

SUPPLEMENT TO

The Gazette of India.

No. 1.] CALCUTTA, SATURDAY, JANUARY 2, 1886.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 30th DECEMBER 1885.

GENERAL REMARKS.—During the week under report there has been little rain except in the Madras Presidency, Mysore, and Coorg.

In Madras, Mysore, and Coorg the standing crops are generally in good condition, and the paddy and *ragi* harvests are in progress.

In Bombay more rain is wanted for the *rabi* in parts of Khandesh and Ahmednagar. The *kharif* harvest and *rabi* sowings have been almost completed. In the Berars, Central India, and Rajputana the *rabi* generally promises well.

In the Central Provinces the crops are doing well except in Nagpur and Raipur, where they have been slightly damaged by the recent rains previously reported. The condition of the *rabi* crops is very favourable in the North-Western Provinces and Oudh, and is generally good in the Punjab.

In Bengal the *amun* is yielding a good outturn, and the prospects of the *rabi* have been improved everywhere by the recent rain. The cultivation of *boro* rice is going on. In Assam the *sali* harvest continues and prospects are generally good.

The rice harvest is in general progress in British Burma.

The public health is on the whole good.

Prices are falling in Coorg and in Bengal and rising in Lucknow in the North-Western Provinces. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Dec. 30th)		
Bellary	(Average) ·06	Early dry crops much improved, but in Kadligi and Harpanhalli oil seeds suffering from insects, and white *cholam* in Kadligi from disease; wet crops good; harvest paddy and dry crops, outturn up to average. Fever in parts of two taluks.
Kurnool	Average of last week since revised 1·16; this week ·32.	Standing early crops injured in parts by recent unseasonable rains; harvest paddy, yield below average. Smallpox in one taluk and cattle-disease in two.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Ganjam	(Average) 3·16	Harvest paddy, outturn below average. Smallpox in one taluk and cattle-disease in three; twelve deaths from cholera.
Kistna	(„) ·98	Standing crops generally good; harvest dry paddy, outturn below average. River 2 feet 3 inches over Anicut. Fever prevalent, smallpox slight, three deaths from cholera.
Chingleput (Madras)	(„) ·08	Standing crops good; harvest paddy in parts of two taluks, outturn below average. Fever in two taluks and cattle-disease in three.
Coimbatore	(„) 2·15	Standing crops generally good, but dry crops damaged by insects and excessive rain in parts of two taluks; harvest paddy and dry grains in parts, outturn about average. Fever in Pollachi and cattle-disease in two villages.
Tanjore	(„) 1·87	Standing crops generally good; harvest paddy and *ragi*, outturn below average.
Madura	Average of last week since revised 2·85; this week ·80.	Fever prevalent; cattle-disease in Madura taluk.
Malabar	(Average) 1·37	Second crop cultivation in fair condition. Slight smallpox in seven taluks and fever and cattle-disease in two, 12 deaths from cholera.
Travancore	1·35	Paddy in ear thriving. Fever in parts. *General Remarks.*—General prospects fair, continue favourable in Bellary and Anantapur.
Bombay—(Dec. 30th)		
Karachi	*Nil*	River at Kotri on 28th, 3 feet 10 inches against 5 feet 3 inches on same date last year. *Kharif* harvesting completed; *rabi* sowing mostly completed. Fever in 11 and cattle-disease in four talukas. Prices—wheat, red-rice and *bajri* in Karachi 26, 30, and 34, in Sakro *nil*, 38 and 46, in Mirpur Batoro 24, 46, and *nil*, and in Kotri 28, 40, and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	*Rabi* good. River at Kotri on 28th 3 feet 10 inches against 5 feet 3 inches same date last year. Fever in seven and cattle-disease in one taluka. Wheat 28, *jowari* 40, *bajri* 40, red rice 26, and white rice 18 pounds per rupee.
Ahmedabad	*Nil*	Standing crops healthy. Fever in Sanand taluka. Wheat 37 and *bajri* 35 pounds per rupee.
Baroda	*Nil*	Public health good; cattle-disease in Sangod and Kalol talukas. Crops in good condition; opium and *rabi* sowings continue.
Surat	*Nil*	Standing crops healthy; reaping of *jowari* progressing. Smallpox among cattle in Bulsar taluka; fever in Bardoli and Bulsar talukas. *Jowari* 38 and *nagli* 46 pounds per rupee.
Nasik	Baglan ·15	*Kharif* and *rabi* crops in fair condition throughout the district, but in some parts of Yeola and Malegaon both these crops have suffered slightly owing to want of rain. Cholera at Malegaon, nine attacks, four deaths; fever and ague in Dangi and in parts of Kalvan. Wheat 31½, *bajri* 33½, rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 3° cool on 23rd, rose to 4° warm on 26th and was 2° warm from 27th to 29th Pressure of vapour excessive except on 23rd and 24th. Abnormal wind south-easterly on 26th. Normal on all other days.
Poona	*Nil*	*Rabi* crops doing well in all talukas except in Haveli. Sixty-two cholera cases in taluka Haveli and Poona city, 33 deaths; cattle-disease prevalent in taluka Junnar. Prices of *bajri* 32 and *jowari* 40, in Poona *bajri* 34 and *jowari* 39 pounds per rupee.
Ahmednagar	*Nil*	Rain wanted in Parner and Shrigonda. Crops and public health good. Slight fever and cattle-disease in Akola. *Jowari* 53 pounds and *bajri* 44 pounds per rupee.
Sholapur	*Nil*	*Kharif* harvest nearly completed; *rabi* crops good. *Jowari* 49 pounds 16 tolas and *bajri* 43 pounds 24 tolas per rupee. Cholera 11 cases, 4 deaths.
Dharwar	Gadar 1·05; slight in Bankapur, Ranibennur, and Kod talukas.	Reaping of rice and early *jowari* nearly completed; cotton good, wheat, gram, and other crops slightly blighted in some places. Slight fever and cattle-disease in Kalghatgi, Hangal, Bankapur, and Mugud. Rice 20 to 30 and *jowari* 43 to 64 pounds per rupee.
Kanara	*Nil*	Sowing second crop commenced; betel-nut harvest above Ghat. Fever, small pox, and slight cattle-disease in Haligal, subsiding in Karwar, Sirsi, Yellapur, and Mundgod. Common rice in Karwar 14, in district average 13⅛ seers per rupee. Weather clear.
Rajkot	*Nil*	Weather cold. Public health generally good. Wheat 34, *bajri* 34, and *jowari* 39 pounds per rupee. *General Remarks.*—River continues low in Sind. Slight rain in parts of four districts, more wanted for *rabi* crops in parts of Khandesh and Ahmednagar. Standing crops suffering from drought in two talukas of Nasik and from blight in parts of Dharwar, Belgaum, and Bijapur. Reaping of *kharif* and sowing of *rabi* crops almost completed. Fever in parts of 13, cattle-disease in parts of 12, and cholera and smallpox in parts of three districts.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—(Dec. 29th)		
Chittagong	*Nil*	Weather cold. Harvesting of *aman* nearly finished; prospects of winter crops generally fair. Prices steady. Public health good.
Dacca	*Nil*	*Aman* being harvested; prospects of winter crops good; *boro* paddy being planted. Public health generally good.
24-Pergunnahs	*Nil*	Prospects of *aman*, except on low inundated lands, continue good; harvesting going on briskly, yield estimated at about 12 annas; winter crops doing well. Sporadic cholera reported from Diamond Harbour, Baraset, and Basirhat sub-divisions.
Khoolna	*Nil*	Weather cool. *Aman* harvest continues; prospects good; winter crops doing well; planting of *boro* paddy commenced in some places. Price of rice falling. Some cholera; public health fair.
Moorshedabad	*Nil*	Harvesting of *aman* rice still in progress, *kalai* in places harvested with good outturn; prospects of all other crops good. Public health good.
Pubna	*Nil*	Weather cool. *Aman* harvest nearly finished; prospects of winter crops good. Fever and cholera in Serajganj abating.
Dinagepore	*Nil*	Weather cool and foggy. Half of *aman* crop and sugarcane harvested; *rabi* prospects good. A few cases of cattle-disease reported from two stations; general health good, except as regards cholera, which is prevalent in several thanas.
Rungpore	*Nil*	*Aman* being harvested; winter crops doing well. Public health good.
Midnapore	*Nil*	Weather unusually cold. Prospects fair. Public health normal.
Burdwan	*Nil*	*Aman* outturn very good; *rabi* prospects also good. Public health fair.
Bhagulpore	*Nil*	Rice harvest nearly finished; *rabi* crops much improved. Cholera decreasing.
Monghyr	*Nil*	Poppy prospects continue favourable
Purneah	*Nil*	Prospects of crops good; rice mostly harvested. Cholera almost disappeared; fever moderate.
Durbhanga	*Nil*	Harvesting of paddy still going on; prospects of *rabi* continue promising; tobacco and poppy look well. Prices stationary. Public health generally good.
Mozufferpore	*Nil*	Prospects of poppy favourable; plants look healthy and strong.
Sarun	*Nil*	Poppy prospects excellent; late rain has done much good.
Chumparun	*Nil*	Harvesting of paddy in progress; prospects of *rabi* and poppy crops continue good. Prices of food grains have fallen slightly. Public health fair.
Patna	*Nil*	Harvesting of paddy going on; *rabi* and poppy doing well. Public health good.
Gya	*Nil*	*Rabi* crops good; poppy recovering from injurious effects of recent wet and cloudy weather. Good fall in price of common rice. Public health good.
Shahabad	*Nil*	Prospects of poppy greatly improved by last rain, but some damage done where water has lodged. Clear weather and westerly wind wanted to prevent blight.
Hazaribagh	*Nil*	Weather cold and seasonable. Rice harvest nearly finished; *rabi* and poppy prospects generally favourable. Public health generally good.
Cuttack	*Nil*	Weather very cold. Reaping of *sarad* rice going on briskly; *rabi* growing well. Price of rice unchanged. Cholera and fever severe in some parts. *General Remarks.*—No rain during the week. *Aman* harvest is proceeding, and except in the deeply inundated parts, the yield is good. Cultivation of *boro* rice is going on. Prospects of *rabi* crops everywhere and of poppy in Behar and Hazaribagh generally improved by the recent rain. The price of rice continues to fall in some districts with the appearance of new produce, and is steady in other districts. General health is fair, except in Tipperah where cholera is increasing and becoming epidemic, and in some parts of Cuttack where both cholera and fever are prevalent.
N. W. Provinces and Oudh		
Benares (Dec. 30th)	*Nil*	Weather cold. Prospects continue good; sugarcane being cut. Supplies sufficient, but owing to there being less import of food grains during the week than usual, prices have slightly risen. Public health is good and there is no cattle-disease.
Gorakhpore („ 28th)	*Nil*	Weather and rainfall favourable for *rabi* and poppy sowings. Prices stationary. Health good.
Banda („ 29th)	*Nil*	*Rabi* promising well. Rain has increased the cold. Prices stationary. Health of people and cattle good.
Fyzabad („ „)	*Nil*	Weather clear. *Rabi* and opium crops are in general promising well. Markets well supplied. Prices fairly stationary. General health fair.
Lucknow („ 28th)	*Nil*	Weather clear; west winds prevalent. *Rabi* prospects very favourable; poppy plants appear very healthy. Market well supplied. Prices rising. Fodder very dear. Health of people good; no cattle-disease.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Rae Bareni (Dec. 28th)	*Nil.*	Weather sometimes cloudy. *Rabi* crops flourishing. Markets full. Prices show a little rise in wheat, *arhar*, and gram. General health fair.
Partabgarh („ 29th)	*Nil*	West winds. Very little illness. Prospects good. Owing to the rain the seed in a large area of unirrigated land has germinated. Sugarcane crushing has commenced. Prices steady.
Allahabad („ „)	*Nil*	Weather clear and very cold. Crop prospects very good. Markets well supplied. Prices show a tendency to fall. Condition of men and cattle good.
Cawnpore („ 28th)	Rain in six parganas from ·20 to ·90	*Rabi* crops flourishing; poppy plants healthy. Prices have slightly risen. A little fever in two tahsils.
Ballia („ 27th)	*Nil*	Weather cold; sky clear; winds westerly. *Rabi* crops flourishing. Markets full. Public health and condition of cattle good.
Farakhabad („ 29th)	*Nil*	Prospects much improved by last week's rain; poppy crop flourishing. No change in prices. Health of people fair.
Sitapur („ „)	*Nil*	Weather clear with west wind. *Rabi* crops promising; poppy crops healthy and strong. Prices stationary. Health of people good.
Bareilly („ „)	*Nil*	Weather very cold but seasonable. Crops all doing well. Prices almost stationary. Public health good. No cattle-disease.
Kumaon („ „)	*Nil*	Weather fine. *Rabi* crops doing well. Prices stationary. General health good. Cattle-disease continues in parts of the district.
Agra („ 28th)	*Nil*	Well irrigation continues. *Rabi* thriving. Prices steady. Health good.
Jhansi („ „)	*Nil*	*Rabi* crops doing well. Prices nearly stationary. Health good.
Meerut („ 29th)	*Nil*	Weather bright and cold. Crops flourishing. Supplies ample. Prices stationary. Health good.
		General Remarks.—Rain has ceased, having however done much good to *rabi* and opium crops. Prospects good. Supplies ample. Prices stationary save a rise in Lucknow where fodder is also rising. Health of people and cattle good.
Punjab—(Dec. 30th)		
Delhi . (Dec. 29th)	*Nil*	Health fair. *Rabi* progressing. Prices stationary.
Hissar . . .	*Nil*	Health good. *Kharif* being winnowed. Prices stationary.
Umbaila . . .	*Nil*	Health good. *Rabi* flourishing; prospects good. Prices somewhat falling.
Jullunder . . .	*Nil*	Health good. Prices falling.
Amritsar . . .	*Nil*	Health and crops good. Prices stationary.
Sialkot . . .	*Nil*	Health good. Crops promising. Prices stationary.
Ferozepore . . .	*Nil*	Health and crops good. Prices stationary.
Lahore . . .	*Nil*	Health good. Prospects improved. Prices stationary.
Rawalpindi . .	·20	Health good. *Rabi* sowings in progress. Prices stationary.
Mooltan . . .	*Nil*	Health good. Crops growing. Prices rising.
Dera Ismail Khan .	*Nil*	Cholera in Chandwan; fever in city. Crop prospects fair. Prices stationary.
Peshawar . . .	·10	More rain wanted. Health fair. Prices rising.
		General Remarks.—Slight rain in the Rawalpindi and Peshawar districts. Health of the province good. *Rabi* crops progressing. Prices generally stationary.
Central Provinces—(Dec. 30th)		
Nagpur . . .	*Nil*	Weather cool. Crops injured by recent rain; rice and *jowari* being cut. Fever prevalent; cattle-disease in parts. Prices steady.
Jubbulpore . . .	*Nil*	Weather clear and cold. Crops excellent. Fever prevalent. Prices steady.
Saugor . (Dec. 29th)	*Nil*	Weather clear and cold. Prospects good. Slight cholera. Prices stationary.
Seoni . . .	*Nil*	Weather clear and cool. Prospects favourable; *kharif* threshing in progress. Fever very prevalent. Prices stationary.
Hoshangabad . .	*Nil*	Weather cool. Prospects good. Cattle-disease in parts. Prices stationary.
Khandwa . . .	*Nil*	Weather slightly cloudy. Crops doing well. Health good; cattle-disease in places. Prices stationary.
Raipur . . .	*Nil*	Weather cold and clear. Prospects good; *kharif* harvest in progress. Prices stationary.
Sambalpur (Dec. 26th)	2·40	Weather cold. Harvest in progress. Fever in places. Prices steady.
		General Remarks.—There has been rain in Sambalpur, elsewhere weather clear and cloudy. Crops favourable except in Nagpur and Raipur, where slight damage is reported by the late rain. Fever in places. Prices steady.
British Burma—(Dec. 30th)		
Akyab (Dec. 26th)	0·02	Total rainfall 190·40. Slight cholera in one circle; cattle healthy. Reaping continues.
Bassein . . .	. . . .	Public health good; cattle-disease severe in one township, slight in other parts. Reaping progressing.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—*contd.*		
Rangoon . . .	. . . .	Public health and health of cattle good.
Amherst (Moulmein) (Dec. 19th)	. . . .	Public health good; cattle healthy. Reaping progessing.
Tavoy („ „) & („ 26th)	. . . .	Public health and health of cattle good. Reaping and gathering of the crops progressing.
Pegu . . .	. . . .	Public health and health of cattle good. Crop prospects excellent. Reaping much delayed in consequence of local disturbances.
Henzada . . .	. . . .	Public health and health of cattle good. Reaping progressing. Crops reported indifferent in several parts of the district.
Toungoo . . .	. . . .	Public health and health of cattle good. Reaping going on.
Thayetmyo . . .	. . . .	Cholera slightly prevalent; cattle disease prevailing in two town ships. Reaping nearly finished.
		General Remarks.—Slight cholera reported in two districts and cattle-disease in three districts; elsewhere health of men and cattle good. Crop prospects good in all districts except Tharrawaddy and Prome, where the crop is fair and in Thayetmyo where it is poor.
Assam—(Dec. 30th)		
Gauhati . . .	*Nil*	Weather seasonable. Public health fair. Reaping of *sali* still in progress; gathering of *matikalai* and *mugh* continues.
Sylhet . . .	*Nil*	Prospects of tea and other crops good. Cholera prevails in places.
Cachar . . .	*Nil*	Weather cold. About half the area of *sail* crops reaped; common rice 16½ seers per rupee. Six deaths reported from cholera from sadr station.
Dibrugarh . . .	*Nil*	Weather seasonable. Reaping of *sali* crop continues; *matikalai* being gathered. District healthy.
Mysore and Coorg—(Dec. 30th)		
Bangalore . . .	Slight rain has fallen in parts of the State. ·80 at Tumkur.	Crops generally in good condition. Harvesting of *ragi*, paddy and other grain crops in progress. Prospects fair. Public health good. Smallpox and fever continue in parts. No material change in prices.
Mysore . . .	·77	
Mercara . . .	·68	Rice harvest in progress. Price of food grains slightly fallen. Prospects of season and public health good.
Berar and Hyderabad—(Dec. 30th)		
Amraoti . . .	. . . .	Weather clear. Crops in good condition; cotton picking continued. Wheat 22 and *jowari* 26 seers per rupee.
Akola . . .	. . . .	Weather cool. *Rabi* in good condition; cotton picking and *jowari* cutting resumed.
Central India States—(Dec. 30th)		
Indore . . .	*Nil*	Weather warmer than last week. Health good. Prices steady.
Mofar (Gwalior) . .	*Nil*	Weather seasonable. Prospects good.
Sutna . . .	*Nil*	Weather clear and cold. Health and prospects good.
Goona . . .	*Nil*	Weather clear and cold. Prospects of *rabi* crops and opium good.
Agar . . .	*Nil*	Health and opium prospects good.
Sehore . . .	*Nil*	Weather clear. Crops good, being much improved by late rains. Health good.
Nowgong . . .	·09	Total rainfall 44·47. Weather cold.
Rajputana—(Dec. 30th)		
Abu (Dec. 30th)	*Nil*	Health good. Weather clear and colder.
Sirohi („ 28th)	*Nil*	Tanks drying. Wells full; health and crops good. Weather fine and cool.
Marwar („ 26th)	*Nil*	Tanks almost full. Fever and smallpox still prevails. Cold intense. Prices stationary.
Kherwara („ 28th)	*Nil*	Tanks and wells fair. Crops promising, but very poor prospects for unirrigated crops owing to scanty rainfall. Health good. Prices stationary. Weather cold and seasonable.
Partabgarh („ 27th)	*Nil*	Tanks and wells very low. Crop prospects and health good. Prices stationary. Weather clear.
Meywar („ 28th)	*Nil*	Tanks and wells low. Crops average. Smallpox prevalent. Prices stationary. Weather seasonable.
Jhalawar („ 25th)	*Nil*	Recent rain has done much good to crops throughout the State. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—*contd.*		
Kotah (Dec. 26th)	*Nil*	Tanks and wells nearly full. *Rabi* prospects excellent. General health good, but a good deal of smallpox in city. Prices falen.
Harowti („ 28th)	*Nil*	Crops good. Weather fine. Health good.
Ajmere („ 29th)	*Nil*	Weather cold and clear. Fever and smallpox continue. Prices steady.
Jeypore („ „)	*Nil*	Weather seasonable. Prospects favourable. Prices stationary. Health good.
Ulwar („ „)	*Nil*	Health and crop prospects good. Prices falling.
Bikanir („ 26th)	City rainfall *Nil* Districts 19th. Slight rain in Loonkaransar and Doongargarh. Nonar . 1·0 Rajgarh . 1·08 Sardarsher . ·05 Bahadran . ·20 Churu . 1·60 Soorutgarh . ·20	Health good. Prices stationary. Weather clear and very cold.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 18th December, 1885.

PRESENT:

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E., *presiding.*
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble H. J. Reynolds, C.S.I.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St. A. Goodrich.
The Hon'ble R. Steel.

ACT XXXVI OF 1858 AMENDMENT BILL, 1885.

The Hon'ble SIR STEUART BAYLEY moved for leave to introduce a Bill to amend Act XXXVI of 1858 (*An Act relating to Lunatic Asylums*). He said that this Act gave power to various authorities to deal with lunatics and to send them when necessary to lunatic asylums. But it limited the power to such asylums as might be within the same Province or Presidency or under the jurisdiction of the same Inspector General as the locality from which the lunatic was sent. A case had arisen in Coorg in which it was expedient to act under the authority given by this law, but Coorg was a fortunate Province which had no lunatic asylum, and there were some other minor provinces, such as Ajmer, which were so far in a similar condition. Under such circumstances it would be obvious that there was no lunatic asylum to which the local authorities could send the lunatic if necessary. The Bill which he had the honour to ask leave to introduce was intended to remove this defect in the law, and to give the necessary power by enabling the Governor General in Council to appoint asylums outside the limits of the Province to which non-criminal lunatics might under such circumstances be sent.

The Motion was put and agreed to.

INDIAN TRAMWAYS BILL, 1885.

The Hon'ble MR. ILBERT moved that the Bill to facilitate the construction and to regulate the working of Tramways be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley, the Hon'ble Messrs. Hope, Goodrich and Steel, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik and the Mover.

He said that he had nothing to add to what he said when obtaining leave to introduce the Bill. It was one of a general and permissive character, intended primarily for those Provinces which had not Legislative Councils of their own, but also capable of being specially applied to such Provinces as Lower Bengal.

The Motion was put and agreed to.

PROVINCIAL SMALL CAUSE COURTS BILL, 1885.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill to consolidate and amend the law relating to Courts of Small Causes established beyond the Presidency-towns. He said that the Courts of Small Causes outside the Presidency-towns were now regulated by the Act of 1865, which declared that, subject to certain provisos, suits cognizable by those Courts should be "claims for money due on bond or other contract, or for rent, or for personal property, or for the value of such property, or for damages, when the debt, damage or demand does not exceed in amount or value the sum of Rs. 500, whether on balance of account or otherwise."

This enumeration was of considerable importance with reference to the law of appeals, because the Code of Civil Procedure provided that no second appeal should lie in any suit of a nature cognizable in a Small Cause Court when the amount or subject-matter of the original suit did not exceed Rs. 500. But the meaning of the language used in the Act of 1865 was far from clear, and there had been several conflicting decisions on its construction; so that the question whether a particular class of suits were or were not suits cognizable by Courts of Small Causes was open to a good deal of doubt. The chief object of the Bill was to remove such doubts by defining more precisely the jurisdiction of Small Cause Courts, and it proposed to do so in the same manner as in the Act recently passed for regulating the Small Cause Courts in the Presidency-towns; that was to say, by enacting that the jurisdiction of the Court should extend to all suits of a civil nature with certain specified exceptions; in other words, by enumerating the matters excluded from the jurisdiction of the Court, instead of enumerating the matters *included* under that jurisdiction. But at the same time, as parts of the Act of 1865 had been repealed and other portions had become obsolete or were of doubtful construction, it was proposed to repeal the Act and re-enact it in an amended form. The numerous decisions which had been given on the sections of the Act had been carefully examined, and he believed the effect of the Bill would be to clear away a vast mass of case-law.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Evans be added to the Select Committee on the Bill to amend and define the law of Testamentary and Intestate Succession to Khojás.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Steel and the Hon'ble Peári Mohan Mukerji be added to the Select Committee on the Bill to provide for the voluntary Registration of certain Births and Deaths, for the establishment of General Registry Offices for keeping Registers of certain Births, Deaths and Marriages, and for certain other purposes.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Evans be added to the Select Committee on the Bill to amend section 265 of the Indian Contract Act, 1872.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Messrs. Quinton, Goodrich and Steel be added to the Select Committee on the Bill to amend the Petroleum Act, 1881.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Messrs. Evans and Steel and the Hon'ble Rao Saheb Vishvanath Narayan Mandlik be added to the Select Committee on the Bill to amend the Indian Registration Act, 1877.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Evans and the Hon'ble Peári Mohan Mukerji be added to the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, the Bombay District Police Act, 1867, the Indian Penal Code and the Prisoners' Act, 1871.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 23rd December, 1885.

S. HARVEY JAMES,
Offg. Secretary to the Government of India,
Legislative Department.

His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble H. J. Reynolds, C.S.I.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St. A. Goodrich.
The Hon'ble R. Steel.

PROVINCIAL SMALL CAUSE COURTS BILL, 1885.

The Hon'ble MR. ILBERT moved that the Bill to consolidate and amend the law relating to Courts of Small Causes established beyond the Presidency-towns be referred to a Select Committee consisting of the Hon'ble Sir S. C. Bayley, the Hon'ble Messrs. Hunter and Quinton, the Hon'ble Peári Mohan Mukerji, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik and the Mover.

The Hon'ble PEÁRI MOHAN MUKERJI said:—"I fully recognise the necessity which has arisen by the progress of legislation during the last twenty years of

amending and consolidating the law relating to Small Cause Courts beyond the limits of Presidency-towns, but it appears to me that if the primary object of the Bill be, as it is stated to be, to remove doubts engendered by conflicting judicial rulings as to the class of suits cognizable by Small Cause Courts, that object will be far from realised by the changes in the existing law which the Bill proposes to make. At present the jurisdiction of Small Cause Courts is confined to four or five classes of suits, but the Bill proposes to extend it to all suits of a civil nature with thirty-eight specified exceptions. What strikes me is that if the meaning of four or five phrases has given rise to a wide divergence of judicial interpretation, how much greater is likely to be the confusion if thirty-eight different exceptions are made subjects for judicial construction? And then it is impossible to contend that these thirty-eight exceptions afford an exhaustive list of the classes of suits which it is desirable should be excluded from the jurisdiction of Small Cause Courts. The fact that the exceptions mentioned in the Presidency Small Cause Courts Act, 1882, are only twenty-three in number and those in the present Bill are thirty-eight shows clearly that the Act of 1882 cannot be taken as a safe precedent and guide, and that it is an extremely difficult task to enumerate all classes of suits of a civil nature. I think the best way to amend the Act by the light of the judicial interpretations would be to incorporate them as explanations or illustrations of the section relating to jurisdiction. It is a suggestion which I venture to hope will receive due consideration by the Select Committee."

The Hon'ble MR. ILBERT said:—"The hon'ble member is quite right in describing the object for which this Bill has been introduced and the mode by which it is proposed to attain that object. The object of the Bill is to remove doubts which have arisen in consequence of conflicting judicial decisions on the construction of the section of the existing Act which defines the jurisdiction of Small Cause Courts in the Mufassal. The mode in which it is proposed to attain that object is by specifying not the matters which are included in but the matters which are excluded from their jurisdiction. I understand the hon'ble member to suggest that the object of the Bill will be better attained not by the process adopted in the Bill but by supplementing the existing law, where necessary, with illustrations or explanations. That is a matter which will very properly fall within the province of the Select Committee, and no doubt due weight will be given to the suggestion which he has made."

The Motion was put and agreed to.

LAHORE TRAMWAYS BILL, 1885.

The Hon'ble MR. ILBERT presented the report of the Select Committee on the Bill to authorize the making, and to regulate the working, of Street Tramways in Lahore.

ACT XXXVI OF 1858 AMENDMENT BILL, 1885.

The Hon'ble SIR STEUART BAYLEY introduced the Bill to amend Act XXXVI of 1858 (*an Act relating to Lunatic Asylums*), and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Ilbert and Quinton and the Mover.

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Saturday, the 2nd January, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Government of India,
Legislative Department.

" " " No. 132 G., dated the 28th April 1884.

OBSERVATIONS.—The subject of the improvement of the staff entertained in each Province to supervise the village records was brought to the notice of all Local Governments and Administrations in the Resolution cited in the preamble which was recorded on the 14th March 1883. The design of that Resolution was thus explained:—

"The object of the present Resolution is to commend to Local Governments and Administrations the desirability of improving, to the utmost extent, the quality of the staff to which the main work of supervision must be entrusted. It is impossible to throw the bulk of this work upon the higher administrative officials. In order to reduce to a minimum the amount of personal testing which must be undertaken by officers of superior position, it is necessary that they should have under them as supervisors of the staff of village accountants men whose competence is fully established and whose honesty can ordinarily be trusted. To the attainment of these objects five conditions appear to be essential:—

"*1st*—The good character and respectability of the candidates.
"*2nd*—Qualification for their duties.
"*3rd*—Adequate pay.
"*4th*—Promotion to higher appointments.
"*5th*—Strict punishment for neglect of duty."

2. The Governor General in Council has learnt with satisfaction from the replies which have been received from Local Governments and Administrations that arrangements have now been made in all temporarily-settled Provinces for the careful selection of candidates with special reference to their fitness for the duties to be performed by them, and for their adequate remuneration. The question of facilitating the promotion of a certain number of deserving officials to higher posts has been taken up in a few Provinces only, because, among other reasons, the arrangements made for their appointment and pay are in most cases of too recent a nature to admit of a practical consideration of the subject. His Excellency in Council is, however, glad to learn that in the Presidency of Madras the post of Revenue Inspectors is now to be included in the schedule of appointments, service in which is held to qualify for a Tahsildarship; that in the North-Westeren Provinces and Oudh, the Board of Revenue has undertaken to see that the claims of Kánúngos to promotion are borne in mind; and that in the Punjab the Government have in accordance with the wishes of the Government of India issued instructions which will tend greatly to increase the

number of Assistant Tahsildars required to fill Kánungoships or similar appointments in the Settlement Department. The circulars* issued with the approval of the Punjab Government are appended to this Resolution for general information.

In conclusion His Excellency in Council trusts that the importance of the subject will continue to be kept in view, and that as the organization of the staff becomes more complete, further steps may be taken towards making the officials responsible for the supervision of the revenue record an integral part of the revenue establishment.

* Nos. 11 and 12, dated the 6th February 1885.

ORDER.—Ordered, that the above Resolution be printed in the Supplement of the *Gazette of India*, and be forwarded to the Local Governments and Administrations noted on the margin for information, and for publication in the Local Gazette; also that a copy be forwarded to the Foreign Department for communication to the Resident at Hyderabad and the Chief Commissioner of Ajmere- Merwara.

True extract,
E. C. BUCK,
Secretary to the Government of India.

Circular No. 11, dated Lahore, the 6th February 1885.

From—R. G. THOMSON, Esq., Offg. Senior Secretary to Financial Commissioner, Punjab,

To—All Revenue Officers.

Patwaris-Kanungos.

Attention drawn to Patwárí and Kánúngo Rules.

IN issuing, with the sanction of Government, the accompanying Patwárí and Kánúngo Rules, the Financial Commissioner desires to call the attention of Deputy Commissioners to the following remarks.

2. The object of the rules is to facilitate and secure—
(i) real efficiency among the Patwárís and Kánúngos;
(ii) improved field to field inspection, and record of the results of each harvest;
(iii) the continuous record in convenient tables of the total results of each harvest and each year's husbandry; these tables being kept first by villages, secondly by assessment circles, and thirdly by tahsíls;
(iv) the punctual record and attestation of all mutations of rights and their prompt incorporation into the Jamabandi;
(v) the cessation of the present practice, under which in numerous cases mutation orders are passed in the absence of the parties, or after calling them away from their villages to the tahsíl office;
(vi) the release of the Tahsíldárs and Náib-Tahsíldárs from a large amount of revenue case work, which, under the procedure hitherto prescribed for such work, ties them to their tahsíl offices, and overburdens their small office establishment with clerical duties;
(vii) and as a consequence, the systematic visiting of each village, either by the Tahsíldár or Náib-Tahsíldár.

3. The rules as now issued have been simplified as compared with the Draft Rules originally circulated for opinion. They have also been carefully translated under Lieutenant-Colonel Wace's personal supervision. They are to be taken as superseding the Patwárís' Manual hitherto in use, and they will have the relation to the rules under the Land Revenue Act, which is explained in paragraphs 1 and 2 of Punjab Government letter No. 215, dated 26th September last, of which a copy is hereto appended.

4. To secure adequate observance of these rules will be a work of some time and labour in every district; and especially it is not intended that where fluctuating assessments are in force, the forms of papers at present in use for record and assessment should be altered too hurriedly, or without reference to the Commissioner of the division. Both in respect of their application to such systems and as regards the general introduction of the rules, the Financial Commissioner will rely on Commissioners and Deputy Commissioners acting with such expedition as is convenient and suitable.

5. In every tahsíl measures should be organized under the immediate supervision of the Tahsíldár for the instruction of Kánúngos and Patwárís in the new rules. No special teacher will be required. The instructor should be the more experienced and intelligent of the Kánúngos, assisted by selected Patwárís. District officers are further requested to take measures for securing a careful and intelligent study of the rules by Tahsíldárs and Náib-Tahsíldárs. For, if the chief officials of each tahsíl do not themselves thoroughly learn the new system, it is not likely that it will be completely carried out by the Kánúngos and Patwárís.

6. If in any district the assessment circles on which the current assessment was framed are considered unnecessarily numerous for the purposes of Rules 113 and 126, the Deputy Commissioner may, with the Commissioner's sanction, throw two or more circles into one.

7. The rules do not give a complete detail of a Kánúngo's duties; see paragraphs 111, 113 and 126. Commissioners are therefore requested to report six months hence what duties should be required of district, field and office Kánúngos, in addition to those stated in the rules.

8. On the subject of the organization of the Patwárí and Kánúngo establishments (Rules 3 and 94), separate circulars are to-day issued.

9. A collection of the recent Resolutions and orders of Government, in compliance with which these rules are prescribed, will shortly be issued in the form of selections from the records of this office.

10. Arrangements are also in progress for supplying to every Patwárí a copy of the Arithmetic and Mensuration Manuals recently compiled in the Settlement Department.

* * * * * *

Extract paragraphs 1 and 2 of Punjab Government letter No. 215, dated 26th September 1884, to the Officiating Senior Secretary to the Financial Commissioner, Punjab.

IN continuation of my letter No. 214* of to-day's date, and in reply to your letter No. 175 of the 5th instant, I am directed by the Lieutenant-Governor to convey approval to the proposal of the Financial Commissioner that the revised rules for Patwárís and Kánúngos be introduced tentatively with a view to criticism and revision after experience of their actual working, pending the enactment of a new Land Revenue Act for the Punjab.

**Vide* Proceedings, Revenue, Nos. 10-13 A, September 1884.

2. Rule 18 of the present Patwárí rules and Rule 8 (7) of the Kánúngo rules, which have the force of law, give the Financial Commissioner power to issue subsidiary instructions regarding the duties of these classes; and as the principal alterations made in the proposed rules, *viz.*, the grading of Patwárís' pay, the appointment of Patwárís, by the Deputy Commissioner, and the limitation of hereditary claims to the post of Patwárí, consist of changes which it has long been admitted are necessary, the Lieutenant-Governor thinks that there need be no hesitation in introducing the whole set of rules as executive orders previous to their being made in part rules having the force of law. The other principal change proposed, *viz.*, that the sanction of the Commissioner of the division should no longer be required to transfers of land to outsiders, had perhaps better be postponed until the final revision of the rules. As soon as a complete copy of the revised rules is submitted to this office, this matter will be reported to the Government of India, in the Department of Agriculture and Revenue, for information. It is understood that only certain portions of the instructions prepared by Colonel Wace will hereafter be embodied in rules having the force of law, and that the remaining portions will form executive orders to be issued by the Financial Commissioner. It would be obviously undesirable to prescribe returns and statements in rules of the first class, as any petty alteration subsequently considered necessary in them would thus require the sanction of the Local Government.

Circular No. 12, dated Lahore, 6th February 1885.

From—R. G. THOMSON, Esq., Offg. Senior Secy. to Financial Commissioner, Punjab,

To—All Revenue Officers.

Patwaris-Kanungos.

Instructions for the re-organisation of the Kánúngo establishments.

In continuation of Circular No. 11 of this date, issuing new Patwári and Kánúngo Rules, and with reference to Chapter IX. of those Rules, the Financial Commissioner, with the sanction of Government, issues the following instructions for the re-organisation of the Kánúngo establishments in the province.

2. The establishment sanctioned for each district is shown in the schedule appended to this circular. The new establishments will involve an increased expenditure of ₹1,28,000 per annum, thereby more than doubling the sum hitherto spent on the agency employed in supervising the maintenance of the village records of the province. The return which will be made for this extra charge will depend very much on the care with which the new establishments are organised. And the Government have, therefore, directed that in appointing the new establishment in each district the following procedure shall be observed.

3. In districts under settlement, including the whole of the Karnál and Ferozepore districts, new establishments may be appointed at once. The Settlement Officer will select suitable men from the existing Kánúngo establishment, from his own Settlement establishment and from the district Pátwarís. Settlement Munserims may be appointed at once to the 25 or 30 rupees grade, if they already draw in the Settlement Department salaries of that amount.

4. In the Muzaffargarh and Mooltan districts, where temporary establishments of full strength have already been organised for Kánúngo work in anticipation of the permanent sanction now received, full effect can be given to the revised scheme at once.

5. In other districts except Kángra (as regards which see paragraph 16 below), the Deputy Commissioner will prepare, in the form annexed, a list of the persons whom he considers suitable, sending it direct to the Director of Settlements and Revenue Records. The Director will then either himself examine these persons, visiting the district for the purpose, or make proposals to the Commissioner of the division for their examination by a suitable Revenue officer. After this examination, the Director will certify to the Deputy Commissioner which of the persons examined are suitable candidates. From the candidates so approved, the Deputy Commissioner will then fill up all vacancies in the establishment sanctioned for his district. And on his reporting through the Commissioner to this office that he has done so, the Accountant-General will be authorised to pass the Kánúngo establishment bills of that district at the strength and rates of the new schedule. A list of the new establishment, in the form (2) appended to this circular, should accompany the Deputy Commissioner's report.

6. The preliminary examination and certificate required by the previous paragraph are not to be understood as taking the place of that required by paragraph 96 (2) of the

new Kánúngo Rules. They are desired by Government as a check upon the too hurried organisation of the new establishments.

7. The Director of Settlements will, on application being made to him, arrange to place, at the disposal of Deputy Commissioners of districts not under settlement, the services of as many Munserims as can be spared. A certain number of candidates have been under training during the past two years in expectation of demands of this nature. Applications under this paragraph should not be addressed to Settlement Officers direct. No Munserims should be appointed to the Kánúngo establishment either pursuant to this paragraph or pursuant to paragraph 3, unless he is a native of a district in the Punjab under Government's direct administration; and, so far as possible, Munserims selected should be natives either of the district to which they are appointed, or of its vicinity.

8. A Settlement Munserim transferred to the Kánúngo establishment may count as service qualifying for field allowances, his previous service as Settlement Munserim; and the Settlement Officer's certificate of his efficiency will be accepted in place of that of the Director of Settlements. This permission is given, in order that a proportion of the best Settlement Munserims may be made available for such appointments.

Kánúngo Rule 96 (5).

9. The arrangements made under paragraphs 3, 4, and 5 of this Circular must in all cases absorb the existing establishment of Kánúngos. If these establishments include men who are not likely to qualify for efficient work, the Deputy Commissioner will deal with such cases on their merits. But ample time should be given to all incumbents who are able and willing to qualify. This instruction applies equally to the Girdáwars appointed in districts recently settled.

The Deputy Commissioner's list (prepared under paragraph 2 of this circular) should include all existing Girdáwars. It is believed that most of these officials are well qualified for the new Kánúngoships, more especially because they were usually selected from the best Patwáris. The Director of Settlements in his examination of the candidates should give especial attention to these Girdáwars; and such of them as, with reference to the above remarks, are approved by him should, in the absence of any clear disqualification of character, be appointed to the new establishment, so far as vacancies can be found for them. They need not be passed over merely on the ground of age.

10. The field allowances provided by paragraph 96 (5) of the rules for half the field Kánúngos of each district are granted as encouragements to continued personal exertion. When a Kánúngo has been awarded an allowance of this kind, it is not intended that it should be withdrawn from him, except on well-considered grounds. On the other hand, such payments will in every case be strictly personal and temporary, being earned from half-year to half-year by work of a specially good and high order.

11. Particular attention is requested to Rule 104. It is of the greatest importance that from the commencement of the new system all Kánúngos should be required to reside within their circles. The discretion which the rule allows to Deputy Commissioners, to permit exceptions to it, should not be exercised except for special local reasons of a public nature. The personal and family necessities of a Kánúngo are in no case to be considered as a reason for his residence outside his circle. Inside each circle an agricultural village (if possible one where there is a *post office*) should be selected, with the Deputy Commissioner's approval for the residence of the Kánúngo; and in the selection of that village and in its change from time to time within the circle, there is no objection to the convenience of the Kánúngo being considered by the Deputy Commissioner, so far as may be consistent with the proper performance of the Kánúngo's official duties. Field Kánúngos should not usually be allowed to reside in large towns, even within their circles. The more closely they can be associated with the agricultural population the better.

12. The Accountant-General will issue instructions as to the procedure for drawing Kánúngos' salaries, field allowances, and stationery allowances.

13. Your attention is requested to paragraph 96 (*g*) of the new Kánúngo Rules, disallowing travelling allowances to field and office Kánúngos. This rule does not apply to district Kánúngos, whose travelling allowance has now been fixed at eight annas a day. A district Kánúngo is not entitled to draw travelling allowance at mileage rates for rapid journeys in his own district, but both district and other Kánúngos are entitled to charge for railway journeys under Chapter X of the Travelling Allowance Code.

14. As regards appointments to future vacancies the particular attention of Deputy Commissioners is invited to paragraph 97 of the rules. In future not only Kánúngoships, but also the posts of Tahsíl Wásil-Báki Navís and Sianavís, should, whenever possible, be filled up from the establishment of Patwáris. Similarly, not only the district Kánúngo, but also the district Wásil-Báki Navís and record-keeper should be appointed by selection from among the Kánúngos. Commissioners are requested to see that this instruction is duly acted up to. Its object is, on the one hand, to improve the prospects of Patwáris, and so raise their respectability and efficiency, and, on the other hand, to secure in the several grades of the Deputy Commissioner's establishment a practical knowledge of revenue duties.

15. From the date on which the new Kánúngo establishment of any district is organised, the payment of salaries or allowances from the Patwáris cess to Naib-Kánúngos, Girdáwars, chief Patwáris, or other supervising officials, is strictly prohibited.

16. As regards the organisation of the new Kánúngo establishment in the Kángra district, separate instructions will be issued to the Commissioner of Jullundur. Pending receipt of these instructions, no action should be taken on the sanction for the Kángra district entered in the schedule hereto appended.

(2) List of Candidates for appointments on the New Kánúngo Establishment,

DISTRICT

Serial number.	Name, father's name, caste, native place, and age.	Appointments previously held, with date.	Examinations passed.	Explanation of candidate's qualifications for the post of Kánúngo, his knowledge of surveying, and previous experience as Kánúngo, or Patwári, or in the Settlement Department.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR 1884-85.

No. 3261, Fort William, 30th December 1885.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of the Punjab, No. 5020I., dated the 17th November 1885, forwarding the Revenue Report of Irrigation works in the Punjab for 1884-85, and the resolution by that Government reviewing the Report.

OBSERVATIONS.—The Capital outlay, exclusive of contributions by Native States for the construction of the Sirhind Canal, amounted at the close of the year under review to ₹5,39,47,419; of which amount ₹2,79,59,329 represent the capital cost of works practically completed and in full operation, and the balance the capital expenditure on works, either under construction, or as yet barely in operation, such as the Sirhind and Swat River canals. The gross revenue assessed during the year amounted to ₹39,76,484, and working expenses of all kinds to ₹21,13,615, leaving a net assessed revenue of ₹18,62,869, or 3·51 per cent. on the total capital outlay to end of the year.

The canals in full work, however, yielded a net return of 6·91 per cent. on the sum of 279·59 lakhs of rupees invested in them. The surplus of net receipt over interest charges up to the end of the year amounted to ₹2,19,60,859.

2. In the following statement the assessments of 1884-85 are compared with those of the previous year, and with the average of the five years ending with 1883-84:—

Canals.	Assessments.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	₹	₹	₹
Bari Doab	13,77,388	13,87,047	13,91,483
Western Jumna	11,40,738	10,90,485	13,21,413
Sirhind	75,240	3,397	...
Inundation	13,82,811	13,73,952	11,74,127
Totals	39,76,177	44,60,881	38,87,023

The decrease in revenue of the Western Jumna Canal is due to a falling off of nearly 200,000 acres in the area irrigated (see para. 5).

3. The working expenses, including indirect charges, amounted to—

Canals.	Working expenses.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	₹	₹	₹
Bari Doab	4,99,607	5,62,330	5,05,495
Western Jumna	4,77,422	4,77,664	4,52,901
Sirhind	1,45,210	17,491	...
Inundation	9,91,376	10,90,169	8,75,028
Totals	21,13,615	21,47,654	18,33,424

The decrease on the Bari Doab Canal is mainly due to a satisfactory reduction in Establishment charges, and that on the Inundation Canals to marked reductions in maintenance and repairs of the Lower Sutlej, Chenab, and Indus Canals.

4. The net assessed revenue therefore amounted to—

Canals.	Net assessed revenue.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	₹	₹	₹
Bari Doab	8,77,781	8,24,717	8,85,988
Western Jumna	6,63,316	12,18,821	8,68,512
Sirhind	—69,970	—14,094	...
Inundation	3,91,435	2,83,783	2,99,099
Totals	18,62,562	23,13,227	20,53,599

The net assessed revenue of the Bari Doab Canal returned 5·5 per cent.; that of the Western Jumna Canal 6·5 per cent.; and that of the Inundation Canals, for which Capital and Revenue accounts are kept, 14·6 per cent. on the capital outlay incurred up to the end of the year.

5. The areas irrigated are compared below:—

Canals.	Areas irrigated.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	Acres.	Acres.	Acres.
Bari Doab	376,762	390,860	387,775
Western Jumna	279,208	472,426	344,690
Sirhind	36,102	5,030	...
Inundation	922,216	783,752	828,386
Totals	1,614,288	1,652,068	1,560,851

The large decrease in the area irrigated from the Western Jumna Canal occurred almost entirely in the "rabi" crop, and was due to heavy rainfall during the autumn of 1884 and further seasonable rain in January of 1885.

The increase on the Inundation canals is fairly distributed over the several systems, and the disproportion between the increase in area of irrigation and in the gross revenue obtained from these canals is due to the latter being composed to a considerable extent of items, such as miscellaneous revenue and contributions from the "Zari-Naga" Fund, which fluctuate independently of the area irrigated.

6. The following statement compares the irrigated areas of various crops with those of the previous year:—

Crop.	1884-85.		1883-84.	
	Acres.	Per cent.	Acres.	Per cent.
Wheat	533,885	33·07	615,836	37·28
Rice	147,402	9·13	142,625	8·63
Millets	184,473	11·43	163,724	9·91
Cotton	186,549	11·56	174,452	10·56
Indigo	147,913	9·16	119,680	7·24
Sugarcane	69,610	4·31	52,810	3·20
Other crops	344,456	21·34	832,941	23·18
Totals	1,614,288	100·00	1,652,068	100·00

The falling off in the irrigation of wheat occured entirely on the Western Jumna Canal, and was caused by abundant rain; the increase in indigo was on the Western Jumna and Muzaffargarh canals.

7. The duty and earnings of each cubic foot of water entering the heads of the permanent canals are compared below:—

Canals.		1884-85.		1883-84.		Average of 5 years ending with 1883-84.	
		Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
Bari Doab	Acres	47·6	115·1	53·0	138·7	57·2	129·6
	Rupees	146·4	250·9	145·5	305·6	167·2	287·5
Western Jumna	Acres	94·0	81·0	74·0	121·0	69·9	82·4
	Rupees	287·0	131·0	211·0	264·0	228·6	192·6

The reduction in the duty obtained from the water during the "rabi" is the natural result of the reduced demand consequent on the good rainfall of late autumn and winter of 1884-85. The explanation given by the Superintending Engineer of the Bari Doab, of the differences between the duty done by the water during the "kharif" on that and the Western Jumna Canal is quite satisfactory.

8. The maintenance charges per acre irrigated are compared below:—

Canals.	Per acre irrigated.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	₹	₹	₹
Bari Doab	1·32	1·44	1·31
Western Jumna	1·71	1·01	1·35
Inundation	1·07	1·39	1·09
On whole area	1·31	1·29	1·18

The increase in the rate per acre on the Western Jumna Canal follows from the maintenance charges having remained constant, while the irrigated area fell off by nearly 200,000 acres.

9. The balance of canal revenue remaining uncollected amounted to R38,372 out of a total demand of R22,07,673; the uncollected balances of April 1st, 1884 and 1883, having amounted to R36,945 and R42,992 respectively.

10. The lithographed maps of the canals in the various irrigation circles are a great improvement to the Chief Engineer's Report.

ORDER.—Ordered, that copies of this Resolution and of the Report, and of the Resolution by the Punjab Government, be forwarded to the Secretary of State, and to the Finance and Commerce and Revenue and Agricultural Departments of this Government, for information.

Also, that copies of this Resolution be forwarded to the Government of the Punjab for information and guidance.

Also, that copies of this Resolution and of the Report, and Resolution by the Punjab Government, be forwarded to the Local Governments and Administrations and Officers noted in the margin, for information.

The Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, Public Works Department.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department, for communication to the Resident at Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also, that this Resolution and the Resolution by the Local Government, with a few selected tables, be published in the Supplement to the *Gazette of India*.

H. A. BROWNLOW, *Colonel, R.E.*,
Depy. Secy. to the Govt. of India.

IRRIGATION BRANCH.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department,—No. 5019I, dated, 17th November 1885.

READ—

Revenue Report of the Chief Engineer, Irrigation Works, Punjab, for the year 1884-85.

RESOLUTION.—The result of the working of the Punjab Canals for the Financial year was as follows:—

1. The percentage of the net revenue on the Capital invested is by assessments 1·00 and by collections 0·70 as compared with 0·95 and 1·35, which were the corresponding figures for the previous year.

2. The area irrigated in the year under review was 1,614,288, and in the previous year 1,652,068 acres. On the Western Jumna Canal there was a large decrease of 193,218 and on the Bári Doáb Canal of 14,098 acres; but on the Sirhind Canal the increase was 31,072 acres, and 138,464 acres on all the series of Inundation Canals.

3. The Capital invested by Government amounted at the close of the year to ₹5,30,47,419, to which must be added ₹1,12,10,392 contributed by Native States to the Sirhind Canal. The total money invested was therefore ₹6,42,57,811, of which ₹31,36,983 have been expended on a Famine Relief and Insurance work—the Swát River Canal, which was opened on the 12th February by the Hon'ble the Lieutenant-Governor, but has as yet earned no revenue.

4. The Capital expenditure during the year was ₹27,14,575. The surplus revenue after paying all charges and interest on the Productive Public Works expenditure in the Province amounted to ₹3,01,208, but in this sum ₹1,947 is included on account of adjustments of previous year's account: if this be deducted the net profit is ₹2,99,261. The total surplus receipts now amount to ₹2,10,46,809.

PERMANENT CANALS.

5. The Capital expenditure during the year on the Permanent Canals in operation was ₹14,42,774, and the Capital invested up to the end of the year is ₹4,65,20,121. The gross revenue collected was ₹30,22,956, the working expenses were ₹11,22,239, and the interest charge ₹17,46,627. The surplus was, therefore, ₹1,54,090, which gives a net profit of ₹0·33 per cent. on the Capital invested. The revenue assessed for the year was ₹25,93,366, and the net profit ₹2,75,500, or ₹0·59 per cent., after defraying all charges against both Capital and Revenue.

INUNDATION CANALS.

6. There is a decrease of ₹4,117 in the Capital Account of the Inundation Canals in operation due to fluctuations of the suspense balances and sales of stores from the Madhopur Workshops. The total Capital invested to the end of the year was ₹18,93,915.

7. The revenue collected during the year was ₹9,87,601, the working expenses ₹8,02,979; the profit was, therefore, ₹1,84,622 or 9·74 per cent., on the Capital invested.

8. The revenue assessed for the year was ₹10,13,026, which will give a net profit of ₹2,10,047, or 11·09, after paying working expenses.

9. The following table shows the area irrigated on Permanent and Inundation Canals during the year under review and for four previous years:—

CANALS.	1884-85.	1883-84.	1882-83.	1881-82.	1880-81.
	Acres.	Acres.	Acres.	Acres.	Acres.
Permanent	692,072	868,316	727,858	668,547	698,631
Inundation	922,216	783,752	955,414	1,019,178	867,246
TOTAL ACRES . .	1,614,288	1,652,068	1,683,272	1,687,725	1,565,877

As before stated, there was a decrease in the areas irrigated by the Western Jumna and Bári Doáb Canals, and an increase on the Sirhind Canal as well as on all the Inundation Canals.

10. The investigations mentioned in paragraph 8 of the Resolution on the Report for 1883-84 of a scheme for a new Inundation Canal from a branch of the Indus at Leiah showed that, owing to the fluctuations in the supply and to the fact that the water in the branch was already largely used for irrigation purposes, a canal to water the high lands of the Muzaffargarh District must start from some point much higher up the river. The project is still under investigation. A project and estimate for an Inundation Canal from the Jhelum has been received and is under consideration. The prospects of the project are good; but it appears possible that some further investigation may be necessary before definite proposals can be submitted for approval.

11. With reference to the last sentence of paragraph 6 of the review by the Government of India of the Report for 1883-84, attention is invited to the explanation given by the Superintending Engineer, Bári Doáb Canal, contained in paragraph 46 of the Chief Engineer's report. There is no doubt that, as therein stated, the duty of water must vary with differing circumstances of climate and soil and spring-level. It is known that in even nearly rainless tracts where the soil is a stiff loam, two or three waterings will suffice to bring a wheat crop to maturity, whilst four to six waterings would be required to perfect a similar crop in lighter soils situated in parts of the country which have a much better rainfall. It may be noted that in all the later projects for new canals, care has been taken to select tracts where the soil is known to be good, so that a high duty may be obtained from the water.

WESTERN JUMNA CANAL.

12. There was a decrease of 193,218 acres in the area irrigated by this canal; the saturation of the soil by the heavy rains at the close of the monsoon and the favourable rainfall during the rabi are the reasons for this falling-off.

13. The collections and assessments show a net profit of 7·99 and 2·86 per cent.; the percentages of the previous year were 6·55 and 9·08.

14. The cost of Establishment was ₹0·91 per acre against ₹0·52 in the previous year, and the working expenses amounted to ₹1·71 per acre against ₹1·01 in the year 1883-84. This increase in the rates is due to the falling-off of nearly two lakhs of acres in the area irrigated.

15. The balance of profit at the credit of this canal at the close of this year is ₹2,79,11,042.

BARI DOAB CANAL.

16. The area irrigated by this canal was 376,762 acres, or 14,098 less than in the previous year. The decrease in the area irrigated during the kharif crop was due to seasonable rainfall during the months of July and August. The area irrigated in the rabi was greater than that of the two preceding years, and was nearly equal to that of the year 1881-82.

17. The net profit from the collections of the year amounted to 1·39 against 1·59 per cent in the previous year. The profit by assessments was 1·69, and in the previous year 1·43 per cent. The collections had been swollen in the previous year by the credit of arrears of water-advantage rate on assigned lands.

18. The charge for establishment and working expenses was Ro·506 and R1·33 per acre against Ro·598 and R1·44 in the previous year. The decrease was due to less expenditure on maintenance.

19. The charges and interest at the debit of this canal at the close of the year amounted to R51,06,866.

LOWER SOHAG AND PARA CANAL.

20. This canal was opened for irrigation for a short length on the 23rd October 1884, and water was given for the rabi crop, in which 645 acres were irrigated and R307 assessed.

SIRHIND CANAL.

21. The area irrigated was 36,102 acres against 5,030 acres in the previous year.

22. The loss by collection was 4·28, and by assessments 4·08 per cent. on the capital invested.

23. The charges for Establishment and working expenses were Ro·99 and R4·02 per acre, against R1·36 and R3·48 in the previous year.

24. The charges and interest at the debit of this canal at the close of the year amounted to R64,01,514.

UPPER SUTLEJ INUNDATION CANALS.

25. The area irrigated by these canals was 90,074 acres against 71,374 in the previous year. The increase was due to the river keeping at a higher level during the irrigating season.

26. The loss by collection was 3·13 against a profit of 10·16 per cent. in the previous year, but the income for the latter year was swollen by the inclusion in the accounts of R74,036 on account of adjustments. By assessments there was a loss of 1·27 against 8·87 per cent. in the previous year: this improvement is due to an increase in the area irrigated and to a diminution of the working expenses.

27. The charge for Establishment and working expenses was Ro·46 and and R1·30 per acre respectively, against Ro·68 and R1·86 in the previous year.

28. The debit balance of working expenses at the end of the year was R51,871.

LOWER SUTLEJ AND CHENAB INUNDATION CANALS.

29. The area irrigated by these canals was 42,631 acres more than in the previous year, due, as in the case of the Upper Sutlej Inundation Canals, to higher water-levels in the Sutlej and Chenab Rivers during the irrigating season.

30. The profit was 199·45 against 194·42 per cent. in the previous year; in the latter figure the arrears credited in that year's account have been excluded.

31. The cost of Establishment was Rs. 0·20 per acre against Rs. 0·24 in the previous year, and that of working expenses R1·13 per acre against R1·40 in 1883-84; the decrease is due to the increase in the area irrigated and to a diminution of the maintenance charges.

32. The share of Land Revenue was R3,18,035 against R3,18,507 in the previous year.

33. The cost of irrigation to the cultivators decreased from R1·61 to R1·46 per acre owing to the increase in the area irrigated.

34. The balance at credit of these canals at the end of the year was R50,52,719.

INDUS INUNDATION CANALS.

35. The area irrigated by these canals was 186,302 acres against 150,418 acres in the previous year; the increase was due to a plenteous and well-distributed rainfall assisted by a better supply of water in the canals.

36. There was a loss of 3·46 against 10·18 per cent. in the previous year. This improvement was due to the absence of the abnormal maintenance charges referred to in paragraph 24 of the previous year's Resolution.

37. The cost of Establishment and working expenses was Ro·41 and R1·36 per acre, against Ro·57 and R2·04 per acre in the previous year; the decrease in rate being due to the cause stated in the previous paragraph.

38. The share of Land Revenue was R1,59,728 against R1,57,026 in the previous year.

39. The balance at credit of these canals up to the end of the year is R27,678.

MUZAFFARGARH INUNDATION CANALS.

40. The area irrigated during the year was 258,035 acres, being 31,536 acres more than in the previous year; the increase was due to an improvement in the supply in all the canals and to a better rainfall.

41. The profit for the year was R1,81,388 against R1,84,599 in the previous year, excluding the adjustments for which credit was taken in the latter year

42. The cost of establishment and working expenses was Ro 18 and Ro·75 per acre, against Ro·20 and Ro·78 in the previous year; this decrease was due to the increased area irrigated.

43. The cost of irrigation to the cultivators was R1·32 per acre against R1·52 in the previous year.

44. The share of land Revenue was R2,40,660 against R2,42,112 in the previous year.

45. The balance at credit of these canals at the end of the year is R9,14,050.

SHAHPUR INUNDATION CANALS.

46. The area irrigated was 14,553 acres against 5,485 acres in the previous year; the increase was due to the zemindárs having prepared their lands in time for the kharif crop, which was not the case last year.

47. The percentage of profit on the capital outlay was 13·91 against 47·29 in the previous year; the large percentage in the year 1883-84 was caused by the realization of water-rate due from the previous year.

48. The balance of profit at the credit of these canals at the end of the year, is R76,166.

GENERAL.

49. A classified statement of crops irrigated in each canal is appended to and lithographed maps of canals in the various Irrigation circles are bound up with, the Chief Engineer's Report.

50. Government of India's letter No. 1661., dated 11th July 1885, directing the adoption of uniform statistical statements in the Revenue Report was received too late to be adopted for the Report of 1884-85.

By order of the Hon'ble the Lieutenant-Governor,

R. HOME, *Colonel, R.E.*,

Joint Secy. to Government, Punjab,
P. W. D., Irrigation Branch.

Statement showing the Financial Results of Irrigation Works in the Punjab up to and for the year 1884-85, the Revenue Account being based on the Collections for the year.

SUPPLEMENT TO

The Gazette of India.

No. 2.] CALCUTTA, SATURDAY, JANUARY 9, 1886.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 6th JANUARY 1886.

GENERAL REMARKS.—Rain has fallen during the week under review in a few districts in Madras and the North-Western Provinces and Oudh and Punjab. Elsewhere the week has been rainless.

In Madras the standing crops are generally in good condition. The harvest is yielding generally average or below the average. In Mysore and Coorg agricultural prospects continue favourable; in the former the sowing of paddy and Bengal gram is in progress. The harvesting of dry crops has been completed in parts of Bangalore.

In Bombay the *kharif* harvest and *rabi* sowings have been completed except in parts of three districts. In parts of Khandesh the *rabi* is urgently in want of rain, elsewhere the prospects of the crop are generally good. In the Berars, Hyderabad, Central India and Rajputana the *rabi* generally promises very well.

Rabi prospects are also very favourable in the North-Western Provinces and Oudh, Punjab and the Central Provinces, where a good harvest may be expected.

In Bengal the *aman* harvest which is approaching completion is yielding a satisfactory outturn, and the *rabi* is everywhere in excellent condition. The poppy crop in Behar and Hazareebagh is also very promising. Agricultural prospects continue good in Assam.

In British Burma the rice harvest continues in progress.

The public health remains good in most Provinces.

Prices are fluctuating in the Punjab and are slightly rising in Coorg. In some districts of Bengal the price of rice is higher than last week. Elsewhere prices continue generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 6th)		
Bellary . . .	*Nil*	Early dry crops much improved, but in one taluk oilseeds suffering from insects, and white *cholum* from disease; wet crops good; harvest paddy and dry crops yield almost average.
Kurnool . . .	. . .	Standing dry crops injured by late unseasonable rains and by insects in parts; harvest paddy, outturn below average. Smallpox and cattle-disease in one taluk.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Ganjam	3·30	Greater portion of rain-fed paddy lost; harvest irrigated paddy outturn below average. Smallpox and cattle-disease in two taluks; 12 deaths from cholera.
Kistna	*Nil*	Standing crops generally good; harvest paddy outturn below average. River 2·15 feet over anicut. Fever prevalent, smallpox slight, deaths from cholera unreported last week 12, this week 9.
Chingleput (Madras)	*Nil*	Standing crops generally good; harvest paddy outturn below average. Fever in one, smallpox in two, and cattle-disease in two taluks.
Coimbatore	·05	Standing crops generally good; harvest paddy and dry grains outturn about average. Slight fever in two taluks.
Tanjore	Last week since revised . 1·98 This week . ·49	Standing crops generally good; harvest paddy and dry grains outturn below average.
Madura	Last week since revised . ·87 This week . ·04	Water-supply sufficient. Fever prevalent; cattle-disease in one taluk.
Malabar	*Nil*	Harvest of second crop paddy commenced in five taluks. Slight smallpox in seven taluks, fever in two, and cattle-disease in one taluk; 21 deaths from cholera.
Travancore	*Nil*	Paddy in ear and thriving. Fever in parts. *General Remarks.*—General prospects fair; continue favourable in Bellary and Anantapur.
Bombay—**(Jan. 6th)**		
Karachi	*Nil*	River at Kotri on 3rd 4 feet 3 inches against 5 feet 1 inch on same date last year. *Rabi* sowings not completed yet. Fever in 12, and cattle-disease in four talukas. Prices—wheat, red rice, and *bajri* in Karachi, 26, 30, and 34; in Tatta 26, 40, and 42; in Sujawal 26, 44, and 42, and in Sehwan 32, 44, and 40 pounds per rupee respectively.
Hyderabad	*Nil*	*Rabi* good. River at Kotri 4 feet 2 inches, against 5 feet on same date last year. Fever in ten, cattle-disease in five, and smallpox in one taluka. Prices steady.
Ahmedabad	*Nil*	Standing crops healthy. Fever in Sanand and Viramgaum talukas. Wheat 34 and *bajri* 34 pounds per rupee.
Baroda	*Nil*	Cattle-disease continues in two talukas. *Rabi* in good condition.
Surat	*Nil*	Standing crops healthy; reaping of *jowari* progressing. Smallpox among cattle in Bulsar taluka; fever in Bulsar, Bardoli, Pardi, and Mandir talukas. *Jowari* 38 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	Threshing of *kharif* crops in progress; *rabi* crops in fair condition; both these crops suffered slightly for want of rain in parts of the Malegaon and Yeola talukas. Public health generally good. Wheat 31½, *bajri* 36½ and rice 23¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature fell from 2° warm on 30th to *nil* on 2nd, was *nil* on 3rd and 4th, and 4° warm on 5th; vapour in air excessive on 30th, afterwards normal; abnormal wind southerly on 3rd and easterly on 5th; wind normal on all other days.
Poona	*Nil*	Threshing of *kharif* crops in progress; *rabi* crops in good condition. Cattle-disease prevalent in Junnar taluka; 53 cholera cases in taluka Haveli and Poona city, 27 deaths. Prices—*bajri* 32 and *jowari* 31, in Poona—*bajri* 34 and *jowari* 39 pounds per rupee.
Ahmednagar	*Nil*	*Rabi* good. Health good. *Bajri* average 44 and *jowari* 52 pounds per rupee.
Sholapur	*Nil*	*Kharif* harvest nearly completed; *rabi* crops doing well; *jowari* 49 pounds 27 tolas and *bajri* 43 pounds 17 tolas. Cholera 7 cases, 3 deaths in Barsi taluka.
Dharwar	*Nil*	Reaping of rice and early *jowari* completed; cotton crops good; wheat and gram crops slightly blighted in five talukas. Fever and cattle-disease in Mugad, Bankapur and Hangal. Rice 20 to 36 and *jowari* 43 to 64 pounds per rupee.
Kanara	*Nil*	Second crop sowing continues below and above Ghat. Fever and smallpox decreasing; measles in Karwar; cattle-disease in five talukas. Common rice in Karwar 12½ in district average 13½ seers per rupee. Weather seasonable.
Rajkot	*Nil*	Weather cold. Fever and bowel complaints prevalent in some parts; public health generally good. *Bajri* 32, *jowari* 42, and wheat 31 pounds per rupee. *General Remarks.*—Reaping of *kharif* and sowing of *rabi* crops completed, except in parts of three districts. Rain urgently required for *rabi* crops in four talukas of Khandesh. Standing crops damaged by drought in parts of Nasik, and by blight in parts of Dharwar, Khandesh, Satara, and Bijapur. Cholera in parts of 2, fever and cattle-disease in parts of 12, and smallpox in parts of 6 districts.
Bengal—**(Jan. 6th)**		
Chittagong (Jan. 5th)	*Nil*	Weather cold and bright. Prospects of crops good; harvesting of *aman* still continues. Prices steady. Public health good.
Dacca	*Nil*	*Aman* paddy being harvested; prospects of winter crops continue favourable. Sporadic cholera in the district.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
24-Pergunnahs	*Nil*	Prospects of *aman*, except in low lands, and of winter crops, good. Harvesting of *aman* going on, yield estimated at about 12 annas. Sporadic cholera in Sadr, Baraset, and Diamond Harbour subdivisions.
Khoolna	*Nil*	Weather cool. Harvesting of *aman* paddy continues; prospects good; winter crops doing well; planting of *boro* paddy commenced in some places. Price of rice falling. Some cholera; public health fair.
Moorshedabad	*Nil*	Weather seasonable. Harvesting of *aman* rice almost over; outturn above average; prospects of all cold-weather crops good. Public health good.
Pubna	*Nil*	Weather fair; north winds prevalent. *Aman* still being harvested; prospects of winter crops favourable. Health of people generally good.
Dinagepore	*Nil*	Weather favourable. Harvest progressing fast; prospects of *rabi* good. Cholera still reported from four thanas, but less frequently.
Rungpore	*Nil*	*Aman* being harvested with favourable outturn; winter crops doing well. Public health good.
Midnapore	*Nil*	Weather cold. Prospects of crops generally good and prices low. Public health improving.
Burdwan	*Nil*	*Rabi* crops promise well Public health fair.
Bhagulpore	*Nil*	Rice harvest nearly completed; *rabi* crops doing well; *kurthi* being gathered.
Purneah	*Nil*	Prospects of crops favourable; harvesting of rice nearly completed. Public health improved.
Durbhanga	*Nil*	Harvesting of paddy nearly completed; *rabi* prospects excellent, tobacco and poppy promising. Prices almost stationary. Public health generally good.
Muzufferpore		Poppy crop very promising.
Sarun		Prospects of poppy excellent, weather favourable.
Chumparun	*Nil*	Harvesting of *aghani* in progress; prospects of *rabi* good. Poppy plants strong and healthy. Prices fallen slightly. Public health fair.
Patna	*Nil*	Harvesting of paddy still going on; prospects of *rabi* and poppy crops good. Public health good.
Gya	*Nil*	*Kharif* harvest fair. *Rabi* prospects good; poppy in west and north-west has suffered more than in other parts of district, but prospects hopeful if good weather holds out. Public health good.
Shahabad		Poppy crops slightly injured by damp weather following late rains, but prospects on the whole good.
Hazaribagh	*Nil*	Weather clear and cold. Paddy harvest almost finished; prospects of *rabi* and poppy crops generally good. Public health good.
Cuttack	*Nil*	Weather chilly. Reaping of late rice continues; outturn generally fair; *rabi* doing well. Price of rice falling. Cholera gradually subsiding; severe fever prevalent in town. *General Remarks.*—No rain fell during the week. *Aman* harvest nearly over generally with a satisfactory outturn, except in deeply inundated parts of South-west and Central Bengal. *Rabi* crops everywhere in excellent condition, and poppy in Behar and Hazaribagh also very promising. Price of rice somewhat higher in some districts than in the preceding week, but is generally cheaper than last year except in Calcutta and adjoining districts. Cholera in Tipperah and Cuttack abating, but fever in Cuttack town and Backergunge still prevalent; otherwise public health fair.
N. W. Provinces and Oudh		
Benares (Jan. 6th) (Jan. 5th)	*Nil*	Weather clear and very cold. *Rabi* crops flourishing, the late rains having considerably improved them and an outturn above the average is anticipated. Sugarcane cutting continues. Prices show a slight rise in wheat, gram and *bajra*. Markets are well supplied. Public health and condition of cattle good.
Gorakhpore („ 4th)	*Nil*	Late paddy harvested; *rabi* and poppy crops in good condition. Prices stationary.
Fyzabad („ 5th)	*Nil*	Weather cold. Prospects good. Poppy thriving. Markets well supplied. Health of people fair.
Lucknow („ 4th)	*Nil*	*Rabi* prospects very favourable; poppy crop looks well. Markets well supplied, but prices are gradually rising. Fodder very dear. Health of people good; no cattle-disease.
Rae Barelli („ „)	*Nil*	Weather cloudy and cold. *Rabi* crops promising well. Markets full. Prices slightly rising. General health fair.
Partabgarh („ 5th)	*Nil*	Wind westerly; weather clear. The late rains have done much good to the *rabi* crops; *arhar* and peas flowering; sugarcane being crushed. Prices stationary. Health of people and cattle good.
Allahabad („ „)	*Nil*	Weather seasonable. All crops doing well. Markets fully stocked. Prices show a tendency to rise. Condition of men and cattle good.
Cawnpore („ „)	*Nil*	*Rabi* crops thriving; poppy plants healthy. Prices firm. Condition of people and cattle good.
Banda („ „)	*Nil*	Weather seasonable. *Rabi* crops flourishing. Prices steady. Public health and condition of cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Farakhabad (Jan. 5th)	·20 in four tahsils on 4th.	Prospects fair. Markets well supplied. Health of people fair.
Sitapur („ „)	A slight shower at Sadr on 4th.	Weather cloudy since last two days with east winds. *Rabi* prospects favourable; poppy crop healthy. Prices stationary. Health good.
Bareilly („ „)	*Nil*	Crops doing well. Markets fairly steady. Health of people and cattle continue good.
Ballia („ 4th)	*Nil*	Weather cold and clear with westerly winds prevailing during the week. Prospects continue favourable. Supplies sufficient. Health of people and cattle good.
Kumaon („ 5th)	Rain and snow.	Weather unsettled. *Rabi* crops progressing. Prices stationary. General health good. Cattle-disease continues.
Agra („ 4th)	Good rain at Sadr on the night of 3rd.	*Rabi* crops flourishing. Prices nearly steady. Health good.
Jhansi („ „)	*Nil*	Weather cold. Crops flourishing. Health good.
Meerut („ 5th)	General rain on 5th, nearly 1·0.	The rain most beneficial. Weather again bright and cold. Prospects most favourable. Prices stationary. Health good.
		General Remarks.—A little rain has fallen in four districts, but weather is everywhere seasonable. *Rabi* and opium crops flourishing. Prospects good. Supplies ample. Prices generally stationary. Save some cattle-disease in Kumaon, the general health of men and cattle is good.

(*Statistical Branch.*)

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Monday, the 4th January, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble H. J. Reynolds, C.S.I.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

LAHORE TRAMWAYS BILL, 1886.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to authorize the making, and to regulate the working, of Street Tramways in Lahore be taken into consideration. He said:—"This Bill is one of purely local interest, and I hope it will be the last of this class with which I shall have to trouble the Council. The general Tramways Bill, which is now before a Select Committee, will probably make it unnecessary to undertake legislation of this description in future."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. ILBERT also moved that the Hon'ble Mr. Quinton and the Hon'ble Rájá Amír Hasan be added to the Select Committee on the Bill to amend the Northern India Ferries Act, 1878.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Rájá Amír Hasan be added to the Select Committee on the Bill to declare and amend the law relating to the Stone Mahál in the District of Mirzapur in the North-Western Provinces.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Hon'ble Rájá Amír Hasan be added to the Select Committee on the Bill to provide for the voluntary Registration of certain Births and Deaths, for the establishment of General Registry Offices for keeping Registers of certain Births, Deaths and Marriages, and for certain other purposes.

The Motion was put and agreed to.

LICENSE TAX AMENDMENT BILL, 1886.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill for imposing a tax on income derived from sources other than agriculture. He said:—

"It will be desirable, in asking leave to introduce the Bill inscribed on the list of business before us, that I should explain the circumstances in which we have found it necessary to have recourse to legislation with the purpose of increasing our revenue. In coming before this Council with a Bill the object of which is to add to our present means of direct taxation we shall be expected, and very reasonably expected, to demonstrate its necessity. I shall endeavour to do so as clearly, but at the same time as succinctly, as I can. To enter at great length or with infinite detail into the present prospects and into the past fortunes of our finances would be out of place here, and would, I feel sure, assist this Council very little. At the best, they would but follow me (as one tracks a mole working underground) by the heaps it leaves behind, by a series of recurring groups of confusing financial figures. But, as the object of what I have to say is to enable those who are here to seize clearly and firmly the problem which the Government have to solve, I shall, I believe, assist them best in doing so by avoiding as much as possible mazes of figures and intricacies of calculation, and keeping to the broad beaten high road, open and accessible to all, and easily traversed from end to end by those who will give themselves the trouble to accomplish it. I shall briefly examine the past and the actual financial situation; I shall show this Council what is the figure at which we estimate the deficit of next year; I shall examine the several methods which present themselves of meeting this deficit; I shall then state the reasons which have led us to adopt such an amendment of the License Tax as shall place direct taxation on a more equitable basis, and I shall close with such remarks as may show that the measure we propose to introduce is one which opponents in former days of an income tax have expressed themselves as willing to accept. It is impossible to give a clear view of the present situation without glancing back, however briefly, at the circumstances of the last three preceding years, so as to show what has been the equilibrium of revenue and expenditure from 1882 onwards, what are the resources which they have left us on which we can count to meet increased demands for expenditure, and what is the nature and extent of the recent charges imposed upon us, which are so serious as to leave us no doubt of the inadequacy of our revenue, as at present estimated, to provide for them. I take 1882 as the point of departure, because that was the year in which the Government of India introduced changes in our revenue of a nature so radical and decisive as to constitute an epoch from which a new departure must be dated. In the Budget Statement for the present year I said, it may be remembered, that 'the measures adopted in 1882 had been fully justified by the experience acquired since their introduction, but' I added 'it was doubtful whether the status which they established would prove sufficient in view of the further trials which seemed to be awaiting us and of the necessities of our situation, whether connected with the state of our currency or with the measures necessary for the development and protection of the country.' What, then, has been the course of events since the Budget of 1882-83 was introduced? And what were my grounds for saying that the calculations of that Budget had been justified by experience, but that it seemed likely that the resources which they furnished us would have shortly to be supplemented? In that year, 1882-83, the rate of duty on salt was reduced to R2 a maund everywhere, excepting in the Trans-Indus Districts of the Punjab and Burma, (where a specially low rate of duty had previously prevailed,) at a cost of £1,400,000. Cotton duties and the general import duties were entirely abolished at a gross cost of £1,219,000. The Patwari Cess in the North-Western Provinces was remitted, and the Government undertook the payment of patwaris in Oudh, the change involving a virtual remission of taxation to the extent of £316,000. These changes, with certain administrative reforms, amounted to about three millions. The surplus estimated in the Budget, notwithstanding these very large reductions, amounted to £285,000; the actual surplus, however, was £706,633,

in spite of the provision necessary for the war in Egypt, which amounted to over half a million; of the reduction, in the rate of export duty on Malwa opium, of R50 per chest; and of the serious fall in the exchange which reached £306,433 in excess of the Budget Estimate. This, then, was the result of the first year—remission of revenue to the amount of three millions, war, reduction of duty on Malwa opium and increased loss on exchange; yet a surplus of £700,000.

"In the following year 1883-84 exchange was taken at 1*s.* 7$\frac{1}{2}$*d.* instead of 1*s.* 8*d.*, and the total charge on account of Exchange in that year was £773,000 higher than in the Budget Estimates of 1882-83. Owing to short crops in previous years the amount of opium put upon the market was also reduced in 1883-84; and from these two causes a million less was taken on that account in the estimates, while in the course of the year £1,000,000 not provided for in the estimates was paid to Her Majesty's Government on account of arrears of non-effective charges of the British Army. The surplus budgetted for in that year was £457,000; the actual surplus was no less than £1,387,496. In the ensuing year, namely, in 1884-85, the surplus estimated for was £319,300; short sales of opium, very heavy expenditure connected with an extraordinary opium crop, falling off in customs, and in railway income, with the other unfavourable causes explained in the Financial Statement of the present year, again lowered our revenue; yet although in that Financial Statement in the revised estimates for 1884-85 a deficit of £716,200 was calculated upon, there is every reason to anticipate that the accounts now shortly to be closed will show an equilibrium.

"It will be seen from this brief review that during the last three years the surplus of revenue over expenditure, notwithstanding the great reductions carried out in 1882, has averaged, so far as we at present know, in the three years not less than £700,000. The revenues, reduced in 1882 by an annual sum of three millions, have still amply sufficed to meet the difficulties arising from a variety of causes, such as short opium crops, temporary falling-off in railway receipts, war charges, and a heavy claim for payment of arrears of non-effective military charges. The expansion of the revenue, and especially of the railway revenue, will be familiar to all who have watched the course of Indian finance; and it will, probably, be admitted that the figures which I have quoted give striking evidence of the sagacity of the calculations which estimated that 3 millions could, in 1882, be taken off our revenue estimates without causing anxiety. The present year again, the estimates of which were framed on the basis of depression in regard to railways, customs, and opium, still (apart of course from the extraordinary charges put upon us in connection with the preparations for war) shows on its estimates a small surplus of £508,100. It is not necessary at present to dwell on the Estimates of 1885-86 further than to say that the experience gained in previous years will, I have little doubt, prove, when the Budget Statement of the ensuing year is published, to have been fully continued in 1885-86, and that, apart from the extraordinary war expenditure, our resources will, in the current year, have sufficed to meet our burdens. But, with the present year, our brief spell of happiness has come to an end; the fat kine have passed on; the lean kine are come in. Three uninterrupted years of prosperity is a godsend in the annals of any nation; in our Indian annals it is extraordinarily rare good fortune. I know that there are many who think that the capricious and uncertain elements in Indian finance should have been allowed more weight in the counsels of those who carried out the reforms of 1882. I do not share those views. If any man has a right to complain, it is I; for on my shoulders is placed the burden of finding fresh resources to replace those which in 1882 were dispensed with. But I do not share the views of those who cry shame on the Government which lightened by three millions the public burden in 1882, and gave to the tax-payers respite to the present moment. This is neither the place nor the time to enter into a discussion of the policy of 1882; but this much I may affirm, that, whatever may be said about the abolition of the import duties in that year, the exemption from duty in March 1878 by the Government of Lord Lytton of certain descriptions of grey

cotton goods made the abolition of the import duties on all cotton goods a question only of time, and of very brief time. If Apollos was constrained to water it was because Paul had sowed. The corner stone was taken out of the edifice in 1878, and the whole fabric of import dues was bound shortly to be removed, under pain of becoming a nuisance and a danger. The decrease, again, in the salt duties has been rewarded by the increase in the subsequent consumption of salt by 13 per cent. in the three subsequent years ending with the 1st of January of the present year—consumption which is steadily increasing. To come back, however, to the thread of my remarks and from the unprofitable pursuit of what might have been to the practical examination of what is. The good time is over; the day of difficulties is again with us; we are labouring once more, not under a plethora, but a want, of money. We shall probably be called upon next year to meet an increased charge of nearly a crore of rupees owing to the fall of a penny in the exchange; that is, instead of taking our exchange next year at 1*s.* 7*d.*, it is prudent at present in making our estimates to assume that we shall have to take it at 1*s.* 6*d.* The so-called loss by exchange imposes on us sacrifices which it is beyond the power of this Government or of any Government, acting singly, to avert; no foresight, no economy, can save us from the depression which silver, largely demonetised and become, so far as it is demonetised, a mere commodity, has, in common with all other commodities, undergone relatively to gold; and from the effects of which we, as a Government, with a silver standard whose dealings are mainly with England, a country of a gold standard, are especially called upon to suffer. At the same time we shall have to provide for an increase in our Military Estimates, whether for pay of troops or interest on Capital to be expended on Defence Works, which eventually will amount to no less than two millions. For this, of course, we are responsible, and if I do not pause here to justify it, it is because others whose special province it is will doubtless undertake that duty. The whole of this latter charge, however, will not fall during the first year; but taking the increased charge on account of exchange and military establishments next year, inclusive of interest on the Capital for frontier railways defence works, it may be calculated at about £2,000,000. Speaking broadly, in round figures, we may assume that of this sum all but £700,000 will be forthcoming on our ordinary estimates. In other words, nearly two-thirds of the increase to our expenditure estimates of £2,000,000 next year caused by the fall in exchange and the increased military expenditure will, according to our expectations, be met from our existing resources.

"To the extent then of £1,300,000 we count upon the funds provided for us, as resulting from the arrangements made in 1882, and that we can so count is proof of the foresight with which those arrangements were made. We could have provided, in other words, for the fall of a penny in exchange, or we could have added to our estimates the sum necessary to meet the additional proposed military expenditure, and the interest on frontier railway and defence works for the ensuing year; but the two charges combined have been too much for us, and have compelled us to seek about for ways and means whereby to meet our accumulated difficulties. I shall be asked how, if the Budget of 1885-86 shows a surplus of £500,000 only, we expect in the coming year to provide £1,300,000 from existing sources. I shall be told that it is customary to show in our estimates, after all expenditure has been met and accounted for, a normal surplus of about half a million; so that deducting the above surplus of £500,000 which must be kept in hand, and assuming that £700,000 are to be raised by taxation, there remain apparently £1,300,000 unprovided for. The chasm certainly appears considerable; but a chasm, like a conscience, is all the better for close inspection. Let us examine it. The explanation, briefly stated, is that the estimates of 1885-86 were in more than one respect abnormally low. The provision of 1882 had not been worked up to. The depression in our railway receipts which set in in 1884-85 still threatened us, and we based our estimates on the cautious view that that depression would continue in 1885-86. Hence our estimates for the current year were estimates below the standard of our normal expectations. But the depression I speak of has partly worn off; other sources of revenue have recovered. We were, in 1885-86, when the estimates

were framed, suffering from stagnation of exports and customs and from short opium revenue, owing to the necessity of increasing our opium reserves which had been depleted by a course of bad years, this necessity again compelling us to put upon the market a smaller amount of opium than would otherwise have been the case. The estimates, both for railway and opium receipts, were therefore taken at an exceptional figure; but since then, I am glad to say, the export trade and with it our railway receipts have considerably revived, and the customs are showing better results. It is more than probable that the revised estimates for the present year will show a net increase of half a million over the estimates under the head of Railways, an improvement which we may look to maintain in the coming year; and as two bumper opium crops have followed one another this year and last year, we may expect considerable improvement, say £200,000, in the opium revenue next year. In consequence of the new method of calculating the military non-effective charges, we shall have in 1886-87 a saving, as compared with 1885-86, in round numbers, of £363,250 under that head. The normal annual increase to our revenue may be taken, as experience has shown us, at £150,000. In the budget of 1885-86 a sum of £585,000 was allotted from revenue to the construction of frontier railways and defence works, which, in view of the exigencies and pressure of our position, will be charged in the ensuing years to Capital. I admit that, speaking for myself, nothing but absolute necessity would induce me to assent to the construction of works of this nature from Capital. But if ever there was a case of absolute necessity, it is the present; and if the choice is to be between increased taxation to the amount of £580,000 or the construction of these works from Capital, it may be reasonably contended that the latter is preferable. As Sir John Strachey said in his Financial Statement for 1880-81 speaking of frontier railways, 'If we could not have paid for them out of our ordinary revenue, it would have been quite right to borrow for their construction. I should have said this because the works are absolutely necessary, and because the political and financial evils of borrowing would be less serious than those involved in fresh taxation.' In the Financial Statement for this year it was pointed out that it has always been hitherto the policy of the Government of India to meet demands of this nature, so far as they can be met, from its revenue; revenue failing the Government of India is prepared to have recourse to borrowing. Revenue failing, and further taxation being undesirable, the Government is prepared to do so now. Taking the total then of the items which I have enumerated, we obtain, in round numbers, the figure of £1,800,000 out of a total estimated additional expenditure of two millions, leaving us a balance of £700,000 to obtain the normal surplus which we consider necessary to exhibit in our accounts. It will, of course, be borne in mind that, in giving to the Council the above calculations, I do so under the reserve of further experience. Little less than a quarter of the year has still to pass; if, on the one hand, I have been moderate in my estimate of increased revenue, I have taken no account, for I know nothing, of what increased expenditure may be in store for us in respect, for example, of Burmah. The figures I have given are an approximation; as close an approximation as I can at present form; if they show nothing else they show, at any rate, I think, this much, that we may require more than £700,000 to obtain the necessary working surplus, but that we certainly shall not want less; and that, for the present, is all which I am in any way concerned to demonstrate.

"Now, there were several ways open to us to obtain the funds which we required. The first and most obvious method is economy, and no one can be more conscious than the Government of India how needful and how urgent it is, in view of the difficulties, present and prospective, which surround us, to carry out whether in the actual present or a more distant future all economies which are practicable. It is a matter to which we are devoting anxious attention, and in regard to which Your Excellency will, I believe, explain the measures which we have in contemplation. But there are considerations in the way of enforcing, except in the last resort, any considerable economy in the estimates of civil expenditure for the immediately ensuing year which cannot be lightly set aside. I do not in saying this wish to be understood as in

the slightest degree endorsing the view as to the folly of making reductions which has been lately urged on this Government from more than one quarter; for I cannot for the life of me bring myself to see that the best way out of pecuniary obligations which you are not likely to be able to meet is by adding to them. I wish with all my heart it were, for it would simplify my task exceedingly. Thus, we have been told that if economy is a good dog, borrowing is a better. A passed master in the art of meeting pecuniary obligations, whose authority as we know is unimpeachable, was obliged at last to confess that he could get 'no remedy against this consumption of the purse; borrowing only lingers and lingers it out, but the disease is incurable.' In public as in private life, in short, the approach of money difficulties is the signal for retrenchment; and if we do not at the present moment look to economies to fill the void which threatens us in the coming year, it is not because we agree with those who think economies a pestilent source of extravagance, or because we do not ardently desire them, but because they are not in any decisive degree immediately attainable. The arrangements by which the Government of India has assigned to Provincial Governments the disposal of a large part of the public revenues has had for its aim, and has achieved, the practice of economy and good administration. But, save in circumstances of an exceptional nature, the Local Governments have been assured that, during the term of what are known as the Provincial contracts, the arrangements with them, by which, during a fixed term, they are secured certain revenues, shall not be disturbed. Hence, if those contracts are not to be disturbed, the Government of India can economise only on the margin left for its own administration, and which is largely composed of military, postal, telegraphic or other similar charges which are not susceptible of instant reduction. Of course it is the Government of India which in the last resort must decide what are circumstances of an exceptional nature. It decided, for example, that the circumstances of the present year were of such a nature, and the Provincial Governments very loyally responded to its call. When it came however to determine what course it should adopt in regard to the situation created by the circumstances which I have explained to the Council, it was met by the consideration that the Provincial arrangements now in force expire at the close of the Financial year 1886-87, at the close, that is, of the ensuing financial year; and that it would then, in any case, be in a position to re-adjust the partition of the revenues. No re-adjustment which was likely to prove practicable would be of itself sufficient to remove all necessity for resorting to other means of increasing our revenue. There was but one year to be tided over; and in that year the maximum expenditure on account of military establishments and frontier works would not be reached. On the other hand, to put an end without proved necessity in the fourth year of their quinquennial term to those contracts, would have led to great doubts and misgivings in future, doubts and misgivings which were inconsistent with the economical aims and objects which are the strength and the justification of the system introduced by Lord Mayo. We were the judges in our own case; and it was the more necessary therefore to be sure that, in satisfying our own necessities, we were not falling short of engagements into which we and our predecessors had deliberately entered, and to which we were pledged. We were not, and we are not yet, in a position absolutely to say, at this period of the financial year, that it is unnecessary to call the Provincial Governments to our assistance. All that we can be sure of is that such a measure does not at present seem to be imminent; that if it were necessary it would not release us from the task of further strengthening our revenues; that in itself it is likely to prove hurtful to good administration; and that what is needed is as much an increase of existing revenues, as a repartition of those which already are available, a repartition which, while it failed to fill the measure of Imperial needs, would be sure, if suddenly insisted on, to prove inconvenient to provincial administration. But at the same time we cannot close our eyes to the certainty that on the revision of the contracts in 1886-87 we shall be called upon to examine closely the details of our financial relations with the Local Governments with a view to such a re-adjustment as shall equitably distribute over the general revenues the recent additions which have been made to the

general burden. We have warned them of this, and we have asked them not to embark in any fresh expenditure of a nature or extent to prejudice the settlement of our fresh relations with them, which must be effected in 1887.

"Then, again, there was the question of indirect taxation. For example, we might have replaced, in part or in whole, the reduction of the duty on salt which was made by the preceding Government; but to have done this would, in the first place, have been to increase the burdens of the poorest classes of the community; it would have checked the consumption of salt, which has risen from 2,44,98,000 maunds in the period from 1st March 1881 to January 31st, 1882, to 2,77,92,000 maunds from 1st March 1884 to 31st January 1885, and would have been contrary to the pledge which was given by Sir Evelyn Baring at the time when he reduced the duty: he then said—

'We hope that we shall be able to maintain the duty at R2 a maund, and we have at present no reason to suppose that we shall be unable to do so. By a return to a higher rate, we should, of course, to some extent at all events, sacrifice the main object we have in view, *viz.*, to afford some relief from taxation to the poorest classes. At the same time, I should observe that if any unforeseen circumstances, such as a heavy fall in the value of silver, takes place, and if, at the same time, the reduction in the salt duty does not result in any considerable increase in the consumption of salt, it would be open to us to return temporarily to a higher rate. This is an expedient to which the Government would have recourse with great reluctance.'

"It will be observed that he anticipated replacing the duty in the event of a fall in silver, such, for example, as has taken place, and still more, therefore, (it may be argued) in the event of our being subjected to large unforeseen expenditure, such as recent events on the frontier have rendered, in the judgment of the Government, necessary for the protection of the country; but he added also a second condition, namely, that the reduction of the salt duty should not have resulted in any considerable increase in the consumption of salt. The figures I have given show that there has been a very considerable increase in the consumption of salt, giving evidence (all allowance made for the effect of increase in railway communications, and of improved administration), of the insufficient supply that was previously within the means of the people, and enabling us to judge of the effects which would follow, if not immediately, at any rate before very long, an enhancement of the existing duty. It is very possible that a time might come when (whether owing to increased facilities of distribution, or from other causes) enhancement of the salt duty to the rate which formerly existed, or to something falling short of it, might be advisable; but it is a measure which few, I imagine, would wish to see introduced so long as other legitimate resources were open to us. I may glance, in this connection, at what has been recently urged in more than one quarter with regard to the re-imposition of the import duties. We are assured that the measure would be extremely popular, that nobody would feel it, and that it would bring in a very large revenue. Popular, in one sense, it would certainly be, with that limited class on whom its burden did not fall, being precisely the class to whom I have above alluded, who contribute so little. But, all other considerations, such as those connected with the expansion of our export trade and therewith of our railways, apart, it must be remembered that the burden of the import duties, like the burden of the salt duties, falls upon the masses of the people, who are the chief consumers, and it is idle to suppose that the re-imposition of the duties would not be felt by men whose income at the best is barely sufficient to afford them the sustenance necessary to support life, living as they do upon the barest necessities of life. It is always popular to pass obligations on to other people; but it is a kind of popularity which no Government, anxious for the equitable adjustment of the burdens to be imposed upon tax-payers, can possibly wish to acquire. Nor would it be possible to escape the difficulty of the local industries. How are we to re-impose the import duties without putting an excise upon local mills which are now so numerous and considerable? How otherwise could the import duties be regarded as other than protective duties? The question is not one which need be seriously discussed at present, not only on account of the economical and other objections to it, but because the time has not come when we need call upon the masses of the people to contribute further to the Imperial Treasury.

But it cannot, in a statement of this kind, altogether be passed over in silence, because it is constantly being brought forward as a simple and easy escape from our difficulties by the class who are at present exempt from their due share of the public burden, and who seem, if without offence I may say so, more willing to impose that burden upon others than to lift so much as a corner of it with their own fingers. The philosophy which enables us with amazing equanimity to bear the misfortunes of our neighbours appears in a less unobjectionable form when it suggests the transfer to our neighbours of our own share of misfortunes. In fiscal, as in other mundane matters, man must bear his own burdens; an ordinance of which the propriety and, I may say, the decency, seems to me unassailable. Another course open to us was to review the scheme by which a million and a half are annually put aside for Famine Insurance, and to consider whether we might not utilise that sum, in whole or in part, for the purpose of meeting the fresh expenditure which was brought upon us. And here again I think it would be well that I should take this opportunity, although at the expense of time, of reminding this Council what the nature of the Famine Insurance scheme really is, and pointing out the misapprehensions which seem very generally to prevail upon this point. There seems to be a kind of idea that it is a separate fund deriving from, but quite irrespective of, our general revenues, and that this particular fund is always to be appropriated to a particular purpose, that particular purpose being the reduction of debt. If experience did not show that the very lucid explanations on this head given by one of my predecessors on the point have fallen on absolutely deaf ears, it would be scarcely necessary for me to point out that there can be no such thing as a distinct fund, forming part of our general revenues, and yet independent of our general revenues; and that systematically to assign certain items in your revenues to a separate fund, to earmark and assign that fund to the reduction of debt, to maintain it for that purpose, and thereby to encounter, peradventure, a succession of deficits or the necessity of taxation to the amount so assigned, is an absurdity. What was said in 1861 by Mr. Laing in regard to the clauses in the Income Tax of 1860 by which it was required that 1 per cent. of the proceeds of that tax should be kept specially for Public Works applies, *mutatis mutandis*, to the present instance. 'To give,' he said, 'a statutory claim to money which we have not got, and can only make a pretence of giving with one hand, and taking it back with the other, ought not to be continued. Sham is rarely harmless; it is for the most part positively mischievous.' But the matter cannot be put in clearer language than that employed by Sir John Strachey in this Council on December 27th, 1877, and again on February 9th, 1878, and finally on November 14th, 1879; and in justice, no less to ourselves than to Sir John Strachey, I shall take the liberty of quoting those statements in full, though at the risk of some impatience on the part of some of those who are listening to me and who are already familiar with these declarations.

"This is what Sir John Strachey said in 1877:

'The objects of the Government, it will have been gathered, are two-fold, first, to obtain that addition to the public income which experience shows to be required to meet the charges that arise, directly or indirectly, in a series of years, by reason of scarcity and famine; and second, to secure a proper margin of ordinary surplus to meet those unforeseen irregularities in the Revenue and Expenditure, which necessarily lead to differences between the estimates of the year and the actual accounts.

'As to the first of these objects, I desire to say that the recognition by the Government of this new obligation implies no suggestion of diminished public wealth or a decaying revenue. Rather, the very contrary is true, and it is the stronger perception of the generally advancing condition of the community, and of its requirements and capacities, that has induced this movement. It is the firm intention of the present Government to apply the funds now to be provided for this special purpose, strictly to the exclusive objects which they were designed to secure. In such matters, no doubt, Governments cannot fetter their successors, and nothing that we could now say or do would prevent the application of this fund to other purposes. Without thinking of a future far removed from us, events might of course happen which would render it impracticable even for us, who have designed these measures, to maintain our present resolutions.

'So far, however, as we can now speak for the future, the Government of India intends to keep this million and a half as an insurance against famine alone. In saying this I should

explain that we do not contemplate the constitution of any separate statutory fund, as such a course would be attended with many useless and inconvenient complications, without giving any real security. Unless, then, it should be proved hereafter by experience that the annual appropriation of a smaller sum from our Revenues will give to the country the protection which it requires, we consider that the estimates of every year ought to make provision for religiously applying the sum I have mentioned to this sole purpose, and I hope that no desire to carry out any administrative improvement, however urgent, or any fiscal reform, however wise, will tempt the Government to neglect this sacred trust.'

"That was Sir John Strachey's first statement on the subject; clear enough, one would have supposed; but if there were doubt on the subject what he said in 1878 should have effectually dispelled it. He said:—

'It was suggested at a previous meeting of the Council, and the proposal has been urged in a memorial received from the British Indian Association, that a separate fund should be created from the produce of the new taxes, for the objects now in view by the Government. I think it desirable to make a few observations on this subject. It may first be said that the money obtained by the new taxes will in fact be applied, either to discharge of debt the special origin of which cannot be ascertained, or to the construction of useful remunerative works of precisely the same description as those on which a far larger sum has hitherto been spent year by year, partly obtained from the general revenues and partly from borrowed funds. It is not the intention of the Government to reduce this outlay; on the contrary, it hopes to be able to increase it. To create any separate fund, therefore, would be to make a perfectly arbitrary and artificial distinction between a small part of the outlay, say 1½ millions, and the larger part, say 3 millions, on works in themselves not really distinguishable in their character or objects. Such a division would be, not only useless, but mischievous, and could not practically be maintained. It would necessarily lead to artifices in adjusting the grants and accounts, which would create suspicion and cause much trouble to all concerned.

'In fact, what the Government desires is to establish a sense of the obligation under which it is placed in respect to the expenditure due to famine, which shall be felt in the same way as the obligation to provide proper Courts of Justice, police, education, and so forth. For none of these objects has it ever entered into the mind of any one to suggest a special allocation of the revenue or a separate fund. Nor can any greater reason be found for a separate Famine fund than for separate funds for any of those other objects which are obligatory on the Government.

'The intention of the Government is to obtain the means of meeting the charges that arise in all parts of India on account of the relief of famine, whenever such calamities occur. This could not be done if the additional income obtained were specially allocated for expenditure in the Provinces where it is raised, and there never was any such intention. At the same time it is held to be desirable to employ the Provincial Governments in obtaining the funds, and in supervising their application so far as it takes the form of an investment in useful works of a remunerative character. It is with this exclusive object that it has been proposed to make the new taxes Provincial, so that the best possible agency shall be secured for their collection and for administering their outlay in detail.

'I will not attempt to state in detail the reasons why the persons responsible for the administration of the finances reject separate funds of all kinds, unless under very special circumstances, as productive of confusion and complication without any counterbalancing advantage. It will be enough, probably, after what I have already said on this point, to reconcile the Council and the public to the decision of the Government, not, in the present case, to create any separate fund, if I point out that any other determination might lead to results probably not contemplated by those who have suggested the establishment of a separate fund; I mean that this might involve the necessity for imposing more taxation. Suppose, for instance, that the produce of the new taxes were by law strictly set apart from the general revenues and paid into a separate fund only to be applied to specified purposes. If, then, any sudden change of circumstances arose, calling for seriously increased expenditure, or causing a considerable falling-off in the revenue, we should have to choose between the imposition of fresh taxes and the abrogation of the law constituting the fund; for I set aside the idea of meeting ordinary charges by borrowing as a course financially inadmissible. This dilemma might arise, though the pressure was likely to be only temporary; nor can any one say that such a contingency would be at all improbable, or that it might not occur at any moment.'

"However, in spite of all this, the fund legend continued in circulation, and in the following year Sir John again exposed it:

'I had supposed, my Lord, that if there was one thing which had been made clearer than another in regard to the measures in question, it was this,—that, although it was sometimes convenient to talk of a Famine Insurance Fund (I believe, however, that I myself on no single occasion used the expression), the Government altogether repudiated the idea that it was desirable to constitute any separate fund from the produce of the new taxes for the purpose of meeting expenditure on Famine. I said in the plainest language that I could find, in the

debate in this Council on the 9th February 1878, that the creation of any separate fund would not only be useless but mischievous,—that it would disturb the adjustment of grants and accounts, and cause suspicion and trouble to all concerned.'

"Ineffectual, still, this third statement; error, more especially wilful error, dies hard; and here am I in 1886 again searing the head of this Hydra, ineffectually, no doubt, in my turn too. The fact of the matter is that the sums devoted to the Famine Insurance scheme, so long as they are not applied to normal, ordinary, expenditure, operate directly or indirectly to the reduction of debt: if there is no loan they may operate directly to the reduction of debt: if money is borrowed, the amount borrowed is less by the sum which the Famine Insurance grant enables us to place to the credit of the cash balances. The original intention expressed, I may here mention, long before the debates of 1877 and 1878, by Lord Northbrook in the Resolution of April 23, 1874, with which the Financial Statement for 1874-75 was published, was as follows:—

'* * * * * It would not be safe to depend upon loans for the purpose of meeting future charges on account of famines. Although means have been taken, and will be taken, to obviate or mitigate those calamities, some such charges must, for a time at least, be looked upon as contingencies to be expected to recur with more or less regularity.

'It is necessary, therefore, that, besides a fair surplus of income over ordinary expenditure, such a margin should be provided, in addition, in ordinary times, as shall constitute a reasonable provision for meeting occasional expenditure upon famines. If the surplus be employed in the reduction of debt, in the construction of reproductive public works, or remain in the cash balances, the expense caused by future droughts may fairly be met by appropriations from the cash balances, or by loan, to the full extent of the accumulations of surplus.

'This condition of things has existed in India during the last four years; and the Government of India are resolved to use their best endeavours to maintain, for the future, a considerable surplus of income over ordinary expenditure, and thus to make provision, beforehand, for any calls which are likely to arise on account of famines.'

"The original object was to secure a surplus of £1,500,000 and to devote it to the reduction of debt, or to productive public works; but subsequently when it was decided, after the report of the Famine Commission, to carry out a considerable scheme of railways, it was determined to devote a part of the Famine Insurance grant to the construction of what are known as protective railways (protective, that is, against Famine,) and to works of irrigation, and the rest to reducing the sum which would have to be borrowed for the construction of productive works, whether railways or irrigation. At a later stage again the system now in force was adopted by which the grant is devoted in part to the direct prosecution of railway and irrigation works, and in part to lessening our annual borrowings for such works; the former distinction between protective and productive having been discontinued. The combined effect of the application of the grant is to lessen our obligations by the amount directly expended in the construction of railways and irrigation, whether from Revenue or from Capital, and, in that sense, to reduce the debt. So long, however, as we continue to devote the item of one million and a half in whatever manner to the reduction or prevention of debt, so long as we do not devote it to ordinary expenditure, so long will the Famine Insurance scheme continue to be operative. It may be employed in the reduction, or, which is the same thing, in the prevention, of debt, or in the construction of works, or by swelling our cash balances. But as so much has been said lately 'by the herd of such, who think too little and who talk too much,' as so much, I repeat, has been said about breach of faith, and I know not what, in respect of the Government and the Famine Insurance scheme, I wish to say here, in plain unequivocal language, that in my opinion it is quite open to question whether, in the event of a continuation or aggravation of serious financial difficulties, it would be expedient to continue the operation of a scheme which was conceived and brought into operation in order to assist, not to burden, the financial administration of the country. For example, if it were necessary to resort to excessive or to very obnoxious taxation in order to meet expenditure which could be met by the suspension, temporarily or otherwise, of the present Famine Insurance scheme, it would certainly be the duty of the Government to consider whether this could not be done. If it comes to a choice between the

general financial position and the particular position of a particular item in the Budget, the priority must unquestionably be given to the general position. In other words, we must sacrifice the scheme to our general needs, and not our general needs to the scheme. I think it necessary to make these remarks here, because it is very evident that the nature of the Famine Insurance project is very generally misunderstood, and, so far as I am concerned, I wish my views, and the grounds on which they rest, to be quite unmistakeable. The Government has very recently been charged, as it was charged in 1879, with breach of faith in having assigned to purposes of general administration what has been described as a fund set apart for a special object. The Government has done nothing of the kind, and has not in any way exposed itself to any such criticism. What has been the financial effect of the Famine Insurance scheme I may briefly illustrate by saying that through its operation the ordinary debt has been reduced since 1st April 1878 by £11,349,780; or by rather more than the figure of £1,500,000 per annum, which, it will be remembered, was the figure originally contemplated. *Gutta cavat lapidem, non vi sed sæpe cadendo;* and there seems, in some quarters, to be an idea that if you only drop false statements fast enough, you will succeed at length in wearing away the polished surface of truth. When the accounts of the year are published, it will be found that the Government has devoted the Famine Insurance grant to the purposes to which it usually is devoted. But in exposing the unreasonableness of the accusation which charges us with misappropriation of what has never existed, I have forgotten to explain why, in our present circumstances, we feel ourselves unable to turn for relief to the £1,500,000 which furnish the annual famine grant. The necessity for continuing to appropriate it as at present, and the grounds on which we do not desire to appropriate this grant to ordinary expenditure, is that we are embarked on a series of railway works, intended to protect the people from the effects of famine, which we are carrying out partly by the aid of this Famine grant; works which would otherwise have to be dangerously deferred or completed with borrowed capital. When those works are completed, it will be for the Government of the day to decide whether the amount annually devoted to the famine grant cannot at least be lessened. These are the grounds on which we consider that the Famine grant should not be interfered with. We recognise no separate fund; but we do recognise and confirm the necessity of carrying to completion the railway and irrigation works necessary for the protection of the millions of this country from famine. But nevertheless I wish to repeat that if the sad necessity arose, from causes which I above glanced at, of appropriating the million and a half or a part of it, which at present is assigned to what is called the Famine Insurance grant, to other purposes connected with our ordinary expenditure, it is in my judgment perfectly open to the Government to do so; and it might in my opinion become extremely foolish to prefer vexatious taxation or excessive crippling of our ordinary needs in order to continue the working of a scheme which is excellent so long as it can be worked with convenience to the general financial administration, but which would become quite unendurable if, in order to maintain its existence, we were called upon to make exasperating sacrifices or impose extravagant burdens which were necessary for no other object than to keep this monster of our own creation fed with the funds necessary for its sustenance.

"I come then by a process of elimination to the third and last resource which is open to us, namely, to direct taxation, and I do so with a perfect knowledge of the delicate ground on which I am supposed to be treading. The financial history of the last 25 years is strewn with the skeletons of discussions on direct taxation, and more than one of my predecessors is gibbetted on that dismal Golgotha for the part which he took in connection with it. It has been my duty, in the course of my studies on the subject of direct taxation, to read again lately the various debates upon that much-vexed subject in which at different times my predecessors took part during the 20 years between 1860 and 1880. I have, in truth, but just emerged from them, like Œneas from visiting his ancestors in the Shades, and I am still overwhelmed and overcome with the sulphurous atmosphere in which I have lately been groping my way; atmosphere, 'From whose flames no light, but rather, darkness visible—Regions of sorrow,

doleful bodes where Peace and Rest can never dwell.' So that I am not likely to underrate the oppressive climate of the region into which I am doomed to re-enter, and into which I must invite the Council to follow me. The aphorism of Burke, quoted by one of the most distinguished of those who have held my present office on an occasion similar to the present, that 'it is as difficult to tax and to please as it is to love and be wise,' is one the truth of which has been illustrated in the person of almost every one of my predecessors, and will, I have little doubt, be once more illustrated in mine. But in spite of what has gone before and in spite of what remains to be said, (and I fear that we shall find during the next few months that a good deal remains to be said,) there can, after all is said and done, be no manner of doubt, but that one great fact remains established; one great blot on our administration not only still unremoved, but aggravated by the course of events in recent years. It is this, that, putting aside those who derive their income from land in the temporarily-settled districts, the classes in this country who derive the greatest security and benefit from the British Government are those who contribute the least towards it. Many opinions of many kinds have from time to time been expressed as to the nature of the advantages or disadvantages introduced into this country by British rule, but on one point all (even the most envenomed and hostile of our critics) are agreed, and that is that it has given greater security to life, property, and trade, and to the amassing, therefore, of wealth, than any Government that ever preceded it. Yet notoriously the mercantile and professional classes, to whom this time of sunshine has brought such an abundant harvest, are precisely those who contribute least towards the support of the Government in the light of whose power they bask. We are constantly assured, for example, by journalists in this country (who, in their capacity of journalists, by the way, make a considerable untaxed income in pursuit of their efforts to bring home to us this assurance,) that the limits of taxable resources have been reached. Whatever may be the case with the poorer, or the lower middle class, the upper middle and the upper classes, in spite of our friends the journalists, enjoy the greatest immunity from taxation. If this was true before the abolition of the import duties, and the reduction of the salt duties, it is still more unanswerably true now. I know that what I have said as to the immunity of the middle and upper classes from their due share of the public burdens is as a twice-told tale, vexing the dull ears of a drowsy man; but it is nevertheless a grievous blot on our Indian administration, which urgently calls for removal, and which, I believe, with patience, prudence, and the exercise of a little fortitude, must and will be removed. Efforts have indeed, at various times, been made to remedy this scandal, for scandal it is of the greatest magnitude when the poorest are called upon to pay heavily for the support of the Government, and the wealthier classes are exempted; but from one cause or another the measure has never been carried out, except for short and broken periods of time. Then, again, there is another and a very important and very decisive element which has been introduced into the question since it was debated in this Council Chamber in the days of Lord Mayo. It is this, that when the indirect duties were swept away or lessened, it must have been obvious to all, to the most indifferent observer no less than to the intelligent student of Indian finance that, should difficulties recur, economy and direct taxation were the only alternatives possible. As a reserve, indeed, we could, consistently with the policy which removed the import duties, raise the salt duties; but a reserve necessarily from its nature should not be made use of till other possibilities have been exhausted. The action of the policy of the Governments of Lord Lytton and Lord Ripon in respect of the import duties upon our future policy in respect of taxation in India was well put by Sir A. Arbuthnot in the debate of March 2, 1880, when he said:

'Therefore, my Lord, while speaking as an individual member of this Council, I deeply regret the policy which has deprived the Government already of a portion of their indirect revenues, and which threatens to exterminate an important branch of those revenues altogether; while I view that policy with the gravest apprehension, I cannot but recognise the fact that, as a result of that policy, a permanent system of direct taxation may prove to be inevitable. And if it shall so prove, if events shall so turn out that the Government of this country shall deem it necessary to retain such a system as a permanent part of their fiscal sys-

tem, I feel bound to say that, in my opinion, it will be incumbent upon the Government of India to place that taxation on such a basis that it will touch not only the trading community, but all the comparatively wealthy, and especially all possessors of realised property, and to discard the present license tax, which, notwithstanding the remedy afforded by the Bill before the Council, still falls unduly on the comparatively poor, and too exclusively on one class of the community.'

"There can be no manner of doubt that, as Sir Alexander Arbuthnot said, direct taxation is the necessary and legitimate result of the measures adopted in preceding years. The financial policy of the Indian Government since 1878 has pointed steadily at direct taxation. From that year onward, he that ran could read the indications of the time. In point of fact, for the last 8 years we have had direct taxation; but in a form so incomplete and so open to criticism that it was impossible not to foresee that it must be, on the first convenient opportunity, replaced by some measure more equitable in itself, and more suited to the circumstances of the country. An attempt has been made, and is still in operation under the form of a License Tax, to carry out direct taxation in part, but it is open to the vital objection that it presses most heavily on the poorer among the trading, mercantile and commercial classes, and leaves the wealthier besides other whole classes of the upper part of the population comparatively or absolutely unassessed. Almost from the day of its introduction efforts have been made by public bodies in this country, both English and Native, to obtain, instead of the existing License Tax, a more equal distribution of direct taxation, and acknowledgments have been tendered by the Government of the evils inseparable from that Tax as at present enforced, and of its determination, when a fitting opportunity arose, of putting it on a more equitable footing. In point of fact, so far had the matter gone and so ripe was it for settlement, that if no financial necessities had now overtaken us, we should have been imperatively called upon, in any case, very shortly either to abandon direct taxation altogether, or to take some measure of the nature which we now propose to introduce. It was impossible to go on from year to year admitting and deploring the evils of the existing tax and doing nothing whatever to remedy them. That was how the matter stood till the commencement of this year. We had the choice of abandoning direct taxation or of extending it; and we were in such a position that we could no longer decently delay making up our mind to adopt one or the other. But we no longer have even the choice now. As circumstances stand, for the reasons which have been, I trust, sufficiently explained in the course of these remarks, it is obviously impossible to us, even were it desirable, to abolish direct taxation; for we cannot spare the half million which it brings into the Imperial Treasury. Nor, again,—and mark this, for it is an important point,—if we abolished the License Tax, and with it all direct taxation, could we justify the retention of the cesses on land which were introduced simultaneously with it in 1878. What was said by Sir John Strachey in 1880 is equally applicable now: 'It would be hardly possible to maintain the cesses on the land, if the tax on trades were abolished. It might be more possible to defend the abolition of the cesses on land and the maintenance of the tax on trades.' So that we should have, if we let the License Tax go, to let the cesses on land go also, which is altogether out of the question. The only alternative, therefore, that remains is to carry out our oft-repeated pledges and to fulfil the promise, which we have on numerous occasions made to various public bodies in this country, of extending the operation of direct taxation in such a manner as to remove the anomalies complained of, and justly complained of, by those at present assessed to it. In doing so, we are not only fulfilling our pledges, but giving effect to them in a way which is in strict harmony with the policy pursued by our predecessors. In the Financial Statement of the present year, I said that should we be called upon to increase our revenues we should feel ourselves bound to do so on the lines of the policy adopted in 1882-83, and in conformity with the principles by which it was inspired. We are acting consistently with those principles when we propose to afford, as far as possible, relief in taxation to the poorer classes, and before calling on them for further contributions, to exhaust all methods of increasing our revenue which are independent of their sacrifices. If we are bringing

under contribution some 80,000 new persons, of whom a large part are officials, and of whom all are in comparatively easy circumstances, it is because we refuse absolutely to emancipate this small handful from taxation by adding to the burden of the 180 million who earn their bread by the sweat of their brow, and on whose shoulders the burden of the too vast orb of the public fisc at present practically rests. I do not therefore come before the Council to-day as an apologist for direct taxation. I have no intention here at this present moment of entering upon any examination of the merits or demerits of direct taxation in India or of anticipating the objections to it which, at a later stage of this Bill, may very probably be urged upon this Council. I think it very possible that the venerable old weapons of attack, the arquebuss of 1860, and the muzzle-loader of a later day, will be furbished up and brought out with the last weapon of the moment and once more will be levelled at us; that the imposing structure of former discussions will be lugged from its resting place and paraded round and round this Council Table with its sable nodding plumes, its gloomy trappings, its scenic accessories of word painting, and its motto of *sæva indignatio*. But I should like to point out at once, in order to obviate misunderstanding and profitless discussion hereafter, that objections based on the experience and former arguments employed in reference to an Income Tax, must be considerably modified if they are to be aimed at the measure which we desire to-day to introduce. The measure which I wish for leave to introduce is in many respects a different measure from those which have been hitherto placed upon this table in the form of an Income Tax. In the first place, it is built on the foundations laid nine years ago for the License Tax, and is not an introduction but an enlargement, an extension and equalisation, of direct taxation. Next, it will be found that it leaves the present License Tax undisturbed in the case of the lowest class of incomes, except so far as it adds professions and offices to trades and dealings. It aims at maintaining an average assessment of 2 per cent. on incomes below ₹2,000, the rate at and above ₹2,000 being about 2½, or five pies in the rupee, but falls at a sensibly lower average rate on all incomes between ₹500 and ₹1,250. It exempts, like the present law, all incomes below ₹500 per annum from taxation. Of the present assessees, 122,000, so far as we can at present calculate, will have their present assessment entirely undisturbed; the assessment of about 100,000 will be more or less raised. It takes no account whatever of land assessed or liable to be assessed to revenue whether in the permanently or temporarily-settled Provinces. The combined schemes will not affect more than about 300,000 persons only, officials included, out of the whole population of British India. The measure, in a word, aims at meeting the objections of those who, while more or less opposed to an income tax as generally understood, have, at different times in speeches before this Council, or elsewhere and in other ways, intimated that they concur in the conclusion that the more well-to-do classes should be taxed; and that if they could not be reached otherwise they would be prepared to agree to direct taxation, on lines such as those we are now following. At a later stage of the proceedings connected with this Bill I shall be prepared, if necessary, to produce ample evidence in support of what I have now said; and to quote the several authorities to whom I allude. Avoidance of inquisition, especially in the case of the smaller incomes, maintenance and continuity of existing rates and estimates; a liberal figure for exemption from assessment, a moderate rate of assessment,—these are the conditions in which even avowed enemies of an income-tax have intimated in this Council their willingness to see direct taxation incorporated, as we desire to incorporate it, as a part of our fiscal system. All this we have set ourselves to meet, as will be evident on examination of this Bill. We estimate, finally, that it will give us about £620,000, additional to the £500,000 which is the yield of the present License Tax, leaving a small balance on the £700,000 we require which we should have no difficulty in meeting.

"I do not conceal from myself that in some ways the present is an unfortunate time for the re-introduction in India of an assessment on salaries and in a less extent on mercantile incomes, owing to the uncertainty and hardship

connected with the present state of the silver market. I have no wish to make light of this difficulty; far, very far from it; it is a grave one; and I know only too well that the state of the silver exchange is severely felt in a large number of Anglo-Indian households. More or less it affects us all, increasing the difficulties of one in finding adequate funds for the education of his children, to the other diminishing the economies which he looks to to facilitate his retirement, and to support him in later life, and thereby prolonging the period of his service in India. All this I know, as I have said, only too well. But I know equally well that we are of necessity compelled to turn to the tax-payer for fresh resources, and that if we do not look for them to the comparatively wealthy, we must turn to the positively poor. The choice lies between the classes who have or who can make for themselves a margin, and those who have no margin at all. It is on the *misera contribuens plebs* that an increase of the salt tax, or a re-imposition of import duties such as the Madras Chamber of Commerce have lately advocated, would fall. We are all, I am aware, concerned in the measures necessary for the safety of the Empire, but I may remind this Council that it is certainly not the middle or the upper class of Native or the Anglo-Indian merchant or official who are least concerned. So that neither in this regard can I come before this Council as an apologist. In the necessities of the time,—in the interest of all classes of the community,—in the present incidence of our Indian taxation,—in the legitimate and necessary result of the financial policy pursued by our predecessors,—in the admissions of those who oppose an income tax,—will be found the justification of the measure which I now have the honour to ask Your Lordship to allow me to introduce. I have shown what our financial position is; I have added that, while we are not forgetful of economies, we cannot hope, in the ensuing year, for any great relief in this direction; I have stated why, in our opinion, resort to indirect taxation is undesirable; I have pointed out that direct taxation is the necessary outcome of the financial policy of the last 8 years; I have drawn attention to the provisions of the Bill to prove that it is framed with a view to profiting by the great experience which in a quarter of century we have acquired; I have glanced at the objections which may be urged in view of the silver exchange, and while deploring its effect on the position and the circumstances of so many here in India, I have given my reasons for thinking that, objection for objection, there is more to be said in favour of the struggling silent masses than of the few on whom addition to their present difficulties will fall; and I now look to the candour and intelligence of my hearers to decide whether in these circumstances some revised form of direct taxation is not inevitable, and whether direct taxation in the form embodied in the Bill which I wish to lay before the Council is not unquestionably a course which is more free from objection than any which can be urged upon our attention as alternative."

His Excellency THE PRESIDENT said:—

"As Sir Auckland Colvin has made so complete and lucid a statement of our present financial position, and the reasons which have compelled the Government of India to introduce the present Bill, it would have been scarcely necessary for me at this stage of the proceedings to trouble you with any observations of my own, did not I think it my duty to seize the earliest opportunity of taking upon myself, as the Head of this Government, the full responsibility of a measure which, however imperative, must by its very nature prove extremely unpopular. The Financial Member in taking the initiative has merely discharged the technical duties attaching to his office, and he is no more responsible for the policy upon which we have determined than any other member of the administration, inasmuch as the causes which have created the difficulties with which we are about to grapple have in no way resulted from circumstances over which the Financial Department have had the slightest control. Before, however, I touch upon that part of the subject which concerns the future, it is but right that the Indian tax-payers, and the Indian public generally, should receive a full explanation in regard to the past, and to the causes which have occasioned the actual deficit which will confront us at the conclusion of the present financial

year. That deficit, as you have been already told, will probably amount in round numbers to £2,800,000. The principal portion of this sum, which may be put roughly at a couple of millions, is due to those preparations which we were compelled to make on our side of the water in view of a possible contest between Great Britain and Russia. The nature of the crisis to which I allude was thoroughly understood from one end of India to the other. Its gravity was fully appreciated, and there probably has never been a more gratifying feature in the history of this country than the way in which all classes of Her Majesty's subjects came forward, not merely with a unanimous expression of loyalty and devotion to the throne and to the person of the Queen Empress but, in numerous instances, with offers both of personal and material assistance. In these circumstances, it scarcely is necessary for me to show that the expenditure which we at that time incurred was necessary and inevitable. It will be sufficient for me to point out that so imminent was war considered by Mr. Gladstone and his Colleagues that the reserves were called out and a powerful fleet was equipped by the British Government, at an expense of six and a half millions. I imagine that no one will care to suggest that, while these sacrifices were being made by the English tax-payers with the view of maintaining the sanctity of the North-Western Frontier of India, India herself should have remained a listless spectator of the scene, and have done nothing for her own defence. But though we felt it incumbent upon us to prepare for what then appeared the probable contingency of war, we restricted our precautionary measures to those which the barest necessities of the case required. We contented ourselves with providing such an amount of transport and stores as would enable us to place a corps d'armée of observation on our own frontier. We did not mobilise a regiment, or move a man or spend a penny otherwise than on these initial and elementary measures, and had any Government done less, it would have deserved impeachment.

"The other items of the deficit have been occasioned by the construction of a temporary line through the Bolan Pass from Rindli to Quetta, and by our military operations in Upper Burma, the cost of the latter of which has been estimated for the current year at £270,000. With regard to the first of these projects, the Bolan line, I need not say much. It is well known how fatal to the lives of our soldiers and how intolerably expensive has been in times past the despatch of troops on foot along this fatal road. A considerable period must of necessity elapse before the Harnai route can be completed, and were a war to occur there is no doubt that the existence of direct and through railway communication to Quetta would save thousands of lives, as well as the original cost of the railway many times over.

"As to the Burmese war, though it is not perhaps a very fitting opportunity for explaining the policy of the Government, there are one or two observations it might be opportune for me to make in regard to it. That our proceedings in the matter have been almost unanimously approved of in England has long since been sufficiently apparent. In this country, however, a different view has been taken of the affair by a considerable proportion of the native press. That this should be the case has not at all surprised me, and I readily admit that the instinctive aversion so many of our native friends have shown to the Mandalay expedition has been both natural and reasonable. As a general principle, it is not desirable that either the limits or the political and financial responsibilities of the Indian Empire should be extended, and every Indian tax-payer is perfectly justified in apprehending that every war, no matter upon how moderate a scale it may be conducted, or how successful its issue, must add to the public burdens. Nor, indeed, can we expect that those larger and predominant considerations which dictated the line of action we have followed should be present to the minds of the great mass of the Indian people. To them Burma is a remote and foreign country. The history of our relations with the Government of King Theebaw during the past years is alike indifferent and unknown to them, and we must not be surprised if the inhabitants of Lahore, or of Trichinopoly, Benares or Multan should fail to remember that for thirty years Lower Burma has formed an integral part of the Indian Empire; that it has contributed its full share, and, as the Burmese allege, more than its full share, of taxation to the Imperial Exchequer;

and that anything which affects its security or welfare must of necessity prove of as deep concern to the Government of India as if it lay in the heart of Her Majesty's Indian possessions. A variety of concurrent circumstances made it only too evident that the future of Lower Burma would be seriously compromised unless we came to some satisfactory understanding with the Government of Mandalay in respect to the various outstanding complaints which for years past we had been vainly preferring to the Burmese King. An honest and sincere endeavour was made to reach an amicable settlement, but our well meant intentions were frustrated by the folly of the Ruler, and we were forced very reluctantly to undertake the conquest of the country. Thanks to the skill, the prudence, and the humanity with which the expedition has been conducted by General Prendergast, and to the zeal and energy displayed by Her Majesty's forces of both services, English and Native, the Capital of Upper Burma has been occupied, it may be said almost without bloodshed, and certainly without engendering any bitterness of feeling between ourselves and the Burmese people. That these proceedings will entail a certain amount of cost cannot be denied; but, without endorsing the complaint of the representatives of Burmese interests, who maintain that the Indian Exchequer has unduly profited for many years past by the exorbitant amount of Burmese revenue which it absorbs, it will probably be found, when the debtor and creditor account between India and Burma is finally examined, even after the expenses of the present war have been duly debited, that an ultimate balance sheet will be shown which may by no means prove unsatisfactory to the Indian tax-payer. As to the degree to which the revenues of Upper Burma may suffice to provide for the wants of its own administration in future, nothing at present can be said. It was necessary, of course, once the conquest of the country had been effected, to determine and to declare for diplomatic purposes its international status. This has been done by the Proclamation of the 1st of January, under which the authority of the Viceroy is substituted for that of the late King. Such an arrangement, however, though required by the actual circumstances of the case, will eventually be replaced by a more fully regulated system, the nature of which will, in all probability, not be determined until I have myself visited Mandalay, and been in a position to submit a report to the Queen's Government at home.

"Having now dealt with the causes of our actual deficit, and one or two subjects cognate to them, I will ask permission to make a few further observations in regard to the Bill we propose to introduce. The object of that Bill is to impose a tax upon those classes who at this moment contribute nothing, or only contribute in a very imperceptible degree, to the Indian revenues. On the necessity for strengthening our present financial position I will not enlarge. Sir Auckland Colvin has clearly shown that the financial position of the country is gravely imperilled by a harassing uncertainty in regard to the future of silver. The fall of a penny in the price of silver at once adds, in round numbers, a million to our expenditure. In this manner, since I entered upon the duties of my office, an additional charge of a million sterling has been laid upon our shoulders; and though I trust that the depression of the metal may have reached its lowest limit, the possibility of a further fall, and the consequent presence of an element of uncertainty in all our accounts, renders it absolutely incumbent upon the Government to take such precautionary measures as the circumstances of the case permit. After consultation with a number of persons, both English and Native, who are entitled to speak with great authority upon such questions, we have framed the provisions of the present Bill, and from first to last the utmost care has been taken to render their application both equitable and as consonant to the habits and feelings of those affected by it as possible. I am aware that in all Eastern countries there is great objection to anything approaching to direct taxation, and I might have hesitated to give my assent to such a measure as the present if it had been an unprecedented essay in that direction; but so far from this being the case, direct taxation has for some years past formed a portion of the fiscal system of India. The license tax is a tax essentially direct both in its principle, its incidence, and its application, and so far as

I have been able to learn by enquiry, or to gather from the public prints, the opposition which this impost originally encountered has in a great measure subsided. Its assessments have been gradually brought into harmony with the real status of those who have been subjected to it. Its inquisitorial character has been eradicated, and it is now submitted to with as much cheerfulness and good humour as is compatible with the infirmity of human nature. The necessity then of some addition to our public revenues being admitted, the Government naturally considered that the extension of a tax similar in principle to the license tax to those classes of the community who are not subject to its operation was both a just and a desirable expedient. The only alternative open to us was to re-enhance the salt tax; but though this would have been an indirect tax, and consequently not so unpopular as the one we are about to impose, its operation would have chiefly affected the poorer masses of the community. Now, I am very far from wishing to say that in the presence of any overwhelming necessity, such as that of a great war or a great famine, it might not be necessary to raise the duties upon salt. It would be by such a measure alone that a great emergency of the kind could be met, and all minor considerations would have to be postponed to the imperative necessities of the hour; nay even something short of either of these calamities might justify us in resorting to it; but when the situation merely requires a comparatively slight addition to our current revenue, it is obvious that any honorable man who had to choose between taxing the most indigent classes who already contribute a considerable share of the public burdens, and taxing those classes who, though in easier circumstances, scarcely contribute anything, it is to the latter alternative that he would resort. This at all events is the conclusion that the Government of India has come to in the matter. We look abroad, and we see that the peasant pays his salt tax, which, though it has been reduced, still supplies us with a yearly net revenue of £6,000,000; that the landowner pays his land tax and his cesses; that the tradesman and the merchant pays his license tax; but that the lawyer or doctor, the members of the other learned professions, the officers of Government, and other persons occupying an analogous status, and the gentleman at large pay little or nothing. I look around this very table, and what do I see? that there is not one of us into whose pocket Sir Auckland Colvin is able to get so much as his little finger. For instance, take my friend Mr. Mandlik, a most eminent and distinguished member of the legal profession. He will admit, I am sure, that his qualifications to rank as a tax-payer are of the most microscopic proportions. The same may be said of my friend Mr. Peári Mohan Mukerji, except in so far as he may be a landowner; but whatever revenues he derives from land are exempted from the operation of this Bill. I might make the same appeal to most of our other colleagues, and, what is equally sad, I am forced to make an identical confession in regard to myself and to the members of the Government. There is not one of us who pays any really serious sum from his income into the Imperial Exchequer.

"Now, surely, this cannot be right, and to such an anomaly it is no answer to say that direct taxation is repugnant to oriental customs. Justice is the inhabitant neither of the East nor of the West. She admits no geographical limits to her supremacy, her throne is on high, and sooner or later, in spite of prejudice or custom, she never fails to vindicate her title to the respect and veneration of mankind. It is then in the name of justice that we propose the imposition of this tax, and we feel assured that every fair and right-thinking man in the country, no matter how his private interests may be affected by our action, will recognize that no other course was open to us. Indeed, already I see that no less intelligent a body than the congress of Indian delegates lately held at Bombay have forestalled our conclusions, and have passed a Resolution, recommending, in default of other expedients, the extension of the license tax to those members of the community who hitherto have enjoyed an undeserved immunity from the visits of the tax-collector.

"But, though I do not anticipate that any serious objections will be raised to the principle of the Bill, it is possible that adverse criticisms may be passed upon some of its details. I need scarcely say that the most searching criticism, especially if accompanied by practical suggestions, will be very

welcome and will receive from the Government most careful and impartial consideration. I do not anticipate, however, that any great changes will be necessary, because great care has been taken to divest it of all those unsatisfactory characteristics which have hitherto rendered the imposition of direct taxation so unwelcome. Warned by the experiences of those who have gone before us, we have carefully eliminated from our Bill everything that rendered former measures of the kind odious and obnoxious. In fact, our project is merely an expansion of the license tax. The license tax is a one-storied house, and on the top of it we are putting a second storey, but the order of architecture in both will be the same; and as the foundations of the one have stood the test of time and of popular criticism, so I trust will the walls of the other possess the same solid characteristics.

"But there is now another aspect of the question to which I am bound to refer. Following in the steps of Sir Auckland Colvin, I have shown, I trust in a perfectly conclusive manner, that the instability of silver, and the loss by exchange we have sustained during the current year, have compelled us to strengthen our financial position in the manner I have described; but, besides this, other unexpected calls upon our revenue have arisen, which have also had their influence in determining us to introduce the present Bill. A few short years ago, India was an isolated region, cut off from the rest of the world, on two sides by the sea, and on the third by a range of mountains whose further slopes were inhabited by populations destitute of modern arms, unskilled in the arts of war, and from whom no serious acts of aggression were to be apprehended. But within a period of startling brevity this situation has been completely revolutionized. A great European Power has advanced its confines by sudden leaps and bounds into what by comparison may be called close proximity to our own frontier. It is true, several hundred miles still separate the territories of India from those of Russia, but the intervening space is ruled by a Prince in close alliance with ourselves, whose interests are cognate to our own, and the invasion of whose territories we are solemnly pledged to resent so long as he conducts his external relations in accordance with our advice and wishes. I do not propose to waste the time of the Council by entering upon any justification of the arrangements out of which the foregoing obligation has arisen. They were made by my illustrious predecessor, to whose good management and wise conduct of the affairs of the North-West we are indebted for a united Afghanistan and a friendly Afghan Ruler. But whatever their character, they have to all intents and purposes brought, though in an indirect manner, the area avowedly dominated by our political influence and ascendancy into direct contact with one of the greatest Military monarchies of the day. Under these circumstances it would be the height of folly upon our part if we did not recognize the change which has taken place in the external position and relations of the Indian Empire. My own opinion is that the counsels of Russia are controlled by a just and peace-loving Emperor, and inspired by a moderate and unaggressive Statesman; but those who have watched the recent current of events in Europe and the origin and causes of some of the most bloody wars of the last thirty years, must be aware that the hands of Monarchs, however powerful, and of Ministers, however conscientious, are violently forced and their most earnest desires countervailed by a hundred disturbing influences. The accident of a moment, a wave of popular prejudice or passion, the influence of a subordinate but powerful party in the State, a chance collision between distant pickets,—each one of these, or all combined, have been and will be again sufficient to bring the nations of the earth into disastrous collision. But for the accidental circumstance of the Amir being in my camp at Rawal Pindi, and the fortunate fact of his being a Prince of great capacity, experience, and calm judgment, the incident of Penjdeh alone, in the strained condition of the relations which then existed between Russia and ourselves, might of itself have proved the occasion of a long and miserable war. But, not only so, there are other contingencies and untoward possibilities which must occur to the mind of every one, though it may not be desirable or prudent to specify them in detail, which, were they to happen, would still further accentuate the change in our circumstances which the entry of Russia into the Valley of the Hari-Rud, and her advance to the borders

of Maruchak, Maimena, and Balkh, have occasioned. If then the situation is such as I have described, and I have endeavoured to shape my language in accordance with absolute fact and the suggestions of plain common sense, it is evident that we should be neglecting a grave and obvious duty did we not follow the example of all civilized communities under such circumstances and place our frontiers in such a position of defence and impregnability as will render us comparatively indifferent to the changes and chances of the outside world, and restore to us that feeling of security and independence of others which is absolutely essential to the stability of our credit and the healthy condition of our finances. These necessities have been equally admitted by the late and the present Governments of Great Britain. During a remarkable debate which took place last year, the representatives both of the Conservative and of the Liberal parties united in recognizing the necessity of completing with as little delay as possible such a system of defensive Railways, fortifications and other works along our North-Western Frontiers as would effectually bar our doors against all chances of annoyance from beyond them, no matter from what source they might proceed—whether occasioned by a foreign foe or by any change of policy on the part, I will not say of the present Ruler of Afghanistan—for of his steadfastness and fidelity we have received satisfactory proofs—but on the part of any of his successors. With such a consensus of opinion in the Parliament of Great Britain, the Government of India had no difficulty in discerning what line of action to adopt. Some very complete and well-considered projects for the construction of military railways wherever strategic considerations might require them to be laid had already been drawn up by the late Viceroy and accepted by the Secretary of State, and during the past summer the military authorities here, in conjunction with those at home, have been elaborating a plan for the erection of such places of strength, fortresses and fortified positions, as may be best adapted for the purpose we have in view. In doing this we shall be merely following the example of every other nation in the world, who, no matter how friendly may be its relations with its various neighbours, rightly feels that its security and peace should not be allowed to depend upon their good-will, however genuine, or their professions of amity, however sincere, but upon their own valour and prudence, aided by such means as military science can suggest for the protection of their borders.

"It has also been determined for the same reasons to increase to a moderate degree the numbers both of the British and of the Native forces in India. This is a measure which the late Commander-in-Chief, one of the most economical, sagacious, and prudent officers that ever occupied that high position, most earnestly counselled, and the necessity for it has been impressed upon us in an equally emphatic manner by his present distinguished successor, as well as by other persons entitled to speak with scarcely less authority. But, though anxious and ready to give every proper consideration to the recommendations of those who are the legitimate advisers of the Government of India in these matters, we felt that due regard had also to be paid to the financial exigencies of the situation. Consequently, the addition we propose to make to our present forces falls considerably short of the figure desired by Sir Donald Stewart and other high military authorities both here and at home. In coming to this conclusion the Government has felt that it was incurring a very grave responsibility, but still, on balancing the conflicting considerations forced upon our attention, we are convinced that the more moderate limit we have adopted is the one best suited to the circumstances of the case.

"Unfortunately, precautions of this kind cost money, and the necessities of the case require them to be pushed with energy and rapidity, and, although the expenditure needed for the greater proportion of these works will be, as heretofore, provided by loan, (and by sums refunded to us from time to time by the private Companies to which Government Railways may be transferred), we shall have of course to pay the interest on whatever sums we borrow. Then again there are three Famine Railways which have been already commenced, and which the Government are determined to complete with all despatch, namely, two in Madras and one in Northern Bengal. And here perhaps I

may take an opportunity of correcting an error which has been frequently made, and which seems to return to new life each time that it is corrected, namely, that any inroad has been made upon the Famine Grant. When I arrived in the country, I found that the system which had been followed by my predecessor had been to apply half a million a year from the Famine Grant to Famine Railways; £250,000 to Irrigation Works; and the remainder of the Grant to the diminution of debt. The justification for its application to this latter purpose has been so fully set forth and explained in a speech of Sir Evelyn Baring's that I need not say any more upon that head. Such was the system I found in vogue when I arrived in India, and during the current year that is the exact system which has been followed. These facts are perfectly well known to all that are acquainted with the subject, and now that I have myself re-stated them in Council, I trust that the foolish ghost of this perennial fiction has been once and for ever laid. In fact, I may say that, so far from diverting the Famine Grant to extraneous purposes, there is nothing which myself and my colleagues have so strongly urged upon the Secretary of State as the desirability of continuing the policy sanctioned by our predecessors, at all events until we shall have reached a stage when our Famine Protective Railways shall have sufficiently multiplied to compress within tolerable bounds the chance of such casualties from famine as have desolated the land in past times. But, though such is our intention and desire, we have thought it perfectly consonant with the principles I have enunciated to ask the Secretary of State that, instead of making all these Famine Protective Railways ourselves, we should be permitted to apply a small proportion of the Famine Grant to the payment of interest to certain companies whom we propose to entrust with the construction of special lines, possessing a protective character, and which, by their completion, will diminish the evil consequences of bad seasons in various threatened districts.

"Such, Gentlemen, are the circumstances under which the Government of India have asked this Council to give leave for the introduction of the present Bill. Stated briefly, our chief justification for the measure is to be found first of all in the extraordinary fall of silver which has recently taken place, and in the uncertainty which prevails as to the future fluctuations which may affect its value. In the presence of such a state of things, the strengthening of our financial position became an absolute duty, and the performance of this duty has been rendered still more incumbent upon us by the necessity, which has been equally recognised by every shade of public opinion in England, of strengthening our frontier defences, and prosecuting with energy the completion of our Frontier Railways. In determining the amount of money to be raised, we were very careful to limit it to the mimimum sum which we thought it safe to ask for, and you may be satisfied that in carrying out the programme which has been determined upon, the Government will be careful to square its efforts with the means at its disposal. All the works which are contemplated cannot, of course, be carried out at once, and by the exercise of prudence and discretion, and by a wise adaptation of the means at our disposal to the ends in view, it may fairly be hoped—unless some unforeseen catastrophe should overset our calculations—that with this slight addition to the taxation of the country, which as I said before will merely touch those who hitherto have contributed but slightly to the public burdens, we shall be able to carry out our programme. Nor need we by any means despair of a very considerable proportion of the expenditure to which I have referred proving remunerative. Railways of course which are simply constructed for strategical reasons cannot be expected, as they are not intended, to prove profitable commercial speculations; but it so happens that the two principal Railways which are to subserve our Military needs will run in such a direction as in all probability to become of the greatest service to commerce. As every one knows, the caravan route which connects Hindustan with Persia and Central Asia runs through Quetta, and the goods which are now conveyed on camels' backs to the proximity of the Indus may be expected to feed the chief of these lines with a continually growing traffic. Again, the Sind-Saugar Railway, which will enable us to move our troops along the whole face of our frontier, may from the peculiar circumstances of its location

eventually become a considerable commercial artery. These results, however, are only subsidiary to the main purpose of the two lines in question, and I merely mention them as affording some consolation to those of us who like myself have an instinctive dislike to purely Military expenditure.

"It only remains for me, Gentlemen, to thank you for the patience with which you have listened to me, and to apologise for the length of my observations; yet there is one thing which I desire to say before I conclude. Although I have not the slightest doubt or difficulty in recommending you to agree to the introduction and to the eventual passing of this Bill, I cannot help desiring to express my extreme and heart-felt regret that the occasion should have arisen for legislation of this description. The imposition of taxes is always an ungrateful task to any Government even when its measures have received through their representatives the sanction of a majority of the people. The performance of such a duty to persons situated as are my colleagues and myself is still more irksome. When I reached the shores of India, I had marked out for myself a very different programme. For five years the country had been administered by a wise, cautious, and distinguished Statesman, who had devoted his attention to the internal welfare of Her Majesty's Indian subjects. Peace reigned from one end of the land to the other; and though our Financial Member could not boast of more than an actual equilibrium between our resources and our expenditure, there was no reason to anticipate until some months after my arrival that anything was likely to disturb the even tenor of our way. My predecessor having had such exceptionally favourable opportunities for introducing reforms, and of bringing the institutions of the country into harmony with its growing wants and aspirations, my ambition was confined to the humble intention of watching the effects of his policy, and tending and watering what he had planted. We all know how rapidly these prospects have been overclouded by a succession of adverse circumstances over which this Government has had no control; and now, at the expiration of the first year of my term of office, I and those associated with me in the government of the country find ourselves driven to a course of action which cannot fail to cause inconvenience to certain classes of our fellow-countrymen, whose worldly trials and troubles are already sufficient, I dare say, to try their patience and fortitude to the utmost. Let me assure them that, at all events, neither my colleagues nor I have failed to comprehend the many sacrifices which the imposition of this taxation, moderate as is the scale we have adopted, and comparatively few as are the individuals it will affect, cannot fail to entail upon many of them; and most deeply do we lament the necessity of subjecting them to the ordeal. These observations more especially apply to those Anglo-Indian servants of the State who are compelled by their domestic necessities to transmit to England the greater part of their hard-won earnings for the support of their children. That very depreciation of silver from which the revenues of the State have so greatly suffered has also made itself felt in their case with the most bitter severity. On the other hand, however, it must be remembered that only five years ago three millions of taxes were remitted by the Government of the day. The amount of taxation which we are about to impose will not probably bring in more than six or seven hundred thousand pounds, so that when all is said and done, the inhabitants of India will be still left the enjoyment of more than two millions of the taxation which was remitted in 1882 by Sir Evelyn Baring. Indeed, if an actual calculation were made, I think it might probably be shown—at all events in the case of the wealthier classes we are now bringing into our net—that the gain they have derived from the remission of the import duties compensates them in a considerable degree for the additional impost to which they are being subjected. Be this, however, as it may, whatever the sacrifice, whether it affects the Anglo-Indian or the native servants of the British Crown—of this I am sure, that if they are once convinced that the measures proposed by this Bill are necessary to maintain unendangered the honour of the Queen-Empress and the safety and security of the Indian Empire, and of the millions of hearths and homes it contains, as well as the stability of our public credit, they will cheerfully submit to them. The offers of assistance forwarded to me during the course of last summer in so generous

a manner by the Princes, Zamíndárs, and leading men of the country more than justifies such an expectation. But the days are past for supplementing the resources of the State by private benevolences. The only fair and effectual way of accepting the assistance we have been proffered is by recommending to the generous acceptation of the people a fair, just, and equal measure of taxation. This in our hearts and consciences we believe we have done. But there is one other measure by which we intend still further to fortify our financial position, and to protect it from whatever changes or chances the future may bring forth. Although from time to time during past years frequent endeavours have been made to examine the great machine which constitutes the Indian Government, with the view of rendering its operation more effective and economical, much I cannot but believe still remains to be done in that direction. As you are aware, the Government of India itself controls but a part of the expenditure of the country, so large a proportion of the Imperial resources having been confided to the control of the Provincial and subordinate Administrations. Very soon, however, the Provincial contracts instituted between ourselves and the Local Governments will expire; and it will be necessary, especially in view of the circumstances to which I have referred, most carefully to review them. At a time when fluctuations in the currency are threatening the stability of our whole financial system, and when the possibility of external commotion is darkening the political horizon, it is very evident that the duty of economy and retrenchment ought to be prosecuted with the utmost energy and decision. Already we have initiated this policy with effect; and by an appeal to the Provincial Governments, which I must say was answered with the greatest loyalty, we have to a very considerable extent been compensated for our additional Military expenditure. But this was a temporary measure to meet an equally temporary need. It is now desirable to ascertain whether it would not be possible to add considerably to the margin of our resources by a careful revision of our Imperial and Provincial expenditure, as well as by the addition to our income with which the present Bill will provide us. With this view the Government of India have determined to issue a Financial Commission, so strongly constituted and furnished with such instructions, as to ensure that the task entrusted to them will be conscientiously performed, and to prove conclusively that the Viceroy and his colleagues are thoroughly in earnest in their determination to adapt the administration in all its branches to the financial exigencies of the Empire."

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN then introduced the Bill. He said:—"In introducing this Bill I do not propose to occupy the attention of the Council very much longer. I have already stated in making the Motion for leave to introduce this Bill that this measure follows the lines of the existing License Tax Act as closely as the different circumstances of the case would allow. Thus, we have retained as far as possible the machinery of assessment and appeal, so as to minimise, where we cannot wholly avoid, the chances of inquisitorial or vexatious proceedings. But of course in extending the tax to the classes included in this Bill and in doing away with a maximum rate of assessment, we have been obliged to modify the provisions of the License Tax Act. In the second Schedule of the Bill will be found the sources of income which will be liable to the tax, and which fall under four heads, each being taxed under a separate part of the Schedule. The first part includes salaries and pensions, the second, profits of joint stock companies, the third, interest from securities, and the fourth, other sources of income, that is to say, the trades and dealings now taxed under the License Tax Act, plus professions and certain other sources of income not included in the previous parts. With regard to the rate of assessment, we propose to make it a rate of five pies on the rupee or approximately 2½ per cent. upon incomes of Rs. 2,000 per annum or upwards, and four pies or approximately 2 per cent. upon incomes under Rs. 2,000 per annum. We have thought it more convenient for purposes of calculation and assessment, to take so many pies on the rupee rather than a percentage, and in so doing we have followed the precedent of 1870.

"Then, with regard to sources of income not to be subjected to assessment under this Bill. They include income derived from agriculture and from land liable to be assessed to land-revenue, or subject to local rates, the income of charities, interest upon stock-notes, the pay of military officers drawing Rs. 500 a month or less, all persons whose incomes from all sources are less than Rs. 500 per annum, and the salaries of Government officials drawing less than Rs. 100 per mensem. The sums paid under the capitation-tax in Burma and the páṇdhari-tax in the Central Provinces will be deducted from the amount which persons assessed to them will have to pay under this Bill. With regard to the mode and machinery of assessment, the tax upon salaries, and upon pensions and the interest upon Government securities will be deducted by the paying authority. In the case of joint stock companies, notices will be issued to be filled up with a return of income. In the case of incomes arising from other sources, a distinction is made in respect of incomes of and above, or incomes under Rs. 2,000. In the latter case, incomes are graded in six classes, ranging from Rs. 500 to Rs. 2,000, and for each class a fixed amount is prescribed. A list, as under the License Tax Act, is to be drawn up of the amount of assessment and the names of the persons liable to pay in this class, and such list will be notified in the office of the assessing officer. For incomes of Rs. 2,000 and over, notices will be served intimating to the persons assessed the amount they are liable to pay and the sources from which their income are chargeable, with certain other details which will be found in the Bill. This will be the general rule, but the Local Governments may make modifications in it with reference to special circumstances which they consider necessary. The machinery for the hearing of appeals and the revision of assessments is practically the same as under the existing License Tax Act.

"I do not know that I need specify further the characteristics of the other sections of the Bill. I think I have called attention to all which are in any way vital or which most require the attention of members of the Council."

The Hon'ble SIR A. COLVIN also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Monday, the 11th January, 1886.

FORT WILLIAM;
The 8th January, 1886.

S. HARVEY JAMES,
Offg. Secy. to the Government of India,
Legislative Department.

Note.—The Meeting fixed for the 2nd January, 1886, was subsequently postponed to the 4th idem.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SYSTEM OF PAID MANAGEMENT IN COURT OF WARDS' ESTATES.

Cir. No. $\frac{142\,R.}{45-6.}$

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Revenue),—dated Calcutta, the 23rd December 1885.

Read the following papers relative to the adoption of a system of paid management in Court of Wards' estates:—

(1) Extract paragraph 7 of despatch from the Secretary of State, No. 30 (Revenue), dated the 3rd July 1879.

(2) Letter from the Board of Revenue, to the Government of Bengal, No. 633A., dated the 9th September 1880.

(3) Extract paragraph 5 from a letter from the Government of Bengal, to the Government of India, No. 3178-1676, dated the 29th November 1880.

(4) Despatch to Her Majesty's Secretary of State, No. 9, dated the 10th April 1881.

(5) Despatch from Her Majesty's Secretary of State, No. 47 (Revenue), dated the 19th May 1881.

(6) Letter to the Government of the North-Western Provinces and Oudh, No. 72, dated the 4th March 1882.

(7) Extract paragraphs 7, 8, and 9 of a Resolution recorded by the Government of the North-Western Provinces and Oudh, No. 1410—I.-427, dated the 17th August 1885.

(8) Letter from the Government of the North-Western Provinces and Oudh, No. 1472—I.-440, dated the 27th August 1885.

RESOLUTION.—Resolved, that a copy of the papers cited above be published in the Supplement to the *Gazette of India* for general information, and that a copy be forwarded to the Local Governments and Administrations noted on the margin, with a request that the system of estate management referred to in the correspondence may receive careful consideration.

CHAS. S. BAYLEY,

Under-Secretary to the Government of India.

Extract, para. 7, of Despatch from Her Majesty's Secretary of State for India, to the Government of India, No. 30, dated 3rd July 1879.

7. I wish to be informed whether, beyond the cost or rateable charge on account of establishments, any contribution is levied in return for the services rendered by the various officers and Departments of Government in superintending the administration of these estates. Should there be no such charge, then, looking to the labour involved and to the great benefits thereby secured to these properties and their owners by the action of the Court of Wards, it seems to be deserving of consideration whether some such charge should not be imposed.

No. 633A., dated 9th September 1880.

From—H. J. S. COTTON, Esq., Offg. Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Revenue Department.

I am directed to acknowledge the receipt of your endorsement No. 1743—694L.R., dated 2nd September 1879, transmitting a copy of the Secretary of State's despatch No. 30, Revenue, dated 3rd July 1879, reviewing the Board's report on the administration of wards' and attached estates in Bengal for 1877-78. In the 7th paragraph of this despatch the Secretary of State observed:—

"I wish to be informed whether, beyond the cost or rateable charge on account of establishments, any contribution is levied in return for the services rendered by the various officers and departments of Government in superintending the administration of these estates. Should there be no such charge, then, looking to the labour involved, and to the great benefits thereby secured to these properties and their owners by the action of the Court of Wards, it seems to be deserving of consideration whether some such charge should not be imposed."

The Lieutenant-Governor has called for an expression of the Board's opinion on the question discussed in this paragraph, and I am now to submit the following report on the subject.

2. The question has, I am to represent, already been under the consideration of Government. In Sir George Campbell's time a report was called for as to the amount of work thrown upon district officers in connection with wards' and attached estates, and in their reply the Board suggested that the estates should pay part of the salaries of the Government officers employed in the duties of superintendence. The Government considered the suggestion a reasonable one, but as at that time there were proposals for taking in hand settlements and other improvements, which would require considerable expenditure to be incurred by the estates, it was determined to reserve the question of charging them with the cost of the salaries of the officers of Government.

Government order No. 762R., dated 5th June 1871.

Board's No. 41A., dated 26th January 1872.

Government order No. 1177, dated 16th March 1872.

3. Nothing, however, was done in the matter till the receipt of the Secretary of State's recent despatch. All Commissioners and Collectors were then called on to submit a statement of the amount of work done in the wards' department, and also to report what proportion of their time was devoted to the management of wards' and attached estates.

4. A detailed statement, abstracted from the local replies, has been prepared in the Board's office, and enables the Board to submit the following information for the consideration of Government. The figures are for the year 1878-79. There are four districts—Bankoorah, Beerbhoom, Pubna, and the Sonthal Pergunnahs—in which there was no Court of Wards' work. In the remaining districts the total number of letters, memoranda, returns, bills, civil cases, &c., connected with wards' estates was 78,983 against 546,135 in all other departments, or a proportion of 12·6 per cent. In Commissioners' offices the number is

28,924 against 190,839, or a proportion of 13·1 per cent. In the Board's office the number is 5,297 against 24,540 (in the Land Revenue Department), and the proportion is 17·7 per cent. The aggregate total number in all offices is 113,204 against 761,514, or a proportion of 12·9 per cent.

5. The Commissioners of the Rajshahye and Patna divisions both say that they give a third of their time to Court of Wards' work. But in the Patna division this proportion will no longer hold good, as, owing to the release of the Durbhanga and some other estates, the amount of work has much diminished. The Commissioner of the Presidency Division devotes a quarter of his time to wards' work. The District Collectors who report that they devote a quarter and more of their time to wards' work, are the Collectors of the 24-Pergunnahs, Rajshahye, Fureedpore, Mymensingh, and Monghyr. Several officers, however, represent that the actual time devoted to wards' work does not represent fairly the amount of worry and trouble that the management of wards' work throws on them personally.

6. Generally speaking, it may be said that, taking an average of all districts and divisions, Commissioners and Collectors give fully one-eighth of their time to work connected with the Court of Wards, and that in some cases these duties absorb as much as one-fourth or even more of an officer's working time.

7. Although there is no rate at present existing from which Government officers are compensated for the expenditure of this amount of time and corresponding labour, rates are now levied from wards' and attached estates for various purposes, and I am now to explain, for the information of Government, the rates already actually levied on these estates.

8. The first is what is known as the wards' rate fund, although its separate existence as a fund is no longer maintained, and all its receipts and disbursements are treated as ordinary payments to and from the provincial revenues. The object of the levy of this rate is to meet the cost of postage, stationery, and furniture used on account of wards' and attached estates in Government offices, whether in the Collector's, Commissioner's, or Board's office, and the salaries, travelling allowances, gratuities, and pensions of the establishments employed in these offices. This rate is levied on the current demand of rent of estates, and is caculated according to the principles laid down in rules 3 and 4, page 7, of the Wards' Manual. A single rate is seven annas in every hundred rupees. Upon estates of which the rent-roll is above ₹20,000 a single rate is levied; upon others the rate varies, increasing in inverse proportion to the size of the estate. From estates of which the rent-roll is less than ₹1,000 ten rates are levied. This rate, being levied on the mofussil jummabandi of estates, of course varies year by year, and its amount has considerably decreased since the large estates of Durbhunga, Paikpara, and others have been released from the Court of Wards. In round numbers the mofussil current demand of rent in estates liable to pay the rate in 1878-79 was ₹84,70,000. For 1879-80 it is estimated that the demand was ₹56,39,000. During the current year 1880-81, it is estimated that the demand will be fifty or fifty-two lakhs. A detailed statement of the estimated rate on fifty-two lakhs has been prepared in the Board's office, and has been shown to amount to about ₹46,000.

9. This rate is intended to provide only for average and usual establishments. If under special circumstances it is necessary to employ in a Government office an extraordinary establishment for the management of any estate or estates, such an establishment may be entertained, the cost being directly charged to the estate or estates concerned. This has been the state of things in Patna where, until lately, a second personal assistant has been retained in the Commissioner's office, being specially paid for by the estates in the division, and occasionally it is so in particular districts, as in the case of a small ward's estate in Noakholly.

10. A second rate on wards' and attached estates has recently been imposed by the orders of Government, in order to defray part of the cost of treasury establishments. The work of local funds having largely increased and added to the work and expense of treasury establishments, it was deemed equitable that these funds should pay their share of the increased cost. The road cess fund and municipalities, the zemindary dâk fund, and nizamut stipend fund pay their share according to a percentage laid down. In the case of wards' and attached estates the percentage has been fixed at four annas per cent. on the current demand of rent. If this demand is fifty-two lakhs, the amount of "four annas rate" in the current year will be ₹13,000.

11. The third existing charge on wards' and attached estates is what is known as the litigation fund. This fund is under the control of the Legal Remembrancer, and the Board have no concern with it. The object is to reimburse Government the expense of appeals in wards' cases, and from time to time Collectors remit, as directed by the Accountant-General, such sums as may be required by the Legal Remembrancer to be credited to the litigation fund. The scale of fees adopted in the office of the Legal Remembrancer is laid down in clause 11, section III, of the Legal Remembrancer's rules regarding civil suits, and varies in amount from ₹5 to ₹85. There is no information in the Board's office which enables the Board to say even approximately what the payments on account of this fund may amount to in the course of the year.

12. No other charges than these are at present levied by Government on wards' and attached estates. The labour of Deputy Collectors, Assistant Collectors, Collectors, Commissioners, and of the Board of Revenue in superintending and supervising the management of these estates is given gratuitously. This is the question now raised by the Secretary of State. Looking to the labour involved, and to the great benefits thereby secured to these properties and their owners, should not some charge now be imposed to defray the cost of this supervision and superintendence?

13. It appears to the Board that there can be but one answer to this question, and that in the affirmative. There is evidently no reason why officers, whose duties towards the public in general are already of a sufficiently onerous nature, should be required to undertake gratuitously this additional labour for the benefit of a few landed proprietors who happen to be disqualified for the management of their own estates; and the justice of imposing some charge in return for the services thus rendered will probably be generally admitted.

14. I am to say that, in the opinion of the Board of Revenue, it would be desirable to impose one consolidated rate to defray all expenses, including the charge for treasury establishments, but excluding the amount levied for litigation expenses which must remain as at present. This rate might be fixed at a maximum of 3 per cent. on the current demand of rent from all estates under the Court. For the current year this would, if levied at the full rate, produce upwards of ₹1,50,000.

15. This maximum rate need not, however, always be levied. It might be left to the Board to determine, with reference to the financial condition of any estate, whether the rate on that estate for a particular year should be 3 per cent. or 2 per cent. or any intermediate fraction. But the rate should not be lower than 2 per cent., so that all estates would pay something, while for flourishing estates 3 per cent. might not be too much. It may no doubt be argued that as embarrassed estates are those which give most trouble and work, they should not be assessed at a lower rate; but on the other hand it must be remembered that the Court of Wards is bound not to press too hard upon estates which are just struggling out of insolvency.

16. It has already been suggested that these proposals should not affect the charges which are now payable into the litigation fund. It is right that these charges should remain, as at present, debitable to the particular estates which incur them.

17. Assuming that the full rate of 3 per cent. will not always be levied, it may, perhaps, be estimated that the consolidated rate will produce a sum of about ₹60,000 per annum in excess of the charges now defrayed from the wards' rate and the four annas rate. The levy of this amount appears by no means excessive or unreasonable in consideration of the services rendered in superintending the administration of the estates.

18. The Board feel some doubt, however, whether it falls within the scope of the present reference that they should offer any suggestions for the disposal of this money. The despatch of the Secretary of State, while it intimates that some payment should be made by those who receive the benefit of this supervision of their property, gives no indication of the manner in which the amount thus levied should be utilized. It appears to be left to the local Government to decide, or at all events to suggest, whether any contribution which may be raised should be appropriated (1) as a general asset to the public revenues; or (2) as a direct payment to those public officers by whom the duties are now performed; or (3) to the entertainment of a special agency for the conduct of the work which now comes under the supervision of the Court of Wards.

19. But assuming that a report from the Board of Revenue will be expected on this point, I am to say that in the first instance the Board thought it desirable to consider the third of these alternatives, and certain selected officers, whose names are given in the margin, were accordingly requested to report whether in their opinion the administration of the estates under the Court would be conducted in as efficient a manner as at present, if that course were adopted. It was suggested by the Board that it might be found feasible to relieve district officers of all connection with Court of Wards' duties if a general manager were appointed for the superintendence of all estates within the limits of a Commissioner's division. It was observed that for some divisions (perhaps for Orissa and Chota Nagpore) such a manager might not be required, and the number of general managers for the whole of the Lower Provinces might be limited to seven. These officers would be selected from the best Deputy Collectors, and would receive salaries ranging from ₹500 to ₹1,000 a month according to their qualifications and the extent of the duties entrusted to them. The local managers for the several estates would be continued as at present, though it would perhaps be possible to make a reduction in the pay of some of them, but they would correspond not with the District Collectors, but with the divisional manager; and the Collectors would be relieved of all duties except the purely ministerial function of issuing certificates on the responsibility of the divisional manager.

Lord Ulick Browne.
Mr. J. Beames.
„ J. Monro.
„ J. O'Kinealy.
„ J. W. Edgar.
„ J. C. Price.
„ A. P. Macdonnell.

20. It was added that it might be possible to go a step further than this, and to direct that the divisional managers whom it was proposed to appoint should correspond directly with the Board, and that Commissioners as well as Collectors should be relieved of all superintendence of estates under the Court of Wards. Such a plan, it was pointed out, would of course throw very great responsibilities upon the divisional manager, and it would be a matter for careful consideration whether such officers as would ordinarily be employed in the post of divisional managers would be likely to possess the qualifications which would justify their being entrusted with duties of so much importance.

21. The replies to this reference have now been received, and, after full consideration of the opinions of the officers consulted, the Board are disposed to think that the scheme could not be made to work satisfactorily in practice. The only officer who fully supports it is Lord Ulick Browne, and he dwells too exclusively in his letter on the consideration that the proposed general managers would be able to devote to their duties the time which Collectors and Commissioners cannot afford. His argument hardly touches upon the question whether such managers would be equal to the responsibilities of the appointment. Mr. O'Kinealy is also in favour of the scheme, but his adherence to it is subject to the important qualification that natives should not be appointed. Mr. Monro would leave the Commissioners' duties unaltered, but would make over the Collectors' work to general managers on condition that covenanted civilians shall be chosen—a condition which appears to the Board to be quite inadmissible. The other opinions are generally adverse to the proposal.

22. The general result of the reference made by the Board is that it is impossible to assist Collectors and Commissioners in the conduct of Court of Wards' work without taking it out of their hands altogether, and that it is not expedient to do this, as the only agency by which it could be done efficiently would be too expensive to adopt. The Board therefore are not prepared to recommend to Government, either wholly or in part, the adoption of the proposal that a special agency should be employed, at the head-quarters of districts or divisions, for the conduct of the work which now comes under the supervision of the Court of Wards.

23. It remains to consider the other alternatives which have been suggested. The first of these is that the proceeds of any increased charge on wards' and attached estates should be paid, not to the officers who do the work, but to the Government whose servants they are, or, in other words, be credited as a general asset to the provincial revenues. In this manner the principle of the Secretary of State's despatch would be complied with, for a contribution would then be levied in return for the services rendered by the various officers and departments of Government in superintending the administration of these estates. But there is an objection to this proposal, that it does not in any way relieve Government officers of the burden of work which the administration of wards' estates imposes. It also appears to be a matter for the consideration of Government how far such an appropriation of the wards' rate would be likely to meet with popular approval.

24. The last alternative is that the rate should be appropriated as a direct payment to any of those public officers by whom duties are now performed. The Board do not desire to press upon Government that the Collectors should be directly remunerated. There are obvious practical difficulties attending it, and any scheme of special pecuniary recompense is opposed to the general rule that promotion is the reward of good service. At the same time it so happens that, owing to the exigencies of the service, it is sometimes the case that in those districts where the ordinary current work is heaviest, the officers in charge are not the most highly paid, and the management of the most troublesome wards' estates also supervenes as an additional burden to the overworked Collector. In such cases it may perhaps be worthy of consideration whether a Collector's pay might not be augmented with reference to the additional work imposed upon him by the management of a ward's estate. It may be suggested that when the surplus of the fund for any year had been ascertained, the Board should be at liberty to recommend to Government the grant of a bonus to any district officer drawing less than the salary of a first grade Magistrate and Collector in whose district the work of the Court of Wards had been especially onerous during the year. The grant would be made by Government, and this would maintain the principle that Government servants receive their remuneration from Government alone. The Board, however, do not identify themselves with this proposal, and only lay it before Government for the consideration it may deserve.

25. There is one measure, however, in connection with this proposal which is not open to the objections which may be made to any scheme for the payment of district officers. Under the new law, Act IX (B. C.) of 1879, the Board of Revenue has been declared to be the Court of Wards for the Lower Provinces, whereas under the old law the powers of the Court of Wards were exercised by the several Commissioners of divisions. The effect of this provision, it is needless to say, has been to increase very considerably the wards' work in the office of the Board of Revenue. The new law came into force from June 1879, and the Board's rules under which the working of the law is practically carried out did not come into effect till November last. Yet though the change in system was then only in operation during a period of the past year, the increase in work was marked.

It has been stated, in paragraph 4 of this letter, that the number of letters, memoranda, &c., connected with wards' and attached estates in the Board's office during 1878-79 was 5,297 against 24,540 in the Land Revenue Department, or a proportion of 17·7 per cent. In the past year 1879-80 the number of wards' letters, &c., was 8,055 against 28,903 in the Land Revenue Department, or a proportion of 27·7 per cent. It may be added that in the current year the work has increased even beyond this proportion. A case seems therefore to be made out for the appointment of an Assistant Secretary in the Board's office to be employed exclusively on wards' cases. The appointment of such an officer would probably enable the Board to relieve Commissioners of all Court of Wards work other than of the most urgent character, and any increase of ministerial establishments in the Board's office would be saved by a corresponding abolition of the establishments now entertained in the Commissioner's offices. The Assistant Secretaryship should ordinarily be held by a native of the country, and it would be a prize appointment for the best Deputy Collectors in the service. The officer so appointed would be employed not merely as a Secretary in the Board's office, but he would be at the disposal of the Board for deputation on local enquiries whenever the condition of an estate is bad or doubtful, and the measures adopted or proposed by the local officers appear insufficient. It is desired that the Assistant Secretary in the Board's office should be one of the best able-bodied as well as able-minded Deputy Collectors in the service who would not hesitate to go to Noakholly, or Mymensingh, or Purneah, or Shahabad according to the exigency of the moment. For such an officer the Board do not consider that the salary of ₹800 or even ₹1,000 a month would be more than sufficient, and they believe that the appropriation of a part of the rate to the creation of this appointment would be favourably received by the public. But the appointment should be made for a term (say) of five years, renewable only if the incumbent still retained his activity of body and vigour of mind.

26. In conclusion, I am to say that this report has been delayed by the elaborate character of the enquiries instituted, and the necessity which existed for obtaining the opinion of experienced and competent officers regarding the application of the proceeds of a ward's rate. The question is a very difficult one, and calls for the enunciation of a clear line of policy regarding which there is evidently room for much difference of opinion. The principle of a special agency to be paid for from the rate is one which naturally commends itself; but the Board are dissuaded from adopting it by the decided opinion expressed by the great majority of officers consulted that such an agency wood prove less efficient than the present system of administration. To the other proposals made there are also obvious objections which it is unnecessary to recapitulate, and under these circumstances the Board feel that they are only in a position to submit this report for His Honour the Lieutenant-Governor's consideration, to recommend for sanction the appointment suggested in the last preceding paragraph, and to ask to be favoured with the declaration of a line of policy by Government.

Extract, para. 5, from a letter from A. MACKENZIE, Esq., *Secretary to the Government of Bengal, Revenue Department, to the Secretary to the Government of India, Home, Revenue and Agricultural Department, No. 3178—1676L.R., dated 29th November 1880.*

5. Referring now to the suggestion in paragraph 7 of the despatch, that a charge should be imposed upon wards' estates on account of the general supervision given to them by the superior officers of Government, I am to reproduce here the Lieutenant-Governor's remarks on the subject in the resolution on the report for 1879-80:—

"The rates levied upon wards' estates to meet the cost of establishment in Government offices brought in ₹44,544 during the year. This sum is credited to Provincial rates. Besides this, a rate of four annas per cent. has recently been sanctioned to meet the charges for extra treasury establishments necessitated by the accounts of wards' estates. No charge is at present made on account of the services rendered by superior Government officers. The Board are in favour of imposing a contribution upon this account, as suggested by the Secretary of State when reviewing the Wards' Report for 1877-78. The Lieutenant-Governor is not, however, prepared to support this proposal. Wards' estates are taken in charge by Government officers mainly in order to the protection of the Government revenue. They pay already the whole cost of their management, of the ministerial establishments required in Government offices to conduct the correspondence regarding them and of the establishments employed in the treasuries to keep their accounts. The general supervision given by Collectors, Commissioners, and the Board of Revenue is no doubt of value to the estates, but it is given as much in the interests of Government as of the individual proprietors benefited, and ought not, in the Lieutenant-Governor's opinion, to be separately assessed and paid for."

No. 9 (Revenue), dated Simla, the 10th April 1881.

From—The Government of India,

To—Her Majesty's Secretary of State for India.

In his despatch No. 30 (Revenue), dated the 3rd July 1879, Lord Cranbrook noticed certain points in the report of the Board of Revenue on wards' and attached estates in the Lower Provinces for 1877-78, and in paragraph 7 desired that it should be considered whether, in addition to the rates levied on account of establishments, a charge should not

be imposed upon these estates in consideration of the services rendered by the various officers and departments of Government in superintending their administration.

2. We have now the honour to forward copy of a letter* from the Government of Bengal and of the report of the Board for 1879-80, with the orders† of the Local Government thereon. The letter and the resolution appear to us to discuss sufficiently the minor points raised in the despatch above-mentioned; and we shall confine our remarks to the suggestion that wards' estates should pay part of the cost of the district establishments.

* No. 3178—1676 L. R., dated the 29th November 1880.

† Resolution dated the 19th October 1880.

3. In regard to this question, we would invite reference to the full report submitted to the Lieutenant-Governor by the Board of Revenue in their letter No. 633 A., dated 9th September 1880, which will be found among the enclosures. The Board point out that there are actually three rates levied on wards' estates in Bengal. The first has hitherto been known as the wards' rate fund, and the total amount assessable on the wards' estates for this fund during the current year is estimated at ₹46,000. The fund has no longer a separate existence, having been merged in the provincial revenues. It is required to meet the cost of postage, stationery, and furniture, and the salaries, travelling allowances, gratuities, and pensions of establishments in the Wards branch of the Collector's, the Commissioner's, and the Board's Office.

4. The next rate is one recently imposed as a contribution towards the cost of treasury establishments employed for the accounts of the various local funds, and is paid by wards' and attached estates in common with municipalities, road cess committees, &c. The charge in the case of wards' and attached estates is four annas per cent. on the current demand of rent, and the total demand for the current year is estimated at ₹13,000.

5. The third charge on these estates constitutes what is known as the litigation fund, which consists of various sums paid by the estates to reimburse the Government the expense of appeals in wards' cases. The total sum likely to be realized on this account during the present year cannot be calculated.

6. No part of the above charges is levied in consideration of the supervision exercised by various revenue officers, from the Deputy and Assistant Collectors to the Members of the Board of Revenue, over the management of the Wards' Department throughout the Province; and the labour of these officers is now given gratuitously to wards' and attached estates. In answer to Lord Cranbrook's suggestion on this point, the Board of Revenue observe that there is no reason why some charge should not be made for the services which the estates receive from Government servants, and they suggest the imposition of a consolidated rate on all estates, at a maximum of three per cent., to include a charge for these services, in addition to the existing charges on account of the wards' rate fund and the cost of treasury establishments. If levied at the maximum, this rate would yield ₹1,50,000 for the current year; but if it be assumed that the full percentage would not always be levied, the rate might be estimated to yield generally about ₹60,000 in excess of the present charges, exclusive of the charge for the litigation fund.

7. The Board next proceed to consider how the funds thus obtained might be appropriated—whether (1) as a general asset of the public revenues; or (2) as a direct payment to the officers who are required to devote a portion of their time to the management of the estates; or (3) for the entertainment of a special agency to carry on the work of supervision imposed on the Court of Wards. They rightly observe that the absorption of these funds into the general revenues would not relieve the officers concerned of the burden of attending to the management of the estates. The measure would, it is quite clear, be attended by no practical gain so far as the work of managing the estates is concerned, while it would certainly be viewed with disfavour by the people. As regards direct payments to officers for their services to wards' estates, the Board observe that bonuses might be granted out of the consolidated rate, after each year's surplus balance has been ascertained, but they expressly decline to identify themselves with any proposal of this nature. The grant of such bonuses to public officers, and specially to officers of the higher grades, is obviously open to grave objection, and it is quite unnecessary to consider the question here. With regard to the entertainment of a special agency, the Board do not think, for reasons in which we agree, that the appointment of special officers at the head-quarters of districts or divisions is desirable; but they recommend the appointment of an Assistant Secretary within their own office, to aid in the disposal of wards' work, on the understanding that he would be also available for deputation on local enquiries wherever these might be needed. This recommendation appears to us to be as unsatisfactory as any of the other proposals contained in their letter. The creation of an Assistant Secretary to the Board would give no relief to district officials. On the contrary, experience leads us to believe that it would tend to cause an increase of their work. It is thus apparent that there would be no way of spending the proceeds of an additional rate on wards' estates to which grave objection might not be taken. None occurs to us in addition to those stated in the Board's letter.

8. On a full consideration of the matter, we agree with the view taken by the Lieutenant-Governor, and expressed in paragraph 5 of the letter from the Government of Bengal referred to above. We recently discussed a similar question* in considering the system of managing encumbered estates in Oudh; and we adhere to the conclusion then adopted, which was, briefly, that the same political and administrative reasons which justify special intervention for the protection of estates, the owners of which are disqualified to manage them, also justify the Government in undertaking some share of the burden of management. It has been shown above that wards' estates in Bengal are already required to contribute funds to Government for several kinds of charges, and the imposition of any additional charge of the nature suggested would undoubtedly be a most unpopular measure. Moreover, the Government of Bengal have, we think, argued very correctly that the services which the Board and the local revenue officers give to the wards' estates are not such as the wards should be required to pay for, and that the employment of the revenue officers on wards' work is really of as much value to the Government in its results, and to the officers themselves in the training which it affords, as it is to the wards' estates.

* *Vide* our despatch No. 6, dated the 7th February 1881.

9. For the above reasons we would propose no modification in the existing system of charging rates upon wards' and attached estates in Bengal.

No. 47 (Revenue), dated India Office, London, the 19th May 1881.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I have considered in council your letter of 10th April last, in which you express your concurrence with the view of the Lieutenant-Governor of Bengal that no modification, such as that suggested in Lord Cranbrook's despatch of 3rd July 1879, in the existing system of charging rates upon wards' and attached estates in Bengal, is desirable.

No. 9, Home, Revenue and Agriculture (Revenue.)

2. I agree with your Excellency's Government in this conclusion.

No. 342 (Revenue), dated Simla, the 21st June 1881.

Endorsed by the HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

Copy, with copy of the despatch to which it is a reply, forwarded to the Government of Bengal for information, with reference to its letter No. 3178—1676 L. R., dated the 29th November 1880.

No. 72, dated Calcutta, the 4th March 1882.

From—E. C. BUCK, Esq., Secretary to the Government of India,

To—The Secretary to Government, North-Western Provinces and Oudh.

I am directed to refer you to paragraph 7 of the Resolution of the Government of India, No. 284R., dated the 13th December 1881, in which a suggestion was made for the consideration of His Honour the Lieutenant-Governor whether any extension of the system of management adopted in the Awa estate is practicable.

2. The subject of the management of Court of Wards' estates came under discussion two years ago with reference to Bengal, in which Presidency it was decided that a system of paid management was the most effective. In that Presidency, when an estate of any size or importance comes under the Court of Wards, the first step which the Revenue authorities take is to procure a manager. Except in very special cases (such as Durbhanga and one or two other estates), this Manager is not a member of the Civil Service or a Deputy Collector of the Uncovenanted Service, but an outsider, who, whether European or Native, is selected after careful enquiry as to his fitness and trustworthiness, and placed in immediate charge of the property. The care and guardianship of the minor is in almost all cases entrusted to some member of the family, but the administration of the estate in its entirety is the duty of the Manager, who is paid out of, and resides on, the estate, and, subordinate to the Collector of the district, carries on all work precisely as if he was himself the proprietor.

3. On the assumption that, if such arrangements were adopted in the North-Western Provinces, Collectors of districts would be relieved of all direct supervision in large estates, I am to ask what system His Honour the Lieutenant-Governor is disposed to recommend for the proper management of those estates, other than Awa, which cannot afford highly paid and responsible management, and require the close supervision of some member of the official staff. I am to intimate that this question does not suggest the existence of any imperfect management at the present time, but refers to the circumstance that the time and attention of district officers may possibly be too much diverted from public duties by their devotion to a class of work which, if properly performed, must always be of an onerous character.

4. A copy of a correspondence* with the Government of Bengal, on the subject of the management of wards' and attached estates in that Presidency, is enclosed for the information of His Honour the Lieutenant-Governor.

Extract para. 7 of a despatch from Secretary of State, No. 30 (Revenue), dated 3rd July 1879.

Extract, paras. 7, 8 and 9, from the Resolution of the Government of the North-Western Provinces and Oudh, No. 1410, dated 17th August 1885.

* * * * * *

7. There are now three methods of management in force in the province. In most districts where the number of estates is small and precludes the appointment of a general manager, the powers of the Court are still exercised, under section 204 of the Land Revenue Act, through the Collector, with, where necessary, a staff of officials for each estate. This is one method, and a second is the system, sanctioned in G. O. No. 2182, dated 7th December 1882, under which a general manager, of superior rank and pay, with the necessary establishments, is appointed to administer, under the control of the Collector, all the Court of Wards' estates in the district.

8. This system can be adopted only where the income of the estates in the district is sufficiently large to bear the cost of a special manager, and it was in force in six* districts during the year under report. After the close of the year the Etawah district was removed from the list owing to the release of the Bhareh estate. On the other hand, the system has since then been introduced into Cawnpore, Jaunpur, and Gorakhpur, so that at the present time it is in operation in eight districts. It has been under trial in the provinces for two years and the Board have, after this period of observation and experience, submitted the separate report on its working, quoted in the preamble to this Resolution. The result of the trial in nine districts has been to lead the officers who have had experience of the system to pronounce unanimously in its favour, and to show that the system is advantageous both to the Government and to the estates themselves. One of its chief objects was to afford some relief to the district officer and his assistants, on whom the burden of estate management in districts where wards' estates were numerous and large pressed very heavily. In this it has completely succeeded; and Mr. Markham, Collector of Bijnor, whose experience in such matters gives great weight to his opinion, estimates that the work of management falling on the Collector has been reduced to one-fifth of what it was. Again, in respect to the estates themselves, the system secures more effective and intelligent administration, since direct management of the villages can more easily be substituted for farming leases, and rents are more punctually and fully realized with less recourse to litigation. There is also reason to think that the wants and wishes of the tenantry are better known and more considerately studied, while the District Officer is able with more certainty to discover the necessities of the various villages and to devise and carry out works of improvement accordingly. The proportional cost of management under this system is nowhere exorbitant, but it varies in each district according to the rental of the estates which contribute to it. In Shahjahanpur, where the normal income was lowest (₹1,79,750) and where activity in works of improvement was great, it rose to 9·9 per cent., whereas in Bijnor, with a normal income of ₹2,38,727, it was as low as 5·4. An exact comparison between the expense of this system and that of separate management under the Collector can scarcely be instituted, because the latter takes no account of the more extensive and valuable services rendered under it by the Collector himself and his ordinary staff.

* Etawah.
Bijnor.
Shahjahanpur.
Allahabad.
Ballia.
Ghazipur.

9. In the Banda district a third method of management has been tried. Owing to the large number of small and scattered properties under the Court's charge, it was not found advisable to appoint a single manager for the entire district. Five circles were, therefore, formed each containing several estates, and a sazáwal or steward on a moderate salary, acting directly under the Collector, was appointed for each. By this measure more minute and constant supervision of the properties is thought to be secured, and the local officers, the Commissioner, and the Board of Revenue, all pronounce in favour of the arrangement, which they consider most suited to the peculiar conditions of the Bánda district. It is difficult, however, to understand how this system can afford much relief to the Collector, and, indeed, this advantage seems not to be claimed for it. But the Lieutenant-Governor is unwilling to disturb an arrangement which is deemed the best by those officers who are responsible for its working, and for the present, he accepts the opinion that the appointment of a highly-paid single manager of estates for the Bánda district is not advisable or feasible. The Board propose to notice the working of the different systems of management in an appendix to future annual reports, and the Lieutenant-Governor quite agrees that the subject can in this way be most appropriately and conveniently considered.

No. $\frac{1172}{I-440}$, dated Naini Tal, the 27th August 1885.

From—The Chief Secretary to Government, North-Western Provinces and Oudh,

To—The Secretary to the Government of India.

With reference to the correspondence ending with your letter No. $\frac{467R}{137-'13}$, dated 8th July 1884, I am directed to submit, for the information of His Excellency the Governor General in Council, copies of the papers noted on the margin, regarding the special system of management in force in certain estates held under the Court of Wards in the North-Western Provinces, and to say that the views of the Lieutenant-Governor and Chief Commissioner on the subject are recorded in the Resolution by this Government reviewing the Court of Wards' Report for 1883-84, which has been forwarded to you under cover of letter No. $\frac{1454}{I-427}$, dated 21st August 1885. A copy of the Resolution is herewith submitted for ready reference.

From Secretary to the Board of Revenue, North-Western Provinces, No. $\frac{1183N}{X-26}$, dated 25th August 1884.

No. $\frac{314N}{X-36}$, dated 4th June 1885, with enclosures.

No. 1183N.—X-26, dated Naini Tal, the 25th August 1884.

From—W. C. BENETT, Esq., C.S., Offg. Secy. to the Board of Revenue, N.-W. P.,

To—The Chief Secretary to Government, N.-W. Provinces and Oudh.

With reference to paragraph 7 of the orders of Government on the Court of Wards' report for 1882-83, I am desired by the Junior Member to submit a copy of the papers noted on the margin, regarding the present system of management of Court of Wards' and other estates in the Banda district.

Allahabad Commissioner's No. 5161—X-97 of 1884, and enclosures.

2. The properties under management in Bánda being scattered over the district, it was considered advisable, in order to secure effective supervision, to constitute five circles with a manager in charge of each. The managers are able under these arrangements to be constantly present in their respective circles—a result which could not be attained if one highly-paid special manager were to be appointed for the whole district. This is a matter of the first importance, and on this ground Mr. Daniell considers that it would not be advisable to substitute for the system now being worked in Banda a system similar to that adopted in Allahabad, Sháhjahánpur, Etáwah, and Bijnor.

3. The Junior Member has carefully watched the working of the present system in Bánda, and considers it to be effective and economical, and calculated as far as possible to secure the object referred to in the concluding portion of paragraph 7 of the Government Order quoted above. He has therefore sanctioned its continuance.

4. The Collector has been instructed not to submit special reports on the working of this system in future. He will refer to the subject in the annual expenditure and budget reports of the several estates under his management, and show the cost and distribution of the establishment in the usual way in the statements prescribed for the purpose. The Board will in future notice the working of the system in regard to the Court of Wards' estates in their annual report to Government, and a separate report will also be submitted at the close of each revenue year dealing with the subject as it affects the other estates under direct management.

No. $\frac{314N}{X-36}$, dated Naini Tal, the 4th June 1885.

From—W. C. BENETT, Esq., C. S., Offg. Secy. to the Board of Revenue, N.-W. P.,

To—The Chief Secretary to Government, N.-W. Provinces and Oudh.

With reference to the closing remarks of paragraph 7 of G. O. No. $\frac{832}{I.-427-2}$, dated 29th July 1884, to the Board's address, I am directed by the Junior Member to submit a further report, with annexures, on the working of the scheme of employing special managers on Court of Wards' estates.

2. I am to state that a report on the arrangements in force in the estates in the Banda district was submitted in Board's No. $\frac{1183}{X-26}$, dated 25th August 1884, and to remark that the working of the special scheme for these estates will be referred to in future in the Board's annual reports on the Court of Wards' estates.

3. In accordance with the suggestions conveyed in G. O. No. 1126, dated 30th June 1882 (in the Revenue Department), the scheme of special managers was adopted, as soon as proper arrangements could be made in the early part of 1883, in the following districts:—

Etáwah,	Sháhjahánpur,
Bijnor,	Allahabad;

and towards the close of that year a special manager was appointed for the districts of Gházipur and Ballia jointly. As the estates held under the Court of Wards possessed property in both of these districts, it was deemed advisable to have one joint manager, who is subordinate to the Collector of the Gházipur district.

In 1884 the Privy Council directed that the Bhareh estate in the Etáwah district should be surrendered to the claimant Raja Rup Singh, and on the 30th of October 1884, the services of the special manager for that district were dispensed with and the old system of management for the remaining estates in the district was reverted to. At the beginning of this year the scheme was extended to the Gorakhpur district, and later on in the year to the Jaunpur and Cawnpore districts. There are therefore now eight districts (counting Gházipur and Ballia separately) in which the scheme is in force.

4. It will therefore be seen that the scheme has been working for some time in the Bijnor, Sháhjahánpur, Allahabad, Gházipur-Ballia districts, and the Junior Member is of opinion that the time has now come when some estimate can be formed as to the success or failure of the scheme.

5. In calling for reports from the Collectors of those districts in which the scheme has been adopted, the Board in the light of the remarks conveyed in your G. O. No. 832—I.-427-2, dated 28th July 1884, called for replies to the following questions:—

(*a*) Whether the management of the estates had been found to be as efficient under the present scheme as under the old system of separate managers for each estate?

(*b*) To what extent the work of the Collectors and their covenanted staff had been lightened by its introduction?

(*c*) Whether there had been any serious increase in the cost of management?

Each of these points will be dealt with separately.

6. *Efficiency of management.*—The reports are unanimous that there is a marked improvement in the management of the estates. The benefits resulting from the scheme may be classified under the following heads:—

(1) substitution, in a great measure, of direct management in the place of leases;

(2) increase in the realisations of the rental demand;

(3) extended application of agricultural improvements, especially in the Sháhjahánpur and Allahabad districts (annexure A);

(4) decrease in the number of suits instituted in the revenue court in consequence of the managers being in a position from personal acquaintance with the facts of each case to advise Collectors as to the desirability of taking legal proceedings.

And, lastly, the Junior Member is disposed to think that the requirements of the estates and the condition of the resident tenantry have been more closely considered by the managers who are required to be constantly moving about on the properties under their charge.

7. *Relief to the district staff.*—This is obvious, and the Board in their endeavours to extend the scheme have never lost sight of this fact. On this point I am to quote some remarks made by the Collector of Bijnor, who in the Allahabad district and in his present one has had a long experience of both systems, and the Junior Member thinks few officers are better entitled to express an opinion as to the merits of either system. Mr. Markham remarks—

> "Without the special manager, every stage of every file regarding the several estates would have to pass the Collector or a covenanted officer. With him the majority of the matters connected with the management, such as daily reports, &c., never trouble the Collector at all; and such as do come before him come complete and in proper train for a simple final order or assent. Of the civil and revenue litigation the Collector retains the initiative on the report of the manager. Thereafter the labour is entirely taken by the manager. In addition to the relief thus given, the Collector and his covenanted staff are freed from a thousand and one vexatious details connected with the supervision of the actual work of collecting rents, and of arranging the management of the various villages for the future. The Collector's Court of Wards' work under the new system now reported on is not one-fifth of what it was under the old, when it was really the more onerous half of his entire work."

The opinions of the Collectors of the other districts mentioned in paragraph 4 fully confirm Mr. Markham's remarks, and from what he has seen of the working of the system in the Rohilkhand Division, Mr. Robertson is convinced that material aid is afforded to the Collectors, while the estates benefit by closer supervision. On this point the Board enquired whether it was advisable to extend the powers of the special managers with a view to further lightening the ordinary administrative work of a district. From the replies received, it appears that no extension of the powers already granted is desirable. Of the special managers appointed, only Mr. Stout (Sháhjáhanpur) and Zain-ul-ab-din (Allahabad) are Deputy Collectors, and as such have the powers of an Assistant Collector of the 2nd class; but neither of these officers appears to exercise his powers. The Commissioner of Allahabad suggests that the appointment of a special manager should *ipso facto* carry with it the grant of the powers of a Deputy Collector. He thinks that the managers would thus have

more local influence, and that their present position is inferior to that of a Tahsildár. The Junior Member is not inclined to assent to this, and considers it inadvisable, save in special cases, to confer such powers on the managers, some of whom have never been through the lower grades of Government employment, and are therefore unacquainted with all the details of executive work. Moreover, the fact that it has not been found necessary to make over any revenue work to the two managers who have the powers of a Deputy Collector forms in itself a sufficient argument for not investing other officers with these powers.

8. *Cost of management.*—The statistics given in annexure B show the cost of management under the old and present systems. The increase shown in the districts of Etáwah, Sháhjahánpur, Allahabad, and Ghazipur-Ballia is, to a certain extent, merely nominal, as under the present system the items "stationery" and "miscellaneous charges" are incorporated in the cost of management, whereas, under the old system the items were treated separately. If allowance is made for this, the percentage under the new system would be lower than it is.

N.B.—As regards the figures in column "*Total receipts from 1st April to date*" audited figures have been availed of as far as possible.

(*a*) Return not received.
(*b*) Total receipts from 1st April to 13th December 1884.
(*c*) Total receipts from 1st April to 12th December 1885.
(*d*) Including Rewari-Ferozepore State Railway.
(*e*) Total receipts from 12th October to 20th December 1884.
(*f*) Total receipts from 1st April to 12th December 1885.
(*g*) Total receipts from 1st November to 13th December 1884.

FORT WILLIAM,
The 14th January 1886.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Monday, the 11th January, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble H. J. Reynolds, C.S.I.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St. A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

LICENSE TAX AMENDMENT BILL, 1886.

The Hon'ble SIR A. COLVIN to move that the Bill for imposing a tax on income derived from sources other than agriculture be referred to a Select Committee consisting of the Hon'ble Messrs. Ilbert, Hope, Quinton, Hunter and Steel, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik, the Hon'ble Peári Mohan Mukerji and the Mover, with instructions to submit their Report on the 22nd instant.

The Hon'ble MR. HUNTER said:—"My Lord, as I shall have an opportunity of expressing my views on the individual provisions of this Bill in the Select Committee, I shall not at its present stage detain the Council at any length. But on the introduction of the measure, your Excellency referred in weighty and eloquent words to two subjects which have always seemed to me of the highest importance, and in regard to which I entertain firm convictions. The first of these subjects is the attitude of Native public opinion to the policy of the Government. The military precautions taken by your Lordship's Government in the early part of the year evoked an outburst of loyal support which created a deep impression in Europe, and helped to still more closely knit together British and Feudatory India. The military measures, deemed equally imperative by your Lordship's Government towards the close of the year, have been criticised by a section of the Native Press in a different spirit. The truth is that, in the former case, the Native Press was cognisant of the facts of the situation; in the latter case it was not. Every Native journalist knows that the epoch-making invasions of India in the past have come from the north; and every great Native family and Feudatory Chief realises that any such invasion in the present would mean the ruin of his house. With regard to the operations in Burma; on the other hand, the facts were obscure and the causes were practically unknown. The constitution and circumstances of the Government of India almost preclude it from those prompt disclosures of its grounds of action, which tend to keep public opinion in harmony with public policy in other dependencies of the British Crown. The Native Press has here

to grope its way amid false rumours and ambiguous voices, stumbling over errors before it reaches the truth. Your Lordship's declaration of policy last Monday will, therefore, profoundly influence public opinion throughout India. For that declaration made it known that, quite apart from Palace massacres or Court crimes, or internal misrule in Upper Burma, and only when the future of a British province was seriously compromised, and after honest and sincere endeavours at an amicable settlement had been frustrated by the folly of the King, did your Lordship's Government resort, as the last alternative, to war.

"By the attitude of the Native community in this juncture it will hereafter be judged. A policy of wise preparation against external dangers has been laid before it. The crisis of April placed the necessity of that policy beyond doubt. Of the moderation and financial prudence with which the policy is being conducted your Lordship's speech contains convincing proofs. The circumstance that, in the anxious moments of last summer, while every preparation was successfully made, yet not a regiment was mobilised nor a penny spent except on precautionary measures, is a fact more significant to the taxpayer than any pledges or promises. Nor less significant is the fact that the Government has had the courage to curtail the increase to the military forces recommended by so sober-minded an adviser as the late Commander-in-Chief. In so doing the Government spared the taxpayer by taking a very heavy responsibility on itself.

"During seven centuries India tried the opposite policy of non-preparation, with appalling results. Again and again its peaceful populations were submerged beneath waves of foreign invasion. Those invasions came not only from Central Asia into the Punjab, but from Burma into the Provinces of Assam and Lower Bengal. It should never be forgotten that on the map of Bengal in the last century, vast districts, within 36 hours' sail of Calcutta, and now peopled by millions of prosperous cultivators, appear bare of villages, with the terrible words written across them, 'Depopulated by the Maghs' or Burmese. In Northern India, during a short period of twenty-three years in the middle of the last century, six exterminating hosts from Persia and Afghanistan swept across the country, leaving a broad tract of desolation to mark their route. For the chronic state of unpreparedness which had cost India so appalling a sum of human misery, the British Government substituted a policy of preparation which from time to time imposes certain burdens. In the first quarter of this century, that policy imposed a heavy burden to meet the menaces of the greatest military Power then in Europe. In the fourth quarter of the century, it is imposing a lighter burden to protect India against possible danger from another great military European Power. And as the measures of Lord Wellesley postponed the danger from France, till it passed altogether away in the last generation, so may we, with a good confidence, look forward to similar results from your Lordship's precautions against Russia in our own day. I believe that the true issues have only to be understood by the people of India, in order that they shall gratefully accept the policy of the Government, and bear, without a murmur, the burdens which it may impose. Most of us have watched with interest the efforts lately made by Natives of India to win their way into Parliament, and I for one sincerely regret the unfructuous result of their endeavours. But those results show that, in order to obtain the suffrages of Englishmen, you must possess not only their sympathy and goodwill, but also their more slowly granted confidence. The Natives of India have now the opportunity of giving a conspicuous proof that they cordially identify themselves with measures demanded for the safety and integrity of the Empire, and that they cheerfully accept their share of the burden which those measures involve.

"The other matter on which I should like to say a few words has reference to the form in which the burden is to be imposed. Without raising questions as to the abstract merits of direct or indirect taxation, I desire to express my conviction that an income-tax is at present, and has for some time been, the only equitable form of new taxation in India. I agree with those Native writers who have been urging, both in the journals and in independent treatises,

that an undue proportion of the revenue has, of late years, been raised from imports falling heavily on the lower classes. The Finance Minister has explained how the fiscal reforms of 1882, by drying up the chief source of increased indirect taxation, brought the country face to face with direct taxation. The most prominent of those reforms, namely, the abolition of the import-duties, has also had the effect of disturbing the adjustment of taxation between the rich and the poor. For since the Indian cotton-mills began to produce the coarser qualities of cloth on a great scale, and the duty was consequently restricted to the higher qualities, the import-tariff acted to a large extent, although not entirely, as a tax on the well-to-do classes. The peasant, who requires a stout, coarse garment which he can wash out every day when he bathes in the village-tank, profited little by the abolition of the import-duty on the finer sorts of piece-goods. I believe that an income-tax, moderate in amount, and levied by an efficient permanent staff, is not merely the financial corollary of the abolition of the import-duties, but that it will tend to a more equitable distribution of the public burdens between the rich and poor.

"I am aware how heavily the least additional pressure must at present fall on our own countrymen in India, struggling to maintain their position here, and to educate children at home, with a depreciated rupee. The sincere and eloquent words of sympathy in your Lordship's speech last Monday have gone to many an Englishman's heart. One sometimes hears it urged that the duty on liquors is in itself a sufficient contribution from the European community. But it should be remembered that the duty on liquors, paid chiefly by Europeans, yields but a small total sum as compared with the internal excise, paid almost entirely by the Native population, and to a large extent by Natives of the poorest class. If the import-duty on liquors amounted to £422,138 in 1883-84, the internal excise yielded £3,836,961.

"The only practicable alternative to an income-tax is an increase of the salt-tax. Sir Auckland Colvin has shown that such an increase would fall most heavily on the classes least able to bear it, and he has brought forward other unanswerable arguments on the same side. From my point of view there are two considerations which have a special cogency at present. Under the new system of a moderate uniform rate of salt-duty, a gradually increasing quantity of salt is being consumed. If that increased consumption is allowed to reach its natural expansion undisturbed, a very small increase to the rate of duty will, before many years elapse, yield a very large addition to the revenue. Moreover, the extension of railways will, before long, materially lighten the actual burden of the salt-tax on the people in the interior of India. The cost of the carriage of a ton of salt by railway is less by two annas a mile than the cost of its carriage by cart. If the salt travels 450 miles, or less than the distance from Calcutta to Benares, and much less than the distance from Bombay to Nágpur, the effect of this difference is to reduce the cost to the consumer by more than the whole duty levied by Government. I may mention that, incidentally following the reform of the Salt Duty in 1882, has been a freer development of an important food-producing industry. More than one hundred fish-curing yards under Government inspection have been established on the Madras coast. Last year they produced 20,000 tons, and this year their outturn is estimated at 30,000 tons of wholesome food. I am aware that the system of supplying cheap salt for fish-curing might still be followed. But any change in a reformed system so recently established, and only gradually developing its results, is to be deprecated. Apart from the undue pressure of an increase in the salt-duty on the poor, there are important considerations against any such increase at present.

"While, however, I believe that an income-tax is equitable in its character, I acknowledge that it may prove most oppressive in its incidence. The odium which has attached to the successive Indian income-taxes is chiefly due to the successive inquisitorial scrutinies required for their assessment. The tax has been laid on with a pledge that it will be taken off in a year, or two, or within a limited period, and an army of poorly paid officials has been let loose upon the country, resolved to make the most for themselves out of the temporary job. With continuity of assessment, and with moderation in assessment

by means of a permanent staff, much of this oppression has ceased. It is possible to name districts in which the system of record is now so perfect as to have almost put an end to oppression altogether. I observed, therefore, with satisfaction that the present Bill was introduced without any pledge as to its temporary duration. The Bill is so drawn that it will not become inoperative by mere efflux of time. If the income-tax is to be hereafter abolished, it must therefore be abolished by a deliberate Act of the legislature, and after a public discussion of the whole facts. I sincerely hope that another period of general remission of taxation, such as that of 1882, may again come to India. But until that time arrives, I regard the continuous levy of a moderate income-tax as one of the most equitable sources of Indian revenue.

"I say this without pledging myself to all the details of the present Bill. Those details will be dealt with in the Select Committee. I must, however, at once express my regret that no deduction is allowed from the assessable income for payments for life-insurance or deferred annuities. The English income-tax law has long recognised the expediency of encouraging thrift by making such deductions. The present extension of the license-tax to the professional and official classes, whose brains are their sole stock-in-trade, and who have no good-will of a business to leave behind them, seems to render such a deduction particularly necessary in India. The gradual disintegration of the joint Hindu family, which acted as a minute mutual assurance company or Friendly Society, points to the same conclusion. The exemption of payments for life-insurance should not, in my opinion, be left to executive rules, but should form a part of the Act. Again, it is not clear to me at present why a clerk in a Government office drawing Rs. 99 per mensem should be exempted from income-tax on his salary, while a clerk drawing the same amount in a bank or merchant's office should have to pay. The responsibilities of employers for collecting the income-tax from their servants; and especially the responsibilities imposed by the Bill on shipping agents and of companies, also seem in some respects to require elucidation or modification.

"In conclusion, I desire to express my sense of the simplification which this Bill effects in the Indian law, and of its perspicacious brevity as compared with the English Income-tax Acts. I have been lately trying to understand the legal enactments under which the income-tax is levied in England. In Mr. Dowell's work on the subject published in 1874, the Income-tax Acts number fifty, and their text fills 326 pages. To these are appended extracts from eighteen other Statutes occupying another 120 pages, and requisite for a complete comprehension of the law. Instead of this voluminous compilation, and in place of the six enactments which have hitherto regulated the license-tax in India, the whole subject matter is here embodied in one compact Bill."

The Hon'ble MR. STEEL said:—"The country will sympathize with your Lordship's Government in the mortifying necessity that, while you have so favourable an account to give of the revenue, you should be compelled to resort to fresh taxation. And, if such taxation is required for the well-being of the State, you may rely that a loyal and reasonable community will respond cheerfully to the sacrifice demanded from it. I trust it is not necessary for me to disclaim on behalf of Anglo-Indians the application to them of my hon'ble friend's sarcastic reference to 'those who are willing to transfer to others their share of misfortune.' Such will not be our attitude. We are suffering exceptionally in a period of general prosperity,—some of us from deteriorated investments, others from depreciated exchange, and many of us from the excessive competition which renders the struggle for existence keener and keener as years go by,—but we are all ready to bear our fair share of the burdens of the State. With regard to the necessity for great additional expenditure, I have little to say. Your Lordship's speech set forth, in stirring and weighty terms, the paramount duty which devolved upon you of strengthening and consolidating our military resources. The country distinctly recognises the need of placing India in a position where her safety is assured, not by treaties or arrangements with others, but by her own commanding strength. 'When the strong man armed keepeth his palace, his goods are in peace.' This attitude must be ours. You have described to us the means you have adopted with this end in view, and we approve of your fortresses, your frontier railways, and your additions to the army. We believe the expenditure is indispensable and are ready to pay the bill. We note with satisfaction the promise of a Commission to insure due economy of our resources, and take leave to remind you of an important economy, combined with increased efficiency, which may be attained by following the advice of the Army Commission, from whose report so much was expected.

"Having thus admitted the necessity of expenditure, I agree heartily with the hon'ble member in repudiating the cowardly suggestion that in a period of general prosperity we should provide for our present requirements by borrowing. Nothing but overwhelming necessity can justify such an improvident expedient. I use the same terms with regard to our reserve for famine. The policy of which that reserve was the outcome was the subject of careful and anxious thought and deliberate determination. We must pursue the path until we have attained the goal in view. When introducing this Bill the hon'ble member devoted the earlier part of his speech to a comparison of the budget-estimates of the last three years with the income actually obtained from existing sources of revenue. He demonstrated to the satisfaction of the country the elastic and expansive character of its resources, and silenced those dismal forebodings of financial ruin periodically launched from the platform and the Press. He produced evidence of the advancing prosperity of India under British rule, and satisfied the world that our consistent efforts to improve the condition of the people are achieving the results to be anticipated from them. The hon'ble member estimates that existing sources of revenue will defray the expenditure of the country with the exception of a sum of £700,000, most of which he now proposes to raise by this Bill. I will here express the opinion that his estimate of revenue is by no means too sanguine. On the contrary, I confidently expect that at the conclusion of the financial year we shall have to congratulate him on a surplus as great as the average of the past three years. This happy result I look for partly from the bounteous harvest of which we have every prospect, and partly because I cannot agree with the gloomy view taken by my hon'ble friend and shared by your Lordship of the effect on our revenue to be anticipated from the depreciated exchange which he assumes as the basis of his calculations. Although I feel some reluctance to enter upon this intricate and difficult subject, its importance is so great that I must support my views by argument. A change in the relative value of the precious metals, which is the cause of our fluctuating exchange, neither increases nor diminishes the material wealth of the world. The change merely involves a transfer from one hand to another. Some must gain by every fluctuation; and what some gain others must lose. If the value of silver declines, the losers are the owners and producers of the metal, and those to whom obligations are due in silver currency. The gainers are the consumers and debtors. India must belong to one of these two classes, and no argument is necessary to prove that she does belong to the latter. But, while I cannot expect that the hon'ble member will contest this general proposition, I am prepared to hear him argue that the gain to the national resources may be concurrent with the loss to the Exchequer which he foreshadows in his speech. This view will be supported by the following argument. The fall of exchange causes a direct loss on the payment of home charges in gold. At the same time, if we do not increase our land-revenue with each depreciation of our currency the advantage all goes to the landholders, and if we do not increase our salt-tax the gain goes to the consumer and not to the Government. All this is true, but I reply that other important elements of the question are left out of consideration. When the purchasing power of silver declines, we obtain a higher price for Bengal opium. I confidently assert that from this source alone we recoup ourselves for one-half of our loss on home charges. There is another important item of gain. A fall in exchange, when accompanied by no corresponding advance in rents or in cost of transport, is an immense stimulus to exports, and increases the income of Government railways. Here, my Lord, we find an explanation of our surpluses. Our budgets have brought into account all the losses which arise from falling exchange, but have failed

to take credit for the compensating gains which must accompany them. Holding these views, I expect in the coming financial year a large surplus over the estimate of revenue which has been put before us. I state this, however, rather as a cause of satisfaction than complaint. I look upon it as the duty of Government to provide in prosperous times a very safe margin of income over expenditure.

"I now come to the main topic of debate. Does this Bill provide the best means of raising the additional revenue we require? The hon'ble member has told us that he expects to have to defend his Bill against champions armed with the rusty and obsolete weapons of antiquity. If there be any such, I have not enlisted in their ranks. I have not been compelled, like my hon'ble friend, by either duty or inclination to ransack the records of past years. I can urge upon the Council nothing more venerable than contemporary public opinion, and I am happy to say that the views I will express are sanctioned by the approval of the leading representatives of commerce in this city.

"The first principle of a proper system of taxation is that it should be fair in its incidence, and the second that no unnecessary wastage should be involved in collection. Besides these it is obvious that the form of taxation should cause no unnecessary oppression or irritation, and should be framed in accordance with the wishes and even the prejudices of the people. Judged by this standard, direct taxation is less suited to this country than indirect taxation, if only we could insure that the latter could be made to fall equally upon the various sections of the community. But as it appears that no indirect form of taxation can be devised which will obtain from a certain class their proper contribution, I must express my approval of a system of mixed direct and indirect taxation. As the choice lies, therefore, between the license-tax and an income-tax, I unhesitatingly prefer the latter. The license-tax was grossly unfair in its incidence. The big fish broke through, while the small were caught in the net. This Income-tax Bill is at least intended to be fair. I believe some of its details are quite unworkable, but these may be amended in Committee; and if the Committee can secure that the means and instruments provided for carrying the Bill into effect are calculated to cause neither oppression or needless irritation, I will be content with it. My hon'ble friend will look upon me as another Balaam if I agree with him any further; and I must now attack him on his vulnerable side.

"I must protest in the strongest terms against any budget which does not redress the crying evil of our financial system. The hon'ble member will anticipate me. I refer to the export-duty on rice. To my mind it seems inconceivable that such an objectionable impost should be preserved in any civilized country. An export-duty on raw produce, and that produce the food of the people! With all our study of economics, can we do no better than this? It is as hurtful in practice as vicious in principle. Who would dream of an export-duty on wheat? In principle there is no difference. Let us consider its effect. An export-duty of 10 shillings per ton is equal to a percentage ranging from 5 to 10 upon its value. It absolutely shuts out the grain from important consumption for distilling and sizing purposes. It reduces the foreign consumption of rice for food when it comes into competition with other articles of food. It thus limits the production of the principal agricultural product of Bengal and Burma at the cost of the agricultural and labouring classes. By checking the production of rice it diminishes the reserves to which we must look in case of scarcity and famine. I look upon this rice-tax as the very worst possible source of revenue which could be devised, and cannot approve any budget which does not get rid of it, even at the cost of fresh taxation. I have been informed that of the abundant harvest of 1882 much rice was actually allowed to rot upon the ground because not worth the cost of saving, which but for this duty might have been profitably saved and shipped. But it is not sufficient to prove that a tax is objectionable unless I can provide a less objectionable substitute; and this condition I will endeavour to fulfil. I propose that the £600,000 required for the remission of the rice-duty be provided from other indirect taxation. As the import-duty on textile fabrics has been mentioned in this

debate, I may as well say at once that, while this source of revenue should never have been abandoned while another more objectionable remained, still what has been done cannot be recalled. We must then look to the salt-tax, and I propose by raising this four annas per maund to obtain the sum which we should remit on rice. Now, I am well aware that to touch the salt-duty may be condemned in certain quarters, and I must therefore support my position by an examination of the incidence of the salt-tax. It has been abused by some, because it affects the working classes. Unless it affects them unfairly I look upon this as a merit. I need not protest in this assembly against the socialistic notion that the working classes should contribute nothing to the State. I propose to show that it falls so lightly upon the people as to be practically unfelt. When Major Baring reduced the tax to Rs. 2 per maund he specially reserved the probablity that the tax must be raised if exchange declined. Exchange has since declined 10 per cent. The cost of salt to the consumer is about Rs. 5 per maund, and the increase I suggest is 5 per cent. on this price, leaving the consumer 5 per cent. better off than he was before. But it is necessary for the purpose of refuting objections to show how the tax really falls upon the people. The labouring classes supply themselves with salt by purchasing bi-weekly from the village-shops. Their requirements for a year are then divided over 104 portions. The incidence of the duty is four annas per head, say 4½ pence sterling, per annum. The quantity purchased on each occasion is so small that it is not even weighed, but is given to the purchaser in a rough pinch or handful. Its value is so small that it is not possible to represent it by the smallest coin of the realm, but is paid for in cowries. To speak of such a tax as oppressive is a misuse of terms. It has never been complained of by any one except exotic philanthropists, and in raising it a half-penny per head per annum I think we should harm no one. It is my honest conviction that the peasant has never yet discovered that the tax has been reduced, and that he will neither know nor feel this small advance. The hon'ble member believes that the increased consumption of salt has been caused by the reduction of duty. I believe he is mistaken. I believe the increase is due to the increment of population, the great extension and cheapening of the means of transport, and above all to the abolition of the customs-line. I beg to assure the Council that I do not propound these views as my own. They have been pressed upon me by the Committee of the Chamber of Commerce and others of our most influential fellow-citizens. I hold in my hand a statement of the imports of Liverpool salt into Calcutta during the last ten years. The figures concerning all India are not in my possession, but this statement shows some curious facts regarding the salt consumption of Bengal. The largest increase of the decade was in 1876. There was no reduction of duty that year, but the consumption rose 13 per cent. After the reduction of 1882, the consumption rose 7¾ per cent. in 1883, and of this increase 1¾ per cent. was lost in the following year. My conclusion from all this is that we should do a service to the country in general, and the poor in particular, by taking the duty off rice and adding four annas per maund to the salt-duty. I would recommend this, my Lord, from a consideration which, I hope, may influence you as a statesman and man of the world. If the salt-duty is ever to be raised, the objections to it will gain force unless it is done on an occasion like the present, when you are imposing direct taxation.

"Before concluding, my Lord, I must address myself to another subject which appears to me to demand a change of system in our finance which would result in an important economy of the resources of the nation. The recent Government loans for public works have been raised in England, which is the cheapest market; and although this course has been made the subject of needless apology we may hope that the wasteful and extravagant system of borrowing in India will not be resumed. But unfortunately Government has expressed its intention to require that all loans for local and municipal purposes, such as the docks of Calcutta and Bombay, must be raised in India. I must protest against a system so generally condemned being applied even in this partial manner. We can borrow money in England 1 per cent. cheaper than in India, involving a saving of. ⅜ths of the entire

charge of interest. The only possible justification for accepting such a loss must be the reasonable fear of a further extraordinary decline in silver. The fall represented by this difference is from 1*s.* 6*d.* to 1*s.* 2*d.* the rupee. Now, although no one can tell what may be the course of the silver market, and although a further fall seems probable at present, we can pretty safely assume a limit to the possible continuous rate of decline. An adequate and detailed demonstration would fill a volume, but I think I can prove enough for my purpose in a few words. The amount of silver bullion and coin in the world is about 700 millions. The annual production is 25 millions, of which 8 millions are absorbed by arts and manufactures and the wear of coin. There remains annually 15 millions available for coinage. Assuming an extreme pessimist view, the decline in the value of the coin cannot exceed the proportion of its increase in quantity. The 715 millions of one year must be worth at least as much as the 700 millions of the year before. On this basis the continuous average decline cannot be more than 1*d.* per ounce or $\frac{3}{8}d.$ per rupee. But while the fall cannot be more than this, there are many reasons why it cannot be so much. The specie requirements of India and China must increase; and a great fall in value must produce an effect on production. If exchange falls steadily $\frac{3}{8}d.$ every year for ten years, it will come down from $\frac{1}{6}$ to $\frac{1}{8}$, but in the meantime we should benefit for ten years by borrowing in England to the extent of $\frac{2}{5}$ths of our interest charges. I do not pretend that this is a scientific treatment of a complex problem, as the fluctuation in value of the precious metals is affected by appreciation of gold as well as by depreciation of silver. Having regard, however, to conditions of time and place, I put forward these observations as sufficient proof of the correctness of the general view that every loan effected in India involves an extravagant waste of our resources."

The Hon'ble MR. QUINTON said:—"I do not propose to follow my hon'ble friend who has just spoken in his criticism of the budget, in the objections he has urged to the export-duties on rice, and in his proposal to substitute for them an increased rate of duty on salt. It appears to me that the functions of this Council when discussing a Tax Bill on an occasion like the present are similar to those of the House of Lords at home when debating a Money Bill sent up by the House of Commons. We must either accept or reject it as a whole. The members of this Council, excluding the members of the Executive Government, have neither the knowledge nor the information which would warrant them in forcing on schemes of their own in preference to those laid before them on the responsibility of the Government of India. One remark of the hon'ble member I cannot however pass unnoticed. He observed that an increase to the rate of duty on salt would affect the consumer inappreciably. The controversy is not a new one, but I am old enough to remember an enquiry made on this point in Oudh some 20 years ago, the result of which was, to the best of my recollection, that an increase to the rate then existing would unduly straiten the means of the people to supply themselves with a sufficiency of an article essential to their health and, what to an agricultural community is almost equally necessary, to the health of their cattle.

"I now pass on to the subject immediately before us. The speeches of your Lordship and Sir Auckland Colvin at the last meeting of this Council must satisfy us that, owing to causes over which the Government of India have had but slight control, the current financial resources of the State have become inadequate to the demands made upon them in order to secure the welfare and safety of British India. The continued fall in the price of silver, coupled with the increased military charges, has proved to be too great a strain on the ordinary revenue.

"We must also accept—and I for one most thoroughly acquiesce in them—the reasons which prevented the Government of India from retracing its steps and reimposing the customs-duties abolished in 1882, from increasing the rate of the salt-tax, or from borrowing to satisfy our present wants. Your Excellency has assured us that measures of economy have not been lost sight of, but that, before they can be fully considered and carried into effect, the finances must be otherwise recruited. It would be impossible without deranging the whole administration throughout the Empire to use the shears to such an extent as to fill up immediately the deficit now before us.

"These things being so, but little choice was left to the Government as to the means they should adopt to put the finances on a sound footing, and the proposals now made seem to me cautious, adequate and founded on unassailable principles. As stated by my hon'ble friend, the Finance Member, it has been clear for some time back to careful observers of the management of the finances that an income-tax in some shape or other was steadily approaching, and we have not been startled by any sudden apparition, nor have we, as on a former occasion, had a mine sprung upon us in the shape of a demand for a doubled income-tax in the middle of the year. The Bill on the table regulates, equalises and extends an existing tax, and will take effect from the date when such measures usually come into force.

"Your Excellency and my hon'ble friend have also left nothing to be said on the fairness and decency of requiring those classes who benefit most by our rule in India to contribute to its support. The opponents of direct taxation are eloquent on the abuses which are, they say, inseparable from such a system of taxation in India, and are eager in their desire to prove the facility with which additional taxation can be imposed on the land. Like the lawyers of Jerusalem, they would load others with burdens grievous to be borne, and they themselves touch not the burdens with one of their fingers.

"Happily the arguments from abuses, such as they were, against the former income-tax lose much of their force when directed against the Bill. The license-tax is a much narrower measure, and does not touch the agricultural and labouring classes, who already pay a fair share towards the expenses of this Government; it has been in operation for several years; the administration of it has year by year become more careful and complete; the machinery for carrying it out has been rendered more effective; the supervising agencies more skilful in detecting oppression and abuses, and the persons affected by it better acquainted with the means of securing a remedy against unfair assessments.

"Speaking for the Provinces of which I have most experience, I feel justified in saying that the tax is assessed and collected with as little pressure and abuse as it is possible to expect in levying any such impost.

"The license-tax in its present form, however, yields a sum insufficient for our needs, and is open to one great objection of principle already alluded to by my hon'ble friend who preceded me, namely, that beyond a certain point the richer a man is the smaller is the proportion of his income that it takes from him. He whose profits are counted by lakhs pays exactly the same as he whose annual income is Rs. 25,000. This anomaly the Bill will remove by regulating more fairly the contributions of the wealthy towards the support of the Government to which they owe their prosperity.

"On the other hand, by maintaining a rough classification of small incomes for the purposes of assessing the tax, the Bill removes the necessity for inquisitorial proceedings in such cases, and lessens the opportunities for extortion and oppression by subordinate officials. The wealthy are able to take care of themselves, where humbler men would submit to unjust and vexatious exactions.

"But, my Lord, while approving altogether of the principle of the Bill, and prepared to support the Motion that it should be referred to the Select Committee, I must express my regret that it is considered necessary, on what are no doubt strong grounds, to limit the number of classes exempted from its operation, and thereby to curtail still further the incomes of Anglo-Indians of small or moderate means who are suffering so severely from the state of the exchange with Europe. The Native of India may, as is stated by many and by the high authority of my hon'ble friend on my right (Mr. Steel), be a gainer by the fall in the value of silver, and share in the increased prosperity of the country which it is alleged has been thereby brought about; but for the Anglo-Indian on a small income there is no such compensation. He must if married as most are, remit to England for the members of his family whom

sickness sends home from this country, or for the education of his children, a considerable proportion of his income. On that sum, be it great or small, the present depreciated value of silver involves a tax of over 30 per cent., and his income is diminished accordingly. The residue can ill bear a further deduction such as is imposed by the present Bill. Owing to the deductions from his income made by the fall of exchange on the one hand and the Bill on the other, his position will be one of unmerited hardship. He will be ground down between the upper and the nether millstone; and I hope that your Lordship in Council, though you have been unable to except the class to which I am referring from their liability to a general tax on incomes, may see fit to devise some means of mitigating the hardship they must otherwise undergo."

The Hon'ble MR. EVANS said:—"I have nothing to add to what has been said by my hon'ble friend Mr. Steel as to the attitude of Englishmen in India as regards this taxation. We have not flinched, and shall never flinch, from any burden which we see to be necessary for the maintenance of the Indian Empire. I am satisfied that the £660,000 must be raised, and that there is no other feasible means of raising it except the one proposed by the Government, and I therefore do not object to the tax nor do I deny that it is just and equitable in principle.

"But I wish to point out to the Council that an income-tax in India is not the powerful instrument which an income-tax in England is, nor an instrument suited to the country or easily to be worked, and that we cannot trust it to meet the deficits which threaten constantly to recur from the fall of silver.

"It is almost impossible to get the traders of an Eastern country like India to make anything like a correct return of the fluctuating yearly profits of their trade. This arises from no viciousness of their nature, for they are just and honest in their dealings with each other, but from the old fixed idea, generated by centuries of oppression, that self-preservation requires that they should conceal their profits from Government and all outsiders. As it is useless to call for returns from them or to assess on the basis of such returns if sent in, the Collector must assess at his discretion and to obtain the necessary information the Collector must employ agency untrustworthy and corrupt. This will result in much bribery and much extortion and oppression. There will be a vast difference between the amount of money which leaves the pockets of the people and the amount which finds its way into the Treasury. That the comparatively small sum of money now required can be raised by this means I do not doubt; but unless extreme discretion and tact be exercised in the working of this tax, it will create a maximum of irritation with a minimum of results. The great difficulty of introducing and working such a tax as this in an Eastern country, the great danger of oppression by agents open to bribes is so evidently present to the minds of the Finance Minister and your Excellency, that I need not enlarge upon them. I will only say that this tax is a reed which it will be dangerous and unsafe to lean too heavily on.

"I am not unmindful that the license-tax has been in existence for some time, but I doubt if its working can be called satisfactory in Bengal; but the existence of the License-tax does no doubt render easier the introduction of this more extended system; and it may be that if this tax is worked in the direction of leniency and without too many changes of assessment,—for change and unrest is of all things most abhorrent to the Eastern mind,—the people will settle down under it. But to attempt to make it yield its fullest results will be disastrous, and this tax will, I fear, never occupy the same place in our system as its namesake does in England.

"Possibly something may be done in future to make the death or succession duties more profitable by depriving those who do not take out letters of administration to the whole estate of the benefits of the legal machinery of our Courts. But this subject is beset with difficulties, and offers no escape from our immediate difficulties.

"I do not share my hon'ble friend Mr. Steel's view that the depreciation of silver is a benefit, but I see that it threatens us with a yearly widening chasm of deficit, and I think we can feel no security as to our finances in face of the insuperable difficulties in the way of fresh taxation until we hear that the English Government has abandoned its policy of doing nothing, and is taking active steps to meet the danger by international agreement.

"I agree with my hon'ble friend Mr. Steel that the export-duty on rice is indefensible and wrong, and ought to be got rid of. So bad a tax is it, that probably the raising of the salt-tax is not too great a price to pay for its abolition, though on principle that tax ought only to be raised to meet emergencies."

The Hon'ble MR. GOODRICH said:—"The hon'ble member who spoke first expressed his sense of the desirability of exempting amounts paid on policies of insurance or deferred annuities from the amount of assessable incomes. That induces me to say that insurance companies and friendly societies are not sufficiently under control in this country to enable the Government to make such an exemption general, and the proposal of my hon'ble friend presents some difficulties in that way. Therefore, if any such exemption is made, I think that such exemptions should only be made in connexion with well established Societies or Government savings banks, or some arrangements under the Post Office. I have nothing to say on the general principle of the Bill, but I assent to the motion now before the Council."

The Hon'ble PEÁRI MOHAN MUKERJI said:—"It is now three years, if not more, since the wholesome practice of submitting the annual Financial Statement to this Hon'ble Council was discontinued in favour of the publication in the official Gazette of statements showing the actual receipts and disbursements of the year, and estimates for the coming year, in the shape of a Government Resolution. Although this altered procedure has its advantages, and is likely to be adhered to in the present year and in future, I think it is very desirable, for many reasons, that there should be harmony between the rulers and the ruled in the determination of important questions relating to finance and taxation; and I think that the Government cannot but strengthen their hands by taking the public into confidence in such matters. I feel therefore deeply grateful to your Excellency and the Hon'ble the Financial Member for having, in introducing the present Bill, taken the opportunity to explain not only the present financial situation of the Government but also those political considerations which led your Excellency's Government to engage in a war with the late King of Upper Burma at a cost of £270,000, and to embark in expensive military works and preparations for the defence of our north-western frontier. The cost of these military preparations is estimated at no less than two millions, and there is a further charge of nearly a million which has to be met next year owing to the apprehended fall of a penny in the value of silver. While, however, the Hon'ble the Financial Member expects to meet the increased charge on account of exchange from the additional revenues from the export-trade, railway-receipts, opium and customs, and to provide £1,300,000 for military preparations from the existing resources of the Empire, there remains a deficit of £700,000 which your Excellency's Government have to confront. Considering that no large measures of economy in the administration of a vast Empire can be matured and carried with a view to immediate effect, and that, by reason of the currency of Provincial contracts, only a narrow margin for retrenchment of expenditure is left to the Government of India, it would be idle to suggest that this deficit in the estimates for the coming year should be met by a reduction of expenditure. Nor do I think that Government should have recourse to a revision of either the salt-duty or the import-duties in this emergency. I am free to confess that the Hon'ble the Finance Member has failed to satisfy me that the high duty levied on salt before 1882 placed an insufficient supply of the article within the means of the people. I venture to think that the reduction in the rate of duty has made no appreciable difference in the measure of consumption of the article by individuals, and that we must look to improved means of communication and to an ever-increasing population of the country for an explanation of the large increase in the aggregate consumption of salt. But it appears to me, in spite of

what the Hon'ble Mr. Steel has said, that no addition, however small, should be made by indirect taxation to the cost of living of a poor man who earns barely enough to make the two ends meet, while his rich neighbours bear much less than their fair share of the burden of taxation. In making therefore the observation that 'it is obvious that any honourable man who had to choose between taxing the most indigent classes, who already contribute a considerable share of the public burdens, and taxing those classes who, though in easier circumstances, scarcely contribute anything, it is to the latter alternative that he would resort,' your Excellency enunciated one of the soundest doctrines not only of fiscal administration but of morality and justice. I feel therefore no hesitation in saying that the principle of the present Bill is just and sound, and I trust that those who will be disposed to view it by the light of adverse criticism will bear in mind that it involves a measure of taxation which the Government feel the greatest reluctance to impose; that it is the outcome not of financial mismanagement but of a policy forced upon the Government by certain external events over which they had no control; and that it is a measure which is intended 'to maintain unendangered,' to borrow your Lordship's expressive language, 'the honour of the Queen-Empress and the safety and security of the Indian Empire and of the millions of hearths and homes it contains.' But while declaring with no uncertain voice that the present measure is necessary to meet the exigencies of the Empire, and that it is just and equitable in principle, I feel bound to entreat this Hon'ble Council not to look upon it as a perfect measure. The distinction it makes between public servants and servants of private firms and individuals, the liability it attaches to joint Hindu families, the provision it makes for the assessment of occupying owners of lands and houses which already bear a heavy burden of municipal tax or public cesses, and the opening it leaves for inquisitorial proceedings, are defects in it which I hope the Select Committee will be empowered to remove.

"A far graver question connected with the measure is the question of its duration. The Hon'ble the Financial Member has told us that there is but one year to be tided over; and we know that, excepting in cases of extraordinary demands for increased expenditure, our revenues are enough to maintain at least an equipoise between income and expenditure. The Hon'ble the Financial Member has expressed an apprehension that we know nothing of what increased expenditure may be in store for us, in respect, for example, of Burma. I find, however, from the Administration Report, that British Burma, after defraying her own expenses, has paid to the Indian Exchequer an aggregate surplus of £8,414,102 in the last eight years, or a sum of more than one million a year. But, even supposing that the cost of administration of Upper Burma will introduce a complete change in the financial position of that country, that the men we call dakaits are really men fighting for their country, and that there is prospect of an infinity of troubles in the Chinese frontier, we rely on your Excellency's wisdom to consider whether in the true interests of the Indian taxpayer that remote country should not be separated from your Excellency's Government and made into a Crown colony. At any rate, I venture to express a hope that, as the increased expenditure which has made the present measure of taxation necessary is of a temporary character, as the Provincial arrangements now in force will expire at the end of the ensuing year, as matters in Burma are still unsettled, and as your Excellency contemplates appointing a Financial Commission to make a careful revision of our Imperial and Provincial expenditure, your Excellency will be pleased to put off the enactment of any permanent financial measure till the next year. With all its merits, the present measure will leave the incidence of direct taxation in a state of great inequality. The poorest cultivator of the soil will pay a cess of more than 3 per cent. on his profits, while a certain class of persons in the enjoyment of an income of more than Rs. 1,000 a year will pay no direct tax whatever to the Imperial Exchequer. It is, besides, a question worthy of further consideration whether one of the permanent sources of our revenue should be an income-tax, which such a high authority as Sir Charles Trevelyan described as 'a potent but imperfect fiscal machine'

that 'should be regarded as the great financial reserve of the country,' and which, Mr. Massey said, should never be resorted to except under emergent circumstances.

"The consideration of the Famine Insurance scheme was appropriately introduced by your Lordship and the Hon'ble the Financial Member in connection with the present measure; but even at the risk of being reckoned one of 'the herd of such who think too little and who talk too much,' I must say that those who contend for the existence of a separate Famine Insurance Fund are far from being guilty of a 'wilful error.' Sir John Strachey expressly assured the public in 1877 that the proceeds of the new taxes then imposed 'will be expended for the purpose of providing what I have called an insurance against famine, and for no other purpose whatever.' Lord Lytton accentuated that assurance by saying 'we have pledged ourselves not to spend one rupee of the special resources thus created upon works of a different character'; and Her Majesty's Secretary of State for India, in laying the last Indian Budget before Parliament, is reported to have said: 'This year Sir A. Colvin proposed in his Budget to allot for the purposes of the Famine Insurance Relief Fund £33,000 under the head of direct famine relief; He proposed to take £287,000 from the Famine Insurance Fund for protective irrigation-works'; and, after some further remarks, his Lordship concluded by observing that 'it is perhaps more honest and straightforward to say that to all intents and purposes the famine insurance has been swallowed up by the peculiar demands of the year.' But, after what the Hon'ble the Financial Member has said, the contention about this matter has reduced itself to a contention about words. We have been told that since 1st April, 1878, a sum much larger than £1,500,000 per annum, the amount originally contemplated, has been spent for the purposes for which the fund was designed, an authoritative statement which should silence all complaint on this head, and convince the public that no pledge has been broken, and no trust betrayed, in connection with the Famine Insurance scheme."

The Hon'ble RAO SAHEB VISHVANATH NARAYAN MANDLIK said:—

"MY LORD,—Having listened to what has been said before, I must confess that my work has become somewhat complicated, but what I propose to do is to vote for the Motion to send the Bill to the Select Committee, and to submit a few observations to the Council on some of the points touched on in the observations which Your Lordship addressed to the Council last Monday, as well as what fell from the Hon'ble the Financial Member. But before I do so I must say I agree with what fell from the Hon'ble Mr. Quinton in reference to our position as regards this Bill. We have no Financial Statement technically before us, but the present Bill gives us the same opportunity for discussion as we should have had if both the Bill and the Statement had come together. I see the Hon'ble Mr. Steel has introduced the question of export-duties; I must ask the hon'ble members to remember that that matter is not by any means so simple. I think that the subject of imports and the subject of exports are to a considerable extent relative questions. Sir Charles Trevelyan, in an address on Indian finance, delivered in 1870 in London before the East India Association, said as follows:—

'Although Her Majesty's Government objected in 1865 to an export-duty of 3 per cent. being levied on Indian coffee for the benefit of the Indian exchequer, a duty of 45 per cent. is levied on this same coffee in England for the benefit of the English exchequer. This is neither just nor generous. The duty should at least be halved between the two exchequers, and the more so because great part of the coffee exported from India is sent direct to France and other foreign countries, and the Indian Treasury therefore misses any benefit from it. The same considerations apply to the tea exported from Northern India.'

"Sir Charles had recently consulted the great economist Mr. McCulloch on this question, and his letter in support of the above views was read to the meeting.

"I proceed now with the subject in hand. Having listened to the clear exposition of Sir A. Colvin, I take the immediate question before us to be—How are Rs. 70,00,000 (or £700,000 approximately speaking) to be raised? He proposes to do this by means of an Act which is a combination of a license-tax (on incomes up to Rs. 2,000) and an income-tax on those exceeding Rs. 2,000, the incomes in both cases being non-agricultural. I compliment the Financial Member on the distinct advance that has been made on this occasion by the entire exclusion of landed incomes. I will not follow him to those classic regions of financial perils to which he has felicitously alluded, and from which he has happily emerged. But there is, I see, an idea abroad, almost haunting a portion of the public, that the landed classes in India, who now contribute more than £21,876,047 to the Imperial revenues, are still proper subjects of further taxation. To these persons I may, (somewhat in the words of Mr. Chapman,) address the following observations made in this Hall in 1871. In the Presidency of Bombay 'a succession of new taxes had been imposed during the past ten or twelve years. In addition to the income-tax, we had had a cess of six and a quarter per cent. on all revenue; a quit-rent of considerable amount on lands previously held rent-free; tolls and municipal taxes had been freely resorted to; salt-excise had been greatly increased; and last, but not least, in many parts, the thirty years' settlements were falling in, and revised rates, involving an increase of some sixty per cent. on the land-revenue, were being imposed. The Local Fund receipts during the year 1869-70 amounted to £618,000; while the Municipal taxes realised £530,000. Allowing for a portion of the Local Funds being derived from jail-manufactures, harbour-fees, Native States, charitable endowments, and other sources that did not press directly on the country, he believed it would be found that the Presidency [of Bombay] contributed not far short of a million sterling over and above the Imperial revenue.' I have not been able during the short time at my disposal to make out the figures for the last year; but the amount cannot be less. For all local improvement hitherto has meant increased taxation; and some improvements have been of a very doubtful kind. All these considerations lead me to the conclusion that the present step of the exclusion of incomes derived from sources other than agriculture is a decided advance in the right direction. There is yet one more consideration which also tends in the same direction, and that is, the non-resort to increased salt-tax. Hon'ble members who speak in favour of this tax ought to remember what was said in 1870 in this Council about this tax. Besides in Western India—I speak of the Bombay Presidency—there was at one time (*i.e.*, prior to 1837,) no salt-excise at all. Afterwards eight annas a maund were imposed; then one rupee; one rupee thirteen annas three pies; two rupees; and three rupees. In 1882, it was reduced to two. It would be tedious to go through first principles on this occasion, except as a matter of sheer necessity; but I take leave to say that salt like grain ought to be practically free; or if that cannot be, that it ought at least to be taxed as lightly as possible. I cannot understand how any body at Madras can have gone up to Government with a proposal to raise the salt-tax, which presses so hard on the masses that the poor have in very many cases been found living by scraping saltish earth, and in some cases have been actually prosecuted for so doing. I refer to the debates of 1865 and other publications in support of my arguments; and on their evidence and on my own experience of over 30 years, I hold that the present resolve of Government not to raise the salt-tax is a correct and wise step in Indian finance.

"I have now, my Lord, to turn to import-duties—a third item of taxation not in the budget, but which, in my humble opinion, should have been there. In so saying, I do not propose to raise any question on this occasion in reference to the Bill now before us. But the subject is very important, and as such, it is one deserving of the earnest consideration of the Government of India. Sir A. Colvin says that 'the exemption from duty, in March 1878, by the Government of Lord Lytton, of certain descriptions of grey cotton goods made the abolition of the import-duties on all cotton goods a question only of time.'

"It is not my object to unearth on this occasion the voluminous literature on this subject; but there is the evidence of a few facts and figures which it would be to the benefit of British India always to remember. In 1875, when the Indian Tariff Bill was being discussed in this Council, the Hon'ble Mr. Hope, after discussing the whole question, shewed that 'the case for total abolition on the grounds on which it was claimed must inevitably fall to the ground.' He also said that Mr. Massey had remarked with truth that the Indian import-duties were the lightest in the world. Not only was this statement then made, but Mr. Hope spoke of an excise-duty which might thereafter be resorted to, and he warned the 'investors in Indian mills that they should bear this hint in mind; and thus forewarned, be precluded from charging the Government with breach of faith to them in the event of the imposition of an excise-duty at any future date.' His Excellency Lord Northbrook, in summing up on that occasion, explained that the Indian customs-duties had never been regarded as protective; and after naming all the Finance Members from 1860 and downwards, said that 'in all financial questions the true interest of the people of India is the only consideration which the Government of India has to regard.' Such was the state of matters in 1875. What happened in 1878 is a matter of history, which will be found in a Parliamentary Return of 14th August, 1879. I do not propose to enter into the Budget of 1882, which is the next point of departure from the Indian Tariff Act of 1875.

"I know the Resolutions of the House of Commons quoted in 1878 and afterwards; but the House of Commons, like the Government of India, will only ultimately decide the financial policy for India by all the considerations which are *just* alike to all interests; and now that the duties have been abolished the question to consider is—Have they had the tendency which has been attributed to them? In addition to the remarks of the Tariff Committee, I beg to refer this Council to an excellent letter addressed to Lord Lytton in 1877 by Mr. Sorabjee Shapurji Bengali, then a Member of the Legislative Council of His Excellency the Governor of Bombay, and one of our most experienced and enlightened merchants on the other side of India. He is a thorough free-trader, and the facts which he advances are therefore all the more valuable. This is what he says about our cotton-mill industry, as viewed in relation to the Indian tariff:—

'I am strongly of opinion that the best interests of the country require that this new industry or any other industry should thrive or fall on its own merits. I believe that it would be disadvantageous for India if the policy of its Government were directed to support industrial and commercial enterprises and encourage the employment of capital in them by means of protective tariffs, a policy which increases the cost of the articles thus protected to the general consumer and therefore taxes the resources of the country for the benefit of the capitalist during the time the protection is permitted to last, and which results in the loss of capital and the creation of distress when the protection is removed. If it can be proved to be a fact that all or even a moderately large proportion of the thousand and one varieties of articles at present imported into India, and included in the comprehensive name—"Cotton-goods," can also be produced in India for commercial purposes, that is to say, as cheaply as if manufactured in Lancashire, by means of European machinery, then the interests of this country require the immediate abolition of our import-duties on cotton goods; for, otherwise, the Indian mill-owner could add to his legitimate profit nearly the full amount of the import-duty and still under-sell his English rival, so that the native buyer of cotton goods would pay the native manufacturer nearly 5 per cent. on the price of his bargain for nothing. Such, however, is not the fact. The cotton-goods which India imports (with the exception of an insignificant fraction) are not of the same kind which her cotton-mills can produce. Nor, years ago, even when there were no cotton-mills established in this country, did India obtain her supply of coarse cotton manufactures, such as these mills produce, to a larger extent than 10 per cent. of the total imports of cotton-goods from foreign countries. Her industry in the finer varieties of cotton-goods has given way to cheaper importations from outside; but in the preparation of coarse goods for the great mass of her people, India possesses natural advantages in the home-produced, home-spun cotton, which enable her to defy the world. The introduction of cotton spinning and weaving into the country by means of machinery is really then for the most part nothing more than the introduction of competition between machinery and the indigenous hand-spindle or the hand-loom, and also of competition between India on the one hand and Europe

and America on the other in the supply of cheap coarse cotton-goods to several Asiatic countries and parts of Africa. The cry, therefore, that since the establishment of factories in India for cotton-manufactures, the retention of the customs import-duties acts as a protective impost, rests on no better foundation, so far at least as nine-tenths of these duties are concerned, than a desire to obtain the admission of cotton-goods of every variety into this country free of duty whether protective or non-protective.'

"The same is the conclusion to which the Tariff Committee of the Government of India had come. As to the actual use of these articles by the different classes of the people, Mr. Sorabjee says as follows:—

"'Moreover, foreign cotton-goods imported into India partake of the additional recommendation of having in them something of the nature of articles of luxury. We import annually, in round figures, about 19 crores (say, nineteen millions sterling) worth of foreign cotton-goods. The uninformed may be under the impression that by far the largest portion of this amount represents goods required by the mass of the Indian people for their every-day use. But this is not the case. Of these 19 crores worth of imports of cotton-manufactures of all kinds, 3 crores consist of bleached goods, 3 crores of colored, dyed and printed goods, 2½ crores of yarns of all varieties, technically known as No. 40s., and upwards, suited for native looms in the preparation of fine cloths, 3 crores of superior descriptions of grey piece-goods, and 7½ crores of other grey cloths. The first four out of these five items give a sum total of 11½ crores of rupees, and any one acquainted with the trade and with the habits of the people will be able to inform Your Lordship that the goods represented by this sum, with the addition of about one-half the quantity included in the last and remaining item, after undergoing the process of dyeing or printing in the country, are consumed by the higher and the middle classes of people for their daily requirements, and by the poorer classes as articles of occasional use not subject to every-day wear and tear. For their every-day use the mass of the people use very little of foreign manufactured goods. The product of native hand-looms from the cotton of the country has hitherto supplied the wants of the bulk of the population as regards cheap clothing. The competition of the cotton-mills of India is more with the indigenous hand-loom than with Manchester, which, owing to want of cheapness, has always been unable, beyond an insignificant portion of its exports, to make a way for its coarse cloths into India.'

"Thus it is quite clear that the im ports affect only the well-to-do classes, nearly all the cloth imported being used by them and not by the very poor. As regards the protective character of the duties, the question is further cleared by looking at our imports.

"What do we now find to be the actual evidence of exports and imports of these cotton-goods? The table below will show this:—

Imports and Exports Value of Merchandise and of English Piece-goods from 1866-67 to 1885-86.

Years.	Value of Imports (exclusive of Government Stores and of Treasure).		Years.	Value of Exports (exclusive of Treasure and Government Stores).

"Further, I beg to append a statement* in regard to piece-goods alone and yarn for 1880 to 1884, made out for me last week by a leading merchant in Bombay, from which it appears that the annual rate of increase in the import-trade of piece-goods and yarns into Bombay, Calcutta and Madras continued uninterruptedly until the year 1880. For in the year 1873, the entire import for the three presidencies was 1,071,685,753 yards of goods and 28,778,179 lbs. of yarn, while in the year 1880 it was 1,612,700,000 yards of goods and 41,750,000 lbs. of yarn, thus shewing that from 1849 to 1880, there has been a continued increase in the imports. It was from March, 1882, that the import-duties upon goods and yarns

was altogether removed, and instead of the imports increasing, as we may naturally expect if the protection theory were correct, they have remained stationary except in the case of Madras, where a slight increase is perceptible; but taking the total of all the three Presidencies for each year the imports fall short of what they were in 1880; and that, too, in spite of the enormous increase in railway-communication throughout India and the large increase in its population. Besides, it will be observed that the rates ruling for piece-goods and yarns in 1880 were higher than they were in 1884, shewing thereby that the consumption of foreign goods in India did not increase by removal of the duty. It ought, at the same time, to be noticed that the consumption of local spinnings and manufactures did not also increase during the same period, and were it not for the unexpected and large offtake of the local mills' yarn for China, the serious losses suffered by the local mills, with rare exceptions, during the last five years, would have made the position of mill-industry very unsound. It thus follows that the removal of duty has only deprived India of a legitimate source of revenue, while it has not secured the objects for which the sacrifice was apparently made.

"The true end of all taxation, whether direct or indirect, is, I take it, purely fiscal, and duty should be imposed for revenue-purposes only. Articles of luxury are taxed in all civilized countries for revenue-purposes, while all other articles save raw materials are lightly taxed. The import-duty on piece-goods, if levied to meet the present wants, would not amount to even half an anna a head. Thus the average annual imports of merchandise into India for the last three years ending March, 1885, average about 53 crores rupees, and if a duty of $1\frac{1}{4}$ per cent. only was levied on this import, it would yield 66 lakhs of rupees to Government, which would be at a rate under half an anna per head on the present population of 25 crores, if it fell on the masses; but I submit this does not; it is chiefly paid, as Mr. Sorabjee Bengali has shown, by the higher classes. Besides, this is a tax which will reach the population of Native States, who receive the benefits of the British rule as we do without contributing anything towards its expenses. This item of indirect taxation is a better way of raising revenue for Imperial purposes than direct taxation like the income-tax, which, in India particularly, is obnoxious to the people. A protective duty is indeed injurious to free trade, but from the statements of imports it will be apparent that the import-duty in India was not protective before, and cannot even now subserve such a purpose for many obvious reasons. It was levied to enable the Government to carry on the machinery of the administration. It was paid without demur and at the least possible expense in collection as compared with any other mode of taxation. If England, which lays down broad principles of free trade and insists upon their being observed by India, imposes exorbitant duties on foreign goods for revenue-purposes whenever necessary, why should not India, under similar circumstances, be permitted to do the same, and particularly when the tax is merely a nominal one, and yet affords a good help to the revenue; and when, as Mr. Sorabjee Bengali has distinctly proved, it does not touch the poor, and chiefly falls on the well-to-do classes?

"In the face of these facts I am sorry this tax was not availed of as recommended by the Madras Chamber of Commerce; and I cannot understand the recommendation to extend the operation of the license-tax in the form of an income-tax. If it were a mere license-tax it would be open to the same objections as the existing tax; but this is something more. It is an income-tax in the case of all whose incomes are above Rs. 2,000. The history of this tax has been so often repeated in this Council that I will not now enter into it. All I have to say is that it is still open to the remarks which have been submitted in this Council by Messrs. Inglis, Robinson, Cockerell and others on the evidence before them; and I can only hope that such a tax will only be resorted to on occasions of the greatest urgency and necessity. The difficulties of working such a tax (as I might safely say also from my own little experience in working it) are very great; and I shall only add my humble voice to those that have gone before me in imploring the Government not to insert it

hereafter in their Budget as an ordinary source of revenue. It presses hard on the honest, and its effects are demoralizing.

"There is one more subject on which I have to say a few words before I conclude.

"Your Lordship made an appeal to the individual members of this Council, which (speaking for myself) was hardly necessary under the circumstances in which it was made. When the subject of a pure license-tax was discussed in 1878 in Bombay, I voted against it on the ground of its one-sidedness. That feature is absent on this occasion; but the symmetry of the Act is marred by the higher classes being put under an income-tax instead of a license-tax.

"I think, however, we shall all rejoice at the removal of all grounds for imposing such a tax, which I expect from the searching inquiry into expenditure which Your Lordship's Government have now resolved upon. I have not been able, within the short time at my disposal, to lay my hands upon all the details which would be necessary to speak authoritatively on this question in detail; but there are several departments in which very large saving has long been overdue. In my own Presidency, the Revenue Survey Department had or ought to have finished its work long ago, and yet from the returns it appears that that department is still of the same strength financially as it was ten years ago. When I remember what Mountstuart Elphinstone said of this department in 1820, I am grieved to see the unnecessary extension of its life and action in those districts where its work has been once completed. The new Forest Department is a young department in its origin; but it has now been working almost like the old Inám Commission. I see a Commission appointed to inquire into it in Bombay; but looking to the evidence that is being taken, it has scarcely touched the surface. Whether it will go beneath, and help to secure an efficient administration without any unnecessary annoyance to the people, remains to be seen. Again, on the basis, or rather the remains, of our Survey Department threatens to come in the Agricultural Department, the total expenditure of which has risen from R2,45,480 in 1870-71 to R8,05,718 in 1884-85; and when I closely look into the items constituting this expenditure, and as a landholder and a practical agriculturist, cast my eyes at our agriculture, I must confess that I view upon the outlay on this department as utterly disproportionate to the results expected to be achieved. For better or worse, India is not a country for large farms and the employment of expensive machinery. As a cultivator of land, I always seek and utilize such information as I can get; but I cannot view with favour such expenditure as is now increasing day by day in this department. Other small but proportionately costly departments will also be required to be pruned down. Above all, there is one great department about which successive Finance Ministers (including the present) have complained year after year, and without a better regulation of which all other reforms, as it seems to me, will be comparatively valueless, and upon which the Government must begin to work; and that is the Military Department and its expenditure, without affecting the efficiency of our military forces. The question of the Staff Corps organized in 1861, and the lakhs of rupees it annually adds to our liabilities, was first publicly mooted, if I remember rightly, by Sir Charles Trevelyan in 1870 in London. Sir Charles said that promotion was given to officers in the Staff Corps according to mere length of service without reference to any fixed establishment. What was the result? Here are his words:—

'The consequence of this is that the qualification for the highest rank and the highest rate of pension is simply absolute length of service, without regard either to the public wants or to the relative claims of other officers; and everybody is certain to arrive at the highest rank, and to be entitled to the highest rate of pension, if he holds on during the prescribed term of years. The tune is, "we are all growing old together." There will soon be an army of field officers with very few subalterns, and such a retiring list, all at the highest rate of pension, as the world has never seen.

'This, of course, is no mere opinion of mine. In the discussion on the income-tax in the Council of the Governor General in April last, Sir William Mansfield, the Commander-in-Chief, said, "There is one more point to which I would invite the attention of the

Council, that being the growth of non-effective establishments. I need not advert to the statement of General Hannyngton and Colonel Broome beyond uttering the remark that, while those distinguished authorities differ in detail, they are agreed in presenting a picture of future liability which is positively alarming. In short, we are threatened with the serious danger of all our economies in India in the combative force being eventually greatly *more than swallowed up* in the growth of the non-effective expenditure. Under such circumstances a further greater danger might be forced on by public outcry, involving perilous reductions, to meet non-effective charges." These statements will be found in the Parliamentary paper "East India Staff Corps, No. 140, of 1869."

'The Controller-General of Military Expenditure sums up as follows:—"Military history presents no instance of an army so constituted, or of one so costly. But unsatisfactory as is the present financial condition of the Indian army, the future prospect is far worse.'

"This was said before 1871, only ten years after the formation of the Indian Staff Corps. In 1878-79, it appears there were 1,961 officers in the three Staff Corps, while there were only 245 army appointments which could be held by officers below the rank of Colonel.

"Sir A. Colvin himself has complained of certain army expenditure; and we do not yet know what practical benefits we may expect from the Commission which sat at Simla in 1879. Successive Finance Ministers have dwelt upon the heavy expenses in connection with the British army in India. Now that we have got railways all over the country, and the whole Continent is enjoying profound peace, Her Majesty's Government ought to help the Government of India in a material way in reducing this expenditure, and if that is done, with the natural increase of our revenues, the Government of India will be able not only to pay its way, but will have no occasion to resort to such unusual taxation.

"As regards the Bill itself, there are a few questions which will require serious consideration.

"First in regard to taxing house-property. In cities such as Bombay Calcutta, and the like, and in large municipal towns where houses are valued for municipal purposes, I see no difficulty; but to introduce taxation of house-property into the Mufassal generally, into villages whether large or small, is a step full of peril and difficulty. There are no standards for valuation there. In thousands of places, there is hardly any letting value; and in such cases I see all the dangers of inquisitorial proceedings and arbitrary assessments, and consequent annoyance, which has been so correctly and graphically described in this Council more than once, and to which I fully subscribe. I hope and trust therefore that such assessments may be limited to towns and cities as I have suggested.

"Another question is the taxation of the Government securities. I beg that the propriety of this may be reconsidered, as it is a matter which affects public credit.

"Yet another question remains; and it is the question of secrecy in regard to income-tax assessments. This is not provided for in this Bill, although it used to be so in the former Acts. All officers, so far as I know, were sworn to secrecy under the law; and so I think they should be. This is a matter on which the Native mercantile community has always laid great stress. The feeling on the subject is very strong, as it is one which touches their mercantile credit and honour, and I hope the question will be attended to when the Bill goes to the Select Committee."

His Honour THE LIEUTENANT-GOVERNOR said:—"I think I may congratulate the Hon'ble the Financial Member on the fact of the general unanimity with which the necessity for the proposed impost has been acknowledged, and that the anticipations which he had formed of hostility to his proposals, by the revival of that kind of argument which had already been frequently exploded, have not been fulfilled. No one, I take it, is glad of being subjected to increased taxation; but the speeches of those who have preceded me indicate that whether the opinions came from officials or non-officials, Europeans or Natives, the measure which the hon'ble member has put before us is accepted as a necessity. I also feel some satisfaction that there has been an expression of sympathy towards those of my own service, who are specially affected by this new

charge on their incomes. Though there is a fashion now-a-days of urging that the members of the Civil Service in India are too highly paid, I venture to assert that, with very rare exceptions, there is no member of the service throughout India who does not deserve every rupee of the salary he receives; and I may safely say this not only of the European members of the service, but of those in the subordinate executive and in the subordinate judicial services. The entire service is a loyal one, and I am sure it will accept, in the presence of the gravity of the situation, which has been explained by your Excellency on the opening of this discussion, the necessity of the taxation to which the Government has to resort. The only regret to my mind—and I cannot hesitate to give expression to it—is the fact that the work of defence, which five years ago might have been carried out with comparative ease and leisure and economy, has to be undertaken now under some feeling of pressure, in the presence of a possible aggression and at a considerably enhanced cost. The first duty which the Government of India as the ruling Power owes to the people of this country is to protect its frontier against foreign attack; and whatever the personal consequences may be to each and all of us, I am sure every loyal subject will be ready to support proposals which in a grave emergency the Government of India considers necessary for the defence of the Empire.

"I must add in connection with the measure which is immediately before us that the remarks which have fallen from my hon'ble friend Mr. Evans as to the difficulty of working any form of direct taxation deserve consideration. We have experienced that difficulty in every previous application of this tax, whether in the shape of an income-tax, a license-tax, a certificate-tax or any modification of them. But the difficulty as regards the assessment and realization of the tax has hitherto been greatly enhanced by the consideration that they were regarded as temporary measures. If, however, direct taxation is to form a permanent part of the fiscal system of India, then, no doubt, although the same trouble may again arise on its first introduction, the difficulties will gradually diminish and eventually disappear.

"An hon'ble member has referred to the repugnance which is felt to this tax on the ground that it is not suitable to ordinary times, and should be reserved for exceptional occasions. But the eminent authorities whom he quotes as having acted on that view, such as Mr. Massey, Mr. Inglis and others, spoke at a time when indirect taxation prevailed throughout the country. Indirect taxation has, however, now almost entirely disappeared, and with its disappearance some form of direct taxation is regarded as necessary to bring under its incidence those who have heretofore escaped all taxation. It is not, however, on the particular Bill before the Council that I would wish to express any detailed remarks, but rather upon the remarks which fell from both your Excellency and the Hon'ble the Financial Member on the revision during this year of the Provincial contracts. The powers and responsibilities of the Local Governments in financial matters were first determined in 1871-72. That was done under the administration of Lord Mayo, aided by Sir John Strachey. Perhaps there was no measure which added so much to the fame of Lord Mayo's administration, and which was so favourably received by both Europeans and Natives, as this matter of financial decentralization; and certainly no measure has conferred greater benefits on India. Under the system which prevailed before its introduction certain allotments were annually made to each Local Government to cover the expenses which it had to incur in its administration. Any new charge, whether for a school, a dispensary, a road or any other object, could not be undertaken except with special sanction obtained after a reference to the Government of India. The result was that every Local Government scrambled to get as much as it could out of the resources which were available; and it generally happened not only that those who clamoured loudest and whose province contributed the least to the Imperial revenues got the most, but that those who, for instance, like Bengal and Burma, contributed most to the resources of the Government of India got the least. It was therefore a very beneficial reform which introduced the system of financial decentralization, and no province has benefited more by it than Bengal. The services which were made over to Local Governments in 1870-71 were not of a paying nature. It was thought possibly

at the introduction of the scheme that it should in the first instance be of a tentative character, and therefore the departments which were surrendered were those of Education, Jails, and other similar departments, from which no ingenuity or ability in administration could possibly expect to secure any return. An advance, however, was made under a more extended system in the time of Lord Lytton's Government, again with the assistance of Sir John Strachey; and Sir Ashley Eden commenced his administration in 1878 with a much wider decentralization, which included such improvable departments as Excise and Stamps, the development of whose growth he was allowed to enjoy. We may be sure that he made the most of his opportunities. The financial condition of the province began at once to improve, as may be judged from a paragraph of the Resolution which recorded the results of the working of the system about the time of his laying down his authority as Lieutenant-Governor of Bengal. He then said—

'That the system of decentralization has been thoroughly successful in Bengal is sufficiently clear from the foregoing sketch. The revenues have rapidly increased, independently of new taxation; useless expenditure has been curtailed; and funds have been made available for improvement under all branches of the administration. All grades of the service have shown the deepest interest in increasing the resources of Government, under the belief that the surplus revenue would be available for the good of the province. The three heads of improvable revenue made over to the management of the Provincial Government, with an income of 165½ lakhs, in 1876-77, will stand with an income of not less than 217½ lakhs in 1881-82.'

"That was an eminently satisfactory result. I believe, when the revision of the contract took place at the close of Sir Ashley Eden's administration, there was a good deal of correspondence on financial matters between the Government of India and the Local Government. I think it is a misfortune that the revision of the contract always takes place in the expiring year of a Lieutenant-Governor's rule. Though I have no doubt Sir Ashley Eden pressed the matter with considerable force in 1882, we must also remember that he was just then about to retire; and it might be expected that with this prospect he would be less forward in the defence of the position than he would have been if his tenure of office had continued. When the revision took place in 1882, the Government of India claimed a large share of the increments which had accrued under Sir Ashley Eden's administration. Without going into details I think I am correct in saying that they claimed the appropriation of some 28 lakhs of rupees, and thus a new start was made with that advantage on the side of the Government of India. It was thought at the time that those were rather hard terms, and it was pressed upon the attention of the Government of India that, in the matter of the excise-revenue under the out-still system, a re-action would certainly occur, and that both on moral grounds, having regard to the increased facilities for drinking, and on financial grounds, measures would have to be taken which would result in restricting the rapid growth of the revenue. And that has taken place in the course of the four years during which I have been at the head of the Bengal administration. The details of the new contract in every branch will have to be discussed in the course of the current year. This is not the time nor the place for the consideration of details, but I wish to enforce the point that the relentless and ruthless attenuation of the provincial revenues is certainly the worst policy which the Government of India can adopt. Whatever advance or increase has taken place (about 12 to 14 lakhs) under the present contract, owing, I may venture to hope, partly to efficient administration, and partly to the elasticity in the sources of revenue, it should be remembered that the demands which have to be met by the Government of Bengal are extremely heavy, not only in the present but prospectively, and further that many of these charges which have fallen on Bengal during the last four or five years are charges which have not been voluntarily undertaken by the Government of Bengal, but have been imposed upon it by the Government of India. For instance, the question of police-charges, not being properly bearable by municipalities, is one which in principle I most thoroughly accept. Those who pay should be those who control. Before the municipalities paid the police, but the Government controlled it; and therefore the point was very right-

ly pressed that throughout all Mufassal districts we should take the earliest opportunity of relieving municipalities of that liability. Primary education, again, has involved increased expenditure. The Government of India lately issued a Commission under the direction of the Hon'ble Mr. Hunter, and that Commission justified its appointment and also did a great deal of good in calling attention to the necessity of large increases of expenditure upon education. A great portion of this devolves upon Bengal. I cannot but look at their recommendations as a distant ideal to be some day attained, but as at present altogether beyond the power of Government. The Government of Bengal has had within the last few years to accept the charge of Rs. 5,11,000 a year for the relief of municipalities in the interior; of Rs. 1,50,000 for extension of primary instruction; of Rs. 1,35,000 for the Additional Judges to the High Court of Calcutta. So far as regards the past. The prospective additional charges are also most serious. The question, for instance, of the payment of the police in the Calcutta Municipality as well as in the Suburbs and in Howrah is urgently pressed upon my consideration, and is only stayed by the want of means. Thus the old principle still remains in full force in Calcutta. The Municipality of Calcutta has been called upon to make extensive sanitary improvements which all recognise to be extremely desirable; but the answer to all pressure of the kind is—'We have not sufficient funds'. For my own part I should be glad to be able to place at their credit the sum they now have to pay towards the maintenance of police, which amounts to no less a sum than Rs. 2,80,000 a year. But it is totally out of the question that the Government of Bengal in its present financial condition should be able to give up not less than Rs. 2,80,000 for relieving the municipality of this burden; and I would suggest to the Hon'ble the Finance Member that as Calcutta is the capital of the Empire, and the residence of the Governor General for some months in the year, and as the Government of India strongly insist on the prosecution of sanitary improvements in Calcutta, they should bear in mind the necessity of specially assisting the Local Government in giving effect to this urgent reform and thus help the suppression of preventible disease. I would also refer to the fact that in the administration of railways in this province the independence of the Local Government is very small. We are answerable for a great deal, but have little independent authority to deal with the position. We have now to pay something like 6 lakhs interest a year on the capital advanced by the Government of India for construction. The procedure is that when a Local Government recommends a line of railway, and has submitted reports and statistics in furtherance of the project, the Government of India on approving the scheme advances the capital for its construction, on the condition that the Local Government will pay 4 per cent. interest upon the capital from the date of the advance. The understanding also is that when the line is completed the Local Government shall benefit by whatever returns the successful administration of the railway may bring in. It is of pressing importance therefore to the Local Government that the line should be completed as soon as possible. The position, however, is that the advances are now given in such small amounts that the completion of the railway is indefinitely postponed. If, for instance, a railway is to cost 50 lakhs, the Government advances 10 lakhs to begin with, next year it advances three lakhs and the third year one lakh, with an intimation that no more money will be forthcoming for some time. We have to pay interest on these advances from the dates they are made, but without any possibility of return while the line is unfinished, and all the time have to maintain a costly establishment. Such a system is on the face of it indefensible, and imposes a heavy burden upon the Provincial revenues.

"In the direct administration of the country I can appeal to the Hon'ble Bábú Peári Mohan Mukerjí, who is one amongst many others who are always pressing for larger expenditure on roads and communications. Every railway which is completed requires the making of roads and communications as feeders to it. When the road-cess was introduced in Sir William Grey's time no one opposed it more strongly than the zamíndárs of Bengal; they said it would ruin them to have to pay the cess. I remember that the

argument was used at the time that no class would benefit more by the proposal than the zamíndárs; and the result has proved that with the funds thus raised the local committees have been able to construct a large length of roads and communications in every district, which are of immense advantage to landed proprietors. But the position now is that whereas at the outset the proceeds of the cess were available for construction of roads and bridges, the same proceeds are only now sufficient for maintaining and keeping in repair the finished lines; and if additional new works are required (as they indubitably are), petitions pour in upon Government to supply the means for their construction. That, however, is out of the question in present circumstances, and I must point out to those who clamour for such aid that the only resource which is possible is to raise the rate of the cess. In the discussion which took place on the re-distribution of allotments in 1882, I think my hon'ble friend Mr. Hope suggested that, if the resources which were then made available to Bengal were insufficient, there was always the alternative open to them of local taxation. I believe I am right in saying that my predecessor, Sir Ashley Eden, repudiated that idea altogether. He said, as I think rightly, that, if there was no general taxation undertaken for the whole of India, he should be very loth to apply any form of special taxation to the territories under his control. He did not wish to incur the odium of introducing any such taxation, and besides no scheme for its imposition could ever be adopted without the sanction of the Government of India. But there are also other reasons against such a policy commending itself to a Local Government. The Hon'ble Mr. Steel in his speech quoted in another connection the saying that 'a strong man armed keepeth his palace.' However strongly a Local Governor may keep his possessions, there would always be the fear that a stronger than he might come and despoil him of the fruit of his labours. We have always to bear in mind that however successful administration may be, and just in proportion to its success, there is always a stronger power behind which claims a share of our accumulations and increments. I don't speak now on the subject of economy, though I shall be ready to assist any Commission which your Excellency may appoint for that purpose, because I despair of any possible retrenchments in Bengal. At a small station which I was visiting the other day, where formerly one officer sufficed for the disposal of the civil judicial work, I found there were now four officers: these four Native officers were housed in an office which was originally intended for a single Munsif. That is only one illustration of what is going on all over Bengal, and in presence of this difficulty the High Court very naturally demand a much larger expenditure upon public buildings. During the last year the High Court deputed one of the Judges to inspect the working of the Courts subordinate to it throughout the province, and as the result of these enquiries they press upon me with all the authority of the High Court that a very large addition of establishment is necessary if the Judges are to be placed in a position of equality with the position occupied by the executive officers of the province.

"I have made these remarks on this occasion with the hope that when the consideration of the local contract comes in the course of this year, under the revision of my hon'ble friend Sir Auckland Colvin,—and I am afraid from his looks that I have failed to excite his commiseration,—my hon'ble friend and the Government of India will bear in mind how very essential it is to maintain and extend that policy which Sir John Strachey under Lord Mayo's Government first introduced and afterwards enlarged. A policy of expansion, and not of restriction, has followed each revision of the quinquennial contract: and to quote the words which he has recorded on this subject—

'It is hardly necessary to point out how little such a restrictive policy finds any justification either in the present state of the finances, or in the actual results of the different course that was till lately followed in this matter; how manifestly it stands in the way of the reasonable development of Provincial administration and financial responsibility, on which the future progress of India essentially depends.'

"I commend these remarks to the favourable consideration of my hon'ble friend. I hope that, when he comes to review our position during the currency of the present year, he will remember that we have great demands upon us,

and that our present resources are inadequate to meet those demands. I should add also that I have no personal interest in this matter, and that before any new contract can come into operation I shall have resigned the office of Lieutenant-Governor of Bengal. What I have urged therefore is in the interests of my successor and of the circumstances and condition of this great province."

The Hon'ble SIR A. COLVIN said:—"I have heard with the greatest satisfaction the assurances of support which have been given to us both on his own behalf, and on behalf of that body which he so ably represents, by the Hon'ble Mr. Steel. I need not say that it very materially strengthens our hands to know that the measures which we have been called on to undertake commend themselves to the judgment of that great and important section of our community to which my hon'ble friend belongs. For my own part I have never had the slightest doubt that any measure which it was my duty to bring before them, and which was based upon equity, sound finance and reasonableness, was sure to obtain from the mercantile community of Calcutta, however disagreeable the consequences it might entail, a ready and respectful hearing, and for myself their ungrudging support. When I spoke of the shrinking from burdens to which my hon'ble friend has alluded, it was of the former debates on the subject of the income-tax of which I was thinking, and of occasional expressions of opinion which I have recently come across in the Press. To my hon'ble friend, as to those on whose behalf he speaks, I have only to express my unmixed gratification at finding that our judgment is confirmed by theirs, and that the whole of our community is ranged under the same banner, with the same undivided end and for the common good of the country.

"My hon'ble friend, I observe, is an optimist. He sees great benefit to this country from a depreciated standard. He thinks that, though persons with fixed salaries may suffer, the country as a whole is benefited, and that even the Government may be reassured. He points to the increased exports as the main proof of his thesis, to the greater facilities for placing Indian produce on the market which are afforded by the present state of our currency, and to the increase in the revenues which may be expected to arise from the greater general prosperity. Now, this is a very large and an extremely difficult subject, which I cannot at present hope adequately to discuss; but I may point out two considerations which I think are difficult to reconcile with the optimist views entertained by my hon'ble colleague. I should like very much to think that with so much happiness going some of it may come my way; but it seems to me a very questionable position to assume that the great increase to our exports is mainly due to the low rate of exchange. I believe that it is more owing to the extension of our railways, to the lowering of freight, to the reduction of railway-charges, and to the growing facilities given by the Suez Canal, than to the depreciation of our currency; and I cannot, therefore, think that the expansion of our prosperity will be proportionate to the depreciation of our standard. If silver has fallen 8 per cent. since 1880, freights have fallen far more. Railways have extended; railway-charges have been lessened. On 7th December, 1880, canal-freights in Calcutta were from £2-16-3 to £2-18-9 per ton; on 14th December, 1885, they were from £1-7-6 to £1-10 per ton—a fall of 50 per cent. There were on 31st December, 1876, 6,833 miles of railway open in India; on 31st December, 1880, there were 9,310 miles; on 31st December, 1885, there were 12,285 miles. I cannot, therefore, bring myself to believe that exchange is the sole, or the most important, factor in the extension of our export-trade which has of late years attracted so much attention. In the second place I would ask my hon'ble friend to remember that if our export and import trade has shown great vitality since the fall in our currency, we have, on the other hand, to maintain somewhat about five crores of rupees annually on our revenue estimates, which, since the relative value of silver and gold began to change, have to be locked up and kept from circulation, in order to enable us to meet the extra burden imposed on us in connection with our home charges. My hon'ble friend, I regret to see, is among the prophets. I regret it because I think

that prophecy is a risky and speculative line of business, unsuited to commercial aptitudes. He has told us that it will take the rupee ten years to fall to 1*s.* 2*d.* I cannot meet him on this ground: I know nothing certain of the future: I think I can see a serious omission in his calculation when he bases the silver production of the next ten years on the limits of the silver production of to-day; and I cannot shut my eyes to the fact that in the last year alone silver has fallen to the extent of what he looks upon as its future normal fall. But even at the present rate of 1*s.* 6*d.* we shall have withdrawn at the end of those 10 years, on the figures I have above given, 50 crores of rupees from the pockets of the people; and I do not see where any adequate compensating advantage is to come to them. "I cannot dwell further on these intricate points at present; but when I am told that a currency the value of which relatively to gold is what ours has now become will be the source, alike to Government and to the people, of unmixed prosperity, I cannot but hesitate to accept these glad tidings of great joy, and to enquire whether other causes have not been at work to which in great part the improvement of our revenues may be assigned. I am aware that I have no right, and I certainly have no desire, to speak authoritatively or with exceptional experience on one of the most difficult questions to handle which has ever occupied the attention of Governments and economists; I have no wish to say 'I am Sir Oracle—let no dog bark;' but I would venture, if I may, to deprecate the adding another optimist view to a question on which, if not in India, at least in England, there are too many optimist views already. As the question is not one which enters into the practical scope of our discussion to-day, with the assurance that it is at the present moment engaging the most anxious, the most earnest and the most unremitting attention of the Government, I may turn to the next point in my hon'ble friend's remarks which calls for notice from me. He has expressed a wish to see the export-duties on rice abolished. That wish, I may freely admit, I share; I admit also the cogency of much of my hon'ble friend's reasoning; but I take two objections, which must practically be allowed to carry great weight, however much we may desire the removal of these duties. In the first place, as I do not share his hopeful views of that surplus which he dangles before my troubled eyes, I cannot bring myself to recommend, in our present circumstances, the striking off the potential estimates or the absorption as a source of revenue of the round sum of £700,000. In the next, I cannot but think that so long as our duty does not unfairly weight our rice in its competition with the rice of other countries (and I do not understand that this is urged upon me), the argument against it is incomplete. I do not deny, in other words, the force of the arguments in favour of abolishing the duty, but I think that the duty is not of a nature so objectionable and so opposed to good economical doctrine as to justify our abolishing it at a time when our revenues are in my judgment, and with due deference to my hon'ble friend, in a very critical state.

"In respect of borrowing in England, it will not have escaped my hon'ble friend's attention that we are in point of fact at the present time so doing; and if for local bodies we propose to borrow in the local market, it must be borne in mind that the extraordinary state of the silver market, the reports which reach us of the silver yield in Australian mines, the unsettled policy of the American Government, and the utter uncertainty which hangs round the future of silver, may well cause doubt as to whether, in spite of the comforting assurances of my hon'ble friend, we are so safe on the sunny side of 1*s.* 2*d.* as he himself would have us believe.

"It has been a pleasant surprise to me to find that the proposed tax has met with so little opposition on the part of this Council, and especially that my friends Mr. Peari Mohan and Mr. Mandlik, find themselves in a position to support us. We have, indeed been told, as I anticipated, that an income-tax is objectionable because it is inquisitorial and because it is unsuited to the genius of the Indian people; but the case against the tax has been put very moderately. Now, with regard to this matter of the inquisitorial nature of direct taxation in India of which we are constantly reminded. It is not in regard to India only, I may remind this Council, that objections have been urged in respect of inquisition. Students of text-books on this subject are familiar with

the fact that for many years after the introduction of an income-tax into England this particular objection was to them of constant recurrence. But time has there worn down, if it has not entirely effaced, the edge of this class of objection. And what time has done elsewhere time may be trusted to do here. In point of fact, as your Lordship said last Monday, the operation of the license-tax during the last eight years has been of no small assistance in the matter. We are far removed from the day, which I myself can well remember, when the first introduction of direct taxation sent a tremor throughout the Peninsula. All have learnt and all have profited by the experience of a quarter of a century. We, on the one hand, have found that we must avoid as much as may be the multiplication of returns, and a variety of other points, which were in their nature vexatious, and which were not essential to the operation of the tax; the classes liable to assessment, on the other hand, have learned and are still learning that with a little honesty, a little punctuality and a free recourse to the regular remedies open to them, they can escape the ills which they the more dreaded, because they were ills they wotted not of. My hon'ble friends Mr. Evans and Mr. Peári Mohan have warned us that the tax is one which in its working will cause much difficulty, and that it will give rise to considerable practical injustice. We have been told that every effort will be made to evade its just incidence. There is a well-known legal maxim with which my hon'ble friend Mr. Evans is no doubt familiar, to the effect that a man cannot profit by his own fraud; and if I am told that an important section of the community must be exempted from direct taxation because it is constitutionally fraudulent, I must fall back upon that legal maxim. If I am to be assured that the trading and commercial class in India should not be assessed to direct taxation because they cannot deal honestly with the Government, I must reply that that is a plea which to my mind is wholly inadmissible. But I do not resort to such a reply, because I am convinced that the imputation is unwarranted. I do not believe that the great section of the community concerned, whose reliability and honourable discharge of their business obligations is of world-wide notoriety, is open to that indictment, or that they differ in any material respect **from the great body of the Indian people of which they form so important a part, and whose character certainly is not open to the reproach which would seem to be levelled against a section of them by those who take this objection.**

"My hon'ble friend Mr. Peári Mohan has asked me for a pledge as to the duration of the tax. No Financial Member who has any pretension to wisdom will ever give such a pledge. Prudence is to a Financial Member what modesty is to a woman; and if he once throws it aside he must expect to descend to that fallen class from whom nothing more may be hoped for. Nor in asking for such a pledge is my hon'ble friend consistent with the assurance he has given us that he accepts the principle of this Bill. If the principle is sound, it is unreasonable and inconsistent to promise that its application shall be of limited duration. If it is for to-day, it is good for to-morrow and thereafter. So that I must decline to give any such pledge as I am asked for; nor would it be of any value if I gave it. No pledge could bind my successor, who must be guided by the exigencies of the day in which he is called upon to administer our finances.

"My hon'ble friend Mr. Peári Mohan, I see, is not yet quite happy about the Famine Insurance Grant. He has re-quoted a few words of Sir John Strachey's which I quoted the other day, and he has cited a passage from a speech of Lord Lytton's. I need not say anything more about the former extract. It must be read with the context which I quoted last Monday to the Council, and its meaning is perfectly obvious. But, in regard to what fell from Lord Lytton, I may remind my hon'ble friend that the authors of the being of the Famine Insurance Grant were Lord Northbrook and Sir John Strachey, and that if one wishes to learn the characteristics of a child one must address oneself to its parents. Lord Lytton was merely its sponsor; and if Lord Lytton promised and vowed more things in its name than it was ever likely to accomplish, he did no more than sponsors daily do, and must be held in no greater degree responsible.

"Next, in regard to the import-duties. Mr. Mandlik has urged and has quoted authorities to prove that their re-imposition would not be felt. That I should wish to take leave to say seems to me beside the question. What we are concerned to see is that taxation should be imposed proportionately to the means of the person taxed. If the import-duties were little felt by the poor man, they would *à fortiori* be far less felt by the rich man. What we have to look to is that each man should pay in proportion to his means, and not merely that the poorest should pay a tax which is not absolutely unbearable.

"I should wish, however, to say a few more words on the subject of the import-duties, because I am compelled to disagree with a great deal of what I daily hear about it. I am well aware that the view I take is not the popular view; but a man must have the courage of his opinions. We have been told that the import duties should have been retained; and, in public discussion on the subject, we are constantly assured that the import-duties were abolished solely in the interest of Manchester. I may be very obtuse; but I wholly fail to see how, in a matter of this kind, we can separate the interests of Manchester from those of India, or the interest of the manufacturer from that of the consumer. If the one, above all things, desires a free market for his goods, the other, above all things, requires the removal of all restrictions the effect of which is to raise upon him the price of the goods. The profits of Manchester profit are the economics of India. I think we may find a parallel which is not unsuitable in the case of the Isthmus of Suez. It was Europe, not Asia, which pressed for the piercing of that isthmus; but would any one seriously maintain that the Suez Canal was made in the exclusive interests of Europe, and that Europe alone has benefited by it. The exchange of commodities, the commerce and the wealth of the world, the producer, the manufacturer, the carrier and the consumer, have alike benefited by it, as they must benefit by the removal of all restrictions and obstructions, whether they present themselves in the form of an isthmus or in the form of an import-duty. The only Indian interests which seem to me to have been sacrificed are those of the persons who hitherto had enjoyed the monopoly of exemption from taxation; and if those interests are to be sacrificed by the abolition of the import-duties, I must say that I should regret it no more than the sweeping away by the waters of the Canal of the privileges of the Bedouins whose inheritance the desert had hitherto exclusively been. If a narrow neck of land or a narrow section of society stands in the way of benefit to the general community, then I say that it is the narrow neck or the narrow section which must be made to give way, and not the community at large. So that I cannot for a moment concur with those who would re-impose an import-duty or block up a canal, who would replace free circulation by obstruction, and who would raise the prices of Manchester goods against us, because, among other reasons, the benefits which the English manufacturing class have derived are more obvious to their eyes than are the benefits accruing to the Indian consumer.

"But it will be and has been said, that while this is all very well, it does not alter the fact that £1,200,000 were struck off the revenue, and that the country could not afford it. Putting Manchester, in other words, out of the question, I am assured that the import-duties should have been retained because we could not afford to part with them. Well, let us look at a few figures. We have seen that the average surplus of the past three years has been £700,000; we know that the Famine Insurance Grant is provided from annual surplus funds of £1,500,000; so that we have had an annual surplus of £2,200,000; and it is now argued that this was not sufficient, and that we should have added to this £1,200,000 more; or in other words that the import-duties should not have been reduced, because we ought to have maintained a surplus during the last three years of nearly three and a half million. Who, in the name of reason, could have hoped to maintain such a surplus? Would the Council like to know what would have happened if we had attempted to maintain it? I am no thought-reader, but a plain simple Member of the Governor General's Council; but I think I could say what would have happened. We of the Finance Department should have been bombarded for fresh funds by

the Military Department; we should have been seized by the throat by the Department of Public Works; the Home Department would have seized us by the coat tails; the Revenue and Commerce would have lifted its still small voice; the persuasive tones of the Legal Member would have demonstrated the necessity of increased supplies; His Honour the Lieutenant-Governor of Bengal, in common with the other Local Governors, would have expected his quota of this unhappy surplus; I doubt whether even the highest authority in the land himself would have had the courage to restrain his august hand from demanding a share in the general plunder. Expenditure, much of it unnecessary, would have increased, and would have established itself; extravagance would have been the order of the day; and when the day of retrenchments and reduction came—as come it assuredly would—the whole administration must have been thrown out of gear. If, on the other hand, so very considerable a sum as £1,200,000 had been maintained for the extinction of debt or for the construction of railways, how long would the tax-payer have put up with it? Would he not have said he was doing too much for posterity, and bearing too large a share of a burden towards the removal of which he already annually contributed a surplus of over two millions? We should have been abstracting annually £1,200,000 from the resources of the country, and employing it in redeeming a public debt bearing 4 per cent. interest by moneys which, in private hands, would be invested at 7 or 8 per cent., and be utilised in the production and the renewal of wealth. To make railways from surplus revenues which one may happen to possess is one thing; to maintain, at the expense of the tax-payer, a large surplus for the sole purpose of making railways seems to me to be quite another matter.

"My hon'ble friend Mr. Mandlik has argued that the abolition of the import-duties stands condemned, because it has not sufficiently resulted in increased imports of manufactured goods. I cannot follow his calculation. The value of imports of manufactured goods, treasure and Government imports apart, which in the 10 years before 1878-79 averaged 35 crores, was, in 1884-85, 53 crores; the average of the four years from 1878-79, when the first duties were remitted, to 1881-82, the year before the final abolition, was 47 crores; the average of the three years from 1882-83 to 1884-85 has been 51 crores. The percentage of increase from 1878-79 to 1881-82 has been 28; from 1878-79 to 1884-85 it has been 45. If we remember that during this period prices have been steadily falling, and that these figures represent values, not quantities, the real increase will be much greater. I am not so foolish as to suppose that the great growth of our imports since 1878-79 is due solely or mainly to the abolition of the import-duties. It is due to a variety of causes. It is partly due to the increase in our exports; it is partly due to the cause to which so much of the increase of our exports is due, namely, to the extension of our railways and to the consequent improvement in the distribution and cheapening of commodities; it is due to the forcing of accumulated stocks, owing to the fall of prices in England, upon the Indian market; it is very largely due to the fall of prices in England; but unquestionably it is also partly due to the abolition of import-duties. If the state of our exchange has, on the one hand, enabled us to place large stocks of grain and of seeds on the European market, and has prevented us from feeling in that direction the full effect of depression of prices which weighs so heavily at home (and to which, so far as the commodities are concerned which form the chief staples of our exports, we have not a little contributed), it has, on the other, handicapped us in our power of purchasing piece-goods, and has supplied an additional argument to what seem to me the unassailable economical grounds on which those duties were abolished.

"My hon'ble friend Mr. Mandlik has criticised at some length the expenditure in various branches of the administration with which personally I am not very intimately acquainted. I will not therefore follow him further on this ground than to say that to his desire to introduce economy into the administration, and to extend the employment of Native agency, I personally and entirely subscribe. Whether from the more narrow ground of my own special province of finance, or from larger political considerations, any practical efforts suggested in this direction will have my constant and strenuous support. I

believe that in the dual agency by which executive administration is and must be carried on in this country we should endeavour and make it our great aim to march not on parallel, but on converging, lines. His Honour the Lieutenant-Governor has dwelt at length on the question of the Provincial revenues. He sees, or thinks he sees, that, like Cassius, I have a lean and hungry look, and that I am animated by evil intentions. He fears that in the revision of the contracts I shall, as the French say, draw the counterpane too much my way, and that he will be left in the cold. There is a Persian proverb which says 'Awal Khwesh, bad'hu darwesh,' which, very liberally translated, means 'Devil take the hindmost.' But let me reassure him. In this matter there will be no foremost and no hindmost; we shall approach the matter in that spirit of justice, of moderation and of reasonableness in which only it can be effectually handled. We shall be most ready to listen and to examine all that the Provincial authorities have to urge, but we shall at the same time be compelled to insist, as I said last Monday, on an equitable re-distribution of the new burdens which have been imposed upon the general revenues. To that I am sure His Honour will take no exception, and we must leave the working out of the details to those who will be charged with the task.

"And now, my Lord, I think that I may bring this, my second *apologia*, to a close. I am conscious that I have but glanced at the surface of much that has been said; something of what has been said I have not so much as attempted to glance at; but this, not because I am gravelled for lack of matter, but because, had I travelled over the whole ground taken up during this discussion, I should have wandered far from the issues actually before us. I have stated why I cannot share my hon'ble friend Mr. Steel's hopeful view of our prospects, and why I am unable to hold out at present any hope of the remission of the export duties on rice. I have glanced at the argument against the income tax based on its inquisitorial nature, and have given my grounds for doubting whether these arguments from lapse of time have not lost much of their force. I have pointed out that the question before us is one of the equitable distribution of taxation, and why the import duties alone, without direct taxation, are not consistent with such a distribution; I have contested the view that the import duties should be re-imposed; I have, I hope, re-assured His Honour the Lieutenant-Governor in regard to my designs on the Provincial contracts, and I leave the matter now, so far as I am concerned, to the decision of the Council, in the confidence that we shall be accorded its support."

The Hon'ble MR. HOPE said:—

"Our hon'ble colleague Sir Auckland Colvin warned us, on the last occasion when we met to consider this Bill, that we should probably find to-day various ancient weapons furbished up for use in an attack upon it, but I confess I hardly expected to hear it seriously contended that direct taxation was unsuited to India and obnoxious to its people.

"Direct taxation, I venture to maintain, is not a novelty in India, as too commonly supposed, but a most ancient and well-known institution. Native Governments have from time immemorial made the non-agricultural classes contribute their share of the expenses of the State. To the Native mind in general, this appeared only just, fitting, and to be contentedly borne. Between cultivators and traders, poor and rich, no sense of unequal treatment could subsist under the system which our predecessors in the Empire for centuries pursued. But when we superseded them we gradually abolished the structure of direct taxation which they had laboriously raised. In the elder Provinces, this change was consummated by about the year 1844, in the newer ones it took place later, but the only survivals of the Native system now are the capitation-tax in Burma and the pándhari-tax in the Central Provinces, which are specially dealt with in the Bill now before us. On the other hand, all Native States now remaining have, speaking broadly, retained their old method of direct taxation to this day.

"What is the result? When we collect a paltry half million or so, British India rings with discussions and objections, while to our Native feudatories

direct taxes, under innumerable forms and names, and to a proportionately larger amount from a far smaller population, flow in without a murmur. This fact is so remarkable, that it appears well worth our while to endeavour to reexamine into and ascertain its causes.

"Having served for considerable periods in Native States, and been directly and indirectly concerned, as a Political Officer, with their administration, I have had some opportunities of observing their system in this respect, and have myself been connected with the collection of direct taxation far heavier than any which has ever been contemplated in British India. The characteristics of their system may be concisely described as, traditional acquaintance with individuals and their circumstances, rudely equitable apportionment between man and man, permanency or dislike of change, and employment of the regular localised revenue agency. In 1880 a middle-aged Native Chief, who is his own Prime Minister, and a most intelligent personal ruler, described to me his own practice in a few words. 'In my State' (he said) 'the name of every householder not an agriculturist is shown in the books of the village to which he belongs, with the sum he and his ancestors have been paying. This is levied from year to year. Only on extraordinary occasions is any alteration made. If the family became "divided" the sum might be made into shares at their request. If it notoriously fell into great poverty, some permanent reduction might be conceded; or if the business were quite changed and improved, I might increase the annual sum. But to get a small sum I should never cause an outcry. Everything would be inquired into and decided, in the presence of the parties, on the evidence of the village headmen and neighbours.' I am aware that this description might not apply precisely to all parts of India, as also that Native States are subject to paroxysms of tyranny, and that even in those well administered acts of injustice may occur. But it is sufficiently typical, and accounts for the fact of the noiseless levy in these States of direct taxation.

"Turning now to British India—in 1860 we were obliged by financial necessities to revert to direct taxation, which we had gradually abandoned, but instead of a Native model, softened and adapted to our circumstances, we unfortunately set up that of the income-tax, as in force in England. To get direct taxation into good working order, even after a suitable model, would have been a work of time and care, in the absence of the long-standing record of the names and resources of house-holders which we had in earlier years done away with. But what, except failure, could attend a sudden call on relatively ignorant and unlettered millions, at short notice, to assess themselves, or prove right of exemption, to send in elaborate returns and calculations, and to understand and watch their own interests under the system of notices, surcharges, claims, abatements, instalments, penalties and what not, consequent thereon. Necessarily there followed a long train of evils. An army of tax assessors and collectors temporarily engaged could not be pure. They were aided by an army of informers, actuated by direct gain or private animosity. Frauds in assessment and collection went hand in hand with extortion in return for real or supposed exemption. Inquisition into private affairs, fabrication of false accounts where true ones did not exist or were inconvenient, acceptance of false returns, rejection of honest ones, unequal treatment of the similarly circumstanced—all these more or less prevailed. The tax reached numbers not really liable, for zamíndárs illegally recovered it from tenants, and masters from servants, while underlings enriched themselves by the threat of a summons. Acts XXI of 1861 and XVI of 1862, while affording relief in some respects, practically stereotyped many inequalities and heart-burnings. In later years, the system of assessment by broad classes was an improvement on the earlier complications, but the advance of local officers towards equitable assessment was perpetually being cancelled by the alterations in rate and liability which I shall presently notice.

"Renewed direct taxation in British India thus made a false start, from which it has never recovered. Possibly, with time and care, a great improvement might have been effected, if the law had remained unaltered. But, unluckily, with its too English form, came the idea that the tax was to be, as in England,

a convenient means of rectifying Budget inequalities, and a great reserve in every financial or national emergency. In consequence of this idea, incomes between R200 and R500, which had been taxed at 2 per cent. in 1860, were exempted in 1862, the 4 per cent. rate was reduced to 3 per cent. in 1863, and the whole tax was dropped in 1865. In 1867 it re-appeared in the modified form of a license-tax, at the rate of only 2 per cent. at most, but reaching down again to incomes of R200. In 1868 it became a certificate-tax, at rates a fifth lower, and again commencing with a R500 limit. In 1869 it became once more a full-blown income-tax at 1 per cent. on all incomes and profits of R500 and upwards. In the middle of the same year it was suddenly nearly doubled. In 1870 a further rise to fully $3\frac{1}{8}$ per cent. occurred: but with better times, the rate fell in 1871 to $1\frac{1}{4}$ per cent., with a limit of R750, and in 1872 the limit was further relaxed to R1,000 and upwards. In 1873 came a second period of total abolition, to be succeeded from 1877-78 by the new series of Acts with which we are all familiar. Along with the changes in rate and incidence just described, came changes in name, form, classification, and procedure. With one object or another, twenty-three Acts on the subject have been passed since 1860.

"This long recital of what is well known to my hearers will have been tedious, I fear; but it seemed necessary to enforce my point, which is, that we have hitherto attempted direct taxation in British India under conditions which rendered success impossible. Owing to the perpetual changes, the people, never certain who was liable or what was the sum due, were an easy prey for fraud and extortion, while the superior officials time after time found their labours thrown away, and a fresh battle with guess-work and deception to be begun. That both officials and people should in 1872 have united to condemn an impost hitherto associated only with such evils, is not to be wondered at. Our abandonment of the machinery of direct taxation inherited from our predecessors was one of the things in us which the mass of the people disliked without being able to understand. Our new-fangled and European attempts to retrace this policy seemed to them tyrannical, compared with the rude expedients familiar to their fathers. All things considered, the abolition of the income-tax in 1873 was probably the best thing that could then be done.

"But direct taxation could not long be dispensed with. A new start was made in 1877. This start was, I think decidedly well intentioned, made in considerable appreciation of past defects and desire to avoid them. It was wise to begin with trades and classification, but it seems to me that too much was made of supposed local differences, and too much importance attached to local action. Bengal, Madras, and Bombay passed Acts of their own; Northern India was dealt with by the Imperial legislature. As a necessary consequence, further legislation was soon needed to remedy inequalties. Some good was thereby effected; more would have resulted, but for the, as I think, unfortunate abondonment of the Bill introduced in November, 1879.

"Act VI of 1880, with the local Acts it amended, is still in force. Their continuance for five years unaltered has done a great deal to remove such evils as arose from frequent changes. But still we find an unjust system of maximum everywhere, while the amount of maximum varies, and the classification essentially differs, in different parts of India. In short, the incidence differs with every class, the poor pay more in proportion than the rich, and the richer a man is, above a certain point, the less he has to pay. The measure is open to grave objections of principle and detail; it represents no school of economic thought, no section of public opinion; it satisfies no one, and must obviously be ephemeral.

"In this state of affairs, we have presented to us the dilemma of abolition or reform. I need not follow Sir Auckland Colvin in his review of other alternatives to direct taxation which have been suggested, because, though agreeing with his elimination of them, I hold the issue to be different. I take my stand on the principle so eloquently enunciated by His Excellency the Viceroy when the motion for leave to introduce the Bill was before us—that of abstract justice. How much longer, I would ask, are we to tolerate the fact

that non-agricultural wealth, though considerable and daily increasing, pays very little, in proportion to its means, for the protection and great advantages it enjoys under British rule—to which the very existence of the bulk of it is attributable?

"I therefore elect unhesitatingly for reform, for such reform as, I personally hope and believe, will ensure the incorporation of direct taxation as a permanent part of our fiscal system. Whatever may hereafter, at least in the near future, be the improvement in the general revenues, whatever surplus may in such future be deemed available, after duly providing for the development of the resources of the country and the reduction of debt, ought in my opinion to be applied to relief in other directions, such, for instance, as that of the rice-duty indicated by my hon'ble colleague Mr. Steel, but no reduction in direct taxation should be conceded. Such a reduction would be unjust, as impairing even such advance towards a fair balance of taxation between agriculturists and non-agriculturists as will be attained by the present measure. But it would also be undesirable, since avoidance of change is essential in order to prevent fraud and oppression in the levy of the impost. Differing from my hon'ble colleague Mr. Peári Mohan Mukerji and from Sir Charles Trevelyan and Mr. Massey whom he quotes, I hold that in India an income-tax is utterly unsuited to form a financial reserve. In England the mass of the people are accustomed to watch the commercial and agricultural prosperity of the country, competent to understand changes and causes, and able to accept, with intelligent equanimity, an extra penny of income-tax, or an increase of duty on some article of consumption. But in India the position is just the reverse, and such a condition is absolutely unknown. Certain sections of the community, indeed, are able to understand and criticise the financial position as well as people in England can, if not better. As a rule, the people are in a totally different intellectual and moral condition. Every change which takes place is a source of anxiety, of disquietude, of speculation, and of rumours which are often unreasonable or even absurd. I can imagine few conditions more economically and commercially prejudicial, if not more politically dangerous, than that all India should come to be thrown annually, from December to March, into a state of doubt and speculation as to what their fiscal burdens for the coming year would be. On this subject I venture to draw attention to the weighty remarks made by Mr. Gladstone in a debate in the House of Commons on April 18th, 1853:—

"* * This country cannot bear a revolution once a year. I venture to say in like manner that it cannot bear once a year a reconstruction of the income-tax. Whatever you do in regard to the income-tax, you must be bold, you must be intelligible, you must be decisive, you must not palter with it.'

Mr. Gladstone was speaking of the income-tax in England. His remarks, however, apply to any system of direct taxation whatsoever, and I venture to think that they are even more applicable to India than to England.

"Holding these views, as I do, I readily support the Bill now presented. My approval of such a measure is due to no new-born zeal, to no tardy conversion. My opinion has long been matured. I may mention that a re-adjustment of the public burdens, comprising increased direct taxation, was for a time, under my strong advocacy, a part of the financial programme of 1882-83, and I much regretted its abandonment in favour of a policy more attractive but less sound. The present Bill, though in one or two respects scarcely such as I should desire, is the same in principle and in leading details as what I then proposed. Its success depends, I consider, upon its recognition as essentially a new departure, on lines different from those which experience has taught us to avoid, and upon its future life and administrative working being regulated accordingly. Two points relating to its working seem to me of sufficient importance to warrant special notice to-day.

"First of all, it is essential that the machinery be of good quality throughout. The evils which are likely to arise when temporary, unsuitable, or ill-paid agency is employed in the assessment and collection of a direct tax were amply

illustrated in a very searching enquiry which was made into the whole question of taxation in 1881. I hope that I shall not be thought guilty of undue partiality for my own presidency, if I commend to notice the principle adopted in Bombay in this respect. It has always been the rule there to place officers of superior rank, usually the mámlatdárs (*i.e.*, tahsíldárs) of the sub-divisions, on special duty for two or three months to do the assessments personally, with the clerical aid of one or, at most, two of the regular sub-divisional establishment. Officiating promotion being given to fill their places in the regular staff, new men, if required at all, came in low down and had nothing to do with the tax. The mámlatdárs acted under the direct check of the Assistant or Deputy Collector in charge of their division of the district. The latter officer, being on tour throughout the fair season and in constant intercourse with the people, took considerable personal tests, heard appeals on the spot, and was a constant check upon abuses. I venture to hope that the analogy of this system might be followed, *mutatis mutandis*, throughout India, and that efficiency in this, as in many other matters, might be materially promoted, if Assistant and Deputy Collectors were more generally placed, as in Bombay, in charge of the whole administration of divisions (subordinate to the Collector and Magistrate), and required to be on tour for a rather longer period of the year than is in some provinces customary. As a part of this system, would follow ample leisure, including a whole fair season, for deliberate assessment and collection, and the hearing of appeals, freely, with less limit of time, and on occasions convenient to the people.

"The principle which I here advocate, of avoiding temporary agency, should reach down to the villages in all Provinces when the organisation will admit of this, or should approach to it as near as possible. A permanent register of assessees to the tax should be a part of the village-records, kept up by the village-accountant, revised from year to year according to changes of assessment which might occur, though these should be as few as possible, and this register should be regularly inspected and countersigned by superior authority. The amounts should be collected by the same agency as, and usually along with, the revenue-demands, all special tax-collectors, chaprásís, and the like, being eschewed. The same principle, on the other hand, should govern as far as in each case may be the assessment of Mufassal towns and cities, officers and records being permanent, though not necessarily employed on the work of the tax alone. The Presidency-towns would, of course, need special treatment appropriate to each.

"In making these suggestions, I do not overlook the peculiar administrative arrangements of Bengal, arising out of the Permanent Settlement, but I understand that even there a gradual advance to a much more complete fiscal and executive organisation is recognised as desirable and not out of reach, and I would add that I do not advocate more than arrangements on the same principle in cases where similarity in detail is impossible. My recommendation, however, is justified by the fact that although in Bombay the tax was so administered, that it yielded, on an average of years, two-thirds of the amount produced by Bengal and Assam, from a population only one-fourth of theirs, yet the province is admittedly the one where the least discontent and outcry have prevailed, and where an income-tax has long been openly advocated by powerful sections of both European and Native public opinion.

"No less important than reliable inferior agency is competent supervision of the assessment throughout the province. The inequalities which have arisen through the want of this both between provinces and between districts of the same province, were very forcibly shown by the enquiry already alluded to. The salary of a special officer in each province for a few months, or even for the first two or three years of the new income-license-tax, would be paid over and over again, not merely in money, but in the additional equality and justice which would be insured. I think I may venture to say, though I speak without book, that my hon'ble colleague the Financial Member will not grudge whatever reasonable expenditure may be deemed necessary to provide effective and reliable agency for the recovery of the tax.

"The other point, not less important than good agency, is the use of the powers of assessment and revision from year to year with care, tact, and moderation. All feverish anxiety to screw up particular classes or localities, or to adapt assessments to the varying circumstances of the year, should be avoided; petty increases and changes should be foregone. What is needed is a patient and continuous endeavour to learn and record the real means of parties, to prevent the unfair escape of individuals, and to build up a framework of taxation such as is found in Native States and normally worked upon.

"Did I not believe that it is the sincere desire of the Government of India that the new tax should be thus looked upon, and so administered in these two respects, and that it is to be in all ways a new departure on lines essentially different from what is gone before, the measure would meet with my opposition instead of my cordial support. I do not expect that direct taxation can ever be perfect,—it is open to abuse even in England,—but I see no reason why it should not be gradually made in India as good as its nature will allow.

"I have already said that I should not follow Sir Auckland Colvin in his review of alternatives, and I shall not follow other hon'ble members in their suggestions of such, but I am obliged very briefly to touch on the question of the import-duties, because my hon'ble friend Mr. Mandlik has alluded to me personally and to the opinions I expressed in this Council in 1875. He has quite correctly represented the views I then held, and I now see no reason to question their soundness. If the adoption then accorded to them had continued longer, and if an excise upon Indian mills had in due time been imposed, when found necessary, it is possible that we might have retained the duties to this day. But in 1878 measures were taken which, in the balance of difficulties then presented, it would be rash in me to condemn. They introduced disruptive principles into the tariff, and inevitably shattered and brought down the entire structure. Supposing, however, that the event had been otherwise, that no action had been taken in 1878, and that the import-duties were existing at this day, will the hon'ble member seriously contend that, although they would be a convenient source of revenue, they would reach the rich non-agriculturist in any degree at all approaching that in which justice to all other tax-payers demands that he should be reached?

"In conclusion, I feel it incumbent upon me to trouble the Council with a few remarks regarding the question of silver and exchange. By way of introduction I would ask leave to read an extract from our Proceedings of 21st March, 1877, in which I am reported to have spoken to the following effect:—

'Although there were occasions when the strength of a Government might be to sit still, he (MR. HOPE) did not think that this was one of them. The British Empire was interested in the silver question as much as any nation in the world—in fact, more so in consideration of the special double life which it possessed, a life both European and Indian. The English nation had in England an enormous debt, contracted and payable in gold. It had likewise there a vast manufacturing industry for export, which depended in a great measure on the ability of the silver-using nations with which it dealt to pay for its products. Here in India, on the other hand, it had a heavy debt to defray in gold, while all its assets were raised in silver. Thus if there were any serious rise in the value of gold, such as he for one believed had taken place, rather than a fall in the value of silver, England must suffer both at home in her debt-obligations and her current commerce, and in India by the depreciation of the national—he meant in the sense of the Indian national—capital, which was almost entirely in silver, by the increased weight of the obligations which she had to meet in gold, and by the decrease in the value of her means of meeting them. He believed it therefore to be entirely the interest of England, whether in England or in India, to have as large a circulating medium as possible, and one which should embrace both gold and silver as a full legal tender. It would be gathered from what he had said that he was one of that minority—and he must admit with regret that they were at present a rather small minority—who were in favour of bimetallism. So long ago as August last (1876) after studying everything on the subject which was within his reach, he had written privately to his friend Mr. Chapman, the Financial Secretary, that he could come to no other conclusion than that that system was the right one. He believed it was quite possible for Government to fix a ratio between gold and silver after due enquiry, and that

it was just as much the duty of Government to do so as to take any other measures for the protection of the community. No doubt such a step could not be taken without an understanding with other nations. But if they were to wait till all nations agreed on the subject, or till they could get together a sort of universal conference, they might have to wait for ever.'

"How far these views have been confirmed by experience, I leave my hearers to judge. For myself I can only say that from that day to this, I have watched most carefully all the phases of the question, I have studied all notable utterances upon it, I have neglected no opportunity which lay within my reach of pressing for practical action, such action as I deem indispensable in order to place our finances in a safe position for the future, and to recover, as far as may be, the position we have lost in the past. I entirely agree with my hon'ble colleague Sir A. Colvin in holding, though I might justify my faith by somewhat different arguments, that a low exchange is not that benefit to India which it is in some quarters supposed to be. I am convinced that unless a remedy be applied soon, before prices of Indian produce are seriously affected, the result will be a practical confiscation of a proportion, corresponding to the depreciation, of such part of the circulating capital of the country as consists of silver money. None the less does it seem clear to me that the present relative values of gold and silver have a disastrous effect upon trade in general, and upon large classes of the population of England. We may extend direct taxation so as to redistribute the public burdens more equitably between the agricultural and non-agricultural classes; we may effect reductions of expenditure without checking the natural growth of the country (as I trust we may do); we might even go further, in our zeal to make two ends meet, on the short-sighted and usually shortlived course of blind reduction without regard to circumstances, but, as long as the currency difficulty remains unmet, and the chasm of depreciation yawns before us, all such attempts to rectify the finances must be futile, and like tinkering the sides of a kettle when the bottom is out. This is obviously not the occasion for me to pursue this matter further or in detail. I will only say, and here, as in the foregoing remarks on the subject, I offer my personal opinion only, that I deem the only effective remedy to be the adhesion of India, at least, upon terms which it would not be difficult to adjust, to a Bimetallic Union comprising most, if not quite all, of the nations which were represented at the Paris Conference of 1881. By such means alone can we hope to afford to the unfortunate receivers of fixed incomes, to whatever class they belong, the relief which is their due, or to establish our finances on a sound basis."

The Hon'ble PEARI MOHAN MUKERJI said:—"With Your Excellency's permission I wish to point out, with reference to what has fallen from the Hon'ble the Financial Member, that I did not say that the imposition of the tax should be postponed to next year, but that the consideration of the question whether that imposition should be made permanent should be put off till next year. I am not sorry that my Bábú English has caused this mistake, for it has given the Financial Member an opportunity to treat the Council to a well-turned repartee."

His Excellency THE PRESIDENT said:—"Before putting the question I may be permitted to express the very great satisfaction I have derived from the generous unanimity with which the various members of this Council have expressed their approval of the measure placed before them. Quite independent of those who are connected with the Government, we have amongst us representatives of the three most important interests in India affected by the present Bill. We have a most distinguished representative of the mercantile interests, to whose incisive and weighty speech we have all listened with the greatest pleasure and profit. We have an equally distinguished representative of the interests of the learned professions, and we have also amongst us two gentlemen who are exceptionally authorised to speak on behalf of the Native community. When, therefore, we find that the representatives

of these three interests have been good enough to acquiesce in a measure which the Government have introduced with a considerable amount of anxiety and reluctance, we may well congratulate ourselves upon the result. But there is another view in which I personally may be permitted to regard this question, and which gives me even greater satisfaction than that which I have derived from the consciousness that a measure of the Government has been unanimously approved by this Council. As the representative of the Queen-Empress, and as in some respects the spokesman of the British people, I cannot but consider that the unity of the effort which we have agreed to make in common for the protection and the defence of the Indian Empire, is a better proof and test, than any that could be produced of the solidarity of the interests which unite Her Majesty's Native and British subjects in one common feeling of loyalty towards Her Majesty's person and Her Empire. And let me assure those gentlemen who represent so ably Native interests in this country that the manner in which the Native community has stepped forth so loyally and patriotically to the support of the policy of the Government on this occasion, will not fail to be appreciated at its true value by their fellow subjects at home."

The Motion was put and agreed to.

The Council adjourned to Friday, the 22nd January, 1886.

FORT WILLIAM;
The 15th January, 1886.

S. HARVEY JAMES,
Officiating Secy. to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 13th JANUARY 1886.

GENERAL REMARKS.—Except in the Tanjore and Madura districts of the Madras Presidency and the Sialkot district of the Punjab, the week has been almost rainless.

Agricultural prospects are generally fair in the Madras Presidency, but in some districts the outturn of the paddy harvest is below the average. In Mysore, with the exception of parts of the Tumkur district, and in Coorg, prospects are favourable.

In Bombay the *rabi* crops are generally promising, though in some places injury has been caused by drought, cloudy weather, and insects. The *kharif* harvest has been completed except in parts of Surat and Dharwar. In the Berars, Central India, and Rajputana the prospects of the *rabi* continue favourable.

Rabi crops are thriving and prospects are good throughout the North-Western Provinces and Oudh, the Punjab, and the Central Provinces.

The rice harvest has been almost completed in Bengal, with, except on the deeply flooded tracts, a generally good outturn. The prospects of all cold-weather crops including poppy are good. In Assam the reaping of the *sali* crop still continues, and prospects are good.

In British Burma the rice crop has been nearly reaped.

The public health continues generally good in all Provinces.

Prices are fluctuating in the North-Western Provinces and Oudh and Punjab, and are falling in parts of Bengal and in Coorg. Elsewhere they are fairly steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 13th)		
Bellary	*Nil*	Standing crops generally good, but some dry crops suffering from insects in parts of two taluks; harvest wet and dry grains, yield about average. Smallpox in one village.
Kurnool	*Nil*	Standing dry crops injured by late unseasonable rains and by insects in parts; harvest paddy, outturn below average. Smallpox in one and cattle-disease in two taluks.
Ganjam	*Nil*	Greater portion of rainfed paddy lost; harvest irrigated paddy, outturn below average. Smallpox in one taluk and cattle-disease in another and in one division; 24 deaths from cholera.
Kistna	*Nil*	Standing crops generally good; harvest paddy, outturn below average. River 2 feet over Anicut. Fever prevalent; smallpox in parts; deaths from cholera unreported last week 14, this week 12.
Chingleput (Madras)	.23	Standing crops generally good; harvest paddy, outturn below average. Cattle-disease in five taluks.
Coimbatore	.02	Standing crops good; harvest wet and dry grains, outturn about average. Slight fever in two taluks.
Tanjore	2.63	Standing crops generally good, but in parts of one taluk damaged by locusts; prospects slightly affected by excessive rain; harvest wet and dry grains, outturn below average. Two deaths from cholera.
Madura	.63	Harvest dry grains, yield about average. Fever prevalent; cattle-disease in two taluks and one division.
Malabar	*Nil.*	Harvest second crop paddy. Slight smallpox in seven taluks; fever in two and cattle-disease in one; 24 deaths from cholera.
Travancore	*Nil*	Paddy ripening. Smallpox and fever in parts.
		General Remarks.—General prospects fair, and continue favourable in Bellary and Anantapur.
Bombay—(Jan. 13th)		
Karachi	Slight fall of rain during the week.	Weather mild. River at Kotri on 11th 3 feet 0 inches, against 4 feet 7 inches on same date last year. *Rabi* sowing completed. Fever in eleven, and cattle-disease in five talukas; 9 cases of smallpox in Ghorabari taluka, of which all recovered. Prices—wheat, red rice, and *bajri* in Karachi 26, 20 and 34, in Ghorabari 24, 40 and 40, in Jati 26, 40 and 42, and in Dadu 36, 50, and 42 pounds per rupee, respectively.
Hyderabad	Moro 12 on 8th. Slight rain in five other talukas.	*Rabi* generally good; wheat cultivation attacked by insect *morai* in Hyderabad taluka. River at Kotri on 11th 3 feet 9 inches against 4 feet 7 inches on same date last year. Fever and cattle-disease in seven talukas; smallpox is reported in Naushahro taluka. Wheat 28, *jowari* 40, *bajri* 40, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	Standing crops healthy. Fever in Viramgaum and Sanand talukas. Wheat 36 and *bajri* 34 pounds per rupee.
Baroda	*Nil*	Public health fair. Standing crops in good condition. Prices—*bajri* 28, wheat 23, and rice 18 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	*Nil*	Standing crops healthy. Reaping of *jowari* progressing. Cattle healthy; fever in Mandir taluka. Average prices—*jowari* 38 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	*Kharif* crop threshing in progress. *Rabi* crops in fair condition throughout the district; in parts of Yeola and Malegaon talukas both the crops have suffered slightly owing to want of rain. Cholera in the city of Nasik, 4 attacks, 2 deaths; cattle-disease in the village of Kalvan of the Kalvan taluka; public health generally good. Wheat 31½, *bajri* 36½, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Average abnormal temperature 2° warm; vapour in air slightly in defect of normal; abnormal wind easterly.
Poona	*Nil*	*Rabi* crops doing well in all talukas. Sixteen cholera cases in the city of Poona and three other talukas, 10 deaths; cattle-disease prevalent in taluka Junnar. Prices of *bajri* 34 and of *jowari* 41, in Poona *bajri* 34 and *jowari* 41 pounds per rupee.
Ahmednagar	*Nil*	Wheat and gram injured by clouds in Parner and Shrigonda. Slight fever and cattle-disease in Akola. *Bajri* average 44·9 pounds and *jowari* 52·6 pounds per rupee.
Sholapur	*Nil*	Linseed has suffered from blight in Sholapur, Barsi, Madha, Karmala and Pandharpur talukas; other crops generally good. *Jowari* 50 pounds 26 tolas and *bajri* 43 pounds 15 tolas per rupee. Cholera 4 cases, 2 deaths in Barsi taluka.
Dharwar	*Nil.*	Harvesting of rice and early *jowari* in progress; cotton crops good; wheat and gram crops slightly blighted in five talukas. Fever and cattle-disease in Mugud, Bankapur, and Hangal. Rice 20 to 30 and *jowari* 43 to 64 pounds per rupee.
Kanara	*Nil*	Second crop sowing continues; transplanting in some parts. Measles in Kharwar; slight fever and smallpox throughout district; cattle-disease in five talukas. Common rice in Karwar 14, in district, average 13 seers per rupee. Weather cold. Strong land winds.
Rajkot	*Nil*	Weather cold. Public health generally good. *Bajri* 34, *jowari* 39, and wheat 34 pounds per rupee.
		General Remarks.—Slight rain in parts of Sind. Reaping of *kharif* crops continues in parts of Surat and Dharwar, completed in other districts. Standing crops injured by drought in parts of Nasik and Kandesh, by cloudy weather in parts of Ahmednagar, by insects in parts of Hyderabad and Bijapur, and by blight in parts of Sholapur, Khandesh, Satara, Dharwar, Bijapur and Belgaum. Cholera in parts of four, smallpox in parts of six, and fever and cattle-disease in parts of twelve districts.
Bengal—(Jan. 12th)		
Chittagong	*Nil*	Weather seasonable; prospects of winter crops fair; harvesting of *aman* continues. Prices steady. Public health good.
Dacca	*Nil*	Winter crops doing well; harvesting of *aman* nearly finished; planting of *boro* paddy going on. Public health generally good.
24-Pergunnahs	*Nil*	Prospects of *aman*, except on low lands, and of winter crops good; harvesting of *aman* still going on, outturn estimated at about 12 annas. Public health generally good, though cholera reported from Baraset and Diamond Harbour.
Khoolna	*Nil*	Weather cool. Harvesting of *aman* paddy continues; prospects good; winter crops doing well; planting of *boro* paddy going on. Price of rice falling. Some cholera; public health fair.
Moorshedabad	*Nil*	Weather seasonable. Harvesting of *aman* rice and *kalai* almost over; outturn good; prospects of all cold-weather crops favourable. Public health good.
Pubna	*Nil*	Weather cool. Outturn of *aman* 12 annas; winter crops doing well. Public health good.
Dinagepore	*Nil*	Weather seasonable. *Aman* harvest almost completed with fair outturn; *rabi* prospects good. Cholera still lingers in some thanas.
Rungpore	*Nil*	*Aman* harvest very good; cold-weather crops promise well. Public health good.
Midnapore	*Nil*	Weather cold. *Aman* rice harvested; yield on the whole good. Public health good.
Burdwan	*Nil*	*Rabi* crops doing well. Public health fair.
Bhagulpore	*Nil*	*Rabi* prospects good. Prices falling slightly. Public health good.
Monghyr	*Nil*	Prospects of poppy continue good.
Purneah	*Nil*	*Aghani* rice harvest good almost everywhere; *rabi* prospects very favourable. Public health good.
Durbhanga	*Nil*	Harvesting of paddy over, and threshing operations progressing; *rabi* prospects favourable. Prices stationary. Public health generally good.
Mozufferpore	*Nil*	Poppy cultivation continues favourable; prospects very promising.
Sarun	*Nil*	Prospects of poppy excellent. Weather favourable.
Chumparun	*Nil*	Prospects of *rabi* and poppy good; harvesting of rice almost finished. Prices fallen slightly. Public health fair.
Patna	*Nil*	Harvesting of paddy still going on; mustard and *mussoor* in pod; other spring crops growing splendidly; poppy and cotton look well. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Gya	*Nil*	*Rabi* prospects good; poppy reports hopeful. Some fever reported.
Shahabad	*Nil*	Weather favourable to poppy; weeding operations going on.
Hazaribagh	*Nil*	Weather cold and seasonable. Rice harvest finished; *rabi* and poppy crops promising. Public health good.
Cuttack	*Nil*	Weather seasonable. *Sarad* rice being cut with fair outturn; *rabi* crops in some places being gathered. Price of rice falling. Fever prevails; cholera still reported.
		General Remarks.—No rain during the week. Rice harvest is almost over, and the outturn, as already reported, is generally good, except in the deeply flooded parts. Prospects of all cold-weather crops including poppy good. Rice cheaper in some districts, in Calcutta and neighbourhood however the price of rice is dearer than at this time last year. Cholera still prevalent in Tipperah and fever in Cuttack, elsewhere general health fair.
N. W. Provinces and Oudh (Jan. 13th)		
Benares (Jan. 12th)	*Nil*	Weather cold. Crops thriving and prospects excellent. Supplies sufficient. Prices show a slight rise in wheat, barley, and gram, which is due to falling off in imports. Health generally good; no cattle-disease.
Gorakhpore („ 11th)	*Nil*	*Rabi* crop and poppy in good condition. Prices stationary. Health of people good.
Ballia („ „)	*Nil*	Sky clear and weather seasonable. Sugarcane cutting and pressing going on; prospects of *rabi* continue favourable. Markets well stocked. Health satisfactory, and condition of cattle good.
Fyzabad („ 12th)	*Nil*	*Rabi* prospects very favourable; sugarcane being crushed. Prices stationary. General health fair.
Lucknow („ 11th)	*Nil*	Weather fair; west wind. Wheat and barley in ear; gram beginning to flower; poppy being weeded. Supplies ample. Prices stationary. Fodder very dear. Health of people good as well as the condition of cattle.
Rae Bareilli („ „)	*Nil*	Weather sometimes cloudy. *Rabi* crops look well. Supplies abundant. Prices almost stationary. General health fair.
Partabgarh („ 12th)	*Nil*	West winds; clear weather. Prospects of *rabi* crops excellent; opium crop much improved by the late rainfall, and is in a very promising condition. Slight damage reported in the low lands in Tahsil Kunda from damp rot, but resowing has been resorted to in these instances. Prices steady. Condition of the people and cattle good.
Allahabad („ „)	*Nil*	Weather seasonable. Crops thriving; poppy prospects good. Markets well supplied. Prices stationary. Condition of men and cattle good.
Cawnpore („ 11th)	In 3 parganas from 0·10 to 0·40	*Rabi* and poppy crops flourishing. Prices steady. Condition of people and cattle good.
Banda („ 12th)	*Nil*	Weather seasonable. *Rabi* crops flourishing. Prices steady. Public health and condition of cattle good.
Farakhabad („ „)	*Nil*	Prospects good and greatly improved by recent rains. Health of people fair.
Sitapur „ „)	*Nil*	Weather somewhat cloudy. *Rabi* crops promising; poppy crops flourishing. Prices slightly rising. Health good.
Bareilly („ „)	*Nil*	Crops doing well but weather dull; poppy well above ground and healthy. Prices rising slightly. Smallpox reported from one village in Baheri; no cattle-disease.
Kumaon („ 11th)	*Nil*	Weather fine. *Rabi* crops progressing well. Prices stationary. General health good; cattle-disease still continues.
Agra („ „)	In six parganas ·10 to 0·30	*Rabi* promising. Prices steady. Health good.
Jhansi („ „)	·0·20	Weather sometimes cloudy. Prospects continue good. Prices rising.
Meerut („ 12th)	*Nil*	Weather cloudy. Agricultural prospects excellent. Supplies sufficient and prices steady. Health good.
		General Remarks.—Slight rain in some districts. Weather generally favourable. The crops are thriving and prospects are good everywhere. Supplies are ample though prices are fluctuating. The public health is good.
Punjab—(Jan. 13th)		
Delhi (Jan. 12th)	*Nil*	Health fair. *Rabi* crops promising. Prices almost stationary.
Hissar	*Nil*	Health good. *Kharif* winnowed; *rabi* flourishing. Prices stationary.
Umballa	*Nil*	Health good. *Rabi* crops flourishing; prospects good. Prices stationary.
Jullundur	*Nil*	Health and crops good. Prices stationary.
Amritsar	*Nil*	Health and crops good. Prices stationary.
Sialkot	·90	The rain very beneficial, and all available ground brought under cultivation. Grass springing up. Health good. Prices falling.
Ferozepore	·20	Health and crops good. Prices stationary.
Lahore	*Nil*	Health and crop prospects good. Prices stationary.
Rawalpindi	Slight rain	Health good. *Rabi* sowings completed. Prices stationary.
Shahpur	*Nil.*	Smallpox in tahsils Bhera and Shahpur. Fodder scanty. Prices rising.
Mooltan	Slight rain at Sadr	Health good. Prospects of *rabi* crops favourable. Prices almost stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	*Nil*	Fever in city. Prospects fair. Prices stationary.
Peshawar	*Nil*	Health fair. Rain much wanted. Prices rising.
		General Remarks.—Slight rain in four districts. Smallpox in the Bhera and Shahpur tahsils of the Shahpur district. Fever in the Dera Ismail Khan City, health elsewhere good. *Rabi* prospects generally good. Prices rising in the Shahpur and Peshawar districts, falling in the Sialkot district, and stationary elsewhere.
Central Provinces— (Jan. 13th)		
Nagpur	*Nil*	Weather clear and cool. Prospects good; *kharif* harvest in progress. Fever and cattle-disease in places. Prices stationary.
Jubbulpore	*Nil*	Weather slightly cloudy and chilly. Crops excellent. Fever prevalent. Prices steady.
Saugor (Jan. 12th)	*Nil*	Weather cloudy. Prospects good. Health fair. Prices stationary.
Seoni	*Nil*	Weather cloudy. Prospects good; threshing of rice in progress. Fever decreasing. Prices steady.
Hoshangabad	*Nil*	Weather occasionally cloudy. Prospects and health good; slight cattle-disease. Prices slightly risen.
Khandwa	*Nil*	Weather slightly cloudy and chilly. *Rabi* crops progressing. Health good. Prices steady.
Raipur	*Nil*	Weather cold and clear. *Kharif* being harvested; *rabi* crops good; linseed a little damaged by insects. Health good; slight cattle-disease. Prices stationary.
Sambalpur (Jan. 9th)	*Nil*	Weather cold. *Kharif* harvest and sugarcane pressing in progress. Health good; cattle-disease in places. Prices slightly risen.
		General Remarks.—Weather cold and slightly cloudy. Prospects generally favourable; *kharif* harvest in progress. Fever and cattle disease in places. Prices steady.
British Burma— (Jan. 13th)		
Akyab (Jan. 9th)		Public health and health of cattle good. Reaping nearly finished.
Bassein		Public health good; slight cattle-disease in parts of district. Reaping everywhere progressing favourably.
Rangoon		Public health good; two fatal cases of cholera. Supplies of paddy are arriving in large quantities.
Amherst (Moulmein)		Public health and health of cattle good.
Tavoy		Public health and health of cattle good. Gathering and harvesting in progress.
Pegu		Public health and health of cattle good. Reaping completed in parts.
Henzada		Slight cholera in one township; cattle healthy. Reaping completed.
Prome		Slight cholera; cattle healthy. Crops reported bad in some parts, and reaping may be said to have been finished.
Toungoo		Public health and health of cattle good. Reaping progressing.
Thayetmyo		Public health and health of cattle good. Reaping finished.
		General Remarks.—Public health and health of cattle good; slight cholera and slight cattle-disease in four districts. Reaping nearly completed.
Assam—(Jan. 13th)		
Gauhati	*Nil*	Weather seasonable. Public health fair. Reaping of *sali* nearly finished; gathering of *matikalai* and *mungh* finished. Cattle-disease reported from two mouzahs.
Sylhet	*Nil*	Insects done injury to mustard and linseed in South Sylhet, otherwise state and prospects good. Cholera still reported from the interior.
Cachar	*Nil*	Weather cold. Reaping of *sali* and *asra* crops progerssing. Common rice 16 seers per rupee. General health good.
Dibrugarh	*Nil*	Weather seasonable. Reaping of *sali* crop nearly finished; *matikalai* being gathered. District healthy.
Mysore and Coorg— (Jan. 13th)		
Bangalore	*Nil*	Crops generally in good condition, but in parts of Tumkur district they are reported to be suffering from want of moisture; prospects favourable. Public health good; cattle-disease continues in parts of Kolar district.
Mysore	*Nil*	No material change in prices.
Mercara	*Nil*	Harvesting of rice and picking of coffee continue, and price of food grains slightly fallen; prospects of season and public health good.
Berar and Hyderabad— (January 13th)		
Amraoti	*Nil*	Weather cloudy. *Jowari* threshing in progress; *rabi* in good condition. Wheat 22 and *jowari* 26 seers per rupee.
Akola	*Nil*	Cotton picking and *jowari* threshing continue; *rabi* prospects good.
Hyderabad (Jan. 14th)	*Nil*	*Rabi* crops progressing; sowing of *tabi* crops continues; fever and ague prevalent in many places. Prices—wheat 14¾, coarse rice 12½, white *juar* 20, yellow *juar* 23¾, and *tur* 17 seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 20th JANUARY 1886.

GENERAL REMARKS.—Rain has fallen in nearly all districts of the Punjab, and in parts of Rajputana, and there have been slight showers in parts of the North-Western Provinces and Oudh, Sind, and the Southern Districts of the Madras Presidency.

Agricultural prospects continue fair in the Madras Presidency, but pressure from loss of the paddy crop is reported from part of the Ganjam district. In Mysore and Coorg the season promises well. The harvest has been completed in some parts and is in progress elsewhere.

Except in some places where injury has been caused by blight, drought, and cloudy weather, the *rabi* crops in the Bombay Presidency promise well. Prospects are also good in the Berars, Hyderabad, Central India, and Rajputana.

Throughout the Punjab and the North-Western Provinces and Oudh the *rabi* is flourishing, and harvest prospects are good. In the Shahpur district of the Punjab fodder is very scarce. In the Central Provinces the crops promise well unless injured by cloudy weather.

The *aman* harvest is nearly complete in Bengal, where the *rabi* and, except in Shahabad, the poppy crops are in excellent condition. In Assam prospects continue favourable.

In British Burma the reaping of the rice crop has been finished in some districts and is well advanced elsewhere.

The public health is generally good in all provinces.

Prices are fluctuating in the North-Western Provinces and Oudh, the Punjab, and Mysore, and are falling in Coorg; elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 20th)		
Bellary . .	. . . .	Standing crops generally good; but castor seeds and *dholl* suffering from insects in parts of three talukas, and white *cholum* and wheat from disease in parts; harvest dry grains, yield generally average. Smallpox in one village.
Kurnool . . .	. . . .	Standing dry crops slightly injured in parts by late unseasonable rains and by insects. Smallpox in one and cattle-disease in two talukas.
Ganjam . . .	. . . .	Slight fever and smallpox in one and cattle-disease in two talukas, 9 deaths from cholera.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Kistna		Standing crops generally good; harvest paddy and *cholum*, outturn below average. River 2·9 feet over anicut. Fever prevalent, slight smallpox, deaths from cholera unreported last week 111, this week 52.
Chingleput (Madras)		Standing crops generally good; harvest paddy and *ragi*, yield below average. Cattle-disease in four talukas.
Coimbatore		Standing crops good; harvest wet and dry grains, outturn about average. Slight fever and smallpox in parts.
Tanjore	·02	Standing crops generally good, but paddy not flourishing in parts of one taluk; harvest wet and dry grains, outturn below average. Cattle-disease in one taluka.
Madura	Last week since revised . 1·02 This week . ·02	Harvest dry grains, yield about average. Fever prevalent.
Malabar	·03	Harvest second crop; paddy outturn below average. Slight smallpox in seven talukas, fever in two, and cattle-disease in one, 20 deaths from cholera.
Travancore	·03	Paddy mostly ripe; harvest commenced. Smallpox and fever in parts.
		General Remarks.—General prospects fair, but pressure from loss of paddy crops reported from a part of Ganjam.
Bombay—**(Jan. 20th)**		
Karachi	Slight rain on 18th	River at Kotri on 18th 3 feet 3 inches against 9 feet 4 inches on same date last year. *Rabi* sowings coming up; damage to crops in Sujawal taluka owing to blight. Fever in eleven and cattle-disease in five talukas. Prices—wheat, red rice, and *bajri* in Karachi 20, 30 and 34, in Sakro *nil*, 36 and 46, in Shahbandar 22, 40, and 44, and in Manjhand 32, 38, and 38 pounds per rupee, respectively.
Hyderabad	Slight rain in Dero Mohbat taluka.	*Rabi* generally good. River at Kotri on 18th 3 feet 3 inches against 9 feet 4 inches on same date last year. Fever in six and cattle-disease in three talukas; smallpox is reported in Hyderabad town. Prices steady.
Ahmedabad	*Nil*	Standing crops healthy. Fever in Sanand and Viramgaum talukas. Wheat 36 and *bajri* 35 pounds per rupee.
Baroda	*Nil*	Public health good; cattle-disease in Kherala Mahal. Standing crops in good condition. Prices—*bajri* 28, wheat 23, and rice 18 pounds per rupee.
Surat	*Nil*	Cotton crops suffered a little in Bardoli taluka from cloudy weather; other standing crops healthy. *Jowari* reaping completed. Cattle healthy; fever in Bardoli, Bulsar, and Mandvi talukas. *Jowari* 39 and *nagli* 44½ pounds per rupee.
Nasik	*Nil*	*Kharif* crop threshing in progress; *rabi* crops in fair condition in ten talukas, irrigated wheat blighted in parts of Yeola taluka and both the crops suffered in parts of Malegaon taluka for want of rain. Cattle-disease in the village of Kalvan, Budruk of the Kalvan taluka. Public health generally good. Wheat 31½, *bajri* 36½, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature *nil* on 13th and 19th, 2° cool on 14th and 15th, and 1° warm from 16th to 18th; vapour in air excessive except on 14th and 15th, when it was normal; abnormal wind southerly on 16th and 17th; wind normal on all other days.
Poona	*Nil*	*Rabi* crops growing well throughout the district. Smallpox prevalent in Sirur and cattle-disease in Junnar taluka; 37 cholera cases in taluka Haveli and Poona city, 18 deaths. Prices—*bajri* 36 and *jowari* 42; in Poona, *bajri* 34 and *jowari* 39 pounds per rupee.
Ahmednagar	*Nil*	Public health good. Wheat and gram injured by cloudy weather. Fever in Akola. *Bajri* average 46 and *jowari* 53 pounds per rupee.
Sholapur	*Nil*	Linseed, wheat, *tur* and gram crops have suffered more or less from blight and insects; cotton crops also inferior in Madha and Karmala talukas; other *rabi* crops doing well. One fatal cholera case in Barsi taluka. *Jowari* 31 lbs. 14 tolas and *bajri* 43 lbs. 22 tolas per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* in progress; exotic cotton blighted in three and wheat and gram in five talukas. Slight fever and cattle-disease in Mugud, Bankapur, and Hangal. Rice 20 to 32 and *jowari* 42 to 72 pounds per rupee.
Kanara	*Nil*	Second crop operations continue; plants healthy. Fever, small-pox, and cattle-disease decreasing. Common rice in Karwar 14; in district average 13 seers per rupee. Weather seasonable.
Rajkot	*Nil*	Fever, cough and bowel complaints in many parts. Weather cold. Public health generally good. *Bajri* 32, *jowari* 42, and wheat 34 pounds per rupee.
		General Remarks.—Slight rain in parts of Sind, but river low. Reaping of *kharif* crops completed, except in Dharwar; standing crops injured by drought in parts of Nasik, by blight and insects in parts of Sholapur and Bijapur, by cloudy weather in parts of Surat, Broach and Ahmednagar, and by blight in parts of Karachi, Nasik, Dharwar, Khandesh, and Belgaum. Cholera in parts of three, smallpox in parts of six, and fever and cattle-disease in parts of twelve districts.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—**(Jan. 20th)**		
Chittagong (Jan. 19th)	*Nil*	Weather cold. Harvesting of *aman* nearly finished; winter crops getting on well. Prices somewhat high. Public health good.
Dacca	*Nil*	Cutting of sugarcane going on; *cheena* and *kaon* being sown; cultivation for next paddy crops going on; prospects of winter crops good. Public health good.
24-Pergunnahs	*Nil*	*Aman* still being harvested with an outturn of 12 annas; prospects of cold-weather crops good. Public health generally good; cholera abating.
Khoolna	*Nil*	Weather cloudy. *Aman* harvest continues, outturn good; prospects of winter crops good; planting of *boro* paddy going on. Public health fair.
Moorshedabad	*Nil*	Weather seasonable. Harvesting of *aman* completed with good outturn; prospects of all cold-weather crops favourable. Public health good.
Pubna	*Nil*	Weather cool and cloudy. *Aman* almost reaped; prospects of winter crops favourable. Public health good; fever about Serajgunge much abated.
Dinagepore	*Nil*	Weather rather warm and somewhat cloudy. State of *rabi* crops good. Cholera reported in some thanas.
Rungpore	*Nil*	Prospects of crops good. Public health good.
Midnapore	*Nil*	Prospects of *boro* rice and *rabi* crops good. Public health fair.
Burdwan	*Nil*	*Rabi* crops doing well. Public health fair.
Bhagulpore	*Nil*	Rice harvest completed; in the south outturn estimated at 8 to 10 annas and in Mudehpoora 10 to 12 annas; prospects of *rabi* good. Public health good.
Monghyr		Possibility of the cloudy weather bringing insects, but reports of the poppy crop to hand are favourable.
Purneah	*Nil*	*Aghani* rice almost harvested; prospects of *rabi* crops good. Public health fair.
Durbhanga	*Nil*	Harvesting of paddy completed, and threshing in progress; *rabi* prospects continue favourable. Prices stationary. Public health generally good.
Mozufferpore		Poppy cultivation favourable.
Sarun		Prospects of poppy continue good. Weather favourable.
Chumparun	*Nil*	Prospects of *rabi* and poppy crops good. Prices of food-grains stationary. Public health good.
Patna	*Nil*	Harvesting of paddy almost over; *rabi* crops look excellent and promise a good harvest; poppy and cotton growing well. Public health good.
Gya	*Nil*	Weather mild and cloudy. *Rabi* prospects good; poppy promises well. Public health good.
Shahabad		Easterly winds and foggy weather have been unfavourable to poppy crop.
Hazaribagh	*Nil*	Weather cold and seasonable. Prospects of cold weather crops continue favourable. Poppy promises well. General health good.
Cuttack	*Nil*	Mornings foggy. Reaping of late rice continues; outturn fair. Cholera subsiding; fever still prevalent.
		General Remarks.—No rain fell during the week. *Aman* harvest is nearly over, and the outturn, except in the deeply flooded tracts, is generally good. *Rabi* crops everywhere, and poppy in Behar and Hazaribagh, are in excellent condition; but in Shahabad easterly winds and foggy weather have been unfavourable to the poppy crop. Price of rice is nearly stationary in almost all districts; it is considerably higher in Calcutta and neighbourhood than elsewhere. Public health is generally fair, except in Cuttack and Backergunge, where fever is still prevalent, and in Tipperah where cholera is prevalent.
N. W. Provinces and Oudh—		
Benares (Jan. 19th)	*Nil*	Weather clear and seasonable. Prospects of *rabi* continue favourable; sugarcane cutting and pressing carried on. Supplies ample and prices steady. General health good; no cattle-disease.
Gorakhpore („ 18th)	*Nil*	*Rabi* and poppy crops in good condition. Slight rise in prices. Health good; cholera disappeared.
Fyzabad („ 19th)	*Nil*	Weather fair. Wheat and barley in ear; poppy being weeded. Supplies ample. Prices stationary. Health of people good.
Lucknow („ 18th)		Weather fair. *Rabi* prospects continue favourable; poppy is being weeded; sugarcane pressed. Markets well supplied. Prices steady. Fodder very dear. Health of people good as well as the condition of cattle.
Rae Barelli („ „)		Weather seasonable. Prospects of *rabi* crop continue favourable. Prices slightly rising. Supplies ample. General health fair.
Partabgarh („ 19th)	*Nil*	Wind westerly; weather clear. *Rabi* prospects excellent; opium crop is very favourable and promises well; *sawan* sowing has commenced; sugarcane is being crushed. Prices almost stationary. No illness among the people and cattle.
Allahabad („ „)	*Nil*	Weather seasonable. Crop prospects very good, though poppy somewhat backward. Markets full. Prices rising slightly. Condition of men and cattle good.
Cawnpore („ 18th)	*Nil*	*Rabi* and poppy crops flourishing. Prices steady. Condition of people and cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Banda (Jan. 19th)	*Nil*	Clouds about. *Rabi* crops flourishing. Prices steady. Public health good; cattle-disease in one village.
Ballia („ 18th)	*Nil*	Weather continues seasonable; sky sometimes cloudy. *Rabi* prospects excellent. Supplies ample. Health good; no cattle-disease.
Farakhabad („ „)	*Nil*	Prospects of crops good. Health continues good.
Sitapur „ „)	*Nil*	Weather clear. *Rabi* prospects continue favourable; poppy crops healthy. Prices steady. Health of people and cattle good.
Bareilly („ „)	*Nil*	Prospects of crops continue good. Opium, everywhere in good progress. Slight small-pox in one pargana, health otherwise good.
Kumaon („ „)	*Nil*	Weather cloudy; sunshine required for *rabi* which is progressing well. Prices stationary. General health good; cattle-disease continues.
Agra („ 18th)	*Nil*	*Rabi* progressing. Prices steady. Health good.
Jhansi („ „)	*Nil*	Weather clear. Crops flourishing; poppy crop doing well. Prices rising.
Meerut („ 19th)	. . . .	Weather cloudy. Crops flourishing. Supplies and prices steady. Health good.
		General Remarks.—Weather generally favourable; in three districts there has been slight rain. The *rabi* crops continue to flourish and prospects are good everywhere. Supplies are ample, but prices are still fluctuating. General condition of health and cattle good.
Punjab—(Jan. 20th)		
Delhi . (Jan. 19th)	. . . .	Heath fair. *Rabi* crops promising. Prices fluctuating.
Hissar . . .	0·70	*Rabi* flourishing. Health good. Prices nearly stationary.
Umballa . . .	0·50	*Rabi* crops much improved. Health and prospects good. Prices stationary.
Jullunder . . .	1·60	Health and crops good. Prices stationary.
Amritsar . . .	0·10	Health and crops good. Prices stationary.
Sialkot . . .	0·40	Crops flourishing. Health good. Prices falling.
Ferozepore . . .	. . . .	Health and crops good. Prices stationary.
Lahore . . .	0·90	Prospects improved. Health good. Prices almost stationary.
Rawalpindi . .	0·10	*Rabi* prospects average. Health good. Prices stationary.
Shahpur . . .	. . . .	Small-pox in the Shahpur and Bhera tahsils. Prices rising. Fodder very scarce.
Mooltan . . .	0·80 at Sadr	Prospects of *rabi* crops favourable. Health good. Prices stationary.
Dera Ismail Khan .	1·75	Prices stationary. Prospects good. Health fair.
Peshawar , , .	0·20	Prices almost stationary. Health and *rabi* prospects good.
		General Remarks.—Rain has fallen almost throughout the Province. Small-pox in Bhera and Shahpur tahsils of Shahpur district, health elsewhere good. *Rabi* prospects favourable; fodder very scarce in Shahpur district. Prices rising in Shahpur district, falling in Sialkot district, stationary elsewhere.
Central Provinces— (Jan. 20th)		
Nagpur . . .	. . . .	Weather cloudy. *Kharif* being gathered; *rabi* injured by cloudy weather. Cattle-disease prevalent. Prices stationary.
Jubbulpore . .	. . . .	Weather cloudy and unfavourable for crops. Health fair. Prices steady.
Saugor . (Jan. 19th)	. . . .	Weather cloudy. Prospects good. Health fair. Wheat 17, rice 11, gram 19 seers per rupee.
Seoni . . .	. . . .	Weather cloudy. Mildew has attacked linseed. Fever, abating. Prices steady.
Hoshangabad . .	. . . .	Occasional clouds. Health good; Cattle-disease in Harda tahsil. Rice 11, wheat 16½, *jowari* 20 seers per rupee.
Khandwa . . .	. . . .	Weather slightly cloudy. *Rabi* crops good; wheat and gram flourishing. Health good. Prices steady.
Raipur . . .	. . . .	Weather cloudy and injurious to crops. Cattle-disease in places. Prices steady.
		General Remarks.—Cloudy weather prevails and is reported to be injurious to *rabi* crops. Health good. Prices steady.
British Burma— (Jan. 20th)		
Akyab (Jan. 16th)	*Nil*	Public health and health of cattle good. Reaping nearly finished.
Bassein . . .	*Nil*	Slight cholera in one township; cattle-disease mild and sporadic. Reaping progressing.
Rangoon . .	*Nil*	Public health and health of cattle good.
Amherst (Moulmein) .	*Nil*	Public health and health of cattle good. Reaping in Amherst nearly finished.
Tavoy . . .	*Nil*	Public health and health of cattle good. Harvesting in progress.
Pegu . . .	*Nil*	Public health and health of cattle good. Reaping nearly finished.
Henzada . . .	*Nil*	Slight cholera in two townships; cattle healthy.
Prome . . .	*Nil*	Slight cholera in one township; cattle healthy. Paddy seems nearly all reaped now.
Toungoo . . .	*Nil*	Public health and health of cattle good. Reaping progressing.
Thayetmyo . . .	*Nil*	Public health and health of cattle good. Reaping finished.
		General Remarks.—Public health good; a little sporadic cholera and cattle-disease. Reaping finished in some districts and well advanced in the rest.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(Jan. 20th)		
Gauhati . . .	*Nil*	Weather seasonable. Public health fair. Reaping of *sali* finished; gathering of mustard commenced.
Sylhet . . .	*Nil*	No change in crops since last report. Cholera abating in places.
Cachar . . .	*Nil*	Weather cold. Reaping of *sail* and *asra* crops nearly finished. Common rice 15¼ seers per rupee. One death from cholera reported from Katigora station; general health good.
Dibrugarh . . .	·09	Weather cloudy. Reaping of *sali* crop continues in some parts of the district. District healthy.
Mysore and Coorg— (Jan. 20th)		
Bangalore . . .	*Nil*	Crops generally in good condition; harvesting operations completed in some parts, progressing in others; prospects fair. Public health good; smallpox and fever continue in parts of Bangalore and Tumkur districts; cattle-disease continues in parts of Bangalore and Kolar districts. Prices fluctuating.
Mysore . . .		
Mercara . . .	. . . .	Prices of food grains slightly fallen. Prospects of season and public health good.
Berar and Hyderabad— (Jan. 20th)		
Amraoti . . .	*Nil*	Weather cloudy. *Rabi* prospects good; threshing of *jowari* in progress. Wheat 22 and *jowari* 26 seers per rupee.
Akola . . .	*Nil*	*Rabi* crops excellent; *kharif* crops being reaped and threshed.
Hyderabad . .	*Nil*	*Tabi* sowings in progress; *rabi* crops are healthy. Fever and ague still prevalent in some talukas. Prices: wheat 14½, coarse rice 12, white *jowar* 18, yellow *jowar* 25, and *tur* 16¼ seers per current sicca rupee.
Central India States— (Jan. 20th)		
Indore . . .	. . . .	Weather warmer and cloudy. Health good. Prices of grain rising slightly.
Morar (Gwalior) . .	·15	Total rainfall 31·36. Health and prospects good. Weather seasonable.
Sutna . . .	. . . .	Health and prospects good.
Neemuch . . .	. . . .	Weather clear. Opium and other crops and health good.
Goona . . .	. . . .	Health and prospects good.
Agar . . .	. . . .	Health and opium prospects good.
Sehore . . .	. . . .	Weather fair. Crops and health good.
Rajputana—(Jan. 20th)		
Abu (Jan. 20th)	·15	Health good. Weather clear and colder.
Sirohi („ 18th)	*Nil*	Weather cloudy and warm. Tanks and wells drying. Health and crop prospects good.
Marwar („ 16th)	*Nil*	Weather cloudy; cold mild. *Rabi* in good condition. Prices stationary. Smallpox still prevalent.
Kherwara („ 18th)	*Nil*	Crops in good condition. Health generally good, but pneumonia still prevalent. Prices unchanged. Weather cold and cloudy.
Partabgarh („ 17th)	*Nil*	Tanks and wells very low. Health and crops good. Weather clear and cold.
Meywar („ 18th)	*Nil*	Crops average. Health good. Prices stationary. Weather seasonable. Prospects good.
Harowti („ „)	*Nil*	Prospects and health good.
Kotah („ 16th)	*Nil*	Crops promising. General health good. Weather occasionally cloudy.
Ajmere („ 19th)	·20	Weather cloudy. *Rabi* crops good. Fever and smallpox diminishing. Prices stationary.
Jeypore („ „)	·46	Weather cloudy. Crop prospects favourable. Prices steady. Health good.
Ulwar („ „)	*Nil*	Crop prospects and health good. Weather cloudy.
Bikanir („ 16th)	Slight rain.	Smallpox in Ratangarh; health otherwise good. Prices stationary. Weather cloudy and cold.
Nepal—(Jan. 14th)		
Khatmandu . .	*Nil*	Prospects good.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

MEASURES FOR THE CONVEYANCE OF PILGRIMS BETWEEN INDIA AND THE HEDJAZ.

No. 1
21—33.

Extract from the Proceedings of the Government of India, in the Home Department (Sanitary),—under date Calcutta, the 21st January 1886.

READ—

Home Department Resolution No. 4—198-214, dated the 12th July 1882.
Ditto ditto No. 5—175-191, dated the 3rd July 1884.
Letter from Messrs. Thomas Cook and Son, dated the 10th October 1884.
Letter to Messrs. Thomas Cook and Son, No. 368, dated the 10th December 1884.
Letter to Messrs. Thomas Cook and Son, No. 312, dated the 18th October 1885.
Letter from J. M. Cook, Esquire, No. , dated the 22nd December 1885.
Letter to J. M. Cook, Esquire, No. 4, dated the 6th January 1886.

RESOLUTION.

FOR several years past the attention of the Government of India has from time to time been directed to the desirability of alleviating, so far as is possible, the discomforts and sufferings experienced by Muhammadan pilgrims during the journey from India to the Hedjaz. The existence of these sufferings, more especially in the case of those of the poorer class of Muhammadans who undertake the pilgrimage, is an admitted fact; but the action taken with a view to afford relief has been necessarily of a restricted nature owing to the unwillingness felt by the Government to undertake any direct interference with what is considered to be a religious obligation by a large section of the Muhammadan community in India. In 1880 intimation was received from Her Majesty's Secretary of State that the Turkish Government had issued orders requiring passports from all passengers and pilgrims arriving in Jeddah, whether Turkish or foreign subjects, and announcing that those who came unprovided with such documents would be liable to be repelled from the ports of the Hedjaz. In order to render these Turkish Regulations as little irksome as possible to natives of India proceeding to the Hedjaz on pilgrimage, the Government of India, after consulting Local Governments and Administrations, resolved* to establish a system under which passports should be unconditionally given to every intending pilgrim, not only at the Indian ports of embarkation but also at the central stations of every district in British India and at the head quarters of all Political Agencies in Native States. Arrangements were also made to grant informal passes to the subjects of other Governments, *e. g.*, natives of Kashgar, Russian Turkistan, Afghanistan, &c., who embark for Mecca from Indian ports, it being explained that these passes impose no responsibility on the Government of India in regard to the holders, and that the Governor General in Council could not in any way guarantee their recognition by the officials of the Turkish or any other Foreign Government. Further, in consideration of the very large number of pilgrims who annually embark at, and return to, Bombay, and to the necessity of making

* Home Department Resolution No. 4—198-214, dated 12th July 1882.

some special arrangements to meet their requirements, a Muhammadan Protector of Pilgrims was appointed at that port and instructed to supply intending pilgrims with all the information and assistance within his power in respect of every matter connected with the pilgrimage.

2. Since the above measures were undertaken, further efforts have been made by the Government of India towards the proper regulation of the India pilgrim traffic by amending the provisions of the Native Passenger Ships Act (No. VIII of 1876) in certain important respects, and by revising the rules issued under that Act with reference to the fitting, provisioning, sanitary arrangements, &c., of pilgrim ships. These rules have been assimilated, as far as possible, with those in force for regulating the transport of emigrants to the French and British colonies, and have been widely circulated in the form of a "Manual for the guidance of officers and others concerned in the Red Sea Pilgrim Traffic." It has been made obligatory on ships conveying more than 100 pilgrims to carry a qualified medical officer, and in order to promote the welfare of Indian pilgrims during their stay in the Hedjaz, an Indian Vice-Consul has been appointed at Jeddah, whose special duty it is to attend to the interests and well-being of the pilgrims. In order further to afford protection and assistance to the pilgrims, especially in connection with their detention in quarantine under the orders of the Turkish Government, a Muhammadan Vice-Consul has been temporarily appointed for Hodeida and Camaran. A dispensary has also been established at Jeddah for affording relief to Indian pilgrims in the Hedjaz. Lastly, in order to regulate and bring under proper control the transactions of pilgrim-brokers in the City of Bombay, it is proposed to introduce a Bill into the local Legislative Council under which the business will in future be restricted to licensed persons; and certain penalties will be imposed for any breach of the terms of the license. The action hitherto taken cannot fail to have effected a substantial improvement in the position of pilgrims during the voyage to Jeddah and while staying in the Hedjaz. In the course of the correspondence which has taken place with Her Majesty's Secretary of State on the subject, it was considered whether intending pilgrims should be required before proceeding on the voyage to deposit a sum of money sufficient to cover the cost of their return journey. The Government of India admitted that such a regulation would prevent much misery and suffering, but the opinion of the local authorities was opposed to interference of this nature on the ground that it might be misunderstood and misinterpreted, and the Governor General in Council accordingly decided that action of the kind was unadvisable. At the same time a public notice was issued in the English, Hindustani, and Persian languages warning persons who propose to undertake the pilgrimage of the difficulties to which they would be exposed owing to the imposition by the Turkish Government of quarantine for at least ten days at the Island of Camaran (during which period pilgrims are required to pay certain fees besides arranging for their own provisions), and impressing upon intending pilgrims the desirability of not starting unless provided with sufficient funds (at least Rs. 300) in order to meet the expenses of quarantine, of the journey from Jeddah to Mecca and back, and of the return journey to India.

3. In October 1884 a communication was received from Messrs. Thomas Cook and Son, expressing the readiness of that Firm to undertake the conveyance of pilgrims between India and Mecca. The extensive experience gained by Messrs. Cook and Son in connection with the requirements of schemes of a similar character, and the considerable degree of success which has attended their operations clearly pointed to that Firm as peculiarly qualified to assist the Government in still further regulating the conveyance of pilgrims between India

and Arabia, and in placing the arrangements on a footing more satisfactory to the Government and more convenient to the pilgrims themselves than has hitherto been found possible. Messrs. Cook and Son were accordingly informed that if they were able to make the necessary arrangements, the Governor General in Council would be prepared to give them such assistance as might be within his power. Messrs. Cook and Son have now informed the Government of India of the conditions upon which they are prepared to undertake the agency and control of the conveyance of pilgrims to and from Jeddah, and the Governor General in Council, after careful consideration and personal communication with Mr. J. M. Cook, is of opinion that those conditions are such as may be accepted. The conditions contemplate the appointment of Messrs. Thomas Cook and Son to be pilgrim agents for the whole of India, local officers and officers in charge of treasuries being instructed to assist that Firm in making known the terms of through conveyance to Jeddah and back, and in disposing of through tickets. The Bombay Government will be requested to make over to the representatives of the Firm the issue of passports in Bombay after these have been signed by the proper authorities, and to instruct the Protector of Pilgrims to work in harmony with the Firm and to render it every possible assistance. On the other hand, Messrs. Thomas Cook and Son agree to arrange with the railway administrations, steam ship proprietors, and others concerned, for the conveyance of the pilgrims, at through fares, from all the chief stations in India to Jeddah and back, and to do all in their power to secure the transit of the pilgrims in satisfactory ships supplied with proper accommodation in accordance with the regulations laid down by the Government. They are prepared to provide the requisite agency for the work, Muhammadans being appointed for this purpose in all cases where necessary, to establish a special pilgrimage office in the most convenient position at Bombay, and possibly also at Jeddah, and to make all detailed arrangements in connection with the issue of the necessary announcements, forms of tickets, &c. Lastly, the Firm has expressed its readiness to comply with the requirements and regulations which may be laid down from time to time by the Government of India precisely in the same manner as though they were in the service of the Government.

4. The Governor General in Council feels convinced that a scheme of the nature above described cannot fail, if successfully carried out, to be productive of much benefit to Indian pilgrims to the Hedjaz, but if success is to be ensured, it is essential that every assistance should be afforded to Messrs. Cook and Son, not only by Local Governments and Administrations, but also by District and other officers upon whom it will devolve to give effect to the detailed arrangements. His Excellency in Council accordingly trusts that Local Governments and Administrations will see that this is done, and will direct local officers to co-operate in every possible manner with the representatives of the Firm in carrying on their operations.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance, and to the Foreign and Financial Departments for the issue of any further orders required. Also, that it be published in the *Gazette of India* and in all local Gazettes for general information. Local Governments are requested to arrange for its translation and publication in all Vernacular Gazettes.

(True Extract.)

A. MACKENZIE,

Secretary to the Govt. of India.

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1884-85.

No. 9 T., dated Fort William, the 25th January 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Director General of Telegraphs, No. $\frac{475}{A.}$ T., dated 31st October 1885, and its enclosure, the Administration Report of the Indian Telegraph Department for the year 1884-85.

RESOLUTION.—The year 1884-85 was marked by a still greater development of the telegraph service than in the previous year. The number of Government signal offices was increased by 50 per cent., and at the close of the year stood at 521; and the total number of signal offices, including Railway and other licensed offices, was increased from 1,731 to 2,035. The length of telegraph lines was increased by 2,046 miles to 25,387 miles, and the length of wires by 6,279 miles of wires and 7 of cables to 75,115 miles of wire and cable.

2. The expenditure on Capital account amounted during the year to Rs. 34,60,360, and at the close of the year the total of the Capital account of the Department stood at Rs. 3,53,79,918.

3. Among many important extensions and additions carried out during the year, the line connecting Burma with Siam was successfully completed under circumstances of great difficulty, and has since been satisfactorily worked. A new cable was laid by the Indo-European Telegraph Department between India and Ceylon, and the old cable was successfully repaired.

4. A considerable amount of damage was done by storms to the lines in several provinces, but in all cases the damage was promptly repaired. In one instance—in Arakan—communication was restored over a length of 141 miles, which had been wrecked by a cyclone, in five days under circumstances of exceptional difficulty.

5. The gross revenue for the year amounted to Rs. 47,27,143, and the working expenses to Rs. 35,59,225, leaving a surplus of Rs. 11,67,918, which yields 3·3 per cent. on the total Capital expenditure to the close of the year under review.

6. The following table gives the progress of the Department for the last five years :—

	Miles to end of year		Offices.		Revenue, gross.	Working expenses.	Revenue, net.	Percentage of profit on Capital expenditure.
	Lines.	Wires.	Government	Licensed.				
					Rs.	Rs.	Rs.	
1880-81 . .	20,346·17	56,087·66	310	...	45,01,637	31,71,470	13,30,167	5·1
1881-82 . .	21,019·6	59,569·36	319	...	38,54,212	32,35,644	6,18,568	2·3
1882-83 . .	21,740·	62,960·	324	...	41,57,239	33,39,442	8,17,797	2·7
1883-84 . .	23,207·	68,669·	349	...	41,24,264	37,44,185	3,80,078	1·1
1884-85 . .	25,253·8	74,916·8	521	...	47,27,143	35,59,225	11,67,918	3·3

7. The gross revenue of the year is the largest that has ever been earned by the Department, and so far from a corresponding rise having occurred in the working expenses, a reduction, amounting to Rs. 1,84,961, has been effected in the revenue expenditure. The large extensions of lines and wires that have been made, have already been followed by a still greater proportional increase in the traffic; the latter having increased 10·4 per cent., against an increase of 8·81 per cent. in length of lines, and 9·14 per cent. in length of wires. The details of the administration are summarised in the general review which commences the report in a clear and lucid style, showing that, while the business of the Department has been largely increased, and carried on at reduced cost, the efficiency of the service has been increased in every respect. The number of complaints has diminished, the speed of transmission has been maintained on the route between Bombay and Karachi, and has been improved on all the other main lines, and the interruptions to communication decreased, as compared with those which occurred in the previous year.

8. The arrangements for the utilisation of the agency of the Postal Department in extending the telegraph service have been carried on during the year with great vigour and judgment. Of the 521 Government signal offices, no less than 267 are now worked by postal agency, of which 212 were opened during the year; and 25,650 telegraph messages were tendered at Post offices for transmission to the nearest signal office.

9. The steady growth of the use of the deferred system for private messages is satisfactory, and the fact that during the last three years the Inland private messages have increased 30 per cent. in number and 14 per cent. in value, is a fair indication of the success of the policy pursued in meeting the requirements of the public.

10. The report itself is no less satisfactory than its subject-matter; it is a model of what an Administration Report should be. The main features are brought out clearly and concisely in the general review, each clause of which has marginal references to the body of the Report for further detail; and nothing is introduced that is not necessary for a clear comprehension of the operations.

11. The Governor General in Council warmly congratulates the Director General, Mr. Cappel, on the marked success of his administration of the Department, and on the very able manner in which he has given effect to the

policy of the Government in extending the benefits of telegraphic communication to all classes of the community without unduly burdening the finances.

The excellent services rendered by the Department, as a whole, are deserving of the highest praise. His Excellency in Council has noticed with pleasure the high testimony borne by the Director General to the services rendered by Mr. W. R. Brooke, the Director of the Construction Branch; Mr. Brooke has long been known to the Government of India as an officer of exceptional merit. The Government of India also especially desires to commend the signalling staff, whose skill and perseverance have largely contributed towards the high state of efficiency of the traffic service.

12. The Governor General in Council cannot conclude his review of this record of excellent work performed without touching on a question which most nearly concerns the officers who have labored thus successfully. His Excellency is aware that many officers in the Department have had their prospects seriously marred under the present organisation, and it would have afforded him great gratification if the present opportunity could have been taken for announcing that the remedial measures which have been under consideration for some time had been finally decided on. His Excellency trusts the decision will not be much longer delayed.

ORDER.—Ordered, that a copy of this Resolution and of the Report be forwarded to the Secretary of State, and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon and the Commissioner in Sind.

Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, British Burma, and Assam.
The Resident, Hyderabad, Central India, Rajputana, and Beluchistan.

Also, to the Foreign Department, for communication to the Resident at Mysore and Coorg.

Also, that a copy of this Resolution be forwarded to the Director General of Telegraphs, for information and guidance.

Also, that a copy of this Resolution and of the Report and Appendices A, B and F be forwarded to the Home Department of the Government of India, for information, and be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Govt. of India.

ADMINISTRATION REPORT

OF THE

INDIAN TELEGRAPH DEPARTMENT

FOR

1884-85.

I.—GENERAL REVIEW OF THE OPERATIONS OF THE TELEGRAPH DEPARTMENT.

The work of the Department during the past year has been exceptionally heavy and the increase of business generally satisfactory.

Appendix B. Para. 36. Paras. 81—89.

2. Nearly 200,000 more messages were transmitted than during the year 1883-84; and it is a satisfactory feature of this increase that more than two-thirds of the number were inland private messages—an encouraging fact in connection with the efforts that are being made to afford increased facilities to the people of the country by extending the system, and establishing numerous new offices at Post Offices in town centres.

Para. 39.

3. **New Telegraph Offices.**—At the close of the year, 172 new offices had been provided, being an increase in number of nearly 50 per cent. as compared with the number available to the public on the 31st March 1884.

Paras. 37—41.

Although the additional business created by the establishment of these offices is still far from its full development, the results already secured are highly encouraging, and amply justify the policy of extension to which the Government has given its approval.

Para. 40.

The following offices were open for the transmission of public messages:—

	On 31st March 1884.	On 31st March 1885.	Increase.
Departmental and combined	349	521	172
Railway and other licensed offices	1,382	1,514	132
	1,731	2,035	304

Appendix B. Paras. 31—34.

4. **Message Revenue.**—The revenue from paid messages was R34,98,027, representing an increase of 8·63 per cent. over the receipts from the same source during 1883-84.

Paras. 21—26.

5. **Message Traffic.**—The numerical increase during the same period was 10·54 per cent., and the difference is explained to a small extent by a slight falling-off in the value of foreign private messages, but mainly by the growing appreciation by the public of the advantages of the system of deferred messages at a low tariff. This testimony to the excellence of the service, while gratifying from one point of view, is also an argument in favour of the extensions to which allusion has already been made, as a large increase in the number of messages is the only means by which a reduction in revenue can be avoided. Of the total

Para. 30.

Paras. 127—130.

number of inland private messages despatched during the year, 45·74 per cent. were paid for at the cheap "deferred" rate, as against 39·63, the percentage of deferred messages on the traffic of 1883-84. Messages classed as "Ordinary" show a corresponding decrease, while the proportion of "Urgent" messages remains practically unchanged. There was a very slight increase in the number of so-called "Local messages," but "Press messages," after remaining stationary for some years, at last showed sign of a promising increase, their value having risen from R37,291 in 1883-84 to R49,347 in 1884-85.

Para. 47.

The importance that is attached to the growth of inland traffic will be appreciated from the following figures which show that the receipts from private inland messages, instead of forming the bulk of the revenue, are much less than half of the total earnings from messages, and not nearly a third of the total departmental revenue—

	R	a.	p.
Total Revenue	47,27,143	0	0
Message Revenue	34,98,027	4	0
Revenue from private inland messages	15,04,632	13	0

Paras. 33, 95, 96, 97, 99, 100, 105, 106.

6. **Traffic Improvements.**—Although the labour of providing the extensions above referred to has been considerable, it has not been allowed to interfere with the continued improvement of communication on the main and international lines. Many valuable measures in this direction have been introduced during the year, which have led to increased speed and greater accuracy in the transmission of messages, resulting in an actual reduction of public complaints in spite of a very large increase of business.

Paras. 42—44.

Paras. 53—60.

7. **Extensions of Lines.**—Works of construction were carried out almost uninterruptedly, and far exceeded those of any previous year. They included the addition of 2,046 miles of posts, 6,279 of wire and 7 miles of cables, and extensive reconstructions of some of the older existing lines. At the close of the year the system consisted of 25,387 miles of posts, and 75,115 miles of wire and cables.

Paras. 61—70.

8. **Up-keep of Lines.**—These extensive new works were not allowed to interfere with the ordinary maintenance operations, and the high state of efficiency in this respect which has now been reached may be judged from the fact that, notwithstanding the great expansion of the system, the actual number of interruptions to communication was less than during the previous year.

Paras. 40, 46, 54, 55, 59, 60, 67, 68, 69.

9. **Railway Telegraphs.**—Of the 6,279 miles added during the year, 2,339 miles were supplied to railways and other licensed systems, and 158 additional Railway Telegraph offices were furnished with electrical apparatus and fittings. At the close of the year, 26,447 miles of wire and cables were maintained for railway purposes, and 557 for canal telegraphs, and 1,169 licensed offices were kept up and supervised.

Paras. 71, 72.

10. **Indo-Siam Line.**—The completion of the line connecting British Burma with Siam is a matter of congratulation. It would be difficult to exaggerate the difficulties encountered from the unhealthiness and physical obstructions of the country and the absence of population, and the successful manner in which they were surmounted reflects great credit on all engaged on the work.

Paras. 73—75.

11. **Indo-Ceylon Cable.**—The new cable connecting Ceylon to India, referred to in paragraph 55 of the Administration Report for 1883-84, was laid in March last, and the old cable at the same time successfully repaired.

Paras. 90—94

12. **Telephones.**—There has been some progress in telephone exchange and private line business, but the total revenue from this source is still small, *viz.*, R1,90,703, of which R1,37,490 represents the earnings of private companies.

Paras. 14—18.

13. **Finance.**—The financial outcome of the year's operations was particularly gratifying. The revenue receipts amounted to R47,27,143 and the working expenses to R35,59,225, giving a surplus of R11,67,918, representing interest at the rate of 3·3 per cent. on the total capital outlay up to the last day of the year.

During the previous year the receipts were R41,24,264 and the expenses R37,44,186, so that combined with increased receipts amounting to R6,02,879 there has been a reduction in expenditure of R1,84,961.

II.—REVENUE AND EXPENDITURE.

14. The capital expenditure of the year amounted to R34,60,360 made up as follows:—

	R
Lines and Buildings	28,63,673
Tools and Plant	1,28,991
Workshop. Buildings	19,699
Workshop. Machinery and Plant	14,435
Workshop. Materials	34,988
Store-houses	24,511
Stores	1,90,671
Charge for Exchange on payments in England	2,03,664
Suspense Heads	49,704
TOTAL	34,60,360

15. The capital expenditure of the Department on the 31st March 1884 amounted to R3,19,19,558, and on the 31st March 1885 to R3,53,79,918.

16. The following is an abstract Revenue Account for the year 1884-85, compared with that for 1883-84:—

RECEIPTS.	1883-84. R	1884-85. R	EXPENDITURE.	1883-84. R	1884-85. R
Message Revenue earned*	32,11,370	34,94,489	Repairs of lines	5,09,261	3,45,639
Receipt from State Railways for interest	5,89,813	6,13,444	Direction	1,50,480	1,30,562
Maintenance, &c., of their lines and offices			Accounts	45,000	40,716
Receipts from Guaranteed Railways for ditto	96,987	3,47,144	Superintendence	6,88,470	6,68,623
Claims against guarantors	1,50,730	1,17,441	Line maintenance	2,00,550	2,10,241
Sale of books, Gazettes, &c.	17,532	17,490	Check Office	46,319	55,368
Miscellaneous	35,037	1,07,786	*Signal Offices.*		
News-free and other *pro-formâ* message Revenue	22,195	29,349	Departmental	19,29,512	19,52,446
			Non-departmental	1,21,850	1,15,550
			Minor undertakings	12,077	9,598
			Telegraph Stamps	3,082	1,702
			Other items	27,919	19,789
			TOTAL	37,44,186	35,50,225
			Profits	3,80,078	11,07,918
TOTAL	41,24,264	47,27,143	TOTAL	41,24,264	47,27,143

17. It will be seen that while the revenue receipts were greater by R6,02,879, the expenditure was less by R1,84,961, making a net improvement of R7,87,840.

Of the increased receipts R2,83,119 were due to message traffic. The increased Revenue from Guaranteed Railways is partly due to arrears of rent paid during the year.

18. The working profit represents a percentage of 3·6 on the capital expenditure at the commencement of the year and on the whole capital expended up to the close of the year a percentage of 3·3.

III.—TRAFFIC.

19. A detailed return of the number and value of Inland and Foreign messages, further sub-divided into the sub-heads of State and Private, disposed of during the year, division by division, and for the whole Department, will be found in Appendix B.

* Excluding message revenue earned by provincial telegraphs.

20. The percentage of traffic under each such head and sub-head was as follows:—

CLASS.	INLAND. No.	INLAND. Value.	FOREIGN. No.	FOREIGN. Value.	TOTAL. No.	TOTAL. Value.
State	14·22	18·98	0·30	1·50	14·52	20·48
Private	67·63	43·01	17·85	36·51	85·48	79·52
TOTAL	81·85	61·99	18·15	38·01	100·00	100·00

21. In Appendix B is also given the actual increase or decrease in the traffic of 1884-85, as compared with the corresponding figures for the preceding year, in each division and for the whole Department; a summary of these figures is given below:—

CLASS OF MESSAGES.	ACTUAL. INCREASE. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.	ACTUAL. DECREASE. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.
		R a.		R a.		R a.		R a.		R a.		R a.
State	60,126	1,02,415 14	1,170	15,368 7	61,296	2,07,784 5	...	...	...	...	...	...
Private	128,674	88,878 9	2,613	...	131,287	70,174 11	...	...	...	18,703 14	...	...
				Net	192,583	2,77,959 0				Net	...	...

22. While the main increase comes under the head of State messages, both Inland and Foreign, there is also healthy growth of Private Inland traffic, whereas in Private Foreign messages the enhanced number is accompanied by a decline in value.

23. A clear idea of the incidence of the above figures may be gathered from the following statement, in which the same results are given in form of percentages:—

CLASS OF MESSAGES.	PERCENTAGE. INCREASE. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.	DECREASE. Inland. No.	Inland. Amount.	Foreign. No.	Foreign. Amount.	Net. No.	Net. Amount.
State	26·50	40·83	23·79	41·39	26·44	40·87	...	...	...	...	...	...
Private	10·40	6·27	0·73	...	8·23	2·58	...	...	...	1·44	...	...
				Net	10·54	8·63				Net	...	...

24. It will be observed that the respective increases in Inland and Foreign State messages are approximately equal. This increase is due to the despatch of an Indian contingent to Egypt and to military preparations and correspondence in connection with the Rawal Pindi Durbar towards the close of the year.

25. An increase in the number of Inland Private messages was to be expected from the numerous extensions of lines and additional offices opened during the year. The greater increase in number than in value is due to the extended use of the 'deferred' system, while the slight decline in value of Foreign Private messages, notwithstanding an increase in number, is probably attributable, partly to slackness of trade, which tends to the curtailment of the length of messages and consequent reduction of expense; and partly to the use of improved codes, which also reduces the length of telegrams.

26. The total number and value of paid messages, dealt with during the last two years, is given below:—

Year.	State.		Private.		Total.	
	No.	Value.	No.	Value.	No.	Value.
		R a		R a		R a.
1883-84	231,758	5,08,357 2	1,593,756	27,11,711 2	1,825,514	32,20,068 4
1884-85	293,054	7,16,141 7	1,725,043	27,81 885 13	2,018,097	34,98,027 4

Inland Traffic.

27. Numerically Inland messages comprise about four-fifths of the whole traffic of the Department.

28. The following table sub-divides the messages under their several classes of Urgent Ordinary, Deferred, and Local, under the sub-heads of State, Private and Press: it also shews the mean cost to the sender of a State, Private and Press message:—

Year.	Class.	Urgent.		Ordinary.		Deferred.		Local.		Total.		Average cost per message.
		No.	Value.	No.	Value.	No.	Value.	No.	Value.	No.	Value.	
			R		R		R		R		R	
1884-85	State	75,650	3,68,803	35,861	39,115	171,128	2,53,140	4,327	2,561	286,969	6,63,649	2·31
	Private	86,519	2,25,273	618,336	7,80,820	638,389	4,44,503	8,574	2,908	1,351,818	14,53,513	1·07
	Press	888	8,686	5,617	21,814	6,491	18,817	...	...	12,996	49,347	3·79
	Total	163,057	6,02,762	659,814	8,41,818	816,008	7,16,460	12,901	5,469	1,651,780	21,66,509	1·31
Percentage of Traffic,	State	26·36	55·57	12·50	5·90	59·63	38·14	1·51	0·39	100·00	100·00	...
	Private	6·40	15·50	45·74	53·72	47·22	30·58	0·64	0·20	100·00	100·00	...
	Press	6·83	17·60	43·22	41·27	49·95	38·13	...	...	100·00	100·00	...
	Total	9·87	27·82	39·94	38·85	49·41	33·08	0·78	0·25	100·00	100·00	...

29. The variation from year to year in the numerical proportions of Urgent, Ordinary, Deferred and Local messages, since the adoption of the present tariff has been as follows:—

	1881-82. (3 months.)	1882-83.	1883-84.	1884-85.
State.				
Local	0·65	1·04	1·46	1·51
Deferred	62·70	56·06	57·49	59·63
Ordinary	7·12	11·10	14·46	12·50
Urgent	29·53	31·80	26·59	26·36

30. The only point calling for remark is the increased use made of the deferred system for private messages year by year. At present nearly half the Inland Private traffic is sent as deferred.

31. From the summary given below, which shows the growth of State and Private Inland Traffic since 1881-82, it will be seen that during the last three years Inland Private messages have increased 39 per cent. in number and 14 per cent. in value, while the increase in Inland State messages has been 1 per cent. with a decrease in value of 5 per cent., results which sufficiently indicate the value of tariff reductions.

Year.	State.						Private.						Total Paid Messages.		
	Number.	Value.	Percentage of number compared with previous year.		Percentage of value compared with previous year.		Number.	Value.	Percentage of number compared with previous year.		Percentage of value compared with previous year.		Number.	Value.	Percentage of value compared with previous year.

Foreign Traffic.

32. The following table gives for Foreign Traffic, the figures corresponding to those shown in the preceding paragraph for Inland Traffic. The cause of the increase in State messages, and of the slightly decreased value of Private messages, has already been explained in paragraphs 24 and 25. The revenue from Foreign messages cannot, however, be regarded as otherwise than gratifying. It has increased more than 11 per cent. in 3 years, and in 1884-85 amounted to ₹13,29,746.

YEAR.	STATE.				PRIVATE.				TOTAL.

33. Constant attention has been given during the year to the consideration of the best means to secure the accurate transmission of the international traffic which is made up almost entirely of extremely difficult code messages. The measures adopted have proved successful, and a marked improvement is already observable.

34. Appendix C gives in detail the percentage of traffic passing by the Suez, Teheran and Turkish routes to and from India since 1871-72. The comparative results for the last 5 years are as follows :—

Route.		1880-81.	1881-82.	1882-83.	1883-84.	1884-85.
Red Sea	*viâ* Suez.	74·44	66·91	50·79	·88	55·09

	,, Turkey	2·04	1·47	2·01	1·68	1·46
	Persian Gulf *viâ* Karachi					·74
	TOTAL	100·00	100·00	100·00	100·00	100·00

Principal events during the year affecting the International System of Telegraphs.

35. During the year under review the following were the principal events affecting the International System of Telegraphs :—

In May 1884, a new cable was laid from Bilbao to Kenmark Cove (Cornwall).

In September 1884, China and Cochin China were directly connected by a new cable from Haiphong to Hongkong.

Extensions to the land lines in China were made during the year and offices opened at the following places :—

Wuhu.	Woochow.
Nganking.	Chinchow.
Kuikiang.	Lingchow.
Nauning.	Hweichow.
Hankow.	Pekin.
	Swato.

A cable was laid down from Hongkong to Macao.

The Asiatic Russian lines were extended during the year from Krasnovodsk to Tschikislar, from Samarkand to Bokhara.

In December 1884, Perim was connected by one of the Eastern Company's cables with Aden and Suakim.

A second cable was laid between St. Vincent and Pernambuco in August 1884, and the telegraph land line in Ecuador was extended to Quito.

A new connection was made by cable between St. Vincent and Santiago, as also between the Canary Islands and Senegal in December 1884.

Two new cables were laid between Great Britain and the United States in December 1884, resulting in a decrease of the tariff from two shillings to one shilling and eight pence per word.

The cable of the Eastern Extension Telegraph Company was interrupted from the 13th June to the 16th July, during which time traffic was diverted by the Indian lines to Elephant Point and thence by cable to Penang.

The cable connecting India with Ceylon failed on the 9th January and continued interrupted to the end of the year: a new cable was, however, being constructed at the time as it was known that the old cable was in a bad state; this new cable has since been laid and the old cable repaired.

The Persian Gulf cables connecting Karachi with Bushire and Fao were interrupted from the 3rd to the 9th of January 1885, and the land line

between Bushire and Teheran was interrupted from the 21st to the 29th of the same month and on the 20th and 21st February 1885.

The cable between Perim and Suakim was interrupted from the 28th January to the 26th March, and that from Zanzibar to Mozambique from 1st to 25th February 1885.

Among other interruptions of cables more or less affecting Indian traffic were the following:—

Haiphong-Hongkong, 30th September to 14th October 1884.

St. Jacques (Cochin China) Hongkong, 30th September to 3rd November 1885.

Victoria-Tasmania, 30th July to 29th September 1884.

French Atlantic cables, 19th January to 28th February 1885 and from 12th March to the end of the year. Direct Atlantic cable, 28th January to 18th February 1885.

36. Diagrams A and B give the number and value respectively of Inland and Foreign paid messages as far back as this record is available.

37. Appendix D is a classified abstract of Signal Offices grouped according to the amount of traffic originating at each; year by year; since 1874-75.

38. Appendix E shews the number of Signal Offices in each Division open at the end of 1884-85.

39. Appendix M is a list, arranged by Provinces, of Departmental Offices opened during the year, *viz.*:—

Assam	5
Bengal	44
Bombay	9
British Burma	11
Central India	3
Central Provinces and Berar	10
Madras	20
North-Western Provinces and Oudh	33
Punjab	41
Rajputana	1
Sind and Baluchistan	8
TOTAL	185
The number closed* (permanently or temporarily) was	13
Leaving a net increase of	172

or nearly 50 per centum. These offices were worked as shown below:—

By the Post Office	267
„ Clerks	2
„ Light-house keeper	1
„ Soldiers	33
Total worked by extra departmental agency	303
„ „ purely departmental agency	218
TOTAL	521

40. The number of Railway and other licensed Telegraph Offices was increased during the year by 132, raising the number from 1,382 to 1,514; the total number of offices open to the public being 2,035, as compared with 1,731 at the close of the previous year.

* For particulars, see Appendix N.

41. Appendix I_a is a classified abstract of all the Telegraph offices maintained by this Department.

Complaints.

42. Appendix F contains particulars of all complaints, in respect of telegrams, made to this Department during the year; those concerning this Administration being separately shewn from those in which other Telegraph systems were in fault. In the former category 621 complaints were received, out of which 189 were rejected as groundless, or as not being submitted with the particulars necessary to admit of their being investigated. The gross number of complaints amounts to 0·28 per 1,000 messages, or one message in every 3,570, against 0·40 per 1,000 or 1 in 2,500 for the previous year. In the latter category, in which other Administrations proved to be in fault in respect of messages jointly transmitted over their systems and that of this Department, the complaints received amounted to 508, of which 149 were rejected, while 69 were either barred by the International Regulations or still under enquiry at the close of the year.

43. The above results may be considered satisfactory as the proportion of complaints chargeable to this Department having decreased under the heads Non-delivery, Delays and Errors; whereas in respect of the complaints caused by other Administrations there is an increase under each of these heads.

Speed of Transmission.

44. The following table* shews the average time occupied in the transmission of messages over the several main routes. A very satisfactory improvement is recorded on every line without exception:—

	1880-81.		1881-82.		1882-83.		1883-84.		1884-85.	
	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.
Calcutta to Kurrachee	1	22	0	55	1	24	1	2	0	57
Kurrachee to Calcutta	0	59	0	41	1	3	0	36	0	35
Calcutta to Bombay	1	6	1	1	1	21	1	6	0	47
Bombay to Calcutta	1	1	1	3	1	0	1	10	0	48
Calcutta to Madras	1	14	1	9	1	16	1	7	1	1
Madras to Calcutta	1	15	1	13	1	18	1	4	0	59

Bombay to Madras	0	45	0	44	1	0	0	38	0	28
Bombay to Kurrachee	0	53	0	45	1	6	0	35	0	35
Kurrachee to Bombay	0	48	0	40	0	51	0	30	0	24
Rangoon to Calcutta	2	9	1	23	1	27	2	50	2	10

News-free Messages.

45. The number of news messages transmitted by the Department for public information, free of charge, during the year under review, and for the preceding year, was as follows:—

	No.
1883-84	784
1884-85	681

Traffic with Licensed Telegraphs.

46. The number of messages jointly transmitted over the Department and licensed systems during the past two years was as follows:—

1883-84	284,575
1884-85	317,591

* See also diagram C.

Press Messages.

47. As will be seen from the following statement of the number and value of Press messages sent during the last four years there has, during the year under review, been a respectable increase in this class of traffic. A detailed monthly return will be found in Appendix H :—

	No.	Value. R
1881-82	7,941	40,975
1882-83	10,832	40,553
1883-84	10,750	39,593
1884-85	13,873	53,285

Undelivered Messages.

48. A comparative statement for the past two years of the number of messages, which for the reasons shown could not be delivered, is given below. The percentage of undelivered messages is slightly lower than during the preceding year. It will be observed that the causes of non-delivery were, in almost all cases, beyond the control of this Department :—

Cause of non-delivery.	1883-84.		1884-85.	
	No.	Percentage.	No.	Percentage.
1. Not found; address insufficient	1,557	·072	1,685	·070
2. Not found at address given	2,235	·104	2,529	·105
3. Address changed in transmission	54	·002	23	·001
4. Left station; new address not known	417	·020	469	·019
5. Left India	129	·006	127	·005
6. Left for original station	1,177	·058	1,267	·053
7. Returned by Dead Letter Office	1,342	·062	1,290	·054
8. Addressee or address given unknown	222	·010	234	·009
9. Refused	122	·002	152	·006
10. Other reasons	283	·014	249	·014
TOTAL	7,538	0·350	8,025	0·336

Signalling Establishment.

49. At the close of the year there were 1,188 departmental Telegraph masters and signallers and 165 military signallers on the strength of the establishment; and in addition two clerks and two temporary non-departmental signallers in civil offices, 304 postal clerks, and one light-house keeper were also employed in conducting Telegraph duties.

50. The number of soldiers trained in telegraphy during the year was 102, and 76 were under instructions at the close of the year.

Pensioned	2
Struck off strength of Department	9
Dismissed	8
Resigned	15
Died	16
Transferred to other Departments	1
Deserted	4
TOTAL	55

51. The number of casualties among the departmental signalling staff during the year has been 55, a percentage of 4·62 due to the causes marginally noted.

52. The list of efficient volunteers in the Telegraph Department at the close of 1884-85 showed an effective strength of 311, a high and gratifying percentage of the total strength of the signalling staff.

V.—EXTENSIONS OF LINES, AND LINE MAINTENANCE.

53. In Appendix I, will be found a classified statement of the lines, wires and cables maintained by the Telegraph Department at the close of the year.

The following figures show the total mileages maintained on the 31st March 1885, compared with those on the same date in 1884 :—

	Line.	Wire.	Cable.
1884-85	25,387	74,973	142
1883-84	23,341	68,694	135

The additions to the Telegraph system during 1884-85* were therefore—

2,046 miles of line.
6,279 „ wire.
7 „ cable.

54. The miles of wire and cable maintained by the Department are for the following respective purposes :—

	Miles of wire.	Miles of cable.
Imperial Lines	47,055	133
Provincial Lines	168	...
Native States	67	...
Railway Systems	26,440	7
Canal Systems	557	...
Private Lines	686	2
TOTAL	74,973	142

55. Appendix J gives the particulars of lines and wires maintained for each railway and canal system.

56. The construction works carried out during 1884-85 were far greater than during any previous year. Of the 4,026 miles added for Departmental use, 834 miles were in connection with extensions to combined offices. Of these extensions the following are the lengthiest :—

	Miles.
In Bengal.	
From Calcutta through Jessore to Khoolna as a part of the extension to Burisal	113
From Raneegunj to Soornamooki through Bankura and Bishenpur	72
From Goalundo to Furreedpore	27
In Madras.	
From Madura to Ramnad *vid* Peramagudy	72
From Trichinopoly to Pudukota	33
From Vizagapatam to Anakapalee	22
In the North-Western Provinces.	
From Bareilly to Tilhur, Shahjehanpore City, and Cantonment	48
In the Punjab.	
From Montgomery to Pak Pattan	30
From Chichawatnee, through Jhang, to Kamalia	46
From Rohtuk, through Bheri to Jhuggur	24
From Meerut to Shamli, *vid* Kuttowlie and Mozuffernugger	60
From Delhi to Bagput	24

* During 1883-84 the additions were—
1,417 miles of line.
5,512 „ „ wire.
5 „ „ cable.

In the Central Provinces.

From Akola to Akote	28
From Amraoti, through Ellichpore, to Chikulda	52

In Central India.

From Dhar to Sirdarpore	26
From Shajapore to Agar	28

In Orissa.

From Bhuldruck to Chandballi	34

57. To provide for increased public traffic, extra wires were added in many instances to existing lines, the more important additions being as follows:—

	Miles.
From Chittagong to Akyab	203*
From Calcutta to Raneegunj	108
From Bombay to Poona	119
From Bombay to Bhosawal	477
From Rangoon to Preme	161
From Bezvada to Rajahmundry	93
From Cuttack to Berhampore	116
From Madras to Tanjore	217
From Tuticorin to Tinnevelly	36
Along the Malabar Coast for	288
From Naini Tal to Bareilly	81
From Lucknow to Cawnpore	45

58. The reconstruction of the coast line from Raneegunj through Vizagapatam to Madras, *i.e.*, the direct line from Calcutta to Madras, was in active progress during the year and was completed shortly after its close.

One hundred and two miles of the main line from Lahore to Umballa were also reconstructed.

Very large re-insulation works were carried out during the year with the object of removing from the lines the imperfect form of insulator used in former years, which is now rapidly deteriorating. Eighty-eight thousand and one hundred insulators were issued for special works of this nature, exclusive of the issues for ordinary maintenance repairs.

59. The principal works carried out for Railways may be briefly summarised as follows:—

The East Indian Railway Company's line from Doomraon to Mogulserai, 74 miles, was reconstructed, and the re-insulation of the wires of this system was continued. Between Mogulserai and Nynee, 91 miles, a wire was moved from the East Indian Railway Company's line to the Government line with the object of decreasing the load on the former which is in a doubtful condition.

For the Oudh and Rohilkhund Railway Company a line was made from Hurdwar to Lhaksar, 17 miles.

Along the South Indian Railway a line with two wires was made from Hospett to near Dharwar, about 102 miles in length.

A line, 50 miles long, with two wires was supplied to the Fazilka Branch of the Rajputana-Malwa State Railway and an additional wire from Rewari to Ferozepore, 246 miles.

The Eastern Bengal State Railway line was to a great extent reconstructed, and extra wires were added from Sealdah to Poradah, 103, and from Sealdah to Naihati, 26 miles in all.

A permanent line, 180 miles long, was made along the Jhansi-Manickpore State Railway.

* This includes the erection of a new line for 73 miles on the southern portion to provide a route more sheltered from the sea and on which the rivers are crossed by spans instead of by cables.

For the Nagpur-Bengal State Railway a wire was supplied from Nandgaon to Raipur, 43 miles, and this line was extended as far as Bilaspur, 75 miles. Work was also commenced at the north-east end.

Lines were also made for the Cawnpore-Kalpi State Railway, 46 miles, and the Katni-Umaria section of the Bilaspur-Etawah State Railway.

The reconstruction of the line along the Northern Bengal State Railway between Sara and Julpigoree, 174 miles, was carried out.

The construction of a line along the Assam-Behar State Railway was commenced.

For the Tirhoot State Railway a line, 13 miles long, with two wires was supplied on the Jhanjharpur-Kosi extension.

In Assam, the construction of the lines for the Kokilamukh State Railway was finished.

A line, 16 miles long, with two wires was made for railway purposes in the Native State of Patiala.

60. In connection with canals the chief work was the completion of the reconstruction of the line along the Kurnool-Cuddapah Canal, 185 miles, and the supply of an additional wire for canal purposes.

Interruptions.

61. *Departmental Lines.*—The interruptions to communication on departmental lines show a slight decrease, notwithstanding the large increase in the mileage of wire maintained.

62. Exclusive of contacts, imperfect communications and interruptions, the causes of which were not discovered, and those which occurred in offices owing to damage to instruments, the number of interruptions was 469 in 1884-85 against 473 in the previous year, which, compared with the mileage of wire, gives a result of ·0099 per mile in 1884-85 against ·01093 in 1883-84.

63. The number of contacts increased from 450 in 1883-84 to 482 in 1884-85. But it must be remembered that as wires on the same set of supports are increased, not only are the probabilities of contact also increased, but, in the event of accident, the numbers in contact are multiplied. The number of contacts has not, however, increased in proportion to the increase in the number of wires, as 1884-85 shows ·0101 per mile of wire against ·0104 in 1883-84.

64. The principal causes of interruptions during the year have been as follows:—

	No. of interruptions.
By Storms	98
„ Wire breaking	93
„ Trees and branches	62
„ Insulators breaking	45
„ Posts breaking	30
„ Fires	21
„ Floods	20

65. One interruption was caused by the destruction of a portion of the line in the Madras Division by an elephant, whilst another occurred at Saugor through concussion caused by artillery practice under the line.

66. In Appendix K will be found details of all the interruptions, contacts, &c., which have occurred during the year in each division. The following is a list of the principal interruptions on departmental lines.

Arakan Division.—The cyclone of May 1884 destroyed 12 continuous miles of line, including 5 masts supporting wires across rivers, besides 504 standards being blown down and many of them broken. Four cable houses were wrecked and between Akyab and Moungdoo a portion of the line was struck by a storm wave. Briefly, the wires were on the ground for a distance of 141 miles. To

the credit of the Staff, communication on one wire was restored in 5 days throughout the interrupted section of 141 miles. The difficulties of the situation were increased by the impossibility of procuring labor on the spot; so much so that it was necessary to send a special working party from Calcutta to aid in the work of restoring communication.

Assam Division.—On the 23rd April 1884 during a severe storm the Teesta span was carried away.

Baluchistan Sub-Division.—In May 1884 on two occasions the line was wilfully damaged. The heavy floods and severe storms during this month also did considerable damage.

Bengal Division.—In May 1884 a portion of the line near Ranigunj was destroyed during a storm.

British Burma.—In August 1884, 7 miles of line were under water due to heavy floods.

Dacca Division.—In April 1884 a large derrick, used by the Northern Bengal State Railway, was blown down on the line during a storm. Towards the end of the month, a considerable portion of the line was destroyed by fire during the inflagration of the Sara Bazaar, both wires and standards being fused by the heat. A severe storm also did considerable damage to the line on the 22nd and 23rd April.

Ganjam Division.—The chief causes of interruptions in this division were due to damage done to the lines of telegraph by storms and floods principally between April and July and by a cyclone in November 1884.

Madras Division.—In December 1884 a cyclone and heavy floods destroyed a considerable portion of the lines which run along the South Indian Railway, and, notwithstanding the strenuous exertions of the staff, it was impossible to restore communication for some days owing to large tracts of the country being under water. The gravity of the catastrophe may be judged by the fact that the South Indian Railway was breached in at least 30 places and a large bridge washed away. The water rose above the tops of the posts for several miles, and a part of the roof of the office at Pamban was blown off.

Nagpore Division.—The floods in July 1884 carried away two railway bridges, and with them the Telegraph line.

Oudh and Rohilkhand Division.—Floods have been the chief cause of the interruption to communication in this division.

Punjab Division.—The storms of July 1884 did considerable damage to the lines. In January a heavy and protracted fall of snow broke a long span near Dalhousie, and on five occasions during the year considerable portions of wire between Peshawar and Jamrud were cut out of the line and stolen.

Rajputana Division.—In December 1884 and July 1885 several interruptions were caused maliciously between Jeypur and Ajmere on opium sale days. In order to prevent a recurrence of such wilful mischief for fraudulent purposes, these lines are now specially patrolled during opium sales.

67. *Lines of Licensed Systems.*—The interruptions on Licensed lines maintained by the Telegraph Department increased in actual number, but decreased in proportion to the wire mileage. Including contacts there were 647 interruptions to communication during 1884-85 against 600 during the previous year, but the proportion was ·0239 per mile of wire in 1884-85 against ·0247 in 1883-84.

68. The number of faults in offices due to defects in batteries and instruments decreased from 103 in 1883-84 to 91 in 1884-85, and in proportion to ·977 per office in 1884-85 against ·101 per office in 1883-84.

69. In Appendix L will be found an abstract of all the interruptions which have occurred on the lines of Licensed Systems during the year.

70. In order to compare the maintenance of the Indian Government lines with those of European countries, the following table has been prepared from statistics for 1883-84 published by the International Bureau at Berne :—

	Number of interruptions per 100 kilometres of wire.
India (including Licensed lines)	1·40
Russia	3·05
Germany	3·07
France	3·08
Italy	4·36
Spain	5·08
Sweden	7·39
Belgium	8·88
Switzerland	9·64
Great Britain	not given.

These figures show that, notwithstanding physical and climatic difficulties peculiar to this country, the Telegraph lines are maintained in a state of exceptional efficiency.

Burma-Siam Line.

71. This line, although completed on the British side by the end of the year, was not opened to the public until the 18th May 1885, since which date it has been maintained in efficient working order.

72. The line runs in a north-easterly direction for 30 miles from Tavoy to Myitta, and south-easterly for 42½ miles from Myitta to Sinbyoodeine, whence at the end of the year two routes diverged into Siam, the one striking off at once across the frontier to Boungté, 7¼ miles, the other following the course of the Tenasserim river to Amya and thence across the frontier to Ponseké in Siam.

Indo-Ceylon Cable.

73. During the month of March 1885 a new cable was laid between India and Ceylon, the cost of which, by an agreement made in 1867, will eventually fall on the Ceylon Government.

74. The second cable, which was laid in 1867 to replace that of 1858, was at the same time repaired. There are therefore now two working cables between India and Ceylon.

75. With the permission of Colonel Champain, R.E., the Director-in-Chief and Mr. Ffinch, the Director, the new cable was manufactured in the factory of the Indo-European Telegraph Department at Karachi, and carried to Ceylon in the Government cable ship "Patrick Stewart." The operation of laying the cable was under the direction of Captain E. Bishop, the Commander, and of Mr. J. Possmann, the Acting Engineer and Electrician of the Indo-European Telegraph Department, while the shore ends were laid, and the old cable repaired, under the immediate supervision of Mr. P. V. Luke, C.I.E., Chief Superintendent of the Madras Division.

V.—UTILIZATION OF POSTAL AGENCY IN THE OPERATIONS OF THE DEPARTMENT.

76. The principal object of the scheme whereby the Post Office assists in the operations of the Telegraph Department is, as explained last year, to utilize an inexpensive agency to work offices "at many small places where the traffic is not sufficient to support a separate Telegraph Office."

77. Before the scheme was commenced, it had been found that Branch Offices in large towns could be managed by a comparatively inferior class of signallers, if supplied with simple apparatus, and if connected to, and under the control of, the Central or Head Office to which reference could be made in cases of doubt, difficulty or emergency.

In instituting the postal agency, the experience gained in these Departmental Branch Offices was made use of and the system extended.

78. The means by which it is possible to do this may be summarised as follows:—

(1) As a rule a Departmental Office worked by postal agency is as it were a branch of, and affiliated to, a Departmental Office proper, from which it draws its stores, and to which it applies in all cases of doubt as to rule or procedure.

(2) The class of apparatus employed, although only calculated for short distances, is sufficient for the purposes for which it is required, and, moreover, possesses the advantages of simple and few adjustments easily learnt by unscientific persons.

(3) The battery which works the line is usually placed in the Departmental Office to which the office worked by the Post Office is connected. The Postal signallers have therefore need of but very limited technical knowledge.

(4) As the rate of signalling for work on these branch lines is but half of that required from departmental signallers on the main lines, it follows that the men can be instructed in all that it is necessary for them to know in far shorter time than the regular Telegraph signaller who is employed on the trunk lines of communication.

(5) Technicalities have been simplified to the greatest extent possible, in order that no difficulties may be experienced by Postal officials, either in learning or carrying out Telegraph duties.

79. These arrangements have resulted in a system so simple and so easily learnt, that a large number of signallers have been sufficiently trained in a remarkably short space of time, but this simplicity has been the outcome of much thought and many experiments by the officers of the Telegraph Department, resulting in a large number of offices being rapidly opened.

80. As a means of carrying out the scheme the two departments make each other mutual concessions which are to the advantage of both, and, briefly stated are (1) reciprocal free transmission of letters and telegrams on the service of the Telegraph and Postal Departments, (2) payment by the Telegraph Department of all additional expense incurred by the Postal Department in undertaking telegraph work, and by the Postal Department of expenses incurred by the Telegraph Department in those cases when it undertakes postal work; and (3) the cost of training Postal employés for telegraph work, including the pay of their substitutes while under instruction, and their travelling allowances is borne entirely by the Telegraph Department.

81. Considerable progress has been made during the year in extending telegraphic communication throughout the country by means of the Post Office agency as described above.

82. At the end of 1884-85, there were 267 offices worked by the Post Office for the Telegraph Department against 55 at the end of the year previous. To connect these offices to the main system of the country, 1,216 miles of new line and wire, and 636 miles of new wire on existing supports had been added since the inception of the scheme in December 1883 to the 31st of March 1885.

83. The following is a comparative table showing the number of offices and the mileage of line connecting Post Offices with the main telegraph system at the end of 1884-85 and 1883-84:—

Years.	Number of Offices.		Mileage of line and wire added to connect Post Offices with the Main System.	
	Transferred to Postal Agency.	New.	New wire on existing supports.	New supports and wire.
1884-85	73	194	636	1,216
1883-84	24	31	612	405
Added during 1884-85	49	163	24	811

84. Exclusive of 2,300 village offices, there are above 5,000 Post Offices (not also Telegraph Offices) in India at which messages are received for transmission by Post to the nearest Telegraph Office. The number of telegrams tendered during the year at these offices was 25,650, and their value ₹27,387. These results are necessarily small and will probably continue so, as advantage is taken of the indication afforded by these Postal receiving offices of the want of telegraphic facilities to open telegraph offices wherever the distance from a telegraph line and consequent expenditure are not prohibitory. The extra duties imposed on the Post Master at these receiving offices are not heavy, and he is remunerated for his trouble by a percentage on the sale of the stamps required for the payment of the messages he forwards; this commission being paid by the Telegraph Department.

85. Up to the 31st March 1885, 411 Postal employés had been trained, and had been granted certificates of proficiency by the Telegraph Department, and 122 were still under training on that date.

Telegraphic Money Orders.

86. Arrangements were concluded early in the year with the Director-General of the Post Office for the introduction of a system of telegraphic money orders under which the existing money order service of the Postal Department was supplemented by telegraphic advices. These advices are transmitted as "urgent" telegrams, and provide for the very rapid remittance of money over the great distances covered by the Indian Postal and Telegraph systems.

87. There had previously been a means of remitting money by telegraph under the Prepaid Reply rules of this Department, the amount nominally deposited for a reply being treated as a remittance; but the minimum cost to the sender under this procedure having been 10 per cent., it was only availed of under circumstances of great emergency.

88. Under the new system, which came into force on the 1st October 1884, the sender pays a slightly enhanced commission to the Postal Department and a fixed charge for the telegraphic advice, with the option of adding any private intimation to the addressee at the word rate. From the same date the amount

which can be deposited for a reply to an Inland telegram was limited to ₹2 in order to restrict such deposits to *bond-fide* replies.

89. The system had by the close of the year scarcely time to become sufficiently known to the general public to show any considerable expansion; but while 777 advices remitting ₹59,084 were sent during October 1884, there were 959 advices remitting ₹73,741 in March 1885. The average amount remitted remained approximately stationary at about ₹76, and the average cost to the sender for the telegraphic advice, including private matter added, ranged from ₹2·17 to ₹2·25. The total number of telegraphic money orders for the six months was 4,954, remitting ₹3,80,584; and the Telegraph Department earnings on these was ₹10,973.

VI.—PRIVATE LINES AND TELEPHONE EXCHANGES.

90. The business of the private Telephone Companies established in this country has shown a steady though slow increase.

91. The following tables give particulars of the transactions of the Telephone Companies since 1882, as also the extent of the departmental operations in the supply of private Telephone lines during the last four years:—

Private Companies.

Year.	No. of subscribers on the 31st December.	No. of exchange connections.	No. of private lines.	Amount on which royalty has been paid.
				₹
1882	244	244	5	73,009
1883	411	392	34	1,19,865
1884	699	703	77	1,37,490

Private Lines (including those for Public Offices) supplied by Government.

Year.	No. of exchanges.	No. of exchange connections.	Private Lines.		Amounts subscribed.
			No. of circuits.	No. of offices.	
					₹
1881 . . .	4	24	37	67	19,808
1882 . . .	8	56	88	147	40,069
1883 . . .	12	92	89	148	47,131
1884 . . .	9	72	122	200	53,213

92. This business is small. It is only undertaken for Government offices and for public convenience in places where the number of subscribers do not afford sufficient inducement to private companies to establish themselves.

93. The Crossley Telephone Company commenced operations in Calcutta in May 1884, but disposed of its business to the Bengal Telephone Company in March 1885.

94. The only firms which now carry on this enterprise are the Bengal Telephone Company in Calcutta, the Bombay Company in Bombay and Karachi and the Oriental Telephone Company in Madras and Rangoon.

VII.—ELECTRICAL.

95. The procedure connected with the electrical testing of lines was much simplified by the Electrician, Mr. Johnston, resulting in a reduction of clerical

and other labour without detracting from the special value of these tests, the compilation of which, and the Electrician's reports thereupon, form an indispensable assistance towards efficient maintenance.

A revision of the Departmental "testing instructions," a complete code of electrical procedure, was commenced during the year.

Instruments and electrical apparatus of all kinds used in the Department are tested under the orders of the Electrician before issue, and the numerous new offices opened during the year, and the introduction in others of improved apparatus, have given to this portion of his work unusual importance.

Insulators before being brought into use are also subjected to electrical tests, and as an exceptionally large number were used in 1884-85, the work of the electrical staff was correspondingly heavy.

96. The Director-General's attention having been attracted to the comparatively slow working speed of the lines on which duplex apparatus is used, he decided to introduce a system of automatic repetition to overcome the disturbing influences of parallel induction, as well as the retardation to which very long circuits are liable. The details were worked out by Mr. Johnston, and the results have answered expectations and justified the additional expense involved.

97. The question of quadruplex telegraphy has also engaged attention, and various experiments have been carried out to determine the suitability of the system for the long Indian lines. The results of these have been so far successful that it has been determined to introduce the system on some of the more important lines as soon as the necessary instruments can be procured.

98. Several valuable cables have been saved by repairs carried out under the direction of the Electrician.

99. Advantage was taken of the presence in England on leave of several officers of the Department to carefully investigate the system of automatic working in use there, which has given such valuable results. An excellent report was submitted by these gentlemen, but it served to demonstrate the unsuitability of the system to existing conditions in India, in view of the extremely complicated mechanism of the apparatus, which, even under the more favourable conditions of English working, requires constant repair at the hands of specially skilled mechanics.

100. It is satisfactory to note that suggestions, some of which contain the elements of future success, respecting improvements in electrical contrivances or apparatus, have been received from various members of the signalling establishment.

101. In continuation of the proceedings of last year in regard to the issue of a code of instructions for the guidance of Public Works Officers in the erection and testing of lightning conductors, the Electrician has imparted instruction to a class, comprised of Public Works Officers specially selected for the purpose, in the processes of testing and in the use of the instruments employed.

102. At the request of the War Office numerous laboratory and line experiments were made with a vibrating sounder designed by Captain Cardew, R.E., for use in connection with telephones with the object of affording a means of communication through very long or badly insulated lines. A report on the results prepared by the Electrician was printed and transmitted to the Government of India.

103. Experiments were made with a new form of field battery obtained from England from which great results were expected, but which were not realised.

104. Many experiments were made with insulated wires, but the problem of obtaining an efficient and durable covering for wires at a low cost remains unsolved and dependence continues to be mainly placed upon guttapercha.

105. An interesting report was written by the Electrician on the invention of

M. Van Rysselburgh, which caused so great a sensation in Europe, of a means for speaking with telephones through the same wires through which telegraph signals are simultaneously transmitted. Unfortunately the system is not applicable to the long Indian circuits.

106. Constant investigations are being made in the electrical branch of the Department, and though, naturally, these do not all result in the immediate adoption of some improvement, the experience gained cannot fail to be of the greatest practical use to the service itself and to the profession generally.

VIII.—STORES AND WORKSHOPS.

107. The following are the items of expenditure under stores during the year:—

	R
Purchase of stores in India	1,62,219
London stores including freight and landing charges	13,52,203
Workshop manufacture	2,40,597
Store-keeping	1,47,977
TOTAL	19,02,996

108. The rapid expansion of the Department in the last few years made itself felt in the Stores and Workshops branch by a large increase of work, so much so that it was found necessary to separate the Workshops from the stores and place each branch under a separate responsible officer. This change took place on the 1st April 1884, and has already resulted in economy and increased efficiency.

Other changes during the year in this branch were—

The transfer of the valued store accounts to the Office of the Examiner;

The partial assimilation of the account system to that adopted by State Railways; and

The transfer of the Printing plant of the Departmental Press to the Contractor for Government Printing.

109. The policy of making use, as far as is practicable, of locally manufactured in the place of imported stores, to which reference was made in paragraph 59 of the Report of 1883-84, has been continued and extended during 1884-85; and as considerable advance has been made in the manufacture of telegraph plant both in the departmental Workshops as well as by private firms, it is hoped that the demands for English stores other than tools and raw materials, may become considerably less as the power of local production gradually increases.

110. During the year experiments were made with posts constructed of gas-pipes. Two lines have been constructed with these supports, which, so far as can be at present judged, are likely to supply a very economical form of post for light branch lines.

111. Rail posts have continued to be employed with success on all classes of lines. During the year, 12,642 rails were purchased for this purpose.

112. Endeavours to manufacture, locally, the standard pattern of tubular post have met with a fair measure of success. The departmental Workshops at Calcutta, possibly with the aid of the local firms, are now able to supply to a great extent all indents on the Calcutta Depôt. And the local firms in Bombay will, it is hoped, be able before long to do the same at Bombay with regard to the cast-iron portion of the posts.

113. The total value of the stores manufactured departmentally amounted to Rs. 4,36,993.

Dated Simla, 31st October 1885.

APPENDIX A.

Summary of Financial Results of the Indian Telegraph Department for the year 1884-85.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 22nd January, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble H. J. Reynolds, C.S.I.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

LICENSE-TAX AMENDMENT BILL.

The Hon'ble SIR A. COLVIN presented the Report of the Select Committee on the Bill for imposing a tax on income derived from sources other than agriculture. He said:—"I wish to ask to be allowed to explain in a few words the object we had in view in directing the Select Committee to report in the brief time prescribed for it. Previous experience has shown that it is very necessary that a Bill of this nature should be passed into law in time to enable the Local Governments to take measures for the preparation of schedules of assessment and to commence the other necessary inquiries before the beginning of the financial year in which the Act is to be brought into operation; as well as to allow of this Government preparing the rules which have to be drawn up under the Bill, when made law. Hitherto, owing to neglect of this precaution and to consequent delay in the time of passing the Act, there has arisen considerable inconvenience, and it has always been pressed upon the attention of the Government of India that whenever occasion arose for introducing an Income-tax Act the Local Governments should have ample time given to them, in the interests of the persons assessed, as well as in the interests of the administration, to make all necessary preliminary arrangements in connection with it.

"I may also add that on previous occasions the procedure now followed in regard to the passing of this measure has invariably been adopted, and that Bills of this nature have been passed through the Council with the least possible delay."

NORTHERN INDIA FERRIES ACT, 1878, AMENDMENT BILL.

The Hon'ble MR. HOPE presented the Report of the Select Committee on the Bill to amend the Northern India Ferries Act, 1878.

INDIAN CONTRACT ACT, 1872, AMENDMENT BILL.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to amend section 265 of the Indian Contract Act, 1872.

MIRZAPUR STONE MAHÁL BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to declare and amend the law relating to the Stone Mahál in the District of Mirzapur in the North-Western Provinces.

The Council adjourned to Friday, the 29th January, 1886.

FORT WILLIAM;
The 26th January, 1886.

S. HARVEY JAMES,
Officiating Secy. to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

GENERAL RULES FOR WORKING THE SOUTHERN MAHRATTA, BENGAL AND NORTH-WESTERN, AND BENGAL CENTRAL RAILWAYS.

No. 88 R. T., dated Fort William, 21st January 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Section 8 of Act IV (the Indian Railway Act) of 1879.

Public Works Department Notification No. 299, dated 13th September 1880, publishing the General Rules for all Railways in India, with Public Works Department Circular No. 17 Railway, dated 21st August 1880.

Bombay Government letter No. 2264, dated the 22nd September 1885.

Public Works Department letter to the Government of Bombay, No. 993 R. T., dated the 28th October 1885.

Public Works Department letter to the Director General of Railways, No. 1006 R. T., dated the 30th October 1885.

Read also—

Bombay Government letter No. 2856, dated the 7th December 1885, and enclosure.

Director General of Railways' letter No. 970 T., dated the 17th December 1885, and enclosures.

OBSERVATIONS.—In accordance with the provisions of Section 8 of the Indian Railway Act, IV of 1879, the Southern Mahratta, the Bengal and North-Western, and the Bengal Central Railway Companies have framed sets of General Rules to be adopted on their respective lines, and now submit them for the approval and sanction of the Governor General in Council.

2. In each case the Railway Company has adopted, without deviation in any particular, the General Rules which have been approved by the Governor General in Council and published in the *Gazette of India*, dated 18th September 1880, and now in force on all Railways in India which were opened to traffic prior to the 1st October 1880.

RESOLUTION.—With the exception of Rules 385, 386 and 387, which refer to the working of a single line of railway on the system termed "Train Despatching" in Rule 3 of the said Rules, the Governor General in Council is pleased to sanction with immediate effect the General Rules now submitted by the Southern Mahratta, Bengal and North-Western, and Bengal Central Railway Companies under the conditions of Section 8 of the Indian Railway Act of 1879 for regulating the travelling upon, and the use, working and management of the railways respectively directed by those Companies.

ORDER.—Ordered, that this Resolution be communicated to the Government of Bombay, and to the Director General of Railways for communication to the Railway Companies concerned for information and guidance.

Ordered also, that the Rules, which have already been published in the *Gazette of India*, be further notified to the railway servants and the public by a copy thereof and of this Resolution being kept open to inspection without any payment in the office of the Station-master of every station on each of the said railways.

Ordered also, that this Resolution be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secy. to the Govt. of India.

N.B.—As regards the figures in column "*Total receipts from 1st April to date*," audited figures have been availed of as far as possible.

(a) Receipts for last 4 days of December 1884.
(b) Receipts for last 5 days of December 1885.
(c) Total receipts from 1st April to 31st December 1884.
(d) Total receipts from 1st April to 31st December 1885.
(e) Including Rewari-Ferozepore State Railway.
(f) Receipts for first 3 days of January 1885.
(g) Return not received.
(h) Total receipts from 1st April to 26th December 1885.
(j) Total receipts from 12th October 1884 to 3rd January 1885.
(k) Total receipts from 2nd April 1884 to 3rd January 1885.
(l) Total receipts from 1st November 1884 to 3rd January 1885.

FORT WILLIAM,
The 28th January 1886.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

PRICES CURRENT OF FOOD-GRAINS THROUGHOUT INDIA FOR THE 2nd HALF OF DECEMBER 1885.

QUANTITIES PER RUPEE IN SEERS OF 80 TOLAHS.

Provinces.	Districts.	Wheat.			Barley.			Rice (best sort).			Rice (common). * Mandwa.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch.*)

D. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 27th JANUARY 1886.

GENERAL REMARKS—Rain has fallen in almost all districts of the Punjab, and has extended to parts of Rajputana, Central India, the North-Western Provinces and Oudh, and Behar. There has also been rain in Assam; in parts of Sind and the south of the Madras Presidency showers have fallen.

In Madras, Mysore, and Coorg the crops continue generally in good condition, and prospects are fair.

In several districts of the Bombay Presidency the *rabi* crops have been injured by cloudy weather, blight or insects, but elsewhere they are in good condition and promise well. In the Berars, Hyderabad, Central India, and Rajputana agricultural prospects continue good.

In the North-Western Provinces and Oudh, Punjab, and the Central Provinces the prospects of the current harvest are generally very promising.

In Bengal the cold-weather crops, including poppy, are generally in good condition. Transplanting of spring rice is still in progress; the rice harvest is nearly over, and some of the earlier *rabi* crops are also being gathered. In Assam the state and prospects of the crops are generally good.

In British Burma the rice harvest has been almost completed.

The public health continues generally good.

Prices are rising in Rae Bareli, Allahabad, and Kumaon, in the North-Western Provinces and Oudh, and are falling in Coorg. Elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 27th)		
Bellary	*Nil*	Standing crops generally good, but wheat, *cholum* and linseed suffering from disease in parts of two taluks, and some other dry grains from insects in parts; harvest wet and dry grains, yield about average.
Kurnool	*Nil*	Some standing dry crops slightly injured in parts by late unseasonable rains and by insects. Smallpox and cattle-disease in one taluk.
Ganjam	*Nil*	Fever in one, small-pox in three, and slight cattle-disease in four taluks; one death from cholera.
Kistna	*Nil*	Standing crops generally good; harvest paddy and *ragi*, outturn below average. River 2·6 feet over anicut. Fever prevalent; slight smallpox; deaths from cholera unreported last week 27, this week 41.
Chingleput (Madras)	*Nil*	Standing crops generally good; harvest paddy and *ragi*, yield below average. Smallpox in one, fever in one, and cattle-disease in five talukas.
Coimbatore	*Nil*	Standing crops good; harvest wet and dry grains, outturn about average. Slight fever in two taluks.
Tanjore	Last week since revised ·06 This week ·01	Standing crops generally good, but paddy slightly damaged by locusts in parts of one taluk; harvest wet and dry grains, outturn below average. Two deaths from cholera.
Madura	·02	Harvest wet and dry grains, yield about average. Fever prevalent; cattle-disease in two taluks and in one division.
Malabar	*Nil*	Harvest second crop paddy, outturn below average. Slight small-pox in seven talukas; fever in two and cattle-disease in one; 39 deaths from cholera.
Travancore	*Nil*	Reaping begun. Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(Jan. 27th)		
Karachi	Rain on 21st and 22nd	River at Kotri on 24th 3 feet 4 inches against 6 feet 10 inches on same date last year. *Rabi* crops in good condition generally. Fever in twelve and cattle-disease in seven talukas; two cases of smallpox in Ghorabari taluka, both recovered. Prices—wheat red rice, and *bajri* in Karachi 26, 30, and 34, in Tatta 26, 40, and 42, in Mirpur Batoro, 24, 48, and 42, and in Kotri 26, 40, and 38 pounds per rupee, respectively.
Hyderabad	Rain average ·22:— in Kandiaro, Naushahro, Moro, Sakrand.	*Rabi* good. River at Kotri on 25th 3 feet 7 inches against 6 feet 8 inches on same date last year. Fever in nine, cattle-disease in five, and smallpox in two talukas. Wheat 27½, *jowari* 40, *bajri* 39, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	*Rabi* crops including cotton healthy. Fever in Sanand and Viramgaum, talukas. Wheat 37 and *bajri* 34 pounds per rupee.
Baroda	*Nil*	Public health good.; cattle-disease continues in Kherala. Crops in good condition. Prices—*bajri* 28, wheat 23, and rice 18 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	*Nil*	Standing crops healthy. Cattle healthy; fever in Eardoli, Jalalpur, Bulsar, and Mandvi talukas. *Jowari* 38 and *nagli* 45 pounds per rupee.
Nasik	*Nil*	*Rabi* crops are doing well in Nasik, Sinnar, and Igatpuri talukas; in parts of the remaining talukas they have suffered partially from blight; threshing of *kharif* nearly completed. Public health generally good. Wheat 31½, *bajri* 31½, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature *nil* on 20th, 2° cool on 21st and 25th, 3° cool on 22nd, 1° cool on 23rd and 24th, and 4° cool on 26th; vapour in air excessive on 20th, normal from 21st to 24th, and defective on 25th and 26th; abnormal wind northerly on 20th and 26th, southerly on 22nd and 23rd; wind normal on all other days.
Poona	*Nil*	*Rabi* crops in good condition. Smallpox in Sirur taluka; cattle free from disease; 10 cholera cases in talukas of Haveli, 6 deaths. Prices—*bajri* 35 and *jowari* 42, in Poona—*bajri* 34 and *jowari* 39 pounds per rupee.
Ahmednagar	*Nil*	Wheat and gram injured by cloudy weather. Health good. Prices—*bajri* average 45 and *jowari* 53 pounds per rupee.
Sholapur	*Nil*	Linseed, wheat, tur, and gram crops have suffered from blight and insects in places; cotton crop is also inferior in Madha and Karmala talukas; other *rabi* crops doing well. *Jowari* 52 pounds 13 tolas and *bajri* 44 pounds 21 tolas per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* nearly completed; exotic cotton blighted in three, wheat in six, and gram in five talukas. Slight fever and cattle-disease in Mugud, Bankapur, and Hangal. Rice 22 to 32 and *jowari* 42 to 68 pounds per rupee.
Kanara	*Nil*	Second crop rice and sugarcane plants healthy; transplanting and weeding continue. Slight fever and smallpox in district; cattle-disease in four talukas. Weather cold; strong sea breezes during day. Common rice in Karwar 14, in district, average 13 seers per rupee.
Rajkot	*Nil*	Fever, chest affection, and bowel complaints in some parts. Weather cold. *Bajri* 32, *jowari* 42, and wheat 34 pounds per rupee. *General Remarks.*—Rain in parts of Sind. Reaping of *kharif* crops continues in Dharwar; standing crops injured by cloudy weather in parts of Broach and Ahmednagar, by blight and insects in parts of Sholapur and Bijapur, and by blight in parts of Nasik, Khandesh, Satara, Belgaum, and Dharwar. Cholera in parts of one district; smallpox in parts of six, and fever and cattle-disease in parts of twelve districts.
Bengal—(Jan. 27th)		
Chittagong (Jan. 26th)	*Nil*	Weather seasonable. Harvesting of *aman* over; prospects of winter crops fair. Prices steady. Public health good.
Dacca	*Nil*	Prospects of winter crops continue favourable; pulses being gathered; pressing of sugarcane commenced. Public health generally good.
24-Pergunnahs		Prospects of cold-weather crops continue favourable; harvesting of *aman* nearly finished with about 12 annas outturn, and that of cold-weather crops commenced with an estimated outturn of 14 annas. Sporadic cholera reported throughout the district. Common rice 14 to 15½ seers per rupee.
Khoolna	0·15	Weather cloudy. Harvesting of *aman* paddy not completed; prospects of winter crops good; planting of *boro* paddy continues. Public health fair.
Moorshedabad	*Nil*	Prospects of cold-weather crops and indigo favourable. Public health good. Common rice 18 to 19½ seers per rupee.
Pubna	*Nil*	Weather fine but cloudy. Prospects of winter crops promising. Public health generally good.
Dinagepore	*Nil*	Weather clear and more seasonable. A shock of earthquake was felt on 23rd; harvest prospects good.
Rungpore	*Nil*	*Aman* harvesting almost completed with good outturn; prospects of winter crops favourable. Public health good.
Midnapore	*Nil*	Prospects of winter crops continue favourable; transplanting of *boro* rice in progress. Sporadic cholera reported; public health fair.
Burdwan	*Nil*	*Rabi* doing well. Price of rice 17 to 22 seers per rupee.
Bhagulpore	0·08	Prospects of *rabi* good; rice 18 seers 15 chittacks per rupee. Public health good.
Monghyr		Poppy prospects favourable. Rain has done good and driven off insects.
Purneah	0·20	Prospects of *rabi* crops good; late rice nearly all harvested; common rice 18 seers per rupee, but cheaper in north of district. Public health fair.
Durbhanga	0·34	*Rabi* crops look very promising; threshing of paddy in progress; price of rice falling. Public health generally good.
Mozufferpore		Prospects of poppy crop continue favourable.
Sarun		A violent hail-storm on 20th damaged about 1,000 bighas of poppy in Sewan and in north of Chupra; weather since then good.
Chumparun		Prospects of *rabi* and poppy very good. Prices stationary. Public health fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Patna	*Nil*	Reaping of paddy almost finished. Prospects of *rabi* crops excellent; poppy has commenced to flower. Public health good.
Gya	0·38	Weather mild and cloudy. *Rabi* coming on well.
Shahabad	*Nil*	Cloudy weather over; bright sunny sky favourable to poppy.
Hazaribagh	*Nil*	Weather seasonable. Cold-weather crops doing well; poppy plants look healthy; an average crop expected. General health good.
Cuttack	0·16	Weather cloudy. Reaping of *sarad* rice nearly completed; price of rice unchanged. Public health generally good; cases of cholera and fever reported.
		General Remarks.—Slight rain reported in most of the Behar districts, and also in Khoolna and Cuttack. All cold-weather crops, including poppy, are generally in good condition, but in Sarun some damage has been caused to poppy by a hail-storm on the 20th instant; transplanting of *boro* or spring rice is still going on; rice harvest is almost over; pressing of sugarcane has begun, and some of the earlier *rabi* crops are being gathered. Prices of rice generally stationary. Fever is still prevalent in Backergunge; cholera is abating in Tipperah; smallpox prevails in Lohardugga; elsewhere general health good.
N. W. Provinces and Oudh—(Jan. 27th		
Benares (Jan. 26th)	·30 at Sadar	Weather continues seasonable. *Rabi* prospects favourable and promises well; sugarcane being cut and crushed. Markets well supplied. Prices steady. Public health good; no cattle-disease.
Gorakhpore („ 25th)	*Nil*	*Rabi* and poppy crops in good condition. Prices stationary. Health good.
Fyzabad („ 26th)	*Nil*	Weather fair. Prospects good; poppy being weeded. Supplies ample. Health of people good.
Lucknow („ 25th)	From ·20 to ·70	Prospects very favourable; sugarcane is being pressed. Markets well supplied. Prices steady. Fodder very dear. Health of people good; no cattle-disease.
Rae Barelli („ „)	*Nil*	Weather sometimes cloudy. *Rabi* prospects good; poppy crops healthy. Prices rising. Supplies ample. General health fair.
Partabgarh („ 26th)	*Nil*	East winds; clear weather. *Rabi* prospects very favourable; poppy generally promising, early crop coming into bud; *sawan* being sown. Prices steady. No illness.
Allahabad („ „)	*Nil*	Weather seasonable. Crop prospects very good. Markets well supplied. Prices show a slightly upward tendency. Condition of men and cattle good.
Cawnpore („ „)	In five parganas from ·10 to 1·10.	*Rabi* and poppy crop prospects continue favourable. Prices steady. Condition of people and cattle good.
Banda („ „)	*Nil*	Weather cloudy. *Rabi* crops flourishing. Prices steady. Public health good; cattle-disease in one village.
Farakhabad („ 26th	·20	Prospects continue good. Health good.
Ballia („ 25th)	*Nil*	Weather clear. Prospects of *rabi* crops excellent. Markets full. Public health satisfactory and condition of cattle good.
Sitapur („ 26th)	Slight rain on 20th	*Rabi* crops healthy; poppy crops continue satisfactory. Prices steady. Health good.
Bareilly („ „)	*Nil*	Crops good; sugarcane being cut; poppy prospects very good. Health of people and cattle good.
Kumaon („ „)	*Nil*	Weather clear after a good fall of rain. *Rabi* crops progressing well, but require sunshine. Prices rising. General health good; cattle-disease continues.
Agra („ 25th)	·10 in one pargana	*Rabi* prospects continue favourable. Prices steady. Health good.
Jhansi („ „)	*Nil*	Weather cloudy. *Rabi* and poppy crops flourishing. Health good.
Meerut („ 26th)	Rain throughout the district.	Agricultural prospects good. Food supplies ample. No variation in prices. Health good.
		General Remarks.—Weather seasonable; some rain in eight districts. *Rabi* and poppy promising; prospects good. Supplies ample. Health of people and cattle good.
Punjab—(Jan. 27th)		
Delhi (Jan. 26th)	1·60	Health fair. Prices almost stationary. Prospects of current harvest hopeful.
Hissar	*Nil*	Health good. Prices stationary. Prospects of current harvest flourishing.
Umballa	1·10	Health good. Prices stationary. Prospects of current harvest much improved.
Jullunder	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar	1·30	Health good. Prices stationary. Prospects of current harvest good.
Sialkot	1·80	Health good. Prices stationary. Prospects of current harvest very good.
Ferozepore	1·10	Health good. Prices stationary. Prospects of current harvest good.
Lahore	0·80	Health good. Prices stationary. Prospects of current harvest improved.
Rawalpindi	3·30	Health good. Prices stationary. Prospects of current harvest average.
Mooltan	0·30	Health good. Prices stationary. Prospects of current harvest favourable.
Shahpur	Rain throughout the district.	Prices stationary in Tahsils Bhera and Khushab and rising in Tahsil Shahpur.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	0·13	Health fair. Prices stationary. Prospects of current harvest good.
Peshawar	3·60	Health good. Prices generally stationary.
		General Remarks.—Rain has fallen in all districts save Hissar and Jullunder. Prices of food grains generally stationary. Health generally good, but smallpox is still lingering in the Shahpur district. Prospects of current harvest generally good.
Central Provinces—(Jan. 27th)		
Nagpur	*Nil*	Weather rather cloudy and warm. Linseed reported damaged; other *rabi* crops fair. Fever and cattle-disease prevalent. Prices stationary.
Jubbulpore	*Nil*	Weather cloudy. Slight showers on 21st. Crops progressing favourably. Health fair. Prices rising.
Saugor (Jan. 26th)	*Nil*	Weather clear. Prospects of crops good. Health fair. Prices steady.
Seoni	*Nil*	Weather cloudy and close; slight showers with hail on 24th, not much injury to crops apprehended. Fever abating. Prices steady.
Hoshangabad	*Nil*	Occasional clouds causing damage to gram and linseed. Cattle-disease in Pardi. Prices steady.
Khandwa	*Nil*	Weather clear. Wheat and gram good; linseed being damaged by blight in Berhampur tehsil. Health good. Prices steady.
Raipur	*Nil*	Weather cloudy. Linseed injured; other *rabi* crops doing well. Health good. Prices steady.
Sambalpur (Jan. 23rd)	*Nil*	Weather cool. Threshing in progress, also sugarcane pressing. Health generally good. Prices steady.
		General Remarks.—Weather rather cloudy and warm. Linseed blighted in places; other crops favourable. Health generally good. Prices steady.
British Burma—(Jan. 27th)		
Akyab (Jan. 23rd)		Public health and health of cattle good. Reaping nearly finished.
Bassein		Smallpox epidemic in one township; cattle-disease in one circle, in other places slight.
Rangoon		Public health and health of cattle good. Supplies of paddy increasing.
Amherst (Moulmein)		Public health and health of cattle good. Reaping progressing.
Tavoy		Public health and health of cattle good. Harvesting in progress.
Pegu		Public health and health of cattle good. Reaping finished nearly everywhere.
Henzada		Slight cholera; cattle healthy. Reaping completed.
Prome		Slight cholera in one township; cattle healthy. Reaping progressing.
Toungoo		Public health and health of cattle good. Reaping progressing.
Thayetmyo		Public health and health of cattle good. Reaping finished.
		General Remarks.—Slight cholera in three districts; smallpox in one, elsewhere public health good; cattle-disease slight in four districts, severe in one district, elsewhere health of cattle good. Reaping operations almost completed in all districts.
Assam—(Jan. 27th)		
Gauhati	·18	Weather seasonable. Public health fair; *kalajar* again reported to be prevalent in parts of the Luki tahsil; cattle-disease in some mouzahs. Gathering of mustard continued.
Sylhet	*Nil*	State and prospects of crops good. Cholera abating everywhere except in Karimganj.
Cachar	·17	Weather cold. Reaping of *sail* and *asra* crops not wholly finished. Common rice 16 seers per rupee. General health good.
Dibrugarh	1·94	Weather cloudy. Reaping of *sali* crop finished, outturn good. District healthy.
Mysore and Coorg—(Jan. 27th)		
Bangalore		Crops in good condition; prospects fair. Fever and smallpox prevalent in parts; public health otherwise good; cattle-disease in parts of Kolar, Shimoga, and Kadur districts. Prices stationary.
Mysore		
Mercara		Prices of food grains slightly fallen. Prospects of season good. Smallpox prevalent in Padinalknad.
Berar and Hyderabad—(Jan. 27th)		
Amraoti		Weather clear. *Kharif* being gathered; *rabi* crops good; wheat 22, and *jowari* 26 seers per rupee.
Akola		*Kharif* harvesting nearly finished; prospects good.
Hyderabad		*Tabi* sowings concluded; *rabi* crops progressing in all save in taluka Pátur, where the rain that had fallen two or three weeks back and the cloudy weather have slightly damaged the white *juar*, peas, gram, and *tur* crops. Fever and ague have disappeared. Prices—wheat 15, coarse rice 13, white *juar* 23, yellow *juar* 25, and *tur* 14 seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States— (Jan. 27th)		
Indore	*Nil*	Weather clear and cooler than last week. Health good. Prices of food grains rising.
Morar (Gwalior)	·90	Total rainfall 31·45. Health and prospects good. Weather seasonable.
Sutna	·65	Prospects good. Cholera reported from Ramnagar and Rewah State.
Neemuch	*Nil*	Weather clear. Crops doing well. Health good.
Goona	*Nil*	Health and prospects good.
Agar	Slight shower of rain.	Health and opium prospects good.
Sehore	*Nil*	Weather fair. Crops and health good.
Nowgong	·11	Total rainfall 44·65.
Rajputana—(Jan. 27th)		
Abu (Jan. 17th)	*Nil*	Health good. Weather clear and colder.
Sirohi („ 24th)	Slight rain on 19th.	Weather cloudy and cool. Tanks drying up. Wells, health, and crops good.
Marwar („ 22nd)	Slight rain on 21st.	Weather cloudy; cold mild. *Rabi* in good condition. Prices stationary. Smallpox still prevalent.
Kherwara („ 25th)	*Nil*	*Rabi* crops progressing. Pneumonia still prevalent. Weather cool and cloudy.
Partabgarh („ 23rd)	*Nil*	Tanks and wells one-fourth full. Health and crops good. Weather cloudy.
Meywar („ „)	. . . .	Tanks and wells low. Crops average. Health good. Prices stationary. Weather seasonable.
Harowti (Tonk)	Deoli . . ·20	Weather cloudy. Prices stationary. Health good.
(„ 25th)	Tonk . . ·12	
	Shahpura . ·03	
Jhallawar („ 21st)	. . . .	Health and prospects good.
Kotah („ 23rd)	·29 on 16th.	Crops progressing favourably. Health good. Prices stationary.
Ajmere („ 26th)	*Nil*	Weather cloudy. Crops good. Smallpox in Merwara prevalent. Prices stationary.
Kerowlee („ 23rd)	·12	Tanks dry; wells usual. Prospects excellent. Slight fever. Prices stationary.
Jeypore („ 26th)	·12	Weather seasonable. Prospects favourable. Prices steady. Health fair.
Dholepur („ 23rd)	*Nil*	Tanks and wells drying. Health good. Prices steady.
Bhurtpore („ „)	·20	Tanks and wells full. Crops thriving. Prospects excellent. Health good. Prices steady.
Ulwar („ 26th)	·30	Health and crop prospects good.
Bikanir („ 23rd)	·10; in districts on 16th— Nahar . . ·20 Bahahera . ·30 Churu . ·10 and slight rain in Loonkaransur, Rajgarh, Sirdarshar, Ratangarh, Sooratgarh, Anopgarh	Fever and smallpox in Ratangarh, health otherwise good. Prices falling. Weather cloudy and colder.
Nepal— Khatmandu	·20	Prospects good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORTS FOR NOVEMBER 1885.

No. 56 Met., dated Calcutta, the 29th January 1886.

RESOLUTION—By the Government of India, Revenue and Agricultural Department.

Read the following :—

Summary of the Weather Reports for November 1885.

The fine weather which prevailed over the whole of Northern and Central India during October continued generally during November. In the Peninsula, however, the month began with very cloudy skies and somewhat unsettled weather, due probably to a small cyclonic storm off the Coromandel Coast. By the 2nd November the storm had advanced to the Coast; the barometer fell rapidly at Madras, and there was heavy rain at that station and light to moderate showers at most of the other Madras stations. After the disappearance of the storm rain continued to fall rather heavily in the Deccan and parts of the Northern Circars for two or three days, when it ceased and there was a short break. On the 10th light general showers recommenced in Southern Madras and continued up to the middle of the month, when there was again heavy rain at Negapatam. The barometer fell rapidly, the winds increased in strength, and a large well-defined storm appeared on the morning of the 17th in the neighbourhood of Negapatam.

The rainfall became heavier and extended northwards along the Coast. On the 17th there were about 6 inches of rain at Madras, and at Negapatam an unusually heavy fall of about 14 inches. On the succeeding days the storm moved slowly in a north-easterly direction, and by the morning of the 23rd reached the Arrakan Coast between Akyab and Chittagong, where it soon broke up after giving rather heavy rain to the Northern Circars, Orissa, East Bengal, and Burmah. The following table gives the largest falls of rain connected with the storm :—

	Inches.
Negapatam 15th	2·65
„ 16th	8·01
„ 17th	13·61
Madras 16th	4·01
„ 17th	5·73
„ 18th	3·09
„ 19th	2·57
Trichinopoly 17th	2·23
Diamond Islands 20th	5 34
„ „ 21st	2·45
Akyab 21st	3·98
„ 22nd	2·02
„ 23rd	1 50
Chittagong 23rd	4·09

During the last week of the month fine weather prevailed throughout India as well as in the Eastern Peninsula.

On the whole, the rainfall of November was in excess of the average in Orissa and the whole of the Peninsula except the Konkan, largely so in the coast region between Saugor Island and Masulipatam, where, on an average, about 3 inches of rain were registered. On the plateau of Hyderabad and the Deccan also the rainfall was very excessive, being about three times the average amount.

The mean pressure was everywhere above the normal average, most so in north-western India. The axis of high pressure, which usually stretches from Rajputana across Central India and parts of the Central Provinces, extended in November last as far as Bengal, and sometimes even to Assam. Otherwise the

distribution of pressure agrees fairly with that which normally characterizes the cold weather. The temperature was generally above the average, and so was also the humidity of the air. In the Upper Provinces especially, the temperature was very high, the excess amounting to about 4° or 5°.

The following table shows the amount of rain and the difference from the average during the month of November 1885, according to districts, as far as is indicated by the telegraphic reports:—

Districts.	Average rainfall in November.	Difference from the average in November 1885.
Punjab, West	0·61	—0·61
„ East	0·14	—0·14
North-Western Provinces, Trans-Gangetic	0·15	—0·15
„ „ „ Cis-Gangetic	0·10	—0·10
Behar	0·21	—0·21
Northern Bengal	0·14	—0·12
Assam, Cachar	0·83	—0·39
Lower Bengal, Chutia Nagpur	0·69	+0·31
Orissa, Northern Circars	2·79	+2·64
Central Provinces, South	0·40	—0·11
Berar, Khandesh	0·34	—0·13
Rajputana, Central India, Saugor, and Nerbudda	0·17	—0·16
Sind and Cutch	0·06	—0·06
Guzerat	0·13	—0·11
Konkan	0·70	—0·32

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 3rd FEBRUARY 1886.

GENERAL REMARKS.—With the exception of the Punjab and parts of Bickaneer and Bengal, the rainfall during the week has been inconsiderable.

In Madras the prospects of the season continue generally fair, though the yield of the paddy harvest is not good. In Mysore and Coorg prospects are good, and paddy sowings are in general progress.

In parts of Khandesh and the Upper Sind Frontier the standing crops are withering from want of moisture, and in other parts of the Bombay Presidency blight, insects, and cloudy weather have caused injury. The reaping of the *rabi* crop has commenced in parts of Poona and Broach. In the Berars, Hyderabad, Central India, and Rajputana the *rabi* crops are in good condition, and prospects are favourable.

The prospects of the *rabi* harvest are excellent in the North-Western Provinces and Oudh, and are generally good in the Punjab and the Central Provinces.

In Bengal the cold-weather crops are doing well; transplanting of spring rice is progressing, and the *aman* harvest has been gathered. Mustard and other early crops are being reaped. Agricultural prospects continue good in Assam.

In almost all districts of British Burma the rice harvest has been nearly completed.

The public health continues generally good.

Prices are stationary except in Coorg and in the Kolar district in Mysore, where they are falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 3rd)		
Bellary	*Nil*	Standing crops generally good, but wheat, *cholum* and linseed suffering from disease, and Bengal gram from insects in parts of one taluk; harvest wet and dry grains, yield average.
Kurnool		Some standing dry crops slightly injured in parts by late unseasonable rains and by insects; harvest dry grains, outturn below average. Smallpox in two and cattle-disease in two taluks.
Ganjam	(Average) ·10	Harvest paddy, yield poor. Fever in one, smallpox in four, and cattle-disease in seven taluks; two deaths from cholera.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Kistna	*Nil*	Standing crops good; harvest wet and dry grains, outturn below average. River 2·1 feet over anicut. Fever prevalent, slight smallpox; deaths from cholera unreported last week 55, this week 56.
Chingleput (Madras)	*Nil*	Standing crops good; harvest paddy and *ragi*, yield below average. Smallpox in one, fever in one, and cattle-disease in four taluks.
Coimbatore	*Nil*	Standing crops good; harvest wet and dry grains, outturn about average. Smallpox in one and slight fever in two taluks; cattle-disease in one.
Tanjore	*Nil*	Standing crops generally good; harvest wet and dry grains outturn below average. Rivers getting very low. Cattle-disease in two taluks.
Madura	*Nil*	Harvest wet and dry grains, yield of paddy below average, rest average. Fever prevalent; cattle-disease in one taluk.
Malabar	*Nil*	Harvest second crop paddy, outturn below average. Slight smallpox in seven taluks; fever in two and cattle-disease in one; 58 deaths from cholera.
Travancore	1·82	Harvest progressing. Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—**(Feb. 3rd)**		
Karachi	*Nil*	River at Kotri on 1st 5 feet 4 inches against 6 feet 7 inches on same date last year. Fever in eleven and cattle-disease in six talukas. Prices—wheat, red rice and *bajri* in Karachi 26, 30 and 34; in Tatta 26, 40 and 38; in Mirpur Batoro 24, 46 and 42, and in Kotri 26, 38 and 38 pounds per rupee, respectively.
Hyderabad	*Nil*	*Rabi* cultivation good. River at Kotri on 1st 5 feet 4 inches against 6 feet 7 inches on same date last year. Fever in five, cattle-disease in four and smallpox in two talukas. Wheat 27½, *bajri* 38½, *jowari* 40, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	*Rabi* crops including cotton doing well. Fever in Sanand. Wheat 35 and *bajri* 34 pounds per rupee.
Baroda	*Nil*	Public health good; cattle-disease continues in Kherala. Crops in good condition. Prices—*bajri* 28, wheat 24, and rice 19 pounds per rupee.
Surat	*Nil*	Standing crops healthy. Fever in Bardoli, Jalalpur, Bulsar, and Mandvi talukas. *Jowari* 38 and *nagli* 44½ pounds per rupee.
Nasik	*Nil*	*Rabi* crops fare well in Nasik taluka, in parts of the remaining talukas they have suffered partially from blight; threshing of *kharif* nearly completed. Public health generally good. Wheat 30½, *bajri* 36½, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Average abnormal temperature 3° cool from 27th to 31st, 5° cool on 1st, and 6° cool on 2nd, vapour in air defective except on 31st, when it was normal; abnormal wind northerly on 27th, 30th, 1st, and 2nd; wind normal on all other days.
Poona	*Nil*	*Rabi* crops, except wheat which is in some places in Junnar, Parandhar, Haveli and Maval talukas slightly suffering from mildew, are doing well. Reaping has commenced in Khed and Bhimthadi talukas. Cattle-disease in Junnar taluka; 10 cholera cases in taluka Haveli and Poona city, 5 deaths. Prices of *bajri* 34 and *jowari* 41; in Poona *bajri* 34 and *jowari* 39 pounds per rupee.
Ahmednagar	*Nil*	Wheat and gram injured by cloudy weather. Health good. *Bajri* average 44 and *jowari* 53 pounds per rupee.
Sholapur	*Nil*	Linseed, wheat, *tur*, and gram crops suffered from blight and insects in places; cotton crops inferior in Madha and Karmala talukas; other *rabi* crops doing well. *Jowari* 53 pounds 3 tolas and *bajri* 44 pounds 14 tolas per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* nearly completed; exotic cotton blighted in forty-one, wheat in seven, and gram in six talukas. Slight fever and cattle-disease in Bankapur and Hangal. Rice 22 to 32, and *jowari* 45 to 64 pounds per rupee.
Kanara	*Nil*	Sugarcane and second crop rice plants healthy. Fever and smallpox decreasing; cattle-disease in four talukas; measles in Karwar. Weather cold; strong sea breezes. Common rice in Karwar 14 seers in district, average 13 seers per rupee.
Rajkot	*Nil*	Weather cold. Public health generally good. Prices—*bajri* 32, *jowari* 46, and wheat 33 pounds per rupee.
		General Remarks.—Slight rain in parts of Shikarpur. Reaping of *rabi* crops commenced in parts of Poona and Broach; standing crops withering from want of moisture in parts of Khandesh and Upper Sind Frontier, and injured by blight in parts of Poona, Nasik, Khandesh, Dharwar, and Belgaum; by blight and insects in parts of Sholapur and Bijapur, and by cloudy weather in parts of Ahmednagar and Satara. Scarcity of fodder in one taluka of Khandesh. Fever and cattle-disease in parts of ten and smallpox in parts of four districts.
Bengal—**(Feb. 4th)**		
Chittagong (Feb. 2nd)	*Nil*	Weather bright and cold. A slight shock of earthquake on 1st instant. Outturn of *aman* 10 annas; prospects of winter crops fair. Prices steady. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Dacca	*Nil*	Winter crops doing well; mustard and *kalai* pulse being harvested, and sugarcane being cut. Public health good.
24-Pergunnahs	1·47	Weather seasonable. Prospects of cold-weather crops continue favourable; yield estimated at about 14 annas; harvesting of *aman* nearly finished, and that of cereals commenced. Price of common rice 15 to 16½ seers per rupee. Public health generally good.
Khoolna	*Nil*	Weather cold. *Aman* harvest not completed; prospects of winter crops good; planting of *boro* paddy continues. Some cholera prevalent; public health fair.
Moorshedabad	*Nil*	Prospects of crops favourable. Public health good. Price of common rice 17 to 20 seers per rupee.
Pubna	*Nil*	Weather fine. Harvesting of *aman* almost completed with 12 annas outturn; winter crops doing well. Public health good.
Dinagepore	*Nil*	Weather colder. Condition of crops favourable. Cattle-disease reported from Atwari.
Rungpore	*Nil*	*Aman* harvest almost over; prospects of cold-weather crops good. Public health fair.
Midnapore	*Nil*	Weather cold at night. Prospects of *rabi* crops good; cultivation of *boro* rice progressing favourably. General health good.
Burdwan	0·62	*Rabi* crops doing well. Price of common rice 17 to 22 seers per rupee.
Bhagulpore	*Nil*	Prospects of *rabi* crops good; mustard being harvested. Price of rice 18 seers 15 chittacks per rupee. Public health good.
Monghyr		High westerly winds prevailing. Many of the poppy plants are in flower, and there is every prospect of a good season.
Purneah	*Nil*	Prospects of crops good; reaping of mustard progressing. Common rice 18 seers per rupee. Public health good.
Durbhanga	*Nil*	*Rabi* crops very promising; early sowings are in pod; poppy doing well. Prices almost stationary. Public health generally good.
Mozufferpore		Prospects of poppy crop favourable.
Sarun		Prospects of poppy good except where affected by the hailstorm of 20th ultimo. Weather favourable.
Chumparun	*Nil*	Prospects of *rabi* and poppy crops continue good. Prices stationary. Public health good.
Patna	*Nil*	Reaping of paddy almost finished; *rabi* crops coming into ear and promise a good harvest; poppy flowering. Public health good.
Gya	0·1	Poppy coming into flower; a fair outturn expected if weather is favourable; prospects of other cold-weather crops good.
Shahabad		Prospects of poppy excellent. West winds and clear weather prevailed throughout week except 1st instant.
Hazaribagh	*Nil*	Weather seasonable. *Rabi* crops continue promising; poppy plants are in flower. Public health good.
Cuttack	0·19	Weather cloudy. Rice harvest nearly completed; *rabi* crops being gathered. Price of rice unchanged. A few cases of cholera reported from the interior; public health generally good.
		General Remarks.—Showers fell in some districts during the week. All cold-weather crops are generally doing well; in Sarun some injury has been done to poppy by hail. Transplanting of *boro* rice is proceeding well; the *aman* harvest has been got in; sugarcane is being pressed, and mustard and other early *rabi* crops are being reaped. Price of rice generally stationary. General health is fair.
N. W. Provinces and Oudh—**(Feb. 3rd)**		
Benares (Feb. 1st)	No rain during week, but slight rain on 3rd.	Weather cold. *Rabi* prospects continue favourable in tahsils Benares and Chandowli, in Gangapur, however, the crops have been slightly damaged by frost and blight; sugarcane cutting and crushing continue. Markets well supplied. Prices steady. General health good; no cattle-disease.
Gorakhpore („ 1st)	*Nil*	Weather cloudy. *Rabi* and poppy crops in good condition; transplantation of rice in progress. Slight rise in prices. Health good.
Fyzabad („ 2nd)	*Nil*	Weather fair. *Rabi* prospects continue favourable; opium crop promises well. Condition of men and cattle good.
Lucknow („ 1st)	*Nil*	Season favourable. Both *rabi* and poppy crops appear healthy and promising. Markets well supplied. Prices slightly rising. Fodder very dear. Health of people good; no cattle-disease.
Rae Barelli („ „)	Slight rain on the evening of the 31st January.	Prospects of *rabi* crops good. Supplies ample. Prices slightly rising. General health fair.
Partabgarh („ 2nd)	*Nil*	East and west winds; weather fine with passing clouds. Gram and peas slightly injured by blight. Prices almost stationary. Opium crop generally promising; early sowings coming into flower in isolated fields. Health of people and cattle good.
Allahabad („ „)	*Nil*	Weather seasonable. Crops flourishing; prospects good. Markets well supplied. Prices show a slight fall. Condition of men and cattle healthy.
Cawnpore („ „)	*Nil*	Weather cold and seasonable. *Rabi* and poppy crops promising. Prices firm. Condition of people good; a little cattle-disease in one pargana.
Banda („ „)	*Nil*	Weather cloudy. Gram crops slightly injured by frost. Prospects fair. Prices stationary. Public health and condition of cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Farakhabad (Feb. 2nd)	*Nl*	Weather fair. Prospects continue good. Health good.
Sitapur („ „)	*Nl*	Weather clear and fine. Prospects continue excellent. No sickness of any kind reported.
Bareilly („ „)	*Nil*	Weather bright and crops flourishing. Poppy prospects excellent. Prices fairly stationary. Health of people and cattle good.
Ballia („ 1st)	*Nil*	Weather cloudy and wind easterly towards the end of the week. Crops flourishing and prospects good. Supplies ample. Health good; no cattle-disease.
Kumaon („ 2nd)	Slight showers	Weather cloudy. *Rabi* crops flourishing, but require sunshine. Prices stationary. General health good; cattle-disease continues.
Agra („ 1st)	*Nil*	Irrigation continues. *Rabi* prospects favourable. Prices steady. Health good.
Jhansi („ „)	A few drops of rain at head-quarters.	Weather continues cloudy. Prices steady. Health good.
Meerut („ 2nd)	Slight rain on 31st January.	Crops splendid everywhere. Supplies ample. Prices stationary. *General Remarks.*—Weather seasonable. *Rabi* and poppy promising. Prospects excellent. Supplies ample. Prices generally steady. Health of people and cattle good.
Punjab—(Feb. 3rd)		
Delhi . (Feb. 2nd)	. . . .	Health fair. Prices fluctuating, Prospects of current harvest promising.
Hissar . . .	·10	Health good. Prices stationary. Prospects of current harvest flourishing.
Umballa . . .	·20	Health good. Prices stationary. Prospects of current harvest good.
Jullunder . . .	. . . .	Health good. Prices stationary. Prospects of current harvest good.
Amritsar . . .	·50	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . . .	·20	Health good. Prices stationary. Prospects of current harvest flourishing.
Ferozepore . . .	·30	Health good. Prices stationary. Prospects of current harvest good.
Lahore . . .	·50	Health good. Prices falling. Prospects of current harvest improved.
Rawalpindi . .	·50	Health good. Prices stationary. Prospects of current harvest average.
Shahpur . . .	Rain throughout the district except at Sadr.	Health good. Prices falling. Prospects of current harvest much improved.
Mooltan . .	·50	Health good. Prices fluctuating. Prospects of current harvest favourable.
Dera Ismail Khan .	·11	Health fair. Prices almost stationary. Prospects of current harvest good.
Peshawar . . .	·50	Health good. Prices falling. Prospects of current harvest good. *General Remarks.*—Rain has fallen in all districts except Delhi and Jullunder. Health generally good, but smallpox has not yet quite disappeared from the Shahpur district. Prices of food grains generally stationary. Prospects of *rabi* harvest generally good.
Central Provinces—(Feb. 3rd)		
Nagpur . . .	·36	Weather clear and cool. *Rabi* crops somewhat injured by rain. Cattle-disease prevalent. Prices stationary.
Jubbulpore . .	*Nil*	Weather cold. Crops favourable. Health fair. Prices rising.
Saugor . (Feb. 2nd)	*Nil*	Weather cloudy at intervals and chilly. Prospects good. Prices stationary. Health good.
Seoni . . .	*Nil*	Weather cloudy. Linseed and wheat mildewed. Prices steady. Fever declining.
Hoshangabad . .	*Nil*	Weather occasionally cloudy: wheat may be damaged. Cattle-disease in places. Prices stationary.
Khandwa . . .	*Nil*	Weather clear and cool. Wheat and linseed attacked by rust. Health good. Prices stationary.
Raipur . . .	*N il*	Weather cloudy. Linseed damaged; wheat and gram favourable. Prices—wheat 30½ and rice 24 seers per rupee.
Sambalpur (Jan. 30th)	·18	Weather cold. Rice threshing and sugar-making in progress. Health good. Prices steady. *General Remarks.*—Weather cloudy during week but now clear and cold. Linseed and wheat damaged in places. Prices steady.
British Burma—(Feb. 3rd)		
Akyab (Jan. 30th)	*Nil*	Public health and health of cattle good. Reaping completed.
Bassein . . .	*Nil*	Public health good; severe cattle-disease in two townships, elsewhere slight. Weather cloudy.
Rangoon . . .	*Nil*	Public health and health of cattle good.
Amherst (Moulmein) .	*Nil*	Public health and health of cattle good.
Tavoy . . .	*Nil*	Public health and health of cattle good. Harvesting in progress.
Henzada . . .	*Nil*	Public health and health of cattle good. Reaping completed.
Prome . . .	*Nil*	Slight cholera. Cattle healthy. Reaping progressing.
Toungoo . . .	*Nil*	Public health and health of cattle good. Reaping completed.
Thayetmyo . . .	*Nil*	Public health and health of cattle good. Reaping finished. *General Remarks.*—Slight cholera in three districts, elsewhere public health good; cattle-disease severe in one district, slight in three districts, elsewhere health of cattle good. Reaping operations almost completed in all districts.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(Feb. 3rd)		
Gauhati . . .	. . . .	Weather seasonable. Public health fair; cattle-disease in some mauzas. Gathering of mustard still continues.
Sylhet . . .	. . . .	Prospects of crops same as last week. Cholera on the decrease.
Cachar . . .	. . . .	Weather cold. Reaping of *sail* and *asra* crops finished. Outturn is slightly below the average of last year, owing to want of rain. Common rice 16 seers per rupee. Three deaths from cholera reported from Hailakandi; general health good.
Dibrugarh . . .	·16	Weather seasonable. Land clearing for *aus* crop.
Mysore and Coorg—(Feb. 3rd)		Standing crops in good condition; harvesting completed in parts of the Mysore district, and sowing of paddy commenced generally throughout the State; prospects of season fair. In Kolar district the water-supply is reported to be diminishing. Public health good; fever and smallpox prevalent in parts; cattle-disease continues in affected parts of Bangalore, Kolar, Kadur and Shimoga districts. Prices slightly fallen in the Kolar district.
Bangalore . . .	. . . .	
Mysore . . .		
Mercara . . .	. . . .	Slight fall in prices of food grains, prospects of season good. Smallpox prevalent in the Padinalknad taluk.
Berar and Hyderabad—(Feb. 3rd)		
Amraoti . .	. . . .	Weather clear. Threshing of *jowari* continued; *rabi* crops in good condition. Prices—wheat 22 and *jowari* 26 seers per rupee.
Akola . .	. . . .	*Jowari* threshing and cotton picking almost completed; *rabi* crops favourable.
Hyderabad . .	. . . .	*Rabi* crops prospering; weeding of *tabi* crops commenced. General health fair. Prices—wheat 14¾, coarse rice 13, white *juar* 20½, yellow *juar* 24, and *tur* 15¾ seers per current sicca rupee.
Central India States—(Feb. 3rd)		
Indore . . .	. . . .	Weather very cold. Health and prospects good.
Morar (Gwalior) . .	. . . .	Health and prospects good. Weather seasonable.
Sutna . . .	. . . .	Weather cloudy and warm. Prospects good. Cholera still reported from Ramnagar tahsil.
Neemuch . . .	. . . .	Weather cold. Health and prospects good.
Goona . . .	. . . .	Weather very cold. Health good. Crops damaged by frost in certain places.
Agar . . .	. . . .	Health and opium prospects good.
Sehore . . .	. . . .	Weather clear. Crops and public health good.
Nowgong . . .	. . . .	Total rainfall 44·65.
Manpur . . .	. . . .	Crops good; opium crops far below average. Health good.
Rajputana—(Feb. 3rd)		
Abu (Feb. 3rd)	*Nil*	Health good. Weather very cold and windy.
Sirohi („ 1st)	*Nil*	Tanks drying. Wells, health and crop prospects good. Weather cold and cloudy.
Marwar (Jan. 30th)	*Nil*	Tanks almost full. Smallpox still prevalent. Prices stationary Weather clear and cold.
Kherwara (Feb. 1st)	*Nil*	Health generally good, but pneumonia still prevalent; slight foot disease among cattle. Weather colder, cloudy, and windy.
Partabgarh (Jan. 31st)	*Nil*	Tanks and wells very low. Crop prospects and health good. Prices of wheat and *mucca* stationary; gram cheaper. Weather cloudy.
Meywar (Feb. 1st)	*Nil*	Tanks and wells low. Health and crops good. Prices stationary. Weather seasonable.
Harowti („ 1st)	*Nil*	Weather colder. Smallpox in Tonk. Water low in Deoli. Prices stationary.
Jhallawar (Jan. 29th)	*Nil*	Health and prospects continue good.
Ajmere (Feb. 2nd)	*Nil*	Weather colder. Crops good. Smallpox and fever still prevalent in Merwara.
Dholepur (Jan. 30th)	*Nil*	Tanks and well drying. Health and prospects good. Prices steady.
Kerowlee („ „)	*Nil*	Tanks drying; wells decreasing. Prospects excellent. Health good. Prices average.
Ulwar (Feb. 2nd)	*Nil*	Prospects and health good. Weather occasionally cloudy.
Bikanir (Jan. 30th)	Rainfall—Slight rain in disrict on 23rd and in	Fever and smallpox in Ratangarh; health otherwise good. Prices stationary. Weather cold.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE BOMBAY PRESIDENCY (EXCLUDING SIND) FOR 1884-85.

No. 30 I, Fort William, 4th February 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, Public Works Department, No. 1 W. I.—2, dated 8th January 1886, forwarding the above Report, and the Local Government Resolution reviewing it.

OBSERVATIONS.—The Capital outlay, direct and indirect, incurred up to the end of 1884-85 on works in operation for which Capital and Revenue Accounts are kept, amounted to Rs. 1,77,23,425; the interest charges of the year to Rs. 3,82,695;* and the accumulated balance of unpaid interest up to the end of the year to Rs. 52,32,084.†

2. The assessed revenue of all kinds derived from works in operation during the year amounted to Rs. 2,47,702; the maintenance charges, including indirect outlay, to Rs. 1,92,612; and the net revenue to Rs. 55,090, or 0·31 per cent., on the Capital outlay to the end of the year. Details of the revenue and working expenses are given in Statement IV C appended to this Resolution.

3. In the following statement the areas irrigated, gross revenue assessed, and the maintenance charges of 1884-85 are compared with the average of the five preceding years :—

Year.	Acres irrigated.	Assessed revenue, direct and indirect.	Working expenses.	Net assessed revenue.
		Rs.	Rs.	Rs.
Average of 5 years 1879-80 to 1883-84 .	29,502	2,39,293	1,53,790	85,503
1884-85	39,655	2,47,702	1,92,612	55,090

The irrigated area of 1884-85 is 6,693 acres in excess of that of the previous year 1883-84, the increase being due to the recent reduction in water-rates which explains also the comparatively slight increase in revenue.

4. The tendency of maintenance charges to increase still continues at a rate considerably in excess of the rate at which the revenue has increased. Taking the figures of assessed revenue and of working expenses given in para. 4 of the Chief Engineer's review, we see that the percentage of working expenses has risen from 69·51 per cent. of the revenue in 1879-80 to 77·76 per cent. in 1884-85. The Government of India would again impress on the Local Government

Year.	Assessed revenue.	Working expenses.	Percentage of maintenance charges on revenue.
	Rs.	Rs.	Rs.
1879-80 . .	1,79,839	1,25,015	69·51
1880-81 . .	2,07,494	1,47,995	71·32
1881-82 . .	2,12,313	1,58 982	74·88
1882-83 . .	2,48,714	1,66,870	67·09
1883-84 . .	2,44,247	1,70,089	69·64
1884-85 . .	2,47,702	1,92,612	77·76

* This represents interest charges on Capital outlay on Productive Public Works only, interest on other works not being calculated under the existing rules.

† Interest on Capital outlay on Productive Public Works only has been taken into consideration.

the necessity of reducing the maintenance charges of these works. When the working expenses of the Hathmati Canal amount to 315 per cent., of the Lakh Canal to 366 per cent., and of the Ashti Tank to 500 per cent., of the gross revenue from all sources* the value to Government of such works appears somewhat doubtful.

* See Statement No. II E, appended to the Chief Engineer's report.

5. The marginal statement compares the irrigated areas of 1884-85 with the corresponding averages of the five previous years. Excepting under Sugarcane, there has been a general increase in the areas irrigated, due, as before explained, to the late reduction in water-rates.

Crops.	Average of 5 years, 1879-80 to 1883-84.	1884-85.
	Acres.	Acres.
Sugarcane . . .	4,340	4,229
Rice	1,976	2,304
Millets	7,070	8,636
Wheat	5,501	9,336
Pulses	6,273	7,760
Other crops . . .	4,342	7,102
Total .	29,502	39,367*

* This is the area actually irrigated, the area assessed as irrigated being 39,655 acres.

6. The outstanding balances of uncollected revenue still bear a very high proportion to the demands, amounting to Rs. 56,661 out of a total demand of Rs. 3,07,957, or 18·4 per cent.

7. The revenue and working expenses of the "Works for which only Revenue Accounts are kept" are compared in the following statement for 1884-85 and the two previous years :—

YEAR.	Gross revenue from all sources.	Maintenance charges of all kinds.	Net revenue.
	Rs.	Rs.	Rs.
1882-83	4,45,843	2,45,530	2,00,313
1883-84	4,97,827	2,04,841	2,92,986
1884-85	5,08,037	2,49,460	2,58,577

8. The Report for the year under review has been submitted in a very satisfactory form, having been much condensed, while at the same time all necessary information has been given, either in the general remarks or summarised reports on the several works, or the various tabular statements.

In future Revenue Reports, Statement F (at page xix of Report) may be substituted for Statement I B, appearing under that heading, and Statement G may be discontinued, column 3 of Statement III C being sub-divided into 2 sub-heads of "Rabi," "Kharif."

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Department of Finance and Commerce and to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance, and that copies of the Report and of the Resolution be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

The Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department, for communication to the Resident at Mysore and the Chief Commissioner of Coorg.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Ordered further, that this Resolution and the Resolution by the Local Government be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State.

H. A. BROWNLOW, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

Appendix to P. W. Dept. Resolution No. 30 I. of 1886.

IV C.

Statement showing the financial results of Irrigation Works in Deccan and Gujarát for the year ended 1884-85, based on assessment of the year.

Principal results and operations for the year ended 31st March 1885.

Enclosure to P. W. D. Resolution No. 30 I. of 1886.

No. 1 W. I.—2, dated 8th January 1886.

RESOLUTION,—By the Government of Bombay, Public Works Department.

Read—

Letter from the Chief Engineer for Irrigation, No. 3547, dated 5th December 1885.

Forwards the Irrigation Revenue Report of the Bombay Presidency, excluding Sind, for the year 1884-85, and offers the following explanation to account for the report not being ready for submission by the fixed date:—

"The main body of the Report was ready in September, but great difficulty was experienced in getting the new statements properly prepared, and frequent references to the various Executive Engineers were necessary before they could be considered satisfactory. The Administrative Accounts were received from the Examiner of Public Works Accounts on 14th and 19th September and 16th October 1885, and such of the statements as had to be prepared by him were received on 14th October 1885. On the receipt of all the documents, Part I of the Report was forwarded to the Press on 23rd October 1885, and Part II followed on 4th November 1885, the delay in its preparation being due, as explained by the Examiner, to certain information being awaited from the Deputy Collector of Surat, without which the Revenue accounts of the 2nd class irrigation works could not be completed. These documents were received in this office on the 28th October 1885. From this, I trust, it will be seen that such delay as has occurred was quite unavoidable.'

RESOLUTION.—The Report under review contains a series of statements prepared in accordance with recent orders of the Government of India concerning the adoption of uniform statistical statements to accompany the Revenue Reports from all Local Governments and Administrations. The completeness of the information contained in these statements has allowed of curtailment of the divisional reports, and as a consequence the bulk of the Report been much reduced. There has been some delay in the submission of the report, but the Chief Engineer for Irrigation offers a satisfactory explanation to account for it. It is hoped, however, that next year endeavour will be made to submit the Report earlier, as the divisional officers will, after this year's experience, be better acquainted with the requirements of the new statements, and less delay should occur in securing the necessary information for their preparation.

2. The number of works in operation was increased during the year under review by the addition of three, which were opened for irrigation in the Belgaum and Dhárwár Division. The total number of works is now 32.

3. The total Capital outlay during the year has been Rs. 11,09,660, bringing the total Capital outlay to the end of the year to Rs. 2,09,64,546.

4. The area irrigated was 39,655 acres—an increase of 6,693 acres over last year. This increase appears almost entirely in cereals and is most marked in, 'jowári'—a result which is attributed to the recent reduction in rates.

5. The gross revenue realized from all sources during the year was Rs. 2,60,080, of which Rs. 2,51,012 were from direct receipts, and Rs. 9,068 from indirect receipts.

6. Working expenses rose from Rs. 1,70,089 in 1883-84 to Rs. 1,92,612 in 1884-85. The total charges in the Public Works Department were Rs. 1,74,737; deducting from this the sum of Rs. 31,958, the cost of maintenance of the Poona water-supply, the balance for irrigation was Rs. 1,42,779, which gives a rate of Rs. 3·60 per acre, as compared with Rs. 3·80 in 1883-84 and Rs. 4·37 in 1882-83. The net revenue for the year, after deducting working expenses and neglecting the amount formerly entered in the accounts as saving to Government from the supply of Mutha Canal water to the station and cantonment of Poona, was Rs. 55,090, or 0·31 per cent. on the Capital outlay.

7. The gross area under command of all the works is 744,489 acres, and the net irrigable area at present is 276,995 acres; of the latter only 39,655 acres were actually irrigated during the year, which shows a percentage of 14·3.

8. Statements G and H, attached to the Report, show the actual outstandings and the financial operations of the year as determined by the water-rate assessments. The preparation of these statements was ordered by Government in order to prevent mistakes concerning the outstandings which formerly included the rabi assessments not in reality due for collection until the following year. From Statement G it appears that Rs. 42,495 were outstanding on account of water-rates, and the total outstanding from all sources of revenue was Rs. 56,661. The total amount returned for realization on all works up to date being Rs. 13,17,374, the latter amount represents 4·30 per cent. as compared with 4·9 per cent. in 1883-84 and 8·7 per cent. in 1882-83.

9. Part II of the Report shows that the gross revenue from all works for which only Revenue Accounts are kept amounted to Rs. 5,08,037, and the working expenses to Rs. 2,49,460, showing a net revenue of Rs. 2,58,577. The total net revenue from all works in operation (Part I + Part II) is thus Rs. 3,13,667.

10. The total area irrigated was 140,635 acres as compared with 138,468 in the previous year. The average water-rate is thus Rs. 3·59 and the cost of maintenance Rs. 1·77 per acre irrigated.

11. Copies of the Report and of this Resolution should, as usual, be forwarded to the Government of India and the Secretary of State.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 29th January, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E., V.C., R.A.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble Amir-ud-dowlah Saeed-ul-mulk Rajah Mohamed Ameer Hosan Khán Bahádur Mumtaz Jung.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

LICENSE-TAX AMENDMENT BILL.

The Hon'ble Sir A. COLVIN moved that the Report of the Select Committee on the Bill for imposing a tax on income derived from sources other than agriculture be taken into consideration. He said :—

"The Report of the Select Committee has been for a week before the public, and I observe from the comments in the newspapers and elsewhere that the provisions of the Bill as now modified have been generally taken into consideration. The Report enters fully into the modifications proposed by the Committee, and it is, I think, unnecessary that I should take up the time of the Council without sufficient reason, by going over ground which has already been thoroughly traversed in the Report. I will therefore now limit myself to drawing attention briefly to the principal points in which the Committee has modified the provisions of the Bill. First, in the third clause of section 5 we have provided an exemption with regard to the houses of persons occupied in the pursuit of agriculture, so that houses actually in the occupation of landholders or agriculturists in connection with the land which they hold or cultivate, and which is necessary to them in the exercise of their calling, will not be liable to the tax. Secondly, we have exempted any portion, not exceeding one-sixth, of the income of a person liable to the tax, when such portion of his income is devoted to the purpose of securing a deferred annuity or an insurance upon his life, following in this respect the practice in England. The provision making a distinction between the assessable minimum amount of incomes from official salaries and other incomes has also, in deference to the views of the Select Committee, been struck out. There appeared to the Government, as originally advised, sufficient reason for making this distinction, but in view of the general disapproval which has been expressed regarding it, it was thought unwise to retain the provision in the face of the opposition it was likely to meet with. We have also omitted the provision requiring that private employers shall deduct the tax from the salaries paid to their employés. We found that great objection was taken to this provision by the mercantile community and other classes of employers, who represented that there would be considerable difficulty in practice in carrying it out, and that it would impose upon them much annoyance and inconvenience, while at the same time they expressed their perfect willingness to submit lists of their employés and of the salaries paid to them, so as to facilitate as much as possible the assessments of their incomes. Here, again, we were able, while retaining an option in the matter, where it could be worked by mutual agreement, to meet the wishes of the Select Committee. With regard to the taxation of shipping companies, it was represented by the Hon'ble Mr. Steel that the carrying out of that provision of the Bill was impracticable, that it never had worked in practice, and that its retention would only lead to a great deal of annoyance without any good result. We assured ourselves that it never had worked, that we had on previous occasions got nothing from it, and we satisfied ourselves of the force of the objections raised as to its impracticability. We felt ourselves the more bound to give our respectful attention to the objections and remonstrances urged on us in this respect, inasmuch as they came from a quarter whence great support and assistance had been afforded us, so that we could rest fully assured that the criticism was made in no captious or idle spirit. Our hon'ble colleague Mr. Steel, speaking on behalf of the community whom he represents, advised us that while they were anxious to support the measure now before us as a whole, on this particular point we were, they thought, in error; and that were the section retained in the Bill great annoyance would probably be caused to shipping agents without any prospect whatever of advantage to the Government. We have accordingly altered the draft Bill to obviate this objection. The only other provision to which I consider it necessary to draw the attention of the Council is that which relates to appeals from assessments made under the Act. Under the original draft of the Bill no appeal was allowed from any assessment, but the Commissioner of the division might at his discretion entertain an appeal in any case in which he thought fit to do so. But it was pointed out to us that, with regard

to assessments upon the larger incomes, it would certainly prove inconvenient not to allow an appeal; it was admitted that in the smaller assessments an unlimited right of appeal was objectionable, because experience had proved it to be of no practical utility; but in the case of the larger incomes it was represented that appeals must, from the nature of the case, be comparatively few, while, on the other hand, there could be brought before the appellate authority, in such cases, materials and data in support of the appeal which were not possible in the case of assessments for the less important amounts. As the main object in originally drafting the Bill had been to prevent the accumulation of a large mass of appeals against small assessments, submitted rather *pro formâ* than because the appellant was in a position to urge anything in the form of proof, or the appellate authority in a position to exercise a sounder judgment than the officer assessing, we were prepared to meet the objection urged on us by enacting that an appeal should be allowed on the larger assessments, while, in regard to other assessments, we retained the provisions of the License-tax Acts, which have been found to work satisfactorily. We have accordingly modified the provision so as to admit of the revision upon appeal of assessments amounting to Rs. 250 and upwards. I think these remarks will suffice to draw attention to the points of main importance in the Bill as it has been amended by the Select Committee."

The Hon'ble Mr. STEEL said :—"I cannot allow this opportunity to pass without expressing the obligations which are due to the hon'ble member in charge of this Bill for the fair and reasonable spirit in which he has carried it through the Select Committee. Some of its provisions were of a nature which might have occasioned much irritation if the objections to them had been met in a less conciliatory manner. The hon'ble member has described the changes which have been made in the Bill. The special exemption of Government servants with salaries under Rs. 100 per month would have caused jealousy and offence; and, as it appeared to be supported by no sufficient reason, its excision has been a great improvement to the Bill. The Committee have been able to make another change in the Bill which is of considerable importance as satisfying objections from all parts of India. I mean the exclusion of those clauses which were designed to bring under the operation of the Bill shipping owned elsewhere than in British India but trading between foreign countries and Indian ports. The original clauses of the Bill were strenuously opposed by the agents who have charge of such shipping in India. They pointed out the impossibility that any one in India could ascertain or fairly assess the profits made by such shipping; that even the owner in England or elsewhere could make no proper return of the share of his profits liable to taxation, much less the agent in India; that the clauses, if applicable at all, must apply to any vessel touching at an Indian port; that the clause which enabled a Collector to call upon an agent for information which he could not possess was unfair and oppressive. These arguments had due weight with the Committee, who further satisfied themselves that similar clauses in former Acts had been absolutely inoperative and produced no revenue. Under these circumstances the concession made by the Committee has cost nothing to the revenue, while it has relieved ship-agents from the apprehension that some zealous Collector might endeavour to fasten upon them an onerous obligation impossible to be fulfilled. The Hon'ble Mr. Mukerji has given notice of his intention to propose that the duration of the Bill shall be limited to one year. I will not anticipate his remarks, but I will take this opportunity to say that, whatever be the result of his amendment, the payers of income-tax will now fairly claim that under the present Bill they will contribute at least their full share; and, when any remission of taxation is possible, they will expect that their case shall be considered on its merits along with all other claims for relief which may be put forward."

The Hon'ble PEARI MOHAN MUKERJI said :—"I only wish to refer to one point, and that is section 29. It will be seen that, unless otherwise provided by the rules to be framed by the Act, the tax will be collected in one instalment for the whole year from all persons except those holding salaried

offices under Government or in private employment. I think it will be more equitable to collect the tax by quarterly instalments."

The Hon'ble RAO SAHEB VISHVANATH NARAYAN MANDLIK said:—"I have noted, in the remarks which I have appended to the Report of the Select Committee, the subjects upon which I differ from the majority of my colleagues and on which I now wish slightly to touch with the permission of Your Lordship. I think the machinery of the Act, so far as it could be improved,—and this I speak from my experience of the first Income-tax Act, in the working of which I had the honour to be associated,—has been improved by the Select Committee, guided by the Hon'ble the Financial Member. But when I have said that, I think I have said nearly all that I can say in favour of the present measure. I had wished that the way had been seen to confine its operation to one or two years, and this on grounds already indicated in the remarks which I submitted to the Council on the first occasion; because, if that had been done, the measure would have been received with greater satisfaction by the people, and I should not have said much on this occasion. I think the remarks which were submitted to the Council by the Hon'ble Mr. Hope raised issues which were very wide, and with some of which I do not propose to deal at this stage. In my speech on the last occasion I simply took for granted the necessity of some new tax as pleaded by the Hon'ble the Financial Minister. I think the country is quite ready to meet his views so far. If the money is wanted for one year or two years, there is the Bill. But beyond that, if you seek to make this a permanent Bill, I say it would be going in the teeth of the past history of the country. I think the remarks which have fallen from the Hon'ble Mr. Steel are just in regard to all measures of direct taxation like that now before us. Some Native Chief may have tried to introduce taxation like this; but for all that I do say that it is unsuited to the country. Past history is against it, and I should not like to see the introduction of such a tax as this, because it will introduce two currents of economic life amongst the vast populations of India, and which ought not to exist; and whatever may be the reason for bringing other races and other classes of people under such measures of taxation, I think the Government of India should prefer those broader lines of financial policy on which I hope the Financial Member will always base his work; and I therefore think it will be better to limit the duration of this tax to the necessities of the occasion and not make it a part of the permanent resources of the empire. The allusion which the Hon'ble Mr. Hope made to the opinion of Mr. Gladstone is, I am sorry to say, not quite pertinent, because it did not refer to the duration of the tax; for, after reference to the volumes of Hansard's Debates, hon'ble members will see that it referred to what may be called the cutting up bit by bit of the scheme or a sort of tinkering of an Income-tax Bill. He did not wish it to be tinkered from time to time, but either to be taken as a whole, or abandoned as a whole. That Mr. Gladstone was strongly opposed to such a tax may be gathered from his condemnation of its character; for he expressed in very clear and decided terms his verdict on that occasion, and further he limited the duration of the tax to only seven definite years. The circumstances and the revenue-systems of England and of India are very different—I may say entirely different. The main sources of our revenue are the land and opium. Into the rest I have no time to go. We had *a* house-tax, and it has been abolished. The Government of India has wisely remitted a very large number of annoying taxes since 1839 and 1844, and imposed others in their places; and I am quite sure that it can rest its action on its broad and equitable foundations; for, at any moment, when the necessity arises, all classes of the people will cheerfully submit to be taxed to the utmost. There is only one point on which I have to make one or two observations in this place, and that is with reference to the tax on houses. The house-tax is well known in this country, but it is not a tax on the income of the householder. I say this from my own experience and a knowledge of the past history of this country. But in order to verify my conclusions I have referred to various sources of information during the last week, with reference to the house-tax in British India and some of the principal Native States throughout the country, and I am satisfied that it is a house-tax and nothing more. It is a tax rather on the value of sites, and the incidence of the tax varies in some States like Kolhapur, in the Southern Marátha country, from two annas to five rupees. We were referred to the capitation-tax in Burma. It existed in two towns in 1852, and was abolished by our Government, which enacted a revenue-tax instead and limited it in a careful manner by regulating it according to the size of the site. I do not think therefore—and I say it with very great respect—that we ought to fall back now on the policy of an obsolete Native Prince cited to us as a model by which to guide our measures of taxation. We proceed on entirely different principles. The resources from which we derive our revenue can be examined in the broad light of day by the criticisms of an enlightened public, and I do not think the Government of British India has anything to fear if it follows the broad lines of a definite policy in such matters. I have differed in one or two things from the Hon'ble the Financial Member. I think that on the whole, for an emergency like this, we have struck out a pretty good rough and ready machinery, and I am only sorry that he should not be able to see his way to make this present Bill a limited one—I mean limited in its duration—and perhaps see his way to abolish it altogether."

The Hon'ble SIR A. COLVIN said:—"I am extremely glad to hear from the Hon'ble Mr. Steel that the efforts of the official members of the Government in Select Committee to meet and conciliate the objections brought forward by himself and his colleagues have met with satisfaction. I think it is also due to them to say that in passing this Bill through Select Committee our own proposals have been met by our colleagues in a similar spirit, and that we have derived from their suggestions the greatest assistance and support. I may, perhaps, be allowed to go further and say that the generous support accorded to the Government in a matter of so delicate a nature, in a burning question of this kind which in former days was the subject of prolonged and bitter controversy, has been to us matter of deep satisfaction; and that the burden laid on me (for no man in my position can propose to increase taxation otherwise than with great reluctance) was greatly lightened when I found that those whom we were compelled to call to our assistance acknowledged the propriety of what we did, and gave us their ungrudging support and assistance in carrying out the measure which we placed before them. Both in the community represented by my hon'ble friend Mr. Steel and in the Native communities represented by my hon'ble friends Bábú Peári Mohan Mukerji and the Hon'ble Rao Saheb Mandlik, I think that it is only right that I should say that our proposals seem to me to have met with a degree of fair and unbiassed consideration which to me has been extremely gratifying. On a point of this sort it is inevitable that differences of opinion must be held and expressed; every man will form his own judgment, and the judgments of many will differ; but the balance of opinion, as far as I have been able to learn, is that the Government is justified in what it has proposed, that the mode in which the measure before us is to be carried out is open to the minimum of objection which can be brought against a measure of this kind, and that our critics, many of whom are called upon in their own persons to contribute, will do so loyally and willingly, if not gladly. With regard to the duration of the tax, the Hon'ble Mr. Steel has put the case in an extremely fair way, namely, that if the Government finds itself in a position to make remissions of revenue hereafter, the question of the income-tax should be put on the same footing and receive the same consideration as any other question of remission of revenue. I quite accept that understanding, and endorse it. With regard to what has been said by the Hon'ble Mr. Mandlik on this point, however, and further as to the propriety of taxing house-property, I will reserve my remarks until the amendments on the point, of which notice has been given by the Hon'ble Peári Mohan Mukerji, are brought forward; but, with regard to section 29, I would point out that the section provides that the tax shall be payable at the time appointed in that behalf in or under this Act, leaving a discretion to the Government in framing the rules to prescribe in what instalments the tax shall be collected, and I may

assure my hon'ble friend that this is one of the points which, on framing the rules, will receive the careful attention of the Government."

The Hon'ble MR. HOPE said :—"I had not intended to trouble the Council with any remarks on this occasion, but am obliged to do so as my hon'ble friend Rao Saheb Mandlik has thought fit to refer to what I said on our former discussion as to the propriety of making the tax a permanent one. I regret that the aphorism that 'two of a trade can never agree' should receive a fresh illustration in the fact that the hon'ble member and myself, who both of us, in one sense or another, may be taken to be representatives of the Western Presidency, are at issue on some points relating to the legislation before us. The hon'ble member has been so good as to consider that my reference to Mr. Gladstone was not pertinent, because Mr. Gladstone, in the very debate from which I quoted his remarks, ended by advocating the duration of the tax for seven years only. I need scarcely say that, in a matter of that kind, I should be the last to pick out a particular sentence or particular view of any great statesman without considering his opinion as a whole. But I think it will be sufficient on the present occasion to say that, although Mr. Gladstone on that occasion advocated the passing of that measure for only seven years, just as Mr. Wilson in this Council advocated its operation for only five years when he first brought an income-tax into the financial system of the country, Mr. Gladstone has now found, by the operation of experience, that the expectation that the income-tax would be a temporary measure has been delusive; and therefore, in advocating the permanent incorporation of direct taxation into the financial system of this country, I may say that I am only following in the footsteps of that great financier whom my hon'ble friend and I myself both agree in respecting. Another point to which I shall briefly allude is that we cannot at the present day draw any profit from the example of what my friend called obsolete Indian Princes. I am very much surprised to hear that Indian princes are considered to be obsolete."

The Hon'ble RAO SAHEB VISHVANATH NARAYAN MANDLIK begged to explain that he had said "an obsolete Indian Prince."

The Hon'ble MR. HOPE continued :—"I am much obliged for the correction. But still, I am afraid that if such a remark had fallen from His Excellency the Viceroy, or from one of the Members of the Government in this Council, it might have been held to be of the very gravest political importance. I trust that it does not portend evil to the Princes of India in the event of our native friends acquiring that larger share in the government of this country which they are so anxious to obtain. To pass to a more serious vein, I may point out why I laid stress on the fact that Native Princes of the present day are at the present moment levying taxation of this particular description. We do hear on various occasions of the oppression and abuses in their revenue-systems, but as to direct taxation, though I have had considerable experience in Native States, I do not recollect a single case of the failure of their system, and it was in view of that fact I stated that their system of direct taxation was worthy of our imitation."

The Motion was put and agreed to.

The Hon'ble PEARI MOHAN MUKERJI moved that the words "and in each subsequent year" in section 4 be omitted. He said :—"The Hon'ble the Financial Member told the Council when introducing the Bill that the proposed imposition was necessary to meet an extraordinary emergency, and that 'there was but one year to be tided over.' I fail therefore to see the necessity of giving a permanent character to a measure of taxation which, in spite of the soundness of its principle, is very unpopular in this country by reason of its attendant evils. The necessity of limiting the duration of the measure is the greater, as the announcement of Your Excellency's intention to appoint a Financial Commission has led the country to hope that several important questions connected with Indian finance would ere long be carefully sifted and satisfactorily settled. There can be no reasonable objection to a fiscal measure

which seeks to make capitalists, professional gentlemen, gentlemen in the public and private services and tradespeople contribute their fair share of the cost of the administration; but I humbly submit that it is wholly premature to declare at present that an income-tax should be levied in the proposed form and at the proposed rate for all time to come, when we have every expectation that, before the ensuing year comes to an end, the proposed Commission will have been enabled to show considerable gain by retrenchment of expenditure, by re-adjustment of Provincial contracts, and perhaps also by a revision of the import-duties. The Hon'ble the Financial Member has very clearly pointed out that, if all direct taxation were abolished, the abolition of the cesses on land should follow as a matter of simple justice. Following up that reasoning, what justification, I ask, can there be for levying a cess of more than three per cent. from the poorest cultivator in the country and exempting from all direct taxation the trader or the money-lender who earns Rs. 499 a year? The enquiries which Your Excellency purposes to institute will enable Your Excellency's Government at the end of a year to enact a more equitable measure of taxation—one which will press equally on all classes of the community, excepting such as are too poor to bear the burden of direct taxation."

The Hon'ble RAO SAHEB VISHVANATH NARAYAN MANDLIK said :—"My Lord,—My remarks on this Motion will be brief. I know that I am in a very small minority, but I wish to support the Motion of my hon'ble friend, first because I have some remarks to make, but secondly and principally because it affords to me an opportunity of giving a personal explanation which otherwise, by the rules of this Council, I shall not be able to give. The Hon'ble Mr. Hope has advocated the linking together of two systems of taxation which are inconsistent with each other: the British system is entirely different from that under the Native Princes. A comparison is thus instituted between two incommensurable quantities. There are many excellent Native Princes who do not require any certificate from me. There are others whose own deeds will duly expose them if they are bad; and they will suffer. But this is not the time nor the place to discuss the merits or demerits of the revenue-systems of the Native States, and I deprecated such discussion in the few observations I submitted to his Council. That I honour Mr. Gladstone is not a new thing. About his merits all are agreed. I know he has not been able to repeal the income-tax in 1860, but the income-tax in England (so far as I have been able to verify my references in Hansard) is brought forward before the House of Commons, speaking generally, *pro formâ* (if one likes to say so); and it is annually voted upon; so that the analogy of the English practice does not help us here in the least. As regards Mr. Gladstone's opinion about the income-tax, it is decisive. He says on the same occasion as follows:—

'The public feeling of its inequality is a fact most important in itself. The inquisition it entails is a most serious disadvantage. And the frauds to which it leads are an evil which it is not possible to characterise in terms too strong.'

"With this opinion before me and with the evidence before this Council, and before the Committees of the House of Commons on Indian finance in 1871, 1872 and 1873, I take leave to say that, whilst I shall heartily support a measure which is required by the Government of India for its administration, as the Financial Member now says it is, for a limited period, I shall not be a party to support the proposal for a permanent Act on grounds which will not bear examination; and it is in this view that I said *the* antiquated Prince, and in saying so I meant no slur on him or on any Prince whatever. I am quite prepared to do as I would be done by; and I think I could not place a higher standard of examination or criticism, before this Council, of any question whatsoever."

The Hon'ble SIR A. COLVIN said :—"The hon'ble mover of the amendment has reminded me that in the speech I made when asking for leave to introduce this Bill I said that a year had to be tided over, and he has drawn from that the inference that if the ensuing year is tided over we shall have no further financial difficulties. I think he will see, if he refers to my speech, that

when I made that statement I was speaking with special reference to the question of interference during their currency with the Provincial contracts. I had said that we had an extraordinary charge put upon us in connection with the measures for the defence of the country and the depreciation in the value of silver, part of which only would fall on us in the ensuing year. I added that in the ensuing year, for the reasons given, to touch the Provincial contracts was undesirable; but I was careful to add that the charges connected with the defence of the country would not reach their maximum in 1886-87, and that, whatever more we may hereafter require, we must in the ensuing year have about £700,000 from this tax. I was careful to say that we might hereafter want more; we should certainly not want less. I thought I had explained sufficiently that I was far from saying that our necessities would probably be limited to the term of one calendar year, but, on the contrary, that we are compelled to incur expenditure arising from difficulties more especially connected with silver, the duration of which we are not at present in a position to define, and that against those growing difficulties might be set any further increase to our revenues at the revision of the Provincial contracts, which it would be premature, for the reasons I gave, to touch at present. My hon'ble friend has proposed that the duration of the tax shall be limited to one year and not to all time to come. If, on the one hand, I have refrained from proposing that the tax should be of an age, and not for all time, on the other, I have certainly never dreamed of proposing that any tax shall be levied for all time to come—for the limitless hereafter. All that we can say, looking at the situation before us, is that on the horizon which can be covered by our eyes there does not appear that little cloud of relief to which my hon'ble friend is impatient to draw attention. Further I cannot go. There are, as is well known, very valid objections to introducing a measure of this sort for the limited term of one year. In the course of the caution which fell from the Hon'ble Mr Evans as to watching carefully the machinery for assessing the tax, amongst other things he drew attention to the necessity for regularity in the order and mode of assessment, regularity in the necessity of which we completely concur, but which can only be attained by applying the same precautions and reasonable prospect of continuity in assessing this tax as are taken in respect of other measures for raising revenue. My hon'ble friend the mover of the amendment has made a comparison between the cess of three per cent. paid by the poorest cultivator and the exemption from all taxation of the trader or money-lender who earned Rs. 499 per annum. I do not know whether in doing so it is his object to do away with this exemption, but in any case, the cultivator, I may remind him, pays his cess on his rent, not on his income. Speaking broadly, though not on that account inaccurately, I should say that the equivalent of what the cultivator pays as local rating in the form of cesses on his land is paid by the small tradesman in the form of municipal taxation or some local impost, and that in practice the one may be taken to balance the other. The man who is not assessed to the income-tax pays in either case in the form of a cess or of other local rate, or of a municipal tax. I do not think I have to say anything further with regard to this special amendment. I may repeat that our necessities are not bounded by the year immediately before us, and it is very desirable that we should do nothing to interfere with the regular and careful introduction of the Act, which will certainly be prejudiced if we were to let it be thought that it will be abandoned at the end of the year. To subject the whole community periodically to convulsion is obviously undesirable, and it is therefore objectionable to keep open the discussion and agitation as to the principles and merits of direct and indirect taxation by annually coming to this Council Chamber for the passing of a new Bill. Believing that there is no immediate probability of lightening the burden of taxation, I am strongly of opinion that on the ground of the public convenience it is undesirable to put any limitation of time to the operation of this Bill. I have only to add with reference to the allusion which has been made to the possible revision of the import-duties by the Committee which will be convened for the consideration of economies, that the proposed Committee will be a Committee to enquire into the possibility of diminishing expenditure, not of raising income; it will be a Committee to devise economies, not to advise upon financial policy. It is to be a special Committee of enquiry into expenditure, not of finance in its larger sense: and I judge it necessary to say this here, as, from his remarks, I gather that my hon'ble friend has somewhat misinterpreted the intention of Government in nominating a Committee."

The Hon'ble PEÁRI MOHAN MUKERJI said:—"I wish to point out that the cesses on land are in no way equivalent to the municipal taxes paid in towns. Even in rural villages the people have to pay the chaukidári-tax and other taxes which are equivalent to municipal taxes. The cesses on land are, properly speaking, direct taxes on income; and if the proposed tax is to be perpetuated it will perpetuate the existence of at least two unequal taxes in the country. What I submit is that, after the matter has been closely examined by the Commission, let there be a uniform and equitable tax throughout the country, and not different taxes affecting different classes of the community."

The Motion was put and negatived.

The Hon'ble PEÁRI MOHAN MUKERJI also moved that for the words "five hundred" in section 5, clause (*j*), the words "one thousand" be substituted. He said:—"In moving this amendment I do not forget that, while the lowest taxable income in England is £150, the cost of living there is three times as great as it is in this country, and that a maximum of exemption fixed in this country at Rs. 500 is, therefore, a just limit according to the English standard of taxation. If I could be sure that no person whose income is less than Rs. 500 would be placed under the operation of the measure, I should have no cause of complaint. But considering the position and character of the people, considering how powerless they are to resist an unjust assessment, and how a maximum limit of Rs. 500 reduces itself in practical operation to a limit of Rs. 200 or Rs. 300, I venture to hope that this Hon'ble Council will see the necessity of raising the minimum of taxable income to Rs. 1,000. I have no data before me enabling me to inform the Council what difference the proposed amendment will make in the aggregate outturn of the measure; but if it be deemed desirable that the tax-collector should not visit the houses of those who are unable to assert their rights and who can secure just exemption from taxation only at a heavy price, and that inquisition should be avoided at any cost, I submit that the minimum limit of taxable income should be raised to Rs. 1,000."

The Hon'ble SIR A. COLVIN said:—"In regard to this amendment I do not think it will be necessary for me to detain the Council very long. But I may recall one consideration which may tend to mitigate to some extent the apprehension, which the hon'ble member feels, that persons whose incomes are less than Rs. 500 a year may run the risk of being assessed. I may, perhaps, be allowed to point out, in passing, that the difference between Rs. 500 and Rs. 1,000 is pretty large, and the precaution which the proposed amendment aims at is perhaps a little excessive if the object of my hon'ble friend is merely to prevent the inclusion in the registers of any person who should not be assessed at all. But, however this may be, the consideration to which I have referred will be found in the expression used by Your Lordship in the opening of these debates when it was said that what we are engaged in doing was in adding an upper storey to a building which had been already commenced. Incomes between Rs. 500 and Rs. 1,000 with rare exceptions have for the last eight years been assessed under the license-tax. The lower storey will remain very much as we found it. There will be some re-adjustment of the rate of assessment between Rs. 500 and Rs. 1,000, which will be caused by certain changes and modifications we have made with the object, in the case of these incomes, of giving greater relief. But I should imagine that during the last eight years men whose incomes are between Rs. 500 and Rs. 1,000 and who have been placed on the register will find the chance of their assessments being increased very limited; while those whose incomes are less than Rs. 500 have, it may be reasonably supposed, during the past eight years, been determined. All that we are doing with the lower storey is to open out a fresh door by which persons following certain other professions may be

admitted, but with the great mass who have already tenanted it, or with those for whom it does not profess to find accommodation, we have practically no concern. Our object, moreover, in the introduction of the present Bill is to bring in a larger income, and it would therefore need stronger reasons than that urged by my hon'ble friend to cause us to raise the assessable minimum. By doing so we should find ourselves practically cutting off at one end what we added at the other, and we should suffer proportionately. I cannot at present say precisely what the precise result would be to the yield of our proposed measure were we to adopt the amendment, but it would be considerable. I can assure my hon'ble friend, however, that so long as I have the honour to preside over the Financial Department, under whose auspices the proposed income-tax will be worked, my attention will be given to the working of the Act, so as, as far as possible, to prevent its operating with injustice or hardship on the smaller incomes, and the classes of assessees the least capable of looking after themselves, classes for whom, if he will believe me, I can assure him I have as much sympathy as my hon'ble friend himself."

The Motion was put and negatived.

The Hon'ble PEÁRI MOHAN MUKERJI also moved that section 24 be omitted. He said:—"The income which owners of buildings in a city or village derive by letting the buildings on hire will come under assessment under Part IV of the second schedule. To this provision I have no objection. But section 24 refers only to houses which are not let on hire and which are occupied by the owners themselves. It seeks to impose a tax not on an income actually derived but on an imaginary income which could be derived if the houses were let on hire. I confess I fail to appreciate the reasoning on which this provision is based. Buildings used by their owners as dwelling-houses yield no income whatever. In the case of poor descendants of families who were once rich, they do not afford even a criterion of the means of the occupiers. A provision to tax such buildings as sources of income is wholly incomprehensible to a community among whom living in one's own house is the general rule and living in hired houses a rare exception. On the same reasoning might a demand be made for income-tax upon owners of steamboats, carriages and horses, of jewels and of other personal property capable of yielding income if let on hire. Apart, however, from the question of principle, the assessment of houses presents practical difficulties of no ordinary character. In most places there is no standard for determining the annual value of houses, and the assessments must, therefore, be most arbitrarily made. People will be subjected to no end of inquisition, hardship and harassment. The Cess Act of 1871 provided for the assessment of houses outside the limits of municipalities, but the work was found to be attended with so much difficulty to the assessor and oppression to the assessee that it was given up in despair. The amount assessed in these provinces in 1873-74 was Rs. 66,342, but it was at a cost of Rs. 66,942. In 1876 District-officers were requested to exercise their direct supervision in the work of assessment, because, observed the Bengal Government, 'left to the working of panchâyats and underlings, it may be a great oppression to the people, while the present results are anything but satisfactory.' In 1877 the Bengal Government observed in their Administration Report, 'the house-cess is not, however, suited to the circumstances of the country, and its abolition is contemplated.' When we have found it desirable to encourage thrift by exempting from taxation portions of salaries paid for securing deferred annuities, and to exempt owners of seagoing vessels by reason of the difficulty of the assessment of their profits, which are presumably enormous, and with reference to which, by the way, the Madras Chamber of Commerce, after pointing out the difficulty of assessment, claimed only allowances for losses incurred on some voyages, I fail to see the justice of bringing under the operation of the Act a description of property which yields no income to the owner and the assessment of which must necessarily be oppressive and inequitable. I submit, my Lord, that every argument bearing upon the question points to the justice and expediency of exempting from taxation all houses not let on hire."

The Hon'ble MR. EVANS said:—"I wish to say one word on this amendment. I do not agree with the hon'ble member who has just spoken on the principle of the amendment, but there is no doubt some force in what he said in regard to the immense difficulty of assessing Hindu family dwelling-houses. So great was the difficulty felt in Calcutta that the Municipality, having found it impossible to ascertain what such houses would let for, have actually insisted on assessing the rate at a percentage on the cost of the building, seeing that they could not do it in any other way. They had been pulled up by the High Court for going beyond their powers, although there is no appeal from anything done under the Act. It will be for the Hon'ble the Financial Member to consider what instructions he should give regarding the assessment of such houses in villages for which tenants cannot be found at any price; and as to which it will be very difficult to find the value at which they may be reasonably expected to let."

The Hon'ble RAO SAHEB VISHVANATH NARAYAN MANDLIK said:—"My Lord, in my dissent recorded at the foot of the Select Committee's Report, I had objected to the application of this section except to large towns. I have since made particular inquiries, and I think some of the grounds which my hon'ble friend Bábú Peári Mohan has urged are applicable even to very large towns, such as Puna for instance. There are in such towns large buildings which have cost thousands and even lákhs, and which can be had, some of them, for Rs. 30 or 40 a month. If the first cost of a building is to be taken as a measure for taxation, the new tax will be simply ruinous. Seeing that, in municipalities, taxation is already at too high a figure (something over five crores is, I believe, the total of municipal and local taxation in 1882-83), I think it is very desirable, if the Hon'ble the Financial Member can see his way to do so, to omit this clause altogether, as he has already done in the case of agricultural buildings and the houses of landholders and tenants. And seeing that house-property is already taxed in Bombay at Rs. 15-12 per cent., and under the Calcutta Municipal Act of 1876 the maximum rates amount to 21 per cent., I think it very desirable that the Financial Department should act on the principle, already recognized in this Bill, that when a man is once taxed he should not be subjected to another tax in the same capacity."

The Hon'ble SIR A. COLVIN said:—"The section to which my hon'ble friend, the mover of the amendment, has taken objection is no new section. It has found its place in all preceding Bills of this kind, and the principle of rating which has been adopted is the principle prevailing in England, and hitherto recognised in India; so that we have in our favour every precedent, as far as I know, without exception. And in spite of what my hon'ble friend has said I can see no reason for not levying a tax upon the assumed rental of houses occupied by their owners, which appear to me as liable to assessment as incomes derived from any other form of property. If a man invests his capital in house-property, I fail to see why, though he occupy such house himself, the income which he derives, indirectly though it may appear to be, from his investment, should not be subjected to assessment. The Hon'ble Mr. Evans has taken exception to the difficulty of assessing a particular kind of house-property. That appears to me a fair point to bring home to the Government, and it will receive careful consideration in framing the rules. I have not the least doubt that His Honour the Lieutenant-Governor will give this point his careful consideration. But, although there may be some difficulty in working the rules, I do not think we shall be justified in adding another exemption to those already contained in the Bill. Where a rule of assessment is impracticable, and has, as in the shipping case just referred to, been proved impracticable, we may well be expected to abandon it; but a mere difficulty of working must be met, not by exemption, but by care in administration. If the difficulty alluded to by my hon'ble friend Mr. Evans is connected with the joint property of zamíndárs living upon their estates, such property is expressly exempted under the Bill, inasmuch as it is a building which the receiver of rent by reason of his connection with the land requires as a dwelling-house."

[The Hon'ble MR. EVANS—"I do not mean the dwelling-houses of zamíndárs, but of mahájans."]

The Hon'ble SIR A. COLVIN continued:—"Then the difficulty must be provided for in the rules, and we have to thank our hon'ble colleague for having warned us of it. As to the exemption asked for, in spite of the experiences quoted by my hon'ble friend the mover, which do not refer to measures similar to that now before us, but to a local law, with the working of which I may admit I am not familiar, in spite I say of experiences which seem to me to refer to other circumstances and to be not very much to the point, in view of the experience gained from other parts of India, we should certainly not be justified in making the exemption asked for. I have never hitherto heard that in Bengal the former Income-tax Acts were worked so objectionably under this head as to demand exemption of houses occupied by their owners. From other provinces no complaints were made. It is matter not of principle, but of practice. The ascertainment of the letting value is matter for the rules to be made under the Act, but I cannot admit that this class of houses is to be assumed, for the purposes of the proposed Act, to have no letting value at all. We have universal precedent both in England and in India in regard to the assessment of house-property; while here in India, in the hitherto working of measures of this nature, this has not been a difficulty brought to our notice as in any way demanding exemption. So far as difficulties of assessment are concerned, the objection is one which requires our attention, and in framing the rules great care will be taken to avoid the injustice and annoyance which the hon'ble member anticipates."

The Motion was put and negatived.

The Hon'ble SIR A. COLVIN then moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

NORTHERN INDIA FERRIES ACT, 1878, AMENDMENT BILL.

The Hon'ble MR. HOPE moved that the Report of the Select Committee on the Bill to amend the Northern India Ferries Act, 1878, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN CONTRACT ACT, 1872, SECTION 265, AMENDMENT BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to amend section 265 of the Indian Contract Act, 1872, be taken into consideration. He said:—"This is a Bill to amend a section of the Contract Act which has given the Courts a good deal of trouble. It relates to the winding-up of the business of a firm after the termination of the partnership. The authorities whom we have consulted are by no means in accord as to the precise form which the amendment should assume, but the Select Committee came to the conclusion that there are practically only two alternatives—either to repeal the section altogether as out of place in an Act which professes to deal with substantive law and not with procedure, or to recast it in such a way as to bring it into conformity with one of the forms of plaint in the Civil Procedure Code. We have preferred the latter alternative as less likely to cause misconception than mere repeal."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

MIRZAPUR STONE MAHÁL BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to declare and amend the law relating to the Stone Mahál in the District of Mirzapur in the North-Western Provinces be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN SECURITIES BILL.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill to amend the law relating to Government Securities. He said:—"In the Report submitted in October last by the Select Committee on the Bill which became Act XIX of 1885, it was stated that the question of applying the rule of survivorship to Government securities issued after as well as before the first day of April, 1886, would be further considered during the Calcutta session. The question has now been fully discussed, and the Government of India has decided to propose the maintenance of the rule of survivorship which has hitherto obtained. Effect will be given to this decision by the repeal of the words in section 3, sub-section (*1*), Act XIX of 1885, which restrict the operation of that section to Government securities issued before the first day of April, 1886.

"By sections 4 and 5 it is proposed to introduce into the law relating to Government securities provisions enabling holders for the time being of public offices to hold those securities, and prohibiting the making of indorsements on allonges annexed to them.

"Section 4 of the Bill, in providing that Government securities may be made and indorsed payable to the holder for the time being of an office, follows the English Bills of Exchange Act, and will put an end to the public inconvenience which is caused by the present uncertainty as to the state of the law in India.

"As regards section 5, the risk of fraud which attends the practice of writing indorsements upon allonges is held to justify the prohibition of annexing them to instruments which, like Government securities, are readily renewable.

"The last section of the Bill merely empowers the Governor General in Council to make authoritative rules for the maintenance of existing practice with respect to the record and acknowledgment of payment of interest and to the renewal of securities which have become covered with indorsements."

The Motion was put and agreed to.

OUDH RENT BILL.

The Hon'ble MR. QUINTON moved for leave to introduce a Bill to consolidate and amend the law relating to rent in Oudh. He said:—

"Nearly 18 years have elapsed since the Oudh Rent Act was passed, and it may be well that I should recall to the recollection of this Council the circumstances under which it was carried before I state the provisions of it which in the opinion of the Local Government and the Government of India now call for amendment. The passing of the Act was the final step in a long controversy which had raged in and out of the province for several years previously. It gave legal effect to certain concessions mutually made by the parties to that dispute. It granted hereditary rights of occupancy on beneficial terms to an ex-proprietary body,—tillers of the lands once owned by themselves or by their ancestors,—and it left the remaining tenants throughout Oudh in the position of tenants-at-will,

liable to pay such rent as their landlords might demand, and subject to ejectment from their holdings on a month's notice.

"The Government of the day had scanty materials by which to judge of the probable effects of these provisions. There had been no regular census of the population, and the regular settlements of the Province were still being made. It was understood, however, by the Government of India that the provisions respecting tenants with a right of occupancy would embrace in their aggregate a large body of the cultivators of the Province, and of those classes especially which claim most strongly the sympathy and interest of the British Government. The harshness of the provisions respecting tenants other than those possessed of rights of occupancy was believed to be more apparent than real, inasmuch as the Chief Commissioner so late as 1865 had put on record that in three-fourths of Oudh there was a deficiency of cultivators, that they were so valuable that no landlord would seek to get rid of a good one, and that even in parts where population is more abundant no symptom that the cultivators needed protection had then been manifested. Further, the Act purported to extend a certain amount of protection to every improving tenant by giving him a right to compensation for his outlay on improvements whenever his rent was enhanced or when he was evicted from his holding—a statutory right then novel in this country, and lastly, the terms of the taluqdárs' sanad or written grants of their estates were supposed to furnish a sufficient guarantee against oppressive treatment of tenants in taluqdárí estates.

"I may remind the Council that all proprietary rights in the soil of Oudh were confiscated by a proclamation of Lord Canning after the mutiny, and that their estates were granted to the taluqdárs afresh on certain conditions; among them the following:—

'It is also a condition of this grant that you will, so far as is in your power, promote the agricultural prosperity of your estate,' and 'as long as the above conditions are observed by you and your heirs in good faith, so long will the British Government maintain you and your heirs as proprietors of the abovementioned estate.'

"These conditions, in the opinion of Sir Charles Wingfield, the most staunch supporter of the rights of the taluqdárs, would of themselves furnish the Government with a warrant for stepping in to prevent oppression of their cultivators by taluqdárí landlords.

"So much as to the provisions of the law as it stands, and as to the beliefs and intentions of those who framed it respecting its probable effects. I now proceed to show how far the working of the law has accorded with these expectations. For this, materials are not wanting. The last census, which was taken in 1881, gives full statistics respecting the agricultural classes of Oudh. The Rent Act authorizes the issue of notices of ejectment, through the agency of the revenue-offices, and the great increase in the number of these, which rose by rapid jumps from 23,600 in 1876 to 90,200 in 1882, attracted some years ago the attention of the Chief Commissioner and the Government of India. Enquiries were from time to time instituted which led to no very definite result. During the course of one of these enquiries a case came to light in which Sir George Couper had felt it necessary to interfere, in the terms of the sanad, to check what appeared to be harsh and unjustifiable raising of rents in the case of one particular estate; but on re-consideration there seemed to be room for condoning the error and restoring the taluqdár to his possessory management.

"The case, however, disclosed circumstances which, being acknowledged to be not uncommon in Oudh, necessitated a comprehensive enquiry into the general condition of the tenantry throughout the Province, which was accordingly ordered by the Government of India. The method of enquiry was that in each district 50 or 60 villages should be selected which should include examples of the principal forms of tenure. Each village was to be visited by the Deputy Commissioner or an Assistant not below the grade of Extra Assistant Commissioner, and, with the help of the rent-rolls filed at settlement and since, an exhaustive examination was to be made of the changes in rental and occupation which occurred in the 12 or 15 years since the settlements were made. To secure uniformity and thoroughness in the investigations, Major Erskine,

Commissioner of Sitapur, an officer of great revenue experience in Oudh, was appointed Special Commissioner to supervise the operations. The enquiries were carried out on the plan prescribed in the cold weather of 1882-83, and in June 1883 Major Erskine submitted the proceedings of the District-officers, together with proposals for the amendment of the law, framed by him after consultation with all classes interested, in a very thoughtful, able and lucid report, which has elicited the commendation of the Lieutenant-Governor, the Government of India and the Secretary of State. The district reports had also been submitted to the consideration of a Committee assembled at Lucknow of which Mr. J. B. Lyall, then Financial Commissioner of the Punjab, now Resident of Mysore, was president, and Mr. W. C. Benett, Director of Agriculture and Commerce in the North-Western Provinces, a member; and both these officers, who are, I need scarcely observe, specially qualified to discuss the subject, have left on record valuable notes respecting it.

"Major Erskine's proposals have since been under the consideration of the Governments in India and at Home, and it is on them that the provisions of the Bill which I am asking leave to introduce are mainly based.

"It will be sufficient for the present occasion if I give briefly the results gathered from the several sources of information just enumerated. The population of the Province is, in round numbers, 11½ millions, of whom 72½ per cent. live by agriculture. These latter may again be divided into landowners who are only 4 per cent., cultivators who are 70, and labourers who are 26 per cent., of the agricultural population. Landowners are roughly divided into two classes—taluqdárs and others, chiefly co-parcenary communities. Taluqdárs are 346 in number out of 180,000 landowners, and hold 59 per cent. of the area of the Province. Tenants with rights of occupancy under the Oudh Rent Act are 8,117, and tenants-at-will, in round numbers, 1,800,000. The percentage of tenants with rights of occupancy to tenants-at-will is ·5, or one in every 200. I do not refer to intermediate tenures between the proprietors and actual cultivators. They are not numerous, and do not concern the subject with which I am dealing.

"As to the density of the population—Oudh is divided into 12 districts; in only two of these is the pressure of population under 400 to the square mile of the total area; in three it is between 400 and 500; and in seven it ranges from 500 to 700. For the whole Province the average is 469·7. In the North-Western Provinces the corresponding figures are 399·7. The density of the population is thus almost as great as that of Belgium (485), the most densely populated kingdom in Europe, and greater than that of England and Wales (456)—countries where I need scarcely observe manufacturing industries preeminently flourish. The cultivated area divided amongst the agricultural families would give to each a farm of five acres.

"These statistics will place the present members of this Council in a better position for estimating the probable effects of the legislation of 1868 upon the Province than their predecessors held at that time. We see from them that the Province is occupied by a dense population depending almost entirely on agriculture for its support; that the protection accorded to occupancy-tenants has reached only a minute class, and that the main body of the cultivators as regards fixity of tenure and enhancement of rent depend entirely on the will of a small body of landlords.

"The protection which it was hoped would be afforded to the tenants-at-will generally by the provisions regarding the right to compensation for improvements, and on taluqdárí estates by the conditions of the sanad, have proved illusory. There has not, so far as I can ascertain, been a single case of such compensation ordered by the Courts on the enhancement of a tenant's rent, and landlords have largely evaded the law either by refusing to allow improvements to be made by the tenant or by requiring him to contract himself out of his right to compensation. The sanad is a weapon of such tremendous power that it must be held in reserve for extreme cases, and Government is naturally reluctant to use it without very grave cause. As a matter of fact, it has been used only once.

"The law, as I have already stated, permits a landlord to turn out a tenant

who cannot claim rights of occupancy at the close of any year on a month's notice. It also places no limit on the enhancement of rent which a landlord may exact from such a tenant. If the latter does not agree to the landlord's demands, he must make room for another who will. These powers accorded to landlords have not been allowed to remain a dead-letter. Major Erskine reports that out of 28,477 tenancies which were the subject of examination there were only 5 per cent. in which the component fields and the rent had remained materially unchanged during the preceding 15 years; in 12 per cent. of the whole number there had been little change in the fields, but the rents had been materially enhanced; in 36 per cent. both fields and rent had been materially altered; and in 46 per cent. the tenants were new-comers. The figures, be it remembered, refer not to a single tract of country, but to tenancies in different districts all over the Province, and leave little doubt that fixity of tenure is rare, and that there is much shifting and changing among tenants.

"As regards enhancement of rent, Major Erskine estimates that during the same period of 15 years there has been throughout the Province an increase of 24 per cent., the rate of rise varying from 13 per cent. in one district to 49 in another. He considers, however, that in many cases the rise is shown to be greater than it really is, owing to landlords having intentionally understated their rents at settlement. There is no doubt that the improvement of communications and the opening out of new markets have enabled the Province to share in the general rise of prices of agricultural produce. It is calculated that since the last settlement prices have risen from 25 to 30 per cent., with which it thus appears that the average rise of rents corresponds pretty closely. This doctrine of averages, however, in such cases must not be pressed too closely. It would be poor consolation for the cultivator in Pertabgurh (a district not traversed by a railway), whose rent has been raised 49 per cent. in 15 years, to be told that prices throughout the Province have risen by 25 or 30 per cent. in the same period. It must also be borne in mind that the full benefit of the rise of prices does not always reach the tenant, and that a large proportion of it is intercepted by the village-banker, to whom the tenant makes over his crop. The mahájan flourishes in Oudh as elsewhere. I may add that there was a general testimony to the fact that rents as a rule were enhanced more with a view to what the tenant could under the threat of eviction be forced to agree to pay than from any estimate of the value of the land and its produce.

"The cultivation of a province which has been not unfitly styled the Garden of India, where there are few manufacturing industries, and where the pressure of population on the soil is very great, is thus carried on by a body of raiyats holding under a tenure which may be described as a yearly tenancy in its simplest and most rudimentary form. I need not waste the time of this Council by bringing forward arguments, with which the discussions of the last few years in England and in India have made us too familiar, to show that this form of tenure under such conditions is the one most discouraging to agricultural efficiency and most likely to lead to the impoverishment and degradation of the cultivators of the soil. The fierce competition for land—the sole means of subsistence—engendered by increasing numbers must lead to the depression of the cultivator's condition, and thus produce a state of things detrimental to decent agriculture and damaging to the real interests of both landlord and tenant, and of the community at large. Precarious tenure is fatal to agricultural prosperity.

"These possibilities were not overlooked by the able men who framed the present law, and Sir John Strachey and Sir Henry Davies, who were its authors, did not conceal their apprehensions that they might ultimately become realities. Ignorance of the fuller information which we now possess, and the hope that the checks provided would have a more extensive and effectual operation than has proved to be the case, no doubt then justified the belief of the Government of India that the scheme to which they gave their sanction sufficiently met the wants of the time. The Government of to-day, however, have grounds for no such confidence. The lion, though not yet upon us, is yearly creeping nigher, and it behoves us to awake and drive him off before it is too late. In this spirit

the Government are now prepared to act. They consider that the following points have been established by Major Erskine's enquiry:—

(1) that though rents had no doubt in many cases been very largely enhanced, yet on the whole the landlords of Oudh have not been guilty of wanton and unjustifiable exaction, and the condition of the people had generally improved;

(2) but that this condition is seriously threatened by various economic causes: prices have risen, largely owing to improved communications and the export of cereals, but rents have risen with similar rapidity, and while there is little prospect of the rise in prices in the immediate future being maintained at the same rate there is every chance of a continuous rise of rent owing to the increasing competition for land and the unprotected state of the tenantry;

(3) that in the interests of agricultural efficiency some amendment of the Rent Law is, in the unanimous opinion of the District-officers, considered to be now essential, so as to give to the cultivator greater security of tenure, including some sort of protection from arbitrary eviction and enhancement, more adequate compensation for improvements, and longer notice to quit in case of eviction.

"The measures best adapted to remedy these evils have been the subject of long and anxious consideration with the Local Government and the Government of India. All the most experienced revenue-officers of the Province have been consulted over and over again; ripe knowledge from a distant Province has been summoned to council; taluqdárs and landholders of other classes have been constantly referred to; and the results are embodied in the Bill which I am asking leave to introduce.

"The object kept in view in framing the proposals which I am about to explain was to provide a remedy adequate to redress the evils which I have attempted to describe with the minimum of disturbance of the present state of things, and to avoid introducing revolutionary changes in the agricultural economy of the Province which, by appearing to run counter to previous engagements, might afford grounds for imputations on the good faith of the British Government, might excite unnecessary alarm in the landowning classes, and set them and their tenantry at arms length.

"I have accordingly not to recommend to the Council the introduction in any shape of a heritable right of occupancy acquired by prescription and enjoyed by a privileged class of tenants such as is recognized by the law of older provinces. Great as are the advantages of that form of tenure—and I myself believe that they are very great—the introduction of it into Oudh forms no portion of the scheme embodied in the Bill. It was contended by a very influential school of officers in the early days of Oudh administration that such rights, though in many cases dormant, did exist, and that they should be ratified and strengthened by law. A full enquiry was made into this question during the viceroyalty of Lord Lawrence, and a somewhat bitter controversy was waged round it, the outcome of which was that the Government of India and the Secretary of State accepted the conclusion that no such rights existed at the annexation of the Province by the British Government which could be maintained by the tenant against the will of the landlord. Consequently the Government of that day resolved not to insist on the *introduction* of such rights into the Province against the will of the larger and more important sections of the landlords, who alleged that such a measure would violate the rights guaranteed to them by their sanads. This decision there is now no intention of reversing. Sir Alfred Lyall and the Government of India believe that measures much less drastic and much less distasteful will probably suffice to prevent the disastrous consequences which are to be apprehended from the present state of the law, and are of opinion that such measures should receive a full and fair trial before they are condemned as inadequate.

"The Statement of Objects and Reasons appended to the Bill will explain in detail the alterations which the Bill proposes to make in the law; on this

occasion I shall confine myself to stating the principles on which they are based, and giving an outline of them.

"Transactions between landlords and tenants in Oudh are now regulated almost universally by contract, qualified in some slight degree by custom—a qualification which is becoming weaker year by year. Now, my Lord, seated as I am between most distinguished representatives of commerce on the one hand and law on the other, I am not about to undervalue the benefits which flow to society from freedom of contract between man and man, or the unwisdom of unnecessarily interfering with it. But, like many other dogmas which claim infallibility under all circumstances, which demand implicit belief *semper ubique et ab omnibus*, this principle has been proved by experience to require some qualification in its practical application.

"Unrestricted freedom of contract between two parties one of whom is at the mercy of the other is a very barren gain to the weaker side; and I need not take up the time of this Council in again traversing the ground, every inch of which was fought over last year, in order to show that 1,800,000 tenants holding on yearly tenancies, liable to be evicted at the end of every year and to unlimited annual enhancements of rent, with no other resource than agriculture to look to, are not on equal terms with 180,000 landlords whose hands the law arms with weapons of such potency. Contracts between parties so unequally matched place the tenants, as the weaker party, at a great and manifest disadvantage, not reconcileable with equity, and although good landlords have used, and will use, their power with forbearance, yet we must expect, according to all experience, that such powers will be largely and perhaps intolerably misused. I speak here of the necessary tendencies of the law, and am far from wishing to imply that the conduct of the landlords of Oudh has already brought about such a state of things; on the contrary, I most willingly admit that it is owing in some degree to their forbearance that things are not already much worse than they are, and that the general rule—though I fear there are numerous exceptions to it—is still good feeling between them and their tenantry. But not the less economic causes over which they have little control are daily gaining strength and pushing them on to make the most of the advantages which the law gives them. The Government therefore considers that it is time to intervene on behalf of the weaker party, and to place him on more even terms with the stronger in making his bargain.

"The first restriction to be placed on freedom of contract in the interest of all concerned is a limitation to the power of eviction at the close of every year. So long as this remains all other precautions or safeguards are useless. A tenant threatened with a measure which involves the loss of all means of support for himself and his family will agree to anything; and to enforce contracts made under such circumstances is merely to allow the law to be used as an instrument for accelerating his ruin. I believe I am correct in saying that the failure of Mr. Gladstone's first Irish Land Act was due mainly to the fact that the power of eviction, and therefore of securing annual enhancements of rent, was left to the landlords.

"This rock we wish to avoid, and the first provision we make is that all tenants now in occupation of land in Oudh—the small class of occupancy-tenants who are already protected by law excepted—should have a statutory right of occupancy for seven years, from the date of the last settlement of the rent or holding, at the rent which they are now paying in the land they hold at the date of the passing of the Act. At the end of that period we propose to allow the landlord to enhance the rent of the sitting tenant to such sum as he and the tenant may agree upon within a limit of one anna in the rupee, or 6¼ per cent. on the rent previously paid. At any time after the expiration of the statutory period a landlord who has not made terms with the sitting tenant may proceed either by notice of enhancement or by notice of ejectment at his discretion. If he proceeds by notice of enhancement, the enhancement must be within the limit above given. If the tenant accepts, a new period begins. If the tenant refuses the proposed enhancement, the holding will become vacant, but no higher rent can be recovered from the next tenant than 6¼ per cent. above the old rent on the same holding. If the landlord proceeds by ejectment, leaving the tenant no

option of re-entry, compensation for disturbance will be given up to one year's rent at the rate last paid, and the limitation of 6¼ per cent. will apply to the rent recoverable from the next tenant. In both cases tenants will be entitled to receive before dispossession any compensation due to them for improvements. The right of renewal is to be personal to the tenant in occupancy. On the death of a tenant in occupancy his heir will be entitled to hold on on the same terms to the expiration of the statutory period enjoyable by his predecessor, but must then, should the landlord so wish, vacate the holding on payment of the compensation for improvements found to be due to him.

"We propose further to deprive the tenant of the power of contracting himself out of these rights. I have already briefly touched on the necessity for this, and may be obliged to deal with it at greater length when the provisions of the Bill are discussed in detail; I need not now dwell further on it.

"The scheme is thus based on contract, but on contract limited and restricted in those directions where the absence of such restrictions has proved most mischievous. A landlord may let out his land on the best terms he can get, provided that the term for which he lets it shall not be less than seven years or the rent more than 6¼ per cent. above that previously paid. He may turn out the tenant at the end of seven years, but if he does so he must pay him a moderate compensation for disturbance. The heirs of a deceased tenant, on the expiration of the statutory term, have no rights as against the landlord, except to compensation for improvements; and the landlord, when the holding is vacated under such circumstances, can let the land to any one he pleases for the statutory term without any restriction as to the amount of rent.

"This scheme for the protection of the Oudh tenantry is not based, like most of our legislation respecting the relations of landlord and tenant, upon existing rights, but on the grounds of general utility and expediency, and it has been framed so as to involve the minimum amount of disturbance in the existing law that is consistent with what Government believes to be the requirements of the case. Experience only can tell precisely how far it will be effectual, and its very moderation exposes it to the risk of being evaded or broken through by determined and unscrupulous proceedings. It purports to avert, by regulative measures, the necessity of resorting to more rigorous expedients, but Government desires to reserve in its hands two weapons to be used in case of such necessity arising.

"They would take power, first, to vary the limits of enhancement, in any district or part of a district where this is found necessary, at long intervals. There has been, as already stated, a large increase in rents since settlement, which is no doubt to a certain extent justified by the rise in prices. Existing rents have therefore been accepted as the basis for future enhancements, but the causes which have justified the enhancement since the settlement may cease to operate, or operate much less actively in the future than they have done of late years. It may well be that the tendency to rise in prices may receive a material check, and, if so, the authorisation of an enhancement up to the limits now fixed would be most unfair to the tenants and bring about the very results which we wish to avoid. On the other hand, it is conceivable that in certain localities, if not generally, circumstances may arise which would warrant a landlord in demanding rents in excess of the limits of enhancement now laid down. For these reasons the Bill proposes that the Local Government should have power, from time to time, within periods of not less than seven years, in any district or part of a district to vary the limits of enhancement.

"This provision would operate generally or over large areas, and at long intervals, and would not avail to check cases of exceptional harshness or oppression in which an astute landlord might succeed in evading the provisions of the ordinary law or in converting them into an instrument of exaction to the ruin of his tenantry. To meet such cases we propose to retain and legally define the sanad liability to be enforced as an *ultima ratio*. The Bill accordingly provides that whenever the Lieutenant-Governor and Chief Commissioner is satisfied that an estate is suffering from grave mismanagement, which has since the present year materially deteriorated the condition of the tenantry or diminished the area of cultivation, he may, with the previous sanction of the Governor General in Council, appoint an officer for the revision of the

rents of the estate and their authoritative settlement for a period not exceeding ten years.

"My Lord, the grant of such powers is not unprecedented. Only last year, with the approval of the Secretary of State, of the Government of India and of this Council, a section of a much more stringent character was inserted in the Bengal Tenancy Act, which enabled the Local Government, with the previous sanction of the Governor General in Council, when satisfied that it was necessary to do so in the interest of the public order or of the local welfare, to invest a revenue-officer with power to settle all rents, and to reduce existing rents which he considered to be unfair and inequitable. Zamíndárí landlords have therefore no ground of complaint that any exceptional treatment is being dealt out to them. As to the taluqdárs, I have already read out to the Council some of the conditions on which they hold their estates, and explained how the sanad is too crushing a thunderbolt to be launched against any but outrageous offenders. The proposals now made will give the Government a statutory power to enforce one of the conditions of the sanad which must always be considered of the highest importance, but, on the other hand, will furnish the taluqdárs with more clear and definite information than they at present possess of the grounds on which Government will in future feel it a duty to step in between them and their tenantry, and of the worst that can happen to them from such interference should it be found to be necessary. At present the very vagueness of the conditions of their sanads exposes them to the arbitrary will in this matter of the Executive Government of the day, and, by reason of the economic changes which are taking place, occasions for the interference of Government are likely to be much more numerous in the future than they have been in the past. It will really be a relief to good landlords among them to know exactly what they may and may not do without incurring the risk of penalty. Colonel Erskine, whom the taluqdárs justly look upon as an old and firm supporter of their rights and privileges, proposed a much more drastic measure of the same nature, and recommended it in the following terms:—

'I have made the proposal because, although I hope and believe that it will be very long before the Government feels called upon to exercise the great power which it would confer, I think it very important that this power should be secured to Government. Without it the Government may find it necessary to resort to more stringent legislation than I now advocate in order to restrain a few bad landlords from doing what the many good ones would never do; whereas, if the power be in its hands, it will be able to proceed against the real offender without interfering with those whose conduct calls for no interference.'

"Such are the outlines of the Bill which the Lieutenant-Governor, with the full sanction of the Government of India, has prepared for the better regulation of those points in the relation of landlord and tenant in which the defects of the present system have been found to be most mischievous. It has been submitted after three years of investigation, correspondence and discussion with those concerned, and has been, in substance, communicated to the leading taluqdárs. Most of these gentlemen are understood to admit that under the circumstances some amendment of the existing law, in the direction of the draft Bill, is expedient, necessary and inevitable, and I believe that they acknowledge the measure which I am asking leave to introduce to be reasonable and moderate; and since the Government have adopted it in principle, I have grounds for anticipating that the taluqdárs and zamíndárs will acquiesce in a measure that has been framed with all possible regard to the real interests of all classes connected with agriculture and the land in Oudh. In Select Committee, should the Bill reach that stage, the taluqdárs will be represented by my hon'ble friend Rájá Amír Hasan Khán, the President of their Association, and any modifications of detail urged in their behalf will receive our most careful and attentive consideration."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Council adjourned to Friday, the 5th February, 1886.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 5th February, 1886.

PRESENT:

The Hon'ble C. P. Ilbert, C.S.I., C.I.E., *presiding.*
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble Amir-ud-dowlah Saeed-ul-mulk Rajah Mohamed Ameer Hosan Khán Bahádur Mumtaz Jung.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

INDIAN SECURITIES BILL.

The Hon'ble SIR A. COLVIN introduced the Bill to amend the law relating to Government Securities, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Ilbert, Evans and Steel, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik and the Mover, with instructions to submit their Report within one month.

The Hon'ble MR. ILBERT said:—"When the Act which it is now proposed to amend was under discussion before the Council at Simla last autumn I said that it was the intention of the Government to leave two questions open for future decision, first, whether the provision which it contained as to the rights of the survivors of joint holders of Government securities should be applied to all Government securities to be hereafter issued; and, secondly, whether a similar provision should be applied to certain other forms of joint contract, such as ordinary negotiable instruments.

"On the first of these questions I am bound to accept the deliberate opinion of gentlemen conversant with banking business that it is impossible for them without serious inconvenience to the public to adapt their practice to the law as laid down in section 45 of the Contract Act, but I accept it with regret, because I am compelled to admit that if the existing law is unsuitable to Government securities it is probably unsuitable to other forms of contract also, and, if so, we shall be under the necessity sooner or later of proposing a more general amendment of the law. The case of Government securities is urgent and the remedy is obvious, and accordingly I think that the proper course is to deal with that case alone in the present Bill, but I intend to take early steps for ascertaining the views of the High Courts and other authorities with respect to the law which regulates the devolution of joint rights and liabilities in the case of other forms of contract.

"There is another provision of this Bill which suggests the possible expediency of more general legislation. When Government securities constitute the subject of a public trust, it has often been the practice to vest them in a Government officer, such as the District Magistrate, who is intended to hold

them not personally but by virtue of his office; and the Bill proposes to remove the doubts which have existed as to the legality of this practice. But several cases have recently occurred in which it would have been convenient to vest other forms of trust-property in a Government official as such, and to which the provisions of the Official Trustee Act have, for various reasons, been found inapplicable. For instance, the Official Trustee is required to perform active duties with respect to trust-property vested in him, and is entitled to remuneration for those duties; he could not remain passive and hand over his duties to a local committee.

"In England the Secretary to the Charity Commissioners for the time being is constituted a corporation sole for the purpose of holding any property held on a charitable trust, and the practice of the Education Department, in settling schemes for the regulation of educational endowments, is to vest the property in this official as a passive, bare or dry trustee, leaving all powers of management to a committee which may be either elected or appointed, and the constitution of which may be changed without affecting the legal devolution of the trust-property. It would be worth the while of Local Governments to consider whether a similar provision might not be useful in this country for meeting the cases to which I have referred."

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

REGISTRATION OF BIRTHS, DEATHS AND MARRIAGES BILL.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to provide for the voluntary Registration of certain Births and Deaths, for the establishment of General Registry Offices for keeping Registers of certain Births, Deaths and Marriages, and for certain other purposes.

INDIAN REGISTRATION ACT, 1877, AMENDMENT BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to amend the Indian Registration Act, 1877.

The Council adjourned to Friday, the 12th February, 1886.

REVIEW OF THE REPORTS ON JOINT STOCK COMPANIES DURING THE YEAR 1884-85.

No. 40 S., dated Calcutta, the 10th February 1886.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ the following communications submitting the Reports of Registrars of Joint Stock Companies on the working of the Indian Companies Act, VI of 1882, during the official year 1884-85:—

From the Government of Madras, No. 1637, dated the 20th June 1885.
" " Bombay, " 5473, " 6th July 1885.
" " Bengal, " 558P.D., " 16th June 1885.
" " N.-W. P. and Oudh, No. $\frac{660}{\text{VII-120-6}}$, dated the 25th June 1885.
" " Punjab, No. 26, dated the 15th May 1885.
" Chief Commissioner, Central Provinces, No. $\frac{2153}{110}$, dated the 9th June 1885.
" " British Burma, No. $\frac{162}{26C.}$, dated the 6th June 1885.
" Secretary for Berar to Resident, Hyderabad, No. 221G., dated the 18th June 1885.
" Resident in Mysore, No. $\frac{932}{160}$, dated the 11th July 1885.

RESOLUTION.—*Madras Presidency.*—There were 165 companies in existence at the close of 1883-84, with an aggregate nominal capital of R2,63,29,638. During the year 1884-85 seventeen of these companies with a nominal capital of R20,71,700 ceased to work and six increased their capital by R6,39,000, while sixty new companies were registered with an aggregate nominal capital of R24,95,990 and a paid-up capital of R4,94,738.

The net result at the close of 1884-85 was therefore a total of 208 companies at work. Of these 208 companies, 49 had liabilities limited by guarantee and possessed no capital divided into shares. The remainder represented a nominal capital of R2,73,92,928; of the nominal capital R1,03,93,359 was paid up, as below explained:—

Nature of companies.	No.	Nominal capital.	Paid-up capital.
		R	*R* *a.* *p.*
Loan or Banking	115	1,72,78,828	39,42,429 11 8
Trading	13	16,85, 00	9,73,651 0 0
Mining	10	26,09,100	14,64,266 13 2
Mills (Cotton, &c.)	10	44,25,000	31,58,779 12 8
Planting	9	12,95,000	8,49,231 10 0
Ice Manufacture	1	20,000	5,000 0 0
Other	1	80,000	(not known)
TOTAL .	159	2,73,92,928	1,03,93,359 0 6

Five companies omitted to file their balance sheets and other documents as required by the Act, and the Government Solicitor was instructed to proceed against them.

The receipts from registration fees and the expenditure of the Registrar's office amounted in 1884-85 to R13,731 and R1,049 respectively, against R7,563-8 and R769 in the previous year.

2. *Bombay Presidency.*—The year 1883-84 closed with a total of 156 companies in existence, representing an aggregate nominal capital of R10,80,62,595, of which R8,00,90,122 were paid-up, and with 77 companies in liquidation.

Of the 156 companies, 7 went into liquidation in 1884-85, 9 increased their capital by R15,18,080, 1 decreased its capital by R4,40,000, and 26 new companies were registered with an aggregate nominal capital of R84,35,000. The net result at the close of 1884-85 was 83 companies in liquidation, and 174 companies at work, which, divided into classes, exhibit the following details :—

Nature of Companies.	No.	Nominal capital.	Paid up capital.
		R	R
Mills and Presses	104	7,60,67,330	6,41,09,451
Trading	45	1,92,61,600	1,12,52,422
Banking and Insurance	8	61,50,000	12,69,986
Ice Manufacture	4	13,52,500	9,18,075
Mining	1	12,00,000	10,50,000
Planting	1	80,000	.....
Others	11	82,20,000	68,22,080
TOTAL	174	11,23,31,430	8,54,22,014

Two companies omitted to file their balance sheets and lists of shareholders within the time prescribed by law; but as sufficient reasons were given, no prosecution was instituted.

The fees realised in 1884-85 amounted to R7,996-8, and the total expenditure was R1,314-4-7, against collections R12,153 and expenditure R940-9-2 in the preceding year.

3. *Bengal.*—The year 1883-84 closed with 226 companies at work, with an aggregate nominal capital of R11,23,54,500, besides 6 companies in course of liquidation whose nominal capital was R15,22,000.

In 1884-85 these six companies were finally dissolved, ten more companies with a total nominal capital of R15,30,000 commenced winding up their business, seven companies increased their capital by an aggregate amount of R7,35,000, and sixteen new companies, with an aggregate nominal capital of R51,46,000, were registered. Of these last, eleven are for tea cultivation, one for pressing cotton, jute, &c., and one for the construction of tramways in Patna and Bankipur.

The net result at the close of 1884-85 was :—

Nature of Companies.	No.	Nominal capital.	Paid-up capital.
		R	R
Tea	124	3,92,61,500	3,19,02,393
Trading	39	2,56,12,000	1,69,72,256
Mills and Presses (Jute and Cotton)	28	2,19,65,000	1,84,77,050
Banking and Loan	17	1,76,65,000	1,73,80,023
Mining and Quarrying	11	84,32,000	75,44,120
Ice Manufacture	6	10,60,000	7,98,920
Others	7	27,10,000	12,83,580
TOTAL	232	11,67,05,500	9,43,58,842

The total receipts from registration fees amounted to R7,089-6 against R9,120-10 in the previous year; and the total expenditure was R618-8-9.

One company was prosecuted for not having fulfilled the requirements of the law in respect of filing balance sheets.

4. *North-Western Provinces and Oudh.*—The number of companies in existence at the close of 1883-84 was 35, representing an aggregate nominal capital of R83,10,000, of which R63,91,343 were paid up.

In 1884-85 two of the companies were wound up, and seven new companies were registered with a nominal capital of R6,85,000. Of these, three were banks, one trading company, one sugar refinery and distillery, one ice, flour and oil mill, and the seventh was a medical association..

The net result at the close of 1884-85 was 42 companies at work, as detailed in the following table :—

Nature of Companies.	No.	Nominal capital.	Paid-up capital.		
		R	R	a.	p.
Banking and Loan	12	31,28,000	28,60,632	1	3
Trading	11	7,05,000	4,26,711	11	6
Mills and Presses	7	23,91,000	22,57,788	15	0
Tea Manufacture	3	9,33,000	9,32,311	5	0
Breweries	2	5,00,000	5,00,000	0	0
Ice Manufacture	2	1,90,000	33,037	8	0
Mining and Quarrying	1	4,65,000	4,65,000	0	0
Sugar Manufacture	1	4,00,000	.....		
Miscellaneous	3	8,79,000	6,46,730	10	1
TOTAL	42	95,91,000	81,22,212	2	10

The fees realised amounted to R1,425.

5. *Punjab.*—At the close of 1883-84 twenty-seven companies were in existence, of which twenty-two were working and five under liquidation. Of those working, two were limited by guarantee and had no divided capital. The remaining twenty companies were limited by shares and had an aggregate nominal capital of R49,73,101, of which R38,13,528 had been paid up.

In 1884-85 three of the companies which were under liquidation finally wound up, two continued winding up, five more entered into liquidation, two increased their capital, and two new companies were registered with a nominal capital of R5,04,500, one being a bank and the other a trading company.

The net result at the close of 1884-85 shows seven companies under liquidation and nineteen companies at work, of which two are limited by guarantee. The remaining seventeen companies may be classed as follows :—

Nature of Companies.	No.	Nominal capital.	Paid-up capital.
		R	R
Trading	5	1,74,500	64,490
Banks	4	23,00,000	20,62,930
Mills (Wool, Oil, Flour)	2	8,00,000	4,72,625
Brewery	1	7,00,000	6,00,000
Sugar and Distillery	1	3,75,000	2,51,825
Tea Manufacture	1	2,37,500	2,37,500
Mining and Quarrying	1	1,04,000	1,04,000
Ice Manufacture	1	1,00,000	48,330
Others	1	20,000	9,500
TOTAL	17	48,11,000	38,51,200

The fees realised amounted to R739-10 and the expenditure to R2-8.

6. *Central Provinces.*—There were three companies in existence at the close of 1883-84, all three having for object the working of cotton. Their aggregate nominal capital and the actual working capital were R11,65,000 and R6,63,696 respectively. One of the companies however had ceased to work for some time and was required in 1884-85 to take steps to dissolve formally. Another increased its paid-up capital by R1,14,300. The position at the close of 1884-85 was that there were two companies at work, both cotton mills, with a nominal capital of R11½ lakhs and a paid-up capital of R7,70,900.

No new company was registered and no fees were realised.

7. *British Burma* at the close of 1883-84 possessed 15 companies whose aggregate nominal capital was R16,59,550. Of this amount, R13,40,325 was shown to have been paid up. No changes are reported to have taken place in 1884-85, except that a new company (the Burma Central Press) was registered with a nominal capital of R10,000. The position at the end of 1884-85 was as follows:—

Nature of Companies.	No.	Nominal capital.	Paid-up capital.
		R	R
Trading	12	15,41,550	12,78,525
Banking	1	50,000	11,880
Miscellaneous	3	78,000	49,920
TOTAL	16	16,69,550	13,40,325

Registration fees to the amount of R275 were realised, against R685 in 1883-84. No expenditure was incurred.

8. *Berar.*—The Indian Companies' Act was extended to the Hyderabad Assigned Districts in September 1884. The rules framed under the Act were sanctioned and published in January 1885, and the office of Registrar of Joint Stock Companies was actually opened in the following month. From that date to the close of 1884-85 no companies were registered.

9. *Mysore State.*—The year 1883-84 closed with 38 companies at work, 17 companies in existence but not working, and 23 companies under liquidation. The companies at work represented an aggregate nominal capital of R44,65,000. In 1884-85 7 companies with a total capital of R2,60,000 were not working, 17 with a capital of R12,35,000 were in course of liquidation, and 7 new companies, with an aggregate nominal capital of R1,80,500, were registered. The net result at the close of 1884-85 shows 44 companies at work. Of these, one is limited by guarantee and possesses no capital. The remainder may be grouped thus:—

Nature of Companies.	No.	Nominal capital.	Paid up-capital.
		R	R
Banks	41	19,45,500	5,69,348
Trading	3	90,000	33,925
TOTAL	44	20,35,500	6,03,273

Most of the banking companies have for their object banking and trading combined.

These companies have an average paid-up capital of less than R14,000 each. They are mostly small native money-lending concerns.

The fees realised in 1884-85 amounted to R976-4-3.

10. *Civil and Military Station of Bangalore.*—There were 17 companies on the registers at the close of 1883-84, with an aggregate nominal capital of R33,65,000, of which R14,51,438 had been paid up. Seven of these, representing a capital of R8,95,000, were reported to be under liquidation in 1884-85. In this year a new company (the Bangalore Woollen, Cotton, and Silk Mills, Limited) was registered with a nominal capital of R4,00,000. The net result at the close of 1884-85 shows 11 companies at work with nominal capitals aggregating R28,70,000, thus:—

Nature of Companies.	No.	Nominal capital.	Paid-up capital.
		R	R
Banks	9	20,20,000	10,64,432
Mills (Cotton, Wool, Silk)	2	8,50,000	4,32,387
TOTAL	11	28,70,000	14,96,819

The fees realised during the year amounted to R173 against R445 in the preceding year.

11. The details reviewed in the preceding paragraphs are summarised in the annexed table, which shows the total capital, nominal and actual, in the different Provinces, of all joint-stock companies. Bengal, Bombay, and Madras head the list with a paid-up capital of 943, 854, and 104 lakhs, respectively, making a sum of about 1,901 lakhs out of the aggregate for all India of 2,063 lakhs.

12. The largest part of this capital—896 lakhs paid-up—is invested in mills and presses for working or pressing cotton, jute, wool, and silk. The Bombay Presidency shows the largest contribution under this head, chiefly for working or pressing cotton, Bengal following chiefly with jute.

Banking or loan companies follow with 291 lakhs paid-up. Bengal heads the list here, the Madras Presidency coming next.

Trading companies rank third, with a paid-up capital of 310 lakhs. Bengal heads the list here also, the Bombay Presidency coming next.

Tea and other plantations show a total of 339 lakhs paid-up capital. Bengal is far ahead of the other Provinces in the tea industry, most of the tea companies being registered in Calcutta.

Mining and quarrying engaged 106 lakhs paid-up. Here also Bengal heads the list, the Madras Presidency being next.

The other industries individually represent much smaller sums: thus ice-making, 18 lakhs paid-up, chiefly in Bombay and Bengal; Breweries, 11 lakhs paid-up, chiefly in the Punjab and the North-Western Provinces and Oudh.

13. The following table shows, so far as has been reported, the total number of joint stock companies at work in India with their nominal and paid-up capital at the end of each of the last five years:—

Years.	Companies at work.	Nominal capital.	Paid-up capital.
		R	R
1880-81	475	19,74,10,150	14,86,66,364
1881-82	500	21,29,73,730	15,45,80,041
1882-83	547	22,17,01,800	17,01,59,044
1883-84	649	26,67,34,384	18,75,06,107
1884-85	697	27,85,56,908	20,63,58,444

14. The fees realised and the expenditure in each province last year were : —

	Fees.	Expenditure.
	₹ a. p.	₹ a. p.
Bengal	7,089 6 0	618 8 9
Bombay	7,996 8 0	1,314 4 7
Madras	13,731 0 0	1,049 0 0
N.-W. Provinces and Oudh	1,425 0 0	.....
Punjab	739 10 0	2 8 0
Central Provinces	.....	.....
British Burma	275 0 0	.....
Mysore State	976 4 3	.....
Bangalore	473 0 0	.....
TOTAL	32,705 12 3	2,984 5 4

shewing a balance of receipts over expenditure of ₹29,721-6-11.

15. There is a want of uniformity in the reports. To prevent this in future the Local Governments are requested to issue instructions to the Registrars to classify the companies as follows : —

(*a*) Banking or Loan Companies.
(*b*) Trading Companies.
(*c*) Mills and Presses.
(*d*) Tea, Coffee, Chinchona, or other Planting Companies.
(*e*) Mining and Quarrying Companies.
(*f*) Ice Manufacturing Companies.
(*g*) Sugar Manufacturing Companies.
(*h*) Breweries.
(*i*) Others.

Totals should be given for each class and a general total for all classes. Companies that have gone into liquidation or are winding up or have dissolved during the year under report should be shown in a separate list, with totals. Companies that wound up before the year under report should be omitted altogether. Literary, scientific and charitable societies registered under Act XXI of 1860 need not be noticed in the report on joint stock companies.

(*g*) Total receipts from 1st to 17th January 1885.
(*h*) Total receipts from 1st November 1884 to 17th January 1885.

FORT WILLIAM,
The 11th February 1886.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 10th FEBRUARY 1886.

GENERAL REMARKS.—Except in the Tanjore District of the Madras Presidency, in the Sialkot and Multan Districts of the Punjab, and in British Burma the week has been practically rainless.

In Madras the standing crops are generally in good condition, and the prospects of the season are fair. In Mysore and Coorg the season promises well.

From Bombay no important change is reported in the condition of the standing crops; the *rabi* is being cut in parts of the Poona, Nasik, and Dharwar Districts. In the Berars, Hyderabad, Central India, and Rajputana the prospects of the *rabi* continue good.

The *rabi* harvest continues to promise well in the North-Western Provinces and Oudh, the Punjab, and the Central Provinces, and agricultural prospects are on the whole very favourable.

In Bengal the prospects of all the cold-weather crops, including poppy in Behar and Hazaribagh, continue generally favourable; mustard and other early *rabi* crops and sugarcane are being harvested; transplanting of spring rice is still in progress. In Assam the crops are in good condition.

The public health continues good.

Prices show an upward tendency in the North-Western Provinces and Oudh and in the Hissar District of the Punjab and are falling in Coorg. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 10th)		
Ganjam	·01	Harvest paddy, yield below average, and in parts poor. Fever in one, smallpox in three, and cattle-disease in three taluks; three deaths from cholera.
Kistna	*Nil*	Standing crops good; harvest dry grains, outturn below average. River 1·1 feet over Anicut. Fever abating, slight smallpox; deaths from cholera unreported last week 71, this week 33.
Bellary	*Nil*	Standing crops generally good, but *cholum*, linseed, and wheat suffering from disease in parts of one taluk; harvest dry grains, yield about average. Cattle-disease in one village.
Kurnool	*Nil*	Cotton and some standing dry crops slightly injured in parts by late unseasonable rains and by insects; harvest dry grains, yield below average. Smallpox in one and cattle-disease in three taluks.
Chingleput	*Nil*	Standing crops fair; harvest paddy and *ragi*, yield below average. Fever in one and cattle-disease in three taluks.
Tanjore	·81	Standing crops good except in parts of one taluk where damage by locusts is reported; harvest wet and dry grains, outturn below average. Cattle-disease in two taluks; three deaths from cholera.
Coimbatore	*Nil*	Standing crops good; harvest wet and dry grains, outturn paddy above average, rest about average. Fever in two and cattle-disease in two taluks.
Madura	*Nil*	Harvest paddy, yield about average. Fever prevalent; cattle-disease in one taluk.
Malabar	·04	Harvest second crop paddy, outturn below average. Slight smallpox in eight and fever in two taluks; 32 deaths from cholera.
Travancore	*Nil*	Harvest almost over, yield good. Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(Feb. 10th)		
Karachi	*Nil*	River at Kotri on 8th 5 feet 10 inches against 6 feet 5 inches on same date last year. *Rabi* crops fair. Fever in eleven and cattle-disease in four talukas. Prices—wheat, red rice, and *bajri*, in Karachi 26, 30, and 34, in Ghorabari 20, 40, and 30, in Sujawal 26, 44, and 42, and in Johi 36, 40, and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	Wheat cultivation good; *jambha* and *sariha* injured by cold in three talukas. River at Kotri on 8th 6 feet 10 inches against 6 feet 5 inches on same date last year. Fever in seven, smallpox in three, and cattle-disease in five talukas. Wheat 27, *jowari* 40, *bajri* 38, white rice 18½, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	Crops healthy, except in Modasa where wheat and maize are slightly affected by severe cold. Fever in Sanand. Wheat 36 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Public health good; cattle-disease in Kherala and Kalol mahals. Crops in good condition. Prices—*bajri* 28, wheat 23, and rice 16 pounds per rupee.
Surat	*Nil*	Standing crops healthy. Fever in Bardoli. *Jowari* 40 and *nagli* 44 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik . . .	*Nil*	*Rabi* crops fare well in Nasik, Baglan, Kalvan, and Peint talukas; irrigated wheat suffered partially from blight generally throughout the district; *kharif* threshing nearly completed; reaping of *rabi* crops commenced in a few villages of the Kalvan taluka. Public health generally good. Wheat 31½, *bajri* 36½, and rice 20¾ pounds per rupee.
Colaba (Bombay) .	*Nil*	Average abnormal temperature 3° cool on 3rd and 4th, *nil* on 5th and 6th, and afterwards 1° cool. Vapour in air defective on 3rd, 4th, and 8th, normal on all other days. Abnormal wind northerly on 3rd, 8th, and 9th, easterly on 5th; wind normal on all other days.
Poona . . .	*Nil*	*Rabi* crops except wheat, which is slightly blighted in Purandhar, Haveli, and Marval talukas, are doing well; reaping has commenced in Junnar, Khedgaon, Indapur, and Bhimthadi talukas. Prices of *bajri* 34 and *jowari* 41, in Poona *bajri* 34 and *jowari* 35 pounds per rupee.
Ahmednagar . .	*Nil*	Wheat and gram injured by cloudy weather. Health good. *Bajri* 45 and *jowari* 53 pounds per rupee.
Sholapur . . .	*Nil*	Linseed, wheat, *tur* and gram crops suffered from blight and insects in places; cotton crops inferior in Madha and Kermala talukas; other *rabi* crops doing well. *Jowari* 51 pounds 35 tolas and *bajri* 44 pounds 17 tolas per rupee.
Dharwar . . .	*Nil*	Harvesting of rice and early *jowari* nearly completed, that of wheat and gram commenced; exotic cotton improved in Karajgi and blighted in Hubli, Gadag, and Bankapur. Slight fever and cattle-disease in Bankapur and Hangal. Rice 22 to 32 and *jowari* 48 to 64 pounds per rupee.
Kanara . . .	*Nil*	Rice and pepper crops and sugarcane thriving. Cattle-disease subsiding; public health generally good. Weather seasonable. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot . . .	*Nil*	Harvesting of wheat commenced; cotton-picking in progress. Public health generally good. *Bajri* 32, *jowari* 41, and wheat 33 pounds per rupee.
		General Remarks.—Slight rain in parts of Shikarpur. Reaping of *rabi* crops commenced in parts of Poona, Nasik, and Dharwar. No change of importance in condition of crops reported. Fever and cattle-disease in parts of ten and smallpox in parts of three districts.
Bengal—(Feb. 11th)		
Chittagong (Feb. 9th)	*Nil*	Weather seasonable. Rain wanted for spring crops. Prices stationary. Public health generally good.
Dacca . .	*Nil*	Prospects of winter crops good; mustard and pulses being gathered, and sugarcane being cut; ploughing for next paddy crops going on. Public health good.
24-Pergunnahs . .	*Nil*	Prospects of cold-weather crops continue favourable; some of the cereals being harvested; outturn estimated at about 14 annas. Public health generally good, though cholera reported from all parts of district. Common rice 15 to 16 seers per rupee.
Khoolna . . .	*Nil*	Weather cold. Harvesting of *aman* paddy not finished; winter crops being stored; transplanting of *boro* paddy nearly completed. Some cholera; public health fair.
Moorshedabad . .	*Nil*	Prospects of cold-weather crops favourable. Public health good. Common rice 18 to 19 seers per rupee.
Pubna . . .	*Nil*	Weather fine and cold. Winter crops promising; *boro* paddy is being grown. General health good.
Dinagepore . .	*Nil*	Weather seasonable. State and prospects of *rabi* crops good. General health satisfactory.
Rungpore . . .	*Nil*	Prospects of cold-weather crops good; sugarcane and mustard being harvested. Public health good.
Midnapore . . .	*Nil*	Weather still cold; prospects of crops good. Sporadic cholera reported; public health otherwise good.
Burdwan . . .	*Nil*	Winter crops continue to promise well. Public health fair. Common rice 14 to 22 seers per rupee.
Bhagulpore . .	*Nil*	Prospects of *rabi* crops good. Prices stationary.
Monghyr		Prospects of opium crop continue favourable.
Purneah . . .	*Nil*	Prospects of crops good; tobacco and mustard being harvested. Common rice 20 seers per rupee. Public health very fair. Scarcity of grass from drought.
Durbhanga . .	*Nil*	*Rabi* prospects continue favourable; early sowings in ear; poppy plants flowering; mustard being reaped. Prices almost stationary. Public health generally good.
Mozufferpore		Poppy very promising.
Sarun		Prospects of poppy continues good. Weather favourable.
Chumparun . .	*Nil*	Prospects of *rabi* and poppy crops continue good. Prices stationary. Public health fair.
Patna .	*Nil*	*Rabi* and poppy prospects good. Prices stationary. Public health good.
Gya	*Nil*	Prospects of *rabi* and poppy continue favourable. Prices stationary. Public health good.
Shahabad		Weather has again cleared up; west winds prevail. Season favourable for opium.
Hazaribagh . .	*Nil*	Weather seasonable. *Rabi* and other cold-weather crops continue promising; poppy plants in flower. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack . . .	0·35	Weather clear and seasonable. Cutting of late rice continues in some places; *rabi* crops being gathered. Price of rice unchanged. Sporadic cholera and fever; public health otherwise good.
		General Remarks.—No rain during the week except a shower in Cuttack. Prospects of all cold-weather crops, including poppy in Behar and Hazaribagh, continue generally favourable; mustard and other early *rabi* crops and sugarcane are being harvested; transplanting of *boro* rice is still going on. Price of rice stationary. Public health continues generally fair.
N. W. Provinces and Oudh—**(Feb. 10th)**		
Benares (Feb. 9th)	*Nil*	Weather clear and cold. *Rabi* crops continue promising; peas and *arhar* have, however, been damaged to some extent by frost and blight, which have also slightly injured other crops in Gangapur tahsil; sugarcane cutting and pressing continue, outturn average. Supplies ample. Prices show a general rise in food grains. Health generally good; no cattle-disease.
Gorakhpore („ 8th)	*Nil*	Season favourable. *Rabi* and poppy crops in good condition. Slight rise in prices. Health fair.
Fyzabad („ 9th)	*Nil*	Weather fair. *Rabi* prospects and opium crops good. Condition of people and cattle good.
Lucknow („ 8th)	*Nil*	Season favourable. Crops thriving. Slight injuiry is said to have been done in places to the gram and pea crops, which were in flower. Markets well supplied, but fodder is very dear. Prices are gradually rising. No cattle-disease; health of people good.
Rae Barelli („ „)	*Nil*	Weather clear and cold with westerly wind. Prospects of crops good. Supplies ample. Prices rising. General health fair.
Partabgarh („ 9th)	*Nil*	Weather clear; wind east and westerly. *Rabi* prospects favourable; poppy flowering, and the crop promises well. Prices rising. No illness.
Allahabad („ 8th)	*Nil*	Weather clear and bright. Slight damage from frost and blight in places, otherwise crop prospects still continue favourable. Markets fully supplied. Prices show a slightly upward tendency. Condition of men and cattle good.
Cawnpore („ „)	*Nil*	No change. Weather continues cold and seasonable. *Rabi* and poppy crop prospects favourable. Prices steady. Condition of people and cattle good.
Banda („ „)	*Nil*	Sky cloudy occasionally. Gram and *arhar* crops injured by frost; poppy thriving. Prices of gram and pulse rising. Public health and condition of cattle good.
Farakhabad („ 9th)	*Nil*	Slight frost in one tahsil damaging gram slightly. Prospects continue excellent. Health good.
Sitapur („ „)	*Nil*	Weather clear. *Rabi* prospects continue excellent; poppy crops are healthy. Prices steady. No sickness of any kind reported.
Bareilly („ „)	*Nil*	Weather cloudy. Crops forward and flourishing; poppy promising exceedingly well; plant is healthy and forward. Prices slightly rising. Health of people and cattle good.
Ballia („ 8th)	*Nil*	Weather clear with westerly wind. Prospects continue good. Markets well stocked. Health satisfactory; no cattle-disease.
Kumaon („ „)	Slight rain . .	Weather cloudy. *Rabi* crops progressing well, but require sunshine. Prices stationary. Cattle-disease continues; general health good.
Agra („ „)	*Nil*	Prospects continue favourable. Prices steady. Health good.
Jhansi („ „)	Slight rain in Mau Subdivision.	Weather continues cloudy. *Rabi* and poppy crops in good condition. Slight fall in wheat and gram. Health good.
Meerut („ 9th)	*Nil*	Weather extremely cold. Crops in excellent condition. Supplies sufficient. Prices steady. Health good.
		General Remarks.—Weather generally favourable. Crops have been slightly damaged by frost in some places, but prospects continue good. Supplies are ample, though prices show a tendency to rise. Public health is good.
Punjab—**(Feb. 10th)**		
Delhi . (Feb. 9th)	·12	Health fair. Prospects of current harvest promising.
Hissar . . .	*Nil*	Health good. Prices rising. Prospects of current harvest flourishing.
Umballa . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Jullunder . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . . .	·60	Health good. Prices stationary.
Shahpur . . .	Rain throughout the district.	Health good. Prices almost stationary.
Ferozepore . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Lahore . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest fairly good.
Rawalpindi . .	·80	Health good. Prices stationary. Prospects of current harvest average.
Mooltan . .	*Nil*	Health good. Prices almost stationary. Prospects of current harvest favourable.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Peshawar	*Nil*	Health good. Prices stationary. Prospects of current harvest promising.
		General Remarks.—Rain has fallen in the Delhi, Sialkot, Rawalpindi, and Shahpur districts. Health good. Prices of food grains rising in Hissar, but stationary elsewhere. Prospects of current harvest good.
Central Provinces— (Feb. 10th)		
Nagpur	*Nil*	Weather warm. Wheat good; other crops fair. Cattle-disease in parts. Prices stationary.
Jubbulpore	*Nil*	Weather cold with slight frost. Gram damaged; wheat favourable. Health fair. Prices high.
Saugor (Feb. 9th)	*Nil*	Weather clear. A little injury to linseed and gram from frost. Health good.
Seoni	*Nil*	Weather cold and clear. Prospects good. Health improving. Prices stationary.
Hoshangabad	*Nil*	Weather unsettled. Wheat slightly damaged by frost. Cattle-disease in places. Rice 11, wheat 16½, and *juari* 19 seers per rupee.
Khandwa	*Nil*	Weather clear and cold. Prospects favourable. Health good. Prices steady.
Raipur	*Nil*	Weather clear. Wheat and gram good; linseed slightly damaged. Health good. Prices stationary.
Sambalpur (Feb. 6th)	*Nil*	Weather cold. Rice threshing and sugar manufacture in progress. Health generally good. Prices stationary.
		General Remarks.—Weather rather changeable. Crop prospects continue generally good. Prices steady.
British Burma— (Feb. 10th)		
Akyab (Feb. 6th)	*Nil*	Public health and health of cattle good.
Bassein	2·54	Total rainfall 2·54 inches. Public health good; cattle-disease severe in one township, in other places slight.
Rangoon	1·58	Total rainfall 1·58 inches. Public health and health of cattle good.
Amherst (Moulmein)	*Nil*	Public health and health of cattle good.
Tavoy	*Nil*	Public health and health of cattle good. Harvesting completed.
Pegu	·55	Total rainfall ·55. (For week ending 30th January). Public health and health and cattle good. Reaping nearly finished. (For week ending 6th February). Public health and health of cattle good. Reaping completed.
Henzada	*Nil*	Public health and health of cattle good.
Prome	·80	Total rainfall ·06. Slight cholera; cattle healthy.
Toungoo	2·42	Total rainfall 2·42 inches. Public health and health of cattle good.
Thayetmyo	·13	Total rainfall ·13. Public health and health of cattle good.
		General Remarks.—Slight cholera in three districts, elswhere public health good. Cattle-disease severe in one district, slight in three, elswhere health of cattle good. There has been unseasonable rain for 2 or 3 days in ten districts, but the amount of damage done by the rain has not yet been ascertained.
Assam—(Feb. 10th)		
Gauhati	*Nil*	Weather seasonable. Public health fair. Cattle-disease in some mauzas; *kalazar* still in some parts of Luki. Gathering of mustard nearly finished. Pressing of sugarcane commenced.
Sylhet	*Nil*	Prospects of crops favourable. Public health fair.
Cachar	·08	Weather cold. About three-fourths of mustard crop reaped. Common rice 16 seers per rupee. Public health good.
Dibrugarh	·07	Weather seasonable. Land being cleared for *aus*; pressing of sugarcane commenced.
Mysore and Coorg— (Feb. 10th)		
Bangalore		Crops generally in good condition, but in parts of the Tumkur district *jowari*, Bengal gram and wheat crops are reported to be suffering from blight. Prospects of season fair. Water and fodder diminishing in Kolar District. Public health good; cattle-disease prevalent in parts. No material change in prices.
Mercara		Slight fall in price of food grains. Prospects of season continue good. Smallpox prevalent in parts.
Berar and Hyderabad— (Feb. 10th)		
Amraoti		Weather cold and occasionally cloudy. *Kharif* crops gathered. *Rabi* in good condition. Wheat 22 and *jowari* 26 seers per rupee.
Akola		Last picking of cotton completed. Prospects of *rabi* good.
Hyderabad (Feb. 4th)	*Nil*	Crops prospering; weeding of *tabi* crops continues; general health of talukas fair. Prices—wheat 14¼, coarse rice 12¼, white *juar* 19¼, yellow *juar* 24, and *tur* 14¼ seers per current sicca rupee.
Central India States— (Feb. 10th)

Despatch from Her Majesty's Secretary of State for India, No. 104, dated 22nd October 1885.

RESOLUTION.

IN Home Department Resolution No. 360, dated 30th June 1868, a scheme was promulgated for the creation of a certain number of Government scholarships tenable in England by natives of India. It was explained that the object of creating the scholarships was to encourage natives of India to resort more freely to England for the purpose of perfecting their education and of studying for the various learned professions or for the Civil and other services in India. In a subsequent Resolution dated 18th January 1870 the circumstances were set forth under which it had been determined to hold this scheme in abeyance. For some time past the Government of India has been in communication with Her Majesty's Secretary of State regarding the re-establishment of a limited number of Government scholarships tenable in England by natives of India, and the Governor General in Council is glad to be able now to announce that it has been decided to bring into immediate operation a scheme which it is hoped will have the effect of offering a certain measure of encouragement to the youth of this country to proceed to England for the purpose of completing their education either at the University of Oxford or at the University of Cambridge.

2. Six scholarships, the cost of which will be defrayed by the Government of India, will be at once established tenable in England by persons who are natives of India within the meaning of Section 6 of the Statute 33 Vic., Cap. 3. The scholarships will be placed at the disposal of the Universities of Calcutta, Bombay, Madras and the Punjab in rotation, one scholarship being given to each of the

first two Universities during the present year (1886) and one scholarship to each of the last two during next year (1887). In allotting the scholarships in future years the same order will be observed.

3. Each scholarship will entitle the holder to an allowance not exceeding £200 per annum, payable from the date of his arrival in England, and will be tenable for three years. No candidate should be more than 21 years of age. Each candidate to whom a scholarship may be awarded will be required to proceed to England within a reasonable period from the date of his selection and to reside there for a period of three years, unless compelled to return sooner by ill health.

4. Each scholar will be entitled to receive a sum of £100 for passage money, and a similar sum will be payable within one month before his actual return to India, if he should complete the full period of three years' residence, or be compelled by sickness to return before the completion of that period.

5. It is intended to reserve to the scholars the power of selecting, once for all, the course of study to be followed by them in England. Each scholar will be required to bind himself by a written engagement to submit to such regulations as may from time to time be framed by Her Majesty's Secretary of State for the guidance of the scholars.

6. If any scholar, not being disabled by sickness, fails to complete a residence of three years in England, or is guilty of gross misconduct or disregard of the orders of Her Majesty's Secretary of State, he will, at the discretion of the Secretary of State, forfeit his scholarship and further be liable to refund the sum of £100 drawn by him as passage money.

7. It will be open to each University to consider whether a special examination should be held for the election of the scholars, or whether the election should be made on the results of its ordinary examinations. If special examinations are held, the regulations which the University concerned may propose to lay down in regard thereto should be submitted for the previous approval of the Government of India, the necessary arrangements for the conduct of the examinations being made under the orders of the University authorities. It is, however, desirable that the examinations should be held at such a time (probably not later than the month of June in each year) as will afford the successful candidates a sufficient interval to complete their arrangements and to reach England before the opening of the October term at the Universities of Oxford or Cambridge, to one of which Universities the scholarship-holders will be required to proceed. The candidates for the special examinations, when such examinations are held, must be young men of proved ability, and will be selected by the Vice-Chancellor on the report of the Syndicate or governing body, who will in their turn be guided by the opinion of the Professors and Examiners. The candidates for these examinations or the persons elected as scholarship-holders on the results of the ordinary University examinations must in all cases be graduates of the University under 21 years of age, who are willing with the consent of their families to proceed to England in order to complete a University education, and will be required to satisfy the Vice-Chancellor as to their good conduct, knowledge of the English language, and physical capacity to undergo the course of life and study which they will have to follow in England. The tenure of the scholarships will be strictly dependent on good conduct in England, and will be conditional on satisfactory progress being made in study.

8. The Governor General in Council desires to take this opportunity of expressing his acknowledgments to Mr. Monier Williams, Boden Professor of Sanskrit in the University of Oxford, with whom the present scheme originated and who has always taken a deep interest in any measures designed to promote the educational progress of natives of India.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Governments of Madras, Bombay, and the Punjab for information and communication to the authorities of the Universities concerned.

Ordered also that a copy be forwarded to the Governments of Bengal and the North-Western Provinces and Oudh, the Chief Commissioners of the Central Provinces, British Burma, Assam and Coorg, and the Resident at Hyderabad for information; and to the Registrar of the Calcutta University for information and guidance.

Ordered further that a copy be forwarded to the Department of Finance for information, and that the Resolution be published in the Supplement to the *Gazette of India*.

CIVIL WORKS.

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT, FOR THE YEAR 1884-85.

No. 21 T., Fort William, 12th February 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Director-in-Chief, Indo-European Telegraph Department, No. 862, dated 28th August 1885, and its enclosure, the Report for 1884-85.

OBSERVATIONS.—In the Report for 1883-84 the total Capital Account of the Department was shown to stand at £1,125,589-12-5; on 31st March 1885 it stood at £1,128,947-11-3.

2. The total receipts of the Department in 1884-85 were £93,693 as against £91,242 in 1883-84; these totals are exclusive of the value of "news free" messages, £3,685, and of work done for other Departments, £2,100, which includes the laying of the Ceylon cable. The increase in the value of traffic being £1,788.

3. In the Report for 1883-84 the revenue receipts and expenditure showed a net loss of £3,471-14-10; but the accounts of that year were weighted with an adjustment on account of store transactions of previous years. Excluding these transactions, the accounts showed a profit of £18,566 (including the value of news free messages and work done for other Departments) on the normal operations of the year 1883-84, yielding about 1·65 per cent. on the capital

expended. During the year under review the net debit brought against the Department is £63,191 only, showing an apparent profit of £30,503 on the year's working. This profit is not, however, absolutely real owing to the reduction of expenditure by a drawback entry of £19,763 for stores credited to Revenue on their re-transfer to Capital. On the actual operations for the year the gross revenue shows an increase, but this is more than counterbalanced by increased expenditure, and the net revenue realised is less than that of the former year by £3,346. Taking into account "*pro forma*" revenue, the total net earnings of the Department amount to £16,525 against £18,566 in the previous year.

4. The Persian lines are reported to be in very good condition. The interruptions on the cables have been rather frequent during the year; but the third cable between Jashk and Bushire has since been successfully laid, and will, it is expected, render the Gulf system thoroughly trustworthy. The Mekran land line has worked well.

5. The working of the traffic has been very satisfactory during the year 1883-84, and during the year under review. The number of paid messages carried during 1884-85 was 93,335 as against 90,052 of the previous year. There has been a decrease of total purely Indian traffic; the receipts fell from £368,881 to £360,470, while trans-Indian receipts rose from £175,123 to £195,974.

6. The new cable between India and Ceylon was successfully laid by the staff of the Indo-European Telegraph Department with aid of the cable steamer "*Patrick Stewart.*"

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director-in-Chief, Indo-European Telegraph Department, for information and guidance.

Also, that copies of the Report and Resolution be forwarded to the Department of Finance and Commerce, the Military (Marine), Home, and Revenue and Agricultural Departments for information.

Also to the Government of Bombay and to the Director General of Telegraphs in India, for information.

Ordered further, that the Report and the Resolution be forwarded to the Secretary of State, for the information of Her Majesty's Government, and published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.,*
Secretary to the Govt. of India.

Enclosure to P. W. D. Resolution No. 21T. of 1886.

No. 862, dated 28th August 1885.

From—Colonel J. U. Bateman-Champain, R.E., Director-in-Chief, Indo-European Telegraph Department,

To—The Secretary to the Government of India, P. W. Dept.

ADMINISTRATION REPORT, 1884-85.

I have the honor to submit, for the consideration of the Government of India, my usual report of the working of the Indo-European Telegraph Department for the year ending the 31st March 1885.

CAPITAL.

Capital, last year.

2. In the Administration Report for the year 1883-84, the total Capital expenditure to 31st March 1884 was shown as £1,125,589-12-5. This figure, however, had to be modified later on for the Parliamentary Accounts owing to the finance figures of the Examiner and those of the yellowbook differing therefrom. The modified total, as shown in Home accounts, page 39, was £1,105,826-12-5, and the difference was due to the Indian accounts having omitted to debit the closing balance of stores re-transferred to Capital on 31st March 1882, amounting to £19,763. The Capital Account on 31st March 1885 stands at £1,128,947-11-3.

Capital, this year.

REVENUE.

3. The total receipts of the Department in 1884-85 were—

	£		£	
Traffic ...	91,706	as against	89,918	in 1883-84.
Miscellaneous ...	1,987	,,	1,324	,,
	93,693		91,242	

4. The increase in the value of traffic taken as a whole appears satisfactory: it is further dealt with and analysed under the head of "Traffic."

Extra work done by the Department.

5. Besides the receipts brought to account, the Department transmitted 506 news messages for the information of the Political Officer of the Persian Gulf of the value of £3,685, and the cable steamer performed work for other Departments to the estimated value of £2,100.

Expenditure of the Department.

6. On the expenditure side of the account the net debit brought forward against the Department is £63,191 only, showing an apparent profit of £30,503 on the year's working. This profit, however, is not absolutely real owing to the reduction of expenditure by a drawback entry of £19,763 for stores credited to Revenue on their re-transfer to Capital. This entry was made by the London Office in the Administration Accounts for 1883-84, or as soon as possible after the discovery of the error in India which necessitated it, but it was not taken up by the Examiner in his Finance Accounts for 1883-84; the adjustment, therefore, is repeated in this year's Administration Accounts in order to make them agree, as far as possible, with the Indian Finance Accounts and the Parliamentary Accounts.

7. The following is a comparison of the principal items of expenditure in 1884-85 with those of the previous year, eliminating book transactions under stores:—

	1884-85.	
	More.	Less.
	Rs.	Rs.
Repairs	11,646	...
Tools and Plant	...	16,442
Establishment	..	1,557
Cable steamer	5,799	...
Profit and loss	..	1,639
Stores	10,910	...
Share of Chief Direction, &c.	...	333
Advertising and Agencies	5,640	...
	33,995	19,971

LINES, MAINTENANCE AND REPAIRS.

8. In my last year's Report I explained why the operation of shifting the hundred miles of line between Teheran and Koom to a more suitable route had been postponed. The change was forced upon us by the fact of the Persian Government having decided to abandon the old desert track and to make a "carriageable" road to the west of the Kevir—a salt marsh which has always been a terrible obstacle in wet weather. The new road is about eight miles longer than the old one, but is fairly supplied with water, and the Persians have provided at intervals of about sixteen miles decent, convenient "Travellers' houses" with comforts which a few years ago were unheard of in the country.

Alteration of Teheran-Koom section.

New rest-houses in Persia.

9. The transfer of the wires had to be effected in such a way as not to interrupt the traffic, and the method adopted by Colonel Smith was as follows. He first erected along the new route a temporary line of wooden posts, attaching to it one new wire sent out for the purpose from England, and also one of the three wires, coiled up, and carried across from the old line. During this operation the two remaining wires of the old line sufficed to carry the traffic—one being set apart for the international, the other for the local business. As soon as the temporary line was finished, the traffic was transferred to it, while the old iron posts were dismantled, carried across, and re-erected alongside the wooden posts, the two wires being gradually transferred to the iron poles as the work of erection proceeded. A third wire was then added, and thus the new line, on the old iron posts, was ready for permanent service.

Method of shifting the wire.

10. The oldest wire of all, *viz.*, that provided in 1863-64, was coiled up and stored in Teheran.

11. The work was tedious and troublesome owing to the rough character of the country, the scarcity of water, and the difficulty of obtaining workmen and transport animals. Colonel Smith states that he was most ably and energetically assisted by Mr. Preece, Assistant Superintendent, and by the four Inspectors and the Persian Linesmen.

12. Two hundred and fifty new iron poles had to be supplied for this work from England, and for about ten miles of the road the ground was so hard and rocky that holes could not be dug, but the standards were built up with masonry, the materials for which, including water, had to be brought from a considerable distance.

Two hundered and fifty new iron poles used.

13. The winter of 1884-85 was unusually severe, especially in the south of Persia, where our lines were most seriously damaged by heavy rain and snow-storms. On the 20th January a length of about 130 miles was almost completely wrecked. Temporary repairs were carried out and communication restored as quickly as possible. The Inspectors and Linesmen of the several sections, as usual, did their best to overcome the great difficulties of the situation, and it must be remembered that to mend the Telegraph among the mountains of Persia, after a heavy fall of snow, exposes the men engaged to serious suffering, and in many cases to imminent danger.

Severe season in Persia.

Exertions of the Inspectors and Linesmen.

14. Only one case of wilful damage worth mention occurred. This was, as usual, in the neighbourhood of the village of Borazjoon, where an unruly individual thought fit to destroy half a dozen poles and sever the wires with the object of bringing trouble on the Local Governor.

Wilful damage.

15. Compensation for all outstanding items of wilful damage was recovered at the end of the year through Her Majesty's Legation.

16. With the exception of some cracks which have shown themselves in a number of the iron poles to which clamps have now been attached, Colonel Smith reports the Teheran-Bushire Division to be in very good condition.

Present state of Persian lines.

17. As regards the state of the Persian Gulf cables, I have so very lately submitted to the Government of India a special and complete account of the condition of the several sections, that it is unnecessary for me to treat again of the subject in detail.

Cables lately reported on.

18. In my letter No. 585 of the 15th October 1884, I showed that in consequence of decay and corrosion of the outer wires, due to age, the interruptions were becoming year by year more numerous and more difficult to put right, and I proposed several alternative measures which would more or less adequately meet the necessities of the case. In that letter I gave the reasons which led me to depute Mr. Preece to travel over the country between Shiraz and Jashk, and report on the question of constructing an aërial line between those places which would complete the land communication from India, the whole way to the German Ocean. But after carefully weighing the advantages and the objections to the several plans, I concluded by strongly advising that a new cable should be laid between Jashk and Bushire so as to render our Gulf system thoroughly trustworthy, for the next twenty years at least, by means of the cable to Fâo for the Turkish line, as well as to Bushire for the Teheran route.

My proposals for the future maintenance of the Gulf communication.

19. This proposal was eventually approved, and a new gutta-percha cable, of a type almost similar to that of the existing Gulf lines, is now being manufactured at Silvertown, and will be laid, I trust, in November of this year.

New Jashk-Bushire cable now being made.

20. As, therefore, I feel persuaded that due precautions for the future maintenance of communication have now been taken, I am less disturbed, than I otherwise should be, by the rather formidable list of interruptions during 1884-85, which will be specified and tabulated below.

Interruptions in Gulf.

21. The total length of the cables submerged is 1,722·45 knots, made up as follows :—

Present length of cables.

	Knots.
Fâo-Bushire gutta-percha	152·59
Bushire-Jashk ditto	507·18
Jashk-Gwadur ditto	273·33
Gwadur-Manora ditto	271·62
Karachi Harbour (3) ditto	17·67
Total Gutta-Percha	1,222·39
Bushire-Jashk India-rubber	500·42
	1,722·81

The total length has, by reason of repairing operations, been increased during the twelve months by 2·46 knots.

22. I may here point out that by far the greater number of breaks in our gutta-percha cable have happened on the Bushire-Jashk Section, in which, however, there is a length of not less than 200 miles, where no defect has occurred since the line was laid more than 21 years ago! This circumstance is probably due to the fact that for that distance the sea bottom is soft and level, and it is believed that most of our accidents can be ascribed to the cable having been laid too tight on an uneven surface and too near certain islands and parts of the coast where rocks are met with. We shall, I need not say, do our best to avoid these sources of danger when laying the new line.

23. As customary, I beg to attach hereto the annual report on the cables, prepared by the Engineer and Electrician, Mr. Possmann, who is at present acting for Sir Henry Mance, absent in England. Mr. Possmann states that during the twelve months under report no fewer than 29 faults showed themselves in the different cable sections. This figure compares very unfavourably with that for the previous year, when 16 faults were reported.

Engineer's Report.

24. Mr. Ffinch, the Director of the Persian Gulf Division, states that the Mekran land line worked, with a few exceptions, well during the year.

25. The total length of this section from Karachi through Ormara, Gwadur and Charbar to Jashk is now 698 miles; the length of the wires employed being altogether 1,394½ miles.

Length of Mekran land line.

26. Its extent is therefore 6½ miles more than last year owing to an alteration of course at the Jagin river.

27. As mentioned in my last year's Report, we have found that the iron standards on parts of this section are rather quickly corroded by the excessive moisture of the atmosphere, and Mr. Ffinch has been introducing here and there creosoted wooden supports which he thinks promise to prove satisfactory.

Wooden posts.

28. The season was excessively rainy, and many repairs and slight diversions—none, however, of very great importance—were effected during the year.

29. On the 27th September 1884, I received a telegram asking me to purchase, on account of the Director General of Indian Telegraphs, enough materials of the different kinds needed to manufacture 29 knots of new cable. The materials were to be sent to Mr. Ffinch at Karachi and made up in our factory at Manora. The cable was to be laid by our telegraph steamer, the *Patrick Stewart*, if possible by the month of March 1885. Although I lost no time in ordering the core and covering materials through the India Stores Department, it is probable that the work would not have been completed by the specified time had the Director not been able to make use of some of our own stores in hand at Karachi. The cable was finished under Mr. Possmann's careful superintendence, and successfully laid by that officer and Captain Bishop on the 7th March, the *Patrick Stewart* having sailed from Karachi on the 15th February. A complete report of the operations, with detailed tests, &c., was submitted by Mr. Ffinch to Mr. Cappel on the 7th April, and I think that Messrs. Ffinch, Possmann, and Bishop deserve much credit for the punctuality with which the work was done. Messrs. Brown and Elton, who have served for many years as Head Cable Foremen and Jointers respectively, performed their duties, as usual, exceedingly well.

Laying of new Ceylon cable.

Cable Factory at Manora near Karachi.

30. Under the supervision of Messrs. Manee and Possmann the cable factory at Manora has been of extraordinary service. Including the Ceylon cable, to which I have just alluded, no less than 84 14 knots were covered during the year 1884-85. Ten knots of old cable besides were re-taped and a quantity more stripped. More than a mile of cable of the ordinary type can now be covered per diem, but some slight additions may be required to enable our machinery to deal satisfactorily with the heavier pattern used for the shore ends.

INTERRUPTIONS.

31. In last year's Report I drew attention to the practical difference between what are called "partial" and what "total" interruptions. During 1884-85 the former were very numerous and annoying, but total interruption of the Persian Gulf cable route to Europe lasted altogether less than 6 days, *viz.*, from the 3rd to the 8th January, when both cables were simultaneously disabled by wear and tear.

Total interruption of London-Teheran lines.

32. Between Bushire and London the Perso-Russian, commonly known as the Indo-European route, was totally incapacitated for work as follows:—the Company's section London to Teheran for 6 days 3 hours 17 minutes, and our own Persian length between Teheran and Bushire 13 days 11 hours 42 minutes.

Serious breakdown of Bushire-Fâo cable.

33. The Turkish route from Bushire to London *viâ* Fâo was interrupted in Asia Minor for 16 days 22 hours 54 minutes, and between Fâo and Bushire, the portion under our charge, for no less than 75 days 18 hours 6 minutes. This last section of our oldest cable broke down unluckily at a most unfortunate time when our cable steamer was in dock at Bombay and could not possibly be sent to effect the necessary repairs. The laying of the new line next November will supply us with an amount of cable amply sufficient to allow of our thoroughly overhauling and strengthening this portion of our Gulf system.

34. The precise particulars of the total interruptions are clearly given in Appendix attached to this report.

Causes of accident in Persia.

35. Colonel Smith attributes the breaks in Persia to exceptionally severe weather; in one case to wilful damage near Borazjoon mentioned above, to the effects of a violent hurricane in April 1884, and to decay of some of the poles which are now being gradually replaced.

Causes of accident in Gulf.

36. The cause of so many failures in the cables may be traced simply to old age and natural decay.

Breaks on Mekran line.

37. The breaks on the Mekran land line were few and of short duration, the most serious accident being due to a heavy flood in March, which caused a total interruption of 1¼ days.

TRAFFIC.

London Convention.

38. The tariffs and regulations of the London Convention remained in force throughout 1884-85.

Analysis of paid traffic.

39. The paid messages carried by the Department during the year, as well as those of 1883-84 (given for the purpose of comparison), are as follows:—

	1884-85.		1883-84.	
	Messages.	Words.	Messages.	Words.
Government	2,616	95,748	2,119	74,151
Private (commercial, &c.)	90,525	1,150,535	87,838	1,140,323
Press at reduced rates	194	79,085	95	65,062
Totals	93,335	1,325,368	90,052	1,279,536

Average length of a message.

The average length of the messages classed as Private (commercial, &c.) was about 12⅝ words. For the last four years this figure has fluctuated between 12½ and 13.

Common Purse receipts.

40. In 1884-85 the total receipts of the Common Purse for division between the Eastern Telegraph Company, the Indo European Telegraph Company, and this Department amounted to £556,444, or about £12,440 more than in the preceding twelve months.

Decrease o total purely Indian raffic.

41. It is noticeable that the traffic to and from India itself has rather fallen off, but the decrease has been more than made up by the development of business with the far East. Purely Indian receipts fell from £368,881 to £360,470; Trans-Indian rose from £175,123 to £195,974.

Shares of work done.

42. The Indo-European route carried 7·37 per cent. more than its calculated proportionate share of the Indian work, 3·91 per cent. less than its share of the Trans-Indian. In accordance with an agreement we paid over about £8,640 to the Eastern Telegraph Company.

Traffic *viâ* Turkey.

43. The percentage of the Gulf traffic that passed *viâ* Teheran was 94·72, by Fâo and Constantinople 5·28. In the previous year these figures were respectively 93·26 and 6·74. The comparative decrease *viâ* Turkey was doubtless caused by the unfortunate and prolonged interruption of our Bushire-Fâo cable referred to above.

Speed of transmission.

44. According to the *Government Telegraph Gazette*, the average speed of transmission in 1884-85 between the United Kingdom and Calcutta was—

Viâ Teheran.	*Viâ* Turkey.	*Viâ* Suez.
1·58	10·20	3·15

Last year these figures were respectively—

1·34	13·12	3·25

I may, however, observe that the general working in Persia and the Gulf was, to a certain extent, impeded by the great number of long cipher messages to and from the Afghan Frontier Commission.

Accuracy.

45. In accuracy of transmission a slight improvement is reported, and fewer complaints from the public have been received than in 1883-84; the numbers being respectively 45 and 75.

Checking of Common Purse.

46. As regards the checking of the Common Purse, the Indo-European Company's accounts for 1883-84, four months of which were treated of in my last year's Report, were closely checked for the remainder of the year. A considerable number of petty discrepancies appeared, but it is satisfactory to find that no errors of principle were discovered, the errors being due to the multiplicity of details in the accounts. The result showed that altogether the sum of £52-10 too little had been credited, which deficiency will be made good.

47. The Eastern Company's accounts were tested, as usual, by the examination of a portion of the returns for each month. No error was detected in the accounts themselves, but there was a serious discrepancy of some 1·87 per cent. between the number of words given respectively by the Check Office, Calcutta, and by the Company.

48. Some correspondence has taken place with a view to the introduction of a better form of return, and I trust that no difficulty will occur in the future.

49. The examination of the Common Purse accounts for 1884-85 has been commenced, but is not yet sufficiently advanced for report.

50. The settlement between this Department and the Indian Department was based on the arbitrary rate, fixed some years ago by India, of francs 25·05=£1, the exchange between English and Indian currencies being regulated by the Secretary of State's monthly drawings. This exchange varied between *d.*19·75 and *d.*18·79, the mean for the year being *d.*19·2427= 1 Rupee.

51. The settlements between the Department and the English Companies on the general traffic account, and on the Common Purse account, were made at the rate of francs 25=£1. The settlement with Turkey was made, as usual, by the purchase at Constantinople of a three months' bill on London for the equivalent in sterling of the balance in francs due to the Department.

INSPECTIONS.

Colonel Smith's inspection.

52. In April and May 1884, Colonel Murdock Smith completed his tour, begun in March, over the lines under his direction between Teheran and Bushire. On his return journey he spent two months in Shiraz, and made arrangements for the future shelter of the clerks in houses specially built for their accommodation. The new site is excellent and spacious, and lies about half a mile to the westward of the city. Colonel Smith saw the buildings commenced, and Dr. Odling and he are convinced that the new quarters, which have long been wanted, will, when occupied, prove of very great benefit to our men, particularly as regards their bodily health. Colonel Smith also succeeded in persuading the Persians to thoroughly repair the rather dilapidated Shiraz Office, an old palace which is used both by the Persian signallers and our own, and which includes quarters for the clerk in charge.

Mr. Ffinch's inspection.

53. In the Gulf Division Mr. Ffinch visited the Mekran Coast offices between Karachi and Jashk, and travelled over a considerable portion of the land line. His inspection of the Bushire and Fâo stations did not take place till after the conclusion of the year under report.

54. I myself, having just returned from the Persian Gulf at the end of the official year 1883-84, made no journey during 1884-85.

ESTABLISHMENTS.

Slight change in Persia.

55. A slight but advantageous change was made in the classification of the signalling establishments in Persia.

56. Captain Wells, R E., the Assistant Director, was away from the country throughout the year on sick certificate. Mr. Inspector Whittingback returned to duty from furlough on the 31st January.

57. In the Persian Gulf no changes were made. Three clerks resigned the service, and two were engaged on probation.

Departmental Steamer.

Work done in 1884-85 by the cable ship.

58. The usual tabular statement showing the work done during the year by the cable ship, the *Patrick Stewart*, is appended. The vessel made six repairing trips to the Gulf, steaming over 11,000 miles. The Engineering staff were on board for no less than 157 days.

Laying of Ceylon cable.

59. In addition to these duties, the ship laid the new Ceylon cable which I have described in a previous paragraph of this letter. On this occasion the vessel was absent from her regular work for 35 days, and steamed 3,700 miles. The value of the work done by the *Patrick Stewart* for other Departments, including the laying of the Ceylon cable, was Rs. 21,001-10-8.

Correspondence relating to control of ship.

60. In last year's Report, para. 53, I observed that I was not altogether satisfied with the system of control in force on board, and I expressed my intention of referring the case exhaustively for the consideration of the Government of India. This I did in my letter No. 587 of the 28th October 1884, which, for reasons therein given, was submitted through the India Office. I have recently received the decision of His Excellency the Viceroy, as given in Despatch No. 5 (Military Marine) of the 11th May 1885, to Lord Kimberley, and I see that my suggestions are not considered practicable.

Stores.

61. The principal items of expenditure under the head of Stores during the year, exclusive of those used for the Indian Ceylon cable, which are to be replaced, were as follows:—

	Rs.	A.	P.
Purchase of stores in India	11,780	12	2
London stores, including freight and landing charges	1,58,019	4	4
Stores for other Departments	5,068	11	2
Total	1,74,868	11	8

The issues of stores were as follows:—

	Rs.	A.	P.
For cable	69,208	5	1
For land line	13,667	11	6
For offices	11,869	7	0
Total	94,745	7	7

62. The value of the manufacture outturn was Rs. 70,235-5-6; out of this, Rs. 46,178 was for gutta-percha cable, and Rs. 23,186 for India-rubber cable manufactured.

General.

63. In October last, at the urgent request of His Excellency Sir Ronald Thomson and of General Sir Peter Lumsden, Colonel Smith, with my consent, ordered Signaller Gray to Meshed to do the telegraph work of the Boundary Commission, and made special arrangements with His Excellency the Mukhber-ud-Daulah for facilitating and expediting the service. As it soon became apparent that the number of messages, almost all in cypher, would be very great, another clerk, Mr. Bull, was told off for the Teheran part of the Commission's work. The Persian line from Teheran to Meshed consists of a single wire, about 600 miles long, very badly insulated on short wooden poles, and, generally speaking, unworkable at night and in wet weather. It consequently required great skill, patience and perseverance on the part of Messrs. Gray and Bull to get the long cypher telegrams through by such a line, which, moreover, was not always at their disposal. Messrs. Gray and Bull exerted themselves with success, and gave great satisfaction both to Her Majesty's Legation and to the Commission. In connection with this service, Colonel Smith received a letter from Mr. Condie Stephen, C. B., Assistant Commissioner, dated Meshed, 11th April, in which the following passage occurs:—
"Mr. Gray has been most energetic, and had it not been for his indefatigable attention at the office, I don't think any telegrams would have been received at all. Mr. Bull, too, appears to be very attentive, and I am sure the greatest service has been rendered to the Commission in your so kindly detaching them to the Meshed line." As an illustration of the way in which the work was sometimes got through, I may mention the following instance. On the 7th April, after the line had been interrupted for a week, communication, with feeble and intermittent signals, was partially restored. Messrs. Gray and Bull were immediately at the instruments and with the greatest difficulty and endless repetitions, got through the greater part of a very important cypher telegram,—the one in fact announcing the Russian attack on the Afghan post near Penjdeh. Mr. Gray had probably been told by Mr. Stephen that that particular telegram was specially important. He therefore very wisely gave it priority over the other telegrams that had accumulated during the break, and Mr. Bull showed similar presence of mind in at once sending to the Legation the portion of the message he had received when the line again broke down, without waiting for its completion or for an opportunity of collating what he had got. Such an opportunity did not, in fact, occur till the 9th, although on the 8th the line was open for a very short time, during which the Persians kept possession of it for cypher messages to the Shah, which no doubt also referred to the battle of Penjdeh. The promptitude, skill and well-advised suspension of ordinary regulations on the part of the two clerks, thus got the report of the battle through an almost unworkable line to Her Majesty's Legation, and the Government in England, and in India, two days before it would have reached them in the ordinary course of telegraph business.

64. As regards the conduct of the staff, I extract the following from Colonel Smith's Annual Report:—

"I am much indebted to Mr. Daniell (Superintendent in charge of Accounts) and to the Assistant Superintendents, Messrs. Preece, Hoeltzer and Fabie, for their constant care and attention to their several duties. Also to the Inspectors for the great interest they have always taken in their work. The Signalling staff, among whom may be specially mentioned Mr. Fargues, clerk in charge at Shiraz, have also, as a rule, been regular and punctual, well conducted and attentive to their duties. Mr. Churchill, clerk in Director's Office, has given me every satisfaction.

"The Medical Officers, Drs. Baker and Odling, have, I need hardly say, shown their habitual kindness to all requiring their attendance. I am glad to say the amount of sickness among the staff was decidedly less than during the previous year.

"The general business of the Department has been conducted without the slightest friction either with the Persian Gulf Department, the Indo-European Company, or the Persian Telegraph officials."

65. Mr. Ffinch writes as follows of the officers and clerks of his Division:—

"In conclusion, I desire to place on record my appreciation of the services of the whole of my staff, who continue to work to my entire satisfaction. Most of the signalling clerks now in the service have been with us for many years, and consequently promotion among them is slow. I think, therefore, the time has come when a re-organization in their favour should be carried out, and I shall have the pleasure to shortly submit my proposals on their behalf.

"I especially desire to bring once again to your favourable notice the ready assistance, at all times given, and cordial aid rendered me, by Messrs. Herbage, Mance, and Possman; to Captain Bishop, also, the best thanks of the Department are due for the good services rendered. Mr. Betts, while in charge of the Traffic Branch, conducted the duties most satisfactorily. My best thanks are also due to Messrs. Pierce, Newnham, and Allen for good work done on the land line during a very trying season."

66. Mr. Brasher, Director of Traffic, and the clerks who assist in carrying on the duties of this Office, gave me, as usual, complete satisfaction.

APPENDIX A.

INDO-EUROPEAN GOVERNMENT TELEGRAPH DEPARTMENT.

(PREPARED PARTLY FROM TELEGRAMS.)

Summary of Expenditure on Capital Account to 31st March 1885.

	£. s. d.	£ s. d
Total Capital Expenditure to 31st March 1884	...	1,105,826 12 5
Capital Expenditure from 1st April 1884 to 31st March 1885—

	Knots.
Fâo-Bushire gutta-percha	152·59
Bushire-Jashk ditto	507·18
Jashk-Gwadur ditto	273·33
Gwadur-Manora ditto	271·62
Bushire-Jashk India-rubber	500·42
Total	1,705·14

the total length having by the various repairs during the last year been increased 2·1 knots.

ELECTRICAL CONDITION OF THE CABLES.

Appendix A.

All the sections being faulty at the close of the last official year, I have given in Appendix A the electrical condition during the month preceding that in which the various faults occurred. These figures show the cable throughout to be electrically in very fair order, and I have no doubt that as soon as the various repairs are completed, the insulation will compare well with that of last year.

The faults in the Bushire-Jashk India-rubber, Jashk-Gwadur and Gwadur-Manora gutta-percha sections are partial earth ones, and have not up to the present interfered with the working in any way.

FAULTS AND INTERRUPTIONS.

Appendix B.

The faults during the last official year reached the large number of 29, of which 22 have been repaired, while 3 partial earth faults and 4 total breaks are still waiting repair. This delay has been caused by the cable ship having been away five weeks to lay the Ceylon cables and afterwards breaking down after leaving Karachi on the way to repair the faults in question.

The Fâo-Bushire cable had 4 faults, and was interrupted during the last year for 70 days. The Bushire-Jashk gutta-percha section, with 13 faults, was broken down 119 days. The India-rubber cable had 5 faults, and failed for 40 days. The Jashk-Gwadur section had but 2 partial earth faults, and was interrupted for repairs only for 20 hours; while the Gwadur-Manora section, with 4 defects, was interrupted 40 days.

One circuit from Karachi to Bushire was available for 360 days, and a second line was working for 7 months; while the Persian Gulf system was totally interrupted for 5 days only, in consequence of both the Bushire-Jashk cables being broken down simultaneously.

REPAIRS.

Appendix C.

To execute the 20 repairs, the cable ship *Patrick Stewart* made six trips, during which she steamed over 11,000 miles. The Engineering staff were absent from head-quarters, up the Gulf, 157 days, besides 35 days laying the Ceylon cable, during which the ship steamed another 3,700 miles. Of the 46 miles of cable cut out, 20 per cent. had to be left on the ground, being too weak to be lifted; 62 per cent. was stripped for the core, only a small part of which can be re-made into cable, on account of its being recovered in too short lengths; and only 18 per cent. was found good enough for re-laying after being repaired and re-taped.

It is a very significant fact that out of 7 miles India-rubber cable recovered in the various repairs, only one mile was in a sufficiently good state to repair and re-lay, the other six miles being in short pieces or having guards completely decayed.

It is in a great measure due to the accuracy with which Captains Bishop and Finney put the ship near the positions of the faults, that the expenditure of cable per repair does not exceed the average of the previous years.

EXPENDITURE OF CABLE AND CABLE IN STOCK.

Appendix D.

The total quantity of cable expended during the year was 83·25 knots, but from this must be deducted 29·19 knots handed over to the Indian Department and laid between India and Ceylon. Of the remaining 54 knots, 6 were expended in renewing two sections of the harbour cables, leaving 48 knots for the 20 repairs along the line, or 2·4 knots per repair. Considering the age of the cable and the very bad state of the guards, this is a very satisfactory result.

During the year 20 knots of cable of a smaller type were manufactured at Manora. It is intended to lay this piece in one place, where an extensive renewal may be found necessary. Including this cable, the stock in hand at the close of the last official year was 77·78 knots, with enough material in reserve to manufacture another 24 knots. This may appear a large stock of cable to have in hand, but when it is considered that lately faults have been much more frequent, there being at present 7 defects to be repaired, it will be seen that we have done right in increasing our reserve; especially bearing in mind that most of the cable now picked up at sea cannot be re-used.

EXTRACTS FROM THE HISTORY OF THE CABLES DURING 1884-85.

Fâo-Bushire Section, 152·59 knots.

The partial earth fault still existing at the close of the year 1883-84 was repaired in May 1884, when a total break in this section necessitated the despatch of the repairing vessel to this end of the Gulf. The total number of faults that occurred in this section during the past year amounted to four, of which three, caused by corrosion of the guards, have been repaired, while the fourth still causes an interruption. The long interruption of 37½ days was due to the ship being in dock in Bombay at the time the cable failed.

Bushire-Jashk gutta-percha section, 507·18 knots.

Thirteen defects occurred in this section during the year, of which only ten have been repaired up to the present. Of these ten, five were due directly to the corrosion of the guards where the cable was tightly laid across submarine ravines, one to a bugla's anchor where the guards were much decayed, one to a fish-bite where the core was quite exposed, and three to the decay of the percha in shallow water near Jashk.

The state of the original cable is now so bad that I have found it necessary to splice on to the first fair piece of the cable we lifted, it being too dangerous to examine the cable for any distance on either side of the repair, as experience showed it probable that doing so might necessitate the insertion of several more miles of cable. During the repair of a fault off Mussendom in April 1884, it was found necessary to insert over 7 miles, although the cable was first grappled half a mile from the fault. The cable proved so bad that only 2·79 knots could be recovered, in short pieces, and over 4 knots had to be left on the ground.

The interruptions on this section amounted to 119 days, of which 35 days are due to the repairing vessel having been away, laying the cable between India and Ceylon.

Bushire-Jashk India-rubber cable, 500·42 knots.

Five faults occurred in this section during the past year, of which number four have been repaired and one is not yet removed. This latter is a partial earth fault, and does not interfere with the working. Of the four faults removed, two were caused by the corrosion of the iron guards, and two by chafes on the rocky ground off the Tumb Islands, where the cable spans declivities 30 fathoms deep.

This section failed for 40 days, of which 15 days may be credited to the ship being away in dock.

The cable on either side of the faults has been found to be in indifferent order, and of the 7 knots recovered in the repairs, only one knot was good enough to be re-taped for re-laying after being turned over in the factory, and the rest had to be stripped, partly because the pieces recovered were too short for splicing on, and partly because the guards were found to be unreliable.

Jashk-Gwadur cable, 273·33 knots.

This section had but two faults, both partial earth, during the past year; one of these was repaired in May 1884, and the other has not yet been removed, because its resistance has until lately been too high and variable for exact localization. This defect has not in any way interfered with the working, but will be cut out the next time the repairing vessel proceeds up the Gulf.

This section was only interrupted for 20 hours during the year, and that only for repairs.

Gwadur-Manora cable, 271·62 knots.

This cable had two partial earth faults and two total breaks. One of the former is still unrepaired owing to the difficulty in localizing it. As the working is good, and we have a double land line over this section, it has been deemed hitherto unadvisable to attempt the repair of this defect with the probability of expending several more miles of cable than will be necessary after its locality has been accurately determined. The other partial earth fault only occasioned an interruption of eight hours during repairs, and was found to be caused by the

cable having opened out by being rolled along the bottom of the sea by the swell, and the core being damaged by a broken wire.

The two total breaks were caused—one by the decay of the guards, and the other by the cable having been twisted to breaking point by rolling up and down a declivity. The long interruptions of 24 and 17 days respectively were caused—the first by the ship being up the Gulf repairing other faults, and the second by her being in dock in Bombay.

Harbour cables 1, 2 and 3.

Only one fault occurred, and that in cable No. 1; but on being lifted, all the cables were found to be in such a state of decay that it was thought advisable to renew them across the harbour from box 6 to box 8, a distance of about two miles. The route was altered by the cables being taken along the training groyne from the native jetty instead of crossing over to Baba Island from box 7. At the end of the groyne sufficient slack was laid to lead the cables into another cable box to be erected here, should it be found advisable. The expenditure of cable for this renewal was 6·14 knots. The total length was increased by 0·12 of a knot, the total length of each now being 5·89 knots.

The ends in the cable boxes have been renewed, and the tests are satisfactory.

CABLE HOUSES AND LAND LINES TO OFFICES.

The roof of the cable house on the Manora beach has been renewed. All the cable boxes between Manora and Karachi have been freshly cement-pointed. The cable land line in connection with the Jashk gutta-percha cable at Bushire showed an extraordinary low insulation in February. All insulators were examined and cleaned without any improvement. I then instructed the Superintendent, Bushire, to replace them by new insulators. Unfortunately in taking out the old ones they were nearly all broken, so that I was unable to trace the cause of the defect, but I have no doubt it was a cracked insulator.

The cable land lines at Jashk were blown down by a hurricane on the night of the 30th March and temporarily re-erected the next morning. Some of the iron posts were broken and others bent by the force of the wind. The interruption due to this accident lasted 12 hours.

MECHANICAL CONDITION OF THE CABLES.

The gutta-percha cable has now entered on the 22nd year of its existence, and the iron guards have decayed in most places. Very little of the cable recovered in repairs can be used again, though a few of the larger pieces of core can be re-made into cable. The amount of the latter is also getting less every month, as most of the old cable is now recovered only in very short pieces, and even where longer pieces are taken on board, the core stretches under the heavy weight in 30 to 50 fathoms of water, and so mostly becomes unfit for re-manufacture. The Bushire-Jashk section of this cable has supplied by far the greatest number of interruptions; yet there is a length of over 200 miles in which not a single defect has occurred since the cable was submerged. This, I think, must be owing to the cable here being laid on a perfectly level bottom, as the great majority of interruptions have been caused by the cable being laid too tight on an uneven surface, and where the guards corroded, the core has been stretched to breaking point.

I can only re-echo Mr. Mance's observations on this head in his report for the year 1883-84, and add, that from the appearance of the cable lifted in various parts of the line during the 15 repairs effected by me since I took charge of the Engineering duties, it is clear that the only perfectly reliable cable in the whole of our system is that which has been inserted in our various repairs during the last few years.

The prompt laying of a new cable between Jashk and Bushire is of the utmost importance. By then picking up the present gutta-percha cable in this section, sufficient good cable will doubtless be obtained to put all the other sections in a thorough state of repair, as all the worst parts in all the sections are known.

The India-rubber cable is also beginning to show signs of breaking up, the cable on either side of late repairs having shown that decay of the iron guards has commenced, and that this cable cannot any longer be absolutely depended upon to keep up communication. This core is, from the flexibility of its de-electric, much more liable to be pierced by broken wires, and consequently to the development of partial earth faults. It is also very liable to injury in being handled in the factory, minute faults having been discovered in cable re-made from old core. I have lately noticed in recovered core that the inner coating of the India rubber (*i. e.*, that nearest to the conductor) is in most cases in a state of decay, being as soft as if under the influence of strong heat.

MANORA CABLE FACTORY.

A large additional piece of ground between the factory and the harbour has been reclaimed during the year, leaving now only one large space to be filled up, for which Rs. 3,500 have been sanctioned in the Budget for the present year, and the work will be proceeded with at once. This gives us a large space for storing posts for the land line, &c., and for erecting a shed for pitch and taping which is much needed.

A coal-shed has been erected on part of the reclaimed ground, and is proving a perfect success, as we are now able to buy coal in large quantities at a great reduction in price.

I have had part of the works enclosed by wooden strip fencing, as the place was too open and was used as a public way by all comers, which led to a great deal of petty pilfering. But much more has to be done in this direction, and I hope to be able to fence in the whole of the compound during the present year.

The large boiler purchased and set up during the year 1883-84 has done excellent work, but lately a small crack has shown itself in one plate, which the engine foreman states is due to our having used brackish water: a thick deposit of salt had formed in a place inaccessible for cleaning, and the iron there was burnt. The boiler is now under repair, and I shall use only fresh water for the future, under which condition, I am informed by competent authority, the boiler will be good for at least ten years more.

The out-turn of cable from the factory has been larger than that of any previous year, no less than 84·14 knots having been manufactured, of which 8·24 knots were shore-end cable covered with No. 3 B. W. G. iron guards, 19·89 knots thin type cable covered with No. 9 iron guards, and the rest our ordinary type main cable. Of the total manufactured, 29·19 knots were made for Ceylon and laid by the *Patrick Stewart* in March last.

In addition to this, 10 knots of old cable picked up at sea were covered with taping and re-submerged, and 26 knots were stripped for the sake of the core, of which, however, only 6½ knots were good enough to re-make into cable after careful examination.

I am happy to say that I have succeeded in turning out over a mile of our ordinary main cable per day while making the cable for Ceylon; but I had great difficulty in making the shore-end cable, as our machinery is not strong enough for making such a heavy type of cable. It was only with the utmost care I succeeded in finishing the 8 knots required for Ceylon, and I was only able to turn out one-third of a mile per day.

WORKING AND TESTING.

No change in the method of working has been found necessary. The faults have been localized with the usual accuracy; the average distance between the assumed and real position of all the faults during the year is one-third of a knot.

These excellent results are in a great measure due to Mr. Mance's formula for eliminating the disturbing elements of earth and polarization currents. This formula has been found of the greatest benefit, and cannot be too highly praised, as by the use of it many miles of cable have been saved. With an old cable like ours, it is of the first importance to get as near to the fault as possible, as most of the cable picked up now is absolutely useless.

CONCLUDING REMARKS.

Good communication with Europe by our system of cables has been kept up during the past year with the greatest exertion and at considerable expense. It has been found necessary to send out the repairing vessel immediately on the occurrence of one fault, while formerly it was the custom to wait for the development of a second defect, but the age of the India-rubber cable has necessitated this change in procedure.

I think I have shown clearly that the laying of a new cable between Jashk and Bushire during the next cold season is absolutely necessary, if communication with Europe by this route is to be kept up at all fairly well. After this cable is laid, it would be well if an extensive examination of the other sections and renewal of the weak places therein were taken in hand. This we will be able to do with little expense, as a great portion of the present Jashk-Bushire gutta-percha cable after being picked up and repaired in our cable factory will be available for these renewals, and it will not be before this has been done that we shall be able to look forward to comparative freedom from interruptions.

Since writing the above, all the total breaks and two partial defects have been repaired, and all sections are in excellent working order.

KARACHI;
22nd May 1885.

No. 223B, dated 3rd November 1885.

From—Lieut.-Col. J. Grierson, Bo. S. C., Examiner of Telegraph Accounts, Calcutta,

To—The Secretary to the Government of India, P. W. Dept.

I have the honor to submit herewith a statement of the differences between the Capital and Revenue Accounts accompanying the Administration Report of the Indo-European Telegraph Department for the year 1884-85 and those submitted by this Office.

Statement of differences between the Capital and Revenue Accounts accompanying the Administration Report of the Indo-European Telegraph Department for the year 1884-85 and those submitted by the Examiner of Telegraph Accounts.

Items.	As per Administration Report	As per Annu Account.	DIFFERENCE. More in Administration Report.	DIFFERENCE. Less in Administration Report.	Explanation.
	Rs.	Rs.	Rs.	Rs.	
Capital outlay to end of the year 1884-85.	1,12,89,475	1,12,89,473	2	...	Difference on account of annas and pies.
Receipts on Revenue Account.	9,36,934	9,38,322	...	1,388	This difference is due to the earnings of the "*Patrick Stewart*" not being included in the Revenue Account accompanying the Administration Report.
Expenditure on Revenue Account.	6,31,908	7,83,679	...	1,51,771	This difference is made up of the following items, and is due to their being excluded from the Revenue Account of the year submitted by this Office owing to their having been included in the Revenue Accounts of previous years, while they have been included for the first time in the Revenue Accounts accompanying the Administration Report of the year :—

Revenue Account Cr. Rs. 1,97,630 Balance of stores in stock at Karachi on 31st March 1881 transferred to Capital Account.

" Dr. " 41,964 Net credit to "Stores" in the accounts for 1881-82 transferred to Capital Account.

" Dr. " 3,896 Value of a cable-covering machine twice debited to Capital Account.

" 45,860

" 1,51,770 Net difference.

" 1 Difference on account of annas and pies.

" 1,51,771

D. M. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 16th February 1886.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 12th February, 1886.

PRESENT:

The Hon'ble C. P. Ilbert, C.S.I., C.I.E., *presiding.*
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

REGISTRATION OF BIRTHS, DEATHS AND MARRIAGES BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to provide for the voluntary Registration of certain Births and Deaths, for the establishment of General Registry Offices for keeping Registers of certain Births, Deaths and Marriages, and for certain other purposes, be taken into consideration. He said:—

"The main object of this Bill is, as I explained last year, to provide means of obtaining more satisfactory evidence of births, deaths and marriages occurring in certain classes of the community. The Bill is limited in its scope and permissive in its character. It does not seek to establish a general system of registration of births, deaths and marriages for all classes, still less to make that system compulsory. It applies only to a comparatively small class, and only to those members of that class who choose to avail themselves of its provisions. It will not set up any new and expensive machinery, and it is expected that any extra cost which it may involve will be recouped by the fees levied under it.

"The Bill is intended primarily for the benefit of Christians, whose baptisms and burials are registered by their clergymen, and whose marriages are solemnized in accordance with the Christian Marriage Acts. When the Bill was introduced a suggestion was made that the provisions of the chapter relating to the registration of births and deaths should be extended to Hindus and Muhammadans, and this suggestion was much discussed in the papers which were laid before the Select Committee. On the one hand, it was urged—and it must, I think, be admitted—that Hindus and Muhammadans would often be glad to secure the advantages of registration for evidential purposes; but, on the other hand, it seemed clear that any large and general extension of the scope of the Bill would be inconsistent with its character, would require the establishment of machinery on a scale altogether incommensurate with that which had been contemplated, and might involve indefinite expenditure. Under these circumstances, the Select Committee came to the conclusion that they would not be justified in going further than to insert a provision enabling Local Governments to extend the system of voluntary registration cautiously and experimentally to other classes within limited areas. If the result of any such experiment should show that there is a genuine demand for an extension of the system, a strong case would be made out for legislation to supply the requisite machinery.

"In the meantime we must be content to work with existing machinery. Doubts have been expressed whether in those towns where a system of registration for statistical purposes already exists it will work in harmony with our new system of registration for evidential purposes; but I feel pretty confident that the difficulties which have been suggested may be overcome by suitable administrative arrangements. Throughout the greater part of the country we shall have to rely mainly on the voluntary agency of those ministers of religion who at present keep registers of baptisms and burials. Many of these gentlemen have supplied us with useful suggestions, but I observe that some of them do not fully understand the grounds on which this legislation has been undertaken. Thus a chaplain writing from Delhi remarks that the existing ecclesiastical registers are carefully kept, that the entries are made under the signature of respectable persons, and the particulars given are obtained from the parties concerned. Why, he asks, should they not be admissible in evidence, and why set up what he describes as the 'cumbrous and expensive machinery excogitated in the Bill.' I hope that the machinery proposed will prove to be neither cumbrous nor expensive, but perhaps I did not sufficiently explain in introducing the Bill the nature of the objection which has been taken to the evidence obtainable under the existing system. It is a purely technical objection, and implies no disparagement of the care with which ecclesiastical registers are kept. There is a section in the Evidence Act which gives relevance to entries in public records made by a public servant in the discharge of his official duty, or by any other person in performance of a duty specially enjoined by the law of the country in which the record is kept, and it has been questioned by high legal authority whether entries in ordinary ecclesiastical registers fell within the category to which this section refers. This is the doubt which we desire to remove with the least possible disturbance of existing arrangements. **If those clergymen who, we hope, will act as voluntary Registrars will compare the revised Bill with the Bill as originally introduced, they will see that the Select Committee have endeavoured to meet their wishes in every way, and to avoid imposing on them duties which would be inconsistent with the discharge of their ecclesiastical functions. For instance, the original scheme was to establish Registrars for specified local areas. But it was represented that, whilst a minister might be willing to act as Registrar for his own congregation, he might be disinclined to undertake the duty for the benefit of members of other congregations. The objection seemed reasonable, and accordingly it will be found that, under the revised Bill, Registrars may be appointed not merely for specified areas but also for specified classes. Again, we have modified, in accordance with wishes which have been expressed, the section of the Bill which directs certain clergymen to send entries to the central office through their ecclesiastical superiors. This particular section has had to encounter another objection which I have been unable to remove by amendment, but which I can satisfactorily explain away. It refers to 'the Churches of England, Rome and Scotland' in that order, and I am told, in one of the papers from Bombay, that to place the words 'Church of Rome' before the words 'Church of Scotland' is an error which will give grave offence. Now the truth is that the draughtsman was wholly guiltless of any sinister desire to depreciate the status of the Church of Scotland, and had merely adopted an alphabetical arrangement as being the least invidious. If the Church of Rome appears to take precedence of the Church of Scotland in this section, it is merely because in the English alphabet, as in alphabets which existed long before any of the Christian churches were dreamt of, the letter R takes precedence of the letter S. As a matter of fact, lower down in the same section, the Church of Scotland is, for reasons not unconnected with draughtsmanship, mentioned before the Church of Rome.**

"I need not explain in detail the other alterations which have been made in the Bill. The chapter relating to registration of marriages has, on the

advice of a leading member of the Parsi community at Bombay, been extended to certain Parsi marriages which are at present registered much in the same way as marriages under the Christian Marriage Acts.

"The alterations in the chapter relating to the registration of births and deaths have been suggested by the criticisms which we have received, and by a further comparison with the English registration law. In considering the applicability of the latter law the Committee have borne in mind the essential difference between a system of registration which is universal and compulsory and a system which is partial and permissive. Thus the English law imposes on certain persons the obligation of giving notice of a birth or death. The Indian Bill merely requires the Registrar to make an entry on the receipt of notice from any one of certain persons authorized to give the notice, and we have found it possible to extend this latter class so as to make it include all persons who are likely to be in a position to give satisfactory evidence of the event. But we have not seen our way to a provision authorizing notices of births and deaths to be sent by post. The whole value of the measure depends on the register book being kept, and the entries in it being authenticated, in such a manner as to minimize the risk of fraud or error, and it is obvious that a book made up of loose fly-leaves would be open to serious objection on that score. If this were a compulsory measure, arguments based on the difficulty and inconvenience of personal attendance would be entitled to great weight. But it is only a permissive measure, and those who wish to take advantage of its provisions must be prepared in some cases to face a certain amount of trouble and expense.

"On the whole, I can confidently commend the Bill to the Council as one which, though modest in its scope, will, I believe, prove a very useful addition to our Statute-book."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN REGISTRATION ACT, 1877, AMENDMENT BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to amend the Indian Registration Act, 1877, be taken into consideration. He said:—

"The principal object of this Bill was to facilitate the issue of mortgage-debentures by companies by exempting them from registration under the Indian Registration Act when the mortgage-deed to which they refer is so registered.

"All the proposals of the Bill as introduced have met with general approval, but the Select Committee have received various suggestions for amending the Registration Act in other respects. Only one of the amendments suggested appeared to be of sufficient urgency to justify its being dealt with in the present Bill. There is a recent decision of the Allahabad High Court to the effect that receipts for payment of mortgage money are compulsorily registrable. Almost all the authorities whom we have consulted are agreed that, whether this interpretation of the Act is right or wrong, it cannot be enforced without causing great practical inconvenience. Accordingly, a clause has been added to the Bill in Select Committee expressly exempting from compulsory registration any endorsement on a mortgage-deed acknowledging the payment of the whole or any part of the mortgage-money, whether the endorsement does or does not purport to extinguish the mortgage, and any other receipt for payment of money due under a mortgage when the receipt does not purport to extinguish the mortgage. In so framing the clause we have, as regards endorsements, followed the course recommended by the High Court at Bombay, and, as regards other receipts, the general tenor of the opinions expressed by the authorities whom the Government of India has consulted."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

BENGAL TENANCY ACT, 1885, AMENDMENT BILL.

The Hon'ble MR. EVANS moved for leave to introduce a Bill to amend sections 12 and 13 of the Bengal Tenancy Act, 1885. He said:—

"The object of this Bill is stated in the Statement of Objects and Reasons as follows: It 'is to limit the registration of mortgages in landlords' records to those mortgages which are accompanied by possession and usufruct, and thereby to give effect to what was in fact the intention of the legislature when the Bengal Tenancy Act was passed.' The necessity for this very small measure arises in this way. The object of these two sections, 12 and 13, of the Bengal Tenancy Act is to substitute an official record in the first instance, and an official machinery for recording the transfer of permanent tenures, providing that the fee which the landlords are entitled to receive upon such transfers should be sent to the Collectors, who should themselves notify the transfers to the zamíndárs, who are to be able to make the necessary entries in their sheristas for their own guidance in dealing with the tenures. Formerly the state of the law was that it was necessary, when any transfer by gift, sale or otherwise took place of a permanent tenure that this transfer should be registered in the zamíndári sherista, and on that registration the zamíndárs were in the habit of getting a small fee. It was found inconvenient for many reasons which I need not dilate upon, and it was proposed in the new law that the registrar should take the fee and register, and that no such transfer should take place without registry and the payment of a fee and a notification through the Collector to the zamíndár. This was the machinery which was substituted for the former one and considered more effective. It will be noted from what I have said that the old words were a 'transfer by gift, sale or otherwise', and it had not, as a matter of fact, been held that a mortgage came within this definition at all, nor was it the practice that zamíndárs should demand that mortgages should be registered in their sheristas, and the reason, of course, is not far to seek. It was because, while the mortgages were simply intended to raise money on lands, without any transfer or the creation of new tenants by such mortgage, it did not, as a matter of fact, concern them at all. When the new Act was being made, and when provisions were being introduced for the transferability of raiyati holdings, it was feared by the zamíndárs that, under the guise of mortgages by which a mortgagee was to be put in possession, a transfer would, in point of fact, be effected of these occupancy-holdings, so as to defeat their right of pre-emption. A good deal of discussion took place in regard to that matter, but, although some proposals were made for limiting the operation of this word 'mortgage' to a mortgage involving immediate possession, the matter was dropped out of sight owing to the abandonment by the Government of the provisions with regard to the transferability of occupancy-holdings; and so it came to pass that, when there existed the corresponding words in the provisions with regard to the registration and transfer of permanent tenures, the matter was also more or less lost sight of. The result is that, as the words stand at present, in certain classes of mortgages, particularly in mortgages after the English form, which are declared by the Transfer of Property Act to be transfers of property with the right of reconveyance, the result is that, whereas an English mortgage is really only a method of raising money which allows the tenureholder to remain in possession, the transaction being one with which the landlord has nothing to do, yet this transaction may not take place without all those formalities, the description of the tenure, the payment of a fee and notices to the landlord, and all the rest of it; and although it is probable that the simple mortgage-bonds which do not carry possession with them can be made without this difficulty, still it is very certain that mortgages in the English form may not be made without this result. The result of the law has been very serious inconveniences. Although the number of mortgages registered in Calcutta since the passing of the Act is very small, yet a very considerable number of mortgages are kept back

owing to this difficulty. I am informed that the Chamber of Commerce is about to make a representation on the subject. Under these circumstances, seeing that it was never the intention of the legislature to do anything more than to subject a transfer by mortgage with possession to the same rule as sales, it appears to me that it is highly desirable that the inconveniences that have arisen from inadvertence should be removed. Under these circumstances I have brought forward this Bill, and beg leave to introduce it. The effect of it will be, so far as I understand, merely to do that which we arranged with the zamíndárs to do, to avoid doing that which we never intended to do, which they never asked us to do, which they had no reason for asking us to do, and which they do not at present desire us to do."

The Hon'ble PEÁRI MOHAN MUKERJI said:—"I wish to observe that, in the Select Committee on the Bengal Tenancy Bill, not only I but the hon'ble member who represented the views of the Bengal Government moved to limit the definition of 'transfer' among other transactions to mortgages with possession. That amendment was accepted by the Committee when there was in the Bill a section providing for the transfer of occupancy-holdings, and the definition of 'transfer' was intended to apply both to tenures and to occupancy-holdings. When the section about the transfer of occupancy-holdings was abandoned, the definition of 'transfer' was also struck out of the Bill, and it was simply a matter of oversight, as has been observed by the hon'ble mover of this Bill, that the word 'transfer,' with reference to the tenure sections of the Bill, was not qualified in the way in which the Select Committee intended it to be qualified. I think therefore that the Bill which the hon'ble member intends to introduce will simply give effect to what was the intention of the legislature. But I should mention that in Behar generally and in parts of Bengal this amendment will perceptibly curtail the gains of landholders."

The Hon'ble MR. ILBERT said:—"The question raised by this Bill appears to be one purely between tenureholders and zamíndárs. The amendment is moved on behalf of tenureholders, and I understand the Hon'ble Peári Mohan Mukerji to say that he accepts it on behalf of zamíndárs, and he is very probably right in saying—although I do not remember precisely what took place—that it was the intention of the Select Committee to qualify sections 12 and 13 of the Bengal Tenancy Act in some such way as the Hon'ble Mr. Evans now proposes. Under these circumstances I need hardly say that no objection will be offered to the Bill on behalf of the Government of India."

The Motion was put and agreed to.

The Hon'ble MR. EVANS also introduced the Bill.

The Council adjourned to Friday, the 19th February, 1886.

S. HARVEY JAMES,
Offg. Secy. to the Govt. of India.
Legislative Department.

FORT WILLIAM;
The 17th February, 1886.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 17th FEBRUARY 1886.

GENERAL REMARKS.—Except in the Tanjore district of Madras and parts of the Punjab, the week has been practically rainless.

In Madras and Mysore agricultural prospects remain fair. In Coorg the threshing of rice and coffee-picking have been almost completed, and the season promises well.

In Bombay the *rabi* harvest is in progress in most districts of the Deccan and in parts of Bijapur and Dharwar, and prospects are good. In the Berars, Hyderabad, Central India, and Rajputana the standing crops continue in good condition.

The *rabi* crops in the North-Western Provinces and Oudh and the Punjab are generally in excellent condition and promise well, though in the former provinces frost and blight have done harm in some places. In the Central Provinces prospects are favourable, but some injury has been caused to the crops by frost and insects.

In Bengal the *rabi* crops are being cut in places with a good outturn. The spring rice is thriving and transplanting operations have nearly been finished. Gathering of opium has commenced in Gya, Sarun, and Monghyr. In Assam the mustard crop has been nearly harvested.

In British Burma the recent rain has injured the rice crop in Bassein, Shwegyin, and Thonegwa; the extent of damage in other districts is not yet known.

The public health is generally good.

Prices are rising in the North-Western Provinces and Oudh, in the Multan district of the Punjab, and in the Jubbulpore and Hoshangabad districts of the Central Provinces, and are falling in the Mysore district. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 17th)		
Bellary	*Nil*	Standing crops generally good, but *cholum*, linseed and wheat suffering from disease in parts of one taluk; harvest dry grains, yield about average.
Kurnool	*Nil*	Cotton and some standing dry crops slightly injured in parts by late unseasonable rains and by insects; harvest dry grains, yield below average. Smallpox and cattle-disease in one taluk.
Ganjam	*Nil*	Fever in one, smallpox in four, and cattle-disease in seven taluks; 12 deaths from cholera.
Kistna	*Nil*	Standing crops generally good, but some dry crops slightly affected by insects in parts; harvest dry grains, outturn below average. River below Anicut crest. Fever abating, slight smallpox; deaths from cholera unreported last week 58, this week 72.
Chingleput (Madras)	*Nil*	Standing crops good; harvest paddy, yield below average. Fever in one, smallpox in another, and cattle-disease in two taluks.
Coimbatore	*Nil*	Standing crops good; harvest wet and dry grains, outturn about average. Fever in two taluks.
Tanjore	(Average) ·54	Standing crops good; harvest wet and dry grains, outturn below average. Cattle-disease in one taluk.
Madura	Last week since revised ·02 This week ·06	Harvest paddy, yield about average. Fever prevalent; cattle-disease in one taluk.
Malabar	*Nil*	Harvest second crop paddy, outturn below average; slight smallpox in eight, and fever in two taluks; nine deaths from cholera; cattle-disease in one taluk.
Travancore	*Nil*	Harvest almost over. Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(Feb. 17th)		
Karachi	*Nil*	River at Kotri on 14th 5 feet 3 inches against 6 feet 11 inches on same date last year. Fever in twelve and cattle-disease in five talukas. Prices of wheat, red rice, and *bajri* in Karachi 26, 30, and 34, in Sakro *nil*, 38 and 47, in Jati 26, 40, and 42, and in Schwan 32, 44, and 40 pounds per rupee, respectively.
Hyderabad	Slight rain on 13th	Wheat cultivation in Hyderabad and Guni talukas injured by frost. River at Kotri on 15th 5 feet 5 inches against 6 feet 10 inches on same date last year. Fever in three and smallpox in one taluka. Wheat 26 pounds 10 ounces, *bajri* 37 pounds 4 ounces, *jowari* 40, white rice, 18½, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	Cotton picking commenced in Dholka and Sanand talukas; standing crops healthy. Fever in Sanand. Wheat 36 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Public health good. Standing crops in good condition. Prices —*bajri* 28, wheat 23, and rice 18 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	*Nil*	Standing crops healthy. Cotton-picking commenced. Fever in Jalalpur and Mandvi talukas. Average prices—*jowari* 39 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Rabi* crops fare well in Nasik, Baglan, and Kalvan talukas. Irrigated wheat partially blighted throughout the district; *kharif* threshing nearly over; *rabi* reaping commenced in Dindori and Kalvan talukas. Foot-disease among cattle in parts of Peint taluka; public health good, save in Peint where fever and ague have appeared. Wheat 31½, *bajri* 32¾, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature rose from 1° cool on 10th to 1° warm on 12th; remained 1° warm till 15th and then fell to 2° cool on 16th; vapour in air normal on 10th, afterwards excessive; abnormal wind southerly on 13th and 14th, northerly on 10th; wind normal on all other days.
Poona	*Nil*	*Rabi* crops doing well; wheat slightly blighted in Purandhar and Haveli talukas; reaping commenced in some talukas. Prices of *bajri* 34 and *jowari* 42, in Poona *bajri* 34 and *jowari* 35 pounds per rupee.
Ahmednagar	*Nil*	Reaping commenced. Wheat and gram injured by cloudy weather. Health good. Fever in Akola. *Bajri* average 45 and *jowari* 54 pounds per rupee.
Sholapur	*Nil*	Linseed, wheat, *tur*, and gram crops have suffered from blight and insects in places; cotton crops inferior in Madha and Karmala talukas; reaping of *rabi* crops has commenced in portions of the Madha and Malsiras talukas. *Jowari* 52 pounds 14 tolas and *bajri* 44 pounds 24 tolas per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* completed; that of wheat and gram in progress; exotic cotton blighted in three talukas. Slight fever and cattle-disease in Bankapur and Hangal. Rice 22 to 32 and *jowari* 48 to 64 pounds per rupee.
Kanara	*Nil*	Second crop rice good; pepper and sugarcane harvest commenced. Cattle-disease in Karwar and Siddapur; slight fever and small-pox in three talukas. Weather warm. Common rice in Karwar 14, in district average 13½ seers per rupee.
Rajkot	*Nil*	Fever and bowel complaints prevalent. Weather cold and windy. *Bajri* 32, *jowari* 43, and wheat 33 pounds per rupee.
		General Remarks.—Slight rain in parts of Hyderabad and Shikarpur. Reaping of *rabi* crops in progress in most districts of the Deccan and in parts of Bijapur and Dharwar. Fever in parts of 13, cattle-disease in parts of 10, and small-pox in parts of three districts.
Bengal—(Feb. 17th)		
Chittagong	*Nil*	Weather seasonable. Prospects of spring crops generally fair. Rain wanted. Prices rising. Public health good.
Dacca	*Nil*	Prospects of crops continue favourable; mustard and pulses being gathered; *boro* paddy doing well; ploughing going on. Public health good.
24-Pergunnahs	*Nil*	Prospects of cold-weather crops good; some cereals being harvested, outturn estimated at 14 annas. Average price of common rice 15 to 16 seers per rupee. Stray cases of cholera reported from all sub-divisions.
Khoolna	*Nil*	Weather cold. *Aman* harvest not finished, outturn good; winter crops being stored; transplanting of *boro* paddy nearly completed. Public health fair.
Moorshedabad	*Nil*	Weather seasonable. Prospects of crops favourable. Public health good. Price of rice stationary.
Pubna	*Nil*	Weather fine. Prospects of winter crops good. A little rain wanted, especially in Serajganj. Sugarcane being cut. Public health good.
Dinagepore	*Nil*	Weather fine. Prospects of *rabi* crops good; sugarcane in great part cut. Average price of rice 22 seers per rupee.
Rungpore	*Nil*	Prospects of crops favourable; mustard being gathered; land being ploughed in some places. Public health good.
Midnapore	*Nil*	Prospects of crops fair. Public health good, but sporadic cholera still reported.
Burdwan	*Nil*	*Rabi* crops good. Public health fair. Common rice 17 to 22 seers per rupee.
Bhagulpore	*Nil*	*Rabi* prospects good; mustard and *kali* pulse being harvested. Prices risen slightly.
Monghyr		Gathering of opium somewhat interfered with by west winds.
Purneah	*Nil*	Crops doing well; grass drying up; harvesting of mustard and tobacco continues. Coarse rice 20 seers per rupee. Public health very fair.
Durbhanga	*Nil*	*Rabi* crops in ear and look very promising; mustard being harvested; poppy doing well. Prices almost stationary. Public health good.
Mozufferpore		Prospects of opium crop continue very promising.
Sarun		Condition of poppy good. Weather favourable; gathering of opium commenced.
Chumparun	*Nil*	Prospects of *rabi* and poppy crops continue good; poppy plants beginning to come into flower. Prices stationary. Public health fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Patna	*Nil*	Prospects of *rabi* and poppy good. Prices stationary. Public health good.
Gya	*Nil*	*Rabi* prospects favourable; extracting from poppy seeds begun in places; prospects fair generally, but less satisfactory in Tehta Sub-Agency. Prices of food grains stationary. Public health good.
Shahabad		Poppy not completely recovered from effects of December rain in places where it was heavy, hence poor and irregular in appearance and inferior to last year's crop.
Hazaribagh	*Nil*	*Rabi* and poppy continue promising; mustard and *til* being harvested. Public health good.
Cuttack	*Nil*	Weather seasonable; mornings foggy. *Rabi* crops being gathered; spring rice growing well. Price of rice unchanged. Public health generally good.
		General Remarks.—No rain fell in the Lower Provinces during the week. All *rabi* crops are generally promising; some of them are being harvested with good results; sugarcane is being pressed; *boro* rice is thriving; transplanting is nearly finished; prospects of poppy are favourable except in Shahabad where they are indifferent; gathering of opium has commenced in Gya, Sarun, and Monghyr. Prices of rice generally stationary. Public health is generally fair.
N. W. Provinces and Oudh—(Feb. 17th)		
Benares (Feb. 16th)	*Nil*	Weather cold and clear. *Rabi* prospects good. Markets well supplied and prices steady. Public health is good; no cattle-disease.
Gorakhpore („ 15th)	*Nil*	Weather cloudy but favourable. Poppy and *rabi* crops in good condition; *rabi* is being reaped. Slight rise in prices. Health good.
Fyzabad („ 16th)	*Nil*	Weather clear and cold. *Rabi* and opium crops continue promising; sugarcane pressing continues. Markets well supplied, but fodder is very dear. Health generally good; no cattle-disease.
Lucknow („ 15th)	*Nil*	Strong west wind. Prospects very favourable. Poppy is being irrigated. Markets well supplied, though prices are rising. Fodder very dear. Health of people and condition of cattle good.
Rae Barelli („ „)	*Nil*	Weather seasonable. Prospects of *rabi* crops continue favourable. Prices rising. General health good.
Partabgarh („ 10th)	A slight sprinkle of rain on 15th.	Westerly wind; weather fine, but somewhat cloudy. *Arhar*, gram and peas somewhat damaged by blight; peas and *sarson* being cut. Prospects generally good. Prices almost stationary. No sickness.
Allahabad („ „)	*Nil*	Weather seasonable; somewhat cloudy of late. Crops excellent; peas only slightly damaged by frost. Markets well supplied. Prices show a slight fall. No sickness either of men or cattle.
Cawnpore („ 15th)	*Nil*	Weather seasonable. Slight injury to crops by frost reported from three parganas. Poppy coming into flower. Prices have risen. Condition of people and cattle good.
Farakhabad („ 16th)	*Nil*	Damage to crops apprehended from recent high winds and cold. Health good.
Sitapur („ „)	*Nil*	Crops slightly damaged by insects, but benefited by westerly winds; poppy crops satisfactory; early sown plants coming into flower; fodder very scanty. Prices rising. Health good.
Bareilly („ „)	*Nil*	Condition of crops including poppy excellent. Markets well supplied, and prices almost stationary. Health of people and cattle good.
Banda („ „)	Slight rain on 15th	Weather cloudy. Gram, *arhar* and linseed much injured by frost, and wheat in parts by blight. Prices rising. Health good; no cattle-disease.
Kumaon („ „)	*Nil*	Weather cloudy off and on. Sunshine required for the *rabi* crops which are progressing well. Prices stationary. General health good; cattle-disease decreasing.
Agra („ 15th)	*Nil*	Slight damage reported from frost and blight, otherwise crops continue favourable. Prices rising. Health good.
Jhansi („ „)	*Ni*	Weather continues cloudy. Crops good, except in a few villages where grain and linseed crops have slightly suffered from blight. Prices rising. Condition of people and cattle good.
Ballia („ „)	*Nil*	Weather seasonable. Crops in good condition; sugarcane planting commenced in some places. Supplies sufficient. Health good.
Meerut („ 16th)	Slight shower on 9th.	*Rabi* crops flourishing; sugarcane pressing continues; ploughing for next year's cane commenced. Slight tendency to rise in prices of wheat; other grains stationary. Health good.
		General Remarks.—Weather has been generally cloudy and crops have been damaged in some places by frost and blight, but prospects continue favourable. Prices are rising, and fodder is reported dear in Oudh. The general health is good.
Punjab—(Feb. 17th)		
Delhi (Feb. 16th)	*Nil*	Health fair. Prices almost stationary. Prospects of current harvest promising.
Hissar	*Nil*	Health good. Prices stationary. Prospects of current harvest flourishing.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Umballa	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Jullunder	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot	*Nil*	Health good. Prices stationary. Prospects of current harvest flourishing.
Ferozepore	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Lahore	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Rawalpindi	·07	Health good. Prices stationary. Prospects of current harvest average.
Shahpur	*Nil*	Prices almost stationary.
Mooltan	Slight rain at Sadr	Health good. Prices rising. Prospects of current harvest favourable.
Dera Ismail Khan	Slight rain	Health good. Prices stationary. Prospects of current harvest good.
Peshawar	*Nil*	Health fair. Prices stationary. Prospects of current harvest good.
		General Remarks.—Good rain has fallen in the Rawalpindi district and slight rain at Multan and Dera Ismail Khan. Health generally good. Prices of food grains rising in Multan, elsewhere stationary. Fodder for cattle scarce in Lahore district and in the Kushab tahsil of the Shahpur district. Foot-and-mouth disease among cattle in parts of tahsil Bhera in the Shahpur district. Prospects of current harvest good.
Central Provinces— (Feb. 17th)		
Nagpur	*Nil*	Weather warm. Linseed injured; wheat good. Fever and cattle-disease in places. Prices steady.
Jubbulpore (Feb. 16th)	·10, with thunderstorms.	Weather cold. Gram and *masur* injured by frost; wheat slightly injured, otherwise prospects favourable. Health good. Prices high.
Seoni	*Nil*	Weather cloudy. Prospects good. Slight smallpox. Prices steady.
Hoshangabad	*Nil*	Weather occasionally cloudy. Prospects good, except of wheat. Cattle-disease in places. Prices rising.
Khandwa	*Nil*	Weather slightly cloudy and warm. Prospects good. Health good. Prices stationary.
Raipur	*Nil*	Weather clear and warm. Wheat and gram good; linseed injured by insects. Health good. Prices stationary.
Sambalpur (Feb. 13th)	*Nil*	Days warm. Rice-threshing and sugar-making continue. Health good. Trade brisk.
		General Remarks.—Weather becoming warm. Prospects continue favourable, although some damage is reported by frost and insects. Prices rising in two districts; elsewhere steady.
British Burma— (Feb. 17th)		
Akyab (Feb. 13th)	*Nil*	Public health and health of cattle good.
Bassein	*Nil*	Total rainfall to date 2·54 inches. Public health good; cattle-disease severe in two townships. Damage amounting to 20 per cent. has been caused to crops all round from the recent rain.
Rangoon	*Nil*	Total rainfall to date 1·58 inches. Public health and health of cattle good.
Amherst (Moulmein)	*Nil*	Public health and health of cattle good.
Tavoy	*Nil*	Public health and health of cattle good.
Pegu	*Nil*	Total rainfall to date 0·55. Public health and health of cattle good. Crops have sustained no damage from rain.
Henzada	*Nil*	Public health and health of cattle good.
Prome	*Nil*	Total rainfall to date ·00. Public health and health of cattle good. Crops did not suffer from the rain which fell last week.
Toungoo	*Nil*	Total rainfall to date 2·42 inches. Public health and health of cattle good. No reports received of injury caused to crops by late rain.
Thayetmyo	*Nil*	Total rainfall to date 0·13. Public health and health of cattle good.
		General Remarks.—Cholera slight in one district, elsewhere public health good; cattle-disease severe in one district and slight in one district, elsewhere health of cattle good. The rain at the beginning of the month is said to have done no damage in Pegu and Prome; in Bassein the rain is estimated to have damaged 20 per cent. of the crop, in Shwegyin 10 per cent., and in Thonegwa 1 per cent. The amount of damage done in other districts is not yet known.
Assam—(Feb. 17th)		
Gauhati		Weather seasonable. Public health fair; cattle-disease in some mauzas; *kalazar* still in some parts of Luki. Gathering of mustard nearly finished; pressing of sugarcane in progress. Rain wanted for *ahu* crops.
Sylhet		No change in crops since last report. Cholera lingering in Karimganj sub-division.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—*contd.*		
Cachar		Weather getting warm. Reaping of mustard crop nearly finished. Common rice 16 seers per rupee. Three deaths from cholera in Sadr, 18 in Hailakandi, and one in Katigara reported.
Dibrugarh	·04	Weather seasonable. Land being cleared for *ahu*; pressing of sugarcane commenced; mustard crop being gathered.
Mysore and Coorg— (Feb. 17th)		
Bangalore		Standing crops in good condition; prospects of season fair. Supply of water and fodder reported to be diminishing in the Kolar district and inadequate in parts of the Tumkur district. Public health good; cattle-disease continues in affected parts. Prices fallen considerably in the Mysore district.
Mysore		
Mercara		Threshing of rice and coffee-picking nearly completed; prospects of season good. Smallpox and fever prevalent in parts.
Berar and Hyderabad— (Feb. 17th)		
Amraoti		Weather clear. Prospects of crops good. Wheat 22 and *jowari* 26 seers per rupee.
Akola		Weather becoming warm. Crops in good condition. Reaping of linseed commenced.
Hyderabad		Standing crops prospering. General health of talukas fair. Prices—wheat 15¾, coarse rice 12, white *juar* 21¼, yellow *juar* 22, and *tur* 14½ seers per current sicca rupee.
Central India States— (Feb. 17th)		
Indore	*Nil*	Weather changeable, but warmer than last week, and slightly cloudy. Health good. Prices steady.
Morar (Gwalior)	*Nil*	Health and prospects good. Weather seasonable.
Sutna	*Nil*	Weather clear and cool. Health and prospects good.
Neemuch	*Nil*	Weather seasonable. Health good. Crops doing well.
Goona	*Nil*	Health and prospects good.
Agar	*Nil*	Health good. Opium crops fair.
Sehore	*Nil*	Weather clear. Crops and health good.
Nowgong	*Nil*	Weather seasonable. Prices steady. Health good.
Bhopawar (Manpur)	*Nil*	Weather cloudy and hot. *Rabi* crops being harvested. Prospects and health good. Prices steady.
Rajputana—(Feb. 17th)		
Abu (Feb. 17th)	*Nil*	A little fever, health otherwise good. Weather fine and cold.
Sirohi („ 15th)	*Nil*	Health and crop prospects good. Tanks drying. Weather cold.
Marwar („ 13th)	Slight rain on night of 7th.	Smallpox abating. Weather cloudy with cold winds, generally from north and east. *Rabi* in some places damaged a little by cold. Prices stationary.
Kherwara („ 15th)	*Nil*	Tanks and wells decreasing. Prospects fair. Pneumonia decreasing. Prices slightly fallen. Weather somewhat warmer.
Meywar („ „)	*Nil*	Tanks and wells low. Crop prospects and health good. Prices stationary. Weather seasonable.
Harowti („ „)	*Nil*	Weather getting warmer. Smallpox abating. Crops good.
Jhallawar („ 12th)	*Nil*	Considerable damage done to opium crop by continued cold weather. Health good.
Kotah („ 13th)	*Nil*	Tanks and wells good. Opium and gram have suffered in some places from frost.
Ajmere („ 17th)	Slight rain	Fever and smallpox still prevalent. Poppy crop seriously injured by cold wind.
Jeypore („ 16th)	Slight rain	Prospects favourable. Prices steady. Health good.
Uwlur („ „)	*Nil*	Crop prospects and health good. Weather occasionally cloudy.
Bikanir („ 13th)	Slight rain in the districts of Ratangarh and Sonatgarh on 6th.	Fever and smallpox in Rattangarh; health otherwise good. Prices stationary. Weather clear and cold.
Nepal— (Feb. 17th)	*Nil*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 19th February, 1886.

PRESENT:

The Hon'ble C. P. Ilbert, C.S.I., C.I.E., *presiding*.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.

BENGAL TENANCY ACT, 1885, AMENDMENT BILL.

The Hon'ble MR. EVANS moved that the Bill to amend sections 12 and 13 of the Bengal Tenancy Act, 1885, be taken into consideration. He said:—"I do not think I need make any further remarks on the provisions of the Bill. The wording has been carefully considered by the Hon'ble the President, the Hon'ble Peári Mohan Mukerji and myself, and there has been no objection found that requires consideration."

The Motion was put and agreed to.

The Hon'ble MR. EVANS also moved that the Bill be passed.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES RENT ACT AMENDMENT BILL.

The Hon'ble MR. QUINTON moved for leave to introduce a Bill to amend the North-Western Provinces Rent Act, 1881. He said:—

"The changes proposed are not of a revolutionary character. They do not touch substantive law, and relate merely to the provisions respecting appeals in cases under the Rent Act.

"These cases are classified as applications and suits. In certain classes of applications, decisions passed by a Collector or Assistant Collector of the first class, when the value of the subject-matter exceeds Rs. 100, are declared to be final, subject to revision by the Commissioner or the Board; the obvious intention of the law being to stop further litigation after the first judicial decision, leaving to the superior revenue-authorities power to correct errors in exceptional cases. The effect of these provisions has, however, been very different. Petitions sent by post are received and acted on by Commissioners and the Board of Revenue; and under the Court-fees Act applications to those authorities require a stamp of only one rupee. Advantage has been taken of these facilities to work, to an extent never contemplated, the provisions respecting revision to which I have alluded, and the result is that a large number of cases come before Commissioners and the Board in which no action is called for, and that two appeals are given in cases where the law says there should be no appeal at all. In the year 1883-84 the number of these applications received by Commissioners was 2,594 and by the Board 1,044, the latter being in fact second appeals. Nearly 67 per cent. of these petitions were dismissed, as there appeared no ground for interference with the orders. The disposal of such cases, however, encroaches very materially on the time of Commissioners and the Board, and fosters gambling litigation. It is proposed therefore to sweep away altogether the revisional powers of the Commissioners and the Board in such cases, and to substitute for them one regular appeal, irrespective of the value of the subject-matter, to the Commissioner; a second appeal to the Board being allowed only when the Commissioner reverses or modifies the order of the Court of first instance. These appeals will bear the stamp provided by the Court-fees Act in analogous cases, which is an *ad valorem* duty calculated on one year's rent. We believe that this will in some parts of the country at least check the practice of filing groundless applications which has grown up under the present law, while it will offer no serious deterrent to applicants whose cases require a remedy.

"How far the alterations will produce this effect is of course uncertain, and some time must elapse before the effect manifests itself. Meanwhile, however, in at least two divisions the judicial work of Commissioners under the Rent Act has become so great as to cause unreasonable delay to suitors and to embarrass the administration in other departments. The Bill therefore proposes to give to Commissioners a power, to be exercised under the control of the Local Government, to transfer to Collectors appeals from the orders of first class Assistant Collectors pending in their Courts, and to Collectors power to dispose of such appeals. As set forth in the Statement of Objects and Reasons, this power is analogous to one conferred on Judges by the Bengal Civil Courts Acts to transfer for disposal to Subordinate Judges appeals from the decisions of Munsifs pending in the Judges' Courts. Collectors already dispose of appeals from certain classes of orders of Assistant Collectors of the first class, and as the power will be exercised under the control of the Lieutenant-Governor precautions will be taken against any inconvenience arising to suitors from its use. It is not expected that the number of appeals transferred will be such as to overburden Collectors. There are seven districts in the Benares division, where the measure is likely to be first put in force, and the number of cases that would fall to each Collector by transfers from the congested file of the Commissioner would not constitute an addition to his work of which he could reasonably complain. In the divisions where the judicial work of the Commissioner is not excessive the powers will not be put into operation.

"So much as regards appeals from applications. In the provisions of the Act respecting appeals from *suits* the Bill proposes to make only one change.

"The Rent Act, as it stands, allows of an appeal from the decisions of Collectors, and Assistant Collectors, first class, in rent-suits only when the value of the subject-matter is over Rs. 100 or some question of title is involved. Rent-suits have, however, this peculiarity, that the decision in a single case may govern rents throughout an entire village where the question disputed is the rent to which a tenant is liable. The decision on this point may be of the utmost consequence, not merely to the parties concerned but to a great number of other persons also. It is therefore very desirable that there should be an opportunity for correcting by an appeal erroneous decisions of this nature. If the value of the suit does not exceed Rs. 100, no such remedy now exists; and in the North-Western Provinces the value of the subject-matter in the great majority of rent-suits does not exceed Rs. 100. There is a further inconvenience, too, arising from the present state of the law on this point. A landlord, let us suppose, sues two tenants in the same village before an Assistant Collector of the first class for arrears of rent, the arrears being in one case Rs. 99 and in the other Rs. 101. In both cases the same plea is raised, that the rate at which rent is sued for is in excess of that payable, the holdings are similar in character, the plaintiff and the evidence adduced in both cases are the same, and there are numerous holdings in the village in which the same dispute exists. The Assistant Collector finds that the pleas are bad and decrees at the higher rate. In one case his decision is final and the higher rate is payable ever after so long as the tenancy continues; in the other an appeal is brought to the Judge, who takes a different view and finds that the rate payable is that alleged by the tenant, which similarly becomes the rate binding on the parties. Two contradictory decisions on what is practically the same issue thus receive the stamp of finality, and the tenants in the village and the landlord himself are not sure of their legal rights. Attempts at exaction, unnecessary litigation and soreness of feeling necessarily ensue. Cases of this nature have already occurred, and the mischief done by the state of the law is not inconsiderable. The Bill therefore proposes to allow an appeal from the decision of a Collector or Assistant Collector, first class, in cases where the value of the subject-matter does not exceed Rs. 100, not merely where a question of title is involved, but where the rent payable is put in issue and determined.

"Opportunity has been taken of the preparation of this Bill to correct an obvious omission in the existing law from which inconvenience has already resulted. Act XXI of 1881 gives no power to the superior Revenue Courts to transfer or bring on their own files cases pending in subordinate Courts—a power conferred on the higher Criminal and Civil Courts by the Codes of Criminal and Civil Procedure respectively, and on the superior Revenue Courts in other provinces by the Rent or Revenue Acts therein in force. The consequence is that officers are sometimes forced by the state of the law to dispose judicially of cases in which they have been concerned in their executive capacity. A case came recently before the Board in which a party in a rent-suit tried by a Tahsildár prayed to have his appeal heard by some other officer than the Collector of the district, who was also, as President of the Municipal Committee, a party to the suit. The Board were unable to pass the order asked for, as the law gave them no power to transfer a case from one Revenue Court to another. I need not waste the time of the Council by dilating on the necessity for applying a remedy to such a state of things. The Bill proposes to effect this by conferring on the Board of Revenue the powers required for the purpose."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the North-Western Provinces and Oudh Government Gazette in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES LAND-REVENUE ACT AMENDMENT BILL.

The Hon'ble MR. QUINTON also moved for leave to introduce a Bill to amend the North-Western Provinces Land-revenue Act, 1873. He said:—

"Here also I have no startling changes to announce. The revenue laws of the North-Western Provinces impose upon the Commissioner of a division certain duties which can be discharged by him alone. If therefore in any division the work arising out of these duties increases or accumulates to an unmanageable extent, the law affords no means of relieving the Commissioner short of breaking up the old division, constituting two new divisions and appointing a second Commissioner. The creation of a permanent appointment of this nature is generally more than the circumstances call for, and is a measure which in any case the Lieutenant-Governor would in the present straitened condition of the finances be very unwilling to recommend, and the Government of India and the Secretary of State still more unwilling to sanction. In the Bill which I have just obtained leave to introduce measures have been proposed, one effect of which we hope will be to lighten one branch of the Commissioner's duties. The operation in this direction of the alterations proposed in the system of appeal is uncertain, and in parts of the North-Western Provinces will not contribute very much to this result in consequence of the small size and low rent of the holdings. The plan of re-distributing the work when it bears heavily on Commissioners among the District Collectors is at most a temporary and tentative contrivance for adjusting the strain upon the Divisional Officers, and would be insufficient if the pressure were serious or prolonged.

"In Bengal, Bombay, the Central Provinces and the Punjab the law allows of the appointment of Additional or Assistant Commissioners to meet cases such as those I have referred to, and relief of this nature has with advantage been not unfrequently afforded.

"The Bill which I am asking leave to introduce proposes an analogous measure for the North-Western Provinces, and is drawn upon the lines of the Act passed by the Council last year, which authorized the appointment of an Additional Judicial Commissioner in Oudh—an appointment which I may say was made for a limited period now expired, and quite justified the reasons which induced the Council to pass the Act.

"The power to appoint an Additional Commissioner in any division can be exercised only with the sanction of the Governor General in Council, who is little likely to approve of unnecessary or extravagant appointments; and there is no intention of putting it in force till the transfer of appellate work to Collectors has been seen and tested."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the North-Western Provinces and Oudh Government Gazette in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

CRIMINAL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. ILBERT moved that the Hon'ble Messrs. Goodrich and Quinton and the Hon'ble Rao Saheb Vishvanath Narayan Mandlik be added to the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, the Bombay District Police Act, 1867, the Indian Penal Code and the Prisoners' Act, 1871.

The Motion was put and agreed to.

The Council adjourned to Friday, the 26th February, 1886.

REVENUE.

FLUCTUATING ASSESSMENTS IN THE MUZAFFARGARH DISTRICT.

Cir. No. $\frac{15 \text{ R.}}{48-2.}$

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Revenue),—dated Calcutta, the 17th February 1886.

READ again—

Resolution No. 58 R., dated the 12th October 1882, regarding suspensions and remissions of revenue in times of scarcity.

Read also the following extracts from the report and orders on the settlement report of the Muzaffargarh District in the Punjab, printed as an appendix to this Resolution:—

(1) Paragraph 29 of Chapter VII. of the Report on the Settlement of the Muzaffargarh District, by Mr. E. O'Brien.

(2) Paragraphs 7 and 8 of a letter from Major Wace, Commissioner of Settlements and Agriculture, to the Financial Commissioner of the Punjab, No. 340, dated the 2nd December 1882.

(3) Paragraph 11 of letter No. 687, dated the 1st June 1883, from the Senior Secretary to the Financial Commissioner to the Government of the Punjab.

(4) Paragraph 14 of the Resolution recorded by the Government of the Punjab, No. 230 dated the 11th November 1885.

RESOLUTION.

THE Government of India resolves that the papers cited in the preamble to this Resolution be made an appendix to the Resolution of 12th October 1882, and desires that, with the permission of Local Governments and Administrations, they may be circulated for the information of revenue officers with special reference to the indication given in the 8th paragraph of the letter * from the Commissioner of Settlements and Agriculture of the possibility, under suitable circumstances, of successfully working a fluctuating system of assessment.

* No. 340, dated the 2nd December 1882.

2. The success of the experiment tried in Muzaffargarh cannot be absolutely asserted until it has undergone a more prolonged trial. On any future occasion, however, when the applicability of a similar system to precarious or insecure tracts is to be determined, the practical results of the Muzaffargarh experiment may usefully be ascertained and taken into consideration.

ORDER.—Ordered, that the above Resolution be forwarded to the Local Governments and Administrations noted on the margin for information; and that it be forwarded to the Foreign Department for communication to the Resident at Hyderabad and the Chief Commissioner of Ajmere-Merwara.

Government of Madras.	Government of Punjab.

CHAS. S. BAYLEY,
Under-Secretary to the Government of India.

Extract (paragraph 29, Chapter VII.) from a Report on the Settlement of the Muzaffargarh District, by MR. E. O'BRIEN.

Fluctuating assessments in the Bet circles.

29. In consequence of the large area depending on sailáb, and the uncertainty of that means of irrigation, a fluctuating system of assessment has been sanctioned for the Bet assessment circles and the chahi sailábá circle of Alípur. The procedure and rates differ slightly in the three tahsíls. In Sanáwán, which was first reported, the whole of the Bet circle will be assessed every year on the area under cultivation. Cultivation by sailáb alone will pay a mean rate of 13 annas per acre, and each well and jhalár in work will pay a yearly fee of ₹6. The small area of canal-irrigation in this circle will also be annually assessed. In the Indus Bet circles of Muzaffargarh and Alípur the whole cultivation will come under fluctuating assessment. The sailábá rate was fixed at 15 annas per acre, and the well and jhalár rate at ₹6. In the chahi sailábá circle of Alípur the whole will be annually assessed. The sailábá rate is 14 annas per acre, and the well rate ₹8. There is a Bet Chenáb circle in Muzaffargarh and Alípur. From the southern end of the district to the junction of the Sutlej with the Chenáb opposite Madwala, this circle is much affected by the river, and violent changes occur by erosion and by lands being thrown out or brought under cultivation.

Extract (paragraphs 7 and 8) of a letter from MAJOR E. G. WACE, *Commissioner of Settlements and Agriculture, to the Financial Commissioner, Punjab, No. 340, dated the 2nd December 1882.*

The assessment paragraphs 21—32 of Chapter VII.

Lands placed under fluctuating assessment.

7. The whole Indus *bet** in all three tahsíls has been placed under a fluctuating assessment; also the whole Chenáb bet below the junction of the Chenáb with the Sutlej. North of that point the bet wells have a fixed assessment, but the sailáb lands of the bet are assessed annually. The object of this fluctuating or annual assessment is this. Under the expired settlement the assessment was substantially on the bet land in its culturable aspect; that is to say, it was assumed that if the land was culturable it would be cultivated. The lands of each village fell roughly into two classes, (i)—those which were culturable or cultivated at the time when the settlement was made, and these had a fixed assessment, to which the owners were rigidly held so long as by river action the land was not made permanently unculturable; (ii)—lands newly formed by the river or made culturable by alluvial deposit after date of settlement, and these were assessed *as soon as they became culturable* at the average rate of the fixed assessment on the 1st class. The fault of the system was, that it made the assessment depend on the apparent quality of the soil: and assumed that its cultivation was at the command of the cultivator in the same degree as in the case of lands not exposed to floods, whereas in truth, the power of the owners to cultivate it depended in a very minor degree on themselves, and mainly on the action of the floods; which action extended with similarly capricious results over the whole alluvial that they inundated. The new system of assessment is based on the recognition of the fact that such land as is exposed to the annually recurring action of the Indus and Chenáb floods is not really under the command of the cultivator; when the action of the floods is favourable, he can cultivate and can pay revenue accordingly. When he does not cultivate, it is usually due to the unfavourable character of the floods; and to enforce a claim for revenue under such circumstances is opposed to the fundamental principles of our revenue administration. The rates fixed for sailáb cultivation in these lands vary from 18½ and 17 annas on the Chenáb, to 15, 14, and 13 annas on the Indus. The Chenáb rates are much the same as those of the Mooltan District. The Indus rates are much the same, or but slightly higher than those recently applied in like circumstances in the Derah Ismail Khan District. In the numerous cases in which these sailáb lands are assisted by wells or jhalárs, an additional rate is charged of ₹9 per well on the Chenáb and ₹8 and 6 on the Indus. These well rates are equivalent to an enhancement of the sailáb rate by 5 and 6 annas, so that the net result on these sailáb lands assisted by wells, is much the same as in Jhang where they have been charged from 20 to 22 annas per acre. In the Bhakkar Tahsíl of Dera Ismail Khan also such lands have been charged 20 annas per acre.

Derah Ismail Khan Settlement Report, paragraphs 486, 494, and 499.

Chapter I., paragraph 13.

Jhang report, paragraph 182.

Gross result of the fluctuating assessment.

8. The whole cultivated area under fluctuating assessment is about 120,000 acres, and it contributes over a fourth of the revenue of the district. The Settlement Officer shows that this measure has already increased the revenue of the sailáb lands by nearly ₹15,000 or one-tenth. And I believe that the annual reports show that the system is worked with ease, and is appreciated equally by the Revenue Officers and by the land-owners; and that the revenue assessed under it is collected with greater ease than that of any other part of the District. It would be nothing less than a calamity if, for lack of supervision, a system so well adjusted to the physical circumstances of these sailáb tracts were to fall into confusion and be discredited.

Chapter I., paragraph 11. Chapter VII., paragraph 35.

* *Bet*=the tract on the river banks which is dependent on *sailáb* alone, or on *sailáb* assisted by wells.

Extract (paragraph 11) from letter No. 687, dated the 1st June 1883, from the Senior Secretary to the Financial Commissioner, to the Secretary to the Government of the Punjab.

The placing the riverain lands under a fluctuating system of assessment.

11. The necessity for placing the riverain lands under some system of fluctuating assessment and the character of the system which has been introduced, are clearly explained in paragraphs 7 and 8 of the Settlement Commissioner's review. Briefly stated, the necessity for the system arises from the fact that in these tracts the ability of the cultivator to crop the land depends not on his own will, but on the capricious action of the two mighty rivers, which wash the sides of the district; and the system introduced is one in which the land cultivated each year is assessed at rates which vary according to the nature and the mode of irrigation. On the Chenab, above its junction with the Sutlej, the wells have a fixed assessment; but throughout the rest of the district the whole of the tract subject to the action of the rivers is annually re-assessed. The assessments when made are sanctioned by the Commissioner, and then reported to this office, where the statements are examined and the results recorded in a register The results so recorded for the three years 1879-80, 1880-81, and 1881-82 are as follows:—

TAHSIL.	Year of measurement.	JAMA OF FLUCTUATING REVENUE.					
		On grazing lands.	On cultivation.	Abiána.	On Date trees.	TOTAL. Khalsa.	TOTAL. Jágír and máfi.
Muzaffargarh . .	1879-80	2,752	31,724	1,521	299	35,363	933
Alípur . . .	„	10,551	58,864	8,771	2,296	80,345	137
Sanáwan . . .	„	2,641	23,628	3,558	381	30,208	...
District, Total . .	...	15,944	1,14,216	13,850	2,976	1,45,916	1,070
Muzaffargarh . .	1880-81	3,022	34,922	1,749	333	38,902	1,124
Alípur . . .	„	10,353	60,427	8,114	2,672	81,429	137
Sanáwan . . .	„	3,540	19,254	4,033	381	27,208	...
District, Total . .	...	16,915	1,14,603	13,896	3,386	1,47,539	1,261
Muzaffargarh . .	**1881-82**	**3,271**	**38,669**	**2,131**	**320**	**43,261**	**1,180**
Alípur . . .	**„**	**10,537**	**63,820**	**8,292**	**2,671**	**85,125**	**195**
Sanáwan . . .	**„**	**3,457**	**22,179**	**4,771**	**381**	**30,753**	**35**
District, Total . .	...	17,265	1,24,668	15,194	3,372	1,59,139	1,360

The results of the system, it will be seen, are financially favourable, and the system is reported to be popular among the people. But, as Mr. O'Brien pointed out in his Revenue Report for 1881-82, it entails extremely heavy work on the tahsildars; these at present are efficient, but one inefficient man would do much towards ruining the settlement. The Kanungo establishment has recently been temporarily strengthened in order to facilitate the necessary supervision of the annual measurement, and the Commissioner of Settlements and Agriculture will shortly submit proposals for the permanent revision of this establishment.

Extract (paragraph 14) from a Resolution recorded by the Government of the Punjab, No. 230, dated the 11th November 1885.

14. Among the principal causes of the ill success which has attended the past settlements of the Muzaffargarh District has been the too great rigidity of the revenue system applied to the riverain lands. These, as explained by the Settlement Commissioner, are not really under the command of the cultivator; and in order to counteract the effects of the exceedingly capricious action of the rivers, it was decided to place these lands under a fluctuating assessment at the present settlement, as has been done in Bannu, Dera Ismail Khan, and Mooltan, and in part of the Jhang District. Accordingly, the area subject to the influence of the floods is measured and assessed yearly, and so far the system has proved equally popular with the people and advantageous to the State, the revenue realized under it during the last four years having been ₹1,45,900, ₹1,48,800, ₹1,60,500, and ₹1,71,300. As the area in question comprises no less than 120,000 acres, the extra labour which is thrown on the subordinate revenue staff by the system is very great, and it has already been found necessary to strengthen the Kánúngo establishment and to appoint an additional Náib-Tahsíldár to assist in the work of the Sanánwan Tahsíl. Hitherto the working of the system has proved most successful. But the continuance of the present satisfactory state of things depends entirely on the efficiency of the revenue staff of the district, and the Lieutenant-Governor trusts that no efforts will be spared by the Commissioner of the Division and the District Officer to see that this staff is thoroughly acquainted with its duties, and that it performs them promptly and efficiently.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION BRANCH.

IRRIGATION OPERATIONS IN THE NORTH-WESTERN PROVINCES FOR THE KHARIF SEASON (1st APRIL TO 30th SEPTEMBER) 1885.

No. 287 I., dated Allahabad, the 8th February 1886.

RESOLUTION—By His Honor the Lieutenant-Governor, North-Western Provinces, and Chief Commissioner of Oudh.

Read—

Statement A20, B20, and C20, showing irrigation operations for Kharif, 1885-86 (1st April to 30th September) of Canals in the North-Western Provinces.

OBSERVATIONS.—The total area irrigated during "kharif" 1885 was 702,258 acres as against 773,315 acres in the previous year—a decrease of 71,057 acres, or 9·2 per cent. This decrease is due entirely to the favourable and well distributed rainfall of the season, especially in the upper portion of the Doab. This is most marked on the Upper Ganges Canal where the decrease is upwards of 63,000 acres.

The assessments on account of occupiers' rate amounted to R21,39,359—a decrease of R1,09,718, or about 5 per cent. less than that obtained in 1884. Although the area has decreased by 9·2 per cent., the assessments have not decreased in the same proportion on account of the larger area under sugarcane and rice which pay first-class rates.

2. Table I shows the areas of the principal crops for the past four years :—

TABLE I.

CROPS.	1882.	1883.	1884.	1885.
	Acres.	Acres.	Acres.	Acres.
Sugarcane	197,978	154,725	153,544	175,638
Rice	96,357	106,443	92,687	95,986
Bajra and Juar . . .	5,104	35,770	10,240	6,062
Maize	33,411	89,101	20,321	14,505
Other food grains . . .	5,982	13,399	4,985	7,109
Fodder-crops . . .	9,930	18,885	14,483	5,878
Fibres (Cotton) . . .	49,722	88,395	66,709	57,341
Dyes (Indigo) . . .	316,572	294,408	391,891	297,282
Miscellaneous . . .	24,354	24,621	18,455	42,457
TOTAL .	739,410	825,747	773,315	702,258

A larger area of sugarcane was sown on account of anticipated better prices than those formerly prevailing. Rice shows an increase of 3,299 acres, and has thus advanced to its usual average irrigated area of about 96,000 acres. "Miscellaneous" shows a large increase of 24,002 acres, which is due to reductions to 4th class rates on the large area of superior crops damaged by the heavy floods in July. The decrease of 94,609 acres under indigo is accounted for, partly by the very low prices realised in the previous year, and partly by the losses sustained by floods. Inferior cereals and other food grains show a decrease of 7,870 acres. Cotton shows a decrease of 9,368 and fodder crops of 8,605 acres.

3. Table II compares by canals the irrigated areas for the two years 1884 and 1885 :—

TABLE II.

CANALS.	1884.	1885.	More.	Less.
	Acres.	Acres.	Acres.	Acres.
Upper Ganges Canal . .	362,119	298,652	...	63,467
Lower Ganges Canal . .	201,772	191,725	...	10,047
Agra Canal . .	71,661	65,019	...	6,642
Eastern Jumna Canal . .	93,680	94,622	942	...
Dún Canals	5,391	5,424	33	...
Rohilkhand Canals . . .	36,078	43,279	7,201	...
Bijnour Canals . . .	2,498	3,228	730	...
Hamirpur Lakes . . .	114	226	112	...
Jhánsi Lakes	2	83	81	...
TOTAL .	773,315	702,258	...	71,057

The decrease is chiefly confined to the Upper Ganges Canal, and, as noted above, is caused entirely by the nature of the season. Considering the very favourable distribution of the rainfall, the decrease on the whole is much less than might reasonably have been expected.

4. Table III gives the assessments on account of occupiers' rate for the last four years :—

TABLE III.

CANALS.	1882-83.	1883-84.	1884-85.	1885-86.
	R	R	R	R
Upper Ganges Canal . .	11,01,884	11,11,326	11,16,995	10,04,071
Lower Ganges Canal . .	5,11,884	4,89,448	4,94,619	4,86,755
Agra Canal . .	1,57,621	1,97,823	1,94,113	1,97,862
Eastern Jumna Canal . .	4,55,995	4,38,560	3,87,423	3,87,9[illegible]
Dún Canals	16,839	15,302	14,807	16,339
Rohilkhand Canals . . .	32,800	32,174	35,338	38,966
Bijnour Canals . . .	3,019	3,760	5,513	6,641
Bundelkhand Lakes . . .	248	628	269	815
TOTAL .	22,80,290	22,89,021	22,49,077	21,39,359

The rate per acre is R3·04 against R2·91 in 1884 and R2·77 in 1883.

ORDER.—Ordered that copies of this Resolution be submitted to the Government of India; that it be circulated as usual to other Governments and to Local Departments; and that it be published in the Government Gazette, North-Western Provinces and Oudh.

By order of the Hon'ble the Lieut.-Govr., N.-W. P., and Chief Commr. of Oudh,

J. G. FORBES, *Colonel, R.E.,*
Joint Secretary to Government, N.-W. P. and Oudh,
P. W. D., Irrigation Branch.

(*h*) Total receipts from 1st November 1884 to 31st January 1885.

FORT WILLIAM,
The 25th February 1886.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 24th FEBRUARY 1886.

GENERAL REMARKS.—Good rain has fallen in the Rawalpindi and Peshawar districts of the Punjab, and there have been showers in other parts of the Punjab, in two districts of the North-Western Provinces and Oudh, in Behar and Northern Bengal, and in parts of Central India. Elsewhere the week has been rainless.

Prospects remain fair in Madras, and are generally good in Mysore, with the exception of parts of the Kolar and Tumkur districts. In Coorg the threshing of the rice crop has been almost completed and prospects are good.

In Bombay the *rabi* harvest continues in progress and promises fairly. The *rabi* harvest has also commenced in the Berars and Hyderabad where the standing crops are in good condition. In Central India and Rajputana agricultural prospects continue satisfactory.

In the Punjab the prospects of the harvest continue good, though blight in the Lahore district, and strong west winds in the Delhi and Hissar districts have done some injury. In the North-Western Provinces and Oudh the *rabi* crops are in good condition and prospects are favourable. The *rabi* harvest has commenced in parts of the Central Provinces and promises well.

In Bengal the *rabi* and *boro* rice crops promise well, though rain is wanted in the Eastern Districts. In Shahabad the poppy crop has suffered from rain and hail. In parts of Assam more rain is wanted for the winter crops and for tea.

No report has been received from British Burma.

The public health continues satisfactory and prices are generally steady, though they are rising in some places in the North-Western Provinces and Oudh, in Multan and Rawalpindi in the Punjab, and in the Northern Districts of the Central Provinces.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 24th)		
Bellary	*Nil*	Standing crops generally good, but *cholum* suffering from disease in parts of two taluks; harvest wet and dry grains, yield about average. Cattle-disease in one village.
Kurnool	*Nil*	Cotton and some standing dry crops slightly injured in parts by late unseasonable rains and by insects; harvest dry grains, yield below average. Smallpox in two and cattle-disease in two taluks.
Ganjam	*Nil*	Fever in two, smallpox in six, and cattle-disease in eight taluks; 15 death from cholera. Condition of lower classes north of Rushikulya generally impoverished owing to successive loss of crops for last two years. Rushikulya project and repairs to Chilka canal provide ample work.
Kistna	*Nil*	Standing crops generally good. Slight smallpox, fever in some taluks; deaths from cholera unreported last week 49, this week 40.
Chingleput (Madras)	*Nil*	Standing crops fair; harvest paddy, yield below average. Fever in one, smallpox in another, and cattle-disease in three taluks.
Coimbatore	*Nil*	Standing crops good; harvest wet and dry grains, outturn about average. Fever in two taiuks.
Tanjore	*Nil*	Standing crops generally good; harvest wet and dry grains, outturn paddy and *ragi* average, rest below average. Cattle-disease in two taluks.
Madura	·07	Harvest paddy, yield about average. Fever prevalent; cattle-disease in one division.
Malabar	*Nil*	Harvest second crop paddy, outturn below average. Slight smallpox in eight and fever in two taluks; 11 deaths from cholera.
Travancore	*Nil*	Harvest almost over. Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(Feb. 24th)		
Karachi	*Nil*	River at Kotri on 22nd 4 feet 7 inches against 7 feet 1 inch on same date last year. *Rabi* crops injured by frost in seven talukas. Fever in eleven and cattle-disease in six talukas. Prices—wheat, red rice and *bajri* in Karachi 26, 30, and 34, in Tatta 26, 40, and 40, in Shahbandar 22, 42 and 44, and in Dadu 34, 56, and 42 pounds per rupee, respectively.
Hyderabad	*Nil*	*Rabi* crops injured by frost in eight talukas. River at Kotri on 22nd 4 feet 7 inches against 7 feet 1 inch on same date last year. Fever in eight, cattle-disease in six, and smallpox in two talukas. Wheat 26, *bajri* 37½, white rice 18 and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	Reaping of *rabi* crops commenced in some talukas. Fever in Sanand. Wheat 36 and *bajri* 34 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda	*Nil*	Public health good; slight smallpox in Baroda city. Prices—*bajri* 29, wheat 24, and rice 18 pounds per rupee.
Surat	*Nil*	Standing crops healthy; cotton-picking progressing; cotton crops suffered a little in the Jalalpore taluka by cloudy weather. Fever in Bardoli taluka. *Jowari* 39 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Kharif* threshing almost completed; *rabi* crops fair; irrigated wheat partially blighted throughout the district; *rabi* reaping commenced. Public health generally good; fever and ague in Peint. Wheat 31½, *bajri* 33¾, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature was 4° cool on 17th and 18th, and rose to 1° warm on 23rd; vapour in air defective on 17th and 18th, excessive on 21st and 22nd, and normal on all other days; abnormal wind northerly on 17th and 18th, southerly on 21st and 22nd; wind normal on all other days.
Poona	*Nil*	Reaping of *rabi* crops commenced throughout the district. Prices of *bajri* 34 and *jowari* 42, in Poona *bajri* 32 and *jowari* 35 pounds per rupee.
Ahmednagar	*Nil*	Reaping commenced; wheat and gram injured by cloudy weather. Public health good *Bajri* average 41 and *jowari* 56 pounds per rupee.
Sholapur	*Nil*	Linseed, wheat, *tur*, and gram crops have suffered from blight in places; cotton crops inferior in Madha and Karmala talukas; reaping of *rabi* in progress in nearly all the talukas. *Jowari* 51 pounds 22 tolas and *bajri* 44 pounds 5 tolas per rupee.
Dharwar	*Nil*	Harvesting of wheat and gram in progress; exotic cotton blighted in three talukas. Slight fever in three and cattle-disease in four talukas. Rice 22 to 32 and *jowari* 42 to 64 pounds per rupee.
Kanara	*Nil*	Sugarcane and pepper harvest continue; second crop rice thriving. Measles in Karwar; smallpox in Hangal; fever and cattle-disease in four talukas. Common rice in Karwar 14, in district average 13½ seers per rupee.
Rajkot	*Nil*	Weather cold. Public health generally good. *Bajri* 32, *jowari* 44, and wheat 35 pounds per rupee. *General Remarks.*—River falling in Sind. Reaping of *rabi* crops in progress in most districts of the Deccan and Southern Mahratta Country and in parts of Gujarat. Scarcity of fodder in one taluka of Khandesh. Fever and cattle-disease in parts of eleven and smallpox in parts of four districts.
Bengal—(Feb. 23rd)		
Chittagong	*Nil*	Rain much wanted. Prospects of crops continue fair. Prices steady. Public health good.
Dacca	*Nil*	*Boro* rice requires rain; prospects pretty good; pulses and mustard being gathered; pressing of sugarcane continues; ploughing going on. Public health good.
24-Pergunnahs	*Nil*	Prospects of cold-weather crops continue favourable; some cereals being harvested with 14 annas outturn. Common rice 15 to 16 seers per rupee. Isolated cases of cholera reported from all parts of district.
Khoolna	*Nil*	Weather cold. Winter crops being stored, outturn good; transplanting of *boro* paddy completed; low lands being ploughed for *til*. Public health good.
Moorshedabad	Slight rain	Prospects of all crops favourable. Price of rice falling slightly. Public health good.
Pubna	A slight shower in Serajgunge.	Winter crops promising; some being cut. Public health good.
Dinagepore	0·08	Weather fair and cold. Prospects of *rabi* crops good; sugarcane and mustard being harvested. Rice 22 seers per rupee on average. Some cattle-disease and a few cases of sporadic cholera prevalent.
Rungpore	0·06	Crops good; mustard and other crops being gathered; cutting of sugarcane continues. Public health good.
Midnapore	*Nil*	Weather warmer. Prospects of *boro* rice good; *rabi* crops yielding well. Public health normal.
Burdwan	*Nil*	Prospects of *rabi* crops good. Common rice 16 to 20 seers per rupee. Public health fair.
Bhagulpore	0·65	*Rabi* crops doing well. Prices stationary. Public health good.
Monghyr	. . . .	Poppy prospects continue good; later sowings benefited by rain on 17th.
Purneah	0·06	Cold-weather crops being harvested. Coarse rice 20 seers per rupee. Public health good.
Durbhanga	*Nil*	*Rabi* crops in ear, and poppy in flower. Prospects very favourable. Prices have risen slightly. Public health good.
Mozufferpore	. . .	Poppy prospects continue promising.
Sarun	. . .	Prospects of poppy continue good. Weather favourable.
Chumparun	0·06	Prospects of *rabi* and poppy crops continue good. Prices stationary. Public health good.
Patna	. . .	Rainfall information not received. Prospects of *rabi* and poppy continue good; harvesting of *mussoor* and pea being pushed on. Public health good.
Gya	0·01	Prospects of *rabi* and poppy good, but some damage anticipated if westerly winds continue.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Shahabad		Rain accompained by hail in some places injurious to poppy, prospects of which are not as good as they were, but with favourable dry weather average outturn expected.
Hazaribagh	*Nil*	*Rabi* and other cold-weather crops doing well and approaching maturity. Lancing of poppy going on; a fair outturn expected. General health good.
Cuttack	*Nil*	Weather seasonable; mornings foggy. *Rabi* crops being gathered; *dalua* rice doing well. Prices of rice stationary. Public health good.
		General Remarks.—Slight rain fell generally in Behar and North Bengal. Prospects of *rabi* crops and *boro* rice continue generally favourable, but rain is wanted in parts of East Bengal; earlier *rabi* crops are being gathered with good results; pressing of sugarcane is progressing; poppy crop is promising; but in Shahabad this crop has suffered from rain and hail. Price of rice remains stationary. General health continues fair.
N.-W. Provinces and Oudh—(Feb. 24th)		
Benares (Feb. 23rd)	*Nil*	Weather clear and cold. Mornings somewhat cloudy of late. *Rabi* prospects continue excellent, though *arhar*, gram, and peas have been slightly damaged by frost during the week. Melon sowings completed and germinating well. Markets well stocked, but prices show rise in wheat, rice, and *bajra*. Health of people and condition of cattle good.
Gorakhpore („ 22nd)	*Nil*	Poppy and *rabi* crops in good condition. Weather favourable. Prices stationary. Health fair.
Fyzabad („ 23rd)	*Nil*	Season favourable. Both poppy and *rabi* crops appear healthy and promising. Fodder very dear. Health of people good; no cattle-disease.
Lucknow („ 22nd)	Very light rain on the 15th and 16th instant.	Wheat and gram nearly ripe; poppy in flower; peas being cut in some places, and sugarcane sown. Supplies sufficient. Prices steady. Scarcity of fodder continues. Health of people good, as well as the condition of cattle.
Rae Barelli („ „)	*Nil*	Weather sometimes cloudy. Prospects of crops favourable. Supplies ample. Prices rising. General health good.
Partabgarh („ „)	*Nil*	West winds. Clear weather. State of the crop is generally good; peas and *sarson* being cut and *sawan* being irrigated; poppy generally in flower, but crop unusually backward for this time of the season. Prospects continue good. Prices still rising. No illness among the people and cattle.
Allahabad („ 23rd)	*Nil*	Weather seasonable. Strong west winds commenced. Markets well stocked though prices show a rise. Crop prospects promising. Condition of men and cattle good.
Cawnpore („ 22nd)	*Nil*	Weather seasonable. Poppy flourishing. Prices stationary. Condition of people and cattle good.
Farakhabad („ 23rd)	*Nil*	Slight damage to crops from recent high winds and cold. Health continues good.
Sitapur („ „)	*Nil*	Gram and *arhar* have suffered a little from dry west wind, otherwise prospects are favourable; poppy crops in flower. Prices have a tendency to rise. Health good.
Bareilly („ „)	*Nil*	Harvest prospects excellent. Prices rising. Health of people and cattle good.
Banda („ „)	*Nil*	Sky clear. *Rabi* crops injured by frost and blight. Prices still rising. Considerable export of grain. Public health good; no cattle-disease.
Ballia („ 22nd)	*Nil*	Weather clear and seasonable. Crops satisfactory; peas being cut; poppy in flower. Markets well stocked. Health good; no cattle-disease.
Kumaon („ 23rd)	Slight showers	Weather unsettled. *Rabi* crops flourishing, but require sunshine. Prices rising. General heath good; cattle-disease continues.
Agra („ 22nd)	*Nil*	Weather cloudy off and on. Prices rising. Health good.
Jhansi („ „)	*Nil*	Weather fine with occasional clouds. Peas and *arhar* slightly damaged in Pargana Jhansi, otherwise prospects continue favourable. Cattle-disease is reported in a few villages of Jhansi pargana.
Meerut („ 23rd)	*Nil*	Weather cold; high west winds rather damaging to crops. Cane-pressing still continues. Prices stationary. Health good.
		General Remarks.—Weather seasonable. Crops in good condition. Prospects generally favourable. Prices tolerably steady but rising in some places. General health good.
Punjab—(Feb. 24th)		
Delhi (Feb. 23rd)	*Nil*	Health fair. Prices fluctuating.
Hissar	*Nil*	Health good. Prices falling. Prospects of current harvest flourishing.
Umballa	*Nil*	Health good. Prices stationary. Prospects of current harvest flourishing.
Jullunder	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot	Slight rain	Health good. Prices stationary.
Ferozepore	*Nil*	Health good. Prices stationary. Prospects of current harvest good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Lahore	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Rawalpindi	*Nil*	Health good. Prices rising. Prospects of current harvest good.
Shahpur	*Nil*	Health good. Prices stationary.
Multan	*Nil*	Health good. Prices rising. Prospects of current harvest good.
Dera Ismail Khan	*Nil*	Health good. Prices almost stationary. Prospects of current harvest good.
Peshawar	Nil	Health good. Prices almost stationary. Prospects of current harvest good.
		Slight rain has fallen in the Rawalpindi and Peshawar districts, but rain in Sialkot, hailstorms have occurred in the Shahpur and Sialkot districts, but have not harmed the crops. Health good. Prices generally stationary, but rising in Multan and Rawalpindi. Prospects of current harvest good, though blight in the Lahore district, and strong west winds in the Delhi and Hissar districts have somewhat damaged the crops. In Shahpur losses among stock from starvation are reported.
Central Provinces—(Feb. 24th)		
Nagpur	*Nil*	Weather clear and hot. *Rabi* being gathered. Fever and cattle-disease in places. Prices steady.
Jubbulpore	*Nil*	Wheat favourable; other crops slightly injured by rust. Health good. Prices rising.
Saugor (Feb. 23rd)	*Nil*	Hail in two tehsils. *Rabi* injured by frost. Prices slightly risen. Health fair.
Seoni	*Nil*	Weather cloudy and close. Prospects good on the whole. Slight smallpox. Prices steady.
Hoshangabad	*Nil*	Overcast clouds. Crop good in one tehsil and slightly damaged in three. General health good. Prices lower.
Khandwa	*Nil*	Weather seasonable. *Rabi* harvest commenced. Health good. Prices steady.
Raipur	*Nil*	Weather clear. Days warm. Wheat and gram good; linseed injured. Health good. Prices stationary.
		General Remarks.—Weather becoming hot. Prospects generally favourable, all kinds crops have been slightly damaged in places. Prices slightly higher in northern district.
Assam—(Feb. 24th)		
Gauhati		Weather seasonable. Public health fair; cattle-disease reported from the interior of the district. Gathering of mustard not yet finished. Rain wanted for *aus* crop. Land ploughing for *aus* in progress.
Sylhet		Winter crops and tea suffering from want of rain. Prospects otherwise good.
Cachar		Weather getting warm. Reaping of mustard crop finished, outturn is about ¾ below the average of last year. Two deaths from cholera reported from Hailakandi station. Common rice 16 seers per rupee.
Dibrugarh	·04	Weather seasonable. Gathering of mustard crop finished; sugarcane being pressed. Public health good.
Mysore and Coorg—(Feb. 24th)		
Bangalore		Crops in good condition generally, but in some places of Kolar and Tumkur districts reported to be withering; harvesting of dry crops and sowing of paddy continues; prospects fair. Cattle-disease in parts. Water and fodder diminishing in Kolar district and parts of Tumkur district. Public health generally good, excepting in parts of Tumkur where smallpox prevails. No material change in prices.
Mysore		
Mercara		Threshing of rice crop nearly completed. Prospects of season good. Smallpox and fever prevalent in parts.
Berar and Hyderabad—(Feb. 24th)		
Amraoti		Weather warm. Cutting of wheat and linseed in progress. Wheat 22 and *jowari* 20 seers per rupee.
Akola		Weather getting warm. *Kharif* harvesting over, *rabi* commenced.
Hyderabad		Standing crops prospering; harvesting of *rabi* crops commenced. General health of talukas fair. Prices—wheat 14¾, coarse rice 12½, white *juar* 21¾, yellow *juar* 22, and *tur* 15¾ seers per current sicca rupee.
Central India States—(Feb. 24th)		
Indore	*Nil*	Weather warmer. Health good. Prices steady.
Morar (Gwalior)	*Nil*	Health and prospects good. Weather seasonable.
Sutna	·16	Weather clear and seasonable. Some damage to crops from blight, but prospects generally fair. Health good.
Neemuch	*Nil*	Weather hot. Fever and smallpox prevalent. Crops doing well.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Cent. India States—*contd.*		
Goona	·11 and slight hailstorm on 15th.	Weather very cold. Prices rising. Health good.
Agar	*Nil*	Health and opium prospects good.
Sehore	*Nil*	Weather clear. Crops and health good.
Nowgong	·70	Total rainfall 47·81. Weather cold, *Rabi* prospects fair. Health good.
Bhopawar (Manpur)	*Nil*	Weather getting hot. Linseed and opium crops slightly injured by cold. Health good. Prices steady.
Rajputana—(Feb. 24th)		
Abu (Feb 24th)	*Nil*	Health good. Weather getting warmer.
Sirohi („ 21st)	*Nil*	Little water in tank and wells. Health and crops good. Weather cold and cloudy.
Marwar („ 20th)	*Nil*	Tanks almost full. Smallpox abating. Cold intense. Prices stationary. Winds sharp and injurious to young *rabi*.
Kherwara („ 22nd)	*Nil*	Crop prospects and health fair. Pneumonia disappearing. Weather somewhat warmer and windy.
Meywar („ „)	*Nil*	Tanks and wells low. Crops and health good. Prices stationary. Weather seasonable.
Harowti („ „)	*Nil*	Weather warmer. Smallpox in Tonk, otherwise health and prospects good.
Jhallawar („ 19th)	*Nil*	Weather continues very cold and windy, damaging opium and gram crops.
Kotah („ 20th)	*Nil*	Health good. Prices stationary. Weather cold and windy and harmful to ripening crops.
Ajmere („ 23rd)	*Nil*	Weather cloudy. Fever and smallpox still prevalent. Crops in some parts of the district injured by severe cold.
Jeypore („ „)	*Nil*	Prospects favourable. Prices steady. Health good.
Dholepore („ 20th)	*Nil*	Tanks and wells drying. Crops suffering from frost. Prices steady.
Kerowlee („ „)	*Nil*	Tanks and wells decreasing. Prices rising. Health good.
Bhurtpore („ 20th)	*Nil*	Tanks and wells full. *Rabi* prospects favourable. Health good. Prices steady.
Ulwur („ 23rd)	*Nil*	Health and crop prospects good.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on **Friday**, the 26th February, 1886.

PRESENT:

The Hon'ble C. P. Ilbert, C.S.I., C.I.E., *presiding.*
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.

NORTH-WESTERN PROVINCES RENT ACT AMENDMENT BILL.

The Hon'ble MR. QUINTON moved that the Bill to amend the North-Western Provinces Rent Act, 1881, be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Sir A. Colvin, the Hon'ble Mr. Hunter and the Mover.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES LAND-REVENUE ACT AMENDMENT BILL.

The Hon'ble MR. QUINTON also moved that the Bill to amend the North-Western Provinces Land-Revenue Act, 1873, be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Sir A. Colvin, the Hon'ble Mr. Hunter and the Mover.

The Motion was put and agreed to.

DEO ESTATE BILL.

The Hon'ble SIR S. BAYLEY moved for leave to introduce a Bill to apply the Chutia Nagpur Encumbered Estates Act, 1876, to the Deo Estate in the Gaya District. He said:—

"The object of this Bill is to give effect to a private arrangement that has been come to by and on behalf of the Rájá of Deo with his creditors. The estates of the Rájá of Deo are situated in the south of the Gaya district adjoining the Chutia Nagpur division, and his raiyats are living very much in the same condition as the people of Chutia Nagpur. The Rájá of Deo is the representative of an ancient Rájput family who have for many generations done very good service to the Government, extending as far back as the rebellion of Cheyt Singh; they have given assistance to the Government in the Sambalpur troubles, the Kol rebellion, and lastly they gave us, to my own knowledge, very great assistance in the year of the Mutiny. For these reasons, and looking to the position of the family, the Government of Bengal considered it of serious political importance that the estates of the Rájá should, if possible, be maintained. Unfortunately, in the days of the father of the present Rájá the estate fell very heavily into debt. The Government of Bengal applied to us at the beginning of last year on the subject, and various proposals were made. At one time it was proposed that there should be a deed of assignment by which management on the part of the Government should be secured, but it was considered that there were legal difficulties in the way which would prevent that proposal being worked out satisfactorily. The Rájá himself wanted his estates to be taken under the management of the Court of Wards, but, although the North-Western Provinces Act allows that proceeding, the Bengal Act gives no power to take an estate under the management of the Court of Wards when the owner is not a minor or is not in any other way disqualified.

"The arrangement which has now been come to is an arrangement by consent. We agreed to legislate on the condition that a scheme for paying off the debts was laid before the creditors, and that all the creditors should agree as to the amount of their debts under the scheme for settlement. Accordingly a meeting was held on the 19th January last, when all the creditors appeared either in person or by agent before the Collector of Gaya; the scheme was explained to them, and they have all signed the agreement. The Maháráját of Darbhangá has acceded separately on the condition of priority which he attaches and which will be embodied in the Bill. The reason of this is that the Maháráját of Darbhangá, who is the largest creditor, holds a decree the execution of which has been postponed to next month, in order that a satisfactory settlement might in the meantime be entered into. These are the circumstances under which I ask leave to introduce the Bill, and I hope there will be no objection to it."

The Motion was put and agreed to.

The Hon'ble SIR S. BAYLEY also introduced the Bill.

The Council adjourned to Friday, the 5th March, 1886.

S. HARVEY JAMES,
Offg. Secy. to the Govt. of India,
Legislative Department.

FORT WILLIAM;
The 1st March, 1886.

N.B.—As regards the figures in column "*Total receipts from 1st April to date*," audited figures have been availed of as far as possible.

(*a*) Including Rewari-Ferozepore State Railway.
(*b*) Total receipts from 12th October 1884 to 7th February 1885.
(*c*) Total receipts from 4th January to 7th February 1885.
(*d*) Return not received.
(*e*) Total receipts from 1st April 1885 to 30th January 1886.
(*f*) Total receipts from 2nd April 1884 to 7th February 1885.
(*g*) Total receipts from 1st January to 7th February 1885.
(*h*) Total receipts from 1st November 1884 to 7th February 1885.

FORT WILLIAM,
The 4th March 1886.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

SEPARATE REVENUE.
Post Office.

REPORT OF THE OPERATIONS OF THE POST OFFICE OF INDIA FOR THE YEAR 1884-85.

No. 1090, dated Calcutta, the 5th March 1886.
RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ—

Report on the operations of the Post Office of India for the year 1884-85.

RESOLUTION.—This report is submitted at a considerably earlier date than that for last year, having been received in print on the 15th February. The President in Council hopes that next year the Annual Report will be submitted not later than 31st December.

2. During the year to which the report relates an International Postal Congress was held at Lisbon at which the Indian Post Office was represented by Mr. H. E. M. James, whose services were specially acknowledged by the Secretary of State for India. The Convention concluded at the Paris Congress of 1878 was continued with some slight amendments.

3. New contracts with the British India Steam Navigation Company, for the conveyance of mails by sea by several local steam lines, and with the Euphrates and Tigris Steam Navigation Company for the conveyance of mails on the Tigris, between Bussorah and Bagdad, came into operation during the year. By both these contracts a reduction in the cost to the Post Office was secured.

4. The working and progress of the Post Office was, as in previous years, very satisfactory.

5. The work done by the Post Office Savings Banks increased greatly: 300 new Banks and Sub-Banks were opened, and the balance rose from 75 lakhs to 134¼ lakhs. The operations of the Post Office Savings Banks have been noticed with those of other Savings Banks in the Comptroller General's Report, published in the *Gazette of India* of 9th January 1886. It being considered undesirable to maintain two sets of Savings Banks side by side, the growing preference of the public for the Post Office Banks has induced the Government to close the District Savings Banks and to transfer the accounts in those Banks to the Post Office Banks. This change is to be made from 1st April 1886.

6. The number of post offices was increased by 609, from 5,879 to 6,488. This large extension of the operations of the Post Office is rendered possible by the system of employing extra departmental agency for village post offices, under which the cost of each post office is restricted to a very small amount, while the work, being light, is efficiently performed. The table given in paragraph 14 of the report shows how largely this system has been extended. Out of 3,265 village post offices, 875 only are under the charge of regular employés of the post office, 1,370 are under the charge of schoolmasters, and 1,020 under the charge of other non-postal officials or of persons not in the employ of Government.

7. The number of letter-boxes rose from 8,426 to 8,731, and of village postmen from 3,843 to 4,039.

8. The length of the postal lines of communication was altered during the year as under:—

		Miles.
Railway lines	Increased by	1,001
Mail cart horse and camel lines	Increased by	469
Runners and boat lines	Decreased by	323
Sea and river steamer lines	Decreased by	3,795

The decrease in the length of the runner and boat lines is nominal, being due to the classification of certain river lines under "Sea and River Steamer Services" instead of under "Runner and boat lines" as formerly. The decrease in the length of the sea and river steamer lines is due to the new contract with the British India Steam Navigation Company, under which subsidy payments for the coasting line between Calcutta and Bombay, for the line between Aden and Karachi, and for the line between Moulmein and Singapore were discontinued. This caused a reduction of nearly 6,000 miles in the sea mileage, without impairing the efficiency of the mail service. But for this there would have been a considerable increase in the sea and river mileage.

9. The total number or articles conveyed by the post office rose from over 200 millions in the previous year to nearly 217 millions. The details of this increase are satisfactory throughout:—

Unpaid letters diminished by	3·71 per cent.
Paid letters increased by	4·34 „
Registered letters increased by	7·56 „
Post-cards „	26·04 „
Newspapers „	10·47 „
Parcels „	4·04 „
Packets „	19·89 „

Reply post-cards were introduced just before the beginning of the year of the report; the rates of such post-cards have not as yet been large. The number of Foreign parcels increased from 98,296 in 1883-84 to 110,590 in 1884-85.

10. The value of ordinary postage stamps and envelopes sold was ₹54,06,022 as against ₹49,87,927 in 1883-84, that of service stamps, &c., ₹16,08,805 as against ₹15,64,951.

11. A new system of dealing with Money Orders was introduced during the year, reducing the clerical work and simplifying the procedure and making it more convenient to the public. The payment of Money Orders at the houses of payees instead of at the Post Office only was authorized and found to work satisfactorily.

12. An experiment was commenced in the North-Western Provinces, for which the credit is due to Rai Salig Ram Bahadur, Postmaster General. It has for its object to enable persons in the interior of districts to remit land revenue by money order. It has as yet been tried in the Benares Division only, but the results are such as to lead to the belief that the system will be extended and developed with convenience, alike to the public and to the Post Office.

13. A system of Telegraphic Money Orders was introduced from 1st October 1885. In the six months from that date 5,788 such orders for about 3¾ lakhs were issued.

14. Over 3½ millions Inland Money Orders for nearly 821 lakhs of rupees were issued during the year, the increase, as compared with the preceding year, being half a million in the number, and 89½ lakhs in the value. The average value of the Money Orders issued was ₹23-1-9; the average value in previous years has been—

	₹	a.	p.
1879-80	32	0	1
1880-81	28	8	0
1881-82	26	8	0
1882-83	25	3	0
1883-84	24	1	0

15. The following table shows the foreign Money Order transactions:—

	Issued.		Paid.	
	Number.	Amount.	Number.	Amount.
		£		£
In Sterling—				
1883-84	30,103	125,132	3,022	13,245
1884-85	42,294	170,864	5,201	23,160
		₹		₹
In Rupees—				
1883-84	1,768	1,54,797	10,545	5,55,897
1884-85	1,510	1,21,142	11,727	6,33,091

16. Neither Indian Postal Notes nor British Postal Orders—the sale of which was authorized from 1st October 1884—have as yet become popular.

17. The value of letters and parcels insured fell from 825 lakhs to 782 lakhs.

18. The popularity of the value-payable system continues to increase. The value of articles sent value-payable was R52,73,352 as against R28,08,873 in 1883-84. The table below shows how the value payable business has increased since it was undertaken.

	Number of articles sent under the value-payable system.	Value declared for realisation.	Commission.
		₹	₹
1877-78 (from the commencement of the system in December 1877) four months	443	6,721	165
1878-79	7,508	1,23,109	3,042
1879-80	25,889	3,40,857	11,408
1880-81	40,389	5,78,574	13,413
1881-82	90,410	10,80,543	10,838
1882-83	174,301	16,86,008	35,568
1883-84	287,377	28,08,873	53,450
1884-85	336,788	52,73,352	69,285
Percentage of Increase over the year 1883-84	17·19	87·74	29·63

19. The number of complaints made by the public was 6,511, being 779 more than in 1883-84. Of these 2,835 were found to be groundless, and 2,237 well founded; in the remaining 1,202 no definite conclusion was arrived at.

20. The number of offences by postal officials was 244, of which 87 were punished departmentally and 157 by the criminal courts.

21. There were 26 mail robberies, of which half were in British and half in Foreign territory.

22. The Director-General shows the financial results of the working of the Post Office with approximate accuracy in Part X of the report, the final result being that there was a net charge of about 16 lakhs of rupees on account of the Post Office.

23. The thanks of the Government are due to Mr. James and to Mr. Fanshawe for their successful administration of the department during the year.

24. The work done by the officers mentioned in paragraph 69 of the report also deserves acknowledgment.

ORDERED, that this Resolution be communicated to the Director General of the Post Offices of India, and that the Report and the Resolution be published in the Supplement to the *Gazette of India*.

D. BARBOUR,
Secretary to the Government of India.

ANNUAL REPORT

ON THE

OPERATIONS OF THE POST OFFICE OF INDIA

FOR THE YEAR

1884-85.

No. 12830, dated 6th January 1886.

From—F. R HOGG, Esq., Director General of the Post Office of India,

To—The Secretary to the Government of India, Department of Finance and Commerce.

I have the honor to submit the Annual Report on the operations of the Post Office of India for the official year 1884-85.

2. During the whole of the year under report I was absent on leave, the department being administered by Mr. H. E. M. James from the 1st April to the 14th August 1884, and by Mr. A. U. Fanshawe, during the remainder of the official year.

Universal Postal Union.

3. The second Congress of the Universal Postal Union was signed at Lisbon on the 21st March 1885, India being represented by Mr. James. It was settled that the next congress should be held at Vienna in 1891. The Paris Convention of the year 1878 was continued by the Lisbon Congress, though slightly amended by an additional Act. The amended provisions will not come into force till the 1st April 1886.

4. Communication by sea with Europe is a service distinct from the Indian Inland Post to which this report relates. All that India collects in the shape of sea postage is credited to Great Britain: and when this, as well as the British collections, have been deducted from the total cost of the sea service, the balance or net cost is made a charge in equal shares upon Great Britain and India. The Indian share of the net loss on the European Mail Service since the year 1869-70 is shewn in the margin.

Communication by sea between India and Europe by means of the Contract Service of the Peninsular and Oriental Steam Navigation Company.

Year.	Net loss on the Foreign Mail Service charged against India.	Remarks.
	£	
1869-70	73,110	
1870-71	69,150	
1871-72	68,110	
1872-73	61,072	The increase in 1876-77 and following years was caused by the reduction of postage carried out on 1st July 1876 when India entered the Union. The increase in 1879-80 is due to the reduction of postage introduced from 1st April 1879 under the Convention of Paris.
1873-74	54,770	
1874-75	57,170	
1875-76	53,125	
1876-77	66,685	
1877-78	70,749	
1878-79	71,051	
1879-80	88,160	
1880-81	71,051	
1881-82	70,000	
1882-83	70,000	
1883-84	70,000	
1884-85	70,000	

5. The foreign mails by the Peninsular and Oriental Steam Navigation Company's steamers reached Bombay before contract time on forty-eight occasions, and were behind contract time on five occasions. On one occasion only did the delay exceed 24 hours.

6. A new contract was made with the British India Steam Navigation Company for the performance of local steam services. A new contract was also con-

cluded with the Euphrates and Tigris Steam Navigation Company for the maintenance of weekly communication on the Tigris between Bussora and Bagdad. Both these contracts are for a term of ten years which began on the 1st May 1884. A list is given below of the various steam services for maintaining postal communication in Indian waters with the Indian Post Offices in the Persian Gulf and Turkish Arabia and with Ceylon, the Straits, China, and Australia :—

By the British India Steam Navigation Company.

(1) Weekly communication between Calcutta, Rangoon, and Moulmein. (2) Weekly communication between Calcutta and Rangoon *viâ* Chittagong, Akyab, Kyouk Phyoo and Sandoway. (3) Weekly communication between Rangoon and Mergui *viâ* Moulmein every fortnight and *viâ* Tavoy every week. (4) Fortnightly communication between Madras and Rangoon touching at certain intermediate ports on the north-east coast of Madras. (5) Weekly direct communication between Bombay and Karachi. (6) Weekly communication between Bombay and Karachi *viâ* the coast ports. (7) Weekly communication between Karachi and Busreh *viâ* the Persian Gulf Ports.	Annual subsidy for these services ₹4,39,000.

By the Asiatic Steam Navigation Company.

(8) Four-weekly communication between Calcutta and Port Blair with extensions to Camorta, Nancowry, and Rangoon.	This line is under the control of the Military Department, the consideration given being not in the form of subsidy but of guaranteed rates for the transport of Government stores.

By the Irrawaddy Flotilla Company.

(9) Weekly communication between Rangoon, Mandalay, and intermediate ports, with a monthly extension to Bhamo. Subsidy ₹5,000 per mensem. Began to work in January 1879.	The subsidy for this river line has been a charge against Imperial Revenues since 1st April 1884.
(10) Semi-weekly communication between Rangoon and Bassein and between Bassein and Henzada. Subsidy ₹2,500 per mensem. Began to work from 1st July 1880. (11) Daily communication between Kyethai, Prome, Thyetmyo, and Allanmyo. Subsidy ₹2,000 per mensem. Began to work in May 1883.	These lines are under the control of the local administration, the Post Office contributing ₹500 per mensem towards the subsidy for line No. 10.

By other Agencies.

(12) Weekly communication. Thonegwa local river service. Subsidy ₹800 per mensem. (13) A steamer service on the Salween, Domedamee, Gyaing and Attaran rivers. Subsidy ₹1,950 per mensem. (14) Weekly communication between Kyoukphyoo, Ramree, and Cheduba. Subsidy ₹1,500 per mensem.	Lines 12 to 14 are under the control of the local Administration.
(15) By Apcar and Company (of Calcutta) and Jardine Matheweson and Company (of Hongkong). Monthly communication between Calcutta, the Straits, and Hongkong, the dates of departure being regulated primarily with reference to the Calcutta opium sales. No subsidy.	
(16) By the Euphrates and Tigris Steam Navigation Company. Weekly communication between Busreh and Bagdad. The present revised contract began to work from 1st May 1884.	No. 16 under contract with Her Majesty's Secretary of State for India. Subsidy ₹36,000 per annum. Steamers run in connection with line No. 7.
(17) By the P. and O. Company. Fortnightly communication between Calcutta and Colombo, touching at Madras. (18) By the P. and O. Company. Fortnightly communication between Bombay and Colombo.	Nos. 17 and 18. Non-contract lines maintained by the Company on its own account in connection with the China and Australian Mail Services. The Post Office pays by weight for the conveyance of mails forwarded by these non-contract services.
(19) By River Steam Navigation Company. A daily service between Dhubri and Dibrugar on the Brahmaputra river. Annual subsidy ₹1,00,000. Began to work from October 1883.	No. 19 is under the control of the Chief Commissioner of Assam, the Post Office contributing ₹30,000 per annum.
(20) By Shepherd and Company's steamers. A daily service between Bombay and Goa from 1st October to 31st May of each year. Began to work from 1st October 1884.	Subsidy ₹3,000. Postal contribution ₹807 per mensem, that of Portuguese Government ₹200 per mensem. Remainder met from Provincial Revenues.
(21) By the Bengal Central Flotilla Company. A daily service between Khoolna and Burrisal. Began to work from 1st July 1884. Contract terminable on six months' notice on either side.	Subsidy ₹350 per mensem of which the Imperial Post contributes ₹183, and the remainder ₹167 is paid from District Post Funds.
(22) By the India General Steam Navigation Company. A semi-weekly service for the conveyance of the parcel mails between Calcutta and Chandbally. Began to work from 1st April 1882.	Subsidy ₹200 per mensem.

NOTE.—A service by sea worked by local native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankesanturai on the Ceylon side.

7. It was arranged in April 1884 that soldiers' and seamen's newspapers, instead of being sent by private ship to Bombay, should be forwarded to and from India by the ordinary train service through France and Italy.

8. A beginning was made in the North-Western Provinces towards rendering the Money Order system available for the payment of land revenue. This experiment is one of considerable importance, and the credit of proposing and initiating it belongs to Rai Salig Ram Bahadur, Post Master General of the North-Western Provinces.

9. Telegraphic Money Orders were introduced on the 1st October 1884, in connection with the inland money order service. Under this system the remittance is advised by telegraph and payment made at the payee's residence.

10. A Postal Convention for the exchange of correspondence, parcels, money orders and postal notes, was ratified with the Native State of Patiala and began to work from the 1st October 1884.

11. British Postal Orders for fixed sums ranging from 1 shilling to £1 were obtained and offered for sale to the public from the 1st October 1884.

12. A Post Office accompanied the Indian Field Force which proceeded on active service to the Soudan, and a money order exchange was established for the convenience of the troops.

Section I.—Post Offices, Letter-boxes, and Village Postmen.

13. Statistics under this head will be found in Appendix I, of which an abstract is given in the margin. Each heading shews a large increase and specially that of Post Offices. Last year's report referred to the success of the village post office system as a popular and economical means of opening out the rural districts of the country and anticipated a still greater development of the system. This expectation has been fully realised. Out of the large number of 609 new post offices opened, no less than 432 were village post offices in charge of school-masters or other extra-departmental agencies. By far the greatest development has occurred in Bombay where 132 new village offices were opened. The following remarks of the Post Master General of Bombay on this subject are instructive :—"Year by year the agency of school-masters is being more and more used for this purpose. The Educational Department in this Presidency has fully consented to this policy provided that the Postal work is subordinated to the legitimate work of the school-masters, and the success in working out the scheme has been due to the loyalty with which it has been adopted by the Superintendents of Divisions. The allowances granted are very small though quite sufficient to render the school-master willing to undertake the work, and a larger development of the scheme may confidently be looked to in the future. There were 459 school-masters in charge of Post Offices on the 31st March last; of these 457 were in charge of village offices and two managed sub-offices. Other extraneous agencies, such as shop-keepers, pensioners, &c., were 20."

	Number at the close of 1883-84.	Number at the close of 1884-85.	Increase.
Post offices	5,879	6,488	609
Letter-boxes	8,426	8,731	305
Village postmen	3,843	4,039	196

14. An interesting record has recently been prepared shewing the great variety of agencies employed by this department for the discharge of village post office duties. It is given in the next page.

Statement showing the Agency (Departmental and Extra-Departmental) employed to hold charge of Village Offices.

Description of Agency employed.	Bengal.	Bombay.	Madras.	N.-W. Provinces.	Punjab.	Central Provinces.	Behar.	Oudh.	Assam.	Rajputana.	British Burma.	Eastern Bengal.	Central India.	Sind.	Total.

Section II.—Postal Lines.

15. Appendix II gives the distance over which the mails were conveyed by the several methods of conveyance. It is summarised on the margin. An alteration has been made in the heading of one of the columns of this appendix, the heading entered as "Sea" having been changed to "Steamer services, sea and river." When this appendix was originally framed all steamer services were by sea: but of late years steam services for the conveyance of mails have been established on rivers in British Burma and Assam. These services have now been transferred from the heading "runners or boats" to the new heading of "steamer services, sea and river." By the new contract with the British India Steam Navigation Company, to which

Year.	Railway.	Mail-cart, horse and camel lines.	Runners or boats.	Steamer services, sea and river.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.
1883-84	10,631	3,580	34,805	14,520	63,536
1884-85	**11,632**	**4,049**	**34,482**	**10,725**	**60,888**
Increase	1,001	469	...	...	...
Decrease	...	...	323	3,795	2,648

reference has already been made, the sea mileage was reduced by nearly 6,000 miles. This large decrease was effected by the discontinuance of subsidy payments for the coasting line between Calcutta and Bombay, and for the lines between Aden and Karachi, and between Moulmein and Singapore. New lines have been opened in the Gulf of Cutch, and between Goa and Bombay which increased the sea distance by 300 miles. An addition of river mileage is obtained by the transfer from the heading of "runners or boats" of the Irrawaddy and Brahmaputra services: and the net result is a decrease of 3,795 miles. Under runner or boat lines there has been a real increase of mileage to the extent of 1,389 miles; but by the transfer of river steamer lines explained above, this increase has been converted into a decrease of 323 miles. The additional mileage under the head of "mail-cart, &c.," is the net result of various changes under which foot lines were superseded by camel lines or by wheeled conveyances working under contract. Details of the extra railway mileage are given on the margin. In connection with the new British Steam Navigation Company contract sea sorting services were for the first time established between Calcutta and Rangoon, and between Bombay and Karachi.

Section III.—Correspondence.

16. Detailed correspondence returns for each circle will be found in Appendix iii. The marginal abstract compares the correspondence of the year under report with that of the previous year. It exhibits a total increase of nearly 16½ millions of articles of all classes. By far the largest increase is under the head of book and pattern packets. For the last four years the development of this class of correspondence has been very marked—a result which is probably due to the multiplication of vernacular newspaper presses: these presses were encouraged by the repeal of the Vernacular Press Act and the reduction of postage on lighter classes of newspapers in 1881, and they supplement largely their newspaper work by the issue of cheap printed matter in the vernacular. Newspapers have also increased by nearly 10½ per cent. On this subject the Post Master General of Bengal remarks that "there is no doubt that the privilege system "under which newspapers not exceeding 3 tolas in weight are transmitted by "post for ¼ of an anna is much appreciated, and that a vast number of cheap "newspapers which could not exist but for the system are able to pay their "way."

Year.	Letters including Post-cards.	Newspapers.	Parcels.	Book and Pattern Packets.	Total.
1883-84	179,479,620	15,848,586	1,286,261	3,690,828	200,305,301
1884-85	**193,512,546**	**17,507,407**	**1,338,246**	**4,424,817**	**216,783,016**
Increase	14,032,920	1,658,821	51,985	733,989	16,477,715
Percentage of increase	7·82	10·47	4·04	19·89	8·23

17. Letters and post-cards are further analysed on the margin. Post-cards shew the largest growth, their sales having increased by more than 10 millions or about 26 per cent. The Indian post-card is the cheapest in the world; and this doubtless is the cause of its popularity with the natives of this country. Reply post-cards were introduced in February 1884; but the number sold during the year was only 978,176 in the case of inland, and 3,488 in the case of foreign reply post-cards. Notwithstanding the competition of post-cards, paid letters have increased by 4·34 per cent. Unpaid letters have fallen off to the extent of 3·71 per cent. Although the growing habit of prepayment does not improve the postal revenue, the object of the department has always been to encourage the habit; and the yearly diminution of unpaid correspondence is, therefore, regarded as a satisfactory sign. Registered letters show a percentage increase of 7·56, being about the same as the increase of the previous year.

Year.	Post-cards.	Letters paid.	Letters unpaid.	Letters registered.	Total.
1883-84 .	38,637,153	109,101,237	28,035,051	3,705,585	179,479,026

1878-79 . .	69,763	1884-85 . .	110,590

20. The yearly growth of the foreign parcel post traffic since its establishment in 1873-74 is given on the margin.

21. The disposal of the correspondence entered in the table given in the margin of paragraph 16 is exhibited below. It shews that the proportion of articles delivered to the whole was 97·2 per cent.

Sent out for delivery (including 3,550,257 money orders) .	220,333,273
Received back undelivered	6,097,507
Balance actually delivered .	214,235,766
Sent to dead-letter office	2,583,870
	216,819,636

22. Appendix IV contains the usual statistics relating to the working of dead-letter offices, a summary of which is given below. The business of a dead-letter office is in the first place to try and trace the addressees and then to find out the senders of articles which the regular Post Office establishment has been unable to deliver. More than 70 per cent. of the articles received

were disposed of by the dead-letter offices during the year in one or other of the above ways:—

Dead Letters		Number.		Percentage.	
		1883-84.	1884-85.	1883-84.	1884-85.
Total number of articles received in dead-letter offices		3,179,161	3,321,442		
	1883-84 1884-85				
Deduct—					
Articles issued by dead-letter offices for delivery to the addressees or senders, and received back again as undeliverable	153,644 171,917				
Articles transferred to other dead-letter offices	808,099 823,268	961,743	995,185		
Net receipts to be disposed of by the dead-letter offices		2,217,418	2,326,257	100	100
Articles disposed of by the dead-letter offices, less the proportion of articles returned undelivered.	Disposed of by redirection to addressees	357,655	352,701	16·13	15·16
	Disposed of by return to senders	1,250,796	1,334,157	56·41	57·35
Articles undisposable and deposited as dead		608,967	639,399	27·46	27·49

23. The Post Master General of Bengal gives the following information as respects valuables found in articles opened in the Calcutta Dead Letter Office:—"Their total value was R40,380, of which articles to the value of R40,017 were duly disposed of, leaving a balance of articles valued at only R363 in hand at the end of the year. Among the articles of value opened in the dead-letter office was an uninsured registered cover addressed to a Native Chief and refused by him. On the cover being opened, it was found to contain a gold watch set with diamonds and valued at R15,000. The sender's name was not given, but it was eventually ascertained and the article duly returned."

24. A comparative abstract of Appendices V and VI, relating to the sales of postage stamps, is given on the next page. About 45½ per cent. of the entire proceeds yielded by ordinary stamps is derived from the sales of ¼ anna inland post-cards and of ½ anna envelopes.

25. The next table exhibits the proportion of revenue realised in cash and stamps since the year 1874-75. As explained in previous reports, the increase in the cash proportion, since the year 1880-81, arose from an alteration of system under which money-order fees and parcel post commission was realised in cash:—

Proportion of Revenue derived from Postage Stamps and from Cash.

	1874-75.	1875-76.	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.

Section IV.—District Post.

26. The district post is now controlled by the local postal authorities subject to the orders of the Local Government. Funds for its management are provided sometimes by the imposition of a local cess, sometimes by a grant from Provincial Revenue, and sometimes by a mixture of both these processes. The following description of the system under which funds are obtained in the Bengal, Behar, and Eastern Bengal Circles is extracted from the Annual Report of the Post Master General of Bengal:—

"So far as the Postal Department is concerned, the administration of the district post for the whole of the Lower Provinces of Bengal is under the control of the Post Master General of the Bengal Circle. This section of my report relates, therefore, to the zemindari dâk system of the Bengal, Behar, and Eastern Bengal Circles, and includes statistics of the district post of the last two circles, as well as of the Bengal Imperial Postal Circle. In the Lower Provinces the liability of zemindars to carry official correspondence was discharged by personal service up to the year 1862. By Act VIII of that year, passed by the Bengal Legislative Council, the obligation was commuted into money payments, and that Act (VIII B.C. of 1862), known as the Zemindari Dâk Act, and the rules framed under it, regulate the administration of the district post and the provision of funds for its maintenance throughout the territories of the Lieutenant-Governor of Bengal. The whole system may be thus described. The Magistrate determines the stations between which communication is required for police or magisterial purposes, and the Post Master General, in communication with the District Magistrate, and subject to the final decision of the Commissioner, arranges all questions connected with routes, stages, timing, strength and cost of establishment. No charges on account of delivery peons or rural messengers can be made against zemindari dâk funds, but the cost of all establishments necessary for the collection and proper keeping of the accounts of the zemindari dâk cess, as well as for the conveyance of the mails and all reasonable charges for contingencies, including boats, huts, furniture, and stationery, are debitable to the funds raised under the Act. Those funds are raised in the following manner. The Inspector of Post Offices in the district prepares each year by the 1st October, and under the Magistrate's instructions an estimate of the cost of establishments and contingencies for the following official year. The Magistrate, after including in it the cost of his own office establishment and any extra provision for keeping up communications with his own camp while on tour, forwards the budget to the Post Master General who, after modifying it, if necessary, in communication with the Magistrate, returns it. The Magistrate then inserts the estimated balance at the close of the current year and thus ascertains the total sum that it is necessary to provide. He then apportions the amount rateably on the *sudder jumma* of those liable to pay the cess, *viz.*, all zemindars, sudder farmers, and other persons paying revenue direct to Government in respect of lands situated within the district, it being optional with the Magistrate to exempt from liability to payment any person the sudder jumma of whose estates in the district does not exceed ₹50 a year. The sums assessed by the Magistrate are payable half-yearly and in advance, and persons refusing or neglecting to pay for thirty days after the date fixed for payment, are liable to pay double the amount assessed, that amount being recoverable by order of the Magistrate by distraint and sale of the moveable property of the defaulter. There is an appeal to the Commissioner in the case of assessments above ₹40 for one year.

"2. Nominations for the posts of sub-postmasters of district offices (called dâk munshis) overseers and other subordinate officers of the superior grade are made by the Superintendent of Post Offices subject to the approval of the Magistrate of the district; but the appointment and dismissal of runners lies with the Superintendent, subject only to an appeal to the Magistrate. Throughout Bengal, moreover, the Local Government has found it convenient to entrust the Imperial Postal Department with the general control and direction of the district postal lines so as to ensure their proper working in connection with the lines of the Imperial post."

27. Statistics relating to the district post are given on the next page. They are obtained from local sources, and do not correspond with the figures shown in the Finance and Revenue Accounts. Compared with the previous year the total receipts fell from ₹10,45,823 to ₹10,00,132, the fall being due

for the most part to diminished assets from the local cesses in British Burma, in the Punjab, and in the Province of Bengal. A larger revenue was derived from the local cess in the Central Provinces, the net result being a loss of ₹45,691. The expenditure rose from ₹9,60,713 to ₹9,87,449, the increase being ₹26,736. This is composed of a variety of additional charges which occurred principally in the Central Provinces, in Madras, in Assam, and in British Burma. The number of post offices increased by 66, the letter-boxes by 36, the postmen by 12, and the district post line mileage by 334 miles. Contrasted with the previous year there was an increase of 246,807 in the number of articles posted in district offices and of 367,297 articles in the number received for delivery by those offices. But the advance of the district post cannot properly be judged by statistical returns, as its offices and lines are constantly absorbed by conversion into Imperial post offices and lines, the released funds being applied towards the extension of postal facilities in more remote and less favoured localities.

District Post.

(*a*) Includes ₹18,468, the amount of annual subsidy for the Dera Ismail Khan and Chichawatni hill cart line.
(*b*) These are dry season distances: during the rains these lines are increased in length.
(*c*) Grant from the Local Improvement Fund.
(*d*) Includes contributions from Frontier Police Fund ₹4,800 in 1883-84 and ₹3,444 in 1884-85 and contributions by the Maharajah of Agartala, ₹240 in 1883-84 and 1884-85.
(*e*) Includes lines paid from the revenues of feudatory States of 701 miles in length in 1883-84 and 617 miles in length in 1884-85.
(*f*) Met from grant from Imperial Revenue for Bombay District Post.
(*g*) Three offices are feudatory State Post Offices.

Section V.—Money Orders.

28. Allusion has already been made to an important experiment begun in the North-Western Provinces under which the agency of the Post Office is used for enabling zemindars in the interior of districts to remit small sums of land revenue to Government treasuries at head-quarter stations. This scheme has the double advantage of saving the zemindars long journeys by road and of furnishing the Post Office with funds at small places to which the transmission of cash is difficult. Although the measure was restricted to the Benares division, yet during the eleven months of its trial no less than 13,914 land revenue orders were issued, the gross value of which amounted to ₹3,35,904. And the commission realised on these orders was ₹4,594. Difficulties have as yet prevented the extension of the experiment to other parts of the North-Western Provinces: but eventually the Post Office may expect a considerable accession of business from this source.

29. A new system of dealing with money orders was introduced, with effect from the 1st October 1884, under which clerical work was reduced, the procedure simplified, and additional advantages given to the public. One important feature of the change was the payment of money orders by postmen at the houses of payees, instead of at the Post Office only. This measure was at first tried at a few selected offices, with results so satisfactory that its extension generally to all Post Offices was decided on. Again: several important offices were empowered to transact money order business, without the intervention of their head-offices, thus accelerating the transmission of money orders and reducing work in head-offices.

30. From the 1st October 1884 also the public was given the opportunity of employing the telegraph for the transmission of inland money orders. And from the 1st March 1885 this measure was extended, so as to include money orders sent to foreign countries: under this extension the orders are telegraphed to the Indian Office of Foreign Exchange at Bombay, and there included in the foreign mail. The extent to which advantage was taken of this facility in each postal circle will be learnt from the statement given below, which shews that, during the six months that the scheme prevailed, the number of telegraphic money orders issued was 5,788, and their aggregate value about $3\frac{3}{4}$ lakhs of rupees. Compared with the gross amount of money order business done, this result is small: but inland money order transactions are mainly limited to small remittances of less than ₹25 each, and the heavy but doubtless necessary extra expense of ₹2 for a telegram, besides $\frac{1}{2}$ per cent. additional money order commission, must tend to check any great expansion of telegraphic money orders. Nevertheless, the system has supplied a want, and proved specially useful in dis-

tant places like Burma, where postal communication with India is restricted to once in the week :—

Telegraphic Money Order Transactions.

Total	5,788	3,75,529 12	5,755	3,74,043 13

Note.—These figures are included in the general statement of Inland Money Orders.

31. From the marginal abstract, which relates to inland money orders alone, it will be seen that the total number of money orders issued was more than 3½ millions, that their value exceeded 8 crores of rupees, and that the commission realised was about 10 lakhs of rupees. There has then been a satisfactory development of this important and popular branch of postal business. Each money order averaged R23-1-9. Year by year the average of each money order has diminished in amount, as evidenced by the marginal figures, which proves that the Post Office deals more and more with remittances of trifling amounts; and that, notwithstanding its growing transactions, the Post Office in its money order dealings is not encroaching on the usual sphere of private banks. In further support of this fact reference may be made to certain special statistics taken for the month of January 1885, which shewed that 54·40 per cent. of all the money orders issued were for sums of money not exceeding R10 in amount and 25·87 per cent for remittances not above R25. A further analisation of the figures proved that nearly 50 per cent. of the orders for R10 and under related to remittances below R5.

32. The next statement exhibits the issues and payments for each postal circle. In Bengal the money order business done is far in excess of that performed in any other part of India, the Bengal transactions being 39·25 per cent. above those of the North-Western Provinces, which stands next on the list :—

Note.—The figures relating to the Madras Postal Circle include transactions with the Native State of Mysore; the figures relating to the Bombay Postal Circle include transactions with the Portuguese Settlements of Goa and Daman; and the figures relating to the Punjab Postal Circle include transactions with the Native State of Patiala.

33. Eighty-one new money order offices were opened during the year, thus raising the total number of money order offices to **5,657**.

34. An arrangement was concluded with the Portuguese Settlements of Goa and Daman for the exchange of money orders at inland rates and under inland conditions. It came into operation on the 1st May 1884. Reference has already been made to the convention concluded with Patiala, which provided for an exchange of money orders, also at inland rates and under inland conditions.

35. New money order exchanges were available, from the 1st January 1885, with Newfoundland, Bermuda and the Falkland Islands: with various British Colonies and possessions in Africa and West Indies, and with Cyprus and North Borneo. Like Canada and the United States of America, all these exchanges are worked through the medium of the British Post Office. A new money order exchange with Egypt was also introduced, with effect from the 1st October 1884. A comparative statement of Foreign money order transactions expressed in sterling is given below. It shews a considerable development of business, the

gross increase in value being 36·55 per cent. in the case of orders issued by India and 74·86 per cent. in the case of orders paid in India :—

36. The following statement deals with Foreign money order transactions in Indian currency. There has been a fall in the value of issues, in the exchange with the Mauritius and a rise in the value of orders paid in the exchange with the Straits. Taking them altogether, the value of orders issued has fallen to the extent of ₹33,655, while the value of orders paid has improved by ₹77,194 :—

39. The marginal abstract gives the sales of India postal notes since their introduction in January 1883. Attempts to popularise these notes were made, the post office undertaking to transmit them to destination on payment of half an anna as postage and arranging for their payment at the houses of payees instead of at the post office. Although the sales have increased by 45·24 per cent., the total value of notes sold was only ₹2,14,354, which shews that the scheme has not yet commanded success.

Increase	11,015	23,309	15,184	66,776 8

40. From the 1st October 1884 British Postal Orders, of fourteen denominations ranging from 1 shilling to 20 shillings, were offered for sale to the public at post offices in India. These orders are payable in the United Kingdom and at Gibraltar and Constantinople. During the six months that the system pre-

vailed, 8,296 orders were sold at an aggregate value of £5,786, and the Indian commission realised amounted to ₹527. By far the largest demand has been for 20-shilling orders, of which 4,554 were disposed of. Next in demand came the 10-shilling orders, of which 1,105 were sold. The system was mainly intended for the convenience of European residents, and specially of soldiers and seamen; as might be expected, the largest transactions took place in the Punjab, where sales of 1,858 orders were effected aggregating in value £1,446 5*s.* 6*d.* As yet the business transacted is small and the system has not acquired any real popularity.

Section VI.—Post Office Savings Banks.

41. The introduction of Post Office Savings Banks dates only from the 1st April 1882, so that the year under review is the third year of their existence. Statement A, given on the next page, compares the transactions of the year 1884-85 with those of the preceding year, and shews that considerable progress has been made. Twenty-eight new head banks and 272 new sub-banks were opened, thus raising the total number of banks of both classes to 5,499. During the year 75,887 accounts were opened and 38,136 closed, the total number of accounts at the end of the year standing at 122,599, against 84,848 at the close of March 1884. The deposits of the year aggregated 165½ lakhs of rupees as compared with 103½ lakhs in the previous year: the withdrawals rose from 58¼ lakhs to 110 lakhs: and the balance at credit of depositors increased from 75 lakhs to 134¼ lakhs, being an increase of more than 59¼ lakhs. The interest allowed was 3¾ lakhs, against 1⅘ lakhs in 1883-84. Although the establishment of Savings Banks was not extended to Bombay till May 1883, the amount of its deposits, *viz.*, ₹30,41,780, already exceeds the amount deposited in any other circle. Bengal has the largest number of accounts, *viz.*, 26,770. The highest average balance at the credit of each depositor was ₹161-0-6 in the Punjab, and the lowest ₹67-14-9 in the North-Western Provinces. Referring to a large number of withdrawals which occurred chiefly in Guzrat, the Post Master General of Bombay states that they were "undoubtedly due to a feeling of insecurity which prevailed for a short time during the month of March, when the prospect of a war with Russia appeared to be imminent and arrangements were being made on a large scale for sending troops from India to Pishin." Mr. Fanshawe adds that the "results at the end of the year shew that the loss to Government was only temporary."

A.

Statement shewing Post Office Savings Bank Transactions during 1884-85 compared with 1883-84.

* Of this amount ₹88,443 represents balance of accounts not bearing interest.

42. Statement B below distinguishes "Native" from "European or Eurasian" depositors, and gives the general results indicated on the margin. It may further be noticed that Madras contains the largest number of European or Eurasian depositors, *viz.*, 2,894; Bombay holds the next largest number, *viz.*, 1,928; next comes the Punjab with 1,761; Bengal with 1,686, and then the North-Western Provinces with 1,430. The largest number in proportion to native depositors will be found, as in the previous year, in Burma, where there are 703 accounts in the names of European and Eurasian depositors against 1,030 in the names of native depositors.

Race of Depositors.	Number of accounts.	Percentage of total number.	Amount.	
			₹	p.
Native	109,244	89·11	11,07,169	7 10
European or Eurasian	13,355	10·89	2,34,741	5 4
Total	122,599	100	1,34,41,910	13 2

43. Statement C classifies the depositors according to professions. The lowest number of accounts appears under the head "Agricultural." These accounts have fallen in the North-Western Provinces from 697 in 1883-84 to 563 in the year under review; while in Bengal the number of agricultural depositors has, during the same time, risen from 224 to 459. The total percentage increase under this head is 16·54. The industrial classes are also still poorly represented by a total of 2,206 accounts. But their number of accounts open shews an increase over the previous year of 56·89 per cent.

C.

Statement showing the Number of Depositors in each Postal Circle, classified according to professions, during 1884-85.

Percentage of increase	52·60	9·61	36·48	19·64	16·54	56·89	54·58	44·49

44. Simultaneously with the introduction of Savings Banks, the Post Office undertook on behalf of the public the purchase and sale of Government Promissory Notes and their transfer to the Comptroller General for custody. The total investments on this account aggregated ₹1,78,800 in the year 1883-84 and ₹2,94,600 in the year 1884-85. This represents an increase of ₹1,15,800. The balance of these Government securities remaining in the custody of the Comptroller General at the close of the year under review was ₹1,31,300, against ₹39,100 at the close of the previous year, the increase being ₹92,200. Out of a total number of 352 cases in which the Post Office agency was employed for buying and selling Government Paper, 332 cases related to sales not exceeding ₹2,000 in amount; and in 20 instances the dealings were for sums ranging from ₹2,000 to ₹7,000.

Section VII.—Insurance and Value-payable Systems.

45. A table is given on the margin indicating the value at which letters and parcels have yearly been insured by the public since the introduction of the insurance system in 1877-78. Last year's Report shewed an addition to the value of parcels and a diminution in the value of letters insured. This year exhibits a rise under the head of letters and fall under the head of parcels, the net result being a decrease of 5·21 per cent. The insur-

Year.	Value Insured. Letters.	Parcels.	Total.	Insurance Fees.
	₹	₹	₹	₹
1877-78 last quarter, being the commencement of the system	6,66,320	18,60,191	25,26,511	13,230

Percentage of Decrease as compared with 1883-84	...	8·00	5·21	6·41

ance fees have also fallen to the extent of 6·41 per cent. This fall is to some extent due to the stoppage of insurance to and from Bagdad whence large quantities of specie used to be exported in insured parcels. The system of insurance is to a considerable extent patronised by jewellers, watch-makers, and dealers in precious stones.

	1883-84.			1884-85.		
	R	a.	p.	R	a.	p.
Losses by accident or by departmental fraud or neglect	12,021	4	0	15,522	8	9
Losses by highway robbery in British Territory	186	0	0	1,039	6	9
Losses by highway robbery in Native States	3,691	5	1	2,300	0	9
	15898	9	1	19,762	0	3
Value of property recovered	4.516	14	0	5,546	14	0
	11,381	11	1	14,215	2	3
Claims preferred but not entertained	30	0	0	300	0	0
TOTAL	11,351	11	1	13,915	2	3

46. Although only 39 cases of loss occurred during the year, as compared with 3 cases in the previous year, yet the amount which the Post Office had to make good in connection with these losses rose to R 13,915, as shewn in the margin, being an increase of R2,564. Compared with the responsibility incurred, this loss is small in amount.

47. The business done under the value-payable system, since its introduction in December 1877, is abstracted on the margin. It will be seen that 336,788 value-payable articles were posted against 287,377 in the previous year, being an increase of 17·19 per cent., that the value declared for realization was R52,73,352 as compared with R28,08,873, being an increase of 87·74 per cent., and that the commission rose from R53,450 to R69,285, or by 29·63 per cent.

	Number of articles sent under the value-payable system.	Value declared for realisation.	Commission.
		R	R
1877-78 (from the commencement of the system in December 1877) four months	413	6,721	195
1878-79	7,405	1,32,109	3,912

Percentage of Increase over the year 1883-84	17·19	87·74	29·63

NOTE.—On the 1st August 1880 the rate of commission of value-payable articles was reduced to the money order scale, being about one-half that of the previous scale.

48. The following remarks on the working of the system in Bengal are extracted from the report of the Post Master General of that circle:—

"The vast majority of the value-payable parcels, value-payable registered letters, and value, payable book packets posted in this circle are posted by tradesmen in Calcutta for their customers in the interior of Bengal and the rest of India. Of the total number of value-payable parcels posted in the circle, 104,967, or 96·81 per cent., were posted in Calcutta, *i.e.*, in the General Post Office and town sub-offices, the sum specified for recovery being R10,84,855-15; of the value-payable registered letters and book packets, 57,056, or 94·60 per cent., were posted in Calcutta, the sum specified for recovery being R5,31,657-8. In a considerable number of cases large parcels, of which the postage would be excessive, are sent by train, and the railway receipts are forwarded by value-payable registered letters. In this way tradesmen are able to obtain the benefit of the value-payable system while giving those of their customers who live on or near the railway the advantage of the cheap parcel rates of the railway administrations in India."

49. The Post Master General of the North-Western Provinces reports that the "value-payable system is principally utilized by European Firms supplying goods to residents in outlying districts and among natives by the proprietors of printing presses, booksellers, and medicine vendors and to a less extent b jewellers and goldsmiths."

Section VIII.—Miscellaneous.

50. The following statement shows the transactions relating to the Post-Office Security Fund. Postal employés give security in the form of deductions made from salaries. On the 1st January 1883, a new fund was created by the credit thereto of these deductions, interest being allowed at 4 per cent. on the balance of this new fund. All charges are reckoned against the balance of the old fund until it is exhausted. Superior servants are still, as a matter of favour, entitled on retirement to receive back the unexpended portion of their subscription to the fund: hence the distinction maintained in the old account between the returnable and non-returnable portions. The total charges against the old fund during the year amounted to R16,152, leaving a balance at credit of R1,81,317. The balance at credit of the new fund on the 31st March 1885 was R93,653:—

Old Fund.

RECEIPTS.		CHARGES.

51. Last year the complaints made by the public which come to the knowledge of heads of postal circles were 5,732. In the year under report, the number rose to 6,511, being an increase of 779. The General Post Office,

Calcutta, is responsible for 255 of these increased complaints, the Bombay Circle for 184, and the Madras Circle for 174. As regards Calcutta, the Post Master General reports that the majority of the complaints "were found on enquiry to be groundless and only one complaint in five to be well founded." Of the total number of 6,511 complaints, 2,835 have been classified as groundless, 2,237 as well-founded, and in 1,202 instances no definite results were ascertained. Complaints have their use and should never be discouraged: but practical efficiency can rarely be fairly tested by so uncertain a criterion.

52. An analysis of complaints relating to the loss of articles posted in registered letters or parcels is given below. The total number of such complaints has risen from 292 to 306, and in 93 instances blame was attached to members of the postal establishment:—

	Registered Letters.		Parcels.		Total.	
	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.
I.—Cases in which enquiry showed either that no loss occurred or that the loss had not occurred through the fault of postal officials	90	87	79	72	169	159
II.—Cases in which the Postal establishment was proved to be in fault or in which there was strong ground for believing it to be so .	42	39	37	54	79	93
III.—Cases in which no definite conclusion was arrived at	29	33	15	21	44	54
	161	159	131	147	292	306

Class I includes 10 insured cases under the head of "Registered letters" and 9 insured cases under the head of "Parcels."

Class II includes 6 insured cases under the head of "Registered letters" and 18 insured cases under the head of "Parcels."

Class III includes 2 insured cases under the head of "Registered letters" and 5 insured cases under the head of "Parcels."

53. Appendix No. VIII, summarised on the margin, contains a statement of offences punishable by law committed by postal officials.

	1883-84.	1884-85.
Number of legal convictions . . .	161	157
Number of cases punished departmentally . .	65	87
Total .	226	244

54. An abstract of highway robberies is given on the margin, to which is attached a summary of the total highway robberies in each year since 1858-59. Of the 13 instances in British territory, 9 took place in the N.-W. Provinces, and of the 13 cases in Foreign territory, 7 occurred in Central India. No mail robberies were effected in Bengal, Madras, British Burma, Oudh, Assam, Behar, Eastern Bengal, and Sind. The total number (26), though two in excess of the previous year, is far below the usual number.

	1883-84. Number of Highway Robberies.			1884-85. Number of Highway Robberies.

56. In six out of the 26 cases of highway robbery prosecutions were instituted, and in five of them convictions obtained. In sixteen cases the offenders could not be traced, and four cases are not yet finally closed. In fourteen cases the whole stolen mail, in six cases the greater portion, and in two cases a portion only of the stolen mail, was recovered; in the other four cases nothing was found. On seven occasions the runners carrying the mail were wounded or otherwise maltreated.

57. Two runners were drowned while crossing rivers in charge of the mail and a postman disappeared mysteriously while in discharge of his duties, the supposition being that he was carried off by a wild beast.

Postal Officials.	1883-84.	1884-85.
Superintendents and Inspectors of Post Offices	328	332
Post Masters, Deputy and Sub-Post Masters including village post masters	4,714	4,637

Clerks	4870	4,909
Postmen and other servants	9,049	9,326
Road establishment	11,810	12,413
Village postmen	3,869	4,111
Signallers, clerks, and other servants employed in Combined Offices	..	307
	35,636	37,646

58. An abstract showing the strength of the postal establishment is given on the margin. The details for each circle will be found in Appendix IX.

59. The total payments made to private presses during the year for printing work done for the department was R45,723 as compared with R44,696 in the previous year, the increase being R1,027. Private agency is now exclusively employed for printing the *Postal Guide* and other departmental periodical publications.

Section IX.—Non-Postal Branches of the Department.

Telegraphs.

60. Reference was made in the last Annual Report to the commencement of an important scheme for utilizing the agency of the Post Office in extending the operations of the Telegraph Department. Under this scheme all Post Offices were constituted receiving offices for the reception of inland telegrams and for their transmission by post to the nearest Telegraph Office; and wherever convenient and practicable and where the telegraph revenue was expected to be sufficient to justify the measure, wires were extended to Post Offices, and Combined Post and Telegraph Offices opened, the telegraph work being done by specially trained post office officials, who received small allowances from the Telegraph Department for their extra duties. The system has worked well and without friction. Out of 6,000 offices available for the receipt of messages, only 1,751 were practically used by the public, and these 1,751 offices received during the year 25,650 telegraph messages, being an average of about 14½ per office. The collections on these 25,650 messages aggregated R27,387. This amount is small; but it represents assets of a new kind collected without expenditure to the State, as the only remuneration received by the Post Masters, for the trifling extra work done, was the ordinary discount allowed to stamp vendors on the postage stamps sold to prepay the messages.

61. Satisfactory progress was also made in the extension of Combined Post and Telegraph Offices. Two hundred and twelve new Combined Offices were opened, thus raising the total number from 55 to 267. Of these 267 combined offices, 194 were at places with which there had been previously no telegraphic communication: the revenue thus yielded may fairly be taken as new revenue brought to the Telegraph Department by the partial amalgamation of the two departments. The 194 entirely new Combined Offices sent, during the year, 84,276 messages of the value of R91,608. Below is given an abstract statement shewing the year's working of all the Combined Offices. The 267 offices sent 154,174 messages, the amount realised on these messages being R1,74,118:—

Traffic Statistics of Combined Offices for the year 1884-85.

Name of Circles.	Number of Combined Offices.	Total charge to the Telegraph Department for working the office during the year.	Traffic. Number of messages sent.	Number of messages received.	Number of messages classed as transit.	Total.	Revenue realised during the year on sent messages.	Remarks.

Oudh	1	168 0 0	124	160	...	284	168 10 0	
Total	207	65,870 12 0	1,54,174	1,63,750	12,249	3,30,173	1,74,118 3 0	

62. At the close of the year 411 postal employés had qualified as signallers, and 122 were then still under training.

Government Carrying Agency and Passenger Service.

63. Under this head no change has occurred. The only Government bullock train line maintained is that between Umballa and Simla, with branch lines to Kasauli, Dagshai, and Subathu. And the only passenger service directly managed by the Post Office is the line between Umballa and Simla, 96 miles in length.

Section X.—Financial Results.

64. Appendix X compares the revenue and charges of the year with those of the preceding year. It deals exclusively with the figures shown in the regular accounts kept by the department. Appendix XI is an abstract of Appendix X with the addition of certain figures which appear in the civil accounts, but which do not appear in the regular accounts of the department. And the following statement is an abstract of Appendix X. Under the heading of "Purely Postal Service" are included all revenue and charges connected with correspondence of every description, with money orders, and with Savings Banks. The Savings Banks, of course, yield no income at all. It will be seen that the purely postal income was R1,01,50,894 as compared with R98,16,101 in the previous year; and that the charges amounted to R92,33,575, against R90,96,591 in 1883-84. Thus the revenue has improved to the extent of R3,34,793, while the expenditure has increased by R1,36,984. The net revenue for the year is therefore R9,17,319, against R7,19,510 in 1883-84. There was a deficit of R2,222 under the non-postal branches, as compared with a surplus of R2,604 in the previous year:—

	1883-84.	1884-85.
Purely Postal Service.	R	R
Receipts including sale of Service Postage Stamps	98,16,101	1 01,50,894
Ditto excluding ditto ditto	82,43,345	85,33,2 0
Disbursements including discount on sale of ordinary stamps	90,96,591	92,33,575
Net revenue including sale of service postage stamps	7,19,510	9,17,319
Non Postal Branch.		
Bullock Train.		
Receipts	1,57,244	1,01,307
Disbursements	1,54,640	1,03,529
Surplus	2,604	— 2,222
Passenger Service on Mail-cart lines.		
Receipt and Disbursements	1,68,643	1,79,,68
Contract subsidies paid through the Post Office, but employed also largely on general and military considerations.		
Disbursements	7,14,413	5,95,988

These results may be summarised as follows:—

	1883-84.	1884-85.
	R	R
A net revenue in the Purely Postal Department of .	7,19,510	9,17,319
A net surplus in the Bullock Train Department of .	2,004	—2,222

65. Turning now to Appendix XI. As already said, this Appendix contains not only an abstract of the revenue and charges given in Appendix X, but also certain additional receipts and charges now detailed on the margin. It exhibits a revenue of R1,04,71,299, being a gain of R2,83,871 on the revenue of the previous year; and an expenditure of R1,24,20,730, being an increase of R75,923 over the expenditure of 1883-84. Thus the net deficit of the Post Office, according to the Financial and Revenue Accounts, has diminished from R21,57,379 in 1883-84 to R19,49,431 in 1884-85. This represents an improvement of about two lakhs.

Revenue, 1884-85.	R	Charges, 1884-85.	R
District post collections including Zemindari Dâk receipts in Bengal .	39,530	District post establishment including Zemindari dâks in Bengal .	11,40,000
		Stores from England . . .	4,46,280
		Payments under postal arrangements with Lords of the Treasury .	7,00,000
		Payments to Tigris and Euphrates Steam Navigation Company for conveyance of mails from Busreh to Bagdad	12,000
		Special pay, &c., of the Representative of British India at the postal congress at Lisbon . . .	9,700

66. But the true financial position of the Post Office is not shown by either of these appendices. There are certain items of charge which appear neither in the regular accounts of the department nor in the Finance and Revenue Accounts, but which nevertheless are properly debitable against the Postal Department. And there is one item of revenue which, though properly belonging to the Post Office, is taken to credit in the Finance and Revenue Accounts under the head "No. VI—Provincial Rates." This item is called "Cess on Lands for District Post," and represents the assets of the district post. These assets amount to about 10 lakhs, while the charges of the district post come to about 11½ lakhs. As the Post Office is debited with the expenditure of the district post, it should get credit also for its income. To obtain a clear balancesheet, the Post Office should add to its revenue this item of 10 lakhs and treat as expenditure the extraneous charges already referred to. This has been done in the table given on the margin from which the following result is deduced:—

Items not included under charges in the Finance and Revenue Accounts.

	1883-84.	1884-85.
	R	R
Cost of stationery supplied by the Superintendent of Stationery	1,07,611	1,42,532
Railway service estimated, less actual payments .	82,000	2,03,000
Value of services rendered to the Post Office by the Government Press	20,395	27,342
Rent of Government Buildings	2,41,964	2,94,946
Gratuities	3,859	4,828
Leave allowances paid in Great Britain . . .	13,169	4,578
Pensions, being the average of five years . .	1,65,875	1,76,401
	6,34,873	9,13,627
Deduct—Share of marine subsidies charged in the Finance Accounts which should have been borne by Military, Political, and other departments .	4,55,090	2,36,332
Net amount to be added to charges in the Finance and Revenue Accounts	1,79,783	6,77,295

	1883-84.	1884-85.
	R	R
Net deficit according to Finance and Revenue Accounts .	21,57,379	19,49,431
Add—Net amount chargeable to Post Office as per margin above	1,79,783	6,77,295
Total .	23,37,162	26,26,726
Deduct—"Cess on Lands for District Post" . . .	10,00,000	10,00,000
Net deficit .	13,37,162	16,26,726

67. According to these figures the Post Office is not a self-supporting institution but is worked at a cost to the State of about 16¼ lakhs. The deficit is more by nearly 3 lakhs than it was in 1883-84. This is due mainly to additions under the head of free service rendered by railways, but partly also to increased supplies of stationery from the Stationery Department and extra rent for the use of Government buildings.

Section XI.—General Review of Progress.

Year.	Comparison of number of Letters and Newspapers (those of 1855-56 being represented by 100).	Comparison of revenue from private correspondence (that of 1855-56 being represented by 100).	Comparison of expenditure (that of 1885-56 being represented by 100).

1884-85, thirtieth ditto . . .	**646**	**526**	**308**

68. A comparison of revenue derived from correspondence and of expenditure from the year 1855-56 and onwards is given on the margin.

Section XII.—Notices of Post Office Officials.

69. Acknowledgments are due to Rai Salig Ram, Bahadur, Post Master General of the North-Western Provinces, for his suggestion as respects the use of money orders for the payment of land revenue and for the success with which the beginning of this important scheme has been attended: to Mr. H. M. Kisch, Post Master General of Bengal, for the acceleration of the Mail Service between Calcutta and Eastern Bengal, and to Babu Surjya Kanta Mitra, a Superintendent in Bengal, for conducting, under the direction of the Post Master General, the negotiations by which this acceleration was effected. Mr. E. R. Douglas, who was in charge of the Railway Mail Service Circle, has also prominently brought to notice the valuable assistance rendered by his Personal Assistant Mr. H. C. Sheridan.

Appendix No. I.

Statement showing the number of Post Offices and Letter Boxes opened and Village Postmen entertained during the year 1884-85, and the total number that stood at the end of the official years 1883-84 and 1884-85.

Names of Postal Circles.	Existing on the 31st March 1884.			Opened or entertained in 1884-85.			Total of 1884-85.			Closed or discontinued in 1884-85.			Balance on 31st March 1885.			Increase or Decrease.

	R
(a) Gross value of ordinary postage labels sold as per Appendix V	[illegible]
,, ,, ,, ,, X	[illegible]
Difference	[illegible]
The difference is due to the following causes :—	
Telegraph Revenue realized in postage labels	[illegible]
Ordinary postage labels used by Presidency Banks and their branches in connection with Government Treasury business adjusted under Government orders as service labels	8,887
Difference in figures furnished by Civil Account Department and those by the Superintendent of Stamps	74
	[illegible]

(b) Differs from the adjusted amount (Appendix X) to the extent of R6,612, of which R6,609 represent discount on Postage Stamps affixed to Telegraph Messages, and R3 represent difference between the figures given respectively by the Civil Account Department and the Superintendent of Stamps.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters and newspapers, &c.), from that year on to 1872-73, after which a low privileged rate of 1 anna for each letter not exceeding 10 tolas (about 4 oz.) was conceded, thus reducing immensely the postage income.

Column 8.—The figures in this column are useful, as showing the revenue undisturbed by the changes of system in respect of official correspondence explained in the note referring to column 3.

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The comparison commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

(a) Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

* Including post-cards from 1879-80.

† 1,712 miles of lines under this head have in 1884-85 been included in column 19.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 3rd MARCH 1886.

GENERAL REMARKS.—Heavy rain has fallen in Assam and slight rain in three districts of the Punjab. Elsewhere the week has been rainless.

In Madras and Mysore agricultural prospects are generally fair. In Coorg the prospects of the season continue good.

The *rabi* harvest is in progress in Bombay, Berar, and Hyderabad. In Central India and Rajputana the prospects of the *rabi* crops are generally good.

In the North-Western Provinces and Oudh and the Punjab the *rabi* crops are in good condition and prospects are generally excellent. The *rabi* harvest continues in progress in the Southern Districts of the Central Provinces and promises well.

In Bengal the *rabi* crops and the spring rice are generally doing well, but in some districts more rain is wanted. Harvesting of mustard and other early *rabi* crops and of sugarcane is proceeding with a good outturn. The prospects of the poppy crop continue good, and opium is being gathered in some places.

In Assam ploughing for the *aus* crop has commenced.

In British Burma the season continues favourable.

The public health is generally good.

Prices are rising in the Umballa, Rawalpindi, Delhi, Shahpur, and Dera Ismail Khan districts of the Punjab, show signs of falling in the Northern Districts of the Central Provinces and have fallen in the Shimoga, Kadur and Kolar districts of Mysore. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras – (March 3rd)		
Bellary . . .	*Nil*	Standing crops generally good; but white *cholam* suffering from disease in parts of two talukas. Harvest sugarcane and dry grains, yield about average.
Kurnool . . .	*Nil*	Cotton and some early dry crops slightly injured in parts by December rain, checked by heavy dew. Harvest wheat and pulses, yield below average. Smallpox in two and cattle-disease in three talukas.
Ganjam . . .	*Nil*	Fever in two, smallpox in four, and cattle-disease in seven talukas. Twenty-six deaths from cholera.
Kistna . . .	*Nil*	Standing crops generally good. Fever in some talukas. Cattle-disease in one village. Deaths from cholera unreported last week 33, this week 10.
Chingleput (Madras) .	*Nil*	Standing crops good. Harvest paddy, yield below average. Smallpox in two talukas and cattle-disease in two.
Coimbatore . . .	*Nil*	Standing crops good. Harvest wet and dry grains, outturn about average. Fever in two talukas.
Tanjore . . .	*Nil*	Standing crops generally good. Harvest wet and dry grains, outturn below average. Cattle-disease in one taluk.
Madura . . .	*Nil*	Harvest paddy, yield about average. Fever prevalent.
Malabar . . .	*Nil*	Harvest second crop paddy, outturn below average. Slight smallpox in eight and fever in two talukas. Two deaths from cholera. Cattle disease in one taluk.
Travancore . . .	*Nil*	Harvest over, yield generally good. Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(3rd Mar.)		
Karachi . . .	*Nil*	Weather becoming warm. River at Kotri on 1st 4 feet 1 inch against 6 feet 2 inches on same date last year. Fever in eleven and cattle-disease in six talukas. Prices: wheat, red rice, and *bajri* in Karachi 20, 30, and 29, in Ghorabari 25, 40, and 30, in Mirpur Bathoro 24, 40, and 42, and in Manjhand 32, 36, and 38 pounds per rupee, respectively.
Hyderabad . .	*Nil*	*Rabi* crops injured by frost in seven talukas. River at Kotri on 1st 4 feet 1 inch against 6 feet 2 inches on same date last year. Fever in five, cattle-disease in six and smallpox in one taluka. Wheat 30, *bajri* 37, *jowari* 50, white rice, 18, and red rice 28 pounds per rupee.
Ahmedabad . .	*Nil*	Reaping of *rabi* crops continues. Fever in Sanand. Wheat 36 and *bajri* 28 pounds per rupee.
Baroda . . .	*Nil*	Smallpox continues in Baroda city in slight form and measles is prevalent in Nosari. Crops in good condition. Prices—*bajri* 20, wheat 28, and rice 10 pounds per rupee.
Surat . . .	*Nil*	Wheat and cotton harvest progressing; other standing crops healthy. *Jowari* 38 and *nagli* 43 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik . . .	*Nil*	*Kharif* threshing over. *Rabi* reaping in progress. Public health good. Wheat 31¼, *bajri* 33¾ and rice 20¾ pounds per rupee.
Colaba (Bombay) .	*Nil*	Average abnormal temperature 2° warm. Vapour in air normal, except on 25th and 28th, when it was excessive. Abnormal wind northerly from 27th to 1st; wind normal on all other days.
Poona . . .	*Nil*	Reaping of *rabi* crops in progress. Smallpox in Sirur taluka. Prices—*bajri* 35 and *jowari* 43, in Poona *bajri* 32 and *jowari* 35 pounds per rupee.
Ahmednagar .	*Nil*	Reaping in progress. Public health good. *Bajri* average 46 and *jowari* 55 pounds per rupee.
Sholapur . . .	*Nil*	Linseed, wheat, *tur*, and gram crops have suffered from blight in places; cotton crops inferior in Madha and Karmala talukas; reaping of *rabi* still in progress. *Jowari* 55 pounds 17 tolas and *bajri* 44 pounds 9 tolas per rupee.
Dharwar . . .	*Nil*	Harvesting of wheat and gram nearly completed. Exotic cotton blighted in three talukas. Slight fever in two and cattle-disease in four talukas. Rice 22 to 32 and *jowari* 42 to 64 pounds per per rupee.
Kanara . . .	*Nil*	Second crop rice thriving; sugarcane and pepper harvest continue. Slight fever and smallpox throughout the district; cattle-disease decreasing. Common rice in Karwar 14, in district average 13½ seers per rupee. Weather hot and cloudy.
Rajkot . . .	*Nil*	Weather warm. Fever and bowel complaints prevailing; general health good. *Bajri* 31, *jowari*, 44, and wheat 33 pounds per rupee. *General Remarks.*—River continues low in Sind. Reaping of *rabi* crops in progress in most districts of the Deccan, Gujarat, and Southern Mahratta Country. Fever in parts of ten, cattle-disease in parts of eight, and smallpox in parts of six districts.
Bengal—(Mar. 2nd)		
Chittagong . .	*Nil*	Weather cloudy and hot in the mornings. Prospects of crops fair. Rain wanted. Prices steady. Public health good.
Dacca . .	*Nil*	Prospects of crops generally good. Rain wanted. Harvesting of *rabi* crops and sugarcane going on. Public health good.
24-Pergunnahs . .	*Nil*	Cold-weather crops being harvested, yield estimated at about 14 annas. Common rice 15 to 16 seers per rupee. Public health good; cholera abating.
Khoolna . . .	*Nil*	Winter crops being stored. Lands being ploughed for *til*. Public health good.
Moorshedabad . .	*Nil*	Weather seasonable. Prospects of all *rabi* crops favourable. Price of rice stationary. Public health good.
Pubna . . .	*Nil*	Weather hot. Prospects of winter crops continue fair. Rain wanted. Public health good.
Dinagepore . .	*Nil*	Weather fine with westerly wind. Mustard and sugarcane harvested; prospects of other cold-weather crops good. Average price of rice 22 seers per rupee. Some cholera and cattle-disease prevalent.
Rungpore . . .	*Nil*	Mustard gathering almost over, outturn fair; prospects of other cold-weather crops good. Prices stationary. Public health good.
Midnapore . .	*Nil*	Weather warm. *Rabi* crops and *boro* rice promise well, but want rain. Cholera prevalent in Contai.
Burdwan . . .	*Nil*	*Rabi* harvest progressing satisfactorily. Common rice 16 to 22 seers per rupee. Public health fair.
Bhagulpore . .	*Nil*	Prospects of crops good. Prices risen slightly.
Monghyr . . .	*Nil*	Poppy prospects continue favourable
Purneah . . .	*Nil*	Prospects of crops and public health good. Rice 20 seers per rupee.
Durbhanga . .	*Nil*	*Rabi* prospects continue favourable; mustard being harvested with good outturn; *moong* being sown. Prices risen slightly. Public health generally good.
Mozufferpore . .		Prospects of opium crop excellent.
Sarun . . .		Poppy looks excellent, and capsules are being punctured. Weather favourable.
Chumparun . .	*Nil*	Prospects of *rabi* and poppy crops continue good. Prices stationary. Public health good.
Patna . . .	*Nil*	Prospects of *rabi* and poppy good; harvesting of mustard, pea, and *massoor* going on. Public health good.
Gya	*Nil*	Weather hotter with westerly winds. *Rabi* and poppy crops good. Public health good.
Shahabad . . .	*Nil*	Poppy prospects on the whole good. Weather favourable.
Hazaribagh . .	*Nil*	Weather seasonable. Prospects of *rabi* and other cold-weather crops continue good; gathering of opium going on rapidly. Strong westerly winds likely to do some harm to the crop. General health good.
Cuttack . . .	*Nil*	Weather hot. *Rabi* crops being gathered with moderate outturn; *dalua* rice doing well. Price of rice stationary. Public health good. *General Remarks.*—No rain during the week. Hot weather is setting in. *Rabi* crops and *boro* rice are generally doing well, but in some districts rain is wanted; harvesting of mustard and other early *rabi* crops and of sugarcane is proceeding with a good outturn; poppy prospects continue good; in some places opium is being gathered. Price of rice remains stationary. General health is fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(Mar. 2nd)		
Benares (Mar. 2nd)	*Nil*	Weather warmer with strong west winds. Prospects of crops favourable; peas being cut, outturn average. Supplies ample. Prices show a rise in wheat and *bajra* which is due to falling off in imports. General health good; no cattle-disease.
Gorakhpore („ 1st)	*Nil*	Tapping of poppy in progress; *rabi* crops in good condition. Weather favourable. Slight rise in barley. Sporadic cases of fever and measles.
Fyzabad („ 2nd)	*Nil*	Weather clear. Prospects of *rabi* excellent; poppy promises well. Health of men and cattle good.
Lucknow („ 1st)	*Nil*	Season favourable. *Rabi* crops nearly ripe; peas being cut in places; poppy in flower. Supplies sufficient. Prices steady. Health of people good; cattle suffering a little from dearness of fodder.
Rae Barelli („ „)	*Nil*	Weather getting warm with strong west winds. Condition of crops good. Markets well supplied. Prices rising. General health good.
Partabgarh („ 2nd)	*Nil*	Wind east and westerly; weather fine. Prospects good. Wheat and barley being cut in isolated parts of the district; *arhar* flowering; poppy generally in full flower; opium being extracted, yield fair. Prices almost stationary.
Allahabad („ „)	*Nil*	Weather seasonable; heat increasing. Crops good; peas, gram, and barley being harvested. Markets well supplied. Prices still rising. Health good.
Cawnpore („ 1st)	*Nil*	Weather seasonable. Poppy healthy and vigorous. Prices steady. Condition of crops, people and cattle good.
Banda („ 2nd)	*Nil*	Weather sometimes cloudy. Prices stationary. Public health and condition of cattle good.
Farakhabad („ 2nd)	*Nil*	Harvest prospects favourable; barley reaping commenced; poppy crops satisfactory. Weather unseasonably warm.
Sitapur („ 3rd)	*Nil*	Weather mostly clear with variable winds. *Rabi* prospects favourable. Prices stationary. Poppy crops in flower and healthy. Health good.
Bareilly („ 2nd)	*Nil*	Crops in excellent condition. Markets tending slightly to rise. No disease of men or cattle.
Ballia („ 1st)	*Nil*	Weather getting hot. *Rabi* prospects continue good; harvesting begun; sugarcane being planted. Markets well stocked. General health good; no cattle-disease.
Kumaon („ 22nd)	*Nil*	Weather fair. *Rabi* crops doing well; *kharif* operations commenced. Prices rising. General health good; cattle-disease continues.
Agra („ 1st)	*Nil*	Weather getting warm. Strong west winds. Prices rising. Health good.
Jhansi („ „)	*Nil*	Weather seasonable. Crops generally good. Prices stationary. Health of people good; cattle-disease continues in a few villages of pargana Jhansi.
Meerut („ 2nd)	Slight storm on the night of 28th February.	Weather growing hotter but seasonable. Prospects favourable. Prices fairly steady. No sickness.
		General Remarks.—*Rabi* and poppy crops in good condition, the latter being tapped in places. Prospects favourable. Prices generally steady. Health of men and cattle good.
Punjab—(Mar. 3rd)		
Delhi . (Mar. 2nd)	*Nil*	Health fair. Prices rising.
Hissar . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest flourishing.
Umballa . . .	·01	Health good. Prices slightly rising. Prospects of current harvest flourishing.
Jullunder . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest thriving.
Ferozepore . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Lahore . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Rawalpindi . .	Slight rain	Health good. Prices rising. Prospects of current harvest average.
Shahpur . . .	*Nil*	Health good. Prices rising. Prospects of current harvest average.
Mooltan . . .	*Nil*	Health good. Prices fluctuating. Prospects of current harvest good.
Dera Ismail Khan .	*Nil*	Health good. Prices rising. Prospects of current harvest good.
Peshawar . . .	Slight rain	Health fair. Prices stationary. Prospects of current harvest favourable.
		General Remarks.—Slight rain in the Amballa, Rawalpindi, and Peshawar districts. Health generally good. Prices rising in the Delhi, Amballa, Rawalpindi, Shahpur, and Dera Ismail Khan districts, fluctuating in Multan, and stationary elsewhere. Prospects of current harvest good, though strong west winds in the Delhi district have slightly damaged the crops. Fodder for cattle scarce in the Lahore district.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(Mar. 3rd)		
Nagpur . . .	*Nil*	Weather hot. *Rabi* being gathered. Fever and cattle-disease in places. Prices steady.
Jubbulpore . .	*Nil*	Weather seasonable. Wheat favourable. Health good. Prices high.
Saugor (Mar. 2nd)	*Nil*	Weather warm. Prospects good. Prices fallen. Slight smallpox and cattle-disease.
Seoni	*Nil*	Weather cloudy and warm. *Rabi* harvest commenced. Prospects good. Slight smallpox. Prices steady.
Hoshangabad . .	*Nil*	Weather cloudy and warm. Prospects slightly injured by rust. Cattle-disease in places. Wheat 15½, rice 11, and *juar* 19 seers per rupee.
Khandwa . . .	*Nil*	Days warm, nights cool. *Rabi* harvest in progress. Health good. Wheat 19, rice 12, and *juar* 26 seers per rupee.
Raipur . . .	*Nil*	Weather clear, days hot. Prospects good. Linseed being reaped. Weather good. Wheat 30½, and rice 25 seers per rupee.
Sambalpur (Feb. 27th)	*Nil*	Weather clear; days warm. Health generally good. Rice 29¼ seers per rupee.
		General Remarks.—Weather growing considerably warmer. *Rabi* harvesting is in progress in the south of the provinces. Prospects unchanged. The rise in the price of wheat which has taken place lately in the Northern Districts, shows signs of lowering.
British Burma—(Feb. 24th)		
Akyab (Feb. 20th)	*Nil*	Public health and health of cattle good.
Bassein . . .	*Nil*	Total rainfall to date 2·54 inches. Public health good. Cattle-disease severe in three townships. Reaping almost completed.
Rangoon . . .	*Nil*	Total rainfall to date 1·58 inches. Public health and health of cattle good.
Amherst (Moulmain) .	*Nil*	Public health and health of cattle good.
Tavoy . . .	*Nil*	Public health and health of cattle good.
Pegu . . .	*Nil*	Total rainfall to date 0·55. Public health good. Slight cattle-disease in one township.
Henzada . . .	*Nil*	Slight cholera in two townships. Cattle healthy.
Prome . . .	*Nil*	Total rainfall to date ·06. Public health and health of cattle good.
Toungoo . . .	*Nil*	Total rainfall up to date 2·42 inches. Public health and health of cattle good.
Thayetmyo . .	*Nil*	Total rainfall up to date ·13. Public health and health of cattle good. As the reaping was finished the crops have not suffered from the recent rain.
		General Remarks.—Slight cholera in parts of two districts; cattle-disease severe in part of one district, otherwise health of man and beast satisfactory. Weather seasonable.
British Burma—(3rd Mar.)		
Akyab (Feb. 27th)	*Nil*	Public health and health of cattle good.
Bassein . . .	*Nil*	Public health good; cattle-disease severe in three townships, elsewhere slight.
Rangoon . . .	*Nil*	Public health and health of cattle good.
Amherst (Moulmein) .	*Nil*	Public health and health of cattle good.
Tavoy . . .	·12	Total rainfall up to date ·12. Public health and health of cattle good.
Pegu . . .	*Nil*	Public health and health of cattle good.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN SIND FOR 1884-85.

No. 52 I., dated Fort William, the 5th March 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, No. 25 W. I.—56, dated 15th February 1886, submitting the Revenue Report of the Irrigation Department in Sind for 1884-85, and the Resolution of the Government of Bombay thereon.

OBSERVATIONS.—The Capital expenditure during the year from "Loan" and "Ordinary" funds amounted to Rs. 6,43,105 and Rs. 27,016, respectively. The total Capital outlay up to the end of the year was Rs. 1,06,31,413.

2. The gross revenue from all works and all sources amounted to Rs. 37,73,166 by assessment and to Rs. 38,50,617 by actual receipts. The gross assessed revenue from the "Productive" and "Ordinary" Irrigation works for which Capital and Revenue Accounts are kept, amounted to Rs. 16,23,044; the working expenses to Rs. 7,08,302, and the net revenue to Rs. 9,14,742, or 8·75 per cent. on the Capital outlay to the end of the year. In Sind the "Ordinary" Irrigation Works are apparently more profitable than the "Productive" works, yielding 15·44 per cent. on the Capital outlay invested in them, against only 5·79 per cent. returned by the Productive works, but most probably the Capital outlay recorded against the former class of works does not fully represent the amount of original work in them, much of which was inherited from the former rulers of the country.

3. The total area cultivated by the aid of the Irrigation works, during the year under review, amounted to 1,783,173 acres, an increase of 230,612 acres over the average area of the five preceding years, and of 242,342 over the

area of 1883-84, the year immediately preceding. This most satisfactory increase was due to a fairly favourable inundation, timely rainfall, improved clearances, and increased confidence of the cultivating community in the protective embankments. The large increase in irrigation revenue (Rs. 4,48,012) over that of the previous year shows how remunerative is the outlay on canal clearances and protective embankments in Sind. An increased grant for this purpose was first made in 1881-82, from the commencement of which year up to end of 1884-85, the increase in outlay has averaged Rs. 1,47,000 per annum; the increase in revenue during the same four years having averaged Rs. 4,60,900 per annum: but while the outlay on clearances and repairs of the fourth year, 1884-85, is only Rs. 1,26,766 in excess of the outlay during 1880-81, the irrigation revenue of 1884-85 is Rs. 7,73,303 more than that of 1880-81. A portion of this increase is, however, due to increased rates of assessment. The irrigation share of the net consolidated revenue for 1884-85 amounted to Rs. 36,16,370, and the cultivated area, excluding jaghir land, to 1,586,279 acres, giving an average rate of Rs. 2·28 per acre; the corresponding rate per acre was Rs. 2·14 for 1880-81, so that (1,586,279 × Rs. 0·14) = Rs. 2,22,079 may be set down as due to increased rates of assessment, and the balance, Rs. 5,51,224, may be fairly claimed as being in a great measure the result of improved clearances and maintenance. But the possibility of increased assessment must itself be due, in no small degree, to increased certainty of supply and security from floods, and in any case, the increase in outlay has conduced largely to an increase in revenue more than fourfold of its own amount.

4. The total outlay on maintenance and collection charges during the year amounted to Rs. 14,04,087, being 37·21 per cent. of the revenue, and Rs. 0·79 per acre, the average percentage and rate per acre of the six preceding years having been 40·15 and 0·78. On the Punjab inundation canals the rate of maintenance during 1884-85 was Rs. 1·07 per acre, but strict comparison cannot be instituted as the Sind returns probably include a number of minor canals which are not maintained in the same style as those for which Capital and Revenue Accounts are kept, and it is impossible from the returns submitted to separate accurately the areas irrigated by the latter. Nor can any fair comparison be instituted of proportion of expenditure to revenue, because the Sind water revenue amounts to Rs. 2·28 per acre, that of the Punjab being only Rs. 1·50 per acre for the inundation canals.

5. The duty done by the water varied from 72·39 acres per cubic foot per second on the Desert Canal to 28·09 on the Fuleli and 13·53 on the Sanhi-Guni; millets forming 89·3 per cent. of the irrigated area on the Desert, and rice 68 and 99 per cent. respectively of the irrigated areas on the Fuleli and Sanhi-Guni canals.

6. The Government of India observes with satisfaction the earlier submission of the report, and hopes that still further improvement in this respect will be attained in the submission of that for 1885-86.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Government of Bombay, in the Public Works Department, for information.

Also, that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay, be forwarded for information to the Governments noted in the margin, in the Public Works Department.

Madras, Bengal, the North-Western Provinces and Oudh and the Punjab.

Also, that a copy of this Resolution, of the report, and of the Resolution by the Government of Bombay, be forwarded to the Department of Finance and Commerce, and to the Revenue and Agricultural Department for information.

Also, that a copy of this Resolution, the Resolution by the Local Government, and the memorandum by the Commissioner in Sind, together with the general abstract of financial results, be forwarded to the Publisher of the *Gazette of India* for publication in the Gazette Supplement.

Also, that a copy of this Resolution be forwarded to Her Majesty's Secretary of State.

H. A. BROWNLOW, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

Enclosure to P. W. D. Resolution No. 52 I. of 1886.

No. 25 W. I.—56, dated 15th February 1886.

RESOLUTION—By the Government of Bombay, Public Works Department.

Letter from the Superintending Engineer for Irrigation in Sind, No. 3458, dated 15th December 1885.

Forwards the Revenue Report of Irrigation Works in Sind for 1884-85, with the usual tables, charts and a copy of the Index Map of Sind, and explains the cause of delay in submitting the report.

Memorandum from the Commissioner in Sind, No. 4918, dated 22nd December 1885.

Forwards the report, with accompaniments, with his observations thereon.

Memorandum from the Revenue Department, Secretariat, No. 734, dated 29th January 1886.

Transfers for disposal a memorandum from the Commissioner in Sind, submitting, with reference to para. 7 of his memorandum No. 4918, dated 22nd December 1885, copy of one from the Collector of Hyderabad, who states that the figures given by the Superintending Engineer in his Table E., have been taken from Canal Return No. IX, which is a return of areas, assessment and realizations in respect of Hakaba (water-rate); that the area, 442,192 acres, represents the area shown by the Mukhtyárkars as that of the jághír holdings during the financial year 1884-85, whereof 83,809 acres were cultivated; and that the rates of the Hakaba vary, and in several instances there are leases based on average.

RESOLUTION.—The inundation of the year 1884, although at the outset somewhat discouraging, was on the whole a favorable one, resulting in a very considerable extension of the area of cultivation and increase of revenue. This result was in all probability somewhat due also to the well-timed and general fall of rain which took place during four months of the inundation.

2. The increases of area of cultivation and canal revenue, as shown in Table II., were respectively 230,612 acres and Rs. 6,15,391 over the averages of the previous five years.

3. The total area of cultivation for the year under review was 17,83,173 acres, of which 196,894 acres were jághír.

4. The irrigation share of the net consolidated assessment was Rs. 36,16,370, giving an average rate of Rs. 2·27 per acre.

5. The total expenditure on Maintenance and Repairs and Revenue collection charges has been Rs. 14,04,087, being an increase on the previous three years made up entirely of an increase in the last item.

6. The percentage on revenue was 37·21, and the cost of maintenance per acre was ·79 (about 12¾ annas), which bears favorable comparison with previous years.

7. It is satisfactory to find that the increase of cultivation is not entirely due to the favorable season, but may be attributed also to the increased confidence given to the zamíndars by the protective works undertaken by the Government.

8. The attention of the Political Department should be called to the remarks of the Commissioner in Sind in the beginning of his 6th paragraph regarding the outstandings in the Khelat District.

9. His explanation with respect to the Hakaba outstandings in the Sind Division is quite satisfactory.

10. The state of affairs in the Eastern Nára continues to improve rapidly, and although there is still a deficit, yet in a few more years the revenue, it is confidently expected, will attain to satisfactory dimensions.

11. The improved supply in the Desert Canal due to the lowering of the sill of the regulator is noticeable.

12. The increase and improvement generally in the revenue of all the systems of canals in the province is highly satisfactory, and no special remarks seem to be further required on any work in particular.

13. The bund systems were in several instances severely strained, and though in a few cases breaches occurred, yet on the whole they stood fairly, and fortunately when accidents did occur no serious injury resulted.

14. Government again learn with satisfaction the Commissioner's continued approbation of the results of the efforts of the Irrigation Department in the Province of Sind during the year.

15. The report has been submitted with increased punctuality, and it is confidently expected that this improvement will progress.

16. Copies of this report and the memorandum thereon by the Commissioner in Sind should be forwarded as usual with the review of this Government to the Government of India and the Secretary of State.

No. 4918 OF 1885.

PUBLIC WORKS DEPARTMENT.

(Irrigation)

Commissioner's Office, Camp, Akatar

22nd December 1885.

Forwarded to Government.

2. The inundation of 1884 was, as explained by the Acting Superintending Engineer for Irrigation, a remarkably good one, and the season consequently was an excellent one for cultivation. The rainfall was also favourable. As was to be expected, the favourable inundation led to an increase in cultivation, the increase over the area cultivated in 1883-84 being acres 156,447 of kharíf and acres 67,715 of rabi, yielding an increased irrigation revenue of R4,48,012, a result which, though due to a favourable inundation, could not have been counted on, had not the improved clearances of late years rendered increased cultivation possible and the protective embankments given the zemindárs confidence sufficient to induce them to bring fresh lands under the plough. Some of the increase in revenue is also, as Mr. Whiting points out, due to increased rates, but as increased rates would rather have a tendency to check than increase cultivation, the increase is all the more satisfactory.

3. Mr. Whiting in his fifth paragraph expresses surprise at there being an increase in cultivation and yet a decrease in revenue in the Fuleli Canals District. "If" (he remarks) "there is any cause for such a remarkable result the Irrigation Department is not aware of it." Who is referred to as "the Irrigation Department" the Commissioner is not aware, but the Executive Engineer of the Fuleli District should have had no difficulty in explaining to Mr. Whiting the causes that might, and it must be presumed have produced the results that so surprise him. The southern tálukas of the Hyderabad Collectorate which form the Fuleli Canals District have not all been settled, some being under the old "diffused rates," while in others, as for instance Badin and Tando Bago, old leases are still in force. In this part, as Colonel LeMesurier has often pointed out, increased cultivation does not mean increased revenue, as however great the area within leased lands that is cultivated the revenue collections do not vary. The only increase possible being in the case of "bigoti" lands, that is lands taken up on an assessment per acre. Thus a decrease in the cultivation in the settled Guni Taluka (and there has been a decrease in the area in that taluka under kharif crops) and an increase in the unsettled talukas would produce the results referred to by Mr. Whiting. The talukas forming the southern portion of the Hyderabad District are now being surveyed and settlement rates will very shortly be introduced when the present state of things will cease and probably an increased revenue be obtained.

4. The list given by Mr. Whiting in his 7th paragraph of talukas into which a settlement has not yet been introduced is inaccurate. He has mixed up talukas which have never been settled with talukas into which a *revised* settlement has not yet been introduced, and in his 8th paragraph he seems to have confounded settlement operations with surveys.

5. The table given in paragraph 9 shows the net canal revenue for each canal division for 1884-85 and the five preceding years, and as pointed out by Mr. Whiting the results are most satisfactory.

6. In his 11th and 12th paragraphs the Acting Superintending Engineer refers to the hakaba outstanding. There is, as he shows, a very large sum due from Khelat cultivators, although the Political Agent, Colonel Reynolds, has more than once had his attention called to the subject. It is clear that more pressure should be brought to bear on the cultivators beyond the frontier. Why this is not done there is no way of knowing, as the matter is in no way within the control of the Sind authorities. There is no reason, so far as the Commissioner is aware, why they cultivators beyond the frontier should pay less

regularly than those in the Frontier District as the cultivating classes are the same. With regard to the hakaba due within Sind the Acting Superintending Engineer has apparently overlooked the fact that the greater part of the so called outstanding balance was not due till after the close of the financial year. The figures given by him show collections down to the end of March only, while the revenue instalments are due after that date. The last kharif instalment falls due on April 1st and the rabi instalments on 15th May, 15th June, and 15th July. From the figures obtained for the Commissioner's Revenue Report for 1884-85 he finds that the balance of hakaba due from Sind districts at the close of the year was as follows :—

	R	a.	p.
Upper Sind Frontier	77	2	0
Shikárpur	1,751	4	0
Hyderabad	4,030	10	0
Karáchi	356	3	0
Thar and Párkar			
Total	R6,215	3	0

6. As the last instalment fell due only 15 days before the year this result is satisfactory.

7. The figures given by Mr. Whiting at the close of his 12th paragraph regarding the Hyderabad District certainly seem to point to a mistake somewhere, and the Collector will be asked to offer an explanation.

8. The remissions for the year are considerable (R1,12,048), but it will be seen that of this amount R87,976 are due on lands on the Ghár Canal and in Hyderabad. The remissions on the former were chiefly due to breaches and floods, to a great extent the result of heavy rain in the mountains, and all were absolutely necessary. As usual they were granted after consulting the Executive Engineer in charge of the canal. Those in Hyderabad or at least the greater part of them might be termed nominal remissions, being assessment due on lands left for years uncultivated by the holders who had more land than they could manage, and the holders were called on to pay the assessment in order that the lands might in a formal way be forfeited and again brought on the list of unoccupied lands.

9. It is not necessary to follow the Acting Superintending Engineer through his details regarding different canals. Last year it was the Commissioner's pleasant duty to call attention to the good results to the province from the improvements carried out during recent years by the Irrigation Department and this year's report well supplements these remarks. The year has been an unusually good one and much good work has been done, but a great deal still remains to be effected before even existing works and systems of canals can be considered fairly secure.

H. N. B. ERSKINE,

Commissioner in Sind.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 5th March, 1886.

PRESENT:

The Hon'ble C. P. Ilbert, C.S.I., C.I.E., *presiding*.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A., C.I.E.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.

INDIAN SECURITIES BILL.

The Hon'ble SIR A. COLVIN, by leave, postponed the presentation of the Report of the Select Committee on the Bill to amend the law relating to Government Securities.

CRIMINAL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, the Bombay District Police Act, 1867, the Indian Penal Code and the Prisoners' Act, 1871.

INDIAN TRAMWAYS BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to facilitate the construction and to regulate the working of Tramways.

PETROLEUM BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to amend the Petroleum Act, 1881.

DEO ESTATE BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Bill to apply the Chutia Nagpur Encumbered Estates Act, 1876, to the Deo Estate in the Gaya District be taken into consideration. He said:—"I have nothing to add to what I said last week on the subject, but with reference to the Motion which stands in the Hon'ble Mr. Evans' name, and which I understand is going to be moved on his behalf by the Hon'ble Mr. Goodrich, I may say that the sub-section was introduced because it is the settled procedure by which arrears of rent are recoverable in estates under the Court of Wards. But that provision is not in the Chutia Nagpur Act, and as I have no strong opinion on the subject, I shall not oppose the amendment which stands in the name of the Hon'ble Mr. Evans."

The Motion was put and agreed to.

The Hon'ble MR. GOODRICH, on behalf of the Hon'ble Mr. Evans, moved that sub-section (7) of section 2, regarding the recovery of arrears of rent under the Public Demands Recovery Act, 1880, be omitted. He said :—"The power sought to be taken has not been found necessary for the management of the neighbouring estates under the Chutia Nagpur Act and other estates adjoining. No reason is set forth in the Statement of Objects and Reasons why any difference should be made in the status of the raiyats in these and the neighbouring estates, and in the absence of any statement of reasons for this provision I beg to move that the amendment of which the Hon'ble Mr. Evans gave notice be accepted."

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY then moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Friday, the 12th March, 1886.

S. HARVEY JAMES,
Offg. Secy. to the Govt. of India,
Legislative Department.

FORT WILLIAM;
The 8th March, 1886.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 10th MARCH 1886.

GENERAL REMARKS.—Good rain has fallen throughout the Punjab, and rain in varying quantities is reported generally from the North-Western Provinces and Oudh, from parts of Sind, the Bombay Presidency, Rajputana, the Lower Provinces, and Assam. Very slight rain has also fallen in Hyderabad and Mysore.

Harvesting continues in Madras and general prospects are fair. The crops are generally in good condition in Mysore, and the season promises favourably. In Coorg prospects are good. In Bombay, Berar, Hyderabad, the North-Western Provinces and Oudh and the Central Provinces, the *rabi* harvest is in progress and generally promises well. In the Punjab the prospects of the harvest are considered to be generally good, and in Central India and Rajputana the standing crops are in good or fair condition.

In Bengal the recent rain has been beneficial to the *boro* rice and has facilitated ploughing for the *aus* rice, but has caused some injury to poppy. The *rabi* crops are generally doing well and some of them are being harvested with a good outturn. In Assam preparations for the *aus* crop are in progress.

In British Burma seasonable weather prevails.

The public health continues generally good.

Prices have risen slightly in Coorg and are fluctuating in the Punjab, elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras –(March 10th)		
Bellary		Standing crops generally good, but white *cholum* suffering from disease in parts of two taluks; harvest sugarcane and dry grains, yield about average. Cattle-disease in one village.
Kurnool		Cotton and some standing dry crops slightly injured in parts by December rains and by insects; harvest dry grains, yield below average. Smallpox in three and cattle-disease in two taluks.
Ganjam	·09 (average.)	Slight fever in two, smallpox in five, and cattle-disease in six taluks.
Kistna		Standing crops generally good. Fever in some taluks; deaths from cholera unreported last week 29, this week 16.
Chingleput (Madras)		Standing crops fair, except in parts under breached taluks of 1884. In one taluk wheat withering. Harvest paddy, yield below average. Fever and smallpox in one taluk, and cattle-disease in two.
Coimbatore		Standing crops good; harvest wet and dry grains, outturn about average. Smallpox in one and slight fever in two taluks.
Tanjore		Standing crops generally good; harvest wet and dry grains, outturn below average. Cattle-disease in two taluks.
Madura		Harvest paddy, yield about average. Fever prevalent.
Malabar		Harvest second crop paddy, outturn below average; operations for third crop progressing. Slight smallpox in nine and fever in two taluks; seven deaths from cholera; cattle-disease in one taluk.
Travancore		Smallpox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(Mar. 10th)		
Hyderabad	Rain in 4 talukas; average fall ·52.	*Rabi* crops injured by frost in four, by rats and insects in one, and by *mahilo* insect and worms in one taluka. River at Kotri on 7th 4 feet 8 inches against 5 feet 10 inches on same date last year. Fever in four, smallpox in two, and cattle-disease in five talukas. Wheat 26, *bajri* 37½, *jowari* 40, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	Reaping of *rabi* crops continues. Health good. Wheat 36 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Smallpox continues in Baroda in slight form. Standing crops in good condition. Prices—*bajri* 29, wheat 23, and rice 18 pounds per rupee.
Surat	*Nil*	Cotton and wheat harvest progressing; other standing crops healthy. Fever in Bardoli and Mandi talukas. Average prices—*jowari* 38 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Rabi* reaping and threshing commenced. Public health generally good. Wheat 34½, *bajri* 34¼, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature fell from 2° warm on 3rd to *nil* on 7th and remained *nil* on 8th and 9th. Vapour in air in excess of normal except on 9th, when it was normal. Wind normal except on 7th and 8th, when it was southerly.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Poona	*Nil*	Reaping almost completed in Junnar, Khed, Haveli, and Mavai talukas. Smallpox in Sirur taluka. Prices of *bajri* 35 and *jowari* 43, in Poona *bajri* 43 and *jowari* 37 pounds per rupee.
Ahmednagar	*Nil*	Reaping continues. Public health good. *Bajri* average 46 and *jowari* 60 pounds per rupee.
Sholapur	*Nil*	Cotton crops inferior in the Madha and Karmala talukas. Reaping of *rabi* still in progress. Land in the Malsiras taluka now being prepared for *kharif* sowings. *Jowari* 58 pounds 16 tolas and *bajri* 45 pounds 8 tolas per rupee.
Dharwar	Mugud ·03	Harvesting of wheat and gram nearly completed; exotic cotton blighted in four talukas. Slight fever and cattle-disease in two talukas. Rice 22 to 32 and *jowari* 42 to 64 pounds per rupee.
Kanara	*Nil*	Rice second crop in ear in some parts. Sugarcane and pepper harvest continue above ghàt. Fever and smallpox decreasing; slight cattle-disease in Karwar and Bhatkal. Common rice in Karwar 14, in district average 18½ seers per rupee.
Rajkot	*Nil*	Weather warm. Public health generally good. *Bajri* 32, wheat 33, and *jowari* 44 pounds per rupee.
		General Remarks.—Slight rain in parts of Sind, Dharwar, and Bijapur. Reaping of *rabi* crops almost completed in parts of Poona and Dharwar, in progress in other districts. Fever and cattle-disease in parts of ten and smallpox in parts of six districts.
Bengal—(Mar. 9th)		
Chittagong	*Nil*	Weather hot. Heavy thunderstorm with hail in north of district on 6th. Prospects of crops continue fair. Prices steady. Public health good, notwithstanding a few sporadic cases of cholera.
Dacca	0·54	Pulses being gathered; pressing of sugarcane continues; cultivation for *aus* rice going on; *boro* rice needs more rain. Public health good.
24-Pergunnahs	. . .	Prospects favourable. Harvesting of cold-weather crops nearly finished. Yield estimated at 12 to 14 annas. Common rice 15 to 16 seers per rupee. Cholera abating; public health good.
Khoolna	0·95	Weather cool. Rain good for ploughing. *Boro* paddy doing well. Public health good.
Moorshedabad	Good rain.	Weather seasonable. Prospects of cold-weather crops favourable. Harvesting has begun. Price of rice stationary. Public health good.
Pubna	0·06	Weather cloudy. Winter crops being harvested; prospects good; cutting of hemp completed. Public health good.
Dinagepore	*Nil*	Weather colder again. *Rabi* crops good. Ploughing for next rice crop general. Rice 22 seers per rupee. A few cases of cholera and cattle-disease; public health good.
Rungpore	*Nil*	Weather cloudy. Crops good. Tobacco and wheat being gathered; *aus* being sown. Public health good.
Midnapore	0·15	Weather stormy. *Boro* rice, only crop on ground, fair. Public health normal; cholera still lingers in Contai.
Burdwan	*Nil*	Winter crops nearly all reaped; outturn good. Sugarcane being pressed. Public health fair. Common rice 17 to 22 seers per rupee.
Bhagulpore	*Nil*	Prospects of *rabi* crops very good. Prices rising except on the north bank of the Ganges.
Monghyr	*Nil*	Prospects of poppy continue good; gathering of opium going on.
Purneah	*Nil*	Prospects of crops good. Rice 20 seers per rupee. Public health good.
Darbhanga	*Nil*	Harvesting of *rabi* in progress. Tobacco is being reaped and is expected to yield a good outturn. Prospects of poppy continue favourable. *Mung*, paddy, and indigo sowings still going on. Prices stationary. Public health good.
Mozufferpore	. . .	Gathering of opium progressing. Weather not very favourable.
Sarun	. . .	Prospects of poppy continue good. Gathering of opium proceeding under favourable weather.
Chumparun	*Nil*	Prospects of *rabi* and poppy crops continue good. Prices stationary. Public health good.
Patna	*Nil*	Prospects of *rabi* and poppy crops good. Harvesting of *rabi* and gathering of opium going on. Public health good.
Gya	. . .	Storm and rain last night (8th) has probably done some harm to poppy and *rabi* crops. Weather now clearing up. Sugarcane harvest yielding a good crop.
Shahabad	. . .	Weather cloudy since 8th, a shower of rain also; both unfavourable to poppy.
Hazaribagh	Heavy rain last night (8th).	Weather unsettled and cloudy in latter part of week. Damage to mango, *mahua* and poppy apprehended. Poppy has already suffered from strong west winds. General health good.
Cuttack	1·87	Weather cloudy. *Rabi* crops being gathered with moderate outturn; *dalua* rice doing well. Price of rice stationary. Public health good.
		General Remarks—Rain fell in parts of the Lower Provinces during the week, accompanied with hail in some places. Rain has done good to *boro* rice and has facilitated ploughing for *aus* rice, but it has been unfavourable to poppy. *Rabi* crops are generally doing well; some of them are being harvested with good outturn. Gathering of opium is progressing. Sugarcane is being pressed. Price of rice continues stationary. General health is fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(Mar. 10th)		
Benares (Mar. 8th)	A smart shower of rain on 10th.	Weather seasonable. *Rabi* prospects continue good and harvesting has begun; sugarcane sowings commenced. Supplies ample, but prices have generally risen owing to falling off in imports. The public health is good and there is no cattle-disease.
Gorakhpore („ „)	*Nil*	Tapping of poppy in progress. Reaping of *rabi* commenced; weather cloudy; wind easterly. Prices stationary. Sporadic measles and fever.
Fyzabad („ 9th)	Rain and hail.	No damage ascertained to have ensued. Weather unsettled. Prospects unchanged.
Lucknow („ 8th)	*Nil*	Weather cloudy with east wind; prospects continue favourable; peas being cropped; sugarcane sown; poppy in flower Scarcity and dearness of fodder continue. Supplies ample but prices rising. Health of people good; condition of cattle fair.
Rae Barelli („ „)	Rain on night of 7th about ·3.	Weather mostly cloudy. Condition of *rabi* crops good. Lancing of poppy progressing, consistence reported high. Markets full. Prices rising. General health good.
Partabgarh („ 9th)	*Nil*	Weather cloudy the greater part of the week. Hail to-day but much loss not anticipated. Peas nearly all and barley in great part cut. Wheat reaping commenced. Prospects of fine harvest all round still good.
Banda	. . .	Weather cloudy on 7th and 8th. Slight fall of hail on 8th. *Rabi* being harvested before rain fell. Prices stationery. Public health good. Cattle-disease in one village.
Allahabad („ „)	Some rain towards the close of the week.	Weather changeable, cloudy, and close. Wind variable. Crop prospects continue good. Markets well stocked, but prices rising. Health of men and cattle good.
Cawnpore („ 8th)	Slight rainfall	Weather cloudy at times. Opium collections have begun. Prices generally steady. Condition of crops, people and cattle good.
Ballia („ „)	*Nil*	Weather somewhat cloudy. Harvesting in progress. Markets well supplied. Public health good. No cattle-disease.
Farakhabad („ 9th)	*Nil*	Prospects continue favourable. Weather cloudy; strong east wind. Health good.
Sitapur („ „)	*Nil*	Variable wind during the week. The crops continue promising, but there was a heavy thunderstorm on night of the 8th, with some hail which may have caused damage.
Bareilly („ „)	*Nil*	Crops so far uninjured. Prices steady. Much rain during last two days. Public health good.
Kumaon („ „)	Continuous rain since 6th.	The rain is good for the *rabi* crops. Prices stationary. General health good; cattle-disease continues.
Agra („ 8th)	*Nil*	Weather cloudy. Crops being irrigated. Prospects favourable. Prices steady. Health good.
Jhansi („ „)	Slight rain.	Weather cloudy. *Rabi* and poppy crops in good condition. Prices stationary. Health of people and cattle generally good.
Meerut („ 9th)	Over 1·0 in district	Weather cloudy still; wind easterly. No damage from hail reported. Prospects favourable. Price of wheat risen, of remaining food grains stationary. Health good.
		General Remarks.—Rain has fallen pretty generally over the province, and here and there some hail. *Rabi* crops good; opium collections progressing. Prospects favourable. Prices keeping up. Health of men and cattle good.
Punjab (Mar. 10th)		
Delhi (Mar. 9th)	·51	Health fair. Prices stationary.
Hissar	2·30	Health good. Prices stationary.
Umballa	1·80	Health good. Prices slightly rising. Prospects of current harvest good.
Jullunder	1·60	Health good. Prices stationary. Prospects of current harvest good.
Amritsar	2·80	Health good. Prices stationary. Prospects of current harvest good.
Sialkot	1·0	Health good. Prices stationary. Prospects of current harvest good.
Ferozepore	1·10	Health good. Prices stationary. Prospects of current harvest good.
Lahore	2·30	Health good. Prices slightly risen. Prospects of current harvest fair.
Rawalpindi	·60	Health good. Prices rising. Prospects of current harvest average.
Shahpur	*Nil*	Health good. Prices almost stationary. Prospects of current harvest fair.
Mooltan	·70	Health good. Prices stationary. Prospects of current harvest very favourable.
Dera Ismail Khan	·14	Health good. Prices almost stationary. Prospects of current harvest good.
Peshawar	·30	Prices almost stationary. Prospects of current harvest good.
		General Remarks.—Good rain has fallen in all districts, save Shahpur. Health generally good. Smallpox is prevalent in Peshawar and in the Khushab tehsil of the Shahpur district. Prices of food grains fluctuating. Cattle-disease has appeared at Fattehjang in the Rawal Pindi District. Prospects of current harvest generally good. Rain has damaged crops in the Hissar District.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—		
(Mar. 10th)		
Nagpur	·26	Weather hot. Threshing commenced. Fever and cattle-disease in places. Prices stationary.
Jubbulpore	. . . .	Weather seasonable. *Rabi* harvest commenced; wheat favourable. Health good. Prices easier.
Saugor (Mar. 9th)	. . . .	Prospects and health good. Prices fallen.
Seoni	·05	Weather cloudy. Harvest in progress. Prospects favourable. Prices steady.
Hoshangabad	. . . .	Weather getting hot and occasionally cloudy. *Rabi* harvest commenced. Cattle-disease in places. Prices steady.
Khandwa	. . . .	Weather occasionally cloudy and windy. *Rabi* harvest continues. Health good. Prices steady.
Raipur	Slight rain.	Weather cloudy. Crops damaged in places by hail; *rabi* crops being reaped. Cattle-disease in places. Prices stationary.
Sambalpur (Mar. 6th)	. . . .	Weather clear; days warm; nights cool. Health good. Prices steady.
		General Remarks.—There has been slight rain with hail in the southern and eastern districts, but not much damage is reported and prospects continue favourable. Prices easier in northern districts.
British Burma—		
(Mar. 10th)		
Akyab (Mar. 6th)	. . . .	Public health good; slight cattle-disease in one circle.
Bassein	. . . .	Public health good; cattle-disease disappearing.
Rangoon	. . . .	Public health and health of cattle good.
Amherst (Moulmein)	. . . .	Public health and health of cattle good.
Tavoy	. . . .	Public health and health of cattle good.
Pegu	. . . .	Public health and health of cattle good.
Henzada	. . . .	Public health and health of cattle good.
Prome	. . . .	Public health and health of cattle good.
Toungoo	*Nil*	Public health and health of cattle good.
Thayetmyo	*Nil*	Public health and health of cattle good.
		General Remarks.—Except for slight cholera in the Thonegwa district, public health good everywhere. Cattle-disease slight in the Akyab, Bassein, and Amherst districts.
Assam—(March 10th)		
Gauhati	. . . .	Weather dry. Public health fair; cattle-disease reported from some Mauzas. Gathering of mustard finished. Pressing of sugarcane nearly over. Ploughing for *aus* in progress; rain wanted for *aus* crops.
Sylhet	·19	The rains have been beneficial to crops. Prospects good. Public health same as last week.
Cachar	3·53	Weather warm; no crops on the ground. Common rice 14 seers 9 chattaks per rupee. 9 deaths from cholera from Katigora, 5 from Hailakandi, and 1 from Sadr reported.
Dibrugarh	·38	Weather seasonable. Land being prepared for *ahu dhan*. Sugarcane being pressed. Cattle-disease reported from North Lakhimpore. Public health good.
Mysore and Coorg—		
(Mar. 10th)		
Bangalore	Very slight rain fallen in Bangalore	Crops generally in good condition, except in parts of the Tumkur district where they are reported to have suffered from want of water or blight, and in some places of the Kolar district where they are withering. Prospects favourable. Cattle-disease prevalent in parts; public health fair. No material change in prices.
Mercara	. . . .	Prices of food grains slightly raised. Prospects of season good.
Berar and Hyderabad—		
Amraoti	. . . .	Weather warm. *Rabi* harvesting in progress. Wheat 22, and *jowari* 26 seers per rupee.
Akola	. . . .	*Rabi* crops are being gathered; threshing commenced in places.
Hyderabad	Average rainfall during the week ·02	Harvesting of *rabi* crops continues, *tabi* crops prospering. Fever prevails in some places. Prices—wheat 14¼, course rice 12¼, white *juar* 20¼, yellow *juar* 21¾, and *tur* 15¼ seers per current sicca rupee.
Central India States—		
(Mar. 10th)		
Indore	. . . .	Weather seasonable. Health good, and prices steady.
Morar (Gwalior)	. . . .	Health and prospects good. Weather cloudy.
Sutna	. . . .	Weather cloudy. Health and prospects good.
Neemuch	. . . .	Weather seasonable. A few cases of smallpox in Neemuch town; health otherwise good. Opium being collected.
Goona	. . . .	Health and prospects good. Prices stationary.
Agar	. . . .	Weather cloudy. Health and prospects good.
Sehore	. . . .	Weather clear. Crops and health good.
Nowgong	. . . .	Weather cloudy. Prospects fair. Health good.
Manpur	. . . .	Weather cloudy and cool. Health good. Opium collection finished. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—(Mar. 10th)		
Abu (Mar. 10th)	Rain and slight hail on night of 6th.	Weather now clear and cold.
Marwar („ 5th)	. . . .	Tanks half full. Milder type of smallpox still prevails. Crops doing well. Weather cloudy and getting warm. Prices tending to rise.
Kherwara („ 8th)	. . . .	Crop prospects and health fair. Prices steady. Weather warmer and cloudy.
Meywar („ 6th)	. . . .	Tanks and wells low. Crops damaged by insects to some extent. Health good. Prices stationary. Weather cloudy.
Harowti („ „)	*Nil*	Weather cloudy, injurious to opium and gram. Smallpox in Tonk; elsewhere health good.
Jhallawar („ 5th)	*Nil*	Weather cloudy. Smallpox continues at Jhalrapatan.
Kotah („ 6th)	*Nil*	Crops ripening. Health good. Prices stationary. Weather cloudy.
Ajmere („ 9th)	*Nil*	Weather cloudy. Slight fever and smallpox in some villages. Prices rising.
Dholepur („ 6th)	*Nil*	Prospects good. Tanks and wells dry. Prices steady.
Kerowli („ „)	*Nil*	Tanks and wells decreasing. Health good. Prices rising.

INDIAN SECURITIES BILL.

The Hon'ble SIR A. COLVIN presented the Report of the Select Committee on the Bill to amend the law relating to Government Securities.

CRIMINAL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, the Bombay

District Police Act, 1867, the Indian Penal Code and the Prisoners' Act, 1871, be taken into consideration. He said :—"This Bill was introduced as a Bill to amend the Criminal Procedure Code with respect to certain minor points, and, in the form in which it has left the Select Committee, it still answers to that description. The alterations made in the original clauses of the Bill are few and unimportant. The Committee received numerous suggestions for amending other parts of the Code besides those touched by the Bill, and some of these suggestions appear to be well worthy of the attention of the legislature. But, except in a very few cases, the Committee did not think it would be desirable to recommend their adoption without giving further notice to the public, and it was not, in the opinion of the Committee, worth while to delay the passing of this Bill for the purpose of further publication. Accordingly the new sections only make amendments which appeared to the Committee to be clearly desirable, and not to raise any questions of principle."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

INDIAN TRAMWAYS BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to facilitate the construction and to regulate the working of Tramways be taken into consideration. He said :—"The Report shows that this measure has not undergone any material change in its passage through the Select Committee, and there is only one point to which I need refer in bringing the revised Bill before the Council. The Bill has been criticized for not containing any precise definition of the term 'tramway'. Now we all have a general notion of what is meant by a tramway as distinguished from a railway, but if you were to try the experiment of framing a definition which should include all undertakings to which the present Bill ought to apply, and should exclude all undertakings to which the Indian Railway Act ought to apply, you would find the task one of great difficulty. The great bulk of undertakings lie clearly on one side or the other of the dividing line, but there are certain undertakings about which my friends in the Public Works Department would tell you that it was by no means easy to say whether they should be classed as tramways or as railways. All that can be said is that, when a so-called tramway is constructed exclusively within the limits of a town or populous place, it is pretty certain to belong to the kind of undertakings to which this Bill is intended to apply, but that if it passes beyond those limits it is apt to fall into the category of light railways. Accordingly the Bill provides that, when any part of a proposed tramway is to traverse land which is not included within the limits of a municipality or cantonment, it is not to be constructed without the consent of the Government of India, in order that the Public Works Department may have an opportunity of determining, with reference to the circumstances of each particular case, to which of the two categories the proposed works ought to be treated as belonging."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

PETROLEUM BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Report of the Select Committee on the Bill to amend the Petroleum Act, 1881, be taken into consideration. He said :—"The alterations which the Select Committee have introduced in this Bill since it was previously before the Council are for the most part of a technical nature, and I need not trouble the Council with them in detail. They were considered by the Home Department in communication with Dr. Warden and Professor Pedler, who are the Calcutta experts in this matter, and in the light of a letter from Sir Frederick Abel, which has been made a paper to the Bill. The Home Department accepted the advice of these experts, and the Select Committee have made alterations in the Bill on these strictly

technical points in accordance with that advice. I would refer those interested to the Report of the Select Committee for the reasons of them in detail.

"There were one or two other points upon which we have made alterations which may be considered rather as administrative than belonging to the technical portion of the matter. The first of these is in regard to import and transport. The Select Committee have provided means of dealing with the difficulties likely to arise out of the definitions given in the Bill of 'import' and 'transport'. For instance, oil might be produced in portions of British India, say, in Assam or hereafter in Quetta, and transported into other parts of British India, which may yet need testing and regulating; on the other hand, oil once imported into a part of British India and properly tested, if it should go by sea to another part of British India, will not need a second testing; and the Select Committee thought the best way of dealing with this question was to give the Local Governments power to make rules by which they could treat oil already tested and imported from one part of British India to another as if it were transported, and transported oil as imported in order to meet these special cases, and at the same time to give power to the Local Governments, such as Assam and Burma, where petroleum is produced, to have it properly examined and tested there before being transported into other parts of British India.

"Then the Select Committee made a slight alteration in regard to the sampling of cargoes; they have left that to be done by rules to be passed by the Local Governments, enabling them if necessary to break up the cargo into separate lots for the purpose of testing it where it is supposed that the cargo is not homogeneous. The Committee have also given powers to the Local Governments in special cases to provide for a second or additional testing. The Select Committee have also carried out a suggestion of the Bombay Government with reference to repealing those portions of the Municipal Acts which deal with petroleum so as to avoid the clashing of authority, and they have also introduced a suggestion of that Government to give power to Port Trusts to regulate their own fees for the storage of petroleum.

"The only other point which I consider it necessary to mention is that the Select Committee, instead of making a separate Bill, have consolidated into one Act the Petroleum Law with the alterations which are contained in this Bill."

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

GUARDIANS AND WARDS BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to consolidate and amend the law relating to Guardian and Ward. He said :—"The law of British India on the subject of guardians and wards, so far as it has been reduced to shape by the legislature, is to be found in a single Act applying, approximately, to European British subjects, and in several Acts and fragments of Acts and Regulations applying to persons who are not European British subjects.

"In the territories subject to the jurisdiction of the chartered High Courts the charters of those Courts provide for appointing guardians of European British minors, and, to a certain extent, of other minors also. But some years ago it was found that there was a gap in the law with respect to appointing guardians for European British minors in those parts of the country to which the jurisdiction of the chartered High Courts does not extend, and it was in order to fill that gap that my predecessor Sir A. Hobhouse introduced and passed the European British Minors Act of 1874 (XIII of 1874). This Act applies, speaking roughly, to European British subjects (I say 'speaking roughly,' because the definition of the class to which the Act applies does not correspond quite precisely to the definition of European British subjects in the Criminal

Procedure Code), and extends to those parts of British India which are not within the jurisdiction of the chartered High Courts. It declares the power to appoint a guardian by will or other instrument; it prescribes the procedure to be observed on an application to the Court for the appointment of a guardian; and it lays down a few simple general rules, taken from the English law, with respect to the considerations to be observed in the appointment of guardians by the Court, and to their powers and duties when appointed by the Court or otherwise.

"Thus with respect to European British subjects we may say that the law as to the appointment, powers and duties of guardians is to be found either in the charters of the High Courts and in the principles of English law and rules of procedure observed by those Courts, or in the European British Minors Act of 1874, which to some extent codified those principles and rules.

"The legislation with respect to the guardianship of minors not belonging to this class, that is to say, with respect to Hindus and Muhammadans generally, is, as I have said, to be found in several Acts and fragments of Acts and Regulations. There is an Act of 1858 (XL of 1858) which was passed for the Bengal Presidency and which has been declared to be in force in the Punjab, Oudh, British Burma and elsewhere. There is an Act of 1864 (XX of 1864) which applies to the Bombay Presidency, and which follows with some variations the Bengal Act of 1858. For Madras there does not appear to be any single Act corresponding to the Bengal Act of 1858 and the Bombay Act of 1864, but several scattered provisions relating to guardians are to be found in the Regulations and Acts applying to the Madras Presidency. Then there is a general Act of 1861 (IX of 1861) extending to the whole of British India. And lastly there are the numerous local Acts constituting Courts of Wards for the different provinces and defining their powers and duties.

"The legislative proposals which I am now about to make originated in some correspondence which took place between the Government of India and the Government of Bombay in the year 1881. The Bombay Government directed attention to certain defects in the Act of 1864, and suggested an amendment of the Act in order to remove difficulties which had been experienced in the administration of minors' estates under its provisions. (I may explain that the Act of 1864, though applying only to the Bombay Presidency, is an Act of this Council and therefore can only be amended by this Council.) The Legislative Department was compelled to admit the justice of the Bombay criticisms, but found, on looking into the matter, that several of them were applicable to the Bengal Act also, and that there was room for material improvement both in the form and in the substance of the different Acts relating to guardians in force in different parts of the country. The conclusion to which I myself was disposed to come when I first took up the subject was that the best way of dealing with it would be—

(1) to extend the European British Minors Act to the whole of British India, including the Presidency-towns, and to make it applicable to all the classes to which the Indian Succession Act applies; and

(2) to repeal the Bengal and Bombay Minors Acts and the corresponding Madras enactments and to supersede them by an Act which should extend to the whole of British India.

"Thus there would be two general Acts, one applying to persons who, speaking broadly, are under English law, and the other to persons, like Hindus, Muhammadans and Buddhists, whose family relations are governed by personal laws differing materially from the English law.

"Before, however, bringing any such proposals before the Council I thought it advisable to consult Local Governments about them; and accordingly the Government of India issued a Resolution on the 17th October, 1882, asking for the opinions of Local Governments and Administrations on certain points which were discussed in the Resolution. Some time elapsed before we obtained the replies to these inquiries, and the reply of the Calcutta High Court did not reach us until last year. I mention this, not by any means for

the purpose of complaining of the High Court, because I know how difficult it is for the Judges to find time for considering intricate legislative proposals, but merely for the purpose of explaining the interval which has elapsed since the issue of the Government Resolution of 1882.

"The opinions which have been received in response to this Resolution have been of the greatest possible value, and they have been most carefully studied in the preparation of the measure which I am asking leave to introduce. In some respects they have induced me to modify the conclusions to which I had previously been disposed to come. For instance, whilst desiring to make the general law uniform in the different provinces, I originally thought it would be best to have two Bills, one providing the law for persons under the Indian Succession Act and the other for all other classes of persons. The proposal to make the law uniform in the different provinces has been generally approved; but several high authorities, among whom I may mention Sir C. Turner, the late Chief Justice of Madras, Sir C. Sargent, the Chief Justice of Bombay, Mr. Justice West, our Advocate General, Mr. Paul, and the Advocate General of Madras Mr. O'Sullivan, thought that our original proposals did not go far enough in the direction of uniformity, and that it would be possible and preferable to have one law for all classes of the population. On further consideration I think that they are right. Of course nothing can be further from my intention than to interfere with Hindu family customs or usages or to force Hindu or Muhammadan family law into unnatural conformity with English law. But on looking into the European British Minors Act, which was framed with special reference to the requirements of what may be called English minors, it appeared to me that almost all its simple and general provisions were applicable, or might with a little modification be made applicable, to Hindu and Muhammadan as well as to English guardians; and I was very glad to be told by my friend Mr. Mandlik, who has been looking at the draft Bill from the Hindu point of view, that he agrees with me about this.

"Accordingly what I have done has been to take as my model the European British Minors Act, which is the latest and fullest of the Indian Acts relating to guardians, and to frame on its lines an Act applicable as a whole to all classes of the community, but containing a few provisions limited in their application to particular classes. If the Bill is sent to a Select Committee it will doubtless, whilst before the Committee, undergo careful scrutiny on behalf of the several classes to whom it is to apply; and should it turn out that any of its provisions are unsuitable to any of those classes, it will be easy to modify them or to further limit their application. In the meantime I need only repeat that it is not intended by this measure to make any alteration in Hindu or Muhammadan family law.

"The Bill will supersede and repeal the Acts of 1858 and 1864, the general Act of 1861, the Madras enactments to which I have referred and the European British Minors Act of 1874. But it will not repeal or supersede the enactments relating to the different Courts of Wards. The provisions of those enactments are intimately connected with the administrative machinery of the different provinces; and it would be either impossible, or at least very difficult, to supersede them by a general Act applying to the whole of India. They will be accordingly left outstanding. The Bill will relate only to such guardians as are appointed or recognized by the ordinary Civil Courts, and there will be an express saving for the jurisdiction and authority of the different Courts of Wards.

"There will also be a saving for the powers of the chartered High Courts under their respective charters. The Act will apply to those High Courts in the exercise of their original jurisdiction, and I should myself have preferred to enact, as in section 150 of the Probate and Administration Act, 1881, that when proceedings are taken in the High Court with respect to the appointment or control of a guardian they should be taken under the new Act and not otherwise. We should thus sweep away a good deal of vague and antiquated law, and substitute for it a set of rules which would, I believe, be quite as easy to work, and certainly more easy to ascertain. However, in deference what appear to be the views of the High Courts on this point, the Bill will provide

that the jurisdiction of the High Courts under their charters is to be maintained alongside of their jurisdiction under the Act.

"It will be necessary to supplement this Bill by making certain amendments in that chapter (XXXI) of the Civil Procedure Code which deals with suits by and against minors, but those amendments will be made by a separate measure which is now in course of preparation.

"I may have an opportunity at a later stage of explaining the more important provisions of the Bill which I am asking leave to introduce: at present I am only concerned to show that a case for legislation has been made out."

The Hon'ble RAO SAHEB VISHVANATH NARAYAN MANDLIK said:—"As the Hon'ble Mr. Ilbert has kindly referred to the part I have taken in going over the draft of this Bill, I wish to say that I think, generally speaking, that its provisions are suitable, and that any difficulties which may present themselves may be further considered in the light of further representations. There is, however, one important point, namely, that of united Hindu families and the guardians of minors who form members of such families. I believe that a recent decision of the Privy Council has introduced some difficulty in the matter of guardians so appointed. I have no doubt that that difficult point will be further considered and suitably provided for when the Bill goes to a Select Committee."

The Motion was put and agreed to.

The Council adjourned to Friday, the 19th March, 1886.

S. HARVEY JAMES,
Offg. Secy. to the Govt. of India,
Legislative Department.

FORT WILLIAM;
The 16th March, 1886.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE NORTH-WESTERN PROVINCES FOR 1884-85.

No. 57 I., dated Fort William, the 12th March 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Secretary to the Government of the North-Western Provinces and Oudh, No. 454 I., dated 24th February 1886, and enclosures, being the Revenue Report of Irrigation Works in the North-Western Provinces for 1884-85, and a Resolution by His Honor the Lieutenant-Governor reviewing the report.

OBSERVATIONS.—The very full and complete review of the year's operations contained in the appended Resolution by His Honor the Lieutenant-Governor of the North-Western Provinces leaves but little to be said on the subject.

2. In spite of unusually heavy and late autumn rainfall and timely rain for the spring crops in January 1885, the net profits of the year amounted to Rs. 31,28,769, giving a percentage of 4·45 on Rs. 7,02,83,698, the Capital outlay to the end of the year.

3. From para. 3 of the Local Government's Resolution, it will be seen that, for the first time since the commencement of canal irrigation in the North-Western Provinces in 1830, the total net receipts exceeded the accumulated interest charges, giving a clear surplus of Rs. 4,79,318.

4. Statement III E appended to the Resolution shows that sugarcane, rice, indigo, wheat and barley are the staple crops of the canal irrigated districts, and with the rupee falling in value, the areas of indigo and wheat will probably go on increasing; the former being an excellent preparation for the latter crop, besides being profitable in itself.

5. The very high duty obtained from the water on the Eastern Jumna Canal (310 acres per cubic foot per second) is the more noteworthy, as very nearly 42·5 per cent. of the total area irrigated consisted of sugarcane and rice—crops which usually demand large volumes for their irrigation.

ORDER.—Ordered, that a copy of this Resolution and of the Report and Resolution by the Local Government, be forwarded to the Secretary of State, and to the Finance and Commerce and Revenue and Agricultural Departments of the Government of India for information.

Also, that a copy of this Resolution be forwarded to the Government of the North-Western Provinces and Oudh, Public Works Department, for information and guidance, and to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information, and to the Foreign Department for communication to the Government of Mysore.

The Governments of Madras, Bombay, Bengal, and the Punjab.
The Chief Commissioners, Central Provinces, British Burma, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General, Central India, and Rajputana.

Also, that this Resolution and the Resolution of the Local Government be published in the Supplement to the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Govt. of India.

Appendix to P. W. D. Resolution No. 57 I. of 1886.

No. 403 I., dated 16th February 1886.

RESOLUTION,—By the Govt. of the North-Western Provinces and Oudh, in the P. W. Dept., Irrigation Branch.

READ—

Irrigation Revenue Report of the North-Western Provinces for the year ending 31st March 1885, by the Chief Engineer, Irrigation Works, North-Western Provinces and Oudh.

CAPITAL OUTLAY.

RESOLUTION.—The total outlay on the capital account of canals in the North-Western Provinces and Oudh for and to the end of 1884-85 is shown below :—

	Canal.	Outlay on construction under all heads. During 1884-85.	Outlay on construction under all heads. To end of 1884-85.
		Rs.	Rs.
Productive Public Works	Upper Ganges	1,39,105	2,80,78,400
	Lower Ganges	7,16,903	2,75,35,596
	Agra	1,82,559	88,66,042
	Eastern Jumna	87,512	30,64,799
	Total outlay on Productive Public Works	11,56,379	6,75,44,837
Minor Irrigation Works	Dun	—490	6,36,982
	Rohilkhand and Bijnor	16,198	17,40,005
	Bundelkhand irrigation works	...	82,916
	Ditto ditto survey	263	1,73,187
	Sardah Canal survey	2,416	48,265
	Cawnpore branch extension survey	15,945	57,206
	Total outlay on minor irrigation works	34,332	27,38,861
Famine Protective Works (charged to Imperial funds).	Betwa Canal	8,67,789	33,07,280
	Grand Total	20,58,500	7,35,90,978

The total capital expenditure of Rs. 20,58,500 was Rs. 5,66,285 less than in 1883-84. This decrease was mainly due to the near completion of works on the Betwa Canal, which was opened on the 29th September 1885.

ASSESSMENTS.

2. The gross assessments of the year amounted to Rs. 56,56,877, and the working expenses were Rs. 25,28,108. The net revenue was, therefore, Rs. 31,28,769, or 4·15 per cent. on the capital, excluding expenditure on the Betwa Canal. The interest charge on the capital amounted to Rs. 24,96,705, deducting which amount from the net revenue, the assessments exhibit a clear surplus of Rs. 6,32,064.

INTEREST CHARGES.

3. The total interest charges from the commencement of irrigation operations in the North-Western Provinces in 1830 to the end of 1884-85 amount to Rs. 5,04,65,791, and the total net receipts realized to Rs. 5,09,45,609. Thus for the first time since the introduction of canal irrigation a clear surplus amounting to Rs. 4,79,818 is shown. This result is very satisfactory, especially as the irrigation on the Agra and Lower Ganges Canals is not yet fully developed. The *deficit* in 1883-84 was Rs. 17,59,591 ; in 1882-83, Rs. 53,78,732 ; in 1881-82 Rs. 70,88,317, and in 1880-81, Rs. 84,08,747.

REALIZATIONS.

4. The actual direct income *realized* from all sources during the year was Rs. 72,94,022, leaving a small balance uncollected of only Rs. 1,448. After paying all expenses, including the interest charge, the *net* revenue was Rs. 22,69,209, or an increase over the previous year of Rs. 5,12,067.

WORKING EXPENSES.

5. The working expenses amounted to Rs. 25,28,108, or Rs. 3,00,527 more than in 1883-84. Of this amount, Rs. 1,96,377 are on account of maintenance charges, which were unusually high on account of the extensive damage done to the Kali Nadi aqueduct and other works by the heavy floods of September and October 1884. The increase of Rs. 1,04,150 under establishment is due chiefly to the smaller capital expenditure of the year.

As might be expected in a year of excessive rainfall, the percentage of working expenses to gross revenue, as shown in the statement below, exhibits a marked increase on all canals :—

Statement showing percentage of cost of working expenses to gross revenue.

Year.	Upper Ganges Canal. Revenue.	Upper Ganges Canal. Per cent.	Lower Ganges Canal. Revenue.	Lower Ganges Canal. Per. cent.	Agra Canal. Revenue.	Agra Canal. Per cent.	Eastern Jumna Canal. Revenue.	Eastern Jumna Canal. Per cent.
	Rs.		Rs.		Rs.		Rs.	
1880-81	18,43,798	48·05	13,15,389	33·54	4,84,949	45·35	7,09,091	30·60
1881-82	21,92,884	40·23	15,19,556	35·76	5,38,384	45·25	7,77,297	24·39
1882-83	24,42,835	36·03	15,36,089	43·73	5,82,424	39·38	8,16,577	25·89
1883-84	28,40,019	32·48	16,81,426	41·42	8,13,712	31·00	8,21,088	25·61
1884-85	21,04,551	47·11	14,04,856	62·42	4,51,010	62·35	6,02,811	34·33

Owing to the much smaller area irrigated, the cost of making measurements and preparing demand statements increased from Rs. 1·55 per 100 acres to Rs. 2·22. In 1882-83 this charge was Rs. 1·80.

The cost incurred by the Civil Department in collecting the water-rate was Rs. 1,65,085, or 3·07 per cent. on the gross collections (which were Rs. 4,70,776 in excess of the previous year) against 3·44 per cent. in 1883-84 and 3·45 per cent. in 1882-83.

MILEAGE OF CANALS AND DRAINAGE CUTS.

6. The canals in the North-Western Provinces now consist of 1,394 miles of main lines and 5,972 miles of distributaries, besides 1,552 miles of drainage cuts. The total length, therefore, that has to be maintained is 8,918 miles distributed as follows :—

Canal.	Miles. Main line.	Distributaries.	Drainage cuts.	Total.
Upper Ganges	445	2,570	928	3,943
Lower Ganges	566	1,957	278	2,801
Agra	140	482	36	658
Eastern Jumna	130	647	303	1,080
Rohilkhand	94	235	...	329
Bijnor	19	14	...	33
Dun	...	67	7	74
Total	1,394	5,972	1,552	8,918

There has been an increase during the year of 166 miles of distributaries and 76 miles of drainage cuts, or a total length of 242 miles. During the last three years 35 miles of main canal (Lower Ganges), 535 miles of distributaries, and 179 miles of drainage cuts, or a total length of 749 miles, have been opened.

Irrigated Area.

7. The following table gives the areas of "kharif and rabi" crops for 1884-85 and the previous five years :—

Year.	Kharif.	Rabi.	Total acres.	Percentage.	
	April to September.	October to March.		Kharif.	Rabi.
	Acres.	Acres.			
1879-80	557,486	842,747	1,400,105	39·81	60·19
1880-81	700,587	1,032,109	1,732,696	40·43	59·57
1881-82	706,025	1,209,924	1,915,949	36·85	63·15
1882-83	740,390	1,233,785	1,974,175	37·50	62·50
1883-84	825,747	1,471,927	2,297,674	35·94	64·06
1884-85	773,603	843,701	1,617,304	47·83	52·16

During the "kharif" season the rainfall was much in excess of the normal; and in consequence the area irrigated, as compared with 1883-84, when the largest area on record was irrigated, shows a decrease of 52,129 acres, or 6·3 per cent; it is still, however, considerably in excess of that obtained in any year prior to 1883-84. Owing to the late date on which the rainy season terminated and to timely and general rainfall in January, the demand for canal water during "the rabi" season was unusually light. Temporary repairs to the Kali Nadi aqueduct were completed by December and full supply could have been given; but the prevalence of cloud and damp easterly winds during the three winter months, and the consequent threatening of rust most materially checked the demand for irrigation. The area obtained, therefore, has decreased by 628,240 acres, or 42·75 per cent., and is less than that recorded in any year since 1879-80. The total area irrigated during both seasons amounts to 1,617,304 acres. The proportion of "flow" irrigation, *viz.*, 76·8 per cent., is steadily on the increase. This, in a great measure, is due to the improvements to distributaries which have been carried out in recent years.

Double-cropped Area.

8. The double-cropped area has decreased by 143,707 acres, and the percentage as, compared with the previous year has fallen from 19·2 to 18·37. The Lower Ganges and Dun Canals show an increase, but on all the other canals there is a marked decrease.

Principal Crops.

9. The subjoined statement compares the acreage of the principal crops irrigated during the last six years :—

Crop.		1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.
		Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Kharif	Sugarcane .	165,661	135,493	165,019	198,322	155,147	153,652
	Rice . .	75,903	138,224	107,963	104,046	111,512	92,687
	Indigo . .	185,001	195,001	319,627	316,145	294,129	392,302
	Cotton . .	57,471	63,574	64,161	52,493	93,545	66,791
Rabi . .	Wheat . .	482,703	545,651	727,428	728,385	824,982	512,324
	Barley . .	210,959	262,139	261,688	266,651	286,073	108,267
	Gram . .	18,938	34,511	49,851	48,100	61,123	16,954
	Poppy . .	14,574	17,230	17,149	16,233	16,370	10,762

The area under sugarcane was nearly the same as in 1883-84. Rice shows a decrease of 13,756 acres, owing to the nature of the season. Indigo, however, which steadily declined from 1881 to 1883, suddenly increased by 96,873 acres. This increase was partly due to the extension of irrigation caused by the recently opened distributaries and partly to new factories having been started. The crop promised to be an excellent one, but, unfortunately, the heavy rain and floods of the latter part of the monsoon caused serious loss both to cultivators and manufacturers.

As stated above, the rabi season was most unfavourable for canal irrigation. It was the reverse of the previous year, when the monsoon broke up early, and there was practically no cold-weather rain. Compared, therefore, with 1883-84 there is a marked decrease under all crops; but compared with 1879-80, a year of equal area and of similar conditions, there is an increase under wheat, only one-half the acreage under barley, and a decrease under pulses and opium. Wheat forms 60 per cent. of the whole area as against 56 per cent. in the previous year and 57 per cent. in 1879-80.

Villages and Outlets.

10. During the year 8,227 villages were watered from 35,141 outlets in the distributaries of the Upper and Lower Ganges, the Agra, and Eastern Jumna Canals, showing a decrease of 857 villages and 1,697 outlets.

Value of Crops.

11. The total value of the crops raised with canal water was Rs. 4,49,52,406 The crop values as derived from data supplied by the Agricultural Department and the average incidence of the occupiers' rate for the last three years is compared below :—

Year.	Acres irrigated.	Value of crop.	Occupiers' rate.	Value of crop per acre.	Occupiers' rate per acre.	Percentage on value of crop.
		Rs.	Rs.	Rs.	Rs.	
1882-83 . .	1,974,175	6,42,61,520	48,98,113	32·55	2·48	7·62
1883-84 . .	2,297,674	6,41,44,211	54,05,911	27·91	2·35	8·42
1884-85 . .	1,617,304	4,49,52,406	40,03,058	27·80	2·47	8·85

Rainfall.

12. Over nearly the whole tract in which there is canal irrigation the rainfall was much in excess of the normal; in some parts, in fact, it was nearly double the average of the preceding ten years. The most marked feature of the year was the excessive fall between the 24th September and 2nd October. At many stations during this period the recorded fall varied from 10 to 19 inches, whilst at others it was between 6 and 10 inches. On the 30th September and 1st October numerous falls, varying from 6 to 10 inches in the 24 hours, were registered. All streams and drainage lines were in extraordinarily high flood, and great damage was done to standing crops and also to the banks of the different canal channels and distributaries. The only canal masonry work injured was the Lower Ganges Canal aqueduct over the Káli Nadi at Nadrai, which was partially carried away on the morning of the 2nd October.

River Supplies.

13. Except for about six weeks at the commencement of the year, the supplies in the Ganges and Jumna were more than sufficient to meet all irrigational demands.

Duty of water on the principal Canals.

14. The areas irrigated by, and the value of each cubic foot of water entering the canal heads are detailed in the accompanying table :—

Canal.	Area irrigated per cubic foot of water.					Value of each cubic foot of water at occupiers' rate.				
	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.
	Acres.	Acres.	Acres.	Acres.	Acres.	Rs.	Rs.	Rs.	Rs.	Rs.
Upper Ganges .	173	213	232	264	213	436	550	602	644	542
Lower Ganges .	203	168	180	187	167	424	371	407	415	375
Agra . . .	135	148	155	262	165	367	415	451	674	418
Eastern Jumna .	233	228	243	290	310	664	668	717	786	885

A good result was obtained on the Eastern Jumna Canal, where irrigation has long been firmly established; and, considering the nature of the seasons, the returns shown by the other canals may be deemed fairly satisfactory.

Maintenance charges per acre.

15. The maintenance charges per acre irrigated are given below :—

Canal.	Rupees.				
	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.
Upper Ganges . . .	1·33	1·14	1·03	·91	1·45
Lower Ganges . . .	·75	·86	1·11	1·06	1·64
Agra	1·56	1·60	1·47	1·02	2·20
Eastern Jumna . . .	·92	·74	·83	·76	1·24

As might be expected in a year of heavy flood and great damage, the charges on all canals for repairs and maintenance are much above the average.

Navigation Operations.

16. The result of the year's operations under navigation are shown below :—

Canal.	1884-85.			1883-84.			1882-83.		
	Gross revenue.	Working expenses.	Deficit.	Gross Revenue.	Working expenses.	Deficit.	Gross Revenue.	Working Expenses.	Deficit.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Upper and Lower Ganges Canal	18,698	30,845	12,147	27,068	29,714	2,646	23,835	30,192	6,357
Agra Canal . . .	5,783	6,293	510	6,593	6,870	277	1,186	7,186	3,000
Total .	24,481	37,138	12,657	33,661	36,584	2,923	25,021	37,678	9,657

The long closures of three and four months respectively on the Upper and Lower Ganges Canal resulted in a net loss of Rs. 12,147.

It was hoped the change from intermittent to continuous running in the Cawnpore branch would have taken place in 1885; unfortunately, however, the destruction of the Kâli Nadi aqueduct will delay this until such time as the new aqueduct is completed.

The Agra Canal was closed for upwards of two months during the year, and the deficit under navigation operations amounted to Rs. 510. The navigation channel between the Agra and Western Jumna Canals has recently been opened. This will enable boats to reach Delhi without difficulty, and one of the obstacles to the full development of traffic on the Agra Canal has thus been removed.

Minor Receipts.

17. The actual receipts realized from minor sources of income are exhibited in the subjoined table :—

	1881-82.	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.	Rs.
Plantations	1,10,597	1,55,092	1,47,040	1,19,502
Water-power	57,860	68,394	72,765	60,668
Miscellaneous	37,815	44,314	54,263	50,917

The falling off under water-power is due to the protracted closures on all canals.

Spring-level Observations.

18. Spring-level observations continue to be steadily and carefully recorded. It will be some years before sufficient data are collected on which to base reliable conclusions; one thing, however, appears to be clearly established, and that is the very marked influence a season of heavy rainfall has in raising the saturation level, compared with the effect of canal irrigation even in the most highly-irrigated tracts.

Drainage Works.

19. The drainage works were very severely tried by the excessively heavy rainfall of the year, and on the whole have acted most efficiently. It was, of course, impossible to run off at once a volume of water for which the drains were never intended, and for some days considerable tracts af country were vast lakes; but it is satisfactory to note that the whole of the water was passed off, and nearly the whole of the flooded land was fit for the rabi sowings by the end of October—a result which would have been quite impossible whithout the drains.

On the Upper Ganges Canal, the Choiya Nadi improvement was completed, and its effect was most marked. The cultivators were unanimous in declaring that but for the improvements carried out a rabi crop could not have been sown in the valley in such a year.

On the Lower Ganges Canal, notwithstanding the heavy rainfall, the condition of the valley of the Ganges has again improved, and a very large area which was formerly swamp has been brought under cultivation.

Profits of Productive Works.

20. The following statement summarizes and compares the net profits and the percentage on capital on the four productive works :—

Year.	Upper Ganges.		Lower Ganges.		Agra.		Eastern Jumna Canal.	
	Net profit.	Per cent. on capital.	Net profit.	Per cent. on capital.	Net profit.	Per cent. on capital.	Net profit.	Per cent. on capital.
	Rs.		Rs.		Rs.		Rs.	
1880-81 .	14,00,777	5·14	10,87,124	4·58	2,65,001	3·15	7,13,640	25·56
1881-82 .	17,53,670	6·40	11,83,905	4·75	2,94,749	3·48	8,09,213	28·46
1882-83 .	20,05,684	7·24	10,72,107	4·14	3,53,028	4·15	8,26,665	28·42
1883-84 .	23,60,388	8·45	11,92,654	4·45	5,61,425	6·47	8,32,307	27·96
1884-85 .	15,55,938	5·54	7,35,746	2·67	1,69,814	1·91	6,17,349	20·14

Minor Irrigation Works.

21. Of the minor irrigation works, the Rohilkhand Canals show a profit of Rs. 16,213, or about one per cent. on the capital outlay.

On the Bijnor Canals the net profits were Rs. 11,717, or Rs. 1,299 more than in the previous year.

On the Dun Canals the net income was Rs. 15,951, or a return of 5·56 per cent. on the capital.

On the Bundelkhand Lakes there was a loss of Rs. 5,260, owing to the large expenditure that had to be incurred in repairing the extensive breaches in embankments caused by the excessive rainfall.

Net Profits and Percentage on Total Capital Outlay.

22. The net profits and the percentage on the total capital outlay derived in 1884-85 from all the canals in the North-Western Provinces is compared with the results of the previous ten years in the following statement :—

Year.	Capital at end of each year.	Net profits.	Percentage on capital.
	Rs.		
1874-75	3,83,63,164	24,89,547	6·49
1875-76	3,98,56,800	24,26,186	6·08
1876-77	4,20,12,822	25,76,406	6·13
1877-78	4,34,66,488	31,55,858	7·26
1878-79	4,46,21,616	38,28,437	8·57
1879-80	4,60,35,380	28,06,249	6·09
1880-81	6,45,61,716	35,38,941	5·48
1881-82	6,62,06,214	40,82,750	6·17
1882-83	6,76,33,960	43,01,052	6·36
1883-84	6,90,92,987	50,69,145	7·33
1884-85	7,02,83,698	31,28,769	4·45

It will be seen that, notwithstanding the adverse circumstances under which irrigation operations in the province were carried on during the year under review, the final result was a net profit of upwards of 31¼ lakhs of rupees, or nearly 4½ per cent. on the total capital outlay of about 703 lakhs.

Delay in submission of Report.

23. The Irrigation Revenue Report, which, as usual, shows all demands, collections, &c., up to the end of the Revenue year, *viz.*, 30th September 1885, was only completed on 21st January 1886, or two months after the proper date. This delay was chiefly occasioned by the very numerous tables and returns having been originally prepared according to the old forms before the receipt of the orders of the Government of India, which necessitated a recasting of almost all the statistics and the tabulating of new forms of returns.

The Irrigation Administration Report, which deals chiefly with works up to the end of the financial year and with approximations of income, &c., up to the end of the Revenue year, was submitted for incorporation in the general Provincial Administration Report on 10th October 1885.

Order.—Ordered, that the above Resolution be submitted to the Government of India, and that it be published in the *North-Western Provinces and Oudh Gazette*.

Ordered also, that it be circulated to other Governments and Departments as usual.

By order, &c.,
J. G. FORBES, Col., R. E.,
Joint Secretary.

III

Statement of quantity and value of crops irrigated in

E.

the North-Western Provinces during the year 1884-85.

N.B.—As regards the figures in column "*Total receipts from 1st April to date*," audited figures have been availed of as far as possible.

(*a*) Including Rewari-Ferozepore State Railway.
(*b*) Total receipts from 12th October 1884 to 21st February 1885.
(*c*) Total receipts from 4th January to 21st February 1885.
(*d*) Return not received.
(*e*) Total receipts from 1st April 1885 to 13th February 1886.
(*f*) Total receipts from 2nd April 1884 to 21st February 1885.
(*g*) Total receipts from 1st January to 21st February 1885.
(*h*) Total receipts from 1st November 1884 to 21st February 1885.

FORT WILLIAM,
The 18th March 1886.

FRED. FIREBRACE, *Major, R.E.,*
Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 17th MARCH 1886.

General Remarks.—Slight rain has fallen generally throughout Madras, and the North-Western Provinces and Oudh, and in parts of the Punjab and the Lower Provinces. Showers are also reported from Bangalore and from places in Central India and Rajputana.

In Madras and Mysore the standing crops are generally in good condition and prospects are fair. In Coorg prospects are good.

The *rabi* harvest has been almost completed in parts of the Bombay Presidency and is in progess elsewhere. *Kharif* preparations have commenced. In Berar and Hyderabad the *rabi* crops are being cut. In Rajputana and Central India agricultural prospects are generally good.

The *rabi* harvest is in general progress in the Central Provinces, and in the North-Western Provinces and Oudh. Prospects in these Provinces and in the Punjab are generally excellent.

In Bengal the standing crops have been much benefited by the recent rain, though some damage has been done to poppy and to mango and *mahwa* blossoms. The yield of the *rabi* harvest is good and that of opium fair. Agricultural prospects continue good in Assam.

Seasonable weather prevails in British Burma.

The public health continues generally good.

Prices are rising in the North-Western Provinces and Oudh, are fluctuating in the Punjab and Mysore, and are falling in Coorg.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(March 17th)		
Bellary		Standing crops generally good; but white *cholum* suffering from disease in parts of two taluks. Cotton blossoms and pods injured by wind in parts of one taluk. Harvest sugarcane and dry grains, yield about average. Cattle-disease in one town.
Kurnool	·24 (average)	Cotton and some standing dry crops slightly injured in parts by December rains and by insects. Harvest dry grains, yield below average. Smallpox in three and cattle-disease in two taluks.
Ganjam	·98	Slight fever in two, smallpox in four, and cattle-disease in six taluks. 852 labourers employed on Chilka canal.
Kistna	·96	Standing crops generally good. Fever in some taluks; cattle-disease in one village. Deaths from cholera unreported last week 65, this week 30.
Chingleput (Madras)	·72 (average)	Standing crops fair, except in parts under breached tanks of 1884 in one taluk where they are withering. Harvest paddy, yield below average. Fever in one and cattle-disease in three taluks.
Coimbatore	·12 (average)	Standing crops good. Harvest wet and dry grains, outturn about average. Smallpox in one village, fever in two, and cattle-disease in two taluks.
Tanjore	·28 (average)	Standing crops generally good. Harvest wet and dry grains, outturn below average.
Madura	·73 (average)	Harvest paddy, yield about average. Fever prevalent.
Malabar		Harvest second crop paddy, outturn below average; third crop cultivation progressing. Slight small pox in seven taluks, fever in one taluk, and cattle-disease in another. Five deaths from cholera.
Travancore		Smallpox and fever in parts.
		General Remarks.—General prospects fair.
Bombay—(Mar. 17th)		
Hyderabad	Rain in Dero Mohbat taluka on 6th ·41.	*Rabi* crop injured by frost in six, by *mahis* insect and worms in two, by *rati* insect in one, and by hail in one taluka. River at Kotri on 15th 4 feet 8 inches against 5 feet 7 inches on same date last year. Fever in seven, smallpox in one, cattle-disease in seven talukas. Wheat 20, *bajri* 38, *jowari* 40, white rice 18, and red rice 28 pounds per rupee.

Nasik	*Nil*	*Rabi* reaping and threshing in progress. Public health good. Wheat 34¾, *bajri* 34¼, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature rose from 1° cool on 10th to 7° warm on 14th, and then fell to 3° warm by the 16th. Vapour in air normal from 10th to 13th; afterwards excessive. Wind normal on 10th. Abnormal wind varied from north-east on 11th to south on 16th.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Poona	*Nil*	Reaping almost completed. Smallpox in Tirur taluka. *Bajri* 30 and *jowari* 44, in Poona *bajri* 35 and *jowari* 37 pounds per rupee.
Ahmednagar	*Nil*	Reaping continues. Public health good. *Bajri* average 45 and *jowari* 68 pounds per rupee.
Sholapur	*Nil*	Land in Malsiras taluka being prepared for *kharif* sowing. Reaping of *rabi* still in progress. *Jowari* 58 pounds 1 tola and *bajri* 45 pounds 30 tolas per rupee.
Dharwar	*Nil*	Harvesting of wheat and gram nearly completed. Reaping of late *jowari* and cotton-picking commenced. Slight fever in one and cattle-disease in two talukas. Scarcity of drinking water in Kod taluka. Rice 22 to 32 and *jowari* 45 to 64 pounds per rupee.
Rajkot	*Nil*	Weather warm. General health good. *Bajri* 30, wheat 33, and *jowari* 44 pounds per rupee. *General Remarks.* Reaping of *rabi* crops almost completed in Poona, Satara, Dharwar, and Bijapur; in progress in other districts. Preparations for sowing of *kharif* crops commenced in one taluka of Sholapur and two of Khandesh. Scarcity of drinking water in one taluka of Dharwar. Fever and cattle-disease in parts of nine and smallpox in parts of six districts.
Bengal—**(Mar. 16th)**		
Chittagong	*Nil*	Weather hot by day with northerly breeze, cool at night. Rain much wanted for winter crops. Prices steady. Public health good.
Dacca	*Nil*	Harvesting of winter crops going on. Prospects of *boro* paddy good. Lands being prepared for *aus*, rice and jute. Sporadic cholera; public health otherwise good.
24-Pergunnahs	. . .	Rainfall return not received. Harvesting of winter crops still continues, yield estimated at about 12 annas. Common rice 15 to 16 seers per rupee. Public health generally good.
Khoolna	*Nil*	Days hot, nights cool. Ploughing going on; *boro* paddy doing well. Public health good.
Moorshedabad	. . . .	Weather seasonable. Cold-weather crops being gathered, outturn tolerably good. Ploughing for next rice crop has commenced. Public health good.
Pubna	*Nil*	Weather fine. Winter crops being harvested; prospects fair. Preparations being made for sowing. Public health good.
Dinagepore	0·29	Fair weather. Slight rain on 10th. *Rabi* crops being harvested. Land being ploughed. Rice averages 21 seers per rupee. A few cases of cattle-disease reported.
Rungpore	0·04	Prospects of crops favourable. Wheat and tobacco being gathered; *aus* rice being sown. Public health good.
Midnapore	0·50	*Boro* rice promises well. Public health fair, but sporadic cholera still reported.
Burdwan	Rain throughout district ·35.	Harvesting of winter crops nearly completed, outturn good. Common rice 19 to 21 seers per rupee. Public health fair.
Bhagulpore	Rain with thunderstorm on 9th 0·09.	*Rabi* harvest has commenced with prospect of good outturn. Rice 17 seers to chittacks per rupee. Public health good.
Monghyr	. . .	Prospects of poppy continue good.
Purneah	0·49	Crops good. Coarse rice 20 seers per rupee. Public health good.
Darbhanga	*Nil*	*Rabi* being harvested with good outturn; mango trees in blossom; gathering of opium going on, prospects favourable. Prices stationary. Public health good.
Mozufferpore	. . .	Twelve annas of opium crop harvested. Weather favourable.
Sarun	. . .	Prospects of poppy excellent, notwithstanding the slight injury caused by rain on 10th. Lancing more than one-fifth finished. Weather favourable.
Chumparun	0·43	Prospects of *rabi* and poppy crops continue good. Slight rainfall did some damage to poppy by washing off juice from tapped heads. Prices stationary. Public health good.
Patna	0·22	Harvesting of *rabi* crops and gathering of opium in progress; good outturn expected. Public health good.
Gya	1·33	*Rabi* and poppy crops in good condition, outturn will be above average. Price stationary. Public health fair.
Shahabad	. . .	Rain on night of 8th washed away opium on capsules. Weather since favourable.
Hazaribagh	1·70	Weather seasonable, getting warm. Some injury to mango, *mahua*, and poppy from hail and rain reported from parts of district. General health good.
Cuttack	3·30	Weather seasonable. Spring crops doing well. Price of rice unchanged. Public health good. *General Remarks.*—Rain fell in most parts of the Lower Provinces during the week, accompanied with hail in places; rain has been very beneficial to *boro* rice and to cultivation for *aus* rice, but has done some damage to poppy capsules and to mango and *mahua* blossoms. Harvesting of *rabi* crops going on with a good outturn; opium is being gathered, general outturn is expected to be fair. Price of rice remains stationary. Public health continues generally good.
N.-W. Provinces & Oudh—**(Mar. 17th)**		
Benares (Mar. 16th)	Average rainfall during week ·70.	Weather seasonable. Crops doing well. Hail fell in a few places but only did slight damage. Sugarcanes plentiful, and prices of most food-grains have slightly fallen during the week. The public health is good, and there is no cattle-disease.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Gorakhpore („ 15th)	Rain 7·60 throughout district during week.	Poppy outturn fair. Harvest commenced. Prices stationary. Health fair.
Fyzabad („ 16th)	*Nil*	Slight injury from hail. Good outturn of *rabi* and poppy anticipated. Weather settled. Health of men and cattle good.
Lucknow („ 15th)	Average rainfall ·70.	A severe hurricane on the 9th attended with slight fall of hail in some villages, but much loss is not anticipated. Opium collection commenced. Supplies ample, but prices gradually rising. Dearness of fodder continues. Health of people good; condition of cattle fair.
Rae Barelli („ „)	*Nil*	Weather clear again. Harvesting of crops commenced. Opium collection progressing, but hail has caused some damage in a few villages. Prices stationary. Markets full. General health good.
Partabgarh („ 16th)	From ·30 to ·80 of rain, also hail.	Poppy slightly damaged; yield of opium as yet good. Barley and wheat already in the market. *Arhar* and gram nearly ripe. Prices fluctuating.
Allahabad („ „)	Rain averaging ·90 all over the district fell during the week accompanied on the 9th instant with hail in places.	Weather seasonable. Heat increasing. Some little damage caused to *rabi* and poppy crops by the hailstorms of the 9th, otherwise crop prospects continue good. Markets well supplied. Prices still show an upward tendency. Health generally good.
Cawnpore („ 15th)	Rainfall in seven tehsils from ·20 to ·60.	Weather getting hot. Some damage to crops from hail is reported from two tehsils. Harvest operations in progress. Prices have slightly risen. Opium collections have begun. Condition of people and cattle good.
Banda („ 16th)	Slight falls of rain and hail all over district on 9th.	Some injury from hail reported from two tehsils. Prices stationary. Public health good; cattle-disease in two villages.
Ballia („ 15th)	Slight rain on the 9th.	Weather seasonable. Harvesting steadily in progress. Poppy being tapped. Supplies ample. General health good; no cattle-disease.
Farakhabad („ 16th)	Rainfall throughout the district on 9th, about ·50 in all tehsils except Kaimganj where 2·90 fell.	Crops damaged by hail in many villages of Kaimganj tehsil and in a few in Tirwa and Chibramau.
Sitapur („ „)	Heavy showers and some hail fell on the 8th and 9th.	No harm was done except in Pargana Chandra of tehsil Misrik where the damage is estimated in some 30 villages as at 15½ out of 16 annas. Elsewhere prospects continue favourable.
Bareilly („ „)	Nearly 2·0 rain and hail last week.	Injury by hail partial and unimportant. Prices have risen. Harvest prospects continue good. Health prevails good.
Kumaon („ „)	*Nil*	Weather fine. Prospect of *rabi* good. *Kharif* operations commenced. Prices stationary. General health good; cattle-disease continues.
Agra („ 15th)	Rain in six parganas, ·10 to ·50 and slight hail in three.	Reaping of *rabi* commenced. Prices rising. Health good.
Jhansi („ „)	Hailstorms in Mau and Garotha.	In Mau crops are reported to have suffered in thirty-seven villages, but no serious injury has been reported from Garotha. Reports are satisfactory from all other parganas. Health of people and cattle good.
Meerut („ 16th)	*Nil*	Weather distinctly hotter; westerly winds. Prospects of *rabi* crops most favourable. Supplies sufficient. Prices showing an upward tendency. Health good. *General Remarks.*—Slight falls of rain accompanied by hail have caused slight injury to crops in some places, otherwise prospects favourable. Prices continue to rise. Health of men and cattle good.

GOVERNMENT OF INDIA.

APPROPRIATION REPORT ON THE ACCOUNTS OF 1884-85.

GENERAL REVIEW.

THE following Summary shows the results which are the subject of this report, and the details of which will be found in the Statements on pages 89 to 102. Throughout the report the figures are pounds (£1=R10) with the last two figures cut off for shortness' sake; thus 149,7 reads one hundred and forty-nine thousand seven hundred pounds:—

Receipts. Budget.	Receipts. Accounts.		Revenue and Expenditure.	Outgoings. Budget.	Outgoings. Accounts.
...	...	A	Interest	4,162,2	4,349,3
50,704,0	51,080,0	B	Principal heads of Revenue .	9,016,6	9,546,1
1,734,7	1,792,1	C	Post Office, Telegraph and Mint.	2,158,4	2,070,6
1,455,6	1,372,4	D	Civil Administration . .	11,426,1	11,634,5

36,342,0	33,864,6		GRAND TOTAL .	36,342,0	33,864,6

2. The general remarks that I have to offer, before proceeding to details, are grouped under two heads, *viz.*, comparison between 1883-84 and 1884-85, and comparison between Budget Estimates and Accounts of 1884-85.

Comparison with the year 1883-84.

3. The comparison in respect of revenues is as follows :—

Revenues.	1883-84.	1884-85.	Difference + or —
Principal Heads of Revenue	52,037,7	51,080,0	—957,7
Post Office, Telegraph and Mint	1,672,8	1,792,1	+119,3
Civil Administration	1,427,7	1,372,4	—55,3
Miscellaneous	1,512,6	1,388,0	—124,6
Productive Public Works	13,240,5	13,147,0	—93,5
Public Works not classed as Productive	879,9	1,037,6	+157,7
Army Services—			
Ordinary Account	952,5	798,7	—153,8
War Account	3,7	...	—3,7
	71,727,4	70,615,8	— 1,111,6

4. The falling off under Principal Heads of Revenue is mainly under Land Revenue (21,832,2 against 22,361,9) owing to the advance collections in 1883-84, as noticed in paragraph 4 of last year's report, and under Opium, (8,816,5 against 9,556,5,) owing to 46,698 chests of Bengal opium having been sold in 1884-85 against 54,400 in the previous year. Provincial Rates, Customs and Forest, also show a decline of 310,2. On the other hand, Salt, Excise and Stamps shew an improvement of 630,1.

5. Larger importations of silver contributed 51,1 more under seignorage duty; Post Office brought in an excess of 28,5 under sale of Postage Stamps, and the recoveries from Railway Companies, postponed from last year, raised the Telegraph Receipts.

6. A falling off in the receipts classed under Law and Justice, and less work performed by Dockyards for other departments, chiefly account for the decrease under Civil Administration.

7. Last year's figures were abnormally high under Miscellaneous, owing to a special adjustment of 130,0 on account of interest on the Bombay Port Trust Loan.

8. The depression of the wheat trade severely affected the Revenue of the East Indian Railway in 1884-85, against 4,999,4 and is the principal cause of the diminished receipts under 4,310,4, Productive Public Works. But this decrease was neutralized, to a large extent, by increased traffic on other lines, and by additional mileage opened during the year.

9. The inclusion, for the first time, of Southern Mahratta Railway Earnings, and the increased traffic on the Punjab Railways, arising from the movement of troops and materials to the North-Western Frontier, chiefly contributed to the increase under Revenue from Public Works not classed as Productive.

10. Army Receipts are worse, mainly owing to reduced sales of Commissariat, Clothing, and Ordnance Stores. Last year's figures, moreover, included certain special items noticed in paragraph 304 of last year's Report.

11. The comparison of the Expenditure side is as follows :—

	1883-84.	1884-85.	Difference + or —
Interest	4,277,4	4,349,3	+71,9
Principal Heads of Revenue	8,482,6	9,546,1	+1,063,5
Post Office, Telegraph and Mint	1,984,0	2,070,6	+86,6
Civil Administration	11,250,0	11,634,5	+384,5
Miscellaneous	3,882,5	3,876,7	—5,8
Famine	1,500,0	1,500,0	...
Productive Public Works	12,032,8	12,371,7	+338,9
Public Works not classed as Productive	6,580,7	6,478,1	—102,6
Army Services—			
Ordinary Account	16,921,7	15,895,3	—1,026,4
War Account	54,1	102,7	+48,6
Exchange	3,838,8	3,229,4	—609,4
	70,804,6	71,054,4	+249,8

12. The increase of 71,9 under *Interest* is caused by the Discount, 184,2, on the 3 millions India 3 per cent. stock issued in England, and if this item is left out of the comparison, the result will be a reduction of the charge in 1884-85 to 112,3 below that of the previous year. The annual transfer of Debt from Ordinary to P. P. Works explains the cause of this decrease.

13. The unusually heavy payments made in 1884-85, *viz.*, 2,827,7 against 1,721,8 in last year, for cultivation and manufacture of Bengal opium, account for the increase of expenditure under *Principal Heads of Revenue.*

14. Under the next head, the large excess is attributed to the erection of additional lines of telegraph, the establishment of additional offices, and the alteration of the line from Koom to Teheran.

15. The largest share of the increase under *Civil Administration* is 258,6 under Political, of which 183,0 is due to the Afghan Delimitation Commission. The other principal increases are 66,9 under Law and Justice, 71,7 under Police, and 54,5 under Educational charges.

16. Interest on Debt for P. P. Works alone accounts for 200,3 of the total increase under *Productive Public Works*, the rest is due to additional outlay on certain State Railways for the repair of damages by floods, and for renewal of Sleepers and Permanent Way.

17. The figures of 1883-84 included large transfers between Productive and Ordinary heads, resulting in a net addition of 48,0 to the charges under *Public Works not classed as Productive.* Omitting this sum from the comparison, the difference is the result chiefly of savings in Military Works expenditure.

18. The figure under *Army*, last year, included a payment to the War Office of 1 million sterling on account of arrears of Non-effective charges. Leaving this out of the comparison, the difference is so small as to need no remark.

19. The reduction in the charge for *Exchange* is due to the short drawings of the year, *viz.*, 13,758,9 against 17,599,8, last year.

Comparison of Accounts with Budget Estimates, 1884-85.

20. The following figures exhibit the differences in the net accounts :—

	Better.	Worse.
A Interest	...	187,1
B Principal Heads of Revenue	...	153,5
C Post Office, Telegraph, and Mint	145,2	...
D Civil Administration	...	291,6
E Miscellaneous	229,0	...
F Famine	250,0	...
G Productive Public Works	...	313,0
H Public Works not classed as Productive	...	269,2
K Army Services	38,1	...
L Exchange	308,7	...
	971,0	1,214,4
Combined Deficit	...	243,4

21. The increase under *Interest* is chiefly due to the discount (184,2) on the issue of 3 millions India 3 per cent. stock in 1884-85, no provision for which was made when the Estimate was framed.

22. Under *Revenue* the receipts are better than estimate by 376,0, but the charges are also in excess by 529,5. The Opium revenue yielded 222,3 more than was expected. This excess was, however, more than counterbalanced by increased expenditure, caused by the unusually large crop collected during the

year. Salt and Excise yielded 250,7 and 209,9, net, more than was anticipated, but Customs fell short by 254,4, net, and a number of smaller variations caused the actuals to fall below the estimate.

23. The improvement under *Post Office, Telegraph, and Mint* is the result of increased mint receipts on silver and copper coinage, and of savings in Telegraph charges.

24. The largest share of the increase under *Civil Administration* occurs under Political, which is 215,8 in excess, and includes the charges for the Afghan Delimitation Commission, the expedition against the Zhob Kakars and the mission to Guada, for which no provision was made in the Estimate.

25. Under *Miscellaneous* the improvement is principally due to larger receipts than were estimated for under "Interest" and "Miscellaneous", and to savings in Territorial and Political Pensions.

26. Under *Famine* provision was made in the Estimate for special expenditure of 250,0 from Provincial funds on the Jhansi-Manickpore Railway, but the amount was not spent.

27. *Productive Public Works* shews a net decrease of 313,0, mainly owing to the collapse of the wheat trade having affected the Railway Revenue of the year, and to additional outlay having been rendered necessary to repair damages by floods, and to renew sleepers and permanent way.

28. The excess expenditure on other *Public Works*, amounting to 269,2 net, is chiefly due to additional outlay on Frontier Railways, and to the adjustment of old advances to the Bengal Iron Works and for the late Exhibition Buildings at Calcutta. This excess would have been larger, had not increased Traffic receipts from the movement of troops and material to the North-Western Frontier, served to counterbalance a portion of the charges.

29. *Army* shews a slightly better result than anticipated.

30. The improvement in *Exchange* is the result of the diminished drawings of the Secretary of State. The Estimate provided 16,500,0 at 19·50 against 13,758,9 actually drawn during the year at 19·30.

31. The Budget estimated for an excess expenditure of 195,2 on the whole Account, but this included an expenditure of 514,5 out of past accumulations of Provincial and Local Balances, thereby making a surplus in the Imperial account of 319,3. The accounts shew that there was a deficit of 149,7 in the Imperial account, and that the Provincial and Local balances were diminished by 288,9 only, instead of by 514,5 as estimated.

32. The following gives, in detail, the differences between accounts and Budget Estimates, as noted above in paragraph 20, the sign + meaning better, and—worse than Estimate :—

	Revenue Side.			Expenditure Side.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Interest	...	...	...	—186,5	—6	—187,1
Principal Heads of Revenue	+126,2	+249,8	+376,0	—474.4	—55,1	—529,5
Post Office, Telegraph, and Mint	+58,5	—1,1	+57,4	+87,8	...	+87,8
Civil Departments	—32,3	—50,9	—83,2	—198,8	—9,6	—208,4
Miscellaneous	+76,3	+55,6	+131,9	+103,4	—6,3	+97,1
Famine	...	...	...	+6,4	+243,6	+250,0
Productive Public Works	—515,7	+31,6	—484,1	+225,1	—54,0	+171,1
Public Works not Productive	+112,3	+7,6	+119,9	—204,0	—185,1	—389,1
Army	—62,5	...	—62,5	+100,6	...	+100,6
Exchange	...	...	...	+308,7	...	+308,7
Total	—237,2	+292,6	+55,4	—231,7	—67,1	—298,8
Total both sides	—468,9	+225,5	—243,4	...	...	...

33. I may add here that this review is based on the accounts and estimates as compiled in the old form, and does not take account of the changes recently introduced. This is necessary as the accounts must follow the arrangement of the estimates, but I shall have the accounts of 1884-85 recast in the new form, in order that they may be used in the examination of future estimates and actuals. The principal changes contemplated in the new form are as follow :—

Interest Receipts will be exhibited under an independent group head; "Army" will be split up into "Effective" and "Non-Effective"; and the technical distinction between Productive and Non-Productive Public Works will be removed. The Public Works heads of account will be arranged under four groups, *viz.*, (1) Railway construction charged against Revenue, (2) Railway Revenue Account, (3) Irrigation, and (4) Buildings and Roads. But the principal change will consist in the method of showing the gain or loss by exchange on the year's transactions, and its effect upon the Revenues and Expenditure of the Government of India. By the new plan, exchange, at the average rate of Council Bills and Telegraphic Transfers sold during the year, will be calculated on all transactions in England. The exchange on Revenue and Expenditure will be taken as additions to the English Revenue and Expenditure of the year, and that on the "Capital outlay on Public Works not charged against Revenue" will go to increase such outlay. Actual cases of gain or loss to the Government, in no way arising from the accounts being prepared at the conventional rate of 2 shillings the rupee, but due to Government undertaking the duty of making remittances on various accounts at various rates for which it does not obtain an exact re-imbursement, will be taken under Miscellaneous Revenue or Expenditure of the year. Exchange on all other transactions will be brought to account under a new debt head, styled "Exchange Adjusting Account." The substitution of this mode of adjustment will affect the surplus or deficit of a year worked out under the old system; and, it has been ascertained that the deficit of 149,7 in 1884-85, shewn at p. 91 of this Report, will, under the new system, be increased to 386,4.

Section A.—INTEREST.

1883-84. Accounts.		Budget	1884-85. Revised.	Accounts
4,277,4	EXPENDITURE	4,162,2	4,404,9	4,349,3

34. During 1884-85 there was no addition to the Debt in India except a sum of 8,5 subscribed to the Cawnpore-Furruckabad Railway debenture loan at 4 per cent., and 5,4 received on sale of Government Stock Notes. In England a loan of 3 millions was raised at 3 per cent., which was taken up at 93·865, and in addition to this operation, it became necessary to issue India Stock for 239,8 at 3½ per cent., and for 248,5 at 3 per cent., with a view to the redemption of obligations connected with the East Indian and Eastern Bengal Railways aggregating 62,7, as well as for discharge of a portion of the 4 per cent. India Debentures (8,006,5) which fell due in August 1884. Of these debentures 5 millions were presented for renewal into 3½ per cent. Stock. The Public Debt of India in this country and in England on 31st March 1885 was 93,183,6 and 69,271,1, respectively against 93,192,6 and 68,108,8 on the corresponding date in the preceding year. The results of 1884-85 may be contrasted as follows with the expectations of the estimates and the corresponding amounts of the past year:—

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	INDIA—			
2,524,8	Debt incurred	2,520,0	8,2	13,9
12,8	Debt discharged	20,0	33,2	20,2
2,512,0	NET IN INDIA .	2,500,0	—25,0	—6,3
	ENGLAND—			
	Debt incurred—			
...	at 4 per cent.	873,7	811,6	811,6
591,0	at 3½ per cent.	...	239,8	239,8
...	at 3 per cent.	6,976,5	3,222,0	3,248,6
591,0	TOTAL INCURRED .	7,780,2	4,273,4	4,300,0
	Debt discharged—			
3,5	at 5 per cent.	...	1,0	4
24,7	at 4½ per cent.	...	31,7	39,6
11,8	at 4 per cent.	8,059,1	3,060,3	3,059,7
40,0	TOTAL DISCHARGED .	8,059,1	3,093,0	3,099,7
+551,0	NET IN ENGLAND .	—278,9	+1,180,4	+1,200,3
+3,063,0	NET IN INDIA AND ENGLAND .	+2,221,1	+1,155,4	+1,194,0*

*The above amounts are exclusive of —40,6, comprising 38,0 charged to Productive Public Works Revenue Account on account of Sinking Funds of East Indian and Eastern Bengal Railways, and 2,6 charged to Deposit Account of Commission for Reduction of Debt.

Interest on Ordinary Debt.

35. In the following figures the charge under this head is analysed in the usual form. As regards India, the full amount of interest has not been drawn, the excess over the previous year being due to interest on the Loan opened in August 1883. The sum of 6,8 entered against discount and miscellaneous consists of 9,6 realised on Government Securities held on Government account, less 2,8, being loss from the transfer of some of these securities from the 4½ into the 4 per cent. Loan. These two operations were not foreseen when the Budget and Revised estimates were compiled. The English payments include 184,2 for discount on the issue of 3,000,0 India 3 per cent. Stock, and 2,6 commission on renewals of India debentures, not anticipated in the budget, and the actual increase in interest is therefore 17,6, which is accounted for by the interest paid on the additional stock issued during the year, less the saving effected by transfer of debt to a lower rate, as mentioned above in paragraph 34.

Section A.—INTEREST—*continued.*

144,5	On Savings Bank Deposits	160,0	159,1	160,2
25,0	On Miscellaneous Accounts	25,5	22,0	25,1
5,1	ENGLAND	5,1	3,1	3,0
457,3	TOTAL .	475,4	477,0	481,7

36. The excess under special loans of 3,5 has arisen from arrear payments connected with the Oudh loans, which also involved a specially large charge in the previous year on account of arrears of pension of Taj Mehal. The increase in Service Funds is due principally to the growing balances of the Bengal Uncovenanted Fund, as shown in the following statement. The saving in England occurs in interest on deposits in Regimental Savings Banks of men returned from India, and is due to claims for arrears being less than was anticipated.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
67,5	Bengal Civil Fund	82,5	83,0	82,5

Section B.—PRINCIPAL HEADS OF REVENUE.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
52,037,7	RECEIPTS	50,704,0	50,631,8	51,080,0

37. The principal differences in this group, between the estimate and accounts of 1884-85, are to be found in Opium, Salt and Excise, which shew an improvement over the forecast of 222,3, 178,3, and 215,0, respectively, and in Customs, where there is a deficiency of 259,6. As regards Opium, it may be noted that against the excess receipt of 222,3 must be set the excess charges amounting to 612,9 noticed in para. 54, the net revenue being 5,850,7 as contrasted with 7,701,8, 7,216,8, 7,805,0, and 8,451,2 realised during the preceding four years; but the balance of opium in stock on 31st March 1885 was 57,484 chests against 37,181 chests held on the corresponding date in the previous year. The excess in the salt revenue is not counteracted by any enhancement of charges, which on the contrary shew reduction as compared with the Budget of 72,4 (see paras. 56-58). The improved revenue in Excise seems to be normal and general, and although attended this year by larger charges aggregating 5,1, a portion of these is nominal, as explained in para. 59, the only real increase being in Madras, where the establishments have been revised and reorganised. The customs revenue in 1884-85 was 1,029,9 against 1,187,3 and 1,296,1 in the two preceding years, but there have been some economies in the charges which have amounted to 136,8, 139,3 and 155,0, respectively.

I.—Land Revenue.

22,896,0	TOTAL LAND REVENUE .	22,396,6	22,068,3	22,298,0

38. The actuals of 1884-85 in *India* include 10,3 on account of revenues assigned by the Khan of Khelat, which were not provided for in the Budget, and entered at 8,8 only in the Revised Estimate. About half of this increase was counterbalanced by the realisations having fallen short of the estimates, chiefly in Ajmere and Coorg. The apparent falling off in *Central Provinces* is due to a portion of the revenue for the year having been collected in advance in 1883-84. The collections in *Burmah* were less than those in the previous year, due chiefly to the small arrears left at the close of 1883-84. As compared with the Budget, the accounts of 1884-85 shew a good result, which may be attributed partly to orders having been issued by the Local Government for the early collection of the revenue, and partly to increased receipts for capitation tax, petroleum wells, &c. This improvement was not maintained under rents, &c., of fisheries, the falling off

Section B.—PRINCIPAL HEADS OF REVENUE—*continued.*

being due to a revision of the terms on which the fisheries were leased, and to the abolition of some fisheries that interfered with the navigation of the larger streams. The improvement in *Assam* is due to increase of population and to new lands being taken up for cultivation, and 1884-85 like 1883-84, was also a good year for revenue realised from elephant mahats. The great decrease in *Bengal* is owing to a sum of 80,0 due by the Burdwan estates not having been realised till the following year, in consequence of the death of the Maharaja. The excess over estimate in the *North-Western Provinces* was caused in some measure by earlier collections, consequent on the favourable winter harvest, but there was a comparatively small revenue in 1883-84, and the deficiency was made good apparently in the following year, when the receipts were over the normal demand of 575 lakhs. In the *Punjab* the excess over estimate occurs under the two heads ordinary and miscellaneous revenue, the former being ascribed to recovery of arrears, chiefly in the Rohtak and Gurgaon districts, and the latter to Patwarees' fees-which were treated as an excluded local fund when the Budget was compiled. In *Madras* large remissions in the revenue demand were rendered necessary by the exceptional character of the season in 1884-85, the failure of the south-west monsoon having been more complete than even in the famine year 1876-77, while the north-east monsoon was very deficient in some of the northern districts, and was accompanied by devastating floods in many of the southern tracts. A revision of the dates of payment in the Nellore district also contributed to reduce the collections; but, on the other hand, there was a large increase in Godaveri and Kistna, due to a favourable season, and also in North Arcot caused by the introduction of the new settlement rates. Moreover, there was exceptional activity in collecting the revenue during the last two months of the preceding year, so that the outstanding balance was 45 lakhs as compared with an average balance of 75 lakhs in the few years preceding the famine. Although *Bombay* shows an apparent improvement in revenue, this is due to an increase of 70,0 in the nominal adjustment of rent of Resumed Police Service Lands; there is a real deficiency of 38,1 in the ordinary revenue as compared with the Budget owing to postponements in Guzerat and reductions in the Southern Maratha country, granted in consequence of unfavourable seasons. The deficiency would have been greater but for the recovery of large arrears in Ahmednagar, and improved collections in some other districts where the new survey rates were introduced. The revenue in 1883-84 included balances of the previous year, which remained outstanding chiefly on account of damage done to crops by locusts, as well as with a credit of 73,8 which was again refunded under the special remissions granted by the Secretary of State. Considerable sums were also obtained from building sites in the Presidency town.

39. As explained in former reports, the land revenue is divided between the Imperial and Provincial Governments in certain proportions, which were fixed in the year 1882 by what is known as the Provincial contracts. Although these proportions, are fixed for a specified period, yet the result accruing from them is susceptible of modification by reason of special adjustments to be made with consent of the two Governments. The most important of these adjustments is the expenditure on construction of Public Works, which Local Governments are permitted to incur out of their surplus revenues. Such expenditure being in the nature of capital outlay appears in the Imperial accounts, the amounts being recovered from the Provincial Government by deduction from its share of the Land Revenue. Next in order are the charges, recurring or otherwise, which are paid as a matter of convenience by the Imperial Government on account of Provincial Government, and *vice versâ*, and which are settled between them through the head of Land Revenue. And, finally, there are similar charges paid by one Provincial Government for another, and adjusted in the same way. I note below these three classes of transactions as they have affected the various Provincial Governments during the year under review, and the result upon the distribution of the Land Revenue.

A.—Capital outlay on Productive Public Works from Provincial Revenues—

Province.	Description of work.	Amount.
Bengal	Railways	—4,9
N.-W. Provinces and Oudh . . .	Ditto	139,2

II.—Opium Revenue.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
6,803,7	Bengal	5,812,5	6,050,3	6,052,0
2,508,5	Bombay	2,558,7	2,556,4	2,537,9
194,1	Excise	192,7	196,6	192,3
50,2	Miscellaneous	30,3	46,7	34,3
9,556,5	Total .	8,594,2	8,850,0	8,816,5

40. The Budget was based, as regards *Bengal*, on a sale of 46,500 chests at ₹1,250 per chest, but the actual sales amounted to 46,698 chests at an average rate of ₹1,296, the figures in the previous year being 54,400 chests at ₹1,250. In *Bombay*, the Exportations fell off in consequence of the Franco-Chinese war, but on the other hand 52,8 were realised on account of Opium hundies outstanding at the close of 1883-84, the corresponding balance on 31st March 1885 being 4,1 only. The sales of Excise Opium, at the time

Section B.—PRINCIPAL HEADS OF REVENUE—*continued.*

when the revised estimate was framed, seemed to justify an increase of the Budget figure, especially in *Assam*, *Bengal*, and *Bombay*, but this expectation was not realised. As regards *Lower Burmah* it is reported that the habit of indulging in opium seems to be disappearing in Sandoway, and to be abating in Kyukpyu. The following figures shew the sales and produce in Bengal and the exports from Bombay.

Year.	Bengal.						Bombay.		
	Chests sold.	Average price.	Produce.	Added to stock. chests.	Balance in stock, March 31st, chests.	Chests.	Rate.	Amount.
1876-77 .	47,240	1,270	6,000,0	68,051	71,315	49,136	600	2,948,2

III.—Salt Revenue.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
1,529,2	Northern India Salt Department . . .	1,566,2	1,566,2	1,600,7
	Sea-borne Salt—			
17,8	Burmah	15,2	23,8	23,1
1,731,6	Bengal	1,802,0	1,880,0	1,918,6
2	Madras	2	2	2
1,3	Bombay	1,6	2,7	6
	Government Salt—			
1,289,8	Madras	1,145,6	1,027,9	1,064,6
33,2	Bombay	38,4	33,7	46,9
	Excise on Local Manufacture—			
3,0	Burmah	2,8	3,2	3,3
88,2	Bengal	78,0	90,0	101,2
91,6	Madras	300,6	323,4	310,6
1,337,8	Bombay	1,354,0	1,377,1	1,413,4
21,7	Miscellaneous	24,3	21,8	24,0
6,145,4	Total .	6,328,9	6,350,0	6,507,2

41. Both the Budget and Revised Estimates provided for a larger revenue than was collected in the previous year, and the results are still better. *Bengal*, which is the largest contributor to this excess, ascribes it to the revival of trade, especially in the last quarter of the year. The import Salt trade is much influenced by the export trade in cereals and seeds, as ships have been bringing Salt out at nominal freights for the sake of the return cargo. The improvement under *Northern Indian* Salt proceeded from the lowering of the price of Sambhur Salt, and the reduction of Railway freight, while large quantities of Kohat Salt were purchased by the Afridies and the independent Afghan tribes. In Lower *Burmah* stocks were low in the beginning of the year, and a brisk demand which set in encouraged importations and stimulated local production, both to meet local demands and for exportation to Upper Burmah. In *Bombay* the excess occurs under the two heads Proceeds of Government Salt and Excise duty on Salt, both being caused by unusually large issues from the Government Salt works at Guzerat for consumption, chiefly in the Central and North-Western Provinces. On the other hand, there was a falling off in the Salt revenue of Portuguese India, and in the exports of Salt to Calcutta from the Uran and Karanja works. In *Madras* the actuals fall short of the estimate under the head of sale of Government Salt, this is due partly to the substitution of excise for monopoly Salt, whereby the gross receipts are diminished, the cost price of the Salt not passing through the Government

Section B.—PRINCIPAL HEADS OF REVENUE—*continued.*

accounts. There was, moreover, no shipment, as in the previous year, of duty-paid Salt to Calcutta, and the increase of sales under the credit system transferred, to the following year, sums which otherwise would have entered the accounts of 1884-85.

IV.—Stamps.

1883-84. Accounts.		Budget.	188-85. Revised.	Accounts.
2,416,8	Court-fees	2,431,5	2,458,6	2,488,1
1,080,5	Other stamp duties	1,086,5	1,104,0	1,103,5
15,9	Miscellaneous	15,0	15,4	15,0
3,513,2	TOTAL	3,533,0	3,578,0	3,606,6

42. The actual receipts by sale of Court Fees Stamps exceeded the original estimate by 56,6, owing to larger sales in all the Provinces except *Madras*, where the actuals were 9,7 below the Budget. This decrease occurred mainly in the districts of Tanjore, Godavari, Tinnevelly and Kistna, and is ascribed by the Madras Government to the heavy losses sustained by the ryots from the disastrous floods of November and December 1884, to the lowering of the scale of process fees, and to the raising of the pecuniary jurisdiction of Village Munsiffs from ten to twenty rupees. The improvements noticed in other Provinces were realized chiefly in *Bengal*, the *North-Western Provinces* and *Bombay*, and are due to greater litigation, and to the new mode of collecting copying-fees by means of these stamps. Under "Other Stamp duties" the principal item is "General Stamps," the revenue from which is 17,0 more than was anticipated in the Budget. *Bengal* and *Madras* chiefly contributed to this increase, which would have been greater, but for the falling off in sales in the North-Western Provinces and Punjab, especially the former, where the actuals were 8,0 below the Budget. The Revised Estimate has been a little exceeded by the actuals, which also compare favourably with those of 1883-84, and confirm the general tendency of this revenue to greater production.

V.—Excise.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
3,088,6	Liquors and drugs	3,053,1	3,264,4	3,267,4
723,4	Opium	724,5	723,0	719,2
25,0	Other receipts	19,3	26,1	25,3
3,837,0	TOTAL	3,796,9	4,013,5	4,011,9

43. The Budget was rather low, and the changes in administration during the year considerably improved the receipts. The Revised Estimate provided for an increase of 22,4 in Central Provinces, 50,0 in North-Western Provinces and Oudh, 107,6 in Madras and 64,1 in Bombay, though a falling off of 30,0 was expected in Bengal, but the results are better than were expected. The excess occurs under the head Liquors and Drugs, and is caused in the *Central Provinces* by higher fees paid for the monopoly of sale of country spirit owing to competition among the bidders, in the *North-Western Provinces and Oudh* to enhanced receipts on account of still-head duty, in *Madras* to important changes introduced during the year in the administration of this branch of revenue; and in *Bombay* to the enhancement of still-head duty, and the tax on toddy trees, and fees for licenses to sell foreign wines and spirits. In *India General* the Mysore receipts were brought into the account for the first time. In *Assam* the duty on Ganja was raised by one rupee per seer. There was a large decrease in *Bengal*, owing to the high price of rice and grain consequent on the scarcity prevailing in several districts of the Province, and partly, it is stated, to certain administrative changes. As regards Opium there was a marked increase in *Madras*, where the estimate was rather short, in consideration, apparently, of a large balance of imports of Malwa Opium in 1883-84 having remained undisposed of at the close of that year. The demand for the drug seems, however, to have subsequently risen. With the exception of *India* and *Central Provinces*, the other Provinces did not work up to estimate.

Section B.—PRINCIPAL HEADS OF REVENUE—*continued.*

VI.—Provincial Rates.

1883-84. Accounts.	General rate on Lands.	Budget.	1884-85. Revised.	Accounts.
2,1	India	2,1	2,2	2,0
44,8	Central Provinces	43,2	43,1	43,2
101,5	Burmah	81,6	81,5	84,1
40,2	Assam	38,5	38,5	42,6
773,7	Bengal	764,7	779,5	760,1
631,9	North-Western Provinces	633,2	633,2	632,1
255,1	Punjab	257,6	249,6	258,1
436,2	Madras	420,0	399,0	395,9
236,6	Bombay	232,7	226,0	220,9
2,522,1	TOTAL	2,473,6	2,452,6	2,439,0
	Other Rates.			
4,7	India (Village Service, Plough Tax, Opium Cess)	6,2	5,9	5,4
14,2	Central Provinces (Village Service)	11,8	11,8	21,7
5,9	Bengal charges on (Ward's Estates)	5,3	5,3	6,8
17,6	North-Western Provinces (Village Police Cess in Oudh)	19,8	22,0	22,8
81,6	Punjab (Village Service and charges on Ward's Estates)	...	74,0	77,9
232,3	Madras (Village Service, Irrigation Cess)	223,3	221,9	217,5
3	Bombay (Miscellaneous)	3	4	4
356,6	TOTAL	266,7	341,3	352,5
2,878,7	GRAND TOTAL	2,740,3	2,793,9	2,791,5

44. The rate on land usually follows the Land Revenue and is affected by similar causes, and this occurred in 1884-85 as regards the collections in *Burmah*, *Assam*, *Madras*, and *Bombay*. In *Assam*, also, the local rate was increased during 1884-85, which resulted in larger collections. In *Bengal* apparently there was a failure in the receipts during the last two months of the year. The *North-Western Provinces and Oudh* show increased receipts from the Oudh village watch cess, in consequence of a re-arrangement in the village watch circles, and an increase in the number of village watchmen in Oudh. The "Village Service" in the *Punjab* was an excluded local fund when the Budget was prepared.

VII.—Customs.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	IMPORTS—			
82,8	Burmah	84,2	82,2	77,5
151,4	Bengal	141,4	131,0	132,5
51,0	Madras	53,8	47,0	50,0
153,9	Bombay	150,3	159,0	158,5
439,1	TOTAL	429,7	419,2	418,5
	EXPORTS—			
445,2	Burmah	552,3	360,1	356,7
199,2	Bengal	212,0	148,4	162,4
60,8	Madras	54,0	61,0	47,2
24,1	Bombay	25,5	24,7	28,1
729,3	TOTAL	843,8	594,2	594,4
18,9	MISCELLANEOUS	16,0	16,6	17,0
1,187,3	TOTAL	1,289,5	1,030,0	1,029,9

45. The above figures indicate diminished trade in *Burmah*, *Bengal*, and *Madras*, but not in *Bombay*, where both imports and exports were good. In *Burmah* there were small clearances of liquor from Bond, large refunds to licensed vendors of duty on arms sold, diminished shipments of rice, and fewer fines and confiscations, as well as less ware-house and wharf rents. In *Bengal* there was a marked depression of trade during the year. *Madras* shows smaller

Section B.—PRINCIPAL HEADS OF REVENUE—*continued.*

exportations of rice and paddy to Ceylon, Pondicherry and Karikal chiefly from the Tanjore district, where the crop was seriously damaged by floods, as well as smaller importations of arms and foreign liquors. Moreover, a portion of the Customs yard at Madras having been made over to the Harbour authorities, the godown rents are now credited to the Harbour instead of to Customs. In contrast with these abatements of trade, importation of foreign wines and spirits and the exportation of rice considerably increased in *Bombay*, but the land Customs ceased on the execution of the Customs convention with the Native States of Cambay and Janjira. The various classes of Customs may be classified as follows, the figures being net, that is, less refunds:—

	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.
Duties still in force—					
Liquors, import	378,9	405,7	418,4	420,5	401,1
Rice, export	715,5	747,8	814,9	705,8	575,6
Arms and ammunition	7,3	7,9	8,0	11,3	9,9
Duties now abolished	1,348,6	1,097,4	—17,5	—4	...
Miscellaneous	28,3	31,1	21,1	18,9	18,4
TOTAL	2,478,6	2,289,9	1,244,9	1,156,1	1,005,0

VIII—Assessed Taxes.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
526,1	TOTAL	518,1	511,8	511,8

46. The actuals and revised estimate agree, but both are below the Budget and the accounts of the previous year. The falling off occurs in the Central Provinces, Bengal, Punjab, and Madras. The decrease in the *Central Provinces* is understood to be due to a more careful assessment of the Pandhri tax, and in *Bengal* chiefly, and in *Madras* partly, to slackness of trade. In *Madras*, also, the assessments have been carefully revised, the result being a reduction of the demand; and in *Bombay* the Government has introduced a system of assessments by local committees, instead of by village officers as heretofore. In the *Punjab* the accounts of 1883-84 included a large sum which formed part of the demand of 1884-85. In the *North-Western Provinces and Oudh* the receipts of February and March were unusually large, and part of the excess may be due to advance collections, the tax having been collected much earlier than usual this year.

IX.—Forest.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
99,5	Central Provinces	100,0	101,0	102,7
250,9	Burmah	234,0	174,0	167,1
161,1	North-Western Provinces	133,0	161,4	157,2
250,3	Bombay	280,5	265,7	277,5
287,3	Other Provinces	304,5	277,4	280,3
3,1	England	1,4	2,8	1,8
1,052,2	TOTAL	1,053,4	982,3	986,6

47. The receipts in the *Central Provinces* from sales of timber and other produce removed from forests by Government agency were about 2,0 below the estimate, while the revenue from grazing and produce removed by purchasers was greater by about 4,2. Towards the close of the year sales amounting to 3,0 were effected, but were not adjusted till after the 31st March. The variations in *Burmah* were principally owing to a fall of 45 per cent. in the price of teak, due to the depressed state of trade and the over-stocked condition of the teak market during the year. The receipts in the *North-Western Provinces* exceeded the estimate by 24,2 in consequence of extended operations in the sale of timber for Railway sleepers, and other forest produce. In the Revised estimate these operations were over-estimated. The actuals of 1883-84 included special receipts on this account from the Bengal and North-West Railway. The realisations in *Bombay* were on the whole below the estimate, owing to a smaller number of sleepers having been supplied to the Southern Mahratta Railway, and to a smaller quantity of fuel for locomotives having been taken by the Indus Valley State Railway, than was anticipated. The falling off in the Revenue would have been much greater, but for a marked improvement over the Budget and Revised

Section B.—PRINCIPAL HEADS OF REVENUE—*continued.*

estimates, and also over the actuals of the previous year, in the sales of timber and other produce removed from forests by consumers or purchasers, owing to an increase in forest areas, to larger sales of timber and bamboos, to better rates for grass, and to the extensive sale of myrabolams and mowra flowers. Under "*Other Provinces*" the Budget figure had to be largely reduced in fixing the Revised estimate for *Bengal*, owing to the anticipated demand for sleepers having failed entirely in the Teesta, Kurseong, Julpigoree, and Chota-Nagpore Divisions. In *Assam*, too, there was a reduction in the Revised estimate, consequent on the stagnation of the export timber trade from Lower Assam into Bengal. On the other hand, Madras provided for a larger revenue than was anticipated in the Budget. All these expectations were realized, as the actuals worked closely up to the Revised estimate. The chief difference between the accounts of the two years occurred in the *Punjab*, where the receipts of 1883-84 were abnormally high, owing to large sales of firewood and sleepers to the Rewari-Ferozepur Railway.

X.—Registration.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
258,9	TOTAL	265,6	280,8	286,8

48. The figures for *Central Provinces* and *Punjab* do not call for special remark. In the *North-Western Provinces and Oudh*, the revenue from Registration is practically stationary, the receipts during 1880-81 to 1884-85 being 34,9, 34,2, 34,9, 34,1, and 34,1, respectively. In *India General* the figures include, for the first time, recoveries in the Mysore assigned tract, and in *Assam*, *Burmah*, *Bengal*, and *Madras*, the operations of the department have extended owing to the steady increase in the registration of documents. The increase in *Madras* is also largely due to the introduction of a revised scale of fees from 1st May 1884. From *Bombay* it is reported that, in the latter part of 1884-85, many landed properties changed hands, owing to depression in trade and fall in the prices of mill shares. The acquisition of land by the Southern Mahratta Railway also contributed to the improvement.

XI.—Tributes from Native States.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
241,1	India	217,7	220,5	224,2
344,6	Madras	344,6	344,6	344,6
90,4	Bombay	92,0	88,5	88,6
44,4	Other Provinces	41,6	41,6	41,6
720,5	TOTAL	695,9	695,2	699,0

49. Many of these tributes fall due at the end of the year, and a little difference in the date of recovery causes discrepancies between the estimate and accounts. Thus in *India General* certain sums due this year were realized in the previous year, while others which should have been paid in 1883-84 were not realized till 1884-85. This was also the case in the *Central Provinces* and *Bombay*.

Section B.—DIRECT DEMANDS ON THE REVENUE.

1883-84. Accounts.		Budget.	1884-8. Revised.	Accounts
8,482,6	. . . . .	9,016,6	9,571,1	9,546,1

50. The prominent differences in this group occur in Refunds, Salt and Forest, which show savings of 19,6, 72,4 and 48,7 respectively, and in Assignments, Land Revenue and Opium in which the estimated expenditure was exceeded by 35,3, 22,6 and 612,9. The account of Opium and Salt have already been discussed in paragraph 37. The heads Refunds and Assignments have been affected by various circumstances, as explained in paragraphs, 51 and 52, but it may be noted here, for guidance in the preparation of future estimates of Customs Refunds, that drawbacks under the new tariff have almost entirely ceased. The saving of 48,7 in Forest expenditure was effected almost wholly in Conservancy and Works, and was balanced by a reduction of 66,8 in Forest Revenue.

3.—Refunds and Drawbacks.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
221,6	Land Revenue	53,0	64,8	48,5
34,6	Salt	41,3	29,1	31,0
39,3	Stamps	33,7	40,6	45,1
31,1	Customs	43,1	31,8	24,9
16,0	Assessed Taxes	17,7	15,1	15,0
45,7	Other Revenue Refunds	31,6	32,5	36,3
388,3	TOTAL .	220,4	213,9	200,8

51. The Land Revenue refunds in 1883-84 included two large payments, amounting to 10,0, in the Godavari District in *Madras*, and a write-off of 150,6 in *Bombay*, connected with a re-adjustment ordered by the Secretary of State in some of the assessments of that presidency. The estimates of 1884-85 were fixed too high in most of the provinces, and have not been reached in the accounts, though these contain a refund of 7,9 in *Bengal* to the Maharaja of Doomraon, under orders of the Government of India No. 34, dated 5th January 1885, and a write-back in *Madras* of an erroneous credit of 1,3 to this head in 1882-83 on account of water-tax of the Kurnool Canal. The original estimate under "Salt" was framed with reference to past actuals, which were not worked up to in 1884-85. Refunds of stamps were unusually high in the *North-Western Provinces*, having amounted to 8,9 against 6,3 in 1883-84. The decrease in actuals under Customs is chiefly due to the estimate in *Bombay* having included 17,9 for Drawbacks, which, under the new tariff, have almost ceased. The "Other Revenue Refunds" in 1883-84 included two special payments amounting to 9,3, on account of Excise in the Madras Districts of Madura and Tinnevelly.

4.—Assignments and Compensations.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
314,8	India	316,8	317,7	315,7
7,2	Central Provinces	7,2	7,1	7,2
3,4	Assam	3,2	3,3	3,3
11,0	Bengal	12,3	12,6	12,8
7,6	North-Western Provinces	8,0	7,6	6,5
21,1	Punjab	21,4	20,7	20,8
116,8	Madras	116,2	116,4	116,1
757,0	Bombay	755,0	746,7	793,0
1,238,9	TOTAL .	1,240,1	1,232,1	1,275,4

52. The difference between the actuals and Budget under *India* is chiefly due to a sum of 1,5, on account of compensation to the Khan of Khelat, not having been drawn in 1884-85.

Section B.—DIRECT DEMANDS ON THE REVENUE—*continued.*

In the *North-Western Provinces* the pensions in lieu of resumed lands were over-estimated, owing to errors in the details, which are being checked to ensure correctness in future. The *Bombay* estimate provided for compensations to owners of salt-pans in Portuguese India, and to the Goa Government under treaty, for loss of revenue consequent on a modification of the Customs tariff, but these were not paid during the year. On the other hand, large adjustments became necessary in connection with alienated lands, mainly owing to enhanced survey rates.

5.—Land Revenue.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	CHARGES, EXCLUDING REVENUE SURVEY UNDER SURVEY OF INDIA—			
30,8	India	29,9	35,3	31,8
64,6	Central Provinces	85,3	84,0	67,2
178,6	Burmah	172,1	184,0	182,4
82,6	Assam	83,5	80,7	79,5
337,3	Bengal	340,8	340,8	335,4
769,0	North-Western Provinces	801,2	789,1	777,9
289,2	Punjab	239,8	238,3	295,8
772,7	Madras	783,5	786,1	790,6
675,2	Bombay	665,0	680,5	674,4
3,200,0	TOTAL OTHER CHARGES .	3,201,1	3,218,8	3,235,0
3	Add England	6	4	4
3,200,3	TOTAL, EXCLUDING REVENUE SURVEY .	3,201,7	3,219,2	3,235,4
	REVENUE SURVEY CHARGES—			
10,7	India	13,2	14,3	15,1
1,5	Central Provinces	2,3	4,1	3,6
66,5	Burmah	65,8	54,5	55,9
7,5	Assam	16,3	15,1	13,0
9,5	Bengal	5,6	4,9	5,1
31,7	North-Western Provinces	30,5	32,8	33,7
1,5	Punjab	5,3	1,7	1,5
128,9	TOTAL REVENUE SURVEY CHARGES .	139,0	127,4	127,9
3,329,2	TOTAL, INCLUDING REVENUE SURVEY .	3,340,7	3,346,6	3,363,3

53. The increase under *India* is due to a charge of 5,5 against Quetta assigned revenues, for which no provision was made in the Budget, and to an increase in the actual expenditure over estimate of 1,6 under Collectors and Deputy Commissioners' establishments in Quetta, and of 9 under Land Settlement in Ajmere. The greater part of the falling off in the actuals in the *Central Provinces* is due to 13,6 having been provided in the original and revised estimates for Local Fund establishments in Imperial offices, the charges for which are shown under 18 General Administration in the accounts. The rest is made up of savings in the Budget grant of 5,4 for strengthening Tahsil establishments, and in the salaries of Deputy and Assistant Commissioners owing to the absence of officers on furlough. The variations under *Burmah* were, an increase in the percentage charges for Land Revenue collections, as those collections were more than was anticipated; a large decrease in Land Settlement charges, owing to reduction in the Cadastral survey; and an increase in Collectors' and Deputy Commissioners' establishment charges, as fewer savings were effected than anticipated, consequent on more frequent travelling on circuit and heavier miscellaneous expenditure. The savings in *Assam* were mainly in salaries of officers absent on leave, whose places were temporarily filled by junior officers, but a part of the decrease was due to irregularity in the payment of Commission on Land Revenue collections. The charges in 1883-84 included 2,4 for survey of Waste Land grants in Lakhimpur. In the *North-Western Provinces* settlement operations in Gorakhpur and Basti were not extended as much as was expected, and the provision for a Settlement Officer in Jalaun was not fully utilized during the year; moreover, the grant for contingent expenditure for the management of Government estates was not worked up to. The Revised somewhat over-estimated the allowances to district and village officers, and the charges in connection with village accountants. The chief difference between the actuals of the two years is the increase in Land Settlement charges in 1884-85. The actuals of 1884-85 under *Punjab* include about 69,7 for Revenue Talabana, and

Section B.—DIRECT DEMANDS ON THE REVENUE—*continued.*

Patwari Fees' Fund, for which no provision was made in the Budget, as the transactions of these funds used to be considered as pertaining to Excluded Local Funds. The Revised somewhat underestimated these transactions, while the excess over 1883-84 is principally due to the re-organization of the Punjab Commission. In *Madras* the Budget underestimated the charges for Process service by 2,4, for Collectors' and Deputy Commissioners' establishments by 3,4, and under Allowances to district and village officers by 6,4. On the other hand, it provided for the special Tanjore survey undertaken on behalf of the Irrigation Department, which was abandoned during the year. The Revised estimate took too large a credit (9,4) for the savings on this account, which amounted to 4,3 only. The increase in the actuals of the year over those of 1883-84 is chiefly due to the formation of an additional settlement party for the registration of escheats in the Wynaad. In *Bombay* the charges for Taluka establishment payable from the village cess in Sind were 4,9 in excess of the Budget, but 6,1 below the provision in the Revised estimate. The remainder of the excess in the actuals over Budget was caused by additional establishments, sanctioned after the estimate was passed, for the preparation of village registers and for the collection of agricultural statistics in Dharwar; and also by the raising of a book debit in 1884-85 in adjustment of arrear Land Settlement charges in Sind, which were at first debited to advances, pending settlement of the proportion payable by the ryots. The Revenue Survey charges shewn above are noticed under 26, Scientific and other Minor Departments—Survey of India.

6.—Opium.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	BENGAL—			
1,721,8	Payments to cultivators and manufacturing charges	2,215,5	2,803,3	2,827,7
129,2	Other charges	134,5	136,5	131,9
3,7	India, Bombay, and England	2,9	6,7	6,2
1,854,7	TOTAL	2,352,9	2,946,5	2,965,8

54. In the Original estimate of 1884-85 the provision for payments to cultivators and manufacturing charges was larger than in 1883-84, as an unusually short crop of opium was produced that year. In the Revised estimate a further sum of 587,8 was added on the information then available, but the actuals have turned out to be still greater by 24,4. This is due to the very large crop collected during the year, as will be seen from the following figures:—

Year.	No. of chests produced. Provision.	Excise.	Total.	Total payments to cultivators, and manufacture charges.	Average per chest. A'
1881-82	49,732	4,768	54,500	1,931,4	354
1882-83	54 039	3,965	58,004	2,156,0	372
1883-84	38,214	4,318	42,532	1,721,3	405
1884-85	65,993	7,008	73,001	2,827,7	387

55. Under "England" the Revised estimate included 3,5 in excess of Budget for machinery. The actual expenditure on this account amounted to 3,3.

7.—Salt.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	NORTHERN INDIA SALT DEPARTMENT.			
105,9	Establishments and Contingencies	112,5	109,0	104,0
	Manufacture and Excavation—			
22,6	Sambhar	22,5	16,4	7,6
8	Didwana	1,0	1,0	9
2,1	Pachbudra	4,5	2,0	9
...	Phalodi	6	6	4
6,0	Punjab Mines	7,8	6,4	7,3
25,7	Purchase and Freight	27,5	24,6	22,9

4,1	England	...	...	1
446,6	TOTAL	521,7	459,6	449,3

Section B.—DIRECT DEMANDS ON THE REVENUE—*continued.*

56. In the Northern India Salt Department the decrease in the actuals is 32,4 below Budget, chiefly in manufacturing charges at Sambhar, where owing to floods and unfavourable weather the work was greatly hindered. There were savings too at Pachbudra, due to want of demand for salt, and under "Establishments" from the closing of the Nrid salt-works, also under "Purchase and Freight" from no business having been done at the Lala Musa Depôt. This explanation also applies to the difference between the accounts of 1883-84 and 1884-85.

57. Under the provincial heads of *Burmah*, *Bengal*, *Madras* and *Bombay* the difference between estimates and accounts is 40,1, of which 29,8 consists of savings in establishments, 8,3 in purchase and freight, and 2,0 in free supplies of salt to the Indore Durbar, for which a cash payment is now substituted and charged to 4 Assignments and Compensations.

58. As regards establishment, the saving accrued from the employment of a smaller preventive establishment in *Bengal*; from the amount sanctioned in *Madras* for the reorganization of theSalt Department not having been fully utilised; and from reduction of establishment in *Bombay* connected with the salt revenue in Portuguese India, consequent on the new convention with the Goa Government. These savings would have been larger but for the transfer to this head, from 11, Customs, of charges for establishments in Konkan division, and the revised salaries sanctioned on the reorganization of the Salt and Customs establishments in that Presidency. It may also be noted here that in *Madras* there is a gradual decrease of the charge for petty construction and repair of Salt buildings, as, owing to the extension of the excise system, such charges now fall on the licensees. The decrease under purchase and freight has occurred chiefly in *Madras*, and is attributed to the substitution of the excise for the monopoly system. The excess in 1884-85 over the previous year is due to the abovementioned transfer from Customs to this head, and to the revision of salaries also noted above.

8.—Stamps.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	INDIA—			
62,1	Charge for sales (chiefly discount)	65,0	63,8	64,0
19,2	Other expenditure	20,6	20,5	20,9
27,8	ENGLAND	44,1	45,1	45,5
109,1	TOTAL	129,7	129,4	130,4

59. The saving under the first head is due to the transfer to "Excise," in *Bengal*, of the proportion of the cost of the Calcutta Collectorate hitherto taken under this head. The charges in England exceeded the estimate, as the indents were larger than are anticipated.

9.—Excise.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
92,3	India	98,6	103,3	103,6
...	ENGLAND	...	1	1
92,3	TOTAL	98,6	103,4	103,7

60. The expenditure was in excess of estimate chiefly in *Bengal* (2,7), *Bombay* (2,5), and *Madras* (2,2). In *Bengal* the increase was due to a change in the mode of adjusting the charges of the Calcutta Collectorate, as stated under the previous head; and in *Bombay* and *Madras* to revision and reorganization of establishments. The chief savings occurred in the *North-Western Provinces* (1,7), where the grants for distillery establishments and for rewards were not fully spent, and in *Burmah* (1,6) owing to the appointment of Excise Commissioner having been filled only towards the close of the year.

10.—Provincial Rates.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
26,9	Bengal	24,7	25,6	23,4
27,6	Other Provinces	28,3	85,8	27,3
54,5	TOTAL	53,0	111,4	50,7

Section B.—DIRECT DEMANDS ON THE REVENUE—*continued.*

61. The decrease in the accounts of 1884-85 under *Bengal*, as compared with the actuals of 1883-84, is due to the decrease of establishment for re-valuation work. The estimate was based on returns received from the Public Works Department. Under Actuals in other provinces, there was a saving of 1,4 in *Bombay*, as compared with the Budget, in the grant for remuneration to village officers for collection of local cesses, owing to postponements of revenue granted in 1884-85 in certain districts. The Revised estimate under this head in *Punjab* included 58,6 for Patwaris' Fees Fund, which is shown under 5—Land Revenue in the accounts.

11.—Customs.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
17,2	Burmah	17,7	17,1	17,0
48,6	Bengal	49,3	49,3	49,8
17,0	Madras	18,0	16,6	16,0
56,5	Bombay	57,0	53,8	54,0
139,3	TOTAL	142,0	136,8	136,8

62. The savings in *Burmah* were effected in Establishments, Salaries, and Contingencies. Those in *Madras* occurred under "Ministerial establishments," "Salary of Collector," owing to his employment on other duty, and under "Contingencies," which were somewhat over-estimated. In *Bombay* the whole cost of the re-organised Customs and Salt establishments in the Konkan Division has been shown in the accounts of 1884-85 under 7 Salt, pending the settlement of the question as to the distribution of charge between the two departments; a real reduction was secured by the withdrawal of the Preventive establishment on the Habsan frontier on execution of a Customs' convention with the native state of Janjira. In *Bengal* the cost of the extra Preventive establishment entertained by the Collector of Customs, Calcutta, served to slightly increase the expenditure over the estimate.

12.—Assessed Taxes.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
13,2	TOTAL	13,8	13,2	12,9

63. The actuals worked very closely up to the estimate in all the provinces except *Bengal*, where there was a saving of 6 from the entertainment of smaller establishments, in consequence of the falling off of receipts under this head. The percentage of charges in the provinces on every thousand rupees collected will be seen from the following statement:—

	Net Receipts.	Collection Charges.	Percentage.
	£	£	
India	26	...	...
Central Provinces	23,112	34	·15
Bengal	146,486	9,390	6·41
North-Western Provinces	116,507	609	·52
Punjab	45,431	120	·26
Madras	42,813	697	1·63
Bombay	122,498	2,086	1·7
TOTAL	496,873	12,936	

13.—Forest.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
43,5	Central Provinces	55,0	52,0	49,4
121,6	Burmah	143,0	127,5	121,2
104,1	North-Western Provinces	97,0	104,1	101,9
154,5	Bombay	186,9	179,3	176,4
219,8	Other Provinces	242,1	234,5	225,7
5,9	England	3,2	4,1	3,9
649,4	TOTAL	727,2	701,5	678,5

Section B.—DIRECT DEMANDS ON THE REVENUE—*continued.*

64. The difference of 48,7, between Actuals and Budget under this head, consists of an increase of 3,7 on account of establishments, and a saving of 52,4 under conservancy and works. The increase under establishments is due to (4,5) transferred in *India General* to this head from Administration, as the salary and office establishment of the Inspector General of Forests, and (8,7) in *Bombay* owing to a reorganization of the superior grades, and the entertainment of additional establishment for keeping accounts and for the forest settlement officers. These increases were counterbalanced to a large extent by savings in the other provinces. The saving of 52,4 under Conservancy and Works is made up of 18,0 in *Burmah*, in consequence chiefly of short arrivals of British timber at the Kado Timber Depôt, of 7,7 in *Bengal* from failure of the anticipated demand for sleepers, of 7,5 in *Madras* from savings in the grant for demarcation and improvement of forests, and of 19,2 in *Bombay* (*a*) from diminished supply of sleepers to the Southern Mahratta Railway and of locomotive fuel to the Indus Valley State Railway, and (*b*) from the transfer to Public Works Department of certain charges connected with communications and buildings. The Bombay savings would have been larger but for heavy payments of compensation for land purchased for forest purposes, and increased expenditure on minor forest produce including the mahwa flower (Bassia Latifolia), for which alone a special grant of 4 was sanctioned. The difference between 1883-84 and 1884-85 is due to the establishment charges noted above, and to the cost in 1883-84 of the forest areas in the Aheri Zemindary and the Moharli Forest.

14.—Registration.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
167,1	TOTAL	176,5	176,7	178,5

65. The increase in the charges of 1884-85 over those of 1883-84 occurred chiefly under Commission paid to Registrars in *Bengal* and *Madras*, owing to increased receipts as the result of the extended operations of the department.

Section C.—POST OFFICE, TELEGRAPH, AND MINT.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
1,672,7	RECEIPTS	1,734,7	1,789,2	1,792,1
1,984,0	EXPENDITURE	2,158,4	2,131,3	2,070,6
—311,3	NET	—423,7	—342,1	—278,5
—215,8	POST OFFICE (NET)	—188,5	—194,0	—195,0
—146,6	TELEGRAPH (NET)	—248,7	—223,9	—179,6
+51,1	MINT (NET)	+13,5	+75,8	+96,1

66. Both the Postal and Telegraph revenues shew an advance over the preceding year, and the expenditure has been kept below the sanctioned budget. The Mint receipts were increased by a large importation of silver, and the recoinage of shroff-marked rupees added to the charges.

XII.—Post Office.

1883-84. Accounts.	IMPERIAL POST OFFICE.	Budget.	1884-85. Revised.	Accounts.
651,8	Sale of Postage Stamps	691,0	689,5	680,3
261,2	Parcel and other Postage collected in cash	261,3	260,0	254,7
91,5	Money Order Fees including Postal Orders	95,2	102,0	104,2
38,5	Other Receipts	33,6	33,7	32,5
1,043,0	TOTAL	1,081,1	1,085,2	1,071,7
28,8	DEDUCT—Accounted for to other Governments	27,2	29,0	28,5
1,014,2	NET RECEIPTS	1,053,9	1,056,2	1,043,2
4,5	ADD—District Post	5,1	4,2	3,9
1,018,7	TOTAL	1,059,0	1,060,4	1,047,1

67. The Budget Estimate for the first two items was based on the Regular Estimate of 1883-84, with provision for a considerable increase equal to that of the previous year: this, however, was not realized. Money Order fees continue to show an increase, while the falling off under Other Receipts is chiefly in Bullock Train Collections. On the whole, the actuals are in advance of those of last year.

XIII.—Telegraph.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
401,9	Indian	480,5	459,0	461,8
120,3	Indo-European	92,7	105,5	102,7
4	Provincial	3	3	4
522,6	TOTAL	573,5	564,8	564,9

68. The Budget of the Indian portion was too sanguine as regards the sums payable by Railways for maintenance of lines and technical supervision of offices, in addition to which and to some falling off in message revenue, the claims of the department on the South Indian Railway were settled by the Secretary of State for a smaller sum than was expected. The excess over estimate in the Indo-European division represents increased traffic. This improvement disappears if the actuals are compared with the revised estimate and the accounts of 1883-84, but this is due to "the outpayments on message revenue account"

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

(10,8) having been deducted from revenue instead of being charged as refunds. The Indian revenue in 1883-84 was small, owing to the postponement, till the following year, of certain recoveries from railways.

XIV.—Mint.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
64,5	Seignorage on silver	78,0	121,4	115,6
56,0	Gain on copper coinage	15,0	35,0	57,0
	OTHER RECEIPTS.			
7,6	Calcutta	6,8	4,7	4,6
...	Madras	...	1	..
3,3	Bombay	2,4	2,8	2,9
131,4	TOTAL	102,2	164,0	180,1

69. Seignorage cannot be accurately estimated, as it is dependent upon the tenders of silver for coinage, which in recent years have been as noted below. The gain on copper coinage is the result of a rather complicated account, as explained in detail last year. It is not necessary to repeat these particulars now, but it may be stated that the gain arises from the cost of metal and manufacture being a little less than half the nominal value of the coin, and is not treated as revenue until the coin passes into circulation: a corresponding loss arises when it becomes necessary to withdraw from circulation and destroy old and worn coin. At present British coin is gradually taking the place of old native mintages, and there is always a net gain, though of variable amount.

	Net Importation.	Silver Coinage.	Seignorage.
1879-80	7,869,7	10,257,0	212,0
1880-81	3,892,6	4,249,7	76,1
1881-82	5,379,0	2,186,3	43,4
1882-83	7,480,6	6,427,4	108,9
1883-84	6,406,2	3,663,4	64,5
1884-85	7,245,6	5,794,2	115,6

15.—Post Office.

1883-84. Accounts.	IMPERIAL POST OFFICE.	Budget.	1884-85. Revised.	Accounts.
40,9	Chief Post Office	42,5	43,8	44,2
639,4	Presidency and District Offices	674,5	650,7	649,1
302,3	Conveyance of Mails	283,8	294,0	284,8
30,8	Other Charges	30,2	31,3	33,2
1,013,4	TOTAL	1,031,0	1,019,8	1,011,3
114,6	ADD—District Post Office	115,5	116,5	114,0
1,128,0	TOTAL INDIA	1,146,5	1,136,3	1,125,3
106,5	ENGLAND	101,0	118,1	116,8
1,234,5		1,247,5	1,254,4	1,242,1

70. The increase under the first head is due chiefly to leave and travelling allowances of officers, and the entertainment of an additional Superintendent. The saving in Presidency and District Offices is mainly in Establishment, House-rent, Stationery, Office furniture, and Contingencies. The excess in "Other charges" is chiefly for compensation for loss of insured articles, printing at private presses, and special payments to British India representatives at the Postal Conference at Lisbon; but, as regards the English expenditure, the Bombay budget for stores from England fell far short of the requirements of that Presidency, and in India too the provision was insufficient. On the other hand, the subsidy to the Euphrates and Tigris Steam Navigation Company, for the Mail Service between Bussorah and Bagdad, was not fully discharged in England.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

16.—Telegraph.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
	INDIAN TELEGRAPH.			
	CAPITAL ACCOUNT.			
101,9	India	154,9	147,1	153,7
109,1	England	139,5	139,5	132,8
	REVENUE ACCOUNT.			
337,9	India	404,6	374,9	346,2
8,8	England	9,5	5,7	5,5
	INDO-EUROPEAN TELEGRAPH.			
67,4	India	68,2	67,8	63,2
38,3	England	44,5	53,0	42,3
	PROVINCIAL.			
3	Bengal	...	...	1
5,5	Bombay	1,0	7	7
669,2	TOTAL	822,2	788,7	744,5

71. The actuals throughout are less than the estimate, the difference between Actuals and Revised Estimate, in the Indo-European section, being caused by the sum of 10,8 mentioned in paragraph 68 as having been deducted from revenue in lieu of being charged as a refund. The savings in the Indian section are due to restricted outlay on works as regards Capital Account, and in Revenue Account to a smaller number of Railway and Postal. Telegraph offices having been opened than was expected, to the conversion of some departmental offices into combined offices, and to economies in repairs and establishments. The large excess in 1884-85 over the preceding year is attributed to the erection of additional lines, the establishment of additional offices, and the alteration of the line from Koom to Teheran.

17.—Mint.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised	1884-85. Accounts.
42,5	Calcutta Mint	36,4	42,1	39,7
33,4	Bombay Mint	37,0	36,0	34,5
4,4	Stores from England	15,3	10,1	9,8
80,3	TOTAL	88,7	88,2	84,0

72. The excess expenditure in the Calcutta Mint is due to losses on recoinage of shroff-marked coin. In the Bombay Mint there were larger savings than were anticipated when the Budget was framed. The payments on account of stores from England were not made as rapidly as expected.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
1,427,7	RECEIPTS	1,455,6	1,402,1	1,372,4

73. The main features of this division are the continued falling off in Judicial fees, fines, and forfeitures, as well as in Jail receipts against which there is a corresponding abatement in the expenditure on Jail manufactures.

XV.—Law and Justice.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
228,7	Fees, fines, and forfeitures	249,0	235,6	228,3
192,9	Jail manufactures	229,9	204,8	188,9
152,3	Other receipts	139,0	123,7	128,8
573,9	TOTAL	617,9	564,1	546,0

74. The falling off in Fees, Fines, and Forfeitures, noticed in former reports, has continued in all provinces except *Burmah*, but its effect has been partly neutralised during the year in the *North-Western Provinces* and *Madras*, where the receipts include respectively distrainers' (Kurk Amins') fees, and recoveries from suitors for printing and translation charges, which were formerly treated as deposit accounts. In *Burmah*, the fees and fines have increased in both the civil and criminal courts, and the improvement was noted when the revised estimate was under preparation. The restriction on Jail manufactures was also noticed in former reports, and has continued to affect the revenue. This is shown more clearly in the figures entered below. The difference under Other Receipts is due partly to short credits in Port Blair on account of sale of produce, and of sums due from Native States for maintenance of convicts, and partly to no lapsed estates having been received from the Administrator General, Bengal.

	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.
JAIL MANUFACTURES—					
Receipts	246,6	262,3	246,6	192,9	188,9
Expenditure	230,4	225,9	213,1	161,6	158,3
NET	16,2	36,4	33,5	31,3	30,6

XVI.—Police.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
146,7	Fees, fines, and forfeitures	137,9	145,2	151,6
165,2	Other receipts	170,9	170,8	167,8
311,9	TOTAL	308,8	316,0	319,4

75. These figures include, for the first time, fines levied in the Mysore assigned tract, under Act V of 1861. In *Bengal* the cattle pounds were farmed out at enhanced rates, and recoveries on account of village Police were particularly good. On the other hand, certain sums due from the Bombay, Baroda, and Central India Railway were not realised within the year, while the contribution from the East Indian Railway was reduced, consequent on the reduction of the Police employed in it. In the *North-Western Provinces*, moreover, the Government has taken over the cost of the municipal Police, and remitted the contributions hitherto received on that account. The receipts in Madras from rents of Police huts, averaging 2,2 yearly, have been transferred from this head to the head XXXIII—Civil Buildings, Roads and Services.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVII.—Marine.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	MARINE DEPARTMENT.			
76,0	Dockyards and sea-going vessels	85,4	65,4	64,1
	CIVIL DEPARTMENT.			
	(Ports, Lighthouses, and River navigation.)			
20,5	Burmah	23,7	20,0	18,7
1,4	Assam	1,9	1,9	5
89,6	Bengal	90,0	85,0	77,2
5	Madras	6	6	5
4,8	Bombay	4,3	5,0	5,0
192,8	TOTAL	205,9	177,9	166,0

76. The small receipts under Dockyards and sea-going vessels are due (1) to less work, than was anticipated, having been performed in the Dockyard for other departments; (2) to all the vessels offered for sale not having been disposed of; and (3) to a change of practice with regard to recoveries from other departments on account of stores landed by the Agent for Government Consignments, the amounts recovered being now deducted from expenditure. The diminished revenue in *Burmah* and *Bengal* is traceable to depression of trade, affecting the pilotage and coast light dues. The estimates in *Assam* were too high, as the figures of the previous year included the sale-proceeds of two vessels, as well as the receipts from the "Hawk," which are now taken to Public Works Department.

XVIII.—Education.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
128,5	Fees	127,0	130,2	129,3
75,9	Other receipts	71,7	70,3	74,0
204,4	TOTAL	198,7	200,5	203,3

77. This head does not call for much detailed explanation, but the following items may be noted as affecting the revenue. In *Burmah* the public schools in Moulmein were during the year transferred from the Municipality, at its own request, to the Education department. In the *Punjab* the publication and sale of English books was discontinued for only a portion and not for the whole year as was anticipated. In *Madras* some of the high and middle schools were transferred to municipalities, and the middle school departments of colleges were abolished. In *Bombay* many new schools were opened throughout the Presidency.

XIX.—Medical.

1883-84 Accounts.		Budget.	1884-85. Revised.	Accounts.
	INDIA—			
18,6	Hospital fees	16,4	18,5	19,5
34,0	Other receipts	29,7	34,5	30,5
2,4	ENGLAND	2,0	2,3	2,5
55,0	TOTAL	48,1	55,3	52,5

78. The principal differences under this head occur in the Central Provinces, North-Western Provinces and Oudh, Punjab, and Madras. In the *Central Provinces* certain dispensaries, formerly treated as Excluded Local Funds, have been brought into the accounts as incorporated Local Funds since their transfer to the District Councils and Local Board. In the *North-Western Provinces* there is an apparent falling off, owing to the Budget having included certain contributions payable by municipalities to District Boards, which under revised arrangements have been credited under XXIV Miscellaneous. In the *Punjab* there is an excess over estimate in the receipts on account of Lunatic Asylums, due to contributions from district committees. In *Madras* the actuals of 1883-84 exceed those of 1884-85 by 2,1, but they contained an arrear recovery of 2,0 from the Madras Municipality towards the maintenance of hospitals in the town of Madras.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XX.—Scientific and other Minor Departments.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
24,0	CINCHONA PLANTATIONS	17,6	21,1	21,0
	INLAND LABOUR TRANSPORT—			
9,4	Fees	7,3	6,9	10,8
15,9	MATHEMATICAL INSTRUMENT DEPARTMENT	16,0	18,9	13,6
39,4	OTHER ITEMS (India)	34,8	40,8	39,2
1,0	„ (England)	5	6	6
89,7	TOTAL	76,2	88,3	85,2

79. The difference as regards Cinchona occurs chiefly in *Madras*, where sales were not expected, as stocks were sold off during the previous year, but 1,000 bales were sold. The head "Other items" includes the sale-proceeds of the land occupied by the Botanical Gardens at Mussoorie, *N.-W. Provinces*.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts.
11,250,0	EXPENDITURE	11,426,1	11,472,4	11,634,5

80. The principal difference (215,8) in this division is under Political charges, and is caused by the Afghan Delimitation Commission, the expedition against Zhob Kakars and the mission to Guada, for which the estimate did not provide. Additional expenditure was also incurred under General Administration, but the greater portion (26,3) of the increase under this head is due to transfers from the head 5—Land Revenue. Law and Justice presents a considerable saving (73,4), as compared with the estimate, produced by retrenchments in Jail manufactures and other charges.

81. Under *Governments and Secretariats, India* shews a saving, as compared with the Budget, under Tour expenses, Staff and Household of the Viceroy, and travelling expenses of the non-official members of the Legislative Council, partly counterbalanced by excesses in the salary of officers and in telegrams and furniture for the Public Works and Military Secretariats, respectively. The difference between 1884-85 and 1883-84 is also traced to these items, together with the savings in the Executive Council, and in the Home and Foreign Secretariats noticed in last year's report. A permanent change has been made under this head in 1884-85, by the transfer to 13—Forest of the charges on account of the Inspector General of Forest. In *Assam* the Civil Secretariat charges were 7 less than estimated, owing to the permanent Secretary having been on furlough throughout the year, to a revision of Secretariat Establishment, and to an overestimate of Tour expenses. The charges of 1883-84 were swelled by the absence of the Chief Commissioner on three months' privilege leave, and by his having drawn pay for 1882-83 in that year. In *Bengal* the principal variation occurred in the Civil Secretariat, where some new appointments were created, and many increases in progressive salaries fell due. The Tour expenses in the *North-Western Provinces* exceeded the Estimate, as the whole of the Secretariat Establishment was taken to Naini Tal under orders of the Local Government. The excess in *Madras* consists of a number of small items, of which 5 in Secretariat contingencies and 7 in the movement of Government offices to the hills are the chief. In *Bombay* the Actuals exceeded the Estimates (1) in salary of Governor by 9, owing to the salary of the retiring Governor up to

27th of March having been paid to him in that month; (2) in expenditure from contract allowance by 1,4, as additional allowances were sanctioned for Conservancy and Tour charges in F. D. No. 1677, dated 19th January 1884; and (3) in Civil Secretariat by 1,4, due to expenditure on telegrams during February and March 1885. But they also showed savings of 1,6 under Military Secretariat, 6 in Staff and Household expenses of the Governor, 5 under Executive Council, and other smaller ones.

82. Under "*Revenue Control and Financial Offices*" the India General, Central Provinces, Burma, Punjab, and Madras accounts include 2,4, 13,2, 8, 8,6, and 1,3 respectively as charges for the General Establishment of Local Funds, classified hitherto under 5 Land Revenue, under which they were provided for in the estimate. After allowing for this change of classification, the only material differences between Budget and Accounts occur in *Central Provinces*, where an additional charge was incurred consequent on certain leave allowances, and in the *Punjab* where there was a net saving of 4,8 from the appointment of a second Financial Commissioner and his establishment, and from a reduction in the number of Commissioners and their establishments. The two main differences under *Madras* counterbalanced each other. They occurred under charges of Civil Office of Account and Audit, which were decreased by 1,7 in consequence of permanent incumbents having been attached to other Provinces, whilst junior officers on smaller allowances acted for them; and under Board of Revenue, which was increased by the same amount, as the 2nd Member and permanent Sub-Secretary were employed on special duties. In 1883-84 the actuals of India included two years' payments on account of allowances to the Presidency Bank, and in the Punjab there was an excess of 2,0 over the charges of the following year in the salaries of gazetted officers in the Civil Office of Account and Audit, whilst in Madras the charges under Board of Revenue were less by 2,7 for the reason stated above. As regards the other Provinces, the principal variations were under Bengal, North-Western Provinces, and Bombay. In *Bengal* there was an increase of 3,7 over Budget by the appointment of a temporary Additional Commissioner for the Patna Division. An increase of 1,7 in the *North-Western Provinces* was on account of salaries of Commissioners absent on privilege leave. In *Bombay* the excess charges amounted to 6,1 and consisted of increases under Civil Account Office (2,1), Currency Department (2,1), and Commissioners (1,9). The increase under Civil Account Office was due to the appointment of higher paid officers than were provided for in the sanctioned scale, and the creation of the new office of Inspecting Auditor. Heavy cash remittances caused the excess in the Currency; and the payment of acting allowances in the absence on leave of permanent incumbents swelled the charges under Commissioners.

83. The English charges included passage and outfit allowances of the Governor General and of the Governor of Bombay, as well as a portion of the expenses incurred in the return to England of the Marquis of Ripon and his suite. When the Budget was framed it was expected that these charges would not be incurred till 1885-86. There was, however, a saving of 6,0 in comparison with Budget, in the payments for the supply of forms of Currency Notes.

19.—Law and Justice.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

84. Under the first head, in *India* the Estimates and Actuals of 1884-85 included, for the first time, the charges incurred in the Mysore Assigned Tract. In *Central Provinces* the saving is the result of the additional Commissionership having been abolished, and the absence of officers on furlough and deputation. In *Burma* the increase was caused by the appointment of an additional Recorder, by a temporary addition to the staff of Assistant Commissioners in consequence of absentees on leave, and by larger expenditure on diet and travelling allowances of witnesses, consequent on the increase of crime in 1884-85. The saving in *Assam* of 2,8 is almost entirely under salaries of Criminal Court's officers. In *Bengal* three additional Judges were appointed to the High Court during the latter part of 1884-85, and additional Civil and Sessions Judges in the Burdwan and 24-Pergunnahs Districts. Additional establishments were also entertained in certain districts. The principal variations in the *North-Western Provinces* were an increase under Civil and Sessions Courts (3,5) caused by the transfer to this head, from Personal Deposit Account, of Distrainers' (Kurk-Amins') establishment charges; and a saving of 4,5 under Criminal Courts in salaries of officers, diet to witnesses, and assessor's office expenses and contingencies. This saving would have been larger but for the transfer from 1884-85 of the charges of the Criminal Court Record Fund, which used to be shown under 5.—Land Revenue. The increase in the *Punjab* is due to the reorganization scheme. The excess over the charges of the previous year was caused by the retention of two additional Judges throughout the year, and to acting allowances for permanent incumbents on leave. The actuals in *Madras* exceeded those of the previous year owing to printing and translating charges on account of suitors having been taken as High Court Appellate Branch charges from 1st April 1884, to the revision from the same date of the salaries of Munsiffs and Subordinate Judges, and the charge to Criminal Courts of four-fifths of the Agency expenses of the hill tracts of Ganjam and Vizagapatam instead of one-fifth as formerly. In *Bombay* there was an excess of 12,8, due to acting allowances having been paid during the absence on privilege leave of certain High Court Judges, District Judges, and Magistrates, heavy expenses connected with law suits, and to the deduction in the Budget for savings not having been realised, as fewer officers went on furlough than the experience of past years gave reason to expect.

85. In regard to the *Port Blair Settlement*, the Budget provided for higher charges than were incurred on account of passage, freight, and carriage of stores. The increase, as compared with the previous year's actuals, occurred chiefly under salary, establishment, and contingencies of the settlement.

86. Under *Jail Charges* the only excess occurred in *Burma* (11,0), consequent on the appointment of an Assistant Superintendent in the Rangoon Jail, the substitution of Warders for Police Guards, and the higher prices paid for paddy at all the Jails except Akyab, thereby raising the cost of rations. In all the other Provinces there were savings aggregating 44,2, mainly owing to the estimates for feeding prisoners not having been worked up to.

87. In charges for *Jail Manufactures*, there were savings in nearly every Province in the purchase of raw materials, owing to the curtailment, by order of Government, of certain Jail industries which competed with private trade.

88. The increase under *Other Charges* occurred chiefly in Pleadership Examination charges in the North-Western Provinces and Madras, where they were 8 more in each case than the provision in the Estimate.

89. The Estimate of charges in *England* included outfit allowance for a Chief Justice and two Puisne Judges, but no Puisne Judges came out during the year.

20.—Police.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
36,6	India	43,5	47,1	46,1

2,761,0	TOTAL	2,793,9	2,805,8	2,832,7

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

90. The increase in *India* was caused by the augmentation of the Police Force at Quetta, and would have been larger but for the transfer, to the Public Works Department, of $\frac{7}{10}$ths of the charge on account of the Rajputana-Malwa Railway Police for the three months, January to March 1885. In the Original Estimate of the *Central Provinces* a lump addition of 4,0 was made to meet the cost of the reorganization of the Police Establishment, but the revised scale of pay did not come into force till the 1st of June 1884. Savings were also effected under Police clothing, arms, and accoutrements. The decrease in *Burma* is principally owing to reductions in the strength of the force. In *Assam* the Budget underestimated the charges for clothing, purchase and repairs of arms, and miscellaneous expenditure under Frontier Police. The chief increases in *Bengal* occurred under District Executive Force and Village Police. The former is chiefly nominal, being due to a change of procedure in adjusting the deductions from the pay of the force for clothing, while the extension of the Chowkidary system to the Government Estate of Khurda occasioned the other excess charge. The actual expenditure in the *North-Western Provinces* includes charges on account of Municipal Constabulary Police in relief of Municipal Funds, and cost of belts and badges for watchmen, specially sanctioned by the Local Government, but for which no provision was made in the Budget. They actually amounted to a larger sum than the above difference between estimate and actuals, but were partly counterbalanced by reductions in the Railway Police Establishment, and by transfer of Irrigation Police charges to the Irrigation Department. These items also explain the differences between the actuals of the present and the preceding year. The variations in the *Punjab* were due to errors in the Budget, which overestimated State Railway Police charges, and omitted to provide for certain expenditure for Special Frontier Police, whilst it underestimated the cost of Canal Burkundaz Guards. In *Madras* the savings were due to reductions in Marine Police Establishment which were not anticipated in Budget, but were provided for in the Revised Estimate. The provision for "clothing" and "arms and accoutrements" in the Revised Estimate were 20,0 and 7,8 respectively, but the actuals rose to 22,8 and 9,5. In *Bombay* the creation of the Office of Inspector General of Police created an excess over the Budget and the actuals of the previous year. Further increases were caused by the exhibition, in the accounts, of the actual outlay for clothing, whereas the Budget provided for the Government contribution only; and by the reorganization of certain Police Establishments sanctioned during the year. The cost of Railway Police fell below the provision in the Estimates, as a considerable portion of the Government contribution towards the charges for Police employed on Guaranteed Railways, was not claimed during the year.

21.—Marine.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
	MARINE DEPARTMENT.			
246,6	Dockyards and sea-going vessels	229,0	193,7	195,5
	CIVIL DEPARTMENT.			
	Ports, Light-houses and River Navigation.			
40,8	Burma	37,9	34,7	34,9
10,3	Assam	15,0	13,0	13,2
86,9	Bengal	89,5	86,7	84,7
1,1	Madras	1,5	1,5	2,7
7,1	Bombay	8,1	7,4	8,7
196,8	ENGLAND	136,6	150,9	154,7
589,6	TOTAL	517,6	487,9	494,4

91. The decrease in the charges of the *Marine Department* was mainly due to savings under sea and shore establishments, to less labour having been employed in dockyards, to smaller purchases of stores than were anticipated, and to the sale or employment, in other departments, of steamers, the establishments of which were entered in the Budget for the whole year. These savings were partly counterbalanced by the creation of the new appointment of Assistant Director of Marine, by the increased cost of victualling officers and men employed afloat, and by increased expenditure for piloting and towing Indian Marine ships. In *Burma* the savings in actuals, as compared with the accounts of the previous year and with the Budget, were due chiefly to the transfer of certain subsidies to Steamboat Companies from this head to "Dockyards and sea-going vessels," and to reduced expenditure in establishment charges and contingencies of Light-houses and Light-ships. These savings

were however reduced by the excess expenditure of 3,7 over Budget provision incurred in the building and equipment of the new light vessel "Krishna." The saving in *Assam* was due to a provision of 2,0 in the Budget for purchase of a steam launch not having been spent during the year. The increase over the previous year's actuals was chiefly in the amount paid as mail service subsidy, which included arrears of 1883-84. The principal decrease in *Bengal* occurred under Pilotage charges (8,1) consequent on the smaller tonnage entering the Port from the slackness in trade. This decrease was partly absorbed by an increase of 1,7 over Budget for purchase of Marine stores, of 1,5 for arrears of subsidy due to Messrs. Macneill and Co. for their steamer service between Dhubri and Dibrugarh, and of 1,5 for miscellaneous charges. The actuals in *Madras* included an exceptional adjustment of 1,2 on account of write-back of excess debits to Port Funds from 1865-66 to 1872-73. In *Bombay* a large payment, irrespective of Budget provision, was made in 1884-85 as compensation for the removal of fishing stakes from the entrance of the Harbour. In the Revised Estimate the charges for the flat "Mooltan" were reduced, under the impression that the proposed repairs would not be effected before the 31st of March 1885, but as they were completed early in 1885, the payment was made in February of that year. Under *England* there was an expenditure of 15,1 for the repairs of the "Tenasserim" which was not anticipated when the Budget was framed, and an excess charge of 7,0 for stores, as the Estimate from Bombay fell short of the requirements of that Presidency. Against these excess charges there were savings, the chief of which was 4,9 for contributions towards Her Majesty's vessels in the Indian seas, owing to the full complement of ships not having been employed. The charges of the previous year included a large sum for the building of the vessel "Clive" for the Indian Government, besides the cost of the establishment of that vessel while detained in England.

22.—Education.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
12,9	India	15,0	17,2	17,1
58,0	Central Provinces	61,1	59,8	59,7
39,8	Burmah	46,6	41,6	44,0
27,7	Assam	30,4	29,0	29,4
315,5	Bengal	339,3	334,7	340,0
166,2	North-Western Provinces	178,7	170,0	173,8
117,0	Punjab	119,0	114,7	119,1
187,5	Madras	182,5	178,5	189,8
259,5	Bombay	264,5	265,0	265,5
1	England	1	3	3
1,184,2	TOTAL	1,237,2	1,210,8	1,238,7

92. The actuals in *India* include, for the first time, charges incurred in the Mysore assigned tract, for which no provision was made in the Budget. In the *Central Provinces* savings ensued from the absence on leave of certain officers, from retrenchments in the Government book depôt resulting in a corresponding decrease, in the receipts under XVIII Education, from the sale of books, and from the full amount of grants-in-aid not having been spent. In *Burma* the saving was chiefly due to the transfer to private agency of a part of the Government book depôt work, and to short expenditure on Normal and Technical Schools, and on scholarships, while the excess over 1883-84 has been caused by larger "Grants-in-aid" and "Payments by Results." In *Assam* the new appointments of Sub-Deputy Inspectors in the Sylhet, Cachar, and Kamrup Local Boards, and increased grants-in-aid caused the actuals of 1884-85 to exceed those of the previous year; and in *Bengal*, also, the variations are ascribed to the last named cause. The decrease in the *North-Western Provinces* was caused by savings in Inspectors' travelling allowances, in the salaries of the Principal, Agra College, and of Assistant Professors, and by the transfer of the charge for training village accountants, from Technical Schools to 5.—Land Revenue. These savings, to some extent, were counteracted by charges for petty construction and repairs of school buildings, which were at first ordered to be adjusted as Public Works charges, but were subsequently admitted under this head by the Local Government. In the *Punjab* the charges for the Government book depôt largely exceeded the Budget provision, as it was anticipated that the depôt would have been abolished sooner than it was, and the expenses on Government schools also proved larger than

was expected, but the savings consequent on the absence of the Director of Public Instruction on furlough, and the charges for inspection, scholarships, and grants-in-aid having been under-estimated, caused the actual expenditure to approximate to the total provision in the Budget. The Revised Estimate did not make sufficient allowance for the charges under Government book depôt and Grants-in-aid. The charges of 1883-84 were exceeded by 2,1, mainly under these two heads and under Government Schools; but these excess charges were considerably reduced by savings under Direction and Inspection. The increase in *Madras* was due to insufficient provision in the Estimates for grants-in-aid and Payments by Results, and would have been greater but for the transfer of middle class schools, within municipal limits, to the municipalities concerned, and of the school of Ordnance artificers to the Military Department, as well as to smaller outlay on manufactures in Technical schools. As compared with 1883-84 there was an increase in the inspecting staff, in the number of Local Fund Normal Schools, and in the number of schools which qualified for the Government grant-in-aid. The Budget provision in *Bombay* was exceeded owing to arrear salary having been drawn by the Director of Public Instruction, to the revision of certain Deputy Inspectors' salaries, the creation of two new appointments of Inspectors for Hindustani schools, the opening of new schools, and to a special charge for scientific apparatus for the College of Science at Poona. The English charges were increased as three educational officers beyond the anticipated number came out to India.

23.—Ecclesiastical.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
159,1	TOTAL	167,4	165,2	166,3

93. There was an excess in *India* of 1,0 over Budget, owing to the appointment of higher grade officers at Gwalior and Hyderabad; and in the *North-Western Provinces* of 1,4, due to the appointment of a Senior Chaplain instead of a Junior Chaplain for the Church of Scotland at Allahabad, and to contribution to the stipends of four Ministers of the Additional Clergy Society, irrespective of any specific provision in the estimate. In *Madras* and *Bombay* the saving arising from the absence of Chaplains on furlough was larger than anticipated, and in Madras, also, the amounts for the Bishop's visitation allowance, for the travelling allowance of Chaplains and for other miscellaneous charges, were overestimated. The difference between the actuals of the two years was due to the absence on leave of the Bishop of Calcutta and his domestic Chaplain for six months in 1883-84.

24—Medical.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts
255,7	Medical Establishments	258,9	261,2	258,7
215,7	Hospitals and Dispensaries	224,1	223,3	230,6
237,9	Other Charges	239,9	245,3	244,6
7,5	England	7,6	8,1	7,9
716,8	TOTAL	730,5	737,9	741,8

94. Under "Medical Establishments" the actuals worked closely up to Budget provision on the whole, the only noticeable differences being in *Bengal* and the *Punjab*, where there were excess charges, which were nearly counterbalanced by a large saving in the *North-Western Provinces* in the salaries of Civil Surgeons. The charges for "Hospitals and Dispensaries" exceeded the estimates principally in Assam, Madras, and Bombay. The chief cause of the increase in *Assam* was the transfer from Bengal of the Inland Transport Fund Charges (1,3), for which no provision was made in the Budget. In *Madras* there was a larger outlay than anticipated on account of medical subordinates, establishment, and cost of medicines and supplies; and in *Bombay* for diet owing to an increase in the number of in-door patients, but, as a set-off to this, the grants to private Hospitals and Dispensaries were revised. About a third of these excess charges was met by the savings in *Bengal* from the above-mentioned transfer, and in the *North-Western Provinces* in the salaries of Assistant Surgeons and Hospital Assistants, and in diet and clothing of patients. Under "Other Charges" the chief increases occurred in the *Punjab*, where there was an excess over Budget of 2,7, out of which 2,0 was owing to no provision having been made for cash

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

payments for maintenance of non-criminal lunatics in asylums; and in *Madras* of 2,0 under several minor heads. Against these increases there was a saving of 1,1 in the *North-Western Provinces*, chiefly in the salaries of divisional Superintendents of Vaccination and Vaccinators. The excess in the *English* charges is more than accounted for by the payment of the expenses attending the deputation sent to India to conduct investigations regarding cholera.

25.—Political.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
251,1	Political Agencies	247,5	253,8	257,2
53,7	Charges on North-West Frontier	56,1	65,9	67,0
89,2	Political Subsidies	138,9	168,7	133,6
12,2	Entertainment of Envoys and Chiefs	13,1	20,1	15,1
29,2	Durbar Presents and Allowances to Vakeels, &c.	17,9	13,0	18,0
...	Afghan Delimitation Commission	...	110,0	183,0
32,7	Refugees and State Prisoners	33,7	40,6	41,3
38,5	Other Charges	41,0	38,8	44,1
506,6	TOTAL INDIA	548,2	710,9	759,3
26,1	ENGLAND	27,3	32,4	32,0
532,7	TOTAL	575,5	743,3	791,3

95. Under "Political Agencies" the principal variations were in India 155,8 against Estimate 146,7, in Bombay 63,0 against Estimate 61,9, and in the Punjab 10,0 against 11,6 Estimate. The excess in *India* occurred under several detailed heads, but chiefly under Service Telegrams; and that in *Bombay* under the same head, owing to the unusually large expenditure for service messages incurred by the Political Resident at Aden. The charges in the *Punjab* fell below the estimate, owing to the travelling allowances and miscellaneous charges of Political Agencies in that Province having been over-estimated in the Budget. The increase under "Charges on North-West Frontier" was caused by the cost of frontier levies and maintenance of communication having exceeded the Budget provision; and by the following items of expenditure, for which no provision was made in Budget, but included in the Revised Estimate, *viz.*, expedition against Zhob Kakars (2,4), mission to Guada (2,2), and payments for guarding hill passes (2,5). The Revised Estimate under "Political Subsidies" in *India* provided 168,7 including 149,8 for subsidy to the Amir transferred during the year from Punjab, but the actuals amounted to 133,6 only. The Budget provision for "Entertainment of Envoys and Chiefs" was exceeded in India by 2,4 and in the Punjab by 1,3, but the latter charge was counterbalanced by the saving of a similar amount in Bombay. The charges for "Durbar Presents" worked closely up to Budget figures in all the Provinces, but the Revised Estimate was taken too low in *India*, *Bengal*, and the *Punjab*. The actuals of 1883-84 in *India* included charges for the payment of a "Khilat," or present to the Chirkaree State. The "Afghan Delimitation Commission" expenses were not provided in Budget, as it was appointed in September 1884. The Budget under "Refugees and State Prisoners" did not include the allowance to Ayub Khan, as it was sanctioned in June 1884; but a sum of 9,7 was entered on this account in the Revised Estimate. The actuals, however, amounted to 8,4 only. The *Punjab* estimate under this head proved insufficient by 2,3. On the other hand, there were savings of 1,2 in the *North-Western Provinces* in the charges for the ex-Amir of Kabul and other State prisoners, and of 1,2 in *Madras* owing to the charges for Daud Shah having ceased to be drawn from March 1884. There was also a decrease of 1,0 below estimate in *Burma*, but this was chiefly due to certain allowances having been suspended. The excess over estimates under "Other Charges" was caused chiefly by the expenses attendant on the Rawalpindi Durbar, and would have been much larger but for large savings in *India* for secret service, petty construction and repairs, and other miscellaneous charges, amounting to 6,9; and in *Bombay* consequent on the transfer to Provincial Services of the cost of police employed on the Sind frontier, aggregating 2,9. The charges in *England* include 3,1 on account of the Afghan Boundary Commission, and the expenses of the British Delegate to Lisbon in connection with the Goa Treaty.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

26.—Scientific and other Minor Departments.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
136,1	Survey of India	135,0	139,8	139,5
18,6	Geological Survey	18,5	18,5	18,8
60,7	Other Scientific Departments	54,0	55,6	56,6
65,1	Cinchona and Botanical Gardens	61,7	61,6	61,9
83,1	Other Agricultural Departments	88,2	89,1	87,1
2,5	Census	1,8	6	6
33,0	Other Statistical charges	29,5	31,7	31,3
49,4	Emigration and Miscellaneous	39,9	39,6	42,2
448,5	TOTAL INDIA	428,6	436,5	438,0
20,9	ENGLAND	19,8	15,5	15,8
469,4		448,4	452,0	453,8

96. Under "Survey of India" the difference is owing to the Budget having over-estimated the portion chargeable to 5.—Land Revenue, as explained in the last two reports, and it is not necessary to repeat the particulars here. Under "Other Scientific Departments" the actuals of 1883-84 included charges for repairs of monuments of antiquity which have since been transferred to the Public Works Department. In comparison with the Budget the principal increases under this head occurred in *Madras*, from a payment of 5 to the representatives of the late Dr. A. C. Burnell for services connected with oriental researches, which was not provided in the estimate, from payments for securing a valuable collection of coins in the Central Museum, and for purchase and publication of books; and in *Bombay* from unforeseen payments, aggregating 9, made in the Archæological Department, and for Provincial Museums, and Public Observatories. Under "Other Agricultural Departments" there were increases in *India*, *Bengal*, and *Bombay*, owing, respectively, to larger payments than were anticipated for Government Bull and Stallion charges, the late Calcutta International Exhibition and the Antwerp Exhibition. The net result would also have been an excess over Budget provision, but for savings in almost every other Province, and the transfer in the *Punjab* accounts of the Kanungoe Agency charges, which were estimated at 9,0 in Budget, from this head to 5—Land Revenue Under "Census charges" the Bengal Government specially provided 1,8 in Budget for the salary of an officer, but no payment was made on this account. The increase under "Other Statistical Charges" occurred almost entirely in *Bombay*, and was due to excess expenditure for the completion of the Bombay Gazetteer, and the final adjustment of the charges for the registration of Railway traffic in the Central Provinces. Under "Emigration and Miscellaneous" there was a saving in *Burma* compared with Budget, (1,1) and with previous years' actuals, (13,0) consequent on the discontinuance of the bounty paid to Steam-boat carriers of immigrants. But in *Bengal* there was a large payment of 3,6 for refunds, for which no provision was made in the Budget.

Section E.—MISCELLANEOUS.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts.
1,512,6	RECEIPTS	1,256,1	1,369,4	1,388,0

97. The excess of actuals over estimate in this group consists of special items under the heads of Interest and Miscellaneous, as explained below in paras 98 & 101.

XXI.—Interest.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts.
	INDIA—			
250,3	Currency Investment	250,2	250,1	250,1
489,1	Loans to Municipalities, &c.	333,7	331,3	324,2
80,4	Other Receipts	59,2	85,9	93,3
	ENGLAND—			
27,6	Investment of Cash Balance	10,0	30,1	31,1
...	Premium on Loans	...	3,0	3,0
2,1	Other Receipts	...	...	8
849,5		653,1	700,4	702,5

98. There was no change during the year in the amount of the Currency investment, and the interest was realised according to the forecast. The difference under Loans to Municipalities, &c., occurs chiefly in Bengal, where the repayment of portions of the loans diminished the interest to be received; and the same thing has occurred in Madras, the Ramnad Zemindari Estate having repaid a large sum, which there was no reason to anticipate. This is made clear by the figures noted below. The excess in "Other Receipts" is due to interest on overdrawn capital of Guaranteed Railways having been estimated at 5,4, whereas the recoveries amounted to 24,8. This interest cannot be accurately estimated, as it depends upon the sums paid to, and withdrawn from, the Secretary of State by the Guaranteed Railway Companies, and during the year under review the withdrawals exceeded the receipts by 1,120,9. As regards the sums realised in England, the first amount is due to the loan of 3,000,0 having been issued in May, owing to the favourable state of the market, whereas the money was not required till August for the discharge of debentures. During the interval the Secretary of State's cash balance was abnormally large, a considerable sum was invested temporarily, and the rate of interest obtained was high. The Premium on Loans was obtained on the sale of 95,0 India 3½ per cent. stock which was not anticipated when the Budget was framed.

Description of Loans.	Balance outstanding. 31st March 1882.	31st March 1883.	31st March 1884.	31st March 1885.
Native States	1,318,3	1,214,7	1,146,2	1,071,1
Presidency Corporations	5,595,8	5,408,7	5,333,9	5,470,1
Mofussil Municipalities	382,6	383,9	405,9	381,9
Landholders and others	659,9	654,1	607,3	572,9
Local Fund Committees	108,0	104,1	100,3	64,3
Advances for Ceylon Cable	...	...	...	9,2
	8,064,6	7,765,5	7,593,6	7,569,5
Interest received	358,0	343,2	359,1*	324,2
Percentage reckoned on balance at end of year	4·439	4·419	4·729	4·282

* Excluding Bombay arrears 130,0.

Section E.—MISCELLANEOUS—*continued.*

XXII.—Receipts in aid of Superannuation, &c.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts
118,6	Subscriptions to Military Funds, India	115,3	112,5	107,6
32,6	Appropriation from old Military Funds	35,5	39,1	35,8
50,0	Other items	43,4	51,9	55,8
101,2	Subscriptions to Widows' and Military Funds, England	99,5	97,8	98,0
302,4	TOTAL	293,7	301,3	297,2

99. The subscriptions to the old Military Funds continue to diminish as the subscribers fall off, and in proportion to their abatement is the increase in the appropriation from the capital of the funds. The only capital, however, which now remains, belongs to the late Bengal Military Orphan Fund, and it will probably become exhausted in two or three years, when the appropriations will cease altogether. During this year the rents of the Orphangunge Estate near Calcutta, included in the head Subscriptions to Military Funds, have been credited gross instead of net as formerly. The increase in "other items" is due to a larger number of officers having been lent for Foreign Service, from whom contributions were levied under Chapter 3 of the Civil Pension Code.

XXIII.—Stationery and Printing.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts.
50,6	TOTAL	53,0	48,1	47,5

100. The principal differences under this head are in Bengal, North-Western Provinces, and Madras. In *Bengal* less work was done and less materials supplied to Municipalities and Local Fund Committees than was expected, and in *North-Western Provinces* the estimate was too high, owing to a misclassification in the accounts of the previous year. In *Madras* the actuals in 1884-85 have considerably improved under Sale of Acts and other receipts, including money realised by sale of printed copies of judgments and credited as revenue for the first time. There will, in future, be a falling off under this head in the Punjab, owing to the abolition of the Central Press at Lahore.

XXIV.—Miscellaneous.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts.
	INDIA—			
52,6	Unclaimed Deposits and Bills	32,2	65,4	72,7
63,7	Rents	63,7	65,0	64,9
15,3	Premium on Bills	13,3	14,7	14,1
173,6	Other Items	139,1	166,5	180,0
	ENGLAND—			
9	Fines and Penalties	8,0	8,0	1,1
4,0	Other Items			8,0
310,1	TOTAL	256,3	319,6	340,8

101. The Unclaimed Deposits and Bills include the balances of the late Government Agency, written off as escheats in 1884-85. The unclaimed deposits in Bengal were 24,1 more than the estimate, including 1,4 as sale proceeds of the Nizamut Fund investment, and 5,7 as recoveries on account of Port Canning; and there was a similar excess of 4,8 in North-Western Provinces. In the next two heads the accounts confirm the estimate. The excess in Other Items includes a sum of 8,2 connected with certain old adjustments with Her Majesty's Imperial Government relating to the Zanzibar Agency and the Muscat subsidy, and 1,7 Gain by Exchange on Persian coins used by the Afghan Delimitation Commission. There were also larger realisations of partition fees in Monghyr, Mozufferpore, and Shahabad, and larger recoveries from Local Funds in Bengal towards the cost of controlling and account officers, the rate having been raised from 1 to 1·54 per cent. as well as a credit of 10,1 as contribution from Municipalities to District Boards in the North-Western Provinces, formerly divided between Education and Medical.

Section E.—MISCELLANEOUS CIVIL CHARGES.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
3,882,5	EXPENDITURE	3,973,8	3,909,5	3,876,7

102. In this group there have been considerable savings in Territorial and Political Pensions, a good portion of which appears to be of a permanent character. The charges for printing continue to increase, the excess in 1884-85 being 13,1 over Budget and 11,8 over the previous year. Stationery shows a saving as compared with the Budget, owing to an erroneous estimate.

27.—Territorial and Political Pensions.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
175,7	India	169,0	168,1	167,3
38,1	Central Provinces	37,9	38,2	37,6
3,5	Burmah	3,5	3,2	3,3
2,6	Assam	3,0	2,7	2,7
104,4	Bengal	103,1	103,5	101,8
99,8	North-Western Provinces	110,0	100,0	88,8
49,5	Punjab	47,9	45,7	43,8
106,0	Madras	107,6	103,7	103,4
90,9	Bombay	93,3	86,0	86,7
670,5	TOTAL INDIA	675,3	651,1	635,4
79,8	ENGLAND	31,3	28,9	28,9
750,3	TOTAL	706,6	680,0	664,3

103. The *India* figures in 1883-84 were unusually high, owing to payment of certain pensions that were in arrears from September 1873, and to a marriage donation to three daughters of the Ex-King of Oudh. In *Bengal* the decrease is due to savings in the marriage grant to the family of the Nawab Nazim of Moorshedabad, to transfer of payment of certain pensions to London, and to reductions effected by death of grantees against a new payment of 5,0 to the eldest son of the Nawab. The *North-Western Provinces*' estimate was too high. The reduction in the *Punjab* and *Bombay* is ascribed to lapses; and in *Madras* to the death of three stipendiaries who received over ₹5,000 per annum each, and to the transfer to the head Allowances and Assignments of allowances to certain chuttrums or Rest Houses in Tanjore. The reduction in England is due to the death of H. H. Nawab Nazim Syed Munsoor Ali.

28.—Civil Furlough and Absentee Allowances.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
216,9	England	220,0	200,0	198,3
3,4	India	9	15,7	14,8
220,3	TOTAL	220,9	215,7	213,1

104. These allowances are of such a fluctuating character that it is difficult to estimate them. The saving in *England* was under all the sub-divisions of this head. The excess in *India* is due chiefly to many charges having been classified under this head for the first time, as they were formerly debited to the several departments to which the absentees belonged. The charge in *Madras* is abnormally heavy, and consists of furlough allowances paid in England to British officers formerly employed in Mysore. The Secretary of State has ordered that such allowances shall not be recovered from the Mysore State in respect of services rendered up to 30th September 1882, and they should accordingly be treated in future as final payments in the Home Accounts of the Government of India.

Section E.—MISCELLANEOUS CIVIL CHARGES—*continued.*

29.—Superannuation Allowances and Pensions.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	PENSIONS AND GRATUITIES—			
53,8	India	58,1	53,5	52,7
15,1	Central Provinces	14,8	14,4	14,8
17,4	Burmah	17,3	17,7	17,5
4,9	Assam	5,3	5,1	5,2
114,0	Bengal	126,8	123,8	120,0
114,9	North-Western Provinces	124,3	126,0	125,6
56,7	Punjab	56,3	57,0	58,9
86,6	Madras	88,4	89,9	92,1
118,4	Bombay	119,0	122,2	123,7
581,8	TOTAL PENSIONS AND GRATUITIES	610,3	609,6	610,5
	DONATIONS TO CIVIL FUNDS—			
35,2	Bengal Civil Fund	48,5	49,0	49,0
85,7	Madras	90,0	89,5	89,5
120,9	TOTAL CIVIL FUNDS	138,5	138,5	138,5
	MILITARY AND MEDICAL FUNDS—			
17,1	India	16,8	16,5	13,7
12,0	Madras	11,3	11,8	12,6
7,5	Bombay	7,0	10,0	7,3
36,6	TOTAL MILITARY AND MEDICAL FUNDS	35,1	38,3	33,6
739,3	TOTAL CHARGE IN INDIA	783,9	786,4	782,6
1,417,0	PAYMENTS IN ENGLAND	1,422,0	1,420,0	1,418,7
2,156,3	GRAND TOTAL	2,205,9	2,206,4	2,201,3

105. In *Bengal* there was a saving of 9,7 in pensions, compassionate allowances, and gratuities, due chiefly to large transfers of pensions to other Provinces, and to smaller payments under the second heading. On the other hand, there was a payment of 2,9 to officers of the Public Works Department, not anticipated in the Budget. As regards the donations to Civil Funds, the actuals of 1884-85 compare satisfactorily with the Budget, but they differ from the accounts of the previous year. These differences are ascribed, in the case of the Bengal Civil Fund, to certain sums pertaining to 1883-84 having been taken in the accounts of 1882-83, and to the growth of the Capital of the Madras Civil Fund. The *India* estimate of the Military and Medical Funds was too high.

30.—Stationery and Printing.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	PRINTING ESTABLISHMENTS—			
85,1	India	79,2	89,2	91,1
6,5	Central Provinces	5,8	6,2	6,3
8,7	British Burmah	10,1	8,9	9,9
3,5	Assam	3,2	3,3	3,7
32,3	Bengal	30,5	33,2	35,4
29,7	North-Western Provinces	34,6	32,1	33,4
22,5	Punjab	24,4	21,1	20,4
35,1	Madras	32,7	33,3	33,7
27,3	Bombay	28,9	28,1	28,6
250,7	TOTAL PRINTING	249,4	255,4	262,5
	STATIONERY—			
67,5	Bengal	58,9	75,1	82,1
29,4	Madras	46,8	13,6	13,2
25,6	Other Provinces	28,2	24,9	26,0
112,5	England	156,5	133,7	129,6
235,0	TOTAL STATIONERY	290,4	247,3	250,9
485,7	TOTAL	539,8	502,7	513,4

Section E.—MISCELLANEOUS CIVIL CHARGES—*continued.*

106. It has been noted, in former reports, that the expenditure on printing shows a strong tendency to increase, and this is borne out by the figures entered above. The printing expenditure during the five years 1880-81 to 1884-85 has been 227,7, 240,1, 241,1 250,7, and 262,5 respectively. The increase in 1884-85 is due in *India* to larger outlay in the Government Central Press, Calcutta, in *Burma, Assam,* and *North-Western Provinces* chiefly to purchase of machinery and type, and in *Bengal* to overtime allowance and other incidental charges resulting from increase of work.

107. As regards Stationery, the excess in *Bengal* is due to increased demand for locally manufactured paper. In *Madras* the Budget was based on the actuals of the former year, which included the value of stationery obtained from England, but this charge now appears finally in the account of the Secretary of State. The reduction in payments made in *England* has ensued from smaller indents sent from this country.

31.—Miscellaneous.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
8,6	Allowances, Rewards, &c.	6,2	7,0	5,5
23,5	Remittance Charges	27,8	25,4	26,1
8,6	Books and Periodicals	5,9	7,7	8,2
26,8	Charitable Payments	28,5	27,6	28,0
19,3	Rewards for destruction of wild animals	16,7	21,8	24,5
75,8	Petty Establishments	82,4	74,4	75,5
3,8	Petty Construction and Repairs	4,6	4,0	3,3
25,2	Miscellaneous Refunds	40,3	37,0	5,2
58,3	Other Charges	56,2	74,8	76,4
249,9	TOTAL INDIA	268,6	279,7	252,7
	ENGLAND—			
20,1	Fines and Penalties remitted Other Items	32,0	25,0	31,9
270,0	TOTAL	300,6	304,7	284,6

108. Considering the fluctuating character of these charges, the actuals compare favourably with the estimate, except in the following instances. In the *India* estimate a sum of 30,0 was taken for miscellaneous refunds, but it was not wanted. In the *India* account the head "Other charges" includes an exceptional payment of 23,5 to Messrs. Blackwood & Co., for damage and detention of petroleum imported by them into Calcutta. In *Burmah* the cost of petty establishments is less than the estimate by 5,0, owing to the establishment and contingencies of certain steam launches being now charged to Marine. In *Bengal* "Other charges" amount to 27,7 against a Budget provision of 18,2, the difference being made up chiefly of 1,5 on account of irrecoverable balance of a loan made to Tendook Pulgar, 4,6 on account of special Commissions of Enquiry relating to Excise, Opium, Rent, Local Self-government and Chowkeydaree, and 1,7 on account of sums paid to certain holders of debentures of the Port Canning Municipal Estate. In *Madras*, rewards for the destruction of wild animals aggregate 12,1 against 5,3 in the estimate, the excess being ascribed to enhancement of rates, and to the permission given to Tehsildars to grant the maximum reward in all cases. The difference in the *English* figures is due to remission of fines and penalties being entered as payments in the estimate, but deducted from the receipts in the accounts. On the other hand, the payments on account of Marine Insurance, &c., exceeded the estimate.

Section F.—FAMINE RELIEF AND INSURANCE.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
1,500,0	EXPENDITURE	1,750,0	1,500,0	1,500,0

109. The total of this head is, as a rule, 1,500,0, a moiety of which is ordinarily to be spent on Protective Works, and the other half on Famine Relief and Reduction of Debt; but the unspent portion of the Public Works share of the grant may be utilized by the Public Works Department in a subsequent year. When the Estimate of 1884-85 was framed, a sum of 250,0 was added to the normal grant on account of a contribution given by the North-Western Provinces Government towards the construction of the Jhansi-Manickpur State Railway. This sum was, however, refunded to the Provincial Government during the year, and the revised estimate was, accordingly, framed for the normal amount. The outlay on Protective Works, was smaller than expected, and, consequently, a somewhat larger sum became available for reduction of debt than was provided for in the Budget.

32.—Famine Relief.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
9,2	EXPENDITURE	...	12,0	7,4

110. The principal charges here are 3 on account of irrecoverable advances made in Madras in 1876-78, and 2 spent in connection with the water-supply in some of the districts of that Presidency, The remainder consists of small sums expended in alleviating distress in the Lushae country, in the Beerbhum district in Bengal, and in the Kaladgi district in Bombay.

33.—Protective Works—Railways.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
626,5	TOTAL	1,138,6	898,1	898,1

111. The grant cannot now be distributed by Provinces and Railways, as the funds allotted for Railway construction are dealt with as a whole, a grant being taken from the famine insurance account for Protective Railways. See para. 185. The difference of 240,5 between the Budget and accounts of 1884 is due chiefly to a saving of 250,0 in the construction of the Jhansi-Manickpur State Railway. There was also a sum of 5 which was expected in the accounts of 1884-85, but passed into those of the previous year. On the other hand the expenditure was increased by 1,0 transferred from the Irrigation portion of the grant for Protective works.

34.—Protective Works—Irrigation.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
283,2	TOTAL	310,1	270,6	253,0

112. The details of this expenditure are given below. The charge in 1884-85 against the Orissa Coast Canal represents a grant-in-aid sanctioned by the Government of India after the estimate was passed. The increase in *North-Western Provinces and Oudh* is due to works on the Betwa Canal having been pushed on towards the close of the year, with the view of opening the canal at an early date. The decrease in the *Punjab* is due partly to delay on the side of the contractors, and partly to the heavy rains which retarded the progress of works on certain distributaries of the Swat River canal. In *Madras* the grant for the Rushikulya Project could not be fully utilised owing to scarcity of labour, and delays in acquiring and paying for lands. The saving in *Bombay* is attributed to scarcity

Section F.—FAMINE RELIEF AND INSURANCE.—*continued.*

of labour on the Nira Canal and the Mhasvad Tank, on account of the Eastern Deccan Railway works being in full progress in the vicinity.

35.—Reduction of Debt.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
581,1	TOTAL .	301,3	319,3	341,5

113. The amount available for the reduction of debt is the balance of the famine insurance account, after paying for direct relief and for protective works against famine. In the Budget of 1884-85 the cost of protective works was estimated at 1,448,7, or at 1,198,7 excluding the Provincial grant of 250,0 mentioned in para. 109. This left a balance of 301,3 as noted above, to be appropriated to reduction of debt, but the accounts shew as expended on relief 7,4, and on protective works 1,151,1, leaving a balance of 341,5, of which 2, 6 was appropriated towards the discharge of 5 and 4 per cent. Government securities, the residue being taken in reduction of the amount to be raised by loans during the year.

Section G.—PRODUCTIVE PUBLIC WORKS REVENUE ACCOUNTS.

114. The following is a general statement of the Revenue Accounts:—

	State Railways.	East Indian Railway.	Eastern Bengal Railway.	Guaranteed Railways.	Irrigation.	TOTAL.
Specific Revenue	3,363,6	4,310,4	453,9	7,606,7	1,075,0	16,809,6

(*a*) Exchange is taken for the purpose of this statement at Rs for each sterling pound paid.

115. State Railways and East Indian Railway did not maintain the improvement they exhibited in 1883-84, but 1884-85 was a specially bad year for the East Indian Railway, owing to the declension of the wheat trade, and, for other State Railways, owing to special expenditure on some of the lines. The Eastern Bengal Railway appears as a State Railway for the first time this year. The Guaranteed Railways give a slightly worse return than last year. But the figures of 1883-84 include those of the Eastern Bengal as a guaranteed line. Irrigation is not equal to last year, but here also special expenditure was incurred to repair damage done by floods.

Section G.—REVENUE FROM PRODUCTIVE PUBLIC WORKS.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
13,240,5	RECEIPTS . .	13,631,1	12,923,9	13,147,0

116. The Revenue of the East Indian Railway especially was severely affected this year by the falling off in the wheat trade, which is the principal cause of the diminished revenue exhibited in these figures. Irrigation and Navigation shows an increase in North-Western Provinces, Punjab and in Madras, but the last is partly due to transfer of receipts from XXVIII, Land Revenue. The portion of Land Revenue due to Irrigation has not reached the forecast, owing chiefly to large remissions in Madras.

XXV.—State Railways Gross Earnings—including East Indian and Eastern Bengal Railways.

(a) The Capital cost 936.5 is included in Eastern Bengal Railway.

Section G.—REVENUE FROM PRODUCTIVE PUBLIC WORKS—*continued.*

Accounts. 1882-83.	1883-84.	East Indian Railway.	Budget.	1884-85. Revised.	Accounts.
		Earnings—			
1,221.1	1,291.9	Coaching	1,265,0	1,313,5	1,326,7
3,235.7	3,635.9	Goods	3,476,9	2,864,0	2,885,3
144.5	71,6	Miscellaneous	108,3	92,7	98,4
4,601.3	4,999.4	Total .	4,850,2	4,270,2	4,310,4

117. The large falling off is due chiefly to the collapse of the export wheat trade, owing to the low market price of wheat in England, and to the general depression in trade. The traffic improved in March and yielded more than the Revised Estimate.

Eastern Bengal Railway.	Budget.	1884-85. Revised.	Accounts.
Earnings—			
Coaching	129,3	139,0	142,0
Goods	262,5	250,0	248,9
Miscellaneous	38,2	51,0	63,0
Total .	430,0	440,0	453,9

118. The Budget Estimate for 1884-85 provided for the estimated earnings of this line for the last nine months of the official year, *viz.*, from 1st July 1884,—the date on which the line was taken over by Government from the late Eastern Bengal Railway Company,—up to 31st March 1885, but it was subsequently decided to amalgamate the Calcutta and South-Eastern State Railway and the Poradaha-Damukdia Section of the Northern Bengal State Railway with it. The Revised Estimate consequently provided for the transactions of the combined undertaking, and amounted to 440,0 including a special credit of 29,5 on account of the estimated share of the assets of the Fire Insurance and Flotilla Reserve Funds of the late Eastern Bengal *Guaranteed* Railway, creditable to the Imperial Government. The actuals have amounted to 453,9 against an estimate of 440,0. The increase is due principally to the coaching traffic having exceeded expectations, owing to a Hindu festival at the end of March 1885, to certain charges recoverable from the Bengal Central Railway not having been entered in the estimate of receipts, and to better progress in realization of outstandings than was anticipated.

Other State Railways—Imperial.

119. *Rajputana-Malwa State Railway.*—The Revised Estimate was reduced by 47,5 owing to loss of traffic in consequence of breaches on this line and on the Bombay, Baroda and Central India Railway during the monsoon, and the small demand for wheat, as also to a reduction in the rate of charge against the Rewari-Ferozepore State Railway for hire of rolling stock. The actuals are better in consequence of the newly-opened sections of the last-named line. *Sindia State Railway.*—The excess over estimate is due to development of traffic generally. This line is worked by the East Indian Railway Company, the net receipts of the year being divided between the Company and the Government in the ratio of 1 to 4. *Wardha Coal State Railway.*—The diminution of revenue is principally due to reductions in the selling price and rates for carriage of coal, and to the issue of coal for consumption on the Railway and Colliery at cost price. *Umeria Colliery.*—It was expected that the Colliery would begin to earn during 1885-86, but a small sum came into the accounts of the preceding year. *Punjab Northern State Railway.*—The improvement is due to the Rawul Pindee Durbar. *Indus Valley State Railway.*—When the Budget Estimate for 1884-85 was being dealt with, it was not considered safe to place the receipts of this line at a higher figure than 607,5, as the low price of wheat in Europe rendered the continuance of the large export traffic in that commodity uncertain. The wheat traffic has proved a good deal better than anticipated, while the export seed traffic has been unusually large. The improvement is also partly ascribed to the carriage of troops and military stores. *Dhond and Manmad State Railway.*—The traffic on this line i

Section G.—REVENUE FROM PRODUCTIVE PUBLIC WORKS—*continued.*

slowly but steadily improving. From 1884-85 the gross earnings and working expenses are entered in the accounts, instead of the net receipts only.

Other State Railways—Provincial.

120. *Nagpur and Chhattisgarh State Railway.*—The revenue was affected by the bad state of the grain market, and by reductions in the rates for carriage of grain and salt. *Burma State Railways.*—An increase of 16,6 is due to the additional mileage opened on the Sittang Railway, the receipts from which have proved better than expected, and to the rich rice crop in Burma this season. *Calcutta and South-Eastern State Railway.*—The Budget Estimate provided for the transactions of the year. The line was, however, amalgamated with the Eastern Bengal State Railway, with effect from 1st July 1884, and consequently the accounts represent actual receipts realized from 1st April to 30th June 1884 only; the transactions of the remaining nine months of the year are included with the Eastern Bengal State Railway. *Tirhoot State Railway.*—The accounts shew 5,0 worse than the original estimate, owing chiefly to the date of opening of the new sections being later than was expected. *Northern Bengal State Railway.*—The accounts are 23,4 worse than the Budget Estimate. This difference is due partly to the transfer of the Poradaha Section of the Northern Bengal State Railway to the Eastern Bengal State Railway from 1st July 1884, and partly to the reduction of the charge levied for crossing the Ganges on the opening of the extension of the Poradaha Section to the new Ghat at Golabnagar; but the greater portion of the decrease is due to the traffic in jute and gunny not having revived as expected. *Patna and Gya State Railway.*—Like the Sindia State Railway, the estimates for this line are prepared for the calendar years 1884 and 1885. The traffic on this line has turned out somewhat better than was expected. *Cawnpore-Achneyra State Railway.*—The decrease of 7,1 may be attributed to the loss of traffic in consequence of breaches on the line during the monsoon, but for which the Budget Estimate would probably have been realized. *Dildarnagar-Ghazipur State Railway.*—The line is worked by the East Indian Railway. The traffic has not been as good as expected. *Amritsar-Pathankot State Railway.*—The traffic of this line also has not proved as good as was expected, but when the Budget Estimate was framed, it was scarcely possible to make a trustworthy estimate, as the line had only just been partially opened.

XXVI.—Guaranteed Railways, Net Traffic Receipts.

7,836.0	4,147.8	3,688.2	3,246.9		7,652,0	4,039,0	3,613,0	7,479,1	4,105,1	3,374,0	7,666,7	4,128,4	3,478,3	54·2

121. The expenses of the *Bombay, Baroda and Central India Railway* would have come nearer to the estimate but for breaks on the line during the monsoon. The figures of the *Eastern Bengal Railway* represent the actual transactions for the three months to 30th June 1884 when the line was taken over by Government. The traffic which fell off in 1883-84 did not improve during the period under review. The increase in expenses is due to charges for winding up the Company's affairs not having been fully provided for in the estimate. In the *Great Indian Peninsula Railway* both receipts and payments appear to have been under-estimated. The *Madras Railway* received increased traffic especially about the end of the year, and considerable reductions were at the same time effected in the expenses. The traffic on the *Oudh and Rohilkhund* line during 1883-84 was very good, and when the Budget Estimate of the following year was

Section G.—REVENUE FROM PRODUCTIVE PUBLIC WORKS—*continued.*

framed, there was no reason to fear an abatement in this respect. The prospects, combined with the probable opening of an extension, justified the Budget Estimate of receipts being placed at 590,0. The traffic, however, fell off considerably, and the extension was not opened as early as expected. The expenses were reduced owing to the smaller traffic to be worked, and to delay in the opening of the extension. The reduction would have been greater but for the heavy outlay in renewals of the fastenings of permanent way. In the *Sindh, Punjab and Delhi* line the goods traffic fell off considerably from June to September 1884, owing chiefly to the low price of wheat in Europe, but the major part of the decrease is nominal, and results from a change in the system of recording receipts and charges on account of mileage and demurrage, by which the *net result* is now shewn on the receipt or charge side of the account, as the case may be, instead of the gross amounts on both sides as formerly. It has also been caused by a reduction in the rates for carriage of Revenue stores. These changes have led to a corresponding reduction in charges. As regards the *South India* line, the traffic during the first eight months of the year was exceedingly good, when disastrous floods occurred along the line, which caused several breaks, and interrupted the service for a comparatively long period. Judging from the latest returns, it was not considered safe to place the receipts in the Revised Estimate at a higher figure than 420,0 against 400,0 provided in the Budget, but the accounts shew a better result due chiefly to the extremely large traffic to Kumbaconam in connection with a festival. The expenses increased on account of heavy repairs and renewals necessitated by the floods. The receipts, expenses and net receipts of these lines for the past six years are given in the following statement:—

	Receipts. 1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	Expenses. 1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	Net Receipts. 1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.

XXVII.—Irrigation and Navigation, Direct Receipts.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	1884-85. Accounts.
	Imperial—			
239,6	Punjab	235,0	271,1	268,9
15,4	Madras	14,9	12,6	27,2
29,6	Bombay	30,1	30,4	28,5
284,6	Total Imperial .	280,0	314,1	324,6
	Provincial—			
117,0	Bengal	125,0	120,0	130,7
535,0	North-Western Provinces	537,6	614,0	619,7
652,0	Total Provincial .	662,6	734,0	750,4
936,6	Total .	942,6	1,048,1	1,075,0

122. The improvement in the *Punjab* represents the net balance of an increase on the Western Jumna Canal and of a falling off on the Bari Doab and Sirhind Canals. The increase on the Western Jumna Canal is due to the area of irrigation being extended, owing to scanty rainfall during the rabi season of 1883-84 and the early part of the kharif season of 1884, but this was checked towards the end of the year owing to heavy rain and great sickness in the Karnal district. The falling off on the Bari Doab and Sirhind Canals is the result of irrigation being less than was anticipated. The increase in *Madras* occurs chiefly on the Kurnool Canal, and is due partly to the inclusion under head

s

Section G.—REVENUE FROM PRODUCTIVE PUBLIC WORKS—*continued.*

'XXVII—Direct Receipts" of the revenue of the canal collected in the Civil Department, which was provided for under "XXVIII—Land Revenue," and partly to the excess collections of water-rates owing to the rapid extension of wet cultivation. The decrease in Bombay is the net result of several small increases and decreases.

123. As regards provincial revenue, the revised estimate for *Bengal* was reduced in consequence of a falling off in the water-rates and navigation receipts on the Orissa and Midnapore Canals, but these apprehensions were neutralised by larger recoveries than anticipated in the Sone Canals. The excess in *North-Western Provinces* is traceable to the exceptionally favourable rabi of 1883-84 and kharif of 1884-85, as well as to large collections in all the canals in that part of the country.

XXVIII.—Portion of Land Revenue due to Irrigation.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	Accounts.
87,2	North-Western Provinces	87,2	87,2	87,2
72,5	Punjab	35,5	36,5	33,4
336,9	Madras	332,1	348,7	296,2
37,5	Bombay	53,6	49,6	49,0
534,1	TOTAL .	508,4	522,0	465,8

124. Here the decrease chiefly occurred in Madras, and was mainly due to exceptionally large remissions granted during, the year on the Cauvery Delta System, in consequence of heavy floods, and partly to the transfer of the receipts in the Civil Department, on account of water-rates of the Kurnool Canal, to "XXVII—Direct Receipts."

Section G.—EXPENDITURE ON PRODUCTIVE PUBLIC WORKS (REVENUE ACCOUNT).

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	Accounts.
12,032,8	EXPENDITURE . . .	12,542,8	12,358,0	12,371,7

125. Here the variations from Estimate are not great. The East Indian Railway reduced expenditure is consequent on the reduction of traffic, but on some of the other State Railways additional outlay become necessary from damage by floods and renewals of sleepers and permanent-way.

36.—State Railways Working Expenses:—Including East Indian and Eastern Bengal Railways.

1883-84. Accounts.	1884-85. Budget.	1884-85. Revised.	Accounts
3,492,9	3,852,7	3,766,3	3,770,0

126. The particulars of these charges according to Railways are given in para. 116. The following remarks explain the discrepancy between Estimate and Accounts:—

East Indian Railway.

Accounts. 1882-83.	Accounts. 1883-84.		1884-85. Budget.	1884-85. Revised.	Accounts.
		WORKING EXPENSES—			
732,5	710,0	Maintenance	646,5	596,7	560,5
449,5	426,9	Locomotive	464,2	450,3	441,9
153,6	160,8	Carriage and wagon	165,3	174,1	160,9
279,3	300,3	Traffic	299,4	280,6	280,4
207,3	189,2	General and Miscellaneous . .	244,6	198,3	194,2
1,822,2	1,787,2	TOTAL WORKING EXPENSES .	1,820,0	1,700,0	1,637 9
247,2	209,6	½ Surplus profits paid to the Company . Contribution to Provident Fund of 1 per cent. on net Traffic Receipts . . .	232,5	-191,3	191,3
2,069,4	1,996,8	TOTAL E. I. RAILWAY .	2,052,5	1,891,3	1,829,2

127. The saving in working expenses is due to the reduced traffic noticed in para. 117, as well as to curtailment of outlay on renewals, &c. The diminished amounts of surplus profits and contribution to Provident Fund follow the abatement of net earnings. The Company's share of the profits is not now passed through the Government accounts.

Eastern Bengal Railway. *

	1884-85. Budget.	1884-85. Revised.	Accounts
WORKING EXPENSES—			
Maintenance	33,8	34,3	40,8
Locomotive	42,9	45,5	48,6
Carriage and wagon	14,3	13,9	16,1
Traffic	45,8	44,4	50,5
General and Miscellaneous . .	63,2	41,9	32,7
TOTAL .	200,0	180,0	188,7

* From 1st July 1884.

128. The saving on the Budget is due to the expenses having been over-estimated in the latter, as there was considerable doubt at that time as to the nature and amount of the charges likely to be incurred by Government in connection with taking over the line, which, for the first time this year, appears in the accounts as a State Railway.

Section G.—EXPENDITURE ON PRODUCTIVE PUBLIC WORKS (REVENUE ACCOUNT)—*continued.*

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
1,705,7	**Other State Railways**	1,832,7	1,886,3	1,943,4

129. The principal difference under this head relates to the Dhond and Manmad line (67,3), the working expenses of which are entered distinctly in the accounts for the first time, instead of being deducted from the earnings. The Rajputana-Malwa Railway shows an expenditure of 8,2 over the estimate, due to heavy renewals and to charges for repairing breaches on the line; but, on the other hand, the consumption of fuel was considerably over-estimated. There is also an excess of 7,2 in the Punjab Northern, of which 4,2 is ascribed to the demand for extra trains on account of the Durbar held at Rawul Pindee. The Indus Valley line shows a saving of 20,7 owing to a reduction of the expenditure in the Locomotive Department, chiefly under the head of Fuel, as well as to large credits received from the Sind-Pishin State Railway, Northern Section, on account of hire of stock, &c.

130. As regards the Provincial Railways, the main saving, as compared with the Budget, is in the Calcutta and South-Eastern Railway (11,4), but this arises from the line having been amalgamated with the Eastern Bengal State Railway from 1st July 1884; there was also a saving of 2,6 in the Bareilly-Phillibit line from delay in opening it, and of 2,5 in the Amritsar-Pathankot from no data being available for a trustworthy forecast at the time that the estimate was framed. The main excess occurs in the Burma State Railways, and amounts to 17,0. It has arisen chiefly through a misunderstanding on the part of the Manager of the line in providing, in the original estimates of the year, for maintenance charges on the new lengths of the Sittang Railway against Capital instead of against Revenue. There has been larger expenditure also on account of repairs to engine and vehicle stock, and on new minor works for the Carriage and Wagon Department, than anticipated. The other excesses are 10,5 in the Nagpur-Chattisgarh from repairing damages caused by floods; 16,9 in the Tirhoot from extensive renewals of sleepers and permanent-way, the construction of a jetty, and increased establishment; 12,0 in the Northern Bengal from large replacement of sleepers and ballast, and heavy expenditure in repairing Ferry Steamers; and 3,9 in the Patna-Gya from contribution to the Provident Institution of the East Indian Railway, which works the line, and from hire of stock.

37.—Guaranteed Railways, Surplus profits, Land and Supervision.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	MOIETY SURPLUS PROFITS—			
110,2	Bombay, Baroda and Central India . . .	140,0	146,4	146,4
115,1	Eastern Bengal Railway	40,0	26,4	26,4
344,7	Great Indian Peninsula Railway . . .	265,0	258,8	258,7
67,3	LAND AND CONTROL	85,0	63,5	61,4
637,3		530,0	495,1	492,9

131. The decrease in Moiety Surplus Profits occurs, for the most part, in the payments to the Eastern Bengal Railway, which did not earn a surplus during the half-year ended 30th June 1884. The traffic was dull, but the working expenses were also enhanced owing to the heavy charges connected with the closing of the Company's business. The payments to the Great Indian Peninsula Railway were 6,3 less, and to the Bombay, Baroda and Central India Railway 6,4 more, than the original estimate. The differences are due to the net earnings, during the period in which the surplus was earned, having proved respectively a little worse and a little better than the estimates. These differences are, however, not important.

132. Under Land and Control the principal difference occurs in *Bombay*, where there is a saving of 2,0 under "Control" and of 8,8 under "Land." The former is partly due to changes in the establishment, but principally to a larger credit from the Southern Mahratta Railway Company on account of supervision charges, owing to additional lines taken up by the Company. Under Land the saving is due principally to land, provided for in the original estimate for a new engine-shed and marshalling sidings at Parell, not being needed by the Great Indian Peninsula Railway, as the project has been abandoned. Similar

Section G.—EXPENDITURE ON PRODUCTIVE PUBLIC WORKS (REVENUE ACCOUNT)—*continued.*

savings occurred in the *Punjab* and *North-Western Provinces* from the retirement of Major-General Medley at Lahore, from the appointment of Deputy Consulting Engineer, North-Western Provinces, not having been filled for nearly three months, and from diminished payments on account of land. On the other hand there was a small increase in *Madras* to meet charges connected with land taken up for the Beypur-Calicut extension of the Madras Railway. The reserve of 7,0 in the Budget was not required.

38.—Irrigation and Navigation, working expenses.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	IMPERIAL—			
98,9	Punjab	122,0	112,0	105,5
90,4	Madras	92,1	98,0	99,9
24,2	Bombay	28,9	27,9	27,5
213,5	TOTAL .	243,0	237,9	232,9
	PROVINCIAL—			
106,9	Bengal	112,4	113,3	118,0
194,4	North-Western Provinces	206,7	230,6	220,5
301,3	TOTAL .	319,1	343,9	338,5
514,8		562,1	581,8	571,4

133. The decrease in *Punjab* is due to savings in establishment charges, and to unavoidable delay in starting the new Hissar Rajbuhas, as well as to the Sirhind Canal for which very close estimates could not be made owing to the comparatively recent date on which it was opened. In *Madras* additional expenditure was incurred on the Godavari and the Cauvery Delta systems for repairing damages caused by floods. The saving in *Bombay* relates chiefly to establishment, tools, and plant. The difference against *Bengal* is connected with the Sone Canals, and is due to an error in estimating. In the *North-Western Provinces* additional expenditure was rendered necessary by damage done by heavy floods to the Nadraj Aqueduct on the Lower Ganges Canal and to other Canals, but the full excess allowed in the Regular Estimate was not spent, as, under orders of the Local Government, the revenue expenditure from provincial funds was considerably curtailed during the year.

39.—Charges in respect of Capital.

(a)—Interest on Debt.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	INTEREST ON CAPITAL FOUND BY GOVERNMENT—			
1,329,8	State Railways	1,425,5	1,409,4	1,407,5

...		2,870,1	2,880,5	2,878,6
2,678,3				

Section G.—EXPENDITURE ON PRODUCTIVE PUBLIC WORKS (REVENUE ACCOUNT)—*continued.*

134. As explained in former reports, the Capital charge for State Railways depends upon the progress of construction during the year, and differs from the estimate according as the actual outlay differs from the expected expenditure. The following statement shews how the interest entered above has been calculated :—

Capital Expenditure.	State Railways.	Irrigation.
Capital Expenditure at end of 1883-84	33,294,9	21,499·3
Capital transferred from ordinary, 1884-85	30,6	—11,5
Cpital Expenditure during 1884-85	2,922,5	699,4
Capital Account at the end of 1884-85 being sum of the last three lines	36,248,0	22,187,2
Interest.		
Interest on Capital Account at beginning of the year	1,331,8	860,0
Interest for first quarter on Calcutta and South-Eastern and the Porada Section of the Northern Bengal Railway	11,0	...
Interest on Capital transferred	1,2	—4
Half interest on Capital spent	58,5	13,9
Total Interest charged	1,402,5	873,5
Add—½ per cent. on the Holkar Loan of a crore, which bears 4½ per cent. interest	5,0	...
	1,407,5	873,5

(b)—Annuities in Purchase of Guaranteed Railways (including Sinking Funds.)

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	England—			
	E. I. Railway—			
262,0	4 per cent. on deferred annuity	262,0	262,0	262,0
904,8	Annuity of 1,179,0 ; unredeemed portion	925,0	923,0	883.5
35,2	Investment made in respect of the redeemed portion			38,7
1,1	Contribution to management			1,2
1,203,1	Total England	1,187,0	1,185,0	1,185,4
	E. B. Railway—			
...	Annuity not deferred	68,1	35,6	34,8
...	Sinking Funds	...	...	4
...	Total England	68,1	35,6	35,2

135. The decrease under East Indian Railway is owing to the issue of India stock in redemption of a further portion of the aunuity, which has reduced the annuity charge and increased that under "Interest on debt." As regards the saving in the Eastern Bengal Railway, it was first anticipated that the annuity would be payable on the 1st January and 1st July, and that consequently a half-year's payment would be made on 1st January 1885 ; but it was subsequently decided to pay the annuity on the 1st of April and 1st October. As the line was taken over on 1st July 1884, only the proportion of the annuity due for three months on the 1st of October fell into the accounts of 1884-85.

(c)—Guaranteed Railways Interest.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
	Guaranteed Railways Interest—			
12,5	India	5·3	5,1	29,7
3,284,3	England	3,235,0	3,217,3	3,217,2
3,296,8	Total	3,240.3	3,222,4	3,246,9

136. The excess of 24,4 in *India* is caused by the entry, under this head, of interest on overdrawn capital, by credit per contra to XXI Interest. The decrease in *England* is due to the capital subscribed not having been paid up as quickly as was anticipated.

Section H.—RECEIPTS ON PUBLIC WORKS NOT CLASSED AS PRODUCTIVE.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
879,9	Receipts	917,7	1,008,7	1,037,6

137. The accounts of 1884-85 under this head shew an excess of 119,9 over the estimate and of 157,7 over the actuals of the previous year. To this result the Railways have contributed 95,8 and 102,2 and Civil Buildings 27,0 and 65,9 respectively. The Railways shew a considerable development of traffic, but in 1884 the receipts of the Punjab Railways, were abnormally enlarged, chiefly by the movement of troops and materials to the frontier, and the earnings of the Southern Mahratta Railway were brought into this division for the first time. The head Civil Buildings also contains some special items this year.

XXIX.—State Railways.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	Imperial—			
2,6	Bhopal Railway	2,8	7	1,3
49,9	Kandahar Railway	42,5	65,0	77,7
75,3	Punjab Railway, Northern Section	65,0	65,0	70,4
45,1	Rewari-Ferozpore	70,0	87,5	92,6
172,9	Total	180,3	218,2	242,0
	Provincial—			
14,1	Kaunia-Dhurla Railway	14,0	15,5	15,7
...	Jorhat Railway	1,8	6	4
14,1	Total	15,8	16,1	16,1
187,0	Total Both	196,1	234,3	258,1

138. The increase in the earnings of the Kandahar Railway is due to the large number of troops and Military stores conveyed to the frontier, and of the Punjab Railway to the Durbar at Rawul Pindee. The increased receipts of the Rewari-Ferozepore line are due to rapid development of traffic on the extensions opened during the year from Sirsa to Ferozepore including the Fazilka branch. The falling off in the Bhopal Railway does not arise from diminished earnings, but from the Bhopal State being allowed to share in the receipts of the line from 1st April 1884, instead of from the date of the opening of the line to Bhopal, as contemplated in the estimate.

139. The net returns on the four Imperial Railways are—

1883-84. Accounts.		1884-85. Budget.	Accounts
—4	Bhopal	+2	—4
+2,7	Kandahar	...	+30,2
+9,2	Punjab Northern	—10,0	+16,7
+13,8	Rewari-Ferozepore	+25,0	+28,6

XXX.—Subsidized Railways.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts
2,6	Bengal Central Railway	...	2	2
...	Rohilkhund-Kumaon Railway	...	3	3
1	Southern Mahratta Railway	...	32,5	33,3
2,7			33,0	33,8

140. The figures against the first two items have been taken from the Home Accounts. The first represents interest realized from investments of sums deposited by the Bengal Central Railway Company for fixed periods, and receipts from the Company, taken in reduction of its debt for interest advanced. These deposits were not expected when the Budget was passed. The amount entered against the Rohilkhund-Kumaon Railway also represents interest allowed on the Company's deposits on Capital Account. The gross receipts of the Southern Mahratta line were originally estimated at 45,0, but, by an oversight, the necessary

Section H.—RECEIPTS ON PUBLIC WORKS NOT CLASSED AS PRODUCTIVE—*continued.*

entry was not made in the Budget Estimate of the Department for 1884-85. The increase of 8 in the actuals, as compared with the Revised Estimate, is due to credit realized from capital for hire of rolling stock.

XXXI.—Irrigation and Navigation.

1883 84. Accounts. A	1883 84. Accounts. B		Budget. A	Budget. B	1884 85. Revised. A	1884 85. Revised. B	Accounts. A	Accounts. B
1,8+	0	India	1,1+	0	·8+	0	1,0+	0
0+	4,0	Burmah	0+	3,6	0+	2,9	0+	3,3
5+	80,6	Bengal	3+	85,1	3+	81,4	4+	79,1
0+	15,2	North-Western Provinces	0+	14,2	0+	16,5	0+	16,4

2,4+	5,6	Madras	2,3+	3,9	2,3+	4,5	1,9+	5,3
12,2+	0	Bombay	13,1+	0	13,0+	·0	12,4+	0
30,9+	111,0	TOTAL	30,2+	110,5	28,7+	108,8	26,7+	108,4
141,9			140,7		137,5		135,1	
			A, Imperial.		B. Provincial.			

141. The decrease in *India* is due to the deficiency of water supply in the new tanks in Rajputana, caused by the partial failure of the rains of 1883-84. In *Burmah* the navigation receipts were small on the Pegu and Sittang Canals, owing partly to fluctuations in the Paddy Market, and partly to the opening of the Railway to Nyaunglebin. The falling off in *Bengal* is almost entirely due to an anticipated improvement in the receipts from the Calcutta Canals not having been realised. The increase in *North-Western Provinces* is the result of the favourable rabi of 1883-84 and kharif, 1884; the deficiency in the *Punjab* being attributed to short recoveries of the amounts assessed on certain branches of the Indus Innundation Canals on account of canal produce. The improvement in *Madras* consists of wharfage fees on the Buckingham Canal, the collection of which commenced in 1884-85, after the estimate was prepared.

XXXII.—Military Works.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
24,8	India	22,5	23,6	23,3
3,5	Madras	3,2	2,5	3,4
11,9	Bombay	9,6	10,9	10,8
3,8	Other Provinces	2,4	2,5	2,9
44,0	TOTAL	37,7	39,5	40,4

142. Nearly the whole of the increase is in rents realised from officers occupying Government buildings. In Madras and Hyderabad it is also partly due to sale proceeds of dismantled buildings.

Section H.—RECEIPTS ON PUBLIC WORKS NOT CLASSED AS PRODUCTIVE—*continued.*

143. As regards Imperial receipts, the Indian figures contain arrears of previous year's contributions for roads in Scindia's territory, paid by the Maharaja in 1884-85. The diminished receipts in England are due to a falling off in the number of students in the Royal Indian Engineering College at Cooper's Hill.

144. As regards the Provincial and Local figures, the improvements in *Burmah* and *Assam* are attributed respectively to sales of buildings, and enhanced receipts from ferries in the Sylhet and Cachar districts. In *Bengal* though the net difference is 1 only, there have been large variations from the estimated income. On the one hand there was an improvement of nearly 12,0 in the recoveries from Zemindari embankments under the contract system, and of 6,0 realised from the East India Railway Company, on account of arrears of rent due for the premises in Fairlie Place, Calcutta; but against these increases have to be placed 10,0 provided in the estimate as receipts from the Burrakar Iron Works, but not brought under this head in the accounts, and 7,1 expected from the sale of bricks to the Port Commissioners, and from Strand Bank rents in Calcutta, but not realised within the year. In the *North-Western Provinces* the profits of the Roorkee Workshops, as well as Ferry Tolls and Cemetery receipts, were smaller than anticipated. *Madras* shews diminished proceeds from the Presidency Workshops; and the increase in *Bombay* is ascribed partly to Tolls, partly to the operation of the Highway Act, and partly to rents for Government buildings.

6,580,7	EXPENDITURE . .	6,089,0	6,569,7	6,478,1

145. The accounts shew an increase of 389,1 as compared with Budget, of which 33,2 is due to working expenses of the Southern Mahratta Railway not having been provided in the estimates, 46,9 advances to the Bengal Iron Works charged off in accounts, 27,5 to the adjustment of the liabilities on account of the late Exhibition Works at Calcutta, 211,7 to increased outlay on Frontier Railways, and the rest is chiefly due to large additional grants sanctioned on various accounts, *viz.*, in Burma for the Siam Road, and in Madras and Bombay for various works.

Section H.—EXPENDITURE ON PUBLIC WORKS, &c.—*continued.*

146. The above figures shew in detail how the provisions of the Budget have been carried out, and give, as the net result of the year's operation, a saving of 23,? under Imperial, and an excess of 51,7 under Provincial. The saving was mainly obtained from the reserve of 39,9 appropriated to other works including 8,2 transferred to 43.—Frontier Railways, but partly also from economies in establishment and other charges. On the other hand additional outlay was passed on various works, chiefly the Bengal-Assam, the Benares-Puri, the Amballa-Kalka-Simla, the Godra-Rutlam, and the Vizagapatam-Raipur Railway Surveys. The excess under Provincial is due chiefly to a transfer of 52,6 from 46.—Civil Buildings, Roads and Services on account of the Bassein-Henzada Survey and the Therriaghat-Companygunge and Lucknow-Sitapur-Kheri Railways. In addition to this sum, an additional grant of 6,5 was given to the Jorhat Railway, while 11,0 was withdrawn by the Government of Bengal from the Sultanpore-Bogra line, and 6,1 saved in various minor charges. The programme thus arranged has been duly worked out, the more important variations between the Revised Estimate and Accounts being as follows:—*Benares-Puri Railway Survey.*—The saving of 5,1 is due principally to provision for Establishment and for jungle cutting having been over-estimated. Unexpected credits received during the year for sale and transfer of plant also reduced the survey expenses to some extent. *Jorhat State Railway.*—The excess of 1,3 is due to additional outlay having been found to be necessary on the opening of the Railway. The excess was foreseen by the Assam Administration, and additional funds to the extent of 1,2 were provided by the Chief Commissioner before the close of the year, to cover the excess, out of savings on the Provincial Buildings and Roads grant. *Cherrapoonji-Companygunj State Railway.*—The excess of 7,0 is owing principally to the transfer to this head from 46—*Civil Buildings, Roads and Services* of the outlay on the mountain portion of this Railway, which was ordered by the Government of India after the Revised Estimate had been passed. *Lucknow-Sitapur-Kheri State Railway.*—The excess of 2,5 is due to the payment in advance for sleepers under supply by the Forest Department. *Kaunia-Dhurla State Railway.*—The saving of 7 is due chiefly to non-completion of certain rolling stock under construction in the workshops of the Northern Bengal State Railway.

41.—State Railways, Working and maintenance.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
	IMPERIAL—			
3,0	Bhopal Railway	2,6	1,2	1,7
47,2	Kandahar Railway Southern Section	42,5	50,0	47,5
66,1	Punjab Railway, Northern Section	75,0	52,0	53,7
31,3	Rewari Ferozepore	45,0	60,0	64,0
147,6	TOTAL	165,1	163,2	166,9
	PROVINCIAL—			
10,1	Kaunia-Dhurla Railway	10,5	12,0	12,0
...	Jorhat Railway	1,1	7	7
10,1	TOTAL	11,6	12,7	12,7
157,7	TOTAL BOTH	176,7	175,9	179,6

147. The increase in the Kandahar Railway was necessitated by additional traffic; in the Rewari-Ferozepore by the additional length to be worked, the extension to Ferozepore and the Fazilka Branch having been opened earlier than was expected; and in the Kaunia-Dhurla by the temporary lines laid at the Teesta, Dhurla and Brahmaputra rivers to cross the traffic expeditiously during the dry season, as well as by heavy repairs executed to the vessels and rolling stock on the line. The saving in the Punjab Northern was obtained by rigid economy in the Engineering and Locomotive Deparments, and the diminished expenditure of the Jorhat is attributed to the line not having been opened as early as was anticipated. This line was previously known as the Kokilamukh State Railway.

Section H.—EXPENDITURE ON PUBLIC WORKS, &c.—*continued.*

42.—Subsidized Railways.

1883-84. Accounts.			Budget.		1884-85. Revised.		Accounts.

7,0		TOTAL PROVINCIAL	5,5		13,9		11,8	
82,4		TOTAL BOTH	88,4		91,0		75,9	
85,6		SOUTHERN MAHRATTA	89,5		148,3		151,4	

148. As regards the Imperial lines, the Indian figures represent cost of land, which, from various causes, has fallen short of the estimate. The English figures are payments on account of interest, and the excess in the case of the Bengal Central Railway arose from the estimate having provided for a half year's payment only, on the understanding that the line would be opened on 1st July 1884, whereas the interest was allowed for the whole year. The guaranteed interest of the Rohilkhund-Kumaon Railway ceased on the 1st January 1885. The Assam Trading Railway has hitherto been classified under 46.—Civil Buildings, Roads and Services, the amount paid to it being a subsidy from the Assam Administration.

149. The large increase in the Southern Mahratta Railway is attributable partly to interest on the additional capital raised by debentures for the construction of the Western Deccan Line, which is now included in the Company's contract, and partly to the omission to provide for the working charges in the estimate. The working expenses show a saving, since the line was opened later than was expected.

43.—Frontier Railways.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
102,9	TOTAL	—73,0	138,7	138,7

150. These figures cannot be distributed by Railways, as the funds allotted for Railway construction are now dealt with as a whole. See para. 185. As regards the difference between estimate and accounts, it is explained that during the year 1884-85 orders were issued that the outlay incurred during 1883-84, and the grant for 1884-85 in connection with the Hurnai Road, now known as the Sind-Pishin State Railway, Northern Section, should be transferred from 46—*Civil Buildings, Roads and Services* to 43—*Frontier Railways*. This and other changes in the grant, as shewn below, changed the Estimate under 43—*Frontier Railways* during 1884-85 from a credit of 73,0 to a debit of 470,2, but 331,5 of this sum has since been transferred to 50—State Railways, leaving the balance of 138,7.

Transfer from 46—*Civil Buildings, Roads, and Services*	85,0
Transfers from 40—*State Railways—Capital*	8,2
Additional grant for outlay on Northern Section, Sind-Pishin State Railway	400,0
Further additional grant for ditto	50,0
TOTAL	543,2

750,9			752,4		782,3		745,5	
A Imperial.			B. Provincial and Local.					

151. The Imperial expenditure under *India* was largely affected by the postponement of minor irrigation works in Rajputana; and in *Bengal* by non-payment for land taken up for certain embankments, by an outbreak of cholera which retarded the progress of the earthwork on the Surpai scheme, by delay in sanctioning some estimates, and by non-utilisation of a reserve grant of 4,5. In *Madras* an additional grant of 13,1 was sanctioned for prosecution of the works connected with the Pelandorai and Palar Anicut systems, and for urgent repairs of works damaged by floods, but owing to scarcity of labour, delay in acquiring and paying for lands, and heavy rains in the Tinnevelly Division, the expenditure fell short of the estimate in the Presidency by 8,4. The short outlay in *Bombay* is due to the existence of water in the Khari cut, to scarcity of labour on account of the opening of Railway works in the Satara District, which impeded the progress of works on the Yerla River project, to non-payment of compensation for certain lands, and to the improvements sanctioned for the Ghar Canal not having been completed before the close of the year.

152. In the Provincial and Local divisions, *Burmah*, *Punjab*, and *Madras* show excess expenditure, due respectively to agricultural works undertaken from Provincial resources, expenditure on the Chack Nizam Canal omitted from the estimates through misapprehension, and outlay for repairing breaches in the Red Hills and Choleveram tanks, connected with the Madras water supply and irrigation extension project, and for deepening the Chilka Lake Canal in the Ganjam District. On the other hand there were savings in *Bengal* and *North-Western Provinces* accounted for, in part, by expenditure transferred to other heads, and partly by short outlay on the Orissa Coast Canal, owing to an unusual scarcity of labour, and by a restriction on provincial expenditure in the North-Western Provinces under orders of the Local Government.

45.—Military Works.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
704,1	India	636,3	629,7	609,4
24,2	Central Provinces	14,4	14,4	13,9
30,1	Burmah	32,5	45,3	46,8
19,9	Assam	21,4	23,5	23,0
44,0	Bengal	8,5	15,2	15,3
8	North-Western Provinces	11,5	5,6	4,7
24,0	Punjab	25,0	25,0	25,1
59,0	Madras	59,1	61,3	61,2
106,2	Bombay	110,5	149,6	143,9
5,8	England	3,8	3,8	5,1
1,018,1	TOTAL	923,0	973,4	948,4

153. After the Budget was passed the following additional Grants were sanctioned, thereby raising the Revised Estimate to the sum noted above:—

For defences at Aden	20,5
For shifting sheds on Hog Island, Bombay, transferred from Marine Budget	4
For Army Head Quarter Offices, Simla, transferred from Civil Buildings, Roads, and Services	16,6
Unspent balance of grant of 1883-84	18,4
TOTAL	55,9
DEDUCT—Probable lapses	5,5
Net increase	50,4

Section H.—EXPENDITURE ON PUBLIC WORKS, &c.—*continued.*

154. The actual expenditure has fallen short of the enlarged estimate by 25,4, which is principally due to the estimates of the Inspector General of Military Works, Bombay, Central India, and North-Western Provinces and Oudh not having been worked up to. In the Military Works Branch the saving of 18,1 is distributed over a number of Original Works and Repairs. The saving in *Bombay* (5,7) is attributed to late receipt of certain sanctions, and to non-arrival of machinery from England. In *Central India* the lapse of 2,3 is mainly due to the transfer of the stock of the Indore Sub-division to the head "Imperial Civil Buildings, Roads, and Services." The estimate of the *North-Western Provinces and Oudh* was not worked up to by 9, owing to the transfer, towards the close of the year, of the works at the cantonment of Gorakhpur to the charge of the Inspector General of Military Works. On the other hand, the excess in *Hyderabad* (6) is due to the omission to provide for incomplete works and repairs of the previous years, and to a re-distribution of establishment charges under the orders of the Government of India. In *Burmah* the excess (1,4) is due to expenditure on sub-marine mining buildings at Rangoon, authorized by the Government of India in the Military Department after the Revised Estimate was passed.

155. The difference between the Imperial Budget and Revised consists mainly of 85,0 and 16,6, transferred respectively to 43.—Frontier Railways for Hurnai Road, and to 45.—Military Works for the Army Head Quarters Offices at Simla, less 23,4 additional outlay on the Finance Department and Central Press Buildings in Calcutta, 11,2 special municipal improvements in Simla, and 22,9 additional allotment for Imperial works from the amount

Section H.—EXPENDITURE ON PUBLIC WORKS, &c.—*continued.*

refunded by His Highness the Maharajah Scindia, on account of advances made to him in previous years for roads in his territory. The Actuals have exceeded the Revised Estimate by 27,1 which is made up thus :—

Central India	+1,8	Brought over	52,4
Coorg	+4	Central Provinces	+1
Hyderabad	—1	Assam	—4
Rajputana	—2,4	Bengal	—6,2
Inspector General of Military Works	—1,2	North-Western Provinces and Oudh	—1,6
Biluchistan	+1,1	Punjab	—7
Simla Imperial Circle	—4,4	Madras	—1,7
Accountant General's auxiliary books	+57,1	Bombay	—13,8
Bangalore (Civil Officers)	+1	England	—1,0
Carried forward	52,4	TOTAL	27,1

156. In Central India the excess is nominal, being due principally to the transfer of stock from "Military Works." The lapse in Rajputana arises from the write-back of the expenditure on Railway churches at Bandikui and Ajmere to the Capital Account of the Rajputana-Malwa Railway, under the orders of the Government of India, and on the Inspector General's estimate from the allotment for repairs to ecclesiastical buildings not having been worked up to. In the Simla Imperial Circle the short outlay is due to failure to utilize the whole of the allotments for the new Telegraph Office and Public Works Department Secretariat buildings; in Bengal principally to the grants for Mint, Telegraph, and Postal Works not having been fully used, and in Bombay to non-payment of compensation for land for Salt Works, to delay in settlement of sites, and to bills for materials not having been presented for payment before the close of the official year. In the remaining Provinces the savings are distributed over a number of works and repairs, none of which need special notice. The excess over the Biluchistan estimate is due to the transfer, under the orders of the Government of India, of the expenditure on certain roads from the Military Works to the Civil Buildings, Roads and Services Branch. The entry against the Accountant General's auxiliary books consists mainly of the charge off, under orders from the Financial Department, of the sum of 46,9 paid for the Bengal Iron Works.

157. The Provincial Budget also was considerably modified by the Revised Estimate, the principal items being additional expenditure sanctioned in Burmah (38,3) for the Siam road; in Bengal (27,5) for liabilities connected with the late Exhibition Works in Calcutta; in North-Western Provinces and Oudh (16,4) for several special items, the principal being prison labour on jail works; in Punjab (3,9) for construction of the new kutcheri at Simla; in Madras (37,8) for several emergent works not named, as well as for a grant-in-aid of the water-supply scheme of the Madras Municipality, and for diversion of drains and sewers from the Cooum River and Buckingham Canal; and in Bombay for new Police Courts, State Alienation Record Office, Indo-British School, Opium Warehouse, and Amba Ghât Road.

158. The Provincial Actuals have fallen short of the Revised Estimate by 7,3, and, considering the magnitude of the operations, the estimate has, on the whole, been fairly worked up to. The short outlay is made up of savings under Public Works Officers to the extent of 28,7, and excess outlay of 21,4 under Civil Officers. The most important of the variations between Revised Estimates and Actuals are noted below :—

	Actuals, more or less than Revised Estimate.
Burmah (Public Works Officers)	—2,9
Assam (ditto)	—20,8
Bengal { Public Works Officers	+19,4
Bengal { Civil Officers	+18,6
North-Western Provinces and Oudh (Public Works Officers)	—17,4
Punjab (Public Works Officers)	+3,8
Madras (Civil Officers)	+2,1
Bombay (Public Works Officers)	—12,3

159. In *Burmah* the lapse is attributed to failure to utilize the grants for Original Works and Repairs in the Rangoon, Amherst, and Akyab Divisions; and in *Assam* to certain re-appropriations having been sanctioned after the submission of the Revised Estimate, and to

Section H.—EXPENDITURE ON PUBLIC WORKS, &c.—*continued.*

the transfer of the outlay on the Cherrapunji Mountain Tramway to 40—State Railways—Capital. In *Bengal* the excess is due to larger charges for establishment having been incurred than was anticipated, as the outlay on works and repairs under other heads was curtailed, and, consequently*, the contributions expected from them were not fully realised. There were also increased charges on account of collection of revenue. The excess over the grant for Public Works in charge of Civil Officers in *Bengal* is chiefly due to a sum of 23,6, representing an outstanding balance against the late Port Canning Municipality, written off in the accounts of 1884-85. In the *North-Western Provinces and Oudh* the saving occurs chiefly from an over-estimate of the cost of prison labour, as well as to unforeseen lapses on a number of works and repairs. The excess in the *Punjab* is mainly due to the outlay incurred on the Chenawan Jail, on the Chenab Canal. The short outlay by Public Works Officers in *Bombay* is the aggregate of small lapses on a number of works and repairs, mainly due to delay in settlement of sites, scarcity of labour, and to works having been deferred for want of estimates.

* The whole of the establishment is treated as Provincial, other funds contributing a percentage on the outlay on works and repairs supervised by the Provincial Establishment.

160. Under Incorporated Local Funds large changes were introduced in the Revised Estimate, involving additions of 25,5, 2,6, 4,6, and 7,9 to Burmah, North-Western Provinces and Oudh, Punjab, and Bombay, and reductions of 23,0, 31,6, and 38,8 in Assam, Bengal, and Madras. The changes in the *North-Western Provinces* and *Punjab* ensued from several small additional grants sanctioned during the year, and in *Burmah* from large outlay from the balances of the District Cess Funds after the Budget was framed. The decrease in *Assam* was due to certain classes of expenditure having been transfered to Provincial Services from the control of Local Boards; while the addition to *Bombay* was granted for works and repairs in the Sachin State and in the Shikarpore Collectorate, and for a bridge over the Bhuki river. The decreases of 31,6 in *Bengal* and 35,0 in *Madras* are said to have been made "with reference to actuals," the remaining 3,8 in *Madras* being the grant for a steamer for the Rajahmundry ferry charged in the ensuing year. This is the fourth year of excessive overestimating on the part of Local Committees in Bengal, and the second year in Madras.

161. The Actuals have fallen short of the Revised Estimate by 45,3, of which 27,4 appertain to Departmental and 17,9 to Civil Officers' estimates.

162. The principal differences working up to this result are noted below :—

	Actuals, more or less than Revised.
Central Provinces (Civil Officers)	—7,8
British Burmah { Public Works Officers	—7,9
British Burmah { Civil Officers	+3,9
Assam (Civil Officers)	+8,3
Bengal { Public Works Officers	+1,1
Bengal { Civil Officers	—11,3
N.-W. Provinces and Oudh (Public Works Officers)	—5,0
Punjab (Ditto)	—4,4
Madras (Civil Officers)	—10,1
Bombay (Public Works Officers)	—10,4

The short outlay in the *Central Provinces* is said to be the result of changes made during the year in the administration of District Funds under the Local Self-Government Act, and of postponement of works. In *Burmah* the lapse under Public Works Officers is due to transfers of grants after submission of the Revised Estimate, and to the grants for a number of works and repairs not having been fully utilized from various causes, the excess under Civil Officers being attributed to additional works having been sanctioned and executed, apparently after the Revised Estimate was submitted. The excess over grant for Public Works in charge of Civil Officers in *Assam* is caused by unusually large expenditure in the last two months of the official year, which vitiated the forecast made in the Revised Estimate on the basis of seven months' actuals, and by the adoption for the first time this year of the Public Works practice of charging the cheques when drawn and issued to the grant, instead of the cheques paid at the treasuries. In *Bengal* the excess over the Departmental estimate arose from letters of credit in excess of the available balance having been issued towards the close of the year, under the authority of the Local Government, and the saving from the Civil Officers' estimate from the outlay having been fixed at too high a

Section H.—EXPENDITURE ON PUBLIC WORKS, &c.—*continued.*

figure. The short outlay in the *North-Western Provinces and Oudh* is due to the failure to utilize the grants for a number of new works, and in the *Punjab* to late receipt of sanction to estimates, heavy floods and severe sickness in the Amballa District, and to reconstitution of District Committees. In *Madras* the outlay on Public Works in charge of Civil Officers was over-estimated. In *Bombay* the failure to utilize grants is ascribed to the difficulty felt in procuring labor and materials in certain districts, to transfer of works to Provincial Funds, and to non-payment, in certain cases, of compensation for land.

K.—ARMY SERVICES.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	Accounts.
956,2	RECEIPTS . . .	861,2	866,1	798,7
16,975,7	EXPENDITURE . . .	16,098,6	15,970,2	15,998,0
16,019,5		15,237,4	15,104,1	15,199,3

163. The principal difference between estimate and accounts is in the Indian figures. The receipts fell off from reduced sales in the Commissariat, Clothing, and Ordnance Departments. The charges were less than expected owing, mainly, to short strength of British and Native troops, and to favourable prices, diminished transport charges, and reduced supplies of Malt Liquor. On the other hand, the accounts include some unexpected expenditure, such as the charge for the Viceregal Camp at Rawul Pindee, the camp of exercise near Poona, the Zhob Expedition, and for Military preparations in the North West Frontier.

Section K.—RECEIPTS BY MILITARY DEPARTMENT.

XXXIV.—Army.

1883-84. Accounts.		1884-85. Budget.	1884-85. Revised.	Accounts.
	INDIA—			
514,1	Commissariat	523,5	499,2	462,8
79,3	Clothing	79,8	87,9	75,6
92,0	Ordnance	83,7	83,4	68,3
214,7	Other Receipts	123,0	125,9	124,3
900,1	TOTAL INDIA .	810,0	796,4	731,0
52,4	ENGLAND	51,2	69,7	67,7
952,5		861,2	866,1	798,7

164. Reduced sales account for the decreases in the Actuals of 1884-85 under the first three heads, notwithstanding that in *Bombay* 5,8 were realised as percentage on value of stores issued for use of Egypt Expedition 1885, and in *Madras* the clothing supplied to the Hyderabad Contingent exceeded the Estimate. The difference in Ordnance Receipts between 1883-84 and 1884-85 is due to the large sales of obsolete stores in the former year. The Miscellaneous Receipts in 1884-85 include 2,5 realised at *Bombay* from the Bikaneer State for the Bikaneer Expedition. These receipts were further increased by subscriptions for Indian Service Family Pensions exceeding the Estimates, and by fines for drunkenness in the British Army being credited to Indian revenues instead of being remitted as before to the War Office. In comparing these figures with the Receipts in 1883-84, it should be noted that the latter included several special items, such as recoveries from War Office for Malta Expedition of 1878, and from Berar for pensions, as also some unclaimed amounts connected with the war in Afghanistan. The increase in *English* Receipts is connected with the Indian Troop Service, and is due to the employment of troop-ships on Imperial Service.

165. The separate head of Military Operations in Egypt which appeared in the accounts of 1883-84, has been discontinued in 1884-85, the receipts and charges being treated as ordinary, under orders of Government in the Military Department, No. 279 $\frac{S.}{F.}$, dated 16th June 1884.

535,0	Stores	500,9	472,5	462,4
28,9	Other Effective Services	22,0	21,0	17,2
3,336,8	Retired Officers' Pensions and other Non-Effective Services	2,376,5	2,361,8	2,360,3
5,017,4	TOTAL ENGLAND	3,977,3	3,975,0	3,974,4
16,921,7	TOTAL	16,098,6	15,970,2	15,895,3

166. The variations under "Army and Garrison Staff" are small, and need no remark. The Actuals of 1883-84 were abnormally enhanced by certain writes-back connected with the settlement of effective charges with the War Office. Under "Regimental Pay, &c.," the reductions are chiefly due to the short strength of British and Native troops, and to the despatch to Egypt of two British Regiments before the arrival of the ordinary relief from England. The prevalence of favourable prices during the year, together with diminished transport charges and reduced supplies of malt liquor by the contractors, produced the effect observable in Commissariat charges. The reduction would have been greater but for a large increase of expenditure in providing a reserve stock of provisions and forage at Quetta. The decrease under "Medical" is due mainly to the short establishment of Army Medical Officers, and to the excess over Estimate of medical stores issued to Civil Departments, the value of which is deducted from expenditure. The charges under Ordnance have been reduced by a sum of 62,1 on account of tents and stores supplied to Her Majesty's Imperial Government. The actuals under "Other Effective Charges" in 1884-85 include several items which were not provided for in the Budget, *viz.*, Expenditure for the Viceregal Camp at Rawul Pindee, for the Camp of Exercise near Poona, for the Zhob Valley Expedition, and an arrear charge of the Akha Expedition. Further increases under this head are due to the purchase of a larger number of horses than was estimated for, and to increased outlay for supplies to make up clothing for troops ordered to Egypt, the cost of which will be subsequently recovered from Her Majesty's Imperial Government. Admissions to and casualties in the "Pension" Establishment account for the variations under that head. The reduction in other non-effective charges has occurred chiefly in *Bengal* in the item of capitalised pensions, and in pensions transferred to England. As regards the *English* expenditure, there is an increase in the provision for deferred pay, in the cost of transports owing to the employment of hired vessels in addition to troop-ships (see explanation against Army receipts) and in the payment of Admiralty claims. On the other hand, there is a saving in furlough allowances, consequent on the decrease in the number of officers on furlough, in stores principally under the head Malt Liquor, and in pay and pensions of non-effective and retired officers, which did not increase so much as in previous years. The actuals in 1883-84, under the last head, included a million sterling paid to Her Majesty's Imperial Government for arrears of non-effective charges.

Military Preparations in N. W. Frontier.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
...	India	...	...	102,7

167. The expenditure is almost entirely on account of Commissariat establishments, supplies, and services, and was not anticipated when the Estimates were framed.

Section L.—EXCHANGE ON TRANSACTIONS WITH LONDON.

XXXVI & 49.

1883-84. Accounts.		Budget.	1884-85. Revised.	Accounts.
4,021,8	On Secretary of State's Bills	3,807,7	3,337,1	3,343,3
73,7	On Southern Mahratta Railway Transactions	93,0	136,7	136,7
31,9	On Hong-Kong Bills	...	50,6	53,4
...	On Military Transactions	...	68,0	59,8
4,127,4	TOTAL	3,900,7	3,592,4	3,593,2
	DEDUCT CREDITS—			
	On Guaranteed and Subsidized Companies' Transactions—			
14,5	Capital Transactions	45,4	51,4	58,4
103,5	Revenue Stores	101,8	98,8	116,1
88,1	On Capital Transactions, East Indian Railway	135,1	98,1	94,3
...	On Transactions, Rajputana-Malwa Railway	...	16,8	11,5
82,5	On Miscellaneous Transactions	80,3	74,4	83,5
288,6	TOTAL	362,6	339,5	363,8
3,838,8	NET EXCHANGE	3,538,1	3,252,9	3,229,4

168. In Section U paragraphs 203 and 204 will be found the detailed account of *Council Bills* issued and discharged. The difference in Exchange as noted above is due to the Estimate having been based upon drawings aggregating 16,500,0 at 19·50, whereas the actual drawings were 13,758,9 at 19·30.

169. The increase under ***Exchange on Southern Mahratta Railway transactions*** as compared with the Estimates is due to increased Capital outlay, and to the amalgamation with it of the Western Deccan Railway.

170. In Budget 1884-85 the Estimate for *Hong-Kong Bills* is included under Miscellaneous transactions. The actual drawing in 1884-85 was 231,6, against 211,3 under Revised.

171. In Accounts 1883-84 and Budget 1884-85 *Exchange on Military transactions* was shown under Miscellaneous transactions. In Budget 1884-85 we had +42,7, but adjustments in respect of the heavy payments for the Egypt Expedition resulted in a net loss of 59,8 as shewn above, against 68,0 in the Revised Estimate.

172. The Exchange on *East Indian Railway transactions* is calculated upon the Capital outlay on stores debited in the Secretary of State's Remittance Account, the difference between the estimated and the actual outlay, namely Budget 700,0, Revised 425,0, Actuals 404,6, accounts for the corresponding difference under Exchange.

173. *Exchange on transactions of Rajputana-Malwa Railway* is connected with the payments, made in England on account of the Railway, from 1st January 1885, the date on which the working management was transferred to the Bombay, Baroda and Central India Railway Company.

Section M.—PROVINCIAL ADJUSTMENT.

Provincial and Local Revenue as by Budget.	Provincial Balances. April 1st, 1884.	March 31st, 1885.		1884-85. Budget.	1884-85. Revised.	Accounts
15,5	8,8	8,3	India	−2,2	−2,1	−5
846,4	313,9	348,1	Central Provinces	−12,9	+1,4	+34,2
1,272,1	128,2	30,8	Burmah	−15,8	−105,7	−97,4
507,3	112,2	77,0	Assam	−55,8	−49,7	−35,2
4,713,9	262,7	302,3	Bengal	+118,3	+117,8	+39,6
3,671,9	721,0	655,6	North-Western Provinces	−397,9	−107,8	−65,4
1,728,3	322,1	297,6	Punjab	−66,8	−38,6	−24,5
3,208,4	735,6	612,1	Madras	−83,2	−140,7	−123,5
4,002,5	543,6	527,4	Bombay	+1,8	−107,2	−16,2
19,966,3	3,148,1	2,859,2	Total	−514,5	−432,6	−288,9

174. The details of this revenue and expenditure are given below. The only Province which seems to call for special attention is Burmah, where the scale of expenditure is much too large for the revenue, and special grants, have been sanctioned for it by the Imperial Government during the last two years. At the close of 1884-85, Burmah had no Provincial balance whatever, and Bengal held 120,2 against a minimum of 200,0.

Central Provinces.

Section N.—CAPITAL EXPENDITURE ON RAILWAYS, &c.—*continued.*

185. Before reviewing the figures under this head, it is necessary to explain that the whole of the grants and outlay under the following heads of account :—

33.—Protective Works—Railways,
43.—Frontier Railways,
50.—State Railways—Capital,

are here dealt with together in the first instance, the portions relating to *33—Protective Works—Railways* and *43—Frontier Railways* being deducted from the total and transferred under their respective heads.

186. The sum available for outlay during 1884-85 under the three heads mentioned was 5,223,7, the details being as follows:—

UNDER 50—STATE RAILWAYS.		
Original grant—		
Railway portion of annual fixed grant of 2½ millions	1,800,0	
Estimated saving on Productive Public Works grant State Railways of 1883-84	204,6	
Contribution by the Government of the North-Western Provinces and Oudh from surplus Provincial balances to cover the probable outlay on Railways in those Provinces classed as Productive Public Works	132,3	
Transfer from Irrigation Productive Public Works grant	15,0	
East Indian Railway	540,0	
Eastern Bengal Railway	100,0	
	2,791,9	
ADD—Arrears of Productive Public Works grant of previous years representing contributions from surplus Provincial balances to close of 1883-84, and refund of past expenditure on Madras Harbour Works	688,8	
Lapse on Productive Public Works grants, State Railways, of 1883-84, re-allotted for outlay during 1884-85	38,3	
Transfer from Irrigation, Productive Public Works grant	89,0	
Further contribution by Government of the North-Western Provinces and Oudh from surplus Provincial balances to meet additional outlay on the Bareilly-Pilibhit State Railway, and part of the outlay on the Bithoor Branch line of the Cawnpore-Achneyra State Railway	13,4	
Additional grant to meet payments in England for purchase of Bengal Central rolling stock	28,5	
Amount of overdrawn capital of the Eastern Bengal Railway Company brought on to the Capital Account of the Eastern Bengal State Railway	205,5	
Amount transferred from 43—*Frontier Railways* under instructions from Finance Department	331,5	
		4,186,9
UNDER FAMINE RELIEF AND INSURANCE—33—PROTECTIVE WORKS—RAILWAYS.		
Original grant—		
Railway portion of fixed annual grant	500,0	
Estimated saving on Railway Protective grant of 1883-84	388,6	
Contribution by the Government of the North-Western Provinces and Oudh from surplus Provincial balances towards the construction of the Jhansi-Manickpur State Railway	250,0	
	1,138,6	
***Add*—Transfer from Irrigation Protective grant**	10,0	
	1,148,6	
***Deduct*—**		
Excess outlay incurred on Protective Works—Railways, during 1883-84	5	
Amount refunded to Provincial revenues of the Government of the North-Western Provinces and Oudh on account of contribution towards the construction of the Jhansi-Manickpur State Railway	250,0	
	250,5	
		898,1
Carried forward		5,085,0

Section N.—CAPITAL EXPENDITURE ON RAILWAYS, &c.—*continued.*

Brought forward		5,085,0
UNDER 43—FRONTIER RAILWAYS.		
Original grant—	—73,0	
Add—		
Transfer from 46—*Civil Buildings Roads and Services* to 43—*Frontier Railways*, of the provision for the Hurnai Road, now known as the Northern Section of the Sind-Pishin Railway	85,0	
Transfers from 40—*State Railways—Capital*, to meet emergent outlay on the Northern Section of the Punjab Northern State Railway	8,2	
Special grants for the vigorous prosecution of work on the Northern Section of the Sind-Pishin Railway	450,0	
	470,2	
Deduct—		
Transfer to 50—*State Railways*	331,5	
		138,7
GRAND TOTAL		5,223,7

187. With reference to the addition, to the grant for Productive Public Works of the sum of 28,5 shewn above, it may be explained that the terms for the purchase of the Bengal Central Railway stock were agreed to on the understanding that the payments would be charged to the Capital Account of the Eastern Bengal Railway, and would be treated as an addition to the fixed grant for the year. It has been treated as expenditure on *Productive Public Works* in connection with the Eastern Bengal Railway.

188. The Revised Estimate for 1884-85 was prepared for 4,710,9, made up as follows :—

Grants from Imperial funds		4,565,3
Contribution by Government of North-Western Provinces and Oudh from surplus Provincial balances to cover probable outlay on Railways in those Provinces classed as Productive Public Works		145,6
Total		4,710,9

resulting in a lapse of 512,8, which was added to the Budget Estimate for 1885-86. The Revised Estimate was distributed as follows :—

50—State Railways—Capital—		
East Indian Railway	295,0	
Eastern Bengal Railway	298,5	
Other State Railways	3,080,6	
		3,674,1
33—Protective Works—Railways		898,1
43—Frontier Railways		138,7
Total		4,710,9

189. The Revised Estimate of the Eastern Bengal Railway, in addition to the outlay actually incurred since the line was taken over by the State, includes the amount of overdrawn capital of the Company, *viz.*; 205,5, and the payment, 28,5, made by the Secretary of State to the Bengal Central Railway Company in part payment for the rolling stock, already mentioned. The following provision was also made in the Revised Estimate for debt incurred in England :—

East Indian Railway—Issue of India 3½ and 3 per cent. sterling stock in redemption of a portion of the East Indian Railway annuity and deb. stock	324,0
Eastern Bengal State Railway—Discharge of debentures and debenture stock	972,7
TOTAL	1,296,7

Including these amounts, the Revised Estimate for 1884-85 under 50—*State Railways* stood at 4,970,8 divided as under :—

East Indian Railway	619 0
Eastern Bengal Railway	1,271,2
Other State Railways	3,080,6
TOTAL	4,970,8

Section N.—CAPITAL EXPENDITURE ON RAILWAYS, &c.—*continued.*

East Indian and Eastern Bengal Railways.

1883-84, Accounts.		1884-85. Budget.	Revised.	Accounts.
	EAST INDIAN RAILWAY—			
510,3	Redemption of Annuity, &c. (sterling)	...	324,0	342,0
233,3	Other Capital transactions	540,0	295,0	279,2
743,6	TOTAL .	540,0	619,0	621,2
	EASTERN BENGAL RAILWAY—			
55,9	Redemption of Debenture stock	...	11,1	11,2
...	Debenture and Debenture stock	1,023,7	961,6	961,6
...	Other Capital Transactions	100,0	298,5	177,0
55,9	TOTAL .	1,123,7	1,271,2	1,149,8

EAST INDIAN RAILWAY.

190. In the uncertainty as to what amounts of the East Indian Railway Annuity and Debenture stock might be offered for redemption during 1884-85, nothing was inserted against that account in the Budget. The difference between the Actuals as compared with Estimate under the second head is chiefly due to less expenditure having been incurred on construction works than provided for, and to the receipts from sale of stores having been more than anticipated.

EASTERN BENGAL RAILWAY.

191. The difference under *Debenture and Debenture stock* of 62,1 between Budget and Accounts is due to Debenture stock to that extent having been redeemed by the issue of India 3½ per cent. stock prior *to date of purchase*. The variations against *Other Capital Transactions* are explained by the revised Estimate and Actuals having included the Capital transactions of the Calcutta and South-Eastern Railway and the Porada section of the Northern Bengal Railway, which were amalgamated with the Eastern Bengal Railway on its purchase by Government. But the revised forecast overestimated the amount of overdrawn Capital.

Other State Railways.

1883-84. Accounts.		1884-85. Budget.	Revised.	Accounts.
2,233,4	India	1,139,9	2,179,3	2,039,6
769,7	England	1,012,0	901,3	882,9
3,003,1	TOTAL . .	2,151,9	3,080,6	2,922,5

192. The difference between accounts and estimate in the English outlay, is due chiefly to payments for stores not having been made as rapidly as was anticipated. In the Indian outlay there are numerous variations between the revised estimate and the accounts, the chief of them being as follows :—

	Accounts less than Revised Estimate.	Accounts more than Revised Estimate.
Rajputana-Malwa Railway	45,9	...
Sindia State Railway	2,8	...
Wardha Coal State	2,8	...
Nagpur Chhatisgarh State	...	9,1
Bilaspur Etawah (Kutni Umeria Section)	...	4,1

Sind Sagor (Western Section)	...	2,9
Cuddapah Nellore	5,4	...
Bellary-Kristna	...	6,1

Section N.—CAPITAL EXPENDITURE ON RAILWAYS, &c.—*continued.*

193. The following explanations are given of these differences. *Rajputana-Malwa Railway.* There was a large lapse of 45,9 said to be due principally to the failure of the Forest Department to supply certain sleepers contracted for before the end of the year; to Indian charges on English Stores having fallen short of the estimate as these stores were not received to the extent anticipated, and to the failure of the supply of coal in the Bombay market, owing to which the usual stock could not be laid in. *Sindia State Railway.* The lapse of 2,8 is due to delay in acquiring land for Railway purposes, and to non-delivery of materials in proper time, which retarded the progress of works. *Wardha Coal State Railway.* The saving of 2,8 is owing chiefly to short outlay on the Colliery works caused by non-receipt of stores indented for from Bombay, and to an alteration in the programme of works. *Nagpur-Chhattisgarh State Railway.* The excess of 9,1 is due to the new Kanhan Bridge. Certain charges for a quarry tramway were debited to this bridge, provision for which, through an over-sight on the part of the local authorities, was made in the estimate of the Nagpur-Bengal State Railway, on which line there is a saving. *Bilaspur-Etawah State Railway. Katni-Umeria Section.* The excess of 4,1 is owing chiefly to the transfer of Stores from the Jhansi-Manickpur State Railway, and to freight charges on stores having been under-estimated. *Umeria Colliery.* The lapse of 6,6 is owing to delay in receipt of Plant and Machinery ordered through Messrs. Ahmuty and Co., which it was expected would have been received and paid for before the close of the year. *Rangoon and Irrawady Valley State Railway.* The lapse of 3,2 is principally due to certain payments for work done in rebuilding bridges not having been made, through a mistake, before the close of the year, and to the charges for earthwork in diversions having been over-estimated. *Rangoon and Sittang Valley State Railway.* The lapse of 12,8 is owing to the difficulty experienced in procuring labour, and to the issues of stores to Revenue and to the Capital Account of the Irrawaddy branch having been larger than anticipated. *Tirhoot State Railway* (*including Mozufferpore Hajipore Extension*). The excess of 6,7 on this railway is due to a re-valuation of the stores in Stock, the probable results of which were not foreseen and provided for in the Reyised Estimate. *Naraingunge-Dacca-Mymensing State Railway.* The large lapse of 16,5 appears to be due to a misunderstanding, on the part of the local authorities, as to the effect on the Indian grant of the adjustment of the cost of 10 engines supplied to the Railway during the year, which were not chargeable to this grant. *Assam-Behar State Railway. Tirhoot Section.* The excess of 7,0 principally due to permanent-way materials having been issued to the line in excess of the provision, and to articles of plant having been ordered before the Revised Estimate was passed by the Government of India, in anticipation of a larger amount being available for outlay than was assigned subsequently. *Assam-Behar State Railway.* (*Assam-Behar Section.*) There is a lapse of 3,4 on the grant for this Railway, which may be attributed to the anticipated charge for a steam ferry not having been incurred during the year, a sum of 15,0 having been provided on this account. Against this saving excesses are reported, principally on account of payments for land and collection of bridge materials. *Nagpur-Bengal State Railway.* The lapse of 16,6 is owing to provision having been made in the estimate of this line for a quarry Tramway for the new Kanhan Bridge, the outlay on which was subsequently charged to the Nagpur-Chattisgarh State Railway, as explained above, and to restricted outlay generally on the works. *Bareilly-Pilibhit State Railway.* The lapse of 4,9 is due to the payments for land in the Civil Department having been less than anticipated, and to the charges of the year on account of ballasting and supplies of station machinery having been over estimated. *Cawnpore-Kalpi Railway.* The short outlay of 17,5 is due to slackening of work on the line. *Indus Valley State Railway.* The lapse 15,3 is due chiefly to failure to carry out work on the Railway to the extent allowed for, and to larger credits received for stores than were anticipated in the estimate. *Sind-Pishin State Railway, Northern Section.* The short outlay of 5,8 is due to delay in the receipt of certain monies drawn for Railway works from the Sibi Sub-treasury, and to stores ordered through Port Storekeeper not having been purchased to the extent, authorized. *Punjab Northern State Railway, Northern Section.*—The short outlay of 3,4 is explained to be due to delay in arrival from England of 12 sets of body ironwork for 2nd Class Carriages. *Sind-Sagar State Railway, Western Section.*—The excess, outlay of 2,9 is owing chiefly to due provision not having been made in the revised estimate for the survey expenses of the line. The omission was discovered too late to be rectified. *Ferozepore* (*Sutlej*) *Bridge and Tramway.*—The short outlay is due to non-completion of certain Rolling stock for the

Section N.—CAPITAL EXPENDITURE ON RAILWAYS, &c.—*continued.*

Tramway being constructed by the Sind, Punjab and Delhi Railway, to a short charge for 4 Engines purchased from the Darjeeling Railway, and to the delivery of smaller quantities of material than provided for. *Cuddapah-Nellore State Railway.*—The lapse of 5,4 on this railway is mainly due to receipts of English stores having fallen short of the estimate. *Bellary-Kistna State Railway.*—On English stores there is an excess of 9,4 and on Indian outlay a Lapse of 3,3. The excess, is due to the supplies during the year having been under-estimated. The saving results from a failure to work up to the intended programme, although efforts in this direction were made.

51.—Irrigation and Navigation.

1883-84, Accounts.		Budget.	1884-85, Revised.	Accounts.
	BENGAL—			
59,0	Soane project	54,0	50,5	39,2
63,9	Orissa project	96,0	77,5	77,4
17,4	Midnapur series	10,0	5,0	2,4
	NORTH-WESTERN PROVINCES—			
75,3	Lower Ganges Canal	86,7	74,7	70,9
48,9	Other works	53,3	42,8	38,3
	PUNJAB—			
100,3	Sirhind Canal	97,6	67,8	62,0
132,4	Less contribution			
149,0	Other works	188,1	179,1	169,5
...	MADRAS	198,4	175,8	160,3
	BOMBAY—			
20,2	Deccan	70,8	87,4	15,5
43,3	Sind			63,2
...	RESERVE	93,9	...	...
12,8	PURCHASE OF MADRAS IRRIGATION COMPANY'S UNDERTAKING	...	1;0	7
722,5	TOTAL	948,8	761,6	699,4

194. It will be convenient to explain first the difference between Budget and Revised. Of the decrease of 27,0 in *Bengal*, a sum of 7,0 was given up from the grant for the Soane Canal, as the money could not be utilized, and 20,0 from the grant for the Orissa Canal, owing partly to delay in completing the detailed plans for individual works, and partly to unexpected difficulties in acquiring land, as well as to certain proceedings under the Embankment Act. The decrease in the *North-Western Provinces and Oudh* was due to inability to utilize the grant assigned, owing to sanction not having been received to the Cawnpore Branch Extension of the Lower Ganges Canal. The decrease in the *Punjab* was due partly to sickness, by which works on the Sirhind Canal were retarded; partly to delay in settling compensation for land taken up for rajbuhas, payments for which were not likely to be made during the current official year; and partly to stoppage of work on main drain No. IV, Western Jumna Canal, pending a reconsideration of the scheme; and to savings on the Okla Navigation Channel. The lapse in *Madras* was chiefly due to the credit afforded this year to the Capital Account of the Kurnool Canal, for the telegraph line along the canal taken over by the Telegraph Department. The increase in *Bombay* represented the provision made in the Revised Estimate for the Unharwah Project recently sanctioned as a Productive Public Work. The decrease under Reserve was due to a sum of 89,0 having been made over for expenditure on State Railways, and to the balance of the amount held in reserve to meet unforeseen expenditure during the year, having been carried forward for expenditure on Irrigation and Navigation in 1885-86. In the Home estimates 1,0 was provided for law charges in connection with the purchase of the Madras Irrigation and Canal Company's undertaking now called the Kurnool Canal, which were expected to be paid in 1883-84.

195. As regards the differences between revised and accounts, the short outlay in *Bengal* occurred chiefly on the Midnapore and Soane canals. The saving on the former is due to the charges for the new dredger and excavator required for the canal having been over-

Section N.—CAPITAL EXPENDITURE ON RAILWAYS, &c.—*continued.*

estimated, while that on the latter is due to bills for work done during the year not having been received in time, to a portion of the reserve grant not having been required, to inability of the Land Acquisition Officer to work up to his estimate, and to an over-estimate of establishment charges. The decrease in the *North-Western Provinces and Oudh* is due chiefly to an accident at Nadrai which necessitated the stoppage of several works, and partly to credit taken for stores transferred to other works. The short outlay in the *Punjab* is due to sales of Railway and other stores appertaining to the Sirhind Canal, but no longer required for Canal works, to floods in the river Ravi which retarded the dam works on the Sidhnai Canal, to delay in obtaining sanction to certain estimates, and to savings in estimates of certain works. In *Madras* the decrease is due to several causes of which the principal are, that bills for compensation were not received in time, that water in the Ryves Canal impeded the construction of certain masonry works, and that the acquisition of land was delayed. The short outlay in *Bombay* has chiefly occurred on the Eastern Nara Works, and is due to failure of the contractor for the protective embankment, Mithrau Canal, to carry out works in time according to agreement, as well as to the sudden removal of about 2,000 donkeys from the work for transport purposes.

Section O.—PERMANENT DEBT.

	Budget.	1884-85. Revised.	Accounts.
INDIA—			
Incurred	2,520,0	8,2	13,9
Discharged	20,0	33,2	20,2
NET	2,500,0	—25,0	—6,3
ENGLAND—

NET	+2,221,1	+1,155,4	+1,194,0

See paragraph 34 under A Interest on debt.

Section P.—UNFUNDED DEBT.

	Budget.	1884-85. Revised.	Accounts.
Special Loans	...	—24,0	—10,0
Treasury Notes and Service Funds, India	+234,9	+251,9	+260,4
Do. Do. England	+3,6	+3,8	+3,7
Savings Bank Deposits	+525,3	+623,3	+704,3
	+763,8	+855,0	+958,4

196. The difference under *Special Loans* is due to a payment on account of the capitalised pension of Nawab Mumtazuddowla, late a pensioner on the Oudh Special Loans. The full amount due was entered in the Revised Estimate, but it was not all drawn within the year. The excess under the other heads may be ascribed to the normal growth of the Service Funds and Savings Banks.

Section Q.—DEPOSITS AND ADVANCES.

	Budget.		1884-85. Revised.		Accounts.	
INDIA—						
Provincial Balances (net)	.....	—514,5	.....	—432,6	.....	—288,9
Commission for Reduction of Debt (Indian Account)	301,3—0=	+301,3	319,3 —3,0=	+316,3	341,5 —2,6=	+338,9
Other Deposits and Advances	23,409,3—23,319,9=	+89,4	26,802,3—26,210,7=	+591,6		+447,4
England	.....	+500,0	.....	+250,0		+249,4
TOTAL		+376,2		+725,3		+746,8

197. The first two items are explained in paragraphs 174 and 113. The difference under *Other Deposits and Advances* is spread over a large number of headings, the receipts and payments under which are difficult to estimate. The amounts entered against *England* relate to the Grant-in-aid of 3 millions for the Afghan War. The instalment for the year 1884-85 was received in the previous year, the sum received in 1884-85 being one moiety of the instalment due in 1885-86.

Section R.—LOANS TO MUNICIPALITIES, NATIVE STATES, &c.

	Budget.	1884-85. Revised.	Accounts.
India	245,9—130,5	261,6—248,9	294,3—270,3
	115,4	12,7	24,0

198 These small figures represent transactions of considerable magnitude, as noted below, and which it is difficult to forecast. In the present year the Budget calculations were largely affected by the temporary loan of 162,5 given to the Calcutta Port Trust for construction of the Kidderpore Dock.

	Amount advanced.	Amount repaid.
Loans to Native States	2,0	77,1
Advances for Ceylon Cable	9,2	...

Section S.—CAPITAL OF INDIAN RAILWAY COMPANIES.—*continued.*

Guaranteed Railways.

199. In *India*, the excess credits in the Bombay, Baroda and Central India, and the Sindh, Punjab and Delhi lines, are due to larger issues of Stores from Capital to Revenue than were anticipated. The accounts of the Eastern Bengal Railway were specially affected this year by its transfer to Government on 1st July 1884. The Estimates of the Great Indian Peninsula and Madras Railways were pitched too high. The Oudh and Rohilkhund Railway curtailed expenditure on the Ganges Bridge, the northern extension, and some minor works. The increase in Southern India is due partly to a refund by revenue of commission charges connected with Debenture Bonds, and partly to enlarged consumption of Revenue Stores.

200. The *English* Estimates were framed in communication with the Railway Companies, which did not adhere strictly to their programme. The receipt from the Bombay, Baroda and Central India, the Oudh and Rohilkhund, and the Southern India Railway Companies fell short of the Estimate by 472,4, 199,9, and 135,8 respectively, in the latter case owing to debentures for that amount having been renewed.

Subsidized Railways.

201. The principal difference here is in the Southern Mahratta Railway, to which permission was given, after the Budget was framed, to raise money by debentures to the extent of 1,700,0 on account of the West Deccan line.

Section T.—REMITTANCES.

	1884-85. Budget.	Revised.	Accounts.
Money Order (net)	...	...	—4,2
Other Local Remittances (net)	+23,3	+28,9	—9,2
Other Departmental Accounts (net)	+7,1	—9	+7,1
Accounts between Civil and other Departments (net)—			
Post Office	...	...	+9,3
Telegraph	...	...	+1,7
Guaranteed Railways	...	+100,0	...
Marine	...	...	+6

Remittance Account between England and India (net)	—281,9	—311,4	—379,6
TOTAL	—251,5	+301,1	—349,4

202. The use of money orders is steadily increasing, as shewn by the figures entered below. This year the payments exceeded the issues on account of the money orders outstanding from previous years. The figures entered under Accounts between Civil and other Departments have also set-offs in the balances on the 31st March 1885. The large amount remaining in the Account with London is connected with the Expedition to Egypt.

		Issued.	Paid.
1881-82	Money order transactions	5,733,5	5,714,1
1882-83		6,468,4	6,454,2

Drawings	16,500,0	13,795,3	13,758,9
Payments	16,500,0	13,023,5	12,921,4

203. The following bills were drawn during the year by the Secretary of State.

	£	₹	Rate in Pence.
On account of allotments in March 1884	53,1	6,50	19·59
" " April "	1,673,1	2,02,89	19·79
" " May "	1,282,4	1,55,01	19·85
" " June "	861,1	1,05,10	19·66
" " July "	1,359,6	1,66,94	19·54
" " August "	472,4	58,08	19·52
" " September "	296,2	36,46	19·49
" " October "	610,8	75,56	19·40
" " November "	1,099,4	1,38,00	19·12
" " December "	1,125,8	1,41,84	19·04
" " January 1885	1,548,2	1,94,67	19·08
" " February "	1,617,0	2,05,11	18·92
" " March "	1,759,8	2,24,06	18·84
	13,758,9	17,10,22	19·30

204. When the Estimate for 1884-85 was framed it was not settled whether the Loan for Productive Public Works would be taken in England or in India; and as it was eventually taken in England, the drawings were reduced by 3,500,0.

The payment account of the year may be stated as follows:—

	£	₹
Bills of 1883-84 outstanding on 1st April 1884	175,2	21,43
Bills Drawn in 1884-85 as entered above	13,758,9	17,10,22
Total bills to be paid	13,934,1	17,31,65
Bills paid in 1884-85	12,921,4	16,02,85
Bills outstanding on 1st April 1885	1,012,7	1,28,80

Section V.—CASH BALANCE.

	1884-85. Budget.	Revised.	Accounts.
Balance on 1st April 1884	16,046,2	17,313,1	17,313,1
Balance on 31st March 1885	13,073,1	14,133,1	14,789,9
Less balance on 31st March 1885	2,973,1	3,180,0	2,523,2

205. This difference between the estimate and the accounts is due to India and England in the following proportions:—

	1884-85. Budget.	Revised.	Accounts.
India	—1,429,2	—1,279,9	—659,4
England	—1,543,9	—1,900,1	—1,863,8
TOTAL	—2,973,1	—3,180,0	—2,523,2

Budget Estimates	1884-85.
Revised Estimates	1884-85.
