Under-Secretary.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURN OF ACCIDENTS ON INDIAN RAILWAYS FOR THE THIRD QUARTER OF 1885.

No. 282 R. T., Fort William, March 18, 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 200 R.T., dated 10th March 1885.
" " " No. 1155 R.T., dated 15th December 1885.

Read also—

Director General of Railways' No. 0136 T., dated 4th March 1886.
Abstract Returns of Accidents to trains, &c., on the open lines of railway in India for the quarter ending 30th September 1885.

Observations.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling stock, permanent-way, &c., shows an increase of 60, or 9·27 per cent., against an increase of 1,124 miles, or 10·22 per cent., in the mean mileage worked, and of 1,591,225 miles, or 18·07 per cent., in the train mileage. The following are the Railways on which the numbers chiefly vary:—

Railway.	Accidents. Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	Train Mileage. Percentage of increase.	Percentage of decrease.
East Indian . . .	20	...	71	...	14	...
Oudh and Rohilkhand .	14	...	108	...	35	...
Southern Mahratta .	10	...	83	...	148	...
Bengal and North-Western .	27	...	2,700		1,099	...
Darjeeling-Himalayan .	...	18	...	82	...	16
Indus Valley . . .	25	...	45	...	29	...
Eastern Bengal . . .	...	18	...	82	...	5
Nalhati	10	...	500	...	..	4

2. Besides the above, there were 5 accidents each on the Rohilkhand-Kumaon (including Bareilly-Pilibhit line) and Jorhat Railways. These lines were not opened during the corresponding period of 1884.

3. Of the increase of 20 accidents on the East Indian Railway, 4 were under "Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line," 4 under "Trains running over cattle on the line," and 8 under "Slips in cuttings or embankments." Under the latter head there was not a single case in the third quarter of 1884.

4. On the Oudh and Rohilkhand Railway the increase mainly took place under "Trains running over cattle on the line," the number of cases being 19 against 9.

5. The increases on the Southern Mahratta and Bengal and North-Western Railways are due to increased train mileage consequent on the opening of new sections. The accidents on these two lines numbered 22 and 28 against 12 and 1 respectively.

6. On the Indus Valley Railway the number of "Goods trains or parts of goods trains, engines, &c., leaving the rails" increased from 2 to 9, cases of "the bursting of boilers or tubes, &c., of engines" from 1 to 11, and of "fire in trains" from 7 to 15. The number of cattle accidents diminished from 21 to 12.

7. The total number of accidents on the Nalhati Railway rose from 2 to 12, of which 6 occurred under "Trains running over cattle on the line" and 3 under "Failure of machinery, springs, &c., of engines."

8. The decrease on the Darjeeling-Himalayan Railway was general, the total number of accidents being 4 only against 22.

9. On the Eastern Bengal Railway, with the exception of the cattle accidents, the number of which diminished from 31 to 23, there was no large decrease under any particular head.

10. The casualties resulting from accidents to trains, &c., were, among passengers and others, 3 injured against 8 injured; and among servants 1 killed and 12 injured against 1 killed. Of the casualties to Railway servants, injury to 4 men was due to a slight collision which occurred at Madhupur, East Indian Railway, between an up passenger train and a brake-van, while the latter was being pushed by a pilot engine.

11. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby:—

Description.	Number of accidents.	Number of passengers and others.		Number of Servants.		Total.	
		Killed.	Injured	Killed.	Injured.	Killed.	Injured.
Collsions between passenger trains or parts of passenger trains	2	...	...	...	...	...	...
Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line	12	...	...	...	4	...	4
Collisions between goods trains or parts of goods trains	14	...	...	...	1	...	1
Collisions between light engines	3	...	...	...	...	...	...
Passenger trains, or parts of passenger trains, leaving the rails	30	...	...	...	...	...	...
Goods trains, or parts of goods trains, engines, &c., leaving the rails	58	...	...	...	...	...	...
Trains or engines travelling in the wrong direction through points	9	...	...	...	...	...	...
Trains running into stations or sidings at too high a speed	3	...	...	..	...	...	...
Trains running over cattle on the line	283	...	...	...	..	...	...
Trains running over obstructions on the line	15	...	...	...	1	...	1
Trains running through gates at level-crossings	6	...	...	...	1	...	1
The bursting of boilers or tubes, &c., of engines	15	...	...	...	...	...	...
The failure of machinery, springs, &c., of engines	53	...	...	...	..	...	...
The failure of tyres	2	...	.	...	...	...	...
Ditto of axles	5	...	...	...	...	...	...
Ditto of brake apparatus	1	...	...	...	...	...	...
Ditto of couplings	28	...	...	...	1	...	1
Ditto of tunnels, bridges, viaducts, culverts, &c.	2	...	...	...	...	...	...
Broken rails	7	...	...	...	...	...	...
The flooding of portions of permanent-way	43	...	2	...	1	...	3
Slips in cuttings or embankments	17	...	...	...	...	...	...
Fire in trains	32	...	...	...	...		...
Fire at stations, or involving injury to bridges or viaducts	1	...	...	...	...	...	...
Other accidents	66	...	1	1	3	1	4
Total	707	...	3	1	12	1	15

12. The number of cases in which "passenger trains or parts of passenger trains" left the metals increased from 18 to 30, owing chiefly to there having been 9 accidents of this description against 1 on the Bengal and North-Western Railway.

13. The accidents in which "goods trains, or parts of goods trains, engines, &c.," left the rails were most numerous on the Bengal and North-Western and Indus Valley Railways, being 14 and 9, respectively, out of a total of 58.

14. The cattle accidents numbered 283 against 280. On the Rajputana-Malwa Railway alone there occurred 51 accidents, being the largest number as compared with other lines. In reviewing the Accident Returns for the 2nd quarter of 1885, the Government of India called the attention of the Government of Bombay to the frequency of these accidents, and asked for a report on the progress recently made in fencing the Rajputana-Malwa Railway, and as to what steps it is proposed to take to complete the fencing on those portions of the line where cattle accidents occur most frequently, but as yet no answer has been received by the Government of India. Compared with the corresponding quarter of 1884, there is a decrease of 8 in the number of accidents on this line. Next to it stands the South Indian Railway, but on this the number has also diminished from 42 to 29, or by 13.

15. Of the 15 cases of "the bursting of boilers or tubes, &c., of engines," 11 took place on the Indus Valley Railway alone; and of the 53 cases of "Failure of machinery, springs, &c., of engines," 13 took place on the Sind, Punjab and Delhi Railway, and 15 on the Indus Valley Railway.

16. The couplings failed in 28 instances, of which one-third, or 9, occurred on the Rajputana-Malwa Railway.

17. The number of cases of "Flooding of portions of permanent-way" was also the largest on the Rajputana-Malwa Railway, being 13 out of a total of 43. On the Great Indian Peninsula Railway there has been a decrease from 14 to 5 under this class of accidents.

18. The cases of "Fire in trains" were the most numerous on the Indus Valley State Railway, the number being 15 out of a total of 32. This is a wood-burning line.

19. The number of accidents classed as "Other accidents" rose from 34 to 66, of which 27, or 41 per cent., occurred on the Bombay, Baroda and Central India Railway alone.

20. The casualties to passengers from causes other than accidents to trains, &c., were—

	Killed.	Injured.
From falling between carriages and platforms	...	1
Falling on to the platform, ballast, &c., when getting into, or out of, trains	...	4
Whilst crossing the line at stations	1	...
Falling out of carriages during the travelling of trains	3	15
Other accidents	4	4
Total	8	24

21. And the acoidents to servants in the employ of Railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were—

	Killed.	Injured.
During shunting operations	4	13
Falling off engines, vans, wagons, &c.	1	18
Coming in contact with overbridges, &c., during the travelling of trains	1	...
Coming in contact, while shunting, with vehicles, &c., standing in adjoining lines	...	1
Getting on, or off trains, engines, &c.	2	11
Whilst loading, unloading, or sheeting	2	12
Whilst working on the permanent-way or in sidings	1	2
Whilst walking along the line on the way home or to work	1	...
Whilst walking, crossing, or standing on the line	4	7
Whilst attending to the machinery of engines, cleaning them, &c.	...	5
Whilst attending to gates at level-crossings	2	2
Falling or being caught between vehicles and platforms	1	3
Falling off ladders, scaffolds, platforms, &c.	...	5
By falling of lamps, wagon-doors, timber, weights, &c.	1	6
Whilst coupling or uncoupling wagons	2	6
Miscellaneous	4	23
Total	26	114

22. Of other persons killed and injured by running trains, &c., 4 were killed and 2 injured whilst passing over the line at level-crossings; 45 were killed and 15 injured whilst trespassing on the line; 18 committed suicide, and 2 were injured in attempting to commit suicide; and 3 were killed and 3 injured from miscellaneous causes.

23. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1884:—

	3rd quarter, 1884.		3rd quarter, 1885.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	1	11	...	3
From misconduct or want of caution	5	24	8	24
Servants.				
From causes beyond their own control	3	9	4	21
From misconduct or want of caution	20	79	23	105
Others.				
Whilst passing at level-crossings	3	3	4	2
Trespassers, including suicides	43	8	63	17
Other persons	5	2	3	3
Total	80	136	105	175

24. In addition to the above, 16 persons are reported to have been killed and 46 injured in yards, workshops, &c., and 72 persons to have met death in carriages and at stations from causes unconnected with the working of trains.

Resolution.—The attention of the Government of Bombay should be invited to the remarks in para. 14, with a view to the supply to the Government of India of the report on the fencing of the Rajputana-Malwa Railway therein referred to.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, British Burma and Assam.
The Residents, Hyderabad and Mysore.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Order.—Ordered, that this Resolution with the Abstract Returns be communicated to the Local Governments, Administrations, and Officers noted in the margin, for information.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution with the Abstract Returns be published in the Supplement to the *Gazette of India*.

Fred. FIREBRACE, *Major, R.E.*,
Under Secretary.

TABLE

ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c., on the several RAILWAYS open for Traffic in INDIA during the Number of RAILWAY SERVANTS

RAILWAYS.	1. Collisions between passenger trains, or parts of passenger trains.	2. Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line.	3. Collisions between goods trains, or parts of goods trains.	4. Collisions between light engines.	5. Passenger trains, or parts of passenger trains, leaving the rails.	6. Goods trains, or parts of goods trains, engines, &c., leaving the rails.	7. Trains or engines travelling in the wrong direction through points.	8. Trains running into stations or sidings at too high a speed.	9. Trains running over cattle on the line.	10. Trains running over obstructions on the line.	11. Trains running through gates at level-crossings.	12. The bursting of boilers or tubes, &c., of engines.	13. The failure of machinery, springs, &c., of engines.	14. The failure of tyres.	15. The failure of wheels.	16. The failure of axles.	17. The failure of brake apparatus.	18. The failure of couplings.	19. The failure of tunnels, bridges, viaducts, culverts, &c.	20. Broken rails.	21. The flooding of portions of permanent-way.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 19th March, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble T. E. Hughes, R.A., C.I.E.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St. A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton.
The Hon'ble R. Steel.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

GUARDIANS AND WARDS BILL.

The Hon'ble MR. ILBERT introduced the Bill to consolidate and amend the law relating to Guardians and Wards, and moved that it be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley, the Hon'ble Messrs. Evans and Hunter, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik, the Hon'ble Peári Mohan Mukerji and the Mover. He said:—"I propose to direct the attention of the Council to a few of the more important points raised by the Bill.

"The Bill does not define the term 'minor' further than by saying that the term means a person who has not reached the age of majority according to the law to which he is subject. In so doing it departs from the precedents afforded by the Acts of 1858 and 1874, which I propose to repeal, but follows the precedent of the Contract Act, and avoids some difficult questions connected with the age of majority. Some of these questions were settled by the Indian Majority Act of 1875, but the effect of that Act is not clear in all respects, and its application is confined to persons domiciled in British India. As to persons resident but not domiciled in British India, it seems clear that they do not attain their majority until 21 if they are in a regulation province, but if they happen to be in a non-regulation province it might be a question whether their age of majority is not governed by Act XIII of 1874, which defines a minor as a person who has not completed the age of 18 years. If this is so, the results may be odd. We all know the American story of the full grown railway passenger, who, on his arrival at San Francisco after a through journey from New York, tendered a half ticket, and when asked whether he really professed to be under age, replied 'No, but I was when I started'. In this country, if the view of the law which I have suggested, but for the accuracy of which I by no means vouch, is correct, a railway journey from a non-regulation to a regulation province might be attended by a still more startling result. A young British officer stationed with his regiment at Delhi may have attained his majority, but if he is subsequently quartered at Meerut he may, on his arrival there from Delhi, find that he has relapsed into infancy. The repeal of the Act of 1874 would be sufficient to remove this particular discrepancy, but it is possible that on this and other points the law of majority should be made more clear. If so, however, the necessary legislation should, I think, be embodied in an amendment of the Majority Act and not in the present Bill.

"Passing on to another definition, I may remark that the term 'guardian' is defined generally as meaning a person having the care of the person of a minor or of his property, or of both, and consequently the provisions of the Bill will apply to all guardians, whether appointed or recognized by the Court, or not, unless their application is expressly limited, as in several cases it is, to particular classes of guardians.

"The second chapter of the Bill relates to the appointment of guardians. Its first two sections deal with appointments otherwise than by the Court, and, in so doing, draw a distinction between the classes to which the Indian Succession Act applies and the classes to which it does not apply.

"In the case of the first class of persons the Bill declares the parental power of appointing guardians in the terms of the European British Minors Act —terms which, to the credit of the Indian legislature, recognize the mother's rights more liberally than they are recognized under the existing law of England.

"In the case of the other class of persons the Bill does not presume to define what powers of appointing guardians are valid under Hindu or Muhammadan law. It merely saves those powers whatever they may be.

"We now pass to the appointment of guardians by the Court, and here the Bill recognizes two classes of cases—one where no guardian has been appointed and the Court is called on to do what the parent might have done, and the other where there are conflicting claims to the guardianship and the Court has to decide between them. Accordingly the Court is empowered either to appoint a guardian or to declare the title of a person claiming to be a guardian. For this purpose concurrent jurisdiction is given to the High Court and to the District Court, and it is provided that as a general rule applications for guardianship of the person of a minor are to be made to the Court having jurisdiction where the minor resides, but this rule is not absolute and convenience is to be regarded. The procedure on the application is to be practically the same as under the European British Minors Act. The rules with respect to the considerations to be observed in appointing a guardian are also taken from that Act, but the Court is expressly directed to have regard to the law to which the minor is subject, and a special rule is added with reference to the particular cases of minors belonging to an undivided Hindu family. My friend Mr. Mandlik referred last week to the conflicting decisions about the power of a Court to appoint a guardian of a minor belonging to such a family, and it will be found that in framing the Bill and Statement of Objects and Reasons those decisions have not been overlooked. We should, I think, all admit that as a rule it is highly desirable to leave a minor belonging to a Hindu undivided family to his natural guardians, without any interference on the part of the Court, but there may be exceptional cases where the intervention of the Court may be required for his protection. The Bill recognizes the possibility of such cases, but expressly provides, *first*, that, where the minor is a member of an undivided Hindu family, special weight is to be attached to any claim which the managing member of the family may make to be appointed or declared guardian, and to any objection which he may take to a proposed appointment or declaration; and *secondly*, that, if a guardian of the property is appointed in such a case, the Court must, except where it is satisfactorily proved that the minor's interests have been actually imperilled, impose such restrictions on the guardian as will prevent him from interfering with the powers of the managing member of the family.

"The chapter relating to the duties, rights and liabilities of guardians is largely taken from the European British Minors Act, with some additions and omissions. A section has been added laying down certain principles which are recognized by the English law as flowing from the fiduciary relation of guardian and ward. On the other hand, a section relating to the religion in which a ward is to be trained has been omitted. It merely declares what is well-settled English law in the very rare cases in which it is brought into operation, and I did not feel sure that, if applied to a wider class, it might not raise or suggest more difficulties than it removes. If, however, the Select

Committee should think that it can with propriety be re-enacted, either with or without modifications, I would gladly insert it in the Bill.

"The sections relating to the powers of a guardian of property deal with one of the questions which was most discussed in the replies elicited by the Government Resolution that preceded the preparation of this Bill.

"The Hon'ble Mr. Melvill was strongly impressed with the dangers to which the interests of minors are exposed under the existing law, and, in order to prevent or check improper alienations of the property, suggested that it should be rendered unsafe for any person to enter into any transaction with respect to the immoveable property of a minor except with a guardian or administrator holding a certificate granted by the Court. On the other hand, he would put a premium on applications for such certificates by removing that provision of the Minors Act which requires the previous sanction of the Civil Court to any alienation or encumbrance by a certificated guardian.

"The Resolution of the Government of India in commenting on these suggestions pointed out that the former of them might interfere, to a much greater extent than is necessary or desirable, with the vast number of transactions which daily take place in relation to immoveable property in which minors are interested, and might flood the Civil Courts with applications for certificates; but with respect to the second suggestion inclined to the view that the existing restrictions on the powers of certificated guardians might in certain cases be relaxed.

"The opinions received on these points appear to me to point to the conclusion that it would not be safe or desirable to restrict the powers of uncertificated guardians in the manner proposed by Mr. Melvill; that as a general rule guardians not appointed or recognized by the Court should have such powers as are given to them by the law to which they are subject, and by the instrument (if any) to which they owe their appointment; that as a general rule also guardians appointed or recognized by the Court should not alienate the ward's property without the leave of the Court; but that the Court should be empowered to relax these restrictions.

"These are the lines upon which the Bill has been drawn. It provides that where a guardian has been appointed or declared by the Court, he shall not sell, borrow or grant long leases without the previous permission of the Court, but the Court may, subject to rules to be made by the High Court, exempt a guardian from the necessity of obtaining the permission, either generally or in special circumstances, and as to either the whole or any specified part of the ward's property. It then describes the considerations which are to be observed in granting this permission, and then, in a section relating to the general powers of a guardian of property, it goes on to say that—

"*first*, where a guardian has been appointed or declared by the Court, the Court may by order define, extend or restrict his powers in such manner and to such extent as it may consider to be for the advantage of the ward and consistent with the law to which he is subject;

"*secondly*, subject to any such order and to the specific restrictions to which I have referred, a guardian appointed by will or other like instrument is to have the powers and be subject to the restrictions conferred and imposed on him by that instrument; and

"*lastly*, subject to these possible restrictions, a guardian may do all acts which are reasonable and proper for the realization, protection or benefit of the ward's property and are allowed by the law to which the ward is subject.

"Thus in the cases where the Court does not intervene, which will of course be the great majority, the guardian is left practically as he is under the existing law, but where the Court exercises its power of intervention it is given considerable discretion to mould the powers of the guardian in such way as it may consider conducive to the interests of the ward.

"The section giving this discretion follows the lines of a section in the Probate and Administration Act (section 90), which, I am told, is not working quite satisfactorily in practice. It is very possible that the experience gained in working that section may suggest improvements in the present Bill, but it must be borne in mind that there is a considerable difference between the position of a guardian and the position of an administrator to a deceased person's property, and that restrictions which are unnecessary or undesirable in the latter case may be justified or required in the former.

"The sections to which I have just referred are those which I found it most difficult to frame. In the later portions of the Bill the existing law for the most part furnished a sufficient guide, but it will be found that additions have been made which will I think be found advantageous both to guardians and to wards. Thus a guardian is empowered to apply to the Court for advice as to the execution of his duties, and is protected if he acts in good faith on that advice. On the other hand, the Court is empowered, either on application by any person interested or of its own motion, to make an order regulating the conduct or proceedings of any guardian whether he is appointed by the Court or not.

"It will have been observed from what I have said that the Bill deals with certain points about which there is room for considerable difference of opinion. If, however, the Council approves of the general lines on which the Bill is framed, it may safely leave these points to be considered and discussed by the Select Committee."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

INDIAN SECURITIES BILL.

The Hon'ble SIR A. COLVIN moved that the Report of the Select Committee on the Bill to amend the law relating to Government Securities be taken into consideration. He said:—"Since this Bill was sent to the Select Committee the only change which has been made is the addition of two sub-sections to the section (7) providing for the case of indorsements by the past holders of public offices, and also for cases where there is more than one holder of such office. The opportunity has also been taken for consolidating the law relating to Government securities. The provisions of the Indian Securities Acts of 1881 and 1885 have accordingly been embodied in the present Bill.

"For the rest, I have nothing to add to what was explained when this Bill was first introduced, and I need not detain the Council by further remarks on the subject."

The Motion was put and agreed to.

The Hon'ble SIR A. COLVIN also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

OUDH RENT BILL.

His Excellency THE PRESIDENT said:—"As this is the last meeting of the season, and we are about to adjourn *sine die*, I think it well to explain that the reason why we have not gone on with the Oudh Tenancy Bill, which was introduced some weeks ago, has been the unavoidable absence of our colleague, the Hon'ble Rájá Amir Hosan, who has great knowledge of the conditions of Oudh agriculture, and takes a special interest in the proposed legislation. As we counted on his co-operation and assistance, and as a severe illness unfortunately prevents him from taking his place amongst us, we have thought it better to postpone taking the Bill through its second stage. In order, however, not to lose time, the Local Government intends, I understand, to publish a draft of the Bill, and to collect the opinions of competent authorities upon it."

The Council adjourned *sine die*.

S. HARVEY JAMES,
Offg. Secy. to the Govt. of India,
Legislative Department.

FORT WILLIAM;
The 22nd March, 1886.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN BENGAL FOR 1884-85.

No. 64 I., dated Fort William, the 18th March 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

The Revenue Report of Irrigation Works in Bengal for 1884-85, and the Resolution thereon by the Government of Bengal, No. 328 I.—A., dated 20th February 1886.

OBSERVATIONS.—The total Capital outlay, including indirect charges incurred up to the end of the year, amounted to R6,77,31,843, distributed as follows:—

	₹
Productive Public Works	5,79,91,952
Ordinary Irrigation and Navigation	90,21,676
Protective	7,18,215
TOTAL	6,77,31,843

2. The following statement shows the gross assessed revenue of 1884-85, 1883-84, and the average of the 5 years 1879-80 to 1883-84 of the "Productive" Irrigation Works:—

CANALS.	ASSESSMENTS.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	₹	₹	₹
Orissa	1,74,525	1,97,213	2,75,598
Midnapur	2,63,469	2,81,554	2,85,931
Hidgellee	43,507	63,590	51,219
Sone	12,07,514	8,61,909	6,86,876
TOTAL	16,89,015	14,04,266	12,99,624

The continued decrease on the Orissa Canals is attributed to uncertainty as to the recommendations of the Canal Commission, and the general unwillingness to execute new leases until the final result of these recommendations should be known; that on the Midnapur Canal to timely and sufficient rainfall; and that on the Hidgellee Canal to the yearly increasing difficulties of silt clearance. The very satisfactory increase on the Sone Canals is due to the rainfall having been below the average and unequally distributed, and to a large increase in the areas irrigated under five-year leases.

3. The working expenses, including indirect charges, amounted to—

CANALS.	WORKING EXPENSES.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	₹	₹	₹
Orissa	3,29,288	3,05,530	3,42,279
Midnapur	2,31,803	2,23,586	2,13,749
Hidgellee	38,248	48,093	38,170
Sone	6,28,075	5,42,159	4,94,171
TOTAL	12,27,414	11,19,368	10,88,369

The increase of expenditure on the Sone Canals occurs mainly under the head of "Works."

4. The net assessed revenue was, therefore, as shown below:—

CANALS.	NET ASSESSED REVENUE.			Percentage of 1884-85 on Capital outlay to end of year.
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.	
	₹	₹	₹	
Orissa	—1,54,763	—1,08,817	—66,681	—0·71
Midnapur	31,666	57,968	72,182	0·37
Hidgellee	5,259	15,497	13,049	0·28
Sone	5,79,439	3,19,750	1,92,705	2·26
TOTAL	4,61,601	2,84,898	2,11,255	0·79

5. The interest charges on the Capital cost of the works constructed from Loan Funds amounted to R22,12,626 for the year, exceeding the net assessed revenue of the year and of the same works by R17,51,025; the corresponding deficit of the previous year having been R18,75,860.

6. The areas irrigated were as follows:—

CANALS.	ACRES IRRIGATED.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
Orissa	57,372	48,760	108,065
Midnapur	69,294	97,919	101,666
Sone	356,577	350,614	208,139
TOTAL	483,243	497,293	417,870

The falling off on the Midnapur Canal has not been compensated by the slight increments on the Orissa and Sone Systems. The area watered by the Midnapur Canal during 1881-82 (104,434 acres) is apparently about the

limit attainable without storage reservoirs, and it would seem that no great extension of area can be looked for on the Sone Canals. The area irrigated under five-year leases on the Sone Canals was just doubled in two years, rising from 74,555 acres in 1882-83 to 149,185 acres in 1884-85.

7. The duty obtained from the water varied from 40·5 to 75·5 acres per cubic foot per second of supplies entering the heads of the Orissa and Sone Canals, rice irrigation forming about 95 and 51 per cent., respectively, of the areas watered from the two systems of canals.

8. The Navigation receipts of 1884-85 are compared in the margin with those of 1883-84 and the average of the 5 years ending with 1883-84. The decrease of revenue in Orissa is due to a reduction in tolls averaging about 40 per cent; that on the Hidgellee Canal to silt deposits; and that on the Sone Canals to a three months' closure of the Main Western Canal for silt clearance.

Canals.	Navigation receipts.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
	R	R	R
Orissa . . .	79,802	1,10,152	94,262
Midnapur . . .	1,28,747	1,20,580	1,17,365
Hidgellee . . .	41,382	62,317	50,023
Sone . . .	51,761	85,193	70,103
Total .	3,01,692	3,78,242	3,31,753

9. The balances of irrigation revenue outstanding at the end of 1884-85, as shown in para. 5 of the Local Government's Resolution, are still very large, and it is to be regretted that on the Sone Canals, where the uncollected balances are especially heavy, those on account of "previous years" should have increased from R1,37,928 on 1st April 1884 to R2,17,685 on 1st April 1885.

10. The cost of measuring and assessing the irrigated areas and of collecting the canal revenue during 1884-85 is compared below with that of 1883-84 and of the average of the 5 years ending with 1883-84:—

Canals.	Percentage of expenditure on amounts collected.		
	1884-85.	1883-84.	Average of 5 years ending with 1883-84.
Orissa	49·50	21·30	19·26
Midnapur	19·03	12·97	13·08
Sone	16·78	23·54	22·44

The very marked increase in cost of measurement, assessment and collection on the Orissa Canals appears to be due to the difficulty of realising the canal dues, and it is hoped that measures may soon be adopted by the Local Government to remedy the present defects in the system of canal administration.

11. The "Ordinary" Irrigation works in operation in Bengal are the "Sarun" and the "Calcutta and Eastern" Canals. The revenue derived from the former fell short of the working expenses by R1,449. There is a guarantee of income on these canals amounting to Rs. 21,750, but all the guarantors, except the Maharaja of Hutwa and the proprietors of the Ramcola Indigo concern, appear to be from one to three years in arrears. The Calcutta and Eastern Canals are, as asual, prosperous, yielding 5·29 per cent. clear profit on R52,00,547, the Capital outlay incurred on them up to the end of the year.

The receipts and working expenses (direct and indirect) of these canals are compared below for 1884-85 and the two preceding years:—

Year.	Calcutta and Eastern Canals.		
	Gross receipts.	Working expenses	Net revenue.
	R	R	R
1884-85	5,69,726	2,91,214	2,78,512
1883-84	5,64,101	2,32,031	3,32,070
1882-83	5,64,194	3,26,897	2,37,297

Order.—Ordered, that copies of this Resolution and of the Report and its accompaniments be forwarded to the Secretary of State, and to the Finance and Commerce and the Revenue and Agricultural Departments for information.

Also, that a copy of this Resolution be forwarded to the Government of Bengal for information and guidance.

Also, that copies of this Resolution and of the Report be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

The Governments of Madras, Bombay, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and British Burma.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also, to the Foreign Department, for communication to the Resident at Mysore and Chief Commissioner of Coorg.

Also, that this Resolution, the Resolution of the Government of Bengal, and the Chief Engineer's Report, with a few selected statements, be published in the Supplement to the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Govt. of India.

Resolution on the Canal Revenue Report for 1884-85 and the Chief Engineer's Note on the same, No. 328I.A., dated Calcutta, the 20th February 1886.

The total outlay, direct and indirect, to the close of the year 1884-85 on canals in Bengal has been R6,77,31,843. Of this sum, R7,00,000 have been contributed by the Imperial Government from the Famine Protective grant, R82,61,636 have been provided from Provincial revenues, and R5,79,91,952 have been charged to Loan funds, interest on which is chargeable to the province. In addition to the sums mentioned above, R7,78,255 have been expended on surveys for irrigation works which have not been carried out.

2. There are now in actual operation in Bengal 699¾ miles of canal, of which 489 miles are navigable. The total area commanded by these canals is 2,517,552 acres, of which 483,243 acres, producing crops of the estimated value of R1,21,82,304, were irrigated during the current year. The number of boats plying in the canals during the year was 90,515, and 776,564 tons of goods of an approximate value of R2,73,50,552 were carried. The Sarun canals, in which the area commanded can only be imperfectly irrigated, and the Calcutta and Eastern Canals, which are mostly composed of canalized rivers, have been excluded in taking out the above figures.

3. The receipts from, and expenditure on, the canals in operation for the last three years are given in the statement following :—

Name of Canal.	1884-85.		1883-84.		1882-83.	
	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.
Productive Public Works.	₹	₹	₹	₹	₹	₹
Orissa Canals . .	1,43,585	3,29,366	2,37,868	3,05,530	3,20,010	3,55,281
Midnapore Canal .	2,57,955	2,31,915	2,64,576	2,23,586	2,68,010	2,46,502
Hidgellee Tidal Canal .	43,507	38,248	63,590	48,093	45,032	41,897
Sone Canals . .	8,62,474	6,35,530	6,03,807	5,42,159	6,84,677	5,40,774
Total .	13,07,521	12,35,059	11,69,841	11,19,368	13,17,729	11,93,454
Irrigation and Navigation Works.						
Saran Canals . .	9,341	25,593	23,041	24,066	18,027	34,948
Calcutta and Eastern Canals . .	5,69,726	2,91,214	5,64,101	2,32,031	5,64,194	3,26,897
Total .	5,79,067	3,16,807	5,87,142	2,56,097	5,82,221	3,61,845
Grand Total .	18,86,588	15,51,866	17,56,983	13,75,465	18,99,950	15,55,299

4. The net income for the year was therefore ₹3,34,722. Interest amounting to ₹22,12,626 was, however, payable to the Imperial Government, so that there was a deficit of ₹18,77,904 to be met from Provincial revenues.

The revenue for the same years under the three main heads into which the receipts are divided is shown below :—

Head.	1884-85.	1883-84.	1882-83.
	₹	₹	₹
Water-rates	9,46,808	7,49,122	8,67,118
Navigation	8,22,187	9,29,968	9,25,416
Miscellaneous	1,17,593	77,893	1,07,416
Total .	18,86,588	17,56,983	18,99,950

5. The arrears of water-rates outstanding at the close of each of the last three years are shown in the statement following :—

Names of Canals.	1st April 1885.	1st April 1884.	1st April 1883.
	₹	₹	₹
Orissa Canals	77,869	52,203	1,21,647
Midnapore Canal	1,11,212	1,44,691	1,42,476
Sone Canals	6,95,208	4,23,793	3,11,665
Saran „	40,022	25,218	26,845
Total .	9,24,311	6,45,905	6,02,633

Compared with 1883-84, the receipts of the year show an improvement of ₹1,29,605, wholly due to the increased water-rates received from the Sone Canals. There is a decrease of nearly one lakh of rupees in the revenue derived from the Orissa Canals, and a small falling off in the receipts from the Midnapore and Tidal Canals.

6. The increased receipts are more than counterbalanced by increased working expenses, chiefly due to the biennial silt clearance of the Western Main Canal and to renewing iron girders on some of the bridges of the Calcutta Canals.

7. There has been a considerable increase in the balance of water-rates in arrears, chiefly under the head "Sone Canals." A large part of the arrears, though due, is not, however, legally recoverable until after the close of the year, and a still more considerable proportion represents the current *kharif* demand, which only became payable two months before its close. Taking, however, arrears of former years only, there is an increase of ₹1,49,857 in the outstandings, which is not satisfactory. The Lieutenant-Governor is not, however, disposed with an increasing assessment to regard a small increase in the arrear balance of the last preceding year as indicating careless administration. The arrears shown above extend from 1878-79, and the total assessment from that year to the end of 1884-85 has amounted to ₹45,60,645. It is certain that from various causes a percentage of the demand will be irrecoverable. The persons liable are nearly in every case cultivators of small means, and with upwards of 50,000 of these it is inevitable that some should escape. The increase in arrears in Sarun, which should not have been allowed to occur, has since been reduced.

8. In the table following the areas irrigated since 1882-83 are detailed :—

		1884-85.	1883-84.	1882-83.
		Acres.	Acres.	Acres.
Orissa .	Kharif	54,181	47,035	128,530
	Rabi	2,994	1,381	4,100
	Perennial	197	344	398
	Total .	57,372	48,760	133,028
Midnapore .	Kharif	69,294	97,919	101,939
Sone . .	Kharif	130,579	134,732	65,514
	Rabi	66,630	99,304	15,999
	Perennial	9,224	6,732	15,275
	Hot weather irrigation . .	959	8,524	2,481
	Five years' lease . . .	149,185	101,322	74,555
	Total .	356,577	350,614	173,824
	GRAND TOTAL .	483,243	497,293	408,791

9. In the province, as a whole, there has been a small falling off in the area irrigated, which has occurred in that commanded by the Midnapore Canal : it may be accepted that the limit of area likely to be irrigated in the present state of the canal was nearly reached in 1882-83, and that the area leased will fall short of this in years, such as the present, when the rainfall is favourable. The irrigation from the Orissa Canals is, despite a small increase over the year preceding, disappointing. The recommendations of the Commission which sat last December to consider the complaints made are now being considered, and it may confidently be hoped that a steady improvement will ensue when the uncertainty and disturbing causes noticed in the Chief Engineer's note have been removed. It is perhaps desirable to add that, during the year now passing, there has been a slight further improvement, and that the remedy for the present low returns is certainly not to be found in indiscriminately leasing small areas, the evils of which are forcibly referred to in the Chief Engineer's remarks on the Sone Canal irrigation, and which was stopped in Orissa in 1872. In Behar (the Sone Canals) there is a large increase in the area under five years' lease, and nearly the whole of the water-supply which can be made available is required for the area at present irrigated in the *kharif* season. Further returns from these canals depend on—*firstly*, the full demand being collected ; *secondly*, a greater area being irrigated with the supply of water available—in other words, more economy being exercised in distribution ; and *thirdly*, the extension of *rabi* irrigation. All these matters demand the closest attention of responsible officers. The Chief

Engineer adverts to the low duty obtained from the Eastern Main and Patna Canals, and no efforts should be spared to bring these canals up to the standard secured in the others comprised in the same project.

10. There has been a falling off in the returns from navigation, partly owing to Government having ceased, as far as possible, from having any direct connection with the transport service in accordance with the policy which was referred to in the resolution for 1883-84, and which has been pursued for some years past. The steamer line between Cuttack and Bhuddruck is the only one at present directly managed by public officers, and the Government steamers will be withdrawn from it so soon as there is a prospect of the service being efficiently maintained by a private company. The steamer services maintained by private enterprise on the Kendrapara, Midnapore, Patna, Arrah, and Buxar Canals are reported to be efficient and to meet the public convenience.

The decrease in tollage in Orissa is due to a reduction on the tolls, averaging 40 per cent.; in Midnapore there is a slight increase; whilst in Hidgellee there is a considerable falling off, owing partly to the canal having been closed for two months, and partly to the depth of water in the canal having in places throughout the year been so shallow through silt deposits that large boats could not pass. The remodelling of this canal is an urgent matter, as it forms the first section of the Orissa Coast Canal, which, it is expected, will be opened for traffic in July next.

11. The tollage collections from the various canals for the last three years are given in the table following:—

Year.	Orissa.	Midnapore.	Hidgellee.	Sone.	Calcutta Canals.	Total.
	₹	₹	₹	₹	₹	₹
1882-83 . . .	66,736	1,06,157	43,694	39,304	5,33,722	7,89,613
1883-84 . . .	61,602	1,08,931	62,317	48,032	5,24,752	8,05,634
1884-85 . . .	52,784	1,19,797	41,382	37,335	5,08,466	7,59,764

12. The Lieutenant-Governor notices with regret the early death of Mr. F. M. S. Douglas, late Executive Engineer, Arrah Division, an officer of much promise, who showed a special aptitude for canal revenue administration.

13. The late date at which the revenue reports were submitted by some Superintending Engineers is commented on in the Chief Engineer's note. A further period of fourteen days has been allowed for their preparation, and Sir Rivers Thomson expects that in future they will be submitted with complete punctuality.

ORDER.—Ordered, that a copy of this Resolution, and of the note and its accompaniments, be submitted to the Government of India in the Public Works Department for information; also that copies be forwarded to the Appointment, Revenue, and Financial Departments of this Government; the Board of Revenue, Lower Provinces; the Commissioners of the Presidency, Burdwan, Patna, and Orissa Divisions; the Collectors of the 24-Pergunnahs, Hooghly, Midnapore, Burdwan, Patna, Shahabad, Gya, Cuttack, and Balasore; the Superintending Engineers of the Orissa, South-Western, and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

J. M. MCNEILE, *Colonel, R.E.*,
Joint Secretary to the Government of Bengal,
P. W. Dept.

REVENUE REPORT.

Note by COLONEL J. M. MCNEILE, R.E., *Chief Engineer, on the Canal Revenue Reports for the year 1884-85.*

The total expenditure chargeable to capital, inclusive of indirect charges on Irrigation works in Bengal during the year 1884-85, amounted to ₹18,44,792, made up as follows:—

	Direct charges. ₹	Indirect charges. ₹	Total. ₹
Capital expenditure not charged to Revenue	11,89,878	33,669	12,23,547
Imperial Irrigation and Navigation works .	4,03,268	117	4,03,385
Provincial ditto ditto .	2,01,659	16,201	2,17,860
TOTAL .	17,94,805	49,987	18,44,792

2. The total capital outlay at the close of the year 1884-85 was as follows:—

	Direct charges. ₹	Indirect charges. ₹	Total. ₹
Capital expenditure not charged to Revenue	5,59,10,582	20,81,370	5,79,91,952
Imperial Irrigation and Navigation works .	13,87,366	90,889	14,78,255
Provincial ditto ditto .	81,05,793	1,55,843	82,61,636
TOTAL .	6,54,03,741	23,28,102	6,77,31,843

3. The following statement shows the particulars of the above outlay:—

	During 1884-85.			To end of 1884-85.

4. The capital expenditure on Imperial irrigation and navigation works includes a sum of ₹7,00,000, contributed by the Government of India from Famine Relief Protective Funds towards the completion of the Orissa Coast Canal.

5. The following statement shows the total receipts, working expenses, and charges for interest, in respect of the works which are classed as Productive Public Works during 1884-85 and four previous years:—

Particulars.	1884-85.	1883-84.	1882-83.	1881-82.	1880-81.
	₹	₹	₹	₹	₹
Receipts from all sources .	13,07,521	11,69,841	13,17,729	12,56,811	10,19,375
Working expenses (direct charges) .	11,79,758	10,69,394	11,50,028	10,43,134	9,93,448
Net revenue	1,27,763	1,00,447	1,67,701	2,13,677	25,927
Charge for interest	22,12,626	21,60,758	21,15,505	20,75,188	22,74,758
Deficit	20,84,863	20,60,311	19,47,804	18,61,511	22,48,831
Indirect charges debitable to revenue	55,301	49,974	43,426	60,700	57,280

Rate per cent. on capital outlay .	3·69	3·71	3·59	3·53	4·33

6. The amount of interest for Productive Public Works, which is payable to the Imperial Treasury by the Local Government for the year under review, is ₹22,12,626.

7. The total accumulated debt on account of interest on the capital outlay on works classed as Productive Public Works, and unpaid working expenses (inclusive of indirect charges debitable to revenue) of all works for which capital and revenue accounts are kept, amounted, up to the end of the year 1884-85, to ₹1,66,88,732, as shown below:—

Particulars.	Productive Public Works.	Irrigation and Navigation Works.	Total.
	₹	₹	₹
Receipts from all sources	97,96,362	1,81,97,019	2,79,93,381

High Level, 1st range	33	...	117½	62,483	48,815	44,730	11,937	11,635
Ditto, 2nd ,,	12½	...	...	...	70,000	...	323	279
Ditto, 3rd ,,	19	...	...	...	57,500	...	2,515	2,971
TOTAL	170½	62	641	358,162	475,815	188,880	48,760	57,372

There has been an increase of six miles in the length of canals in operation, due to the opening of the Gobri Extension Canal, by which 32,000 acres have been added to the area commanded. The area provided with distributaries is 6,500 acres in excess of that so shown last year, owing to the completion of 1·66 miles of distributaries taking off from the Machgong canal.

13. The statement following shows the areas irrigated and yearly rainfall since 1875-76 :—

YEAR.	Kharif.	Rabi.	Perennial.	TOTAL.	Rainfall.
	Acres.	Acres.	Acres.	Acres.	Inches.
1875-76	13,991	4,102	314	18,409	70·00*

1884-85	54,181	2,994	197	57,372	50·42†

* Mean of observations in Cuttack and Marsaghai.
† Ditto at 13 stations.

14. The area irrigated without authority was 1,938 acres only, against 21,801 acres shown in the previous year's report as coming under this head. The Superintending Engineer attributes the decrease partly to the increased area leased, partly to careful supervision, and chiefly perhaps to the fact that irrigation was not required. The rainfall was somewhat scanty, but well distributed throughout the kharif season, in the critical months of September and October, being well up to the average; in October it was greater than that of 1883-84 by

1·75 inches, and the falling off in surreptitious irrigation, which usually occurs at this time, is said to be due to this favourable circumstance. The area assessed is again gradually increasing though slowly, low prices, fairly plentiful rainfall, and possible changes in the water-rates, all having some effect in inducing the cultivators to refrain from executing leases as long as possible.

15. The whole subject of the assessment and collection of water-rates was considered by a commission which sat in Cuttack in the cold weather of 1884. An exhaustive report has been presented, and is now under the consideration of Government.

16. The assessments of the year on account of water-rates amounted to ₹82,185, the balance at its commencement was ₹52,203, making a total of ₹1,34,388. Of this sum ₹5,274 was remitted, and ₹51,245 realized, leaving a balance of ₹77,869 outstanding on the 31st March 1885. It is stated that "the fact that the Deputy Superintendent was powerless to enforce his own assessments, accounts for such unsatisfactory results." As legal assessments can be recovered under the certificate procedure, it cannot be admitted that the short realizations are fairly attributable to this cause. A special officer has since been deputed to dispose of the long standing certificates, and considerable progress has been made, but the sitting of the Canal Commission, and the general impression which got abroad, and no doubt still largely exists, that an immediate and important reduction of rates was about to be made, have operated to prevent the taking of fresh leases. The general uncertainty which must exist until final orders have issued on the report of the Commission cannot but have an unfavourable effect on the collections as well as on the execution of new leases.

17. There has been, compared with the previous year, a considerable falling off in the duty obtained from the water utilized—the table below showing an average duty of 66·33 acres only per cubic foot of water utilized against 90·25 acres obtained in 1883-84 :—

NAME OF CANAL.	Effective average discharge in cubic feet.	Total for each main canal.	Area of kharif leased.	Total area for each main canal, including branches.	Average duty of each cubic foot of water.	Average duty of water for each main canal, including branches.
	C. ft.	C. ft.	Acres.	Acres.	Acres.	Acres.
Kendraparah	268	417	22,710	29,446	84·74	70·61
Pattamoondi	129		6,279		48·67	
Gobri	20		457		22·85	
High level, 1st range	198	198	11,551	11,551	58·33	58·33
Taldandah	79	157	2,114	10,215	23·00	65·06
Machgong	78		8,101		103·85	
TOTAL	772	772	51,212	51,212	66·33	66·33

NOTE.—*On the quantity of water entering which is to a considerable extent determined by the requirements of navigation, the duty per cubic foot per second is* $\frac{43560}{1102}$ = *39·85 acres.*

No explanation of this falling off is given, but the Superintending Engineer remarks that the months of June, July, and November should be excluded from the calculations, and that calculated in this way the duty for the Kendraparah canal is reduced to 55 acres per cubic foot, which he considers to be the practical duty now obtained from water on the Orissa canals. In former years under any system of calculation much better results have been obtained, and it is hoped that an improvement in this respect will be recorded in the report for the current year. Of the irrigation, 3·97 per cent. was by lift and the remainder by flow.

18. Experiments to ascertain the value of irrigation to the crops carried out, the average difference in its favour on the money value of the produce being ₹6·06 in the Mahanuddy Division and ₹4·34 in the Brahminee-Byturnee Division. Details regarding these experiments will be found in paragraph 20 of the Superintending Engineer's report.

19. The receipts under the head "Navigation" amounted to ₹79,802, of which ₹27,018 were on account of the earnings of the transport service, and

₹52,784 from tolls on boats. The collections for 10 years under the above heads are given in the table below :—

	Tolls. ₹	Transport service. ₹	TOTAL. ₹
1875-76	16,377	Nil.	16,377
1876-77	22,881	,,	22,881
1877-78	33,844	,,	33,844
1878-79	57,042	,,	57,042
1879-80	62,389	35,686	98,075
1880-81	41,297	30,105	71,402
1881-82	53,219	29,987	83,206
1882-83	66,736	41,737	1,08,473
1883-84	61,602	48,550	1,10,152
1884-85	52,784	27,018	79, 02

20. It will be noticed that, compared with the previous year, there has been a decrease of ₹8,818 in the tollage receipts, and of ₹21,532 in the earnings of the transport service. The decreased revenue is, however, not due to any falling off in the traffic, which has in fact increased, but as regards tollage receipts to a revision of the rates of toll, involving a reduction of upwards of 40 per cent. on those previously charged, and as regards transport earnings to the fact of Government steamers on the Kendraparah canal having been withdrawn in favour of private companies, who have provided steamers of their own.

21. The length of navigable canal open at the close of the year, as shown in the Superintending Engineer's report, is 170½ miles. In this length, however, six miles of the Gobri Extension canal, which was not formally open for traffic until the 5th June 1885, are included. Through communication was not established until the date mentioned nor tolls charged, so that it is obviously proper to exclude the six miles mentioned in the statistical returns of tollage.

22. The earnings of the year under the head "Navigation" amounted to ₹77,780 against ₹1,07,147 in 1883-84. In that year, however, the higher scale of tollage was in force until the 1st of December, and during 1884-85 there were no receipts from the transport service on the Kendrapara canal after October, in which month Government steamers ceased to ply.

23. In the two following tables the result of the year's operations are contrasted with that preceding, the figures are based on assessments, which, however, do not differ materially from the collections :—

NAME OF CANAL.	Miles open.	TOLLAGE.		NUMBER of BOATS.		TONNAGE.		VALUE OF CARGO.		TOLLAGE PER MILE OF CANAL.	
		1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.
		₹	₹	No.	No.	Tons.	Tons.	₹	₹	₹	₹
Taldandah . . .	31	2,837	3,149	1,302	1,160	20,510	18,620	67,265	70,005	91·51	101·58

SUB-HEAD.	Government traffic.	Private traffic.	Total traffic.
	₹	₹	₹
Tollage	—3,203	—900	—4,103
Number of boats	—562	+3,823	+3,261
Tonnage	—7,187	+18,519	+11,332
Value of cargo	+4,142	—2,83,692	—2,79,550
Tollage per mile of canal	—19·77	—5·47	—25·24

There is a considerable and satisfactory increase in the number and tonnage of the boats not employed on account of Government.

24. The cost of the establishment employed on working the locks was ₹8,379 against ₹8,603 so expended in 1883-84.

25. The Superintending Engineer observes, paragraphs 36 and 37 of his report, that ₹37,560, the tollage receipts from private traffic on the Kendrapara canal are sufficient to pay working expenses, and 4 per cent. interest on all special navigation works, which he calculates at ₹36,361; he adds that this canal "has created a trade between Cuttack and the Sea Coast of 86,000 tons per annum, and a passenger traffic of 32,698 persons, which is steadily increasing, and it is to the indirect results from the extension of trade and its development by private enterprise that Government must chiefly look for a return from the capital invested on these canals."

26. The actual receipts for the year credited to the transport service amounted to ₹27,018 against ₹48,550 in 1883-84, the cost of working was ₹19,572, so that there was a profit of ₹7,446. Two steamers plied for eight months, and one for four months only.

It was stated in last year's report that the policy of Government was to withdraw as soon as possible, from all direct connection with the transport service; the Cuttack-Chandbally line, in which it has been demonstrated that a service can be profitably maintained is now entirely in the hands of three private companies, and the *Aurora* will be taken off the Cuttack-Bhuddruck line so soon as it is apparent that an efficient service will be kept up by private enterprise.

27. The miscellaneous receipts for the year amounted to ₹12,538, showing a decrease of ₹3,322 compared with that previous. The table following shows these receipts by sub-heads for the years mentioned :—

SOURCE OF REVENUE.	YEAR IN WHICH RECEIVED		DIFFERENCE.	
	1883-84.	1884-85.	Increase.	Decrease.
	₹	₹	₹	₹

TOTAL WORKING EXPENSES	2,07,618	2,14,661	2,16,072	2,39,090	3,67,779	3,06,068	3,28,660	3,41,540	*2,92,690	3,15,737

* Exclusive of ₹427 paid in England.

Indirect charges amounting to ₹13,629 must be added to the figures noted above, the result of the year's operations being a loss on these canals—excluding interest—of ₹1,85,781 against ₹67,662 in 1883-84, and ₹35,271 in the previous year.

This very disappointing result is mainly owing to the low receipts, the working expenses being only ₹23,047 in excess of those incurred in the year preceding.

30. The expenditure on works only was ₹1,89,780 against ₹1,66,238 in 1883-84. A comparative statement showing the distribution of the cost of maintenance for the principal works follows:—

HEAD.	1883-84.	1884-85.	Increase.	Decrease.
	₹	₹	₹	₹
Head works	49,949	67,581	17,632	...
Main canals	86,525	93,145	6,620	...
Distributaries	25,799	22,929	...	2,870
Drainage works	3,965	6,125	2,160	...
TOTAL	1,66,238	1,89,780	26,412	2,870
NET INCREASE	...	...	23,542	...

The increase under 'Head Works' is wholly due to the cost of repairing the damages sustained by the Pattia weir in the floods of 1884, the expenditure on that work during the year under review was ₹18,904 in excess of that incurred in the year preceding. There was a slight decrease in the cost of maintenance of the remaining weirs, but the large excess noted above has raised the average cost of maintenance, per foot run, from ₹2·70 in 1883-84 to ₹3·14 in 1884-85.

The table following shows the expenditure for the last three years by canals: the extra cost of repairs during 1884-85 is due to the construction of new gates for the Marsaghai Lock:—

NAME OF CANAL.	Miles.	1884-85.		1883-84.		1882-83.	
		Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile.

33. The area irrigated during the year, and in the two immediately preceding, is shown in the table below, which also gives the lengths of distributaries and the percentage area irrigated to that commanded :—

Particulars.	Totals provided for in the revised estimate.	Midnapore weir, ranges IV and V.			Tidal reaches, ranges I and II, and Panchcoorah weir, range III.			Total.		
		1882-83.	1883-84.	1884-85.	1882-83.	1883-84	1884-85.	1882-83.	1883-84.	1884-85.
Length of distributaries and branch canals . Miles	299·12	228·74	224·38	224·38	53·25	52·25	52·25	281·99	276·63	276·63
Area commanded . . Acres	125,000	100,000	100,000	100,000	25,000	25,000	25,000	125,000	125,000	125,000
Area irrigated . . ,,	...	88,573	86,805	60,352	13,064	11,114	8,942	101,637	97,919	69,294
Percentage of area irrigated to that commanded	...	88·57	86·80	60·35	52·21	44·45	35·77	81·30	78·33	55·43

Last year the area under irrigation showed a decrease of 3,718 acres compared with that previous, and in 1884-85 there has been a further falling off of 28,625 acres.

34. The following table shows the rainfall for the three years referred to :—

Stations.	Rainfall, 1882-83.	Rainfall, 1883-84.	Rainfall, 1884-85.	Remarks.
Midnapore	66·04	43·61	54·98	Average of 16 years previous to 1884-85, 54·21 inches.
Panchcoorah	51·59	51·92	48·84	Average of 15 years previous 51·06.
Contai	61·01	60·31	77·30	

35. It will be noticed that at Midnapore the rainfall was slightly in excess of the average, and the Superintending Engineer remarks that in the year under review the rains were timely and sufficient, and the cultivators were able to secure their crops independently of irrigation. In July, when leases are usually entered into, the rainfall at Midnapore was 22·64 inches against 10·82 in the year preceding, and in October, which is the critical time when the crop ripens, 5·64 inches against 0·32. The average falls in these months are 11·86 and 5·36 inches respectively. The consequence of the favourable rainfall was that out of leases for 43,593 acres, which lapsed during the year, those for 14,968 acres only were renewed. Of the area irrigated, 98 acres only were by lift, and 65,997 acres were under five-year leases, and 18 acres under annual leases. The unauthorised irrigation, which is not included in the foregoing figures, amounted to 3,181 acres.

36. The duty obtained from the water utilized was 125 acres for the area commanded by the Midnapore, and 81 acres for the area commanded by the Panchcoorah weir, against 208 acres and 81 acres per cubic foot obtained in 1883. The Superintending Engineer observes that—

"The distribution of water under the Midnapore weir was not conducted with the same rigid economy as in the previous year, nor is this surprising, as in 1883-84 the most rigid economy had to be exercised owing to the short supply of water and the excessive demand for it."

It must, however, not be lost sight of that with a sufficient rainfall the same quantity of canal water would not be required : ordinarily in a season like the one under review, the duty obtained should be higher than when there is a scanty rainfall.

37. The Superintending Engineer quotes a lengthy extract from the report of the Executive Engineer, Cossye Division, on the method in which the canal discharges have been calculated. The results are of doubtful value, and it is clear from the remarks made that the instructions given in letter No. 8T—I, dated 13th May 1882, have been either imperfectly apprehended, or not sufficiently attended to. The most important point on which information is required is the duty calculated on the quantity of water entering the canal, and to admit of this being given with approximate accuracy, actual daily observations, with mean velocity rods of the discharge about one mile below the head-sluices at Midnapore and Panchcoorah are necessary. Arrangements will be made for their being taken in future from July to October.

38. The assessments during the year on account of water-rates amounted to ₹1,22,321, the balance due on the 1st of April was ₹1,44,691, making a total of ₹2,67,012. Of this amount ₹1,16,807 was realised and ₹38,993 remitted or written off as being irrecoverable, leaving a balance due at the close of the year of ₹1,11,212. Of the balance ₹52,165 is on account of assessments of the year under review, and ₹59,047 arrears of previous years. The Commissioner states that of the balance due on account of arrears of previous years, remission can, under the rules in force, be claimed for ₹28,419, and that this sum was included in an application made to Government for sanction to write off water-rates amounting to ₹31,431, orders on which were deferred pending the receipt of further information. The arrears for years previous to 1882-83, amounting to ₹3,840 according to the Examiner's account, have been remitted so that the balance of undisputed arrears has been reduced to moderate dimensions.

The large remissions which Government has been from time to time asked to sanction appear to a very great extent due to needless delay in collections. The present Collector writes—

"The first is the delay in filing certificates for arrears. As stated above, the demand fell due in February, but the practice in the Canal Office for some years past has been to take no coercive steps for realization till December..... ..."

The whole matter has been urgently pressed on the notice of the Commissioner, and it is hoped that there will be in future a marked improvement.

39. Experiments on the yield of irrigated and unirrigated crops were carried

out in 1,103 different places. The results of these and of the experiments, carried out in the two preceding years are shown in the table below :—

	Year.	Outturn per acre in maunds of 80 tolahs.				Difference.	
		Irrigated.		Unirrigated.			
		Paddy.	Straw.	Paddy.	Straw.	Paddy.	Straw.
Midnapore Canal	1882	19·75	44·50	16·40	40·70	3·35	3·80
	1883	20·40	51·27	8·56	29·25	11·84	22·02
	1884	20·00	44·00	16·00	31·00	4·00	13·00
Panchkoorah Canal	1882	29·69	78·12	20·11	64·28	9·58	13·84
	1883	28·85	81·26	5·30	52·95	23·55	28·31
	1884	30·00	76·00	22·00	65·00	8·00	11·00
Tidal Reaches, Ranges I and II	1882	25·80	54·76	21·37	50·75	4·43	4·01
	1883	27·64	104·43	16·40	93·50	11·24	10·93
	1884	20·00	76·00	21·00	57·00	(—)1	19·00

The large yield on unirrigated land was in consequence of the favourable season, which has previously been noticed.

40. The receipts for the year under the head "Navigation" amounted to ₹1,28,747, of which ₹1,19,797 was received from tolls on boats and ₹8,950 from the Calcutta Steam Navigation Company on account of hire of steamers, and compounded tolls. Compared with the preceding year, there is an increase of ₹8,167 on the gross receipts, though the reduced tolls mentioned in last year's Revenue report had effect throughout the year instead of during four months only.

41. The tables below give the usual particulars regarding the traffic for the last 10 years :—

CANAL TRAFFIC.

42. The first reach of the Midnapore canal was closed for silt clearance and repairs from the 1st to the 21st of February 1885. The steamer service between Calcutta and Midnapore continues to be worked by the Calcutta Steam Navigation Company, Limited, and appears to meet the public convenience. The number of passengers and weight of goods carried both show an increase. There has been a steady increase in the tollage receipts since 1880-81, and both in that respect, and in the tonnage of boats, the traffic in 1884-85 has surpassed any year to date.

43. The amount received under the head "Miscellaneous" during the year was ₹12,401. Of this sum ₹11,628 was received by the Deputy Revenue Superintendent, and ₹773 by the Executive Engineer.

44. The statements below show the receipts on revenue account and the working expenses since 1875-76 :—

REVENUE RECEIPTS.

Year.	Water-rates.	Navigation.	Miscellaneous.	Total.
	₹	₹	₹	₹
1875-76	52,791	51,810	6,508	1,11,109

45. To the working expenses shown above, indirect charges debitable to revenue amounting to ₹8,741 must be added, the net earnings for the year being ₹26,040 against ₹40,990 in 1883-84.

This unfavourable result is partly due to the decreased receipts under the head "Water-rates," consequent on the favourable rainfall, and partly to the increased expenditure on repairs and revenue establishment. The extra cost of the latter is mainly due to the commission now paid to headmen, which, for the year under review, aggregated ₹4,781 against ₹425 in the previous year. The Sub-Deputy Collector is no longer employed, so that in this respect there will be a decrease in 1885-86; but the payment of commission was deliberately resolved on, and the extra cost of this measure must be accepted. The increased expenditure under the head "Repairs and Maintenance" was almost wholly due to the larger quantity of silt removed from the main canal.

46. The table below shows the cost of maintaining the canal and distributaries for each of the last five years :—

Year.	Main canal.			Distributaries.		
	Length of canal.	Total cost of works.	Rate per mile.	Length of distributary channels.	Total cost of works.	Rate per mile.
	Miles.	₹	₹	Miles.	₹	₹
1880-81	48	80,993	1,687	267	20,140	70
1881-82	48	1,03,910	2,164	277	11,854	42

1883-84	48	1,06,425	2,216	277	21,195	76
1884-85	48	1,15,171	2,399	277	18,865	68

47. The expenditure on distributaries shows a satisfactory decrease compared with last year's rate. It is still, however, in excess of what is found necessary elsewhere, and requires the careful attention of the responsible officers. It

is possible that the comparison is to some extent vitiated by the Narainghur navigable channel being classed as a distributary. This canal has a discharge of 240 cubic feet per second at its head and 5 locks, and is accordingly quite out of its proper classification when included among distributaries, in which class it might possibly fairly have remained before being remodelled and rendered navigable.

The dredging operations of the year have not been successful. The expenditure has increased from ₹47,351 in 1883-84 to ₹54,621 in 1884-85, whilst the quantity of silt excavated has diminished from 45 lakhs of cubic feet to 31 in the same period. The cause of the increased cost is stated to be that there was an extra dredger to keep up, that the steam had to be used more for towing purposes, and that the *Hector's* ropes and other gear had to be renewed. The unsatisfactory result of the year's work is apparently chiefly due to the dredgers frequently breaking down, the three chief dredgers *Hector*, *Ajax*, and *Atlas* being under repair for 567 days in the aggregate. The Superintending Engineer notes that the *Ajax* and *Atlas* worked under unfavourable conditions as regards depth of water, which affected their daily outturn. A special report on the matter is promised. Particulars regarding the cost and outturn of work for each particular dredger for the year and that previous will be found in the table below :—

Name of Dredger.	Number of days at work.		Quantity of work done				Cost of working dredgers during the year		Rate per 1,000 cubic feet.	
			Per day.		During the year.

Total	43.507	6,21,736	Total	43.507	6,21,736

Indirect charges amounting to ₹1,362 must be added to the expenditure shown above, reducing the profit to ₹4,259.

49. This canal is not used for irrigation; the revenue is entirely derived from navigation tolls and miscellaneous receipts. Compared with the previous year, there has been a falling off in the gross revenue of ₹20,083 due entirely to diminished receipts from tolls, the miscellaneous revenue being in excess of that received in 1883-84. There was also a decrease in the expenditure which amounted to ₹36,886 against ₹46,581 expended in the previous year. The net revenue, exclusive of indirect charges, was, as shown above, ₹6,621 against ₹17,009 in 1883-84.

50. The decreased receipt is thus explained by the Executive Engineer—

"I should have given as a reason for the falling off of the tolls on the Hidgellee Tidal Canal during 1884-85, not only that the second range was closed during February and March, but that in consequence of the canal having been silted more or less at the Kallynagore end for the whole year, the passage of heavy boats (by which rice can most economically be exported) was hindered. As far as I can ascertain, there was another reason, *viz.*, that the price of rice ruled lower in the Calcutta market than during the previous year and consequently the export trade fell off."

The canal was closed from the 26th January to the 15th May 1885.

51. The usual tables showing the traffic since 1875-76 follow :—

COMPARISON OF TRAFFIC.

Particulars.	1875-76.	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.

Miscellaneous	22,004	34,107	47,321	42,773	28,744	39,549	37,900	1,306	6,628	6,516

52. It will be noticed that there has been a decrease in every item of traffic, except fuel and building materials. The tonnage carried by each boat has also decreased owing to the depth of water in the canal not having been sufficient for heavily laden boats to pass through.

53. The expenditure on maintenance was ₹26,862, or ₹505 per mile, against ₹32,994 expended in the previous year. The decrease is wholly in the item silt clearing, which cost ₹12,718 against ₹23,706 debited against this head in 1883-84.

54. Until the long and frequent closures now necessary can be dispensed with, and a uniform depth of water maintained in the canal, material increase in its earnings cannot be expected. Silt is becoming yearly more and more a serious item in the cost of maintaining canals in Bengal, most especially so in those connected with tidal reaches. In the early years of the existence of this canal, the formidable difficulty and cost of silt clearing was not appreciated, and the canal was left so unprotected from the ordinary influx and efflux of the tides that the channel has been in some places almost entirely silted up. Extensive improvements are urgently required on this canal, for which an estimate, amounting to ₹10,39,571, is now ready, and will shortly be submitted for the orders of the Government of India.

55. The tables below show the receipts and working expenses of this canal for the last ten years :—

REVENUE RECEIPTS.

PROFIT	6,03,553		
TOTAL	12,07,514	TOTAL	12,07,514

58. The areas commanded and irrigable, and lengths of canal and distributaries open are shown in the table following :—

	Navigable canal.	Branch canal.	Distributaries.	Gross area under command.	Maximum discharge of canal.	AREA WHICH CAN BE IRRIGATED.		
						Kharif.	Rabi.	TOTAL.
	Miles.	Miles.	Miles.	Acres.	C. ft. per second.	Acres.	Acres.	Acres.
Eastern main and Patna canals	86¼	...	345	406,155	1,613	120,000	180,000	300,000
Western main and Buxar canals	58¼	77½	321¾	704,000	4,342	347,360	360,000	707,360
Arrah canal	74	71¼	469	618,354				
TOTAL	218½	148¾	1,135¾	1,728,509	5,955	476,360	540,000	1,016,360

During the year there was no addition to the lengths of canals, but 53¾ miles of distributaries were completed.

59. Of the area under command, 1,361,151 acres are, as nearly as can be ascertained, cultivated or culturable. The area which can be irrigated is obtained by assuming a duty of 80 acres per cubic foot per second of discharge for kharif, and 180 acres for rabi cultivation. The maximum discharge is allowed for the kharif season, and 3,000 cubic feet per second, which is the average quantity available for the rabi season. It was explained in last year's report that in dry years not more than 456,000 acres of kharif and 336,240 acres of rabi irrigation could be counted on.

60. The usual table showing the progress made with village channels follows :—

	Total length of village channels completed.	Area commanded.	Total number of outlets.	Number of permanent outlets.
	Miles.	Acres.	No.	No.
Eastern Sone Division	242	99,239	2,222	12
Arrah ,,	745	126,273	2,349	373
Buxar ,,	513	140,905	1,144	125
TOTAL, 1884-85	1,500	366,417	5,715	510
TOTAL, 1883-84	1,361	342,231	5,825	407

Of these channels 141 miles were carried out by Government officers under the provisions of Act III (B.C.) of 1876 and 39 miles were under construction on the 1st of April 1885. There has been, it will be seen, considerable progress made in providing permanent outlets, except in the Eastern Sone Division.

61. The water-rate assessments for the year and that preceding are shown below :—

Crop.	1883-84. Acres.	1884-85. Acres.	Increase. Acres.	Decrease. Acres.
Kharif	134,732	130,579	...	4,153
Rabi	99,304	66,630	...	32,674
Sugarcane	6,732	9,224	2,492	...
Hot-weather irrigation	8,524	959	...	7,565
Five-years' lease	101,322	149,185	47,863	...
TOTAL	350,614	356,577	50,355	44,392
INCREASE	...	5,963	...	...

62. Last year it was noticed that the area irrigated was in excess of any year to date, it is satisfactory to find that further progress has been made, notwithstanding a considerable falling off in the hot-weather irrigation due to the western main series of canals having been closed for silt-clearance during the months of April, May, and June. There has been a large increase in the area under five-year leases, which the Superintending Engineer remarks "are increasing in favour, especially in places where the land, whether altogether suitable or not, can be cultivated with kharif crops." These areas are divided in the statement below between kharif and rabi, in the proportions followed last year :—

	1883-84. Acres.	1884-85. Acres.
Kharif	215,790	249,927
Rabi	109,436	81,548
Sugarcane and hot-weather crops	25,388	25,102
TOTAL	350,614	356,577

63. The areas irrigated by divisions for the last five years is shown below :—

YEAR.	EASTERN SONE DIVISION.				ARRAH DIVISION.				BUXAR DIVISION.				TOTAL FOR ALL DIVISIONS.			
	Annual leases.		Five-year leases.	TOTAL.	Annual leases.		Five-year leases.	TOTAL.	Annual leases.		Five-year leases.	TOTAL.	Annual leases.		Five-year leases.	TOTAL.

64. The rainfall during the year was below the average, and as regards locality was very unequally distributed—a fact which will be apparent from the following table extracted from the Superintending Engineer's report, showing

the total fall at various stations for the months of August, September, and October :—

Arrah Division.	Inches.	Eastern Sone Division.	Inches.	Buxar Division.	Inches.
Arrah . . .	10·88	Bikrum . .	12·19	Buxar . . .	17·58
Ugeon . . .	14·60	Daoodnuggur .	14·79	Sasseram . .	26·11
Nasrigunge . .	17·05	Dinapore . .	18·38	Sikroul . .	17·93
Koath . . .	25·80			Jamrore . .	22·45
Ramnuggore . .	24·04			Basawan . .	20·72
Dehree . . .	20·70				

65. The usual statements showing the rainfall during the kharif and rabi seasons for the last five years follow :—

KHARIF SEASON.

Months.	Eastern Sone Division.					Arrah Division.					Buxar Division.				
	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.

66. The rainfall in October enabled the greater part of the rabi to be sown without irrigation, and a fall varying from 0·25 inches in the Eastern Sone to 0·65 inches in the Buxar Division in January prevented canal water becoming a necessity later in the season. There is always a strong indisposition to take water for rabi crops, unless the rainfall in October is scanty. In 1883-84, when there was considerable extension of rabi irrigation, the rainfall in October varied in the different divisions between 0·68 and 0·81 inches.

67. The statement below shows the various descriptions of crops irrigated :—

Name of crop.	Eastern Sone Division.		Arrah Division.		Buxar Division.		Total.	
	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.

Total .	54,800	72,995	163,938	170,535	131,876	113,047	350,614	356,577

Five-year leases . . { Rice . . 1883-84. 81,058 acres 1884-85. 1,19,348 ; Rabi . . 10,132 „ 14,918 ; Sugarcane . 10,132 „ 14,919 } approximately.

68. The total area leased was 287,445 acres, of which 145,094 were under five years and 142,351 under annual agreements. The area under annual lease as measured by the patrols amounted to 200,017 acres, and as measured by the ameens to 220,506 acres, some of which was subsequently included in five-year leases.

69. In the table following the areas leased and irrigated during the last five years are given :—

	Acres in 1880-81.		Acres in 1881-82.		Acres in 1882-83.		Acres in 1883-84.		Acres in 1884-85.	
	Irrigated.	Leased.	Irrigated.	Leased.	Irrigated.	Leased.	Irrigated.	Leased.	Irrigated.	Leased.

Total .	207,625	147,844	178,075	120,544	173,824	148,533	350,614	260,187	356,577	287,445

70. There is some improvement in the proportion of the area irrigated, for which leases had previously been granted, and the progress of the five-year lease system is noticeable.

71. The proportion of flow to lift irrigation was 93 to 7; in 1883-84 it was 90 to 10.

72. So far it has been assumed that the areas assessed correspond with those irrigated during the year. This, however, is not strictly correct, there being a considerable difference in the Arrah Division in the item rabi irrigation, and for the calculation of duty the area actually irrigated has been taken, though in the statistical tables prescribed by the Government of India, which follow, it has been calculated on the area assessed to correspond with the other forms. The additional area of irrigation taken into account is 14,074 acres.

73. In the kharif season the quantity of water available is limited. From the Western Main series of canals, at any rate, the area under irrigation is in dry years like 1883-84 dependent on the discharging power of the canal, and there is no impropriety in calculating the duty on the actual quantity of water entering the canal. In the rabi season the case is different, the quantity of water available is far in excess of the demand, and the discharge is more dependent on the requirements for navigation and miscellaneous purposes than on the quantity of water required for the crops, the duty calculated on the discharge utilized is therefore of most value as indicating the irrigating power of the canal in that season. Calculated as indicated, the duty given by the Superintending Engineer, paragraph 16 of his report, is as follows :—

	Kharif area in acres.	Rabi area in acres.	Average discharge entering canals, kharif season	Average discharge utilised, rabi season.	Kharif season duty. Cubic feet per acre.	Rabi season duty. Cubic feet per acre.
Eastern Main series of canals . . .	59,336	12,717	1,312·38	351·71	45·21	36·15
Western Main series of canals . . .	204,445	102,080	2,808	740	72·8	137·94

74. The Superintending Engineer makes the following remarks on the very low duty obtained from the Eastern Main canal—

"The duty obtained from the Western Main series of canals is much higher than that so far secured from the Eastern Main series. This is partly due to the very long distributaries which are the rule in Patna and Gya, which not only legitimately consume more water than is required with the shorter distributaries general in Shahabad, but also afford more opportunities for unauthorized irrigation. The matter, however, requires very close attention. The difference of situation by no means explains the wide variation in results, and it does not appear that assessments in the Arrah and Buxar divisions are imposed under less stringent conditions than are exacted in the Eastern Sone division. So far as can be judged from the remission statements received by the Superintending Engineer, a contrary tendency is observable, water-rates having in some cases been assessed in the Eastern Sone Division on evidence which should not have been accepted as a sufficient warrant."

75. It is obviously necessary to localize the waste; when this is done the remedial measures necessary can be determined on. The Superintending

Engineer will be directed to have such observation taken during the current year as will admit of the matter being thoroughly investigated.

76. The total demand for the year, including the balance due on the 1st of April, amounted to ₹15,39,192, of this sum ₹7,70,359 were collected and ₹73,625 remitted, leaving ₹6,95,208 outstanding at the close of the year. Of the remissions ₹65,571 were the amount remitted by the Executive Engineers on account of incorrect assessments and ₹8,054, that written off by civil officers, as being irrecoverable. Of the remissions made by the Executive Engineers, ₹44,237 were on account of the assessments of 1883-84; in last year's report it was explained that owing to a breach in the main canal and the character of the season, the Lieutenant-Governor had sanctioned extensive remissions on grounds not provided for in the rules. Assessments withdrawn from any cause, for instance, demand statements on annual permits superseded by five-year leases, are at present shown as remissions. The accounts will, from the commencement of the year 1886-87, be modified to show such cases which are not in reality remissions, as a reduction of the original assessment. The Superintending Engineer states that the actual amount remitted on account "of want of proof of irrigation, or to the person charged not being legally liable" was ₹5,134.

77. The following extract from the Superintending Engineer's report is deserving of attention:—

"The provisions of the law, sections 79 and 80 of Act III (B.C.) of 1876, are exceedingly stringent, and it is only in particular cases that persons who benefit by the unauthorized use of canal water can be made to pay for it. *Aharas* are very numerous in the district, and constant endeavours to fill them with canal water and to irrigate therefrom are made, in which case it is generally impossible to levy water-rates on the land benefited, and practically very often no return for the water thus utilized can be recovered. At certain periods it is necessary for cultivators to dry (*neegar*) their lands, and the water drained off is utilized by their neighbours whose crops are more backward. There does not appear to be any practicable remedy for this, except to refuse leases as far as possible where lands not leased must benefit in the way described."

Permits should certainly be refused in cases where land beyond the leased area will certainly or probably be irrigated without incurring liability for water-rates.

78. The following table shews the demand, collections, and balances for the last five years:—

Year.	Demand.			Remission	Net demand.	Collection.	Balance.	Percentage of collection to current demand.
	Arrears.	Current.	Total.					
	₹	₹	₹	₹	₹	₹	₹	₹
1880-81	3,18,378	5,34,874	8,53,252	10,725	8,42,527	3,78,266	4,64,261	70·7
1881-82	4,64,261	6,29,739	10,94,000	53,221	10,40,779	6,03,930	4,36,849	95·9
1882-83	4,36,849	4,62,301	8,99,150	21,020	8,78,130	5,66,465	3,11,665	122·5
1883-84	3,11,665	7,42,311	10,53,976	1,45,974	9,08,002	4,84,209	4,23,793	65·2
1884-85	4,23,793	11,15,399	15,39,192	73,625	14,65,567	7,70,359	6,95,208	62·33

79. The increase in the arrear balance from ₹4,23,793 to ₹6,95,208 requires serious consideration. The actual collections, ₹7,70,359, are more than 25 per cent. in excess of any year to date, so that at least in actual receipts there is an improvement. Of the balance ₹4,77,522 is on account of the current year's assessments, and ₹2,17,686 on account of previous years' demands.

80. The current year's assessments include the greater part of the rabi demands, which, though due on the 15th of March, are not legally recoverable until after the close of the year, even the kharif demands, which form the greater part of the revenue, are not payable until the 31st of January, so that a considerable arrear balance in respect to the current year's assessments is inevitable.

The arrears with regard to former years' demands have, however, increased from ₹1,37,928 on the 1st of April 1884 to ₹2,17,685 on the 1st of April 1885. Of this increase no satisfactory explanation is forthcoming; the khationees (demand statements) are said by the Collector to have been imperfect, and the numerous remission and alteration statements to have caused the rate-payers

generally to withhold payment in hopes of a remission. Rules have been prescribed, which it is expected will lead to objections being preferred and disposed of at an earlier date, but so long as changes in the occupation of land continue alteration statements are inevitable. The remissions were ₹72,349 below those granted in 1883-84, the increase in the arrear balance being ₹79,857, so that it is not improbable that the large remissions granted in 1883-84 indisposed the cultivators to pay in 1884-85. The increase in the arrear balances has been separately reported on to the Government of India, but it is quite clear that no heroic remedies are practicable; improved administration will do something, and no effort to secure this has been wanting, but at least 50,000 cultivators have to be dealt with, and it is quite certain that a portion of the assessments will always be found to be irrecoverable. It is not desirable to fix any absolute percentage, as that which, it may fairly be expected, will have to be written off, but it is necessary to keep in mind the difference between receipts from water-rates assessed yearly on a fluctuating population on crops, the yield of which is only under exceptional circumstances taken into account, and those from land revenue permanently fixed at a fraction of its present letting value.

The balance for the years 1878-79 to 1882-83 inclusive has been reduced to ₹84,157, and it is thought that, considering all things, this sum, on assessments amounting to ₹27,02,935, is not an excessive loss.

81. The expenditure on the revenue establishments employed is shown below:—

	1883-84.		1884-85.	
	Amount.	Percentage on collections.	Amount.	Percentage on collections.
	₹		₹	
Permanent and temporary establishments, such as zilladars, ameens, &c.	42,105	8·69	63,064	8·19
Establishment employed under Collectors	41,724	8·62	25,007	3·24
Headmen's fees	30,176	6·23	41,237	5·35
Total	1,14,005	23·54	1,29,308	16·78

82. The increased cost of collection is a consequence of the increased receipts, the percentage on which 16·78 against 23·54 last year exhibits a marked improvement. On the area assessed the cost of establishment was $\frac{114,005}{350,614}$=annas 5·2 per acre in 1883-84, and $\frac{129,308}{356,577}$=annas 6·0 per acre in 1884-85.

83. In former reports some information as to the cost of measuring the crops and preparing the demand statements has been given, the figures in these statements have necessarily been approximations, as the permanent establishment is also employed on investigating complaints and preparing alteration statements for existing five-year leases. The following table exhibits the charges for the current year, 101,622 acres under five-year lease on the 1st of April 1884 being excluded from the areas assessed:—

Name of Division.	Area measured and assessed.	Cost of measuring crops.		Cost of preparing demand statement.	
		Total.	Per acre.	Total.	Per acre.
	Acres.	₹	₹ a. p.	₹	₹ a. p.
Eastern Sone	54,375	960	0 0 3·3	1,320	0 0 4·6
Arrah	114,163	3,804	0 0 6·3	8,327	0 1 2
Buxar	8,6717	3,098	0 0 6·7	1,324	0 0 2·9

84. Considerable trouble is still experienced in obtaining the attendance of putwaries at measurements, and there has been no improvement in this respect during the past year. In a few cases where great inconvenience was caused, and the putwaris were legally bound to attend, they have been prosecuted and punished. In the Nasrigunge and Ramnagar sub-divisions 94·7 and 91·7 of the

measurement papers were signed by the putwaris, results partly apparently due to the good management of the sub-divisional officers and zilladars, an example which might with advantage be followed elsewhere.

85. There has been no diminution in the number of complaints; 9,592 remission, and 259 miscellaneous applications were disposed of during the year. The revised rules alluded to in last year's report were formally sanctioned by the Lieutenant-Governor on the 27th April 1885, and they have so far had a good effect in hastening the presentation of objections to the assessment.

86. The number of crop experiments was small; in some sub-divisions this duty has not been sufficiently attended to, the average of 184 observations on the yield of rice crops gives 2·36 maunds of grain and 8·23 maunds of straw as the increased yield due to canal irrigation.

87. The receipts of the year under the head "Navigation" amounted to ₹51,761 against ₹85,193, so credited in 1883-84. Of the falling off ₹22,735 were in the item transport service receipts, and ₹10,697 in the item tollage on boats. The decrease in the transport service receipts is owing to Government having ceased to work the service, and is balanced by a corresponding decrease of ₹20,277 in the working expenses. The decrease in tolls on boats is due to the Western Main Canal having been closed for three months for silt clearance. In 1882-83 a similar closure occurred, and the tollage receipts amounted to ₹39,304 against ₹37,335 in 1884-85.

88. The tables below show the navigation revenue, and tollage assessments for the last five years:—

Navigation receipts.

Year.	Eastern Main Series.			Western Main Series.			Total.	Total tollage only.
	Number of miles open.	Tollage receipts.	Transport service receipts.	Number of miles open.	Tollage receipts.	Transport service receipts.

90. The expenditure on navigation establishment, including the cost of working the locks and collecting tolls, was ₹13,595 against ₹13,654 expended in 1883-84.

91. It has already been stated that Government has now withdrawn entirely from direct connection with steam transport service. The following extract from the Superintending Engineer's report shows the arrangement at present in force:—

"The steam transport service in the Eastern Sone division, the Eastern Main, and Patna canals has been leased out to a contractor since the 21st of January 1884, and the steamers in the remaining canals were made over to him on the 20th October 1884. There are four steamers, *viz.*, the *Banas* and *Koel* with stern paddle-wheels, and the *Buxar* and *Umpire* with side paddles. One of the stern-wheel steamers is kept in reserve; the other plies on the Arrah canal, the *Umpire* on the Patna canal, and the *Buxar* on the Buxar canal. There is a bi-weekly service between Arrah and Dehri, and Buxar and Sasseram, and a weekly service between Dinapore and Baroon. The deck fares are 3 pies per mile. The amount payable by the contractor is ₹10,000 per annum, or ₹833⅓ per month; which is credited as follows: Hire of steamers ₹333⅓; tollage, Patna canal, ₹150; tollage, Buxar canal, ₹150; tollage, Arrah canal, ₹200. The actual receipts during the year according to the Examiner's figures were ₹14,426 against ₹37,161 received in 1883-84. The working expenses in 1884-85 amounted to ₹12,198 against ₹32,475 expended in the year previous. These figures include receipts and expenditure on cargo boats. The detailed tables regarding the working of the steamers are omitted, as they would only cover a portion of the year, during a great part of which the Western Main series of canals was closed. The contractor maintains the crews of the vessels at his own expense, and pays for all repairs not caused by fair wear and tear. The arrangement has so far been satisfactory. No complaints of the public being inconvenienced by the change have been received, and the time formerly given by the Executive Engineers to managing the traffic can with more effect be bestowed on the other important duties with which they are charged. Financially, the change does not cause Government any loss."

There are four cargo boats belonging to Government, three of which were hired to contractors during the year; they pay a reduced rate of toll, and apparently exert an unfavourable influence on private traffic. It is intended to dispose of them as opportunity offers.

92. The miscellaneous receipts during the year amounted to ₹40,354 against ₹34,405 in 1883-84. The increase is almost wholly in the item "miscellaneous," and is chiefly due to larger receipts on account of costs of process.

93. The financial results of the Sone canal system for the last four years are shown in the statement following, which gives the receipts and working expenses for the last four years :—

	1881-82.	1882-83.	1883-84.	1884-85.
	₹	₹	₹	₹
RECEIPTS—				
Water-rates	6,03,930	5,66,465	4,84,209	7,70,359
Navigation receipts	93,116	71,205	85,193	51,761
Miscellaneous	39,246	47,007	34,405	40,354
TOTAL	7,36,292	6,84,677	6,03,807	8,62,474
WORKING EXPENSES—				
Maintenance	3,28,032	4,02,841	3,74,795	4,50,313
Irrigation establishment	1,14,283	1,05,883	1,14,005	1,29,308
Navigation ditto	13,678	19,880	20,248	16,885
Refunds	1,329	1,237	5,429	7,455
	4,57,322	5,29,841	5,14,477	6,03,961
NET PROFIT EXCLUSIVE OF INDIRECT CHARGES	2,78,970	1,54,836	89,330	2,58,513

There has, it will be seen, been a very considerable increase in the net revenue, notwithstanding the much greater expenditure on maintenance. The cause of this satisfactory result is the large increase in the irrigated area which occurred in 1883-84, and as a considerable proportion of it is under five-year leases, it is hoped that retrogression will not occur. In 1885-86 a slight further improvement is expected.

94. The expenditure per mile incurred on repairs to the canals and distributaries for the last three years is given in the statement following :—

NAME OF CANAL.	Name of Division.	1882-83.		1883-84.		1884-85.	
		Number of miles.	Cost per mile.	Number of miles.	Cost per mile.	Number of miles.	Cost per mile.
		No.	₹	No.	₹	No.	₹
Eastern Main	Eastern Sone	7¼	2,655·0	7¼	4,367·3	7¼	2,845
Western Main	Arrah	9	9,968·0	9	3,841·8	9	10,091

	Eastern Sone	311	43·4	311	48·1	345	48

95. The increased cost of maintenance during the year was chiefly due to the silt-clearance of the Western Main canal, on which ₹ 83,677 were expended against ₹32,651 in the previous year. This with the percentage charge for establishment accounts for ₹62,700 out of the excess expenditure of ₹75,518, and of the remainder ₹11,074 were due to special repairs to the Sone weir, consequent on the injuries sustained by that work in the flood of the 7th July 1876, when three piers were entirely destroyed and twelve injured. The Eastern Main series of canals was not closed during the year, and the quantity of silt excavated was 3,564,795 cubic feet, at a cost of ₹17,414, the average rate being ₹4-12 per 1,000 cubic feet. The Western Main series of canals was closed during the months of April, May, and June, when 12,490,428 cubic feet of silt were excavated by hand; during the rest of the year 5,725,707 cubic feet were dredged, the average rates being ₹4·71 and ₹5·67 per 1,000 cubic feet respectively. The total quantity of silt removed from the Western Main and Arrah canals was 18,216,135 cubic feet, and the expenditure thereon ₹91,365, the average cost per ₹1,000 cubic feet being ₹5·01.

96. The expenditure on weed clearing continues to diminish, as will be seen from the following table extracted from the Superintending Engineer's report :—

	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.

GRAND TOTAL	25,593	1,30,406	GRAND TOTAL	25,593	1,30,406

The excess of working expenses over receipts was ₹16,252 as shown above against ₹1,025 in 1883-84. No report regarding these canals has been received from the Commissioner, but the Superintending Engineer states that owing to the year 1884-85 having, as regards the manufacture of indigo, been unprofitable, the guarantee which at present amounts to ₹21,750 was for the most part not paid within the year. There is a considerable balance to the credit of the Maharajah of Hutwa, and only a nominal balance against the Ramcola concern, with these exceptions from one to nearly three years guarantee is due from the guarantors. In some instances remissions could, under the rules, be claimed: these cases have been disposed of, and during the current year progress in reducing the arrears balance has been made. The price of indigo in 1884-85 was abnormally low, and there appears to have been real difficulty in realizing the assessments. This year the market has taken a favourable turn, and there should be no hardship in realizing the current revenue as well as the arrears.

98. The rainfall during the year is shown in the table below:—

Month.	Moniarah.	Gopalgunj.	Hatwah.	Sadowa.	Jogapur.	Burhogah.	Rajaputty.	Arrowah.	Sitalpur.

99. The Superintending Engineer remarks that, generally speaking, the rainfall in July and August was good, and the *hatia* in October, when rain is of primary importance, very general.

100. Owing to the favourable rainfall the area irrigated during the year was 7,223 acres against 21,122 in 1883-84. The operations of the year are thus described by the Executive Engineer—

"The area irrigated is one-third of last year, as few rice lands were irrigated.

"The factories to the south of the district irrigated their indigo lands, as the *hatia* rainfall was deficient during February and March of 1884-85. The irrigation done in Sadowa was effected in April 1884.

"The river was abnormally low during the year. It was owing to this cause that it was an impossibility to supply water in the Gandaki during part of the year. Without a regulator across the Rupon Chap sota below the head sluice of this canal it will be impossible to supply water if the river be low. On the 24th of March the call for water for irrigation of indigo lands became so loud that a bund was threwn across the sota and the full supply sent down the canal for ten days. The supply to the canals below was, however, entirely cut off and some discontent was caused in consequence. The regulator across the sota is a necessity, and one should be put in, not only to supply water in the Gandaki when the river is low, but also for irrigation in the other canals in September and October, when the discharge in the sota is too great to admit of a bund being constructed, but yet the water level is too low for it to get into the canals.

"The working of the head cut and canals was as follow:—

"The head cut was kept open until the 20th June, when the feeder to the sluice was closed by a bund at its mouth. The river rose early in June, and the sota began to discharge on the 13th, the gauge at Sissua reaching 233·05. The head cut was kept closed until November, when the bund was removed, and it was worked for twelve days, and again closed for the removal of silt and weeds, which had largely accumulated in the first two miles. It was finally opened on the 14th December, and was continuously worked up to the end of March 1885. The Rupon Chap sota was bunded on the 20th December, and a full supply let down the Gangri and Dhanai canals as required. The Daha can always be supplied."

101. The primary object of these canals was the supply of water for the manufacture of indigo, and this end has been fully attained. There is a guarantee amounting to ₹21,750, which, however, is dependent on water being supplied in *all* months of the year, which, in the case of some of the canalized rivers, is quite impracticable. The present agreement will expire in October 1889, and a full report on the working of these canals has just been received and is now under consideration. In any future arrangements it will be necessary to secure at least a guarantee which will fully cover the working expenses. It is not likely that it will be possible to obtain any interest on the capital expenditure ₹6,65,609, which was provided from provincial funds.

CALCUTTA AND EASTERN CANALS.

102. The canals continued during the year to be controlled by the Board of Revenue, Lower Provinces, and are separately reported on. A resolution by the Lieutenant-Governor, dated 28th September 1885, reviewing their administration for 1884-85 was published in the supplement to the *Calcutta Gazette* of the 28th October 1885.

103. An abstract of the capital and revenue accounts is given below:—

	₹
Capital Cost—	
Direct charges	52,01,641
Indirect charges	58,906
Grand Total	52,60,547
Receipts up to the 1st April 1885	1,81,32,213
Working expenses—	
Direct charges	66,49,145
Indirect charges	1,47,029
	67,96,174
*Charges for interest	67,69,753
	1,35,65,927
Balance net Revenue	[illegible]

104. The revenue accounts for the last two years are given below:—

Years.	Receipts.	Working expenses, direct and indirect.	Interest charges.	Net revenue.
	₹	₹	₹	₹
1883-84	5,64,101	2,32,031	2,04,652	1,27,418
1884-85	5,69,726	2,91,214	2,07,882	70,630

105. The receipts from tolls on boats during the year were ₹5,08,54[illegible] against ₹5,24,752 realized in that preceding: the increased revenue shown above is due to a payment of ₹35,185 made by the Calcutta Municipality on account of land acquired by the Corporation in connection with the new drainage works. The increased charges are mainly owing to ₹78,575 having been expended on original works chargeable to revenue, against ₹27,897 so debited in 1883-84.

106. The following table gives some particulars regarding the traffic for 1883-84 and 1884-85:—

Year.	Number of boats.	Weight of cargo.	Value of cargo.	Tonnage of boats.	Tollage.
	No.	Mds.	₹	Tons.	₹
1883-84	181,301	2,87,77,043	7,01,99,912	24,11,423	5,24,752
1884-85	162,347	3,17,73,576	6,40,60,329	24,85,322	5,08,466

* Interest is calculated *pro formâ*. The canals having been constructed from provincial funds, no interest is charged.

The Supervisor of the canals attributes the diminished receipts to the generel depression in trade, a reduced demand for firewood, and a partial failure of the rice crop.

107. Estimates for providing Tolly's Nullah with locks have been submitted to the Government of India in connection with the docks proposed to be built at Kidderpore; it is not, however, expected that any material increase to the revenue will accrue from these works. Further development of traffic depends on the improvement of the Bhangore khall, which lies on the main line of traffic, and in which boats are sometimes kept for upwards of a week waiting for a high tide.

NUDDEA RIVERS AND EDEN CANAL.

108. Capital and revenue accounts are not kept for these works. During the year ₹97,335 were expended on works at the heads of the Bhagirutteel Mathabangha and Jellinghee rivers, which it is sought to keep navigable throughout the year. The tolls collected, inclusive of miscellaneous receipts, amounted to ₹1,95,457.

109. The primary object of the Eden Canal, on which the expenditure to the close of the year on original works has amounted to ₹6,22,633, was to supply water for domestic purposes. There being, however, a scanty rainfall, water was, at the urgent request of the civil officers, given free of charge, the cultivators making their own arrangements entirely for its distribution after issue from the canal bank. From a careful report made by the Executive Engineer on such enquiries as he could institute, no detailed measuremants being possible as to the area irrigated, it appears to be a safe conclusion that fully 3½ lakhs of rupees worth of crops were saved to the proprietors and cultivators in some proportion or other. The following extract from the Land Revenue Report on the subject is reproduced here :—

"In the Burdwan District it appears that no action was taken during the year for extending irrigation from the Eden Canal at the expense of the proprietors to be benefited by the work. The utility of the canal has, however, been generally appreciated by the people and the Collector says that it has given about 60,000 acres of abundant crops in thanas Satgachia and Salimabad."

The Collector remarks—

"'The number of regulators and sluices now existing is not, however, sufficient for the thorough utilization of the quantity of water available, and many applications were received, praying for the insertion of pipes in the canal banks and construction of sluices, which were refused, as the Irrigation Department would not allow them.'"

110. The effect of the increased supply of water brought into the cana was to cause a greater deposit of silt, and to increase the cost of maintenance, on which, excluding establishment, ₹15,821 were expended. In anticipation of a similar demand for water being made again, the Commissioner of Burdwan was asked in March last to consider whether the increased burden thus thrown on Government could not be recovered from the persons benefited. No action in the matter was, however, taken by the civil officers concerned, though attention was called to it more than once; and during the rains of 1885 a precisely similar application, involving the expenditure of public funds for the benefit of the persons interested in the land in the vicinity of the canal, was preferred. Under the urgency of the request, although the rainfall was on the whole favourable both as to amounts and distribution through the district, it was considered impossible to refuse, and 15,000 acres have again been irrigated, for which no charge is possible, and which will, owing to the extra silt brought into the canal, entail a further burden on the general revenues of the province.

If this canal is to take its place as an "irrigation" work, it is clearly necessary that proper rules should be drawn up, and arrangements made for securing some reasonable return to Government, and the consideration of this matter is still being pressed on the local civil officers, with a view to the submission to Government of some workable scheme.

GENERAL REMARKS.

111. The net income received during the year from the canals in Bengal which have been constructed by Imperial Funds, viz., those classed as productive public works, amounted to ₹1,27,763, against a budget estimate of ₹1,26,000. The actual receipts and working expenses (direct charges) amounted respectively to ₹13,07,521 and ₹11,79,758, against the budget estimate of ₹12,50,000 and ₹11,24,000.

112. The following statement shews the financial results calculated by earnings compared with the previous year.

	1884-85. ₹	1883-84. ₹

115. The revenue reports of the various projects were received on the dates mentioned below :—

Orissa circle	Commissioner's report	21st September 1885.
	Superintending Engineer's report	14th October ,,
South-Western Circle	Commissioner's report	25th August ,,
	Superintending Engineer's report	4th December ,,
Sone Circle	Commissioner's report	17th August ,,
	Superintending Engineer's report, Sone canals	7th September ,,
	Ditto ditto, Sarun canals	11th ,, ,,

The reports are due on the 1st of September. In no case has the Superintending Engineer's report been written by the officer who held charge of the circle during the year; but, making all possible allowances for the extra time required by officers not familiar with the canals described for preparing the report, it is clear that there has been great and preventible delay. The Superintending Engineers' reports cannot be completed until the Examiner's finance and administrative accounts for the year are received, and in recognizing this fact by fixing the date on which they are due for the future at the 15th of September, it is expected that complete punctuality will be observed. Delay such as has occurred this year takes away all interest from the report, and indicates a want of proper attention to the orders of Government.

The statistical tables prescribed in India Government Resolution, No. 1661, of date the 11th July 1885, are necessarily imperfect, information being required on points, especially in the forms regarding navigation, regarding which no accounts have hitherto been kept in this province. It is doubtful whether the orders referred to can be fully complied with, even in the report for 1885-86, as they involve a complete recasting of the accounts and returns at present kept.

116. I regret to have to record the death, on the 31st of March last, of Mr. F. M. S. Douglas, late Executive Engineer, Arrah Division, an officer whose tact and ability had led to his being placed in charge, whilst comparatively young, of the largest irrigating division in Bengal.

J. M. McNEILE, *Col.*, R.E.,
Chief Engineer.

The 28th January 1886.

PUBLIC WORKS DEPARTMENT, BENGAL.

STATEMENT SHOWING THE FINANCIAL RESULTS OF IRRIGATION WORKS IN BENGAL FOR THE YEAR ENDED 1884-85, BASED ON ACTUAL RECEIPTS.

Principal Results of Operations for the year ended 31st March 1885.

Irrigation Works.	Direct and indirect capital outlay to end of 1884-85.	Gross receipts, direct and indirect, from all sources.	Working expenses direct and indirect.	Net revenue (excluding charges for interest).	Interest (at 4 per cent. on direct capital outlay at commencement of year, and at 2 per cent. on outlay during year).	Surplus Revenue after paying Interest on Direct Capital Outlay.		Excess Charge, including Interest on Direct Capital Outlay.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch.)

D. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 24th MARCH 1886.

GENERAL REMARKS.—Rain has fallen generally in the north-western portion of the Punjab, and in Assam, and there has been slight rain in parts of the North-Western Provinces and Oudh, the Central Provinces, Madras and Mysore. Elsewhere no rain has fallen.

In Madras and Mysore the standing crops are generally in good condition and prospects are fair. In Coorg the season promises well.

The *rabi* harvest is being reaped and threshed in most parts of the Bombay Presidency, Berar, Hyderabad, Central India, and Rajputana, and prospects are generally favourable.

In the Central Provinces prospects remain unchanged. Some injury has been caused to the *rabi* crops in the North-Western Provinces and Oudh by hail. The prospects of the current harvest are good in the Punjab.

Rain is much wanted in many places in Bengal for the cultivation of *aus* rice. The *rabi* harvest promises a generally good outturn and the yield from opium is expected to be fair. In Assam rain is wanted for *aus* cultivation.

Seasonable weather prevails in British Burma.

The public health is generally good.

Prices are easier in the North-Western Provinces and Oudh, are rising in places in the Punjab and in the Malnad District in Mysore and are falling in Mysore and in Coorg. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(March 24th)		
Bellary	*Nil*	Standing crops generally good, but white *cholum* suffering from disease in parts of two taluks. Harvest *cholum*, cotton, and sugar-cane, yield about average. Cattle-disease in one taluk.
Kurnool	*Nil*	Cotton and some standing dry crops slightly injured in parts by December rains and by insects. Harvest cotton and pulses yield, cotton below average, rest poor. Smallpox in three and cattle-disease in two taluks.
Ganjam	·05	Slight fever in two, smallpox in five, and cattle-disease in three taluks. 6,623 labourers employed on Chilka canal, or average 945 daily.
Kistna	·10	Standing crops generally good. Slight fever and smallpox; deaths from cholera unreported last week 30, this week 16.
Chingleput (Madras)	*Nil*	Standing crops fair except in parts under breached tanks of 1884 in one taluk where they are withering. Harvest paddy, yield below average. Smallpox in two and cattle-disease in two taluks.
Coimbatore	*Nil*	Standing crops good. Harvest wet and dry grains, outturn about average. Fever in two and smallpox in three taluks; cattle-disease in one village.
Tanjore	*Nil*	Standing crops generally good. Harvest wet and dry grains, outturn below average.
Madura	Average last week ·26	Harvest paddy, yield about average. Fever in one taluk and cattle-disease in one division.
Malabar	*Nil*	Third crop cultivation progressing. Slight smallpox in eight taluks; fever in one and cattle-disease in another; eight deaths from cholera.
Travancore	*Nil*	Smallpox and fever in parts.
		General Remarks.—General prospects fair.
Bombay—(Mar. 24th)		
Hyderabad	*Nil*	*Rabi* crops injured by frost in five talukas. River at Kotri on 22nd 5 feet 8 inches against 5 feet 6 inches on same date last year. Fever in four, pleurisy in one, smallpox in one, and cattle-disease in three talukas. Wheat 24 lbs. 10 oz., *bajri* 38, *jowari* 40, white rice 18 and red rice 30 lbs. per rupee.
Ahmedabad	*Nil*	Reaping of *rabi* crops continues. Public health good. Wheat 37 and *bajri* 32 lbs. per rupee.
Baroda	*Nil*	Public health generally good; measles and smallpox in Naosari; smallpox in mild form in Baroda city. Standing crops in good condition. *Bajri* 29, wheat 23, and rice 16 lbs. per rupee.
Surat	*Nil*	Wheat harvest nearly completed; cotton-picking progressing. Fever in Bardoli and Mandvi talukas. *Jouari* 39 and *nagli* 44 lbs. per rupee.
Nasik	*Nil*	*Rabi* reaping almost completed and threshing in progress. Public health good. Wheat 34½, *bajri* 34¼ and rice 20¾ lbs. per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature fell from 2° warm on 17th to 1° cool on 19th, was *nil* till 22nd and fell to 1° cool on 23rd. Vapour in air excessive on 17th and 18th, afterwards normal. Abnormal wind northerly on 18th and 19th, southerly on 22nd; normal on all other days.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Poona	*Nil*	Reaping and threshing in progress. Smallpox in Sirur taluka. *Bajri* 35 and *jowari* 44; in Poona *bajri* 34 and *jowari* 37 lbs. per rupee.
Ahmednagar	*Nil*	Reaping continues. Public health good. *Bajri* average 45 and *jowari* 61 lbs. per rupee.
Sholapur	*Nil*	Land in the Malsiras taluka being prepared for *kharif* sowing. Reaping of *rabi* almost completed in some talukas and in progress in others. *Jowari* 59 lbs. 28 tolas and *bajri* 45 lbs. 28 tolas per rupee.
Dharwar	*Nil*	Harvesting of wheat and gram nearly completed; reaping of late *jowari* and cotton-picking in progress. Slight fever in one and cattle-disease in two talukas. Scarcity of drinking water in Kod taluka. Rice 22 to 32 and *jowari* 45 to 64 lbs. per rupee.
Kanara	*Nil*	Second crop rice harvest on coast; pepper and sugarcane harvest above Ghat. Slight fever and smallpox throughout district; cattle-disease subsiding. Common rice in Karwar 14, in district average 13¾ seers per rupee.
Rajkot	*Nil*	Weather warm. General health good. *Bajri* 30, wheat 32, and *jowari* 43 lbs. per rupee.
		General Remarks.—Rain in parts of Shikarpur. Fever and cattle-disease in parts of ten, and smallpox in parts of eight districts; other conditions generally as reported last week.
Bengal—(Mar. 23rd)		
Chittagong	*Nil*	Weather hot and occasionally cloudy. Rain much wanted for winter crop. Prices steady. General health good.
Dacca	*Nil*	Winter crops being harvested. Prospects of *boro* paddy good. Cultivation for next paddy crops going on. Rain much wanted. Public health generally good.
24-Pergunnahs	*Nil*	Harvesting of cereals still going on, yield estimated between 12 and 14 annas. Common rice 15 to 18 seers per rupee. Public health generally good.
Khoolna	0·15	Weather hot. *Boro* rice promises well. *Til* being sown. In Satkhira rain wanted for ploughing. Public health good.
Moorshedabad	*Nil*	Weather seasonable. Harvesting of *rabi* crops almost over, outturn fairly good. Common rice 17 to 19 seers per rupee. Public health good.
Pubna	0·74	Storm and rain on 21st, useful for ploughing. Reaping of winter crops still going on.
Dinagepore	*Nil*	Weather hotter and drier. *Rabi* harvest progressing. No change in price of rice. A few cases of smallpox reported.
Rungpore	*Nil*	*Aus* being sown. Prospects of *cheena* and *kaon* fair. Public health good.
Midnapore	*Nil*	*Boro* rice promises well. Cholera abating.
Burdwan	*Nil*	Harvesting of *rabi* crops going on, outturn generally good. Common rice 17 to 22 seers per rupee. Public health fair.
Bhagulpore	*Nil*	*Rabi* harvest in progress; good outturn expected especially on *dearah* lands. Rice 17 seers 10 chittacks per rupee. Public health good.
Monghyr		About 15 annas of opium crop gathered.
Purneah	*Nil*	Prospects of crops good. Coarse rice 20 seers per rupee. Public health fair.
Durbhanga	*Nil*	Harvesting of *rabi* crops continues, good outturn expected. Opium being gathered. Prices remain almost stationary. Public health good.
Mozufferpore		Gathering of opium in progress. Prospects continue favourable.
Sarun		Prospects of poppy excellent. Gathering of opium almost completed. Weighing of leaves commenced. Weather favourable.
Chumparun	*Nil*	Prospects of *rabi* and poppy crops continue good. Prices stationary. Public health fair.
Patna	*Nil*	Harvesting of *rabi* crops going on. Opium being collected. Gathering of castor continues. Public health good.
Gya	*Nil*	Harvesting of *rabi* continues with good outturn. Prices unchanged. Public health fair.
Shahabad		Weather favourable to poppy. More than 14 annas of produce gathered of good quality and consistence.
Hazaribagh	*Nil*	Weather seasonable. *Rabi* being harvested with good outturn; poppy still being lanced. Prospects of mango and *mohua* generally good. General health good.
Cuttack	*Nil*	Weather cloudy at times. *Dalua* and other spring crops doing well. Ploughing in progress. Price of rice unchanged. Public health generally good.
		General Remarks.—Slight rain fell in Khoolna and Pubna, but none in the other reporting districts. Rain is much wanted in many places for the cultivation of *aus* rice. *Boro* rice promises well. *Rabi* harvest is proceeding with a generally good outturn. Collection of opium is going on, the general yield is expected to be fair. *Mahua* is being gathered in Chota Nagpore and the Sonthal Parganas. Prices of rice remain unchanged in almost all districts. Public health continues generally fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces & Oudh—(Mar. 24th)		
Benares (Mar. 23rd)	*Nil*	Weather seasonable but heat steadily increasing. Harvest work going on. Last week's rain which was accompanied by a little hail and strong winds has injured the mango blossoms to some extent. Supplies ample and prices easier. General health good. No cattle-disease.
Gorakhpore („ 22nd)	*Nil*	Harvest in progress. Opium prospects good. Mango blossoms half destroyed. Weather slightly cloudy. Prices stationary. Health fair.
Fyzabad („ 23rd)	*Nil*	Weather favourable. Harvesting in progress. Good outturn of *rabi* and opium expected. Health of men and cattle good.
Lucknow („ 22nd)	*Nil*	Weather getting warm. Harvesting of *rabi* in progress. Opium extracting being done, outturn said to be good. New grain coming into the market. Prices falling. Health of people good. Cattle in fair condition.
Rae Barelli („ „)	Slight fall on the nights of 20th and 21st.	Weather cloudy. Harvesting in progress. Prices rising. General health good.
Partabgarh („ 23rd)	·30 at Sadr on 21st	Weather cloudy throughout the week. Gram rising in price. Sugarcane sowing commenced.
Allahabad („ „)	*Ni*	Weather seasonable. Heat increasing. Mango flower and *rabi* crops damaged in places by hail of 9th, otherwise prospects good. *Rabi* harvesting in progress. Markets well supplied. Prices beginning to fall. A few cases of smallpox and fever reported; otherwise health of men and cattle good.
Cawnpore („ 22nd)	*Nil*	Weather cloudy at times. *Rabi* being harvested. Prices almost stationary. No damage has been caused to poppy crops by hail except in a few isolated villages where injury to the extent of 10 or 15 per cent. has been sustained. Opium collections going on everywhere; flow of opium free. Condition of people and cattle good.
Farakhabad („ 23rd)	A storm with slight rain on 20th.	Crops being cut. Weather still unsettled. Sky cloudy.
Sitapur („ „)	*Nil*	The wind has been changeable during the week. Harvesting of the crops has been begun. Hail has done but little damage to the poppy.
Bareilly („ „)	*Nil*	Prices of food considerably lower. Harvest prospects excellent. No disease.
Banda („ „)	Slight showers on 21st and 22nd.	Weather cloudy. *Rabi* being harvested. Prospects fair. Prices of wheat and *arhar* rising. Public health and condition of cattle good.
Ballia („ 22nd)	. . . .	Sky somewhat cloudy; wind westerly. Harvesting in full progress. Sugarcane planting going on. Public health good; no cattle-disease.
Kumaon („ 23rd)	*Nil*	Weather fine. *Rabi* crops progressing well; *kharif* operations commenced. Prices stationary. General health good; cattle-disease decreasing.
Agra („ 22nd)	*Nil*	Harvest operations in progress. Prices steady. Health good.
Jhansi („ „)	·10 at Jhansi. Hail is reported to have fallen in three villages of Pargana Jhansi.	Crops ripe and being cut in places. Health of people and cattle good.
Meerut („ 23rd)	*Nil*	Weather cloudy. *Rabi* first rate. Prices stationary. Health good.
		General Remarks.—Slight rain with clouds and hail in some places proved injurious to mangoes and *rabi*. Prospects generally good. Harvesting begun. Prices easier.
Punjab—(Mar. 24th)		
Delhi (Mar. 23rd)	*Nil*	Health good. Prices slightly rising.
Hissar	*Nil*	Health good. Prices stationary.
Umballa	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Jullunder	·40	Health good. Prices slightly rising. Prospects of current harvest good.
Amritsar	*Nil*	Health good. Prices slightly rising. Prospects of current harvest good.
Sialkot	·20	Health good. Prices stationary.
Ferozepore	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Lahore	*Nil*	Health good. Prices almost stationary. Prospects of current harvest fairly good.
Rawalpindi	1·0	Health good. Prices rising. Prospects of current harvest average.
Shahpur	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Mooltan	·80	Health good. Prices stationary. Prospects of current harvest good.
Dera Ismail Khan	1·63	Health good. Prices stationary. Prospects of current harvest good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Peshawar . . .	2·40	Health fair. Prices falling. Prospects of current harvest good. *General Remarks.*—Rain has fallen in the Jullunder, Sialkot, Multan, Rawalpindi, Dera Ismail Khan, and Peshawar Districts. Health good. Prices of food-grains falling in Peshawar, rising in Delhi, Jullunder, Amritsar, and Rawalpindi, stationary elsewhere. Prospects of current harvest good. Reaping has commenced in parts of the Delhi district.
Central Provinces— (Mar. 24th)		
Nagpur . . .	*Nil*	Weather hot and cloudy. Threshing in progress. Fever and cattle-disease in places. Prices steady.
Jubbulpore . .	·70 Thunderstorm with rain on 20th and 21st and hail on 23rd.	Prospects fair. Health good. Prices easy.
Saugor (Mar. 23rd)	*Nil*	Reaping commenced. Prices fallen. Prospects good. Health good.
Seoni	·25	Weather cloudy and windy. *Rabi* harvest in progress. Health improving. Prices steady.
Hoshangabad . .	Slight rain . .	Weather occasionally cloudy. Harvest continues. Cattle-disease in places. Prices fallen.
Khandwa . . .	*Nil*	*Rabi* harvest nearly completed. Health fair. Prices stationary.
Raipur . . .	Slight rain . .	Weather seasonable. Reaping continues. Prices steady. Slight cholera.
Sambalpur (Mar. 20th)	*Nil*	Weather clear and warm. Land being broken up. Sugarcane being planted. Cholera in a few places. Prices stationary. *General Remarks.*—Prospects remain unchanged. There have been storms in some districts, but they are not reported to have done damage. Cholera has made its appearance in the Chhattisgarh division.
British Burma— (Mar. 24th)		
Akyab (Mar. 20th)	. . . . .	Public health good; cattle healthy.
Bassein . . .	. . . . .	Public health good; cattle healthy.
Rangoon . . .	. . . . .	Public health good; cattle healthy.
Amherst (Moulmein) .	. . . . .	Public health good; cattle-disease in one township.
Pegu	. . . . .	Public health good; cattle healthy.
Henzada . . .	. . . . .	Slight cholera in one township; cattle healthy.
Prome . . .	. . . . .	Public health and health of cattle good.
Toungoo . . .	. . . . .	Health of men and cattle good.
Thayetmyo . . .	. . . . .	Health of men and cattle good.
		General Remarks.—A few deaths from cholera in the Thonegwa and Henzada districts, elsewhere public health good; slight cattle-disease in the Hanthawady, Tharrawaddy, and Amherst districts, elsewhere cattle healthy.
Assam—(March 24th)		
Gauhati . . .	. . . . .	Weather warm. Public health fair; cattle-disease reported from some mauzas. Pressing of sugarcane nearly over. Rain much wanted for *aus* crop.
Sylhet . . .	·11	More rain wanted for crops and cultivation. Cattle-disease reported from Sunamganj.
Cachar . . .	1·44	Weather warm. No crop on the ground. Common rice 13 seers $5\frac{1}{3}$ chittaks per rupee. Four deaths reported from cholera from Hailakandi and one from Sadr.
Dibrugarh . . .	·83	Weather seasonable. Pressing of sugarcane continues; tea manufacture commenced. District healthy.
Mysore and Coorg— (Mar. 24th)		
Bangalore . . } Mysore . . }	·95 of rain fell in the Kadur district.	In parts of Kolar and Tumkur districts crops are reported to be withering, elsewhere they are in good condition. Prospects favourable. Water diminishing in parts of the Kolar, Tumkur, and Mysore districts. Public health good; cattle-disease continues in parts of the Shimoga district. Prices fallen in het Mysore district and risen slightly in the Malnad district.
Mercara . . .	·06	Prices of food-grains slightly fallen. Prospects of season good.
Berar and Hyderabad—		
Amraoti . .	. . . . .	Weather warm. Threshing of *rabi* crop in progress. Wheat 22, and *jowari* 26 seers per rupee.
Akola . .	. . . . .	Weather clear and warm. Threshing operations completed in some places. Preparations for ensuing *kharif* commenced.
Hyderabad . .	. . . . .	Harvesting of *rabi* crops continues; *tabi* crops prospering. General health of talukas fair. Prices—wheat 16, coarse rice $12\frac{1}{8}$, white *juar* 22, yellow *juar* 24, and *tur* $15\frac{3}{4}$ seers per current sicca rupee.
Central India States— (Mar. 24th)		
Indore . .	. . . . .	Weather cloudy during the week but clear now. Prices stationary.
Morar (Gwalior) . .	. . . . .	Weather cloudy. Health and prospects good.
Sutna . . .	. . . . .	Weather cloudy and stormy. Health and prospects good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States— *contd.*		
Neemuch . . .	. . . .	Weather warm; high winds. Opium being collected. Smallpox outside of the cantonment.
Goona . . .	. . . .	Health and prospects good.
Agar . . .	·12	Health and prospects good.
Sehore . . .	. . . .	Weather clear. Crops and health good.
Nowgong . . .	. . . .	Rain threatening. Harvesting in progress. Weather much better. Health good.
Manpur . . .	. . . .	Collection of opium almost finished. Water scarce in most places. Health good. Prices moderate.
Rajputana—(Mar. 24th)		
Abu (Mar. 24th)	. . . .	Weather seasonable.
Sirohi („ 21st)	. . . .	Very small quantity of water in tanks, wells good. Health good Crops fair and being cut. Weather overcast and windy.
Marwar („ 19th)	. . . .	Tanks almost half full. Smallpox abating, otherwise health good. Crops ripening partially. Weather cloudy. Prices tending to rise.
Kherwara („ 21st)	. . . .	Tanks and wells drying. Reaping commenced. Health fair. Prices steady. Weather warmer and somewhat cloudy.
Meywar („ 20th)	. . . .	Tanks and wells low. Crops somewhat damaged by insects. Health very good. Prices stationary. Weather seasonable.
Harowti („ „)	. . . .	Weather hot. Harvest progressing. Smallpox in Tonk.
Jhallawar („ 19th)	. . . .	Weather seasonable. Prospects fair. Smallpox continues at Jhalrapatan and some tahsils.
Kotah („ 20th)	. . . .	Harvesting progressing favourably. Some smallpox in city. Weather cloudy.
Ajmere („ 23rd)	. . . .	Smallpox and fever in some parts. Wells and tanks diminishing. Crops suffered at places from frost last month, so full yield not expected.
Jeypore („ „)	. . . .	Harvesting commenced, average outturn expected. Prices slightly risen. Health fair.
Bhurtpore („ 20th)	. . . .	Tanks and wells full. Prospects and health good. Prices steady. Weather cloudy.
Ulwur („ 23rd)	. . . .	Weather cloudy. Health good. Cattle-disease in two districts.
Bikanir „ 20th)	. . . .	Fever and smallpox in districts. Prices stationary. Weather windy and cooler.

C. J. LYALL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

PENSIONS AND GRATUITIES.

Life Assurance and Life Annuities.

REPORT ON THE SCHEME OF STATE LIFE INSURANCE AND MONTHLY ALLOWANCES.

No. 1464, dated Calcutta, the 26th March 1886.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ the following:—

No. 15310, dated Calcutta, the 26th February 1886.

From—The Director General of the Post Office of India,

To—The Secretary to the Government of India, Department of Finance and Commerce.

In communicating the sanction* of the Right Honorable the Secretary of State for India to the experimental introduction, on a limited scale, of a scheme of State life insurance and monthly allowances confined to the employés of this Department, this Office was directed to submit an annual report on the working and progress of the scheme.

*From the Secretary of State to the Governor General in Council. Department of Finance and and Commerce No. 1726, dated 5th December 1883.

2. Statistics shewing the extent to which the members of the Postal Department availed themselves of the facilities for providence thus provided, have been included in the monthly statements of postal operations furnished for the information of Government: but no annual report on the measure has yet been submitted.

3. The scheme was introduced from the 1st February 1884. It provided three* ways of insurance and two kinds of monthly allowances, *viz.*, "immediate" or "deferred."

* By a single payment. By a monthly payment, until the person insured reaches the age of either 50 or 55. By a monthly payment during the life of the person insured.

4. Enclosed are two statements with an abstract showing the results attained in each postal circle during the fourteen months ending with the 31st March 885. No life policies were taken out by payment of the premium in a single sum. The number of policies effected by monthly payments was 398, representing a total value of ₹5,63,225; and the average value of each policy was ₹1,415. Out of these 398 policies, ten, amounting to ₹14,150, lapsed or were surrendered or cancelled; and two claims aggregating ₹1,500, were paid. Thus the net assured amount for which the Government was liable on the 31st March last, was ₹5,47,575.

5. Only four monthly allowances were purchased during the period under review, representing a total monthly income of ₹18: two of these were immediate monthly allowances and two deferred. The claims paid amounted to ₹4.

6. Including subscriptions for monthly allowances, the premiums received aggregated ₹16,453-4-2. Deducting from this total the sum of ₹1,504, being the amount of claims paid, the balance remaining in the hands of Government at the close of March 1885 was ₹14,949-4-2.

7. The life insurance system succeeded best in the Bengal Postal Circle, where 91 policies where taken out; next on the list stands Madras with 73 policies; then Bombay with 52 and Assam with 43 policies. In other parts of India the system has not found much favor. Three hundred and fifty-seven policies were issued in favor of natives against 41 obtained by Europeans or Eurasians.

8. The system of monthly allowances must, I fear, be pronounced a failure. The rates of payment by which this benefit can be secured are so high that superior investments can be obtained in other ways. and there seems little or no hope that this facility for providence will be largely accepted by the members of the Postal Department.

9. But the system of life insurance has already attained a fair measure of success. On the margin is given an abstract showing the strength of the postal establishment on the 31st March 1885 and the number of policies taken out by the several classes into which postal officials are divided. The number of employés who insured their lives was 1·05 per cent. of the whole. It should be borne in mind that, out of a total of 37,646 postal employés no less than 25,850 belong to grades such as postmen, runners, boatmen and the like, whose means leave but small margin of saving for the purposes of investment. It is satisfactory to find that 44 postmen and 11 members of the road establishment have during the first 14 months of the scheme availed themselves of the benefits of State life insurance. The measure has then made a fair beginning and promises to fulfil the object for which it was initiated, *viz.*, the encouragement of providence amongst the servants of Government.

POSTAL OFFICIALS.	Number.	Number of Life Insurance Policies taken out.
Superintendents and Inspectors	332	38
Post Masters, Deputy Post Masters and Village Post Masters	4,937	123
Schoolmasters, and other extraneous Agencies	1,221	Nil.
Clerks	4,909	177
Postmen, Village Postmen, &c.	13,437	44
Road Establishment	12,413	11
Signallers, Clerks, &c., in combined offices	397	5
TOTAL	37,646	398

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RULE REGARDING THE GRATUITOUS DISTRIBUTION OF [illegible] INDIA.

No. $\frac{1}{356}$.

Extract from the Proceedings of the Government of India, in the Home Department (Public—Books)—under date Calcutta, the 6th April 1886.

READ again—

Legislative Department Circulars to all Local Governments and Administrations, Nos. 1030 to 1040, dated the 8th September 1882, and Nos. 1104 and 1114, dated 28th August 1883, on the subject of giving greater publicity to legislative measures.

Home Department Resolution Nos. 49—1791-1807, dated 8th November 1882, on the subject of giving publicity to rules, regulations or notifications having the force of law and issued by executive authorities.

RESOLUTION.

THE Government of India has recently had under consideration the question whether it is not desirable to restrict within narrower limits the free circulation of the *Gazette of India*, and to lay down some more definite rule than at present exists regarding the gratuitous supply of the *Gazette* either to private institutions, such as Libraries, Reading Rooms, Clubs, &c., or in exchange for newspapers. Considerable difficulty is experienced from time to time in deciding whether applications for the free supply of the *Gazette* to private persons or bodies should be complied with, and the extent to which

the gratuitous distribution list of the *Gazette* has in this way become enlarged has been found to be productive of inconvenience.

2. As special arrangements have been made for giving due publicity to measures which may from time to time come before the Legislature and also to rules, regulations or notifications having the force of law which are issued by the executive authorities in the exercise of powers conferred upon them under the provisions of Acts of the Legislature, it is unnecessary for these purposes to provide for any particularly wide circulation of the *Gazette of India*. Under these circumstances, and as it is desirable to avoid making distinctions in the matter, the Governor General in Council has decided to adopt the simple rule that the *Gazette* should not be gratuitously supplied to any person with the exception of Officers of the Government.

As regards newspapers, the gratuitous supply of the *Gazette* will be limited in the Lower Provinces to the newspapers marginally* noted, while in other Provinces a certain number† of copies will be made available for distribution in such manner as Local Governments and Administrations may see fit. This arrangement will take effect from the 1st April 1886 or as soon after that date as may be found practicable.

D. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch.)

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEKS ENDING 31st MARCH AND 7th APRIL, 1886.

GENERAL REMARKS.—Rain has fallen during the past fortnight in Assam, Eastern Bengal, Akyab, Ganjam, Kurnool, Coimbatore, Madura, and Malabar, also in the northern and western frontier districts of the Punjab, in parts of Sind, Rajputana, Central India, and the Central Provinces; but, except in Assam, the adjacent districts of Bengal, and on the Punjab frontier, the falls have been slight and partial.

Unusually cool weather has prevailed over Northern India; but the temperature is now rising, and westerly winds have set in in the North-Western Provinces.

The *rabi* harvest is approaching completion in Bengal, the eastern districts of the North-Western Provinces and Oudh;—it is in progress in the Central Provinces and Guzerat, in Rajputana, Central India, and Hyderabad, and has commenced in Sind and the Punjab. The harvest promises generally a good outturn.

The opium crop has been gathered, and the results are generally satisfactory, except in Meywar and parts of Banda, where the crop was damaged.

In the Madras Presidency rice, millets, cotton, &c., are being gathered. The outturn is reported to be below the average in Kistna, Kurnool, Chingleput, and Tanjore,—average in Bellary and Madura, and above average in Coimbatore. Standing crops are suffering from want of rain and irrigation in parts of Chingleput, Tanjore, and Malabar; but are elsewhere in good condition.

In Hyderabad and Mysore the standing crops also promise well; but in parts of two districts in Mysore they are reported to be withering.

In Bengal the *boro* rice is progressing favourably, except in Burdwan. Ploughing and sowing of the *aus* crop and jute continue with improved prospects; and indigo sowings are nearly completed. The recent rain in Assam has done much good to the sowings of *ahu* paddy.

Kharif operations have commenced in parts of Sind and Hyderabad.

Cattle-disease exists in several districts of Madras, Bombay, Burma, the Central Provinces, and Assam.

Prices remain unchanged in most Provinces, but show a downward tendency in the principal markets of the North-Western Provinces and in Mysore.

Slight fever and small-pox continue in the Madras and Bombay Presidencies, the Rajputana States, and parts of Bengal and the North-Western Provinces. Cholera is reported to be severe in the Karimganj subdivision of Sylhet, and continues in a sporadic form in parts of Bengal, Burma, Madras, and the Central Provinces.

REPORTS FOR THE WEEK ENDING 31st MARCH, 1886.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(March 31st)		
Bellary	*Nil*	Standing crops generally good, but white *cholum* suffering from disease in parts of one taluk; harvest *cholum*, cotton, and sugarcane, yield about average. Cattle-disease in one taluk.
Kurnool	*Nil*	Standing second crop paddy good; harvest cotton, yield below average. Small-pox in three and cattle-disease in two taluks.
Ganjam	·39 (average)	Slight small-pox in seven, fever in three, and cattle-disease in four taluks. Average number employed on Chilka canal 1,012.
Kistna	*Nil*	Standing crops generally good. Slight fever and small-pox; deaths from cholera unreported last week 58, this week 38.
Chingleput	*Nil*	Standing crops generally good, except in parts of one taluk under tanks breached in 1884, where they are withering. Harvest paddy, yield below average. Fever in one, small-pox in five, and cattle-disease in three taluks.
Coimbatore	·21 (average)	Standing crops good; harvest wet and dry grains, outturn of paddy about average, rest average. Fever in two and slight small-pox in two taluks.
Tanjore	*Nil*	Standing crops generally good; harvest wet and dry grains, outturn below average.
Madura	·36 (average)	Harvest paddy, yield about average. Fever in one taluk.
Malabar	*Nil*	Third crop cultivation requires rain. Slight small-pox in eight taluks, fever in one and cattle-disease in another; 10 deaths from cholera.
Travancore	*Nil*	Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(March 31st)		
Karachi	·25 at Sehwan; average of four other stations, ·15.	River at Kotri on 25th, 7 feet 8 inches against 5 feet 5 inches on same date last year. *Rabi* harvesting proceeding in nine talukas. Fever in seven, and cattle-disease in two talukas. Small-pox in two villages in district, 23 fresh cases, 2 deaths. 10 remaining sick. Saugor (April 6th)	*Nil*	*Rabi* reaping progressing. Prices fallen in two tahsils, risen in two. Slight small-pox and cattle-disease.
Seoni . .	*Nil*	Weather seasonable. *Rabi* threshing commenced. Slight small-pox. Prices easier.
Hoshangabad . .	*Nil*	Weather seasonable. Harvest continues. Small-pox and cattle-disease in places. Wheat 18½ and rice 11 seers per rupee.
Khandwa . .	*Nil*	Weather warm with cool mornings. *Rabi* crops being threshed. Health fair. Wheat 21, *juari* 30, and rice 12 seers per rupee.
Raipur . .	*Nil*	Weather seasonable. Reaping nearly finished. Cholera continues. Wheat 30½ and rice 28 seers per rupee.
		General Remarks.—Weather seasonable. *Rabi* harvest continues. Slight cholera and small-pox in places. Prices steady.
British Burma—(April 7th)		
Akyab (April 3rd) . .	Rain for week 1·14	Total rainfall 1·25. Public health good; cattle healthy.
Bassein . .	*Nil*	Cholera slight in town; cattle-disease slight in two townships.
Rangoon . .	*Nil*	Public health good; cattle healthy.
Amherst (Moulmein) . .	*Nil*	Public health good; cattle healthy.
Pegu . .	*Nil*	Public health good; cattle healthy.
Henzada . .	*Nil*	Public health good; cattle-disease slight in one township.
Prome . .	*Nil*	Public health and health of cattle good.
Toungoo . .	*Nil*	Public health and health of cattle good.
Thayetmyo . .	*Nil*	Public health and health of cattle good.
		General Remarks.—Slight cholera in Bassein town and in one township of Thongwa district; elsewhere health of men good; cattle-disease slight in five districts; cattle healthy.
Assam—(April 7th)		
Gauhati . .	·12 during week ending 6th instant.	Weather cool. Cholera prevalent in station Gauhati; cattle-disease reported from some mauzas. Sowing of *aku* paddy in progress.
Dibrugarh . .	2·22	Weather showery. Cholera and cattle-disease still prevalent in North Lakhimpur. *Ahu dhan* being sown.
Sylhet . .	12·54	The rains much improved the prospects of the crops. Cattle-disease and cholera severe in parts of Karimganj subdivision.
Cachar . .	6·05	Days warm, nights cool. No crops on the ground. Common rice 13 seers 5¾ chittacks per rupee. Five deaths from cholera reported from Sadr; general health good.
Mysore and Coorg—(April 7th)		
Bangalore . .	*Nil*	Standing crops in good condition, except in parts of the Kolar and Tumkur districts, where they are reported to be withering; prospects of season fair. Water-supply diminishing in parts of the Mysore, Kolar, and Tumkur districts. Public health generally good; fever, small-pox, and cattle-disease prevalent in parts. Prices slightly fallen in the Tumkur and Shimoga districts.
Mercara . .	*Nil*	Slight fall in prices of food grains. Prospects of season and public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad (April 7th)		
Amraoti . .	*Nil*	Weather warm. Threshing of *rabi* crops nearly completed; preparations for *kharif* commenced. Wheat 22 and *juari* 26 seers per rupee.
Akola . .	*Nil*	*Rabi* harvesting almost completed; preparations for ensuing *kharif* sowings commenced.
Hyderabad . .	*Nil*	Reaping of *rabi* crops concluded; *sali* crops prospering. Fever prevails in one taluk. Prices—wheat 13½, coarse rice 12, white *juari* 22½, yellow *juari* 24, and *tur* 10½ seers per current sicca rupee.
Central India States—(April 7th)		
Indore . . .	*Nil*	Weather getting warmer. Health and crops good.
Morar (Gwalior) . .	*Nil*	Health and prospects good.
Sutna . . .	*Nil*	Weather clear and cool. *Rabi* outturn good.
Neemuch . . .	*Nil*	Weather warm. No fresh cases of small-pox reported.
Goona . . .	*Nil*	Health and prospects good.
Agar . . .	*Nil*	Health and opium prospects good.
Sehore . . .	*Nil*	Weather clear. Health good.
Nowgong . . .	*Nil*	Health good. Weather abnormally cool. Agricultural prospects favourable.
Manpur . . .	*Nil*	Weather hot. Wells and tanks drying up. Health good. Prices stationary.
Rajputana—(April 7th)		
Abu (April 7th)	*Nil*	Weather getting warmer and seasonable.
Sirohi („ 4th)	*Nil*	Tanks dried up; wells good. Health good. Crops mostly cut. Weather fine and warm.
Marwar („ 2nd)	*Nil*	Tanks almost half full. Small-pox abating, otherwise health good. Crops being reaped and gathered. Prices stationary.
Kherwara („ 4th)	*Nil*	Tanks and wells slightly lower. Crops being harvested. Health good. Prices steady. Weather warmer and seasonable.
Meywar („ 3rd)	*Nil*	Tanks and wells low. Opium crops somewhat damaged. Health very good. Prices stationary. Weather cool.
Harowti („ „)	*Nil*	Days warm, nights chilly. Crops being cut. Small-pox in Tonk, otherwise health good.
Jhallawar („ 2nd)	*Nil*	Opium collected. Small-pox continues. Weather cool.
Kotah („ 3rd)	*Nil*	Small-pox abating; health good. Harvest promises an abundant outturn.
Ajmere („ 6th)	*Nil*	Tanks and wells diminishing. Crops being reaped. Slight fever and small-pox. Heat increasing, nights cool.
Jeypore („ „)	*Nil*	Average outturn expected. Prices slightly risen. A few cases of small-pox at capital. No change in opium reports.
Kerowlee („ 3rd)	*Nil*	Tanks and wells dry. Reaping of crops commenced. Health good. Prices steady.
Ulwar („ 6th)	*Nil*	Harvesting in progress. Small-pox in one tahsil, otherwise health good.
Bickanir („ 3rd)	*Nil*	Fever and small-pox in some districts. Prices stationary. High winds early in the week; weather cool.

No. 78 Met.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, 8th April, 1886.

Read the following:—

Summary of the Weather Reports for December 1885 and January and February 1886.

The fine weather which had prevailed in the last week of November continued during the first week of December throughout the whole country and for the first ten days in Northern India. In Madras light showers set in on the 7th, and the rainfall extended and became heavier on the two following days. From the 10th to the 15th there was but little rain in the Peninsula, though some fell in Central India; but for about ten days subsequently to the 15th, there was fairly general, and in places heavy, rain in Madras.

In Upper India the weather became unsettled about the middle of the month, and the winter rains began unusually early. Moderate showers fell in the Eastern Punjab and the Gangetic Valley, and falls of snow at the hill stations of the North-Western Himalaya on the 12th and the 13th, and heavy showers both in North-Western India and the Nerbudda Valley on the 18th and 19th. After the passage of the depression which caused the last-mentioned rainfall, pressure rose quickly, and the weather became fine throughout the whole country. In Guzerat, Sind, and the Konkan the rainfall of the month was either nil or unimportant; but in all other parts of the country the amount exceeded the average, especially so in North-Western and Central India. This unsettled weather brought about very low temperatures at times, and the mean temperature of the month was generally 2° or 3° below the average.

In January the weather of Upper India was even more unsettled than in December, and several disturbances appeared over the Punjab. That of the 19th was exceptionally intense; and on that day pressure in the Punjab was from 0·25 inch to 0·37 inch below the average of the month. More than double the average amount of rain fell in the Punjab, and a considerable excess in the Trans-Gangetic districts of the North-Western Provinces, but it did not apparently extend beyond those regions, deficiencies being reported from almost all other parts of India. Western India from Guzerat to the Deccan was rainless throughout. Like December, January was a cool month, the only exceptions being Madras and the more southern districts of the Bombay Presidency, where there was a slight excess of temperature. In the Punjab it was from 2° to 4° below the average.

February was, on the whole, a more settled month than either December or January, and the barometric mean of the month was almost everywhere above the average. A barometric disturbance affected North-Western India on the 16th; but though the pressure differences were considerable and the winds very high at some stations, there was but little rain, and the total fall of the month in this as well as in nearly all other parts of India was below the average. Over the greater part of India there was no rain, but in the Carnatic and British Burma there was a slight excess, and in Assam and Cachar about half the average fall. In the absence of rain, temperature rose above the normal at several of the Peninsula stations and in Guzerat, but elsewhere the cool weather which had characterised the two preceding months continued, and in places, relatively to the average, the depression of temperature was even more marked. At Dera Ismail Khan it was as much as 5°. Dry north-westerly winds prevailed throughout a great part of the month, and, except in the extreme north-west, humidity was considerably below the average throughout India.

The final column of the following table shows that, except in Bengal and Assam and in Western India, the rainfall of the three months has been above the average. Except in the Punjab, the North-Western Provinces, and the Carnatic, the whole of this excess is attributable to the exceptional rainfall of December.

The following table shows the amount of rain and the difference from the average during the months of December 1885 and January and February 1886, according to districts as far as is indicated by the telegraphic reports:—

Districts.	Average rainfall in December.	Difference from the average in December 1885.	Average rainfall in January.	Difference from the average in January 1886.	Average rainfall in February.	Difference from the average in February 1886.	Total difference for the three months.

SIMLA,
The 16th April 1886.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 14th APRIL, 1886.

GENERAL REMARKS.—During the past week there has been slight rain on the Malabar coast, in Chittagong, in parts of the central districts of Bengal, in Meerut, Rawalpindi, Peshawar, and Sialkot, while heavier falls have occurred in the eastern districts of Bengal and in Assam.

The reaping of the *rabi* harvest is nearly over in Bengal, the North-Western Provinces and Oudh, the Central Provinces, Bombay, and Rajputana, and threshing and winnowing are going on. In parts of the Punjab the harvest has commenced.

The standing crops in the Madras Presidency and Mysore are in good condition; but rain would be beneficial in the Malabar district and in the coffee districts of Mysore.

The prospects of the *boro* rice crop in Bengal are favourable, except in two districts, where rain is needed. Preparations for the *aus* rice crop continue, and jute sowings have commenced. Sugarcane is being planted, and the land is under preparation for the *kharif* in several provinces. Cattle-disease is reported from Madras, Mysore, parts of Bombay and Sind, the North-Western Provinces and Oudh, the Central Provinces, Burma, and Assam, but is nowhere severe.

Prices of foodgrain are generally steady in Bengal, and the markets in the North-Western Provinces and Oudh are well supplied. In the Punjab, prices are rising in Delhi and falling in the Peshawar district; elsewhere they are stationary. In the Central Provinces prices are fluctuating, with a tendency to fall, and the wheat trade is reviving.

Small-pox and fever are reported from parts of the Madras and Bombay Presidencies and of Rajputana. Cholera is prevalent in eastern Bengal and in some districts of Assam.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras (April 14th)		
Bellary	*Nil*	Standing crops generally good, but white *cholum* suffering from disease in places of one taluk; harvest *cholum*, cotton, and sugarcane, yield about average. Cattle-disease in two taluks.
Kurnool	*Nil*	Standing second crop paddy good; harvest cotton, yield below average. Small-pox in three and cattle-disease in three taluks.
Ganjam	*Nil*	Small-pox in eight, fever in four, and cattle-disease in six taluks; 2 deaths from cholera. Average number employed on Chilka canal 1,131.
Kistna	*Nil*	Harvest almost finished. Slight fever and small-pox; deaths from cholera unreported last week 62, this week 16; cattle-disease in one village.
Chingleput (Madras)	*Nil*	Standing crops good, except in parts of one taluk, where withering; harvest paddy and *ragi*, yield below average. Cattle-disease in two taluks.
Tanjore	*Nil*	Standing crops generally good, except in one taluk, where rain is wanted; harvest wet and dry grains, outturn below average. 1 death from cholera.
Coimbatore	·01 (average)	Standing crops good; harvest paddy, *cholum*, and *ragi*, outturn nearly above average. Fever in one and small-pox in parts of four taluks.
Madura	*Nil*	Harvest paddy, yield about average. Fever in one taluk and cattle-disease in one division.
Malabar	*Nil*	Third crop cultivation requires rain. Fever in one and slight small-pox in nine taluks; 03 deaths from cholera in three taluks.
Travancore	*Nil*	Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(April 14th)		
Karachi	*Nil*	River at Kotri on 12th, 9 feet 4 inches against 14 feet 4 inches on same date last year. Fever in seven and cattle-disease in four talukas; small-pox in two villages in district, 1 fresh case, 5 remaining. Prices—wheat, red rice, and *bajri* in Karachi 26, 30 and 34, in Tatta 32, 40 and 40, in Mirpur Batoro 24, 46 and 42, and in Sehwan 32, 44 and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	*Rabi* harvest general, and the produce is being threshed in some talukas. River at Kotri on 12th, 9 feet 4 inches against 14 feet 4 inches on same date last year. Fever in four, small-pox in three, and cattle-disease in two talukas. Prices of grain steady.
Ahmedabad	*Nil*	Reaping of *rabi* crops nearly completed. Public health good. Wheat 34 and *bajri* 31 pounds per rupee.
Baroda	*Nil*	Public health generally good. A few cases of small-pox in Naosari town and Baroda city. Standing crops in good condition. Prices—*bajri* 29, wheat 23, and rice 18 pounds per rupee.
Surat	*Nil*	Cotton-picking nearly finished. Small-pox among cattle in Bardoli taluka; fever in Bardoli and Mandvi talukas. *Juari* 38 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Rabi* reaping nearly completed and threshing in progress. Public health good. Wheat 31, *bajri* 33, and rice 20 pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 2° warm on 7th and 11th, *nil* on 8th and 9th, and 1° warm on all other days; vapour in air excessive on 7th and 8th, normal from 9th to 12th, and defective on 13th; abnormal wind southerly on 7th and 8th, northerly on 13th; wind normal on all other days.
Poona	*Nil*	Harvesting of *rabi* completed, except in three talukas. Small-pox in a village in Sirur taluka. *Bajri* 35 and *juari* 43, in Poona *bajri* 34 and *juari* 35 pounds, per rupee.
Ahmednagar	*Nil*	Reaping almost completed. Public health good. *Bajri* average 45 and *juari* 60 pounds per rupee.
Sholapur	*Nil*	Reaping of *rabi* crops almost completed. *Juari* 60 pounds 12 tolas and *bajri* 45 pounds 33 tolas per rupee.
Dharwar	*Nil*	Harvesting of late *juari* commenced; cotton-picking in progress. Slight fever in one and cattle-disease in two talukas. Scarcity of drinking-water in Kod taluka. Rice 22 to 32 and *juari* 45 to 64 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Kanara . . .	·18 in Supa	Second rice crop harvest nearly finished on coast. Small-pox prevalent in Sirsi, Siddapur and Yellapur talukas. Common rice at Karwar 14, district average 13½ seers per rupee. Weather hot on coast.
Rajkot . . .	*Nil*	Weather hot. Cattle-disease in Morvi and Jafira. *Bajri* 32, *jowari* 46, and wheat 33 pounds per rupee. General health good.
		General Remarks.—Slight rain in one taluka of Kanara. Fever in parts of ten, small-pox in parts of twelve, and cattle-disease in parts of seven districts. Other conditions unchanged.
Bengal—(April 14th)		
Chittagong (April 13th) .	0·23	Weather unsettled, with high winds. Small-pox continues; public health generally good. Prices unchanged.
Dacca . . .	4·35	Cultivation of jute and rice going on; sugarcane being planted; *boro* rice ripening; prospects good. Public health good.
24-Parganahs (Calcutta) .	*Nil*	No crops on ground; lands being prepared. Common rice 15 to 18 seers per rupee. Public health generally good, though cases of cholera reported from Barasat.
Moorshedabad . .	Slight rain	Weather cool for time of year. *Boro* rice doing well; ploughing for next rice crop progressing. Some cholera in thana Nowadi, otherwise public health good. Common rice 18 or 19 seers per rupee.
Rungpore . . .	0·40	Weeding of *aus* and *aman* commenced; jute being sown. More rain wanted. Curing of tobacco continues in some places. General health good.
Bhagalpur . . .	*Nil*	*Rabi* harvest nearly completed; sugarcane being planted; mango prospects not good.
Burdwan . . .	*Nil*	Lands being prepared; *boro* rice suffering for want of rain. Common rice 18 to 22 seers per rupee. A few cases of cholera; public health generally good.
Purneah . . .	*Nil*	Prospects of crops good; *rabi* still being harvested. Coarse rice 20 seers per rupee. Health good.
Patna . . .	*Nil*	Harvesting of *rabi* crops nearly completed; gathering of castor continues; cotton looks well. Public health good.
Dhurbhunga . .	*Nil*	*Moong* and early paddy being sown; *rabi* harvest almost over; threshing operations in progress; *rahar* being harvested, with a fair outturn. Prices rising slightly. Public health good.
Hazaribagh . . .	*Nil*	Weather seasonable. Sugarcane doing well; *mohua* yielding fairly; mango partially damaged; opium being weighed. General health good.
Cuttack . . .	*Nil*	Weather hot. *Dalua* rice ripening; ploughing in progress. Prices of rice almost unchanged. Public health generally good.
Midnapore . . .	*Nil*	Tillage of lands in progress everywhere; prospects of *boro* rice fair. Public health normal.
Khoolna . . .	0·72	Weather stormy; hail on 9th in Bagirhat and Satkhira. Some injury done to *boro* rice; ploughing continues well. A little fever and cholera; public health fair.
Dinagepore . . .	*Nil*	Weather hot and damp. Harvesting of *rabi* completed; lands being prepared for *aus* crop. Health good.
Pubna (Serajganj) .	0·19	Crops doing well. Cholera in all thanas.
Gya	*Nil*	*Rabi* harvest completed; new crops on ground doing well. Prices steady. Health good.
Chumparun . .	*Nil*	*Rabi* harvest nearly completed. Weighments of opium commenced. Prices stationary. Public health good.
		General Remarks.—Good rain throughout East Bengal and in some places in Central Bengal. *Boro* rice generally doing well, but rain wanted in Burdwan and Midda. Ploughing for *aus* rice and jute proceeding well, and in some places sowing commenced. Planting of sugarcane going on. *Rabi* harvest nearly finished, with a generally good outturn. *Mhua* yielding fairly. Cholera prevalent in East Bengal and in Pubna, otherwise public health satisfactory. Prices of rice almost stationary.
N. W. Provinces and Oudh—(April 14th)		
Benares (April 13th)	*Nil*	Weather getting warm. Cutting of *rabi* completed; threshing in progress. Supplies ample. Prices slightly fluctuating. Health generally good, though a few fatal cases of cholera, and there is some small-pox in the district; there is no cattle-disease in the district.
Gorakhpur („ 12th)	*Nil*	*Rabi* reaped; threshing commenced; opium outturn fair. Weather getting hot. Slight fall in prices. Health good.
Fyzabad („ 13th)	*Nil*	Heat steadily increasing. Opium collecting nearly completed; *rabi* all cut. Prices steady. Health good.
Lucknow („ 12th)	*Nil*	Threshing and winnowing in progress; opium collection completed. Heat increasing. New grains coming in plentifully. Prices stationary. Health of people good; condition of cattle fair.
Rae Bareli („ „)	*Nil*	Weather seasonable; wind westerly. Harvesting of *rabi* crops going on. Markets full. Prices steady. General health fair.
Partabgarh („ 13th)	*Nil*	The *rabi* outturn is estimated at about an average crop in Kunda and Partabgarh; *sawan* is being irrigated. Except in respect of gram there is a considerable fall in prices. No sickness.
Allahabad („ „)	*Nil*	Wind westerly; heat increasing. *Rabi* harvest approaching completion. Markets well supplied. Prices show a slight fall. A few cases of cholera reported, otherwise health generally good.
Cawnpore („ 12th)	*Nil*	Weather getting hot. Harvesting in progress. Prices slightly fallen. Condition of people and cattle good.
Banda („ 13th)	*Nil*	*Rabi* being harvested; prospects generally fair. Prices steady. Public health and condition of cattle good.
Farakhabad („ „)	*Nil*	Harvest almost completed. Weather seasonable. Health good.
Bareilly („ „)	*Nil*	Harvest nearly completed. Markets almost stationary. Public health good.
Balia („ 12th)	*Nil*	Weather clear; wind variable. Cutting of *rabi* crops over; threshing in progress. Supplies ample. Public health good. No cattle-disease.
Kumaon („ 13th)	*Nil*	Weather cloudy after three clear days; sunshine needed. Prospects of *rabi* good; *kharif* operations progressing. Prices rising. Sickness in certain parts; cattle-disease decreasing.
Agra („ 12th)	*Nil*	Harvesting continues. Prices steady. Health good.
Jhansi („ „)	*Nil*	Weather seasonable. Reaping nearly finished and threshing commenced. Prices falling. Health of people good; cattle-disease in three villages.
Meerut („ 13th)	Slight rain on 11th	Hot west wind prevailing. *Rabi* harvest in progress. Ample supplies. Prices steady.
		General Remarks.—Weather seasonable. Harvesting operations progressing. Supplies ample. Prices generally steady. Public health and condition of cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—(April 14th)		
Delhi (April 13th)	*Nil*	Health good. Prices rising.
Hissar . . .	*Nil*	Health good. Prices almost stationary.
Umballa . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Jullundar . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . . .	·20	Health good. Prices stationary. Prospects of current harvest good.
Ferozepore . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Lahore . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest fairly good.
Rawalpindi . . .	·50	Health good. Prices stationary. Prospects of current harvest average.
Shahpore . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Mooltan . . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Dera Ismail Khan . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Peshawar . . .	·40	Health good. Prices falling. Prospects of current harvest good.
		General Remarks.—Rain has fallen in the Sialkot, Rawalpindi, and Peshawar districts. Health good. Prices of foodgrains rising in the Delhi and fallen in the Peshawar district, elsewhere stationary. Prospects of current harvest good; harvest in progress in the Hissar, Delhi, and Umballa districts.
Central Provinces—(April 14th)		
Nagpur . . .	*Nil*	Weather hot. Threshing continues. Fever in places. Prices stationary.
Jubbulpore . . .	*Nil*	Weather seasonable. *Rabi* harvest continues; threshing commenced. Health good. Prices falling.
Saugor (April 13th)	*Nil*	Weather hot and windy. Reaping progressing. Small-pox continues. Prices fallen.
Seoni	*Nil*	Weather cloudy and hot. Threshing progressing. Slight small-pox and cattle-disease prevalent. Prices easier.
Hoshangabad . .	*Nil*	Weather seasonable. Winnowing continues. Small-pox and cattle-disease in places. Prices stationary.
Khandwa . . .	*Nil*	Weather warm, with high winds. Threshing progressing. Slight small-pox prevalent. Prices steady.
Raipur . . .	*Nil*	Weather seasonable. Reaping completed. Cholera and cattle-disease in places. Prices stationary.
Sambalpur (April 10th)	*Nil*	Weather hot and cloudy. Sugarcane planting in progress. Cholera in parts. Rice 26 seers per rupee.
		General Remarks.—Prospects continue unchanged. Prices are gradually falling from the abnormal height, which they lately reached in the northern districts, and the export of wheat which has greatly decreased shows signs of reviving.
British Burma—(April 14th)		
Akyab (April 10th)	*Nil*	Public health good; cattle healthy.
Bassein . . .	*Nil*	Slight cholera in two districts; cattle healthy.
Rangoon . . .	*Nil*	Public health good; cattle healthy.
Amherst (Moulmein) .	*Nil*	Public health good; cattle healthy.
Henzada . . .	*Nil*	Public health good; cattle healthy.
Prome . . .	*Nil*	Public health good; cattle healthy.
Toungoo . . .	*Nil*	Public health good; cattle healthy.
Thayetmyo . .	*Nil*	Public health good; cattle healthy.
		General Remarks.—Slight cholera in two districts, elsewhere public health good; cattle-disease in three districts, elsewhere health of cattle good.
Assam—(April 14th)		
Gauhati—(April 13th)	1·08	Weather getting warm; occasional showers. Cholera prevalent in station Gauhati and in Laki tahsil; cattle-disease reported from some mauzahs. Sowing of *ahu* paddy in progress.
Sylhet . . .	3·62	No change since last week.
Cachar . . .	5·94	Weather rainy. Ploughing for *asra* crop commenced in some parts of the district. Common rice 13 seers 5½ chittacks per rupee. General health good.
Dibrugarh . . .	1·47	Weather cloudy, with slight rain. *Ahu dhan* being sown, and pressing of sugarcane continues; prospects good. Cholera in North Lakhimpore subdivision.
Mysore and Coorg—(April 14th)		
Bangalore (April 13th)	*Nil*	Standing crops generally in good condition in parts of Kolar district, they are reported to be withering; season prospects fair. Supply of water and fodder diminishing in parts of the Mysore, Kolar, and Tumkur districts. Public health good; cattle-disease prevalent in parts of the Bangalore and Shimoga districts. Prices slightly risen in the Shimoga and Kadur districts. Rain much needed in coffee planting districts.
Mysore . .	·12	Prices of foodgrains stationary; prospects of season good. Fever and small-pox prevalent.
Mercara . . .		
Berar and Hyderabad—(April 14th)		
Amraoti . . .	*Nil*	Weather clear; warm during the day. Threshing operations completed. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	*Nil*	Weather hot during the day. Preparations for ensuing *kharif* sowings continue.
Hyderabad . .	*Nil*	*Tabi* crops prospering. Fever continues to prevail. Prices—wheat 15, coarse rice 12, white *juar* 20, yellow *juar* 24½, and *tur* 15½ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(April 14th)		
Indore	*Nil*	Weather warm. Health good. Water scarce in Mhow.
Morar (Gwalior)	*Nil*	Health good. Weather seasonable.
Sutna	*Nil*	Weather hot. Health and prospects good.
Neemuch	*Nil*	Weather seasonable. Opium collection almost completed.
Goona	*Nil*	Heat increasing. Prices falling. Health good.
Agar	*Nil*	Health and opium prospects good.
Sehore	*Nil*	Weather clear. Health good.
Nowgong	*Nil*	Health good. Weather hot. Agricultural prospects favourable.
Bhopawar (Manpur)	*Nil*	Weather warm. Scarcity of water much felt. Health good. Prices moderate.
Rajputana—(April 14th)		
Abu (April 14th)	*Nil*	Weather seasonable.
Sirohi („ 11th)	*Nil*	Tanks dry; wells fair. Health good. Crops cut. Weather fine and warm.
Marwar („ 9th)	*Nil*	Tanks almost half full. Small-pox abating, otherwise health good. Crops being gathered. Weather slightly cloudy; hot wind blowing; nights close. Prices stationary.
Kherwara („ 11th)	*Nil*	Tanks and wells drying. Reaping and threshing in progress. *Mohua* being gathered. Health good. Prices steady. Weather seasonable; heat increasing.
Meywar („ 10th)	*Nil*	Tanks and wells low. Crops being reaped. Health very good. Prices stationary. Weather getting warm.
Harowti („ „)	*Nil*	Weather warm. Crops harvested. Health good. Prices falling.
Jhalawar („ 9th)	*Nil*	Weather seasonable. Crop being harvested. Small-pox decreasing.
Kotah („ 10th)	*Nil*	Fever and small-pox prevalent. Harvest very favourable. Prices falling. Weather suddenly become very hot.
Ajmere („ 13th)	*Nil*	Tanks and wells diminishing. Heat increasing. Crops being reaped. Slight fever and cattle-disease in parts of Merwara.
Jeypore („ „)	*Nil*	Heat above average. Small-pox still prevalent. Opium crop unchanged.
Kerowlie („ 10th)	*Nil*	Tanks and wells dry. Harvesting continues. Health good. Prices rising.
Bhurtpore („ „)	*Nil*	Tanks and wells full. Harvesting continues. Health good. Prices steady.
Ulwur („ 13th)	*Nil*	Harvesting continues. Wells falling. Small-pox and fever in two districts, otherwise health good.
Bikanir („ 10th)	*Nil*	Health good. Prices falling. Weather windy and warmer.

D. M. BARBOUR,
Secretary to the Govern[illegible]nt of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 20th April 188[illegible]

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 21st APRIL, 1886.

GENERAL REMARKS.—Rain has continued to fall during the past week in Assam, and there have also been showers at Dacca, in parts of the Madras Presidency, in Mysore and Coorg, and at Hyderabad. With the exception of the Amritsar and Peshawar districts, no rain has fallen in Northern or Central India.

The weather is generally seasonable, westerly winds prevail in Northern and Western India, and the temperature is rising.

The *rabi* harvest is in progress in the south-east Punjab, and prospects are favourable. In Bombay and Sind it is nearly completed; and threshing and winnowing operations are well advanced in the North-Western Provinces and Oudh, Behar, the Central Provinces, and Central India States. In the Meerut district the outturn of the wheat crop has been less favourable than was anticipated.

Cotton is being picked in Surat and Dharwar and in the Madras Presidency, where rice and *ragi* are also being harvested.

A good outturn is expected from the *boro* rice crop in Bengal, and the *aus* rice and indigo sowings are progressing, though rain is wanted in some districts. Some damage is reported to have been caused to the *boro* rice in Sylhet by the recent rainfall.

Standing crops in the Madras Presidency and Mysore are generally in good condition, but are suffering in a few districts for want of water. Rain is also much needed in Mysore for coffee-planting.

The land is now being generally prepared for *kharif* sowings, which have commenced in Sind. Sugarcane is being pressed and planted in the North-Western Provinces and Oudh and in Bengal, where planting has been nearly completed; the cuttings are progressing favourably.

Prices are generally stationary, except in Mysore and Coorg, where they have fallen.

Cattle-disease is reported generally. There is some scarcity of water and fodder in Mysore and in parts of the Bombay Presidency and Rajputana.

The public health is generally fair, though fever and small-pox are reported from many places.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April 21st)		
Bellary . .	*Nil*	Standing dry crops generally good, and wet crops in parts of two taluks generally good, but water insufficient to support them; harvest wet and dry crops, yield average; cotton average; rest about average. Fever in one, guinea-worm in two, and cattle-disease in three taluks.
Kurnool . .	*Nil*	Standing second crop paddy good; harvest paddy and cotton, yield paddy full and cotton below average. Small-pox and cattle-disease in three taluks.
Ganjam . .	*Nil*	Slight small-pox in six, fever in five, and cattle-disease in four taluks; 1 death from cholera. Average number employed on Chilka canal 1,154.
Kistna . .	*Nil*	Slight fever, small-pox, and guinea-worm prevalent; deaths from cholera in five taluks unreported last week 37, this week 32; cattle-disease in one village.
Chingleput (Madras) .	*Nil*	Standing crops generally fair, except in parts of one taluk, where they are withering; harvest paddy and *ragi*, yield below average. Small-pox and measles in one and cattle-disease in three taluks.
Coimbatore . .	·02	Standing crops good; harvest wet and dry grains, outturn generally above average. Fever in one and small-pox in parts of three taluks.
Tanjore . .	*Nil*	Standing crops generally good, except in one taluk where rain is wanted; harvest wet and dry crops, outturn below average.
Madras . .	·95	Harvest paddy, yield about average. Fever in one taluk.
Malabar . .	·83	Third crop cultivation progressing. Fever in one and slight small-pox in nine taluks; 89 deaths from cholera in two taluks.
Travancore . .	·44	Harvest paddy, yield average. Fever in parts and small-pox spreading.
		General Remarks.—General prospects fair.
Bombay—(April 21st)		
Kurrachee . .	*Nil*	River at Kotri on 19th, 8 feet 6 inches against 12 feet 4 inches on same date last year. *Rabi* harvesting completed in three talukas; *kharif* sowing progressing in three talukas. Fever in six and cattle-disease in two talukas; 4 cases of small-pox recovered, 1 remaining. Prices—wheat, red rice, and *bajri* in Kurrachee 26, 30 and 34, in Ghorabari *nil*, 40 and 36, in Sujawal 24, 46 and 42, and in Dadu 32, 52 and 42 pounds per rupee, respectively.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Hyderabad . .	*Nil*	*Rabi* crops are being trodden in some talukas; harvesting is also going on still. River at Kotri on 9th, 8 feet 6 inches against 12 feet 4 inches on same date last year. Fever in four, small-pox in three, and cattle-disease in four talukas. Wheat 25, *juari* 40, *bajri* 38, white rice 19, and red rice 30 pounds per rupee.
Ahmedabad . .	*Nil*	Reaping of *rabi* crops nearly completed. Public health good. Wheat 35 and *bajri* 33 pounds per rupee.
Baroda . .	*Nil*	Public health generally good; small-pox abating in Baroda city. Standing crops in good condition. Prices—*bajri* 29, wheat 23 and rice 18 pounds per rupee.
Surat . .	*Nil*	Cotton-picking in progress. Fever in Bardoli and Mandvi talukas. *Juari* 38 and *nagli* 44 pounds per rupee.
Nasik . . .	*Nil*	*Rabi* threshing continues. Public health generally good. Wheat 31, *bajri* 33, and rice 20 seers per rupee.
Colaba (Bombay) .	*Nil*	Average abnormal temperature 1° warm from 14th to 16th, 1° cool from 17th to 19th, and *nil* on 20th; vapour in air defective on 14th, afterwards normal; abnormal wind northerly on 15th, 16th, 19th and 20th; wind normal on all other days.
Poona . . .	*Nil*	Harvest of *rabi* crops almost completed. Small-pox in Sirur, Purandhar, and Bhimthadi talukas; 1 cholera case in Poona city, no deaths. *Bajri* 35 and *juari* 44, in Poona *bajri* 34 and *juari* 35 pounds per rupee.
Ahmednagar . .	*Nil*	Reaping almost completed. Public health good. *Bajri* average 46 and *juari* 60 pounds per rupee.
Sholapur . .	*Nil*	Reaping of *rabi* completed in talukas; lands being prepared in Pandharpur and Malsiras talukas for *kharif* sowing. *Juari* 58 pounds 8 tolas and *bajri* 45 pounds 8 tolas per rupee.
Dharwar . .	*Nil*	Harvesting of late *juari* and cotton-picking in progress; grounds being prepared for early crops in four talukas. Scarcity of drinking-water in Karajgi, Kod, and Navalgund. Public health good. Rice 22 to 32 and *juari* 45 to 64 pounds per rupee.
Kanara . .	*Nil*	Second rice crop harvest completed on coast; sugarcane planting in progress; preparing ground for monsoon crop. Cattle-disease, fever, and small-pox in five talukas. Common rice at Karwar 14, in district average 13½ seers per rupee.
Rajkot . . .	*Nil*	Small-pox among cattle in Godka; fever and bowel complaints prevalent. Weather hot. *Bajri* 33, wheat 32, and *juari* 46 pounds per rupee.
		General Remarks.—Scarcity of drinking-water in parts of Khandesh, Belgaum, and Karwar, and of fodder in parts of Khandesh and Upper Sind Frontier. Fever and small-pox in parts of ten and cattle-disease in parts of six districts; other conditions unchanged.
Bengal—(April 21st)		
Chittagong . .	*Nil*	Weather seasonable. Winter crops being harvested. Prices steady. Small-pox continues; cholera reported from Satkhira; public health generally good.
Dacca . . .	0·94	Harvesting of *boro* paddy commenced; ploughing and sowing of *boro* rice and jute continue; prospects good. General health good.
24-Pergunnahs (Calcutta).	*Nil*	No crops on ground, except sugarcane; lands being prepared for early paddy. Common rice 15 to 18 seers per rupee. Public health generally good, though cases of cholera reported from parts of Diamond Harbour, Baraset, and Sadr subdivisions.
Moorshedabad .	*Nil*	Weather seasonable. Ploughing for next rice crop progressing in some places; sowings going on; prospects of *boro* paddy favourable. Public health fairly good, but some cases of cholera have occurred in Sadr and Lalbagh subdivision. Common rice 18 to 19 seers per rupee.
Rungpore . .	*Nil*	Rain wanted. Weeding of *aus*, *kaon*, and jute continues. Bowel complaints prevalent.
Burdwan . .	*Nil*	Rain wanted for *aus* cultivation. Price of rice 17 to 22 seers per rupee. Public health fair; cattle-disease in Cutwa subdivision.
Bhagalpur . .	*Nil*	Ploughing in progress; some *moong* and *dhan* already sown; prospects good. Public health good. Rice 17 seers 10 chittacks per rupee.
Purneah . .	*Nil*	Crops good; *rabi* being harvested. Coarse rice 20 seers per rupee. Public health good, except some cholera in Anarcali subdivision.
Patna . .	*Nil*	Harvesting of *rabi* crops almost finished; *rahar* still being reaped in some places; cotton flowering. Public health good.
Dhurbhunga . .	*Nil*	Threshing of *rabi* continues. *Moong*, early paddy, and indigo coming on well. Rain wanted. Prices rising slightly. Public health good.
Hazaribagh . .	*Nil*	Weather very warm, with strong winds. Sugarcane doing well; *mohua* yielding fairly. General health good.
Cuttack . .	*Nil*	Weather hot. *Dalua* rice being reaped; ploughing in progress. Price of rice unchanged. Public health generally good.
Midnapore . .	*Nil*	Land being prepared for rice; *boro* paddy being harvested. Public health generally good.
Khoolna . .	*Nil*	Weather hot. Yield of *boro* paddy good. Ploughing continues. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Dinagepore . .	*Nil*	Weather hot; winds changeable. Rain wanted. Cholera in Rajarampore.
Pubna (Serajganj) .	*Nil*	Crops doing well. Cholera not increasing.
Gya . .	*Nil*	Sugarcane and *china* doing well; no other crops on ground. Prices steady. Public health good.
Chumparun . .	*Nil*	*Rabi* harvest nearly completed; opium weighment progressing. Prices stationary. Public health good.
		General Remarks.—More rain in Dacca; none in other reporting districts. Sugarcane, *cheena*, and indigo doing well. Ploughing and sowing of *aus* rice and jute going on, but rain wanted in some districts. *Boro* rice being harvested, with prospect of good outturn. Cholera prevalent in some localities, otherwise public health good. Prices of rice remain stationary.
N. W. Provinces and Oudh—(April 21st)		
Benares (April 20th)	*Nil*	Heat rapidly increasing. *Rabi* all cut; threshing going on; average outturn of *rabi* a twelve-anna crop. Supplies sufficient. Prices slightly fluctuating. Some cases of cholera and small-pox reported, otherwise health generally good; no cattle-disease in the district.
Gorakhpur („ 19th)	*Nil*	Threshing in full progress; opium weighments commenced. Prices stationary. Health fair.
Fyzabad („ 20th)	*Nil*	Weather seasonable. Threshing and winnowing in progress; opium collection completed. Supplies ample. Health good.
Lucknow („ 19th)	*Nil*	Weather warm; strong west wind. Threshing and winnowing in progress; opium collection finished; melon crop is being watered. Supplies ample. Prices stationary. Health of people as well as the condition of cattle good.
Rae Bareli („ „)	*Nil*	Weather seasonable, with high westerly winds. Harvesting of *rabi* crop continues. Markets well supplied. Prices fluctuating. General health good.
Allahabad („ 20th)	*Nil*	Wind westerly; weather getting hotter daily. *Rabi* harvested. Markets fully supplied. Prices steady. Occasional cases of small-pox and fever reported, otherwise health good.
Cawnpore („ 19th)	*Nil*	Weather getting hotter. *Rabi* cut; threshing and winnowing in progress. Prices steady. Condition of people and cattle good.
Farakhabad („ 20th)	*Nil*	Weather seasonable. Crops all cut. New grain coming to market. Health of people good.
Sitapur („ „)	*Nil*	Strong westerly winds have prevailed during the week, but weather is seasonable. New grain is reaching the market. No sickness is reported.
Bareilly . („ „)	*Nil*	Harvest almost completed. Prices steady. Fine weather with strong hot west winds during the day. Public health normal.
Banda („ „)	*Nil*	Harvest operations almost completed. Prospects fair. Prices slightly lower. Public health good; cattle-disease in four villages.
Kumaon („ „)	*Nil*	Weather fine. *Rabi* crops ripening. Ploughing for *kharif* commenced. Prices falling. 10 deaths reported from *mahamari* and small-pox; cattle-disease abating.
Agra („ 19th)	*Nil*	*Rabi* harvesting continues. Prices steady. Health good.
Jhansi („ „)	*Nil*	Weather getting warm. Cutting of *rabi* crops completed; threshing in progress. Prices steady. Health of people good; cattle-disease in one village.
Ballia („ „)	*Nil*	Weather clear; heat increasing; wind westerly. Threshing of *rabi* crops continues; sugarcane sowings nearly finished. Supplies ample. General health good.
Meerut („ 20th)	*Nil*	Seasonable weather, with west wind. *Rabi* harvest in full progress; great disappointment about the wheat crop, which has been seriously affected and is expected to be only a ten-anna or at the outside a twelve-anna crop; outturn is small and quality of grain poor; cane and indigo sowings commenced. Prices stationary. General health good.
		General Remarks.—Weather seasonable. Harvesting operations progressing. Supplies ample. Prices generally steady. Public health and condition of cattle good.
Punjab—(April 21st)		
Delhi (April 20th)	*Nil*	Health good. Prices fluctuating.
Hissar . .	*Nil*	Health good. Prices stationary.
Umballa . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Jullundur . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Amritsar . .	·20	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . .	*Nil*	Health good. Prices stationary.
Ferozepore . .	*Nil*	Health good. Prices rising. Prospects of current harvest good.
Lahore . .	*Nil*	Health good. Prices almost stationary. Prospects of current harvest good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Rawalpindi	*Nil*	Health good. Prices stationary. Prospects of current harvest average.
Shahpur	*Nil*	Health good. Prices stationary.
Mooltan	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Dera Ismail Khan	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Peshawar	·20	Health fair. Prices falling.
		General Remarks.—Rain has fallen in the Peshawar and Amritsar districts. Health good. Prices rising in the Ferozabad and falling in the Peshawar district, elsewhere stationary. Prospects of current harvest good; harvest in progress in the Hissar and Delhi districts.
Central Provinces—(April 21st)		
Nagpur	*Nil*	Weather hot. Threshing almost completed. Fever, small-pox, and cattle-disease in places. Prices steady.
Jubbulpore	.....	No report received.
Saugor (April 20th)	*Nil*	Weather hot and windy. Reaping and threshing progressing; prospects good. Health good.
Seoni	*Nil*	Weather cloudy. Threshing in progress. Cattle-disease in places. Health good. Prices easier.
Hoshangabad	*Nil*	Weather seasonable. Winnowing continues. Small-pox in places. Wheat 15½ and rice 9½ seers per rupee.
Khandwa	*Nil*	Weather warm, with high winds. Threshing nearly completed. Health fair. Prices steady.
Raipur	*Nil*	Weather hot. Threshing continues. Cholera and cattle-disease in places. Wheat 30 and rice 21 seers per rupee.
Sambalpur	*Nil*	Weather cloudy and warm. Sugarcane planting progressing. Cholera in parts. Rice 26 seers per rupee.
		General Remarks.—Weather hot. Threshing and winnowing in progress. Cholera and small-pox, with some cattle-disease in places. Prices steady.
British Burma—(April 21st)		
Akyab	*Nil*	Public health good; cattle healthy.
Bassein	*Nil*	A few deaths from cholera in town and district; cattle-disease in one township.
Rangoon	*Nil*	Public health good; cattle healthy.
Amherst (Moulmein)	*Nil*	Public health good; cattle healthy.
Pegu	*Nil*	Public health and health of cattle good.
Henzada	*Nil*	Public health good; cattle-disease in one township.
Prome	*Nil*	Public health good; cattle healthy.
Toungoo	*Nil*	Public health and health of cattle good.
Thayetmyo	*Nil*	Public health and health of cattle good.
		General Remarks.—Slight cholera in two districts, elsewhere public health good; cattle-disease slight in five districts, elsewhere health of cattle good.
Assam—(April 21st)		
Gauhati	·36 during the week ending 20th instant.	Weather hot and windy. Cholera prevalent in station Gauhati and in Luki tahsil; cattle-disease reported from some mauzahs. Sowing of *ahu* paddy still in progress.
Sylhet	3·70	Some damage is reported to have been done by the rains to *boro* paddy in Habiganj, otherwise state and prospects good. Cattle-disease and cholera prevailing in part of district.
Cachar	3·29	Weather warm. Ploughing for *asra* crops continues. Common rice 13 seers and 5½ chittacks per rupee. 2 deaths from cholera reported from Katigora; general health good.
Dibrugarh	2·99	Weather fair. *Ahu dhan* being sown and sugarcane being pressed; prospects good. Cholera still prevalent in North Lakhimpur.
Mysore and Coorg—(April 21st)		
Bangalore	Rain in the civil and military station and in the Bangalore and Tumkur districts.	Standing crops in good condition, except in parts of the Bangalore and Kolar districts. Supply of water and fodder diminishing in parts of the Maidan districts. Prospects of season fair in Kadur district. Rain is much needed for coffee planting. Public health generally good; cattle-disease prevalent in parts of the Bangalore, Kolar, and Shimoga districts. Prices slightly fallen in the Mysore, Shimoga, and Kadur districts.
Mysore	·63	Prices of foodgrains slightly fallen. Prospects of season and public health good.
Mercara		
Berar and Hyderabad—(April 21st)		
Amraoti	*Nil*	Weather clear and hot. Preparations for ensuing *kharif* sowings continue. Wheat 22 and *juari* 26 seers per rupee.
[illegible]	*Nil*	Weather getting warm. Preparations for *kharif* sowings progressing.
[illegible]	Average ·89	*Tabi* crops prospering. Heat excessive. Fever still prevalent. Prices—wheat 15, coarse rice 12, white *juar* 22, yellow *juar* 24 and 15½ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(April 21st)		
Indore	*Nil*	Weather seasonable. Health good. Water scarce.
Morar (Gwalior)	*Nil*	Weather seasonable. Small-pox still in Lashkar.
Sutna	*Nil*	Weather clear and hot. Health and prospects good.
Neemuch	*Nil*	Weather warm. Health and prospects good.
Gooma	*Nil*	Health good.
Agra	*Nil*	Health and prospects good.
Sehore	*Nil*	Weather clear. Health good.
Nowgong	*Nil*	Weather seasonable; nights and mornings cool. Prices easier. Health good.
Bhopawar (Manpur)	*Nil*	Health and prospects fair.
Rajputana—(April 21st)		
Abu (April 21st)	*Nil*	Weather seasonable; nights cold.
Sirohi („ 18th)	*Nil*	No water in tanks; wells good. Health good. Weather fine and warm.
Marwar („ 16th)	*Nil*	Tanks almost half full. Health good; small-pox disappearing. Crops being harvested. Weather not so hot as last week; nights cooler and close. Prices stationary.
Kherwara („ 18th)	*Nil*	Tanks and wells drying. Reaping and threshing in progress. Health good; prices steady. Weather seasonable; heat increasing.
Meywar („ 17th)	*Nil*	Tanks and wells low. Crops being reaped. Health very good. Prices stationary. Weather seasonable.
Pertabgurh („ „)	*Nil*	Tanks and wells drying. Wheat and opium slightly damaged. Health good. Prices average. Hot season set in.
Harowti („ „)	*Nil*	Weather seasonable. Crop outturn somewhat below average. Health good. Prices stationary.
Jhallawar („ 16th)	*Nil*	Weather seasonable. Crops stocked. Opium collected.
Kotah („ 17th)	*Nil*	Harvesting almost completed. Fever and small-pox still prevalent. Prices falling.
Ajmere („ 20th)	*Nil*	Tanks and wells diminishing. Fever and small-pox in parts of district; no cattle-disease. Crops being reaped. Heat increasing; nights cool.
Jeypore („ 17th)	*Nil*	Weather warm. Harvest good.
Ulwur („ 20th)	*Nil*	Harvesting continues. Water in wells failing. Fever in four tahsils; small-pox in two. Prices easy.
Bickanir („ 17th)	*Nil*	Fever and small-pox in district. Prices stationary. Weather warm.

(*Statistical Branch*).

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 28th APRIL, 1886.

GENERAL REMARKS.—More rain has been reported from Assam, and there have also been showers in places in the south of the peninsula. With the exception of the Rawalpindi and Peshawar districts of the Punjab, no rain has fallen in Upper and Central India.

In Madras and, except in the Kolar district, in Mysore the standing crops are generally in good condition, and the harvest in progress promises a fair outturn. In Coorg prospects are good.

The *rabi* harvest and the picking of cotton have been nearly completed in Bombay, and preparations for the *kharif* have commenced in that Presidency and in Berar. In Hyderabad, Central India, and Rajputana prospects are generally favourable, though water is scarce in places.

In the Central Provinces the *rabi* is being threshed and winnowed, and ploughing for the *kharif* has begun in places. The *rabi* harvest is in progress in the Punjab, and has been nearly completed in the North-Western Provinces and Oudh. Prospects are good in both Provinces.

In Bengal generally rain is much wanted for crops on the ground and for *aus* cultivation. The *boro* rice is being harvested, with a good outturn. In Assam ploughing and sowing are in progress, and prospects are generally favourable.

The public health is generally fair, though small-pox and cholera are reported from most Provinces.

Prices are rising in the Umballa, Ferozepore, and Lahore districts of the Punjab and in Coorg, and are falling in Peshawar. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April 28th)		
Bellary	*Nil*	Standing dry crops generally good, and wet crops in parts of two taluks generally good, but water insufficient to support them. Harvest cotton, *cholum* and sugarcane, outturn cotton average, rest about average. Cattle-disease in two taluks.
Kurnool	·05	Standing second crops paddy good; harvest paddy and cotton, yield paddy average, cotton below average. Small-pox in three and cattle-disease in four taluks.
Ganjam	*Nil*	Slight small-pox in five, fever in three, and cattle-disease in six taluks; cholera prevailing. Average number employed on Chilka canal 364; desertion of coolies due to cholera.
Kistna	*Nil*	Slight fever and small-pox; cholera in five taluks and two divisions.
Chingleput (Madras)	*Nil*	Standing crops generally fair, except in parts of one taluk, where they are withering. Harvest paddy and *ragi*, yield below average. Cattle-disease in one taluk.
Coimbatore	Average ·18	Standing crops good; harvest paddy and *cholum*, outturn paddy generally above average, *cholum* average. Fever in one and slight small-pox in parts of four taluks.
Tanjore	*Nil*	Standing crops generally good, except in one taluk, where rain is wanted. Harvest wet and dry crops, outturn below average.
Madura	Average ·12	Harvest paddy, yield about average. Slight small-pox in one and fever in two taluks.
Malabar	Average ·48	More rain wanted for third crop cultivation. Fever in one, slight small-pox in nine, and cholera in three taluks.
Travancore	1·36	Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(April 28th)		
Kurrachee	*Nil*	River at Kotri on 25th, 8 feet 1 inch against 12 feet 2 inches on same date last year. Fever in six and cattle-disease in three talukas; one remaining case of small-pox recovered. Prices—wheat, red rice, and *bajri* in Kurrachee, 26, 30 and 34, in Sakro *nil*, 38 and 48, in Jati 21, 40 and 42, and in Manjhand 32, 36 and 38 pounds per rupee, respectively.
Hyderabad	*Nil*	Harvesting is still going on in some talukas; corn is being removed from fields. River at Kotri on 26th, 7 feet 10 inches against 11 feet 8 inches on same date last year. Fever in three, cattle-disease in one, and small-pox in two talukas. Wheat 25, *juari* 40, *bajri* 37½, white rice 19, and red rice 30 pounds per rupee. Days and nights very warm.
Ahmedabad	*Nil*	Reaping of *rabi* crops completed. Public health good. Wheat 35 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Public health good. Standing crops in good condition. Prices—*bajri* 28, wheat 23, and rice 18 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	*Nil*	Cotton-picking almost completed. Slight fever and cough in Bardoli taluka. *Juari* 38½ and *nagli* 46 pounds per rupee.
Nasik	*Nil*	*Rabi* threshing nearly completed. Public health generally good. Wheat 31, *bajri* 38, and rice 20 pounds per rupee.
Colaba (Bombay)	0·01 on 23rd	Average abnormal temperature *nil*; vapour in air excessive; abnormal wind southerly from 23rd to 25th and on 27th, wind normal on all other days; distant lightning on 22nd and 23rd.
Poona	*Nil*	Harvesting of *rabi* almost completed. Small-pox in Sirur and Purandhar talukas. *Bajri* 35 and *juari* 45, in Poona *bajri* 34 and *juari* 37 pounds per rupee.
Ahmednagar	*Nil*	Reaping almost completed. Public health good. *Bajri* average 46 and *juari* 61 pounds per rupee.
Sholapur	*Nil*	Land being prepared for *kharif* sowing. Sky clouded and weather very sultry. *Juari* 55 pounds 32 tolas and *bajri* 44 pounds 32 tolas per rupee.
Dharwar	Navalgund, ·50; Hangal, ·30; Karajgi, ·05.	Ground being prepared for early crops; harvesting of late *juari* and cotton-picking nearly completed. Scarcity of drinking-water in Navalgund, Gadag, Karajgi, and Kod. Cattle-disease in Bankapur; public health good. Rice 22 to 32 and *juari* 45 to 60 pounds per rupee.
Kanara	Haliyal, ·48	Sugarcane planting in progress; preparing ground for monsoon crop. Fever, cattle-disease, and small-pox prevalent in five talukas. Weather hot and cloudy. Common rice at Karwar 14, in district average 13½ seers per rupee.
Rajkot	*Nil*	Weather hot, Health generally good. Wheat 35, *bajri* 32, and *juari* 45 pounds per rupee.
		General Remarks.—Slight rain in parts of Dharwar, Belgaum, and Kanara. Small-pox and cattle-disease in parts of 9 and fever in parts of 8 districts. Other conditions unchanged.
Bengal—(April 27th)		
Chittagong	0·18	Weather cloudy, with foggy mornings. Winter crops harvested, outturn fair. Prices stationary. Small-pox continues; fever reported from Cox's Bazaar. Public health generally good.
Dacca	*Nil*	Prospects of crops favourable; paddy and jute being sown; harvesting of *boro* paddy commenced. Sporadic cases of cholera reported.
24-Pergunnahs (Calcutta).	*Nil*	No crops on ground, except sugarcane, which is doing well. Lands being prepared for paddy. Public health generally good.
Moorshedabad	*Nil*	Weather hot and seasonable. Ploughing for *aus* crop suspended. Rain wanted. Sporadic cases of cholera reported. Public health good.
Rungpore	*Nil*	Prospects of *aus* and jute good, but rain wanted. Sporadic cases of cholera reported from the interior. Bowel complaints increasing.
Burdwan	*Nil*	Rain much wanted for *aus* rice cultivation. Public health fair.
Bhagalpur	*Nil*	Rain wanted. Sugarcane only on ground. *Mohua* crops shorter than expected.
Purneah	*Nil*	*Rabi* outturn very good. Cultivation of jute and *bhadoi* rice delayed for want of rain. Public health good, except in Awariah where cholera prevails.
Patna	*Nil*	Reaping of *rahar* still continues; gathering of castor going on; sowing of *cheena* progressing. Public health good.
Dhurbhunga	*Nil*	Threshing of *rabi* continues; *rahar* gathering, with fairly good outturn. Rain urgently wanted for early paddy and *moong*. Prices rising. Public health good.
Hazaribagh	*Nil*	Weather hot and oppressive. *Mohua* yielding well; no other crops to report about. General health good.
Cuttack	*Nil*	Weather hot. Reaping of *dalua* rice continues; ploughing in progress. Price of rice unchanged. Public health generally good.
Midnapore	*Nil*	*Boro* harvest nearly completed, outturn generally good. Rain wanted. Public health fair.
Khoolna	*Nil*	Weather hot. *Boro* rice harvest continues, ploughing for *aus* and *amun* rice going on. A little cholera in Bagirhat; public health fair.
Dinagepore	*Nil*	Weather hot. Rain wanted for ploughing. Cholera in several thanas.
Pubna (Serajganj)	0·27	Crops good. Cholera prevalent at head-quarters.
Gya	*Nil*	Sugarcane and *cheena* in good condition. Prices moderate. Public health good.
Chumparun	*Nil*	*Rabi* harvest nearly completed. Weighment of opium progressing. Prices stationary. Public health good.
		General Remarks.—Slight rain in Dacca, Pubna, Darjeeling, and parts of Julpaigori, but none in other districts; rain generally much wanted for crops on ground and for cultivation of *aus* rice and jute. *Boro* rice being harvested, with generally a good outturn; *mohua* harvest in Bhagulpore and Chota Nagpur divisions fair. General health good, though cholera prevalent in some places. Price of rice generally almost stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—(April 29th)		
Gorakhpur (April 26th)	*Nil*	Threshing progressing, outturn good. Opium weighment in full progress. Weather hot. Health fair; some small-pox. Prices stationary.
Fyzabad („ 27th)	.....	Weather hot, with westerly wind. Sowing of *sawan*, *chinwa*, indigo, and sugarcane commenced. Health of men and cattle fair.
Allahabad („ „)	*Nil*	Wind westerly; heat increasing. *Rabi* crops being stored and sugarcane irrigated; supplies ample. Prices falling slightly. Occasional cases of fever and small-pox, otherwise health good.
Farakhabad („ „)	*Nil*	Opium weighments commenced, estimated yield 20 per cent. below last year's; grain being threshed out; indigo and cane being irrigated. Health of people fair.
Bareilly („ „)	*Nil*	Harvest cut; sugarcane sowings going on. Prices steady. Public health normal. Weather clear and hot.
Banda („ „)	*Nil*	*Rabi* harvest almost completed; prospects fair. Public health good; cattle-disease in four villages. Prices stationary.
Kumaon („ 28th)	*Nil*	Weather fine. *Rabi* crops nearly ripe; rice sowing commenced. *Mahamari* and measles in some villages; cattle-disease on the decrease. Prices falling.
Meerut („ 27th)	*Nil*	Hot westerly wind. *Rabi* harvest approaching completion; last week's estimate of wheat crop confirmed; it will not be over twelve annas if as much crops on dry land give better returns; indigo and cane sowings in progress, and crops germinating well. Some fever about, otherwise health good. New grain coming into market, but prices unaltered yet.
		General Remarks.—Weather seasonable. Harvesting nearly completed; supplies ample. Prices generally steady. Health of people and condition of cattle generally good.
Punjab—(April 28th)		
Delhi (April 27th)	*Nil*	Health good. Prices fluctuating.
Hissar	*Nil*	Health good. Prices slightly falling.
Umballa	*Nil*	Health good. Prices rising. Prospects of current harvest good.
Jullundur	*Nil*	Health good. Prices stationary. Prospects of the current harvest good.
Amritsar	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot	*Nil*	Health good. Prices stationary.
Ferozepore	*Nil*	Health good. Prices rising. Prospects of current harvest average.
Lahore	*Nil*	Health good. Prices slightly rising.
Rawalpindi	·30	Health good. Prices stationary. Prospects of current harvest average.
Shahpur	*Nil*	Health good. Prices almost stationary. Prospects of current harvest good.
Mooltan	*Nil*	Health good. Prices stationary.
Dera Ismail Khan	*Nil*	Health good. Prices almost stationary. Prospects of current harvest good.
Peshawar	1·0	Health good. Prices falling. Prospects of current harvest good.
		General Remarks—Rain has fallen in the Rawalpindi and Peshawar districts. Health of the province good. Prices of foodgrains rising in the Umballa, Ferozepore, and Lahore districts and falling in the Peshawar district; elsewhere stationary. Prospects of current harvest good; harvest in progress.
Central Provinces—(April 28th)		
Nagpur	*Nil*	Weather hot and cloudy. Ground being prepared for *kharif* sowings. Fever, small-pox and cattle-disease prevalent. Prices stationary.
Jubbulpore	*Nil*	Days hot. Threshing and winnowing well in hand. Health good. Prices steady.
Saugor (April 27th)	*Nil*	Weather hot and windy. Threshing continues. Prices fallen. Fever and small-pox prevalent.
Seoni	*Nil*	Weather cloudy and hot. Threshing and winnowing in progress; ground being prepared for *kharif* sowings. Slight small-pox. Prices steady.
Hoshangabad	*Nil*	Weather hot. Winnowing continues. Small-pox and cattle-disease in places. Prices steady.
Khandwa	*Nil*	Weather warm and cloudy. *Kharif* preparations continue. Health fair. Prices stationary.
Raipur	*Nil*	Weather cloudy and hot. Threshing continues. Cholera increasing; small-pox and cattle-disease in places. Rice 24 seers per rupee.
Sambalpur (April 24th)	*Nil*	Weather warm. Sugarcane planting completed. Cholera in parts. Trade brisk. Prices stationary.
		General Remarks.—Weather hot and rather cloudy. *Kharif* ploughings commenced in places. Cholera prevalent in Raipur and small-pox in a few districts. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—(April 28th)		
Akyab . (April 24th)	*Nil*	Public health good ; cattle healthy.
Bassein . . .	*Nil*	Slight cholera in town ; cattle healthy.
Rangoon . .	*Nil*	Public health good ; cattle healthy.
Amherst (Moulmein) .	*Nil*	Public health good ; cattle healthy.
Pegu . . .	*Nil*	Public health good ; cattle healthy.
Henzada . .	*Nil*	Public health good ; cattle-disease in one township.
Prome . . .	*Nil*	Public health and health of cattle good.
Toungoo . .	*Nil*	Public health and health of cattle good.
Thayetmyo . .	*Nil*	Public health and health of cattle good.
		General Remarks.—Slight cholera in Bassein and Thongwa districts ; elsewhere public health good ; slight cattle-disease in the Tharrawaddy, Henzada, and Amherst districts ; elsewhere cattle healthy.
Assam—(April 28th)		
Gauhati (April 27th) .	1·68	Weather hot. Cholera prevalent in station Gauhati and in Luki tahsil ; cattle-disease still exists in some mouzas. Sowing of *ahu* paddy nearly finished ; planting of sugarcane commenced.
Sylhet . .	·56	State of crops good. Prospects favourable.
Cachar . .	*Nil*	Weather warm. Ploughing for *asra* crops retarded for want of rain. Common rice 13 seers 5¼ chattaks per rupee. Three deaths from cholera from Sadr and seven from Katigora reported.
Dibrugarh . .	3·52	Weather seasonable. Pressing of sugarcane nearly finished. Sowing of *ahu dhan* continues, and land being prepared for *sali dhan*. Cholera still prevalent in North Lakhimpur.
Mysore and Coorg—(April 28th)		
Bangalore . .	Rain, varying from ·15 to ·80, fell in four talukas of the Shimoga district; slight rain is reported in the Mysore and Tumkur districts, and in parts of the Bangalore and Kolar districts.	Rain is needed in Kolar for the coffee plantations. Standing crops need water, and fodder is diminishing ; elsewhere crops are generally in good condition. Season prospects fair. Public health good, except that there are cases of small-pox in some talukas of Bangalore and Tumkur, and cattle-disease in parts of the Bangalore and Shimoga districts. No material change in prices.
Mysore . .		
Mercara . .	*Nil*	Prices of foodgrains slightly risen. Prospects of season and public health good ; fever prevalent in Nanjarajapatna taluk.
Berar and Hyderabad—		
Amraoti (April 28th) .	*Nil*	Weather hot. Fields are being prepared for the next season. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	*Nil*	Weather hot. Preparations for the ensuing sowing are being made.
Hyderabad . .	·05	Total rainfall since 1st January last ·17. Standing crops prospering. General health of talukas fair. Prices—wheat 15¼, coarse rice 10¾, white *juar* 21½, yellow *juar* 12, and *tur* 15¼ seers per current sicca rupee.
Central India States—(April 28th)		
Indore . . .	*Nil*	Weather very warm and cloudy.
Morar (Gwalior) .	*Nil*	Weather seasonable.
Sutna . .	*Nil*	Weather cloudy and very hot. Health and prospects good.
Neemuch . .	*Nil*	Weather very warm. Water rather scarce. Health good.
Goona . . .	*Nil*	Weather getting warm. Health good.
Agra . . .	*Nil*	Health and prospects fair.
Sehore . . .	*Nil*	Weather clear. Health good.
Nowgong . .	*Nil*	Weather normal. Days are hotter. Health good.
Rajputana—(April 28th)		
Abu (April 28th)	*Nil*	Weather seasonable and warmer ; latterly slightly cloudy.
Sirohi („ 25th)	*Nil*	Tanks dry ; wells fair. Health good. Weather fine and hot.
Marwar („ 23rd)	*Nil*	Tanks almost half full. Health good. Crops being gathered. Winds hot; weather sometimes close and oppressive ; heat increasing. Prices stationary.
Kherwara („ 25th)	*Nil*	Tanks and wells drying. Crops being reaped ; threshing in progress. Health good. Prices steady. Heat increasing.
Mewar („ 24th)	*Nil*	Tanks and wells low. Crops gathered. Health very good. Prices stationary. Weather seasonable.
Harowti („ 24th)	*Nil*	Weather hot. Threshing and winnowing in progress. Health good.
Jhallawar („ 23rd)	*Nil*	Weather hot. Health fair.
Kotah („ 24th)	*Nil*	Harvest being gathered. Weather hot and seasonable.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—*contd.*		
Ajmere (April 27th)	*Nil*	Tanks and wells decreasing. Heat increasing. Slight fever and small-pox in district. Reaping operations over.
Jeypore („ „)	*Nil*	Harvesting almost completed, fair outturn expected. Prices risen.
Kerowlee („ 24th)	*Nil*	Tanks and wells dry. Harvesting finished. Prices rising.
Dholepore („ „)	*Nil*	Tanks and wells decreasing. Harvesting finished. Prices stationary. Health good.
Bhurtpore („ „)	*Nil*	Tanks and wells full. Harvesting continues. Health good. Prices steady.
Ulwur („ 27th)	*Nil*	Harvesting almost completed. Small-pox and fever continue in parts. Prices steady.
Bickanir („ 24th)	*Nil*	Fever in two districts. Prices stationary. Weather warmer.
Nepal—(April 23rd)		
Katmandu (April 22nd)	·05	Prospects of the crops good.

C. J. LYALL,
Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch.)

D. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 5th MAY, 1886.

GENERAL REMARKS.—Slight rain has fallen throughout Southern India and most parts of Bengal and British Burma. In Assam the fall has been heavy. With the exception of a few showers, Northern and Central India have been rainless.

In the Madras Presidency, with the exception of the Ganjam district, agricultural prospects continue fair. In Mysore the standing crops promise well on the whole, though rain is wanted in some parts. In Coorg prospects are good.

In Bombay the *rabi* harvest is approaching completion, and preparations for the *kharif* are in progress in that Presidency and in Berar. In Hyderabad, Central India and, with the exception of Ajmere, Rajputana agricultural prospects continue generally good.

The *rabi* harvest is still in progress in the Central Provinces and has been nearly completed in the North-Western Provinces and Oudh. Ploughing for *kharif* cultivation has commenced in some districts in the Central Provinces. In the Punjab the *rabi* harvest is in progress and promises well.

The recent rain in Bengal has been very beneficial to the crops, and the *aus* rice and jute where sown are coming up well. Sugarcane, indigo, and *cheena* are thriving. The *boro* rice harvest is proceeding, with a good outturn. Seasonable weather prevails in Assam, where ploughing and sowing are still in progress.

Seasonable weather prevails in British Burma.

The public health is generally fair.

Prices are fluctuating in the Punjab, rising in Mysore, and falling in Coorg. Elsewhere they are for the most part stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 5th)		
Bellary	**Average ·19**	**Standing dry crops generally good, and wet crops in parts of one taluk generally good, but water insufficient to support them; harvest sugarcane, cotton, and white *cholum*, yield about average. Cattle-disease in three taluks.**
Kurnool	Average ·03	Standing second crop paddy good; harvest paddy, outturn average. Small-pox and cattle-disease in three taluks.
Ganjam	Average ·07	Fever in one and small-pox and slight cattle-disease in five taluks; cholera prevailing. Average number employed on Chilka canal 297.
Kistna	*Nil*	Fever in some taluks; cholera in all taluks but one; and cattle-disease in one village.
Chingleput (Madras)	*Nil*	Standing crops fair, except in parts of two taluks, where withering; harvest wet and dry grains, outturn below average. Small-pox in one and cattle-disease in three taluks.
Coimbatore	Average ·23	Standing crops good; harvest paddy and *cholum*, outturn paddy generally above average and *cholum* average. Fever in one taluk and small-pox in two villages.
Tanjore	Average ·02	Standing crops good, except in one taluk, where rain is much wanted; harvest wet and dry crops, outturn below average. Cholera in one taluk.
Madura	Average ·91	Harvest paddy, yield above average. Small-pox prevailing in one taluk.
Malabar	Average ·72	Harvest third crop paddy, outturn below average. Fever in one, slight small-pox in nine, and cholera in two taluks.
Travancore	1·35	Small-pox and fever in parts. *General Remarks.*—General prospects fair, except in Ganjam, where the season is unsatisfactory.
Bombay—(May 5th)		
Kurrachee	*Nil*	River at Kotri on 3rd, 9 feet 2 inches against 11 feet on same date last year. *Rabi* harvesting continues. Fever in four and cattle-disease in two talukas. Wheat, red-rice, and *bajri* in Kurrachee 26, 30 and 34, in Tatta 26, 40 and 40, in Shahbandar 20, 42 and 44, and in Kotri 26, 38 and 38 pounds per rupee, respectively.
Hyderabad	Slight rain	*Rabi* harvest is being trodden in the Nausharo subdivision; preparations for *kharif* cultivation in progress in other subdivisions of the district. River at Kotri on 3rd, 9 feet 2 inches against 11 feet on same date last year. Fever in five and small-pox and cattle-disease in four talukas. Wheat 25, *juari* 40, *bajri* 38, white rice 19 and red rice 30 pounds per rupee. Weather cloudy.
Ahmedabad	*Nil*	Reaping of *rabi* crops completed. Public health good. Wheat 38 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda . .	*Nil*	Public health good; small-pox and measles prevail in Naosari town; cattle-disease in Kamrij taluka of Naosari division. Standing crops in good condition. *Bajri* 29, wheat 22, and rice 17 pounds per rupee.
Surat . . .	*Nil*	Cotton-picking completed in all talukas, save Bardoli. Slight fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik . . .	Slight rain at Sinnar, Niphad, Chandor, and Yeola.	*Rabi* crop threshing almost completed; land being prepared for the next year's crop in Igatpuri taluka. Public health generally good. Wheat 34, *bajri* 33, and rice 17 pounds per rupee.
Colaba (Bombay) .	*Nil*	Average abnormal temperature warm; vapour in air excessive from 28th to 2nd, afterwards normal; wind normal; distant lightning from 28th to 1st.
Poona . . .	Rain in Kod, Purandhar, Bimthadi, and Haveli talukas; in Poona hailstorm and rain, the rainfall was about 2·50.	*Rabi* harvest almost completed. Small-pox in Sirur and Purandhar talukas. *Bajri* 34 and *juari* 44, in Poona *bajri* 32 and *juari* 35 pounds per rupee.
Ahmednagar . .	Nagar, ·22	Reaping almost completed. Public health good. *Bajri* average 45 and *juari* 60 pounds per rupee.
Sholapur . .	Sholapur, ·03; Karmala, ·32.	Land being prepared for *kharif* sowing. *Juari* 57 pounds 19 tolas and *bajri* 44 pounds 32 tolas per rupee.
Dharwar . .	Rain throughout the district; nearly 2·0 in Mugud; more than 1·0 in Gadag and Kod; nearly 1·0 in Kalghatgi, Hubli, and Navalgund; slight in others.	Ground being prepared for early crops; harvesting of late *juari* and cotton-picking nearly completed. Scarcity of drinking-water in Navalgund, Gadag, Karajgi, and Kod. Cattle-disease in Bankapur; public health good. Rice 20 to 30 and *juari* 45 to 60 pounds per rupee.
Kanara . . .	Siddapur, ·37; Sirsi, ·28; Halyal, ·48; Yellapur, ·73.	Sugarcane crops thriving; ploughing and manuring fields for monsoon crops. Cattle-disease in Bhatkal; fever and small-pox in four talukas. Common rice and Karwar 14, in district average 13¾ seers per rupee. Weather cloudy and hot on coast.
Rajkot . . .	*Nil*	Weather hot. Small-pox in Nawanagar and Ladhika; fever and bowel complaints in some parts; public health generally good. Wheat 35, *bajri* 31, and *juari* 45 pounds per rupee.
		General Remarks.—Rain in parts of Shikarpur and all districts of the Deccan and Southern Mahratta Country. Scarcity of drinking water in four talukas of Dharwar and one of Khandesh. Fever, small-pox, and cattle-disease in parts of nine districts; other conditions unchanged.
Bengal—(May 5th)		
Chittagong . .	1·84	Weather very hot until 2nd instant, since when unsettled. Prospects of crops fair. Prices unchanged. Fever continues; public health good.
Dacca . . .	*Nil*	Sowing of rice and jute going on; *boro* rice being harvested; prospects of crops good. Sporadic cholera in Manickgunj.
24-Pergunnahs (Calcutta).	*Nil*	No crops on ground, except sugarcane which is doing well; lands being prepared for early and *amun* paddy. Price of common rice 14 to 16 seers per rupee. Public health generally good; sporadic cholera in thana Baraset.
Moorshedabad . .	Some rain	Weather seasonable. *Boro* rice and indigo doing fairly well, but more rain wanted for these and for ploughing for *aus* crop. Public health fair, but a few cholera cases still continue. Price of rice stationary.
Rungpore . .	3·62	Prospects of crops favourable. Public health fair.
Burdwan . .	0·2	A recent shower has been of some benefit; rain still much wanted for agricultural operations. Price of rice 10 to 21 seers per rupee.
Bhagalpur . .	0·14	More rain wanted for cultivation and for early sowings. Price of rice 17 seers 10 chittacks per rupee.
Purneah . .	0·62	Prospects of crops good. More rain wanted to complete sowings. Price of rice 20 seers per rupee.
Patna . .	*Nil*	Reaping of *rahar* almost finished; castor gathering still going on; *cheena* sowings proceeding, and sugarcane being planted; opium weighment nearly at an end. Public health good.
Durbhunga . .	0·70	Rain has greatly benefited paddy and *mung* sowings; mango crop will be almost a failure this year. Prices rising. Public health good.
Hazaribagh . .	0·21	Weather very hot. Harvesting of *mohua* nearly completed, with good yield; mango promises fairly. A few cases of small-pox and cholera reported; public health otherwise good.
Cuttack . .	*Nil*	Weather hot, with high wind. Reaping of *dalua* continues; ploughing in progress. Rain wanted. Price of rice unchanged. Public health generally good; a few cases of cholera in the interior.
Midnapore . .	1·04	Weather stormy. *Boro* harvest completed; lands being cultivated. Public health good.
Pubna . .	1·02	Rain very useful. Sowings fast progressing. Cholera at headquarters.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Khoolna . .	1·23	Weather hot. *Boro* rice harvest continues, outturn good. More rain wanted for ploughing. Slight cholera and fever in Bagirhat. Public health fair.
Dinagepore . .	0·19	Weather unsettled and damp, with a few showers. Land being ploughed; sowing of *aus* and jute commenced. Cholera in thana Rajarampore.
Gya . .	A few drops of rain	Crops in good condition. Public health good. Prices moderate, if anything falling.
Chumparun . .	0·66	Harvesting of *rabi* completed; fields being prepared for *bhadoi* and *aghani* crops; opium weighment progressing. Prices stationary. Public health fair.
		General Remarks.—Rain, accompanied in some places by a storm, fell in most districts during the week; rain has done much good to crops on ground, and has facilitated ploughing and early sowings, but more rain still much wanted in several districts. *Aus* rice and jute where sown coming up well, and sugarcane indigo, and *cheena* thriving; *boro* rice harvest proceeding with good outturn. Price of rice generally stationary. Cholera prevalent in Nuddea and Jessore, and in places in East Bengal; otherwise public health good.
N. W. Provinces and Oudh—(May 6th)		
Benares (May 3rd)	*Nil*	Weather unaltered. Threshing and winnowing continue; fields irrigated, where practicable. Supplies ample. Prices easier. Some cholera and small-pox cases prevalent; no cattle-disease.
Gorakhpore („ „)	*Nil*	Threshing going on; opium weighment in progress. Prices stationary. Health fair; some small-pox and fever.
Fyzabad („ 4th)	*Nil*	Weather hot. Harvesting of *rabi* nearly finished; sugarcane being planted and irrigated. Health of men and cattle generally good.
Rae Bareli („ 3rd)	*Nil*	Weather at times cloudy, wind variable. Harvesting nearly finished. Supplies ample. Prices almost unchanged. General health good.
Lucknow („ „)	*Nil*	Heat increasing. *Rabi* crops nearly gathered; melons ripe, but suffered a little from a disease called *kharha*. Supplies ample. Markets well stocked. Prices steady. Health of people good; condition of cattle fair.
Partabgarh („ 4th)	*Nil*	East and west winds; weather occasionally cloudy during the week; *rabi* threshing nearly finished; fever, [illegible] and malarial fever [illegible]. Small-pox reported from [illegible]
Allahabad („ „)	*Nil*	Weather seasonable; hot winds blowing. *Rabi* nearly all [illegible]. Markets well stocked. Prices show a slight rise. Health good.
Cawnpore („ 3rd)	*Nil*	Weather very hot and close. Harvest approaching completion. Prices steady. Condition of people and cattle generally good.
Farakhabad („ 4th)	*Nil*	Threshing continues. East wind for several days. Health of people fair.
Sitapur („ „)	*Nil*	Wind variable. Harvesting going on. Prices stationary. Health good.
Bareilly („ „)	*Nil*	Weather hot and hazy, with easterly winds. Sugarcane sowings and irrigation going on. Prices fairly steady. A good deal of fever in Bareilly City.
Banda („ 3rd)	*Nil*	*Rabi* crops being threshed, outturn fair. Prices steady. Public health good; cattle-disease in parts.
Kumaon („ 4th)	*Nil*	Weather fair, with occasional storms. Prices falling. *Rabi* crops being reaped. *Mahamari* and typhus fever in some parts; cattle-disease decreasing.
Agra („ 3rd)	·10 in one pargana and slight hailstorm in two.	Harvesting nearly completed. Prices steady. Health good.
Jhansi („ „)	*Nil*	Weather getting hot. New grain coming to market. Prices almost stationary. Condition of people and cattle good.
Ballia („ 4th)	*Nil*	Strong westerly wind. Harvest operations nearing completion. Supplies ample. Health good.
Meerut („ „)	Slight rain and storms	Wind variable; weather hot and close. *Rabi* harvest nearly completed. New wheat small and shrivelled, outturn very poor; barley, gram, and peas quite up to average. Prices steady.
		General Remarks.—Weather seasonable. Harvesting almost finished. Markets well stocked. Supplies sufficient. Prices generally steady. Health of people and condition of cattle good.
Punjab—(May 5th)		
Delhi (May 4th)	·01	Health good. Prices fluctuating.
Hissar . .	*Nil*	Health good. Prices fluctuating.
Umballa . .	·39	Health good. Prices rising. Prospects of current harvest good.
Jullundur . .	·80	Health good. Prices slightly rising. Prospects of current harvest good.
Amritsar . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . .	*Nil*	Health good. Prices stationary.
Ferozepore . .	*Nil*	Health good. Prices rising. Prospects of current harvest average.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Lahore . .	*Nil*	Health good. Prices slightly falling.
Rawalpindi . .	*Nil*	Health good. Prices stationary. Prospects of current harvest average.
Shahpur . .	*Nil*	Health good. Prices falling. Prospects of current harvest good.
Mooltan . .	*Nil*	Health good. Prices rising.
Dera Ismail Khan .	*Nil*	Prices stationary.
Peshawar . .	*Nil*	Health good. Prices falling.
		General Remarks.—Rain has fallen in the Umballa and Jullundur districts. Health good. Prices of foodgrains rising in the Umballa, Jullundur, and Ferozepore and falling in the Lahore, Shahpur, and Peshawar districts, elsewhere stationary. Prospects of current harvest good; harvest in progress.
Central Provinces—(May 5th)		
Nagpur . .	*Nil*	Weather cloudy and close. *Rabi* threshing still continues. Fever and cattle-disease prevalent. Prices steady.
Jubbulpore . .	*Nil*	Weather cloudy and close. Threshing and winnowing continue. Health good. Prices steady.
Saugor (May 4th)	*Nil*	Weather hot and windy. Prospects and health good. Prices fallen.
Seoni . . .	*Nil*	Weather hot and cloudy. Threshing and winnowing continue; fields being prepared for *kharif*. Cattle-disease in parts. Prices steady.
Hoshangabad . .	*Nil*	Weather hot and stormy. Winnowing of *rabi* continues. Small-pox and cattle-disease in places. Prices steady.
Khandwa . .	*Nil*	Weather warm and cloudy. *Kharif* preparations in progress. Health fair. Prices steady.
Raipur . . .	*Nil*	Weather hot and stormy. Threshing nearly over. Cholera and cattle-disease continue; small-pox declining. Prices risen.
Sambalpur (May 1st)	*Nil*	Weather cloudy and hot. Prospects good. Cholera in parts. Trade brisk. Prices fallen.
		General Remarks.—Weather hot and cloudy, with slight storms. *Rabi* harvest still continues; *kharif* ploughings commenced. Cholera in Chhattisgarh; fever and small-pox in places. Prices steady.
British Burma—(May 5th)		
Akyab . (May 1st)	*Nil*	Public health good; cattle healthy.
Rangoon . .	·04	Total rainfall 1·62. Public health good; cattle healthy.
Amherst (Moulmein) .	·98	Total rainfall ·98. Public health good; cattle healthy.
Pegu . . .	·12	Total rainfall ·67. Public health and health of cattle good.
Henzada . .	*Nil*	Public health and health of cattle good.
Prome . . .	·18	Total rainfall ·31. Cholera in town, elsewhere public health good; cattle healthy.
Toungoo . .	*Nil*	Public health and health of cattle good.
Thayetmayo . .	·44	Total rainfall ·57½. Public health and health of cattle good.
		General Remarks.—Cholera in Prome and Thongwa districts, elsewhere public health good; cattle-disease in Hanthawaddy and Amherst districts, elsewhere cattle healthy.
Assam—(May 5th)		
Gauhati (May 4th) .	4·72	Weather seasonable. Cholera prevalent in several parts of the district; cattle-disease still in some mouzahs. Sowing of *ahu* paddy almost finished; planting sugarcane in progress.
Sylhet . .	7·98	No change since last report.
Cachar . .	Weather last three days rainy, 4·33.	Ploughing for *aus* and *asra* crops continues. Common rice 13 seers per rupee. 1 death from cholera from Katigora and 2 from Sadr reported.
Dibrugarh . .	Weather rainy, 3·40	*Ahu dhan* being sown, and ploughing for *sali* continues; prospects of crops good. Cholera still prevalent in North Lakhimpur.
Mysore and Coorg—(May 5th)		
Bangalore . .	Slight rain has fallen throughout the State, with the exception of the Kolar district; good showers reported in parts of the Mysore and Tumkur districts.	Standing crops in good condition, except in parts of the Bangalore, Kolar, and Tumkur districts, where they are withering for want of water. Supply of water and fodder diminishing in parts of the Maidan districts. Prospects of season fair. Early rain much needed in the Kadur district for the coffee plantations. Public health generally good; smallpox prevalent in parts of the Bangalore, Mysore, and Tumkur districts; cattle-disease in parts of the Kolar and Shimoga districts. Prices slightly risen in the districts of Bangalore, Mysore, and Shimoga.
Mysore . .		
Mercara . .	·35	Prices of foodgrains slightly fallen. Prospects of season and public health good.

Under Secretary.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR-GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Thursday, the 6th May, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C., R.A.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
Colonel the Hon'ble W. G. Davies, C.S.I.

INDIAN BANKRUPTCY BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend and consolidate the Law of Bankruptcy and Insolvency in British India. He said:—

"Papers relating to this measure have now been before the public for the greater part of a year, and I do not propose to occupy the time of the Council by recapitulating in detail matters which have been explained in documents that have been published and circulated for general information.

"In the Statement of Objects and Reasons accompanying the draft Indian Bankruptcy Bill which the Government of India published last summer it was remarked that the general amendment of the law of insolvency and bankruptcy in India had of late years been frequently pressed upon the attention of the Government of India.

"It was pointed out that there are at present two main bodies of insolvency law in force in British India—first, the English Statute of 1848, which, roughly speaking, constitutes the insolvency law for the three Presidency-towns and for the towns of Rangoon, Maulmain, Akyab and Bassein; and secondly, Chapter XX of the Civil Procedure Code, which constitutes the nearest approximation to an insolvency law for the Mufassal generally. It was added that besides these two main bodies of law there was a special insolvency law for the Punjab, and there were several special Acts passed for the relief of indebted landowners in different parts of the country.

"The Statement then referred to the steps which had been taken by Sir A. Hobhouse and others for amending Chapter XX of the Civil Procedure Code, to the general Insolvency Bill which was introduced in 1870 by Sir James Stephen, to the short amending Bill introduced by Mr. Pitt-Kennedy in 1881, and to the circumstances under which both these Bills had been dropped.

"After alluding to the special difficulties which had been experienced in working the existing insolvency law at Bombay and to the repeated requests for an amendment of the law which had reached the Government of India from that city, the Statement went on to say, in a paragraph which I will read in full,—

'9. The insolvency law of the Presidency-towns is admittedly cumbrous, defective and out of date, and in some points of detail is, as has been shown, urgently in need of amendment. The proposals for its revision which have hitherto been submitted to the legislature have been objected to, not so much on the ground that they were undesirable, as on the ground that they were insufficient, and that, while it was desirable to re-cast the whole

law and bring it into conformity with English law, it was expedient to postpone legislation for this purpose while proposals involving important amendments of the English law itself were under consideration. This objection has recently been removed by the passing of the English Bankruptcy Act of 1883. That Act may not be perfect; but at least it embodies the accumulated experience of the 35 years which have elapsed since the passing of the Indian Insolvency Act; and in commercial law perfection of detail is less important than uniformity of principle. It is eminently desirable that the circumstances under which a debtor may be declared insolvent and under which he may obtain his discharge should be, as far as possible, the same in London and Calcutta.'

"The conclusion to which the Government of India came on these premises was that the opportunity should now be taken of repealing the Indian Insolvency Act of 1848 and substituting for it a new Act which should, so far as possible, conform in general principles, in language and in arrangement to the latest English Act, but should be freely adapted in details to Indian circumstances. And the draft Bill which was circulated for opinion last summer was framed in accordance with this view.

"Two difficult questions at once suggested themselves in connection with this draft, and are discussed in the Statement of Objects and Reasons which accompanied it.

"The first question was whether the new law should be applied to the whole of British India or only to specified towns. With reference to this question my opinion was, and is, that although there is much to be said in favour of having one and only one insolvency law for the whole of India, yet the balance of advantage is in favour of leaving the Mufassal generally under the Civil Procedure Code, and of confining the operation of the new Act to those towns which are at present under the operation of the Insolvency Act, power being reserved to bring other towns within the same category. The Bill which I am asking leave to introduce will therefore have this restricted operation, but I propose to insert in it provisions which will enable the Courts to deal with up-country debtors in certain cases.

"The second question was in connection with the powers of the Governor-General in Council. The present Indian Insolvency Act is an Act of the Imperial Parliament, and as such has operation beyond the limits of British India. For instance, a vesting order made under it vests in the assignee by its direct operation all the real and personal estate and effects of the insolvent in whatever part of the British dominions they may be situate or accrue. The Indian legislature cannot give its own Acts any such extensive operation, and this limitation of our powers has up to this time proved a serious stumbling-block in the way of Indian bankruptcy legislation. I think it is clear that we cannot pass a satisfactory Bankruptcy Act for India, or any part of India, without some assistance from Parliament, and the mode in which I suggested last year that that assistance should be given was by an enabling Act to be passed by Parliament at some time before our Indian measure was carried through its final stage. I sketched out and annexed to the Statement of Objects and Reasons two alternative drafts of an Act of Parliament, which were submitted to the Secretary of State for consideration by the English authorities.

"This is how the matter stood last July. It remains for me to explain what has taken place since then. I will begin with the action of the authorities in England.

"The Secretary of State has expressed his general approval of the draft Indian Bill which this Government put in circulation last year; but, with reference to our suggestions for parliamentary legislation, he has forwarded to us for our information certain correspondence which has taken place between the India Office and the Board of Trade as the department in charge of English bankruptcy administration. The Board of Trade see no objection to one of the draft Acts of Parliament which we sent home, but raise a further question as to the desirability of obtaining a general enactment which should enable the Courts of the United Kingdom or any of the British colonies or possessions to give effect to the provisions of the bankruptcy laws of any other part of the British empire, as is now the case under certain sections of the English Bankruptcy Act (sections 117-119) with regard to the different portions of the United Kingdom. The Board also

suggest the advisability of obtaining power to extend section 14 of the English Bankruptcy Act, with a view to enabling a Court in any part of the British empire to suspend bankruptcy or insolvency proceedings before it, if in its opinion those proceedings could be more satisfactorily conducted in another Court.

"On these points the Board of Trade have been consulting the Colonial Office, and promise a further communication when the replies from the Colonial authorities have been received.

"Now I quite agree with the Board of Trade about the expediency of giving inter-colonial and imperial effect to the bankruptcy laws of the different parts of the British empire; and if the suggestions made by this Government eventually result in legislation which will not only enable the Calcutta creditor to have his decrees enforced and the property over which he has claims to be easily realized at Singapore, Hongkong and Melbourne but will confer similar advantages on creditors in the Straits Settlements, Australia and elsewhere, we shall have fairly earned the gratitude of our colonial friends. But legislation which is to give satisfaction to all the scattered colonies and dependencies of the British empire will take time, and it is hardly fair to ask India to wait until all other parts of the empire are agreed about what they want.

"I think therefore that our best course will be to pass without further delay as good an Act for India as we can, and then to ask the Secretary of State and Parliament to pass such supplementary legislation as will suffice for Indian requirements, without prejudice to any more general enactment extending to the whole empire which it may be found expedient or practicable to pass hereafter. I have no doubt that Parliament would appreciate the reasonable character of such a request. We should, I believe, have a better chance of getting a confirming than an enabling Statute, and I think I see my way to avoiding some of the difficulties which had occurred to me last year as likely to arise out of confirmatory legislation.

"Passing now from what has been done in England to what has been done in India,—the draft Bill, with the accompanying papers, was published in the Gazette and circulated among Local Governments for opinion in the course of last June. I had hoped that the replies might be received in time to admit of my introducing the measure in the course of the last Calcutta session, but the [illegible] most important of them did not reach me until March, and consequently I have been compelled to defer the present motion until after the return of the Council to Simla. It would be impossible to prepare a satisfactory measure on the subject of the Bill without the active co-operation of those who are conversant with the practical working of the insolvency law in the Presidency-towns, and I have to express my sincere thanks to those gentlemen who have been good enough to study the draft Bill, and to offer suggestions and criticisms on its provisions. I have found specially useful the report of Messrs. Wilson, Pigot and Trevelyan, who constituted the committee of Calcutta Judges appointed by the High Court to consider the draft, the note by Mr. Macgregor, who is the Official Assignee at Calcutta, the report of the Bombay Chamber of Commerce, and the note by Messrs. Farran and Turner, the Acting Prothonotary and the Official Assignee at Bombay.

"The Bombay Chamber of Commerce tell us that before discussing the detailed provisions of the draft they had to consider two broad questions—first, whether in the existing state of things a new Insolvency Act was called for; and secondly, whether in that event the general principles of the proposed Bill were thoroughly adapted to the requirements of the trading community and to the conditions attending insolvency in India. To the first question, we are informed, the reply was unanimously in the affirmative. 'The necessity,' says the report, 'of a radical reform in the bankruptcy law for India has long been keenly felt by the mercantile public, and has on numerous occasions been the subject of anxious consideration. In the address with which the Chamber had the honour to welcome the arrival in India of His Excellency the Viceroy the matter was prominently mentioned as one of pressing importance; and had it not become known that the Bill now under report was in preparation, it was the intention of the Chamber to

memorialise Government begging that action might be taken at the earliest possible opportunity.'

"The second question, they say, did not admit of so ready an answer. The difference between the causes and circumstances of English and Indian insolvencies, they remark, is so great that at first sight the mere fact of the Bill being drawn on the same lines as an English Act carries with it a presumption of possible unfitness. But a closer examination of its provisions, they go on to say, shows that in its leading principle of official control over bankrupt estates it is in a great measure a return to what has long been recognized as one of the best features of the present Indian insolvency law, and it is on this ground that I understand the Chamber to return an affirmative answer to the second as well as to the first of the questions which they had raised. In the revised version of the Bill it will be found that this feature of official control, to which the Bombay Chamber so justly attach importance, is a good deal more emphasized than in the draft which was circulated last year.

"It is fair to say that one of the Bombay authorities,—Mr. Hart, Chief Judge of the Bombay Court of Small Causes,—taking his stand on the differences between England and India, draws another conclusion from that arrived at by the Chamber of Commerce, and questions altogether the desirability of applying the principles of the English Bankruptcy Act to India. If the measure which I am asking leave to introduce were to apply to India generally, there would be very great force in his criticisms; but it must be borne in mind that the present measure is only intended to extend to the Presidency-towns and to a few other places where the conditions of insolvency resemble much more closely those existing in England than they do in the Mufassal.

"Among the differences between English and Indian conditions to which the Bombay Chamber direct prominent attention is the fact that imprisonment for debt has been abolished in England but not in India. Now on imprisonment for debt I have my own opinion. I believe that the system of imprisonment for debt as such (I am not speaking of cases where indebtedness involves an element of fraud) is bad for the creditor, bad for the debtor and bad for the country at large. I know that this opinion is shared by some of my colleagues, in particular by my friend Mr. Hope, who has on more than one occasion delivered his soul on this subject with much effect, and it is strongly supported by some papers which have been sent to us from Burma with reference to the present Bill. Moreover, some interesting reports on the law of foreign countries which Sir H. Maine was kind enough to have collected for me, and which were published in the *Gazette of India* last year, show that this is the view to which the legislatures of all civilized countries are tending, and at which most of them have arrived. But when Indian authorities were consulted on this subject some four or five years ago there was very great divergence of opinion about it, and a large number of persons, whose opinion, from their position, their experience and their knowledge of the country, is entitled to the greatest weight, were strongly opposed to the abolition of imprisonment for debt. In fact, it appeared that Indian opinion generally, both official and unofficial, was not yet ripe for any such change, and that, under existing circumstances, it would be useless for me or for any one else to propose any such alteration of the law affecting India generally. Whether we should not be justified in proposing legislation confined in its scope to a particular province where the balance of authoritative opinion is in favour of change, is another question into which I will not enter now.

"But, so far as the present Bill is concerned, I yield to the opinion of the Bombay Chamber, which I fear would be endorsed by Chambers of Commerce elsewhere, that it would be unadvisable as yet to deprive creditors of the power of imprisoning for debt. Accordingly the present Bill has been prepared on the assumption that imprisonment for debt is to be retained. There is no doubt some little difficulty in adapting the provisions of the English measure to a country where imprisonment for debt still remains, but the difficulty is not insuperable, and I think that it may be surmounted by means of a few adjustments and adaptations, in addition to those which appeared in last year's draft.

"Before I leave the Bombay papers I will refer to one other point which is of considerable importance in a province like Bombay, where British territory and Native States are much intermixed and interlaced. The Bombay Chamber remark that, so far as Bombay is concerned, one of the greatest disadvantages which creditors have to contend with is the facilities which fraudulent debtors have for escaping from the jurisdiction of the Court by absconding into Native territory. Among a certain class of native traders, they say,—and that by no means the lowest,—this is a very common means of evading punishment, and, owing to the ease with which it can be accomplished, it tends greatly to encourage fraudulent bankruptcy. Once make it possible, they urge, for the writ of the Bankruptcy Court to take effect in Native States, and reckless trading will have received a death-blow which no other form of legislative enactment could administer. The Chamber frankly admit the difficulties attending their proposal; but I am not sure that they have fully realized that the suggested remedy is one which it is beyond the competency of the Indian legislature to apply. We can, by legislation in this Council, provide for the arrest of debtors about to abscond from British into Native territory, and I propose to do so by the present Bill. We cannot, by legislation in this Council, make the writs of our Bankruptcy Courts run in Native territory. If further facilities than those which now exist are to be given for executing British writs in Native territories, they must be given by means of executive arrangements carried out through the agency of the Foreign Department. The question whether such facilities could be given was a good deal discussed in the years 1867 and 1868, and was eventually decided in the negative, in accordance with the strongly expressed opinion of the Bombay Government of that day. If the present Bombay Government can see their way to meeting the objections which 18 years ago were considered fatal to the adoption of proposals similar to those now put forward, I feel sure that the Government of India will gladly co-operate in taking such action as may be practicable for preventing Native States from being converted into Alsatias for fraudulent debtors.

"I will now turn to the Calcutta criticisms. The Committee of Calcutta Judges and the Official Assignee, Mr. Macgregor, have gone through the draft Bill clause by clause, and have made some most useful suggestions, the majority of which I propose to adopt. The point to which they attach most weight is one to which I have already adverted, namely, the importance of maintaining strict official control over Indian insolvencies, and the impossibility in almost every case of administering an insolvent estate in this country through the agency of the creditors and a trustee appointed by them. To this view I fully assent. The reason why I thought that the English Bankruptcy Act of 1883 could be more easily adapted to the circumstances of this country than its predecessor was because it involves a return to the principle of official supervision. The Act bears on the face of it signs of its being a compromise between two views—the view embodied in the Act of 1869 that the administration of debtors' estates should be left as much as possible to the creditors themselves, and the view that official supervision is indispensable to prevent waste and scandal. The administration is given to a person who is called the trustee, and who is supposed to be appointed by and to act in consultation with the creditors; but he is not given nearly as free a hand as under the old Act, and every inducement is offered to employ official rather than voluntary agency, especially in the case of small estates. The draft Indian Bill which was published last year reversed the presumption underlying the English Act, and proceeded on the view that the employment of the Official Receiver (or, if we retain the existing Indian term, the Official Assignee) would be the rule, and the employment of a creditor's trustee the exception. And, after hearing the very forcible objections which have now been urged to the administration of insolvent estates in India through trustees and committees of inspection, I think it would be safe and proper to go a good deal further in the direction of official control than I had originally proposed. It appears from the Calcutta papers that, although power is given to the Court by a section of the Indian Insolvency Act to order the election of assignees by the creditors, this power has rarely, if ever, been exercised, and, as far as the Calcutta Judges can ascertain, in only one case in recent years have

creditors applied to the Court for an order under this section. In view of this evidence as to the decided preference of creditors themselves for official administration, I propose in the revised draft to incline the balance a good deal further in the official direction by omitting the machinery of committees of inspection, and by reducing to much smaller compass the parts of the Bill relating to formal meetings of creditors, and to the duties and liabilities of trustees appointed by the creditors, the assumption being that those provisions will be only of exceptional application.

"I also propose, as I have said before, to meet another Calcutta criticism by giving the Court power in certain cases of exercising jurisdiction over up-country debtors.

"I reserve for the introduction of the Bill any more detailed explanation of its provisions, and will merely add that I fully assent to what Mr. Macgregor says with regard to the propriety of safeguarding the interests of existing establishments. The only reason why clauses on this subject were not inserted in last year's draft was because I thought they would be best settled after consultation with the persons immediately affected by them.

"This then is the general character of the Bill which I propose to introduce. Having regard to the small number of insolvencies which come before the Courts of the Presidency-towns, and to the extremely petty character of the transactions out of which those insolvencies ordinarily arise, the scope of the measure will be very limited, and I have no desire that it should be extended. Personally I am disposed to agree with the opinion of the Officiating Recorder of Rangoon that if imprisonment for debt were abolished there would be very little insolvency business in India, or that at all events it would be confined to *boná fide* trading bankruptcies.

"But until the time is ripe for a more heroic remedy I can offer no better solution of the problem of providing an insolvency law for the centres of Indian commerce than that which is embodied in the measure which I hope shortly to lay before the Council."

The Motion was put and agreed to.

The Council adjourned to Thursday, the 13th May, 1886.

S. HARVEY JAMES,

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 12th MAY, 1886.

GENERAL REMARKS.—Slight rain has again been general throughout Eastern and Central Bengal, the Madras Presidency, and the southern districts of Bombay. Heavy falls have taken place in British Burma, Assam, and Mysore. Rain has also fallen in the North-Western Punjab, at Indore, and in one or two places in Rajputana.

Agricultural prospects continue unchanged in Madras. Mysore has benefited by the rain. In Coorg the season is favourable.

Kharif preparations are in progress in Bombay, Berar, and the Central Provinces. In Central India, Rajputana, and Hyderabad prospects are generally good.

The *rabi* harvest is approaching completion in the North-Western Provinces and Oudh, where ploughing for the *kharif* has commenced and prospects are good. In the Punjab the *rabi* crops are being cut, and the harvest promises well.

Agricultural operations have been facilitated in Bengal by the recent rain, but more is required in some places. *Aus* rice, jute, sugarcane, indigo, and *cheena* promise well, and the *boro* rice harvest is yielding a good outturn. In Assam the weather is seasonable and prospects are generally good.

Cholera is prevalent in Raipur in the Central Provinces and is reported from several other parts of the country; but, speaking generally, the public health is good.

Prices are rising in the Punjab and are fluctuating in Mysore. Elsewhere they remain generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 12th)		
Bellary . . .	Average ·33	Standing wet crops in parts of two taluks generally good; tank water insufficient; harvest wet and dry crops below average. Cattle-disease in three taluks.
Kurnool . .	Average ·22	Harvest second crop paddy, yield average. Small-pox and cattle-disease in three taluks.
Ganjam . .	Average ·38	Fever in three, small-pox in five, and slight cattle-disease in two taluks; cholera prevailing. Average number employed on Chilka canal 510.
Kistna . . .	Average ·08	Fever in some taluks, and cholera in eight taluks and one division.
Chingleput (Madras) .	Average ·04	Standing crops fair, except in parts of one taluk where withering, and in another suffering from want of water; harvest wet and dry grains, outturn below average. Fever in one taluk and small-pox in another; cattle-disease in one taluk.
Coimbatore . .	Average 1·53	Standing crops good, but *cholum* requires rain in parts of one taluk; harvest paddy and *cholum*, outturn of paddy generally above average and *cholum* average. Fever in one taluk and slight small-pox in two villages.
Tanjore . . .	Average ·21	Standing crops good, except in parts of one taluk, where rain is wanted; harvest *cholum* and gingelly, outturn below average.
Madura . . .	Average last week since revised, ·95; this week, 1·08.	Harvest paddy, yield below average.
Malabar . .	Average 1·35	Harvest third crop paddy, outturn below average. Fever in one, slight small-pox in nine, and cholera in three taluks.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 19th MAY, 1886.

GENERAL REMARKS.—Slight rain has fallen in Madras and Mysore, in parts of the Deccan and Southern Mahratta districts of the Bombay Presidency, in some districts of the Punjab and the Central Provinces, in Assam, and in some places in Rajputana and Central India. Heavy falls have taken place in Bengal, the North-Western Provinces and Oudh, and British Burma.

Agricultural prospects continue fair in Madras, in most parts of Mysore, and in Coorg.

Preparations for the *kharif* sowings continue in Bombay, Berar, and the Central Provinces. In Hyderabad, where the *rabi* harvest has commenced, prospects continue favourable.

In the North-Western Provinces and Oudh some injury has been caused to crops by hail, but prospects are on the whole good. The harvest is in progress in the Punjab, and promises well.

In Bengal agricultural operations are generally in progress, and prospects are favourable. More rain is wanted in parts of Assam.

Cholera continues severe in the Chhattisgarh District of the Central Provinces, but elsewhere the public health is generally good.

Prices are fluctuating in the North-Western Provinces and Oudh and in parts of the Punjab, and have fallen slightly in Mysore; elsewhere they remain stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 19th)		
Bellary	Average ·15	Standing wet crops generally good in parts of two taluks, but water insufficient; harvest paddy, sugarcane, and cotton, yield about average. Cattle-disease in three taluks.
Kurnool	Average ·07	Harvest second crop paddy almost completed, yield average. Small-pox and cattle-disease in three taluks.
Ganjam	Average ·54	Fever in two, small-pox in six, cholera in three, and cattle-disease in four taluks. Average number employed on Chilka canal 838.
Kistna	Average last week since revised, ·10; this week, ·18.	Slight fever and cholera in seven taluks and one division.
Chingleput (Madras)	1·35	Standing crops fair, except in parts of one taluk, where withering; harvest paddy and dry grains, outturn below average. Fever and small-pox in one and cattle-disease in two taluks.
Coimbatore	Average ·80	Standing crops good; harvest paddy and *cholum*, outturn generally above average. Fever in one and small-pox in parts of two taluks.
Tanjore	Average last week since revised, ·31; this week, ·38.	Standing crops good, except in parts of one taluk, where rain is wanted; harvest gingelly and tobacoo, outturn below average.
Madura	Average last week since revised, 1·05; this week, ·28.	Harvest paddy, yield about average. Small-pox in one taluk.
Malabar	Average ·45	Harvest third crop paddy, outturn below average. Fever in one, slight small-pox in eight, and cholera in three taluks; cattle-disease in one taluk.
Travancore	1·61	Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(May 19th)		
Kurrachee	Last week at Kotri, ·29.	River at Kotri on 17th, 14 feet 3 inches against 11 feet 4 inches on same date last year. *Kharif* sowings in progress in six talukas; area of *rabi* 12,811 acres less than that of previous year; assessment Rs. 27,486, produce 10 annas in rupee; loss due to scarcity of rain. Fever in eight and cattle-disease in three talukas; no fresh case of small-pox, one remaining.
Hyderabad	*Nil*	*Rabi* harvest almost over in the district, but in some places small patches continue to be trodden; preparations for *kharif* cultivation in progress in the Tando subdivision, seed is being sown. River at Kotri on 17th, 14 feet 3 inches against 11 feet 4 inches on same date last year. Fever in four, small-pox in one, and cattle-disease in five talukas. Prices of grain steady. Weather cloudy.
Ahmedabad	*Nil*	Weather very hot. Public health good. Wheat 35 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda . .	*Nil*	Public health good. Cattle-disease in Velacha taluka of Naosari division; small-pox in Naosari town. Standing crops in good condition. *Bajri* 28, wheat 22, and rice 18 pounds per rupee.
Surat . . .	*Nil*	Fever in Mandvi and Bardoli talukas. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik . . .	Baglan, ·03	*Rabi* threshing nearly over; land being prepared for the next year's sowing throughout the district. Weather very hot. Public health generally good. Wheat 34, *bajri* 33, and rice 17 pounds per rupee.
Colaba (Bombay) .	*Nil*	Average abnormal temperature 2° warm; vapour in air excessive; abnormal wind southerly on 15th and 16th, wind normal on all other days; distant lightning on 18th.
Poona . . .	*Nil*	Cattle-disease in Junnar and small-pox in Sirur talukas. *Bajri* 34 and *juari* 45, in Poona *bajri* 32 and *juari* 35 pounds per rupee.
Ahmednagar . .	Slight rain in south	Reaping completed. Public health good. *Bajri* average 48 and *juari* 60 pounds per rupee.
Sholapur . .	·06; Pandharpur, ·29	*Juari* 58 and *bajri* 44 pounds per rupee.
Dharwar . .	·68	Sowing of rice commenced in Mugud and Hangal; ground being prepared for early crops. Scarcity of drinking-water in Navalgund, Gadag, Karajgi, and Kod. Cattle-disease in Kod; public health good. Rice 20 to 30 and *juari* 43 to 59 pounds per rupee.
Kanara . .	*Nil*	Scarcity of water in Bhatkal and Haliyal. Ploughing and manuring for monsoon crops. Cattle-disease in Karwar and Supa; small-pox in Siddapur, Siri, and Yellapur. Common rice at Karwar 14 seers, in district average 13½ seers per rupee. Weather cloudy.
Rajkot . . .	*Nil*	Fever in Kotri and Sangani. Weather hot and windy. Public health generally good. Wheat 35, *bajri* 32, and *juari* 46 pounds per rupee.
		General Remarks.—Slight rain in parts of the Deccan and Southern Mahratta Country and Kurrachee. Scarcity of drinking-water in four talukas of Dharwar and two of Karwar. Fever and cattle-disease in parts of nine and small-pox in parts of seven districts; other conditions unchanged.
Bengal—(May 15th)		
Chittagong . .	1·08	Weather variable. Prospects of crops fair. Prices stationary. Public health good.
Dacca . . .	3·02	Sowing nearly completed; harvesting of *boro* paddy continues; prospects of the crops good. Public health generally good.
24-Pergunnahs (Calcutta).	5·43	Sugarcane prospects good; lands being prepared for paddy crops. Rain has done much good. Sporadic cholera in Sadr subdivision; public health generally good.
Moorshedabad . .	Good rain	Weather cool. *Aus* paddy being sown; land being prepared for *aman* paddy; prospects of indigo and sugarcane good. Price of rice stationary. Public health fair.
Rungpore . .	1·4	*Aus* and jute prospects good; *cheena* and *kaon* ripe in places. Public health good.
Burdwan . .	5·4	Rain has done much good. Ploughing going on everywhere.
Bhagalpur . .	0·40	Rain has assisted cultivation and will do good to sugarcane and other crops on ground; more rain wanted. Public health good.
Purneah . .	0·03	Crops fair; ploughing going on. Public health not very good.
Patna . .	1·4	Collection of cotton continues; *boro* rice promising; sugarcane growing well. Public health good.
Durbhunga . .	1·55	Rain very useful for purposes of cultivation. Early paddy sowing in progress. Prices stationary. Public health good.
Hazaribagh . .	0·03	Weather unsettled and cool. Ploughing in progress; mango and sugarcane doing well. General health good.
Cuttack . .	2·05	Weather hot and cloudy. Ploughing in progress; sowing of *bali* crops commenced. Price of rice almost unchanged. Public health generally good.
Midnapore . .	3·39	Indigo damaged by excessive rain; tillage being actively pressed on. Public health fair.
Khoolna . .	4·40	Weather hot. *Boro* rice harvest over, outturn good; *aus* paddy being sown. A little cholera and cattle-disease in Satkhira; public health fair.
Dinagepore . .	3·15	Weather cool; general rain. Cultivation progressing. Cattle-disease in three thanas.
Pubna (Serajgunge) .	2·97	Rain very beneficial. Sowing progressing. Cholera abated.
Gya . .	Showers in parts of district.	Sugarcane progressing well. Prices moderate. Public health fair.
Chumparun . .	2·11	Rain has facilitated *bhadoi* sowings and done much good to indigo. Prices stationary. Some cases of fever and small-pox reported.
		Gereral Remarks.—Good general rain during week in a few districts, where it was slight; more wanted. Agricultural operations now generally in full progress; *aus* rice and jute already sown in many places, growing well; prospects of sugarcane and indigo favourable; *boro* rice harvest still proceeding in some districts, with good outturn. Price of rice stationary. General health fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(May 15th)		
Benares (May 18th)	·50 at Sadr	Weather fine. Supplies ample. Prices slightly fluctuating. Health good.
Gorakhpore („ 16th)	2·50 at Sadr	Threshing nearly completed.
Fyzabad („ 18th)	Heavy rain throughout the district.	The rain has benefited sugarcane and indigo. Prices steady. Supplies ample. Health of men and cattle good.
Lucknow („ 17th)	From ·80 to 2·40; and heavy windstorm on the night of the 12th and 15th; fall of hail also reported in the Sadr and Malihabad tahsils.	The rain and hailstorm have injured the summer crops to some extent.
Rae Bareli („ „)	1·40 on the night of the 15th at Sadr.	Weather cloudy; wind easterly. Markets well stocked. Prices steady. Health good.
Partabgarh („ 18th)	Rain throughout the district; 1·20 on the 16th at Sadr.	Prices stationary. Health of men and cattle good.
Allahabad („ „)	Average ·40 in the Doab and Trans-Ganges.	Weather seasonable. Markets amply supplied. Prices show a slight rise. Health generally good.
Cawnpore („ 17th)	·90 in Cawnpore and Bilhaur.	Weather cool; high winds. Harvesting nearly finished. Prices almost stationary. Condition of people good; foot and mouth disease in Bilhaur.
Farakhabad („ 18th)	Storm with heavy rain in Kaimganj and Chhibrahman, on 15th; little rain fell elsewhere.	East wind during the week. Supplies ample. Health of people fair.
Sitapur („ „)	There have been heavy showers at Sidhauli and Misrikh.	The rain has caused damage to grain and *bhusha* in grain pits. The wind has been easterly during the week, but the weather is now clear. Prices are steady. Public health good.
Bareilly („ „)	Slight rain varying from ·40 to ·80 in all tahsils, except Faridpur.	Prices show a tendency to rise. Weather cool; easterly winds.
Banda („ 17th)	Constant storms and high winds, and some rain.	Weather abnormally cool. *Rabi* harvested. Prices falling. Public health good; cattle-disease in two villages.
Kumaon („ 18th)	**Rain and hailstorms**	**Weather unsettled. *Rabi* being reaped; *kharif* sowing in progress. Prices falling. General health fair; cattle-disease decreasing.**
Agra („ 17th)	In five parganas ·20 to 1·10 on 16th, and hail in two on same date.	Weather cloudy. Prices show a slight fall. Health good.
Jhansi („ „)	A little rain	*Rabi* operations completed; lands being manured for *kharif* cultivation. Prices firm. Public health good; slight cattle-disease.
Ballia („ 18th)	Some showers	Weather cool, with strong easterly wind. Harvesting over. Two deaths from cholera reported; general health good.
Meerut („ „)	Rain all over the district from ·20 to 1·0 on the evening of the 15th, when an unprecedently severe storm, accompanied by hail, swept over the district from west to east.	The hailstorm has done great damage to mango, tobacco, and melon crops; cane and indigo fortunately too young for injury; some loss of life amongst men and cattle. Prices show a slight tendency to rise, as supplies come in insufficient and limited quantity.
		General Remarks.—Heavy rain has fallen throughout the provinces; in a few districts injury has been caused to crops by hail, but prospects are, on the whole, good. Markets are well-supplied, though prices are fluctuating. Public health generally good.
Punjab—(May 15th)		
Delhi (May 18th)	·64	Health good. Prices fluctuating.
Hissar . .	*Nil*	Health good. Prices rising.
Umballa . .	·77	Health good. Prices rising. Prospects of current harvest good.
Jullundur . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Sialkot . .	·90	Health good. Prices stationary.
Ferozepore . .	*Nil*	Health good. Prices stationary.
Lahore . .	*Nil*	Health good. Prices almost stationary.
Rawalpindi . .	·10	Health good. Prices stationary. Prospects of current harvest average.
Shahpur . .	Rain throughout the district.	Health good. Prices almost stationary.
Mooltan . .	*Nil*	Health good. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan .	*Nil*	Small-pox slightly prevalent in city. Prices stationary.
Peshawar . .	*Nil*	Health good. Prices slightly rising.
		General Remarks.—Rain in five districts. Small-pox slightly prevalent in Dera Ismail Khan city, otherwise health of province good. Prices rising in Hissar, Umballa, and Peshawar districts, stationary in others. Harvest in progress. Hailstorm in Delhi has caused damage to the first crop.
Central Provinces—(May 19th)		
Nagpur . .	*Nil*	Weather hot and cloudy. *Kharif* preparations continue. Fever, small-pox, and cattle-disease in places. Prices stationary.
Jubbulpore . .	·94	Weather stormy. Health good. Prices easy.
Saugor (May 18th)	*Nil*	Weather cooler. Fever, small-pox, and cattle-disease continue. Prices fallen in one tahsil.
Seoni	·30	Weather cloudy and hot. Fields being prepared for *kharif* sowings. Health good. Prices steady.
Hoshangabad . .	*Nil*	Weather hot and stormy. Ploughings commenced. Small-pox and cattle-disease in places. Prices steady.
Khandwa . .	Slight shower	Weather hot and cloudy, with high winds. *Kharif* preparations in progress. Health fair. Prices unchanged.
Raipur . . .	Slight showers daily	Weather cooler. Lands being prepared for sowings. Cholera continues. Prices steady.
Sambalpur (May 15th)	·82	Weather hot and stormy. Sugarcane doing well. Cholera in places. Prices stationary.
		General Remarks.—Weather cloudy occasionally, with slight showers. Land is being prepared for *kharif* sowings. Fever and small-pox in places; cholera continues virulent in Chhattisgarh. Prices steady.
British Burma—(May 19th)		
Akyab . (May 15th)	*Nil*	Public health good; cattle healthy.
Bassein . . .	*Nil*	Public health good; cattle healthy.
Rangoon . .	1·32	Total rainfall 7·37. Public health good; cattle healthy.
Amherst (Moulmein) .	4·34	Total rainfall 8·83. Public health good; cattle healthy.
Pegu . .	0·99	Total rainfall 4·64. Public health and health of cattle good.
Henzada . .	1·37	Total rainfall 2·57. Public health good; slight cattle-disease in one township.
Prome . . .	6·02	Total rainfall 0·35. Public health good; cattle healthy.
Tounghoo . .	2·28	Total rainfall 5·82. Public health good; cattle healthy.
Thayetmayo . .	0·24	Total rainfall 2·4. Public health good; cattle healthy.
		General Remarks.—Slight cholera in Thongwa district, elsewhere public health good; cattle-disease in Hanthawaddy and Henzada districts, elsewhere cattle healthy.
Assam—(May 19th)		
Gauhati (May 15th) .	*Nil*	Weather hot. Cholera diminishing in Sadr station, but still prevalent in the rural area; cattle-disease abating in some mouzahs, but prevalent in others. Planting of sugarcane almost finished; tea doing well, but more rain greatly wanted.
Sylhet . .	0·11	State and prospects same as last week.
Cachar . .	·87	Weather warm. A severe storm on the night of the 16th instant. Ploughing for *asra* crops continues. Common rice 14 seers 8¾ chittacks per rupee. General health good.
Dibrugarh . .	·13	Weather warm; rain wanted. *Ahu* growing on well; planting of sugarcane commenced. Cholera decreasing in North Lakhimpur. Prospects of crops good. District healthy.
Mysore and Coorg—(May 15th)		
Bangalore . .	·17 in Tumkur; slight rain reported in all other districts with the exception of Kadur.	Rain needed in Kadur district. Standing crops fading in parts of the Kolar and Shimoga districts, elsewhere in good condition; prospects of season fair. Supply of fodder diminishing in parts of the Bangalore, Kolar, and Kadur districts. Public health generally good; small-pox prevalent in parts of the Bangalore and Tumkur districts; cattle-disease in parts of the Bangalore, Kolar, and Shimoga districts. Prices slightly fallen in the Kolar and Shimoga districts.
Mysore . .		
Mercara . .	2·11	The rain has fallen generally, though too late, in some parts for maturing the coffee crop before monsoon rains; the rain was much needed for preparing the ground for the rice crops. Prospects of season fair. Public health good.
Berar and Hyderabad—		
Amraoti (May 19th) .	*Nil*	Weather hot and windy. Preparation of land for *kharif* sowings in progress. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	*Nil*	Weather hot and cloudy. Preparations for ensuing *kharif* sowings continue.
Hyderabad . .	·21	Total rainfall ·59. Reaping of *rabi* crops commenced. General health fair. Prices—wheat 15, coarse rice 11½, yellow *juar* 20⅜, white *juar* 19½, and *tur* 16¾ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(May 19th)		
Indore	*Nil*	Weather cloudy and hot, with duststorms.
Morar (Gwalior)	·17	Weather cloudy and hot.
Sutna	·27	Weather cool. Health good.
Neemuch	*Nil*	Weather cloudy, with high winds. A few cases of small-pox in the bazar, health otherwise good.
Goona	*Nil*	Weather very hot. Health and prospects good.
Agar	*Nil*	Health and prospects fair.
Nowgong	*Nil*	Weather hot and cloudy. Health fair. Price steady.
Bhopawar (Manpur)	*Nil*	Weather cloudy; mornings cool; signs of rain. Health good. Prices moderate.
Rajputana—(May 19th)		
Abu (May 19th)	·40	Much thunder yesterday; weather cooler in consequence and seasonable.
Sirohi („ 16th)	*Nil*	No water in tanks, wells fair. A few cases of measles, otherwise health good. Weather hot, dry, and calm.
Marwar („ 14th)	*Nil*	About four months' water in tanks. Health good. Crops being still gathered. Hot winds. Prices rising.
Kherwara („ 16th)	*Nil*	Tanks and wells lower. Crops nearly all stored. Health good. Prices steady. Weather very hot and windy.
Pertabgarh („ 15th)	·48	Tanks and wells drying. Health good. Prices rising. Heat great.
Meywar („ „)	·16	Tanks and wells low. Health good. Prices rising. Weather cloudy.
Jhallawar („ 14th)	*Nil*	Weather seasonable.
Kotah („ 15th)	*Nil*	Health good. Weather hot.
Harowti („ „)	Duststorms and slight rain on 14th.	Weather hot. Health good. Prices steady.
Ajmere' („ 18th)	*Nil*	Weather hot. Tanks and wells diminishing. Fever, small-pox, and guineaworm still prevalent. Prices stationary.
Jeypore („ „)	*Nil*	Weather seasonable. Prices steady. Health fair.
Ulwur („ „)	*Nil*	Wells low. Fever in parts. Prices steady.
Bickanir („ 15th)	*Nil*	Measles in Bickanir; fever and small-pox in districts. Prices low. Weather very hot. Heavy sandstorms.
Nepal—(May 14th)		
Katmandu ...	1·84	Prospects good.

No. 90 Met. / 12—4

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, 20th May, 1886.

Read the following:—

Summary of the Weather Reports for March and April, 1886.

The early portion of March was characterised by a very low barometric pressure in the Punjab and the adjacent parts of the country, but elsewhere it was not much below the average. Though pressure rose steadily during the latter half of the month, the average of the whole month showed a slight deficiency over the greater portion of India and British Burma. In the North-Western Provinces the variations were irregular, and in Bengal there was a slight excess. In April the pressure was generally very near the average, the variations ranging slightly below the normal in Bombay, Bengal, and Central India, and above it in all the other provinces.

In March damp rain-bearing winds were more frequent than usual throughout the Upper Provinces, and there was a great excess of rainfall over the whole of Northern India. In Sind and Central India also there was a slight excess; but little or no rain fell in any part of the peninsula, and less than the average amount in Ceylon. Snow fell on the lower ranges of the North-Western Himalaya on the 7th and 8th March, and again on 1st April. On the latter date there was a considerable fall of temperature in North-Western India, and the mean temperature at Murree was not less than 10° below the normal. After this, however, the weather cleared, and any further rain was slight, and fell at long intervals. In April there was a general absence of rain. Dry north-west winds continued to blow steadily over the whole of North-Western and Central India as far east as Behar. On the Malabar Coast also the winds were from the north-west, sometimes north; and on the Coromandel Coast from between south and south-west. Except along the Madras Coast and in Lower Bengal, the humidity of the air was much below the average, more especially in Central India and Behar.

In March the temperature was everywhere more or less below the average, the depression being greatest in the Punjab, Rajputana, and Sind, where it ranged between 2° and 4·5°.

In April the variations from the normal were generally small, and, except in Bombay and Central India, where there was an excess of 1° to 3°, were everywhere within 1° of the average.

The following table shows the amount of rain and the difference from the average during the months of March and April 1886 according to districts as far as is indicated by the telegraphic reports. The first column shows the number of stations used to determine the average for the district:—

Districts.	Number of stations.	Average rainfall in March.	Difference from the average in March 1886.	Average rainfall in April.	Difference from the average in April 1886.
Punjab, west	7	1·52	+2·81	1·75	—1·04
Punjab, east	4	1·45	+0·61	1·17	—1·09
North-Western Provinces, trans-Gangetic.	8	1·04	+1·44	0·60	—0·55
North-Western Provinces, cis-Gangetic.	3	0·34	+0·37	0·15	—0·15

(a) Return not received.
(b) Total receipts from 1st to 18th April 1885.
(c) Total receipts from 1st to [illegible]th April 1886.

SIMLA,
The 19th May, 1886.

[illegible]ED. [illegible]IREBRACE, *Major, R.E.*,
Under Secretary.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Thursday, the 20th May, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
Colonel the Hon'ble W. G. Davies, C.S.I.

INDIAN BANKRUPTCY BILL.

The Hon'ble MR. ILBERT introduced the Bill to amend and consolidate the Law of Bankruptcy and Insolvency in British India, and moved that it be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley, the Hon'ble Messrs. Evans and Steel, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik and the Mover. He said:—

"Although I am now nominating the Committee on this Bill, I do not propose that the Committee should begin its sittings until after the Governor [illegible] has returned to Calcutta. But I hope it will be arranged that such [illegible] suggestions and criticisms as we may receive will reach us in ample time to allow of their being considered in the Legislative Department before we leave Simla, so that no time may be lost after our return to Calcutta.

"I have already said that the Bill follows generally the arrangement and lines of the English Act, and I will take this opportunity of explaining the most important points of difference between the two measures.

"The Indian Bill is given as extensive an operation, local and personal, as can be conferred on it by this legislature. In order to obtain for it further operation in Her Majesty's dominions beyond India we must go to Parliament: in order to obtain for it further operation in Native States within India we must rely on executive arrangements with the rulers of those States. The Local Governments will, I feel sure, appreciate the importance of considering how far it may be practicable to make and give effect to such arrangements.

"The acts of bankruptcy enumerated in the Indian Bill are not precisely identical with those specified in the English Act. It would not be desirable in India to make the mere levy of execution an act of bankruptcy. On the other hand, it is suggested in some of the papers on the draft Bill that it would be desirable to retain some of the acts of bankruptcy recognized in the existing Indian Act. I have adopted this suggestion, and have also made some further modifications of and additions to the corresponding English section which have been suggested by the working of the Act in England.

"The Court will not ordinarily exercise jurisdiction on a bankruptcy petition unless the debtor is either in prison for debt within the limits of the ordinary original jurisdiction of the Court, or he or his partner resides or has a place of business within those limits. But for the purpose of empowering the Court, in

exceptional cases, to deal with up-country debtors, I have qualified these restrictions by two provisoes, of which the first enables the Court to transfer before itself and dispose of under the bankruptcy law any case of indebtedness which may have been brought before an inferior Court under the Insolvency chapter of the Civil Procedure Code; whilst the second empowers the Court in classes of cases to be defined by rules to exercise jurisdiction notwithstanding the restrictions imposed by the earlier part of the section. It will be for the High Courts to consider whether these provisoes will suffice to give them the requisite power of dealing with such cases. I have myself some doubt about the necessity for the second proviso. And I do not contemplate that a High Court should, under it, attempt to deal with cases arising outside its own province. If, for instance, the High Court at Calcutta were to exercise jurisdiction in a Cawnpore case, it might bring itself into conflict with the High Court at Allahabad. Should it be found desirable to deal under the bankruptcy law with any classes of indebtedness arising at Cawnpore, probably the most convenient mode of doing so will be to confer on the Allahabad Court a bankruptcy jurisdiction subject to such limitations as may be found expedient. This could be done under section 79 of the Bill.

"It has been suggested that the application of the Insolvency chapter of the Civil Procedure Code to the High Courts of the Presidency-towns should be barred. But it is possible that this chapter may still be needed for cases where the total amount of the debtor's liabilities does not amount to Rs. 500, and I think it will be sufficient to give full power to stay proceedings under the Code where concurrent proceedings are being taken under the Act. Such a power is given by section 9 of the Bill.

"Under ordinary circumstances, where the petition is presented by the debtor, the Court will make an order as a matter of course, but it need not make an order in cases where in its opinion the proceedings ought to have been taken before some other Court having jurisdiction (section 7). Unless this qualification were made, a debtor against whom proceedings have, quite properly, been taken in Calcutta might, to the great inconvenience of his creditors, get himself adjudged bankrupt at Bombay by migrating and petitioning there.

"The order to be made on a bankruptcy petition is in the Bill, as in the English Act, called a receiving order. The effect of a receiving order is not quite the same as that of a vesting order under the existing Indian Act. A receiving order transfers the possession of, but not the property in, the debtor's estate: the debtor is not divested of his estate unless or until he is adjudged bankrupt. An interval was designedly allowed by the English law for the purpose of enabling a debtor to escape the consequences of bankruptcy by making suitable arrangements with his creditors under the control and supervision of the Court; and although the adjudication of bankruptcy may, and in many cases will, follow immediately on the receiving order (see section 20), yet I think it is desirable that we should follow the English law by making it possible for an interval to elapse between the two stages. The person who is constituted receiver under the order, and to whom the possession of the debtor's property is given, is the official assignee, who, however, may appoint a special manager in cases where he thinks it expedient to do so.

"One important effect of a receiving order under the Bill, as now revised, is that the debtor, if in prison for debt, is thereupon released. It might be objected that, inasmuch as an imprisoned debtor can obtain a receiving order on his own petition, this provision nullifies the law of imprisonment for debt. But if the Bill is carefully examined it will be found that this objection is not really valid. The state in which a debtor will find himself on being released from prison under a receiving order will be very far removed from a state of liberty. He will remain at the beck and call of the official assignee, who is invested with inquisitorial powers over his person and property, and on whom he has to dance attendance whenever required (see section 22). If he attempts to escape or evade the requirements of the law, he is liable to be summarily committed to prison. Such a situation, though inconvenient to persons fraudulently disposed, need present no terrors to the debtor who is honestly anxious to assist in the realization and distribution of his estate, and will

give a much better chance to the creditors generally than the present law, under which the debtor usually strikes a bargain with some favoured creditor as to the terms on which he is to obtain immunity from arrest or be released from prison if arrested. Precautions are also taken against allowing the proceedings to slumber after the debtor has obtained the protection given him by a receiving order. The Court has power either to rescind its order (section 88) or to give the carriage of the proceedings to the official assignee (section 91).

"Under the English law the first step consequent on a receiving order is to summon a general meeting of the creditors. Under the Indian Bill such meetings need not be summoned except under directions from the Court or the official assignee or in pursuance of a requisition from a specified proportion of creditors (see section 17, and First Schedule, Rule 4). But the debtor is required to make at once full discovery of his estate and liabilities, and it will be then for the creditors to consider, with the assistance of the official assignee, whether any proposal which the debtor may make for a composition or scheme of arrangement should be entertained, or whether the debtor should not be adjudged bankrupt. The main provisions of the English Act with respect to the public examination of the debtor have been retained, and, although they may involve revelations which are not always pleasant to creditors, I think it is desirable in the interests of justice that they should be retained. We must be very careful against giving facilities to creditors for smothering up doubtful transactions.

"Where a debtor is adjudged bankrupt, his property is thereby vested, not, as under the English Act, in a trustee appointed by the creditors, but in the official assignee, to whom possession will already have been given under the receiving order. If the creditors desire to substitute a special assignee of their own nomination, they must take proceedings for doing so under Part V of the Bill. But it would appear from what has been said by the Calcutta Judges that such proceedings are not likely to be of frequent occurrence.

"The Official Assignee will not be assisted or hampered by any committee of inspection, but he will, as I have already said, be given extensive powers of inquisitorial control over the person and property of the debtor. I agree with Mr. Macgregor that such powers [illegible] find that the provisions of the Bill will be effective to remove the impediments which the official assignee experienced in the performance of his duties under the existing law. If section 25 of the Bill is compared with the corresponding section of the English Act, it will be found that I have ventured to confer on the official assignee somewhat larger powers of discovery than are given by the English law.

"The provisions of the Bill with respect to the bankrupt's discharge—by which is meant his discharge from liabilities, not his release from prison—follow closely those of the English Act, with one or two modifications suggested by Indian circumstances. I think that for the purpose of obtaining recognition of our proceedings in other parts of the British dominions it is important that on this point the English and Indian law should be substantially identical.

"I have added to the Bill a Part corresponding to Part II of the English Act, which disqualifies bankrupts for holding certain public offices. Similar disqualifications are already imposed by the several Indian Acts relating to municipal and other local authorities, but I think it is convenient that they should be gathered up and generalized in a Bankruptcy Act.

"In Part III of the English Act, which contains the rules for the administration of the debtor's estate, I have not deviated from the English Act except so far as is necessary for the purpose of meeting the peculiarities of Indian circumstances. Thus, the provisions as to execution are made to square with those of the Civil Procedure Code; the custom of paying rent monthly is recognised by limiting the landlord's right of distraint after bankruptcy to one month's rent; the language of one of the sections is so modified as to allow a debtor to retain, as necessaries, not only his clothes, bedding and tools, but the cooking-pot which is so indispensable to an Indian; and the power of attaching salaries and pensions is limited with reference to the provisions of

the Civil Procedure Code and of the Indian Pensions Act. The Calcutta Chamber of Commerce, in a paper which has only reached me within the last week, have renewed a suggestion which was made some years ago that the section relating to reputed ownership should be amended to meet a reported Calcutta case (*Gubboy* v. *Miller*, I. L. R. 6 Cal. 633). But I agree with the judicial authorities who considered the same suggestion in 1881 that it would be extremely dangerous to meddle with this very difficult clause, and that our safest course is to follow the English law. I am, however, disposed to agree with the Official Assignee at Calcutta that some further provision is required to prevent persons from trading on the credit of property which is in their possession but which does not really belong to them, and that for this purpose it may be desirable to legislate on the lines of the English Bills of Sale Acts, by requiring mortgages of moveable property to be registered, at all events, in certain classes of cases. My chief doubt is as to whether and how far transfers of moveable property should be recognized at all unless accompanied by possession. But in any case such legislation as is required would be most conveniently embodied in an enactment separate from the Bankruptcy Bill, and we are now considering in the Legislative Department what form it should assume.

"Part IV of the Indian Bill contains such of the provisions of Parts IV and V of the English Act as appear applicable to the official who will in almost every case discharge the functions both of the official receiver and of the trustee under that Act. I propose to retain for this official the title of official assignee which he now bears under the Indian Insolvency Act, and which apparently he wishes to continue to bear. I believe that the chief reason why the term 'official assignee' was not used in the last English Bankruptcy Act was that it was not desired to revive certain associations which had gathered round the official assignees appointed under earlier Acts, and it was thought that the official administrator might smell more sweet under another name. I am glad to think that the titles of the existing Indian assignees do not call up similar associations, and to hope that the actions of their predecessors smell sweet and blossom in their dusty surroundings. I have inserted a saving (section 58 (*3*)) for the rights and interests of the gentlemen now acting as official assignees, and when the Bill is in Committee I dare say that they will help me to see that this saving does all that is required. With respect to the mode in which the official assignee is to keep his accounts and make his payments and investments, I am anxious to make no greater change than is necessary in so much of the existing rules and practice as may have worked well, but it seems to be desirable as a matter of principle that money received on account of bankruptcy estates should, like money received by ordinary Civil Courts, be paid into a Government treasury or into a bank conducting treasury business for the Government, in order that there may be the security of the Government for its safe custody, and that the safeguards against the occurrence of error provided by the rules of the Government with respect to payments from Government treasuries may be brought into operation. In framing the clauses on this subject which I have inserted in the Bill, I have had the assistance of Messrs. Barbour, Westland and Hardie, all of whom are, I believe, of opinion that they will not fetter the official assignee in any unnecessary shackles of red tape.

"I need not dwell on Part V of the Bill, which relates to special assignees, and the provisions of which are not likely to be much used.

"Part VI of the Bill deals with the constitution, procedure and powers of the Courts which are to exercise jurisdiction under this measure. These Courts will be the High Courts of the Presidency-towns, the Recorder's Court at Rangoon, unless that Court is merged in a Chief Court before this Bill comes into operation, and any other Courts on which it may be found convenient to confer bankruptcy jurisdiction. It may possibly be desirable to confer such jurisdiction on the Courts at such places as Allahabad, Lahore or Karáchi, and the Bill has been so framed as to admit of the jurisdiction thus conferred being limited to particular classes of cases. Power is given to each of the High Courts at the Presidency-towns to delegate part of the bankruptcy jurisdiction either to a Small Cause Court Judge or to an officer of its own. I understand that the former arrangement is preferred at Madras, and the latter at Calcutta and Bombay.

"Part VII of the Bill, like Part VII of the English Act, enables the provisions of the law to be modified and simplified in the case of small bankruptcies. I have nothing to say about this Part, except that I am inclined to think that the pecuniary limit fixed for small bankruptcies might be raised.

"Part VIII of the Bill, following the English Act, contains stringent provisions for the punishment of fraudulent creditors and debtors. Suggestions have been made for adding to the list of offences dealt with by this Part of the Bill, but I think it will be found that provision has been made either by this Part of the Bill or by the Penal Code for all the offences which need be covered.

"Last of all comes a Part containing supplemental provisions, near the end of which will be found a clause for the distribution of certain unclaimed dividends for which creditors have not proved, and which appear from the note furnished to me by Mr. Turner, the Official Assignee of Bombay, to have been accumulating for some time in the Bombay Insolvency Court, and to amount there to some two lakhs of more. Mr. Turner has also referred in his note to a question which has been raised about the validity of certain rules under which the interest on unclaimed or undistributed assets has been applied towards defraying charges connected with the administration of insolvent estates. But if, and so far as, the validity of those rules is open to question, the doubt can only be set at rest by Parliamentary legislation, which would, I feel sure, be granted if necessary, and accordingly I have not dealt with the point in the present Bill.

"With these explanations, which have necessarily been of a somewhat technical character, I commend the Bill to the favourable consideration of the Council."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble SIR S. BAYLEY moved for leave to introduce a Bill to alter the constitution of the body corporate known as the Trustees of the Indian Museum, and to confer certain additional powers on that body. He said:—

"The matter with which this Bill has to deal is, practically, a small executive arrangement, which it becomes necessary to trouble the Council with; because the constitution of the Trustees of the Indian Museum was itself settled in a somewhat elaborate form by an Act of the legislature—XXII of 1876. The special object of this Bill is to give effect to an arrangement which had been come to by the Government of Bengal with the Trustees of the Museum and with the sanction of the Government of India. Apart from the collections in the Indian Museum, the Government of Bengal have for some years been gathering together a valuable Economic Museum, which was considerably assisted by the Revenue and Agricultural Department with a view to the Calcutta Exhibition of two years ago. They have also got an ethnological collection, a collection of Indian Art-ware and a Fine Art collection. These have all been under separate management under the Government of Bengal. There has been a good deal of difficulty in finding for them a proper local habitation and in arranging for their proper maintenance and custody and for their being available to the public. An arrangement has now been come to by the Government of Bengal with the Trustees of the Museum that all these collections shall be brought under the maintenance, control and administration of the Trustees of the Museum. But in order that the wishes of the Government of Bengal with respect to these collections—of which the property remains with them although the administration will be in the hands of the Trustees—in order that the Government of Bengal may have a proper amount of influence in their management, it is necessary that they should be represented on the body of the Trustees.

At present they are not so represented. For this purpose it becomes necessary to alter the number of Trustees at present regulated by the Act of 1876. The Trustees under that Act are sixteen in number; three of them are *ex officio*, namely, the Accountant General, a Secretary to the Government of India, and the Superintendent of the Geological Survey. Five of the Trustees are appointed by the Government of India; five represent the Asiatic Society; and the other three are elected by the general body of the Trustees. That is the present constitution. It will now be altered under the proposed Bill, and the number of Trustees will be twenty-one. Of the *ex officio* Trustees, only one, the Accountant General, will remain; the Government of India will still nominate five; the Asiatic Society will still be represented by five; and the new feature in the case is that the Government of Bengal will nominate five Trustees on its own account, and this united body will elect five additional Trustees to act with them.

"These are the main alterations of the constitution of the Trusteeship.

"The Bill will also enable the Trustees to deal with those collections which will be under their administration, although not their property; and the Bill will also provide for a subsidiary matter, which is that the Trustees shall have the power to make over to the Government of Bengal certain land attached to the Museum, in order that the Government of Bengal may thereon provide the accommodation which becomes necessary to meet the additional responsibilities which the Trustees of the Museum now take upon them."

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES RENT ACT, 1881, AMENDMENT BILL.

The Hon'ble MR. ILBERT presented the Report of the Select Committee on the Bill to amend the North-Western Provinces Rent Act, 1881.

NORTH-WESTERN PROVINCES LAND-REVENUE ACT, 1873, AMENDMENT BILL.

The Hon'ble MR. ILBERT also presented the Report of the Select Committee on the Bill to amend the North-Western Provinces Land-revenue Act, 1873.

The Council adjourned to Wednesday, the 2nd June, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 26th MAY, 1886.

GENERAL REMARKS.—General rain is reported from Madras, from parts of the Bombay Presidency, from Bengal, Assam, and British Burma. Good rain has fallen in Mysore and Coorg. With the exception of a few showers, there has been no rain in Northern and Central India.

Prospects continue fair in Madras and good in Mysore and Coorg.

In the North-Western Provinces and Oudh and in the Punjab the *rabi* harvest has been almost completed, with a generally good outturn.

In Bombay, the Central Provinces, and Berar *kharif* operations continue in progress.

In the Central India Agency prospects are generally good. In Rajputana tanks are in some places completely and in others nearly dry. The water in the wells is also falling.

In Bengal prospects are favourable; and cultivation is progressing rapidly.

In parts of Assam more rain is wanted for tea and other crops.

The public health continues good on the whole, though fever and small-pox are reported from parts of the Madras and Bombay Presidencies, of the Central Provinces, Punjab, and Rajputana. Cholera is still severe in Raipur.

Prices are fluctuating in the Punjab and rising in parts of Rajputana. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 26th)		
Bellary . .	Average last week since revised, ·25; this week, ·09.	Standing wet crops generally good; harvest paddy, yield below average.
Kurnool . .	Average ·30	Harvest second crop paddy completed, outturn average. Small-pox in three and cattle-disease in two taluks.
Ganjam . .	Average ·57	Slight small-pox in six, fever in three, and cattle-disease in four taluks; slight cholera. Average number employed on Chilka lake 595.
Kistna . . .	Average ·46	Slight fever; cholera in ten taluks and one division.
Chingleput (Madras) .	*Nil*	Standing crops fair, except in parts of one taluk where withering; harvest wet and dry grains, outturn below average. Fever and cattle-disease in one taluk.
Coimbatore . .	Average ·87	Standing crops good; harvest paddy and *cholum*, outturn generally above average. Fever in one and small-pox in parts of two taluks.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Tanjore	Average ·54	Standing crops generally good; harvest gregarly, outturn below average.
Madura	Average ·77	Harvest paddy, yield below average.
Malabar	Average 1·33	Standing crops ripening in one taluk; harvest third crop paddy, outturn below average. Small-pox in eight and cholera in three taluks.
Travancore	3·42	Small-pox and fever in parts.
		General Remarks.—General prospects fair.
Bombay—**(May 26th)**		
Kurrachee	*Nil*	Weather sultry; days warm. River at Kotri on 24th, 11 feet 5 inches against 13 feet 5 inches on same date last year. Fever in seven and cattle-disease in one taluka; one remaining case of small-pox recovered. Wheat, red rice, and *bajri* in Kurrachee 29, 30 and 33, in Sakro *nil*, 38 and 47, in Lohr 30, 40 and 40, and in Mirpkhand 32, 30 and 38 pounds per rupee, respectively.
Hyderabad	*Nil*	*Rabi* harvest almost over in the district; preparations for *kharif* cultivation in progress. River at Kotri on 24th, 11 feet 5 inches against 13 feet 5 inches on same date last year. Fever in two, small-pox in three, and cattle-disease in three talukas. Prices of grain steady. Days and nights very hot.
Ahmedabad	1·10	Weather very hot. Manuring and tilling operations commenced in some talukas. Public health good. Wheat 30 and *bajri* 32 pounds per rupee.
Baroda	*Nil*	Public health good. Standing crops in good condition. *Bajri* 28, wheat 22, and rice 18 pounds per rupee.
Surat	*Nil*	Fever in Mandvi and Bardoli talukas. *Juari* 38 and *nagli* 40 pounds per rupee.
Nasik	Nasik, 2·58; Sinnar, 2·55; Igatpuri, 1·51; Dindori, ·85; Niphad, ·73; Chandor, 1·82; Baglan, 1·27; Kalvan, ·95; Peint, 1·70.	*Rabi* threshing over; land being prepared for the next year's sowing. Sky cloudy; weather very hot. Public health good Wheat 34, *bajri* 33, and rice 17 pounds per rupee.
Colaba (Bombay)	Light rain from 20th to 22nd amounting to ·07.	Abnormal temperature 1° warm on 19th and 20th, *nil* on 21st and 22nd, 2° warm on 23rd and 24th and 3° warm on 25th; vapour in air excessive; abnormal wind from north on 19th and 25th and from north-east on 21st and 22nd; wind normal on all other days; thunder and lightning on 20th and 25th; lightning on 21st and 23rd.
Poona	Rain throughout the district; maximum in Haveli, 3·47; minimum in Junnar, ·24.	*Bajri* 34 and *juari* 45, in Poona *bajri* 32 and *juari* 35 pounds per rupee. Agricultural operations begun.
Ahmednagar	Rain general from 1·08 in Jamkhed to ·10 in Sangamner.	Reaping completed. Public health good. *Bajri* average 44 and *juari* 60 pounds per rupee.
Sholapur	Barsi, 1·09; Sholapur, ·50; Madha, ·76; Karmala, 1·49; Pandharpur, ·99; Sangola, ·61; Malsiras, ·33.	*Juari* 59 and *bajri* 43 pounds per rupee.
Dharwar	Navalgund, 6·30; Hangal, 4·86; more than 3·0 in Dharwar, Mugud, Mandargi, and Kalghatgi; more than 2·0 in Hubli, Gadag, Kod, and Karajgi; Nargund, 2·0; Bankapur, 1·50; Ron, ·70.	Sowing of rice commenced in Dharwar and Hangal; ground being prepared for early crops. Scarcity of drinking-water in Gadag and Kod. Cattle-disease in Kod; public health good. Rice 19 to 32 and *juari* 43 to 59 pounds per rupee.
Rajkot	1·80	Weather very hot. Fever, bowel-complaints, and skin-diseases prevalent; measles at Jafarabad. Wheat 38, *bajri* 32, and *juari* 40 pounds per rupee.
		General Remarks.—Rain in most districts of Gujerat, Kathiawar, the Deccan, and Southern Maratha Country. Scarcity of drinking-water in two talukas of Dharwar and two of Khandesh. Fever and cattle-disease in parts of eight and small-pox in parts of four districts.
Bengal—**(May 26th)**		
Chittagong	1·44	Weather seasonable. Sowing of *aus* paddy in progress; prospects of crops fair. Prices rising. Public health good.
Dacca	0·91	Sowing of *aus* and *aman* paddy still going on; prospects good. Sporadic cholera in Manickgunge.
24-Pergunnahs (Calcutta).	1·84	No crops on ground, except sugarcane. Ploughing going on. Public health generally good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Moorshedabad	Some rain	Weather hot. Ploughing and sowing of rice crops going on, but more rain wanted; indigo promising well. Public health fairly good. A few cases of cholera still occur.
Rungpore	2·93	Prospects of crops favourable; *cheena* being cut. Public health good.
Burdwan	0·74; more rain in Cutwa and Cutwa.	Sowing of *aus* progressing. Public health fair.
Bhagalpur	0·40; rain heavier in north of Ganges than in south.	Cultivation proceeding, and crops on ground much helped by rain.
Purneah	1·03	Rain has done much good. Prospects of crops fair; *bhadoi* sowings commenced. Public health fair.
Patna	*Nil*	Cotton still being collected; *boro* rice in arable lands commenced to be reaped; *cheena* and sugarcane growing well. Public health good.
Durbhunga	*Nil*	Early paddy sowings coming up well; prospects of standing crops continue promising. Public health generally good.
Hazaribagh	1·16	Weather very warm, latterly unsettled. Ploughing proceeding; no crops to report upon. General health good.
Cuttack	*Nil*	Weather hot, with clouds. Ploughing in progress; sowing of rice begun in some places. Price of rice unchanged. Public health generally good.
Midnapore	0·26	Weather seasonable. Tillage in full swing; rice sowings commenced in places. Public health normal.
Khoolna	1·56	Weather hot. *Aus* paddy being sown. Public health good.
Dinagepore	2·75; heavy rain throughout district.	Weather most unseasonable. Cultivation progressing rapidly. Two deaths from small-pox in Gungarampore.
Pubna (Serajgunge)	0·62	Crops doing well. Public health improving.
Gya	Slight rain at Jehanabad.	Crops doing well. Public health fair. Prices better than last year.
Chumparun	*Nil*	Indigo doing well. Prices stationary. Some fever and small-pox.
		General Remarks.—Rain general, except in the Patna Division and in Cuttack. Present agricultural prospects favourable; cultivation being rapidly pushed on; in several places sowing of *aus* rice and jute finished, and seedlings doing well; in some places *aman* rice sowing commenced, and indigo and sugarcane the only crops on ground doing well; *boro* rice harvest still going on in some places, with satisfactory outturn. Price of rice generally stationary. General health fair.
N.-W. Provinces and Oudh—**(May 26th)**		
Benares (May 24th)	*Nil*	Harvesting completed; supplies plentiful. Prices steady. Health generally good.
Rae Bareli („ „)	*Nil*	Weather at times cloudy; wind variable. Supplies ample. Prices steady. General health good.
Goraklipore („ „)	*Nil*	Harvest operations completed; preparation of land for *kharif* sowing in progress. Prices stationary. Health fair.
Fyzabad („ 25th)	*Nil*	Weather hot, with east wind. Prospects of crops on ground good. Prices steady. Supplies ample. Health of men and cattle good.
Lucknow („ 24th)	*Nil*	Heat increasing. *Sawan* is being harvested; irrigation of sugarcane and other summer crops going on. Markets well supplied. Prices slightly rising. Health of people good. No cattle-disease.
Partabgarh („ 25th)	*Nil*	East wind. Prices steady. Cholera reported from tahsil Patti; health of cattle good.
Allahabad („ „)	*Nil*	Weather steady; wind easterly. Harvesting finished. Markets well supplied. Prices steady. General health good.
Cawnpore („ 24th	*Nil*	Weather very hot. Harvest nearly finished. Prices stationary. Condition of people good; foot and mouth disease in Bilhaur.
Banda („ 25th)	*Nil*	Weather seasonable. *Rabi* all harvested. Markets well supplied. Prices easy. Public health good; cattle-disease in three villages.
Farakhabad („ „)	*Nil*	East wind nearly all the week. Prices steady. Supplies plentiful. Health of people fair.
Sitapur („ „)	*Nil*	Weather very hot and a strong wind blows from the east. Grain is gradually being removed from the threshing floors. Public health good.
Bareilly („ „)	*Nil*	Weather hot, with easterly winds. Prices fluctuating. No abnormal sickness.
Ballia („ „)	*Nil*	Sugarcane being irrigated. Health satisfactory.
Kumaon („ „)	*Nil*	Weather fair. *Rabi* not harvested in some parts. Prices falling. General health fair; measles in parts; cattle-disease abating slowly.
Agra („ 24th)	*Nil*	Cane and melon crops being irrigated. Prices steady. Health good.
Jhansi („ „)	*Nil*	Weather cloudy and sultry. Prices steady. Health good.
Meerut („ 25th)	*Nil*	Weather seasonable and hot. Ample supplies. Prices slowly rising. No sickness.
		General Remarks.—Weather seasonable. Harvesting operations completed in most districts and prospects good. Supplies are plentiful. Prices generally steady. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Tanjore . .	Average ·54	Standing crops generally good; harvest gingelly, outturn below average.
Madura . .	Average ·77	Harvest paddy, yield below average.
Malabar . .	Average 1·33	Standing crops ripening in one taluk; harvest third crop paddy, outturn below average. Small-pox in eight and cholera in three taluks.
Travancore . .	3·42	Small-pox and fever in parts.
		General Remarks.—General prospects fair.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 2nd JUNE, 1886.

General Remarks.—Rain is reported generally from nearly all parts of India, except Sind and portions of the North-Western Provinces and Oudh, Punjab, Rajputana, and Central India. The falls have been heaviest in the south of the Madras and Bombay Presidencies, in Northern Bengal, Assam, and British Burma.

In Madras, Mysore, and Coorg the crops are generally in good condition and prospects continue favourable. In Bombay and Berar preparations for the *kharif* continue. In Hyderabad the hot weather crops are still being reaped. Agricultural prospects are generally good in Central India, but in Rajputana the water-supply is failing.

In the North-Western Provinces and Oudh and the Central Provinces *kharif* preparations continue and prospects are good. The *rabi* harvest is still in progress in the Punjab.

In Bengal cultivation is forward, and agricultural prospects are generally very favourable. Prospects continue good in Assam.

The public health is on the whole satisfactory.

Prices are fluctuating in the Punjab and are rising in parts of Rajputana. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 2nd)		
Bellary	Average last week since revised, ·85; this week, ·31.	Standing wet crops generally good in parts of two taluks, but water insufficient to support them; harvest paddy, sugarcane and cotton, yield about average. Cattle-disease in two taluks.
Kurnool	Average ·47	Small-pox in three and cattle-disease in two taluks.
Ganjam	Average last week since revised, ·62; this week, ·82.	Slight small-pox in three, fever in two and cattle-disease in two taluks; slight cholera.
Kistna	Average ·52	Slight fever; cholera in ten taluks and one division.
Chingleput (Madras)	Average 3·79	Standing crops fair; harvest wet and dry grains, outturn below average. Fever abating in one taluk; cattle-disease in two taluks.
Coimbatore	Average 3·41	Standing crops good; harvest paddy and *cholum*, outturn paddy average, *cholum* above average. Fever in one taluk and slight small-pox in another.
Tanjore	Average 5·03	Standing crops damaged by heavy rain and wind; harvest gingelly and cotton, outturn below average. Slight cholera.
Madura	Average last week since revised, ·94; this week, ·70.	Health of people and cattle generally good.
Malabar	Average ·08	Harvest third crop paddy, outturn below average; first crop germinating. Fever in one, slight small-pox in eight and cholera in three taluks; cattle-disease in one taluk.
Travancore	0·73	Harvest paddy, yield average. Small-pox and fever in parts.
		General Remarks.—General prospects fair.
Bombay—(June 2nd)		
Kurrachee	*Nil*	River at Kotri on 31st May, 11 feet against 13 feet 7 inches on same date last year. *Kharif* sowings continue. Fever in seven and cattle-disease in three talukas; small-pox in three villages in the districts, eight fresh cases still remaining. Prices—wheat, red rice, and *bajri* in Kurrachee 26, 30 and 34, in Tatta 24, 40 and 40, in Shahbandar 20, 42 and 42, and in Kotri 28, 40 and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	River at Kotri on 31st May, 11 feet against 13 feet 7 inches on same date last year. Fever in three, small-pox in three, and cattle-disease in two talukas. Prices of grain steady. Severe dust-storm at Hyderabad on 27th May.
Ahmedabad	·00	Total rainfall 1·16. Weather very hot. Manuring and tilling operations continue. Public health good. Wheat 35 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Public health good. Standing crops in good condition. Prices—*bajri* 28, wheat 23, and rice 18 pounds per rupee.
Surat	Surat, ·04; Bardoli, ·03; Mandvi, ·85.	Slight fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 40 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik . . .	Rain in six talukas	Ground being prepared for early crops. Days very hot; weather cloudy. Public health generally good. Wheat 34, *bajri* 33, and rice 17 pounds per rupee.
Colaba (Bombay) .	·80 on 26th	Total of week ·89. Average abnormal temperature 3° warm on 26th, afterwards 1° warm; vapour in air normal on 20th, afterwards excessive; wind normal on 26th, abnormal wind southerly from 27th to 1st, strong on 27th and 28th; thunderstorm, with heavy showers of rain on 20th; distant lightning on 28th.
Poona . . .	Naval, ·12; Haveli, ·00; slight showers in four talukas, none at Sirur.	Cattle-disease in Junnar and Bhimthadi talukas. Ground being prepared for sowing. *Bajri* 33 and *juari* 45, in Poona *bajri* 30 and *juari* 35 pounds per rupee.
Ahmednagar . .	Slight rain	Public health good. *Bajri* average 44 and *juari* 59 pounds per rupee.
Sholapur . .	Barsi, ·42; Madha, ·13; Karmala, ·19; Pandharpur, ·31; Sangola, ·02.	Land being prepared for sowing in Barsi, Madha, Pandharpur, Sangola, and Malsiras talukas. *Juari* 59 and *bajri* 45 pounds per rupee.
Dharwar . .	Rain at all stations except Ron, varying from 2·15 in Kod to ·53 in Hubli.	Rice sowing in progress in western talukas; elsewhere land being prepared for sowing early crops. Public health good. Rice 24 and *juari* 49 pounds per rupee.
Kanara . .	Karwar, 2·09; Kumta, 4·08; Sirsi, 2·38; Haliyal, 5·04.	Total rainfall 5·74. Anthrax continues in Supa; small-pox in Akola, Sirsi and Haliyal; measles in Karwar. Common rice in Karwar 13; district average 13 seers per rupee. Weather cloudy and warm.
Rajkot . . .	*Nil*	Weather hot and cloudy. Public health generally good. Wheat 33, *bajri* 30 and *juari* 44 pounds per rupee.
		General Remarks.—Rain in most districts of the Presidency excepting Sind. Fever and cattle-disease in parts of eight; small-pox in parts of six districts.
Bengal—(June 2nd)		
Chittagong . .	5·22	Weather seasonable. Prospects of crops fair. Catterpillars have appeared at Fattickchari. Cattle-disease reported from Teknaff. Public health good. Prices steady.
Dacca . . .	2·37	Low lands being cultivated for paddy. Crops, chillies, and *til* being gathered. Prospects of crops good. Public health generally good.
24-Pergunnahs (Calcutta).	*Nil*	Sugarcane doing well. Sowings of early rice and jute commenced. Sporadic cholera in thana Joynagore. Public health generally good.
Moorshedabad . .	1·04	Weather unsettled. Sowing of rice crops progressing rapidly; prospects good. Sporadic cholera still reported. Public health fair. Price of rice stationary.
Rungpore . .	7·43	*Aus* and jute thriving well. Public health fair.
Burdwan . .	3·61	Prospects of *aus* and *aman* rice good. Public health good.
Bhagalpur . .	1·01	Cultivation of *bhadoi* crops progressing; prospects good. General health good. Prices steady.
Purneah . . .	6·30	Crops doing fairly. More rain wanted. Sowings being made wherever possible. Public health good.
Patna . . .	0·48	*Cheena* and sugarcane doing well. Collection of cotton continues. Sowing of *bhadoi* crops commenced in Barh subdivision. A few cases of cholera reported from Barh town, otherwise public health good.
Durbhunga . .	0·38	Prospects of early paddy, *moong*, and *cheena* promising. Lands being ploughed for *bhadoi* sowings. Prices stationary. Public health generally good.
Hazaribagh . .	0·10	Weather unsettled and stormy. Sugarcane doing well, mango yielding well. General health good.
Cuttack . . .	2·90	Weather hot and cloudy. Ploughing in progress. Rice sown in many places. Price of rice unchanged. Public health generally good.
Midnapore . .	1·42	Weather seasonable. Lands being prepared for cultivation. *Aus* rice above the ground in places. Public health good.
Khoolna . .	1·53	Weather hot. *Aus* paddy being sown. Public health good.
Dinagepore . .	Heavy rain throughout district; 9·16.	Weather unseasonable. Cultivation going on well. Cattle-disease prevalent. Three deaths from cholera in Bangabast.
Pubna (Serajgunge) .	3·03	Crops very good. Public health improved.
Gya . . .	1·53	Sugarcane benefited by rain. Ploughing going on. Prices moderate. Public health good.
Chumparun . .	1·37	Standing crops much benefited by rain. Land being prepared for *bhadoi*. Prices stationary. Some cases of fever and small-pox.
		General Remarks.—Good general rain during the week. Cultivation everywhere well forward and rice and jute sowings progressing rapidly in many places. *Aus* rice and jute are already thriving well. Sugarcane, indigo and *cheena* also much benefited by rain and their prospects are favourable. Price of rice stationary. General health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(June 2nd)		
Benares (May 31st)	*Nil*	Supplies ample. Prices steady. Health generally good.
Gorakhpore („ „)	Slight rain at Sadr	Tilling of land for *kharif* sowings in progress. Prices stationary. Health fair.
Fyzabad (June 1st)	Slight rain	Weather cloudy, with east winds. Sugarcane and indigo promise well. Prices steady. Supplies ample. Health of men and cattle good.
Lucknow (May 31st)	*Nil*	Weather very hot. East winds. Melon crops have suffered seriously from rain. Markets well supplied. Prices stationary. Health of people good. Condition of cattle fair.
Rae Bareli („ „)	*Nil*	Weather cloudy and steady. Easterly wind. Supplies ample. Prices steady. Public health good.
Partabgarh (June 1st)	A sprinkling of rain	Wind easterly. Indigo being sown. Irrigation discontinued and *sawan* being cut. Prices stationary. Measles have almost disappeared, but cholera still lingers in some parts of tahsils Kunda and Patti.
Allahabad („ „)	*Nil*	Weather close and cloudy. Supplies abundant. Prices show a tendency to rise. General health good.
Cawnpore („ „)	Slight rain in Cawnpore.	Weather cloudy at times and close. *Rabi* harvested. Prices steady. Condition of people good; foot and mouth disease in Bilhaur.
Banda (May 31st)	*Nil*	Weather not seasonable; east winds. Prices stationary. Public health good; cattle-disease in four villages.
Farakhabad (June 1st)	On 29th May average ·30 in district.	Prices steady. Health fair.
Sitapur („ „)	*Nil*	Owing to the unsettled weather there has been some difficulty in moving the grains from the Khaliyans. The rain has done good to the sugarcane. The weather now seems mending.
Bareilly („ „)	Rain in all tahsils	The rain has injured melons, but benefited sugarcane and indigo. Prices almost stationary with tendency to fall. Public health normal.
Ballia („ „)	*Nil*	Weather cloudy at times with strong easterly winds. Supplies ample. Public health good.
Kumaon („ „)	Smart showers	*Rabi* harvested; *kharif* germinating well. Prices falling. Few deaths from *mahamari* reported in Pargana Gangoli; cattle-disease decreasing.
Agra (May 31st)	In four parganas ·20 to ·40.	Weather cloudy. Prices steady. Health good.
Jhansi („ „)	·40	Weather continues cloudy. Prices show a fall in wheat and gram. Slight small-pox and cattle-disease.
Meerut (June 1st)	Rain all over the district, heaviest in Meerut itself on 28th.	Strong easterly wind followed by storms. *Kharif* ploughing commenced everywhere. Supplies ample. Prices steady. Health good.
		General Remarks.—Weather unsettled. Indigo and sugarcane have benefited from the recent rain. Prospects good everywhere. Markets well supplied and prices steady. Public health fair.
Punjab—(June 2nd)		
Hissar (June 2nd)	·40	Health good. Prices nearly stationary. Prospects of current harvest good.
Delhi . .	·24	Health good. Prices stationary.
Umballa . .	·40	Health good. Prices rising. Prospects of current harvest good.
Jullundur . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Ferozepore . .	*Nil*	Health good. Prices rising.
Amritsar . .	·30	Health good. Prices stationary.
Sialkot . .	*Nil*	Health good. Prices stationary.
Lahore . .	*Nil*	Health good. Prices stationary. Prospects of current harvest below average.
Mooltan . .	Slight rain	Health good. Prices stationary.
Rawalpindi . .	·40	Health good. Prices stationary. Prospects of current harvest average.
Shahpur . .	*Nil*	Health good. Prices stationary.
Dera Ismail Khan .	·09	Health good. Prices stationary.
Peshawar . .	*Nil*	Health good. Prices falling.
		General Remarks.—Rain has fallen in the Hissar, Delhi, Umballa, Amritsar, Mooltan, Rawalpindi, and Dera Ismail Khan districts. General health good, but fever is prevalent in Peshawar and in the Rawalpindi and Kushab tahsils; small-pox in Dera Ismail Khan. Prices rising in the Umballa and Ferozepur districts and falling in the Peshawar district, elsewhere stationary. Harvest in progress.
Central Provinces—(June 2nd)		
Nagpur . .	·05	Weather cloudy, with slight rain. Land being prepared for sowing. Small-pox and cattle-disease in parts. Prices steady.
Jubbulpore . .	·76	*Kharif* ploughing commenced. Health fair. Prices steady.
Saugor (June 1st)	·43	Prices risen in two tahsils. Fever, small-pox, and cattle-disease continue.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces *contd.*		
Seoni	·03	Weather cloudy. *Kharif* ploughings progressing. Health good. Prices steady.
Hoshangabad	Slight rain	Weather cloudy and stormy. *Kharif* ploughings continue. Small-pox and cattle-disease prevalent. Prices steady.
Khandwa	·19	Weather cloudy and close. *Kharif* ploughings in progress. Health fair. Prices steady.
Raipur	Occasional showers	Weather cloudy. Ploughings continue. Cholera and cattle-disease prevalent.
Sambalpur (May 29th)	·72	Weather cloudy and stormy. Land being prepared for sowing. Cholera in places. Prices steady.
		General Remarks.—Weather cloudy, with slight showers. Land is being prepared for *kharif* sowings. Fever, small-pox, and cattle-disease in places; cholera continues in Raipur. Prices steady.
British Burma—(June 2nd)		
Akyab	4·79	Total rainfall 6·07. Public health good; cattle healthy.
Bassein	2·0	Total rainfall 7·54. Public health good; cattle-disease in one township.
Rangoon	1·93	Total rainfall 10·15. Public health good; cattle healthy.
Amherst (Moulmein)	5·40	Total rainfall 19·16. Public health good; cattle healthy.
Pegu	2·53	Total rainfall 7·31. Public health good; cattle healthy.
Henzada	2·86	Total rainfall 5·60. Slight cholera in three townships; cattle healthy.
Prome	1·31	Total rainfall 1·77. Public health good; cattle healthy.
Tounghoo	3·15	Total rainfall 11·15. Public health good; cattle healthy.
Thayetmayo	1·45	Total rainfall 3·90. Public health good; cattle healthy.
		General Remarks.—Cholera in parts of Tharrawaddy and Henzada districts, elsewhere public health good. Cattle-disease in three districts, elsewhere cattle healthy.
Assam—(June 2nd)		
Gauhati	4·29 during week ending 1st instant.	Weather hot. Cholera diminishing in districts, but still prevalent in Sadr station. Cattle-disease reported from some mouzahs. Ploughing of sugarcane finished.
Sylhet	4·00	State and prospects same as last week. Cholera still reported.
Cachar	3·33	Weather warm. Cultivation for *aus* and *asra* crops continues. Common rice 15 seers 7 chittacks per rupee. Six deaths from cholera from Sadr, two from Karigora reported; general health good.
Dibrugarh	1·29	Weather seasonable. Prospects of crops good. Cholera still prevalent in North Lakhimpur, otherwise public health good.
Mysore and Coorg—(June 2nd)		
Bangalore	General rain throughout the State; at Civil and Military station 1·0; Bangalore district, 1·47; Mysore, 0·64; Kolar, ·30.	Crops generally in good condition; agricultural operations in progress; prospects of season favourable. Public health generally good. No material change in prices.
Mysore		
Mercara	·70	Good rain for preliminary rice cultivation. No change in prices of food-grains. Prospects of season and public health good.
Berar and Hyderabad—		
Amraoti (June 2nd)	3·03	Weather cooler. *Kharif* preparation continues. Wheat 22 and *juari* 26 seers per rupee.
Akola	*Nil*	Weather hot and sometimes cloudy. Ploughing operations continue.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch).

D. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REGISTRATION REPORTS OF THE SEVERAL PROVINCES FOR THE YEAR 1884-85.

No. 13 / 795-807.

Extract from the Proceedings of the Government of India, in the Home Department (Public),—under date Simla, the 4th June, 1886.

Read—

Home Department Resolution No. 15—617-29, dated the 22nd April 1885, reviewing the Registration Reports of the several Provinces for the year 1883-84.

Read also—

The Registration Reports of the several Local Governments and Administrations for the year 1884-85.

RESOLUTION.

OBSERVATIONS.—The Governor General in Council notices with satisfaction the progress which has been made in this important department of the Administration under Local Governments and Administrations. Regarding the operations of the Registration Departments as a whole, there has been,

1883-84	...	1,489,185
1884-85	...	1,627,650

as the figures in the margin show, an increase of 138,465 in the number of documents registered during the year under review compared with the results of 1883-84. The receipts have risen to Rs. 28,37,933 from Rs. 25,67,916, while an expenditure of Rs. 19,03,957 in 1884-85, compared with Rs. 17,02,760 in the preceding year, shows that the Department is alive to the necessity of affording the public increased facilities for registration.

2. The increase in the number of documents registered, which in itself testifies to the growing popularity of the system of registration, manifests itself alike in both classes of documents—those which it is compulsory upon parties to register and those of which the registration is optional. It is, however, possible that the operation of the Transfer of Property Act, which, by rendering compulsory the registration of all deeds of sale of immoveable property under Rs. 100 in value, practically effaces the distinction between sections 17 and 18 of the Registration Act in regard to such transactions, may have had some effect in producing the increased number of registrations shown as optional. The question of modifying the statistical returns with reference to the effect in this direction of the Transfer of Property Act is now under the consideration of the Government of India.

The following statement compares the number of documents of each class registered during the year under review with similar registrations in 1883-84; and in the tabulated statement appended to this Resolution further information of statistical interest is furnished in connexion with the operations of the Department:—

	Number of registrations affecting immoveable property.			Number of other registrations.	Grand Total.
	Compulsory.	Optional.	Total.		
1883-84 ...	815,976	465,596	1,281,572	207,613	1,489,185
1884-85 ...	886,610	516,579	1,403,189	224,161	1,627,650

3. The aggregate results for the various Governments and Administrations, as stated above, are on the whole satisfactorily distributed with regard to localities. To begin with the Madras Presidency, the progress which has been s

marked during the past few years has been fully maintained. In this presidency the number of registrations has risen from 478,134 in 1883-84 to 510,659 in 1884-85; and it is a satisfactory feature in this increase that it is even more apparent in the optional than in the compulsory class of registrations. In the latter the percentage of increase is 5·6, while in the former it is 7·7. The financial results are also very satisfactory, the income of the year having risen to nearly 7½ lakhs, showing an increase of 19 per cent. above the highest revenue obtained in any year since the organisation of the department. This increase is no doubt to some extent attributable to the introduction of a revised scale of fees, by which fees leviable on documents of high values were slightly raised. The Governor General in Council would be glad to know whether, concurrently with this enhancement of fees at the top of the scale, any reduction in the fees at the bottom, with which the poorer classes are chiefly concerned, has been found practicable. It is noticed with approval that in the expenditure of the department attention was paid to providing additional office accommodation.

4. In the Bombay Presidency an increase of 9·89 per cent. in the number of (mostly compulsory) registrations was also accompanied by a substantial increase in receipts, which amount for the year under review to Rs. 3,18,351. In only one district, Kanara, do results show any noteworthy falling off; and here the decline is attributed to diminished sea-borne export trade, in consequence of the opening of the Southern Mahratta Railway. In this Presidency a system of registration by a peripatetic agency, which is being tried experimentally, has not hitherto been financially successful, though it is stated to have proved a convenience in certain localities. The system is being given a further trial. The Government of India regards with approval all well-considered efforts to popularize or extend facilities for registration.

5. In the Lower Provinces of Bengal, the year's results show a very satisfactory increase both in registrations and in receipts. In the number of documents registered the increase amounts to 14·5, and in the receipts to 10·23 per cent., in the corresponding figures for the preceding year. The increase in registrations is fairly distributed between the optional and the compulsory class. A noticeable feature in the returns is the increase in deeds of sale of petty holdings and leases of agricultural land. The latter is, the Government of India is glad to observe, attributed to some extent to the conclusion of amicable arrangements between landlords and ryots in the Mymensing district, which has been unfavourably known as the theatre of long-standing agrarian quarrels. The Governor General in Council notices that in the opinion of His Honour the Lieutenant-Governor the increase of deeds of sale of petty holdings is not due so much to the necessitous circumstances of the owners as to increasing appreciation of the benefits of registration. The point is one, however, to which the Government of India is desirous that special attention should be paid by registering officers.

6. The Reports from the North-Western Provinces and Oudh for the last two years showed a decline in registration in the united provinces, which the Governor General in Council was disposed to attribute to defective organization. The Report under review shows an improvement on its immediate predecessors; but the Government of India agrees with the Lieutenant-Governor in thinking that there is still room for amendment. Last year there was in both Provinces a slight rise in the total number of registrations, the increase in the North-Western Provinces being due to a rise in optional transactions relating to immoveable property. This increase, however, may, in the opinion of the Local Government, be possibly due to the operation of the Transfer of Property Act, to which allusion has been made in the second paragraph of this Resolution. On the other hand, there was a decrease in the transactions affecting moveable property, the decline being attributed to a change in the system under which the sugar industry is carried on. Instead of making advances direct to the tenants who are cane-growers, sugar-refiners have, it is stated, begun to make advances to the landlords, thereby making one bond serve the purpose for which heretofore several were necessary. This change of system suggests matter for consideration from an agrarian as well as from a fiscal standpoint.

In Oudh there was some increase of registrations under all heads, the chief rise, however, being under the head of compulsory transactions affecting immoveable property, mostly deeds of mortgage and term leases. Mortgages of low value are, comparatively speaking, more frequent in Oudh than in the North-Western Provinces, but sales are fewer. The Lieutenant-Governor, it is observed, desires that the causes underlying this variation should be, if possible, ascertained; and the Government of India would be glad to learn in due time the results of any enquiry in this direction that may be instituted.

There was but slight variation in the total receipts and expenditure compared with the previous year, and the small increase in receipts which is shown was counterbalanced by a larger expenditure on improved administration.

7. The results of the year's operations in the Punjab show a slight increase in the number of compulsory, and a considerable decrease (4·6 per cent.) in the number of optional, registrations regarding immoveable property. The provisions of the Transfer of Property Act do not at present extend to the Punjab, and have therefore had no effect on the registration statistics of the year similar to that noticed in the case of the North-Western Provinces and Oudh. The net result was a small decline compared with the preceding year in the total number of documents registered. The principal causes assigned for the decline are the agricultural prosperity of the province and the liberal distribution of loans to agriculturists, which obviated the necessity of their contracting debts or selling property. There was, notwithstanding the decline in the number of registrations, a slight rise in the receipts of the department, while the increase in the expenditure from Rs. 88,630 to Rs. 1,00,147 shows that steps were taken to afford the people increased facilities for registration. Considerable changes were made during the year in the organization of the registering agency. The most important change was in the direction of gradually replacing official by non-official gentlemen at the head-quarters of nine districts as sub-registrars, thus entirely relieving the Treasury Officers of those places of registration duties. Another important change was the employment, for the first time, of Tahsildars in the work of registration, the object of this measure being to exact some return from this class of officers for the allowances they receive from the Registration Department, and at the same time to give relief to Treasury Officers whose registration allowances have been withdrawn.

As the special registrations under the provisions of section 89 of the Act impose work on the Registration Department, in respect of which it obtains no accession to its income, the Lieutenant-Governor considers that the Department should be relieved of this duty, and that it should be entrusted to Revenue officers. In the draft of a Bill to amend the Land Revenue Act now under consideration, it has accordingly been provided that certificates required under the Land Improvement Act, 1871, shall be forwarded to the Deputy Commissioners, who will cause them to be entered in the register of changes and occurrences affecting entries in the record of rights for the estate to which they relate. The Local Government considers that this will be a simple and convenient procedure, and, if accepted by the Legislature, should fully meet the objections of the Registration Department, which will no longer be concerned with work bringing it no advantage.

8. In the Central Provinces there was a slight decline in the total number of registrations. The decline was due to a falling off in the number of compulsory registrations affecting immoveable property; while registrations of the optional class showed an increase. The decrease in compulsory registrations was chiefly owing to a falling off in the number of registrations of mortgages of immoveable property in the Hoshangabad District, while the increase in optional registrations was due to the rise in the number of transactions in the Jubbulpore and Nimar Districts. Taking the results as a whole, it appears that registration has been stationary in the province for the past few years. Some important reforms, having for their object the provision of more efficient inspection, were either carried out or inaugurated. It is believed that these measures when completed will have a beneficial effect on the operations of the department. The income of the department declined slightly (by ·7 per

cent.), while the expenditure rose by 23·4 per cent., the increase in expenditure being due to the reforms referred to.

9. There has been an increase in British Burma in the total number of registrations, which rose from 8,176 to 9,495. The increase was general under all the principal heads of registration, but was most marked in the case of compulsory registrations of mortgage deeds affecting immoveable property, which advanced by 19·5 per cent. The value of such instruments rose from Rs. 40,62,208 to Rs. 71,18,817, the increase being chiefly due to the depressed state of trade in Rangoon and Akyab. The receipts and expenditure of the department rose by 23·2 and 24·2 per cent. respectively, the increase in expenditure being chiefly due to the strengthening of the establishment in the Rangoon Town office.

10. The operations of the Registration Department in Assam increased by 2,410 transactions. The increase was confined to transactions relating to immoveable property; the advance of 1,202 in the number of optional registrations being a satisfactory feature. As in the previous year, the most marked increase occurred in the Surma Valley districts of Sylhet and Cachar, in which more than five-sixths of the total number of transactions were effected. The receipts of the department increased by Rs. 2,780, and the expenditure, including refunds, amounted to Rs. 5,055 more than in 1883-84.

11. There was a slight rise in the total number of registrations in Coorg and there was a proportionate increase in the receipts and expenditure of the department, of 15·61 and 19·14 per cent. respectively.

12. In the Hyderabad Assigned Districts, exclusive of the increased work done in the Cantonment of Secunderabad, there was a satisfactory increase of 14·5 per cent. in the number of registrations under all heads. The districts of Amraoti, Buldana, and Ellichpur chiefly contributed to the increased business, which is due to the opening of additional sub-registry offices and to the introduction of increased special agency. The increase in the number of optional registrations shows, as remarked by the Resident, that the people are beginning to better appreciate the benefits arising from registration. The receipts and expenditure of the department increased by 12·1 and 11·6 per cent respectively, the increase in expenditure being mainly due to the substitution of Sub-Registrars on fixed salaries for those paid by commission

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations mar-

A. P. MACDONNELL,
Offg. Secy. to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 5th JUNE, 1886.

GENERAL REMARKS.—Rain is reported generally from all parts of India, except Sind, the North-Western Provinces, and the Punjab. In the south of the peninsula, in Assam, and in the tracts east of the Bay of Bengal, especially at Chittagong, the falls have been heavy.

In most parts of Madras and in Mysore and Coorg prospects continue good.

Preparations for the *kharif* are in progress in Bombay, Berar, and the Central Provinces, and have commenced in the North-Western Provinces and Oudh and in the Mooltan and Shahpur districts of the Punjab. The *rabi* in the Punjab is not yet completely gathered.

Agricultural prospects have improved in Rajputana, the water-supply in most States having been replenished by the recent rain.

Cultivation is going on well in Bengal, and the crops in the ground are thriving. The state and prospects of the crops in Assam continue satisfactory.

The public health is fair in Madras, Bombay, and the Central Provinces, and generally good elsewhere.

Prices, except in the Punjab, where they are fluctuating, are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras - (June 5th)		
Bellary . .	Average 1·50	Standing wet crops generally good; harvest second crop paddy, yield about average. Cattle-disease in two taluks.
Kurnool . .	Average 1·22	Small-pox in three taluks, cattle-disease in one.
Ganjam . .	Average 1·08	Slight small-pox in five and cattle-disease in three taluks; slight cholera. Average number employed on Chilka canal last week 180.
Kistna . . .	Average 3·46	River 2·5 feet over anicut. Slight fever; cholera in eight taluks.
Chingleput (Madras) .	Average 3·22	Standing crops good; harvest wet and dry grains, outturn below average. Cattle-disease in three taluks.
Coimbatore . .	Average ·54	Standing crops good, but *cholum* suffering from insects in parts of four taluks; harvest paddy and *cholum*, outturn average. Fever in one taluk, small-pox abating in another.
Tanjore . . .	Average last week since revised, 5·05; this week, 1·11.	Standing crops good, except in parts where some garden crops, damaged by late heavy rain and wind; harvest paddy and cotton, outturn below average. Slight cholera in one taluk.
Madura . . .	Average last week since revised, ·83; this week, ·46.	Health of people and cattle generally good.
Malabar . .	Average 3·06	Harvest third crop paddy, outturn below average. Fever in one; slight small-pox in nine, and cholera in three taluks.
Travancore . .	2·51	Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(June 9th)		
Kurrachee . .	*Nil*	Weather cooler. River at Kotri on 7th, 13 feet 6 inches against 13 feet 2 inches on same date last year. Fever in nine and cattle-disease in three talukas; small-pox in three villages in district, seven remaining sick from former number. Prices, wheat, red rice, and *bajri* in Kurrachee 26, 30 and 34, in Ghorabari *nil*, 40 and 30, in Shahbandar 20, 42 and 42, and in Johi 32, 40 and 30 pounds per rupee, respectively. Transplantation general. River at Kotri on 7th, 13 feet 6 inches against 13 feet 2 inches on same date last year. Fever in two, small-pox and cattle-disease in three talukas. High winds in Hyderabad. Wheat 25, *juari* 40, *bajri* 38, white rice 19, and red rice 30 pounds per rupee. Total rainfall 2·95. Agricultural operations continue. One death by lightning at Dhandhuka; public health good. Wheat 34 and *bajri* 31 pounds per rupee.
Hyderabad . .	Slight showers in Tando-Bago taluka.	
Ahmedabad . .	1·79	

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—contd.		
Baroda . .	·36	Public health good. Small-pox and measles prevailing in Naosaro. Crops in fair condition; preparations being made for *kharif* crops. *Bajri* 28, wheat 23, and rice 19 pounds per rupee.
Surat . . .	Rain in all talukas, maximum at Mandvi, 1·23; minimum at Bardoli, ·12; *nil* in Pardi.	Manuring commenced. Fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik . . .	Rain throughout the district; maximum at Igatpuri, 3·08; minimum at Baglan, ·03.	Land being prepared for *kharif* sowing. Public health good. Wheat 34½, *bajri* 33¾, and rice 17¾ pounds per rupee.
Colaba (Bombay) .	Rain from 2nd to 5th, heavy on 5th.	Total rainfall since 1st January 2·88, being ·58 below average. Abnormal temperature 1° warm on 2nd, 3rd and 8th, 5° cool on 5th, *nil* on all other days; vapour in air excessive from 2nd to 5th, afterwards normal; abnormal wind from south-east on 5th, from north on 7th and 8th; wind normal on all other days; thunder and lightning on 4th and 5th.
Poona . . .	Bhimthadi, 2·89; Maval, ·96; light showers in Junnar, Khed, Sirur, Purandhar, and Haveli talukas.	Cattle-disease in Junnar, Bhimthadi, and Haveli, and small-pox in Haveli. Sowing of rice and *nachni* in progress in petha Malshi and taluka Maval; in the rest of the talukas soil being prepared for sowing. *Bajri* 33 and *juari* 45; in Poona *bajri* 30 and *juari* 38 pounds per rupee.
Ahmednagar . .	Jamkhed, 1·50; Rahuri, 1·19; Nagar, ·62; very slight in the remaining talukas; Akola, *nil*.	Public health good. *Bajri*—maximum 60 pounds and minimum 39, *juari*—maximum 84 and minimum 48 pounds per rupee.
Sholapur . .	Barsi, 2·70; Sholapur, 1·01; Madha, 2·00; Karmala, ·93; Pandharpur, ·90; Sanjola, 2·10; Malsiras, ·10.	Land being prepared for sowing in Barsi, Madha, Pandhapur, and Malsiras talukas. *Juari* 59 and *bajri* 43 pounds per rupee.
Dharwar . .	Rain at all stations, except Karajgi and Hangal, varying from 4·42 in Nargund to ·03 in Mugud.	Rice sowing in progress in western talukas, elsewhere land being prepared for sowing early crops. Public health good; slight cattle-disease in one village of Hangal taluka. Rice 23 and *juari* 49 pounds per rupee.
Kanara . .	Karwar, 14·41; Kumpta, 12·30; Yellapur, 1·01; Haliyal, ·26.	Total rainfall 20·15. Sowing operations continue throughout the district. Anthrax in Supa and Karwar; measles in Karwar; small-pox in Honawar and Mundgod. Common rice at Karwar 14, district average 13¾ seers per rupee.
Rajkot . . .	·30	Weather hot. Public health generally good. Wheat 33, *bajri* 31, and *juari* 42 pounds per rupee. *General Remarks.*—Rain in all districts of the Presidency, excepting Sind. Preparation for sowing *kharif* crops in progress in most districts. Fever and small-pox in parts of nine and cattle-disease in parts of ten districts.
Bengal - (June 5th)		
Chittagong . .	25·54	Prospects of crops somewhat damaged; *pania aus* being reaped. Prices rising. Cattle-disease continues; public health good.
Dacca . . .	0·59	Prospects of crops good; *amun* paddy being sown in lowlands. Public health good.
24-Pergunnahs (Calcutta).	*Nil*	Sugarcane doing well; lands being prepared; sowing of jute and early rice begun. Public health generally good.
Moorshedabad . .	Some rain	Weather sultry. Sowing of rice still in progress; all prospects good. Price of rice stationary. Public health fair.
Rungpore . .	0·43	Prospects of early rice and jute favourable; land being prepared for *amun*; *cheena* harvested; *kaon* ripe in places. Public health fair.
Burdwan . .	0·01	Prospects of crops good. Public health good.
Bhagalpur . .	2·38	Cultivation very forward; *bhadoi* sowings in progress, but heavy rain in north has damaged them a little. Public health good.
Purneah . .	2·15	Crops doing fairly. More rain wanted. Sowings being made wherever possible. Public health good.
Patna . . .	*Nil*	*Cheena* being cut; sugarcane looks promising. Public health generally good; a few cases of cholera reported from Barh town.
Durbhunga . .	1·07	Late rain has done good to paddy and other standing crops; land being ploughed for *bhadoi* sowings. Prices remain stationary. Public health generally good.
Hazaribagh . .	*Nil*	Weather very close and sultry. Ploughing and sowing in progress all over the district; sugarcane doing well. General health good.
Cuttack . .	2·46	Weather cloudy. Ploughing in progress; sowing commenced. Price of rice a little higher. Public health generally good; scattered cases of cholera in interior.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Midnapore	*Nil*	Weather very hot. Cultivation still in progress. Public health good.
Khoolna	0·39	Weather hot. *Aus* sowing progressing; *aman* plants being ploughed. Public health good.
Dinagepore	0·6	Cultivation progressing well. Cholera reported from Patiram and cattle-disease from three thanas.
Pubna (Serajgunge)	*Nil*	Prospects of crops good. Public health fair.
Gya	0·61	Weather cloudy and threatening. Crops doing well; *cheena* being harvested. Prices moderate. Public health generally good.
Champarun	*Nil*	Indigo and other standing crops good; lands being prepared for *bhadoi* sowings. Prices stationary. A few cases of small-pox reported.
		General Remarks. Rain, though not general, fell in most districts during week; in Chittagong it was excessive and caused some damage to crop prospects. Cultivation generally going on well; *aus* rice and jute already sown in many places and thriving well; sugarcane and indigo prospects also favourable. Price of rice generally continues stationary. General health good.
N.-W. Provinces and Oudh—(June 9th)		
Benares (June 7th)	*Nil*	Weather off and on cloudy. Supplies plentiful. Prices steady. General health good.
Gorakhpore („ „)	Slight in Sadr	Weather close and cloudy. Preparation of land for *kharif* sowings in progress. Very slight rise in prices. Health fair.
Fyzabad („ 8th)	*Nil*	Weather hot, with west wind. Prices unchanged. Supplies ample. Health of men and cattle good.
Lucknow („ 7th)	*Nil*	Weather very hot. Supplies sufficient. Prices almost stationary. General health good; no cattle-disease.
Rae Bareli („ „)	*Nil*	Weather cloudy and sultry. Sugarcane and *jetwa dhan* are being irrigated. Supplies ample. Prices steady. Some cases of cholera reported from tahsil Digbijaiganj.
Partabgarh („ 8th)	*Nil*	Weather cloudy, with variable winds. Markets well supplied. Prices nearly stationary. Slight cholera in Patti tahsil, but health generally good.
Allahabad („ „)	*Nil*	Weather very hot and dry. Preparation for *kharif* commencing. Markets well supplied. Prices almost stationary. General health good.
Cawnpore („ „)	Slight showers at Akbarpur.	Weather close and cloudy. *Rabi* harvested. Prices steady. Condition of people good; cattle-disease in Bithur and Akbarpur.
Farakhabad („ „)	*Nil*	Indigo and cane promise well. Prices steady. Health of people fair.
Sitapur („ „)	*Nil*	The weather has cleared up. The grain is being rapidly removed from the *Khaliyans*. Public health and condition of cattle good.
Bareilly („ „)	*Nil*	Winds westerly; weather cool. Prices rising. Public health normal.
Banda („ 7th)	*Nil*	Weather cloudy. Prices easy. Public health good; cattle-disease in two villages.
Ballia („ 8th)	·60 in Rasra tahsil	Weather close. Prices steady. Health good.
Kumaon („ „)	*Nil*	Weather fine. *Kharif* weeding commenced. Prices stationary. Five deaths reported from *mahamari*; measles in district; cattle-disease on decrease.
Agra („ 7th)	*Nil*	Weather cloudy. Prices steady. Health good.
Jhansi („ „)	1·20	Weather cloudy. Lands being prepared for *kharif* cultivation. Prices steady. Health of people good; slight cattle-disease.
Meerut („ 8th)	Slight rain in Meerut on 5th.	Weather hot, with westerly winds. Cane and indigo germinated well. Supplies ample. Prices stationary. Health good.
		General Remarks.—Weather continues unsettled. *Kharif* ploughing in progress in some districts. Supplies ample and prices generally steady. Public health fair; a few cases of cholera reported, also cattle-disease.
Punjab—(June 9th)		
Hissar (June 8th)	*Nil*	Health good. Prices slightly rising.
Delhi	*Nil*	Health good. Prices almost stationary.
Umballa	·14	Health fair. Prices rising. Prospects of current harvest good.
Jullundur	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Ferozepore	*Nil*	Health good. Prices rising.
Sialkot	*Nil*	Health good. Prices stationary. Prospects of current harvest comparatively good.
Lahore	*Nil*	Health good. Prices stationary. Prospects of current harvest below average.
Mooltan	*Nil*	Health good. Prices falling.
Rawalpindi	*Nil*	Health good. Prices stationary. Prospects of current harvest average.
Shahpur	Slight rain	Health good. Prices rising.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	*Nil*	Health good. Prices stationary.
Peshawar	*Nil*	Health fair. Prices of wheat slightly rising, other grains falling.
		General Remarks.—No rain has fallen, except in Umballa and Shahpur districts. General health good; small-pox in the city of Dera Ismail Khan. Prices rising in the Hissar, Umballa, Ferozepore, and Shahpur districts, and falling in the Mooltan and Peshawar districts, elsewhere stationary. *Rabi* harvest operations in progress; *kharif* sowings commenced in the Shahpur and Mooltan districts.
Central Provinces—(June 5th)		
Nagpur	·52	**Weather hot and cloudy. Ground being prepared for sowing. Fever and small-pox in places. Prices steady.**
Jubbulpore	·10	*Kharif* ploughing commenced. Health fair. Prices steady.
Saugor (June 8th)	*Nil*	Winnowing nearly completed. Small-pox and cattle-disease continue. Prices steady.
Seoni	·74	Weather cloudy. *Kharif* ploughing in progress. Cattle-disease in places. Prices risen slightly.
Hoshangabad	Slight rain	Weather hot and cloudy. *Kharif* ploughings commenced. Small-pox and cattle-disease in places. Prices stationary.
Khandwa	·87	Weather cloudy and close. *Kharif* preparations continue. Health fair. Prices unchanged.
Raipur	*Nil*	Weather cloudy and hot. Ground being prepared for sowing. Cholera continues; cattle-disease abating. Prices steady.
Sambalpur (June 5th)	3·91	Weather cloudy and stormy. Sowing commenced. Cholera in places. Prices steady.
		General Remarks.—Weather cloudy and hot, with some rain. *Kharif* ploughings in progress, and sowing commenced in Sambalpur. Cholera continues in Raipur; fever and small-pox in places. Prices steady.
British Burma—(June 5th)		
Akyab (June 5th)	14·66	Total rainfall 20·73. Public health good; cattle-disease in two circles.
Bassein	10·77	Total rainfall 13·69. Public health good; cattle healthy.
Rangoon	7·05	Total rainfall 17·20. Public health good; cattle healthy.
Amherst (Moulmein)	9·04	Total rainfall 27·98. Public health good; cattle-disease slight.
Pegu	13·90	Total rainfall 21·21. Public health and health of cattle good.
Henzada	8·67	Total rainfall 14·27. Cholera and cattle-disease in one township.
Prome	4·67	**Total rainfall 6·44. Slight cholera in Prome town; cattle healthy.**
Tounghoo	2·82	**Total rainfall 13·97. Public health good; cattle healthy.**
Thayetmayo	2·25	**Total rainfall 6·13. Public health and health of cattle good.**
		***General Remarks.*—Cholera in three districts, elsewhere public health good; cattle-disease of a mild type in nine districts.**
Assam—(June 5th)		
Gauhati	5·82 during week ending 8th instant.	Weather hot. Cholera diminishing both in Sadr station and district; cattle-disease still in some mouzahs. Prospects of crops good.
Sylhet	7·02	State and prospects continue satisfactory.
Cachar	4·81	Weather warm. Ploughing for *aus* and *asra* crops continues. Common rice 13 seers 5¼ chittacks per rupee. Four deaths from cholera from Katigora and one from Hailakandi reported; general health good.
Dibrugarh	·87	Weather seasonable. Prospects of crops good. Cholera abating in North Lakhimpur; public health good.
Mysore and Coorg—(June 5th)		
Bangalore	General rainfall in Civil and Military stations, 3·0; Bangalore district, 1·84; Kolar, 1·3; Tumkur, 2·18.	Standing crops in good condition; prospects of season favourable. Public health generally good. Prices slightly risen in the Malnad district.
Mysore		
Mercara	2·12	Ploughing and sowing of rice in active progress. Slight fall in prices since last week. Prospects of season good. Public health fair.
Berar and Hyderabad—		
Amraoti (June 9th)	·42	Weather cloudy. Fields are ready for *kharif* sowings. Wheat 22 and *juari* 26 seers per rupee.
Akola	1·20	Preparations for *kharif* sowings continue.
Hyderabad	Average 2·27	Total rainfall since 1st January 7·17. Reaping of *tabi* crops continues. Recent rainfall slightly damaged standing *tabi* crops. Ground being prepared for sowing of *kharif* crops. General health fair. Monsoon set in on 6th instant. Prices—wheat 15, coarse rice 11½, white *juar* 20½, yellow *juar* 21½, and *tur* 14¼ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States— (June 5th)		
Indore	1·72	Total rainfall 6·68. Monsoon apparently set in.
Gwalior	*Nil*	Health good. Weather cloudy; heat intense.
Sutna	*Nil*	Weather seasonable. Health good.
Neemuch	·43	Weather warm.
Goona	·17	Few cases of small-pox in Goona city, otherwise health good.
Agar	·65	Health and prospects good.
Nowgong	·29	Total rainfall ·89. Weather cooler and no immediate prospects of the monsoon. Health good.
Bhopawar (Manpur)	Slight in Dhar and Manpur.	Weather cloudy. Health good. Prices of food-grain stationary.
Rajputana—(June 5th)		
Abu (June 9th)	·75	Weather again clear and cooler.
Sirohi („ 6th)	3·85	Tanks filled; wells good. Health good. Weather fine and clear again and cooler.
Marwar („ 4th)	2·83	About two months' fresh water brought into tanks by this week's rain. Health much improved. Weather cooler. Prices rising slowly.
Kherwara („ 6th)	2·99	A few tanks fuller; wells low. Indian-corn sowing begun at places. Health good. Prices steady. Heavy thunderstorm, with rain and floods on 1st; weather much cooler.
Meywar („ 5th)	1·26	Tanks and wells low. Health very good. Prices falling. Weather cloudy.
Pertabgarh („ „)	Very slight rain	Weather cloudy. Some water in wells. Health good. Prices rising.
Harowti („ „)	Deoli, 2·37; Tonk, ·20	Weather cloudy and rainy. *Kharif* operations commenced. Health good.
Jhallawar („ 4th)	Jhalrapatan, 1·75	Rain general throughout State. Prices slightly rising. Ploughing commenced. Health good.
Kotah („ „)	4·32	Health good.
Ajmere („ 8th)	Rain throughout district.	Weather cloudy. Small-pox in Beawar. Ploughing operations commenced.
Jeypore („ „)	·31	Prices steady. Health fair.
Kerrowlee („ 5th)	·73	Tanks and wells decreasing. *Makka* and cotton being cultivated. Health good. Prices steady. Weather seasonable.
Ulwur („ 8th)	Average of seven tahsils, ·28.	Health good. Prices steady.
Bickanir („ 5th)	1·85; Sujangurh, 2·05	Fever and small-pox prevalent. Prices low. Weather cloudy and hot.
Nepal—(June 3rd)		
Katmandu (June 4th)	1·10	Unusual rain has been slightly injurious to Indian-corn lately sown.

No. $\frac{99}{29\text{-}2}$.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Meteorology), dated Simla, 10th June 1886.

Read the following:—

Memorandum on the Snowfall of the Himalaya and Western Mountains to the end of April 1886.

The following is a summary of the reports received up to date.

The Deputy Commissioner of Dera Ismail Khan reports that the snowfall on the Suleiman range was unusually heavy in the months of January, February and March. The snow line, on the hills beyond the border generally, was lower than in average seasons. The snow remained on the higher ranges through February, and melted towards the commencement of March. After the beginning of March, there was a fresh fall on the Takht-i-Suleiman and the higher ranges, but it melted towards the middle of the month. The season was a severe one with unusual cold.

The report of the Deputy Commissioner of Bannu is to the like effect. The fall of snow on the hills near Bannu in the months of January, February and March was somewhat heavier than usual, but not sufficiently to call for any special remarks.

The Deputy Commissioner of Kohat reports a good fall of snow on the Safed Koh, and mountains and plains of Tirah, in January, to the depth of about 6 feet on the Safed Koh, and 1 foot on the Tirah plains. The Assistant Commissioner of Thull further reports an unusually heavy fall on the 15th and 16th February, which he estimates at from 10 to 15 feet on the Spinghar, (Safed Koh), 3 feet on the Tirah plains, and 1½ to 2 feet in the Kurram valley.

He considers that the snowfall of the season has been exceptionally heavy. There was a further good fall in March on the Safed Koh and Tirah and Ali Khel Maidans, but the heavy rain, which followed, washed it away from the lower hills. There were also two falls in April; on the 1st and 2nd, and again on the 21st and 22nd, on the Spinghar and other high mountain ranges.

The Deputy Commissioner of Peshawar, reporting on the Khyber and Tirah (Afridi) hills, says that the heavy rainfall of the 18th—20th January in the Peshawer valley (2·8 inches), was accompanied with a fall of 2 feet of snow on the Lakka Lar and hills of the Larghur range, and the fall must have been proportionally heavier on the higher Bara, Tirah, and Morgha ranges. This was succeeded by further falls on the 22nd—24th, and again on the 31st January and 1st February, and on the 15th to the 17th February. This last fall was 3 feet deep on the Landi Kotal, and 2 feet at Ali Musjid.

On the 17th and 18th March, a slight fall took place on some of the higher ranges, but it melted soon afterwards.

With respect to the hills adjacent to the Eusufzye Subdivision, the Assistant Commissioner sends a return of the total fall, on the several hills, during January and February, varying up to 9 feet, the heaviest being in the Utman Bolak Subdivision on the Banrah range.

At Murree, the total fall of snow in January is reported as 8 feet 8 inches, and on the hills adjacent to Kuhuta as 5 feet; in February, as 5 feet 8 inches at the former, and 9 feet on the latter; in March as 6 inches only at the former and 2 feet on the latter. In April the falls were insignificant.*

Sir O. St. John reports, from Cashmere, that the first snow fell on the Pir Panjal on the 31st September, *i.e.*, 15 days later than in 1884. There were slight falls only in October and November, and a further fall from the 16th to the 18th December appears not to have been very heavy. The latest report, dated 16th January, reports about 3 inches of snow on the 4th and 5th of the month.

* In the corresponding months of 1885 it was 12 feet 3 inches in January, 7 feet 7 inches in February and about 8 inches in March at Murree; and on the Nurrur hills adjacent to Kuhuta, 6 feet in January, 5 feet in February, and none later. At Murree, therefore, the snowfall of 1885 exceeded that of the present year, and, excepting in February, the same at Kuhuta.

As has been the case in previous years, the Resident Commissioner of Kulu sends very full and detailed reports on the depth of the snow, and gives a monthly tabular return of its thickness on the different passes. The following is a summary of this table for some of the principal passes in Kulu and Plach:

	Name of Pass.	Elev. Ft.	Depth of snow at the end of the month. January. Ft.	February. Ft.	March. Ft.	April. Ft.
Kulu ...	Rotang	13,000	12	10	7	10
	Hamta	14,500	12	10	? 4	? 24
	Babbu	10,000	4	4	4	7
Plach ...	Baleo	10,500	4	9	4	2
	Jalori	10,000	3	?	?12	3

The first important fall occurred on the 3rd January, when the valley was under snow down to 4,900 feet. This melted rapidly up to 6,500 feet, and the snow line remained about that level till the 22nd January, when another heavy fall brought it down to 4,500 feet. At the end of the month, the lowest snow was at 5,500 to 6,000 feet. Both in Kulu and Plach, the season was mild. It remained so during February; and at the lower elevations, there was little rain or snow; early in the month, and again on the 20th, the snow fell down to 5,000 feet; but, by the 1st March, it was certainly not lower than 7,500 feet.

The snowfall of March was normal. There were falls on the higher ranges, and, as late as the 29th, stormy weather whitened the hills down to 7,000 feet. But, on the whole, the weather was mild. The Hamta pass was closed throughout the month; but a few Lahaulis crossed the Rotang, though the pass was not open to traders; and the lower Babbu pass, though crossed by pedestrians, was not passable to laden coolies or animals.

A somewhat remarkable dust cloud enveloped the whole valley on the night of the 30th March, and lasted through the 31st, in such density, that the sun was not visible at any time of the day. A similar occurrence is reported from Lahaul.

In April, the weather in the valley was remarkably mild, though there were several snowstorms in the higher ranges, and there was a considerable amount of fresh snow. On the 23rd, there was a great snowstorm on the Rotang, and 4 feet of snow fell at Koksar bungalow.

The Superintendent of the Kailang Observatory in Lahaul, the Revd. A. W. Heyde, writes on the 12th March—"The present winter has been so far about a normal one, though there has been much cloudy weather. Since the 17th December we have had 27 days with snow, but not more than about 7 feet down here at Kailang (10,500 feet)."

In a subsequent letter dated 6th April: he says: "Since the middle of March we have had very rough weather and much snow; especially on the 19th, 30th and 31st." Describing the dust cloud above noticed, he says: "On the 30th in the afternoon, while the snow was densely falling, the whole valley was suddenly lit up for about 1 hour or more, by a gloomy yellow light, which was so strong that the white walls of the room looked quite yellow. When it had cleared up next morning, the fresh snow was everywhere up to the height of more than 15,000 feet covered with some yellowish dust-like substance."

In April the weather in Lahaul, unlike that in Kulu, was remarkably 'rough,' wet, and cold with much wind. Snow and rain fell on not less than ten days; from the 9th to the 12th, on the 16th, and finally, daily, from the 20th to the 24th.

Up to the 8th May (the latest date of report), it was extremely cold, and the 5th, 6th and 7th were rainy days. But Mr. Heyde remarks that the spring is more favorable for agriculture than that of last year; the snow having so far disappeared that the fields could be ploughed a month earlier than in 1885.

The Deputy Commissioner of Simla gives a return of the snowfall at Simla, Korkhai, and Kotgurh and Kilba in the Satlej valley, for the 3 months, December to February, as follows:—

	December 1885.	January 1886. ft.	inch.	February 1886. ft.	inch.
Simla ...	Slight	3	5	0	10
Korkhai ...	Do.	1	1	0	9
Kotgurh ...	Do.	1	4	0	10
Kilba ...	1 ft.	12	0	5	7

The Deputy Conservator of Forests, Bashahir Division, who resides at Kilba, sends the following report dated 24th March: "The depth of snow on the passes from the North-Western Provinces, Spiti, and Tibet is reported to be unusually deep. Above Kilba, 10,000 feet elevation, the depth of snow was measured ten days ago, and was over 4 feet.

I measured myself on a pass (9,000 feet elevation) from Sarparu to the Ganwi valley in Pundrabis, and found it 3 feet 6 inches in depth. At present the snow lies at 7,000 feet on the northern slopes, and about 8,000 feet on the southern.

At Mussoorie, 7 inches of snow fell on the 4th January, 6 inches on the 1st, and 1 inch on the 7th February: all other falls being insignificant.

The reports of the Senior Assistant Commissioner of Kumaon on the snowfall on the Johar, Dármá and Byams passes, are tabulated as follow:—

	December 1885.	January 1886.	February.	March.	April.
Johar pass ...	1 ft.	2 feet.	2 feet.	2½ feet.	2 feet.
Dármá and Byams	?	?	?	2½ „	?
Neighbouring ranges	?	?	2½ feet.	3 „	2½ feet.

The Deputy Commissioner of Darjeeling reports 1 foot 3 inches on the Sikkim passes, Jelep, Cho, Guathin, Donkia, Thanka, Giagong, and Noko in October 1885, 1 foot 6 inches in November, 4 feet 6 inches in December, 2 feet $1\frac{2}{7}$ inches in January, 1 foot $6\frac{3}{7}$ inches in February, and 3 feet 5 inches in March. The accuracy of the measurement in January and February, (to fractions of an inch), taken in conjunction with the remarkable uniformity of the fall, on all the passes, in every month, is a circumstance to be noted.

On the whole, it appears that, although there has been a considerable amount of snow on the North-Western Himalaya and the hills of Eastern Afghanistan during the past winter and spring; and in January and February, greater than usual, there has been less than last year, especially in the spring months; and it is certain that the snowy range, as seen from Simla in May, and now at the beginning of June, is less thickly covered, than in 1885, and the snow does not extend to such low levels.

At the same time the winds on the west coast of the peninsula have been less northerly; and, during the month of May, those in the Punjab have been decidedly more southerly and easterly than usual. On the Bombay side, therefore, there seems no present reason to anticipate a retardation of the monsoon.

The atmospheric pressure during May has been slightly below the average on the plains of the Punjab, Rajputana, Central India, Bombay and the Central Provinces, but above it on the hills, on the plains of the North-Western Provinces and Bengal, and most so in Bengal. This is favourable to the advance of the easterly branch of the monsoon, and generally to southerly winds; on the assumption, which experience renders probable, that the same general conditions continue to hold. As compared with the average of former years, the barometer is lowest in Bombay and on the west coast.

HENRY F. BLANFORD,
Meteorological Reporter to the Govt. of India.

Simla, 4th June 1886.

RESOLUTION.—Resolved that the paper be published in the Supplement to the *Gazette of India*.

C. J. LYALL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 9th June, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Colonel the Hon'ble O. R. Newmarch.
The Hon'ble J. W. Quinton.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
Colonel the Hon'ble W. G. Davies, C.S.I.
The Hon'ble Rana Shankar Bakhsh Singh Bahadur, C.I.E.

OUDH RENT BILL.

The Hon'ble MR. QUINTON moved that the Bill to consolidate and amend the law relating to rent in Oudh be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Sir A Colvin, the Hon'ble Mr. Hunter, the Hon'ble Rana Shankar Bakhsh Singh Bahadur and the Mover. He said:—

"I had intended, in accordance with the wishes of the Government of India and that of the North-Western Provinces and Oudh, to make this Motion during the last Calcutta session, but was prevented from carrying out my intention by the unfortunate illness of our hon'ble colleague Rájá Amir-ud-dowlah Bahadur. It was obviously desirable that in discussing the principles and provisions of this Bill the Council should have the assistance of a representative of the taluqdárs, whose interests are largely affected by it. And in fairness to them the Motion was suspended in the hope that the illness of Rájá Amir-ud-dowlah would be but of short duration. Unhappily my hon'ble friend is still unable to attend our meetings. In his temporary absence the Legislative Council has been reinforced by the addition of Rana Shankar Baksh Singh, Vice-President of the Taluqdárs Association and owner of a large taluqa in Southern Oudh, whose knowledge and experience will, I have no doubt, be of great value to us in carrying the Bill through its remaining stages. I hope also that we may still have the benefit of Rájá Amir-ud-dowlah's attendance either here or at the consultations on the Bill which Sir Alfred Lyall hopes to hold at Lucknow before it is finally read.

"The interval that has elapsed has given members an opportunity of making themselves acquainted with the contents of the lengthy papers which have been printed and circulated, and of appreciating the motives and reasons which have induced Government to recommend legislation on behalf of the Oudh tenantry. It has also enabled the taluqdárs to assemble and discuss the measure, and to inform the Local Government of their views

respecting it. When moving for leave to introduce the Bill I dwelt at some length on the necessity for legislation of the nature proposed, and even at the risk of repetition I shall again briefly invite the attention of Council to the prominent facts which in the opinion of the Government leave it no option in the matter.

"The province of Oudh is very densely populated; the bulk of the population live by agriculture, manufactures being few and inconsiderable; 79 per cent. of the cultivated area is occupied by tenants-at-will holding farms averaging something under five acres, and liable to annual enhancement of rent and to eviction at the mere will of the landlord; and of the total number of cultivators only one in 200 enjoys any protection against these incidents of tenure. The landlords consist of 346 taluqdárs and 180,000 proprietors of the zamindári class. Tenants with rights of occupancy under the Oudh Rent Act are 8,117, and tenants-at-will 1,800,000. During the last 15 years there has been a rise of rents which varies in different districts but averages for the province 24 per cent., the average rise of prices during the same period having been about the same. The power of ejectment has been freely exercised by the landlords, the number of notices having risen from 23,600 in 1876 to 92,602 in the current year. An examination of 28,477 tenancies in different districts made three years ago showed that of that number there were only 5 per cent. in which the component fields and the rent had remained materially unchanged during the last fifteen years, and that in 16 per cent. the tenants were all new-comers. The provisions of the existing law which allowed tenants to claim compensation for improvements on enhancement of their rent have remained a dead-letter, and those which gave a similar right on ejectment have been largely evaded by contracts.

"When bringing these facts to the notice of Council I stated that they showed that the cultivation of the soil was carried on by a body of raiyats holding under a tenure which might be described as a yearly tenancy in its simplest and most rudimentary form, and I declined to waste your time by attempting to prove, what is notorious to all who have thoughtfully considered the subject, that this form of tenure when the pressure of population is severe is the one most discouraging to agricultural efficiency and most likely to lead to the impoverishment and degradation of the cultivators of the soil.

"It has, however, been urged as an objection to the Bill that the condition of the tenantry has, on our own showing, improved, and that we have made out no case to justify legislation. On this point, I am quite prepared to join issue.

"As regards the improvement in the condition of the tenantry, special causes have been at work to bring about this result, the continued operation of which can no longer be relied upon. The substitution of the British for the Native Government after the pacification of the province enabled every man to enjoy the fruits of his industry in peace, and thereby gave a great stimulus to production. Good roads were everywhere opened out, and of late years railways have brought tracts hitherto practically inaccessible within reach of the markets of the East and West. The cultivation of waste land has extended with great rapidity. The latest returns available give reason for believing that the increase since settlement is some 20 per cent. These causes have efficiently promoted the prosperity of the province, and have enabled the tenantry, whose were rents largely regulated by custom, to share in it.

"But, as I have already stated, they cannot be expected to give rise to the same progress in the future as they have done in the past.

"The establishment of our Government substituted for the good old rule of each party taking and keeping what he could a strict reign of law, which affords security to landlords as well as tenants, but arms the former with the whole power of an irresistible Land Act, and, as always happens in such cases, gives the advantage in the struggle to the richer and stronger of the two parties. A generation has grown up accustomed to the benefits of British government; the main lines of roads and railways throughout the province have been completed; the area of culturable waste land is rapidly diminishing and customary rents are fast disappearing. We have reached the

summit of the watershed, and have to guard against a facile descent in the opposite direction. Moreover, the progress testified to by no means excludes exceptional cases of great hardship, which tend to increase in number.

"Here I may fitly reproduce a passage from the report of Mr. (now Sir) H. Davies quoted by Mr. Strachey when introducing the present Oudh Rent Act in 1867:—

'The doctrine that rents paid by labourers rising their wages from the soil cannot safely be exposed to competition, as expounded by Mr. J. S. Mill, is now generally accepted by political economists. It is seen that a rapidly increasing population is soon straitened for food, that they will contend fiercely among themselves for the payment of the rent of land from which alone in a purely agricultural country they can extract it; that such contention, whilst nominally and transiently raising rents, must lead to impoverishment and reduced wages; that with increasing poverty the secondary wants necessarily diminish, self-respect vanishes, whilst the multiplication of numbers is accelerated; that the end is to the landlord a shrunken rent-roll and deteriorated property; to the country a degraded and desperate peasantry. It is admitted, on the other hand, that rents paid by capital may safely be left to competition, that sensitive fund giving timely and early warning of over-exaction to the investor. Contending, not for bread, but for the fair interest of his money, he, unlike the starving cultivator, can and will separate from the soil. Whence is suggested an answer to the question often asked 'why allow competition for grain and not for the rent of land paid by peasants?' Because competition for grain has no tendency to multiply the number of mouths to be fed; but, by adjusting its price in proportion to the supply, rather puts people on their thrift; whereas competition for rackrent leases, by encouraging false confidence, by eventually lowering wages, and by minimising the prudential checks, has a direct tendency to stimulate the increase of population and in course of time to lessen the fund for its support.'

"This is a forcible statement of an economic deduction the soundness of which is unassailable. If any one wants an inductive proof of the proposition, he has but to study the history of the land question in Ireland for the last 50 years, and to consider the results there brought about by the operation of competition rents on a teeming agricultural population.

"I would ask Your Excellency and hon'ble members bearing in mind this theoretical argument to weigh the facts stated in the following passages from Major Erskine's report:—

'126. Although I am able to say that the condition and prosperity of the cultivating classes as a body have not yet been injuriously affected under the administration of Act XIX of 1868, I cannot regard the numbers of those classes, the size of their farms, the incidence of the rent they pay and the insecurity of their tenure without feeling that, as the inevitable multiplication of their numbers proceeds and competition for the land becomes more keen, their condition will under the present law deteriorate, and that it is advisable to take some action on their behalf. And I am strongly of opinion that any remedial measures which are adopted should be such as will protect all cultivating tenants as a body, and not merely those of certain castes or classes, those who are descended from former proprietors or those who have been in occupation for certain periods arbitrarily fixed. Interference is justified on the broad ground that it is imperatively necessary in the interests of the general community that the complete efficiency of the agricultural industry be maintained, and that that efficiency is under present conditions seriously threatened.

'127. The ordinary tenant now holds from year to year; he is liable to be called on each year to agree to an enhancement of his rent on pain of summary eviction if he refuses the enhancement; and he is moreover liable to summary eviction at the end of any year at the mere caprice of the landlord. The landlord need not give him notice to quit until the 15th April; and unless he is in a position to contest the notice, he must vacate the land by the 15th May or he may be forcibly removed. From all parts of the province it is said that landlords throw obstacles in the way of tenants seeking to make improvements, and withhold their consent to the construction of these works until the tenant contracts himself more or less out of the provisions of the Rent Act which secure him compensation. When the rent is a produce-rent, it is regulated by custom; but when it is payable in money it is mainly determined by competition, by which I do not of course mean that the lease of the tenancy or field is put up to auction (though even that is spoken of by the Deputy Commissioner of Unao), but that the landlord ordinarily takes as high a rent as he can get: it is to be feared that, except in rare instances, the landlord does not trouble himself to ascertain the relative productive capacity of his fields and to fix the rent of each on this basis; he treats the tenancy as a whole, and demands what he thinks the tenant will pay or what he thinks another man will give.

'128. Under a system which places him in such circumstances as are above described the Oudh peasant has little incentive to exercise self-denial, prudence and thrift. It may be true that even with greater security of tenure he would still be deficient in those characteristics; that he would still adhere to his old habits; indulge without restraint his sexual instincts and embarrass himself by extravagant expenditure on marriages, &c.; but at least he should be put in a position in which it would be to his plain advantage to be prudent and economical. Such a position he does not now occupy.'

"It has also been argued that the evils for the removal of which we propose to legislate are apprehended, not actual, and that until they come into existence legislation is unwarranted.

"If the evils were in themselves slight, or if the apprehensions of their approach rested on insufficient grounds, then no doubt there would be some force in the arguments; but I hope I have satisfied the Council that neither of these conditions exist in the present case, and that we have only too strong grounds to dread the approach of serious evils, and to believe that, if we do not interpose, their arrival at no distant date is a matter of certainty.

"If this be so, it is surely the duty of Government to take timely measures to keep out the deluge before the country is submerged—to lay by a store in the present plenteous years against the famine which awaits us. In homely phrase, prevention is better than cure. And measures adequate to ward off the disaster will fall far short of those necessary to remedy the calamities caused by it if we allow it to fall upon us.

"In this connection I would read to the Council an extract from a memorandum by Mr. Quinn, written when Commissioner of Sitapore, which is referred to in Major Erskine's report. Mr. Quinn is an officer of sound judgment and long experience in Oudh, and the division from which he wrote consists of one district the lowest as regards density of population, and of two in which the population to the square mile is under the provincial average:—

'I myself am convinced that the keen competition for land which is essential to rackrenting is only commencing, but will rapidly develop. Twenty years hence the whole of the culturable land in Oudh will probably be under cultivation. An ejected cultivator will then become a ruined man. I would earnestly protest against waiting till the cultivator has reached the destitute condition of the Bengal (he might more fitly have said *Behar*) raiyat, and till landlords have come to live up to an unduly inflated income. Now, when class animosities have not sprung up between landlord and tenant, and when the cultivator is still fairly prosperous, is the time for such a moderate reform of the rent law as may ward off the evils which alone the backward state of Oudh has hitherto kept in check.'

"In Southern Oudh, where population is more dense and the area of waste land is much smaller, the state of things dreaded by Mr. Quinn is within very measurable distance, competition rents are rapidly superseding those regulated by custom, and in one district there has been a rise of 49 per cent. in rents in 15 years.

"No candid observer of these facts can accuse the Government of precipitation in initiating the present proposals.

"I stated in my speech on the introduction of the Bill that most of the taluqdárs were understood to admit that under the circumstances some amendment of the existing law in the direction of the draft Bill is expedient, necessary and inevitable, and that I had grounds for anticipating that they would acquiesce in a measure of this kind. Since that speech was made the taluqdárs have met and considered the Bill, and in their corporate capacity have accepted its main principles. This acceptance was intimated to His Honour the Lieutenant-Governor in a reception of taluqdárs held by him at Lucknow in the end of April, and was formally notified to the Secretary to Government in a letter of the 24th of that month, giving cover to a memorial which will be found at page 9 of No. 2 of the printed papers on the Bill. As the memorial is short, I shall make no apology for reading it:—

'May it please your Honour,—We, the taluqdárs of Oudh, beg to submit a translation of the proceedings of a Meeting of the Committee of our Association held on the 22nd April, 1886, in deliberation on the Oudh draft Rent Bill, from which it will appear that we accept in their entirety the rules of seven years' lease and of the limitation of enhancement to 6¼ per cent. We, however, beg to suggest that land given on clearance lease, *canjar*, *jungle*, new alluvial land, *parti*, and land subsequently to this Bill rendered culturable by landlords at their own expense, should be exempted from the provisions of the above clauses.

'We would also, with due respect and deference, draw Your Honour's attention to sections 38 and 129 of the Bill, which, in our estimation, contain provisions derogatory to our position

and rights, and which also are, in our opinion, unnecessary for the protection of our tenants. These sections we wish to see removed from the Bill.

'We further respectfully beg to be allowed to point out what seem to us certain defects and errors in the Bill, which we consider should be removed, and also to suggest some useful provisions which may be inserted therein.'

"It confirms what I then stated—and before going on with my argument I may add that on the points to which exception is taken we are prepared to allow the fullest weight to the objections consistent with securing the objects at which we aim, namely, moderate stability of tenures for the cultivator, and a reasonable assurance that the power of enhancement will not be pushed so far as to make that stability a nullity, for no tenure is worth fixing if the enhancement is severe.

"I have thus, I hope, successfully met the objection as to the absence of any necessity for legislating on behalf of the Oudh tenantry. I now turn to the provisions of the Bill as introduced.

"With the Statement of Objects and Reasons will be found printed a letter from the Local Government, giving reasons for the form which the Bill assumes, and for the various minor alterations proposed in the present Rent Act. I shall not trouble Council with recapitulating these on this occasion. They will be fully discussed in Select Committee, and such of them as are finally agreed upon can be referred to so far as is necessary when the Report is presented and taken into consideration.

"I confine myself now to the more important changes, the first of which is that the tenant should have rest for seven years. For that period, dating from the last change in his rent or the last alteration in the area of his holding, we propose to bar enhancements of rent and the issue of notices of ejectment. The present Rent Act does not provide for the issue of notices of enhancement, and the consequence is that notices of ejectment are largely issued for the purpose of securing enhancement as well as for eviction—a fact which must be borne in mind in weighing the annual statistics respecting them. I have already stated that the number of these notices has risen from 25,714 in 1869, the year in which the present Act came into force, to 92,602 in the current year. I shall not trouble Council with the figures for each year, though I have them by me, but state simply that the total number issued in 18 years has been 1,869,964, which would give more than one for every cultivator in the province. This, however, conveys a very inadequate idea of the effect of the notices, for there are districts in which the issues have been comparatively few, and estates where they are little known; and here it is right that I should state that by far the largest proportion of notices has been issued on coparcenary properties, and that tenants on taluqdári estates, speaking generally, have been much less subjected to this form of pressure. Zamindári or coparcenary estates constituted two-fifths of the area of the province, and hence it may be conjectured to what an extent landlords of this class have availed themselves of the power of exaction or eviction with which the law arms them.

"Further the enquiries reported on by Major Erskine clearly brought out the fact that the number of notices issued was no satisfactory gauge of the degree to which rents were enhanced under their operation. A few notices on the boldest recusants are sufficient to induce the bulk of the cultivators to comply with the landlord's demands. In one large village of Kurmi tenants, the most careful and industrious class of cultivators in Oudh, in which a special enquiry was made in 1881, the Government demand was Rs. 400. The rent-roll had been brought up to Rs. 1,027. A stranger got possession, and by the issue of only 18 notices and availing himself of dissensions, among the cultivators succeeded in raising the rents of nearly all the tenants from 10 to 20 per cent. The Deputy Commissioner of another district writes in an annual report:—

'The results of the notices appear to have been much the same as last year. Over the greater portion of the Atraula tahsil enhancement of rent is practically made without having recourse to process by notice. The raiyat is actually able to pay something more than he pays at present; the landlord's karinda visits a village and calls on all the raiyats to sign a new kistbandi at enhanced rates. They all refuse at first, then gradually by dint of vigorous

harassment and no doubt occasional violence a few are forced to give in, after which most of the rest follow like sheep, inwardly resolving not to pay a penny more than they used to do. A few independent souls hold out, and are marked down for next notice season. The bulk of the agricultural population in this district are timid and spiritless and extremely ignorant peasants.'

"I could adduce much more testimony did time allow in support of my proposition that the number of tenants affected by the notices of enhancement largely exceeds that of those on whom those notices were served, large though that be.

"On the other side the tenants did not fail to avail themselves, so far as in them lay, of the means of resistance in their power against these attacks of their landlord. The law allows of a tenant giving a notice of relinquishment, and a considerable number of these were issued year by year. Where there were most disturbances at the instance of the landlords there were most relinquishments on the part of the tenants. The districts most distinguished for the action of the landlords in ejectment are those which show the greatest number of tenants' relinquishments. This, however, was a weak defence, and failed when it was most wanted, as in bad years the proportion of relinquishments to ejectments invariably fell, and the landlord was master of the situation. The Commissioner of Rai Bareli writes:—

"'The proportion of rents enhanced by notices of ejectment to rents abated by notices of relinquishment is as ten to one.'

"It requires no lengthy argument to prove that the existence and continuance of such a struggle between two parties so unequally matched must prove fatal to the prosperity of the localities where it prevails, and that the first step to be taken for the protection of the weaker and the ultimate good of both is to make the war to cease. This, as I have stated, is the first point aimed at by the Bill in the provisions fixing a statutory tenancy for seven years. That period is an arbitrary one, but it has been fixed in what seemed to be the interests of both parties, and has met with no serious opposition. Like all such arbitrary periods, it may be too long to please one party and too short to please another; it may be impossible to say why it should not be six or eight rather than seven; but it was not arrived at without mature consideration, and I need not detain Council with the reasons which led the Government to adopt it.

"The next point to be considered is what is to happen at the end of the seven years. Are we to allow the present law to come into force again, and had landlords with appetites whetted by seven years' abstinence to enhance and eject *ad libitum*. This is obviously impossible, and the mode in which protection should be afforded to tenants has been the subject of long and anxious consideration. It might have been proposed that rents should not be enhanced for the term of settlement, and that the landlord's power of ejectment except for non-payment of rent and breach of the conditions of tenure should be carefully swept away. This course, however, was not for a moment contemplated, and, as in Oudh it is beyond the sphere of practical politics, it may at once be dismissed from our consideration.

"Many authorities were in favour of allowing only such enhancements of rent as might be judicially determined by Courts or officers specially empowered to settle rents. This view has in theory much in its favour. The decisions of Courts of Justice are looked upon, if not as the perfection of human reason, yet as the fairest means attainable of doing right in the controversies between man and man. The Courts, however, must decide on evidence furnished to them by the parties, and are shut out from sources of information which, in cases like those involving the fixation of rents over large areas, are essential to the right determination of particular cases and vital as regards the welfare of the agricultural community. Officers specially appointed for the task may indeed after careful study and practical experience acquire such a knowledge of the different soils prevailing in selected localities and of the amount and nature of their produce as may render their decisions less dangerous than those of Courts giving judgment in isolated cases, but they must fail in allowing due weight to the countless diversities which make uniform rates of rent inapplicable to all the fields in a village, circle or other arbitrarily assumed

area. No satisfactory standard has yet been devised for determining the fairness of a given rent; and in the North-Western Provinces, where the Settlement-officer's assessment rates, which are easily ascertained, are generally used for this purpose, I can vouch from experience that no more difficult task is thrown upon the Revenue Courts than the trial of enhancement cases. No doubt, valuations of land and produce for the purpose of fixing rent are not uncommon in England and elsewhere, and, where farms are large and capital abundant, furnish a rough and ready means of settling disputes between landlord and tenant. Profits in such countries are large enough to allow a margin for errors in calculation on one side or the other; but in Oudh there is no such margin. The average size of the farms is but five acres, upon which the first burden must be the support of the cultivator and his family; and when the funds necessary for this are deducted, the balance available for the rent is too small to allow of room for miscalculations or error. Any increase to it, however trifling, can only be made at the expense of the subsistence fund, the diminution of which means the deterioration of the peasant, upon whom in the last resort the support of society depends. The system of determining rent at the present day in this part of India by estimating the money value of a proportion of the gross produce received its deathblow in the lengthened discussions on the Bengal Tenancy Act a year or so ago, and I hope it is unnecessary for me to take up time by arguing against it.

"Another difficulty attendant on the introduction of this system of judicial rents into Oudh I shall just touch on—that is the provision of machinery adequate and competent for the task. Existing establishments have been cut down to the lowest scale, and are working under high pressure; so that it would be obviously impossible for them to undertake the duty of settling rents in hundreds of thousands of cases at the close of the seven year period, and it would be equally impossible for Government to provide at once from other provinces a sufficient number of officers qualified to conduct an operation so delicate and so gigantic even if the successor of my hon'ble friend Sir A. Colvin saw his way to make the necessary financial provision for them—a contingency which the outlook at present scarcely warrants our contemplating.

"All projects for fixing rents judicially being thus abandoned, Government were driven to the alternative of leaving those most interested to adjust rents by mutual agreement, subject to a certain maximum imposed for the protection of the weaker party to the contract. That maximum is an increase of 6¼ per cent on the existing rent. This gives the landlord an opportunity of revising his rents four times within the currency of a 30 years' settlement, and would enable him under the most favourable circumstances to raise his rents about 27 per cent during that period, while it would at the same time afford him some assurance as to the principle on which the Government demand would be adjusted at the next settlement of land-revenue. Assessments would be based not on conjectural valuations of produce, but on rents actually paid.

"The proposal to fix the limit of enhancement at a proportion of existing rents is not free from objections; like all arbitrary limitations it is open to criticism, but if we are to wait until we can find a solution of the Oudh tenant-right question against which no objection can be brought, the amelioration of the condition of the tenantry must be deferred to the Greek kalends. The practical question is not what is a theoretically perfect system, but what changes in the present system, effective for the object we have in view, is open to the fewest and weakest objections.

"This limitation of enhancement proposed is based on a principle universally admitted, that sudden and harsh enhancements are injurious and should be restrained; and existing rents are taken as a starting point, because under the almost unrestricted influence of competition through a series of years and after a general and steady advancement of rents they are understood to be on the whole very closely approximate to the full market-rates, and to bear probably a more uniform relation to the net produce than could be attained by any official revision of them however carefully conducted. It is very probable that the landowner will at the expiry of each statutory period avail himself of his legal right of enhancement *should the circumstances of the market admit it*, but this is an incident of tenure not unknown in the most prosperous examples of British farming.

"The arrangement also possesses the undeniable advantage of certainty, thereby affording to the tenant at the same time security against sudden and excessive enhancement and a stimulus to devote his utmost skill and industry to the improvement of his holding during the seven years for which the law guarantees him undisturbed possession of it.

"The Government, however, are not unaware that change of circumstances may render useless or mischievous a hard-and-fast rule as to the maximum rate of enhancement, and in view of this we have taken power enabling the Local Government to vary within periods of not less than seven years the limits of the enhancement to which tenants with rights of occupancy are liable. I pointed in my speech on the introduction of the Bill to some causes which might render a fixed maximum oppressive or inadequate, and recent experience in Ireland, if such were necessary, warns us that a few bad seasons may have such an effect on rents fixed on what seemed at the time to be equitable principles. The power is no doubt an important one to be entrusted to the executive Government, but it would be put in force only on exceptional occasions, and its exercise would be carefully watched. It is not desirable that on every occasion where circumstances may call for a variation of the limit of enhancement the intervention of the legislature should be resorted to, and the whole question of the relations between landlord and tenant be thereby again opened up. It must also be borne in mind that Government has a substantial interest in holding the balance fairly between them on this point. As the interdependence of land-revenue and rents is becoming closer every year, any large reduction of rents must affect the Government revenue. I now pass on to the subject of ejectment.

"Enhancement and ejectment hang together. As I have pointed out on a previous occasion, provisions for protecting the tenant from enhancement are of little use if the power of ejectment at his will and pleasure is left to the landlord. A tenant in an agricultural community such as we have to deal with will agree to any demand which does not involve starvation sooner than part with what affords the means of subsistence for himself and his family; and the unrestricted power of ejectment is really a power to rackrent. That this power has not everywhere produced its natural consequences hitherto is due to the moderation of the majority of the landlords, and to the fact of the pressure of the population on the land not having reached its extreme limit in all parts of the province. But this state of things is passing away, and the moderation of landlords will be subjected to a strain too great to be resisted. Moreover, cases are but too numerous, where the power, chiefly I am bound to say among the smaller landlords, has been unsparingly exercised, and also where the lessees of absentee proprietors have not failed to push to the utmost the advantage which the law gives them. Limitations on the power of ejectment are therefore a necessary consequence of those on enhancement.

"The Bill proposes in the first instance to render more effective the provisions of the existing law regarding the payment of compensation for tenants' improvements. On this point I need not now dwell. The new section has been drawn on the lines of that passed for Bengal last year, and is likely to excite little controversy. The principles on which it is based were thoroughly discussed in this Council on more than one occasion, and have encountered no opposition.

"The mere payment, however of compensation for improvements is not a sufficient deterrent, as in the cases where it will operate the landlord is sure of receiving again a return for the money expended by him. Something further is required to prevent landlords from using the power of ejectment harshly or capriciously to the detriment of their tenants generally, and this the Bill furnishes in the shape of compensation for disturbance. A landlord who ejects a tenant willing to pay the statutory enhanced rent at the end of the seven years' period of occupancy must pay the

tenants so ejected one year's rent. Compensation for disturbance is not altogether a new idea in India. In No. 1 of the printed papers hon'ble members will find an account by Mr. J. B. Lyall of a system based on this principle which was introduced and worked by him for a time with the assent of the zamindárs in the Kangra district. Three years ago this Council accepted the principle and embodied it in the Central Provinces Tenancy Act. I have referred to my friend the Officiating Chief Commissioner as to the working of the provision. He tells me that the time that has elapsed since the Act came into force has been too short to allow of the law on this point being made much use of, or to admit of any valuable opinion being formed as to its operation. The principle was also contained in the Bengal Tenancy Bill as introduced, and was dropped out only at the last moment, having been found to be not required for occupancy-tenants. The non-occupancy-tenants were believed to be only a minority of the cultivators of Bengal, and it was considered that they would derive sufficient protection from the system of judicial leases established by the Act. In Oudh, circumstances, I need scarcely point out, are certainly different. The whole of the Oudh cultivators are practically tenants-at-will, and the Bill makes no distinction between classes among them, and establishes no favoured grade—a principle which has been steadily kept in view in maturing the present proposals. Compensation for disturbance has thus been for some time under discussion in this country, and Government has failed to discover any more effective means of checking evictions made with the view of securing harsh and unreasonable enhancements.

"A low scale of compensation for disturbance will not operate strongly, it is true, in checkingenhance ments where there is a keen competition for land, and the landlord can look forward to receiving at once from the incoming tenant a bonus sufficient to reconp the compensation paid to the tenant who vacates; but, unless under very favourable conditions, it must act in some degree as a deterrent to a landlord who wishes to proceed to enhancement by way of eviction. The necessity of paying down cash the recovery of which may be open to some doubt will in such cases make a landlord pause, and the knowledge that if ejected he will not be turned out on the world as a pauper will promote the self-respect of the tenant and nerve him to apply his skill and industry to making the most of his holding.

"This is, however, one of the points in the Bill to which objection is made by the Taluqdárs Association.

"In the discussions on this Bill the Government have shown themselves desirous as far as possible to meet the objections of the taluqdárs, and is my hon'ble friend can bring before the Select Committee any modification of our plan of compensation for disturbance, or any substitute for it which is likely to prove equally effective for checking capricious evictions, I can assure him of the fullest and most favourable consideration for it.

"I may, however, state here some considerations which have occurred to me respecting the objections to our proposal urged by the taluqdárs. Their objection, as I understand, is not so much to the imposition of a penalty on the exercise of their power of ejectment as to the indignity of being obliged to pay money to a tenant from whose presence they are anxious to free their estate. There is doubtless force in this objection in the case of a good landlord who desires for the benefit of his property to get rid of a bad tenant. But all landlords are not good and all tenants are not bad. And we are legislating to prevent bad landlords from doing what good landlords have not hitherto felt inclined or compelled to do. A bad tenant would in most cases be slack in the payment of his rent, and we have introduced a new provision into the Bill which will enable a landlord at any time to get rid of a tenant who cannot or will not pay up arrears of rent decreed against him. This is a considerable extension of the powers of realising arrears of rent by ejectment possessed by landlords under the existing law, and will, I hope, be taken as outweighing in some degree the obligation of paying compensation for disturbance to tenants ejected on other grounds.

"It is also urged that the right of compensation for disturbance at the close of the seven years' tenancy implies a right of occupancy in the land against the will of the landlord, and that the recognition of any such right in the tenants derogates from the rights guaranteed to the taluqdárs. This applies only to taluqdári estates, and has no bearing on two-fifths of the land of Oudh, which is not held by taluqdári landlords; and I would appeal to my hon'ble friend to consider before he pushes home the argument, whatever be its worth, whether, having acknowledged most candidly the necessity for affording tenants stability of tenure for a period of seven years and protection from excessive enhancements at the end of that period, the taluqdárs of Oudh are prepared to nullify the provisions on this last head by insisting on opposing for the benefit of bad landlords measures by which alone those provisions can be made a reality.

"The Bill as it stands enables any landlord to get rid of the obligation of paying compensation for disturbance by granting leases for a longer period than seven years, which, coupled with the power of requiring the prompt ejectment of a tenant who fails to pay arrears of rent decreed against him, limits the range and mitigates the stringency of the provisions objected to.

"My Lord, I feel I have trespassed on the patience of Council to an unconscionable extent, and I shall add only one word as to the objection taken to section 129 of the Bill, which reserves power to the Local Government to revise and settle rents under certain conditions. I explained on a former occasion that this section was drafted in order to define the liability of the taluqdárs under the sanads by virtue of which they hold their estates. I showed that even in case of small zamindárs the grant of such powers was not unprecedented, that it would really be a relief to good landlords to know exactly what they might and might not do without incurring the risk of penalty, and that it was supported by a warm friend of the taluqdárs. Their Association, however, objects strongly to the grant of this power to the Local Government; and as the enforcement of the conditions of the sanad is of the highest political importance and one on which no doubt as to the views of the Government of India and indeed of Her Majesty's Government at home should be allowed to remain, I shall leave the objection to be dealt with by the members of the Executive Council who follow me."

The HON'BLE RANA SHANKAR BAKSH then addressed the Council in the vernacular, a translation of his speech being read by the Secretary as follows:—

"My Lord,—As a Member of this Hon'ble Council, I feel it my duty to express my humble views on the broad and difficult questions involved in the Oudh Rent Bill, which is now before Your Excellency's Council. But I shall confine myself to a few remarks which will not take up much of the valuable time of the hon'ble members.

"From the results of formal and elaborate enquiries which have from time to time been made into a tenant-right in Oudh, it has been universally admitted that the landlords in Oudh have never practised extortion towards their tenants. In support of this I respectfully refer Your Lordship to the Minute of His Honour the Lieutenant-Governor, North-Western Provinces and Oudh, dated 28th December, 1882; to letter No. 135, dated 1st June 1883, from Major Erskine, the Special Commissioner; and to letter No. 3939, dated 21st December 1882, from the Secretary to the Government, North-Western Provinces and Oudh. In the face of such high authorities exonerating the taluqdárs from the charge of rackrenting and oppression, I humbly submit that I am quite unable to understand how such a charge can for a moment be supposed to be true or well-founded, and how the notorious Sahlamao case can be cited in support thereof.

"The sanads granted to the taluqdárs, when read with the letters of the 10th and 19th October, 1859, leave no doubt as to the fact of the protection therein afforded being confined, with certain conditions, to those under-proprietors who occupied an intermediate position between the superior proprietors or taluqdárs and tenants-at-will, and who were actually found to possess an occupancy-right in 1855. But in obedience to the will of Government, and with the sole view of

benefiting these intermediate holders, the taluqdárs have loyally submitted to the extension of the period, during which their claims may be heard, to twelve years. This is sufficiently proved by the following legislative enactments and official circulars to which I humbly draw the special attention of this Hon'ble Council:—

"By Act XVI of 1865 the period in question was extended from the 13th February, 1844, to the 13th February, 1856.

"By Act XXVI of 1866 under-proprietary rights in *sír*, &c., were conceded to sub-lessees and under-proprietors.

"By Act XIII of 1866 the right of redemption of mortgage was allowed, contrary to the express provisions of the sanad.

"By Circular IV of 1867 compensation was made to ex-proprietors in the shape of an under-proprietary title.

"By section 5, Act XIX of 1868, a right of occupancy was conferred on ex-proprietors in their *khudkásht* land.

"Having mentioned briefly some of the most valuable concessions made by the taluqdárs in favour of their tenants, I proceed to examine the broader question of an alleged 'tenant-right' in Oudh. On this important question I think I cannot do better than draw the attention of this Hon'ble Council to the elaborate and complete enquiries made in 1855, which resulted in the famous despatch of Her Majesty's Secretary of State dated 10th February, 1865, wherein it was finally settled and authoritatively declared that no tenant-right had ever existed in Oudh, that is, tenants-at-will possessed no right whatever in the land they cultivated. But the taluqdárs of Oudh, in deference to the wishes of Government and with the sole view of gaining their goodwill and promoting the welfare of their tenants, have, of their own accord, by a Resolution of the Committee of the British Indian Association held on the 22nd April, 1886, agreed to make two fresh valuable concessions in favour of the latter, and cheerfully accepted the rules of seven years' lease, and of the limitation of enhancements, subject to the following very important exceptions:—

"*(a)* *nautore* (land given on clearance lease);
"*(b)* *banjár*;
"*(c)* jungle;
"*(d)* new alluvial land;
"*(e)* *parti*;
"*(f)* land rendered culturable by the landlord at his own expense.

"Thus, my Lord, the taluqdárs of Oudh have on every occasion proved their loyalty and devotion to the British Government, have always earnestly endeavoured to gain its goodwill, and have always shown moderation and liberality to their tenants and those who hold under them. Under these circumstances, I respectively submit that the charge of rackrenting and oppression brought against them is far from being just and reasonable. But, as experience has shown that section 43, Act XIX of 1868, has not worked as well as could be desired, and that some amendment should be made therein in the interests of all concerned, I do not feel myself justified in saying that I hold a different opinion.

"Now, with Your Lordship's permission, I propose to examine some other provisions of the Oudh Rent Bill which, in my humble opinion, are open to serious objections.

"Among these I would, with due deference, draw Your Lordship's attention to the provisions of section 38 (A), regarding compensation for disturbance, and of section 129, authorizing the Local Government to interfere in cases of great mismanagement. These sections, I humbly submit, should be entirely expunged from the Bill, because 'compensation' presupposes the existence of a right in lieu whereof something is given; and as no tenant-right is proved to have ever existed in Oudh, nor can any be created, it does not appear for what the proposed compensation is to be given. If this compensation is for ejectment, it involves the loss of the proprietary rights of the landlords, and will inevitably have the effect of depriving them thereof. It will be a very great hardship to the landlord if, after being debarred from ejecting his tenant for seven years, and enhancing

his rent beyond one anna in the rupee on the expiration of that period, he is compelled to pay one year's rent to the tenant so ejected. Such a measure would almost be intolerable to the landlord. As an illustration of this I would humbly ask Your Lordship to look into the case of a tenant who has to pay an annual rent of one hundred rupees, and who, on being ejected after the expiration of the statutory period of seven years, is paid that amount, and the land is let to another tenant on a rent of Rs. 100 *plus* Rs. 6-4. During the next seven years the landlord will realize from the new tenant Rs. 43-12 only, which is less than one-half of the amount he has paid to the old one as compensation for disturbance; that is to say, out of a total rent of Rs. 100 the landlord will lose Rs. 56-4, and will have no prospect of realizing that amount from any one by any means, nor will he be able to recoup himself during the next fourteen years for the loss thus sustained. The compensation for disturbance rule, which is a very hard-and-fast rule indeed, will, in the long run, deprive the landlord of his power of ejectment altogether, and will give the tenant a right to hold the land for a practically unlimited period. Upon those who cannot afford to pay any compensation at all, it will have the effect of permanently transferring their properties to their tenants. It is the duty of this Hon'ble Council to have due regard for the rights and interests of all classes for whom it proposes to legislate.

"Another effect of this compensation for disturbance rule will be that it will be an irresistible temptation to tenants to shift their holdings as frequently as they could, and will set them wandering about in quest of a better land and a more lenient landlord from whom they could squeeze a larger amount as compensation for disturbance. One of the main objects of this Bill, as I understand it, is to give fixity of tenure to the cultivator, and to induce him to devote more time and labour to the cultivation of his holding. This object, I humbly submit, will be utterly defeated by the rule in question, which, diverting the tenant's attention from the cultivation of his holding, will fix it on compensation This, as a matter of fact, will lead to the deterioration of the soil, and will leave no chance of its improvement. What justification is there, I would respectfully ask, for depriving the party justly entitled of a portion of his right and giving it to another party which does not possess the shadow of a right? Will it be just and reasonable to deprive the landlord of the only means of getting rid of a bad tenant by making this objectionable rule applicable to all classes of tenants? The ejectment of recalcitrant tenants should, like that of defaulters, be made a rule rather than an exception.

"Now, with due respect and deference, I beg to draw the attention of this Hon'ble Council to the provision of section 129. I will not dwell upon the reasons and motives which have prompted the insertion of this section in the present Bill. I will leave it to the hon'ble members to consider and decide whether it is necessary to retain this section after adequate provisions have been made for fixing the term of the lease and limiting the enhancement of rent. The term of the lease having been fixed and the rate of enhancement limited, I humbly submit that this section seems to me to be entirely unnecessary and undesirable, and should be expunged from the Bill.

"In conclusion, I humbly pray that sufficient time may be allowed to the taluqdárs for submitting their objections to certain provisions of this Bill, and suggesting some useful provisions for insertion therein, and explaining the exceptions subject to which they have accepted the rules of seven years' lease and of the enhancement of rent. I beg leave to support the Motion that the Oudh Rent Bill be committed to the Select Committee for consideration and report."

The HON'BLE SIR STEUART BAYLEY said:—"I think, my Lord, that the Council are to be congratulated in the circumstances under which they are now proceeding with this Bill, as the announcement which we have just heard from the hon'ble member who represents the Taluqdárs' Association, that they accept the two main principles of the Bill, renders unnecessary a great deal of irritating controversy as to the legislation of 1868, and the circumstances of the inquiries which led up to it. There is a great deal to be said on both sides of the question, but it cannot be said without raising a certain amount of unpleasantness, and for that reason I am very glad that it has not come to be

discussed. With regard to the legislation of 1868 itself, I have only to make one observation, and that is that Sir John Strachey, who introduced the Bill himself, looked forward to the time when under the stress of unlimited competition it would be necessary to take fresh legislative action in order to strengthen the tenants' position; and he was careful to point out that the hands of the Government of India were as much unfettered in intervening in questions between the landlord and tenant in Oudh as in any province in India, except in regard to the one point as to the conditions under which the rights of occupancy should be exercised. He mentioned this, and he significantly added that it would be desirable that there should be no misunderstanding on that point. Nor need I now, after the exhaustive explanation which the hon'ble mover of the Bill has given us, enter at any length into the present condition of affairs, which has rendered legislation necessary. The Council are well aware that the province of Oudh is a purely agricultural country, that it is very thickly populated, and that, of the tenant-cultivators, over 99 per cent. are cottier tenants-at-will, liable to be ejected every year on a notice of one month. The inquiries instituted, and which lasted for several years, were very exhaustive, and the result, as the papers before you show, was that there was an unanimous opinion on the part of the district officers that, in view of the rapid rise in rents, of the rapid increase in notices of ejectment and of the general status of the cultivators which I have just pointed out, it would be absolutely necessary to strengthen their position with a view to giving stability to cultivation and encouraging improvements. Those were the conditions which led to the introduction of the Bill.

"Turning now to the speech of the hon'ble member who represents the taluqdárs,—a speech which follows the main lines of the memorial of the 23rd April, submitted by them,—I have first to remark that I think the Government ought to acknowledge heartily the loyalty and moderation with which the body of taluqdárs have advanced half-way to meet the wishes of the Government; and I think that, on our part, we ought to give very careful consideration in consequence to whatever objections they may urge to the special provisions of the Bill, and that as far as possible, with due reference to the security which it is the main object of the Bill to obtain for the cultivators, we ought to do our utmost to meet their wishes. The two points to which both in the memorial and in the hon'ble gentleman's speech the greatest attention is given are sections 38 and 129. Section 38 provides that, when a landlord elects to eject a tenant at the expiry of his lease without giving him the option of staying on at an enhanced rent, he shall give that tenant compensation for disturbance equal to one year's rent. Section 129 provides that, when the agricultural condition of an estate is greatly deteriorated owing to gross mismanagement, the Government shall have the power to send in an officer to settle the rents, and the rents so settled shall be stable for a period of ten years.

"I will, with the permission of the Council, deal with the latter of those two sections first. The history and object of that section, as has been explained by my hon'ble friend Mr. Quinton, was to give effect in a modified form and in a legal method to a well known provision of the taluqdárs' sanad. That provision is to the effect that they should be retained in possession of their estates so long as they maintained the agricultural prosperity of those estates and secured those holding under them in the possession of their rights. This clause in the sanad has been the subject of a great deal of discussion. Sir Charles Wingfield, who was the strongest upholder of taluqdári rights, refers to it distinctly as a condition which warrants the Government in interfering in order to prevent oppression; and Sir George Couper in one of his letters speaks of it as the Magna Charta of the Oudh rights. Well, no doubt that condition in the sanad does give Government the power of interfering to prevent oppression, but the terms are somewhat vague and indefinite, and the penalty—no less than confiscation or sequestration—is so enormous that it is not to be wondered at that the Government have been very reluctant to take executive action under that condition. As a matter of fact, it has only once been acted upon. It therefore it appeared possible that, instead of leaving this tremendous "bludgeon clause" hanging over the heads of the taluqdárs, a modified penalty to be exercised under

the definite provisions of the law might be found to meet all the requirements of the condition, and might not be unacceptable from that point of view as a definite and milder penalty to the taluqdárs. For my own part I cannot confess to feeling any surprise that, on consideration, the taluqdárs have preferred to go on living under the same indefinite terror, to which they have become accustomed, rather than to accept a more definite, although very much milder, penalty about which they could only predicate that in occasional cases it might be reverted to with less reluctance than the severer one. Speaking for myself, I should say that this Bill gives generally such protection to the raiyats as to render it unnecessary to have recourse to special and exceptional action in regard to individual ill-doers. Consequently, if the proposal is accepted by the Local Government, I shall without regret see the section expunged by the Select Committee.

"The question of compensation for disturbance is a much more difficult one. It is discussed very fully and carefully in Sir Alfred Lyall's letter of the 21st December, 1883; it runs in and out throughout the whole correspondence, is perpetually cropping up, and argued first from one point of view and then from another; and when you think it is put aside for the moment, you find that every question comes back to this as the main prop on which almost all the other provisions of the Bill hinge. The point is this—In order to give stability to the cultivator and encourage him to make improvements, Sir Alfred Lyall has laid very great stress upon the necessity of giving the sitting tenant at the end of his seven years' lease option of holding on at the enhanced rate. I should explain that under the accepted provisions of the Bill he gets under a seven years' lease and a limit on the enhancement. Sir Alfred Lyall then says that the sitting tenant ought to have the first option of a new lease at the enhanced rate. But, if side by side with that provision you leave it in the power of the landlord to eject a tenant without compensation, what becomes of the safeguard that Sir Alfred Lyall thinks absolutely necessary? The condition that the sitting tenant shall have the first option of the renewed lease at an enhanced rate is nullified; as a matter of fact you come up to almost unrestricted competition. On the other hand, the position taken up by the taluqdárs is very strong. I cannot quite follow my hon'ble friend in the first of his arguments that, because a tenant has no occupancy-right, therefore, the offer of compensation is a distinct deduction and derogation from the proprietary right of the landlord. It is true that the decision of the Government was that the tenant has not, and never had, an occupancy-right which could be enforced; but it is well known—and I do not think that the fact will be disputed anywhere—that the tenant in Oudh, as elsewhere, has by custom an hereditory occupation. That was the opinion of Lord Lawrence's Government in their letter to the Chief Commissioner of the 16th February, 1886, in which it is said:—

'3. The evidence adduced tends to show that under the Native Government of Oudh there was vested in the raiyat no right of occupancy which could be successfully maintained against the will of the landlord.

'4. It is at the same time held by no means certain that the landlord had a legal right to oust a raiyat who continued to pay the customary rent, and there existed a prevailing usage by which the occupant-cultivators did, in point of fact, generally maintain the hereditary possession of their lands at the customary rents.

'5. It is unnecessary here to enquire whether this usage was the remnant of a former right of occupancy surviving thus imperfectly a long reign of anarchy, or whether it sprung spontaneously out of the mutual relations and necessities of landlord and raiyat. It is admitted very generally to exist, and in some quarters with such strength and distinctness as closely to resemble an actual right.'

"Well, it is admitted the raiyat's status is a question of custom and not of right, but, admitting this, I cannot see that compensation involves any real weakening of what is generally understood as the landlord's proprietary rights. Apart however, from this objection, I think that from the landlord's point of view there is objection to be taken very strongly on two other sides of the question. The landlord might very properly say 'Why, if I want to get rid of a recalcitrant tenant, should I be fined for it?' Or, even if he does not look at the matter from that point of view, he may very strongly say 'Why, when I find it essential to the peace of the neighbourhood, owing to the carelessness of

a man or to his disposition to cause trouble, or even owing to caste prejudices—if I find it necessary for my own peace and perhaps to retain my other tenants—if I find it necessary to oust him—why should I have to make him a present of a year's rent?' This really becomes a premium on turbulence and misconduct, and from that point of view I must confess there is a great deal to be said in favour of the objection; and Sir Alfred Lyall, in the letter from which I have quoted, had not failed to notice the point. He discussed it and tried to find a remedy; the remedy which he proposed, or rather discussed, was that, when it became a question of getting rid of a recalcitrant tenant, a landlord should be able to get rid of him by satisfying the Revenue Courts that he had sufficient reason for so doing. Sir Alfred Lyall in discussing the matter came to the conclusion that in the first place this would involve a great deal of unpleasant litigation—litigation which would probably cost the landlord quite as much as the year's rent which he was asked to pay as compensation for disturbance, and which, if the cost were thrown on the raiyat, would ruin him; and further he objected that the particular grounds for getting rid of the man were such that the question would be one in which no Court could come to a satisfactory decision. He consequently rejected that suggestion and fell back upon the proposal now made in the Bill. The point is one on which there is a great deal to be said on both sides, and on which I confess I should like to reserve my final opinion. I think that, while we ought to attach very great importance to the object Sir Alfred Lyall has in view, the particular method here brought forward in the Bill is one to which an equal importance does not attach; that is to say, if this security can be attained by any other method, or if after full consideration the local officers and the Local Government think that the Bill gives sufficient security without any further safeguards, then I for my part should be very willing to be guided by their advice.

"The other points discussed in the memorial are mainly questions which must be viewed in the light that may be thrown upon them by local custom; they are consequently questions upon which I am not prepared at present to give any opinion at all, and they will be more properly discussed in Select Committee. I am glad to learn from what my hon'ble friend has mentioned that before the question comes before the Select Committee it is the intention of the Lieutenant-Governor of the North-Western Provinces and Oudh to meet the taluqdárs at Lucknow, and to go into the question again fully with them. Under these circumstances I think the Select Committee will have the best possible advice; their task will be very much simplified, and they will be able to arrive at a much more satisfactory decision than they otherwise could have done.

"Finally, I have only to say that, believing as I do that this Bill is calculated to do much for the agricultural prosperity of the province, I think that Sir Alfred Lyall is to be congratulated on having initiated it. I think also that he is to be congratulated on the confidence in his justice and farsightedness which he has inspired in the taluqdárs, and which has influenced them in accepting the two main principles of the Bill, although no doubt they derogate somewhat from their present powers."

His Excellency THE PRESIDENT said:—

"I shall only trouble the Council with a very few observations, and I cannot preface them in a manner more consonant to my own feelings and to the sentiments which I know to prevail amongst my colleagues than by congratulating them and myself upon the acquisition of our new member, who has already shown by the ability with which he has expressed his views what a useful and worthy accession he is likely to prove to the Legislative Council of the Government of India.

"At our last meeting in Calcutta I explained that the reason why we did not then proceed with the the Bill was the unavoidable absence of our colleague, the Hon'ble Rájá Amir Hosan, who was prevented from taking his place among us by severe illness. I added, however, that the Local Government, in order to save time, intended to publish a draft of the Bill, and to collect the opinions of competent authorities upon it. Rájá Amir Hosan is, to our great, regret still

disabled from attending here, but a very well-qualified representative of the taluqdárs, the Vice-President of their Association, has been appointed to assist us by his advice. The Bill has now been examined by the taluqdárs, and we are in possession of their views; and I am glad to learn that in the main principles of the Bill they have expressed their acquiescence. I myself am fully convinced of the expediency of legislation on the lines of this Bill, and, while congratulating the taluqdárs on the moderation they have shown, I am glad to understand from the previous speakers that there is a disposition to meet, as far as possible, the wises of the Association on minor points.

"There is one special matter, however, upon which I should like to say a word in reply to what has fallen from my hon'ble colleague Rana Shankar Baksh Singh, and that is the question of compensation for disturbance. I understand that the taluqdárs are inclined to consider that, were a claim of this sort to be conceded to the tenants, it would be tantamount to an acknowledgment of a right of permanent occupancy in their favour. Now, this is a matter which has for many years past occupied my attention, and I must confess that in my opinion no such consequences can be held to flow from it. When a yearly tenant is unexpectedly evicted from his holding, the injury he sustains is not limited to the loss of his improvements, but it entails a further loss occasioned by the disturbance introduced into his plan of life and his industrial undertakings. As a landlord I have myself always recognized the equitable claim of the tenant-at-will to compensation on this account, especially under a system of agriculture such as that which prevails in Oudh and in my own country, but I never held nor admitted that it implied either a proprietary or an occupancy right. When, moreover, we remember that this claim only amounts to one year's rent (in Ireland it was assessed at between four and seven years), and that it can be neutralized by the grant of an eight years' lease, I do not think that its recognition by the legislature can be complained of by any one. I admit however, that the interests of the landlord in regard to the tenant's disturbance claim should be safeguarded by allowing him to plead certain considerations as an offset or justification. However, I will not dilate further on this particular point, because it falls more properly within the competence of the Committee to which this Bill has been referred. I will only conclude by saying that there is now no reason for further delay, and the Bill will proceed in due course through the regular stages. Between this and the time when the Select Committee will meet, the criticisms of the public on the Bill will be invited, and it will be examined anew by the Association of the taluqdárs and discussed with His Honour the Lieutenant-Governor and Chief Commissioner, who will visit Lucknow for the purpose."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES RENT ACT, 1881, AMENDMENT BILL.

The Hon'ble MR. QUINTON also moved that the Report of the Select Committee on the Bill to amend the North-Western Provinces Rent Act, 1881, be taken into consideration. He said:—

"When I obtained leave in Calcutta to introduce this Bill and that to which the following Motion refers in February last and refer them to a Select Committee, I stated at length the reasons which in the opinion of the North-Western Provinces Government rendered legislation necessary. I have not had the advantage of attending the meetings of the Select Committee, but the criticisms received have been duly considered and the Bills have emerged from the crucible with no alterations of importance.

"Under these circumstances I feel justified in asking the Council to pass them today."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

NORTH-WESTERN PROVINCES LAND-REVENUE BILL.

The Hon'ble MR. QUINTON also moved that the Report of the Select Committee on the Bill to amend the North-Western Provinces Land-revenue Act, 1873, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also moved that the Bill be passed.

The Motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble SIR. S. BAYLEY introduced the Bill to alter the constitution of the body corporate known as the Trustees of the Indian Museum, and to confer certain additional powers on that body, and moved that it be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir A. Colvin and the Mover.

The Motion was put and agreed to.

The Hon'ble SIR S. BAYLEY also moved that the Bill and Statement of Objects and Reasons be published in the *Calcutta Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

DEBTORS BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the law relating to imprisonment for debt. He said:—

"I am reminded by the audience who are facing me that the Council is practically sitting to-day as a local legislature for the territories under the administration of the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh,—territories to which a separate legislature has not been given under the provisions of the Indian Councils Act,—and accordingly this is, I think, a suitable opportunity for the introduction of a measure the immediate application of which will be confined to those territories.

"In moving recently for leave to introduce the Indian Bankruptcy Bill I referred to the important subject of imprisonment for debt, and, whilst frankly stating my personal opinion that the present law is a bad law, I went on to say that in the present state of Indian public opinion I was not prepared to propose any amendment of it which should apply to the whole of India. But I took care to reserve my opinion on the question whether the Government would not be justified in proposing legislation confined in its scope to a particular province where the balance of authoritative opinion was in favour of such legislation. It is a measure of such limited application that I am now asking leave to introduce.

"The present state of the law is this. Under the Civil Procedure Code a decree or order for the payment of money may be enforced by the imprisonment of the judgment-debtor. The Court has a discretionary power to refuse execution at the same time against both person and property, but has no discretionary power to refuse execution either against person or against property at the option of the creditor. When an application for execution of a decree is presented, it must, if it is not barred by efflux of time and is otherwise in order, be admitted, and then the Court must order execution of the decree *according to the nature of the application*. The Court cannot refuse to issue its warrant for the execution of the decree unless it sees cause to the contrary, and "cause to the contrary," as interpreted by the Courts, means some cause which deprives the decree-holder of the right to execute, or to execute against the party against whom execution is sought, or to execute in the mode prayed for.

"But to this general law there is one remarkable local exception. In the four districts of the Dekkhan to which the Dekkhan Agriculturists' Relief Act applies, arrest and imprisonment for debt have been altogether abolished in the case of the class of persons described in the Act as agriculturists. 'No agriculturist,' says the Act, 'shall be arrested or inprisoned in execution of a decree for money'. The Act has now been in operation for more than six years, and the periodical reports of its working show that this simple and trenchant provision has worked well, and has been attended with beneficial results. Now the Dekkhan Relief Act is, substantially, an amendment of the Civil Procedure Code, confined in its scope to a specified, but extensive and important, set of transactions; and I have always considered that such of its provisions as are found by experience to work well ought eventually to be generalized and embodied in the Code. The experience already gained of this particular provision is, I think, at least sufficient to justify us in trying it on a more extensive scale.

"It will have been seen that, under the general provisions of the Civil Procedure Code, the discretion as to whether a debtor shall be arrested and imprisoned or not rests not with the Court but with the creditor. It may be clear that the debtor has property available for attachment, and that a warrant of arrest has been applied for from vindictive or other improper motives, and yet, if the creditor asks for a warrant of arrest, a warrant must issue. The debtor may be a woman, she may even belong to the class of women who by the law of this country are exempted from public appearance in Court, and yet, if the creditor says that he wishes to send her to prison, to prison she must go.

"Now, in the year 1881 a case occurred which illustrated the working of this provision of the law and attracted a good deal of public attention. The case was one in which a *paradánashin* lady in Calcutta was arrested and imprisoned in execution of a decree for money obtained against her. Some correspondence with respect to the case took place between the Government of India and the Government of Bengal, and eventually, as a result of the correspondence, a circular was in November, 1881, addressed by the Government of India to all Local Governments and Administrations, stating that the Government of India had under consideration the question of amending the provisions of the Code of Civil Procedure bearing upon the question of the arrest of *paradánashin* women in execution of the decrees of Civil Courts, but that before coming to any final conclusion on the subject the Governor General in Council thought it desirable to deal with the larger question of abolishing imprisonment for debt, and for this purpose to enquire whether sufficient reasons exist for the continued maintenance in India of the present system. Local Governments and Administrations were accordingly requested to favour the Government of India with a full expression of their opinion on the matter.

"The replies to the circular disclosed much difference of opinion with respect to the advisability of maintaining for India the present system of imprisonment for debt, and the usual arguments, with which most of us are familiar, were duly marshalled on either side.

"The arguments on which the upholders of the present system relied fall into two classes: first, arguments which, if valid at all, are valid for England as well as for India; and, secondly, arguments based on the special circumstances and conditions of India.

"To arguments of the first class belongs the assertion that "to remove from the Statute-book the penalty of arrest and imprisonment in execution of a decree for money would be to paralyze the commerce and trade of the country." These general predictions are dangerous. Precisely the same objection was made in England, first to the abolition of arrest on mesne process, and afterwards to the abolition of arrest on final process. It is the kind of objection which, as logicians would say, *solvitur ambulando*. The power of arrest was removed, and neither commerce nor trade shewed any symptoms of paralysis.

"Those who uphold imprisonment for debt, not as being generally expedient, but as being specially required for India, do so mainly on two grounds: first, the complexity and obscurity of Indian titles to property; and secondly, the exceptional prevalence of fraud in India, and the exceptional difficulties of detecting it.

"As to the first ground, I will only say that two wrongs do not make a right. If it is wrong, as I hold it is, to allow a debtor to pledge his person as security for his debts, it is not the less wrong because, owing to the defects of Indian property law, he finds difficulty in giving a satisfactory security over his property.

"In the argument based on the prevalence of, and difficulty of detecting, fraud there is undoubtedly much force, though, after having in the course of my professional career studied most of the reports and evidence bearing on the law of debtor and creditor in England and conversed with a large number of persons who have a practical experience of its working, I am inclined to doubt whether the moral complexion of the Indian debtor is really so much darker than that of his English brother, and whether the obstacles which can be placed in the way of a creditor realizing his debts are not as great in England as in India. But, however this may be, to make an honest, though needy, debtor liable to imprisonment, simply because fraudulent debtors are numerous and difficult to detect, appears to me something like making homicide by misadventure punishable by death, simply because the crime of murder is rife and hard to prove.

"There are, in my opinion, two principles which ought to be observed in every law of debtor and creditor. The Courts ought not to give effect to any pledge by a debtor either of his person or of the bare necessaries of life. The debtor ought not to be allowed, by his own action, supplemented by the action of the Courts, either to deprive himself of his personal liberty, or to reduce himself to starvation. If he cannot obtain credit except on one or other of these securities, it is better that he should not obtain credit at all. These principles appear to me to be as applicable to India as to England—to an uncivilized as to a civilized country. The Code of Civil Procedure recognises one of these principles by exempting from seizure for debt the debtor's bare means of subsistence. But this recognition is nullified by the refusal to adopt the principle of exempting the debtor's person from seizure. Of what use is it to reserve by law to the debtor the bare necessaries of life, when he can be compelled to give them up by the threat of imprisonment? By those who advocate the retention of the present system much reliance is placed on the very small proportion of actual imprisonments to warrants of arrest; and the inference drawn from this proportion is that the law, though harsh in theory, produces no hardships in practice. But my belief is that, in the great majority of cases, exemption from arrest is purchased either by renewal of bonds on extortionate terms, or by surrender of property which the law has exempted from seizure, or by surrender of property which does not belong to the debtor at all but to his relations or friends. In other words, the law enables a creditor to do indirectly what it forbids him to do directly.

"It is said that the honest debtor has an easy way out of prison through the door of insolvency. But in the first place, the honest debtor ought not to be sent to prison at all; and in the next place, the door which is provided for his release is, for some reason or other, very rarely used. There is, or was until recently, a strong concurrence of opinion to the effect that the Insolvency chapter of the Code of Civil Procedure is practically a dead letter. As to the causes of its failure,—whether it is to be accounted for by the preliminary proceedings being unnecessarily cumbrous or expensive, or by the difficulty of satisfying the Court that the debtor has not been guilty of any kind of misconduct, or by ignorance of the law and of the modes of relief available to debtors,—opinions differ; but about the fact of failure there appears to be no difference. The legislation of 1879 has done something towards the improvement of the Insolvency chapter of the Code. But I believe that the experience of those who have been concerned in the working of that chapter will bear me out in saying that notwithstanding those improvements the number of orders passed under it falls very far short of what might be expected under a thoroughly satisfactory and workable law. And whilst this is so it would be unfair to point to the provisions of the chapter as a justification of a law which, but for those provisions, would be admittedly unjust and defective.

"My own strong opinion, on the evidence before me, is that imprisonment for debt, as such, ought to be abolished in India as it has been abolished in England and other civilized countries, but that in India as in England imprisonment should be retained as a punishment in those cases where indebtedness involves an element of fraud.

"If I thought that the objections to the present law were merely theoretical, if the conclusions at which I have arrived were based merely on *à priori* reasoning and were not supported by practical experience, I should hesitate to bring forward proposals about the expediency of which doubts are entertained by a large number of the Indian judicial authorities. But this is not the case. The evidence collected by the Dekhan Riots Commission is sufficient to show, if other evidence were wanting, that the existing law is not only defective in theory but oppressive in practice, and my opinions are shared by those whose authority to speak on Indian subjects no one could question. Looking round this table, I can appeal to Sir S. Bayley, who, writing in April 1882 as Resident at Hyderabad and with the experience which he had acquired in Bengal and Assam, was of opinion that the present system of imprisonment for debt is not wanted to compel payment, while it may be used to bring undue pressure to bear on a debtor, and that this is especially the case in an agricultural country where land is generally given as security for debt; to Sir Theodore Hope, who, in the speech which he made in 1879 in introducing the Dekkhan Agriculturists' Relief Bill, stated the case against the present system more forcibly and concisely than it had ever been stated before; to Sir Auckland Colvin, who was himself a member of the Dekkhan Riots Commission; and to Sir Charles Aitchison, who intimated very clearly in 1882 that, but for 'the weight of learned opinion' by which he was embarrassed, the Punjab Government would then have been ranked among the decided opponents of the present law.

"With Sir T. Hope's permission I will read to the Council some extracts from his admirable and exhaustive speech on the Dekkhan Relief Bill. In referring to the provisions of the Bill with respect to the mode of enforcing execution of a decree, he expressed himself as follows:—

'As to execution against the person by arrest and imprisonment, I rejoice to state that it is now considered expedient to abolish it altogether. Imprisonment will still be inflicted as a punishment for fraud detected on insolvency; but that is a totally different thing. The maintenance of imprisonment for debt, as found in the Indian law, is equally indefensible in principle and in practice. As to principle, the Dekkhan Riots Commission make clear that point, utilising the opinions of John Stuart Mill. They teem with evidence in detail as to the extortion and wrong of which the warrant of arrest becomes in practice the engine. Unacknowledged payments, fresh bonds for sums unadvanced, life-long slavery and even female dishonour may all be obtained—the first three constantly, by the mere production of the warrant of arrest without enforcement. They say, for instance, that in 1874 "it would seem probable that somewhere about 150,000 warrants had been used as threats only." The outcry against imprisonment from officers well qualified to judge of it has been uniform and persistent. Its abolition is unanimously recommended by the Dekkhan Riots Commission. Mr. Pedder and Miss Nightingale have in *The Nineteenth Century* brought the evils it causes prominently before the British public. Sir Erskine Perry gives its abolition his "unqualified approval" in a note dated December 1st, 1877. Judicial officers and pleaders take the same view as the Executive. Were it even defensible in theory, which we have seen that it is not, the abuses to which, in a country like Western India at least, it is proved to lead in practice afford sufficient ground for its condemnation in the districts to which the Bill is to apply. * * * Imprisonment was, at best, a barbarous device to meet the case of a debtor's concealing his property or refusing to give it up. Under the draft Bill, it will be quite unnecessary for these purposes, and reserved for cases of flagrant fraud or dishonesty in insolvents. In this altered position I trust that no hesitation will now be felt by the Council in abolishing a system which has been proved to be grossly abused as an engine of extortion, and is in opposition to the legislation of the civilized world.'

"These are the opinions of an officer whose experience was derived mainly from the Bombay Presidency. Let me add equally weighty testimony from another part of India. This is what was said by the Lieutenant-Governor of the North-Western Provinces in 1882:—

'5. Sir A. C. Lyall has long been of opinion that the powers of subjecting a debtor to arrest and imprisonment should not be entrusted to the decreeholder, but to the Courts only; and, in leaving with the Courts the authority to imprison, he would limit its exercise to cases in which clear proof should be shown of fraud or dishonest evasion of payment on the part of the judgment-debtor. The existing practice of placing in the creditor's

hands the power of selecting his own method of coercion is, Sir A. C. Lyall believes, a relic of the old semi-barbarous debt laws which has now been eliminated from almost every civilised code of judicial procedure. The retention of this process in our Indian code would, upon this principle, be justified only by showing that it was specially required by the circumstances and conditions of the administration of the debt law in this country; and Sir Alfred Lyall does not think that any such imperative reasons for retaining it can be adduced.

'6. It has been argued that, by restricting the process of arrest to cases of proved dishonesty or contumacious refusal to pay debts, the debtor would be given an opportunity for getting out of the way, and thus evading arrest if the Court should determine to order it. But, in the first place, the position of an absconder from process is a very uncomfortable one; so that only the class of debtors who now run away from the creditor are likely to run away from the Court; and, in the second place, the additional risk that would be imposed on the creditor in his realisation of bad debts seems quite worth incurring for the purpose of relaxing the severity with which the present system operates against all debtors, honest and dishonest, indiscriminately. Of the persons arrested, only a comparatively small number seem to be actually imprisoned after arrest; and this fact has been taken to prove that most of these debtors were able to pay but refused to do so till arrested. But it is at least quite as probable an explanation that the debtor, when arrested, preferred, rather than go to jail, to accept any terms which his creditor chose to dictate to him, and to save himself from prolonged imprisonment by executing or renewing bonds on hard or ruinous conditions, or by mortgaging or selling all his property, including property exempt by law from attachment under a Civil Court decree. The effect of arrest, in neutralising the legal exemptions from attachment, seems indeed to merit particular attention. For although section 266 of the Code of Civil Procedure provides that certain things shall be exempt from attachment under a decree, the provision can be practically of little use when the creditor can, by exercising or threatening to exercise his power of arrest, compel the debtor to give up any property whatsoever that he may possess. The Judicial Commissioner of Oudh has cited, as an instance of the difficulty which creditors would experience in realising their debts if the power of arrest were abolished, the case of a debtor who holds a pension, which the law forbids the Court to attach, but who owns no other tangible property. It is argued that such a man may be made to pay his debt while the law allows him to be arrested, but might defy his creditor if the power of arrest were removed. But, according to this view of the case, it is clear that the power of arrest now operates in a great degree to annul the exemption from attachment assigned by law to the pension, since the creditor, though he cannot directly attach the pension, can imprison the pensioner till he comes to terms that may be equivalent to its transfer.

'7. There may be cases falling under section 259 of the Code of Civil Procedure in which it may be necessary to reserve power to the Court to order the imprisonment of a judgment-debtor who has wilfully disobeyed the Court's specific order, for instance, in the case of a suit for the recovery of a wife. (I will remark here, parenthetically, that I wish to reserve my opinion as to the expediency of a law which enables a husband to obtain the imprisonment of a contumacious or runaway wife, but this question does not arise on the present Bill, which is confined to money debts. To proceed with my quotation.) But all such cases would fall under the rule of dishonest or contumacious evasion; and it would be quite sufficient to invest the Court with discretion and authority sufficient to enforce its own specific mandates. And the reservation of the power of personal coercion to the Courts would prevent the process being employed, as there is reason to believe it occasionally is employed, to gratify a vindictive feeling on the part of the creditor, as in cases where there has been a quarrel, or where a debtor, knowing himself to be insolvent, has favoured another creditor at the expense or to the disadvantage of the decreeholder.

'8. Sir A. C. Lyall would therefore advocate the entire abolition of the process of arrest for debt, so far as it is a process that can be set in motion at the discretion of the creditor, and would allow the Courts to order arrest only on proof of fraudulent and contumacious attempts to defeat the operation of a decree.

'9. It is possible that the abolition of the power of arrest would make the recovery of debts somewhat less easy; but, granting this, the law is not bound to go beyond a certain limit in aiding creditors, and in Sir A. C. Lyall's opinion it goes too far when it leaves to creditors uncontrolled power of imprisoning their debtors. Imprisonment is especially hard on the cultivator and working man, whom it deprives of their means of subsistence and of providing for their families, and these are the classes who probably are most frequently imprisoned.'

"There is no branch of the law which more intimately affects the welfare of the poorer classes throughout India than the law of debtor and creditor; and if the Government of India entertains an opinion that that law is seriously defective it would incur a grave responsibility if it were to hesitate or unduly delay to give its opinion practical effect.

"Why then, I may be asked, did not the Government of India undertake legislation in 1882 or 1883? The answer is that it would have been inconvenient and inexpedient to do so at a time when analogous legislation was still under discussion in Parliament. The English legislation of 1869 proceeded on the sound principle that provisions for the relief of the honest debtor should be accompanied by provisions for the punishment of the fraudulent debtor. The Debtors Act of 1869, which abolished imprisonment for debt, as such, contains two Parts, of which one is headed '*Abolition of Imprisonment for Debt*' and the other '*Punishment of Fraudulent Debtors.*' Concurrently with it was passed the Bankruptcy Act of 1869, which remodelled the system of bankruptcy for England, and with reference to which the penal provisions of the Debtors Act are framed. Now in 1882 and 1883 the English bankruptcy law was in the legislative crucible, and it appeared to me that, much as the Indian insolvency law stood in need of amendment, it would be desirable to defer proposals for its amendment until the new English law had been passed, and some little experience of its working had been obtained, and that then, and not till then, would be the proper time for dealing with the cognate subject of imprisonment for debt. As soon as the new English Bankruptcy Act had become law I set about the preparation of a corresponding measure for India, but the preliminary steps occupied some time, and it was not until a fortnight ago that I was able to introduce the Indian Bankruptcy Bill into this Council. The main provisions of that Bill will operate only within the Presidency-towns and a few other like places, but it contains one Part, the Part headed 'Fraudulent Debtors and Creditors,' which applies to the whole of British India. This part is taken from the English Debtors Act of 1869, as amended by the English Bankruptcy Act of 1883. When read with the Indian Penal Code, it will be found to contain those full and strong powers for the arrest and punishment of fraudulent creditors and debtors which are the essential adjuncts of every proper bankruptcy law. Therefore I am now in a position to say that I have already brought forward those proposals for the amendment of the penal law which in the opinion of the Parliament of 1869 were the proper supplement and corollary of proposals for the relief of the innocent debtor.

"I may add that the interval which has elapsed since 1883 has not been wholly unfruitful of results. I was anxious to fortify myself with information about the law of imprisonment for debt in foreign countries, and through the kindness of Sir H. Maine I obtained from Her Majesty's representatives abroad a series of interesting reports on that subject. A summary of those reports has been published, and fully bears out the statement made by Sir T. Hope in 1879 that the existing Indian system is 'in opposition to the legislation of the civilized world.'

"I have described the steps which were taken with reference to this subject in 1881, and have explained why legislation was not initiated as an immediate consequence of those steps. It remains for me to explain the nature of the proposals which on behalf of the Government of India I am bringing forward now. Having regard to the authority and experience of some of those who are opposed to a change in the law, and bearing in mind the immense diversity of circumstances and conditions which prevails throughout this vast peninsula, we thought that, while we should not be justified in further delaying legislation, our most prudent course would be to confine its application in the first instance to some one province where the balance of authority, administrative and judicial, is clearly and strongly in its favour. There is such a province. I have read to the Council the opinion that was expressed by the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh in 1882, and I am in a position to say that the opinion which Sir A. Lyall held then he holds after four years' further experience now. His opinion was briefly but emphatically endorsed by the Hon'ble Judges of the Allahabad High Court, who were, and are, strongly in favour of abolishing imprisonment for debt as such.

"Under these circumstances I propose that the measure which I am asking for leave to introduce should apply in the first instance only to the North-Western Provinces and Oudh, but that it should be capable of extension hereafter to other provinces by the Local Governments with the previous sanction of the Governor General in Council. From the opinions which were received from Lower Burma in 1882, and again with reference to the draft Bankruptcy Bill which was published last year, there appears to be a strong feeling in that province in favour of abolishing imprisonment for debt where the debtor has not been guilty of fraud. But on the whole I think it is preferable that the primary application of the measure should be confined to the territories under one Local Government only, and that its effect there should be ascertained before the Act is extended to other parts of the country. The Bill follows generally the principles of the English Act of 1869, by enacting that a Civil Court shall not imprison for debt except in certain specified cases, and that in those cases imprisonment is to be treated not as a measure of coercion but as a punishment. The excepted cases are—

"*(a)* where the order is for payment of a fine;

"*(b)* where the defaulter is a trustee or person acting in a fiduciary capacity, and the decree or order requires him, as such, to pay any money which is in his possession or under his control, or any money for which he is accountable and of which he has not discharged himself;

"*(c)* where the Court is satisfied that, since incurring the liability in respect of which the decree or order was made, the defaulter has fraudulently transferred, concealed or removed any part of his property, or committed any other act of bad faith in relation thereto, with the object or effect of impeding the enforcement of the decree or order by the attachment and sale of his property;

"*(d)* where the Court is satisfied that the defaulter either has, or has had since the date of the decree or order, the means to pay the money, and has refused or without reasonable cause neglected, or refuses or neglects, to pay the same.

"In these excepted cases the debtor may be sentenced to imprisonment for a term not exceeding six months: he is to be imprisoned in the civil jail, but is nevertheless to be subject, as nearly as circumstances admit, to the discipline prescribed in the case of a criminal prisoner undergoing simple imprisonment, and his creditor is not to be liable to pay subsistence-money for his maintenance in prison. It appears to me that these consequences logically follow from the theory that imprisonment is inflicted as a penalty and not as a screw. The liability of the judgment-creditor to maintain his debtor when in jail existed under the old insolvency law in England, and the Act which imposed it was once described as giving the creditor 'the power of imprisoning and tormenting his debtor at the expense of 3*s.* 6*d.* per week.' I regard it as a bad qualification of a bad law, and think that the law and the qualification should disappear together.

"These are, very briefly, the main provisions of the Bill. For its subsidiary provisions I must refer the Council to the Bill itself and to the Statement of Objects and Reasons, both of which I propose to publish at once. The Bill is comparatively short and simple, but the subject with which it deals is as important as any that have ever engaged the attention of the Indian legislature."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and such other languages as the Local Governments think fit.

OUDH WASIKAS BILL.

The Hon'ble MR. QUINTON moved for leave to introduce a Bill to declare certain allowances collectively known as Oudh Wasikas to be pensions within the meaning of the Pensions Act, 1871. He said:—

"Certain allowances, locally known as Amanat Wasikas, Zamanat Wasikas and Loan Wasikas, are paid by the British Government to the descendents of certain relatives and dependants of the Bahu Begam and the Vazirs and Kings of Oudh. Till the year 1880 no doubt was entertained that these allowances were pensions within the meaning of the Pensions Act, 1871. In that year it became desirable on financial grounds to commute one of the largest of them, and, a dispute having arisen as to the person entitled to receive the capitalized amount of the allowance, the Government had to consider whether it could safely pay the amount under cover of the Pensions Act to the person who appeared to be best entitled. The Hon'ble the Advocate General inclined to the opinion that a Wasika was a pension within the meaning of the Act, but thought there was a good deal to be said in favour of the opposite view. As the sum involved was so very large that the Government would not have been justified in incurring any risk in disposing of it, a special Bill was introduced into the Legislative Council and passed as the Táj Mahál's Pension Act, 1881.

"This step, which the Government was compelled to take for its own protection, necessarily suggested a doubt as to the applicability of the Pensions Act to Wasikas.

"As it is expedient on political considerations that there should be no room for question as to the applicability of the Act to Wasikas, the Government has decided to introduce this Bill to remove the doubts created by the legislation of 1881."

The Motion was put and agreed to.

The Hon'ble MR. QUINTON also introduced the Bill.

The Hon'ble MR. QUINTON also moved that the Bill and Statement of Objects and Reasons be published in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 23rd June, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

SIMLA;
The 11th June, 1886.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 16th JUNE, 1886.

GENERAL REMARKS.—Rain has been general in the Madras Presidency, in the Southern portion of the Bombay Presidency, in Berar and Hyderabad, in Southern and Eastern Bengal and in Assam. In Coorg the fall has been heavy. Slight rain has fallen in parts of the Central Provinces, the North-Western Provinces, Rajputana, and Central India.

In Madras the standing crops are generally in good condition and prospects are fair. Prospects are good in Mysore and Coorg.

Kharif preparations are in progress in Bombay, the Central Provinces, Berar and Hyderabad, and have commenced in the North-Western Provinces and Oudh and in Rajputana. In the Punjab the *rabi* harvest has been nearly finished.

Cultivation is progressing in Bengal and prospects are favourable, but more rain is wanted in many places for sowings. Prospects are generally good in Assam, but more rain is wanted in Cachar and Dibrugarh.

No report has been received from British Burma for the week under notice.

The public health continues fair.

Prices are steady, except in some districts of the Punjab and the Bangalore district of Mysore.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(June 16th)		
Bellary . .	Average 1·31	Standing wet crops generally good; harvest second crop paddy, yield about average. Cattle-disease in one taluk.
Kurnool . .	Average last week since revised, 1·33; this week, ·00.	Small-pox and cattle-disease in three taluks.
Ganjam . .	Average last week since revised, 1·19; this week, ·37.	Slight small-pox in six and cattle-disease in three taluks; slight cholera. Average number employed on Chilka canal last week 87, this week 50.
Kistna . . .	Average 1·71	River 1·4 feet water over anicut. Slight fever and small-pox; cholera in five taluks and cattle-disease in one.
Chingleput (Madras) .	Average 2·04	Standing crops good; harvest wet and dry grains, outturn below average. Fever in one and cattle-disease in two taluks.
Coimbatore . .	Average ·24	Standing crops generally good, but *cholum* suffering from insects in parts of two taluks; harvest paddy and *cholum*, outturn paddy average, *cholum* about average. Small-pox in one village and fever in one taluk.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Tanjore . .	Average last week since revised, 1·41; this week, ·33.	Standing crops generally good.
Madura . .	Average last week since revised, ·65; this week, ·25.	Health of people and cattle generally good.
Malabar . .	Average 4·52	Harvest third crop paddy completed, outturn below average. Fever in one, slight small-pox in eight, and cholera in three taluks.
Travancore . .	3·79	Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(June 16th)		
Kurrachee . .	*Nil*	River at Kotri on 14th, 11 feet 9 inches against 12 feet 7 inches on same date last year. *Kharif* transplanting commenced in four talukas, damage to *kharif* crops by turtles and *kookai* in Ghorabari and Shahbandar talukas. Fever in nine and cattle-disease in two talukas; small-pox in three villages in districts, one fresh case, five recovered, three remaining sick. Prices—wheat, red rice and *bajri* in Kurrachee 26, 30 and 44, in Sakro *nil*, 38 and 47, in Mirpur Botoro 24, 46 and 42, and in Sehwan 32, 40 and 40 pounds per rupee, respectively.
Hyderabad . .	*Nil*	Weather close and sultry. *Kharif* cultivation in progress and transplantation general. River at Kotri on 14th, 11 feet 9 inches against 12 feet 7 inches on same date last year. Fever in three, small-pox in two, and cattle-disease in two talukas. Wheat 26, *juari* 40, *bajri* 38, white rice 10, and red rice 28 pounds per rupee.
Ahmedabad . .	*Nil*	Agricultural operations in progress. Public health good. Wheat 35 and *bajri* 32 pounds per rupee.
Baroda . .	*Nil*	Small-pox and measles still continue in Naosari. Preparations for *kharif* in progress. *Bajri* 27, wheat 22, and rice 17 pounds per rupee.
Surat . . .	Bardoli, ·65; Pardi, ·03; Mandvi, ·50.	Preparations for agriculture going on. Fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik . . .	Rain throughout the district; maximum at Sinnar, 3·97; minimum at Baglan, ·40.	Land being prepared for *kharif* sowing in some places and in others *kharif* sowing in progress. Public health good throughout the district; cattle-disease in one village in Baglan taluka. Sky cloudy. Wheat 34½, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay) .	Slight rain on 11th and 14th, ·05.	Total rainfall to date 2·93, being 6·95 below average. Average abnormal temperature 2° warm from 9th to 12th and 3° warm from 13th to 15th; vapour in air normal; abnormal wind northerly; distant lightning on 9th and 10th, thunder and lightning on 11th.
Poona . . .	Rain throughout the district, maximum at Khed, 1·92; minimum at Purandhar, ·20.	Sowing commenced in some parts of the district. Public health good; cattle-disease in Junnar and Bhimthadi talukas. *Bajri* 33 and *juari* 45 pounds in the district, in Poona *bajri* 30 and *juari* 35 pounds per rupee.
Ahmednagar . .	Rahuri, 2·84; Nagar, 2·16; Sangamner, 2·0; Parner, 1·67; Akola, Shrigonda, Sheogaon, Kopargaon, Jamkhed, and Karjat, from ·58 to 94; Newasa, ·30.	Public health good. *Bajri*—maximum 60 pounds and minimum 39, *juari*—maximum 84 and minimum 48 pounds per rupee.
Sholapur . .	Sholapur, ·97; Barsi, 1·10; Madha, 1·09; Karmala, ·33; Pandharpur, ·09; Sangola, ·02; Malsiras, ·28.	More rain required to commence sowing operations. *Juari* 58 and *bajri* 42 pounds per rupee.
Dharwar . .	Rain at all stations, varying from 1·80 in Nargund to ·39 in Gadag.	Rice sowing almost completed; sowing of early crops just begun in Ron taluka, elsewhere land being prepared. Public health good. Rice 23 and *juari* 50 pounds per rupee.
Kanara . .	Karwar, 4·40; Kumpta, 5·07; Haliyal, ·75; Yellapur, ·37.	Total rainfall 24·53. Sowing operations continue on coast and Ghât talukas. Rice plants healthy. Anthrax continues in Supa petha. Common rice at Karwar 14, district average 13¼ seers per rupee.
Rajkot . . .	*Nil*	Weather hot. Public health generally good. Wheat 33, *bajri* 30, and *juari* 43 pounds per rupee. *General Remarks.*—Rain throughout the Deccan and Southern Mahratta Country and in parts of Guzerat. *Kharif* sowing operations in progress in most districts. Fever and cattle-disease in parts of eight and small-pox in parts of seven districts.
Bengal—(June 16th)		
Chittagong . .	1·48	Weather seasonable. Sowing of *aus* paddy progressing. Prices stationary. Public health good.
Dacca . . .	4·43	Sowing of *aman* paddy nearly finished; jute and *aus* paddy doing well. Prospects good. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
24-Pergunnahs (Calcutta).	Some rain	Prospects of early rice, jute, and sugarcane good; lands being prepared for *aman* rice. Public health good.
Moorshedabad . .	*Nil*	Weather very hot. All prospects good. Price of rice stationary. Public health good.
Rungpore . .	*Nil*	Weather oppressively hot. Rain wanted for ploughing of paddy lands. Cholera in the interior; public health otherwise good.
Burdwan . .	0·03	Prospects of crops good, but rain wanted in parts. Public health good.
Bhagalpur . .	*Nil*	Prospects of crops good. Sporadic cholera in north. Prices easy.
Purneah . .	0·75	All crops doing well. Rain would do much good. Farming operations a little backward in parts for want of rain. Public health good.
Patna . .	*Nil*	*Bhadoi* crops being sown in some places; *cheena* being harvested; sugarcane looks promising. Public health generally good.
Durbhunga . .	*Nil*	Weather close and hot. Lands being prepared for *bhadoi* crops, but rain urgently wanted. Prices stationary. General health good.
Hazaribagh . .	*Nil*	Weather very hot. Sowings continue; paddy germinating in places; sugarcane doing well. General health good.
Cuttack . .	1·91	Weather hot, but cloudy. Rice being sown; lowland *sarad* growing well. Price of rice unchanged. Public health generally good, except a few cases of cholera in Kendrapara.
Midnapore . .	0·25	Rain urgently needed for rice cultivation and indigo. Public health generally good.
Khoolna . .	0·38	Weather hot. *Aus* sowing progressing; *aman* lands being ploughed. Public health good.
Dinagepore . .	0·11	Weather very hot, hardly any rain. Cultivation progressing well. Cholera reported from two thanas and cattle-disease from three thanas.
Pubna (Serajgunge) .	0·34	Weather very hot. Crops good. Public health good.
Gya . .	*Nil*	Extreme heat. Crops doing well. Prices moderate. Public health good.
Chumparun . .	*Nil*	Lands being prepard for *bhadoi* sowings. Prices stationary. Some cases of small-pox and fever reported. *General Remarks.*—Rain fell in some districts during week, and, except in Dacca, Chittagong, and Cuttack, it was very slight. Cultivation generally going on, but rain wanted in many places; *aus* rice and jute mostly sown, and young plants doing well; prospects of sugarcane and indigo favourable. Prices of rice stationary. General health good.
N.-W. Provinces and Oudh—(June 16th)		
Benares (June 14th)	*Nil*	Weather close and cloudy. Supplies ample. Prices slightly fluctuating. Health generally good.
Gorakhpore („ „)	*Nil*	Weather very hot and close; clouds collecting. Prices stationary. Health fair.
Fyzabad („ 15th)	Slight showers on 16th.	Intense heat; sky cloudy, with east wind. Prices steady. Health generally good.
Lucknow („ 14th)	*Nil*	Excessive heat since the last three days. Sugarcane is being irrigated. Supplies sufficient. Prices slightly rising. General health good, as well as the condition of cattle.
Rae Bareli („ „)	*Nil*	Heat excessive; wind variable. Supplies ample. Prices stationary. Health of men and condition of cattle good.
Partabgarh („ 15th)	*Nil*	Heat excessive. Indigo and sugarcane being irrigated. Prices still nearly stationary. No sickness.
Allahabad („ „)	Sharp showers on the morning of 15th.	Weather close and sultry. Preparations for *kharif* commencing. Markets fully supplied. Prices rising slightly. Health good.
Cawnpore („ „)	*Nil*	Weather very oppressive. *Rabi* harvested. Prices steady. Condition of people good; cattle-disease in Bilhaur abating.
Farakhabad („ „)	*Nil*	Great heat during past week; strong east wind today. Supplies plentiful. Health of people fair.
Sitapur („ „)	*Nil*	Winds changeable, but mostly from the east; weather very warm. Public health normal.
Bareilly („ „)	*Nil*	Heat intense; hardly any wind and what there is, is easterly. Prices slightly rising. Public health normal.
Banda („ 14th)	*Nil*	Weather cloudy; heat intense. Prices rule easy. Public health good; cattle-disease in two villages.
Ballia („ 15th)	*Nil*	Weather close and excessively hot. Sugarcane irrigation continues. Supplies plentiful. Public health satisfactory.
Kumaon („ „)	Storm and rain on 14th.	Weather hot, but cloudy. *Kharif* being weeded. Prices stationary. Fever and measles in district; cattle-disease in parts.
Agra („ 14th)	*Nil*	Weather very sultry. Prices steady. Health good.
Jhansi („ „)	·40	Heat oppressive. Prices pretty steady Slight small-pox and cattle-disease.
Meerut („ 15th)	Storm, with some rain on 14th.	Weather seasonable; great heat; westerly winds. *Kharif* sowing in progress, where rain has fallen. Supplies ample. Prices steady. Health good. *General Remarks.*—Weather excessively sultry; slight showers have fallen in some districts. Supplies are ample and prices generally steady. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—(June 16th)		
Hissar (June 15th)	*Nil*	Health fair. Prices slightly fluctuating.
Delhi . .	*Nil*	Health good. Prices almost stationary.
Umballa . .	*Nil*	Health fair. Prices rising.
Jullundur . .	*Nil*	Health good. Prices stationary. Prospects of current harvest good.
Ferozepore . .	*Nil*	Health good. Prices rising.
Amritsar . .	*Nil*	Health good. Prices stationary.
Sialkot . .	*Nil*	Health good. Prices stationary.
Lahore . .	*Nil*	Health good. Prices stationary. Prospects of current harvest below average.
Mooltan . .	*Nil*	Health good. Prices stationary.
Rawalpindi . .	·10	Health good. Prices stationary. Prospects of currrent harvest below average.
Shahpur . .	*Nil*	Health good. Prices stationary.
Dera Ismail Khan .	*Nil*	Health good. Prices stationary.
Peshawar . .	*Nil*	Health fair. Prices of wheat and gram rising. Prospects of current harvest below the average.
		General Remarks.—No rain has fallen, except in the Rawalpindi district. General health good, but small-pox is prevalent in the city of Dera Ismail Khan. Prices rising in the Umballa, Ferozepore, and Peshawar districts, slightly fluctuating in the Hissar district, elsewhere stationary. *Rabi* harvest operations nearly finished.
Central Provinces—(June 16th)		
Nagpur . .	·06	Weather cloudy. *Kharif* preparations continue. Health good. Prices steady.
Jubbulpore . .	·11	*Kharif* ploughing in hand. Health good. Prices steady.
Saugor (June 15th)	*Nil*	Ploughing for *kharif* commenced. Prices steady. Health fair.
Seoni . . .	·88	Weather cloudy and hot. *Kharif* ploughings in progress. Cattle-disease in places. Prices steady.
Hoshangabad . .	Showers on 14th	Weather cloudy and close. Small-pox and cattle-disease in places. Prices steady.
Khandwa . .	1·94	Land being prepared for *kharif*. Health fair. Wheat 18, *juari* 30 and rice 12 seers per rupee.
Raipur . . .	*Nil*	Weather cloudy and hot. Ploughing continues. Cholera and cattle-disease abating. Prices stationary.
Sambalpur (June 12th)	·03	Weather cloudy and close. Rice being sown; sugarcane doing well. Cholera in parts. Prices rising.
		General Remarks.—Weather cloudy and hot, with slight rain. *Kharif* sowings commencing in some districts. Cholera decreasing in Raipur. Prices rising in Sambalpur, elsewhere steady.
Assam—(June 16th)		
Gauhati . .	2·9 during the week ending 15th instant.	Weather hot. Cholera diminishing both in Sadr station and districts; cattle-disease still prevalent. Prospects of crops good.
Sylhet . .	*Nil*	No change since last report.
Cachar . .	1·41	Weather warm; rain much wanted. Ploughing for *aus* and *aşra* crops continues. Common rice 14 seers per rupee. Prospects of tea not satisfactory. Fourteen deaths from cholera from Katigora and nine from Hailakandi reported.
Dibrugarh . .	1·10	Weather very hot; rain wanted badly for *sali* crops in Sadr subdivision, but floods in Ranganadi and Subansiri in North Lakhimpur. Cholera disappearing.
Mysore and Coorg—(June 16th)		
Bangalore . .	Civil and Military stations, 2·74; Bangalore district, 1·80; Mysore, 1·26; Kolar, ·68; Tumkur, 3·85; rain has been general throughout the State.	Crops generally in good condition; prospects of season favourable. Public health good. No material change in prices, except in the Bangalore district, where they have slightly risen.
Mysore . .		
Mercara . .	8·96	Season favourable for ploughing and sowing rice crops. Health fairly good. Prices stationary.
Berar and Hyderabad—		
Amraoti (June 16th) .	1·37	Weather cloudy and hot. *Kharif* preparations in progress. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	·12	Weather cloudy. Preparations for *kharif* sowings busily pushed on.
Hyderabad . .	Average 1·36	Total rainfall since 1st January 8·53. Ground being prepared for sowing of *kharif* crops; *tabi* crops continue to be reaped in one taluka. General health fair. Prices—wheat 15, coarse rice 11, white *juar* 21, yellow *juar* 22, and *tur* 14¾ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(June 16th)		
Indore . . .	1·55	Total rainfall 8·23. Weather hot. Health good.
Gwalior . .	*Nil*	Health good. Weather cloudy and stormy; heat very great.
Sutna . .	*Nil*	Weather very hot. Health good.
Neemuch . .	*Nil*	Scarcity of water continues. Weather cloudy. Health good.
Goona . . .	·20	Four deaths from small-pox in Goona city, otherwise health good.
Agar . . .	·15	More rain required. Health and prospects good.
Nowgong . .	·11	Total rainfall ·90. Heat increasing. Prices rising. Health good.
Bhopawar (Manpur) .	.....	No report received.
Rajputana—(June 11th)		
Abu (June 11th)	Slight rain	Weather cloudy and close since yesterday; just now monsoonish.
Sirohi („ 13th)	*Nil*	Tanks full; wells good. Health good. Sowing of rain crops commenced. Weather cool and fine.
Marwar („ 11th)	*Nil*	More than six months' water in Jodhpur city tanks. Health good. Weather cooler. Prices rising.
Kherwara („ 13th)	*Nil*	Tanks west of Kherwara full, others very low. Ploughing continues. Health good; slight small-pox in district. Prices steady. Weather fine and clear.
Meywar („ 10th)	*Nil*	Tanks and wells low. Health very good. Prices falling. Weather seasonable.
Pertabgarh („ 12th)	·07	Some little water in wells. Health good. Prices rising. Showers, with storm on 10th; weather cloudy.
Harowti („ „)	Deoli, 1·19; Tonk, ·16; Shahpura previous week, 2·71.	Sowing in progress. Health good.
Jhallawar („ 11th)	·87 at Jhalrapatan	Health good.
Kotah („ 12th)	·25	Health good. Weather cloudy and close.
Ajmere („ 15th)	*Nil*	Weather cloudy. Heat again increasing. Ploughing continues.
Jeypore („ „)	·20	Weather hot. Health fair.
Ulwur („ „)	Slight rain in parts	Small-pox and fever in districts. Weather hot. Prices steady.
Bickanir („ 12th)	Rain drops	Good rain in some districts. Small-pox and fever prevalent. Prices stationary. Weather hot and windy.
Nepal—(June 10th)		
Katmandu ...	*Nil*	Want of rain felt in the case of rice and other crops lately sown.

No. 102 Met. / 12—6

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, 16th June, 1886.

Read the following:—

Summary of the Weather Reports for May, 1886.

Pressure was more or less above the average during the first week, after which a period of depression set in, lasting for a few days, when the barometer again rose and remained slightly above the average till the 24th. In the last week, however, the pressure again fell below the normal.

On the mean of the whole month, the pressure was slightly above the average in the North-Western Provinces, Assam, Bengal, and Orissa, and below it elsewhere. The rainfall returns show that rain fell in one part or another of Ceylon, Madras, and Burma throughout the month. In Bombay there was no rain till the 16th, and then only a few drops at Sholapore; but on the 20th there was a rather heavy fall at Karwar, and a few showers at two or three stations on the coast to the north, which were repeated till the close of the month. The winds on the Malabar Coast were generally westerly, but light.

In Northern India such rain as occurred was sporadic, and fell at intervals of several days, generally in local storms. The total rainfall of the month was below the average in the Eastern Punjab, Assam, Cachar, Burma, Khandesh, and Berar, and there was little or no rain in Sind and Guzerat. Everywhere else there was either an average quantity or an excess.

This excess was greatest in Ceylon and the Karnatic, more especially in the last province, where the total fall was about three times the average

amount. This was to a great extent due to the heavy rain, accompanying the cyclonic storm, which crossed the Madras Coast from the Bay of Bengal on the morning of the 24th, and passed across the peninsula during that and the following day.

The temperature of Northern India was changeable; but, on the whole, the mean temperature of the month differed little from the average, being slightly below it in the North-Western Provinces, Bengal, Pegu, and Madras, and above it elsewhere. The greatest excess was about 4° in Sind. South-east winds were more frequent than usual in the Upper Provinces. On the Central Indian plateau and in the western half of the peninsula, the winds were, on the whole, westerly, and on the coasts of the Bay of Bengal southerly. The humidity of the air was generally below the average in the Punjab and above in Southern India.

The following table shows the amount of rain and the difference from the average in the month of May 1886, according to districts, as far as is indicated by the telegraphic reports:—

Districts.	Average rainfall in May.	Difference from the average in May 1886.	Remarks.
Punjab, West	1·30	+0·03

SIMLA;
The 5th June, 1886.

RUCHI RAM SAHNI,
2nd Asst. Meteorological Reporter to the Govt. of India.

RESOLUTION.—Resolved, that the papers be published in the Supplement to the *Gazette of India*.

No. $\frac{103}{9\text{-}0}$ Met.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Meteorology), dated Simla, 18th June, 1886.

Read the following:—

Preliminary Report on the Meteorology of the year 1885, prepared in the Meteorological Office, Government of India.

January.—The cool weather which characterized the closing months of 1884 continued during January over the greater part of North-Western India (comprising the Punjab, the Meerut and Bareilly divisions of the North-Western Provinces, Rajputana, Sind, and Guzerat), in Cachar and North Bengal, the south of the peninsula, British Burma, and Ceylon. Within these regions temperature was generally from 1° to 2° below the average. All across the central parts of the country, in a broad band extending from the Bombay coast to Lower Bengal and the western part of the North-Western Provinces, temperature exceeded the normal, the excess in parts of the Central Provinces and Orissa being from 2° to 2½°. Apparently the highest day temperature (93°) was registered in Bellary; the lowest night temperature (35°) on the plains at Mooltan.

Pressure was above the average throughout the whole of the Indian area; less so on the hills than on the plains, and less in Northern India than in the south of the peninsula.

North-westerly winds prevailed with their usual persistence down the Gangetic plain; but in Bengal they were less steady than usual, and at Saugor Island there were frequent southerly winds. On the Arakan coast the normal northerly winds prevailed, but further inland they were strong easterly components. In the central part of the country and on the Circar coast there was an abnormal excess of south-easterly and southerly winds. In Western India the usual northerly winds prevailed, and in the Southern Carnatic north-easterly winds.

This was a damp month over the greater part of India. In the Eastern peninsula, and at some stations in Assam and Bengal, as well as in Ceylon and a few places in the south of the peninsula, there was a deficiency in the relative humidity of the atmosphere, but in all other regions there was an excess. This excess was most marked over the central parts of the country.

On the whole, the skies were more clouded than usual. The excess was greatest in North-Western India, and decreased eastwards and southwards, so that in parts of Eastern India and the peninsula there was greater serenity than usual.

Generally over North-Western India this was a wet month. In the Punjab the rainfall was everywhere in excess. In Rajputana the variations were irregular, while in Central India, except at Bhopal and in Bundelkhand, the total rainfall of the month was below the average. In the Central Provinces and the North-Western Provinces, the anomalies in the month's rainfall were also irregular; in general they were small, but at the hill and sub-montane stations of the North-Western Provinces there was a large excess. The heavy rain of North-Western India did not extend into Bengal, so that, with a few local exceptions, there was a general deficiency. In Assam the variations were small and irregular. Sind shared the heavy precipitation of the Punjab; but the main part of the Bombay Presidency, together with the Berars, Hyderabad, and the peninsula generally, was either rainless or nearly so. In Ceylon and the Bay islands the rainfall was also deficient, as was also the case at all stations in the Eastern peninsula, except Tavoy and Mergui.

February.—This was a cool month throughout almost the whole of India, the only exceptions to the general deficiency of temperature being a few stations in the peninsula and Ceylon. The excess of temperature noticed in

the central parts of the country during January had disappeared, and the relative depression was as great there as elsewhere. At Leh the mean temperature was 9° below the average, on the hills of the North-Western Himalaya from $3\frac{1}{2}$° to $4\frac{1}{2}$° below it, and at several stations on the plateau of North-Western and Central India the depression below the normal was equally great. With few exceptions, the absolute maxima at the different stations were only a few degrees higher than in January, while the absolute minima were in many cases lower in this than in the preceding month.

The excess of pressure, noticed in the previous month, continued during February in parts of the Punjab and Sind, and at a few places in the North-Western Provinces; but elsewhere there was a deficiency greatest in the Central Provinces and the Deccan. It was also greater on the hills than on the plains.

In February the wind circulation was less abnormal than in January. North-westerly winds blew steadily down the Gangetic plain and into Bengal. In Arakan the wind was north-westerly, while, at the inland stations, easterly winds were very frequent. On the west coast of the Bay, the wind was more southerly than usual, and south-easterly to easterly winds extending inland to the Deccan prevailed generally. In Sind and Guzerat the wind was north-north-east, and down the west coast north to west-north-west.

The relative humidity of the atmosphere remained excessive in the Punjab and neighbouring parts of the North-Western Provinces, Lower Bengal, several places in the Central Provinces, and the peninsula; but the regions within which the relative humidity was deficient had extended since the previous month, and now included the whole of Eastern India, Behar, and the western divisions of the North-Western Provinces, Rajputana, Sind, the Konkan coasts, the south of the peninsula, and Ceylon. The variations from the normal were generally smaller than in January.

In Bengal, parts of Central India, and over both peninsulas the sky was abnormally cloudy; elsewhere the amount of cloud was less than usual.

In the Punjab and Rajputana, and indeed throughout almost the whole of Northern India, there was a decided deficiency in the rainfall. In the maritime half of the Gangetic delta, however, there was an excess; and this excess extended into Chutia Nagpur, Orissa, the Central Provinces, and the Berars, as well as southward into Ganjam. Assam, like most other parts of Northern India, had a deficiency. In the whole of the Bombay Presidency, Hyderabad, the Madras Presidency (south of Ganjam), and Mysore and Coorg the month's rainfall was either *nil* or deficient. In Ceylon the variations were irregular, but, on the whole, the month's supply was short; while in Burma the anomalies were equally irregular, but the general results showed a slight excess. In the Bay islands the rainfall was again short of the average.

March.—In March temperature rose above the average over almost the whole of Northern India, but the excess in the majority of cases was less than 1°; while in the central parts of the country, the peninsula, Ceylon, and a large part of British Burma, the abnormal coolness noticed in the preceding months continued. The extreme day temperatures were in almost all cases considerably higher than those of the preceding month; but the night temperatures showed a much slighter increment, and at the hill stations in the North-West Himalaya the lowest readings were only slightly above freezing point.

Notwithstanding the excess of temperature in Northern India, the pressure was almost everywhere above the normal, both there and in the rest of the Indian area. The excess was less than in January, and hardly so general, one or two stations showing a local deficiency.

North-westerly winds prevailed over North-Western and Central India but especially in the latter region, with rather less steadiness than usual. In Bengal southerly components were unduly developed, and steady south-south-westerly winds prevailed. In Burma the wind was about the normal. On the Northern Circars and Orissa coasts the wind was more southerly than usual. In Madras, the normal east-south-east winds prevailed, and on the west coast north-north-westerly to westerly winds.

The mean relative humidity of this month showed generally but little departure from the average. At a few places in the Punjab and in Lower Bengal there was a trifling excess, but in all other parts of Northern India there was a deficiency. In the central part of the country and in the peninsula the anomalies were small and irregular, while in Ceylon and the Eastern peninsula the relative humidity was below the average.

This was a somewhat cloudy month, except in the lower portion of the North-Western Provinces, Northern Bengal, and parts of the Assam Valley; also on the west coast, and in the south of the peninsula, where the serenity exceeded the average.

It was nevertheless a dry month, though less generally so than February. At the trans-Indus stations, and at Kilba in Bussahir, there was a slight excess of precipitation, but at all the other stations in the Punjab there was a deficiency of rain.* In Rajputana, Central India, the North-Western Provinces and Oudh, and in Lower Bengal, the rainfall was almost universally much below the average. But in Behar and Northern Bengal, though some individual stations showed a deficiency, there was generally a slight excess. In Orissa and Chutia Nagpur most stations showed a deficiency. In Assam and Cachar, the anomalies were irregular. In the Central Provinces there was an excess in the southern divisions, and a deficiency in most other places. In the Berars the rainfall was slightly short. In Hyderabad the anomalies were small and irregular. In the Bombay Deccan there was a slight excess, but in nearly all other parts of that presidency the rainfall was short, and in many parts of the Konkan and Guzerat there was no rain. In Madras the variations in the rainfall were irregular, but in the Carnatic the fall was, on the whole, deficient. Mysore and Ceylon and the Bay islands exhibited conditions similar to those of Madras, while in British Burma the small amount of rain which is usually registered in this month was not received.

April.—This was a cool month in almost all parts of India. Only in Bengal, at a few stations in the western half of the North-Western Provinces, in the extreme south of the peninsula, in the Bay islands, and in British Burma was the mean temperature of the month above the average, and there only by small amounts. Elsewhere the temperature was more or less below the average, depression ranging from 1° to 5° on the plains of North-Western India and Sind, from 1° to 3° over the central parts of the country, and from 1° to 2° in the peninsula and Ceylon. The extreme day temperatures were apparently about the normal, but the extreme minimum readings seem in many cases to have been below the average, considerably so at the hill stations.

On the whole the excess of pressure noticed in March was maintained, and in some cases was indeed intensified; but on the hills of the North-West Himalaya, in Assam and Cachar, and over the whole of Bengal, where the temperature was above the mean, pressure was in defect. The most pronounced excess was shown over the Indus Valley, Sind, and Rajputana, while the greatest depression was in Assam.

In April the north-westerly or westerly winds of the Gangetic plain were more steady than usual, and even in Western Bengal westerly winds prevailed. In Lower Bengal also there was more westing in the winds than usual, but in Burma the directions were about the normal. On the west coast of the Bay steady south-easterly and southerly winds prevailed, while, on the west coast of India, the westerly winds had stronger northerly components than is usually the case.

This was a damp month in the Punjab, the North-West Himalaya, and in most parts of Central India, Rajputana, and Guzerat; but elsewhere the relative humidity was generally below the average. This deficiency was most strongly marked in Bengal and Orissa, while the region of greatest excess was the Punjab.

In both peninsulas, in Northern and Eastern Bengal, and in parts of Ceylon the cloud proportion was below the average, but elsewhere the skies were more than usually clouded.

* In the Punjab all the rain fell at the close of the month, and was accompanied by snow on the hills.

Most of the rain fell over Northern India either at the beginning or at the close of the month. Snow fell on the hills on both occasions. In the Punjab there was more or less excess, greatest on the hills and at the trans-Indus stations. In Rajputana the anomalies were very small and irregular. In Central India there was generally a slight excess; but in the North-Western Provinces and Oudh April was, on the whole, a dry month. In Bengal too, except at Darjeeling and at one or two stations in Eastern Bengal, the amount of rain was below the average. In Assam the variations were irregular, but in Silchar there was a decided excess. In the Central Provinces and the Berars the average fall of the month was considerably exceeded. In Hyderabad the variations from the normal, as in March, were very irregular, while throughout almost the whole of the Bombay Presidency there was again a deficiency. This was equally the case throughout Madras, Mysore, Ceylon, the Bay islands, and Burma.

May.—The distribution of temperature, with respect to the average, was similar to that prevailing in April, but the area within which it was above the average was more restricted. It comprised only Lower Bengal, British Burma, and a few stations in the south of Madras. Elsewhere there was a marked depression of temperature, varying from 2° to 10° on the hills and plains of North-Western India, from 1° to 6° in the central parts of the country, and from 1° to 2° in the peninsula. . At some stations the temperature was absolutely lower than in April.

Accompanying the extremely low temperatures noticed above, there was a large excess of pressure throughout the whole of the Indian area. This excess exceeded one-tenth of an inch in the Punjab and parts of Sind. It was much less on the hills than on the plains, and less in the peninsula than in Upper India.

As in the previous month, north-west and west winds prevailed with abnormal frequency down the Gangetic plain, while, in Bengal, the prevailing wind, instead of being south-south-east, was either from south or some point to the west of south. In the neighbourhood of Cape Negrais the wind was more northerly than usual. On the west coast of the Bay the prevailing directions differed but little from the average, but in the south of the peninsula the wind was more southerly and less south-westerly than usual. On the west coast there was rather more northing in the winds than usual.

In North-Western India, and particularly in the Punjab and adjacent parts of Rajputana, the relative humidity of the atmosphere was again above the average. In the Central Provinces and Central India, and at a few stations in the peninsula, this was also the case, only in a modified degree; and in all other parts of the country there was a deficiency. The deficiency was again greatest in Bengal.

May was an abnormally cloudy month, except in Assam, Bengal, Burma, and the peninsula, where there was a deficiency of cloud.

The first few days of the month were dry over Northern India, but about the 3rd in Bengal and Assam, and about the 8th in the upper provinces, local storms commenced, and cloudy disturbed weather lasted for some time. In the Punjab and northern parts of Rajputana the rainfall of the month showed a general and considerable excess. In other parts of Rajputana the variations from the normal were irregular, and in Central India the fall was generally above the average. In the North-Western Provinces the rain was, on the whole, about the average; but in Oudh, as also over the greater part of Bengal and Assam, it was generally deficient. In the Central Provinces, the Berars, and Hyderabad the average was generally more or less exceeded; but in the Bombay Presidency, excepting the Deccan, the fall was generally short. This was also the case in Madras and Ceylon. In Burma, and also in the Bay islands, the fall was far short of the average.

June.—Though much less marked than in May, there was yet a very decided depression of temperature during this month in North-Western and Central India, the Madras Presidency, and Ceylon. Elsewhere there had been a

recovery from the depression hitherto prevailing; and in Bengal, the eastern divisions of the North-Western Provinces, the Bombay Presidency, the Bay islands, and British Burma the temperature was above the average. The deficiency in the Punjab was from ½° to 4½°, in the more central parts of the country from 1° to 6°, in Madras from ½° to 2°, and in Ceylon from ½° to 3°; while the excess in Bengal was from 1° to 2°, in Bombay from 1° to 2½°, and in the Bay islands and Eastern peninsula about ½°.

The excess of pressure noticed in the preceding month was maintained, though in a diminished degree, over the greater part of Northern and Central India; but in Lower Bengal, the Berars, Sind, and nearly the whole of the peninsula pressure was in defect. In the Eastern peninsula the variations were irregular, but, on the whole, downward.

In the Punjab the winds were about the normal, but in the North-Western Provinces and Oudh north-westerly winds continued more prevalent than usual. In Bengal, the Northern Circars, Orissa, and Burma the wind directions were about the normal. In the central part of the country the westerly winds were slightly more southerly than usual, but over the peninsula the average direction was generally maintained.

In this month there was a decided rise in the relative humidity of the peninsula and Ceylon, and both there and at several stations in the central parts of the country and in the Punjab the mean humidity of the month was in excess of the average. Elsewhere there was a deficiency, which was again greatest in Bengal.

Except in the North-Western Provinces, Assam, and Bengal, where the variations in the cloud proportion were irregular, but on the whole, below the average, the skies were very cloudy.

The monsoon rains apparently began in Ceylon and on the south-west coast of India about the 4th of June; but the rainfall did not extend steadily up the west coast, and the burst of heavy rain which usually ushers in the rainy season on the Konkan coast did not take place throughout the whole month. The Bengal branch of the monsoon brought rain to Burma, Assam, and Lower Bengal about the 10th, but the rains did not reach the Punjab until after the 26th. In the Punjab, except at the stations in the east and south-east, where there was an excess, the rainfall of the month was considerably short of the average. In Rajputana there was a considerable, but not quite, universal excess, and such was also the case over the greater part of Central India, the North-Western Provinces and Oudh. In Bengal the variations were irregular, there being an excess in the 24-Pergunnahs, at several stations in North-East and East Bengal, Chutia Nagpur, and Western Bengal, and a deficiency elsewhere. In Assam and Cachar the anomalies were irregular, but in places considerable. In the Central Provinces there was an almost general excess. In the Berars and also in Hyderabad, though some stations showed an excess, the fall was, as a rule, considerably short. Throughout the whole of the Bombay Presidency there was great deficiency, but in Madras, except in Ganjam, where the fall was short of the average, and in south and west Madras, where it was in excess, the anomalies were variable. In Mysore the rain was deficient, but in Ceylon it was above the average. The Bay islands had less than the usual amount, while in Burma the variations, both above and below the normal, were large.

July.—In July a considerable change took place in the temperature distribution relatively to the normal average. In the Punjab, for the first time since the month of March, the mean temperature was above it. At most of the stations in the Central Provinces and Berar, in Sind, Guzerat, and the northern Konkan, there was also a slight excess. In the North-Western Provinces, Behar, and Northern and Eastern Bengal, in British Burma and Ceylon, on the other hand, the weather was cooler than usual, while, at the peninsula stations, the anomalies were small.

Pressure fell below the average throughout the whole of Northern and Central India, except in Orissa, the neighbouring portions of the Central Provinces, parts of Rajputana and Guzerat. In the peninsula there was a deficiency at most stations on the west coast and in the Deccan, and an excess in Madras and Ceylon. In the Eastern peninsula and at the Bay islands the anomalies were small and irregular.

In the Punjab the general direction of the wind was about the average, but in Eastern Rajputana the wind, instead of being south-westerly, blew from west-north-west, the dry quarter. In the North-Western Provinces, and indeed eastward over Bengal, Assam, and Arakan, the general direction of the wind was about the average; and this was also the case in the peninsula and on the west coast.

The anomalies in the distribution of relative humidity during the month of July were everywhere small, comprising a slight excess in the North-Western Provinces, parts of Behar, the Central Provinces, the south of the peninsula and Arakan; and a slight deficiency elsewhere.

The only province showing a decided excess of cloud in this month was Burma. In all other parts of the country, though there were numerous local variations, the general serenity was in excess of the average.

The rains, on the whole, were better than during June. In Western India there were several heavy falls in the first half of the month, while in Northern India, excepting the Punjab and generally the western provinces, there was general and heavy rain. In the Punjab only about half the usual amount of rain fell, and in Northern and Western Rajputana there was also a deficiency; but in the east of that province the average was somewhat exceeded. In Central India, save at Bhopal and in some parts of Rewah, the rainfall was short, and this was likewise the case in the Meerut Division of the North-Western Provinces; but in most other parts of the North-Western Provinces, and generally throughout Oudh, the fall was in excess. Bengal exhibited large variations. In the North, and particularly at Julpigorie, there was a large excess, while in South-Western and Western Bengal there was a decided, and in places a large, deficiency. In Assam and Cachar the rainfall was generally heavy. The registers of the Central Provinces exhibited considerable variations, but in the upper part of the Nerbudda Valley there was a certain excess. In the Berars and Hyderabad the anomalies varied considerably; but in Bombay, except in Khandesh and at some of the hill stations, the deficiency noticed in the preceding month continued. Madras showed an excess at the stations on or near the east coast and on the Travancore coast, but a deficit elsewhere. In Mysore there was a general, and in Ceylon a partial, deficiency of rain, while in the Bay islands and Burma there was an excess.

August.—In the Punjab, Sind and Assam, temperature ranged above the average, and at most stations in the peninsula there was a slight excess; but elsewhere it was lower than the average. In the North-Western Provinces and Bengal the relative depression was greater than in July, amounting to between $1\frac{1}{2}°$ and $2\frac{1}{2}°$. In Burma the depression was about equal to that of July.

The deficiency of pressure noticed in July continued and extended during August. Only in the south of the peninsula and in Ceylon and the Bay islands was the mean pressure above the average, and then only by small amounts. The greatest deficiency was in Western Rajputana and Sind, where it exceeded 0·05 inch.

South-easterly and easterly winds prevailed generally up the Gangetic plain, but with rather less than their normal steadiness. In Bengal and Burma the wind varied between south-south-west and south-south-east, and was about normal in direction. On the west coast of the Bay, and at several stations in the central parts of India and the peninsula, the winds blew from a point slightly more southerly than usual. On the west coasts of India the direction was about the normal.

At several stations in Ceylon, and at most stations in the peninsula and Assam, the humidity was below the average; but elsewhere it was in excess.

This excess was greatest in the south-east of the Punjab and in the Agra and Meerut divisions of the North-Western Provinces. August was generally unusually cloudy, except in Assam, Madras, and Ceylon, where the weather was clearer than usual.

In some respects the rains of this month were similar in character to those of the two preceding months. In Northern India they were generally excessive, much more so than in July; while in the peninsula, with the exception of the coast stations, the fall was short. The Punjab showed an excess, except over a region extending between the Jhelum and Sutlej. Rajputana, Central India, the North-Western Provinces and Oudh all had a very heavy rainfall. In Bengal the excess was restricted to the western and central districts. The northern districts and Assam exhibited a considerable deficiency. The Central Provinces were also short of rain, and in the Berars and Hyderabad, as in the preceding month, the total fall was below the average. In Bombay, parts of the Deccan, and some places on the west coast showed a small deficiency, but in general, throughout that presidency, the average was exceeded. At the Madras stations, excepting those on the west coast, in Mysore, and Ceylon, the rainfall was short. This was also the case in the Bay islands, but in Burma there was an almost general excess.

September.—Over the greater part of the Punjab and in Sind the excess of temperature which had characterized the two preceding months had disappeared on the hills, and was succeeded by a considerable depression. In the North-Western Provinces the anomalies were variable, while in Assam and Bengal there was a decided depression of temperature. In Orissa, and to the west, in the Central Provinces, Central India, and Guzerat, and to the south over the peninsula and Ceylon, temperature was almost everywhere above the average, the excess varying between $\frac{1}{2}°$ and $2\frac{1}{2}°$. Northern Rajputana, like the Punjab, showed a depression of temperature, and in British Burma the anomalies were irregular.

The distribution of the pressure anomalies had undergone a considerable change. Except at a few stations in the south of the peninsula and in Ceylon, pressure was in excess, considerably so in the North-Western Provinces, the Central Provinces, and Rajputana.

Abnormal north-westerly winds prevailed generally down the Gangetic plain and over Rajputana, and extended to a considerable degree into Central India, the Central Provinces, and the Deccan. In Bengal the wind, instead of being from south-south-east, the average direction in this month, was from south-south-west. In Burma the normal winds prevailed, and in Madras there was very little departure from the average; but along the west coast the wind was slightly more northerly than usual.

Except in Madras, Assam, and one or two stations in Bengal, this was a dry month, the relative humidity being very deficient. The deficiency was greatest in the Central Provinces, but almost equally great in parts of Rajputana.

In the Indus Valley there was more than the usual amount of cloud, and this was also the case in Bengal; but elsewhere, owing to the early cessation of the rains, the general serenity far exceeded the average.

Over North-Western India the rains ceased early in the month. In Bengal rain continued to fall until near its close, and was very heavy between the 21st and 24th. In the peninsula showers occurred throughout. In the Punjab, Rajputana, Central India, the North-Western Provinces, except the most easterly divisions, and Oudh, except at one or two stations, the fall was much below the average. In Bengal, on the contrary, except in the 24-Pergunnahs, in some parts of Eastern Bengal, Orissa, and South-West Bengal, the total fall of the month was considerably above the average. Assam and Cachar had also more than the normal amount of rain, but in the Central Provinces and the Berars the rainfall was largely deficient. In Hyderabad, for the first time since the setting in of the rains, there was an excess. The Bombay returns

show heavy rains in the Deccan and at a few places on the Konkan coast, but a deficiency in all other parts of the presidency. In Madras the rainfall variations were very irregular. There was a deficiency in Ganjam, in Travancore, and at many of the inland and southern stations. In Mysore the anomalies were also irregular, while in Ceylon there was a slight excess. Burma had less and the Bay islands more than the average.

October.—Over nearly the whole of Northern India (with the exception of the Assam valley), the Central Provinces, the peninsula as far south as Bangalore, and also in the Bay islands temperature ranged above the average. The excess was rather greater in Rajputana and the Central Provinces than elsewhere; otherwise it was fairly uniform between 1° and 2°. In the extreme south of the peninsula, from Madras round to Cochin, as well as in Ceylon, there was a depression of temperature, averaging in the former case about $\frac{1}{2}$°, and in the latter varying between $\frac{1}{2}$° and $1\frac{1}{2}$°.

Notwithstanding the generally high temperature, the mean pressure of October was above the normal. Only at one or two stations in the Punjab and in Sind and Guzerat were the means of the month below the average, and there only by small amounts. The greatest excess was in the south, but in parts of Burma and at the Bay islands it was almost as great.

On the whole, the winds in Northern India did not differ greatly from the average, though in some places, and particularly in the Lower Gangetic Valley, the north-westerly winds were abnormally steady. In Lower Bengal and Orissa the winds were very variable. In the Central Provinces, the Deccan, and down the Nerbudda Valley to the coast, the normal north-easterly winds prevailed. In the peninsula the wind directions were very variable.

This was a dry month, but less generally so than the preceding. In Assam there was again a slight excess of humidity, and this was also the case at the majority of the stations in the peninsula. In Ceylon and the Eastern peninsula the anomalies were small and irregular, though generally downward.

The skies generally were more clouded than usual. In the western districts of the North-Western Provinces however, in Behar, and Chutia Nagpur there was locally greater serenity.

In North-Western India the fine weather which set in in September continued uninterruptedly; but elsewhere it became showery and unsettled. In the Punjab, Rajputana, the greater part of Central India, the North-Western Provinces and Oudh, and nearly the whole of Bengal there was either no rain, or the total fall of the month was deficient. At a few stations in Northern and Eastern Bengal there was, however, a slight excess. Assam, like Bengal, had a generally deficient rainfall; but the Central Provinces, the Berars, and Hyderabad had more than the usual amount. Bombay exhibited a deficiency in Sind and Guzerat, and an excess in almost all other parts of the presidency. In Madras there was a very general, and in places, a considerable excess, at the southern and western stations, but a deficiency elsewhere. In Mysore and Ceylon the rainfall was excessive, while both in the Bay islands and in Burma the monthly amount was below the average.

November.—The abnormal excess of temperature which characterized October prevailed even more generally in November. In India only at one or two stations in Bengal and in the peninsula was the mean temperature below the average, though in Ceylon and the Eastern peninsula the variations were more irregular. The relative excess was decidedly greater than during October, especially in the Punjab, Southern Rajputana, and Sind, where it averaged between 3° and 4°.

The excess of pressure was both more general and more marked than in October, and the excess was as pronounced on the plains as on the hills.

The general wind directions in November were about such as are usual. North-westerly winds prevailed at most stations in the Punjab, the North-Western Provinces, and Behar; northerly and north-north-easterly over Bengal and the Central Provinces; and north-easterly winds in Central India, the Deccan, and the greater part of the peninsula. On the Travancore coast the wind was north-north-westerly.

The relative humidity anomalies of November were generally very similar to those of October. At a few stations in the North-Western Provinces, in Assam, Lower Bengal, Guzerat, and Madras there was a slight excess, while in nearly all other places there was a deficiency. In Ceylon and the Eastern peninsula the variations remained very small.

November was a very serene month in Northern India (excepting Assam and Lower Bengal), in the Madras Presidency, and Ceylon; but in Bombay, the Central Provinces and Berar, the Eastern peninsula, and the two provinces noticed above, the amount of cloud was in excess of the normal average.

All over Northern and Central India the weather was even more than usually fine. The Punjab, Rajputana, Central India, the North-Western Provinces and Oudh, and nearly the whole of Bengal and Assam had little or no rain. About the middle of the month the weather of the Bay and the surrounding coasts became very unsettled, owing to a cyclonic storm which was developed in the south of the Bay about the 17th, and traversed nearly the whole length of the Bay on a north-east course, finally crossing the Arakan coast north of Akyab. In Hyderabad the rainfall was rather greater than usual, but in Bombay, with the exception of some stations in Khandesh and the Deccan, the total was below the average of the month. In the south of Madras the rainfall was somewhat deficient, but in nearly all other parts of the presidency there was a large excess, due in great part to the cyclone noticed above. Mysore, like the southern districts of Madras, had less than its normal amount of rain; and in Ceylon the variations were irregular. In Burma there was an excess, due to heavy falls on the Arakan coast.

December.—This, like November, was a warm month over the greater part of the country, but the excess was much less than in November; and on the hills of the Punjab, at most stations in the North-Western Provinces, in Western Bengal, in the Central Provinces, Berar, Rajputana, the Konkan, and British Burma there was a slight depression of temperature. The greatest excess was in the Punjab and Sind; the greatest depression (excepting at the hill stations) in the Central Provinces.

The abnormally high pressures prevailing in the previous month had disappeared, except from Assam, Bengal, and parts of the North-Western Provinces and Burma; in all other places there was a distinct, though generally moderate, depression.

The winds showed comparatively little deviation from the normal. North-westerly winds prevailed over the upper provinces, drawing into north and north-north-east over Bengal and the Central Provinces. In Central India, the Deccan, and Carnatic, the wind was generally north-easterly to easterly, while down the west coast it was almost due north.

The air was generally damper than usual. The only important exceptions to the general high humidity were Sind and Western Rajputana and parts of Ceylon. In the Eastern peninsula the anomalies remained very small. The greatest excess was in Berar and Central India.

It was very cloudy, except in Sind and Guzerat. The excess of cloud was greatest in Northern India and least in the peninsula.

The fairly fine weather which had prevailed during November broke up early in December, and conditions became generally unsettled. In the Indus Valley, the rainfall of the month was below the average, but in all other parts of the Punjab it was in excess; and this was also the case in Rajputana, Central India, the North-Western Provinces and Oudh, and throughout the greater part of Bengal. In Eastern Bengal and Chittagong there was a slight deficiency. In Assam and Cachar a slight excess. In the Central Provinces, Berar, and Hyderabad the monthly average was very considerably exceeded; but in the Bombay Presidency, except at a few places

in the Deccan and Khandesh, the total fall was below the normal. In Madras and Mysore there was a general, and in places a considerable excess. In Ceylon, except on the south-west coast, the rainfall was also abnormally heavy. This was also the case in the Bay islands; but in Burma the rain was lighter than usual.

Year.—With one or two exceptions, chiefly in Western and Lower Bengal, the mean temperature of the year was below the average throughout Northern and Central India. In the peninsula the anomalies were small and more variable.

On the mean of all the months, pressure was above the normal almost everywhere. The greatest and most general excess occurred in May, and the most general deficiency in August.

On the mean of the whole year the air was generally drier than usual, except in the central parts of the country and in the Carnatic, where it was somewhat damper.

The amount of cloud was above the average over almost the whole of Northern and Central India. Only in Sind and parts of Rajputana was the normal serenity exceeded. In the peninsula and Ceylon the skies were clearer than usual. In the Eastern peninsula the variations were irregular, but in the valley of the Irrawaddy there was an excess of cloud. At the Bay islands the year was slightly less cloudy than usual.

On the whole the year was dry in the central divisions of the Punjab, but abnormally wet in the remainder of the province, in a great part of Rajputana, in Central India (except the more western states), in the North-Western Provinces and Oudh, and over a large part of Bengal. In Assam, on the other hand, the rainfall of the year was deficient at the majority of stations. In the Central Provinces south of the Satpuras it was abnormally heavy; in other parts of those provinces somewhat deficient. In the Berars the northern stations had more and the southern stations less than the average, and in Hyderabad also the anomalies were very irregular. In Bombay the rainfall was short. Madras, like Hyderabad, exhibited very irregular variations; but, on the whole, there was a decided deficiency in the southern districts. In Mysore there was an excess, except in the neighbourhood of Bangalore. Both in Ceylon and Burma the variations were irregular, but in the case of Burma, the total was considerably in excess. At the Bay islands there was a large deficiency.

RESOLUTION.—Resolved, that the Report be published in the Supplement to the *Gazette of India*.

C. J. LYALL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE FOURTH QUARTER OF 1885.

No. 570 R.T., dated Simla, 10th June 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 559R.T., dated 20th June 1885.
Public Works Department Resolution No. 282R.T., dated 18th March 1886.

Read also—

Director General of Railways' No. 347T., dated 26th May 1886.
Abstract Returns of Accidents to trains, &c., on the open lines of Railway in India for the quarter ending 31st December 1885.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling-stock, permanent-way, &c., shows an increase of 41 or 6·70 per cent., against an increase of 771·75 miles, or 6·72 per cent. in the mean mileage worked, and of 1,498,830 miles, or 14·90 per cent. in the train mileage. The following are the Railways on which the numbers chiefly vary :—

RAILWAY.	ACCIDENTS.				TRAIN MILEAGE.	
	Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	Percentage of increase.	Percentage of decrease.
Great Indian Peninsula . .	...	21	...	40	8	...
Bombay, Baroda and Central India	20	...	95	...	21	...
Sind, Punjab and Delhi . .	...	34	...	40	9	...
Darjeeling-Himalayan . .	...	8	...	57	...	2
Rajputana-Malwa . . .	27	..	41	...	26	...
Eastern Bengal . . .	16	...	31	...	3	...
Northern Bengal . . .	...	12	...	32	...	8

2. Besides the above, there were 25 accidents on the Assam Railway and 15 on the Jorhat Railway. No return was received for the former, and the latter was not open for traffic during the corresponding quarter of 1884.

3. On the Great Indian Peninsula Railway, the decreases took place chiefly under "Goods trains, or parts of Goods trains, engines &c., leaving the rails" and "Trains running over cattle on the line," the number of accidents under the former being 5 against 22, and that under the latter 7 against 12.

4. On the Bombay, Baroda and Central India Railway, the increase mainly took place under "Other accidents," the number of cases being 26 against 12.

5. Of the decrease of 34 accidents on the Sind, Punjab and Delhi Railway, 14 were under "Trains running over cattles on the line," 6 under "Bursting of boilers or tubes, &c., of engines," 5 under "Failure of couplings" and 8 under "Other accidents."

6. The decrease on the Darjeeling-Himalayan Railway was principally due to no accidents having been recorded under the head "Goods trains, or parts of goods trains, engines, &c., leaving the rails" against 6 accidents during the corresponding quarter of 1884.

7. The total number of accidents on the Rajputana-Malwa Railway increased from 66 to 93; of this increase 6 accidents occurred under "Collisions between goods trains or parts of goods trains; 4 under "Trains running over cattle on the line;" and 6 under "Failure of couplings."

8. Of the increase of 16 accidents on the Eastern Bengal Railway, 6 occurred under "Passenger trains or parts of passenger trains leaving the rails," and 4 under "Trains running over cattle on the line." Under the former head there was no accident reported in the fourth quarter of 1884.

9. On the Northern Bengal Railway, the number of accidents decreased chiefly under "Goods trains or parts of goods trains, engines, &c., leaving the rails," the "Failure of machinery, springs, &c., of engines," and "the failure of couplings;" the decreases under these heads being 5, 4 and 4 respectively. The total number of accidents on this line was 26 against 38.

10. The casualties resulting from accidents to trains, &c., were among "Passengers and others," 8 injured against 11 killed and 33 injured; and among servants, 1 killed and 10 injured, against 4 killed and 7 injured. Of the casualties to "Passengers and others," injury to 4 men was due to a collision between an up passenger train and some wagons standing at the Singea station on the Bengal Central Railway; and of the casualties to Railway servants, 1 was killed and 3 injured in a collision which occurred on His Highness the Nizam's Railway on 17th November 1885 between 4 loaded wagons (with men in them) and a construction engine whilst shunting.

11. The following table exhibits the number of accidents under the different classes and the number of persons killed and injured thereby:—

Description.	No. of accidents.	No. of passengers and others.		No. of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains or parts of passenger trains	2	...		...	..	...	...
Collisions between passenger trains and goods or mineral trains, engines, vehicles standing foul of the line	8	...	4	...	..	...	4
Collisions between goods trains or parts of goods trains	28	...	...	1	5	1	5
Collisions between light engines	4	...	...	...	...	...	...

Description.	No. of accidents.	No. of passengers and others.		No. of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Passenger trains or parts of passenger trains leaving the rails	33	...	...	...	...	...	...
Goods trains or parts of goods trains, engines, &c., leaving the rails	72	...	...	...	.	...	...
Trains or engines travelling in the wrong direction through points	10	...	...	...	...	...	...
Trains running into stations or sidings at too high a speed	5	...	...	...	...	...	...
Trains running over cattle on the line	186	...	...	...	3	...	3
Trains running over obstructions on the line	24	...	...	...	1	...	1
Trains running through gates at level crossings	15	...	...	...	...	...	...
The bursting of boilers or tubes, &c., of engines	19	...	...	...	...	...	...
The failure of machinery, springs, &c., of engines	57	...	...	...	...	...	...
The failure of tyres	7	...	...	...	...	...	...
The failure of wheels	1	...	...	...	...	...	...
The failure axles	9	...	...	...	...	...	...
The failure of couplings	36	...	...	...	..	...	...
The failure of tunnels, bridges, viaducts, culverts, &c.	1	...	...	...	...	.	...
Broken rails	9	...	...	...	...	...	...
The flooding of portions of permanent-way	7	...	...	...	...	...	...
Slips in cuttings or embankments	10	...	...	...	...	...	...
Fire in trains	46	...	...	..	...	...	...
Fire at stations or involving injury to bridges or viaducts	3	...	...	...	...	...	...
Other accidents	61	...	4	...	1	...	5
Total	653	...	8	1	10	1	18

12. The number of cases in which passenger trains or parts of passenger trains left the rails increased from 15 to 33, of which 9 occurred on the Assam, 6 on the Eastern Bengal, and 5 on the Jorhat Railways.

13. The number of cases in which goods trains or parts of goods trains, engines, &c., left the rails decreased from 92 to 72 or by 20. The number of accidents under this head on the Great Indian Peninsula Railway were 5 against 22 in the second half of 1884, and on the Northern Bengal 5 against 10; the former showing a decrease of 17 or 77 per cent., and the latter 5 or 50 per cent.

14. The cattle accidents numbered 186 against 201. On the Rajputana-Malwa Railway alone there occurred 38 accidents, being the largest number as compared with other lines. In reviewing the accident returns for the second and third quarters of 1885, the attention of the Government of Bombay was invited to the large number of accidents occurring under this head with a view to the supply to the Government of India of a report on the fencing of the Rajputana-Malwa Railway, but as yet no reply has been received. Compared with

the corresponding quarter of 1884, there is an increase of four in the number of accidents of this description on this line. Next to it stands the Eastern Bengal Railway, the number of accidents being 31 against 27.

15. Of the 19 cases of "the bursting of boilers or tubes, &c., of engines," the highest number, as in the same period of 1884, took place on the Indus Valley Railway, where they numbered 11 compared with 15; and of the 57 cases of "failure of machinery, springs, &c., of engines," 11 took place on the Indus Valley Railway, and 7 each on the South Indian, Sind, Punjab and Delhi and Rajputana-Malwa Railways;—the Indus Valley, in this also, showing the largest number in the two periods under comparison.

16. The couplings failed in 36 instances, of which 13 occurred on the Rajputana-Malwa, 8 on the Indus Valley, and 7 on the Eastern Bengal Railways; the Rajputana Malwa, with 7 such accidents in the second quarter of 1884, showing an increase of nearly 86 per cent., and the largest number in both quarters.

17. The number of cases of "Fire in trains" was the largest on the Indus Valley Railway, being 23 out of a total of 46 compared with 18 out of a total of 37 in the same period of 1884. In all the cases of fire, wood fuel was used in the engines.

18. The accidents classified as "Other accidents" numbered 61 against 39, there being an increase of 22. These accidents were the largest on the Bombay, Baroda and Central India and Sind, Punjab and Delhi Railways, *viz.*, 26 against 12 and 9 against 17 respectively, the former showing a considerable increase.

19. The casualties to passengers from causes other than accidents to trains, &c., were—

	Killed.	Injured.
From falling between carriages and platforms	3	2
Falling on to the platform, ballast, &c., when getting into or out of trains	1	1
Whilst crossing the line at stations	1	...
By closing of carriage doors	...	1
Falling out of carriages during the travelling of trains	2	14
Other accidents	2	3
TOTAL	9	21

20. And the accidents to servants in the employ of Railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were—

	Killed.	Injured.
During shunting operations	4	10
Falling off engines, vans, wagons, &c.	4	16
Coming in contact with overbridges, &c., during the travelling of trains	...	3
Coming in contact, whilst shunting, with vehicles, &c., standing in adjoining lines	...	2
Getting on or off trains, engines, &c.	3	7

	Killed.	Injured.
Whilst loading, unloading or sheeting	...	10
Whilst working at cranes or capstans	2	1
Whilst working on the permanent-way or in sidings	2	3
Whilst walking along the line on the way home or to work	1	3
Whilst walking, crossing or standing on the line	6	10
Whilst passing between vehicles	2	1
Whilst attending to the machinery of engines, cleaning them, &c.	1	13
Whilst attending to gates at level crossings	...	1
Falling or being caught between vehicles and platforms	...	2
Falling off ladders, scaffolds, platforms, &c.	...	5
By falling of lamps, wagon doors, timber weights	...	9
Whilst coupling or uncoupling wagons	8	9
Miscellaneous	6	14
TOTAL	39	119

21. Of other persons killed and injured by running trains, &c., 2 were killed and 1 injured whilst passing over the line at level crossings; 39 were killed and 10 injured whilst trespassing on the line; 9 committed suicide, and 1 was injured in attempting to commit suicide; and 4 were killed and 2 injured from miscellaneous causes.

22. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1884:—

	4TH QUARTER, 1884.		4TH QUARTER, 1885.	
	Killed.	Injured.	Killed.	Injured.
PASSENGERS.				
From causes beyond their own control	11	33	...	9
From misconduct or want of caution	8	18	9	20
SERVANTS.				
From causes beyond their own control	6	16	4	16
From misconduct or want of caution	27	78	36	113
OTHERS.				
Whilst passing at level crossings	4	...	2	1
Trespassers including suicides	29	8	48	11
Other persons	5	5	4	2
TOTAL	90	158	103	172

23. In addition to the above, 25 persons are reported to have been killed and 48 injured in yards, workshops, &c., and 146 persons to have met death in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—The attention of the Government of Bombay should be again invited to the increase in the number of cases of trains running over cattle on the Rajputana-Malwa Railway, with request that the Government of India may be informed of what is being done towards increasing the fencing mileage on that line.

ORDER.—Ordered, that this Resolution, with the Abstract Returns, be communicated to the Local Governments, Administrations, and Officers noted in the margin, for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, British Burma, and Assam.
The Residents, Hyderabad and Mysore.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary to the Government of India.

Document accompanying.
Abstract Return of Accidents for the fourth quarter of 1885.

Statement showing the dates on which the Returns of Accidents on the undermentioned Railways for the Fourth Quarter of 1885 were received from the Local Governments and Administrations.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 21st June 1886.

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 23rd JUNE, 1886.

GENERAL REMARKS.—Rain is reported generally from all parts of India, except Sind, the western districts of the Punjab, and some places in Rajputana. The falls have been heaviest on the Bombay coast, at the head of the Bay of Bengal, and in the North-Western Provinces and Oudh.

In Madras, Mysore, and Coorg the standing crops are in good condition, and prospects are on the whole favourable.

Ploughing and sowing for the *kharif* crops are in genetal progress in Bombay, Berar, the North-Western Provinces and Oudh, and the Central Provinces, and have commenced in the Punjab and Rajputana.

In Bengal sowings of *aus* rice and jute have been generally completed. Ploughing is in progress in Assam, and agricultural prospects are generally good.

The public health is generally good in all Provinces.

Prices are fluctuating in the Delhi district, and rising in the Shahpur district of the Punjab, and have slightly fallen in Bangalore. Elsewhere they remain generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras —(June 23rd)		
Bellary . .	Average last week since revised, 1·33; this week, 1·19.	Standing crops generally good, but young plants suffering from insects and locusts in parts; harvest second crop paddy, yield about average. Cattle-disease in three taluks.
Kurnool . .	Average last week since revised, ·05; this week, ·59.	Small-pox in two and cattle-disease in three taluks.
Ganjam . . .	Average 2·31	Slight small-pox in four, fever and cattle-disease in three taluks; slight cholera.
Kistna . . .	Average ·58	River 4·35 feet over anicut. Slight fever and small-pox; cholera in four taluks and one division; cattle-disease in one taluk.
Chingleput (Madras) .	Average ·85	Standing crops good; harvest wet and dry grains, outturn below average. Small-pox in one taluk and fever in another; cattle-disease in two taluks.
Coimbatore . .	Average ·31	Standing crops good, but *cholum* suffering from insects in parts of one taluk; harvest wet and dry grains, outturn paddy average, *cumbu* above average, and *cholum* about average. Fever in one taluk and slight cattle-disease in another.
Tanjore . . .	Average ·14	Standing crops generally good. River on to 7 feet.
Madura . . .	Average last week since revised, ·34; this week, ·05.	Health of people and cattle generally good.
Malabar . .	Average 1·64	Fever in one, slight small-pox in seven, and cholera in two taluks.
Travancore . .	8·91	Paddy plants good. Small-pox and fever in parts.
		General Remarks.—General prospects fair.
Bombay—(June 23rd)		
Kurrachee . .	*Nil*	Days unbearably hot and weather cloudy. River at Kotri on 21st, 13 feet 2 inches against 13 feet 7 inches on same date last year. Rice transplanting progressing in Jerruck and Shahbandar divisions; *kookai* and turtles have again injured seeds sown a second time in parts of Ghorabari. Hot winds have damaged crops in Shahbandar taluka. Deficiency of water felt in Johi and Dadur talukas. Fever in six and cattle-disease in two talukas; small-pox in three villages, two fresh cases, three recovered, two remaining.
Hyderabad . .	Little rain in Tando-Alahyar taluka on 17th instant, and drizzling showers in four talukas.	*Kharif* cultivation in progress; rice cultivation suffering from want of water in Badin taluka. Insufficiency of water is generally felt throughout the district. River at Kotri on 21st, 13 feet 2 inches against 13 feet 7 inches on same date last year. Fever in four, cattle-disease in one, and small-pox in three talukas. Wheat 25½, *juari* 40, *bajri* 37, white rice 19, and red rice 28 pounds per rupee.
Ahmedabad . .	4·73; total rainfall 7·68.	Sowing commenced in four talukas. Public health good. Wheat 34 and *bajri* 31 pounds per rupee.
Baroda . .	·72; total rainfall 1·08	Public health good. Preparations for *kharif* crops continue; sugarcane in good condition in Naosari mahal. *Bajri* 21, wheat 22, and rice 18 pounds per rupee.
Surat . . .	Rain in all talukas—maximum at Bulsar, 7·69; minimum at Mandvi, ·35.	Sowing operations commenced. Slight fever in Bardoli taluka. *Juari* 38 and *bajri* 46 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik . . .	Rain throughout the district—maximum at Nandgaon, 6·58; minimum at Malegaon, 1·22.	Sowings of *kharif* commenced in almost all talukas. Public health good throughout the district. Wheat 34¼, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay) .	Rain every day—heavy on all days, except 16th, 20th and 22nd; total rainfall of week 33·07; total to date 36·0, being 19·72 above average, that of the 18th, 10·10, is the largest single day's rainfall on record.	
Poona . . .	Rain general throughout the district—maximum 3·24 in Poona City, minimum ·41 in Petha Baramati.	Sowing of early crops in progress. Public health good; cattle-disease in Junnar and Haveli talukas. *Bajri* 33 and *juari* 45 pounds in the district, and *bajri* 32 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar . .	Newasa, 3·72; Shrigonda, 2·09; Sheogaon, 2·04; Akola, 2·55; Jamkhed, 2·31; Kopargaon, 2·20; Parner, 1·71; Rahuri, 1·50; Nagar, 1·10; Sangamner, 1·00; Karjat, ·92.	*Kharif* sowing begun in Shrigonda, Karjat, Jamkhed, Sheogaon, Rahuri, and Akola. Public health good; slight cattle-disease in Karjat. *Bajri*—maximum 57 pounds and minimum 36; *juari*—maximum 84 and minimum 43 pounds per rupee.
Sholapur . .	Sholapur, 1·20; Barsi, 3·76; Madha, 2·39; Karmala, ·84; Pandharpur, 5·53; Sangola, 1·44; Malsiras, 1·90.	Sowing operations in progress in Barsi, Madha, Pandharpur, Sangola, and Malsiras talukas. More rain wanted in Sholapur, Karmala, and Malsiras talukas. *Juari* 59½ and *bajri* 41¾ pounds per rupee.
Dharwar . .	Rain at all stations, varying from ·18 in Mundargi to 4·16 in Hangal.	Rice sowing still continued in a few places; sowing of early crops commenced in three talukas, elsewhere land is still being prepared. Public health good; slight cattle-disease in Ranibennur taluka. Rice 23 and *juari* 50 pounds per rupee.
Kanara . .	Karwar, 20·48; Kumpta, 10·03; Sirsi, 8·12; Haliyal, 1·80; total rainfall 45·93.	Rice plants in good condition. Anthrax continues in Supa. Common rice at Karwar 13, district average 12¼ seers per rupee.
Rajkot . . .	5·45; total rainfall 7·21.	Public health generally good. *Juari* 43, *bajri* 30, and wheat 34 pounds per rupee.
		General Remarks.—Good rain throughout the Presidency, excepting Sind. *Kharif* sowing operations in progress generally. Deficiency of water in parts of Kurrachee and Hyderabad. Fever in parts of eight, cattle-disease in parts of twelve, and small-pox in parts of five districts.
Bengal—(June 23rd)		
Chittagong . .	2·77	Weather seasonable. Sowing of *aus* paddy continues. Prices steady. Public health good.
Dacca . . .	4·76	Weather hot and cloudy. Sowing of paddy going on. Rain has benefited the crops. Prospects of crops good. Public health good.
24-Pergunnahs (Calcutta).	7·67	Weather unsettled. Prospects of early rice, jute, and sugarcane satisfactory. Public health good.
Moorshedabad . .	3·52	Weather seasonable. Prospects of crops good. Sowing of *dhan* going on. Public health good.
Rungpore . .	1·73	Weather very hot. Prospects of *aman* and *aus* crops good, except at Jalbanda, where rain is needed. Cholera at Nageswari; public health otherwise good.
Burdwan . .	7·75	Weather *much* cooler; rain has done good. Public health good.
Bhagalpur . .	2·03	Weather sultry till 17th, when heavy rain fell. Prospects of crops very good. Cultivation going on.
Purneah . .	3·40	Recent rain has lowered temperature, which was otherwise hot. Crops benefited by rains; *bhadoi* crops doing well.
Patna . .	2·11	Weather hot. *Cheena* and sugarcane promise well; *bhadoi* sowings have commenced. Public health generally good.
Durbhunga . .	0·58	Weather cloudy and close. Prospects of paddy on lowlands favourable. More rain wanted for *bhadoi*; *moong* is being harvested. A few cases of cholera reported from Madhubani; public health otherwise good.
Hazaribagh . .	0·20	Weather very hot up to 15th, heavy rain since. Indian corn, *marua*, and rice being sown. General health good.
Cuttack . .	6·21	Weather cloudy, with heavy showers of rain. Sowings of rice going on. Sporadic cases of cholera reported; public health otherwise good.
Midnapore . .	5·83	Weather cyclonic. Rainfall general throughout district. Sowings in active progress; crops good. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Khoolna . .	10·25	Weather cloudy and rainy. *Aus* rice growing; prospects of crops good. Public health good.
Dinagepore . .	1·36	Weather seasonable. Prospects of *aus*, jute, and sugarcane good. A few cases of small-pox and cattle-disease reported; public health otherwise good.
Pubna (Serajgunge) .	3·34	Weather very hot. Crops good. Health good.
Gya . .	2·50	Rain set in. *Kesari banga* doing well. Cattle-disease reported from three villages; public health good.
Chumparun . .	0·37	Weather cloudy. Lands for *bhadoi* crops being prepared. Public health fair.
		General Remarks.—Rain fell in all the districts more or less. Cultivation going on vigorously; *aus* rice and jute mostly sown. Price of rice stationary. Cholera prevalent in some places in Rungpore and Cuttack; cattle-disease prevalent in some places in Gya and Dinagepore; small-pox in latter district prevalent; public health otherwise good.
N.-W. Provinces and Oudh—(June 23rd)		
Benares (June 21st)	3·90 at Sadr	Weather seasonable. Supplies plentiful. Prices steady. Public health good.
Gorakhpore („ „)	1·80 at Sadr	Weather close and cloudy. Prices steady. Health fair; a few cases of cholera.
Fyzabad („ 22nd)	Heavy rain throughout the district.	*Kharif* sowing commenced. Prices steady. General health good.
Lucknow („ 21st)	6·40 to 11·30	Supplies ample. Prices steady. *Kharif* ploughing commenced. No disease either among men or cattle.

Agra („ 21st)	Good rain in all parganas from 2·70 to 4·30.	Weather cloudy. *Kharif* ploughings and sowings begun. Prices steady. Health good.
Jhansi („ „)	Average 4·0	Heat excessive. Prices unchanged. Health of people good; cattle-disease continues.
Meerut („ 22nd)	Rain all over the district on 19th, averaging from 2·10 to 5·10.	Weather still cloudy. *Kharif* operations in full swing. Supplies ample. Prices steady. Health good.
		General Remarks.—Rain has fallen throughout the Provinces, and the monsoon appears to have set in. *Kharif* sowings are in progress. Markets are well supplied, and prices generally steady. Public health is fair.
Punjab—(June 22nd)		
Hissar (June 15th)	3·60 at Sadr	Health fair. Prices stationary.
Delhi . .	0·01	Health good. Prices fluctuating.
Umballa . .	4·01	Health fair. Prices stationary.
Jullundur . .	1·90	Health good. Prices stationary.
Ferozepore . .	2·70	Health good. Prices stationary.
Amritsar . .	5·50	Health good. Prices stationary.
Sialkot . .	·80 on 14th and 19th in Tahsil Riah.	High winds; weather warm. *Kharif* crops being sown. Health good. Prices stationary.
Lahore . .	4·2	Health good. Prices stationary.
Mooltan . .	No rain at Sadr	Health good. Prices stationary.
Rawalpindi . .	Slight rain	Health good. Prices stationary. Prospects of current harvest average.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Shahpur . .	*Nil*	Health good. Prices rising.
Dera Ismail Khan .	*Nil*	Prices almost stationary.
Peshawar . .	*Nil*	Prices of wheat rising and other grains stationary.
		General Remarks.—Rain has fallen in the Hissar, Delhi, Umballa, Jullundur, Ferozepore, Amritsar, Lahore, and Rawalpindi districts. General health good, but there is some small-pox in the city of Dera Ismail Khan and several fatal cases of measles have occurred in the Peshawar district. Prices fluctuating in the Delhi district, rising in the Shahpur district, elsewhere stationary. *Kharif* sowings commenced.
Central Provinces—(June 23rd)		
Nagpur . .	·61	Weather rainy and cool. Sowings in progress. Cattle-disease in Kurol tahsil. Prices steady.
Jubbulpore . .	2·88	Weather stormy. Sowings commenced in places. Health good. Prices steady.
Saugor (June 22nd)	1·48	Weather cooler. Ploughing continues. Prices fallen. Slight fever.
Seoni . . .	2·84	Weather cloudy. Ploughing in progress. Cattle-disease decreasing; slight small-pox. Prices steady.
Hoshangabad . .	1·69	Weather cloudy and close. Ploughings continue. Small-pox prevalent. Prices stationary.
Khandwa . .	1·13	Weather cloudy. Sowings commenced. Health fair. Prices stationary.
Raipur . . .	Slight rain	Weather cloudy and close. Sowings commenced. Cholera and cattle-disease decreasing. Prices stationary.
Sambalpur (June 19th)	4·13	Weather favourable for sowing. Sugarcane good. Rice 23 seers per rupee.
		General Remarks.—There has been sufficient rain for the *kharif* sowings to be commenced, and prospects are favourable. Prices are steady, and health generally good.
British Burma—(June 16th)		
Akyab . (June 12th)	4·74; total rainfall 25·47.	Public health good; cattle-disease in two townships.
Bassein . . .	3·42; total rainfall 22·11.	Public health good; cattle-disease in two townships.
Rangoon . .	3·67; total rainfal 20·87.	Public health good; cattle healthy.
Amherst (Moulmein) .	9·57; total rainfall 37·55.	Public health good; cattle-disease slight.
Pegu . .	4·26; total rainfall 25·47.	Public health and health of cattle good.
Henzada . .	3·75; total rainfall 18·02.	Public health good; slight cattle-disease in one township.
Prome . . .	2·38; total rainfall 8·82.	Public health good; cattle healthy.
Tounghoo . .	1·47; total rainfall 15·44.	Public health good; cattle healthy.
Thayetmayo . .	1·26; total rainfall 7·41.	Small-pox and cattle-disease in one circle.
		General Remarks.—Slight cholera in Thonegwa district and small-pox in one circle of Thayetmayo district; elsewhere public health good; slight cattle-disease in parts of nine districts, elsewhere cattle healthy. Ploughing commenced in six districts.
Assam—(June 23rd)		
Gauhati . .	2·55 during week ending 22nd instant.	Weather hot. Cholera much diminished; cattle-disease still prevalent in some mouzahs. Ploughing land for *sali* commenced; prospect of *ahu* good.
Sylhet . .	3·41	State and prospects favourable.
Cachar . .	8·24	Weather wet. Ploughing for *aus* and *asra* crops progresses, but *aus* must now be a very poor harvest. Common rice 14 seers 5 chittacks per rupee. Prospects of tea satisfactory. Four deaths from cholera from Katigora reported; general health good.
Dibrugarh . .	3·23	More rain required for all crops. *Ahu dhan* partially destroyed by insects. Cholera abating in North Lakhimpur; public health good.
Mysore and Coorg—(June 23rd)		
Bangalore . .	Rainfall good in the Malnad district and fair in other parts of the State.	Standing crops in good condition; prospects of season favourable. Public health generally good. Prices slightly fallen in the Bangalore district.
Mysore . .		
Mercara . .	6·58	Weather seasonable for agricultural operations. Fever prevalent in parts. Prices stationary.
Berar and Hyderabad—		
Amraoti (June 23rd) .	3·05	Weather warm. Cotton sowing commenced. Wheat 22 and *juari* 20 seers per rupee.
Akola . . .	1·99	Weather cloudy and hot. Cotton sowing commenced.
Hyderabad . .	2·75; total rainfall since 1st January 11·28.	Fields continue to be ploughed for *kharif* crops; sowing of *kharif* crops commenced in some places. General health of taluks fair, except in Palloor, where fever prevails. Prices—wheat 14¾, coarse rice 11½, white *juar* 21½, yellow *juar* 22½, and *tur* 14¾ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(June 23rd)		
Indore . . .	2·92; total rainfall 11·15.	Monsoon weather. Health good.
Gwalior . .	1·13; total rainfall 1·30.	Health good. Weather cloudy and stormy.
Sutna . .	2·85	Health good.
Neemuch . .	·23	Health good. Prices slightly rising.
Goona . . .	·28	Two deaths from small-pox in Goona city, otherwise health good.
Agar . . .	·10	Health and prospects good.
Nowgong . .	·87; total rainfall 1·77.	Weather much cooler. Health good.
Bhopawar (Manpur) .	3·55; total rainfall 7·25.	Weather cloudy. Health good. Prices stationary.
Rajputana—(June 23rd)		
Abu (June 23rd)	2·71	Weather seasonable.
Sirohi („ 20th)	2·32	Tanks full; wells good. Health good. Crops being sown. Weather hot and sultry.
Marwar („ 18th)	·20	Six months' water in Jodhpur City tanks. Health good. Weather cloudy and warm and extremely close and sultry. Prices stationary.
Kherwara („ 20th)	·74	Tanks and wells west of Kherwara full, others very low. Ploughing and sowing continue. Health good; slight small-pox. Prices steady. Weather hot and sultry, with thunderstorms.
Meywar („ 19th)	·78	Tanks and wells low. Ploughing begun in some places. Health very good. Prices falling. Weather cloudy.
Pertabgarh („ „)	·30	Some water in wells. Health good. Prices steady. Weather cloudy, showery, and stormy.
Harowti („ „)	Tonk, ·99; Shahpura, ·15.	Weather cloudy and close. Health good.
Jhallawar („ 18th)	·29	Heat great. Health fair. *Kharif* operations commenced. Prices rising.
Kotah („ „)	·30	Heat very great. Health good. Prices rising.
Ajmere („ 22nd)	*Nil*	Heat again increasing. Cattle-disease in some parts of district. Weather cloudy.
Jeypore („ „)	*Nil*	Occasional storms; weather cloudy and hot. Health fair.
Keowlee („ 19th)	·14	Tanks dry; wells decreasing. Cotton and sugarcane cultivation good; *kharif* preparations commenced. Health good. Prices steady. Weather hot, with severe storms.
Dholepore („ 18th)	*Nil*	Tanks dry; wells decreasing. Health good. Prices stationary. Weather hot.
Ulwur („ 22nd)	Average of nine tahsils, 1·04.	Health fair. Ploughing of *kharif* commenced. Prices steady. Weather monsoonish.
Bickanir („ 19th)	Slight rain	Fever and small-pox prevalent. Prices stationary. Weather cloudy and windy.
Nepal—(June 17th)		
Katmandu (June 18th)	·65	Rain lately fallen, favourable to crop prospects.

C. J. LYALL,

Officiating Secretary to the Government of India.

N.B.—As regards the figures in column "*Total Receipts from 1st April to date*," audited figures have been used, as far as possible.

(a) Return not received.
(b) Total receipts from 1st April to 23rd May 1885.
(c) Total receipts from 1st April to 22nd May 1886.

SIMLA,
The 23rd June, 1886.

FRED. FIREBRACE, *Major, R.E.,*
Under Secretary.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 23rd June, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding.*
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble Colonel O. R. Newmarch.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Colonel W. G. Davies, C.S.I.

DEBTORS BILL.

The Hon'ble MR. ILBERT moved that the Bill to amend the law relating to Imprisonment for Debt be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley, the Hon'ble Mr. Quinton, the Hon'ble Peári Mohan Mukerji, the Hon'ble Rao Saheb Vishvanath Narayan Mandlik and the Mover.

The Hon'ble SIR THEODORE HOPE said:—

"Having for many years devoted a good deal of my time and attention to the improvement in various ways of our cumbrous and unsuitable Civil Procedure Code, and especially to the question of imprisonment for debt, I need scarcely say that I hailed with the very greatest pleasure the disposition to deal with that most important subject which was indicated in the recent speech of our hon'ble colleague the Law Member on the Bankruptcy Bill; and although the few words which then fell from him indicated that the measure which he contemplated was at most but a limited one, still I waited with great interest for the development of his scheme, and his exposition of the grounds of the conclusion at which he had arrived. Having had the advantage on the last occasion of our meeting of hearing the case put out in full, I hope that I may be permitted to say that his argument in favour of the abolition of imprisonment for debt altogether appears to me to be unanswerable, and his reply to the objections brought against that measure to be complete. It seemed to me that the whole question could not be better summed up than in the two statements which my hon'ble friend put before us, namely, that 'imprisonment for debt, as such, ought to be abolished in India as it has been abolished in England and other civilized countries, but that in India, as in England, imprisonment should be retained as a punishment in those cases where indebtedness involves an element of fraud'; and further that, 'if the Government of India entertains an opinion that the law is seriously defective, it would incur a grave responsibility if it were to hesitate or unduly delay to give its opinion practical effect.'

"Now, following such an effective exposition of the whole case as that, I viewed with more regret than ever my hon'ble friend's conclusion that the measure ought at present to be confined to one administration only in the whole of British India; but I must confess that my heart altogether sank within me as I listened to his final opinion that the effect of that application to one Local Government only ought to be ascertained before the Act was extended to

any other parts of the country. I would invite the Council to consider how very great must be the delay involved in such a postponement, and what a considerable period must elapse before the working of the Act in the province to which alone it is to be extended can be ascertained in such a clear and satisfactory manner as to satisfy objectors in other parts of India. This question, I may remind the Council, is not even one dating from the year 1879, when, as our hon'ble colleague the Law Member reminded us the other day, I brought it before this Council in connection with the Dekkhan Raiyats Bill. It goes back farther than that. Two years previously the battle raged, and in 1877 I succeeded in carrying an amendment of the Civil Procedure Code Bill, connected with the subject, which now is to be found as section 336 of that Code—that is to say, nearly ten years have elapsed since this question began to be placed actively before this Council from time to time. Now, the Dekkhan Raiyats Act of 1879, as my hon'ble colleague has stated, has fully justified the expectations entertained at the time as regards its provisions relating to imprisonment for debt. That Act, I am glad to say, has gradually been living down both the theoretical objections and practical obstruction with which it was at first for a long time assailed. Each year's report has established more clearly the soundness of its principles and the beneficial effect of its fundamental provisions; and no report that I have seen has been more convincing on this point than the very last one which we have received. But, notwithstanding all this, seven years have elapsed before that experience has been considered sufficiently strong—has carried sufficient weight—to enable the question of imprisonment for debt to be again brought before this Council. The evil, however, is no less than it is characterized, and is one that is very severely felt. I hold in my hand a vernacular petition which I received a few days ago from twenty-one debtors confined in one of the civil jails of the Bombay Presidency. These persons, we may all be glad to see, take an interest in the proceedings of this Council. At any rate, they have addressed me in the vernacular, saying how glad they are that their woes have at last come to the notice of the Supreme Government, and praying that they may receive early relief. I need scarcely say that they are careful to suggest likewise that whatever measure is brought in may have retrospective effect! Now, how much longer, I would ask, is the state of things, or the injustice, as I might more rightly term it, pointed out in this petition to be allowed to continue? It appears to me that we may very well consider whether such delay as would be involved in waiting for the experience of the application of the Act to the North-Western Provinces before it is allowed to be extended to any other parts of the country is really necessary or not. I should say that the other Governments might just as well accept the experience which they have already got from the seven years' working of the Bombay Act as wait for the several years' more experience of the North-Western Provinces. I would farther ask whether they are more likely to be convinced by the experience in the latter case which is yet to come than by the experience in the former case which they have already acquired; if they do not believe in the experience derived in the one case, what reason have we to assume that they are likely to believe it in the other? They will probably, some of them at least, be convinced by nothing except by that actual experience in their own case which is proverbially said to be the only effective mode of convincing the majority of us. Now, I gather that my hon'ble colleague has been unwillingly led to the conclusion, which he felt himself bound to enunciate, as regards this postponement, and that this recommendation for postponement, which I understand he deplores as much as I do, has been brought about by the authority and experience of the opponents whom he finds arrayed against this measure. As far as I am aware, this adverse authority and experience is chiefly to be found in the papers relating to the inquiry which took place in 1881-82. I have again looked into a considerable proportion of these, and I should like, with the permission of Your Excellency, just to read one of the opinions upon which this decision for delay may be held to be based—that is, the opinion given on 12th February, 1882, by the Hon'ble Sir Charles Sargent, the Chief Justice of my own Presidency of Bombay. Sir Charles Sargent wrote as follows:—

'I think it would be highly unadvisable to abolish imprisonment for debt. There is no reason to suppose it offends the public conscience, and undoubtedly, in numerous cases, affords the only means to the judgment-creditor of obtaining satisfaction of his decree. It should be remembered that the position of a judgment-creditor in this country is one of peculiar difficulty. The legal incidents of the undivided Hindu family, the minute distribution of property occasioned by the Muhammadan law of descent, and, though last, not least, the practice of creating *bénámi* titles so common in this country, afford the dishonest debtor endless opportunities of baffling the efforts of his judgment-creditor to attach his property. In numerous instances the only hope of obtaining payment of a judgment-debt lies in the possibility of putting pressure on the debtor and his relations by the arrest of the former.'

That is to say, the Chief Justice of Bombay considers that a certain mode of recovering private debts is justifiable because it is revolting to the general feelings of those to whom it is even indirectly applied, and that a judgment-creditor may properly recover his claims by subjecting his debtor to a process so distressing that a man's relations, although entirely unconnected with his private affairs, will be forced to come forward and subscribe for his release. I do not think that I need dilate further on the value of such arguments as that. I regret to see that this opinion was endorsed by four other Judges of the Bombay High Court, who disposed of the whole matter in less than half a page of print. Only one other judge, Mr. Justice West, with that caution which might be expected from his well known ability and experience, abstained from committing himself so far, and said that it would be desirable before going farther to institute a careful inquiry into the present working of the system.

"I will now come to the practical conclusion of the remarks which I have ventured to offer, and that is, that I trust that the declaration which our hon'ble colleague made in the course of his speech may not be taken to be an absolute one, and that I trust, moreover, that all the Local Governments will consider the promulgation of this Bill as an invitation to reconsider the whole question upon its abstract merits as they have now been so clearly put forward by our hon'ble colleague, and also upon the actual results of the seven years Bombay experience now available to them. I would fain hope that His Honour the Lieutenant-Governor of the Punjab may be induced by such fresh consideration to hesitate no longer in throwing over that "weight of learned opinion" by which in 1882 he felt himself to be embarrassed; that others may also follow the same course; and that upon such support the Hon'ble Law Member himself may take heart of grace, and may be able at any rate to see his way in the Select Committee to following the precedent adopted in the Indian Forest Act, and other Acts, of allowing the Act to apply at once to as many localities as may express a desire for it, and leaving the others to follow whenever circumstances or their own opinions may justify its application.

"By this means—and, as it seems to me, this means alone—can this Council and Your Excellency, its President, be relieved of the painful alternative of continuing in the greater portion of British India a system which is admittedly opposed to the law of other civilized nations of the world, and which the Law Member lately characterised as 'bad for the debtor, bad for the creditor, and bad for the country altogether.'"

The Hon'ble SIR STEUART BAYLEY said:—"I hope not to detain the Council any length of time with what I have got to say about this Bill, but, my hon'ble friend who introduced it having referred to the view which I expressed when Resident of Hyderabad in favour of the principle now introduced, I wish to add that I have since that date had the opportunity of examining the matter a good deal more closely and in the light of the correspondence which was gathered together in 1883. That correspondence included the opinions of selected judicial officers and administrative officers in all parts of India; and, though the majority of opinions was against the abolition of imprisonment for debt pure and simple, there was a very strong element in favour of such modified abolition as Mr. Ilbert has introduced into this Bill; and I can only say that the result of a more lengthened study of the subject has been to confirm me strongly in the conviction that the principle on which this Bill is based is a right and a sound principle. I think the public are perhaps likely to be led away by the use of the expression 'the abolition of imprisonment for debt,' though its

meaning is sufficiently clear when you go into the Bill. The Bill does not absolutely and universally abolish imprisonment for debt even in those districts to which it will be applied. What the Bill does propose to do is to take away from the creditor the absolute and irresponsible power that he now has of imprisoning his debtor at his own will and pleasure. As the law now stands in regard to any debtor, whether he be honest or dishonest, whether it be a pardánashin lady, or the father of a family upon whose support they depend, or whether it be a widow with young children, if the creditor applies to the Court for a warrant of arrest the Court has no discretion but to place itself as a passive instrument in the hands of the creditor to carry out his wishes. The Court cannot say in one case 'there seems no dishonesty but merely misfortune, and the debtor should not go to jail'; the Court cannot say in another case 'the debtor has property, you should proceed against his property before you proceed against his person'; the Court, as I have said, is simply a passive instrument in the hands of the creditor. Well, what the Bill proposes to do is to remove this absolute power from the hands of the creditor and to give discretion to the Court, and at the same time it instructs the Court that it is to use this discretion in the matter of imprisonment only when the debtor is either fraudulent or recalcitrant, that is to say, when he makes away with or hides his property or when he obstinately refuses to pay. Most of the supporters of the law as it at present stands take up the position that in cases of fraud or in cases of recalcitrancy the creditor has really no other means than that of imprisoning the person of his debtor, for getting back the money that is due to him. On this point the weapon remains as before, that is to say, it remains at the disposal of the creditor, but it is to be used through the Court. It may be said that it would be very difficult to convince a Civil Court of fraud. It cannot, however, be very difficult at all events to satisfy the Court, in the words of the law, in cases where the defaulter, having means to pay, has refused *or without reasonable cause neglected* to pay. That is all that has to be proved; and, judging from the manner in which some similar clauses have been worked at home by County Court Judges, it does not seem that the judicial officers will have much difficulty in satisfying themselves on the point or in working the law so as to give sufficient relief to creditors. We are also told that if this Bill were generally applied it would restrict credit by destroying the value of personal security, and some of the objectors go farther and say that, in agricultural communities especially, agriculturists have nothing to offer but personal security, and that in their case it will make credit so difficult that they will probably not be able to get money when they want it, and that therefore they will not be able to pay the land-revenue. That is one of the strongest arguments against the measure. Well, I think that there is here a little confusion of ideas about personal security. True, the agriculturist without rights of occupancy has no landed security to offer, but what he borrows on is not the security of his person but the security of the coming crop. For generations and generations this security has been given and accepted; it is now left as it was before in the Bill; and I think we may trust that for generations to come that security will be found to be sufficient by the village-mahájan. But I do not wish to minimise the effect which the Bill is likely to have on credit. I think that in a limited class of cases in which people borrow money having absolutely nothing against which the creditor can go, and in which he is bound therefore to trust to the small benefit of putting his debtor in jail,—in those cases I have no doubt that the Bill will restrict credit, and I think that anybody who watches the cases of insolvency in our Presidency-towns will say that in those cases credit is rightly restricted, and that the ultimate result will be to put the whole relations of that class of cases on a much better footing than they are at present.

"I wish to avoid going over the whole extent of ground traversed in the speech of my hon'ble friend when he introduced the Bill, so I will not emphasise one strong point, namely, the extraordinary anomaly that imprisonment for debt may be used to defeat certain provisions of the legislature. Those provisions are that the bare necessaries of life are to be left to the debtor, and that in certain cases a debtor's pension should not be touched; but, as Mr. Ilbert pointed out, bringing this threat of imprisonment to bear, you can make a man give up his implements of agriculture, or make him transfer his pension, and then what possibly

remains of those provisions which it was the object of the legislature to keep in force? But I do want to lay some emphasis on the fact that under this Bill the creditor will be very little, if at all, worse off than under the existing law in regard to those who *will not* pay, and that in regard to those who *cannot* pay the provisions of the existing law are a cruel scandal and a discredit to our administration. I suppose that, out of every five hundred warrants for arrest issued, not more than one is ever followed by the arrest of the debtor. They are used *in terrorem*, to make him give fresh bonds, practically to make him bind himself for life; and it is in this respect, as a screw for extorting money either from him, or, as our colleague Sir Theodore Hope has pointed out, from his friends and relatives, that the real power of arrest is useful to the creditor. If I am allowed I should like to read a few sentences from one of the papers that came up in 1883 which shows how this power was stated to be used in the district of Kandeish. The report is by the District and Sessions Judge of Kandeish, and in it he wrote as follows:—

'The liability of the creditor for his debtor's subsistence while in confinement deters the majority of parties applying for execution from seeking this method of redress. It has, more than any other form of enforcement, the effect of lessening the debtor's prospects and means of payment at the very moment when his obligations become most pressing. Further, it spreads the distress, arising from the inability to pay, over a wider circle, leaving those who are dependent on the personal labour or exertions of the debtor in a state of destitution. As a matter of fact, the creditor seldom or never carries into execution the power thus given him over his debtor. He prefers to stop short of the last step; and though he applies for enforcement of execution by imprisonment, he does it only that he may hold the warrant *in terrorem* over his judgment-debtor and, when opportunity offers, exact more advantageous terms for himself.'

"And then he goes on to say:—

'In former years, to judge from reports, this power was frequently exercised by the saukárs to assist the most flagitious designs on the females of the debtors' families. There is ground for hope that this most heinous abuse is dying out if not extinct; but still the saukárs appear to aim at involving, if possible, in their claims the mother or wife of the principal debtor. Their reason for doing so is not far to seek, and affords an instance of the most flagrant abuse that is now made of the law of arrest for debt. It is simply a more ingenious form of the torture and pressure applied to extort from the judgment-debtor the entire surrender of his present and future property and his personal labour. If the Kunbi or the Bheel fears confinement for himself, the prospect is not less alarming to him when it threatens to consign to imprisonment in the district jail an aged mother or a youthful wife. He is willing, rather than submit to such pain and degradation, to consent to almost any terms, however impossible of fulfilment, and, if he is unable to offer to his creditor any property in existence, he consents to resign his own liberty of action by becoming a saldár (or yearly servant) to the creditor or the purchaser of the decree. There is thus ground for believing that the statement made in former reports is literally true, that "in the Satpuras the Bheels are bought and sold as slaves." The shortest personal experience in this district teaches us that the facts are not exaggerated. A number of bonds, even as they appear on appeal, bear not only the signature of the actual borrower but also that of the wife or mother; nor is this practice confined to the Bheel debtors; it is equally common in the case of Kunbis. The execution of a deed by the wife or mother is regarded as an excellent security; under the circumstances none could be more effective for the creditor's purposes. The number of salkhuts (agreements to service for a year) in satisfaction of decrees is a sufficient confirmation of the statement that the personal labour of the indebted classes is a matter of traffic among creditors. Decrees pass from hand to hand, and with them the livestock which represent the only means of satisfying them.'

"Well, I must repeat the fact that under the existing law the Courts of Justice are the mere passive instruments of carrying out oppression of the above kind; that it is a great blot in the existing system; and that it is a duty which the Government of India ought not to postpone longer than is absolutely necessary to remove that blot and put the law on a proper footing. As Mr. Ilbert has informed the Council, we have obtained from the Secretary of State a report from almost every country in which Great Britain has Consular Agents of the state of the law in regard to this subject; and, having looked through that report, I find that in almost every country of Europe and America the existing law is on the lines on which we propose to base this new Bill. In France and Italy, in Portugal and Spain, in the German States and Austria, in Sweden, Norway and Denmark, in the United States of America mostly, and in most of the States

even of Southern America, imprisonment for simple debt is a thing of the past; and in all those countries where imprisonment remains it is as a punishment for conduct either fraudulent or recalcitrant. I am now speaking only of ordinary civil debts. The only countries apparently in which the law stands as it is in India are the Ottoman Empire, Tunis, and some parts of Russia. Well, I have referred to the correspondence which took place in 1883, and, as I have said, the majority of the officers consulted were against any material alteration of the law. I think, notwithstanding what has fallen from my hon'ble friend Sir Theodore Hope, that in this state of the case the Government of India were justified in not attempting to force in the face of public opinion an advanced measure and to apply it at once to the whole of India. I think they were justified in making it an experimental step and in applying it only to the North-Western Provinces and Oudh, where both the High Court and the Local Government are strongly in favour of it. It occurs to me as possible that the difference of opinion which is so marked in those papers has perhaps for its foundation a not very obscure difference of circumstance; that those authorities who for the most part had under their eye agricultural operations and the interests of the agriculturists were strongly in favour of altering the law at the earliest possible moment; whereas those authorities who dealt mostly with cases of a commercial nature did not see their way so readily to making any alteration of the law. Be that as it may, think that in the face of the opposition shown at that time the Government of India were bound to apply the Bill in the first instance to a limited area where it was shown that there was a sufficient authority in favour of it. I can only say that I most heartily concur in the hope and wish expressed by my hon'ble friend Sir Theodore Hope that other Local Governments will soon follow the example of the North-Western Provinces and Oudh; and I hope that the reproach will soon be removed from India of having on the subject of imprisonment for debt a law which is more backward than that of States like, let us say, Egypt and Servia in the Old World and like Venezuela and Montevideo in the New."

The Hon'ble MR. ILBERT said:—"I am very much indebted to my hon'ble colleagues for the effective support they have given to the measure which I introduced at the last meeting of this Council. My hon'ble friend Sir Theodore Hope is quite right in supposing that, if I had felt myself at liberty to act in accordance with my own opinion of what the law ought to be, I should have given wider application to the measure; but in saying, as I did, that I thought it preferable that the primary application of the Bill should be confined to the territories under one particular Local Government, I merely wished to indicate my view as to the course which, in the presence of the body of opinion now before us, it would be most prudent and politic to take. The extent of the application of the Bill is a question which it is within the competency of the Select Committee to consider; and if the authorities of any other province should, in the light of the further experience which has been acquired since the discussions of 1881-82, and after having seen what are the actual proposals of the Bill,—should these authorities express an opinion that the Bill should be extended at once to that province, I should be extremely glad if the Select Committee could see their way to modifying the Bill accordingly."

The Motion was put and agreed to.

OUDH WASIKAS BILL.

The Hon'ble MR. ILBERT, on behalf of the Hon'ble Mr. Quinton, also moved that the Bill to declare certain allowances collectively known as Oudh Wasikas to be pensions within the meaning of the Pensions Act, 1871, be referred to a Select Committee consisting of the Hon'ble Sir A. Colvin, the Hon'ble Mr. Quinton and the Mover.

The Motion was put and agreed to.

INDIAN PORTS ACTS ACT, 1875, AMENDMENT BILL.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill to amend the Indian Ports Act, 1875. He said:—

"The grounds on which it is desired to introduce the measure indicated on the notice paper is this. Certain steamers are engaged in the coasting trade of the Madras Presidency, but are not 'coasting steamers' within the meaning of the expression as defined in Part III of the Schedule to the Indian Ports Act, 1875. They have therefore to pay port-dues at every port they call at in a group, instead of only paying them at the first port they call at and being free at every other port in the group for a period of thirty days. The owners of these steamers represented to the Government that the levy of these full port-rates at every port the steamers call at is a considerable hardship and is detrimental to the trade which their steamers are fostering, and they have asked that their steamers may be treated as coasting steamers. The Government of India is of opinion that the law, as it stands at present, bears hardly not only on these steamers engaged in the coasting trade, but also on other steamers and sailing vessels. The provisions of the law at present applicable to ports within the limits of the Madras Government do not extend to the ports situate in the Bombay Presidency, where the existing practice is similar to that which it is the object of the proposed Bill to render legal. The financial effect of the measure on the local port trust funds will not be considerable. It appears therefore desirable that the law should be amended generally for all vessels calling at ports in the Madras Presidency. The present Bill has been prepared in consultation with the local authorities and Chamber of Commerce. With the object of settling the port-dues on as fair and liberal a basis as is consistent with obtaining a sufficient income, the Bill recasts Part III of the First Schedule to the Indian Ports Act on the lines indicated in the Statement of Objects and Reasons which I think it unnecessay to recapitulate here."

GUARDIANS AND WARDS BILL.

The Hon'ble MR. ILBERT moved that the Hon'ble Syud Ameer Hossein be added to the Select Committee on the Bill to consolidate and amend the law relating to Guardian and Ward. He said that he was very glad to be in a position to reinforce the Select Committee by the appointment of a representative of the Mahammadan community.

The Motion was put and agreed to.

PUNJAB TENANCY BILL.

The Hon'ble COLONEL DAVIES moved for leave to introduce a Bill to amend the law relating to the Tenancy of Land in the Punjab. He said:—

"MY LORD,—Eighteen years having nearly elapsed since the Punjab Tenancy Act was passed, it will, I think, be convenient if, before explaining the grounds on which it is proposed to amend it, I briefly describe to Your Lordship and the Council the circumstances under which it was passed, and the general scope and character of the measure itself.

"When, after the Sikh wars of 1845-46 and 1848-49, the Punjab was annexed to the British possessions in India, one of the earliest and most important duties which fell to the revenue-authorities of the time to perform was the making of what is called a settlement of the land-revenue. This, as is well known, consists of two operations—the assessment of the revenue, and the framing of a record of the rights and interests of all who are in any way connected with the land from the produce of which the revenue is paid. The inquiries made by the officers who were charged with this duty showed that the agricultural population of the Province was chiefly made up of cultivating communities of small peasant-proprietors; but interspersed among these in varying proportions were found persons who, though they might not in the eyes of the country have a claim to proprietary right, had cultivated the lands in their occupation for long periods on almost the same footing as the recognised proprietors, and had moreover in many instances been the first to reclaim those lands from waste. The officers who made the earlier regular settlements, following in this respect the well-known twelve-year rule which had been in force in the North-West Provinces, whose revenue-system had been authoritatively introduced into the Punjab, caused

a large proportion of these non-proprietary cultivators to be shown in the settlement-records as having rights of occupancy. No opposition on the part of the proprietors themselves was made to this proceeding; on the contrary, they everywhere showed a readiness, amounting almost to eagerness, to induce men of this class to share with them, on almost any terms, the new and then much-dreaded responsibility of our system of fixed cash assessments; and the terms generally recorded were, that for the period of settlement these tenants should hold their lands on payment of the quotas of revenue assessed thereon, with the addition sometimes of a small proprietary fee, or mālikāna, varying from five to ten per cent. on the revenue.

"But by the time some of these first regular settlements came to be revised, circumstances had greatly changed, and with them the attitude of the proprietors towards this class of tenants. Fifteen years of peace and settled government, combined with improvements in communications, had greatly developed trade and raised prices; and the landlords had begun to look with a covetous eye on the large profits which these tenants were now enjoying, and in which, by the conditions of the expired settlements, they had hitherto been debarred from sharing. Their cause was vigorously taken up by the Settlement Commissioner, Mr. Prinsep, and, on the ground that great mistakes had been made during the first settlements in creating, in disregard of local customs, rights of occupancy on the basis of mere length of occupancy, a general inquiry into the status and rights of these tenants was instituted in the districts of the Lahore and Amritsar Divisions, and resulted in reducing two-thirds of these tenants to the position of either lease-holders for various terms or mere tenants-at-will.

"Two opposite views were taken of these proceedings. On the one side, it was contended that they amounted to a wholesale confiscation of rights of long standing which had been created and guaranteed by the British Government. On the other hand, it was urged that the entries relating to these rights had been made without sufficient inquiry, and without due regard to the superior rights of the landlords—rights of which the exercise might for a time have been suspended owing to the oppressive character of the Sikh revenue-system, but of which the memory was still tenaciously cherished, and which, in consequence of the moderation of our assessments, had once more become valuable.

"The Act was a compromise between these conflicting views, and was based on the results of long and careful inquiries into the relations of proprietors and tenants during Sikh times, made from the best sources of information then available.

"The immediate effect of the measure was to restore to the greater number of occupancy-tenants the status of which the proceedings of the Settlement Commissioner and his subordinates had deprived them. But it, at the same time, greatly improved and strengthened the position of the landlords by giving them what they really wanted—the means of obtaining a fair share of the profits of the lands cultivated by these tenants. Apart from this, the chief value of the Act was that it defined with precision the rights of occupancy-tenants, and regulated the relations of the landlords with tenants of all classes. To use the words of our present Lieutenant-Governor in a Minute on this question written in 1882, 'it is probably in its main principles the nearest approach to the old law and custom of the Province in respect of occupancy-right that could at the time have been hoped for'; and, quoting again from an opinion left on record by the late Lieutenant-Governor, 'in spite of its many imperfections, Sir Robert Egerton regards this much-controverted measure as one of the greatest boons conferred on the Punjab by the administration of Lord Lawrence: regarded by some, at the time, as a confiscation of proprietary right, it has been found defective only in the comprehensiveness of its provisions for maintaining the status of tenants, while in the greater part of the Province it is the bulwark and charter of a contented peasantry.'

"In the revision of the Act now proposed it is not contemplated to depart in any important particular from the principles and policy to which it gave expression, but to confine the operation to the correction of mistakes which had crept into it owing to the haste with which, in its later stages, it was passed through the Council, and to supply defects which subsequent experience of its working has shown to exist.

"The first proposals for the amendment of the Act were made in 1876 by the Financial Commissioner, Mr. (afterwards Sir R.) Egerton, with the general concurrence of the Judges of the Chief Court. But the Lieutenant-Governor (Sir Henry Davies), thinking it inexpedient to reopen questions of principle which had been fully discussed and decided when the Act was passed, confined himself to advocating a few minor modifications in the law. The Government of India was, however, unwilling to resort to legislation until its necessity had been further demonstrated, and the matter for the time was allowed to drop.

"More recently, during the revision of the settlement of two of the districts of the Province, facts have come to light which show that certain provisions of the Act have caused, and, if allowed to stand, would be likely to cause, hardship to this class of tenants. The Famine Commissioners in their report have also made numerous proposals with a view to improving the relations of landlords and tenants generally, many of which have been accepted and introduced into the revised Rent and Tenancy Acts of other Provinces. I propose, with the permission of Your Lordship, to say a few words on each of these subjects.

"In one of the two districts referred to—that of Sirsa—the question which arose between landlord and tenant was mainly one of title. Eighty years ago the tract of country comprised within the limits of this district was uninhabited waste. It was colonised chiefly by immigrants from the surrounding Native States, where, while there was no limit to rent, there was no practice of ejectment. Up to the commencement of the regular settlement of 1852 there was no restriction on the power of the individual colonists to break up as much of the waste as they chose, on condition of paying the customary rent and dues on their cultivation, and in practice each cultivator held the land reclaimed by him undisturbed so long as he made these payments. At the first regular settlement, however, the proprietorship of each estate was declared to belong *exclusively* to the leaders of the body of colonists who had settled in it, or to the representatives of those persons who had first received permission from the State to found a village therein; and it was further declared that the ordinary cultivators would thenceforth have no right to break up land without the permission of those to whom proprietary rights had been granted. At the same time, however, rights of occupancy in the land then held by them were granted to the cultivators from whom proprietary rights had been withheld. The result of this settlement was that the whole area of the district—nearly two million acres—was declared to belong in proprietary right to about 5,000 persons, while the remaining 25,000 cultivators were recorded as holding under them as tenants, with rights of occupancy in about nine-tenths of the half million acres cultivated by them.

"When this settlement came to be revised, twenty years later, it was found that considerable changes had taken place in the interval. Occupancy-rights had been lost or abandoned in about a fourth of the area in which those rights had been recorded, but, on the other hand, a large proportion of what was uncultivated waste when that record was framed had been brought under the plough, and, owing to the decision above referred to, so much of this newly reclaimed land as had been broken up by the tenants was shown in the annual papers as held without a right of occupancy. Thus at the revision of settlement it was found that of the total cultivated area of more than a million of acres, about two-fifths were held by tenants without any right of this kind. Up to 1874, when the term of the first settlement was about to expire, the Punjab Tenancy Act had little effect on the Sirsa District. The area of unreclaimed land being still very large, it was to the interest of the proprietors to have as much of it as possible brought under the plough; and they had therefore encouraged their tenants to extend their cultivation, and ejectment-proceedings were almost unknown. But the proprietors, hearing

that the settlement would soon be revised, now began to fear that, unless they asserted their rights, the same procedure might be followed at the revised as had been adopted at the regular settlement, and that the tenants might be recorded as having rights of occupancy in all the land cultivated by them. They accordingly set to work to issue notices of ejectment under the Act in great numbers. This was done apparently, not so much with the object of actually ousting their tenants or of raising their rents, as of clearing their own title by establishing their right to eject the tenants from the lands which the latter had reclaimed since the first settlement. During the six years ending in October, 1880, notices of ejectment were served on the tenants of 64,500 acres, or about a sixth of the area held by tenants without rights of occupancy. On the other hand, the tenants, accustomed to be left in possession of their cultivated lands so long as they paid the rent due on them, felt that they were being hardly treated in being ejected from land which they had themselves in many instances reclaimed from waste. They naturally expected that they would be as fully protected in the occupation of these lands as they had been in the possession of those broken up by them before the first settlement; and in this belief more than half the notices of ejectment were contested by them in Court, while more than a thousand suits were brought on other grounds to establish a right of occupancy in lands held by them. The Courts, however, felt themselves bound by the decision of Government already referred to, according to which the waste land had been left at the absolute disposal of the proprietors; and the result generally was that the tenants' claims were dismissed, and the tenants were compelled either to leave their lands, or to acknowledge themselves as holding at the will of the proprietors.

"In answer to a call made by the Government of India, whose attention had been attracted to the subject by a passage in the Annual Revenue-administration Report of the Province, a special report on the working of the Tenancy Act in this district was submitted in 1881. The Financial Commissioner (Mr. Lyall), concurring with the Settlement-authorities, recommended special legislation with the object of protecting the tenants from ejectment from the lands which they had reclaimed from waste and held for long periods. The chief grounds for this recommendation were (1) the reasonable expectations formed by the tenants that they would be maintained in the occupation of these lands; (2) the injurious effect of these wholesale ejectments on the well-being of the district; and (3) the arbitrary nature of the grant of proprietary rights in the waste at the first settlement to a few persons whose claim to those rights was not, in any marked degree, superior to that of their fellow-colonists, to whose co-operation, rather than to their own labour, the development of the district and the value of their rights were mainly due.

"In reporting these circumstances to the Government of India in October, 1882, the Lieutenant-Governor (Sir R. Egerton), though holding that a law to enable Settlement-officers at the time of settlement to fix the rents of tenants with rights of occupancy would be an undoubted advantage, did not consider that the need of special legislation for this district had been established. But the Government of India, in replying to the Punjab Government in the following May, stated that it was not disposed to accept the view that the evils brought to light did not afford a sufficient case for legislation; that, on the contrary, they seemed to demand decisive action; and that, if, under this view, the amendment of the Punjab Tenancy Act, as a whole, should seem to the Lieutenant-Governor to be required, the magnitude of the question would not deter the Government of India from entering upon it. It was added that, before forming any definite conclusions on this question, the Government wished to have the opinion of Sir Charles Aitchison, who, by this time, had succeeded to the charge of the Province.

"Before describing what followed on this communication, it will, I think, be well to complete the history of the struggle between the landlords and tenants of this district. Towards the end of 1881 the latter were informed by Sir R. Egerton's order that their relations with the former would continue to be regulated by the Tenancy Act of 1868, and, finding that the Courts held that under the provisions of that Act they were liable to be ejected from land broken

up by them since the date of the first settlement, they accepted the position and acknowledged themselves to be at the mercy of the landlords as regards these lands.

"A somewhat remarkable result followed on the submission of the tenants. In many cases the landlords either sold or made a free gift of occupancy-rights in such land to their tenants, and the result was that on the completion of the settlement-record in 1882 it was found that, in place of 350,000 acres held with rights of occupancy, more than 470,000 acres were now so held. Since then the Government has itself conferred rights of this kind in 80,000 acres on the cultivators in certain villages which were held in farm, and the total area held with rights of occupancy is now about 500,000 acres, or half the total cultivated area of this district. The rents of all tenants of this class were fixed by the Settlement-officer, but under the present law these rents are liable to enhancement every five years, and I am sorry to have to add that a number of suits for enhancements have already been instituted.

"I may now return to the main line of my narrative. The views of Sir Charles Aitchison were expressed in a Minute, which, with a Memorandum by the late Financial Commissioner (Mr. J. B. Lyall), was forwarded to the Government of India in the beginning of July, 1882. While concurring with his predecessors and the Chief Revenue-authority that no radical change should be made in the principles and policy of the existing Tenancy Law, the Lieutenant-Governor was of opinion that experience had shown that a few modifications in the mode of applying those principles in practice were urgently called for. The most important of these related to the system under which enhancements of rent were made.

"As just stated, the existing law prescribes that on certain specified grounds the Courts on the suit of the landlord may decree enhancement at intervals of five years.

"Statistics, the Lieutenant-Governor wrote, showed that suits of this kind were increasing; that a difference of interest was thus making its appearance between landlords and occupancy-tenants, which in time might embitter the relations between these classes; and, as the most suitable remedy for this evil, he proposed to revert to the law formerly in force in the Punjab, and empower Settlement-officers to fix, the rents of occupancy-tenants paying in cash, in terms of the revenue, and for the period of settlement. I may here mention that a precisely similar recommendation, based on the same grounds, had been made by the Famine Commissioners, whose proposals on this subject had about this time been circulated for the opinions of Local Governments and Administrations. As bearing directly on the subject I am treating of, I may perhaps be allowed to quote a short passage from that portion of their report which deals with the relations of landlord and tenant in Northern India. In paragraph 26 of this section they wrote as follows:—

'The chief scope which our system affords for the exercise of the antagonistic feelings which, as stated in paragraph 19, exist between the two classes, is in the Rent Courts, where the landlord can sue for enhancement of rent. These suits are extremely perplexing in their character; they involve a great deal of minute and laborious inquiry into the soils and the current rates of rent, and the decision of the Courts have often been conflicting; such circumstances give encouragement to litigation, and leave a feeling of bitterness behind them when the suits are decided. It is to the interests of all parties and of the State that litigation of this kind should be discouraged as far as can be fairly done with due regard to the claims of either side. Under the present law a landlord who has sued a tenant for enhancement of rent can sue him again after a period of five years in the Punjab, ten years in the North-West Provinces, one year in Bengal, and the same in the Central Provinces, in respect of a "conditional" occupant. Moreover, as the landlord can sue his tenants in detail in successive years, the sore is constantly kept open. We are of opinion that most of these evils could be avoided by reverting to the original principle, under which the rent of privileged tenants could be altered only at the same time as the revenue, and had to be fixed periodically by the same officer who fixed the revenue.'

"But to return from this digression. The case of the Sirsa tenants was then discussed by the Lieutenant-Governor, and the conclusion arrived at by him was that, in the face of the clear grant of proprietary right to others, it would not be just or expedient to create by legislation occupancy-rights which

might or might not have accrued if circumstances had been different. But he agreed with the Financial Commissioner in thinking that compensation for disturbance should be given to these and to all other tenants who had broken up waste-land. A few less important alterations in the law proposed by Mr. Lyall were also supported by Sir Charles Aitchison; and his proposals having met with the general approval of the Government of India, instructions were issued, towards the end of the year, to the Financial Commissioner to prepare, in consultation with the Settlement Commissioner, a Draft Act comprising such of the amendments proposed as Mr. Lyall was prepared to accept, and such others as he himself might wish to see adopted.

"While these matters were still under consideration, reports were received which showed that a burning question relating to enhancement of rents had arisen in the Hoshiarpur district, then under settlement. It was pointed out in these reports that this district is exceptionally situated in respect to the number of holdings of tenants of this class paying at revenue-rates with or without the addition of a cash nankáni, or proprietary fee, rarely exceeding two annas in the rupee; that these tenants, more than 90,000 in number, were liable under section 11 of the Act to have their rents raised to 'the rate of rent usually paid in the neighbourhood by tenants of *the same class* for land of a similar description and with similar advantages,' less only a deduction of fifteen per cent.; and figures were furnished showing that the cash-rents paid by tenants-at-will were seldom less, and were often more, than twice and even *three times* the revenue assessed on the land held by them. Further, that though these rents were paid on only a very small portion of the whole cultivated area, the area so held was large enough to enable proprietors to base their enhancement claims on these exceptionally high rents. At the same time it was confidently expected that the occupancy-tenants would firmly resist the claims to these severe enhancements, and it was argued that they would be right in so doing, for the reason that these cash-paying tenants-at-will were not, as regards the tenancies on which these high rents were paid, *of the same class* as the occupancy-tenants; and in explanation of this it was stated that these exceptional rents were paid for land usually cultivated by the owner, but let to men who, having other land of their own, were willing to pay a high rent for one or two additional plots to be cultivated with spare stock and at spare moments. For these and other reasons it was anticipated that long and harassing litigation was impending, which, besides ruining the parties to it, would generally and permanently embitter the relations between these two important sections of the agricultural population; and on these grounds the Settlement Commissioner, strongly supported by the Financial Commissioner, recommended that application should be made to the legislature either to pass a short enactment temporarily introducing into this and other districts under settlement the revised provisions for enhancement contained in Chapter III of the Draft Bill, or a law giving to the Local Government power to suspend the decision of suits for enhancement of rents for a certain period. Sir Charles Aitchison was, however, unwilling to advocate special and emergent legislation of this kind, and preferred to proceed with the revision of the Tenancy Act for the Punjab generally. Up to the present time the old light rents have been in most cases maintained, because they are in accordance with entries in the old settlement-record, which under section 2 of the Act have the force of agreements; and the Chief Court has, by recent decisions, held that these agreements remain in force until the new record-of-rights is handed over to the Deputy Commissioner of the district, under a direction of the Local Government on the report of the Financial Commissioner that the operations of the settlement are completed. Under these circumstances the Government has purposely refrained from giving a direction of this kind in regard to the records of the settlement of this district. It is obvious that, unless the law is altered, the same difficulties will arise in other districts now under settlement as those which have arisen here.

"These are, My Lord, the circumstances which have led to the proposal to revise the Tenancy Law of the Province, and, having described them, I will add

a few words regarding the form which it is proposed that legislation shall take. The Draft Bill framed by the Financial and Settlement Commissioners in April, 1883, did not altogether meet with the approval of the Lieutenant-Governor, and for reasons which were fully explained at the time (but which I need not occupy the time of the Council by repeating, as the whole of the correspondence on the subject will shortly be placed before it if this Motion is carried) he was at first inclined to limit legislation, if undertaken at all, to minor modifications involving no very important principles, and such as were required mainly for the purpose of removing ambiguities and correcting mistakes and omissions, of partially enlarging the provisions relating to the more privileged classes of tenants, and of affording a limited protection to tenants who had earned a right to special consideration by breaking up waste land.

"After some further discussion in correspondence with the Government of India, it was decided that legislation should proceed on this basis; and further, that, reverting to the law and practice with respect to the fixing of the rents of occupancy-tenants which had been in force in the Punjab before the passing of the Act of 1868, these rents should be adjusted, at the time of revising the assessment, with reference to the land-revenue instead of at short intervals by comparison with the rents paid by tenants-at-will. These conclusions were communicated to me in February 1884, some time after I had succeeded Mr. Lyall in the office of Financial Commissioner; and I was asked, after consultation with Colonel Wace and any other officers whose views I might wish to ascertain, to prepare and submit a revised Bill, together with a full exposition of my own views. I thereupon circulated for opinions both drafts—that prepared by Mr. Lyall and Colonel Wace, and the more limited draft prepared in the Punjab Secretariat—to some of the most experienced Revenue-officers of the Province. Their replies were considered by a Committee consisting of Mr. Barkley, Colonel Wace and myself; and we came to the unanimous conclusion that as the existing Tenancy Act requires so much alteration and so many additions, it would be best to replace it by an altogether fresh enactment in which the law on this subject would be placed before the people, and those who would have to administer it, in the most complete and simple form possible. **Taking, therefore, as the basis of our draft the Bill submitted to the Punjab Government in April, 1883, we revised and rearranged it, and then submitted it to our own Government. This was done in June, 1884.**

"During the course of the past summer the proposals of our Committee were carefully considered by the Lieutenant-Governor, and, in personal communication with both Financial Commissioners, the draft sent up by us was gone through section by section, and was further revised till it assumed the shape in which it was submitted to the Government of India in November last.

"With the permission of the Council I will now explain the more important changes in the existing law proposed to be made by the Bill which I am asking for leave to introduce.

"The first is the omission of section 2 of the present Act, by which a highly artificial authority was given to entries in the records-of-rights of the first regular settlements in regard to certain matters dealt with by the Punjab Tenancy Act. The section as originally framed and passed ran as follows:—

'Nothing contained in this Act shall affect the operation of any decree of Court under which a tenant holds, or of any agreement between a landlord and tenant where such agreement is in writing or recorded by the proper officer in the record of a regular settlement sanctioned by the Local Government.

'All entries in such record in respect of matters comprised in Chapters III, IV, V and VI of this Act shall, when attested by the proper officer, be deemed to be agreements within the meaning of this section.'

"The chapters specified in this second clause refer—III to rent, IV to ejectment, V to relinquishment, leases and under-leases, alienation and succession, and VI to compensation for tenants' improvements. The effect, therefore, of this section was practically to exclude from the operation of

nearly the whole of the Act all parts of the Punjab in which a regular settlement had been made and sanctioned by the Local Government. The only part of the Act to which this clause did not apply was Chapter II, which deals with 'rights of occupancy.' The object of this clause was clearly to give a character of conclusiveness to the entries in the records of the first regular settlements in regard to the several matters treated of in the chapters specified therein. Whether it was intended to have prospective as well as retrospective effect was very fully discussed by Sir James Stephen when presenting the Report of the Select Committee on the Bill which afterwards became the Punjab Land-revenue Act of 1871; and the question was decided in the negative by the introduction into this clause, by section 21 of the Act, of the words which have restricted its operation to entries in the records of settlements made *previously to the passing of the same Act*. It is now proposed altogether to omit this section, on the ground that it has done its work and is no longer required. To show that this is the case as regards the second clause of the section, I would mention that of the regular or revised settlements sanctioned before the 18th November, 1871 (the date of the passing of the Land-revenue Act), those of only four districts still remain in force. Of these, two are already under revision, and these, with the remaining two shortly to be taken up, will be completed within the next six years. The provisions of this clause have, therefore, ceased to apply to 27 out of the 31 districts of the Province, and will cease to apply to the remainder from periods varying from two to six years. I may add that many of the entries in the old settlement-records relating to matters dealt with in Chapters III to VI of the Act do not accurately represent local customs, are often so ambiguous that the Courts on this ground have refused to enforce them, and are not unfrequently opposed to public policy. So far as the clause has had a beneficial effect in enabling local custom to override the law, provision has been made in the Bill for the maintenance of this useful object. As regards rent, the revised provisions of Chapter III will do much to give the custom hitherto prevailing the force of law; and in respect of alienation and succession, special provision has been made in section 38 for keeping alive such customs as may be applicable to such subjects. But where custom is found to be opposed to public policy—as, for instance, where it would prevent tenants from making improvements, or deprive them of compensation for improvements on ejectment—we propose deliberately to set it aside, and section 46 of the Bill declares entries of this kind in the records *void*, as being contrary to public policy. As to the first clause of section 2 of the Act of 1868, it seems sufficient to say that decrees of Court cannot of course be affected by subsequent legislation which does not in express terms deal with their subject-matter, and agreements stand on their own merits, whether they are entered in a record-of-rights or not. The fact is, the whole section was obviously enacted to set at rest the controversies of eighteen years ago already referred to; and as the records of Mr. Prinsep's revised settlements of certain districts were annulled by the Tenancy Act of 1868 in important matters relating to the status of tenants, it was thought advisable to declare in express terms to what extent they would be maintained. The revision of these records, rendered necessary by the passing of this Act, was shortly afterwards carried out, and the first part of the section has therefore long since ceased to be of any practical use.

"Next to [illegible] the changes in certain of the clauses of section 5 relating to rights of occupancy. The object of these modifications of the law is to extend the benefits of these clauses to certain classes of tenants who appear to be equitably entitled to them, but who, according to the interpretation put upon these clauses by the Chief Court, have hitherto been excluded from their benefits. The first of the changes consists in the omission of the word '*heretofore*' from clause (1) of this section (section 4 of the Bill), and the addition of an explanatory sub-section by which on proof by the tenant of continuous occupation of his tenancy for thirty years and payment of nothing in the shape of rent beyond land-revenue and rates and cesses, a presumption is raised in his favour that the conditions of clause (1) have been fulfilled. This alteration of the law was first proposed by the late Financial Commissioner, Mr. J. B. Lyall,

in a memorandum on proposed amendments of the Act written in 1882, from which, with the permission of your Lordship, I will quote the relevant passage:—

'I would certainly,' he wrote, 'strike out the word "heretofore" in clause (1) of section 5. It may be argued that this is a deviation from the great principle expressed in the first sentence of section 9. If it is so, I would allow an exception in this case. By a recent decision of the Chief Court, which is no doubt legally correct, no tenant can establish a right under clause (1) of section 5 unless the land had been held free of rent and service for three generations in 1868. Before that decision was published, many Courts had been decreeing in favour of tenants now holding in the third generation, though they did not so hold in 1868. Most Settlements-officers, I think, interpreted the law in that way. I do not think the law amended as I propose would give a tenant a right greater than he may be held to be equitably entitled to. On the other hand, very few tenants can possibly establish a right under the clause as interpreted by the Chief Court. Except in the districts of the old Delhi territory, it is almost certain that the grandfather of the tenant of 1868 must have died before annexation, perhaps long before. Few men now survive who can give evidence as to those times, and there are no records to refer to.'

"In forwarding on to the Government of India a copy of this Memorandum with a Minute by the Lieutenant-Governor the proposed change was supported by the Punjab Government in the following words:—

'Mr. Lyall suggests that this amendment may involve a deviation from the principle that no occupancy-right shall be acquired by mere lapse of time. It does not, however, appear that this is so; for the reasons for acknowledging the right depend not upon any particular duration of tenure (for obviously the time during which the land may pass through the hands of grandfather, father and son may vary enormously in different cases), but rather upon the custom of the country, and perhaps also on the circumstance that the proprietor stands by and sees two successions take place without interference.'

"The amendment together with others proposed at the same time was accepted by the Government of India, and when the Bill to give effect to them was drafted the explanatory sub-section already referred to was added. The object of this addition is to place a reasonable limit on the evidence to be required of a tenant claiming under this clause. It is contended that, if a tenant can show that he succeeded his father or uncle, and that he and his father and uncle together have held on these favourable terms for thirty years, it is only reasonable to throw on the landowner the burden of proving that the grandfather's or granduncle's tenancy was of a different nature. It is not often that older evidence would be forthcoming, and, if it is obtainable, it should be for the owner to produce it.

"In a recent criticism it has been objected that these changes in the law will have the effect of converting into occupancy-tenants of the most privileged class many thousands of tenants in the districts of the old Delhi territory who are now recorded as tenants-at-will only, and are paying at the same rates as the proprietors, as it will probably, in many cases, be impossible for the landlords to rebut the presumption given by the 'explanation' referred to. This may be, and probably is, quite true; but, if so, the reply to the objection is that, although recorded as tenants-at-will, these tenants are, by the ancient custom of the country, entitled to hold the lands occupied by them undisturbed, so long as they pay the quotas of revenue assessed thereon. If proof of this be wanted, it will be found in abundance in the Settlement Reports of that part of the Punjab, and in particular in the admirable Report on the Settlement of part of the Karnal District by Mr. Ibbetson, who in paragraphs 257 to 259 has given a full and interesting history of the origin and growth of tenant-right in those parts. In the latter paragraph he writes:—

'In short, as already pointed out in paragraph 241, the conclusion is irresistible that, in old times, any body who broke up new land, or even who was given old land to cultivate, except as an obviously temporary measure, acquired a right to hold the land so long as he paid the revenue on it.'

"These tenants, I would explain, belong largely to the same classes as the landowners, and the fact that no rent, properly so-called, has been hitherto demanded from them is partly due to this cause, but more still to the excessive pressure of the old assessments, in consequence of which, to quote again from Mr. Ibbetson,—

'the village was only too glad to get cultivators to accept land on these terms; and the explanation of the fact that the people even now fail to distinguish between occupancy-

tenants and tenants-at-will of any standing is, not that old custom failed to raise the ancient tenants approximately to a level with owners, but that it treated both owners and tenants of all kinds alike, so far as the right of cultivating possession was concerned.'

"Much more might be quoted in support of this view, but I think I have said enough to show that where the position of the so-called tenants-at-will is so strong as it is in this part of the Punjab, and where they can show an unbroken occupation of three generations, or of thirty years, and the payment of no rent beyond revenue and cesses throughout this period, it is only equitable to give them the same status, and the same protection from ejectment and undue enhancement of rent, as that which was given by the first clause of section 5 of the Act to the almost precisely similarly circumstanced tenants of 1868. Nor will the proprietary bodies have any fair cause to complain of this change, for whereas they have up to this time been receiving nothing from these tenants but revenue, and rates, and cesses, they will, under section 15 of the Bill, be enabled to obtain from them in addition a proprietary fee of two annas in the rupee.

"The next alteration in this section which seems to call for notice is that made in its third clause. The clause has been so worded now as to admit to its benefits not only those who were at the date of the passing of the Act of 1868 the *representatives* of persons who settled as cultivators in a village along with the founders, but also the settlers themselves. There can, I think, be no doubt that the exclusion of the latter by the framers of the existing Act was intentional, but there is at the same time good reason for believing that the exclusion was contrary to the custom of the country, and, as remarked by the Lieutenant-Governor in the Minute already referred to, it involved a somewhat grotesque anomaly, namely, that a man should not be possessed of what his heir can inherit from him, and that his heir should take from him rights larger than those which he himself enjoyed. Instances have come to light in which cultivators who had held from the founding of a village up to 1868 were denied rights of occupancy merely because they had survived the date of the passing of the Act, whereas if they had died before that date the right would have accrued to their heirs. The removal of so anomalous and unjust a restriction seems to require but little justification. An explanatory sub-section with respect to this clause has been added at the end of the section, the object of which is the same as that of the sub-section relating to clause (1). The opportunity of the revision of this clause has been taken to require evidence of *continuous* occupancy, which the Chief Court has held is not necessary under the clause as it at present stands, but which was certainly its intention.

"The last change I have to explain in this section is in clause (4), and this has been rendered necessary by a decision of the Chief Court, who have held that a right of occupancy can only be acquired by the jágírdár or ex-jágírdár himself, and not by his representative. The right in such cases has its origin in the position of authority held by the jágírdár under Sikh rule, which gave security to his tenure; and provided the land was originally occupied by the jágírdár during the continuance of the jágír, and has since been uninterruptedly occupied by him and his representative for the term of twenty years, as originally fixed in this clause of the Act, there seems no good reason for excluding the latter from the right given by this clause. On the contrary, the fact of his having succeeded in maintaining his cultivating possession of the land after the death of the jágírdár strengthens his claim to recognition of this right.

"The two last alterations have been effected by so defining the word 'tenant' as to include the *predecessors* and *representatives* in interest of a tenant.

"The only other amendments in this chapter are those in section 6 (section 5 of the Bill) and section 9. The alterations in the former are purely verbal and make no substantial change in the law. They will be found fully explained in the Statement of Objects and Reasons. The change in the latter section consists of the correction of the generally recognised mistake in its second clause, which, in place of providing that joint owners of the common lands of a village shall not acquire occupancy-rights in those lands, enacted that no right of occupancy shall be acquired in the common lands of a village

held on a pattidári tenure. The clause, as it stands, has been a great stumbling-block to the Courts generally, and conflicting decisions have been pronounced under it by the superior Courts. In 1871 the Financial Commissioner (Mr. Egerton) held that the bar to the acquisition of rights of occupancy laid down by it related only to the claims of proprietors cultivating land of which they were joint-owners, and did not exclude claims by others who were not members of the proprietary body. In the following year the Chief Court took the opposite view. The interpretation put upon the clause, as it stands, by the latter Court is undoubtedly the more correct one, but a study of the blue-book containing the discussions which took place prior to the passing of the Act leaves no doubt that the decision of the former Court gives more accurate expression to the custom of the Province, and to what was probably the intention of the legislature, in regard to this particular provision of the law.

"I pass on to Chapter III, which deals with the important subject of rent. By the changes made in this chapter power has been restored to officers engaged in making and revising assessments of the land-revenue to fix at the same time the rents of occupancy-tenants, and the present scale for the enhancement and reduction of the rents of these tenants has been readjusted so as to bear a fixed relation to the land-revenue demand. The grounds on which these alterations have been made have already been sufficiently explained, and I will only touch briefly on the detailed provisions for giving effect to the change of policy in this respect, which, as before remarked, is based on the recommendations of the Famine Commissioners, and has received the approval of the Government of India.

"Ordinarily the cash-rents of occupancy-tenants will be revised only when the assessment of the land-revenue undergoes revision, and the officer who determines the sums payable by the landowners as land-revenue will, at the same time, fix, with reference to these sums, the rents to be paid by their occupancy-tenants according to the scale laid down in section 15 of the Bill. But circumstances may occur which may render it only equitable to grant, *at other times*, to the landlord or tenant, as the case may be, enhancement or reduction of the rent originally fixed. For instance, it may, on the one hand, be found that when the Bill becomes law the revenue in some districts has been raised, but the rents of this class of tenants have not been adjusted to the enhanced assessments according to the new scale, or, at any other time, that the area of land held by the tenant is greater than that for which he has hitherto been paying rent; or, on the other hand, that the area of the tenancy has been reduced by diluvion, or its productive powers have been decreased by any cause beyond his control. In all such cases it is only right and fair that the Revenue-officers should have power to revise the rents of these tenants *at any time*, on the application of the landlord or tenant; and accordingly this power has been given to them by section 10. The rents of grain-paying tenants cannot of course be subject to the ordinary law of enhancement and reduction, and will therefore only be capable of revision under the circumstances described in sections 14 and 16.

"As to the scale for enhancement and reduction of rents laid down in section 15, it is based on the assumption that the land-revenue is half of what is on an average paid by tenants-at-will, or the full rental of the estate; and an attempt has been made so to graduate the maximum rents for the several classes of tenants described in sections 4 and 5 of the Bill as to correspond approximately with the existing scale in the third ground of section 11 of the Act. It is not pretended that the correspondence is exact; indeed, it may be safely asserted that any nearer approach to an exact arithmetical correspondence therewith would be unfair to the landlords, who, owing to the fact that the grain and cash rents paid by tenants-at-will have almost everywhere very largely exceeded twice the land revenue, have under the present law been able to obtain unduly severe enhancements, but who, on the assumption on which the scale in section 15 of the Bill has been calculated, would obtain nothing but *bare revenue* from the most privileged class of occupancy-tenants, and would themselves be liable to pay the rates

and cesses! Such an anomaly as this was of course never contemplated, and could not be allowed to exist in any scheme of future legislation. The legislature in framing the Act of 1868 evidently intended that even the highest class of occupancy-tenants should be liable to some slight enhancement, or, in other words, that the landlord should have the right to demand from them something more, though perhaps not much more, than revenue and rates and cesses; and this the proposed legislation, while improving the position of occupancy-tenants as a whole, will secure to them.

"The only other point which I think I need notice in this chapter is the addition of a section (19) which empowers revenue-officers, when allowing a suspension or remission of the land-revenue, to direct a proportionate suspension or remission of rent. This has been inserted with reference to principles laid down by the Government of India in a circular issued in 1882, and approved by the Secretary of State.

"Chapter IV of the Act, which treats of 'relinquishment and ejectment,' has been redrawn with a view of clearly distinguishing the procedure to be adopted in ejecting a tenant with right of occupancy from that to be observed in evicting a tenant-at-will. The procedure in both cases has been made as simple and complete as possible. The only other notable change in this chapter is the omission of clause (2) of section 19 of the Act, which enables a landlord to buy out the lowest class of occupancy-tenants. This clause, I must explain, was introduced into this section at the strongly expressed desire of the then Lieutenant-Governor, Sir D. MacLeod, who attached great importance to it and believed that the powers given by it to landlords would be extensively made use of; but, as a matter of fact, it has been almost, if not quite, a dead letter. The retention of this novel provision was, I may add, strongly opposed at the time by certain members of the Council, on the ground that it was wrong in principle and opposed to the custom of the country; and, during the final debate on the Bill, words were added, on the motion of Sir R. Temple, which limited its operation to the lowest class of occupancy-tenants, and to those of this class who had been less than thirty years in occupation of their tenancies. As, owing to the lapse of time, the clause must have become wholly inoperative, it has been determined to omit it from the Bill.

"In Chapter V, on 'Alienation of, and Succession to, Right of Occupancy,' the following are the more important amendments. A new section (36) has been introduced with a view to the protection of the interests of a tenant having a right of occupancy who makes an invalid alienation of his right; and in section 37 of the Bill it is proposed to substitute the ordinary law of succession for the somewhat artificial rule for the devolution of the right of occupancy prescribed in section 36 of the Act. The former change has been rendered necessary by a series of decisions of the Chief Court, which have laid down that the previous offer of the tenancy to the landlord is a condition precedent to the valid exercise of the power of alienation vested in the tenant by section 34 of the Act, and that, if without making such offer the tenant transfers his land to any other person the landlord can sue for, and obtain possession from, the transferee. But whether the tenant has forfeited his right by making the invalid transfer is a point which has been left in doubt by these rulings, and it is proposed to set this doubt at rest in favour of the tenant. Inasmuch, however, as the landlord is put to trouble and expense in proving the alienation to be invalid, it is considered equitable that he should be allowed to purchase, should he wish to do so, the right which was improperly alienated. The latter change is one which has been introduced tentatively. It is believed that it will be found to be in accord with the general views of both landlords and tenants, and the decisions of the superior Courts show that it is certainly supported by custom, so far as the grant to the widow of a life-interest in her deceased husband's right of occupancy is concerned. Whether the alteration is right in other respects is a point to which special attention will be called with a view to local inquiry and report. It will be seen that by section 38 of the Bill the provisions of sections 5 and 7 the Punjab Laws Act

are duly saved in regard to this matter, and the effect therefore of section 37 is to introduce the ordinary law of succession where no special custom affecting these tenures can be proved.

"The subject of compensation to tenants on ejectment (*a*) for improvements made by them, and (*b*) for disturbance in the case of certain tenants, is dealt with in Chapter VI of the Bill. The changes and additions which have been made in this chapter under the first heading are, for the most part, the result of rulings of the superior Courts of law under sections 25 and 37 of the Act; and it will, I think, be sufficient if I draw attention to the more important omissions and defects which have in consequence been supplied and remedied, without referring particularly to the decisions on which they are based. These latter have been collected together and reprinted in a convenient form, arranged according to the different sections of the Act to which they severally relate, and are available for reference when required by the Council.

"The present Act is altogether silent as to who may and who may not make improvements, and the conditions on which they may be made. These matters are provided for in sections 39 and 40 of the Bill. By the former an absolute right of making improvements is given to an occupancy-tenant, while the latter lays down that a tenant-at-will may only make improvements with the assent of his landlord. The most important provision on the subject of compensation for improvements is that contained in section 41 of the Bill, which provides that in all cases in which compensation is found to be due to a tenant on ejectment it shall be paid to the officer ordering the ejectment before the tenant is evicted. The object of the section is to remove all technical restrictions on the complete adjudication of every claim for compensation which a tenant may have when proceedings are taken for his ejectment. These provisions are called for in common fairness to tenants, and have been rendered necessary by some of the decisions referred to.

"The only other important amendment in this Chapter, namely, the introduction of the new section relating to compensation for disturbance, is the result of a proposal originally made by Mr. J. B. Lyall, supported by the Lieutenant-Governor, and accepted by the Government of India. Its object is to afford a limited protection to tenants who have brought waste land under cultivation. Its justification can, perhaps, be best given by a quotation from the paper in which the proposal was first made. In paragraph 4 of his Memorandum of 18th June, 1882, Mr. Lyall wrote as follows regarding it:—

'When the Tenancy Act was under discussion, many officers were of opinion that it would be in accordance with the custom of the country to give a right of occupancy to all tenants holding land which they had broken up from waste. This proposal was nearly carried. I myself thought at the time, and still think, that the general custom of the country would have justified the insertion of such a provision in the Act of 1868. At the present day there are a few tracts in the Punjab in which such a custom still exists, and is admitted by the proprietors. In other tracts it did exist formerly, but has more or less died out. In most districts, and especially in tracts where breaking up the waste is difficult, there is still a strong feeling among the tenants that a tenant who has cleared the waste ought not to be evicted; and the proprietors themselves generally admit in practice a claim, though they would object strongly to the creation of a positive tenant-right. I do not recommend the addition to section 5 of a clause giving occupancy-right to all tenants who have broken up waste land; but I am strongly in favour of inserting a provision in the Act giving them compensation for disturbance.'

"In supporting this proposal the Punjab Government added that the Financial Commissioner's suggestion amounted 'to a just and practicable compromise between the incidents of a beneficial custom, still strong in places, but often moribund or insusceptible of judicial proof, and the express language of existing legislation.' As to the justice and good policy of a provision of this kind, there will probably be no dispute, though some difference of opinion may arise as to the amount which should be given as compensation for disturbance.

"This, My Lord, is all I have to say in support of the motion for leave to introduce this Bill, and in explanation of the changes which it makes in the

existing law. I have, I fear, trespassed too long on the time and exhausted the patience of the Council. If so, my excuse, for the length to which my address has run, must be the magnitude of the subject with which I have had to deal, the many difficult issues involved in it, and the necessity for justifying every material change in a law of this kind, on the proper framing of which the prosperity, peace and contentment of the whole agricultural population of this important Province will largely depend."

The Motion was put and agreed to.

The Hon'ble COLONEL DAVIES also introduced the Bill.

The Hon'ble COLONEL DAVIES also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English, and in the *Punjab Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and greed to.

The Council adjourned to Wednesday, the 7th July, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REMARKS ON THE REPORT OF THE OPERATIONS OF THE SURVEY OF INDIA DEPARTMENT FOR 1884-85.

Circular No. 408. / 36—9

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Surveys),—under date Simla, the 21st June 1886.

Read—

The General Report on the Operations of the Survey of India Department for the year 1884-85.

RESOLUTION.

The administration of the Department during the year remained in the hands of Colonel G. C. DePrée, B.S.C., who also held direct charge of the working of the Topographical Branch. The Revenue and Trigonometrical Branches were superintended, respectively, by Lieutenant-Colonel H. R. Thuillier, R.E., and Colonel C. T. Haig, R.E.

Personnel.

2. Part II of the Report contains detailed accounts of the operations of the several survey parties.

3. The work of the Secondary Triangulation Party extended over about 240 miles of coast line from near Berhampore to the mouth of the Godávari. An area of 1,240 square miles was traversed, 600 miles of which were covered with fresh triangles; the positions of 20 beacons were determined, and 4 light-houses and 83 permanent and conspicuous objects were fixed.

Triangulation.

4. Topographical surveys were conducted by 12 parties, of which 4 were employed in Bombay, and one each in the Andaman Islands, Assam, Baluchistan, Central India, Mysore, Rajputana, the North-Western Provinces, and British Burma. The operations generally were continued in the same districts as in the previous year, the only changes being the suspension of topographical operations in the Aligarh district of the North-Western Provinces, the party being transferred for revenue work elsewhere, and the introduction of topographical survey into the Shwegyin district in British Burma when cadastral operations came to an end.

Topographical Surveys.

5. In the Andaman Islands triangulation was extended as far as the Middle Island, covering an area of 1,000 square miles, and including the station on Saddle Peak in the North Andaman Island. About 900 square miles remain to be triangulated. Surveying in detail was completed with considerable difficulty over an area of 111 square miles on the scale of 4 inches = 1 mile, and 670 square miles were surveyed on the $\frac{1}{2}$ inch scale. The outturn is satisfactory, considering the difficulties which the party had to encounter, and the Governor General in Council concurs in the Surveyor General's opinion that it reflects credit on Captain Hobday and the party under his orders.

Andaman Islands party.

6. An exploration party under Colonel Woodthorpe, with a small escort of the 44th Assam Light Infantry under the command of Major C. R. MacGregor, and accompanied by Mr. T. D. LaTouche of the Geological Survey Department and Surgeon D. St. J. Grant, triangulated and surveyed a large tract of the Singpho hills lying to the east of the Great Trigonometrical stations Jaitu, Maiobúm, and Maiúm, and extending to the Mile Kha river in the Bor Kampti country. The tract embraces country both north and south of the Dihing (or Diyun) river. One of the objects of the expedition was to obtain particulars regarding possible trade routes to Burma and China. Neither of the two passes explored by the party could be rendered fit for the purpose without considerable expenditure. The party added much to the scanty knowledge previously possessed of the geography of these hills. The work done was arduous, and involved much difficulty and hardship. His Excellency in Council is glad to avail himself of this opportunity to acknowledge the good service rendered by Colonel Woodthorpe, Major MacGregor, and the officers and men associated with them.

Assam and North-Eastern Frontier party.

7. The regular survey of the Baluchistan agency on the scale of $\frac{1}{2}$ an inch to a mile was continued; the frontier survey was extended up to Dera Gházi Khán, and a large area beyond the British frontier was reconnoitred by a small detachment of the survey party accompanying the Zhob Valley Field Force. The personnel of the party was subject to several changes and some reduction, and, owing to this cause and to unfavourable weather, the outturn of work was less than in the previous season. 7,717 square miles (including 2,320 square miles of reconnaissance) were surveyed topographically on the $\frac{1}{2}$ inch scale between the Sulemán range on the east and the Khelát hills on the west.

The Baluchistan party.

8. The party employed on the Cutch survey accomplished 754 linear miles of traverse, 1,641 square miles of topographical survey on the scale of 2 inches = 1 mile, 612 square miles on the $\frac{1}{2}$ inch scale, and a small area in the city and cantonment of Bhuj on the scale of 12 inches = 1 mile. It is expected that the Cutch survey will be completed during the current year.

The Cutch party.

9. The three other Bombay parties carried on topographical surveys in the South Deccan, in Gujarát, and in the Konkan and Southern Maratha country. Besides topographical work, consisting of 1,662 square miles on the 2 inch scale, the triangulation of 2,167 square miles and the traversing of 1,108 linear miles, the South Deccan party completed the survey of the town of Pandharpur

South Deccan, Gujarát, and Konkan parties.

on the scale of 80 inches = 1 mile. The Gujarát party suffered much from sickness, but accomplished 2,162 square miles of triangulation, 445 linear miles of traverse, and the topographical survey of 1,711 square miles on the 2 inch, and 22 square miles on the 4 inch, scale. The completion of the work before this party is estimated to take about 5 years. The Konkan party was employed in the Thána and Kolába districts and in the Southern Maratha country near Belgaum, and surveyed topographically 483 square miles on the 4 inch scale in the Thána district for the Forest Department, and 566 square miles in Kolába and in the Jawhár State on the scale of 2 inches = 1 mile. 519 linear miles were traversed, and a considerable area was triangulated preparatory to detailed survey in the ensuing year. The party has completed its work in the Thána district.

10. The Malwa party was employed in the Dúngarpur and Oodeypore States of Rajputana and in the Independent States of the Mahi Kántha Agency in Bombay. It surveyed in detail 1,157 square miles on the 1 inch scale, the city of Dúngarpur (6 square miles) on the 6 inch scale, and the Kherwára Cantonment (4 square miles) on the 12 inch scale. The work of this party has now been completed, and it has been transferred for revenue work to the Central Provinces.

The Malwa party.

11. The work done by the Mirzapur party consisted of 543·2 square miles surveyed on the 2 inch scale, and 441 miles of boundary traverses. The country was for the most part difficult. Two soldier surveyors were attached to the party as students, and gave much satisfaction.

The Mirzapur party.

12. The Mysore party completed its triangulation of the entire State, executed 242 miles of traversing with the theodolite, and surveyed topographically 2,365 square miles in the Mysore district on the scale of 1 inch = 1 mile. The present year will probably bring the work of this party to a close.

The Mysore party.

13. The revised survey of Ajmere on the scale of 12 inches to the mile having been completed, the Rajputana party made a detailed survey on the 6 inch scale of the cities of Jeypore and Amber and of the surrounding hills, covering 773 square miles. 1,808 square miles were also surveyed topographically in the Jodhpur State and parts of Sirohi and Pálanpur. Two military students were attached to this party and learnt their work well.

The Rajputana party.

14. The party employed in Shwegyin, of which financial exigencies had compelled the transfer from revenue work, was reorganized, commenced topographical work in the north of the same district, and, in continuation of the area cadastrally surveyed in previous years, covered 1,142 square miles on the scale of 2 inches = 1 mile. The party has since been transferred for revenue work to the Central Provinces.

Shwegyin party, British Burma.

15. The Burma Forest party was split up into three camps, and traversed an area of 500 square miles. It also triangulated 814 square miles in the Prome and Toungoo districts. Of 314 square miles of reserved forests surveyed topographically on the 4 inch scale, and of 44 square miles of unreserved forests surveyed on the 2 inch scale, nearly the whole was situated in the Tharrawaddy district. The work of the party has throughout been attended by considerable difficulties.

Forest Surveys, British Burma.

16. Six entire cadastral parties and one detachment were employed in the year under report,—two in British Burma, one in Assam, and two and the detachment in the North-Western Provinces. Of these parties, two—those in the Dehra Dún district of the North-Western Provinces, and the Henzada district in British Burma—have completed the survey work assigned to them.

Cadastral Surveys.

17. The cadastral survey of *khalsa* villages in Ajmere-Merwara, comprising an area of about 1,200 square miles, was continued and finished on the same

Ajmere-Merwara.

system as in the previous year. The officer in charge of the survey also undertook the permanent demarcation and the instruction of the district staff in cadastral surveying. Major Steel's report on this subject is very satisfactory.

Akyab and Bassein-Henzada Surveys.

18. In British Burma two parties were employed in the Akyab and in the Bassein and Henzada districts respectively. In Akyab 562 square miles were surveyed cadastrally on the 16 inch scale, 70 square miles of river on the 2 inch scale, and 2½ square miles of the Akyab city on the 64 inch scale. The permanent demarcation of the traverse stations was effected to provide for accurate mapping hereafter of new cultivation by the local supplementary survey establishment. The training of indigenous surveyors was carried on as usual in Akyab, but it is reported that the boys taught betake themselves, after receiving certificates, to more lucrative employment. The cadastral survey of the remainder of the district (exclusive of those portions which, being useless for settlement purposes, will not be surveyed) will occupy about 2 years. In the Henzada and Bassein districts the only work done was the completion of the area of 900 square miles remaining for cadastral survey. The party has been withdrawn since the close of the year.

The Basti party.

19. Cadastral survey operations and the preparation of the record-of-rights were conducted in parganas Amorha, Nagar, and Basti. The survey of river-side villages in the Fyzabad district was also completed on the right bank of the Gogra river as far as the cadastral survey on the Basti side had been executed in previous years. The system of survey was the same as before, though some changes were made in the manner of writing up the village records by the introduction of a modified form of the Benares system. The work done consisted of the cadastral survey on the 16 inch scale of 666·58 miles in Basti, and of the *mauzawár* survey on the 4 inch scale of 69·81 miles in Fyzabad. The cost of the combined work of survey and of compiling records and assessment statistics is Rs. 229-13-8 a square mile, the rate being higher than that in Gorakhpur owing to the relatively larger number of fields comprised in the area surveyed.

Gorakhpur party.

20. The cadastral survey of the Gorakhpur district was continued on the same system as in the previous year, and extended over 747·37 square miles in Gorakhpur on the 16 inch scale, and 92 square miles of *mauzawár* survey in Azamgarh on the 4 inch scale. Certain changes have been introduced in the division of labour between the Survey and Settlement Departments, which, though somewhat increasing the work of the former, will, it is hoped, lead to improved results from the combined efforts of the two departments. The cost of survey operations alone during the past year was Rs. 171-2-0 a square mile.

Kámrúp party.

21. The work of the Kámrúp party was continued along the right bank of the Brahmaputra river, 478·05 square miles being completely surveyed, and the preliminary boundary traverses being executed of 772 square miles. No change was made in the system of survey. The party suffered considerably from fever, and difficulty was experienced in keeping it up to its proper strength. The cost of survey operations amounted to Rs. 220-11-4 a square mile.

Punjab party.

22. The objects with which surveys are now being carried out in the Punjab are thus described: (*a*) To furnish a basis for and check on the *patwári* measurements under progress in the Sub-Himalayan districts; (*b*) to obtain revised topographical maps by utilizing settlement maps prepared by *patwáris*; and (*c*) to carry out the survey of riparian tracts subject to fluvial action. To this end the following plan of operations for future surveys in the Province has been agreed upon between the Survey and Settlement Departments:—

(1) that an attempt should be made to construct topographical maps from the *patwári* maps on the basis of the old professional survey traverse data in districts recently surveyed by the *patwári* agency;

(2) that in districts of which no *patwári* survey has yet been made skeleton traverses should be run, fixing as a minimum two points in each village to serve as checks on the *patwári* measurements, and as a basis on which topographical maps can in future be framed from the *patwári* maps;

(3) that the topographical maps should be locally tested, and the details corrected and compiled where necessary.

Following this procedure, the party completed the traverse survey of the whole of the Ferozepore district and about two-thirds of the Umballa district.

The result of the season's work shows that *patwáris'* maps can be utilized for the framing of topographical maps on a small scale, when fixed points are established by professional traversing, though it also shows the necessity for the fixed points required to fit the village maps together comprising all the village trijunctions. The aggregate cost of traverse survey and compilation of *patwári* maps, local test, and fair mapping has amounted to Rs. 18-7-6, or about two-thirds of that of a new survey. The Deputy Superintendent in charge hopes that this expenditure may be further reduced. The results already attained are creditable, and have been acknowledged by the Government of the Punjab.

Central Provinces.

23. The detachment which had been employed in the previous year in Raipur was, during the year under report, engaged in the survey of the Sambalpur district on the "field block" system, which was fully described in the last report. Another detachment was formed in Raipur for instructional purposes, the result being that three Assistant Commissioners, four District Revenue Inspectors, 69 Revenue Inspectors, and 319 *patwáris* were made efficient in survey work. The outturn of work in the Sambalpur district amounted to 499 square miles on the 16 inch scale, the average size of the blocks being 95 acres. Preparatory traverses were also extended over 104 square miles. The season was unhealthy, and the party suffered considerably. The total cost of operations was Rs. 58-4-7 for combined traverse and boundary survey.

Geographical and Miscellaneous.

24. The work of the Himálayan, formerly called the Darjeeling, party consisted of (1) the survey of the Daling hills; (2) the demarcation of the Nipál boundary; (3) the mapping and computations connected with the Nipál boundary survey, the Sikkim triangulation, and the revisionary survey of Darjeeling; (4) the triangulation of the Simla Hill States; and (5) the geography of the Himalayas. In the Daling hills the blocks of land set apart for tea cultivation were demarcated with permanent pillars. On the Nipál Frontier, a topographical survey on the 1 inch scale was executed along the Gandak river, and a re-survey was made of the Mechi river with a view to the re-arrangement of the boundary. A ditch was also dug along those portions of the boundary which were surveyed last year. The attention of the Governments of Bengal and of the North-Western Provinces and Oudh will be invited to the necessity for looking after this landmark. The triangulation of the Simla Hill States was effected between Kalka and Simla westwards of Dagshai and Sabáthu. Sufficient materials have now been obtained for mapping the geography of the Mahabarat range from Tribeni to Darjeeling, and of all the ridges north of the Mahabarat which are visible from the plains. Data have also been collected for rectifying a considerable amount of the geography of Upper Bhután. A careful exploration by R———N———has added much to the knowledge hitherto possessed of the neighbourhood of Kinchinjanga. Interesting extracts from Colonel Tanner's narrative report of his exploration in Eastern Kumaon and from R——— N———'s narrative are appended to the report.

Tidal observations.

25. Of the 19 tidal observatories which were in working order during the previous year, two—at Beypore and Vizagapatam—were closed, their equipment being transferred to new stations at Cochin and Coconada. The False Point Observatory

was destroyed by a cyclone, and will not be re-erected. The tide tables for 1886 contain the predictions of high and low water at 23 ports, or three more than last year—Galle, Colombo, and Marmagao being the new ports added. The predictions made at the open coast stations were very accurate in respect both of the time and the height of the tides.

Spirit levelling operations.

26. The spirit levelling operations consisted of a double line from Madras along the railway line to Beypore, with a branch from Jalárpet Junction to the Bangalore base line, and of two lines of connection between the Madras and Beypore tidal stations, and the erection of two pairs of test bench marks. A levelling party was also employed with the Revenue Survey party in the Henzada district.

Geodetic.

27. Owing to the transit instrument being under repair and to the want of a second officer trained to use the electro-telegraphic longitude apparatus, operations were suspended during the year, and the observations for astronomical latitudes with the zenith sector, in abeyance since 1871-72, were resumed. The reduction of the observations taken was not completed during the year. One Astronomical party was engaged in taking observations for direct latitudes at eight stations of the Amúa Series of the Great Trigonometrical Survey.

Head-Quarters' Offices.

28. The account, given in Part III, of the work of the Drawing, Engraving, Photographic, and Lithographic Offices, and of the Mathematical Instrument Depôt at Calcutta, has been read with interest. Much progress has been made, especially in the Photographic Department.

The total number of maps issued was 235,636, valued at Rs. 1,86,380. These figures, compared with those for the preceding year, show an increase of 36,579 in number and of Rs. 13,858 in value. An arrangement which will, it is hoped, conduce to economy has been introduced since the close of the year. Under it Local Governments and Departments will be charged for the work done for them and for maps supplied by the Survey of India.

Among maps undertaken on special requisition were (1) a railway and road map of the North-West Frontier as far as Quetta, (2) a map showing the distribution of the principal religions in India, and (3) a large skeleton map of India. The last of these, as well as an elaborate model, based on the 32 mile map of India, showing all the hills of which the scale admits, was prepared specially for the Colonial and Indian Exhibition.

Besides the issue to other departments of 27,613 instruments valued at Rs. 1,61,590, to additional work amounting in value Rs. 12,437 was done by the Mathematical Instrument Office. A thorough and much-needed stock-taking of the instruments and stores in the depôt was effected.

Dehra Office.

29. The Computing Office at Dehra made good progress with the reduction of the operations of the Great Trigonometrical Survey.

The pictures of the Sun obtained with the photo-heliograph were much more satisfactory during the year under review than in 1884.

30. In conclusion the Government of India desire to acknowledge the good work which has, as usual, been done by the Survey Department during the year under review.

ORDER—Ordered, that the above Resolution be forwarded to the Local Governments and Administrations named in the margin, and to the Surveyor General of India and to the Foreign and Military Departments for information.

Madras.
Bombay.
Bengal.
North-Western Provinces and Oudh.
Punjab.
Central Provinces.
British Burma.
Assam.
Coorg.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 30th JUNE, 1886.

GENERAL REMARKS.—During the week under report rain has fallen in nearly all parts of India, except the Western Punjab, and the falls have for the most part been abundant.

In Madras, Mysore, and Coorg prospects continue favourable.

Sowings for the *kharif* are in progress in Bombay, the Punjab, the North-Western Provinces and Oudh, Rajputana, the Central Provinces, Berar, and Hyderabad.

Agricultural prospects are very good throughout Bengal, the standing crops are doing well, transplanting of *aman* rice has commenced, and *bhadoi* sowings are in active progress in Behar. In Assam ploughings continue, and prospects are favourable.

The public health continues generally good.

Prices are generally steady, except in the North-Western Provinces and Oudh and in the Delhi district of the Punjab, where they are fluctuating, and in the Rawalpindi district of the Punjab and in Coorg, where a rise has taken place.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras – (June 30th)		
Bellary	Average last week since revised, 1·20; this week, ·33.	Standing crops generally good, but young plants suffering from insects in one taluk; harvest second crop paddy, yield about average. Cattle-disease in one taluk.
Kurnool	Average last week since revised, ·71; this week, ·40.	Small-pox in three and cattle-disease in three taluks.
Ganjam	Average last week since revised, 2·76; this week, ·73.	Fever in one, slight small-pox in two, and cattle-disease in two taluks; cholera prevails. Average number employed on Chilka Canal last week 204, this week 148.
Kistna	Average ·44	Seedlings damaged by locusts in two taluks. 6·6 feet water over sluice. Cholera in four taluks; cattle-disease in one.
Chingleput (Madras)	Average ·21	Standing crops good; harvest paddy, outturn below average. Small-pox in one, fever in one, and cattle-disease in two taluks.
Coimbatore	Average ·06	Standing crops good, but *cholum* suffering from want of rain in one taluk; harvest wet and dry grains, outturn paddy average, *cholum* about average, and *ragi* above average. Small-pox in one village, fever in one taluk and cattle-disease in another.
Tanjore	Average ·57	Standing crops generally good; harvest wet and dry crops, outturn paddy below average, rest average.
Madura	Average last week since revised, ·08; this week, ·30.	Health of people and cattle generally good.
Malabar	3·71	More rain wanted in two taluks. Fever in one, slight small-pox in seven, and cholera in two taluks.
Travancore	1·09	Paddy plants good. Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay – (June 30th)		
Kurrachee	*Nil*	Weather high, with monsoon winds. River at Kotri on 28th, 16 feet 1 inch against 15 feet 3 inches on same date last year. Damage to *kharif* crops by deficiency of water in five talukas and from salt water freshets in Ghorabari taluka. Fever in seven and cattle-disease in three talukas. Wheat, red rice, and *bajri* in Kurrachee 26, 30, and 34 pounds per rupee, respectively.
Hyderabad	Rain at Badin on 22nd, 1·0; drizzling showers in Dero Mohabat taluka on 25th.	*Kharif* cultivation in progress. River at Kotri on 28th, 14 feet 1 inch against 15 feet 3 inches on same date last year. Cattle-disease in one and fever in two talukas. Wheat 25½, *juari* 40, *bajri* 36½, white rice 19, and red rice 28 pounds per rupee. High wind in Hyderabad.
Ahmedabad	1·64; total rainfall 9·32.	Rain throughout the district. Sowing of *kharif* in progress. Public health good. Wheat 34 and *bajri* 32 pounds per rupee.
Baroda	4·09; total rainfall 5·17.	Public health good. Sowing operations continue. *Bajri* 26, wheat 22, and rice 18 pounds per rupee.
Surat	*Nil*	Heavy rain has retarded sowing operations in some talukas. Small-pox among cattle in Bardoli taluka; fever in Olphad and Bardoli talukas. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik	Igatpuri, 7·11; Peint, 3·15; maximum at Yeola, ·40; minimum at Malegaon, ·15.	More rain wanted in Chandor, Yeola, and Nandgaon talukas. Sowing of *kharif* in progress in almost all talukas. Public health good throughout the district. Wheat 31½, *bajri* 31, and rice 17½ pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) .	Rain everyday—total of week 7·0; total to date, 43·0, being 22·04 above average.	Average abnormal temperature *nil* on 25th and 26th, and 2° cool on other days; vapour in air normal; abnormal wind southerly on 23rd, northerly from 27th to 29th, wind normal on all other days; distant lightning on 27th and 28th.
Poona . . .	Rain in five talukas and in Poona City; maximum at Naval, 2·73; minimum at Poona City, ·34.	Young plants doing well; sowing of *bajri* retarded for want of sufficient rain in Purur taluka; more rain wanted in Khed and Bhimthadi talukas. Public health good; cattle-disease in Junnar and Haveli talukas. *Bajri* 34 and *juari* 44 pounds in the district, and *bajri* 38 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar . .	Nagar, 1·20; Karjat, ·45; Akola, ·43; very slight in four other talukas and none in the rest.	Sowing of *kharif* in progress, except in Kopargaon and Sangamner, where more rain wanted. Public health good. *Bajri*—maximum 57 pounds and minimum 36, and *juari*—maximum 84 and minimum 48 pounds per rupee, respectively.
Sholapur . .	Sholapur, ·02; Madha, ·02; Karmala, ·13.	Sowing operations retarded for want of rain in Karmala and parts of Sholapur, Barsi, Sangola, and Malsiras talukas. *Juari* 59½ and *bajri* 40 pounds per rupee.
Dharwar . .	Mugud, 1·04; Bankapur and Kod, ·59; Hangal, 45; Hubli, ·30; Karajgi, ·20.	Sowing of early *juari* commenced in Gadag taluka; in others land being prepared; young rice plants healthy. Public health good; slight cattle-disease in Ranibennur taluka. Rice 23 and *juari* 50 pounds per rupee.
Kanara . .	Karwar, 4·80; Kumpta, 2·08; Sirsi, 3·75; Yellapar, 5·40; total, 49·83.	*Rice* plants healthy; transplanting on coast talukas; cardamom planting in Sirsi. Measles and cattle-disease in Karwar; slight small-pox in four talukas. Common rice in Karwar 14, and district average 13½ seers per rupee.
Rajkot . . .	·84; total 8·05	General health good. Sowing operations in progress; *juari* 43, wheat 34, and *bajri* 30 pounds per rupee.
		General Remarks.—Good rain in most districts; more wanted for sowing purposes in three talukas of Poona, and two of Ahmednagar and in parts of Sholapur and Bijapur. Cattle-disease in parts of ten, fever in parts of seven, and small-pox in parts of three districts.
Bengal—(June 30th)		
Chittagong . .	11·18	Weather seasonable. Prospects of crops somewhat damaged by heavy rain. Small-pox reported from Mirserai, otherwise public health good. Prices steady.
Dacca . . .	2·62	Prospects of crops good; sowing of *roachia* and *shail* paddy going on; *aus* paddy and *til* being harvested. Public health good.
24-Pergunnahs (Calcutta).	1·98	Prospects of early rice, jute, and sugarcane good; cultivation of land for *amun* paddy forward, and sowing in low lands commenced. Public health generally good.
Moorshedabad . .	Good rain	Weather hot. Prospects of crops good. Price of rice nearly stationary. Public health good.
Rungpore . .	8·49	Prospects of crops good; transplanting of *amun* rice going on. Fever increasing.
Burdwan . .	2·96	Cultivation progressing; prospects favourable. Public health good.
Bhagalpur . .	1·21	All crops doing well; transplantation commenced in north. Cholera still in a few villages in Soopool. Prices easy.
Purneah . .	3·69	Farming operations progressing favourably; all crops doing well. Public health good.
Patna . .	6·93	*Bhadoi* sowings commenced; paddy seedlings growing in nurseries. Public health good.
Durbhunga . .	2·84	Cultivation of *bhadoi* progressing; prospects of early paddy satisfactory. Prices stationary. Public health generally good.
Hazaribagh . .	0·20	Weather seasonable; general rain. Sowing still progressing; crops germinating; prospects favourable. General health good.
Cuttack . .	1·57	Weather warm and cloudy. Rice plants growing well. Price of rice a little higher. Public health good; some cases of fever in town, and cholera in interior.
Midnapore . .	1·11	Weather seasonable. Rice sowings completed. Transplantation commenced; prospects good. Public health good.
Khoolna . .	1·42	Weather cloudy and wet. Prospects of *aus* rice good; transplanting of *amun* rice going on. Public health good.
Dinagepore . .	5·71	Heavy rain. Prospects of crops excellent. Cattle-disease in five thanas.
Pubna (Serajgunge) .	2·18	Crops doing well. Public health good.
Gya . .	2·72	Crops doing well; ploughing active. Prices moderate. Public health good.
Chumparun . .	1·96	Sowing of *bhadoi* crops commenced. Prices stationary. Public health fair; some cases of small-pox reported.
		General Remarks.—Good general rain during the week. Agricultural prospects very promising everywhere; *aus* rice, jute, indigo, and sugarcane doing well; transplanting of *amun* rice commenced; in Behar *bhadoi* sowings in active progress. Price of rice generally remains almost stationary. General health continues fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(June 30th)		
Benares (June 28th)	From ·70 to 4·20	*Kharif* sowings commenced. Prices steady. Markets well supplied. General health good.
Gorakhpore („ „)	·50 at Sadr	Weather close and cloudy. Prices steady. Health fair.
Fyzabad („ 29th)	Heavy showers	Agricultural operations progressing satisfactorily. Prices almost unchanged. General health good.
Lucknow („ 28th)	·10 to ·80	Weather often cloudy. Ploughing in progress; *juari*, *kodo*, *arhar*, *marioo*, and *moong* are being sown in places. Supplies sufficient. Prices slightly rising. No disease either among men or cattle.
Rae Bareli („ „)	1·30 at Sadr	Weather sultry. Fields being prepared for *kharif* crops. Supplies ample. Prices steady. Cholera reported from tahsils Digbijaiganj and Rae Bareilly.
Partabgarh („ 29th)	1·0 to 2·10	Cultivators actively employed in sowing rice, *mandua*, *arhar*, &c. General health good.
Allahabad („ „)	Rainfall all over the district 1·0.	*Kharif* sowings commenced. Markets well supplied. Prices show a slight fall. Health good.
Cawnpore („ „)	Rainfall all over the district from ·60 to 3·10	Weather cloudy. Ground being prepared for *kharif*; sowing commenced. Prices steady. Condition of cattle and people good.
Farakhabad(„ „)	Rain in all tahsils, varying from ·20 to 3·40.	*Kharif* sowings in progress. Prices steady. Health fair.
Sitapur („ „)	Rain averaging 2·40 has fallen throughout the district.	Sowings are in progress.
Bareilly („ „)	Rain in all tahsils in early portion of week; heavy on 28th.	Prices of *bajri* and *juari* rising. Much fever reported.
Banda („ 28th)	Good and general rain.	Ploughings commenced. Prices of wheat and gram slightly lower. Public health good; cattle-disease in two villages.
Ballia („ 29th)	Average 2·20	Prospects good; *kharif* operations progressing. Public health satisfactory.
Kumaon („ „)	Partial rain	Weeding of *kharif* in progress. Prices steady. General health good; cattle-disease decreasing.
Agra („ 28th)	Rain in all parganas, ·30 to 2·0.	*Kharif* ploughings and sowings progressing. Prices steady. Health good.
Jhansi („ „)	5·50	Sowings commenced in places. Prices steady. Public health good; slight cattle-disease.
Meerut („ 29th)	·30 to 1·20	Weather very hot, but seasonable; wind variable. *Kharif* ploughing and sowing in progress; cane and indigo flourishing. Prices steady. Health good.
		General Remarks.—Rainfall has been abundant, and *kharif* sowings are in progress everywhere. Markets are well supplied, though prices are fluctuating. Public health good.
Punjab—(June 29th)		
Hissar . .	*Nil*	Health good. Prices stationary.
Delhi . .	·05	Health good. Prices fluctuating.
Umballa . .	·49	Health fair. Prices stationary.
Jullundur . .	·70	Health good. Prices stationary.
Ferozepore . .	2·90 at Sadr	Health good. Prices stationary.
Amritsar . .	3·30	Health good. Prices stationary.
Sialkot . .	12·0	Health good. Prices stationary.
Lahore . .	·10	Health good. Prices stationary.
Mooltan . .	*Nil*	Health good. Prices stationary.
Rawalpindi . .	·80	Health good. Prices rising. Prospects of current harvest average.
Shahpur . .	*Nil*	Health good. Prices almost stationary.
Dera Ismail Khan .	·12	Prices stationary.
Peshawar . .	*Nil*	Health good. Prices stationary.
		General Remarks.—Rain has fallen in the Delhi, Umballa, Jullundur, Ferozepore, Amritsar, Sialkot, Rawalpindi, and Dera Ismail Khan districts. General health good, but there is some small-pox in the city of Dera Ismail Khan. Prices fluctuating in the Delhi district, rising in the Rawalpindi district; elsewhere stationary. *Kharif* sowings in progress.
Central Provinces—(June 30th)		
Nagpur . .	4·72	Sowings commenced. Small-pox in parts. Prices stationary.
Jubbulpore . .	7·77	Weather favourable; high winds. Sowings well in hand. Health good. Prices steady.
Saugor (June 29th)	5·81	Weather cooler. *Kharif* sowings begun. Fever continues. Prices risen slightly.
Seoni . . .	Rain throughout the district.	Weather cloudy and cool. *Kharif* sowings commenced. Health good. Prices steady.
Hoshangabad . .	2·40	Weather cloudy and close. Sowings commenced. Small-pox prevalent. Prices steady.
Khandwa . .	4·90	Weather cool and pleasant. Sowings in progress. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—*contd.*

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 7th JULY, 1886.

GENERAL REMARKS.—In Sind and some districts of the Western Punjab little or no rain has yet fallen, but elsewhere rain has been general, and, except in parts of Southern India and Rajputana, on the whole abundant.

The season continues to promise well in Madras, Mysore, and Coorg.

In Bombay, the North-Western Provinces and Oudh, the Punjab, the Central Provinces, Berar, Hyderabad, and Rajputana, *kharif* operations continue. Agricultural prospects in these Provinces are generally good.

Prospects continue very satisfactory in Bengal, and are for the most part good in Assam.

The public health is fair in all Provinces.

Prices are rising in the Hissar, Delhi, and Shahpur districts of the Punjab, in Kolar in Mysore, and in Coorg, and are fluctuating in the Mooltan district of the Punjab. Elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 7th)		
Bellary . .	Average ·49	Standing crops generally good, but young plants damaged by insects in parts of two taluks; harvest second crop paddy, yield about average. Cattle-disease in three taluks.
Kurnool . .	Average last week since revised, ·46; this week, 1·24.	Small-pox in two and cattle-disease in three taluks.
Ganjam . .	Average 1·40	More rain wanted in two taluks. Slight small-pox in two, fever in three, and cattle-disease in two taluks; cholera exists.
Kistna . . .	Average ·37	River 5·15 feet water over anicut. Cholera in one taluk.
Chingleput (Madras) .	Average 2·46	Standing crops good; harvest paddy, outturn below average. Fever in one, small-pox in one, and cattle-disease in two taluks.
Coimbatore . .	**Average ·33**	**Standing crops good, but *cumbu* wants rain in one taluk; harvest *cholum* and *cumbu*, outturn above average. Small-pox in two villages; fever and cattle-disease in one taluk.**
Tanjore . . .	Average 2·16	Standing crops generally good; harvest paddy and gingelly, outturn below average. Slight cholera in one taluk and cattle-disease in another.
Madura . .	.....	Report not received.
Malabar . .	Average 2·49	Rain insufficient for standing crops. Fever in one and slight small-pox in eight taluks; cholera in one taluk.
Travancore . .	·10	Paddy plants good. Small-pox and fever in parts.
		General Remarks.—General prospects fair.
Bombay—(July 7th)		
Kurrachee . .	Keti, ·08	River at Kotri on 5th, 17 feet 2 inches against 16 feet 8 inches on same date last year. Fever in five and cattle-disease in three talukas; small-pox in two villlages, three fresh cases remaining sick. Wheat, red rice and *bajri* in Kurrachee 26, 30 and 34, in Tatta 24, 40 and 40, in Shabandar 20, 42 and 42, and in Kotri 26, 40 and 40 pounds per rupee, respectively.
Hyderabad . .	*Nil*	*Kharif* cultivation in progress. River at Kotri on 5th, 16 feet 2 inches against 16 feet 8 inches on same date last year. Fever in one, cattle-disease in three, and small-pox in two talukas. Wheat 25, *juari* 40, *bajri* 37, white rice 19, and red rice 30 pounds per rupee.
Ahmedabad . .	4·20; total 13·52	Rain throughout the district. Sowing of *kharif* nearly completed. Public health good. Wheat 34 and *bajri* 31 pounds per rupee.
Baroda . .	7·16; total 12·33	Public health good. Sowing operations continue. *Bajri* 26, wheat 22, and rice 18 pounds per rupee.
Surat . . .	*Nil*	Heavy rain has retarded sowing operations in some talukas. Fever in Bardoli and Olphad talukas. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik . . .	Niphad, ·78; Dindori, ·66; maximum at Nandgaon, 10·47; minimum at Kalvan, 1·81.	More rain wanted in Niphad. *Urd*, *mung* and *til* sowing almost completed in Sinnar, Chandor and Baglan talukas. Preparations for *kharif* sowing continue vigorously in the *dangi* parts of Igatpuri, Kalvan, and Peint talukas; young plants of rice and *nagli* doing well. Public health good throughout the district. Wheat 31½, *bajri* 31 and rice 17½ pounds per rupee.
Colaba (Bombay) .	Rain every day, except on 5th; total of week 5·60; total to date 48·60, being 22·91 above average.	Average abnormal temperature 3° cool from 31st to 2nd, afterwards 1° warm; vapour in air normal from 30th to 2nd, afterwards excessive; abnormal wind from north-east from 30th to 2nd, wind normal from 3rd to 6th.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Poona	Rain general throughout the district; maximum at Bhimthadi, 3·39; minimum at Poona City.	Sowing of early crops in progress throughout the district; transplanation of rice, &c., commenced in Peta Mulshi. More rain wanted in Khed and Sirur talukas. Public health generally good; slight cattle-disease in Junnar and Haveli taluka. *Bajri* 34 and *juari* 45 pounds in the district, and *bajri* 32 and *juari* 37 pounds per rupee in Poona City.
Ahmednagar	Rain in all talukas, maximum at Nevasa, ·32; minimum at Shrigonda, ·11.	Sowing of *kharif* in progress throughout the district. Public health good. *Bajri*—maximum 60 pounds and minimum 35 and *juari*—maximum 84 and minimum 48 pounds per rupee, respectively.
Sholapur	Rain in all talukas, maximum at Karmala, 0·38; minimum at Sangola, ·45.	*Kharif* sowing operations commenced throughout the district. More rain required in Sholapur, Sangola, and Mulsiras talukas. *Juari* 50½ and *bajri* 40½ pounds per rupee.
Dharwar	Rain at all stations varying from ·09 in Mundargi to ·74 in Mugud, except Dharwar, Navalgund and Nargund, where there has been none.	More rain required back for sowing early *juari* and for the young rice plants which are good. Minor early crops, such as *sava* and *urid*, damaged by insects in Dharwar, Navalgund, Ramdurg and Karajgi talukas. Public health good. Rice 28 and *juari* 40 pounds per rupee.
Kanara	Karwar, 0·31; Kumpta, 8·30; Sirsi, 3·06; Haliyal, ·93; total, 50·13.	Rice plants healthy; rain-planting and weeding in progress throughout the district. Anthrax continues in Supa petta; slight small-pox in four talukas. Common rice in Karwar 13; district average 12½ seers per rupee.
Rajkot	4·07; total 12·72	Health generally good. Sowing operations continue. Wheat 34, *bajri* 20, and *juari* 43 pounds per rupee.
		General Remarks.—Fair rain throughout the Presidency, excepting Sind; more wanted in some talukas of the Deccan. Young crops slightly injured by insects in parts of Dharwar and Upper Sind Frontier. Fever and cattle-disease in parts of eight and small-pox in parts of six districts.
Bengal—(July 7th)		
Chittagong	3·90	Weather seasonable. Prospects of crops generally fair. Prices somewhat rising. Small-pox continues; public health otherwise good.
Dacca	7·49	Prospects of crops good; sowing of *rouchia* and *shail* paddy nearly completed; jute plants thriving well. Public health good.
24-Pergunnahs (Calcutta).	3·05	Prospects of jute, early rice, and sugarcane good; rain-planting of *aman* commenced. Public health good.
Moorshedabad	Good rain	Weather sultry. Prospects of paddy crops good; transplanting of late paddy commenced. Public health good.
Rungpore	5·57	Rain-planting of *aman* going on; *aus* still being harvested; jute looks well. Public health good.
Burdwan	0·97	Prospects of *aus* rice and sugarcane good; transplanting of *aman* going on fairly everywhere, except in Cutwa subdivision, where a heavy shower is wanted. Public health generally good.
Bhagalpur	2·81	Transplantation in progress; prospects good. Prices falling. Cholera in Soopore decreasing.
Purneah	6·04	Prospects of crops excellent.
Patna	5·14	Sowing of *bhadoi* and paddy in full progress; maize and *kauni* already sown have germinated well. Sporadic cholera in headquarters of Behar subdivision.
Durbhunga	4·78	Progress of *bhadoi* sowing much retarded owing to continued and heavy rain; a break in the weather for a short time absolutely necessary. Prices almost stationary. Public health generally good.
Hazaribagh	Good rain	Weather seasonable. Crops doing well; prospects favourable. General health good.
Cuttack	2·29	Weather cloudy. Rice plants being weeded and growing well. Price of common rice almost unchanged. Fever prevails in town; scattered cases of cholera reported from interior, otherwise public health good.
Midnapore	0·71	Weather seasonable. Prospects of crops good. Public health good.
Khoolna	1·88	Weather cloudy and wet. *Aus* rice growing; *aman* land being ploughed. Public health good.
Dinagepore	2·44	Heavy rain. Weather seasonable. Prospects of crops excellent. Cattle-disease in four thanas; three cases of small-pox reported from Gungarampur.
Pubna (Serajgunge)	3·35	Crops doing well. Public health good; some fever near Serajgunge.
Gya	1·45	Agricultural operations proceeding satisfactorily; prospects of crops good. Prices steady. Public health fair.
Chumparun	4·18	*Bhadoi* and *aghani* sowings in progress; standing crops in good condition. Prices stationary. Public health fair.
		General Remarks.—Good general rain during week, more wanted in parts of Burdwan division. Agricultural prospects everywhere cheering; *aus* rice, jute and sugarcane doing well; rain-planting of *aman* rice proceeding satisfactorily in Behar; sowings of *bhadoi* paddy crops in full progress. Price of rice continues generally stationary. General health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(July 7th)		
Benares	(July 5th) ·90 to 1·30	Sowings in progress. Prices steady. Supplies plentiful. Health good.
Gorakhpore	(„ „) 7·10 at Sadr	Weather dull and rainy. Prices steady. Health fair.
Fyzabad	(„ 6th) Heavy rain	Prospects of *kharif* good. Small-pox in two tahsils; general health good.
Lucknow	(„ 5th) Average 2·80	*Kharif* sowings in progress. Supplies sufficient. Prices slightly rising. Health of people good as well as condition of cattle.
Rae Bareli	(„ „) Good rain all over the district.	Agricultural operations in progress. Markets well supplied. Prices steady. General health fair.
Partabgarh	(„ 6th) 2·10 to 3·30	Prices of wheat, sugar, and rice fluctuating. Prospects reported favourable. Health good.
Allahabad	(„ „) Rain averaging 3·0 all over the district.	Weather seasonable. Markets well supplied. Prices steady. General health good.
Cawnpore	(„ „) Rain in all tahsils from 3·0 to 5·20.	Weather cloudy. Ploughings and sowings in progress. Prices stationary. Condition of people and cattle good.
Farakhabad	(„ „) Rain in all tahsils ·70 to 6·60.	*Kharif* sowings in progress. Health fair.
Sitapur	(„ 5th) General rain averaging ·20 has fallen throughout the district.	Sowings in full progress and sugarcane doing well.
Bareilly	(„ 6th) ·80 to 8·0	Weather cool, with east winds. Prices slightly rising.
Banda	(„ 5th) Heavy rain on 29th June and 3rd instant.	*Kharif* sowings in progress. Prices steady. Public health good; cattle-disease in two villages.
Ballia	(„ 6th) General rain averaging 7·70.	Ploughing throughout the district; *kharif* sowings commenced. Supplies ample. Public health good.
Kumaon	(„ „) Rain almost every day.	*Kharif* crops doing well; weeding not completed yet. Prices rising. General health good; measles in part; cattle-disease still prevails.
Agra	(„ 5th) Good rain during week.	*Kharif* ploughings and sowings in progress. Prices steady. Health good.
Jhansi	(„ „) Rain during week	*Kharif* ploughing and sowing in progress. Prices show rise in wheat and gram. Public health good.
Meerut	(„ 6th) Rain all over the district from ·10 to 1·80; frequent showers.	*Kharif* ploughing and sowing in progress; prospects favourable. Prices stationary. No sickness.
		General Remarks.—Ample rain has fallen throughout the Provinces. Agricultural operations are in progress everywhere, and prospects good. Markets are well supplied, and prices generally steady. Public health is fair.
Punjab—(July 7th)		
Hissar	1·20	Health good. Prices rising.
Delhi	2·86	Health good. Prices rising.
Umballa	4·80	Health fair. Prices stationary.
Jullundur	1·70	Health good. Prices stationary.
Ferozepore	·40	Health good. Prices stationary.
Amritsar	2·20	Health good. Prices stationary.
Sialkot	3·30	Health good. Prices stationary.
Lahore	1·10	Health good. Prices stationary.
Mooltan	*Nil*	Health good. Prices stationary.
Rawalpindi	·75	Health good. Prices stationary.
Shahpur	Rain in tahsil Khushab.	Health good. Prices rising.
Dera Ismail Khan	*Nil*	Prices stationary.
Peshawar	*Nil*	Health good. Prices of wheat and barley rising, of other grains stationary.
		General Remarks.—Rain has fallen in all districts, except Mooltan, Dera Ismail Khan, and Peshawar. General health good, but there is some small-pox in the city of Dera Ismail Khan. Prices rising in the Hissar, Delhi, and Shahpur districts, fluctuating in the Mooltan district; elsewhere stationary. *Kharif* sowings in progress. Rain much wanted in the Peshawar district.
Central Provinces—(July 7th)		
Nagpur	3·10	Weather cloudy and wet. *Kharif* being sown. Small-pox and cattle-disease in places. Prices steady.
Jubbulpore	3·01	Sowings progressing favourably. More rain wanted. Health good. Prices steady.
Saugor	(July 6th) 2·26	Weather rainy. Sowings progressing. Fever continues. Prices stationary.
Seoni	1·24	Weather cloudy and warm. Sowings progressing. Health good. Prices slightly risen.
Hoshangabad	Rain daily	Sowings progressing. Slight small-pox. Prices steady.
Khandwa	2·05	Sowings progressing. Health good. Prices steady.
Raipur	*Nil*	Weather cloudy and close. Sowings being pushed on. Cholera and cattle-disease still reported. Prices steady.
Sambalpur	(July 3rd) 1·49	Weather cloudy and sultry. Rain wanted for sowings. Health good. Prices stationary.
		General Remarks.—Weather seasonable and favourable for *kharif* sowings, except in Sambalpur, where rain is wanted. Health generally fair. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
British Burma—(July 7th)		
Akyab	4·12; total rainfall 40·23.	Public health good; slight cattle-disease in two townships.
Bassein	4·81; total rainfall 34·23.	Public health good; slight cattle-disease in three circles.
Rangoon	1·57; total rainfall 34·58.	Public health good; cattle healthy.
Amherst (Moulmein)	8·28; total rainfall 55·30.	Public health good; cattle healthy.
Pegu	1·11; total rainfall 41·30.	Public health good; cattle healthy.
Henzada	3·48; total rainfall 31·75.	Cholera in one township; cattle-disease in two townships.
Prome	1·43; total rainfall 15·57.	Public health good; cattle healthy.
Tounghoo	1·08; total rainfall 25·42.	Public health and health of cattle good.
Thayetmyo	1·10; total rainfall 13·11.	Small-pox prevalent in one circle; cattle-disease in two townships.
		General Remarks. Cholera in one township of the Henzada district, and small-pox prevalent in one circle of the Thayetmyo district, elsewhere public health good; cattle-disease in parts of eight districts, elsewhere cattle healthy. Ploughing progressing in all districts, except Akyab, where agricultural operations not yet commenced; transplanting of seedlings going on in several districts.
Assam—(July 7th)		
Gauhati	0·04 during week ending 6th instant.	Weather rainy. Cholera has disappeared from the Sadr station; general health fair; cattle-disease still in some mouzahs. Transplantation of *sali* in parts commenced.
Sylhet	8·86	State and prospects of crops good.
Cachar	11·06	Weather wet. Ploughing for *aus* and *asra* crops nearly finished. Common rice 13 seers 5¼ chittacks per rupee. Prospects of tea good. Three deaths from cholera from Hailakandi and five from Katigora reported.
Dibrugarh	7·08	Heavy rain throughout the week; district partially inundated; damage to *ahu* and other crops anticipated. Public health good.
Mysore and Coorg—(July 7th)		
Bangalore	At Civil and Military station, 1·04; Bangalore district, ·00; Mysore, ·40; Kolar, 2·28.	Rain has been general throughout the State. Standing crops generally in good condition; prospects of season fair. Public health good. Prices slightly risen in the Kolar district.
Mysore	2·18	Prospects good, but monsoon rains have abated and prices have again slightly risen. Health good.
Mercara		
Berar and Hyderabad—(July 7th)		
Amraoti	2·14	Weather rainy. Cotton plants in good condition; sowing of *juari* continues. Wheat 22 and *juari* 26 seers per rupee.
Akola	2·13	Weather cloudy. *Kharif* sowings almost completed.
Hyderabad	0·38; total rainfall since 1st January 13·51.	*Kharif* and *ahu* sowings commenced. Tanks in Shahabad taluka filled plentifully. General health fair. Prices wheat 14; coarse rice 11½, white *juari* 21½, yellow *juari* 22½, and *tur* 15 seers per current sicca rupee.
Central India States—(July 7th)		
Indore	3·20; total rainfall 18·04.	Health fair.
Mewar Gwalior	0·04; total rainfall 16·07.	Health good.
Sutna	3·43	Health and prospects good.
Neemuch	1·65; total rainfall 8·71	Health good.
Geersa	1·10	Weather cloudy. Prices steady.
Agar	1·03	Health good.
Sehore	1·53	Weather cloudy. Prices falling. Health good.
Nowgong	[illegible]	Weather cloudy. Health good. Prices stationary.
Bhopawar Manpura	[illegible]	

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—(July 7th)		
Abu	(July 7th) 2·93	Weather seasonable.
Sirohi	(„ 4th) ·94	Tanks full; wells good. Health good. Crops being sown. Weather cloudy and cool.
Marwar	(„ 2nd) *Nil*	Eight months' water in Jodhpur City tanks. Health good. Sowings progressing; young crops rising. Weather clear; oppressively warm and sultry. Prices stationary.
Kherwara	(„ 4th) 2·70	Tanks and wells filling. Sowing continues. Health good. Prices slightly falling. Weather seasonable.
Meywar	(„ 3rd) 3·99	Tanks and wells filling. Crops good. Health good. Prices falling. Weather cloudy.
Pertabgarh	(„ „) 2·57	Health good. Weather cloudy and occasionally clear. Prices show a tendency to rise.
Harowti	(„ „) Deoli, 1·11; Tonk, 1·77; Shahpore, ·57; previous week, 5·66.	Weather cloudy. Sowings continue. Health good.
Jhallawar	(„ 2nd) 4·17	Rain general throughout State.
Ajmere	(„ 6th) Rain throughout district.	Small-pox in Beawar town. In some parts sowing operations commenced.
Jeypore	(„ „) 3·60	Ploughing in progress. Health fair.
Kerowlee	(„ 3rd) ·58	Tanks and wells filling. Sowings in progress. Health good. Prices average. Weather seasonable.
Dholepore	(„ „) *Nil*	Tanks and wells dry. Ploughing and sowing continue. Health good. Prices rising. Rain wanted.
Bhurtpore	(„ „) ·60	Sowings commenced. Prices steady.
Ulwur	(„ 6th) 5·90; average of nine tahsils, ·44.	Monsoon broke in 36 hours, still threatening. Health good. Sowings continue. Prices steady.
Bickanir	(„ 3rd) Slight rain and heavy falls in some districts.	Sowings continue. Tanks filling. Small-pox and fever prevalent. Prices stationary. Weather cloudy.
Nepal—(July 1st)		
Katmandu	(July 2nd) 2·64	Weather seasonable. State and prospects of crops good.

C. J. LYALL,

Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 7th July, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Colonel O. R. Newmarch.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Colonel W. G. Davies, C.S.I.

INDIAN PORTS ACT, 1875, AMENDMENT BILL.

The Hon'ble MR. ILBERT, on behalf of the Hon'ble Sir A. Colvin, introduced the Bill to amend the Indian Ports Act, 1875, and moved that it be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Mr. Hunter and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Fort St. George Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

PUNJAB TENANCY BILL.

The Hon'ble COLONEL DAVIES moved that the Bill to amend the law relating to the Tenancy of Land in the Punjab be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Sir A. Colvin and the Mover, with instructions to report within ten weeks.

His Honour THE LIEUTENANT-GOVERNOR said:—

"My hon'ble colleague, when moving for leave to introduce this Bill, explained the reasons for it and its scope so clearly and exhaustively as to relieve me from the necessity or the temptation to take up the time of the Council with any remarks of my own. I may, however, at the present stage of the case be permitted to repeat that this Bill is of very limited scope. It makes no important departure from the present Tenancy Act. In its two most important features, namely, the adjustment of occupancy-rents by the standard of the Government revenue and the adjustment of those rents by the Settlement-officer at the time of settlement, it reverts to the old law and custom of the Punjab. The other changes which it introduces have either been necessitated by practical difficulties experienced in the working of the present law during the eighteen years it has been in operation, or embody interpretations of the law and decisions given by the Civil Courts. In short, the Bill raises none of those delicate and difficult economic questions which so often accompany discussions on tenant-right. Indeed, very great changes will have to pass over the social condition of the Punjab before such questions can assume magnitude in this Province. In the Punjab the land is not, as in some parts of India, concentrated in the hands of large proprietors, to whom the mass of the people stand in the relation of tenants. The Punjab is a country of small landowners and of peasant-proprietors who are their own tenants. The mass of the people are themselves the proprietary body, cultivating their own lands. The average area of proprietary estates is something under 25 acres. In an area of 63½ million acres, something less than 9 millions are tenant-holdings. In a cultivated area of 23½ million acres, 62 per cent. is cultivated by the proprietors themselves, 13 per cent. by occupancy-tenants and 25 per cent. by tenants-at-will. In view of these facts I think the Council may commit this Bill to a Select Committee with some confidence that it is not likely to raise disturbing questions. It is in my judgment a Bill eminently calculated to foster and preserve the friendly relations which happily have hitherto existed in this Province between landlords and their tenants, who are often of the same flesh and blood, and oftener still of the same social class, as the landlords themselves."

The Motion was put and agreed to.

PUNJAB LAND-REVENUE BILL.

The Hon'ble COLONEL DAVIES also moved for leave to introduce a Bill to declare and amend the Land-revenue Law of the Punjab. He said:—

"The law on this subject is contained in Act XXXIII of 1871. This Act was the first attempt to express within a reasonable compass, and in clear language, the various rules and orders—based '*on the spirit*' of the Bengal Regulations—by which the proceedings of Revenue and Settlement officials in the Punjab had up to that time been regulated, and which had acquired the force of law under section 25 of the Indian Councils Act.

"The Act I am speaking of was framed with great care by a master of his art, Sir James Stephen, in close consultation with the then Financial Commissioner, Mr. (afterwards Sir R.) Egerton, and the Lieutenant-Governor, Sir Henry Davies—both men of large revenue and settlement experience. But it is scarcely, I think, to be wondered at that, notwithstanding all the skill and care expended on it, this first attempt to condense and put into legal form a mass of rules and instructions governing one of the most intricate branches of the administration should, when subjected to the test of practical working, have been found to be incomplete in some respects, and to require amendment in others.

"What the principal defects in the existing law are I shall have to explain when I introduce the Bill, but I may now mention that some of them have already formed the subject of correspondence with the Government of India, and many others have, as experience brought them to light, been supplied in the enactments on the same subject which have been framed for other parts of India. Moreover, the recent orders of the Government of India, based on recommendations made by the Famine Commissioners, demand that the continuous operations by which village-records are maintained correct to date shall be disconnected from those other occasional operations by which the assessment of the land-revenue is revised; and, in the endeavour to recast the body of rules which have been issued under the authority of the existing law with a view to the carrying out of those orders, technical difficulties have arisen which render the amendment of the Act a matter of necessity. The simultaneous revision of the Tenancy Act has also suggested certain changes in, and additions to, the Land-revenue Act.

"These briefly are, my Lord, the grounds on which it is proposed to amend the latter Act, and they will, I trust, be accepted by the Council as sufficient to support the motion I have made with this object."

The Motion was put and agreed to.

INDIAN COMPANIES ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the Indian Companies Act, 1882. He said:—

"The object of this Bill is to give priority, within certain limits, to the payment of salaries and wages in the distribution of the assets of a company which is being wound up under the Indian Companies Act. Provision to this effect was made by a Statute which was passed in 1883 to amend the English Companies Act, and corresponding provisions will be found both in the English Bankruptcy Act and in the Indian Bankruptcy Bill now before the Council. A recent decision of the Bombay High Court has attracted attention to the fact that there is no similar provision in the Indian Companies Act. I propose to insert such a provision, and thus to assimilate the Indian Companies Law to the English Companies Law, and the Law relating to Insolvent companies to the Law relating to Insolvent individuals."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

LOWER BURMA GAOLS DELIVERY BILL.

The Hon'ble SIR S. BAYLEY moved for leave to introduce a Bill to make provision for the more speedy trial of certain accused persons in custody in Lower Burma. He said:—

"The necessity for, and the object of, this temporary measure are best given in the words of the Chief Commissioner, from whose report, with Your Excellency's permission, I will read. A letter dated the 12th June, 1886, from the Secretary to the Chief Commissioner, runs as follows:—

'During the past five months some eleven districts* of Lower Burma have been disturbed by large gangs of rebels or dacoits. Villages have been burnt and numerous atrocities committed. The number of persons who have taken part in these disturbances has been very large. Some 1,500 have already been arrested, and numerous arrests continue to be made daily. Order has now to some extent been restored, but there are several gangs still at large, and there is little hope that the province will be restored to its normal condition for some months to come. Every effort has been made to cope with this outbreak of crime in accordance with the ordinary procedure, and two officers in succession (Mr. Ireland and Mr. Copleston) have been appointed Additional Sessions Judge for the purpose of assisting in the disposal of cases. But it has been found that something more than this is necessary if the large number of prosecutions now pending are to be disposed of with reasonable promptitude. There are at present over 1,000 prisoners in custody who have not yet been brought to trial; some of them have been over five months in jail; and to dispose of all these cases under the ordinary procedure will occupy many months. This is unfair to the prisoners themselves, some of whom may be innocent, and it is inconvenient to the Government, inasmuch as the overcrowded condition of our jails cannot be relieved until the cases of these prisoners have been disposed of. Moreover, as explained in Mr. Hodgkinson's note, there is reason to fear that, in some cases at least, guilty persons will escape punishment if their cases are not promptly brought to trial.

'Accordingly the Bill now submitted has been drafted with a view to introducing in the disturbed tracts, subject to certain safeguards, a more summary procedure than is admissible under the ordinary law. Sir Charles Bernard hopes that it will not be necessary in very many cases to sentence prisoners to long terms of imprisonment, and he believes that it will be possible, when the country has quieted down, to release many of the prisoners before their sentences have expired. In some cases it is probable that a whipping will prove a sufficient punishment for young lads who have joined rebel bands thoughtlessly or under intimidation, and a clause has accordingly been inserted in the Bill authorizing Magistrates to inflict this punishment in certain cases in which a whipping would not be a lawful punishment under the Indian Penal Code. The remaining provisions of the Bill are sufficiently explained in Mr. Hodgkinson's note, in which the Chief Commissioner generally concurs.

'In conclusion I am to submit that Sir Charles Bernard regards it as a matter of importance that some such enactment as that now submitted should be passed into law with as little delay as possible.'

"These are the circumstances under which we have been asked to legislate. The draft Bill which Sir Charles Bernard submitted has been modified in some respects, and the shape which, under the advice of the Legislative Department, it will now take is as follows. It will extend only to those tracts which the Chief Commissioner may notify as disturbed tracts in Lower Burma. In those tracts the Chief Commissioner will have power to appoint District Magistrates and other selected Magistrates of the first class to try cases as Sessions Judges without the necessity of previous commitment.

"The procedure which these officers will follow in that class of cases will be the ordinary procedure of warrant-cases under the Criminal Procedure Code. The offences to which this procedure will apply are mainly offences against the public peace of a violent nature, and are entered in the schedule at the end of the Bill. The decisions of these officers will be subject in the ordinary course to both the revisionary and the appellate jurisdiction of the Judicial Commissioner, who is the local High Court; but, as it is possible that the Judicial Commissioner will find himself unable to keep pace with those cases, power is given to the Local Government to appoint, with the previous sanction of the Governor General in Council, an Additional Judicial Commissioner, or Additional Judicial Commissioners. The object of this last clause is in case it should ultimately be necessary in some very special circumstances to vest with the powers of the Judicial Commissioner officers such as the Commissioners of Divisions. But at present it is not intended to do that; it is proposed to leave the revisionary jurisdiction of the High Court in the hands of the Judicial Commissioner, and possibly to appoint an Additional Judicial Commissioner to go about and hold circuit. This Additional Judicial Commissioner will work under the ordinary checks of the Criminal Procedure Code. The only alterations of importance we have made are that in these cases of the disturbed tracts we reduce the period during which an appeal can be presented in cases other than capital cases from 60 to 30 days, and, for the reasons given in Sir Charles Bernard's letter, which I have just read out, we allow whipping in substitution of the severer penalties which the Penal Code generally directs.

"I may mention that the Judicial Commissioner, who, as I said before, is a local High Court, has been consulted, and he quite concurs with the Chief Commissioner as to the necessity for providing an effective procedure for these cases, though the procedure which Sir Charles Bernard and the Judicial Commissioner proposed is somewhat more summary than that which we have seen our way to accept. The Chief Commissioner will have the power to remove from the operation of this Bill any tract as soon as it ceases to be a disturbed tract, and we propose that the special law altogether shall expire at the end of the current financial year. I think that the provisions of the Bill will probably suffice to meet the object which Sir Charles Bernard has in view, and I do not think that anything less than a measure of this kind would have the effect."

The Motion was put and agreed to.

The Hon'ble SIR S. Bayley also introduced the Bill.

The Council adjourned to Wednesday, the 14th July, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

STATISTICAL BRANCH;
Calcutta, 15th July 1886.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 14th July, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble Colonel O. R. Newmarch.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Colonel W. G. Davies, C.S.I.

PUNJAB LAND-REVENUE BILL.

The Hon'ble COLONEL DAVIES introduced the Bill to declare and amend the Land-revenue Law of the Punjab, and moved that it be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Sir A. Colvin and the Mover, with instructions to report within nine weeks. He said:—

"At the last meeting of the Council, in moving for leave to introduce this Bill, I explained briefly the grounds on which it is proposed to amend the land-revenue law of this Province, and I have now to describe the more important changes and additions which the Bill, prepared with this object, makes in that law. In doing this it will not be necessary for me to take up the time of the Council to the same extent as I did when introducing the Bill to amend the Tenancy Act; for there is this broad distinction between the two measures, that, while the latter deals with valuable rights of property, this Bill is concerned chiefly with matters of procedure, the adjustment of which largely depends on considerations of administrative convenience and rarely involves the decision of questions of principle.

"I would first explain that this Bill is the outcome of the discussions of the past three years. Like the Tenancy Bill, the original draft of this Bill was prepared by Mr. Barkley and circulated for opinion to a number of the most experienced Revenue-officers of the Province. When their replies were received it was discussed and amended by a Committee consisting of the framer, Colonel Wace and myself, and lastly it underwent further revision at conferences held last year over which the Lieutenant-Governor himself presided. The two Bills, I may add, are closely connected, and this one has been so framed as to cover the entire jurisdiction of Revenue-officers, whether of a judicial, fiscal or executive character.

"I may pass over without notice the first chapter, which contains the usual definitions and other preliminary matters, and proceed at once to Chapter II, which deals with Revenue-officers and Revenue Courts. The more important changes in this chapter are two—*first*, in the jurisdiction of Revenue-officers to try certain

classes of suits, and *secondly*, in the course of appeal from decisions in suits, and from orders on applications. These matters are at present dealt with in Chapter V of the Punjab Courts Act, which it is proposed to repeal, and in section 65 of the Land-revenue Act. By section 45 of the former Act revenue-suits are divided into two groups, the first of which is by clause (*1*) of section 46 reserved for the exclusive jurisdiction of Deputy Commissioners, while suits in the second group are by clause (*2*) triable by Assistant Commissioners and Tahsildárs. The chief aim of these novel distinctions of jurisdiction was, I believe, to reduce the number of appeals. If so, they have perhaps answered their object, but they have at the same time caused much inconvenience. No such distinctions existed before the passing of the Courts Act, and there seems no good reason why Assistant Commissioners and Tahsildárs should not try suits of the kind mentioned in the first group. It is therefore proposed to revert to the former practice in this respect, and base distinctions of jurisdiction on the value rather than on the character of suits. The Local Government, by rules under section 13 of the Bill, will determine by what officers or classes of officers, and up to what limits of value, suits cognizable by Revenue-officers shall be tried. These alterations in jurisdiction to try original revenue-suits have necessitated changes in the course of appeal, and, in place of the somewhat complicated system of appeal prescribed in sections 47 and 48 of the Courts Act, the more simple system set forth in sections 19 and 20 of the Bill has been devised. It will put an end to second appeals in all cases in which the Appellate Court confirms the original decision, and where that Court interferes in any way a further appeal will lie to the Financial Commissioner. In addition to this the powers of revision given to this officer by section 65 of the Land-revenue Act have been enlarged so as to include decisions of subordinate Revenue-officers when acting in their judicial capacity, but in all such cases an opportunity will be given to the parties of being heard before an order is passed affecting questions of right. There is one other provision to which I ought perhaps to draw attention. Experience since the passing of the Courts Act of 1884 having shown that the subordinate Civil and Revenue Courts do not always succeed in avoiding mistakes as to the respective limits of their jurisdictions, a section (11) has been introduced by which the inconvenience and expense to the parties of setting aside the proceedings, where a Court has decided a suit without jurisdiction, will be avoided by a reference to the Chief Court, who will cause the decree to be registered in the Court which had jurisdiction, if satisfied that the suit was determined in good faith and the parties have not been prejudiced by the mistake of jurisdiction.

"In the next chapter (III), which treats of kánúngos, zaildárs and village officers, the only point that requires notice is that section 36, which authorises the levy of a cess for the payment of village-officers, remedies a defect in the present law which formed the subject of correspondence with the Government of India some years ago, by enabling the cess to be levied on the owner's and water-advantage rates.

"After this come two chapters (IV and V) which deal with (1) the preparation and maintenance of records-of-rights, and (2) the assessment of the land-revenue. In drafting these chapters the language of the existing law, which describes these two operations under the general term "settlement," has been departed from. This change has been made to bring the law into harmony with the altered policy of the Government of India in regard to revisions of assessment. Briefly stated, the object of this policy is to so organise the ordinary revenue-establishments in each province as to enable them to maintain for each estate a continuous record of its financial and agricultural condition, from which the information required for the assessment of the land-revenue may at any time be obtained, and thereby to save the State from some part of the expense, and the people from the trouble and anxiety, which the existing system of periodical settlements by special establishments entails on them. But it is, I think, right to point out that a change of this magnitude, involving as it does the most careful training and constant supervision of the subordinate revenue-establishments, must be gradually worked up to, and cannot be suddenly introduced. Moreover, it is believed that there are still some districts of which the records are so imperfect

that they must be revised on the old system in order to furnish a good basis for future operations under the new one. And entirely new records have to be prepared from time to time as new estates come into existence. Accordingly provision has been made for this purpose in Chapter IV. The only other point which appears to me to call for notice in this part of the Bill is the addition of a section (48) which gives power to the Local Government to direct that the whole or a portion of a village-cess may be expended on conservancy or other object for the benefit of the estate in which the cess is levied. This is an authority which the Local Government often exercised in connection with the earlier settlements of the Punjab, it is one which is still occasionally needed, and it is to be found in the revenue laws of other Provinces.

"Chapter V, which deals with the assessment of the land-revenue, is so drafted that, while continuing all the provisions of the existing Act relating to this subject, it supplies some important omissions in that law. Among other important points, it expressly declares that the land-revenue is the first charge on the land, its rents and its produce, and further provides securities against the intercepting of any of these sources of income before the Government demand has been satisfied. The absence of clear provisions of this nature has been the cause of inconvenience in the past. It has not unfrequently happened that a decreeholder has attached the rents or produce of a landowner before the latter has paid his revenue, thus leaving the Revenue-officers no remedy except that of proceeding against the produce of the coming harvest, or against the land itself. The only other change in this chapter to which I think I need invite particular attention is in the procedure for giving effect to revised assessments. This will be found in sections 60 to 63. It dispenses altogether with the formality of taking from the landowners or their representatives written engagements accepting the new assessments. But, while doing this, it still leaves the owners at liberty to refuse to pay these assessments, and the consequences of refusal are the same as those which follow on the non-acceptance of an assessment under the present law. Refusals of this kind, however, seldom occur in the Punjab, and the really important point in the procedure lies less in the provisions dealing with these refusals than in the sections (61 and 62) which provide for the hearing of objections and appeals, and thereby obtaining modifications of assessments prior to their confirmation. In a country of small holdings, like the Punjab, an owner cannot afford to decline to pay the assessment fixed; hence the only remedy against over-assessment practically open to him is to appeal and get his assessment reduced; and this is the remedy which he almost always adopts.

"In the following chapter (VI), which describes the various processes which may be resorted to for the recovery of arrears of land-revenue, the alterations which deserve mention are only three. By section 78 the period during which a defaulter may be imprisoned has been reduced from one year to one month. By the following section the exemptions from attachment and sale of moveable property specified in section 266 of the Civil Procedure Code are extended, in the case of a revenue-defaulter, to seed-grain, and to so much of the produce of his land as may be necessary for the support of himself and his family and the maintenance of his cattle until the harvest next following on the execution of the process. And with a view to render this chapter complete in itself, the procedure for the sale of a defaulter's land, instead of being described, as in the present Act, by reference to the sections of the Civil Procedure Code relating to the sale of immoveable property, has been set out in full by incorporating those sections, with some necessary modifications, in this part of the Bill.

"Chapter VII supplements the provisions of the preceding collection chapter by providing for the recovery, as arrears of land-revenue, of a number of other Government demands. This is probably one of the most useful chapters of the Bill, but there is nothing in it that that seems to call for special notice at my hands.

"I pass on to Chapter VIII, the provisions of which are altogether new, but of which the general policy is believed to be entirely in accordance with the views of

the Government of India as set forth in a circular on the formation of fuel and fodder reserves issued in March, 1883. The chapter has been so framed as to secure in estates, where the conditions are suitable, the management of a portion of their waste-lands for the production of wood and grass. The areas to be so treated are not to exceed one-fifth of the waste in each estate, and power is taken to make rules for their management on behalf of the owners. All rules and orders under this chapter must be made and issued by the Local Government, and it is further provided that, before any order is issued declaring that an area is reserved, objections shall be invited and considered. There can be little doubt that a power of this kind is very much wanted in the interests of both the State and the people, and from my own experience I think I may confidently state that in many parts of the Punjab the intervention of the Government, to bring about the results aimed at by this chapter, will be welcomed by the people."

"Chapter IX, on Survey and Boundaries, contains the usual provisions for facilitating the survey of land for revenue-purposes. Similar provisions are to be found in most of the land-revenue laws of other provinces, and there is nothing in this part of the Bill which seems to call for comment or explanation.

"The last chapter (X) deals with matters for which provision could not conveniently be made in other parts of the Bill. Of these a few are of sufficient importance to require special notice. The first is contained in sections 126 and 127, which provide for the execution by Revenue-officers of decrees and orders of Civil and Criminal Courts. So long as civil, criminal and revenue jurisdiction was vested in the same officers, the subordinate revenue-establishments, from the Tahsildár downwards, were at the disposal of the Courts for the execution of processes relating to land and its produce; but civil and revenue jurisdiction now vests in different officers; hence the officers presiding over Civil Courts have no longer at their command any agency by which orders of this kind can be carried out. The object of these sections is to supply the deficiency by continuing the practice which existed before the passing of the Courts Act of 1884. Next comes the provision made by section 133 for meeting the uncertainties of jurisdiction which frequently arise in cases relating to alluvial lands on the banks of the large rivers, where these are often the boundary between districts. The want of a provision of this kind has been much felt, especially on the rivers where the *kachi-sikmi*, or deep stream rule, prevails. And the last I shall notice is contained in section 134, which declares that all records and papers which a village-officer is required by law to prepare or keep shall be the property of Government, and makes provision for their production and proof. The chief object of this section is to avoid the too frequent summoning of patwáris to Court.

"I have now, my Lord, accomplished my task, and trust that I have sufficiently explained the more important additions and amendments which this Bill proposes to make in the land-revenue law of this Province, and that the measure will meet with the general approval of this Council and of the Select Committee for whose consideration it has been referred."

The Hon'ble MR. ILBERT said:—"I believe that this Bill will prove to be an extremely useful measure, and I say so with the greater readiness because my personal share in its preparation has been very slight. The credit for it is mainly due to Colonel Davies and Colonel Wace, the Financial Commissioners of the Punjab, who have supplied the substantive proposals on which it is based, and to Mr. Harvey James, the Officiating Secretary in the Legislative Department, who has, after several protracted conferences with the Punjab officials, completely revised and re-cast the draft submitted by the Punjab Government, and has reduced it to a series of clearly expressed and well-arranged enactments.

"On comparing the Bill now before the Council with the Act of 1871, which it is intended to supersede, I am struck by two chief differences, one of addition and the other of omission. In 1871 the revenue law of the Punjab was to be found in a mass of executive instructions, based on the numerous

Acts and Regulations then in force in the North-Western Provinces, of which the most important was the well known Regulation VII of 1822. It was extremely difficult to ascertain what was the law in force in the North-Western Provinces, and still more difficult to determine how much of that law had been imported into the Punjab. The task which my eminent predecessor Sir James Stephen undertook was to explore this mass of instructions, to pick out from it such provisions as could properly and conveniently be given the force of law, to express them in legislative language and to embody them in an Act. He thus produced a law which in point of expression and arrangement was an enormous advance on anything then existing either in the Punjab or in the North-Western Provinces. But this first edition of directly enacted Punjab revenue law was necessarily incomplete. The framers of the Act wisely selected for enactment only the more important provisions of the law, and left a great quantity of subsidiary matter to be regulated by rules made under the Act. Since 1871 much has been done to make the revenue law for those parts of British India which have borrowed their principle of revenue settlement and administration from the North-Western Provinces more complete in substance, more satisfactory in form and more generally intelligible. In 1873 a comprehensive Revenue Act of 259 sections was passed for the North-Western Provinces, and it repealed, as I find from the schedule to the Act, no less than 53 Regulations and 8 Acts previously in force on the same subject. Eight years afterwards—in 1881—an equally comprehensive Revenue Act was passed for the Central Provinces. During the same period a great number of rules have been framed under the Punjab Act, and the experience of 15 years has shown which of them work well in practice and which of them are of sufficient importance to be embodied in an Act of the legislature. And last, but not least, Mr. Baden-Powell's admirable *Manual of Indian Land-revenue Systems* has done much towards making the revenue law and practice of different parts of India not merely intelligible to experts but even interesting to the general reader.

"Under these circumstances the task imposed on the draftsman of a revenue law is wholly different from what it was fifteen years ago, but it is none the less of a very laborious character. In the present case it has consisted, first, of giving legislative form to a selected number of rules framed under the existing Act, and secondly, of comparing the law proposed for the Punjab with the law now in force in the North-Western Provinces and the Central Provinces, with the view of making the law for the three Provinces uniform, so far as their differing circumstances will permit. Hints for improvement of the law have also been derived from the study of the Acts for other parts of British India, such as Bengal and Bombay, where a different revenue-system is in force. The intimate acquaintance of my friend Mr. Harvey James with the revenue law of the North-Western Provinces has made him eminently qualified to perform this latter task, and a glance at the marginal references on the Bill will show how carefully and exhaustively it has been performed. The result of these two processes has been to increase the bulk of the measure, which has been expanded from an Act of 67 sections to a Bill of 140 sections.

"But notwithstanding this growth in the size of the law, some important provisions of the Act of 1871 find no place in the Bill. Chapter II of the existing Act is entitled 'Of Settlements,' and describes the various kinds of settlements which may be undertaken—summary settlements, first regular settlements and re-settlements. There is no corresponding chapter in the Bill, and those who study its provisions will find that the phrases 'settlement' and 'Settlement-officer' have been carefully expunged. I gather from what has fallen from my hon'ble colleague in charge of the Bill, and from some paragraphs in the Statement of Objects and Reasons, that this omission implies something more than an alteration of language, and is intended to give expression to an important and salutary policy. It means, as I understand, that the great work of settling the revenue of the country and compiling a Domesday record of the several rights and interests in the land, if not yet completed for the Punjab, is within a measurable distance of completion; that when the settlement of the districts now remaining to be settled has been finished, the work will, it is hoped, have been substantially done once for all; that within a not far distant future revisions of

settlement on the old system will, save under exceptional circumstances, have become things of the past; and that, instead of the tedious, harassing and expensive settlement-operations which have heretofore periodically taken place, an effort will be made to maintain, chiefly through the agency of village-officers, a continuous record of agricultural facts such as will make revision of assessment a comparatively easy and inexpensive task. This is a policy which the Revenue and Agricultural Department of the Government of India have for many years had at heart, and I am glad to see that it has found such significant expression in the Bill now before the Council."

His Excellency THE PRESIDENT said:—"Before putting this Motion, I should like to take the opportunity of expressing, not only on my own behalf but on behalf of all the other members of the Council, our very high appreciation of the exceptionally able manner in which our hon'ble colleague has explained the provisions not only of this Bill but of the previous important measure which he laid before us a meeting or two ago. I am sure that it must be a matter of congratulation to His Honour the Lieutenant-Governor that he should have at his disposal the services of so very capable an officer and colleague."

The Motion was put and agreed to.

The Hon'ble COLONEL DAVIES also moved that the Bill and Statement of Objects and Reasons be published in the *Punjab Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

INDIAN COMPANIES ACT, 1882, AMENDMENT BILL.

The Hon'ble MR. ILBERT moved that the Bill to amend the Indian Companies Act, 1882, be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley, the Hon'ble Mr. Hunter and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

LOWER BURMA GAOLS DELIVERY BILL.

The Hon'ble SIR S. BAYLEY moved that the Bill to make provision for the more speedy trial of certain accused persons in custody in Lower Burma be taken into consideration. He said:—

"I explained the provisions of this Bill at the last meeting of the Council, and I have only now to say that, since then, we have been in telegraphic communication with the Chief Commissioner of Burma, and that he has replied both for himself and for the Judicial Commissioner, whom he consulted. They have both accepted the Bill in the shape in which we have put it, but have asked that there should be introduced into it three amendments. These three amendments are, first, that, instead of making the Bill run to the end of March, we should make it run to the end of June next; secondly, that the period of appeal should be further reduced from 30 to 15 days; and, thirdly, that, with regard to cases which have been heard up to a certain point, the presiding officer, on receiving his new powers under the Bill, should be able to take up such cases at that point and should not be obliged to commence the proceedings *de novo*. Hon'ble members will see from the notices which are on this paper in my name that the first and third of these proposals have been accepted by us. The second one—for the further reduction in the period of appeal—did not commend itself to us, and accordingly we do not propose to make any alteration on that point."

The Motion was put and agreed to.

The Hon'ble SIR S. BAYLEY also moved that the following sub-section be inserted after sub-section (3) of section 3 of the Bill, namely:—

"(4) Proceedings pending before a Magistrate under Chapter XVIII of the Code of Criminal Procedure at the time of the conferment on him of those

powers of a Court of Session may be continued by him under Chapter XXI of that Code as if they had been commenced under the latter Chapter:

"Provided that the accused person may demand that any witness who has given evidence before the conferment of the powers be re-summoned and re-heard."

The Motion was put and agreed to.

The Hon'ble SIR S. BAYLEY also moved that sub-section (4) of section 3 of the Bill be numbered (5).

The Motion was put and agreed to.

The Hon'ble SIR S. BAYLEY also moved that in section 8 of the Bill the words and figures "thirtieth day of June, 1887," be substituted for the words and figures "thirty-first day of March, 1887."

The Motion was put and agreed to.

The Hon'ble SIR S. BAYLEY also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

UPPER BURMA LAWS BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to declare the law in force in Upper Burma. He said:—

"The object of this Bill is to lay the foundation of a system of law for the new province of Upper Burma. The present condition of the law in that Province resembles that which prevailed in the Punjab for several years after its annexation, and which was described by Sir James Stephen when he dealt in this Council with the several measures introduced in 1871 for consolidating and codifying portions of the Punjab law. The civil administration of the country is being conducted under instructions which have been issued by Sir Charles Bernard, and by which civil officers are enjoined, amongst other things, to be guided, as far as possible, by the provisions of the Indian Penal and Procedure Codes, and, in matters relating to succession, inheritance, marriage, caste and religious usages and institutions, to observe the personal law of the parties except in so far as it is modified by local custom, or, in the absence of any such law or custom, to act according to justice, equity and good conscience. It was of course necessary to make immediate arrangements for administering the country, maintaining order and dispensing justice, and it was only by means of such instructions that these arrangements could be made. But the intention was that the instructions should be of a temporary and provisional character, and it is desirable that they should as soon as practicable be superseded by laws more formally enacted and more precisely expressed. The Bill which I am now asking leave to introduce will be the first stage of this process, and will possibly be the only stage that will come before this Council. Upper Burma has been constituted a scheduled district and brought under the operation of the Statute of 1870, which provides for those districts a more summary form of legislation than that conducted through the machinery of the Legislative Council. Consequently, such further laws as are required will take the form either of Regulations framed under the Statute of 1870 or of enactments extended under section 5 of the Scheduled Districts Act. There will be a Civil Procedure Regulation, a Criminal Procedure Regulation, a Revenue Regulation and possibly one or two others; and it may be found desirable hereafter to add to the list of enactments scheduled to the present Bill. I need hardly say that it is not the intention of the Government to force upon the country any artificial, elaborate or unsuitable system of law. No greater body of law will be introduced than is believed to be necessary for the purpose of enabling the officers charged with the administration to understand the limits within which they can safely exercise their powers, and of assisting the people to understand the general character of the law to which they are to be subject; and in adapting Indian law to Burmese requirements care will be taken to study

the real needs and conditions of the country and the customs and usages of the people.

"After this preface I may describe shortly the provisions of the Bill. It begins by defining the Province of Burma as consisting of Upper and Lower Burma—the former being the newly acquired territories, the latter those previously administered by the Chief Commissioner of what has up to the present been known as British Burma. But it adds a power to transfer border tracts from Upper to Lower Burma, and *vice versâ*. The reason for giving this power is that the old boundary was, as may be seen from the map, drawn roughly in a straight line from east to west, disregarding the natural features of the country, and breaking rudely through the old limits of townships and circles; and it would be for the convenience both of the administration and of the people that some of the fragments thus unnaturally severed should be reunited. Then comes a section which declares that in existing enactments references to British Burma must be read as referring to Lower Burma. Then, after a repealing section, to which I will refer hereafter, follows one which enumerates by reference to a schedule the Indian enactments which are to be in force in Upper Burma, and bars the application of other enactments except in pursuance of powers to be hereafter exercised. The passing of these three sections is a necessary preliminary to the legislation contemplated under the Statute of 1870. Regulations under that Statute must be proposed either by a Governor, a Lieutenant-Governor or a Chief Commissioner. But it would be inconvenient to constitute Upper Burma a separate Chief Commissionership, and the effect of placing it immediately under the Chief Commissioner of British Burma as such would be to extend to Upper Burma all the Acts which are expressed to extend to the territories for the time being under the administration of that functionary, and many of which are unsuitable to the conditions of the upper part of the province. At present there is no Chief Commissioner for the province as a whole or for the upper part of the province separately. Sir Charles Bernard is Chief Commissioner for the lower part of the province, and he is, as I understand, Agent for the Governor General without any distinctive appellation in the upper part of the Province. Before a Chief Commissioner for the whole province is appointed we propose to make it quite clear that the appointment will not involve any inconvenient legislative consequences. The schedule of the Indian enactments which are to be applied to Upper Burma has been prepared by the local authorities, and is based on the schedule of Acts declared to be in force in the Arakan Hill District, but with such differences as the circumstances of Upper Burma seem to require. Power is given by the Bill to withdraw any enactment if it is found to be unnecessary or unsuitable. I ought to add that the schedule consists of two parts—one enumerating the Acts which are to apply to Upper Burma generally, and the other specifying a few Acts the application of which is to be confined to the district of Mandalay.

"The only material modifications which it is proposed to make in the enactments scheduled for application are specified in section 6 of the Bill. They are three in number, and the only one of them to which I need refer is that which extends the number of cases in which whipping may be inflicted as a punishment. The Local Administration considers this extension necessary in the present state of the country, both because of the scarcity of jails, and because the crimes of violence with which justice has mainly to contend can be more effectually and suitably visited by corporal punishment, with or without a short term of imprisonment, than by imprisonment for a lengthened period. The infliction of the punishment is, as in the measure which has just been passed for the disturbed districts of Lower Burma, made subject to the conditions and exemptions laid down by sections 390 to 395 of the Criminal Procedure Code. I have said that all the material modifications proposed to be made in the applied enactments are specified in the Bill; but of course when Acts passed for one part of the country are applied to another, the language employed and machinery indicated will not always precisely fit. To go through each of the scheduled Acts and specify in detail the verbal modifications which must be made in order to adapt it to Upper

Burma would be a work of considerable labour and doubtful utility; and I think the necessities of the case will be met by a section which I have borrowed from one of the Orders in Council recently passed by Her Majesty under the Foreign Jurisdiction Acts, and which directs the Courts to construe the enactments applied with such alterations not affecting the substance as may be necessary or proper to adapt them to the matter before the Court.

"I referred previously to the repealing section. It repeals certain enactments relating to frontier posts and transit dues which have been made unnecessary by the abolition of the old frontier.

"The only other provisions of the Bill consist of two confirming sections. The first contains an indemnity in the usual form for acts done by officers of Government or persons acting under their authority since the date at which British troops entered Upper Burma; and the other declares that Sir Charles Bernard's instructions to local officers are to have the force of law until they are superseded by more regular enactments.

"The Bill will be sent to Sir Charles Bernard and his officers, and will not be passed until we have received their criticisms upon it."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Council adjourned to Wednesday, the 28th July, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

SIMLA;

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 14th JULY, 1886.

GENERAL REMARKS.—Except in the Mooltan and Dera Ismail Khan districts of the Punjab and in Sind, rain has been general, and in most places abundant, during the week under notice.

The season continues favourable in Madras, Mysore, and Coorg, and the standing crops are in fair condition.

In parts of Bombay more rain would be beneficial. *Kharif* sowings are in active progress in that Presidency and in the North-Western Provinces and Oudh, the Central Provinces, Berar, and Rajputana. Where sowings have been completed, the young plants generally promise well. More rain is wanted in the western districts of the Punjab.

Prospects continue very favourable in Bengal, though some injury has been caused by floods in Behar. In Assam floods have also done harm in the Surma Valley districts, but in other respects the season promises well.

In British Burma ploughing, sowing, and transplanting of rice are in progress.

The public health remains generally good in all Provinces.

Prices are stationary, except in the Mooltan and Dera Ismail Khan districts of the Punjab, where they are rising, and in the Delhi district, where they are fluctuating.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 14th)		
Bellary . .	Average last week since revised, ·09; this week, ·31. Average 1·26	Standing crops generally good, but young plants damaged by insects in parts of two taluks; harvest second crop paddy, yield about average. Cattle-disease in two taluks.
Kurnool . .	Average last week since revised, 1·50; this week, ·150. Average 2·31	Small-pox and cattle-disease in three taluks.
Ganjam . .		Fever in two and small-pox in three taluks; cattle-disease in one; cholera exists.
Kistna . . .	Average 1·88	River 4·85 feet water over anicut. Slight small-pox and fever; cholera in two taluks.
Chingleput (Madras) .	Average 1·54	Standing crops good; harvest paddy, outturn below average. Fever in one taluk and cattle-disease in another.
Coimbatore . .		Standing crops good, but *cholum* damaged by insects in parts of one taluk, and some dry crops want rain in two taluks; harvest *Cholum* and *cumbu*, outturn *cholum* about average, *cumbu* above average. Fever in one taluk and cattle-disease in another.
Tanjore . .	Average 1·60	Standing crops generally good; harvest paddy, gingelly, and tobacco, outturn below average. Cattle-disease in one taluk.
Madura . . .	Average last week since revised, ·87; this week, 1·30. Average 3·10	Health of people and cattle generally good.
Malabar . .		First crop paddy slightly affected by unseasonable rain. Fever in one and slight small-pox in seven taluks; cholera in one taluk.
Travancore . .	1·33	Paddy plants good. Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(July 14th)		
Kurrachee . .	Slight rain on 13th; average during week in district, ·05.	Weather cloudy and warm. More rain expected. River at Kotri on 12th, 17 feet 5 inches against 17 feet 3 inches on same date last year. Rice transplanting continues; *kharif* crops greatly injured by *kottoki* turtle in Ghorabari taluka. Fever in six and cattle-disease in three talukas; no fresh case of small-pox, two recovered, one remaining.
Hyderabad . .	Storm accompanied by drizzling rain in Hyderabad on 12th; slight rain also in Gadag on 8th.	*Kharif* cultivation in progress. River at Kotri on 12th, 17 feet 5 inches against 17 feet 2 inches on same date last year. Severe duststorm. Fever and small-pox in Hyderabad taluka. Wheat 25½, *bajri* 37½, *juari* 40, white rice 10, and red rice 30 pounds per rupee. Weather close and sultry and indicating rain.
Ahmedabad . .	[illegible] 10·82, maximum at Ahmedabad, 6·30, minimum at Viramgaum, ·06. ·50; total 13·83	Young crop doing well; transplantation of rice begun. Public health good. Wheat 35 and *bajri* 32 pounds per rupee.
Baroda . .		Public health good. Sowing operations continue. *Bajri* 30, wheat 22, and rice 18 pounds per rupee.
Surat . . .	Rain in all talukas; maximum at Jalalpur, 4·09; minimum at Surat, ·54.	In Bardoli and Chorasi talukas crops are being resown, where damaged by excessive rain; in other talukas sowing operations in progress. Fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 40 pounds per rupee.
Nasik . . .	Igatpuri, 11·21; Dindori, 1·80; Niphad, 1·13; Peint, 1·03; maximum at Baglan, ·70; minimum at Kalvan, ·02.	More rain wanted in Chandori, Niphad, and Yeola, where *kharif* sowing is retarded; preparations for *kharif* sowing continue in other talukas; young plants of minor or early crops, *udid*, *mug*, &c., doing well; transplantation commenced in Igatpuri and Peint. Public health good throughout the district. Wheat 30¾, *bajri* 31, and rice 17¾ pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) .	Rain every day, heavy from 10th to 13th; total of week 18·33; total to date 66·93, being 36·43, above average.	Average abnormal temperature 2° warm from 7th to 9th, 3° cool from 10th to 12th, and 1° cool on 13th; vapour in air excessive from 7th to 9th, afterwards normal; abnormal wind from north-east from 7th to 12th and from north-west on 13th; thunder on 7th.
Poona . . .	Rain in six talukas, and slight showers in Khed, Purandhar Petha, Baramali, and Poona City; maximum at Naval, 2·10; minimum at Khed, ·13.	Young crops, where grown, are doing well; sowing retarded in parts of Khed and Sirur talukas for want of sufficient moisture; more rain wanted in Junnar, Khed, Sirur, and Bhimthadi talukas. Public health generally good; cattle-disease in Junnar and Haveli talukas. *Bajri* 34 and *juari* 36 pounds in the district, and *bajri* 32 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar . .	Kopargaon, 1·68; Parner, ·70; Akola, ·60; Sangamner, ·54; from ·08 to ·45 in remaining talukas.	*Kharif* sowing in progress throughout the district. Public health good. *Bajri*—maximum 60 pounds and minimum 36, *juari*—maximum 90 and minimum 48 pounds per rupee.
Sholapur . .	Sholapur, 1·05; Barsi, ·39; Madha, 1·51; Karmala, ·33; Pandharpur, 1·07; Sangola, ·12; Malsiras, ·77.	*Kharif* sowing operations in progress throughout the district. More rain required in the Sangola and Malsiras talukas. *Juari* 58½ and *bajri* 40½ pounds per rupee.
Dharwar . .	Maximum—Navalgund, 5·91; Hangal, 2·65; Ron, 2·55; Kalghatgi, 2·07; Gadag, 1·12; Nargund, ·70; Dharwar and Mugud, nearly ·50; Mundargi, ·66; Hubli and Ron, ·30; Ranibennur, ·15; Karajgi and Bankapur, ·05.	Young rice crops good, but require heavy rain; more rain required for sowing early *juari* in all the black soil talukas, except Ron and Gadag, where it has already commenced, and Nargund, where sufficient rain has fallen, and sowing will be commenced, shortly. Public health good. Rice 23 and *juari* 50 pounds per rupee.
Kanara . .	Karwar, 16·91; Kumpta, 1·79; Sirsi, ·85; Haliyal, ·58; total 72·21.	Transplanting and weeding operations continue. Anthrax in Supa Petha, other cattle-disease in Akola, Kumpta and Sirsi; slight small-pox in two talukas. Common rice at Karwar 14, district average 13 seers per rupee.
Rajkot . . .	3·49	Weather cloudy. General health good. Wheat 34, *bajri* 30, and *juari* 43 pounds per rupee.
		General Remarks.—More or less rain throughout the Presidency, more still wanted in parts of the Deccan and of the Belgaum and Dharwar districts. Young crops somewhat injured by insects in parts of Kaira and Bijapur, and by *kottoki* turtle in Kurrachee. Fever and cattle-disease in parts of seven and small-pox in parts of four districts.
Bengal—(July 13th)		
Chittagong . .	9·56	Weather seasonable. Prospects of crops fair. Prices stationary. Public health good.
Dacca . . .	6·92	Harvesting of *aus* paddy going on; *amun* and jute thriving; transplanting commenced. Public health good.
24-Pergunnahs (Calcutta).	5·85	Prospects of early rice, jute, and sugarcane satisfactory; transplanting of *amun* progressing. Public health generally good.
Moorshedabad . .	4·33	Copious rain. Weather seasonable. All prospects good; transplanting of late rice progressing well; *bhadoi* rice doing well in some places; early *bhadoi* has been cut; indigo and silk suffering from excessive rain. Public health good.
Burdwan . .	4·71	Prospects of crops good. Public health good.
Bhagalpur . .	2·35	In two northern subdivisions excessive rain causes anxiety for *marua* crops and for rice in low lands; elsewhere prospects excellent.
Purneah . .	4·31	Prospects of crops excellent; *bhadoi* harvest has begun in north. Public health good.
Patna . . .	6·82	*Bhadoi* sowings in full progress; standing crops in good condition; *juari* and *rabar* also being sown. Public health generally good.
Durbhunga . .	5·32	Fair weather for last three days has given impetus to *bhadoi* cultivation; transplanting of *marua* and paddy going on in places. Prices stationary. Cholera still reported from Madhubani, otherwise public health good.
Hazaribagh . .	0·90	Weather seasonable. Agricultural prospects favourable; all crops doing well. General health good.
Cuttack . . .	1·77	Weather cloudy. *Beali* rice being weeded; *sarad* rice growing well. Price of rice unchanged. Public health generally good; sporadic cases of cholera reported.
Midnapore . .	2·1	Prospects of crops and public health good.
Khoolna . .	1·84	Weather cloudy. *Aus* rice growing well; ploughing, sowing, and transplanting of *amun* rice continue. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Rungpore . .	3·0	Prospects of crops good; *aman* being transplanted; harvesting of *aus* progressing. Public health good.
Dinagepore . .	6·19	Weather favourable. Prospects of crops good; transplanting of late rice commenced. Cattle-disease reported from three thanas.
Pubna (Serajgunge) .	4·48	Crops doing well; *til* being reaped. Public health good.
Gya . .	3·62	Ploughing active; crops sown doing well. Prices moderate. Fever prevalent.
Chumparun . .	5·44	*Bhadoi* sowings nearly completed; *aghani* sowings in progress. Prices stationary. Public health fair.
		General Remarks.—General and heavy rain during week, excepting in Orissa and Chota Nagpur, where it was comparatively light; in Behar excessive rain has caused some damage to crops in places, otherwise general prospects very favourable. *Aus* rice, jute, and sugarcane promising; transplanting of *aman* rice proceeding well. Public health generally good. Price of rice remains almost stationary.
N.-W. Provinces and Oudh —(July 15th)		
Benares (July 12th)	At Sadr, 9·50	The rain is beneficial to rice, but damaging small grains. Prices steady. Supplies ample. Health good.
Gorakhpore („ „)	At Sadr, 6·40	Weather cloudy. Prices slightly rising. Health fair.
Fyzabad („ 13th)	*Nil*	Weather clear. Prospects of crops good. Prices steady. General health good.
Lucknow („ 12th)	Average 1·90	Crops being sown. Supplies sufficient. Prices steady. Public health good; cattle doing well.
Rae Bareli („ „)	At Sadr, 1·60	Cultivators actively engaged in agricultural operations. Supplies ample. Prices steady. General health fair.

Allahabad („ „)	Varying from 3·0 to 11·0; heaviest in Trans-Jumna district, average 6·70.	Weather seasonable. Ploughing and sowing in progress. Markets well supplied. Prices show a slight rise. Health good.
Cawnpore („ „)	In all parganas from 1·60 to 9·40.	Weather cloudy. Ploughing and sowing in progress. Prices stationary. Condition of people and cattle generally good; a little cholera in city and cantonments.
Banda („ 12th)	Good and general rain.	Sowings in progress; early sowings germinating. Prices stationary. Public health good; cattle-disease in three villages.
Farakhabad(„ 13th)	Averaging 3·10	Weather now clear. *Kharif* crops progressing. No sickness.
Sitapur („ „)	An average of 2·70 rain has fallen throughout the district.	At present the weather is clear and fine, and prospects are favourable.
Bareilly („ „)	Rain in all tahsils, varying from 1·10 to 7·0.	Sufficient rain for rice sowings. Prices slightly falling. Easterly wind.
Ballia („ „)	Average 4·20	*Kharif* operations in progress. Prices steady. No disease.
Kumaon („ „)	Rain occasionally	*Kharif* crops making good progress. Prices stationary. General health fair; typhoid and measles in district; cattle-disease prevails in parts.
Agra („ 12th)	Rain in all parganas, ·10 to 7·30.	*Kharif* ploughings and sowings continue. Prices steady. Health good.
Jhansi („ „)	Rain in all tahsils varying from 5·50 to 10·80.	Sowings in active progress. Prices rising. Health of people good; slight cattle-disease.
Meerut („ 13th)	1·50 to 4·90	General character of season favourable. Prices steady. Health good.
		General Remarks.—Heavy rain has fallen during the week, and in some places threatens to be excessive. Ploughing and sowing in progress everywhere. Markets well supplied and prices generally steady. Public health fair.
Punjab—(July 13th)		
Hissar . .	2·80	Health good. Prices nearly stationary.
Delhi . .	4·49	Health good. Prices fluctuating.
Umballa . .	4·02	Health fair. Prices stationary.
Jullundur . .	1·50	Health good. Prices stationary.
Ferozepore . .	·10	Health good. Prices stationary.
Amritsar . .	·50	Health good. Prices stationary.
Sialkot . .	1·50	Health good. Prices stationary.
Lahore . .	·10	Health good. Prices almost stationary.
Mooltan . .	*Nil*	Health good. Prices rising.
Rawalpindi . .	·80	Health good. Prices stationary.
Shahpur . .	Rain throughout the district.	Health good. Prices stationary.
Dera Ismail Khan .	*Nil*	Prices rising.
Peshawar . .	·10	Health good. Prices—*juari* and wheat rising, other grains stationary.
		General Remarks.—Rain has fallen in all districts, except Mooltan and Dera Ismail Khan; more rain much wanted in the Peshawar district. General health good, but some small-pox in the Dera Ismail Khan City. Prices rising in Mooltan and Dera Ismail Khan districts, fluctuating in Delhi district; elsewhere stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(July 14th)		
Nagpur . .	4·20	Weather cloudy and rainy. Prospects good. Slight small-pox. Prices risen slightly.
Jubbulpore . .	3·93	Sowings well advanced. Health good. Prices steady.
Saugor (July 13th)	2·11	Good rain for sowing. Fever continues. Prices steady.
Seoni . . .	5·32	Weather cloudy and warm. Sowings in progress. Slight small-pox. Prices steady.
Hoshangabad . .	4·21, showers daily	Ploughing and sowing in progress. Slight small-pox. Prices steady.
Khandwa . .	1·17	Break seems to have set in. Sowings in progress. Health fair. Prices stationary.
Raipur . . .	Several heavy showers	Sowings nearly finished. Cholera severe in Simoga tahsil. Prices steady.
Sambalpur (July 10th)	3·16	Weather rainy and bright alternately. Sowings in progress; sugarcane doing well. Health good.
		General Remarks.—Good rain reported from all districts. Sowings progressing favourably. Cholera in Raipur and fever in Saugor. Prices steady.
British Burma—(July 14th)		
Akyab . . .	11·06; total rainfall 51·29.	Public health good; slight cattle-disease. Ploughing progressing.
Bassein . . .	4·80; total rainfall 39·03.	Public health good; cattle-disese severe in two townships. Ploughing nearly completed.
Rangoon . .	5·89; total rainfall 47·47.	Public health good; cattle-healthy.
Amherst (Moulmein) .	7·94; total rainfall 63·24.	Public health good; cattle-disease reported. Ploughing and transplanting progressing.
Pegu . .	6·75; total rainfall 48·14.	Public health good; cattle-disease in one circle. Ploughing and sowing progressing throughout district.
Henzada . .	3·48; total rainfall 35·26.	A few deaths from cholera in one township; cattle-disease slight in three townships. Ploughing progressing; transplanting commenced.
Prome . . .	0·53; total rainfall 16·10.	Public health good; cattle-disease very severe in one township. Ploughing and sowing progressing.
Tounghoo . .	4·59; total rainfall 30·01.	Public health good; cattle healthy. Ploughing progressing.
Thayetmyo . .	0·43; total rainfall 13·54.	Public health good; cattle healthy. Ploughing continues.
		General Remarks.—Slight cholera in one township of Thongwa district, elsewhere public health good; cattle-disease severe in Prome and Bassein districts, and slight in parts of nine districts. Ploughing, sowing, and transplanting of seedlings progressing in all districts. More rain wanted in certain parts of Prome district.
Assam—(July 14th)		
Gauhati . .	·20 during week ending 13th instant.	Weather hot. General health fair; cattle-disease in some mouzahs. Transplantion of *sali* in progress in some parts; *ahu* is almost under water.
Sylhet . .	10·94	Damage to *amun* and *aus* by flood reported from Karimganj and South Sylhet subdivisions; some damage is also apprehended in the Sadr subdivision.
Cachar . .	5·75	Weather last three days warm. River going down. The flood caused much damage to *aus* and *asra* crops; cultivation for *sali* crops stopped on account of flood. Cattle-disease has appeared in many places. Common rice 14 seers per rupee. Six deaths from cholera from Hailakandi and two from Cachar reported.
Dibrugarh . .	2·06	Weather seasonable. Transplanting of *sali dhan* continues. District healthy.
Mysore and Coorg—(July 14th)		
Bangalore . .	Rain has been general throughout the State; at Civil and Military Station, 2·71; Bangalore district, 2·46; Mysore, 2·62; Kolar, 1·75.	Standing crops in good condition; prospects of season favourable. Public health generally good. No material change in prices.
Mysore . .		
Mercara . .	11·59	Transplanting of rice commenced; crops in good condition.
Berar and Hyderabad—(July 14th)		
Amraoti . .	2·07	Weather rainy. *Kharif* sowings almost completed; cotton plants in healthy condition. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	·43	Cotton and *juari* plants in good condition.
Hyderabad . .	Average 2·31; total since 1st January 15·82.	*Kharif* and *rabi* sowings continue. Tanks in general have received no water yet, except those in Shahabad taluka. General health fair. Prices—wheat 14, coarse rice 11, white *juar* 21½, yellow *juar* 22, and *tur* 15½ seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(July 14th)		
Indore	·09; total rainfall 10·79.	Health good.
Morar (Gwalior)	·41; total rainfall 11·33.	Health good.
Neemuch	·11	More rain wanted. Weather very warm. Health good
Goona	·43	More rain required. Health good.
Sutna	2·30	Health good.
Agar	·09	Health and prospects good.
Schore	5·30	Weather seasonable. Health good.
Nowgong	4·61; total rainfall 9·63.	Rainfall, though not very copious, has been opportune and beneficial. Agricultural prospects excellent. Health good.
Rajputana—(July 14th)		
Abu (July 14th)	·50; total from May 15·50, 12·34.	Weather seasonable, but warm and sultry.
Sirohi („ 11th)	·10	Tanks full; wells goods. Health good. Crops good. Weather warm and cloudy.
Marwar („ 9th)	·60	A year's water in Jodhpur City tanks. Health good. Sowings over; *jinari* crop, thriving. Weather cloudy and less warm. Prices stationary.
Kherwara („ 11th)	1·01	Tanks and wells fairly full. Crops flourishing. Health good; slight small-pox. Prices slightly falling. Weather seasonable.
Meywar („ 10th)	·25	Tanks and wells filling. Crops good. Health good. Prices falling. Weather clear for some days past, latterly cloudy.
Pertabgarh („ „)	·09	Health good. Weather occasionally cloudy.
Harowti („ „)	Deoli, 2·07; Tonk, ·32; Shahpur, 1·59.	Weather seasonable. Health good. Rain wanted.
Jhallawar („ 9th)	2·14	Weather cloudy.
Kotah („ 10th)	1·12; previous week, 3·03.	Health good. Weather cloudy.
Ajmere („ 13th)	*Nil*	Fever and cattle-disease in Todgurh. Heat excessive. Ploughing operations continue.
Kerowlee („ 10th)	·91	Tanks and wells filling. Prospects good; sowing progressing. Health good. Prices stationary. More rain wanted.
Dholepore („ 7th)	3·84	Tanks and wells filling. Sowings progressing. Health good. Prices steady.
Bhurtpore („ 11th)	4·03	Tanks and wells full. Ploughing progressing; sowings commenced. Health good. Prices steady.
Ulwur („ 13th)	3·43	Health good; slight fever. Prices steady.
Bickanir („ 10th)	1·59	Good rain in many districts. Sowings continue. Tanks and wells filling. Small-pox and fever prevalent. Prices rising. Weather cloudy.
Nepal—(July 8th)		
Katmandu (July 7th)	2·70	Weather seasonable. State and prospects of the crops good.

C. J. LYALL,
Officiating Secretary to the Government of India.

N.B.—As regards the figures in column "*Total Receipts from 1st April to date*," audited figures have been used, as far as possible.

(*a*) Return not received.
(*b*) Total receipts from 1st April to 13th June 1885.
(*c*) Total receipts from 1st April to 12th June 1886.

SIMLA,
The 14th July, 1886.

FRED. FIREBRACE, *Major, R.E.,*
Under Secretary.

Printed and published by the Government of India at the Government Central Branch Press, Simla.

SUPPLEMENT TO

The Gazette of India.

No. 30.] CALCUTTA, SATURDAY, JULY 24, 1886.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

THE EFFECT OF A LOW RATE OF EXCHANGE ON THE INDIAN EXPORT TRADE.

No. 2107, dated Simla, 21st July, 1886.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

A Note by Mr. J. E. O'Conor on the effect of a low rate of exchange on the Indian export trade.

RESOLUTION.—This Note will form a section of the forthcoming Review of the Trade of India for 1885-86, but may be conveniently published in separate form for general information.

ORDER.—Ordered accordingly that the Note be published in the Supplement to the *Gazette of India*.

NOTE ON THE EFFECT OF A LOW RATE OF EXCHANGE ON THE INDIAN EXPORT TRADE.

IT has been so often stated recently that a low exchange is a benefit to India by stimulating trade, that it is desirable to examine the statement closely, and to ascertain how far it is in accordance with the facts. The argument briefly stated is this: A low exchange gives the exporter a larger number of rupees in exchange for the sterling price of his merchandise: he is therefore able to sell more cheaply in the consuming market and thus stimulates consumption there: he is also able to give a better price to the cultivator in India and thus stimulates production here. It has also been argued by some that while exports are stimulated and increased by a fall in exchange, imports are correspondingly restricted because a low rate of exchange requires that a larger number of rupees must be given for the sterling value of the goods imported.

2. It is proposed to prove in this paper that these arguments leave out of sight important factors affecting trade in a greater degree than exchange; that the arguments are not sound in principle and are also opposed to the facts; that, though the exporter is certainly able to sell his goods more cheaply in the consuming markets, this cheapness has not actually had the effect of specially stimulating exports; that the exporter does not actually receive a larger rupee return now for his goods than he did when exchange was higher; that consequently he cannot and does not give a better return to the cultivator; and, therefore, has not specially stimulated production; that the import trade could not be restricted while the export trade was stimulated, for that both must increase or decrease in the same ratio, unless the country is increasing its debt to other countries; that the fall of prices in imported goods having much exceeded the fall in exchange there has been no such increase in their cost as to restrict

consumption, and that in fact there has been no restriction; that the low exchange has really operated merely to counteract partially the loss to Indian trade resulting from low prices; that the export trade has not made such progress since exchange began to fall quickly and heavily (that is, during the last three years) as in previous years when exchange was higher and more stable; that if the trade has not actually fallen off and has even made some though relatively slow progress, the fact is to be attributed to the extension of railways, to the completion on the main lines of through communication with the ports, to the reduction of railway rates and sea freights, and to good seasons in India.

3. The conclusion which is indicated from a consideration of all the facts is that, as the heavy fall in prices, or at any rate great part of the fall, and the low exchange, are both of them the outcome of the one cause, namely the appreciation of gold, an increase in the rate of exchange would be accompanied by a corresponding rise in gold prices, and that no restriction of the Indian export trade would result from a recovery in the rate of exchange.

4. It must be clear that, assuming all other factors in the regulation of prices and profits to remain unaffected, a low rate of exchange between India and England would work thus:

On the one hand a larger number of rupees would be obtained for the sterling price of goods exported.

On the other hand a larger number of rupees would be required for the sterling price of goods imported.

That is, while the return from the exports increases, say, ten per cent, the imports for the purchase of which the exports were shipped also increases in price by the same amount.

There is no special profit to the exporter in such a state of things, and there cannot possibly be such profit as to give a great stimulus to exports unless the price of the goods imported is diminished or not increased while the value of the exports increases.

5. The gold prices of imports into India have certainly fallen and the consumer obtains them more cheaply. If then the gold prices of exports had not fallen or if they had increased, the decline in exchange would undoubtedly have stimulated trade by making it extremely profitable, the country buying cheaply and selling dearly. But in fact the gold prices in other countries of the goods which we export in payment for what we receive have not only not increased but have fallen in quite as great proportion as the goods imported, if not in greater proportion. There has been a general fall of gold prices both in imports and in exports, and the fall in the London markets of the values of Indian produce has been so great that, notwithstanding the fall in exchange, it has certainly not been possible for the exporter to give a higher price to the producer.

Prices of wheat.

6. As so much attention has been given to the wheat trade, we may consider first the prices of wheat. The average price of wheat in the London

market in 1885 was 31·67 per cent less than the average price of 1870, the average of the last three years (1883 to 1885) being 27 per cent less than the average of the 13 years from 1870 to 1882 (see table of prices on page xx). In Calcutta the average price for the last three years has been Rs. 2-7-4, and the average of the previous twelve years was Rs. 3-2-7. As the exporter has actually been paying 22 per cent less for his wheat it is clear that he cannot have given the cultivator better prices than formerly as is alleged.

In Bombay the average price of the last three periods given was Rs. 26 the kandi, while in the previous 14 years the average was Rs. 32-15-10, so that the exporter on that side of India also has been giving 21 per cent less for his wheat and cannot have given better prices to the cultivator than formerly.

At no time since 1871 was wheat so cheap in Calcutta as in 1884 and 1885, and in Bombay wheat was never so cheap as in 1885. The price there has slightly risen since, but it is still lower than in any year since 1870, with three exceptions, as will be seen from the prices quoted below:

Calcutta.							*Bombay.*						
			Rs.	A.	P.				Rs.	A.	P.	
5th December	1871	.	2	10	0	per maund.	January	1870	.	38	12	0	per kandy.

3rd „	1883	.	2	10	6	„	„	1882	.	27	8	0	„
8th „	1884	.	2	4	0	„	„	1883	.	30	0	0	„
14th „	1885	.	2	7	6	„	„	1884	.	28	0	0	„
							„	1885	.	22	8	0	„
							„	1886	.	27	8	0	„

If prices had not fallen so heavily in England, the rupee return for wheat would, with a falling rate of exchange, certainly have been larger than before, and it could have been said with perfect accuracy that the low rate of exchange had stimulated trade. The rupee outturn for wheat has however not increased: it has actually diminished. Thus in January 1882 with exchange

at over 1*s.* 8*d.* and the price of wheat at 45·5*s.* a quarter, 1,000 tons of Indian wheat which in Calcutta the previous month cost Rs. 85,070 at Rs. 3-2 the maund, returned £10,616 = Rs. 1,27,272. In January 1886, 1,069 tons of wheat, which had cost in Calcutta the previous month, at Rs. 2-7-6 per maund, Rs. 67,205, returned £7,175 = Rs. 95,826, the price being 30·75*s.* the quarter, and exchange at under 1*s.* 6*d.* In the first case the difference between cost and selling price of 1,069 tons was Rs. 42,202; in the second case the difference was only Rs. 28,621.* The rupee return in the first case was at the rate of 49½ per cent on cost, in the last case at the rate of only 12½ per cent. If the price in Calcutta had not fallen from Rs. 3-2-0 to Rs. 2-7-6, the return for Rs. 85,070 would have been only Rs. 95,826, which makes a return of not more than 12½ per cent. Of course if prices in India and exchange had not fallen with prices in London the results would have been disastrous to trade. The table appended, page xxi, shews the position each year since the end of 1881. It is, briefly, that in the period between December 1881 and December 1885 the price of wheat in Calcutta fell 21 per cent, in London it fell 32 per cent, while the fall in exchange was only 11¼ per cent. Whatever profit therefore might have been made by reason of the fall in exchange was cancelled by a fall in prices in London far exceeding the fall in exchange; and ruinous loss to the exporter, and cessation of trade have only been prevented by a fall of prices in Calcutta.

7. If, then, there have in fact been increased profits and a consequent stimulus to trade as alleged, the causes of such stimulus and profits must, it is evident, be sought for elsewhere than in the condition of exchange. These causes will be considered separately further on. At present it is sufficient to draw attention to the fact indicated by the figures given, that the wheat trade has not been stimulated by exchange; that the rupee return is smaller because sterling prices have fallen greatly in excess of the fall in exchange; and that certainly the cultivator has not only not received a higher price for his produce, but has actually obtained less, because it was necessary for the exporter to give him less if trade was to be continued at all.

Prices of other exports.

8. The argument about the stimulus to the export trade has been used in such close and frequent connection with the wheat trade, though it is meant to apply to all trade, that the facts about wheat have been employed first in order to test the validity of the argument. Let us now see whether the other staples of the export trade give any greater support to the argument than wheat has done.

9. The tables of prices and exchange appended (pages xix, xx, and xxiii) shew that the average rate of exchange in 1872-73 was 22·81*d.* and in 1885-86 18·25*d.*, the difference being almost exactly 20 per cent. Bar silver in London was quoted at 59·75*d.* the ounce in March 1873 and at 46·93*d.* in December 1885,

* It should be noted here that this calculation ignores all the other factors which contribute to determine the conditions under which wheat can be profitably exported to England from India. It is intended to shew simply that looking at actual prices in England and Calcutta, the fall in exchange has not made the profit of the exporter.

the difference being 21½ per cent. Prices in London of produce of the kind exported from India in the same period shew a fall in price as under:

Wheat	33·7	per cent.
Wool	53·3	„
Sugar	51·6	„
Coffee	42·2	„
Saltpetre	7·5	„
Tea	34	„
Jute	17·4	„
Linseed	29·3	„
Rapeseed	43·2	„
Rice (Bengal)	18·4	„
Silk (Surdah)	40·6	„
Shell lac (orange)	62·6	„
Indigo	26·2	„ (rise, not fall).
Cotton	38·6	„

These are the goods that comprise the bulk of our export trade. Except in the case of indigo (and saltpetre which is an unimportant trade) the list proves that the fall of exchange has been neutralised by a heavier fall in prices. As regards indigo it is important to note that it is an exceptional article, substantially almost a monopoly; that the price is regulated entirely by the crop in India; and that the high prices of 1885 coincided with an extremely small export, the trade having in fact fallen greatly in the last three years. It is always subject to great fluctuations dependent on the crops, and prices in the consuming market are regulated by the abundance or deficiency of the supply from India. As the trade has actually fallen off, this article will probably not be taken by anybody as an illustration of the prosperity to trade caused by low exchange. Nor can anybody who knows the conditions of the trade contend that the exports of jute have been unusually stimulated during the last few years, or that the trade has been unusually profitable. The rice trade recovered last year after the two most depressed export seasons known for years, and the quantity exported did not equal the quantity exported in 1881-82.

The tables on pages xvi and xvii further shew that prices of most of the great export staples have fallen in Calcutta and Bombay also, though not to such an extent as in London. We find prices in Calcutta to be as follows in January 1886 compared with March 1873*:

Wheat	— 26	per cent.
Linseed	+ 1	„
Rapeseed	— 21	„
Hides	— 13	„
Indigo	+ 7	„
Jute	+ 18	„
Gunny bags	— 15	„
Lac (shell)	— 41	„
Rice (Calcutta)	+ 30	„
Rice (in Rangoon)	+15·2	„
Silk (Surdah)	— 21	„
Tea	— 10	„
Saltpetre	— 21	„

It will be noted that only rice and the two very exceptional articles already referred to—indigo and jute—have increased materially in price, an increase dependent on special circumstances. The price of rice has temporarily

* These are prices at the port of shipment of articles constituting the bulk of the export trade. They fluctuate a good deal from year to year in sympathy with prices in the London markets and the condition of local supply in the export market. But it should be borne in mind that they do not afford a fair or satisfactory test of the general level and range of prices in the interior of India, and that no argument in regard to the value of silver in India can properly be based upon them.

risen to a high point owing to failure of crops in Bengal. The price of Burma rice, which constitutes the bulk of our exports of that grain, has risen in the same period in only half that proportion, namely 15 per cent. It is well known that for the last two or three years the exporters of rice have lost heavily.

10. The facts so far afford little support to the argument that the low rate of exchange has stimulated production and trade by enabling the exporter to get a larger return for his exported produce and therefore to pay higher prices to the cultivator. The exporter does not receive a larger return, for prices have fallen in the English markets in a greater ratio than exchange; on the other hand the corresponding fall in prices at the ports in this country has not been so great as in the English markets. The case may be stated roughly somewhat in this style:

Price in India, say 10 per cent less.
Price in London, say 30 per cent less.
Loss by fall of price, 20 per cent.
Gain by exchange, 20 per cent.

The merchant therefore practically stands where he did, the cultivator being apparently slightly worse off. (He is not really worse off, but this will be treated of further on.) If, then, the rate of exchange were the only factor in the situation, it is clear that it has had no appreciable effect on the alleged stimulus to trade.

Progress of trade: there has been no stimulus as alleged.

11. Let us now see whether there has in fact been a stimulus to trade, and if so to what cause or causes it is to be attributed.

The tables appended (pages ii to xv) give the trade year by year in the principal imports and exports for the last ten years, and shew the percentage of increase and decrease in quantity and value, year by year. The table on page i gives the aggregate imports and exports of India for the last 27 years, which years I have divided into nine periods of three years each, giving the average trade in each period. On examination of the figures of the exports it will be found that trade developed at an enormous rate of progress in the three years following 1861-62, the annual rate of increase being more than 28 per cent. This marked progress resulted from the phenomenal increase in the price of Indian cotton caused by the War of Secession in the United States. With the end of that war the prices of cotton were gradually reduced, and in the three years following 1864-65, the export trade shews a decline in consequence of the fall of price in cotton and of the great famine of 1866. The export trade after this period increased irregularly but constantly, and we find the rate of increase since 1873 (when exchange began the fall which has since continued) to be as follows:

1874-75 to 1876-77	2·91 per cent. (Exchange 21·45*d.*)
1877-78 to 1879-80	9·97 per cent. (Exchange 20·18*d.*)
1880-81 to 1882-83	20·84 per cent. (Exchange 19·78*d.*)
1883-84 to 1885-86	6·47 per cent. (Exchange 19·03*d.*)

Now, let us look at the aggregate value from year to year of the exports of Indian goods, and see whether our exports have increased, as the Lords of the Treasury in their recent letter to the India Office on the silver question affirm, by leaps and bounds. The figures for the last ten years are as follows:

	Value.	Yearly increase or decrease.		Value.	Yearly increase or decrease.
	Rs.			Rs.	
1876-77 ...	58,93,00,693		1881-82 ...	79,25,52,431	+10·1%
1877-78 ...	63,14,35,332	+ 7·1%	1882-83 ...	80,59,81,554	+ 1·7%
1878-79 ...	58,70,79,285	— 7 %	1883-84 ...	85,08,57,205	+ 5·6%
1879-80 ...	64,95,08,331	+10·6%	1884-85 ...	80,31,32,079	— 5·6%
1880-81 ...	71,97,40,678	+10·8%	1885-86 ...	80,71,72,592	+ 0·5%

It will be seen at a glance that there is no basis in fact for the statement. The export trade increased largely after the cessation of the famine of 1877-79, the progress continuing for three years, but since 1881-82 it has remained almost stationary. But, according to the statement that a low rate of exchange stimulates the Indian export trade, the rate of increase in the exports for the last three years should have been larger than it has ever been before, putting aside the period of the war in the United States which produced phenomenal conditions. The rate of exchange was never so low, as will be seen by reference to the table on page xxiii, and the seasons have been very good. Yet the increase of trade was very much smaller than in the preceding years when exchange ruled much higher, the years 1877-78 to 1879-80 being moreover years of widespread famine as well as of war (with Afghanistan). The export trade of the last two years, when exchange was lower than it had ever been, has actually fallen off in amount instead of increasing. The increase in the import trade has also been smaller in this same period than at any period since 1883-84. There has been a slackening of progress in both.

12. Let us now look at the principal staples of the export trade. The table on pages x—xv states these and the fluctuations of trade in them from year to year from 1876-77 to 1885-86 (ten years). In the exports of cotton, the most important of them all, there has been a serious decline during the last three years, shipments having fallen thus:

1882-83	cwt.	6,168,278	
1883-84	„	5,979,494	= — 3·1%
1884-85	„	5,066,057	= —15·3%
1885-86	„	4,189,718	= —17·3%

The exports of this last year are 8 per cent less than they were ten years previously. The next most important article, opium, was also 9 per cent short of the quantity exported ten years ago, saltpetre 13·74 per cent, wool 3·77 per cent, cutch 22½ per cent. Some other articles have increased so slowly that they may almost be said to have remained stationary: these are coffee, sugar, silk, teakwood, tobacco. Indigo, lac, coir, silk goods, spices, and rice have increased moderately. Certain articles on the other hand have increased very largely, such as wheat, tea, cotton yarn, and cotton piece goods.

13. Now, let us see the progress or retrogression from year to year of these articles. The figures in the following table indicate the percentage of increase

or decrease in the quantities exported each year as compared with the ye preceding it:

	Rice.	Wheat.	Tea.	Cotton.	Cotton yarn.	Cotton piece goods.	Jute.	Gunny bags.	Seeds.	Opium.	Indigo.	Hides and skins.	Wool.	Teakwood.	Shellac.	Spices.	Sugar.	Coffee.	Saltpetre.
1877-78	— 6·8	+ 13·6	+20·4	—24·1	+66·8	+12·9	+20·2	—19·6	+27·2	— 4·2	+20·1	+38·5	— 4·8	+20·2	—19·4	—19·7	—22·8	— 1·7	—16·6
1878-79	+13·2	— 83·5	+ 2·9	—14·3	+36·7	+28·3	+10·5	+71·8	—10·9	— 1·7	—12·9	—10·7	+15·1	—34·3	— 7·2	+61·2	66·9	+14·8	— 1·7

Amid all the fluctuations due to various causes to which these figures testify, the fact stands out prominently that during the last three years when, according to the theory that a low exchange stimulates trade, the exports should have increased more largely than in former years when exchange was at a much higher level, all those articles which have continued to increase have done so in a smaller ratio than in previous years, while the exports of many articles have absolutely diminished.

The theory, it is evident, cannot be maintained; and it must be admitted that if there has been a general increase of trade in the face of a fall in prices which is greater in proportion than the fall in exchange, or if trade has not actually fallen off, the fact is to be attributed to other causes than any special stimulus given by the rate of exchange.

Alleged restriction of imports.

14. The answer to the argument that while exports are stimulated and increased by a fall in exchange imports are correspondingly restricted, by reason of higher prices, is, firstly, that it ignores the fundamental principle which regulates the export trade of a country, namely, that exports pay for imports. If, then, the imports are for any reason restricted, exports must also be restricted, and if exports are augmented so must imports be augmented. If exports increase while imports diminish, the fact can only signify, either that the country is borrowing capital in foreign countries, or that it is giving away its produce for nothing. If the value of imports increases in greater proportion than the value of exports, the fact can only signify that the country has been lending money to other countries and is receiving back interest on its capital.

Imports and exports must progress or recede *pari passu*, except in so far as the rate of relative progress is affected by increased indebtedness to other countries. If, in India, exports increase in greater ratio than imports, (meaning by imports all imports for Government as well as those of ordinary trade, merchandise and treasure), then the increasing excess is due to increased borrowings in the London market and increased drawings by the Secretary of State, as well as the increased transfer to England of private savings.

Secondly, the argument also ignores the facts; for, though exchange has fallen, prices have fallen still more heavily, and the imports into this country are sold now at a lower price in Calcutta and Bombay than when exchange ruled high. This is evident from the tables of prices on pages xvi—xvii. Grey cottons are 16 per cent cheaper than in 1873, mule twist is 33 per cent cheaper, Turkey red is 43 per cent cheaper, copper is also 43 per cent cheaper, and iron 50 per cent cheaper. Cotton goods and metals form the bulk of our import trade. To the consumer in the interior of the country prices have been still further reduced and opportunities for consumption facilitated by the extension of railway communication. As has been said before, speaking broadly, whereas exchange has fallen 20 per cent, prices all round have fallen quite 30 per cent, and imported goods can therefore be sold at least 10 per cent more cheaply at the ports than when the rates of exchange were more favourable to the importation of merchandise, and more cheaply still to the consumer far in the interior of the country.

Thirdly, the figures of the trade shew that, while exports have not been specially stimulated, imports have not been specially restricted.

True causes why Indian trade has not been greatly depressed.

15. It has been shewn in the preceding paragraphs that the argument that a low rate of exchange stimulates the export trade is not sustainable, if the argument is to be taken by itself. Qualified with the proviso that prices do not fall in the consuming market in proportion to exchange, the argument may be admitted to be sound; but it is inadmissible when prices fall, as they have done, in the same or a greater ratio. Now, we have before us the following facts:

(1) prices in Calcutta and Bombay of exported produce have not increased; if anything they have fallen. The cultivator therefore has not received from the exporter the increased return which is a stimulus to larger production;

(2) exchange has fallen 20 per cent, which means a gain of 20 per cent to the exporter, but

(3) prices in England have fallen at least 30 per cent all round, and this means a loss of more than 20 per cent to the exporter, allowing for the slight fall in prices in Calcutta and Bombay.

The exporter therefore has not gained directly by the fall in exchange: he has simply been saved from a certain proportion of loss.

16. If the exporter has gained anything, if the cultivator has received a stimulus to increased production, other causes for these facts must be looked for. These causes are to be found in the reduction of cost of transport from the field to the port of shipment, and from the port of shipment to the consuming market, by the extension of railways, by reductions in railway rates of freight, and by reductions of sea freight.

The table on page xxii shews that the rate of sea freight for rice and wheat has fallen by as much as 52 per cent—more than one-half—since 1870. Now, at present prices the freight represents an addition of 20 per cent

to the cost on rice in Calcutta, and of 24 per cent to that of wheat. Therefore it is possible in consequence of the reduction of freight to lay down these grains in London 20 and 24 per cent more cheaply than in 1872. The addition caused by freight to linseed is now 14 per cent, to jute 13 per cent, to cotton 4½ per cent, so that for all these bulky articles, forming some of the most important items of our trade, we have a material reduction in cost of laying down effected by the reduction of rates of sea freight in recent years.*

We have further to consider the material reductions in transport by rail of the same articles effected during the last six years. Thus the charge for grain on the East Indian Railway has fallen between Delhi and Howrah, 991 miles, from ·161 pies per maund per mile in December 1879 to ·107 pies, a reduction of 33½ per cent; between Cawnpore and Howrah, 684 miles, from ·177 pies to ·149 pies, being nearly 16 per cent, and from Jabalpur to Howrah, 783 miles, from ·169 pies to ·147 pies, or 13 per cent. Grain transported to Calcutta from the Oudh and Rohilkhand Railway costs for freight ·150 pies instead of ·167 pies, a reduction of 10 per cent. From Cawnpore to Bombay, 960 miles, the freight has fallen from ·208 pies to ·162 pies, a reduction of 22½ per cent, and from Delhi to Bombay, 890 miles, the rate has been reduced since May 1883 by 2 per cent for wheat and by 4½ per cent for other grain and seeds, the present rates being ·145 pies and ·148 pies respectively. From Delhi to Karachi, 1,160 miles, the charge has fallen from ·172 pies in July 1882 to ·146 pies, a reduction of 15 per cent. From Jabalpur to Bombay, 616 miles, the charge has fallen from ·203 pies to ·185 pies, a reduction of about 9 per cent.

At the present prices of wheat in Bombay the present charge for railway transport to that port from Delhi represents 16·3 per cent of the price; from Cawnpore 19½ per cent, and from Jabalpur 14½ per cent.

For linseed, at the present price, the present charge for transport to Bombay is from Delhi 10·2 per cent, from Cawnpore 12·1 per cent, from Jabalpur 8·8 per cent, of the price, and for rapeseed from Delhi to Karachi the present charge is 25·4 per cent of the price.

The large reductions in freight must have made an appreciable difference to the producer who is able to sell so much more cheaply to the exporter without receiving a smaller return.

Besides these reductions of railway freight, the increase of conveniences at the ports of Calcutta, Bombay, and Karachi have so reduced the cost of handling goods there, that the exporter is able to pay less for his goods than he did some years ago, and yet not give the cultivator a smaller return.

17. Further, let us consider the development of railway communication in India. A reference to the table on page xxiv will shew that whereas in 1873 there were only 5,880 miles of railway open for traffic, at the end of 1884-85 there were 12,005 miles. This mileage has since been increased materially.

	Rs. A. P.	Rs.	Sea freight per ton. £ s. d.	s. d.	Rs.

Cotton, Dhollera, good (in Bombay).	174 0 0 per candy of 784 lbs.	= 348 „	1 2 6 at 17½		= 15·67 = 4·5	„ „

Assuming that a railway brings within reach of a port only ten miles of country on each side of the line, there were between 1873 and 1885 about 123,000 square miles of country brought within reach of the consuming markets outside India. Allowing for railways constructed on the frontier, it is well within the mark to say that cultivated and cultivable land stretching over 100,000 square miles of country has been brought within reach of a market, and that the cultivators over this area have been given the stimulus to production which is afforded by the knowledge that the produce can be conveyed easily, cheaply, and safely to the consumer in or out of India.

18. The actual increase of railway mileage would not have been of so much consequence to trade if the ports had not been linked by through communication with the heart of India. On the Rajputana-Malwa line through communication was completed in January 1881; on the Oudh and Rohilkhand Railway in June 1883; and Karachi was linked through with Lahore in October 1878. These completions, which brought places 1,500 miles away into uninterrupted railway communication with the sea, have had a most important effect on the development of trade.

19. Further, the great increase in the imports of the Government (mainly railway material) has led of necessity to a corresponding augmentation of the export trade. The imports on account of Government have increased from 112 lakhs in 1870-71 to 384½ lakhs in 1885-86.

20. Lastly, the seasons in India since 1879 have on the whole been very good.

These are some of the factors which have done whatever has been done, during the long period of general depression of trade all over the world, to prevent a serious diminution in the volume of Indian trade.

True effect of exchange on trade.

21. If then it is asked what effect exchange has had on trade, the answer is that it has saved the trade of India, in the face of the low prices ruling in the European markets, from disaster. But it is admitted now by all authorities that some part, at any rate, of these low prices is certainly due to the appreciation of gold. The fall in exchange is also the result of the appreciation of gold. We have therefore the one cause, namely, the appreciation of gold, operating on the trade of India in two different directions. On the one hand it has dealt it a heavy blow by reducing the price of Indian produce; on the other hand it has lessened the force and impact of the blow by lowering the rate of exchange. It has inflicted an injury and simultaneously has prevented that injury from having its full injurious effect. It is not unreasonable to argue that it would be better if no injury at all were inflicted. If gold were not appreciated in value, prices would be regulated by the factors common to all countries and all periods, namely, cost of production, cost of transport, extent of supply and demand. If gold is appreciated in value because, by the withdrawal of silver from currency in all the great commercial countries, more work is thrown upon gold than can be efficiently done by the available stocks of the metal, it is obvious that the re-monetisation of silver will stop its further appreciation,

so far as it is due to this cause, and that the injury of low prices, with its attendant partial redress in a low exchange, caused to Indian trade by the appreciation of gold will cease.

Summary.

22. To summarise now the foregoing paragraphs, it has been shewn :

(1) That exports could not be increased from any cause, increased indebtedness excepted, without *pro tanto* increasing the imports. The admission, therefore, by some of the advocates of a low rate of exchange that such low rate of exchange may restrict imports while stimulating exports refutes their argument, for such restriction of imports and expansion of exports could not co-exist except as a consequence of the country increasing its indebtedness to other countries.

(2) That, in fact, exchange cannot have had the effect of restricting imports; for the prices of our principal imports have been much lower in India during the last five years than they were in 1873.

(3) That, in fact, exchange cannot have had the effect of stimulating the export trade, because the prices of almost all Indian produce in the European markets have fallen in much greater ratio than the rate of exchange, and the whole advantage resulting from a low exchange has been neutralised; a balance of disadvantage being left against the exporter, prices paid at ports of shipment in India for produce not having fallen in the same proportion as in Europe.

(4) That in fact, looking at the returns of trade, the export trade has not thriven so well during the last three years, with an unprecedented fall in exchange, as in former periods, although in this period there have been good seasons and generally abundant harvests in India, while in former periods trade has had to struggle under the difficulties caused by bad seasons and by war.

(5) That the causes why the trade of India has not been attended by depression quite equal to that experienced in most other countries are these :

(*a*) that prices of Indian exports at the ports of shipment have not fallen in anything like the ratio of the fall in the consuming markets;

(*b*) that rates of transport by rail and sea have been materially lowered during the last few years;

(*c*) that railway extensions in the last twelve years, and the complete linking of the main lines with the ports, have assured cultivators over at least 100,000 square miles of India (one-tenth of the area of the Indian continent) of an external market for their produce, and have thus stimulated production;

(*d*) that the low rate of exchange has counterbalanced to the extent of about two-thirds, (roughly), the disadvantage of low prices in the consuming markets;

(*e*) that the fall of prices for imported goods being also greater than the fall in the rate of exchange has prevented that restriction of the import trade which would inevitably have been followed by a corresponding restriction of the export trade;

(*f*) that, speaking generally, the country has had good seasons and abundant harvests for the last five years; and that, without an exception worth consideration, the disturbing elements of war or famine have not interfered with the progress of trade.

(6) That although it is admitted that the fall of exchange has been one of the factors in preventing great depression of trade, it must be recognised that exchange, which is a partial remedy for low prices, has proceeded from the same cause as those low prices, namely, the appreciation of gold.

(7) That it is therefore not a good argument to say that a low exchange benefits trade, seeing that it is at best only a palliative; in other words, that it insufficiently counteracts the injury to trade occasioned by the appreciation of gold, of which a low exchange is itself a consequence.

Simla, July 13, 1886. **J. E. O'CONOR.**

10 years, 1865 to 1874	831 miles.
10 years, 1875 to 1884-85	559 miles.

During the last five years the average annual rate has been 662 miles.

D. BARBOUR,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 21st JULY, 1886.

GENERAL REMARKS.—Rain is reported from all parts of the country during the week under notice. In the North-Western Provinces and Oudh and in most parts of Bengal the falls have been light.

Agricultural prospects continue fair in Madras and good in Mysore and Coorg.

In Guzerat the *kharif* sowings have been retarded by excessive rain, while more rain is wanted in some of the central districts of the Bombay Presidency. In the North-Western Provinces and Oudh and the Central Provinces sowings are almost completed, and in Hyderabad and Rajputana they are progressing satisfactorily. More rain is wanted in the Peshawar district of the Punjab; elsewhere prospects are generally favourable.

In Bengal generally the partial break in the rains has been very beneficial, but in places in Western Bengal and Chota Nagpur more rain is wanted for transplanting late rice. Early rice, jute, and sugarcane are doing well, and the harvesting of the first two crops has commenced. Agricultural prospects continue satisfactory in the Assam Valley districts, but considerable injury has been caused by floods in Sylhet.

In British Burma ploughing, sowing, and transplanting operations are in progress.

The public health continues generally good.

Prices are rising in the Hissar and Ferozepore districts of the Punjab, and are fluctuating in the Delhi district and in the Bangalore, Shimoga, and Kadur districts of Mysore. Elsewhere they are stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 21st)		
Bellary . .	Average last week since revised, ·34; this week, ·36.	More rain wanted. Standing crops generally good, but young dry crops damaged by insects in parts of two taluks; harvest second crop paddy, yield about average. Cattle-disease in taluks.
Kurnool . .	Average last week since revised, 1·46; this week, 1·94.	Standing crops fair. Small-pox in two and cattle-disease in three taluks.
Ganjam . .	Average 2·25	Fever in three, small-pox in four, and cattle-disease in one taluk; cholera exists.
Kistna . . .	Average 2·33	Standing crops good. River 3·5 feet water over anicut. Slight fever; cholera in two taluks.
Chingleput (Madras) .	Average ·79	Standing crops good; harvest rain-fed crops, yield below average. Fever in one, small-pox in five, and cattle-disease in four taluks.
Coimbatore . .	Average ·41	Standing crops good, but *cumbu* wants rain in one taluk; harvest dry grains, outturn *cholum* about average, rest above average. Fever and slight cattle-disease in one taluk.
Tanjore . . .	Average last week since revised, 1·72; this week, ·41.	Standing crops generally good; harvest paddy, outturn below average.
Madura . . .	Average last week since revised, 1·63; this week, ·10.	Health of people and cattle generally good.
Malabar . .	Average 11·48	First crop paddy cultivation improving. Fever in one and slight small-pox in seven taluks; cholera in one taluk.
Travancore . .	2·26	Paddy good and in ear. Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(July 21st)		
Kurrachee . . .	5·98; Tatta, 4·53; average of eleven other stations, ·84.	River at Kotri on 19th, 18 feet 6 inches against 18 feet 4 inches on same date last year. *Kharif* crops injured by *kookai* and *taran* turtles and crabs in Shahbandar taluka. Fever in four and cattle-disease in three talukas; small-pox in one village in district, 2 fresh cases remaining.
Hyderabad . .	Rain in nine talukas aggregating, 9·80.	Preparations for *kharif* cultivation steadily progressing. River at Kotri on 19th, 18 feet 5 inches against 18 feet 4 inches on same date last year. More rain expected. Fever and small-pox in Hyderabad taluka only. Wheat 25 pounds 8 ounces, *bajri* 37 pounds 10 ounces, *juari* 40, white rice 18, and red rice 30 pounds per rupee.
Ahmedabad . .	5·14; total rainfall 24·96.	Rain throughout the district. Over moisture has retarded the sowing of cotton in Dhandhuka taluka, and injured young crops in Dhaskroi. A break in the weather desirable. Public health good. Wheat 35 and *bajri* 32 pounds per rupee.
Baroda . .	4·36; total rainfall 18·18.	Public health good. Sowing operations in rapid progress; sugarcane plants in good condition. *Bajri* 27, wheat 21, and rice 18 pounds per rupee.
Surat . . .	Rain in all districts; maximum at Chikhli, 13·26; minimum at Mandvi, 3·75.	Young crops doing well in Pardi and Mandvi talukas. Excessive rain has retarded sowing operations in some places and damaged crops in other. Fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 46 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik	Igatpuri, 13·40; Peint, 9·57; maximum at Nasik, 2·74; minimum at Malegaon, ·58.	More rain wanted in Chandor and Niphad. *Bajri* sowing commenced in all *deshi* talukas, except Chandor; young plants of minor early crops in good condition; transplantation continues in the *dangi* parts of the district. Public health good. Wheat 30¾, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay)	Rain every day, heavy on 14th; total of week, 7·55; total to date, 74·48, being 36·69 above average.	Abnormal temperature rose from 2° cool on 14th to 2° warm on 16th, remained 2° warm on 17th and 18th, and then fell to 1° cool on 20th; vapour in air slightly in excess of normal; wind normal on 14th, abnormal wind veered from west-north-west on 15th to north on 17th, and remained north till 20th.
Poona	Rain throughout district; maximum at Maval, 10·48; minimum at Bárámati, ·42.	Young crops doing well; transplantation commenced in Maval portion of the district; sowing retarded in some villages to the west and south of Sirur, as well as in Khed taluka. More rain wanted. Public health generally good; slight cattle-disease in Junnar and Haveli talukas. *Bajri* 34 and *juari* 46 pounds in the district, and *bajri* 32 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar	Sheogaon, 4·41; Newasa, 4·32; Jamkhed, 2·3; Nagar, ·89; Shrigonda, ·85; Sangamner, ·81; Kopargaon, ·77; in all other talukas from ·34 to ·72.	*Kharif* sowing in progress throughout the district. Public health good. *Bajri*—maximum 60 pounds in Jamkhed and minimum 38 in Karjat; *juari*—maximum 96 in Jamkhed and minimum 48 in Kopargaon per rupee.
Sholapur	·99; Barsi, 1·80; Madha, 1·05; Karmala, ·63; Pandharpur, ·51; Sangola, ·18; Malsiras, ·25.	*Kharif* sowing operations in progress throughout the district. More rain wanted in the Sangola and Malsiras talukas. *Juari* 58 pounds 25 tolas and *bajri* 34 pounds 3 tolas per rupee.
Dharwar	Rain at all stations, except Mundargi, varying from 5·10 in Hangal to ·22 in Gadag.	Rice crops good, but require heavy showers; sowing of early *juari* in progress throughout the district; chilly planting commenced in Kod. Public health good; slight cattle-disease in Navalgund. Rice 25 and *juari* 48 pounds per rupee.
Kanara	Karwar, 17·69; Kumpta, 28·28; Sirsa, 12·99; Yellapur, 11·98; Haliyal, 5·56; total 89·90.	Rice plants healthy. Slight measles in Karwar; anthrax decreasing in Supa Petha, other cattle-disease in Akola, Kumpta, and slight in Sirsa; public health generally good. Common rice at Karwar 14, and district average 13 seers per rupee.
Rajkot	6·28; total 22·49	Weather cloudy. Health generally good. Cotton sowing commenced in parts of Halar. Wheat 34, *bajri* 30, and *juari* 44 pounds per rupee.
		General Remarks.—Good rain throughout the Presidency; more rain wanted in parts of Poona, Nasik, Sholapur, and Bijapur. Sowing operations retarded and young crops injured by excessive rain in parts of Guzerat. Fever and cattle-disease in parts of nine and small-pox in parts of four districts.
Bengal—(July 21st)		
Chittagong	1·74	Weather hot, with occasional showers. *Aus* crops somewhat damaged by late heavy rain, otherwise prospects fair. Prices steady. Cattle-disease at Cox's bazaar; public health good.
Dacca	0·30	*Amun* and jute thriving; prospects good; *aus* harvest proceeding; reaping of jute commenced in lowlands. Public health good.
24-Pergunnahs (Calcutta).	Return not received	Prospects of early rice jute, and sugarcane satisfactory; transplanting of *amun* going on. Common rice 14½ to 17 seers per rupee. Public health generally good.
Moorshedabad	1·69	Weather seasonable. All agricultural prospects good. Price of rice stationary. Public health good.
Rungpore	0·36	Weather very hot. Rain wanted. Prospects of crops good; *amun* being transplanted all over the district; *aus* harvest continues; cutting of jute commenced. Public health good.
Burdwan	1·17	Transplanting of *amun* rice proceeding; *aus* rice and sugarcane promising; *til* and oilseeds nearly harvested, with fair outturn. Price of rice 15 to 20 seers per rupee. Public health good.
Bhagalpur	0·01	Break in rains most favourable to crops. A little loss of *aghani* rice in lowlands in north. Public health good. Rice 16 seers 6 chittacks per rupee.
Purneah	0·29	Prospects excellent. High lands still being ploughed. Coarse rice 19 seers per rupee. Health good.
Patna	1·08	Weather close and oppressive. Break in rains. Weeding and transplanting in progress. More rain wanted in some places for transplantation of *bhadoi* crops. A few cases of cholera reported from Harnout outpost.
Durbhunga	0·17	Cultivation of *bhadoi* crops progressing satisfactorily; transplanting of paddy and *marua* going on. Prices almost stationary. Public health generally good.
Manbhoom	0·70	Weather unseasonable. Rain much wanted all over the district. Transplanting retarded. General health good.
Cuttack	6·18	Weather cloudy. Rice plants promising well; *sarad* rice being reploughed. Price of rice unchanged. Scattered cases of cholera, public health otherwise good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Midnapore	1·9	Prospects of crops and public health good.
Khoolna	0·95	Weather cloudy. *Aus* rice doing well; cultivation of *amun* rice continues; prospects good. Public health good.
Dinagepore	13·03	Weather seasonable. Prospects of crops good. A few cases of small-pox and cattle-disease. Average price of rice 20 seers per rupee.
Pubna (Serajgunge)	0·72	Excessive heat. Crops doing well; *til*, oilseeds, and *aus* rice being reaped in places. Public health good.
Gya	0·21	Rain wanted for *bhadoi* and rice seedlings. Fever prevalent. Prices moderate.
Chumparun	1·49	Sowing of *bhadoi* crops nearly completed, that of *aghani* progressing; transplanting of paddy commenced in some places. Prices stationary. Public health fair.
		General Remarks.—General but light rain fell during week. Fair weather has proved very beneficial to agricultural operations in Behar and other parts, which suffered from late excessive rain; but in places in Western Bengal and Chota Nagpur more rain wanted for transplanting late rice; early rice, jute, and sugarcane generally very promising in some places; harvesting of early rice and jute has commenced. Price of rice generally remains stationary. Public health fair.
N.-W. Provinces and Oudh —(July 21st)		
Benares (July 19th)	At Sadr 1·10	Supplies sufficient. Prices slightly fluctuating. General health good.
Gorakhpore („ „)	·30	Weather cloudy and sultry. *Kharif* sowings finished; germination good; weeding in progress. Prices slightly falling. Health fair.
Fyzabad („ 20th)	*Nil*	Weather clear. Crops have been weeded and promise well. Prices unchanged. General health good.
Lucknow („ 19th)	·60 at tahsil Malihabad only.	Crops sown, have germinated well, and are being weeded; *bajri*, *juari* and *moth* are being sown. Supplies ample. Prices stationary. General health good; condition of cattle fair.
Rae Bareli („ „)	·90 at Sadr	Weather sultry. Agricultural operations in full swing. Markets full. Prices steady. General health fair.
Partabgarh („ 20th)	*Nil*	There has been a break in the rains which has proved beneficial. *Dhan*, *juari* and *makki* sowings nearly finished; that of *bajri*, *arhar*, and *mash* progressing. *Arhar* and gram somewhat cheaper. General health good.
Allahabad („ „)	1·30 in two tahsils	Weather cloudy and close. *Kharif* ploughing and sowing continue. Markets full, though prices show a slight rise. A little [illegible] during the week, and wanting in Quinine.
Cawnpore („ „)	Rainfall in seven tahsils averaging from ·10 to 1·40.	Sowing and weeding are in progress. Prices steady. Some cholera in City and Cantonment; cattle-disease in Pargana Rasulabad.
Farakhabad („ „)	Slight showers at Sadr; between 1·3 and 2·60 in district.	A break has set in, which is beneficial. Crops promising. Markets well supplied and prices stationary. No sickness.
Sitapur („ „)	Varying from ·60 to 3·10.	Sowings are in progress everywhere, and prospects continue good. No sickness reported.
Bareilly („ „)	Slight rain in district	More rain wanted. Rice in Baheri still unsown. Prices almost stationary. A good deal of fever reported. Winds easterly.
Banda („ 19th)	Good fall on 17th	Weather seasonable. Break of nine days followed by a good fall of rain on 17th. *Kharif* sowings continue; early sowings germinated and being weeded. Prices steady. Public health good; cattle-disease in five villages.
Ballia („ 20th)	·70	*Kharif* sowing progressing. Public health satisfactory.
Kumaon („ „)	Partial rain during week.	*Kharif* crops making good progress. Prices stationary. General health fair; fever in district; cattle-disease decreasing.
Agra („ 19th)	In four parganas from ·10 to ·70.	*Kharif* promising well. Prices steady. Health good.
Jhansi („ „)	·10 to ·70	Early crops have germinated. Prices fluctuating. Public health good; cattle-disease in two villages.
Meerut („ 20th)	Slight rain during week.	Weather hot and generally cloudy. Prospects favourable. Prices stationary. Health good.
		General Remarks.—Rainfall lighter than in previous week, and break in a few places has been beneficial to crops. *Kharif* sowings finished in most districts, in others approaching completion. Markets well supplied, and prices generally steady. Public health fair.
Punjab—(July 21st)		
Hissar	·20 at Sadr	Health good. Prices rising.
Delhi	·10	Health good. Prices fluctuating.
Umballa	·03	Health fair. Prices stationary.
Jullundur	3·20	Health good. Prices stationary.
Ferozepore	3·30 at Sadr	Health good. Prices rising.
Amritsar	2·20	Health good. Prices stationary.
Sialkot	3·40	Health good. Prices stationary. Prospects favourable.
Lahore	2·0	Health good. Prices almost stationary.
Mooltan	1·40 at Sadr	Health good. Prices stationary.
Rawalpindi	1·95.	Health good. Prices stationary.
Shahpur	Rainfall throughout the district.	Health good. Prices almost stationary. Prospects good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	1·84	Health good. Prices almost stationary.
Peshawar	·90	Health good. Prices of barley, *bajri*, and *makki* rising, other grains stationary.
		General Remarks.—Rain has fallen in all districts, more wanted in Peshawar district. General health good, but some small-pox in Dera Ismail Khan City. Prices rising in the Hissar and Ferozepore districts, fluctuating in the Delhi district; elsewhere stationary.
Central Provinces—(July 21st)		
Nagpur	4·77	Weather cloudy and damp. Rice and *juari* still being sown. Small-pox and fever in parts. Prices steady.
Jubbulpore	3·78	Sowings almost finished; prospects favourable. Health good. Prices steady.
Saugor (July 20th)	2·75	Sowings progressing. Fever continues. Prices fallen.
Seoni	4·79	Weather cloudy and cool. Transplanting of rice commenced. Small-pox and cattle-disease reported. Prices rising.
Hoshangabad	3·29	Small-pox and cattle-disease continue. Prices steady.
Khandwa	1·10	Sowings completed. Twelve cases of cholera, four fatal. Prices unchanged.
Raipur	.....	Weather cloudy, but not much rain. Sowings nearly completed. Cholera continues. Prices steady.
Sambalpur (July 17th)	3·59	Weather seasonable. Prospects good. Cholera in places. Prices steady.
		General Remarks.—Rainy weather continues over most of the provinces, and a break would be of service in facilitating weeding. Cholera continues in Chhattisgarh.
British Burma—(July 21st)		
Akyab (July 17th)	1·79; total rainfall 53·08.	Public health good; slight cattle-disease. Ploughing progressing.
Bassein	3·33; total rainfall 42·36.	Public health good; slight cattle-disease in three circles. Ploughing and sowing going on.
Rangoon	3·80; total rainfall 42·27.	Public health good; cattle healthy.
Amherst (Moulmein)	4·37; total rainfall 67·61.	Public health good; cattle healthy. Ploughing and transplanting progressing.
Pegu	3·52; total rainfall 51·66.	Public health good; slight cattle-disease in two circles. Ploughing and sowing progressing throughout the district.
Henzada	2·84; total rainfall 38·10.	Slight cholera in one township; cattle healthy. Ploughing and transplanting progressing.
Prome	1·31; total rainfall 17·41.	Public health good; cattle healthy. Ploughing progressing, but more rain wanted in one township.
Tounghoo	1·84; total rainfall 31·85.	Public health good; cattle healthy. Ploughing progressing.
Thayetmyo	0·23; total rainfall 3·77.	Public health good; cattle healthy. Sowing commenced.
		General Remarks.—Slight cholera in one township of Henzada district, elsewhere public health good; slight cattle-disease in parts of seven districts, elsewhere health of cattle good. Ploughing, sowing, and transplanting of seedlings progressing throughout the Province. More rain required in one township of Prome.
Assam—(July 21st)		
Gauhati	2·13 during week ending 20th instant.	Weather hot. General health of the station fair, but cholera in the interior of the district; cattle-disease still in some mouzahs. Reaping of *ahu* commenced.
Sylhet	3·44	Much damage has been done by flood to crops and tea in Karimganj and South Sylhet subdivisions; state and prospects in the remainder of the district good.
Cachar	5·02	Weather hot. Flood not yet subsided. Cultivation for *sali* crops commenced. Common rice 14 seers per rupee. Prospect of tea good. No cholera reported.
Dibrugarh	1·39	Weather seasonable. Transplanting of *sali dhan* continues; prospects of tea good. Public health good.
Mysore and Coorg—(July 21st)		
Bangalore, Mysore	Rain has been general throughout the State.	Standing crops in good condition. Public health good. Prospects of season favourable. Prices fluctuating in Bangalore, Shimoga, and Kadur.
Mercara	17·64	Prospects of season good.
Berar and Hyderabad—(July 21st)		
Amraoti	1·63	Weather rainy. Crops in good condition. A break in the weather now looked for. Wheat 22 and *juari* 26 seers per rupee.
Akola	8·40	Weather cloudy. A break in the rains needed for the crops.
Hyderabad	Average 3·20; total rainfall since 1st January, 19·02.	*Kharif* and *abi* sowings continue. No reports yet received regarding water-supply in tanks. General health fair. Prices—wheat 14½, coarse rice 11, white *juari* 21½, yellow *juari* 22, and *tur* 15 seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(July 21st)		
Indore	1·07; total rainfall 21·37.	Weather cloudy, with frequent light rain.
Morar (Gwalior)	·11; total rainfall 11·49.	Health good. Weather cloudy and hot.
Neemuch	2·58; total rainfall 11·40.	Agricultural prospects and health good.
Goona	1·57	Health good.
Sutna	·90	Weather cloudy. Health good.
Agar	2·58	Health and prospects good.
Sehore	2·61	Weather seasonable. Crops and health good.
Nowgong	·32; total rainfall 10·0.	More rain wanted. Heat oppressive. Prospects and health good.
Bhopawar (Manpur)	3·40; total rainfall 20·05.	Health good. Prices steady.
Rajputana—(July 21st)		
Abu (July 21st)	First heavy rain during week, 20·06; total 32·0.	Weather still very cloudy and dark. More rain threatening.
Sirohi („ 18th)	2·48	Tanks full; wells good. Health good. Crops good. Weather cloudy and cool, with showers.
Marwar („ 16th)	·70	More than a year's water in Jodhpore City tanks. Health good. Young crops thriving. Weather cloudy, warm, and close. Prices steady.
Kherwara („ 18th)	2·17	Tanks and wells fairly filled. Crops flourishing. Health good; slight small-pox. Prices steady. Weather showery.
Meywar („ 17th)	1·84	Tanks and wells filling. Crops good. Health satisfactory. Prices falling.
Pertabgarh („ „)	2·72	Health good. Prices steady. Weather occasionally cloudy.
Harowti („ „)	Deoli, ·07; Tonk, 1·38; Shahpur, ·07.	Heavy general rain on night of 18th. Health good. Prospects good.
Jhallawar („ 16th)	2·28	Tanks filling. Health good.
Kotah („ 17th)	2·00	Health good. Weather clear.
Ajmere („ 20th)	*Nil*	Health good. Slight fever and small-pox in some parts of the district. Weather cloudy. Scanty rain throughout district. Sowing in progress.
Jeypore („ „)	Good rain	Prospects favourable.
Dholepore („ 14th)	·62	Tanks and wells filling. Sowings continue. Prices stationary.
Bhurtpore („ 17th)	·40	Tanks and wells full. Ploughing and sowings in progress. Health good. Prices steady.
Ulwur („ 20th)	1 14	Prospects and health good. Prices steady.
Bickanir („ 17th)	·62	Heavy rain in some districts. Sowing continues. Tanks and wells filling. Small-pox and fever prevalent. Prices stationary. Weather cloudy.
Nepal—(July 15th)		
Katmandu (July 16th)	3·10	Indian corn fair. Rice is backward and needs more rain.

No. 111 Met. / 12—8

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, 22nd July, 1886.

Read the following:—

Summary of the Weather Report for the month of June 1886.

The first week of the month was characterised by a considerable depression of temperature in the Punjab and the adjacent parts of the North-West Provinces; but in the second week the temperature rose quickly, and from the 10th to the middle of the month it was high over the whole of North-Western and Central India; on the hills, as well as on the plains. At Murree the thermometer marked 93° and at Simla 89° on the afternoon of the 14th. In the latter half of the month the rains set in, and the temperature fell all over the country, except in Sind and the Carnatic. The fall was greatest in the Punjab, the North-Western and the Central Provinces, and least in Bengal and the peninsula.

On the mean of the whole month, the temperature was from 1° to 4° below the average, in the Upper Provinces and Rajputana, and 1° to 2° in the Central Provinces. In Assam it was from 1° to 2½° above the average.

The barometer was subject to great oscillation during June, but on the general average of the month the irregularities compensated each other, or nearly so, leaving a slight excess of pressure outstanding over a large portion of Northern India, the Central Provinces, and parts of the Carnatic, and a similar slight deficiency elsewhere.

The dry westerly winds, which were blowing in the Upper Provinces, at the close of May, continued till about the 6th of June, when south-east winds advanced from the Bay of Bengal up the Gangetic plain to the Punjab, but were generally restricted to the submontane districts. On the 13th a small storm was formed off the Orissa coast, and subsequently moved forward, first to Calcutta, and then north-west and west across Western Bengal and Central India. Thence it moved rapidly to Sirsa, and finally to the north of the Punjab. The rainfall accompanying the storm was rather heavy, and it ushered in the monsoon rains over the North-Western Provinces, Central India, and a large portion of Rajputana and the Punjab. In general, the winds were from south-east in the Gangetic plain and under the hills of the Punjab, southerly at the head of the Bay of Bengal, and westerly elsewhere.

On the western coast of the peninsula the monsoon current was weak during the first two weeks, and the rainfall was restricted to the more southern provinces. The rainfall of Malabar was rather below the average, but in the Konkan (except at Goa) there was an excess. In Cutch and Sind there was little or no rain. In the North-Western Punjab, on the Himalayas, in Behar, Northern Bengal, Assam and Burma, the rainfall was more or less below the average, while on the plains of the Central and Eastern Punjab, the North-Western Provinces, Rajputana and Central India, there was more rain than usual. At the majority of the stations in Lower Bengal, Orissa, Madras, and Ceylon, the total rainfall of the month exceeded the average, but in the Central Provinces it was below it.

The following table shows the amount of rain and the difference from the average during the month of June 1886, according to districts, as far as is indicated by the telegraphic reports:

Districts.	Number of Stations.	Average rainfall in June.	Difference from the average in June 1886.	Remarks.
Punjab, West	7	1·46	+1·15	
Ditto, East	6	3·69	+0·71	
North-Western Provinces, trans-Gangetic	14	6·45	+1·49	
Ditto ditto, cis-Gangetic	7	3·78	+1·83	
Behar	4	7·14	−0·82	
Northern Bengal	2	21·13	−6·40	
Assam, Cachar	5	17·19	−1·12	
Lower Bengal, Chutia Nagpur	6	12·77	+2·44	
Orissa, Northern Circars	6	7·03	+1·32	
Central Provinces, South	7	8·81	−0·55	
Berar, Khandesh	8	5·54	+2·49	
Rajputana, Central India, Saugor and Narbudda ...	9	4·77	+0·21	
Sind, Cutch	4	0·74	−0·35	
Guzerat	4	4·97	+1 33	
Konkan	4	22·18	+5 52	
Deccan, Hyderabad	8	5·29	+0·81	
Malabar	5	32·88	−4·57	
Mysore, Bellary	6	3·07	+0·49	
Carnatic	8	1·54	+0·49	
British Burmah	7	23·36	−3·79	
Ceylon	1	8·22	+0·26	

SIMLA;
The 10th July 1886.

RUCHI RAM SAHNI,
2nd Asstt. Meteorological Reporter to the Govt. of India.

RESOLUTION.—Resolved, that the Summary be published in the Supplement to the *Gazette of India*.

C. J. LYALL,
Offg. Secretary to the Government of India.

PETROLEUM EXPLORATIONS IN BILUCHISTAN.

No. 52 C. and I., dated Simla, July 24, 1886.

RESOLUTION—By the Government of India, Public Works Department.

OBSERVATIONS.—The preliminary stages of the petroleum explorations in Biluchistan have now been brought to a close. The borings have satisfactorily established the existence of petroleum in such quantities as to warrant amply the prosecution of the operations on a large scale, oil being drawn from shallow wells while a deep boring is being executed in the most suitable locality that may be found on further and closer investigation. A considerable quantity of the oil already pumped having been sent to Sibi for trial in locomotives, has proved to be a most valuable fuel, the experiments conducted with two engines having terminated most satisfactorily.

2. These results fully justify the continuance of operations on an extended scale. The present temporary establishment will consequently be broken up, and Mr. R. A. Townsend will proceed to Europe and America with the view of making the arrangements for the purchase of the necessary machinery and its delivery at Karachi at the commencement of the coming cold season, when operations will be resumed under his management.

His Excellency the Governor General of India in Council is desirous of taking this opportunity to place on record his appreciation of the fortitude, devotion, perseverance and ability which have been displayed, under most trying circumstances and vicissitudes of climate, by Mr. R. A. Townsend and the staff* employed under his orders on this duty. The operations were commenced during the cold season of 1884-85, and have since been prosecuted with only a brief intermission necessitated by intense heat, want of water, and the serious illness of most of the staff. Last summer, Mr. Coleman, one of the four European Assistants, unfortunately died while being carried in dangerously ill from Katan to Sibi, and Mr. Townsend himself was prostrated by most serious illness, the remainder suffering in a less degree.

* Mr. A. F. Townsend.
„ B. I. Townsend.
„ R. Slack.
„ M. Coleman (late).

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Foreign and Home Departments, to the Department of Finance and Commerce, and to the Director General of Railways, for information, also to the Agent to the Governor General, Biluchistan, for information and communication to Mr. R. A. Townsend, and each of his assistants.

Also that this Resolution be published in the Supplement to the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 28th JULY, 1886.

GENERAL REMARKS.—With the exception of the western districts of the Punjab, rain is reported from nearly all parts of India. In the Madras Presidency the falls have generally been light.

In Madras, Mysore, and Coorg the standing crops are doing well, and prospects are good.

The *kharif* sowings have been almost completed in Bombay and the North-Western Provinces and Oudh, and are still in progress in Hyderabad and Rajputana. A break in the rains would be beneficial in some places. In the Punjab rain is still much wanted in the Peshawar district, otherwise prospects continue fair.

In the Central Provinces prospects are generally good, though more rain is wanted in the Chhattisgarh Division.

Transplanting is well forward in Bengal, except in the western parts of the Province, where more rain is wanted. All autumn crops and sugarcane are promising well, and the early rice and jute harvests have commenced in some districts, with prospects of a good outturn. In Assam crops where uninjured by floods are doing well.

Ploughing and sowing for the rice harvest continue in British Burma.

The public health is generally fair.

Prices are falling in the Hissar, Jullundur, and Shahpur districts of the Punjab, and are fluctuating in the Delhi and Mooltan districts; elsewhere they remain steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(July 28th)		
Bellary	Average last week since revised, ·46; this week, ·18.	More rain wanted. Standing crops generally good, but young dry crops damaged by insects in parts of one taluk; harvest second crop paddy, yield average. Cattle-disease in two taluks.
Kurnool	Average ·[illegible]	Standing crops fair. Small-pox in two and cattle-disease in three taluks.
Ganjam	Average last week since revised, 2·32; this week, 2·10.	[illegible] taluks.
Kistna	Average ·67	Standing crops good. River 12·65 feet water over anicut. Small-pox and fever.
Chingleput (Madras)	Average ·08	Standing crops good; harvest wet and dry crops, yield below average. Fever abating in one; small-pox in one and cattle-disease in three taluks.
Coimbatore	Average ·17	Standing crops good, but *cholum* and *cumbu* require rain in parts, *cholum* damaged by insects in one taluk; harvest dry grains, outturn *cholum* about average, rest above average. Fever in one taluk; small-pox in one village and cattle-disease in another.
Tanjore	Average last week since revised, ·45; this week, ·04.	Standing crops generally good; harvest paddy, outturn below average.
Madura	Average last week since revised, ·11; this week, ·05.	Fever in one taluk and cattle-disease in another.
Malabar	Average 9·82	First crop paddy cultivation improving. Fever in one and slight small-pox in seven taluks; cholera in one taluk.
Travancore	2·51	Paddy ripening. Small-pox and fever in parts. *General Remarks.*—General prospects fair.
Bombay—(July 28th)		
Kurrachee	Kurrachee, 3·78; Sakro, 3·74; average of four other stations, 1·28; Keti, during week ending 19th, 7·78.	River at Kotri on 26th 19 feet 8 inches against 19 feet 1 inch on same date last year. A man killed by lightening in Shahbandar and 4 goats in Sehwan taluka. *Kharif* crops injured by inundation in Tatta, Ghorabari and Kotri talukas. Scarcity of water felt at Johi. Fever in five and cattle-disease in two talukas; one fresh case of small-pox in Dadar remaining.
Hyderabad	Rain in ten talukas; average fall 1·61.	Weather mild and pleasant. *Kharif* cultivation progressing fast. River at Kotri on 26th 19 feet 8 inches against 19 feet 1 inch on same date last year. Fever and small-pox in Hyderabad and cattle-disease in two talukas. Wheat 25, *bajri* 37 [illegible], *juari* 40, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad	1·59; total 21·55; rain in all talukas.	Sowing of *kharif* retarded in Dholkar and Dhandhuya talukas owing to overmoisture. Insects have slightly injured young crops in Parantij; transplantation of rice in progress. Public health good. Wheat 35 and *bajri* 32 pounds per rupee.
Baroda	3·0; total rainfall 21·18.	Public health good. Sugarcane and cotton in good condition. *Bajri* 28, wheat 21, and rice 18 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	Rain in all talukas; maximum at Pardi, 17·93; minimum at Olpad, 5·99.	Young crops doing well in Mandvi, Bulsar and Pardi talukas. Heavy rain has retarded sowing operations in some places and damaged crops in others. Fever and cough in Bardoli taluka. *Juari* 38 and *nagli* 56 pounds per rupee.
Nasik	Igatpuri, 22·09; Peint, 20·20; maximum at Dindori, 4·73; minimum at Malegaon, ·87.	*Bajri* sowing continues; young plants promising. Break in the weather is desired in Kalwan to commence *bajri* sowing; transplantation continues in the *dangi* parts of the district. Public health good. Wheat 30¾, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay)	Rain everyday, except on 26th; heavy on 22nd; total of week, 4·74; total to date, 79·22, being 36·32 above average.	Abnormal temperature *nil* on 21st, 3° cool on 22nd, rose to 2° warm on 24th, and afterwards was 1° warm; vapour in air normal; abnormal wind from north-west on 21st, 22nd and 24th, from south-east on 23rd, and from north on 25th; wind normal on 26th and 27th.
Poona	Rain all over the district; maximum at Maval, 4·47; minimum at Peta Baramati, ·70.	Young crops in good condition; sowing still in progress. Recent fall of rain has improved the young plants. Public health generally good; slight cattle-disease in Junnar and Haveli, and small-pox in Indapur talukas. *Bajri* 34 and *juari* 46 pounds in the district, and *bajri* 32 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar	Akola, 3·43; Sangamner, 2·81; Parner, 2·39; Kopargaon, 2·12; Rahuri, 2·6; Nevasa, 1·93; Sheogaon, 1·75; Jamkhed, 1·61; Karjat, 1·44; Shrigonda, 1·33; Nagar, 1·30.	*Kharif* sowings completed in Karjat and Nagar; in progress elsewhere. Public health good. *Bajri*—maximum 60 pounds, minimum 36, *juari*—maximum 96, minimum 48 pounds per rupee.
Sholapur	Sholapur, ·68; Barsi, 1·54; Madha, 1·86; Karmala, 1·66; Pandharpur, ·45; Sangola, ·39; Malsiras, ·42.	*Kharif* sowing almost completed throughout the district. More rain required in the Sangola and Malsiras talukas. *Juari* 59 and *bajri* 45 pounds per rupee.
Dharwar	Rain at all stations, varying from 4·16 in Mugud to ·20 in Nargund.	Sowing of early *juari* in progress; rice crops good; damage to crops by insects in parts of Navalgund, Gadag, and Ron talukas; in some villages of the last taluka resowing commenced owing to young plants being damaged by them. Heavy showers necessary to destroy them. Public health good. Rice 24 and *juari* 50 pounds per rupee.
Kanara	Karwar, 11·46; Kumta, 12·68; Sirsi, 9·65; Yellapur, 11·53; Haliyal, 6·16; total 106·367.	Rice plants thriving; transplanting and weeding continue in Ghat talukas. Anthrax subsiding in Supa Petha; other cattle-disease in one village of Karwar taluka. Common rice in Karwar 14, and district average 13 seers per rupee.
Rajkot	6·83; total 29·32	Health generally good; fever prevailing in parts of Sarath and Halar. Wheat 33, *bajri* 30, and *juari* 44 pounds per rupee. Break much required. *General Remarks.*—Good rain in most districts of the Presidency; more wanted in parts of Sholapur and Bijapur. Sowing retarded by excessive rain in parts of Gujarat, and young crops injured by floods in parts of Karachi, by heavy rain in parts of Gujarat, and by insects in parts of Ahmedabad, Dharwar, and Upper Sind frontier. Fever and cattle-disease in parts of nine and small-pox in parts of four districts.
Bengal—(July 28th)		
Chittagong	3·48	Weather seasonable. Sowing of *amun* paddy in progress, prospects generally fair. Prices stationary. Public health good.
Dacca	3·02	Prospects of crops good; *aus* rice and jute being harvested. Public health good.
24-Pergunnahs (Calcutta).	3·49	Early rice, jute, and sugarcane doing well; transplanting of *amun* going on. Common rice 14½ to 17 seers per rupee. Public health good.
Moorshedabad	2·02	Weather seasonable; good rain. *Bhadoi* crops thriving; indigo being cut; late paddy being transplanted, prospects good. Public health generally good.
Rungpore	1·58	More rain wanted for transplanting operations; harvesting of *aus* proceeding. Public health good.
Burdwan	4·16	Transplanting of *amun* seedlings going on; *aus* progressing well; sugarcane good. Price of rice 15 to 22 seers per rupee. Public health generally good.
Bhagalpur	5·08	Prospects of crops good. Prices steady. Public health good.
Purneah	3·30	Cultivation progressing; crops excellent; jute being harvested. *Baane* rice 17 seers per rupee. A good deal of sickness of a mild kind resulting, probably from sudden changes in temperature. Prices falling.
[illegible]	5·74	Sufficient rain for transplantation of *bhadoi* and paddy crops, which is progressing. Cholera reported from Behar, Hilsa and Chundi police jurisdictions.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Durbhunga	4·54	*Makai* looks very promising; transplanting of *marua* and paddy progressing rapidly. Prices almost stationary. Public health generally good.
Hazaribagh	1·41	Weather seasonable latterly. Rain wanted over most parts of district. Transplanting retarded. General health good.
Cuttack	1·77	Weather cloudy. Rice plants promising well. Price of rice a little higher. Scattered cases of cholera; public health good.
Midnapore	3·15	Prospects of crops good. Public health good.
Khoolna	2·78	Weather cloudy. *Aus* paddy doing well; cultivation of *amun* paddy continues, prospects good. Public health good.
Dinagepore	2·54	Prospects of crops good; transplanting of late rice going on. Price of rice averages 20 seers per rupee. Small-pox in Gungarampore; cattle-disease in four thanas.
Pubna (Serajgunge)	1·63; showers daily	Crops doing well. Public health fair
Gya	Rainfall recorded before storm, 3·61.	Severe thunderstorm on night of 26th with much rain, town flooded, some lives lost. Crop prospects good. A few cases of fever and cholera. Prices moderate.
Chumparun	1·75	Break in rains done much good to *bhadoi* crops; transplanting of paddy seedlings going on. Prices stationary. Public health fair. *General Remarks.*—Good general rain during week. Transplanting operations well forward, except in parts of Western Bengal and Chota Nagpur, where more rain wanted; all autumn crops and sugarcane promising well; in some districts early rice and jute being harvested with prospects of generally satisfactory outturn. Price of rice almost stationary. Public health generally good in Gya town, but some lives lost by floods caused by excessive rain, with severe storm, on night of 26th.
N.-W. Provinces and Oudh.—(July 28th)		
Benares (July 26th)	Averaging 1·90	*Kharif* prospects fair. Supplies plentiful. Prices slightly falling. Health good.
Gorakhpore („ „)	1·80 at Sadr	Weather cloudy and sultry. Weeding of crops in progress. Prices stationary. Health fair.
Fyzabad („ 27th)	*Nil*	Weather seasonable. Crops promising well. Prices falling. General health good.
Lucknow („ 26th)	Average ·70	Crops doing well; weeding in progress; *mash* and *moth* being sown. Supplies sufficient. Prices steady. Health of people and condition of cattle good.
Rae Bareli („ „)	[illegible]	[illegible]
Partabgarh („ 27th)	·80 to 3·40	*Bajri* sowing has been somewhat retarded by excessive rain, [illegible] being transplanted. Prices stationary. Cholera in some parts of tahsil Patti.
Allahabad („ „)	Average 1·50	Weather seasonable. More rain required in trans-Ganges tract. *Kharif* sowings still going on. Markets well supplied and prices steady. Health generally good.
Cawnpore („ „)	·10 to 2·0	Weather generally cloudy. Sowing and weeding in progress. Prices steady. Slight cholera in City and Cantonments continues; cattle-disease in parganas Rasulabad and Ghatumpur.
Farakhabad („ „)	From 1·10 to 4·10	Crops promise well, but a break would do good. Supplies plentiful and prices continue steady. No sickness.
Sitapur („ „)	From ·30 to 4·90	Prospects favourable. No sickness.
Bareilly („ „)	From ·20 to 4·0	Prices steady. Fever prevalent.
Banda („ 26th)	Good rain during week.	*Kharif* sowings continue; early crops being weeded. Prices fluctuating slightly. Cattle-disease in two villages in pargana Mau; public health good.
Ballia („ 27th)	Averaging 4·50	Weather cloudy. *Kharif* sowings continue; sugarcane thriving fairly. Public health good.
Kumaon („ „)	Partial rain	Sunshine during week. *Kharif* crops making good progress. Prices stationary. Typhoid fever and measles in district; cattle-disease continues.
Agra („ 26th)	Rain in all parganas, 1·0 to 2·80.	*Kharif* crops progressing favourably. Prices steady. Health good.
Jhansi („ „)	Average 3·60	Agricultural prospects good. Prices steady. Health of people and cattle good.
Meerut („ 27th)	General and very opportune rain on 26th after dry westerly winds.	*Kharif* crops flourishing. Supplies sufficient. Prices of wheat and gram have risen. Health generally good; fever has set in. *General Remarks.*—Rain has been general during the week; a break would be beneficial for the crops. Prospects are good everywhere. Supplies are plentiful and prices generally steady. Public health fair; cases of cholera reported from a few districts.
Punjab—(July 28th)		
Hissar	2·0	Health good. Prices falling.
Delhi	2·25	Health good. Prices fluctuating.
Umballa	1·28	Health fair. Prices stationary.
Jullundur	1·10	Health good. Prices slightly falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Ferozepore	·60 at Sadr	Health good. Prices stationary.
Amritsar	2·70	Health good. Prices stationary.
Sialkot	1·30	Health good. Prices stationary.
Lahore	6·50	Health good. Prices steady.
Mooltan	*Nil*	Health good. Prices fluctuating.
Rawalpindi	·40	Health good. Prices stationary.
Shahpur	Rainfall throughout the district.	Health good. Prices falling.
Dera Ismail Khan	*Nil*	Health good. Prices almost stationary.
Peshawar	*Nil*	Health fair. Prices almost stationary.
		General Remarks.—Rain has fallen in all districts, except Mooltan, Dera Ismail Khan, and Peshawar; rain much wanted in the Peshawar district. General health good. Prices falling in the Hissar, Jullundur and Shahpur districts, fluctuating in the Delhi and Mooltan districts; elsewhere stationary.
Central Provinces—(July 28th)		
Nagpur	3·76	Weather cloudy and cool. *Kharif* crops up. Small-pox in places. Prices stationary.
Jubbulpore	4·71	Sowings finished, prospects favourable. Health good. Prices steady.
Saugor (July 27th)	4·28	Sowings completed in Kurai and Banda tahsils. Fever and small-pox prevalent. Prices stationary.
Seoni	5·70	Weather cloudy and cool with occasional breaks. Rice being transplanted. Slight small-pox. Prices steady.
Hoshangabad	7·43	Weeding commenced, prospects good. Small-pox and cattle-disease in parts. Prices steady.
Khandwa	3·38	Weather seasonable. Sowings completed. Thirty-two cases of cholera, seventeen deaths. Prices stationary.
Raipur	Several heavy showers	More rain wanted for second ploughing; rice looks healthy. Cholera continues. Prices stationary.
Sambalpur (July 24th)	6·97	Weather cloudy with good rain. Prospects good. Cholera in parts. Prices steady.
		General Remarks.—More rain is wanted in parts of Chhattisgarh, but over the rest of the Provinces the fall has been ample, and there is now a break which is well timed for weeding.
British Burma—(July 28th)		
Akyab (July 24th)	17·84; total rainfall 70·92.	Public health good; slight cattle-disease in one township. Ploughing progressing.
Bassein	7·59; total rainfall 49·95.	Slight cholera in Bassein town; slight cattle-disease in two townships. Ploughing completed; sowing progressing.
Rangoon	6·40; total rainfall 50·67.	Public health good; cattle healthy.
Amherst (Moulmein)	20·15; total rainfall 87·76.	Public health good; cattle healthy. Ploughing and transplanting progressing.
Pegu	11·71; total rainfall 63·37.	Public health good; slight cattle-disease in three circles. Ploughing and sowing progressing throughout the district.
Henzada	7·23; total rainfall 45·30.	Slight cholera; slight cattle-disease in one subdivision. Ploughing progressing; transplanting commenced.
Prome	0·92; total rainfall 18·33.	Public health good; cattle healthy. Ploughing progressing; seedlings in good condition.
Tounghoo	4·90; total rainfall 36·75.	Public health good; cattle health good. Ploughing progressing.
Thayetmyo	1·21; total rainfall 14·98.	Public health good; cattle-disease prevalent in one circle. Sowing continues.
		General Remarks.—Slight cholera in two districts, elsewhere public health good; cattle-disease slight in six districts, prevalent in two districts, elsewhere health of cattle good. Ploughing and sowing progressing. Weather seasonable.
Assam—(July 28th)		
Gauhati	1·81 during week ending 27th instant.	Weather hot. Health of station good, but cholera still in the interior of the district; cattle-disease still prevalent in some mouzahs. Reaping of *ahu* continues; planting of *sali* in progress.
Sylhet	2·04	Damage to crops by floods in Karimgunj and South Sylhet was reported in the previous week; some damage is also reported from Sunamgunj and Sadr. Cattle-disease has appeared in Karimgunj.
Cachar	4·70	Weather warm. Cultivation for *sali* crops progressing, prospects of tea good. Common rice 12½ seers per rupee. General health good.
[illegible]garh	6·46	Weather cool. Considerable damage to *ahu* crops in some parts of North Lakhimpur and Sadr subdivision by floods. Tea doing well. District healthy.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg—(July 28th)		
Bangalore	Rainfall good in Malnad district and fair in other parts of the State.	Rain wanted in Kolar district. Standing crops in good condition, prospects of season favourable. Public health generally good. No material change in prices.
Mysore		
Mercara	10·14	Crops in good condition. Prospects of season and public health good.
Berar and Hyderabad—(July 28th)		
Amraoti	1·99	Crops in good condition; weeding commenced. Wheat 22 and *juari* 26 seers per rupee.
Akola	4·45	In some places the grain sown has been washed away by floods and a resowing has become necessary; cotton plants thriving.
Hyderabad	Average 1·46; total rainfall 20·48.	*Kharif* and *abi* sowings continue. General health fair. Prices,—wheat 14½, coarse rice 11, white *juari* 21½, yellow *juari* 22, and *tur* 15 seers per current sicca rupee.
Central India States—(July 28th)		
Indore	1·66; total rainfall 23·03.	Weather less cloudy. Prices falling.
Morar (Gwalior)	3·0; total rainfall 14·49.	Weather cloudy. Health good.
Neemuch	2·06; total rainfall 13·46.	Weather seasonable. Prices stationary. Health and prospects good.
Goona	5·05; total rainfall 12·30.	Health good.
Sutna	8·81	Weather cloudy. Health good.
Agar	2·69	Health and prospects good.
Sehore	·62	Weather seasonable. Crops fair. Health good.
Nowgong	5·11; total rainfall 15·11.	Weather seasonable. Prospects favourable. Health good.
Bhopawar (Manpur)	4·25; total rainfall 24·30.	Prospects favourable. Health good. Prices steady.
Rajputana—(July 28th)		
Abu (July 28th)	5·30	Weather very cloudy and damp.
Sirohi („ 25th)	3·64	Tanks and wells full. Health good. Crops good. Weather cloudy and windy.
Marwar („ 23rd)	·49	A year's water in Jodhpore City tanks. Health good. Crops thriving. Weather very cloudy; rain more copious in districts. Weather warm and close. Prices tending to fall.
Phandaree („ 25th)	1·46	Tanks and wells full. Crops flourishing. Health good. Prices steady. Weather showery and seasonable.
Meywar („ 24th)	2·88	Tanks and wells filling. Crops good. Health good. Prices falling.
Pertabgarh („ „)	6·06	Water in tanks and wells increasing. Health good. Prices much risen. Weather cloudy. Frequent showers during week.
Harowti („ „)	Deoli, 5·17; Tonk, 2·71.	Weather cloudy and rainy. Prospects and health good. Prices fallen.
Jhallawar („ 23rd)	6·49	Health good. Weather cloudy.
Kotah („ 24th)	3·36	Health good. Crops sprouting.
Ajmere („ 27th)	Scanty rain throughout district.	Health good. Weather cloudy. Some small tanks in Beawar district filled. Sowing in progress. Prices stationary.
Jeypore („ „)	*Nil*	Prospects and health fair.
Kerowlee („ 24th)	3·27	Tanks and wells filling. Health good. Prices falling.
Dholepore („ 21st)	2·65	Tanks and wells filling. Sowings continue. Health good. Prices stationary. Weather hot.
Bhurtpore („ 24th)	2·51	Tanks and wells full. Agricultural operations in active progress. Health good. Prices steady. Weather seasonable.
Ulwur („ 27th)	1·42	Health good. Prospects favourable.
Bickanir („ 24th)	·59; in some districts heavy rain.	Sowings continue. Tanks and wells filling. Prices falling. Weather cloudy.
Nepal—(July 22nd)		
Katmandu (July 23rd)	6·15	The abundant rainfall of the past week has enabled much rice to be transplanted.

D. BARBOUR,
Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch.)

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 4th AUGUST, 1886.

GENERAL REMARKS.—Rain is again reported from nearly all parts of the country during the week under notice. In the North-Western Provinces and Oudh, and in some parts of Bengal, Assam, and Burma, the falls have been heavy.

The standing crops continue in good condition in Madras, Mysore, and Coorg, and the prospects of the season are favourable.

Kharif sowings have been completed in most parts of Bombay, the North-Western Provinces and Oudh, the Central Provinces, and Berar. The young crops promise generally well.

In the Punjab prospects are generally good, though in the Peshawar district rain is still badly wanted. In Rajputana and Central India prospects are on the whole very favourable.

In Bengal the season promises very well. Transplanting operations are in active progress, and the early rice and jute crops are being harvested, with prospects of a good outturn. Reaping and transplanting operations are making good progress in Assam.

In British Burma the land is being ploughed for the rice crop in all districts.

The public health continues fair in all Provinces.

Prices are steady, except in the Dera Ismail Khan district of the Punjab, where they are rising, in the Hissar and Shahpore districts of that Province and in Mysore, where they are falling, and in the Delhi and Mooltan districts of the Punjab, where they are fluctuating.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras –(August 4th)		
Bellary . .	Average 1·48	Standing crops generally good. Harvest second crop paddy, yield average. Cattle-disease in two taluks.
Kurnool . .	Average last week since revised, ·56; this week, 1·88.	Standing crops fair. Small-pox in two and cattle-disease in three taluks.
Ganjam . .	Average 1·49	Fever in one and slight small-pox in three taluks; some cholera.
Kistna . .	Average ·70	Standing crops good. River 11·45 feet water over anicut. Small-pox and fever; slight cholera in one taluk.
Chingleput (Madras) .	Average 3·38	Standing crops good; harvest wet and dry crops, yield below average. Fever in one, small-pox in two, and cattle-disease in three taluks.
Combatore . .	Average ·70	Standing crops good, but *cholum* and *cumbu* require rain in two taluks; harvest dry grains, outturn *cholum* about average, rest above average. Fever in one and small-pox in two taluks; cattle-disease in one village.
Tanjore . .	Average 1·47	Standing crops generally good; harvest paddy, outturn below average.
Madura . .	Average last week since revised, ·06; this week, ·47.	Health of people and cattle generally good.
Malabar . .	Average 2·29	First crop paddy cultivation generally fair. Slight fever in one and small-pox in seven taluks.
Travancore . .	·67	Paddy ripening. Small-pox and fever in parts. *General Remarks.*—General prospects good.
Bombay—(August 4th)		
Kurrachee . .	Kurrachee, ·03; Manora and Tatta, ·02; rain during week ending 26th July in Keti, 5·24; average of 10 other stations, 2·75.	River at Kotri on 2nd 19 feet 6 inches against 18 feet 10 inches on same date last year. Two previous small-pox cases recovered, one remaining; fever in six and cattle-disease in three talukas. Wheat, red rice, and *bajri* in Kurrachee 26, 30, and 34 pounds per rupee, respectively.
Hyderabad . .	*Nil*	High winds in Hyderabad. *Kharif* cultivation and rice transplantation still continue and *mok* cultivation commenced; certain crops in Badin taluka damaged by floods caused by heavy rain, and in other talukas cultivation good. River at Kotri on 2nd 19 feet 6 inches against 18 feet 10 inches on same date last year. Fever in Hyderabad and cattle-disease in Moro talukas. Wheat 25 ½, *bajri* 38, *juari* 40, white rice 18, and red rice 30 pounds per rupee, respectively.
Ahmedabad . .	1·46; total rainfall 28·01.	Young crops generally in good condition; sowing nearly completed. Rain throughout the district. Public health good. Wheat 34 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda	1·76; total rainfall 22·94.	Health good. Sowing operations continue; young plants in good condition. *Bajri* 27, wheat 22, and rice 19 pounds per rupee.
Surat	Rain in all talukas; maximum at Chikhli 2·43; minimum at Chorasi, ·30.	Standing crops promising in some places; where damaged by heavy rain they are being resown. Fever in Chikhli and cough in Bardoli talukas. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik	Igatpuri, 6·98; Peint, 5·03; maximum at Dindori, ·82; minimum at Malegaon, ·03; Yeola, *nil*.	Sowing of *bajri* continues, nearly completed in two talukas; transplantation going on in the *dangi* parts of the district. Public health good. Wheat 28¾, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay)	Rain everyday, except on 2nd; total of week, 1·24; total to date, 80·46, being 32·89 above average.	Abnormal temperature 1° warm on 28th, 31st and 2nd, 2° warm on 3rd, *nil* on all other days; vapour in air normal; abnormal wind from north-east from 29th to 31st; wind normal on all other days.
Poona	Haveli, 1·97; Maval, 2·01; light showers in other talukas, except Indapur and Bhimthadi.	Young crops doing well. More rain wanted in Indapur, Sirur, and Bhimthadi talukas. Public health generally good; slight cattle-disease in Jamkhed and Haveli talukas; small-pox in Mudapur taluka. *Bajri* 34 and *juari* 47 pounds in the district; *bajri* 32 and *juari* 35 pounds per rupee, respectively, in Poona City.
Ahmednagar	Nevasa, ·73; Akola, ·48; very slight rain in six and *nil* in three talukas.	*Kharif* sowing completed in five and in progress in six talukas. Public health good. *Bajri*—maximum 60 pounds, minimum 30; *juari*—maximum 96, minimum 48 pounds per rupee.
Sholapur	Sholapur, ·39; Barsi, ·15; Pandharpur, ·42.	*Kharif* sowing completed throughout the district. Rain urgently wanted in the Sangola taluka. *Juari* 60 and *bajri* 41½ pounds per rupee.
Dharwar	Rain at all stations, varying from 2·28 in Gadag to ·07 in Dharwar.	Heavy rain is required for rice crops, which are good for the present, and for distroying insects causing damage to young *juari* crops in Dharwar and Ranibennur talukas. Sowing of *juari* almost completed. Public health good. Rice 24 and *juari* 51 pounds per rupee.
Kanara	Karwar, 5·18; Kumta, 18·53; Sirsi, 7·39; Yellapur, 4·02; Haliyal, ·31; total 111·54.	Rice plants healthy. Cattle-disease in Karwar, Kumta, Honawar, Akola, Sirsi and Supa Petha; public health generally good. Common rice in Karwar 14, and district average 13 seers per rupee.
Rajkot	·78; total 30·10	Weather cloudy. Fever prevailing. Crops have suffered in some parts owing to excessive rain. Wheat 34, *bajri* 30, and *juari* 44 pounds per rupee.
		General Remarks.—Fair rain throughout the Presidency; more still wanted in parts of Poona, Sholapur and Bijapur. *Kharif* sowing completed in most districts and resowing progressing in parts of Gujarat, where damage was done by excessive rain; young crops injured by floods in parts of Hyderabad and by insects in parts of Bijapur and Upper Sind Frontier. Fever and cattle-disease in parts of eight and small-pox in parts of three distticts.
Bengal—(August 4th)		
Chittagong	4·86	*Aus* rice being harvested; *amun* seedlings being transplanted. Caterpillars reported to have done some damage, otherwise prospects fair. Prices stationary. Public health good.
Dacca	5·83	Prospects of crops good; jute and *aus* paddy being reaped. Public health good.
24-Pergunnahs (Calcutta).	3·17	Prospects of early rice, jute, and sugarcane satisfactory; transplanting of *amun* going on briskly. Public health generally good.
Moorshedabad	3·22	Weather seasonable. River rose rapidly causing premature cutting of *aus* and indigo crops at places to save them; it is now nearly stationary, at about 25 feet. Transplantation of *amun* nearly completed; agricultural prospects generally good. Price of rice stationary. Some cases of cholera and fever; public health generally good.
Rungpore	6·71	*Aus* harvest nearly finished; cutting of jute continues; *aman* being transplanted. Public health fair.
Burdwan	5·79	Prospects of crops good. Public health good.
Bhagalpur	8·03	*Bhadoi* crops doing well; transplanting of rice progressing.
Purneah	0·60	Crops excellent. River rising. Usual amount of sickness.
Patna	8·71	Heavy rain during week. *Bhadoi* crops on lowlands damaged in some places; transplantation of paddy going on. Public health generally good.
Durbhunga	3·20	Transplanting of *marwa* and paddy in full progress; prospects of maize very promising; indigo manufacture going on. Prices almost stationary. Public health generally good.
Hazaribagh	2·81	Heavy rain all over district. Prospects much improved. Transplanting in full progress. General health good.
Cuttack	0·72	Weather hot and cloudy. Late rice being transplanted; early rice being weeded. Price of rice unchanged. Sporadic cholera reported from interior; public health generally good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Midnapore	3·66	Prospects of crops good; some danger of inundation. Public health excellent.
Khoolna	3·85	Weather cloudy and rainy. *Aus* rice coming into flower; cultivation of *amun* continues well, prospects good. Public health good.
Dinagepore	2·45	General rain. Crops doing well; transplanting of late rice plants progressing. Rivers full. Cattle-disease in South.
Pubna (Serajgunge)	3·39	Sufficient rain. Crops doing well. River rising. *Aus* and jute where in danger from flood being cut.
Gya	14·89	Crop prospects excellent; *bhadoi* crops nearly ready for harvest. Floods have caused slight damage. Prices nearly stationary. Public health good.
Chumparun	2·47	Prospects of *bhadoi* crops favourable; paddy seedlings being transplanted. Prices stationary. Public health fair.
		General Remarks.—Rainfall, though copious in some parts, was very fairly distributed throughout Province, except in Cuttack, which had a very slight share. Present agricultural prospects everywhere very favourable; transplanting of late rice seedlings in full swing; autumn crops and sugarcane promising well in some districts; early rice and jute being harvested with prospects of good outturn; indigo manufacture proceeding. Sporadic cholera reported from some districts, but public health generally good. Price of rice generally remains stationary.
N.-W. Provinces and Oudh—(August 4th)		
Benares (Aug. 2nd)	3·60 to 4·40	Prospects fair, but ploughing for *rabi* sowings stopped by heavy rain. Supplies plentiful. Prices steady. Health generally good.
Gorakhpore („ „)	6·80 at Sadr	Weather cloudy and sultry. *Kharif* crops in flourishing condition. Prices stationary. Health fair.
Fyzabad („ 3rd)	Heavy rain during week.	Crops flourishing. Bazaars scantily supplied owing to bad roads. Slight rise in prices. General health good.
Lucknow („ 2nd)	Heavy rain during week, average 5·0.	*Mash* and *moth* are being sown; weeding in progress. Supplies sufficient. Prices stationary. Health good; condition of cattle fair.
Rae Bareli („ „)	Heavy rain has fallen during the week.	*Kharif* crops are being weeded. Supplies ample. Prices steady. Public health good; few cases of cattle-disease reported.
Partabgarh („ 3rd)	·10 to 3·10	*Bajri* sowing still retarded, prospects everywhere good. Prices stationary. Slight cholera in Patti.
Allahabad („ „)	Average 3·70	*Kharif* germinating well; rice being transplanted. Manure not supplied. Prices show slight rise. Health good.
Cawnpore („ „)	·60 to 6·10	Crops thriving; weeding in progress. Prices steady. Cholera continues in City and Cantonments and cattle-disease in three parganas.
Banda („ 2nd)	Occasional rain	Weather cloudy; a break much needed. Some damage to crops on low-lying grounds owing to excessive moisture. Prices stationary. Public health good; cattle-disease decreasing.
Farakhabad („ 3rd)	2·90 to 7·70	A break is wanted. Prices stationary. Slight fever in two tehsils.
Sitapur („ „)	Heavy rain in district; 6·0 at Sadr on 1st August.	A break is now wanted for sowing of *bajri* and *moth*.
Bareilly („ „)	Sufficient rain has fallen.	Crops are good. Health of people good; two cases of cholera reported; condition of cattle good.
Ballia („ „)	Average 2·50	Sowing and weeding progressing; prospects of *kharif* crops not very favourable owing to incessant rain. Health good.
Kumaon („ „)	Good falls of rain during week.	*Kharif* crops promising. Prices falling. General health fair; typhus fever in district; cattle-disease decreasing.
Agra („ 2nd)	Heavy rain from 2·30 to 12·80.	A break much needed. Prices steady. Health good.
Jhansi („ „)	Good rain	Young crops doing well. Prices generally steady. Condition of people and cattle normal.
Meerut („ 3rd)	1·40 to 7·90; 6·0 at Sadr on 2nd August.	Prospects favourable; *rabi* ploughing in progress. Prices stationary. Slight fever reported.
		General Remarks.—Heavy rain has fallen throughout the Provinces and a break is much needed. Prospects are on the whole good. Markets are well supplied and prices generally steady. Public health is fair.
Punjab—(Aug. 4th)		
Hissar	4·50	Health good. Prices falling.
Delhi	3·64	Health good. Prices fluctuating.
Umballa	7·94	Health fair. Prices almost stationary.
Jullundur	2·0	Health good. Prices stationary.
Ferozepore	·90 at Sadr	Health good. Prices stationary.
Amritsar	3·0	Health good. Prices stationary.
Sialkot	3·50	Health good. Prices stationary. Prospects most favourable.
Lahore	1·0	Health good. Prices stationary.
Mooltan	1·60 at Sadr	Health good. Prices fluctuating.
Rawalpindi	2·20	Health good. Prices stationary.
Shahpur	Rainfall throughout the district.	Health good. Prices falling. Prospects good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	1·42	Health good. Prices rising.
Peshawar	·40	Health fair. Prices stationary.
		General Remarks.—Rain has fallen in all districts, more much wanted in the Peshawar district. General health good. Prices rising in the Dera Ismail Khan district, falling in the Hissar and Shahpur districts, fluctuating in the Delhi and Mooltan districts; elsewhere stationary.
Central Provinces—(August 4th)		
Nagpur	·26	Weather close with occasional showers. Rice sowings retarded. Small-pox in places. Prices steady.
Jubbulpore	3·34	Prospects favourable. Weeding commenced. Health good. Prices steady.
Saugor (August 3rd)	5·29	Good rain. Sowings in progress. Slight small-pox. Prices stationary.
Seoni	Some rain in Lakhnadon tahsil.	Weather cloudy and cool. Rice transplanting retarded. Health good. Prices rising.
Hoshangabad	Slight rain almost daily.	Slight small-pox. Cattle-disease continues. Prices steady.
Khandwa	·11	Weather cloudy occasionally. Weeding commenced. Prospects fair. Forty-three cases of cholera, twenty deaths. Wheat 14 and *juari* 32 seers per rupee.
Raipur	1·19	Weather cloudy and close. Rice ploughings continue. More rain wanted. Cholera prevalent. Rice 22½, and wheat 26 seers per rupee.
Sambalpur (July 31st)	3·74	Weather cloudy and warm. Prospects good. Cholera in Bargaul tahsil. Prices stationary.
		General Remarks.—Rain has continued falling in the north of the Provinces and along the Nerbudda valley, but has held off in the south and in Chhattisgarh, where more is wanted. In the Nagpur country the transplantation of rice is being checked by lack of rain. Cholera continues in Chhattisgarh and in Nimar districts.
British Burma—(Aug. 4th)		
Akyab	6·32; total rainfall 77·24.	Public health good; slight cattle-disease in two townships. Ploughing nearly finished.
Bassein	3·26; total rainfall 53·21.	Public health good; cattle healthy. Sowing progressing.
Rangoon	·58; total rainfall 54·19.	Public health good; cattle healthy.
Amherst (Moulmein)	0·33; total rainfall 97·09.	Public health good; cattle healthy. Ploughing and transplanting progressing.
Pegu	4·0; total rainfall 67·37.	Public health good; cattle-disease in two circles. Ploughing and sowing progressing.
Henzada	6·09; total rainfall 51·42.	Public health good; slight cattle-disease in two townships. Ploughing progressing; transplanting commenced.
Prome	2·35; total rainfall 20·68.	Public health and health of cattle good. More rain has fallen, and plants are doing well.
Tounghoo	5·15; total rainfall 41·90.	Public health and health of cattle good. Ploughing progressing.
Thayetmyo	4·24; total rainfall 19·23.	Public health good; cattle-disease prevalent in two circles. Sowing progressing.
		General Remarks.—Slight cholera in two townships in Thongwa district; elsewhere public health good; cattle-disease prevalent in two circles of Thayetmyo district and slight in parts of six districts; elsewhere cattle healthy. Ploughing operations are progressing favourably in all districts.
Assam—(August 4th)		
Gauhati	8·32 during week ending 3rd instant.	Weather hot. General state of health of station tolerably good; *Kalu-asar* reported from Luki tehsil; cholera disappearing in the interior of the district; cattle-disease reported from some mouzahs. Reaping of *ahu* nearly finished; planting of *sali* still in progress; tea doing well.
Cachar	8·30	Weather hot. About half of *aus* and *dumahi* crops damaged by the late flood; transplanting of *sali* crops progressing. Common rice 13 seers per rupee. Prospects often good. Health good.
Sylhet	6·47	State and prospects favourable.
Dibrugarh	Heavy rain throughout the week; 9·25.	Outbreak of cattle-disease reported from North Lakhimpur. Transplanting of *sali* continues. Public health good.
Mysore and Coorg—(August 4th)		
Bangalore	Rain has been general throughout the State; at Civil and Military Station, 2·72; Bangalore district, 2·69; Mysore, 2·81; Kalar, ·66.	Standing crops in good condition. Rain reported to be too much for young crops in Gubbi taluk of the Tumkur district. Prospects of season fair. Public health generally good. Prices show a tendency to fall.
Mysore		
Mercara	1·50	Crop prospects good. Health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad—(August 4th)		
Amraoti	*Nil*	Weather close. *Kharif* crops thriving and are being weeded. Wheat 22 and *juari* 26 seers per rupee.
Akola	·39	Weather cloudy. Resowing of *juari* completed; crops doing well; weeding operations in progress.
Hyderabad	Average ·98; total rainfall 21·46.	Sowing of *kharif* and *abi* crops continues. Tanks full. General health fair. Prices,—wheat 14⅓, coarse rice 11¾, white *juari* 21¼, yellow *juari* 22, and *tur* 15 seers per current sicca rupee.
Central India States—(August 4th)		
Indore	·40; total rainfall 23·43.	Weather still overcast. Prices steady.
Morar (Gwalior)	3·45; total rainfall 17·94.	Health and prospects good. Weather cloudy.
Neemuch	·05; total rainfall 13·51.	Weather cloudy. Crops and health good.
Goona	·58	Break wanted. Health good.
Sutna	5·32	Weather cool and cloudy. Health and prospects good.
Agar	·11	Health and prospects good.
Sehore	·46	Weather seasonable. Crops fair. Health good.
Nowgong	6·02; total rainfall 21·13.	Break wanted. Health good.
Bhopawar (Manpur)	*Nil*	Crops thriving. Prices steady. Health good.
Rajputana—(August 4th)		
Abu (Aug. 4th)	7·07; incessant rain	Weather boisterous and overcast during all the week; today clouds apparently clearing,
Sirohi („ 1st)	·39	Tanks and wells full; health good. Crops good. Weather overcast, but cool with drizzling rain.
Marwar („ 30th)	·23	More than last year's water in Jodhpur City tanks. Health good; mild fever prevailing. Crops good. Weather very cloudy, warm and close; nights getting cool. Prices stationary.
Kherwara („ 1st)	1·12	Tanks and wells satisfactory. Crops excellent. Health good. Prices steady. Weather seasonable.
Meywar („ 31st)	·21	Tanks and wells filling. Crops good. Health fair. Prices falling. Slight rain; weather very cool.
Pertabgarh („ „)	1·22	Water in tanks and wells increasing. Health good. Weather cloudy and showery. Prices falling.
Harowti („ „)	Deoli, ·10; Tonk, 1·21.; previous week, Shahpura, 1·24.	Prospects and health good.
Jhallawar („ 30th)	·71	Crops good.
Kotah („ 31st)	*Nil*	Weather cloudy. Prospects favourable.
Ajmere („ 3rd)	*Nil*	Health good. Weather cloudy. Rain wanted. Prices steady.
Kerowlee („ 31st)	3·93	Tanks and wells filling. Health good. Prices steady. Weather seasonable.
Dholepore („ 30th)	2·59	Tanks full; wells filling. Crops rising. Health good. Prices steady. Weather seasonable.
Bhurtpore („ 31st)	3·66	Tanks and wells full. Sowing completed; weeding in progress; germination good. Health good. Prices low.
Ulwur („ 30th)	1·40	Crops and health good. Prices stationary.
Bickanir („ 31st)	1·03	Good rain in some districts; tanks and wells filling. Sowings continue. Health good. Prices stationary. Weather cloudy.
Nepal—(July 25th)		
Katmandu (July 30th)	3·56	State and prospects of the crops fair. Rice transplanting finished.

PUBLICATION OF PROCEEDINGS OF A MEETING OF THE ROYAL COMMISSIONERS HELD AT THE COLONIAL AND INDIAN EXHIBITION ON THE 3rd MAY, 1886.

No. $\frac{1892}{1-42}$ *Ex.*

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, 6th August, 1886.

Read the following :—

No. 70 (*Statistics and Commerce*), dated India Office, London, 8th July, 1886.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I forward herewith fifty copies of the printed Proceedings of a Meeting of the Royal Commission for the Colonial and Indian Exhibition held at South Kensington on the 3rd of May last, which I have received from Sir Philip Cunliffe Owen, with the request that they may be forwarded to India for publication. Further copies can be furnished if desired.

2. His Royal Highness the Prince of Wales is especially desirous that the thanks of the Royal Commission, as expressed in his address, should be conveyed to Your Excellency and the Supreme Government of India, to Their Highnesses the Princes of India, and to the Officers of the Revenue and Agricultural Department of your Government.

COLONIAL AND INDIAN EXHIBITION, LONDON, 1886.

Proceedings of a Meeting of the Royal Commission, held in the Durbar Hall of the Indian Palace at the Exhibition, on Monday, 3rd May, 1886.

The Royal Commission for the Colonial and Indian Exhibition met on Monday, 3rd May, 1886, in the Durbar Hall of the Indian Palace at the Exhibition, under the presidency of His Royal Highness the Prince of Wales. The following members of the Commission were present:—Major-General H. R. H. the Duke of Connaught and Strathearn, Field-Marshal Commanding-in-Chief, H.R.H. the Duke of Cambridge, the Duke of Manchester, the Duke of Buckingham and Chandos, the Marquess of Salisbury, the Marquess of Normanby, the Marquess of Ripon, the Marquess of Lorne, the Earl Cadogan, the Earl Granville, the Earl of Iddesleigh, the Viscount Bury, Field-Marshal the Lord Napier of Magdala, the Hon. Edward Stanhope, M.P., the Right Hon. Sir James Fergusson, Bart., the Right Hon. Hugh Culling Eardley Childers, M.P., the Right Hon. Sir William Henry Gregory, the Right Hon. Sir Lyon Playfair, M.P., the Right Hon. Sir Michael Edward Hicks Beach, Bart., M.P., the Right Hon. Sir Louis Mallet, the Right Hon. the Lord Mayor of London, the Right Hon. the Lord Mayor of Dublin, Sir Henry Thurstan Holland, Bart., M.P., Sir Daniel Cooper, Bart., Sir John Rose, Bart., Field-Marshal Sir Patrick Grant, General Sir Frederick Paul Haines, Major-General Sir Henry Creswicke Rawlinson, Lieutenant-General Sir Charles Henry Brownlow, General Sir Edwin Beaumont Johnson, Lieutenant-General Sir Henry Dominick Daly, Lieutenant-General Sir Samuel James Browne, Major-General Sir Peter Stark Lumsden, Sir Robert George Wyndham Herbert, Major-General Sir Frederick Richard Pollock, Lieutenant-General Sir Harry Burnett Lumsden, Surgeon-General Sir Joseph Fayrer, Sir Joseph Dalton Hooker, Colonel Sir Owen Tudor Burne, Sir Charles Tupper, General Sir Edward Selby Smyth, Sir Arthur Blyth, Sir Francis Dillon Bell, Sir Saul Samuel, Sir William Charles Sargeaunt, Sir Charles Hutton Gregory, Sir John Coode, Sir George Christopher Molesworth Birdwood, Major-General John Watson, Colonel Henry Yule, Mr. Horace George Walpole, Lieutenant-General Richard Strachey, Major-General James Michael, Colonel Arthur Edward Augustus Ellis, Mr. Robert Anstruther Dalyell, Mr. Arthur Hodgson, Captain Montagu Frederick Ommanney, Mr. Augustus John Adderley, Mr. James Francis Garrick, the President of the Royal Academy of Arts, the President of the Institution of Civil Engineers, Mr. Henry Coppinger Beeton, Mr. Julius de Reuter, Mr. William George Pedder, Mr. John Pender, also the Hon. Sir Ashley Eden, Mr. A. W. Gadesden, Mr. E. W. Hamilton, Sir Philip Cunliffe Owen, *Secretary*, Mr. Edward Cunliffe Owen, and Mr. J. R. Royle, *Assistant-Secretaries*.

The Prince of Wales addressed the meeting as follows :

MY LORDS AND GENTLEMEN—

I have thought it right to call you together on this the eve of the Opening of the Exhibition by Her Majesty the Queen, in order that I may report to you the various steps that have been taken in the preparations for this Exhibition since the last time I had the honour of addressing you.

I would, in the first place, wish to say a few words with regard to the constitution of the Royal Commission. You are doubtless aware that Her Majesty, in requesting you to act on a Royal Commission, defined your duties to be for the purpose of advising upon the best mode by which the Products of Industry, Agriculture, and the Fine Arts of Her Majesty's Colonial and Indian Dominions might be procured and sent to this Exhibition.

The appointment of this Commission was, I understand, framed upon the precedent of the Exhibition of 1851, and following the example of that Exhibition, it was thought desirable that a Charter should be applied for which should make the Royal Commission a body corporate, and which should give it power to organise and carry on such an Exhibition. This Charter was granted on the 15th September, 1885.

You will perhaps remember that, in my last address, I informed you of the initiative action, which I, as your Executive President, had taken, and which you were kind enough then to confirm in order that the proposals for holding a Colonial and Indian Exhibition should be properly brought to the notice of the Governments of India and of the various Colonies.

I then stated that from the answers which had been received from the Colonies and from India it was clear that this Exhibition would receive the hearty co-operation of all concerned.

I need only ask you to make an inspection of the various sections of the Exhibition today before leaving the buildings for you to at once realise how cordially the Governments of India and of the various Colonies have acceded to the invitation which I, as your President, forwarded to them in November, 1884, and I am sure that you will join with me in requesting the Executive Commissioners to take an early opportunity of conveying to their Governments the sincere thanks of the Royal Commission for having so thoroughly realised our views as to the form that this Exhibition should take.

To these gentlemen themselves are also due our own warmest acknowledgments.

I feel also convinced that you will consider it a pleasing duty to record the [illegible] obligation we are under to His Excellency the Viceroy and the Supreme Government of India for the admirable organisation which, under the direction of Mr. Buck, has been displayed by the Revenue and Agricultural Department, and by the officers who have assisted it.

I further propose that we should request the Viceroy to express our acknowledgments to their Highnesses the Princes of India, who have, by their liberal contributions, so materially added to the beauty and interest of the Indian section.

With regard to the administration of the Royal Commission, I may state that the Finance Committee—the appointment of which you confirmed at the last meeting—is most carefully discharging the duties which you then confided to it.

I have to ask you to confirm the appointment of the following gentlemen, who were good enough to accept my invitation to be added to it—

The Right Hon. Sir Lyon Playfair,
The Hon. Sir Ashley Eden,
The Right Hon. Sir Henry Thurstan Holland,
Mr. E. W. Hamilton,
Mr. A. W Gadesden.

It is with much pleasure that I am able to report that the Guarantee Fund, which at the time of the last meeting amounted to £128,600, has now reached a total of £218,430.

Of this amount the Corporation of the City of London has voted £10,000, and among the contributors are many of the great City Companies.

I am sure you will agree with me in cordially thanking these Corporations, and the gentlemen to whose liberality this very satisfactory result is due. They may rest assured that no endeavour will be spared to prevent the necessity of having recourse to the contributions which they have so generously placed at our disposal.

I have to ask you to confirm the appointment of a Committee which I have requested to act for the purpose of superintending the lighting by electricity of the buildings and grounds of the Exhibition.

The gentlemen composing this Committee are—

Sir Frederick Abel, *Chairman*,
Colonel Sir Francis Bolton, and
Mr. W. H. Preece.

In order that practical effect may be given to the suggestion which I referred to in my last address—that a hospitable reception should be offered to visitors from the Colonies and India, and that facilities should be given to them for visiting the great manufacturing centres and places of interest in Great Britain—I have requested the following members of the Royal Commission to act as a Reception Committee:

The Duke of Abercorn, *Chairman*,
The Earl Cadogan, *Vice-Chairman*,
The Marquis of Lorne, *Vice-Chairman*.

Colonial Sub-Committee.

The Duke of Manchester, *Chairman*,
The Right Hon. The Lord Mayor,
Sir Daniel Cooper,
The Hon. Sir Charles Tupper,
Sir Thomas Brassey,
General Sir Selby Smyth,
Sir Charles Hutton Gregory,
Sir John Coode,
Mr. Arthur Hodgson,
Mr. Samuel Morley.

Indian Sub-Committee.

Field-Marshal Lord Napier of Magdala, ***Chairman***,
The Right Hon. Sir James Fergusson,
Major General Sir Peter Lumsden.
Major-General Sir Henry Rawlinson,
Major-General Sir Richard Pollock,
Lieutenant-General Sir Charles Brownlow,
Lieutenant-General Sir Henry Daly,
Lieutenant-General Sir Samuel Browne,
Lieutenant-General Sir Harry Lumsden,
Sir Barrow Helbert Ellis,
Colonel Sir Owen Tudor Burne,
Sir George Birdwood,
Mr. Arthur Hodgson, *General Secretary*,
Lieutenant-General Henry K. Burne, *Secretary*,
Mr. H. Trueman Wood, *Secretary*.

I trust that the Fund which has been inaugurated by them for the above purpose may before long reach a handsome amount, and feel assured that no efforts will be spared throughout the country to render the visit of our kinsmen a pleasant one.

Acting on the precedent of the organisation of the Great Exhibition of 1851, I, some time since, caused a letter to be addressed to all the Mayors and Local Boards, of the United Kingdom, suggesting to them the advisability of bringing before the working classes of their various districts the benefits that would ensue from the formation of Clubs by subscribing weekly, to which a sufficient sum of money would be laid by to enable the members to visit the Exhibition.

I am happy to state that this suggestion has been responded to in many places, and I trust that a large number of the working classes, who would otherwise have found it impossible to come here, will visit the Exhibition, and will benefit by the vast amount of instruction to be derived therefrom.

I am very sensible of the facilities which the Railway Companies have afforded to me in this matter; without the valuable assistance which they have extended, it would have been impossible to have obtained so much success in the formation of these Clubs: I must take this opportunity of requesting you also to join with me in acknowledging the help which the Railway Companies have promised to the Royal Commission for conveying all classes of visitors to the Exhibition.

I have appointed a Committee, consisting largely of Executive Commissioners, for organising a series of Conferences and Lectures during the summer on subjects cognate to the Exhibition, and am happy to state that I have been promised the aid of the Councils of the Society of Arts and the Royal Colonial Institute in this matter.

I have gratefully accepted an offer made by the Lords of the Committee on Education to give facilities to visitors to the Exhibition for viewing the India Museum.

I have sanctioned arrangements by which the Royal Albert Hall forms an integra part of the Exhibition, and by which the National Fish Culture Association maintain the Aquarium, which has always formed a very popular attraction at previous Exhibi tions; facilities have also been given to the Royal Horticultural Society for the holding of their Flower and Fruit Shows in the Conservatory of the Exhibition.

I am desirous of expressing my thanks to Her Majesty's Board of Customs fo having so greatly facilitated the transmission of goods to the Exhibition.

In conclusion, I feel sure that you will join with me in the expression of a desir to record our deep sense of the gracious act which Her Majesty the Queen has con sented to perform to-morrow.

I trust that I shall have the pleasure of meeting you to-morrow morning at half-pas eleven o'clock at the Principal Entrance, where we shall await the arrival of the Queen

The DUKE OF CAMBRIDGE: Your Royal Highnesses, my Lords, and Gentlemen, have much pleasure in moving the following resolution:—

"That this meeting of the Royal Commission for the Colonial and Indian Exhibition, havin heard the address of His Royal Highness the Prince of Wales, Executive President, in which Hi Royal Highness informs the Royal Commission of the preparations he has caused to be mad since the last meeting for the holding of this Exhibition, fully approve of these preparations and confirm the appointment of the gentlemen referred to by His Royal Highness to act on the Finance, Reception, and Conference Committees.

"The Royal Commission desire to express their cordial thanks to the Corporation of th City of London, and to the City Companies, Firms, and individuals who have since the last meet ing contributed to the Guarantee Fund; and in conclusion the Royal Commission wish to recor their cordial thanks to His Royal Highness for the able and energetic manner in which he ha acted on their behalf as Executive President."

I am sure you will adopt this resolution most cordially. After the remarks of hi Royal Highness the Prince of Wales it is unnecessary for me to say much as to th objects of the Exhibition, but there is one point with which the Prince of Wales coul not deal with that freedom which I can, and that is the great trouble and pains whic His Royal Highness has given to this Exhibition. It is not the first time that His Roy Highness has acted as President in undertakings of this nature, and it is very difficu for any individual to praise him in his presence without appearing fulsome, but it i not fulsome to say that he has always devoted his whole energies to bringing everythin to a successful issue with which he is connected.

I could see yesterday the results of the extraordinary ability with which thos under him have carried out his wishes.

This is an Exhibition entirely confined to Her Majesty's Colonial and India Dominions, and it stands absolutely alone in that respect. It is admirably adapted t the interests of a great country, in that it brings together and shows in one commo centre all the advantages which India and the Colonies possess in their respectiv spheres. I think the way in which these advantages will be brought to notice in thi Exhibition will tend to that unanimity and good feeling which happily exist among al branches of Her Majesty's subjects, and will consolidate that great Empire to which w are all proud to belong and hope to see extended in a peaceful manner for many gener ations.

I am sure you will cordially and spontaneously vote our thanks to His Roya Highness for the trouble he has taken, and congratulate him on the success he has bee able to produce.

LORD GRANVILLE: The illustrious Duke who has just sat down has under taken a task which he has performed most admirably. I have much pleasure in second ing the resolution. After the report we have heard, which shows such an immens deal of comprehensive work done, I think it is right to call attention to the fact tha the pivot on which it has all turned has been the exertions of His Royal Highness and to how exactly in this case he has followed the example of his illustrious fathe in not being merely an honorary President, but in laying down the general principle and in going into every possible detail likely to insure the success of the Exhibitior We are desired to thank the various bodies who have assisted, but we must remembe that a great deal of their good work has been excited by the genial influence of Hi Royal Highness himself. I do not wish to go into many parts of the subject, but on point is connected with my official position at this moment, and that is the beneficia

effect which this Exhibition is likely to exert on the Colonial Possessions of Her Majesty. It will be a great disappointment indeed if it does not contribute to the interchange of commodities between the two countries. I believe the British public is not aware of the enormous resources of the Colonies and British Empire generally, and it is clear that if so many distinguished Colonial men and women come to this country at this time, it will increase not only our knowledge, but the personal good feeling which now exists. I heartily concur with the noble Duke in asking you to agree to the Resolution he has so well moved.

The PRINCE OF WALES: Before the meeting disperses, I wish to return you my sincere thanks for the most kind and flattering manner in which my illustrious relative has proposed this vote of thanks, and to the noble Lord who has so ably seconded the same. I can assure you that the compliments you have been kind enough to pay me have been really quite undeserved. I need hardly say that I certainly take the deepest interest in the success of this Exhibition, but really all the arrangements and the trouble that has been taken are owing to Sir Philip Cunliffe Owen and his two able assistants, Mr. Edward Cunliffe Owen and Mr. J. R. Royle. I can only say that those who have not yet seen the Exhibition will be satisfied with what they see if they take the present opportunity of going round the Courts, and they will be struck with the wonderful resources of the Empire. No pains and no expenses have been spared by the Governors and Colonial Commissions, and by the Executive Commissioners here, to make each of their departments a success, and there has been a peaceful rivalry between them the one to excel the other. I hope that this Exhibition will be not only entertaining to the eye, and that it will be of material benefit to our own countrymen, but that it will also tend to produce a still greater feeling of brotherly love between ourselves and the rest of Her Majesty's subjects. I can only add that I trust that the sun may favor us to-morrow as it has done to-day, and that we may have "Queen's weather" in every sense of the word.

The meeting then terminated.

ORDER.—Ordered, that the foregoing papers be published for general information in the Supplement to the *Gazette of India*.

C. J. LYALL,

Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 11th August, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble Major-General G. T. Chesney, R.E., C.S.I., C.I.E.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Colonel W. G. Davies, C.S.I.

UPPER BURMA LAWS BILL.

The Hon'ble MR. ILBERT moved that the Bill to declare the law in force in Upper Burma be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley, the Hon'ble Sir A. Colvin and the Mover, with instructions to report within six weeks.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *British Burma Gazette* in English and in such other languages as the Local Administration thinks fit.

The Motion was put and agreed to.

SUITS VALUATION BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill to prescribe the mode of valuing certain suits for the purpose of determining the jurisdiction of Courts with respect thereto. He said:—

"This is a little Bill of no great importance, and its main object is to provide means for determining the value of land where it is necessary to ascertain that value for the purposes of jurisdiction.

"The institution-fee payable under the Court-fees Act in suits for the possession of land is computed according to the value of the land, and in order to facilitate this computation the Act lays down certain rules of a somewhat arbitrary character, under which the value of the land is declared to be a particular multiple of the revenue charged or chargeable upon it. Under the various Civil Courts Acts the jurisdiction of the inferior Courts is usually limited by reference to the value of the subject-matter of the suit. One of these Acts—the Madras Civil Courts Act of 1873—directs that, where the subject-matter of a suit is land, its value shall, for the purposes of jurisdiction, be fixed in the manner provided by the Court-fees Act for the purpose of determining the institution-fee. The other Civil Courts Acts do not contain any similar direction, but it appears to be a very common practice in all the provinces to treat the value of land for court-fee purposes as being also its value for jurisdictional purposes. The practice is not strictly warranted by law, and is opposed to some rulings of the Bombay High Court, but there is a great deal to be said in favour of it on the score of convenience.

"However, under the rules laid down in the Court-fees Act, land is, in many parts of the country, including the Madras Presidency, assessed at something very much below its net market-value. This does not much matter for the purposes of court-fees, because the Government has not the slightest intention or desire to increase the amount of those fees; on the contrary, it would reduce them if the financial situation permitted. But the Madras Government tells us that the effect of applying the court-fees rules for the purpose of determining jurisdiction is to bring within the jurisdiction of some of the inferior Courts land-suits of a class which those Courts were not intended, and indeed are not qualified, to deal with; and accordingly that Government desires to substitute some other rules which would bring out a valuation more in accordance with the facts. But unfortunately we are not in a position to touch the Court-fees Act at present, and we do not desire to interfere with the practice which is observed in provinces other than Madras, unless and until it is shown to produce inconvenient results. Under these circumstances we propose to meet the wishes of the Madras Government as far as we can by authorising Local Governments, after consulting their High Courts, and with the previous sanction of the Government of India, to frame rules for determining the value of land for jurisdictional purposes. If the Madras Government thinks fit to frame such rules, the rules will, when they come into force, supersede the provisions of the Madras Civil Courts Act to which I have referred. Whether other Local Governments will consider it worth while to frame such rules on the subject I do not know, but, if they do, the rules framed by them may, whenever the time comes for amending the Court-fees Act, be of material assistance in helping the Government of India to lay down principles of computation which will bring out results more in accordance with the facts than those embodied in the old Act. I repeat, however, that there is no intention to do anything which will directly or indirectly raise the amount of institution-fees payable in suits relating to land.

"This is the main object of the Bill. The Bill contains one or two other minor provisions to which it is not necessary for me to refer at the present stage."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

INDIAN EVIDENCE ACT, 1872, AMENDMENT BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill to amend the Indian Evidence Act, 1872. He said:—

"The object of this Bill is to supply what I cannot but think was merely an accidental omission in dealing with the Act of 1872. Section 125 of that Act is as follows:—

'No Magistrate or Police-officer shall be compelled to say whence he got any information as to the commission of any offence.'

"This provision of the Indian law follows that of the English law, but the English law goes somewhat further by giving to Revenue-officers the same protection as is here given to Magistrates and Police-officers. In England not only is it the case that witnesses may not be compelled to disclose, but they are not even permitted to be asked, the names of those from whom they received information as to frauds on the revenue. The law is perfectly clear on this point. For instance, I will read a passage from Bell's well-known *Laws of Excise*, which states the law on the subject as follows:—

'It is a rule of evidence applicable to criminal cases, and the same rule has always been held to apply to penal informations at the suit of the revenue, that a witness is not permitted to disclose privileged communications brought to his knowledge for the furtherance of justice. "This is not the privilege of the witness, but may be justly called a public privilege, and is observed on a principle of public policy and from regard to public interests" (1 *Phil. Ev.* 272). Hence "those questions which tend to the discovery

of the channels by which the disclosure was made to the officers of justice are not permitted to be asked" (*Rex* v. *Hardy*, 24 Howell's S. T. 753—Eyre, L.-C. J.). "If the name of the informer were to be disclosed, no man would make a discovery, and public justice would be defeated" (*Id.*, p. 814—Buller, J.). In the case of *Attorney-General* v. *Bryant* it was held that a witness for the Crown could not be asked "Did you give the information?" (15 M. & W. 169).'

"I have not been able to ascertain from the records of the Legislative Department why the English law with respect to the disclosure by Revenue-officers of the source of information as to the commission of offences against the revenue was not incorporated in the Indian Evidence Act of 1872. It is possible that some reason may be suggested, but until a reason is forthcoming I cannot help thinking that the omission must have been purely accidental. The Government is given to understand that the omission has caused serious inconvenience, and is even said to be seriously impairing the efficiency of the Excise and Salt Departments of the Bombay Presidency. Accordingly, we propose to amend section 125 of the Indian Evidence Act of 1872 by the inclusion of Revenue-officers, and thus to assimilate the Indian to the English law upon this point.

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 18th August, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

SIMLA;
The 13th August, 1886.

Note.—The Meeting fixed for the 28th July, 1886, was subsequently postponed to the 11th August, 1886.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 11th AUGUST, 1886.

GENERAL REMARKS.—There has been a break in the rains in some districts in the North-Western Provinces and Oudh, the Punjab, and the Central Provinces. In almost all other parts of the country rain has fallen. In parts of Bengal and Assam the falls have been heavy.

In Madras, Mysore, and Coorg the standing crops are in good condition, and prospects continue favourable.

Kharif sowings have been completed in nearly all districts of Bombay and the North-Western Provinces and Oudh, and the young plants are doing well. In Nimar and in the Nagpur and Chhattisgarh districts of the Central Provinces more rain is much wanted.

Prospects are generally good in the Punjab, but more rain is required in the Hissar, Shahpur, Rawalpindi, and Peshawar districts.

In Rajputana and Central India States agricultural prospects continue satisfactory, but more rain is needed in places.

Excessive rain has injured the crops in parts of Bengal, but prospects, on the whole, are still very favourable.

Ploughing and sowing and transplanting are in progress in Lower Burma.

In Assam heavy and incessant rain has caused some damage to crops in Sylhet.

The public health is generally fair.

Prices are on the whole steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(August 11th)		
Bellary	Average last week since revised, 1·50; this week, ·02.	Standing crops generally good; harvest second crop paddy, yield average. Cattle-disease in two taluks.
Kurnool	Average 2·45	Standing crops fair. Small-pox in two taluks and cattle-disease in one.
Ganjam	Average last week since revised, 1·04; this week, 1·21.	Fever in one and slight small-pox in three taluks; some cholera.
Kistna	Average last week since revised, ·74; this week, 2·52.	Standing crops good. River 5·15 feet water over anicut. Slight fever and cholera.
Chingleput (Madras)	Average 1·73	Standing crops good; harvest paddy and indigo, outturn below average. Fever in one, small-pox in three, and cattle-disease in five taluks.
Coimbatore	Average 2·01	Standing crops generally good; harvest dry grains, outturn *cholum* about average, rest above average. Small-pox in one village.
Tanjore	Average 4·18	Standing crops good, but in parts of one taluk slightly damaged by excessive rain; harvest paddy, outturn below average. Cattle-disease in one taluk.
Madura	Average last week since revised, ·55; this week, 2·24.	Cattle-disease in one taluk.
Malabar	Average 1·20	More rain wanted in some taluks. First crop paddy in ear in three taluks, elsewhere progressing. Slight fever in one and small-pox in six taluks; cattle-disease in one.
Travancore	1·34	Paddy almost ripe. Small-pox and fever in parts. *General Remarks.*—General prospects good.
Bombay—(August 11th)		
Kurrachee	In Kurrachee, ·03; in Manora, ·06.	Weather cloudy. River at Kotri on 9th, 19 feet 10½ inches against 17 feet 1 inch on same date last year. Fever in three and cattle-disease in one taluka. Wheat, red rice and *bajri* in Kurrachee 26, 30 and 34 and in Tatta 24, 40 and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	*Kharif* cultivation good. Irrigation benefited by recent rains. Rice transplantation almost over; *bajri* and *til* cultivation in progress. River at Kotri on 9th, 19 feet 10½ inches against 17 feet 1 inch on same date last year. Fever in two, cattle-disease in one, and small-pox in two talukas. Wheat 25½, *bajri* 38, *juari* 40, white rice 18, and red rice 28 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad	·18; total 28·19; rain in three talukas and light showers in others.	Young crops doing well. Public health good. Wheat 35 and *bajri* 31 pounds per rupee.
Baroda	·34; total 23·28	Health good. Sowing completed in Naosari, Kadi, and Amreli divisions, and continued in Baroda division. Standing crops in good condition. *Bajri* 31, wheat 24, and rice 23 pounds per rupee.
Surat	Maximum at Mandvi, ·02 and minimum at Surat, ·15.	Standing crops promising; sowing operations still in progress in some talukas. Rain wanted in Balsar and Pardi talukas for rice crops. Cough in Bardoli taluka. *Juari* 38 and *nagli* 46 pounds per rupee.
Nasik	At Igatpuri, 2·46; Pient, 1·08; in other talukas—maximum at Nasik, ·08, minimum at Dindori, ·05.	More rain wanted in almost all talukas for young plants of minor early crops, and *bajri* transplantation nearly completed in the *dangi* parts. Public health good. Wheat 28¾, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay)	Light rain only on 10th; total of week ·15; to date 80·61; being 30·02 above average.	Average abnormal temperature, 2° warm; vapour in air normal; abnormal wind from north-east.
Poona	At Petha Barawali, 1·20; light showers in Junnar, Indapur, Haveli, and Maval talukas.	Young crops doing well. More rain wanted in almost all the talukas. Public health generally good; slight cattle-disease in Junnar, Khed and Haveli talukas. *Bajri* 32 and *juari* 48 pounds in the district and *bajri* 32 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar	At Jamkhed, ·37; Nagar, ·31; Karjat, ·14; Akola, ·10; Rahuri, ·07.	*Kharif* sowing completed in six and in progress in five talukas; crops doing well. Public health good. *Bajri*—maximum 60 pounds and minimum 39, *juari*—maximum 96 and minimum 48 pounds per rupee.
Sholapur	At Sholapur, ·38; Karmala, ·20; Pandharpur, ·20; Malsiras, ·25.	*Kharif* crops generally good. Rain required in the Barsi, Karmala, Sangola, and Malsiras talukas. *Juari* 59⅜ and *bajri* 42⅝ pounds per rupee.
Dharwar	Slight rain in Dharwar, Mugud, Hubli, Nargund, Gadag and Karajgi, averaging from ·80 in Karajgi to ·04 in Mugud; none in others.	Heavy showers required for the standing crops, which are still good. Much damage caused by insects to crops in Ranibennur and Navalgund. Rice 24 and *juari* 39 pounds per rupee.
Kanara	At Karwar, ·63; Kumpta, ·41; Sirsi, ·43; Haliyal, ·21; total 112·17.	Rice crop good; transplanting continues in some parts. Cattle-disease in Akola, Kumpta, Honore and Supa Petha; slight fever and small-pox in three talukas. Common rice in Karwar 14 and district average 13 seers per rupee.
Rajkot	·06; total 30·16	Health generally good. Sowing continues; cotton resown in some places. Wheat 34, *bajri* 30, and *juari* 43 pounds per rupee. *General Remarks.*—Slight rain in parts of all districts. Young crops in good condition everywhere, but more rain wanted in several districts; standing crops injured by insects in parts of Dharwar, Bijapur and Upper Sind Frontier. Fever and cattle-disease in parts of nine and small-pox in parts of three districts; slight cholera in one taluka of Khandesh.
Bengal—(August 11th)		
Chittagong	13·63	Weather seasonable. Harvesting of *aus* and transplanting of *amun* continue; prospects much damaged by heavy rain. Prices stationary. Public health good.
Dacca	5·67	Prospects of all crops good; jute and *aus* being harvested. Public health good.
24-Pergunnahs (Calcutta)	3·67	Prospects of early rice, jute and sugarcane favourable; cutting of jute commenced; transplanting of *amun* proceeding briskly. Public health generally good.
Moorshedabad	5·87	Rivers high and flooded some fields. *Aus* being cut; transplanting of *amun* going on. Public health good.
Khoolna	4·39	Weather cloudy and rainy. *Aus* doing well; cultivation of *amun* progressing; prospects good. Public health good.
Dinagepore	5·65	Prospects of *aus*, jute and sugarcane good; late rice transplanting proceeding. Public health good; a few cases of cattle-disease at Birgang.
Pubna (Serajgunge)	6·67	River continues to rise. Some damage may be caused to crops; *aus*, *til*, oilseed and jute being cut.
Rungpore	3·15	Sky overcast. Transplanting of *amun* progressing favourably; jute being cut; other crops doing well. Public health good.
Burdwan	4·95	Prospects of crops good. Public health good.
Bhagalpur	0·33	*Bhadoi* crops promising well; late rice prospects good.
Purneah	7·34	Prospects of crops excellent. Public health indifferent. Rivers high.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Durbhunga	5·61	Transplanting of paddy still going on; both *bhadoi* and low-land paddy considerably damaged by constant and excessive rain and unprecedentedly high floods. A break in the rains would be most beneficial. Prices stationary. Public health good.
Midnapore	2·03	More rain wanted in south. Prospects of crops good.
Chumparun	0·92	Prospects of crops favourable. A short break in the rains required. Prices stationary. Public health good.
Patna	1·97	Transplanting of paddy in progress; *bhadoi* crops thriving well. Cholera in Behar subdivision, otherwise public health good.
Gya	0·73	Crop prospects good. Prices stationary. Public health good.
Hazaribagh	3·50	Weather seasonable. Heavy rain all over the district. Agricultural prospects very promising; *til* crops doing well. General health good.
Cuttack	·91	Weather cloudy at times. Late rice being transplanted, but requires more rain. Price of rice unchanged. Sporadic cholera in interior; public health otherwise good.
		General Remarks. Heavy and continuous rain all over these Provinces, except Orissa, where it was slight, and more is wanted; excessive rain has caused some damage to crops in places, but general prospects still favourable. Autumn crops generally in good condition, and transplanting of late rice seedlings in full progress; harvesting of early rice and jute proceeding, with expectation of a good outturn. Public health generally satisfactory. Price of rice almost stationary.
N.-W. Provinces and Oudh—(August 11th)		
Benares (Aug. 9th)	·90 at Sadr	Break set in and weather fine. Average prospects. Supplies ample. Prices show slight fall. Health good.
Ballia („ 10th)	Averaging 3·50	*Kharif* sowings nearly completed. Rice being transplanted. Supplies ample. Health good.
Gorakhpore („ 9th)	1·60 at Sadr	Slight break, with sultry weather. *Kharif* crops in flourishing condition; weeding going on. Prices stationary. Health fair.
Fyzabad („ 10th)	*Nil*	Weeding and ploughing going on. Prices steady. Fever in three talukas; small-pox in one.
Lucknow („ 9th)	Average 3·20	Weather often cloudy. Prospects good. Fields being prepared for *rabi* sowings. Supplies sufficient. Prices steady. Health of people and condition of cattle good.
Rae Bareli („ „)	*Nil*	A break in the rains. Prospects of *kharif* crops good. Markets well stocked. Prices steady. Isolated cases of cholera reported.
Partabgarh („ 10th)	*Nil*	There has been a much needed break in the rains. Prospects good. Prices stationary. Public health good; no cattle-disease.
Allahabad („ „)	·30 to 1·40	*Kharif* crops doing well; *bajri* sowings and rice transplanting in progress. Markets well supplied, and prices steady. Health good.
Cawnpore („ „)	1·60 to 4·70	Crops flourishing; weeding in progress. Prices stationary. Slight cholera in city and cantonments; cattle-disease in four parganas.
Farakkabad („ „)	*Nil*	Damage from floods in Aligarh tahsil. Weeding is going on. Prices continue steady. A few cases of cholera reported.
Sitapur („ „)	*Nil*	Beneficial break in the rains. *Hemant* crops are being sown; prospects everywhere favourable.
Bareilly („ „)	Varying from 3·0 to 8·80.	Abundant rain in all tahsils. Crops looking well. Cases of cholera reported.
Banda („ 9th)	*Nil*	Break very beneficial. *Bajri* and *til* being sown; early sowings flourishing. Prices steady. Public health good; cattle-disease disappearing.
Kumaon („ 10th)	Rain plentiful	Crops promising well. Prices falling slowly. General health fair; fever and measles in parts; cattle-disease decreasing.
Agra („ 9th)	·60 to 2·10	A break now set in, which is much needed. Prices steady. Health good.
Jhansi („ „)	Slight rain during week.	A break has set in, which is beneficial to crops. Markets well stocked. Health of people and condition of cattle fair.
Meerut („ „)	*Nil*	Break beneficial for *rabi* ploughings. Prices stationary.
		General Remarks. Abundant rain has fallen, and the break which has now set in will benefit the crops. Prospects are good everywhere. Supplies are ample, and prices generally steady. Public health is fair.
Punjab—(Aug. 11th)		
Hissar	*Nil*	Health good. Prices rising. Prospects flourishing.
Delhi	·54	Health good. Prices fluctuating. Prospects promising.
Umballa	·68	Health fair. Prices almost stationary.
Jullundur	1·70	Health good. Prices stationary. Prospects good.
Ferozepore	1·80 at Zira	Health good. Prices rising.
Amritsar	·10	Health good. Prices stationary. Prospects very favourable.
Sialkot	·90	Health good. Prices stationary.
Lahore	*Nil*	Health good. Prices stationary.
Mooltan	*Nil*	Health good. Prices rising. Prospects good.
Rawalpindi	2·35	Health good. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Shahpur	Rain in tahsils Khusal and Bhera.	Health good. Prices almost stationary.
Dera Ismail Khan	*Nil*	Health good. Prices stationary.
Peshawar	*Nil*	Health fair. Prices almost stationary.
		General Remarks.—Rain has fallen in the Delhi, Umballa, Jullundur, Ferozepore, Amritsar, Sialkot, Rawalpindi and Shahpur districts; wanted in the Hissar, Shahpur, Rawalpindi, and Peshawar districts. General health good. Prices rising in the Hissar, Ferozepore and Mooltan districts, fluctuating in the Delhi district; elsewhere stationary.
Central Provinces—(August 11th)		
Nagpur	·77	Weather showery and close. Rice requires rain, other crops good. Small-pox in places. Prices steady.
Jubbulpore	·16	Crops favourable; weeding in hand. Health good. Prices steady.
Saugor (August 10th)	*Nil*	Prospects good. Prices stationary. Fever prevalent.
Seoni	2·11	Weather cloudy and hot. More rain wanted for rice, which has suffered a little on high land. Health good. Prices rising.
Hoshangabad	*Nil*	Weather clear and hot. Crops doing well. Small-pox and cattle-disease in places. Prices steady.
Khandwa	*Nil*	Weather cloudy and close. Weeding nearly finished. Rain wanted. 121 cases of cholera, 45 deaths. Prices steady.
Bilaspur	1·29	Unless heavy rain falls within 10 days, rice will be injured. Cholera lingering; cattle-disease in Siorinarain. Prices stationary.
Raipur	·67	Rain urgently wanted. Second ploughing stopped; rice withering in places. Cholera declining; cattle-disease continues. Prices stationary.
Sambalpur (August 7th)	2·7	Weather showery and hot; more rain wanted in south and west. Fever prevalent; cholera in Burgarh tahsil. Prices steady.
		General Remarks.—Prospects continue good in Northern districts, but in Nimar and in the Nagpur and Chhattisgarh districts rain is wanted. In Raipur and Bilaspur rice crops will suffer considerable injury if a good fall of rain does not occur shortly.
British Burma—(Aug. 11th)		
Akyab (Aug. 7th)	10·47; total rainfall 87·71.	Public health good; cattle-disease slight in one township. Sowing progressing.
Bassein	4·99; total rainfall 58·20.	Public health good; slight cattle-disease in two townships. Sowing progressing; crops healthy.
Rangoon	2·71; total rainfall 56·90.	Public health good; cattle healthy.
Amherst (Moulmein)	2·45; total rainfall 100·54.	Public health good; cattle healthy. Ploughing and transplanting progressing.
Pegu	6·47; total rainfall 73·84.	Public health good; cattle-disease prevalent in two townships. Ploughing and sowing progressing throughout the district.
Henzada	0·92; total rainfall 52·34.	Cholera sporadic in four townships; slight cattle-disease in two townships. Ploughing progressing; transplanting commenced.
Prome	3·30; total rainfall 24·98.	Public health good; cattle healthy. Ploughing progressing; plants in good condition.
Tounghoo	3·57; total rainfall 45·41.	Public health good; cattle healthy. Ploughing progressing; transplanting commenced.
Thayetmyo	1·02; total rainfall 20·25.	Public health good; cattle-disease prevalent in two circles. Sowing progressing.
		General Remarks.—Slight cholera in parts of Thongwa and Henzada districts, elsewhere public health good; cattle-disease prevalent in parts of Pegu and Thayetmyo districts, slight in parts of six other districts. Ploughing, sowing and transplanting progressing in all districts; crops reported healthy.
Assam—(August 11th)		
Gauhati	1·14	Weather hot. General health good; cattle-disease still in some *mouzahs*. Reaping of *ahu* almost finished; planting of *sali* still in progress.
Sylhet	21·85	Incessant rain throughout the week has done some injury to crops, more damage apprehended if the rain does not cease soon.
Dibrugarh	Heavy rain, 8·80	Weather cool and cloudy throughout the week. *Ahu* crops much injured by floods. Cattle-disease prevalent in some parts of North Lakhimpur and Sadr subdivision; public health good.
Mysore and Coorg—(August 11th)		
Bangalore	Rain fall good in the Bangalore, Mysore and Tumkur districts and fair in other parts of the State.	Rain wanted in a part of the Chitaldroog district. Standing crops in good condition. Prospects of season favourable. Public health good. No material change in prices.
Mysore		
Mercara	2·69	Season favourable for transplanting rice. Prices slightly fallen.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad—(August 11th)		
Amraoti	·07	Weather cloudy and close, with slight showers occasionally. Crops in good condition. More rain wanted. Wheat 22 and *juari* 20 seers per rupee.
Akola	*Nil*	Weather cloudy and sultry, but rain holding off. Crops in healthy condition, but require more rain.
Hyderabad	Average ·58; total rainfall 22·4.	Sowing of *kharif* and *abi* crops continues. General health fair. Prices wheat 14½, coarse rice 12, white *juari* 21, yellow *juari* 24, and *tur* 17 seers per current sicca rupee.
Central India States—(August 11th)		
Indore	·02; total rainfall 23·45.	Weather warmer and brighter. Price of wheat risen.
Morar (Gwalior)	·07; total rainfall 18·01.	Health and prospects good.
Neemuch	·18; total rainfall 13·09.	More rain much needed. Crops and health good.
Goona	·18	More rain much wanted. Health good.
Sutna	·10	Weather cloudy and cool. Health good.
Agar	·47	Health and prospects good.
Sehore	·26	Weather seasonable. Crops and health good.
Nowgong	1·67; total rainfall 22·80.	Weather favourable. Prospects and health good.
Bhopawar (Manpur)	·90; total rainfall 10·38.	Prospects favourable. Health good. Prices steady.
Rajputana—(August 11th)		
Abu (Aug. 11th)	3·34; total rainfall 48·31.	Weather occasionally clear and seasonable.
Sirohi („ 8th)	·17	Tanks full; wells good. Health good. Crops good. Cool wind; weather cloudy.
Marwar („ 6th)	·23	More than a year's water in Jodhpur City tanks. Health good. Crops requiring more rain. Weather very cloudy, with warm winds; nights cooler. Prices tending to fall.
Kherwara („ 8th)	·60	Tanks and wells fairly full. Crops flourishing. Health good. Prices steady. Weather cloudy; break needed.
Meywar („ 7th)	·09	Tanks and wells filling. Crops good. Health fair; dysentery prevailing. Prices falling. Rain wanted.
Pertabgarh („ „)	·88	Tanks and wells filling. Prospects good. Health good. Prices tending to rise. Weather cloudy with showers.
Harowti („ „)	Slight rain on 8th and 9th; Deoli, ·02.	More rain wanted. Health and prospects good. Prices risen.
Jhallawar („ 6th)	*Nil*	Health and prospects generally good.
Kotah („ 7th)	·19	Health good. Weather cloudy.
Ajmere („ 10th)	Scanty rain	Health good. Weather cloudy. Crops in urgent need of water.
Jeypore („ „)	*Nil*	Rain wanted in Kishnagarh.
Kerowlee („ 7th)	·09	Tanks and wells filling. Prospects good. Health good. Prices stationary. Weather seasonable.
Dholepur („ 4th)	3·40	Tanks full; wells filling. Crops growing. Health good. Prices steady. Weather seasonable.
Bhurtpore („ 7th)	·97	Tanks and wells full. Weeding of crops progressing. Health good. Prices steady. Weather fair.
Ulwur („ 10th)	Average, 1·06	Health and prospects good.
Bickanir („ 7th)	Rain in some districts.	Crops good. Tanks and wells filling. Prospects good. Fever in two districts. Prices stationary. Weather cloudy.
Nepal—(Aug. 5th)		
Katmandu (Aug. 6th)	4·42	Prospects of maize and Indian corn are both good.

No. 117 Met. / 12—10

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology),—dated Simla, 12th August, 1886.

Read the following :—

Summary of the Weather Report for the month of July 1886.

A depression of temperature throughout North-West India, though not so marked as in June, was still appreciable. The mean temperature of the month was from 1° to 4° below the average, over a large portion of the Upper Provinces, in Rajputana, and Behar, as well as in the Carnatic. Elsewhere the differences were in general small. Only in Sind, parts of the Central Provinces, and Burma, was the temperature slightly higher than usual.

As a general rule, the mean pressure of the month was very slightly in excess of the average in Northern India, and below it in the peninsula and Ceylon; most so in the Southern Deccan, Mysore, and Malabar. In the Gangetic plain, and the greater portion of the Punjab, east or south-east winds were most frequent.

The atmosphere was much damper than usual over nearly the whole of Northern and Central India and in the Carnatic, and more or less so in other parts of the country, excepting the west coast and Western Deccan, Lower **Bengal, Orissa, the Eastern Districts of the Central Provinces, and Burma.**

The rainfall was generally heavier and better distributed than in the previous month. In the first week there was fairly general, and, in some cases, heavy rain in the Upper Gangetic plain, on the Central India plateau to the south of the river, and in the western half of the peninsula. On the 10th, heavy rain fell at several stations on the Malabar coast, and continued, with short intervals of light rainfall, up to the 25th of the month. In Northern and Central India, after the 7th, the rainfall was either light or ceased altogether, until a small storm from the Bay of Bengal again brought rather heavy rain to the Central Provinces, Central India, and the southern parts of the North-Western Provinces. This storm was generated in the north-west corner of the Bay about the 17th, and on the 18th it moved forward—first on a northerly course, and then almost due west. On the forenoon of the 23rd, the centre reached the neighbourhood of Neemuch, and within the next twenty-four hours, broke up over the desert to the west of the Arvalis.

Except at Peshawar and Rawalpindi, the rainfall was more or less above the average throughout the Punjab. In Oudh, and indeed in most parts of the North-Western Provinces east of the Ganges, it was below the normal amount; but to the south of the Ganges, there was more rain than usual. In Northern Bengal, and also in Burma, the rainfall was short; but everywhere else, with only local exceptions, the average was exceeded. In Sind and the Carnatic the total amount was about double the average. In the Konkan also and Guzerat there was a considerable excess.

The following table shows the amount of rain and the difference from the average, during the month of July 1886, according to districts as far as is indicated by the telegraphic reports:—

Districts.	Number of stations.	Average rainfall in July.	Difference from the average in July 1886.	Remarks.
Punjab, west	7	6·10	+1·41	
Ditto, east	6	10·14	+3·30	
North-Western Provinces, trans-Gangetic	11	11·61	−0·20	
Ditto ditto, cis-Gangetic	7	11·18	+0·55	
Behar	4	11·03	+6·47	
Northern Bengal	3	19·71	−2·63	
Assam, Cachar	5	15·98	+5·29	
Lower Bengal, Chutia Nagpur	6	14·85	+0·21	
Orissa, Northern Circars	6	8·64	+0·98	
Central Provinces, south	7	16·57	+0·63	
Berar, Khandesh	3	7·10	+2·58	
Rajputana, Central India, Saugor, and Nerbudda ...	9	12·65	+0·95	
Sind, Cutch	4	3·03	+3·17	
Guzerat	4	11·09	+4·87	
Konkan	4	23·51	+12·58	
Deccan, Hyderabad	8	7·00	+0·05	
Malabar	5	33·76	+1·36	
Mysore, Bellary	6	2·92	+0·99	
Carnatic	8	1·91	+1·89	
British Burma	7	25·12	−1·78	
Ceylon	1	5·32	+1·89	

SIMLA;
The 5th August 1886.

RUCHI RAM SAHNI,
2nd Asst. Meteorological Reporter to the Govt. of India.

RESOLUTION.—Resolved, that the Summary be published in the Supplement to the *Gazette of India*.

C. J. LYALL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

(a) In the statement for 1883-84 and 1884-85 the irrigation in the Kalsia State was included in those of the Umballa District, but in this return they have been shown separately against that State.
(b) The difference of 172 acres between the area shown in the half-yearly return for Kharif 1885-86 and that shown in this statement is due to the fact that in the former the area of the Changa Manga Plantation was shown approximately, *viz.*, 6,150, and now the actual area reported by the Forest Department, *viz.*, 6,322 acres, is shown.
(c) This is the correct rainfall, and differs from that shown in the returns for 1883-84 and 1884-85.

Area irrigated,	1884-85	622,071 acres.
Ditto	1885-86	925,644 "
Net Increase		238,573 acres.

STATISTICAL BRANCH;
Calcutta, 17th August 1886.

D. M. BARBOUR,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 18th August, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble Major-General G. T. Chesney, R.E., C.S.I., C.I.E.
The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.
The Hon'ble Colonel W. G. Davies, C.S.I.

SUITS VALUATION BILL.

The Hon'ble MR. ILBERT moved that the Bill to prescribe the mode of valuing certain suits for the purpose of determining the jurisdiction of Courts with respect thereto be referred to a Select Committee consisting of the Hon'ble Sir A. Colvin and the Mover. He explained that he proposed to nominate merely a skeleton Committee on this and the following Bill, because it was not probable that the Committees would begin their labours during his term of office and it might be more convenient that their constitution should be settled by his successor.

The Motion was put and agreed to.

INDIAN EVIDENCE ACT, 1872, AMENDMENT BILL.

The Hon'ble MR. ILBERT also moved that the Bill to amend the Indian Evidence Act, 1872, be referred to a Select Committee consisting of the Hon'ble Sir S. Bayley and the Mover.

The Motion was put and agreed to.

The Hon'ble SIR THEODORE HOPE moved for leave to introduce a Bill to amend the Dekkhan Agriculturists' Relief Acts, 1879 to 1882. He said:—

"About four years have elapsed, I am happy to say, since it was last my duty to come before this Council on the subject of the Dekkhan Agriculturists' Relief Act. During this period the Act has undergone a twofold ordeal. In the first place, its whole working was subjected to a special inquiry made by an officer appointed by the Bombay Government to investigate how far its provisions were really beneficial, or the reverse. This inquiry was analysed and scrutinised by a number of competent officers and eventually referred to the Secretary of State, and the discussions which took place have resulted in certain conclusions of which we now have the benefit. But, besides this ordeal of a special inquiry, the Act has likewise passed through four years of practical working, and during that time we have received four annual reports by two very able officers—Dr. Pollen and the Hon'ble Mahadeo Govind Ranade—who filled the office of Special Judge. The result of this ordeal may be stated in a very few words. In

the first place, the general working of the Act has been found, on the whole, to be extremely satisfactory; in the second place, the general phraseology of the Act, about which considerable differences at first arose, has now become, or been made, sufficiently intelligible to be worked by the Courts without conflicting decisions, and without either injustice or the indefinite postponement of the final decision on cases; and, thirdly, there are still a few improvements in the law apparent which it will be desirable to effect on the present occasion. It is in order therefore to take a certain amount of action under these three heads that I have come before the Council today.

"In consequence of the generally satisfactory working of the Act, which is, I believe, now established with scarcely any question from any quarter, the Government of Bombay propose that power should be taken to extend either the whole Act, or certain portions of it, to other parts of the Bombay Presidency. As to what parts such extension will be desirable for, it is not for me at present to say; that is a matter for the Executive Local Government, but I believe I may indicate that no large or sweeping extension is contemplated at present, and that only such tracts will gradually be brought under the Act as are found to be more or less afflicted with the same evils and difficulties as led to the original legislation in the case of the four Dekkhan Collectorates. Moreover, I think I may add that it is very probable that in some instances the whole Act would not be extended, but only certain portions,—I cannot specify exactly which,—but portions such as those which require the history of transactions with agriculturist-debtors to be investigated, or those which relate to the mode of taking accounts, which have been found to be of enormous value in any suit, would be the first to be applied.

"In regard again to the phraseology, there is only one small improvement contemplated—that is, a better definition of the word 'lease'.

"As to the improvements which are still found desirable in the Act, I need not detain the Council long. One of them is to make the examination of the defendant ordinarily compulsory in all suits under Chapter III, just as it now is under Chapter II, and, consequently, to provide against *ex parte* decrees in such suits, which everybody admits to be an evil.

"Again, it is found desirable that standing crops should not, for the purposes of this Act, be treated as immoveable property, and consequently be exempted from being taken in execution of a decree. They are usually the legitimate security for an advance for the purposes of cultivation, and it seems only fair that the persons who make the advances should look to the standing crops for their recoupment if necessary.

"Moreover, it is found desirable, as a matter of administrative convenience, to relieve the Village-Registrars of the duty of registering such documents as are liable to registration under the ordinary Registration Act. It is proposed to confer it on what are called Taluka-Registrars, who will, however, follow the peculiar procedure provided under the Dekkhan Agriculturists' Relief Act when the executants are agriculturists. Again, there is a small alteration desired in section 72 of the Act with regard to the time of limitation.

"The only other alteration which I ought to mention, as being of importance, is with reference to the powers of Conciliators to require the attendance of persons against whom applications are made under section 39 of the Act. This proposal to give Conciliators the power of requiring attendance was negatived by this Council in 1882, contrary to the advice of the Local Government and of a considerable number of other authorities. At the same time the question then certainly was one which was reasonably open to doubt and difference of opinion, and it is just as well that we should have had four more years in order to obtain more conclusive data and opinions upon it. The result of this lapse of time is that the Bombay Government are still of opinion that this power should be given, and that it appears to us now desirable that the legislature should no longer hesitate to confer it. With regard to the details of the subject,

I will reserve my remarks till the next occasion when the Bill comes before the Council."

The Motion was put and agreed to.

The Hon'ble SIR THEODORE HOPE also introduced the Bill.

The Hon'ble SIR THEODORE HOPE also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the *Bombay Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 25th August, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

SIMLA;
The 20th August, 1886.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 18th AUGUST, 1886.

GENERAL REMARKS.—On the whole, the rainfall of the week has been slight throughout Upper India. Heavier falls have occurred in Burma, Assam, Eastern Bengal, and the peninsular area generally.

In Madras, Mysore, and Coorg prospects continue satisfactory.

In the Bombay Presidency and in the North-Western Provinces and Oudh the *kharif* sowings have been almost completed, and the young crops promise well. Prospects are generally favourable in the Central Provinces, though more rain is badly wanted in parts of the Chhattisgarh Division.

In the Punjab, Rajputana, and Central India prospects are generally good, though more rain is wanted.

In Berar the crops are doing well.

In Bengal the break in the rains has been advantageous to the crops, which are very promising, except where injured by floods. The *aus* rice and jute harvests are progressing, with fair outturns.

In Cachar and Sylhet much damage has been caused to the crops by the floods, and prospects in these two districts are generally unsatisfactory.

In British Burma sowing and transplanting for the rice crop continue.

The public health continues fair.

Prices are falling in the Mysore and Coorg and in the Hissar and Mooltan districts of the Punjab, rising in the Ferozepore, Rawalpindi, and Peshawar districts, and fluctuating in the Delhi district. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(August 18th)		
Bellary . .	1·96	Standing crops generally good; harvest second crop paddy, yield average. Cattle-disease in one taluk.
Kurnool . .	Average last week since revised, 2·51; this week, 3·30.	Standing crops fair, but in parts of two taluks injured by excessive rain. Small-pox and cattle-disease in two taluks.
Ganjam . .	Average last week since revised, 1·23; this week, 1·22.	More rain wanted. Slight small-pox in three taluks and cattle-disease in one taluk and one division; some cholera.
Kistna . .	Average last week since revised, 2·02; this week, 2·04.	Standing crops good. River 4·6 feet water over Anicut. Slight fever and cattle-disease in one taluk.
Chingleput (Madras) .	Average 1·38	Standing crops fair; harvest, wet and dry crops, yield below average. Fever in two taluks and cattle-disease in one.
Coimbatore . .	Average ·95	Standing crops generally good; harvest dry grains, outturn generally above average. Fever in one and small-pox in two taluks.
Tanjore . .	Average last week since revised, 4·30; this week, 1·29.	Standing crops generally good; harvest *cholum* and *cumbu*, outturn below average.
Madura . .	Average last week since revised, 2·29; this week, ·69.	Health of people and cattle generally good.
Malabar . .	Average 3·54	More rain wanted in four taluks. First crop paddy generally in ear. Fever in one and slight small-pox in six taluks; cattle-disease in one.
Travancore . .	1·33	Paddy almost ripe. Fever in parts. *General Remarks.*—General prospects good.
Bombay—(August 18th)		
Kurrachee . .	*Nil*	River at Kotri on 16th, 20 feet 1 inch against 17 feet 9 inches on same date last year. Damage to *kharif* crops in four low-lying talukas, owing to high inundation. Fever in five and cattle-disease in one taluka. Wheat, red rice and *bajri* in Kurrachee 26, 30 and 34 and in Ghorabari *nil*, 40 and 30 pounds per rupee, respectively.
Hyderabad . .	*Nil*	*Kharif* cultivation good. Rice transplantation almost over; cultivation in Badin taluka damaged by breaches in canals. River at Kotri on 16th, 20 feet 1 inch against 17 feet 9 inches on same date last year. Fever in three, small-pox in two, and cattle-disease in one taluka. Wheat 25, *bajri* 38, *juari* 40, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad . .	·29; total 28·48	Light showers in all talukas. Young crops doing well. Public health good. Wheat 35 and *bajri* 31 pounds per rupee.
Baroda . .	2·09; total 25·37	Health good. Sowing operations completed; standing crops in good condition. *Bajri* 31, wheat 23, and rice 20 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat . . .	Rain throughout the district.	Sowing operations completed; standing crops good. Fever in Bardoli taluka. *Juari* 39 and *nagli* 44½ pounds per rupee.
Nasik . . .	Rain in all talukas—maximum at Chandor, 6·21; minimum at Nasik, 1·15.	*Bajri* sowing nearly completed; weeding in progress; transplantation nearly completed; young plants of *kharif* crops in good condition. Public health good. Wheat 28¾, *bajri* 31, and rice 17¾ pounds per rupee.
Colaba (Bombay) .	Rain every day, heavy on 15th; total of week, 7·53; total to date, 88·11, being 34·77 above average.	Abnormal temperature fell 1° warm on 11th to 2° cool on 15th, afterwards it was 1° warm; vapour in air excessive on 13th, normal on all other days; abnormal wind from east-north-east on 11th, from north on 15th and 17th, and from north-east on all other days.
Poona . . .	Rain general throughout the district—maximum at Junnar, 3·14; minimum at Poona City, ·29.	Crops in good condition. Fall of rain during the week has proved beneficial to the crops; more rain wanted in Purandhar, Bhimthadi, and Maval talukas. Public health good; slight cattle-disease in Junnar and Haveli talukas. *Bajri* 35 and *juari* 49 pounds in the districts, and *bajri* 32 and *juari* 35 pounds per rupee in Poona City.
Ahmednagar . .	At Nagar, 7·09; Karjat, 5·89; Jamkhed, 5·66; Rahuri, 4·35; Parner, 4·34; Shrigonda, 3·65; Akola, 3·42; Sheogaon, 2·58; Sangamner, 1·96; Kopargaon, 1·32; Niwasa, ·93.	*Kharif* sowing completed in eight and in progress in three talukas; crops and public health good. *Bajri*—maximum 60, minimum 38 and *juari*—maximum 96, minimum 38 pounds per rupee.
Sholapur . .	At Sholapur, 2·14; Barsi, 2·67; Madha, 2·30; Karmala, 2·05; Pandharpur, 4·05; Sangola, 2·45; Malsiras, 1·08.	*Kharif* crops generally good, *Juari* 60⅛ and *bajri* 41⅓ pounds per rupee.
Dharwar . .	Rain at all stations, except Gadag and Bankapur, varying from 3·78 in Mundargi to ·08 in Dharwar.	Rice and young *juari* crops good, but the former require heavy showers. Public health good. Rice 23 and *juari* 50 pounds per rupee.
Kanara . .	At Karwar, 3·74; Kumpta, 6·84; Sirsi, ·80; Haliyal, ·79; total 115·91.	Rice and sugarcane crops thriving. Measles in Karwar taluka and fever in four talukas; cattle-disease in Karwar, Kumpta, Honore, Akola, Supa, and Sirsi. Common rice at Karwar 14 and district average 13 seers per rupee.
Rajkot . . .	·68; total 30·84	Weather cloudy. General health fair. Wheat 36, *bajri* 31, and *juari* 45 pounds per rupee. *General Remarks.*—Fair rain throughout the Presidency, except Sind; more wanted for rice crops in parts of three districts. Standing crops doing well everywhere; in parts of Kurrachee crops slightly damaged by inundation. Fever and cattle-disease in parts of nine and small-pox in parts of districts.
Bengal—(August 18th)		
Chittagong . .	4·35	Weather seasonable. Harvesting of *aus* and transplanting of *amun* continue. Catterpillars causing damage in some places. Prices steady. Small-pox in Mirserai, otherwise public health good.
Dacca . . .	0·65	*Aus* and jute being harvested; *amun* and sugarcane doing well; slight damage anticipated here and there to paddy crops, owing to sudden rise of water. Public health good.
24-Pergunnahs (Calcutta).	0·18	Prospects of early paddy, jute, and sugarcane good; cutting of jute commenced; transplantation of *amun* still going on. Cattle-disease in Bassirhat; public health good.
Moorshedabad . .	Slight rain	Weather seasonable. Transplantation of late rice nearly over; prospects of this and *bhadoi* crops good. River about stationary, and in low and unprotected places *bhadoi* rice still submerged. Public health good.
Rungpore . .	4·36	Harvesting of *aus* and jute still continues; *amun* being transplanted. Fever and bowel complaints prevalent.
Burdwan . .	0·45	Some damage done by inundation, but prospects generally good. Public health good.
Bhagalpur . .	0·23	Break in the rains has improved *bhadoi* prospects; harvest on *dearа* lands commenced; transplantation of rice progressing. Public health good.
Purneah . .	3·28	Crops suffering from excessive rain; much injury in west and south from overflow of rivers. Public health fair.
Patna . .	0·47	Transplanting of *amun* seedlings progressing; prospects of *bhadoi* good. Cholera in Behar subdivision, otherwise public health good.
Durbhunga . .	0·60	*Bhadoi* and paddy crops seriously damaged in tracts visited by floods, which have been very severe this year; crops in other parts continue promising. Prices stationary. Public health generally good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Hazaribagh . .	0·44	Weather bright and clear; occasionally cloudy. Transplanting retarded for want of rain; crops generally doing well. Public health fair.
Cuttack . .	3·23	Weather cloudy and rainy. Early rice in ear, late rice being transplanted, and doing well. Price of rice unchanged. Public health generaliy good, except that cases of cholera occur here and there in interior.
Midnapore . .	0·87	More rain wanted, especially in the south. Transplantations going on. Public health normal.
Khoolna . .	0·63	Weather cloudy and rainy. *Aus* ripening; transplanting of *amun* continues; prospects favourable. Public health good.
Dinagepore . .	2·03	General rain. Crops doing well; some damage to jute. Cattle-disease in several thanas.
Pubna (Serajgunge) .	1·81	About 10 annas of *aus* cut, outturn good; *amun* doing well at Serajgunge; some damage done to crops by rise of water.
Gya . .	0·55	Crop prospects good. Prices stationary. Public health good.
Chumparun . .	1·10	Heavy rain and extensive floods have damaged *bhadoi* and paddy crops in northern half of district, otherwise crops doing well. Prices stationary. Public health good.
		General Remarks.—Rainfall during week was generally slight, but in parts of Northern and Eastern Bengal was comparatively heavy; the break has been generally very beneficial, except in Chota Nagpur, where deficiency of rain still complained of. Prospects of crops very promising, except in flooded tracts,—particularly in North Behar. Harvesting of *aus* rice, and jute going on generally, with expectation of fair outturn; transplanting of late rice still proceeding in some parts. Fever has appeared in a few districts and cholera reported from some localities, but general health continues good.
N.-W. Provinces and Oudh —(August 18th)		
Benares (Aug. 10th)	·40 at Sadr	More rain needed for rice, prospects otherwise good. Supplies sufficient. Prices steady. Some cholera in district.
Ballia („ 17th)	Slight rain	*Kharif* sowings thriving; rice transplanting in progress. Supplies plentiful. Isolated cases of cholera reported, otherwise public health good.
Gorakhpore („ 16th)	·20 at Sadr	Weather sultry; break in rain continues. Crops in good condition. Prices stationary. Health fair.
Fyzabad („ 17th)	*Nil*	**Weeding of *kharif* crops and ploughing in full swing. Prices** stationary. Fever prevalent.
Lucknow („ 16th)	*Nil*	A break of ten days; rain now wanted. Prospects continue favourable. Markets well supplied and prices steady. Health good; condition of cattle fair.
Rae Bareli („ „)	*Nil*	Rain wanted for *dosan* and *arakra*. Markets full. Prices steady Some cases of cholera reported.
Partabgarh („ 17th)	*Nil*	Prospects good. Prices stationary. Public health good; no cattle-disease.
Allahabad („ „)	Average ·50	Weather sultry. All crops doing well. Markets well supplied. Prices show a slight fall. Health good.
Cawnpore („ „)	·90 in one tahsil	A break during week; weather oppressive; more rain wanted. Condition of crops good. Prices slightly risen. Cholera in city and cantonments; cattle-disease in four parganas.
Farakhabad („ „)	1·10 in Kaimganj	Floods have now subsided. Prices steady. Cholera continues in Farukhabad, otherwise public health fair.
Sitapur („ „)	Slight rain	The rain has benefited the rice crops; *bajri* and *moth* have been sown; ground being prepared for the *rabi*.
Bareilly („ „)	·20 to 5·10	Harvest promises well. Prices slightly falling. Sporadic cholera and fever in district.
Banda („ 16th)	*Nil*	Rain wanted for crops on highland. *Bajri* and *til* being sown. Prices stationary. Public health good; a few cases of cattle-disease.
Kumaon („ 17th)	Good fall of rain on 15th.	The rain was favourable to the standing crops. Prices falling. General health fair. Fever and measles reported; cattle-disease on decrease.
Agra („ 16th)	·10 to 1·80	A break which has set in has been beneficial for *kharif* crops and *rabi* ploughings. Prices falling slightly. Health good.
Jhansi („ „)	Averaging 5·30	Agricultural prospects good. Prices steady. Health of people and condition of cattle good.
Meerut („ 17th)	*Nil*	Break in rain beneficial for crops, but rain now needed. All crops are flourishing and *rabi* ploughings are in progress. Prices steady. Slight fever reported.
		General Remarks.—Rainfall has been generally light during the week and the break has been good for the crops; more rain is needed in a few districts. Prospects good everywhere. Markets are well stocked and prices on the whole steady. Public health is fair.
Punjab—(Aug. 18th)		
Hissar . .	1·90	Health good. Prices falling. Prospects of coming harvest flourishing.
Delhi . .	·02	Health good. Prices fluctuating.
Umballa . .	·19	Health fair. Prices almost stationary.
Jullundur . .	1·0	Health good. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Ferozepore . .	·40 at Sadr	Health good. Prices rising. Prospects of coming harvest good.
Amritsar . .	·40	Health good. Prices stationary. Prospects good.
Sialkot . .	1·80 in tahsil Pasrur	Health good. Prices stationary. Prospects very favourable.
Lahore . .	*Nil*	Health good. Prices stationary.
Mooltan . .	*Nil*	Health good. Prices falling. Prospects good.
Rawalpindi . .	·45	Health good. Prices rising. Prospects average.
Shahpur . .	Slight rainfall throughout the district.	Health good. Prices almost stationary. Prospects fair.
Dera Ismail Khan .	*Nil*	Health good. Prices almost stationary.
Peshawar . .	*Nil*	Health fair. Prices rising.
		General Remarks.—Rain has fallen in all districts, except Lahore, Mooltan, Dera Ismail Khan and Peshawar, more wanted in the Fatehabad and Sirsa tahsils of the Hissar district and in the Shahpur and Peshawar districts. General health good. Prices rising in the Ferozepore, Rawalpindi, and Peshawar districts, falling in the Hissar and Mooltan districts, fluctuating in the Delhi district; elsewhere stationary.
Central Provinces— (August 18th)		
Nagpur . .	3·10	Weather cloudy and warm, with heavy showers occasionally. Crops good. Small-pox in places. Prices firm.
Jubbulpore . .	3·33	Crops thriving; weeding still in hand. Health fair. Prices unchanged.
Saugor (Aug. 17th) .	·66	More rain needed. Health good. Prices generally steady.
Seoni . . .	More or less rain daily.	Weather cloudy. Transplanting and weeding in progress. Fever increasing. Prices steady.
Hoshangabad . .	1·90	Weather cloudy and close. Prospects and health good. Prices stationary.
Bilaspur . .	·76	Rain urgently wanted. Rice injured in Bilaspur tahsil in extent six annas. Good rain local in some parts of Seorinarain tahsil. Cholera continues; fever prevalent. Prices risen.
Khandwa . .	1·61	Weather showery. Prospects improved by rain; weeding in progress. 157 cases of cholera, 58 fatal. Prices unchanged.
Raipur . . .	·45	Weather cloudy and close; outlook becoming serious. Rice and *kodo* withering and being attacked by insects. Good rain would even now save much of the crops, but there is no sign of it. Cattle-disease in places. Prices rising.
Sambalpur (Aug. 14th)	·88	Weather clear and hot, with occasional showers. Prospects so far good, but more rain urgently needed. Cholera in places. Prices steady.
		General Remarks.—Prospects are favourable over the whole of the provinces, except Chhattisgarh, where rain is urgently wanted in Raipur and Bilaspur. The crops have already greatly suffered a good deal and unless a good fall occurs shortly, the *kharif* outturn will be much diminished.
British Burma— (Aug. 18th)		
Akyab . (Aug. 14th) .	2·62; total rainfall 90·33.	Public health good. Slight cattle-disease in one township. Sowing and transplanting progressing.
Bassein . . .	2·19; total rainfall 60·39.	Public health good; cattle healthy. Sowings progressing.
Rangoon . .	4·30; total rainfall 61·20.	Public health good; cattle healthy.
Amherst (Moulmein) .	4·05; total rainfall 104·59.	Public health good; cattle healthy. Crops healthy.
Pegu . .	6·25; total rainfall 80·09.	Public health good; cattle-disease prevalent in five circles. Ploughing nearly completed; sowing progressing.
Henzada . .	3·10; total rainfall 55·44.	Cholera in five townships; slight cattle-disease in one township. Ploughing and transplanting progressing.
Prome . . .	·94; total rainfall 84·98.	Public health good; cattle healthy. Crops healthy.
Tounghoo . .	4·45; total rainfall 49·81.	Public health good; cattle healthy. Transplanting progressing.
Thayetmyo . .	2·82; total rainfall 25·07.	Public health good; cattle healthy. Sowings progressing.
		General Remarks.—Cholera in five townships of Henzada district, elsewhere public health good; cattle-disease in parts of six districts, elsewhere cattle healthy. Ploughing nearly completed in three districts; sowing and transplanting progressing. Crops reported healthy.
Assam—(August 18th)		
Gauhati . .	·03 during week ending 17th instant.	Weather hot. General health tolerably good; cattle-disease reported from some mouzahs. Reaping of *ahu* finished; planting of *sali* still in progress.
Sylhet . .	2·92	Unusual flood has caused much damage to crops, extent of damage not yet ascertained. River in Habiganj still rising. Scarcity of fodder and heavy loss of cattle apprehended; prospects unfavourable.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—*contd.*		
Cachar (Aug. 11th)	9·68	Incessant rain; good deal of country flooded again. Much probability of damage to *dumahi* and *aus* crops resown. Common rice 10 seers per rupee. Cattle-disease reported. Prospect of tea and general health good.
Ditto („ 18th)	3·08	Weather warm. River going down. Very great damage done to crops by floods, and transplanting *sali* crops almost entirely stopped; the nurseries having been extensively damaged; if the flood does not go down at once, prospects of rice will be very bad. Common rice 11 seers 3¼ chittacks per rupee. Tea growth checked. Blight increasing; four deaths from cholera from Lakhimpur reported; general health good; cattle-disease still continues.
Dibrugarh . . .	68·78	Weather seasonable. Transplanting of *sali* continues; prospects good; tea doing fairly. Public health good.
Mysore and Coorg—(August 18th)		
Bangalore . . }	General rain throughout the State and heavy at Tumkur.	Standing crops in good condition; rice cultivation in Pavagada taluka of the Tumkur district reported to be backward; prospects of season favourable. Public health generally good. Prices slightly fallen in the Mysore district.
Mysore . . }		
Mercara . .	9·31	Prospects remain favourable. Prices still falling.
Berar and Hyderabad—(August 18th)		
Amraoti . .	2·11	Weather rainy. Crops thriving; weeding in hand. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	2·85	Weather cloudy and close. Crops in good condition.
Hyderabad . .	.....	No report received.
Central India States—(August 18th)		
Indore . . .	3·24; total rainfall 26·69.	Weather showery. A few cases of cholera in city, otherwise health good.
Morar (Gwalior) .	*Nil*	Weather cloudy and very hot. Health and prospects good.
Neemuch . .	1·97; total rainfall 15·66.	Crops thriving. Health good. Prices slightly rising.
Goona . . .	·51	More rain much wanted. Health good.
Sutna . . .	·03	Weather hot and cloudy. More rain wanted. Health good.
Agar . . .	·57	More rain urgently required. Health good. Prospects fair.
Sehore . . .	·00	Weather clear. Health good. Crops fair.
Nowgong . .	·10; total rainfall 2·29.	Weather hot and cloudy; more rain is wanted. Prospects and health good. Prices slightly rising.
Bhopawar (Manpur) .	At Sirdapur, ·98; total rainfall 17·30; at Manpur 20·0.	Prospects favourable. Few cases of cholera at Bagod, otherwise health good. Prices steady.
Rajputana—(August 18th)		
Abu (Aug. 18th)	·77	Weather cloudy, occasionally clear, and seasonable.
Sirohi („ 15th)	·07	Tanks, wells, health, and prospects good. Weather dry and calm. More rain wanted.
Marwar („ 13th)	·32	More than twelve months' water in Jodhpur city tanks. Health good, but some fever prevails. Crops in need of rains. Weather clear, occasionally with light clouds; but too warm. Prices stationary.
Kherwara („ 16th)	2·13	Tanks and wells fairly full. Crops flourishing. Health good. Prices steady. Weather cloudy; more rain needed.
Meywar („ 14th)	·56	Tanks and wells filling. Prospects good. Health fair. Dysentery prevalent. Prices falling. Rain wanted.
Pertabgarh („ „)	1·03	Tanks and wells filling. Prospects good. Health good. Prices rising.
Harowti („ „)	At Deoli, ·83; Shahpura, ·86.	More rain urgently needed. Indian corn drying. Health good.
Jhallawar („ 13th)	·07	Weather cloudy and sultry. Health good.
Kotah („ 14th)	·67	More rain needed in the districts. Health good. Weather cloudy.
Ajmere („ 17th)	1·0 on 16th	Weather cloudy and hot. Crops being spoilt for want of rain. Health good.
Jeypore („ „)	.....	Rain wanted.
Bhurtpore		No report received.
Ulwur (Aug. 17th)	·59	Rain much wanted in parts. Health good. Prices steady.
Bickanir („ 14th)	*Nil*	Crops good. Rain in some districts. Tanks and wells filling. Prospects good. Fever in two districts. Prices low. Weather very hot and cloudy.
Nepal—(Aug. 18th)		
Katmandu (Aug. 13th)	67	Prospects good.

7*

C. J. LYALL,
Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

No. XVI of 1886-87.

APPROXIMATE STATEMENT OF GROSS RECEIPTS AND EXPENSES OF INDIAN RAILWAYS.

N.B.—As regards the figures in column "*Total Receipts from 1st April to date*," audited figures have been used, as far as possible.

Latest Return received.	Railways.	Total mean length open.	Receipts for week ending 25th July 1885. Total.	Per mile open.	Total mean length open.	Receipts for week ending 24th July 1886. Total.	Per mile open.	Total Receipts from 1st April to 25th July 1885. Total.	Per mile open per week.	Total Receipts from 1st April to 24th July 1886. Total.	Per mile open per week.	Total Increase in 1886-87.	Total Decrease in 1886-87.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

AGE LIMIT FOR CANDIDATES FOR GOVERNMENT SCHOLARSHIPS TENABLE IN ENGLAND BY NATIVES OF INDIA AND THE GRANT OF FREE PASSAGE TO SCHOLARSHIPHOLDERS.

No. $\frac{9}{269-281}$.

Extract from the Proceedings of the Government of India, in the Home Department (Education), —under date Simla, the 23rd August, 1886.

Read again—

Home Department Resolution No. $\frac{1}{45-57}$, dated the 12th February, 1886, on the subject of the creation of certain Government scholarships tenable in England by natives of India.

Read the undermentioned papers :—

Memorials presented to the Government of India by the Central National Muhammadan Association at Calcutta, and by the Hooghly and Midnapore Branches of that Association.

Letter from the Registrar of the Calcutta University, No. 482, dated 14th April, 1886.

Letter to the Registrar of the Calcutta University, No. 156, dated 20th May, 1886.

Letter from the Registrar of the Calcutta University, No. 706, dated 29th July, 1886.

Read also—

Despatch from Her Majesty's Secretary of State, No. 37 Public (Educational), dated 13th May, 1886.

RESOLUTION.

In Home Department Resolution, dated the 12th February, 1886, cited in the preamble, which announced the establishment of six State scholarships of the value of £200 each per annum, tenable for three years in England by persons who are natives of India within the meaning of section 6 of the Statute 33 Vic., cap. 3, it was laid down *inter alia* that no candidate for these scholarships should be more than 21 years of age. It was further provided in paragraphs 4 and 6 of the Resolution—

(1) that each scholar would be entitled to receive a sum of £100 for passage money, and that a similar sum would be payable within one month before his actual return to India, if he should complete the full period of three years' residence, or be compelled by sickness to return before the completion of that period; and

(2) that if any scholar, not being disabled by sickness, failed to complete a residence of three years in England, or was guilty of gross misconduct, or disregard of the orders of Her Majesty's Secretary of State, he would, at the discretion of the Secretary of State, forfeit his scholarship and further be liable to refund the sum of £100 drawn by him as passage money.

2. As regards the age limit fixed by the Resolution of 12th February last, representations have been received by the Government of India to the effect that the result of prescribing a maximum limit of 21 years will practically involve the exclusion of Muhammadan youths from participation in the benefits of the scholarships in question. The Governor-General in Council has now, after careful consideration and consultation with the authorities of the Calcutta University, resolved to raise the age limit. It is accordingly notified that the maximum limit of age for all classes of candidates for these scholarships shall be 22 years instead of 21 years as prescribed in paragraph 3 of the Resolution above cited.

3. In accordance with directions from Her Majesty's Secretary of State, the Governor-General in Council further announces that, in modification of the orders contained in paragraphs 4 and 6 of the Resolution of 12th February, 1886,—

(1) each scholar shall be provided with a free passage to and from England instead of with a sum of £100 as passage money for each journey; and

(2) if any scholar, not being disabled by sickness, fails to complete a residence of three years in England, or is guilty of gross misconduct or disregard of the orders of Her Majesty's Secretary of State, he will, at the discretion of the Secretary of State, forfeit his scholarship, and will also be liable to refund the amount representing the cost of his free passage to England.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Madras, Bombay, and the Punjab for information and communication to the authorities of the Universities concerned.

Ordered also, that a copy be forwarded to the Governments of Bengal and the North-Western Provinces and Oudh, the Chief Commissioners of the Central Provinces, Burma, Assam and Coorg, and the Resident at Hyderabad for information; and to the Registrar of the Calcutta University for information and guidance.

Ordered further, that a copy be forwarded to the Department of Finance for information, and that the Resolution be published in the Supplement to the *Gazette of India*.

A. P. MACDONNELL,

Offg. Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 25th AUGUST, 1886.

GENERAL REMARKS.—Rain has been general, except in some districts of the Punjab. Heavy falls have occurred in parts of the Bombay Presidency, Rajputana, Assam, and Lower Burma.

Standing crops are in good condition, and prospects are satisfactory in Madras, Mysore, and Coorg.

More rain is wanted in parts of the Bombay Presidency, but the standing *kharif* crops are everywhere doing well.

In the Punjab and North-Western Provinces and Oudh prospects are good, though more rain is wanted in some places.

With the exception of the Chhattisgarh division, where good rain is urgently needed, crops are thriving throughout the Central Provinces.

In the Rajputana and Central India States and in Berar prospects are good.

In the Lower Provinces prospects continue very favourable, except in the flooded tracts in North Behar and East Bengal. More rain is, however, wanted in places. Harvesting of early rice and jute is progressing, with promise of a fair outturn.

In Assam prospects are unchanged in Sylhet. In Cachar the floods are subsiding slowly.

In Lower Burma ploughing, sowing, and transplanting are still in progress.

The public health continues generally satisfactory.

Prices are rising in the Mooltan, Rawalpindi, and Peshawar districts of the Punjab, and in the Bilaspur district of the Central Provinces. In the Mysore district they are also rising, but are falling in Kolar and Tumkur. Elsewhere they are steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(August 25th)		
Bellary . .	Average ·40	Standing crops generally good; harvest second crop paddy, yield average. Cattle-disease in one taluk.
Kurnool . .	Average 1·11	Standing crops fair. Small-pox in three and cattle-disease in one taluk.
Ganjam . .	Average last week since revised, 1·26; this week, 4·64.	Fever in two and slight small-pox in three taluks; slight cattle-disease in one division; some cholera.
Kistna . .	Average 5·13	Standing crops flooded by excessive rain, specially in Deltaic taluks. River 9 feet water over anicut. Cattle-disease in one taluk.
Chingleput (Madras) .	Average ·45	Standing crops fair; harvest dry crops, outturn below average. Small-pox in one, fever in two, and cattle-disease in three taluks.
Coimbatore . .	Average ·17.	Standing crops generally good; harvest dry grains, outturn *cholum* about average, rest above average. Fever and small-pox in one taluk.
Tanjore . .	Average ·05	Standing crops good; harvest *cholum*, outturn below average.
Madura . .	Average last week since revised, ·74; this week, ·03.	Health of people and cattle generally good.
Malabar . .	Average 1·88	More rain wanted. First crop paddy fair. Fever in one and slight small-pox in six taluks.
Travancore . .	·31	Harvest paddy. Fever and small-pox in parts. *General Remarks.*—General prospects good.
Bombay—(August 25th)		
Kurrachee . .	Average rain at two stations, ·22.	River at Kotri on 23rd, 18 feet 7 inches against 18 feet 11 inches on same date last year. Rice transplanting progressing. Fever in four and cattle-disease in one taluka; one fresh case of small-pox in district. Wheat, red rice, and *bajri* in Kurrachee 26, 30 and 34; in Sakro *nil*, 37 and 48, in Jati *nil*, 40 and 40, and in Sehwan, 30, 40 and 28 pounds per rupee, respectively.
Hyderabad .	Rain in five talukas, average ·46.	*Kharif* cultivation good. Want of rain still felt in the district. River at Kotri on 23rd, 18 feet 8 inches against 18 feet 11 inches on same date last year. Cattle-disease in one and fever in three talukas. Wheat 25⅓, *bajri* 38¾, *juari* 40, red rice 28, and white rice 18 pounds per rupee.
Ahmedabad . .	3·42; total 31·90; rain throughout the district.	Standing crops in good condition. Public health good. Wheat 35 and *bajri* 31 pounds per rupee.
Baroda . .	7·81; total 33·18	Standing crops in good condition. *Bajri* 32, wheat 23, and rice 22 pounds per rupee.
Surat . .	Rain in all talukas	Standing crops good; sowing operations completed. Fever in Bulsar and Bardoli talukas. *Juari* 38½ and *nagli* 44¼ pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Nasik	At Igatpuri, 11·01; Peint, 15·80; maximum at Baglan, 1·07; minimum at Yeola, ·22.	Standing *kharif* crops in good condition; transplantation of rice and *nagli* completed. Fever in Peint; public health good. Wheat 28¾, *bajri* 31, and rice 40½ pounds per rupee.
Colaba (Bombay)	Rain everyday; total of week, 1·55; total to date, 80·69, being 33·68 above average.	Abnormal temperature 1° warm on 23rd, *nil* on all other days; vapour in air excessive on 22nd; normal on all other days; abnormal wind from north-west on 18th and 19th; wind normal on all other days.
Poona	Rain throughout the district; maximum at Nawali, 5·05; minimum at Bhimthadi, ·29.	Standing crops doing well. More rain wanted in parts of Khed, Purandhar, and Haveli talukas. Public health generally good; slight cattle-disease in Junnar and Haveli talukas. *Bajri* 30 and *rice* 30 pounds in the district, and *wheat* 35 and *jvari* 35 pounds per rupee in Poona City.
Ahmednagar	At Jamkhed, 2·70; Karjat, 1·15; Parner, ·72; Sheogaon, ·00; Nagar, ·47; from ·21 to ·25 in other talukas.	*Kharif* sowing completed. Crops and condition of people good. *Bajri* maximum 60 and minimum 38 and *jvari* maximum 96 and minimum 48 pounds per rupee.
Sholapur	Rain in all districts	*Kharif* crops generally good. *Jvari* 60¾ and *bajri* 43⅘ pounds per rupee.
Dharwar	Rain at all stations, varying from 1·78 in Hangal to ·34 in Navalgund.	Rice and early *jvari* crops good, but require heavy showers; cotton sowing commenced in Nargund and Mundargi Pethas; in the rest of the district, it cannot be carried on owing to insufficient rain; land being prepared for late crops. Public health good. Rice 23 and *jvari* 51 pounds per rupee.
Kanara	At Karwar, 7·25; Kumpta, 0·50; Sirsi, 5·45; Haliyal, 1·00; total to date, 123·16.	Rice, sugarcane, and cardamom crops thriving. Slight fever and small-pox in four talukas; cattle-disease in Karwar, Ankola, Kumpta, Honore, Sirsi, and Supa. Common rice at Karwar 14, district average 12½ seers per rupee.
Rajkot	3·50; total 34·40	Weather cloudy. Fever and dysentery prevailing in some places. Crops not in good condition, owing to excessive rain. Wheat 25, *bajri* 30, and *jvari* 44 pounds per rupee.
		General Remarks.—Good rain throughout the Presidency; more rain wanted in parts of Poona and Dharwar. Standing crops in good condition everywhere; young crops injured by insects in parts of Ratnagiri and by excessive rain in parts of Broach. Fever and cattle-disease in parts of nine and small-pox in parts of two districts.
Bengal—(August 25th)		
Chittagong	1·92	Weather favourable. Harvesting of *aus* continues, *aman* being sown steadily. Insects causing damage in several places. Prices stationary. Public health good.
Dacca	2·73	Paddy crops partly damaged here and there, and state of villagers and cattle miserable, owing to increase of water. Public health good.
24-Pergunnahs (Calcutta).	1·13	Prospects of early rice, jute, and sugarcane favourable; harvesting of early rice and jute commenced; transplantation of *aman* still going on. Public health generally good.
Moorshedabad	0·24	Weather warm. Slight rain. River taking rise. Agricultural prospects excellent. Prices falling. Public health good.
Rungpore	.....	No report received.
Burdwan	0·22	Transplantation of *aman* and cutting of jute nearly completed; prospects of all crops good. Public health generally good.
Bhagalpur	0·63	A return of heavy rain would now help completion of transplanting operation. *Marua* in north poor, otherwise *bhadoi* prospects good; early harvest progressing. Public health favourable.
Purneah	.....	No report received.
Patna	1·83	Prospects of *bhadoi* crops good; transplantation of paddy continues; *jvari* and *rahar* growing well. Cholera still reported from Behar.
Durbhunga	0·57	Prospects of paddy and *bhadoi* crops good, except in flooded parts; very serious damage caused by flood. Prices stationary. Public health good.
Hazaribagh	.....	No report received.
Cuttack	3·09	Weather wet and cloudy. *Sarad* rice being transplanted; *aush* rice ripening. Rainfall of the week has much improved prospects. Price of rice unchanged. Public health generally good.
Midnapore	2·43	In extreme south of district crops very poor for want of rain, otherwise prospects good. Public health normal.
Khoolna	0·27	Weather cloudy. *Aus* ripening; transplanting of *aman* continues, prospects favourable. A little fever at Satkhira, otherwise public health good.
Dinagepore	0·09	Prospects of standing crops good, except jute, which has been damaged in places by excessive rain. Fever generally prevalent; cattle-disease in three thanas.
Pubna (Serajgunge)	1·79	Break continues. *Aus* and jute both good; *aman* crops promising well.
Gya	1·68	Paddy and *bhadoi* crops doing well. Public health good. Prices almost stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Chumparun	0·64	*Bhadoi* and paddy crops in good order, except where damage done to them by excessive rain and floods. Prices stationary. Public health fair.
		General Remarks.—The break in the rains still continues almost throughout the province, varied with only occasional light showers; in Chota Nagpur insufficiency of rain much complained of; more rain also wanted in some other parts. General agricultural prospects favourable, except in flooded tracts in North Behar and East Bengal. Transplantation of late rice still proceeding; harvesting of early rice and jute going on with prospect of satisfactory outturn. Price of rice generally almost stationary. Fever in some districts, but general health good.
N.-W. Provinces and Oudh—**(August 25th)**		
Benares (Aug. 23rd)	1·40 at Sadr	Prospects good. Markets well supplied. Prices steady. Some cholera in district, otherwise public health good.
Ballia („ 24th)	Slight rain	*Kharif* crops thriving; sugarcane promises well. Prices steady. Health good.
Gorakhpore („ 23rd)	·50 at Sadr	Weather sultry. Crops in good condition; preparation of fields for *rabi* sowings in progress. Prices stationary. Health fair.
Fyzabad („ 24th)	1·0 at Sadr	Weather often cloudy. Prospects good. Supplies sufficient and prices steady. Fever in three tahsils.
Lucknow („ 23rd)	1·0 on the 21st and 22nd.	More rain needed. Prospects favourable; sowing of *mash* in some places continues. Markets well supplied. Prices almost stationary. Health of people good; condition of cattle fair.
Rae Bareli („ „)	Rain	More rain wanted. *Dhan* and *makka* are being irrigated; prospects of *kharif* crops good. Supplies ample and prices steady. General health fair.
Partabgarh („ 24th)	Rain	Rain which fell at end of the week has been most beneficial to the transplanted rice; more rain is required in places, where artificial irrigation is not possible. Prices stationary. Health of people and condition of cattle good.
Allahabad („ „)	1·20	Weather cloudy. Crops flourishing. Markets well supplied and prices steady. Slight autumnal fever reported; no disease amongst cattle.
Cawnpore („ „)	Rain in seven tahsils from ·20 to 2·20.	Weather cloudy. Crops in good condition. Prices steady. Cholera in the interior of district and at head-quarters; cattle-disease in two parganas.
Farakhabad („ „)	Rain in three tahsils; appearance of general rain today (24th).	Supplies plentiful. Prices stationary. Cholera continues in Farakhabad.
Sitapur („ „)	Rain	Very beneficial rain has fallen and the early rice will soon be ready for cutting. Prospects everywhere favourable.
Bareilly („ „)	Little rain during week.	Weather cloudy. Crops doing well. Prices tending downward. Fever prevalent, also cholera in pargana Faridpur.
Banda („ „)	Slight showers during week.	More rain wanted. Weeding in progress; ploughing for *rabi* commenced. Prices steady. Health fair; usual autumnal fever prevalent in parts; cattle-disease in three parganas.
Kumaon („ „)	Insufficient rain	More rain required for crops ripening. Prices falling. General health fair; fever continues; cattle-disease abating.
Agra („ 23rd)	·20 to 3·0	Crops flourishing. *Rabi* ploughings in progress. Prices falling. Slight fever; general health good.
Jhansi („ „)	Slight rain	More rain wanted for *kakar* land in pargana Jhansi. Prices steady. Health of people and condition of cattle fair.
Meerut („ 24th)	General rain	*Kharif* crops flourishing. Supplies sufficient and prices steady. Slight fever reported.
		General Remarks.—Rainfall has been generally light during week; more rain is wanted. *Kharif* prospects are good and ploughings for the *rabi* have begun. Supplies are ample and prices steady. Some cases of cholera and fever reported, otherwise public health good.
Punjab—**(Aug. 24th)**		
Hissar	·20 at Sadr	Health fair. Prices stationary. Prospects flourishing.
Delhi	*Nil*	Health fair. Prices fluctuating.
Umballa	·12	Health fair. Prices stationary.
Jullundur	2·90	Health good. Prices stationary, Prospects good.
Ferozepore	1·10 at Sadr	Health good. Prices stationary. Prospects good.
Amritsar	1·10	Health good. Prices stationary. Prospects good.
Sialkot	.....	No report received.
Lahore	2·50	Health good. Prices stationary. Prospects good.
Mooltan	*Nil*	Health good. Prices slightly rising. Prospects good.
Rawalpindi	1·30	Health good. Prices rising. Prospects average.
Shahpur	*Nil*	Health good. Prices almost stationary. Prospects fair.
Dera Ismail Khan	*Nil*	Health good. Prices stationary.
Peshawar	*Nil*	Health good. Prices rising. Prospects good on irrigated lands.
		General Remarks.—Rain has fallen in all districts, except Delhi, Mooltan, Shahpur, Dera Ismail Khan, and Peshawar; more wanted in the Hissar, Umballa, and Peshawar districts. General health good. Prices rising in the Mooltan, Rawalpindi, and Peshawar districts, fluctuating in the Delhi district; elsewhere stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—(August 25th)		
Nagpur	·77	Weather cloudy. Crops promise well. Small-pox prevalent. Prices steady.
Jubbulpore	2·93	Crops thriving. Weedings well advanced. *Urd* and *til* sowings continue. Health fair. Prices steady.
Saugor (Aug. 24th)	5·07	Prospects favourable. Health good. Prices stationary.
Seoni	1·45	More rain wanted for rice. Weeding and ploughing for *rabi* in progress. Health good. Prices steady.
Hoshangabad	.....	Weather cloudy and close. Prospects and health good. Prices steady.
Bilaspur	·81	Break appears to have ended on 22nd, but rain still very light, though rivers in flood. Prospects very precarious. Cholera and fever continue. Prices risen.
Khandwa	2·03	Weather showery. Prospects favourable; weeding in progress. 135 cases cholera, 64 fatal. Prices steady.
Raipur	2·45	Weather cloudy and close, with some rain on 19th and 20th. Prospects slightly improved, except in Shimoga, where half an inch of rain only fell. Rice on highland in Shimoga tahsil withered, and on inland being choked by weeds for want of second ploughing; sowing of *rahar*, cotton, and *til* completed. Cholera decreasing; cattle-disease in places. Prices steady.
Sambalpur (Aug. 21st)	3·58	Weather cloudy and clear alternately; more rain wanted. Rice in parts suffered considerably. Prices steady. Cholera in places.
		General Remarks.—Prospects slightly improved in Chhattisgarh, but rain is still very light, and good rain is urgently required. The crops continue thriving over rest of the Provinces. Prices have risen in Bilaspur, but are generally steady elsewhere.
British Burma—(Aug. 24th)		
Akyab (Aug. 21st)	9·21; total rainfall 99·54.	Public health good; cattle-disease in one township. Transplanting nearly completed.
Bassein	7·85; total rainfall 68·24.	Public health good; cattle-healthy. Sowing and transplanting progressing.
Rangoon	6·04; total rainfall 67·24.	Public health good; cattle healthy.
Amherst (Moulmein)	**13·09; total rainfall 117·68.**	**Public health good; cattle healthy. Ploughing and transplanting progressing.**
Pegu	10·89; total rainfall 90·98.	Public health good; cattle healthy. Crops in good condition; transplanting progressing.
Henzada	3·71; total rainfall 57·15.	Public health good; cattle healthy. Ploughing and transplanting nearly finished.
Prome	2·80; total rainfall 27·72.	Public health good; slight foot and mouth disease in one township. Ploughing and transplanting progressing. Cattle healthy.
Tounghoo	3·31; total rainfall 53·17.	Public health and health of cattle good. Ploughing and transplanting progressing.
Thayetmyo	1·36; total rainfall 24·43.	Public health good; cattle-disease prevalent in parts of district. Transplanting commenced.
		General Remarks. Public health good in all districts; cattle-disease in four districts, elsewhere cattle healthy. Ploughing, sowing, and transplanting progressing favourably; crops reported healthy.
Assam—(August 25th)		
Gauhati	·37 during week ending 24th instant.	Weather hot. General health tolerably good; cattle-disease reported from some mouzahs. Planting of *sali* in some parts deferred on account of excess of water.
Sylhet	18·88	Extent of damage to the crops by the flood not yet ascertained; prospects as before.
Cachar	3·05	Weather hot. Flood subsiding, but slowly. Transplanting of *sali* crops is being made on a small scale. Common rice 11 seers 13¾ chittacks per rupee. Prospects of tea good, but blight is increasing. General health good.
Dibrugarh	2·34	Weather seasonable. Reaping of *ahu* progressing, outturn good; transplanting of *sali* continues. Cattle-disease still prevalent. Tea not doing well. Public health good.
Mysore and Coorg—(August 25th)		
Bangalore, Mysore	Good rain in Shimoga and Kadur districts and fair in other parts of the State.	Standing crops generally in good condition, except in the Gubbi taluk of the Tumkur district, where rain is reported to be too much for young crops. Prospects of season favourable. Public health good. Prices slightly fallen in the Kolar and Tumkur districts and risen in the Mysore district.
Mercara	5·50	Crops and prospects good. Health good.
Berar and Hyderabad—(August 25th)		
Amraoti	1·57	Weather cloudy. Crops in good condition; weeding in progress. Wheat 22 and *juari* 26 seers per rupee.
Akola	3·15	Crops progressing favourably; weeding continues.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad—*contd.*		
Hyderabad (Aug. 20th)	Average 2·44; total rainfall 24·47.	Weeding of *rabi* crops commenced; *kharif* crops slightly damaged by excessive rainfall in one taluka (Asifnagar). General health fair. Prices—wheat 15, coarse rice 11¾, white *juari* 21, yellow *juari* 21¾, and *tur* 14¾ seers per current sicca rupee.
Ditto („ 25th)	Average 6·55; total rainfall 31·03.	Heavy rain slightly damaged some of the *kharif* crops; *abi* paddy crops prospering. General health fair. Prices—wheat 14¾, coarse rice 11¾, yellow *juari* 22, white *juari* 20, and *tur* 17 seers per current sicca rupee.
Central India States—(August 25th)		
Indore	2·11; total rainfall 28·30.	Weather showery.
Morar (Gwalior)	1·84; total rainfall 19·85.	Health and prospects good. Weather cloudy.
Neemuch	4·60; total rainfall 20·26.	Weather cloudy. Crops thriving. Prices stationary. Health good.
Goona	6·19	Health and prospects good.
Sutna	·82	Weather cloudy. Health good.
Agar	6·86; total rainfall 13·36.	Health and prospects good.
Sehore	3·93	Weather seasonable. Health good. Crops thriving.
Nowgong	2·0; total rainfall 24·90.	*Kharif* prospects excellent. Health good. Prices steady.
Rajputana—(August 25th)		
Abu (Aug. 25th)	14·20	Weather very windy and cloudy, but seasonable.
Sirohi („ 22nd)	8·13	Tanks very full; wells good. Health good. Crops good. Total rainfall of week more than half the annual average.
Marwar („ 20th)	4·52	Above twelve months' water in Jodhpur City tanks. Health good Crops good. Weather cloudy and oppressively warm. Splendid rain. Prospects bright. Prices falling.
Meywar („ 21st)	12·01	Tanks and wells full. Crops good. Health fair. Dysentery and diarrhœa prevalent. Prices falling.
Pertabgarh („ „)	13·42	Tanks and wells full. Crops good. Health good. Prices tending to fall. Continued showers.
Harowti („ „)	Tonk, 9·04	Weather cloudy. Health and prospects good.
Jhallawar	.....	No report received.
Kotah (Aug. 21st)	3·33	Prospects favourable.
Ajmere („ 24th)	**1·72**	**Injured crops improving. Health good. Weather cloudy. Prices generally falling.**
Jeypore („ 21st)	Good rain	**Prospects much improved.**
Kerowlie („ „)	1·0	**Tanks and wells filling. Crops rising. Rain urgently wanted for *dhan*. Slight fever; health good. Prices steady.**
Dholepore („ 18th)	·91	Tanks and wells failing. Crops rising. Health good. Weather seasonable.
Bhurtpore („ 21st)	·20	Tanks and wells full. Crops doing well. Health good. Prices steady. Break continues.
Ulwur („ 24th)	·69	Prospects good. Health good. Prices steady.
Bickanir („ 21st)	·28	Fair rain. Prospects good. Fever in four districts. Prices low. Weather very hot and cloudy; thunder and lightning.
Nepal—(Aug. 15th)		
Katmandu (Aug. 20th)	2·37	Rice transplanting finished; owing to the want of rain in the early part of the season it is said that not so much land as usual is under rice cultivation.

SUPPLEMENT TO THE GAZETTE OF INDIA, SEPTEMBER 4, 1886. 1189

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 25th August, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.

His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.

His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.

The Hon'ble C. P. Ilbert, C.S.I., C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.

The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.

The Hon'ble Major-General G. T. Chesney, R.E., C.S.I., C.I.E.

The Hon'ble W. W. Hunter, C.S.I., C.I.E., LL.D.

The Hon'ble Colonel W. G. Davies, C.S.I.

NATIVE PASSENGER SHIPS BILL.

The Hon'ble Sir A. Colvin moved for leave to introduce a Bill to consolidate and amend the law relating to Native Passenger Ships. He said:—

"Experience has shown that the law of 1876, in respect of Native passenger ships, which was amended by the respective enactments of 1883 and 1884, requires modification in certain points with a view to the greater security and comfort of the passengers, and to the protection of the interests of those concerned in Native passenger traffic. After consulting the different Local Governments, the six amendments which are contained in the Statement of Objects and Reasons have been resolved upon with the view of meeting the above points. It is unnecessary that I should enter into further explanation here in regard to the amendments proposed in the modifications of the present law set forward in the Bill which I ask to leave to introduce, as they are stated with sufficient fulness in the Statement of Objects and Reasons."

The Motion was put and agreed to.

The Hon'ble Sir A. Colvin also introduced the Bill.

The Hon'ble Sir A. Colvin also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

DEKKHAN AGRICULTURISTS' RELIEF BILL.

The Hon'ble Sir Theodore Hope moved that the Bill to amend the Dekkhan Agriculturists' Relief Acts, 1879 to 1882, be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley, the Hon'ble Mr. Quinton and the Mover, with instructions to report within two months. He said:—

"In support of a Motion of this kind it is usual to give a somewhat more detailed sketch of the provisions which a Bill contains than that which is afforded on the Motion for leave to introduce it. I do not think, however, that it is

necessary for me to trouble the Council with what, as regards the majority of the amendments which this Bill proposes to effect, would be hardly more than a repetition of my remarks on the last occasion. But there is one of those amendments which I then indicated as being of importance, and on which I shall be expected to give a little further explanation; that is, the section relating to conciliation, by which it is proposed to invest the Conciliators with power to require the attendance of either of the parties to the conciliation. At present the Conciliator possesses the power of requiring the attendance of the applicant, but only of inviting that of the defendant.

"In the first place, I may take the opportunity of pointing out the very important position which this system of conciliation has now obtained in the four Dekkhan collectorates to which the Act is applied. It was in force last year in 25 out of 37 talukas in these four collectorates, the remaining talukas being worked under somewhat different arrangements; and in those 25 talukas there were 237 Conciliators. The importance of their work may be judged from the fact that during the past year there were 40,641 applications for conciliation, and that those applications related to an amount of no less than 51½ lakhs of rupees. During the year, again, the number of cases disposed of, including those in arrear, was 42,880. Of these cases, both the parties appeared in about 12,000, and in about 31,000 one or other of the parties was absent; that is to say, there were about 28 per cent. of full appearances, and about 72 per cent. of absences of one or other of the parties, of which a small proportion only was due to withdrawals or compromises. Now, it is obvious that, where one or other of the parties does not make his appearance before the Conciliator, the conciliation cannot be said to have failed, but has never had the opportunity of being tried at all, and the object of the provision of the law is defeated, except in so far as the granting of certificates is concerned. Therefore, what we must look to, in examining this conciliation system, is the result in cases in which both parties made their appearance before the Conciliator. Now, we find that, during the past year the proportion of cases in which the parties came to terms (which means that they settled their disputes without it being necessary to go to a Civil Court) was no less than 78 per cent.; or, to put it in another form, more than 3 out of 4 of the cases, or nearly 4 out of 5, were settled in this simple and inexpensive way, instead of being subjected to the costly and dilatory machinery of the Civil Courts. This percentage of 78, moreover, is the more satisfactory, for we find that the proportion has been growing every year since the Act was introduced. In the year 1880 the percentage of such cases was 52; in the following year it was 44; in the third year it was 58; in the fourth 64; in the fifth year 73; and now we have it at 78.

"Turning next to the nature of these agreements, which is not an unimportant point,—because when the Act was introduced, and its probable effects could only be judged by theory instead of by experience, it was said that the influence of the saukár, and of his social relations, and so on, would be so great that the unfortunate raiyats when brought before the Conciliator would be less able to stand against him than when in a Civil Court,—we find that in the past year 9,361 cases were decided, and that, out of these, 8,990 agreements were filed in the Civil Court, the difference in figures being merely owing to pending cases. Out of these 8,990 agreements, 6,704 related to money-claims. These money-claims were of the value of 7¼ lakhs of rupees, and the result of the conciliation process was that these 7¼ lakhs of rupees were reduced by 33 per cent., or ⅓rd; that is to say, that the matter was settled for about ⅔rds of what the saukár was demanding from the raiyat. The mortgage-agreements, again, numbered 1,790, and were valued at 3½ lakhs of rupees, the amount of interest claimed being Rs. 1,86,581. In these, we find that the results of the conciliation were very nearly in the same proportion as in the money-claims, that is to say, the reduction amounted to 32 per cent. of the claims. Turning now to the third class of agreements, namely, those for the redemption of mortgaged land, the number was 496, and the land was valued at Rs. 1,10,000. The value was not open to much dispute,—the difference on settlement being only about Rs. 1,000 or so,—but in 125 cases, where the land was in the possession of the creditor, his term was limited, that is to say, an arrangement was made by which he would have to give up the possession of

the land after a definite period; while in the remaining 314 the lands were restored at once to the original mortgagor, subject to an arrangement that he should pay a series of fixed instalments till the debt was liquidated. These are the actual facts of the past year. Now, with regard to the quality of the Conciliators' decisions, which might seem open to question, it is very remarkable that, out of the whole of these 8,990 cases, only 77 were objected to within the period for which the law provides that objections to the arrangement may be filed in the Civil Court by either party. Out of all these 77, the objections were allowed in only 37 instances. Besides this the Court, of its own motion, under the powers which it has under another section of the Act, disallowed 38 of the agreements, as being either contrary to law, or improper for some other obvious reason. So we have the fact that, out of all these 8,990 agreements, only 75 were upset for one reason or another, that is to say, considerably less than one per cent.

"Passing now from the circumstances in which the conciliation has had a satisfactory effect to the opposite, we find that the cases in which conciliation could not come into play owing to the non-appearance of the parties without apparent cause are on an average about 64 per cent. This percentage has not varied very much since the Act was introduced. I find that in some years the number of applicants who did not attend was larger than in other years, and so also as regards the defendants; but practically about 64 per cent., that is to say, about ⅔rds, of the cases which might have come before the Conciliators, and which presumably, if they had so come, might probably have been settled satisfactorily in the proportion which I have been citing, absolutely lie over, and become the subject at any rate of expensive and tedious litigation. Now, it is in order to remedy this particular difficulty, of the non-appearance of one party or the other, that the clause in our present Bill has been framed.

"As regards the general working of this conciliation system, I may quote a few words from the last year's report by the Hon'ble Mahadeo Govind Ranade, the Special Judge in charge of the four Dekkhan districts.

"He says that the figures shew, '*first*, that although there has been a decrease of nearly 20 per cent. in the total number of applications, these applications were still nearly twice as many as the number of suits instituted in the subordinate Courts; *second*, that the value of the claims involved in these applications was nearly five times as large as the value of the claims brought in the Civil Courts; *third*, that the number of applications in which agreements were made, or in which the claims were otherwise compromised, did not fall much short of the number of suits which were disposed of really and finally; *fourth*, that the value of the claims so settled exceeded the total value of the claims disposed of by the Civil Courts," and again, "that the percentage of abatements under all heads, namely, (w, y and z), secured by Conciliators was not very much lower than the corresponding results in suits disposed of in Civil Courts." Moreover, I find that, out of the 25 Sub-Judges in the four districts, 22 are entirely in favour of the conciliation system. The 3 others make objections to certain portions of it, which are very ably reviewed and met by Mr. Ranade, but which I need not trouble the Council by recapitulating. Thus, I would submit that the system is a very good one; that it has proved of enormous benefit as far as it has been allowed to act; that it has already, even in this imperfect state, taken the place of very much larger, more expensive and cumbrous machinery; and that it ought to be allowed the fullest scope. In order to secure this attendance of parties, I may state that various expedients have been suggested short of allowing a power of summons and warrant; but, after full deliberation, it has been considered best to adopt the simple means already in vogue in the ordinary Courts of the country, that is to say, that the summons should issue, and that in the case of non-compliance with the summons attendance should be required by warrant. In case there should be any feeling that this requiring of attendance by warrant is a somewhat harsh and drastic method, I would recall to mind that exactly similar objections were made in 1879 in this Council to the clause of the Act which provides against suits being decided *ex parte*, by giving the Courts power to absolutely require the presence of the defendant. At that time very strong objection was offered to this clause, and it

was finally discussed and adopted on an amendment in this Council. But now we find that during the last six years not the slightest evil consequences have arisen from it. I venture to believe now in this case, as I thought then, that, when once it is understood that an order has to be obeyed, nobody thinks of disputing it. I do not recollect that in the whole course of my experience as a Magistrate I ever had to issue a warrant to obtain the attendance of a witness, and I have very little doubt that this will be the result with regard to the attendance of these parties, and that the mere fact of the law requiring that they shall attend will be quite sufficient to ensure their doing so without trouble.

"With these remarks I commend my Motion to the Council."

The Hon'ble MR. ILBERT said:—"The Act now under amendment was the subject of a controversy which raged very fiercely a short time before my arrival in this country, and of which the embers were still smouldering when the second amending Act was passed four years ago. The judgment of most impartial critics at the present time will probably be that the Act embodies sound principles and contains some useful provisions combined with others which were not well adapted to their purpose and have remained inoperative. I think that the Local Government is quite justified by its experience of the working of the Act in asking for powers to extend to other districts those provisions which have satisfactorily stood the ordeal of the last six years. With reference to the particular provision which was rejected by a narrow majority in 1882,—the provision which gives Conciliators power to require the attendance of the parties,—I thought then that neither the evidence nor the arguments brought forward in support of the proposal to give this power were convincing, and accordingly I gave my vote on the side of caution. As, however, it appears that the local authorities, in the light of the full discussion which took place in this Council four years ago, and of the subsequent experience gained during the last four years, are of opinion that the conferment of such a power is necessary for the satisfactory working of the Act, I am quite content to defer to their judgment on that point."

The Motion was put and agreed to.

JHÁNSÍ AND MORAR BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to annex the Town and Fort of Jhánsí and certain adjacent territory to the Jhánsí District, and for certain other purposes. He said:—

"This Bill is drawn in three Parts. The object of Part I is to incorporate in the Jhánsí district the town and fort of Jhánsí, which were lately ceded by the Mahárájá Scindia to the British Government in exchange for the cantonment of Morar. The town and fort have already been declared by proclamation under the Statute 28 & 29 Vic., c. 17, section 4, to be subject to the Lieutenant-Governorship of the North-Western Provinces, but legislation is required for the annexation of the town and fort to the Jhánsí district, and for the assimilation of the law in force therein to that in force in the district. The provisions necessary to effect these objects are contained in sections 2 and 3 of the Bill; while section 4 makes it clear that the ceded territory will be part of the scheduled district known as the Jhánsí Division; and section 5, which is taken from the corresponding provision in the Upper Burma Laws Bill now before the Legislative Council, validates all acts done since the date of the cession and before the commencement of the Act. As negotiations are at present pending for the exchange of certain lands in the neighbourhood of Jhánsí, the provisions of sections 2, 3 and 4 of the Bill are made prospective, so as to cover the lands which may be ceded.

"The object of Part II is to give effect to certain decrees and orders of the Gwalior Courts which, by reason of cession of territory, have ceased to be enforceable in those Courts.

"The object of Part III is to afford relief to certain traders and others formerly carrying on business within the cantonment of Morar who had money-

claims enforceable in the local Courts at the time of the cession of the cantonment to the Mahárájá. As the British Courts in the cantonment have necessarily been abolished, these persons have now no means of recovering the amounts due to them at Morar, whilst to follow their debtors to the various places to which they have migrated, and proceed against them in the Civil Courts there, would, in many cases, put the creditors to greater expense than the amount of the debts due to them. It is proposed, therefore, by section 7 of the Bill that persons who may have been entitled to file suits of certain classes, or applications for the execution of decrees in suits of those classes, in a Morar Civil Court at the date of the cession of the cantonment, may file the suits and applications in the Civil Courts at Jhánsí or Agra, or at any other place appointed by the Governor General in Council in this behalf, and that the Courts having jurisdiction at those places shall dispose of the suits and applications. In order to save debts which might otherwise have become time-barred, the same section declares that in computing the period of limitation for the suits and applications, the time which has elapsed between the date of the cession of the cantonment and the commencement of the Act shall be excluded."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the *North-Western Provinces and Oudh Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 1st September, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

SIMLA;
The 2nd September, 1886.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Viceregal Lodge, Simla, on Wednesday, the 1st September, 1886.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of the Punjab, LL.D., K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, Bart., G.C.B., C.I.E., V.C.
The Hon'ble C. P. Ilbert, C.S.I., C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble Sir T. C. Hope, K.C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
Major-General the Hon'ble G. T. Chesney, R.E., C.S.I., C.I.E.
Colonel the Hon'ble W. G. Davies, C.S.I.

NATIVE PASSENGER SHIPS BILL.

The Hon'ble SIR A. COLVIN moved that the Bill to consolidate and amend the law relating to Native Passenger Ships be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, the Hon'ble Sir S. Bayley and the Mover.

The Motion was put and agreed to.

CIVIL PROCEDURE CODE AMENDMENT BILL.

The Hon'ble MR. ILBERT moved for leave to introduce a Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877. He said:—

"The object of this Bill is to make sundry minor amendments in the Code of Civil Procedure. It is not, and does not profess to be, based on any general or exhaustive revision of the Code; and I may take this opportunity of explaining why I have not considered it necessary or desirable to undertake any such revision during my term of office. The history of the successive editions of the Code is as follows. The original Code was passed in 1859. It was revised by Mr. Harington about the year 1865, but his labours did not produce any immediate legislative result. The work of revision was taken up again during Sir A. Hobhouse's tenure of office, was then carried out in a very complete manner, and resulted in the enactment of the Code of 1877. But notwithstanding the labour which had been devoted to the preparation of this edition, further amendments were soon found necessary, and in 1879 the Council passed an amending Act of more than 100 sections. In the early part of 1882 Mr. Whitley Stokes found himself in charge of another amending Bill. The amendments then proposed were few in number and trifling in importance, but at the very last stage of the Bill it was suddenly decided to take the opportunity of repealing the Acts of 1877 and 1879 and re-enacting them with the further amendments of 1882. I have often doubted the wisdom of this decision, and have thought that the convenience of the profession and the public might have been equally well consulted, and an illusory appearance of completeness and finality might have been avoided, if the Legislative Department had been merely authorized to issue a reprint of the 1877 Code and to incorporate in it the alterations made by subsequent amending Acts. However, the result was that in the year 1882 the Indian public was presented with brand-new editions of both the Procedure Codes. Suggestions have from time to time been made to me that the Civil Procedure Code is still very imperfect, and stands much in need of a further general revision; but, although I fully appreciate the importance of such periodical revisions, the Council will probably agree with me in thinking that a piece of work of this kind, if attempted, should be done thoroughly. And, after consulting privately several of my friends on the Bench and at the Bar, I came to the conclusion that the Code was on the whole working as well as the machinery at our disposal warranted us in expecting, and that, though there might be room for improvement here and there, I should not be justified in advising the Government to undertake so laborious a task as a general revision of the system. It has been remarked more than once in this Council that the whole legislative and administrative machinery of India had for a lengthened period been at work on the Bill which became law in 1877, and one should not with a light heart invite our overworked officials to a repetition of such a task.

"It has, however, now become necessary to make a few amendments in the Code for the purpose of supplementing or giving effect to measures actually pending before the Council, such as the Guardians and Wards Bill and the Debtors Bill; and I have taken the opportunity of proposing sundry other amendments to the need for which the attention of my Department has been from time to time directed, the expediency of which, as far as I can judge, is not likely to be seriously disputed, and the enactment of which makes no violent change in the existing system of procedure.

"In touching on the provisions of the Bill I will not adhere strictly to the numerical order of the sections, but will deal first with those proposals which arise out of pending legislation.

"In the first place, there is a group of sections connected more or less with the Bill to amend the law relating to imprisonment for debt.

"Of all the legislative measures which I shall be compelled to leave unfinished there is none that I shall leave with more regret than that Bill, and I sincerely hope that my learned successor will see his way to passing it into law at an early date after his accession to office. But it is proposed to give that Bill in the first instance a limited operation only, and there may be parts of the country where opinion is not yet ripe for its acceptance, but where no objection would

be raised to what may be considered to be a less serious alteration of the law. For instance, I pointed out as one of the most glaring defects of the existing law that it vests in the creditor and not in the Court the power of deciding whether a debtor shall be sent to prison or not. I presume that no one can seriously object to the Court being vested with discretion on the question whether the remedies available against the debtor's property should be exhausted before resort is had to the remedy against his person; and accordingly, I propose to qualify section 245 of the Code by authorising the Court to refuse execution against the debtor's person if it has reason to believe that the decree can be satisfied by execution against his property.

"Again, in my remarks on the same Bill I referred to the unsatisfactory way in which the Insolvency chapter of the Civil Procedure Code appeared to be working in the Mufassal. Having regard to the machinery by which any insolvency law must be worked in the country districts, I think we ought not to be too sanguine about the results to be expected from any mere amendment of the Code; but nevertheless it appears to me that there are one or two obvious defects in Chapter XX of the Code which might without much difficulty and with much advantage be removed.

"Under section 351 of the Code a debtor cannot be declared insolvent, and his property cannot be vested in a receiver, unless the Court is satisfied that the debtor has not committed any one of several specified acts of misconduct. Now the fact that a debtor has been guilty of misconduct is a very good reason for refusing to grant him a discharge from his liabilities, but a very bad reason for refusing to vest his property in a receiver. The object of vesting an insolvent debtor's property in a receiver is to ensure its speedy and equal distribution among his creditors. And such a provision is needed as much in the case of a reckless or fraudulent as of an innocent debtor.

"The truth is that the way in which this section of the Code is drawn is to be explained on historical grounds. There existed for many years in England two distinct systems of jurisprudence relating to the law of debtor and creditor. There was the bankruptcy law, which sought to take the debtor's property and release his person, and there was the insolvency law, which took the debtor's person but was unable to touch his property except with his own consent and concurrence. In England the insolvency law has been superseded by the bankruptcy law, which is generally admitted to be more in accordance with modern notions. But in India the law, as embodied in the insolvency law applicable to the Presidency-towns and in the Insolvency chapter of the Civil Procedure Code, is still based on the principle of the English Insolvency Acts, though it has been assimilated in some points of detail to the modern bankruptcy law. For instance, the amendment made, I think, in 1879, under which a debtor may apply to be declared insolvent when execution has issued against his property, although his person has not been seized, is quite in accordance with the principles of the bankruptcy law, but is inconsistent with the principles of the insolvency law, under which insolvency is regarded only as a means of escape from prison. Under the old insolvency law, where insolvency was a privilege of the debtor, it was quite intelligible that it should only be granted to the innocent debtor; but under the bankruptcy law, which looks rather to the interest of the creditor, such a restriction is unintelligible and indefensible.

"I propose therefore to assimilate still further the principles of the Insolvency chapter of the Code to those of the Indian Bankruptcy Bill and the modern English bankruptcy law by empowering the Court to vest the insolvent debtor's property in a receiver whether he has been guilty of misconduct or not, by postponing his discharge until a later stage of the proceedings, after the receiver has made his report under section 355, and by empowering the Court, at that stage, as it is empowered under the Bankruptcy Bill, to withhold the debtor's discharge on the ground of misconduct. The series of technical amendments intended to give effect to these proposals will be found in section 16 of the Bill.

"I propose also by another amendment (embodied in the same section) to extend the jurisdiction of certain subordinate Courts in matters of insolvency.

In order to show the petty character which these cases often assume I will read an extract from a note by a gentleman of long judicial experience in Bengal:—

'The form which an insolvency case usually takes in the Mufassal is as follows. *A* files an application for insolvency, exhibiting in the schedule three or four debts. His assets are usually stated to be some clothes, and perhaps a metal pot or two. One or more creditors oppose, alleging that the applicant has made away with some cows or metal vessels, or that he is entitled to a share of a house or holding which he has not included in the schedule. The evidence given is generally of the vaguest and most ordinary description. If the applicant is declared an insolvent, no creditor ever attempts to prove his debt, and the schedule is made up from admissions of the insolvent.'

"The Council will probably agree with the writer of this note that business of this description might properly be dealt with by Munsifs.

"There are one or two other sections dealing with the law of arrest, but the reasons for these are fully explained in the Statement of Objects and Reasons, and I need not say anything about them now.

"Then there is a section (section 26) making a series of amendments which are intended to supplement the Guardians and Wards Bill. It confers on a guardian, who has been appointed or whose title has been declared by a Civil Court, Court of Wards or other competent authority, a preferential right to be appointed next friend or guardian for a suit. It gives effect to a suggestion made by Sir C. Turner, late Chief Justice of Madras, that when a Court makes over property to a next friend or guardian for the suit who is not a duly constituted guardian of the minor's property, it should be required to give such directions as, having regard to the nature of the property, may sufficiently protect it from waste and secure its proper application. And it amends section 464 of the Code in such a way as to save all local laws relating to suits by or against minors or persons of unsound mind.

"And to complete the list of amendments relating to pending legislation, there is a sub-section (section 12 (*2*)) of which the object is to remove a technical difficulty in the way of some legislation proposed or pending in the Bombay Council with respect to the allowances known locally as *toda giras haks*—allowances with an interesting history, which I will leave the Member in charge of the Bombay Bill to explain.

"The remaining sections relate to points to which the attention of the Legislative Department has been at various times directed, and with respect to some of which we have promised to amend the law whenever a suitable opportunity occurred. About a few of them it was thought advisable to consult the High Courts before proposing an amendment of the law, and I have adopted such of the suggestions so referred as appeared to be supported by the weight of judicial authority.

"A good many of these amendments require no explanation, or none beyond that supplied by the Statement of Objects and Reasons, and I will only touch on the more important of them.

"There is a section (section 4) suggested by Mr. Justice Straight, which explains the meaning of the phrase 'cause of action' when applied to suits relating to contracts.

"There are two sections (sections 5 and 6) removing doubts which have been entertained as to the stages of a judicial proceeding at which the power of amendment may be exercised by a Court, and explaining the law in the direction of making that power more liberally exerciseable.

"It is desirable that the Courts should not be prevented by arbitrary rules from curing technical defects in the proceedings before them, and I have been assured by my friend Mr. Rattigan, now acting as Government Advocate for the Punjab, that the limitation of time imposed by the existing law for applications to remove the defect arising from a death of one of the parties in the course of a suit not unfrequently causes hardship and leads to the failure of justice, especially where the parties to the suit are ignorant agriculturists. At his suggestion I have inserted in the Bill some clauses (sections 17 and 37) intended to meet this point.

"There is a section (section 10) clearing up a doubt recently entertained in the Allahabad High Court as to the circumstances under which a set-off against a civil claim can be allowed. Speaking, as I am, to lay folk, I do not intend to discourse on the doctrine of set-off, which has been made the subject of many learned disquisitions. For the benefit of my legal brethren I will content myself with saying that I do not think section 111 of our Code was intended to be, or ought to be construed as, an exhaustive statement of the cases in which set-off may be allowed; that if Indian Courts could be trusted to decide judiciously and promptly what counter-claims can and what cannot be conveniently disposed of in a pending suit, I should be disposed to apply to them the same rules as have recently been adopted under the English Judicature Acts; but even in England these rules, though intended to produce finality, have often had the effect of protracting and complicating suits, and I fear that in India their working would be much more unsatisfactory. Therefore the only amendment which I propose is one of a very minor character, and its effect is to apply section 216 of the Code to all cases of set-off allowed under the existing law, whether they can be brought within section 111 or not.

"There is a leading case, called Semayne's case, well known to English lawyers, and usually treated as the authority for the *dictum* that an Englishman's house is his castle. I suppose it was in consequence of the rules laid down in, or believed to be deducible from, this case that section 271 of the Code provides that 'no person executing any process under this Code directing or authorizing seizure of moveable property shall . . . . . break open any outer door of a dwelling-house.' I should be the last person to advocate any undue interference with domestic privacy, but at the same time I am not in favour of allowing any debtor, English or Indian, to employ the sanctity of his house-door as a means for avoiding or delaying payment of his just debts; and therefore I propose (by section 13) that the Courts should be empowered, under special circumstances, to make an order authorizing the breaking open of an outer door. I hope the Courts may be trusted to exercise this discretion in such a way as may minimize the risk of a breach of the peace. Of course the proviso as to entry into zanánas will be retained.

"I also propose to amend a section (section 320) which was the subject of much discussion in 1877 and 1879—the section under which the execution of decrees relating to immoveable property may be transferred to the Collector. Under the existing law there is no appeal provided from the Collector's orders in such cases. It is true that the Government of the North-Western Provinces has issued executive orders on the subject, but the validity of such rules may possibly be called in question, and I think it better to declare distinctly that rules may be made providing for an appeal and regulating its course and conditions. I think also that, if the Collector is to act effectively under these sections, it should be made clear that he is something more than a mere instrument of the Civil Courts.

"I have adopted a suggestion made to me by a gentleman at the Bombay Bar that we should follow the recent English law by giving the Courts power to decree sale in lieu of partition in certain cases. It may obviously be inconvenient and difficult to divide a family house.

"There have been some difficulties about the working of the sections relating to suits by and against Native Princes and Chiefs. I propose, for their convenience, to make it clear that a fresh appointment of a person to prosecute or defend on their behalf need not be made in each case. I propose also to define more precisely by whom consent to the institution of a suit against a ruling Prince may be given, and to make the provisions of the law more elastic with respect to the mode of giving the consent, the cases in which the consent may be given, and the Courts to which the consent may apply. A reported case shows that doubts have been entertained as to the name by which a ruling Prince should sue or be sued, and I have been told that it is considered derogatory to the dignity of a ruling Prince or Chief that his personal name should be called out in open Court. There is no reason why deference should not be paid to sentiment and etiquette when they do not interfere with the substantial interests of justice,

and therefore I propose that a ruling Prince or Chief may sue or be sued in the name of his State.

"It will be seen, on looking at the Bill, that, in order to make room for one of the new sections relating to suits by and against Native Chiefs, I have ousted section 434 of the Code from its present place and have given it a new place and a new number in the final chapter of the Code, where a convenient gap has been made by a recent repeal. I propose to do this, not for a mere draftsman's whim, but because the section now numbered 434, which relates to the execution in British India of decrees of Native States, is out of place in a chapter headed 'Suits by Aliens and by or against Foreign and Native Rulers'; and I cannot help suspecting that in consequence of its inappropriate position it may possibly have been overlooked by the Bench of Judges who decided a case reported in a recent number of the Calcutta Law Reports. If I am wrong in supposing this, the learned Judges will, I hope, forgive me; but at all events no harm can be done by removing the section from a chapter where one would not naturally think of looking for it.

"There has been much doubt as to what class of persons are entitled to take proceedings under section 539 as having a *direct* interest in a public charitable or religious trust. The class is one which it is impossible to define with accuracy, but, after perusal of the cases and consultation with the High Courts, I have come to the conclusion that the introduction of the adjective 'direct' into the section was unnecessary and has led to misconception, and therefore I propose to remove it.

"The remaining sections of the Bill are either unimportant or of a very technical character, and therefore I will not take up the time of the Council by dwelling on their provisions, but will at once ask them to take into consideration the motion which stands in my name."

The Hon'ble SIR THEODORE HOPE said:—

"The subject upon which our hon'ble colleague the Law Member has just favoured us with so complete and interesting an exposition is one of extreme importance; and, having been a member—I may say a very active working member—of the Select Committees on the Civil Procedure Code Amendment Bills in 1877 and 1879, I wish to express, in the first place, my conviction—a conviction then felt by all those engaged in that work—that revisions of the Civil Procedure Code should only take place at very rare intervals. This opinion, I think I am right in saying, was shared at that time by the law authorities at home, and had in fact mainly contributed to the postponement of legislation on the preceding occasion in 1867, when it had been proposed by Mr. Harington. This reluctance to revise the Code is based on two grounds. One is the immense inconvenience which is caused to the Courts, the Bar and the public in general by the complete subversion of a long and elaborate enactment with which they have become familiar, and the destruction of translations, text-books and handy manuals which have been prepared to make it intelligible to ordinary people. The other and very important ground for this reluctance to change is the great time which is necessary for the elaboration of a new Code of the description in question. I say 'a new Code,' because, although in many instances only the old sections are substantially reproduced, as a matter of fact it is generally found that there are very few of them which do not either change their place, scope, substance or wording in some manner or other. Of the long time necessary there can be no better illustration than what took place in 1877, 1879 and 1882. I think I am not far wrong in saying that the Bill of 1877 would not have become law then but for the approaching departure from India of Sir Arthur Hobhouse, who was, very naturally, anxious—and the Government were also anxious—to complete the work to which he had given his attention during nearly the whole period of his Law Membership. Still, notwithstanding that, it was found by experience that it would have been a great deal better if we had had at least another year to work on the Bill; and in 1879, consequently, we were obliged to pass another Bill with an immense number of amendments. Still, the enactment having reached that stage, I think it was very much to be regretted that in 1882 a further complete alteration should

have been made by re-enacting all the sections which were already law, along with certain minor changes. However, what we now have is not the law of 1877 or 1879, but the law of 1882, and I think it would be very much to be deprecated that any change should be made now of fundamental importance except after the lapse of a very considerable period—a period which I think the Law Commission on one occasion declared should be at least ten years. Meanwhile, however, there can be, according to my humlbe judgment, no objection to such minor amending Bills as that which, so far as I understand its nature, our Hon'ble Law Member has brought forward on the present occasion, provided great care be taken not to make any change whatever which is not really unavoidable.

"I trust, too, that more than this may not be attempted even in the time of our hon'ble colleague's successor, unless indeed under one eventuality, and one only; and that is, if a decision should fortunately be arrived at for making very fundamental changes in our civil procedure so as to diminish the immense amount of routine which now invests—and I may say *infests*—all cases relating to petty amounts. If our procedure could be vastly simplified, in a way which has before now been indicated in this Council, and if some other changes, such as those which our hon'ble colleague lately alluded to as having proved advantageous in the case of the local legislation affecting the Dekkhan agricultural districts, could be introduced, then, and then alone, I think that a revision of this Code on a large scale might be justifiable at an earlier date than, say, 1892."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

GENERAL CLAUSES BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill for further shortening the language used in Acts of the Governor General in Council, and for other purposes. He said:—

"I propose to make some additions to a very useful Act which was passed in 1868, and which is known as the General Clauses Act. The object of that Act is to make the language of enactments of this Council shorter and more uniform, and to avoid vain repetitions, by generalizing certain definitions and rules of frequent occurrence, and by declaring, once for all, that these definitions and rules shall apply to future Acts unless a contrary intention appears.

"The additions which I propose to make are based on my personal experience during the last few years. I have had a list prepared of the special definitions inserted in Acts of this Council, and I find on examination of this list that there are some dozen or so of these definitions which might with advantage be generalized and added to the list contained in the Act of 1868.

"I also propose to generalize certain provisions which have so frequently recurred in recent Acts as to have become what conveyancers call 'common form.' Among these provisions I will mention two, which have some bearing on the machinery and practice of legislation in this country.

"It is not as a rule desirable that an Act of this Council should be brought into operation immediately on its passing. An interval should be allowed for the publication of the Act both in English and in the vernaculars of the country, for its distribution, and, when it is of a complex character, for its study by the officers who will have to administer it and by the persons whom it will principally affect. In most cases also time must be given for making the administrative arrangements necessary for giving full effect to the Act.

"It has therefore been my practice to insert in every Bill, except where the proposed enactment is of great simplicity or of special urgency, a clause

postponing the operation of the measure either until some future date specified in the Act or until a future date to be fixed by executive authority. But when an interval of this kind is provided it is often necessary to give some legal authority for the preliminary arrangements which have to be made, such as the appointment of officers and the making of rules. Accordingly it has become the practice to insert a clause providing that all necessary appointments, rules and so forth may be made during the interval between the passing of the Act and its coming into operation, but that they shall not take effect until the latter date. It will be remembered that some temporary inconvenience was caused by the accidental omission of such a clause from the Bengal Tenancy Act. I propose to generalize this clause, so as to obviate the necessity for its special enactment hereafter.

"I have referred to the rules which are generally required for the purpose of giving full effect to Acts of the legislature, and we all know that most Indian Acts confer an extensive power to make such rules. I have observed, in the course of my experience as chairman of Select Committees, that the clauses giving this power are usually scrutinized with some jealousy by unofficial, and especially by Native, members of this Council, and I have much sympathy with their feelings on the subject. The obligation which a member in charge of a Bill is under of publicly explaining and defending the provisions which he proposes is a very wholesome check on hasty and ill-judged legislation; and it would not be constitutional that this check should be evaded by a wholesale delegation of legislative or quasi-legislative power to subordinate authorities. At the same time every one who has any familiarity with the work of this Council will admit that the delegation of power to make rules on subordinate matters is essential to good legislation. The proper function of this legislature is to determine the broad lines on which the law is to be administered: if it descends into and attempts to prescribe minute details of administration, it undertakes work which it is not fitted to perform and which it will perform badly. It is usually for the Legal Member, as the person responsible for the drafting of Acts, to suggest, and it is for the Council to determine, where the lines can be most fitly drawn between matters which should be settled by the legislature, matters which should be prescribed by rule, and matters which must be left to executive orders or to the discretion of individual officers.

"Whilst insisting, however, on the necessity for giving this rule-making power, I am fully impressed with the expediency of subjecting the rules made under it to the same kind of preliminary criticism as is applied to Acts of the legislature. I had an opportunity now nearly four years ago of expressing my sense of the great importance of inviting and facilitating criticisms and suggestions both from official and from non-official persons and bodies with respect to measures pending before the Legislative Council, and of explaining the measures which the Government of India had adopted and proposed with this view. I have nothing material to add to the remarks which I then made, and my subsequent experience certainly does not induce me to qualify them. On that occasion I directed attention to the quantity and importance of the subordinate legislation which is effected under delegated powers, and I said that, with a view of applying, as far as practicable, the same principles as had been applied to direct enactments of the legislature, the Government of India had recommended that any rule, regulation or notification which affected the outside public, whether made under executive authority or under the authority of an Act, should, before being issued by the Local Government or Administration, and, where sanction was required, before being submitted for the sanction of the Governor General in Council, be published as a draft, with the view of ascertaining whether any valid objection could be taken to it. Extensive effect has since been given to this recommendation, and the Council will have observed that, when any recent Act authorizes the making of rules, it almost always requires drafts of the rules to be previously published in the manner which I have indicated. In fact, a provision to this effect has become a common form, and I propose now to stereotype it by inserting it in the Bill which I am asking leave to introduce.

"The provisions to which I have referred are, I think, the only provisions of general interest which the Bill contains. The remainder of the Bill consists of what may be fairly described as draftsman's clauses."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

GLANDERS AND FARCY ACT, 1879, EXTENSION BILL.

The Hon'ble MR. ILBERT also moved for leave to introduce a Bill to extend the Glanders and Farcy Act, 1879, to the Bombay Presidency. He said:—"This is an enactment which was passed in 1879, and which only extends to those parts of India which have no legislatures of their own. The Bengal and Madras legislatures have passed separate Acts on the same subject, but the Bombay Government now ask us to extend the Indian Act to Bombay, preferring this course to that of legislating for themselves. Accordingly, we propose to remove from the existing Act the words excluding its application to the Bombay Presidency."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also introduced the Bill.

The Hon'ble MR. ILBERT also moved that the Bill and Statement of Objects and Reasons be published in the *Gazette of India* in English and in the *Bombay Government Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 8th September, 1886.

S. HARVEY JAMES,
Offg. Secretary to the Govt. of India,
Legislative Department.

SIMLA;
The 3rd September, 1886.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 1st SEPTEMBER, 1886.

GENERAL REMARKS.—Rain has again been general during the week, though the quantities reported to have fallen in the Madras and Bombay Presidencies are as a rule small. Heavier falls have occurred in Bengal and the North-Western Provinces and Oudh. No report has been received from British Burma.

In Bombay, Madras, Mysore, and Coorg agricultural prospects continue good. In the North-Western Provinces and Oudh the recent rainfall has been very beneficial, and the crops promise well. Prospects in the Punjab are satisfactory, though more rain is wanted in some districts.

Prospects are favourable in most parts of the Central Provinces, though rain is very urgently needed in the Raipur, Bilaspur, and Sambalpur districts. In some tracts the rain which fell during the week under report is believed to have been beneficial.

In Berar, Central India, and Rajputana the crops are doing well.

Except in parts of Behar and East Bengal, where much injury has been caused by excessive rain, agricultural prospects are favourable in the Lower Provinces. Transplanting is nearly finished, and the early rice and jute harvests are in progress.

In the Sylhet and Cachar districts of Assam the crops have suffered greatly from floods, and some injury has also been done in the Lakhimpur district.

The public health is on the whole satisfactory, though fever is reported from most Provinces.

Prices are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Sept 1st)		
Bellary	Average ·15	Standing crops generally good, but dry crops withering in parts of two taluks and castor oil plants affected by insects in one village; harvest second crop paddy, yield average. Fever in one and cattle-disease in three taluks.
Kurnool	Average last week since revised, 1·47; this week, ·23.	Standing crops fair. Small-pox and cattle-disease in one taluk.
Ganjam	Average last week since revised, 4·90; this week, ·86.	Slight small-pox in three and fever in four divisions. Slight cattle-disease in one taluk; some cholera.
Kistna	Average last week since revised, 6·98; this week, ·09.	Standing crops damaged by late rain, especially in Deltaic taluks. River 7·6 feet water over anicut. Slight fever; cattle-disease in one taluk.
Chingleput (Madras)	Average 1·44	Standing crops fair; harvest dry crops, outturn below average. Fever in one, small-pox in two, and cattle-disease in four taluks.
Coimbatore	Average ·03	Standing crops generally good; harvest dry grains, outturn generally above average. Fever and small-pox in one taluk.
Tanjore	Average 1·21	Standing crops generally good; harvest dry grains, outturn below average.
Madura	Average last week since revised, ·05; this week, ·27.	Health of people and cattle generally good.
Malabar	Average ·55	Standing first crop paddy ripening. Fever in one and slight small-pox in six talukas; cholera and cattle-disease in one taluk.
Travancore	·11	Harvest paddy. Slight small-pox; fever in parts. *General Remarks.*—General prospects good.
Bombay—(Sept. 1st)		
Kurrachee	Jati, ·70; average of seven other stations, ·30.	Weather cloudy. River at Kotri on 30th ultimo, 18 feet 6 inches against 19 feet 11 inches on same date last year. Fever and cattle-disease in two talukas. Wheat, red rice and *bajri* in Kurrachee 26, 30 and 34, in Tatta 24, 40 and 40, in Shahbandar 20, 42 and 42, and in Manjhand 26, 38 and 38 pounds per rupee, respectively.
Hyderabad	Rain in nine talukas, average ·53.	*Kharif* cultivation good; crops injured by floods in Tando Bago taluka. River at Kotri on 30th ultimo, 18 feet 6 inches against 19 feet 11 inches on same date last year. Fever in five, small-pox in one, and cattle-disease in two talukas. Wheat 25⅛, *bajri* 38, *juari* 40, white rice 18, and red rice 28 pounds per rupee.
Ahmedabad	·63; total 32·53; rain throughout the district.	Sowing operations still in progress in some talukas; standing crops promising. Public health good. Wheat 34 and *bajri* 32 pounds per rupee.
Baroda	·76; total 33·94	Cattle-disease in Kherala, Visnagar, and Mehsana talukas. Standing crops continue in good condition. *Bajri* 32, wheat 23, and rice 21 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	Rain in six talukas	Standing crops healthy. Small-pox affecting cattle in Mandvi taluka; fever in Bardoli and Jalalpur talukas. *Juari* 38 and *bajri* 44 pounds per rupee.
Nasik	At Igatpuri, 5·89; Peint, 5·70; maximum at Sinnar, 1·25 and minimum at Malegaon, ·12.	Standing crops in good condition; transplantation completed in *dangi* villages. Public health good. Wheat 30¾, *bajri* 33, and rice 20½ pounds per rupee.
Colaba (Bombay)	Rain every day; total of week, 1·21; total to date 90·90, being 32·41 above average.	Abnormal temperature 1° warm from 25th to 29th, afterwards fell to 2° cool on 31st ultimo; vapour in air normal; wind normal.
Poona	Maval, 3·37; Haveli, 2·56; light showers elsewhere; maximum ·87 and minimum ·05 at Khed and Indapur.	Standing crops in good condition. More rain wanted in Khed, Sirur, Purandhar, and in parts of Bhimthadi and Haveli talukas. Public health generally good; slight cattle-disease in Haveli taluka. *Bajri* 37 and *juari* 52 pounds in the district and *bajri* 32 and *juari* 48 pounds per rupee in Poona city.
Ahmednagar	In Nagar, ·71; Sheogaon, ·61; Sangamner, ·31 and in Jamkhed, ·28; very slight in four and none in three talukas.	Crops and public health good. *Bajri*—maximum 60 and minimum 38 and *juari*—maximum 96 and minimum 48 pounds per rupee.
Sholapur	In Sholapur, ·42; Barsi, ·27 and in Karmala, ·06.	*Kharif* crops promising in all talukas. *Juari* 62⅛ and *bajri* 43⅛ pounds per rupee.
Dharwar	Slight rain varying from ·79 in Kalghatgi to ·07 in Nargund.	Heavy showers urgently required generally for rice and *juari* crops, which are suffering from drought in parts of Bankapur, Ranibennur, and Kod talukas. Cotton sowing in progress. Rice 23 and *juari* 50 pounds per rupee.
Kanara	In Karwar, 4·70; total 127·86; 40·03 more than last year; Kumpta, 2·99; Sirsi, 2·50; and Haliyal, ·91.	Rice, sugarcane, and cardamom crops thriving. Public health generally good; cattle-disease in Karwar, Akola, and Sirsi, decreasing in Kumpta. Common rice at Karwar 14, district average 12⅓ seers per rupee.
Rajkot	0·3; total 34·43	General health fair. Weeding in progess; cotton still being sown in some places. Wheat 36, *bajri* 32, and *juari* 45 pounds per rupee. *General Remarks.*—Fair rain in almost all districts, more urgently wanted in parts of Dharwar and Poona. River falling in Sind. Scarcity of water in one taluka of Upper Sind frontier. The condition of standing crops generally good everywhere. Slight damage done to crops by floods in parts of Hyderabad and by insects in parts of Ratnagiri. Fever in parts of eight, small-pox in parts of three, and cattle-disease in parts of eleven districts.
Bengal—(Sept. 1st)		
Chittagong	10·07	Weather seasonable. Prospects of crops somewhat damaged by excessive rain and insects. Prices steady. Public health good.
Dacca	7·55	Paddy crops damaged here and there by floods. Water subsiding. Public health good.
24-Pergunnahs (Calcutta).	3·44	Prospects of crops satisfactory; harvesting of early rice and jute proceeding; transplanting of *amun* still going on; sugar-cane doing well. Public health generally good.
Moorshedabad	2·84	Weather hot. Health and agricultural prospects excellent. *Aus* nearly cut. Prices falling rapidly.
Rungpore	1·18	Harvesting of *aus* nearly finished, outturn good; jute being cut and steeped; transplanting of *amun* still going on. Fever moderately prevalent.
Burdwan	2·60	Prospects of crops good. Public health generally good.
Bhagalpur	2·20	Timely rain has fallen. Transplanting of rice can now be finished; *bhadoi* harvest progressing. Early rice and Indian corn good.
Purneah	4·94	Crops excellent, except in a limited area, which has suffered from excessive rain. *Bhadoi* being harvested in some places. Public health fair. Rivers high but falling.
Patna	9·63	Transplanting of rice still going on in some places; *bhadoi* in lowlands damaged by excessive rain. Cholera still reported from Behar, Islampore, and Chandi police stations; otherwise public health good.
Durbhunga	9·55	Retransplanting of paddy being carried on where possible, but its progress is much retarded by excessive rain, which fell this week. Prices stationary. Public health generally good.
Hazaribagh	2·79	Weather seasonable. Good rain all over the district. Transplanting in progress; crops doing well. General health good.
Cuttack	1·65	Weather hot and cloudy. Early rice ripening; late rice doing well. Price of rice unchanged. Public health generally good.
Midnapore	.....	No report received.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Khoolna . .	3·56	Weather cloudy. *Aus* ripening; transplanting of *amun* continues; prospects good. A little fever at Satkhira; public health good.
Dinagepore . .	3·32; rain all over the district.	Weather seasonable. *Aus* and jute being harvested, with fair yield; state of *amun* and sugarcane good. Price of rice falling. Cattle-disease in four thanas.
Pubna (Serajgunge) .	4·41; heavy showers.	Rivers falling. Crops doing well.
Gya . .	8·02	Crop prospects good. Prices unchanged. Public health fair.
Chumparun . .	3·89	*Bhadoi* and paddy crops in good condition, except where damage done by floods. River rising again. Prices stationary. Public health fair.
		General Remarks.—Rain fell all over the Provinces during the week; it was very heavy in several parts. General agricultural prospects are favourable, except in parts of Behar and East Bengal, where much damage has been caused to crops by excessive rain and floods; transplanting operations are being rapidly finished; harvesting of early rice and jute going on with fair results. General health continues satisfactory, although fever exists in certain districts.
N.-W. Provinces and Oudh —(Sept. 1st)		
Benares (Aug. 30th)	4·60	Prospects good. Supplies ample. Prices stationary. Cholera in one tahsil, otherwise public health good; cattle-disease reported.
Ballia („ „)	Averaging 3·0	Prospects of *kharif* crops slightly injured by excessive rain. Supplies plentiful. Health good.
Gorakhpore („ „)	1·60	Weather cloudy. Crops in good condition. Prices stationary. Health fair.
Fyzabad („ 31st)	*Nil*	Prospects of *kharif* good; *moth* and *urd* being sown. Prices steady. Fever prevalent.
Lucknow („ 30th)	Good and seasonable rain; average fall 4·0.	Prospects very good; sowing of *mash* continues. Markets well supplied and prices stationary. Health good; condition of cattle fair.
Rae Bareli („ „)	Good fall of rain all over the district; at Sadr, 5·70.	Prospects of crops good. Prices steady. General health fair.
Partabgarh („ 31st)	Good rain has fallen during week.	The rain is beneficial to rice. Prospects of all crops good. Prices stationary. Health of people and condition of cattle good.
Allahabad („ „)	Average 5·10	Weather cloudy. Crops much improved by late rain. Prices stationary. Slight fever reported and sporadic cholera in one tahsil; no cattle-disease.
Cawnpore („ „)	3·10 to 9·10	Crops much benefited by rain and flourishing. Prices stationary. Sporadic cholera at head-quarters; slight cattle-disease in three parganas.
Farakhabad („ „)	Averaging 6·20	Prospects good and supplies plentiful. Cholera continues in Farakhabad; cattle-disease in one tahsil.
Sitapur („ „)	Averaging 3·50	Safety of the early *kharif* is assured. No sickness reported.
Bareilly („ „)	Heavy rain in Faridpur tahsil, moderate elsewhere.	Crops promise well. Cholera prevalent in a part of the district, a few cases reported in Bareilly city.
Banda („ 30th)	Good and general rain.	The rain has greatly benefited the crops. Prices steady. Unusual autumnal fever continues; cattle-disease in three villages.
Kumaon („ 31st)	Good rain	Rain sufficient for standing crops, which promise well. Prices falling. General health fair; fever in some places; cattle-disease continues.
Agra („ 30th)	Heavy rain from 2·50 to 7·90.	Prospects good. Prices steady. General health good; cholera reported from one village.
Jhansi („ „)	Rainfall excessive	Weeding operations hindered by excessive rain in two parganas. Prices steady. Public health and condition of cattle generally good; two cases of cholera reported from cantonments, one fatal.
Meerut („ 31st)	From 1·80 to 6·60	All crops flourishing. Prices steady. Slight fever reported.
		General Remarks.—Abundant rain has fallen during the week, greatly benefiting the crops. Prospects are reported good throughout. Supplies ample and prices generally steady. Cases of fever and cholera in some places; otherwise public health fair.
Punjab—(Sept. 1st)		
Hissar . .	.....	No report received.
Delhi . .	3·77	Health fair. Prices fluctuating. Prospects much improved.
Umballa . .	3·65	Health fair. Prices fluctuating. Prospects flourishing.
Jullundur . .	·40	Health good. Prices stationary. Prospects good.
Ferozepore . .	1·40	Health good. Prices stationary. Prospects good.
Amritsar . .	At Moga, ·50; Zira, ·50.	Health good. Prices stationary.
Sialkot . .	1·0	Health good. Prices stationary. Prospects flourishing.
Lahore . .	.....	Health good. Prices almost stationary. Prospects good.
Mooltan . .	.....	Health good. Prices stationary. Prospects good.
Rawalpindi . .	1·25	Health good. Prices stationary. Prospects average.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Shahpur . .	Slight rain throughout the district.	Health good. Prices rising. Prospects fair.
Dera Ismail Khan .	.....	Health good. Prices stationary.
Peshawar . .	.....	Health good. Prices almost stationary. Prospects good on irrigated lands.
		General Remarks.—Rain has fallen in all districts, except Lahore, Mooltan, Dera Ismail Khan, and Peshawar, more wanted in the Mooltan, Shahpur, and Peshawar districts. General health good. Prices rising in the Shahpur district; fluctuating in the Delhi district; elsewhere stationary.
Central Provinces— (Sept. 1st)		
Nagpur . .	·11	Weather cloudy. Rice wants rain; other crops good. Small-pox in Nagpur. Prices steady.
Jubbulpore . .	·58	Crops thriving. Health fair. Prices steady.
Saugor (Aug. 31st)	1·90	Good rain. Weeding and ploughing progressing. Fever and bowel complaints prevalent. Prices stationary.
Seoni . . .	·72	Weather cloudy and warm. Transplantation of rice retarded; weeding and ploughing in progress. Health good. Prices rising.
Bilaspur . .	2·10	More rain wanted. Prospects in tahsils Mungeeli and Seorinarain somewhat favourable; in Bilaspur half crop injured. Cholera and fever in places.
Hoshangabad . .	2·52	General health good. Prices unchanged.
Khandwa . .	1·36	Weather showery. Prospects favourable. 139 cases of cholera, 60 deaths. Prices unchanged.
Raipur . . .	·46	Weather close, with alternate cloud and sunshine. Prospects becoming worse daily. Rain urgently needed. Rice on highlands in Raipur and Sunga tahsils destroyed and on lowlands precarious; prospects in Drug slightly better, in Dhamtari fair. Cholera decreasing; cattle-disease in places. Prices stationary.
Sambalpur (Aug. 28th)	5·47	Rain very beneficial, but more wanted. Rice on highland in tahsil Bargarh much injured. Cholera and cattle-disease in places. Prices rising.
		General Remarks.—Prospects favourable, except in the rice tracts of the southern and eastern districts in Seoni, Nagpur, Bhandara and Balaghat; the rice crops have suffered from lack of rain at transplantation time, but prospects have been much improved by some good falls of rain, which have occurred within the two last days, and which though of a local character have, it is believed, greatly benefited the crops over a large area. No good fall has occurred during the week in the Raipur district, and the rice and *kodon* crops are there in a precarious state; those sown on high grounds having perished on a considerable portion of the district. Rain is urgently wanted in Bilaspur and Sambalpur; there have been good falls and the outlook has improved, but in parts of Bilaspur the rice crops cannot but be a poor one.
Assam—(Sept. 1st)		
Gauhati . .	3·65 during week ending 31st ultimo.	Weather hot. General health tolerably good; cattle-disease reported from some mouzahs. Planting of *sali* in progress.
Sylhet . .	5·13	*Aus* crops in Sunamganj nearly lost; damage done to *aman* is estimated at 5 to 8 annas; great distress said to prevail in parts of Karimganj, where crops are almost entirely ruined. A severe attack of cholera reported from Karimganj; prospects far from favourable.
Cachar . .	4·30	Weather warm. River again rising. Transplanting of *sali* crops progressing slowly. Common rice 12½ seers per rupee. Prospects of tea not satisfactory. Blight is increasing; general health good; cattle-disease on the decrease.
Dibrugarh . .	3·67	Weather seasonable. Harvesting of *ahu* and transplanting of *sali* progressing; damage reported to *ahu* crops and *sali* seedlings by floods in North Lakhimpur and Sadr subdivision. Public health good; cattle-disease still continues.
Mysore and Coorg— (Sept. 1st)		
Bangalore . .	Rainfall general	Standing crops in good condition. Paddy being harvested in parts; prospects of season favourable. Public health good. No material change in prices, except in Hassan district, where they have fallen slightly.
Mysore . .		
Mercara . .	2·47	Prospects good. Prices fallen slightly.
Berar and Hyderabad— (Sept. 1st)		
Amraoti . .	·55	Weather cloudy and close. Crops in flourishing condition. Wheat 22 and *juari* 26 seers per rupee.
Akola . . .	·11	Weather cloudy and close. Crops promise well; weeding continues.
Hyderabad . .	Average rainfall during week, ·38; total since 1st January, 31·41.	Rainfall of week slightly damaged some *kharif* crops and opened breaches in a few tanks. General health of talukas fair. Prices—wheat 15, coarse rice 11¾, white *juari* 11, yellow *juari* 22, and *tur* 15 seers per current sicca rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(Sept. 1st)		
Indore	·89; total rainfall 29·69.	Weather cool, cloudy, and showery.
Morar (Gwalior)	4·29; total rainfall 24·14.	Health and prospects good. Weather cloudy.
Neemuch	·23; total rainfall 20·49.	Weather cloudy. Crops thriving. Health good.
Goona	3·08	Health and prospects good.
Sutna	1·35	*Kharif* prospects and health good. Prices stationary.
Agar	·40	Health and prospects good.
Sehore	·82	Weather seasonable. Health good. Crops thriving.
Nowgong	4·44; total rainfall 29·34.	*Kharif* prospects excellent. Health good. Prices steady.
Rajputana—(Sept. 1st)		
Abu (Sept. 1st)	1·07	Weather cloudy, close, and sultry, but seasonable.
Sirohi (Aug. 29th)	·17	Tanks full; wells good. Health good. Crops good. Weather cloudy and fairly cool.
Marwar („ 28th)	·45	Tanks all full. Some fever prevails. Crops excellent. Weather cloudy; winds getting cooler. Prices falling.
Pertabgarh („ „)	·46	Tanks and wells full. Crops and health good. Prices falling. Weather occasionally cloudy.
Meywar („ „)	·14	Tanks and wells full. Crops good. Health fair; dysentery and diarrhœa prevalent. Prices falling. Weather cloudy.
Harowti („ „)	Deoli, ·84; Tonk, 1·08; previous week—Deoli, 2·54; Shapura, 3·84.	Weather rainy. Health good.
Ajmere („ 31st)	3·60	Crops improving. More rain wanted. Health good.
Kerowle („ 28th)	1·07	Tank and wells filling. Prospects good. Fever continues; health good. Prices steady.
Dholepore („ 25th)	·41	Tanks and wells filling. Crops good. Health good. Prices stationary. Weather seasonable.
Ulwur („ 31st)	1·47	Crops good. Slight fever; health good. Prices steady.
Bickanir („ 28th)	·69	Good rain in districts. Prospects good. Fever in Bickanir and four districts. Prices low. Weather hot.
Nepal—(Aug. 26th)		
Katmandu (Aug. 27th)	4·33	Almost continuous rain for nearly a month is proving bad both for men and crops; sunlight and warmth are needed.

C. J. LYALL,
Officiating Secretary to the Government of India.
