| Accidents involving injury to persons . . . . .                                   | 87                   | ...                           | ...      | ...              | ...      | ...     | ...      |
| Accidents involving injury to animals . . . . .                                   | 3                    | ...                           | ...      | ...              | ...      | ...     | ...      |
|                                                                                   | 30                   | ...                           | ...      | ...              | 1        | ...     | 1        |
|                                                                                   | 612                  | 11                            | 33       | 4                | 7        | 15      | 40       |

of cases of "Goods trains, or parts of goods trains, engines, or rails" increased from 70 to 92, or by 22, of which 8 occurred on the Indian Peninsula Railway and 8 on the Northern Bengal.

of cattle accidents shows a decrease of 10; but it appears that there were decreases of 28, 12, and 15 on the South-Indian, Great Indian, and Indus Valley Railways, the numbers increased by 13 on the Punjab and Delhi and Eastern Bengal Railways respectively. On the Ajmer-Merwara Railway, the number diminished from 1 to 0.

to 34, but still it was the largest, being about 17 per cent. of the total number; and with the exception of one, all the cattle accidents on this line occurred on the unfenced portion of the way. Next to the Rajputana-Malwa, the number of cattle accidents was the largest on the South Indian and Eastern Bengal Railways, *viz.*, 27 on each. In returning these accidents on the latter railway, the Railway Administrations have not stated whether the engines were fitted with cow-catchers, as directed in clause VIII of paragraph 4 of Public Works Department Circular No. 4 Railway of the 5th March 1878, nor have they specified the state of the fencing where the accidents occurred, as directed in paragraph 8 of Public Works Department Circular No. 15 Railway of the 29th May 1879.

Of the 27 cases of "The bursting of boilers or tubes, &c., of engines," 15 took place on the Indus Valley Railway, and 7 on the Sind, Punjab and Delhi Railway; and of the 50 "Failures of machinery, springs, &c., of engines," 12 took place on the Indus Valley Railway, 8 on the Northern Bengal Railway, and 7 each on the Sind, Punjab and Delhi and Eastern Bengal Railway. On the Indus Valley Railway, however, there was, as already pointed out, a decrease of 10 accidents under the latter head.

The number of accidents from "Fire in trains" diminished from 37, of which 18, or about 49 per cent., occurred on the Indus Valley Railway, and 8, or about 22 per cent., on the Madras Railway. In all the cases on these two lines the fuel used was wood.

The accidents classified as "Other accidents" numbered 39, there being a reduction of 18. These accidents were the largest on the Baroda and Central India and Sind, Punjab and Delhi Railways, 17 respectively.

The casualties to passengers from causes other than accidents, &c., were—

|                                                                              |          |           |
|------------------------------------------------------------------------------|----------|-----------|

| <b>TOTAL</b>                         | <b>82</b>            | <b>121</b> | <b>90</b>            | <b>158</b> |

In addition to the above, 13 persons are reported to have been killed and 44 injured in yards, workshops, &c., and 132 passengers to have met death in carriages and at stations from causes unconnected with the working of trains.

**RESOLUTION**—The circumstances connected with the serious accidents which occurred to the down mail train on the Eastern Bengal State Railway on the 2nd October, and to the down Bombay mail on the Sind, Punjab and Delhi Railway on the 18th October 1884, have already received the special attention of the Government of India.

The Government of India notices with pleasure the decreases in the total number of accidents on the South Indian, Great Indian Peninsula, Bombay, Baroda and Central India, Indus Valley and Rajputana-Malwa Railways, although the number of cattle accidents on the Rajputana-Malwa Railway, *viz.*, 34, is still high.

The attention of the officers concerned should be drawn to the increase in the number of accidents on the Eastern Bengal, Northern Bengal, and Cawnpore-Achnera State Railways, especially to the large number of cattle accidents on the Eastern Bengal State Railway. It is noticed that in recording the cattle accidents on the Eastern Bengal State Railway, it has not been stated whether the engines were fitted with cow-catchers, as directed in clause VIII of paragraph 4 of Public Works Department Circular No. 4 Railway of 1878, and what was the condition of the fencing at the places where the accidents occurred, as directed in paragraph 8 of Public Works Department Circular No. 15 Railway of 1879.

ORDER.—Ordered, that this Resolution, together with the Abstract Returns be communicated to the Governments, Administrations, and Officers noted in the margin for information.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

| <b>General Remarks.</b> —There has been good general rain throughout the province again this week; in a few places only in the Patna division the rainfall is said to be not yet quite sufficient. Prospects are now generally reported to be favourable, except in Tipperah, where considerable damage has been done by excessive rain and floods; early rice, jute, sugarcane, and other standing crops are now growing well, and cultivation of late rice is in full swing all round; in some places transplanting of <i>amun</i> seedlings has begun. Public health is generally fair, though cholera is still prevalent in some localities. |                                                                                                   |                                                                                                                                                                                                                                          |

#### NOTICE UNDER SECTION XXX OF ACT XIV OF 1882.

Notice is hereby given that Lallbehary Dutt has, with the permission of the High Court of Judicature at Fort William in Bengal under the provisions of Section 30 of Act XIV of One thousand eight hundred and eighty-two on behalf of himself and all others the Creditors of Bhayrodan and Poorunmull, instituted a suit in the said Court in its Original Side against the said Bhayrodan and Poorunmull both of No. 48, Cross Street, Burra Bazar, in the Town of Calcutta, traders, Narmull Lahea, of No. 7, Juggomohun Mullick's Lane in Burra Bazar aforesaid, Merchant, and Dedraj of No. 56, Burtollah Street in Burra Bazar aforesaid, Merchant, for the recovery of the sum of Rupees three thousand three hundred and seventy-five two annas and nine pies, being the amount of composition at the rate of four annas in the Rupee payable on the sum of Rupees Thirteen thousand and five hundred eleven annas and three pies due to the said Lallbehary Dutt with interest, for an account if necessary of all monies belonging to the estate of the said Bhayrodan and Poorunmull came into the hands of the said Narmull Lahea and Dedraj or either of them or to the hands of other persons for their use or which but for their wilful default or neglect would have come into their hands or use and of the payments made by them on account of the estate of the said Bhayrodan and Poorunmull and also of the amounts due to the creditors of the said Bhayrodan and Poorunmull who have signed the composition deed, and if necessary to have provision made out of the assets of the said Bhayrodan and Poorunmull and out of funds to be supplied by the said Narmull Lahea and Dedraj for the payment of the composition respectively payable to the said Creditors of the said Bhayrodan and Poorunmull.

Dated this twenty-fifth day of June one thousand eight hundred and eighty-five.

By order of the Court,

R. BELCHAMBERS,

Registrar.

#### IN THE COURT OF THE SUBORDINATE JUDGE AT CUTTACK.

ORIGINAL SUIT No. 16 of 1885.

Notice is hereby given that Hurry Ram, son of Teeluck Chand, deceased, of Nayasaruk in the Town of Cuttack, has instituted a suit, numbered as above, in this Court against Gunga Saha Treekha Ram, and Ramsaran Das for the recovery of Rs. 2,358-10 only due on account of cloths, &c., purchased by them; and that 17th July next has been fixed for the final hearing of the suit.

RADHA KRISHNA SEN,

Subordinate Judge.

CUTTACK,

The 19th June 1885.

#### NOTICE.

In pursuance of Section 42 of Act XXVIII of 1866, notice is hereby given that all persons having claims against the Estate of George Baird, late of Lahore, Merchant and Commission Agent, deceased, who died intestate at Bombay on the 11th day of June 1884, and letters of administration to whose estate and effects were, on the 11th day of August 1884, granted by the Chief Court of the Punjab to me, Sardar Dyal Singh Majithia of Amritsar, at present of Lahore, *Rais* and *Jagirdar*, are hereby required to send in particulars of their claims to, and to prove their claims at, my house and office at Lahore near the Mayo Hospital, on or before the 1st day of August 1885, after which date no claim will be admitted and the assets of the estate will be distributed amongst the parties entitled thereto.

Dated this the 4th day of June 1885.

DYAL SINGH MAJITHIA,

Lahore.

## PROMISSORY NOTES.

## Lost

The Government Promissory Note No. 189247, of the 4 per cent. of 1865, for Rs1,000, originally standing in the name of Girisachandra Bisvas, the proprietor, by whom it was never endorsed to any

other person. Payment of the above note and the interest thereupon has been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of the proprietor.

GIRISACHANDRA BISVAS,  
Sudder Bazar, Meerut.

SUPPLEMENT TO  
**The Gazette of India:**

N<sup>o</sup> 28 { CALCUTTA, SATURDAY, JULY 11, 1885.

## OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

REVENUE REPORT OF IRRIGATION WORKS IN RAJPUTANA FOR THE  
YEAR 1883-84.

No. 1331., dated Simla, the 24th June 1885.

RESOLUTION—By the Government of India, Public Works Department.

## READ—

Letter No. 1203S., dated 30th April 1885, from Secretary to Agent, Governor General, and Chief Commissioner, Rajputana, and its enclosures, the Revenue Report, and Memorandum thereon by Chief Commissioner.

OBSERVATIONS.—The figures of principal interest in connection with the operations for 1883-84 are given in the memorandum by the Chief Commissioner which is submitted with the Report of the Settlement Officer.

2. The results from the assessments of the year do not compare favorably with those of the previous year which was the best on record, but, on the whole, they may be considered to be very satisfactory. The gross earnings were only Rs8,193 less than in 1882-83, whilst there was a further decrease of Rs4,205 in the working expenses. The percentage of net assessed revenue on the capital outlay was 3.28, the similar figure for the previous year was 3.55.

3. In the report under review no allusion is made to the cost of revenue collection. Special attention was drawn in the Government of India Resolution on the Revenue Report for 1882-83 to the high charges under this head which had also been unfavorably noticed by the Chief Commissioner in his note which accompanied that report. The Government of India would be glad

to learn what progress has been made in reducing the collection charges, and desire that the point may be specially noticed in the future reports.

4. Owing to insufficient rainfall there was a falling off in the area irrigated under all the tanks, but the deficiency was most severely felt in Ajmere and in the Northern part of Beawar where the new large tanks are situated, and the assessed revenue from these works fell from ₹9,883 in the previous year to ₹6,299 in 1883-84. The revenue from the older tanks which are situated further to the south was hardly affected at all, the decrease being only 0·7 out of a percentage in 1882-83 of 9·6 on the capital outlay. A comparative table of the rainfall registered at the principal centres of irrigation would be a useful addition to future reports.

5. From remarks at the close of the Chief Commissioner's note it would appear that some benefit has already been felt from the system that has lately been introduced of retaining a certain proportion of the supply in the tanks at the close of the season with the object of supplementing a possible deficiency of rainfall in the succeeding year.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Agent, Governor General, and Chief Commissioner, Rajputana, for information and guidance.

Also, that a copy of the Resolution and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh and the Punjab, in the Public Works Department, for information.

Also, that a copy of the Resolution and of the Report be forwarded to the Revenue and Agricultural Department and to the Department of Finance and Commerce for information.

Also, that the Resolution and the memorandum by the Agent, Governor General, together with the statement of general financial results compiled by the Examiner of Public Works Accounts, be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy be forwarded to Her Majesty's Secretary of State for India for information.

R. HOME, Colonel, R. E.,  
Offg. Deputy Secretary to the Government of India.

*Memorandum by the Chief Commissioner on the Ajmere-Merwara Irrigation Revenue Report for the year ending 31st March 1884.*

The total outlay on capital account to end of 1883-84 is shown to be ₹15,42,700, inclusive of indirect charges amounting to ₹58,858. The sum assumed to represent the capital outlay incurred up to end of 1868-69 while the works were outside the operations of the Public Works Department being ₹6,17,563, the capital account has received an addition of ₹9,25,137 on account of the works carried out by the Public Works Department during the 15 years ending with 1883-84. Of this Public Works Department outlay, the tanks known as the large new ones have absorbed nearly nine-tenths or ₹8,32,482, the remaining one-tenth or ₹92,655 having been spent on minor new works and on additions and improvements to old tanks, viz., those constructed before the end of 1868-69. The average yearly expenditure during the 15 years already alluded to has been ₹61,676, the largest annual outlay, ₹1,61,775, in the year 1872-73, and the smallest ₹4,489 in the year under review. This small sum was expended chiefly on improvements to old tanks. The new tank at Chitor in the Beawar Sub-Collectorate, which had been in progress during the preceding two years and was all but complete at the end of 1882-83, was finished

in time to begin storage during the year. None of the new projects provided for in the Budget Estimate having satisfied financial requirements, work could not be sanctioned on them and a part of the total grant was surrendered.

2. The gross assessed earnings, the working charges, and net revenue are shown to be as given below, comparing them with the figures under the same heads for the preceding year.

|                                                           | 1883-84.  | 1882-83.  | More. | Less. |
|-----------------------------------------------------------|-----------|-----------|-------|-------|
|                                                           | ₹         | ₹         | ₹     | ₹     |
| Gross assessed earnings . . . . .                         | 95,181    | 1,03,374  | ...   | 8,193 |
| Working charges . . . . .                                 | 44,574    | 48,779    | ...   | 4,205 |
| Net revenue realizable . . . . .                          | 50,607    | 54,595    | ...   | 3,988 |
| Capital outlay . . . . .                                  | 15,42,700 | 15,38,211 | 4,489 | ...   |
| Percentage of net revenue on the capital outlay . . . . . | 3·28      | 3·55      | ...   | ...   |

The gross earnings shown above include a fixed credit of ₹25,929 taken annually in the revenue accounts of the old tanks, on account of enhanced land revenue under the settlement which expires with the year under review.

Exclusive of this sum of ₹25,929, the assessed tanks revenue compares as

|                                                        | NEW LARGE TANKS. |                       | OLD TANKS GROUP. |                       | TOTAL.     |                       |
|--------------------------------------------------------|------------------|-----------------------|------------------|-----------------------|------------|-----------------------|
|                                                        | ₹                | Per cent. on Capital. | ₹                | Per cent. on Capital. | ₹          | Per cent. on Capital. |
| 1882-83 . . . . .                                      | 9,883            | 1·2                   | 67,562           | 9·6                   | 77,445     | ·5                    |
| 1883-84 . . . . .                                      | 6,299            | 0·75                  | 62,953           | 8·9                   | 69,252     | 4·5                   |
| Decrease . . . . .                                     | 3,584            | 0·45                  | 4,609            | 0·7                   | 8,193      | 0·5                   |
| Incidence of decrease on figures for 1882-83 . . . . . | 35·8 P. C.       | ...                   | 7·8 P. C.        | ...                   | 10·6 P. C. | ...                   |

shown in the margin with that for the year 1882-83, which yielded the maximum sum ever attained and furnishes a standard for comparing succeeding results. The assessment on account of the new large tanks decreased by about 36 per cent., that on the old tanks group by about 8 per cent. and the total by 10·6 per cent.

Considered in connection with the capital outlay, the total gross earnings are only about half a per cent. less than those of the best year, 1882-83, the respective percentages being 4·45 and 5.

3. The working charges exhibit a further improvement, the average for the 8 years ending with 1881-82 being ₹61,343, those for 1882-83, ₹48,779, as contrasted with the charges, ₹44,574, for the year 1883-84, the incidence on the total gross earnings (₹95,181) being only about 47 per cent. This would probably compare favorably with the average rate for the whole of India for the year under review. Such a comparison, however, does not appear to be of any practical advantage, because, even the systems of irrigation works which figure under the same purely financial class "works not classed as productive," differ widely from each other in points largely affecting revenue as well as working charges; and no sound parallel can therefore be instituted without entering into a full description of the peculiarities of each with a view to these details being at the same time taken into consideration.

4. The total net revenue from assessments of the year amounts to 3·28 per cent. on the total capital outlay, ₹15,42,700, as contrasted with 3·5 per cent. secured for the year preceding, viz., 1882-83. Taking the old tanks and the new minor works added to them as a separate group, the net revenue derived on the capital outlay amounts to 6·97 per cent. as compared with 6·09 per cent. for the year 1882-83. Similarly the new large tanks, the outlay on which is equal to about 54 per cent. of the total capital expended, returned a net percentage of 0·13 only as contrasted with 0·62 for the year preceding, viz., 1882-83.

5. The actual collections of the year amounted to R1,10,523. This is more by R5,342 than the year's assessment, R95,181. It having already been explained in submitting tables showing the year's financial results for the irrigation works under notice, that a year's realizations do not in the case of the old tanks relate to the entire assessment of the same year, and that the actual collections do not, therefore, always fairly represent the irrigation value of the year from the revenue point of view, the results from collections need no further comment.

6. The crop area actually watered was 22,560 acres, Kharif being 12,482, and Rabi 10,078 acres. These areas compare as shown in the margin with those for the best previous year, 1882-83. Kharif crop on an area of 2,068 acres, and Rabi on an area of 3,910 acres, was

|              | CROP AREA ACTUALLY WATERED. |        |        |
|--------------|-----------------------------|--------|--------|
|              | Kharif.                     | Rabi.  | TOTAL. |
| 1882-83      | 9,796                       | 17,665 | 27,462 |
| 1883-84      | 12,482                      | 10,078 | 22,560 |
| Less or more | +2,686                      | -7,588 | -4,902 |

brought to maturity without direct irrigation; the former area being irrigable from the tanks which command it, and the latter forming a portion of the bed area of the tanks concerned paid for protection. Thus the total area cropped in rear and front of tanks and assessed for either irrigation or protection, or for both where the area was double-cropped, was 28,538 acres as contrasted with 32,507 for the preceding year.

7. The area due to the old tanks and new minor works grouped therewith was 26,793 acres which having been assessed at R62,953, as shown in paragraph 2 of this memorandum, gives a rate of R2.35 per acre as compared with 2.24 for the year preceding, 1882-83, the area and assessment for that year having been as shown in the margin.

The assessment for the more important of the old tanks being variable within a maximum and a minimum rate laid down at the settlement corresponding with fluctuations in the area cropped, a decreased area leads to a higher rate per acre as was the case during the year under review.

The area cropped under the new large tanks was 1,745 or 595 acres less than that for the year 1882-83, the assessment average rates per acre for the two years being respectively R3.61 and 4.22. In the case of these tanks a deficiency in the supply stored reduced the area assessable with higher rates than that for the Kharif crop and hence the average rate was lowered.

8. The new large tanks held above sluice level a total supply of about 274 million cubic feet only, of which barely half was the yield of the year's rainfall. The total capacity being about 840 million cubic feet, the deficiency exceeded two-thirds of the total supply. This fact is sufficient to show strikingly the character of the crisis through which that part of the district where the new large tanks are situated passed during the year under review. The country south of Beawar fared better, the rainfall having been more plentiful.

Notwithstanding the deficient rainfall, however, and the consequent unfavorable character of the season, the revenue and irrigation results now reviewed closely approached those of the most favorable previous year, 1882-83. From this fact it appears probable that as in the case of the new large tanks so also in the case of the old tanks, the surplus from the previous two years of copious rainfall helped to secure the favorable results to a considerable extent. If so, this illustrates the prudence of reserving the surplus whenever available.

On the whole, the results of the year under review appear to be satisfactory and creditable to the management adopted.

By order,  
W. G. CUMMING, Major, R.E.,  
Officiating Secretary to the Chief  
Commissioner, Ajmere and Merwara.

N.B.—As regards the figures in column "Total Receipts from 1st April 1885 to date," audited figures have been availed of as far as possible.  
(a) Including Rewari-Ferozepore State Railway.  
(b) Return not received.

(c) Total receipts from 1st April to 6th June 1885.  
(d) Total receipts from 2nd April to 14th June 1884.  
(e) Total receipts from 1st April to 7th June 1884.

SIMLA,  
The 4th July 1885.

FRED. FIREBRACE, Major, R.E.,  
Under-Secretary.

GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

## REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 8th JULY 1885.

GENERAL REMARKS.—More or less rain is reported from all parts in the Madras Presidency, and prospects continue fair in all districts except Bellary and Anantapur, where more rain is needed. In Mysore rain has been general, but in Tumkur and Kolur more rain is wanted. Except in these two districts, standing crops are in fair condition. Good rain continues to fall in Coorg, and prospects are good.

Throughout the Bombay Presidency the rainfall during the week was scanty, and sowings and rice transplantation are being retarded nearly everywhere. In Surat, Ahmednagar, and in parts of Bijapur and Belgaum the crops already sown are withering for want of rain. Fodder is scarce in two or three districts. Some rain fell in the Berars, but more is wanted for *kharif* sowings at Akola. No rain is reported from the Nizam's Territories, where however there is only one reporting station. Slight rain was general throughout the Rajputana States, and prospects are generally favourable. Rain fell at some places in the Central India States, but was heavy only at Sehore and Bhopawar. Prospects continue good.

In the North-Western Provinces and Oudh good rain fell in most districts. *Kharif* sowings are going on and prospects are favourable. Moderate rain fell in most districts of the Punjab, where *kharif* sowings are in general progress. In the Central Provinces a break in the rains has been very beneficial for sowings. In Nimar, however, more rain is much wanted.

Seasonable rain has fallen throughout the Lower Provinces, and agricultural prospects have improved generally, and especially in Behar. Standing crops promise well, and the cultivation of land for *aman* crops is in full progress in places. Transplanting of *aman* seedlings has begun in Cuttack and Pooree, where, however, considerable damage has been caused to crops on riparian lands by floods. In Assam rain was general, and prospects continue fairly good. Seasonable weather prevails in British Burma, where ploughing is in general progress.

The public health is fair in most Provinces. Prices are still high in Bengal, and have risen slightly in the North-Western Provinces and Oudh. Elsewhere they are generally stationary.

| Presidency or Province and District. | Rainfall for week under report.                                         | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| <b>General Remarks.</b> —There has been seasonable rain throughout the province during the week; in Behar good general rain has now fallen and has improved the agricultural prospects all round. All autumn crops are reported on very favourably, and the cultivation of lands for <i>aman</i> crops is in full progress in some places; transplanting of <i>aman</i> seedlings has fairly begun in Cuttack and Pooree, where heavy floods occurred of late; considerable damage to the crops on the riparian lands has been done, but it is said that there is sufficient time yet for resowing. In Tipperah also the inundation has now subsided, and a large proportion of the submerged crops is stated to have been saved by the comparative cessation of rain during the past fortnight. Prices continue to rule high in all districts. General health is pretty fair, although cholera exists in some districts. |                                                                                    |                                                                                                                                                                                                                                                                               |

## GOVERNMENT OF INDIA.

## LEGISLATIVE DEPARTMENT.

## ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 &amp; 25 VIC., CAP. 67.

The Council met at the Viceregal Lodge, Simla, on Wednesday, the 8th July, 1885.

## PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.

His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.

The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

## BURMA MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to correct an error in the Burma Municipal Act, 1884. He said:—

"The Chief Commissioner has recently pointed out that the language of one of the rating clauses in the Burma Municipal Act is inconsistent with the proposals which he had previously submitted on the subject, and with some of the other provisions of the Act, and is likely to cause practical difficulties, and he suggested that the language of the clause might possibly be due to a mistake. On looking through the papers connected with the measure I find that, through a mere oversight, the word 'occupation' was substituted for the word 'possession'. It is quite clear from the papers that the substitution was accidental, and not intentional, and that it may be fairly treated as a mere error. Under these circumstances, and as it is important that the error should be corrected as soon as possible, I have no hesitation in asking Your Excellency to suspend the Rules for the Conduct of Business, in order that the Bill may be passed without further delay."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT then introduced the Bill.

The Hon'ble MR. ILBERT having applied to His Excellency the President to suspend the Rules for the Conduct of Business,

**THE PRESIDENT declared the Rules suspended.**

The Hon'ble MR. ILBERT then moved that the Bill be taken into consideration and passed.

The Motion was put and agreed to.

## SEA PASSENGERS BILL, 1885.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to amend the law relating to the carriage of passengers by sea.

## TELEGRAPH BILL, 1885.

The Hon'ble MR. HOPE presented the Report of the Select Committee on the Bill to facilitate the construction of Telegraphs and to amend the Indian Telegraph Act, 1876.

## CRIMINAL PROCEDURE CODE, 1882, BOMBAY DISTRICT POLICE ACT, 1867, PENAL CODE AND PRISONERS' ACT, 1871, AMENDMENT BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the Code of Criminal Procedure, 1882, the Bombay District Police Act, 1867, the Indian Penal Code and the Prisoners' Act, 1871. He said:—

"The title of this Bill is a little formidable, but the truth is that it is what would be called in England an *omnibus* Bill. It is drawn on instructions from the Home Department, and it makes a number of amendments on very minor points, the necessity for which has been, from time to time, pointed out in sundry office-notes. There is not one of the amendments which touches any matter of serious importance, or which, so far as I can judge, is likely to give rise to any discussion. The reasons for each amendment are fully explained in the Statement of Objects and Reasons appended to the Bill; and under these circumstances I do not think I need trouble the Council by any further explanation of the proposals which the Bill embodies."

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 22nd July, 1885.

D. FITZPATRICK,

SIMLA;

The 10th July, 1885.

Secretary to the Government of India,

Legislative Department.

SUPPLEMENT TO  
**The Gazette of India.**

N<sup>o</sup> 29. }

EDUCATION OF THE MUHAMMADAN COMMUNITY IN BRITISH INDIA AND  
THEIR EMPLOYMENT IN THE PUBLIC SERVICE GENERALLY.

No. 215-25

Extract from the Proceedings of the Government of India in the Home Department (Education),  
—dated Simla, the 15th July 1885.

Read again the following papers on the subject of the encouragement of  
Muhammadan education in British India:—

Education Proceedings, 19th August 1871, Nos. 2 to 8.

Ditto ditto, 27th January 1872, No. 13.

Ditto ditto, June 1873, Nos. 74 to 111.

Ditto ditto, July 1873, No. 59.

Ditto ditto, September 1873, Nos. 2 and 3.

Ditto ditto, January 1874, No. 4.

Read also—

A letter from the Government of Bengal, No. 104, dated the 17th February 1882, forwarding a memorial from the National Muhammadan Association, dated the 6th February 1882, on the position and claims of the Muhammadan community in British India.

Home Department Circular letter Nos. 4—181-190, dated the 8th March 1882, to Local Governments and Administrations, calling for a full and careful report on the allegations and prayers contained in the memorial.

Read replies to the above circular letter—

From Government of Madras, No. 574, dated the 28th June 1882.

From Government of Bombay, No. 1758, dated the 6th October 1882.

From Government of Bengal, No. 481T.G., dated the 14th October 1882.

From Government of the North-Western Provinces and Oudh, No. 1401, dated the 16th April 1883.

From Government of the Punjab, No. 916, dated the 19th April 1883.

From Chief Commissioner of the Central Provinces, No. 3438—186, dated the 4th September 1882.

From Chief Commissioner of British Burma, No. 531—144N., dated the 16th May 1882.

From Chief Commissioner of Assam, No. 5401, dated the 21st October 1882.

From Chief Commissioner of Coorg, No. 332—19, dated 28th May 1882.

From the Resident at Hyderabad, No. 427, dated the 14th November 1882.

Read also the following correspondence on the subject of raising the Calcutta  
Madrissa to the status of a second grade college:—

Education Proceedings, September 1883, Nos. 12 to 20.

Ditto ditto, December 1883, Nos. 25 to 27.

Paragraphs 555 to 581 of the Report of the Education Commission on the education of Muhammadans viewed as one of the "classes requiring special treatment," and the remarks of Local Governments and Administrations on that portion of the Commission's report.

RESOLUTION.

In February 1882 a memorial was addressed to His Excellency the late Viceroy by the National Muhammadan Association calling attention to the present decayed position of Muhammadans in India, to the causes which had, in the opinion of the memorialists, led to this decadence, and to the circumstances which, in their belief, tend to perpetuate that condition. The memorial was fully reported upon by the Local Governments and was also discussed.

by the Education Commission. His Excellency the late Viceroy was unable to deal with the question before his departure from India, but left on record an expression of his hope that it would receive full consideration at the hands of his successor. The present Viceroy feels a special interest in the well-being and advancement of the Muhammadan subjects of the Crown in India; and after his landing at Bombay took an early opportunity of assuring the leading members of the Muhammadan community of Western India that he would not fail to enquire into the representations submitted by them with reference to the position and prospects of their co-religionists. His Excellency in Council has now carefully considered the memorial above referred to, together with the correspondence and reports quoted in the preamble, and numerous pamphlets and papers of various descriptions kindly furnished by persons interested in the subject of Muhammadan education.

2. From the statements of the memorialists and the whole course of previous discussions, it is clear that the chief drawback in the way of the advancement of the Muhammadan community in times past has been their inability or unwillingness to take full advantage of the State system of education. From the time of Warren Hastings to the present, this has been a matter of regret to the Government. The failure of the Muhammadans in certain provinces to compete on equal terms with Hindus for State employment has frequently been noticed; and repeated efforts have been made to investigate the causes of this failure and to remove these, so far as the action of Government could deal with them at all. To go no further back than 1871, on the 7th August of that year, the Government of India issued a Resolution upon the condition of the Muhammadan population in the matter of education, in which, after regretting that so large and important a class should anywhere stand aloof from active co-operation with the educational system, and lose the advantages, both material and social, which the other subjects of the Empire enjoy, His Excellency the Earl of Mayo in Council directed that further and more systematic encouragement and recognition should be given to the classical and vernacular languages of the Muhammadans in all Government schools and colleges; that in avowedly English schools established in Muhammadan districts, the appointment of qualified Muhammadan English teachers should be encouraged; that assistance should be given to Muhammadans by grants-in-aid to enable them to open schools of their own; and that greater encouragement should be given to the creation of a vernacular literature for the Muhammadans. The Resolution concluded:—

His Excellency in Council desires to call the attention of Local Governments and Administrations to this subject, and directs that this Resolution be communicated to them and to the three Universities in India, with a view of eliciting their opinions whether, without infringing the fundamental principles of our educational system, some general measures in regard to Muhammadan education might not be adopted, and whether more encouragement might not be given in the University course to Arabic and Persian literature.

3. This Resolution was duly communicated to the Secretary of State, who concurred generally in the policy therein indicated, on the understanding, however, that as regards the encouragement of the languages of Muhammadans in the schools of the country, the Government of India did not contemplate any change in the subjects taught, but only in the mode of instruction.

4. The reports received from the Local Governments and Administrations in reply to this Resolution were reviewed by the Government of India in a Resolution dated 13th June 1873. From these reports His Excellency the Earl of Northbrook in Council inferred that generally wherever the ordinary vernacular of the country was read and written in the Hindustani or Urdu character, there the Muhammadans occupied their proper position in the primary and secondary schools founded or aided by the State. In all provinces where this was the case, the indigenous Muhammadan schools were numerous, and up to a certain point in a thriving condition. They were encouraged and assisted by the Government officers; the grants-in-aid were offered on conditions on the whole fairly suitable for Muhammadan requirements; and the course of primary education was so shaped as to favour the Muhammadan at least equally with the Hindu. On the other hand, in provinces where the Muhammadans were scattered and not numerous, where they mostly spoke

a different language from that of the majority of the population, or where their teaching was in a different tongue and according to entirely separate traditions, there the special arrangements requisite to meet these circumstances had not always been organised, and the claims of the Mussalman community had been often almost inevitably disregarded. Where the Muhammadan used a form of the country dialect, he attended with others the primary Government schools for the rudiments of education; but where his mother-tongue was different in speech and in written character, he was naturally precluded from availing himself of this teaching. The peculiar obstacles which kept him apart from the ordinary school system naturally grew stronger as he emerged beyond those elements which are common to all teaching. The difficulties which had arisen from these causes had nowhere been satisfactorily surmounted. The Government expenditure on education being necessarily limited, and insufficient for the support of two separate classes of schools, the money available was naturally bestowed too exclusively upon those classes that not only formed the more numerous section of the people, but were both homogeneous for educational purposes and more eager to make use of the grant. It was however in the colleges, higher schools, and universities that the absence or backwardness of Muhammadans was most conspicuous. The reports all agreed that the existing system had not attracted them to the higher ranges of the educational course, or induced them to persevere up to the point at which studies impress real culture and fit young men for success in the services and open professions. The Resolution went on to observe:—

How far this state of things can be attributed to the want of a connected scheme of courses of instruction suitable for Muhammadans, leading up through the lower to the higher standards, and how far to the general disinclination of Muhammadans to exchange their earlier modes of study for others more consonant with modern habits of thought, is a question which need not here be closely examined. It may be conjectured that, at the present epoch, Muhammadans are discovering that the ancient paths are unprofitable to stand upon, while their traditions and natural predilections still hold them back from setting out energetically upon newly opened roads. For while it is confessed that Muhammadans nowhere appear in satisfactory strength upon the lists of our higher schools, colleges, or universities, on the other hand those institutions which have purposely preserved the ancient exclusively Muhammadan type, and which have been restricted to instruction in the languages and sciences which belong peculiarly to Muhammadanism, have also been found to be falling gradually but steadily, into neglect. We may perhaps assume, therefore, that the Muhammadans are not so much averse to the subjects which the English Government has decided to teach, as to the modes or machinery through which teaching is offered. And if it thus appear that to the traditions and reasonable hesitation which keep aloof our Muhammadan fellow-subjects are added certain obstacles which our system itself interposes—either by using a language that is unfamiliar or machinery that is uncongenial—it is plain that many of the drawbacks to the universality of our educational system are susceptible of removal.

His Excellency in Council, therefore, perceives with gratification from the reports now before him that judicious endeavours are being made to diminish, so far as they can be remedied, these inequalities in the distribution of State aid, and to place the Muhammadans, wherever this may be possible, upon a more even footing with the general community throughout the whole course of our public instruction.

5. The Resolution then proceeded to notice in general terms the measures adopted in the several provinces to give effect to the views of the Supreme Government. Particulars of these will be given below when reviewing their effects and results in each province up to date.

The Governor General in Council assumed that in all provinces where Muhammadans were few, and often exposed to all the disadvantages which affect a religious minority without wealth or superior influence, it would be the special care of Government to satisfy themselves that these endeavours to encourage the education of Muhammadans would be persistently maintained. It was recognised as the paramount duty of an Imperial department thus to fill up the gaps in the ranks of elementary education, and to range the various divisions of the vast population in one advancing line of even progress.

6. The Resolution thus described the principles upon which the education of Muhammadans should be encouraged by the State:—

As to the principles upon which the education of Muhammadans should be encouraged by the State, His Excellency in Council need say little here, for they appear to be understood

by all Administrations, and with general consent accepted by the people,—by none more openly than by the leading Muhammadans of India. The State has only to apply its educational apparatus and aid, so as they may best adjust themselves to existing languages and habits of thought among all classes of the people, without diverging from its set mark and final purpose—the better diffusion and advancement of real knowledge in India. His Excellency in Council is anxious that the attainment of this object shall in no class of the population be hindered by differences of language or of custom; and with this view the Government of India is very willing that the entire body of Muhammadan (as of Hindu) classic literature shall be admitted and take rank among the higher subjects of secular study; and that the languages shall form an important part of the examinations for University degrees. In short, His Excellency in Council is prepared to listen favourably to any well-considered proposal for modifying or extending in these directions the existing educational system. One measure to which the Resolution of 1871 particularly adverted was the development of a vernacular literature for Muhammadans. His Excellency in Council would be slow to believe that such a literature still needed creation. To this suggestion Local Governments attach differing degrees of importance or practicability; and, on the whole, His Excellency in Council sees reason to believe that we must be cautious in attempting to proceed in this direction much beyond the point we have reached already. It is most desirable to frame a series of high class text-books, to encourage the printing and publication of valuable Muhammadan works, and to offer prizes either for good translations of foreign works or for original studies. But in regard to the patronage of what may be properly called literature, the exercise of it must necessarily be restricted by the pressing demands of general education upon our finance, and by the difficulty of making a fair selection, or of distributing any money available with due discrimination and indubitable advantage.

#### The Resolution concluded as follows:—

His Excellency in Council has now reviewed rapidly the general measures which have been taken, or are being taken, for the encouragement of education among Muhammadans. The papers before him, received from all parts of British India, show that the Earl of Mayo's Resolution has succeeded in its main purpose of drawing the attention of all Administrations to needs and obligations which before had perhaps not everywhere been adequately realised. These needs and obligations may now be intrusted with confidence to the care of Local Governments. The Supreme Government has satisfied itself that the principles upon which Muhammadan education should be supported or subsidised are clearly understood; while the conditions and rate of progress in this as in all branches of public instruction, the range of its operations, and all other practical details, depend chiefly in each province upon local circumstances, administrative skill, and financial resources.

7. About this time a separate correspondence was being carried on with the Government of Bengal on the subject of the management of the Calcutta Madrissa, established by Warren Hastings in 1780, and with reference to the status and condition of the Madrissa and College at Hooghly supported out of an endowment bequeathed in 1806 by Mahommed Mohsin in trust for "pious uses." In connection with these Mohsin funds, not only had large accumulations to the credit of the trust been permitted to accrue, but the funds had been in part appropriated to the benefit of a wholly different class from that for which the endowment was destined. The Government of India accordingly desired that the whole subject of the application of the funds in promotion of Muhammadan education should be fully reconsidered and plans matured for their disbursement more in consonance with the intentions of Mahommed Mohsin. The Government of Bengal, in its letter dated the 17th August 1872, in submitting to the Government of India the views of the Lieutenant-Governor in regard to the general measures to be taken for the promotion of Muhammadan education in Bengal, put forward certain suggestions as to the utilisation of these funds. It proposed to reform the Calcutta and the Hooghly Madrissas, and to take upon itself the cost of the non-Mussalman side of the Hooghly College, hitherto entirely supported from the Mohsin funds, but at the same time to accept from the funds a fair contribution for the Madrissa attached to the College and for special benefits to Muhammadan students studying in the College. As, in the opinion of the Lieutenant-Governor (Sir George Campbell), it would be difficult to justify the devotion of provincial funds to special Muhammadan education in the province generally, while the Mohsin endowment supplied a legitimate means of effecting the purpose in view, the Government of Bengal further expressed its intention to devote the money thus saved from the Hooghly College to aid and extend Muhammadan education elsewhere. Proposals for the establishment of new madrissas at Dacca and other local centres in Eastern and Northern Bengal were then explained in detail; but as the Mohsin funds would not be adequate to enable the Government to equip efficiently these new madrissas, the Lieutenant-Governor trusted

that the Government of India would contribute to make up the difference. The main questions left for the decision of the Government of India were (1) whether the Government of India approved of the proposed distribution of the Mohsin Funds and of the establishment of madrissas; and (2) whether the Government of India would give some special aid towards the establishment of madrissas in Eastern and Northern Bengal.

8. In reply the Government of India, on 13th June 1873, wrote to the Government of Bengal as follows:—

The general principles upon which the Lieutenant-Governor desires to see these\* institutions administered and directed for the better promotion of high Muhammadan education

\* Calcutta and Hooghly Madrissas. appear to the Government of India to be sound, and the obstacles to working upon them are not practically insurmountable. \* \* \* It is agreed, by common consent, that the intention of the British Government in supporting these institutions is to give to Muhammadans their full share of high-class intellectual training and of sound knowledge useful to them in life, combined but not clashing with that Oriental erudition which belongs to their race and country. And it is also agreed that, in shaping our methods towards these ends, we are bound to avoid, so far as may be possible, any unwelcome abandonment of the old ways of Muhammadan study, or any slight upon the classic learning of Muhammadan Asia. On the contrary, the importance to Muhammadans of such studies is admitted, and their intrinsic value as instruments of literary training in this country is not under-rated.

But the point of difficulty is also recognised by all to whom the subject is familiar. It lies in the problem of framing for Muhammadans a course of secular education, which is the only kind that can be given in Government institutions, upon the study of a literature which on so many sides of it is intimately connected with their religion and doctrinal tenets.

His Excellency in Council, nevertheless, believes that the problem thus presented is capable of solution; that a course of study can be laid down which shall maintain and encourage the cultivation of Arabic and Persian, of the history, literature, and philosophy which those languages convey, of their logical system, and of such parts of Muhammadan law as deal with purely temporal interests, without compromising the Government to the support of any peculiar school of religious teaching.

His Excellency in Council is willing to sanction the preliminaries of any plan for reconstituting the two madrissas, which may fall within the limits of these principles.

After referring with approval to the details of the proposals regarding the reorganisation of the madrissas, the Government of India continued with reference to the Hooghly Institution:—

The Lieutenant-Governor's proposition is to withdraw the greater part of the Mohsin Funds from the Hooghly College, which has no particular local claim, and to use the money for encouraging Muhammadan education elsewhere, apportioning it according to need. So much of the present cost of the Hooghly College as would be left unprovided for by this subtraction of the endowment funds might, His Honour suggests, be then defrayed by the State.

His Excellency in Council approves the outlines of this proposal, and considers that some such arrangement would be consistent with the purposes of the Mohsin Endowment, and generally advantageous to Muhammadan education. But, with regard to the employment of Mohsin Funds thus to be set free, His Excellency remarks that there are such valid objections to any separate system of denominational schools or colleges that the Government of India prefers not to move further in that direction, although there is no intention of disturbing what may already exist. His Excellency in Council thinks that the memorandum of Mr. Bernard, and the Lieutenant-Governor's observations upon it, suggest the alternative of strengthening certain selected Government institutions on their Muhammadan side, instead of setting up new ones. For instance, the high schools or colleges at Calcutta and Dacca, in the midst of a great Muhammadan population, might be thus reinforced both in the way of teaching Arabic and Persian more thoroughly, and of generally cheapening education to Muhammadans by scholarships and the like. Or a portion of the Mohsin Funds might go toward increasing the public grants-in-aid of Muhammadan schools and colleges.

The details of any scheme which might be worked out upon this design were left in the hands of the Bengal Government. As to the request for Imperial aid, the Government of India consented, chiefly in view of Sir George Campbell's scheme for encouraging Muhammadan education, to increase the regular provincial assignment by an annual additional grant of Rs. 50,000.

9. On the 29th July 1873 the Government of Bengal forwarded for the information of the Government of India a copy of a Resolution recorded by the Lieutenant-Governor explaining the measures which Sir George Campbell had adopted consequent on the instructions of the Government of India set forth

above and the additional assignment of Rs. 50,000. The measures proposed included a liberal scheme of scholarships for Muhammadan youths attending colleges and zillah schools, especially for those lads who should elect to pursue the ordinary English course of study and to read physical science.

Despatch from Home Department, No. 5, dated the 30th June 1873.

Despatch from Financial Department, No. 295, dated the 21st July 1873.

Despatch from Home Department, No. 6, dated the 1st September 1873.

10. These proceedings were reported to the Secretary of State in the despatches marginally noted, and His Lordship on 13th November 1873 replied as follows:—

I fully concur in the views stated in the elaborate Resolution recorded by Your Excellency in Council, under date of June the 30th, and observe with much gratification that throughout India efforts are being made with great judgment and earnestness to induce the Muhammadans to partake of the many benefits of our educational system.

I approve of the proceedings of Your Excellency in Council in relation to Muhammadan education in Bengal.

Your Lordship in Council is fully aware of the many and peculiar difficulties which surround the subject, and has issued some very judicious and discriminating instructions to the Government of Bengal. I approve of the additional assignment of Rs. 50,000 which you have granted to that Government.

With your despatch of the 1st of September you have transmitted to me a letter from the Lieutenant-Governor of Bengal explanatory of the measures which he has adopted consequent on your instructions and the additional assignment. The arrangements of the Lieutenant-Governor indicate a very careful disposition of the means placed at his disposal, and an intelligent appreciation of the great importance of the whole subject.

I cannot conclude without an expression of my cordial satisfaction with the careful and complete manner in which Your Excellency has dealt with a question, surrounded with so many difficulties, and so intimately connected with the best interests of a very large and influential portion of Her Majesty's subjects in India.

11. The effect of the measures adopted by the various Local Governments in consequence of the Resolution of Earl Mayo's Government in 1871 is very fully discussed in the Report of the Education Commission, with reference to the statistics of the year 1881-82. The facts for each of the principal provinces may be summarised as follows:—

(A) In *Madras*, on receipt of the Orders of the Government of India, the Local Government, notwithstanding a certain amount of opposition on the part of the Educational authorities, directed the establishment of elementary Muhammadan schools, and corresponding classes in other schools, at the principal centres of Muhammadan population. In these classes and schools instruction was to be given in Urdu. Arrangements were initiated for training Muhammadan teachers; and Persian was to be taught in any high school where there was a sufficient demand for this. By the University special recognition was accorded to Arabic and Persian. Of the result of these measures, the Commission observe:—

The special schools maintained by Government were 11 in number, 7 of them being Anglo-vernacular middle schools, and 4 Anglo-vernacular primary schools. Nine schools, Anglo-vernacular, or vernacular, were maintained by municipalities, and of aided schools with a special provision for Mussalman pupils there were 4 Anglo-vernacular and 210 vernacular. Other inducements had also been held out to Mussalman students. They were admitted in all schools upon payment of half the usual fees; seven scholarships were specially reserved for Mussalman candidates at the University examinations; a special Deputy Inspector of Mussalman schools had been appointed; an elementary normal school had been established at Madras; and the University of Madras still continued to allot to the Arabic and Persian languages at its examinations a maximum of marks considerably larger than that carried by vernacular languages. The combined results of these measures were eminently satisfactory. In place of the 5,581 Mussalmans at school in 1870-71, the returns for 1880-81 give 22,076, or 6·7 per cent. of the total number under instruction; while the percentage of Mussalmans to the total population of the Presidency is only 6 per cent. The proportion of boys at school to those of a school-going age is for Muhammadans 15·1, for Hindus 13·7. But it is not in numbers only that progress has been made. Taking the results of the middle school examinations, we find that the percentage of passed candidates to those examined was, for Brahmins 44, for Hindus not Brahmins 35, for Muhammadans 41. In the lower University examinations, taking only the percentage of successful candidates to those examined, the results for 1880-81 are equally satisfactory. \* \* \* But of college education, beyond the first examination in Arts, Muhammadans, speaking generally, do not avail themselves at all, though there is no reason to suppose that the general system of education beyond that standard is not as well suited to the Muhammadans as that below it.

To the foregoing account it may be added that under orders issued in 1882 the Government of Madras, with the object of encouraging Muhammadans to enter the Medical Service, has reserved for that community a certain number of stipendiary appointments in the medical apprentice grade.

(B) In *Bombay*, excluding Sind, the percentage of Muhammadans to the total population was 7·1 in 1871, while 8·7 per cent. of the scholars in the Presidency were of that religion. Sind was no doubt in a very backward state, the feeling of the population there being strongly against the study of English. Out of a population of 1,354,781, only 10,115 were in schools known to the Department, and of that number only 31·8 per cent. were Mussalmans, though the proportion of Mussalmans to the rest of the population was as 4 to 1. Taking the Presidency as a whole, the indifference of the Muhammadans was not, however, so much to education generally as to education in the higher branches. They came freely to the lower schools, but failed to prosecute their studies to the higher standards. The Director (Mr. Peile), in considering the suggestions of the Government of India, pointed out that poverty alone would not account for this neglect of high education, for beggar Brahmins abounded in the high schools. He attributed it to poverty and depressed social status combined; but there was probably also in the course of study itself something discouraging to Muhammadan youths. The special measures adopted on Mr. Peile's suggestion were, therefore, designed to stimulate the progress both of higher and lower education. The University placed Persian on the list of languages that might be taken up for a degree, and a Professor of Arabic and Persian was appointed to the Elphinstone College. In the Vernacular Training College special provision was made for training Muhammadan teachers; and Persian instruction in all classes of schools received particular attention. Later on the number of special Mussalman schools was increased and Mussalman Deputy Inspectors appointed to inspect them. Of the effect of these steps, the Commission write:—

In 1871-72 the number of Mussalmans at school, according to Mr. Peile's estimate, was 15,577, or about 8·7 per cent. of the total number at school; in 1881-82 the number had risen to 41,548, or 11·7 per cent. of the total number at school. There were also in the latter year 22,284 Muhammadan children in indigenous schools, which would raise the percentage to 14·7.

The Bombay Provincial Report, drawn up for the Commission, gives an account of the good work which is now being done in this direction by the Anjuman-i-Islam, a private institution started by the Muhammadan community. It states:—

The most promising feature in connection with the progress of Mussalman education during the past decade (1871-1881) has been the formation and recognition of a society known as the Anjuman-i-Islam, which, it is hoped, will in time establish a network of secular schools in Bombay. This society is so important that it was felt advisable to make special rules for its assistance. At present it receives a fixed subsidy of Rs. 500 a month from Government. By the end of the year 1880-81 the society's first school was fairly started. Its Hindustani and Anglo-Hindustani Departments, together with a large class of children reading the Kuran, contained in all 102 pupils. Since then the operations of the society have been extended.

(C) In *Bengal* there can be little doubt that the condition of the Muhammadan population is more depressed than elsewhere; and it is on the state of things in that province that the memorial now before Government bases much of its statements. At the same time it must be admitted that there is perhaps less reason than elsewhere for making large separate provision for the Muhammadan element of the population, the vast majority of the Mussalmans being cultivators speaking the Bengali vernacular of their Hindu neighbours. On receipt however of the orders of the Government of India, the Local Government arranged for teaching Urdu and Arabic or Persian up to the Entrance standard in all zillah schools; and wherever there was a sufficient demand, a special class was formed to study Arabic and Persian after the Mussalman fashion. The Persian language was added by the University to the subjects for the F. A. and B. A. Examinations; and in the Grant-in-aid Code specially liberal terms were offered to schools managed by Muhammadans. The reforms introduced in the management of the Calcutta Madrassa and Mohsin Endowment

have been noticed above. New madrissas were opened at Dacca, Rajshahye and Chittagong, each under an Arabic scholar of repute assisted by competent moulvies. In each the full course of the Calcutta Madrissa was to be taught, and English was to be added if desired by the pupils. Scholarships for Muhammadans tenable in madrissas or in English colleges and schools were founded, and Rs. 18,000 were allotted to paying two-thirds of the fees of Muhammadan pupils in Government colleges and schools outside Calcutta, and to the payment of moulvies in those schools. The mukhtabs or mosque schools were soon after brought into relationship to the indigenous primary school system without interfering with their religious side. Many hundreds of mukhtabs are now aided in this way. These efforts have to some extent been successful, and the Mussalmans are not merely coming more freely to the vernacular schools, but taking a more prominent place in the returns of higher education. Muhammadans formed in 1871 about 32 per cent. of the population of the province. The proportion of Mussalman boys to the total school attendance, which in 1871-72 was only 14 per cent., had increased in 1880-81 to nearly 24 per cent. In primary vernacular boys' schools the proportion was in the latter year 24.6 per cent.; in middle schools, English and vernacular, over 13 per cent.; in high schools, under 9 per cent.; while in English colleges it was only 3.8 per cent. as against 4.04 per cent. in 1871. The rapid fall in the proportion of Mussalman students in schools of the higher classes, and the reduction in the proportion in colleges below the figure of 1871, is not satisfactory. The opinion of the Education Commission is however favourable to ultimate progress:—

Owing to the ready way in which Mussalmans have accepted the primary system of instruction, there is a very satisfactory increase in the total number of pupils of that race, which has risen from 28,148 in 1871 to 262,108 (including students in technical schools and colleges) in 1882; the proportion of Mussalmans being now 23.8 per cent. against 14.4 in 1871. In each of the Madrissas of Hooghly, Dacca, Rajshahye, and Chittagong the full Arabic course of the Calcutta Madrissa is taught, and in each also instruction in English is given to all pupils who wish it. In the Dacca Madrissa the course in English is carried up to the Entrance Standard. Of 1,989 pupils in the six madrissas, as many as 322 learn English. The privilege of reading at one-third of the ordinary fees has also, by recent orders of the Government of Bengal, been extended to Muhammadan students of any college in Calcutta, whether Government or other. In the case of non-Government colleges, aided and unaided, the amount of the remissions is paid from the Provincial Revenues.

Recently a still further concession to the demands of the Muhammadan community has been made; and in order to provide larger facilities of instruction in English, the Calcutta Madrissa has been raised to the position of a college. Notwithstanding this alteration in the status of the institution, the privilege has been continued, whereby Muhammadan students attending the college have two-thirds of their fees paid out of the Mohsin Endowment. On the other hand, the Rajshahye Madrissa, which was neither very successful nor much wanted, has, with the concurrence of the leading Muhammadans, been closed, the funds being diverted to the Calcutta institution.

The National Muhammadan Association is, as the Government of Bengal remarks, mistaken in supposing that the Mohsin Fund is now diverted to other than Muhammadan objects, or that its receipts are allowed to accumulate unutilised.

(D) *North-Western Provinces.*—Here the Muhammadans formed in 1871 about 13½ per cent. of the total population, while the total number in school was 17.8 of the scholars. The course of study was such as to afford every encouragement to Muhammadan pupils. In 1881 the percentage of Mussalmans to the total number of students under instruction was 14½ per cent. In English colleges they constituted a proportion of 13 per cent., and in English high and middle schools of 20 per cent. The figures therefore show a slight falling off, which it is hoped may soon be recovered. There is much at the present time which is encouraging in the state of feeling on this subject among the leading Muhammadan gentlemen of the province. They have under the enlightened guidance of Syud Ahmed, c.s.i., made great efforts to provide for their countrymen facilities for the prosecution of the higher education. These efforts have resulted in the founding of the Aligarh College. It was originally intended to confine this college to Mussalman youths alone, but it has since

been opened to Hindus. The Government of India entirely concurs with the Education Commission in the praise which they accord to this undertaking:—

The Aligarh Society has set an example which, if followed to any large extent, will solve the problem of national education; and it is difficult to speak in words of too high praise of those whose labours have been so strenuous, or to overrate the value of the ally which the State has gained in the cause of education and advancement.

(E) *Oudh.*—The population of Oudh contains 10 per cent. of Muhammadans. The proportion of Mussalmans to the total number attending Government and aided schools in 1871-72 was 24.8 per cent. In 1881-82 the proportion had fallen to short of 23 per cent. The falling off has unfortunately been in the higher grades of schools. But on the whole there is no reason to believe that Muhammadan education is neglected in Oudh, or that the Mussalman community there is indifferent to the advantages held out to its members. With the general revival of educational effort in the North-Western Provinces and Oudh which may be expected to follow on the report of the Education Commission, the position of this special class will also, it may be hoped, improve.

(F) *Punjab.*—Muhammadans form over 51 per cent. of the population of the Punjab. In 1871-72, 35 per cent. of the total number of pupils under instruction were Mussalmans. The Local Government saw no reason to adopt any special measures for the promotion of Muhammadan education in consequence of the Resolution of 1871. It is, therefore, satisfactory to find that in 1881 at the end of the decade the percentage of Mussalman pupils at school had risen to over 38 per cent., and that the increase had been in the higher rather than in the lower class of schools.

(G) *Central Provinces.*—The Muhammadans here form only 2.5 per cent. of the population, but are found to be fully alive to the importance of education, their attendance in the higher schools being especially good. Arabic and Persian classes are opened in all zillah schools, where the demand warrants this.

12. From the foregoing paragraphs it is evident that a considerable improvement has taken place within the past 10 or 15 years in the relations of the Muhammadan community to the educational system of the country, and that many of the drawbacks of which complaints might justly have been made in 1870 have now been removed. The Education Commission have however formulated specific proposals for the further encouragement of Muhammadan education. In proposing these, the Commission remark as follows on the general subject:—

Apart from the social and historical conditions of the Muhammadan community in India, there are causes of a strictly educational character which heavily weight it in the race of life. The teaching of the mosque must precede the lessons of the school. The one object of a young Hindu is to obtain an education which will fit him for an official or a professional career. But before the young Muhammadan is allowed to turn his thoughts to secular instruction, he must commonly pass some years in going through a course of sacred learning. The Muhammadan boy, therefore, enters school later than the Hindu. In the second place, he very often leaves school at an earlier age. The Muhammadan parent belonging to the better classes is usually poorer than the Hindu parent in a corresponding social position. He cannot afford to give his son so complete an education. In the third place, irrespectively of his worldly means, the Muhammadan parent often chooses for his son while at school an education which will secure for him an honoured place among the learned of his own community, rather than one which will command a success in the modern professions or in official life. The years which the young Hindu gives to English and Mathematics in a public school, the young Muhammadan devotes in a madrissa to Arabic and the law and theology of Islam. When such an education is completed, it is to the vocation of a man of learning, rather than to the more profitable professions, that the thoughts of a promising Muhammadan youth naturally turn. The above are the three principal causes of an educational character which retard the prosperity of the Mussalmans. It would be beyond the province of a strictly Educational Report to attempt generalisations based upon the social or historical conditions which affect the Muhammadan community in India.

The recommendations we proceed to make have been framed, we believe, not merely with a regard to justice, but with a leaning towards generosity. They are based not more upon the suggestions contained in the Provincial Reports than upon the evidence of witnesses and the representations of public bodies. They deal, we think, with every form of complaint that is grounded in fact, and they contemplate the various circumstances of various localities.

Few of them, indeed, are of general application; many of them, we trust, will before long be rendered obsolete. Special encouragement to any class is in itself an evil; and it will be a sore reproach to the Mussalmans if the pride they have shown in other matters does not stir them up to a course of honourable activity; to a determination that whatever their backwardness in the past, they will not suffer themselves to be outstripped in the future; to a conviction that self-help and self-sacrifice are at once nobler principles of conduct and surer paths to worldly success than sectarian reserve or the hope of exceptional indulgence.

It is only by frankly placing themselves in line with the Hindus, and taking full advantage of the Government system of high and especially of English education, that the Muhammadans can hope fairly to hold their own in respect of the better description of State appointments. This is clearly seen by the memorialists themselves, and the reports of Local Governments show that in most provinces a real advance has been made in this respect. The recommendations of the Commission are, as they themselves point out, not of universal application, and none of them need be taken to imply a leaning towards the maintenance of a distinctly Oriental training throughout the curriculum for Muhammadan pupils. The object of the Commission is to attract Muhammadan scholars by giving adequate prominence to those subjects to which their parents attach importance, and to hold out special inducements to a backward class; but in applying the recommendations, due regard is everywhere to be paid to local circumstances, and care must be taken to avoid unnecessary widening of the line between Muhammadan and other classes of the community.

The recommendations are as follow:—

- (1) that the special encouragement of Muhammadan education be regarded as a legitimate charge on Local, on Municipal, and on Provincial Funds;
- (2) that indigenous Muhammadan schools be liberally encouraged to add purely secular subjects to their course of instruction;
- (3) that special standards for Muhammadan primary schools be prescribed;
- (4) that Hindustani be the principal medium for imparting instruction to Muhammadans in primary and middle schools, except in localities where the Muhammadan community desire that some other language be adopted;
- (5) that the official vernacular, in places where it is not Hindustani, be added as a voluntary subject to the curriculum of primary and middle schools for Muhammadans maintained from public funds, and that arithmetic and accounts be taught through the medium of that vernacular;
- (6) that in localities where Muhammadans form a fair proportion of the population, provision be made in middle and high schools maintained from public funds for imparting instruction in the Hindustani and Persian languages;
- (7) that higher English education for Muhammadans, being the kind of education in which that community needs special help, be liberally encouraged;
- (8) that where necessary a graduated system of special scholarships for Muhammadans be established; to be awarded (a) in primary schools, and tenable in middle schools; (b) in middle schools, and tenable in high schools; (c) on the results of the Matriculation and First Arts Examinations, and tenable in colleges;
- (9) that in all classes of schools maintained from public funds a certain proportion of free studentships be expressly reserved for Muhammadan students;
- (10) that in places where educational endowments for the benefit of Muhammadans exist, and are under the management of Government, the funds arising from such endowments be devoted to the advancement of education among Muhammadans exclusively;

- (11) that where Muhammadan endowments exist, and are under the management of private individuals or bodies, inducements by liberal grants-in-aid be offered to them to establish English-teaching schools or colleges on the grant-in-aid system;
- (12) that, where necessary, normal schools or classes for the training of Muhammadan teachers be established;
- (13) that, wherever instruction is given in Muhammadan schools through the medium of Hindustani, endeavours be made to secure, as far as possible, Muhammadan teachers to give such instruction;
- (14) that Muhammadan inspecting officers be employed more largely than hitherto for the inspection of primary schools for Muhammadans;
- (15) that associations for the promotion of Muhammadan education be recognised and encouraged;
- (16) that in the annual reports on public instruction a special section be devoted to Muhammadan education;
- (17) that the attention of Local Governments be invited to the question of the proportion in which patronage is distributed among educated Muhammadans and others.

13. The Education Commission have dealt so completely with the whole question of Muhammadan education, that the appointment of a Special Commission to enquire into the subject, as suggested by the memorialists, is no longer necessary. The recommendations of the Commission have been considered by Local Governments, with the following results.

(A) *Madras*.—The Madras Government remarks:—

Special encouragement is already held out to Muhammadan education, and a further advance is contemplated in this direction, though not exactly on the lines suggested by the Commission. It is not thought desirable to dissociate this class so distinctly from the ordinary scheme of teaching, as, except in a few localities, Muhammadans avail themselves freely of the advantages of the existing system. Thus neither special schools nor special normal classes seem necessary, while the recommendations as to the Persian and Hindustani languages are hardly applicable to the peculiar linguistic conditions of the South, and ignore the extent to which the Muhammadans use its vernacular languages. At the same time the object of the recommendations meets with cordial approval.

It has been shown in paragraph 11 above that the condition of the Muhammadans in Southern India is, from an educational point of view, by no means unsatisfactory. All funds, provincial, local, and municipal, are bound by the Grant-in-aid Code to give special encouragement to Muhammadan education. The experiment of separate schools has not been successful, and is not, the Director of Public Instruction thinks, necessary, except to some extent in Madras and one or two large Muhammadan centres and for the Moplahs on the west coast. Some increase of the subordinate inspecting agency for Muhammadan schools is, however, admittedly desirable. While the broad results for the whole province leave perhaps little to desire, the Governor General in Council thinks it would be well were the officers of the Educational Department directed to examine more particularly, in communication with district officers and the leading members of the Muhammadan community, the educational provision for the members of that community in each district, with a view to seeing whether in special localities more effect should not be given to some of the recommendations of the Commission. The backward state of the Moplahs seems especially to call for attention. The Governor General in Council is disposed to agree with the Madras Government that it is undesirable to accentuate the difference between Muhammadans and Hindus by making Hindustani in lieu of the current vernacular the medium of instruction, where the Muhammadans show themselves ready to attend the ordinary schools of the country. Where this is the case, the local vernacular should be the ordinary medium, the special wants of Muhammadan youths being met by the formation of Hindustani classes and teaching them the Arabic character. There may however be tracts where Muhammadan feeling would prefer the establishment of special schools, and in such places

the recommendations of the Commission should receive attention. In secondary schools of all kinds facilities for the study of Arabic or Persian should be offered wherever there is a real demand for this.

(B) *Bombay*.—The Local Government merely remarks that “the special wants of Muhammadans have had attention”; refers to the monthly grant of Rs. 500 towards the Anjuman-i-Islam school; and adds that “the Governor in Council is prepared to aid further in the extension of Muhammadan education should opportunity offer.”

Although here, as in Madras, the educational conditions of the Muhammadan population taken as a whole is not altogether unsatisfactory, there can be no doubt that in certain localities, as in Sind, there is an urgent call for special measures; and the Governor General in Council would wish to see the same further examination of local wants initiated that has been suggested for Madras. Some steps should certainly be taken to encourage Muhammadans to read up to the higher standards. At present here, as in other provinces, they specially fail to pursue their studies beyond the lower stages.

(C) *Bengal*.—The Lieutenant-Governor remarks:—

The proposals for the support of special Muhammadan schools, and for the special encouragement of Muhammadan education in ordinary schools, are worthy of liberal consideration. Many of them are already in force in this province; the chief innovation being that for the creation of a special class of scholarships for Muhammadan students. To this, no doubt, objection may be raised, just as objection has been, not without force, raised to the principle of this special proposal in Mr. Barbour's dissent. The Lieutenant-Governor, however, thinks that if it can be shown that in any locality the number of Muhammadans who gain scholarships is not in due proportion to their numbers and position, a fair case will have been made out for exceptional, though he will also add temporary, treatment. The other recommendations under this head are conceived in a liberal spirit, and may be accepted, except in so far as they recognise the substitution of Hindustani for the Hindi vernacular. If by Hindustani be meant that language which, written in the Hindi or Nagri character, is the common speech alike of Muhammadan and Hindu in Behar, the Lieutenant-Governor has no objection to offer. But if the recommendation mean that the policy which has prevailed for some years, of conveying primary instruction to Muhammadans in Behar through Hindustani expressed in the Hindi character, is to be reversed, then the Lieutenant-Governor must very strongly dissent from the recommendation as being opposed to the true interests of the Muhammadans of Behar. Finally, the Lieutenant-Governor is not disposed to support the establishment of normal schools or classes for Muhammadan teachers exclusively. Little is gained by such separatism.

The Governor General in Council trusts that the Bengal Government will give effect to its views. There is no intention to reverse the decision of the Local Government in the matter of adoption of Hindi as the Court language of Behar, and as the ordinary medium of instruction in the primary schools of that province. Where the Muhammadan population is strong and likely to attach special importance to Oriental teaching of a Muhammadan type, care should be taken to meet this want, with a view to making the schools popular and inducing the better classes to allow their children to push their studies eventually to a higher standard, especially in English. But equal care is necessary to prevent the absolute separation of the Muhammadan community from the rest of the population. It must also be borne in mind that it is only by an acquaintance with the current vernacular that Muhammadans can hope to secure employment. It has already been shown in this Resolution that very much has been done by the Local Government to meet the requirements of the Muhammadans in Bengal, and it may fairly be said that they have now every opportunity offered them of securing a good education. If it is found that anything further is required in any part of the province, or at any particular stage of the educational course, to advance the progress of the Muhammadan community, the Governor General in Council feels sure that His Honour the Lieutenant-Governor will not stint the necessary outlay.

(D) *The North-Western Provinces and Oudh*.—The Lieutenant-Governor considers that no special measures on behalf of Muhammadans are required, as Mussalman education in these provinces is by no means in a backward state. The interests of the class will, it is said, be duly attended to, and aid and encouragement on the part of the State will not be wanting.

Here it would seem to be sufficient if enquiry is made as to the necessity of special measures in any locality where the number of Muhammadans is unduly low in any grade of the educational course.

(E) *The Punjab*.—Here also no special measures are thought to be called for. The Muhammadans are not backward in taking advantage of the existing educational facilities.

(F) *The Central Provinces*.—The Chief Commissioner is opposed to the adoption of special measures in aid of the Muhammadans, but it has been seen above that nothing is really required in these provinces. The Educational authorities may be directed to keep a watchful eye on any localities where the Muhammadan population is large and backward.

(G) *Assam*.—The Muhammadans here are chiefly the agriculturists of Sylhet, who are not an impoverished class and whose vernacular is Bengali. Sufficient provision is already made for Persian instruction in secondary schools where there is a demand for this. All scholars unable to pay fees are admitted free to schools in Assam.

(H) *Coorg*.—Sufficient provision is already made for the few Muhammadans there are in Coorg.

(I) *Berar*.—Special provision has already been made for Muhammadans in the Assigned Districts, and the percentage of Mussalmans in the schools is larger in proportion than that of the Hindus.

(J) *British Burma*.—The questions discussed in this Resolution have little or no application to British Burma, where there is hardly any indigenous Muhammadan population, where the resident Muhammadan population is but 4½ per cent. of the whole, and where the great bulk of the people are Buddhists. The Mussalmans in Burma are, the Chief Commissioner reports, on a fair equality with the other sections of the population.

14. On the whole, the Governor General in Council is satisfied that the attention which has once more been drawn to the subject of Muhammadan education will have the best results. His Excellency in Council attaches special importance to recommendation (16) of the Commission's Report, “that in the annual reports on public instruction a special section be devoted to Muhammadan education.” These reports should be precise and detailed, and discuss the position and advancement of the Muhammadan community, not merely as a whole, but with reference to local variations, in order that the Government of India may be kept fully informed as to the state and progress of this important section of the community. For the attraction of Muhammadans to higher education, a liberal provision of scholarships is essential, and their wants must not be overlooked in the framing of any general scheme of scholarships for any province, in pursuance of the orders of the Government of India on the Report of the Education Commission. Probably the appointment of special Muhammadan Inspecting Officers to inspect not merely primary Muhammadan schools, but to enquire into Muhammadan education generally, would have a good effect in Bengal and other places where the Muhammadans are very backward. Such officers would bring the peculiar wants of their co-religionists more thoroughly to notice than can perhaps be expected from subordinate officers of a different faith. The action taken in those and other directions should be fully explained in the annual reports.

15. Returning again to the memorial of the National Muhammadan Association, the Governor General in Council observes that, apart from the general educational drawbacks of which they complain, and to remedy which it has been shown that much has already been done, the memorialists attribute the present depressed condition of their co-religionists to the following specific causes:—

- (1) the abolition of Persian as the official language and the substitution of English or the vernacular, the effect of which has been that Hindus have generally supplanted the Muhammadans in the Government service;
- (2) the further orders of 1864, making a knowledge of English essential in the examinations leading to the Native Bar and judicial service, which again gave a special advantage to the Hindus;

- (3) the resumption proceedings of 1828—1846, which are said to have resulted in the confiscation of numerous rent-free grants devoted more or less to educational purposes, and also in the ruin of many ancient families.

16. The memorialists themselves are not desirous of seeing Persian revived as the official language. Nor do they propose to revert to vernacular examinations for pleaderships and munsifships. They recognise the fact that the Muhammadans, if they are to succeed at all, must rise to the educational level of the day, and their prayer, which is for assistance to enable them to rise, has been fully met in the foregoing paragraphs. But they find a special grievance in the existing regulations for pleadership examinations in Bengal, which are said to preclude all save graduates in law of the University from becoming pleaders and so eligible for the Subordinate Judicial Service. The memorialists desire that admission to this service should be by special competitive examination.

On this subject the Honourable Judges of the Calcutta High Court remark:—

The memorialists, in paragraph 22 of their memorial, ascribe the numerical inferiority of Muhammadans in the Subordinate Judicial Service to the conditions laid down in the year 1865 or 1866, which have become still more stringent as regards the raising of the standard of qualification for a higher grade pleader and for a munsif. The conditions laid down in 1865 or 1866 are presumably those contained in rule 5 of the rules of the Government of Bengal made in 1866 under section 6 of Act XX of 1845. Their increased stringency, as regards munsifs, was, it is presumed, the qualification mentioned in the High Court's notification No. 3344 of the 16th December 1868, by which the Court, after consulting the Government of Bengal, declared that it would nominate to the office of Munsif "none but those who have obtained the degree of B. L., or who have passed the senior grade pleadership examination or some other examination equivalent thereto"; and as regards pleaders, the qualifications declared necessary in the rules of the 2nd May 1866, made by the High Court under section 4 of Act XX of 1845. With the question of English as the language for the high grade pleadership examination, this letter has already dealt. As to the second question, I am to point out that there exists, notwithstanding this notification and these rules, no "hard-and-fast rule" regarding the qualifications necessary for entering the Judicial Service, except that the candidate must be a member of a recognised legal profession. It is true that, before nominating any one for the post of munsif, the Court satisfies itself that the candidate is fitted for employment on the bench. He must have a certain knowledge of law, and he must also be a person of liberal education, and in the majority of instances a certain course of university education, and the acquirement of a degree in law, are taken as a guarantee of the candidate's fitness. But these qualifications are by no means indispensable, and instances have not so long ago occurred in which Muhammadan gentlemen, possessing neither of these qualifications have been nominated to the Government for employment as munsifs. That more of such nominations are not made is due, not to the existence of a hard-and-fast rule, but to the lamentable scarcity of Muhammadan gentleman of sufficient position and education to make them eligible for such appointments, even when a degree in law or a knowledge of English is not an indispensable portion of their requirements.

The Governor General in Council observes that under the High Court rules for the qualification, admission, and certificates, &c., of pleaders, it is not absolutely necessary that a candidate should have graduated at a university or indeed have passed any university examination whatever. Provided the candidate has passed some public examination accepted by the Court as equivalent to the standard of the University First Arts Examination and has attended suitable law lectures, he is eligible to present himself for the pleadership examination. It is possible, however, that in practice the university qualification is ordinarily insisted upon, and it would perhaps be well if the Local Government established some public examination which the Court would accept as equivalent to the preliminary university test. In other Provinces no artificial obstacles appear to lie in the way of Muhammadans desirous of qualifying as pleaders. As regards the admission of duly qualified Muhammadans to the Judicial Service, the Governor General in Council trusts that in provinces like Bengal and Bombay, where there is at present a deficiency in this respect, the High Courts will endeavour to secure a certain proportion of officers of that class.

17. With reference to the statements respecting the resumption proceedings in Bengal, and their disastrous effect upon the welfare of the Muhammadan community generally, and upon their educational system, the Government of that province, in reporting upon the memorial, records the following observations:—

The memorial refers to the resumption laws as among the chief causes of Muhammadan decadence. It seems to the Lieutenant-Governor that there has been a great deal of very

ill-informed declamation on the subject of the resumption laws. Vague statements regarding their disastrous effects are met by statements equally vague regarding their necessity and the general fairness with which they were conducted. Mr. Rivers Thompson is not concerned to deny that possibly in many cases (and obviously the action of Government would most seriously affect Muhammadan holders of land) the assessment of revenue on land previously held rent-free may have entailed losses both in position and wealth; but the statements of writers who maintain that these proceedings entailed wholesale ruin on the Muhammadan community in general, and the scholastic classes in particular, cannot be suffered to pass without remark. Such statements admit of no proof. They are unsupported by the history either of the origin or of the progress of the resumption proceedings themselves. These proceedings originated chiefly in the misconduct of the Native official classes in the early days of British rule. Before the transfer of the sovereignty of Bengal and Behar to the East India Company in 1765, the revenue collectors under the Moghul sovereigns used occasionally to alienate lands in the shape of endowments and rent-free grants. They had of course no authority to do this, the ruling power alone being competent to grant away its share in the produce of the land; but it is on good authority believed that these illegal alienations were few in number and limited in extent before the accession to sovereignty of the East India Company. During the first few years of the Company's administration, however, such invalid grants increased enormously. Mr. James Grant in his Analysis of the Finances of Bengal (1786) declares that they extended to one-fourth of the entire rental of Presidency, or nearly one million sterling per annum; and though Sir John Shore afterwards questioned the correctness of Mr. Grant's calculations, there is no doubt that these fraudulent alienations were very extensive. There can be as little doubt under the circumstances of the case that they were due, not to any praiseworthy intention of supporting religion or promoting learning, but to purely selfish motives of personal gain. It is unnecessary here to enumerate the various occasions from the time of Mr. Hastings to that of Lord William Bentinck, on which Government asserted its right and declared its intention to assess revenue on these alienated lands. From time to time efforts were made to carry this intention into effect, by prescribing a system of registration, designed to protect rent-free holdings and to identify invalid grants. These measures, however, proved ineffectual, and it was not until the financial pressure caused by the Burmese War compelled recourse to taxation, as well as to retrenchment, that effective steps were taken to make good the Government claim. The choice before Lord William Bentinck's Government lay between the introduction of a general measure of taxation and the enforcement of the incontestable rights of Government to share in the produce of these invalid lakhiraj grants. Whatever may be said by writers to whose sympathies vicissitudes of families appeal more forcibly than the financial necessities or the just claims of an empire, the Lieutenant-Governor believes that no impartial man will deliberately maintain that the choice of the Government of the day was wrong.

It has been stated in a recent article published in the *Nineteenth Century* by the Hon'ble Amir Ali, the Secretary to the Association, that the harshness of the resumption proceedings has left behind a legacy of bitterness, has entailed widespread ruin on the Mussulman gentry, and has destroyed the Muhammadan educational system. No details in support of this statement were furnished at the time, and the author of the article in question has since confessed himself unable to supply the omission. Desirous of ascertaining whether official records lent colour to the writer's assertions, the Lieutenant-Governor consulted the Board of Revenue, who have reported that the assertions in question admit of no verification from the revenue records of Government. On this subject more than one writer has drawn on his imagination for his facts: fanciful references to decaying muniments and moth-eaten title-deeds, which have no existence in fact, take the place of substantial arguments; and the fact is always either forgotten or ignored that the result of even the harshest resumption case was not the dispossession of the holder, but the assessment of revenue on his holding, and even that, in no case, at more than half the prevailing rates. When the admitted leniency of the assessment of revenue rates in Bengal is remembered, and when it is understood that a resumption proceeding meant nothing worse than the imposition on lands previously rent-free of half those rates, the charges of harshness and ruin inflicted wholesale through the action of the resumption laws will be estimated at their true value. The resumption literature is uninteresting reading at the present day; but an examination of it will show to those who take the trouble to make a dry and laborious enquiry that these proceedings were conducted with as much moderation and regard for private interests as the nature of the case permitted. The holders of rent-free grants possessing titles from the former rules of the country were, of course, exempted from the operations of the law. As however the "ravages of white-ants" might possibly render it difficult for lakhirajdars of this description to prove their titles, the Government came to their aid, by decreeing that if only they could prove possession for twelve years before the transfer of the sovereignty of the country to the East India Company, their holdings should be exempted from assessment. The first effective resumption law having been passed in 1819, all that these "ancient families" were called upon to show was that the lands in question had been in their possession for little more than a single generation. For an "ancient family," rooted in the soil, this was no difficult or oppressive task.

If the provisions of the resumption laws were thus tempered in the case of the holders of large grants, the procedure was, so far as the Government was concerned, even more lenient in that of petty lakhirajdars. Parcels of land not over 50 bighas in extent were altogether exempted, and the Government of the day intimated its willingness to increase that limit should such a course seem desirable to the local officials. The character of these proceedings

can hardly be summed up more accurately than in the terms employed by the Court of Directors in the review of the results of the resumption proceedings, contained in their Despatch No. 2, dated February 1854:—

“The result is satisfactory, and the means employed have been in the majority of instances fair and equitable. In the progress of the resumption proceedings, we have had occasion to animadvert in some cases, as in that of Chittagong, on the sweeping measures of the resumption officers; but in the general conduct of the proceedings the principles of liberality and justice, which we advocated from the commencement, have been on the whole adhered to.

“Where ascertainable rights have been invaded, redress has been afforded; but it is only justice to those who contribute to the expenses of Government that immunities and privileges resting on no foundation of right should be gradually and considerably eradicated.”

Under any circumstances it may be noticed that the Muhammadans were not exceptionally treated in the working of the resumption laws; and if irretrievable injury was done to Muhammadan progress by their operation, the enquiry naturally suggests itself why Hindus, equally subjected to the same laws, have survived their evil effects.

So far as the Presidency of Madras is concerned, the allegations of the memorialists appear to be equally based upon misapprehension. Every endowment for charitable and pious uses was scrupulously investigated by the Inam Commission some 20 years ago, and wherever the validity of the grant was satisfactorily established, a title deed was conferred by Government in the name of the holders of the grant and their successors, ensuring its continuance to them and declaring it not to be subject to further interference so long as the institutions and services, the objects of the grant, were efficiently maintained and performed. Nor is there any evidence that such endowments as were then confirmed for educational purposes have been since wasted or abused. There were, it is reported, extremely few endowments of an educational kind.

The report from the North-Western Provinces and Oudh is of a similar character. The allegations regarding waste or confiscation of charitable endowments or scholastic foundations are stated not to accord with any specific facts known to the Government of those Provinces.

The Government of the Punjab writes as follows on this subject:—

Passing now to the fourth prayer of the memorialists, it is only necessary to observe that the number of Mussalman endowments in the Punjab is extremely small, and the only case of importance is that of the Itmad-ud-Doula Fund. So far as can be gathered from the documents which exist in regard to this fund, the trust was formed for the purpose of promoting education in the city of Delhi. The fund is devoted to the maintenance of an Anglo-Arabic school, attended by Muhammadans both of the Suni and Shia persuasion, but in which religious instruction has not hitherto been given. The fund is managed by a committee composed mainly of native gentlemen, presided over by the Commissioner of the Division. With this exception, the subject of Muhammadan endowment is one which calls for no action so far as this province is concerned.

In the other provinces this question of educational endowments appears to be one of no practical importance.

18. As regards Muhammadan endowments generally, these are almost invariably, it is believed, of a religious or *quasi*-religious character; and while it is impossible for Government to meddle with them, large powers of interference are conferred on those interested under the provisions of Act XX of 1863. What is chiefly required is, as the Lieutenant-Governor of Bengal points out, that the enlightened Members of the Muhammadan community should bring pressure to bear upon their less advanced co-religionists, in whose hands the funds of this description for the most part lie, to give a wise direction to their expenditure.

19. While it is clear, therefore, that undue importance has been attached by the memorialists to this matter, His Excellency the Governor General in Council is disposed to think that it would be satisfactory to the leaders of the Muhammadan community that the question of the management and appropriation of Muhammadan educational endowments should be more fully examined. It may be possible by some unobjectionable amendment of the law to secure more effectually than is the case at present the object which the memorialists have in view. His Excellency in Council would be glad therefore if the Local Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab were each to appoint a small committee to consider

and report upon this subject. Each committee might consist of an experienced Revenue Officer, one or two influential Muhammadan gentlemen, one at least being a learned Muhammadan lawyer, and one or more of the legal advisers of the Government. In the Presidency towns it would be very desirable that the Advocate General should be invited to serve upon the Committee. The different local committees might advantageously be placed in direct communication with one another, and their reports when ready should be submitted through the Local Government, with the opinion of that Government, for the consideration of the Government of India. It is believed that in temporarily-settled provinces full information is already on record as to the number, value, and present appropriation of most of these endowments. In such cases the Committees would probably only have to consider, on such information as may be readily available, whether there is any ground for believing that endowments intended for educational purposes are in fact now diverted to alien uses, and whether in that case any amendment of the law is possible which, without violating the principle that Government cannot connect itself with the management of religious endowments, might lead to the recovery of such funds. In Bengal and perhaps elsewhere the enquiry would probably have to take a wider range, and the Committees would require the assistance of Government and the district officers in the collection of information as to the present number and position of the local endowments. The Governor General in Council will however leave it to the Local Government in each province to lay down the general scope of the enquiry in accordance with local circumstances.

20. The memorial of the National Muhammadan Association lays special stress upon the extent to which the Hindus have ousted Muhammadans from State employ generally, and prays that "the balance of State patronage may be redressed."

The memorialists are aware of the orders which have from time to time been issued by the Government of India as well as by the Local Governments, directing the Heads of Departments to pay due regard to the claims of candidates belonging to their community; but at the same time they assert that no practical gain has accrued to the Muhammadans from these orders. This they attribute to two causes—(1) neglect of the Government policy by the officers with whom the actual distribution and dispensation of State patronage rests, and (2) the undue importance which is attached to a university qualification.

With regard to this point, the Government of India would remark that in every province admission to the superior departments of the Government service is now, speaking generally, regulated either by public competition or by the possession of qualifications altogether independent of the race or caste of the candidate. If, therefore, Muhammadans have secured a less proportion of places in the public service than members of other native communities in India, the blame cannot, in the opinion of the Government of India, be attributed in any sensible degree to the action of the State or of its officers. In the matter of the Statutory Civil Service, the Muhammadans have in fact had even more than their proportionate share of consideration, 10 out of 36 nominations to that service having been given to Mussalmans.

21. From the reports of the Local Governments it would appear moreover that the memorialists have exaggerated the numerical inferiority of Muhammadans in the public service generally. In Madras and Bombay where Muhammadans form only from 6 to 7 per cent. of the total population, the anxiety of these Governments to induce the Mussalman community to qualify for the public service has been distinctly manifested in the special educational facilities afforded to members of that community. Not only so, but Mussalman candidates, provided they are qualified by the prescribed tests for the public service, have always received exceptional favour. In Madras this has been specially the case since the times of Lord Hobart's Government in 1872. The Government of Bombay point out that in Western India the Muhammadan chances of employment are better now than they were in the days of the Hindu dynasties which preceded the British Empire. If the proportion of Muhammadans in the public service of Bombay is small, the reason is, in

the opinion of the Government of Bombay, to be found, not in any disfavour to Muhammadans, entertained by English bestowers of patronage, nor in the overpowering influence of Hindu advisers and subordinates, for the Government and its higher officers are fully alive to the administrative advantage of associating men of different races in every department of public business, but in the circumstance that entrance into the public service is determined as far as possible by educational tests, "whereby public emoluments are treated as public property, and the public is served by the fittest persons." In Sind, where the proportion of Muhammadans to the total population is considerable, the reports show that that community is very largely represented in most departments of the public service.

In Bengal, to which the memorial more particularly refers, the Muhammadans form over 31 per cent. of the total population. Here it is no doubt true that their numerical inferiority in the public offices is very marked. This is, however, mainly due to their want of the prescribed educational qualifications, especially as regards a knowledge of English. For this deficiency poverty will to some extent account; but there is also no doubt that there has been a real unwillingness to take advantage of the education provided by the State. At the same time another important fact, pointed out by Nawab Abdul Lateef in a memorandum laid before the Education Commission, should not be overlooked, *viz.*, that "the mass of the Muhammadan population consists of cultivators among some millions of Brahmins and Kayasthas, who from time immemorial have enjoyed a superior system of education and in consequence a passport to public offices." This is especially the case in Eastern Bengal, where the Muhammadans are most numerous.

In the North-Western Provinces and Oudh and in the Punjab the enquiries which have been instituted prove that the allegations of the memorialists as to the exclusion of their community from a fair share of Government patronage do not apply. The figures submitted indicate that in respect of offices in the Subordinate Executive and Judicial Services, including all the higher and better paid appointments, the Muhammadans have secured not only a fair proportion, but almost an unduly liberal share of patronage. In the Central Provinces they have been equally fortunate. Nor in the minor administrations does there appear to exist any cause of grievance under this head.

22. The Governor General in Council does not consider it desirable or for the advantage of the Muhammadans themselves that they should be exempted from those tests which are established to secure the admission of duly qualified candidates into the public service. Nor can special favour be shown them in open competitive examinations of any description. It is only by raising their own educational qualifications to the level already attained by other races that the Muhammadans can hope to win appointments that are awarded as the result of examination. But there are a large number of appointments the gift of which lies in the hands of the Local Governments, the High Courts, or local officers. The Governor General in Council desires that in those provinces where Muhammadans do not receive their full share of State employment, the Local Governments and High Courts will endeavour to redress this inequality as opportunity offers, and will impress upon subordinate officers the importance of attending to this in their selection of candidates for appointments of the class last referred to. The subject of the extent to which Muhammadans are employed in offices under Government might usefully be noticed in the Annual Reports of Provincial administration.

23. Another point urged in the memorial is the alleged unsatisfactory character of the administration of Muhammadan law. According to the memorialists,—

The frequent miscarriage of justice, occasioned by the insufficient acquaintance generally possessed by English and Hindu Judges with the principles of Muhammadan law, has given rise to a certain feeling of dissatisfaction and distrust among all classes of the Mussalman population in India. They allege, and not without reason, that since the abolition of the offices of Mufti and Kazi-ul-Kuzzat—officers specially authorised to interpret and expound the Muhammadan law to European Judges,—the Muhammadan law has practically ceased to be

administered. Even where it is attempted to be applied or enforced, the attempt is always uncertain in its result. The major portion of the Muhammadan law regulating the domestic relations is not recognised by the Courts of Justice in India.

The remedy suggested is the appointment in the mofussil of Muhammadan Judges qualified to expound the Muhammadan law, to sit as Assessor Judges in the trial of Muhammadan cases. The appointment of a Muhammadan Judge in each of the High and Chief Courts is also recommended.

With regard to this matter, the Government of India, after a careful consideration of the local reports, including the opinions of the High Courts, has no hesitation in coming to the conclusion that the Mussalman community have no substantial grievance. In those provinces in which any considerable number of cases of Muhammadan law come before the Courts, the Bar is largely composed of members of that community, so that Muhammadan exponents of the law are always to be found. The appointment of law officer to the Courts was abolished by Act XI of 1864 after full deliberation, on the ground that the office had come to be one of no practical utility. However necessary it may have been in the early days of British rule to employ Muhammadan experts to interpret Muhammadan law, especially when the Criminal Courts for the most part had to administer that law, such necessity has now ceased to exist; the penal code has been introduced, the general study of law has progressed, the standard for judicial employment has been raised, and text-books in English, dealing fully and ably with Muhammadan law, have become common. In the opinion, therefore, of the Government of India the evidence forthcoming lends no support to the statements of the memorialists, that justice has miscarried from the want of acquaintance of the Judges with Muhammadan law. Nor does the Government see any reason to revive the system which would place members of the Mussalman community in the position of Assessor Judges to the civil courts of the country. It is also impossible to undertake that a Muhammadan Judge shall always sit on the bench of each of the High and Chief Courts; but the Governor General in Council would certainly admit the claims of any Muhammadan gentleman who might appear to be in other respects the best suited for such an appointment. One gentleman of the Muhammadan community recently filled the post of Officiating Judge of the bench of the High Court of the North-Western Provinces.

24. The last point in the memorial to which it is necessary to refer is the abolition of Urdu as the Court language of Behar. This was a measure carried out after much consideration by the Local Government. The Lieutenant-Governor now remarks regarding it:—

To the objections against the introduction of Hindi as the official language of Behar, the Lieutenant-Governor considers that a sufficient answer is furnished by the last Administration Report of the Commissioner of the Patna Division. It is stated in that report that the change in question has been effected without difficulty and with great advantage to the public in general. A new class of amla and legal practitioners acquainted with Hindi is springing up, while the change has been introduced with such consideration for the claims of existing incumbents of offices that the individual hardship caused by it has been inappreciable. This statement will be intelligible when it is understood that even at the present day all subordinate officials and law-agents have some knowledge of Hindi. All speak it, and nearly all write it, though possibly not with the same facility as Urdu. There is reason to believe that this outcry against the use of Hindi in Behar is rather a matter of factitious sentiment than of practical inconvenience. It is far louder among the Muhammadans of Calcutta who are not affected by the change than among the supposed sufferers. The change is the logical sequence of that exclusively Hindi teaching which has prevailed for nearly ten years with such marked success in all the primary patshalas and vernacular schools of Behar, in the very institutions, that is to say, from which the subordinate official classes, in whose behalf alone this outcry is raised, are fed. To give effect to the wishes of the National Muhammadan Association, therefore, on this point, it would be necessary to reverse the existing and approved policy of popular education in these provinces—a course which the memorialists themselves would hardly advocate.

25. The Governor General in Council has felt it to be his duty in the preceding paragraphs to controvert various misconceptions which find place in the representations that have been laid before Government; but he will, as already stated, always take a lively interest in the advancement and well-being of the Muhammadan community, and he concurs in the remarks

which not unfrequently occur in the local reports, that the very fact that a memorial like that under notice has been presented with the concurrence and approval of so many leading gentlemen in Bengal and elsewhere, indicates that the Muhammadans have themselves come to appreciate fully the necessity of moving with the times. They have now among them not a few highly educated and public spirited men who are keenly interested in the improvement and advancement of their co-religionists. The Local Governments are everywhere anxious to do all that they equitably can do to assist in this movement; and His Excellency in Council has little doubt that, within the next ten years, much greater progress will be made than has hitherto been recorded. It is the earnest desire of the Supreme Government to treat all classes of Her Majesty's subjects in India with absolute impartiality, and see all alike benefiting by the protection, the patronage, and the assistance of the State.

---

ORDER.—Ordered, that this Resolution be forwarded to the—

Governments of Madras, Bombay, and the North-Western Provinces and Oudh for information and guidance, with a request that a copy of it may be communicated to the Honourable the Judges of the High Court for information.

Government of Bengal for information and guidance. (A copy will be separately communicated to the High Court, Calcutta.)

Government of the Punjab for information and guidance, with a request that a copy of it may be communicated to the Judges of the Chief Court for information.

Chief Commissioners, Central Provinces, British Burma, Assam, and Coorg, and Resident at Hyderabad for information and guidance.

Ordered also, that this Resolution be published in the *Gazette of India*, and that the whole of the papers cited in the preamble, together with the section of the Education Commission Report which deals with Muhammadan education, be published in the form of a Selection from the Records of the Government of India.

A. MACKENZIE,

*Secretary to the Government of India.*

## GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR  
THE WEEK ENDING 15th JULY 1885.

GENERAL REMARKS.—In the Madras Presidency slight rain has again been general. Prospects have somewhat improved in Bellary and Anantapur and are fair elsewhere in the Presidency, though more rain is wanted in places. Harvesting continues in a few districts. In Mysore more rain is still required in parts of the Tumkur and Kolar districts, but elsewhere the crops are in fair condition. In Coorg prospects are good.

Rain has fallen in parts of several districts in the Bombay Presidency, though the rainfall up to date is everywhere, except in Kanara, much below the average. More rain is urgently required for sowings in most districts. Rice transplantation has commenced in Colaba and Ratnagiri, and *kharif* sowings are in progress in parts of Surat and Sholapur. Fodder is scarce in several districts. More or less rain has fallen throughout the Berars, Hyderabad, and the Central India States, and agricultural prospects are generally good. In Rajputana rain has fallen in a few places only, but more is needed for *kharif* operations, which have commenced.

Good rain has fallen throughout the North-Western Provinces and Oudh, and has been very beneficial to *kharif* operations. Prospects are good. In the Punjab and the Central Provinces moderate rain has fallen in most places. *Kharif* sowings are in general progress in both Provinces.

General rain is again reported from Bengal, where crop prospects continue favourable. Transplanting of late rice is making good progress in the Province, in Cuttack and Pooree; but lands inundated by late floods are being resown. Good rain is reported from Assam; transplanting operations are in progress, and sugarcane and tea are doing well. Seasonable rain continues to fall in British Burma, where ploughing is now in general progress.

Public health is, on the whole, fairly good, though cholera, small-pox, and fever are reported.

Prices are generally steady, except in Bengal, where they are still high, but with a slight downward tendency in some districts.

| Presidency or Province and District.                                                         | Rainfall for week under report. | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>General Remarks.</b> —More or less rain in all parts of these provinces during the week; the fall was rather excessive in some districts, where a spell of sunny weather is now required for a few days. Prospects of crops continue to be generally favourable; transplanting of late rice is making good progress all round; in Cuttack and Pooree resowing is being made on the inundated lands. High prices continue to be prevalent, with a slight downward tendency in some districts. Cholera still exists in several localities; appearance of fever is reported from certain districts and said to be on the increase in Rungpore. |                                                                            |                                                                                                                                                                                                                        |

**SPECIAL REPRESENTATION OF THE INDIAN TOBACCO TRADE AT THE COLONIAL AND INDIAN EXHIBITION TO BE HELD IN LONDON IN 1886.**

Circular No. <sup>2</sup> Ex., dated Simla, 8th July 1885.

From—C. S. BAXLEY, Esq., Under Secy. to the Govt. of India, Rev. and Agrl. Dept.,  
To—All Local Governments and Administrations.

I am directed to state that a proposal has been made by Messrs. H. S. King & Company, the official Agents for the Indian and Colonial Exhibition, that they should be allowed to open in the Exhibition a separate "Cigar and Tobacco Room" in which can be exhibited samples of raw and manufactured tobacco from all parts of India. Messrs. H. S. King & Company offer to place one or more attendants in charge of this room, who will furnish sample cigars, price lists of the different makers, weights of the cigars for computation of duty, &c. They will also take charge of consignments from the makers, and will take orders, either in large or small quantities. They undertake to represent all the manufacturers impartially and without preference, and to make the increased popularity and greater demand for Indian cigars their special object.

2. This proposal, which commended itself to the Royal Commissioners, has been referred by them for the consideration of the Government of India, by whom it has been formally approved. Small samples of Indian cigars and tobacco, both raw and manufactured, will be exhibited in the Imperial Courts of the Exhibition; but the space there assigned to them is necessarily limited, while it is impossible for the Government to give any facilities for trying them, such as will be offered in the proposed Tobacco Room. Under these circumstances, it has been decided that the Government exhibit of tobacco should be kept within limits sufficient to represent this important product in its principal

\* Messrs. King, Hamilton & Company, Calcutta.  
Messrs. King, King & Company, Bombay.  
Messrs. Arbuthnot & Company, Madras.

branches. It is, therefore, strongly recommended, in the interests of the Indian Tobacco Trade, that consignments of Cigars and Tobacco, if sent in large quantities, should be made to Messrs. H. S. King & Company, or their Indian Agents.\*

3. Messrs. H. S. King & Company lay much stress on the desirability of consignments of tobacco and cigars being sent to them, if possible, some months before the Exhibition opens. Indian cigars, they observe, nearly always arrive from India so wet as to be unfit for early use; and if passed through the Custom House at once before they have had time to dry, the duty payable is greatly enhanced by the superfluous damp which they contain.

4. Messrs. H. S. King & Company's proposals seem to the Government of India well calculated to forward the interests of the Indian Tobacco Trade; and I am therefore directed to request that as much publicity may be given to it as possible.

It is suggested that this letter should be published in the official *Gazettes*, both English and Vernacular, and should be distributed to the principal Vernacular Newspapers, and generally to all persons interested in the Tobacco Trade.

**No. 82 Met.**

*Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 17th July, 1885.*

Read the following:—

Summary of the Weather Reports for June 1885.

On the west coast the weather of the first few days of the month was marked by a few unimportant showers. On the 4th, however, there occurred a rather

heavy fall of rain at Colombo and a moderate fall over the south and west of the Peninsula, and from that day onward throughout the month there was more or less daily rain in Ceylon and on the south-west coast of India. This rainfall has, however, been distinguished by two noticeable characteristics. In the first place the fall has been accompanied by a very unsteady monsoon current, while in the second place, and probably on account of this variability in the wind direction, the extent of the fall has been greatly restricted. This unsteadiness of the monsoon current was particularly striking on the 8th and 9th, when a storm apparently skirted the west coast, travelling in a northerly direction, causing a marked disturbance of the average barometric distribution and drawing the wind over a large part of western and south-western India into south-east and even in some places into east, a direction opposite to the normal. In Bombay itself, the burst of heavy rain which usually characterises the setting in of the summer monsoon on the Konkan Coast has not occurred throughout the month, and the winds over that region appear to have been abnormally dry; and further to the southward, i.e., on the Malabar Coast, though the winds appear to have brought up the normal amount of moisture, it seems to have been deposited only on the western face of the Ghats, and the stations in the Deccan and Hyderabad show a great deficiency of rainfall. The weather in the Berars, Khandeish, and Gujarat has been similar to that prevailing in the Konkan, the winds having been unusually dry; while in Sind and Cutch even the small average of those regions in this month has not been reached.

As regards the Bay of Bengal branch of the monsoon, the reports show that until the 10th little rain of importance was recorded. From the 10th, however, rain fell generally over Burma, Assam and Lower Bengal, but up to the 16th was restricted to those regions. On the 16th a small depression was forming over the Sunderbuns; and as this disturbance travelled first westward and subsequently north-westward, the rains extended up the Gangetic plain, and by the 24th had set in over the greater part of the North-Western Provinces. On the 26th a second depression was formed over the Sunderbuns, and this disturbance travelling westward in its turn, fairly established the rains over the North-Western Provinces and as far west as Delhi and the east of the Punjab. The heaviest falls of rains connected with these disturbances were:—

Though these depressions appear to have ushered in the rains from Lower Bengal to the Upper Provinces, it is important to note that, as was the case last year, the districts of Northern Bengal and Behar show a deficiency. It is remarkable that the disturbances, noticed above, after giving plentiful rain to Lower Bengal and Assam, appear to have passed over Behar in a condition of diminished energy, but on reaching the North-Western Provinces they seem to have again suddenly intensified and occasioned heavy precipitation.

In the central parts of the country and the eastern half of the Peninsula the returns show that Orissa and the Northern Circars have had less, and the Central Provinces and the Karnatic more, than the average amount of rain.

With regard to the other meteorological elements, pressure on the whole has been above the average of the month, except in Bombay, the Berars, Hyderabad, the extreme south of the Peninsula and Orissa. In four of these five Provinces precipitation has been deficient, so that the low barometer is probably to a great extent attributable to the high temperature prevailing in the absence of cloud and rain.

The moisture in the atmosphere has been on the whole below the average, except in the Punjab, the Central Provinces and Madras, the greatest and most general deficiency being reported from the Bombay Presidency.

The following table shows the amount of rain and the difference from the average during the month of June, according to districts, as far as is indicated by the telegraphic reports :—

| Districts.                                    | Average Rainfall in June. | Difference from the average in June 1885. |
|-----------------------------------------------|---------------------------|-------------------------------------------|

SIMLA; } W. L. DALLAS,  
The 9th July 1885. } Asst. Meteorological Reporter to the Govt. of India.

ORDER.—Ordered, that the papers be printed in the Supplement to the Gazette of India.

E. C. BUCK,  
Secretary to the Government of India.

# SUPPLEMENT TO The Gazette of India.

Nº 30. } CALCUTTA, SATURDAY, JULY 25, 1885.

## OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

N.B.—As regards the figures in column "Total receipts from 1st April 1885 to date," audited figures have been availed of as far as possible.  
(a) Return not received.

(b) Total receipts from 1st April to 31st June 1884.  
(c) Ditto ditto to 27th June 1885.  
(d) Including Rewari-Ferozepore State Railway.  
(e) Total receipts from 1st April to 28th June 1884.

GOVERNMENT OF INDIA.

## LEGISLATIVE DEPARTMENT.

No. 10, dated Fort William, the 17th March, 1885.

From—His Excellency the Viceroy and Governor-General of India,  
To—The Secretary of State for India.

In conformity with the provisions of Section XXI of the Indian Councils Act, No. VIII of 1885 (an Act to amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the territories under the Administration of the Lieutenant-Governor of Bengal), I have the honour to forward to your Lordship an authentic copy of the Law noted in the margin, which has been passed by the Council of the Governor-General of India for making Laws and Regulations, and to which I have signified my assent.

2. In accordance with the instructions contained in your predecessor's Statement of Objects and Reasons, dated 2nd March, 1883, Despatch No. 61, dated 21st December 1869, a copy of the papers noted in the margin, relating to the Act, accompanies. Preliminary Report of Select Committee, dated 14th March, 1884. Further Report of Select Committee, dated 12th February, 1885. Abstracts of Proceedings, dated 2nd, 12th and 13th March, 1883, 14th March, 1884, 13th and 27th February, 2nd, 4th, 6th, 9th and 11th March, 1885.

3. A copy of the Act in octavo form will be forwarded by next mail.

No. 24, dated India Office, London, 23rd June, 1885.

From—The Secretary of State for India,  
To—His Excellency the Viceroy and Governor-General of India.

Para. 1. I have considered in Council the Bengal Tenancy Act, No. VIII of 1885, which received your Lordship's assent on the 14th March last, and was forwarded with your letter No. 10, Legislative, of 17th idem.

2. In announcing to your Excellency that this Act will be left to its operation, I must express my cordial sense of the ability and attention with which the important subject of the amendment of the law of landlord and tenant in Bengal has been treated by the Rent Law Commission, by the numerous officers who have been called on for opinions upon it, by the Local Government, by your Council, and especially by the members of the Select Committee.

No. 17 of 8th May, 1884, with reference to a memorial from the Central Committee of landholders of Bengal and Behar.

No. 22 of 19th June, 1884, with reference to a memorial of Mr. J. Stalkart, on behalf of the ryots of India.

No. 30 of 28th August, 1884, with reference to a memorial of the landholders of Behar.

3. As promised in my Legislative Despatches marginally noted, I have given my careful attention to the objections urged by different memorialists to the legislation which has now been completed.

4. Upon the arguments urged against the provisions of the Act from the point of view of the tenant, I would remark that, although the Act may not confer upon the tenants all the advantages to which some may have deemed their class entitled, I entertain no doubt that it will prove in a high degree beneficial to the ryots generally, especially to the most numerous and important class, the settled ryots, whose claims are also the strongest. An examination of some of the principal differences between the new law and that which it supersedes makes this evident. The proof of title to occupancy right is greatly facilitated. It will no longer be possible for the settled ryot to be induced or compelled to contract himself out of his occupancy right. The principle of the "judicial rent" is more firmly established. The provisions of the law restricting enhancement of rent to the amount which can be shown to be fair and equitable are made more effective. Protection is given against the too frequent repetition of enhancements and of suits for arrears. By the substitution of the process of sale of the occupancy right for that of ejectment in execution of decrees for arrears, the value of his occupancy interest, of his improvements and of his standing crops, is secured to the ryot after his arrears

are liquidated. The power of distraint, while it is retained as an instrument for *bona fide* recovery of rent, can no longer be used for purposes of harassment or oppression. Illicit demands in excess of the legal rent are more effectually provided against. It is made clear, in case of doubt or dispute, when, how, and to whom the ryot is to pay his rent. And due receipts for his payments and statements of his account are secured to the ryot. The non-occupancy cultivator, while the distinction between him and the settled ryot is maintained, also receives new and valuable protection. He will ordinarily be able to claim to have a fair rent fixed by the Court for a term; he will be protected from ejectment as long as he pays that rent; his right to make improvements is defined, and the enjoyment of their fruit is secured to him.

5. On the part of the zemindars it has been contended in some memorials that, prior to the Permanent Settlement (save where their rights were invaded by mere usurpation) they were absolute proprietors of the soil; that the revenue they paid was unvarying in amount until arbitrarily enhanced by the later Mahomedan rulers; and that the ryots possessed no rights not derived from them. This contention, however, is not supported by the language of the Code of 1793. The preamble of Regulation II states that property in the soil was never, before 1793, declared to be vested in the landholders; that before that date they were not entitled to transfer such rights as they did possess without the sanction of the Government; and that "the public demand on each estate was liable to annual or frequent variation at the discretion of Government." The memorialists appear to me to make the mistake of supposing that the Permanent Settlement Regulations declared an existing, instead of creating a new state of things.

6. So also I understand it to have been asserted that the Code of 1793 acknowledged the zemindars to be absolute proprietors of the soil, and therefore admitted no rights of the cultivators as against them, except such as might be expressly declared in the Code itself; that whatever rights the ryots may have possessed were ascertained and defined in the Code, which reserved to the Government no power to ascertain and settle them at any future time; and that therefore the present legislation purporting to ascertain and settle such rights is a breach of the Permanent Settlement. This assertion is, however, in my opinion untenable.

7. Regulation I of 1793 expressly reserved to the Governor-General in Council the power, whenever he might deem proper, to enact such regulations as he might think necessary for the protection and welfare of the tenants, the proprietor being expressly debarred from claiming, in case such regulations should be enacted, any reduction of his fixed revenue on that account; a provision which clearly contemplates the possibility of some future regulation affecting his receipts from his tenants.

8. Under this reserved power, legislation for the welfare of the tenant has, on cause shown, been on several occasions adopted, both before and since the enactment of Act X of 1859, of which the present Act is an amendment and an extension. And the exercise of this power was fully justified on the present occasion by the facts brought to light during the inquiries and discussions which preceded the passing of this Act.

9. I observe that many of the objections to particular proposals or provisions which are urged in the memorials I have received are directed against provisions which, though inserted in one or other of the Bills which have been from time to time drafted, find no place in the Act as passed. In the amended Bill first submitted the Select Committee considerably modified the Bill as originally introduced, and modified it in accordance with views urged by the representatives of the zemindars. On the points of any importance in which the Act finally passed differs from the first amended Bill, the modifications, with one exception, have been in the same direction. The remaining provisions to which objection was made have been so thoroughly and closely examined by your Legislative Council as to give me confidence that the decision arrived at on each of them is a sound one; while the fact that several of them have been attacked, from opposite points of view, by the representatives of both the landlords' and tenants' interests leads, as has been pointed out, to a fair inference that the just claims of both parties have been allowed.

10. I should have been glad if it had been found possible to give the greater facilities for the realization of rent desired by the zemindars by an abbreviation and simplification of procedure in the Civil Courts. But the opinion of the Select Committee, supported by that of the Judges of the High Court, convinces me that this would have involved a serious risk of failure of justice. The executive improvements which have been suggested on this point will doubtless receive your consideration. And it seems probable that the object in view may, to a large extent, be secured by a considerable increase in the number of Munsiffs Courts specially employed in the adjudication of rent suits.

11. As regards the objection that the Act was passed with undue haste, Her Majesty's Government entertain no doubt that the decision of the Legislative Council not to delay the matter further was right. The present measure has, in one shape or another, been before the public for more than four years. No less than five Bills were drafted and submitted to public criticism before that which was finally adopted. An enormous mass of materials has been from time to time collected and considered; and a very strong Select Committee, on which all the interests concerned were represented, was engaged for two sessions in discussing details and framing the Act. A measure so passed cannot be said not to have received full consideration. Moreover, there were the strongest reasons why the controversy upon the reform of the Tenancy Law, which has agitated and excited the agricultural classes of Bengal for the last seven years, should be set at rest as soon as possible.

12. I request that the different memorialists who have addressed me on the subject of the amendment of the Bengal Tenancy Law may be informed of the conclusions at which I have arrived.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at the Viceregal Lodge, Simla, on Wednesday, the 22nd July, 1885.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.  
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.I.E., C.I.E.  
His Excellency the Commander-in-Chief, G.C.B., C.I.E.  
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.  
The Hon'ble C. P. Ilbert, C.I.E.  
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.  
The Hon'ble T. C. Hope, C.S.I., C.I.E.  
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.  
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

CENTRAL PROVINCES COURTS BILL, 1885.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the Law relating to Civil Courts in the Central Provinces. He said:—

"Mr. Crosthwaite, the Chief Commissioner of the Central Provinces, has been for some time engaged in working out a scheme for the judicial re-organization of the provinces under his administration, with the object, among other things, of effecting gradually, and as circumstances permit, that separation between executive and judicial functions which it is our desire to introduce everywhere, but which is only possible to a very limited extent in the more backward provinces of the Empire. It appears that the result of the arrangements now in force in the Central Provinces is that the Tahsildar,

who is both a Revenue-officer and also the officer who presides over the lowest Courts of civil jurisdiction, is very much overburdened with original civil work, and that the Deputy Commissioners and Commissioners, who also combine executive with judicial functions, are overburdened with appellate civil work; and the problem which Mr. Crosthwaite is trying to solve is how to afford to these three classes of officers that amount of relief which will enable them to devote proper attention to their other duties. We propose to give this relief partly by taking power to appoint officers who are to be styled Judicial Assistants to the Commissioner, Subordinate Judges and Munsifs, and who are to take over the whole, or part, of the civil judicial work of the Commissioners, Deputy Commissioners and Tahsildars respectively. These officers are, as I understand, only to be appointed where, and for so long as, they are absolutely needed, and nothing like a uniform or final arrangement is to be attempted throughout the whole of the aggregate districts, the circumstances of which differ so materially from each other and all of which are passing somewhat rapidly through a period of transition.

"Then Mr. Crosthwaite also proposes to make some modification in the system of appeal, which, as we all know, constitutes the crux of all our judicial arrangements. Under the existing Act for the Central Provinces, the course of appeal is regulated exclusively by the powers of the officer from whom the appeal lies. Consequently, when it is necessary to transfer certain sets of appeals from one appellate tribunal to another, the Chief Commissioner is obliged to resort to the clumsy device of increasing or reducing the powers of the officer presiding over the Court from which the appeal lies, without reference to his fitness for exercising those powers, merely in order to change the Court of appeal, and with the result that all the cases decided by that officer must necessarily go on appeal to the same Court, no matter what their intrinsic value or importance may be. It is now proposed to regulate the course of appeal by reference to the nature of the subject-matter in dispute, in accordance with the system which prevails in Bengal and other Provinces. Mr. Crosthwaite finds that most of his proposals can be carried into effect by executive order, and without any alteration of the law, but that there are some provisions of the Central Provinces Courts Act, especially those relating to appeals, which it is absolutely necessary to modify. Those provisions are not very numerous, but Mr. Crosthwaite is of opinion—and I entirely agree with him—that it would be desirable to take this opportunity of re-casting the language and arrangement of the Civil Courts Act for the Central Provinces in order to bring them into closer conformity with more recent Acts of the same nature in force in other Provinces. Accordingly we propose to repeal the Act of 1865 and to re-enact it with the necessary modifications."

The Motion was put and agreed to.

#### CRIMINAL PROCEDURE CODE, 1882, BOMBAY DISTRICT POLICE ACT, 1867, PENAL CODE AND PRISONERS' ACT, 1871, AMENDMENT BILL.

The Hon'ble MR. ILBERT also introduced the Bill to amend the Code of Criminal Procedure, 1882, the Bombay District Police Act, 1867, the Indian Penal Code and the Prisoners' Act, 1871, and moved that it be referred to a Select Committee consisting of the Hon'ble Sir S. C. Bayley, Mr. Hunter and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

#### SEA PASSENGERS' BILL, 1885.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to amend the law relating to the carriage of passengers by sea be taken into consideration. He said:—

"This Bill applies to voyages from Indian ports certain provisions for the relief of shipwrecked and distressed emigrants which are embodied in two

English Acts of Parliament. We have received from the Chambers of Commerce and other authorities whom we have consulted various suggestions for the amendment of the proposals embodied in our Bill; but in almost every case we have found that those suggestions are inadmissible, for the simple reason that the special authority under which we are legislating in this particular case merely enables us to apply the provisions of the English Acts and does not empower us to amend them. Under these circumstances, the only alterations which we have been able to make in the Bill as introduced are such as are strictly warranted by the language of the English Acts. For instance, we have gone as far as is practicable in meeting the suggestion of the Madras Chamber of Commerce by inserting in the Bill a provision expressly legalising insurances against the liabilities imposed upon shipowners by the Bill, and we are able to do this because that provision is simply copied from a section of one of the English Passenger Acts. We have also, at the instance of General Blair, the Resident at Aden, made the Bill apply to voyages to ports on the East Coast of Africa and in the Gulf of Aden; but we have taken care in all the alterations that we have made not to go beyond the four corners of the English Acts of Parliament which we are authorised to apply."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed. The Motion was put and agreed to.

#### INDIAN TELEGRAPH BILL, 1885.

The Hon'ble MR. HOPE moved that the Report of the Select Committee on the Bill to facilitate the construction of Telegraphs, and to amend the Indian Telegraph Act, 1876, be taken into consideration. He said:—

"In making this Motion I think that there are only two points to which it is necessary for me to invite the attention of the Council, all minor ones having been fully explained in the Report of the Select Committee. The first point is that we have provided that the words 'telegraph authority' in the Bill shall mean the Government Telegraph Department, and that that authority shall not exercise the power of placing telegraph lines and posts except for the purposes of a telegraph established or maintained by the Government, or to be so established or maintained. We think that most of the objections that were taken to the Bill as introduced, chiefly by commercial bodies in Calcutta, will have been met by our proposal that the power of placing telegraph lines and posts shall only be exercised by the Government Telegraph Department. The exercising of such powers by licensees was, on consideration, admitted to be decidedly open to objection.

"The other point is that, in endeavouring to make this Bill fit in with the existing Telegraph Act, we came to the conclusion that it would be more convenient to the Telegraph Department and to the public that the existing Act should be repealed and re-enacted with the modifications and additions proposed by the present Bill; and we have accordingly re-drawn the Bill as a consolidating measure."

The Motion was put and agreed to.

The Hon'ble MR. HOPE moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

#### BURMA COURTS BILL, 1885.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to amend the Burma Courts Act, 1875, and section 360 of the Code of Civil Procedure.

#### INDIAN SECURITIES BILL, 1885.

The Hon'ble SIR A. COLVIN asked for leave to postpone the presentation of the Report of the Select Committee on the Bill to amend the law relating to Government Securities.

Leave was granted.

The Council adjourned to Wednesday, the 29th July, 1885.

D. FITZPATRICK,

Secretary to the Government of India,

Legislative Department.

## GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

## REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 22nd JULY 1885.

**GENERAL REMARKS.**—Rain is reported from the Madras Presidency generally, and prospects, which are elsewhere fair, have much improved in Bellary and are more favourable in Anantapur. More rain is still wanted for the crops in parts of Bellary, Ganjam, and Tanjore. In Mysore slight rain fell in most parts of the State, but more is required. Prospects are uncertain in Kolar and in the low-lying tracts of the Shimoga and Kadur districts; elsewhere in the Province prospects are, on the whole, favourable. In Coorg there has been a good deal of rain, and prospects continue favourable.

Good rain has fallen throughout the Bombay Presidency, and prospects have greatly improved. More rain is required for sowings in Khandesh and in the Panch Mahals. *Kharif* sowings are in general progress. Rain has fallen throughout the Berars, in Hyderabad, and the Central India and Rajputana States, and prospects are, on the whole, very favourable, though in Marwar considerable anxiety is said to prevail on account of the scanty rainfall. In the North-Western Provinces and Oudh, in the greater part of the Punjab, and in the Central Provinces rain has been general, and *kharif* operations are in active progress.

Good rain continues to fall in Bengal, and agricultural prospects are favourable in all districts. The autumn crops and sugarcane promise well, except in some places where they have been damaged by floods. Harvesting of early rice and jute has begun in parts of Northern and Eastern Bengal, and the transplanting of late rice is going on well. Good rain is reported from Assam, and the state and prospects of crops continue favourable.

In British Burma the weather is seasonable; and ploughing, sowing, and transplanting are in general progress.

The public health is fairly good in most Provinces, and prices are generally stationary, except in the Punjab, where they are rising in Ferozepore and Peshawar. In Bengal prices are still high.

| Presidency or Province and District. | Rainfall for week under report.                                                  | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

Cholera in Nasik, Sinnar, Igatpuri, Niphad, Yeola, Nandgaon, 181 attacks, 110 deaths. Wheat 34, <i>bajri</i> 34, and rice 21 pounds per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Colaba (Bombay)                      | Rain every day; heavy on 16th; total of week, 12.40.                                                                                                                                          | Total to date, 22.02, being 16.39 below average. Abnormal temperature rose from 1° cool on 15th and 16th to 2° warm on 19th and then fell to 1° cool on 21st; vapour in air excessive from 17th to 21st; abnormal wind from north-west from 15th to 17th; wind normal from 18th to 21st.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Poona                                | Rain throughout the district; maximum in Maval, 12.89; minimum in Indapur, 4.0.                                                                                                               | Sowing operations progressing, except at Indapur and Sirur talukas, where more rain is wanted. Prices— <i>bajri</i> 29 and <i>juari</i> 37; in Poona <i>bajri</i> 28 and <i>juari</i> 33 pounds per rupee. 181 cases of cholera in four talukas, 68 deaths.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Ahmednagar                           | Akola, 1.26; Parner, 1.20; Newasa, 1.05; Sheogaon and Rahuri, .98; Jamkhed, .86; Nagar, .59; Shrigonda, .56; Karjat, .38; Kopergaon, .37.                                                     | Sowing of <i>kharif</i> is in progress in about 30 villages in the Nagar taluka, in a very few places in Parner and Shrigonda, in about ten or eleven villages of Kopergaon, in parts of Sheogaon, Newasa, and in about four villages of Rahuri, in about seven villages of Sangamner, and in parts of Jamkhed, where the present rainfall has been beneficial to the <i>tasur</i> crops; sowing of <i>kalya</i> and <i>bajri</i> is begun in about twenty-two villages of Karjat, in Akola; <i>kharif</i> sowings is begun in some of the Dechi villages. The late rainfall has been beneficial to the <i>nagli</i> , <i>choti</i> , and rice crops sown in the Dechi villages. Want of fodder at Parner, Kopergaon, and Sangamner. 83 heads of cattle are reported to have died in Sangamner and 80 in Kopergaon; slight cattle-disease in Newasa, Sangamner, and Akola; cholera—32 attacks, 12 deaths in Jamkhed; 7 attacks, 6 deaths in Sheogaon; 67 attacks, 19 deaths in Newasa; 3 attacks, 3 deaths in Rahuri; 16 attacks, 9 deaths in Kopergaon; and 8 attacks only in Sangamner. <i>Bajri</i> from 34 to 45 and <i>juari</i> from 42 to 66 pounds per rupee. |
| Sholapur                             | Sholapur, 1.47; Barsi, 1.14; Madha, .74; Karmala, .25; Pandharpur, 1.10; Sangola, .79; Malsiras, .64.                                                                                         | Sowing has generally commenced in the Sholapur, Barsi, Madha, Karmala, Pandharpur, and Sangola talukas; sowing operations have commenced in parts only, where there was enough moisture in the Malsiras taluka; irrigated crops are suffering. Well water being scarce, general and good fall of rain is anxiously looked for. <i>Juari</i> is sold at 45 pounds 31 tolas and <i>bajri</i> 30 pounds 33 tolas per rupee. There are as yet no signs of distress.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Dharwar                              | Sangola, 1.94; Dharwar and Mugud, 1.80; Gadag, 1.72; Kalhatgi, 1.50; Kod, 1.31; Nargund, 1.20; Bankapur, 1.10; Ranibennur, 1.0; Hubli and Mundargi, .86; Navalgund and Ron, .70; Karagi, .66. | Sowing of early <i>juari</i> in progress, except in Ron, part of Navalgund, and Karagi, where it is retarded for want of sufficient moisture; rice crops good, but require heavy showers. Slight cholera in Dharwar, Hubli, Navalgund, and Bankapur talukas; slight cattle-disease in Hangal taluka. Average price of rice 26 and <i>juari</i> 41 pounds per rupee. Season prospects fairly good; rice crop excellent. No danger of famine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Kanara                               | Karwar, 7.37; Kumpita, 7.38; Sirsi, 7.29; and Haliyal, 3.59.                                                                                                                                  | Crops thriving. Cholera at Haliyal 26 cases, 23 deaths; fever and small-pox in six talukas and cattle-disease in two. Common rice at Karwar 14 seers, district average 15 seers per rupee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

Prices stationary. A few cases of cholera reported.                                                                                                                                           |
| <b>General Remarks.</b> —There has been general rain during the week, and agricultural prospects are favourable in all districts; more rain is wanted in Moorshedabad. Autumn crops and sugarcane are generally very promising, except in a few localities where some damage has been done by floods; transplanting of late rice progresses well; harvesting of early rice and jute has begun in parts of Northern and Eastern Bengal: in spite of the present good prospects of the crops, the price of rice remains high and shows no signs of falling. General health continues to be fair. The earthquake on the morning of the 14th instant was felt all over the Lower Provinces. |                                                |                                                                                                                                                                                                                                    |

E. C. BUCK,  
Secretary to the Government of India.

# SUPPLEMENT TO The Gazette of India.

N<sup>o</sup> 31. {

CALCUTTA, SATURDAY, AUGUST 1, 1885.

## OFFICIAL PAPERS.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

*No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

### GOVERNMENT OF INDIA. PUBLIC WORKS DEPARTMENT. CIVIL WORKS.

#### Irrigation.

#### **REVENUE REPORT OF IRRIGATION WORKS IN SIND FOR 1883-84.**

No. 1681, Simla, July 13, 1885.

RESOLUTION.—By the Government of India, Public Works Department.

#### **Read—**

Letter from the Government of Bombay, No. 97W.I.—216, dated 13th May 1885, submitting the Revenue Report of the Irrigation Department in Sind for 1883-84, and the Resolution of the Government of Bombay thereon.

**OBSERVATIONS.**—The capital expenditure during the year 1883-84, from Productive and Ordinary funds, amounted to R4,42,032 and R39,896, respectively. The total capital outlay up to the close of the year was R1,01,13,681, of which sum R67,74,709 had been spent on Productive Public Works.

2. The gross revenue from all sources was by assessments R28,66,726 and by collections R28,10,861. The revenue due to irrigation works other than agricultural was by assessment R28,66,186 and by collections R28,06,517; against this the maintenance charges, direct and indirect, and including the charges for collection, amounted to R14,58,228. The net revenue calculated on the earnings of the year was therefore R14,07,958. It would, however, appear from paragraph 12 of the Superintending Engineer's report and from paragraph 4 of the Commissioner's memorandum, that some claims for remission were still unsettled at the close of the year, and that deductions from the canal share of the consolidated revenue to the amount of about R80,000 will have to be made in the accounts for 1884-85. This adjustment will not affect the returns from the canals which are classed as Productive—their earnings give a percentage of 4.60 on the capital invested—whilst the return from those works for which Capital and Revenue Accounts are kept was, according to the figures recorded, 15.06 per cent.

3. The area cultivated by the aid of the irrigation works was 1,540,831 acres, of which 178,724 acres were in jaghir estates and are assessed at a lower water rate. The water share of the net consolidated revenue assessed on the 1,362,107 acres of Government land amounted to R31,68,358, which gives a rate of R2.33 per acre. This is again an improvement on the rate per acre recorded in the previous year, and is attributable to the same cause, *viz.*, the progress of the revision of the settlement; and there is no doubt that the improvement will be continuous, as in consequence of the more accurate measurements and assessments of the new settlement full credit will be obtained for the benefits derived from the canals.

4. There were no high floods during the irrigating season, and the distribution of water was rendered more difficult than usual by the fluctuations in the levels of the water in the river, which are described in detail in the report. The area cultivated was for the above reasons less than in the previous year, but compares favorably with the areas recorded for other years in which there were no extraordinary floods. Owing to the absence of high floods the breaches in the protective embankments were few and unimportant. It is very satisfactory to find that the money expended on these extensive embankments has already begun to yield a return, and that lands which have long been allowed to lie uncultivated through fear of the constantly recurring inundations are now again being brought under cultivation. The Superintending Engineer's report shows that steady progress has been made in extending and strengthening these most necessary works along the whole line of the river, and their completion in the immediate future may now be confidently looked for.

5. The working expenses shown in the administrative statement amount, as before stated, to R14,58,228, which gives a percentage of 44 on R33,06,512, which is the total of the gross assessed revenue and hakaba, and a maintenance charge of R0.95 per acre irrigated. It is mentioned in paragraph 16 of the report that there has been an increase in mileage both of Canals and Protective Works in charge of the Department. The length of canals is now 5,701 and of bunds 524 miles.

6. The greatest area irrigated by a cubic foot of water was 74.22 acres on the Desert, and the least 20.70 acres on the Kalri, Canal. The average duty of the canals for which records are given in the Table VIII attached to the report was 38 acres per cubic foot of average discharge. The discharge of the main canals was, as a rule, much less and the duty better than in the previous year.

7. Both the Commissioner and the Superintending Engineer remark on the large balances of canal revenue which remained uncollected at the close of the year, and state that strenuous efforts will now be made to diminish these outstandings, and it is to be hoped that the next report will record a great improvement in this respect.

8. There has again been great delay in the submission of this report. The Superintending Engineer, in his forwarding letter, states that he was unable to complete his report until 2½ months after the due date; but no explanation is afforded by the Government of Bombay of the further delay which has resulted in its reaching this office half a year later than the prescribed date. The Government of India hopes that the Government of Bombay have already taken steps to prevent a repetition of these continually recurring delays.

**ORDER.**—Ordered, that a copy of this Resolution be forwarded to the Government of Bombay, in the Public Works Department, for information.

Also that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay, be forwarded for information to the Governments, Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab, noted in the margin, in the Public Works Department.

Also, that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay, be forwarded to the Department of Finance

and Commerce, and to the Revenue and Agricultural Department, for information.

Also, that a copy of this Resolution, the Resolution by the Local Government, and the memorandum by the Commissioner in Sind, together with the general abstract of financial results, be forwarded to the Publisher of the *Gazette of India*, for publication in the Gazette Supplement.

Also, that a copy of this Resolution be forwarded to Her Majesty's Secretary of State.

HENRY A. BROWNLOW, *Colonel, R.E.*,  
Deputy Secretary to the Govt. of India.

*Resolution No. 97 W. I.—216, dated 13th May 1885, by the Government of Bombay on the Revenue Report of Irrigation Works in Sind for 1883-84.*

Letter from the Superintending Engineer for Irrigation in Sind, No. 325, dated 4th February 1885.

Forwards the Revenue Report of Irrigation Works in Sind for 1883-84 with the usual tables, charts and a copy of the index map of Sind, recently revised at the request of the Commissioner in Sind; and explains the cause of delay in submitting the report.

Memorandum from the Commissioner in Sind, No. 666, dated 20th February 1885.

Forwards the report, with accompaniments, with his observations thereon.

**RESOLUTION.**—The inundation of 1883 was an unfavorable one, as the chart of gauge readings clearly shows, and in consequence the area of cultivation (as shown in Table II) was 1,32,462 acres less than that of the previous year. The difference in the total canal revenue for collection, shown in the same table, was only R31,792—a result which is mainly due to the introduction of the temporary revision settlements; but this, however, does not include any portion of the remissions (R83,093), the claims for which were not disposed of until after the close of the year. On the other hand, the actual realizations on account of hakaba from jaghirs were only R85,130 out of a total sum for collection of R2,05,508, and the balance due was R1,20,378. The outstandings of hakaba in Khelat, R95,174, are far too large, and the Political Agent at Jacobabad should be requested to make arrangements for their clearance.

2. The total area cultivated during the year was 1,540,831 acres, including 178,724 acres of jaghir land; the area of cultivation on which revenue was assessed was 1,362,107 acres, and the irrigation share of net consolidated assessment was R31,68,358 giving an average rate of R2.3 per acre. The gross assessed revenue from all sources was R28,66,726, and the net revenue R14,99,020. The net profit, after paying of interest, from Productive Irrigation works was R55,625.

3. The total amount expended on maintenance and repairs and revenue collection during the year was R13,67,706, which is about the same as in the two previous years, and R2,18,448 more than the average of the four years ending 1880-81. The percentage of expenditure on revenue was 41.56, and the cost of maintenance per acre R0.88, or about 14 annas, which are both reasonable. The percentage of cost of Public Works Establishment on expenditure on maintenance and repairs was 24.37, which is also reasonable.

4. It is satisfactory to find that the cultivation and revenue on the Mithrau and Thar Canals are increasing, and there is every reason to hope that in another year or two, when the protective embankments and the deepening of the Nara Supply Channel are completed, the financial results of the Eastern Nara Works will show a profit. The canal revenue, as shown in Table III, is R43,312 more than that of 1882-83, when it was stated that the minimum had been reached, and the loss during the year under review was only R52,870.

5. Government notice with much satisfaction that the increased expenditure which has been incurred on the maintenance of, and on improvements to, the canals, and the construction of river embankments in Sind for the past three years, has been productive of great good; and that the Commissioner in Sind is confident that the result of the work which has been done by the Irrigation Department will, in the course of a few years, be a large and steady increase in canal revenue.

6. The report is considerably overdue, as explained by the Superintending Engineer for Irrigation in his forwarding letter. Every endeavour should be made to ensure its more punctual submission in the future.

7. Copies of the report, of the Commissioner's endorsement thereon, and of the review of this Government should be forwarded as usual to the Government of India and the Secretary of State.

No. 666 of 1885.

PUBLIC WORKS DEPARTMENT,

COMMISSIONER'S OFFICE,

Camp Tando Adam, 20th February 1885.

Superintending Engineer's No. 325, dated the 4th February 1885, forwarding the Irrigation Report.

Submitted to Government.

2. The inundation was not a good one, "its fluctuating nature being its chief and worst characteristic." The canals, in consequence of the lowness of the inundation, were not well filled, the result being that cultivation was contracted and collections were also affected. Remissions also had to be granted to a considerable extent. One result of the lowness of the inundation was that the protective embankments were not greatly tried and breaches and floods were rare.

3. There was a decrease in kharif cultivation amounting to 84,178 acres and in rabi of 62,007 acres, total 146,185 acres, but the canal revenue for collection was only less than that of the previous year by Rs1,792,—a result mainly attributable to higher rates on lands—which, owing to improvements in canals, have been converted into rice lands instead of being classed only as fit for dry crops.

4. The amount of remissions (para. 12 of the report) does not correctly represent the losses on the year's cultivation, as, unfortunately, especially in the Hyderabad District, the Collector failed to dispose of remission claims within the year, and after the close of the year claims amounting to Rs88,093 were admitted, namely, in Hyderabad Rs66,762, in Shikarpur, Rs15,749, and in the Frontier District Rs581. These remissions, however, are not solely on account of lands watered from canals, so the exact sum admitted against canal revenue cannot be stated.

5. The table in para. 5 of the report shows the increase or decrease in each Canal Division—the largest increase is in the Fuleli Division—but the greater part of the increase thus shown has since been remitted. The Superintending Engineer has fully explained the causes of increase or decrease in the other Divisions and they call for no remark. It is unnecessary for the Commissioner to follow the Superintending Engineer in his account of the different canals. All details have been very fully given. Suffice it to say that the financial results (para. 19) are satisfactory.

6. The work of recent years done by the Irrigation Department has been productive of great good, but the full return from the work done cannot be expected at once, especially in a country like Sind where agricultural labourers are not easily obtained. The revenue realizations of the year to which the

report refers, though less than those of the previous year, yet illustrate how much has been done, as with a low inundation the revenue would have shown a much larger decrease but for recent improvements to canals. Land too in the rear of the protective embankments is now being fast got ready for cultivation, and the Commissioner will be very much surprised if, in the course of a few years, there is not a large and steady increase in realizations. He has only recently travelled along the Thar and also the Nara protective embankments and was struck with the change in the country since he saw it three years ago. Everywhere lands were being got ready for the plough, and what was very satisfactory to notice was that the people were much better off than formerly. Before the erection of the protective embankments, cultivation was risky: one year splendid returns, the next sad losses; and this condition of things affected the morale of the people. Now with protection from floods they are becoming steady cultivators, working harder, and more anxious for improvements; and what is true of the Nara valley is, the Commissioner believes, true of every part of Sind, and that the protective embankments, if properly maintained, will do much to improve the condition and raise the character of the agricultural population. Much still remains to be done, but the results of the year, as shown in this report, show that satisfactory progress is being made.

H. N. B. ERSKINE,

Commissioner in Sind.

## General Abstract of Financial Results of Irrigation

(a) Balance of Rs. 1,983, debited to Agricultural Works in Fuleli District on account of establishment employed for surveys in the Sind District, as it does not pertain to any Irrigation Works in Sind Province.

N. B.—(1) Direct outlay under Working Expenses includes share of cost of collection in the Civil Department.  
(2) Interest charges on account of works other than Productive Public Works have been omitted, as they have been eliminated from the administrative account per Government of India's Circular No. IV. P. W., dated 1st May 1884, communicated in G. R. No. 223 of 23rd idem.

N.B.—As regards the figures in column "Total receipts from 1st April 1885 to date," audited figures have been availed of as far as possible.  
(a) Return not received.  
(b) Total receipts from 1st April to 30th June 1884.

(c) Total receipts from 1st April to 30th June 1885.  
(d) Total receipts from 1st April to 26th June 1884.  
(e) Total receipts from 1st April to 27th June 1885.  
(f) Total receipts from 1st April to 20th June 1885.  
(g) Including Howari-Ferozepore State Railway.

SIMLA,

11th JULY 1885.

FRED. FIREBRACE, Major, R.E.,  
Under-Secretary.

GOVERNMENT OF INDIA.

## DEPARTMENT OF FINANCE AND COMMERCE.

No. 170 Accounts and Finance, dated 20th June, 1885.  
Stores

From—The Government of India,  
To—The Secretary of State for India.

In continuation of our Despatch of the 28th April, 1884, No. 117, we have the honour to forward, in original, returns showing the expenditure on stores for the year 1883-84, and the extent to which articles of Indian manufacture were substituted for stores imported from England for the public service in India during the year.

2. A classified abstract, compiled from these returns, is appended to this Despatch. For facility of comparison, the figures for the year 1882-83 have also been entered in the abstract.

3. The figures in column 4 of the abstract show that considerable progress has been made in the substitution of Indian manufactured stores for imported stores, such substitution having been 80 per cent. larger in 1883-84 than in 1882-83. At the same time we think it necessary to say that the figures cannot be taken to be absolutely accurate, although no doubt they afford a tolerably fair indication of the progress made by Indian industry in supplying the wants of the public service.

4. The principal articles are the following:—

*Building and engineering materials, Rs. 41,474.*—Cement made in India forms an important item under this head, the value of cement purchased being Rs. 37,782.

*Cabinetware and furniture, Rs. 26,271.*—The Rajputana-Malwa State Railway purchased articles to the value of Rs. 21,082.

*Canvas, Rs. 78,211.*—The principal items composing this amount are—

|                                         | Rs.    |
|-----------------------------------------|--------|
| Rajputana-Malwa State Railway (paulins) | 44,761 |
| Tirhoot State Railway (paulins)         | 31,959 |

Under this head a saving of Rs. 3,041 is said to have been effected by the Tirhoot State Railway.

*Chemical products and drugs and medicines, Rs. 1,08,363.*—The most important items composing this amount are—

|                           | Rs.    |
|---------------------------|--------|
| Bengal Medical Department | 43,230 |
| Madras Medical Department | 37,318 |
| Bombay Medical Department | 18,519 |
| Government of Bengal      | 8,860  |

Total ... 1,07,927

By substituting the chinchona febrifuge for quinine, a saving was effected during the year to the extent of nearly Rs. 2,57,939 in the Presidency of Bengal alone. The financial result of the use of the febrifuge in the Presidencies of Madras and Bombay has not been ascertained.

*Coal and Coke, Rs. 15,86,047.*—The largest consumers of country coal and coke were—

|                                                      | Rs.              |
|------------------------------------------------------|------------------|
| Public Works Department, North-Western Provinces ... | 14,526           |
| Public Works Department, Bengal ...                  | 27,046           |
| Public Works Department, Punjab ...                  | 13,497           |
| Wardha Coal State Railway ...                        | 38,693           |
| Nagpur-Chhattisgarh Railway ...                      | 1,13,877         |
| Rajputana-Malwa State Railway ...                    | 13,33,281        |
| Government of Bengal ...                             | 9,167            |
| Mint Master, Calcutta ...                            | 5,296            |
|                                                      | <u>15,55,383</u> |

*Cordage and rope of vegetable fibre, Rs. 38,598.*—The consumption of locally made articles of this class has increased from Rs. 14,517 in 1882-83 to Rs. 38,598 in 1883-84. Further improvement may be expected under this head.

*Cotton, linen, and silk goods, Rs. 1,26,281.*—There was an increase of over Rs. 50,000 under this class of articles as compared with the preceding year. The principal items were—

|                                    | Rs.    |
|------------------------------------|--------|
| Bengal Commissariat Department ... | 29,259 |
| Madras Commissariat Department ... | 15,931 |
| Settlement of Port Blair ...       | 35,910 |
| Government of Bombay ...           | 9,191  |
| Rajputana-Malwa State Railway ...  | 23,580 |

There was a saving of Rs. 22,754 in the Bengal Commissariat Department and Rs. 1,270 in the Madras Commissariat Department by using country-made sheeting.

*Hardware and cutlery, Rs. 56,293.*—The most noticeable items are—

|                                                                  | Rs.    |

*Malt liquor, Rs. 20,98,676.*—In 1882-83 the cost of Indian-brewed beer amounted to Rs. 18,24,835. The increase in the year 1883-84 is due to the extended issue of Indian beer to the regiments in Northern India and in Madras. A saving of Rs. 7,72,763 is estimated by the issue of Indian beer in

1883-84 in Bengal. In the return for Madras, however, a loss amounting to Rs. 4,845 is exhibited out of a transaction of Rs. 1,03,282.

*Machinery, Rs. 22,960.*—The Public Works Department in British Burma purchased locally made machinery of the value of Rs. 16,604, principally consisting of boring apparatus, capstans, mortar mills, and road rollers.

*Metals, Rs. 5,96,606.*—The important items are—

*Brass.*—Ordnance Department, Bengal, Rs. 47,200; Public Works Department, Bengal, Rs. 20,310.

*Copper.*—Military Works Department, Rs. 5,059.

*Iron.*—Telegraph Department, Rs. 1,44,740; Public Works Department, North-Western Provinces, Rs. 72,175; Assam, Rs. 9,074; Bombay, Rs. 6,991; British Burma, Rs. 47,757; Bengal, Rs. 33,116; Rajputana-Malwa State Railway, Rs. 18,077; Tirhoot State Railway, Rs. 1,22,383.

*Oils, Rs. 1,50,003.*—Compared with 1882-83, the consumption of oil of Indian manufacture increased in 1883-84 by Rs. 1,32,672.

*Paper and pasteboard, Rs. 3,79,060.*—The chief purchasers of articles of this class are the Governments of Bengal (Rs. 3,55,427), Madras (Rs. 5,505), and Bombay (Rs. 16,507).

In the year under review there was a total increase of Rs. 12,218 and a saving of Rs. 35,650. Arrangements are being made by the Government of Madras to procure printing paper from the Bally Paper Mills.

*Scientific instruments and apparatus, Rs. 84,009.*—This amount is composed of the following principal items :—

|                                        | Rs.    |
|----------------------------------------|--------|
| Mathematical Instrument Department ... | 17,243 |
| Indian Telegraph Department ...        | 17,522 |
| Medical Department, Bengal ...         | 25,247 |
| Medical Department, Madras ...         | 19,491 |

There was a saving under this head of Rs. 12,012.

*Stationery, Rs. 4,946.*—By the use of country-made writing ink a saving of Rs. 1,090 was effected in the Presidency of Madras.

*Tools and plant, Rs. 2,33,811.*—Locally made articles of this class are being largely used by most of the Departments concerned.

*Wood: articles made of, Rs. 9,85,217.*—In 1882-83 local purchases amounted to only Rs. 2,62,466.

*Woollen goods, Rs. 1,01,854.*—As far as can be ascertained, there was an estimated saving under this head of Rs. 35,194. The principal consumers of woollen goods were—

D. M. BARBOUR,  
Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

## REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 29th JULY 1885.

GENERAL REMARKS.—Rain has fallen in varying quantities throughout the Madras Presidency, but more is wanted in Bellary, Tanjore, and Madura. General prospects are fair, and have improved in Bellary and Anantapur; in Madura prospects are reported to be discouraging. Harvesting continues in some districts. From Mysore the reports are less favourable than last week: more rain is much needed for recently sown dry crops and for tanks. Good rain is reported from Coorg, where prospects are satisfactory.

In Bombay good rain has fallen in most districts, but more is wanted in parts of Khandesh, Nasik, Poona, Bijapur, and Sholapur. *Kharif* sowings are in general progress throughout the Presidency, and transplanting operations have commenced in places. There has been rain throughout the Berars, the Nizam's Territories, and the Central India and Rajputana States, and agricultural prospects are on the whole promising.

In the North-Western Provinces and Oudh rain has been abundant, and the prospects of the autumn crop are good. In the Punjab and in the Central Provinces good rain has fallen. *Kharif* sowings are in general progress in the former Province and have been completed in the latter, where transplanting has commenced.

In Bengal good rain has fallen during the week, except in parts of the Burdwan and Presidency Divisions, where more rain is wanted for the transplanting of late rice. The prospects of the autumn crops and of sugarcane are good, and a fair outturn is expected from the early rice and jute harvests, which are in progress in Northern and Eastern Bengal. In Assam the weather is seasonable, and the state and prospects of the crops are good.

In British Burma ploughing, sowing, and transplanting are in progress.

Cholera is chiefly prevalent in the Madras and Bombay Presidencies; in other Provinces the public health is generally fair.

Prices are fluctuating in the Punjab, but are generally steady elsewhere. From Bengal no material change is reported.

| Presidency or Province and District. | Rainfall for week under report. | State of agricultural prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| <b>General Remarks.</b> —Good general rain during the week, except in parts of the Burdwan and Presidency divisions, where more rain is wanted for the transplanting of late rice, elsewhere transplanting is proceeding well; prospects of autumn crops and sugarcane continue to be good; harvesting of early rice and jute progressing in Northern and Eastern Bengal, and a fair average outturn is expected. No material change in prices. Public health generally fair in Bogra, Rungpore, Rajshahye, and Serajganj. Several slight shocks of earthquake have been felt since the severe shock of the 14th instant. |                                                           |                                                                                                                                                                                                                                                                      |

E. C. BUCK,  
Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR  
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING  
LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE  
ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at the Viceregal Lodge, Simla, on Wednesday, the 29th July, 1885.

## PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,  
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.

His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.

The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

## CENTRAL PROVINCES CIVIL COURTS BILL, 1885.

The Hon'ble MR. ILBERT introduced the Bill to amend the Law relating to Civil Courts in the Central Provinces, and moved that it be referred to a Select Committee consisting of the Hon'ble Sir S. C. Bayley, the Hon'ble Mr. Hunter and the Mover, with instructions to report within two months.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Central Provinces Gazette* in English and in such other languages as the Local Administration thinks fit.

The Motion was put and agreed to.

## BURMA COURTS BILL, 1885.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to amend the Burma Courts Act, 1875, and section 360 of the Code of Civil Procedure, be taken into consideration. He explained that the Report was a very short one, and merely stated that the Bill as introduced had been approved by the local authorities and consequently did not call for any modification.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill be passed.

The Motion was put and agreed to.

## NORTHERN INDIA FERRIES ACT, 1878, AMENDMENT BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to amend the Northern India Ferries Act, 1878. He said:—

"The object of this Bill is to remedy a defect which may almost be described as one of drafting and nothing more, and which experience has brought to light. In section 3 of the present Ferries Act XVII of 1878, the word 'ferry' is defined as including a bridge-of-boats and other things; but by some accident

section 13 provides that 'no person shall, except with the sanction of the officer charged with the superintendence of a public ferry, keep a ferry-boat for the purpose of plying for hire to or from any point within a distance of two miles from the limits of such public ferry'; and section 26 imposes a penalty for contravening section 13. The result of this is that, although the definition of 'ferry' is perfectly correct, the penalty clause is only applied to a person who plies a ferry-boat without a license, and it has been found that individuals are sufficiently ingenious to make a bridge-of-boats within the limits of a public ferry, and that they cannot be touched in any way. This defect it is now proposed to remedy; the proposed amendment is undoubtedly in accordance with the intention of the original Act.

"I may here mention a small matter which we intend to take this opportunity of providing for; that is, we propose to take power for leases being given by or with the sanction of the local authorities, otherwise than by public auction and for long terms. This is necessary in order to meet the case of ferries leased to Railway Companies on special agreements for long terms."

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 5th August, 1885.

D. FITZPATRICK,

SIMLA;

The 31st July, 1885.

Secretary to the Government of India,

Legislative Department.

SUPPLEMENT TO  
**The Gazette of India.**
