N.B.—As regards the figures in column "Total receipts from 1st April 1885 to date," audited figures have been availed of as far as possible.  
(a) Return not received.  
(b) Total receipts from 1st April to 30th June 1884.  
(c) Total receipts from 1st April to 30th June 1885.

(d) Including Rewari-Ferozepore State Railway.  
(e) Total receipts from 1st April to 4th July 1885.  
(f) Total receipts from 1st April to 27th June 1885.  
(g) Total receipts from 2nd April to 12th July 1884.  
(h) Total receipts from 1st April to 5th July 1884.

SIMLA,

The 1st August 1885.

FRED. FIREBRACE, Major, R.E.  
Under-Secret.

## GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR  
THE WEEK ENDING 5th AUGUST 1885.

GENERAL REMARKS.—In the Madras Presidency all districts report rain, but more rain is wanted in Bellary, Ganjam, Coimbatore, and Tanjore. Prospects have improved in Bellary and Anantapur and are generally fair, except in Madura, where they are unsatisfactory. In Mysore the rainfall was slight and insufficient for the young crops. Fodder is reported to be becoming scarce, and ploughing and sowing operations are retarded in places. In Tumkur and Kolar prospects are uncertain; and though they are moderately fair elsewhere, the harvest will depend on the future rainfall. In Coorg the season continues favourable.

General rain is reported from the Bombay Presidency, but more is wanted in parts of Karwar, Ahmednagar, Bijapur, Poona, and especially in Sholapur, Khandesh, and Nasik. The condition of the young crops is generally good, though in places they are reported to be slightly injured by blight and insects. Fodder is scarce in some districts. In the Berars, Hyderabad, the Central India and Rajputana States rain has been general, and the crops promise well.

Little or no rain fell in the Punjab during the week under report. The *kharif* sowings have been nearly completed, and prospects are on the whole good; but more rain is wanted. In the North-Western Provinces and Oudh good rain continues to fall, but a break would now be beneficial. Prospects are everywhere good. Wet weather continues in the Central Provinces, where a break is now wanted in some districts. *Rabi* sowings have commenced, and weeding and transplanting continue.

Rain has fallen throughout Bengal, and prospects are favourable everywhere. Transplanting is progressing favourably, but more rain would be beneficial in some parts. In Central and Eastern Bengal the *bhadoi* harvest is in progress, with prospects of a good average yield of early rice. Seasonable weather prevails in Assam, and agricultural prospects continue good.

In British Burma ploughing, sowing, and transplanting continue.

The public health is generally fair in most Provinces.

Prices are generally stationary, except in the Punjab, where they fluctuate with a tendency to rise. In Bengal the price of rice is still high.

| Presidency or Province and District. | Rainfall for week under report.                                 | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Colaba (Bombay)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Rain every day, total of week, 1·43.                                                                                                                                               | Total rainfall to date 27·99, being 19·88 below average. Abnormal temperature 1° cool on 30th, 1° warm on 1st, nil on 4th, and 2° warm on all other days; vapour in air normal; abnormal wind easterly on 20th and 31st; wind normal on all other days.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Poona                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Rain in four talukas; maximum 4·42 in Maval; minimum, 54 in Poona; slight showers in three talukas.                                                                                | Sowing operations in progress, but more rain wanted for the purpose in three talukas. Cholera in six talukas, 234 cases, 132 deaths. Prices of <i>bajri</i> 28 and <i>juari</i> 35; in Poona <i>bajri</i> 28 and <i>juari</i> 33 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Ahmednagar                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Parner, 15; Shrigonda, 06; Karjat, 07; Sheogaon, 06; Newasa, 03; Sangamner, 12; Akola, 09; Nagar, Rahuri, Kopargao and Jamkhed, nil.                                               | <i>Kharif</i> sowings are almost finished in Jamkhed, Sheogaon, and Akola, and in some villages in Kopargao, Shrigonda, and Karjat, and in progress in Nagar, Rahuri, and Sangamner and in poor soils only in Parner and Newasa; the young crops doing well, but require rain soon; want of fodder in Parner, Kopargao, Sangamner, and in the Deohi part of Akola. Cholera 342 cases, 141 deaths; cattle-disease in Sangamner. <i>Bajri</i> from 33 to 42 and <i>juari</i> from 42 to 60 pounds per rupee.                                                                                                                                                                                                         |
| Sholapur                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Sholapur, 42; Barsi, 19; Madha, 08; Karmala, 11; Sangola, 26; Pandharpur and Malsiras, nil.                                                                                        | <i>Kharif</i> crops in <i>ziarat</i> lands are fair in the Sholapur and Barsi talukas and in the State of Akalkot, elsewhere very little; <i>kharif</i> has been sown in the southern and western talukas. The water in wells used for irrigation is falling and the crops are suffering in consequence. Rain urgently required. Fodder getting scarce, except in the Sholapur and Barsi talukas. There are as yet no signs of distress. Average price of <i>juari</i> 44 pounds 33 tolas and <i>bajri</i> 30 pounds 24 tolas per rupee. Cholera 957 cases, 514 deaths.                                                                                                                                            |
| Dharwar                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Kalghatgi, 1·97; Mugund, 1·77; Hangal, 1·65; Bankapur, 1·42; Dharwar and Karajgi, 1·05; Hubli and Kod, 78 Navalgund, Nargund, Gadag, Mundargi, and Ranibennur, below 30; Ron, nil. | More rain generally required. Sowing of <i>juari</i> nearly completed, except in Navalgund, Ron, and part of Gadag, Karajgi, and Ranibennur, where it is at a standstill for want of rain; rice and other early crops good, but required heavy showers. Slight cholera in four talukas, but severe in one of the Dharwar villages; slight cattle-disease in one taluka. Average price of rice 26 pounds and <i>juari</i> 46 pounds per rupee.                                                                                                                                                                                                                                                                      |

General health good; fever prevalent in some places; small-pox in Jalia and Dewani. <i>Bajri</i> 33 and <i>juari</i> 44 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>General Remarks.</b> —Rain throughout the presidency; more wanted in parts of Karwar, Ahmednagar, Bijapore, Poona, and especially in Sholapur, Khandesh and Nasik. Young crops generally good, but slightly injured by blight and insects in parts of Bijapur, by insects in part of Upper Sind Frontier, and by floods in parts of Karachi; fodder scarce in parts of Nasik, Ahmednagar, Sholapur, and Bijapur. Cholera in parts of sixteen, fever and cattle-disease in parts of seven, and small-pox in parts of four districts. |                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Bangalore                                | Slight rain throughout the State.                                                                                     | Rain insufficient for the young crops, which are suffering in consequence; fodder getting scarce; ploughing and sowing operations retarded in parts; prospects uncertain in Tumkur and Kolar; elsewhere moderately fair, but dependent on future rainfall. Cholera still prevalent in parts of Bangalore and Mysore districts; small-pox in Tumkur and cattle-disease in parts of Mysore; public health otherwise fair. Prices show slight upward tendency. Crops in good condition. Prices stationary. Prospects of season and public health good. |

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at the Viceregal Lodge, Simla, on Wednesday, the 12th August, 1885.

P R E S E N T :

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.

The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

NORTHERN INDIA FERRIES ACT, 1878, AMENDMENT BILL.

The Hon'ble MR. HOPE introduced the Bill to amend the Northern India Ferries Act, 1878, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Ilbert and Hunter and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill and Statement of Objects and Reasons be published in the *Punjab Government Gazette*, the *North-Western Provinces and Oudh Government Gazette*, and the *Central Provinces and Assam Gazettes* in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 26th August, 1885.

## GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

## CIRCULATING THE PROCEEDINGS OF THE FIRST MEETING OF THE ROYAL COMMISSION IN CONNECTION WITH THE LONDON EXHIBITION.

Circular No. 7885.

*Extract from the Proceedings of the Government of India, Revenue and Agricultural Department (Museums and Exhibitions),—dated Simla, the 12th August 1885.*

## RESOLUTION.

Read the following:—

Statistics and Commerce Despatch, No. 49, dated London, the 14th May 1885, from Her Majesty's Secretary of State for India.

I forward 225 copies of the official report of a meeting of the Royal Commissioners for the Colonial and Indian Exhibition of 1886, held at Marlborough House on the 30th March, sent to me by Sir Philip Cunliffe Owen, Secretary to the Commission, for distribution to intending private Exhibitors in India.

2. You may perhaps consider it advisable to publish the report in the Official Gazettes, for general information.

*Proceedings of the First Meeting of the Royal Commission for the Colonial and Indian Exhibition, held at Marlborough House on Monday, the 30th March 1885.*

The Royal Commission appointed by Her Majesty the Queen for the purpose of organizing the above exhibition met for the first time on Monday, the 30th March, at Marlborough House, under the presidency of His Royal Highness the Prince of Wales. The following members of the Commission were present:—Field-Marshal Commanding-in-Chief His Royal Highness the Duke of Cambridge, the Marquis of Salisbury, the Marquis of Normanby, the Marquis of Lorne, the Marquis of Hamilton, the Earl of Derby, the Earl of Dalhousie, Earl Cadogan, the Earl of Kimberley, the Earl of Lytton, Viscount Bury, Field-Marshal Lord Strathmairn, the Hon. Edward Stanhope, M.P., the Right Hon. Sir Stafford Henry Northcote, M.P., the Right Hon. William Edward Forster, M.P., the Right Hon. Sir Michael Edward Hicks-Beach, M.P., the Right Hon. Anthony John Mundella, M.P., the Right Hon. Sir Louis Mallet, the Right Hon. the Lord Mayor of London, Sir Henry Thurstan Holland, M.P., Sir Daniel Cooper, Sir John Rose, Field-Marshal Sir Patrick Grant, General Sir Frederick Paul Haines, Major-General Sir Henry Creswicke Rawlinson, Lieutenant-General Sir Charles Henry Brownlow, General Sir Edwin Beaumont Johnson, Lieutenant-General Sir Henry Dominick Daly, Lieutenant-General Sir Samuel James Browne, Sir Robert George Wyndham Herbert, Major-General Sir Frederick Richard Pollock, Lieutenant-General Sir Harry Burnett Lumsden, Sir Barrow Helbert Ellis, Lieutenant-General Sir D. Macnaghten Probyn, Surgeon-General Sir Joseph Fayrer, Sir Joseph Dalton Hooker, Colonel Sir Owen Tudor Burne, Major-General Sir A. Clarke, General Sir Edward Selby Smyth, Sir Arthur Blyth (Agent-General for South Australia), Sir Charles Tupper (High Commissioner for the Dominion of Canada), Sir Francis Dillon Bell (Agent-General for New Zealand), Sir Saul Samuel (Agent-General for New South Wales), Sir William Charles Sargeant (Crown Agent for the Colonies), Sir Charles Hutton Gregory, Sir John Coode, Sir George Christopher Molesworth Birdwood, Colonel Henry Yule, Lieutenant-General Charles John Foster, Mr. John Arthur Godley, Mr. Horace George Walpole, Lieutenant-General Richard Strachey, Colonel James Michael, Colonel Arthur Edward Augustus Ellis, Mr. Charles Mills (Agent-General for the Cape of Good Hope), Mr. Arthur Hodgson, Captain Montagu Frederick Ommanney (Crown Agent for the Colonies), Mr. Robert Murray Smith (Agent-General for Victoria), Mr. James Francis Garrick (Agent-General for Queensland), the President of the Royal Agricultural Society, the President of the Institution of Civil Engineers, Mr. Henry Coppinger Beeton, Mr. Edward Birkbeck, M.P., Mr. Bertram Wodehouse Currie, Mr. William George Pedder, and Sir Philip Cunliffe-Owen, secretary.

His ROYAL HIGHNESS, in opening the proceedings, said:—

MY LORDS AND GENTLEMEN,—In addressing you for the first time, I would remind you that the objects for which Her Majesty has been pleased to appoint this Commission are, briefly, to organise and carry out an Exhibition by which the reproductive resources of our Colonies and of the Indian Empire may be brought before the people of Great Britain, and by which also the distant portions of Her Majesty's Dominions may be enabled to compare the advance made by each other in trade, manufactures, and general material progress.

This project, to the realisation of which I have looked forward for some years, is essentially one of a National and Imperial character, differing in this respect from former Exhibitions, in which the elements of trade rivalry and profit largely predominated.

No such opportunity of becoming practically acquainted with the economic condition of our Colonies and the Indian Empire has ever been afforded in this country. The attractive display in the Indian and Colonial Courts at the Paris Exhibition of 1878 could only be witnessed by a comparatively small number of the population of these Islands, millions of whom may be expected to view and profit by the evidence which the Exhibition of 1886 will afford of the marvellous progress made by their fellow-countrymen beyond the seas.

I also trust that this gathering may serve even a higher purpose, and be the means not only of giving a stimulus to commercial interests and intercourse but of strengthening that Bond of Union between Her Majesty's subjects in all parts of the Empire, the growth and manifestation of which are most sincerely appreciated by us all.

Whilst Her Majesty's Government have given their hearty approval to the objects for which the Commission has been appointed, they have not so far found it desirable to make any definite grant towards it. The Commission have, therefore, to rely entirely upon the public support of the great purposes which the Exhibition is intended to promote; and on the attractive form which it will be the endeavour of all concerned to give to it.

I cannot doubt but that, under such conditions, should no untoward events occur, the project will be more than self-sustaining.

At the same time, it has been thought prudent not to dispense with the usual provision of a Guarantee Fund, though I trust no circumstances may arise rendering it necessary to make any call on the Guarantors. To this Fund the Indian and Colonial Governments have made liberal contributions, amounting to £51,000.

I have also to announce with much gratification that the most cordial and generous response has already been made by Corporations, Firms and individuals in the United Kingdom to an invitation to participate in this Guarantee. Although no formal or public appeal has yet been made, and the number invited to contribute to it has so far been limited, the list of subscribers not only embraces those whose interests may be supposed to be specially affected by the Exhibition, but comprehends every class of the community. Though but recently commenced, these further subscriptions already amount to £77,600, making a total Guarantee Fund of £128,600 to the present date.

I feel sure that you will unite with me in the expression of cordial thanks to those who have so promptly and liberally come forward to our assistance. It is a gratifying proof of the interest which exists among all classes at Home and in the outlying countries of the Empire, and of the desire felt by them to embrace every occasion to promote the common advancement and prosperity of the United Kingdom and its Colonies and Dependencies.

Considering the inconvenience which would have resulted to the Members of the Commission had they been summoned to meet at an earlier date, and in view of the immediate assembling of the various Colonial Legislatures, whose co-operation had to be obtained, I deemed it necessary, in order that full time might be given for the preparation of contributions, to take certain preliminary steps, which I trust will meet with your approval.

I have accordingly to announce that arrangements have been made by which the Buildings and Grounds at South Kensington, where the Fisheries

and Health Exhibitions were recently held, have been placed at the disposal of this Commission, on fair terms, and the Buildings can be made available for our purposes at a moderate outlay.

I therefore caused plans of these Grounds and Buildings to be prepared, showing the space which the Commission could assign to India and the various Colonies, and the arrangements which were deemed most convenient. These were communicated to the Government of India, to the High Commissioner for the Dominion of Canada, to the various Agents-General of the Colonies, and, through the Colonial Office, to the Crown and other Colonies, and have met with their approval. Similar communications have been made through the Secretary of State for the Colonies direct to the various Governments, and to the Secretary of State for India with like results.

In the despatch which contained this information, I also stated that it was considered advisable that, in place of any awards being granted by Juries, as has been the case in previous Exhibitions, Commemorative Medals only should be given to each exhibitor. The object in suggesting this change was, that as some Colonies, from their age and circumstances, were more advanced than others, those in their infancy should not be placed at an undue disadvantage in an Exhibition from which all thoughts of trade rivalry should be excluded.

I am pleased to say that answers have been received which show that the suggestions made on this and other matters have been favourably accepted; and to inform you that the project of holding the Exhibition has been everywhere received with the utmost cordiality.

I trust that these preliminary arrangements may meet with your approval.

I have also to submit for your consideration the general method of administration which I recommend should be adopted.

As President of the Royal Commission, it is my intention personally to take the same active part in the work as I did at the Paris Exhibition of 1878.

The details of the Executive duties will devolve on Sir Philip Cunliffe-Owen, whose ability and experience have so often been tested with satisfactory results, and who has also been entrusted by the Indian Government and certain of our Colonies with Executive duties on their behalf.

I have also thought it desirable to nominate a Finance Committee for the purpose of controlling and regulating the expenditure of the Commission and guarding the interests of the Guarantors. This Committee, it is proposed, shall consist of the following members of the Commission, who have kindly placed their services at my disposal, *viz.*, Sir John Rose, Bart. (Chairman); Sir George C. M. Birdwood; Mr. Edward Birkbeck; Sir Barrow Helbert Ellis; Sir William Charles Sargeant.

I will ask you to confirm the appointment of these gentlemen.

As arrangements advance, it may be necessary for me to recur in matters of special importance to your counsel and aid.

While no effort will be spared to render the Exhibition worthy of the primary objects, it is intended to promote, as well as to insure its attractiveness to the Community, the Guarantors may be assured that, subject to the attainment of these ends, no needless outlay will take place; but that, on the contrary, the expenditure will be kept within proper and legitimate limits. As an earnest of this endeavour I have directed full and detailed estimates of the different heads of proposed expenditure—guided by the experience of former Exhibitions—to be prepared for submission, first, to the Finance Committee, and subsequently for my own approval.

Though it is impossible to foresee what eventualities may arise, I trust no obstacles may occur to prevent this Exhibition from being, not only self-sustaining, but as successful, financially, as those of late years have been.

It has been suggested that advantage should be taken of the great numbers who will doubtless visit England during the Exhibition from the Colonies and from India, to procure for them special facilities for visiting the great manufacturing centres and chief places of interest in Great Britain, not only as an expression of welcome, but that they and we may profit by a comparison of

their own with the more matured commercial systems of the Mother-Country, and that by bringing manufacturers, producers and consumers together, an impetus may be given to the general extension of industry and trade.

Negotiations are in progress to effect this object which I hope may result, not only in mutual advantage, but in proving to our fellow subjects that they are as welcome elsewhere in Great Britain as I am sure they will be in the Metropolis.

In conclusion, let me express the hope that this great undertaking and the many occasions for friendly intercourse with our fellow subjects from India and the Colonies which it will afford, may convey to them the assurance that, while we are deeply moved by the spirit of patriotism they have lately shown in desiring to bear their share in the graver trials of the country, we, on our part, wish to participate in every effort to further and develop their material interests, interests which we feel to be inseparably bound up with the prosperity of the Empire. We must remember that, as regards the Colonies, they are the legitimate and natural homes, in future, of the more adventurous and energetic portion of the population of these Islands. Their progress, and their power of providing all that makes life comfortable and attractive, cannot, therefore, but be a matter of serious concern to us all. And, as regards India, the increasing knowledge of that vast Empire and the rapid and easy means of communication to all parts of it which now exist, render its remarkable and varied products and its social and political condition a source of yearly increasing interest and importance to us.

For the attainment of the purposes I have indicated, I am sure I may rely on your friendly co-operation and assistance, in your several localities, and within the sphere of your individual influence. Although it has been impossible from the pressure of their duties elsewhere for some members of the Commission to be present at this meeting, I am gratified by the assurance from them that we may none the less rely on their practical and earnest assistance on every occasion in furthering the work which has been entrusted to us, and achieving the important ends which I trust may flow from its successful accomplishment.

It only remains for me to express my cordial thanks to you for your kindness in attending here to-day, and my confidence that I shall continue to receive the same measure of support which it has been my good fortune to obtain from many of you on former occasions.

Sir Philip Cunliffe-Owen then read the correspondence relating to the appointment of the Commission and the participation of the various colonies, all of which were most willing to take advantage of this opportunity of displaying their resources and progress, and gaining a larger knowledge respecting their sister colonies.

A preliminary list of Guarantors was also read, the amount of the Guarantee Fund being already £128,600.

The EARL OF DERBY said: I have been asked to move a resolution, and I do it with great pleasure, but also very briefly, because argument is superfluous where I presume we are all of one mind, and it would be a mere waste of time to relate the circumstances, with which you are no doubt familiar, which should induce you to accept this resolution. There was a time, a few years ago, when it was said exhibitions were played out, and that it would be well for a time at least, to discontinue them. I do not know whether that feeling was ever justified by the facts; it may have represented a passing phase of opinion in London, but it is not the case now. We have had recent experience, and we have seen that, whatever the ostensible objects of the exhibition, whether appliances of health, fisheries, forestry, or whatever the subject may be, the interest that is felt in these exhibitions is unabated, and ever-increasing. The numbers frequenting them seem to increase every year, and if they are well conducted, there can be no doubt they will be a financial success. If this be true, generally, it is still more likely to be true in the case of the exhibition which is to be held next year. I think we must all see and feel that there never was a time in the history of the country when so deep and general an interest was taken in the affairs of the Colonies; and I think also we all feel that, living as we do in a small and overcrowded island, it is both

our duty and our interest to do all in our power to bring before the minds of our fellow countrymen those vast countries beyond the sea, in which those who have comparatively small opportunities of making a successful career in this country may have a better chance in another state of society. After the correspondence which has been read, it will not be necessary for me to recapitulate the details of what has passed, especially as His Royal Highness has been kind enough to state what is most important on that point. I will only say that to me, and those with whom I have acted departmentally, and I think I may say the agents of the colonies, it has been a source of pride and satisfaction to be able to help according to the measure of our power in promoting the wishes of His Royal Highness. I think, although the matter is not completed, and therefore it is undesirable to enter into details, that our colonial fellow subjects, both as regards governments and communities have responded to the appeal made to them in that liberal and patriotic manner we have every reason to expect. You have heard the list of Guarantors read; it is, I believe, an ample one for all purposes, and no doubt can be increased if necessary; and, looking at the increased interest in Colonial affairs, and the way the Colonies have taken the matter up, I think there is no doubt that this exhibition will be a great success. The purpose of the resolution I have to propose is that the Royal Commission may endorse the steps taken by His Royal Highness; and I think I may say that no passage in His Royal Highness's address has given so much satisfaction as that in which he gives us an assurance that he will take the same position in this exhibition as in that of 1878.

The EARL OF KIMBERLEY seconded the resolution, and said: As regards India, I have this exhibition much at heart. There is, perhaps, nothing more desirable for India than that its products and industries should be well known in this country, although we have much more to learn from than to teach them. Their beautiful manufactures which they have produced for so many ages have proved that there is a knowledge of many branches of art which it would be a thousand pities should be diminished under our rule. I have often been struck with the calamity of the introduction of our taste into Eastern arts and manufactures; for their taste is far better than ours, although we have no doubt engineering knowledge and skill and the command of capital; and I cannot conceive of any advantage greater than that the two countries should be brought together. The Government of India will itself undertake the collection and management to a great extent of what is to be sent into this country. You will see from the immense size of our Indian Empire, and the position of the Government there, that it is much better this should be taken in hand by the Government. It is a great satisfaction to me to concur entirely with the proposals made by His Royal Highness, and with my noble friend that this exhibition will be a remarkable success.

The following is the resolution, which was carried unanimously: "That this Commission entirely approves of the arrangements made by His Royal Highness the Prince of Wales, the Executive President, and now reported by him in detail: and they desire to convey their cordial thanks to His Royal Highness for the interest he has shown in the undertaking, and their appreciation of the judicious steps taken by him to insure its success. The Commission further desire to express their cordial appreciation of the liberal and gratifying contributions already made to the Guarantee Fund, and their warm thanks to the subscribers."

The PRINCE OF WALES: I feel very grateful to Lord Derby for the kind way in which he has moved this resolution, and to Lord Kimberley also for the kind expressions that have fallen from him, and for the hearty and unanimous approval of this Commission, which I look upon as a vote of confidence in myself. I may say that to the utmost of my power and endeavour I will do all I can to further the exhibition, and I feel sure that I shall have the hearty support and concurrence of the distinguished gentlemen of whom I see so many around me. I thank you again for having listened to the address I read to you, and only hope that no untoward event may occur between now and next year to prevent this resulting in perhaps the finest exhibition that has ever been held.

The Meeting then terminated.

## COLONIAL AND INDIAN EXHIBITION.

(LONDON, 1886.)

### PRELIMINARY LIST OF GUARANTORS.

AMOUNT OF GUARANTEES UP TO THE 30TH MARCH, 1885.  
£128,600.

| £                                                    | £       | £        |
|------------------------------------------------------|---------|----------|
| The Government of India                              | 20,000  |          |

## REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 12th AUGUST 1885.

GENERAL REMARKS.—Rain has fallen in all districts in the Madras Presidency, with the exception of Bellary, where it is much wanted for the dry crops, which are suffering. In Madras prospects continue unsatisfactory, and more rain is wanted in Ganjam, Kistna, Coimbatore, Tanjore, and Malabar. In Mysore prospects are uncertain in consequence of the deficient rainfall. Dry crops recently sown are reported to be withering in many places, and agricultural operations have been retarded. In Coorg seasonable weather prevails, and prospects are good.

Slight rain has fallen generally throughout the Bombay Presidency, but more is wanted in parts of Sholapur, Ahmednagar, Bijapur, Nasik, Khandesh, and Dharwar. Young crops are withering in some districts, and have in some places been injured by insects. In the Berars slight rain has fallen, and crops are promising. In the Nizam's Territories rain is much needed for the standing *kharif* crops. In the Central India and Rajputana States good rain has fallen generally, and agricultural prospects are satisfactory.

In the North-Western Provinces and Oudh heavy rain has injured the crops in some places, and a break is now much needed. The condition of the crops is, however, generally very favourable. Rain has fallen in most districts in the Punjab. *Kharif* sowings have nearly been completed, and prospects are on the whole good. In the Central Provinces the weather is seasonable, and crop prospects are favourable. Transplanting and weeding continue in most districts.

In Bengal rain has been general, but in parts of the Presidency Division more is needed. Some damage has been caused to crops by floods in the Midnapur District and the Bhagalpur Division, but otherwise prospects are generally favourable. The *bhadai* harvest is yielding a good average outturn. In Assam rainy weather prevails, and the transplanting of *sali* rice is in progress. Tea promises well. Seasonable rain has fallen in all districts in British Burma, and prospects are good.

The public health is generally fair in most Provinces. Prices are fluctuating in the Punjab, but elsewhere they are generally steady. In Bengal the price of rice continues high.

| Presidency or Province and District. | Rainfall for week under report. | State of agricultural prospects.                                                                                                                                                                                                                                                                                             |

| Cawnpore ( " 10th)                          | ...                             | Rain in all but three parganas.                          |
| Banda ( " 11th)                             | ...                             | Nil                                                      |
| Bellie ( " " )                              | ...                             | Good steady rain throughout Bikaner.                     |

Weather seasonable. Prospects of late rice now fairly good, but transplanting still being delayed in the Jangipore subdivision for want of sufficient rain; prospects of early rice favourable, except on low lands flooded by the Ganges; sugarcane and mulberry good. Sporadic cholera reported.

Prospects of crops good. Price of rice 11½ to 14½ seers per rupee. Public health generally good.

Harvesting of early rice and transplanting of late rice still going on; other crops doing well. Cholera much abated; fever and bowel-complaints prevalent. Price of common rice fallen.

Prospects of crops good, but floods have done some damage. Price of rice 12 seers 10 chittaks per rupee. Cholera still prevalent in south.

Floods in Ganges have done considerable damage. Considerable damage also done by caterpillars in Kadiwa; otherwise Bhadoi prospects excellent. Rain has promoted transplanting. Common rice 14 seers per rupee. Health fair.

Bhadoi crops growing well; transplanting of paddy commenced; cheena and makai on deorah lands destroyed in some places by a rise in the river. Cholera reported from Barh and Behar subdivisions.

Prospects of bhadoi very favourable; murwa, maki, kaund, and shama coming into ear; indigo cutting in progress. Prices stationary. Public health good.

Weather seasonable. Sufficient rain everywhere. Agricultural prospects generally favourable; transplanting in progress. Prices steady. Cholera reported from several thanas, otherwise general health good.

Weather cloudy, with light rain. Early rice ripening in places; late rice being harrowed and transplanted. Price of rice unchanged. Cholera reported from all sides.

Very heavy rain all over the district. Much damage from floods in north, elsewhere crops doing well. Public health fair.

Weather cloudy and sultry. Early paddy coming into ear; progress of late paddy transplanting favourable. Price of rice still high. Public health good.

Ample rain all over the district. Bhadoi crops good and being harvested. Fair outturn expected. Cultivation of late rice progressing. Cholera reported from four thanas, otherwise public health good; some cattle-disease reported. Average price of rice 14 seers per rupee.

Prospects of crops generally favourable; transplanting in progress. Prices steady. Cholera reported from several thanas, otherwise general health good.

Bhadoi and aghani crops look promising; transplanting of paddy in progress. Cholera prevails in an epidemic form in Motihari town and jail.

General Remarks.—General rain over the whole province; more rain wanted in parts of Presidency division. Floods in Midnapur and the Bhagalpore division have done some damage to the crops. Prospects continue generally favourable. Transplanting proceeding well in Central and Eastern Bengal; bhadoi harvest is yielding a good average outturn. Price of rice continues high. Public health generally fair.

Weather cooler. Crops flourishing; supplies sufficient. Prices fluctuating slightly. Isolated cases of small-pox, otherwise health good; no cattle-disease.

Prices stationary. Cholera severe in certain towns in south, sporadic in east.

Prospects good; kharif crops good. Prices stationary. General health fair.

Kharif crops injured to some extent by incessant rain. Prices of men and cattle generally good, though sporadic cholera still continues.

Weather rainy and cloudy; a break much needed for weeding the young crops. Prices stationary. Fever continues in five parganas and cattle-disease in one.

Fair weather for four days; break very beneficial. Prices steady. Public health very good; cattle-disease in two villages.

Crops damaged by floods, others flourishing; supplies ample. Cholera increased, 66 deaths.

| <b>General Remarks.</b> —Cholera severe in one district, slight in seven districts, elsewhere public health good; cattle-disease severe in one district, slight in five districts, elsewhere health of cattle good. Ploughing, sowing, and transplanting progressing. Rain seasonable in all districts, except in Prome, where more rain is required and in Amherst where they have been very heavy and the crops have been slightly damaged by floods. |                                                       |                                                                                                                                                                                                                                                                                                                                    |

E. C. BUCK,  
Secretary to the Government of India.

# SUPPLEMENT TO The Gazette of India.

No 34. CALCUTTA, SATURDAY, AUGUST 22, 1885.

## OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

*Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 20th August, 1885.*

Read the following:—

## Summary of the Weather Reports for July 1885.

**Heavy rain fell at Mangalore on the 1st.** This proved to be the beginning of a burst of rather heavy rain on the west coast, lasting until the 9th, and spreading northward as far as Ratnagiri, without, however, reaching Bombay. Between the 10th and 16th, though rain fell daily along the west coast, the amounts were not large; but on the 17th a fall of six inches occurred at Bombay and larger amounts on the neighbouring hills. This was the first down-pour of the season on the Konkan coast, and resulted in extensive floods in the neighbourhood of Bombay. Rather heavy rain again fell along the Malabar Coast on the 23rd; but on the whole the amounts recorded in the west of the peninsula, subsequent to the middle of the month, were moderate, and, except in Malabar, the total rainfall of the month was below the average. In Gujarat the rainfall was nearly up to the average of the month, but this result was due rather to the occurrence of heavy local and spasmodic falls at Rajkot, Ahmedabad, and Broach than to steady continuous rain throughout the month. In Sind and Cutch and northward over the Punjab there was very little rain, the relative deficiency during the present month being even greater than in those provinces during June. In the central parts of the country, *i.e.*, Rajputana, Central India, and the Central Provinces, though the average was not actually equalled, the deficiency was small, and in the Berars, the Deccan, and Hyderabad the average was slightly exceeded.

In the eastern and central parts of the peninsula the normal westerly winds appear to have been exceptionally dry; and Mysore, Bellary, and the Karnatic had even less than the small average rainfall. Further north, in the Northern Circars, Orissa, Chutia Nagpur and Lower Bengal, there has also been a slight deficiency; but in Assam, Kachar, Northern Bengal, and over the whole of the North-Western Provinces and Oudh the rainfall has been excessive. During the month several small, and in general feeble, depressions have travelled slowly up the Gangetic plain—some apparently having been formed over the Gangetic Delta, others over Behar or that neighbourhood. Though very slight when measured by barometric differences, some of these disturbances have occasioned heavy falls of rain, of which the more important are as follow:—

|                            | Inches. |                         | Inches. |
|----------------------------|---------|-------------------------|---------|
| Darjeeling, 2nd ...        | 4.38    | Dinagepur, 12th ...     | 4.41    |
| Bahraich, 3rd ...          | 4.02    | Sutna, 13th ...         | 5.01    |
| Muzaffarpore, 4th ...      | 5.20    | Aligarh, 16th ...       | 5.50    |
| Naini Tal, 3rd and 4th ... | 14.80   | Benares, 22nd ...       | 4.68    |
| Saugor Island, 7th ...     | 4.27    | Saugor Island, 29th ... | 6.15    |
| Barilly, 11th ...          | 4.21    | Mussorie, 30th ...      | 5.42    |

On the whole the rainfall of the month has been more favourable in many respects than that of June. The Punjab, Sind, Cutch, the Konkan, and Orissa again exhibit more or less important deficiencies; but in North Bengal and Behar, where last month a serious deficiency seemed impending, there has now been an almost compensating excess, and in the Deccan, Hyderabad, and Berars, though the excess of the present month does not make up for the deficiency of the last, there has at least been no further failure.

The figures for the season, up to date, show that the rains have been unfavourable in two regions. One includes the Konkan, Khandesh, and the Bombay Deccan, where the amount of rainfall for the two months, June and July, has been only from  $\frac{1}{5}$  to  $\frac{1}{3}$  of the average amount, and the other the Punjab, where (though there are some exceptions) the general rainfall of the Province has

been only  $\frac{1}{3}$  to  $\frac{1}{2}$  of the normal. In all other parts of the country the seasonal average has been fairly well maintained.

The other meteorological elements exhibit few variations worthy of note. There has been a pretty general excess of pressure over the peninsula, extending on the western side, northward into Gujarat and Rajputana, and a general deficiency over Northern and Central India. The temperature has been above the average in the Punjab, the Central Provinces, Central India, Sind, Gujarat and the Konkan, but generally below it in the peninsula and Burma. The amount of humidity in the atmosphere has been below the mean in the Punjab, and has varied irregularly elsewhere.

The following table shows the amount of rain and the difference from the average during the month of July 1885, according to districts, as far as is indicated by the telegraphic reports:—

| Districts.                                    | Average Rainfall in the average July. | Difference from the average in July 1885. |
|-----------------------------------------------|---------------------------------------|-------------------------------------------|
| Punjab, West ... ..                           | 6.30                                  | —3.63                                     |
| Punjab, East ... ..                           | 10.25                                 | —4.59                                     |
| North-Western Provinces, Trans-Gangetic ...   | 14.58                                 | +0.66                                     |
| North-Western Provinces, Cis-Gangetic ...     | 11.20                                 | +0.17                                     |
| Behar ... ..                                  | 10.99                                 | +2.34                                     |
| Northern Bengal ... ..                        | 19.66                                 | +4.91                                     |
| Assam, Cachar ... ..                          | 15.89                                 | +2.35                                     |
| Lower Bengal, Chutia Nagpur ... ..            | 14.86                                 | —2.01                                     |
| Orissa, Northern Circars ... ..               | 8.83                                  | —1.87                                     |
| Central Provinces, South ... ..               | 16.67                                 | —0.39                                     |
| Berar, Khandesh ... ..                        | 7.05                                  | +0.43                                     |

SIMLA ; } W. L. DALLAS,  
The 5th August, 1885. } Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the papers be printed in the Supplement to the Gazette of India.

# REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 19th AUGUST 1885.

GENERAL REMARKS.—Rain has fallen during the week in all districts of the Madras Presidency from which reports are received. In Bellary heavy rain is urgently required for the early dry crops. Prospects are still unsatisfactory in Madura, and more rain is wanted in Ganjam, Coimbatore, and Tanjore. Elsewhere prospects are generally good, and improvement has taken place in Anantapur. In Mysore very slight rain has fallen, the crops are in a critical condition, and pasturage and water are failing. In Coorg prospects continue good.

Prospects have greatly improved in the Bombay Presidency, in consequence of the recent rainfall, but more rain is urgently wanted in parts of Sholapur and Bijapur. In these districts and in Nasik, Poona, and Ahmednagar fodder is scarce. *Kharif* sowings are still in progress in places. Rain has fallen in the Berars and Hyderabad, and the condition of the crop is favourable. In the Central India and Rajputana States rain has been general, and the crops are generally in a satisfactory condition.

Good rain is reported to have fallen throughout the Punjab, with the exception of the Lahore district. *Kharif* prospects are generally favourable. Rain has fallen in most districts in the North-Western Provinces and Oudh, and a break is now wanted. Crop prospects are good, though some damage has been caused to cotton, indigo, and the crops on low lands. Rain has been general in the Central Provinces, and prospects are good.

In Bengal rain has been fairly general, but more is wanted in some districts. Early crops are generally doing well, but in some places in Behar and the Burdwan divisions and in Moorsshedabad injury has been caused by floods. The *aus* rice harvest is progressing, with prospects of a fair average outturn; and *aman* rice is being transplanted. Seasonable weather prevails in Assam, but in Sylhet more rain is much needed for the paddy crops on high lands. Transplanting continues.

In British Burma the rains have been seasonable in all districts, except Prome, where more rain is required. Ploughing, sowing, and transplanting are in progress.

The public health is generally fair.

Prices are fluctuating in the Punjab, and have risen slightly in Mysore. Elsewhere they are fairly steady.

| Presidency or Province and District. | Rainfall for week under report.                                                        | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>Bombay—contd.</b>                 |                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Ahmedabad ...                        | 3.28                                                                                                                                                                                              | Total rainfall 17.39. Young crops healthy. More rain is wanted in Dholka and Parantaj for rice crops. Cholera in the city, 26 cases, 15 fatal; in Dholka, 4 cases, 1 fatal; fever prevails in the Ahmedabad taluka. Wheat 37 and <i>bajri</i> 33 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Baroda ...                           | 5.48                                                                                                                                                                                              | Total rainfall 15.94. Cholera abating in Baroda city. Sowing operations completed and young plants thriving and in good condition. <i>Bajri</i> 27, wheat 27, and rice 21 pounds per current sicea rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Surat ...                            | Rain in all talukas, maximum in Chikhli, 15.11; minimum in Chorasi, 2.58.                                                                                                                         | Sowing of cotton incomplete in a few places for want of break; transplantation progressing; young crops healthy. Cattle healthy; fever in Chikhli; 1 death from cholera in Jallapur. Prices— <i>juari</i> 36 and <i>nagli</i> 43 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Nasik ...                            | Excellent rain throughout the district.                                                                                                                                                           | Prospects improved. Transplantation of rice, <i>nagli</i> , and <i>rari</i> nearly completed in Igatpuri, Punt, and Dangli villages of Nasik and Kalwan; crops healthy; sowing of <i>kharif</i> nearly completed and recommenced in Niphad, eastern part of Chandor and Sinnar, in Yeola, Malegaon, and Nandgaon, where it had entirely stopped for want of rain; want of fodder badly felt in Deohi talukas. Orders issued to stop sales of grass in waste lands in Nandgaon, Malegaon, Baglan, Kalwan, Yeola, Chandor, and Sinnar, and in the remaining talukas, if thought necessary. Cholera in Nasik, Sinnar, Dindori, Niphad, Chandor, and Yeola, has almost ceased in Nasik. Total attacks 187, deaths 81. Wheat 33, <i>bajri</i> 29½, and rice 23½ pounds per rupee. |
| Colaba (Bombay) ...                  | Rain every day; heavy on 14th and 15th; total of week, 18.54.                                                                                                                                     | Total rainfall to date 48.42, being 5.52 below average. Average abnormal temperature 2° cool from 12th to 15th, afterwards nil; vapour in air slightly in excess of normal; abnormal wind northerly on 12th and 15th, easterly on 13th and 14th, westerly on 16th and southerly on 17th and 18th; thunder on 14th and lightning on 14th and 15th.                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Poona ...                            | Rain throughout the district; maximum in Junnar, 4.63; minimum in Purnadhar, .92.                                                                                                                 | Sowing nearly completed. Prospects slightly improved in the eastern division by the recent rain, although scarcity of fodder is still felt. Cholera in seven talukas, 375 cases, 181 deaths; cattle free from disease. Price of <i>bajri</i> 27 and <i>juari</i> 38; in Poona <i>bajri</i> 28 and <i>juari</i> 35 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Ahmednagar ...                       | Rain in all talukas; maximum in Kopargao, 2.96; minimum in Newasa, .82.                                                                                                                           | Sowing of <i>kharif</i> , though late, will be resumed in Rahuri, Kopargao, Newasa, and Sangamner, owing to the present good weather which has been beneficial to the crops already sown throughout the district; crops are generally good, but more rain much wanted in Newasa and Nagar; want of fodder is still felt in Parner, Kopargao, Sangamner and in Deohi, portion of Akola. Cattle-disease in Newasa and Sangamner; cholera in seven talukas, 122 attacks, 56 deaths. <i>Bajri</i> from 33 to 42 and <i>juari</i> from 42 to 60 pounds per rupee.                                                                                                                                                                                                                 |
| Sholapur ...                         | 1.31; Barsi, 1.44; Malha, .26; Karmala, 2.01; Pandharpur, .17; none elsewhere.                                                                                                                    | <i>Kharif</i> crops in the Sholapur and Barsi talukas and in the State of Akolkot doing well, elsewhere very little <i>kharif</i> crop has been sown. Good rain fall in Karmala, more rain urgently needed in four talukas, where water-supply is failing; green grass has not sprung up generally, and stock of fodder is getting low, there are as yet no signs of distress. <i>Juari</i> 45 pounds 31 tolas and <i>bajri</i> 30 pounds 7 tolas per rupee. Cholera 251 cases, 95 deaths.                                                                                                                                                                                                                                                                                   |
| Dharwar ...                          | Hangal, 3.64; Dharwar and Mugud, 3.53; Kalghatgi, 2.38; Hubli, 2.20; Kod, 2.08; Bankapur, 1.65; Karajgi, 1.47; Ranibennur, 1.36; Navalgund, .72; Nargund, .50; Gadag and Ron, .40; Mundargi, .08. | More rain required specially in Navalgund, Gadag, and Ron talukas, in parts of which sowing of <i>juari</i> is retarded. Rainfall of the week has done immense good to the standing crops; rice crops and young <i>juari</i> plants good. Slight cholera in five talukas. Prices— <i>juari</i> 44 and rice 27 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Kanara ...                           | Karwar, 10.15; Kumpita, 11.04; Sirsi, 7.78; Haliyal, 5.21.                                                                                                                                        | Crops good. Fever and small-pox in four talukas; cattle-disease in one. Common rice at Karwar 13½ seers, district average 14 seers per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| <b>General Remarks.</b> —Rain has been fairly general in all districts, more rain is wanted in some districts. Early crops are generally doing well, but in some places in Behar and the Burdwan divisions and in Moorsheadabad, they have suffered from floods; <i>aus</i> rice harvest is progressing, with prospect of a fair average outturn; transplanting of <i>aman</i> rice still proceeding. Price of rice continues high. General health not so satisfactory as before; fever and cholera being prevalent in many places. |                                                                          |                                                                                                                                                                                                                                                                                                            |

| Bangalore ...                             | Rainfall very slight throughout the State.          | Rain needed everywhere and specially in parts of south-eastern Kolar, Northern Tumkur and Chitaldroog, and north-eastern of Mysore, where unless timely fall occurs, the young dry crops which are the staple of the country will die; they are reported to be withering in some quarters and to be in a critical condition in others; cattle-disease reported in parts of Bangalore. Pasturage failing and water-supply scanty. Public health fair, except that cholera continues in Mysore. Slight rise in prices. <i>Ragi</i> , which is the chief article of consumption, still not higher than 25 seers for the rupee. 40 seers for the rupee being about the average price. Crops in good condition. Price of foodgrains has slightly risen. Prospects of season and public health good. |

**B. O. BUCK,**  
Secretary to the Government of India.

## SUPPLEMENT TO The Gazette of India.

No 35. } CALCUTTA, SATURDAY, AUGUST 29, 1885.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.  
DEPARTMENT OF FINANCE AND COMMERCE.

SUPPLEMENT TO THE STATEMENT OF PRICES CURRENT OF FOOD GRAINS FOR THE 2ND HALF OF JULY 1885, PUBLISHED IN PAGES 1278, 1279, 1280, AND 1281,  
OF THE SUPPLEMENT TO THE "GAZETTE OF INDIA," DATED 22ND AUGUST 1885.

ALLAHABAD, The 15th July 1885.  
NOTE.—The difference between the figures in columns 6 and 7 and those shown in columns 3 and 4 of statement for half-year ending 31st March 1884, under "Private Boats" and "Government Boats," is due to the transfer of 8,473 from the former to the latter.  
H. W. CONDUITT,  
Offg. Asst. Secy. to Govt., N. W. P. and Oudh, P. W. D., Irrn. Branch.

(a) As regards the figures in column "Total receipts from 1st April 1885 to date," audited figures have been availed of as far as possible.  
(b) Including Return for Porepore State Railway.

(c) Return not received.  
(d) Total receipts from 1st April to 18th July 1885.  
(e) Total receipts from 2nd April to 2nd August 1884.

SIMLA,  
The 29th August 1885.

FRED. FIREBRACE, Major, R.E.,  
Under-Secretary.

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS ON THE INUNDATION CANALS IN THE PUNJAB FOR THE  
RABI CROP, 1884-85.

## STATEMENT No. I.

Comparative Abstract of Irrigation and Rainfall in Canal Districts of the Punjab.

J. M. HEYWOOD, Lieut.-Col., R.E.,  
Offy. Joint-Secretary to Govt., Punjab, P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.  
REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR  
THE WEEK ENDING 26th AUGUST 1885.

GENERAL REMARKS.—Except in Malabar and Travancore, the rainfall during the past week in the Madras Presidency has been very slight. In Bellary heavy rain is urgently wanted for the dry crops, which are generally withering and are in a critical condition. More rain is also wanted in Ganjam, Kistna, Coimbatore, Tanjore, and Madura. In Mysore little or no rain has fallen since the date of the last report. The young dry crops are reported to be withering, and agricultural operations have been retarded. Prospects are unsatisfactory in Tumkur, Kolar, Kadur, Shimoga, and Mysore.

Good rain has fallen in most districts of the Bombay Presidency, but in Nasik, Poona, Ahmednagar, Sholapur, and Dharwar more is needed. In Sholapur especially the situation is unsatisfactory; very little *khari* is sown, and the season is now over. Fodder is scarce in several districts. In the Berars and in the Nizam's Territories the season is favourable and crop prospects are good. Rain has fallen throughout the Central India and Rajputana States, and agricultural prospects are on the whole very satisfactory.

In the Central Provinces the weather continues favourable for the crops, which are progressing satisfactorily. A break is much needed in Saugor and Hoshangabad. Except in two districts, rain has been general in the Punjab, and *khari* prospects are favourable. Heavy rain has fallen in many districts in the North-Western Provinces and Oudh, causing injury to crops on low lands. Agricultural prospects are fair.

Rain has been general throughout Bengal, but excessive in Moorshedabad, Burdwan, Hazaribagh, and Midnapur. Considerable injury has been done to both *aus* and *amun* crops in Burdwan, and to the *bhadoi* crops in Moorshedabad and in parts of Behar. Elsewhere agricultural prospects are favourable, and the *aus* harvest is yielding a fair outturn. The weather is seasonable in Assam, but in Sylhet more rain is wanted. Transplanting of *sali* crops continues.

Heavy rain is reported from British Burma, where ploughing and transplanting continue. Cholera is chiefly prevalent in the Madras and Bombay Presidencies and in Raipur in the Central Provinces. Elsewhere the public health is generally fair.

Prices are generally steady, except in the Punjab, where they are fluctuating.

| Presidency or Province and District. | Rainfall for week under report.                                                                         | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>General Remarks.</b> —Rain has been general throughout the province, but excessive in some parts. In places in the Burdwan division floods are doing considerable injury to both <i>aus</i> and <i>amun</i> crops; much damage has also been caused by floods to <i>bhadai</i> crops in Murshedabad, and on low Dearah lands, and in parts of Behar; elsewhere <i>aus</i> crops are promising, and are yielding a fair outturn; transplanting is still progressing in Behar. Price of rice continues high. Public health generally fair. |                                                               |                                                                                                                                                                                                                                                               |

E. C. BUCK,  
Secretary to the Government of India.

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

EXECUTION OF DEEDS, CONTRACTS, &c., ON BEHALF OF THE SECRETARY OF STATE.

No. 1167.

*Extract from the Proceedings of the Government of India in the Home Department (Judicial),—  
under date Simla, the 25th August, 1885.*

Read again—

Home Department Resolution No. 939, dated the 23rd June, 1877, relative to the execution of deeds, contracts, &c., on behalf of the Secretary of State.

Read also—

A letter from the Government of the Punjab, No. 484, dated the 4th July, 1885, to the address of the Government of India in the Revenue and Agricultural Department.

RESOLUTION.

In exercise of the power conferred by the thirty-third and thirty-fourth of Vic., Cap. fifty-nine, section two, the Governor General in Council is pleased to declare that the undermentioned class of instruments referred to in the twenty-second and twenty-third of Vic., Cap. forty-one, section two, may, in the territories under the administration of the Government of the Punjab, be executed as follows :—

By Deputy Commissioners,—Instruments relating to the sale of waste lands.

Nos. 1168-69.

ORDER.—Ordered, that this Resolution be communicated to the Government of the Punjab; and to the Revenue and Agricultural Department; and that it be published in the Supplement to the *Gazette of India*.

A. MACKENZIE,  
Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

B.—As regards the figures in column "Total receipts from 1st April 1885 to date," audited figures have been availed of as far as possible.  
Return not received.  
Receipts from 1st April to 2nd August 1884.  
Receipts from 1st April to 1st August 1885.  
(f) Receipts from Dewari-Ferozepore State Railway.

(e) Total receipts from 1st April to 25th July 1885.  
(f) Total receipts from 2nd April to 2nd August 1884.  
(g) Of this length 40.5 miles are opened for passenger and goods traffic and the remainder for goods traffic only. The calculations are based upon total mileage.

FRED. FIREBRACE, Major, R.E.,

Under Secretary.

The 26th August 1885.

The 1st August 1885.

GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

## REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 2nd SEPTEMBER 1885.

GENERAL REMARKS.—Very slight rain has fallen in the Madras Presidency during the past week. In Bellary rain is urgently wanted, and prospects are reported to be very discouraging. In Madura, Coimbatore, and Salem prospects are also unfavourable. Rain is also wanted in Kurnool, Ganjam, Kistna, and Tanjore for the standing crops. In Mysore the situation remains unimproved, as little or no rain has fallen during the week under report. Generally speaking, prospects are fair in the hill tracts, but unfavourable in the plains; and it is believed that, if rain does not fall within the next fortnight, there will be a great loss of the dry crops of the Province. In Coorg the season continues favourable.

In Bombay rain has fallen generally in all districts, but more is wanted in several talukas of the Deccan and Southern Mahratta Country. Crops are withering in parts of Pooná, Ahmednagar, Sholapur, Dhawar, and Bijapur; and fodder is scarce in parts of several districts. In the Berars and Hyderabad more rain is wanted for the standing crops. In the Central Provinces wet weather prevails, and a break is much wanted in the northern districts. Crop prospects are favourable. Rain has been almost general in the Punjab, and the *khari* prospects continue good. In the North-Western Provinces and Oudh rain has fallen in most districts, causing injury to crops on low lands. General prospects are good, but a break would be very beneficial. General rain has fallen in all districts in Bengal during the week, but in places in the Rajshahye Division and Behar more is wanted. Excessive rain and floods have caused considerable damage, particularly to the ripe *aus* crops in the Burdwan and Presidency Divisions, and the *khadi* crops in Behar and Chutia Nagpur have also been injured to some extent. The *aus* harvest is progressing, and the transplanting of *aman* is nearly completed. In Assam the weather is seasonable and prospects generally good. In British Burma ploughing and transplanting have been nearly completed.

Cholera continues to be prevalent in the Madras and Bombay Presidencies, in Raipur in the Central Provinces, and in some districts of the North-Western Provinces. Elsewhere the public health is generally fair; and prices are fairly steady, except in Bengal, where the price of rice continues high, and in Mysore, where prices show a slight tendency to rise.

| Presidency or Province and District. | Rainfall for week under report.                          | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Gya                                         | 9.53                                                                                                                                             | Heavy rain has caused slight injury to crops, but general prospects good. Cholera in Nowada subdivision. Prices slightly lower.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Chumpanu                                    | 2.94                                                                                                                                             | Prospects of crops continue favourable; transplanting of paddy seedlings going on. Prices stationary. Cholera still reported from Mothari and Betteah towns and from the interior.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>N. W. Provinces and Oudh—(Sept. 3rd)</b> |                                                                                                                                                  | <b>General Remarks.</b> —General rain has fallen in all districts during the week; more rain is wanted in places in the Rajshahy division and Behar. In parts of the Burdwan and Presidency division excessive rain and floods have caused considerable damage particularly to the ripe <i>aus</i> crops, for the same reason the <i>bhadai</i> crops in Behar and Chota Nagpur have been injured to some extent, elsewhere the agricultural prospects are satisfactory; the <i>aus</i> harvest is progressing, and the transplanting of <i>amun</i> is nearly completed. Price of rice continues high throughout the Province. General health is good, but fever is appearing in some districts. |
| Benares (Sept. 1st)                         | 2.20                                                                                                                                             | <i>Rabi</i> ploughing in progress; prospects fair. Prices fallen slightly. General health good.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Gorakhpore (Aug. 31st)                      | Daily showers in all the tahsils; heavy rain in Maharaigaj.                                                                                      | Crops promising. Prices falling. Cholera abating in south-west, increasing in north-east.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Fyzabad (Sept. 1st)                         | Some rain everywhere, but not very heavy falls.                                                                                                  | Crops promising; <i>mash</i> being sown. Prices stationary. Cholera appeared in three tahsils; condition of cattle fair.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Lucknow (Aug. 31st)                         | Heavy rain during the week; average fall 6.00.                                                                                                   | Crops on low lands seriously injured, otherwise prospects fair; sowing of <i>bajri</i> and <i>mash</i> continues. Supplies ample. Prices stationary. Cholera is still reported in the city and suburbs; health of cattle good.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Rae Bareilly ( " " )                        | Heavy and general rain at Sadar during the week, 6.70; from evening of 25th to evening of 26th, 4.30 at Sadar; and 7.20 at tahsil Digbi-jaiganj. | Crops injured here and there. Considerable damage to houses at Sadar and elsewhere. Prices almost steady. Markets well supplied. Cases of cholera reported.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Parabgarh (Sept. 1st)                       | Rain from 2.40 to 5.00.                                                                                                                          | A satisfactory break since. <i>Sawan</i> , <i>makka</i> , <i>kakun</i> , and indigo are being cut; <i>makka</i> already in the market. Slight fever in Kunda.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

Transplanting of <i>sali aban</i> still continues; prospects of all crops good. Fever prevalent.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Mysore and Coorg—(Sept. 2nd)</b>                                                                                                                                                                                                                                                          |                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Bangalore ( " " )                                                                                                                                                                                                                                                                            | <i>Nil</i>                                           | No profitable rain since last report. Dry crops in critical condition. No present appearance of rain falling soon. Pasture and water reported to be failing. Cattle in poor condition. Public health fair, only 20 cases of cholera reported during week. Prices show a slight tendency to rise. Generally speaking prospects are fair in the hill tracts, but unfavourable in the plains; the common opinion is that if rain does not fall within the next fortnight there will be a great loss amongst all the dry crops of the province. |
| Mysore Mercara ( " " )                                                                                                                                                                                                                                                                       | 82                                                   | Transplanting of paddy nearly completed; coffee and cardamom crop in good condition. Prices of foodgrains slightly falling. Prospects of season and public health good.                                                                                                                                                                                                                                                                                                                                                                     |

E. C. BUCK,

Secretary to the Government of India.

# SUPPLEMENT TO The Gazette of India.

N<sup>o</sup> 37. { CALCUTTA, SATURDAY, SEPTEMBER 12, 1885.

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

*No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

### COAL TRANSACTIONS OF THE EAST INDIAN RAILWAY COMPANY.

No. 59 R., dated 18th May 1885.

From—The Government of India,

To—The Secretary of State for India.

We have the honor to invite your Lordship's attention to the correspondence ending with your Lordship's predecessor's Railway Despatch No. 1 of the 5th January 1882, on the subject of the conditions under which coal should be raised from the East Indian Railway collieries, and, with reference thereto, to forward, for consideration, copies of a joint memorial from the Bengal Coal Company, limited, and the Raneegeunge Coal Association, Limited, and of a letter from the Secretary to the Bengal Chamber of Commerce, dated the 6th February 1885, praying that the East Indian Railway Company might be restrained from competing with private enterprise in the sale of coal.

2. In the memorial two grievances are submitted for redress, *viz.*, (1) the sale to other railways of surplus coal from the East Indian Railway collieries; and (2) the exchange between the East Indian Railway Company and the New Beerbhoom Coal Company, Limited, of coal raised from their respective mines at Giridih and Asansol.

3. With regard to the alleged irregular sale to other railways of surplus coal, we forward a letter from our Consulting Engineer for Guaranteed Railways at Calcutta, from which it would appear that the sales hitherto effected by the East Indian Railway Company have not always been quite in consonance with the terms of the contract for working the colliery. In order to prevent any undue competition with Coal Companies, we had previously issued

\* Letter to Consulting Engineer, Calcutta, No. 129 R. T., dated the 14th February 1885.

Public Works Department letter No. 130 R.T., dated the 14th February 1885, to Solicitor to Government.

Opinion of the Hon'ble the Advocate General, dated the 23rd February 1885.

Public Works Department letter No. 225 R. T., dated the 16th March 1885, to Solicitor to Government.

Opinion of the Hon'ble the Advocate General, dated the 17th March 1885.

the effect of the arrangement on parties owning collieries in the vicinity of the East Indian Railway collieries.

5. Such exchange would appear to us to give the New Beerbhoom Company, Limited, who do not possess a colliery at Giridih, the power to compete with those who do to the extent of the quantity of coal exchanged, and to vitiate *pro tanto* the natural advantage secured by the latter; and consequently to enable coal from the East Indian Railway collieries to be placed in the market to the detriment of private enterprise. Under the circumstances we trust your Lordship will see fit to reconsider and revise existing orders on the subject after communication with the Board of Directors of the East Indian Railway Company.

To—His Excellency the Right Hon'ble EARL OF DUFFERIN, K.P., G.C.B., G.C.M.G., &c., &c., Viceroy and Governor-General of India.

The Memorial of the Bengal Coal Company, "Limited," and the Rangeegunge Coal Association, "Limited."

RESPECTFULLY SHEWETH,—

YOUR Memorialists are the proprietors of extensive coal fields in Bengal, which have been developed and opened out at a very costly expenditure of private capital.

2. In 1881 your Memorialists were compelled to petition the Governor-General in Council and the Under-Secretary of State for India to restrain the East Indian Railway Company from illegally and improperly competing with the Coal Companies in the sale of coal.

3. After due consideration of the grievances complained of, and upon receipt of a despatch from the Secretary of State for India directing that the East Indian Railway should not be "permitted to take up the position of competitors in the general market with those who had embarked capital in mining enterprise," the Government of India passed the following orders *inter alia* :—

(a) The Railway Company was directed to regulate its output of coal, as far as possible, in accordance with its own demands.

(b) The Company was desired to withdraw from its agreements with other Railways for the monthly supply of coal and coke at the earliest date possible, which the existing contracts would permit.

(c) And it was further ordered, so as to prevent all competition with the trade, that all sales of surplus coal raised *bona fide* in excess of requirements of its own working consumption, should take place at the pit's mouth by public auction.

4. A copy of the official correspondence relating to the matter is annexed\* for easy reference, and your Memorialists pray that it may be read and considered as a portion of the present Memorial.

\* Not printed.

5. In full reliance on the orders of Government as a guarantee for the protection of private enterprise in the coal trade from State competition, your Memorialists have continued to sink a large amount of capital in working their coal-fields.

6. Your Memorialists regret, however, that these orders, deliberately passed by the Secretary of State for India and by the Indian Government, have been extensively and continuously contravened directly and colorably.

7. In 1882 the said Railway sold 24,000 tons of coal, disposed of not by public auction but by private tenders.

8. In 1883 tenders were invited for 8,000 tons of coal.

9. In 1884 offers were invited by advertisement for the purchase of 10,000 tons of steam coal, alleged to have been raised in excess of anticipated requirements.

10. Your Memorialists have valid grounds for believing that these 10,000 tons have been sold privately to certain of the State Railways, all of whom have hitherto been constituents of your Memorialists. This is an open and direct violation of Government orders.

11. In addition to this open contravention of Government orders, the Railway Authorities have adopted a system of exchange with one of the lower or Rangeegunge District Coal Companies, especially selected, by means of which the Railway Company is in the habit of selling indirectly to the Up-Country Railways large supplies of its coal, and receiving in exchange large quantities of inferior Rangeegunge coal; this system is a transparently colorable evasion of the orders of Government above alluded to.

12. Your Memorialists desire to impress upon your Excellency in Council the very serious consequences which will necessarily follow if this State competition is permitted to continue. The Railway Authorities have a complete monopoly over the freightage of the line; it is perfectly competent, therefore, for them to undersell the existing Coal Companies, and virtually to close all competing collieries.

13. Your Memorialists desire to point out that there can be no practical difficulty to the Railway Authorities in giving full effect to the Government orders to abstain from competing with the Coal Companies.

14. It is perfectly feasible when coal has been raised in excess of requirements to direct that the output shall be decreased until such excess coal shall have been consumed. In this way all supposed necessity for coal sales would be obviated.

15. In conclusion your Memorialists pray for immediate redress, and that your Excellency in Council may be pleased to direct that all further transgressions of the Government orders may be stayed, and all illegal agreements with, and sales to, the State Railways may be cancelled.

Dated 6th February 1885.

From—The Secretary to the Bengal Chamber of Commerce, Calcutta,  
To—The Secy. to the Government of India, Railway Department.

In their letter of 23rd of March 1881 the Committee of the Chamber of Commerce submitted, for the consideration of the Government of India, an appeal on behalf of the Coal Companies of Bengal, against the action of the East Indian Railway Company in producing supplies of coal from their coal-fields greatly in excess of their own requirements and in disposing of such surplus to other coal-consuming concerns, thereby seriously affecting the interest of the proprietors of commercial Companies.

In support of that representation, the Committee of the Chamber submitted ample justification for the course which they adopted in endeavouring to protect private properties from the consequences of unlawful competition by the Rail-

way Company; they emphatically declared against a violation of a special clause of the contract between the Company and Her Majesty's Secretary of State for India, which provided that "the Company shall not, during the continuance of this contract, without the sanction of the Secretary of State in writing first obtained, engage in or carry on any business other than the business which is the subject of this contract," which was obviously limited to the proper functions of the Company as carriers by rail and managers of the railway, and to which the Company were restricted by Acts of Parliament under which they were incorporated as well as by their own Articles of Association.

The Committee's representation having received the consideration which its important nature called for, both from the Government of India and Her Majesty's Secretary of State, a reply, dated 16th August 1881, was communicated to the Chamber, which informed them "that Her Majesty's Government had decided that the East Indian Railway Company, as at present placed, in reference to their Act and Contract, cannot lawfully work their collieries except for the purpose of their own undertaking, and for any branch line of railway worked directly by them;" and that orders had in consequence been issued to the Company to regulate their output of coal, as far as possible, in accordance with their own demands and to withdraw from their agreements with other railways for the supply of coal and coke at the earliest date that their agreements would permit without involving the Company in breach of contract.

The Government's reply further stated—"By a little foresight, it is believed that the sales of surplus coal need not be so large as in any way to affect the interests of the private Companies, but such sales may now and then be necessary, and the inferior descriptions of coal which are necessarily brought up with the good will have to be disposed of. However, not more inferior coal will be allowed to be raised than is obligatory in order to get the description of coal required for the undertaking, and in order to prevent all competition in the Calcutta market all sales of coal by the Railway Company have been ordered to take place at the pit's mouth by public auction to the best advantage of the Company." And the Committee were informed, in conclusion, that "by attention to these orders, the Government of India believes that the East Indian Railway Company will not exceed the powers granted them, and all danger of competition with the colliery Companies will be avoided."

The Committee of the Chamber received these authoritative assurances with much satisfaction and in the confident expectation that the action of the East Indian Railway Company would be in entire conformity with the views expressed by Government and the orders that had been issued for the Company's guidance as to their proceedings in the future.

But the Committee have to record with much regret and disappointment that this expectation, based on the deliberate orders of Government, has not been realised, since they learn on unquestionable authority that the Railway Company have disregarded and evaded the orders which restricted them to their legitimate business by raising coal largely in excess of their requirements, and disposing of such surplus by private bargain, in direct contravention of Government orders, to the detriment of private commercial Companies.

The grievances of owners of collieries having been fully set forth in a memorial recently addressed to His Excellency the Viceroy and Governor General, the Committee desire to confine themselves to an expression of their entire disapproval of the course adopted by the Railway Company, and trust that the State will at once interfere and prevent such increase in an illegal traffic which obstructs the development of the proper functions of private enterprise.

No. 129 R.T., dated 14th February 1885.

From—The Secretary to the Government of India, Public Works Department,  
To—The Consulting Engineer to the Government of India for Guaranteed Railways, Calcutta.

In continuation of Public Works Department letter No. 76R.T., dated 26th January 1885, I am directed to request that, in dealing with questions connected with the disposal of surplus steam coal and other descriptions of coal

from the East Indian Railway collieries, you will be careful to see that the Company keep strictly within the terms of their contract in *all* respects.

2. It appears to the Government of India essential that all such questions should be considered on the following basis:—

- (1) that the steam coal to be sold is such as by its magnitude could be fairly called surplus, and is not a quantity (such as the 10,000 tons sold not long ago) which could easily be worked off by a slight reduction of the monthly winning; and
- (2) that the prices at which all sales are to be made are not lower than the ordinary market price.

3. The Government of India has also again had under consideration the nature of the exchanges of coal between the East Indian Railway Company and the New Beerbhoom Coal Company, and has referred the matter for the opinion of the Hon'ble the Advocate General. I am accordingly to request that you will see that no fresh agreement be entered into between the two Companies prior to the receipt of further orders on the point from the Government of India.

No. 130 R.T., dated 14th February 1885.

From—The Secretary to the Government of India,  
To—The Solicitor to the Government of India.

In forwarding the under-noted papers connected with the question of an exchange of coal between the East Indian Railway Company and the New Beerbhoom Coal Company, I am directed to request that the Hon'ble the Advocate General may be asked to favor the Government of India with his opinion as to whether this exchange comes strictly under the terms of the agreement between the Secretary of State and the East Indian Railway Company, a copy of which, together with the Company's main contract, is herewith forwarded.

2. The point on which the Government of India more particularly desires an authoritative opinion is whether the system of exchange in force can be equitably considered as giving the New Beerbhoom Coal Company, who do not own a colliery at Giridih, an artificial and unfair advantage in the competition for the up-country business with other Coal Companies who do own collieries there, by nullifying the natural advantage possessed by the latter, in a shorter lead.

3. I am to add that the question of exchange of coal was referred to the Secretary of State, and he replied that it might be allowed and was not inconsistent with previous orders on the case.

Despatch to Secretary of State, No. 107R., dated 16th September 1881, paragraph 3.  
Despatch from Secretary of State, No. 1R., dated 5th January 1882, paragraph 3.  
Despatch from Secretary of State, No. 81, dated 16th June 1881.  
(Return requested.)

This will be seen by the correspondence noted in the margin, copy of which is attached, but the Government of India believe that the Secretary of State had not before him, when giving his decision, the point of undue favor now referred.

Dated 23rd February 1885.

Opinion—By A. PHILLIPS, Esq., B.L., Officiating Advocate General, Bengal.

I am of opinion that the exchange in question is not open to objection on the ground suggested, the object being merely to obtain for the East Indian Railway the utmost benefit, and not to give any undue preference to the New Beerbhoom Coal Company.

I am asked whether this arrangement comes strictly within the agreement between the Railway Company and the Secretary of State.

The Secretary of State has expressed the opinion that it is warranted by his Railway Despatch of the 16th June 1881, in which (paragraph 4) he states the effect of the agreement with reference to dealings in coal. If I am desired to

express an opinion upon this point, I must say, with deference, that such an exchange is not, in my opinion, within the agreement. The Company is only authorised to raise coal for the purposes of the undertaking, and not for the purpose of being disposed of to outsiders; and it is authorised to dispose of its accidental surplus only. In the present case the Company raises coal in order to dispose of it, and not to use it. The coal thus dealt with appears not to be exactly suited to the requirements of the Company; and consequently, by means of it they acquire other coal more suitable for their purposes. But they have no power, as I understand their agreement, to raise coal for the purpose of acquiring other coal; and if they had, I see no reason why they might not effect their object by sale of their own coal and purchase of other coal. Exchange or barter is only a rudimentary form of sale, and, I think, is equally beyond the Company's powers.

No. 225R. T., dated 16th March 1885.

From—The Secretary to the Government of India, Public Works Department,  
To—The Solicitor to Government.

I am directed to acknowledge the receipt of your letter No. 216, dated 25th February 1885, forwarding the opinion of the Hon'ble the Advocate General on the question of exchange of coal between the East Indian Railway and the New Beerbhoom Coal Companies.

2. Mr. Phillips says:—

"In the present case the Company raises coal in order to dispose of it, and not to use it. The coal thus dealt with appears not to be exactly suited to the requirements of the Company; and, consequently, by means of it they acquire other coal more suitable for their purposes. But they have no power, as I understand their agreement, to raise coal for the purpose of acquiring other coal; and if they had, &c., &c."

With regard to this, I am to inquire whether the Government of India rightly understand the phrase "not to be exactly suited to the requirements of the Company" to mean that the coal, though good steam coal, is not, when raised, in as convenient a spot for the Company's requirements as it would have been if raised at Asensol.

3. Mr. Phillips also says "the exchange is not open to objection on the ground suggested," &c. With regard to this, I am to explain that paragraph 2 of the Government of India letter of the 14th instant was meant to suggest whether, as the avowed object of the contract was to tie the East Indian Railway down strictly to the raising of coal for their own purposes, and to debar them from competing with private enterprise at Giridih, an arrangement which had the practical effect of enabling third parties, having no colliery at Giridih, to sell coal raised there by the East Indian Railway Company in competition with other private parties possessing collieries there, was not an indirect evasion or contravention of the agreement.

4. I am to request that you will be so good as to obtain the views of the Advocate General on these two points before his departure for England.

Dated 17th March 1885.

Opinion—By A. PHILLIPS, Esq., B. L., Officiating Advocate General, Bengal.

I was under the impression that the coal raised by the East Indian Railway was not, in its character, exactly suited to the requirements of the Company. But I do not think that it makes any substantial difference if the unsuitability, instead of being one of character or quality, is one of locality. In either case the coal is raised, not for the purpose of consumption but for the purpose of exchange.

As regards the other point, I am still unable to see that the exchange, if warrantable at all, is objectionable on the ground suggested. I think it objectionable upon grounds which include that suggested. If those grounds are negatived, I do not see any further ground of objection.

No. 1151, dated 16th April 1885.

From—The Consulting Engineer to the Government of India for Guaranteed Railways,  
To—The Secretary to the Government of India, Public Works Department.

I have the honour to acknowledge the receipt of your letter No. 76R.T., dated 26th January 1885, and of the memorial to which it gave cover, from the Bengal Coal Company and the Raneegeunge Coal Association, protesting against the sale of coal by the East Indian Railway Company.

2. The information required by the Government of India will be found in the accompanying statements prepared by the Manager of the Railway Collieries at Kurhurbaree and Serampore, and received with letter No. 159G., dated 13th February 1885, from the Agent of the Company.

3. That Railway Companies, and in fact all associations incorporated as carriers, enjoying, as they generally do, a complete monopoly over freightage, "should not be permitted to compete in the general market with those who have embarked capital in mining and other enterprises," few right-thinking men will care to deny; and as the charge brought against the East Indian Railway Company practically amounts to interference with the coal trade of Bengal, I think it my duty to place the Government of India in possession of the entire facts of the case, to enable it to decide whether the Railway authorities have done anything to justify the charge.

4. The Act, and the contract under which the Company is now placed, leave no room for doubt that the Company cannot work the collieries made over to it, except for the purposes of the Undertaking; but as in raising steam coal a certain quantity of other coal of inferior description, for which the Company has only partial use, has to be brought up, and as fluctuations in traffic over which the Company can of course have no control, render it impossible for its officers to estimate with absolute accuracy the amount of good coal that will be required for the Undertaking and its branches, the agreement with the Company for the working of the Kurhurbaree and Serampore Collieries very properly provides that—

"Clause 3.—The Company shall be at liberty to sell and dispose of, in their discretion, any coal which, having been raised in anticipation of the reasonable requirements of the Undertaking and lines worked in connection therewith, shall be found to be in excess of such requirements, and also any coal not suitable for use on locomotives, or any products from such coal, or any lime, clay or other minerals, or earths, which it may be necessary to raise for the safe, proper, and economical working of the mines, at such price as may be from time to time fixed and determined by the Company with the approval of the Secretary of State."

5. This agreement, dated the 27th of July 1882, was concluded after mature deliberation, and it cannot be honestly contended that "it places the coal companies at a disadvantage by the infringement of their rights, or that it is in any way calculated to discourage private enterprise." If in their transactions in regard to the disposal of inferior or surplus steam coal the Railway authorities have kept strictly within the provisions of this agreement, they can hardly have prejudiced the interests of the memorialists and other colliery proprietors to any serious extent. The facts in this connection are shown in the following table which has been prepared at my request by the Chief Auditor of the East Indian Railway Company, as the colliery accounts do not show the entire transactions:—

Statement showing the quantity of coal raised at the collieries, that consumed and sold, and the balance in hand, from 1880 to 1884.

| PERIOD.            | Balance in hand. | Outturn from collieries. | Purchase. | Coal in exchange. | TOTAL.    | Consumption. | Coal in exchange. | Sales. | TOTAL.    | Balance. |

| Average of 5 years  | 435,611<br>87,122 | 262,673<br>52,534        | ...        | ...                | 698,284<br>139,857 | 206,685<br>41,337 | 59,180<br>11,836   | 1,750<br>350     | 267,615<br>53,523 | 430,669<br>86,134 |

The sales to the public or other railways during these five years were thus 51,410 tons of steam coal. From this quantity, however, may be deducted 18,502 tons *purchased* from the coal companies in 1880 and 1883, leaving only 32,908 tons of steam coal sold in five years, or 6,581 tons per annum on an average.

The outturn of steam coal from the collieries during the same period averaged 193,104 tons per annum, while the issues for the company's own consumption during the same period were about 187,662 tons per annum; so that, leaving out of consideration the stock balances but adding the sales of steam coal, we find that the output of steam coal from the mines has not on an average been more than 6 per cent. in excess of requirements—a very satisfactory result as all those who are called upon to frame estimates must admit.

The stock of steam coal in hand during the same period has averaged 40,542 tons, of which 10,981 tons were at the collieries. There were thus about 59 days' supply at the fuel stations on the East Indian Railway and branches, and 21 days' supply at the collieries.

6. In the foregoing calculation, I have not taken into account certain quantities of steam coal issued to the New Beerbhoom Coal Company in exchange for their coal, but as these transactions have been referred to in paragraph 11 of the memorial under consideration, and also in paragraph 3 of your further letter No. 129 R. T., dated 14th ultimo, I now proceed to show that, so far from being, as the memorialists describe them, "transparently colorable evasions of the orders of government" prohibiting the East Indian Railway Company from entering the coal market as dealers, they are in the words of the Marquis of Hartington himself, "*not inconsistent with the terms of His Lordship's Railway Despatch No. 81, dated 16th June 1881*" which presumably are the "orders alluded to." For "coal is," still quoting his Lordship's language, (when Secretary of State for India—see Despatch No. 1 of 5th January 1882), "exchanged for coal on fair terms, and the quantity of coal raised from the Railway Company's collieries is in no way affected by the transaction." The exchange was begun in 1881, the total receipts in four years being 97,067 tons at Asansol and the total issues being 78,140 tons at Giridih; the New Beerbhoom Company giving 1,143 tons of their steam coal in exchange for 1,000 tons of Kurhurbaree (railway) coal, the greater quantity of the former being given to make up for its less power in raising steam. The Railway Company thus gets this other coal at a large engine station, to which place an equivalent amount of its own coal would have to be led from Giridih, a distance of 74 miles, and so saves carriage; it also secures the freight between Giridih and Madhupur junction, 23 miles, of the coal sent up-country by the New Beerbhoom Coal Company; while at the same time it may lose the freight between Asansol and Madhupur junction, 51 miles, of that quantity of Beerbhoom coal which might otherwise be despatched from Asansol up-country. This arrangement is also advantageous to the New Beerbhoom Coal Company, as the latter obtain good coal at Giridih and save carriage over 51 less 23 or 28 miles.

The Bengal Coal Company and the Ranigunge Coal Association, who possess coal mines at Giridih, do not approve of this exchange, as it places the New Beerbhoom Coal Company in a position to sell the coal thus acquired to the public on equal terms with themselves; but to say that by means of this system the East Indian Railway Company "is in the habit of selling large supplies of its coal indirectly to the up-country railways," is a perversion of facts; for the Company, if it can be called a dealer, is likewise a *purchaser* to the same extent, both the payments and receipts being not in money but in kind. The transaction by direct exchange is legitimate and equitable, not one ton of coal for this purpose has to be raised in addition to the ordinary requirements of the railway, and the objections made arise simply from the desire to prevent the new Beerbhoom Coal Company from competing in the same market.

7. Turning now to the question of the disposal of coal not suitable for use on locomotive and the products from such coal, we find that the Railway actually uses all it possibly can, as will appear from the following facts:—

- (1) 22,188 tons of hard and soft coke have been made annually from the refuse or slack coal, out of which quantity 20,068 tons have been burnt in locomotives instead of steam coal, thus reducing the quantity of steam coal raised by an equivalent amount every year. It will be noted that the consumption of coke on the railway has increased from 14,467 tons in 1880 to 22,672 tons in 1884.

The total quantity sold to the public during these 5 years has been 10,758 tons, or an average of 2,151 tons per annum. The excess of coke manufactured over consumption has thus been about 10 per cent.

- (2) 14,076 tons of rubble coal have been raised annually against 10,301 tons consumed on the railway and 4,039 tons to the public. It

will be noted that the railway consumption of this article has increased from 507 tons in 1880 to 18,207 tons in 1884. The Locomotive Department now takes four waggons of rubble coal in every train of steam coal, in other words  $\frac{1}{10}$ th rubble is burnt with  $\frac{9}{10}$ th steam coal.

(3) 26,341 tons of smithy coal have been raised annually, out of which 14,714 tons have been consumed on the railway, and 17,202 tons have been sold to the public. Smithy coal is used partly in the railway workshops and partly for conversion into soft coke, each ton of the latter representing  $1\frac{1}{4}$  tons of the former.

(4) 52,534 tons of the slack or refuse coal have been raised annually against 41,337 tons consumed on the railway, and 350 tons sold to the public. Slack coal is used on the railway chiefly for conversion into the hard coke, each ton of the latter representing  $2\frac{1}{2}$  tons of the former. The Engineering Department also use it for burning bricks.

It will be noted that there was a balance of slack on the books of 59,387 tons on the 1st January 1880, and that a deficiency of 59,180 tons was written off to profit and loss in 1883. Great waste of this article goes on from exposure to sun, wind, and rain and from petty pilfering of all hands.

8. The quantity of these inferior descriptions of coal used by the Undertaking is thus being steadily increased, and as the small surplus sold to the public is offered fairly in the market at reasonable and profitable rates, determined in every case with the approval of Government, the interest of the other collieries cannot be seriously affected.

9. As the East Indian Railway Company is making every endeavour to utilise all its raisings, no better assurance could, I think, be given to the proprietors of private collieries that it has no wish to participate in their trade, or supplant them in their business. The Company's officers are fully alive to the fact that their collieries are exhaustible, and it is very improbable that, with a lease of 45 years still before them, they would be so imprudent as to court a failure of the supply by raising larger quantities of coal than they really need for current wants, in order to raise their revenue by a few thousand rupees a year.

10. The idea of calling the sale of a few thousand tons of surplus coal annually from the East Indian Railway Collieries,—State competition with private enterprise,—is preposterous. A regular outturn of coal is indispensable for the efficient and economical working of the mines, and if the railway traffic fluctuates and causes variation in the consumption, a surplus of steam coal must occasionally arise. As coal cannot be kept long in the open air in a tropical climate exposed to the sun and rain without deterioration, either the occasional excess must be sold off at once, or if kept for use, the outturn must be decreased and become irregular to the detriment of working the mines, and the East Indian Railway would have to burn spoilt coal in larger quantity at an increase of expense.

11. So long as the average yearly outturn from the East Indian Railway Collieries is kept within moderate limits, there can be no real ground of complaint on the part of the coal mining companies, and if the statement made in the commercial article of the *Pioneer* newspaper of the 3rd ultimo, to the effect that the Bengal Coal Company have declared a dividend of 12 per cent. on the operations of the past year be true, they evidently have not suffered from what they are pleased to call State competition.

12. I wish to lay some stress on the fact that the raising of steam coal is the backbone of colliery work and on the disadvantage which the collieries would experience if, after the annual requirements of steam coal are estimated, any sudden reduction of outturn should be determined upon. When the work of mining is in full swing, the Manager could not diminish the rate of outturn to a much lower figure without seriously injuring the colliery in respect of

labour. Even in England miners possess what almost amounts to a natural monopoly of the trade, and in India, as the memorialists themselves urged in 1881, "once miners are dispersed, it will be difficult to get them together again, or to get them at all on short notice." The suggestion therefore to work off surplus steam coal by reduction of the monthly winning, instead of selling it to the public, involving as it would do, restrictions in the outturn of coal and in the labour employed, would, if carried out, be extremely detrimental to economical working, would cause great uncertainty and distress among the coolies, and would tend to raise the price of labour.

13. It only remains to notice the prices at which the surplus coal has been sold to foreign railways and to the public. These are fixed so as to yield a fair margin of profit, and have in every instance been submitted for the approval of the Government of India as required in Clause 3 of the colliery agreement. The accompanying table recorded in *res 28* of East Indian Railway Meeting No. 1, dated 8th January 1885, is a fair example of the sale prices. The rates for coal demanded by the Coal Companies vary so much that it has not been found possible to follow any ordinary market prices.

It is evident that the more favourably all surplus stock can be disposed of, the cheaper will the coal required for the Company's own use be to it, and the more will it be in its power to reduce the rates of carriage, to the benefit of the public, including both the producers and the consumers of coal.

No. 99R., dated 6th August 1885.

From—The Secretary of State for India,  
To—The Government of India.

Your Excellency's Railway letter No. 59, dated the 18th May 1885, regarding the coal transactions of the East Indian Railway Company, has received my consideration in Council.

2. The point calling for action in this country owing to receipt of your letter was the existing practice of exchanges of coal between the East Indian Railway and the new Beerbhoom Coal Companies, and you will learn from the accompanying correspondence\* that it has been decided that the practice in question must be discontinued, as one opposed to the terms of the agreement between Government and the East Indian Railway Company, and that the necessary communication to that effect has accordingly been made to the Company.

3. I am glad to learn from your Excellency's letter that you have issued the necessary instructions to prevent any irregular sale to other railways of surplus coal by the East Indian Railway Company.

No. 1034-85 P. W., dated 26th June 1885.

From—Lord HARRIS, Under-Secretary of State for India,  
To—The Secretary to the East Indian Railway Company.

I am directed to transmit herewith copies of documents which have recently been received from the Government of India, relating to complaints made of the action of the East Indian Railway Company in respect to the disposal of their coal in India.

It will be observed that the Government of India have issued such orders as will obviate any cause of complaint so far as the sale of surplus coal by the Company is concerned, but there remains the question of exchange of coal with the New Beerbhoom Coal Company, or any other Company similarly situated, and before taking this point into his consideration the Secretary of State will be glad to be furnished with any observations which your Board may have to make on the matter.

No 92, dated 17th July 1885.

From—A. P. DUNSTAN, Esq., Secretary to the East Indian Railway Company,  
To—The Under-Secretary of State for India.

I am instructed to acknowledge the receipt of Lord Harris's letter of the 26th July, transmitting copies of documents, lately received from the Government of India, on the question of the exchange, by this Company, of coal with the New Beerbhoom Coal Company, and asking for any observations the Board may have to make on the matter.

In reply I am desired to say that the parties interested in the question under reference are :—

- (1.) The East Indian Railway Undertaking.
- (2.) The two Kurhurbaree Coal Companies,
- (3.) The New Beerbhoom Coal Company ;

the fields of (1) and (2) being at or in the neighbourhood of Giridih, miles 206—8 from Howrah ; and of (3) in the neighbourhood of Raneegunge, miles 120 from Howrah.

In 1881 it appeared to the Locomotive Superintendent of this railway that it would be advantageous to his department, in the saving of transport charges when stocking with coal the stations at the lower end of the line, if an arrangement were entered into with the New Beerbhoom Coal Company for mutual exchange of coal, and thereupon that Company undertook to supply their coal to the Railway Company at Asansol (miles 132 from Howrah) in exchange for  $12\frac{1}{2}$  per cent. less of Kurhurbaree coal delivered by the Railway Company to them at Giridih.

This arrangement saved to the East Indian Railway Undertaking the carriage of coal from Giridih to Asansol, a distance of 74 miles, and as, during the year 1881, 48,000 tons of coal were thus exchanged (with the approval of the Government), a saving to the Undertaking during that period of over 3,400*l.* was effected. Four-fifths of this amount, or 2,720*l.*, is received by the Government to the benefit of the Indian taxpayer.

As to the allegation of the Kurhurbaree Coal Companies that, in exchanging coal with the Raneegunge Coal Company, the Railway Company is "in the habit of selling indirectly to the up-country railways large supplies of its coal," the Board desire me to say that the arrangement above indicated does not involve the raising by the Railway Company of a single ton of coal in excess of the quantity that would be raised if no such arrangement existed. In the latter case the Railway Company would simply send the same 48,000 tons of coal down the line, although at a cost, as shown above, of over 3,400*l.* for transport.

But the Kurhurbaree Coal Companies urge that by giving the New Beerbhoom Company coal at Giridih, where their (the Kurhurbaree Companies') fields are situated, the Railway Company enables the New Beerbhoom Coal Company to compete with them for the trade of Upper India in Kurhurbaree coal.

This may be so ; still the general coal interests of India are not prejudicially affected. That which one Indian Coal Company loses, another Indian Coal Company gains, and as it is not contended that the Government of India are the protectors of the Kurhurbaree Coal Companies only, the Board fail to see the equity of the proposal to restrict the output of the New Beerbhoom Coal Company by over 54,000 tons a year, and to impose an avoidable charge of over 3,400*l.* a year on the East Indian Railway Undertaking, with the further result of excluding the New Beerbhoom Coal Company to the extent of 48,000 tons of coal a year from the trade of Upper India, to the advantage of the Kurhurbaree Coal Companies to a corresponding extent, and to the disadvantage of the consumer.

The Marquis of Hartington, when Secretary of State for India, appears to have decided, in a Despatch which the Board have not had the advantage

of seeing, that the exchange in question is warranted under the circumstances, and the Officiating Advocate General, Calcutta, has expressed the opinion that "the exchange in question is not open to objection on the ground" that it gives the New Beerbhoom Coal Company, who do not own a colliery at Giridih, an unfair advantage in the competition for the up-country business with other coal companies who do own collieries there, by multiplying the natural advantage possessed by the latter in a short lead. To this might have been added that the consumers in Upper India are, doubtless, materially benefited by the introduction of a third competitor for their custom in the trade of Kurhurbaree coal.

The Board apprehend that the contention of the Officiating Advocate General that the exchange of these coals is of the nature of barter, and therefore of sale, weighs with the Government of India in constraining them to refer the matter to the Secretary of State. On this point, the Board would observe that however much "barter"—which is defined by an admitted authority to be "the exchange of one commodity for another,"—may be a rudimentary form of sale, the exchange in question, of one commodity for a similar commodity, does not come within the definition either of barter, which is defined as above, or sale, in which money is paid for the commodity transferred.

The Board submit that there are no grounds on which the Secretary of State can reasonably be asked to terminate the arrangement.

No. 1300-85 P. W., dated 6th August 1885.

From—J. A. GODLEY, Esq., Under-Secretary of State for India,  
To—The Secretary, East Indian Railway Company.

I am directed to acknowledge receipt of the Board's letter No. 92, dated the 17th July 1885, urging reasons for a continuance of the existing practice by which coal is exchanged between the East Indian Railway Company and the New Beerbhoom Coal Company.

The Secretary of State for India in Council has given full consideration to the representations made by the Board.

The practice in question is, no doubt, beneficial to the East Indian Railway Company, but Lord Randolph Churchill, as well as the Government of India, is advised that it is opposed to the terms of the agreement between Government and the Company.

His Lordship, therefore, is unable to avoid the conclusion that the opinion expressed in Lord Hartington's Railway Despatch to the Government of India, No. 1, of the 5th January 1882, in an opposite sense cannot be sustained, and he regrets that he feels compelled to inform the Government of India that in future nothing should be done directly or indirectly in the way of selling coal to Coal Companies or others, except as arranged under Clause 3 of the Colliery Agreement.

GOVERNMENT OF INDIA.  
REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR  
THE WEEK ENDING 9th SEPTEMBER 1885.

GENERAL REMARKS.—In Madras rain in varying quantities has fallen in all districts, but more is urgently needed in several places, especially in Bellary, Coimbatore, Madura, and Salem. The reports from Bellary are very discouraging. Rain continues to hold off in Mysore; crops are generally reported to be withering, agricultural operations are at a standstill, and the prospects of the dry crops are critical and entirely dependent on a very early fall of rain. Fodder is becoming scarce, and the migration of cattle from Kolar into British territory is reported. In Coorg prospects continue favourable.

Slight rain has fallen throughout the Bombay Presidency, excepting Sind; but more is urgently required in several parts of the Deccan and Southern Mahratta Country, where fodder is scarce. In parts of Poona, Ahmednagar, Dharwar, Bijapur, and Belgaum the crops are withering for want of rain. They have been injured by floods and insects in parts of Karachi, by blight and worms in parts of Hyderabad, and by excessive rain in parts of Surat. In the Berars and Hyderabad rain is wanted for the standing crops, which are at present doing well. Rain has fallen generally throughout the Central India States, and the crops are doing well. In Manpur, however, rain is much wanted. In the Rajputana States rain has been almost general, and prospects are satisfactory.

In the Central Provinces agricultural prospects continue good; but more rain would be beneficial in Nimar and the southern districts, where the break has been of long duration. In the North-Western Provinces and Oudh rain has fallen in several districts; but a break has set in to the advantage of the crops, which have already suffered from excessive rain. Prospects are, on the whole, good. Moderate rain has fallen in most parts of the Punjab, and *kharif* prospects are generally good.

In Bengal rain has fallen in all districts, and a break is now much needed for the crops. Excessive rain and floods have caused considerable damage in parts of Burdwan and the Presidency Divisions, and some injury to the *bharoi* crops in places in Behar and Chutia Nagpur. Seasonable weather prevails in Assam, where agricultural prospects are generally good.

In British Burma ploughing and transplanting have been nearly completed.

Cholera continues in the Madras and Bombay Presidencies and in Raipur in the Central Provinces, and in some districts of the North-Western Provinces. Elsewhere the public health is generally fair.

Prices are rising in Bengal and Mysore; in the Punjab they are falling, and elsewhere they are generally steady.

Director General of Railways' No. 616 T., dated 19th August 1885.

Abstract Returns of Accidents to trains, &c., on the open lines of Railway in India for the quarter ending 31st March 1885.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling-stock, permanent-way, &c., shows an increase of 60 or 9.5 per cent. against an increase of 1,222 miles or 11.52 per cent. in the mean mileage open, and of 1,081,743 miles or 10.46 per cent. in the train mileage. The following are the Railways on which the numbers chiefly vary:—

| RAILWAY.                         | Accidents. |           |                         |                         | Train mileage.          |                         |
|----------------------------------|------------|-----------|-------------------------|-------------------------|-------------------------|-------------------------|
|                                  | Increase.  | Decrease. | Percentage of increase. | Percentage of decrease. | Percentage of increase. | Percentage of decrease. |
| Great Indian Peninsula           | 33         | ...       | 67.8                    | ...                     | 21.4                    | ...                     |
| Bombay, Baroda and Central India | ...        | 16        | ...                     | 87.2                    | 4.3                     | ...                     |
| Darjeeling-Himalayan             | ...        | 14        | ...                     | 63.6                    | ...                     | ...                     |
| Eastern Bengal                   | 59         | ...       | 173.6                   | ...                     | 30.0                    | ...                     |
| Rajputana-Malwa                  | ...        | 25        | ...                     | 25.0                    | 6.0                     | ...                     |
| Burma                            | ...        | 10        | ...                     | 50.0                    | ...                     | 2.6                     |

2. Besides the above there were 20 accidents on the Southern Mahratta Railway, 11 on the Bengal and North-Western Railway, 5 on the Rohilkhand-Kumaon Railway, and 3 on the Bareilly-Pilibhit Railway. Of these lines a section of the Southern Mahratta (40½ miles) was only opened on 24th March 1884, and consequently no return was received for the first quarter of 1884, and the remaining three were not opened during this period.

3. Of the increase of 33 accidents on the Great Indian Peninsula Railway, 32 appear under "Fire in trains" alone, the number entered under this head being 37 against 5. There was also an increase of 6 accidents under "Trains running over cattle" and a decrease of 6 under accidents classified as "Other accidents."

4. The decrease on the Bombay, Baroda and Central India Railway, chiefly took place under "Other accidents," and that on the Darjeeling-Himalayan in the number of cases of derailments of trains, engines, &c.

5. On the Eastern Bengal Railway the increase occurred under "Trains running over cattle on the line," "Failure of machinery, springs, &c., of engines" and "Failure of couplings." The number of accidents returned under these heads was 54, 15 and 11; against 28, nil, and 2, respectively.

6. On the Rajputana-Malwa Railway there was a decrease of 16 accidents under "Trains running over cattle," 6 under "Bursting of boilers, or tubes, &c., of engines" and 5 under each of the heads "Trains or engines travelling in the wrong direction through points," "Failure of couplings," and "Fire in trains." The number of cases of "Trains running into stations or sidings at too high a speed" rose from 1 to 8.

7. On the Burma Railway there does not appear to be any noticeable fluctuations under any particular head.

8. The casualties resulting from accidents to trains, &c., were among passengers and others, 3 killed and 22 injured against 1 injured, and among servants; 6 killed and 11 injured against 1 killed and 11 injured. The larger number of casualties during the quarter under review was due to 4 accidents, 2 on the East Indian Railway, 1 on the Great Indian Peninsula Railway, and 1 on the Punjab Northern State Railway. On the East Indian Railway alone 14 passengers were injured by two accidents, 6 by a collision which occurred on the 18th February 1885, during shunting operations at Agra Fort, owing to the driver being drunk, and 8 by a collision on the 25th March at Gya, between a wagon, which got uncoupled while being shunted, and some passenger vehicles.

9. In a collision on the Great Indian Peninsula Railway between an up and a down goods train at Kareli on the 8th March, caused through the carelessness of the driver of the latter train and the station master, 1 railway servant was killed and 5 injured.

10. On the Punjab Northern State Railway 3 soldiers were killed and 4 officers and 3 soldiers injured on the 15th March, in consequence of the derailment of a down troop special near Gujar Khan. The cause of this accident is obscure, but was most probably due to malice. Suspicions fell upon two men who had been railway servants, and they were tried; but the evidence was not strong enough to secure a conviction: a full report of it has been under the consideration of the Government of India.

11. The following table exhibits the number of accidents under the differ-

ent classes, and the number of persons killed and injured thereby:—

| DESCRIPTION.                                                                                                     | Number of accidents. | NUMBER OF PASSENGERS OR OTHERS. |          | NUMBER OF SERVANTS. |          | TOTAL.  |          |
|------------------------------------------------------------------------------------------------------------------|----------------------|---------------------------------|----------|---------------------|----------|---------|----------|
|                                                                                                                  |                      | Killed.                         | Injured. | Killed.             | Injured. | Killed. | Injured. |

| Fire in trains                                                                                                   | 78                   | ...                             | ...      | ...                 | ...      | ...     | ...      |
| Fire at stations, or involving injury to bridges or viaducts                                                     | 11                   | ...                             | ...      | ...                 | ...      | ...     | ...      |
| Other accidents                                                                                                  | 43                   | ...                             | ...      | 2                   | 1        | 2       | 1        |
| TOTAL                                                                                                            | 686                  | 3                               | 22       | 6                   | 11       | 9       | 33       |

12. The number of cases of "Goods trains, or parts of goods trains, engines &c., leaving the rails" increased from 69 to 77, of which 13 occurred on the Great Indian Peninsula Railway, 11 on the Bombay, Baroda and Central India, and 10 on the Sind, Punjab and Delhi. On the latter line there has, however, been a decrease of 7 in the total number of accidents under this head.

13. The cases of "Running over cattle" numbered 226 against 210 and were most numerous on the Eastern Bengal Railway, the number on that line being 54 or about 24 per cent. of the total. As compared with the corresponding period of 1884, there was an increase of 26 cases or 93 per cent. against an increase of 30 per cent. in the train mileage. Next to the Eastern Bengal stand the Rajputana-Malwa and South Indian Railways, with 31 and 24 cases respectively. On the Rajputana-Malwa Railway, however, the number shows a decrease of 16 or 34 per cent. against an increase of 6 per cent. in the train mileage.

14. Of the 27 cases of "Bursting of boilers or tubes, &c., of engines," 13 were on the Indus Valley, 8 on the Sind, Punjab and Delhi and 5 on the Nagpur-Chhattisgarh Railway. On the Sind, Punjab and Delhi Railway there was only 1 accident of this description in the 1st quarter of 1884. On the Rajputana Railway the number has decreased from 7 to 1.

15. The number of "Failures of machinery, springs, &c., of engines" were the largest on the Sind, Punjab and Delhi and Eastern Bengal Railways, being 13 and 15 respectively, out of a total of 55. In the corresponding previous quarter there was no accident under this head on the latter line.

16. It is noticeable that there was not a single case of "Failure of tyres" or "Failure of wheels" during the quarter under review.

17. The number of "Failures of couplings" was the same as previously, viz., 34, of which 11 occurred on the Eastern Bengal Railway, 8 on the Indus Valley, and 9 on the Rajputana-Malwa.

18. Of 8 cases of "Broken rails," 6 occurred on the Rajputana-Malwa Railway; and of 11 cases of "Fire at stations, or involving injury to bridges or viaducts," 6 occurred on the Northern Bengal Railway.

19. Under "Fire in trains" the number of cases has increased from 53 to 78, of which 14 were on the Madras Railway and 37 on the Great Indian Peninsula. As already noticed there was an increase of 32 cases under this head on the latter Railway, the total giving 1 case of fire for every 72,409 train miles, against 1 for every 441,191 train miles in the corresponding quarter of 1884.

20. The casualties to passengers from causes other than accidents to trains, &c., were :—

|                                                                               | Killed.   | Injured.  |
|-------------------------------------------------------------------------------|-----------|-----------|
| From falling between carriages and platforms                                  | 1         | ...       |
| Falling on to the platforms, ballast, &c., when getting into or out of trains | 5         | 4         |
| Falling out of carriages during the travelling of trains                      | 2         | 19        |
| Other accidents                                                               | 3         | 6         |
| <b>TOTAL</b>                                                                  | <b>11</b> | <b>29</b> |

21. The accidents to servants in the employ of Railways, or of contractors whilst performing duties connected directly with the transit of passengers and goods, from causes other than accidents to trains, &c., were :—

|                                                                           | Killed.   | Injured.   |
|---------------------------------------------------------------------------|-----------|------------|
| During shunting operations                                                | 6         | 12         |
| Falling off engines, vans, wagons, &c.                                    | 1         | 8          |
| Coming in contact with over-bridges, &c., during the travelling of trains | 1         | 1          |
| Getting in or off trains, engines, &c.                                    | 3         | 11         |
| Whilst loading, unloading, or sheeting                                    | 3         | 12         |
| Whilst breaking, spragging or choking wheels                              | ...       | 3          |
| Whilst working at cranes or capstans                                      | ...       | 4          |
| Whilst working on the permanent-way or in sidings                         | ...       | 2          |
| Whilst walking, crossing, or standing on the line                         | 7         | 1          |
| Whilst passing between vehicles                                           | 4         | 1          |
| Whilst attending to the machinery of engines, cleaning them, &c.          | 2         | 7          |
| Whilst attending to gates at level-crossings                              | 2         | 2          |
| Falling or being caught between vehicles and platforms                    | 2         | 2          |
| Falling off ladders, scaffolds, platforms, &c.                            | 1         | 1          |
| By falling of lamps, wagon doors, timber, weights, &c.                    | 1         | 12         |
| Whilst coupling or uncoupling wagons                                      | 2         | 4          |
| Miscellaneous                                                             | 4         | 38         |
| <b>TOTAL</b>                                                              | <b>39</b> | <b>121</b> |

22. Of other persons killed and injured by running trains, &c., 4 were killed whilst passing over the line at level-crossings, 30 were killed and 7 injured whilst trespassing on the line, 12 committed suicide, and 2 were injured in attempting to commit suicide; and 2 were killed and 1 injured from miscellaneous causes.

23. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1884 :—

| FIRST QUARTER, 1884. |                | FIRST QUARTER, 1885. |                |                                      | FIRST QUARTER, 1884. |            | FIRST QUARTER, 1885. |            |

24. In addition to the above, 19 persons are reported to have been killed and 51 injured in yards, workshops, &c., and 127 passengers to have met death in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—The attention of the officers concerned should be drawn to the increase in the number of accidents on the Great Indian Peninsula and Eastern Bengal Railway. The Government of India at the same time notices with pleasure the decrease in the number of accidents on the Bombay, Baroda and Central India, Darjeeling-Himalayan, Rajputana-Malwa, and Burma Railways.

2. Special reports of the serious accidents at Gya, Kareli and Gujar Khan have been received and considered by the Government of India, but no such report of the accident at Agra Fort has been received. The attention of the officers concerned should be drawn to this omission.

ORDER.—Ordered that this Resolution be communicated to the Local Governments, Administrations and

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh and the Punjab.  
The Chief Commissioners of the Central Provinces, Assam, and British Burma.  
The Residents, Hyderabad and Mysore.  
The Agents to the Governor General for Rajputana, Central India, and Biluchistan.  
The Director General of Railways.  
The Consulting Engineers to the Government of India for Guaranteed Railways.

Officers noted in the margin for information.

Ordered, also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered, further, that this Resolution, with the Abstract Returns, be published in the Supplement to the Gazette of India.

FRED. FIREBRACE, Major, R.E.,  
Under-Secretary

Documents accompanying  
Abstract Returns of Accidents on Indian Railways for the first quarter of 1885.

Statement showing the dates on which the Returns of Accidents on the undermentioned Railways for the First Quarter of 1885 were received by the Government of India.

\* Tables I to IV.

TABLE No. 1.

GENERAL TOTAL.

Number of Persons reported during the First Quarter of 1885, as KILLED or INJURED on the several RAILWAYS open for traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control, and ACCIDENTS happening otherwise.

| Mean<br>mileage<br>open. | RAILWAYS.                                             | PASSENGERS.                                 |          |                                                     |          | RAILWAY SERVANTS, OR SERVANTS OF CONTRACTORS. |                                             |          |                                                     | OTHER PERSONS. |        |                                                        |          |                                 |          | TOTAL ALL<br>CLASSES. |                                                            |          |        |     |     |

The 24th August 1885.

GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

No. 123 Met.  
1-12

*Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 17th September, 1885.*

Read the following :—

### Summary of the Weather Reports for August 1885.

The returns show that, on the whole, the main features of the weather of the past two months have been reproduced in the month under discussion. There are, however, some alterations in the distribution of rainfall, notably in there having been an excess in the Konkan and a deficiency in Malabar. During the first ten days, the rainfall along the west coast was insignificant; but on the 12th it became heavier, at the same time spreading over the inland parts of the Peninsula; and during the week following, more or less heavy showers fell at the majority of the Peninsula stations. At Bombay itself, after a long spell of fresh winds from between west-south-west and west-north-west and slightly showery weather on the 13th, the wind backed to south-south-east, and heavier rain set in, which increased during the next few days; and on the 16th,  $8\frac{3}{4}$  inches was reported. This fall of rain extended some distance inland, to Poona, Malgaon, and Secunderabad. After the 17th, the rain in the Peninsula fell off very considerably, and from the 25th to the end of the month the falls were insignificant. Notwithstanding comparatively heavy showers in the middle of the month, the Berars, Khandesh, the Deccan, and Hyderabad, all had deficient rainfall; while Sind, Cutch, Gujarat, and the Konkan were in excess.

In the south of the Peninsula, on the western side, there was a very slight deficiency, but in the interior, *i.e.*, Mysore and Bellary, and in the Carnatic, little more than half the normal amount of rain fell during the month. This deficiency extended to Nagpore, the Northern Circars, and Orissa, therefore to the whole of the Peninsula lying to the east of the Western Ghâts.

In the region under the influence of the Bengal branch of the monsoon, the weather was practically the same as during the preceding month. Numerous small cyclones, generally of low intensity, were formed, and travelled up the Gangetic plain; affecting the weather right up to the Punjab. Some of these cyclones were formed over the Gangetic Delta and travelled north-westward as far as the Punjab; others over Behar or the North-Western Provinces, and broke up either over those Provinces or in Rajputana. A few of these depressions, though small, possessed considerable intensity; particularly that formed near Agra on the 24th; and, as the following table shows, the accompanying rainfall was in many cases heavy:—

|                |     | Ins. |                    |     | Ins. |
|----------------|-----|------|--------------------|-----|------|
| Jhansi, 3rd    | ... | 4-65 | Roorkee, 16th      | ... | 5-20 |
| Naini Tal, 5th | ... | 9-50 | Rawalpindi, 17th   | ... | 4-80 |
| Naini Tal, 6th | ... | 4-14 | Murree, 17th       | ... | 5-42 |
| Bareilly, 8th  | ... | 6-18 | Calcutta, 23rd     | ... | 7-84 |
| Fyzabad, 8th   | ... | 1-32 | Agra, 24th         | ... | 4-34 |
| Roorkee, 9th   | ... | 5-10 | Sufna, 25th        | ... | 4-60 |
| Bareilly, 10th | ... | 4-40 | Gya, 27th          | ... | 5-17 |
| Murree, 10th   | ... | 6-23 | Rai Bareilly, 26th | ... | 4-80 |
| Delhi, 11th    | ... | 4-52 | Mozufferpur, 26th  | ... | 9-04 |
| Meerut, 13th   | ... | 4-04 | Mussoorie, 28th    | ... | 5-01 |
| Roorkee, 15th  | ... | 4-05 |                    |     |      |

These falls raised the general average, producing an excess (in some places considerable), throughout the whole region from Lower Bengal to the Indus.

At Roorkee, more than double the normal amount fell during the month. In Northern Bengal about the average, while in Assam and Cachar there was a slight deficiency. In Central India and Rajputana there was very little departure from the average.

The figures for the season up to date, show that the deficiency noticed at the close of July in the Northern and Eastern Punjab has disappeared; except as regards the Sialkot district, where the rains are still very short of the average, but that at the Indus Valley stations, there has been only about half the normal amount. At Purneah (Northern Bengal), there is also some deficiency. The most serious deficits are, however, reported from the Peninsula. In Khandesh and the Bombay Deccan, the rainfall has been less than half the normal average; and further to the southward, in Mysore, at Bangalore and Chittaldroog, the conditions are nearly as bad.

With regard to the other meteorological elements it appears that, with a few local exceptions, principally in the south of the Peninsula, there has been a considerable deficiency in pressure throughout the whole country. This deficiency was greatest in Sind, the Indus Valley, and Rajputana, but was almost equally great in parts of the North-Western Provinces and Bengal. It was apparently as great on the hills as on the plains. Owing to the slowness of the rainfall, temperature has been somewhat above the average over the Peninsula, but below it in Northern and Central India; while the humidity variations have naturally been the reverse of this, the excess being in the north and the deficiency in the south.

The following table shows the mean amount of rain and the difference from the average during the month of August 1885, according to districts, as far as is indicated by the telegraphic reports:—

| Districts.                                    | Average Rain-fall in August. | Difference from the average in August 1885. |
|-----------------------------------------------|------------------------------|---------------------------------------------|
| Punjab, West                                  | 5.74                         | + 0.37                                      |
| " East                                        | 8.19                         | + 3.14                                      |
| North-Western Provinces, Trans-Gangetic       | 12.74                        | + 6.30                                      |
| North-Western Provinces, Cis-Gangetic         | 8.89                         | + 4.58                                      |
| Behar                                         | 9.90                         | + 7.00                                      |
| Northern Bengal                               | 17.60                        | — 0.33                                      |
| Assam, Cachar                                 | 14.42                        | — 3.66                                      |
| Lower Bengal, Chutia Nagpur                   | 14.22                        | + 5.64                                      |
| Orissa, Northern Circars                      | 8.63                         | — 3.45                                      |
| Central Provinces, South                      | 12.26                        | — 1.97                                      |
| Berar, Khandesh                               | 5.99                         | — 1.36                                      |
| Rajputana, Central India, Saugor and Nerbudda | 10.98                        | + 1.85                                      |
| Sind, Cutch                                   | 2.29                         | + 1.57                                      |

SIMLA;

W. L. DALLAS,

The 5th September, 1885. } Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the papers be printed in the Supplement to the Gazette of India.

Circular No. 1178.  
98—2

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Surveys),—dated Simla, the 12th September, 1885.

Read—

The General Report on the Operations of the Survey of India Department for 1883-84.

## RESOLUTION.

Several changes took place in the *personnel* of the Survey Department of India during the year under report, of which the principal were due to the retirement from the service of the Government of Lieutenant-General J. T. Walker, R.E., C.B., and Mr. J. B. N. Hennessey, M.A., F.R.S., late Deputy Surveyor General in charge of the Trigonometrical Branch. The Government of India has already recorded its appreciation of the long and distinguished services rendered to the Department by the former officer, and His Excellency in Council has observed with satisfaction that Her Majesty the Queen-Empress has been pleased to recognize the valuable scientific work done by the latter by conferring on him the companionship of the Order of the Indian Empire.

2. The results of the working of the three Branches of the Department are described in Part II. of the report.

3. The Secondary Triangulation Party visited and erected beacons on the old stations of the East Coast Series, from Puri to Balasore. The positions of the beacons and buoys of False Point Harbour and the Dhamra river were accurately fixed, as were those of all prominent objects on the coast which could be used as land marks for ships. This work will, it is hoped, facilitate navigation and the future work of the Marine Survey.

The connection by triangulation of the Peninsula of India with the Straits Settlements and Malacca has been held in abeyance during the year, and it has recently been decided in view of financial exigencies that it shall not be undertaken for the present.

4. Eleven Topographical parties were employed. Of these three were in the field in Bombay, two in the North-Western Provinces, and one each in the Andaman Islands, Assam, Baluchistan, Central India, Mysore, and Rajputana.

5. The three Bombay parties worked in Cutch, Guzerat, and the South Deccan respectively.

In Cutch 2,154 miles were surveyed topographically on the scale of two inches to the mile, and 1,086 miles on the scale of half an inch to the mile, and 2,100 square miles were triangulated in advance. The Guzerat party executed some topographical surveys of Native States on the two-inch scale, and completed the survey of the Panch Mahals on the four-inch scale, including the demarcation of village and forest boundaries. The area already surveyed in Guzerat amounts to 18,191 square miles, or about two-fifths of the whole. In the South Deccan the area surveyed amounted to 1,832 square miles of a more mountainous and difficult country than any with which the party had previously met. It is estimated that the 15,200 square miles, which still remain unsurveyed in the area assigned to the South Deccan party, will occupy about 8 years.

6. The parties in the North-Western Provinces were employed in the Aligarh and Etah districts, and in the Mirzapur district, respectively. In the Aligarh and Etah districts 1,503 square miles were surveyed on the 2-inch scale. The riparian tracts on either side of the river Ganges, covering an extent of 98.09 square miles were surveyed on the 4-inch scale. It has recently been decided to suspend the topographical survey of the remainder of the North-Western Provinces and Oudh, the existing revenue maps being

sufficiently accurate to answer the present requirements of the Civil Administration, and topographical surveys of other tracts being more urgently required. The work of the Mirzapur party consisted of a survey of a portion of the district on the 2-inch scale, and the execution of theodolite traversing round the village boundaries of the Dudhi parana, and certain villages of the hilly tracts of Robertganj. This work was of a very laborious description, owing to the nature of the country.

7. A suitable map of the South Andaman Island being much needed by the Settlement officers, a party was deputed in November 1883 to make a complete survey of that island. The only datum available on which to base the survey was the position of a point on Chatham Island in the harbour of Port Blair, the latitude and longitude of which had been determined astronomically in 1863. The result of the season's work is a map of Barren Island and the Island of Narcondam on the scale of 8 inches = 1 mile and sheet No. 14 on the 4-inch scale. It has been decided that the survey shall extend to the remainder of the Andaman Islands. The general survey will be executed on the 2-inch scale, though certain portions of the South Andamans will be surveyed on the 4-inch scale. Advantage is being taken of the survey to investigate the geology and flora of the Island.

8. The Assam and North-Eastern Frontier party was originally to have been employed in the survey of the Noh Dihing valley up to the Patkai crest, but the Aka raid on the Darrang district having necessitated the despatch of a punitive expedition against the offending tribes, it was determined to take advantage of the opportunity offered for the Survey of the Aka Hills. Subsequently the Dapula country was also surveyed. The detailed survey executed covers 1,931 square miles of the Aka and Daphla hills on the scale of 1 inch = 4 miles; 622 square miles on the scale of 1 inch = 2 miles and 113 linear miles of route and river survey by native explorers within British territory.

9. The Baluchistan party was divided into three sections, of which one was employed with the Takht-i-Sulaiman Expedition; one accompanied Sir R. Sandeman's Mission into South-Western Baluchistan, and one was employed on the regular detailed survey. The area triangulated amounted to 6,100 square miles, and the area topographically surveyed to 4,840 square miles on the half-inch scale. This work was carried out in the Thal-Chotiali territory and the Kachi desert.

10. The Malwa party executed 1,390 square miles of triangulation and 1,587 square miles of detail survey on the 1-inch scale besides completing the triangulation and traversing for the large scale survey of the Dāngarpur city and the Kherwāra cantonment. The country is intricate and much cut up by small streams and hillocks. The party has now completed its work, and a portion of it will, during the ensuing field season, probably be sent into Ajmere, the remainder being transferred to Bengal.

11. In Mysore 1,417 square miles, including the work required as a basis for the Mysore city survey, were triangulated. The area topographically surveyed on the 1-inch scale amounted to 3,975 square miles in the districts of Shimoga, Kadur, Mysore, and Bangalore.

12. The Rajputana party was chiefly employed in surveying on the scale of 1 inch = 1 mile portions of the Sirohi and Palanpur States and the sanitarium on the Abu Range. The Sunda and Dorra ranges were surveyed on the 2-inch scale; and the revised survey of the city and environs of Ajmere was nearly completed for the Municipality on the scale of 12 inches = 1 mile. The total area surveyed was 1,211 square miles on the 1-inch scale and 120 square miles on the 2-inch scale, besides the 12-inch survey of Ajmere city; 4,133 square miles were also triangulated.

13. Three parties were employed in mauzawar, riverain and forest surveys in British Burma, the Punjab and Bombay, respectively. The first-named party surveyed 211 square miles of reserved forest tracts on the scale of 4 inches = 1 mile; and 52 square miles of unreserved forest and ground likely to be brought under cultivation on the scale of 2 inches = 1 mile. The area prepared in advance for next season was 321 square miles. The surveyed area lies on the western slope of the Pegu Yoma range in the Tharrawaddy district. The

country is very difficult for survey on account of the almost impenetrable undergrowth and the rugged, and in many parts inaccessible, character of the range. The several high ridges running parallel to the range are covered with forest, and intersected by streams while the Yoma or back-bone of the range stands up like a wall above the lower hills. In a part of the Thonze reserve a rise of more than 2,000 feet occurs in a little more than a mile from the crest.

14. The party employed in the Punjab continued its previous year's work in Hissar of a topographical survey on the 2-inch scale, combined with a system of skeleton traverses to aid an approaching settlement survey. In the report the system followed is thus described:—

The traversing follows village boundaries, in the interior of which sub-traverses are run at distances of about  $\frac{1}{2}$  a mile apart, furnishing fixed points at short intervals, all of which are permanently marked. From the data obtained of these points, skeleton plots can be prepared on any required scale. These will furnish an efficient frame-work for the cadastral survey of fields to be undertaken by the *patwaris* of the district under the superintendence of the Settlement Department.

The object of the Hissar experiment is to ascertain by actual trial in what way the Settlement and Survey Departments can best assist each other. While it is hoped that the survey skeletons will on the one hand form a frame-work for *patwari* field maps, so on the other it is expected that the details furnished by the field maps will be incorporated in the topographical maps. A fuller report on this subject is expected in the Surveyor General's Report for 1885-86, as at present there is no reason to believe that the work of the survey party is to be made in any way the basis of *patwaris'* maps, as was intended by the Government of India.

The areas surveyed comprised 1,782 square miles of the district on the 2-inch scale, the Hissar farm (61 square miles) on the 6-inch scale, and the city and station of Hissar, 14 square miles, on the 12-inch scale.

On the completion of the survey of Hissar, it had been intended to employ detachments of the party in Ferozepore, Umballa, Jullundur and Ludhiana. The experience gained in Hissar has, however, shown that in the plains districts of the Punjab, as elaborate a system is unnecessary, and in future the operations will consist of a modified skeleton traverse survey, two trijunction platforms being utilized for stations, and fixed in each village, and of a scientific survey of all riverain tracts subject to fluvial action. The topography of revised 2-inch maps of the province will be taken from the settlement maps, the details being tested and additions made where necessary.

15. The third mauzawar survey party was employed in the Thana district of the Bombay Presidency. The work done by it embraced the survey of the Thana Collectorate on the 4-inch scale and the 2-inch survey of the Jawhar State. On the larger scale, 612 square miles were surveyed and 288 square miles on the smaller. The country surveyed lies between the Western Ghats and the sea, and is very difficult in parts.

16. Cadastral or field survey parties were employed in the Ajmere-Merwara district, in three districts in British Burma, in three districts in the North-Western Provinces, in one district in the Central Provinces and in one district in Assam. The areas surveyed are given in the margin.

The Ajmere-Merwara survey was begun in connection with the revision of the settlement of the district. The fluctuating character of the cultivation rendered an ordinary cadastral survey of the district unsuitable and after consideration it was determined to adopt a system of traverse and village boundary survey, under which fixed points are established by professional traversing, and skeleton maps are provided showing the boundaries of each village and the position of each permanent mark within it. On these data the *patwaris* map in the cultivation at the time of their survey and whenever changes may become necessary.

17. The three cadastral parties in British Burma were employed respectively in the Bassein and Henzada districts, the Pegu and Shwegyin districts, and the Prome and Akyab districts. All the cadastral work required in the

CADASTRAL  
VEYS.

MAUZAWAR, RIVER-  
AIN AND FOREST  
SURVEYS.

Pegu and Prome districts has been completed; and now only one and a half parties are employed in Burma, half a party having been withdrawn altogether for financial reasons and another party having been diverted to topographical work.

18. In the North-Western Provinces the parties employed worked in the Benares and Basti districts, the Dehra Dun district (a detachment), and the Gorakhpur district.

The so-called Benares system under which the survey and settlement establishments work together, each preparing its own copy of the *khassra* and *jamabandi*, was followed in the Benares-Basti survey. In Gorakhpur a slightly different system has been adopted. There the survey officer furnishes with the map a correct record of all undisputed facts of ownership and tenancy, a complete list of all disputes, and a classification of the soils and statistics for assessment purposes. The Revenue Officer then fills up the dispute list and checks the soil classification. The success of this system in respect both of expedition and economy, when compared with cadastral work hitherto turned out by the Survey Department, has been shown by the result of the operations of the work of the first season. The detachment in Dehra Dun was employed in surveying the cultivated lands on the Benares system.

19. The detachment in the Central Provinces was employed in the Raipur district in the cadastral survey of a certain number of villages as a test of the accuracy of the settlement maps. The survey establishments prepare a skeleton survey of the boundaries of villages, together with those of moderately sized blocks of fields, and the interior divisions are afterwards to be filled in by the *patwaris* who also write up the record-of-rights. A survey class has been organized for the instruction of junior civilians, native officials and *patwaris*.

The arrangements for the survey of the remaining districts of the Central Provinces of which the settlement will expire within the next few years is now under the consideration of the Government of India.

20. The cadastral survey of the Kámrúp district was begun on the completion of the Hooghly River survey. The Benares system of survey has been adopted in Kámrúp at the instance of the Chief Commissioner.

21. A new system of training young Civilians in cadastral survey work by attaching them to regular field parties has been begun. In the North-Western Provinces, seven Civil Servants have been thus instructed in field surveying; and native soldier students from the Roorkee College have also been attached to the regular field parties of the Topographical Branch, and instructed in the method of delineating ground by plane-table survey.

22. In explanation of the foregoing paragraphs it may be stated that there are three systems of cadastral survey now at work, one in the Punjab where, except possibly in the case of the Hissar experiment, no use is made of the Surveyor General's Department, all field maps being constructed by *patwaris* under the control of the Settlement Officer. The actual cost of this work has not been ascertained, but it is believed to be cheap, and sufficiently accurate for revenue purposes, although it has the drawback of not fitting in with sufficient precision into the general survey maps of the country. The next system is that now under adoption in the Central Provinces, where, as already explained, the field plotting will be filled in by *patwaris* on a traverse skeleton provided by the Survey Department. The third is that in progress in the Gorakhpur and Basti districts of the North-Western Provinces, where the entire survey map of each village together with a considerable portion of the village record is turned out by the Survey Department. This system is the most accurate and complete in its results, but is probably the most expensive, and can only be justified in districts where the *patwaris* are insufficiently trained to do the field plotting. The Surveyor General is requested to bring forward in his next annual report as clear a statement as he can furnish of the cost and results of each of these systems. The subject of cost is more fully dealt with in paragraph 28 of this review.

23. Under the head of *Geographical and Miscellaneous*, the Darjeeling party surveyed the Sumesar Hills, the Daling Hills, and a portion of Sikkim.

besides triangulating and sketching Himalayan topography and demarcating and surveying the Nepal-Bengal Boundary. Explorations were also conducted in Tibet. This party did some interesting work and has helped towards an extended knowledge of Himalayan geography.

24. The Tidal and Levelling party has continued its scientific work; tidal observations being taken at 19 stations. The reduction of the observations has progressed steadily, and the final results have been determined, so that the co-efficients will be presented in the manner recommended by Professor Darwin and explained in the Report for 1882-83. The Spirit-levelling operations completed a line of levels between two sea-coast stations, *viz.*, from Kurra-  
chee to Agra and thence to Bombay with an error only of  $\cdot 624$  of a foot or less than 4 inches per 1,000 miles. This line was linked with that of last year and its length was over 425 miles over ground with rises and falls amounting in the aggregate to nearly 22,000 feet.

25. The two Astronomical parties were engaged in the extension of the electro-telegraphic longitude arcs eastwards of Calcutta, and measured six arcs during the season—Akyab-Calcutta, Akyab-Chittagong, Prome-Chittagong, Prome-Akyab, Moulmein-Prome, and Moulmein-Akyab. The link between Kurra-  
chee and Moulmein was thus completed.

26. The work of the Head-Quarters Offices, both at Calcutta and at Dehra, is dealt with in Part III. The several offices have again turned out a very large amount of work for other departments and Local Governments. The total number of maps issued during the year amounted to nearly 200,000, and their value exceeded a lakh and a half of rupees. Much good work was done in these offices in connection with the Calcutta International Exhibition. The 3,000 ornamental award certificates were produced with the aid of the heliogravure and collotype processes. Some of the special maps which were drawn for the Exhibition have been prepared for publication and the rainfall, railway and telegraph maps have already been published. Maps showing trade routes, distribution of languages, and river basins have also been printed. Maps showing the density of population and the distribution of the different religions and missionary stations are in course of publication. The forest map is, it is understood, now ready. The Government of India attaches great importance to these maps; and a Crop-map of India, shortly to be prepared, will be completed in time for the Colonial and Indian Exhibition of 1886.

27. The Mathematical Instrument Department issued 33,365 instruments valued at Rs. 1,61,529 to departments. The number issued exceeded that of last year by 12,000, their value being greater by Rs. 34,000. The Government of India is also glad to notice that there has been a considerable use of articles of Indian manufacture for this department. An innovation has been introduced into the department by the entertainment of apprentices in the several technical offices. Their work should be carefully watched; and the result of the experiment should be noticed in future annual reports.

28. The statements at pages LXXX and LXXXI of the Appendix, showing the cost rate per mile of work executed by the several parties are, as far as they go, very valuable. The opportunity is taken however to impress upon the Surveyor General the very great importance of reducing the expenditure on revenue surveys, and of placing the very lowest limit at which the resolution of September 4th, 1882, notwithstanding the comparatively small cost, compared with the charges of former years, of the North-Western Provinces Surveys, the charge is still too high to admit of the system being extended to any Province in which it is possible to utilize *patwaris* under the supervision of local officers for field plotting. Great credit is due to Majors Barron, Sandeman and Steel for their unremitting efforts to make the cadastral parties serve the Provincial Governments in the most effective manner, but it is now a question whether similar efforts should not, on account of the financial exigencies of the case, be directed to the perfection of a system in which the very utmost use should be made of the village officers for field plotting, under the control of an efficient staff of native supervisors. The fact that the Government, whether Imperial or Provincial, is obliged in any case to provide payment for a village staff, makes it imperative to require the education of that staff in the duty of making and

TIDAL AND LEVEL-  
LING OPERATIONS.

DEPARTMENT.COST RATE PER  
MILE OF WORK.

maintaining village maps so that the cost of a second establishment may be avoided, and it will be found that unless the Survey Department can make the above system the goal of its efforts, it will be difficult for it on financial grounds to maintain that connection with the cadastral surveys still remaining to be accomplished which it is very desirable to preserve. The two points to be aimed at, in modification of the North-Western Provinces system, seem to be the more liberal employment of the village staff, and the reduction of the charges for supervision. The Government of India would be glad if in future reports the information as to "cost" could, with the assistance of the Provincial authorities, be made to comprise a comparison between the total cost of various systems adopted in any districts in which the Survey Department is employed, whether to do the whole work as in the North-Western Provinces, or a part of the work as in the Central Provinces and Hissar. At present the table in page LXXX is not sufficiently instructive. The cost per acre for instance of a complete cadastral survey (including traverse, field plotting, and survey record) in Ajmere cannot be compared with that of a complete cadastral survey in the North-Western Provinces.

29. In conclusion, the Government of India thanks Colonel DePrée for his interesting report.

ORDER—Ordered, that the above Resolution be forwarded to the Local Governments and Administrations named in the margin; and to the Surveyor General of India and to the Foreign and Military Departments for information.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

# REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 16th SEPTEMBER 1885.

GENERAL REMARKS.—Good rain has fallen, both in Bellary and Anantapur, since the date of the last report. Migration continues from Alur, Bellary, and Hadgalli. In Salem and Coimbatore prospects are reported to have improved, but more rain is urgently needed in several districts in the Madras Presidency.

In Mysore there has been good rain in two or three districts, and more or less rain has fallen also throughout the State, though not in sufficient quantity to remove all cause for apprehension. It is hoped that a considerable portion of the standing crops will be saved if more good rain falls. Water and pasturage are still scarce, and the cattle are generally in poor condition. Future prospects depend much on further timely rain. In Coorg the season continues favourable.

Good rain has fallen throughout the Deccan and in parts of Bijapur, and the young crops have been much benefited thereby. More rain is still wanted in parts of the Deccan, and urgently in parts of Dharwar, Belgaum, Gujarat, and the Konkan, where the crops are withering. Paddy continues scarce in parts of some districts. In the Berars the standing crops are generally doing well, but more rain is wanted. In Hyderabad the rainfall of the week has been beneficial to the crops. In the Central India and Rajputana States there was little or no rain during the week under report, and it is much wanted in some places. Crop prospects are, on the whole, generally good.

In the Central Provinces rain is wanted everywhere, but especially in Nimar and Sambalpur. Preparations for the *rabi* have commenced. In the Punjab *kharif* prospects are generally good, but more rain is wanted in Ferozepore, Lahore, and Shahpur. In the North-Western Provinces and Oudh there has been a break in the rains, but prospects continue good.

In Bengal there has not been much rain during the week, and the cessation has greatly benefited the crops in many districts. In Orissa more rain is wanted. General prospects of crops are fair, except in inundated tracts in the Burdwan and Presidency Divisions and in Behar.

No reports have been received from Assam and British Burma.

The public health is generally fair in all Provinces.

In Bengal the price of rice has risen in several places, owing to excessive rain and floods. In the Punjab prices are fluctuating. Elsewhere they are generally steady, except in Sambalpur in the Central Provinces. In Mysore there has been no material change in prices. In one district, however—Kolar—they are falling slightly.

| Presidency or Province and District. | Rainfall for week under report.                                                                        | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

Cholera in Dindori, Niphad, Yeola, Malegaon, and Nandgaon; total attacks 29, deaths 26. Wheat 33, <i>bajri</i> 29½, and rice 20½ pounds per rupee. |
| Colaba (Bombay)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Rain on 11th and from 13th to 15th.                                                                                                                              | Total rainfall for week 2.81. Total rainfall to date 56.42, being 7.30 below average; abnormal temperature 2° warmer on 12th, 2° cooler on 13th, and nil on all other days; vapour in air normal; wind normal on 9th and 10th. Abnormal wind northerly from 11th to 15th; lightning on 12th; thunder and lightning on 13th.                                                                                                                             |
| Poona                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Rain throughout the district; maximum 2.98 at Sinnar; minimum .15 at Khadkala.                                                                                   | Young crops improved by the late rains, but more still wanted. 46 cholera cases in two talukas, 24 deaths. Prices of <i>bajri</i> 28 and <i>juari</i> 36; in Poona <i>bajri</i> 27 and <i>juari</i> 30 pounds per rupee.                                                                                                                                                                                                                                |
| Ahmednagar                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Ahmednagar, 2.12; Nagar, 1.35; Shrigonda, 1.27; Jamkhed, 1.68; Rahuri, 1.64; Sangamner, 1.13; Akola, .98; Kopergaon, .81; Newasa, .45; Karjat, .36; Shegaon, .6. | In Parner <i>kharif</i> crops generally greatly benefited. Rain wanted in Parner. <i>Rabi</i> sowing commenced in Shrigonda. Want of fodder felt in Kopergaon, Sangamner, and Parner. Slight cattle-disease in Sangamner. Cholera 60 attacks and 20 deaths; slight fever in Akola. <i>Bajri</i> from 35 to 42 and <i>juari</i> from 43 to 60 pounds per rupee.                                                                                          |
| Sholapur                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Barsi, .48; Madha, .18; Karmala, .91; Pandharpur, .7; Akalkot, .10; none elsewhere.                                                                              | Rain that has fallen has done some good to existing crops. Since the 13th instant, there has been a general fall of rain of from 2 to 3 inches and more is expected; this rain will save the existing <i>kharif</i> crops and enable cultivators generally to commence <i>rabi</i> sowing. <i>Juari</i> 43 pounds 26 tolas and <i>bajri</i> 30 pounds 11 tolas per rupee. Cholera 16 cases, 8 deaths.                                                   |
| Dharwar                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Rainfall highest; in Mundargi, .44.                                                                                                                              | Heavy rain urgently required even where crops withering from drought and sowing stopped. Great scarcity of fodder; cattle being sent to western villages to get grazing. Prices of grain stationary or rise very slightly; this probably is due to importation of grain by railway, about 5,000 maunds arriving daily. Public health good. Land ready for sowing.                                                                                       |
| Kanara                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Karwar, .10; Sirsi, 1.10; Haliyal, .22.                                                                                                                          | Early rice crops on coast in ear. Cattle-disease in Karwar, Bhabkul, Sirsi, Mundgod, and Supa; fever in Yellapur. Common rice at Karwar 12½ seers, district average 13½ seers per rupee.                                                                                                                                                                                                                                                                |

Fever and bowel-complaints prevalent. <i>Bajri</i> 35 and <i>juari</i> 46 pounds per rupee.                                                                                                                                                                                                                                                                                                                                          |
| <b>General Remarks.</b> —Good rain throughout the Deccan and in parts of Bijapur. Young crops much benefited by it. More rain still wanted in parts of the Deccan and urgently in parts of Dharwar, Belgaum, Gujarat, and the Konkan, where crops are withering. Standing crops injured by rats, insects, and floods in parts of Karachi, and by blight in parts of Hyderabad. Scarcity of fodder continues in parts of Nasik, Ahmednagar, Dharwar, Satara, Bijapur, and Belgaum. Cholera in parts of fifteen, fever in parts of eleven, and cattle-disease in parts of eight districts. |                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Crops not drowned by recent flood doing well. Health fair.                                                                                                                                                                                                        |
| <b>General Remarks.</b> —Generally not much rain during the week, and the comparative cessation of it in many districts has greatly benefited all crops. In Orissa, however, more rain is wanted. General prospects of crops are fair, except in inundated tracts in the Burdwan and Presidency Divisions and Behar. Price of rice already high; has risen in several districts owing to excessive rain and floods. General health continues fair, but fever has appeared in some districts. |                                   |                                                                                                                                                                                                                                                                                       |

Cholera decreasing. Prices unchanged.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Sambalpur (Sept. 12th)                 | 06                                                       | Weather very warm; rain much wanted. Rice in critical condition, and has already been seriously injured on high lands. Cotton and sugarcane doing well. Cholera in parts. Prices rising.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                        |                                                          | <i>General Remarks.</i> —Weather continues clear and hot, and rain is wanted more or less in every district, especially in Nimar and Sambalpur. Prices, however, remain steady, except in Sambalpur. Cholera decreasing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Mysore and Coorg—(Sept. 16th)</b>   |                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Bangalore } (Sept. 17th)               | Bangalore, 4.80; Mysore, 3.31; Tumkur, 1.33; Kolar, .79. | Rain has also fallen more or less throughout the State, though not in sufficient quantity to remove all apprehensions. If more good rain falls it is hoped that a considerable part of the standing dry crops which are already waving will be saved. Water and pasturage still scarce; in parts of Bangalore leaves occasionally being used for fodder; cattle generally in poor condition; no material change in prices, except in Kolar, where they have fallen a little. Cholera abating in Mysore district, elsewhere public health generally good. The late unexpected downpour has lessened the gloomy anticipations which prevailed a week ago. Prospects are, however, still uncertain, and much depends on further timely rain. |

| Presidency or Province and District.     | Rainfall for week under report.        | State of agricultural prospects.                                                                                                                                                                                                                                                                            |

E. C. BUCK,  
Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

---

N<sup>o</sup> 39. { CALCUTTA, SATURDAY, SEPTEMBER 26, 1885.

---

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum, if delivered in Calcutta, or nine Rupees if sent by Post.*

*No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*
