty by assimilating the former nomenclature to the latter. The Judicial Commissioner has objected to the particular form of amendment which we propose, and has suggested that it would tend to prevent confusion and to dispense with the necessity of amending the Act on each change of designation of the officers of the civil staff if we were to adopt the plan adopted in the Code of Criminal Procedure, of giving to each Court a designation independent of the designation which the officers who usually are to preside in it may have in the Burma Civil Service; that, for example, instead of having Courts of 'Myo-ôks' and 'Assistant Commissioners,' we should have Courts of different grades of Magistrates and Judges. I entirely agree with the Judicial Commissioner that this would be an improvement, and I fully share his objection to the barbarism of interlarding English Acts with vernacular terms. But on going through the sections of the Act I find that it would be impossible to adopt his suggestions without recasting the Act altogether; and, as we have at this moment under consideration a scheme for remodelling the Courts, it would be obviously undesirable to undertake any such extensive alteration of the Act as this would involve. We have, accordingly, made no material change in the form of the clauses as originally introduced, and such additions and alterations as have been made in Committee deal with unimportant or technical matters.

"I have given notice of amendments dealing with two additional points, as to one of which I was not quite satisfied that the clause submitted by the Committee with their Report would adequately meet the requirements of the case, and the other of which was brought to my notice after the Committee presented their Report. These amendments have, I believe, the full concurrence of my colleagues in Committee, and I propose to defer explanation of them until the time for moving them comes."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that for sections 11 and 12 of the Bill the following be substituted:—

"11. The following addition and insertion shall be deemed to have been made to, and in, sections 76 and 80, respectively, of the Burma Courts Act, 1875, immediately after the passing of that Act, namely:—

Amendments of sections 76 and 80.

"(*a*) To section 76—

'Provided that, if in the opinion of both Courts the point as to which they differ ought to be referred to the High Court, it shall be so referred in manner provided by section eighty, clause (*b*), and thereupon sections eighty-one and eighty-two shall apply.'

"(*b*) In section 80, after the words 'without a Commissioner' the words 'and not being cases provided for by section 76.'"

He said:—"Under the Burma Courts Act an appeal lies in certain cases from the Judicial Commissioner and the Recorder sitting separately, to a Court called a Special Court, which consists of the Judicial Commissioner and the Recorder sitting together. Each of these judicial officers has also the power of referring questions to the Special Court. The constitution and procedure of this Court have given rise to great difficulties, and it is generally agreed that no satisfactory system of appeal can be devised for the Province, unless the local Court of Appeal can be strengthened by the addition of another Judge. That is indeed the most important object of the scheme which, as I have already said, is now under the consideration of the Government of India, and part of the problem which we have to solve is where we are to get this third Judge, what position we are to give him, and what duties we are to assign to him. A Court of appeal consisting of two Judges, one of whom is the Judge from whom the appeal lies, is not a satisfactory instrument of justice, and I should be very glad to see something better established in its place; but until that desirable consummation is attained, we must content ourselves with removing some of the most obvious defects of the existing instrument. Amongst the various sections of the Act of 1875 under which an appeal or reference may be made to the Special Court are sections 76 and 80, which it is now proposed to amend. Section 76 provides that—

'If in any civil suit or appeal, or in any criminal case or appeal pending in the Court of the Judicial Commissioner or in the Court of the Recorder of Rangoon, the one Court wishes to obtain the opinion of the other on any question of fact or law, or usage having the force of law, or the construction of a document, or wishes to obtain the assistance of the other for the determination of the case pending before it, such Court shall record a memorandum to that effect; and, after the receipt of a copy of such memorandum by the other Court, the said Judicial Commissioner and Recorder shall sit together as soon as may be convenient, and shall form a Special Court for the disposal of the said question or for the determination of the case so pending.

'In case of difference of opinion, that of the Court which sought the opinion of the other shall prevail.'

"Then section 80 runs as follows:—

'Whenever, in cases tried by the Judicial Commissioner and Recorder of Rangoon sitting together as a Special Court without a Commissioner, a difference of opinion arises, the following rules shall be observed:—

'(*a*) In cases coming before the Special Court by way of appeal, and not being criminal cases, if the Judicial Commissioner and Recorder do not concur in a judgment varying the decision appealed from, such decision shall be upheld. Provided that, if the difference of opinion arise as to some point of law, or custom having the force of law, or the admissibility of evidence or construction of a document affecting the merits of the case, and if either the Judicial Commissioner or the Recorder be of opinion that the point should be referred to the High Court, they shall state the point as to which they differ, and forward such statement, with their respective opinions thereon, to the High Court.

'(*b*) In criminal cases and in cases not coming before the Special Court by way of appeal, the Judicial Commissioner and the Recorder shall state the point as to which they differ, and forward such statement, with their respective opinions thereon, to the High Court.'

"I ought to explain that the High Court referred to in this section is defined under the Act to mean the High Court of Judicature at Calcutta.

"You will observe that under section 76 the opinion of the referring Judge *must* prevail in case of difference, and that there is no possibility of any further appeal or reference. But, under section 80, the differing Judges may, in certain cases, and must in others, refer the point in difference to the High Court of Calcutta. Now, it so happened that a short time ago a difficult question under the Gambling Act came before the Judicial Commissioner of British Burma. The question was whether a particular form of gambling which appears to be very popular in British Burma and which is known as the *Tí*, or 36 animal game, was or was not an offence under the Gambling Act, VII of 1867, or under the provisions of the Penal Code applicable to lotteries. The Judicial Commissioner was of opinion that it was not such an offence, but, as the question was important, he referred it under section 76 to the consideration of the Special Court, consisting of himself and the Recorder.

"The Recorder differed from his colleague, but did not succeed in convincing him; and thereupon, under section 76, the opinion of the Judicial Commissioner prevailed. Shortly afterwards the self-same question came before the Recorder. He stuck to his former opinion, but referred the question to the Special Court, when the two learned Judges pronounced judgment each in favour of his own previous opinion. On this occasion, however, the referring Judge was the Recorder, who was in favour of sustaining the conviction, and therefore it was sustained, although the Judicial Commissioner was in favour of quashing it. There is no further appeal, and the result is that, until the legislature steps in, that which is lawful outside Rangoon under the Judicial Commissioner is unlawful inside Rangoon where the Recorder's law is in force. This is not a satisfactory condition of affairs, and I shall probably have before long to submit to you proposals for cutting by legislation the tangle which has occurred in this particular case, when I daresay I shall have an opportunity of expounding the mysteries of the 36 animal game.

"In the meantime, it is desirable to prevent the recurrence of a similar deadlock; and therefore we propose that, when a Judge refers a question under section 76 to the Special Court and does not succeed in convincing or in being convinced by his colleague, the Court consisting of the two Judges shall have the power to refer the question to the High Court of Calcutta.

"That is one of the difficulties which has occurred in connection with section 76. Another is this. From the way in which sections 76 and 80 are drawn, it is sometimes not at all easy to say under which of the two sections a particular reference has been made to a Special Court, and I am informed that cases have occurred in which a point has been stated for the opinion of the Calcutta High Court under section 80 although it was doubtful whether the original reference was not made under section 76, which does not admit of such proceedings being taken. In order to remove any doubt as to the validity of decisions which have been already given on such references, I propose to make the amending clause retrospective, so as to confirm past proceedings."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the following section be added to the Bill:—

New section to follow section 94.

"12. After section 94 the following section shall be inserted, namely:—

Language of Rangoon Small Cause Court.

'94A. Notwithstanding anything contained in the Code of Civil Procedure, all or any proceedings, written or oral, before any person appointed under section 94 of this Act and section 15 of Act XI of 1865 to exercise the powers of a Judge of a Court of Small Causes in the Small Cause Court at Rangoon, shall be in such language as the Chief Commissioner may, from time to time, prescribe.'"

He said:—"The object of this amendment is to meet what may perhaps be described as a metaphysical difficulty. Under section 645 of the Civil Procedure Code, the Local Government has power to declare what is to be the language of a Small Cause Court. At Rangoon there is a Small Cause Court with two Judges, one of whom attends principally to English cases and the other principally to Native cases. It would be obviously convenient that the language used in proceedings before one Judge should be English, and that the language used in proceedings before the other should be Burmese; but, as the Court is one and indivisible, a direction to that effect cannot be given under the Civil Procedure Code. In order, therefore, to meet that difficulty, and to allow of the language being different before the two Judges, I propose to make this amendment."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

RANGOON WATER-WORKS BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of water in that Town. He said:—

"The object of the Bill is to provide the necessary legal powers for carrying out a scheme which is now in progress for supplying the town of Rangoon with water from the neighbouring Victoria Lake. The measure is of purely local interest, and the provisions of the Bill are fully explained in the Statement of Objects and Reasons."

The Motion was put and agreed to.

VALIDATION OF MARRIAGE LICENSES BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill for the validation of certain licenses to solemnize marriages granted to Ministers of Religion under Act XXV of 1864. He said:—

"The object of this Bill is simply to remove certain doubts which have been caused by the omission to insert in the Marriage Acts of 1865 and 1872 words continuing in force licenses to solemnize marriages which had been granted under the previous Act of 1864."

The Motion was put and agreed to.

SINDH INCUMBERED ESTATES BILL.

The Hon'ble SIR STEUART BAYLEY presented the Report of the Select Committee on the Bill to amend the Sindh Encumbered Estates Act, 1881. He said that he had to apologise for not having the notice entered on the List of Business. The fact was that the Report of the Select Committee was ready some time ago, and he was only waiting for a demi-official communication from the Bombay Government on the subject, which had not arrived in time to allow of his having the notice entered on to-day's list.

The Council adjourned to Wednesday, the 18th June, 1884.

SIMLA;
The 6th June, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

SIMLA,
The 12th June 1884.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th JUNE 1884.

GENERAL REMARKS.—Rain has fallen more or less generally in the Madras Presidency, Mysore, British Burma, Assam, and the North-Western Provinces and Oudh. In Bengal the fall was heavy in many districts. There have also been showers in parts of Bombay, Punjab, Central India, and Rajputana.

Harvesting has been completed in parts of the Madras Presidency. Standing crops are generally in good or fair condition, except in Malabar where they have been much injured by want of rain. Locusts still exist in parts of Kurnool where they are injuring the fruit gardens. In Mysore agricultural prospects continue favourable, but rain is greatly needed in Coorg for the *ragi* crop, for ploughing, and also for coffee. In the Bombay Presidency, *kharif* sowings continue in several districts, though rain is wanted to facilitate operations. Preparation for *kharif* in Berar and for *tabi* in the Nizam's territories are in progress. Ploughing for *kharif* has commenced in Central India and in Rajputana, where agricultural prospects are generally good. In the Punjab *kharif* ploughings and sowings are in progress. In the North-Western Provinces and Oudh ploughing is commencing in anticipation of the rains, and showers have already benefited the cane crops. Scarcity of fodder and water is felt in some districts, but the condition of cattle remains good. Preparations for *kharif* are in active progress in the Central Provinces. In Bengal sowing of *aus* and *aman* crops still continues, and paddy, *til* and *mung*—the last in Bhagalpur—are being reaped, with good outturn. Jute, sugarcane, early paddy, and *cheena* (millet) are doing well. Sowings continue in Assam and ploughing has commenced in British Burma.

Small-pox and cholera are generally prevalent, but are abating in the North-Western Provinces, Punjab, and British Burma.

Prices are rising in parts of Bengal, the North-Western Provinces and Oudh, and Punjab; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 11th)		
Bellary ...	.....	Cultivation of paddy and sugarcane commenced. Sporadic cholera in the west, 16 deaths.
Kurnool ...	·04 (average)	Lands being prepared. Monsoon anxiously awaited. Small-pox and cattle-disease in parts. Locusts in five taluks, fruit gardens damaged.
Ganjam ...	·25 (average)	Small-pox prevalent; fever and cholera in parts.
Kistna ...	·08 (average)	Harvest completed. Small-pox, fever, and cattle-disease in places; 1 death from cholera
Chingleput (Madras) ...	.....	Standing crops fair, but want of rain felt in parts; harvest paddy, yield below average. Small-pox prevalent; cattle-disease slight in two taluks; 2 deaths from cholera.
Coimbatore ...	·15 (average)	Standing crops generally good, but dry crops attacked by insects in two taluks and suffering from want of rain in three; harvest paddy, *cholum*, *cumbu*, yield about average. Fever in two taluks; 2 deaths from cholera.
Tanjore ...	·02 (average)	Standing crops generally good, in parts not flourishing for want of rain; harvest paddy, cotton and indigo, yield below average. 452 deaths from cholera.
Madura ...	·24 (average)	Small-pox prevalent; 1 death from cholera.
Malabar ...	·08 (average)	Standing crops much injured by want of rain; harvest of third crop paddy over. Small-pox slight in nine taluks; fever in two; 8 deaths from cholera.
Travancore ...	.....	Young paddy coming up, but weather unfavourable for its growth. Fever general and small-pox in parts. *General Remarks.*—General prospects fair.
Bombay—(June 11th)		
Karachi ...	No rain	River at Kotri on 9th, 11 feet 8 inches against 9 feet 3 inches on same date last year. Fever in four talukas; cattle-disease in four talukas, loss of 52 buffaloes and 160 cows and bullocks in Tatta and Ghorabari. *Aduna* crops being harvested. Small-pox in ten villages in districts, 26 fresh cases, 3 deaths, 26 remaining sick. Prices—wheat, red rice, and *bajri* in Kurachi 24, 30 and 32, in Sehwan 36, 32 and 40, and in Sakro 16, 28 and 36 pounds per rupee, respectively.
Hyderabad ...	No rain	High southerly winds prevail. River at Kotri on 9th, 11 feet 8 inches against 9 feet 3 inches on same date last year. Small-pox in seven, fever in two, and cattle-disease in two talukas. Wheat 27, *bajri* 36, *juari* 38, red rice 26, and white rice 20 pounds per rupee.
Ahmedabad ...	·10	Manuring operations continue. Cholera in Parentij, 2 cases, 1 fatal. Wheat 29 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	No rain	Cholera abated in Baroda, 11 deaths; it continues in mild form in some villages of the Baroda and Kamrej mehals. Preparation of land for next season continues. Prices—*bajri* 32 and rice 22 pounds per British rupee.
Surat ...	No rain	Preparation for *kharif* continues. Two deaths from cholera in Chorasi. *Juari* 32 and *nagli* 41 pounds per rupee.
Nasik ...	No rain	Want of rain is much felt. Public health generally good; small-pox in parts of Nasik, Sinnar, and Chandor talukas; cattle-disease in Malegaon and Kalwan. Wheat 34½, *bajri* 31, and rice 21 seers per rupee.
Colaba (Bombay) ...	No rain	Abnormal temperature 1° to 2° warm; vapour in air defective from 4th to 8th; abnormal wind northerly from 4th to 7th.
Poona ...	No rain	Slight small-pox continues in Junnar, Haveli, and Mawal talukas. Prices—*bajri* 34 and *juari* 36; in Poona *bajri* 27 and *juari* 30 pounds per rupee.
Ahmednagar ...	Nagar, ·10	Sowing of *tasar* crops delayed for want of rain. Cholera in Akola, 5 attacks, no deaths; slight cattle-disease in Newasa. *Juari*—maximum 60 pounds in Sangamner, minimum 35 in Karjat; *bajri*—maximum 48 in Sangamner, minimum 36 in Nagar.
Sholapur ...	No rain	Hot weather continues. *Juari* 43 and *bajri* 43 pounds 19 tolas per rupee.
Dharwar ...	Rain in eight talukas; maximum ·50 in Hubli, minimum ·03 in Ranibennur.	More rain urgently wanted. Sowing operations retarded for want of rain. Scarcity of drinking-water in Navalgund, Gadag, Bankapur, and Kalghatgi. Cholera in Hubli, Gadag, Ranibennur, Karajgi, and Ron, 70 fatal, out of 148 cases; small-pox decreasing; fever in two talukas. Rice 27 to 39 and *juari* 49 to 77 pounds per rupee.
Kanara ...	Rain in Honore, ·20; Yellapur, ·18; Mundgud, ·18; and Karwar, ·03.	Preparing ground and sowing seed. Small-pox—20 deaths in Kumpta, 8 in Sirsi, 1 in Sidapur, and 1 in Karwar. Rain wanted in Supa Petha. Cattle-disease in Akola. Common rice at Karwar 12 seers; district average 15 seers per rupee.
Rajkot ...	No rain	General health good. Weather very hot. Fever and small-pox less prevalent. *Bajri* 31 and *juari* 38 pounds per rupee.
		General Remarks.—Slight rain in parts of Ahmedabad, Ahmednagar, Dharwar, Belgaum, and Kanara; more urgently needed in Dharwar, Belgaum, and Nasik. *Kharif* sowings continuing in several districts. Cholera in parts of ten districts, and fever and cattle-disease in eleven; small-pox in most districts.
Bengal—(June 11th)		
Chittagong ...	3·24	Weather seasonable. Early crops progressing; lands being prepared for *amun* crop. Cholera abating; fever broken out in several places; cattle-disease reported. Prices stationary.
Dacca ...	2·49	Prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	4·25	Early paddy, jute, and sugarcane doing well; sowing of *amun* on low lands going on; high lands are being ploughed. Price of common rice stationary. Public health generally good.
Moorshedabad ...	1·83	Weather fairly cool, with occasional storms. Prospects of crops continue good. Prices falling.
Rajshahye ...	4·08	Prospects of *aus* and *amun* paddy favourable. Public health good.
Burdwan ...	2·62	Rain general. Cultivation going on. Prospects of crops good.
Rungpore ...	1·58	Weather cloudy and cool. Prospects of crops favourable. Price of rice varies from Rs. 3 to 4 per maund.
Bhagalpur ...	1·72	*Mung* being harvested, with good outturn; young paddy seedlings thriving; cultivation going on vigorously; the recent rain has improved prospects of standing crops. Rice selling 13 seers 14 chittacks per rupee.
Purneah ...	2·1	Prospects of crops good; agricultural operations brisk. Common rice 16 seers per rupee. Public health fair.
Patna ...	1·21	Ploughing and sowing of *bhadoi* crops going on; sugarcane looks well. Cholera and small-pox prevalent.
Durbhunga ...	2·77	*Bhadoi* crops being sown and lands being prepared for *aghani*; prospects of crops improving. Prices falling slightly. Public health generally good.
Hazaribagh ...	1·43	Weather hot, windy, and cloudy. Ploughing and sowing have begun in some places. More rain wanted. Prices continue high. Cholera and small-pox still reported from certain places, otherwise public health good.
Cuttack ...	2·47	Weather cooler. Ploughing progressing; early paddy being sown. Prices rather high owing to closing of canal checking imports from mofussil. Public health generally good, only scattered cases of cholera and small-pox reported from interior.
		General Remarks.—Heavy rain fell during the week under review in many districts, specially in Mymensing where the rain has caused slight damage. Rain is however still wanted in some places for agricultural purposes. Two severe nor'-westers, attended with heavy rain, occurred in Bogra and a less severe one in Mozufferpore. Jute, sugarcane, early paddy, *murwa*, and *cheena* doing well; sowing of *aus* generally and of *amun* in some low lands going on, but *amun* sowings even in high lands of Noakhally have been completed. Sowing in *jhooms* still continues in hill tracts of Chittagong and Tipperah; *jali* paddy and *til* still being reaped and *mung* in Bhagalpur, with good outturn. Cholera and small-pox are still reported. Price of rice has slightly risen in Cuttack town, owing to close of canal; it has also slightly risen in Bankura, Howrah, and Hazaribagh; in Moorshedabad and Bhagalpur it has fallen slightly.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—(June 11th)		
Benares (June 10th)	Shower on 9th	Weather cloudy to-day. Much less cholera and small-pox. Sugarcane doing well. Prices rising, except gram, rice, and *dhall*.
Allahabad („ „)	.....	Weather cooler, with east wind and clouds. Cholera much abated everywhere, also small-pox; city very healthy. Prices slightly risen.
Gorakhpur („ 9th)	Rain varying from 1·0 to 2·0 throughout district.	Cloudy weather, with high winds. Small-pox nearly gone. Prices steady.
Jhansi („ 10th)	Slight showers have fallen here and there.	Weather cloudy; wind variable. Prices fluctuating. Health of people and cattle good. Fodder and water scarce.
Agra („ 9th)	2·12 rain in two parganas; slight shower in Agra on 4th.	Fever in three and small-pox in two parganas; cholera in two parganas, but is now commencing to abate. Prices steady.
Bareilly („ 10th)	A few showers	Wheat, barley, and *bajri* slightly risen; sugarcane improving. Cattle-disease decreasing; public health good.
Meerut („ „)	2·5; Baghpat, 3·0; Mowana, 1·0.	Heavy storm on morning of 8th; sharp shock of earthquake at 11 P.M. on 5th; high wind, with frequent duststorms. General health good, but seasonable; fever frequent in Meerut city. Prices steady.
Kumaon („ „)	Showers during week ending in good rain on night of 9th.	Crops will be much benefited by rain; *kharif* sowings completed. A few cases of cholera and small-pox. Prices steady.
Lucknow („ „)	Sadr, 1·6; Malliabad, 1·4; Mohunlalgunj, ·9.	Land is being tilled. Health of people and cattle good. Supplies abundant. Prices steady.
Partabgarh („ 6th)	Slight showers on nights of 3rd and 4th instant.	Bazars well stocked. Duststorms during week. Weather much cooler. Small-pox still very bad.
Sitapur („ 10th)	Moderate showers in Sidhauli, Misrikh, and Biswan and general rain in Sitapur last night.	Easterly winds now prevail. The rain which has fallen is hardly sufficient for cultivating operations. Prices are slightly rising.
Fyzabad („ „)	Sadr, ·3	Weather cloudy. Public health good; condition of cattle fair.
Rae Bareli („ 9th)	.....	Heat intense; weather occasionally cloudy. Cholera in three parganas. Scarcity of water continues. Prices remain steady.
Cawnpore („ „)	·1	Weather extremely hot; duststorm this morning. Slight rise in prices. Condition of people and cattle on the whole good, but sporadic cholera and small-pox continue.
Farukhabad („ 10th)	Sadr and Tirwa, ·3	Strong east wind blowing for two days; sky still cloudy. Health of people fair; no cattle-disease. Markets well supplied.
		General Remarks.—East winds and cloudy weather have prevailed, and showers of rain have fallen in all parts of the province. An earthquake was felt at Meerut on 5th. Prices show a general tendency to rise; markets continue well stocked. Scarcity of fodder and water is felt in some districts, but the condition of cattle remains good. Small-pox and cholera are abating; public health is generally satisfactory.
Punjab—(June 10th)		
Delhi ...	·30	Small-pox abating. Prices almost stationary.
Hissar ...	Light showers of rain	Small-pox continues in Sirsa district. Prices show a falling tendency.
Umballa ...	.....	Health good. Ploughing for *kharif* sowings commenced. Prices of gram and wheat gradually rising. Prices of other food-grains stationary.
Jullundur ...	·20	Health good, except that small-pox continues in villages adjacent to Sadr. Sugarcane and cotton being irrigated. Prices steady.
Amritsar ...	.....	Rain wanted. Health good. Prices stationary.
Sialkot ...	·10	Health good, but small-pox still continues in the city. *Rabi* harvesting nearly completed. Prices show a rising tendency.
Ferozepore ...	·20	Health good. Prices falling.
Lahore ...	Slight rain	Weather threatening. Health good. Prices steady.
Rawalpindi ...	·15	Health good. Prices almost stationary.
Mooltan ...	.....	Health good. *Kharif* crops being sown. Prices stationary.
Dera Ismail Khan ...	.....	Health good. Prospects unfavourable. Prices steady.
Peshawar ...	·50	Slight fever. Prices fluctuating.
		General Remarks.—Slight rain has fallen in most districts. Small-pox continues in the Sirsa district, in the villages adjacent to Jullundur and in the Sialkot city, and is abating in the Delhi district; cholera still prevails in Kangra and there is fever in Peshawar; elsewhere the health of the province is good. *Kharif* ploughings and sowings are in progress.
Central Provinces—(June 11th)		
Nagpur ...	.....	Weather sultry and cloudy. Ground being prepared for *kharif* sowings. Small-pox prevails; cattle-disease prevalent. Prices of *juari*, *tur*, and gram rising.
Jubbulpore ...	.....	Weather cloudy at times and stormy. Ploughing for *kharif* sowings continues. Health good. Prices unchanged.
Saugor (June 10th)	.....	Weather very hot. *Kharif* ploughing in hand. Small-pox decreasing. Prices steady.
Seoni ...	.....	Weather cloudy and close. Ploughing in progress. Cattle-disease slight; small-pox prevalent. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces— *contd.*		
Hoshangabad ...	.....	Weather hot. Ploughing continues. 16 cases small-pox. Wheat 20 and rice 10 seers per rupee.
Khandwa ...	.....	Weather warm and windy. *Kharif* preparations continue. *Juari* 25½, rice 12½, and wheat 22½ seers per rupee.
Raipur ...	·03	Weather very hot, and occasionally cloudy and stormy. Ploughing brisk. Health good. Rice 23½ and wheat 30 seers per rupee.
Sambalpur ...	.....	Weather hot and cloudy, with storm. Prospects good. Public health good. Common rice 28 seers per rupee.
		General Remarks.—Weather hot and cloudy. Preparation of land for *kharif* sowings continues. Small-pox prevails in some districts.
British Burma— (June 11th)		
Akyab (June 7th)	6·58	Total rainfall 23·65. Slight small-pox.
Rangoon („ „)	3·40	Total rainfall 12·92. Slight cholera and small-pox.
Bassein („ „)	3·45	Total rainfall 10·86. Slight small-pox and cholera.
Amherst (Moulmein) („ „)	6·75	Total rainfall 20·18.
Toungoo („ „)	4·36	Total rainfall 11·12.
Kyoukphyoo („ „)	...	No report received.
Sandoway („ „)	3·59	Total rainfall 12·91.
Hanthawaddy („ „)	...	No report received.
Pegu („ „)	4·26	Total rainfall 18·16. Ploughing commenced.
Tharrawaddy („ „)	3·15	Total rainfall 13·50. Small-pox still prevalent.
Prome („ „)	1·01	Total rainfall 6·87. Small-pox and cholera abating.
Thonegwa („ „)	4·40	Total rainfall 24·07. Cholera and small-pox prevalent. Ploughing commenced.
Henzada („ „)	2·36	Total rainfall 14·40. Some small-pox in town.
Thayetmyo („ „)	0·53	Total rainfall 5·01. Some cholera and small-pox.
Shwaygyin („ „)	4·94	Total rainfall 13·61.
Tavoy („ „)	5·16	Total rainfall 19·82.
Mergui („ „)	.....	No report received.
		***General Remarks.*—Public health good. Rainfall average.**
Assam—(June 11th)		
Gauhati (June 10th)	9·7	Weather warm, with occasional rain; more rain wanted. Small-pox still reported from Shastra Barpetta. Prospects of *aus* good; sugarcane doing well. Public health fair.
Sylhet ...	5·47	Floods reported in south of district, otherwise crop prospects good. Cattle-disease has appeared; public health indifferent.
Cachar (Silchar) ...	2·82	Weather warm than last week. Sowing of *dumahi* and *murali* crops finished, that of *asra* progressing. Common rice 14½ seers per rupee. 36 deaths from cholera reported; none from small-pox.
Dibrugarh ...	1·90	Weather hot. Lands being prepared for *sali dhan*. Small-pox and cattle-disease reported.
Mysore and Coorg— (June 11th)		
Bangalore ...	1·86	Rain has also fallen in parts of the province in Shimoga district; more rain is required. Agricultural operations in progress; prospects favourable. Public health good.
Mysore ...	1·68	
Mercara ...	·21	The monsoon which is overdue has not set in yet. Rain greatly needed for the *ragi* crop and for ploughing, also on coffee plantation. Prices of food-grains rising.
Berar & Hyderabad— (June 11th)		
Amraoti ...	.....	Weather hot. *Kharif* preparations in progress. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	.....	Ploughing for *kharif* sowings continue.
Hyderabad ...	.....	Preparations for *rabi* sowings in progress. General health good. Prices—wheat 14½, coarse rice 11½, white *juari* 16½, yellow *juari* 21, and *tur* 20½ seers per current sicca rupee.
Central India States— (June 11th)		
Indore ...	No rain	Weather hot and sultry. One case of small-pox reported, but general health good.
Morar (Gwalior) ...	0·3	Health good. Weather seasonable.
Agar ...	No rain	High winds from the west. Health and prospects good.
Sutna ...	Slight rain	Duststorm during week. Weather very hot. Prospects and health good.
Neemuch ...	No rain	Land has been ploughed for *kharif*. Scarcity of water continues. Public health good.
Goona ...	.....	Heat excessive. Health good.
Sehore ...	.....	Weather hot. Prospects and public health good.
Nowgong ...	.....	Weather hot and sultry. Health good.
Bhopawar (Manpur) ...	.....	Two fatal cases of cholera reported to have occurred in Bagood and Kusrawad Burwani towards the end of May.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana— (June 11th)		
Abu (June 11th)	No rain	Weather seasonable, cloudy, and windy.
Sirohi („ 8th)	No rain	Tanks dry; many of the wells with little water. Health good. Weather warm, with high winds.
Marwar („ 6th)	·14	Water obtained in Jodhpore city from Ranisagar tanks and wells. Health good. Weather windy and stormy, with thunder and lightning. Prices stationary, with tendency to rise.
Meywar ...	.....	No report received.
Harowti (June 7th)	Tonk, ·17	Weather unusual, strong high wind and sandstorms; heat great.
Jhallawar („ 6th)	Sprinkle of rain in parts.	Weather windy, dusty, and cloudy. Health good.
Ajmere („ 10th)	·22	Duststorms during week; heat great. Health good.
Jeypore („ „)	·10	Cholera in Jeypore district, 6 fatal cases reported from Bandikui, no fresh cases since 29th, otherwise health normal. Prices steady.
Ulwur („ „)	Slight rain	High hot winds, with occasional clouds; shock of earthquake on 5th. Few cases cholera in two tehsils, otherwise health good.
Nepal—(June 5th)		
Katmandu ...	·62	Weather seasonable. Indian corn flourishing; transplanting of rice has begun.

No. 63 Met.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department (Meteorology), dated Simla, the 13th June 1884.

Read the following :—

Summary of the Weather Reports for May 1884.

The chief features of the Meteorological record of May 1884 are the formation of the cyclone which passed over Akyab, the abnormal heat in Upper India, and the deficiency of the rainfall which, a few localities excepted, has been general throughout the country.

Except in Bombay and the south of the Peninsula, the atmospheric pressure has been somewhat below the average of the month. The region of highest pressure throughout has been the south-west coast and Ceylon, while that of lowest pressure has been principally in Sind, Rajputana, and the Punjab; sometimes, however, in Behar and Chutia Nagpur.

It appears from the reports lately received by post from the Andamans, that the first indication of the storm was given on the 13th, when the wind at Port Blair shifted suddenly from north-west to south-east, accompanied by some rain and a cloudy sky. On the 14th the wind still held, and with increased strength, from south-south-east, with overcast weather and heavier rain. This indicated that the centre of the disturbance lay a little to the westward of the Andamans, and was growing in intensity. By the 16th the wind had veered to south-south-west at Port Blair, showing that the centre had passed to the north of that station and was moving towards the Arakan coast, where the wind was from south-east with very general rain. On the morning of the 17th a southerly gale was blowing at Diamond Island, an easterly wind at Akyab, and a north-east wind in parts of Bengal; and in the evening of the same day the cyclone apparently struck the coast near Akyab, and broke up on the Arakan hills to the east and north-east of that station. Owing to the want of telegraphic communication with the Andamans, it was not until the storm approached the Arakan coast, *viz.*, on the 15th, that any information of unsettled weather reached this office, and not until the 16th that the information was sufficiently definite to indicate the formation of a cyclone.

Unusual heat prevailed over North-Western India from Allahabad to Multan and Jacobabad. In this region the mean temperature of the month at all

stations was some degrees above the average. The hottest period, as usual, was the last week of the month, during which the following maxima were recorded :—

Allahabad	...	...	118·0° on the 30th
Agra	...	...	116·0° „ 30th
Roorkee	...	...	115·5° „ 30th
Delhi	...	...	117·0° „ 29th
Lahore	...	...	113·5° „ 30th
Multan	...	...	111·0° „ 28th
Jacobabad	...	...	119·0° „ 29th

In other parts of the country the mean temperature of the month differed little from the average, and such variations as existed were somewhat irregular. In the eastern half of the Madras Presidency, however, during the prevalence of westerly and north-westerly land winds, the temperature was exceptionally high. On one occasion the thermometer at Masulipatam rose as high as 115·5°, and that at Madras to 107·0°. These conditions were, however, temporary, and disappeared with the change of the wind from the land to the sea breeze.

The rainfall of the month has been generally deficient. The only exceptions are the stations of Lucknow and Benares in the North-Western Provinces; Sibsagar and Silchar in Assam; Dacca, Chittagong, Calcutta, and Saugor Island in Bengal; Diamond Island in Burmah; and Salem, Trichinopoly, and Madura in the Peninsula. The average excess at these stations was 2·22 inches, while the average deficiency throughout all other parts of India was 1·25 inches. At Agra, Raipur, Jeypore, and over nearly the whole of the Bombay presidency, there was no rain, and in many parts of Central, North-Western, and Western India the whole amount was insignificant.

The following table summarises the returns under the divisions adopted in the biennial summary recently issued, and shows how general the deficiency has been :—

Districts.	Average rainfall in May.	Difference of the rainfall of May 1884 from the average.
	Inches.	
North and West Punjab	1·25	—0·93
South Punjab, North-Western Provinces, and Behar...	1·68	—0·69
Assam	14·38	+1·73
East Bengal	7·75	+2·15
Lower Bengal and Orissa	4·06	—0·98
Central Provinces	0·63	—0·49
Rajputana, Central India, and Berar	0·59	—0·52
Sind and Gujrat	0·15	—0·15
Bombay	1·61	—1·43
Madras	4·30	—1·20
Mysore	5·50	—1·14
Ceylon	13;09	—0·91
Burmah	10·93	—2·43

SUPPLEMENT TO

The Gazette of India.

№ 25.} CALCUTTA, SATURDAY, JUNE 21, 1884.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

ORDERS ON REPORT ON THE OPERATIONS OF THE POST OFFICE OF INDIA, 1882-83.

No. 1284, dated Simla, the 28th May 1884.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ—

Report on the operations of the Post Office in India for the year 1882-83.

RESOLUTION.—This report is submitted later than has been usual. This is due partly to certain explanations of increase of expenditure since 1872-73, called for by the Secretary of State in reviewing the report for 1881-82, being embodied in the report. But the main reason for the delay is the order that the figures in the report should correspond with those of the published accounts. As the final figures of the Comptroller General for the published accounts are not ready till March, the annual report of the Director General cannot be completed till that month.

2. The report shows that the steady progress which marked the administration of the Post Office in previous years continued undiminished in 1882-83.

3. The most important change in the year was the opening of Post Office Savings Banks from the 1st April 1882. District Savings Banks were first opened in India in 1870. They were then managed entirely by the Comptroller General, and were opened as a rule only in district treasuries. To extend the operations of the Banks into the interior of districts, it was determined to open Savings Banks under the management of the Post Office.

4. The transactions of the first year afford gratifying proof of the success of this experiment. The number of Banks opened was 4,238, the amount deposited over 43½ lakhs, the amount of interest allowed nearly half a lakh, the amount withdrawn over 16 lakhs, and the balance at the end of the year nearly 28 lakhs, this sum being the total of the balances of 39,121 accounts.

5. The District Savings Banks (180 in number, not including the three Presidency Banks) were continued side by side with the Post Office Savings Banks. Some figures relating to them may be stated for comparison. The opening and closing balances were respectively ₹74,61,212 and ₹75,47,670, and the number of accounts at the beginning and close of the year 21,880 and 21,972.

6. The following table shows the distribution of the depositors in Post Office and District Savings Banks according to professions :—

Savings Banks.	Class I.		Class II.	Class III	Class IV.	Class V.	Class VI.	Total.
	A. Fixed income.	B. Variable income.	Domestic.	Commercial.	Agricultural	Industrial.	Indefinite	
Post Office .	14,904	2,143	7,509	2,912	904	665	10,084	39,121
District . .	10,169	1,199	3,557	778	163	964	5,142	21,972

The larger proportion of agricultural and commercial depositors in the Post Office Savings Bank is noticeable.

7. The distribution of the balances between Natives and Europeans or Eurasians is shown below :—

Savings Banks.	Native.		European and Eurasian.	
	Number of Accounts.	Amount.	Number of Accounts.	Amount.
		R		*R*
Post Office	35,623	23,02,672	3,498	4,94,124
District	17,934	57,06,491	4,038	18,41,179

The proportion of native depositors is larger in the Post Office Savings Banks than in the District Savings Banks.

8. The further experience of the working of the two sets of Savings Banks side by side may show that the maintenance of District Savings Banks is unnecessary in stations where Post Office Savings Banks exist. But they will be maintained until the statistics show a more decided preference of the public for the Post Office Banks.

9. Postal notes for the remittance of small sums payable at any Post Office to a named payee were introduced in the last quarter of 1882-83. The notes are of three denominations—8 annas, 1 rupee, and 2 rupees 8 annas. The experience of three months is not sufficient to warrant a decided opinion regarding the success of this experiment. But notes to the total value of R40,529 were sold without reducing the number of money orders for small sums.

10. Stock notes were sold through the Post Office from 1st November 1882. The report does not state the number of notes sold; but it was small.

11. Other changes during the year were—

(1) the introduction of a money order exchange with the United States of America worked through the United Kingdom;

(2) the introduction of a direct exchange of money orders between Aden and Mauritius from 1st April 1882, and between Aden and the United Kingdom from 1st January 1883;

(3) an arrangement for exchange of correspondence with Post Offices situated in the Hyderabad State;

(4) the trial of a scheme for the delivery of revenue processes through the Post Office in certain districts of the North-Western Provinces. This proved successful, and the extension of the scheme to all districts in the North-Western Provinces is now under consideration;

(5) the temporary opening of five Post Offices in Egypt for the service of the field force in that country.

12. The number of post offices, letter boxes, and village postmen increased during the year by 491, by 746, and by 429 respectively, the increase being larger in each case than in any previous year. This occurred chiefly owing to the establishment of Post Offices under village school masters—a system which is proving very successful.

13. The length of the lines over which mails are conveyed was increased during the year by 1,527 miles in all, railway lines being increased by 156 miles (due chiefly to the extension of the Punjab Northern State Railway to Peshawar, and the opening of the Ambegaon and Rajnandgaon line in the Central Provinces), cart mail and camel lines by 345, runner and boat lines by 814 (due to extension in the interior of districts), and sea lines by 212 (due to the conveyance of parcel mails by the India General Steam Navigation Company's steamers to Cuttack *viâ* Chandbali).

14. The total number of articles conveyed by the Post Office was more than 184 millions,—in addition to 2½ million money orders,—the increase being nearly 15 millions, or at the rate of 8·81 per cent., as compared with an increase of 10½ millions, or 6·61 per cent. in the previous year. The percentage of increase was largest in the case of post-cards (35·94 per cent.) and books and pattern packets (30·41), and smallest in the case of letters (the percentages being, for paid letters 4·29, for unpaid letters 0·43, and for registered letters 6·08). The increase of registered letters has not been so large as was to be expected after the reduction of the registration fee from 4 annas to 2 annas in August 1881. The increase of parcels was large, 13·90 per cent., and is attributed mainly to the popularity of the value payable system. It occurred in spite of a decrease in the number of foreign parcels which was due to the disturbances in Egypt.

15. The following table shows the steady increase since 1872-73 of the operations of the Post Office in the particulars noticed in paragraphs 12, 13, and 14:—

Year.	Post Offices.	Letter boxes.	Village postmen.	Distance over which the mails are carried.	Articles passed through the post, including money orders.
	No.	No.	No.	Miles.	No.
1872-73	3,006	3,299	. . .	49,056	93,157,000
1873-74	3,178	3,554	. . .	54,616	109,235,000
1874-75	3,408	3,938	1,463	55,898	116,119,000
1875-76	3,631	4,447	1,695	57,044	119,470,000
1876-77	3,852	5,454	1,950	58,370	122,541,000
1877-78	4,107	5,574	2,242	57,963	128,826,000
1878-79	4,392	6,167	2,601	57,954	131,899,000
1879-80	4,410	6,426	2,702	58,240	142,977,000
1880-81	4,521	6,720	2,833	58,760	158,666,000
1881-82	4,819	7,190	3,241	59,677	171,804,000
1882-83	5,310	7,936	3,670	61,204	186,620,000

16. Of the articles received for delivery, all, except 5,842,000, were at once delivered to the addressee, and the percentage of deliveries was 96·88 per cent., 2½ million money orders being included in the articles received for delivery. Of the 5,842,000 received back undelivered, 2,351,500 were sent to dead letter offices, and the remainder redirected and then delivered.

17. Of the total number of articles in the dead letter offices for disposal during the year, namely, 2,170,863, 16·88 per cent. were delivered to the addressees by redirection, 56·46 per cent. were returned to the sender, and 26·66 per cent. were undisposed of and deposited as dead.

18. The receipts from the sale of ordinary and of service postage labels and in cash increased slightly under each head during the year. The percentages of the receipts from each of these sources to the total revenue are :—

Cash	36·24
Ordinary labels	47·76
Service labels	16·00
Total .	100·00

The popularity of half-anna envelopes is increasing; 45 per cent. of the total amount of paid correspondence is now sent in those envelopes.

19. The money order business continues to expand. The value of inland money orders issued was nearly 6½ crores, the increase in amount being 12·82 per cent., and in commission 13·83 per cent. The average value of inland money orders was R25-3-0 as against R26-8-0 in 1881-82.

20. The value of foreign sterling money orders issued was £117,526, the increase being 13·83 per cent. and of orders paid £10,903, the increase being 33·24 per cent. The value of foreign rupee money orders issued was R1,12,046, and of orders paid R4,73,706. These orders are to and from Ceylon (since 1880) and Mauritius, the Straits, China, and Japan (since 1st January 1882).

21. Thirty-two new money order offices were opened, the total number being now 5,453.

22. The value of insured letters and parcels, which diminished in 1881-82, has again risen, and was higher than in any previous year, the greater portion of the increase being in letters. The total value of insured articles was R8,26,38,266, and the commission realised was R1,99,841, while the amount which the Post Office had to make good on account of losses was R6,277 only.

23. The great popularity of the value payable system is shown by the continued large increase in the number (75·32 per cent.) and the value (56·04 per cent.) of articles sent.

24. The number of complaints from the public rose from 5,433 to 5,760. This is attributed partly to two special causes—the disorganisation of the Rangoon Post Office, which led to the removal of the Post Master, and the misappropriations of the Port Blair Post Master, who was transported for life; and partly to the addition of new classes of business, Savings Banks and Postal notes, and to the dissemination of postal knowledge among the people by the Department. Still the number of complaints is less than in 1880-81, namely, 6,463. There were 253 complaints relating to loss of articles posted in registered letters and parcels, in 72 of which the Post Office officials proved to be in fault.

25. There were 164 cases of legal convictions of Post Office servants, and 69 cases of departmental punishments. These figures are slightly higher than in 1881-82.

26. The number of highway robberies of mails has diminished considerably, from 31 to 12. Convictions were obtained in four cases, and the greater portion of the stolen mail was recovered in eight cases.

27. The numerical strength of the postal establishment increased from 32,927 to 34,429.

28. In the concluding portion of his report (Part X, Financial), the Director General examines in detail, and distributes under various heads and causes, the increase of expenditure which has occurred in recent years in the Post Office. It may be said generally that the increase is either covered by increased revenue, or that the net increase has been directly productive of greater facilities to the public, either in the reduction of rates, or in improved service.

29. The financial result of the year is stated by the Director General to be a net revenue in the purely postal department of R5,57,709, which is converted into a deficit of R7,51,338, when certain items,* which do not appear in the regular accounts of the Department, are taken into consideration.

* Stationery and Printing, Stores, Pensions, Leave allowances, share of Marine Subsidies, rent of Government buildings.

30. The thanks of the Government of India are due to Mr. Hogg for his able administration of the Department.

31. The work done by the officers † of the Department mentioned in paragraph 72 of the report also deserves public acknowledgment.

† Mr. P. Sheridan. „ Barton Groves. „ J. H. Cornwall. | Mr. E. Monks. „ P. Gorman. Rai Lachman Singh Bahadur.

ORDERED, that this Resolution be communicated to the Director General of the Post Offices of India, and that the Report and the Resolution be published in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Offg. Under-Secy. to the Govt. of India.

ANNUAL REPORT

ON THE

OPERATIONS OF THE POST OFFICE OF INDIA

FOR THE YEAR

1882-83.

No. 13000, dated 26th March, 1884.

From—H. E. M. JAMES, Esq., *Offg. Director General of the Post Office of India,*
To—*The Secretary to the Government of India,* DEPARTMENT OF FINANCE.

I have the honor to submit the annual report on the operations of the Post Office of India during the year 1882-83. Mr. F. R. Hogg, who was in charge of the department during the whole year, wrote the entire report, except Section X, relating to Financial Results, which was left to myself to compile, as the final figures were not ready when he made over charge. Delay is necessarily involved by keeping back the report until the figures given in it have been compared and rendered uniform with those of the Comptroller-General, but the Secretary of State has ordered this to be done, and as the report is a permanent record of work accomplished, and the public have enjoyed the benefit of the several changes from the time of their being carried out, the loss of public interest caused by the delay is not, I think, of serious importance.

2. Two more countries were admitted into the Universal Postal Union during the year, viz., Nicaragua and Costa Rica.

3. Although sea communication with Europe is a service distinct from the Indian inland post, to which this report relates, it is nevertheless customary to give some information respecting its cost. The subsidy paid to the Peninsular and Oriental Company is not nearly covered by the postage realised. All that India collects on account of sea postage is credited to Great Britain: and when this, as well as the British collections, have been deducted from the total cost of the sea service, the balance or net cost is made a charge in equal shares upon Great Britain and India. India's share of this expense since the year 1869-70 is shewn on the margin.

Communication by sea between India and Europe by means of the contract services of the Peninsular and Oriental Steam Navigation Company.

YEAR.	Net loss on the foreign mail service charged against India.	REMARKS.
	£	
1869-70	73,110	
1870-71	69,150	
1871-72	68,110	The increase in 1876-77 and following years was caused by the reduction of postage carried out on 1st July 1876, when India entered the Union. The increase in 1879-80 is due to the reduction of postage introduced from 1st April 1879 under the convention of Paris.
1872-73	61,072	
1873-74	54,770	
1874-75	57,170	
1875-76	53,125	
1876-77	66,685	
1877-78	70,749	
1878-79	71,051	
1879-80	88,160	
1880-81	71,051	
1881-82	70,000	
1882-83	70,000	

4. The Peninsular and Oriental Company's S. S. "Malwa," bringing the mails from London of the 17th November 1882, was disabled by a collision off Suez, and the mails due at Bombay on the 5th December were only brought to destination by the following week's mail steamer on the 11th idem. Throughout the year the arrival of the foreign mail was very irregular, owing to the closing of the railway route across Egypt during the military operations in that country and to delay in the Canal. On no less than 30 occasions the foreign

mail arrived late in Bombay, and on 14 of those occasions the delay was in excess of 24 hours.

5. A list of the local steam services that were in existence at the close of the year is given below:—

By the British India Steam Navigation Company.

(1.) Weekly communication between Calcutta and Rangoon *vid* Chittagong, Akyab, Kyouk-Phyoo, Sandoway, and Bassein. — No. 1. Under a recent contract with the local administration, Kyouk-Phyoo is now a weekly port of call throughout the year and Sandoway a weekly port of call during the fair season.

(2.) Weekly communication between Calcutta, Rangoon, and Moulmein.

(3.) Five-weekly communication between Rangoon, Penang, and intermediate ports, the vessels running in connection with lines Nos. 1 and 4.

(4.) Weekly communication between Moulmein and Singapore *vid* Penang and Malacca. — No. 4. Fortnightly communication only is provided under the contract, the additional trips being performed by the Company on its own account.

(5.) Fortnightly communication between Madras, Rangoon, and intermediate ports on the north-east coast.

(6.) Weekly communication between Calcutta and Bombay, touching at intermediate ports on the Coromandel and Malabar coasts.

(7.) Semi-weekly communication between Bombay and Karachi with a weekly continuation to the Persian Gulf.

(8.) Fortnightly communication between Aden and Karachi. — No. 8. Communication once in four weeks only is provided under the contract, the additional trips being performed by the Company on its own account.

(9.) Fortnightly communication between Rangoon, Tavoy, and Mergui.
(10.) Weekly communication between Rangoon and Moulmein. — Nos. 9 and 10. Under contract with the local administration.

By the Asiatic Steam Navigation Company.

(11.) Four-weekly communication between Calcutta and Port Blair, with extensions to Camorta, Nancowry, and Rangoon. — No. 11. This line is under the control of the Military Deparment, the consideration given being not in the form of subsidy but of guaranteed rates for the transport of Government stores.

By the Irrawaddy Flotilla Company.

(12.) Weekly communication between Rangoon, Mandalay, and intermediate ports, with a monthly extension to Bhamo. Subsidy ₹5,000 per mensem.

(13.) Semi-weekly communication between Rangoon and Bassein and between Bassein and Henzada. Subsidy ₹2,500 per mensem.

(14.) Daily communication between Kyethai, Prome, Thyetmyo, and Allanmyo. Subsidy ₹2,000 per mensem.

(15.) Weekly communication, Thonegwa local (river) service. Subsidy ₹800 per mensem.

(16.) Dawson's service on the Salween and Domedamee rivers. Subsidy ₹1,200 per mensem. — Nos. 12 to 16. These lines are under the control of the local administration, the Post Office contributing ₹500 per mensem towards the subsidy for No. 13.

By other Agencies.

(17.) By the Burmese Steam Tug Company. Fortnightly communication between Moulmein, Tavoy, and Mergui. Subsidy ₹4,000 per mensem for this and for lines Nos. 9 and 10. — No. 17. Under the control of the local administration and works in connection with lines Nos. 9 and 10.

(18.) By Apcar & Co. (of Calcutta), and Jardine, Matheson, & Co. (of Hong-Kong). Monthly communication between Calcutta, the Straits, and Hong-Kong, the dates of departure being regulated primarily with reference to the Calcutta opium sales. No subsidy.

(19.) By the Euphrates and Tigris Steam Navigation Company. Weekly communication between Busreh and Bagdad. — No. 19. Under the control of Her Majesty's Secretary of State for India, the subsidy is £300 per mensem. Steamers run in connection with line No. 7.

(20.) By the Peninsular and Oriental Steam Navigation Company. Fortnightly communication between Calcutta and Colombo, touching at Madras.

(21.) By the Peninsular and Oriental Steam Navigation Company. Fortnightly communication between Bombay and Colombo. — Nos. 20 and 21. These are non-contract lines maintained by the Company on its own account in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails forwarded by these non-contract services.

NOTE.—Nos. 1 to 8 are under the control of the Indian Post Office, by which a subsidy of ₹7,25,000 per annum is paid.

NOTE.—A service by sea worked by local native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankesanturai on the Ceylon side.

6. The most important event of the year was the opening of Post Office Savings Banks. This measure will be dealt with in a later section.

7. India Postal Notes for small fixed sums of money of three values, *viz.*, ₹2-8, ₹1, and annas 8, were issued for inland use from the 1st January 1883.

8. Stock notes were sold through the agency of the Post Office with effect from the 1st November 1882.

9. A money order exchange with the United States of America was introduced on the 1st July 1882.

10. An arrangement was concluded for an exchange of correspondence between the Imperial Post and Post Offices situated in Hyderabad (Deccan). For the first time the delivery in the Nizam's territory of letters and other articles on which postage is due was thus provided for. The arrangement began to work from the 1st August 1882.

11. A scheme for the delivery of revenue processes through the agency of the Post Office, instead of by a special establishment, was tried with success in the North-Western Provinces. The extension of this scheme to all districts in those provinces is now under consideration.

12. Five Post Offices were temporarily established in Egypt for the convenience of the Indian Field Force serving in that country. Special arrangements for the issue of money orders by these offices were made and a parcel post between Egypt and India was also temporarily organised.

Section I.—Post Offices, Letter-Boxes, and Village Postmen.

13. Statistics under this head will be found in Appendix I, of which an abstract is given in the margin. The increase is larger than that recorded in any previous year. But it consists mainly of village post offices, great efforts having been made to extend the post at small places in the interior of districts by utilising school-masters and other cheap extraneous agencies. The Post Master General of Bombay reports as follows: "The increase in the number of Post Offices in the charge of village school-masters is a marked feature of the year. This agency is now being largely used and with great success in this circle."

	No. at close of 1881-82.	No. at close of 1882-83.	Increase.
Post Offices	4,819	5,310	491
Letter Boxes	7,190	7,936	746
Village Postmen	3,241	3,670	429

Section II.—Postal Lines.

14. The next statement (Appendix II) gives the distance over which the mails were conveyed by the several methods of conveyance. It is summarised on the margin. Each heading shews an increase. That under "Railways" is the result of the extension of the Northern State Railway to Peshawar, the opening of the Ambegaon and Rajnandgaon line in the Central Provinces, and several minor additions. The increase under "Mail cart," &c., is due principally to arrangements with contractors for the carriage of the post at cheap rates. The lines principally affected were those between Banda and Nowgong (65 miles) and Gorakhpur and Fyzabad (84 miles) in the North-Western Provinces: between Sagor and Kareli (76 miles) and Piparia and Pachmarhi (32 miles) in the Central Provinces: and between Jeypur and Tonk (60 miles) in Rajputana. Several short tonga lines were also newly opened in the Presidency of Bombay, the total length of which amounted to 56 miles.

Year.	Railway.	Mail cart horse and camel lines.	Runners and boats.	Sea.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.
1881-82	9,745	3,393	32,321	14,308	59,677
1882-83	9,901	3,648	33,135	14,520	61,204
Increase	156	255	814	212	1,527

The excess mileage under "Runners and Boats" is the consequence of postal expansion in the interior of districts. It represents the net result of numerous revisions and extensions which occurred for the most part in Bombay, Behar, and Eastern Bengal. Finally, the additional mileage by sea is caused by the use of the India General Steam Navigation Company's vessels for the conveyance of the parcel mail for Cuttack *vid* Chandbali.

Section III.—Correspondence.

15. Appendix III contains the correspondence returns, of which an abstract is given on the margin. There is a total increase of nearly 15 millions of articles, or 8·81 per cent., as compared with an increase of 6·61 per cent. in the previous year. Book and pattern packets shew the largest increase. The growth in parcel traffic is largely due to the increasing popularity of the value-payable system, as a later section (section VII) will shew. As respects newspapers, it will be remembered that the reduced rate for light papers, introduced in November 1881, at once affected the statistics; for the fall of 0·32 per cent. in the first half of the year 1881-82 was changed into a rise of 10·34 per cent. in the second half of that year. A further rise of 12·36 per cent. has now to be recorded.

Year.	Letters (including Post-cards).	Newspapers.	Parcels.	Book and Pattern Packets.	Total.
1881-82 . .	153,093,671	12,526,800	1,152,070	2,387,282	169,159,823
1882-83 . .	165,553,493	14,075,677	1,312,228	3,113,267	184,054,665
Increase . .	12,459,822	1,548,877	160,158	725,985	14,894,842
Percentage of increase .	8·14	12·36	13·90	30·41	8·81

16. Letters and post-cards are further analysed on the margin. There is again a great increase in post-cards, of which nearly 30 millions were given out for delivery. The Post Master General of Madras reports that "post-cards are largely employed in business for the circulation of advertisements, and the native public are resorting to their use for announcing domestic occurrences." Notwithstanding the competition of post-cards, paid letters have increased to the extent of 4·29 per cent. The total number of registered letters is not so large as was anticipated; for the reduction of the registration fee in August 1881 from 4 annas to 2 annas was immediately followed by an increase of 19·76 per cent. in the number of letters registered in 1881-82, while the figures for 1882-83 shew an increase of only 6·08 per cent. But the registration statistics have been considerably affected by the recent orders of Government under which judicial and revenue processes and notices, instead of travelling each separately as a private cover, are now amalgamated and included daily in one official envelope.

Year.	Post-cards.	Letters paid.	Letters unpaid.	Letters registered.	Total.
1881-82 . .	21,953,265	99,744,325	28,747,205	3,248,786	153,093,871
1882-83 . .	29,844,147	103,993,422	28,869,570	3,446,354	186,153,493
Increase . .	7,890,882	4,249,097	122,275	197,568	12,459,822
Percentage of increase .	35·94	4·29	0·43	6·08	8·14

17. Foreign correspondence is included in the returns given in paragraph 15 above. It is separately shewn in the following statement. In the exchange with the United Kingdom each heading shews an increase, the largest increase being under the head of "Newspapers." India sent 53,684 post-cards to the United Kingdom against 37,466 received in the opposite direction. As regards the

exchanges with countries other than the United Kingdom, it should be explained that the periods for taking the statistics which form the basis of these returns are fixed by the rules of the Universal Postal Union. As these statistics are not yet available last year's figures have been repeated :—

Foreign Correspondence.

		Estimated aggregate number.		
		1881-82.	1882-83.	Percentage of Increase.
Despatched from India to the United Kingdom.	Letters (including Post-cards)	2,687,915	2,717,798	1·11

* This includes 35 parcels sent to Egypt and 21 parcels sent from Egypt under a temporary exchange arranged speciálly for the benefit of the Indian contingent serving in Egypt during the war.

19. For the first time since the foreign parcel post was started in the year 1873-74, there is a fall in the number of parcels dealt with, as the marginal figures will show. This fall occurred principally in the exchanges with the Continent of Europe, and took place mainly between the months of April and

	No. of foreign parcels.

C

September. It was doubtless due to the effect of the disturbances in Egypt at that time.

20. The correspondence entered in the table given on the margin of paragraph 15 was disposed of in the following manner, which shows that the proportion of articles delivered to the whole was 96·88 per cent. :—

Sent out for delivery (including 2,565,904 Money Orders)	186,620,569
Received back undelivered	5,841,903
Balance actually delivered .	180,778,666
Sent to Dead Letter Offices	2,351,417
	183,130,083

NOTE.—Of the number received back undelivered, some are subsequently delivered under re-issue, the remainder being sent to Dead Letter Offices.

21. *Dead Letter Offices.*—These offices remain the same as they were at the close of 1880-81, except that one Railway Mail Service Enquiry Office was transferred from Lahore to Umballa from the 1st October 1882. Appendix IV contains the usual statistics relating to the working of these offices. An abstract is given below. The number of articles disposed of under both the heads of re-direction to addressees and return to senders continues to improve:—

DEAD LETTERS.	NUMBER.		PERCENTAGE.	
	1881-82.	1882-83.	1881-82.	1882-83.
Total number of articles received in Dead Letter Offices	3,124,540	3,074,850		
	1881-82.	1882-83.

			55·97	56·46
			28·07	26·66

22. *Postage Labels.*—An abstract of Appendices V and VI, relating to the sale of postage labels, is given below. The consumption of half-anna envelopes has risen to 46,619,698, being an increase of nearly four millions. So great is the popularity of these envelopes that they now compose upwards of 45 per cent. of the entire paid correspondence of the country. The larger sale of two-anna labels and the smaller sale of four-anna labels are natural results of the reduction of the registration fee.

23. The next table shews the proportions of revenue realised in cash and stamps from the year 1874-75. The change from the year 1880-81, when the cash proportion began to rise and the stamp proportion began to fall, is due, as explained in previous reports, to alterations of system under which certain fees and descriptions of postage were realised in cash instead of in stamps.

Proportion of revenue derived from Postage Stamps and from Cash.

Section IV.—District Post.

24. District Posts have for their primary object the conveyance of official correspondence between police and revenue stations in the interior of districts where the general wants of the locality are not such as to call for the provision of postal facilities by the Imperial Post. For the most part they are administered by the local officers of the Imperial Post acting under the orders of the local Government.

25. In British Burma the control of the district post rested until recently wholly with district officers. But the system of working this organisation through the agency of local Imperial Post Officials has of late been extended to that province also, and the Deputy Post Master General now manages the district post in seven districts in British Burma. This change was accompanied by the addition of numerous Post Offices and has been followed by an increase in district correspondence of more than 100 per cent. Statistics relating to the district post are given in the following statement. But the figures are not wholly trustworthy, owing to the want of uniformity in system and the absence of a central office of account.

District Post.

Postal Circles.		Number of District Post Offices and Receiving Offices.	Number of District Post Village Postmen and Postmen.	Number of District Post Letter-Boxes.	Distance in miles of District Post Lines.	Local cess.	Grant from Imperial or Provincial Revenue.	Expenditure.	Articles received from the Imperial and District Post for delivery by the District Post.	Articles posted in the District Post for despatch to the Imperial or District Post.	Articles returned by the District to the Imperial Post undelivered.	Percentage of these returned on the total number received for delivery by the District Post.

(a) Excluding 16 letter-boxes erroneously shewn in excess last year.
(b) On purely district post establishment Rs. 1,016 in 1881-82 and Rs. 2,706 in 1882-83, besides an annual subsidy for the Dera Ismail Khan and Chichawatni hill cart line of Rs. 18,468.
(c) These are dry season distances; during the rains these lines are increased in length.
(d) Grant from Local Improvement Fund.
(e) Includes Rs. 4,284 contributed from Frontier Police Funds and Rs. 480 contributed by Maharajah of Agartola.
(f) Including 505 miles of lines paid from the revenues of Feudatory States.

Section V.—Money Orders.

Inland Money Orders.

26. On the margin is given an abstract which shews the yearly inland Money Order transactions from the time the system was first introduced in January 1880. This business has already become one of the most popular branches of the postal service. Nearly 6½ crores of rupees have been sent, during the year, from one part of India to another in small sums averaging ₹25-3-0 for each order: and commission alone amounted to ₹7,70,959, which represents an increase of 13⅓ per cent. over the commission realised in the previous year. Below is given a statement which exhibits the issues and payments of each postal circle.

Inland Money Orders.	Total number of Money Orders issued.	Total value of Money Orders issued.	Commission realised.

Foreign Money Orders.

27. A new money order exchange was arranged with the United States of America which came into force on the 1st July 1882. As in the case of Canada, this exchange is worked through the medium of the British Post Office. Direct exchanges were also introduced between Aden and the Mauritius, with effect from the 1st April 1882, and between Aden and the United Kingdom from the 1st January 1883. The working of foreign exchanges in sterling money is given in the following statement, which exhibits satisfactory growth :—

India Postal Notes.

31. India Postal Notes for fixed sums of money were introduced on the 1st January 1883. These notes are of three values, *viz.*, ₹2-8, ₹1, and annas 8. A space is provided on each note in which the remitter fills in the name of the person to whom the payment is to be made, and the person so named signs the note which is payable at any Post Office he may select. From the marginal abstract it will be seen that the total value of notes sold during the first quarter of the year 1883 amounted to ₹40,529, and that the one-rupee notes proved

Number of Notes sold.			Total value of Notes sold.
Of the value of annas 8.	Of the value of ₹1.	Of the value of ₹2-8.	
			₹
7,044	14,827	8,693	40,529

more popular than those of the other two denominations. The system found most favour in Madras, where the total value of issues and payments were more than double those of the Bengal Postal Circle, which stands next on the list. It is satisfactory to add that the introduction of postal notes has not affected the number of money orders issued for small sums of money, so that the new system, limited as its operations naturally are at the outset, represents the beginning of a fresh accession of business.

Section VI.—Post Office Savings Banks.

32. The introduction of Government Savings Banks into India, under the name of "district savings banks" and under the management of the Treasury Department, dates from the year 1870. These banks are necessarily restricted to the head-quarter stations of districts and other large places where Government treasuries exist; and the extension of this facility towards thrift to smaller localities in the interior of districts could only be secured by the employment of some additional agency. The Postal Department was selected as a suitable agency, and on the 1st April 1882 Post Office Savings Banks were opened all over India except in the Presidency of Bombay, where the Presidency bank held privileges which it was unwilling to forego. In the Presidency of Madras also the introduction of Post Office Savings Banks was limited to small places: and in Bengal the Post Office established no Savings Bank in Calcutta or in the neighbouring town of Howrah. One immediate result of the new scheme was the addition of 4,046 Post Office Savings Banks to the 197 district and State Railway Savings Banks which previously existed. The new rules comprehended the following principal provisions, *viz.*: Any person can deposit money on his own behalf and on behalf of a minor if a relative. The minimum deposit was fixed at four annas, and no sum can be received that is not a multiple of four annas. Interest was allowed at the rate of three pies a month on every complete sum of five rupees, which represents $3\frac{3}{4}$ per cent. per annum. The power of withdrawal can be exercised once a week. And Government securities may be purchased on behalf of depositors.

33. From the following statement it will be seen that, at the close of the year under report, there were 39,121 accounts with the Post Office Savings Banks, and that the balance at the credit of depositors amounted to ₹27,96,796.

Post Office Savings Bank transactions during the year 1882-83.

36. Investments in Government Promissory Notes were made on behalf of depositors through the agency of the Post Office to the extent of ₹8,800.

37. Including deposits and withdrawals, nearly 60 lakhs of rupees passed through the hands of the Post Office during the year in its Savings Bank branch. Yet two instances only of misappropriation, amounting in all to ₹18-4-0, have occurred. This furnishes fresh and gratifying evidence of the honesty of natives of the country, who necessarily form the great majority of postal employés in India.

Section VII.—Insurance and Value-Payable.

Insurance.

38. On the margin is given a table representing the extent to which insurance was resorted to for the transmission of valuables through the agency of the Post office. The aggregate

Year.	Value insured. Letters.	Value insured. Parcels.	Value insured. Total.	Insurance fees.
	₹	₹	₹	₹ a.
1877-78, last quarter being the commencement of the system	6,66,320	18,60,191	25,26,511	13,830 4
1878-79	89,71,775	2,81,21,219	3,70,92,994	1,23,556
1879-80	1,61,35,058	5,34,34,161	6,97,69,219	1,97,790
1880-81	1,57,33,428	6,30,26,524	7,87,59,952	2,01,046
1881-82	1,79,69,808	5,85,53,413	7,65,23,221	1,90,980
1882-83	2,30,67,342	5,95,70,994	8,26,38,466	1,99,842
Percentage of increase as compared with 1881-82	28·37	1·74	7·99	4·64

value of property insured was about 8¼ crores of rupees, which gives an increase of nearly 8 per cent.

39. And the losses which the Post Office had to make good in connection with this heavy responsibility amounted in all to ₹6,276 only, as detailed in the margin.

	1881-82.	1882-83.
	₹ a. p.	₹ a. p.

Claims not preferred	.....	511 2 0
TOTAL	13,083 13 11	6,276 9 1

Value-Payable.

40. Value-payable articles are those in respect to which the sender specifies a sum of money which the Post Office undertakes to realise from the addressee and pay to the sender. When this system was first started in 1877-78 it did not attract much custom. But its popularity is now established, and the increase both in the number of articles sent and in the value declared for realisation has been very large, as the marginal statement will shew. The extension of the value-payable scheme to registered letters from October 1882 doubtless contributed to this success.

	Number of articles sent under the value-payable system.	Value declared for realisation.	Commission.
		₹	₹
1877-78 (from the commencement of the system in December 1877), four months	413	6,721	195
1878-79	7,408	1,32,109	3,942
1879-80	25,589	3,49,857	11,498
1880-81	49,389	5,76,574	13,413
1881-82	99,416	10,80,543	19,838
1882-83	174,301	16,86,098	35,568
Percentage of increase over the year 1881-82	75·32	56·04	64·17

NOTE.—On the 1st August 1880 the rate of commission for value-payable articles was reduced to the money order scale being about one-half that of the previous scale.

Section VIII.—Miscellaneous.

Complaints from the Public.

42. The number of complaints from the public which came to the knowledge of the heads of postal circles rose from 5,433 to 5,760, being an increase of 327. This increase was to a certain extent due to specific causes such as the disorganisation of the Rangoon Post Office, which led to the removal of the Post Master, and the misappropriation of public money at Port Blair followed by the transportation for life of the Post Master. But the addition of new classes of business, such as Savings Banks and Postal Notes, naturally tends to multiply complaints, while the efforts of the department to disseminate postal knowledge among natives, by the publication and distribution of postal guides, and postal notices in the vernacular, are of course attended with a like result.

43. Those complaints which relate to the loss of articles posted in registered letters or in parcels are dealt with in the following analysis. Notwithstanding enlarged risks the total number has fallen from 273 to 253: and in 72 only of these cases was the postal establishment proved to be in fault.

	REGISTERED LETTERS. 1881-82.	REGISTERED LETTERS. 1882-83.	PARCELS. 1881-82.	PARCELS. 1882-83.	TOTAL. 1881-82.	TOTAL. 1882-83.
I.—Cases in which the enquiry shewed either that no loss had occurred or that the loss had not occurred through the fault of postal officials	81	85	82	63	163	148
II.—Cases in which the postal establishment was proved to be in fault, or in which there was strong ground for believing it to be so	26	46	25	26	51	72
III.—Cases in which no definite conclusion was arrived at	25	16	34	17	59	33
TOTAL	132	147	141	106	273	253

Class I includes 4 insured cases under the head of "Registered Letters" and 16 insured cases under the head of "Parcels."

Class II includes 4 insured cases under the head of "Registered Letters" and 15 insured cases under the head of "Parcels."

Class III includes 4 insured cases under the head of "Parcels."

Convictions and Departmental Punishments.

44. Detailed in Appendix VIII will be found the number of legal convictions and departmental punishments of postal servants. A summary is given on the margin.

	1881-82.	1882-83.
Number of legal convictions	159	164
Number of cases punished departmentally	58	69
	217	233

Highway Robberies.

45. From the marginal abstract it will be seen that highway robberies have considerably diminished, the number having fallen from a total of 31 to a total of 12. It is specially satisfactory to notice that one case only occurred in foreign territory during the year. A summary is attached giving the total number of highway robberies in each year since 1858-59. The number is much lower in the year under review than it ever has been before.

Circles.	1881-82. Number of Highway Robberies.			1882-83. Number of Highway Robberies.

		1	...		...	...
	Total	11	1		1	1

Total (British) 11, besides 1 attempt. Total (Foreign) 1, besides 1 attempt.

47. Convictions were obtained in two of the robberies that took place in Bengal, and in two instances also in the North-Western Provinces. In the remaining cases the perpetrators were not traced. In eight cases the greater portion of the plundered mail was recovered. In four cases nothing was recovered. Five of these highway robberies were aggravated by the wounding and maltreatment of the runners carrying the mail.

48. One runner lost his life while crossing the Ghatprabha river in the Kaladgi Collectorate. This accident is thus described by the Post Master General: "The river was in high flood at the time, and the ferry-boat, in which there were 40 passengers, was carried away and upset. Some 20 lives were lost, but the boatmen were successful in saving the mail wallet with its contents uninjured." Another runner was drowned while crossing the mail over a stream in the Khoolna district in Bengal.

49. *Numerical strength of the Postal Establishment.*—An abstract shewing the strength of the postal establishments is given on the margin. Further details for each circle will be found in Appendix IX.

Postal Officials.	1881-82.	1882-83.
Superintendents and Inspectors of Post Offices	283	314
Post Masters, Deputy and Sub-Post Masters	4,426	4,576
Extraneous agencies such as Schoolmasters, &c.	338	603
Clerks	4,319	4,641
Postmen and other servants	8,103	8,612
Road Establishment	12,308	12,034
Village Postmen	3,148	3,649
	32,927	34,429

50. *Printing in Private Presses.*—In September 1882 the Government expressed a wish that private presses should be utilised in an increasing degree for the printing work of the Post Office, and directed me to notice in my Annual Report the extent to which private presses were used during the year. In the year under review private presses have been employed for printing the quarterly lists of Post Offices in India, for the book of establishment issued yearly by the Comptroller, Post Office, for tour programmes, sorting lists, notices, circulars, docket forms, envelopes, and labels. Altogether the cost of printing work executed by private agency has amounted to R22,488.

Section IX.—Non-Postal branches of the Department.

51. *Government Carrying Agency.*—Owing to railway extension the line between Peshawar and Hajishah was abolished; and at the close of the year the Government Carrying Agency, commonly known by the name of the "Government Bullock Train," consisted only of two lines, *viz.*, that between Umballa and Simla, and that between Lahore and Ludhiana *vid* Ferozepore.

52. *Passenger Services.*—When the railway was opened to Peshawar the passenger service to that place was closed: and the sole line that remained on the 31st March 1883 was that between Umballa and Simla.

Section X.—Financial Results.

53. The following figures give the financial results of the year. The delay in the submission of the report has been due to the instructions of the Secretary of State that the figures should correspond with those given in the Comptroller General's Finance and Revenue Accounts, which, as the Government are aware, are not finally closed till nearly a year after the period to which they relate. I have been also instructed to embody here the explanation called for by the Secretary of State as to the increase in certain charges between 1872-73 and 1881-82.

54. Appendix XI, here produced for convenience of reference, is a comparative abstract of receipts and charges during the years 1881-82 and 1882-83.

APPENDIX XI.

Comparative Abstract of Receipts and Charges of the Postal Department during the years 1881-82 and 1882-83.

Heads of Receipts.	1881-82.	1882-83.
	R	R
I.—Postal Service.		
Cash Receipts	31,36,104	33,77,402
Sale of Ordinary Postage Stamps, gross value	45,32,800	45,93,025
,, Service Postage Stamps	13,88,929	14,50,802
Miscellaneous (*i.e.*, sale of waste paper, &c.)	98,800	53,297
Total	91,56,633	95,14,526
Deduct—		
Amount of Postage received in India and paid to the Post Master General, London	2,92,871	2,42,567
Payments to Colonial and other Foreign Administrations	17,988	22,470
	3,10,859	2,65,037
Net Receipts	88,45,774	92,49,489
II.—Non-Postal Branches.		
Bullock Train	3,70,269	2,71,502
Military Van Dák, Punjab	39,586	7,394
Mail Cart and Parcel Van Passenger Service	1,97,628	1,88,164
Total	6,07,483	4,66,060
III.—Receipts not shewn in Post Office Accounts but credited to Post Office in Finance and Revenue Accounts.		
District Post collections, including Zemindary Dák receipts in Bengal	45,810	66,480
Total Receipts	94,99,067	97,77,969

Heads of Charges.	1881-82.	1882-83.

I. Postal Service.		
Salaries and Establishments	61,81,993	65,50,162
Miscellaneous and Contingent Charges	14,21,973	16,54,842
Mail Cart (after deducting Passenger Van Service)	3,31,086	3,20,061
Bounty Money due to Ships' captains for conveyance of Mails	1,126	1,414
Construction and repair of Buildings	22,587	22,747
Discount on sale of Ordinary Stamps	1,41,515	1,42,554
Total	81,00,280	86,91,780
II.—Non-Postal Branches.		
Bullock Train	3,57,887	2,35,800
Military Van Dák, Punjab	68,182	10,039
Mail Cart and Parcel Van Passenger Service	1,97,628	1,88,164
Subsidy to B. I. S. N. Company	7,12,000	7,12,000
Total	13,35,697	11,46,003
III.—Charges not dealt with in the Postal Department but debited to Post Office in Finance and Revenue Accounts.		
District Post Establishment, including Zemindary Dák in Bengal	10,75,250	10,87,620[b]
Stores from England	2,32,120	2,78,710[d]
Payments under Postal arrangements with Lords of the Treasury	7,00,000	7,00,000[c]
,, to Tigris and Euphrates S. N. Co., for conveyance of Mails, Busreh to Bagdad	36,000	36,000
Total	20,43,370	21,02,330
Total Charges	1,14,79,347	1,19,40,113

a District post cess is credited to Provincial rates.
b The District post is administered by Local Governments and is not under the control of the Imperial Post.
c India's share of subsidy to the P. & O. Company for the conveyance of mails between Brindisi and Bombay, see para. 3 of report.
d Postage labels, embossed envelopes, post-cards, &c.

55. I will first offer a few observations on the figures given under heads I and II.

Of the increase in cash receipts ₹92,000 is due to increased money order commission, and the remainder is to be attributed to improved value-payable parcel traffic, to an increased posting of light newspapers, consequent on the reduction of the postage upon them to one pice, prepayment of which is made in cash, and to general progress. The increase under ordinary postage labels is ₹60,000. The other items do not call for remarks. The diminution in the receipts from non-postal branches is caused by the reduction (followed by subsequent abolition) of certain bullock train and van dâk lines, consequent on the opening of Railways, specially of the line to Peshawar. I may reproduce here an extract from Mr. Hogg's letter No. 8874, dated 28th November last, relative to the falling off of bullock train receipts and expenditure, about which a query was put in the Secretary of State's despatch No. 150 of 24th May last.

"I understand that the figures for the year 1881-82 have been contrasted with those of 1880-81. They are as follows:—

	BULLOCK TRAIN.		
	1880-81.	1881-82.	Decrease.
	₹	₹	₹
Receipts . . .	10,04,299	3,70,269	6,34,030
Disbursements . . .	9,66,150	3,57,887	6,08,263

The decrease under both heads is due mainly to the cessation of the war in Afghanistan. That war taxed the resources of the Government Bullock Train very severely, thus giving rise to very large increases both in receipts and charges, which ceased only when Afghanistan was evacuated. The effect of this strain was most felt during the year 1879-80, but operated also in the following year, for it was only in August 1880 that our troops quitted Kabul, and Kandahar was not given up till April 1881. As already said, the cessation of military operations in Afghanistan was the principal cause of the decreases under consideration. But the Bullock Train receipts and charges for the year 1881-82 were further lessened by the closure of the following Bullock Train lines in the preceding year:—

Name of Line.	*Date of Closure.*
Ratial to Hajishah	1-1-81
Wazirabad to Sialkot	1-1-81
Kurnool to Thul	1-2-81
Rawalpindi to Murree	1-1-81
Lahore to Multan	1-2-81
Saharanpur to Roorkee and Mussooree . . .	15-3-81
Aligarh to Moradabad	15-3-81
Cawnpore to Fatehgarh	1-2-81

"6. The closure of these lines was intimated in my report for the year 1880-81, when I gave some account of the origin and development of the Government Bullock Train, pointing out that the business was fast disappearing in consequence of railway extension and soon would be limited to the line between Umballa and Simla. The business is now actually limited to that line."

To this I may add that the Punjab Military Van Dâk is now gone.[1]

56. The receipts from the Bullock Train might perhaps be enhanced by raising the charges, but it is undesirable for a Government Department like the Post Office to make a profit on such a business. The sum of ₹1,88,164 put down on both sides of the account represents the actual revenue from passengers on the departmentally managed line between Umballa and Simla. As the mails

[1] It was finally closed on 1st May 1882.

are carried by the same vehicles, it is impossible to calculate accurately the cost of the mail apart from the Passenger Service. The receipts from the latter head has therefore been taken *pro formâ* as the expenditure, leaving the balance of expenditure to represent the actual cost of carrying the mails. This balance (₹3,20,061) does not, however, include only the Umballa-Simla line. There are numerous mail-cart lines let out on contract over India, such as—

	₹
Poona to Belgaum, costing	42,000
Belgaum to Gadag	12,000
Wadhwan to Rajkot and Bhuj	18,600
Mettupalayam to Ootacamund	8,400

and many others, all of which are debited to the heading "Mail Cart."

57. On the expenditure side, an increase is shewn under salaries and establishments of ₹3,68,169. Of this sum—

₹ 35,000 was sanctioned by Government;
₹1,87,000 represents the cost of creation and revision of small appointments;
₹1,30,000 is the result of sanctions given in 1881-82;
₹ 16,000 is due to annual increments on progressive salaries.

₹3,68,000

The first item needs no explanation, as the necessity for each item was duly reported at the time. The second may be divided as follows:—

	₹
Due to opening new Offices	36,500
Due to new appointments	57,000
Revision of existing establishments	93,500

The chief items are an increase of ₹19,443 in the Comptroller's office for clerks required for auditing Money Order and Savings Bank Accounts and ₹33,781 for increase in the Railway Mail Service. As fresh railway lines are opened or additional trains are used for the carriage or sorting of mails, so does the Railway Mail Service develop. During the year there was an addition of 4,756 miles to the mileage over which sorting of mails was extended. Railway sorting is expensive, but the distances in India are so enormous that the saving of time in the receipt and despatch of mails which is effected by sorting in the train, is of incalculable importance to the administration of the country and to the public. The creation of new appointments is due principally to the development of new lines of work. If the money order traffic in a Head Office increases beyond a certain point, the clerk who does it must be given an assistant, say on ₹10 or ₹15 a month, to relieve him of purely clerical labour, and perhaps to keep the Savings Bank books for him. Sometimes the responsibility increases out of all proportion to the pay. A schoolmaster who is paid ₹3 or ₹5 is found to have perhaps ₹5,000 passing through his hands every month, owing, it may be, to gangs of villagers having gone from the neighbourhood to the Presidency town, who commence remitting their savings home, or to well-to-do zemindars who after a good season commence remitting large sums for the purchase of objects of European luxury. If the traffic so developed continues steady, the schoolmaster naturally expects a little extra pay, and it must be given him. If, to take another instance, owing to the opening of a railway, two deliveries and two despatches are made instead of one, and sorting at night is added to sorting during the day, additional establishment has to be provided. It is to be recollected that work in the Post Office begins as a rule at, if not before, daylight, to allow the public to get their letters first thing in the morning.

During the day the establishment must be on duty, to register letters, issue money orders, &c., and in the evening again, when the work of the public is over, they have to sort and despatch the articles posted during the day. In most Post Offices one set of clerks do the work, lasting, as I have shown, from early morning till late at night. Thus a change in the time of a train or the use of an additional train may involve the employment of a night set, to dispose of mails arriving during the night for or from offices in the interior. I have mentioned these facts merely as illustrations of the innumerable cases in which a revision of establishments and salaries is required. Postal work must be done, not merely accurately but instantly. The public could not endure delay to their correspondence on the ground of insufficiency of clerks or that the Post Master had been up all night. As a matter of fact much work is now done by candidates, who work for nothing in the hope of ultimately obtaining a permanent appointment. Without this assistance the cost of the department would be augmented.

58. In connection with this subject I may mention that the cost of Post Offices varies greatly. Thus in the Punjab there are 82 village offices, the average cost of each of which is only ₹7-8-0 a piece. On the other hand, as Government desired such an illustration, I may give the history of the Benares City Office to show how, under favorable circumstances, the cost of an office may grow. Originally, as in most Indian stations, the main Post Office was a building in cantonments, and only a letter-box or small Receiving House existed for the benefit of the native public in the city.

Accordingly we find that in April 1868 the establishment of the Benares City Post Office consisted of—

	₹	a.	p.
1 Receiving House Clerk	30	0	0
2 Miscellaneous servants	10	0	0
1 Runner	4	0	0
Stationery	1	0	0
House-rent	5	0	0
TOTAL	50	0	0

In December 1875 this Receiving House was constituted a branch office to allow of parcels being received in the city and the cost of the office was raised to ₹86, as follows:—

	₹	a.	p.
1 Deputy Post Master	30	0	0
1 Clerk	20	0	0
2 Miscellaneous servants	10	0	0
2 Runners	8	0	0
2 Banghy Burdars	8	0	0
Stationery	2	0	0
House-rent	8	0	0
TOTAL	86	0	0

In July 1877 the cost of this office was further raised to ₹108-0-0, an additional clerk on ₹20 being sanctioned with ₹2 more for stationery to enable the branch office to exchange bags directly with the Railway Mail Service. This of course saved the letters having to go round to the Head Post Office and gave the merchants of the city a longer time to post.

In June 1878 the establishment was reduced to ₹104.

In August 1881, four letter-box peons were sanctioned and the cost of the office was then raised to ₹116.

The introduction of Savings Bank and money-order business led to the City Branch Office being converted into a Sub-Office, delivering as well as receiving correspondence, with the following establishment:—

	₹	a.	p.
1 Sub-Post Master	100	0	0
6 Clerks	145	0	0
20 Postmen	179	0	0
2 Packers	10	0	0
2 Letter-Box Peons	10	0	0
1 Chowkidar	5	0	0
1 Stamper	5	0	0
Contingencies	10	0	0
House-rent	20	0	0
	484	0	0

but this increase was met by reductions in the Disbursing (Camp) Office, so that the net increased cost to Government was only ₹20.

This office was converted into a Head Office on the 1st July 1883, and the cost of the office increased to ₹667 per mensem, but here again the net increase was only ₹41, the establishments being provided as before by transfer from the Head Office.

The net increase therefore in the cost of the Benares City Office has been, since 1868, ₹127 per mensem. Meanwhile, the cost of the Disbursing Office has only grown by ₹98 rising to ₹148. In other words, all the additional work which has, during a period of 15 years, been thrown upon the Post Offices in the cantonment and large city of Benares, has been carried out at a cost of only ₹225 rising to ₹275 a month, an average annual increase of ₹15 rising to ₹18 a month. And this work includes not merely a large annual addition to the number of articles delivered and despatched, but insurance, value-payable, Money-order, Savings Bank, and other duties, involving heavy pecuniary responsibilities,—responsibilities, moreover, not limited to Benares itself, but including the supervision of twenty Sub-Offices the pecuniary transactions of which are supervised by the Post Master of Benares and daily entered in his accounts.

59. I will now continue my review of the financial results of 1882-83.

Miscellaneous and contingent charges have increased in 1882-83 by ₹2,32,869. This is divided as follows:—

	₹
Payments to State Railways	15,298
Haulage of sorting carriages	72,072
Special trains	21,900
Travelling allowances, and improved Simla allowances to Director General's Office	11,883
Comptroller's Office	12,588
Furniture and Workshop stores (491 new offices created)	99,128
	232,869

60. Under haulage of sorting carriages there would have been a decrease, but the Honorable Sir Stuart Bayley awarded ₹75,000 against the Post Office on account of arrear claims suddenly made by the Madras Railway. Special trains are run with the Overland Mails if the steamer reaches Bombay shortly after the ordinary train has gone. Formerly all the mails for Northern India

travelled *viâ* Jubbulpore, and specials were only run provided they could catch up the ordinary train at that place. When the Rajputana Railway was finished, specials were also run to Ahmedabad. In the year under report the Government ordered the specials to run as far as Allahabad and Bandikui. This accounts for the enhanced charges under special trains. Owing to the increase in the number of clerks in the Comptroller's Office, a fresh house had to be taken in Calcutta, the rent and first fittings of which represent the sum of ₹12,588. The last item gives an average increase of contingencies for each new office created of about ₹200.

61. This sum of ₹200 seems high no doubt. The cost of fully equipping a new Sub-Office, with all the miscellaneous paraphernalia of sign-board, letter-box, letter-box board, scales, a safe, table, stool, locks, bags, and other articles of which I need not give a catalogue, comes to ₹180 or 190. On the other hand, when a small village office is opened under the *Gooroo* of a village school or the village banya, the furniture given is of the most meagre description, hardly costing ₹8 or ₹10,—a box, a seal, a stamp and a few printed forms, and that is all. It is, I am afraid, impossible to give, as has been suggested by Government, the ordinary expenditure on contingencies of an established office and the initial cost of contingencies on establishing a new one. Post Offices are not classified, with a certain quantity of furniture, stamps, &c., allowed to each grade. Were this the case the increased cost would be great, as every office would be given the regular scale, which would have to be framed for a well equipped, not a badly equipped office. Besides, furniture varies according to the needs of the office, and a small Sub-Office at the junction of two lines would have more sorting cases than a much more important office which had but little sorting work to do. The system followed is this. Each office is inspected once or twice a year. The Superintendent or Inspector examines the stock on the spot, and if more is required he sends to the Post Master General an indent detailing exactly what furniture there is and what more he requires. This is checked by the Post Master General, who judges of each requisition on its merits, and sanctions or refuses the increase or calls for further information as he deems proper. If for this system there were substituted a regular scale, the essentials of a few would become the superfluities of many, and great waste would be the result.

62. But I would specially point out that the increase under contingencies is not alone due to equipping new offices. The recent increase of work means a more than normal increase in contingencies upon old ones. For instance, it has been found necessary in parts of the country to distribute iron safes freely to Sub-Offices in the Mofussil. Strong, good, and lasting articles are manufactured in Calcutta for Rs. 16, less than the price of a teak-wood box. In Bengal they are required because (though Post Office burglaries are rare) the Sub-Post Masters would not stay in the office at night, if the cash were not secure against ordinary thieves, and as the safe is always when practicable deposited in the Police Station, the custodians of it themselves must be kept out of temptation. On the other hand, in the North-Western Provinces and the Punjab, safes have to be allowed because the character of the criminal classes there would render it positively dangerous to leave the money unprotected. It will be admitted, I think, that a department which collects and again distributes some 6½ crores of rupees in the year in one branch of work alone, can hardly avoid spending a little in taking care of that money. Then, again, special endeavours have been made by Mr. Hogg to disseminate knowledge of postal rules and aids to thrift amongst that gigantic portion

of the population which only speaks and reads the vernacular. Savings Bank Rules, Postal Note Circulars, and the like, have been translated and printed in large numbers in the native style, on inferior paper, at native printing presses. This, again, has added to the outlay on printing contingencies. Further, in Bengal the Post Master General reported that in 1882-83 the stock of articles in his depôt had fallen so low that an unusually large supply (which will last some time) had to be indented for to replenish it. In Assam more money was spent on waterproof bags, a *sine quâ non* in that rainy country. The development of the District Post Office in Burma was aided by the supply of furniture at Imperial expense. All these items contributed to swell the charge for contingencies. After all, the increase if spread over all India really amounts to but a small sum.

63. The subsidy to the British India Steam Navigation Company, though paid as a matter of convenience through the Post Office and debited in its accounts, represents also the purchase of privileges in regard to taking up the steamers in case of necessity, the carrying of soldiers and Government officers at fixed rates. The share due to the Post Office has been estimated at only ₹2,95,323. The recent revision of the contract, by which great economy has been effected, will be described in the report for the year 1884-85.

64. I have entered into these details, as Government desired me to do so, and I now proceed to answer the other queries put in the Secretary of State's Despatch No. 150, dated 24th May 1883, which His Lordship requested should be given in this Report. Explanation has already been rendered about the falling off in Bullock Train receipts and charges. The other points are as follows:—

(1.) The increase of the expenditure under the head "Salaries and Establishments," which has risen from ₹41,03,565 in 1872-73 to ₹61,81,993 in 1881-82.

(2.) The increase under the head "Miscellaneous and Contingent Charges" from ₹5,70,010 in 1872-73 to ₹14,21,973 in 1881-82.

And the Secretary of State desires to know what portion of the increased expenditure is due to a larger number of officers employed, and what to an increase in salaries of Post Masters and others which may have been found necessary owing to more responsible duties having been imposed upon them in consequence of the transfer of Money Order, Value-Payable, and Insurance business to the Post Office.

65. In respect of this I beg to state that it is exceedingly difficult to reclassify the expenditure in view to ascertaining what portion of increase is due to mere increase in numerical strength and what to greater responsibility. A new Post Office may be opened and the pay of the Post Master will rightly be put down to numerical increase. When that Post Master's duties become more responsible his pay is raised, and the additional salary represents his greater responsibility. But the whole of his salary appears as but one item in the accounts. The figures for 1872-73 and 1881-82 have, however, been scrutinised laboriously item by item, and the result is that of the increase of ₹20,78,428, which has occurred during 9 years under the head of "Salaries and Establishments," it is found that ₹14,71,140 are due to the employment of a larger number of officers, and ₹6,07,288 to raising salaries on account of additional responsibilities. This calculation has been made on the following principle. The establishment has been taken as it stood in each office in 1872-73. Increases to the pay of the then existing members of the establishment have been considered due to the development of the department and to increased responsibility. The pay of *additional* hands employed has been put down as due to increased number of officers. Take, for instance, the case of

Jubbulpore office in the Central Provinces. The following is a comparative statement of the office as it stood nine years ago and as it stood in 1881-82 :—

Designation and number of employé.	1872-73.		1881-82.		Increase due to increased responsibility.			Increase due to a larger number of employés.
	Number.	Sanctioned amount as it stood on the 1st April 1872.	Number.	Sanctioned amount as it stood on the 1st April 1881.	Increase.	Decrease.	Net result.	
Postmaster . .	1	200	1	250	50	...	...	...
Head Clerk . .	1	58	1	70	12	...	...	...
2nd do. . .	1	40	1	60	20	...	...	...
3rd do. . .	1	30	2	80	10	...	...	40
4th do. . .	1	20	1	30	10	...	...	...
5th do. . .	1	20	2	40	...	...	...	20
2 Peons at ₹9 .	2	18	2	18	...	...	...	...
6 do. at ₹7 .	6	42	9	63	...	...	...	21
Rural Messenger .	1	7	2	V. postmen . 14	...	...	..	7
Packer . . .	1	6	2	12	...	...	...	6
			5	Postmen at ₹8 each . 40	...	...	...	40
			1	V. do. . 8	...	...	...	8
			3	Mail peons at ₹7 each . 21	...	...	...	21
	16	441	32	706	102	...	...	163

The result of this shows that ₹102 per mensem is debitable to increased responsibility and ₹163 to increased number of officers.

66. In a large department like the Post Office with innumerable small charges, the submission of detailed statements, explanatory of all such increases and decreases would involve my placing before Government such a mass of figures that a review of them would be hopeless. I will therefore only give a statement of the broad lines on which the increases have gone in the nine years preceding 1881-82.

Name of Establishment.	Increase on account of salaries raised	Increase owing to larger number of hands.	Remarks.
	₹	₹	
Director General . .	...	12,182	Two Assistant Directors General created and a Superintendent attached to Director General's Office. An Assistant Inspector General of Police abolished.
Comptroller, Post Office .	...	12,590	Assistant Comptroller (for Money Orders) created.
Deputy Post Masters General in charge of circles .	...	29,681	The number has increased from 5 to 9.
Superintendents and Assistant Superintendents .	...	1,43,559	The number has increased from 78 to 119. This includes Travelling Examiners specially appointed to examine the accounts of Head Offices, since heavy pecuniary transactions commenced.
Inspectors . . .	...	1,00,085	The number has increased from 63 to 136. In Bengal, for instance, where the administration and practical control of Zemindary Dâk Establishments were made over to the Imperial Post Office, Inspectors were appointed to supervise them as well as the rural offices and lines generally of each district.

Name of Establishment.	Increase on account of salaries raised	Increase owing to larger number of hands.	Remarks.
	₹	₹	
Assistant Director General, Railway Mail Service .	6,551	...	The Assistant Director General's pay was raised on account of enormously increased responsibility.
Director General's and Comptroller's Office Establishments . .	...	1,03,090	Due to increase in accounts to be audited and correspondence to be carried on.
Fixed Post Office Establishments . . .	6,00,737	7,17,882	Post Offices increased from 3,006 to 4,819, and number of Post Masters, Clerks, Postmen, Village Postmen, from 10,665 to 20,977.
Railway Mail Service .	...	2,88,741	Due to the opening of new Railways and the using of fresh trains.
Miscellaneous . .	...	63,330	Includes ₹11,140 subsidy to a private Railway Company, ₹32,162 to printing departmental forms, before shown under Contingencies, ₹17,628 payment to Irrawaddy Flotilla for mails carried, ₹2,400 miscellaneous.
TOTAL .	6,07,288	14,71,140	
GRAND TOTAL .	20,78,428		

67. The second item respecting which the Secretary of State asked for information was as to the increase in contingencies, which in nine years have been increased by ₹8,51,963.

The following are the principal items of increase under this head :—

Heads of Charges.	Increase.	Cause of Increase.
	₹	
Travelling Allowances .	1,66,476	Due to a large increase in the number of Travelling Officers, viz.:— 1872-73. 1881-82. No. of Dy. Post Masters Genl. 5 9 „ of Superintendents . 78 119 „ of Inspectors . . 63 136
Office Furniture . .	55,279	Due to opening of new Post Offices, increased establishments and extension of the different branches of the department.
Miscellaneous . .	2,49,496	Due to increased demand for bags, wallets, cloth, stamps, scales, weights, stationery, &c.
Payments to P. & O. Co. for conveyance of mails by non-contract vessels .	13,606	This payment was not made in 1872-73.
Railway hire for conveyance of parcels . .	53,912	Due to extension of Railway Lines. The extra charge is mainly due to the payment of ₹6,000 monthly to G. I. P. Railway.
Payments to State Railways	3,47,697	No payments made to State Railways prior to 1878-79.
Petty increases aggregating	66,422	
TOTAL INCREASE .	9,52,888	
DEDUCT—Decreases shown below :—		
Printing Charges . .	27,809	Owing to most of the printing work of the department being done at the Aligarh Postal Press in 1881-82. Up to 1880-81, printing for Punjab and North-Western Provinces was done at the Lahore and Allahabad Jail Presses.
Haulage of sorting carriages	30,093	Haulage payments to East Indian Railway included in "Payments to State Railways."
Petty decreases aggregating	43,023	
TOTAL DECREASE .	1,00,925	
NET INCREASE .	8,51,963	

68. I now come to the Part III of figures given by the Comptroller General in the Finance and Revenue Accounts under the Postal Department (see *supra*, para. 54). Turning to the receipts, R61,580, I have been unable to ascertain to what they relate, and as a reference to the different Account Offices in India would involve further delay to this report, I have thought it unadvisable to keep it back for want of the information. The sum includes, I believe, only petty items collected all over India, apart from rates proper, and credited as miscellaneous receipts of Zemindary Dâk Funds, such as sale of old huts and the like. It would be more satisfactory if the proceeds of the several cesses, under which the District Dâk Funds are raised, could be put opposite the expenditure; for I need scarcely remark that the expenditure under District Post is all covered by receipts locally raised, which amount to about 10 lakhs a year, and for which the Post Office is given no credit. In Bengal there is a separate cess on the zemindars. In the North-Western Provinces, Oudh, the Punjab, Assam, and the Central Provinces, the cess (originally distinct) now forms part of the consolidated Local Fund Cess. In Madras and Bombay the amount is a provincial service asset, originally granted by the Imperial Government. In Burma and Assam I believe cesses are locally raised, and sums are also contributed from Provincial Revenues. The original object of these cesses was to enable the Magistracy to receive and issue reports and orders about crimes. Later on the funds were utilised for opening out postal communication to out-of-the-way places which local administrative requirements necessitated being linked with the Imperial system. The relations of the District to the Imperial Post were described in Section IV of last year's report, and the district dâks have been useful in the past in enabling the local Government or the local Post Masters General (when the Government entrusted the management of the District Post to them) to open offices and lines where they considered it necessary on local grounds, in cases where the receipts were insufficient to justify the Imperial Post undertaking the work. I cannot avoid adding, however, that the system is somewhat of an anachronism now, at least in the older provinces of the empire.

69. The following is a brief *résumé* of the financial results of the year. It will be seen that though the totals agree with the figures given by the Comptroller General in the Finance and Revenue Accounts, the details do not. It is too late now to go over the figures and recast them, but full details will be found in the appendices, and I shall endeavour next year to introduce more complete harmony between the Comptroller General's headings and my own.

	1881-82.	1882-83.
PURELY POSTAL SERVICE.	₹	₹
Receipts including sale of Service Postage Stamps	88,45,774*	92,49,459
„ excluding „ „ „	74,56,845	77,58,687
Disbursements including discount on sale of Ordinary Stamps	81,00,280	86,91,780
Net revenue including sale of Service Postage Stamps	7,45,494	5,57,709
NON-POSTAL BRANCH.		
Bullock Train.		
Receipts	3,70,269	2,71,542
Disbursements	3,57,887	2,35,800
Surplus	12,382	35,742

* The report last year showed 87,08,259, or Rs. 1,41,515 less. This was because discount on Postage Stamps was excluded and the net receipts shown. Now, as the Comptroller General shows discount separately, the gross receipts are shown.

	1881-82.	1882-83.
NON-POSTAL BRANCH—*continued.*		
Punjab Mail Van Dâk.	₹	₹
Receipts	39,586	7,194
Disbursements	68,182	10,039
Deficit	28,596	2,845
Passenger Service on Mail Cart Lines.		
Receipts and Disbursements	1,97,628	1,88,164
Contract subsidies paid through the Post Office, but employed also largely on General and Military considerations.		
Disbursements	7,12,000	7,12,000

These results may be summarised as follows:—

	1881-82.	1882-83.
	₹	₹
A net revenue in the purely Postal Department of	7,45,494	5,57,709
A net surplus in the Bullock Train Department of	12,382	35,742
A net deficit in the Punjab Van Dâk of	—28,596	—2,845

	1881-82.	1882-83.
	₹	₹
Cost of stationery supplied by the Superintendent of Stationery	1,33,107	1,78,692
	1881-82. ₹	1882-83. ₹		
Railway Service estimated at	5,69,215	5,69,215		
Less actual payments	3,61,406	4,48,776		
	2,07,809	1,20,439	2,08,000	1,20,000
English Stores			2,32,120	*2,78,710
Value of service rendered to the Post Office by the Government Press			51,402	38,878
Rent of Government Buildings			2,22,351	2,27,839
Estimated postal share of marine subsidies			2,95,323	2,95,323
Gratuities			4,651	4,888
Leave allowances paid in Great Britain			3,191	1,326
Pensions (being the average of five years)			1,50,306	1,63,391
			13,00,151	13,09,047

* Already included in Appendix XI.

On the margin is entered a list of items chargeable against the Post Office which do not appear in the regular accounts of the Department.

70. The charges which do not appear in the regular accounts of the Post Office Department show an increase of R8,596 in 1882-83, compared with the charges in the previous year. If these items be added to the disbursements shown in the regular accounts of the department, the working of the purely Postal Department shows a deficit of R7,51,338 instead of a surplus of R5,57,709. The items under Part III of Appendix XI are not included in this calculation, because part of the money is spent in carrying articles on which, though they pass through the post, the department takes no revenue and spends no money; part of it is indeed spent upon mere messengers of the Magistracy who convey articles between head-quarters and camp that do not pass through the post at all, and some portion of the money represents the cost of collecting the rates; although, therefore, the establishments are useful to the department, it is impossible to estimate what the value of the service is, and it must be entirely put out of account.

Section XI.—General Review of Progress.

71. On the margin is given a table which shews the yearly progress made by the Department as respects correspondence, revenue from private correspondence and expenditure since the year 1855-56, that being the first complete year after the introduction of a cheap scale of postage in the year 1854.

YEAR.	Comparison of number of letters and newspapers (those of 1855-56 being represented by 100).	Comparison of revenue from private correspondence (that of 1855-56 being represented by 100)	Comparison of expenditure (that of 1855-56 being represented by 100).
1855-56, first complete year of new rates	100	100	100
1867-68, thirteenth ditto	207	237	161
1868-69, fourteenth ditto	228	258	182
1869-70, fifteenth ditto	253	246	190
1870-71, sixteenth ditto	257	235	175
1871-72, seventeenth ditto	269	272	173
1872-73, eighteenth ditto	279	279	177
1873-74, nineteenth ditto	328	284	184
1874-75, twentieth ditto	348	305	189
1875-76, twenty-first ditto	352	326	191
1876-77, twenty-second ditto	368	345	196
1877-78, twenty-third ditto	387	378	206
1878-79, twenty-fourth ditto	394	390	222
1879-80, twenty-fifth ditto	428	417	234
1880-81, twenty-sixth ditto	476	452	252
1881-82, twenty-seventh ditto	507	459	270
1882-83, twenty-eighth ditto	550	478	290

Section XII.—Notices of Post Office Officials.

72. Acknowledgments are due to Mr. Sheridan for valuable assistance rendered in the preparation of a new Post Office Manual; to Mr. Barton Groves for energy in connection with district post extension in British Burma; to Mr. J. H. Cornwal for the success with which the Field Force postal arrangements in Egypt were worked; to Mr. E. Monks for restoring order to the Rangoon Post Office; to Mr. P. Gorman for maintaining postal communication with the Field Force at Kalahandi; and to Rai Luchman Sing, Bahadur, for services during railway interruptions in the Presidency of Bombay.

Appendix No. I.

Statement shewing the Number of Post Offices and Letter Boxes opened and Village Postmen entertained during the year 1882-83, and the total number that stood at the end of the official years 1881-82 and 1882-83.

	₹
a.—Gross value of ordinary postage labels sold as per Appendix V	46,04,335
Ditto ditto ditto X	45,93,025
Difference	11,310
This difference is due to the following causes:—	
Ordinary postage labels used by Presidency Banks and their branches in connection with Government Treasury business adjusted under Government orders as service labels	5,914
Telegraph revenue realized in postage labels	6,268
Balance of Permanent advance for postage stamps held by the Egyptian Field force returned to the Superintendents of Stamps in postage labels and adjusted by deduction from sale of ordinary stamps	1,558
	13,740
Less difference in figures supplied by Civil Account Department and those supplied by Superintendents of Stamps	2,430
Total	11,310

b.—Differs from the adjusted amount (Appendix X) to the extent of ₹49, which represents the net difference between the figures given respectively by the Civil Accountants General and the Superintendents of Stamps.

Appendix No. VI.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters and newspapers, &c.) from that year on to 1872-73, after which a low privileged rate of 1 anna for each letter not exceeding 10 tolas (about 4 ozs.) was conceded, thus reducing immensely the postage income.

Column 8.—The figures in this column are useful as showing the revenue undisturbed by the changes of system in respect of official correspondence explained in the note referring to column 3.

No. XII.

of the Post Office Department in India from 1853-54 to 1882-83.

on account of conveyance of passengers or any of the Non-Postal Branches].

Receptacles at end of year.		Postal Lines.					Total number of articles given out for delivery.						Articles finally undelivered after passing through the Dead Letter Offices.		Number of registered periodicals at the end of each year.	European Letters.		Indian share of loss upon subsidy to the P. & O. Co., i.e., of subsidy after deduction of sea postage receipts.
Letter-boxes.	Village Postmen.	Railway.	Mail cart, horses, camels, &c.	Runner or boat lines.	Sea.	Total Mileage.	Letters.	Newspapers.	Parcels.	Packets.	Money Orders.	Total.	Number.	Percentage on total in column 26.		Sent to Europe by P. & O. Co.'s steamers.	Received from Europe by P. & O. Co.'s steamers.

Column 12.—The figures in this column shew the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The comparison commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.
Columns 21 to 26.—Three digits are omitted from the figures in these columns.
Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.
Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

a. Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

* Including post-cards from 1879-80.

H. E. M. JAMES,
Offg. Director General of the Post Office of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 4th QUARTER OF 1883.

No. 485 R. T., dated Simla, June 2, 1884.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 623 R.T., dated 2nd June 1883.
" " " " " 172 R.T., dated 25th February 1884.

Read also—

Returns of accidents to trains, &c., on the open lines of Railway in India for the quarter ended 31st December 1883.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, with an increase of 369 miles or 3·68 per cent. in the open mileage, and of 72,564 miles or 0·76 per cent. in the train-mileage, the number of accidents to trains, rolling stock, permanent-way, &c., shows an increase of 30 or 4·77 per cent. The variations occur chiefly on the following Railways:—

	Increase.	Decrease.
East Indian		26
South Indian	39	
Great Indian Peninsula	29	
Bombay, Baroda and Central India	14	
Indus Valley and Kandahar		61
Rajputana-Malwa	41	
Northern Bengal		17
Rangoon and Irrawaddy Valley	9	

2. On the East Indian and Indus Valley and Kandahar Railways the decreases mainly occurred under "trains running over cattle on the line," the numbers being 6 and 27 against 18 and 70 respectively. It is noticed that there was not a single case recorded on the Indus Valley and Kandahar Railway of "derailment of goods train or parts of goods train, engine, &c.," during the quarter under review, whereas in the corresponding previous quarter there were 9 such accidents on this railway.

3. Of the increase of 39 accidents on the South Indian Railway, 29 were reported under the head of "cattle accidents," and 8 under "fire in trains."

4. On the Great Indian Peninsula Railway the number of accidents under "goods trains or parts of goods trains, engines, &c., leaving the rails" increased from 9 to 14, and that under "trains running over cattle on the line," from 6 to 24.

5. On the Bombay, Baroda and Central India Railway the number of cases classified as "other accidents" increased from 12 to 24.

6. The increase on the Rajputana-Malwa Railway principally took place under "trains or engines travelling in the wrong direction through points" and "failure of couplings," the numbers being 10 and 16 against 1 and 7 respectively.

7. On the Northern Bengal Railway there was a decrease of 6 accidents under each of the heads "goods trains, or parts of goods trains, engines, &c., leaving the rails" and "trains running over cattle on the line."

8. The increase in the number of accidents on the Rangoon and Irrawaddy Valley Railway appears chiefly under "failure of machinery, springs, &c., of engines" against *nil* under that head in the corresponding quarter of 1882.

9. The casualties resulting from accidents to trains, &c., were, among passengers, 3 injured against 1 injured, and among servants, 1 killed and 4 injured against 2 killed and 6 injured.

10. The following table exhibits the number of accidents u nder the different classes, and the number of persons killed and injured thereby:—

Description.	Number of Accidents.	Number of Passengers and others.		Number of Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line	11	. .	. .	. .	. .	. .	. .
Collisions between goods trains or parts of goods trains	14	. .	. .	1	1	1	1
Collisions between light engines	5	. .	. .	. .	. .	. .	. .
Passenger trains or parts of passenger trains leaving the rails	13	. .	. .	. .	. .	. .	. .
Goods trains or parts of goods trains, engines, &c., leaving the rails	70	. .	. .	. .	. .	. .	. .
Trains or engines travelling in the wrong direction through points	20	. .	. .	. .	. .	. .	. .
Trains running into stations or sidings at too high a speed	4	. .	2	. .	1	. .	3
Trains running over cattle on the line	220	. .	. .	. .	. .	. .	. .
Trains running over obstructions on the line	22	. .	. .	. .	1	. .	1
Trains running through gates at level crossings	13	. .	. .	. .	1	. .	1
The bursting of boilers or tubes, &c., of engines	22	. .	. .	. .	. .	. .	. .
The failure of machinery, springs, &c., of engines	58	. .	. .	. .	. .	. .	. .
The failure of tyres	5	. .	. .	. .	. .	. .	. .
Ditto of axles	8	. .	. .	. .	. .	. .	. .
Ditto of couplings	29	. .	. .	. .	. .	. .	. .
Broken rails	17	. .	. .	. .	. .	. .	. .
The flooding of portions of permanent-way	11	. .	. .	. .	. .	. .	. .
Slips in cuttings or embankments	2	. .	. .	. .	. .	. .	. .
Fire in trains	54	. .	. .	. .	. .	. .	. .
Fire at stations, or involving injury to bridges or viaducts	4	. .	. .	. .	. .	. .	. .
Other accidents	57	. .	1	. .	. .	. .	1
Total	659	. .	3	1	4	1	7

11. The cattle accidents decreased from 235 to 220. As already noticed, there were decreases of 12 and 43 respectively on the East Indian Railway, including the State Branch lines worked by it and on the Indus Valley and Kandahar Railway; and increases of 29 and 15 respectively, on the South Indian and Bombay, Baroda and Central India Railways. Of the total number, 55 or 25 per cent. took place on the South Indian Railway, and 43 or 20 per cent. on the Rajputana-Malwa Railway.

12. The cases of "failure of machinery, springs, &c., of engines" numbered 58, of which 22 occurred on the Indus Valley and Kandahar Railway, and 15 on the Rajputana-Malwa Railway.

13. The number of cases of "failure of couplings," recorded during the quarter, amounted to 29 of which 16 were against the Rajputana-Malwa Railway. The number of cases of "broken rails" was also the largest on this line, being 11 out of a total of 17.

14. The number of accidents from "fire in trains" was very nearly the same as in the corresponding quarter of 1882, *viz.*, 54 against 53, the largest number having been recorded, as in the corresponding previous quarter, against the Indus Valley and Kandahar State Railway.

15. The miscellaneous accidents increased from 39 to 57. There were 24 such accidents on the Bombay, Baroda and Central India Railway, and 16 on the Sind, Punjab and Delhi Railway.

16. The number of cases in which "goods trains or parts of goods trains, engines, &c.," left the rails was 70 against 68, and of this number more than half occurred on the Madras, Great Indian Peninsula, and Sind, Punjab and Delhi Railways.

17. The casualties to passengers from causes other than accidents to trains, &c., were—

	Killed.	Injured.
From falling between carriages and platforms	. .	1
Falling on to the platform, ballast, &c., when getting into or out of trains	2	3
Falling out of carriages during the travelling of trains	4	22
Other accidents	. .	2
Total	6	28

18. And the accidents to servants in the employ of railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods, from causes other than accidents to trains, &c., were—

	Killed.	Injured.
During shunting operations	9	10
Falling off engines, vans, wagons, &c.	4	8
Coming in contact with overbridges, &c., during the travelling of trains	. .	2
Coming in contact, while shunting, with vehicles, &c., standing in adjoining lines	2	. .
Getting on or off trains, engines, &c.	4	11
Whilst loading, unloading or sheeting	1	4
Whilst working at cranes or capstans	. .	4
Whilst working on the permanent-way or in sidings	. .	4
Whilst walking along the line on the way home or to work	3	. .
Whilst walking, crossing or standing on the line	8	6
Whilst attending to the machinery of engines, cleaning them, &c.	. .	2
Whilst attending to gates at level-crossings	2	2
Falling or being caught between vehicles or platforms	1	1
Falling off ladders, scaffolds, platforms, &c.	. .	3
By falling of lamps, wagon doors, timber, weights, &c.	1	1
Whilst coupling or uncoupling wagons	1	5
Miscellaneous	4	15
Total	40	78

19. Of other persons killed and injured by running trains, &c., 2 were killed whilst passing over the line at level-crossings; 22 were killed and 40 injured whilst trespassing on the line; 5 committed suicide; and 6 were killed and 4 injured from miscellaneous causes.

20. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1882:—

	4th Quarter, 1882.		4th Quarter, 1883.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	. .	1	. .	2
From misconduct or want of caution	5	30	6	25
Servants.				
From causes beyond their own control	7	16	5	14
From misconduct or want of caution	30	77	36	68
Others.				
Whilst passing at level-crossings	1	1	2	.
Trespassers, including suicides	28	10	27	14
Other persons	3	2	6	4
Total	74	137	82	131

21. In addition to the above, 9 persons are reported to have been killed and 41 injured in yards, workshops, &c., and 95 passengers to have met death in carriages and at stations, from causes unconnected with the working of trains.

Resolution.—The attention of the authorities concerned should be drawn to the increase in the number of cattle accidents on the South Indian Railway, of "goods train or parts of goods trains, engines, &c., leaving the rails" on the Sind, Punjab and Delhi Railway, and of the "failures of machinery, springs, &c., of engines" and "failures of couplings" on the Rajputana-Malwa Railway.

Order—Ordered, that this Resolution, together with the Abstract Returns compiled by the Government of India, be forwarded to the Governments, Administrations, and Officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Assam, and British Burmah.
The Residents, Hyderabad and Mysore.
The Agents to the Governor-General for Rajputana, Central India, and Biluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

D. M. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 10th June 1884.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th JUNE 1884.

GENERAL REMARKS.—Rain appears to have fallen generally throughout the country during the week under report.

In the Madras Presidency rain fell in all districts, being heaviest in Malabar. In Mysore the fall is in some places still insufficient for standing crops; but Coorg has received an adequate supply. Rain has fallen throughout the Bombay Presidency, except in one district and has been especially heavy in Kanara; it has also fallen in varying quantities throughout the Berars, Central India, and Rajputana. In the Central Provinces there has been heavy rain at Khandwa, and the weather continues generally favourable to agricultural operations.

In British Burma several districts have had a plentiful supply, and the same may be said of many places in Bengal. In the latter province, however, more rain is still wanted in the Chota Nagpur and Behar districts. In Assam good rain fell in all districts. In the North-Western Provinces and Oudh the fall was heavy in Kumaon, and slight showers also occurred in most other parts of the Province. From the Punjab most districts report slight showers.

The latest weather telegrams, dated 19th instant, of the Meteorological Department report the continuance of rain in most places in the Punjab, Bengal, and the Central Provinces. In Bombay, Madras, and the North-Western Provinces and Oudh rain has also fallen in several places.

There is not much change to record in agricultural operations. Harvesting is going on in Madras and transplanting of rice in Bengal. In the latter province paddy and *cheena* (millet) are reported from some places to have yielded a fair outturn and jute and sugarcane are doing well. In Assam the *aus* crop is being reaped and the prospects of tea are generally good. Ploughing and sowing for the *kharif* are in progress in Bombay, North-Western Provinces and Oudh, Punjab, Central Provinces, and the Nizam's territories. In Bombay a scarcity of drinking-water, and in the North-Western Provinces and Oudh a scarcity both of drinking-water and fodder, is still felt in places. In Central India and Rajputana agricultural prospects are on the whole good. In British Burma ploughing for the next rice crop is in active progress in most districts.

The public health is generally good, though cholera and small-pox are prevalent in most provinces.

Prices are on the whole stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 18th)		
Bellary ...	·52 (average)	Cultivation of sugarcane and paddy commenced. Sporadic cholera in the west, 17 deaths.
Kurnool ...	·33 (average)	Cultivation not progressing in parts for want of rain. Small-pox and cattle-disease in parts.
Ganjam ...	·68	Small-pox and fever in parts; cholera slight in one taluk.
Kistna ...	·23 (average)	Small-pox, fever, and cattle-disease in places; 1 death from cholera.
Chingleput (Madras) ...	·28 (average)	Standing crops fair, but want of rain felt in parts; harvest paddy, yield below average. Small-pox prevalent; 3 deaths from cholera.
Coimbatore ...	·89 (average)	Standing crops generally good, but dry crops attacked by insects and suffering from want of rain in parts; harvest paddy and *cholum*, yield about average. Fever in two taluks.
Tanjore ...	·01 (average)	Standing crops generally good, in parts not flourishing for want of rain; harvest paddy, cotton, and indigo, yield below average. 466 deaths from cholera.
Madura ...	·24 (average)	Small-pox prevalent; 1 death from cholera.
Malabar ...	4·56 (average)	First crop paddy partly benefited by recent rain. Small-pox slight in nine taluks; fever in two; 9 deaths from cholera.
Travancore ...	·21	First crop paddy failing for want of rain. Fever and small-pox in parts.
		General Remarks.—General prospects good.
Bombay—(June 18th)		
Kurachi ...	Tatta, ·17	Weather sultry; rain expected in Karachi. River at Kotri on 15th, 11 feet 9 inches against 12 feet 4 inches on same date last year. One case of small-pox in Karachi on 11th imported from Hyderabad district, none since; disease in twelve villages in districts; 14 fresh cases, no deaths; 14 remaining sick. Cattle-disease in four talukas; loss of 4 cows and bullocks and 12 buffaloes in Tatta. Prices—wheat, red rice, and *bajri* in Karachi 26, 30 and 32, in Manjhand 28, 29 and 40, in Tatta 26, 30 and 33, and in Jati 20, 30 and 32 pounds per rupee respectively.
Hyderabad ...	.....	Weather close; rain expected. River at Kotri on 16th, 11 feet 11 inches against 12 feet 7 inches on same date last year. Small-pox in nine, fever in two, and cattle-disease in one taluka. Wheat 20, *bajri* 34, *juari* 37½, red rice 26, and white rice 20 pounds per rupee.
Ahmedabad ...	·23	Total rainfall ·33; manuring operations continue. Cholera in Parantij—6 cases, 3 fatal. Wheat 29 and *bajri* 32 pounds per rupee.
Baroda ...	·30	Weather cloudy. Cholera abating in Baroda, 10 deaths; it has appeared in Sauli Mahal; small-pox in Damnagar Mahal. Preparation for *kharif* sowing commenced. Prices—*bajri* 32 and rice 22 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat ...	·36	Preparations for *kharif* continue. Cholera in Olphad—3 cases, 2 fatal. *Juari* 30 and *nagli* 40 pounds per rupee.
Nasik ...	Good showers in places.	More rain wanted; public health generally good; small-pox in parts of Nasik and Sinnar; 1 death by lightning. Insects like locusts reported in Niphad. *Bajri* 28½, wheat 31½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	4·64; rain daily, except on 13th; heavy on 16th and 17th.	Total rainfall since 1st January 4·67, being 6·48 below average; abnormal temperature 2° warm to 3° cool; vapour in air normal; abnormal wind strong from south-east on 13th to 17th.
Poona ...	Showers throughout the district: maximum 1·30 at Bhimthadi, minimum ·09 at Khed.	More rain wanted. Prices—*bajri* 34 and *juari* 35, in Poona *bajri* 25 and *juari* 28 pounds per rupee.
Ahmednagar ...	1·79 Karjat; ·98 Shrigonda; ·94 Newasa; ·92 Jamkhed; ·65 Sangamner; slight rain in other talukas.	Sowing of first *kharif* crops delayed for want of sufficient rain Cholera in Akola—1 attack, but no death. Slight cattle-disease in Newasa. *Juari*—maximum 60 pounds in Sangamner, minimum 35 in Karjat; *bajri*—maximum 48 pounds in Sangamner, minimum 36 in Nagar.
Sholapur ...	·17 Sholapur; ·84 Madha; ·44 Barsi; 2·11 Karmala; ·09 Pandharpur; ·39 Sangala; 1·85 at Malsiras.	More rain wanted. *Juari* 40 pounds 13 tolas and *bajri* 42 pounds 22 tolas per rupee.
Dharwar ...	Rain throughout the district; maximum at Kalghatgi and Mundargi, nearly 3·0; minimum at Hangal 10.	More rain urgently wanted in Dharwar, Navalgund, Gadag and Bankapur. Sowing operations commenced in Mundargi, Ranibennur, Karajgi, Kalghatgi and Kod, and retarded in others; drinking-water still scarce in Dharwar, Navalgund, Gadag, and Bankapur. Cholera in Dharwar, Hubli, Gadag, Ranibennur, Karajgi, and Ron; small-pox decreasing; fever in two talukas. Rice 27 to 40 and *juari* 49 to 77 pounds per rupee.
Kanara ...	Karwar, 12·50; Honore, 11·35; Akola, 9·25; Kumta, 3·43; Mundgod, ·97; Yellapur, ·96; Siddapur, ·87; Sirsi, ·17.	Monsoon set in. Small-pox—8 deaths in Kumpta, 6 in Honore, and 1 in Siddapur. Sugarcane plants healthy. Sowing seed for monsoon crop. Common rice at Karwar 12 seers, district average 15 seers per rupee.
Rajkot ...	·24	General health good. Weather very hot and cloudy. Fever and small-pox less prevalent. *Bajri* 31 and *juari* 39 pounds per rupee. *General Remarks.*—Rain in almost all districts; more urgently wanted in parts of Sholapur, Ahmednagar, Satara, and Dharwar. Scarcity of drinking-water still continues in four talukas of Dharwar. *Kharif* sowings in progress in several districts. Cholera in parts of eleven districts; small-pox in 15 and fever and cattle-disease in a few talukas.
Bengal—(June 18th)		
Chittagong ...	3·27	Weather unsettled and hot. Prospects of crops favourable; *aman* being transplanted. Prices stationary. Cholera and cattle-disease linger.
Dacca ...	1·96	Sowing of *roachia* paddy commenced; prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	·59	Early paddy and sugarcane doing well; *aman* being sown on low lands; high lands are being prepared. Common rice selling at from 13 to 16 seers per rupee. Public health generally good.
Moorshedabad ...	3·62	Weather hotter than last week. *Aus* being weeded; *aman* sowing progressing; jute and sugarcane doing well. Public health good.
Rajshahye ...	1·77	*Boro* paddy yielded a fair outturn; prospects of standing crops good. Health improved.
Burdwan ...	·34	Ploughing general, and sowing of paddy going on; sugarcane being transplanted; more rain wanted; prospects of crops good.
Rungpore ...	7·28	Weather tempestuous, cloudy, and cool. Rice selling at Rs. 3 or Rs. 4 per maund. Public health fair.
Bhagalpur ...	1·89	Ploughing and sowing going on vigorously; prospects of crops improved; rice 13 seers 14 chittacks per rupee.
Purneah ...	1·27	Prospects of crops good; weeding and transplanting going on. Common rice 16 seers per rupee. Public health good.
Patna ...	1·29	Paddy and *marua* are being sown. Cholera still reported.
Durbhunga ...	·22	More rain wanted for transplanting paddy; *bhadoi* crops doing well. Prices stationary. Public health good.
Hazaribagh ...	*Nil*	Weather hot and cloudy; rain much wanted. Prices continue high. A few cases of cholera and small-pox reported from certain places, otherwise public health good.
Cuttack ...	2·02	Paddy sowing progressing, but requires more rain. Common rice selling at from 16 to 20 seers per rupee in the town. Public health generally good.
		General Remarks.—Rain fell everywhere during past week and the fall was heavy in many districts, but rain is still much needed, specially in the Chota Nagpore districts, where it was insufficient, and in some of the Behar districts. Cultivation is generally going on actively; prospects of crops good; *boro* paddy and *cheena* are reported from some places to have yielded a fair outturn. Prices have been falling slightly, except in those districts where special causes exist. Cholera and small-pox still reported, but the former is bad in the Patna district.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (June 17th)	No rain	Heat excessive. Cholera, small-pox, and fever slight. Prospects of sugarcane crop favourable. Prices steady.
Allahabad („ „)	One slight shower	Weather very hot, occasional dust-storms, but no sign of monsoon. Prices nearly stationary, with tendency to fall. Cholera and small-pox much decreased; general health good.
Gorakhpur („ 16th)	.....	East winds and cloudy weather. Early rice sown. A little cholera. Prices steady.
Jhansi („ 17th)	Sadr, ·7; Man ·2 on the 12th.	Prices fluctuating. Health good. Scarcity of fodder and water still felt in spite of local showers.
Agra („ 16th)	Rain in three parganas—·1 to ·2.	Fever and small-pox in two parganas; a very little cholera in city and one pargana. Prices stationary.
Bareilly („ 17th)	A slight shower or two	Great heat. Ploughing begun. Prices pretty steady. Health of people and cattle good.
Meerut („ „)	·1; Sirdhana, ·8; Baghpat, ·6; Hapur, ·2; Ghaziabad, ·2; and Mowana, ·10.	Weather very variable and hot. Supplies sufficient. Prices steady. Health generally good.
Kumaon („ „)	Good rain all over the district on 10th and 11th.	Rains appear to be commencing. Crop prospects much improved. Some cholera in Eastern Kumaon; a few cases of typhus and small-pox in other parts. Prices stationary. Cattle-disease still prevalent.
Lucknow („ „)	.....	East wind, with sky often cloudy, but no rain; intense heat. Land being manured and tilled for *kharif*. Health of people and cattle generally good. Markets well stocked; prices steady.
Partabgarh („ 13th)	.....	Slight fall in price of grain. Sugarcane coming on well; also early sown *makai* and *juar*. Complaints of scarcity of water. Small-pox still bad.
Sitapur („ 17th)	.....	Wind has varied during week, but now has an easterly tendency. Agricultural operations have begun, and *kodo* and the poorer kinds of rice are being sown on the low lands.
Fyzabad („ „)	No rain	Irrigation of sugarcane going on. Cholera and small-pox in parts of district. Condition of cattle good.
Rae Bareli („ 16th)	.....	Heat intense; weather cloudy; wind variable. Cholera in some places in the district. Scarcity of water continues. Prices remain steady.
Cawnpore („ „)	·10 on 12th in pargana Sarh Salempur.	Weather very warm and occasionally cloudy. Markets well supplied. Sporadic cholera and small-pox continue. Some cattle-disease in pargana Rasulabad.
Farukhabad („ 17th)	.....	Weather close and sultry throughout the week; this morning cloudy, with east wind. No sickness. Prices stationary.
		General Remarks.—Good rain has fallen in Kumaon and occasional showers in most other parts of the province; heat continues great. *Kharif* ploughings have commenced. Prices continue nearly stationary and markets well stocked. Scarcity of water and fodder is still felt in some localities. Cattle-disease is reported in a few districts. Cholera and small-pox are abating, and the public health is generally satisfactory.
Punjab—(June 17th)		
Delhi ...	·50	Small-pox abating. Prices stationary.
Hissar ...	Slight rain at Jhajjar	Health good, but ordinary fever prevails in Hissar. Cattle suffering. Crop prospects unchanged. Prices steady.
Umballa ...	1·01	Health good. Preparations for *kharif* sowings continue. Prices stationary.
Jullundur ...	·50	Health good, but small-pox continues in villages adjacent to Sadr. Rinderpest prevailing in two villages. Prices stationary.
Amritsar ...	·10	Health good. *Rabi* outturn good. Prices nearly steady.
Sialkot ...	·50	Small-pox in city slightly increasing. *Rabi* harvest completed. Prices stationary.
Ferozepore ...	·30	Health good. *Rabi* harvest completed, yield good. Prices fluctuating.
Lahore ...	·20	Health good. Prices steady.
Rawalpindi ...	·30	Health good. Fall in prices of wheat and Indian-corn; prices of grain rising.
Mooltan ...	.....	Health good. *Kharif* sowings nearly completed. Prices almost stationary.
Dera Ismail Khan ...	·50	Health good. Crop prospects slightly improved. Prices stationary.
Peshawar ...	.....	Slight fever. Prices falling.
		General Remarks.—The rainfall has been all but general. Small-pox continues in the villages adjacent to Juliundur and in the Sialkot city; it has disappeared from the Sirsa district and is abating in Delhi; there is slight fever in Hissar and Peshawar, and cholera still prevails in the Kangra district; elsewhere the health of the province is good. *Kharif* sowings are in progress. Prices of food-grains are on the whole stationary.
Central Provinces—(June 18th)		
Nagpur ...	1·69	Weather cloudy and close. Ground being prepared for *kharif* sowings. Small-pox and cattle-disease prevail especially in Katol. Prices steady.
Jubbulpore ...	·19	Weather cloudy and occasionally gusty. *Kharif* ploughings continue. Health good. Wheat 27 and rice 13 seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces— *contd.*		
Saugor ...	·59	*Kharif* ploughing in hand. Small-pox decreasing. Prices steady.
Seoni ...	·60	Ploughing progressing. Cattle-disease and small-pox continue. Prices slightly fallen.
Hoshangabad ...	·67	Weather hot and cloudy. Ploughings continue. Small-pox—39 cases, 3 deaths. Wheat 22 and rice 19 seers per rupee.
Khandwa ...	2·57; heavy rain on 13th and 16th.	Weather cloudy. Ploughings continue. *Juari* 24¼, rice 12½, and wheat 22½ seers per rupee.
Raipur ...	·78	Rice sowings commenced in places. Small-pox in Drug. Rice 23¼ and wheat 29 seers per rupee.
Sambalpur (June 19th)	·34	Weather hot and cloudy, with occasional storms. Prospects and health good. Common rice 28 seers per rupee.
		General Remarks.—Temperature reduced by late rain, which has been general. Fields under preparation for *kharif* sowing. Small-pox prevails but slightly.
British Burma— **(June 18th)**		
Akyab ..	8·23	Total rainfall 31·88. Slight small-pox; *no deaths reported.*
Rangoon ...	6·91	Total rainfall 19·83. Slight small-pox and cholera in town.
Bassein ...	3·21	Total rainfall 14·07. Slight small-pox.
Amherst (Moulmein) ...	5·89	Total rainfall 2·07. Ploughing progressing.
Toungoo ...	1·93	Total rainfall 13·05.
Kyoukphyoo (June 14th)	5·0	Total rainfall 13·42. Ploughing commenced.
„ („ 17th)	5·62	Total rainfall 19·04. Ploughing progressing.
Sandoway ...	.....	No report received.
Pegu ...	4·4	Total rainfall 17·92. Fever prevalent. Ploughing commenced.
Tharrawaddy ...	2·65	Total rainfall 16·15. Slight small-pox. Ploughing commenced here and there.
Prome ...	0·65	Total rainfall 7·52. Some cholera and small-pox.
Thonegwa ...	2·81	Total rainfall 26·88. Some small-pox and cholera. Ploughing commenced.
Henzada ...	·51	Total rainfall 14·91. Small-pox prevalent. Slight cholera.
Thayetmyo ...	0·90	Total rainfall 5·91. Slight small-pox and cholera.
Shwaygyin ...	6·95	Total rainfall 20·56.
Tavoy ...	4·80	Total rainfall 24·12.
Mergui (May 31st)	3·05	Total rainfall 14·58.
„ (June 7th)	4·10	Total rainfall 18·68.
		General Remarks.—Slight small-pox and cholera in most districts. Rainfall seasonable. Ploughing commencing in several districts.
Assam—(June 18th)		
Gauhati (June 17th)	3·71	Weather hot. River rising. Small-pox still reported from Shastra Bapeta. Prospects of *aus* good and being reaped; sugarcane doing well; prospects of tea fair; public health fair; a few sporadic cases of cholera.
Cachar ...	2·95	Weather very warm. Prospects of *aus* crops good; reaping of the same commenced in some places; cultivation of *sail* and *asra* crops progresses. Favourable weather for tea, but short outturn up to date. Common rice 14½ seers per rupee. 32 deaths from cholera and 3 from small-pox reported from Sadr and Lakhipur.
Sylhet ...	2·53	Prospects of tea and crops generally good. Public health somewhat
Dibrugarh ...	6·19	improved.
		Weather hot. Lands being prepared for *sali dhan*. Tea backward. Cholera reported.
Mysore and Coorg— **(June 18th)**		
Bangalore } Mysore } ...	·11	Rain has also fallen in parts of the province; in others the small rainfall up to date is beginning to be felt. Crops generally in good condition; ploughing operations continue; prospects fair. Public health good.
Mercara ...	4·27	The monsoon rains which were greatly needed for all crops set in on the 13th. Small coffee berries are forming, but the bushes are lightly laden, consequent on previous partial failure of blossom showers.
Berar & Hyderabad— **(June 18th)**		
Amraoti ...	·93	Weather hot and cloudy. *Kharif* preparations progressing. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	·4	Preparations of land for *kharif* sowings continue.
Hyderabad ...	·15 (average)	Total rainfall from 1st January 3·77; rain wanted to commence *kharif* sowings. General health good. Prices—wheat 14½, coarse rice 11¼, white *juari* 16½, yellow *juari* 20½, and *tur* 20½ seers per current sicca rupee.
Central India States— **(June 18th)**		
Indore ...	0·55	The weather latterly has been very cloudy and some rain has fallen; the heat has increased. Health good. Prospects continue good.
Morar (Gwalior) ...	0·83	Total rainfall ·93. Health good. Weather seasonable.
Sutna ...	Some slight showers	Weather hot and close. Health good. Prospects good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—*contd.*		
Neemuch ...	0·7	Weather very hot and somewhat cloudy. Public health good.
Goona ...	0·3	Weather cloudy. Health good.
Agar ...	0·12	Weather cloudy. Health good. Prospects good.
Sehore ...	0·5	Weather hot. Prospects good. Public health good.
Nowgong ...	0·34	Weather hot and cloudy. Public health good.
Manpur ...	.....	No report received.
Rajputana—		
Abu (June 18th)	·91	Heavy clouds; weather close; indications of rain.
Sirohi („ 15th)	·18	Tanks dry and many wells nearly so. Health good. Thunder-storm; cooler; weather windy.
Marwar („ 13th)	.....	Water obtained in Jodhpur city from Ranisagur tank and wells. Health good. Storm during week; no indications of rain. Prices stationary.
Meywar („ 15th)	Drops	Tanks and wells fair. Health good. Weather cloudy.
Harowti („ 14th)	Deolee, ·02; Kotah, ·25; Tonk, ·43; Shahpura (previous week), ·28.	Weather cloudy and close. Health good.
Jhallawar („ 13th)	.....	Weather windy and cloudy; occasional thunder-storm. Health good.
Ajmere („ 17th)	No rain	Weather cloudy and damp. Health fair.
Jeypore („ „)	·02	Weather cloudy. Cholera to slight extent continues. Prices firm.
Ulwur („ „)	Slight rain in parts	Weather windy and warm; passing clouds. Health good. Prices stationary.

Circular No. 72 Met.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 20th June 1884.

Read the following:—

Supplementary Memorandum by the Meteorological Reporter to the Government of India on the Himalayan snowfall of the season 1883-84.

RESOLUTION.

In a note dated 30th April, I gave a brief account of the state of the Himalayan snows up to the end of March. The later information since received shows that repeated falls in April and May, from Kulu westward, added considerably to the accumulation of the previous months; and at the present time the unmelted residue is apparently much in excess of what is usual at this season. The weather in the North-Western Himalaya has been in general remarkably cool. The following is a summary of the reports.

Murree Hills.—The Officiating Deputy Commissioner of Rawalpindi reports that no snow fell at Murree, or on the hills adjacent to Kahuta, in the months of April and May. This report refers apparently only to hills below 8,000 feet, as there was certainly fresh snow at elevations but little greater than this in the early part of April.

Kashmir.—A very interesting report, dated 18th May, from Colonel J. C. Berkeley, on special duty in Kashmir, compiled from the observations of several gentlemen travelling in the interior of the country. "The writers are unanimous in opinion as to the extreme severity of the weather for the time of year. There can be no doubt that the snowfall has been unusually late and heavy. During the last few days several severe storms have passed over the valley, and snow has fallen on the upper ranges. The Pir Panjal is still covered with snow, though it is generally free from it by the middle of April. The weather here is cold and unsettled." The following extracts from correspondence are communicated with the letter:—

31st March. Astor.—Major Hutchinson writes: "Very heavy fall of snow yesterday and to-day."

31st March. Sooroo.—Mr. Eyre writes: "I have been here three days, and it has snowed every day.

10th April. Unwan Nullah, Wardwan.—Mr. Rowe writes: "The weather and snow have been very bad, and there is absolutely no chance of sport in the large nullahs owing to the depth of snow."

12th April. Astor.—Lieutenant Maxse writes: "We have been marching in snow for the last 16 days, and at present snow is falling thick. All natives say they never saw so much snow as there is this year; and at Gurdu (?), where there were 6 feet of snow, we were told that at this time last year crops were sown. Colonel Simpson, who started 12 days before us, was stopped at the Dori Kam Pass, his coolies leaving their loads."

21st April. Sooknis, Wardwan.—Lieutenant Heygate writes: "I have got so far on my way to Sooroo; but the snow is tremendous. I never saw so much at this time of year."

21st April. Phoo Nullah.—Mr. Eyre writes: "Such snow. I can do nothing at present."

25th April. Mopana.—Major Wilson writes: "I am going to try Minurgh (?) Nullah as soon as the snow melts sufficiently."

7th May. Deas.—Lieutenant Merewether writes: "There is a good deal of snow still, which makes it rather cold at night."

In a subsequent letter (of doubtful date, but probably written about the 1st or 2nd June) Colonel Berkeley adds: "I have heard from Leh and places on the road to that place that there has been fresh snowfall, and that the winter has been unusually late and severe.

"On the 19th May fresh snow fell on hills not far from, and well within sight of, this house (Srinagar); hills not apparently more than 8,000 or 9,000 feet high, and from which all snow had disappeared for some time. On the same day the thermometer in my verandah registered 48° at 4 P.M. There was heavy rain in the valley on and for several days previous to the 19th.

"Since the 19th the weather has been fine, and it is getting warmer daily.

"From all quarters I hear that the snowfall has been unusually heavy and late. It is said here that the condition of vegetation, &c., is just a month more backward than usual."

Chamba.—Major C. H. Marshall writes on the 9th May: "We have been having very queer weather during the month,—heavy storms of rain, hail, and thunder. The actual rainfall has been light all the same. I only got news from Pangi last week. The snow on the other side of the first snowy range was much heavier than it was the winter before, when the deepest snow lay on this side. The passes were not open till the 1st May. We have had no heavy spring snow, though there has been fresh snow as late as the 25th April."

Kulu.—The Assistant Commissioner of Kulu (under date 6th May) forwards reports of the snowfall in April, received from the Tehsildars of Kulu and Plach. "The snowfall on the 7th and 8th was heavy and general, extending down to about 9,000 feet. Snow fell on several dates during the month on the upper ranges. A report on the snowfall in Lahoul during the winter, received from Thakur Hariehand, is also forwarded, from which it will be seen that the winter has been a very severe one, and that owing to the snow being still on the ground, the cattle are suffering very much from want of fodder. Generally throughout Kulu the winter has been a very late one, and the spring rains and snows have been frequent and heavy. The consequence is that there is still a great deal more snow about than is usual at this time of year. The weather during the past few days has changed very suddenly, and the heat in the valleys is very great, while the snow is disappearing rapidly."

Lahoul.—The above report, in so far as it refers to Lahoul, is to exactly the same effect as that of the Revd. A. Heyde, quoted in the previous memorandum. A letter from this latter gentleman, dated Kyelang, 3rd May, gives the following interesting information: "What snow we had in April (nearly 6½ inches of snow-water; equal to about 6 feet of snow), nearly all fell in the

first half (of the month); in the second half the sky was often quite clear. Dry winds prevailing during the latter half of the month in the afternoon for an hour or two, but seldom strong. * * * The movement of the clouds above the hills was also generally very slow. The snow disappears very slowly from the hillsides, more so than has been the case in other years at this time.

"During March and April the natives frequently complained that the sun was less powerful than it usually is at this time of the year; and I myself think not quite without reason. Something appears to exist in the higher strata of the atmosphere, which obscures the brightness and diminishes the heat of the sun to some extent; which something, I think, must be indicated by that curious circle around the sun, which I have mentioned more than once (in former letters). Since about a fortnight the circle appears to be less sharply defined than formerly, looking as if it were going to disappear."

Bisahir and Spiti.—The following report on the amount of snow on the passes in March has been received since the publication of the previous memorandum:—

	March 1884.	Total to end of March.	
Spiti Pass ...	4 feet	... 24 feet,	estimated.
Rupon Ghatti ...	4 „	... 22 „	„
Burun Ghatti ...	5 „	... 37 „	„
Nilang Ghatti ...	6 „	... 51 „	„
Shatul Pass ...	5 „	... 35 „	„
Sundur Ghatti ...	4 „	... 28 „	„

Hill States of North-Western Provinces.—The Civil Surgeon, Mussoorie, reports that no fresh snow was observed to fall upon the ranges visible from Mussoorie during the month of April, but that slight fresh snow was observed on the further ranges on the 9th May.

The Senior Assistant Commissioner of Kumaon, writing from Almora on the 20th May, states that "there have been slight falls of snow on all the higher ranges down to about 13,000 feet during April and to the 10th May. The snow that fell melted off rapidly, and must have been small in quantity. I have myself just returned from Darma and Byans, and it appeared to me—and the inhabitants of those places themselves admitted—that the fall of snow during the last winter had been very light. This was evident from the small quantity of snow lying above the villages in Darma on the north-eastern side of the Punjachuli Range, at heights of from 10,000 to 12,000 feet; as usually at this time of year, snow is found in large quantities down to the banks of the rivers coming from the glaciers and below these villages. The same is reported from the Milum side.

"The Pass *viâ* Byans into Thibet was reported open by the 10th May, and had been traversed by the Huniyas. This is exceptionally early. Before I left Darma and Byans, the snow was melting and the rivers were rising rapidly, while the people said it was unusually warm."

Sikkim.—**Mr. Oldham, the Deputy Commissioner of Darjeeling, reports on the 3rd May that the fall of snow on the Jelep, Nathu, Cho, Donkia, and Tanka passes during the month of April was slightly more than that for the corresponding month of last year.**

Summary.—From the above it must be concluded that on the inner ranges extending to the north-west of the Sutlej Valley, the snowfall has been unusually heavy, and has continued till late in the season. It is doubtful whether it is even yet over. The *Pioneer* of the 5th June contains a paragraph from a correspondent, apparently in Kangra, stating that "heavy snow was falling on the range beyond Palanpur (Dhaoladhar?) all Tuesday (the 3rd June?); and in all probability the cold showery weather lately experienced at Simla has precipitated fresh snow on the ranges of Kulu. To the south-east of the Sutlej, on the other hand, the fall has continued light, and even the higher ranges have less than the usual amount of snow.

In respect of the probable effect of these conditions on the rainfall of the coming season, our present experience is so small that it is necessary to speak with diffidence. That the prognostics as regards North-Western India are somewhat unfavourable must be admitted; and guided by the experience of the last eight years, I look for either a somewhat retarded or a weak and interrupted monsoon in the earlier months in part or parts of North-Western India, extending possibly, but by no means necessarily, to the northern portion of the Bombay Presidency and Rajputana. This is the area that experience has shown to be most subject to the anomalous prevalence of dry westerly winds in the monsoon, as it is that of their normal prevalence in the spring. But it is not likely that the whole of this area will be simultaneously affected, and it is equally unlikely that the conditions now existing will operate through the whole of the monsoon. In many respects the present season resembles the first part of 1876.

The distribution of the heavy snowfall is different from that of last year. It was then restricted to the first or outer snowy range. It now comprises Kashmir, Chamba, and the Hill States north of the Sutlej. That this difference in the seat of the operative cause will result in a different distribution of the effect is most probable; but as it is only during the last two years that any but the most meagre information has been forthcoming as to the condition of the Himalayan snows, it is obviously impossible to do more than to indicate this probability in the most general terms.

ORDER.—Ordered that the above memorandum be published in the Supplement to the *Gazette of India*, and that copies be forwarded to Local Governments and Administrations and to the Foreign Department.

E. C. BUCK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 18th June, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble D. G. Barkley.

RANGOON WATER-WORKS BILL.

The Hon'ble MR. ILBERT introduced the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the

construction and maintenance of Water-works and the supply of water in that Town, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Gibbs and Barkley and the Mover. He said:—

"This small Bill occupies part of the same ground which is occupied by the Burma Local Self-government Bill, and the provisions of the two Bills will have to be adjusted to each other. The precise mode in which the adjustment should be made will be a matter for the consideration of the Committee to which the Bill will be referred."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *British Burma Gazette* in English and in such other languages as the Local Administration might think fit.

The Motion was put and agreed to.

VALIDATION OF MARRIAGE LICENSES BILL.

The Hon'ble MR. ILBERT also introduced the Bill for the validation of certain licenses to solemnize marriages granted to Ministers of Religion under Act XXV of 1864, and moved that it be circulated for the purpose of eliciting opinion thereon.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

SINDH INCUMBERED ESTATES BILL, 1884.

The Hon'ble SIR STEUART BAYLEY moved that the Report of the Select Committee on the Bill to amend the Sindh Incumbered Estates Act, 1881, be taken into consideration. He said:—

"When I had the honour to introduce this Bill in November, 1882, I explained that it had for its object a very small amendment of what was obviously an omission in the definition of the word 'zamíndár' in the original Act of 1876, by which the heir of a jághírdár who had ceased himself to be a jághírdár and was for all practical purposes a zamíndár yet could not come under the definition of 'zamíndár' as given in the Act because his estate had not paid revenue previous to the passing of the Act. The present Bill was originally drafted merely with the object of remedying this defect, and was sent to the Bombay Government for criticism. The Government of Bombay, in replying, said that the Bill would meet that purpose perfectly well, but added that they had several other points upon which they would soon have to come up again with a view to the further amendment of the Bill. In considering this it appeared to us in Select Committee very undesirable to tinker an Act of this kind frequently, and accordingly we requested the Bombay Government to consider the other points upon which the Bill seemed to require amendment, and to send their views to us, so that we might be in a position to amend the Bill once for all. That has now been done, and that is the reason for the delay that has occurred in the matter and which has caused the Bill to hang fire.

"The points on which the Bombay Government suggested that the Bill should be amended have all been noticed in the Report of the Select Committee, and it will be obvious to anybody reading that Report that those points are none of them of great importance, and that we are only amending methods of procedure and leaving the scope of the Bill as it stood before.

"The first point is the amendment of the definition of 'zamíndár,' which, as I have explained, will now let in not only those heirs of jághírdárs but also the zámíndárí tenants of ex-jághírdárs who would otherwise have been excluded. The other alteration made in the definition is one which I fear has given the Legislative Department a good deal of trouble. It refers to the method of dealing

with joint-proprietors' estates. The question is a difficult one, and is fully explained in the Report of the Select Committee. The outcome of the deliberations of the Select Committee has been this, that the property of joint-proprietors paying an aggregate revenue of Rs. 300 may come under the Act, but in dealing with proprietors the law will deal with them as individuals; that is to say, in order to render an application for bringing under the Act one of these joint undivided estates, successful, all the proprietors will have to be represented, and, if successful, then the property, whether separate or joint, of each proprietor will be liable to come under the scheme of liquidation. This is in accordance with the ordinary law, and really it is the only way out of the difficulty, for it would be monstrous that a man who has separate and joint property should be at liberty to get the benefit of the Act for his separate estate while his joint property should not be available for the satisfaction of his creditors, or that his joint property should be administered under the Act and his separate property be left at his own disposal. Practically, therefore, we leave matters very much as they were, except that we remove all doubts as to the possibility of bringing a joint estate paying Rs. 300 as its aggregate revenue under the Act.

"The next point on which the Bill has been amended is that the protection given to estates brought under the Act may now be given, if the Commissioner desires, from the day of the inquiry made upon the application, instead of waiting till the inquiry is completed and the order of management passed. This seemed obviously necessary, and the Bombay Government recommend it. The protection will bar revenue-process as well as civil process. We have also allowed six months as the period within which persons who have under the old law not been able to come in under the Act, but who under the new definition of 'zámíndár' will be at liberty to come in, may bring their applications instead of leaving the time indefinite. We have also decided that an order of management once passed shall be conclusive as to its own validity. This appeared to be very desirable, and the necessity for it was recently illustrated by the case of a man whose estate had been brought under management, and it appeared that although, as it stood in the books of Government, the estate was rightly brought under management, yet in reality the owner had parted with a portion of his estate but had not registered the transfer. Discoveries of this kind might render the whole process of liquidation null and void. It is, therefore, obviously more convenient that the scheme of liquidation once begun should be completed, and, with the consent of the Bombay Government, we have decided that this is the best way out of the difficulty. We have also provided that a liquidation-scheme may be amended at any time, saving the rights of the creditor; that is to say, that money adjudged to be due to any creditor must, under the liquidation-scheme, be paid during the period of liquidation.

"There is only one other point to which I need refer. It is a condition of some of the jághírs in Sindh that a definite fractional share of the jághír shall be resumed on the death of the incumbent, but it is left to the heir of the incumbent to decide what portion of the estate shall represent the fractional share that is to lapse. Of course, in the case of such estates being brought under liquidation, this custom must cause great difficulty to the manager in leasing or otherwise disposing of the land, because he does not know what land he has to deal with. To meet this difficulty we have arranged that, if an estate is brought under management of this kind, the manager shall, after consulting the persons interested, decide what portion of the land will come under the resumption-clause. He will then be at liberty to deal with the rest without any difficulty arising from that cause."

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN SALT ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill to amend the Indian Salt Act, 1882. He said:—

"The reasons for making the Motion which I have the honour to bring forward are explained in the Statement of Objects and Reasons, and it is scarcely necessary for me to add much to what is said in that Statement. I may, however, briefly explain that it is thought desirable, on grounds which it is at present unnecessary to enter into, to exclude Sindh from the operation of the Salt Act, and to legislate in Bombay with the object of making one Act applicable both to the Province of Sindh and to Bombay itself; and therefore it has been thought necessary to take measures to prepare for the repeal of so much of the Indian Salt Act as applies to the Province of Sindh. Opportunity has been taken of this necessity to clear up a point on which some doubt has recently been thrown with regard to the importation of salt into Sindh. Under the Inland Customs Act of 1875, a notification was issued by which the Governor General in Council prohibited the transit of salt into any part of Sindh unless under certain conditions. Section 27 of the Indian Salt Act of 1882 provides that 'the Governor General in Council may, from time to time, by rule, prohibit absolutely, or subject to conditions, the importation of salt into, or the transit of salt over, the said territories' (including Sindh) 'or any part thereof.' It was held by the Judicial Commissioner of Sindh that the notification, to which I have referred, was inconsistent with section 27 of the Indian Salt Act, in so far as 'it prohibits the transit into Sindh of salt from foreign territory, whereas the section empowers the Governor General in Council to prohibit absolutely or conditionally the importation of salt into, and the transit of salt over, the territories referred to in it, and that importation applies only to salt brought as merchandise for the purpose of commerce and in merchantable quantities, not to small quantities brought for other purposes.' When this ruling was brought to the notice of the Government of India, it was of opinion that the interpretation given to the Act was neither in itself correct, nor consistent with the intentions of those who framed the Act; and as a temporary measure the Government issued a notification, laying down, in supersession of the notification of the 18th November, 1880, to which I have referred, that the Governor General in Council was pleased to prohibit absolutely the importation into, or the transit over, the Province of Sindh, or any part thereof, of salt produced or manufactured in foreign territory or in any Native State, or brought from foreign territory or from a Native State. Advantage has been taken of the present occasion to insert in the Bill, which I have now the honour to ask leave to introduce, the word 'bringing' instead of the word 'importation,' so as for the future to place the matter on a definite basis, and to exclude the possibility of further doubt arising."

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 25th June, 1884.

SIMLA;
The 20th June, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

* Passed down to supplement the Agra Canal supply.

Executive Engineer, Northern Division, Ganges Canal, reports—All rabi crops have been cut. Outturn irrigated, crops, good. Snow water came down on the 21st, and all demands for water have since been met. The increase is due to all crops having been sown with the aid of canal-water.

Executive Engineer, Meerut Division, Ganges Canal, reports—There was a fair demand for water during the month. The area under sugarcane is satisfactory, considering the late date on which paleo commenced in this division, viz., 25th February.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—Steady demand throughout the month for water, chiefly for indigo paleo. All rajbahas had to be tatiled to put up a high gauge at tail of the division.

Executive Engineer, Aligarh Division, Ganges Canal, reports—The demand for kharif paleo was very strong after the 10th of April.

Executive Engineer, Narora Division, Lower Ganges Canal, reports—Fatehgarh Branch closed in tatil for a fortnight and ran short supply for an additional week. Hence the small area irrigated.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—Strong demand for water throughout the month; supply available, however, much below requirements. Increase compared with last year due almost entirely to more accurate recording of the irrigation done.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, shows an increase of 756 acres as compared with last kharif.

Executive Engineer, Etawah Division, Lower Ganges Canal, shows an increase of 9,224 acres as compared with last year.

Executive Engineer, Eastern Jumna Canal, reports an increase of 6,100 acres of sugarcane due to early planting, and 2,200 acres of indigo partly due to the spread of the crop. The water supply was sufficient; the demands moderate, but distributed over the whole division.

Executive Engineer, Agra Canal, reports Notwithstanding the very low supply, the area irrigated during the month is nearly double that returned for April of last year. This is due partly to an earlier harvest, and partly to a great extension of indigo operations.

Executive Engineer, Rohilkhand Canals, reports—The rabi is all harvested; water in great demand for 2nd and 3rd waterings of sugar and for early rice, indigo, and vegetables. There was rain varying from ¼" to ½" at the different rain-gauge stations on the 3rd May, but is not enough to have much effect on the demand.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

Allahabad,

FRED. FIREBRACE, *Major, R.E.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

PROPOSED RAILWAY FROM UMBALLA TO KALKA, WITH POSSIBLE EXTENSION TO SIMLA.

No. 520 R.C., dated 24th June 1884.

RESOLUTIONS—By the Government of India, Public Works Department.

Read the following :—

No. 1441, dated 18th March 1884.

FROM—The Secretary to the Government of the Punjab, Public Works Department,

To—The Secretary to the Government of India, Public Works Department.

I am directed by His Honor the Lieutenant-Governor of the Punjab to submit the following documents and plans for disposal by the Government of India:

Revised estimate for a line of broad gauge railway from Umballa to Kalka, aggregating Rs. 32,34,169. Two books of plans and one tracing accompany.

Report on barometrical reconnaissances between Kalka and Simla with a view to ascertaining the feasibility of a mountain line of railway between those places. Four tracings accompany.

2. The above have been prepared by Mr. Morris, C.E., Executive Engineer, who for some time was assisted by Mr. LeMaistre, Assistant Engineer. As soon as the former had advanced the Kalka Railway project to such a point that his personal attention was not absolutely necessary, it was thought advisable to give him an assistant so that he might be able to devote his whole time to the remainder of the out-door work.

3. As regards the first work, Mr. Morris has carried out the instructions contained in Mr. Molesworth's note of the 14th July last, which was forwarded with Government of India No. 665R.C. of the 26th idem. Mr. Molesworth's anticipations have been more than realised, the original estimate having been reduced by nearly 14 lacs of rupees. The revised one now submitted aggregates —

	Rs.
Direct charges	29,59,749
Indirect charges	2,74,420
Total ...	32,34,169

No provision has been made for rolling stock, so the probable expenditure required for the construction and working of the line will probably be 38 lacs at the least.

4. When weighing the financial prospects of the line, Mr. Morris has used the following hypotheses :—

(*a*) That the goods traffic will realise an average rate of one pie per maund per mile.

(*b*) That third class passenger traffic will bring an average of four pies per head per mile.

(*c*) That first and second class passenger traffic, parcels and mail, will bring in about Rs. 840 per mile.

(*d*) Military transport Rs. 500.

(*e*) That the working expenses will amount to 60 per cent. of the gross receipts.

5. The rates to be charged for passenger and goods traffic from which items (*a*) and (*b*) are deduced, contrast favorably with those now levied for existing modes of transport. They are, however, considerably in excess of those current on the adjoining Sind, Punjab and Delhi line. It is believed the actual receipts on that line for goods do not average much beyond ¼ pie per maund per mile, while the 3rd class passenger rate is only about 2½ pies per mile. Unless specially high rates be accordingly levied, Mr. Morris' estimate of the gross receipts at Rs. 9,997 per mile per annum would fall to about Rs. 7,000, while the allowance of 60 per cent. for working expenses, on a line with a terminal section such as that from Chandigurh to Kalka may, with greater prudence, be increased to 70 per cent. Working on these figures, the returns would be somewhat under 2 per cent. on a capital expenditure of 38 lacs of rupees.

6. No doubt the traffic has greatly increased since the period when it was registered, *viz.*, 1878-79, but the returns made on that occasion do not command confidence. The traffic in malt liquors was greatly underestimated, but other items may equally have been returned in excess of actuals. Should it be desired, the Lieutenant-Governor will be glad to arrange, on behalf of the Government of India, for a further registry of the traffic on this line.

7. As regards the barometrical reconnaissance Mr. Morris' conclusions are, His Honor considers, such as the configuration of the country renders most probable. No remarks appear

called for, beyond that there appear to be no reasons why the construction of the line should be abnormally costly. Mr. Morris appears to have done a great deal of work, and to have performed the duty allotted to him in a satisfactory manner.

Memo. by the Consulting Engineer to the Government of India for State Railways, dated 25th April 1884.

Respecting the line between Umballa and Kalka, I have but little to add to my previous note.

In that note I expressed the opinion that by certain alterations in the gradients, alignments, and designs of bridges, which I indicated, a sum of more than 12 lakhs of rupees might be saved. Mr. Morris has now revised the estimates in accordance with the remarks contained in my note, and he finds on going into details, the original estimate can be reduced by nearly 14 lakhs of rupees.

Under these circumstances there is every reason to believe that the Railway, if made, will be financially successful, and as it is important in a military point of view, there seems to be little doubt that it ought to be made.

I am strongly of opinion that this line ought not to belong to an independent company, but should form a portion of the Sind, Punjab and Delhi Railway; and as the Sind, Punjab and Delhi Railway will shortly pass into the hands of Government, I think the line should be constructed by the State, and handed over to whatever management the Government may entrust the Sind, Punjab and Delhi Railway whenever it may become the property of the State.

My reasons for advising that this line should be a branch of the Sind, Punjab and Delhi Railway, are that no independent company can work the Umballa and Kalka line so economically as the Manager of the Sind, Punjab and Delhi Railway; because the busy time on the Sind Punjab and Delhi Railway is the slack season of the Umballa-Kalka Railway and *vice versâ*. The surplus staff and rolling stock of the Sind, Punjab and Delhi Railway can therefore be beneficially utilised in the Kalka Branch. It is, moreover, very inexpedient that a line belonging to one company should be worked by another management, in which the interests are not identical.

Such a course is necessary in some cases, but it is always unsatisfactory and extravagant in practice; whilst to work the branch as an independent line would be simply ruinous.

I would advise an alteration in the junction of this line with the Sind, Punjab and Delhi Railway at Umballa City Junction, so as to bring the junction points as near as possible to the entrance points of the station—and save one-fourth of a mile in the through distance—as shown in the plans the junction is more than a quarter of a mile from the entrance points of the Umballa City Station. I have marked the proposed alteration on the plan.

I propose to defer any remarks on the Kalka-Simla reconnaissance until I have personally examined a few points on the ground, which I hope to do in the course of next week or the week after.

GUILFORD L. MOLESWORTH.

Memo. by the Consulting Engineer to the Government of India for State Railways on the Extension to Simla of the proposed Umballa-Kalka Railway, dated 12th May 1884.

The general direction which Mr. Morris has recommended, for a line of railway, if made between Kalka and Simla, is judiciously selected; though I think that in places some modification is necessary in the details of his recommendations.

Starting from Kalka the line runs up as recommended by Mr. Morris with a gradient of 1 in 35, leaving Kalka at a reduced level of 2142 and tunnelling through the two ridges at Dharampore at a reduced level of 4500 feet. I am doubtful, however, whether this is practicable; the length of a railway would necessarily be shorter than that of the road and to rise from 2142 to 4500 with a gradient of 1 in 35 would require nearly 16 miles, whilst the section only shows about 15¼ miles. I think it will probably be necessary to round the first ridge on which the Dharampore Dâk Bungalow stands, in order to gain more length and to tunnel through the ridge about ¼ of a mile on the Kalka side of the Toll Bar. I think also it will be necessary to rise to the level of about 4700 feet before tunnelling through the ridge, this should give a tunnel of about 220 yards, whereas, by keeping the lower level of 4500, a tunnel of about 800 yards would be necessary.

After passing through the Dharampore ridges, Mr. Morris proposes to drop with a falling gradient of 1 in 50 for about 2½ miles; looking, however, to the fact that at some times in the year the down traffic will be heavier than the up traffic, I think it will be desirable to eliminate this gradient; its elimination will necessitate somewhat increased length at that part, but this addition will be repaid by the saving in working. The only other portion at which there is an adverse gradient in down traffic is at Solon where Mr. Morris shows a gradient of 1 in 100; but I think it doubtful whether by the line he proposes it would not be necessary to insert a mile of 1 in 50. I should advise, however, that this gradient should be altogether eliminated by passing round the other side of the cantonments.

It seems to me to be unnecessary for the line to be carried as far as Sabathu,—I should rather be disposed to surmount the ridge opposite to the 5th mile from Sabathu where I have found a gap about 5000 feet in elevation; the line could be carried by an easy gradient to this gap, and thence the gradient would be nearly level to Solon, by crossing the ridge at this gap a saving of about 9 or 10 miles would be effected in the length of the line. Sabathu has not a good reputation as a healthy place, and it is not very large. The tendency of any extension or new sanitarium on this ridge would be rather above than below this gap, and I do not think it would be desirable to add 9 or 10 miles to the through mileage to Simla for the purpose of bringing the railway *quite* to Sabathu. At all events a branch might be made hereafter from the gap to Sabathu should it be deemed of sufficient importance. From Solon to Khundaghât the gradient would be easy; but from Khundaghât the line rises with a gradient of about 1 in 46 to a little beyond Kiarighât, it then would keep near the road at Kathlighât, afterwards curve round so as to avoid a steep gradient, it would join the cart road about a mile on the Simla side of Ghalighât. It would then keep the cart road as far as Badhaighât and would thence curve round below the cart road to the terminus.

I think the first site for the terminus would be either at "Innes own" or else on the ridge below "Merlin Park." I do not think that separate branches to Kasauli and Jutogh will be required.

I have marked in yellow on the Simla and Kalka Road Survey, the line, I think, it probable that a railway should take. It will be observed that the line would be excessively tortuous and that very little use could be made of the existing cart road. It would be necessary to have recourse to exceptional curves and special rolling stock in this line. The line would pass through very rough and disintegrated rock, and the cost of construction and maintenance would necessarily be very heavy, as in the rains the slips would be numerous. I annex a rough section which will afford an approximate idea of the probable gradients on such a line. It will be observed that the line is somewhat shorter than the length given by Mr. Morris, for there would be a considerable saving in length by avoiding Sabathu, but on the other hand, this would be counterbalanced to some extent by the additional length necessary to reach the higher level at Dharampore, and the greater length necessary for eliminating the adverse gradient from the Sabathu Valley up to Dharampore. It is impossible to give anything like a reliable estimate of the cost of such a line without detailed estimates, but the cart road would not be utilised to any very great extent, and the cost of such a railway and the heavy maintenance would scarcely be justified by the amount of traffic that would probably be carried on it.

Besides the through Simla traffic and the traffic with the interior, it is probable that a considerable traffic in firewood, lime and building stone would spring up both for Simla and the plains.

GUILFORD L. MOLESWORTH.

OBSERVATIONS.—The detailed report by Mr. Morris submitting the revised project for the Umballa-Kalka Railway is attached to this Resolution; and so also is his report on the reconnaissance for an extension of the line to Simla.

2. The further investigation into this project has shown that the cost of constructing a railway from Umballa to Kalka was originally overestimated to the extent of about Rs. 14 lakhs. This reduction is very satisfactory. The results of the registration of the traffic during the present season on the Umballa-Kalka road will furnish a more reliable basis for the calculation of the probable earnings of the proposed railway than the figures of so old a date as 1878-79, and will probably also place the project in a still more favorable light. The Government of India will await with interest the report of the Punjab Government on this subject.

3. The reconnaissances between Kalka and Simla prove that a railway between these two places, which will serve all the military stations in the locality, can be constructed with less cost and difficulty than has hitherto been supposed. The Punjab Government will be requested to have plans and estimates of Route B, and of the alternative suggested by Mr. Molesworth, as also statistics of the probable traffic, prepared during the current year.

ORDER.—Ordered, that this Resolution and appendices be published in the supplement to the *Gazette of India*.

W. S. TREVOR, Col., R.E.,
Secretary.

Appendix A.

REVISED REPORT ON THE UMBALLA AND KALKA RAILWAY PROJECT.

PART I.

TRADE STATISTICS AND REVENUE PROSPECTS.

Traffic Returns called for by Government of India.

Referring to the Report of the Committee appointed in 1868 to collect statistics and information regarding certain proposed railways in the Punjab, the Government of India, in a letter addressed to the Punjab Government (No. 2962R, dated 24th August 1877), requested to be

furnished with statements showing the traffic between Umballa Cantonment and Kalka for 1875 and 1876, in view to an estimate being made of the probable traffic that would offer for carriage on a railway constructed between those places.

Arrangements made by Financial Commissioner for registration of traffic.

2. Such statistics as were available were, in due course, submitted to the Government of India; meanwhile the necessary arrangements were adopted by the Financial Commissioner, Punjab, for the more complete and systematic registration of traffic, for which purpose he instructed the Civil Officers of the Umballa District to entertain an adequate establishment of Muharrirs to be stationed at Lalru (11 miles from Umballa on the Kalka Road) and Kalka.

Period during which registration was carried on.

3. The registration of traffic was carried on from the 1st July 1878 to the end of June 1879, and the result duly communicated by the Financial Commissioner to the Punjab Government (*vide* Appendix No. 6).

Early history of the Kalka Railway project, Lahore Committee's Report.

4. Before dealing with the trade statistics above referred to, it will be useful to give the following extract from the Lahore Committee's Report, descriptive of the history of the Kalka Railway project and its prospects of success.

"In April 1866 the Vakíl of the Maháráj ah of Patiála intimated to Government a desire on the part of that State to construct, at its own expense, a line from Patiála to Kalka crossing the Delhi Railway at Rájpura.

"In reply, the Punjab Government expressed its willingness to receive, and favorably consider, any proposition of the Patiála State on the subject.

"In September of the same year the Deputy Consulting Engineer, Major Warrand, R.E., who had previously been in communication with the Maháráj ah's Agent, forwarded to Government a detailed scheme of the line, in which he proposed, amongst other things, that the survey of the proposed line should be carried out at once under the superintendence of Mr. W. C. Furnivall, District Engineer of the Delhi Railway. A rough estimate of the line was appended, which amounted to about £4,500 per mile, exclusive of the rolling stock and the pay of the Native Muharrirs employed. A further report from Major Warrand, in December 1866, informed Government that the line had been surveyed and marked out by Mr. Furnivall, as proposed, and another from the Agent of the Lieutenant-Governor, Cis-Sutlej States, in the early part of the following year, intimated that the Patiála State, after paying the expenses incurred in the survey, was not prepared to go any further with the project.

"This decision of the Maháráj a naturally put a stop to all further action on the part of Government.

"This branch, as at present surveyed, being part of the direct line from Patiála to Kalka, leaves the Delhi Railway near the village of Rajpura, passing by the villages of Rammr, Chuth, Manimájra, and Pinjór, to Kalka, being altogether about 34 miles in length. Should, however, Government ever undertake the construction of the line, it will be, as stated in Mr. Furnivall's report, a matter of consideration whether a direct line from Umballa would not be preferable. This latter would entail a second bridging of the Ghaggar river; at the same time this extra expense would be, in some measure, compensated by the saving in the cost of the bridge over the Sukhna Nullah."

Unreliable nature of the statistics on which the Lahore Committee based their estimate of probable earnings.

5. Referring to the statistics given in the appendices of their report, on which are based their estimate of probable revenue, the Committee say "they are very imperfect and perhaps not very reliable." However, for the purpose of arriving at an approximate estimate of what the goods traffic was likely to be, they accepted the "outside estimate" of the Deputy Commissioner (based on no sort of registry), amounting to 102,603 maunds, both up and down inclusive. It may be here noted, as an illustration of the growth of traffic, that the present trade returns on the Umballa and Kalka Road show an up and down traffic of 994,112 maunds annually, and there are good grounds for believing they are under estimated, and that a railway would get a much larger quantity to carry.

6. Under the head of Passenger receipts the Committee's report says—

Passenger receipts per mile estimated by Lahore Committee in 1868.

"Perhaps Rs. 1,500 per mile of open line is the utmost that could be hoped for from passenger traffic."

Passenger receipts based on present returns.

Here again, as might be expected, the estimate based on present traffic shows a much higher result, being Rs. 4,719 per open mile.

Comparative results of passenger and goods traffic.

7. For the purpose of comparing the results arrived at by the Lahore Committee in 1868 with those now estimated and based on actual registered traffic, the following comparative statement is given:—

How calculated.	Gross Receipts per Open Mile per annum.		
	Passenger.	Goods.	Miscellaneous.
	Rs.	Rs.	Rs.
As calculated by the Lahore Committee in 1868 for the Rájpura-Kalka line based on rough returns of traffic on the Umballa and Kalka Road. ...	1,500	235	75
As at present calculated from actual registered traffic returns of Financial Commissioner ...	4,319	5,178	Not taken into consideration.

Expansion of traffic.

8. From the above statement it will be seen how widely the results arrived at 16 years ago differ from those based on registered traffic of the present time, nor is it surprising that the Committee, from the unreliable statistics they had to work upon, should have arrived at an unfavorable conclusion regarding the financial prospects of a railway to Kalka.

Mr. Furnivall's estimate for the Rájpura-Kalka line.

9. Mr. Furnivall's detailed estimate for the Rájpura-Kalka line is not forthcoming, but from the report of the Lahore Committee it would appear that the probable cost per mile, exclusive of rolling stock, amounted to Rs. 86,500.

Approximate estimate for alternative line.

10. For the purpose of comparison with the detailed estimates of the Umballa and Kalka Railway, herewith submitted, an approximate estimate of probable cost of the alternative line *vid* Rájpura, amounting to Rs. 87,680 per mile, has also been prepared.

Prospect of direct line from Umballa to Chandigarh.

11. The history of the Rájpura project, being thus briefly recorded, we now pass on to the consideration of the prospects of a direct line from Umballa which, it will be remembered, both Mr. Furnivall and the Lahore Committee suggested for consideration.

Unreliable nature of the Financial Commissioner's traffic returns.

12. The Financial Commissioner's returns of traffic on the Umballa and Kalka Road (on which are mainly based the estimated earnings of the proposed railway) can only be accepted as approximately representing what the traffic really is. In the item of liquor alone they are conspicuously inaccurate as the following figures will show:—

Down traffic in Liquor from Kalka to Umballa.

As per Lálru returns.	As per Kalka returns.	Down traffic certified to by the two firms of Messrs. Meakin and Dyer for same period.
Maunds.	Maunds.	Maunds.
17,288	1,544	145,000

13. It would appear then from the foregoing statement, that two firms alone despatched liquor for Umballa *via* Kalka and Lálru to the extent of more than eight times the quantity shown in the returns of the latter station. The Kalka returns are even more inaccurate, and record only a ninety-fourth part of the brewery traffic. It may be mentioned that Messrs. Meakin and Dyer's returns of their down traffic may be accepted as perfectly accurate, having been communicated by those gentlemen themselves, in reply to an official application. The firm of Meakin and Company who are the larger exporters of liquors of the two, state that their down traffic during the current year will be "half as much again." It is evident, therefore, that registration of traffic on this line of road is not altogether reliable for the purpose of basing an estimate of the receipts likely to accrue to a line of railway.

14. The following abstracts of maundage are given for the purpose of showing the fluctuations in traffic at different seasons of the year :—

TABLE A.

Quarter.	Up.		Down.	
	Kalka.	Lálru.	Kalka.	Lálru.
	Mds.	Mds.	Mds.	Mds.
March	135,845	72,213	11,044	53,266
June	284,576	155,697	25,955	118,919
September	109,811	26,000	16,989	10,122
December	120,120	21,128	45,362	36,556
Total ...	550,622	278,038	102,350	219,163
Per Quarter ...	137,655	69,509	25,587	54,791

15. The traffic in jute, hides, leather, timber (in logs), &c., is excluded from the above table, as the maundage is not recorded in the returns forwarded by the Financial Commissioner.

The number and value, however, are given as follows :—

TABLE B.

During the year.	Up.		Down.	
	Lálru.	Kalka.	Lálru.	Kalka.
Number	16,739	9,691	20,416	48,863
Value in rupees	28,649	15,160	82,656	57,816
Value per Quarter ...	7,162	3,790	20,664	14,454

Taking each rupee in value as representing a maund in weight, the average quarterly traffic for all classes of goods enumerated in Appendix No. 6 will stand as follows :—

TABLE C.

Quarterly.	Up.		Down.	
	Lálru.	Kalka.	Lálru.	Kalka.
	Mds.	Mds.	Mds.	Mds.
As per Table A	69,509	137,655	54,791	25,587
Ditto B	7,162	3,790	20,664	14,454
Total Quarterly Traffic ...	76,671	141,544	75,455	40,041

16. In a preceding paragraph it has been shown how unreliable these traffic statistics are, and how considerably they fall short of the actual traffic in the single item of liquors alone, from which it may reasonably be inferred that other items of traffic have also been defectively registered. It is therefore impossible to arrive at anything like an accurate estimate of what the traffic receipts on the proposed Railway will be, but one thing is certain, namely, that they will largely exceed the result arrived at from calculations based on present traffic, however accurate those returns may be.

Unreliable nature of the traffic returns.

17. The Chief Engineer has decided that the Kalka returns are to be taken for the purpose of showing what the probable earnings of the line will be, but these statistics, however reliable for up traffic, are obviously unreliable for the down trade, being little more than one-half that registered at Lálru. Again, the returns of the latter station are deficient in one item alone by over 100,000 maunds.

The Chief Engineer's orders with reference to traffic returns.

18. However, taking the Kalka returns for up traffic, and supplying the omission shown in paragraph 13 of the Lálru returns for down traffic, we have the following result on which an approximate estimate of earnings in goods traffic may be based :—

Data for estimate of goods traffic.

	Mds.
Annual Up traffic	564,580
„ Down traffic	429,532
Total ...	994,112

19. Assuming the rate for this quantity of goods to be one pie per maund per mile the gross goods receipts per mile under this head, amount to Rs. 6,178.

Gross goods receipts per mile.

20. As the gradients on the Upper Section of the proposed railway are steep, it is necessary to assume somewhat higher average rate per maund per mile for the carriage of goods than that obtaining on the Sind, Punjab and Delhi and other trunk lines, but it is considerably lower than the actual rates charged at present from Umballa to Kalka by the Government Bullock Train and Native Carriers as the following statement will show :—

Rates for carriage of goods.

	Rs.	A.	P.
Government bullock train rate per maund from Umballa to Kalka	0	9	6
Country cart-rate during the dry weather and slack season ...	0	4	6
Ditto during the rainy weather and busy season, *viz.*, 15th March till 15th November	0	8	0
Proposed rate—			
By Railway	0	3	0

21. *Estimate of Passenger Traffic.*—The following table shows concisely the total passenger traffic both Up and Down during each quarter of the year :—

Period.	Up.		Down.	
	Lálru.	Kalka.	Lálru.	Kalka.
March quarter	21,887	29,107	14,994	18,148
June „	30,874	36,712	19,308	19,482
Sept. „	5,545	5,643	6,638	10,123
Dec. „	10,039	11,781	24,866	36,001
Total ...	68,345	83,243	65,808	83,748
Quarterly Average ...	17,086	20,811	16,452	20,937

22. The results are low for an important line of communication like the Umballa and Kalka Road, and are probably under-estimated. However, taking the passenger traffic as registered at Kalka as representing approximately the number that would be carried by the Railway, for certain, we arrive at the following result:—

	Rs.
Up passenger traffic per annum	83,243
Down ditto ditto	83,748
Total ...	1,66,991

Gross earnings per mile for 3rd class passenger traffic.

23. Taking the above number of passengers as travelling over each mile of railway per annum, and assuming the rate per 3rd class passenger per mile to be four pies on a line of this nature, the gross earnings per mile under this head will be Rs. 3,479.

The following statement will show how the rate assumed for 3rd class passengers traffic from Umballa to Kalka compares with that now charged by Government Bullock Train and Ekkas.

	Rs.	A.	P.
1 seat in an Ekka from Umballa to Kalka during dry weather and slack season	0	13	0
1 seat in an Ekka from Umballa to Kalka during rains and opening and close of Simla season	1	10	0
Government Bullock Train rate	1	12	0
Proposed rate by railway	0	11	9

Gross earnings per mile for 1st and 2nd class passenger traffic.

24. The probable receipts per mile for 1st and 2nd class passenger traffic and carriage of mails are approximately arrived at from information received from the Postal Department of the number of mail ordinary and express carriages despatched during the year ending 31st October 1883 from Umballa to Kalka and *vice versâ*, and amount at railway rates to Rs. 840 per mile.

Military transport.

25. Military transport costs approximately at present (*vide* paragraph 37) Rs. 21,536 per annum, the receipts under this head, making allowance for decreased cost by railway, may fairly be assumed at Rs. 500 per mile per annum.

Total gross earnings per mile.

26. The total gross earnings per mile based on existing traffic may therefore be taken approximately as follows:—

	Rs.	A.	P.
Goods	5,178	0	0
3rd class passenger	3,479	0	0
1st and 2nd class passenger parcels and mails ...	840	0	0
Military transport	500	0	0

Net earnings per mile and percentage on Capital outlay.

27. Deducting from the above amount 60 per cent. for working expenses, the net earnings per mile amount to Rs. 3,999, representing a return of 4·39 per cent. on the Capital outlay including both direct and indirect charges, or 4·79 per cent. if direct charges alone are taken into consideration. This result, it will be borne in mind, is based on existing traffic; future expansion of trade has not been taken into consideration, although a liberal allowance might reasonably be made for such a contingency. The Consulting Engineer to the Government of India, basing his opinion on the recorded increase in traffic on the Umballa and Kalka Road within the last 15 years, arrives at the conclusion that with the increased facilities for transit afforded by a railway and bridging the Ghaggar river the traffic would be more than doubled.

Resolution of Government of India with reference to population and revenue per square mile.

28. In Resolution No. 1054 of the Government of India, dated 3rd December 1867, on extension of railways in India, it is stated that in order to provide a reliable standard in estimating the probable prospects of a railway, it will be useful to supply a statement of the average population and revenue per square mile of the portion of each district traversed by it. This statement is given in Appendix No. 24.

Actual receipts on neighbouring lines.

29. The Resolution goes on to say "so far as it is possible from these data, and by the help of the actual receipts on neighbouring lines in existence, an estimate should be formed of the probable income of the proposed railway; such an estimate will commonly be more trustworthy than one based on any attempt to register the traffic."

Passenger and goods traffic at stations on the Sind, Punjab and Delhi Railway.

30. Appendix No. 11 is an abstract from the returns of the Sind, Punjab and Delhi Railway for the year ending 31st December 1880, and shows fully and accurately the passenger and goods traffic, both outwards and inwards, at each of the stations in the vicinity of Umballa.

Principal articles of export and import.

31. Appendix No. 10 gives the description and quantity of principal articles of export and import at each of those stations, and Appendix No. 9 shows the expansion of the traffic within the last seven years.

Summary of working for Sind, Punjab and Delhi Railway during 1880.

32. It may be useful to give the following summary of general results on the year's working of the Sind, Punjab and Delhi Railway, deduced from the Revenue Account Review for 1880:—

	Rs.
Gross earnings per mile (goods)	9,399
Ditto ditto (passengers)	7,333
Total ...	16,732
Percentage of expenses to earnings	52
Ditto of profits on paid up capital	3·98
Ditto of profits on cost per mile of railway	5·28
Cost per mile of open line	1,52,140

Comparison of above results with those calculated for the proposed railway from Umballa to Chandigurh.

33. For comparing the above actual results on "neighbouring lines in existence" with those calculated for the proposed railway, based on existing traffic statistics, the following statement is given:—

Name of Railway.	Gross earnings per mile annually. Goods.	Gross earnings per mile annually. Passengers.	Percentage of expenses to earnings.	Percentage of profits on paid up Capital.	Percentage of profits on cost of Railway.	Cost of Railway per mile.	Remarks.
	Rs.	Rs.				Rs.	
Sind, Punjab and Delhi Railway.	9,399	7,333	52	3·98	5·28	1,52,140	Compiled from actual returns for 1880.
Proposed Umballa and Kalka Railway.	5,178	4,319	60	...	4·39	90,847	Goods and passenger receipts are based on existing traffic statistics.

Conclusions arrived at.

34. Judging, therefore, from these comparative results, the following conclusions are arrived at:—

1st.—That the calculated gross earnings per mile of the proposed railway, based on existing traffic statistics, are misleading, and far below what the actual earnings are likely to be.

2nd.—That a calculated return of 4·39 per cent. on a capital outlay per mile of Rs. 90,847 is low in comparison with the actual results on a neighbouring line of 5·28 per cent. on a cost of over Rs. 1,52,000 per mile.

Length of proposed line in British, Patiála, and Kalsia territories, respectively.

35. *Population and Revenue per square mile.*—The length of the proposed railway from Umballa City to Kalka is 35¼ miles, of which 15 miles are in British territory, 13 miles 5 furlongs in Patiála, and 6 miles 7 furlongs in Kalsia. The population and revenue statistics will be found in Appendix No. 7, but the following summary may be convenient for ready reference and comparison:—

Territory.	Area in square miles.	Population per square mile.	Revenue per square mile.	Revenue per head of population.
British (Umballa District)	2,570	411	427	1·04
Patiála	7,500	196	630	3·22
Kalsia	150	450	1,090	2·42
British (Simla District)	67	637	2,150	3·37
Municipality (Simla)	6	2,171	26,110	12

Prospects of local traffic and other considerations.

36. Although the success of the proposed railway will mainly depend on through traffic between the Umballa Railway Station and the hills, and *vice versâ*, yet it will be seen from the above table that the prospects of local traffic, viewed from the population and revenue per square mile of the districts traversed, are encouraging. It has been shown beyond doubt that the line will, even in the beginning of its career, prove amply remunerative, and there are reasonable grounds for believing that traffic will rapidly increase when railway communication is provided. Clearly, then, as the commercial view of the project is sufficiently promising, other important considerations, admitted by all, of imperial utility and convenience to the public, should tend to a decision in favor of constructing the line, and thus, by reducing the road journey by 38 miles and bridging the Ghaggar river, render Simla and the outlying Cantonments of Kasauli, Dagshai, Sabathu, Solon and Jutogh more accessible. From information received from the Post Master General, Punjab, it has been ascertained that the cost of the Mail Cart Passenger Service and Bullock Train establishment between Umballa and Kalka amounts to Rs. 94,344 annually. The construction of the railway would, of course, under the maintenance of this costly establishment, no longer be necessary and the Mail Service would be much accelerated. A large saving would also accrue to the Public Works Department in the mainfenance of the Umballa and Kalka Road now reported to cost a sum of Rs. 30,000 a year. A railway from Umballa to Kalka would also facilitate the movement of troops and enable Government to locate more men in the hills during the hot season, this in itself is an important consideration and it may be here mentioned as enhancing the value of the project herewith submitted, that the feasibility of extending the railway system to Simla and all outlying Cantonments has been satisfactorily established.

Number of troops and cost of transport.

37. A return of the number of troops of all arms stationed at Simla and outlying Cantonments on the 30th June 1881 is given in Appendix No. 15, and the following statement communicated by the Commissary-General to Government of India shows the cost of transport of troops and stores between Umballa Cantonment and Kalka during 1878-79 :—

Transport of	By Tonga or Government Bullock Train.			By Carriage supplied by the Commissariat Department.			Total.		
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.
Officers	3,992	9	0	248	9	10	4,241	2	10
Soldiers	6,236	12	0	3,103	12	0	9,340	8	0
Clerks in Military Department	2,023	13	0	...	...	...	2,023	13	0
Stores	4,490	14	0	1,440	3	6	5,931	1	6
Total ...	...	...	...	...	...	...	21,536	9	4

T. B. MORRIS, M. Inst., C.E.,
Executive Engineer,
Umballa and Kalka Railway, Survey Division.

PART II.

Engineering.

Revised project.

1. The project herewith submitted has been carefully revised and the rates thoroughly reconsidered in compliance with orders contained in Secretary to Government of India's letter No. 665 R.C., dated 26th July 1883, and in accordance with Mr. Molesworth's note on the original project submitted by the Government of the Punjab in September 1882.

Saving of over 14 lakhs of rupees.

2. The modifications proposed by the Consulting Engineer chiefly affect the Ghaggar river and Jhajra Nulla bridge designs; also the ruling gradient between Chandigarh and Kalka which is now 1 in 40 instead of 1 in 45, as originally proposed. These modifications, together with the reduction in earthwork rates on the upper section (owing to reduced height of embankment) result in an estimated saving of nearly fourteen lakhs of rupees.

Description of line finally staked out.

3. The line therefore finally staked out, and to which the detailed plans and estimates herewith submitted refer, commences by a junction with the Sind, Punjab and Delhi Railway near the Umballa City Station, and terminates at Kalka. Length 35¼ miles.

Difference of level.

4. It will convey some idea of the nature of the country through which the proposed railway will pass to mention that the difference of level between Umballa and Chandigarh, a distance of 27 miles 3 furlongs, is 429 feet, whilst between the latter place and Kalka, a distance of only 8·61 miles by the proposed railway, there is a difference of 852 feet. The gradients therefore on the latter section are of course steep, and will entail extra working expenses.

Extracts from Mr. Furnivall's report on the line surveyed by him in 1867.

5. Before entering into a detailed description of the present project it will be useful to quote from Mr. Furnivall's report on the line surveyed by him in 1867 from Rájpura to Kalka. This line is shown on the Index Map accompanying the project, and described as alternative line No. 1. It is also indicated on the sketch map attached to this report.

Mr. Furnivall says—

"The line leaves the Delhi Railway station at Rájpura with a curve of 40 chains radius, and proceeds to Bannúr, which at one time was a place of considerable importance, but is at present much dilapidated, not more than half the number of houses being inhabited. The Patiála nullah is again crossed near Bannúr where a bridge would be required of three 30 feet spans.

"The average gradients of this section are given in five lengths, in order to show the different points where the inclination of the country changes. From Bannúr the first rise towards the hills becomes apparent. Up to the Sukhna Nullah, the average rise is 1 in 420 from Bannúr. The Sukhna Nullah is a hill torrent which takes its rise in the Sewalik range near Mani-Májra; the bed is composed of sand with occasional boulders of small size and coarse gravel; the fall in the bed of the stream is nearly 20 feet per mile. The stream is, of course, a rapid one, although never very deep, not exceeding 5 or 6 feet. It was estimated that a bridge of three 75 feet openings with foundations on wells, and protective works, such as training banks and spurs would be required. The Sukhna Nullah discharges itself into the river Ghaggar near the village of Bassi.

"A short distance beyond the Sukhna the Chouk Nullah is crossed; a stream with a bed consisting of boulders; a bridge of 75 feet span would be here required.

"At 21 miles 40 chains the large village of Mani-Májra is situated, about a mile to the north-west of the line of survey. Between the Chouk Nullah and the Kassullia Nullah no drainage of importance is met with.

"The object of estimating the cost of the line of railway in a section from Rájpura to the Kassullia Nullah was that the Kassulia Nullah is the point at which the really heavy gradients commence, so that, were it deemed advisable that the line should be constructed from Rájpura to that point only, the estimated cost would be known.

"It was proposed to put two stations *en route*, one at Bannúr and one at Mani-Májra, besides that at Kassullia Nullah.

Section Kassullia Nullah to Kalka.

"From the appearence on plan, a conclusion would be drawn that it would be better to avoid crossing the Kassullia Nullah at all in order to reach Kalka; that the best route would be round the right bank; but this is not the case. The river is a hill torrent with a great declivity of bed, falling about 100 feet in a mile. The direct course of the stream impinges on the Siwálik Range, almost in a perpendicular direction, and cuts away portions of the hill at every flood, so that a precipice of from 50 to 100 feet in height is formed, which would necessitate either protective works of considerable magnitude or a tunnel into the hill side, either of which plans would cost more than bridging the line twice. In order to decrease, as much as possible, the gradients, the right bank of the river was followed for some distance up to the 30th mile, where a fair place for a bridge was found. The bed of the stream is entirely of boulders, some of which are of large size. The river is again crossed 33 miles from Rájpura. The estimated amount of water-way required is 160 feet in each bridge. The gradients of this section are very heavy, being on an average 1 in 40 for 6½ miles, the heaviest being 1 in 27, and the lightest 1 in 99."

Apparent insufficiency of water-way provided for in the 1867 estimate.

6. The experience of recent years on the Sind, Punjab and Delhi Railway, and the conclusions arrived at from actual inspection of the line of country between Rájpura and Chandigarh, tend to show that the bridging, generally, both major and minor, indicated on the original plans and sections of this line prepared in 1867, is inadequate in point of water-way, but especially so in the case of the most important line of drainage crossed, *i.e.*, the Sukhna at 19 miles 3 furlongs.

Declivity and velocity.

7. From levels and measurements recently taken it has been ascertained that the declivity in the bed of the stream above and below the crossing is 17·45 feet per mile, and the calculated velocity in flood is 11 feet per second.

8. The most reliable flood level of the Sukhna recently taken is that indicated on cross section No. 4, two miles below the crossing selected by Mr. Furnivall. The natural water-way in flood is here 3059 square feet, and the mean velocity due to declivity of bed 10·8 feet per second; the discharge is therefore, 3059 × 10·8 = 33,337 cubic feet. Mr. Furnivall proposes to pass this flood through three openings of 75 feet.

Flood level and discharge.

9. The rise of water above ordinary flood level, caused by this obstruction, would be 8·36 feet, and the velocity through the openings 27 feet per second.

Rise of water and velocity due to obstruction. Drainage area and water-way.

The river should therefore be bridged from bank to bank, as the natural velocity is too great to admit of any contraction of the water-way. The drainage area of the Sukhna is about 75 square miles.

10. Cross section No. 4, two miles below Mr. Furnivall's crossing, is a better site for a bridge, the banks being steep, well wooded, and the flood level clearly defined. To bridge this place from bank to bank would require nine spans of 60 feet.

Suggested site for bridge.

11. The line recommended by the Consulting Engineer in his memorandum already referred to is the green dotted one marked A A on accompanying Index Map. It is practically the same, as far as Chandigarh, as that surveyed by Mr. Furnivall in 1867 except, perhaps at Bannúr, 9 miles from Rájpurah, where it keeps more to the north-west and between two and three miles away from the town.

Line proposed by Consulting Engineer.

12. Bannúr is in Patiálá territory, and a place of some importance even now, containing, according to the last census returns, 6671 inhabitants. There are good fruit gardens in the neighbourhood, and carpet weaving is carried on.

Description of Bannúr.

13. The approximate cost per mile of the line suggested by the Consulting Engineer would be about the same as that laid out by Mr. Furnivall, *viz.*, Rs. 87,833.

Cost per mile of Consulting Engineer's line.

14. The second alternative line is that starting from Sembho, a station on the Sind, Punjab and Delhi Railway, about midway between Umballa city and Rájpura, indicated on accompanying Index Map in red, and marked alternative line No. 2. The Sembho junction was advocated by the Chief Engineer, Sind, Punjab and Delhi Railway in a letter addressed to the Agent, dated 12th May 1880, copy of which was forwarded by the latter officer to the Secretary to Government, Punjab, Public Works Department.

Alternative line No. 2 from Sembho.

The Chief Engineer says—

"If the junction of the proposed railway with our line is to be east of the Ghaggar, I agree with you in the opinion that the line marked A A (springing from Umballa Cantonment) is the best, subject to the provision that it must not interfere with our stores yard. I would suggest (as a route which might be tried) a line running from Sembho, leaving Bannúr about 3 miles to the east, and thence curving gradually round for the Kalka gap. It appears to me likely that this line would encounter less difficulty in flood time than any other."

15. Little can be urged in favor of this line over that *viâ* Rájpura, except perhaps that it would be more direct for the Calcutta side. In the absence of the necessary surveys, its cost cannot be estimated with accuracy, but there is no reason to believe it would be less expensive than the Rájpura route, as it crosses a good deal of drainage, and its length to Chandigurh is the same from the point of junction. The Sukhna crossing is common to both.

Cost of Sembho line per mile would probably be the same as that *viâ* Rájpura.

16. The opinion expressed by the Chief Engineer of the Sind, Punjab and Delhi Railway in his memorandum just quoted, as to this line been likely to encounter "less difficulty in flood time than any other," would be a strong argument in its favor, but unfortunately there are some grounds for doubt on this point, as the embankments of such a line would naturally intercept some of the drainage that now flows freely into the Ghaggar, possibly causing damage, not only to the proposed line, but to the Sind, Punjab and Delhi Railway as well.

Objections to the Sembho line.

17. In forwarding instructions to Mr. Wallis, Executive Engineer, with reference to the line of country he wished that officer to examine, the Secretary to Government, Punjab, Public Works Department, in his No. 1714, dated the 8th April 1880, remarks—

Orders of the Chief Engineer to Mr. Wallis.

"An intimate acquaintance with the drainage lines of the Umballa District enables the Chief Engineer to say that the whole country on the right bank of the Ghaggar River is subject to the spill from which the left bank is free.

"There is, besides, a very large amount of drainage drawn into the Ghaggar on that side. At present, as this is unchecked, it is not remarked; but should a bank be formed, this flow will be intercepted, massed, and become dangerous. It will then have to be let through the bank of the proposed railway, or the Sind, Punjab and Delhi Railway bank, or a mixture of both, and the Chief Engineer believes this will cost quite as much as a new Ghaggar bridge.

"If a good route or line cannot be found between the Ghaggar and Tángri, the Chief Engineer would recommend a line from Rájpura, on the Sind, Punjab and Delhi Railway *viâ* Bannúr, Mani-Majra to Pinjore, which line would keep tolerably close to the watershed, and be popular with the Patiála officials. This line has, it is believed, been already surveyed in 1868, and endeavour is being made to get at plans," &c.

18. A line starting from Sembho would traverse pretty closely the route surveyed by Mr. Clarkson in 1875 for a new road. The following extracts from that officer's report confirm the conclusion arrived at by the Chief Engineer as to the liability of the country on the right bank of the Ghaggar to flooding.

Line of road surveyed by Mr. Clarkson. Extract from his report.

Mr. Clarkson says—

"Up to this point (Khannúr) the whole country through which the line runs is more or less seriously affected by the extreme floods of the Ghaggar.

"The ruling consideration in the selection of the line for the first 13 miles has been how best to avoid the maximum floods of the Ghaggar which, as appears from the information gathered at numerous points, must cover nearly the whole of the first seven miles of the line of the present Bannúr road, and for about half that length to a depth of five feet and upwards.

"The highest recorded flood is that of 1871 which at the Railway bridge reached a level of 5½ feet higher than any subsequent one. *This flood extended in one continuous sheet for 4½ miles along the railway* (i.e., 1½ *mile east of the Ghaggar bridge and 3 miles west of it.*)"

19. Although the Sembho route might be so aligned as to keep clear of some of the flooded land referred to in the above extracts, yet, on the whole, it would be a difficult and expensive line to deal with, so far as drainage is concerned. Apart from engineering difficulties, other objections exist, inasmuch as there is no direct communication between Patiála and Sembho. This in itself is a strong point against the line and worthy of consideration in the interests of the Patiála State, through which territory a portion of the line would pass, whether the junction be at Rájpura, Sembho or Umballa.

Other objections to the line with reference to the Patiála State.

20. The following extracts from a letter by Lála Nának Bakhsh, Patiála, to the Secretary to Government, Punjab, Civil Department, dated 25th February 1880, is herein given as evidence of the views of the officials of that State with reference to the point of junction of the proposed line to Kalka with the Sind, Punjab and Delhi Railway:—

Extract from letter of Lála Nának Bakhsh, Patiála.

"I am desired by the State officials to represent as follows in connection with the proposed construction of the railway line from Umballa to Kalka.

"If it is contemplated to commence the line from Umballa City and Cantonment, and extending it to Kalka, crossing the Ghaggar river, well and good; but if it is proposed to commence it from any intermediate small station like Sembho, between Rájpura and Umballa, I am to beg in that case that Rájpura may be preferred for commencing the line to any other small station."

21. The direct route *viâ* Umballa (for which detailed plans and estimates are herewith submitted) has the following distinct advantages over the Rájpura line, *viz.*,—

Arguments in favor of the direct line from Umballa.

(*a*) It is shorter by 13 miles for down country traffic.

(*b*) It follows the established route and thus secures the main traffic as well as that now drawn to the metalled road from the east and west.

(*c*) It passes through a more thickly populated district, and would accommodate more important towns.

(*d*) It affords more direct communication between Umballa and the foot of the hills, an important consideration from a military point of view.

(*e*) It runs alongside a bridged and metalled road, which would tend materially to the speedy and economical construction of the line, and admit of its being opened for traffic, section by section, if found desirable.

(*f*) It traverses a country the drainage lines of which are more clearly defined and more easily dealt with.

22. As regards traffic there is every probability that if the junction for a railway to Kalka were placed at Rájpura instead of at Umballa that country carts and ekkas would continue to ply along the present Umballa and Kalka Road and carry goods and passengers at lower rates over the 38 miles than would be possible on a circuitous railway route of over 53 miles. On the other hand, it is tolerably certain that the direct line from Umballa would absorb nearly all the present road traffic.

Arguments against Rájpura line.

23. The Ghaggar crossing has always been looked upon as the strong point against the direct line from Umballa to Kalka, and for the sole purpose of avoiding it, other lines (such as those from Rájpura and Sembho) have from time to time been proposed when railway communication between Umballa and the hills has come under consideration.

The Ghaggar crossing safer than the Sukhna.

It is not at all certain, however, that by avoiding the Ghaggar and crossing the Sukhna instead, a better line from an engineering point of view can be had. There is no doubt the Sukhna at first sight appears a much easier river to bridge than the other, but further consideration will show that the advantages in favor of the former are more apparent than real. The velocity of the Sukhna has already been discussed. It amounts, even in its natural state, and at the best site for a bridge, to nearly 11 feet per second. Even bridging this place from bank to bank, as the rough estimate now made provides for, a certain amount of obstruction is inevitable owing to the piers, which would increase the velocity to a point difficult, if not impossible, to deal with. On the other hand, the Ghaggar has a natural mean velocity of only 5·73 feet a second, and even when bridged, the velocity through the openings will be considerably less than that of the Sukhna, flowing in an unobstructed channel. The conclusion, therefore, is sufficiently obvious, that of the two rivers, the Ghaggar, although involving a much longer bridge, is far the safer crossing owing to its being less liable to scour.

24. On the whole, therefore, the arguments of the case are strongly in favor of the direct line from Umballa as laid out, and for which plans and estimates are herewith submitted.

On the whole the arguments are in favor of the line from Umballa.

25. Although the direction and levels of the proposed line are fully indicated on the accompanying plans and sections, and all necessary information with reference to water-way, curves, gradients, &c., supplied in prescribed Forms A to M, yet a general description of the alignment, together with some remarks on other incidental matters, are also required, in order to convey a clearer idea of the nature of the project and the grounds on which are based the Ghaggar bridge designs.

General description of the alignment, curves, gradients, &c.

26. The proposed railway commences by a junction with the Sind, Punjab and Delhi Railway at a point 700 yards, or thereabouts, to the north-west of the Umballa City Station, then diverges, in a northerly direction, by a curve of 3,000 feet radius, on an ascending gradients of 1 in 1032, through cultivated ground, until it reaches the Grand Trunk Road to Lahore which is crossed on the level.

27. About ¼ of a mile from the junction, the unmetalled road leading to Patiála is met with, whilst about four furlongs further on, two other unmetalled roads are crossed. For these three roads two 2nd class level crossings, with gatekeepers' huts, are provided. The Sultánpur road will be diverted.

28. Between the junction and Grand Trunk Road, a distance of 1 mile 1½ furlongs, the line is in about 8 feet of embankment—accumulation of surface drainage is guarded against by culverts and drains aggregating 33 lineal feet of water-way.

29. A 1st class level crossing, in accordance with Drawing No. 18, is provided for the Grand Trunk Road, the level of which is unaltered.

30. Passing the Grand Trunk Road, the line continues by easy gradients in 8 feet embankment, through cultivated land, as far as 2 miles 3 furlongs, where it curves slightly to the north, close to the villages of Lehgarh, Dangehrie and Sádánpur, for which cattle crossings are provided.

31. A minor stream is crossed at 3 miles 6½ furlongs, for which one span of 30 feet (plate girders) is provided, Drawing No. 1. This drainage passes the road at present by a culvert consisting of 3 spans of 8 feet. The same stream is again crossed a little further on, but the necessity for bridging it is avoided by making a short diversion of the channel. Near this point, the direct road (unmetalled) from Umballa city joins the Trunk Road (from Cantonments to Kalka).

32. The alignment continues in embankment and easy gradient on the western side of the metalled road and parallel to it until it reaches the 7th mile, where it is proposed to place a third class station for Lálru close to the serai and encamping-ground.

33. The Choa Nullah is crossed at 4 miles 5 furlongs by a plate girder bridge, Drawing No. 2, consisting of 3 spans of 20 feet. The water-way provided for this stream on the metalled road close by is only half of this, an allowance insufficient for the railway, owing to the position of the embankment. A 2nd class Level Crossing, with Gatekeeper's hut, is provided at the 5th mile.

34. Beyond the station the line curves slightly to the east and then takes a straight course on a gradient of 1 in 500 to the 8th mile, where it skirts the town of Lálru, passing between it and the metalled road. A 2nd class Level Crossing with Gatekeeper's hut, is provided opposite the Lálru encamping-ground, and affords access between the town and Trunk Road.

35. Lálru is in Patiála territory, and contains 7,011 inhabitants. A little to the east of the road near the 12th mile from Umballa Cantonments, there is a Public Works rest-house.

36. Beyond the 8th mile, the course sweeps more to the west by a curve of 1800 feet radius and crosses the Lálru Nullah at 8 miles 6½ furlongs by a bridge of 4 spans of 30 feet plate girder (Drawing No. 4).

37. This stream has a calculated ordinary flood discharge at the centre line cross section of 2652 cubic feet and a velocity of 5·85 feet per second. The bridge is designed to discharge to cut-water level, an assumed extraordinary flood, rising 2 feet higher than that recorded on the cross sections, with a velocity of 7·11 feet per second. The bottom of the girders are placed 5 feet clear of such a flood. The present road bridge about 100 yards above the proposed railway bridge has three openings of 33 feet.

Lálru Nullah bridge.

38. From the Lálru Nullah the line rises by a gradient of 1 in 500 and continues in a direction parallel to the Trunk Road (and close to it) to Bassi, a town in the Kalsia State, containing 4,917 inhabitants. The steepest gradient in this section is 1 in 250. A second class Level Crossing is provided at 12 miles 6 furlongs to meet the requirements of the villages in the neighbourhood.

Description of alignment continued.

39. A little unavoidable broken ground is crossed near the village of Mukarpur on the 15th mile, for which a single span of 30 feet plate girder and a 10 feet culvert are provided. The same drainage is passed under the Trunk Road, about ½ a mile higher up, by two spans of 10 feet. Gradients easy throughout.

40. A Level Crossing (2nd class) with Gatekeeper's hut, is provided at 15 miles 3 furlongs, or thereabouts, for the Bassi and Banúr Road.

41. At 15 miles 5 furlongs the Bassi Nullah is crossed. This stream rises in the ridge to the east of Chandigarh and flows into the Ghaggar opposite the town of Chuth. About a mile above its junction with the main stream, it is joined by the Dhabi, which also helps to drain the ridge referred to, and is crossed by the proposed railway at the 16th mile.

Bassi Nullah bridge.

42. For each of the above streams, a single span of 40 feet (plate girders) is provided (Drawing No. 7). The existing bridges through which the Bassi and Dhabi waters pass the Trunk Road about ½ a mile higher up have respectively 2 spans of 12 feet and one of 30 feet, the stream having the greater discharge being provided with the smaller water-way.

Bridge provided for the Bassi and Dhabi Streams.

43. Of the two, the Bassi branch has by far the larger discharge, amounting to 2394 cubic feet, with a velocity of 4·23 feet per second. It has not been considered advisable, however, to provide less water-way for the Dhabi, although perhaps less might suffice, but the saving would be insignificant and unadvisable. A 40 feet span, as designed for these streams, will discharge a flood of 2956 cubic feet, with a velocity of 7·39 feet per second, and leave a clear space of 8 feet between the bottom of the girders and the surface of the water.

Discharge of the Bassi and Dhabi. Alternative design for the Bassi.

44. At 16½ miles, on the high ground between the Dhabi Nullah and the left bank of the Ghaggar river, the Mubárakpur Station is placed, close to the encamping-ground, about ¾ of a mile to the south-west of the village of the same name and a mile to the north of the town of Bassi.

Description of alignment continued. Position of Mubárakpur Station.

45. Mubárakpur is situated on the left bank of the Ghaggar, and contains, according to the last census returns, about 2500 inhabitants. There is a Public Works Department rest-house on the opposite side of the road; also a supply house and thánnah.

Population of Mubárakpur, &c.

46. At 16 miles 6½ furlongs the alignment bends more to the north by a curve of 3000 feet radius and 1295 feet in length, then crosses the Ghaggar on the straight in a direction parallel to the present road and about ½ a mile lower down the river.

Description of alignment continued.

47. It is proposed to bridge the Ghaggar by fifteen spans of 60 feet for the main channel and three spans of 30 feet for the minor stream on the right bank (*vide* Drawings Nos. 8 and 9).

The intervening space across the island, between the main and minor channels, will be embanked and pitched with boulders to 2 feet above highest known flood level.

48. Should the line be constructed, it will probably be found better to change the site of the bridge, as indicated on accompanying plan, to a point higher up-stream, near the present road crossing, where the main channel of the river is more clearly defined, and the ground between it and the smaller stream, on the right bank, higher, less sandy, and less liable to be overtopped by floods. Tradition has it, however, that this ground was under water 40 years ago; but whether this be true or otherwise, it is now covered with grass and patches of cultivation, and bears no evidence of recent submersion.

Bridge site would be better higher up-stream, main road crossing.

49. The change in alignment suggested in the foregoing paragraph, although in no way affecting the estimate, would, it must be mentioned, interfere with the present encamping-ground of Mubárakpur, and thereby necessitate its being abandoned and another site substituted if required. This would be a matter of no difficulty, as there is ample space for the purpose between the proposed railway and the present line of road.

The new alignment would interfere with the encamping-ground.

50. The question of the Ghaggar river discharge will be dealt with further on; also the main considerations affecting the design and water-way. Meanwhile the description of alignment may be continued.

Ghaggar river discharge and bridge design.

51. Having crossed the Ghaggar, the line continues in embankment, on the level past the villages of Nugla and Gházipur, crossing the unmetalled road leading to Chuth and Bannúr, at 18 miles 1 furlong, where a 2nd class Level Crossing is provided. At the 19th mile the Trunk Road is intersected by the alignment, and will be diverted as indicated on the plan. From mile 13¼ to 18¾ the formation level of the proposed railway will be horizontal.

Description of alignment continued.

52. The course continues in a direction nearly due north to the 21st mile, and then bends eastward by a curve of 3000 feet radius and 2270 feet in length, on a gradient of 1 in 141. The unmetalled road leading from the Trunk Road to Mani-Májra is intersected at mile 21, and is provided for by a 2nd class Level Crossing with Gatekeeper's hut.

53. In the 23rd mile the alignment again sweeps to the north by a short curve of 2500 feet radius, on a gradient of 1 in 100, in 18 feet of embankment, and crosses another unmetalled road leading to Mani-Májra at the 24th mile, for which a 2nd class Level Crossing is required. Mani-Májra is a town in British territory containing, according to the recent census returns, about 5000 inhabitants. It lies about 2 miles to the west of the line and 4 miles from Chandigurh.

Position of Mani-Májra and population.

54. In the 25th mile the Choa Nullah, draining a portion of the eastern slope of the Siwálik Range, is crossed twice, for which two bridges with 40 lineal feet of water-way each are provided (*vide* Drawing No. 12). The stream has only a small drainage area, not exceeding 2 square miles, but the velocity is too great to admit of the natural water-way being contracted. The nullah is again crossed in the 26th mile, but will be diverted as indicated on plan.

Description of alignment continued. Choa Nullah.

55. The line continues in embankment on a gradient of 1 in 100 (and straight) to Chandigurh, running parallel to the Trunk Road, and about 200 yards to the west of it.

56. Chandigarh is reached at the 27th mile. The station will occupy the site of the present encamping-ground adjoining the village. It is proposed to provide a 3rd class Station for this place (*vide* Drawings No. 36 and 38). Mr. Molesworth in his note on the original project suggests that the station should be level instead of on a gradient of 1 in 500. This has been provided for.

Class of Station at Chandigarh.

57. Chandigarh is a village in British territory containing 1000 inhabitants. It lies between the Siwálik Range and right bank of the Ghaggar, and contains a thánah, supply-house and road bungalow. It is 81 miles from Umballa Cantonment by road and 7 miles from Kalka.

Position of Chandigarh and number of inhabitants.

58. Above Chandigarh the alignment bends slightly to the west crossing the Umballa-Kalka road twice in the 32nd mile. This double crossing is unavoidable and necessitates a road diversion about a mile and a quarter in length.

Road Diversion.

59. In the 29th mile the course sweeps more to the north-west striking along the right bank of the Jhajra Nullah which is crossed at 30 miles 2 furlongs by a bridge of two spans, triangulated girders, 90th on the square, *vide* Drawing Nos. 15, 16 and 16A.

Jhajra Nullah bridge, lower crossings.

60. Having crossed the Jhajra on the level the line curves slightly westward on a gradient of 1 in 40 for about half a mile, the ascent is then eased to 1 in 54·5.

Gradient of 1 in 40.

61. At 31 miles 1 furlong the alignment is carried close to the village of Manikpur then ascends in a north-easterly course on a gradient of 1 in 41·5 for two miles and three quarters. The Umballa and Kalka road is crossed at the 33rd mile and will be diverted as shown on plan.

Gradient of 1 in 41·5 Division of Umballa and Kalka Road.

62. The Jhajra Nullah is crossed a second time at 33 miles 7 furlongs by a plate girder bridge of two spans of 52 feet on the square (*vide* Drawing No. 18). The water-way provided for these bridges will be discussed further on in this report.

Jhajra Nullah bridge, upper crossing.

63. From the upper crossing of the Jhajra the alignment is carried on a gradient of 1 in 40 by two reverse curves of 1320 feet radius respectively (with an intervening length of straight of about 350 yards) as far as Kalka crossing the metalled road three times. The road will be diverted as shown on plan and a 1st class Level Crossing provided at the 35th mile.

Gradient from Jhajra Nullah to Kalka, Diversion Umballa and Kalka Road.

64. A second class station together with Engine-shed, Goods-shed, &c., are provided for at Kalka (*vide* Drawings Nos. 35, 37, 39 and 41).

Class of Station.

65. The Kalka Station is level for 2500 feet and located in a convenient position below the encamping-ground in accordance with the proposals made by Mr. Molesworth in his note on the original project.

Location of Kalka Station.

66. The town of Kalka contains 2500 inhabitants and is 2183 feet above sea level. It contains a Post Office, Telegraph Office, and ample accommodation for both European and Native travellers. Its position at the foot of the hills on the road to Simla, Kasauli and outlying Cantonments renders it a place of some importance and considerable trade. The water-supply for the Kalka Station will be obtained from the Jhajra stream, a culvert under the road in connection with irrigation channels already exists and ample arrangements are provided in the project for passing the water used for irrigation purposes under the railway.

Town of Kalka.

67. Having now given a brief general description of the line from its junction with the Sind, Punjab and Delhi Railway to its terminus at Kalka, it will be necessary, before proceeding any further, to enter into the question of the proposed Ghaggar bridge water-way and design.

Water-way and Ghaggar bridge design.

68. The Ghaggar rises in the high ground between the Kasauli ridge and Dagshaie, draining the eastern and western slopes of those hill-sides respectively. It receives numerous affluents from the east and west, and has a drainage area, above the site of the proposed bridge, of about 250 square miles.

Drainage area of Ghaggar above Mubárakpur.

69. A little below Mubárakpur (the proposed crossing) it is joined by a considerable stream, called the Sukhna, rising in the Siwálik Range, and then flows due south until it crosses the Grand Trunk Road, about 2 miles to the north-west of Umballa city. The course then changes generally more to the south-west, chiefly through Patiála territory, passing near the towns of Ghannúr, Massigarhi, Goeluh, Akálgarh, Tohanuh, Fatahábad, Sirsa, Fatahgarh, and further on, after a course of over 250 miles, it loses itself in the desert of Bíkanir, the waters eventually finding their way into the Sutlej.

Course of Ghaggar.

70. For the purpose of ascertaining the probable discharge at site of proposed bridge, five cross-sections of the river-bed were taken, *viz.*:—

Steps taken to ascertain the probable discharge.

Cross-Section No.	I	...	...	...	One mile above centre line.
Do.	II	...	...	...	½ a mile do.
Do.	III	...	...	...	In centre line.
Do.	IV	...	...	...	½ mile below do.
Do.	V	...	...	...	One mile do.

A longitudinal section of the river-bed for one mile above and one mile below the crossing was also taken, and the fall per mile ascertained to be 6·14 feet (*vide* Drawing No. 11, cross-section of Ghaggar river).

71. The following table shows the flood area of each cross-section, together with the calculated velocity and discharge :—

Discharge.

Cross-Sections.	Flood area in square feet.	Mean velocity in feet per second.	Discharge in cubic feet per second.
No. I	6,229	5·8	36,130
„ II	6,489	5·6	36,793
„ III	7,385	5·5	41,000
„ IV	5,017	4·7	23,858
„ V	5,717	4·6	25,306
AVERAGE ...	6,167	5·2	32,817

72. The detailed calculations for each cross-section are given in Appendix No. 4 and are worked out according to the formula :—

Formula used.

(*a*) Hydraulic mean depth = $\frac{\text{Flood area.}}{\text{Wetted Perimeter.}}$

(*b*) Surface velocity = $\sqrt{}$ Hydraulic mean depth × Fall in 2 miles.

(*c*) Mean do. = ·9 Surface velocity.

(*d*) Discharge = Mean velocity × Flood area.

73. For the purpose of determining the necessary amount of water-way for the proposed bridge, the *maximum result alone* of those now obtained (as shown in the above table) is taken into consideration, *viz.*, cross-section No. III, discharge 41,000 cubic feet.

In determining water-way, maximum discharge is alone taken into account.

74. Many other calculations for the Ghaggar flood discharge at Mubárakpur have been made from time to time by different observers; but it does not appear from a perusal of the papers that any of those results are based on more reliable data with regard to flood level than that now obtained, *viz.*, the testimony of natives in the neighbourhood.

Calculations of discharge based on native testimony.

75. The flood levels indicated on the accompanying cross-section are also based on information received from residents on the banks of the river; but, as such floods occur only once or twice perhaps in a generation, and leave no permanent record of their height, such evidence may be very misleading, and is only useful in enabling us to make an approximate estimate of the discharge. It may be noted, however, that the flood level of the cross-sections showing the largest discharge (No. III.) was checked by an independent observer (Mr. Egerton, Assistant Engineer), whose result differed only by a few inches from that indicated on the cross-section. Mr. Egerton obtained his information as to highest flood level from one of the oldest and most intelligent inhabitants, who informed him that such floods are of rare occurrence, although once, and once only within his memory, the water rose higher, fully forty years ago, when the river flowed in a much narrower channel.

Flood levels as previously ascertained by a Native Surveyor checked by Mr. Egerton, Assistant Engineer.

76. Preparatory to entering into the question of water-way, it will be useful to note the results arrived at by different observers from time to time with reference to the Ghaggar River discharge at Mubárakpur.

Previous observation of discharge of Ghaggar River at Mubárakpur.

77. The first observations appear to have been made many years ago by Colonel Dumbleton, who based his calculations on a cross-section with a flood level which, to quote the late Mr. Login, Superintending Engineer, would have flooded the country almost as far as Umballa. There is no direct record of Colonel Dumbleton's calculations; but from other reports it would appear that he arrived at a maximum discharge of 84,855 cubic feet per second.

Colonel Dumbleton.

78. Mr. Cregeen (now Superintending Engineer, Railway Branch) also appears to have turned his attention to the subject when Assistant Engineer in charge of the Hill Roads Sub-Division. His calculations are based on a flood level actually observed by himself and result in a discharge of 31,249 cubic feet per second.

Mr. Cregeen.

79. Next, in order of date, come Lieutenant Manderson's calculations. He took four cross-sections of the river near the present road crossing, and arrived at the following results :—

Lieutenant Manderson.

Cross-Section No. 1	...	...	55,303 cubic feet per second.
„ 2	...	...	31,555 „ „
„ 3	...	...	48,273 „ „
„ 4	...	...	48,895 „ „

80. Colonel Campbell, Superintending Engineer, also appears to have made some calculations. He obtained his result of 64,314 cubic feet by taking a mean between Colonel Dumbletons

Colonel Campbell.

and that calculated by Dickens' formula for a drainage area of 200 square miles.

81. Colonel Campbell regarded Colonel Dumbleton's flood level as uncertain, and seems to have attached more importance to results based on drainage area. In acknowledging Colonel Campbell's letter, the Secretary to Government, Punjab, Public Works Department, pointed out that these latter results are also unreliable when the slope of the country is not taken into account.

Colonel Campbell regarded Colonel Dumbleton's flood level as uncertain.

82. The drainage area was subsequently calculated by Lieutenant (now Major Manderson) at 215 square miles, which, by Colonel Dickens' formula, gives a discharge of 53,000 cubic feet per second "for a country of moderate slope and average soil."

Drainage area calculated by Lieutenant Manderson.

83. The results arrived at by other observers may be disregarded, as the data on which their calculations are based are doubtful, and, in some instances, obviously erroneous.

Results arrived at by other observers doubtful.

84. It has been shown that the discharge calculated by Colonel Dumbleton is based upon an almost impossible flood level, still, for safety sake, it may be taken into account in arriving at a mean result on which to base a reliable estimate of the probable amount of water-way required, we have therefore :—

Mean discharge.

Colonel Dumbleton	...	...	84,815
Colonel Campbell	...	...	64,314
Colonel Dickens	...	...	51,682
Major Manderson	...	...	46,000
Undersigned	...	...	41,000
Mr. Cregeen	...	...	31,249
MEAN		...	53,677 cubic feet per second.

85. To discharge this flood the following water-way is proposed (*vide* Drawing Nos. 8 and 9) :—

Water-way proposed.

Main channel (left bank) 15 spans of 60 feet.
Minor channel (right bank) 3 spans of 30 feet.

86. Taking 7574 square feet as the sectional area of river unobstructed and in flood, the afflux due to the obstruction caused by contracting the water-way, as above, will be ·371 of a foot and the velocity through the openings 8 feet per second.

Velocity and afflux due to contracted water-way.

87. The bridge is therefore capable of discharging the following flood :—

Bridge discharge.

Left bank bridge	15	× 60	× 10	× 8	= 72,000	cubic feet per second.
Right do.	3	× 30	× 10	× 8	= 7,200	do.
Total ...					79,200	

The above figures only take into account the water-way to cut-water level, *i.e.*, 5 feet below bottom of girders in the large bridge over main channel, and 6½ feet below bed plates of the small bridge over the minor channel.

Briefly then, the proposed bridge can discharge with ease (leaving a clear headway of between 5 and 6½ feet) a flood exceeding in volume by 28 per cent. the mean result arrived at in paragraph 83. It is, in undersigned's opinion, improbable that such a flood will ever occur.

88. From the above remarks it may appear that more water-way than is necessary has been provided; but bearing in mind the question of velocity, it will readily be acceded that any further contraction would be unadvisable.

Further contraction of waterway unadvisable.

89. To guard against scour, a flooring of loose boulders has been provided for in accordance with the suggestion of the Consulting Engineer to the Government of India in his note on the original project.

90. The design consists of 15 spans of 60 feet *clear* with roadway carried on the upper flanges of plate girders, in accordance with Drawing A 260 referred to in enclosure of Director General's Circular No. 2 of the 25th April 1880. Quarter inch web bracing, with iron stiffening pieces, has been substituted for the diagonal arrangement shown in the ferrotype received from Director General. Strain calculations will be found in Appendix No. 5.

91. The superstructure is carried on piers 66½ feet, centres resting on wells, filled with concrete, sunk to a depth of 34½ feet below bed of river.

Superstructure of design No. 1 carried on piers.

92. The bottom of the girders are fifteen feet above bed of river, and five feet above the highest possible flood.

Height of bottom of girders above flood level.

93. The river bed consists, according to a diagram prepared by the Executive Engineer, Umballa Division, of one foot of fine sand under which coarse gravel is found to a depth of nine feet, then clay to a further depth of five feet. Beyond this depth (fifteen feet) the diagram furnishes no information, but Mr. Rose adds a note to the

Description of strata forming bed of Ghaggar river.

effect that the "clay" met with at ten feet is pronounced by General Pollard to be silt and exceedingly treacherous stuff for foundation. Borings of the river-bed, taken in connection with the Umballa water-supply project, show "red clay" and "stiff red clay" at depths varying from sixteen to thirty feet. They also indicate a greater depth of sand above the gravel than that shown in the diagram above referred to. The average depth of this material may be taken as three feet.

Subsidiary bridge and pitched embankment.

94. A subsidiary bridge of 3 spans of 30 feet over the minor channel on the right bank is proposed and boulder pitching across the island between the two bridges.

Water-way of Jhajra Nullah.

95. There is only one other important water-way that needs description, *viz.*, the Jhajra Nullah, crossed twice between Chandigurh and Kalka.

Drainage area and flood discharge.

96. The area in square miles drained by the Jhajra Stream at the upper crossing is 10 and that of the lower crossing 19, the declivity in bed per mile being in the former case 129·72 feet, and in the latter 68·98 feet, giving a resulting maximum velocity, based on flood areas, of 28·6 and 13·5 feet per second respectively. The flood discharge in cubic feet are 7507 and 4620 cubic feet per second.

Water-way provided.

97. As regards water-way, it may be mentioned that the bridges as designed are capable of discharging below cut-water level a flood considerably in excess of the maximum result arrived at, but when the declivity of bed per mile and consequent velocity are borne in mind the liberal margin of safety provided will, perhaps, not be deemed unadvisable. It may be noted too, that the single arched bridge carrying the Kalka-Simla road across this stream at a point two miles above the upper crossing of the proposed railway has a clear span of 52 feet and the water-way does not by any means appear excessive, this being admitted, there is sufficient reason to justfy a more liberal provision lower down where the drainage area is of course greater. It may also be mentioned that Mr. Furnivall proposed two spans of 80 feet for the Jhajra crossing at a point where the drainage area did not exceed twelve square miles.

List of bridges, water-ways, &c.

Prescribed forms appended.

98. A complete list of bridges and culverts is given in Appendix No. 2, and all required information regarding water-way, cost, &c., thereof, will be found in Forms No. 130D. E. and F.

99. The following forms are appended to this report:—

Form No. 130 (A) List of Curves.
" " (B) " Gradients.
" " (C) " Ballast.
" " (D) " Important Water-way.
" " (E) " Abstract of Water-ways.
" " (F) " Cost of large Bridges.
" " (G) " List of Stations.
" " (H) " Station Machinery.
" " (I) " " Buildings.
" " (J) " Staff quarters.
" " (K) " Articles required from England.
" " (L) " Tools and Plant.
" " (M) " Establishment.

Level Crossings and Cattle Crossings.

100. The positions of Level Crossings and Cattle Crossings are indicated on the longitudinal section. Level Crossing gates, opening across the railway, will be supplied with safety signals in accordance with Type Drawing No. 18A. Indian State Railways.

Level Crossings.

101. There are three Level Crossings of the 1st class proposed, one for the Grand Trunk Road near Umballa, the second for the Umballa and Kalka road in the 33rd mile, and the third in the 36th mile at Kalka.

102. Second class Level Crossings, in accordance with Drawing No. 19, are provided for unmetalled roads and the more important village communications. There are Crossings of this class. Third class or Cattle Crossings, Drawing No. 20, are required for the less important village roads.

Station arrangements and buildings.

103. The Station arrangements are based on State Railway Type Sketches altered to suit local circumstances (*vide* Drawing No. 33). For Station Buildings the designs prepared by Mr. Kirby for the Amritsar and Pathánkot Railway have been adopted.

Line will be Single-road gauge-steel rails.

104. The line will be single throughout (except at stations) on the broad gauge, laid with 62lb. steel rails of State Railway pattern, resting on bearing plates spiked to Deodar Sleepers 9′ × 10″ × 5″, (3′ 1″ centres except at joints where the sleepers will be 2′ 1″ centre to centre). The quantities per mile of permanent-way materials are taken from enclosure No. 1 to Director General of Railways' Circular No. 5, dated 7th June 1881, and the cost, landed at Karachi, has been ascertained from Director of State Railway Stores.

Ballast.

105. The line will be ballasted with broken brick for the first 17 miles, and with broken stone for the remaining 18¼. Ballast will be spread fifteen feet wide at bottom and twelve at top. It will be eight inches deep below under surface of sleepers.

Fencing.

106. Fencing will consist of a ditch and mound, of the form and dimensions shown in Drawing No. 23. Surmounting the mound will be a two strand galvanized wire fencing with undressed posts of kikar and stiffening posts. Straining posts of wrought-iron are provided.

Supply of materials.

107. Building Stone of good quality is not procurable along the lower section of the proposed line, it will therefore be necessary to burn bricks for bridges, culverts and station buildings. On the Upper Section building stone is obtainable.

Building materials.

108. Good brick clay exists at various points along the line and bricks of excellent quality can be turned out at reasonable rate; adequate arrangements can be made for lime-burning near Chandigurh, and it may be here noted that a considerable trade in this material alone is likely to spring up by the opening of the railway, as the traffic in lime between Chandigurh and Umballa is already considerable.

Sleepers.

109. Deodar sleepers may be obtained in any quantity, and of the very best quality from either Rúpar on the Sutlej, or Abdullapur, (Jagádhri) on the Jumna.

Signals.

110. Station and Distant Signals will be in accordance with the detailed drawings prepared by Messrs. Saxby, Farmer & Co., of London, for Indian State Railways. Blood's patent Levers for Distant Signals will be provided.

Staff quarters, &c.

111. Staff quarters for Europeans and native officials, as per Form No. 130J., herewith attached, are included in the estimate, and temporary quarters for the construction staff are also provided.

Index Map.

112. On the accompanying Index Map will be found diagram sections of both the direct line from Umballa to Kalka and the alternative line (No. 1) *viâ* Rájpura.

Method of marking out the line compensation.

113. The centre line is marked out by pegs driven (in straight portions of the line) at intervals of 500 feet and 100 feet apart in curves. Pillars of brick-work set in lime mortar are provided at springing points of curves and at the end of each mile. The alignment passes for the greater part of the way through cultivated land. In dealing with the question of compensation, the average value per acre, deduced from information received from the Civil Officers of the Umballa District, has been taken. Provision has been made, separately, under this head for wells, trees, &c.

Designs based on State Railway [illegible] drawings.

114. Designs for Girders, Permanent-way, Station arrangements, Station Machinery, &c., are based either on State Railway type drawings or recent ferrotypes supplied by the Director General.

Principal towns on the proposed line of railway and number of inhabitants.

115. The following are the principal towns situated on the line of the proposed railway with their population, according to the recent census returns:—

	Population.		Population.
Umballa City ...	26,159	Mubárakpur ...	2,142
Lálru (Patiála) ...	7,011	Chandigurh ...	1,023
Bassi (Kalsia) ...	4,907	Kalka ...	2,417

Principal towns situated near the proposed line of railway and number of inhabitants.

116. The following towns are situated near the line of railway, or would be accommodated by it:—

	Population.		Population.
Umballa Cantonment ...	40,686	Kasauli ...	2,807
Simla ...	12,305	Sabathu ...	2,329
Raipur ...	10,181	Panjokhra ...	2,108
Bannúr ...	6,671	Kotaha ...	1,966
Dagshai ...	6,574	Ramgarh ...	1,916
Mani-Májra ...	4,908	Pinjóre ...	1,223
Kharar ...	4,265	Jutogh ...	963
Naraingarh ...	2,837	Solon ...	579

The position of the town of Pinjóre precludes provision of a Railway Station.

117. There is a place of some importance in route of which some mention may be made, namely, Pinjóre. The town is situated in the territory of the Maharaja of Patiála, and the road from Umballa to Kalka passes through it. It contains a tahsil, and is well known for its picturesque gardens. The Patiála Government have always been desirous, in the event of a railway being made to Kalka, to have a station at Pinjóre, but unfortunately its position precludes the possibility of meeting their wishes; this is a matter for regret, as there is no doubt a railway station at this town would be regarded as a great boon: but when it is considered that the distance from Pinjóre to the proposed railway terminus at Kalka is only three miles, and that a good metalled road exists connecting the two places, it will, no doubt, be readily conceded that but little inconvenience, if any, is likely to be felt.

T. B. MORRIS, M. Inst., C.E.,
Executive Engineer, Umballa-Kalka Railway Survey Division.

UMBALLA AND KALKA RAILWAY.

UMBALLA TO KALKA 35·6 MILES.

REVISED GENERAL ABSTRACT OF PROBABLE COST.

T. B. MORRIS, M. I., C.E.,

Executive Engineer,

Umballa and Kalka Railway Survey Division.

UMBALLA AND KALKA RAILWAY.

UMBALLA TO KALKA, 35·6 MILES.

REVISED GENERAL ABSTRACT OF PROBABLE COST.

Part II.—Indirect Charges.

(Vide *Circular No. XV, Government of India, dated 7th March 1881.*)

MAIN HEADS.	Amount.	REMARKS.
	Rs.	
Capitalisation of abatement of land revenue ...	31,500	Calculated on the total quantity of permanent land required 25 years' purchase at Rs. 2 per acre.
Charges for exchange on English payments calculated at 1*s.* 8*d.* per rupee.	82,574	
Leave and Pension allowances calculated at 20 per cent. on the provision for salaries.	41,956	
Interest on money to be provided during construction, calculated at 4 per cent.	1,18,390	
Total ...	2,74,420	

T. B. MORRIS, M. I., C.E.,

Executive Engineer,

Umballa and Kalka Railway Survey Division.

APPENDIX B.

REPORT OF A RECONNAISSANCE SURVEY FOR A LINE OF RAILWAY FROM KALKA TO SIMLA.

No. 167, dated 29th February 1884.

From—T. B. MORRIS, Esq., C.E., Executive Engineer on Special Duty,

To—The Secretary to the Government of the Punjab, Public Works Department.

I have the honor to submit the following report on the results of the barometrical reconnaissance of the tract of country between Kalka and Simla with a view to railway extension called for by the Government of India in paragraph 4 of letter No. 665 R.C., dated 26th July 1883 to your address. The sketch map and sections marginally noted are also submitted.

(1) Sketch map (shewing routes examined).
(2) Diagram Section, Route A.
(3) Do. do. B.
(4) Sections Eastward of Sabathu.

2. In the letter just quoted, it is stated that the value of the Umballa and Kalka Railway project would be very greatly enhanced, both to Government and in the eyes of private promoters, if it could be shown that an extension to Simla was possible. Such an extension to be of value in either aspect, should of necessity serve the three Military Stations of Dugshai, Sabathu, and Jutogh.

Military stations to be served.

3. The routes suggested for examination in the first instance, by the Government of India are—(*a*) one running up the Kassullia river from Kalka to a point 4000 feet high, just below Dharumpore and Dugshai, and thence to tunnel through the saddle which connects them and emerge at the same height in the valley down

Routes suggested for examination by the Government of India.

which the Sabathu road runs, and so on to the latter place. From Sabathu two routes are suggested, one turning back eastward round the hills and passing below the Kiarighât bungalow to the narrow saddle about 5 miles from Simla and so on round Prospect Hill to Jutogh, the other continuing past Sabathu, crossing the Dabar river with as little loss of level as may be, and then working up some one of the valleys in the direction of Haut or even Erki, and so round to Jutogh. The Government of India add, that if the feasibility of such a line with even a ruling gradient of 1 in 30 and a length of 59 to 57 miles, were established, it would improve the character of the whole project, and might eventually, after the line to Kalka was at work, be found not financially impracticable.

4. The Government of the Punjab was accordingly requested to arrange for a barometrical reconnaissance of the routes referred to, and to report the result to the Government of India. The necessary field operations were, under your instructions, commenced by me in November, and completed early in January; some 90 miles of route surveys were made with the chain and prismatic compass and numerous barometrical observations taken for altitudes. Before, however, entering into a description of the routes examined, it may not be out of place to describe briefly the position and physical features of the various stations it is considered necessary the railway should serve, and to add a short descriptive account of the cart road from Kalka to Simla.

Barometrical reconnaissance of the routes ordered.

5. Kalka (where it is proposed to terminate the broad gauge railway from Umballa and to commence the narrow gauge line to Simla) is a small town in British territory situated on the right bank of the Jhajra stream, where it debouches from the hills. It is 38 miles from Umballa Cantonment and 57½ from Simla. The height of the place above sea level is about 2,183 feet.

Position of Kalka.

6. Simla is situated on the ridge dividing the waters of the Jumna river from those of the Sutlej. Its highest point above sea level is 8048 feet and the average level of the station may be taken as 7220 feet. It is connected with Kalka by a metalled road 57½ miles in length. This road may fairly be described as practically following the natural watershed, and is actually carried along the ridge itself in four or five places. The alignment is in many places extremely tortuous, and gradients from 1 in 14 to 1 in 20 occasionally occur. The chief obstacle is the Baroghât ascent, in the 22nd mile from Kalka. This ridge is crossed at a level of 5841 feet, and the road is then carried towards Simla by descending gradients, some as steep as 1 in 18 for over four miles. From Solon in the 28th to Khandaghât in the 37th mile from Kalka, the approach to Simla is again a descent, but with easy gradients averaging 1 in 120.

Position of Simla and description of Cart Road.

7. From Kandaghât to Badaighât in the 53rd mile (where the road gains the ridge at a height of 6070 feet) the ascent is tolerably steady, and the gradient generally speaking easy. From Badaighât to Simla the average ascent is 1 in 24, but gradients as steep as 1 in 14 are met with.

8. Dagshai is the most important military station between Kalka and Simla. It occupies a commanding position above the cart road, 18 miles from Kalka and 39 from Simla. Its highest point above sea level is 6087 feet. The next largest is Sabathu, situated on a ridge, about 12 miles by road to the north-west of Dagshai. The highest point, within cantonment boundary, is the site occupied by the hospital 4534 feet. The general level of the station is 500 feet lower. From Sabathu to the toll bar on the 17th mile of the Kalka-Simla Road, there is an unmetalled road, 10 miles in length; there is also a bridle road connecting Sabathu with Solon, another military station situated on the Cart Road, 27 miles from Kalka and 30 from Simla. The highest point on the ridge within the Cantonment boundary of Solon is 5165 feet.

Description of the Military Stations of Dagshai, Sabathu and Solon.

9. Jutogh may be described as the Cantonment of Simla. It lies about 5 miles due west of the latter station. The highest point is 6775, but the general level of the inhabitated part of the station is some 400 feet lower.

Description of the Military Station of Jutogh.

10. The Convalescent Depôt of Kasauli is not mentioned in the letter of the Government of India as one of the military stations which the proposed railway must of necessity serve, but as it will be shown further on that it may, if considered desirable, be included in the scheme, the position of the place and its height may as well be stated. Kasauli is situated on an outer ridge of the Himalayas, 9 miles north of the town of Kalka by the bridle road. The highest point of the ridge is 6322 feet above sea level, and the general level of the station itself is about 6000 feet.

Description of the Convalescent Depôt of Kasauli.

11. I will now describe the first route suggested for examination by the Government of India, *viz.*, from Kalka *viâ* Kassullia River, Sabathu, Haut, and Jutogh, to Simla. It is indicated on accompanying sketch map by a red dotted line and referred to as Route A. A diagram section of it is also submitted, showing at a glance, the length of line, nature of gradients, position of proposed stations and tunnels (*vide* Diagram section A).

Description of Route A.

12. The line commences by a junction with the proposed Umballa and Kalka Railway at Kalka, then winding round the base of the Ramgarh hill, strikes in on the right bank of the Kassullia River which it ascends by a gradient of 1 in 40. At 14½ miles a height of 4000 feet is reached, and here the station for Dagshai would be placed on the level.

13. At 15th mile the tunnel under the Dharumpore-Dagshai ridge begins and emerges two miles further on in the valley (Kothar) down which the road to Sabathu runs. The tunnel is graded to drain both to the north-west and south-east, and may be worked, during construction, from both ends (as well as by shafts).

Position of proposed station for Sabathu.

14. Down the valley of the Kothar River (from 17 to miles 25½) the gradient is 1 in 39. A level stretch of 2000 feet is here provided at a height of 2850, for the Sabathu station.

15. Passing the Sabathu station, the line continues to descend, on a gradient 1 in 38 till the narrow rocky ridge between the Kuthar and Gumbar Rivers is reached. This is proposed to be pierced by a tunnel 500 yards in length, the line emerging at 28½ miles on the left bank of the Gumbar River, just below the junction of the Dabar River, and near the suspension bridge carrying the old road from Kalka to Simla across the former stream.

16. Crossing the Gumbar by three spans of 40 feet each, the line would run on the level along the right bank, for about 600 yards as far as the point where the Kuniar (or Haut) River joins the Gumbar. Here the ascent to Jutogh and Simla would begin by an easy gradient of 1 in 58 along the right bank of the Kuniar stream to the town of Haut mile 35½.

Town of Haut (in Kuniar).

17. Haut is the chief town in Kuniar territory and the residence of the Thakur of that State. There appears to be a considerable quantity of grain produced there, and the quality of the ata from that locality is said to be much appreciated in Simla.

Position of proposed station for Jutogh.

18. From Haut the line ascends, on a gradient of 1 in 44, passing in low cutting through the ridge at the head of the Kuniar River where it (Route A) enters the valley of the Kuni River, and ascends the left bank on the same gradient, *viâ* the villages of Sutrol and Kupradi, to the Erki road ridge (on the north side of Jutogh) through which it passes by a tunnel 300 yards long. The alignment would then be carried along the northern slope of Jutogh as far as 62 miles 1 furlong, to the spur on which the village of Dhenda is situated. This would be a good site for the Jutogh station, being only 150 feet below the general level of cantonments.

Position of terminus at Simla.

19. From Jutogh the ascent to Simla would be on a gradient of 1 in 40. The alignment passing along the northern slope of Prospect Hill (below the road) and tunnelling through the ridge (under the Boileauganje Bazar) emerges below the cart road at the height of 6460 feet. The line would then continue on the same gradient *viâ* Merlin Lodge and below Dovedell to Glen Hogan, where the Simla station would be placed at a height of 6749 feet above sea level. Total length of line 67 miles.

Modification in Route A.

20. The route just described, although practically one of those suggested for examination by the Government of India, does not, it will be seen, cross the Dabar River at all. This modification was necessary owing to the nature of the ground, which would not admit of that line of drainage being crossed with tolerably good gradients and then working up any of the valley in the Haut direction.

Route A not recommended for adoption.

21. Although Route A is a good one in point of gradients and in affording direct communication between Jutogh and Simla, I do not recommend its adoption on the following grounds.

Grounds for objection against Route A.

22. In the first place four tunnels (aggregating 3 miles in length) would be required, one of which, under the Dharumpore-Dagshai ridge, *being two miles long*. Again heavy rock, cutting would be unavoidable where the line passes below Jutogh. The cost of these works would alone be very great, sufficiently so in my opinion to render the adoption of the route prohibitory. The low level on which the Dagshai and Sabathu stations would be placed is another serious objection. The former would be 1750 feet below the general level of Dagshai Cantonment, and the latter 1150 feet lower than the Sabathu Parade-ground, and 1650 below the Hospital.

Alternative Route *vid* Erki abandoned.

23. As a modification of the Kuniar route (A) that *viâ* Erki has also been suggested, but I find, after a careful examination of that part of the country, that the drainage lines of the Goge River flowing from the north into the Gumbar, would render railway communication between that place and Simla exceedingly difficult, I have therefore abandoned that route.

Description of Route (B) recommended for adoption—continued.

24. The second route suggested by the Government of India for examination, *viz.*, turning back eastward from Sabathu and passing below Kiarighât and so on *viâ* Budaighât to Jutogh and Simla, is that with certain modifications, which to my mind, most strongly recommends itself for adoption in every important consideration, such as economical construction, easy gradients, and serving all military stations *en route*. It would be necessary, however, instead of striking off from Sabathu in a direct course eastward as suggested, to take over more to the south-east in the direction of Solon and thereby head the lines of drainage instead of crossing them. A glance at the two sections C and D, herewith submitted, will convey some idea of the physical features of the country eastward of Sabathu and show how unsuitable it is for a railway one, (C) is a section of the existing bridle road from Sabathu to Kathlighât on the 46th mile of the cart road, and the other, (D) a section taken along the line of country from the same place, to Wakanaghât on the cart road.

Description of Route (B) recommended for adoption. Position of proposed Stations for Dagshai and Dharumpore.

25. The route therefore recommended for adoption, as in every way the best, is that indicated on accompanying sketch map in green dotted lines and referred to as Route B. A Diagram section of it is submitted showing the nature of the gradients, stations served, and length of line. It commences by a junction with the proposed Umballa and Kalka Railway at Kalka and striking up the right bank of the Kassullia Nulla, on a gradient of 1 in 35, gains a height, in 15½ miles, of 4500 feet. Here there would be a tunnel, about 500 yards in length, through the Dharumpore spur, the line emerging on the level, south of the toll bar ridge near Barakhar, a good and convenient site for the Dagshai and Dharumpore station.

26. The line would continue on the level (and straight) as far as 16 miles 3 furlongs, passing under the cart road, near the toll bar by a tunnel 300 yards long, and entering the valley of the Kothar river at a height of 4500 feet. Then descending by a gradient of 1 in 50, the alignment would strike in on the Sabathu-Dharumpore Road at 18¾ miles from Kalka and continue along it, on the level as far as Sabathu.

Description of the Route (B) recommended for adoption. Position of proposed station for Sabathu.

27. The Sabathu station would occupy a site near the Roman Catholic Chapel, about 200 feet above the parade-ground and 254 feet below the level of the Station Hospital.

28. From Sabathu the alignment would take a south-easterly course, on an ascending gradient of 1 in 84, *viâ* the Dabar and Blini Rivers and join the Simla cart road near the 26th mile post from Kalka. A fair bridle road already exists along the portion of the route, but a fresh alignment would be required for railway purposes.

Description of the Route B recommended for adoption. Position of proposed station for Solon.

29. From mile 35½ the line would follow the cart road (with slight deviations) on a gradient of 1 in 39, to Solon where a station would be placed on the level (just below Cantonments) at a height above sea level of 5000 feet.

30. From the 37th mile (Solon) the line would descend by gentle gradients for 8½ miles to the ridge at Khandaghât where the waters of the Jumna and Sutlej Rivers divide. Between Solon and Khandaghât, the rails might (with slight deviations here and there) be laid along the cart road, strengthening (or constructing new bridges) wherever necessary.

31. From Khundaghât to Shalighat (46½ mile of cart road and 56th mile of railway) a new alignment on a gradient 1 in 50 would be better than keeping to the cart road, as the gradients of the latter are, in places, unsteady, and the course of the road itself is more or less tortuous. The new alignment (*vide* accompanying Diagram section) would pass below the present road and through the Kiarighât spur by a tunnel 100 yards long.

32. At (or near) Shalighât the line would again strike in on the cart road and continue along it (with occasional deviations,) as far as the Badaighât ridge (52 mile post of cart road and 62 of Railway). The gradients and the section are very easy, the steepest being 1 in 79.

Description of the Route B recommended for adoption. Position of proposed terminus at Simla.

33. At Badaighât (6073 feet) the branch to Jutogh would strike off, the main line ascending to Simla, by new alignment below the cart road, on a gradient of 1 in 34. The Simla Station would be placed on the level, at a height of 6749 feet above sea level, and would occupy the same site as that described for route (A), *viz.*, Glen Hogan just below the old cemetery and about 200 yards to the south of new Secretariat Buildings of the Government of India. One or two houses would have to be purchased on the station site. Total length of line from Kalka *viâ* Sabathu, 67 miles.

Description of the Route B recommended for adoption. Position of proposed terminus (Jutogh Branch).

34. The Jutogh Branch would be on an ascending gradient of 1 in 55, and its length from the junction with the main line at Badaighât, 2 miles 3 furlongs. The station would be placed on the level at an elevation of 6300 feet in a convenient situation between two roads about 200 yards to the south-west of the Artillery Mess.

Description of the Route B recommended for adoption. Kasauli Branch.

35. In describing the position of Kasauli, I have already mentioned that the station does not appear to be one of those which the Government of India considers it a *sine quâ non* to serve, but in case it may be deemed necessary, at some future time to connect it with the Railway system, I have shown that a branch to that place 4 miles in length from Dharumpore (*viâ* Sanawar) may be constructed on a gradient of 1 in 30.

Description of the Route B recommended for adoption. Position of proposed station for Kasauli.

36. The Kasauli station might be placed at an elevation of 5204 feet on the open ground near Ghurkal about ¼ a mile to the east of the Dâk Bungalow.

Lengths of Routes A and B. Considerations of cost, &c.

37. The length of Route (B) from Kalka to Simla, is, it will be seen, the same as that of route A, *viz.* 67 miles, but taking the Jutogh Branch into consideration, the former would be longer than the latter by 2 miles 3 furlongs. Notwithstanding this increased length of line, Route

B would be by far a cheaper line to construct than the alternative Route (A) *viâ* Kuniar. There would be no expensive bridging on the former route as it heads the drainage as much as possible, and is in fact, a ridge line in several places; but it is in the costly operation of tunnelling that Route B stands out distinctly in a more favorable light than the rival route, the total length of tunnels on the former being only 1140 yards against 5200 yards on the latter.

Important advantages in connection with Route.

38. Apart from the main consideration of cost, which I have shown is clearly in favor of Route B, it also possesses the important advantage of serving not only Dagshai, Sabathu and Jutogh, but *all* military stations between Kalka and Simla. The railway station moreover, for the two most important cantonments, *viz.*, Dagshai and Sabathu, would be placed at a much higher level and in a position more fully meeting requirements than in Route A. It may also be pointed out, as regards Solon (which would be served by Route B and altogether excluded in the other route) that there is a Brewery established there, in connection with which a considerable amount of traffic might be expected.

39. Again it is a distinct argument in favor of Route B that it admits of the Convalescent Depôt of Kasauli being served by a shorter and less expensive branch than would be possible from Route A, as the point of junction in the former case would be 500 feet higher than in the latter.

Extensions beyond Simla.

40. It does not, I understand, come within the scope of my instructions to discuss the feasibility of extensions beyond Simla. I will merely remark therefore that, if, in course of time, owing to the growing importance of Simla the requirements of the station for increased facilities in the supply and transport of building materials and fuel call for it, that an extension to Mashobra and down the spur to Naldera in the direction of the timber depôt of Suni on the Sutlej is possible at a reasonable cost.

Traffic question not entered into. Financial success.

41. It would be premature in the absence of detailed surveys and estimates to enter into the question of probable traffic that would accrue to a line of railway between Kalka and Simla and to express an opinion as to *how far* the line will prove financially successful (nor have I been called upon to do so), but, in a general way knowing approximately what the annual maundage is, to and from the hills, and how many travellers pass up and down, also bearing in mind the success of the Darjeeling line and the importance that must attach to a railway connecting with the plains so many Military Stations and the summer capital of the Government of India, I have not the slightest doubt that the line economically constructed, would pay handsomely.

Proposed gauge. Description of *Darjeeling Line.*

42. The proposed railway would, as regards gauge (2 feet; weight of rail 40lbs.) and description of rolling stock, be similar to the Darjeeling line. From a report dated 22nd January 1882 by the late Mr. Dooley, Executive Engineer, on the general features of that line, I see that the gradients vary from 1 in 19 to 1 in 25, the sharpest curve is 48 feet radius, and the sharpest curve, on a steep gradient, is 70 feet radius, on a gradient, of 1 in 23. There are about 9 miles of a continuous ascent 1 in 19 to 1 in 20, and about 8 miles of 1 in 22, the remainder of the ascent is 1 in 28. This description refers to the line as at first constructed, but I understand it was found somewhat difficult to work, and the Directors have since raised additional Capital with a view to making the ruling gradient 1 in 28 and the minimum radius of curvature 70 feet. The goods rolling stock used is, I see by the drawings, provided with Clemenson's system of flexible wheel base designed to traverse a curve of 50 feet radius.

Minimum radius of curvature. Proposed gradients.

43. In the Simla Railway case the nature of the country would also necessitate the adoption of sharp curves, but I do not anticipate that the minimum radius need be less than 70 feet. As regards gradients the proposed line (Route B recommended for adoption) compares very favorable with the Darjeeling line, the steepest gradient on the former being 1 in 34 (and this only for a length, at the end of the line of about 4 miles) whilst on the remaining 63 miles the gradients are particularly easy for a mountain railway varying from 1 in 35 to 1 in 211.

Scope of report. Detailed Survey of Route B recommended.

44. This report only deals with the question of establishing the feasibility of a narrow gauge railway from Kalka to Simla, and is based, as I have already mentioned, on a barometrical reconnaissance, rough surveys, and existing maps. The important question of probable cost of the line cannot therefore be entered into. Should the Government of India desire information on this point, I would beg to suggest the advisability of having Route B actually staked out and detailed plans and sections prepared with a view to framing an estimate of probable cost.

Appendix. Barometrical Heights.

45. In the appendix to this report will be found a statement exhibiting the barometrical height of all the leading points of observation. These heights are worked out from Mackesy's Tables and are based on approxmiately simultaneous readings for pressure and temperature at the Quarter Master General's Office, Simla, and at the various places *en route*. The height of the Quarter Master General's Office above sea level has been, I understand, accurately determined to be 7016 feet and this is the datum assumed.

T. B. MORRIS, M. Inst., C.E.,
Executive Engineer, Umballa-Kalka Railway Survey Division.

W. S. TREVOR, *Colonel, R.E.,*
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 25th JUNE 1884.

General Remarks.—Rain has fallen during the past week all over the Madras Presidency; but except in the districts of Ganjam, Kistna, Malabar, and Travancore, the fall has not been heavy. More rain is wanted. In Mysore slight rain has fallen throughout the province, and in Coorg it has been beneficial for agricultural operations. Rain has been general in the Bombay Presidency, but more is wanted in several districts to facilitate sowing operations. The Berars have received a fair quantity, but in Hyderabad the fall of the week has been insufficient for sowings. Showers have fallen throughout the Central India States and Rajputana, having been heaviest in the districts of Indore, Sutna, Neemuch, and Goona in the former, and in the districts of Abu, Meywar, Ajmere, Marwar, Kotah, and Jeypore in the latter. In the Central Provinces rain has been general, and in several districts very heavy. Rain has fallen in all districts in the North-Western Provinces and Oudh, but unequally and as yet insufficiently. In the Punjab good falls are reported from most districts, and prospects are said to have improved.

In Burma heavy rain continues to fall, and in Assam the fall, though below that of last week, has been fair.

In Bengal there has been good rain throughout the province; in Chittagong and Cuttack the fall was especially heavy.

The last weather report, dated 26th instant, of the Meteorological Department, shows a sudden cessation of rain in North-Western and Central India. In Southern and Western India there have been some insignificant falls of rain; but in Orissa, Ganjam, and at Patna and Lahore the showers have been heavier.

Agricultural prospects remain unchanged in Madras. *Kharif* operations are being actively carried on everywhere; sowings have commenced in Central India and Rajputana and are in active progress in Bombay, North-Western Provinces and Oudh, Punjab, and Central Provinces. In Bengal harvesting of early paddy, *mung*, and *cheena* (millet) is nearly over in places and prospects of standing crops are good. In Assam rice and sugarcane are doing well, but the prospects of tea are not very favourable in Cachar.

Prices are for the most part stationary.

The public health is generally good. In Tanjore and Dharwar the mortality from cholera has been heavy.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 25th)		
Bellary ...	·13 (average)	Cultivation operations suspended from want of rain. Thirty-six deaths from cholera.
Kurnool ...	·70 (average)	Agricultural operations almost at a standstill from insufficiency of rain. Small-pox and cattle-disease in parts.
Ganjam ...	2·32 (average)	Small-pox prevalent; cholera in one taluk.
Kistna ...	2·42 (average)	Small-pox and fever in places. Canal supply insufficient; river below anicut.
Chingleput (Madras) ...	·86 (average)	Standing crops fair, but want of rain felt in parts; harvest paddy, yield half; agricultural operations progressing. Small-pox prevalent; 2 deaths from cholera.
Coimbatore ...	·35 (average)	Standing crops generally good, but *cholum* attacked by insects; harvest dry crops, outturn about average. Fever in two talukas; 2 deaths from cholera.
Tanjore ...	·20 (average)	Standing crops generally good; want of rain in parts; harvest paddy, cotton, and indigo, outturn below average. 540 deaths from cholera.
Madura ...	·03 (average)	Small-pox slight in parts; 3 deaths from cholera.
Malabar ...	7·61 (average)	Transplanting of paddy commenced in parts. Small-pox slight in nine taluks and fever in two; 5 deaths from cholera.
Travancore ...	3·97	Crops reviving; harvest early rice crop in one division, yield below average. Fever and small-pox in parts. *General Remarks.*—General prospects fair.
Bombay—(June 25th)		
Karachi ...	Rain during last week, average of four stations, ·99.	Strong monsoon winds. River at Kotri on 23rd, 13 feet 10 inches against 12 feet 7 inches on same date last year. Fever in four talukas and cattle-disease in three; a case of small-pox occurred in Karachi on 11th and proved fatal on 15th; no other cases since; disease also in seventeen villages in district; 9 fresh cases, 4 deaths, 30 remaining sick. *Rabi* 1,295—41,554 acres less than that of previous *rabi*; assessment Rs. 62,099 less; produce 13 annas in rupee, loss due to scanty rainfall and deficiency of water. Prices—wheat, red rice, and *bajri* in Karachi 26, 30 and 32, in Kotri 30, 30 and 42, in Sakro 16, 28 and 36, and in Shahbunder 20, 36 and 34 pounds per rupee, respectively.
Hyderabad ...	Rain in six talukas, averaging 1·26.	River at Kotri on 23rd, 13 feet 10 inches against 12 feet 7 inches on same date last year. Small-pox in ten, fever in two, and cattle-disease in two talukas. Prices of grain steady.
Ahmedabad ...	1·49	Total rainfall 1·82. Manuring operations continue. Cholera in Parantij—27 cases, 7 fatal. Wheat 29 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	·88	Total rainfall 1·18. Cholera subsiding; fever, small-pox, and cattle-disease in mild form in Naosari. Sowing operations commenced in some places in Baroda and Naosari divisions. *Bajri* 32 and rice 23 pounds per rupee.
Surat ...	3·93	Total rainfall 4·29. *Kharif* sowings commenced; *juari* 30 and *nagli* 40 pounds per rupee.
Nasik ...	Rain everywhere	More rain wanted. *Kharif* sowings commenced in places. Public health generally good; small-pox in parts of Sinnar, Chandor, and Kalvan. Cattle-disease in Kalvan. Insects like locusts reported in Niphad; measures in progress to kill them. *Bajri* 28½, wheat 31½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Rain daily, except on 24th; heavy on 19th, 20th and 22nd. Total of week 8·39.	Total rainfall to date 13·06, being 4·64 below average. Abnormal temperature 1° warm to 3° cool; vapour in air normal; abnormal wind southerly on 19th, afterwards westerly.
Poona ...	Showery weather; maximum rainfall 2·19 at Khadkalla, minimum ·32 at Khed.	Sowing operations retarded for want of more rain. Prices—*bajri* 33 and *juari* 35; in Poona *bajri* and *juari* 26 pounds each.
Ahmednagar ...	1·60 in Parner; 1·38 in Rahuri; 1·29 in Shéogaon; 1·08 in Nevasa; slight in the other talukas.	Sowing of early *kharif* crops in progress in Sheogaon and Akola. No fresh attacks of cholera and no deaths. Slight cattle-disease in Nevasa. *Juari*—maximum 60 pounds in Sangamner, minimum 36 in Parner; *bajri*—maximum 48 pounds in Sangamner, minimum 36 in Parner.
Sholapur ...	·19 in Barsi; ·36 in Karwal.	*Kharif* sowings retarded for want of rain; *juari* 40 pounds 17 tolas and *bajri* 42 pounds 13 tolas per rupee.
Dharwar ...	Slight rain in most stations, varying from ·85 in Murgad to ·06 in Mundargi.	Heavy rain urgently required to enable rice and other early crops to be sown. Cholera is spreading, only two out of eleven talukas being exempt from it, and total deaths from it during the week 331; fever and small-pox also prevail. Scarcity of water experienced in certain villages of six talukas. *Juari* 51 to 77 pounds and rice 27 to 39 pounds per rupee.
Kanara ...	Karwar, 7·77; Kumpta, 13·48; Sirsi, 3·17; and Haliyal ·39.	Total rainfall 20·27. Sowing operations continue. Common rice—Karwar 12 seers, district average 15 seers per rupee. Small-pox in Sirsi 5 cases, in Haliyal 2, in Kumpta 13 deaths, Bhatkal 5, Siddapur 1, and Supa 1.
Rajkot ...	7·78	Total rainfal 8·02. General health good. Weather cloudy. Fever in Nawanagar, Jetpur, and Manekrada. *Bajri* 31 and *juari* 39 pounds per rupee.
		General Remarks.—Rain throughout the presidency; more wanted for sowing operations in parts of Poona, Sholapur, Nasik, Dharwar, Satara, and Belgaum. Scarcity of drinking-water continues in a few villages in six talukas of Dharwar. Cholera in eight districts; cattle-disease in six; fever and small-pox in twelve.
Bengal—(June 25th)		
Chittagong ...	14·88	Incessant rain. Paddy being transplanted. Prices steady. Public health improving. Cattle-disease abating.
Dacca ...	3·35	Land being cultivated for *sali* and *roachia* paddy; prospects of crops good. Public health good.
24-Pergunnahs (Calcutta)	4·10	Cultivation of *aman* paddy progressing; recent rain has done much good; prospects of paddy and sugarcane favourable. Price of common rice stationary. Health good. Cattle-disease reported from Diamond Harbour.
Moorshedabad ...	·81	Weather showery and cloudy, with easterly winds. Standing crops generally doing well, but the light rain will check transplanting late paddy. Rivers low for the time of the year.
Rajshahye ...	1·39	Prospects of crops generally good. Health improved.
Burdwan ...	·88	Agricultural operations going on satisfactorily; prospects of crops good.
Rungpore ...	1·57	Weather cloudy. *Aman* paddy being transplanted in some places; prospects of crops favourable. Price of rice three to four rupees per maund. Public health fair.
Bhagalpur ...	4·07	Sugarcane, indigo, *murwa*, and indian-corn doing well; paddy being transplanted. Prospects continue hopeful. Rice 13 seers 14 chittacks per rupee.
Purneah ...	1·19	*Mung, kaoni, cheena* yielded fair outturn; weeding brisk. Common rice 16 seers per rupee. Health fair.
Patna ...	1·42	Ploughing and sowing of paddy going on. Prices stationary. Cholera still in Barrh and Behar subdivisions.
Durbhunga ...	1·09	*Bhadoi* crops doing well. More rain required for transplanting paddy. Prices fallen slightly. Public health good.
Hazaribagh ...	1·71	Weather seasonable. Ploughing and sowing going on. Prices of food-grains continue high. Small-pox and cattle-disease reported from certain places; general health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack ...	9·46	Weather cloudy. Sowing of paddy still going on; plants growing well in some places. Price of rice stationary. Cholera reported from parts of Kendrapara; otherwise public health good. Rivers rising.
		General Remarks.—The rains appear to have set in in many districts; there has been a good general rainfall during the week; the fall was heavy in Chittagong, Cuttack, and in some other districts. Agricultural prospects fair; harvesting of early paddy in Dacca and that of *mung* and *cheena* in Mozufferpore nearly over; in Purneah *cheena, mung*, and *kaoni* yielded a fair outturn; prospects of standing crops good. Prices almost stationary. Cholera and small-pox are still reported from some places; otherwise public health good.
N. W. Provinces and Oudh—		
Benares (June 24th)	1·6	Ploughing commenced. Cholera, small-pox, and fever in places. Prices steady.
Allahabad („ „)	Rain all over the district between 20th and 23rd, average 1·3.	Monsoon evidently commenced. Prices risen. Health good; cholera nearly disappeared.
Gorakhpur („ 23rd)	Heavy rain, apparently general on 23rd instant.	Easterly winds; weather cloudy. Rice sown. Health generally good. Prices easy.
Jhansi („ 24th)	Partial showers.	Heavy clouds throughout the week. Ploughing for *kharif* commenced. Prices rising. Cholera is reported from Margahasta, pargana Garotha. Scarcity of fodder and water continues.
Agra („ 23rd)	·1 to ·8 in four parganas.	Fever in one pargana; very little cholera in city and in two parganas. Prices steady.
Bareilly („ 24th)	General rain on 19th and 20th, averaging more than 1·0.	Ploughing everywhere progressing. Prices tend to rise slightly. Health of people and cattle remains good.
Meerut („ „)	2·1; Mowana, 4·5; Bagpat, 3·5; Ghaziabad, 1·3; Hapur, 1·8; Sirdhana, 2·1; Garmukhtesur, 1·4.	Ploughing commenced everywhere; *chari* already sown under irrigation. Health good. Supplies sufficient. Prices steady.
Kumaon („ „)	Rain all over the district.	General health good; cholera in Eastern Kumaun abating. Crop prospects good; weeding being done. Cattle-disease continues. Prices stationary.
Fatehgarh („ „)	·5 throughout the night at Fatehgarh; Aligarh and Kanouj also reported rain yesterday.	East wind throughout the week. Health good. No cattle-disease. Prices stationary.
Lucknow („ „)	·9; Maliabad, ·3; Mohanlalgunge, ·5.	Weather continues cloudy. Ploughing and manuring in progress. Health of people generally good; 1 or 2 cases of cholera reported in the city. Condition of cattle good. Markets well supplied. Prices stationary.
Partabgarh („ 20th)	·13 rain fell at Sadr on 17th instant.	Prices almost stationary. Wind easterly; sky cloudy. Great scarcity of water. Sugarcane doing well; *makai* being transplanted. Small-pox decreasing.
Sitapur („ 24th)	·4 to 1·6 rain fell in district during week.	Agricultural work in progress everywhere. Prices stationary.
Fyzabad („ „)	2·5 on 24th instant at Sadr.	Sugarcane coming on well. Markets well stocked; prices steady. Small-pox in three tahsils. Condition of cattle good.
Rae Bareli („ 23rd)	2·9 rain at Sadr on 23rd instant.	Wind easterly. Cholera continues. Markets well stocked; prices remain steady.
Cawnpore („ „)	·1 rain at Bhognipur on 19th and ·8 on 23rd morning at Cawnpore.	Sky cloudy and every prospect of more rain. Cholera and small-pox still linger, otherwise health of people good. Slight cattle-disease in pargana Rasulabad continues.
		General Remarks.—Rain has fallen in all districts, and the monsoon appears to have set in, but mildly and unequally. Ploughing and manuring for the *kharif* are in progress. Markets are well supplied; prices show a tendency to rise in a few districts, but are generally stationary. The condition of cattle continues on the whole good. Some cholera, small-pox, and fever continues, but in a diminished form in many districts. The general health is good.
Punjab—(June 24th)

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Wednesday, the 25th June, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble D. G. Barkley.

KHOJÁ SUCCESSION BILL, 1884.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend and define the law of Testamentary and Intestate Succession to Khojás. He said:—

"The Khojás are a small sect who were converted from Hinduism to Muhammadanism about 400 years ago, but who notwithstanding their conversion still retain to a great extent their Hindu laws and usages. They are, as a rule, traders by occupation, and they are to be found in almost all the trading communities of Western India, and on the seaboard of the Indian Ocean,—not only in British India but in such places as Cutch, Muscat and Zanzibar. It appeared, from some enquiries made in a lawsuit heard about 18 years ago, that there were then about 2,800 Khojá houses or families in Sindh, about 5,000, in Kathiawar, a considerable number (the precise number is not stated) in Cutch and Guzerat, 450 in Zanzibar, 400 in Muscat, and about 1,400 in Bombay and the immediate neighbourhood. There are Sunni Khojás and Shia Khojás, but the great majority of them are Shias, of the particular variety known as Shia Imámí Ismailís, who owe spiritual allegiance to the hereditary Imáms of the Ismailís. The representative of these hereditary Imáms was, at the time when the present legislation was first contemplated, and until quite recently, a Persian nobleman, known as His Highness Aghá Khán, a man of romantic history and romantic lineage, claiming descent in direct line from Alí, the Vicar of God, through the seventh and (according to the Ismailí creed) the last of what are called the revealed Imáms—Ismail, the son of Jaffir Sadiq. This nobleman, after a series of adventures in his own country, in the course of which he seems to have seized and held for some time the Province of Kirman, fled to Sindh and there raised a body of light horse which was of some service to General Nott and General England during the first Afghan war (in the years 1841 and 1842), and afterwards to Sir Charles Napier in his conquest of Sindh. In 1845 he went to Bombay, and there spent, with one short exception, the remainder of his days, living in considerable state and enjoying the homage of his spiritual followers. This homage appears to have been of some substantial value, for it is stated that his yearly income, derived from his votaries in various parts of India, and, it is said, in some remote parts of Asia, averaged

about £10,000 sterling. The greater part of this income is said to have been spent by his late Highness in horse-racing, a pursuit of which he was for some time one of the most munificent patrons in Bombay. His Highness Ágha Khán died last year, and has been succeeded in the Imámship by his son, who is known as His Highness Ágha Alí Sháh. So much for the spiritual head of the Shia Khojás, whose peculiar relation to his adherents has a very intimate bearing on some of the provisions of the Bill which I am asking leave to introduce.

"Now, the Khojás are, as I have said, subject partly to the Hindu and partly to the Muhammadan law, and they retain the former law to such an extent in matters connected with property and succession that it is presumed to apply to them until the contrary is proved. The extent to which it does apply to them has always been a matter of considerable doubt, and, as they are a wealthy community, the doubts on the subject have given rise to a great deal of litigation, insomuch that the Khojás occupy a space in the reports of the Bombay High Court quite disproportionate to their numbers.

"Among the suits relating to them are three of especial importance—one decided by Sir Erskine Perry in 1847 and reported by him in his volume of Oriental cases; another decided in 1866, after a hearing of 21 days, by Sir Joseph Arnould, whose elaborate and most interesting judgment is our principal source of information about the Khojás; and a third, decided in 1875, by Sir Michael Westropp, after a hearing which occupied the Lower Court for twenty-four days, and the Appellate Court for four days. In this last case Sir Michael Westropp, the then Chief Justice, after describing the state of the law, went on to remark:—

'It is, however, evident that the Khojás are not as firmly bound in matters of succession and inheritance by the Hindu law as Muhammadans proper are by the Muhammadan law and the Hindus by the Hindu law, and hence it is that it would not be reasonable to require such stringent proof of a custom of inheritance amongst them differing from ordinary Hindu law as from a Hindu.

'Now, it is manifest that such a state of the law must greatly encourage litigation, and we cannot help thinking that it would be most desirable that the Government should take steps, as was done in the case of the Pársís, to ascertain the views of the majority of the community on the subject of succession, and should then pass an enactment giving effect to those views. Unanimity, of course, could not be expected, but the rules which were found generally to prevail might be made law; and though the religious differences existing among members of the Khojá caste might create some difficulty, it would not, we think, be insuperable.'

"Sir Richard Temple's Government acted on this suggestion and appointed a Commission, of which Mr. Justice Maxwell Melvill, of the Bombay High Court, was President, and of which the other members were His Highness Ágha Alí Sháh and three other gentlemen representing the Shia Khojás, one gentleman representing the Sunni Khojás, and Mr. Spencer, then Acting First Judge of the Small Cause Court at Bombay.

"The Commission took the greatest pains to ascertain the customs and views of the Khojá sect in the Presidency of Bombay and other parts of the country, and after much consideration and discussion agreed on a draft Bill, subject to a dissent on certain specific points which was signed by His Highness Ágha Alí Sháh and by one only of the three other members representing the Shia division. This Bill was approved by the Government of Bombay and sent up to the Government of India, and it constitutes the basis of the Bill which I am now asking leave to introduce. It raised several difficult questions, and it has been the subject of a great deal of correspondence between the Government of India and the Government of Bombay—a correspondence which I found in active progress when I came out here, and which continued until the latter end of last year.

"I do not propose to trouble the Council with the details of the Bill, but to confine myself to the more important of the questions of principle which it raises, and to explain the course which it is proposed to take with respect to each of those questions and the reasons for adopting that course.

"The first of these questions is raised by a section of the Bill, which defines the application of the measure—a matter which was not clearly provided

for in the Bill prepared by the Commission. The section proposes to enact that the property, whether moveable or immoveable, in British India of a Khojá dying after a specified day shall be regulated by the rules contained in the Act wherever he may have had his domicile at the time of his death. If you compare this provision with the corresponding section of the Indian Succession Act, you will find that, whereas it coincides with it as respects immoveable property, it involves an important deviation from it as respects moveable property; for section 5 of the Indian Succession Act says:—

'Succession to the immoveable property in British India of a person deceased is regulated by the law of British India wherever he may have had his domicile at the time of his death. Succession to the moveable property of a person deceased is regulated by the law of the country in which he had his domicile at the time of his death.'

"Whereas the Bill proposes to disregard domicile in the case of moveable as well as in the case of immoveable property. Now, the rule embodied in the Indian Succession Act is not only the rule of one of the most important of our Codes, but also, as a rule of what is called private international law, has obtained general acceptance among the civilized nations of the West; and we should not be justified in departing from it unless there appeared to be good reason for supposing that it is not suitable to the peculiar circumstances of the Khojás. I think that there are such reasons.

"In determining the question by which rule the succession to moveable property should be regulated, the choice is practically between the law of the domicile of the deceased and the law of the situs of the assets; that is to say, the law of the place where the man had his home and the law of the place where he left his property. Western nations have generally agreed to apply to succession to moveable property the former rule—the rule of domicile—and not the latter. The objections urged against applying the law of the situs to moveable property are chiefly that a man's moveables are apt to be scattered over many jurisdictions each of which has a readily ascertainable law of its own; that accordingly, if the law of the situs is applied to them, his estate will be broken up into many fragments, all governed by different laws; that a man's moveables may change their place; that the most important of them—goods employed in commerce—are constantly changing their place; that accordingly, if the law of the situs is applied, it will be impossible to foresee the particular law under which they will fall on his death; and, lastly, that the rule of the law of situs does not clearly provide for the portion of the assets which consists of debts or other obligations existing in favour of the deceased. Various theoretical reasons have also been adduced for preferring the law of the domicile, but it is probably practical considerations of the kinds to which I have referred that have turned the scale in its favour.

"Now, do these considerations apply to the case of Khojás dying domiciled out of British India and leaving moveable property in British India? The places out of British India in which Khojás are principally found are, as I have said, such places as Cutch, Zanzibar and Muscat. Now, at a place like Zanzibar there is nothing that can be called a territorial law of succession, and the Courts would probably try to apply the personal law of the deceased, which in the case of the Khojá is *ex hypothesi* unsettled and unascertainable. Thus, there would be, in such a case, no local law of the situs which would conflict with the law applying to the assets in British India, and no law of the domicile to which recourse could be had; so that to give the law of the domicile a preference over British Indian law would be to substitute a congeries of indefinite and half established customs for a law to the application of which no reasonable objection could be made. This being so, the balance of convenience would appear to be, in the case of the Khojás, against allowing the law of the domicile to prevail as to British Indian assets. And a further advantage of adopting the other rule would probably be that, as Consular Courts at Zanzibar and elsewhere would naturally apply British Indian law, the rule would probably come in course of time to be adopted as a personal law applicable to Khojás in all foreign States in this part of the world.

"This was the first question of principle which we had to settle. The next related to the difficult subject of mixed marriages. The Khojás are a

very exclusive community, and look with great disfavour on marriages with any person outside their body. None of them deny—at least so we are informed by the president of the Commission—that the marriage of a male Khojá to a female who is not a Khojá is perfectly valid if within the limits allowed by Muhammadan law. But at the same time they are anxious to go as far as they can in the direction of discouraging marriages of this kind. Accordingly, all the Khojá members of the Commission agreed that only a Khojá widow should be entitled to inherit from her husband; but the Sunni Khojás, who in this matter appear to hold views of a slightly more liberal shade than their brethren of the Shia division, were willing that the sons of a non-Khojá's wife should take some share in the inheritance. Eventually the Commission agreed upon what they called a compromise. They confined to a Khojá widow the rights of a widow in her husband's inheritance, but they invented a term—'alien son'—which they defined as meaning 'the male offspring of a male Khojá and of a female, not being a Khoja, legally married according to the rules of Muhammadan law in force in the sect to which the Khojá in question belongs.' But when you came to see what the rights of the alien son were to be in the inheritance, it turned out that he had no rights at all, and that he was in all respects, except the mere name, treated as if he were illegitimate. I do not refer to daughters, because daughters were placed on an entirely different footing with respect to inheritance. This so-called compromise approved itself not only to the Commission but to the Bombay Government; but with all deference to those high authorities it appears to me that, so far from being a compromise, it was a complete surrender of the principle at stake. The practical effect of the proposals of the Commission would be to place the non-Khojá widow for all the purposes of the Bill on the same footing as a concubine, and the children of a non-Khojá wife on the same footing as bastards; and there is not much difference between doing this and declaring the marriage invalid.

"Now, there are to my mind serious objections on principle to the acceptance of this proposal. Although in legislation of this kind, which is avowedly an attempt to define and make more precise certain usages and customs, we are bound to follow as closely as we can the usages and feelings of those for whom we are legislating, yet there are limits to the distance which we are justified in going in this direction, and the legislature cannot, in my opinion, go as far as the Courts of law. There are, as we all know, certain customs and usages which a Court of law declines, and very properly declines, to enforce on the ground that they are immoral and contrary to public policy. But there are also customs which a Court of law might feel itself bound to recognise or even to enforce, but which nevertheless the legislature would hesitate to impress with the seal of its authority. It is one thing to recognise a rule as existing, but quite another to give it the *imprimatur* of the legislature as a rule which ought to exist. Under what circumstances and to what extent the legislature would be justified in interfering to set aside restrictions on marriage based on religious or caste differences is a question on which I need not enter, and about which there would probably be some difference of opinion. But on one point I think we should be all agreed, and that is that we should not interfere by legislation to enforce such restrictions. At least I for one would never be a party to any legislation which should throw a doubt on the validity of mixed marriages.

"But the argument against adopting the proposals of the Commission goes further than this; for although the majority of Khojás look with disapproval on marriages of this kind, and possibly regard them as sinful,—opinions with which we have not the slightest wish to interfere,—yet, as I have said, it does not appear to have been even asserted that such marriages are by existing Khojá law or custom invalid. We are not now proposing to pass a law defining or amending the law of marriage among Khojás; and in a Bill which is not dealing specifically with the subject of marriage it would be manifestly improper to throw doubt by a side wind on the validity of certain marriages which, according to existing law and usage, are perfectly valid.

"Accordingly, in the Bill which I am asking leave to introduce you will find no distinction made between Khojá widows and non-Khojá widows, and no definition of an 'alien son.' The Bill defines 'son' to be a legitimate son, and leaves

'widow' undefined, and then proceeds to declare the rights of sons and widows, trusting to the Courts to decide as they will on principles lying outside the law of succession who are legally entitled to the status of sons and widows.

"Whilst I am on the subject of definitions, I may mention that I have omitted the definition of 'undivided family,' which was to be found in the Commission's Bill. The institution of the undivided family appears to prevail among the Khojás, and to resemble, but to be by no means identical with, the undivided family of Hindu law. Now, he would be a bold man who would attempt to define precisely and exhaustively the characteristics of the Hindu undivided family, but it would require still greater boldness to attempt to define the undivided family with a difference which is to be found among the Khojás. It is true that the Commission had attempted such a definition, but when the matter came to be examined it was found that the definition would not hold water. Under these circumstances, we thought it the more prudent course to leave the term undefined.

"The next point on which the Bill departs from the recommendation of the Commission relates to the succession of remote relations to the inheritance of a person who dies intestate. The Commission's Bill admitted to the succession only those of the 'more distant relatives' of the intestate who were on the father's side, and confined it to such of them as are within the seventh degree of kindred. On failure of this limited class of distant kindred, section 42 gave the property 'to the *jamát* of that sect of the Khojás to which the intestate belonged at the time of his death, to be held and applied according to to the customs of the said *jamát*.' Even this did not satisfy the two dissenting members of the Commission and some of the other adherents of His Highness Ághá Khán, who, as Imám, was the person chiefly interested in the succession of the *jamát*. They contended that the *jamát* should come in after the nearer relations. This point was very carefully considered by the Government of India in consultation with the Bombay Government, and the conclusion they came to was that it was impossible to exclude the heirs of deceased persons in favour of any such institution as a '*jamát*' or any person or authority representing such an institution. Of course, it is quite open to any Khojá who desires that his property should be devoted to any charitable or religious purpose, or should be enjoyed by any spiritual person for whom he entertains a special veneration, to dispose of his property by will, or otherwise in accordance with law; but if he dies intestate, it would be contrary to all established principles to enact that his property should devolve otherwise than upon his relatives.

"Apart from this objection on the ground of principle, there appear to be practical objections to the proposal as formulated by the Commission. You ask what a *jamát* is. It appears from Sir Joseph Arnould's judgment in one of the cases to which I have referred that it is an assembly in council of all the adult male members of the Khojá community of the place. Now, of course, it is obvious that doubts might arise as to the constitution of a *jamát* with respect to the religious belief, the residence of the deceased, his attendance at the *jamát*, and on other similar matters. Then there might be doubts as to who were the other persons actually belonging to the *jamát* to which the deceased belonged so as to be entitled to the property; and further there might be doubts as to how the property of a deceased intestate Khojá was to be held and the objects to which it was to be applied. It is quite true that the Bill prepared by the Commission proposed to say that the property was to be held and applied according to the customs of the *jamát*; but if you refer to Sir Joseph Arnould's judgment, you will find that, as a matter of fact, there are no customs at all to look to." (The Hon'ble MR. GIBBS.—"Excepting as to dinners, I think.)" "There may possibly be customs as to dinners, but the fact appears to be that, though a *jamát* collects large sums of money through its officers, it only does so on behalf of the Imám; the money collected is passed on to him, and if the *jamát* wants any portion of it for its own purposes, such as the dinners to which Mr. Gibbs has referred, or the keeping up of the *jamát-kháná* (the council-room or guildhall of the community), it can procure it only as a grant from the Imám. Practically, therefore, to give the money to the *jamát* is to give it to the Imám, and it appears to be absolutely in the discretion of

the Imám to spend the money as he pleases; and it appears from the judgment of Sir Joseph Arnould that the late Imám used to devote the money derived from this source to such purposes as horse-racing. Practically, therefore, if you give the succession to the *jamát*, it is the same thing as giving succession to the Imám, and the property may be devoted by him to such purposes as he thinks fit, whether religious or secular. It has been said that there is practically no difficulty in ascertaining how the money ought to be spent, but it is quite clear that we cannot legislate on a basis such as this. We should have to define the constitution of the *jamát*, and we should have to define carefully how money belonging to the *jamát* should be applied, and it would be impossible to place the property at the absolute disposal of any individual, in whatever degree of veneration he might be held. That being so, we have excluded the *jamát* from the succession, and the Bill extends the succession to relatives of the intestate, both on the father's and on the mother's side, without limit of degree, and then goes on to apply the ordinary rule which makes the Crown the ultimate heir in the very rare occasions in which the owner of property dies and leaves no person entitled to succeed under the ordinary provisions of law.

"One of the most difficult parts of the Bill—to pass to another subject—was that which relates to the rights and interests of a widow or mother taking by succession in cases where there are in existence certain male relations entitled to the inheritance subject to her rights. The interest of a Khojá female succeeding under these circumstances resembles the well-known estate of the Hindu widow, but with very important differences, some of which are not easy to understand or explain. The provisions of the Bill on this subject have been worked out with very great care by Mr. Fitzpatrick, who has devoted an immense deal of trouble to the Bill, and are merely a development, with the requisite amplifications and the additions of the necessary machinery, of the proposals formulated by the Commission. On one point we have departed, not indeed from the substance, but from the language, of the Bill prepared by the Commission. They proposed to call the widow's interest a life-estate, and to describe those who came after her as 'reversioners.' But terms like these, borrowed from the highly technical and artificial nomenclature of English law, are always apt to suggest false analogies when applied to Hindu legal conceptions, and we thought it better to discard them. For the purpose of describing the position of the Khojá female taking the limited estate which is given her under this Bill, we have suggested the term 'restricted owner.' The chief advantage of this term is that it has not already any technical meaning, but it is quite possible that some one may be able to suggest some more appropriate phrase, and, if so, we shall be only too glad to adopt it. The rights and liabilities of this restricted owner are carefully defined in the Bill; but I will not dwell on them now, because they are of a very technical character and will be found fully explained in the Statement of Objects and Reasons. As to the power of alienation which should be given to a widow or mother taking by succession, there was not a complete agreement among the members of the Commission. His Highness Aghá Alí Sháh and some of his adherents were anxious to give her somewhat larger powers of alienation for religious purposes; but on this point the Government of India, after hearing the arguments adduced on both sides, came to the conclusion that they ought to support the views of the majority of the Commission. So much as to intestate succession.

"In dealing with the wills of Khojás, the Bill, following generally the lines of the Hindu Wills Act, proposes to apply to them certain sections of the Indian Succession Act with modifications; but there are difficulties, with which some of us are familiar, connected with the construction of the Hindu Wills Act, which made it necessary to depart in some points from the form and language of that measure. The difficulties to which I refer are these. The Succession Act contains provisions which give or assume the existence of a power of disposition by will in favour of unborn persons. The Hindu Wills Act applies these provisions to certain Hindus, but qualifies their application by the proviso that nothing in the Act is to authorize a Hindu to create in property any interest which he could not previously have created, that is to say, could not have created before the passing of the Hindu Wills Act. Now, in the famous

Tagore case, which was pending when the Hindu Wills Act was passed and was decided shortly afterwards, the Judicial Committee of the Privy Council held that a Hindu could not under his own law, as unaffected by our legislation, make any disposition by will in favour of an unborn person; and the High Court at Calcutta, in a judgment delivered a short time ago, and against which no appeal has, so far as I know, been lodged, have decided that, under the proviso in the Hindu Wills Act, when read in connection with the decision of the Judicial Committee in the *Tagore* case, a Hindu has no power to make a disposition by will in favour of an unborn person, notwithstanding the incorporation in the Hindu Wills Act of certain sections which imply the existence of such a power; that is to say, they have held that the power of a Hindu to leave property by will to an unborn person is precisely the same as it was before the Hindu Wills Act was passed; in other words, that he has no such power at all. But the Judges made some strong remarks as to the inconsistency between the language of the incorporating Act and the language of the sections which it incorporated. After those remarks it was quite impossible to take the Hindu Wills Act as a precise model for legislation in the present case, and, practically, two courses lay open to us, either to give Khojás the same power of disposition in favour of unborn persons as is given by the Indian Succession Act, or else to place them in the same position as Hindus under the Hindu Wills Act are declared by judicial decision to occupy; that is to say, the position of not having any power to make such a disposition by will. It was clear that the question as to which of these two courses should be adopted stood on grounds altogether independent of those on which the perpetuity question among Hindus had been discussed; for it must be borne in mind that the Khojás are not Hindus, although they have in certain particulars retained some of their customs and usages. Under these circumstances, the Government of India consulted the Bombay Government as to which of the two courses should be adopted, and intimated in their communication that they would be willing to adopt whichever of the two courses might be considered most expedient having regard to existing practices and usages among the Khojás. The reply which we received was to the effect that, as far as appeared, there was no recognized definite rule among the Khojás bearing on the point; that it was unlikely that any attempt had hitherto been made among them to create by will an interest in favour of an unborn person; that there was thus a *tabula rasa*; and that it was quite open to the legislature to legislate on the subject as it thought best, without any fear of violating an existing custom or of running counter to any prejudice or desire of the Khojá community. This being so, the Government of India have come to the conclusion that it is not desirable to confer by law on the Khojás any power of testamentary disposition in favour of persons not in existence at the time of the testator's death; and accordingly all portions of the Indian Succession Act which confer or assume the existence of such a power, have, as far as practicable, been omitted from the sections which we have incorporated, and we intend to insert a proviso to the effect that nothing in the portions of that Act made applicable shall confer such a power. It appears to me that, if the question is to be settled by reference to considerations of general expediency apart from any pre-established usage, the balance of convenience is in favour of not superadding to the complications which arise out of Hindu family law the further complications which we all know are apt to arise out of testamentary settlements.

"I may add that, in order to meet the objections which were urged by the Calcutta Judges against the practice of wholesale incorporation by reference, I propose to put in a schedule to the Bill those sections of the Indian Succession Act which are to be incorporated in it, showing precisely the modifications which are to be made in the sections as incorporated.

"These, I think, are the only points in connection with the Bill on which I need touch at the present stage, and I will merely conclude by apologizing for the length to which I have been compelled, by the nature of the subject, to carry my explanations."

His Excellency THE PRESIDENT SAID:— "It is needless that I should say that ample time will be given for the consideration of this Bill by the parties concerned before it is proceeded with in its various stages."

The Motion was put and agreed to.

INDIAN SALT ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN introduced the Bill to amend the Indian Salt Act, 1882, and moved that it be circulated for the purpose of eliciting opinion thereon.

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

PANJAB COURTS BILL, 1884.

The Hon'ble MR. BARKLEY moved for leave to introduce a Bill to amend the law relating to Courts in the Panjáb. He said:—

"The object of this Bill is to make the changes in the law under which the Panjáb Courts are now constituted, which are required for the purpose of giving effect to the arrangements for the improvement of the judicial agency and the reform of the appellate system, which form part of the scheme for the reorganization of the civil administration in the Panjáb recently sanctioned by the Secretary of State for India on the recommendation of Your Lordship's Government. These changes are so numerous that the most convenient mode of carrying them out appears to be to repeal the Panjáb Courts Act of 1877 and include the whole of the law on the subject, except so far as it is to be found in the Criminal Procedure Code, in the Bill which I have now the honour to ask leave to introduce.

"The arrangements proposed involve a further step in the direction of relieving from judicial duties officers employed in the revenue and general administration of the Province. When the Panjáb Administration was organized, thirty-five years ago, all its officers, from the members of the Board of Administration down to the Tahsíldárs, were invested with civil and criminal jurisdiction in addition to their revenue and executive functions, and there can be no doubt that this was the arrangement best suited to the earlier days of the administration of a new province, and that it was attended with many advantages so long as it was possible to maintain it. But it was almost inevitable, that, in the administration of an extensive province like the Panjáb, some division of labour should become necessary. The growth of population, the extension of agriculture, the development of trade, the steady increase of litigation, the introduction of a stricter system of law and procedure, and the increasing demands of the central administration upon local officers, have all added to the amount of work to be done, while the simplicity of system which enabled a single officer to control the administration of a district or division in all departments has disappeared as departments have been multiplied. It has therefore become necessary from time to time to increase the number of officers, and to arrange for the distribution of work between them. When the Board of Administration was dissolved, the Chief Commissioner was relieved of judicial functions by the appointment of a Judicial and a Financial Commissioner, of whom the former became the head of the Judicial Department. The duties of the Judicial Commissioner, however, were by no means purely judicial. He had the control of important branches of the administration, such as the police and the public works of the province, and it was not until the Chief Court took the place of the Judicial Commissioner, early in 1866, that any Court, except a few Small Cause Courts, could be said to be presided over by officers exclusively engaged in the judicial administration.

"In 1875, the increasing pressure of work made it necessary, in order to give Deputy Commissioners and Tahsíldárs time for their other duties, to relieve them, in a large measure, of civil judicial work. This was done, under Act XIV of 1875, by the appointment of a number of special officers, known as Judicial Assistants and Munsifs, upon whom the powers of a Deputy Commissioner and of a Tahsíldár were respectively conferred, and these officers have been mainly, though not always exclusively, employed in the discharge of judicial functions. The Commissioner of Pesháwar has also been practically relieved of his judicial duties by the appointment of a Civil and Sessions

Judge, and some other Commissioners have been partially relieved of judicial work by the appointment of two Additional Commissioners.

"It has now become necessary to make further provision for the judicial duties at present performed by Commissioners and Additional Commissioners and by the Civil and Sessions Judge of Pesháwar, and as the number of appeals to the Chief Court is annually increasing and has for several years been greatly in excess of what three Judges—the permanent strength of the Court—could dispose of, it has been thought advisable to reduce the number by giving greater finality to the decisions of Courts subordinate to the Chief Court. It is, therefore, now proposed to constitute seven Divisional Courts, consisting ordinarily of two Judges each, which will take the place of the Commissioners' Courts and of that of the Civil and Sessions Judge of Pesháwar, and at the same time to make considerable alterations in the law regarding the right of appeal in civil suits. The number of Judges sanctioned for these Divisional Courts being thirteen, it is proposed, in order to complete the seven Courts, to take power to appoint the Commissioner of a Division to be one of the Judges; but, unless where this is done, Commissioners will be relieved of the judicial duties now devolving upon them. It is, however, proposed to transfer certain classes of suits relating to land, which can be better disposed of by Revenue-officers than by purely judicial officers, from the Civil to the Revenue Courts, and in these cases Commissioners will still exercise appellate jurisdiction. There is no doubt that, in consequence of the proposed changes, the work of Commissioners will be greatly reduced, and this renders possible a reduction in the number of Commissioners east of the Indus, as well as the abolition of the appointments of the Civil and Sessions Judge of Pesháwar and the Additional Commissioners.

"It is proposed to empower the Chief Court to make rules for the exercise of the powers of the Divisional Court by one of the Judges of that Court, subject to the proviso that no order other than an interlocutory order, and no decree, sentence or decision of any Court, should be reversed by any Judge sitting alone. The Chief Court at present possesses an analogous power to make rules for the exercise of its own powers by one or more of its Judges.

"The reason for proposing that these Courts should consist of two Judges was that it was considered that this would strengthen them for appellate purposes and allow of finality being given to their decisions passed in appeal. There is of course the drawback that more Judges will be required to do the same work, and this may make it more difficult to fill up the appointments properly at first. But the greater number of appointments of this class may induce more officers to prepare themselves to fill them; and, where two Judges concur in reversing or modifying the decision of a subordinate Court, there will be less reason for allowing a further appeal than where a single Judge of appeal has come to a different decision from that of the first Court on the same evidence.

"For the Court of the Deputy Commissioner, again, it is proposed to substitute the Court of the Assistant Judge, and to relieve Deputy Commissioners of their civil judicial functions, except in a few of the lightest districts, where the Deputy Commissioner may be empowered to act as Assistant Judge in addition to his other duties.

"It is provided that the new Divisional Court should be the District Court or principal Court of original civil jurisdiction within its division, power being reserved to Government to confer all or any of the powers of a District Court upon an Assistant Judge, in order to provide for the disposal of certain classes of cases which are only cognizable by a District Court.

"The jurisdiction of the Divisional Court and of the Assistant Judge in original civil suits will, like that of the Deputy Commissioner at present, be unlimited as respects the value or amount in litigation, and power is taken to give certain Subordinate Judges jurisdiction extending to Rs. 5,000, to take the place of the officers now exercising the full powers of an Assistant Commissioner, whose jurisdiction extends to Rs. 10,000. All other officers empowered to decide civil suits, including the Munsifs, will be invested with the powers of a Subordinate Judge of the second, third or fourth class, that is, with powers to decide suits the amount or value of which extends to Rs. 1,000, Rs. 500 or Rs. 100, respectively.

"Power is also taken to invest Assistant Judges and Subordinate Judges with certain Small Cause Court jurisdiction, as may now be done in Bengal, the North-Western Provinces and Oudh, under the corresponding Acts applicable to those provinces.

"The changes made by the Bill in the appellate system are mainly directed to reducing the number of appeals at present allowed. The second appeal on a question of law or custom now allowed by the Civil Procedure Code in suits other than those which would be cognizable in a Small Cause Court, and the further appeal on the whole case, when an Appellate Court has reversed or modified the decree of a Court of original jurisdiction, which is permitted by sections 38 and 39 of the Panjáb Courts' Act of 1877, are both taken away, and the decisions of Appellate Courts are made final, except that the Judges of a Divisional Court are enabled, when they differ as to the judgment which should be passed on an appeal, or when some question of law or custom or general interest is involved, to grant a certificate permitting a further appeal to the Chief Court, if they think the case of sufficient importance to justify a further appeal. The abolition of second appeals takes away a great part of the appellate work for disposal by the Chief Court, while the abolition of further appeals, with the above exception, will greatly relieve the Divisional Courts.

"To admit of finality being given, as far as possible, to appellate decisions, appeals to Assistant Judges are confined to suits not above Rs. 500 in value, either of the Small Cause Court class, or of any other class which the Chief Court, with the sanction of the Local Government, may determine to put on the same footing for purposes of appeal; and appeals in suits above Rs. 5,000 in value, as well as appeals in any other suits decided by the Divisional Court, are declared to lie to the Chief Court, while all other appeals allowed by law will lie to the Divisional Court. A few first appeals now cognizable by Commissioners and all further appeals hereafter to be allowed will thus lie to the Chief Court, while appeals in some cases now cognizable by Deputy Commissioners will lie to the Divisional Court, which will be relieved of all further appeals and a few first appeals.

"It being proposed, as already mentioned, to transfer the jurisdiction in certain classes of suits relating to land to the Revenue Courts, a chapter has been added to the Bill making these cases cognizable by the Revenue instead of by the Civil Courts, and containing other provisions rendered necessary by the transfer. Most of these classes are similar to those made cognizable by Revenue Courts by section 93 of the North-Western Provinces Rent Act, 1881; and, while appellate jurisdiction is not given, as in that Act, to the Civil Courts of appeal, but to the superior Revenue-authorities, thus entirely relieving the Civil Courts of a class of cases which Revenue-officers are likely to be in a better position to dispose of satisfactorily, the provisions of the Bill as to the powers of Revenue Courts and as to the cases in which first and further appeals should lie are in part based on the model furnished by that Act. This part of the Bill has undergone less discussion than the chapters relating to the Civil Courts, but it would be difficult to adapt the provisions of the Bill as to appeal in civil suits to the Revenue Courts, which will be differently constituted from the Civil Courts; and it is at the same time not desirable to continue the system of second appeals allowed by the Civil Procedure Code, or to allow further appeals to the same extent to which these are now permitted by the Panjáb Courts' Act. The provisions now proposed will restrict further appeals to a few of the more important classes of cases, the first appeal in which will lie to Commissioners and the further appeal to the Financial Commissioner.

"Power is taken for the Local Government, with the previous sanction of the Governor General in Council, to make rules regulating the procedure of the Revenue Courts in the cases thus transferred to their jurisdiction, it being at the same time provided that, until such rules are made, these Courts should be guided by certain parts of the Civil Procedure Code, and that the Financial Commissioner should be deemed to be the High Court within the meaning of that Code.

"As sanction has been given to the appointment of a second Financial Commissioner, provision is also made for the distribution of business

between Financial Commissioners, and power is given to one Financial Commissioner to refer any question arising in an appeal pending before him to the other for his opinion thereupon.

"Owing to the greater finality given to appellate decisions by the provisions of this Bill, the revisional jurisdiction of the Chief Court under the Civil Procedure Code, sections 617 and 622, is certain to be more largely resorted to than hitherto, and some supplementary sections have, therefore, been added to the Bill, interpreting certain expressions to be found in those sections, and increasing the fee leviable on an application to the Chief Court under section 622 for the exercise of its revisional jurisdiction, but empowering the Court to direct the refund of this fee when the application has been successful, if it thinks proper to do so.

"Other minor modifications of the law will be found to be sufficiently explained in the Statement of Objects and Reasons. The only one of these which need be mentioned now is that, in section 21, interlocutory orders are excepted from the proviso declaring that a single Judge of the Chief Court, in the exercise of his appellate jurisdiction, may not reverse the order of any Court; and the Chief Court is also enabled to provide by rule for the constitution of a full bench of the Court, and to delegate to one of its Judges the power of determining what Judges shall sit alone or as a bench of the Court. This is necessary, as, although the present Panjáb Courts' Act provides for the disposal of certain cases by a full bench, it contains no explanation of this expression, and a doubt has therefore arisen whether a full bench can be constituted when, from any cause, it is not possible for all the Judges for the time being appointed to the Court to be present. Thus, if a Judge is absent on leave and no successor has been appointed, as happened on two occasions last year, or if a Judge is from illness unable to attend Court, it is doubtful whether, under the present law, a full bench sitting can be held. To remove this difficulty, it is proposed that, when the Chief Court consists of more than three Judges, it may by rule declare what number of Judges, not being less than three, shall constitute a full bench and prescribe the mode of determining what Judges should sit together for the purpose.

"In the High Courts established by Royal Charter, the Chief Justice, under the Act of Parliament providing for the establishment of those Courts (24 & 25 Vic., c. 104, section 14) regulates the sittings of the Judges either alone or as division benches. In the Chief Court, there being no Chief Justice, and no such power being given to one of the Judges by the existing law, the power to regulate the sittings of the Judges resides in the Court as a whole; and, unless this power is conferred by law upon the senior Judge (who is declared to be the Chief Justice within the meaning of the Criminal Procedure Code), the Court should be authorized to delegate the power subject to any rules it may make for its exercise.

"I need only, in conclusion, refer to two other questions which have been discussed in connection with the subject of the present Bill, but with which it does not deal. These are the amendment of the description of the cases cognizable by Small Cause Courts contained in section 6 of Act XI of 1865, and the mode of determining the value of a suit for purposes of jurisdiction, which is, in many cases, very different from its value for the purpose of levying a court-fee on its institution. These questions are as important in other parts of India as in the Panjáb, and can be more appropriately dealt with in connection with the amendment of the general law than in a local Bill; and the former of them, at least, will, it is understood, be taken up separately."

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY also introduced the Bill.

The Hon'ble MR. BARKLEY then moved that the Bill and Statement of Objects and Reasons be published in the *Panjáb Government Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 9th July, 1884.

SIMLA;
The 1st July, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ALTERATION OF CLAUSE 6 OF THE "NOTICE TO PILGRIMS" ATTACHED TO PILGRIM PASSPORTS.

No. $\frac{5}{175-91}$.

Extract from the Proceedings of the Government of India in the Home Department,—(Sanitary), under date Simla, 3rd July 1884.

Read—

Home Department Resolution No. $\frac{4}{198-214}$, dated 12th July 1882.

Telegram from the Secretary of State, dated 20th February 1884.

Telegram to the Secretary of State, dated 22nd February 1884.

Despatch from the Secretary of State, No. 57 (Statistics and Commerce), dated 24th April 1884.

RESOLUTION.

It having been brought to the notice of the Government of India that Clause 6 of the "Notice to Pilgrims," attached to the passport issued under the Resolution cited in the preamble, is liable to be understood as implying that the pilgrim holding the passport is entitled to pecuniary assistance from the British Consul at Jeddah, His Excellency the Governor General in Council is pleased to direct that the Clause be altered as follows :—

"This passport is granted solely for the convenience of the pilgrim. The holder thereof should apply to the British Consul at Jeddah for advice in case of difficulty."

ORDER.—Ordered, that a copy of the above Resolution be forwarded to all Local Governments and Administrations and to the several Departments of the Government of India for information and guidance. Also, that it be published in the *Gazette of India* and in all Local Gazettes for general information. Local Governments should arrange for its translation and publication in the Vernacular Gazettes, and amend the passports issued accordingly.

A. MACKENZIE,
Secretary to the Government of India.

PUBLIC NOTICE.

ALL persons proposing to make a pilgrimage to Mecca are hereby warned that they will be required by the Turkish Government to perform quarantine for at least 10 days on the Island of Camaran before being allowed to go on to Jeddah, during which period the pilgrims will have to provide for all their expenses. They should, therefore, make certain in taking their passages that the steamer starts so as to arrive at Jeddah in time for the Haj, after making due allowance for the detention at Camaran. During the quarantine at Camaran the Turkish Government require the pilgrims to pay certain fees besides arranging for their own provisions, and ships which have evaded quarantine are not allowed to land their pilgrims at Jeddah.

Pilgrims are, therefore, warned that before starting they should see that they have sufficient funds for the expenses of quarantine and of the Haj, and for their journey back to India. The Mahomedan Vice-Consul at Jeddah, Abdur Ruzzak, suggests that each pilgrim should have at least Rs. 300 with him when he leaves India after having paid his passage to Jeddah. No pecuniary assistance can be obtained from the British authorities at Jeddah.

Intending pilgrims should apply to the Protector of Pilgrims, Bombay, and to the Port Officer at other ports for information as to the latest safe date for sailing.

HOME DEPARTMENT,
SANITARY,
Simla, 3rd July 1884.

A. MACKENZIE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2nd JULY 1884.

GENERAL REMARKS.—Rain in varying quantities has fallen throughout the Madras Presidency. In Mysore the fall is still insufficient for standing crops, but Coorg continues to receive good rain. Showers have fallen in most districts of the Bombay Presidency, but more is generally wanted everywhere to facilitate *kharif* sowings. In the Berars and Hyderabad there has been very little rain during the week. The Central India States and Rajputana report rain from most parts, but it was deficient compared with that of the previous week. In the Central Provinces good rain continues to fall and was especially heavy in the eastern districts. Good rain has also fallen in all districts of the North-Western Provinces and Oudh, except Farukhabad, Meerut, and Saharanpur, where the weather is close. In the Punjab the fall has been much below that of last week and more rain is much wanted, especially in the south-east. British Burma continues to have heavy rain, and in Assam the fall has been above that of last week. The rains appear to have set in throughout Bengal, and heavy falls are reported from several districts. More rain is however wanted in places to facilitate transplanting operations.

The latest weather report of the Meteorological Department, dated the 3rd instant, states that on the 2nd idem there was no rain over the Deccan, the Carnatic and Ganjam coasts, nor over Rajputana, Sind, or a large portion of Central India, but that in all other places there have been falls of more or less importance.

Agricultural operations are in active progress throughout India and prospects are so far not unfavourable. Harvesting continues in Madras, and the standing crops in that Presidency and in Mysore are generally in fair condition. Rice is being transplanted in Bengal and Assam, and standing crops are in good condition. In Cachar the prospects of tea continue unfavourable; the plants are suffering from blight, and it is expected that the yield of tea will be much below that of last year. Rice sowings have commenced in British Burma.

Cholera and small-pox are generally prevalent throughout the country, but are abating in the North-Western Provinces and Oudh, Punjab, Bengal, and British Burma.

Prices are generally stationary, with local fluctuations.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 2nd)		
Bellary ...	·08 (average)	More rain much wanted. 17 deaths from cholera.
Kurnool ...	·09 (average)	Progress of sowing arrested from want of rain. Small-pox and cattle-disease in parts.
Ganjam ...	·85 (average)	Fever and small-pox slight in parts.
Kistna ...	·53 (average)	River below anicut. Small-pox and fever in places.
Chingleput (Madras) ...	·04 (average)	Standing crops fair, but in want of rain in parts. Harvest paddy, yield half the average. Small-pox prevalent; 15 deaths from cholera.
Coimbatore ...	·08 (average)	Standing crops generally fair but in want of rain. *Cholum* damaged by insects in two talukas. Harvest dry crops outturn below average. Fever in three talukas; 9 deaths from cholera.
Tanjore ...	·30 (average)	Standing crops generally good, but in want of rain in parts. Rivers very low. Harvest paddy and indigo outturn below average. 611 deaths from cholera.
Madura ...	·10 (average)	Standing crops fading from want of rain. Small-pox slight in parts; 8 deaths from cholera.
Malabar ...	3·62 (average)	More rain wanted in parts for transplanting young paddy. Small-pox slight in 9 talukas and fever in 8; 8 deaths from cholera.
Travancore ...	·33	Rain insufficient. Fever and small-pox in parts. *General Remarks.*—General prospects moderate.
Bombay—(July 2nd)		
Karachi ...	Rain previous week ·78; average of 13 stations.	River at Kotri on 30th, 14 feet 9 inches against 11 feet 9 inches on same date last year. Fever in five talukas. Cattle-disease in three talukas. *Kharif* sowings not yet over. Small-pox in 19 villages in districts; 14 fresh cases, 7 deaths, 13 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 26, 30, and 32, in Dadu, 36, and 40, in Tatta, 26, 30 and 32, and in Mirpur Batoro, 22, 34 and 34 pounds per rupee respectively.
Hyderabad ...	.....	River at Kotri on 1st, 14 feet 9 inches against 11 feet 8 inches on same date last year. High winds prevail. Small-pox in eight, fever in four, and cattle-disease in one taluka. Wheat 28, *bajri* 35, *juari* 38, red rice 25 and white rice 20 pounds per rupee.
Ahmedabad ...	No rain	Manuring operations continue. One cholera case in the city which was fatal. Wheat 30 and *bajri* 32 pounds per rupee.
Baroda ...	No rain	Cholera subsiding; 4 deaths. Small-pox in Damnagar, Und and Amreli. Sowing operations commenced in many places. *Bajri* 27 and rice 20 pounds per rupee.
Surat ...	·06	Total rainfall 4·35. Sowing progressing. 2 cases of cholera in Jalalpur. *Juari* 30 and *nagli* 40 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik ...	.....	Rain holds off; it is much wanted. Public health generally good. Small-pox in parts of Nasik, Sinnar, Chandor and Kalvan. Cattle-disease in Kalvan. Measures in progress to kill locusts in Niphad. *Bajri* 28½, wheat 34½ and rice 21 pounds per rupee.
Colaba (Bombay) ...	Light showers daily, except on 25th and 30th. Total of week ·37.	Total rainfall to date 13·43 being 8·98 below average. Average abnormal temperature 1° warm; vapour in air normal; wind normal.
Poona ...	Light showers in all talukas, except Indapur.	Rain wanted throughout collectorate except for rice in Junnar and Naval talukas. No crops yet sown. Prices—*bajri* 33 and *juari* 36, in Poona, *bajri* 25 and *juari* 26 pounds per rupee.
Ahmednagar ...	·91 Akola; ·79 Sangamner; ·74 Parner; none in Nagar, and slight in other talukas.	Sowing of early *kharif* crops in progress in Sheogaon, Sangamner and Akola. Sowing operations delayed elsewhere for want of sufficient rain. Slight cattle-disease in Newasa and Kopargaon. A few locusts have appeared in Kopargaon. *Jowari*—maximum 60 pounds in Sangamner, minimum 35 in Karjat; *bajri*—maximum 48 pounds in Sangamner, minimum 30 in Kopargaon.
Sholapur ...	·11; Barsi, ·02; Madha, ·20; Karmala, ·03; none elsewhere.	*Kharif* sowings delayed for want of rain, which is urgently wanted. *Juari* 40 pounds 4 tolas and *bajri* 40 pounds 4 tolas per rupee.
Dharwar ...	·02 at Banyal; none in Navalgund, Nargund, elsewhere varying from ·06 in Mundargi to ·93 in Kod.	Rice sowing prevented in Dharwar and Bankapur talukas for want of moisture. Sowing of other crops also retarded owing to the same cause and in some places seed has been sown in dry ground. Heavy rain required throughout the district as scarcity of drinking-water is becoming worse. Epidemic cholera in all talukas, severe in Hubli, Gadag and Karajgi talukas. Prices rising.
Kanara ...	Karwar, 1·73; Kumpta, 2·29; Sirsi, ·5; and Haliyal, ·95.	Total rainfall 22·0. Rice plants coming up in Karwar. Common rice, 12 seers; district average 15 seers per rupee. Small-pox in Siddapur, 6 cases; 2 deaths in Karwar, 8 in Kumpta, 6 in Bhatkal, 5 in Sirsa, 1 in Haliyal and 1 in Supa.
Rajkot ...	No rain	Weather cloudy. Sowing operations in progress. 60 cases of cholera in Bodia and Bhavnagar, 55 fatal. Fever in Navanagar and Jetpur. *Bajri* 32 and *juari* 39 pounds per rupee. *General Remarks.*—Slight rain in parts of 14 districts. *Kharif* sowing retarded in most districts for want of sufficient rain. Scarcity of drinking-water in several talukas of Dharwar. Cholera in parts of 10 districts. Fever, cattle-disease and small-pox continue in some districts.
Bengal—(July 2nd)		
Chittagong ...	1·76	Weather bright. Transplanting of *amun* continues. Early paddy progressing. Prices of food-grains steady. Sporadic cases of cholera reported.
Dacca ...	3·29	Harvesting of *aus* paddy continues. Sowing of *roachia* paddy commenced. Prospects of crops good.
24-Pergunnahs (Calcutta) ...	·5....	Sowing of *amun* going on. Early paddy, jute, and sugarcane doing well. Price of common rice varies from 13½ seers to 16 seers per rupee. Public health good. Cattle-disease in thanas Hasanabad and Diamond Harbour. Rivers rising.
Moorshedabad ...	1·25	Weather fine and hot. A break in the rains. Prospects of crops still good. Recent rainfall was insufficient for the time of the year and *amun* seedlings want more rain. Prices almost stationary. Public health good.
Rajshahye ...	1·94	Prospects of standing crops generally favourable. Health good.
Burdwan ...	·76	Agricultural operations going on favourably. More rain wanted. Prospects of crops good.
Rungpore ...	3·54	Transplanting of *amun* paddy commenced. Prospects of crops favourable. Price of rice from 3 to 4 rupees per maund. Public health fair.
Bhagalpur ...	3·62	Paddy and *rahur* being sown. Transplanting of *aghani* paddy going on. Prospects of crops hopeful. Rice 13 seers 14 chittacks per rupee.
Purneah ...	3·07	Prospects of crops very fair; weeding continues. Common rice 16 seers per rupee. Rivers rising. Health fair.
Patna ...	4·63	Sowing of *bhadoi* crops going on. *Makai* and *kowni* doing well. More rain required for transplanting paddy. Paddy seedlings look well. Public health good.
Durbhunga ...	2·66	Sowing of *bhadoi* crops nearly complete. Transplanting of paddy going on and that of *murwa* commenced. Prices falling slightly. Public health good.
Hazaribagh ...	2·70	Weather seasonable. Cultivation going on rapidly; *bhadoi* crops being sown. Prices of food-grains continue high. Cholera, small-pox and cattle-disease still continue in some places, otherwise public health good.
Cuttack ...	4·52	Weather seasonable. *Sarad* paddy germinating and plants growing well. Price of rice rising; sporadic cases of cholera reported, otherwise public health good. *General Remarks.*—The rains appear to have set in throughout the province. The rainfall was heavy in Koolna, Bogra, Darjeeling and Dacca. More rain is required in some places for transplanting *amun* paddy. Agricultural operations going on vigorously. Transplanting of *amun* commenced in many places. Cotton being gathered in a few districts and a fair outturn expected. Early paddy progressing well. Prices of food-grains almost stationary. Public health good, though cholera and small-pox still linger in some places.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—		
Benares (July 1st)	1·1 at Chandauli and Gangapur.	Slight cholera, small-pox and fever linger in places. Sugarcane prospects fair average. Ploughing commenced generally. Sowing in places where rain has fallen. Prices stationary.
Allahabad („ „)	Heavy shower last night and another this morning.	Weather dry and hot with west winds during greater part of the week; but rain has recommenced. There is every sign of abundant rain. Health good. Prices slightly risen.
Gorakhpur (June 30th)	Sadr, 8·8; good rain everywhere.	Rice sowings in progress. Health good. Prices rising.
Jhansi (July 1st)	No rain in pargana Jhansi; good rain elsewhere.	Cholera confined to one village in which there were eight deaths. Scarcity of water and fodder much felt in pargana Jhansi.
Agra (June 30th)	Rain in five parganas, but not general.	*Kharif* sowings begun where rain has fallen. Cholera now very slight in one pargana only, also a little fever in one pargana. Prices steady.
Bareilly (July 1st)	About 1·0 on 24th of last month.	Ploughing progressing. Market slightly rising. Public health good.
Meerut („ „)	No rain	Hot westerly winds drying up moisture. Sowings stopped. Ploughing continues. Health good. Supplies sufficient. Prices fairly steady.
Kumaon („ „)	Rain in early part of week.	There has been a break since. Crop prospects good. Cholera lessening. A few cases of small-pox, otherwise health good. Prices stationary. Cattle-disease continues.
Lucknow („ „)	Rain during the week from 1·2 to 2·7.	Weather continues cloudy. *Juar*, *kodon*, *sawan*, and *arhar* are being sown in places where the fall was sufficient. Health of people and cattle good. Prices steady.
Partabgarh (June 27th)	Rain fell during the week at Sadr 3·0; Kunda 5·5; Patti 2·1.	Ploughing for *kharif* sowings in full swing. Sugarcane doing well. Small-pox abating very considerably.
Sitapur (July 1st)	Rain general and favourable.	Sowings progressing. No sickness reported. Prices show a tendency to fall.
Fyzabad („ „)	Rain during the week 3·5 to 7·6.	Ploughing commenced. Small-pox still in parts of districts. Prices steady.
Rae Bareli (June 30th)	Rain during the week from 1·4 to 3·8.	Small-pox disappearing. Cholera still continues. Markets well stocked. Prices steady.
Cawnpore („ „)	3 to 2·7, rain in district during the week.	Weather close and cloudy. More rain is wanted for *kharif* sowings. Market well supplied and prices show a tendency to rise. General heath of people good.
Farukhabad (July 1st)	.....	Ploughing general since late rain. West winds again during the last few days; but to-day east winds with clouds. No sickness. Markets well supplied. Prices stationary.
		General Remarks.—Good rain has fallen in all districts, except Farukhabad, Moradabad, Meerut and Saharunpore where the weather is very close. Ploughing and sowing for the *kharif* are in progress. Prices are rising slightly in Allahabad, Cawnpore, Bareilly and Moradabad and are falling in Sitapur. Elsewhere they are stationary. Markets are well supplied. The condition of cattle continues good, though scarcity of fodder and water is still felt in Jhansi. Small-pox and cholera have abated and the general health of the population is normal.
Punjab—(July 1st)		
Delhi ...	.....	Prices stationary.
Hissar ...	.....	Health good. Prospects improved by recent rainfall; grass springing up. Sowings commenced on lands dependent on rainfall. Cattle-disease in Sirsa. Prices falling.
Umballa ...	.....	Rain wanted. Health good. *Kharif* sowings in progress. Prices rising.
Jullundur ...	.....	Rain wanted. Health good. Sugarcane being irrigated. *Kharif* ploughings in progress. Prices rising.
Amritsar ...	·60	Health good. Prices stationary.
Sialkot ...	.....	Health of district good. Small-pox in city abating. Ground being prepared for *kharif*. Prices falling.
Ferozepore ...	·10; at Moga, ·70.	Health good. *Kharif* ploughings commenced. Slight rise in prices of wheat and gram.
Lahore ...	1·30	Health good. Prices stationary.
Rawalpindi ...	Slight rain	Health good. Prices rising. *Rabi* outturn above average.
Mooltan ...	.....	Health and crops good. Prices falling.
Dera Ismail Khan ...	.....	Health good. Prospects fair. Prices stationary.
Peshawar ...	.....	Rain wanted. Health fair. Prices stationary.
		General Remarks.—Rain in a few districts, but more wanted, especially in the south-east. Cholera continues in the Kangra district. Small-pox abating in Sialkot city; elsewhere health of the province is generally good. *Kharif* ploughings and sowings are in progress.
Central Provinces—(July 2nd)		
Nagpur ...	·47	Weather cloudy and rainy. Prospects good. Lands being prepared for sowings. More rain wanted. Small-pox and cattle-disease abating. Prices steady.
Jubbulpore ...	3·20	Weather cloudy with copious rain throughout the district. Sowings continue. Health good. Wheat 27 and rice 13 seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces— *contd.*		
Saugor ...	Rain on 1st July 1·47	Weather seasonable. *Kharif* sowings in hand. Small-pox slight. Prices steady.
Seoni ...	3·64	Weather rainy and impeding sowings. Some cattle-disease. Prices stationary.
Hoshangabad ...	2·07	Weather cloudy. Sowings commenced. Small-pox 18 cases. Wheat 21 and rice 9 seers per rupee.
Khandwa ...	.....	Weather cloudy and windy. More rain wanted. Health good. Wheat 21¾, *juari* 22½ and rice 12½ seers per rupee.
Raipur ...	15·75	Rain heavy and incessant, retarding sowings. Health good. Common rice 23½, and wheat 28 seers per rupee.
Sambalpur ...	3·13	Weather rainy and cool. Prospects good. Public health good. Common rice 26¼ seers per rupee.
		General Remarks.—Seasonable rain has fallen throughout the provinces, the fall having been very heavy in the Eastern districts. *Kharif* sowings being pushed on but are in places impeded by excessive moisture.
British Burma—(July 2nd)		
Akyab (June 28th)	9·90	Total rainfall 56·76. Cattle-disease in three townships.
Rangoon („ „)	2·82	Total rainfall 27·54. One death from small-pox.
Bassein („ „)	5·59	Total rainfall 23·03. Very little small-pox and cholera.
Amherst (Moulmein) „)	8·02	Total rainfall 36·92. One death from small-pox.
Toungoo („ „)	3·56	Total rainfall 20·91.
Kyoukphyoo („ „)	12·45	Total rainfall 45·17.
Sandoway („ „)	.....	No report received.
Pegu („ „)	3·60	Total rainfall 31·0. Sowings commenced.
Tharrawaddy („ „)	2·90	Total rainfall 25·95. Slight cholera still exists.
Prome („ „)	1·12	Total rainfall 12·86. Some cholera and small-pox.
Thonegwa („ „)	3·57	Total rainfall 35·14. One death from small-pox.
