SUPPLEMENT TO

The Gazette of India.

No. 1}. CALCUTTA, SATURDAY, JANUARY 1, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees, if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1885-86.

No. 248T., dated Fort William, December 27, 1886.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Officiating Director General of Telegraphs, No. 503 T., dated 6th December 1886. and its enclosure, the Administration Report of the Indian Telegraph Department for the year 1885-86.

RESOLUTION.—The results of the year's working of the Department are even more satisfactory than those of the previous year. There has been again a large expansion of business, both as regards extension of the area of its operations, and increase in traffic and revenue. The length of lines was increased by 2,123 miles of new lines to a total of 27,510 miles. The length of wires was increased by 6,507 miles to a total of 81,480 miles; and there was also an increase of 176 in the number of Offices open to the public. While, on the other hand, the number of messages sent from Departmental Offices only was 2,289,938, showing an increase of 271,841, or more than 13 per cent. over the number for the previous year; and the message revenue also increased by R4,63,025.

2. Since the year 1883-84 the length of lines has been increased by 17·9 per cent., the number of Offices by 27·7 per cent., and the revenue from messages only (excluding those sent from other than Departmental Offices) has risen by 23 per cent., whilst the working expenses are less by 3·4 per cent. than they were in 1883-84.

3. The working of the traffic also has again improved; a very considerable advance has been made in raising the (already high) standard of efficiency, as regards both speed and accuracy of transmission.

4. The development of the policy of opening out Offices worked by extra Departmental Agency in connection with the Post Office; and the success which has attended the introduction (four years ago) of the system of deferred

messages, have largely contributed to the effective working of the Department. Of the total number of Departmental Offices now open more than two-thirds are worked by extra Departmental Agency; and of the total traffic no less than 63·15 per cent. is carried on the deferred system, to the great relief of the Offices and lines.

5. It has thus been found possible to vastly increase the business of the Department and the facilities it affords to the public, with a comparatively very small increase of charges, and at the same time to carry out, with the ordinary staff, the extensive special works which military and political requirements have from time to time rendered necessary. The rapidity and efficiency with which these special demands have in all cases been met, reflect the highest credit on the Officers concerned, and on the administration of the Department.

6. The progress that has been made in the development of the Department since the introduction of the reforms noted above, has been very marked. In 1881-82, neither of them were in operation, and since then the number of Departmental Offices has been nearly doubled; the gross revenue has risen from ₹38,54,212 in 1881-82 to ₹51,10,986 in 1885-86; the charges against Revenue Account have increased from ₹32,35,644 to ₹36,18,695 only, and the net revenue from ₹6,18,568 to ₹14,92,291.

7. The Capital expenditure at the close of the year under review amounted to ₹3,83,16,760, of which ₹29,36,842 was expended during the year. The net revenue, ₹14,92,291, represents a return of 4·05 per cent. on the total Capital outlay to the commencement of the year *plus* half the Capital outlay during the year.

8. At the International Telegraph Conference held at Berlin during the year, the tariff between India and the United Kingdom was reduced from 5·60 francs to 5 francs per word or, as levied in the United Kingdom, from 4*s.* 7*d.* to 4*s.* per word; but owing to the heavy fall in the value of silver no reduction was found to be possible in the rates as levied in this country,—the rate actually levied was not sufficient to yield the proper share of this country in the total receipts after payment of the shares due to other Administrations in gold.

9. The special works undertaken during the year were of unusual extent, and in some cases of a very harassing character; the damage from floods and storms in various parts of the country was also exceptionally heavy, but in all cases the emergencies were met with promptitude and efficiency.

10. The work done by the Department in connection with the occupation of Upper Burma was remarkable as well as hazardous. Under exceptionally difficult circumstances, and at great personal risk, 244 miles of line, from Laingha to Mandalay, were renewed, and new lines, aggregating 159 miles, were constructed; fourteen Offices were opened, and communications were maintained with a regularity that was most creditable. The Governor General in Council has already publicly notified his appreciation of the results, and expressed his cordial thanks to the Officers to whose exertions they were due.

11. The Governor General in Council has read the report with great satisfaction, and again tenders his thanks to Mr. Cappel for his very able management of this important Department, and to the Department generally for their excellent work during the year.

ORDER.—Ordered, that a copy of this Resolution, and of the Report, be forwarded to the Secretary of State, and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon and the Commissioner in Sind.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Beluchistan.

Also to the Foreign Department, for communication to the Residents at Mysore and Coorg.

Also that a copy of this Resolution be forwarded to the Director General of Telegraphs for information.

Also that a copy of this Resolution, and of the Report and Appendices A B and F, be forwarded to the Home Department of the Government of India, for information, and be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.*,
Secretary to the Government of India.

ADMINISTRATION REPORT

OF THE

INDIAN TELEGRAPH DEPARTMENT

FOR

1885-86.

I.—GENERAL REVIEW.

The operations of the Department were even more extensive, and the increase of business greater, than during the previous year.

2. **Message Traffic.**—271,841 more telegrams were despatched, more than 60 per cent. of these being Inland Private telegrams, and the considerable increase in this class of traffic bears gratifying testimony to the soundness of the present policy of the Department to bring the advantages of the telegraph more to the knowledge of the people of the country by extending the lines to, and opening offices in, the centres of native trades and industries. Paras. 20, 28, 29, 31. Paras. 34–58.

3. **Message Revenue.**—The total receipts from the despatch of telegrams amounted to ₹39,61,052, an increase over the previous year of ₹4,63,025, between 13 and 14 per cent. This increase is in part due to the larger use of the telegraph by the various departments of Government, caused by the events on the North-West Frontier at the commencement of the year, and the military operations in Upper Burma towards its close; but there has been also a satisfactory increase in the value as well as number of the Inland Private traffic resulting from the large facilities afforded; the revenue from this source having been ₹16,38,16, or ₹1,33,532 more than in the previous year, and, as compared with 1883-84, the increases in number and value have been 23·61 per cent. and 15·71 per cent. respectively. The explanation of the smaller increase in value than in number will be found in the growing popularity of the "Deferred" system, the number of private telegrams sent at the "Deferred" rate having been slightly more than one-half of the whole, as compared with 32 per cent. in 1882-83. Appendix B. Paras. 19, 23, 25.

Notwithstanding an increase of 3·02 per cent. in number, there has been a falling-off in the receipts from Private Foreign telegrams, due to the steadily decreasing value of silver; the sums collected from the public in Indian currency being disproportionate to the payments made in gold to foreign Administrations.

4. **New Telegraph Stations.**—There were 2,211 Telegraph Offices open to the public on the 31st March 1886 against 2,035 on the same date of the previous year, an increase of 176. Of this increase, 113 were Departmental and Combined offices, raising their number to 634, more than double the number available on the 31st March 1883. The average annual increase for the previous ten years was under nine offices. Para. 42.

Paras. 59–65.

5. **Extensions of Lines.**—The works of construction exceeded in extent those of the previous year. The mileage was raised—

Posts (by 2,123) to 27,510 miles.
Wire (by 6,507) to 81,480 ,,
Cables (by 45) to 187 ,,

A new route, *vid* Myawaddy, to Siam was opened out before the close of the year, but was not made available to the public, as the lines in Siam were not then completed.

Paras. 76–86.

6. **Special Operations.**—Among the special works of the year, which were numerous, some were of considerable magnitude, and the Government of India has been pleased to publicly notify its approbation of the service rendered by the department in connection with them.

Paras. 66–75

7. **Up-keep of Lines.**—The number of interruptions per mile of wire was less than in the previous year, proving the efficiency of the line-conservancy arrangements. Compared with other countries the success of the Indian Telegraph line maintenance is most marked.

Paras. 60, 61, 63, 73.

8. **Licensed Telegraph Systems.**—Of the 6,507 miles of wire provided during the year, 2,409 miles were supplied to Railways and 4 miles to Canal Administrations, raising the total maintained by the Department for such Administrations to the following :—

	Railways.	Canals.	Total.
Miles of wire	28,854	561	29,41[illegible]
Miles of cables	9	...	9
Number of offices	1,213	26	1,23[illegible]

Paras. 87–90.

9. **Telephones.**—The progress in telephone business is but slight. The Companies earned ₹1,51,349 against ₹1,37,490 during 1884-85; and the Government ₹61,443 against ₹53,213.

Paras. 35–37.

10. **Berlin Telegraph Conference.**—An international telegraph conference was held during the year at Berlin, and the interests of the India public were well represented there by the delegates of India.

Paras. 43, 44, 58, 91, 92.

11. **Traffic improvements.**—Very considerable advance has ben made in raising the standard of efficiency and speed. The progress mae in this direction has been highly satisfactory.

Paras. 95–97.

12. **Workshops.**—To the utmost practicable extent the use o indigenous material has been persovered in, and the manufacture, by native workmen, of line stores and electrical apparatus has been largely and successfully exended. The progress made in this direction is, financially and politically, of vale.

Paras. 14–18.

13. **Finance.**—The financial results of the year's operations ave been very satisfactory. The receipts were ₹51,10,986; the working expenses amounted to ₹36,18,695, giving a surplus of ₹14,92,291, equivalent to 3·89 per cent. on the Capital expended to the last day of the year.

The figures for the previous year were—

	₹
Receipts	47,27,143
Expenditure	35,59,225
Surplus	11,67,918

and the interest on Capital was 3·3 per cent.

II.—REVENUE AND EXPENDITURE.

14. The expenditure of the year on the construction of new lines and other works debitable to Capital was ₹29,36,842, made up as follows:—

	₹
Lines and Buildings	19,20,911
Tools and Plant	62,265
Workshop . Buildings	38,781
Workshop . Machinery and Plant	3,973
Workshop . Materials	1,07,768
Store-houses	11,986
Stores	7,16,588
Charge for exchange on payments in England	1,44,496
Suspense heads	45,954
	29,36,842

15. The total capital expenditure of the department up to 31st March 1886 was ₹3,83,16,760.

16. The following is the Revenue Account for the year 1885-86, compared with that for 1884-85 :—

	1884-85.	1885-86.		1884-85.	1885-86.
RECEIPTS.	₹	₹	EXPENDITURE.	₹	₹
Message Revenue earned*	34,94,489	39,57,317	Repairs of lines	3,45,639	1,87,025
Receipt from State Railways for rent and maintenance of lines and offices	6,13,444	7,60,238	Direction	1,39,562	1,79,094†
Receipts from Guaranteed Railways for rent and maintenance of lines and offices	3,47,144	1,98,044	Accounts	40,716	54,115
Claims against Guarantees and rents of private lines	1,17,441	1,05,557	Superintendence	6,68,623	6,94,074
Sale of books, Gazettes, &c.	17,490	15,826	Line maintenance	2,10,241	2,38,432
Miscellaneous	1,07,786	35,137	Check office	55,368	48,989
News-free and other *pro-forma* messages	29,349	38,867	*Signal Offices.*		
			Departmental	19,52,446	20,57,584
			Non-Departmental	1,15,550	1,23,671
			Minor undertakings	9,598	6,712
			Telegraph stamps	1,702	5,952
			Other items	19,780	23,047
			Total Expenditure	35,59,225	36,18,695†
			Surplus receipts	11,67,918	14,92,291
Total	47,27,143	51,10,986	Total	47,27,143	51,10,986

17. These figures show an increase of ₹59,470 in expenditure against an increase in revenue of ₹3,83,843, being a net improvement of ₹3,24,373, which is due entirely to the growth of message traffic. The revenue from the despatch of messages was ₹4,62,828 greater than in the previous year—an increase of 13¼ per cent.

18. The transactions of the year resulted in a net surplus of ₹14,92,291, the largest ever made. It represents a percentage of 4·21 on the Capital expenditure calculated up to the commencement of the year, and, on the whole Capital expended up to the close of the year, a percentage of 3·89—a net financial improvement of nearly 18 per cent, the corresponding figures for the previous year having been 3·6 and 3·3 per cent. respectively.

* Exclusive of collections credited to Provincial lines, *viz.*, ₹3,538 and ₹3,735 for 1884-85 and 1885-86 respectively.
† The increase shown under the head "Direction" is only nominal and due to an account adjustment.

III.—TRAFFIC.

19. The number and value of paid messages of all classes disposed of during the year are shewn below, contrasted with the corresponding figures for 1884-85 :—

Year.	State.			Private.			Total.		
	No.	Value.		No.	Value.		No.	Value.	
		℟	a.		℟	a.		℟	a.
1884-85	293,054	7,16,141	7	1,725,043	27,81,885	13	2,018,097	34,98,027	4
1885-86	390,837	10,52,062	1	1,899,101	29,08,990	5	2,289,038	39,61,052	6

20. In Appendix B will be found further particulars of the traffic, arranged under the heads of Inland and Foreign, and distributed according to the administrative divisions of the Department in which it was collected. These figures only refer to paid messages booked at Departmental or Combined Postal Telegraph offices (*vide* paragraph 42), and exclude a Inland messages emanating from Licensed Telegraph offices, the receipts from which form no part of the earnings of the department, though the wires of the latter largely contribute to carry the messages to their destinations.

21. The proportions of the total traffic of the year, under the four heads, Service, Private, Inland and Foreign, are exhibited in the following table of percentages :—

Class.	Inland.		Foreign.		Total.	
	No.	Value.	No.	Value.	No.	Value.
State . .	16·71	23·34	0·36	3·22	17·07	26·56
Private . .	66·73	41·36	16·20	32·08	82·93	73·44
Total .	83·44	64·70	16·56	35·30	100·00	100·00

22. There was an increase of 271,841 in the number of paid messages compared with the previous year, of which total, inland State messages furnished 95,766, foreign State 2,017, inland Private 163,176, foreign Private 10,882. The increase in the number of State messages is 33·36, and of private messages 10·09 per cent.; the combined figures giving a net increase of 13·47 per cent.

23. The net increase in the value of messages is ℟4,63,025 or 13·24 per cent. over the result of the previous year. This sum is made up of increases of ℟2,60,796 in inland State messages, ℟75,124 in foreign State, ℟1,33,532 in inland Private, and a decrease of ℟6,428 in foreign Private. The value of State messages has increased by 46·90 per cent., and of Private messages by 4·56 per cent., giving a net increase of 13·24 per cent. as stated above. These results, as well as those in the previous paragraph, are again shewn in paragraphs 31 and 32, arranged under the heads Inland and Foreign, and compared with the increases or decreases of several previous years in order to illustrate the growth of the traffic.

24. There is thus again a very considerable increase under State messages, both inland and foreign, the numerical growth being about equal in each case, and the enhancement in value of inland State messages being at about the same ratio as in the year preceding. The value, however, of foreign State messages has risen abnormally, the percentage of increase being 3⅛ times as great as in 1884-85, while the actual value of the Indian share of the charges on foreign State messages is more than double that realised in the previous year. The abnormal causes tending to produce this result have been the military preparations in Baluchistan early in the year, the Afghan Boundary Commission and the Upper Burma Expedition: in connection with all these the State correspondence has been heavy, and a large proportion of the messages have been lengthy cipher despatches, the charge for which class of traffic is comparatively high.

25. In inland traffic, Private messages shew a growth of nearly 12 per cent. in number and of nearly 9 per cent. in value, a result which may be regarded as satisfactory. Foreign Private messages exhibit an increase in number and a slight decrease in value, the fall in exchange, unaccompanied by a rise in the charge to the public, having materially reduced the share of this department on sent messages.

Inland Traffic.

26. Inland messages are of four different classes of value—Urgent, Ordinary, Deferred, and Local; the unit message being four annas, eight annas, one rupee, and two rupees respectively. The following table shows the number and value of State, private, and press messages under each of the classes, Urgent, Ordinary, Deferred and Local :—

Year.	Class.	Urgent.		Ordinary.		Deferred.		Local.		Total.	
		No.	Value.	No.	Value.	No.	Value.	No.	Value.	No.	Value.
			℟		℟		℟		℟		℟
1885-86 . . .	State .	95,075	5,00,147	41,498	45,059	241,688	3,76,531	4,473	2,708	382,732	9,24,445
	Private .	98,474	2,40,807	669,386	8,10,940	757,397	5,21,230	9,558	3,261	1,512,815	15,76,038
	Press .	1,102	13,524	6,525	24,372	7,548	20,089	...	...	15,175	57,985
	Total .	*194,651	7,54,278*	697,407	8,80,371	1,006,633	9,17,850	14,031	5,969	1,910,722	25,58,468†

27. As regards the values of the messages of the different classes, "Urgent" formed 29·48 per cent. of the total inland receipts in the current year, and 29·74 during the year 1882-83, the first complete year of the present tariff; "Ordinary" 34·41 of the whole, against 46·22 in 1882-83; and "Deferred" 35·88 against 23·82 in 1882-83. It will thus be seen that the increase in the "Deferred" class is proportionate to the decrease in the "Ordinary" class, and that the "Urgent" traffic has remained constant. "Local"‡ messages have formed only an insignificant proportion from the commencement, and have shown no appreciable growth.

28. The numerical proportions of Urgent, Ordinary, Deferred, and Local State, Private and Press messages, year by year, since the introduction of the present tariff, have been as follows :—

State.

	1881-82 (3 months).	1882-83.	1883-84.	1884-85.	1885-86.
Local . .	0·65	1·04	1·46	1·51	1·17
Deferred . .	62 70	56·06	57·49	59·63	63 15
Ordinary . .	7·12	11·10	14·46	12·50	10·84
Urgent . .	29·53	31·80	26·59	26·36	24·84
	100·00	100·00	100·00	100·00	100·00

* Includes 11,192 Urgent Postal Money Order messages, value ℟24,186-13. These, although classed "Urgent," have been charged for at the "Ordinary" rate.

† Exclusive of ℟10,860 on account of Abbreviated Addresses.

‡ Since abolished.

Private.

	1881-82 (3 months).	1882-83.	1883-84.	1884-85.	1885-86.
Local	0·43	0·64	0·65	0·63	0·63
Deferred	22·03	32·06	39·63	47·23	50·07
Ordinary	72·64	60·90	53·30	45·75	42·92
Urgent	4·90	6·40	6·42	6·39	6·38
	100·00	100·00	100·00	100·00	100·00

Press.

Local	Details not available.	...	...	...
Deferred		42·76	49·95	49·74
Ordinary		49·90	43·22	43·00
Urgent		7·34	6·83	7·26
		100·00	100·00	100·00

29. Under State and Press messages the above figures do not present any striking variations from year to year for the reasons given in the next paragraph, but under Private, there has been a steady increase in Deferred, and a corresponding decline in Ordinary.

30. As regards the effect of the Deferred system on State messages it may be noted that, on its introduction in January 1882, the Government of India ruled that all telegrams not sent as Urgent must be classed Deferred. The effect of the new system on the revenue of the department for State messages has been as follows :—

Year.	No. of State Inland Messages.	Value of State Inland Messages.
		₹
1880-81	313,648	12,97,533
1881-82	245,836	6,98,480
1882-83	253,731	6,09,818
1883-84	226,840	4,71,233
1884-85	286,965	6,63,649
1885-86	382,732	9,24,444

31. The following summary shews the growth of inland State and Private traffic since the introduction of the existing tariff on the 1st January 1882:—

Year.	STATE.				PRIVATE.				TOTAL.			
	Number.	Value.	Percentage of number compared with previous year.		Percentage of value compared with previous year.		Number.	Value.	Percentage of number compared with previous year.		Percentage of value compared with previous year.	
			Increase.	Decrease.	Increase.	Decrease.			Increase.	Decrease.	Increase.	Decrease.
		₹						₹				
1881-82*	245,836	6,98,480	...	21·62	...	46·16	1,035,137	13,16,851	...	4·86	...	25·07
1882-83	253,731	6,09,818	3·21	...	...	12·69	1,189,437	13,86,630	14·90	...	...	0·93
1883-84	226,840	4,71,233	...	10·60	...	22·73	1,236,140	14,15,754	3·92	...	...	5·48

1885-86	382,732	9,24,445	33·37	...	39·29	...	1,527,990	16,38,165	11·95	...	18·18	...

* Existing tariff in force for the three last months of the year only.

Foreign Traffic.

32. In the following table, corresponding to that for inland traffic given in the preceding paragraph, are given particulars of foreign State and Private traffic for the last five years: the cause of the increase in State messages has been explained in para. 24.

Year.	State.						Private.						Total.					
	Number.	Indian share of charge.	Percentage of number compared with previous year.		Percentage of value compared with previous year.		Number.	Indian share of charge.	Percentage of number compared with previous year.		Percentage of value compared with previous year.		Number.	Indian share of charge.	Percentage of number compared with previous year.		Percentage of value compared with previous year.

33. Details of the distribution of International Traffic over the several routes to Europe are given in Appendix C; the percentages by each route for the last five years being as follows:—

Route.		1881-82.	1882-83.	1883-84.	1884-85.	1885-86.
Red Sea	*viâ* Suez.	66·91	50·79	56·88	55·09	51·51
Indo-European	„ Teheran.	31·62	47·20	41·44	42·71	46·05
	„ Turkey.	1·47	2·01	1·68	1·46	1·35
	Persian Gulf *viâ* Karachi.				·74	1·09
	Total.	100·00	100·00	100·00	100·00	100·00

Principal events during 1885-86, affecting the International system of Telegraphs.

34 (*a*). The land line India-Siam, which was closed on 3rd May 1884, was re-opened after re-construction on 18th May 1885.

(*b*). The following new offices were opened in China and Corea:—

Newchwang.
Liemschew.
Pakhoi.
Kiungchow (Island of Hainan).
Yamchow.
Hoichow.
Tsinanfoo.
Chefoo.
Paofingfoo.
Fung Hwang Ting.
Tchow.
Binchong.
Jenchuan.
Séoul.
Kaiping.
Shaoking.
Taku.

(*c*). Foochow and Saddle Island were interposed by the Eastern Extension Telegraph Company in their cable between Hongkong and Shanghai.

(*d*). The West African Telegraph Company extended their cable to Konakry from Senegal, and Offices were opened at Bolama, Bissao and Konakry, on the West Coast of Africa.

(*e*). In South America the lines in Paraguay were opened to International Traffic from 12th March 1885.

(*f*). The following interruptions, which more or less affected Indian Traffic, occurred on International Cables, *viz.*:—

The Anglo-American Company's cable from Brest to St. Pierre was interrupted from 12th March to 4th May, and from 21st September to 5th October.

The French American Company's cable between the same points was interrupted from 18th April to 5th September.

The Persian Gulf cable, Jask to Bushire, was interrupted from 20th to 27th April, and that from Bushire to Fao from 22nd to 29th August and from 12th September to 31st October.

The land line from Bushire to Teheran was interrupted from 5th to 16th January.

The cable Zanzibar to Mozambique was interrupted from 2nd April to 16th May.

Both the cables between Bombay and Aden were interrupted from 3rd to 27th June, and from 27th July to 21st September, the second cable continuing interrupted up to 26th October.

The cable from Suez to Suakim was interrupted from 28th April to 8th May, and from 13th to 25th July; and the cable from Perim to Suakim was interrupted from 13th July to 7th October.

The Amoor route to China and Japan was interrupted from 8th to 20th May.

The cable between Shanghai and Nagasaki was interrupted from 6th to 13th April.

Berlin Conference.

35. One of the ordinary quinquennial International Telegraph Conferences was held in Berlin between the 10th August and 17th September 1885. India was represented at the Conference by Colonel Sir J. Bateman-Champain, R.E., the Director-in-Chief of the Indo-European Telegraph Department, assisted by Mr. C. H. Reynolds, a Superintendent of the Department. Many improvements and simplifications in the rules for International messages were effected, as well as a very general reduction of rates. Between India and the United Kingdom the reduction was from Frs. 5·60 to Frs. 5 per word, or from 4*s.* 7*d.* to 4*s.* as levied in the United Kingdom. The continued heavy fall in exchange has, however, prevented the Indian public from benefiting by a reduction which was obtained with considerable difficulty by India's representatives, and the only satisfaction so far gained by it in India is, that it has rendered unnecessary any material increase over former rates. The position of this country in this matter will be understood when it is stated that the international tariffs are all calculated in effective francs, *i.e.*, francs in gold, in the equivalent of which all obligations with other countries have to be settled. It is evident therefore, that the public must pay more in depreciated rupees for telegraph services valued in gold in proportion as silver falls in comparison with gold in the world's markets.

36. Another subject which attracted much attention at the Conference, were the restrictions that should be placed on the use, or rather the abuse, of code language in telegrams: the Indian representatives, acting under instructions, opposed all unnecessary changes in the interests of the mercantile community, and successfully prevented the abolition of the rules under which words in messages, mutilated by the fault of the telegraph service, can be corrected without expense to the receiver.

37. The results obtained were generally satisfactory, and the Indian delegates received the thanks of the Government of India for their services.

Traffic Statistics.

38. Diagrams A and B represent the number and value of inland and foreign paid messages, year by year, as far back as the record is available.

39. Appendix D is an abstract of Signal Offices classed in groups according to the amount of traffic originating at each, year by year, since 1874-75.

40. Appendix E shews the number of Signal Offices in each division, open at the end of the year.

41. The total number of departmental offices open at the end of the year was 634, and the department provided and supervised 1,239 Licensed Offices, of which 1,173 were available to the public. There were also 595 Licensed Telegraph Offices not immediately under departmental control, of which 504 were available to the public. The number of departmental offices has more than doubled in a little more than two years.

42. Appendix M is a list, arranged by Provinces, of departmental offices opened during the year, *viz*:—

Assam	11
Bengal	40
Bombay	5
Burma	23
Central India	3
Central Provinces and Berar	6
Madras	14
North-Western Provinces and Oudh	16
Punjab	11
Rajputana	1
Sind and Baluchistan	8
Offices opened in connection with His Excellency the Viceroy's tour through Rajputana	6
Offices opened in connection with the Punjab Camps of Exercise, 1885-86	8
TOTAL	152
The number closed* (permanently or temporarily)	39
Leaving a net increase of	113

or nearly 21·7 per cent. The offices were worked as shewn below:—

By the Post Office	388
„ Clerks of Public offices	2
„ Light-house keeper	1
„ Soldiers	40
Total worked by extra-departmental agency	431
„ „ „ purely departmental agency	203
TOTAL	634

Complaints.

43. Appendix F is a synopsis of complaints received from the public during the year, those in which this department was concerned being separated from those for which the Railway or Foreign telegraph lines were responsible. The number of admitted complaints under the former category was 433, as against 432 during the preceding year, while the net increase of traffic was 13·03 per cent., excluding messages transferred to railways.

Speed of Transmission.

44. The following table, also graphically represented in diagram C, shews the average time occupied in the transmission of messages (excluding Deferred) over the several main routes. The result is a satisfactory improvement in almost every case:—

	1881-82.		1882-83.		1883-84.		1884-85.		1885-86.	
	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.
Calcutta to Karachi	0	55	1	24	1	2	0	57	0	51
Karachi to Calcutta	0	41	1	3	0	36	0	35	0	36
Calcutta to Bombay	1	1	1	21	1	6	0	47	0	34
Bombay to Calcutta	1	3	1	0	1	10	0	48	0	36
Calcutta to Madras	1	9	1	16	1	7	1	1	0	50
Madras to Calcutta	1	13	1	18	1	4	0	59	0	46
Madras to Bombay	0	45	1	0	0	40	0	33	0	33
Bombay to Madras	0	44	1	0	0	38	0	28	0	36
Bombay to Karachi	0	45	1	6	0	35	0	35	0	31
Karachi to Bombay	0	40	0	51	0	30	0	24	0	21
Rangoon to Calcutta	1	23	1	27	2	50	2	10	1	22

* For particulars see Appendix N.

News-Free Messages.

45. The number of free news messages, such as Mail Steamer Reports, transmitted during the past and preceding years, have been as follows:—

	No.
1884-85	681
1885-86	788

Traffic with Licensed Telegraph Offices.

46. The number of messages transmitted, partly over departmental and partly over licensed wires, during the past two years has been as follows:—

1884-85	317,591
1885-86	325,552

Press Messages.

47. The following is a statement of the number and value of inland Press messages, and of the number and Indian share of the value of foreign Press messages for the last 5 years:—

Year.	Inland.		Foreign.		Total.		Remarks.
	No.	Value.	No.	Value.	No.	Value.	
		₹		₹		₹	
1881-82	7,941	40,975	...	...	7,941	40,975	
1882-83	10,245	38,705	587	1,758	10,832	40,553	
1883-84	10,218	37,200	532	2,303	10,750	39,503	
1884-85	12,996	49,347	877	3,937	13,873	53,284	
1885-86	15,175	57,985	975	11,442	16,150	69,427	

Inland Press messages have, during the last two years, shewn a promising increase. The Press messages shewn as Foreign are those to and from Ceylon and to the London *Times*. In the returns for previous years, only the Indo-Ceylon Press messages were shown, hence the apparently abnormal increase under this head.

Undelivered Messages.

48. The number of messages, which for the reasons specified could not be delivered, during the year was 9,867 as against 8,025 for the previous year. Of these no less than 1,955 were insufficiently addressed notwithstanding that no charge is made for the address, while, in the case of 3,257 messages the addressee was not found at the address given by the sender. The number of messages which miscarried owing to errors in transmission was only 48 or ·002 per cent.

Cause of Non-Delivery.	1884-85.		1885-86.	
	No.	Percentage.	No.	Percentage.
1. Not found; address insufficient	1,685	·070	1,955	·075
2. Not found at address given	2,523	·105	3,257	·124
3. Address changed in transmission	29	·001	48	·002
4. Left station; new address not known	469	·019	575	·022
5. Left India	127	·005	164	·006
6. Left for original station	1,267	·053	1,583	·061
7. Returned by Dead Letter Office	1,290	·054	1,489	·057
8. Addressee or address given unknown	234	·009	431	·016
9. Refused	152	·006	132	·005
10. Other reasons	249	·014	235	·009
Total	8,025	0·336	9,867	0·377

Signalling Establishment.

49. At the close of the year there were 1,227 Departmental Telegraph Masters and Signallers, and 207 Military Signallers on the strength of the establishment; and in addition, two clerks of Public offices, 458 postal clerks, and one light-house-keeper were employed in conducting telegraph duties.

50. The number of soldiers trained in telegraphy during the year was 135, and 83 were under instruction at the close of the year.

Died	12
Dismissed	9
Invalided	10
Resigned	9
Retired	2
Transferred to Clerical Establishment	1
Total	43

51. The number of casualties among the departmental signalling staff during the year has been 43, a percentage of 3·50, due to the causes marginally noted.

52. Under the head of Traffic Improvements, it was mentioned in the report of last year that many valuable measures had been introduced for promoting accuracy and speed in the transmission of messages; these measures have already borne substantial fruit; the improvement in accuracy, more especially in foreign code messages, has been most marked, the percentage of messages, in which any error, even trifling, was detected having fallen from 2·47 in 1884-85 to 1·02 in 1885-86. The arrangements now in force secure a constant check over the efficiency of the signallers through whose hands the most difficult part of the work passes, and increased attention has been given to raising the standard of proficiency in code and cipher signalling throughout the staff generally.

53. The list of efficient members of Volunteer Corps in the Telegraph Department at the close of the year 1885-86 showed a strength of 292.

Post Office Agency.

54. Thanks to the continued interest shown by, and the active co-operation of, the Director General of the Post Office, the scheme, initiated in 1883, has been expanded and considerable progress made.

55. At the end of 1883-84 there were 55 telegraph offices established in post offices; in 1884-85 there were 267, and at the end of 1885-86 the number had increased to 388 of which 296 were entirely new offices, and 92 had been ordinary departmental offices before their transfer to the management of the post office. Also during 1885-86 there were 1,026 miles of new wire added to existing supports, and 934 miles of entirely new line supplied for this service.

56. The following comparative table shows the progress made since the commencement of the scheme:—

Year.	No. of Offices.		Mileage of line and wire added to connect post offices with the main system.	
	Transferred to Postal Agency.	New.	New wire on existing supports.	New supports and wire.
1883-84	24	31	612	405
1884-85	73	194	636	1,216
1885-86	92	296	1,662	2,150
Added during 1885-86	19	102	1,026	934

57. The number of messages handed in at postal receiving offices, which are not also telegraph offices, has increased from 25,650 to 29,876, and the amounts collected for such from R27,387 to R30,010. The number of receiving offices during 1885-86 was 8,648.

58. There were 451 postal signallers under training during the year, of whom 253 were granted certificates of qualification by the department, 115 withdrew, and 83 were still under instruction at the close of the year.

IV.—EXTENSIONS OF LINES, AND LINE MAINTENANCE.

59. The Construction works carried out in 1884-85 were slightly exceeded by the new works in 1885-86, during which 2,123 miles of line, 6,507 miles of wire, and 45 miles of cable were added.

60. The following figures shew the extent of the system on the 31st March 1886, compared with the previous year:—

	Line.	Wire.	Cable.
1884-85	25,387	74,973	142
1885-86	27,510	81,480	187

The wire and cable maintained by the department are for the following respective purposes:—

	Wire.	Cable.
Imperial Lines	51,079	175
Provincial Lines	84	...
Native States	149	...
Railway Systems	28,854	9
Canal Systems	561	...
Private Lines	753	3
TOTAL	81,480	187

61. Appendix Ib is a classified statement of the lines, wires, and cables maintained, and Appendix J gives the particulars of lines, wires, and cables supplied and supervised for each Railway and Canal system.

62. The principal extensions in connection with *Combined* Offices, are as follows:—

In Madras.

	Miles
From Guntakal to Anantapur	38
,, Berhampur (Ganjam) to Aska	34
,, Tinnevelly to Ambasamudram	21
,, Coimbatore to Mettupalaiyam*	22
An extra wire from Cochin to Trichur, *vid* Ernacolum	51

In Bombay.

From Rajkot to Jamnagar	55
,, Palitana to Mahuva	31
,, Bhavnagar to Gogha	11

In Bengal.

From Burdwan to Cutwa	29
,, Burdwan to Culna	28
,, Nalhati, through Azimganj, Jiaganj, and Moorshedabad, to Berhampore (Bengal)	39
,, Bhugwanpore to Lalganj	9
,, Baro to Begóo Serai	10
,, Hazareebagh to Ranchee	56
,, Sakri to Madhubani	10

* In connection with this work the line from Mettupalaiyam to Coonoor was insulated.

In Bengal—contd.

	Miles
From Sara to Pubna	20
,, Barrackpore to Santipore and Kishnaghur, *vid* Ranaghat	56
,, Cuttack to Pooree	36
,, Raneegunge to Barakar, through Asansol and Sitarampur	23

In the Punjab.

From Palampur to Mandi	20
,, Umballa to Nahan	49
,, Bagpat to Baraut	12
,, Amritsar to Tarn Taran	13

In Rajputana.

From Erinpura Road to Erinpura	7
,, Sujat Road to Sujat	8

In Central India.

From Ranipur to Nowgong	24

In Lower Burma.

From Rangoon to Yandoon, *vid* Twante and Maubin	70

In Central Provinces.

From Akola to Basim and Hingoli	80
The unused line along the projected Railway, from Raipur to Bilaspur 75 miles, was extended up to the town of Bilaspur	3

In Assam.

	Miles
From Sylhet to Kajaldhara through Fenchuganj	20
,, Nazira to Sonari	20
,, Jorhat to Selang	14
,, Sylhet to Chhatak	22
,, Silchar to Lakhipur	14
,, Silchar to Hailakandi	15
,, Kajaldhara *vid* Shamshernagar to Moulvi Bazar	24

63. Amongst lines constructed for Railways are the following:—

For the Southern Mahratta Railway Company, double wire lines were made from Poona through Belgaum and Londa to Dharwar; from Londa to near the Portuguese Frontier; and from Hubli to Ranibednore, 402 miles in all.

For the Indian Midland Railway Company two wires were supplied from Jhansi to Manikpur, 173 miles, and the construction of the line along the Railway from Bhopal, *vid* Basoda and Etawah, to Jhansi, was commenced.

For the Sind, Punjab and Delhi Railway Company (now part of the North-Western State Railway), an extra wire was supplied from Raewind to Ganda Singh Bandar, 26 miles.

An extra wire was supplied for the Eastern Bengal State Railway from Poradaha to Goalundo, 49 miles.

For the late Indus Valley State Railway (now also incorporated with the North-Western State Railway system) an extra wire was supplied from Mooltan to Rohri, 281 miles.

The construction of the line along the Sind-Sagar State Railway was commenced, and by the end of the year 132 miles of line had been completed.

For the Sind-Pishin State Railway the line from Sibi to Quetta, *vid* Harnai, in progress last year, was completed, and a line from Quetta to Durwaza commenced.

A line was made for the Bolan State Railway from Rindli to Durwaza, about 70 miles.

Lines were completed along the Assam-Behar State Railway from Dinagepore to Saifganj, 58 miles, and from Purneah to Monihari, 33 miles.

The lines for the Cherrapoonjee Mountain Tramway were completed.

For the Madras Railway Company a line was made from Beypore to Calicut, 9 miles.

The wires used by the Bombay, Baroda and Central India Railway Company between Bombay (Dadar) and Wadhwan, 382 miles, were re-insulated throughout.

For the Bengal and North-Western Railway Company a line of 34 miles in length was commenced along the Uska Branch, and finished shortly after the end of the year.

For His Highness the Nizam's Guaranteed State Railway Company, a line with two wires was made from Secundrabad to Warrungul, 86 miles.

For the Jodhpur State Railway a line of 64 miles was made.

64. Among the more important additions of wire to existing lines are the following :—

		Miles
From Kaliabar	to Roha, and Bokahat to Golaghat	87
„ Monghyr	to Sahebgunj	90
„ Sakri	to Bettiah	148
„ Allahabad	to Meerut	437
„ Allahabad	to Manikpur	62
„ Bombay	to Surat	168
„ Poona	to Sattara	67
„ Bombay	to Karjat	63
„ Cuttack	to Berhampur	73
„ Bhusaval	to Hurda, *vid* Burhanpur, and Chaudni	151
„ Cawnpore	to Furrackabad	57
„ Ludhiana	to Lahore	118
„ Lahore	to Mooltan	209
„ Sukkur	to Quetta, *vid* the Bolan Pass	250

65. Of other departmental works the following are the principal :—

(*a*) The road line from Hospet to Dharwar, 110 miles, was dismantled, and the wires transferred to the line along the Railway.

(*b*) The line from Gauhati to Nigriting, 184 miles, was reconstructed.

(*c*) From Calcutta to Fort Fulta was reconstructed to enable the line to carry a second wire.

(*d*) Eighty-five miles of the main line from Lahore to Umballa were reconstructed.

(*e*) The line from Jacobabad to Kohat was insulated, and is now available as an alternative line between the Northern Punjab and Sind and Baluchistan.

(*f*) Spans over the following rivers were reconstructed with iron masts :—

Chandaikona, between Sultanpur and Serajganj.
Pangasi, „ „ „ (one mast).
Looni, „ Deesa and Umarkot.

(*g*) Heavy Cables, of a type hitherto unknown in India, were successfully laid from the Kennery and Prongs Light-houses in the Bombay Harbour to the foreshore, and connected thence by land lines with the Bombay Central Office.

(*h*) The temporary branch lines to many of the experimental Combined Offices were re-constructed with permanent supports, the offices having proved a success.

Interruptions.

66. *On Departmental Lines.*—The interruptions to communication (exclusive of contacts, imperfect working, damage to instruments and interruption for which no cause was discovered which are dealt with separately), have decreased in relation to the mileage of wire. In 1883-84 the proportion was ·01093 per mile of wire; in 1884-85 the proportion was reduced to ·0099 per mile of wire, while in 1885-86 it was ·00972. The proportion of contacts in 1885-86 was ·0099 per mile of wire compared with ·0101 in 1884-85 and ·0104 in 1883-84.

67. The following table shews the number of interruptions due to various causes compared with last year :—

Cause.	No. of interruptions. 1884-85.	1885-86.
Storms	98	91
Wire breaking	93	88
Trees and branches	62	56
Insulators damaged	45	32
Supports giving	30	14
Fires	21	23
Floods	20	43

68. The year under review has been remarkable for the amount of damage done to the telegraph lines by floods. In the Assam Division four interruptions were caused during the month of September in the Sylhet District by heavy floods. In the Baluchistan Division the communication was interrupted on the Quetta-Kalat, Nari Gorge, Gandikinduff and Spintangi-Harnai sections during April, for periods aggregating 422 hours, by the same cause. In the Oudh and Rohilkhand Division the telegraph line along the Cawnpore-Achnera State Railway was breached by floods along several sections in July. In the Ganjam Division the damage done was considerable in June and August by the flooding of the Kookai, Kutjoorie, and Berai streams, causing interruptions which aggregated 144 hours. In the Etawah District in the Bengal Division an interruption, lasting 74 hours, was caused by floods in July; and in August three interruptions, lasting respectively 46, 55 and 72 hours, were due to floods and storms. By far the most serious floods, however, were those in the Dacca Division during the months of August and September, when the lines along the Eastern Bengal and the Assam-Behar State Railways were washed away, and it was found necessary to open temporary offices in boats to repeat messages and forward them across the breaks.

69. Storms also did considerable damage. On the 22nd September a cyclone completely wrecked the lines between Cuttack and Balasore, Cuttack and Kendrapara and False Point, and between Bhuddruck, Chandbali and Pooree; the office at False Point was completely destroyed and two of its officials drowned. The destruction was so complete that, although by vigorous measures communication was restored through some of the wires almost immediately after the storm, it was not until the 11th October that sufficient repairs had been

executed to admit of messages being sent through all the wires. The more permanent reconstruction necessitated by the damage took some months to complete. Frequent storms during the month of June were the cause of much damage in the Malabar Division, large trees being blown down across the lines breaking the wires. In the Sind Division also, in May, communication was frequently interrupted by storms.

70. Other special causes of interruption were the carrying away of a span over the Myo Creek in the Arakan Division by the mast of a sea-going steamer, which, owing to the floods, was enabled to ply in inland waters: (2) the theft of several lengths of wire in Baluchistan in June: (3) the cutting of the line in several places by dacoits between Bilin and Shwegyin in December: (4) the removal of the span-mast at the Peemachouny Creek by dacoits who fired on and "looted" the working party sent to replace it: (5) the destruction of a support by an elephant in the Madras Division in July; the post being broken into 3 pieces.

71. In Upper Burma much trouble has been given by dacoits cutting the wire in several places simultaneously, thus rendering the work of restoring communication much more difficult than usual, and considerably retarding it, in the absence of escorts which were often unprocurable.

72. Full particulars as to the number and duration of interruptions, contacts, &c., on the departmental lines will be found in Appendix K.

73. *On Licensed Systems.*—On the telegraph lines of *Licensed Systems*, which include Railways and Canals, the proportion of interruptions per mile of wire compares favourably with that of last year, the ratio being ·023 per mile of wire in 1885-86 compared with ·024 in 1884-85 and ·025 in 1883-84.

74. The faults in offices are in the proportion of ·08 per office, which shows no improvement over 1884-85 but is less than in 1883-84 by ·02 per office. A large proportion of these interruptions is beyond departmental control, being due to negligence and incompetence on the part of the railway telegraph operators

75. By reducing the number of interruptions on both departmental and licensed Systems to the number of faults per 100 kilometres of wire, and comparing them with the interruptions on the telegraph systems of such of the European countries for which these statistics are available, the following results are obtained, from which it will be seen that India compares favourably with other countries in this respect:—

	No. of interruptions per 100 Kilometres of wire maintained.	
	1884-85.	1885-86.
India, including Licensed systems	1·40	1·33
Russia	3·05	2·75
Germany	3·07	3·63
France Proper	3·08	3·69
„ Colonies	...	3·65
Italy	4·36	3·48
Spain	5·08	4·52
Sweden	7·30	5·81
Belgium	8·88	10·38
Switzerland	9·64	7·84

Special Works.

76. The following exceptional works, which were carried out during the year, appear to deserve special mention:—

77. At the commencement of the year the assemblage, at Rawal Pindi, of a large military force of many native chiefs and high officers of Government, on the occasion of the visit, to His Excellency the Viceroy and Governor General, of His Highness the Amir of Afghanistan, called for the rapid establishment of a complete system of telegraphs and telephones, connecting the various camps with each other and with the main system of the country. The arrangements which were entrusted to Mr. H. A. Kirk, Officiating Superintendent, proved thoroughly, satisfactory, and elicited the acknowledgments of the General Officer in charge of the assemblage.

78. During the winter of 1885-86, the department supplied a system of telegraphs in connection with the Camps of Exercise in the Punjab, the object being to keep the two divisions of each force in telegraphic communication with each other and with the main lines of the country. His Excellency the Commander-in-Chief expressed his appreciation of the manner in which the telegraph business was conducted, which was also acknowledged by the Government of India in the Military Department. The Punjab Chief Superintendent, Mr. W. K. D. Bignell, and Mr. Assistant Superintendent, A. D. Hill, were specially thanked by His Excellency.

79. Early in the year the necessity arose not only to push on to immediate completion the permanent lines then under construction in the direction of Pishin, but also to provide entirely new lines up the Bolan and to be prepared with a selected staff and ample field material for all possible extensions. These measures were all completed and received the approval of Government. Mr. Chief Superintendent, R. Boteler, who was selected for charge of the division, rendered valuable service in connection with these operations which were materially assisted by the energy and zeal of Mr. Officiating Superintendent, F. Rickards, who worked continuously through the hot weather in the Lower Bolan.

80. Several cables of unusual size and strength were laid in Bombay Harbour. This work, which was novel and difficult, was carried out very successfully by the executive officer, Mr. S. H. C. Hutchinson, Assistant Superintendent.

81. At the end of October 1885, the department was called upon to organise a service, in connection with the expeditionary force to Upper Burma, which should keep the advancing army in telegraphic communication with Rangoon; and early in November a telegraph party, fully equipped, was ready at Prome to accompany the expedition. This party proceeded with the expedition to Mandalay, while another advanced across the frontier by land as soon as a small escort could be secured. Communication with Mandalay was established on the 11th December, and intermediate offices were opened at earlier dates as sections of the line were completed.

82. The old Burman line was found to be in a far worse condition than was anticipated, and, after the preliminary repairs needed to open communication were completed, it had to be entirely remade. The difficulties met with were considerable, the weather was unpropitious, and the country in part inundated, while

the working parties, as well as the line itself, were subject to constant attack. Notwithstanding the frequent malicious destruction of wires and posts and the difficulty often experienced in obtaining escorts for repairing parties, all injuries were rapidly repaired and communication with Mandalay maintained with remarkable regularity.

83. Simultaneously with these operations along the Irrawaddy, the telegraph was extended beyond Toungoo on the eastern frontier, and before the end of the official year an office had been opened at Ningyan, with the prospect of shortly extending communication to Yamethin.

84. These Upper Burma lines have been extended in many directions, since the 31st March, but as these works do not come within this report, it is sufficient to note here the various offices which had been opened in the recently occupied province on the above date.

Name of Office.	Date opened.	Name of Office.	Date opened.
Minhla . . .	25th November 1885.	Ava . . .	30th January 1886.
Sinboungweh . .	6th December 1885.	Myotha . .	31st ,, 1886.
Pagan . . .	7th ,, 1885.	Zaygyo . . .	1st February 1886.
Myingyan . . .	10th ,, 1885.	Kyaukmyaung .	20th ,, 1886.
Mandalay . . .	11th ,, 1885.	Shwebo . .	22nd ,, 1886.
Yenangyaung . .	19th ,, 1885.	Gyobin . . .	26th November 1885.
Toungdwingee . .	23rd January 1886.	Ningyan . .	29th December 1885.

85. It may be added that in December 1885, a serious outbreak of dacoits in the Shwegyin and Pegu districts called for very energetic efforts in the up-keep of the lines which were extensively damaged, both posts and wire being cut up before the dacoits (who held the district for a time) could be beaten off.

86. The Government of India, in a Gazette Notification (No. 164, dated 24th June 1886, Public Works Department) expressed its appreciation of the value of the work done, and of the services of the Telegraph Department in connection with it.

V.—PRIVATE LINES AND TELEPHONE EXCHANGES.

87. The private firms carrying on this class of business is confined to the Bengal Telephone Company at Calcutta; the Oriental Telephone Company at Madras, Rangoon, and Moulmein; and the Bombay Telephone Company at Bombay and Karachi.

88. The following statistics show the particulars of the working of Telephone Companies in India since 1882:—

Year.	No. of subscribers on the 31st December.	No. of exchange connections.	No. of private lines.	Amount on which royalty has been paid.
				₹
1882	244	244	5	73,009
1883	411	392	34	1,19,865
1884	699	703	77	1,37,490
1885	822	837	100	1,51,349

89. The Telegraph Department provides telephones and private lines for Government offices, and for the public at such places where no private firm has established an exchange.

90. The following table shows the extent of this class of business since 1881:—

Year.	No. of exchanges.	No. of exchange connections.	Private Lines.		Amount of subscriptions.
			No. of circuits.	No. of offices.	
					₹
1881 . . .	4	24	37	67	19,808
1882 . . .	8	56	88	147	40,069
1883 . . .	12	92	89	148	47,131
1884 . . .	9	72	122	200	53,213
1885 . . .	8	71	160	257	61,443

VI.—ELECTRICAL.

91. The post of Electrician continued to be held by Mr. Johnston up to July 1885 when he went to Europe on furlough, and Mr. Allen was appointed to officiate. Experiments in various branches of telegraphy were carried on with considerable activity.

92. An excellent Manual of Telegraphy was published by Mr. W. Williams, Superintendent in the Department, and Personal Assistant to the Director General, which has supplied a much-felt want, not only within the Department but to the profession generally, as evidenced by the reviews published in the Scientific Journals, and by numerous unsolicited testimonials from Telegraph Engineers and Electricians in all parts of the world.

VII.—STORES AND WORKSHOPS.

93. The following was the cost of purchasing and manufacturing stores during the year:—

	₹
London stores, including freight and landing charges . .	14,91,171
Stores purchased in India	2,18,700
Workshop manufacture	2,78,885
Store-keeping charges	1,06,296

94. Among the above 14,185 second-hand railway rails were included; the substitution of this cheap description of support for specially-made posts is not only productive of economy in this department, but provides a market for material that has served its time for railway purposes.

95. The workshops were very fully employed during the year, and the extensions to the buildings which the Government was good enough to sanction have given a great impetus to the continued endeavours of this department to substitute articles of local manufacture for those hitherto imported.

96. The value of the outturn was ₹6,24,042 compared with ₹4,36,903 in 1884-85; these sums represent the net cost of the articles which are issued to "Store" at cost price.

97. The use of indigenous products has been continued wherever practicable, and the local manufacture of all descriptions of telegraph material has considerably increased, notably in the case of instruments, nearly 900 complete sets having been turned out.

98. The principal articles manufactured during the year were in round numbers as follows :—

I.—LINE STORES.

Castings.

Caps for posts	7,800
Sockets for posts	4,000
Shoes for rails	4,400
Keys for shoes	10,200
Cross-feet	3,000
Anchors	7,300

Wrought Iron.

Tubular masts from 50 to 100 feet in height	20
Backs for brackets	30,900
Bolts and nuts	94,900
Clamps	19,000
Straining screws	15,200
Tubes	14,600
Line tools of sorts	2,000

II.—ELECTRICAL INSTRUMENTS AND APPARATUS.

Portable batteries	142
Electric bells	376
Condensers	26
Galvanometers	106
Signalling keys	787
Lightning dischargers	541
Telephone transmitters	110
Relays	52
Sounders	896

III.—ARTICLES MANUFACTURED FROM COMPONENT PARTS IMPORTED FROM ENGLAND.

Telegraph cables	26 miles.
Insulators	297,611

SIMLA,
The 25th October 1886.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 29th DECEMBER 1886.

GENERAL REMARKS.—During the past week there has been slight but general rain over the eastern and central districts of the Punjab where the *rabi* sowings are now nearly completed. In the N.-W. Provinces and Oudh the *rabi* crops are being irrigated, and though in good condition, would be benefited by rain. Cloudy weather has prevailed in Hyderabad, the Central Provinces, Central India and Rajputana; the crops generally promise well but rain is wanted in Rajputana. Prospects remain favourable in Madras and Mysore, though rain is needed in some districts of the former. In Bombay the standing crops have suffered in places from blight, cloudy weather, and frost. Prospects in Bengal, Burma and Assam continue favourable.

Harvesting of paddy and late *kharif* crops is proceeding in Madras and Bombay; cotton is being picked in the Central Provinces and Hyderabad; the *aman* rice harvest is yielding a good outturn in Bengal, and the winter rice is being reaped in Assam.

Prices have risen in a few places in the Punjab and Rajputana; elsewhere they are fairly steady.

Public health is improving in Bengal; cholera and smallpox exist in most provinces, but there is no abnormal sickness.

Cattle-disease is reported from Madras and Bombay.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Dec. 29th)		
Bellary		Standing crops generally fair, but in parts of one taluk paddy withering; *dhol* affected by insects and cotton by disease. Harvest wet and dry crops, yield average. Fever in two and cattle-disease in three taluks.
Kurnool		Standing crops good. Harvest paddy, yield average. Smallpox in one and cattle-disease in two taluks.
Ganjam		Harvest paddy. Slight smallpox in four, fever in five, and cattle-disease in three divisions. Cholera exists.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Kistna . . .	. . . . .	Standing crops generally good. Harvest paddy, outturn middling. River 3·5 feet over Anicut. Fever in five and slight cholera in six taluks.
Chingleput (Madras) .	. . . . .	Standing crops good. Harvest paddy and *ragi*, outturn below average. Slight fever and cattle-disease in two taluks.
Coimbatore . . .	. . . . .	Standing crops generally good but require more rain. Harvest wet and dry grains, outturn generally about average. Smallpox in one, and fever and cattle-disease in two taluks.
Tanjore . . .	Average last week since revised ·98; this week ·01.	More rain wanted in two taluks. Standing crops generally good. Harvest paddy, outturn up to average.
Madura . . .	Average last week since revised ·08.	Health of people and cattle generally good.
Malabar . . .	. . . . .	Standing crops, second crop paddy earing. Harvest paddy, outturn average. Fever in one, slight smallpox in eight, and cattle-disease in two taluks.
Travancore . . .	. . . . .	Standing crops, paddy in ear. No cholera or smallpox. *General Remarks.*—General prospects good.
Bombay—(Dec. 29th)		
Karachi . . .	*Nil*	River at Kotri on 27th 3 feet 1 inch against 3 feet 10 inches on same date last year. *Rabi* sowings coming up. Fever in eleven talukas and cattle-disease in Sakro. Wheat, red rice, and *bajri* in Karachi 24, 30 and 32½ and in Sehwan 28, 38 and 40 pounds per rupee respectively.
Hyderabad . . .	*Nil*	*Kharif* harvesting still continues. Cotton cultivation damaged by frost in Hyderabad taluka. *Rabi* cultivation in good condition. River at Kotri on 27th 3 feet 1 inch against 3 feet 10 inches on same date last year. Fever in five and cattle-disease in three talukas. Wheat 25, *bajri* 30 1/16, *jowari* 40, white rice 20, and red rice 28 pounds per rupee.
Ahmedabad . .	*Nil*	*Rabi* crops promising. Public health good. Wheat 31 and *bajri* 32 pounds per rupee.
Surat	*Nil*	Crops healthy. Reaping of *jowari* commenced in some talukas. Fever in Bardoli, Bulsar, and Mandvi and smallpox in Bardoli and Bulsar. *Jowari* 37 and *nagli* 48 pounds per rupee.
Nasik	*Nil*	*Kharif* reaping and *rabi* sowing almost completed. *Kharif* threshing in progress in some places. Public health generally good. Wheat 25½, *bajri* 33 5/16, and rice 19 3/8 pounds per rupee.
Colaba (Bombay) .	*Nil*	Abnormal temperature fell from 1° cool on 22nd to 3° cool on 25th, gradually rose to 1° cool on 27th and again fell to 2° cool on 28th. Vapour in air slightly in excess of normal on all days. Wind normal.
Poona . . .	Light showers only in Petha Baramati ·63	Crops in good condition except in the Bhimthadi taluka, where wheat is slightly injured by rust, and where the late fall of rain has injured the early sown *jowari* and *kardi* crops. Public health generally good. *Bajri* 42 and *jowari* 61 pounds per rupee in the district, and *bajri* 37 and *jowari* 48 pounds per rupee in Poona city.
Ahmednagar . .	*Nil*	Weather cloudy. Blight has appeared in some talukas. Health good. *Bajri* 54 and *jowari* 68 pounds per rupee.
Sholapur . . .	*Nil*	Harvesting of *kharif* crops completed in Sholapur, Karmala, and Dhalsiras talukas. *Tur* and cotton suffering from blight and excessive rain. *Rabi* crops generally doing well. ROYAL COMMISSION IN CONNECTION WITH THE ADELAIDE JUBILEE EXHIBITION, 1887.

No. $\frac{17. \text{ Ex.}}{7-2.}$

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department, under date the 7th January 1887.

READ—

Despatch No. 121 (Statistics and Commerce) dated the 2nd December 1886, received from Her Majesty's Secretary of State for India, with which was forwarded the following extract from the *London Gazette* of the 2nd November 1886, notifying the appointment of a Royal Commission, of which His Royal Highness the Duke of Cambridge is President, to promote the success of the International Exhibition to be held at Adelaide this year:—

Whitehall, October 30, 1886.

THE Queen has been pleased to issue a Commission under Her Majesty's Royal Sign Manual to the effect following:—

VICTORIA, R.

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, to—

Our dear Cousin and Councillor His Royal Highness George William Frederic Charles, Duke of Cambridge, Knight of Our Most Noble Order of the Garter, Knight of Our Most Ancient and Most Noble Order of the Thistle, Knight of Our Most Illustrious Order of St. Patrick, Knight Grand Cross of Our Most Honourable Order of the Bath, Knight Grand Commander of Our Most Exalted Order of the Star of India, Grand

Master and Principal Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, Field Marshal Commanding-in-Chief Our Forces;

Our right trusty and right entirely beloved Cousin William Drogo, Duke of Manchester, Knight of Our Most Illustrious Order of Saint Patrick;

Our right trusty and entirely beloved Cousin and Councillor George Augustus Constantine, Marquess of Normanby, Knight Grand Cross of Our Most Honourable Order of the Bath, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George;

Our right trusty and right well-beloved Cousin and Councillor Archibald Philip, Earl of Rosebery;

Our right trusty and right well-beloved Cousin and Councillor Henry Howard Molyneux, Earl of Carnarvon;

Our right trusty and right well-beloved Cousin Windham Thomas, Earl of Dunraven and Mount-Earl, Knight of Our Most Illustrious Order of Saint Patrick;

Our right trusty and right well-beloved Cousin and Councillor Granville George, Earl Granville, Knight of Our Most Noble Order of the Garter;

Our right trusty and well-beloved Cousin and Councillor Richard Assheton, Viscount Cross, Knight Grand Cross of Our Most Honourable Order of the Bath, Our Principal Secretary of State for India;

Our right trusty and well-beloved Henry, Baron Thring, Knight Commander of Our Most Honourable Order of the Bath;

Our right trusty and well-beloved Councillor Edward Stanhope (commonly called the Honourable Edward Stanhope), Our Principal Secretary of State for the Colonies;

Our right trusty and well-beloved Councillor Sir James Fergusson, Baronet, Knight Grand Commander of Our Most Exalted Order of the Star of India, Knight Commander of Our Most Distinguished Order of Saint Michael and Saint George, Companion of Our Order of the Indian Empire, one of the Under-Secretaries of State to Our Principal Secretary of State for Foreign Affairs;

Our right trusty and well-beloved Councillor Sir Henry Thurstan Holland, Baronet, Knight Grand Cross of our Most Distinguished Order of Saint Michael and Saint George, Vice-President of Our Committee of Council on Education;

Our right trusty and well-beloved Councillor Sir John Rose, Baronet, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George;

Our trusty and well-beloved Charles William Fremantle, Esquire (commonly called the Honourable Charles William Fremantle), Companion of Our Most Honourable Order of the Bath;

Our trusty and well-beloved Sir Frederic Leighton, Baronet, President of the Royal Academy;

Our trusty and well-beloved Sir Richard Owen, Knight Commander of Our Most Honourable Order of the Bath;

Our trusty and well-beloved Sir Francis Philip Cunliffe-Owen, Knight Commander of Our Most Honourable Order of the Bath, Knight Commander of Our Most Distinguished Order of Saint Michael and Saint George, Companion of Our Order of the Indian Empire;

Our trusty and well-beloved Sir Joseph Dalton Hooker, Knight Commander of Our Most Exalted Order of the Star of India, Companion of Our Most Honourable Order of the Bath, Doctor of Medicine;

Our trusty and well-beloved Sir John Gilbert, Knight;

Our trusty and well-beloved Sir James Dromgole Linton, Knight; and

Our trusty and well-beloved John Fretcheville Dykes Donnelly, Esquire, Companion of Our Most Honourable Order of the Bath, Colonel on the Retired List of Our Army;

Whereas We have received from Our Secretary of State for the Colonies, that [illegible] Adelaide, in Our Province of South Australia, in the [illegible]

[illegible] Our Colonies and Dependencies in Europe, Asia, Africa, and America, and in the remaining portions of Australasia, shall be fully and suitably represented at this Exhibition:

Now know ye, that We, considering the premises, and earnestly desiring to promote the success of the said Exhibition, and reposing great trust and confidence in your fidelity, discretion, and integrity, have authorized and appointed and by these presents do authorize and appoint you, Our said dear Cousin and Councillor George William Frederic Charles, Duke of Cambridge, together with you the said William Drogo, Duke of Manchester; George Augustus Constantine, Marquess of Normanby, Archibald Philip, Earl of Rosebery; Henry Howard Molyneux, Earl of Carnarvon, Windham Thomas, Earl of Dunraven and Mount-Earl, Granville George, Earl Granville, Richard Assheton, Viscount Cross, Henry, Baron Thring, Edward Stanhope (commonly called the Honourable Edward Stanhope), Sir James Fergusson, Sir Henry Thurstan Holland, Sir John Rose, Charles William Fremantle (commonly called the Honourable Charles William Fremantle; Sir Frederic Leighton; Sir Richard Owen; Sir Francis Philip Cunliffe-Owen; Sir Joseph Dalton Hooker; Sir John Gilbert; Sir James Dromgale Linton; and John Fretcheville Dykes Donnelly to be Our Commissioners to obtain and distribute full information as to the best mode by which the products of the Manufacturing and Agricultural Industry and the Fine Arts of Our United Kingdom of Great Britain and Ireland, Our Colonies and Dependencies, may be procured and forwarded for exhibition, to assist with their advice and co-operation, and generally to promote the success of the said Exhibition in South Australia.

And Our further will and pleasure is that you, or any three or more of you, when and so often as need or occasion shall require, so long as this Our Commission shall continue in force, to report to Us, in writing under your hands and seals respectively, all and every the several proceedings of yourselves had by virtue of these presents:

And lastly, We do by these presents ordain that this Our Commission shall continue in full force and virtue until the close of the said Exhibition, and that you Our said Commissioners, or any three or more of you, shall and may from time to time, and at any place or places, proceed in the execution thereof, and of every matter and thing therein contained, although the same be not continued from time to time by adjournment; and for the purpose of aiding you in such matters. We hereby appoint Our trusty and well-beloved Sir Herbert Bruce Sandford, Knight, Lieutenant-Colonel and Honorary Colonel on the Retired List of Our Army, to be Secretary to this Our Commission.

Given at Our Court at *Saint James's*, the twenty-ninth day of *October*, one thousand eight hundred and eighty-six, in the fiftieth year of Our reign.

By Her Majesty's Command,

Henry Matthews.

ORDER.—Ordered, that the above paper be published in the Supplement to the *Gazette of India* for general information.

Our right trusty and right well-beloved Cousin and Councillor Henry Howard Molyneux, Earl of Carnavon;

Our right trusty and right well-beloved Cousin Windham Thomas, Earl of Dunraven and Mount-Earl, Knight of Our Most Illustrious Order of Saint Patrick;

Our right trusty and right well-beloved Cousin and Councillor Granville George, Earl Granville, Knight of Our Most Noble Order of the Garter;

Our right trusty and well-beloved Cousin and Councillor Richard Assheton, Viscount Cross, Knight Grand Cross of Our Most Honourable Order of the Bath, Our Principal Secretary of State for India;

Our right trusty and well-beloved Henry, Baron Thring, Knight Commander of Our Most Honourable Order of the Bath;

Our right trusty and well-beloved Councillor Edward Stanhope (commonly called the Honourable Edward Stanhope), Our Principal Secretary of State for the Colonies;

Our right trusty and well-beloved Councillor Sir James Fergusson, Baronet, Knight Grand Commander of Our Most Exalted Order of the Star of India, Knight Commander of Our Most Distinguished Order of Saint Michael and Saint George, Companion of Our Order of the Indian Empire, one of the Under-Secretaries of State to Our Principal Secretary of State for Foreign Affairs;

Our right trusty and well-beloved Councillor Sir Henry Thurstan Holland, Baronet, Knight Grand Cross of our Most Distinguished Order of Saint Michael and Saint George, Vice-President of Our Committee of Council on Education;

Our right trusty and well-beloved Councillor Sir John Rose, Baronet, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George;

Our trusty and well-beloved Charles William Fremantle, Esquire (commonly called the Honourable Charles William Fremantle), Companion of Our Most Honourable Order of the Bath;

Our trusty and well-beloved Sir Frederic Leighton, Baronet, President of the Royal Academy;

Our trusty and well-beloved Sir Richard Owen, Knight Commander of Our Most Honourable Order of the Bath;

Our trusty and well-beloved Sir Francis Philip Cunliffe-Owen, Knight Commander of Our Most Honourable Order of the Bath, Knight Commander of Our Most Distinguished Order of Saint Michael and Saint George, Companion of Our Order of the Indian Empire;

Our trusty and well-beloved Sir Joseph Dalton Hooker, Knight Commander of Our Most Exalted Order of the Star of India, Companion of Our Most Honourable Order of the Bath, Doctor of Medicine;

Our trusty and well-beloved Sir John Gilbert, Knight;

Our trusty and well-beloved Sir James Dromgale Linton, Knight; and

Our trusty and well-beloved John Fretcheville Dykes Donnelly, Esquire, Companion of Our Most Honourable Order of the Bath, Colonel on the Retired List of Our Army; Greeting!

Whereas it has been notified to Us, through Our Secretary of State for the Colonies, that an International Exhibition is to be held in Adelaide, in Our Colony of South Australia, in the year one thousand eight hundred and eighty-seven:

And whereas it is Our wish that the Manufacturing Industry, Agriculture and Fine Arts of Our United Kingdom of Great Britain and Ireland, and of Our Colonies and Dependencies in Europe, Asia, Africa, and America, and in the remaining portions of Australasia, shall be fully and suitably represented at this Exhibition:

Now know ye, that We, considering the premises, and earnestly desiring to promote the success of the said Exhibition, and reposing great trust and confidence in your fidelity, discretion, and integrity, have authorized and appointed and by these presents do authorize and appoint you, Our said dear Cousin and Councillor George William Frederic Charles, Duke of Cambridge; together with you the said William Drogo, Duke of Manchester; George Augustus Constantine, Marquess of Normanby; Archibald Philip, Earl of Rosebery; Henry Howard Molyneux, Earl of Carnavon; Windham Thomas, Earl of Dunraven and Mount-Earl; Granville George, Earl Granville; Richard Assheton, Viscount Cross; Henry, Baron Thring; Edward Stanhope (commonly called the Honourable Edward Stanhope): Sir James Fergusson; Sir Henry Thurstan Holland; Sir John Rose; Charles William Fremantle (commonly called

the Honourable Charles William Fremantle; Sir Frederic Leighton; Sir Richard Owen; Sir Francis Philip Cunliffe-Owen; Sir Joseph Dalton Hooker; Sir John Gilbert; Sir James Dromgale Linton; and John Fretcheville Dykes Donnelly to be Our Commissioners to obtain and distribute full information as to the best mode by which the products of the Manufacturing and Agricultural Industry and the Fine Arts of Our United Kingdom of Great Britain and Ireland, Our Colonies and Dependencies, may be procured and forwarded for exhibition, to assist with their advice and co-operation, and generally to promote the success of the said Exhibition in South Australia.

And Our further will and pleasure is that you, or any three or more of you, when and so often as need or occasion shall require, so long as this Our Commission shall continue in force, to report to Us, in writing under your hands and seals respectively, all and every the several proceedings of yourselves had by virtue of these presents:

And lastly, We do by these presents ordain that this Our Commission shall continue in full force and virtue until the close of the said Exhibition, and that you Our said Commissioners, or any three or more of you, shall and may from time to time, and at any place or places, proceed in the execution thereof, and of every matter and thing therein contained, although the same be not continued from time to time by adjournment; and for the purpose of aiding you in such matters. We hereby appoint Our trusty and well-beloved Sir Herbert Bruce Sandford, Knight, Lieutenant-Colonel and Honorary Colonel on the Retired List of Our Army, to be Secretary to this Our Commission.

Given at Our Court at *Saint James's*, the twenty-ninth day of *October*, one thousand eight hundred and eighty-six, in the fiftieth year of Our reign.

By Her Majesty's Command,

Henry Matthews.

ORDER.—Ordered, that the above paper be published in the Supplement to the *Gazette of India* for general information.

[True Extract.]

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Including the Cawnpore-Achnera State Railway.
(*b*) Return not received.
(*c*) Receipts from 16th June to 4th December, 1886.
(*d*) Including the Amritsar-Pathankot State Railway.
(*e*) Receipts from 31st October to 11th December, 1886.
(*f*) Return not received.
(*g*) Receipts from 1st April to 5th December, 1885.
(*h*) Receipts from 1st April to 4th December, 1886.
(*i*) In the line return for week ending 23rd October, 1886, owing to a clerical error, the receipts for the period from 1st April to 24th October, 1885, were shown ₹1,82,700 in excess of actuals. The weekly returns from then to the week ending 27th November, 1886, were incorrect to the same extent.

R. GARDINER, *Captain, R.E.*,
Offg. Under-Secretary.

FORT WILLIAM,
The 6th January, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 5th JANUARY 1887.

GENERAL REMARKS.—Except in the North-Western Provinces and Oudh, the Punjab, Rajputana and Assam, where there were slight showers in a few places, the week under report has been rainless.

The *kharif* harvest still proceeds in Bombay and Berar, but in all other parts of the country it has been completed. In Madras the paddy crop is being cut with generally an average outturn. In Mysore and Coorg the standing crops continue in good condition.

The rice harvest is approaching completion in Bengal, Assam and Burma, and good outturns are expected. In the Central Provinces the crop is being threshed, and in Bombay and Coorg the crop is being harvested.

In Bombay and Berar cotton-picking is in progress. The prospects of the poppy crop continue generally favourable in Bengal and the North-Western Provinces and Oudh.

The prospects of the *rabi* crop are generally very favourable throughout the country, though in the Punjab and the North-Western Provinces and Oudh more rain would be beneficial.

The public health is good in all Provinces.

Prices are generally stationary everywhere, except in the Punjab where they are rising in four districts.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 6th)		
Bellary		Standing crops generally fair; in parts *dholl* affected by insects and cotton by disease. Harvest wet and dry crops, yield about average. Fever and cattle-disease in two taluks.
Kurnool		Standing crops good. Harvest paddy, outturn average. Smallpox in one and cattle-disease in four taluks.
Ganjam		Harvest paddy, yield average. Slight smallpox in three; fever and cattle-disease in two taluks. Cholera exists.
Kistna		Standing crops generally good. Harvest paddy, outturn below average. River 3·25 feet over Anicut. Fever in seven and slight cholera in parts. Cattle-disease in one taluk.
Chingleput (Madras)		Standing crops good, but in parts of one taluk suffering slightly from want of water. Harvest outturn below average. Fever and cattle-disease in one taluk.
Coimbatore		Standing crops generally good, but require more rain. Harvest wet and dry grains, outturn generally about average. Fever, smallpox, and cattle-disease in two taluks.
Tanjore	(Average) ·05	Standing crops generally good, but require more rain, especially in parts of three taluks. Harvest wet and dry grains, outturn up to average. Cattle-disease in two taluks.
Madura	(Average) ·03	Cattle-disease in one taluk.
Malabar		Standing crops second crop paddy earing. Harvest paddy, outturn average. Slight fever in two and slight smallpox in eight taluks.
Travancore		Second crop paddy ripening. Smallpox in parts. *General Remarks.*—General prospects good.
Bombay—(Jan. 5th)		
Karachi	*Nil*	Rain at Kotri on 1st 3 feet 1 inch, against 4 feet 6 inches on same date last year. Fever in twelve and cattle-disease in two taluks. Wheat, red rice and *bajri* in Karachi 24, 30, and 32, and in Sujawal 28, 44, and 44 pounds per rupee, respectively.
Hyderabad	*Nil*	*Kharif* harvesting still continues. Cotton and *rabi* cultivation injured by frost in Hyderabad, Guni, Badin and Sakrand talukas. River at Kotri on 3rd 3 feet, against 4 feet 3 inches on same date last year. Fever in six and cattle-disease in three talukas. Wheat 25, *bajri* 37, *jowari* 41, white rice 20, and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	Standing crops good. Public health good. Wheat 31 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Public health fair. *Rabi* and *kharif* crops in fair condition. *Bajri* 34, wheat 18, and rice 23 pounds per British rupee.
Surat	*Nil*	Reaping of *jowari* continues. Slight fever and smallpox in Bardoli and Bulsar talukas. *Jowari* 38 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Kharif* threshing commenced. *Rabi* sowing finished. Standing crops in good condition except *alsi* which is blighted generally throughout the district owing to recent cloudy weather. Public health generally good, except in Chandor and Peint talukas, where ague and fever prevail. Wheat 25⅞, *bajri* 33 5/16, and rice 19 11/16 pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature rose from 1° cool on 29th to *nil* on 1st, was *nil* on 2nd, 1° cool on 3rd and 4th. Vapour in air excess of normal on all days. Wind normal.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Poona		Gram in Junnar taluka, and gram and *kardi* in Indapur are suffering from blight. Wheat and gram in Petha Baramati are slightly injured by rust. In other talukas *rabi* crops are doing well. Public health generally good. *Bajri* 43 and *jowari* 60 pounds in the district, and *bajri* 37 and *jowari* 43 pounds per rupee in Poona City.
Ahmednagar	*Nil*	Growing crops have suffered in some places from heavy rain and clouds, but are generally good. Health good. *Bajri* 54 and *jowari* 69 pounds per rupee.
Sholapur	*Nil*	Cotton, linseed, gram and *kardi* and in places wheat crops suffering from blight. Public health good. *Jowari* 91½ and *bajri* 52⅔ pounds per rupee.
Dharwar	*Nil*	Harvesting of rice and *jowari* in progress. Cotton, exotic and indigenous, generally good. Wheat good except in Nawalgand, Nargund, Gadag, and Ron, where it is damaged by rats. Public health generally good. Slight cattle-disease in Kod. *Jowari* 50¾ and rice 24 pounds per rupee.
Kanara	*Nil*	Rice and betel-nut harvest nearly completed above Ghats Slight fever in five and cattle-disease in four talukas. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot	*Nil*	Weather cold. Health generally good. Prevailing diseases—bowel complaints, fever and measles. *Rabi* crops in good condition. Cotton-picking commenced in some places. Wheat 25, *bajri* 26, and *jowari* 35 pounds per rupee.
		General Remarks.—Standing crops generally in good condition everywhere, but in parts of nine districts slight damage was done by blight, cloudy weather, and insects. Fever in parts of eleven, cattle-disease in parts of eight, and smallpox in parts of three districts.
Bengal—(Jan. 5th).		
Chittagong (Jan. 4th)	*Nil*	Weather seasonable. Harvesting of *aman* continues; twelve annas outturn expected. Winter crops doing well. Prices stationary. Public health good.
Dacca	*Nil*	Harvesting of *mung* and *til* commenced. Planting of *boro* paddy going on. Winter crops doing well. Prospects good. Sporadic cholera prevalent.
24-Pergunnahs	*Nil*	Prospects generally satisfactory. Harvesting of *aman* still continues. Sugarcane being cut, and manufacture of sugar has begun. Fever prevalent. Isolated cases of cholera reported.
Khoolna	*Nil*	Weather clear. *Aman* harvest nearly complete; outturn good. Winter crops doing well. Public health has improved.
Moorshedabad	*Nil*	Weather somewhat warm. *Aman* still being harvested. Prospects of other crops good. Public health good.
Pubna	Serajgunje 0·35.	Weather seasonable. *Aman* nearly harvested; outturn excellent. Winter crops promising. Public health fair.
Dinagepore	*Nil*	Weather fine and cold. Harvesting of rice nearly finished. Prospects of *rabi* crops good. Cholera reported from two thanas, and cattle-disease from one.
Rungpore	*Nil*	Harvesting of *aman* in progress. Other crops good. Public health improving.
Midnapore	*Nil*	Rice harvest good. Public health fair.
Burdwan	*Nil*	Rice harvest nearly completed, a bumper crop everywhere, except in low lands. Fever prevails in most thanas, and cholera in some.
Bhagulpore	*Nil*	Harvesting of late rice nearly over; outturn satisfactory. *Rabi* prospects good. Cholera has nearly disappeared.
Monghyr		Poppy looks healthy and prospects good.
Purneah	*Nil*	*Aghani* harvest nearly over with good outturn. *Rabi* crops promise very well. Health of people and cattle fair.
Durbhanga	*Nil*	Harvesting of paddy nearly completed. Prospects of *rabi* continue very promising. Poppy and tobacco doing well. Prices almost stationary. Public health generally good.
Mozufferpore		Poppy prospects continue promising.
Sarun		Condition of poppy good. Weather favourable.
Chumparun	*Nil*	Rice harvesting nearly completed. Prospects of *rabi* and poppy continue favourable. Fields being prepared for indigo. Prices stationary. Public health fair.
Patna	*Nil*	Prospects of *rabi* excellent. Poppy and cotton growing well. Public health generally good.
Gya	*Nil*	*Rabi* prospects good. Recent bad weather has slightly injured poppy. Fever still reported.
Shahabad		Some damage to poppy by caterpillars.
Hazareebagh	*Nil*	Weather seasonable. All crops on the ground, especially poppy, doing well. Public health good. A few cases of cattle-disease still reported.
Cuttack	*Nil*	Rice being reaped, outturn fair. *Rabi* ripening. *Dalua* rice being planted. Fever prevails.
		General Remarks.—No rain reported during the week, except a light shower at Serajgunje. Harvesting of rice is being rapidly completed with good outturn. Prospects of *rabi* crops and poppy continue to be generally favourable, but in Gya and Shahabad poppy has been slightly injured by recent cloudy weather. Transplanting of *boro* paddy is in progress. Fever and cholera have much abated, and the general health is fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—(Jan. 5th, 1887)		
Benares (Jan. 4th)		Weather clear and cold increasing. *Kharif* harvest has nearly been reaped; outturn average. *Rabi* prospects favourable. Poppy promises well. Sugarcane-pressing going on. Supplies ample. Prices steady. Public health good. Some cases of cattle-disease are reported from Sadr.
Gorakhpore („ 3rd)		Weather cloudy. *Rabi* looking well. Prices stationary. Health fair. Some cases of cholera reported.
Fyzabad („ 4th)		Weather clear. Irrigation of *rabi* going on. Poppy being weeded. Prospects continue good. Cholera in part of district.
Lucknow („ 3rd)	·20 on the 29th Dec. 1886.	Weather often cloudy. Condition of *rabi* crops good. Poppy plant healthy. Irrigation and weeding progressing. Markets well supplied, but price of wheat still shows a tendency to rise. Public health fair. Cattle-disease fading away.
Rai Barelli („ „)		Weather cloudy. *Rabi* prospects good. Irrigation going on. Supplies abundant. Prices somewhat risen. Health fair.
Pertabgarh („ 4th)		State of the crops continues good, except *arson* which is reported to be injured by insects. Prices almost stationary. Health of people and cattle good.
Allahabad („ „)	*Nil*	Weather seasonable. *Sarson* reported attacked by insects in tahsil Karchana on account of recent cloudy weather; other crops doing well. Markets full. Prices stationary. General health good.
Cawnpore („ „)	·10 in two Tahsils	Weather generally cloudy. *Rabi* being irrigated and thriving. Poppy plants coming on nicely. Prices slightly risen. Cattle-disease in one pargana.
Farakhabad („ „)		Weather continues cloudy. *Rabi* prospects good, but rain is now wanted. Poppy looks well. Markets well supplied. Health of people fair.
Sitapur („ „)		The rain in Sidhauli has done much good to *rabi* crops. Weather cloudy still. Crops thriving. Poppy crops continue favourable.
Bareilly („ „)		Want of rain general. Condition of crops good.
Banda	*Nil*	Weather cold and seasonable. *Rabi* crops flourishing. Prices steady. Public health and condition of cattle good.
Kumaon („ 4th)	*Nil*	Weather cloudy. Rain is required for *rabi*. Crops springing up. Prices stationary. General health good. Cattle-disease very little.
Agra („ 3rd)	*Nil*	Weather cloudy. Irrigation continues. Prices steady. Fever decreasing.
Jhansi („ 3rd)		Weather alternately fair and cloudy. *Rabi* prospects favourable. Poppy crops healthy and vigorous. Prices fluctuating. Public health generally good. Slight cattle-disease continues.
Ballia („ 3rd)		Weather fair and cold. Standing crops being irrigated and thriving. Prospects generally good. Markets steady. Public health good.
Meerut („ 4th)	Good rain on 4th	*Rabi* flourishing so far. Supplies sufficient. Prices easier. Health good.
		General Remarks.—Slight showers in some districts which have benefited crops. More rain wanted. Cloudy weather has injured *sarson* crop in two districts. Prospects of *rabi* and poppy continue favourable. Markets well supplied and prices generally steady. Public health good.
Punjab—(Jan. 5th)		
Delhi (Jan. 4th)	Slight rain	Health good. Prices fluctuating. *Rabi* crops good.
Hissar		Health good. Prices stationary.
Umballa		Health fair. Prices rising. *Rabi* crops fair.
Jullundur		Health good. Prices stationary. *Rabi* weeding commenced.
Amritsar		Health good. Prices stationary.
Sialkot	·30	Health good. Prices stationary.
Ferozepore		Health good. Prices rising.
Lahore		Health good. Prices rising.
Rawalpindi	·30	Health good. Prices rising. *Rabi* crops average.
Shahpur		Health generally good. Prices high and stationary. *Rabi* crops suffering from drought.
Moolan		Health good. Prices almost stationary. *Rabi* crops progressing.
Dera Ismail Khan		Health good. Prices stationary. *Rabi* sowings completed.
Peshawar		Smallpox decreasing. Prices almost stationary.
		General Remarks.—Rain has fallen in Delhi, Sialkot, and Rawalpindi districts; wanted in Amballa, Ferozepore, Sialkot, Lahore, and Peshawar districts. Smallpox decreasing in Peshawar, elsewhere health good. Foot-and-mouth disease has appeared among cattle in Tahsil Shahpur, and smallpox among sheep in Tahsil Khushab. Prices rising in Amballa, Ferozepore, Lahore, and Rawalpindi districts, fluctuating in Delhi, stationary elsewhere. *Rabi* progressing.
Central Provinces—(Jan. 5th).		
Nagpur	*Nil*	Weather cloudy. *Jowari* being threshed. *Rabi* promises well. Fever prevalent. Prices steady.
Jubbulpore	*Nil*	Weather cloudy. Crops thriving. Health fair. Prices steady.
Saugor (Jan. 3rd)	*Nil*	Weather cloudy and close. Prospects favourable. Health good. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—*contd.*		
Seoni	*Nil*	Weather cloudy. Prospects favourable. Health good. Prices steady.
Hoshangabad	*Nil*	*Rabi* crops thriving. Fever in places. Prices stationary.
Khandwa	*Nil*	Weather cloudy and close. *Rabi* likely to be injured by clouds. Prices slightly fallen. Health good.
Raipur	*Nil*	Weather cloudy. Threshing of rice and *kodo* continues. *Rahar* slightly damaged by clouds. Other *rabi* crops good. Prices steady.
Bilaspur	*Nil*	Threshing continues. *Rabi* crops injured in places by clouds. Cholera and cattle-disease in parts.
Sambalpur (Jan. 1st)		Weather clear. Threshing of rice and pressing of sugarcane in progress. Cholera in places.
		General Remarks.—Weather rather cloudy and is likely to damage the *rabi* crops. Threshing of *kharif* still continues. Fever and cholera in places. Prices steady.
Burma—(Jan. 5th.) (Report for week ending 1st January 1887.)		
Akyab	*Nil*	A few cases of cholera in town and district: some fatal. Cattle healthy. Crops good. Reaping progressing.
Bassein	*Nil*	Public health and health of cattle good. Reaping going on.
Rangoon	*Nil*	Two fatal cases of cholera in town. Otherwise public health good.
Amherst (Moulmein)	*Nil*	Public health and health of cattle good. Reaping nearly completed.
Pegu	*Nil*	Public health and health of cattle good. Reaping progressing throughout the district.
Henzada	*Nil*	Public health and health of cattle good. Reaping almost completed.
Prome	*Nil*	Public health and health of cattle good. Crops gathered in one township. In other townships harvest nearly over.
Toungoo	*Nil*	One death from cholera in town. Otherwise public health good. Cattle healthy. Reaping going on.
Thayetmayo	*Nil*	Public health and health of cattle good. Reaping nearly completed.
		General Remarks.—A few cases of cholera in Akyab, Rangoon, Toungoo and Tharawaddy and fever in Kyaukpyu. Cattle everywhere healthy. Harvest nearly completed in six districts, and progressing satisfactorily elsewhere.
Assam—(Jan 5th.)		
Gauhati	*Nil*	Weather seasonable. Public health fair. Reaping of *rabi* nearly finished. Prospects of crops good.
Cachar	·11	Weather very cold. Reaping of *sali* crops finished. Common rice 16 seers per rupee. Health good.
Sylhet	0·28	Reaping of *aman* will shortly be finished. Crushing of sugarcane in progress. Prospects favourable.
Dibrugarh	·52	Weather seasonable. Reaping of *sali* nearly over. Public health fair.
Mysore and Coorg—(Jan. 5th)		
Bangalore	*Nil*	Crops in good condition. Prospects fair. Public health good. Prices stationary.
Coorg	*Nil*	Reaping of rice crop commenced. Season and crop prospects favourable.
Berar and Hyderabad—(Jan. 5th)		
Amraoti		Weather clear. Cotton-picking and *kharif* harvesting nearly completed. *Rabi* crops in good condition. Wheat 20 and *jowari* 26 seers per rupee.
Akola		Weather clear and cool. *Jowari* thriving. Cotton-picking over. *Rabi* crops doing well.
Hyderabad	*Nil*	Sowing of *tabi* crops in progress. *Rabi* crops prospering. Fever and ague mitigated to some extent. Prices—wheat 13¾, coarse rice 12, white *juar* 17, yellow *juar* 21¾ and *tur* 14¼ seers per current sicca rupee.
Central India States—(Jan. 5th)		
Indore		Weather warm and cloudy.
Morar (Gwalior)		Health and prospects good. Weather seasonable.
Neemuch		Health and prospects good. Weather cloudy.
Goona		Health and prospects good.
Sutna		Health and prospects good.
Agar		Health and prospects good.
Sehore		Weather clear. Crops good.
Nowgong		Weather cold. *Rabi* prospects excellent. Health good. Prices steady.
Bhopawar		Weather cloudy. Prospects and health good. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—(Jan. 5th)		
Abu (Jan. 5th)	*Nil*	Weather seasonable but not so cold as usual and cloudy.
Sirohi („ 2nd)	*Nil*	Tanks drying; wells good. Health good. Crops good. Weather fine and cool.
Marwar („ 1st)	*Nil*	Tanks nearly full. Health good. Crops good. Weather slightly cloudy. Prices rising.
Kherwara („ 2nd)	*Nil*	Tanks and wells increasing slightly. Crops progressing favourably. Health good. Prices rising. Weather cold and seasonable.
Meywar („ 1st)	*Nil*	Water in tanks and wells decreasing. *Rabi* sown. Health good. Prices stationary. Weather fine and cold.
Harowti („ 1st)	*Nil*	Weather cloudy. Crops thriving. Health good.
Jhallawar („ 3rd)	*Nil*	Health and prospects good. Weather warm and cloudy.
Kotah („ 1st)	*Nil*	Health good. Crops promising. Weather seasonable.
Ajmere („ 4th)	Slight drizzling rain	Weather cloudy. Health fair. Crops slightly injured by frost in Beawar. Weeding in progress.
Jeypore („ „)	*Nil*	Weather cloudy. Rain wanted.
Kerowlee („ 1st)	*Nil*	Tanks dry. Wells drying. Prospects uncertain. Rain most urgently wanted. Smallpox very prevalent among children. Prices rapidly rising. Weather cool.
Dholepore („ „)	*Nil*	Weather cloudy. Tanks and wells low. Prospects fair. Health good. Prices high. Weather cool and windy.
Bhurtpore („ 4th)	*Nil*	Crops thriving. Health good. Prices rising. Weather cloudy.
Ulwar („ „)	*Nil*	Weather cloudy. Health good. Prices steady.
Bikanir („ 1st)	Rain drops in district.	Slight cholera in Churu. Prices stationary.
Nepal—(Dec. 30th)		
Katmandu (Dec. 31st)	*Nil*	Prospects fair. Prices still high.

SUPPLEMENT TO

The Gazette of India.

No. 3.] CALCUTTA, SATURDAY, JANUARY 15, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 12TH JANUARY 1887.

GENERAL REMARKS.—With the exception of Madras, Mysore and Coorg, Bombay and Burma, slight showers have fallen in most places.

The *kharif* harvest has been brought to a close in all parts of the country except Bombay, and the *rabi* sowings which have been completed everywhere are coming up well. Prospects of the harvest are generally very favourable. In parts of Bombay and the Central Provinces blight and hail have damaged the crops, but not seriously.

In Madras the standing crops are doing well, and the harvest in progress continues to give an average yield. In Mysore the season promises favourably.

The rice harvest is almost over in Bengal and Assam and is well advanced in Lower Burma. In Bengal there has been a good general outturn.

Poppy has been affected by cloudy weather and caterpillars in parts of Bengal, but in the North-Western Provinces and Oudh the crop is flourishing.

The public health continues generally satisfactory.

Prices are rising in four districts of the Punjab, showing an upward tendency in the North-Western Provinces and Oudh, fluctuating in Mysore, and falling in Coorg. Elsewhere they remain generally stationary.

Presidency or Province and District.	Rainfall during week under report.	Gist of agricultural prospects.
Madras—(Jan. 12th)		
Bellary		Standing crops generally fair, but in parts *dholl* affected by insects and white *cholum* and cotton by disease. Rain wanted in two taluks. Harvest wet and dry crops, yield about average. Fever in two and cattle-disease in three taluks.
Kurnool		Standing crops good. Harvest paddy, yield average. Small-pox in three and cattle-disease in five taluks.
Ganjam		Slight small-pox in two, fever in four, and cattle-disease in three divisions. Cholera exists.
Kistna		Standing crops generally good. Harvest paddy, outturn below average. River 3·4 feet over anicut. Fever and cholera exist in parts. Cattle-disease in one taluk.
Chingleput (Madras)		Standing crops generally fair, but in one taluk require more rain. Harvest paddy and *ragi*, outturn below average. Small-pox in one and cattle-disease in three taluks.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Coimbatore		Standing crops good, but paddy in want of rain in four taluks. Harvest wet and dry grains, outturn paddy and *ragi* average, rest poor. Fever in two, slight smallpox in three, and cattle-disease in two taluks.
Tanjore		Standing crops good, but rain much wanted in parts of four taluks. Harvest paddy and *varagu*, outturn up to average. Cattle-disease in two taluks.
Madura	Average last week since revised ·12	Standing crops in four taluks unsatisfactory for want of rain.
Malabar		Standing crops second crop paddy ripening. Harvest paddy, outturn average. Fever in one and slight smallpox in eight taluks.
Travancore		Second crop paddy ripening. Smallpox in parts.
Bombay—(Jan. 12th)		
Karachi	At Sehwan on 9th 1·0	Weather cloudy. River at Kotri on 9th 3 feet 7 inches against 3 feet 10 inches on same date last year. Fever in twelve and cattle-disease in one taluka. Wheat, red rice and *bajri* in Karachi 24, 30 and 32 and in Kotri 24, 30 and 38 lbs. per rupee respectively.
Hyderabad	In Hyderabad on 10th ·93	Weather cloudy. Cotton crops injured by frost in Hyderabad, Mirpur, and Naushahro talukas, and *rabi* cultivation in Hyderabad, Guni, Badin, Tando, Bago, and Dero Mohbat talukas. River at Kotri on 10th 3 feet 9 inches against 3 feet 10 inches on same date last year. Fever in six, smallpox in one, and cattle-disease in two talukas. Wheat 25, *bajri* 37¼, *jowari* 41½, white rice 20, and red rice 28 lbs. per rupee.
Ahmedabad		Standing crops good. Public health good. Wheat 29 and *bajri* 33 lbs. per rupee.
Baroda		Public health fair. *Rabi* and *kharif* crops in good condition. *Bajri* 34, wheat 18, and rice 23 lbs. per British rupee.
Surat		Crops healthy. Reaping of *jowari* nearly completed. Fever, smallpox, and cough in Bardoli, and fever in Mandvi. *Jowari* 38 and *nagli* 48 lbs., per rupee.
Nasik	*Nil*	*Kharif* threshing in progress. *Rabi* sowing completed. Standing crops in good condition, except *alsi* (linseed) which is blighted throughout the district owing to cloudy weather. Public health generally good, except in Kalwan and Peint talukas, where ague and fever prevail. Wheat 25⅞, *bajri* 33 1/16 and rice 19 13/16 lbs. per rupee.
Colaba (Bombay)		Abnormal temperature *nil* on 5th, 1° warm on 6th, fell to 2° cool by 9th, and then rose to 1° cool by 11th. Vapour in air in excess of normal on 5th and 6th, in defect of normal on 7th to 9th, and normal on 10th and 11th. Wind normal.
Poona		*Rabi* crops, except gram, *kardi* and wheat which are slightly injured by blight and rust in Junnar, Indapur, Khed, and Bhimthari talukas, are doing well. Public health generally good. *Bajri* 43 and *jowari* 60 lbs. per rupee in the district, and *bajri* 37 and *jowari* 43 lbs. per rupee in Poona City.
Ahmednagar		Wheat and gram injured by clouds and late rain in eight talukas. Smallpox in Shrigonda. *Bajri* average 58 and *jowari* 68 lbs. per rupee.
Sholapur		Linseed, gram, and *kardi* and in places wheat and cotton crops suffering from blight. Some injury by rats to gram, wheat and *chaimug* in Pandharpur taluka, other *rabi* crops ar doing well. Public health good. *Jowari* 70½ and *bajri* 54½ lbs. per rupee.
Dharwar		Harvesting of rice and early *jowari* in progress. Indigenous cotton good, exotic cotton blighted in Bankapur. Wheat good, except in Nargund and Ron, where it is damaged by rats. Slight fever in Mugud, Mundargi, Hangal, Kalghatgi, and Kod. *Jowari* 59½ and rice 24½ lbs. per rupee.
Kanara		Harvest nearly completed. Second crop thriving in talukas below Ghâts. Slight fever in four and cattle-disease in three talukas. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot		General health fair. Measles in parts of Sorath and Haltar. Crops in good condition. Wheat 25, *bajri* 26, and *jowari* 35 lbs. per rupee.
		General Remarks.—Rain in parts of Sindh. Standing crops slightly injured by blight and rats in parts of the Deccan and of Dharwar and Bijapur and by frost in the Hyderabad district. Fever in parts of twelve, cattle-disease in parts of eight and smallpox in parts of four districts.
Bengal—(Jan. 12th)		
Chittagong (Jan. 11th)	0·03	Weather variable. Reaping of *aman* nearly over. Winter crops promising. Prices steady. Public health good.
Dacca	0·18	Winter crops doing well. Prospects good. Pressing of sugarcane has commenced. Planting of *boro* paddy going on. Sporadic cholera still prevailing.
24-Pergunnahs	1·28	Harvesting of *aman* still continues; outturn expected to be above the average. Prospects of winter crops favourable. Public health generally better than last week.
Khoolna	0·12	Weather cool. Harvesting of *aman* nearly finished; outturn good. Winter crops doing well. Public health has improved.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Moorshedabad	0·49	Weather seasonable. *Aman* is still being harvested; outturn good. Prospects of winter crops good.
Pubna	0·52	Weather seasonable. Crops excellent. *Aman* nearly harvested. Public health good.
Dinagepore	*Nil*	Weather clear and very cold. Prospects of *rabi* good. Harvesting of *aman* and sugarcane finished. Cholera reported from two thanas, and cattle-disease from one.
Rungpore	1·59	Weather very cold. Harvesting of *aman* nearly finished. Heavy hailstones on morning of 8th have done considerable damage to crops. Public health good.
Midnapore	0·72	Rice harvest nearly over; yield full average. Public health improving.
Burdwan	0·15	*Rabi* prospects good. Public health fair.
Bhagulpore	0·23	Rice harvest nearly completed. Outturn of *kurthi* rather short. *Rabi* crops benefited by rain. Public health good.
Monghyr		Prospects of poppy continue favourable. Rain on morning of 7th has done much good.
Purneah	*Nil*	Prospects of crops excellent. *Aghani* harvest nearly over; outturn good. Cutting of sugarcane and gathering of potatoes commenced. Health of people and cattle good.
Durbhanga	*Nil*	Harvesting of paddy almost finished. Prospects of *rabi* and poppy continue favourable. Prices stationary. Public health generally good.
Mozufferpore		Poppy in excellent condition.
Sarun		Weather favourable though cloudy. Prospects of poppy excellent.
Chumparun	*Nil*	Weather cloudy. Rice harvesting nearly completed. Poppy and *rabi* prospects favourable. Indigo fields being prepared. Prices stationary. Public health fair.
Patna	0·08	*Rabi* crops promising. Poppy and cotton look well. Public health good.
Gya	0·15	Prospects of *rabi* good. Condition of poppy generally good, but some damage has been done by grubs. General health good.
Shahabad		Damage to poppy apprehended from easterly winds and cloudy weather.
Hazareebagh	1·10	Rain in early part of week. Weather now clear and cold. Prospects of *rabi* excellent. Caterpillars reported to have appeared on poppy plants. Fever in places, otherwise general health good.
Cuttack	0·02	Reaping of rice continues with fair outturn. Price of rice falling Fever still prevals
		General Remarks.—Rain has fallen in most parts of the Lower Provinces, except North Behar, and has been very beneficial to *rabi* crops. In Rungpore hail has done damage to crops. In Gya, Shahabad, and Hazaribagh cloudy weather bringing caterpillars has been somewhat injurious to poppy; elsewhere this crop is in good condition. Rice harvest is almost closed with good general outturn. Transplanting of *boro* rice is in progress. Public health has generally improved, fever and cholera being less prevalent.
N.-W. Provinces and Oudh—		
Benares (Jan. 11th)	1·20 at Sadr	Weather very cold. Wind westerly. Agricultural prospects favourable, though peas, *kusum* and *arhar* have somewhat suffered from frost. Sugarcane being cut and pressed. Supplies plentiful. Slight rise in prices. Public health good. Some cases of cattle-disease are reported from the Sadr.
Gorakhpore („ 10th)		*Rabi* looking well. Prices stationary. Health fair. Some cases of cholera reported.
Fyzabad („ 11th)		Weather cloudy. Prospects of *rabi* crops good. Poppy plants coming on nicely. Cholera and cattle-disease in one tahsil.
Lucknow („ 10th)		Weather continues cloudy. Cold increasing. *Rabi* promisings Poppy looks well. Sugarcane pressing commenced. Supplies abundant. Prices fluctuating. Public health good. Slight cattle-disease.
Rai Bareli („ „)	·10	Weather cold and seasonable. *Rabi* prospects good. Irrigation going on. Supplies abundant. Prices rising. General health of people and cattle fair.
Pertabgarh („ 11th)		Propects generally good. Poppy is in a flourishing state. Prices stationary. Health of the people and cattle good.
Allahabad („ „)	Slight rain, averaging ·30 in five tahsils.	Weather cool with occasional clouds. Crops generally good Poppy flourishing. Markets well supplied. Prices almost stationary. Health generally good. A few cases of cattle-disease reported in Barah and Phulpur.
Cawnpore („ „)	·10 to ·30 in seven tahsils.	Weather cloudy. *Rabi* coming on well, Poppy healthy and vigorous everywhere. Prices steady. Cattle-disease in two parganas.
Farukhabad („ „)	*Nil*	Weather continues cloudy. *Rabi* prospects good. Poppy promises well. Prices steady. Health of people fair.
Sleeper („ „)	·20	Weather cloudy and cold. Irrigation of *rabi* pushed on. Poppy crops continue satisfactory. Markets well supplied, but prices have a tendency to rise. No disease.
Bareilly („ „)		Rain required. Crops including poppy doing fairly well. Health good.
Ballia („ 10th)		Weather clear and seasonable. Irrigation going on. Prospects favourable. Supplies ample. General health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Kumaon (Jan. 11th)	Good fall of rain	Weather cloudy. *Rabi* crops making progress. Prices stationary. Health good. Cattle-disease much on decrease.
Agra („ 10th)	Slight in two parganas on 5th.	Weather cloudy. Irrigation going on. Prices steady. Health good.
Jhansi („ „)	Average ·30	Weather cold. Hailstorm occurred in parganas Mau and Garotha, but no injury done. Gram and oil-seed flowering, the latter reported to have been slightly affected by blight.
Banda („ 11th)	On 5th, 6th, and 7th.	The rain did some good to *rabi* crops. Prices steady. Public health good. Cattle-disease in three villages.
Meerut („ „)	Good rain on 10th all over the district.	Rain most beneficial to crops on unirrigated lands. Supplies sufficient. Prices half a seer lower. Health good.
		General Remarks.—Rain has fallen in some districts benefiting standing crops. Prospects of *rabi* continue favourable. Poppy is flourishing. Markets well stocked though prices shew a tendency to rise. Public health good. Slight cattle-disease reported.
Punjab—(Jan. 12th)		
Delhi (Jan. 11th)	·10	Health good. Prices fluctuating. *Rabi* prospects good.
Hissar		Health good. Prices stationary.
Umballa	·20	Health fair. Prices rising. *Rabi* prospects fair. More rain wanted.
Jullundur	·10	Health good. Prices stationary. *Rabi* weedings commenced.
Amritsar		Health good. Prices stationary.
Sialkot	Slight rain	Health good. Prices rising. *Rabi* crops much benefited, but more rain wanted.
Ferozepore		Health good. Prices stationary. Rain wanted for *rabi* crops.
Lahore		Rain wanted. Health good. Prices stationary *Rabi* prospects good.
Rawalpindi		Health good. Prices rising. *Rabi* prospects average.
Mooltan		Health good. Prices stationary. *Rabi* crops flourishing.
Shahpur		Health good. Prices high and rising.
Dera Ismail Khan	Slight rain	Prices stationary. *Rabi* sowings completed.
Peshawar		Smallpox decreasing. Prices almost stationary. *Rabi* sowings good. Rain wanted.
		General Remarks.—Rain has fallen in the Delhi, Umballa, Jullundur, Sialkot, and Dera Ismail Khan districts, and is wanted in the Umballa, Sialkot, Ferozepore, and Peshawar districts. Smallpox decreasing in Peshawar, elsewhere health is good, except in Umballa where it is fair. Smallpox among sheep in Tahsil Khushab. Prices rising in Umballa, Sialkot, Rawalpindi, and Shahpur, fluctuating in Delhi; elsewhere they are stationary. *Rabi* progressing.
Central Provinces—		
Nagpur		Weather cloudy. Prospects of *rabi* favourable. Fever and cattle-disease in places. Prices steady.
Jubbulpore	·06	Weather cloudy. Crops thriving. Health fair. Prices rising.
Saugor (Jan. 11th)	Rain throughout district. Hail in places.	Health good. Prices steady.
Seoni	·11	Weather cloudy. Prospects of *rabi* crops good. Health good. Prices steady.
Bilaspur	·76	*Rabi* somewhat injured in places by hail. Cholera and fever in places.
Hoshangabad		*Rabi* thriving. Fever in places. Price of wheat slightly risen.
Khandwa	·05	Weather cloudy and close. Linseed attacked by rust in parts. Prospects of *rabi* good. Prices steady.
Raipur	·38	Weather cloudy and cool. *Kharif* threshing nearly completed. *Rabi* crops benefited by rain. Fever prevalent.
Sambalpur (Jan. 8th)	·18	Weather close. Rice threshing in progress. Cholera in places.
		General Remarks.—The weather continues cloudy, and there has been slight rain in most districts with falls of hail in two. *Rabi* crops have suffered slight damage from hail. Fever and cholera in places. Prices steady.
British Burma—		
(Jan. 12th.)		
Akyab (Jan 8th)	*Nil*	Some cases of cholera in town and district. Cattle healthy. Crops good. Reaping progressing.
Bassein	*Nil*	Some cholera in district. Slight cattle-disease in two townships. Reaping well advanced.
Rangoon	*Nil*	Four fatal cases of cholera in town, otherwise public health good.
Amherst (Moulmein)	*Nil*	Public health and health of cattle good. Reaping completed.
Tavoy (for weeks ending 1st and 8th.)	*Nil*	Public health and health of cattle good. Reaping and harvesting in progress.
Pegu	*Nil*	Public health and health of cattle good. Reaping progressing.
Henzada	*Nil*	Public health and health of cattle good. Reaping finished.
Prome	*Nil*	Public health and health of cattle good. Reaping almost over.
Toungoo	*Nil*	Public health and health of cattle good. Reaping progressing.
Thayetmyo	*Nil*	Two fatal cases of cholera in town. Cattle healthy. Reaping nearly finished.
		General Remarks.—Slight cholera in Akyab, Rangoon, Tharrawaddy, Bassein, and Thayetmyo districts. A little cattle-disease in two districts. Harvest over in Moulmein and Henzada, and well advanced elsewhere.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(Jan 12th)		
Gauhati (Jan. 11th)	1·07	Weather seasonable. Public health fair. Reaping of *sali* almost finished.
Sylhet	·04	Reaping of *sali* and *aman* finished. Transplanting of *bora* in the western part of the district continues. Crushing of sugarcane in progress. Prospects of tea and other winter crops favourable.
Cachar	1·28	Weather very cold. Prospects of winter crops good. Common rice 16 seers per rupee. Public health good.
Dibrugarh	1·20	Weather seasonable. Reaping of *sali* nearly finished. Prospects good, except in some parts of North Lakhimpur. Gathering of mustard commenced. Tea being pruned.
Mysore and Coorg—		
		General Remarks.—General prospects good.
Bangalore (Jan. 12th)		Standing crops in good condition, except in parts of the Tumkur district where blight has appeared. Prospects of season generally favourable. Public health good. Prices slightly risen in Bangalore, Kolar and Tumkur districts, and fallen in Mysore and Hassan districts.
Mysore		
Mercara („ „)		Weather favourable for rice harvest and coffee-picking. Prices slightly fallen.
Berar and Hyderabad—		
(Jan. 12th)		
Amraoti	·30	Weather cloudy. Threshing of *jowari* progressing. *Rabi* crops in good condition. Wheat 20 and *jowari* 26 seers per rupee.
Akola		Weather clear and cool. Threshing of *kharif* continues. *Rabi* doing well.

SUPPLEMENT TO

The Gazette of India.

No. 4.} CALCUTTA, SATURDAY, JANUARY 22, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

Irrigation.

ADMINISTRATION REPORT OF IRRIGATION WORKS IN THE MADRAS PRESIDENCY FOR 1885-86.

No. 11 I., dated Fort William, 21st January, 1887.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1885-86.

OBSERVATIONS.—The final grant and direct Capital outlay are compared below :—

	Number of works on which expenditure was incurred.	Final grant.	Expenditure.
MAJOR WORKS.		Rs.	Rs.
Productive Public Works	8	15,53,000	15,15,215
Protective Works (Rushikulya Project) . .	1	1,87,742	1,83,191
MINOR WORKS AND NAVIGATION.			
Ordinary Irrigation Works for which Capital and Revenue Accounts are kept . . .	11	5,58,171	6,13,815

The figures for Minor Works and Navigation include a grant-in-aid from Protective funds of Rs. 1,60,000 for the construction of the Buckingham Canal, which was fully utilized. There was short outlay on Productive Works owing to the prevalence of cholera in some districts, and to scarcity of labor in others.

2. The total of the direct and indirect Capital outlay on Productive Public Works amounted at the close of the year to Rs. 4,93,64,443, which includes a sum of nearly Rs. 41 lakhs on account of loss by exchange on the purchase-money of the Kurnool Canal; the gross revenue, after deducting the portion due to old irrigation, was Rs. 42,32,901; the maintenance and collection charges Rs. 13,84,194; the net revenue was therefore Rs. 28,48,707, giving a return of 5·77 per cent. on the Capital outlay. In the previous year the profit on outlay was 5·05 per cent. If the outlay on the Kurnool Canal, which is unremunerative, and on the Barur Tank, which is still under construction, were omitted, the profit for the year under review would have been 10·37 per cent. on the remaining Capital outlay.

There was an increase in the maintenance charges on the Godavari Delta for special repairs to the Gunnaram Aqueduct, and for general improvements to the works of the Cauvery Delta System.

3. In the following table are given the more important items of information for the Productive Irrigation Works in operation:—

Systems.	Capital outlay, direct and indirect.	Acres irrigated.	Revenue from all sources.	Charges including collection.	Net revenue.	Percentage of Net Revenue on Capital outlay.
	Rs.		Rs.	Rs.	Rs.	
Godavari Delta	1,21,67,097	588,381	19,35,754	6,84,040	12,51,714	10·29
Kistna	75,55,996	330,213	11,99,347	3,67,093	8,32,254	11·01
Cauvery	16,59,254	1,005,379	7,33,005	86,183	6,46,822	38·98
Penner Anicut	16,81,289	63,800	1,32,261	18,532	1,13,729	6·76
Srivaikuntham	14,12,187	42,205	1,15,613	24,763	90,850	6·43
Kurnool Canal	2,16,59,353	22,801	85,000	1,96,420	—1,11,420	—0·51
Sangam Anicut	29,82,094	45,444	31,921	7,163	24,758	+0·83

With the exception of the Kurnool, there was an increase in the area irrigated by all the systems classed as Productive. The seasons were favorable to irrgation, and the increase in net revenue is satisfactory. The Sangam Anicut system is now shown for the first time as in operation.

The increase in irrigated area amounted to 304,528 acres, and in net revenue to Rs. 6,62,063.

4. Similar information is given in the statement below for Ordinary Irrigation Works for which Capital and Revenue Accounts are kept:—

Systems.	Capital outlay, direct and indirect.	Acres irrigated.	Revenue from all sources.	Charges including collection.	Net Revenue.	Percentage of Net Revenue on Capital outlay.
IMPERIAL.	Rs.		Rs.	Rs.	Rs.	
Chambrambakam Tank	7,36,589	17,623	36,784	18,319	18,465	2·50
Palar Anicut	17,40,398	88,788	1,23,755	65,516	58,239	3·34
Pelandorai Anicut	4,16,899	3,115	3,938	34,063	—30,125	—7·22
PROVINCIAL.						
Madras Water-supply	17,54,045	8,754	12,405	1,71,547	—1,59,142	—9·07
Buckingham Canal	62,69,928	*Nil*	54,598	1,34,454	—79,861	—1·27

The returns from Ordinary Irrigation Works, classed as Imperial, were less by Rs. 53,993 than in the previous year, owing to large expenditure on special repairs at the Chambrambakam Tank and Palar Anicut. There was also a decrease of 1,414 acres in the area watered by these works.

From Provincial Works under the same main head of charge, the deficit was greater than in the previous year. This was due to exceptional charges for repairs to the Red Hills Tank in connection with the Madras Water-supply project, and for repairs to the Buckingham Canal which had been seriously damaged by floods in the previous year. The revenue collected from the Madras Water-supply was Rs. 759 less, and from the Buckingham Canal Rs. 7,405 more than in 1884-85—there was an increase in traffic, but the increase in revenue from this canal was principally under the head of wharfage collections.

5. The River Godavari was above the crest of the Dowlaishweram Anicut from the 18th June 1885 to the 1st March 1886. A flood on the 22nd July 1885 rose to a height of 11·5 above the crest of the anicut, and although by no means an unusual flood, it either overtopped or breached several embankments and caused considerable damage. It had not been possible to complete the improvements to the Gunnaram Aqueduct in the Central Delta before the commencement of the irrigation season, and a length of 200 feet of the right hand trough wall gave way on the 16th July. Temporary repairs were executed and navigation was resumed on the 4th August.

6. At the Kistna the river topped the anicut on the 5th June, a month earlier than in the previous year. The floods were moderate, the greatest height was attained on the 7th October, when the water rose to 14 feet over the crest of the anicut. The supply was unequal to the requirements of the canals for a fortnight in September. The canals worked well.

7. The following table compares the navigation receipts and charges for the present and past years on the Godavari and Kistna Canals:—

Year.	Canals.	Receipts.	Charges.	Balance.
		Rs.	Rs.	Rs.
1884-85	Godavari	80,730	1,47,261	—66,531
	Kistna	19,160	61,819	—42,659
	Total	99,890	2,09,080	—1,09,190
1885-86	Godavari	89,976	78,413	11,563
	Kistna	26,650	67,079.	—40,429
	Total	1,16,626	1,45,492	—28,866

There is a satisfactory increase in receipts on both systems.

8. The Cauvery System has now fully recovered from the effects of the bad season of 1884-85. The season of 1885-86 was an ordinary one. Between the 26th June and the end of December 1885 the water flowed over the crest of the anicut for 74 days.

9. The result of the working of the Penner Anicut System was good. There were no high floods, and the supply to the canals was not always good. Several of the tanks breached from want of sufficient escapes.

10. The seasons were favorable for irrigation at the Srivaikuntham and Sangam Anicut Systems; but there was a decrease both in area irrigated and revenue assessed to the Kurnool Canal; it is mentioned that the Sunkesala Anicut was breached by an unprecedented flood, and that it has been decided to lower its crest by 3 feet with the object of lessening the strain on the work.

11. The net receipts from the Chambrambakam Tank were reduced by the increased expenditure on special repairs. The area irrigated was about the same as in previous years. The above remarks apply equally to the Palar Anicut System where considerable expenditure was incurred in repairs to the anicut and to several of the tank bunds which had been severely damaged by floods and heavy rain in 1884. At the Pelandorai Anicut also the exceptional floods of the same year severely damaged the anicut, the repairs of which were debited to the maintenance grant, and thus increased the deficit of previous years.

12. The final grant for Minor Works and Navigation, for which neither Capital nor Revenue Accounts are kept, was Rs. 17,97,240, and the direct expenditure Rs. 17,91,445. Of this sum Rs. 3,50,472 was spent on the old maintenance charges of works for which Capital and Revenue Accounts are kept, Rs. 1,83,690 on extensions and improvements, Rs. 3,34,975 on "Tank Maintenance" schemes, and the remainder Rs. 9,22,308 on repairs and establishment. The total expenditure was Rs. 1,48,159 less than in the previous year. The area irrigated was 2,590,106 acres of rice in the first crop and 779,698 acres in the second crop; the share of revenue credited to Irrigation for both crops was Rs. 86,28,335.

Excluding the old maintenance charges for works for which Capital and Revenue Accounts are kept, the expenditure amounted to 16·70 per cent. on the Irrigation receipts. In 1884-85 the percentage was 19·51.

13. The direct outlay on agricultural works in 1885-86 was Rs. 3,91,306, and the allotment Rs. 4,16,060. The outlay in 1884-85 was Rs. 4,15,131.

14. The final grant for Protective Works amounted to Rs. 3,47,742. The expenditure on the Rushikulya Project was Rs. 1,83,191 and on the Buckingham Canal Rs. 1,60,000, and the total outlay during the year Rs. 3,48,191.

15. The expenditure on the Tank Maintenance scheme was nearly equally divided between the execution of works on sanctioned estimates and the investigation of new proposals. Considerable progress was made on works in the Madura and Chingleput Divisions, and estimates had been sanctioned for the Kurnool Division, but too late for work to be commenced during the year under review.

16. The average rainfall on the whole Presidency was 32·42 inches against 37·60 inches in 1884-85, the distribution of the rainfall was more equal over the country and between the seasons, being 18·14 inches in the north-east and 14·28 inches in the south-west monsoons. The accidents to the Irrigation Works during the year were few and of no great importance.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Government of Madras for information.

Also, that a copy of the Resolution be forwarded to the Local Governments and Administrations marginally noted, for information.

The Governments of Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department.
The Chief Commissioner of the Central Provinces.
The Agent to the Governor General for Rajputana.

Also, that a copy be forwarded to the Publisher of the *Gazette of India*, for publication in the Supplement to the *Gazette*.

R. HOME, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 20th January, 1887.

J. WESTLAND,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 19th JANUARY 1887.

GENERAL REMARKS.—Rain has fallen generally throughout the N.-W. Provinces and Oudh, Punjab, the Central Provinces and Central India and Rajputana. In parts of Bengal and in Assam and Sind slight showers have also occurred.

Except in Sind the *kharif* harvest has come to a close in all parts of the country, and threshing operations are in progress. The recent rainfall has been of considerable benefit to the *rabi*, which is generally in excellent condition throughout the country. In the northern districts of the Central Provinces alone some damage to the crops is apprehended in consequence of the late heavy rain.

In Madras the paddy harvest still continues and general prospects are good. In Mysore and Coorg the outlook is favourable.

The rice harvest in Bengal is nearly finished with a good outturn, and in Lower Burma the reaping of the crop is well advanced.

Poppy continues to come up well in the N.-W. Provinces and Oudh, but in Bengal the crop has been injured in places by rain.

The coffee harvest is in progress in Coorg.

The public health is generally good in all Provinces.

Prices are rising in four and fluctuating in two districts of the Punjab and are falling in Coorg. Elsewhere they remain generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 19th)		
Bellary		Standing crops generally fair, but in parts *dhall* affected by insects, cotton and wheat by disease, and white *cholum* withering from want of rain. Harvest wet and dry crops, yield nearly average. Fever in two and cattle-disease in four taluks.
Kurnool		Standing crops good. Harvest paddy, outturn average. Smallpox in three and cattle-disease in four taluks.
Ganjam	Average '01	Smallpox and fever in four divisions. Slight cattle-disease in one taluk. Cholera exists.
Kistna		Standing crops generally good. Harvest paddy, outturn below average. River 31 feet over anicut. Fever and cholera exist in parts; cattle-disease in three taluks.
Chingleput (Madras)		Standing crops generally fair. Harvest paddy and *varagu*, outturn below average. Smallpox in one and cattle-disease in four taluks.
Coimbatore		Standing crops generally good, but in want of rain in five taluks. Harvest wet and dry grains, outturn irrigated crops in parts average and in others above average, unirrigated crops poor. Smallpox and fever in two taluks.
Tanjore		Standing crops generally good, but in parts require rain. Harvest paddy and *varagu*, outturn up to average. Cattle-disease in two taluks.
Madura		Standing crops in parts of four taluks withering from want of rain. Outturn, where harvested, unsatisfactory. Harvest paddy.
Malabar		Standing crops second crop paddy ripening. Harvest paddy, outturn average. Fever in one and slight smallpox in nine taluks. Cattle-disease in one.
Travancore		Harvest of second crop paddy begun in parts. Smallpox and slight fever.
		General Remarks—General prospects good.
Bombay—(Jan. 19th)		
Karachi	During week ending 17th— In Karachi ·88; in previous week 1·23; average of 12 other stations ·80. In 10 talukas, average 76.	River at Kotri on 16th 3 feet 8 inches against 3 feet 6 inches on same date last year. Fever in eleven and cattle-disease in one taluka. Wheat, red rice and *bajri* in Karachi 24, 30 and 32, and in Sehwan 28, 38 and 40 lbs. per rupee, respectively.
Hyderabad		*Kharif* harvesting still continues. Cotton cultivation damaged by frost in Hyderabad and Hala talukas, and *rabi* cultivation at Kotri on 16th 3 feet 9 inches against 3 feet 6 inches on same date last year. Fever in nine and cattle-disease in three talukas. Weather cold and cloudy. Wheat 25, *bajri* 36, *jowari* 40, white rice 20 and red rice 30 lbs. per rupee.
Ahmedabad	Slight showers in Dholka and Dhandhuka talukas.	Crops good. Public health good. Wheat 30 and *bajri* 33 lbs. per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda		Publichealth fair. *Rabi* and *kharif* crops in good condition. *Bajri* 23, wheat 19 and rice 23 lbs. per British rupee.
Surat		Crops healthy. Reaping of *jowari* nearly completed. Slight fever in Bardoli and Mandvi. *Jowari* 40 and *nagli* 44 lbs. per rupee.
Nasik		*Kharif* threshing in progress. *Rabi*, wheat, gram and linseed sowing completed. Standing crops in a flourishing condition except *alsi* (linseed). Public health generally good in all talukas, but in Kalwan and Peint talukas ague and fever prevail. Wheat 25¾, *bajri* 36$\frac{10}{16}$ and rice 20$\frac{13}{16}$ lbs. per rupee.
Colaba (Bombay)		Abnormal temperature 1° cool on 12th and 13th, 1° cool on 14th and 15th and *nil* from 16th to 18th. Vapour in air excessive on all days except 14th and 15th, on which it was defective. Abnormal wind southerly on 7th and 13th, northerly on 14th, and normal on all other days.
Poona		*Rabi* crops in good condition. In Purandhar taluka *jowari* and gram are blighted and wheat is suffering from rust. Threshing of rice has commenced in Petha Dhelshi. Public health generally good. Slight cattle-disease in Indapur taluka. *Bajri* 44 and *jowari* 60 lbs. in the district, and *bajri* 37 and *jowari* 45 lbs. per rupee in Poona City.
Ahmednagar		*Rabi* crops generally injured. Smallpox in Shrigonda. Slight cattle-disease in Newasa. *Bajri* average 57 and *jowari* 68 lbs. per rupee.
Sholapur		Linseed, gram, *kardi* and in places wheat, *tur* and cotton crops blighted; some injury by rats to gram and wheat crops in the Madha and Pandharpur talukas; other *rabi* crops good on the whole. Public health good. *Jowari* 69¾ and *bajri* 54¼ lbs. per rupee.
Dharwar		Harvest of rice and early *jowari* in progress. Indigenous cotton generally good, exotic cotton blighted in Hubli, Gadag, Bankapur and Ron; wheat blighted in Dharwar, Hubli, Nawalgund and Gadag. Slight fever in Mugud, Mundargi, Hangal, and Kod. Rice 24¾ and *jowari* 60¾ lbs. per rupee.
Kanara		Harvest completed above Ghâts. Second crop on coast doing well. Slight fever in four and cattle-disease in three talukas. Common rice in Karwar and in district, average 13 seers per rupee.
Rajkot		Weather cold. Wheat crops blighted in some places. Prevailing diseases: measles, fever, bowel and respiratory complaints. Wheat 24, *bajri* 25 and *jowari* 31 lbs. per rupee.
		General Remarks.—Slight rain in parts of Sind, Gujarat and Khandesh; other conditions unchanged. Fever in parts of twelve, cattle-disease in parts of ten and smallpox in parts of two districts.
Bengal—(Jan. 19th)		
Chittagong (Jan. 18th)	*Nil*	Weather seasonable. Harvesting of *aman* nearly completed. Winter crops doing well. Prices steady. Public health good.
Dacca	*Nil*	Winter crops thriving. Mustard being gathered. Cutting of sugarcane going on. Cholera decreasing in Munshigunge. Public health good.
24-Pergunnahs	*Nil*	*Aman* harvest nearly over; outturn above the average. Prospects of *rabi* crops satisfactory. Public health generally good.
Khoolna	*Nil*	Weather cool. *Aman* harvest nearly completed; outturn good. Winter crops doing well. Public health has improved.
Moorshedabad	Slight rain in Sadr and Jungipore subdivisions.	Weather cool and cloudy. Prospects of crops good.
Pubna	*Nil*	Weather seasonable. Crops doing well. Public health good.
Dinagepore	No rain at sadr stations, but hailstorms and rain fell in many places.	Much wind. Prospects of *rabi* crops good. Cholera reported from two thanas, and cattle-disease from south and west.
Rungpore	*Nil*	Weather cold. Tobacco and other winter crops injured by recent hail. Harvesting of *aman* finished. Sugarcane being cut. Public health good.
Midnapore	*Nil*	Prospects of *rabi* fair. Public health normal.
Burdwan	*Nil*	*Rabi* prospects good. Public health fair.
Bhagulpore	0·17	Weather cloudy with slight rain. Rice harvest complete. Rain has done good to *rabi*. Public health good.
Monghyr	Rain	Rain of the week has done much good to poppy. Weather now fine and prospects continue fair.
Purneah	0·20	Prospects of crops excellent. *Aghani* harvest almost over; outturn good. Harvesting of sugarcane and potato has commenced. Public health good.
Durbhanga	0·23	Paddy harvest completed. Prospects of *rabi* and poppy continue favourable. Poppy in flower. Lands being prepared for indigo. Prices stationary. Public health good.
Mozufferpore		Poppy not very promising owing to unsettled weather and caterpillars.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Sarun		Weather favourable. Poppy much benefited by rain and gives excellent prospect.
Chumparun	0·06	Prospects of poppy and *rabi* continue favourable. Indigo fields being prepared. Prices stationary. Public health fair.
Patna	0·43	Prospects of *rabi* and poppy favourable. Pea and *rahar* in pod. Cotton looks well. Public health good.
Gya	0·64	Rain on 13th and 14th. Weather has since cleared up. Poppy reported to be damaged, but prospects still fair. *Rabi* crops good. Public health good.
Shahabad		Rain and hail have done some damage to poppy. Caterpillars have appeared. Crop backward.
Hazareebagh	0·37	Rain in early part of week. Weather now clear and cold. Caterpillars have attacked poppy crop. *Rabi* prospects excellent. General health good.
Cuttack	*Nil*	*Sarad* rice being threshed. *Dalua* rice growing well. Price of rice unchanged. Public health good. Fever decreasing.
		General Remarks.—Rain reported in Behar and Chota Nagpore and in parts of Moorshedabad and Dinagepore. It has been generally very beneficial to *rabi* crops, but is stated to have been injurious to poppy in Mozufferpore, Gya, Shahabad and Hazaribagh. *Aman* harvest is nearly finished with good outturn. Public health is generally fair, fever and cholera having abated.
N.-W. Provinces and Oudh—(Jan. 19th)		
Benares (Jan. 18th)	Average ·90	Weather very cold with westerly wind. *Kharif* cutting completed, outturn average. *Rabi* prospects fairly good, but crops have been slightly damaged by frost and blight. Markets are well stocked, but prices fluctuate but slightly. The public health is good, but cases of cattle-disease continue to be reported from the Sadr Tahsil.
Gorakhpore („ 17th)		*Rabi* looking well. Blight due to cloudy weather appearing in some places. Prices stationary. Health fair.
Fyzabad („ 18th)		Weather clear and seasonable. Irrigation going on. Prospects of *rabi* crops good. Supplies ample. Cholera and smallpox in two tahsils.
Lucknow („ 17th)	·30	Prospects of *rabi* good. Poppy plants look healthy. Supplies abundant. Prices variable. Public health good.
Rai Barelli („ „)	·30 to ·70	Weather continues cloudy and cold. Slight hailstorm without injury in tahsils Solon and Dalmau. *Rabi* crops generally good, except mustard which has been injured in some places by an insect called *mahu*. Supplies abundant. Prices almost stationary. General health of people and cattle good.
Pertabgarh („ 18th)		The rain during the week has been beneficial to all crops, and if the west winds and sunny weather continue, there will be no *girwi* or rust. Prices stationary. Health of people and cattle good.
Allahabad („ „)	·70 to 2·10	Weather very cold all over district owing to rain and cloudy weather. The *sarson* crop has been attacked in places by *girwi*. Gram, peas, linseed and wheat flowers have also suffered. Markets fallen. Prices show a slight rise. Health generally good.
Cawnpore („ „)	In all tahsils from ·60 to 1·40	Weather cloudy. *Rabi* much benefited. Poppy healthy and vigorous everywhere. Prices stationary. Cattle-disease in two parganas.
Farakhabad („ „)	Rain has fallen in all tahsils.	The rain has benefited the *rabi* crops. Prospects good. Poppy expected to yield an average outturn. Markets well supplied. Health fair.
Sitapur („ „)	General rain	The rain will be most beneficial to the *rabi* and poppy crops. Prices stationary. No disease.
Bareilly („ „)	·10 to 2·0	Rain very beneficial to crops. Markets steady. General health good.
Ballia („ 17th)	A light shower on 14th.	Weather very cold with westerly wind. Prospects generally favourable. Sugarcane pressing is in active progress. Markets well stocked. Public health good.
Kumaon („ 18th)	Rain and snow during week.	Weather cloudy. *Rabi* crops making good progress. Prices stationary. Health good. Cattle-disease continues.
Agra	In all parganas from ·10 to 1·30. ·90	Weather continues cloudy. Prospects favourable. Prices rising slightly. Health good.
Jhansi (Jan. 17th)		Hailstorm reported in pargana Jhansi. Enquiry into damages being made. Grain slightly affected by blight.
Banda („ 18th)	Good and general rain.	*Rabi* prospects continue fair. Prices steady. Public health good. Cattle-disease in one village.
Meerut („ „)	Heavy storm on the 13th. Good rain all over district.	*Rabi* crops greatly benefited. Supplies ample. Prices stationary. Health of men and cattle good.
		General Remarks.—Rainfall has been general in the Provinces, and crops have benefited thereby. Hail has fallen in some places. The cloudy weather which prevailed during the week has caused blight to crops in a few districts. Prospects continue, however, to be favourable. Markets are fully supplied and prices fairly steady. Public health good. Slight cattle-disease reported.
Punjab—(Jan. 19th)		
Delhi (Jan. 18th)	·60	Health good. Prices fluctuating. *Rabi* prospects good.
Hissar		Rain much needed. Health good. Prices rising.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Umballa	·70	Health fair. Prices rising. *Rabi* crops average.
Jullundur	·80	Health good. Prices stationary. *Rabi* crops good.
Amritsar (Jan. 18th)	·90	Health good. Prices stationary.
Sialkot	1·60	Health good. Prices stationary. *Rabi* crops good.
Ferozepore	·30 at Sadr	Health good. Prices stationary. *Rabi* crops good.
Shahpur	. . . .	Health good. Prices high and stationary. *Rabi* crops suffering from want of rain.
Rawalpindi	·50	Health good. Prices risen. *Rabi* crops average.
Mooltan	Slight	Health good. Prices fluctuating.
Dera Ismail Khan	·27	Health good. Prices stationary. *Rabi* crops improved.
Peshawar	·10	More rain wanted. Prices rising. *Rabi* crops good on irrigated, and below average on unirrigated lands.
		General Remarks.—Rain has fallen in all districts except Hissar and Shahpur, and is wanted in the Hissar, Shahpur and Peshawar districts. General health good. Smallpox among sheep in tahsil Khushab and Shahpur district. Prices rising in Hissar, Umballa, Rawalpindi and Peshawar, fluctuating in Delhi and Mooltan, elsewhere stationary. *Rabi* prospects good, except in Shahpur where crops are suffering from want of rain.
Central Provinces—		
Nagpore (Jan. 18th)	. . . .	Weather clear and cold. Wheat good. *Tur* slightly injured by insects. Fever and cattle-disease prevalent.
Jubbulpore („ „)	3·77	Rain unseasonable. Damage to crops apprehended. Health fair. Prices high.
Saugor („ „)	3·33	Heavy rain and hail on the 13th. Damage to crops reported. Health good. Prices unchanged.
Seoni („ „)	·80	Weather cloudy. Hail in places. Slight damage done. Linseed attacked by blight. Health good. Prices steady.
Hoshangabad	·43	Slight hail. Some injury from rust and cloudy weather. Fever continues. Prices of wheat fallen and *juar* risen.
Khandwa	·02	Weather fairly clear and cool. Recent rain has injured linseed. *Rabi* prospects otherwise good. Prices stationary.
Raipur	. . . .	Weather clear and cool. Wheat and linseed blighted in places. Slight fever and cattle-disease.
Bilaspur	·08	*Rabi* somewhat injured by clouds and hail. Fever and cattle-disease in places.
Sambalpur (Jan. 15th)	. . . .	Weather cloudy and close. Sugarcane pressing and rice threshing continue. Cholera in places.
		General Remarks.—There has been heavy rain in Northern districts which is likely to damage *rabi* crops. Weather elsewhere seasonable and prospects good. Fever in places. Prices generally steady.
British Burma—		
(Jan. 19th)		
Akyab („ 15th)	*Nil*	Some cases of cholera in town and district. Cattle healthy. Crops good. Reaping nearly completed.
Bassein	*Nil*	Public health and health of cattle good. Reaping continues.
Rangoon	*Nil*	Three fatal cases of cholera, otherwise public health good.
Amherst (Moulmein)	*Nil*	Public health and health of cattle good.
Tavoy	*Nil*	Public health and health of cattle good. Reaping and harvesting in progress.
Pegu	*Nil*	Public health and health of cattle good. Reaping nearly finished.
Henzada	*Nil*	Public health and health of cattle good.
Prome	*Nil*	Public health and health of cattle good.
Toungoo	*Nil*	Public health and health of cattle good. Reaping progressing.
Thayetmyo	*Nil*	One fatal case of cholera in town, otherwise public health good. Cattle healthy. Reaping finished.
		General Remarks.—A few cases of cholera in four and slight fever in one district. A little cattle-disease in one district. Harvest generally well advanced.
Assam—(Jan. 19th)		
Gauhati	·09	Weather cloudy and windy. Public health fair. Reaping of *sali* almost finished. Gathering of mustard commenced.
Sylhet	·15	Insects have done some damage to mustard and linseed in South Sylhet, otherwise state and prospects of the crops good.
Cachar	·15	Weather very cold. Prospects of winter crops good. General health good. Common rice 15½ seers per rupee.
Dibrugarh	*Nil*	Weather seasonable. Reaping of *sali* over. Gathering of mustard progressing. Public health good.
Mysore and Coorg—		
(Jan. 19th)		
Bangalore, Mysore	. . . .	In parts of the Tumkur district the paddy crop is reported to be affected by blight, elsewhere standing crops in good condition. Prospects of season continue favourable. Public health good. No material change in prices.
Mercara (Jan. 19th)	. . . .	Harvesting of coffee and rice in progress. Season favourable. Prices slightly fallen.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad—		
(Jan. 19th)		
Amraoti	. . . .	Weather clear. Threshing of *kharif* crops approaching completion. *Rabi* prospects good. Wheat 20 and *jowari* 26 seers per rupee.
Akola	. . . . .	Weather clear. Threshing of *jowari* in progress. *Rabi* doing well.
Hyderabad	. . . . .	Weeding of *tabi* crop continues. *Rabi* crop prospering. Fever prevails in a slight form; cattle-disease also prevalent. Prices—wheat 13¾, coarse rice 12, white *juar* 21, yellow *juar* 22, and *tur* 14 seers per current sicca rupee.
Central India States—		
(Jan. 19th)		
Indore	. . . .	Health good. Weather warm. Strong westerly breezes.
Morar (Gwalior)	·73 (Total 29·88)	Health and prospects good.
Neemuch	. . . .	Weather clear. Prices slightly rising. Agricultural prospects and health good.
Goona	·32	Hailstorm reported from Umri and Bhadora. Health good.
Sutna	4·32	
Agar	Slight showers	Health and prospects good.
Sehore	. . . .	Weather clear and cold. Crops good.
Nowgong	1·04 (Total 44·81)	Weather cold. Prospects fair. Health good. Prices rising.
Bhopawar	. . . .	Crops flourishing. Weather fair. Opium doing well. Health good. Prices steady.
Rajputana—(Jan. 19th)		
Harowti („ 17th)	Week ending 15th— At Shahpura ·08 Previous week at Deoli ·13 Tonk ·24	Weather partially cloudy. Health and prospects good.
Jhallawar („ „)	·63	Weather cold. Smallpox in Shahabad still prevalent.
Kotah („ 15th)	·15	Health good. Crop prospects favourable. Prices rising. Weather sesonable.
Ajmere („ 18th)	Hail in some parts of Merwara.	No damage to crops. General health fair. Prices stationary.
Bhurtpore („ „)	·40	Crop prospects improved. Health good.
Ulwar („ „)	Average ·37	Weather cloudy. Health good. Prospects fair.
Dholpore („ „)	Week ending 15th— Average ·30	Tanks and wells low. Crop prospects fair. Health good. Prices stationary. Weather cold.
Bikanir („ 15th)	·32 Slight rain in two districts.	Weather cold. Prices stationary.
Abu	. . . .	Weather cloudy. Health good.
Sirohi (Jan. 17th)	Heavy thunderstorm; ·17 on 13th.	Since 13th weather clear and colder. Tanks drying. Wells good. Health and crop prospects good.
Marwar („ 16th)	·24 on 13th	Weather cloudy. Cold intense. Tanks almost full. Health and crop prospects good. Prices rising.
Nepal—(Jan. 14th)		
Khatmandu (Jan. 14th)	Drops . . .	Prospects fair. Prices still high.

General Matters.

REPORT OF THE OPERATIONS OF THE POST OFFICE OF INDIA FOR THE YEAR 1885-86.

No. 248, Calcutta, the 18th January 1887.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ—

Report on the operations of the Post Office of India for the year 1885-86.

RESOLUTION—The share of the cost of the European Mail Service payable by India was £68,000, a slight reduction on the amount paid in the four preceding years, £70,000. The cost to India will remain at £68,000 till the Contract with the Peninsular and Oriental Steam Navigation Company now in force terminates. Under the new Contract which has been arranged with the same Company, and which will come into operation from the 1st February 1888, India's share of the cost will, it is estimated, be reduced to £49,000.

2. The mail steamers arrived in Bombay behind contract time on ten occasions against five in 1884-85: the delay in arrival was, in every case in which it exceeded a few minutes, due to the Company having been compelled to convey the mails by the Suez Canal or to quarantine difficulties. On the other hand, the mails reached Bombay on Monday, the day before the prescribed date, 31 times.

3. A direct parcel exchange with the British Post Office was brought into operation during the year for parcels not exceeding 7lbs. in weight

without interfering with the arrangement with the Peninsular and Oriental Company which has been in force since 1873, under which parcels not exceeding 50lbs. in weight are carried by the Company.

4. Postal conventions were concluded with the Native States of Gwalior, Nabha, and Jhind.

5. The number of post offices was increased by 361, from 6,488 to 6,849. The new offices were mainly village post offices. In addition to this increase a considerable economy was effected by substituting offices of this class for 742 of the more expensive sub-offices. The economical system of employing extra departmental agency in village post offices was also continued.

6. The number of letter boxes rose from 8,731 to 9,056 and of village postmen from 4,039 to 4,253.

7. The length of the postal communications was considerably increased: —

Railway lines from	11,632	to 11,862	miles
Mail cart, horse and camel, from	4,049	„ 4,227	„
Runner and boat from	34,482	„ 35,281	„
Sea and river steamer from	10,725	„ 11,117	„

the total increase being 1,599 miles.

8. The total number of articles conveyed by the post offices was 239 millions as against 217 millions in the previous year. This increase is distributed over all the various classes of articles, the rate of increase being largest for postcards, 20·85 per cent., and newspapers, 16·19 per cent. Though the number of parcels increased by 10·31 per cent., the revenue fell off by nearly one lakh, the reason being that railways now compete successfully with the post office for the carriage of heavy parcels and the increase in the post office parcel traffic is entirely confined to the less profitable light parcels. The number of Foreign parcels increased from 110,590 to 133,054, and the revenue therefrom from R1,57,159 to R1,64,044.

9. The returns of the work of the Dead-Letter Offices show a slight diminution in the proportion of articles which could not be disposed of either by redirection or by return to the senders.

10. The value of ordinary postage stamps, envelopes, and post-cards sold rose from R54,06,022 to R69,16,791, and of service stamps from R16,08,805 to R17,11,990. A considerable portion, however, of the increase in the sale of ordinary stamps was due merely to a change of system, which was in force for part of the year, in realising postage on parcels by means of stamps instead of in cash.

11. The experiment of making money orders available for payment of land revenue proved successful, and has since the year ended been extended to other districts in the North-Western Provinces and to some districts in Bengal.

12. The success of the system of paying money-orders at the houses of the payees is also reported. The convenience to the public is immense, and the amount of embezzlement by postmen was very small, the risk to which the system is exposed having thus, so far, proved of less magnitude than might have been anticipated.

13. Telegraphic money-orders introduced in October 1884 also give promise of being fairly popular: 12,490 orders for R8,34,371 were issued, the figures for six months of the previous year being 5,788 and R3,75,530.

14. The rate of growth of the inland money-order business continues. Over 4 millions of money-orders for 938 lakhs of rupees were issued. A satisfactory feature in the increase is that the number of orders is increasing faster than the value, and the average value of each order consequently becoming smaller. The average value was R22-8-7 against R23-1-9 in 1884-85, more than three-quarters of the orders issued were for sums not exceeding R25. These facts indicate clearly that the money-order system meets a want which could not be supplied by private banks or other remitting agencies.

15. The number of money-order offices was increased during the year by 1,178, from 5,657 to 6,835.

16. The Foreign money order transactions are exhibited below :—

	Issued.		Paid.	
	Number.	Amount.	Number.	Amount.
In Sterling—		£		£
1884-85	42,294	170,864	5,201	23,160
1885-86	46,395	191,057	7,571	37,992
In Rupees—		R		R
1884-85	1,510	1,21,142	11,727	6,33,091
1885-86	1,940	1,50,721	14,437	7,07,518

17. The sales of India Postal Notes declined considerably. As the experience of the four years, during which these notes have been sold, showed that they are not popular, and do not meet any real want of the people of India, while their sale involves some expenditure, their sale has now been abandoned.

18. British Postal Notes have also as yet failed to prove popular. The number sold was only 15,910 for £11,309 against 8,296 for £5,786 in the six months of 1884-85 during which these notes were sold.

19. The total balance in the Post Office Savings Bank was 225½ lakhs at the end of the year as against 134¼ lakhs at the beginning, and the number of depositors 155,009 as against 122,599. This large increase is partly due to the transfer of accounts from the District Savings Banks consequent on the announcement that those Banks were to be closed from 1st April 1886. The number of banks and sub-banks was 5,833 on 31st March 1886, 334 having been opened during the year.

20. The business done in insured letters and parcels again shows a falling off. The total value of the letters and parcels insured was R6,97,78,483—a substantial amount—but hardly in excess of that for the year 1879-80, the second complete year after the introduction of the system, and lower than that of any subsequent year. The Director General attributes the decline to the stoppage of insurance between India and the Persian Gulf and Turkish Arabia.

21. The popularity of the value-payable system continues unabated. The number of articles sent by value-payable post was 436,115 and the declared value R45,32,803.

22. The number of complaints by the public rose from 6,511 to 7,684: a considerable portion of the increase was due to sudden changes of addresses in consequence of the Rawalpindi Durbar, the Delhi Camp of Exercise, the preparations for war on the North-West Frontier, and the military operations in Burma. Of the complaints, 336 related to the loss of registered letters and parcels: in 173 of these cases inquiry proved that the postal officials were not in fault: in 81 that the postal officials were in fault; and in 82 no definite conclusion was reached.

23. The number of offences by postal officials was 254, ten more than in 1884-85. In 67 of these cases the officers concerned were punished departmentally and in 187 by the Criminal Courts.

24. There was a decrease in the number of mail robberies from 26 to 14.

25. The revenue and expenditure classed in the Public Accounts under the head of Post Office are as follow :—

	Revenue.	Expenditure.
	R	R
1884-85	1,04,71,299	1,27,04,540
1885-86	1,11,30,863	1,30,26,036

26. There are, however, as the Director General correctly remarks, several items of revenue and expenditure classed under other heads of the Public Accounts which arise in connection with the Post Office and must be taken into account in preparing any statement of its financial results as a working Department. A statement of this kind finds a fitting place in the Annual Report of the Post Office, and it is in that Report and not in the Public Accounts, which are necessarily constructed on a principle of wider application, that such information is to be looked for. The orders of the Secretary of State, which the Director General quotes in paragraph 74, do not direct that the expenditure he there refers to "should no longer be reckoned for administrative purposes as forming part of the expenditure of the Department" (which it obviously is), but that there was no reason for removing them in the Finance and Revenue Accounts from the heads under which they more properly appeared to the head of "Post Office."

27. Taking all these into account, the financial position of the Post Office in the last two years would appear to be as follows:—

	1884-85. R	1885-86. R
Deficit according to Statement XI of the Report (purely postal transactions, including exchange)	22,33,241	18,95,173
Add—Indirect expenditure	6,77,295	7,06,925
TOTAL	29,10,536	26,02,098
Deduct—District Post charges met from local cesses and contributions by Local Governments	10,54,034	10,87,120
Resulting deficit on the account of the Department	18,56,502	15,14,978

28. The Director General is right in claiming that this deficit includes the cost of keeping up Savings Bank accounts, which is, so far as his Department is concerned, a service of expenditure only. It also includes R86,056 in 1884-85, and R98,429 in 1885-86 on account of charges under the control of the Political officers in Biluchistan, and not forming part of the postal arrangements of India proper.

29. The working and the progress of the Post Office has been, as in previous years, very satisfactory. The thanks of Government are due to Messrs. Hogg, James, and Fanshawe for their successful administration of the Department. The services of the officers (Messrs. Kisch, Salig Ram, O'Shea, and Dorabjee Muncherjee Lalcaca) named in paragraph 76 of the Report also deserve acknowledgment.

ORDERED, that this Resolution be communicated to the Director General of the Post Office of India, and that the Report and this Resolution be published in the *Gazette of India*.

J. WESTLAND,
Offg. Secretary to the Government of India.

ANNUAL REPORT

ON THE

OPERATIONS OF THE POST OFFICE OF INDIA

FOR THE YEAR

1885-86.

No. 12117, dated 18th December 1886.

From—F. R. HOGG, Esq., Director General of the Post Office of India,
To—The Secretary to the Government of India, Department of Finance and Commerce.

I have the honour to submit the Annual Report on the operations of the Post Office of India for the official year 1885-86.

2. During the year the Kingdom of Siam and the Independent State of Congo were admitted into the Universal Postal Union.

3. The statement given on the margin shews the Indian share of the net loss on the European Mail Service since the year 1869-70. For some years a protracted correspondence has taken place relative to the apportionment between the United Kingdom and India of the cost of this service, and the sum of £70,000 a year was meanwhile paid, subject to future adjustment, as the Indian share of the loss while negotiations were in progress. It has now been settled that the past yearly payments at this rate are to be left undisputed up to the 31st March 1885; and that £68,000 per annum shall thereafter be accepted as the cost to India of its European Mail Service during the remainder of the term of the present contract.

Communication by sea between India and Europe by means of the contract service of the Peninsular and Oriental Steam Navigation Company.

Year.	Net loss on the Foreign Mail Service charged against India.	Remarks.
	£	
1869-70	73,110	
1870-71	69,150	
1871-72	68,110	
1872-73	61,072	
1873-74	54,770	
1874-75	57,170	
1875-76	53,125	
1876-77	66,685	The increase in 1876-77 and following years was caused by the reduction of postage carried out on 1st July 1876 when India entered the Union. The increase in 1879-80 is due to the reduction of postage introduced from 1st April 1879, under the Convention of Paris.
1877-78	70,749	
1878-79	71,051	
1879-80	88,160	
1880-81	71,051	
1881-82	70,000	
1882-83	70,000	
1883-84	70,000	
1884-85	70,000	
1885-86	68,000	

4. The following extract from the report of the Postmaster General of Bombay relates to the working of the contract by which the European Mail Service is carried out:—

"The contract steamers of the Peninsular and Oriental Company arrived in Bombay behind contract time on ten occasions, as compared with five occasions in the previous year. The longest period by which the contract time was exceeded was 2 days 22 hours 55 minutes, which was due to the S. S. *Surat* having been detained in the canal, and the shortest period was 8 minutes. In all cases in which the delay in arrival exceeded a few minutes it was due to the Company's steamers having had to bring the mails through the canal, or to difficulties in connection with quarantine. On the other hand, the contract steamers

arrived on Monday, the day before the prescribed date of arrival, on 31 occasions during the year, and the average time occupied in the transit of the mails from London to Bombay was 17 days 1 hour 4 minutes."

5. A supplementary contract was executed with the British India Steam Navigation Company, providing fortnightly communication between Madras and Bimlipatam, and a weekly service between Tuticorin and Colombo. Although concluded during the year under report, the new arrangement did not begin to work until the 6th May 1886. A list is given below of the various steam services for maintaining postal communication in Indian waters, with the Indian post offices in the Persian Gulf and Turkish Arabia, and with Ceylon, the Straits, China and Australia :—

By the British India Steam Navigation Company.

(1) Weekly communication between Calcutta, Rangoon and Moulmein. (2) Weekly communication between Calcutta and Rangoon, *viâ* Chittagong, Akyab, Kyouk-Phyo and Sandoway. (3) Weekly communication between Rangoon and Mergui, *viâ* Tavoy. (4) Fortnightly communication between Madras and Rangoon, touching at certain intermediate ports on the north-east coast of Madras. (5) Weekly direct communication between Bombay and Karachi. (6) Weekly communication between Bombay and Karachi, *viâ* the coast ports. (7) Weekly communication between Karachi and Busrah, *viâ* the Persian Gulf ports.	Under contract with the Post Office for 10 years from 1st May 1884 on an annual subsidy of ₹4,30,000.
(8) Weekly communication between Kyouk-Phyo, Ramree and Cheduba.	Under contract for 10 years from November 1884 with the Local Administration on a monthly subsidy of ₹1,500 for the first five years and ₹1,200 for the second period of five years, subject to other arrangements if intermediately made.

By the Asiatic Steam Navigation Company.

(9) Four-weekly communication between Calcutta and Port Blair with extensions to Camorta, Nancowry and Rangoon.	Under the control of the Military Department the consideration given being not in the form of subsidy but of guaranteed rates for the transport of Government stores. Began to work from the 12th May 1882 and terminable by a notice of six months.

By the Irrawaddy Flotilla Company.

(10) Weekly communication between Rangoon and Mandalay and intermediate ports with a monthly extension between Bhamo and Mandalay.	Under contract for five years from the 1st January 1886, the subsidy being ₹3,500 per month.
(11) Semi-weekly communication between Rangoon and Bassein and Bassein and Henzada.	Under contract with the Local Administration for five years from 1st July 1880, and to continue in force thereafter unless determined by six months' notice. The monthly subsidy is ₹2,500, towards which the Post Office contributes ₹500 per mensem.

By the Euphrates and Tigris Steam Navigation Company.

(12) Weekly communication on the river Tigris between Busrah and Bagdad.	Under contract for 10 years from the 1st May 1884 with Her Majesty's Secretary of State for India. Subsidy ₹36,000 per annum. Steamers run in connection with line No. 7.

By Messrs. Apcar & Co., Calcutta, and Jardine Matheuson and Company, Hong-Kong.

(13) Monthly communication between Calcutta and Straits and Hong-Kong, the dates of departure being regulated primarily with reference to the Calcutta opium sales.	No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

(14) Fortnightly communication between Calcutta and Colombo touching at Madras. Fortnightly communication between Bombay and Colombo.	Non-contract lines maintained by the Company on its own account in connection with the China and Australian Mail Services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

(15) By the River Steam Navigation Company—Daily communication between Dhubri and Dibrugarh on the Brahmaputra river.	Under contract with the Local Administration from the 7th October 1883 to the 1st May 1893. Annual subsidy ₹1,00,000, towards which the Post Office contributes ₹30,000.
(16) By Shepherd and Company's steamers—Daily communication between Bombay and Goa.	Under contract with the Local Government from 1st October 1885 to 31st May 1886. The monthly subsidy is ₹2,880, towards which the Post Office contributes ₹780, the Portuguese Government ₹200.
(17) By Bengal Central Flotilla Company—Daily communication between Khulna and Barisal.	Under contract with the Post Office from 1st July 1884 to 30th June 1889. Monthly subsidy ₹350, of which the Post Office contributes ₹183. Terminable by six months' notice.

NOTE.—A service by sea worked by native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankesanturai on the Ceylon side.

6. One of the most important postal events of the year was the introduction from the 1st July 1885 of a direct parcel exchange with the British Post Office, limited, during the year under report, to parcels not exceeding 7lbs. in weight. This exchange was established in addition to, and not in substitution for, the arrangement which has existed with the Peninsular and Oriental Company since the year 1873, under which parcels can be sent to, and received from, the United Kingdom up to a maximum limit of 5olbs. in weight.

7. Direct parcel exchanges were also introduced with Victoria (Australia) and with Gibraltar and Malta; and a direct money order exchange with British North Borneo was begun.

8. Postal conventions were concluded with the Native States of Gwalior, Nabha and Jhind, providing for an exchange of correspondence, parcels, money orders and India Postal Notes.

9. The year was remarkable for the frequent interruption of postal communication through excessive rains and floods. The most disastrous of these occurrences is thus described by the Postmaster General of Bengal :—

"The postal service in this circle suffered severely from the exceptionally heavy rains and floods in August and September (1885), and also from the cyclone and storm-wave which swept over the Coast of Orissa on the night of the 21st and the morning of the 22nd September. The districts most severely affected by the floods were Midnapore, Hughli, Maldah, Berhampore, Nuddea and Jessore. The Rupnarain, Damuda and other large rivers overflooded their banks, while the Padma and others burst their embarkments flooding the country for hundreds of square miles in different directions. Post offices were washed away, bridges destroyed, embanked roads levelled with the surrounding country and made completely impassable, and both the Eastern Bengal and Central Bengal Railways were breached in many places. The night trains ceased to run on the Bengal Central Railway from the 15th September, and it was not until the 28th December 1885 that the line was again considered safe enough for night running to be resumed. During the whole of this time the mails for Barisal and other places east of Khulna had to remain at the latter station for an entire night, as the trains did not reach Khulna until the evening, and the steamers of the Flotilla Company could not start until daybreak on the following morning. The same detention occurred to the downward mails. Owing to the breaches on the Eastern Bengal Railway, the mails served through that line and the Northern Bengal State Railway were necessarily much delayed, but the inconvenience was reduced to a minimum by an arrangement made with the Bengal Government and the Darjeeling-Himalayan Railway, that the mail trains of the Northern Bengal State Railway and the Darjeeling-Himalayan Railway should each wait four hours for the mails of the Eastern Bengal line. The floods prevailed with great severity from about the 20th August to the end of September, and during the whole of that time many of the runner lines in the districts named above were broken up and the mails were conveyed by boat. The storm-wave of the morning of the 22nd September, which followed the cyclone of the previous day, swept away the combined Post and Telegraph Office at False Point and the Post Office at Jambu. At False Point the Sub-Postmaster, postman and telegraph messenger were all drowned, and the same fate befell the Village Postmaster and a runner at Jambu. Not a trace was left of the post office bungalow at Jambu, and at False Point only a few posts remained to

mark the site of the office. All the post offices on the sea face of the Cuttack district and some in the Balasore district were injured by the cyclone, and five offices were totally destroyed. The loss of Government money and stamps at False Point was R948 and at Jambu R153. Immediately after the destruction of False Point and Jambu a temporary post office was opened in a boat and a combined post and telegraph office was re-established within a month."

10. A collection of exhibits, illustrating the conditions under which post office work is performed in this country, was transmitted to the Colonial and Indian Exhibition held in London during the year under review.

11. A military expedition having been despatched to Upper Burma, a postal establishment was sent to accompany the force, and the sea post office working between Calcutta and Rangoon was strengthened. Five field post offices were opened, and, as the army advanced, new offices were established at convenient places on the Irrawaddy. Owing to the unsettled state of the country all official correspondence in Upper Burma was allowed to travel under frank free of cost.

12. Towards the close of November 1885 an unusually large camp of exercise was formed at Delhi, and 16 field post offices were attached to the forces employed. His Excellency the Commander-in-Chief was pleased to express his appreciation of the manner in which the business of the Postal Department was conducted in connection with this camp.

Section I.—Post Offices, Letter-boxes, and Village Postmen.

13. A large extension of the village post office system has again taken place during the year, the total number of these offices having risen from 1,522 to 2,619, being an increase of 1,097. But the number of sub-offices has simultaneously diminished from 4,642 to 3,900, a decrease of 742, the result being a net increase of 361 offices as shown in the marginal abstract. Village post offices are cheaper than sub-post offices, so that economy is gained by the policy that has been largely followed during the year of substituting the former for the latter. Economy has further been studied by an extended use of extra departmental agencies in connection with village post offices, of which no less than 1,969 were on the 31st March 1886 worked by schoolmasters or other extraneous agents.

	Number at the close of 1884-85.	Number at the close of 1885-86.	Increase.
Post Offices	6,488	6,849	361
Letter-boxes	8,731	9,056	325
Village Postmen	4,039	4,253	214

Section II.—Postal Lines.

14. An abstract is given on the margin shewing the distances over which mails were carried under the various methods of conveyance. Each heading exhibits an increase. That under "Railway" is principally the result of the opening of the Hospet and Dharwar line in Madras, of the Nagina and Saharanpur line in the North-Western Provinces, and of the Nyaunglabin and Toungoo line in Burma. A variety of minor changes have been effected in the "mail cart, horse and camel lines," 302 miles having in all been closed and 480 miles opened: the net result is an increase of 178 miles. The large increase in the mileage of "runners or boats" is mainly due to the extension of Imperial post management to certain Native States in Rajputana and to the conversion of district post into Imperial lines in the Central Provinces. And the increase in "steamer services" arises partly from a transfer of 253 miles in Bengal from the heading of "runners or boats," and partly from certain river steamer extensions in Burma and in Eastern Bengal.

Year.	Railway.	Mail cart, horse, and camel lines.	Runners or boats.	Steamer services, sea and river.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.
1884-85	11,632	4,049	34,482	10,725	60,888
1885-86	11,862	4,227	35,281	11,117	62,487
Increase	230	178	799	392	1,599

Section III.—Correspondence.

15. The correspondence returns for each circle will be found in Appendix III, of which a summary appears on the margin. The increase in the total of more than 22 millions of articles, or 10·21 per cent., is satisfactory. As explained in previous reports, the large expansion under the headings of "newspapers" and "book and pattern packets" is in a great measure due to the reduction of postage on the lighter newspapers in the year 1881, and to the fact that the native presses supplement their normal business by the issue of printed vernacular matter. Although the number of parcels indicate an increase of 10·31 per cent., the revenue derived from parcel postage has nevertheless diminished to the extent of nearly a lakh of rupees in the year. This is the result of railway competition which, by monopolising the heavy parcels where railway communication exists, has deprived the Post Office of the more profitable portion of its parcel traffic. But for the introduction of the value-payable and insurance systems, the loss from this source would have been much greater.

Year.	Letters including Post-cards.	Newspapers.	Parcels.	Book and Pattern Packets.	Total.
	No.	No.	No.	No.	No.
1884-85	193,512,546	17,507,407	1,338,246	4,424,817	216,783,016
1885-86	211,982,718	20,341,814	1,476,271	5,119,335	238,920,138
Increase	18,470,172	2,834,407	138,025	694,518	22,137,122
Percentage of increase.	9·54	16·19	10·31	15·70	10·21

16. Letters and post-cards have been subjected to a further analysis in the table entered on the margin. The most striking feature in this table is the extended use of post-cards, which on account of their cheapness have, since their first introduction in the year 1879, acquired a rapid and growing popularity. Another noticeable point is the rise in the number of unpaid letters. During the last eight years the percentage of decrease in correspondence of this class has been almost uninterrupted: and the sudden rise of 6¾ per cent. in the year under report calls therefore for some explanation. The change has mainly occurred in Baluchistan and Burma, and is attributable to the military operations in those Provinces, as the families of sepoys usually adopt the practice of not prepaying their correspondence.

Year.	Post-cards.	Letters paid.	Letters unpaid.	Letters registered.	Total.
	No.	No.	No.	No.	No.
1884-85	48,698,274	113,833,567	26,994,931	3,985,774	193,512,546
1885-86	58,853,957	120,106,172	28,813,071	4,209,518	211,982,718
Increase	10,155,683	6,272,605	1,818,140	223,744	18,470,172
Percentage of increase.	20·85	5·51	6·74	5·61	9·54

17. Separate figures relating exclusively to foreign correspondence are entered below. While the homeward correspondence with the United King-

dom has increased under each heading, that received in the opposite direction has diminished, the net result being a fall of 251,100, articles or 2·19 per cent.

	Class.	Estimated aggregate number. 1884-85.	1885-86.	Percentage of Increase or Decrease.	Remarks.
Despatched from India to the United Kingdom.	Letters, including post-cards	2,874,487	3,012,359	+ 4·79	These figures are based on the monthly accounts between India and the United Kingdom.

	Books, &c.	641,058	653,385	+ 1·92	
Received in India from the United Kingdom.	Letters, including post-cards	2,796,347	2,669,298	− 4·54	
	Newspapers	2,591,632	2,366,336	− 8·69	
	Books, &c.	2,171,700	2,103,184	− 3·15	
Grand Total of all Correspondence exchanged with the United Kingdom.	Letters, including post-cards	5,670,834	5,681,657	+ ·19	
	Newspapers	2,956,678	2,750,944	− 6·95	
	Books, &c.	2,812,758	2,756,569	− 1·99	
Despatched from India to Foreign Countries other than the United Kingdom.	Letters, including post-cards	715,390	715,390	...	Under the system prescribed by the Universal Postal Union statistics are taken once only in three years from which these figures are deduced. This explains the reason why the figures for 1884-85 have been repeated in the year 1885-86.
	Other articles	293,867	293,867		
Received in India from Foreign Countries other than the United Kingdom.	Letters, including post-cards	744,244	744,244		
	Other articles	558,117	558,117		
Grand Total of Correspondence exchanged with the Foreign Countries other than the United Kingdom.	Letters, including post-cards	1,459,634	1,459,634		
	Other articles	851,984	851,984		

Note.—These figures are included in the general correspondence returns.

18. *Foreign Parcel Post.*—Below is given a list of the parcel exchanges introduced during the year :—

A direct exchange with the Colony of Victoria (Australia) from the 1st April 1885.

A direct exchange of light parcels, not exceeding 7lbs. in weight, with the United Kingdom through the London Post Office from the 1st July 1885.

An exchange with the West Indies through the medium of the United Kingdom from the 1st October 1885.

A direct exchange of light parcels, not exceeding 7lbs. in weight, with Gibraltar from the 1st October 1885.

A direct exchange of light parcels, not exceeding 7lbs. in weight, with Malta from the 1st January 1886.

An exchange with Cape Town and all other places in Cape Colony (excluding Natal) through the medium of the United Kingdom from the 1st January 1886.

19. Parcel traffic returns for the year will be found in the subjoined table. Compared with the previous year the number of parcels has increased by 22,464 and the revenue by ₹6,885. Commenting on the results of the year the Postmaster General of Bombay, who is charged with the control of these exchanges, remarks as follows :—

"It will be seen that the number of parcels received and despatched by means of the agency of the Peninsular and Oriental Company has largely fallen off, while the decrease has been much more than counterbalanced by the parcel traffic direct with the General Post Office, London. The parcel exchange with Austro-Hungary has increased in both directions, while the exchange between Aden and Bombay has fallen off. The decrease in the number of parcels sent from India is insignificant, but the numbers received from

Aden shew a marked falling off due to the prohibition against the sending of specie by parcel post. The only other point that calls for remark is that 2,000 parcels were sent during the year to the field post office at Suakim and 189 received, and that no great use has yet been made of the parcel exchange with Victoria. The actual number of parcels sent and received was 259 and 12."

Note.—These figures are included in the general correspondence returns.

20. The correspondence entered on the margin of paragraph 15 above was disposed of in the following manner, which shows that the proportion of articles delivered to the whole was 96·93 per cent.:—

Sent out for delivery (including 4,163,078 money-orders)	243,083,216
Received back undelivered	7,474,600
Balance actually delivered	235,608,616
Sent to dead-letter offices	2,807,291
	238,415,907

21. Statistics representing the results of work done in the several dead-letter offices are contained in Appendix IV, an abstract of which is given below. They

are satisfactory, as showing a diminution in the percentage of articles that could not be disposed of either by re-direction to the addressees or by return to the senders :—

Dead-Letter Office Work.

	Number.		Percentage.	
	1884-85.	1885-86.	1884-85.	1885-86.
Total number of articles received in dead-letter offices	3,321,442	3,642,994		
DEDUCT—	1884-85	1885-86.		
Articles issued by dead-letter offices for delivery to the addressees or senders and received back again as undeliverable	171,917	182,779		
Articles transferred to other dead-letter offices	823,268	935,287	995,185	1,118,066
Net receipts to be disposed of by the dead-letter offices			2,326,257	2,524,928	100	100
Articles disposed of by the dead-letter offices, less the proportion of articles returned undelivered.	Disposed of by re-direction to addressees		352,701	390,782	15·16	15·48
	Disposed of by return to senders		1,334,157	1,462,070	57·35	57·90
Articles undisposable			639,399	672,076	27·49	26·62

22. As respects articles of value which found their way to the Calcutta Dead-Letter Office owing to the incorrect and incomplete addresses given by the senders, the Postmaster General of Bengal remarks as follows :—

"Altogether cheques, currency notes, bills of exchange, transfer receipts, promissory notes and other valuables to the amount of ₹71,114 were found in articles opened in the Dead-Letter Office, and of these, articles to the value of ₹71,066 were duly disposed of, leaving only a balance of articles valued at ₹48 in hand at the end of the year. Among the articles that had to be opened in order to secure their delivery, were bills of exchange for more than £4,000 sterling."

23. Statistics relating to the sales of postage stamps, embossed envelopes and post-cards are given on the next page : details for each circle will be found in Appendices V and VI. The sales of ordinary postage stamps have increased from ₹54,06,022 to ₹69,16,791—an increase of more than 15 lakhs. This increase occurs for the most part in the sales of stamps of the higher denominations, and is mainly due to an enlarged use of postage stamps for the realisation of telegraph revenue, and to parcel postage and money-order commission having, during a portion of the year, been credited in stamps instead of in cash. There has been a fall in the sale of ¼-anna post-cards, and a marked rise in those of ½-anna reply cards : this is explained by the fact that the inland reply cards, being larger in size than the inland single cards, were to a considerable extent separated and used singly as ¼-anna cards. Because of this misuse of the reply card the needful steps were taken for a reduction in its size to that of the single card. The number of ½-anna embossed envelopes sold in 1885-86 was nearly 54 millions. Arrangements were made during the year for the introduction of registration envelopes of two sizes, of new ⅓-anna and 1-anna square envelopes and of a 4½-anna adhesive stamp : but these additions were not offered for sale to the public until after the close of the year under report. In July 1885, the rate of discount granted on purchases of postage stamps from the Government treasuries was reduced from 3⅛ to 1 1/16 per cent.

24. A table is annexed in which the proportions of revenue derived respectively from postage stamps and cash are separately indicated. As already pointed out, the fall in the cash and the rise in the ordinary stamp proportions are the results of changes under which, during a portion of the year, parcel postage and money-order commission were credited not in cash, as has been the case for the last five years, but in stamps.

Proportion of Revenue derived from Postage Stamps and from Cash.

	1874-75.	1875-76.	1876-77.	1877-78.	1878-79.	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.

Section IV.—District Post.

25. The district post is managed by the local postal authorities working under the orders of the Local Government. In Madras the grant from Provincial revenue having, under the direction of the Local Government, been reduced during the year by ₹7,000, the required saving was effected by transferring the management of village letter-boxes from private individuals, to whom a small remuneration used to be given, and placing the boxes under the charge of the village headmen. This change was followed by a fall of the correspondence posted in these boxes exceeding 50 per cent.: and this fall having been reported by the Postmaster General, the matter is now under the consideration of the Board of Revenue. In the Punjab the amount yielded by the district dâk cess diminished from ₹73,056 to ₹20,806. This diminution is thus explained by the Postmaster General:—

"The decrease in the above amounts is due to the cess having been realised only in the 10 districts to which Act XX of 1883 (the Punjab District Boards Act) has not been extended. In the remaining 21 districts, to which the Act has been extended, the dâk cess has ceased to exist, and has become merged into the local rate leviable under the Act."

In the Central Provinces a large number of district dâk offices were transferred to the Imperial Post, the funds thus released being as usual utilized in extending and developing the district post in backward districts. In Burma the expansion of the district post was checked by the disturbed state of the country. Nevertheless, the number of letter-boxes was largely increased and additional village postmen were entertained to serve these boxes: numerous short lines were also opened with police outposts, and these lines have proved of great service during the existing disturbances.

26. On the next page will be found the usual statistics concerning the district post. As explained in previous reports, these statistics are not wholly reliable, and do not correspond with the figures given in the Finance and Revenue Accounts.

District Post.

Name of Postal Circle.		Number of District Post Offices and Receiving Offices.	Number of District Post Village Runners and Postmen.	Number of District Post Letter-boxes.	Distance in miles of District Post Lines.	Local Cess.	Grant from Imperial or Provincial Revenue.	Expenditure.	Articles received from the Imperial and District Posts for delivery by the District Post.	Articles posted in the District Post for despatch to the Imperial or District Post.	Articles returned to the District Post for delivery by the Imperial Post undelivered.	Percentage of those returned on the total number received for delivery by the District Post.

(a) Includes contributions by the Chiefs of the Chota Nagpore and Orissa Mehals, ₹2,920 and ₹2,298, respectively.
(b) Includes the amount of annual subsidy for the Dera Ismael Khan and Chichawatni hill cart line.
(c) These are dry season distances, during the rains these lines are increased in length.
(d) Grant from the Local Improvement Fund.
(e) Includes contributions from Frontier Police Fund, ₹3,444 in 1884-85 and ₹4,320 in 1885-86, and contributions by the Maharajah of Agartala, ₹240 in 1884-85 and 1885-86.
(f) Includes lines paid from the revenues of feudatory States of 617 miles in length in 1884-85, and 589 miles in length in 1885-86.
(g) Grant made available from Bombay District Post Funds.

Section V.—Money Orders.

27. Last year's report referred to an experiment made in the Benares Division under which the money-order system was rendered available for the remittance of land revenue. A large measure of success has already attended this experiment, the number of revenue money-orders issued during the year under report being 39,768, their total value ₹7,11,117 and the commission realised ₹10,001. ; Since the close of the year permission has been obtained to the extension of the system throughout the North-Western Provinces and Oudh. During the year the Postmaster General of Bengal also got leave to introduce a similar experiment in the ten districts of the Burdwan and Dacca Divisions; but the measure will, at the outset, be confined to estates paying an annual revenue not exceeding ₹50.

28. Reference was also made in the last report to an important change under which money-orders were paid by postmen at the doors of the payees instead of at the post offices. Not only has the convenience of the public thus been served, but the number of void orders, or orders in connection with which neither the payee nor the remitter can be traced, has thereby largely been reduced. Notwithstanding the growth in the number of money-order issues the balance of outstanding void orders at the close of the year numbered only 914, as compared with 1,764 in the previous year. Nor has the measure been attended with any serious loss to Government as might have been apprehended. Although more than nine crores of rupees were remitted by inland money-orders, the total amount misappropriated by postmen in the year amounted only to ₹1,470, of which nearly ₹600 was recovered from the delinquents.

29. A statement is entered on the margin denoting the growth of inland money-orders since the transfer of this business to the Post Office in the year 1880. The yearly expansion has been remarkable, and the percentage of increase under each heading during the year under review is large. More than 4 millions of these orders were issued in the year, their gross value exceeded 9⅓ crores of rupees, and the commission realised was in excess of 11⅓ lakhs. Each money-order averaged only ₹22-8-7 as compared with ₹23-1-9 in 1884-85.

Inland Money-Orders.	Total number of Money-Orders issued.	Total value of Money-Orders issued.	Commission realised.
	No.	₹	₹
During the last quarter of the year 1879-80, being the commencement of the business	232,639	72,48,208	84,901
During the year 1880-81	1,604,174	4,57,08,580	5,35,976
" " 1881-82	2,157,796	5,73,32,027	6,79,073
" " 1882-83	2,565,904	6,46,84,183	7,70,958
" " 1883-84	3,034,894	7,31,24,179	8,84,925
" " 1884-85	3,550,257	8,20,88,559	10,06,226
" " 1885-86	4,163,078	9,38,27,375	11,63,830
Percentage of increase over the year 1884-85	17·26	14·30	15·66

30. From the marginal table it will be seen that the average value of each order has steadily declined since the business was undertaken by the Post Office, the reason being that this department derives its custom more and more from the poorer classes whose individual remittances are necessarily small. One effect of this yearly diminution in the average amount of each money-order is a gradual increase in the percentage yielded by the commission. In the year under report the commission came to ₹1-3-10 per cent. against ₹1-3-7 per cent. in 1884-85. It may be added that 90 per cent. of money-order remitters

Year.	Average value of each money-order.
	₹ a. p.
1879-80	32 0 1
1880-81	28 8 0
1881-82	26 8 0
1882-83	25 3 0
1883-84	24 1 6
1884-85	23 1 9
1885-86	22 8 7

were natives: that more than half the orders were issued for sums of ₹10 and under, and more than a quarter for sums above ₹10 but not exceeding ₹25, leaving a balance of less than 20 per cent. for all denominations higher than ₹25.

31. On the 31st March 1886, the total number of Imperial money-order offices stood at 6,835 against 5,657 at the close of 1885, these offices having increased in number by 1,178.

32. The extent of business done in each postal circle will be learnt from the following statement. More than 30 per cent. of the money-order transactions in the country took place in Bengal, Behar and Eastern Bengal :—

Postal Circles.	Issues during 1885-86.		Payments during 1885-86.		Percentage to the whole.

Increase	612,821	1,17,38,815 14	761,541	1,15,88,616 5	...

Note.—The figures relating to the Madras Postal Circle include transactions with the Native State of Mysore, the figures relating to the Bombay Postal Circle include transactions with the Portuguese Settlements of Goa and Daman, the figures relating to the Punjab Postal Circle include transactions with the Native States of Patiala, Nabha and Jhind, and the figures relating to the Central India Postal Circle include transactions with the Native State of Gwalior.

33. As explained in the above note, money-order transactions with Native States in India have been included in the statement attached to the previous paragraph. It may, however, be interesting to add that the total value of issues and payments together has increased by 23·62 per cent. in the case of Mysore, by 32·09 per cent. in the case of Goa and Daman, and by 148·63 per cent. in the case of Patiala. As Patiala is the first Native State with which a Postal Convention has been concluded, it is encouraging to find that the first complete year after the conclusion of the arrangement has been accompanied by so large an expansion of business. With effect from the 1st July 1885, money-order exchanges began to work with the Native States of Gwalior, Nabha and Jhind;

but the experience gained is as yet insufficient to form any reliable conclusion as to the success of these exchanges.

34. As stated in last year's report, the use of the telegraph in connection with inland money-orders began from the 1st October 1884. In the statement given below the transactions for each circle will be found. A total of 12,490 orders for about 8⅓ lakhs of rupees were issued during the year, being an increase of 7·9 per cent. on the business of the previous year. Of the gross number of telegraphic money-orders issued, 5·82 per cent. were for ₹10 and under, 48·47 per cent. for sums above ₹10 and not exceeding ₹50, and 45·71 per cent. for amounts between ₹50 and ₹150. The gross transactions were largest in Madras: but Burma heads the list as regards the number and value of its issues. Postal communication with Burma is so restricted that resort to the wire is naturally more frequent there than in the case of the other provinces:—

Telegraphic Money-Order Transactions.

	Issues.		Payments.	
	Number of applications.	Value of applications.	Number of Money-Orders.	Value of Money-Orders.
		₹		₹
Madras	2,008	1,30,724	3,994	2,15,844

Central Provinces	245	14,238	233	16,042
Central India	212	19,078	77	6,064
Total of 1885-86	12,490	8,34,371	12,495	8,28,772
Total of 6 months from October 1884 to March 1885	5,788	3,75,530	5,755	3,74,044

NOTE.—These figures are included in the general statement of inland money-orders.

35. The following two special instances of fraud perpetrated by means of the telegraph are narrated by the Postmaster General of Bombay:—

"(1) A traveller passing through Kalyan in the Thana district in May 1885 telegraphed to Gopal Anant Bhat, Satara, in the name of the latter's brother, Mr. Gangadhar Anant Bhat, M.A., L.C.E., for ₹200 to be sent by money-order. A money-order for ₹100 was duly sent from Satara and two letters to the address of Mr. Gangadhar Bhat. The swindler obtained possession of the money, but the fraud was subsequently detected and reported to the Post Office, and he was arrested by the Police at Thana with ₹60-1 in gold in his possession. The man feigned insanity, but was proved to be in full possession of his senses and was prosecuted before the first class Magistrate, Thana, and convicted under section 409 of the Indian Penal Code and sentenced to undergo rigorous imprisonment for two years. There was no want of reasonable care on the part of the Post Office in paying the money-orders to the false personator.

"(2) A traveller, named P. Narsing Rao, passing through Sholapur in July 1885, telegraphed for ₹600 to a sowkar Senavadhany at Benares in the name of Muni Swamy Chetty, a wealthy merchant of Tripati in the Madras Presidency, between whom and Senavadhany business relations subsisted. The money arrived in course of time by telegraphic money-orders and was paid to P. Narsing Rao at the Sholapur Post Office. The fraud was detected shortly after, but the swindler had in the interval made his escape, and it was some time before he was arrested. He was finally placed for trial before the Sessions Judge, Sholapur, convicted under section 419 of the Indian Penal Code, and sentenced to two years' rigorous imprisonment. In this case, too, there was no want of care on the part of the Post Office in making payment of the orders."

36. A direct money-order exchange with British North Borneo was substituted for the previous arrangement under which money-orders passed through the United Kingdom, and exchanges through the medium of the British Post Office were also introduced with Portugal, Malta and Hawaie. The formerly existing direct exchange with the Netherlands was converted into an exchange worked through the United Kingdom, and a new exchange was started with Labuan through the agency of the Post Office in the Straits Settlement. Rangoon on the side of India and Penang on the side of the Straits were constituted offices of money-order exchange. A direct money-order exchange between Aden and Egypt was also brought into operation. A statement of foreign money-order transactions expressed in sterling is given below; it shows an increase of 11·82 per cent. in the issues, and 64·04 per cent. in the payments. The average rate of exchange for the year was 1*s.* 6¼*d.* per rupee:—

NOTE.—The figures relating to the United Kingdom include transactions with the following countries and places:—United States of America, Canada, Newfoundland, Bermuda, Falkland Islands, British Colonies and Possessions in Africa and West Indies, Cyprus and North Borneo. The figures relating to North Borneo represent the transactions since the new exchange was opened with it on 1st October 1885.

The direct exchange with the Netherlands was abolished from 1st January 1886, and the through exchange system extended to that country.

37. Foreign money-order transactions expressed in Indian currency are dealt with in the appended statement. Increases have taken place both in the

orders issued and in those paid. The commission charged on these orders averaged ₹1-0-10 per cent.

40. Statistics of the number and value of India Postal Notes sold will be found in the marginal table. They shew a fall under each head of realisation, the total decrease being ₹26,251, or 12·25 per cent. These notes have never acquired any real popularity, and as their limited sales are already on the decline, the Government has, since the close of the year under report, determined on abandoning their sale.

Sale of India Postal Notes.

41. British postal orders were offered for sale in India from October 1884, so that the year under report is the first complete year of the experiment. Efforts were made to encourage the traffic in these orders by employing the agency of regimental vendors for their sale. But the total number of orders sold of all denominations was only 15,910, their gross value, £11,309, and the Indian commission realised amounted but to ₹838. From the marginal table it will be seen that the demand, especially for the lower denominations of these orders, was very limited. As in the previous year, the largest transactions took place in the Punjab, where 3,323 orders were sold, representing a total value of £2,533.

Section VI.—Post Office Savings Bank.

42. Government Savings Banks were introduced in the year 1870 under the title of "District Savings Banks," their management resting with the Treasury Department. On the opening of Post Office Savings Banks in April 1882, the District Savings Banks were not abolished, but the old and new banks were both allowed to work side by side. Towards the end of the year under report, the closure of the District Banks, with effect from the 1st April 1886, was resolved on, and steps were taken to encourage the immediate transfer of accounts from the old to the new banks. This decision did not include the Savings Banks in District Treasuries managed by the Banks of Madras and Bombay, the closure of which was delayed until June 1886. Nor did it include the Local Savings Banks controlled by the Presidency Banks in Calcutta, Madras and Bombay.

43. A statement, marked A, comparing the transactions of the year 1885-86 with those of the preceding year, is entered on the next page. It shows that 11 new head banks and 323 sub-banks were opened during the year, and that 5,833 Post Office Savings Banks in all existed on the 31st March 1886. 80,848 new accounts were opened and 48,438 accounts closed, the total number at the close of the year being 155,009 as compared with 122,599 in March 1885, an increase of 26·44 per cent. The deposits amounted to nearly 243 lakhs against 165½ lakhs in the previous year, the interest grew from 3¾ lakhs to 6⅘ lakhs, the withdrawals increased from 110 to 158¾ lakhs, and the balance at credit rose from 134¼ to 225½ lakhs. Bengal has the largest number of accounts, *viz.*, 33,981, and Bombay the highest balance at credit, *viz.*, ₹45,61,488. Madras shews the lowest average balance at the credit of each depositor, *viz.*, ₹93·34, and the Punjab the highest, *viz.*, ₹247·36. The great increase of ₹91,03,980, in the balance at the credit of depositors when the year closed, is largely due to transfers from the District Savings Banks, consequent upon the announcement that these banks would be closed from the 1st April 1886.

(a) Excluding 5,679 dead accounts with balance amounting to R5,56,516.

(b) Out of this balance, R97,01,310·7 bears no interest.

44. The Post Master General, Bombay, reports that—

"during the months of April and May large sums were withdrawn from the Savings Bank in Gujarat mainly owing to the belief that there were likely to be hostilities with Russia, though there is reason to believe that some part of the money withdrawn was intended to be invested in Government securities."

45. The table given on the margin contains the number and amount of the accounts standing respectively in the names of Native and of European or Eurasian depositors. Further details will be found in the appended statement marked B. Contrasted with the figures for the previous year, the percentage of the total number of accounts has, in the case of natives, fallen from 89·11 to 86·96 per cent., and in the case of Europeans, risen from 10·89 to 13·04 per cent. But the numerous transfers of accounts from the District Savings Banks is doubtless accountable for this change.

Race of Depositors.	Number of accounts.	Percentage of total number.	Amount.
			R a. p.
Native	134,796	86·96	1,81,27,336 11 10
European or Eurasian	20,213	13·04	44,18,554 1 8
Total	155,009	100	2,25,45,890 13 6

46. A classification of depositors according to professions is given in the statement marked C below. The professional classes with fixed incomes hold the largest number of accounts, *viz.*, 57,831, while the highest percentage of increase, *viz.*, 51·90, comes under the head of professionals having variable incomes. The industrial classes are badly represented by a total of 2,475 accounts, and the agricultural classes exhibit a decrease of more than 9 per cent. Under this last heading the principal decreases occurred in Bengal, the North-Western Provinces, the Punjab and Assam, while increases took place in Madras, Bombay and Behar.

47. Any person, whether depositor or not, possessed during the year the privilege of using the agency of the post office for the purchase and sale of Government promissory notes and for transferring Government securities held to the Comptroller General for custody. Towards the close of the year it was decided that this privilege should be limited to *bonâ fide* depositors in the Savings Banks, and that the amount invested for any one depositor should not exceed ₹1,000 in one year, or ₹3,000 in all. But this change of rule did not come into effect until the 1st April 1886. The total investments in Government securities made during the year through the agency of the Post Office amounted to ₹3,59,400 against ₹2,94,600 during the preceding year. And the balance of such investments remaining with the Comptroller General rose from ₹1,31,300 at the close of 1884-85 to ₹2,82,300 on the 31st March last. Out of a total of 463 transactions effected through the Post Office, 436 cases concerned purchases or sales not exceeding ₹2,000 each in value, while 27 related to dealings for amounts varying from ₹2,000 to ₹10,000 each.

Section VII.—Insurance and Value-payable Systems.

48. Reference was made in last year's report to the stoppage of insurance between India and Bagdad, and to the effect thus produced in diminishing the income derived from this source. During the year under review the power to insure articles to and from offices in the Persian Gulf and to and from Busrah was wholly withdrawn. On the margin is given a statement shewing the insured value of letters and parcels and the fees realised since the beginning of the system in the year 1878. The decline in the business during

Year.	Value Insured. Letters.	Parcels.	Total.	Insurance fees.
	₹	₹	₹	₹
1877-78, last quarter being the commencement of the system	6,66,320	18,60,191	25,26,511	13,230
1878-79	89,71,775	2,81,21,219	3,70,92,994	1,83,556
1879-80	1,63,33,038	5,34,34,161	6,97,69,219	1,97,790
1880-81	1,57,33,428	6,30,26,524	7,87,59,952	2,01,040
1881-82	1,79,69,808	5,85,53,413	7,65,23,221	1,90,980
1882-83	2,30,67,342	5,95,70,924	8,26,38,266	1,99,841

Percentage of decrease as compared with 1884-85	3·60	13·79	10·79	12·21

the year and the loss of nearly ₹24,000 in insurance income is mainly attributable to the stoppage of insurance between India on the one hand and the Persian Gulf and Turkish Arabia on the other as above explained. The average value of insurance effected on each article was ₹264 in the case of letters and ₹316¾ in the case of parcels.

Losses under the Insurance system.	1884-85. R	a.	p.	1885-86. R	a.	p.
Losses by accident or by departmental neglect or fraud	15,522	8	9	11,882	9	0
Losses by highway robbery in British territory	1,939	6	9	70	0	0
Losses by highway robbery in Native State	2,300	0	9	500	0	0
	19,762	0	3	12,452	9	0
Value of property recovered	5,546	14	0	5,969	8	6
	14,215	2	3	6,483	0	6
Claims preferred but not entertained	300	0	0	...		
Total	13,915	2	3	6,483	0	6

49. Thirty-three cases of loss under the insurance system occurred during the year as compared with 39 cases in the previous year: and the total claims which the Post Office had to meet amounted to ₹6,483 against ₹13,915 in 1884-85, being a decrease of more than one-half. These losses are summarised on the margin.

50. An important addition to value-payable business was made by the extension of the system to unregistered book packets, both paid and unpaid, with effect from the 1st October 1885. Prior to that date the cost of the registration fee, coupled with the necessity for prepayment of postage, proved a practical bar to the use of the system for the transmission of light books and pamphlets. The removal of these impediments was immediately followed by the transmission of more than 50,000 unregistered value-payable book packets during the six months following the relaxation of the rule. The marginal table represents the growth of this system from its commencement in December 1877. From a humble beginning the business has now assumed large dimensions, the number of articles sent during the year under report being 436,115, the total value declared for realisation about 45½ lakhs, and the commission charged ₹85,530. Compared with the previous year the commission has increased to the extent of nearly 30½ per cent. Adverting to the extensive use made of this system by tradesmen in Calcutta, the Post Master General of Bengal remarks as follows:—

Value-payable system, year.	Number of articles sent under the value-payable system.	Value declared for realisation. ₹	Commission. ₹
1877-78 (from the commencement of the system in December 1877), 4 months	413	6,721	195
1878-79	7,408	1,32,109	3,942
1879-80	25,589	3,49,857	11,498
1880-81	49,389	5,76,574	13,413
1881-82	99,416	10,80,543	19,838
1882-83	174,301	16,86,098	32,568
1883-84	287,377	28,08,873	53,450
1884-85	338,930	34,35,045	65,571
1885-86	436,115	45,32,803	85,530

Note.—Owing to the receipt of inaccurate statistics from one of the postal circles the figures given in last year's report relating to 1884-85 were incorrect. Revised figures for that year have now been substituted.

"It will be seen that of the total number of value-payable articles (211,188) posted in this circle in 1885-86, more than 205,408 or 97 per cent. were posted in Calcutta, and of the 22 lakhs of rupees recovered from the addressees of the value-payable articles, 21½ lakhs were paid to tradesmen in Calcutta. This figure represents the extent to which the system has in a single year enabled the trading community of Calcutta to carry on cash transactions with their customers in the interior. All the Calcutta firms charge cash prices for articles sent by value-payable post, and the benefits of the system to the general public are thus as great as to the trading community."

51. A further extension of the value-payable system in another direction

was attempted towards the close of the year under review. For some years the method of transmitting railway receipt notes as value-payable letters has largely been followed, one firm alone having sent goods in a single year to the value of R20,000, the price of which was recovered from the purchasers under the value-payable system. Endeavours were therefore made by this Department to facilitate general resort to a convenience which the public itself had spontaneously adopted. The main objection to this measure consists in the ease with which the delivery of goods can be obtained on indemnity bonds, the production of the railway receipt being dispensed with altogether. It sometimes happens that consignees, having once received their goods, evade payment by not taking delivery of the railway receipt notes sent through the post as value-payable registered letters. All that the Post Office therefore demanded was that the production of the railway receipt should be made an absolute preliminary to the delivery of the goods. After a lengthy and protracted correspondence this point was conceded on certain railway lines, and rules were issued in January 1886 providing for the transmission of railway goods and parcel receipt notes under the value-payable system. As yet the business done under these rules has been very limited. It is, however, certain that the public prefer the method of cash payment provided by the value-payable system to remitting money in advance, and if the hearty co-operation of the various Railway Administrations can only be secured, a large addition of business may be expected both to the Companies themselves and to this Department.

	Number.	Value.	Commission.	Average value of each article.	Average commission on each article.	Remarks.

52. Further details of the year's working are given in the marginal table, which shows that the average value of each article sent under the value-payable system amounted only to R10-6-3.

Section VIII.—Miscellaneous.

53. In April 1873 an arrangement was made under which security was taken from postal employès by half-yearly subscriptions of one rupee from those belonging to the superior or pensionable grades, and eight annas from those attached to inferior or non-pensionable grades. The subscriptions taken from the superior class were returnable on death or resignation in the proportion borne by the surplus income to the total income, while the subscriptions obtained from the inferior class were not returnable at all. Having regard to the serious pecuniary responsibilities devolving on postal employès since the introduction of the insurance, money-order, value-payable and Savings Bank branches of business, it was decided in December 1882 that the return of subsequently-paid subscriptions should be stopped, and the formation of a new fund was consequently sanctioned. To this new fund the half-yearly subscriptions already described have, since the 1st January 1883, been credited, together with a new reduced rate of 4 annas realised from inferior servants (with certain exceptions) drawing salaries not exceeding R5 per month. All charges are reckoned against the balance of the old *pro formâ* account until it is exhausted. Subscriptions paid before January 1883 are still, as a matter of favour, returnable to the superior class on retirement, death or resignation: for this reason a distinction between the returnable and non-returnable portions in the account of the old fund is still maintained.

54. On the creation of the new fund a balance of R2,16,913 existed to the credit of the old fund. By bearing all expenses, as already explained, this balance is gradually being diminished, and on the 31st March 1886 it stood at R1,59,324. During the year under report, the charges against this balance amounted to R21,993. At the close of the year a balance of R1,06,304 stood to the credit of the new fund. The exact position of both funds will be gathered from the figures entered below:—

Old Fund.

Receipts.	R	Charges.	R

55. The number of complaints made by the public, which were reported to the heads of the several postal circles, rose from 6,511 to 7,684, being an increase of 1,173. More than half of this increase concerns the Railway Mail Service Circle, and is capable of easy explanation. The Durbar at Rawalpindi, the camp of exercise in the neighbourhood of Delhi, the preparations for war on the Baluchistan frontier, and the military operations in Burma, all necessitated sudden movements on the part of officers and others from one part of India to another and resulted in frequent references and complaints in respect to re-directed and other classes of correspondence. Similar causes led to an addition of 238 complaints in the Punjab and 54 in Sind. An increase of 328 complaints occurred also in Bengal (excluding the General Post Office): this is ascribed to the numerous transactions which take place in that circle relating to the transmission of money and valuables.

56. Those complaints which relate to the loss of registered letters or parcels have been analysed in the following statement. It will be seen that their total number has increased from 306 to 336 :—

	Registered Letters.		Parcels.		Total.	
	1884-85.	1885-86.	1884-85.	1885-86.	1884-85.	1885-86.
I. Cases in which enquiry showed either that no loss occurred or that the loss had not occurred through the fault of postal officials .	87	76	72	97	159	173
II. Cases in which the postal establishment was proved to be in fault or in which there was strong ground for believing it to be so. .	39	43	54	38	93	81
III. Cases in which no definite conclusion was arrived at	33	40	21	42	54	82
Total .	159	59	147	177	306	336

Class I includes 7 insured cases under the head of "Registered Letters" and 10 insured cases under the head of "Parcels."

Class II includes 2 insured cases under the head of "Registered Letters" and 8 insured cases under the head of "Parcels."

Class III includes 1 insured case under the head of "Registered Letters" and 7 insured cases under the head of "Parcels."

57. One of these cases is described by the Post Master General of Madras in the following terms :—

"The first relates to the abstraction of 27 full currency notes of the value of ₹100 each from an insured registered letter posted at Negapatam on the 7th December 1885 for Coconada. As there were strong reasons for suspecting that the sender of the letter never enclosed the notes, the personal assistant was deputed to Negapatam with directions to apply for a search warrant and have the houses of the sender and his servants examined. This was done with the unexpected result that the whole of the currency notes alleged to have been posted were recovered by their being sent in two consignments of halves enclosed in two ordinary paid covers, one to the Superintendent's address and one to that of the Post Master General. The matter is now in the hands of the Tanjore Police, but I regret to state that they have not as yet been able to trace the person or persons who posted the two ordinary covers referred to, although a reward of ₹250 has been offered to any one who may give the required information. If, as is suspected, this is the work of the sender of the original letter, it is unlikely that any further result will be attained."

58. After referring to other cases the Post Master General adds that—

"the deception practised by the senders in monetary transactions with the addressees making the post office the scape-goat of their dishonesty has been exposed more than once during the year by the Paper Currency Office, to which intimation was given of currency notes alleged to have been abstracted from registered letters, replying that the currency notes in question had been cashed and cancelled long before the date of posting of the registered letters in question, and such currency notes could not therefore have been enclosed in them."

59. A statement of offences punishable by law will be found in Appendix VIII, of which a summary appears on the margin. Out of a total number of 254 cases, 187 legal convictions were obtained and 67 were punished departmentally. The following account of a very important case of money-order forgery is extracted from the report of the Post Master General of the Bengal Circle :—

	1884-85.	1885-86.
Number of legal convictions . .	157	187
Number of cases punished departmentally	87	67
Total .	244	254

"The case shown as No. 53 in Appendix IV was a case of forgery of money-orders of a very elaborate and complicated character. Surya Kumar Bose, assistant money-order clerk of the Bara Bazar Office, took advantage of his position to destroy 10 money-orders received in the office from the Railway Mail Service, and to substitute for them 10 forged money-orders, ordinary and value-payable, of the aggregate value of ₹5,750.

These money-orders were made payable to two respectable native bankers, on whom one of the accomplices in the fraud had previously called. This man had told the bankers that they would receive remittances from his employer in Kamptee in the Central Provinces, and that the remittances were in payment for gold which he was to purchase from them. Shortly after this the forged money-orders, which had been introduced into the Bara Bazar Post Office, were paid in the usual way to the bankers who, after satisfying themselves as to the genuiness of the transactions, delivered the value of the orders in sovereigns and bars of gold. The preparation of the numerous forged stamps required for the forgery of the money-orders began many months before the fraud was committed, and the fraud was so planned that at no time subsequent to the substitution of the forged orders for genuine ones were the forged documents in the hands of any of the parties to the crime. It was in this that the ingenuity of the fraud consisted. By making the forged orders payable to perfectly innocent and well-known men and then obtaining from them the value of the orders, the actual criminals were able to keep entirely out of sight. The assistant money-order clerk who devised the fraud and the man who actually wrote out the forged orders, were, however, ultimately detected, and they were both convicted at the High Court and sentenced to transportation for life. ₹2,397-2-3 out of the proceeds of the fraud was recovered from the principal offender Surya Kumar Bose."

60. The following paper, written by an intelligent native postal official, is of interest as an indication of the almost incredible extent to which ignorance in postal matters prevails among the village population of this country :—

"Among numerous difficulties which beset the proper working of the Indian Post Office, the gross ignorance of the majority of the Indian population is by no means the least formidable. An intelligent and well-informed community, though it expects a high standard of efficiency in all public concerns and is very much given to grumbling at the smallest and the most insignificant shortcoming, is on the whole a great help to a department like the Post Office. The following cases, which came under my personal observations, will fairly illustrate the hopeless ignorance of the majority of village populations in this country. It was at Muhammadabad Post Office in Azamgarh district I was one afternoon sitting under a tree close to the post office talking to some Tahsil and Police officials who had called to see me. The letter-box (a big square newly painted red one, with a big long projecting mouth-piece) was lying at a distance of about 20 yards from where we were sitting, waiting to be built up in the wall. A villager approached with a letter in his hand and inquired where he was to place it. The letter-box was pointed out to him. He went up to the box, took off his shoes at a little distance from it, folded his hands reverently, put his letter in the box, bowed low before it and placed 2 coppers on the ground; retreated a few steps with face towards the box (walking backwards), again bowed very low, then put on his shoes and walked away. I did not discover that he had left 2 coppers on the ground close to the letter-box till some time after he had left. In another case I saw a man drop a letter into the letter-box and then putting his lips close to the mouth of the box, calling aloud (very loud) that the letter was to go to Rewah as if somebody was sitting inside the box to hear and carry out his wishes. In the third case I happened to be standing outside a Sub-Post Office in Gorakhpore district, when a woman of the agricultural class happened to come and post a letter in the box which was at some little distance from where I was standing. The woman after dropping the letter in the box came up to me and begged me to tell her son that she had been very ill for some time, and that the black cow of her husband's brother was dead, and to desire him to come home as soon as possible, or to send some money for her expenses, with a lot of other messages. At first I did not understand what the woman meant, but a little questioning revealed to me the fact that the good woman was under the impression that I was to be the bearer of her letter to her son who was in Trinidad, and she was not certain whether the scribe she had employed in writing the letter had written all what she wished to be written. She took the very prudent precaution of repeating the contents of the letter to me, so that her son may be sure of receiving her whole message verbally through me, if not by letter. Numerous other cases of ignorance of this nature have occasionally come under my observation, but the three mentioned above are quite sufficient to show what class of people we have to deal with in rural parts. The moral of the whole thing is that the subject of educating rural populations in postal matters and disseminating postal information among them, should engage constant attention of postal officers. The end desired is as important as it is difficult to attain."

61. An abstract of highway robberies of the mail will be found on the margin. It is satisfactory to notice that the total number has fallen from 26 to 14, and that 5 only occurred within foreign territory.

A further statement is added detailing the localities in which these highway robberies took place.

	1884-85. Number of Highway Robberies.			1885-86. Number of Highway Robberies.

62. In five out of these 14 cases of highway robbery, prosecutions were instituted, but in one instance only was a conviction secured. In six cases the whole plundered mail, and in four cases the greater part of the mail, was recovered: in the remaining four instances nothing was recovered. Eight of these robberies were attended with the wounding or other maltreatment of the mail runners carrying the mail.

63. As already recorded, two postmasters and three menial servants met with death by drowning during the cyclone and storm-wave which swept over the sea coast in Orissa: much injury was sustained by numerous post offices in that locality, and five offices were wholly destroyed. In Burma three post offices were attacked and burnt by dacoits.

Postal Officials.	1884-85.	1885-86.
Superintendents and Inspectors of Post Offices	332	346
Postmasters, Deputy and Sub-Postmasters, including Village Postmasters	4,937	4,677

Clerks	4,909	5,086
Postmen and other servants	9,326	9,386
Road Establishment	12,413	12,271
Village Postmen	4,111	4,440
Signallers, clerks and other servants employed in combined offices	397	654
TOTAL	37,646	38,829

64. Appendix IX is a statement shewing the strength of the postal establishment entertained in each circle. An abstract is given on the margin.

65. The total payments made to private presses on account of printing work executed for the Department rose from ₹45,723 in 1884-85 to ₹48,197 in 1885-86, the increase being ₹2,474.

Section IX.—Non-Postal Branches of the Department.

Telegraphs.

66. In December 1883, a scheme was introduced for enlarging the operations of the Telegraph Department by utilising the more extensive agency of the Post Office. One effect of this partial amalgamation has been very nearly to double the total number of Government telegraph offices. On the 31st March last, these offices numbered 634 against 318, the number in existence before the amalgamation began. Of these 634 offices, 246 are departmental or exclusively telegraph, while 388 are combined post and telegraph offices worked by the agency of the post office. In seven places the post office is held in the telegraph office and managed by the telegraph master. During the year under review 125 combined offices were opened and four closed as unremunerative, leaving a net increase of 121 offices, 102 of which were at places where telegraph communication had not previously existed: and these 102 wholly new combined offices sent during the year 39,227 telegraph messages. Traffic statistics are given below, showing the work done by combined offices in each circle. Contrasted with the figures for the previous year, the revenue yielded has more than doubled itself:—

Traffic Statistics of Combined Post and Telegraph Offices for the year 1885-86.

Names of Circle.	Number of Combined Offices.	Total charge to the Telegraph Department for working the offices during the year.	Traffic. Number of messages sent.	Number of messages received.	Number of transit messages.	Total.	Revenue realised during the year on sent messages.	Remarks.
		₹ a. p.					₹ a. p.	
Bengal	68	13,206 15 3	41,944	36,780	20,462	99,186	44,206 9 0	The amounts collected on foreign messages are not included in these statistics. The telegraph business in combined offices is chiefly confined to Inland messages. Only a few offices specially authorized by the Director General of Telegraphs receive foreign messages.

(a) Of these one office, "Gooty," was closed on 20th June 1885.
(b) " " "Bethur," was closed on 6th December 1885.
(c) " " "Vambori," was closed on 10th September 1885.
(d) " " "Allanmyo," was closed on 12th November 1885.

67. Another service rendered by the Post Office to the Telegraph Department consists in the receipt of messages at places to which the wire has not yet been extended, and the despatch of these messages by post to the nearest telegraph office. Additional business is thus brought to the Telegraph Department at no enhanced cost to the State. By this means 29,876 messages were transmitted during the year from 1,793 post offices, the total income thus produced being ₹30,010.

68. At the close of the year 253 postal employés had qualified as signallers, and 83 were still under training.

69. From the 1st February 1886, the Indian Post Offices in the Persian Gulf were authorised to act as receiving offices for the Indo-European Telegraph line.

Government Carrying Agency and Passenger Service.

70. No change took place during the year under this head. The only Government bullock train and passenger service lines directly managed by this Department on the 31st March last, were those existing between Umballa and Simla, a distance of 96 miles. This bullock train line has branches to the neighbouring hill stations of Kasauli, Dagshai and Subathu.

Section X.—Financial Results.

71. The receipts and charges of the year are compared with those of the previous year in Appendix X, of which a summary is given below. The figures dealt with in that appendix are exclusively those which appear in the regular accounts of the department. Under the head of "Purely postal service" there has been an increase of ₹5,76,061 in the receipts, and ₹3,14,442 in the charges, representing a net improvement of about 2½ lakhs:—

	1884-85.	
	₹	*₹*
PURELY POSTAL SERVICE.		
Receipts, including sale of Service postage	1,01,50,894	1,07,26,955
,, excluding ,, ,,	85,33,280	90,07,187
Disbursements, including discount on sale of ordinary stamps	92,33,575	95,48,017
Net revenue, including sale of Service postage stamps	9,17,319	11,78,938
NON-POSTAL BRANCH. *Bullock Train.*		
Receipts	1,01,307	1,44,795
Disbursements	1,03,529	1,48,231
Deficit	2,222	3,436
Passenger Service on Mail-cart Lines.		
Receipts and disbursements	1,79,568	2,16,745
Contract Subsidies paid through the Post Office, but employed also largely on general and military considerations.		
Disbursements	5,95,988	5,45,154

These results may be summarised as follows:—

	1884-85.	1885-86.
	₹	*₹*
A net revenue in the purely Postal Department of	9,17,319	11,78,938
A net deficit in the Bullock Train Department of	2,222	3,436

72. Appendix XI is an abstract of Appendix X with the addition of the items noted on the margin, which, though entered in the Civil Accounts, do not pass through the regular accounts kept by this Department. This appendix shows a revenue of ₹1,11,30,863, being a rise of ₹6,59,564 on

Items included in the Finance and Revenue Accounts, but not included in the regular accounts of the Postal Department.

REVENUE, 1885-86.	*₹*	CHARGES, 1885-86.	*₹*
District Post collections, including Zemindari Dâk receipts in Bengal	42,368	District Post establishment, including Zemindari dâks in Bengal	11,85,549
		Stores from England	3,71,390
		Payments under postal arrangements with Lords of the Treasury	6,80,000
		Exchange charges in England	3,30,950

the revenue of the preceding year, and an expenditure of ₹1,30,26,036, being an addition of ₹3,21,496 to the charges of 1884-85. According, therefore, to the Financial and Revenue Accounts, the net deficit of the Post Office has fallen during the year from ₹22,33,241 to ₹18,95,173, an improvement of about 3⅓ lakhs. As explained in the last annual report, the Post Office, though debited with the entire cost of the district post, does not get credit for the whole of the money from which these charges are met. The admission of this credit would reduce the deficit of the year under report to 7½ lakhs.

73. Although heavy charges have been entailed on this Department in working Post Office Savings Banks, no credit at all has heretofore been taken in its accounts for the benefits conferred by this branch of postal business. Great expense is necessarily involved in keeping 150,000 accounts for a business which allows weekly operations on each account, coupled with a minimum limit of 4 annas only for every transaction, in the provision of funds to meet withdrawals at remote places and in contingent charges. Risk of loss is also incurred through frauds attempted by servants of the department or by members of the public. Great advantages are, on the other hand, derived from a system which encourages thrift throughout the length and breadth of the country, and fills the Government Treasury with money obtained at a low rate of interest. In reviewing the financial condition of the department, these expenses and benefits should not be overlooked. A simple way of estimating the value of the Indian Post Office Savings Bank business, is by the adoption of the rates paid to Presidency Banks for similar work. For the management of Government Savings Bank business, the three Presidency Banks receive a commission of ⅜ per cent. per annum on the balance deposited at the beginning of the year, besides the sum of 8 annas for each active account. The application of these rates to the post office would represent a Savings Bank income of ₹1,11,706 for the year under report as indicated in the margin. By the admission of this credit the post office deficit is still further reduced, and amounts only to ₹6,40,285.

	₹ *a.*
⅜ per cent. on a balance of ₹1,34,41,910 on 1st April 1885	50,407 0
A charge of 8 annas on each of 122,599 active accounts	61,299 8
Total.	₹1,11,706 8

74. In estimating the actual financial condition of the Postal Department it has been customary to include the additional items of charge specified on the margin, which appear neither in the Postal nor in the Civil Accounts. But the Right Honourable the Secretary of State for India has decided that these items shall no longer be reckoned as forming part of the expenditure of the department.

Items not included under charges in the Finance and Revenue Accounts.

	1884-85.	1885-86.
	₹	*₹*
Cost of stationery supplied by the Superintendent of Stationery	1,42,532	1,44,856

1883-84, twenty-ninth ditto	598	508	303
1884-85, thirtieth ditto	646	526	308
1885-86, thirty-first ditto	711	559	320

75. A table is given on the margin, which represents the yearly progress made by the Post Office in its correspondence, revenue from private correspondence, and expenditure since the year 1855-56, that being the first complete year following the introduction of cheap postage in the year 1854.

Section XII.—Notices of Post Office Officials.

76. The Post Office was administered by Mr. Fanshawe from the 1st to the 25th April, by Mr. James from that date to the 21st November, and by me during the remainder of the official year. Mr. E. R. Douglas, C.I.E., Deputy Director General of the Post Office, retired on pension during the year after a long and honorable connection with the department extending over 31 years. My thanks are due to Mr. Kisch, Postmaster General of Bengal, for his exertions in connection with the scheme for paying land revenue and cesses by means of money-orders in Bengal, and to Pandit Salig Ram for the success with which this scheme was worked in the North-Western Provinces. I have pleasure here in recording the fact that the Brigadier-General Commanding the Indian Contingent at Suakim recommended to the favourable notice of Government the services of Mr. F. B. O'Shea "for having ably organised and worked the postal arrangements of the Indian Contingent," and those of Mr. Dorabjee Muncherjee Lalcaca "for having most efficiently carried on the duties of Field Postmaster to the great comfort and convenience to the public service and of the troops of the Indian Contingent."

Appendix No. I.

Statement showing the number of Post Offices and Letter Boxes opened and Village Postmen entertained during the year 1885-86 and the total number that stood at the end of the two official years 1884-85 and 1885-86.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters and newspapers, &c.), from that year on to 1872-73, after which a low privileged rate of 1 anna for each letter not exceeding 10 tolas (about 4 oz.) was conceded, thus reducing immensely the postage income.

Column 8.—The figures in this column are useful, as showing the revenue undisturbed by the changes of system in respect of official correspondence explained in the note referring to column 3.

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3 and 4. The comparison commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

(a) Revised so as to include letters to Gibraltar, Malta and places east of Suez.

* Including post-cards from 1879-80.

† 1,712 miles of lines under this head have in 1884-85 been included in column 19.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

FORT WILLIAM,
The 27th January, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 26th JANUARY 1887.

GENERAL REMARKS.—Rain has fallen in Bengal, the North-Western Provinces and Oudh, and Assam. Slight showers have also occurred in the Punjab, Central Provinces, Central India, and Rajputana.

Except in Bombay and the Central Provinces, where slight injury has been caused by blight, rain, and hail, the *rabi* crops throughout the country generally are in good condition and have benefited by the late rainfall.

In Madras the general prospects are favourable, though rain is needed in Madura, Chingleput, and Coimbatore. The rice harvest in Bengal has been completed and the outturn is satisfactory.

In Burma the harvest is well advanced.

Poppy continues to thrive in the North-Western Provinces, but in places in Bengal the plant has been injured by rain and caterpillars.

Coffee-picking in Coorg continues and the season is favourable.

The public health is generally fair. Fever and smallpox prevail in certain districts of the Bombay and Madras Presidencies.

Prices are fluctuating in two and rising in three districts of the Punjab, and are rising in three States in the Rajputana Agency; in Mysore they have fallen in two districts; elsewhere they remain generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Jan. 26th)		
Bellary		Standing crops generally fair, but in parts *dholl* affected by insects, cotton and wheat by disease. Harvest wet and dry grains, yield nearly average. Fever in three taluks; cattle-disease in one.
Kurnool		Standing crops good. Harvest white *cholum*, outturn below average. Smallpox in one, fever in three and cattle-disease in four taluks.
Ganjam		Slight smallpox in two and fever in three divisions. Cholera exists
Kistna		Standing crops generally good. Harvest paddy, outturn below average. River 2·8 feet over anicut. Fever in parts. Cholera abating in three and cattle-disease in two taluks.
Chingleput (Madras)		Standing crops generally fair, but paddy withering in parts of three taluks for want of water. Harvest wet and dry grains, outturn average. Fever and smallpox in parts; slight cholera; cattle-disease in four taluks.
Coimbatore		Standing crops generally good, but in want of water in five taluks. Harvest wet and dry grains, outturn irrigated crops in parts average and in others above average, unirrigated crops poor. Smallpox in one and fever in two taluks.
Tanjore		Standing crops pretty good, but in parts require rain. Harvest wet and dry grains, outturn up to average. Slight cholera in one taluk; cattle-disease exists.
Madura		Standing crops in parts of five taluks withering from want of water; outturn where harvested unsatisfactory.
Malabar		Harvest second crop paddy, outturn about average. Fever in one and slight smallpox in eight taluks. Cattle-disease in one.
Travancore		Harvest of second crop paddy begun. Smallpox and slight fever.
		General Remarks.—General prospects good.
Bombay—(Jan. 26th)		
Karachi	*Nil*	River at Kotri on 24th 3 feet 6 inches against 3 feet 3 inches on same date last year. *Rabi* crops injured by frost in Tatta and Sehwan talukas and by frost and blight in Mirpur Batoro. Fever in ten and cattle-disease in three talukas. Wheat, red rice and *bajri* in Karachi 24, 30, and 34 and in Tatta, 24 and 40 pounds per rupee respectively.
Hyderabad	*Nil*	*Kharif* harvesting still continues. Cotton cultivation damaged by frost in Hyderabad and Hala talukas and *rabi* cultivation in Hyderabad and Dero Mohbat talukas. River at Kotri on 24th 3 feet 6 inches against 3 feet 5 inches on same date last year. Cattle-disease in one and fever in two talukas. Weather cloudy. Wheat 24$\frac{12}{16}$, *bajri* 38, *jowari* 40, white rice 20, and red rice 30 pounds per rupee.
Baroda	*Nil*	Public health good. Smallpox in Kathor taluka of the Navsari division. Crops in fair condition. *Bajri* 29, wheat 22, and rice 23 pounds per rupee.
Surat	*Nil*	Crops healthy. Reaping of *jowari* completed. Slight fever and cough in Bardoli and fever in Mandvi. *Jowari* 39 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Khari* threshing vigorously progressing. *Rabi* sowing completed. Standing crops thriving except linseed and wheat. The former is blighted throughout and the latter in a few places of the district. Gram crops have been injured by insects in Chandor, Baglan, and Kalvan. Public health generally good except in Chandor, Kalvan and Peint where fever and ague prevail. Wheat 25$\frac{7}{16}$, *bajri*, 36$\frac{8}{16}$, and rice 20$\frac{37}{40}$ pounds per rupee. Weather clear and cold.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay)	*Nil*	Abnormal temperature 1° cool on 19th and 20th, fell to 5° cool by 22nd, and gradually rose to 1° cool on 25th. Vapour in air in excess of normal on 19th and 25th, normal on 20th, and in defect of normal on all other days. Wind northerly on 22nd and normal on all other days.
Poona		Rabi crops doing well in all the talukas, except Indapur, Khed, Bhimthadi, and Purandhar where they are slightly injured by blight. Public health generally good. Slight cattle-disease in Indapur and smallpox in Haveli taluka. *Bajri* 44 and *jowari* 59 pounds in the district, and *bajri* 37 and *jowari* 48 pounds per rupee in Poona City.
Ahmednagar	*Nil*	Reaping of *jowari* commenced. Wheat and gram injured. Slight cattle disease in Nevasa. *Bajri* 60 and *jowari* 68 pounds per rupee.
Sholapur	*Nil*	Linseed, gram, *kardi*, and wheat crops blighted in places. Reaping of *rabi* crops commenced in Sangola and Malsiras talukas. Public health good. *Jowari* 70$\frac{1}{2}$ and *bajri* 55$\frac{1}{2}$ pounds per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* in progress. Indigenous cotton generally good. Exotic cotton blighted in Hubli, Nargund, Gadag, Bankapur, and Ron. Wheat blighted in Dharwar, Hubli, Gadag, Hangal, and Ron. Slight fever in Mugud, Mandargi, Hangal, Kod and Ron. Slight cattle-disease in Ranibennur taluka. Rice 25$\frac{1}{2}$ and *jowari* 60$\frac{3}{4}$ pounds per rupee.
Kanara	*Nil*	Second crop thriving in coast. Weather cold. Slight cattle-disease in two and fever in four talukas. Common rice Karwar and district average 13 seers per rupee.
Rajkot	*Nil*	Weather cold. *Kharif* crops all in grain-yard. *Rabi* in good condition except wheat which is blighted in some places. Prevailing diseases: fever and measles. Smallpox has appeared in Rajkot. Wheat 25, *bajri* 26, and *jowari* 33 pound per rupee.
		General Remarks.—Slight rain in the Shikarpur and Upper Sind frontier districts. In several districts standing crops slightly damaged by blight and frost. Fever in parts of eleven, cattle-disease in parts of ten, and smallpox in parts of four districts.
Bengal—(Jan. 26th)		
Chittagong (Jan. 25th)	2·01	Weather cold. Reaping of *aman* nearly over. Rain has much benefited spring crops. Prices steady. A few cases of cholera in town. Public health otherwise good.
Dacca	0·47	Pressing of sugarcane going on. Pulses being gathered. Winter crops doing well. Prospects good. Cholera decreasing. Public health otherwise good.
24-Pergunnahs	0·18	*Aman* harvest nearly over. Estimated outturn above the average. *Rabi* crops doing well. *Mug* and *matar* being reaped. Isolated cases of cholera. Public health generally good.
Khoolna	0·43	Weather cool. *Aman* harvest nearly complete; outturn good. Winter crops doing well. Public health fair.
Moorshedabad	1·25	Weather seasonable. Some heavy rain. Standing crops benefited by it. Prospects good.
Pubna	0·49	Outturn of *aman* very good. Prospects of *rabi* excellent. Public health good.
Dinagepore	1·41	Weather cloudy and cold with rain. Prospects of *rabi* good. Cholera and cattle-disease in two thanas.
Rungpore	0·95	Weather cool and cloudy. Harvesting of *aman* over; outturn average. Mustard and potato being gathered. Cutting and pressing of sugarcane in progress. Public health good.
Midnapore	0·26	Weather cold. Prospects fair. Public health normal.
Burdwan	0·69	Prospects excellent. Fever still prevails, and cholera in thana Rayna.
Bhagulpore	1·82	Weather very cold. Rain has benefited *rabi* crops. Mustard and *kalai* being reaped. Public health good.
Monghyr		Prospects of poppy continue good. Rain has done good to young plants. A few complaints of caterpillars.
Purneah	2·27	Heavy rain has injured *torai* that had been reaped, but was waiting to be threshed. Other *rabi* crops doing well. Health of people and of cattle fair. Rivers low.
Durbhanga	1·51	*Rabi* crops in flower have somewhat suffered from rain. Prices rising. Public health good.
Mozufferpore		Caterpillars still reported among poppy, but outturn expected to be as good as in last year.
Sarun	Rain on 19th, 20th and 21st.	Slight blight observed in Sewan. Prospects of poppy otherwise good.
Chumparun	1·14	Rain somewhat injurious to *rabi* crops. Prices stationary. Public health fair.
Patna	0·94	*Rabi* and poppy crops promising well. In some places poppy has commenced to flower. Public health good.
Gya	0·42	Rice harvest very good. *Rabi* very promising. Poppy damaged by grubs. Public health good. Cattle-disease reported.
Shahabad		Weather cloudy and rainy for some days; now bright. Prospects of poppy fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Hazareebagh . .	1·35	Rain in early part of week. Weather now clear and cold. Prospects of *rabi* crops excellent. Carterpillars still doing damage to poppy; but only smaller plants have been attacked, and damage to date reported to be small. General health good. A few cases of smallpox and cattle-disease.
Cuttack	0·58	Weather cold. Reaping of *sarad* rice nearly completed. Outturn fair. Price of rice falling. Public health generally good, but fever still reported.
		General Remarks—The weather was cold, and general rain fell during the week. Rain was heavy in Behar, in parts of North Bengal and Chota Nagpore, and in Chittagong and Moorshedabad. *Rabi* crops are generally in good condition. Rain has been unfavourable to poppy in Shahabad, and caterpillars are causing damage to this crop in Gya, Mozufferpore and Hazaribagh. Public health is generally fair.
N.-W. Provinces and Oudh—(Jan. 26th)		
Benares (Jan. 25th)	Average ·90 . .	Cloudy weather has prevailed during week, but it is now clear and seasonable. *Rabi* prospects fairly good. Supplies plentiful, but slight rise in prices due to falling off in imports consequent on rainfall. The public health is good, but a few cases of cattle-disease still continue to be reported from the Sadr.
Gorakhpore („ 24th)	·20 at Sadr . .	Weather now bright and cold. *Rabi* looking well. Prices stationary. Health fair.
Fyzabad („ 25th)	Slight rain, averaging ·30 in 4 tahsils.	Weather continues cloudy. *Rabi* looking well. *Sarson* injured by insects. General health of people and cattle fair.
Lucknow („ 24th)	. . . .	Weather very cold. Strong west wind. *Rabi* crops in flower. Poppy doing well. Some injury done to *sarson* by *mahu* insect. Supplies abundant. Prices variable. Public health, good. Cattle-disease gradually dying away.
Rai Barelli („ „)	Ranging from ·30 to ·50 all over the district.	Weather very cold and cloudy. *Rabi* crops generally good except mustard which has been injured in places by insects. Hailstorm in Tahsil Dalmau without any injury. Supplies abundant. Prices almost stationary. General health of people and cattle good.
Pertabgarh („ 25th)	. . . .	It is hoped that the west winds and sunshine of the past few days will avert rust of which there was some fear on account of the late rains. Prospects good.
Allahabad („ „)	Averaging ·10 to ·90 fell in 8 tahsils on 20th; in 4 tahsils the rain was accompanied by hail.	The damage done by hail has however been slight. Weather cold. The crops are generally doing well. Markets full. Prices show a slight rise due to the unsettled weather during the past week. Health good.
Cawnpore („ „)	Rain from ·10 to ·30	Weather cloudy. *Rabi* benefited by recent rain and coming on well. Slight injury by hail in two or three villages. Poppy in thriving condition, but clear and settled weather is now required. Prices stationary.
Farakhabad („ „)	Rain has fallen in one tahsil.	*Rabi* prospects good. Markets well supplied. Health good.
Sitapur („ „)	*Nil*	Weather cold and cloudy for most part of the week. *Rabi* prospects continue favourable. Poppy crops healthy. Supplies ample. Prices stationary. Health good.
Bareilly („ „)	About ·10 . .	The rain has been very beneficial. Crops in excellent condition. Markets steady. General health good.
Ballia („ 24th)	Average ·90 . .	*Rabi* crops benefited. Slight hail fell on 21st. Supplies plentiful. Public health good.
Kumaon („ 25th)	Good fall of rain and snow.	Weather cloudy and cold. *Rabi* crops progressing. Prices stationary. Health good. Cattle-disease on decrease.
Agra („ 24th)	Slight only in two parganas.	Weather somewhat cloudy. Prospects favourable. Prices rising slightly. Health good.
Jhansi („ „)	. . . .	Weather excessive cold. Crops doing fairly well. Markets well stocked.
Banda („ 25th)	Rain on 19th and 20th; slight hailstorm on 19th.	No injury done. Prices stationary. Public health good. Cattle-disease in two villages.
Meerut („ „)	In all tahsils . .	Very unsettled weather. No injury to crops as yet. Prices steady.
		General Remarks.—General rain throughout the week accompanied by hail in some places. Slight injury to crops reported, but the *rabi* has generally benefited by the rain, and prospects continue favourable everywhere. Poppy thriving. Supplies abundant, and prices fairly steady. Public health good. Cattle-disease decreasing.
Punjab—(Jan. 26th)		
Delhi (Jan. 25th)	·47	Health good. Prices fluctuating. *Rabi* prospects good.
Hissar . . .	Slight rain . .	More rain wanted. Health good. Prices fluctuating.
Umballa . . .	·72	Health fair. Prices rising. *Rabi* crops improved.
Jullundur . . .	. . . .	Health good. Prices slightly rising. *Rabi* crops good.
Amritsar . . .	·10	Health good. Prices stationary. *Rabi* crops flourishing.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Ferozepore . .	·30	More rain wanted. Health good. Prices stationary. *Rabi* crops average.
Lahore . . .	Slight rain . .	More rain wanted. Health good. Prices high and stationary. *Rabi* crops good.
Rawalpindi . . .	. . . .	Health good. Prices rising. *Rabi* crops average.
Shahpur . . .	. . . .	Health good. Prices high and stationary. *Rabi* crops withering for want of rain.
Mooltan . . .	. . . .	Health good. Prices rising. *Rabi* crops flourishing.
Dera Ismail Khan .	Slight rain . .	Health good. Prices stationary. *Rabi* crops improved.
Peshawar . . .	·03	More rain wanted. Health fair. *Rabi* crops suffering from want of rain.
		General Remarks—Rain has fallen in the Hissar, Delhi, Umballa Ferozepore, Amritsar, Lahore, Dera Ismail Khan and Peshawar districts; more wanted in the Hissar, Ferozepore, Lahore, Shahpur and Peshawar districts. General health good. Prices rising in the Umballa, Multan and Rawalpindi districts, fluctuating in the Hissar and Delhi districts, elsewhere stationary. Prospects of the *rabi* harvest good, except in Shahpur and Peshawar where crops are suffering from want of rain.
Central Provinces—(Jan. 26th)		
Nagpore (Jan. 25th)	. . . .	Weather clear and cold. *Rabi* crops good. *Til* and linseed being gathered. Fever and cattle-disease prevalent. Prices steady.
Jubbulpore . .	·15	Weather cloudy. Linseed, *masur* and gram unfavourably reported on; other crops fair. Health good. Prices high.
Saugor (Jan. 25th)	·02 Slight showers.	Weather cold and windy. Crops slightly damaged by rain and hail. Health good. Prices unchanged.
Seoni . . .	·03	Weather clear and cool. Health good. Prices steady.
Hoshangabad . .	. . . .	Linseed slightly injured by rust. Fever in places. Prices stationary.
Bilaspur . . .	. . . .	Threshing of *dhan* and *kodo* continues. Wheat and gram good; linseed in flower. Fever prevalent. Cattle-disease in places.
Khandwa . . .	. . . .	Weather clear and cold. Linseed injured by rust, otherwise prospects good. Health good.
Raipur . . .	. . . .	Weather clear. *Rahar* slightly damaged, other *rabi* crops good. Prices steady.
Sambalpur (Jan. 22nd)	. . . .	Weather cloudy. Rice harvest completed. Sugar-making in progress. Health good.
		General Remarks.—Some of the *rabi* crops have been slightly damaged in the northern districts by rain and hail. Prospects otherwise good. Prices steady.
British Burma—(Jan. 26th)		
(Report for week ending Jan. 22nd.)		
Akyab . .	*Nil*	A few cases of cholera in town and district. Cattle healthy. Crops good. Reaping nearly completed.
Bassein . . .	*Nil*	Public health and health of cattle good. Reaping continues.
Rangoon . . .	*Nil*	Two fatal cases of cholera in town. Otherwise public health good.
Amherst (Moulmein) .	*Nil*	Public health and health of cattle good.
Tavoy	*Nil*	Public health and health of cattle good. Harvesting in progress.
Pegu	*Nil*	Public health and health of cattle good. Reaping nearly finished.
Henzada . . .	*Nil*	Public health and health of cattle good.
Prome . . .	*Nil*	Public health and health of cattle good.
Toungoo . . .	*Nil*	Public health and health of cattle good. Reaping nearly completed.
Thayetmyo . .	*Nil*	One fatal case of cholera in town and two in district. Otherwise public health and health of cattle good. Reaping finished.
		General Remarks.—Slight cholera in Akyab, Rangoon, Tharrawaddy, and Thayetmyo. Otherwise public health satisfactory. Cattle healthy. Slight disease in one district. Harvest generally well advanced. No rainfall beyond a few drops in Prome.
Assam—(Jan. 26th)		
Gauhati . . .	·81 During week ending 25th instant.	Weather cloudy and rainy. Public health good. Reaping of *sali* finished. Gathering of mustard in progress.
Sylhet . . .	0·62	State and prospects of the crops favourable.
Cachar . . .	·67	Whether very cold. Reaping of *kalai* continues. Common rice 16 seers per rupee. Health good.
Dibrugarh . . .	1·36	Weather very cold. Gathering of mustard continues. Prospects good. Ploughing for *ahu* commenced. Public health fair.
Mysore and Coorg—(Jan. 26th)		
Bangalore . . .	. . . .	Standing crops in good condition. Prospects of season generally favourable. Public health good. Prices slightly fallen in Kadur and Chitaldroog Districts.
Mysore . . .		
Mercara . . .	. . . .	Harvesting of coffee and rice continue. Season favourable. Prices stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad— (Jan. 26th)		
Amraoti . . .	. . . . .	Weather clear and cool. *Kharif* crops ready for market. *Rabi* in good condition. Wheat 20 and *jowari* 28 seers per rupee.
Akola . . .	. . . . .	Weather clear. Threshing of *kharif* near completion. *Rabi* doing well.
Hyderabad . .	*Nil*	Weeding of *tabi* crops continues. Wheat and gram crops becoming blighted, other *rabi* crops in good condition. Fever prevalent in slight form, also cattle-disease. Prices—wheat 13½, coarse rice 13¼, white *juar* 20¼, and *tur* 17¼ seers per current sicca rupee.
Central India States— (Jan. 26th)		
Indore . . .	...	Weather unusually cold. Health good.
Morar (Gwalior) . .	...	Health and prospects good. Weather seasonable.
Neemuch . . .	...	Crops and health good. Prices slightly rising.
Goona . . .	...	Health and prospects good.
Sutna . . .	·17	Health and prospects good.
Agar . . .	...	Weather cloudy. Health and crops good.
Sehore . .	...	Weather cold and seasonable. Crops flourishing. Prospects good.
Nowgong . . .	·02 (Total 44·83)	Weather cold. *Rabi* prospects fair. Health good. Prices rising.
Rajputana—(Jan. 26th)		
Abu . . .	·01	Weather warmer. Health good.
Sirohi (Jan. 24th)	*Nil*	Tanks drying, wells, health and crop prospects good. Weather clear and cool.
Marwar („ 23rd)	·08 on 19th.	Tanks almost full. Health and crop prospects good. Weather cold. Prices rising.
Meywar („ 24th)	*Nil*	Water in tanks and wells decreasing. Health good. Prices rising. Weather seasonable.
Harowti („ „)	*Nil*	Weather windy. Crops progressing favourably. Prices fallen. Health good.
Jhallawar („ „)	Hail in a few places	Weather cold.
Shahabad . . .	*Nil*	Health better.
Kotah („ 22nd)	*Nil*	General health and crop prospects good, but cloudy weather is causing damage to latter.
Ajmere („ 25th)	·25	High winds. Weather warmer. General health good. Prices slightly rising.
Kerowli („ 22nd)	·26	Tanks and wells drying. Crops good. More rain wanted. Small pox very prevalent. Prices daily rising. Weather very cold.
Dholpore („ 25th)	Rain averaging ·02	Tanks and wells low. Crop prospects fair. Health good. Prices stationary. Weather cold.
Bhurtpore („ „)	·10	Crops flourishing. Weather occasionally cloudy.
Ulwar („ „)	·27	Crops benefited. Health good.
Kherwara („ 24th)	*Nil*	Tanks and wells falling gradually. Crops promising. Health good. Prices unchanged. Weather fine and cold.
Bickaneer („ 22nd)	Bickaneer ·11, districts ·30	Weather cold and cloudy with thunder and lightning. Prices stationary.
Nepal—(Jan. 21st)		
Katmandu (Jan. 21st)	1·03	Cold wintry weather. Snow fell at Katmandu on the low hills in the neighbourhood on the night of the 20th. This is a very unusual occurrence. Prospects fair. Prices still high.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 6.} CALCUTTA, SATURDAY, FEBRUARY 5, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR 1885-86.

No. 141., dated Fort William, the 28th January 1887.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of the Punjab, No. 4874 I., dated the 4th December 1886, forwarding the Revenue Report of Irrigation Works in the Punjab for 1885-86, and the Resolution by that Government reviewing the report.

OBSERVATIONS.—The Capital outlay, exclusive of ₹1,18,67,230, contributed by Native States for the construction of the Sirhind Canal, at the close of the year under review amounted to ₹5,52,99,891, of which ₹22,70,868 was spent during the year.

Of the total outlay ₹5,28,69,702 represents the Capital of canals in operation including all those for which Revenue Accounts have been opened.

The gross revenue assessed on canals, for which Capital Accounts are kept, amounted to ₹40,17,946, and the working expenses to ₹20,19,199; the net assessed revenue was therefore ₹19,98,747, giving a return of 3·61 per cent. on the total Capital outlay and 3·78 per cent. on that of canals in operation. Up to the close of the year the net revenue had exceeded the interest charges by ₹2,00,43,257.

It is noted that the Sirhind, Swat River and Lower Sohag and Para Canals on which an expenditure of ₹2,50,46,489, or nearly half of the Capital outlay has been incurred, are still in a very incomplete state, and that the revenue assessed to them barely covers the ordinary maintenance charges.

2. The following statement compares the assessments of 1885-86 with those of the three previous years :—

Canals.		Assessments.			
		1885-86.	1884-85.	1883-84.	1882-83.
		₹	₹	₹	₹
Permanent	Bari Doab	17,96,938	13,77,388	13,87,047	13,12,256
	Western Jumna	9,16,787	11,40,738	16,96,485	14,22,785
	Sirhind	3,30,374	75,240	3,397	*Nil*
	Swat River	19,102	*Nil*	*Nil*	*Nil*
Inundation	Lower Sohag and Para	17,755	307	*Nil*	*Nil*
	Other systems	12,91,824	13,82,811	13,73,952	12,32,821
	Total	43,72,780	39,76,484	44,60,881	39,67,862

There is a still further decrease in the revenue assessed to the Western Jumna Canal, the cause of which is explained in a subsequent paragraph.

The above table includes under the head "Inundation, Other systems" the revenue assessed to the Muzaffargarh Canals, but as they have no Capital Account, the revenue from these canals is not included in the calculations of profit on Capital outlay. The Lower Sohag and Para Canal is shown separately, as it is a Productive Public Work.

3. The working expenses, both direct and indirect, for the same years are given below :—

Canals.		Working Expenses.			
		1885-86.	1884-85.	1883-84.	1882-83.
		₹	₹	₹	₹
Permanent	Bari Doab	5,52,042	4,99,607	5,62,330	5,29,573
	Western Jumna	5,16,579	4,77,422	4,77,664	4,71,794
	Sirhind	2,20,280	1,45,210	17,491	*Nil*
	Swat River	25,009	*Nil*	*Nil*	*Nil*
Inundation	Lower Sohag and Para	8,139	*Nil*	*Nil*	*Nil*
	Other systems	8,63,695	9,91,376	10,90,169	9,47,693
	Total	21,85,744	21,13,615	21,47,654	19,49,060

Increased expenditure on the Bari Doab Canal is principally due to extensive repairs and improvements to the head works, and on the Western Jumna to the transfer of the maintenance of considerable length of new canal and distributaries from Capital to Revenue; the same causes led to the increased charges on the Sirhind Canal. The decrease in maintenance charges of the Inundation canals is due to the restricted grant to the Upper Sutlej canals and to the necessity for great economy in expenditure from the local Canal Fund on the Multan canals.

4. The net assessed revenue as derived from the previous tables amounted to :—

Canals.		Net assessed Revenue.			
		1885-86.	1884-85.	1883-84.	1882-83.
		₹	₹	₹	₹
Permanent	Bari Doab	12,44,896	8,77,781	8,24,717	7,82,683
	Western Jumna	4,00,208	6,63,316	12,18,821	9,50,991
	Sirhind	1,10,094	—69,970	—14,094	*Nil*
	Swat River	—5,907	*Nil*	*Nil*	*Nil*
Inundation	Lower Sohag and Para	9,616	307	*Nil*	*Nil*
	Other systems	4,28,129	3,91,435	2,83,783	2,85,128
	Total	21,87,036	18,62,869	23,13,227	20,18,802

The increase of nearly 4 lakhs of rupees in the net revenue of the Bari Doab Canal is very satisfactory, the more so as from the explanation given in the Chief Engineer's Report, paragraphs, 43 to 49, hopes may reasonably be entertained that the increase will be permanent. This canal returned 7·75 per cent. on its Capital outlay. It is explained that the seasons were again unfavourable to irrigation from the Western Jumna Canal, and the table of rainfall given at paragraph 23 of the Chief Engineer's Report fully bears out this statement. For two years in succession the tract commanded by this canal has been favoured with an abundant rainfall, and in such seasons the branch canal to Sirsa, alluded to in paragraph 12 of the Resolution by the Lieutenant-Governor, which would pass through a practically rainless country, will be invaluable in steadying the revenue and utilizing water which in such seasons runs to waste. On the Sirhind Canal only one branch was open for irrigation, and the water was still charged for at half rates. The irrigation of the Swat River Canal was assessed at nearly nominal rates (paragraphs 71 and 72 of the Chief Engineer's Report). Water was admitted into 20 miles of the Lower Sohag and Para Canal, and the villages which came under command are said to have largely benefited by the irrigation.

5. In the following statement the areas irrigated in 1885-86 and three previous years are compared :—

Canals.		Areas irrigated.			
		1885-86.	1884-85.	1883-84.	1882-83.
		Acres.	Acres.	Acres.	Acree.
Permanent	Bari Doab	505,357	376,762	390,860	353,615
	Western Jumna	223,322	279,208	472,426	374,243
	Sirhind	152,837	36,102	5,030	*Nil*
	Swat River	44,092	*Nil*	*Nil*	*Nil*
Inundation	Lower Sohag and Para	17,246	645	*Nil*	*Nil*
	Other systems	844,713	921,571	783,752	955,414
	Total	1,787,567	1,614,288	1,652,068	1,683,272

There was an increase of 128,595 acres on the Bari Doab Canal and of 116,735 acres in the irrigation from the Sirhind Canal. The large area irrigated in this first year of the Swat River Canal augurs well for its future success as a remunerative work. The work done by the Western Jumna Canal is not half of what it can do; the causes of the great falling off in the year under review have been explained in a previous paragraph; the facilities for irrigation have been greatly increased in later years, but the ground was so saturated by the heavy

and continued falls of rain that canal water was not wanted. The area irrigated by the Inundation canals was below the average of previous years; it is explained that this was due to the absence of high floods and to the low state of the rivers in August and September.

6. The following table compares the irrigated areas of the principal crops for four years :—

Crops.	1885-86.		1884-85.		1883-84.		1882-83.	
	Acres.	Per cent.	Acres.	Per cent.	Acres.	Per cent.	Acres.	Per cent.
Wheat	640,442	36·33	533,885	33·07	615,836	37·28	593,437	35·25
Rice	147,529	8·25	147,402	9·13	142,025	8·03	140,097	8·80
Millets	168,029	9·44	184,473	11·43	163,724	9·91	165,339	9·82
Cotton	196,851	11·01	180,549	11·50	174,452	10·56	168,586	10·01
Indigo	120,784	7·09	147,913	9·16	119,080	7·24	166,396	9·88
Sugarcane	58,398	3·27	69,610	4·31	52,810	3·20	69,428	4·12
Other crops	439,934	24·61	344,456	21·34	382,941	23·18	370,379	22·03
Total	1,787,567	100·00	1,614,288	100·00	1,652,068	100·00	1,683,272	100·000

There is an increase in wheat due to the extension of irrigation on the Bari Doab, Sirhind and Swat River Canals. The decrease in indigo was on the Western Jumna and Inundation Canals where the seasons were unfavourable to its cultivation.

7. The duty and earnings of each cubic foot of water entering the heads of the permanent canals are compared below :—

Canals.		1885-86.		1884-85.		1883-84.		1882-83.	
		Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
Bari Doab	Acres	59·4	130·8	47·6	115·1	53·0	138·7	53·8	103·9
	Rupees	104·3	305·6	140·4	250·0	145·5	305·6	166·4	233·2
Western Jumna	Acres	80·0	70·0	94·0	81·0	74·0	121·0	66·0	101·0
	Rupees	275·0	151·0	287·0	131·0	211·0	264·0	210·0	221·0
Sirhind	Acres	57·3	125·9	...	...	...	...	...	...
	Rupees	91·4	259·2	...	...	...	...	...	...
Swat River	Acres	...	151·6	...	...	...	...	...	...
	Rupees	...	75·7	...	...	...	...	...	...

The improvement in the duty of water on the Bari Doab Canal is satisfactory. The high duty obtained in this early stage by the Sirhind Canal is attributed to the efficiency of the distributary system, which is also being introduced by degrees on the Bari Doab Canal. On the Swat river the large area irrigated per cubic foot of supply is due to its perfect command over the country and to the stiffness of the soil which requires comparatively few waterings.

8. The following table compares the maintenance charges per acre irrigated for 1885-86 and three previous years :—

Canals.		Per acre irrigated.			
		1885-86.	1884-85.	1883-84.	1882-83.
		₹	₹	₹	₹
Permanent	Bari Doab	1·09	1·32	1·44	1·49
	Western Jumna	2·31	1·71	1·01	1·26
	Sirhind	1·44	4·02	...	...
	Swat River	0·57	...	...	...
Inundation	Lower Sohag and Para	0·47	...	...	...
	Other systems	1·02	1·07	1·39	0·90
On whole area		1·22	1·31	1·29	1·15

The decrease in rate on the Bari Doab and Sirhind Canals is due to the large increase in areas irrigated, and the increase on the Western Jumna Canal to the increased cost of maintenance and to a diminution in area. The Swat River and Lower Sohag and Para Canals are still unfinished, and the rate struck on the sums actually charged to repairs may be somewhat misleading, as the maintenance of distributaries for the first year after completion is charged to the estimate for construction.

9. The balance of canal revenue uncollected at the close of the year out of a total demand of ₹18,38,765 amounted to ₹61,813; for the years 1884-85 and 1883-84 the outstanding balances were ₹38,372 and ₹36,945; nearly half of the outstandings of the year under review are on the Bari Doab Canal. In paragraph 53 of the Chief Engineer's Report it is mentioned that the attention of the Local Revenue authorities has been drawn to the necessity for prompt realization of canal revenue.

10. With reference to remarks by the Chief Engineer in his report relating to the probable early completion of the Sirhind, Western Jumna, Swat River and Lower Sohag and Para Canals, and also to the separate report announcing the opening of the Sidhnai Canal for irrigation in May 1886, the Government of India would invite the early submission of reports and estimates for the Kharif Branch of the Western Jumna Canal and of the Jhelum Canal project, which are mentioned in paragraph 12 of the Resolution by His Honor the Lieutenant-Governor of the Punjab, and proposals for any other irrigation schemes which the Lieutenant-Governor considers will be useful and remunerative.

Order.—Ordered, that copies of this Resolution and of the Report, and of the Resolution by the Punjab Government, be forwarded to the Secretary of State, and to the Finance and Commerce and Revenue and Agricultural Departments of this Government for information.

Also, that copies of this Resolution be forwarded to the Government of the Punjab for information and guidance.

Also, that copies of this Resolution and of the Report, and Resolution by the Punjab Government, be forwarded to the Local Governments and Administrations noted in the margin, for information.

The Governments of Madras, Bombay, Bengal and North-Western Provinces and Oudh, in the Public Works Department.
The Chief Commissioners, Central Provinces and Burma.
The Foreign Department for communication to the Resident at Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajputana.

Also, that this Resolution and the Resolution by the Local Government, with a few selected tables, be published in the Supplement to the *Gazette of India*.

R. HOME, *Colonel, R. E.*,
Deputy Secy. to the Govt. of India.

IRRIGATION BRANCH.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department,—No. 4873 I., dated 4th December, 1886.

Read—

Revenue Report of the Chief Engineer, Irrigation Works, Punjab, for the year 1885-86.

Resolution.—The result of the working of the Punjab Canals for the financial year was as follows :—

1. The percentage of the net Revenue on the Capital invested is by assessments a profit of ₹0·12 and by collection a loss of ₹0·82, as compared with a profit of ₹1·00 and ₹0·70 in the previous year.

2. The area irrigated in the year was 1,787,567 against 1,614,288 acres in the previous year. On the Western Jumna Canal there was a further decrease

of 55,886, but in the Bari Doab Canal there was a large increase of 128,595; and on the Sirhind Canal of 116,735 acres. The Swat River Canal, which was opened on 12th February 1885, irrigated 44,092 acres. On the Inundation Canals there was a falling-off of 60,257 acres.

3. The Capital invested by Government amounted at the close of the year to R5,52,99,891, to which must be added R1,18,67,230 contributed by Native States to the Sirhind Canal. The total money invested was therefore R6,71,67,121, of which R32,63,317 have been expended on a famine relief and insurance work —the Swat River Canal.

4 The Capital expenditure during the year was R22,70,868. The loss after paying all charges and the interest on the Protective and Productive Works amounted to R4,96 234, in which is included a credit of R44,922 on account of adjustments of previous year's accounts. If this sum is not taken into account the total loss for the year is R5,41,156.

5. In the expenditure for the year under review the following items have been included: R5,06,277 interest charges on Swat River Canal to end of 1884-85 and R1,041 on account of arrears of interest for 10 years on loss by exchange, now shown as a direct charge against the Capital Account of the Sirhind Canal. The total surplus receipts at the close of the year amounted to R2,00,43,257.

PERMANENT AND INUNDATION CANALS IN OPERATION CLASSED AS PRODUCTIVE AND PROTECTIVE WORKS.

6. The Capital expenditure during the year on the Permanent Canals in operation and on the Lower Sohag and Para Inundation Canals, which is also classed as a Productive Work, was R15,13,193, and the Capital invested at the end of the year was R5,14,31,762. The gross revenue collected was R25,61,018, the working expenses R13,22,049, and the interest charge R19,35,652. The result is a loss of R6,96,683, or R1·35 per cent. on the Capital invested. The revenue assessed for the year was R30,80,956, and the loss R1,76,745, or R0·34, after defraying all charges against both Capital and Revenue.

INUNDATION CANALS.

7. There is a decrease of R16,581 in the Capital account of the Inundation Canals in operation due to sales of stores from the Madhopur Workshops. The total Capital invested to the end of the year was R18,77,334.

8. The revenue collected during the year was R9,57,919; the working expenses R6,97,150. The profit was therefore R2,60,769, or R13·89 per cent. on the Capital invested.

9. The revenue assessed for the year was R9,36,990, which will give a net profit of R2,39,840, or R12·78 per cent., after paying working expenses.

10. The following table shows the area irrigated on Permanent and Inundation Canals during the year under review and for the four preceding years:—

Canals.	1885-86.	1884-85.	1883-84.	1882-83.	1881-82.
	Acres.	Acres.	Acres.	Acres.	Acres.
Permanent	925,608	692,072	868,316	727,858	668,547
Inundation	861,959	922,216	783,752	955,414	1,019,178
TOTAL .	1,787,567	1,614,288	1,652,068	1,683,272	1,687,725

11. As before stated, there was a further decrease in the area irrigated by the Western Jumna Canal as well as by the Inundation Canals, and an increase on all the other Permanent Canals.

12. The completion of the report and estimates of the canal from the Jhelum has been unavoidably delayed. A project for a kharif branch from the Western Jumna Canal to Sirsa has been under consideration during the present year, and will shortly be submitted for approval.

WESTERN JUMNA CANAL.

13 There was a further decrease during the year of 55,886 acres in the area irrigated by this canal, which was due to the abundant and timely rainfall which made the cultivators generally independent of canal water.

14. By collections there is a loss of 0·19, and by assessments a net profit of 0·11 per cent. The percentages of net profit in the previous year were 7·99 and 2·86, respectively.

15. The cost of Establishment was 1·22 per acre against 0·91 in the previous year; the working expenses amounted to 2·31 per acre against 1·71 in 1884-85. The increase in the rates is due to the falling-off in the area irrigated and to the increase in share of Establishment debited to the Revenue Account.

16. The balance of profit to the credit of this canal at the close of the year was R2,78,90,548.

BARI DOAB CANAL.

17. There was a large increase of 128,595 acres in the area irrigated by this canal, due to a better supply of water, to the increase in the mileage of distributaries, and to the construction of minors and amalgamation of village watercourses. Great credit is due to the officers concerned for their efficient administration of this canal.

18. The net profits from collection and assessments were 2·26 and 3·92 per cent., against 1·39 and 1·69 in the previous year.

19. The charges for Establishment and Working Expenses were 0·451 and 1·09 per acre, against 0·506 and 1·33 in the previous year. The decrease is due to the larger area irrigated.

20. The charges and interest at the debit of this canal at the close of the year amounted to R47,42,930, which is R3,63,936 less than in previous year.

SWAT RIVER CANAL.

21. This canal was opened for irrigation on the 12th February 1885, and water was given for the kharif crop of that year free of charge. Subsequent crops will be charged for at progressive rates, and full crop rates will be realized for rabi of 1887-88. The area irrigated during both crops of the year was 44,092 acres.

22. The collection and assessments show a loss of 4·55 and 3·97 per cent. on the Capital invested.

23. The charges for Establishment and Working Expenses were 0·21 and 0·57 per acre irrigated.

24. The charges and interest at the debit of the canal at the close of the year amounted to R6,54,710.

SIRHIND CANAL.

25. The area irrigated was 152,837, or 116,735 acres more than in the previous year. The irrigation was entirely from the Abohar Branch.

26. The loss by collection and assessments were respectively 4·12 and 3·20 per cent. on the Capital invested.

27. The charges for Establishment and Working Expenses were 0·35 and 1·44 per acre against 0·99 and 4·02 in the previous year. The improvement is due to the irrigation of a larger area.

28. The charges and interest at the debit of this canal at the end of the year was R72,87,808.

LOWER SOHAG AND PARA CANAL.

29. Only a short length of this canal was in operation during the year.

30. The area irrigated during the year was 17,246 acres.

31. The loss by collection and assessments was 2·78 and 0·84 per cent. respectively.

32. The charges for Establishment and Working Expenses were 0·09 and 0·47 per acre irrigated.

33. The charges and interest at the debit of the canal at the close of the year amounted to ₹ 20,653.

UPPER SUTLEJ INUNDATION CANALS.

34. The area irrigated during the year was 75,843 acres against 90,074 in the previous year. The decrease was due to the absence of high floods, which alone can irrigate the more elevated lands.

35. By collection there was a profit of 2·35 against a loss of 3·13 per cent. in the previous year, and by assessments a loss of 2·57 against 1··7 per cent.

36. The charges for Establishment and Working Expenses were 0·76 and 1·49 per acre against 0·46 and 1·30 in the previous year. The increase was due to the smaller area irrigated.

37. The debit balance of working expenses at the end of the year was ₹38,269.

LOWER SUTLEJ AND CHENAB INUNDATION CANALS.

38. The area irrigated by these canals was 43,846 acres less than in the previous year, but there are doubts as to the correctness of the area recorded for the year, and the matter is under investigation.

39. The profit was 208·74 against 199·45 per cent. in the previous year.

40. The cost of Establishment was 0·21 per acre against 0·20 in the previous year, and of Working Expenses 1·03 per acre against 1·13.

41. The share of Land Revenue was ₹3,20,094, as compared with ₹3,18,035 in the previous year. The increase was due to fewer remissions having been granted during the year under review.

42. The cost of irrigation to cultivators was 1·74 against 1·46 per acre during the previous year, the increase of rate being due to the smaller area reported to be irrigated.

43. The balance at the credit of these canals at the end of the year was ₹52,82,550.

INDUS INUNDATION CANALS.

44. The area irrigated by these canals was 172,122 acres against 186,302 acres in the previous year. The decrease was due to the low state of the river in August and September.

45. There was a slight profit of 0·49 in the working of these canals, compared with a loss of 3·46 per cent. in the previous year. The improvement was due to a large increase in the miscellaneous revenue and to a diminution in the maintenance charges.

46. The cost of Establishment and Working Expenses was 0·47 and 1·37 per acre against 0·41 and 1·36 per acre in the previous year. The slight increase was due to the smaller area irrigated.

47. The share of Land Revenue was ₹1,59,646 or ₹82 less than in the previous year.

48. The balance at the credit of these canals up to the end of the year was ₹31,145.

MUZAFFARGARH INUNDATION CANALS.

49. The area irrigated by these canals during the year was 252,260 acres against 258,035 acres in the previous year, but was above the average of the four preceding years.

50. The profit of the year amounted to ₹1,78,853 against ₹1,81,388 in the previous year, but ₹9,436 have been erroneously omitted in the credit afforded for the share of Land Revenue. With this correction the profit would be ₹1,88,289 or ₹6,90, more than in the previous year. The improvement was due to less expenditure on Extensions and Improvements, and Establishment charges.

51. The cost of Establishment and Working Expenses was 0·15 and 0·66 per acre irrigated against 0·18 and 0·75 in the previous year. This decrease was due to the smaller expenditure incurred, as stated in the previous paragraph.

52. The share of Land Revenue was ₹2,41,951 against ₹2,40,660 in the previous year.

53. The cost of irrigation to the cultivators was 1·35 per acre against 1·32 in the previous year.

54. The balance at credit of these canals at the end of the year was ₹10,92,903.

SHAHPUR INUNDATION CANALS.

55. The area irrigated was 15,727 acres against 14,553 acres in the previous year. The increase was due to irrigation having been extended to the lands of 13 new villages.

56. The percentage of profit on the Capital outlay was 34·04 against 13·91 in the previous year.

57. The balance of profit at credit of these canals at the end of the year was ₹90,035.

GENERAL REMARKS.

58. The statistical statements prescribed by Government of India's letter No. 1661., dated 11th July 1885, and lithographic maps of canals in the various Irrigation Circles are bound up with the Chief Engineer's Report.

59. This being the last report which will be submitted by Colonel R. Home, the Hon'ble the Lieutenant-Governor takes this opportunity of expressing his sense of the care and ability with which this Department has been administered by that Officer, and of the benefits which have resulted from the numerous works of irrigation which have been initiated and carried out by Colonel Home during his long connection with the canals of this Province.

By Order of the Hon'ble the Lieutenant-Governor,

F. J. HOME, *Major, R.E.*,
Offg. Joint Secy. to Government, Punjab,
P. W. D., Irrigation Branch.

Statement showing the Financial Results of Irrigation Works in the Punjab up to and for the Year 1885-86, the Revenue Account being based on the Collections for the Year.

R. GARDINER, *Captain, R.E.*,
Offg. Under-Secretary

FORT WILLIAM,
The 3rd February, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 2nd FEBRUARY 1887.

GENERAL REMARKS.—Except in Bengal, Assam, the North-Western Provinces and Oudh, Punjab, and Upper Burma where slight showers have occurred in a few districts the week under report has been rainless.

The reaping of the early *rabi* crops has commenced in Bombay and Bengal and except in the Punjab where more rain is still wanted the standing *rabi* crops throughout the country are generally in excellent condition and promise a good harvest. In Madras the general prospects are good but in several districts water is wanted. In Bombay standing crops have in some places been injured by blight, frost, and insects.

In Bengal the *aman* rice has been gathered with a good outturn, and in the districts of both Upper and Lower Burma the harvest is rapidly approaching completion.

Poppy continues to thrive in the North-Western Provinces and Oudh, and a fair crop is expected though in two districts the weather is unfavourable.

In Bengal, the North-Western Provinces and Oudh, and Assam the crushing of sugarcane is in progress, and in the last-named Province the mustard crop is being got in.

The public health continues generally satisfactory throughout the country.

Prices show an upward tendency in the North-Western Provinces and Oudh and are rising in most districts of the Punjab and in three States in the Rajputana Agency. In Coorg they are falling but are generally stationary elsewhere.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 2nd)		
Bellary		Standing crops generally fair, but in parts *dholl* affected by insects, cotton and wheat by disease, and white *cholum* withered. Harvest wet and dry crops, yield paddy and sugarcane nearly average, dry crops short. Fever in three and cattle-disease in four taluks.
Kurnool		Standing crops good. Harvest white *cholum*, yield below average. Fever in six, smallpox and cattle-disease in three taluks increasing.
Ganjam		Slight smallpox in four, fever and cattle-disease in three divisions. Cholera almost disappeared.
Kistna		Standing crops generally good. Harvest paddy, outturn below average. River 2·65 feet over anicut. Fever in parts; cholera abating in two taluks.
Chingleput (Madras)		Standing crops generally fair, but in parts indifferent owing to want of rain. Harvest paddy and *varagu*, outturn below average. Slight smallpox; cattle-disease in four taluks.
Coimbatore	Average ·04	Standing crops generally good, but in parts withering from want of water. Harvest wet and dry grains, outturn paddy and *ragi* generally above average, rest poor. Fever in one and smallpox in two taluks.
Tanjore		Standing crops generally good, but in parts require rain. Harvest wet and dry grains, outturn up to average. Cattle-disease in two taluks.
Madura		Standing crops in parts of four taluks withering from want of water; outturn, where harvested, unsatisfactory.
Malabar		Harvest second crop paddy, outturn average. Fever in one, slight smallpox in eight, and cattle-disease in two taluks.
Travancore		Harvest of second crop paddy continuing. Smallpox and fever prevalent in parts.
Bombay—(Feb. 2nd)		*General Remarks*—General prospects good.
Karachi	*Nil*	River at Kotri on 27th 3 feet 4 inches against 3 feet 7 inches on same date last year. Slight shock of earthquake on 30th evening. *Rabi* crops injured by crickets in Sehwan and Mirpur Batoro talukas. Fever in nine talukas. Wheat, red rice, and *bajri* in Karachi 24, 31, 34, and in Mirpur Batoro 24, 40, and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	*Kharif* harvesting still continues. *Rabi* cultivation damaged by frost in Badin and Bago Tando talukas. River at Kotri on 31st 4 feet 5 inches against 4 feet 3 inches on same date last year. Fever in four and cattle-disease in one taluka. Wheat 24, *bajri* 38, *jowari* 40, white rice 20 and red rice 30 pounds per rupee.
Ahmedabad	*Nil*	Standing crops good. Public health good. Wheat 29 and *bajri* 33 pounds per rupee.
Baroda	*Nil*	Public health fair. Smallpox in parts of Navsari and Kadi divisions. Crops in fair condition. *Bajri* 34, wheat 19 and rice 23 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Surat	*Nil*	Crops healthy. Fever and cough in Bardoli and fever in Mandvi. *Jowari* 41 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	*Rabi* sowing completed. *Kharif* threshing vigorously progressing. Public health generally good. Measles and cattle-disease prevail in Sinnar. Fever and ague as usual during the present season of the year in Peint. Wheat 25⅞, *bajri* 36²⁸⁄₄₀, and rice 20³³⁄₄₀ pounds per rupee. Weather cold.
Colaba (Bombay)	*Nil*	Abnormal temperature *nil* on 26th and 28th, 1° cool on 27th, 29th and 30th, and 2° cool on 31st and 1st. Vapour in air in excess of normal from 26th to 31st, and in defect of normal on 1st. Wind normal.
Poona	*Nil*	Wheat, gram, and *jowari* slightly injured by blight in places throughout the district, except in Sirur and Mawal talukas where crops are doing well. Reaping of *jowari* and threshing of rice in progress in Bhimthadi and Haveli talukas respectively. Public health generally good. Slight cattle-disease in Indapur and smallpox in Haveli taluka. *Bajri* 44 and *jowari* 60 pounds in the district, and *bajri* 37 and *jowari* 48 pounds per rupee in Poona City.
Ahmednagar	*Nil*	Reaping of *jowari* commenced. Wheat and gram injured. Slight cattle-disease in Newasa. *Bajri* 57 and *jowari* 69 pounds per rupee.
Sholapur	*Nil*	Linseed, gram, *hardi*, cotton, and wheat crops blighted in places. Reaping of *kharif* crops almost completed and that of *rabi* commenced. Public health good. *Jowari* 70⅛ and *bajri* 55⅛ pounds per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* nearly completed. Indigenous cotton generally good. Exotic cotton blighted in Hubli, Gadag, Bankapur, and Ron. Wheat blighted in Dharwar, Hubli, Gadag, Ranibennur and Ron. Slight fever in Mugud, Mundargi, Hangal, Kod, and Ron. Slight cattle-disease in Ranibennur. Rice 25 and *jowari* 61 pounds per rupee.
Kanara (Feb. 2nd)	*Nil*	Crops in good condition. Strong north-west winds on coast. Slight cattle-disease in one and fever in three talukas. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot	*Nil*	Weather cold. Measles prevailing in some parts of Hallar: also at Porbandar. Smallpox in Rajkot. Wheat 24, *bajri* 25, and *jowari* 33 pounds per rupee.
		General Remarks.—Reaping of late *kharif* and early *rabi* crops going on in several districts. Standing crops injured by blight in some parts of the Deccan and Southern Maratha Country, and by frost and insects in parts of Hyderabad, Karachi, and the Panch Mahals. Fever and cattle-disease in parts of eleven and smallpox in parts of five districts.
Bengal—(Feb. 2nd)		
Chittagong (Feb. 1st)	0·10	Weather seasonable. *Aman* harvested with good outturn. Prospects of winter crops fair. Prices of food-grains steady. Public health good.
Dacca	0·36	Winter crops doing well. Sugarcane being pressed and pulses gathered. Rain has done much good to *boro* paddy. Cholera decreasing.
24-Pergunnahs	*Nil*	Threshing and storing of *aman* going on; outturn satisfactory. Sugarcane is being cut and pressed. Price of common rice 18 to 20½ seers per rupee. Public health good. A few sporadic cases of cholera reported.
Khoolna	0·37	Weather cool. *Aman* harvest nearly over; outturn good. Winter crops doing well. Public health fair.
Moorshedabad	Slight rain.	Prospects of crops good, notwithstanding some injury in places from hail. Public health good.
Pubna	0·46	Weather seasonable. Outturn of *aman* good. Winter crops promising. Rain has allowed land to be prepared. Public health good.
Dinagepore	*Nil*	Weather very cold and bleak. Prospects of *rabi* good. Cattle-pox reported from Pirganj and Himtabad, and cholera from Ranisankoil and Birgunge. Rice 27 seers per rupee.
Rungpore	*Nil*	Weather cold. *Rabi* crops doing well, except in sadr sub-division. Mustard being gathered. Land being ploughed for *aus* and jute crops. Public health good.
Midnapore	*Nil*	Weather still cold. Rice harvest good. Prospects of *rabi* fair. Public health improving.
Burdwan	*Nil*	State and prospects of crops good. Common rice 21 to 28 seers per rupee. Public health fair.
Bhagulpore	*Nil*	Prospects of crops continue favourable. Rice 21 seers 7 chittaks per rupee. Public health good.
Monghyr		Prospects of poppy continue good.
Purneah	*Nil*	Prospects of cold weather crops excellent. Coarse rice 24 seers per rupee. Rivers low. Health of people and cattle good.
Durbhanga	*Nil*	*Rabi* prospects of favourable. Late rain did slight injury to *rahar*, and other crops now flowering. Prices rising. Public health generally good.
Mozufferpore		Prospects of poppy improved by recent rain.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Sarun		Weather on the whole not favourable in Chupra Kothi. Damage done by blight estimated at one anna. Condition of poppy otherwise good.
Chumparun	*Nil*	Propects of *rabi* and poppy continue favourable. Prices stationary. Public health fair.
Patna	*Nil*	Prospects of *rabi*, poppy, *rahar* and cotton fair. Public health generally good.
Gya	*Nil*	Prospects of *rabi* good. Weather fair. Prospects of poppy have improved. Public health fair. Cattle-disease reported.
Shahabad	*Nil*	Weather unfavourable to poppy. Low-lying fields slightly injured.
Hazareebagh	*Nil*	Weather cold and seasonable. *Rabi* doing well. Caterpillars have done great damage to smaller poppy plants, but a fair outturn expected. Public health good. Cattle-disease reported from Ramghur Station.
Cuttack	*Nil*	Weather fair. Reaping of paddy completed with good outturn. *Dalua* paddy and tobacco growing well. Price of rice falling. Public health generally good.
		General Remarks.—Weather cold. Showers fell in the eastern and central districts. *Aman* harvest has been got in with good outturn. *Rabi* crops are very favourably reported on. Poppy is generally expected to be a fair crop, but weather is unfavourable in Saran and Shahabad. Sugarcane is being pressed, and mustard and other early *rabi* crops are being gathered. Recent rain has facilitated ploughing for early crops, which has begun. Public health is generally good, but fever is prevalent in Backergunge and cholera in Tipperah.
N.-W. Provinces and Oudh—(Feb. 2nd)		
Benares (Feb. 1st)		Weather bright and seasonable. *Rabi* crops doing generally well. Wheat and *sarson* somewhat injured in places by blight. Markets well stocked. Prices unaltered. Public health good.
Ballia („ 31st)		Sky clear. West wind prevailing. *Rabi* prospects good. Supplies plentiful, but prices show a slight rise. Public health good.
Gorakhpore („ „)		Weather bright and cold. *Rabi* looking well. Prices stationary. Health fair.
Fyzabad (Feb. 1st)		Weather seasonable. Crops promising. Prices rising owing to export. Supplies sufficient. General health good.
Lucknow (Jan. 31st)		Weather clear and cool. West winds. Gram in ear. Poppy being weeded and watered. Sugarcane being pressed. Supplies ample. Price of wheat rising, that of gram falling. Public health good. No cattle-disease.
Rai Barelli („ „)		Weather cold and clear. Strong westerly wind. The crops are generally doing well. Markets well supplied. Prices almost stationary. General health of people and cattle good.
Pertabgarh (Feb. 1st)		Prospects of the *rabi* crop generally good. Poppy is in flower and promises well. Prices stationary. Health of the people and cattle good.
Allahabad („ „)	*Nil*	Weather cold and clear. Crops flourishing. Markets well stocked. Prices stationary. Health good.
Cawnpore („ „)		Weather cloudy at times. *Rabi* progressing. Poppy in thriving condition. Prices almost stationary. Cattle-disease in one place.
Farakhabad („ „)	*Nil*	*Rabi* prospects good. Markets well supplied. Health good.
Sitapur („ „)		The weather has been cold and seasonable during the week. Prospects continue favourable.
Bareilly („ „)		Late rain has benefited poppy. Sky alternately clear and cloudy. Markets steady. General health good.
Banda (Jan. 31st)	*Nil*	Weather seasonable. *Rabi* coming on well. Prices show a tendency to rise. Public health good. Cattle-disease in five villages.
Kumaon („ „)		Weather fair and cold. Rain sufficient for *rabi*, which is progressing. Prices stationary. General health good. Cattle-disease on decrease.
Agra („ „)	*Ni*	Prospects favourable. Prices stationary. Health good.
Jhansi („ „)		Prospects continue favourable. Supplies ample. Health of people and condition of cattle good.
Meerut (Feb. 1st)	*Nil*	Weather clear and cold. Crops much benefited by recent rain, but rust reported in Sardhana. Supplies sufficient. Prices steady. Health good.
		General Remarks.—Weather clear and cold. *Rabi* crops flourishing and prospects good everywhere. Markets well supplied, but prices show an upward tendency. Public health good. Slight cattle-disease in a few places.
Punjab—(Feb. 2nd)		
Delhi (Feb. 1st)	·46	Health good. Prices slightly rising. *Rabi* crops good.
Hissar	*Nil*	Rain much needed. Health good. Prices rising.
Umballa		Health good. Prices rising. *Rabi* prospects improving by recent rain. Average yield expected.
Jullundur		Health good. Prices stationary. *Rabi* crops good; sugarcane crop in Jullundur tahsil damaged by frost.
Amritsar	Slight rain	Health good. Prices rising. *Rabi* crops flourishing.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Sialkot		Health good. Prices rising. *Rabi* crops flourishing. Anticipated outturn good.
Ferozepore	·10	More rain wanted. Health good. Prices rising. *Rabi* crops not good on *barani* lands.
Lahore		Health good. Prices almost stationary. *Rabi* crops good, but rain is wanted.
Rawalpindi		Health good. Prices rising. *Rabi* crops average.
Shahpur		Health good. Prices high and rising. Crops suffering for want of rain.
Mooltan		Health good. Prices almost stationary. *Rabi* crops good, but rain is wanted.
Dera Ismail Khan	Slight rain	Health good. Prices almost stationary. *Rabi* crops improved.
Peshawar	·01	More rain needed. Health fair. Prices rising. *Rabi* crops suffering from want of rain.
		General Remarks.—Slight rain in the Delhi, Ferozepore, Amritsar Dera Ismail Khan, and Peshawar districts. Health good. Price, stationary in the Jullundur, Lahore, Mooltan, and Dera Ismail Khan districts, elsewhere rising. Crop prospects good, but more rain is wanted.
Central Provinces— (Feb. 2nd)		
Nagpore (Feb. 1st)		Linseed being gathered, outturn poor in one tahsil. Fever and cattle-disease prevalent. Prices steady.
Jubbulpore		Linseed and wheat slightly injured by rust. Health good. Prices higher.
Saugor		Prospects good. Smallpox in places. Prices steady.
Seoni		Prospects of *rabi* fair. Health good. Prices steady.
Hoshangabad		Linseed slightly injured in places. Fever in two tahsils. Prices stationary.
Khandwa		*Tur* slightly injured by cold. Prospects of *rabi* good. Prices steady.
Raipur		Threshing of rice and *kodo* continues. Prospects of *rabi* crops good. Prices stationary.
Bilaspur		Weather cloudy. Threshing of *dhan* continues. *Rabi* crops doing well. Fever and cattle-disease prevalent.
Sambalpur (Jan. 20th)		Sugarcane pressing nearly completed. Cholera in places.
		General Remarks.—Weather clear and cold except in Bilaspur. Prospects of *rabi* crops generally favourable. Threshing of *kharif* continues in Chhattisgarh. Fever and cattle-disease in places. Prices steady.
Burma—(Feb. 2nd) (Report for week ending 29th January 1887.)		
Akyab	*Nil*	A few cases of cholera in district. Otherwise public health and health of cattle good. Crops good. Reaping nearly completed.
Bassein	·09	Public health and health of cattle good. Harvest almost in.
Rangoon	*Nil*	Public health and health of cattle good.
Amherst (Moulmein)	*Nil*	Public health and health of cattle good.
Tavoy	*Nil*	Public health and health of cattle good. Harvesting finished.
Pegu	*Nil*	Public health and health of cattle good. Reaping nearly finished.
Henzada	*Nil*	Slight cholera in one township. Cattle healthy.
Prome	*Nil*	Public health and health of cattle good. Reaping over. Weather seasonable.
Toungoo	·17	Public health and health of cattle good. Reaping nearly over.
Thayetmyo	*Nil*	Two fatal cases of cholera in district. Otherwise public health and health of cattle good. Reaping finished.
Shwebo	·50	Public health and health of cattle good. Food-supply sufficient for home consumption. Prices normal. *Mayind.* Cultivation in South and West progressing satisfactorily.
Kyaukse	*Nil*	Public health fairly good. Crops fully reaped.
Myingyan	·05	Public health fair. Food-supply good. Prices ordinary.
Minbu	*Nil* (Total to date ·34)	Public health good. Nearly all paddy taken in. Food-supply sufficient. Prices normal.
Yamethin	*Nil* (Total to date ·89)	Public health good. Season so far favourable.
		General Remarks.—A few cases of cholera in four districts of Lower Burma, and slight cattle-disease in one. Harvest all but over. Reports received from eight Upper Burma districts, and but for a little cholera in Pagan, the public health is good. Food-supplies sufficient and prices normal. Crops being got in. Slight rain has fallen in most districts.
Assam—(Feb. 2nd)		
Gauhati	·20 During week ending 1st instant.	Weather cloudy and rainy. Public health good. Gathering of mustard nearly finished. Crushing of sugarcane commenced.
Sylhet	0·03	Mustard and linseed partly damaged by insects in Habiganj and South Sylhet sub-division, otherwise state and prospects of the crops good.
Cachar	·12	Weather very cold. Reaping of *kalai* finished. Reaping of mustard progressing. Common rice 16 seers per rupee. General health good.
Dibrugarh	·24	Weather very cold. Ploughing for *ahu* progressing. Cholera still lingering in Dhakuakhana.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg— (Feb. 2nd)		
Bangalore		Standing crops in good condition except in parts of the Tumkur district where blight prevails. Prospects of season continue favourable. Public health good. No material change in prices.
Mysore		
Mercara		Prospects favourable. Prices slightly fallen.
Berar and Hyderabad— (Feb. 2nd)		
Amraoti		Weather clear and cool. *Rabi* crops in good condition. Wheat 20 and *jowari* 28 seers per rupee.
Akola		Weather clear and cool. *Kharif* threshing completed. *Rabi* crops doing well.
Hyderabad	*Nil*	Wheat and linseed crops becoming blighted. Fever and ague prevalent in almost all taluks. Prices—wheat 13¾, coarse rice 12, white *juar* 18¼, yellow *juar* 21, and *tur* 15 seers per current sicca rupee.
Central India States— (Feb. 2nd)		
Indore	*Nil*	Weather cold and high westerly winds. Health good.
Morar (Gwalior)		Health and prospects good. Weather seasonable.
Neemuch		Crops thriving. Weather fine. Health good.
Sutna		Health and prospects good.
Agar		Health and crops good.
Sehore		Weather warm. Opium and other crops flourishing.
Nowgong		Weather cold. Prospects fair. Health good. Prices rising.
Rajputana—(Feb. 2nd)		
Abu (Feb. 2nd)	*Nil*	Weather seasonable. Health good.
Sirohi (Jan. 31st)	*Nil*	Tanks drying up. Wells, health and prospects good. Weather fine and cool.
Marwar („ 30th)	*Nil*	Tanks almost full. Health and prospects good. Weather seasonable, cold and mild. Prices stationary.
Pertabgurh („ „)	*Nil*	Health good. Water in tanks low.
Meywar („ 31st)	*Nil*	Water in tanks and wells decreasing. Health good. Crops average. Prices stationary. Weather seasonable.
Harowti („ „)	*Nil*	Weather seasonable. Health and prospects good.
Jhallawar („ „)	*Nil*	Health and prospects good.
Kotah („ 29th)	*Nil*	General health good. Prices rising. Weather clear.
Ajmere (Feb. 1st)	*Nil*	Weather again cold. General health good. Prices still rising, especially of wheat.
Jeypore („ „)	*Nil*	Condition of crops below average.
Dholpore („ „)		Tanks and wells low. Crop prospects fair. Health good. Prices stationary. Weather rather cold and windy.
Bhurtpore („ „)	*Nil*	Crops flourishing. Health good. Weather fair.
Ulwar („ „)	*Nil*	Crop prospects and health good. Prices rising.
Kherwara (Jan. 31st)	*Nil*	Tanks and wells filling. Crops promising. Health good. Prices as before.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 9th FEBRUARY 1887.

GENERAL REMARKS.—With the exception of light showers in Eastern Bengal the week under report has been rainless.

The early *rabi* crops continue to be reaped in Bombay and Bengal. Elsewhere the prospects of the standing crops are generally excellent, though some injury has been done to them by frost and blight in parts of Bombay, the North-Western Provinces and Oudh, the Central Provinces—where linseed has been principally affected—Rajputana and Central India. In the Punjab rain is still much needed for the *rabi* in five districts.

In Madras the standing crops are generally in good condition but in parts they have been affected by disease and in some places are withering for want of rain. In Coorg the season promises favourably.

The winter rice harvest is over in Bengal and the spring rice is being transplanted. In Burma the rice harvest is approaching completion and threshing operations have commenced.

The pressing of sugarcane is in progress in Assam, Bengal, the North-Western Provinces and Oudh and the Central Provinces. The gathering of mustard in Assam is almost over.

Poppy prospects continue excellent in the North-Western Provinces and Oudh, but are less favourable in Bengal. In Central India and Rajputana the plant has been affected by frost.

The general health of the people continues satisfactory.

Prices again show an upward tendency in the North-Western Provinces and Oudh this week and are still rising in the Punjab and in some States in the Rajputana Agency. Elsewhere they remain generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 9th)		
Bellary . . .	. . . . .	Standing crops generally fair, but in parts cotton and wheat affected by disease, and white *cholum* withered. Harvest wet and dry crops, yield below average. Fever in two and cattle-disease in three taluks.
Kurnool . . .	. . . . .	Standing crops good. Harvest white *cholum*, outturn below average. Fever in three, smallpox in five and cattle-disease increasing in four taluks.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Ganjam		Slight smallpox in three and fever in two divisions. Slight cholera.
Kistna		Standing crops generally good, but dry crops in parts affected by blight. Harvest paddy, outturn below average. River 2 4 feet over anicut. Fever in parts; cholera abating in four and cattle-disease in two taluks.
Chingleput (Madras)		Standing crops generally good, but in parts indifferent owing to want of rain. Harvest paddy and *ragi*, outturn below average. Cattle-disease in one taluk.
Coimbatore		Standing crops generally good, but in parts in want of rain, and paddy affected by disease in one taluk. Harvest wet and dry grains, outturn, irrigated crops generally above average, rest poor. Fever in two and smallpox in four taluks; cattle-disease in one.
Tanjore		Standing crops generally good, but in parts withering from want of rain. Harvest wet and dry crops, outturn up to average. Cattle-disease in three taluks.
Madura		Standing crops in parts of six taluks withering from want of rain, outturn where harvested unsatisfactory. Cattle-disease in one taluk.
Malabar	Average ·03	Harvest second crop paddy, outturn average. Slight smallpox in nine; fever and cattle-disease in two taluks.
Travancore	·06	Harvest of second crop paddy continuing. Smallpox and fever prevalent in parts.
Bombay—(Feb. 9th)		*General Remarks.*—General prospects generally good.
Karachi	Johi ·07	River at Kotri on 7th 3 feet 10 inches against 6 feet on same date last year. *Rabi* crops injured by frost in Tatta and Sujawa talukas. Fever in nine and cattle-disease in one taluka. Wheat, red rice, and *bajri* in Karachi 24, 30, and 32, and in Sehwan 28, 38, and 40 pounds per rupee respectively.
Hyderabad	*Nil*	*Kharif* harvesting still continues. *Rabi* cultivation in good condition. River at Kotri on 7th 3 feet 10 inches against 6 feet on same date last year. Fever in four talukas. Weather very cold. Prices of grain steady.
Ahmedabad	*Nil*	Standing crops good. Public health good. Wheat 28 and *bajri* 33 pounds per rupee.
Baroda		Public health good. Smallpox continues in the Kathor taluka of the Navsari division. Crops in good condition. *Bajri* 28, wheat 18, and rice 15 pounds per rupee.
Surat	*Nil*	Cotton slightly damaged in some places in Bardoli and Chorasi talukas. Other crops good. Fever in Bardoli taluka. *Jowari* 41 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	Weather very cold. Crops thriving. Public health good. Measles and cattle-disease to a certain extent in Sinnar taluka. Wheat 25⅞, *bajri* 36 $\frac{30}{115}$, and rice 20⅛ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 1° cool on 2nd, 1° warm on 3rd, fell to 5° cool by 5th, 4° cool on 6th and 7th, and 6° cool on 8th. Vapour in air normal from 2nd to 4th. In defect of normal on 5th and 6th, and largely defective on 7th and 8th. Wind northerly from 6th to 8th, and normal on all other days.
Poona		Wheat, gram, and *jowari* slightly injured by blight in places in Khed, Purandhar, Bhimthadi, Haveli, and Mawal talukas. In the rest of the talukas *rabi* crops are doing well. Reaping has commenced in Junnar, Indapur, and Bhimthadi talukas. Threshing of rice almost completed in Petha Moshi. Public health generally good. Slight cattle-disease in Indapur and smallpox in Haveli taluka. *Bajri* 44 and *jowari* 59 pounds in the district, and *bajri* 37 and *jowari* 48 pounds per rupee in Poona City.
Ahmednagar	*Nil*	Reaping of early *rabi* commenced. Wheat, gram, and linseed injured. Slight cattle-disease in Karjat. *Bajri* average 57 and *jowari* 67 pounds per rupee.
Sholapur	*Nil*	Linseed, gram, *kardi*, cotton, and wheat crops blighted in places. Reaping of *rabi* crops commenced in Pandharpur, Sangola, and Malsiras talukas. Public health good. *Jowari* 72 and *bajri* 54½ pounds per rupee.
Dharwar	*Nil*	Harvesting of rice and early *jowari* nearly completed, that of wheat and gram commenced. Indigenous cotton generally good. Exotic cotton blighted in seven talukas. Slight fever in seven talukas. Cattle-disease in Ranibennur taluka. Rice 25½ and *jowari* 59½ pounds per rupee.
Kanara		Second crop doing well. Strong sea-breezes. Slight cattle-disease in one and fever in four talukas. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot	*Nil*	Weather cold. Wheat crops blighted in some places in Halar. Prevailing diseases, fever and measles. Smallpox in Gondal. Wheat and *bajri* 25, and *jowari* 34 pounds per rupee.
		General Remarks.—Slight rain in the Karachi district. Reaping of *rabi* crops going on in parts of six districts. Standing crops still suffer from blight and frost in some places. Fever in parts of nine, cattle-disease in parts of ten, and smallpox in parts of three districts.
Bengal—(Feb. 9th)		
Chittagong (Feb. 8th)	0·10	Weather cold and seasonable. Winter crops doing well. Prices of food-grains stationary. Public health good, notwithstanding a few cases of cholera.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Dacca	*Nil*	Weather cold. Prospects good. Pulses and mustard being gathered, and sugarcane pressed. Ploughing for early crops commenced. Public health has improved.
24-Pergunnahs	*Nil*	Weather cool and seasonable. Prospects of crops satisfactory. Pressing of sugarcane going on. Cholera abating. Public health good.
Khoolna	*Nil*	Weather cloudy. *Aman* harvest nearly over; outturn good. Prospects of winter crops good. Transplanting of *boro* rice has commenced. Public health good.
Moorshedabad	*Nil*	Weather cold and seasonable. *Rabi* crops generally promising. Public health good.
Pubna	*Nil*	Weather seasonable. Winter crops promising. Public health good.
Dinagepore	*Nil*	Weather fair. Prospects of *rabi* crops good. Public health good. Cattle-disease in thana Hemtabad.
Rungpore	*Nil*	Prospects of crops good. Public health fair.
Midnapore	*Nil*	Weather seasonable. Prospects fair. Public health normal.
Burdwan	*Nil*	Prospects of *rabi* crops good. Public health fair.
Bhagulpore	*Nil*	Prospects of *rabi* crops favourable, but outturn expected to be less than that of last year. Wheat and barley in ear. Public health good.
Monghyr		Prospects of poppy continue good.
Purneah	*Nil*	Prospects of crops excellent, except mustard in Arrareah subdivision. Cold-weather crops being harvested. Rivers low. Health of people and cattle good.
Durbhanga	*Nil*	*Rabi* prospects continue favourable. Wheat and barley in ear. Mustard being harvested in places. Poppy and tobacco doing well. Prices rising. Public health good.
Mozufferpore		Poppy coming up well, recent rain having benefited the crop considerably.
Sarun		Weather favourable. Prospects of poppy good.
Chumparun	*Nil*	*Rabi* prospects continue favourable. Most poppy plants flowering. Prices stationary. Public health fair.
Patna	*Nil*	*Rabi* crops promising well. Some injury done to poppy by caterpillars. Public health good.
Gya	*Nil*	Rice harvest over with good outturn. *Rabi* promising well. Poppy backward. Public health good.
Shahabad		Weather cold with westerly wind, favourable to poppy.
Hazareebagh	*Nil*	Weather seasonable. *Rabi* crops doing well. Damage done to poppy by caterpillars reported to be two annas. Public health generally good, only a few cases of smallpox being reported from thana Tundwa.
Cuttack	*Nil*	Weather seasonable. Reaping of *sarad* rice completed with fair outturn. *Dalua* rice being transplanted. Wheat and cotton doing well. Price of rice unchanged. Sporadic cholera reported. Public health otherwise good.
		General Remarks.—Light showers reported in Eastern Bengal only All *rabi* crops are promising; the earlier kinds are being harvested with good outturn. Prospects of poppy are generally fair, but the crop is backward in Gya and has suffered some injury in Patna and Hazareebagh from caterpillars. Pressing of sugarcane is in progress. Transplanting of *boro* rice is going on. General health is good, but cholera still prevails in Tipperah.
N.-W. Provinces and Oudh—(Feb. 9th)		
Benares (Feb. 8th)		Weather bright and seasonable. Condition of standing crops good, but there has been slight damage to wheat and *sarson* in places by frost and blight. Supplies plentiful. Prices steady. The public health is good, and no cases of cattle-disease are now reported.
Gorakhpore („ 7th)		Weather bright. *Rabi* looking well. Prices stationary. Health fair.
Ballia („ „)		Sky clear. Prospects generally favourable. Prices steady. Health good.
Fyzabad („ 8th)		*Rabi* crops generally good, except mustard which has been injured by insects. Poppy crops healthy. Prices rising slightly. Public health is good.
Lucknow („ 7th)		Strong west wind continues. Prospects of *rabi* excellent. Poppy being watered. Sugarcane pressed. Supplies ample. Prices slightly rising. Public health good. No cattle-disease.
Rai Barelli („ „)		Weather cold and clear. Wind westerly. The crops are generally doing well. Markets well supplied. Prices almost stationary. General health of people and condition of cattle good.
Pertabgarh („ 8th)		State of the crop continues good. Prices variable. Health of people and cattle good.
Allahabad („ „)	*Nil*	Weather seasonable. Markets well stocked. Prices stationary. Health of men and cattle generally good.
Cawnpore („ „)		Weather clear and seasonable. *Rabi* in good condition. Slight injury by frost is reported from four tahsils. Poppy healthy and vigorous everywhere. Prices stationary. Cattle-disease in two parganas.
Farakhabad („ „)	*Nil*	*Rabi* prospects good. Markets well supplied. Poppy plants progressing favourably. Health good

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Sitapur (Feb. 8th)	. . . .	Weather cold and clear. *Rabi* crops look well, but have slightly been injured by frost in Sitapur tahsil. Poppy prospects continue favourable. Prices stationary. Health good.
Bareilly („ „)	. . . .	Poppy good. Markets steady. General health good.
Banda („ „)	*Nil*	Weather seasonable. Slight appearance of rust in Pargana Kamasin. Prices stationary. Public health good. Cattle-disease in one village.
Kumaon („ 8th)	. . . .	Weather cloudy and cold. *Rabi* crops require sunshine. Prices stationary. General health fair. Fever in some places. Cattle-disease continues.
Agra („ 7th)	*Nil*	Weather clear and cold. Prices rising slightly. Health good.
Jhansi („ „)	*Nil*	Oilseed slightly affected by blight in pargana Garotha, otherwise crops doing well. Prices rising. Health good.
Meerut („ 8th)	*Nil*	Weather cold and seasonable. Crops flourishing, but rust reported from Baghpat. Markets stocked. Prices stationary. Public health good.
		General Remarks.—Weather clear and seasonable. Slight injury to crops from frost and blight, otherwise prospects continue to be favourable. Markets well supplied, but prices are rising. Public health good. Cattle-disease continues in a few places.
Punjab—(Feb. 9th)		
Delhi (Feb. 8th)	. . . .	Health good. Prices rising. *Rabi* crops good.
Hissar . . .	. . . .	Rain much needed. Health good. Prices stationary.
Umballa . . .	. . . .	Health good. Prices rising. *Rabi* crops flourishing. Yield expected to be average.
Jullundur . .	. . . .	Health good. Prices rising. *Rabi* prospects good.
Amritsar . . .	. . . .	Health good. Prices rising. *Rabi* crops flourishing.
Sialkot . . .	. . . .	Health good. Prices continue to rise. *Rabi* crops flourishing. Anticipated outturn above average.
Ferozepore . .	. . . .	Rain much wanted. Health good. Prices stationary. *Rabi* prospects average.
Lahore . . .	. . . .	Health good. Prices high. *Rabi* prospects are becoming unfavourable for want of rain.
Rawalpindi . .	. . . .	Health good. Prices rising. Prospects of *rabi* average.
Shahpur . . .	. . . .	Health good. Prices high and rising. *Rabi* crops suffering for want of rain. Fodder scarce.
Multan . . .	. . . .	Rain urgently required. Health good. Prices fluctuating. *Rabi* fair.
Dera Ismail Khan .	. . . .	Health fair. Prices almost stationary. *Rabi* improved.
Peshawar . . .	. . . .	Rain much needed. Health good. Prices rising. *Rabi* crops average but suffering for want of rain.
		General Remarks.—No rain during the week. Health good. Prices stationary in the Hissar, Ferozepore, and Dera Ismail Khan districts, fluctuating in the Multan district; rising elsewhere. Crop prospects generally good, but rain is much needed.
Central Provinces— (Feb. 9th)		
Nagpore (Feb. 8th)	. . . .	*Rabi* crops favourable. Fever and cattle-disease continue. Prices steady.
Jubbulpore . .	. . . .	Linseed suffered from mist and mildew, other crops favourable. Health good. Prices steady.
Saugor (Feb. 8th)	. . . .	Weather cold and windy. Linseed, *masur*, and *arhar* slightly damaged by frost. Slight smallpox. Prices steady.
Seoni	. . . .	*Rabi* crops good. Linseed blighted. Health good. Prices risen slightly.
Hoshangabad . .	. . . .	*Rabi* crops flourishing. Linseed much injured by rust. Health good. Prices stationary.
Khandwa . . .	. . . .	Wheat injured in places by rust. Health good. Prices steady.
Bilaspur . . .	. . . .	Wheat and linseed doing well. Prospects favourable. Sugarcane being pressed. Cattle-disease in places.
Raipur . . .	. . . .	Linseed damaged in places by rust, other crops good. Slight cattle-disease. Rice 18½ and wheat 20 seers per rupee.
Sambalpur (Feb. 5th)	. . . .	Rice harvesting and sugarcane pressing nearly completed. Cholera in places. Rice 26½ seers per rupee.
Burma—(Feb. 9th) (Report for week ending 5th February 1887.)		*General Remarks.*—Weather clear and cold. *Rabi* crops are doing well, but linseed has been injured by cold and damp. Prices generally steady.
Akyab . . .	*Nil*	A few cases of cholera in town and district. Otherwise public health and health cattle good. Crops good. Reaping nearly completed.
Bassein . . .	*Nil*	Public health and health of cattle good. Threshing going on.
Rangoon . . .	*Nil*	Public health and health of cattle good.
Amherst (Moulmein) .	*Nil*	Public health and health of cattle good.
Tavoy . . .	*Nil*	Public health and health of cattle good.
Pegu	*Nil*	Public health good. Slight cattle-disease in one township. Reaping completed. Threshing nearly finished. Crops good.
Henzada . . .	*Nil*	Public health and health of cattle good.
Prome . . .	*Nil*	Public health and health of cattle good.
Toungoo . . .	*Nil*	Public health and health of cattle good.
Thayetmyo . .	*Nil*	Pubiic health and health of cattle good.
Upper Burma (Shwebo)	*Nil* (Total to date ·50)	Public health and health of cattle good. Food-supply just sufficient. Prices normal. Ploughing for *mayin* continues in a few places. Beans being reaped; small quantities coming in from west and south.
Myingyan . . .	*Nil* (Total to date ·05)	Public health good Food-supply sufficient. Prices ordinary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Burma—*contd.*		
Mandalay . . .	*Nil* (Total to date ·63)	Twenty deaths from smallpox in one township. Otherwise public health and health of cattle good. Ploughing for *mayin* progressing. Food-supply sufficient. Prices normal.
Minbu . . .	*Nil* (Total to date ·34)	Public health good. Nearly all paddy taken in. Food-supply sufficient. Prices normal.
		General Remarks.—Except a little cholera in Akyab and slight cattle-disease in three districts, the health of Lower Burma is satisfactory. Harvest drawing to a close. Reports received from six districts of Upper Burma. Some smallpox in neighbourhood of Mandalay. Otherwise public health is satisfactory. Food sufficient and prices moderate.
Assam—(Feb. 9th)		
Gauhati . . .	*Nil*	Weather seasonable. Public health good. Gathering of mustard almost finished. Crushing of sugarcane in progress. Ploughing of land for *ahu* commenced. Prospects of crops good.
Sylhet . . .	*Nil*	Mustard in Sunamganj is likely to be a failure. State and prospects of other crops good.
Cachar . . .	*Nil*	Weather last three days cloudy. About ¾ of mustard crops reaped. Common rice 13 seers 5 chataks per rupee Six deaths from cholera from Katigora and two from Sadr reported.
Dibrugarh . .	·28	Weather seasonable. Gathering of mustard over. Outturn good in North Lakhimpur. Sugarcane being pressed. Cholera ceased in Dhakuakhana.
Mysore and Coorg— (Feb. 9th)		
Bangalore . . }	. . . .	Standing crops in good condition. Except in parts of the Tumkur district, where the paddy crop is affected by blight, prospects of season favourable. Public health good. Prices stationary.
Mysore . . . }		
Berar and Hyderabad— (Feb. 9th)		
Amraoti . . .	. . . . .	Weather clear and cool. *Rabi* prospects good. Wheat 20 and *jowari* 28 seers per rupee.
Akola . . .	. . . . .	Weather clear. *Rabi* crops doing well.
Hyderabad . .	*Nil*	Reaping of *rabi* crops commenced. *Tabi* crops prospering. Fever abated to some extent. Prices—wheat 14¼, coarse rice 12 yellow *juar* 21¼, white *juar* 18, and *tur* 15 seers per current sicca rupee.
Central India States— (Feb. 9th)		
Indore . . .	. . . .	Weather dry and abnormally cold. Health good.
Morar (Gwalior) . .	. . . .	Health and prospects good.
Neemuch . . .	. . . .	Weather cold. Gram and opium crops affected by frost. Health good.
Goona . . .	. . . .	Weather very cold. *Rabi* and opium crops partly damaged by frost.
Sutna . . .	. . . .	Health and prospects good.
Agar . . .	. . . .	Weather clear and cold. Crops and health good.
Sehore . . .	. . . .	Weather seasonable. Prospects of crops good.
Nowgong . . .	. . . .	Weather cold. *Rabi* prospects fair. Health good. Prices steady.
Rajputana—(Feb. 9th)		
Abu (Feb. 9th)	*Nil*	Weather very cold but seasonable. Health good.
Sirohi („ 7th)	*Nil*	Tanks drying. Wells, general health, and crop prospects good. Weather cooler, fine and clear.
Marwar („ 6th)	*Nil*	Tanks half full. Health and crop prospects good. Cold intense. Prices rising.
Pertabgurh („ „)	*Nil*	Water in tanks low. Health good.
Meywar („ 7th)	*Nil*	State of tanks and wells unchanged. Health good. Crops average. Prices stationary. Weather seasonable.
Harowti („ 5th)	*Nil*	Weather cold and clear. Crops doing well. Health good.
Jhallawar („ 7th)	*Nil*	Weather very cold. Some damage from frost, principally to opium crops.
Kotah („ 5th)	*Nil*	Health good. Crop prospects fairly so. Opium and gram damaged by frost.
Ajmere („ 8th)	*Nil*	Weather very cold. General health good. *Rabi* prospects fair. Prices of wheat and gram rising. Wheat 25, barley 48, and gram 51¼ pounds per rupee.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of the Week ending 5th February.

The weather of India during the week January 30th—February 5th has been on the whole of the normal character. On Sunday the barometer was highest over the Indus Valley and the Rajputana desert, whence readings decreased in all directions to a minimum in Oudh. In the Central Provinces and Chutia Nagpur, the barometer was almost equally low. North-westerly winds prevailed down the Gangetic Valley and northerly (N-N-W—N-N-E) winds over the Peninsula. In the Central Provinces they were more westerly than usual. Fine weather with a falling temperature prevailed generally, except at some stations in Eastern and Southern India, where there was a good deal of cloud. Monday's report showed little change. The barometer had risen, except on the Vizagapatam coast and in Orissa, but the rise being pretty uniform the relative distribution was little affected, except that the seat of absolute minimum was transferred from Oudh to the Northern Circars. The winds also retained the same general direction, and the weather remained fine except in some parts of Assam. On Tuesday, although the weather remained almost everywhere fine, in Sind and the Southern Punjab the barometer began to fall, and the wind shifted to some southerly quarter; and by Wednesday morning the Punjab became the seat of an irregularly-shaped barometric depression around which there was a feeble cyclonic circulation of the wind. In other parts of India the wind was also affected by this change of pressure, and was more north-easterly than north-westerly in the Central Provinces and the Peninsula. The sky remained clear or nearly so almost everywhere. On Thursday the barometer was falling steadily in the Punjab (Lahore—·092 inch) as well as in the adjacent parts of the North-Western Provinces and Rajputana, and in parts of Central India and the Central Provinces, while it was rising elsewhere. Consequently the low pressure area in the Punjab became more defined, and was now a well marked depression with its centre to the south of Lahore, producing a well defined cyclonic circulation of the air all over North-Western and Central India. The Punjab stations at 10 A.M. reported cloudy skies, and later in the day a snow-storm set in at Murree and rain fell at Rawalpindi.

Elsewhere the weather remained fine. On Friday the barometer rose in the Punjab, Rajputana and most parts of Western India, as well as in the Peninsula, but fell in the Central Provinces, the North-Western Provinces, and Bengal. The depression from the Punjab had travelled to the south-east, and at 10 A.M. its centre lay apparently between Benares and Allahabad.

It was apparently filling up, as the lowest reading was nearly 0·1 inch higher than that recorded at Lahore on the previous day. All over the North-Western Provinces, Bengal and the Central Provinces, the skies continued clear. In North-Western India the south-eastward movement of the depression had been followed by a wind to north-west, and a considerable fall of temperature. On Saturday the depression had moved further to south-east, and had its centre apparently near Hazaribagh; the weather around remaining fine and bright. But in the North-West, and more particularly on the Himalaya, it continued unsettled, and, after a temporary clearance on Friday and Saturday morning, snow again fell at the hill stations in the afternoon, and a slight thunderstorm with a high wind occurred at Simla in the evening.

The weather of the Peninsula was unaffected by the above disturbance.

The following table shows the anomalies of pressure, temperature and humidity derived from a comparison of the daily readings with the averages of the months of January and February, and the total amount of rain collected in each division.

Districts.	Departure of Barometer from the mean of January—February averages.	Departure of Temperature from the mean of January—February averages.	Departure of Humidity from the mean of January—February averages.	Total Rainfall in week January 31st—February 5th.

* Number of stations in each province which reported rainfall during the week: 1, Murree and Rawalpindi 2, Simla; 3, Darjeeling; 4, Sibsagar; 5, Dacca; 6, Cochin.

From these figures it will be seen that the pressure of the atmosphere was greatly below the normal throughout the country; the deficiency being greatest (—·131 inch) in the Eastern Punjab, and least (—·027 inch) in the Konkan. It was greater in the North-Western Himalaya than on the neighbouring plains, but was great all over Northern India. The temperature showed an almost equally general depression, the only region in which the mean of the week exceeded the average being Mysore. The greatest cold relatively to the average was in Bengal.

The air was drier than the average in all places, except Bengal, Assam, and Guzerat. Rain fell at several stations in the Punjab and North-Western Provinces, as well as at Sibsagar, Darjeeling, and Dacca. A few drops also fell at Cochin, but with this exception the weather was dry throughout the week in the central and southern parts of the country.

The Reports on the administration of the Jails in British India for the years 1884 and 1885.

RESOLUTION.

IN 1882 the Secretary of State suggested that the Government of India should submit, with the annual provincial reports on jail administration, a review of the statistics for the whole of British India. The statistics for 1881, 1882 and 1883 were duly reviewed by the Governor General in Council, but no Resolution has up to the present been recorded on the figures for 1884, because it seemed to be desirable that the figures of more than one year should

be considered together. The provincial reports for the year 1885 have now all been received, and the statistics for that year and for 1884 will, therefore, be examined together. The dates on which the reports for each year were received by the Government of India are shown in the table on the margin. His Excellency in Council is glad to observe that the report for the Punjab, which was very late for 1883 and 1884, was punctually submitted in 1885, but the reports for Madras, Bengal and Bombay have been less punctually submitted than in previous years. The date fixed for the submission of the annual reports is June 1st, a date by which it is without difficulty possible to forward them, and the interest in the figures they contain is seriously diminished by the fact that they have been superseded by others of more recent date. His Excellency in Council accordingly trusts that the statistics for 1886 and subsequent years will be submitted from all parts of India in proper time. The statistics of 1884 and 1885 for each Province and Administration have been separately examined and discussed by the Government of India, which has communicated the remarks and orders required to Local Governments and Administrations.

Province.	1884.	1885.
Madras . . .	5th August 1885 .	3rd November 1886.
Bombay . . .	12th June 1885 .	22nd June 1886.
Bengal . . .	18th August 1885 .	1st September 1886.
N.-W. Provinces and Oudh	27th July 1885 .	3rd September 1886.
Punjab . . .	20th November1885 .	19th June 1886.
Central Provinces . .	27th May 1885 .	Ditto.
British Burma . .	Ditto .	26th July 1886.
Assam . . .	21st August 1885 .	31st July 1886
Coorg	14th July 1885 .	18th June 1886.
Hyderabad . . .	1st July 1885 .	20th July 1886.

Results in British India as a whole.

2. At the close of 1883 there were 32 central jails, 208 district jails, and 534 subsidiary jails or lock-ups. In 1884 the number of central jails was 33, of district jails 212, and of subsidiary jails 529. In 1885 the figures were—central jails 32, district jails 205, subsidiary jails 510. The decline of 24 in the latter class of jail within the past two years is due to the extension of the arrangement by which, if possible, the Magistrate's lock-up is amalgamated with the district jail. The number of prisoners, including convicts received by transfer from other jails, admitted into all the jails and lock-ups in 1884, was 334,771 as compared with 325,403 in 1883. But as these figures include convicts received by transfer from other jails, they are considerably in excess of the total number of admissions properly so called during the year. It is hoped that a plan may be devised whereby without material alteration in the existing statistical returns, it may be found possible to exhibit separately inter-district or inter-provincial transfers from, and thus to show in this statement admissions properly so called.

Statement I.—Distribution of prisoners of all classes.

Taking the figures, however, as they stand, they shew that an increase, which amounts to 2·8 per cent., followed a decline in the numbers in 1883 of 8·9 per cent., and was succeeded by a still further increase to 350,965 or 4·9 per cent. in 1885. The number of male prisoners rose in 1884 from 305,406 to 315,171 *i. e.*, by 3·1 per cent., while the number of females declined from 19,997 to 19,600. In 1885 the figures were—male prisoners 331,815, or an increase of 8·6 per cent., and female prisoners 19,150 (decrease of 4·1 per cent.).

The total number of under-trial prisoners in 1883 was 143,431. In 1884 it rose to 152,750, and in 1885 to 161,924. The number of civil prisoners during the same period also shewed a moderate increase, being in 1883, 11,498, in 1884, 11,577, and in 1885, 11,854. The number of prisoners discharged, which in 1883 fell to 330,987, rose in 1884 to 337,511, and in 1885 to 350,098. The number of prisoners in jail at the beginning of 1884 was 77,194 (73,798 males and 3,396 females). By the beginning of 1885 the number had declined to 74,266 (males 71,259, and females 3,007), and by the close of that year it had slightly risen again to 75,133 (males 72,276, females 2,857). The total daily average of prisoners, which in 1883 amounted to 79,220, fell to 76,802 in 1884, and to 74,035 in 1885. Comparing the latest figures, *viz.*, those of 1885, with those of 1883, there was a

decline from 75,642 to 71,055 in the daily average of males, and from 3,578 to 2,980 in that of females. Of the prisoners in jail at the close of 1884, 68,919 were prisoners under sentence, 4,671 under-trial prisoners, and 864 civil prisoners. The corresponding figures at the close of 1885 were 68,592, 5,604, and 936.

3. Of 140,952 convicts admitted into the jails in 1884, 88,455 (62·8 per cent.) were classed as Hindus and Sikhs, 36,912 (26·1 per cent.) as Muhammadans, and 15,585 (11·1) as followers of other religions. In 1885 the corresponding figures were—

Statements Nos. 2 and 3—Classification of convicts according to religion, sex, age, previous occupation, length of sentence, nature of imprisonment and general nature of offences committed.

Total admissions.

Hindus and Sikhs	88,611 (60·1 per cent.)
Muhammadans	37,345 (23·7 per cent.)
Followers of other religions . . .	17,518 (16·2 per cent.)

The only noticeable variation in the figures for the past three years is the considerable rise in the number of Buddhists and Jains, the figures being 9,537 in 1884, and 11,425 in 1885—a result attributable to the larger number of prisoners admitted to the jails in Burma during the latter year.

In 1883 the proportion borne by the average daily strength to every 10,000 of the total population of British India was 3·7, and that borne by the number of convicts admitted during the year 7·2. In 1884 the figures were 3·58 and 7·19 respectively. In 1885 the corresponding figures were 3·43 and 7·24.

4. The number of male and female convicts admitted to jail in 1883 was 130,744 and 9,833, respectively, the percentages on the aggregate number of admissions being 93·1 and 6·9. In 1884, the number of male prisoners admitted rose to 131,546 (93·3 per cent.), while the number of females declined to 9,406 (6·7 per cent.). In 1885, there was a still further rise in the proportion of male convicts admitted, the number being 134,341 (93·6 per cent.), while the female admissions were only 9,133 (6·4 per cent). The Hindus and Sikhs as usual show a higher proportion of female to male than do the members of other religions or sects.

The following figures exhibit the distribution of convicts admitted into jail according to age for the past three years :—

	1883.	1884.	1885.
Under 16 years of age . .	2,614 (1·8 p. c.)	2,439 (1·7 p. c.)	2,445 (1·7 p. c.)
Between 16 and 40 years of age .	113,634 (80·8 p. c.)	113,464 (80·5 p. c.)	116,138 (80·9 p. c.)
Between 40 and 60 years of age .	22,004 (15·7 p. c.)	22,766 (16·2 p. c.)	22,676 (15·8 p. c.)
Above 60 years of age . .	2,325 (1·7 p. c.)	2,283 (1·6 p. c.)	2,215 (1·6 p. c.)

The previous occupations of the convicts admitted within the same periods were—

	1883.	1884.	1885.
Persons employed under Government or a Municipal or other local authority . . .	4,752 (3·4 p. c.)	4,316 (3·1 p. c.)	4,136 (2·9 p. c.)
Persons engaged in agriculture and with animals . . .	67,435 (47·9 p. c.)	70,191 (49·8 p. c.)	71,189 (49·6 p. c.)
All other classes . . .	68,390 (48·7 p. c.)	66,445 (47·1 p. c.)	68,149 (47·5 p. c.)

5. The distribution according to length of sentence of the convicts remaining in jail, on the last day of each year, 1883 to 1885, is thus shown—

	1883.	1884.	1885.
Under sentences not exceeding 1 year	28,825 (40·3 p. c.)	27,943 (40·5 p. c.)	28,909 (42·1 p. c.)
Under sentences above 1 year, and not exceeding 5 years . .	30,231 (42·2 p. c.)	28,109 (40·8 p. c.)	27,280 (39.7 p. c.)
Under sentences above 5 years and not exceeding 10 years . .	7,889 (11·3 p. c.)	8,206 (12·0 p. c.)	7,889 (11·5 p. c.)
Under sentences exceeding 10 years	784 (1·0 p. c.)	795 (1·1 p. c.)	743 (1·1 p. c.)
Sentenced to transportation and death	3,751 (5·2 p. c.)	3,854 (5·6 p. c.)	3,826 (5·6 p. c.)

The admissions during the three years were as follows :—

	1883.	1884.	1885.
Under sentence not exceeding 1 year	122,559 (87·3 p. c.)	122,863 (87·2 p. c.)	125,513 (87·48 p. c.)
Under sentence above 1 year, and not exceeding 5 years . .	15,080 (10·7 p. c.)	15,075 (10·7 p. c.)	14,851 (10·35 p. c.)
Under sentence exceeding 5 years and not exceeding 10 years . .	1,306 (·9 p. c.)	1,356 (·9 p. c.)	1,402 (·98 p. c.)
Under sentence exceeding 10 years	55 (0·04 p. c.)	54 (0·03 p. c.)	49 (·03 p. c.)
Sentenced to transportation and death	1,577 (1·1 p. c.)	1,604 (1·1 p. c.)	1,659 (1·16 p. c.)

On 31st December 1884, the number of convicts under sentence of transportation was 3,794, of which 2,266, or 59·2, were sentenced to transportation for life and 1,528, or 40·8 per cent., for a term of years. By the 31st December 1885 the numbers had been reduced to 3,709, of which 2,279 (61·4 per cent.) were under a life sentence, and 1,430 (38·6 per cent.) under sentence for a term of years. At the end of 1883 the corresponding percentages were 44·8 transported for terms of years and 55·2 transported for life. The number of sentences of death in 1884 was 412 as compared with 423 in 1883, and the number of women sentenced to death 14 against 22. At the close of 1884 there were 59 males and 1 female under sentence of death. In 1885, 445 men and 15 women were sentenced to death, and on the last day of that year 113 males and 4 females remained under sentence. In 1884, 11,148 (8·0 per cent.) persons were sentenced to simple imprisonment, 115,560 (83·1 per cent.) to rigorous imprisonment, 10,700 (7·7 per cent.) to rigorous imprisonment with solitary confinement, and 1,648 (1·2 per cent.) to rigorous imprisonment with whipping. The figures in 1885 were (i) sentenced to simple imprisonment 12,195 (8·6 per cent.), (ii) sentenced to rigorous imprisonment 116,722 (82·2 per cent.), (iii) sentenced to rigorous imprisonment with solitary confinement 11,120 (8·0 per cent.), and (iv) sentenced to rigorous imprisonment with whipping 1,643 (1·2 per cent.).

An analysis of the offences for which prisoners were convicted gives the following results:—In 1883, 17,655 persons were convicted under Chapter XVI. of the Indian Penal Code for offences affecting the human body. This number rose in 1884 to 19,621 (11·1 per cent.), and again in 1885 to 20,308 (15·0 per cent.). A similar rise is observable in the number of persons sent to prison under Chapter XVII. of the Penal Code for offences against property. The figures were in 1883, 73,089, in 1884, 75,753 (2·3 per cent.), and in 1885, 76,162 (4·2 per cent.). The number of persons convicted of other offences declined in 1884 from 36,225 to 33,725 (6·9 per cent.), and rose again slightly in 1885 to 33,930 (·6 per cent.).

6. Of the total number of convicts admitted in 1884 (140,952), 17,437 (12·38 per cent.) had been previously convicted; 11,766 had been previously convicted once, 3,340 twice, and 2,321 more than twice. Of the 142,474 convicts admitted in 1885, 17,273 (12·04 per cent.) had been previously convicted, 11,606 once, 3,339 twice and 2,328 more than twice. The corresponding figures for 1883 were once previously convicted 11,725; twice convicted 3,356; and 2,182 more than twice, making a total of 17,163 or 12·2 per cent. The number of juvenile prisoners under 16 years of age admitted in 1884 was 2,327, of whom 231 (9·9 per cent.) had been previously convicted. The corresponding figures in 1885 were 2,312 and 224 (9·7 per cent.), and in 1883, 2,414 and 243 (10·06 per cent.).

Statement No. 4.—Previous convictions among convicts admitted during the year, remissions granted, and number of juvenile convicts admitted.

Of the number of convicts eligible for remission in 1884 (9,910), 5,519 (55·7 per cent.) gained remission against 4,985 (48·6 per cent.) in 1883. In 1885, the number eligible for remission was 9,830, of whom 7,637 (77·7 per cent.) succeeded in gaining it. This increase is satisfactory.

7. Statement 5 gives the details of the employment of the convicts in the jails. The average number of convicts under sentence of labour on working days was 65,087 in 1884 and 64,394 in 1885, against 62,333 in 1883. The manner in which they were employed is thus compared—

Statement No. 5.—Employment of convicts.

	1883.	1884.	1885.
On unremunerative labour* . .	1,879	1,211	1,672
As prison officers	3,182	3,498	3,184
As prison servants	7,900	7,429	7,108
On building and repairing jails . .	10,373	8,703	8,767
On jail gardens	4,389	4,204	3,881
On manufactures	26,532	26,801	24,944
Extramurally	23,905	11,522	3,937

The ratio of convicts employed as prison officers, as prison servants and on manufactures, to the average number under sentence of labour on working

* The total number under these headings will not agree with the average number of convicts under sentence of labour on working days shewn immediately above, inasmuch as some Local Governments have taken the total number of such prisoners on working days, while others have deducted from the total number, the average number sick, and convalescent and infirm during the year.

days in 1884 was 5·4, 11·4 and 41·2, respectively. The figures in 1885 were 4·94, 11·04 and 38·67.

8. The punishments inflicted on convicts in jail are shown in Statement 6. The number of offences judicially punished rose from 269 in 1883 to 292 in 1884 and to 328 in 1885. Departmental punishments which in 1883 numbered 68,868 rose in 1884 to 85,980 and in 1885 were 82,016. In 1884, the number of punishments inflicted in the jails of Bengal and Burma increased considerably, and, though the number in the former province declined again in 1885, there was a large increase in the Punjab.

Statement No. 6.—Offences and punishments of convicts.

The number of breaches of jail rules by smoking or having forbidden articles in possession was 7,169 in 1883. In 1884 it was 8,796 and in 1885, 7,637. The number of offences relating to work was 34,465 in 1883; it was 44,069 in 1884, and 42,587 in 1885. The miscellaneous offences against prison discipline numbered 27,428 in 1883, 33,122 in 1884, and 31,812 in 1885. The punishments awarded in the past three years are thus compared—

	1883.	Ratio per strength of convicts.	1884.	Ratio per strength of convicts.	1885.	Ratio per strength of convicts.
Solitary confinement	5,684	7·7	6,528	9·1	6,161	9·1
Reduced diet	7,906	10·7	10,128	14·1	7,825	11·5
Solitary confinement with reduced diet ...	6,638	9·0	6,299	8·7	5,167	7·7
Corporal punishments	3,309	4·7	3,498	4·9	3,075	4·5
Other punishments	45,331	61·5	59,514	83·8	59,788	87·9

Solitary confinement by itself was adopted as a punishment more often in both years than in 1883. In 1884 the number of cases in which reduced diet was awarded as a punishment rose nearly 4 per cent., but the figures for 1885 are very similar to those for 1883. There has been a steady decline in the number of cases in which solitary confinement and reduced diet have been combined as a punishment. The figures regarding corporal punishment are being separately reviewed, but there was a substantial decrease in 1885, the figures for which year were 3,075 against 4,658 in 1882. The general ratio of jail punishments of all kinds to the average number of convicts was 93·9 in 1883; it rose to 119·9 in 1884, and was 121·2 in 1885. The ratio of corporal punishments to the total number of other jail punishments inflicted on male prisoners was 5·7 in 1883, 4·9 in 1884, and 4·13 in 1885.

9. The total expenditure on the guarding and maintenance of prisoners of all classes in the jails and subsidiary jails of British India, excluding the cost of building new jails and of additions, alterations or repairs to existing jails, during 1884 was Rs. 47,82,844 against Rs. 47,73,310 in the previous year. In 1885 the total expenditure was Rs. 46,42,075. The total cost per head of average strength was in 1883 Rs. 59-12-11, in 1884 Rs. 62-4-5, and in 1885 Rs. 62-10-9. The items of expenditure were—

Statement No. 7.—Cost of guarding and maintenance.

	1883. Rs. A. P.	1884. Rs. A. P.	1885. Rs. A. P.
Cost of rations per head of average strength ...	21 6 6	22 13 7	22 7 4
Ditto Establishment	22 11 6	23 5 5	24 10 5
Ditto Police guard	5 14 9	6 4 7	5 12 10
Ditto Hospital charges	1 13 9	1 14 7	1 14 5
Ditto Clothing	3 4 11	3 0 0	2 14 4
Ditto Contingencies	4 9 6	4 14 3	4 15 5
Total ...	59 12 11	62 4 5	62 10 9

10. The total cash earnings of prisoners in jail were in 1883 Rs. 11,44,726, and, after deducting this figure from the cost of maintenance, the net cost to Government was Rs. 36,28,583-8-0, or Rs. 45-5-5 per head of average strength. In 1884 the total cash earnings were Rs. 10,33,943, and the net cost to Government Rs. 37,48,569, or Rs 48-13-0 per head of average strength. In 1885 the cash earnings rose to Rs. 12,92,318, and the net cost to Government declined to Rs. 33,49,756. The average net cost per head of the daily average strength was Rs. 45-3-7.

Statement No. 8.—Net cost of prisoners.

11. The health of the prisoners confined in the jails of India during 1884 and 1885 was on the whole satisfactory. During the former year the admission and daily sick rates were 1,025 and 37 per mille, and during the latter 1,014 and 36 per mille respectively. These ratios are considerably below the averages of 1877-81, which were for admissions 1,189 and for daily sick 44·9 per mille. During 1884 the lowest total mortality since 1877 was registered, namely, 29·11 per mille against 31·37 in the previous year and 63·01 during 1877-81; but during the following year (1885) the death-rate rose again to 33·54, which, however, was still less than that of any previous year before 1883. The reduction in mortality during 1884 was due mainly to the smaller number of deaths recorded from bowel complaints and cholera, while the rise in 1885 was due to the greater mortality caused by the same diseases. The mortality caused by bowel complaints amounted to 9·73 per mill in 1884 and to 11·18 in 1885, whilst the average mortality during 1877-81 was 24·97 per mille. Cholera in 1884 caused 1·43 per mille of the death-rate and in 1885 to 3·44, while the last quinquennial average was 4·48 per mille.

Statement No. 9.—Sickness and mortality among prisoners.

Results in the several Provinces.

12. The statement given below shows the proportion to every 10,000 of the population (1) of the daily average strength of convicts, and (2) of the number of convicts admitted in each of the years 1883, 1884 and 1885 for the different provinces. Taking the figures for all the provinces together, the proportion of the average daily strength to every 10,000 of the population, which in 1883 declined from 3·9 to 3·7, showed a further decline to 3·58 in 1884 and 3·43 in 1885. The proportion of convicts admitted into jail, which in 1883 was 7·25, declined in 1884 to 7·19, and rose again in 1885 to 7·24. The proportion both of the daily average strength and of convicts admitted was far higher in Burma than in any other part of India. The proportion borne by the daily average strength in that province rose from 13·65 in 1883 to 17·26 in 1884, and 17·80 in 1885, while the proportion borne by the number of convicts admitted into jail rose in 1884 from 27·11 to 29·28 and in 1885 to 33·37. In no other province in India was there a rise in the proportion of the average daily strength in the period between 1883 and 1885, and the only province in which the figures have not declined during that period is Bengal, in which the proportion (2·06) is still less than anywhere else in the Empire. In Madras, Coorg and Hyderabad the figures for 1885 are higher than those for 1884, though lower than those for 1883; in other provinces the decrease which occurred in 1884 has been followed by a further decrease in 1885. In Bengal, Coorg and Hyderabad, as well as in Burma, the proportion borne by convicts admitted to the general population is higher in both 1884 and 1885 than it was in 1883; in the other provinces there has been a steady decline except in Madras and the Central Provinces where the figures for 1885, though higher than those for 1884, are a little lower than those for 1883. The statements below throw light upon of the relative criminality of the different provinces as shown by the proportion to the general population borne by the convicts admitted during the period between 1883 and 1885, according to (i) length of sentence, and (ii) the nature of offences for which the convicts were imprisoned.

Convicts to general population.

The proportion of all persons sentenced, whatever the length of sentence, was, as before, far higher in Burma than elsewhere. It amounted there in 1883 to 27·01, in 1884 to 29·16, and in 1885 to 33·27 per 10,000 of the population. The small province of Coorg shows the next highest figures, *viz.*, 11·50 in 1883, 16·09 in 1884, and 15·76 in 1885. The average for the whole of India was 7·07 in 1883, 7·08 in 1884, and 7·21 in 1885. The average is exceeded in Madras, Bombay, the North-Western Provinces and Oudh, and the Punjab: while the figures for Bengal, the Central Provinces, Assam, and Hyderabad fall below it. The number of convicts sentenced to more than one year's imprisonment bore, as in previous years, a larger proportion to the general population in the Punjab both in 1884 and 1885 than in any other important province in India proper, though it fell far short of the proportion in Burma in either of those years. The proportion was smallest in Madras, Bengal, the Central Provinces, and Assam. The general proportion of convicts sentenced to not more than one year's imprisonment to 10,000 of the population was 6·18 in 1883, 6·19 in 1884, and 6·33 in 1885. It rose in Burma to 21·53, 23·07, and 27·60 in those years respectively. The figures were lowest in Bengal (3·96 in 1883, 4·29 in 1884, and 4·17 in 1885). In the other provinces, excluding Coorg, the figures varied in 1883 from 5·15 in Hyderabad to 7·33 in Madras, in 1884 from 5·13 in Hyderabad to 7·71 in Bombay, and in 1885 from 6·01 in Assam to 7·68 in Bombay.

The statement giving details regarding the nature of offences for which convicts were sentenced to undergo imprisonment shows that offences against the human body were far more common in Burma than elsewhere. The proportion of prisoners convicted of such offences in that province was 3·7 in 1883, 3·8 in 1884, and 3·2 in 1885 per every 10,000 of the population. The highest proportion in India itself was 1·3 in Assam and the Punjab in 1883, 1·48 in the Punjab, and 1·1 in the North-Western Provinces and Oudh in 1884, and 1·6 in the North-Western Provinces and Oudh, and 1·41 in the Punjab in 1885. The lowest figures are those in Madras, *viz.*, ·4 in 1883, ·35 in 1884, and ·36 in 1885. Coming to offences against property, the highest proportion of convicts sentenced for such offences to the general population is found in Burma, where it amounted in 1883 to 14·9, in 1884 to 15·39, and in 1885 to 14·4 per every 10,000 of the population. The highest figures in India proper, excluding Coorg, occurred in 1883 in the Punjab (5), and in Bombay and the Central Provinces (4·9), in 1884 in Bombay (5·72) and the Punjab (4·61) and in 1885 in Bombay (5·9), Hyderabad (5·4), and the Central Provinces (4·94). The lowest figures occurred in Madras (2·4 in 1883, 2·38 in 1884 and 2·69 in 1885); Bengal (2·2 in 1883, 2·66 in 1884, and 2·6 in 1885), and Assam (2·6 in 1883, 2·89 in 1884 and 2·58 in 1885). The proportion of convicts guilty of offences other than offences against the human body or offences against property to 10,000 of the population was in Burma 8·5, 10·08, and 15·8 in 1883, 1884 and 1885 respectively. The figures for the whole of India for those years were 1·8, 1·70 and 1·71. Excluding Coorg the highest figures in India proper were in all three years in Assam (3·4, 3·38, and 2·8 respectively). The lowest figures occurred in each year in Madras, *viz.*, ·6, ·56 and ·53.

Total jail population in the years 1884 and 1885 as compared with 1883.

13. Statement No. 1 appended to this Resolution summarises the statistics relative to the distribution of prisoners of all classes during the years 1884-85. The figures tabulated below classify the prisoners as convicts, under-trial and civil prisoners in 1883, 1884 and 1885. In 1884, the total jail population increased in Bombay, Bengal, Burma and Hyderabad. It declined in Madras, the North-Western Provinces and Oudh, the Punjab, the Central Provinces and Assam. In 1885, however, there was a general rise, and the only provinces, the figures for which in that year are lower than those for 1883, are the North-Western Provinces and Oudh, the Central Provinces, and Assam. The increase in 1884 in Bombay, Bengal, Burma and Hyderabad was followed by a further increase in 1885, while the decline in Madras and Punjab proved to be only temporary. The increase in Bombay has occurred in under-trial prisoners, that in Madras in under-trial and civil prisoners, that in Bengal, Burma and Hyderabad in all classes of prisoners, and that in the Punjab in convicts and under-trial prisoners. Taking the figures for the three years together, the number of convicts declined by 6,262 in 1884 and rose by 4,466 in 1885, that of under-trial prisoners rose by 9,319 in 1884 and by 9,174 in 1885, while that

of civil prisoners rose by 79 in 1884 and by 277 in 1885. The net result is a small decline in the number of convicts, a large increase in the number of under-trial prisoners, and a small increase in civil prisoners.

Province.	Classes of prisoners.	1883.	1884.	1885.	Increase. 1884.	Increase. 1885.	Decrease. 1884.	Decrease. 1885.	Remarks.

There was in 1884, a decline in every province except Burma and Bengal, and the increase in the latter province was very trifling. In 1885, there was a considerable rise on the figures of 1884 in Madras, and smaller increases in Bengal, the Central Provinces, Coorg, the Hyderabad Assigned Districts and Burma. The only provinces which showed a higher daily average in 1885 than in 1883 were Bengal (total increase in two years 1·01 per cent.), and Burma (total increase in two years 29·52 per cent.). The North-Western Provinces and Oudh still show by far the largest daily average, and the causes for this result were referred to in paragraph 8 of the Resolution reviewing the figures for 1883. The decline in the daily average in those provinces amounted in 1881 to 1,833 (7·85 per cent.), and in 1885 to 1,756 (8·11 per cent.). The daily average for 1885 was therefore 19,773 as compared with 23,362 in 1883, and the figures for that year are lower than those of any year since the famine year of 1877-78. The increase in the figures in Burma is due to the growing criminality of the province.

14. The following table shows the different races and religions to which the convicts admitted into jail belonged :—

Convicts according to race-religion.

Province.	Population according to the census of 1881.			Total number of convicts admitted into jail during 1884 and 1885.						Percentage of proportion of jail and total population according to race and religion.			Percentage of admissions according to race and religion to total number of admissions during 1883, 1884 and 1885.

It has been pointed out in reviewing previous figures that, except in Burma and Coorg, the circumstances of which are different from those of the rest of India, there is hardly any exception to the rule that the percentage of Hindus and Sikhs to the jail population is not so high as the percentage which the total Hindu and Sikh population bears to the total population of India.

The statistics now under review bear out this view. The largest proportion of admissions consisted everywhere of Hindus except in the Punjab and Burma. In the former province 55·9 per cent. of the total population is Muhammadan against 38·4 per cent. (Hindus and Sikhs). In Burma, the population, other than Hindu and Muhammadan, amounts to 91·9 per cent. of the whole. In the Punjab, the Hindus admitted to jail amounted in 1884 to 29·9, and in 1885 to 28·2 of the total admissions, while the percentage of the Muhammadans admitted during the same years was 63·1 and 64·6 respectively. In Burma, the percentage of Hindu convicts to the total admissions was 5·1 in 1884, and 3·1 in 1885, while the percentage of convicts other than Hindus and Muhammadans was 87·2 in 1884 and 91·9 in 1885. In Madras, the North-Western Provinces and Oudh and Hyderabad, the percentage of Hindu convicts admitted was above 80 in both 1884 and 1885 : in the remaining provinces, except the Punjab and Burma, it amounted to over 50. The percentage of Muhammadan admissions is considerable only in the Punjab (63·1 in 1884 and 64·6 in 1885), Bengal (38·0 in 1884 and 38·1 in 1885), Bombay (32·0 in 1884 and 33·8 in 1885), and Assam (31·1 in 1884 and 32·2 in 1885). It will be remarked that as in previous years the percentage of Muhammadan convicts to the total admissions into jail was higher in every province than the percentage of

Muhammadans to the total population. The percentage of convicts not belonging to the Hindu or Muhammadan religions was in Burma 87·2 in 1884 and 91·9 in 1885. In the Central Provinces the corresponding figures were 26·5 and 24·9.

The number of Europeans admitted to jail fell from 817 in 1883 to 723 in 1884 Of these 296 were imprisoned in Bengal, 197 in Burma, and 132 in Bombay, and 74 in Madras. In 1885 there was 690 admissions--241 in Bengal, 198 in Burma, 143 in Bombay and 81 in Madras. The number of Eurasians imprisoned in 1884 was 277 of which 139 were imprisoned in Bengal and 67 in Madras. The number in 1885 fell to 190, 92 of which occurred in Bengal, and 43 in Madras. In the two years only 2 Europeans and no Eurasians were imprisoned in Assam, and no Europeans at all in Coorg or the Berars.

15. The following table summarizes the distribution according to sex, age and previous occupation of convicts admitted into jail :

In 1883 the percentage of males admitted exceeded 90 in every province except Madras and the Central Provinces, where it amounted to 88·5 and 87·1 respectively. In 1884 the figures for these two provinces were 88·6 and 88·9 respectively. In 1885 that for Madras rose to 90·1, while that for the Central Provinces stood at 88·8. The percentage fell below 90 in none of the other provinces during the two years. Female convicts were least numerous in Burma, where they amounted to only 3·3 per cent. in 1884, and 3 per cent. in 1885, of the total convicts admitted.

The percentage of juvenile convicts to the total convicts admitted amounted in Madras to 3·5 and 3·4, and in the Central Provinces to 2·8 and 2·6 in 1884 and 1885, respectively. In both Provinces the percentages for 1883 and 1885 were practically identical. The smallest percentage (·4 in 1884, and ·2 in 1885) occurred in Assam. In the other provinces the percentage ranged between 1 and 2, except in Bombay and Coorg in 1884, where it amounted to 2 and 2·1 respectively, and Burma, in 1886, where it was only ·8.

The statistics regarding the previous occupation of convicts show that persons employed under Government were, relative to the total admissions, most numerous in Bengal (4·4 per cent.), and Bombay (4·3 per cent.), in 1884, and in Bombay (4·5 per cent.), and the Berars (4·7 per cent.) in 1885; they were in 1884 least numerous in Madras (1·9), and the Central Provinces (2·2), and in 1885 in the North-Western Provinces and Oudh (2·0 per cent.), and Burma (2·4). Agriculturists were most numerous both in 1884 and 1885 in North-Western Provinces and Oudh where the percentage was 57·1 and 57·7 respectively. In Bengal they numbered 54·2 and 54·5, and in the Punjab 52·7 and 52·8 per cent. of the total convicts admitted in 1884 and 1885 respectively. Excluding Coorg, they were least numerous in the Berars (18·3 per cent. in 1884, and 17·7 per cent. in 1885) and Madras (35·3 in 1884 and 36·8 in 1885).

16. The following table shows the proportion of convicts in jail on the last day of 1884 and 1885, respectively, who were under sentence (1) for a period of under a year, (2) for a period exceeding 1 year but not exceeding 5 years, and (3) for terms of imprisonment over 5 years or for transportation. Between 1882 and 1884, the percentage of convicts sentenced to more than 5 years' imprisonment was higher in Madras than elsewhere except in Coorg in 1884. In 1885, the percentage in Bombay (23·3) was slightly higher than that in Madras (23·0). From 1882-1885, the percentage ranged in Assam from 14·1 to 8·9 and in the Punjab from 14·7 to 11·6. For the whole of British India there was a rise in 1884 from 17·3 to 18·6 in the percentage of sentences of over 5 years or transportation, but it fell again in 1885 to 17·8. The percentage of convicts sentenced to terms of imprisonment between 1 and 5 years fell from 42·3 to 40·8 in 1884 and to 37·5 in 1885. There was a corresponding rise in the percentage of persons sentenced to not more than 1 year, which was 40·4 at the end of 1883, 40·6 in 1884, and 44·7 in 1885.

NOTE.—These percentages are calculated on the number of convicts excluding those sentenced to death.

The following table gives the same information with regard to prisoners admitted in 1884 and 1885. The proportion of convicts sentenced to not more than 1 year's imprisonment to the total number of convicts exceeded 90 per cent. in Madras, Coorg, Assam and the Central Provinces in both 1884 and 1885. The percentage was smallest in Burma (79·1), and the Punjab (81·9) in 1884, and in the Punjab (81·7) in 1885. The average percentage was 87·4 in 1884, and 87·7 in 1885. The percentage of convicts sentenced to between 1 and 5 years' imprisonment was in 1884 highest in Burma (16·9), and the Punjab (16·1). These provinces changed places in 1885, in which year the percentage for the Punjab was 16·3, and that for Burma 13·9. Leaving Coorg out of consideration, the percentage in Madras, which was the same in both 1884 and 1885, was the lowest in both years. The figures for Assam come next, *viz.*, 9·1 per cent. in 1884 and 7·1 per cent. in 1885. The average percentage over British India was 10·7 in 1884 and 10·4 in 1885.

The percentage of convicts sentenced to over 5 years' imprisonment was in 1884 highest in Coorg (5·9), Burma (4·0), and Assam (2·4). The figures for other provinces ranged from 2·1 in Hyderabad to 1·2 in Bengal. In 1885, the percentage in Burma was 3·1, and the Berars came next with a percentage of 2·8. The average percentage (1·9) was exceeded elsewhere only in the North-Western Provinces and Oudh and the Punjab (2 per cent.). The lowest percentages occurred in Coorg (1·1), Assam (1·3), and the Central Provinces (1·4).

NOTE.—These percentages are calculated on the number of convicts excluding those sentenced to death.

Convicts according to nature of imprisonment.

17. The statement below shows the percentage of prisoners sentenced to (i) simple imprisonment, (ii) rigorous imprisonment, (iii) rigorous imprisonment with solitary confinement, (iv) rigorous imprisonment with whipping, respectively, to the total number of convicts admitted. In 1883 the average percentage of convicts sentenced to simple imprisonment was 9·1. In Madras it amounted to 21·2, but in no other province did it exceed 8. In 1884 the percentage all over India fell to 8·0. It was still highest in Madras, where it amounted to 18·6. It exceeded the general average also in Coorg where it was 9·7, and equalled it in the Punjab. In the remaining provinces it fell below it. The lowest figures were those for Assam (2·7), the Central Provinces (4·1), and Burma (4·2). In 1885 the general average again rose to 8·6 per cent. The percentage in Madras was 19·3, in Coorg it amounted to 10, and in the Berars to 8·7. In the remaining provinces it fell below the general average, and was again lowestin Assam (3·1), the Central Provinces (4·2), and Burma (5·1).

The general percentage borne by convicts sentenced to rigorous imprisonment without any additional punishment was 81·3 in 1883, 83·2 in 1884, and 82·2 in 1885. The highest provincial figures occurred in Assam (97·1 in 1883, 96·5 in 1884, and 96·4 in 1885), and they also exceeded 90 per cent. in each year in Bombay, Bengal, and Burma. The lowest figures occurred each year in the Punjab, where the percentages were 38·3, 39·2, and 37·0 respectively. In Madras they were 77·7, 79·9, and 79·2. In the remaining provinces they exceeded 80. Rigorous imprisonment with the addition of solitary confinement was awarded in 1883 to 8·4 per cent. in 1884 to 7·6 per cent. and in 1885 to 8·0 per cent. of the total number of convicts sentenced to imprisonment. The figures for the Punjab are far higher than those for any other province, and were 51·3 per cent. in 1883, 50·6 per cent. in 1884, and 53·1 in 1885. The Berars come next (8·6 in 1883, 8·9 in 1884, and 12·3 in 1885); in both the Central Provinces and North-Western Provinces and Oudh, the percentage exceeded 5· in all three years: in Burma it amounted to 1·0 in 1883 and 1·3 in 1884: in the remaining provinces it did not amount to 1.

Rigorous imprisonment with whipping was the form of punishment in 1·2 per cent. of the admissions in all three years. The figures are highest in the Berars (2·9 in 1883, 3·5 in 1884, 3·4 in 1885), the Punjab (2·4 in 1883, 2·2 in 1884, and 2·1 in 1885), and Burma (1·9 in 1883, 2·5 in 1884, and 2·7 in 1885). They were lowest in Bengal (·4 in 1883, ·4 in 1884, ·5 in 1885), and Assam (·5 in 1883, ·7 in 1884, ·4 in 1885).

* All the figures in this column are exclusive of the number of convicts sentenced to transportation and to death.

18. The statement below shows the offences for which the convicts admitted from the different provinces in the past three years have been sentenced: offences are for this purpose divided into three classes:—

Convicts according to general nature of offences.

(i) offences under Chapter XVI., Indian Penal Code, affecting the human body;

(ii) offences under Chapter XVII., Indian Penal Code, against property; and

(iii) all other offences.

Province.	Chapter XVI. of the Indian Penal Code,—Offences affecting the Human Body.						Chapter XVII. of the Indian Penal Code,—Offences against property.						All other offences.

* The number of crimes committed by convicts in these two provinces does not coincide with the number of convicts admitted into jail during 1885.

Generally speaking, there has been a rise in the numbers of convicts sentenced for offences under Chapters XVI. and XVII. of the Indian Penal Code, and a decline in the number of those found guilty of other offences. The percentage of offences against the human person to the total number of offences for which convicts were sentenced all over India was 13·9 in 1883, 15·2 in 1884, and 15·6 in 1885. During this period the greatest increase has occurred in the North-Western Provinces and Oudh. The figures for those Provinces were in 1883, 4,358 (12·3 per cent. of the whole), in 1884, 6,211 (18·3 per cent.), and in 1885, 6,877 (20·8 per cent.). In Assam, the percentage was 35·8 in 1883, 40·0 in 1884, and 39·4 in 1885. In Bengal and Bombay these offences show a decline, while in Bombay and the Punjab [illegible] the number of convicts admitted for offences against property has slightly increased, the proportion for 1883, 1884, and 1885 being 57·5, 58·7 and 58·4 respectively. In the Central Provinces and the Berars, the percentage of prisoners convicted of such offences was over 70 in all three years: and in Madras, it exceeded this figure in 1884 and 1885. The percentage of the convicts admitted into jail in Burma in 1883 who had been convicted under Chapter XVII. of the Indian Penal Code, was 54·9, but by 1885 it had fallen to 43·1. In Assam, it was 35·8 in 1883, 40.0 in 1884, and 39·4 in 1885. The general percentage of convicts sentenced for the commission of other offences was 28·6

in 1883, 26·1 in 1884 and 26·0 in 1885. The figures for Assam were 46·1, 41·8, and 43·2 respectively in the three years: those for Burma 31·6, 34·5, and 47·5. In the Central Provinces, they were 16·5 in 1883, 17·3 in 1884 and 14·3 in 1885, and in the Berars 16·2, 13·7, and 12·6.

Convicts sentenced to transportation or death.

19. In the following statement are shown (1) the number of convicts under sentence of transportation actually in the jails on the 31st December 1883, 1884 and 1885, and (2) the number of persons under sentence of transportation admitted into jail during each of the three years. At the close of 1883 the largest number of convicts under transportation (875) were confined in the jails of the North-Western Provinces and Oudh. The number had risen by the end of 1884 to 966, or by the end of 1885 to 1,005. The figures for Bombay, 858, 875 and 810 at the close of 1883, 1884 and 1885 respectively come next. In Assam and the Berars there were very few convicts under sentence of transportation on any of the above dates.

By Home Department Resolution No. 4—412-424, dated 25th March 1886, the rules regarding the selection for deportation to the Andamans of convicts under sentence of transportation have been considerably relaxed. The test now to be applied is whether a convict is fit for ordinary labour in an Indian jail. If so, he should, subject to the rule that he must not be under 18 nor over 45 years, be deported to the Andamans. The responsibility of selecting convicts for deportation has also been removed from the Committee convened at Alipore and placed on the Local Governments and Administrations. It is hoped that this change of system will relieve the Indian jails, to a very considerable extent, of convicts under sentences of transportation.

The convicts admitted under sentence of transportation during the period of three years was highest in the North-Western Provinces and Oudh, Bombay and Bengal, and lowest in the Berars.

The number of persons sentenced to death in 1883 was 401: in 1884 the number fell to 398, but it rose in 1885 to 445. In 1884, there were 78 cases in Madras in which sentence of death was passed, and 76 in the North-Western Provinces and Oudh. The number of such sentences fell in the Punjab from 94 to 61, and in Bombay from 82 to 60. In 1885, the Punjab again headed the list with 124 sentences of death. There were in that year 91 such sentences in the North-Western Provinces and Oudh, 68 in Madras, and 55 in Bombay.

Previously convicted prisoners.

20. The number of convicts admitted to the jails against whom previous convictions were proved either prior to or after conviction is shown in statement No. 4. The proportion of such convicts to the total number of convicts admitted is as follows in the different provinces:—

Provinces.	Males.			Females.			Total.		
	1883.	1884.	1885.	1883.	1884.	1885.	1883.	1884.	1885.
Madras	8·88	8·72	9·30	3·90	3·91	4·08	8·31	8·17	8·78
Bombay	15·8	12·6	14·8	11·5	9·2	9·1	15·5	12·3	14·4
Bengal	12·16	12·54	11·81	6·22	6·08	6·68	11·89	12·22	11·56
North-Western Provinces	13·59	13·57	11·40	7·79	6·81	5·81	13·17	13·11	11·04
Punjab	15·0	15·44	15·0	6·0	6·23	8·0	11·0	15·05	15·0
Central Provinces	10·26	11·02	11·02	5·02	4·94	6·92	9·58	10·34	10·56
British Burma	13·66	16·52	16·79	4·93	3·32	2·11	13·42	16·08	16·35
Assam	12·54	11·16	10·44	3·62	4·89	2·38	12·19	10·91	10·02
Coorg	4·11	1·08	8·57	...	10·09	...	3·97	1·38	7·79
Hyderabad Assigned Districts	14·3	18·48	18·6	4·2	4·34	5·5	13·50	17·46	17·7
TOTAL	12·60	12·86	12·96	6·2	5·82	5·62	12·2	12·39	13·70

The ratio of previously convicted convicts to the total number of admissions was highest in the Hyderabad Assigned Districts in both 1884 and 1885 (17·46 in 1884 and 17·7 in 1885). In Burma the ratio was 16·08 and 16·35, in the Punjab 15·05 and 15·0, and in Bombay 12·3 and 14·4 in 1884 and 1885 respectively. The ratio in Madras, which fell from 20·19 in 1882 to 8·31 in 1883, was 8·17 in 1884, and 8·78 in 1885.

In the review of the figures for 1883 it was stated that the Government of India had under its consideration the introduction of a uniform and effective system of registering and establishing the recognition of re-convicted offenders for purposes of jail discipline. It was then observed that the following suggestions had been made with the view to effecting this object—

(1) that a descriptive roll of every prisoner arrested by the police should, as suggested by the Conference, be prepared at the station-house and be sent up with the prisoner to the Magistrate, and

that such discriptive roll, in the event of the final conviction of the prisoner by the Magistrate, should be copied in a register to be kept up in the jail for this purpose;

(2) that the police in sending up an accused person to the Magistrate should embody in the charge sheet as complete a record as possible of all his previous convictions;

(3) that the jail authorities should not content themselves with any information which they may obtain from the Magistrate or from the police as to the former convictions recorded against a convict, but should endeavour to ascertain from the subordinate jail officers, warders, and longer-term convicts, as well as from the jail records, if the prisoner has been previously convicted; and

(4) that the police should be given frequent opportunities of inspecting convicts, after admission into jail, both by a weekly parade as suggested by the Conference, and by such other means as may be found practicable.

The Government of India has since been in communication with Local Governments, with the result that the following additional measures have recently been prescribed for general adoption—

(1) that a list of re-convicted prisoners who are to be released every month be despatched from the jail to the Magistrate and the District Superintendent of Police. This may be done by sending to these officers on the 20th of each month an extract from the jail register, showing all re-convicted prisoners, with their places of residence, who are to be released in the succeeding month. The rule contained in clause 471 of the Jail Manual for Bengal that this list should be sent fortnightly may be retained in that province;

(2) that the jail authorities should examine under-trial prisoners detained in the jail or the Magistrate's lock-up in order to ascertain whether they have been previously convicted. Whenever a previous conviction is discovered in this way, an intimation to this effect should be sent to the police before the trial of the prisoner. In Magistrates' lock-ups, which are separate from the jail, it may not be always possible to carry out this rule, but these cases should be few. In sub-divisional lock-ups the plan will not be practicable;

(3) that when a re-convicted prisoner is transferred from one jail to another, an extract from the relevant entries in the register of the jail from which the transfer is made should be sent to the jail to which the prisoner is transferred; and

(4) that when subsequent to conviction the jail authorities discover that a prisoner has been previously convicted, the fact should be communicated to the Magistrate and the District Superintendent of Police.

The want of an authoritative definition of the term "habitual criminal" for the purposes of jail discipline having been much felt, the following definition has, after considerable discussion, been adopted, and the following orders passed as to the duties of classifying prisoners as habitual criminals:—

"For the purposes of jail discipline, the words 'habitual criminal' shall mean a prisoner so classed—

(1) By the Court or Magistrate that heard the case—

(*a*) because he has been convicted of an offence punishable under Chapter XII or XVII of the Indian Penal Code with three years' imprisonment or upwards, and has been previously punished on conviction for an offence under either of these chapters and similarly punishable; or

(*b*) because, from the circumstances of the case, the Sessions Judge or Magistrate believes the prisoner to depend on crime as a means of livelihood, or have attained such an eminence in crime as to warrant his being classed with habitual or class B criminals:

(2) By the District Magistrate, or any Magistrate empowered by him on this behalf, the classification being made in accordance with the principles suggested for the guidance of the courts in clauses 1 (a) and (b) of this definition:

(3) Subject to the control of the District Magistrate by the officer in charge of the jail, when the prisoner is—

(*a*) sentenced or believed to be liable to punishment under section 75 of the Indian Penal Code;

(*b*) under sentence enhanced by reason of more than one previous conviction; or

(*c*) known to have been repeatedly imprisoned for similar offences; or

(*d*) a member of the criminal tribe.

Provided that—

(1) any such Court or Magistrate as is mentioned above may direct that a prisoner shall not be classed as an habitual criminal, and

(2) when there is room for doubt whether a prisoner should be so classed or not, the officer in charge of the jail shall refer the case for the orders of any such Court or Magistrate."

Explanation.—The classification when made by the convicting courts shall be final. If the courts omit to classify a prisoner as an habitual, the District Magistrate, or any Magistrate empowered by him, may do so. In case of omission on the part of the Court and of the Magistrate, the officer in charge of the jail may make the classification, subject to the general control and supervision of the District Magistrate.

It is hoped that if the provisions of the preceding definition are acted up to, the number of instances in which re-convicted prisoners escape detection will be reduced to a minimum.

21. The number of juvenile prisoners (under 16 years of age) admitted into jail between 1883-85 from the several provinces, and the number of them who had been previously convicted, is shown below:—

Juvenile prisoners.

Province.	Number of juvenile prisoners admitted.				Number of juvenile prisoners previously convicted.				Percentage of column 3 to column 2.			
	1885.	1884.	1883.	1882.	1885.	1884.	1883.	1882.	1885.	1884.	1883.	1882.
Madras	816	759	808	214	70	66	80	91	8·6	8·7	9·9	37·7
Bombay	263	285	276	243	13	22	37	18	4·6	7·7	13·4	7·4
Bengal	355	408	285	265	28	37	11	24	7·9	9·1	3·8	9·0
North-Western Provinces and Oudh.	373	373	511	423	76	65	78	98	20·4	17·4	15·3	23·1
Punjab	217	192	243	255	17	24	27	38	7·8	12·5	11·1	14·9
Central Provinces	156	161	170	114	16	9	3	20	10·3	5·6	1·8	17·5
British Burma	102	111	83	77	4	4	6	1	3·9	3·6	7·2	1·2
Assam	6	13	12	16	...	2	...	2	...	15·4	...	12·5
Coorg	2	6	1	...	...	...	...	...	...	...	...	...
Hyderabad Assigned Districts	22	19	25	31	...	2	1	9	...	10·5	4·0	29·0
Total	2,312	2,327	2,414	1,665	224	231	243	301	9·7	9·9	10·07	18·1

The number admitted from the whole of India has during the period slightly declined. It amounted to 2,414 in 1883, 2,327 in 1884, and 2,312 in 1885.

The increase in the number of juveniles admitted, which occurred in Madras in 1883, was maintained in 1884 and 1885. In the latter year nearly four times as many convicts of this class were admitted as were received in 1882. In 1884 more juveniles were admitted in Bombay, Bengal and Burma than in 1883; there was a decline in the admissions from all three Provinces in 1885, and in that year the only provinces from which more juvenile offenders were admitted than in 1883 were Madras, Bengal, and Burma. The numbers from the North-Western Provinces and Oudh which in 1883 were 511 fell in 1884 and 1885 to the same figure, *viz.*, 373.

During the period under review there was a steady decline in the number of juveniles who had been previously convicted, and the percentage of previously convicted juvenile prisoners to the total number of juvenile prisoners admitted had in 1885 fallen to 9·7. The percentage in 1882 was 18·1.

Reformatories.

The attention of Local Governments has been directed to the urgent necessity for establishing reformatories and introducing the Reformatory Act. There are now reformatories at Calcutta and Hazaribagh in Bengal, and the Lieutenant-Governor has under consideration a further proposal of establishing a reformatory training ship in the Hooghly. In Madras a reformatory has just been established at Chingleput, and in Bombay there is a reformatory school at Poona which is not however worked under the principles of the Reformatory Act. There is also a reformatory at Paungdé in Burma. The local authorities in the North-Western Provinces and Oudh and the Punjab have had under their attention the question of the establishment of reformatories, but financial considerations have hitherto prevented the proposal from being carried into effect. The Government of India has impressed upon these Local Governments the necessity of making provision for this very necessary object at no distant date.

22. The following table shows the results of the working of the rules for remissions in the different provinces:—

Remissions.

Province.	Number of convicts released during 1883, 1884, and 1885 who (a) gained remission.			(b) did not gain remissions although eligible for remission under the good conduct rules.			Total number of convicts eligible for remission under the good conduct rules.			Percentage of (a) to the total number eligible for remission.			Percentage of (b) to the total number eligible for remission.		
	1883.	1884.	1885.	1883.	1884.	1885.	1883.	1884.	1885.	1883.	1884.	1885.	1883.	1884.	1885.

Hyderabad Assigned Districts	...	...	50	...	...	...	...	...	50	...	...	100·0	..	...	...
Total	4,995	5,519	7,637	5,269	5,269	4,361	10,254	9,910	9,830	48·6	55·7	77·7	51·4	44·3	13·3

It is satisfactory to notice that the percentage of convicts eligible for remission who were successful in gaining it has steadily risen. The percentage for the whole of India was in 1885, 77·7, and the figures for that year testify to a much more uniform working of the rules. Still better results may be expected now that more uniform rules have been adopted in different parts of India. The only two provinces in which the percentage fell below the average were the Punjab (38) and the North-Western Provinces and Oudh (64). In the former province there was some delay in introducing the system owing to the difficulty

experienced by the Lieutenant-Governor Sir C. Aitchison in providing funds for the additional establishment required. In the Central Provinces, Coorg, and Hyderabad remission was gained in 1885 by every convict eligible for it. During the period under review the draft rules regarding remission circulated under Home Department Resolution No. 14—899-909, dated 3rd July 1884, were considered by Local Governments and Administrations, by whom they were generally adopted. The effect of the new rules has been to extend the mark system to District Jails, and by special exception to all prisoners under sentence of two years and upwards who are detached as jail servants and officers to subsidiary jails. The rules are made applicable to habituals as well as to ordinary convicts, and it has been determined that the stimulus of the mark system shall be brought to bear on convicts on the earliest possible opportunity, and that no period of probation such as is prescribed under the English system shall be required. Marks are given for the careful and punctual performance of the daily task allotted to a convict, and extra marks can be obtained by special skilfulness and industry or by the performance of work over and above the daily task. The total number of ordinary marks which a well conducted convict may earn is 3 on week days and 1 on Sundays, and the aggregate amount of remission which can thus be gained in a year is 40 days. For certain exceptional services special marks can be earned. The ordinary marks were under the original rule to be awarded every week in the presence of the prisoner, and entered at once on his ticket and in the register prescribed for the purpose. The rule was, however, subsequently modified in order to make the system more self-acting. Under present arrangements any convict who has not been reported for punishment and thereby forfeited marks will know by the end of the day that he has earned 2 marks. These marks need not be entered in the register and on the prisoner's ticket on the day on which they were gained, but discretion is given to the Superintendent to have the entries written up at intervals not exceeding one month. If additional marks have been earned for diligence, a special award must without delay still be given, and no arrangement could do away with the necessity for this. Of course forfeiture of marks for misconduct is imposed immediately. It is believed that the present system can be satisfactorily and inexpensively worked.

These rules have been reported to the Secretary of State, and were sent by His Lordship for opinion to Sir Edmund DuCane, the Surveyor General of Prisons and Chairman of Directors of Convict Prisons in England. His criticisms on the rules as they now stand are receiving the attention of the Government of India.

Employment of convicts.

23. In Statement V. full details are given of the employment of convicts during the years under review. The following abstract is intended to show the number of prisoners employed on manufactures or extra-mural labour :—

1	2			3			4			5									Remarks.
	Average number of effective prisoners.			Number of prisoners employed on manufactures.			Percentage of effective labour prisoners employed on manufactures.			Number of prisoners employed extramurally.

Hyderabad Assigned Districts.	827	826	805	369	391	434	44·6	47·3	53·9	...	...	...	...	3	0·17	...	3	0·17	
TOTAL	59,250	60,209	62,333	24,944	26,801	26,534	42·09	44·3	42·6	2,858	2,979	2,398	1,079·44	8,543·48	21,508·56	3,937·44	11,522·48	23,755·56	

Of the total number of effective prisoners the percentage employed on manufactures in 1884 and 1885 was 44·3 and 42·09, respectively, compared with 42·6 in 1883. From this the number of convicts employed in preparing articles for use or consumption in jails is excluded. 6,688 convicts were so employed in 1883, 6,320 in 1884, and 6,199 in 1885. 2,398 convicts were employed under the Public Works Department in 1883, 2,979 in 1884, and 2,858 in 1885. The number of convicts hired out to municipalities, private individuals or departments other than the Public Works Department was 21,508·56 in 1883. The number fell to 8,543·48 in 1884, and to 1,079·44 in 1885 owing to the discontinuance in the North-Western Provinces and Oudh of the attempts made in those provinces to obtain extra-mural employment on a large scale for convicts. It is unnecessary to review these figures at any length. The policy of the Government of India in regard to the employment of convicts as approved by the Secretary of State has recently been explained in Home Department Resolution No. 10-605—618, dated 7th May 1886. Briefly that policy is that convicts should be employed on public works, in cases when the works are so large and concentrated and likely to last for so long a time as to justify the erection on the spot of accommodation such as would be required for the exercise of the same sanitary care and the enforcement of the same system of discipline, penal labour and classifications as are now in force in Central Jails. The employment of gangs of convicts on railway works lodged in portable prisons is only to be resorted to when an exceptionally favourable opportunity presents itself, and a special report of any experiment of the kind must be prepared for the information and orders of the Government of India and the Secretary of State. The employment of small gangs of convicts on station roads and municipal works is now interdicted. In those provinces in which there is a completely organised system of Central Jails, well regulated industrial employments are permitted to be carried on in such jails on a large scale subject to the conditions that the jails must not be converted into steam factories, and that jail industries must not be allowed to compete injuriously with local trade. The intramural industries of jails must in future be adapted to meet the requirements of Government consuming departments, though special industries, such as carpet-making, for the products of which the departments of the Government have no demand, are not prohibited in jails. The importance of avoiding multifarious employments in the same jail and of securing an adequate amount of the penal element in jail industries, two matters to which insufficient attention has been paid in the past, has been strongly commended to the attention of Local Governments and Administrations.

24. The following statement shows the percentage of the average number of effectives serving as prison officers and prison servants respectively in the last three years:—

Province.	Average number of convicts under sentence of labour on working days less the average number sick and the average number convalescent and infirm.			Average number of efficient convicts employed as prison officers.			Average number of efficient convicts employed as prison servants.			Percentage of the average number of effectives employed as					
										Prison officers during			Prison servants during

The proportion of prisoners employed as prison officers shows a steady increase in Madras, Bombay, Bengal, the Central Provinces, Burma and Assam. In the North-Western Provinces and Oudh and the Punjab the proportion so employed rose in 1884, and declined in 1885; in the latter province from 6·1 to 1·8 per cent.

A slightly lower proportion of convicts were employed as prison servants in 1884 and 1885 than in 1883, and Bengal, British Burma and Coorg are the only provinces in which the percentage so employed was higher in 1885 than in 1883. The percentage employed as prison servants in North-Western Provinces and Oudh declined from 15·1 in 1883 to 15·0 in 1884, and 13·4 in 1885. The system under which convicts are employed as prison officers and prison servants has recently been unfavourably criticised by the jail authorities in England, and the question is the subject of separate correspondence between the Government of India and the Secretary of State. It would therefore be out of place to enter into any discussion here as to the success or failure of the system or its appropriateness to the special conditions of this country.

25. In the statement below are shown the number of under-trial and civil prisoners respectively admitted in 1883, 1884, and 1885, and remaining in jail at the close of each year. The number of under-trial prisoners admitted in 1884 showed a very large excess over the number admitted in 1883 in Bombay, and a smaller increase in Bengal, Burma and the Berars. It declined in Madras, the North-Western Provinces and Oudh, Punjab, the Central Provinces and Assam. The increase, which occurred in Bombay in 1884, was maintained in 1885; a large increase took place in the same year in Madras, Bengal, and the Punjab, and a lesser one in the Central Provinces, Burma, Coorg and Hyderabad. The North-Western Provinces and Oudh and Assam are the only provinces showing a continuous decline in the figures, and in these two provinces only were fewer under-trial prisoners admitted in 1885 than in 1883. The number of under-trial prisoners in jail at the close of 1883 was 4,555: it had risen by the close of 1884 to 4,671, and by the end of 1885 to 5,604. The rise occurred mainly in Madras, Bombay, and Burma. The figures for the remaining provinces show comparatively little variation.

* Exclusive of the figures for the Subordinate Jails of Dharwar and Karachi which are not available.
† In Bombay civil prisoners are not under the control of the Jail Department.

The number of civil prisoners admitted from all parts of India except Bombay declined from 10,662 in 1883 to 10,649 in 1884, and rose again to 10,991 in 1885. The increase occurred almost entirely in Madras, Bengal, and Burma. In the North-Western Provinces and Oudh, and the Punjab, the figures declined continuously during the period under review. In the other provinces they varied to a very trifling degree. The number of civil prisoners in confinement at the close of the year was almost the same at the end of 1885, as at the end of 1883, while the figures for 31st December 1884 were smaller than those for either 1883 or 1885. Madras, Bengal and the Punjab show a continuous rise, but the results in the other provinces are that by the close of 1885 there were fewer civil prisoners in the civil jails than there were at the end of 1883.

26. The following statement summarizes the figures shown in statement No. 6, regarding the offences and punishments of convicts:

Convict offences and punishments.

Province.		Average number of convicts.	Criminal offences.	Breaches of Jail Rules.	Punishments Inflicted: By Criminal Courts.	For Jail Offences: Solitary confinement.	Reduced diet.	Solitary confinement with reduced diet.	Corporal punishment.	Other punishments.	Total punishments.	Ratio of total punishments to average number of convicts.

* Includes 6,861 formal warnings by Superintendent.

The number of criminal offences committed in 1883 was 279: it rose in 1884 to 290 and in 1885 to 311, the highest figure since 1881. During this period there was a continuous increase of such offences in Bombay and the North-Western Provinces and Oudh; and a continuous decrease in Madras. In the Punjab and the Central Provinces the figures for 1884 were lower than those for 1883, but those for 1885 were higher than those of the two previous years. In the other provinces the figures varied with the result that those for Bengal and Burma were lower in 1885 than in 1883, and that for Assam higher.

Breaches of jail rules which for the whole of India rose in 1884 by 25 per cent. declined slightly in 1885, but were still higher by 19 per cent. than they were in 1883. There was a continuous rise in the North-Western Provinces and Oudh due in a great measure to the inclusion in the figures to show breaches of rules for which the offenders are only admonished. In Madras, Bombay, Bengal, Burma, Assam and the Berars, the figures for both 1884 and 1885 are higher than those for 1883, but those for 1884 are higher than those for 1885. The rise in Madras has occurred under the head of smoking and being in possession of forbidden articles, and in miscellaneous offences against jail discipline. In Bengal the rise has occurred in miscellaneous offences, and in Burma in offences relating to work and miscellaneous offences, in Assam in offences relating to work, and in the Berars in smoking and being in possession of forbidden articles and miscellaneous offences. In the Central Provinces the figures for 1884 and 1885 are lower than those for 1883, but those for 1885 are higher than those for 1884. In the Punjab the number of offences declined in 1884 from 1,799 to 1,564, while in 1885 it rose to 9,074. This rise occurred under all three classes of offences, but was highest under the head of offences relating to work, the number of which was 760 in 1884 and 7,142 in 1885. The latter figure, however, includes 6,861 formal warnings by the Superintendent.

The proportion of convicts who were guilty of offences and breaches of jail rules to the average number of convicts was in 1883, 93·9, in 1884, 119·9, and in 1885, 121·2. In British Burma the ratio was 77·10 in 1883,

131·66 in 1884, and 101·62 in 1885. The ratio in Bombay, which was 21·6 in 1883, was 62·5 in 1884, and 45·1 in 1885. In Madras, Assam, and the Berars the ratio was higher in 1884 and 1885 than it was in 1883, but it was lower in 1885 than in 1884. In the North-Western Provinces and Oudh the ratio steadily increased. In the Central Provinces and Coorg the ratio declined in 1884 below that of 1883, but it was in 1885 higher than in either of the two previous years. In the Punjab the ratio was in 1883 and 1884 far lower than in any other province: in 1885 it rose to 93·2 for the special reason referred to above. The figures for Bengal are far higher than those for any other province, and the ratio for 1883 having been 354·22, that for 1884, 412·91 and that for 1885, 354·65. In reviewing the figures for this province in 1884, the Governor General in Council remarked that there appeared to be no reason to alter the views expressed on the report for 1883, that the system of reporting jail offences in Bengal is faulty in so far as it involves unnecessary interference with convicts, and that a reduction in the number of petty offences might be effected if more exemplary punishments than are ordinarily imposed were inflicted from time to time in appropriate cases. The decline shown in the number of offences in 1885 was attributed to the expression of the above views by the Government of India. The decrease in the latter year is no doubt considerable, but there is still much room for improvement, and as the attention of the Bengal authorities has now been fully directed to the matter, the Governor General in Council trusts that a sure approach to the standard at which existing orders aim will be effected.

27. The nature of the different punishments awarded is exhibited in the following figured statement:—

The number of instances in which solitary confinement was the punishment inflicted was 5,684 in 1883, 6,528 in 1884, and 6,161 in 1885. The

chief increase occurred in British Burma where the number of cases in which this form of punishment was given rose from 374 in 1883 to 912 in 1884, and 886 in 1885. The figures are highest in Bengal, where they are 3,261, 3,688, and 3,333 in three years respectively. In the Punjab, the Central Provinces, and Bombay the number of convicts punished with solitary confinement was considerably larger in 1885 than in 1883; in Madras and North-Western Provinces and Oudh it was considerably smaller.

In 1883 the number of cases in which convicts were sentenced to reduced diet fell to 7,906 from 9,896. In 1884 the number rose to 10,128, but again in 1885 fell to 7,825, or little more than half the figure for 1881. The substantial decrease which has taken place in the course of the last five years is satisfactory. There are, however, in different parts of India very different systems of imposing this punishment. In Bombay it is very rarely administered, while in Madras the ratio of such punishments to the average number of convicts was 26·5 in 1883, 26·9 in 1884, and 28·0 in 1885. In Bengal the ratio rose from 17·2 in 1883 to 29·0 in 1884, but it declined again in 1885 to 18·1. The ratio in the Central Provinces was 22·1 in 1883, 25·5 in 1884, and 18·1 in 1885. In Burma it rose from 16·7 to 22·9 in 1884, but fell again in 1885 to 13·6. In none of the other provinces did the ratio amount to 20 during the period under review. For the whole of India it was 14·1 in 1884 and 11·5 in 1885.

There has been a more continuous decline in the last five years in the number of cases in which reduced diet was combined with solitary confinement as a punishment for breaches of jail discipline. In 1881 the number of such punishments was 7,651; in 1882, 7,651; in 1883, 6,638; in 1884, 5,299; and in 1885, 5,167. The general ratio in the latter year fell to 7·7. Between 1883 and 1885 the number of cases in which this form of punishment was inflicted rose steadily in Bombay, the Punjab, and Central Provinces. The number declined in Bengal from 2,347 in 1883 to 522 in 1884, and 472 in 1885. In the North-Western Provinces and Oudh, the figures for both 1884 and 1885 were higher than those for 1883, and those for 1884 than those for 1885. In Burma the figures for 1883 were nearly doubled in 1884, but those for 1885 fell considerably below those for 1883. In Madras this form of punishment was not used at all.

The statistics relating to the infliction of corporal punishments on the inmates of jails are being separately reviewed. It is satisfactory to notice that during the past five years a very large decrease has occurred in the number of such punishments. The number of whippings, which in 1881 amounted to 8,922 and in 1882 to 4,658, fell in 1883 to 3,309. In 1884 the figures rose to 3,498, but in 1885 there was again a substantial decline to 3,075.

The number of punishments other than those specified above, which in 1883 amounted to 45,331, rose in 1884 to 59,514 and in 1885 to 59,788. In this category are included, shot drill, shot drill and penal diet, loss of one meal, working in cells, imposition of fetters and handcuffs, gunny clothing, penal or hard labour, loss of marks, double earthwork, reduction and degradation of prison officers, cutting the hair of female convicts, confinement in stocks, stoppage of exercise, non-labouring diet, coir-pounding, cotton-cleaning, drawing water, enhanced task, weaving gunnies, cross-bars, stone-breaking, treadmill and wheat-grinding.

Escapes.

28. In the following statement are shown the number of convicts who escaped from the jails in each of the years, 1883, 1884, and 1885:—

Province.		Total convict population.	Remaining uncaptured on the 31st December of those who escaped during the previous ten years.	Escaped during the year from		Total.	Recaptured during the year.	Remaining uncaptured on the 31st December.	Proportion of escapes to 1,000 of total convict population.

In 1882 the number of escapes from jails and sub-jails was 134. In 1883 there were 187, in 1884, 147, and in 1885, 182 escapes. At the beginning of 1884 there were 747 convicts who had escaped during the previous ten years at large. The number recaptured was 153 in 1883, 122 in 1884, and 164 in 1885. On 31st December 1885 there were 701 convicts who had not been recaptured. Escapes are compared with the total convict population most numerous in Assam, where 29 convicts escaped in 1883, 39 in 1884, and 26 in 1885. In Bombay the number of escapes rose from 16 in 1883 to 22 in 1884, and 30 in 1885; in the North-Western Provinces and Oudh the figures for the same periods were 16, 18, and 29. In Madras the number of escapes was 31 in 1883, 9 in 1884, and 32 in 1885; in the Punjab there were 22 in 1883, 14 in 1884, and 23 in 1885. The number of escapes in Burma, which amounted to 32 in 1883, declined to 9 and 15 in 1884 and 1885 respectively. In Bengal there were 14 escapes in 1885 against 32 in 1883, and 24 in 1884. In the Central Provinces the numbers declined from 9 to 7 in 1884, and rose to 11 in 1885.

Expenditure.

29. The total and net expenditure incurred in guarding and maintaining prisoners in British India during the period under review is shown in statements 7 and 8 respectively. The total cost and net cost per head in the jails and lock-ups of each province respectively is thus shown:—

The average total cost per head in all classes of jails taken together was Rs. 55-15-7 in 1883, Rs. 62-4-5 in 1884 and Rs. 62-10-9 in 1885. In each of the three years the total cost per head is smallest in the North-Western Provinces and Oudh. The total cost per head was less in 1885 than in 1883 in Burma, the Punjab and Coorg only. In every other province except the North-Western Provinces and Oudh and Assam the cost per head has steadily increased between 1883 and 1885. In these two provinces the cost for 1885 is higher than that for 1883, but lower than that for 1884. The increased cost per head has occurred entirely in the Central and District jails, where it rose from Rs. 58-6-5 in 1883 to Rs. 61-2-11 in 1884 and Rs. 70-0-4 in 1885. The cost per head in subsidiary jails which was Rs. 94-13-10 in 1883, was Rs. 86-12-10 in 1884 and Rs. 93-7-6 in 1885. It is highest in the Central Provinces, Burma, and Bengal, and the greatest increase during the year under review took place in 1884 in Madras and Burma. This increase is in a measure the result of the detention of under-trial prisoners for longer periods than before, and is an unsatisfactory feature of the statistics now under review.

The cost of rations which in 1883 amounted to Rs. 16,71,387 for an average number of prisoners of 79,219, rose in 1884 to Rs. 17,54,682 for 76,802 prisoners, and fell to Rs. 16,63,333 in 1885 for 74,069 prisoners. The cost of rations per head in Madras has risen from Rs. 32-10-4 in 1883 to Rs. 36-0-1 in 1884, and Rs. 37-7-4 in 1885. The increase per head in the latter year was accompanied by an increase in the number of prisoners, and has not been satisfactorily explained. The same result is observable in Bengal and the Central Provinces. In Burma there was a serious rise in the cost per head on this account in 1884, but the cost in 1885 was lower than it was in 1883. In Bombay and the North-Western Provinces and Oudh there has been a steady decline in the cost per head, though the number of prisoners has also declined. The cost of rations per head was only Rs. 13-11-1 in the latter province in 1885. In the Punjab the number of prisoners has declined, but the cost of rations per head was lower in 1885 than in 1883, though it was higher in the former year than in 1884. In Assam there has been a decline in the number of prisoners, but the cost of rations per head, though it rose in 1884 to Rs. 42-0-8 was lower in 1885 than in 1883.

The cost of establishment was Rs. 17,74,355 in 1883, Rs. 17,92,416 in 1884, and Rs. 18,25,827 in 1885. The increased cost is due to additional establishment appointed for the proper working of the mark system, and with the decline in the average number of prisoners the cost per head on this account has naturally increased.

The cost of police guards amounted to Rs. 4,62,824 in 1883, Rs. 4,62,721 in 1884 and Rs. 4,29,976 in 1885. In 1883 the cost per head was Rs. 5-14-9, in 1884 Rs. 6 4-7, and in 1885 Rs. 5-12-10. There were large increases in the police guards in North-Western Provinces and Oudh, the Punjab, and Burma in 1884. The hospital charges aggregated Rs. 1,45,277 in 1883, Rs. 1,46,776 in 1884, and Rs. 1,40,770 in 1885. The cost of clothing was Rs. 2,58,308 in 1883, Rs. 2,30,470 in 1884, and Rs. 2,14,588 in 1885. It declined steadily both in the aggregate amount and in the amount per head.

The cost of contingencies was Rs. 3,58,429 in 1883, Rs. 3,75,779 in 1884, and Rs. 3,67,581 in 1885.

The figures which show the amount earned by each convict employed on manufactures exhibit greater uniformity in 1884 and 1885 than in previous years. The highest average earnings (Rs. 53-6) were obtained in Burma in 1884, and the lowest in the North-Western Provinces and Oudh and the Punjab (Rs. 23-3) and Assam (Rs. 21).

In 1885 the largest sum per head (Rs. 57-10) was earned in Bengal. The minimum earnings rose to Rs. 29-10 in the Hyderabad Assigned Districts.

Sickness and mortality, Bengal Presidency.

30. Sickness was more prevalent during 1884 and 1885 than it was during 1883. The admission and daily average sick ratios for 1884 were 1,028 and 34 per mille, respectively, and for 1885 1,060 and 36, but these ratios are below the averages of 1877-81 which were 1,145 and 40 per mille. A decline in the mortality from bowel complaints to 12·66 per mille from a quinquennial average of 22·32 was most satisfactory; but in the following year (1885) the ratio rose to 14·68. Cholera gave rise to a death-rate of 1·52 per mille in 1884 and to 4·07 in 1885, the mean mortality during 1877-81 having been 3·90. Fevers were less prevalent in 1885 than in 1884, although the mortality from them was greater: the ratios of both years were, however, below the decennial averages of 1873-82. Sickness was as usual most prevalent in Bengal and Assam, and least so in the Gangetic portions of the North-Western Provinces and in Oudh. In all the geographical groups of the Bengal Presidency the total death-rates were below the averages of 1877-81, the diminution being particularly striking in the Punjab; the prevalence of cholera during the two years was very different. During 1884 this disease gave rise to the largest proportion of deaths in the Lower Bengal and Assam group, and was unusually fatal in the Rohilkand-Meerut group. In the Central Provinces it was remarkably quiescent, having given rise to a death-rate of 0·44 per mille against a ratio above 4 per mille during the two preceding years, and an average mortality of 11·39 during 1877-81. But during 1885 the highest mortality was recorded in the jails of the Central Provinces when it reached the high ratio 15·32. The Bengal-Assam group recorded a mortality of 7·24 and the Gangetic Provinces with Oudh 5·08. The remaining groups, *viz.*, Agra with Central India, Rohilkand and Meerut and Punjab groups, recorded no mortality.

Madras.

The vital statistics of the Madras jails were very favourable during 1884, and still more so during 1885. During 1884 the admission rate was 765, the daily sick rate 29, and the total death-rate 20·55 per mille, and during 1885 these ratios were 705, 25, and 17·86 per mille respectively, the last mentioned ratio being the lowest on record. The chief cause of this reduced mortality was the fewer number of deaths from bowel complaints. These diseases in 1884 gave rise to a mortality of 6·18 per mille and in 1885 to only 3·89 per mille, whilst the average mortality during the 20 years previous to 1882 was 25·72 per mille. But in addition to this, most of the chief causes of mortality contributed smaller ratios towards the total mortality.

Bombay.

The health of the Bombay prisoners was also favourable. The admission rates during 1884 and 1885 were 702 and 645 per mille, and the daily average sick ratios 26 and 25 per mille. The admission rate during 1877-81 was on an average 1,158 and the daily sick 40 per mille. The total death-rates were 34·91 in 1884 and 33·76 in 1885 against an average of 76·83 during the above-quoted quinquennial period, or 47·15, the average mortality during the 18 years previous to 1883. The comparatively favourable death ratio of 1885 is even more favourable than it appears when we take into consideration the cholera mortality of each year which was 0·55 in 1884 and 2·62 per mille in 1885. The average cholera mortality during 1877-81 was 3·47. Bowel complaints continued to give rise to very considerably lower death-rates than usual, namely, to 7·94 in 1884 and 5·68 in 1885, the last quinquennial average being 27·56.

Burma.

The health of the prisoners of Burma was better than it had been during the two preceding years, but was still far from satisfactory. The admission rates were 936 in 1884 and 869 in 1885 against an average of 833 during 1877-81, and the daily sick rates were 37 and 39 against a similar average of 35 per mille. The total death-rate in 1884 was 30·28, which was higher than that of the two previous years, whilst the ratio of 1885, namely, 43·15, was nearly equal to the average of 1877-81, which was 43·67. The increased mortality was mainly due to a larger number of deaths from cholera, anæmia, debility, small-pox and bowel complaints. The ratios of mortality from

bowel complaints were 7·69 in 1884 and 14·78 in 1885 against an average of 12·36 during 1877-81; and from cholera 4·82 in 1884 and 8·92 in 1885 against a quinquennial average of 11·15 per mille.

The Berars.

The health of the prisoners in the Berars was good. The daily average sick were 11 in 1884 and 13 in 1885. For the third consecutive year no mortality arose from cholera in 1884; but the death from this cause was recorded in 1885. Bowel complaints, which in most jails are among the chief causes of death, gave rise to a mortality of only 1·94 in 1884 and to none at all in 1885. The total mortality was 8·72 in 1884 and 19·14 in 1885 against an average of 33·37 during 1877-81.

Andamans.

The health statistics of the convicts in the Andamans continued to be very favourable. The admission rates in 1884 and 1885 were 14·65 and 13·53, respectively. The daily average sick ratios, 65 in 1884 and 49 in 1885, and the total mortality ratios 15·75 in 1884 and 17·66 in 1885, were among the lowest on record. All these ratios are a great improvement upon the averages of 1877-81, which were for admissions 2,162, daily sick 95 and total mortality 49·94 per mille.

31. On the whole, the Governor General in Council is of opinion that the statistics now under review which in many instances bear a very striking resemblance to those of recent years afford evidence that the jail departments in the different provinces have been generally administered with care and attention during the period to which they relate. During the past five years the number of convicts admitted into jail have been—

1881	295,046
1882	357,556
1883	325,403
1884	**334,771**
1885	**350,965**

The daily average has during the same period declined year by year as follows:—

1881	91,218
1882	85,007
1883	79,220
1884	**76,802**
1885	**74,035**

The total expenditure in 1881 was **Rs. 47,99,673**, in 1882 Rs. 47,11,385, in 1883 Rs. 47,73,310, in 1884 Rs. 47,82,844, and in 1885 Rs. 46,42,075. After deducting the earnings of the convicts the net cost of maintaining the jails in each year was—

	Rs.
1881	35,10,710
1882	34,53,920
1883	36,28,583
1884	**37,48,569**
1885	**33,49,756**

and the net cost of each convict guarded and maintained in jail calculated on the daily average was—

	Rs.	A.	P.
in 1881	40	10	0
in 1882	43	8	6
in 1883	45	5	5
in 1884	**48**	**13**	**0**
in 1885	**45**	**3**	**7**

Considering the extent to which the daily average declined between 1881 and 1885, the rise in the net cost per head which has occurred in the latter as compared with the former year is certainly not more than was to be expected, and the jail administration has, with some exceptions, been economical as well as efficient. The most important subjects connected with the maintenance

of jails at the present time are (i) the establishment of reformatories and the introduction of the Reformatory Act, (ii) the systematic classification of habitual criminals for purposes of jail discipline, (iii) the adoption of a more uniform system of jail punishments throughout the different parts of the Empire, (iv) the carrying into practice of the general rules laid down by the Government of India as to the extramural and intramural labour of convicts, and (v) the working of the new rules for remissions. The Governor General in Council desires to commend these subjects to the careful attention of Local Governments and Administrations, and trusts that the statistics for 1886 and following years will show that decided progress has been made in these branches of jail administration.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Local Governments and Administrations marginally noted for information and guidance, to the Department of Finance and Commerce, and to the Director General of Statistics to the Government of India for information.

Madras.	Central Provinces.
Bombay.	Burma.
Bengal.	Assam.
N.-W. P. and Oudh.	Coorg.
Punjab.	Hyderabad.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE STATISTICS REGARDING WHIPPING IN JAILS FOR THE YEARS 1884 AND 1885.

No. 6/297—307.

Extract from the Proceedings of the Government of India, in the Home Department (Judicial), —under date Calcutta, the 18th February 1887.

READ again—

Home Department Resolution No. 14—884-94, dated 19th June 1885.

Judicial Despatch to Her Majesty's Secretary of State, No 19, dated 4th July 1885.

Read also—

The Jail Reports of the several Presidencies and Provinces for the years 1884 and 1885, with the orders of the Local Governments and Administrations and of the Government of India thereon.

RESOLUTION.

IN Home Department Resolution No. 14—884-94, dated 19th June 1885, the statistics showing the extent to which whipping had been resorted to as a punishment for breaches of jail rules in 1883 were reviewed by the Governor General in Council.

2. In that year the number of whippings inflicted had fallen from 4,658 in 1882 to 3,309, or by 28·9 per cent. The following table compiled from the provincial reports gives the statistics regarding whipping in jails for 1884 and 1885, and for the preceding five years:—

PROVINCE.	Year.	Total number of male prisoners during the year.	Total number of punishments inflicted on males by jail officers for breaches of jail rules.	Total number of cases of corporal punishment.	Percentage of prisoners whipped to total number of male prisoners.	Proportion per cent. of corporal punishments to total jail punishments.

	1884	2,433	453	32	1·3	7·1
	1885	2,734	312	14	·5	4·5
TOTAL	1879	308,096	80,867	21,804	7·1	26·9
	1880	264,225	89,716	17,057	6·4	19·0
	1881	244,569	73,450	8,921	3·6	12·1
	1882	234,820	66,507	4,658	2·0	7·0
	1883	235,231	66,999	3,309	1·4	4·9
	1884	230,436	82,480	3,501	1·5	4·2
	1885	234,443	72,217	3,078	1·3	4·2

3. In 1884 the number of whippings inflicted over the whole of India rose to 3,501, or by 192 cases, and the percentage of prisoners whipped to the total male jail population from 1·4 to 1·5. The proportion borne by persons subjected to corporal punishments to total punishments fell, however, from 4·9 to 4·2. In 1885 there was a very satisfactory decline in the number of corporal punishments which in that year amounted to 3,078—the lowest figure in the period from 1879 to 1885. The percentage of prisoners whipped on the total male jail population fell to 1·3, while the proportion per cent. of corporal punishments to total jail punishments inflicted on male prisoners was the same as in 1884. In Madras, the North-Western Provinces and Oudh, the Punjab, Assam, and Burma more corporal punishments were inflicted in 1884 than in 1883, but in none of the larger provinces, except the North-Western Provinces and Oudh and Assam, were

the figures higher in 1885 than in 1883, and in every case, except Bengal and Coorg, where the increases were very trifling, they were lower in 1885 than in 1884. The percentage of prisoners whipped to the total jail population was higher in both 1884 and 1885 in Madras, the North-Western Provinces and Oudh, Assam, and the Hyderabad Assigned Districts than in 1883; but the rise was not large except in Madras in 1884, and in Assam in both 1884 and 1885. In every province, except Assam and the Hyderabad Assigned Districts, the percentage borne by corporal punishments to the total punishments inflicted on male prisoners is shown as lower in 1885 than in 1883. In the Hyderabad Assigned Districts, the variation is not important, while the figures have been calculated incorrectly in Assam. Steps have been taken to prevent a recurrence of this error.

The general result of an examination of the figures for the past seven years is, in the opinion of the Governor General in Council, satisfactory. Corporal punishments were in 1885 administered in one case when they were in 1879 administered in 7. The percentage borne by prisoners whipped to the total male jail population has in the same period fallen from 7·1 to 1·3, and the proportion per cent. of whippings to the total punishments inflicted on males was 4·2 only in 1885 as compared with 26·9 in 1879.

4. The following tabular statement exhibits the number of stripes inflicted when corporal punishment was awarded in 1884 and 1885.

Province.	Year.	Total number of prisoners punished by whipping.						Percentage of whippings according to the number of stripes to the total number of whippings.				
		From 5 to 10 stripes.	Above 10 to 15 stripes.	Above 15 to 20 stripes.	Above 20 to 25 stripes.	Above 25 to 30 stripes.	Total.	From 5 to 10 stripes.	Above 10 to 15 stripes.	Above 15 to 20 stripes.	Above 20 to 25 stripes.	Above 25 to 30 stripes.

* Excluding 13 prisoners caned on the palm of their hands; and two prisoners in Subsidiary Jails, of whom the number of stripes is not shown.

† Six of these received four cuts each.

‡ The total number is seven; but as the classification of the stripes is not shown in the report, this figure has been excluded from the grand total.

§ Exclusive of the total for Coorg, the omission of which is explained in foot-note (‡).

Thirteen convicts who were unfit to be flogged were in 1884 caned on the hand like school boys in Bengal. This unauthorised mode of punishment was promptly prohibited by the Inspector General of Jails. In the same year and in the same Province two prisoners were flogged in subsidiary jails contrary to the standing orders.

It has been frequently impressed on Local Governments and Administrations that the punishment of whipping must be reserved for serious offences, and that whenever the offence committed is so serious as to merit a whipping, the punishment inflicted should be severe enough to act as a real deterrent. The Governor General in Council regrets to have to notice that the oft repeated instructions of the Government of India and Secretary of State have not met proper attention at the hands of local authorities. In 1883, the number of instances in which a punishment of 10 stripes and under was administered amounted to 25·9 per cent. of the whole number of such punishments. In 1884, the percentage was 28·7, and in 1885, 26·2. The percentage of cases in which more than 20 stripes were awarded was 23·4 in 1883, 23·8 in 1884, and 24·6 in 1885. The instructions of the Government of India have been most frequently overlooked in Madras, the North-Western Provinces and Oudh, and Assam. In the reports for these Provinces for 1884 it was stated that special instructions had been prepared to regulate the infliction of corporal punishment in jails. The effect of these instructions in Assam was that the number of whippings of not more than 10 stripes declined in 1885 by almost 50 per cent., and there was in that year a substantial decrease in the North-Western Provinces and Oudh. In Madras, however, though punishments of whipping not exceeding 15 stripes were numerically smaller in 1885 than in 1884, they were proportionately higher and aggregated 84·5 per cent. of the total number of punishments of whipping as compared with 78·3 per cent. in 1884 and 77 per cent. in 1883. The attention of the Governor in Council has been specially drawn to these unsatisfactory results, and the Governor General in Council desires once more to call the attention of all Local Governments and Administrations to the principles that should be followed in inflicting corporal punishment on convicts. As remarked above, Local Governments and Administrations have issued instructions to their subordinates indicating the views of the Government of India on the subject, and the Governor General in Council trusts that in future serious notice will be taken of any instance in which those instructions prove to have been disregarded.

5. In the period of two years the figures for which are now under review death resulted in one instance from the infliction of whipping. This occurred in 1884 in Kheri in Oudh. The parts affected by the flogging festered, and blood-poisoning resulted. The medical officer was present when the punishment was inflicted, and all proper and reasonable precautions were taken. The magisterial inquiry established the fact that death was the result of causes which could not have been foreseen or provided against by the officials concerned.

In Bengal 5 cases appear in the statement for 1884 and 8 in 1885 in which illness followed on the infliction of a whipping. These figures do not include cases in which resort was had to the hospital for the purpose of healing sores caused by a flogging. In the Central Provinces, there were 3 cases in which illness followed a flogging in 1884 and 2 in 1885, and in the latter year there were 3 in the North-Western Provinces and Oudh. In 1884, 29 cases were reported from British Burma. The Governor General in Council regrets to notice that no explanation was given of these figures, and requests that such statistics may be referred to in detail by Local Governments and Administrations in future reports.

Order.—Ordered that this Resolution be communicated to all Local Governments and Administrations for information and guidance.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India*.

(True Extract.)

A. P. MacDONNELL,

Offg. Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

PROPOSAL TO FOUND AN IMPERIAL JUBILEE INSTITUTE.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department, No. 106—13-10 (Exhibitions), dated Calcutta, the 15th February, 1887.

Read the following despatch, with enclosures, from Her Majesty's Secretary of State for India, No. 9 (Statistics and Commerce), dated the 20th January, 1887, relative to the Imperial Institute which it is proposed to found in commemoration of the fiftieth year of Her Majesty's reign.

No. (Stats. & Comce.), dated India Office, London, the 20th January, 1887.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I forward, for the information and consideration of Your Excellency, a copy of a letter from His Royal Highness the Prince of Wales enclosing a copy of a report of the Committee appointed by His Royal Highness, under the presidency of Lord Herschell, to frame a scheme for the commemoration of the Jubilee year of Her Majesty's reign.

2. You will see that the Committee had adopted the suggestion that the Jubilee shall be commemorated by an institution permanently illustrating the resources and progress of the United Kingdom, the Colonies, and India; and they advise that a body thoroughly representative of the great commercial and industrial interests of the Empire shall be created by Royal Charter for the government of the institution, and that the Institute building shall be of a character worthily to commemorate the occasion and to afford suitable accommodation for libraries, museums, economical collections, scientific or trade conferences, and for other cognate purposes.

3. Your Excellency will observe that the scheme has the hearty support of His Royal Highness the Prince of Wales, and has been accepted by the most influential bodies in this country, the great corporations, the principal Chambers of Commerce, and the agents for the different Colonies. Moreover, it is understood that the scheme is very acceptable to Her Majesty the Queen personally.

4. It may, therefore, be concluded that the project recommended by Lord Herschell's Committee has been finally decided on.

5. His Royal Highness expresses his hope that the scheme will receive the active and cordial support of Your Excellency's Government, and that, as he greatly desires to enlist the sympathy and support of the princes and people of India for it, you will set on foot suitable measures for promoting that result.

6. I have much pleasure in expressing my entire concurrence in these views; and I doubt not that your Government will do all in its power to ensure the success of the scheme, and to enlist the sympathy and co-operation of all classes of the community.

7. With this object, it seems desirable that Your Excellency should form a central Committee, and should instruct the Local Government and Political Agents to form local Committees and to take such steps as may be in their power to diffuse information on the subject.

"Commemoration of Jubilee. Imperial Institute. I send despatch enclosing letter from Prince of Wales, with report of Committee, adopting suggestion of permanent representation of resources of Empire, managed by body created by charter, with building for libraries, museums, trade conferences, &c. Scheme accepted by Chambers of Commerce and Colonial Agents, and acceptable to the Queen personally. May be held to be finally decided on. His Royal Highness hopes it will receive cordial support of Your Excellency's Government and Princes of India. I concur, and suggest formation of central and local Committees to make objects known to all classes of community."

8. In order to put Your Excellency in possession of the substance of this despatch, I have caused the telegram marginally transcribed to be sent to you.

Dated Sandringham, Norfolk, the 1st January 1887.

From—His Royal Highness the Prince of Wales,

To—Her Majesty's Secretary of State for India.

In asking the attention of Your Lordship to the accompanying Report of the Committee entrusted by me with the task of preparing a scheme for the Imperial Institute proposed to be founded in commemoration of the fiftieth year of Her Majesty's reign, I cherish the hope that the suggestions which it embodies, and which have my entire approval, may, especially so far as they directly relate to the Indian Empire, receive the cordial and active support of Your Lordship in Council.

I look forward with much interest and anxiety to the receipt of intelligence that the Government of India and the Local Governments are taking steps to promote the establishment and development of an institution which promises to strengthen the ties between India, the United Kingdom, and the Colonies; and, as I greatly desire to enlist the sympathies and support of the princes and the people of India in favor of this national tribute to Her Majesty, it would afford me great satisfaction to learn that suitable measures for promoting that result have suggested themselves to, and have been set on foot by, the Secretary of State for India in Council.

REPORT OF THE COMMITTEE.

The Committee appointed by Your Royal Highness to frame a scheme for an Imperial Institute intended to commemorate the fiftieth year of Her Majesty's reign beg leave to submit to Your Royal Highness the following report.

2. They do not fail to remember that the scheme which Your Royal Highness indicated in your letter of the 13th of September last to the Lord Mayor of London had its origin in the remarkable interest excited by the recent Exhibition, by which not only the material products, resources, and manufactures, but the loyal feeling of the great Colonies and Possessions of Her Majesty's Empire were illustrated in a most signal manner.

3. The object therefore which naturally suggested itself first to the Committee was the development, with some necessary modifications, of Your Royal Highness's idea of creating a permanent representation of the resources and progress of the Colonies and India.

4. On pursuing, however, the consideration of the subject, the Committee became persuaded that a Memorial really worthy of the Jubilee Year of Her Majesty's Reign could not be confined in its objects to any one part or parts of Her Majesty's Empire, and that it must in some form and degree also comprehend a representation of the United Kingdom.

5. Their desire therefore, in the following outline of the scheme which they recommend, is to combine in a harmonious form, and with a view to some practical and useful purpose, a representation of the Colonies and India on the one hand, and of the United Kingdom on the other.

6. They submit that this object will be best indicated by giving to the Memorial the title of THE IMPERIAL INSTITUTE OF THE UNITED KINGDOM, THE COLONIES AND INDIA.

7. They think that the Institute should find its home in buildings of such a character as worthily to commemorate the Jubilee Year of the Queen's Reign, and to afford accommodation suitable for an institution combining the important objects which they now proceed to describe.

8. It is obvious that several departments of the Institute such as the Hall, Conference Rooms, &c., which will be found described under the Colonial and Indian Section and the United Kingdom Section respectively will be common both to the Colonies and India and to the United Kingdom; but as others have special relation to a particular portion of Her Majesty's Dominions, it will be found convenient to make the following division:

A.—COLONIAL AND INDIAN SECTION.

9. The object of the Colonial and Indian Section will be to illustrate the great commercial and industrial resources of the Colonies and India, and to spread a knowledge of their progress and social condition.

10. To this end provision should be made for—

(1) The display in an adequate manner of the best natural and manufactured products of the Colonies and India, and in connection with this the circulation of typical collections throughout the United Kingdom.

(2) A Hall for the discussion of Colonial and Indian subjects, and for receptions connected with the Colonies and India.

(3) The formation of Colonial and Indian libraries, and establishing in connection therewith reading, news, and intelligence rooms.

(4) The incorporation in some form into the proposed Institute of the Royal Colonial Institute and Royal Asiatic Society, if, as is hoped, it be possible to bring about such a union.

(5) The collection and diffusion of the fullest information in regard to the industrial and material condition of the Colonies, so as to enable intending emigrants to acquire all requisite knowledge. Such information might be advantageously supplemented by simple and practical instruction. An emigration office of this character should be in correspondence with the

provincial towns, either through the free libraries or by other means, so that information may be readily accessible to the people. These objects would be greatly facilitated if, as may be hoped, the Government should consent to the transfer to the buildings of the Institute of the recently formed Emigration Department, which would, by a close connection with the Institute, largely increase its usefulness.

11. Facilities might be afforded for the exhibition of works of Colonial and Indian Art.

12. It is also considered desirable that means should be provided, not for a general exhibition, but for occasional special exhibitions of Colonial and Indian produce and manufactures. And one time a particular Colony or portion of the Empire may desire to show its progress; at another time a general comparison of particular industries may be useful. Whilst the permanent galleries would exhibit the usual commercial or industrial products of the several Colonies and India, the occasional exhibitions would stimulate and enlist the sympathies of Colonial and Indian producers, and keep up an active co-operation with the industrial classes of this country.

B.—United Kingdom Section.

13. The leading objects of this Section will be to exhibit the development during Her Majesty's reign and the present condition of the natural and manufactured products of the United Kingdom, and to afford such stimulus and knowledge as will lead to still further development, and thus increase the industrial prosperity of the country.

14. We submit that these objects may be carried out by making provision for the following purposes:—

(1) Comprehensive collections of the natural products of the United Kingdom and of such products of other nations as are employed in its industries, with full scientific, practical, and commercial information relating thereto.

(2) Illustrations of manufactured products, typical of their development and present condition, of trades and handicrafts and their progress during the Queen's reign, including illustrations of foreign work, when necessary, for comparison; together with models illustrating naval architecture, engineering, mining, and architectural works.

(3) A library for industrial, commercial, and economic study which should contain standard works and reports on all subjects of trade and commerce. It will be desirable also to include a library of inventions of the Empire, and as far as possible of the United States and other countries.

(4) Reading and conference rooms supplied with English, Colonial and Foreign commercial and technical periodicals, and a fully-equipped map room for geographical and geological reference. The conference rooms would be of value for meetings of Chambers of Commerce and other bodies of a kindred nature.

(5) The promotion in affiliation with the Imperial Institute of commercial museums in the city of London and in the commercial centres of the provinces. To these the Institute would contribute specimens, samples, and exhibits of the commercial products likely to be specially valuable in particular localities. There should also be an organisation to connect the Imperial Institute with the provincial centres by lectures, conferences, the circulation of specimens, and other means.

It is hoped that the Institute may lead to the organisation of High Schools of Commerce, such as are now established in the chief commercial towns of most Continental countries, but which have as yet unfortunately no existence in the United Kingdom.

(6) The building will also advantageously afford accommodation for (*a*) comparing and examining samples by the resources of modern science, and (*b*) the examination of artisans under the various schemes already existing for the promotion of technical education.

15. Space should also be provided for occasional exhibitions of separate industries, or of the special industries, carried on in great provincial centres, for example, there might at one time be an exhibition of iron manufactures, at another of pottery, at another of textile fabrics, &c., which would tend to stimulate improvement in the different departments of industrial life. This object might be assisted by separate exhibitions of the handiwork of artisans.

16. The Committee having detailed the general nature of their suggestions under these heads, desire to add that they do not anticipate the exhibits in the collections remaining unchanged. They contemplate that as improvements are made from time to time the later and better results would displace those out of date.

17. They have had to consider how the space should be distributed between the United Kingdom on the one hand and the Colonies and India on the other, and they

recommend that whatever portion of the buildings is not required for purposes manifestly common to both should be allotted to the two Sections fairly in equal parts.

C.—Government of Institute.

18. The Committee recommend that a new body entirely independent of any existing organisation should be created for the government of the Institute. This body should be thoroughly representative of the great commercial and industrial interests of the Empire. The Colonies and India should have a fair share in the government of the Institute, and each Colony should have special charge of its own particular department, subject, of course, to the general management of the entire institution.

19. The method of carrying this out would be prescribed by the Charter after full consideration by Her Majesty in Council.

D.—Site.

20. The Committee being fully conscious of the advantage of a central position for the Institute, have considered the various possible sites, and have, as far as has been within their power, obtained estimates of their cost.

21. To carry out the several objects which the Committee have indicated, a large space is necessary. The Committee have been unable to find any such suitable site in the central parts of London, except at a cost which, looking at the probable amount of subscription would, after the purchase of the ground, leave a sum wholly inadequate for the erection and maintenance of the buildings, and for carrying out the objects of the Institute.

22 The site of about five acres recently secured for the New Admiralty and War Offices is valued at £820,000 or rather over £160,000 per acre; that now vacant in Charles Street, opposite the India Office, is less than an acre and would cost at least £125,000; probably another acre might be secured by private contract, so that the value of a limited site in this position would not be less than £250,000. It has been suggested that a single acre not far from Charing Cross might be obtained for £224,000. Two and a half acres on the Thames Embankment have been offered for £400,000; and it is stated that six acres might be procured from Christ's Hospital at £600,000. Another good central position has been suggested, consisting of two and a half acres, which has been valued at £668,000.

23. It is of course probable that these sites might be obtained at somewhat less than the prices asked, but allowing for this, it is obvious that the purchase of any adequate area would involve the expenditure of a quarter to half a million.

24. The Committee have therefore been forced to abandon the hope of obtaining a central site within the limits allowed by any probable subscription.

25. The attention of the Committee was then drawn to the property at South Kensington belonging to the Commissioners for the Exhibition of 1851. This property was bought out of the profits of that Exhibition, with the express object of offering sites for any large public buildings which might be required for the promotion of Science and Art.

26. Under these circumstances, the Committee submit to Your Royal Highness that the Imperial Institute may well establish a claim for the grant of a site of sufficient magnitude on property bought and reserved for public institutions of this character.

27. Though sensible of the objections that may be urged against the situation at South Kensington, the Committee think that the advantage must be obvious of obtaining a sufficient site virtually free of cost, so that the whole of the subscriptions may be devoted to providing a building for and establishing and maintaining the Institute.

28. The Committee, whilst guided in the recommendation of a site by the considerations they have indicated, think it right to add that there are some incidental advantages connected with that at South Kensington.

29. In that locality are combined the City and Guilds Technical College, the Royal College of Music, and the Government Museums and Schools of Science and Art, which ought to be in immediate proximity to an Imperial Institute of the character which we have described.

30. The technical character of the collections and exhibitions of the Imperial Institute has a natural connection with the collections of Science and Art in the Government Museums.

General Observations.

31. An Imperial Institute for the United Kingdom, the Colonies and India would fail in its chief object if it did not constantly keep in view that it ought to be a centre for diffusing and extending knowledge in relation to the industrial resources and commerce of the Empire.

32. The necessity for technical education is now fully appreciated, because the competition of industry has become in a great measure a competition of trained intelligence. The Committee, however, do not recommend that the Imperial Institute should aspire to be a College for Technical Education. Many of the large towns in Great Britain have

recently established Colleges or Schools of Science and Art. The Imperial Institute might serve to promote technical education in these, and to unite them with Colleges of larger resources which have been founded or formed branches for the purpose in the metropolis. It is too much to hope that an active co-operation of this character between the provincial centres and London could be at once undertaken by the Imperial Institute. But the Committee bear in mind that, in their last Report, the Commissioners of 1851 have indicated an intention to assist in carrying out such a scheme. If the Commissioners would contribute three or four thousand pounds annually, it would be possible to establish scholarships which might enable promising candidates of the working classes to attend the local institutions, and even, when it was desired, to complete their technical education in colleges of the metropolis. In addition to this aid, the Imperial Institute might be able in other ways to promote the foundation of scholarships both in connection with the Colonies and provincial centres, in the hope of still further extending these benefits to the working classes.

33. In conclusion, the Committee submit that an Imperial Institute such as they have sketched in broad outline would form a fitting memorial of the coming year, when Her Majesty the Sovereign of this Empire will celebrate the Jubilee of Her happy reign. It would be an emblem of the Unity of the Empire, embracing as it does all parts of the Queen's Dominions, and tending to promote that closer union between them which has become more and more desired. It would exhibit the vast area, the varied resources, and the marvellous growth, during Her Majesty's reign of the British Empire. It would unite in a single representative act the whole of her people; and since both the purpose and the effect of the Institute will be to advance the industrial and commercial resources of every part of the Empire, the Committee entertain a confident hope that Her Majesty's subjects, without distinction of class or race, will rejoice to take part in offering this tribute of love and loyalty.

FORT WILLIAM,
The 15th February, 1887.

R. GARDINER, *Captain, R.E.*,
Offg. Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 16th FEBRUARY 1887.

GENERAL REMARKS.—Except in five districts of Madras where slight showers occurred, the week under report has been rainless.

The early *rabi* harvest continues in Bombay and Bengal and has also commenced in Hyderabad. In other provinces the prospects of the standing crops are very favourable, though injury from the prevalence of frost and blight is still reported in parts of Bombay, the North-Western Provinces and Oudh, the Central Provinces, Central India and Rajputana. In the Punjab the want of rain is felt in most districts.

In Madras the standing crops have been affected by disease in three districts, and rain is generally needed. In Mysore and Coorg agricultural prospects are satisfactory.

The transplanting of the spring rice has been completed in Bengal, and ploughing for the early rice crop has commenced. In Burma the rice harvest is over and threshing is in progress.

The cutting and pressing of sugarcane continues in Bengal, the Central Provinces and Assam In Bengal and Assam mustard is being gathered.

Poppy continues to thrive in the North-Western Provinces and Oudh, but the plant is late in Bengal and has suffered from the ravages of caterpillars in the South Ganges districts. In Central India and Rajputana the plant has been affected by frost.

The public health continues generally satisfactory.

Prices are still rising in the Punjab and in some States in the Rajputana Agency. In Coorg they are falling and elsewhere are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 15th)—		
Bellary	.....	Standing crops generally fair, but in parts cotton and wheat afflicted by disease, and white *cholum* withered. Harvest, sugarcane and dry crops yield below average. Fever in two taluks; cattle-disease decreasing in one.
Kurnool	.....	Standing crops good. Harvest, white *cholum* outturn below average. Smallpox in five, fever and cattle-disease decreasing in three taluks.
Ganjam	.....	Smallpox slight in three and fever in two divisions; cholera increasing slightly.
Kistna	.....	Standing crops generally good, but dry crops in parts affected by blight. Harvest, paddy, almost completed. River 1·75 feet over anicut. Fever in parts. Cholera slight in two, and cattle disease in two talukas.
Chingleput (Madras)	.....	Standing crops generally good, but in parts of four taluks indifferent owing to want of rain. Harvest, paddy, outturn middling. Fever in one, smallpox and cattle-disease increasing in three talukas
Coimbatore	·27	Standing crops generally good, but in parts in want of rain. Paddy affected by disease in one taluk. Harvest, wet and dry grains, outturn irrigated crops generally above average, rest poor. Fever and smallpox in two taluks. Cattle-disease in one.
Tanjore	·29	Standing crops generally good, but in parts indifferent for want of rain. Harvest, wet and dry crops, outturn up to average. Cattle-disease decreasing in two taluks.
Madura	·44	Standing crops withering in parts from want of rain. Outturn, where harvested, unsatisfactory.
Malabar	·93	Harvest, second crop paddy completed, outturn average. Third crop cultivation commenced. Smallpox slight in nine, fever in two and cattle-disease in three taluks.
Travancore	·29	Harvest of second crop paddy continuing. Smallpox and fever prevalent in parts.
		General Remarks.—General prospects tolerable.
Bombay—(Feb. 15th)—		
Hyderabad	*Nil*	*Kharif* harvesting still continues. *Rabi* cultivation injured by frost in 8 talukas. Fever in four and cattle-disease in one taluka. River at Kotri on 14th 3 feet 7 inches against 5 feet 3 inches on same date last year. Prices of grain steady. Weather cloudy.
Ahmedabad	*Nil*	Weather cold and severe. *Rabi* crops slightly injured by frost in Dholka and Dhandhuka talukas. Public health good. Wheat 29 and *bajri* 31 pounds per rupee.
Baroda	.....	Public health good. Cattle-disease in Kadi division. Crops in fair condition. *Bajri* 33, wheat 19, and rice 24 pounds per rupee.
Surat	*Nil*	Cotton and pulse injured by frost. Fever in Mandwi and Bardoli talukas. *Jowari* 41 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	Excessive cold has damaged crops. Ague in three and cattle-disease in one taluka on 10th. Water frozen. Public health good. Wheat 25⅛, *bajri* 36¹⁸⁄₄₀, and rice 20¹³⁄₁₀ pounds per rupee.

M

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) .	*Nil*	Abnormal temperature 6° cool on 9th, 3° cool from 10th to 12th, 1° cool on 13th, and 1° warm on 14th. Vapour in air largely defective on 9th and 10th, and slighly in excess of normal from 11th to 14th. Wind normal.
Poona . . .	. . . .	*Rabi* crops slightly injured by blight in places in Khed, Purandhur, Bhimthadi, Haweli, and Mawal talukas. In the rest they are doing well. Reaping of *rabi* in progress. Public health generally, good. Cattle-disease in Haweli and Sudapur talukas. *Bajri* 45 and *jowari* 59 pounds in two districts, and *bajri* and *jowari* 48 pounds per rupee in Poona City.
Ahmednagar . .	*Nil*	Reaping of *jowari* commenced; wheat, grain, and linseed injured Slight cattle-disease in Karjat. *Bajri* 55 and *jowari* 68 pounds per rupee.
Sholapur . . .	*Nil*	Cotton, linseed and *Kardi* crops blighted. Reaping of *rabi* crops in progress. Cattle-disease in Madha taluka. Public health good. *Jowari* 68 1/4 and *bajri* 55 pounds per rupee.
Dharwar . . .	*Nil*	Harvesting of rice and early *jowari* completed, that of wheat and gram in progress. Exotic cotton blighted in seven talukas. Scarcity of fodder in Nawalgand. Public health generally good. Rice 25 1/2 and *jowari* 59 1/2 pounds per rupee.
Kanara . . .	*Nil*	Second crop doing well. Slight cattle-disease in seven and fever in four talukas. Common rice, in Karwar and district, average 14 seers per rupee.
Rajkot . . .	*Nil*	Weather cold. Wheat blighted in some places. Cotton damaged in parts of Hallar. Prevailing diseases—fever and measles. Wheat 23, *rabi* 26 and *jowari* 35 pounds per rupee.
		General Remarks.—Reaping operations going on in six districts. Standing crops damaged by frost in parts of Gujarat, and by blight in parts of the Deccan and Dharwar. Fever and cattle-disease in parts of eight and ten districts respectively, and small-pox in parts of one district.
Bengal—(Feb. 15th)—		
Chittagong . .	*Nil*	Winter crops doing well. Prices stationary. Some scattered cases of cholera and cattle-pox. Public health generally good.
Dacca . . .	*Nil*	Weather cold and fine. Prospects good. Pulses and mustard being gathered. Lands being ploughed for early rice and jute. Cholera on the decline. Public health generally good.
24-Pergunnahs . .	*Nil*	Cold-weather crops promise well. Sugarcane is being cut. Public health good, though a few cases of cholera still reported.
Khoolna . . .	*Nil*	Weather warm for the season, but last few days cold. Harvesting of late rice almost completed; outturn satisfactory. Public health good.
Moorshedabad . .	*Nil*	Weather very cold and seasonable. Winter crops doing well and promising. Outturn of *aman* in Lalbagh excellent, Public health good.
Pubna . . .	*Nil*	Weather cool and pleasant. Winter crops doing well. Public health good.
Dinagepore . .	*Nil*	Weather cool. Prospects of *rabi* crops good. Public health good. Cattle-disease reported from Hemtabad and Pirgunge.
Rungpore . . .	*Nil*	Weather very cold. Land being ploughed for *aus* and jute. Pulses and other winter crops doing well. Public health much improved.
Midnapore . . .	*Nil*	Weather cold for time of year. Crops on ground promise well. Public health good, but some sporadic cholera in Tumlook and Contai sub-divisions.
Burdwan . . .	*Nil*	Weather cold. Prospects of winter crops good. Public health good.
Bhagulpore . .	*Nil*	Weather unusually cold with strong west wind. Prospects of *rabi* crops generally favourable. Wheat affected with blight in places. Public health good.
Monghyr	. . . .	Prospects of poppy good.
Purneah . . .	*Nil*	Weather very cold. *Rabi* crops doing well.
Durbhanga . .	*Nil*	Prospects of *rabi* favourable. Wheat and barley in ear. Mustard being gathered. Poppy doing well. Prices rising. Public health generally good.
Mozufferpore . .	. . . . .	Poppy doing well; plants now well advanced, and in several fields in flower and bud.
Sarun	. . . . .	Poppy prospects excellent.
Chumparun . .	*Nil*	Prospects of *rabi* favourable. Poppy plants flowering. Indigo sowing commenced. Prices stationary. Public health fair.
Patna . . .	*Nil*	Weather cool and clear. Prospects of *rabi* fair. Poppy much damaged by caterpillars. *Cheena* being sown. Public health generally good.
Gya	*Nil*	Weather cold and clear. *Rabi* generally very good. Wheat not so good as the rest. Poppy late and somewhat damaged by grubs. Public health good.
Shahabad . . .	. . . . .	Poppy in flower, but the crop is backward and not looking vigorous.
Hazareebagh . .	*Nil*	Weather cold and seasonable. *Rabi* doing very well. About two annas of poppy damaged by caterpillars. A few cases of small-pox in thana Tendwa. Cattle-disease on the increase and fever in thana Huntergunge.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack . . .	*Nil*	Weather seasonable. *Dalua* rice being transplanted and growing well. Prospects of wheat and tobacco good. Cholera in places in the interior; public health otherwise good.
		General Remarks.—No rain. Weather cold and clear. *Rabi* crops generally promising. Mustard and pulses are being gathered with good outturn. Sugarcane is being cut. Poppy doing well in North Ganges districts, but is late and has suffered from caterpillars in South Ganges districts. *Boro* rice is planted out. Ploughing for *aus* rice and jute is in progress. Public health is generally good.
N.-W. Provinces and Oudh—(Feb. 15th)—		
Benares (Feb. 14th)		No perceptible change in weather. *Rabi* prospects generally good, but some crops have slightly suffered from frost and blight. Prospects of opium crop excellent. Supplies ample. Prices very slightly fluctuating. Health of men and condition of cattle good.
Gorakhpore („ „)		Weather bright and clear. *Rabi* looking well. Rape seed being reaped. Prices stationary. Health fair.
Fyzabad („ 15th)		Weather seasonable. Westerly wind. Slight injury to crops from frost. Prospects of *rabi* generally good. Prices continue high owing to export. Health good.
Lucknow („ 14th)		Serious damage done to gram, *arhar*, peas and tobacco crops by frost. Supplies ample. Prices varying. Health good. No cattle-disease.
Pertabgarh („ „)		*Arhar*, peas and gram are said to be somewhat injured by blight. Poppy is in flower and promises well. Health of people and cattle good.
Rai Barelli („ „)		Weather cold and clear. Wind westerly. Injury to *rabi* crops from frost and blight, otherwise prospects are favourable. Markets well supplied. Prices slightly rising. General health of people and condition of cattle good.
Allahabad („ 15th)	*Nil*	Weather slightly hotter of late; in the early part of the week frost did some injury, otherwise crops flourishing. Markets full. Prices show an upward tendency. Health good.
Cawnpore („ 14th)		Weather seasonable. *Rabi* in good condition. Slight injury by frost is reported in four tahsils. Poppy coming into flower in many villages. Prices steady.
Farakhabad („ „)	*Nil*	Slight injury by frost is reported from five tahsils to *arhar* and peas, otherwise *rabi* prospects continue to be favourable. Prices stationary. Health good.
Sitapur („ „)		Weather cold. Gram, peas and *sarson* have suffered from the frost which fell on the 3rd. Poppy crops continue satisfactory. Prices stationary. Health good.
Bareilly („ „)		Crops doing well. Markets steady. Health of men and cattle good.
Banda („ „)	*Nil*	*Alsi, arhar* and gram slightly injurrd by frost. Rust has also appeared in parts. Prices slightly lower. Public health good. Cattle disease in two villages.
Kumaon („ „)		Weather fair. *Rabi* crops making progress, but require sunshine. Prices stationary. General health fair. Cattle-disease continues in part.
Agra („ „)	*Nil*	Many crops have been injured by frost and blight. Prices steady. Health good.
Jhansi („ „)		Weather clear and seasonable. Crops generally good. Prices falling. Condition of people and cattle good.
Ballia („ „)		Weather clear. The crops are generally doing well. Markets well supplied, Public health good.
Meerut („ „)	*Nil*	Very severe frost on 9th; magnificent crop of *arhar* totally destroyed. Some injury to wheat, mustard, peas and safflower. Prices steady. Health good.
		General Remarks.—Weather clear. Injury has been caused to crops in several districts from frost and blight. *Rabi* prospects continue however to be favourable. Markets are well supplied, and prices generally steady. Public health good.
Punjab—(Feb. 16th)—		
(Report for week ending 13th Feb. 1887)—		
Delhi . . .	*Nil*	Health good. Prices rising. *Rabi* prospects good.
Hissar . . .	*Nil*	Rain much needed. Health good. Prices rising.
Umballa . . .	*Nil*	Health good. Prices rising. *Rabi* crops flourishing.
Jullundur . . .	*Nil*	Rain much wanted. Health good. Prices rising. *Rabi* prospects average.
Amritsar . . .	*Nil*	Rain wanted. Health good. Prices rising.
Sialkot . . .	*Nil*	Rain wanted. Health good. Prices rising.
Ferozepore . .	*Nil*	Rain much wanted. Health good. Prices rising.
Lahore . . .	*Nil*	Rain wanted. Health good. Prices rising.
Rawalpindi . . .	*Nil*	Health good. Prices rising. *Rabi* prospects average.
Multan . . .	*Nil*	Rain wanted. Health good. Prices stationary.
Shahpur . . .	*Nil*	Rain wanted. Health good. Prices high. *Rabi* crops suffering from want of rain.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	*Nil*	Health fair. Prices rising.
Peshawar	*Nil*	Rain much wanted. Health good. Prices fluctuating.
		General Remarks.—Rain is wanted in all districts, except Delhi, Umballa, Rawalpindi, and Dera Ismail Khan. General health good. Prices rising, except in Mooltan, where they are stationary. In Shahpur, where they are high, and in Peshawar, where they are fluctuating. In Shahpur crops are suffering from want of rain. Elsewhere prospects are good.
Central Provinces—(Feb. 16th)		
Nagpore	*Nil*	*Rabi* crops being gathered. Fever and cattle-disease prevalent. Prices steady.
Jubbulpore	*Nil*	*Masur*, gram and *arhar* slightly damaged by frost; linseed seriously by blight. Other crops fair. Health fair. Prices steady.
Saugor (Feb. 15th)	*Nil*	Weather clear and cool. Prospects good. Prices steady.
Seoni	*Nil*	Linseed and wheat slightly damaged by rust, pulses from frostt Health good. Prices slightly risen.
Hoshangabad	*Nil*	*Rabi* crop injured by frost. Fever prevalent. Prices stationary.
Khandwa	*Nil*	Wheat injured in places by cold. Health good. Prices steady.
Raipur	*Nil*	Linseed being cut. Prospects good. Cattle-disease and smallpox in places. Prices slightly higher.
Bilaspur	*Nil*	Prospects favourable. Pulses being harvested. Slight cattle-disease. Prices stationary.
Sambalpur		Sugarcane-pressing progressing. Health good. Prices rising.
		General Remarks.—Weather clear but getting warm. Wheat and linseed have been slightly damaged in Northern Districts by frost and blight. Fever and cattle-disease in places. Prices rather higher in some districts.
Burma—(Feb. 16th)		
Akyab (Feb. 12th)		Very few cases of cholera in town and district, otherwise public health good. Cattle healthy. Reaping completed.
Bassein		Public health and health of cattle good.
Rangoon		Public health and health of cattle good.
Amherst (Moulmein)		Public health and health of cattle good.
Tavoy		Public health and health of cattle good.
Pegu		Two cases of cholera, otherwise public health good. Cattle healthy. Threshing almost finished.
Henzada		Public health and health of cattle good.
Prome		Public health and health of cattle good.
Toungoo		Public health and health of cattle good.
Thayetmyo		Public health and health of cattle good.
Shwebo	*Nil* (Total to date ·50)	Health good. Food-supply sufficient. Prices normal.
Yamethen	*Nil* (Total to date ·89).	Public health good. Season so far favourable. *Mayinwaddy* cultivation commenced.
		General Remarks.—Except for a few cases of cholera in Akyab and Pegu districts, public health in Lower Burma good. Health of cattle good. Reports received from Shwebo and Yamethen districts in Upper Burma. State of public health good. Food-supply sufficient.
Assam—(Feb. 16th)—		
Gauhati	*Nil*	Weather seasonable. Public health good. Gathering of mustard finished. Crushing of sugarcane and ploughing of land for *ahu* in progress. Prospects of crops good.
Sylhet	*Nil*	State and prospects of the crops good. Cattle-disease prevalent in Ratabari outpost.
Cachar	*Nil*	Reaping of mustard crop being finished. Cultivation for *dumai* crops commenced in some parts of the district. Common rice 14 seers per rupee. Health good.
Mysore and Coorg—		
Bangalore		Standing crops in good condition. Prospects of season continue favourable. Public health generally good. No material change in prices.
Mercara (Feb. 9th)		Prospects good. Prices slightly fallen.
Do (,, 15th)		Prospects good. Prices continue to fall.
Berar and Hyderabad—(Feb. 16th)		
Hyderabad		*Tabi* crops prospering. Harvesting of gram, white *juar* and wheat crops commenced. General health fair. Fever disappeared. Prices—wheat 14½, coarse rice 12, white *juar* 18, yellow *juar* 21½ and *tur* 15 seers per current sicca rupee.
Amraoti		Weather clear. *Rabi* crops in good condition. Wheat 20 and *jowari* 28 seers per rupee.
Akola		Weather clear and cool. *Rabi* crops doing well.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central India States—(Feb. 16th)		
Indore		Easterly breezes. Weather warm. Health good.
Morar (Gwalior)		*Arhar* fields much damaged by frost. Prospects indifferent. Weather variable. Health below average.
Sutna		Health and prospects good.
Neemuch		Crops reported damaged by cold. Prices risen suddenly. High winds. Health good.
Goona		Weather very cold. Health and prospects good.
Agar		Opium crops somewhat injured by frost. Health good.
Nowgong		Weather cold. *Rabi* prospects fair. Health good. Prices steady.
Rajputana—		
Abu (Feb. 16th)		Weather getting warm. Health good.
Sirohi (,, 14th)		Smaller tanks dry. Wells, health and crop prospects good. Weather cool and fine.
Marwar (,, 13th)		Weather less cold and crops good. In some places existing crops damaged by blight. Prices stationary.
Meywar (,, 14th)		Crops in most places damaged by frost. Health good. Prices of wheat rising. Weather fair and daily growing warmer.
Harowti (,, 12th)		Weather cold. Opium and gram injured by recent frost. Health good.
Jhallawar (,, 14th)		Weather less cold. Further general reports of damage by frost have been received.
Ajmere (,, ,,)		Weather clear and warm. Crops slightly injured by frost. Health generally good. Cattle-disease in some parts of Merwara. Prices of food-grains rising. Wheat 23¼, *barley* 45 and gram 48¼ pounds per rupee.
Jeypore (,, 15th)		Crop prospects unchanged.
Dholpore (,, ,,)		Tanks and wells low. Crops injured by frost. Health good. Prices rising. Weather getting warm.
Bhurtpore (,, ,,)		Prospects and health good. Prices steady. Weather frosty.
Ulwar (,, ,,)		Health good. Crops slightly injured by frost.
Kotah (,, 12th)		General health and crop prospects good, but gram and opium crops damaged by frost. Prices still rising, especially of wheat.
Kherwara (,, 14th)		Prospects of gram good and fair. Health good. Chest affections abating. Weather fine and cool.
Bikaneer (,, 12th)	Slight rain in Suratgarh.	Prices stationary. Weather cold. Health good.
Nepal—(Feb. 10th)—		
Katmandu (,, 11th)	*Nil*	Cold, frosty weather. Prospects fair. Prices high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT

Weather Review of India of the Week ending 12th February 1887.

The weather over India during the past week, February 6th—12th, has been remarkable for its generally quiescent condition and secondly for the wave of unusually low temperature which passed over the country during the middle of the period.

The shallow barometric depression, which, at the close of the previous week, lay over Chutia Nagpur, still existed on the 6th. It affected the winds, but otherwise its influence on the weather was inappreciable, the sky being generally clear. From this position the depression apparently travelled slowly to East or East-North-East and disappeared over Eastern and Northern Bengal. On its disappearance, the high pressure already existing in the North-West extended to all parts of Northern India, causing a rapid rise of the barometer in Bengal. From the 8th to the 11th pressure increased steadily throughout India, and on the latter day, the barometer at 10 A.M. stood above 30·25 in. over a broad band extending from the Punjab across Rajputana and to the south of the Ganges as far as Western and Northern Bengal. On Saturday pressure was giving way again except in the South, but continued everywhere much above the normal of the month. In the Peninsula the changes were similar in kind, though less pronounced, but as the subjoined table shows, the mean excess in some parts of the Peninsula equalled, if it did not exceed, that in parts of Northern India.

During this period of exceptionally high pressure, the winds of Northern and Central India, were steadily anticyclonic, *viz.*, North-East and East-North-East in the Central Provinces, Central India, the Deccan, the Berars and the Konkan; and North-West down the Gangetic plain and in the sub-montane districts of Northern India. Hence probably the low temperatures which have prevailed during the week. The appended table of anomalies show how general has been this depression of temperature, only in the extreme south a few isolated stations had weather slightly warmer than the average. The greatest depression was in the region stretching eastward from Sind across Rajputana; Central India and the Central Provinces to Nagpur, it exceeded 7°. In the east of the Punjab, in the North-Western Provinces, Behar, and North Bengal, it was more than 5° below the normal, and in most other districts it amounted to from 2° to 4.° The coldest day of the week, at 10 A.M., was the 8th at all the hill stations, including Murree, Simla, Pachmarhi and Mount Abu; the 9th on the plains of Northern India generally, and the 10th in the Central Provinces and Orissa: on these days the shaded minimum thermometer fell to—

25°·7 at Murree.	31·2 at Lahore.	35·4 at Jubbulpore.
24·9 „ Simla.	32·0 „ Ajmere.	39·1 „ Allahabad.
	47·7 at Calcutta.	

It is noteworthy that exactly 10 years ago, *viz.*, in February 1877, a similar cold wave passed over the country and, as on the present occasion, the coldest weather of the whole season, in Northern and Central India, occurred between the 8th and 11th of February.

The temperatures above quoted are those of well-shaded thermometers. Instruments partially exposed to radiation fell much lower. In Simla, on Jacko, a thermometer in a north verandah fell to 16°, and at Blessington, a thermometer uncorrected and fully exposed, but from previous experience not altogether unreliable, marked 9° or 23° of frost at 9-30 A.M. on the 9th.

The weather on the North-Western Himalaya continued unsettled during the first few days of the week; showers of snow or rain falling at Simla, Chakrata and Roorkee on the 6th, at Simla and Masuri on the 7th, and at Simla on the 8th and 9th. Slight drizzling rain also fell at Chittagong on the morning of the 5th, but with thess exceptions,

no rain was recorded throughout the week at any of the weather-telegraphing stations in Northern, Central or Eastern India or the greater part of the Peninsula. In the extreme south a thunderstorm occurred on the 10th, giving about ½ an inch of rain to Wellington, Combatore, and Madura, and a few drops to Cochin. On the same day a slight shower also fell at Colombo.

The following figures show, for a few representative stations, a comparison of the normal average and the actual rainfall since the 1st November up to the present time (February 12th):—

Stations.	Normal.	Actual.	Diff.
Peshawar	3·31	0·83	—2·48
Murree	4·41	7·06	+2·65
Lahore	1·75	0·56	—1·19
Simla	2·65	7·20	+4·55
Delhi	1·78	2·40	+0·62
Masuri	6·27	7·63	+1·36
Lucknow	1·21	1·04	—0·17
Bareilly	1·82	3·30	+1·48
Meerut	1·94	2·68	+0·74
Allahabad	1·18	4·31	+3·13
Patna	1·01	1·76	+0·75
Darjeeling	1·54	2·43	+0·89

From this it will be seen that except on the plains of the Punjab and in Oudh the rainfall up to the 12th of February has exceeded the normal amount, at some places considerably so.

The following table gives the anomalies of the barometer, temperature, and humidity derived from a comparison of the mean readings of the week with the averages of the month deduced from past years:—

Districts.	Departure of Barometer from mean, February 6th—February 12th.	Departure of Temperature from mean, February 6th—February 12th.	Departure of Humidity from mean, February 6th—February 12th.	Total Rainfall in week, February 6th—February 12th.

FORT WILLIAM,
The 24th February, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 23rd FEBRUARY 1887.

GENERAL REMARKS.—The week under report has been rainless.

No report has been received from Burma.

The *rabi* harvest which continues in Bombay and Bengal has now extended to the Central Provinces, Berar and Hyderabad. The crops being gathered are wheat, gram, pulses and oil-seeds. In other parts of the country the standing crops still promise well, though injury from frost and blight is reported from places in Bombay, the North-Western Provinces and Oudh, the Central Provinces, Rajputana and Central India, and rust has also appeared. In the Punjab the prospects of the *rabi* are up to the average but rain is much needed throughout the Province.

In Madras rain is generally needed for the standing crops, otherwise prospects are favourable. In Mysore and Coorg the outlook is satisfactory.

The spring rice is under transplantation in Bengal, and the land is being ploughed for the early rice there as well as in Assam.

Poppy is in flower in Bengal where the collection of opium has commenced in places and in the North-Western Provinces and Oudh where the crop is in excellent condition. In Rajputana and Central India the prospects of the crop are fair, though in some places it has been injured by frost.

Indigo sowings have begun in Bengal.

The public health continues satisfactory in all Provinces.

Prices are rising in the North-Western Provinces and Oudh, the Punjab, the Central Provinces and in some States in the Rajputana Agency, and are falling in Coorg. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 22nd)—		
Bellary		Standing crops generally fair, but in parts cotton and wheat affected by nisease and white *cholum* withered. Harvest sugar-cane and dry crops, yield below average. Fever in two and cattle-disease increasing in four taluks.
Kurnool		Standing crops good. Harvest white *cholum*, outturn below average. Fever in four, smallpox and cattle-disease decreasing in three taluks.
Ganjam		Smallpox in one and cattle-disease in two taluks. Cholera exists.
Kistna		Standing crops generally good. Harvest paddy and *varagu*, outturn below average. River 1·5 feet over Anicut. Fever in parts. Cholera slightly increasing in three taluks; cattle-disease decreasing in one.
Chingleput (Madras)		Standing crops indifferent in parts of four taluks owing to want of rain. Harvest wet and dry grains, outturn below average. Fever in one, smallpox in two, and cattle-disease decreasing in four taluks. Slight cholera.
Coimbatore		Standing crops generally good but in parts in want of rain; in one taluk paddy affected by disease. Harvest wet and dry grains, outturn irrigated crops generally above average, rest poor. Fever and smallpox in two taluks.
Tanjore		Standing crops generally good, but in parts indifferent for want of rain. Harvest wet and dry crops, outturn up to average.
Madura		Standing crops withering in parts from want of rain, outturn where harvested unsatisfactory. Smallpox and cattle-disease in one taluk.
Malabar		Third crop cultivation commenced in two taluks. Slight small-pox in nine, fever in three and cattle-disease decreasing in two taluks.
Travancore		Harvest of second crop paddy nearly over. Smallpox and fever prevalent in parts.
		General Remarks.—General prospects tolerably good.
Bombay—(Feb. 23rd)—		
Kurrachee	*Nil*	River at Kotri on 21st 3 feet 6 inches against 4 feet 6 inches on same date last year. Fever in ten talukas. Wheat, red rice, and *bajri* in Karachi 24, 30, and 32, and in Tatta 24, 40, and 38 pounds per rupee, respectively.
Hyderabad	*Nil*	*Kharif* harvesting still continues. *Rabi* cultivation injured by frost in eight talukas. Fever in three talukas. River at Kotri on 21st 3 feet 6 inches against 4 feet 8 inches on same date last year. Prices of grain steady.
Ahmedabad	*Nil*	Reaping of *rabi* crops commenced in some talukas. Public health good. Wheat 28 and *bajri* 32 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda	*Nil*	Public health good. Smallpox in the Kathor taluka of the Navsari division. Cotton, sugarcane, wheat, gram, tobacco, and other crops suffered in almost all the talukas from severe cold in Navsari and Kadi divisions. *Bajri* 32, wheat 18, and rice 24 pounds per rupee.
Surat	*Nil*	Standing crops injured by frost. Fever in Bardoli and Mandvi talukas. *Jowari* 40 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	Weather getting warm. Reaping of *kharif* crops completed. *Rabi* crops damaged in places by the late excessive cold. Public health generally good. Wheat 25⅞, *bajri* 36$\frac{20}{40}$, and rice 20$\frac{32}{40}$ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 2° warm on 15th and from 20th to 22nd, 3° warm on 16th and 19th, and 4° warm on 17th and 18th. Vapour in air slightly in excess of normal on all days, except 22d when it was normal. Abnormal wind south-easterly from 15th to 20th, and normal on all other days.
Poona	*Nil*	*Rabi* crops slightly injured by blight in places in Sirur, Purandhar, Bhimthadi, and Haveli talukas. In the rest they are doing well. Reaping of *rabi* in progress. Public health generally good. *Bajri* 44¾ and *jowari* 58¾ pounds in the district, and *bajri* 31⅝ and *jowari* 47⅜ pounds per rupee in Poona City.
Ahmednagar	*Nil*	Reaping of *jowari*, wheat, and gram in progress. Wheat and gram are indifferent, while linseed and *kardi* are almost destroyed. Weather fair. *Bajri* 56 and *jowari* 64 pounds per rupee.
Sholapur	*Nil*	Reaping of *kharif* and *rabi* crops in progress. Public health good. *Jowari* 66¼ and *bajri* 56 pounds per tupee.
Dharwar	*Nil*	Harvesting of wheat and gram in progress. Exotic cotton blighted in seven talukas. Scarcity of fodder in Navalgund. Public health generally good. Rice 25⅛ and *jowari* 59¼ pounds per rupee.
Kanara	*Nil*	Slight fever in three talukas. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot	*Ni*	Weather cold in the morning. Harvesting of wheat and cotton-picking in progress. Measles in some parts of Halar. Wheat 24, *bajri* 24, and *jowari* 33 pounds per rupee.
		General Remarks.—Reaping of late *kharif* and *rabi* crops going on in eleven districts. The condition of standing crops remains unchanged. Scarcity of fodder in one taluka of Dharwar. Fever in parts of ten, cattle-disease in parts of six, and smallpox in parts of four districts.
Bengal—(Feb. 23rd)—		
Chittagong (Feb. 22nd)	*Nil*	Weather seasonable. Winter crops doing well. Prices stationary. Public health generally good.
Dacca	*Nil*	Prospects good. Mustard being gathered. Pressing of sugarcane continues. Planting of *boro* rice going on. Public health generally good.
24-Pergunnahs	*Nil*	Weather seasonable. Prospects of winter crops satisfactory. Sugarcane still being cut. Public health has improved.
Khoolna	*Nil*	Weather cool. *Aman* harvest nearly over; outturn good. Prospects of winter crops good. Transplanting of *boro* rice continues. Public health good.
Moorshedabad	*Nil*	*Aman* still being gathered in some parts. Prospects of *rabi* favourable.
Pubna	*Nil*	Prospects of *rabi* good. Public health generally good.
Dinagepore	*Nil*	Weather fine and warm. State of *rabi* crops good. Cholera reported from Berail outpost. and cattle-disease from Hemtabad.
Rungpore	*Nil*	Weather getting warm. Harvesting of sugarcane and mustard nearly finished. Other winter crops doing well. Land being ploughed for jute and *aus*. Public health good.
Midnapore	*Nil*	Yield of *rabi* crops slightly short. Cultivation of *boro* rice progressing. Public health normal.
Burdwan	*Nil*	Harvesting of *rabi* crops continues favourably; outturn good. Public health fair.
Bhagulpore	*Nil*	Prospects generally satisfactory, but prevalence of blight reported from places. Sugarcane being pressed. Public health good.
Monghyr		Poppy prospects continue fair. Collection of opium commenced in a few places.
Purneah	*Nil*	Prospects of crops good. Mustard being reaped. Rivers low. Health of people and cattle fair.
Durbhanga	*Nil*	*Rabi* prospects continue favourable. Wheat and barley coming into maturity. Mustard and peas being gathered. Poppy in flower. Prices slightly rising. Public health generally good.
Mozufferpore		Poppy doing well; the crop is well advanced and promises a good outturn.
Sarun		Prospects of poppy good. Weather favourable.
Chumparun	*Nil*	*Rabi* prospects continue favourable. Poppy plants flowering. Prices stationary. Public health fair.
Patna	*Nil*	Prospects of *rabi* and poppy continue fair. Mustard and peas being gathered. Wheat and barley in ear. Public health generally good.
Gya	*Nil*	Rice harvest good. *Rabi* crops fair. Poppy late. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal.—*contd.*		
Shahabad . . .	. . . .	Weather favourable to poppy, and if it remains steady for a fortnight, prospects will improve.
Hazareebagh . .	*Nil*	Weather seasonable. *Rabi* crops in excellent condition. Mustard being reaped. Sugarcane being pressed. Poppy heads being lanced. Cattle-disease still prevalent. A few cases of smallpox reported from Kasmar thana.
Cuttak . . .	*Nil*	Weather fair. *Dalua* rice growing well. Prospects of wheat and tobacco good. Price of rice rising. Public health good.
		General Remarks.—No rain during the week. Cold weather is coming to an end. *Rabi* crops are generally doing well. Harvesting of pulses, oilseeds and sugarcane continues with good outturn. Poppy is in flower; it is backward south of the Ganges, but it is generally expected to be a fair crop. *Boro* paddy is being planted out. Indigo sowings have begun. Ploughing for early rice and jute goes on. General health is good.
N.-W. Provinces and Oudh—(Feb. 23rd)—		
Benares (Feb. 22nd)	. . . .	Weather clear and seasonable. *Rabi* prospects continue favourable, but some crops have suffered in places by frost and blight. Poppy plant in excellent condition. Prospects very good. Sugarcane-pressing continues; outturn average. Supplies ample. Prices generally steady. Some cases of cholera have occurred in the city, otherwise the public health is good. No cattle-disease in district.
Gorakhpore („ 21st)	. . . .	Weather cloudy. *Rabi* looking well. Reaping of rape seed in progress. Prices stationary. Health fair.
Fyzabad („ 22nd)	. . . .	Weather favourable. *Rabi* crop nearly ripe. High prices continue owing to export. Poppy crop promising. Health good.
Lucknow („ 21st)	. . . .	Summer setting in. Owing to frost an eight-anna crop in gram, peas and *arhar* expected in Tahsil Malihabad, the extent of injury in other tahsils has not yet been ascertained. Poppy in flower and healthy. Sugarcane being pressed. Supplies ample. Prices still rising. Health of people good as well as the condition of cattle.
Rai Barelli („ „)	. . . . .	Weather clear and seasonable. Wind westerly. Injury to *rabi* crops from frost and blight, otherwise the prospects are favourable. Markets well supplied. Prices rising. General health and condition of cattle good.
Pertabgarh („ 22nd)	. . . . .	Weather clear. Wind westerly. Wheat and barley nearly ripe. Peas being cut. Prospects of poppy crop generally good. Prices stationary. No sickness.
Allahabad („ „)	*Nil*	Weather getting hotter. Crops generally doing well. Wheat and barley ripening. Markets full. Prices show a tendency to rise. Health good.
Cawnpore („ „)	. . . . .	Weather seasonable. *Rabi* in flourishing condition. Poppy in flower and free from disease. Prices steady.
Banda („ „)	*Nil*	Slight injury to crops in parts from frost and rust. Prices stationary. Public health and condition of cattle good.
Farakhabad („ „)	*Nil*	*Rabi* crops progressing well except the injury done to *arhar*, peas and gram by frost last week. Markets well supplied. Prices stationary. Health good.
Sitapur („ „)	*Nil*	Weather clear. Prospects of *rabi* crops continue good except gram, peas and *sarson*, which have suffered from frost and blight. Poppy crops continue satisfactory. Prices rising. Health good.
Bareilly („ „)	. . . .	Crops promising well. Markets steady. Health of men and cattle good.
Ballia („ 21st)	. . . .	Weather clear and seasonable. *Rabi* crops in good condition. Cane-pressing going on. Supplies ample. Prices stationary. General health good.
Kumaon („ 22nd)	. . . .	Weather fine. *Rabi* crops making good progress. Prices stationary. General health good. Cattle-disease on decrease.
Agra („ 21st)	*Nil*	Weather clear. Irrigation going on. Prices steady. Health good.
Jhansi („ „)	. . . .	Weather bright and clear. Crops doing well. Poppy in flower and looks healthy. Supplies ample. Health good.
Meerut („ 22nd)	*Nil*	High westerly wind drying the wheat, rust also reported. All prices rising. Health good.
		General Remarks.—Weather getting warmer. Injury to crops from frost and blight reported in several districts, but *rabi* prospects continue favourable. Poppy plants are in good condition. Sugarcane-pressing in progress. Supplies are sufficient though prices are rising. Public health good.
Punjab—(Feb. 23rd)—		
Delhi (Feb 22nd) .	. . . .	Health good. Prices still rising. *Rabi* prospects good.
Hissar . . .	. . . .	Rain much wanted. Health good. Prices rising.
Umballa . . .	. . . .	Health good. Prices rising. *Rabi* crops flourishing.
Jullundur . . .	. . . .	Rain much wanted. Health good. Prices rising. *Rabi* prospects average.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Amritsar . . .	. . . .	Health good. Prices stationary. *Rabi* crops somewhat damaged by frost and want of rain.
Ferozepore . .	. . . .	Health good. Prices rising. *Rabi* crops withering for want of rain.
Lahore . . .	. . . .	Health good. Prices rising. *Rabi* prospects becoming worse for want of rain.
Rawalpindi . .	·10	Health good. Prices rising. *Rabi* prospects average.
Shahpur . . .	. . . .	Health good. Prices high and rising. *Rabi* crops suffering for want of rain.
Multan . . .	. . . .	Rain urgently required. Health good. Prices rising. *Rabi* prospects fair.
Dera Ismail Khan .	. . . .	Health fair. Prices rising.
Peshawar . . .	. . . .	Rain much needed. Health good. Prices fluctuating. *Rabi* prospects average.
		General Remarks.—Slight rain in the Rawalpindi district. Health generally good. Prices of food-grains rising. Crop prospects average. Rain much needed.
Central Provinces—(Feb. 23rd)		
Nagpore . . .	. . . .	Weather warm. *Rabi* harvest in progress. Fever and cattle-disease continue. Prices stationary.
Jubbulpore . .	. . . .	Weather cloudy. Some damage caused to wheat, linseed, and gram by recent frost. Health fair. Prices high.
Saugor (Feb. 22nd)	. . . .	Wheat and linseed damaged in places by blight, and pulses by frost. Health good. Prices rising.
Seoni	. . . .	Weather clear and cool. Reaping of pulses commenced. Health good. Prices steady.
Hoshangabad . .	. . . .	Linseed injured by red rust; wheat favourable. Health good.
Khandwa . . .	. . . .	Weather getting hot. Prospects unchanged. Cutting of wheat and gram commenced. Health good. Prices stationary.
Raipur . . .	. . . .	Weather warm. Linseed and pulses being cut. Slight smallpox and cattle-disease. Prices rising.
Bilaspur . . .	. . . .	Pulses being harvested. Wheat and gram doing well. Cattle-disease in places. Prices stationary.
Sambalpur . . .	. . . .	Days hot, nights cold. Sugar-making in progress. Health good.
		General Remarks.—Weather clear and becoming warm. Prospects continue generally favourable. Prices are reported to be rising in some districts. Fever and cattle-disease in places.
Assam—(Feb. 23rd)—		
Gauhati . . .	*Nil*	Weather seasonable, but getting warm during the day. Public health fair. Crushing of sugarcane and ploughing of land for *ahu* in progress. Prospects of crops good.
Sylhet . . .	*Nil*	State and prospects of the crops good.
Cachar . . .	*Nil*	Weather getting warm. Reaping of mustard crop finished. Ploughing for *dumahi* crops progressing. Common rice 14 seers per rupee. Five deaths from cholera from Sadr, and one from Katigora reported.
Dibrugarh . . .	·43	Weather seasonable. Pressing of sugarcane and ploughing for *ahu* progressing. Public health fair.
Mysore and Coorg—(Feb. 23rd)		
Bangalore . . } Mysore . . }	. . . .	Standing crops in good condition except in parts of the Chitaldrug district where they are affected by disease. Coffee crop reported to be light in the Kadur district. Prospects of season favourable. Public health good. Prices risen slightly in the Tumkur district.
Mercara . . .	. . . .	Prospects continue good. Slight rise in prices.
Berar and Hyderabad—(Feb. 23rd)		
Amraoti . . .	. . . .	Weather getting warm. *Rabi* crops being gathered. Wheat 20 and *jowari* 28 seers per rupee.
Akola . . .	. . . .	Weather clear but getting warm. Wheat is being gathered. Threshing of linseed and gram in progress.
Hyderabad . .	*Nil*	*Tabi* crops prospering; *rabi* crops continue to be reaped. General health fair. Prices—wheat 13½, coarse rice 12, white *juar* 19, yellow *juar* 21, and *tur* 14 seers per current sicca rupee.
Central India States—(Feb. 23rd)		
Indore . . .	. . . .	Weather warm and clear.
Morar (Gwalior) . .	. . . .	Health and prospects good. Weather getting warmer.
Neemuch . . .	. . . .	Weather getting warmer. Prices rising. Health good.
Goona . . .	. . . .	Health and prospects good.
Sutna . . .	. . . .	Health and prospects good.
Agar . . .	. . . .	Health good. Opium prospects fair.
Sehore . . .	. . . .	Weather warm. Prospects of opium and other crops fair.
Nowgong . . .	. . . .	Weather cold. *Rabi* prospects fair. Health good. Prices steady.
Bhopawar . . .	. . . .	Crops good. Opium partially suffered from frost. Weather cloudy and hot. Health good. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—(Feb. 23rd)—		
Abu (Feb. 23rd)	*Nil*	Weather warmer. Health good. Prices rising.
Sirohi („ 21st)	*Nil*	Wells and health good. Crops much damaged by frost. Weather fine.
Marwar („ 20th)	*Nil*	Tanks half full. Health and crops good. Cold disappearing fast. Prices slightly risen.
Pertabgurh („ „)	*Nil*	Tanks low. Health good. Prices—wheat 12½, *makai* 26½, and gram 25 seers per rupee.
Meywar („ 21st)	*Nil*	State of tanks and wells unchanged. Crops greatly damaged by frost. Health good. Prices rising. Weather fine and growing warmer.
Harowti („ 19th)	*Nil*	Weather getting warm. Health good. Prospects fair.
Jhallawar („ 21st)	*Nil*	Health and prospects good.
Kotah („ 19th)	*Nil*	General health good. Weather seasonable. Prices stationary.
Ajmere („ 22nd)	*Nil*	Weather warmer. Crops, especially poppy cultivation, injured by frost. Cattle-disease still prevalent in some parts of Merwara. Wheat 23, barley 46, gram 48 pounds per rupee.
Jeypore („ „)	*Nil*	Crop prospects unchanged.
Bhurtpore („ „)	*Nil*	Crop prospects and health good. Weather bright.
Ulwur („ „)	*Nil*	Health good. Crops slightly injured by frost.
Kherwara („ 21st)	*Nil*	State of tanks and wells unchanged. Crop prospects fair. Health good. Chest affections disappearing. Weather somewhat cloudy and much warmer.
Bikanir („ 19th)	Slight rain in three districts.	Prices rising. Health good.
Nepal—(Feb. 17th)—		
Katmandu (Feb. 18th)	*Nil*	The extreme cold is at an end and everything betokens the nearness of spring weather. Prospects fair. Prices high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India of the Week ending 19th February 1887.

The settled weather which prevailed over India during the preceding week has continued throughout the past week. Over the whole country the barometer has been high. The excess was least in Burma, but even there amounted to over one-twentieth of an inch, while in the west of the Punjab it was over one-sixth. In Northern India, excluding Assam, the barometer varied between 30·15 inches and 30·40 inches, and in no part of India did it fall below 30 inches. With such high pressures there was an entire absence of any cold weather disturbance. The pressure decreased steadily from the north-west to a region of minimum pressure along the west coast and over the south of the Bay of Bengal.

The winds were strongly anti-cyclonic, *viz.*, blowing steadily from north-west down the Gangetic plain, from north-east in the Central Provinces, and from some easterly point in the Peninsula. The winds were everywhere very dry and the humidity of the air was much below the average.

The general absence of cloud, together with the increased power of the sun, has caused a rapid rise of temperature. The mean of this week being between 3° and 10° higher than that of last week and, as a rule, somewhat above the average of the season, though in Behar, Northern Bengal, Mysore and British Burma it is still slightly below it and in the Carnatic exactly normal. The greatest excess is in Guzerat where it amounts to over 7°. The maximum day temperatures have steadily increased in the Punjab; on the 19th they generally exceeded 80°; readings of 90° and upwards which, during the preceding week, were restricted to the Peninsula stations, have been recorded in the Central Provinces, Orissa and Guzerat.

The rainfall of the past week has been of the slightest. Showers of rain occurred at Quetta and Jacobabad on one or two days, at Murree a very slight fall of snow or rain was reported on the 13th and an equally slight fall at Sibsagar on the 17th; but with these exceptions, as far as the telegraphed reports show, not a drop of rain fell throughout India during the week. The following table shows for a few representative stations the progress of the present season's rainfall. The first column giving the amount of rainfall from November 1st, 1886, to February 19th, 1887, the second the normal rainfall for that period, and the third the difference:—

Stations.	Actual rainfall since 1st November 1886.	Average rainfall since 1st November.	Difference.
Multan	0·64	0·74	—0·10
Peshawar	0·83	3·71	—2·88
Murree	7·11	5·10	+2·01
Rawalpindi	3·91	5·55	—1·64
Lahore	0·56	1·99	—1·43
Simla	7·20	3·40	+3·80
Delhi	2·40	1·92	+0·48
Masuri	7·63	6·27	+1·36
Roorkee	2·99	3·64	—0·65
Meerut	2·68	2·26	+0·42
Bareilly	3·30	2·07	+1·23
Agra	1·06	1·07	—0·01
Lucknow	1·04	1·28	—0·24
Allahabad	4·31	1·25	+3·06
Darjeeling	2·43	1·81	+0·62
Calcutta	1·49	2·18	—0·69

The general result is similar to that shown in last week's summary. Except at Delhi and on the hills, there is a general deficiency of rain in the Punjab, while in the North-Western Provinces, excepting Roorkee, Agra and Lucknow, there is an equally general excess—most marked at Allahabad.

The following table gives the anomalies of pressure, temperature and humidity for the week, the means being compared with the normals of the month with which, in the present instance, they are directly comparable:—

Districts.	Departure of Barometer from mean, February 13th—February 19th.	Departure of Temperature from mean, February 13th—February 19th.	Departure of Humidity from mean, February 13th—February 19th.	Total Rainfall in week, February 13th—February 19th.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORT FOR JANUARY 1887.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology) No. 32 Met.—24-2, dated Calcutta, the 25th February 1887.

Read the following:—

Summary of the Weather Report for January 1887.

In December a temperature lower than usual was restricted to the North-West Himalaya and the Western Punjab. In January it extended to the whole of North-Western and a large portion of Western India, also to Bengal (excepting Orissa) and parts of Burma. Throughout North-Western India, but more especially on the Himalayas, as far east as Sikkim, the abnormal depression of temperature was very great, *viz.*, more than 6° below the average at Darjeeling, 4° at Ranikhet, 5° at Chakrata, and over 7° at Simla and Murree. In the North-West Himalaya, the month has been the coldest, during at least the last ten years, not excepting January 1877. The cold was also unusually severe on the plains of North-Western India, (comprising the Punjab, the Upper Gangetic plain, Rajputana, Sind and Guzerat), the mean temperature of the month being from 1½° to 5° below the average. In Bengal, Assam, and in parts of Central India and Burma, the deficiency of temperature ranged from 1° to 2°, except locally, at Purneah, Dacca, and Toungoo, where it amounted to 3° or 4°.

The lowest temperatures of the month in North-Western India were those recorded between the 15th and the 22nd; when a temperature of 30° was registered at Dera Ismail Khan, 31·5° at Peshawar, and 32° at Rawalpindi. In tropical India, the temperature at most stations was slightly in excess of the average.

The barometer was subject to rapid and frequent oscillations. The mean pressure of the month was everywhere greatly below the average. On the Himalaya and in Eastern Rajputana and Central India, the abnormal depression averaged one-tenth of an inch. In the neighbourhood of Bombay and at the mouth of the Godavery, where it was least, it amounted to four hundredths.

The month began with very cloudy weather in Beluchistan, on the plains of the Punjab and the North-West Himalaya, and this soon extended to the south and east. The weather remained more or less unsettled in the Punjab, and a large portion of Rajputana and the North-West Provinces, up to the 20th of the month. Twice or thrice, indeed, the skies cleared for a short interval, only to be again obscured. During the last ten days, the weather was finer in North-Western India, and interrupted only on the 24th and 25th, when some cloud again appeared; and on the 28th, when the skies became overcast over a large portion of the Punjab. Less thickly, the cloud extended to Bengal and Central India, and several rather heavy showers of rain fell in those regions. These periods of unsettled weather in Bengal were owing to the eastward movement of small disturbances, which appeared, from time to time, in Sind and the Southern Punjab, and thence travelled across Central India to Bengal. With one exception, all these depressions were, as they generally are, small, but they were more numerous than usual in this month. The largest appeared on the evening of the 17th, when the barometer fell rapidly throughout North-Western

India and continued falling for three days; so that, on the 20th, the barometric readings in North-Western India were some of the lowest on record at this time of year. In the Punjab, they were on an average 0·30″ below the normal pressure of the month, and on the North-Western Himalaya even more so. The difference was not much less in the North-West Provinces and Central India.

January was a damp month in North-Western aad Central India. On the 4th, about 1 inch rain fell at Delhi, and a few showers in the adjacent districts of the Gangetic plain. During the next few days, the rainfall extended first to the more eastern districts of the North-Western Provinces, Central India, and Behar, and lastly to South and East Bengal. Snow began to fall on the North-West Himalaya on the 10th, and was repeated, with only two or three short intervals of comparatively fine weather, up to the end of the third week of the month. On the 25th and 29th, there were further falls, but these were very light. In Sikkim, 5 inches of snow fell on the 20th, and a little also on the 21st. As is usual, rain fell simultaneously on the plains of the Upper Provinces, and frequently extended to Central India and Bengal. The heaviest falls of snow took place on the 14th and 20th; especially the former, when the snow lay to a thickness of about 9 inches in the central parts of Simla. A large quantity of rain preceded the snowstorm.

Notwithstanding the prevalence of cloudy and rainy weather in Northern India, on the mean of the whole month, the rainfall was more or less below the average, in all the districts of the Punjab, West of Lahore, except Sialkot, where this average was slightly exceeded. In the Eastern Punjab, Sind, Rajputana, the North-West Provinces (excepting Oudh), Bengal, Assam, and parts of Central India, the fall was excessive; especially so at Saugor, Sutna, and Jubbulpore. On the North-West Himalaya, it was a little less than double the average of the month. On the other hand, Guzerat, the Nerbudda Valley, the peninsula and Burma were rainless throughout, or nearly so, while in Ceylon there was a considerable deficiency.

It may be interesting to institute a rough comparison between the rainfall of the present month and that of the corresponding period of some of the previous years. With this view, the following table, showing the rainfall in North-Western India during the January of five years in parallel columns, has been drawn up:—

TABLE A.

NAMES OF DIVISIONS.	Average rainfall in January.	Mean actual rainfall in January 1877.	Mean actual rainfall in January 1878.	Mean actual rainfall in January 1883.	Mean actual rainfall in January 1885.	Mean actual rainfall in January 1887.
Punjab, West	1·39	2·05	0·69	2·93	3·53	1·07
Do. East	1·47	1·62	1·13	2·89	4·72	2·69
N.-W. P., Trans-Gangetic	1·38	2·88	2·19	3·52	3·10	2·76
Do. Cis-Gangetic	0·60	0·80	1·40	2·22	0·62	1·21

A glance at this table will show that in most or all the provinces enumerated the rainfall of each of these five years was greatly above the average. In the first three years, there was a more or less prolonged suspension of the summer rains in Northern India; but in 1885, when, as will be seen from the above table, the rainfall of January was even heavier than in any other of the five years, there was a considerable retardation of the rains on the Bombay side but not in the Upper Provinces. It is, therefore, premature to say anything about the probable character of the coming rains.

The following table shows the amount of rain and the difference from the average during the month of January 1887, according to districts as far as is indicated by the telegraphic reports:—

DISTRICTS.	No. of stations.	Average rainfall for January.	Difference from the average in January 1887.
Punjab, West	7	1·39	—0·32
Do. East	4	1·47	+1·22
North-Western Provinces, Trans-Gangetic	9	1·38	+1·38
Do. do. Cis-Gangetic	3	0·60	+0·61
Behar	2	0.66	+0·67

Ceylon	1	3·04	—0·71

RUCHI RAM SAHNI,
2nd Assistant Meteorological Reporter to the Government of India.

SIMLA,
The 5th February 1887.

I am quite of the opinion expressed in the foregoing summary, *viz.*, that it is premature to form, still more to enunciate, any judgment on the probable character of the monsoon rains; there are certainly no facts before us so far, to justify either a dismal or cheerful prognosis of the coming season.

H. F. BLANFORD,
Meteorological Reporter to the Government of India.

CALCUTTA,
The 9th February, 1887.

RESOLUTION.—Resolved that the summary be published in the Supplement to the *Gazette of India*.

E. C. BUCK,
Secretary to the Government of India

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING
No. 8, Hastings Street, Calcutta.

SUPPLEMENT TO

The Gazette of India.

No. 10.} CALCUTTA, SATURDAY, MARCH 5, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR THE YEAR 1885-86.

No. 56T., dated Fort William, February 25, 1887.

Read—

Letter from the Director-in-Chief, Indo-European Telegraph Department, No. 239, dated 22nd September 1886, and its enclosure, the Report for 1885-86.

OBSERVATIONS.—The Capital Account of the Department was increased by about £1,000, and stood at the close of the year under review at £1,129,975-15-5.

2. There was a satisfactory increase in the traffic receipts of the Department, the revenue of the year under review having been £101,115 against £91,706 in the previous year. The total receipts, however, amounted to only £101,928, against £93,693 in the previous year, there having been a falling off of over £4,000 in the miscellaneous receipts.

3. The transactions of the year resulted in a net loss of £60,079, notwithstanding the large increase in revenue. This heavy loss was due mainly to the renewal during the year of one of the Jask-Bushire cables; it was also to a small extent due to an increase in the ordinary expenditure of the Department.

A

4. The original cables and the land lines in connection with them were very costly, and although the prospect of a fair return on the Capital outlay is not to be anticipated, the lines have proved of great value, and the Department has rendered good and valuable service to the State.

5. Apart from the extraordinary expenditure on renewals, the cost of maintenance and working is however very high, and the possibility of reducing it requires early and careful consideration. This matter is being separately dealt with by the Government of India and need not be further noticed here.

6. The ordinary expenditure of the year shows an increase under every head except those of Stores, Profit and Loss, and Royalty; no clear explanation is given of the reasons in each case, but it appears from the report that the principal causes of the excess were an exceptionally severe winter on the Persian Section and an accident to the cable steamer, which necessitated the chartering of another steamer to undertake repairs to the cables.

7. The duration of total interruptions to traffic was nearly fifty per cent. longer than in the previous year; but it may be anticipated that the laying of the new cable between Jask and Bushire, which was successfully accomplished during the year, will reduce the difficulties of keeping communication open. The duration of partial interruptions was less by sixteen per cent.

8. The percentage of errors was higher and the speed of transmission was less than in the previous year; these are explained to be partially due to pressure of traffic during interruptions in the Red Sea route. The complaints from the public too were considerably more numerous, but it is stated that of the increase, a considerable number had reference to defects outside the departmental system.

9. The Government of India trusts that in all these points the report for 1886-87 will show a marked improvement.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director-in-Chief, Indo-European Telegraph Department, for information and guidance.

Also, that copies of the Report and Resolution be forwarded to the Department of Finance and Commerce, the Military (Marine), Home and Revenue and Agricultural Departments, for information.

Also, to the Government of Bombay, and to the Director General of Telegraphs in India, for information.

Ordered further, that the Report and the Resolution be forwarded to the Secretary of State for the information of Her Majesty's Government, and published in the *Gazette of India*.

G. F. L. MARSHALL, *Major, R.E.*,
for *Secretary to the Govt. of India.*

No. 239, dated 22nd September 1886.

From—Colonel J. U. BATEMAN-CHAMPAIN, R. E., Director-in-Chief, Indo-European Govt. Telegraph Dept., London,

To—The Secretary to the Government of India, P. W. Dept.

ADMINISTRATION REPORT, 1885-86.

I have the honour to forward, for the information of the Government of India, the following account of the administration of this Department during the year 1885-86. It will be, I presume, convenient to follow the system of classification adopted in my previous Reports, and to arrange the several subjects in the usual order. The first being—

CAPITAL.

Capital.

2. The Capital of the Indo-European Telegraph Department which, in the Parliamentary Accounts, stood at £1,128,952-15-9 at the close of 1884-85, was increased by about £1,000 during 1885-86, and appears at the close of 1885-86 as £1,129,975-15-5. This increase is owing to works executed by the Public Works Department and to variation in Suspense balances. See Appendix A.

REVENUE.

Increase of receipts.

3. The Receipts of the Indo-European Telegraph Department for the year 1885-86 reached the satisfactory total of £101,115, showing an increase of £9,409 on those of the previous year. The increase was partly due to the development of ordinary Indian traffic, and partly to the extra traffic occasioned by the Afghan Commission and the operations in Burmah.

4. The ordinary expenditure debited against the Department for 1885-86 was £85,638-5-6, or somewhat more than that for the previous year, after making allowance for the drawback of £15,337-12-0 from that year's expenditure, made in adjustment of an outstanding Store balance on a change in our system of Accounts.

Cost of new cable charged to Revenue.

5. In addition to the ordinary expenditure, the total cost of the manufacture, shipment and laying of a new cable between Jashk and Bushire was debited against the Department in the Accounts for 1885-86. Were it not for this extraordinary charge there would have been a profit of £16,290 on the year's working.

Details of some of the expenditure.

6. The increase in the ordinary expenditure for 1885-86 occurred in the following items:—

	More. £	Less. £
Repairs	1,811	...
Establishments	1,652	...
Tools and Plant	1,739	...
Cable Steamer	1,598	...
Stores	...	431
Profit and Loss	...	36
Advertising and Agencies	94	...
Chief Direction and London Office	241	...
Royalty for Brown Allan Relay	...	100
Instruments for presentation to Ottoman Administration	542	...
	7,677	567
Net increase	7,110	

Further details will be found in Appendix B.

LINES, MAINTENANCE AND REPAIRS.

Line between Teheran and Koom.

7. Referring first to the Persian Section from Teheran to Bushire, I may remind you that in my last year's Report I described the shifting of about 100 miles of our line between Teheran and Koom to the new post road further to the west. This road was designed for wheeled traffic, and bridges were constructed by Persian engineers over the several streams. Heavy

Damage to new post road.

rains in the spring of 1885 swept away all these bridges but one, and during the wet weather it was difficult for our line guards to patrol the new route.

Old road now impassable.

The old one, I may observe, is now completely impassable owing to the bursting of a dyke on one of the most important neighbouring streams, so

that a lake at least 20 miles across now bars the way. It is to be hoped that the Persian authorities may take immediate steps to repair the broken bridges on the new line. A somewhat similar accident to a dyke in the south of Persia, near the tomb of Cyrus, has flooded a considerable tract of country and will oblige us to shift some 5 miles of our line to higher ground.

Effect of floods near Cyrus' tomb.

8. The winter of 1884-85 was, it will be remembered, unusually severe, but that of 1885-86 was far worse. The first violent snowstorm in the south of Persia began on Christmas night and caused a total interruption of the wires between Sivand and Dasht Arjin which lasted 167 hours. The second storm was on the 5th January and stopped the working for 172 hours. Major Wells, the Acting Director, describes in vivid language, the courageous efforts of the Inspectors and Line Guards to restore the communication. The risk to life in crossing snowdrifts is great, and the privations which must be endured, when, after struggling in a bitterly cold temperature all day, the nights have to be passed in some wretched hut or even cave, with barely enough fuel and food to support life, can scarcely be imagined. It was after a week of such work that Mr. Hamilton, clerk at Dehbeed, formerly a Sergeant of Royal Engineers, died from inflammation of the stomach brought on by cold and exposure. His devotion to duty cost him his life, and I have in a former letter submitted the case of his widow and children for the favourable consideration of the Government of India.

Severe snowstorms in 1885-86.

Risks incurred in repairing line.

Sad death of Mr. Hamilton.

9. A few instances of wilful damage occurred in the neighbourhood of Borazjoon. The culprit was the local Governor himself, who has since been ejected from his post, not without bloodshed. Major Wells praises the conduct and coolness of Mr. Arshak Malcolm, our local clerk, during the rather critical days when the troops from Bushire were advancing against the Borazjoon Chief. Mr. Malcolm remained at his post, and by his personal influence and courage saved our office and wires from injury by either party. I should add that the original damage to our line was not done from enmity to the telegraph, but was merely one of the Borazjoon Chief's little ways of indicating hostility to the superior Government of Shiraz. All sums due by the Persians on the wilful damage account were recovered during the year through Her Majesty's Legation.

Wilful damage near Borazjoon.

Mr. Malcolm, the Telegraph clerk at Borazjoon.

10. With regard to Persian Gulf lines, maintenance, and repairs I may state briefly that a new gutta-percha cable was laid between Bushire and Jashk during the year under report. The operations have been so recently described in my letter to you from Karachi, No. 904 of the 1st December 1885, and again at greater length and in complete detail in Sir Henry Mance's Scientific Report sent you on the 18th August, that it is not necessary for me to here repeat what is there written.

New cable, Bushire and Jashk.

Reference to previous reports of operations.

11. The total length of our cables is now as follows:—

Length of various cable sections.

	Knots.
Fâo-Bushire Gutta-Percha	152·38
Bushire-Jashk Gutta-Percha, new	519·30
Jashk-Gwadur Gutta-Percha	266·94
Gwadur-Manora Gutta-Percha	271·94
Karachi-Manora (3) Gutta-Percha	17·67
Bushire-Jashk India-Rubber	500·76
TOTAL	1728·99

11. This shows an increase of 5·8% over last year's total, the explanation of which is given in the Electrician's Annual Report attached. During the year we were for the first time, in the History of the Department, obliged to charter a steamer to effect our cable repairs, the machinery of the *Patrick Stewart* having vexatiously broken down just when both our cables were interrupted. We engaged the *Comilla*, a vessel belonging to the British India Steam Navigation Company, and the period of her engagement was 44 days. She answered the purpose most admirably and repaired no less than 8 faults during the time she was under our orders. Mr. Ffinch writes that the chartering arrangements were made by the Director of Indian Marine "to whom warm thanks are due for sending such a suitable vessel." I need scarcely remark that the above-mentioned total interruption of our cables happened before our new line was laid.

Steamer chartered in spring of 1885 to repair cables.

Comilla taken up for us by Director, Indian Marine.

12. The Mekran Land line worked well and was of great service. Mr. Ffinch speaks most highly of the efficacy of the fluid insulators without which communication along the sea, shore could not, at certain seasons, have been maintained. Some creosoted pine posts, which were supplied a few years ago from England to replace iron standards, badly corroded by the constant damp and the influence of the sea air and spray, seem to be a success. As yet none have been attacked by white ants nor injured by rot. Four hundred seventy nine more of these pine posts have been erected during 1885-86 on the coast.

Mekran Land line.

Fluid insulators.

Pine posts

13. Notwithstanding the frequent and prolonged absence of most of our cable staff on repairing expeditions, the Cable Factory at Manora was by no means idle. Nearly 100 knots of cable were manufactured, 60 knots were repaired, and retaped, and 93 were stripped for the gutta-percha core to be, as much as possible, re-made into cable. These results reflect credit on the management of Mr. Possmann and his assistants.

Work done in Manora Cable Factory.

INTERRUPTIONS.

14. The number of total interruptions on the Teheran route during the year 1885-86 was 24, amounting in the aggregate to 31½ days, as compared with 23½ days in the preceding year. 16 of the interruptions occurred on the Company's section between London and Teheran = 8 days, 5 hours, 30 minutes. 6 occurred on the Teheran-Bushire Section = 15 days, 17 hours, 48 minutes, and 2 occurred on the Gulf section between Bushire and Karachi = 10 days, 9 hours.

Total interruptions on Departmental lines.

15. The total interruptions in the Persian Gulf of 7½ days and 3 days respectively were of the ordinary kind, being caused by both cables between Bushire and Jashk being broken at the same time. They were repaired without undue delay.

16. On the Turkish route (now but little used) the total interruptions amounted to 128 days against 92 in the preceding year. With the exception of 21 days the interruptions were confined to the Fâo-Bushire Section which has gradually become almost worn out from extreme age. The duration of the interruptions was owing chiefly to the employment of the steamer on other Departmental work, and to the necessity of her being docked for repairs to machinery soon after laying the Ceylon cable.

Interruptions on Turkish route.

17. The Suez route was totally interrupted from the 5th to 26th June, during which period the Indo-European route carried the entire traffic.

18. The balance of the total interruptions being in favour of the Indo-European route, the financial result to this Department was a net gain of £1,568-11-4 from the Common Purse arrived at as follows:—

Effect of interruptions on the Common Purse.

	Gain to Department through increased percentages. £ s. d.	Loss to Department through decreased percentages or fine. £ s. d.
During total interruptions of Teheran route	...	316 18 4
On account of total interruptions of Turkish route	...	188 13 6
During total interruptions of Eastern Company's route	2,074 2 2	
Balance net gain	...	1,568 11 4
	2,074 2 2	2,074 2 2

19. The aggregate of the partial interruptions, *i. e.*, interruption of one or more wires on a route which has other wires actually working, was 200 days, 12 hours against 240 days, 10 hours in 1884-85.

Partial interruptions not stopping traffic.

TRAFFIC.

20. The tariffs and regulations of the London Convention remained in operation during 1885-86, with the exception of the rule which required that rectifying messages should be included in the traffic accounts. The Berlin Conference (whose revision came into force on the 1st July 1886) having adopted a modification excluding these messages from the accounts, this modification was, with the welcome concurrence of all parties interested, made to apply to Indo-European messages (except those *viâ* Turkey) from the 1st November 1885.

International regulations in force.

21. The paid messages carried by the Department were—

	Messages.	Words.	Messages.	Words.
Government	3,943	247,351	2,616	95,748
Commercial and Priviate	109,412	1,383,030	90,525	1,150,535
Press to *Times* at reduced rates	191	91,621	194	79,085

22. The average length of Commercial and Priviate messages was 12½ words in 1885-86 as against 12¾ in 1884-85, from which it would seem that the users of Code have, for the present, almost reached the limit of possible condensation by means of preconcerted language.

Average length of messages.

23. In addition to the paid traffic, 457 messages for the information of Political Officers were sent by the Department of the tariff value of Rs. 34,176, for which no financial credit is allowed.

24. The growth of the net receipts of the Common Purse was at a rather increased ratio in 1885-86, the total amounting to £ 598,813 as against £ 556,444 in 1884-85.

Common purse; total receipts.

25. Contrary to recent experience the growth was entirely due to the development, exceptional or otherwise, of Indian traffic, that with the Far East remaining stationary. It will be remembered that for several preceding years the exact opposite was the case, the Far East receipts increasing rapidly, while the Indian receipts rather receded. The following table exhibits the growth of the Common Purse from the time the Department joined it:—

Increase of the purely Indian work.

TABLE A.

Year.	First year's actual net receipts and hypothetical increase of 5 per cent. per annum.	Actual net receipts of common purse.	Actual increase per cent. per annum on first year's working.	Average increase per cent. per annum.	Fluctuation of each year compared with preceding year
	£	£			
1878-79	427,180	427,180	...	...	...
1879-80	448,539	480,309	12·437	12·437	...
1880-81	470,966	523,616	10·713	11·25	9·02
1881-82	494,514	515,104	6·437	8·74	1·62
1882-83	519,240	545,043	6·281	7·70	5·81
1883-84	545,202	544,004	4·953	6·73	0·19
1884-85	572,462	556,444	4·504	6·55	2·29
1885-86	601,085	598,813	4·943	5·75	7·61

For further particulars, see Appendix D.

26. The subjoined Table B. sub-divides and analyses the receipts shown in Table A—

TABLE B.

Common Purse—Analysis of Receipts.

(1).—Indian.

Year.	First year's actual net receipts and hypothetical increase of 5 per cent. per annum.	Actual net receipts of Common Purse.	Actual increase per cent. per annum on first year's working.	Average increase per cent. per annum.	Fluctuation of each year, compared with preceding year.
	£	£			
1878-79	310,010	310,010			
1879-80	325,510	337,767	...	....	...
1880-81	341,786	379,839	8·953	8·953	...
1881-82	358,875	360,011	10·690	10·15	12·46
1882-83	376,819	384,007	5·110	7·55	5·22
1883-84	395,660	368,881	5·497	6·69	6·66
1884-85	415,443	360,470	3·538	5·59	3·94
1885-86	436,215	404,063	2·545	4·70	2·28
			3·858	4·47	12·0
	(2).—Trans-Indian.				
1878-79	117,170	117,170	...	...	...
1879-80	123,029	142,542	21·654	21·654	...
1880-81	129,180	143,777	10·773	14·12	0·87
1881-82	135,639	155,093	9·797	11·84	7·87
1882-83	142,421	161,036	8·274	10·30	3·83
1883-84	149,542	175,123	8·369	9·59	8·75
1884-85	157,019	195,974	8·950	9·38	11·91
1885-86	164,870	194,750	7·528	8·86	0·62

Division of Traffic.

27. *The standard division of receipts*—

	On Indian Traffic. Being		On Trans-Indian Being	
	vid Suez.	*vid* Indo-European route.	*vid* Suez.	*vid* Indo-European route.
	60·39 %	39·61 %	80·53 %	19·47 %
The percentages of traffic actually carried have been—				
1878-79	71·31 %	28·69 %	95·26 %	4·74 %
1879-80	67·91 „	32·09 „	94·10 „	5·90 „
1880-81	69·01 „	30·99 „	92·50 „	7·50 „
1881-82	64·63 „	35·37 „	81·26 „	18·74 „
1882-83	48·34 „	51·66 „	59·26 „	40·74 „
1883-84	55·96 „	44·04 „	83·52 „	16·48 „
1884-85	53·02 „	46·98 „	84·44 „	15·56 „
1885-86	52·14 „	47·86 „	75·91 „	24·09 „

28. It will thus be seen that in 1885-86 the Indo-European route carried 8·25 per cent. of Indian and 4·62 per cent. of Trans-Indian traffic more than its standard share. The Departmental proportion of the excess amounting to £19,556, was made over to the Eastern Company according to the heads of agreement.

Proportion of traffic by the Department.

29. If we sometimes carry more than our standard share of traffic, and pay the balance to the Eastern Company, it must not be forgotten that on several occasions we have carried less, and that the difference has been made good to us. The table appended to this paragraph will show that on the whole the balance is still somewhat in our favour; an exact equilibrium is of course impossible—

Year.	Credited to Purse.	Drawn from Purse.
	£	£
1878-79	42,309	62,264
1879-80	52,488	68,377
1880-81	57,235	76,122
1881-82	67,108	74,528
1882-83	110,728	84,861
1883-84	81,408	76,547
1884-85	85,376	76,610
1885-86	107,317	85,824
Total	603,969	605,633

30. Extracting from the total Common Purse traffic the percentage carried by the Department, the following figures will show its division between the Teheran and Turkish routes:—

1885-86.

Carried by Department, Indians, and Trans-Indians combined.	Sub-division Vid Teheran	Vid Turkey.
17·92 per cent.	17·47 per cent.	0·45 per cent.
In 1884-85 it was—		
15·34 per cent.	14·82 per cent.	0·52 per cent.

31. Or, if the traffic carried by the Department be considered by itself, without reference to the Common Purse, its sub-division would be—

Number of Messages	
Vid Teheran.	*Vid* Turkey.
95·72 per cent.	4·28 per cent.

Speed of working.

32. The average rates of transmission from the United Kingdom to Calcutta by the three routes according to the Government Gazette, were—

	Vid Teheran. H. M.	*Vid* Turkey. H. M.	*Vid* Suez. H. M.
1885-86	3.42	13.52	3.36
1884-85 (for comparison)	1.58	10.20	3.15

Eliminating 5 months, June to October, as exceptional owing to pressure, the average for the other 7 *viâ* Teheran, would be about the same as in 1884-85.

Transferred traffic in London.

33. The Eastern Company transferred 9,408 messages to the Indo-European Company, chiefly in the months marked above as exceptional, when the Suez route was defective; and the Indo-European Company transferred to the Eastern Company 1832 messages during the occasional total interruptions *viâ* Teheran in the course of the year. It is not known what traffic was transferred in India.

34. The percentage of errors was—

Persian Gulf	0·286
Persia	0·209
Total	0·495 for the Department

as a whole. This was somewhat higher than usual. The increase appears to have been caused by pressure of traffic, by some necessary changes of the signalling staff at Teheran and Bushire, and by a temporary unavoidable relaxation of the system of check at the transmitting stations in August and September when the strain of the extra traffic carried by the Department was most severe. If the exceptional months be eliminated the percentage for the remainder of the year would be normal.

Check.

35. From the above-mentioned causes (principally) our rectifying messages and public complaints were higher than usual, the numbers being—

	1885-86.	1884-85.
Rectifying messages	1,938	1,156
Public complaints	122	45

36. A considerable number of the extra public complaints were, however, due to the defective working of the route to Cochin China *viâ* Tavoy.

Common Purse Accounts, checking of.

37. With reference to the disparity between the number of words exchanged at Bombay as reported by the Eastern Company and the Indian Department, respectively, a partial investigation of these differences has now been concluded by the Check Office at Calcutta with the result that the total discrepancy has been reduced from 1·187 per cent. to 0·328 per cent. It was originally due to the inclusion of rectifying messages in the Indian statistics which had been excluded from those of the Eastern Company.

38. A similar partial investigation by the Indian Department for 1884-85 has resulted in reducing the discrepancy from 1·74 per cent. to 0·349 per cent. which in this case was partly due to the inclusion of rectifying messages in the Indian return as in 1883-84, and partly to an error in the Company's statistics for July, October, and November 1884, whereby 5,909 words were short entered in the Common Purse accounts.

39. These discrepancies are merely differences in word statistics, and do not affect the accuracy of money settlements with the Eastern Company, which are based on the actual traffic accounts.

40. The Indo-European Company's Common Purse accounts were thoroughly examined for the month of October 1884. Only some 20 detail errors were detected, involving a total excess credit to the Purse of £17-16-10.

41. This small result shows that greater care has been exercised than formerly, and therefore the examination was not further pursued.

42. The checking of the Common Purse accounts for 1885-86 has not yet been carried out, as owing chiefly to press of work in connection with the new tariffs to come into force under the Berlin Convention on 1st July 1886, the London office has, as yet, not been able to attempt it. The checking will, however, be taken in hand as soon as practicable and the result reported hereafter.

Settlements.

43. The settlements with India were made on the same basis as last year, *viz.*, Fcs. 25·05= £1, the value of the Rupee in sterling being determined month by month according to the rate obtained by the Secretary of State for his monthly drawings. This latter rate varied during the year between 19·19*d.* and 17·87*d.*, and the average for the year was 18·316*d.*

44. The local collections of the Persian Section were made on the basis of the Convention as follows:—

1st April to 13th July	Franc=23 Shahis.
From 13th July to end of year	„ =26 „

The total collections in Persian currency were credited to the Government of India at the rate of 255 krans=100 Rupees.

45. The settlement with Turkey was effected as usual by a bill at 3 months for the equivalent of the franc balance The resulting rate of exchange was 25 francs=£1.

46. The settlements with the Eastern and Indo-European Companies both on traffic and Common Purse accounts were at the usual rate of francs. 25=£1.

Inspections.

47. In November and December 1885 I inspected the Persian Gulf stations at Bushire, Jashk, Manora, and Karachi.

Major Wells' tour in Persia.

48. In Persia Major Wells went over his line between Teheran and Shiraz during the autumn, his special object being to examine closely the new portion between the Capital and Koom, and also the buildings which have recently been erected for our use at Shiraz. In March of the current year the Director travelled over the whole extent of the Teheran-Bushire Division to judge of the damage done by winter storms, and to consider what steps could be taken to lessen the effects of future visitations. Major Wells reports that—"Our relations with the local authorities and inhabitants are everywhere of a friendly nature. All disputes were settled locally during the past year, and on no occasion was it necessary to appeal either to the central Government at Teheran or to Her Majesty's Legations."

Satisfactory relations with Persian local authorities.

Mr. Ffinch's tour.

49. In the Gulf Division Mr. Ffinch visited every one of his offices and travelled over the Gwadur-Jashk portion of the Mekran Coast Line.

Establishments.

Major Wells assumed for Colonel Smith charge of Persian lines in spring of 1885.

50. Colonel R. M. Smith, R.E., was forced by the state of his health to take leave in England, and handed over charge to Major Wells, the Assistant Director, on the 17th May 1885. The changes among the Inspectors and Clerks were of minor importance. The same remark applies to the staff in the Persian Gulf which, generally speaking, remains at the same strength and on the same footing as when I submitted my last year's Report.

Departmental Steamer.

The *Patrick Stewart*.

51. A tabular statement attached to this letter shows the work done during the year by the *Patrick Stewart*, the cable vessel belonging to the Department. She made no fewer than six trips to the Gulf, steaming over 11,500 miles. It is my duty to observe that the trouble and friction arising from our vessel being classed as an Indian Marine ship, controlled partly by one Department, partly by another, seems by no means to diminish, and I shall shortly venture to ask that the Government of India will re-consider the system at present in force.

Stores.

52. The principal items of expenditure under the head of "Stores" during the year were as follows:—

	Rs.	A.	P.
Purchase of Stores in India	14,736	1	3
London stores, including freight and landing charges	1,16,567	13	1
Stores from other Departments	1,717	8	0
Total	1,33,021	6	4

53. The issues of stores were as follows:—

	Rs.		
For repairs to cable	78,189	4	2
Ditto Mekran land line	15,323	6	3
Ditto Offices	20,791	2	6

54. The value of the manufacture outturn was Rs. 1,16,278-12-6, out of which Rs. 1,14,845-14-6 was for cable manufactured—

	Rs.	A.	P.
Gutta-percha	92,258	2	11
India-rubber	22,587	11	7

and Rs. 690-8-5 for instruments.

Workshop.

55. Our small workshop at Karachi continues to turn out most satisfactory work under the able supervision of Mr. Wittkugel. The number of orders executed during the year were for this Department 70, and for the Indian Telegraph Department 61; the value of the latter was Rs. 905-7-0.

GENERAL.

The new Persian Gulf cable.

56. At the very beginning of the year under report, I received orders from the Right Honourable the Secretary of State to arrange for the manufacture and submersion of a new cable rather more than 500 miles in length, to replace the old decrepit wires then in use. No more favourable time could have been chosen. The dullness of trade had led to a certain stagnation in the English cable factories, labour and material were exceptionally cheap, and the season of the year was propitious. Fortunately too, Mr. Mance, the Engineer and Electrician of the Department, was at home on leave. This officer, I may remark, was in June 1885 knighted for his distinguished services in the invention and adaptation of the Heliograph; services warmly recognised by the War Office. Sir Henry Mance most promptly and cheerfully acceded to my request that he would undertake with me the preliminary cable arrangements, and no time was lost in beginning the work. But I need not repeat what has been so lately brought to your notice, and will confine myself to recording the fact that the third Bushire-Jashk cable was successfully laid and opened to traffic by the 21st November 1885.

Sir Henry Mance and the new cable arrangements.

Telegraph Conference in Berlin, August 1885.

57. Before this I had to attend the periodical International Telegraph Conference at Berlin. Mr. Reynolds of the Indian Telegraph Department and I had been selected to represent India, and we accordingly left London for Germany on the 6th August. During my stay I was in continual communication with Sir Henry Mance; and the postal distance of a few hours by rail, caused but small delay in cases where my decision or signature was required. Mr. Reynolds and I quitted Berlin on the 17th September, and on the 6th October I sailed with Sir Henry Mance and a well selected cable staff on board the steam ships *Dacia* and *International*, which had been carefully fitted to carry our cable and stores and complete the operations in the Persian Gulf.

Start of the cable expedition.

Visit of Director-in Chief to Calcutta.

58. On my return to Karachi in December I visited Calcutta and conferred with the Director General of Indian Telegraphs and other authorities on sundry questions springing out of the Berlin Convention and from various other sources. I was again in England on the 26th January 1886.

Teheran-Meshed Line.

59. My last year's report records the circumstance of our having detached to Meshed from our Persian Telegraph staff, one or two able signallers, in order to improve the means of communication with the officers of the Afghan Boundary Commission. Considerable benefit was derived from this arrangement, but it is obvious that the best men and instruments at the end of a line can do little, while that line itself is disabled, and the state of the Persian-Teheran Meshed Telegraph certainly left much to be desired. When at Bushire in November, whilst completing the new cable, I received somewhat urgent messages from Her Majesty's Chargé d'Affaires at Teheran, which led to correspondence resulting in Major Wells assuming control of the Teheran-Meshed wires on the 14th December 1885. Major Wells acted in this matter with clear sense and promptitude. He at once took in hand the payment of the line guards, two of our Inspectors were temporarily told off for the section, the necessary tools were issued, poles purchased, and the most urgent repairs begun at once. His Excellency the Mukhbar ud Dowleh, as usual, co-operated most cordially, and in a short time a very decided improvement in the working was manifest and still continues. In connection with this part of our duty Major Wells reports highly of the conduct and energy of the Inspectors, Sergeant McIntyre, R. E., and Mr. Stagno Novarra, as well as of the special clerks, Mr. Bull at the Teheran end, and Mr. Gray, at the Meshed end of the line. The latter was in some danger during the riot which broke out on the 5th January 1886, but fortunately escaped, the prevailing cold and wet dispersing the crowds who had already sacked the Persian Telegraph Office.

We assume control.

Major Wells' measures.

Conduct of the staff in Persia.

60. To the above-named gentlemen, as well as to Mr. Preece and the rest of the staff, my thanks are due for their unwearied and able services during a most trying season.

61. Dr. Baker and Dr. Scully who is at present acting for Dr. Odling at Shiraz, were unremitting in the performance of their medical duties.

In the Persian Gulf.

62. Mr. Ffinch in the Persian Gulf draws very particular attention to the good work of Mr. Possman, the Engineer and Electrician, acting for Sir Henry Mance, of Mr. Herbage, the Traffic Manager, of Messrs. Pierce and Allen, the Assistant Superintendents on the Mekran Land line, and generally of the officers and men of the Persian Gulf Division.

In London.

63. I must reiterate the expression of my own acknowledgments to Major Wells, Mr. Ffinch, and to Mr. Brasher and his Assistants in the London Office. My own absence from headquarters during a great part of the year threw on Mr. Brasher more than the usual responsibilities, which he met, as usual, to my complete satisfaction.

APPENDIX E.

INDO-EUROPEAN GOVERNMENT TELEGRAPH DEPARTMENT.

PERSIAN GULF SECTION.

Statement of work done by Her Majesty's I. M. S. "Patrick Stewart" during the year 1885-86.

DATE. From	DATE. To	Particulars.
1885.	1885.	
April 1	April 3	Lying at moorings in Karachi Harbour, taking in cable stores, &c., and preparing to proceed to the Persian Gulf on cable repairs.
,, 4	,, 6	Left Karachi, and put into Gwadur to examine cause of defect to screw and screw shaft; found the screw had considerably fallen. Decided to return to Karachi
,, 7	,, 8	On passage from Gwadur to Karachi.
,, 8	,, 10	At Karachi landing cable stores, &c.
,, 11	,, 14	Left for Bombay in tow of hired transport *Zambasi*, arriving on the afternoon of the 14th.
,, 15	May 13	Docked vessel for the purpose of making good defects to the engines, &c.
May 14	,, 14	Hauled out of Dock.
,, 15	,, 21	At moorings in Bombay Harbour preparing for sea, taking in stores, &c., for Karachi.
,, 22	,, 25	Left Bombay for Karachi, arriving 25th.
,, 26	June 9	Lying at moorings in Karachi Harbour.
June 10	,, 25	Left Karachi and repaired 3 faults in Gwadur-Jashk Gutta-Percha Cable, and returned to Karachi.
,, 26	July 28	Lying at moorings in Karachi Harbour, coaling and preparing ship for sea, taking in cable, &c.
July 29	August 11	Left Karachi, repaired 3 faults in Jashk-Bushire Gutta-Percha Cable and returned to Jashk.
August 11	,, 17	Left Jashk to repair a fault in the Jashk-Gwadur Gutta-Percha Cable off Ras Gudim. After completing repairs, left for Muskat for coal and provisions, arriving Muskat 17th.
,, 18	,, 23	After coaling, left Muskat and repaired a fault in the Jashk-Bushire Gutta-Percha Cable, and arrived at Gwadur, where orders were received to proceed to repair Bushire and Fao Cable.
,, 23	September 2	Left Gwadur, repaired Bushire and Fao Cable, and arrived Jashk, 2nd September.
September 3	,, 7	Repaired a fault south of Ras Peshkhan in Gwadur-Jashk Gutta-Percha Cable and one fault in the Karachi-Gwadur Section, south of Astola Island, and returned to Karachi.
,, 8	October 20	Lying at moorings in Karachi Harbour, overhauling engines, coaling ship, taking in cable, &c.
October 21	,, 30	Left Karachi for Persian Gulf to repair the Jashk-Bushire and the Bushire-Fao Sections, and arrived at Bushire.
,, 31	,, 31	Repairing fault in the cable, 14 miles west of Bushire, and in the evening retured to Reshire.

Statement of work done by Her Majesty's I. M. S. "Patrick Stewart" during the year 1885-86—continued.

Date. From		Date. To		Particulars.
1885.		1885.		
November	1	November	1	Lying at anchor off Reshire.
,,	2	,,	6	Left Reshire, repairing 2nd fault in the Bushire-Fâo Cable.
,,	7	,,	7	At Bushire coaling ship, &c.
,,	8	,,	13	On passage from Bushire to Jashk, placing mark buoys and sounding for line of new gutta-percha cable.
,,	14	,,	15	Arrived at Jashk and repairing India-rubber shore end.
,,	15	,,	20	On passage from Jashk to Bushire, piloting the vessels *International* and *Dacia* engaged in submerging the new Jashk and Bushire Cable.
,,	21	,,	26	At anchor in Bushire Harbour, overhauling engines, coaling ship, &c.
,,	26	,,	27	Left Bushire and arrived at Fâo.
,,	28	,,	28	At anchor 6 feet above Fâo, watering ship, &c
,,	29	,,	30	Left Fâo and arrived at Bushire.
December	1	December	3	Left Bushire and repaired a fault in the new Jashk-Bushire Gutta-percha Cable and returned to Bushire.
,,	3	,,	12	Left Bushire, and on passage picking up mark buoys, some 60 or 70 miles off old gutta-percha and arrived at Gwadur.
,,	13	,,	15	Employed repairing Gwadur and Jashk Section in Gwadur West Bay.
,,	15	,,	17	Left Gwadur and arrived at Karachi.
		1886.		
,,	18	January	7	Lying at moorings in Karachi Harbour, overhauling engines, &c.
1886.				
January	8	,,	16	Left Karachi for Persian Gulf, and after calling at intermediate stations arrived at Bushire.
,,	17	,,	18	At Bushire.
,,	19	,,	20	Left Bushire and repaired a fault in the India-rubber cable 100 feet from Bushire.
,,	20	,,	26	Left to repair a fault and to renew part of the Bushire-Fâo Section.
,,	26	,,	27	Left for, and arrived at, Bushire.
,,	28	,,	28	At anchor at Bushire.
,,	29	February	9	Left for Busreh with Political Resident, Persian Gulf, on board, calling *en route* at Kharg Island, Koweit, Fâo, and Mahammerah and returned to Bushire.
February	10	,,	28	Coaled ship and left Bushire for Reshire, Lingah, and for fault in the India-rubber cable, south of Henjam Island, &c.; arrived at Lingah and left to repair a fault in the India-rubber cable; after completing the repairs and picking up some old gutta-percha cable arrived at Jashk and left for Muskat.
March	1	March	2	Arrived at Muskat, coaled and provisioned the ship.
,,	2	,,	7	Left Muskat, and after calling at Charbar and the intermediate stations and repairing a fault in the Gwadur-Karachi Cable, 25 feet west from Ormara, arrived and anchored off Karachi.
,,	8	,,	26	Lying at moorings in Karachi Harbour, overhauling engines, taking out cable, &c.
,,	27	,,	31	Proceeding from Karachi to Bombay, arrived there 31st.

KARACHI,
19th June 1886.

B. FFINCH,
Director, Persian Gulf Telegraphs.

APPENDIX F.

INDO-EUROPEAN TELEGRAPH DEPARTMENT.

PERSIAN GULF SECTION.

Administration Report of the Engineer and Electrician, 1885-86.

The lengths of the various sections on the 31st March 1886 were as follows:—

	Knots.
Fâo-Bushire Gutta-percha	152·38
Bushire-Jashk Gutta-percha, new	519·30
Jashk-Gwadur Gutta-percha	266·94
Gwadur-Manora Gutta-percha	271·94
Karachi-Manora (3) Gutta-percha	17·67
Bushire-Jashk India-rubber	500·76
Total ..	1,728·99

This shows an increase of 5·89 knots on last year's lengths. The new Bushire-Jashk Gutta-percha cable is 12·12 knots longer than the abandoned cable over this section, while the Jashk-Gwadur Section has been shortened during one repair by 6·39 knots. The length of the Fâo-Bushire cable has also been slightly decreased by a late renewal, while the India-rubber cable and the Gwadur-Manora Section were slightly lengthened by various repairs.

CHARTERING OF A STEAMER FOR REPAIRING DUTY.

The cable steamer *Patrick Stewart* met with an accident on the 5th April last year, a day after leaving Karachi to repair several faults in our system of cables, which had occurred while the ship was away laying the new Ceylon Cable. She had, in consequence, to be towed to Bombay for repairs. Two of our sections were totally interrupted, and communication with Europe by the Persian Gulf route entirely depended on the India-rubber cable between Jashk and Bushire, which had already shown signs of serious deterioration.

On the representations of Mr. Ffinch, the Director of this Department, Government sanctioned the chartering of a steamer to effect the necessary repairs, and the British India Steam Navigation Company's steamer *Comilla* was selected and arrived from Bombay on the 14th April 1885.

Many alterations were found to be necessary before she could proceed to sea; several stanchions had to be removed, the decks strengthened, and all the holds fitted with platforms. A tank was built up in her main hold, and all the deck machinery from the *Patrick Stewart* fitted. After doing all this, 27·6 knots of cable were taken on board, and she was able to leave on the 20th April, returning to Karachi on the 15th May, after repairing no less than 8 faults, without the slightest hitch.

Considering that this was our first experience in repairing faults in our cables with a chartered steamer, the result must be considered as highly gratifying and reflecting credit on all concerned.

Captain Bishop rendered valuable services in superintending the fitting up of the steamer and in manipulating her during the repairs to the cables.

ELECTRICAL CONDITION OF THE CABLES.

Appendix A.

The insulation of the Fâo-Bushire Section has been considerably improved by the renewal of 30 knots of cable in January last.

A small fault in the new Bushire-Jashk Gutta-percha cable has reduced the insulation resistance by about one-half; while the other three deep-sea sections show a low insulation on account of minute partial earth faults.

These faults have too high and variable a resistance for accurate localization, and I am loath to break the defects down by the application of a powerful battery current, as with such old cables as ours, having so many joints, a powerful current might develop other defects, none of the present ones interfering with the working in any way.

FAULTS AND INTERRUPTIONS.

Appendix B.

Of the 31 faults which were repaired during the last official year, three were found on the beach at Jashk and Bushire, while the remaining 28 were cut out at sea in 25 repairs. Some of the faults being close together, I was enabled on three occasions to remove 2 faults during one repair.

One circuit from Karachi to Bushire was available for traffic during 354 days. A second circuit was working for over 8½ months, while communication by our system was totally interrupted for 11 days only, through both Persian Gulf cables failing simultaneously—a very satisfactory result, when we consider the state of the old Bushire-Jashk Gutta-percha cable up to the 20th November 1885, when the new cable was opened for traffic.

Repairs.

To execute the 25 repairs at sea the cable steamer *Patrick Stewart* made six trips, during which she steamed about 11,500 miles.

While the cable steamer was under repair in Bombay, one repairing trip was made in the hired steamer *Comilla* during which she steamed over 2,509 miles.

Myself and Engineering staff were absent from head-quarters on repairing duty 200 days.

Of the 147 miles of cable disturbed in the various repairs and the renewal of part of the Fâo Section, 28 per cent. had to be left on the ground as too weak to be lifted, 18 per cent. was stripped for the core, a part of which can be re-made into cable, while 24 per cent. was found good enough to re-lay after repair.

Of the 7·29 knots of India-rubber cable recovered in the various repairs in this section only 1·132 knots proved to be sufficiently good for re-taping, the rest being only fit for stripping, the guards being badly decayed and the core full of minute faults.

Expenditure of Cable and Cable in Stock.

Appendix C.

A total quantity of 140·04 knots of cable was expended during the year, of which 29·89 knots were used in a partial renewal of the Fâo cable, leaving 110·15 knots laid in 24 repairs, or 4·59 knots per repair. This expenditure compares very unfavourably with that of the previous year, namely, 2·1 knots per repair, but considering the age and decayed state of our cables, and that I had to expend 15 knots over one repair, 23 knots over another, and nearly 15 knots over a third, where the cable was too weak and too deeply buried to bear lifting anywhere near the fault, this expenditure will not appear excessive, especially bearing in mind that of the total quantity of cable recovered in the repairs as much as 36 knots were found sufficiently good for re-laying.

The cable in stock at the close of the year under review amounted to 117·121 knots. This includes part of the cable recovered from the old Bushire-Jashk Gutta-percha Section, which has been repaired and re-taped, and which will be used in completing the renewal of the Fâo-Bushire Section.

Extract from the History of the Cables during 1885-86.

Bushire-Jashk new Gutta-percha Section.

The Government having sanctioned a new gutta-percha cable between Jashk and Bushire, on account of the bad state of the old gutta-percha cable in that section laid early in 1864, the cable was manufactured at Silvertown, brought out by the cable ships *Dacia* and *International* and successfully submerged between the 15th and the 20th November last, under the supervision of Sir John Bateman-Champain, the Director-in-Chief, and Sir Henry Mance, the Engineer and Electrician, assisted solely by members of the staff of this Department. The electrical condition of the cable after submersion was better than when it left the factory.

Unfortunately a defect developed on November 28th, only a few days after submersion. This was cut out on December 2nd. The iron guards and serving over the fault were found to be in perfect order, but the percha had been pierced by some foreign substance. The piece of core containing the defect was sent to the Director-in-Chief, and was carefully dissected in London, but no definite conclusion as to the origin of the defect was arrived at.

A second defect of very high resistance showed itself on the 28th December. I have not yet succeeded in localizing this fault, as on application of a current it at once seals up. As shown in Appendix A, the electrical condition of the whole length on the 31st of March was very fair, and the working remains excellent.

This cable was interrupted for eight hours during the repair of the first fault.

Of the total length of cable brought from England, only 510·26 knots of deep-sea, and 8·74 knots of shore-end, cable, were submerged; the remainder, 9·736 knots of deep-sea, and 1·248 knots of shore-end cable was added to our stock for repairs and renewals of the other sections.

Old Bushire-Jashk Gutta-Percha Section.

Fourteen faults occurred in this section between the 1st April and the 28th October 1885, when it was finally decided to abandon this cable, for these reasons; that the new cable would be submerged in about three weeks, and that the repair of one fault commenced on the 26th October would have necessitated an expenditure of 10 knots of new cable.

Only 11 out of the 14 faults had therefore been repaired on the date of the abandonment, but several more breaks were found to exist when we picked up a part of the cable during the last few months.

The interruptions on this section up to the 20th November 1885, the date on which communication was established on the new cable, amounted to 101 days.

Of this section, I have, up to date, recovered 109 knots, most of which is cable manufactured at Manora and inserted in the various repairs since 1881, and of which 80 miles are being jointed up and re-taped at our Manora factory, and will be laid in the renewal of the Fâo-Bushire Section next month.

A length of over 200 knots of this cable had, up to lately, not shown a single defect since its submersion in 1864, and I had indulged in the hope that this portion would remain intact for an indefinite time; in fact so long as the gutta-percha did not perish, which this insulating material has shown very little sign of doing in deep water. I am therefore greatly distressed at the fact of a rupture of the conductor having lately been discovered by tests from Bushire. This rupture is situated about 60 knots inside the portion of undisturbed cable.

It is clear therefore that none of this cable can be trusted any longer, and it will be safer to take up every piece we can recover and use it by re-taping the good lengths and stripping and re-making into new cable such other lengths of core as have the iron guards decayed. I shall, however, on my next trip up the Gulf examine the condition of the cable near this fault, after which I shall be in a better condition to recommend what is best to be done.

Fâo-Bushire Section.

This section showed 5 faults during the year under review, 4 of which were caused by corrosion of the iron guards and one by a small hole in the percha, probably bored by a torpedo, as the guards here were found in perfect order. The interruptions amounted to 115 days, of which 29 days are due to the fact of the repairing steamer *Patrick, Stewart* breaking down on her way to this repair and the consequent chartering of a private steamer. Again an interruption of 49 days was caused by the ship not having been sent up specially for the repair of this cable, as she had to go up later for the survey of the ground for the new cable. The last interruption of 28 days was caused by our waiting to complete the manufacture of a length of new cable to renew the worst part of this section.

The renewal of the greater part of the Fao-Bushire Section having been decided on, I inserted 30 miles of new cable in January, and hope to renew another 100 miles next month which will, I trust, ensure an entire freedom from interruptions on this section for many years to come.

Bushire-Jashk India-Rubber Cable.

Eight defects occurred on this section during the year, of which 2 were caused by the decay of the insulating material on the beach at Jashk and Bushire, 2 by a corroded wire having pierced the India-rubber, 1 by a chafe on rocks, and 3 by corrosion of the guards causing the rupture of the conductor.

The total interruptions on this section amounted to 35 days during the year.

A small partial earth fault was discovered during the last repair in this section on the 20th January last, which has not yet been repaired, but which will be cut out on the *Patrick Stewart's* next journey. The working on this section continues good.

Jashk-Gwadur Section.

Of the 4 faults cut out in the last year, 2 were caused by corrosion of the guards, 1 by a chafe on a rock, and one was not recovered, its cause is therefore unknown.

The interruptions on this section amounted to 70 days, of which 50 days are due to the monsoon swell setting in during a repair, which had therefore to be suspended for that period. As the Mekran land lines worked well during this time no interruption to the traffic was caused.

Gwadwur-Manora Section.

Only two partial earth faults were cut out of this section during the year. Of these, one was not recovered, the other was caused by a chafe.

The total interruption amounted to only two days, while the two repairs were being executed. A small fault still remains in this section, which has not as yet been localized on account of its high and variable resistance. The working continues good.

Harbour Cables.

Appendix D.

Two total breaks caused by Bugla's anchors, and one partial earth fault due to decay of percha were repaired during the year. The interruptions lasted for 3 days only, but caused no inconvenience, as only one cable was interrupted at a time.

Parts of cables Nos. 1 and 2, in Baba Creek, between boxes 8 and 9, were renewed with new cable made of 2nd class core, and all three lines were renewed with hemp-served core between boxes 1 and and 2. Some of the other sections will be renewed shortly with new cable, and before 3 months I hope to have all the three cables between Camp and Manora in a reliable state.

Cable Houses and Land lines to Offices.

A portion of the beach in the East Bay at Gwadur was washed away, during some heavy storms during the last monsoon, to the extent of over 20 feet, and the sea at one time approached the cable-house at high tide to within 4 feet. A considerable drift of sand has, however, taken place since then, filling up several feet more to seaward, so that I apprehend no danger to the cable-house for the present.

Two of the cable boxes between Karachi and Manora have appreciably subsided and will have to be heightened a foot or so.

The cable land-line at Jashk, blown down by a hurricane on the 30th March 1885, has been re-erected and strengthened by double line of iron posts being bolted together, and it is now perfectly safe.

All the other land-lines in connection with the cables are in good order.

Mechanical condition of the Cables.

The soil at the bottom of the sea between Jashk and some distance beyond Bushire is largely impregnated with chemicals inimical to the preservation of iron, and to this cause is due the rapid deterioration of the cables over this part of our system. The cable is found in better preservation the farther it is laid away from the Persian Coast, and the new gutta-percha cable between Jashk and Bushire has been submerged much farther from that Coast than the previous two cables.

The section from Karachi to Jashk is found in much better order than the cable farther west, especially where it was laid in deep water. I picked up some 20 miles of cable last year about 130 miles east of Jashk. Of this length, about 13 miles were recovered in from 75 to 120 fathoms, and this part was found to be in excellent order and has been re-laid after being re-taped.

The India-rubber cable has entered the 17th year of its existence, and is now of about the same age as that of the old gutta-percha cable when the latter commenced to give us trouble. Judging from the appearance of the lengths of this cable recovered in late repairs I am very much afraid that this section will also develop many faults within the next few years.

Manora Cable Factory.

The remaining space between the works and the Harbour groyne has been filled in during the past year, thus giving us large additional storage room.

On part of this ground a shed has been erected for the housing of tape serving and pitch which is now sheltered from the sun and weather, and consequently is not so liable to deterioration.

The defect in our large factory boiler was repaired last year, and we have used only fresh water during the whole year, with the most satisfactory results, no other flaw having shown itself.

On account of the great amount of work to be done in our factory in the future, it has been deemed advisable to supply a second boiler, so that a possible defect in the old one should cause no stoppage of work. The new boiler has been sanctioned, and I hope to receive it shortly.

The amount of work got through in the factory at Manora has been by far the largest of any year since its establishment, as will be seen from the following figures:—

	Knots.
Cable manufactured	96·73
Cable repaired and re-taped	55·99
Cable stripped for the core, of which, however, only 45 knots were found good enough for re-making into cable	93·00
Total passed through the Factory	245·72

When we consider the small expense incurred in hiring extra labour, and that no increase has been made in our permanent establishment, I think I am justified in considering the above result a subject for congratulation.

Working and Testing.

No changes in the methods of working and testing have been found necessary. The average distance between the assumed and actual position of faults, amounts to half a knot. This slight increase on the previous year's average has been caused by my being 4·25 knots out in my estimate of the distance of 1 fault, at a time when there were 3 other faults to be repaired in the same section. Had it not been for this occurrence the average would have been as low as that of previous years.

Concluding Remarks.

Until lately it has been the invariable practice simply to repair each fault as it occurred, with as small an expenditure of cable as possible, and only sufficient cable was manufactured by us to effect these repairs.

The Bushire-Jashk Gutta-percha Section showed the greatest amount of deterioration, and fault followed fault at last so rapidly that our resources were stretched to the utmost to keep up communication, and in the end a length of over 500 miles of new cable had to be got out from England, at a great expense, to renew this section.

The old system has now, I am glad to say, been abandoned, and our watchward for the future will be "renewal". I have lately inserted 30 knots of new cable in the Fâo Section, and purpose next month to insert another 100 knots of good cable, partly new and partly re-taped at Manora. The remaining 23 knots lie in soft mud at the Fâo end and are, I think, reliable. Should this length, however, develope faults, I shall at once proceed to renew it also.

The experiment of last year, of what we can do in our Manora Factory, makes me confident that I shall be able not only to repair all faults as they occur, but to renew the remaining old sections at the rate of 150 miles a year, if Government will only sanction sufficient material for the purpose, so that in a few years I hope to be able to renew the whole of our older sections with cable repaired and manufactured locally.

In conclusion I cannot omit to express my high sense of the valuable assistance rendered me by Mr. Andrews, my Electrical Assistant, in repairing operations and in superintending the manufacture and repairs to cable in our Manora Factory during several periods of my absence in the Gulf. The Cable Foremen and Jointers also performed their duties at all times with their usual ability.

Karachi, *1st May 1886.*

FORT WILLIAM,
The 3rd March, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 2nd MARCH 1887.

General Remarks.—The week under review has been rainless.

No reports have been received from Madras and Coorg.

The *rabi* harvest is now in progress in Bombay, Bengal, the North-Western Provinces and Oudh, the Central Provinces and in Berar and Hyderabad; the crops are generally in excellent condition, and a good outturn may be anticipated. In the Punjab the prospects of the *rabi* are unfavourable generally throughout the Province owing to the absence of rain, which is urgently needed. In Central India and Rajputana crop prospects are generally good, though injury from frost in Mewwar and Kerowli is reported. In Mysore the outlook is favourable.

The spring rice is being transplanted in Bengal and the land is being ploughed for the early rice there and in Assam where sowings have commenced.

Poppy is in flower in Bengal. In the North-Western Provinces and Oudh the collection of opium has just commenced and the crop promises well.

The sugarcane harvest continues in Bengal, the North-Western Provinces and Oudh and Assam.

Scarcity of fodder is reported from parts of Dharwar in the Bombay Presidency and from Shahpur in the Punjab.

The public health is generally satisfactory.

Prices are fluctuating in the North-Western Provinces and Oudh, are still rising in the Punjab and some States in the Rajputana Agency, and are also high in Jabalpur in the Central Provinces. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—(March 2nd).		
Karachi . . .	*Nil*	Weather seasonable. River at Kotri on 25th February 3 feet 2 inches against 4 feet 5 inches on same date last year. *Rabi* crops injured by *mahl* insect in Karachi taluka. *Rabi* harvesting commenced in Tatta taluka. Fever in seven talukas, one case smallpox in Karachi. Wheat, red rice and *bajri* in Karachi, 23, 30, and 32 and in Sujawal 24, 48 and 40 pounds per rupee respectively.
Hyderabad . . .	*Nil*	*Kharif* harvesting still continues in two talukas. *Rabi* cultivation injured by frost in eight talukas. Fever in three and cattle-disease in two talukas. River at Kotri on 28th 3 feet against 4 feet 1 inch on same date last year. Wheat 22, *bajri* 38, *jowari* 40, white rice 20, and red rice 30 pounds per rupee.
Ahmedabad . .	*Nil*	Reaping of *rabi* crops continues. Slight fever and smallpox in Sanand taluka. Wheat 28 and *bajri* 32 pounds per rupee.
Baroda . . .	*Nil*	Public health good. Cattle-disease in Kalol. *Bajri* 31, wheat 18 and rice 24 pounds per rupee.
Surat	*Nil*	Crops generally good. Fever and smallpox in Bardoli and fever in Mandvi taluka. *Jowari* 39 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	Weather increasing in warmth during day time. Reaping of *rabi* crops commenced in places. Smallpox has made its appearance in one taluka (Sinnar) and fever in two talukas (Sinnar and Chandor). Public health good. Wheat 25⅞, *bajri* 36 4/16, and rice 20 3/16 pound per rupee.
Colaba (Bombay) .	*Nil*	Abnormal temperature *nil* on 23rd, 24th, and 28th and 1° cool on other days. Vapour in air in excess of normal on all days. Wind normal.
Poona	*Nil*	Wheat slightly injured by blight in Sirur, Bhimthadi, Haveli, and Mawal talukas. Reaping of *rabi* in progress. Public health generally good. Slight cattle-disease in Haveli taluka. *Bajri* 43 and *jowari* 59 pounds in the district, and *bajri* 37 and *jowari* 42 pounds per rupee in Poona city.
Ahmednagar . .	*Nil*	Reaping of *rabi* crops in progress. Health fair. *Bajri* 56 and *jowari* 66 pounds per rupee.
Sholapur . . .	*Nil*	Reaping of *kharif* and *rabi* crops in progress. Public health good. *Jowari* 67 1/14 and *bajri* 55 7/8 pounds per rupee.
Dharwar . . .	*Nil*	Harvesting of wheat and gram in progress. Exotic cotton blighted in seven talukas. Scarcity of fodder in Navalgund and of drinking water in Kod taluka. Public health generally good. Rice 25½ and *jowari* 59½ pounds per rupee.
Kanara . . .	*Nil*	Second crop rice and pepper harvest continue. Slight fever in two and cattle-disease in one taluka. Public health generally good. Weather hot and cloudy. Common rice in Karwar and in district 13 seers per rupee.
Rajkot . . .	*Nil*	Weather hot. Measles in Rajkot, Porbandar, and Bantva. Wheat 24, *bajri* 24, and *jowari* 35 pounds per rupee.
General Remarks.—Reaping operations in progress in fourteen districts. Scarcity of fodder and of drinking water in parts of Dharwar. Fever in parts of eleven, cattle-disease in parts of six, and smallpox in parts of five districts.		

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—(Mar. 2nd)		
Chittagong (Mar. 1st)	0·65	Weather seasonable. State of winter crops good. Prices steady A few sporadic cases of cholera Public health good.
Dacca . . .	*Nil*	Prospects of crops good. Planting of *boro* paddy nearly completed. Mustard has been gathered. Public health good.
24-Pergunnahs . .	*Nil*	Weather unsettled, but growing warmer daily. *Rabi* harvest nearly over. Coarse sugar still being manufactured. Ploughing goes on. Public health improving.
Khoolna . . .	*Nil*	Weather getting warm. *Aman* harvest over; outturn satisfactory Prospects of winter crops favourable. Transplanting of *boro* rice continues. Public health good.
Moorshedabad . .	*Nil*	Weather getting warmer, but still fairly cool. State of *rabi* crops good. Sugarcane-pressing going on. Mango prospects bad in Lalbagh. Public health good.
Pubna . . .	*Nil*	Weather cloudy. Strong east wind. Crops and public health good.
Dinagepore . .	*Nil*	Weather fair and warm. State of *rabi* good. Cholera reported from Berail outpost, and cattle-disease from Hemtabad, Pemtolla, and Kaliagunj.
Rungpore . . .	*Nil*	Ploughing for *aus* and jute continues. Public health good.
Midnapore . .	*Nil*	Hot weather setting in. Outturn of *rabi* somewhat short. Cultivation of *boro* rice still continues. Public health fair.
Burdwan . . .	*Nil*	Weather much warmer. *Rabi* harvest continues; outturn good. Public health fair.
Bhagulpore . .	*Nil*	Weather warm in day time. Prospects of *rabi* crops favourable. Ploughing in progress. Public health good.
Monghyr		Poppy prospects continue fair. Collections have generally begun.
Purneah . . .	*Nil*	Crops promise well. Mustard harvest over. Tobacco being gathered. Health of people and cattle fair. Rivers low.
Durbhanga . .	*Nil*	*Rabi* crops ripening and prospects good. Mustard and peas being gathered. Poppy in flower. Indigo sowings commenced. Prices stationary. A few cases of smallpox in Tajpore; public health otherwise generally good.
Mozufferpore		Poppy plants coming into maturity, and there is every prospect of a good outturn.
Sarun		Prospects of poppy good. Lancing of capsules begun.
Chumparun . .	*Nil*	Prospects of *rabi* continue favourable. Poppy plants flowering. Prices stationary. Public health fair.
Patna . . .	*Nil*	Prospects of *rabi* and poppy fair. Mustard and peas being harvested. Collection of opium commenced. Public health generally good.
Gya	*Nil*	*Rabi* and poppy pretty good. Public health good.
Shahabad		Poppy prospects have improved. Collection of opium commenced; produce good.
Hazareebagh . .	*Nil*	Weather seasonable and getting warm. *Rabi* being reaped with good outturn. Poppy good; capsules being lanced Small pox reported in two thanas; otherwise general health good. Cattle-disease still prevails.
Cuttack . . .	*Nil*	Weather warm. *Rabi* crops being gathered. *Dalua* rice growing well. Price of rice unchanged. Public health generally good.
		General Remarks.—A shower reported in Chittagong; elsewhere no rain. Weather is generally becoming warm. Early *rabi* crops and sugarcane are being harvested with good outturn. General prospects of poppy are fair; plants are in flower, and in some places capsules are being lanced and collection of opium has begun. *Boro* rice is being transplanted. Ploughing for early rice and jute is in progress. General health good.
N.-W. Provinces and Oudh—(Mar. 2nd)		
Benares (March 1st)		The days are now beginning to get warm, but the mornings and evenings are still pleasant. *Rabi* crops doing fairly well. Peas being cut; average outturn expected. Poppy prospects very good. Markets well stocked. Prices steady. The public health is generally good, but cases of cholera are reported from the city. There is no cattle-disease in the district
Gorakhpore (Feb. 28th)		Weather cloudy. *Rabi* looking well. Reaping of rape seed nearly finished; outturn average. Prices stationary. Health fair.
Fyzabad (Mar. 1st)		Weather seasonable. *Rabi* crops generally good. Poppy crop excellent. Supplies sufficient. Prices continue high. Health good.
Lucknow (Feb. 28th)		*Rabi* crops ripe in places. Poppy in flower. Markets well supplied Prices varying. Public health fair. No cattle-disease.
Rai Barelli („ „)		Weather clear and getting warmer. Wind westerly. Injury to *rabi* crops from frost and blight; otherwise the prospects are favourable. Prices rising. General health of people and condition of cattle good.
Pertabgarh (Mar. 1st)		Wind westerly. Barley and peas being cut. Prospects of the poppy crop good. Collection of opium commenced. Prices stationary. Health of people and cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N. W. Provinces and Oudh—*contd.*		
Allahabad (Mar. 1st)	*Nil*	Weather getting warmer daily. Peas, linseed, and *masur* being harvested. Wheat and barley ripening, some injury reported from frosts of December and January; otherwise crops promise well. Markets fully supplied. Prices steady. Health generally good, only slight fever reported in the south.
Cawnpore („ „)		Weather seasonable. *Rabi* in good condition. Poppy mostly in flower. Opium collecting begun in some villages. Prices slightly risen.
Farakhabad („ 1st)	*Nil*	*Rabi* crops doing well. Prices rising except *arhar*, peas, and gram. Health good.
Sitapur („ 2nd)		Dry and warm weather prevails. Poppy is healthy and strong. Prospects continue favourable.
Bareilly („ . 1st)		Crops in excellent condition. Prices rising all round. Health of men and cattle good.
Ballia (Feb. 28th)		Sky clear. Weather getting warm. Reaping of *rabi* crops commenced. Cane-pressing nearly finished. Poppy in good condition. Markets steady. Public health good.
Kumaon (Mar. 1st)		Weather fine and warm. *Rabi* crops making good progress. Prices stationary. General health fair. Fever in some parts. Cattle-disease continues.
Agra (Feb. 28th)	*Nil*	Weather getting warmer. Prices rising. Health good.
Jhansi („ „)		Weather getting warm. *Rabi* looking well. Poppy plant in excellent condition. Prices unchanged. Health good.
Banda (Mar. 1st)	*Nil*	Weather getting warm. Gram being harvested in parts. Prices steady. Public health good. Cattle-diseases in two villages.
Meerut („ „)	*Nil*	Weather much hotter. With exception of *arhar*, peas, and mustard which were injured by frost, *rabi* is fair. Prices a little easier.
		General Remarks.—Weather seasonable. *Rabi* crops are in excellent condition everywhere. Harvesting operations have begun in some places. Poppy crop promises well. Markets are well supplied. Prices are fluctuating. Public health good. Slight cattle-disease reported in a few districts.
Punjab—(Mar. 2nd)		
Delhi Mar. (1st)		Health good. Prices still rising. *Rabi* crops somewhat damaged by strong westerly winds.
Hissar		Rain much wanted. Health good. Prices rising.
Umballa		Health good. Prices rising. *Rabi* crops flourishing.
Jullundur		Health good. Prices very high. *Rabi* crops failing for want of rain.
Amritsar		Rain wanted. Health good. Prices stationary. *Rabi* crops suffering for want of rain.
Sialkot		Health good. Prices very high About 30 per cent. of *rabi* crops have dried up for want of rain.
Ferozepore		Health good. Prices rising. *Rabi* crops withering for want of rain.
Lahore		Health good. Prices risen. *Rabi* prospects bad for want of rain.
Rawalpindi		Health good. Prices rising. *Rabi* prospects below average.
Shahpur		Health good. Prices high and stationary. Crops suffering from drought. Fodder scarce.
Multan		Health good. Prices fluctuating. *Rabi* prospects fair.
Dera Ismail Khan		Health fair. Prices rising. Slight change for the worse for want of rain.
Peshawar		Rain much needed. Health fair. Prices almost stationary. *Rabi* prospects average.
		General Remarks.—Health good. Prices of food-grains are still rising. Rain urgently needed. Crop prospects at present unfavourable.
Central Provinces—(Mar. 2nd)		
Nagpore		Heat increasing. *Rabi* crops promise well. Fever and cattle-disease prevalent. Smallpox in Ramtek tahsil. Prices steady.
Jubbulpore		Weather unusually warm. Prospects unchanged. Health fair. Prices very high.
Saugor (Mar. 1st)		Weather clear and getting warm. Prospects fair. Health good. Prices unchanged.
Seoni		Weather clear and getting warm. Reaping of *rabi* commenced. Health good. Prices steady.
Hoshangabad		*Rabi* harvest commenced. Linseed and *tur* seriously injured. Fever prevalent. Prices unchanged.
Khandwa		Weather getting hot. *Rabi* harvest in progress. Health good. Prices steady.
Raipur		*Rabi* being gathered. Wheat ripening. Slight cattle-disease. Rice 20 and wheat 15 seers per rupee.
Bilaspur		Weather cloudy and hot. *Rabi* crops favourable. Harvest commenced. Cattle-disease prevalent. Prices stationary.
		General Remarks.—Weather getting hot. *Rabi* being harvested. Fever and cattle-disease in places. Prices high in Jabalpur. Wheat risen in Raipur.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Burma—(Feb. 23rd)		
Akyab (Feb. 19th)	. . . . .	Slight cholera in town and district.
Bassein . . .	. . . .	Public health and health of cattle good.
Rangoon . . .	. . . .	Public health and health of cattle good.
Amherst (Moulmein) .	. . . .	Public health and health of cattle good.
Tavoy . . .	. . . .	Public health and health of cattle good.
Pegu	. . . .	Public health and health of cattle good.
Henzada . . .	. . . .	Public health and health of cattle good.
Prome . . .	. . . .	Public heath and health of cattle good.
Toungoo . . .	. . . .	Public health and health of cattle good.
Thayetmayo . .	. . . .	Public health and health of cattle good.
Shwebo . . .	*Nil* (Total ·50)	Health good. Food-supply getting scarce. Prices rising. Transplanting of *mayin* commenced in parts.
Myingyan . . .	*Nil* (Total ·05)	Health good except few cases of measles. Food-supply sufficient. Prices ordinary.
Mandalay . . .	*Nil* (Total ·63)	Public health and health of cattle good. Ploughing for *mayin* cultivation finished. Food-supply sufficient. Prices normal.
Minbu (Feb. 12th) .	*Nil* (Total ·34)	Health good. Paddy nearly all in. Food-supply sufficient. Prices normal.
Yamethin . . .	*Nil* (Total ·89)	Health good. *Mayin* paddy cultivation begun.
		General Remarks.—Except some cholera in Akyab, public health of Lower Burma satisfactory. Slight cattle-disease in one district. Reports received from five districts of Upper Burma. Health good. Food generally sufficient, but prices rising in Shwebo. Spring cultivation progressing.
Assam—(Mar. 2nd)		
Gauhati . . .	·33 During week ending 1st instant.	Weather seasonable, cloudy and rainy. Public health good. Pressing of sugarcane and ploughing of land for *ahu* still in progress. Prospects of crops good.
Sylhet . . .	*Nil*	State and prospects of the crops continue good. Cattle-disease still prevalent in parts of Karimgunj sub-division.
Cachar . . .	*Nil*	Weather getting warm. Ploughing for *dumah* crops progresses. Common rice 14 seers per rupee. Four deaths from cholera from Sadr reported.
Dibrugarh . . .	·80	Weather seasonable. Sugarcane being pressed. Sowing of *ahu* commenced. Public health good.
Mysore and Coorg—(2nd Mar.)		
Bangalore . .	. . . . .	Standing crops in good condition. Prospects of season continue favourable. Public health good. Murrain prevails in parts. No material change in prices.
Mysore . . .		
Berar and Hyderabad—(Mar. 2nd)		
Amraoti . . .	. . . .	Weather clear and warm. Gathering of *rabi* crops in progress. Outturn of wheat is estimated as up to the average. Wheat 20 and *jowari* 28 seers per rupee.
Akola . . .	. . . .	Weather clear and becoming warm. Reaping of *rabi* crops progressing. Outturn of wheat is estimated at from 12 to 14 annas.
Hyderabad . .	*Nil*	Reaping of *rabi* crops continue. *Tabi* crops prospering. General health of talukas fair. Prices—wheat 14, coarse rice 11¼, white *juar* 18¾, yellow *juar* 22, and *tur* 15 seers per current sicca rupee.
Central India States—(Mar. 2nd)		
Indore . . .	. . . .	Weather warm and clear.
Morar (Gwalior) .	. . . .	Health and prospects good.
Neemuch . . .	. . . .	Weather warm. Wells drying up. Health good.
Goona . . .	. . . .	Weather warm. Health and prospects good.
Sutna . . .	. . . .	Weather seasonable. Health good.
Agar . . .	. . . .	Opium prospects fair. Health good.
Sehore . . .	. . . .	Weather getting warm. Opium and cereal crops fair.
Nowgong . . .	. . . .	Weather seasonable. Prospects fair. Crops slightly injured by blight. Health good. Prices steady.
Bhopawar . . .	. . . .	Weather getting hot. Prospects good. Prices rising. Health good.
Rajputana—(Mar. 2nd)—		
Abu (Mar. 2nd)	*Nil*	Weather windy and warmer. Health good. Prices rising.
Marwar (Feb. 21st)	*Nil*	Tanks half full. Health good. Smallpox prevails to some extent. Crops good. Cold disappeared. Prices stationary.
Kherwara („ 27th)	*Nil*	Tanks and wells drying. Crop prospects fair. Health good Prices rising. Weather warm.
Pertabgurh („ 26th)	*Nil*	Tanks low. Health good. Wheat 12½, *mucca* 25½, and gram 25 seers per rupee.
Meywar („ „)	*Nil*	Tanks and wells unchanged. Crops greatly damaged by frost. Health good. Prices rising. Weather fair.
Harowti („ „)	*Nil*	Gram being harvested. Prices risen. Health good.
Jhallawar („ 28th)	*Nil*	Weather warm. Health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—*contd.*		
Kotah (Feb. 26th)	*Nil*	Health good. Weather warm and cloudy. Prices fluctuating.
Ajmere (Mar. 1st)	*Nil*	Weather hot. Smallpox in parts of Ajmere district. Cattle-disease in Merwara still prevalent. Wheat 22, barley 44, gram 74 pounds per rupee.
Jeypore („ „)	*Nil*	Weather warm.
Kerowlee (Feb. 26th)	*Nil*	Tanks and wells drying. Crops damaged by frost. Health good. Prices rising. Weather favourable.
Dholepore („ 20th)	*Nil*	Tanks and wells drying. Crop prospects average. Health good. Prices stationary. Weather warm.
Bhurtpore (Mar. 1st)	*Nil*	Health good. Crops good. Prices rising. Weather warm.
Ulwur („ „)	*Nil*	Crop prospects fair. Health good. Prices steady.
Nepal—(Feb. 24th)—		
Katmandu (Feb. 25th)	Drops	Weather unsettled. Prospects fair. Prices high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 26th February 1887.

A little rain has fallen during the past week, and the sky has been, on the whole, more cloudy than during the preceding week, but generally the weather has been quiet and settled.

The barometric pressure has fallen greatly throughout India, a change partly due to the increased temperature, but its relative distribution has undergone comparatively little change; the seat of highest pressure having held steadily in the north-west up to nearly the end of the week. The winds of Northern India have been, as in the preceding week, westerly and dry in Northern India. In the Peninsula, owing to the increased head an indraught was established towards the central plateau and westerly winds, at least during the day, have more or less replaced the easterly current which blew during the greater part of the previous week. At the hill stations in the Himalaya and also at Mt. Abú the pressure slightly exceeded the normal average of the month.

The temperature has become excessive in nearly all parts of India. This excess is greatest (8°) in the North-Western Provinces, Sind and Cutch, and least (0·6°) in the Carnatic. In Arakan and Pegu the rise has been less felt. The maximum temperature of the day was considerably over 90° on several days in Southern and Central India, and 100° was recorded at Sholapur on the 24th and at Cuddapah on the 25th.

The humidity in the atmosphere has been almost everywhere below the normal average, the only exceptions being Bengal and Burma, where there was an insignificant excess.

There were showers at Quetta, Dera Ismail Khan, Peshawar and Murree on the 20th, and at Rawalpindi, Sealkot and Simla on the following day. Another very slight shower of rain occurred on the North-West Himalaya on the 24th. A few drops fell at Sibsagar on the 22nd and 24th and heavier rain at Sibsagar, Darjeeling and in Eastern Bengal on the 26th. In Orissa, the Central Provinces and the whole of the Indian and Burmese Peninsulas the weather was rainless throughout.

The following table shows the progress of the seasonal rainfall in Northern India from November 1st, 1886, up to the present date (February 26th) :—

Stations.	Normal.	Actual.	Difference.
Multan	0·79	0·64	—0·15
Peshawar	4·03	0·90	—3·13
Murree	6·41	7·54	+1·13
Rawalpindi	6·00	3·97	—2·03
Lahore	2·29	0·56	—1·73
Simla	3·84	7·24	+3·40
Delhi	1·98	2·40	+0·42
Masuri	6·27	7·67	+1·40
Roorkee	4·07	2·99	—1·08
Meerut	2·47	2·68	+0·21
Bareilly	2·25	3·30	+1·05
Agra	1·08	1·06	—0·02
Lucknow	1·29	1·04	—0·25
Allahabad	1·30	4·31	+3·01
Darjeeling	1·88	2·45	+0·57
Calcutta	2·36	1·49	—0·87

The following figures give the differences of the barometric, thermometric and humidity means of the week from the corresponding general averages of the month. Pressure was below the average in all districts, the greatest deficiency being in Behar. The temperature; on the other hand, was generally above the normal, while the relative humidity was below the average except in the districts of Behar, Northern Bengal and Burma.

Districts.	Difference of Barometer from normal, February 20th—February 26th.	Difference of Temperature from normal, February 20th—February 26th.	Difference of Humidity from normal, February 20th—February 26th.	Total Rainfall in week, February 20th—February 26th.

HOME DEPARTMENT.

GOVERNMENT SCHOLARSHIPS TENABLE IN ENGLAND BY NATIVES OF INDIA.

No. 1/57—69.

Extract from the Proceedings of the Government of India in the Home Department (Education),—under date Calcutta, the 11th March 1887.

READ again the undermentioned papers on the subject of the creation of certain Government scholarships tenable in England by natives of India :—

Home Department Resolution, Nos. 1—45-57 and 9—269-281, dated 12th February and 23rd August 1886, respectively.

Despatch to Her Majesty's Secretary of State, No. 7, dated 11th September 1886.

Telegram from Secretary of State, dated 22nd September 1886.

Read also—

Despatch from the Secretary of State, No. 128, dated 16th December 1886.

RESOLUTION.

BY Home Department Resolution dated 12th February 1886, cited in the preamble, it was announced that six State scholarships of the value of £200 each per annum, tenable for three years in England by persons who are natives of India within the meaning of section 6 of the Statute 33 Vic., Cap. 3, would be placed at the disposal of the Universities of Calcutta, Bombay, Madras, and the Punjab in rotation, one scholarship being given to each of the first two Universities during 1886 and one scholarship to each of the last two during 1887. The Government of India at the same time

directed that, in the event of any special examinations being considered necessary for the election of scholars, the examinations should be held at such a time (not later than the month of June in each year) as would afford the successful candidates a sufficient interval to complete their arrangements and to reach England before the opening of the October term at the University of Oxford or Cambridge, to one of which Universities the scholarship-holders would be required to proceed. The Government of India subsequently announced, with the approval of Her Majesty's Secretary of State, that the stipend of each scholarship-holder would be paid quarterly at the end of each quarter, and it was further directed that the scholars should be instructed to report themselves to the India Office on arrival in England.

2. One scholarship was last year placed at the disposal of each of the Universities of Calcutta and Bombay. It appears that the scholar selected by the latter University, although he arrived in England in time for the October term, did not report himself at the India Office until the very latest moment, *viz.*, the 12th of October, while the candidate selected by the former University was, owing to unavoidable causes, unable to proceed to England in time for the October term. Both the scholars, moreover, arrived in England without any formal papers for the India Office. In bringing these facts to the notice of the Government of India, Her Majesty's Secretary of State has pointed out that in future candidates selected for the scholarships in question should report themselves at the India Office before the commencement of the October term. His Lordship also considers it very important that details as to the manner in which the scholars were selected, as to the probable date of their arrival in England, and as to the choice of studies and University should reach the India Office before they arrive. The Governor General in Council desires that the Punjab Government and the Registrar of the Calcutta University will invariably arrange that this information may be supplied to the Government of India in time to enable it to comply with the requirements of the Secretary of State in the matter.

In the case of scholars selected by the Universities at Madras and Bombay, the necessary report to the India Office should be made by the Local Governments.

3. As the payment of the scholarship allowance in monthly instalments and in advance is likely to prove more convenient to the scholars and to be in other respects preferable to quarterly payments, Her Majesty's Secretary of State has directed its adoption as a rule.

4. In conclusion, the Governor General in Council deems it expedient to point out that while the scholarship allowance of £200 a year is sufficient to cover the necessary expenses of college life at Oxford or Cambridge, it is very desirable, if not absolutely necessary, that the scholars should have some small private resources of their own to enable them to meet expenses in the vacation and other general expenses which are scarcely avoidable. His Excellency in Council wishes this to be clearly explained to every candidate for the scholarship, and desires Local Governments to bring prominently to the notice of all institutions interested in the matter the fact that it is impossible for the holders of these scholarships to live with comfort in England without some private resources wherewith to supplement their scholarship allowance.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Madras, Bombay, and the Punjab for information and communication to the authorities of the Universities concerned.

Ordered also, that a copy be forwarded to the Governments of Bengal and the North-Western Provinces and Oudh, the Chief Commissioners of the Central Provinces, Burma, Assam and Coorg, and the Resident at Hyderabad for information; and to the Registrar of the Calcutta University for information and guidance.

Ordered further, that a copy be forwarded to the Department of Finance for information, and that the Resolution be published in the Supplement to the *Gazette of India*.

(True Extract.)

A. P. MACDONNELL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN BENGAL FOR 1885-86.

No. 391, Fort William, March 4th, 1887.

RESOLUTION.—By the Government of India, Public Works Department.

Read—

The Revenue Report of Irrigation Works in Bengal for 1885-86 and the Resolution thereon by the Government of Bengal, No. 1785I.A., dated 18th December 1886.

OBSERVATIONS.—At the close of the year 1885-86 the total Capital outlay including indirect charges, was as follows:—

	₹
Major Irrigation Works—	
Productive Public Works	5,86,02,070
Minor Works and Navigation—	
From Ordinary Revenues	94 29,111
„ Protective grants	7,82,000
TOTAL CAPITAL OUTLAY	6,88,13,181

Of the above sum, ₹11,23,013 was expended during the year under review.

2. The gross revenue assessed in 1885-86 on the systems classed as Productive is compared in the following table with the assessments of the three preceding years:—

CANALS.	ASSESSMENTS.			
	1885-86.	1884-85.	1883-84.	1882-83.
	₹	₹	₹	₹
Orissa	2,05,527	1,74,525	1,97,213	3,38,323
Midnapur	2,64,643	2,63,469	2,81,554	3,20,900
Hidgellee	52,455	43,507	63,590	45,032
Sone	8,92,025	12,07,514	8,61,909	6,20,354
TOTAL	14,14,650	16,89,015	14,04,266	13,24,609

There was an increase under all heads of revenue on the Orissa Canals. The decrease in water-rates on the Midnapur Canal is compensated by increased returns under Navigation and Miscellaneous. The opening of a portion of the Orissa Coast Canal caused an increase in the traffic and navigation receipts of the Hidgellee Tidal Canal. The decrease in assessments on the Sone Canals was due to favorable rainfall over the tract commanded by the Canals. The total earnings, although not so large as those of 1884-85, are in excess of those of any previous year.

3. The working expenses, including indirect charges, are detailed below :—

Canals.	Working Expenses.			
	1885-86.	1884-85.	1883-84.	1882-83.
	₹	₹	₹	₹
Orissa	3,56,672	3,29,288	3,05,530	3,55,280
Midnapur	2,18,127	2,31,803	2,23,586	2,46,502
Hidgellee	50,147	38,248	48,093	41,897
Sone	5,73,345	6,28,075	5,42,159	5,49,774
Total	11,98,291	12,27,414	11,19,368	11,93,453

Except in the case of the Midnapur Canal these maintenance charges are above the average of previous years. Considerable expenditure was incurred on special repairs to works damaged by the floods of 1885 both on the Sone and Orissa systems and for clearance of silt in the Hidgellee Canal.

4. The net assessed revenue was therefore—

Canals.	Net Assessed Revenue.			
	1885-86.	1884-85.	1883-84.	1882-83.
	₹	₹	₹	₹
Orissa	—1,51,145	—1,54,763	—1,08,317	—16,957
Midnapur	46,516	31,666	57,968	74,398
Hidgellee	2,308	5,259	15,497	3,135
Sone	3,18,680	5,79,439	3,19,750	70,580
Total	2,16,359	4,61,601	2,84,898	1,31,156

The interest charge on the Capital invested in the above works for the year under review is ₹22,66,709, which exceeds the net assessed revenue by ₹20,50,350; in 1884-85 the deficit was ₹17,51,025.

5. The following table shows the areas irrigated in the same years :—

Canals.	Acres irrigated.			
	1885-86.	1884-85.	1883-84.	1882-83.
Orissa	72,339	57,372	48,760	133,028
Midnapur	70,604	69,294	97,919	101,939
Sone	308,479	356,577	350,614	173,824
Total	451,422	483,243	497,293	408,791

There has been a decided improvement during the last two years in the area under five-year leases on the Orissa Canals. The figures are—1883-84, 46,003 acres; 1884-85, 54,241 acres, and in the year under review 65,762 acres. The area leased in 1885-86 was 71,955, but the whole area could not be assessed owing principally to the failure of an escape at Patamoondee. The Chief Engineer in paragraphs 15 and 16 of his note reports that the agitation against irrigation from these canals has entirely died out, and he details the measures that have been adopted by the Bengal Government on the recommendation of the Commission which was appointed in 1884 to enquire into the administration of the Orissa Canals. It is a matter for congratulation that the labours of the Commission have produced such early and favorable results.

On the Sone Canals, owing to timely and well-distributed rainfall, there was a falling off in the total area irrigated, but the irrigation under five-year leases has again increased from 149,185 acres in 1884-85 to 171,828 acres in 1885-86. It is mentioned that in Shahabad the area under these leases has increased 23 per cent. during the year under report. The decrease in annual leases for ordinary rabi and kharif irrigation is due entirely to the cause above stated.

There was unusually heavy rainfall in the tract commanded by the Midnapur Canal; but as nearly the whole of the irrigation is by long leases, there was no diminution in the area assessed to canal revenue.

6. The area irrigated by each cubic foot of water entering the Orissa Canals during the kharif season as reported by the Superintending Engineer varies on the different main channels from 37 to 55 acres, and of water utilized from 67 to 105 acres. On the Sone Canals the average duty of water entering the heads of the Canals during the same season is given as 80 acres.

As regards the Orissa Canals it may be remarked that they are at present irrigating an area which is much below their capabilities, and further that a large portion of the water passed into the canals is required for navigation purposes only. It is also noticed by the Chief Engineer that the duty of water on the Bengal canals is calculated on the supplies running in the months during which the crops are actually taking water: thus in the kharif season the calculations are based on the discharges of three months only and for the rabi of four months. These results are therefore not comparable with those obtained from canals in Northern India, where the duty for each season is calculated on the supplies entering the canals during six months.

7. A comparative statement of Navigation receipts is given in the following table :—

Canals.	Navigation Receipts.			
	1885-86.	1884-85.	1883-84.	1882-83.
	₹	₹	₹	₹
Orissa	84,012	79,802	1,10,152	1,08,473
Midnapur	1,37,578	1,28,747	1,20,580	1,46,922
Hidgellee	(a)52,455	41,382	62,317	43,694
Sone	46,243	51,761	85,193	71,205
Total	3,20,288	3,01,692	3,78,242	3,70,294

(a). Includes ₹313 on account of Fines and Sundries.

The increase of revenue on the Orissa Canals, where the traffic rates had been lowered in the previous year by nearly 40 per cent., is satisfactory. The passenger traffic has increased by 30 per cent. owing principally to the opening of the Albah Lock and Gobri Canal. On the Midnapur Canal the number and tonnage of boats decreased, but as they traversed longer distances there was an increase in the tollage receipts. The general decrease in all merchandise carried by this canal (except grain and oil seeds) is attributed to the opening of the Tarkessur Railway. The Hidgellee Canal was closed for silt clearance during six weeks at the beginning of the year; the increase in traffic and revenue is said to be due to the opening of a portion of the Orissa Coast Canal, of which the Hidgellee will hereafter form the northern portion and main feeder. The figures

given by the Chief Engineer for the Sone Canals show an increase in receipts from tollage, but a decrease in the total income, due apparently to smaller receipts from the transport service.

8. In his notes on the working of the several Canal systems the Chief Engineer has carefully scrutinized the state of the collections of water revenue. On the Orissa Canals, out of a total demand of R1,82,890, which included arrears for as far back as 1880-81, R64,883 were outstanding on the 1st April 1886; of this sum, R34,816 was assessed during the year under review.

The total demand on the Midnapur Canal was R2,22,079, of which R1,11,212 represented arrears from former years, R1,08,709 were recovered, and R43,399 remitted, leaving a balance of R69,972 outstanding on the 1st April 1886.

The demand for the Sone Canal water-rates consisted of arrears of previous years amounting to R7,67,000 and R7,35,000 on account of assessments for the current year. Of the former sum, R4,89,000 were collected and R1,23,000 remitted; and of the latter, R4,89,000 were collected and R3,000 remitted. The balance uncollected at the close of the year 1885-86 was therefore R3,98,000 out of a total demand of R15,02,000.

His Honor the Lieutenant-Governor in paragraph 6 of the Resolution on the Canal Revenue Report reviews the progress of the collections, and mentions that he has issued orders for the realization of water revenue which will ensure their more complete and rapid collection in the future. The table given in paragraph 5 of the Resolution shows that the total outstandings on the 1st April 1886 were R5,49,089 as compared with R9,24,311 in the previous year.

9. The Chief Engineer points out with reference to these balances that the payment of a considerable portion of the revenue assessed for irrigation in 1885-86 is not legally due until the first month of the succeeding year, and further that, the areas shown in the tabular statements as irrigated during the year would be more correctly described as areas of which the demand statements had been submitted to Collectors during the year under report. The procedure in both cases is evidently faulty. Collections cannot be shown as outstanding before they are legally due, and the record of operations of a year should show the areas actually watered during that year and the revenue assessed thereon at sanctioned rates.

10. The percentage of the cost of measuring, assessing and collecting canal revenue on the amount realized during the year 1885-86 is compared with similar percentages for previous years in the following table:—

Canals.	Percentage of Expenditure on amounts collected.			
	1885-86.	1884-85.	1883-84.	1882-83.
Orissa	25·00	49·50	21·30	15·80
Midnapur	17·89	19·03	12·97	16·51
Sone	14·92	16·78	23·54	18·69

The cost is still high, but is on each canal less than in the previous year.

11. An addition was made during the year to the list of Ordinary Irrigation and Navigation works in operation by the opening of a length of the Orissa Coast Canal on which there was a small amount of traffic, but the earnings were not sufficient to cover the working expenses.

The collection of arrears due by the guarantors of the Sarun Canals was so vigorously pressed that there are now no arrears of more than one year's standing, except in the case of one guarantor who had made a claim for remissions which was not decided until after the close of the year.

There is an increase in the net revenue from the Calcutta and Eastern Canals. It is explained that the gross revenue for the year was Rs. 35,185 more than is shown in the figured statements, and that the deduction was made to adjust a credit that had been erroneously made to the revenue account in the previous year. The increase in net revenue as shown in the following table of revenue and direct and indirect working expenses for three years is therefore entirely due to a decrease in the working charges and is therefore most satisfactory:—

Years.	Calcutta and Eastern Canals.		
	Gross Receipts.	Working Expenses.	Net Revenue.
	₹	₹	₹
1885-86	4,79,484	1,96,209	2,83,275
1884-85	5,69,726	2,91,214	2,78,512
1883-84	5,64,101	2,32,031	3,32,070

12. The traffic on both canals and navigable waterways in this Province is steadily increasing. The Chief Engineer in this report notices several proposals that have been elaborated for the improvement of the channels and for simplifying the assessment and collection of Navigation revenue.

Order.—Ordered, that copies of this Resolution and of the Report and its accompaniments be forwarded to the Secretary of State, and to the Finance and Commerce and the Revenue and Agricultural Departments for information.

Also, that a copy of this Resolution be forwarded to the Government on Bengal for information and guidance.

Also, that copies of this Resolution and of the Report be forwarded to the Local Governments and Administrations noted in the margin in the Public Works Department for information.

The Governments of Madras, Bombay, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and Burma.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also, to the Foreign Department for communication to the Resident at Mysore and Chief Commissioner of Coorg.

Also, that this Resolution and the Resolution of the Government of Bengal, with a few selected statements, be published in the Supplement to the *Gazette of India*.

R. HOME, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

RESOLUTION—By the Government of Bengal in the Public Works Department,—No. 1785 I.A., dated Calcutta, the 18th December 1886.

Read—

Canal Revenue Report for 1885-86 and the Chief Engineer's Note on the same.

The total outlay, direct and indirect, to the close of the year 1885-86 on canals in Bengal, of which capital accounts are kept, has been R6,88,13,181. Of this sum, R7,82,000 have been contributed by the Imperial Governments from Famine Relief and Insurance funds, R86,52,056 have been provided from Provincial revenues, and R5,86,02,070 have been charged to Loan funds. In addition to the sums mentioned above, R7,77,055 have been expended on surveys for irrigation works, which have not been carried out.

2. There are now in actual operation in Bengal 782½ miles of canal, of which 553 miles are navigable. The total area commanded by these canals is 2,698,846 acres, of which 455,987 acres, producing crops of the estimated value of ₹1,13,94,483* were irrigated during the year. The number of boats plying in the canals during the year was 241 951. The total value of goods passing through the canals in boats and rafts aggregated ₹8,51,21,950 approximately.

3. The receipts from, and expenditure on, the canals in operation for the last three years are given in the statement below: the figures include indirect charges:—

Name of Canal.	1883-84.		1884-85.		1885-86.	
	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.
Major Irrigation Works.	₹	₹	₹	₹	₹	₹
Orissa Canals	3,05,530	2,37,868	3,29,366	1,43,585	3,56,678	2,07,350
Midnapore Canal	2,23,586	2,64,576	2,31,915	2,57,955	2,18,127	2,62,484
Hidgellee Tidal Canal	48,093	63,590	38,248	43,507	50,147	52,455
Sone Canals	5,42,159	603,807	6,35,530	8,62,474	5,84,002	10,62,646
Total	11,19,368	11,69,841	12,35,059	13,07,521	12,08,954	15,84,935
Minor Works and Navigation.						
Irrigation and Navigation Works.						
Sarun Canals	24,066	23,041	26,598	9,341	28,331	41,143
Calcutta and Eastern Canals	2,32,031	5,64,101	2,91,214	5,69,726	1,96,209	4,79,484
Orissa Coast Canal	...	...	...	...	30,712	13,718
Total	2,56,097	5,87,142	3,16,807	5,79,067	2,50,252	5,34,345
GRAND TOTAL	13,75,465	17,56,983	15,51,866	18,86,588	14,59,206	21,19,280

* Includes ₹1,61,974 for Sarun Canals.

4. The net income for the year was therefore ₹6,60,074. Interest amounting to ₹22,49,193 was, however, payable to the Imperial Government, so that there was a deficit of ₹15,89,119 to be met from Provincial revenues.

The revenue collected for the last three years on the works mentioned in the above statement is shown below:—

Head.	Revenue.		
	1883-84.	1884-85.	1885-86.
	₹	₹	₹
Water-rates	7,49,122	9,46,808	12,33,612
Navigation	9,29,968	8,22,187	8,34,780
Miscellaneous	77,893	1,17,593	50,888
Total	17,56,983	18,86,588	21,19,280

The increased revenue of the year was entirely due to the collection of arrears of water-rates due for former years, and not to the revenue earned in the

year 1885-86 itself, which was less than the two previous years. This is shown by the following statement:—

	Earnings.		
	1883-84.	1884-85.	1885-86.
	₹	₹	₹
Water-rates	9,85,208	13,41,655	10,45,339
Navigation	9,04,818	8,21,876	8,34,780
Miscellaneous	1,01,075	81,519	90,418
Total	19,91,101	22,45,050	19,70,600

5. The arrears of water-rates outstanding at the close of each of the last three years are shown in the statement following:—

Name of Canal.	Arrears.		
	1st April 1884.	1st April 1885.	1st April 1886.
	₹	₹	₹
Orissa Canals	52,203	77,869	64,884
Midnapore Canal	1,44,691	1,11,212	69,972
Sone Canals	4,33,793	6,95,208	3,98,321
Sarun Canals	25,218	40,022	15,912
Total	6,45,905	9,24,311	5,49,089

The prevalence of large balances outstanding on account of water-rates in the Province had for some years past forced itself on the notice of the Local Government. The matter had indeed attracted the attention of the Imperial Government and of the Secretary of State. Not only were the arrears large in themselves, but they showed a constant tendency to increase. At the end of the year previous to that now under review, these arrears had reached the enormous sum of 9¼ lakhs of rupees, which was more than 40 per cent. in excess of the outstanding balance of any previous year. In August 1885 the Commissioners of the Orissa, Burdwan, and Patna Divisions were especially addressed on this matter: it was pointed out that the Lieutenant-Governor was reluctantly forced to the conclusion that very little real effort was made by the civil officers of districts in the collection of canal revenue, and that Government must insist on the same attention being given to this important branch of duty as to any other work which devolves on Commissioners and Collectors.

6. Sir Rivers Thompson notices with approval the response to these instructions in the large reduction in the arrears which has been effected by the district officers in the Orissa and Patna Divisions. The favorable results are most conspicuous on the Sone Canals, where reform was most needed. The above figures, however, are but an imperfect representation of the facts; for though they show a large reduction in outstanding balances, they give no indication whether that reduction has been effected by collection of the arrears or by the the far easier method of remissions. The note of the Chief Engineer gauges the results obtained, on each of the three large systems, by a more detailed and accurate method than can be fitly followed in this resolution. The results obtained on the Sone Canals are, on the whole, the most satisfactory in themselves, and they have the greatest weight since the amounts involved are by far the largest. The work done by the revenue officers in the Orissa Canals is also satisfactory in itself, although the amounts involved were less than those dealt with on the Sone Canals, and the ultimate amount outstanding shows a comparatively small reduction as compared with that of the outstanding balance of the previous year. The results on the Midnapore Canal, on the other hand, are, both relatively and actually, unsatisfactory. It is true that the outstanding balance has been largely reduced; but this result is not so much due to the

realization of arrears as to the adoption of the easy expedient of writing off, as irrecoverable, balances as to the collection of which no sufficient investigation was made before the demand was abandoned. The stringent orders recently issued on this subject will prevent the recurrence of such a practice.

7. The areas irrigated during the last three years are detailed in the following table :—

		1885-86.	1884-85.	1883-84.
		Acres.	Acres.	Acres.
Orissa	Kharif	70,563	54,181	17,035
	Rabi	1,665	2,994	1,381
	Perennial	171	197	344
	Total	72,339	57,372	48,760
Midnapore	Kharif	70,604	69,294	97,919
Sone	Kharif	80,697	130,579	134,732
	Rabi	54,748	66,630	99,304
	Perennial	10,349	9,224	6,732
	Hot weather irrigation	10,857	959	8,524
	Five years' lease	171,828	149,185	101,322
	Total	308,179	356,577	350,614
	Total Major Works	451,422	483,243	497,293
Sarun Canal	Kharif	888	1,916	...
	Rabi, including hot weather	3,677	5,307	...
	Total Minor Works	4,565	7,223	21,122
	Grand Total, Major and Minor Works	455,987	490,466	518,415

Taking the grand total of the figures in the above statement, there would seem to have been during the last three years a steady decline in the area irrigated in the province. The falling off in the annual leases in the Sone Canals indicates the most prominent cause of this decrease; but to some extent it is due to the fact that a portion of the area irrigated by these canals is omitted from the returns. The reason of this is explained in paragraphs 68-71 of the Chief Engineer's note. On the other hand, the increase in the area irrigated on the Orissa Canals is the most satisfactory feature in the operations of the year. It shows that the opposition to irrigation in this province, which was so marked in the year 1883-84, has subsided. There seems to be every probability that the area irrigated in Orissa will in a short time rise to the standard which was obtained in 1882, when 70 per cent. of the entire area provided with distributaries was irrigated. This favorable result may in some measure be attributed to the enquiries of the Commission appointed to examine the working of the Orissa Canal system, and the changes introduced upon their report. It is, however, necessary to point out that the figures given above for the Orissa Canals are not strictly comparable, and that the actual increase in the area irrigated is somewhat less than these figures show. This is explained in paragraph 14 of the Chief Engineer's note. The steady increase in the area held under long leases on all the canals is a satisfactory indication that the fluctuations in irrigation, which were noticeable in former years, are likely to be less marked in future.

8. The tollage collections from the various canals for the last three years are given in the table following :—

Year.	Orissa Canal.	Midnapore Canal.	Hidgellee Canal.	Orissa Coast Canal.	Sone Canals.	Calcutta and Eastern Canals.	Total.
	₹	₹	₹	₹	₹	₹	₹
1883-84	61,692	1,08,931	62,317	...	48,032	5,24,752	8,05,634
1884-85	52,784	1,19,797	41,382	...	37,335	5,08,466	7,59,764
1885-86	64,093	1,25,331	52,143	13,663	41,712	5,13,839	8,10,781

There has been an increase both in the gross tollage receipts and the receipts on each navigable system as compared with the previous year. A portion of the Orissa Coast Canal was opened to traffic for the first time in July 1885. It produced a moderate revenue, which, considering the circumstances under which the length of canal was working, may be considered satisfactory. In the course of the current year the whole line should be opened to traffic, providing thus an inland and secure navigation for the entire length from Calcutta to Cuttack.

9. The Calcutta and Eastern Canals sustained their reputation as the most productive Public Work in Bengal. The statement in paragraph 110 of the Chief Engineer's note shows that the net revenue gives more than 5½ per cent. interest on the capital invested. More than 20 lakhs of rupees have been expended from Provincial Funds in the last ten years on the improvement of these canals. The whole of this expenditure is now returning a revenue of 5½ per cent. The effect of the improved condition of the canals is that the cargo borne to Calcutta is now carried in larger boats than was formerly the case. The amount of cargo delivered by the canals has slightly increased, but the number of the boats which carry it was considerably less.

10. The only navigable system in Bengal on which the traffic and receipts are declining is the Nuddea Rivers. On these streams the traffic shows a steady decline, of which no satisfactory explanation has yet been given. The net revenue of these rivers shows an increase in the last five years, which is examined in the Chief Engineer's note and found to be mainly due to artificial causes, which are not likely to continue.

11. The revenue reports of the Commissioner of Orissa and of the Superintending Engineer of the Orissa Circle were again unduly and unnecessarily delayed. The reports of the Commissioners of Patna and Burdwan were received with exact punctuality. Those of the Superintending Engineers of the Sone and South-Western Circles were slightly delayed by the circumstance that the finance accounts of the Examiner were six weeks in arrears.

Order.—Ordered that a copy of this Resolution, and of the note and its accompaniments, be submitted to the Government of India, in the Public Works Department, for information; also that copies be forwarded to the Appointment, Revenue, and Financial Departments of this Government; the Board of Revenue, Lower Provinces; the Commissioners of the Presidency, Burdwan, Patna, and Orissa Divisions; the Collectors of the 24-Pergunnahs, Nuddea, Hooghly, Midnapore, Burdwan, Patna, Shahabad, Gya, Sarun, Cuttack, and Balasore; the Superintending Engineers of the Orissa, South-Western, and Sone Circles, and the Examiner of Public Works Accounts, Bengal for information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON, *Major*, *R.E.*,
Offg. Joint-Secretary to the Government of Bengal.

DEPARTMENT OF FINANCE AND COMMERCE,
(Statistical Branch).

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 9th MARCH 1887.

GENERAL REMARKS.—Except in parts of Bengal and Assam and in two districts of the Punjab, the week under report has been rainless.

The *rabi* harvest is in progress generally throughout the country and has been completed in Berar. The crops are on the whole in a promising condition, though in Bombay, the North-Western Provinces and Oudh and Rajputana frost and blight have caused some injury. In the Punjab the prospects of the *rabi* have not improved, and rain is still urgently wanted everywhere in the Province.

In Madras the standing crops are in want of rain, and prospects are only tolerably fair. The outlook in Mysore and Coorg continues satisfactory.

The spring rice is doing well in Bengal, and ploughing for the early rice is proceeding in Assam.

The sugarcane harvest is in progress in Madras and Bombay.

The collection of opium has commenced in Bengal and the North-Western Provinces and Oudh. In Central India and Rajputana the crop is generally fair.

In Bengal indigo sowings are in progress.

Except for an outbreak of cholera in Benares, the public health is generally satisfactory in all Provinces.

Prices are fluctuating in the North-Western Provinces and Oudh and the Punjab, are falling in Mysore and Coorg, and are high in some districts of the Central Provinces and in some States in the Rajputana Agency.

Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Feb. 2nd)		
Bellary		Standing crops: sugarcane generally fair, but cotton and wheat affected by disease, and white *cholum* withered to a considerable extent, and cotton crop very bad in parts of two taluks. Harvest: sugarcane, outturn average; other crops below average. Fever in two and cattle-disease increasing in three taluks.
Kurnool		Standing crops fair. Harvest: white *cholum*, outturn below average. Smallpox in five, and fever and cattle-disease, latter increasing, in three taluks.
Ganjam		Fever in two and smallpox in four divisions. Catle-disease increasing in one. Cholera slightly on the decrease.
Kistna		Standing crops generally good. Harvest: wet and dry crops, outturn below average. River 1·1 feet over anicut. Slight fever in parts and cholera slightly on the decrease in three taluks.
Chingleput		Standing crops good, but in parts of four taluks indifferent owing to want of rain. Harvest: paddy, outturn below average. Smallpox and cattle-disease, latter increasing in two taluks.
Coimbatore		Standing crops generally good, but in parts suffering from want of rain. Harvest: wet and dry grains, outturn irrigated crops slightly above average, rest fair. Fever and smallpox in two taluks. Cattle-disease increasing in one.
Tanjore		Standing crops generally good, but in parts indifferent for want of rain. Harvest: wet and dry grains, outturn up to average. Cattle-disease in two taluks.
Madura		Standing crops in parts withering from want of rain; outturn where harvested unsatisfactory. Smallpox and cattle-disease in one taluk.
Malabar		Third crop cultivation progressing in two taluks. Slight smallpox in nine, fever in three, and cattle-disease in two taluks.
Travancore		Harvest of second crop paddy over. Smallpox and fever in parts.
(Mar. 9th)		*General Remarks.*—General prospects tolerably fair.
Bellary	*Nil*	Standing crops generally fair, but cotton affected by disease in one and very bad in two taluks. White cholum in parts withered. Harvest sugarcane, yield average. Other crops below average. Fever and smallpox in one and cattle-disease increasing in five taluks.
Kurnool	*Nil*	Standing crops fair. Harvest white cholum, outturn below average. Smallpox and fever in four and cattle-disease increasing in three taluks.
Ganjam	*Nil*	Smallpox in four talukas. Fever and cattle-disease prevalent; latter decreasing in two divisions.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Kistna . . .	*Nil*	Standing crops generally good. Harvest dry crops, outturn below average. River 7 feet over Anicut. Fever slight in parts. Cholera severe in seven and cattle-disease in two taluks.
Chingleput (Madras) .	*Nil*	Standing crops good, but in parts of five taluks withering for want of rain. Harvest, paddy and *ragi*. Smallpox and fever in one, cattle-disease decreasing in two taluks.
Coimbatore . . .	*Nil*	Standing crops generally good, but in parts suffering from want of rain. Harvest, wet and dry grains, outturn irrigated crops above average, rest below average. Fever and smallpox in two taluks.
Tanjore . . .	*Nil*	Standing crops generally good, but in parts indifferent for want of rain. Harvest wet and dry grains, outturn up to average. Cattle-disease in three taluks.
Madura . . .	*Nil*	Standing crops in parts withering for want of rain. Outturn where harvested unsatisfactory. Smallpox and cattle-disease prevalent; latter increasing in two taluks.
Malabar . . .	*Nil*	Third crop cultivation progressing in two taluks. Smallpox slight in nine, fever in three, and cattle-disease increasing in two taluks.
Travancore . . .	*Nil*	Harvest of second crop paddy over. Smallpox and fever in parts.
		General Remarks.—General prospects tolerably fair.
Bombay—**(Mar. 9th).**		
Karachi . . .	*Nil*	River at Kotri on 5th 2 feet 9 inches against 4 feet 8 inches on same date last year. Approximate area of past *kharif* 27,094 acres and assessment R33,018 more than last year, owing to favourable rainfall and inundation, produce estimated at twelve and half annas in the rupee. Fever in five and cattle-disease in one taluka. Wheat, red rice and *bajri* in Karachi 28, 30, and 32, and in Sehwan 28, 38, and 40 pounds per rupee, respectively.
Hyderabad . .	*Nil*	*Rabi* cultivation injured by frost in seven talukas. Fever in three and cattle-disease in two talukas. River at Kotri on 7th 2 feet 9 inches against 4 feet 9 inches on same date last year. Wheat 21, *bajri* 38, *jowari* 40, white rice 20, and red rice 30 pounds per rupee.
Ahmedabad . .	*Nil*	Cotton-picking and reaping of *rabi* crops continue. Public health good. Wheat 27 and *bajri* 30 pounds per rupee.
Baroda . . .	*Nil*	Public health fair. Crops in good condition, except in Naosari division, where they have suffered from cold. *Bajri* 30, wheat 18, and rice 24 pounds per rupee.
Surat	*Nil*	Reaping of *rabi* crops commenced in some talukas. Fever, cough, and smallpox in Bardoli and fever in Mandvi taluka. *Jowari* 30 and *nagli* 40 pounds per rupee.
Nasik	*Nil*	Weather hot during the day, but cool at night. *Rabi* harvesting commenced. *Rabi* is being collected as usual in Peint. Smallpox in some villages of Sinnar and Igatpuri. Cholera at Manmad. Public health otherwise generally good. Wheat 28¾, *bajri* 30¾, and rice 20¾ pounds per rupee.
Colaba (Bombay) .	*Nil*	Abnormal temperature 1° cool on 2nd and 8th and 1° warm from 3rd to 7th. Vapour in air in excess of normal on all days. Abnormal wind northerly on 3rd and 4th; wind normal on all other days.
Poona . . .	*Nil*	Wheat slighly injured by blight in Sirur, Bhimthadi, and Maval talukas. Reaping almost completed in Junnar, Khed and Bhimthadi talukas. Elsewhere it is in progress. Public health generally good. Slight cattle-disease in Indapur and Haveli talukas. *Bajri* 43 and *jowari* 59 pounds in the district, and *bajri* 37 and *jowari* 48 pounds per rupee in Poona City.
Ahmednagar . .	*Nil*	Reaping of *rabi* crops in progress. *Kardi* and linseed destroyed. Wheat and gram partly destroyed. *Tur* good. Health good. *Bajri* 58 and *jowari* 72 pounds per rupee.
Sholapur . . .	*Nil*	Reaping of *kharif* and *rabi* crops in progress. Public health good. *Jowari* 65½ and *bajri* 55 7/16 pounds per rupee.
Dharwar . . .	*Nil*	Harvesting of wheat and gram in progress. Cotton-picking generally commenced. Scarcity of fodder in Navalgund and of drinking water in Kod taluka. Public health generally good. Rice 25¼ and *jowari* 50¾ pounds per rupee.
Kanara . . .	*Nil*	Rice, pepper and sugarcane harvest in progress. Cattle-disease in one taluka. Public health good. Weather hot. Common rice in Karwar and district average, 13¼ seers per rupee.
Rajkot . . .	*Nil*	Weather hot. Measles in Rajkot, Virpur, Bantwa, and Porbandar. Smallpox among cattle at Morvi. Wheat 25, *bajri* 25 and *jowari* 34 pounds per rupee.
		General Remarks.—Reaping of *rabi* crops going on in several districts. Scarcity of fodder and of drinking water in parts of Dharwar. Fever in parts of eight, cattle-disease in parts of nine, and smallpox in parts of four districts.
Bengal—(Mar. 8th)		
Chittagong (Mar. 4th)	4·57	Weather seasonable. Prospects of crops continue good. Prices steady. A few sporadic cases of cholera. General health fair.
Dacca . . .	*Nil*	Days hot; nights cool. Prospects good. Pulses and mustard being gathered. Pressing of sugarcane nearly completed. Lands being ploughed for early rice and jute. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
24-Pergunnahs . .	*Nil*	Weather growing warmer daily. Prospects favourable. Harvesting of cold-weather crops over. Sugar still being manufactured. Lands being ploughed. Isolated cases of cholera. Public health good.
Khoolna . . .	*Nil*	Weather getting warm. Prospects of winter crops and *boro* rice favourable. Public health good.
Moorshedabad . .	. . . .	Slight rain. Weather getting warmer. Prospects of crops good. Public health generally good. Cholera appearing in some places.
Pubna . . .	Serajgunge 2·02	Weather warm. Prospects good. *Rabi* crops being reaped with
	Heavy local showers	good outturn. Pubslic health good.
Dinagepore . .	0·05	Weather fair and getting warm. *Rabi* being harvested; good outturn expected. Public health good.
Rungpore . . .	*Nil*	Ploughing for *aus* and jute in progress. Public health good.
Midnapore . . .	*Nil*	Weather seasonable and warm. Prospects of *boro* rice poor in Ghatal. Cholera still prevails in Tumlook and Contai subdivisions, elsewhere public health good.
Burdwan . . .	*Nil*	Harvesting of *rabi* crops still continues; outturn generally good. Public health fair.
Bhagulpore . .	*Nil*	Weather hot in day time with strong west wind. Prospects of *rabi* crops favourable. Outturn of mustard inferior. Wheat expected to average 10 annas only. Public health good.
Monghyr . . .	. . . .	Poppy prospects continue fair. Collection of opium in progress.
Purneah . . .	*Nil*	Weather getting warmer with strong west wind. Prospects of crops good. Tobacco harvest in progress. Health of people and cattle fair. Rivers low.
Durbhanga . .	*Nil*	Weather getting gradually warmer. Mustard, peas, wheat and barley being reaped. Tobacco harvest begun. Prices almost stationary. Public health generally good.
Mozufferpore . .	. . . .	Poppy above the average. Gathering of opium commenced.
Sarun . . .	. . . .	Poppy prospects continue good, but weather not altogether favourable owing to easterly winds. Lancing of capsules going on.
Chumparun . .	*Nil*	Prospects of *rabi* continue favourable. Opium collection commenced. Indigo sowings in progress. Public health fair.
Patna . . .	*Nil*	Weather getting warmer. Peas, mustard and opium being gathered; wheat and barley coming into maturity. Public health generally good.
Gya	*Nil*	Weather becoming warm. *Rabi* and poppy pretty good. Fever and smallpox cases reported. Public health generally good.
Shahabad . . .	. . . .	Weather favourable for collecting opium, and if this weather continues better outturn expected.
Hazareebagh . .	*Nil*	Weather getting hot. Prospects of *rabi* and poppy good. Poppy being lanced. General health good.
Cuttack . . .	A shower of rain on 7th with high wind.	Weather fair and hot. *Dalua* rice growing well. Price of rice unchanged. Public health good.
		General Remarks.—Hot weather has now generally begun. Rain fell in parts of North Bengal and in Cuttack, and heavily in Chittagong, and has assisted ploughing for early crops. *Boro* rice is doing well. Harvesting of *rabi* crops is in progress. Poppy is generally a good crop; capsules are being lanced and collection of opium has begun. Public health good.
N.-W. Provinces and Oudh—(Mar. 9th)		
Benares (Mar. 8th)	. . . .	Weather rather warm for this time of the year. *Rabi* being cut; average harvest anticipated. Poppy prospects continue good. Markets well supplied. Prices steady. The outbreak of cholera reported during the last week has taken a rather serious form; the number of deaths having been 224 during the past week, of which a few only have occurred outside the city; the greatest number in one day has been 41 on the 3rd instant, since when the figures have been rather lower; the public health is otherwise good, and there is no cattle-disease.
Gorakhpore („ 7th)	. . . .	Weather clear and favourable. *Rabi* nearly ready for reaping. Prices rising. Health fair.
Fyzabad („ 8th)	. . . .	Weather seasonable. *Rabi* crop being harvested. Peas and gram injured by frost; poppy good. Export of grain continues, but supplies sufficient. Health good.
Lucknow („ 7th)	. . . .	*Rabi* being cut and opium extracted. Markets well supplied. Prices rising. Public health good. No cattle-disease reported.
Rai Barelli („ 8th)	. . . .	Weather clear and getting warmer. Wind westerly. Injury to *rabi* crops from frost and blight, otherwise the prospects are favourable. Collection of opium commenced. Markets well supplied. Prices showing a tendency to fall. General health of people and condition of cattle good.
Pertabgarh („ „)	. . . .	Prospects good. A slight fall in the prices of wheat and barley. Health of people and cattle good.
Allahabad („ „)	. . . .	Weather seasonable. Peas, wheat and barley being harvested. Prospects good. Markets well supplied. Prices show a tendency to fall. Health of men and cattle good.
Cawnpore („ „)	. . . .	Weather seasonable. *Rabi* crops in good condition. Poppy very healthy and perfectly free from disease. Collections begun everywhere. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—*contd.*		
Banda (Mar. 8th)	*Nil*	Weather getting very warm. Wheat, gram, and barley being harvested in parts. Price of gram slightly lower. Public health and condition of cattle good.
Farakhabad („ „)	*Nil*	Weather getting warm. *Rabi* crops have suffered from frost and strong winds. Poppy in good condition. Prices stationary. Health good.
Sitapur („ 9th)	. . . .	High westerly winds prevailed during the week doing harm to wheat. Crops are ripening and gram is being cut. The condition of poppy is reported as particularly satisfactory.
Bareilly („ 8th)	. . . .	Crops doing well. Prices lower than last week. Health of men and cattle good.
Ballia („ 7th)	. . . .	Weather clear. Reaping of *rabi* crops progressing. Sugarcane sowings begun. Supplies plentiful. General health good.
Kumaon („ 8th)	. . . .	Weather fine. Rain required for *rabi* crops, which are making progress. Prices rising. General health good. Cattle-disease abating.
Agra („ 7th)	*Nil*	Gram being harvested. Crops being irrigated. Prices rising. Health good.
Jhansi („ „)	. . . .	Weather hot in the day and cool at night. Gram and *arhar* being harvested. Prices pretty steady. Health good.
Meerut . . .	*Nil*	High west wind. Crops not so good as expected. Prices steadier. Health good.
		General Remarks.—Weather getting warmer. Harvesting of *rabi* in progress. Prospects generally good. Collection of opium commenced. Supplies ample, but prices are still fluctuating. Public health good everywhere except in Benares, where cholera has appeared.
Punjab—(Mar. 9th)		
Delhi (Mar. 8th) .	. . . . .	Health good. Prices slightly falling. *Rabi* crops much damaged by frost and strong westerly winds.
Hissar . . .	. . . . .	Rain wanted. Health good. Prices high but stationary. *Kabi* crops much injured from want of rain and closure of canal.
Umballa . . .	. . . .	Health good. Prices rising. *Rabi* prospects blighted for want of rain.
Jullundur . . .	. . . .	Health good. Prices very high. Prospects of *rabi* bad for want of rain.
Amritsar . . .	. . . .	Rain wanted. Health good. Prices stationary. Prospects of *barani* crops suffering for want of rain.
Sialkot . . .	. . . .	Health good. *Kabi* crops withering.
Ferozepore . .	. . . .	Health good. Prices rising.
Lahore . . .	. . . .	Health good. Prices high and stationary. *Kabi* prospects bad for want of rain.
Rawalpindi . .	1·0	Health good. Prices rising. Prospects of *rabi* average.
Shahpur . . .	. . . .	Health good. Prices high and stationary. *Kabi* crops suffering from drought.
Multan . . .	. . . .	Health good. Prices stationary. *Chahi* crops good, those on *sailab* lands suffering for want of rain.
Dera Ismail Khan .	. . . .	Health good. Prices rising. Slight change in crops for want of rain.
Peshawar . . .	·45	Health fair. Prices slightly falling. *Kabi* crops poor for want of rain
		General Remarks.—Slight rain in the Rawalpindi and Peshawar districts. Health generally good. Prices fluctuating. Crops suffering for want of rain.
Central Provinces—(Mar. 9th)		
Nagpore . . .	. . . .	Days warm; nights cool. *Rabi* being harvested. Fever, cattle-disease and smallpox in places. Prices risen.
Jubbulpore . .	. . . .	Weather very warm. *Rabi* harvest commenced. Health good. Prices very high.
Saugor (Mar. 8th)	. . . .	Weather clear and warm. Prospects unchanged. General health good. Prices steady.
Seoni	. . . .	Weather getting warm. Nights cool. *Rabi* harvest in progress. Smallpox in places. Prices steady.
Khandwa . . .	. . . .	Weather seasonable. *Kabi* being cut. Some smallpox. Prices stationary.
Raipur . . .	. . . .	Days hot; nights cool. *Rabi* harvest in progress. Cattle-disease in places. Prices rising.
Bilaspur . . .	. . . .	Weather clear and seasonable. *Rabi* crops being harvested. Prospects favourable. Cattle-disease prevalent. Prices falling.
Sambalpur (Mar. 5th)	. . . .	Nights cool; days hot. Sugar-making in progress. Health good. Prices steady.
		General Remarks.—Harvesting of *rabi* crops in progress. Prospects generally favourable. Fever, cattle-disease and smallpox in places. Prices high in some districts.
Burma—(Mar. 2nd) (Report for the week ending 26th February 1887.)		
Akyab . . .	*Nil*	Some cases of cholera in town, otherwise public health good.
Bassein . . .	*Nil*	Public health and health of cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Burma—*contd.*		
Rangoon . . .	*Nil*	Two cases of cholera in town, otherwise public health and health of cattle good.
Amherst (Moulmein) .	*Nil*	Public health and health of cattle good.
Tavoy . . .	Rainfall for week ·09 (Total to date ·09)	Public health and health of cattle good.
Pegu	*Nil*	Slight cholera in one township, otherwise public health and health of cattle good. Threshing almost finished.
Henzada . . .	*Nil*	Public health and health of cattle good.
Prome . . .	*Nil*	Public health and health of cattle good.
Toungoo . . .	*Nil*	Public health and health of cattle good.
Thayetmayo . .	*Nil*	Public health and health of cattle good.
Shewbo . . .	Rainfall for week *Nil* (Total to date ·50)	Health good. Peas and paddy scarce in south. Prices rising steadily. Spring cultivation one-half transplanted towards Mu.
Kyaukse . . .	*Nil* (Total to date 1·56)	Health good. Sowing commenced for early crops.
Minbu . . .	*Nil* (Total to date ·34)	Health good. Paddy nearly all in. Food supply insufficient. Prices normal.
Yamethen . . .	*Nil* (Total to date ·89)	Health good. Spring paddy ploughing progressing.
		General Remarks.—Slight cholera in Akyab and Rangoon and in Pegu district, and fever in Hanthawaddy. A little cattle-disease in two districts, otherwise health of Lower Burma good. Reports received from six districts of Upper Burma: public health everywhere good. Food-supply insufficient in Shewbo and Minbu. Prices steadily rising in south of former district. Elsewhere prices normal. Agricultural operations progressing satisfactorily.
Assam—(Mar. 9th)		
Gauhati . . .	·2 During week ending 8th instant.	Weather seasonable, but getting warm during day. Public health fair. Pressing of sugarcane and ploughing of land for *ahu* still in progress. Prospects of crops good.
Sylhet . . .	4·15	The rain has improved the prospects. Linseed in South Sylhet said to have been a little injured by insects.
Cachar . . .	2·64	Ploughing and sowing of *dumahi* crops continues. Common rice 14 seers per rupee. General health good.
Mysore and Coorg—(Mar. 9th)		
Bangalore . .	. . . . .	Standing crops in good condition. Prospects of season continue fair. Public health generally good. Murrain prevails in Pavagada taluk. Prices fallen slightly in Bangalore, Kolar and Kadur.
Mysore . . .		
Mercara (Mar. 2nd)	. . . .	Prospects continue good. Prices slightly fallen.
Mercara („ 9th)	. . . .	Prospects good. Prices slightly fallen.
Berar and Hyderabad—(Mar. 9th)		
Amraoti . . .	. . . .	Weather clear and warm. Threshing of *rabi* has commenced. Wheat 20 and *jowari* 28 seers per rupee.
Akola . . .	. . . .	Weather getting hot. Threshing of *rabi* progressing.
Hyderabad . .	*Nil*	Reaping of *rabi* crops continues. *Tabi* crops prospering. General health fair. Prices: wheat 12½, coarse rice 11½, white *juar* 18¾, yellow *juar* 21, and *tur* 15 seers per current sicca rupee.
Central India States—(Mar. 9th)		
Indore . . .	. . . .	Weather cooler. Health good.
Morar (Gwalior) .	. . . .	Health and prospects good.
Neemuch . . .	. . . .	Weather warm. Cattle-disease in cantonment and district around. Water becoming scarce.
Goona . . .	. . . .	Health and prospects good.
Sutna . . .	. . . .	Weather seasonable. Prospects of crops fair.
Agar . . .	. . . .	Opium prospects fair. Prices rising. Health good.
Sehore . . .	. . . .	Weather getting warm. Prospects of opium and cereal crops fair.
Nowgong . . .	. . . .	Weather seasonable. Prospects fair. Health good. Prices steady.
Bhopawar . . .	. . . .	Opium crops progressing. Weather hot but mornings cool. Prices steady. Health good.
Rajputana—(Mar. 9th)		
Abu (Mar. 9th) .	*Nil*	Mornings cool. Days getting warm. Health good. Prices rising.
Sirohi („ 6th)	*Nil*	Tanks nearly dry. Wells good. Health good. One-fourth of crops supposed to be spoilt by recent frosts. Weather fine, clear and warm.
Marwar („ 5th)	*Nil*	Tanks half full. Health good. Small-pox somewhat prevails. Crops good. Nights cool. Prices stationary.
Kherwara („ 6th)	*Nil*	Tanks and wells drying. Crops fair. Health good. Prices rising. Weather warm.
Meywar („ 5th)	*Nil*	Tanks and wells low. Crops greatly damaged by frost. Health good. Prices rising. Heat during day. Cold at night.
Harowti („ „)	*Nil*	Weather warm. Health good.

Presidency or Province and District.	Rainfall for week under report.	State of Agricultural prospects.
Rajputana—*contd.*		
Jhallawar (Mar. 7th)	*Nil*	Smallpox in districts. Prices still rising.
Kotah („ 5th)	*Nil*	Health good. Weather getting warm. Crops ripening. Clouds cleared off.
Ajmere („ 8th)	*Nil*	Weather warmer. Health good. Crops reaching maturity. Outturn expected poor. Prices rising. Wheat 20, barley 40 and gram 40 pounds per rupee.
Jeypore („ „)	*Nil*	Crops damaged by frost. Opium satisfactory.
Kerowlee („ 5th)	*Nil*	Tanks dry. Wells drying. Health good. Prices rising. Spring time commenced.
Bhurtpore („ 8th)	*Nil*	Crops doing well. Prices rising. Summer setting in.
Ulwur („ „)	*Nil*	Health good. Prospects fair. Weather cloudy. Prices rising.
Bickanir („ 5th)	*Nil*	Prices stationary. Health good. Weather getting warm.
Nepal— (Mar. 3rd)		
Katmandu (Mar. 4th)	Drops	Seasonable spring weather. Prospects fair. Prices continue high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 5th March 1887.

Exceptionally low atmospheric pressure has prevailed throughout India during the past week. In the west of the Punjab the mean deficiency is as much as $\frac{1}{7}$ of an inch, and over the whole of Northern and Central India it amounts to nearly $\frac{1}{10}$ of an inch. In the two peninsulas the depression is less marked, but even here amounts to about a twentieth of an inch. Consequently the general distribution of pressure approximates rather to that of the middle of April than to that of the beginning of March. The highest readings have been reported steadily from the west of the Peninsula and the lowest from the Punjab; but an independent area of relatively low pressure has existed over the eastern parts of the Central Provinces, Chutia Nagpur and part of Behar.

The wind directions have conformed to this distribution. In the submontane districts of Northern India and generally at stations on the northern half of the Gangetic plain, the prevailing direction of the wind has been easterly (south-easterly in Upper India and north-easterly in Assam); in all other parts of India it has been from some westerly point. At most stations to the west of Longitude 80° the winds were more or less northerly and at most stations lying to the east of that meridian, more or less southerly. In the Konkan, Khandesh and the Central Provinces the steadiness of the north-westerly winds was very remarkable.

In Lower Bengal and Arakan between the 2nd and 4th of March, there was a small barometric depression, on the east of which, rather heavy rain fell at Chittagong, and between the same dates a small depression brought dust and thunderstorms to some stations in the Punjab. Otherwise the weather has remained undisturbed.

The temperature has continued high during the week. In the Punjab and the North-Western Provinces the mean temperature was about 5° and elsewhere between 1° and 4° above the average of the middle of March. The highest temperatures recorded during the week were 102½° in parts of the Central Provinces and Madras and 103° at Sholapore. At the hill stations, the thermometer has risen daily to about 70° and on the snowy range as seen from Simla the snow is evidently fast melting. At Simla on the evening of March 2nd there was a sharp and sudden earthquake, the movement of the disturbance being apparently from south-east to north-west.* The shock lasted about 10 or 12 seconds.

* All such inferential judgments are very fallacious.

H. F. B.

Fine, bright, settled weather has now prevailed almost uninterruptedly throughout India for more than a month. At the few stations where rain has fallen it has been local. Between the 2nd and 4th of March rain fell at Peshawar, Murree and Rawalpindi, in the extreme north, and at Sibsagar, Silchar, Darjeeling and Chittagong in the north-east.

The following table shows the progress of the seasonal rains; the first column giving the normal rainfall from the 1st November to the 5th March, the second the actual fall in the present season between the same dates, and the third the difference.

Stations.	Normal rainfall from 1st November to 5th March.	Actual rainfall from 1st November to 5th March.	Difference.
Multan	0·86	0·64	—0·22
Peshawar	4·42	1·38	—3·04
Murree	7·27	8·24	+0·97
Rawalpindi	6·45	4·33	—2·12
Lahore	2·39	0·56	—1·83
Simla	4·63	7·24	+2·61
Delhi	2·06	2·40	+0·34
Masuri	9·04	7·67	—1·37
Roorkee	4·20	2·99	—1·21
Meerut	2·59	2·68	+0·09
Bareilly	2·36	3·30	+0·94
Agra	1·14	1·06	—0·08
Lucknow	1·29	1·04	—0·25
Allahabad	1·35	4·31	+2·96
Darjeeling	2·08	2·54	+0·46
Calcutta	2·89	1·49	—1·40

It will be seen that in the Punjab there is a general deficiency except in the hills and at Delhi and that in the North-Western Provinces, though there is still an excess at most stations this excess is less than at the beginning of the year.

The final table shows the barometric, thermometric and humidity differences between the mean of the week (February 27th to March 5th) and the averages of February and March.

Districts.	Difference of Barometer from mean, February 27th—March 5th.	Difference of Temperature from mean, February 27th—March 5th.	Difference of Humidity from mean, February 27th—March 5th.	Total Rainfall in week, February 27th—March 5th.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 16th MARCH 1887.

GENERAL REMARKS.—There has been heavy rain in Assam during the week under report, and showers have also fallen in most parts of Bengal. In the North-Western Provinces and Oudh and the Punjab slight rain fell in six and four districts, respectively.

The *rabi* harvest continues in Bombay, Bengal, the North-Western Provinces and Oudh, the Central Provinces, Berar and Hyderabad, and prospects are everywhere very favourable. In the Punjab the want of rain is still much felt, and the prospects of the *rabi* are unsatisfactory. The *rabi* harvest has commenced in Rajputana, and the prospects of the crops there and in Central India are generally good. In Madras the standing crops are suffering from the want of rain, and prospects are only tolerably fair. In Mysore and Coorg the outlook is favourable.

The prospects of the spring rice in Bengal are promising, and ploughing for the early rice still goes on there and in Assam.

The collection of opium progresses in Bengal and the North-Western Provinces and Oudh, and the prospects of the crop in Central India are fair.

Indigo sowing is proceeding in Bengal, where the tobacco crop also promises well.

Except for the outbreak of cholera in Benares the public health continues satisfactory in all Provinces.

Prices are fluctuating in the Punjab, but are generally high. Elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(March 16th)		
Bellary	. . . .	Standing crops generally indifferent. White *cholum* withered; cotton affected by disease and is very bad in two taluks. Harvest sugarcane, yield average, other crops below average. Fever in one and severe cattle-disease in four taluks.
Kurnool . . .	. . . .	Standing crops fair. Harvest white *cholum*, outturn below average. Fever in two and smallpox and cattle-disease; latter increasing in three taluks.
Ganjam . . .	Average .01	Fever, smallpox, and cattle-disease; latter decreasing in one taluk. Slight cholera.
Kistna . . .	. . . .	Standing crops generally good. Harvest dry crops, outturn below average. River 1·4 feet over Anicut. Slight fever in parts. Severe cholera in almost all taluks. Cattle-disease increasing in one taluk.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Chingleput (Madras)		Standing crops in parts withering for want of rain. Harvest paddy, *ragi* and *cholum*, outturn below average. Fever in one and cattle-disease increasing in four taluks.
Coimbatore		Standing crops generally good, but in parts suffering from want of rain. Harvest paddy and *cholum*, outturn generally above average. Smallpox in one and fever in two taluks.
Tanjore		Standing crops generally good, but in parts not flourishing owing to want of rain. Harvest wet and dry grains, outturn up to average. Cattle-disease decreasing in two taluks.
Madura		Standing crops in parts withering for want of rain. Outturn, where harvested, unsatisfactory. Smallpox in two taluks.
Malabar		Third crop cultivation progressing in four taluks. Slight smallpox in nine and fever in two taluks.
Travancore	·75	Harvest of second crop paddy over. Smallpox and fever in parts.
		General Remarks.—General prospects tolerably fair.
Bombay—**(Mar. 16th).**		
Karachi		River at Kotri on 9th 2 feet 10 inches against 4 feet 1 inch on same date last year. Reaping of *rabi* crops commenced in talukas Tatta, Mirpur Batoro, Shewan, and Dadur. Fever in three talukas. Wheat, red rice, and *bajri* in Karachi 23, 30, and 32, and in Mirpur Batoro 30, 46, and 40 pounds per rupee, respectively.
Hyderabad		*Rabi* crops damaged by frost in five talukas. Harvest in five talukas River at Kotri on 13th 3 feet 3 inches against 4 feet 3 inches on same date last year. Fever in five talukas. Wheat 20, *bajri* 37½, *jowari* 40, white rice 18, and red rice 20 pounds per rupee.
Baroda		Public health good. Crops in fair condition. *Bajri* 30, wheat 18, and rice 23 pounds per rupee.
Surat		Reaping of *rabi* continues. Fever and smallpox in Bardoli, and fever in Mandvi talukas. *Jowari* 39 and *nagli* 40 pounds per rupee.
Nasik		Days hot, nights cold: *Rabi* harvesting continues. *Rabi* collection progressing in Igatpuri and Peint talukas. Smallpox and cattle-disease in certain villages of the Sinnar taluka. Cholera at Manmad and Yeola, five attacks, four deaths. Wheat 28¾, *bajri* 36½, and rice 20⅝ pounds per rupee.
Colaba (Bombay)		Temperature normal on all days except 12th, when it was 1° cool. Vapour in air excess of normal from 9th to 11th and 14th, and normal on all other days. Abnormal wind southerly on 10th. Wind normal on all other days.
Poona		Wheat slightly injured by blight in Sirur, Bhimthadi, and Mawal talukas. Reaping of *rabi* almost completed in the district. Public health generally good. Slight cattle-disease in Indapur and Haveli, and smallpox in Purandhar talukas. *Bajri* 44 and *jowari* 54 pounds in the district, and *bajri* 37 and *jowari* 48 pounds per rupee in Poona City.
Ahmednagar		Health good. *Bajri* 57 and *jowari* 71 pounds per rupee.
Sholapur		Reaping of *rabi* crops in progress, and that of *kharif* almost completed. Weather hot. Public health generally good. *Jowari* 66 and *bajri* 56 pounds per rupee.
Dharwar		Harvesting of wheat and gram and cotton-picking in progress. Scarcity of fodder in Navalgund and of drinking-water in Kod. Public health generally good. Rice 25⅛ and *jowari* 59¾ pounds per rupee.
Kanara		Rice, sugarcane and pepper harvest continues. Preparing ground for monsoon crop. Slight fever and cattle-disease in two talukas. Public health good. Weather hot. Common rice in Karwar 13½, and in district average 13 seers per rupee.
Rajkot		Weather hot. Measles at Rajkot, Virpur, Godka, Bagasra, and Manakwara. Smallpox among cattle at Morvi. Wheat 25, *bajri* 25, and *jowari* 35 pounds per rupee.
		General Remarks.—Reaping operations in progress in twelve and completed in three districts. Scarcity of fodder and drinking-water continues in parts of Dharwar. Fever, cattle-disease, and smallpox in parts of ten, eleven, and five districts respectively, and cholera in parts of one district.
Bengal—(Mar. 16th)		
Chittagong (Mar. 15th)	*Nil*	Weather seasonable. Prospects of crops good. Prices steady. A few cases of cholera reported from Sitakund. General health fair.
Dacca	0·37	Prospects of crops good. Pulses and mustard being gathered. Ploughing for early rice and jute going on. Public health good.
24-Pergunnahs	*Nil*	*Rabi* harvest almost over. Sugar still being manufactured. Sporadic cases of cholera and fever. Public health good.
Khoolna	*Nil*	Weather getting warm. Outturn of winter crops good. Prospects of *boro* rice favourable. Public health good.
Moorshedabad	Some rain	Weather warm and cloudy. Crops all reported favourable. Public health good, except that cholera is reported from portions of Jungipore sub-division.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Pubna	3·85	Rainfall local, useful for ploughing. *Rabi* crops being reaped. Public health good.
Dinagepore	*Nil*	Weather fair. Land being prepared for *bhadoi* crop. Harvesting of sugarcane nearly finished. Cattle-disease reported in three thanas. Public health fair.
Rungpore	0·03	Ploughing for *aus* and jute in progress; sowing of *aus* has commenced in places. Tobacco doing well. Public health good.
Midnapore	*Nil*	Few crops to report on except *boro* rice, which seems slightly below average Public health good.
Burdwan	0·09	Weather growing hotter. *Rabi* crops nearly all harvested; outturn good. Public health fair.
Bhagulpore	0·07	Days getting hot, nights still pleasant. Linseed, peas, and *khessari* good. Wheat, especially on *dearas*, uneven and not likely to be a full crop. Cultivation very forward. A little cholera in north.
Purneah	0·03	Prospects of crops good. Tobacco being harvested. Ploughing for *bhadoi* crops and jute in progress. Health of people and cattle good. Rivers low.
Durbhanga	0·03	*Rabi* being harvested. Collection of opium going on. Mango blossoms slightly injured by rain. Indigo sowing begun. Lands being prepared for paddy and *moong* sowings. General health good.
Mozufferpore		Poppy prospects excellent.
Sarun	Slight rain on 13th	Weather favourable to poppy; prospects good. Effect of rain not yet known some damage anticipated.
Chumparun	0·01	A few of the *rabi* crops being harvested. Opium collection and indigo sowing in progress. Public health fair. Prices stationary.
Patna	0·14	Harvesting of *rabi* crops going on. Castor seed being gathered. Collection of opium continues. Public health good.
Gya	*Nil*	Weather hot. *Rabi* crops good. Opium being collected. Fever and cholera in some stations.
Shahabad	Rain on 13th	Rain and hail on 13th injurious to collection of opium.
Hazareebagh	*Nil*	Weather getting warm. All crops, including poppy, doing well. Wheat being harvested in places. Poppy being lanced. Public health good. Prices easy.
Cuttack	1·30	Weather hot and cloudy. *Dalua* rice doing well. Tobacco prospects favourable. Price of rice almost unchanged. Public health good.
		General Remarks—Rain reported in many districts. Ploughing for early rice and jute in progress and sowing of indigo going on. Prospects of *boro* rice favourable. *Rabi* crops are being gathered with good outturn. Opium is being collected, and is generally a fair crop, but in Shahabad it has lately suffered from rain and hail. General health is fair.
N.-W. Provinces and Oudh—(Mar. 16th)		
Benares (Mar. 15th)		Weather unusually hot. *Rabi* harvesting in progress. Sugarcane being sown. Opium collection commenced. Supplies ample. Prices slightly fluctuating. Cholera continues; a decrease is reported in the number of deaths in the city and an increase in those in the district; public health is otherwise good. No cattle-disease in the district.
Gorakhpore („ 14th)	Slight rain accompanied with hail-storm for a few minutes at Sadr.	Weather still cloudy. *Rabi* ready. Reaping commenced. Prices stationary. Health fair.
Fyzabad („ 15th)		Weather cloudy. Harvesting going on. Opium collecting impeded by east wind. Supplies sufficient. Prices high. Smallpox in two tahsils. General health good.
Lucknow („ 14th)		*Rabi* being cut. New grain coming into the market. Opium collection in progress. Prices lowering. Public health good. No cattle-disease reported.
Rai Barelli („ 15th)		Weather getting warmer and cloudy at times. Wind easterly. Reaping of *rabi* crops and collection of opium commenced. Markets well supplied. Prices showing a tendency to fall. General health of people and condition of cattle good.
Pertabgarh („ „)		Crops being rapidly gathered. A slight fall in the prices of wheat, barley, and gram. Health of people and cattle good.
Allahabad („ „)		Weather much warmer. Harvesting in progress. Prospects good. Markets full. Prices steady. Sporadic cholera reported in places, otherwise health good.
Cawnpore („ „)	*Nil*	Weather seasonable. Harvest of *rabi* and sowing of sugarcane commenced. Opium being collected. Prices steady. Slight cattle-disease in pargana Ghatampur.
Banda („ „)	*Nil*	Weather warm. *Rabi* crops being cut. Prices fluctuating. Slight outbreak of cholera amongst coolies on Railway Works near Karwi. Cattle-disease in two villages.
Farakhabad („ „)	Clouds with slight sprinkling of rain on 12th and 13th.	Strong easterly breeze. Barley being cut. Slight appearance of blight in poppy in two tahsils. Health fair. No cattle-disease.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. P. & Oudh—*contd.*		
Sitapur (Mar. 15th)	·50 fell in Sadr on Sunday night.	The cutting of crops has been delayed a little on account of the rain. Prospects continue favourable. Poppy is in flower, and in some instances collection of the drug has commenced. No disease reported.
Bareilly („ „)	. . .	Crops so far doing well. Markets fairly steady. Health of men and cattle remain good.
Ballia („ 14th)	Slight, rain accompanied by some hail on 13th.	Sky clear, except on 13th. Sugarcane sowing going on. Supplies plentiful. General health good.
Kumaon („ 15th)	Some rain . .	Weather cloudy and unsettled. *Rabi* crops making progress. Prices rising. General health fair. Cholera and fever in some parts.
Agra („ 14th)	*Nil*	Weather cloudy. Harvesting commenced. Prices steady. Health good.
Jhansi („ „)	. . . .	Harvesting of wheat and gram in progress. Poppy collection progressing briskly. Prices slightly rising. Smallpox appearing in places, otherwise public health good.
Meerut (Mar. 15th)	Slight showers on 13th.	Easterly wind *Rabi* ripening. Health good. Prices steady.
		General Remarks.—Weather somewhat unsettled. Slight rains accompanied by hail, has fallen in some districts. Harvesting of *rabi* in progress. Prospects favourable. Opium collection going on. Markets well supplied and prices fairly steady. Cases of cholera reported in a few places, otherwise the public health is good.
Punjab—(Mar. 16th)		
Delhi (Mar. 15th) .	. . . .	Health good. Prices fluctuating. *Rabi* prospects unfavourable.
Hissar . .	. . . .	Health good Prices high but stationary. *Rabi* crops drying up for want of rain.
Umballa . . .	. . . .	Health good. Prices rising. *Rabi* prospects blighted for want of rain.
Jullundur . . .	. . . .	Health good. Prices high. *Rabi* crops failing for want of rain.
Amritsar . . .	. . . .	Health good. Prices slightly falling. *Rabi* crops suffering for want of rain.
Sialkot . . .	·20	Health good. Prices stationary. *Rabi* prospects improved.
Ferozepore . .	. . . .	Health good. Prices stationary. *Rabi* crops suffering much for want of rain.
Lahore . . .	. . . .	Health good. Prices high and stationary. *Rabi* prospects bad.
Rawalpindi . .	·35	Health good. Prices rising. *Rabi* prospects average.
Shahpur . . .	. . . .	Health good Prices high and stationary. *Rabi* crops drying up for want of rain.
Multan . . .	. . . .	Health good. Prices stationary. *Rabi* crops suffering for want of rain.
Dera Ismail Khan .	·07	Health good. Prices rising. *Rabi* crops suffering for want of rain.
Peshawar . . .	·07	Health fair. Prices rising. *Rabi* prospects unsatisfactory.
		General Remarks.—Slight rain has fallen in the Sialkot, Rawalpindi, Dera Ismail Khan, and Peshawar districts, but is still much needed throughout the Province. Health good. Prices fluctuating but generally high. Crops suffering for want of rain.
Central Provinces—(Mar. 16th)		
Nagpore . . .	. . . .	Weather cloudy and warm. *Rabi* being threshed. Fever and cattle-disease prevalent. Prices steady.
Jubbulpore . .	. . . .	Weather cloudy and hot. *Rabi* being harvested. Health good. Prices high.
Saugor (Mar. 15th)	. . . .	Weather cloudy. Prospects unchanged. Cattle-disease in parts. Prices falling slightly.
Seoni	. . . .	Weather cloudy and hot. *Rabi* harvest in progress. Smallpox and cattle-disease in places. Prices steady.
Hoshangabad . .	. . . .	Weather getting warm. *Rabi* harvest in progress. Fever prevalent. Prices stationary.
Khandwa . . .	. . . .	Weather seasonable. *Rabi* cutting nearly completed. Sixty-three cases of smallpox, four deaths. Prices steady.
Raipur . . .	. . . .	Weather cloudy and close. *Rabi* crops being harvested. Rice 18 and wheat 17½ seers per rupee.
Bilaspur . . .	. . . .	Weather clear and warm. *Rabi* harvest continues. Prospects favourable. Cattle-disease prevalent. Prices stationary.
Sambalpur (Mar. 12th)	. . . .	Weather warm. Sugarcane planting in progress. Health good. Rice 22 seers per rupee.
		General Remarks.—Weather cloudy at close of week. *Rabi* harvest continues. Fever, smallpox, and cattle disease in places. Prices high in some districts, but generally steady.
Burma—(Mar. 9th)		
Akyab (For week ending March 5th)	·30 (Total rainfall to date ·49)	Some cases of cholera in town; otherwise public health and health of cattle good.
Bassein . . .	. . . .	Public health and health of cattle good.
Rangoon . . .	. . . .	Public health and health of cattle good.
Amherst (Moulmein) .	. . . .	Public health and health of cattle good.
Tavoy . . .	. . . .	Public health and health of cattle good.

Presidency or Province and District.	Rainfall for week under report.	State of Agricultural prospects.
Burma—*contd.*		
Pegu	. . . .	Slight cholera in one township; otherwise public health and health of cattle good.
Henzada . . .	. . . .	Public health and health of cattle good.
Prome . . .	. . . .	Fever on the increase in Paungdè; otherwise public health and health of cattle good.
Thayetmayo . .	. . . .	Public health and health of cattle good.
Shewbo . . .	·04 (Total rainfall to date ·54)	Public health and health of cattle good. Food-supply scarce in parts. Prices rising southwards. No wheat cultivation this year. Cropping of Bengal gram and peas commenced, that of beans complete.
Mandalay . . .	·11 (Total rainfall to date ·74)	Public health and health of cattle good. Transplanting of *mayin* crops progressing. Food-supply sufficient, and prices normal.
Minbu . . .	*Nil* (Total rainfall to date ·34)	Health good. Paddy reaping not completed in parts of district. Food-supply sufficient and prices normal.
		General Remarks.—Some cholera in Akyab town and in one township of Pegu district. Fever prevalent in parts of Prome, otherwise public health of Lower Burma good. Slight cattle-disease in district. Reports received from five districts of Upper Burma. Public health good. Food-supply scarce, and prices rising in south of Shewbo, elsewhere prices normal.
Burma—(Mar. 16th)		
Akyab (For week ending Mar. 12th)	*Nil* Total rainfall to date ·49	Slight cholera in town and district, otherwise public health and health of cattle good.
Bassein . . .	. . . .	Public health and health of cattle good.
Rangoon . . .	. . . .	Public health and health of cattle good.
Amherst (Moulmein) .	·47 Total rainfall to date 1·47	Some cases of cholera in town, otherwise public health and health of cattle good.
Tavoy . . .	. . . .	Public health and health of cattle good.
Pegu . . .	. . . .	Slight cholera in one township, otherwise public health and health of cattle good.
Henzada . . .	. . . .	Public health good. Slight cattle-disease in one sub-division.
Prome . . .	. . . .	Public health good. Slight cattle-disease in one township.
Toungoo . . .	. . . .	Public health and health of cattle good.
Thayetmayo . .	. . . .	Public health and health of cattle good.
Shewbo . . .	*Nil* (Total rainfall to date ·54)	Public health good Food-supply getting scarce in parts. Prices abnormal.
Myingyan (Feb. 26th)	*Nil* (Total rainfall to date ·05)	Health good except a few cases of measles. Food-supply sufficient and prices ordinary.
Mandalay . . .	*Nil* (Total rainfall to date ·74)	Public health and health of cattle good. Transplanting of *mayin* crops progressing. Food-supply sufficient. Prices normal.
Minbu . . .	*Nil* (Total rainfall to date ·34)	Health good. Paddy in some parts still remains to be taken in. Food-supply sufficient and prices normal.
Yamethen . . .	*Nil* (Total rainfall to date 1·14)	Health good. *Mayin* paddy cultivation progressing.
		General Remarks.—Except slight cholera in three districts and slight cattle-disease in three districts, health of Lower Burma good. Reports received from five Upper Burma districts. A few cases of measles in Myingyan, otherwise public health good. Food-supplies getting scarce in parts of Shewbo and prices abnormal; elsewhere supplies sufficient and prices ordinary.
Assam—(Mar. 16th)		
Gauhati . . .	1·24	Weather seasonable, rainy and windy. Public health fair. Pressing of sugarcane and ploughing of land for *ahu* still in progress. Prospects of crops good.
Sylhet . . .	8·55	The heavy fall of rain during the week has done some damage to the standing crops and retarded the cultivation of land for paddy.
Cachar . . .	3·38	Weather rainy. Ploughing and sowing of *dumahi* crops continue. Common rice 13 seers 14½ chittacks per rupee. General health good.
Dibrugarh (Mar. 10th)	2·91	Weather fair. Pressing of sugarcane and sowing of *ahu* progressing. Public health good.
Dibrugarh („ 16th) .	2·46	Weather rainy throughout the week. Crushing of sugarcane and sowing of *ahu* progressing. Public health fair.
Mysore & Coorg—(Mar. 16th)		
Bangalore . . .	. . . .	Standing crops in good condition except in parts of Tumkur district. Prospects of season favourable. Public health good. Weather warm in the day time. Cattle-disease prevails in parts. No material change in prices. Prospects good. Prices stationary.
Mysore . . .	. . . .	
Mercara . . .	·53	
Berar and Hyderabad—		
Amraoti (Mar. 16th)	. . . .	Weather clear and warm. Threshing of wheat in progress and of linseed nearly completed. Wheat 20 and *jowari* 28 seers per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Berar and Hyderabad— *contd.*		
Akola		Weather fine; days hot. *Rabi* crop is being gathered and threshed.
Hyderabad	*Nil*	Reaping of *rabi* crops continues. *Rabi* crops prospering General health fair. Prices—wheat 12½, coarse rice 11¼, white *juar* 18¾, yellow *juar* 21, and *tur* 15 seers per current sicca rupee.
Central India States— (Mar. 16th)		
Indore		Weather cool and clear.
Morar (Gwalior)		Health and prospects good.
Sutna		Weather warm and windy. Cholera reported from Sohawal and parts of Rewah State.
Neemuch		Weather seasonable. High winds. Health good.
Goona		Health and prospects good. Weather getting warm.
Agar		Opium prospects fair. Health good.
Sehore		Weather getting warm. Prospects fair. Opium crop fair.
Nowgong		Weather seasonable. Prices steady. Prospects fair. Health good.
Manpur		Opium crops faring well. Prospects and health good. Prices stationary.
Rajputana—		
Abu (Mar. 16th)		Latter portion of week boisterous, cloudy, and chilly, weather now clear.
Sirohi („ 13th)		Tanks nearly dry. Wells good. Health good. Crop prospects fair. Weather cloudy and windy.
Marwar („ 12th)		Tanks half full. Health good. Crops good. Weather cloudy and windy. Prices tending to fall.
Kotah („ „)		Health good. Prospects fair. Weather cloudy. Prices stationary.
Kherwara („ 13th)		Tanks and wells sinking. Reaping commenced. Outturn doubtful. Health good. Prices same as last week. Weather seasonable and very windy.
Harowti („ 11th)		Crops ripening. Weather cloudy and windy. Health good.
Jhallawar („ 14th)		Weather windy and cloudy. Health good.
Ajmere („ 15th)		Weather somewhat cooler again. Health good. Slight fall in prices. Wheat 21, barley 41½, and gram 43 lb. per rupee.
Jeypore („ „)		Weather seasonable. Crops poor.
Partabgarh („ 12th)		Tanks quarter full. Health good. Wheat 12½, *mucca* 25, and gram 25 seers per rupee.
Bickanir („ „)		Crops and health good. Prices rising. Weather cloudy.
Ulwur		Harvesting commenced. Health good. Weather cloudy.
Kherowlee („ „)		Tanks dry; wells drying. Crops damaged by frost. Smallpox amongst children. Prices rising. Spring season commenced. Six deaths in a tahsil by fever and other diseases.
Dholepore („ „)		Tanks and wells drying. Crop prospects average. Health good. Prices rising. Weather cloudy.
Nepal— (Mar. 10th)		
Katmandu (Mar. 11th)	Slight rain	Genial spring weather. Prospects fair. Prices high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 12th March 1887.

The weather of the past week has been of the same general character as that of the preceding week, but the rainfall has been, on the whole, slighter and less general.

The returns of pressure and temperature exhibit a slow but steady decrease of their abnormal features.

On most days the highest pressure was in the west and south of the Peninsula, the south of the Bay of Bengal, and in the Eastern Peninsula; while it was low in the Gangetic plain and the Panjab. The prevailing direction of the wind was consequently easterly in the Assam Valley, at Darjeeling, the Gangetic plain, and the submontane districts of the Panjab and North-Western Provinces; north-west to west in

the south of the Panjab, Rajputana, Cutch, Khandesh, Central India and the Central Provinces; west in the west of the Peninsula, and south-easterly to south-westerly in the east. Quite at the close of the week there was a tendency to cyclonic circulation in the winds of North-Western India, but with this exception, thegeneral directions were as stated above. Excepting in Assam, the mean pressure of the week, though everywhere higher than that prevailing last week, was still below the general average of the month—most so in the Panjab.

The temperature, on the contrary, has fallen, and the mean of this week is about 4° lower than that of last week in the Panjab and the North-Western Provinces, and between 1° and 3° lower elsewhere. Except in the North-West it was generally below the average of the month, and the maximum day temperatures have not, as a rule, exceeded those of the previous week. The highest reading recorded was 104° at Cuddapah and Nagpur.

Over the whole of North-Western and Central India, a large part of the Peninsula and Burma, the air has been drier than the average, but in Assam and Bengal it has been somewhat damper. The very low humidity which has prevailed at times in Northern India, notwithstanding the prevalence of easterly or south-easterly winds, has been very remarkable.

Except in Assam, the rainfall of the week has been unimportant. A few drops fell at Simla, Ranikhet and Mussoorie, and a moderate shower at Darjeeling on the 11th. A thunderstorm gave 1¼ inch to Cuttack on the 8th, and nearly ½ inch of rain fell at Moulmein on the 9th. In Assam rain fell on five days and in the Cachar on two days; the total in each case being a little over two inches.

Stations.	Rainfall since 1st November 1886.	Average rainfall since 1st November 1886.	Difference.
Multan	0·64	0·97	—0·33
Peshawar	1·38	4·74	—3·36
Murree	8·24	8·16	+0·08
Rawalpindi	4·33	7·12	—2·79
Lahore	0·56	2·61	—2·05
Simla	7·26	5·58	+1·68
Delhi	2·40	2·37	+0·03
Masuri	7·68	9·04	—1·36
Roorkee	2·99	4·59	—1·60
Meerut	2·68	2·90	—0·22
Bareilly	3·30	2·53	+0·77
Agra	1·06	1·20	—0·14
Lucknow	1·04	1·35	—0·31
Allahabad	4·31	1·40	+2·91
Darjeeling	3·39	2·49	+0·90
Calcutta	1·49	3·21	—1·72

The table of seasonal rainfall shows no important change. At the majority of stations in North-Western India, except those on the hills and one or two in the eastern half of the North-West Provinces, the total fall since November 1st is less than the average. At Lahore it is about ⅕, and at Peshawar less than ⅛ of the normal amount.

The following table gives the difference of the barometric, thermometric, and humidity means of the week compared with the general average of the month :—

Districts.	Difference of Barometer from mean, March 6th—March 12th.	Difference of Temperature from mean, March 6th—March 12th.	Difference of Humidity from mean, March 6th—March 12th.	Total Rainfall in week, March 6th—March 12th.

ALLAHABAD,
The 19th January, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORT FOR FEBRUARY 1887.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Meteorology) No. 42 Met.—dated Calcutta, the 18th March 1887.

Read the following:—

Summary of the Weather Report for February 1887.

The unusually low temperature which prevailed in January throughout Western and Central India, as well as over a large part of the Bombay Presidency and Bengal, continued during the first ten or twelve days of February. In Northern and Central India, the depression was greatest between the 8th and 11th. Some of the temperatures of this period were the lowest recorded for several years back. Among others the following may be noticed:—

Rawalpindi	28·7°	Khandwa	35·4°
Jacobabad	29·0	Allahabad	39·1
Roorkee	34·8	Hazaribagh	40·9
Ajmere	32·0	Calcutta	47·7
Jubbulpore	35·4	Dacca	45·5

After the 12th, the temperature rose, amid some rather rapid oscillations, to the end of the month; and to such an extent that, despite the unusual cold of the first 12 days, the average temperature of the whole month was from 2° to 4½° above the general average of past years, at most stations in the Punjab, Kumaon, Central India, Rajputana, and Sind; and from 1° to 2° in the rest of the Bombay Presidency. At the end of the month, the temperature was remarkably high in North-Western and Central India—especially so on the hills, where the excess varied from 10° to 17°. On the plains of North-Western India it was between 4° and 9°. In Bengal, the Central Provinces, and Burma, however, the mean temperature of the month was from 1° to 2° below the average; elsewhere the differences were small.

The atmospheric pressure was low during the first week, but from the 7th or 8th the barometer rose, and, on the 15th, was exceptionally high throughout Northern and Central India; after which a fall again set in and continued to the end of the month. The mean pressure of the month differed but little from the average. In general, except in the Punjab, the northern half of the North-Western Provinces, Lower Assam, Cachar, and Burma, there was a slight excess of pressure, greatest in Kathiawar and Cutch, the Konkan, North Deccan, and Khandesh; but elsewhere not exceeding "·02".

The month began with settled weather and winds of the normal character, except in the Indus Valley, where they were southerly, influenced by a barometric depression in Baluchistan. During the next twenty-four hours, this depression advanced eastward to Sind and Rajputana; whence it travelled first a little to the north and then almost due east to the Eastern Districts of the North-Western Provinces and Behar; a small subsidiary depression remained in the Kumaon hills, and the weather in that region was unsettled through the first week; on the 6th and 7th there were slight falls of snow at Simla and Ranikhet. The weather then cleared, the barometer rose quickly all over the country, an axis of high pressure was established across North-Western India, and the dry westerly winds which usually accompany this distribution of pressure, swept over most of Northern India, and sometimes invaded the northern half of the Peninsula.

After the 15th, an almost continuous fall of the barometer again set in throughout North-Western and Central India, but fine weather prevailed all over the country, and hardly any rain was reported.

The month was remarkably dry, the humidity of the atmosphere being as much as 6 to 20 per cent. of saturation below the average, in Northern, Central, and Western India, and by smaller amounts in a large portion of the Madras Presidency. There was but little rain, the only exceptions being slight falls at the hill stations, and thunderstorms at Chittagong and two or three stations in the south of the peninsula. In Burmah, however, when the barometer was low, the rainfall was of the average amount, and in Ceylon there was a considerable excess.

The following table shows the amount of rain and the difference from the average, during the month of February 1887, according to districts as far as is indicated by the telegraphic reports: —

Districts.	Number of Stations.	Average rainfall in February.	Difference from the average in February 1887.	Remarks.
Punjab, West	7	1·49	—1·34	
„ East	4	1·19	—1·10	
North-Western Provinces, Trans-Gangetic.	9	1·31	—1·22	
„ „ Cis-Gangetic.	3	0·29	—0·29	
Behar	2	0·51	—0·51	
Northern Bengal	2	0·87	—0·84	
Assam, Cachar	3	1·76	—15·5	
Lower Bengal, Chutia Nagpur	6	1·07	—0·91	
Orissa, Northern Circars	6	0·47	—0·47	
Central Provinces, South	7	0·39	—0·39	
Berar, Khandesh	2	0·18	—0·18	
Rajputana, Central India, Saugor, and Nerbudda.	8	0·32	—0·32

British Burma	6	0·13	+0·03	
Ceylon	1	1·71	+0·49	

METEOROLOGICAL OFFICE,
SIMLA;
The 6th March 1887.

RUCHI RAM SAHNI,
2nd Assistant Meteorological Reporter to the Government of India.

As some speculations of an unfavourable character relatively to the prospects of the coming season, have been based on the apparent resemblance of the weather of January to that of the same month in 1877, it may be pointed out that the weather of February has been quite of a different character from that of its homonym in the same year. In February 1877, to quote from the official report, "the rainfall was very considerably in excess, for the month, over the Punjab (more especially in the Eastern Districts), in the North-West Provinces, Oudh, Behar, Bengal, Chutia Nagpur, Orissa, and the Central Provinces. * * * In the Bombay Presidency it was in excess; half an inch more rain falling than usual." This year February has been rainless or nearly so, throughout Northern and Central India. Moreover, in both January and February 1877, the barometer was remarkably high. This year it was remarkably low in January, but slightly above the average in February.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

CALCUTTA;
The 11th March 1887.

RESOLUTION.—Resolved that the Summary be published in the *Supplement to the Gazette of India.*

E. C. BUCK,
Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING,

APPENDIX.

ACCOUNTS AND ESTIMATES.

	Page.
General Statement of the Accounts and Estimates of the Revenue and Expenditure and Receipts and Disbursements of the Government of India, in India and in England	636—637
A.—Statement of the Revenue of India, in India and in England	638 639
B.—Statement of the Expenditure chargeable on the Revenues of India, in India and in England	640 643
C.—Statement of Receipts and Disbursements other than Revenue and Expenditure of the Government of India, in India and in England	644 647
D.—Account of Provincial and Local Savings charged to Revenue, and held at the disposal of Provincial Governments under their Provincial Contracts	648
E.—Statement of Net Revenue and Expenditure England and India	649

FINANCIAL STATEMENT for 1887-88.

1. The Accounts for the year 1885-86 correspond very closely with the figures of the Revised Estimates given in the Financial Statement for last year. The deficit in that year was then calculated at £2,890,800; the actual figure as now finally shewn in the Accounts is £2,801,726. *Accounts; 1885-86.*

2. The Revenue Estimates for the year 1886-87 have not in any material degree been modified by the results of the year. It will be seen from figures furnished in a later page of this Statement that the revenue taken in the Revised Estimates of 1886-87 exceeds that shewn in the Budget Statement of the same year by £273,000. *Revenue Estimates; 1886-87.*

3. The Estimates of Expenditure have been disturbed by two causes which, at the time they were under preparation, were known to threaten uncertainty, but in other respects they are borne out by the result shown in the Revised Estimates. There has been a greater charge on the expenditure side than was provided under the head of Exchange, the difference being £474,600; and events in Upper Burma have compelled the Government to maintain a strong force there throughout the year, and to carry out the active operations necessary to secure and preserve order. The extra cost on this head for the year 1886-87 may be put at £860,000. The combined excess expenditure under these two heads during the year 1886-87 for which the Government has had to make provision amounts to £1,334,600. *Expenditure Estimates; 1886-87.*

4. The revision of the engagements with Provincial Governments has occupied the attention of the Government during the year. The five-year contracts with the Provincial Governments, which expire on 31st March 1887, have been renewed, during the year now closing, with the assistance of the Finance Committee. In the renewal of these contracts opportunity has been taken to submit the revenue and expenditure of the several Local Governments to the scrutiny to which the Government of India has subjected departments subordinate to itself. The matter is fully dealt with in the following pages; but it may be stated here that, after allotting to Provincial Governments the sums necessary for the services assigned to them, the revenues of the Government of India through the re-arrangement of the Provincial Contracts have been strengthened by a maximum sum of £640,100, though in the ensuing year the amount taken on the estimates is, for reasons which will be explained, £490,000 only. The Finance Committee's recommendations, and those of Sir Charles Elliott and his colleagues who were appointed when the Finance Committee had separated to carry to a conclusion certain inquiries, will for a considerable time continue to occupy the attention of the Government, extending as they do to a variety of subjects, and dealing with them in great detail. It is impossible to estimate at present what the net result may be of the decisions ultimately to be taken by the Government on the various suggestions of the Finance Committee; to whom, meanwhile, the Government is greatly indebted for their discharge of the task entrusted to them. The yield of the Income Tax during the year is taken in the Revised Estimates at £1,348,100 against £1,458,100, the figure entered in the Budget Estimates. Measures have come into force during the year for carrying into effect what is known as Article III of the Chefoo Convention. By that Article opium entering the treaty ports in China will in future pay a consolidated sum of taels 110 per picul, and *Enumeration of questions of importance under consideration during 1886-87.*

will be free of all the further inland duties known as lekin, instead of paying, as hitherto, 30 taels per picul duty, and whatever lekin might be imposed upon it in the course of its transit inland. The Convention came into force on February 1st, and is now in full vigour.

Estimates; 1887-88.

5. Turning to the ensuing year and taking as a guide the results shewn in the Estimates of the closing year, we find that the main points in the revenues and expenditure of the year which is commencing may be thus summarised. An addition has been made to Imperial revenues of £490,000 by the revision of the Provincial Contracts; but of this, £400,000 was anticipated in the receipts of 1886-87 in the form of contributions from certain Local Governments. A further sum of £256,300 has been taken as the estimated increase in the revenue of Upper Burma, and £625,600 has been added to the Railway revenue; a net total of £971,900 on the revenue side, to which must be added an item of £359,100 explained in paragraph 18 as taken on exchange; on the Expenditure side this is balanced by the additional charge of £285,400 in the expenditure necessary for Upper Burma and by £781,300 increased railway expenditure, debitable to revenue. Provision is made in the Estimates of 1887-88 for £344,984 for giving further effect to the increase to the effective strength of the army, decided upon in 1885-86. The excess of revenue on the above accounts is nearly the same as the excess of expenditure.

Taxation not proposed.

6. These remarks exhibit the main results of the past year, and the general outcome of the anticipations for the coming year. It may be added here that, in view of the causes which have led to an increase of expenditure, and to the other considerations which present themselves in connection with the financial situation, it is not the intention of the Government to add to existing taxation. The growth of expenditure in the Estimates of 1886-87 and 1887-88 arises in part from war charges and in part from a further fall in the exchange; and the Government is of opinion that it would be undesirable to seek to meet the deficit at present arising from these causes by the imposition of further burdens. The attention of Her Majesty's Government has, during the year now closing, been turned to the difficulties caused to the Government of India by the fall in silver, and the question of gold and silver currency has been submitted to a Royal Commission, the result of whose deliberations must be awaited. The present military expenditure in Upper Burma is of a temporary nature; and although considerable sums must be expended during the next two or three years in opening up communications in Upper Burma, and in providing the public buildings necessary for the accommodation of the garrison and for the conduct of business, it may be expected that with the return of order the revenues of Upper Burma will expand, and that its resources will become in an increasing degree available. For the present, therefore, until the outcome of present difficulties is seen more clearly, the Government considers that in providing for the necessary expenditure arising from its administrative needs, it should avail itself of resources which, in times of surplus, are assigned from its revenues to the construction of railways or to the diminution of the amount which it borrows annually for railways. Having thus indicated the outlines of the financial situation of the two years, 1886-87 and 1887-88, I proceed to a statement of the results shewn on the accounts of 1885-86, the Revised Estimates of 1886-87, and the Estimates of 1887-88, and of the measures to which the Government has had recourse in order to maintain equilibrium.

Accounts of 1885-86.

7. In the last Financial Statement the Revised Estimates of 1885-86 were given as Revenue, £73,598,100; Expenditure, £76,488,900; Deficit, £2,890,800. The Accounts closely correspond with the above result, and are—

	£
Receipts	74,464,197
Expenditure	77,265,923
Deficit	2,801,726

Results of Accounts, 1885-86.

The deficit, as explained last year, was entirely due to the excess expenditure caused by the military preparations of the year, in anticipation of war, to increased political expenditure, and to the cost of the expedition to Burma. There is nothing in the Accounts which calls at this late date for further explanation.

8. As the Budget provided for a surplus of £646,600, the final result was worse than the Budget by £3,448,300. The main items of this difference were as follows:—

	Better+.	Worse—.
Imperial—		
Opium	...	661,000
Delimitation Commission, Rawalpindi Durbar, and Political subsidies	...	412,900
Army—Quetta Force	...	2,116,500
„ Burma Expedition	...	604,900
Exchange	...	709,700
Railway Revenue Account	789,600	...
Reduction of Expenditure under Buildings and Roads	278,500	...
TOTAL	1,068,100	4,505,000
Net worse	...	3,436,900

Full explanation was given in the Financial Statement of 1886-87 under each of the above heads.

Results of Revised Estimates, 1886-87.

9. The Budget Estimates for 1886-87 were Revenue £75,798,700; Expenditure, £75,616,500; the estimated surplus was therefore £182,200. On the Revised Estimates for that year, after taking from the Famine Insurance Grant, as explained in paragraphs 68 *et seq.*, the amount necessary to obtain equilibrium the figures stand:

	£
Revenue	76,071,700
Expenditure	76,071,200
Surplus	500

Items of Excess Expenditure.

10. The Estimates of 1886-87 have been very materially modified during the course of the year, and the result above arrived at is due, as will be seen, to the adoption of measures which were not contemplated when the Estimates for the year were framed. Excess expenditure on account of military operations in Burma, to the amount of £860,000, was incurred during the course of the year. The Civil Estimates for Upper Burma were increased by £289,300, mainly on account of Police. Opium gave £328,700 less; the charge on account of exchange was increased by £474,600. There were other items of increased expenditure of less importance, but the total of the four items above enumerated amounts to £1,952,600.

11. The Revenues in the Revised Estimate, on the other hand, amounted to £76,071,700, against £75,798,700 taken in the Estimates, or an excess of £273,000 only. The following table shews the causes of difference between the Budget Estimates of 1886-87, and the Revised Estimates as now presented. As shewn in the foot-note of the Statement on page 53, the final result is reduced from a surplus of £182,200 to one of £500 only, a deterioration of £181,700. The details of this are shown in the difference columns of the statement, but they may be grouped as follows:—

	Better. £	Worse. £	
Decrease of Imperial Revenue	...	63,400	Total worse 181,700.
Increase of Imperial Expenditure	...	118,300	
Increase of Provincial Revenue	336,400	...	
Increase of Provincial Expenditure / Alteration of Provincial Adjustment	...	336,400	

The two last entries necessarily counterbalance, as an improvement or deterioration in the Provincial accounts merely increases or diminishes the Estimate of the Provincial balances left at their credit at the end of the year.

12. The minuter details of the four amounts last stated will be seen from the following statement, the Imperial columns being those with which we are immediately concerned. Explanations regarding the more important differences will be found at a later page :—

Revised Estimate, 1886-87, compared with Budget Estimate, 1886-87.

	Revenue.		Expenditure.

Total	—63,400	+336,400	+118,300	+336,400

13. It is explained in the course of this Statement that the Government had before it, in connection both with the year 1886-87 and 1887-88, the alternatives of deficit, fresh taxation, or temporarily withholding of the grant from Revenue to railways, and reduction of debt, under the head of Famine Insurance. For reasons which will be presently given, the latter step having been determined upon, the sum of £1,049,400 thereby made available to meet other expenditure has obviated deficit. Explanation will be given hereafter of the main items of difference between the Budget and the Revised Estimates of the year 1886-87; but these remarks will sufficiently shew what were the chief causes of unforeseen disturbance, and what is the character of the measures by the aid of which it has been decided to cope with them.

Temporary suspension of Famine Insurance Railway Grant.

14. The Estimates for the ensuing year, in which again equilibrium has been obtained by means of the surplus revenues otherwise assignable to the Famine Insurance Grant, are : *Results of Budget Estimates, 1887-88.*

	£
Revenue	77,460,200
Expenditure	77,443,500
Surplus	16,700

15. Compared with the Revised Estimates of the present year the receipts are £1,388,500 and the expenditure £1,372,300 in excess. If we take the Estimates in detail, the main items of increase of revenue under the several heads such as Railways are balanced by corresponding increase of expenditure. In the same way the increase in the revenues in Upper Burma nearly meets the increase of expenditure on account of the combined military and civil expenditure in that province. The net charge in the Estimates of 1887-88 under this head amounts to £1,770,500 distributed over charges in respect of Collection, Law and Justice, Police, Marine, Civil and Military Works, and Army, as against £1,741,400 in the Revised Estimates of 1886-87. The excess of expenditure over revenue on account of Upper Burma in the Estimates of 1887-88 will be seen from the following figures :— *Excess expenditure, Upper Burma.*

Upper Burma Receipts—	£
Revenue Heads	551,600
Public Works Receipts	2,100
	553,700
(Revised Estimate, 1886-87	£297,400)

Upper Burma Expenditure—	£
Police	737,000
Other Civil Charges	321,200
Irrigation Works	24,000
Civil Works	156,000
Military Works	300,000
Extra Army Charges	720,000
Marine ditto	66,000
	2,324,200
(Revised Estimate, 1886-87	£2,038,800)

16. An additional charge of £344,984 is included in the Estimates of 1887-88 under Army, being the sum provided to meet increased expenditure consequent on the prosecution of the measures for increasing the strength of the army determined on in 1885. The total estimate under Army is, however, only £126,400 in excess of last year, owing to a diminution in the military charges for Upper Burma in 1887-88 as compared with the present year. After deducting the contribution of £400,000 last year, there is a further net gain of £90,000 under various heads in connection with the revision of the Provincial Contracts. Minor items of increase in receipts or decrease in expenditure bring about the balance of the Budget which is shewn on the Estimates as will be seen from the statement below. *Army.* *Gain on Provincial Contracts.*

17. The Budget Estimates for 1887-88 work out to a surplus of £16,700 or £16,200 more than the Revised Estimates of 1886-87. The detail of this is as follows :— *Comparison of Budget Estimates of 1887-88 with Revised Estimates of 1886-87.*

	Increase.	Decrease.	
	£	£	
Imperial Revenue	967,500	...	£16,200 Better.
„ Expenditure	...	951,300	
Provincial Revenue	421,000	...	
„ Expenditure	...	421,000	
„ adjustment			

The details of these increases and decreases are shewn in the annexed statement :—

Budget Estimate, 1887-88, compared with Revised Estimate, 1886-87.

18. On the Revenue side the Land Revenue is on the whole better by £327,100—mainly in Upper Burma £209,900, and Bombay £134,100. Salt, which is almost entirely an Imperial Revenue, is estimated to give six or seven lakhs better returns, part of which is in Madras, and part in Upper India, where the opening of the Jhelum Bridge will improve the sales of Punjab Mine Salt. Both Stamps and Excise are estimated a little lower than the figures of the Revised Estimate of 1886-87. But a quarter of the revenue passes in the new Provincial Contract from Imperial to Provincial in the first case, and from Provincial to Imperial in the second. The figures against other Heads are affected by a similar transfer, but there is a net gain of £120,600, of which part is under Assessed Taxes and part is a payment of arrears under Tributes. Under Miscellaneous in the Imperial column there is an increase of £359,100, entirely due to the entry against Exchange. It represents for the most part the gain to the Government by its contracts with Railway Companies in accordance with which they make their remittances to this country at a rate which involves the payment to them in India of amounts smaller than those which at the exchange equivalent at present rates would have to be paid. There is a similar large receipt in the Accounts of 1886-87, but it is there counterbalanced by the exchange charge borne by Government in remitting money to pay off £1,128,800 of the Stock Receipt Loan of 22nd April 1854. In the Railway Revenue Account the total improvement is £625,600, which is mostly in the revenue of State Railways, as the returns of Guaranteed Railways are not estimated so high as those of 1886-87.

Remarks on financial situation and prospects.

19. Before entering into further examination of the measures proposed in 1887-88 in connection with the Budget, we may make a brief estimate of the present position and prospects of the finances, viewed, so far as at present we can see them, as a whole. It will be seen from the General Statement at page 54 that the Indian revenues have increased from £74,464,197 in the accounts of 1885-86 to £77,460,200 in the Estimates of 1887-88, or, in round figures, by

£3,000,000. Of this we may say that £1,680,000 are due to what are known as the "Principal heads of Revenue," in which are included £553,700 on account of the estimated revenue of Upper Burma, and £902,966 on account of Assessed Taxes; while £1,200,000 arise from increased Railway Receipts, and £100,000 from Irrigation, a total of £2,980,000, or, in round numbers, three millions. The year 1885-86 was a year of abnormal expenditure, and is therefore somewhat inconvenient for purposes of comparison on this side of the account. The expenditure, however, in that year is shewn at £77,265,923, the estimated expenditure of 1887-88 being £77,443,500. Eliminating in 1885-86 £3,050,000, on account of the net extraordinary expenditure connected with military preparations, and deducting similarly £1,770,000 in 1887-88, being the net excess of expenditure in Upper Burma, we have, in 1885-86, an expenditure of £74,215,923 against £75,673,500 in 1887-88; an excess of £1,457,577 in the latter year, to which must be added £1,406,000 on account of the Famine Insurance Grant, which has not been charged against Revenue in the Estimates of 1887-88. The net increased expenditure in the latter year, as compared with 1885-86, will then be £2,863,577. The chief items contributing to this are (*a*) excess expenditure (largely composed of the increased charge for interest) on the Railway Revenue Account, the figures of which, excluding exchange, are for 1885-86 £12,820,911, and for 1887-88 £14,490,300, a difference of £1,669,389 (these charges are abnormally high in 1887-88), (*b*) Exchange (£1,104,912), and (*c*) charges arising from the increase to the strength of the army. Against the £3,000,000 increased receipts we thus have £2,863,577 net increase shewn above *plus* £1,770,000 extraordinary charges, or £4,613,577, the difference, roughly speaking, being the amount which we have met by the transfer of the charges under Railway Famine Insurance to Loan.

20. The net addition since 1885-86 to Imperial Revenues, as distinguished from Provincial, may be put in round numbers at £880,000 on account of Income Tax, and £640,000 by the revision of the Provincial Contracts, or £1,520,000. We are engaged in examining further projects of retrenchment, though we shall not, for some time to come, be able to say what will be the amount of our further economies. On the other hand, we shall have brought upon our estimates before long the total addition to military charges consequent on the increase to our forces. We may expect that this will be more than provided for by the additions to Revenue just indicated. We may also consider that, with the exercise of prudence, the growing receipts of our railways will about equal the future increase of expenditure on railways debitable to revenues, including interest on debt incurred for construction of State Railways and Payment of surplus profits on Guaranteed Railways. To the growth of other heads of receipt we may look for an equivalent to the interest charges on account of such capital outlay as that for defence works. Apart from war or famine there remains, so to speak, uncovered, the future growth of expenditure connected with exchange, a source of gravest anxiety regarding which I have no desire to modify the remarks recorded last year. This item has increased from £4,411,437 in the Accounts of 1885-86 to £5,500,500 in the Estimates for the year 1887-88. It is impossible to foresee what will be the future increase; but it may be said that, so far as an unfavourable exchange is due to larger drawings by the Secretary of State owing to increased purchases of material for railway construction, the ratio of increase will be lessened in proportion as the railways now in course of active construction by the State approach completion. It must also be remembered that the net surplus of railway receipts will become more considerable, on the one hand as the lines now in course of construction are opened and as capital at present unproductive yields returns, and on the other hand as the expenditure remaining on account of construction diminishes. In both these directions some set-off may be looked for against increasing charges on account of exchange. The excess military expenditure

on account of Upper Burma will disappear, it may be hoped, in next year's estimates. But the Civil expenditure will probably, for the next two or three years, be in excess of the revenues of that Province, and so long as this proves to be the case, it must continue to be of the nature of an extraordinary charge, for which some special provision such as that of this year may have to be made. Apart from the question of silver, there would seem, therefore, to be no grounds for anxiety greater than those here indicated. Much caution is needed for the present, because we cannot look forward to relief through the immediate increase of our net receipts in any material degree from the opening of new railways, or the slackening of construction; and because in proportion as we utilise our surplus revenues for administrative needs we draw upon resources which form the first reserve in the event of an outbreak of famine. But, (excepting silver), among the elements of calculation which I have enumerated there are as many favourable to increase of revenue as to growth of expenditure; and it may be added that while the latter, such as we know them to be, will gradually, from the nature of the case, become less onerous, the former are expansive and elastic. It may be added in this connection that £53,343,790 India 4 per cent. sterling stock are redeemable in 1888, and that, on the redemption of this stock, some relief to the finances may be expected.

Necessity of explanation regarding course pursued in respect of Provincial Contracts and Famine Insurance Grant.

21. I now go on to explain the considerations by which the Government has been guided in dealing with the revision of the Provincial Contracts and the Famine Insurance Grant, measures which occupy a prominent place in connection with the Budget of 1887-88, and in regard to which its policy will be fully stated. The decision taken in regard to these two heads has largely contributed to bring about the balance between receipts and expenditure. The former has added to the Imperial Revenues a sum of about £550,000 annually for the next five years; the latter, though a measure temporary in character, has decreased the charges against Revenue by the sum of £1,248,000. I hope not to be tedious if I examine at some length the character of the financial relations established between the Government of India and the Local Governments by the successive arrangements which have been concluded since 1870, as well as the nature of the obligations imposed upon the Government under the present form of the Famine Insurance scheme. It is necessary to do this in order to explain why the Government has felt free to avail itself of the resources existing in either of these directions. It was inevitable that, on the expiry of the five years' term of the late contracts, at a time when the finances of the Government of India are subjected to excessive strain, the assignments made to Provincial Governments for a fresh term of years to enable them to meet the charges of provincial administration should be reviewed with special regard to economy. The result of the arrangements concluded between the Provincial Governments and the Government of India has been to reduce the Provincial revenues at the time existing, and the circumstances in which reductions have been made, no less than the system under which they have been made, may have been temporarily lost sight of. In a Resolution published in the *Government Gazette* of 28th January 1887, the Government of India has already stated, in general terms, the principles by which it was guided in the arrangements recently concluded with Provincial Governments. I shall have occasion to return presently to that Resolution; but my object at present is to recal the past history of the measures which have been the outcome of what is known as the policy of decentralisation, and to prove that our procedure in the late revisions has been identical with the procedure laid down in past times. I believe that if we had dealt with the question in any manner other than that in which we have disposed of it, we should have made ourselves justly liable to the charge of introducing

Proposed review of past measures in connection with provincial finance.

elements into the policy destructive to its stability, and inconsistent with the security of the finances of the Government of India, which are the only serious guarantee for the independence of Provincial finance.

Object of the following remarks stated.

22. I shall, in the first place, recal the fact that in 1870 it was as much the aim of the Government of India to strengthen its own finances as to improve the relations existing in financial matters between itself and Provincial Governments. To that end, I shall explain, the Government of India not only required Provincial Governments to make good from their own resources the balance between the expenditure allotted to them and the funds assigned to meet this expenditure, but, at a later date, when the matter had passed into a further stage, it reserved to itself, with certain exceptions, all increase of revenue accruing during the term of what are known as the "Contracts." It will be then shown that the Government of India has refused to recognise any claim against it to furnish funds except those allotted simultaneously with given heads of expenditure to meet the further growth of expenditure, in the branches of administration assigned to Local Governments; and that, on the contrary, it has repeatedly referred to its discharge from all obligations under this head as one of the principal objects which it has had in view. While the Government of India has left to Local Governments the use of their share in the increase, during the contract term, of the revenues assigned, it will be explained that it has, in specific terms, and on successive occasions,—in 1882, as in previous years—laid down and acted upon its claim to review and revise its share in the common revenues when the term of contract expired. It has been compelled again, on the present occasion, to act in accordance with this last reserve, because, important though they unquestionably are, the interests of the Local Governments in matters of finance are second to those of the Supreme Government, upon which rests the sole responsibility for the maintenance of the financial credit of India. The only question, therefore, which can arise out of the measures recently taken in connection with provincial finance is in connection with the extent to which the Government of India has used its powers. On this point the necessary information will be given, and the resources left at the disposal of Provincial Governments will be stated.

23. I propose to shew that the following four positions, in pursuance of which we conducted the late revisions, have in past years been established in the course of the arrangements connected with the Provincial Contracts. They are as follows:

Enumeration of four positions established in past years in connection with Provincial Finance.

First: That the amount of the funds assigned to Provincial Governments need not exceed, or equal, the amount of the expenditure assigned at the time when the contracts are made; Provincial Governments being expected to provide by their own resources the difference between the assigned revenue and expenditure.

Second: That the growth of provincial expenditure during the term of a contract must be met from growth of provincial revenues, except in cases where considerable expenditure is undertaken by Local Governments to meet the wishes of the Government of India, and to carry into execution projects which are pressed upon it by that Government.

Third: That the Imperial Government reserves its claim, at the expiry of a term of contract, to such share as the circumstances of the time may make necessary in the increase of revenues which have accrued to the Province during the term of the contract, but which were reserved to the Provincial Government during such term.

Fourth: That the power of enforcing reduction, on the occasion of a new Contract, of the assignments of revenue made at the previous contract, is a condition implied in the system of Provincial Contracts, and has been uniformly acted on.

24. The orders in accordance with which these four several conditions have been laid down more or less overlap one another in point of time, and it is not very easy precisely to separate the circumstances in which each was determined. But they may be grouped more or less exactly round the successive arrangements of 1870, 1877, and 1882, and it is in that order that I will take them. I begin with 1870. The Resolution of December 14th, 1870, which was the first embodiment of the views and intentions of the Government of India on this subject, commenced by declaring that it was desirable to enlarge the powers and responsibilities of the Governments of Presidencies and Provinces, in respect to the public expenditure in some of the Civil Departments. It developed the reasons which had led the Government of Lord Mayo to that decision; and in paragraph 8 it indicated the liability to which, under its provisions, Provincial Governments would be required to subscribe in order to obtain the enlargement of powers and responsibility which it was the object of the Government of India to assure to them;

Measures of 1870 in regard to the first of the above four positions.

"It would have been satisfactory had His Excellency in Council been able to propose the enlargement of the power and responsibility of the Local Governments without charging upon local resources any part of the existing Imperial expenditure. This cannot be done; but it has been determined to make as small a demand upon these resources as possible. At the same time, it should be remembered that the relief of the Imperial finances has been a principal object in the discussion of such measures on former occasions."

Resolution of December 14, 1870.

That paragraph shews the important reserve as to the relief of the Imperial Finances with which, at its inception, the system of decentralisation was accompanied. The grants assigned, with certain branches of expenditure, to the several Local Governments were less than the grants made in the previous year for the same services; the balance was to be found, whether by economy or by local taxation, by Local Governments themselves. It was declared to be impossible to introduce the system without making an initial demand on the resources of Local Governments, though it was desired that the demand should be as small as possible. The amount by which the expenditure of the several branches of the administration assigned exceeded the revenues allotted to meet it was £330,800, or 6 per cent. on the whole arrangement. It was expected that the Local Governments would furnish themselves, not only with this sum, but, which is of no less importance, with all further sums necessary to meet the growth of expenditure in the departments assigned to them. In the course of his Financial Statement for 1871-72, Sir R. Temple wrote—

Reserves established therein, and reductions made in funds assigned for expenditure.

Sir R. Temple.

"The Local Governments are to have a fixed annual allotment from the General Exchequer for these particular Services, and are to appropriate as Local Income all Receipts connected therewith. They are to regulate (subject to certain General Rules) all the Expenditure on those Services. If the existing income, namely, Imperial Allotment *plus* Departmental Receipts, shall suffice for the requirements of that Expenditure, then that is well; if it shall not suffice, then the Local Governments are not to apply to the Government of India for increased Grants. They must raise what they need by Local Taxation, or by such like means (subject to our central control) if they fairly can. But if they find that they cannot fairly manage this, then they must necessarily do without the increased expenditure. However much the necessity for doing without the increase may be regretted, there is no help for it. This is the only way of following the good old rule of cutting coat according to cloth. However important progress and improvement may be, financial safety is more important still.

* * * * * * * *

"These allotments have been fixed on the basis of the Budget Grants for 1870-71 (after the deduction of the £331,038 rateably distributed). The objections which might be urged in detail against this mode of fixing the allotments have not, indeed, been overlooked. But certainly any other method that could be devised would have stirred up controversies and difficulties which might never be determined, and which would have caused an indefinite postponement of the whole measure.

"If it were urged, too, that the Grants for 1870-71, having been very economically fixed, afford too low a standard for future Allotments, we should reply that these Grants were really as much as we could possibly afford; and that we are not likely to be able to afford more for some time to come.

* * * * * * * *

"How the several Local Governments will deal with their respective shares in the retrenchment of £331,038 from the grants of 1871-72, and how they will provide whatever additional sums may be required for the finance of the services now entrusted to them, is more than I can say, at present. It is, however, clear that they have, to some extent, already made up, or are making up, their quotas of the retrenchment by savings and reductions of expenditure—a method, in my opinion, the most satisfactory of all."

Lord Mayo, on the 18th March 1871, said:—

Lord Mayo.

"Then under the *eight* Heads, it is proposed to entrust administration, under a few general conditions, to Provincial Governments, and that a fixed contribution will be made from Imperial Revenue every year. I shall have something to say, hereafter, as to the amount of that contribution. It is intended by the Supreme Government (and I think that there should be no doubt on this point) that that sum should for some time, at all events, be a fixed sum. It is impossible to prophesy or say, at present, what can be done in the far future; but I should be misleading the Local Governments if I were not to say that it is our opinion that these sums are now fixed at an amount which cannot be exceeded for, at least, a number of years. I think it desirable that this should be perfectly understood, because one of our objects is the attainment of as great an amount of financial certainty as is possible. We believe that, in justice to other public claims which are certain hereafter to be made on Imperial Revenue, in view of increased charges for the payment of Interest and other objects, we cannot without recourse to large additional Imperial Taxation increase this sum as now fixed to any very considerable amount We know that, if it is necessary, the sums which have been hitherto allotted for this purpose can be increased by Local Taxation in a manner much less burdensome and much less offensive to the people than they could be by Imperial Taxation. If it is necessary or desirable to spend money, that money must come from some source. It is possible that the wants of the Local Governments may increase, and I dare say they will; but if they do, we believe, after the most mature consideration, that these wants can better be supplied within the limits of the Provinces themselves, than they can be by adding to the Imperial Taxation of the Empire and the general burdens of the people."

Remarks on the above extracts.

25. It is evident from these extracts that in the minds of those who introduced the Resolution of 1870, and the policy which it embodied, the assignments of revenue to Local Governments were not to be necessarily equal to the present expenditure in the several branches of administration assigned to them. The system introduced in 1870 has been since that date developed, and on three subsequent occasions, *viz.*, in 1877, in 1879, and in 1882, new arrangements have been entered into with Local Governments. We shall see that in 1877, when the system was developed, the practice adopted in 1870 was followed, and that on the second, as on the first occasion, Local Governments were expected to make good for themselves the excess of assigned expenditure over assigned revenue. Financial circumstances, on the latter of the three occasions referred to, *viz.*, in 1882, enabled the Supreme Government to deal at its discretion on terms exceptionally favourable to some of the Local Governments; but it has never in any way intimated that, in the future exercise of such discretion, it would follow the precedent of 1882 rather than that of 1870. If, on the present occasion, the assignments of revenue under specific heads of expenditure have been reduced, it has been done only in the proportion which the enquiries of the Finance Committee have shewn that expenditure itself could be cut down.

Second position established in past years.

26. I pass now to the second of the four heads indicated in a preceding paragraph, *viz.*, that the growth of provincial expenditure during the term of a contract must be met from Provincial revenue, so far as considerable expenditure is not undertaken by Local Governments to meet the wishes of the Government of India, and to carry into execution projects pressed upon them by that Government. The Government of India has at all times, as, for example, in the extracts already quoted, declined to recognise its liability for any addition to the assignments made to Provincial Governments, on the ground of the increase of provincial expenditure in the departments assigned. Not infrequently during the recent discussions in respect of the revised contracts, there has been much misconception as to the claims of Provincial Governments for assignments of revenue sufficient to meet, not existing expenditure only, but increases of expenditure contemplated by Local Governments during the ensuing five years of the contract. The following explanation will shew that any such claims have never been on previous occasions, whether in 1870 or subsequent to 1870, in any way recognised, and that to have admitted them now would have been quite inconsistent with the spirit of the whole system.

Modifications introduced in 1877 into the system.

27. It is necessary to say here that in 1877, the next occasion on which the provincial arrangements came under consideration, an important advance was made in the system of decentralization. The advance was in two directions *firstly*, some additional heads of expenditure were transferred; and *secondly*, some heads of receipt were made wholly or partially provincial, the amount of which took the place of a portion of the fixed assignment of 1870. Before discussing the latter, which was the more important, I will notice the advance made in the way of transferring additional heads of expenditure, an extension of the system which was carried out in precisely the same direction and on the same lines as the measure of 1870, which has been above dealt with.

Reductions made in funds assigned for expenditure in 1877.

28. In calculating the amounts for the several heads of the expenditure then for the first time made provincial, the figures were taken as nearly as possible at what were believed at the time to be the normal amounts. But from the total of the expenditure under the new heads then for the first time transferred a retrenchment of about 5 per cent. was made. In the case of the North-Western Provinces the amount of this retrenchment was ₹3,54,000; in other words, the Local Government was expected to undertake the management of the new expenditure with an initial grant about 3½ lakhs less than the Imperial grants hitherto assigned for the services. The difference in the assigned departments between the total expenditure after this reduction and the Provincial receipts was to be the net Imperial assignment to the Provincial Government, which was to make good, by such methods as it thought fit, the deduction of 5 per cent. above indicated. In Oudh the retrenchment for the newly transferred services was also at 5 per cent., amounting to ₹73,000. In Bengal the 5 per cent. retrenchment was similarly made, amounting to ₹5,90,000. Sir John Strachey, in his Financial Statement of March 1877, thus described the result of the arrangements made with the North-Western Provinces, Oudh, and Bengal:—

"Altogether the immediate saving to the Imperial Treasury by the arrangements entered into with Bengal, the North-Western Provinces, and Oudh is £101,780, beside guarantee of normal increments to the transferred revenues amounting to £44 000. The estimates of the year are thus better by £145,700 than they otherwise would have been. I hope that, when it becomes possible to enter into similar arrangements in other Provinces, equally satisfactory results may be obtained."

In the course of the year 1877-78 similar arrangements were concluded with the Governments of the Central Provinces, Bombay, and the Punjab. The retrenchments made from the newly transferred heads were respectively, in the case of each Province, ₹90,000, ₹73,000, and ₹2,41,000. Besides the direct retrenchments referred to above, the Imperial Government also benefited by the arrangement made in some Provinces for the transfer of productive public works to Provincial control, and by guarantees of increased revenue under some of the transferred heads. The total benefit to the Imperial Finances was stated to be about £400,000 in the Financial Statement for 1878-79 (para. 21):—

"The measures taken during the past year for increasing the powers and responsibilities of the Local Governments, the nature of which was described in the Financial Statement for 1877-78, will, it is believed, when they are complete, improve the financial position of the Government of India by an annual sum of nearly £400,000. No part of this improvement is due to fresh taxation. It is the result of the administrative changes and improvements to which the policy of decentralization has led. The original measures taken in 1870 by the Government of Lord Mayo had previously led to a saving of £330,000, and this policy, which has given increased efficiency to almost every branch of the Administration, has thus added to the Imperial Revenues a sum of about £700,000 a year, without the imposition of any fresh burdens on the people. These measures of decentralization have now been more or less completely carried out in Bengal, in the North-Western Provinces and Oudh, in the Punjab, the Central Provinces, and in Bombay, and in all cases with the complete approval of the Local Governments. The only great province in regard to which no satisfactory arrangement has hitherto been found practicable is Madras."

Further changes effected in 1877. Transfer of Revenue.

29. The second and more important advance made in 1877 was, as I have said, the transfer to Provincial Governments of Revenue. In 1870, the only Receipts which were made Provincial were the departmental receipts corresponding to the head of expenditure transferred. These were comparatively unimportant in amount. All the main heads of Revenue were retained as Imperial. In 1877, the Local Governments were given an interest in some of the main heads of Revenue. Sir John Strachey, in his Financial Statement of March 15, 1877, said (para. 5)—

Sir John Strachey.

"The weak point in those measures (the measures of 1870) was this, that, while they transferred to the Local Governments the responsibility for meeting charges which had an undoubted tendency to increase, the income of which the Local Governments had to dispose, although not quite a fixed amount, had little room for development. The difficulty has perhaps not, hitherto, been generally felt to a serious extent, because it has been met by economy and good management: it must, however, be felt hereafter; and, for this and for still more important reasons, I have always maintained that the system of Provincial Assignments established in 1871 ought to be applied not only to expenditure but to income. What we have to do is, not to give to the Local Governments fresh powers of taxation, but, on the contrary, to do all that we can to render fresh taxation unnecessary, and to give to those Governments direct inducements to improve those sources of existing revenue which depend for their productiveness on good administration.

"How is this better administration to be obtained? The answer seems to me simple: it can be obtained in one way only; not by any action which gentlemen of the Financial Department, or any other Department of the Supreme Government, can take while sitting hundreds or thousands of miles away in their offices in Calcutta or Simla; not by examining figures and writing circulars; but by giving to the Local Governments, which have in their hands the actual working of these great branches of the revenue, a direct and, so to speak, a personal interest in efficient management. It may be very wrong, but it is true, and will continue to be true while human nature remains what it is, that the local authorities take little interest in looking after the financial affairs of that abstraction, the Supreme Government, compared with the interest which they take in matters which immediately affect the people whom they have to govern. When Local Governments feel that good administration of the Excise and Stamps and other branches of revenue will give to them, and not only to the Government of India, increased income and increased means of carrying out the improvements which they have at heart, then, and not till then, we shall get the good administration which we desire; and with it, I am satisfied, we shall obtain a stronger and more real power of control on the part of the Central Government than we can now exercise."

Reserves with which the transfer of revenue was accompanied.

30. It is not necessary to dwell on the reasons which led to the adoption of the measures of 1877 further than to call attention to the safeguards to the Imperial Revenues with which the change was accompanied. In the first place, an amount, corresponding to the average at which the revenues transferred had increased in the past, was, as a rule, reserved during the currency of the contract to Imperial Revenues. In the second place, the right of the Imperial Revenues was also laid down to share during the period of the contract, in accordance with the terms thereof, in any increase over and above what was estimated to be the figure of average increase, which might be caused by the greater care in the control and management of the revenues. In the case of Bengal, the Local Government was allowed to retain during the term of the contract the whole increase in consideration of the fact that a considerable burden was then being imposed on that Province in order to guarantee to the Imperial Revenues the interest on the capital spent on the construction of canals and railways.

Remarks on the above.

31. It will be seen, therefore, that in 1877, as in 1870, the funds assigned from the Imperial to the Provincial Governments fell short of the scale of expenditure existing at the time of transfer; and the balance had to be made good from their own resources by Provincial Governments. It will also be observed that not only was no provision made by the Imperial Government for the assignment of any further grant to meet increase of expenditure during the term of the contract, but a guarantee was taken from Provincial Governments for the payment during the term of contract to the Imperial Government of increased revenues under certain heads. For increase of expenditure over the initial scale the Local Governments had to depend only on such improvement over and above the estimated ordinary increase in the revenues made provincial as they might by good management be able to secure. In later times the Provincial Governments have been allotted a share in all increase whatever of the assigned revenues.

Fixing of definite term of Contract.

32. In addition to the two safeguards to the Imperial Revenues abovementioned a third was the fixing of a term for the duration of the contracts. The periods fixed for the duration of the contracts of 1877 from 1887-88 were as under:—

North-Western Provinces	Two years.
Oudh	One year.
Bengal	Five years.
Bombay	Five „
Central Provinces	Three „
Punjab	Three „

The contracts with Burma and Assam were made for five years from 1878-79. The above periods were subsequently either extended or shortened, with the consent of the Local Governments, so as to end in March 31, 1882.

Third and fourth positions established in past years.

33. All the contracts of 1877 were therefore made for definite limited periods, at the close of which the terms were to be open to revision, and in particular the division of the increase of revenue under the transferred heads between Imperial or Provincial was to be re-adjusted. This last mentioned condition attached to the transfer of receipts to Provincial Governments brings us to the third and fourth of the four positions to which I have referred as having been established between the Government of India and Provincial Governments, *viz.*, the claim of the former on the expiry of the contract to a share in the increased revenue enjoyed by Provincial Governments during the term of a contract, and the liability of the latter to a reduction in the amount of Revenue assigned to them under the contract preceding. In 1877 it was declared to be the intention of the Imperial Government under the Provincial system to revise the terms of a contract on conditions which would be financially less lucrative to a Local Government if, on the expiry of the period fixed for the contract, circumstances

should so require. To show that this was an essential condition attached to the Provincial system from the time when main heads of receipt were first made provincial, I quote two paragraphs from the letters embodying the contract made in 1877 with the North-Western Provinces and Bengal.

First, as to the North-Western Provinces—

Case of the North-West Provinces, 1877.

"The conditions to be annexed to the proposed transfer to the Local Government of the Revenue from *Excise*, *Stamps*, and *Law and Justice* are as follows. These items of Revenue have, for some time past, grown satisfactorily, year by year: the net Revenue in 1875-76 from these sources, throughout India, was more by R52,20,000 than the corresponding net Revenue in 1870-71: the Government of India is not in a position to part with this normal growth of these Revenues. On the other hand, while it is, perhaps, too much to expect that these Revenues should continue, without more special attention than is now bestowed upon them, to increase at the rate of upwards of R10,00,000 a year, excellent results may, doubtless, be anticipated from the added care of the Local Governments when they have a particular interest in the development of these Revenues. In the North-Western Provinces, however, these Revenues have grown less, and fluctuated more, than elsewhere; and the Government of India will, therefore, be satisfied if, for the next two years, the Government of the North-Western Provinces will give to the Imperial Treasury half of any net increase that may result from its management of these Revenues: the Government of India undertaking, on its part, to bear half of any deficit that may appear. At the end of two years this arrangement will be open to revision. While the Government of India is most desirous that the Local Government should share largely in any increase of Revenue to which improved administration may lead, it is evidently reasonable and necessary that the Imperial Revenues should share in this increase. It must also be understood, as already stated, that the Government of India does not propose to surrender any portion of that normal growth of these Revenues which might have been expected to continue if no change of system had been made. (*Government of India No. 852, dated 10th February, 1877, to Government, North-Western Provinces.*)

Secondly, as to Bengal:—

Case of Bengal, 1877.

The revenue from *Excise*, *Stamps*, and *Law and Justice* will be thus surrendered for the next five years: thereafter, the whole arrangement will be subject to revision; and the Governor General in Council must then probably claim for the Imperial Revenues a share of any improvement which may ensue under the management of the Local Government in excess of the stipulated annual increments belonging to the Imperial Treasury. While the Government of India is most desirous that the Local Government should benefit largely by any increase of revenue to which improved administration may lead, it is evidently reasonable and necessary that the Imperial Revenues should eventually share in such increases. But, inasmuch as a considerable burden is being now imposed upon the Province of Bengal, in order to guarantee to the Imperial Revenues the interest on the capital spent in Bengal on the construction of canals and railways, the Government of India has consented, for the present, to abstain from claiming any part of the further increase which may be expected to these revenues in consequence of the greater attention that they will now doubtless receive from the Local Government. (*Government of India No. 1899, dated 29th March, 1877, to the Government of Bengal.*)

34. The quotations which I shall make in noticing the contracts of 1882 will show that the principle was re-affirmed and acted on in that year; the last occasion on which, previously to the present year, the contracts have come under revision.

Expansion of the system in 1879 in the case of Burma and Assam.

35. The arrangements with Burma and Assam, it may be added here, were not completed till later in March 1879. They involved a further expansion of the system. The new feature in these two contracts was that the equilibrium between the Provincial revenue and expenditure was secured, not by the grant of a lump assignment to make good the difference between the expenditure and revenue made Provincial, but by the grant of a share in the reserved Imperial revenues—one-fifth of net Land Revenue in Assam and one-sixth of Land Revenue, Forest Revenue, Rice Duty, and Salt receipts in Burma. In other respects these contracts were similar to those of 1877-78 with other Governments.

Proceedings of 1882.

36. We come now to 1882. The arrangements then made were embodied in Resolutions dated 30th September 1881 and 17th January 1882. The principles on which the settlement of 1881-82 was effected may be best described in the words of the Resolution of September 30, 1881:—

"In the first place, it is now proposed to apply to the whole of India the principle upon which the most recent settlement, namely, that with Burma in 1879, was framed. That principle is that, instead of giving Local Governments a fixed sum of money to make good any excess of provincialised expenditure over provincialised receipts, a certain proportion of the Imperial revenue of each Province should be devoted to this object. Certain heads, as few in number as possible, are wholly, or with minute local exceptions only, reserved as Imperial; others are divided, in proportions for the most part equal, between Imperial and Provincial; the rest are wholly, or with minute local exceptions only, made Provincial. The balance of transfers, being against the Local Governments, is rectified for each Province by a fixed percentage on its Land Revenue (otherwise reserved as Imperial), except in Burma where the percentage is extended to the Imperial rice export duty and salt revenue also. The advantage of this system over that which now generally prevails is that the Provincial Governments will be given a direct interest, not only in the provincialised revenue, but also in the most important item of Imperial revenue raised within their own Province."

37. In the contracts of 1882 the reservation of the estimated increase of receipts to Imperial was not separately continued. The reservations of the estimated increase and of the excess over and above the increase estimated were run together by providing in certain proportions for a division of the actual receipts between Imperial and Provincial.

38. It will be remembered that in 1881-82 the finances were considered to be in such a flourishing condition that measures were adopted having for their end the remission of large amounts at that time yielded by taxation. The sum remitted when the Budget of 1882-83 was brought forward was nearly £3,000,000. In these circumstances it was to be anticipated that the Provinces would be enabled to share in the general prosperity. The revenues assigned to them were equivalent to the expenditure, as at that time existing, and additional grants were in some cases allowed. In the Provincial Statement of 1882-83, the general result of the new Contracts was summed up to the following effect. The Imperial Government might have resumed £470,000 a year as being in excess of what was needed to cover Provincial expenditure. Of this sum it gave back to the Provincial Government £77,900 for improving the position of the Subordinate Civil Services, for general purposes in the Central Provinces, &c.; £20,000 to the Madras Government for Provincial Public Works, and £326,000 to the North-Western Provinces and Oudh, of which £10,000 was for additional kanungos in Oudh, and the remainder (£316,000) was in the form of remission of taxation. It further remitted a lump sum of £360,000 equivalent to £72,000 a year for five years, on account of the first year of the new settlements by means of a transfer to the Provincial Accounts of Bengal (£285,000), Burma (£20,000), and the North-Western Provinces (£55,000) to be effected before the close of the current year 1881-82. The total grants and remissions amounted to £496,000 a year. The net result was a loss to the Imperial Government of £26,000 for five years.

39. While the Imperial Government considered itself justified, in the state of its finances as then existing, in remitting £326,000 provincial taxation in the North-Western Provinces and Oudh,—taxation which had for its object the provision of wages to village accountants, a new charge which from that time the Government voluntarily transferred to its own shoulders,—it was careful both in its declarations and in its practice to maintain its right at the end of the five years' term, then commencing, to reconsider in its own favour the assignments to Provincial Governments. In the following words it deliberately repeated the reserves which it had established in 1877: "It is to be distinctly

Reserves embodied in Resolution dated 17th January 1882:

understood," the Government of India wrote in its Resolution dated 17th January 1882, "that the Imperial Government reserves to itself, on the expiration of the term, the power to revise the settlement, and to withdraw from any Local Government such portion of its grant as cannot then be continued without injustice to other Provinces whose means are straitened, or limitation of Imperial undertakings which need early development. To the Local Governments such revision will afford no cause for complaint, because the inducements now offered for entering into an agreement are the freedom to administer their own resources and to apply at will (subject to the general standing orders) any increase reaped during the period of settlement alone. On the other hand, while the Local Governments will undertake, for the term of the settlement, all ordinary fluctuations in their revenues and expenditure, and to make such increases in the latter as may be necessary on the existing basis of administration, due allowance will be made, by modification of the fixed percentage of land revenue or otherwise, for any material alterations in the nature of their income, resulting from legislation or organic change of financial system effected for Imperial reasons."

40. This reserve was again laid down in addressing the Bengal Government:—

in letter to Bengal Government dated 14th January 1882:

"The Regular Estimate being thus recognised as the basis, the question as to the terms upon which the new settlement is to be effected may next be considered. The principle that a Local Government is not entitled to receive, as of right or even in equity, a continuation during a new settlement of the whole increase in its Provincialised receipts which has occurred during the preceding one, is beyond serious dispute. By the nature of the case all such settlements are provisional, and must always be so. The financial administration of India is necessarily a whole. For the sake of diminution of friction and other well-known objects which need not be specified, the Imperial Government delegates a share in this administration to Local Governments. It makes a rough calculation that a certain portion of the general income, together with the increment thereon, will suffice to meet the expenditure which it retains under its own control, and it hands the rest over to Governments, with the obligation to meet out of it certain necessary expenditure and with leave to spend in addition, and as they please, any increment in the assigned income which they can manage to create. But it cannot bind itself to this proportion for ever, because the calculation must necessarily be a rough one, and is liable to be vitiated by unforeseen failure of resources, or growth of charges, whether in the share of financial administration which it retains or in that which it delegates. An examination of the apportionment at convenient periods, and a re-adjustment of it in any particular found necessary, are indispensable. A surrender of the right to this would be analogous in nature and effects to the Permanent Settlement of Bengal. To the Local Government, such a periodical revision involves no hardship, because it has enjoyed, during the whole expired term, the freedom to administer its own resources and to apply at will any increase reaped from them, which were the inducements under which it entered into the contract." (*Secretary to Government of India, Financial Department, to Secretary to Government of Bengal, No. 284, dated 14th January, 1882.*)

41. In the Financial Statement for 1882-83 Sir Evelyn Baring expressed similar views:—

and in Financial Statement, 1882-83:

"I need hardly say that when the contracts, which are about to close, were made, the Government of India reserved to itself the right of revising them on expiry. It is, indeed, obvious, that in view of the manifold demands on the Imperial Treasury, and the necessity for affording relief to Provinces whose means are straitened, the Government of India cannot forego all its claims on the increments of Revenue which arise from the growing wealth and prosperity of the country. We have, however, wished to approach this question in a liberal spirit, and not to make any revision which will be favourable to the Imperial at the expense of the Provincial Revenues, except in cases where this course can be adopted without embarrassing Provincial Finance or checking the growth of the material prosperity of the Province."

42. Practical effect was given to these conditions by the ruling of the Government of India that the province of Bengal could, from the com-

Reductions of assignments in the case of Bengal and the North-West Provinces.

mencement of the year 1882-83, afford to relinquish to the Imperial Government its surplus of 30 lakhs of rupees per annum. An annual increment of 6 lakhs, and probably more, it was explained, would still remain to the Province; it would start, moreover, with the abnormally large balance (including the restored contribution) of 39½ lakhs of rupees. If this did not suffice for its expanding wants the resource of local taxation remained. It was subsequently arranged that the net reduction should be 20⅓ lakhs; the precise figure taken is, however, unimportant; what is important to the present purpose is to shew how, in 1881-82, both in the reserves which it laid down and in the effect which it at the time gave them, the Government of India re-affirmed and put into execution the principle that a Local Government is not entitled to receive as of right, or even in equity, a continuation during a "new Settlement of the whole increase in its Provincialised receipts which has occurred during the preceding one." The principle was also applied in the case of the North-Western Provinces and Oudh, from which province a sum of 13 lakhs was taken.

Resumé of preceding remarks.

43. The above *resumé* of the arrangements entered into between the Imperial and Provincial Governments during the last 17 years will, I hope, enable us to approach the examination of the arrangements recently effected with a clear understanding of the claims which, on the one hand, Provincial Governments may confidently put forward, and on the other of the reserves and limitations with which the Government of India, under the sense of its ultimate responsibility for the conduct of the Indian finances, has from the commencement thought it necessary to safeguard its concessions. It shews that at no time has the Government of India contemplated relaxing its control over the revenues when the period of resettlement came round. Although it has desired and still desires to give every possible encouragement and liberty of action to Provincial Governments during the currency of their contracts, it has never lost sight of the fact that the revenues assigned them are the revenues of India, though alienated for a term to Provincial uses with a view to their better and more economical administration. While allowing to the Provincial Governments considerable latitude and discretion in the disposal of the revenues assigned them, while ensuring them the revenues necessary to their expenditure, a guarantee against all serious difficulties, and a substantial share in the increase of the revenues allotted them during the period of the settlements, the Government of India has never admitted that on the expiry of such period the settlements must remain undisturbed, and that no regard should be paid in recasting them to the obligations, or to the financial prospects of one of the parties to the settlement. It may be urged that the necessity of exercising its powers of revision by the Government of India in a sense possibly favourable to itself lessens the interest of Provincial Governments in their finances, and diminishes the advantages of the present system. If this is so, it has been so since 1870; while in 1882, on the last occasion on which the contracts were renewed, the exercise of this power of revision, although less called for than at present, was made use of, and was specially cited as not lessening in any way the importance of the advantages which accrue to Local Governments from the system: "To the Local Governments such revision will afford no cause for complaint, because the inducements now offered for entering into an agreement are the freedom to administer their own resources, and to apply at will (subject to the general standing orders) any increase reaped during the period of settlement alone." In the present revision, the Government of India has proceeded upon lines fully indicated to Provincial Governments on the last occasion when the contracts were under consideration, and has exercised no powers other than those with which it is known and acknowledged to be provided. The circumstances of the time must decide the extent to which those powers

are, on any particular occasion, used; that is a secondary matter, on which the explanation about to be given as to the details of the recent revisions will throw light. But the truth is that concessions of the nature made in 1870 can only be made subject to the conditions by which the Government of India or Local Governments are bound, from the nature of the circumstances in which they severally exist. Any arrangement inconsistent with those conditions must break down; and no arrangement is more inconsistent, because more prejudicial to that elasticity of the Indian finances which is the sheet anchor of the whole, than one which should proscribe the Government of India from modifying from time to time the proportions of the general revenues allotted to Local Governments, or reserved to its own uses.

Advantages secured to Provincial Governments have been carefully maintained.

44. As the recent revision of the Provincial Contracts has been carried out, on the one hand, in accordance with the reserves and conditions in force, it follows, on the other, that nothing has been done which should lessen the advantages secured by the arrangements of 1870 and following years to Provincial Governments. The freedom of Provincial action within the limits of the revenues assigned; the exclusive claim of Local Governments to the enjoyment of a prescribed share in the increase of those revenues during a given term; and the absence of interference on the part of the Government of India, during the term of the contract, in the financial affairs of Local Governments; all the conditions, in other words, which have brought about the success of the system have been maintained. The question resolves itself to a mere consideration of the adequacy of the sums assigned on the present occasion for the conduct of Provincial Administration, and on this point there could be no better guide than the conclusions arrived at, after exhaustive enquiry, by the Finance Committee, weighed as they carefully have been by the Government of India, after receiving the criticisms of the Local Governments, and adopted only after all necessary allowances have been made with respect to the points where local Governments have shewn that the views of the Finance Committee were open to correction.

Provincial minimum reserve balances.

45. There remain two subjects to be noticed before passing to a consideration of the effect of the revision of contracts which have recently been brought to a conclusion. In the Financial Statement of 1884-85 it was mentioned that Her Majesty's Secretary of State had approved the proposals of the Government of India, that in order to guard against results of possible neglect, or of too sanguine expectations, a minimum reserve balance should be fixed for each Provincial Government or Administration. In other words, each Province or Administration was to keep to its credit a minimum sum to be drawn against in the event of pressure, such, for example, as the opening up of works in time of scarcity for the employment of public labour. The subject is thus explained in paragraph 8 of the Resolution of 17th January 1882:—

Remarks thereon in Resolution, 17th January 1882.

"The new terms on the subject of famine relief, contained in the Resolution, supersede any obligations which may have been imposed upon the Governments of the North-Western Provinces and Oudh, the Punjab, and the Central Provinces, of setting aside such amount as the Governor General in Council may direct, for the purpose of increasing the revenues available for defraying expenditure incurred, or to be incurred, for the relief and prevention of famine in their respective territories. Any amounts hitherto so set aside will hereafter be at the disposal of the Local Governments for ordinary Provincial expenditure. Moreover, as a consequence of the new principles laid down in the Resolution of 30th September last, and of the separate provision in the Imperial Budget of a permanent annual allotment of one crore and a half of rupees for "Famine Relief and Insurance" the Local Governments, while always needing a moderate reserve, over and above the mere "working balance," of sufficient amount to meet scarcity and distress not indisputably amounting to severe famine or other temporary exigencies, will no longer find it necessary to accumulate a great Provincial reserve fund, out of which the demands of severe famine could

in future be largely met. His Excellency in Council is of opinion that, subject to the moderate reserve just referred to, the Provincial resources can be best utilised by being invested to the full, from year to year, in works of a productive or protective character."

Amount to be maintained.

46. The total of the minimum balance for the eight Governments concerned amounted to £1,090,000; and that amount was accordingly a deduction from the effective balance left at their disposal for the ordinary purposes of administration when the contracts were made in 1882. It was admitted, when in 1883 the actual amount of the balance for each Government was fixed, that it would not be possible, in each case, that the Province should at once be able to attain the minimum figure then fixed; but where without undue sacrifice it would not at once be attained, every effort was to be made to reach it in the briefest time possible. With the exception of Burma and Bengal, the prescribed balances have been maintained, and in some cases there have formed considerable accumulation of balances, which, as will be presently shown, still exist in part to the credit of the several Governments possessed of them, and which were utilised in part by the Government of India at the opening of the present financial year, when the necessity of making continued provision for military operations in Burma and a further fall in exchange compelled it to have recourse to the powers which, in the event of necessity, had been reserved in regard to Provincial Revenues in 1881. This reserve is the first of the two points which I have above noted, as requiring to be dealt with before passing to the consideration of the new contracts.

47. In paragraph 5 of the Resolution of the Government of India of 30th September 1881, the previous and proposed arrangements are thus described—

Resolution, September 30, 1881, in respect to the claims of the Government of India on the reserve balances.

"Another important change which is contemplated requires somewhat fuller explanation. In the Resolution No. 3334, dated 14th December 1870, the Imperial Government, speaking broadly, announced a policy of divesting itself of both responsibility and control within certain limits, but a reservation was made (paragraph 17) of power to modify the resources granted, in the event of 'some fiscal misfortune, such as heavy loss in the opium revenue, or national disaster, such as war or severe famine.' On two occasions already within a decade this reservation has been acted on. On the occasion of the great famine of 1876-77 in Western and Southern India, the Supreme Government necessarily came to the rescue of the Local Governments in meeting the enormous outlay involved; but it directed that all Provincial and Local resources must be exhausted before Imperial aid could be supplied. This decision was unexceptionable in the sense in which it was meant; but it may have led to developments which were not altogether intended. The second occasion on which the reservation has been acted on is that of the Afghan war. The Local Governments were called upon, during the years 1879-80 and 1880-81, to contribute £670,000 from the resources made their own by the decentralisation policy, and in the Financial Statement of 1880-81 (paragraph 170) the hope was expressed that they had been able "to afford this timely help to the general finances with little apparent difficulty." The circumstances of the time were, without doubt, peculiar, and the strain upon the finances was undoubtedly severe. But the sudden suspension of improvements in progress, the starvation of public works, and the discouragement of care and economy by requiring a surrender of their results could not, in themselves, be otherwise than prejudicial.

"In modification, therefore, of the reservation hitherto in force, it is proposed to declare, on the one hand, that the Local Governments must look for no special aid from the Imperial Government except in the case of severe famine (and then only within limits to which allusion will presently be made); and on the other, that the Imperial Government will make no demand on them except in the case of disaster so abnormal as to exhaust the Imperial reserves and resources, and to necessitate a suspension of the entire machinery of public improvement throughout the empire."

Criticisms of the Secretary of State, 1882.

48. This condition, formulated in 1882, was accepted provisionally only by Her Majesty's Secretary of State. He wrote as follows:—

"The first point to which your letter refers is the suggestion which I made regarding the assistance to be rendered by the Local Administrations to the Central Government in the case of an abnormal strain on its resources. Your proposal was to declare that such assistance would not be required unless the Imperial reserves should be exhausted, and a suspension of the entire machinery of public improvement throughout the Empire were rendered necessary. As I thought it not desirable that your Government should have to prove the existence of such a state of affairs before requiring the assistance of the Local Administrations, I suggested that it would be sufficient to undertake not to call on them to surrender a portion of their revenues, unless you saw no other alternative than the imposition of taxes which were not considered expedient. To this Your Excellency replies that my despatch reached you too late to admit of your proposing such a condition pending the preliminary negotiations; and you enquire whether I still desire it to be promulgated, observing that you consider it highly inexpedient, save where absolutely unavoidable, to change any of the conditions on which the contracts with the Local Governments were concluded.

"You express an opinion that, though theoretically open to the objection taken to it, the original condition is not, in practice, likely to cause inconvenience; and I am willing, accordingly, to waive the question for the present, though I should desire to have it borne in mind when the time arrives for the next revision of the contracts, and that an explanation of this view should be given to the Provincial Governments."

Desire of Secretary of State in 1886 for modification of existing stipulations on the point.

49. At a later date, writing on July 29th, 1886, the Secretary of State again drew attention to the subject, and expressed a hope that, in the new arrangements which were to be made in 1887 with the Local Governments, some means would be devised by which, in the case of emergency, they might be called upon to contribute a proportionate share towards meeting the necessities of the Empire, according to some well-established principle.

50. It has been seen that the Government of India found it necessary to exercise the powers which it had reserved on previous occasions, and to avoid estimating for a deficit which threatened the Estimates of 1886-87 by utilising in part the accumulated balances of the Provinces when framing the Budget for that year. That deficit was due to the combined results of a further fall in exchange, and to military operations in Upper Burma. It did not amount to the abnormal disaster contemplated in 1882; but if, on the other hand, a call on Provincial balances was not necessary to avoid the necessity of taxation, that was not because taxation was not needed to produce equilibrium, but because, for reasons with which I am not now concerned, it would not have been expedient to impose the amount of taxation necessary to provide against deficit. The Government of India therefore, in the presence of the reserves with which the Secretary of State had agreed to the formula of 1882, considered itself justified in calling on Provincial Governments for some assistance in presence of the difficulties which threatened it in 1886. The action then taken by this Government was approved by the Secretary of State; but in expressing his concurrence he, for the second time, drew attention in the following words to the necessity of making some more satisfactory provision in the matter:—

Course pursued in 1886, in accordance with views of Secretary of State.

"I must, however, express a hope that, in the new arrangements which will be made next year with the Local Governments, some means will be devised by which, in the case of emergency, they may be called upon to contribute a proportionate share towards meeting the necessities of the Empire, according to some established principle."

It became necessary, therefore, for the Government of India to consider, in connection with the revision of the contracts on the present occasion, how the instructions of the Secretary of State were to be met.

Decision arrived at by the Government in this respect, and the grounds thereof.

51. Experience has shewn that when the Government of India has turned to the Provincial Governments for assistance, the only means by which it has been enabled to adjust its demand has been the power of each Provincial Government to pay. One Government may have spent large balances in productive works, or in civil buildings, or in increase of establishment; another, with smaller balances at its disposal, may have allowed them to accumulate; a third may find its revenues barely equal to its current expenditure. When the pressure comes, it is

from those who have balances to hand that assistance must be taken; and no arrangement can be devised which, in the contract term of five years, could equitably give relief to those who contribute, by a transfer of a share of the liability discharged by them to those who, from whatever cause, have been exempted. But the alternative to which at present recourse must be had is obviously inequitable. Whatever arrangement might be established, nothing is more to be regretted than the necessity of applying to Local Governments, during the term of the current contract, for aid from their accumulated revenues. The step is inconsistent with that sense of security during the term of the contracts which is no less essential to the success of the system than the growth of what may be termed mesne revenue. It has seemed therefore a lesser evil that large balances should not accrue than that the accumulation of large balances should expose provincial finances to claims for contributions. The Government has not modified the conditions in which it reserves to itself the right to claim assistance from Local Governments; but it has endeavoured, with the aid of the Finance Committee, to adjust more closely than has been hitherto possible the revenues assigned to the requirements of each Province; and further so to re-arrange the apportionment of the increase of revenue during the term of settlement between itself and Provincial Governments as to leave them a fair share in the increase of the revenues, but to lessen the probabilities of their being called upon for exceptional assistance.

52. In the new Provincial contracts, each Local Government will receive three-fourths of the increase in Stamp Revenue, and one-fourth of that in the Excise Revenue, the Government of India receiving one-fourth of the Stamp and three-fourths of the Excise Revenue, and the expenditure under the heads of Excise and Stamps will be divided between the Local Government and the Imperial Government in the same proportion in which the revenue is divided. In the case of the Land Revenue, in the four larger Governments, one-fourth of the future increase will be received by the Local Government and three-fourths by the Government of India. The shares assigned to Provincial Governments at the last contract varied somewhat; but broadly it may be said that Stamps and Excise were divided in equal proportions between the Imperial and the Local Governments, and that the Land Revenue was divided in proportions which were different in the different Provinces, and which were not fixed with reference to the necessity of securing each Province a particular share of the increase. It will be seen presently that, in the case of most of the Provincial Governments, substantial balances still exist at their credit; these balances have not been interfered with on the occasion of the present revision.

Share reserved to Provincial Governments in Stamp, Excise, and Land Revenue, in the new Contracts.

53. Reference has been already made to the Resolution of 28th January 1887, here quoted, and before leaving the subject attention may be called to paragraph 15 of that Resolution, dealing, as it does, with the second of the two points spoken of in paragraph 45 as remaining to be disposed of. Exception has been taken in 1886, as, in 1881, exception had previously been taken, to the fact that sums not provided in the Provincial Estimates of a given year cannot, without the sanction of the Government of India, be expended during that year. The balances are the balances of the Local Governments, it is said; why should they not spend them when they desire to spend them? The balances, it is true, are the balances of the Local Governments. But they are balances standing at their credit upon an account in which the payments have to be carefully and with great labour adjusted to the incomings. The Government of India relieves the Local Governments entirely of all responsibility for resource operations: of all concern in finding, at the time and place where they are wanted, the actual funds for carrying on their expenditure; and it is necessary to impose upon them the condition that notice shall be

Question as to the powers of Local Governments to dispose during the currency of a year of balances, expenditure from which has not been entered in their Estimates.

given before it is demanded that these balances be produced in hard cash at any given place. At the commencement of each financial year the Government of India ascertains the requirements of each Province as entered in its Estimates; it reckons up its own requirements for the coming year, and it makes provision for ways and means accordingly. But if a Local Government has neglected to enter in its Estimates considerable sums which, during the currency of the year, it finds that it desires to expend, it is obvious that the calculations of the Government of India, which were made on the data furnished to it in the Estimates, may be very seriously vitiated, and its ways and means may be subjected to no little derangement. All that is asked of Provincial Governments is, that they should forecast and enter their requirements in their Estimates, and this is merely requiring them to observe a well-known rule of public finance, a rule the importance of which local authorities may be led to overlook in consequence of their freedom from the responsibilities involved in providing for ways and means. All that is reserved by the Government of India is, that in the event of Provincial Governments failing to give the intimation required it will not undertake, as a matter of course, to find supplementary ways and means wherewith to meet, during the currency of a given year, the requirements of which it was not warned at the prescribed time.

54. I pass to an examination of the results of the recent revision. It should be premised that this revision has been preceded by enquiries on the part of the Finance Committee of a far more searching nature than those which accompanied previous settlements. The Committee had time and opportunities for enquiry which were beyond the reach of the Government of India on previous occasions, and the ability and local knowledge of the members of the Finance Committee enabled them to make the fullest use of the opportunities furnished them, and to throw light upon the details of Provincial administration which in the interests of efficient and economical government will be of the greatest use in future. If any of the new contracts prove difficult to work, there should be no difficulty in ascertaining where the weak point lies, and in disposing of it more summarily and effectively than was possible under former contracts.

Results of the recent revision of the Provincial Contracts.

55. The principal heads of revenue, under which increases have accrued to the Local Governments, are Land Revenue, Stamps and Excise. The following figures compare the standard at which the Land Revenue was calculated in 1882 and the standard which it is now estimated to have reached:—

Comparative Statement of Land Revenue in 1882 and 1887.

	Amount in 1882.	Amount in 1887.	Increase.	Provincial Proportion of assigned revenue.	Provincial Increase.
	£	£	£		£
Central Provinces	607,300	611,800	4,500	·49	2,200
Burma	1,140,000	1,154,200	14,200	·33	4,700
Assam	387,600	423,000	35,400	·63	22,300
Bengal	3,765,000	3,825,000	60,000	·32	19,200
North-Western Provinces	5,765,000	5,797,000	32,000	·25	8,000
Punjab	2,100,000	2,180,000	80,000	·41	32,800
Madras	4,510,000	4,536,700	26,700(a)	·29	7,750
Bombay	3,115,000	3,280,000	165,000	·60	99,000
TOTAL	21,389,900	21,807,700	417,800	...	195,950

(a) This cannot be taken as an accurate statement of the increase of Land Revenue in Madras, as the estimate £4,510,000 for 1882 includes at least £50,000 a year of arrears of which the collection has now come to an end.

56. Under Stamps and Excise, the following figures compare the totals of the revenue of 1881-82 and of 1886-87:—

Comparative Statement of Stamps and Excise, 1882 and 1887.

	1881-82.			1886-87.			Improvement.	
	Stamps.	Excise.	Total.	Stamps.	Excise.	Total.	Total.	Provincial Share.
	£	£	£	£	£	£	£	£
Central Provinces	113,505	185,748	299,253	140,000	250,000	390,000	91,000	45,500
Burma	78,456	218,525	296,981	93,800	221,600	315,400	18,400	9,200
Assam	62,250	195,634	257,884	77,500	223,000	300,500	42,600	21,300
Bengal	1,139,164	855,278	1,994,442	1,345,000	992,600	2,337,600	343,100	171,550
North-Western Provinces	535,570	369,114	904,684	625,000	540,000	1,165,000	260,300	130,150
Punjab	326,526	110,721	437,247	347,500	136,000	483,500	46,200	23,100
Madras	546,990	627,888	1,174,878	580,000	880,000	1,460,000	285,100	142,550
Bombay	421,536	549,839	971,375	458,000	910,500	1,368,500	397,100	198,550
Total	3,223,997	3,112,747	6,336,744	3,666,800	4,153,700	7,820,500	1,483,800	741,900

57. Under other heads there are similar though smaller increases of revenue, of which it is not necessary to give any detail; but of the whole increased resources of the Local Governments, a considerable amount has been appropriated during the currency of the expiring contracts to growing Provincial demands, and there remained to be dealt with only the balance, which, on investigation, was deemed to be not required for local needs. Leaving out of consideration the special contributions in 1886-87 from the Governments of the Central Provinces, Assam, Madras, and Bombay, the amount resumed is in all the annual sum of £640,100, and the following statement compares the resumption with the increase coming in under the main heads of Revenue:—

Comparative Statement of Annual Revenue, 1882—87, and effect of the recent revision on Provincial resources.

	Increase of annual resources under the principal Revenue Heads as estimated on comparison of 1882 and 1887.			Amount by which annual Provincial resources are reduced by revision.
	Land Revenue.	Stamps and Excise.	Total.	
	£	£	£	£
Central Provinces	2,200	45,500	47,700	15,600
Burma	4,700	9,200	13,900	.....
Assam	22,300	21,300	43,600	24,600
Bengal	19,200	171,550	190,750	103,600
North-Western Provinces	8,000	130,150	138,150	100,000
Punjab	32,800	23,400	55,000	.....
Madras	7,750	142,550	150,300	174,400
Bombay	99,000	198,550	297,550	221,900
Total	195,950	741,900	937,850	640,100

Assignment of increase of annual resources between 1882 and 1887 between Imperial and Provincial Governments.

58. The figure of £174,400 resumed in the case of Madras should be reduced, for purposes of comparison, by £50,000, which represents the resumption in the present arrangements, according to agreement between the Government of India and the Madras Government of a special grant made to the latter for special purposes and for a limited time, some time after the first contract was concluded. Besides this, as explained in the note under the first of the two statements on the preceding page, the annual increase of the Provincial share of Land Revenue in Madras is itself much understated in the above figures. Of the total increase, therefore, it may be said that less than two-thirds have gone to the Imperial and the rest to Provincial Governments.

59. It will be observed that no resumption has been made in the case of Lower Burma or of the Punjab. In the last case the revenues, for reasons which need not be dwelt upon here, but which have been pressed on the attention of the local Government, have not made the same advance as in other Provinces, and the Government of India has conceded during the term of the late contract an increase of about £30,000 to the original assignment. In Burma the contract of 1882 has not worked successfully; the expenditure soon began to overpass the limits of the revenue; and during the last three or four years the Government of India has had to supplement the provincial resources by grants of four or five lakhs a year. No new contract is made with Burma in the same sense as with other provinces, its present somewhat abnormal condition rendering it inadvisable to conclude at this time financial arrangements which will necessarily affect the administration for the next five years. The Government of India has added to the existing provincial resources of Burma a grant of four lakhs, which may be considered to represent its present condition of deficit, and another lakh out of the surplus it has obtained from the revision of the contracts of other provinces. During the ensuing year, it is hoped that the terms of a new contract, to commence from 1888-89, may be concluded.

No resumption of Revenue in the case of Lower Burma and the Punjab.

60. By the revision of the Provincial Contracts therefore the financial position of the Government of India has been improved by £640,100, subject to the deduction of £10,000 conceded to Burma, and also to some other reservations, which will not, however, greatly diminish the ultimate measure of the gain. Local Governments, on the other hand, will have the benefit of their allotted share in the increase of revenue during the term of the contract above the amounts estimated above, and, with some reserves, of the retrenchments of expenditure which have been suggested to them by the Finance Committee.

Amount of increase to Imperial Revenues through revision of Provincial Contracts.

61. The reservations to which, as just observed, the amount of £630,000 is subject are as follows. First of all, the break-down of an important aqueduct in the canals of the North-Western Provinces at present diminishes the irrigation revenue of that province of about £60,000 a year, and two years more will pass before by restoration of the aqueduct the revenue of the provinces reaches its proper standard. For the first year of the contract therefore the Government of India has to forego £60,000, for the second £50,000, and for the third £10,000 of the full demand of £630,000. To Bengal also special grants have to be made of £30,000 for the completion of the Orissa Coast Canal, and a further amount for the purchase of a new Pilot Brig. On these and other accounts therefore the gross amount of £630,000 may be said to be liable to deduction of an amount which spread over the five years of the contract may average £60,000 or £70,000 a year.

Deductions from the above increase.

62. The comparative statement of the results under the principal heads of Provincial expenditure which I now give will shew what is the amount at which under those heads expenditure has been calculated for the purposes of the new Provincial Contracts, and what was the scale in previous years. The comparison proves that, except as regards Public Works, there has been no reduction. It is obvious that if, as cannot be questioned, a revised scale of expenditure is necessary under the new contracts, it is in Original Public Works that it may, in the first place, be sought with the least inconvenience to administration.

Comparative expenditure under certain heads, 1882-83 and 1887-88.

In Land Revenue (District administrative charges)—

1882-83.	1883-84.	1884-85.	1885-86.	1886-87, (Revised).	New Contract.
£	£	£	£	£	£
2,464,946	2,670,234	2,688,012	2,691,676	2,712,400	2,789,100

This last figure includes Survey charges, aggregating £110,000, which have been transferred to Provincial Governments, and deducting these the scale of expenditure under the new contracts, stated for comparison with the former scale, would be £2,679,100.

Under the general administrative heads, *viz.*, Administration, Law, Justice, Police, and Marine, the figures are as follows:—

1882-83.	1883-84.	1884-85.	1885-86.	1886-87, (Revised).	New Contract.
£	£	£	£	£	£
6,232,766	6,351,171	6,473,199	6,496,452	6,578,300	6,534,600

In Medical, Scientific and Minor Departments, we have—

£	£	£	£	£	£
694,111	710,485	718,503	724,810	702,000	729,400

In Education—

£	£	£	£	£	£
733,579	757,997	801,202	795,089	840,800	803,600

But in addition to this last grant of £803,600, a further assignment has been made, in the case of Bombay, which enables it to increase its educational grants to Local Funds from £22,000 to £30,700; so that the grants under the new Contract should, for purposes of comparison with former figures, be stated at £812,300 rather than at £803,600.

The expenditure under Public Works shews considerable contemplated reduction. But, in judging of these reductions, it must be borne in mind that the first years of the late contract were those in which the refunds to Provincial Governments of the contributions made to the Government of India during the Afghan war, and the balances which had accumulated during the period of enforced economy necessitated by the continuance of that war, permitted a scale of expenditure very largely beyond what the normal annual Provincial resources could have provided. On the other hand, 1885-86 was a year of restricted expenditure, and was the commencement of the time of retrenchment in which we are likely for some time to find ourselves. For comparison, therefore, with the circumstances of the present time it gives a more appropriate standard than earlier years. The expenditure of the past five years and the assignment on which the new contract has been based are shewn below; but the latter amount takes no account of the further resources available from balances which, as I shall explain, stand to the credit of the majority of the Local Governments:—

£	£	£	£	£	£
2,304,798	2,131,812	2,001,168	1,708,305	1,963,900	1,604,100

Balances remaining to credit of Local Governments.

63. The following statement shews the balances of unspent revenue of past years which the various Provincial Governments will have at their credit on April 1st, 1887, and which are available for expenditure subject to the orders quoted in the Financial Statement for 1884-85, paragraph 109 requiring them not to reduce their available balances below a certain prescribed minimum:—

	Estimated Balance on April 1887.	Prescribed Minimum.	Available Excess.
	£	£	£
Central Provinces	162,600	80,000	82,600
Burma	...	60,000	...
Assam	60,400	50,000	10,400
Bengal	126,300	200,000	...
North-Western Provinces	330,400	200,000	130,400
Punjab	134,700	100,000	34,700
Madras	387,800	200,000	187,800
Bombay	496,800	200,000	296,000

64. We have also, in connexion with these proceedings, made a supplementary contract with the Central Provinces for the conduct of its settlement operations, a new and productive kind of expenditure which we should have had to provide for in any case. The grant is £40,000 the first year and £25,000 the last year, and averages £30,000. *Special grant to Central Provinces for settlement operations.*

65. The amount resumed during the first year of the contract may therefore be taken as follows:— *Amount resumed during first year of Contract.*

	£	£
Total amount		630,000
Deduct grants as follows:—		
To Bengal for Orissa Coast Canal	30,000	
For new Pilot Brig	10,000	
To North-Western Provinces, for deficiency of Irrigation Revenue	60,000	
To Central Provinces for Settlement	40,000	
		140,000
Net amount		490,000

66. The following statement showing an Imperial gain under Revenue heads of £215,000, and under Expenditure heads of £395,000 (Total £610,000) may be set forth as the general effect of the Revision upon the Imperial column in the Budget account of 1887-88; the omission of some smaller items accounts for the difference between this total and the whole amount of £630,000.

Revenue.	Imperial Share. Increased.	Decreased.
	£	£
Land Revenue	437,500	...
Stamps (share reduced from one-half to one-quarter)	...	810,000

67. It has, I trust, been made clear, in the course of these pages, that in the

recent settlement of the contracts the Government of India has scrupulously maintained itself within the lines laid down in 1870, 1877, and in 1882. It has exercised no powers which were not then indicated; it has claimed no concession which it then abandoned. At a time of financial difficulty, it has been compelled to use its powers with more discretion than was necessary on the last occasion; but it has not had recourse to any which at that time were not exercised. If it has apportioned the assignments of revenue to the several Provinces on the basis of past experience and on an estimate of their immediate requirements rather than on a review of what are believed by local authorities to be the special claims or conditions or future needs of each Province, it has done so upon grounds laid down on previous occasions as being those only which the limits of its finances permit. The words of Lord Mayo and Sir John Strachey, in their speeches of April 6th, 1871, and July 27th, 1872, are as applicable now as they were at the time they were spoken. "Had we entered on a minute inquiry," Lord Mayo said, "as to the precise amount which should be given to each Government in proportion to their revenue and population, or in respect to the area or requirements of each Province, such an enquiry must last for a considerable time; and we were not at all convinced that, even if such an enquiry had been entered upon, the result would be more satisfactory than the basis which we adopted, *viz.*, that of grants for the past year. These grants have ever been made on the consideration only of our power to give, and of the wants of each Province; and I believe that any more minute enquiry than that would have only led to failure." "The Empire," Sir John Strachey added, "must be treated as a whole; not as a collection of separate and semi-independent States." It was necessary that, on the present occasion, the past history of the whole question should be traced and made clear, because it may be held, in view of the measures of economy associated with the late settlements, that in some indefinite way the Government of India has, on the present occasion, entered on a retrograde policy. So far is this from being the case, that the Government has sought, and is still engaged in the effort, further to increase the number of the branches of the administration the revenues and expenditure of which are assigned to Provincial Governments. The Government of India has dealt with the present occasion under the influence wholly of the considerations explained in the foregoing pages. One direction in which it seems possible that the system might with advantage be modified, should experience show that the new contracts work well, is in extending the term of five years, which at present prevails. It would be premature to express as yet any very positive opinion upon this point. It is one on which the experience gained during the contracts should enable definite conclusions to be formed, to which effect can be given at any time during the next five years.

Recapitulation.

Famine Insurance Grant.

68. The second measure, to which we have had recourse in order to maintain the equilibrium of our finances, has been the debiting to loan, either wholly or in part, of that portion of the expenditure incurred in the direct construction of railways, which in late years has ordinarily been charged to our revenues; and the withholding of the grant, which has been similarly assigned from revenues in reduction of the sum which it is necessary for us annually to borrow for the construction of railways. The entry under the head of Famine Insurance Grant has been greatly reduced, both in the Revised Estimates of 1886-87, and in the Budget Estimates of 1887-88; in the former it has not been necessary to devote to other expenditure the entire sum available under the head of Railways, but in the latter year (excepting the portion allotted to Irrigation), the grant has been entirely absorbed.

69. It is necessary in the first place to shew what has been effected by the

operation of the funds assigned from revenues to the construction of railways and the extinction of loan. The following paragraphs are repeated from the Financial Statement for 1886-87, the figures being altered so as to be brought up to date:—

"The portion of the revenue set aside to meet the cost, direct and indirect, of famine was first devoted to specific purposes, and shewn separately in the accounts, in the year 1881-82. From 1881-82 to the close of the current financial year 1886-87 the aggregate of the sums spent under Famine Relief and Insurance, comes to £7,946,928, which has been devoted to the following objects:—

	£
Famine Relief	114,836
Protective Railways	2,933,979
„ Irrigation	1,233,268
Reduction of Debt	3,664,845
TOTAL	7,946,928

"A more important question, however, than the specific allotment of the grant in recent years is the extent to which the Government has in practice succeeded in reducing the charge for debt since the policy of increasing the revenues for the purpose of meeting the cost of famine was first originated. The increase of the revenues necessarily improves the position of the finances *pro tanto*, but in judging of the general effect of the policy of Government many other considerations require to be taken into account. A deficit sooner or later increases the charge for debt, a surplus reduces it.

"The fall in exchange has tended steadily to increase the burden of the gold debt on the revenues of India; the construction of Productive Railways and Irrigation Works from Revenue practically reduces the burden of the ordinary debt. The vital question is whether the burden of the debt to balance which great Public Works of a permanent nature cannot be shewn, has increased or diminished. The publication of the accounts of past years in the new form enables us to answer this question with comparative ease.

"In 1877-78 the total interest charge on debt of all kinds stood as follows, including exchange:—

	£
Interest on ordinary debt uncovered by Public Works	4,799,448
„ on debt balanced by capital expenditure of a corresponding amount on Railways	703,753
„ on debt balanced by capital expenditure of a corresponding amount on great Irrigation Works	621,822
TOTAL	6,125,023

"For 1886-87 the account is as follows:—

Interest on ordinary debt uncovered by Public Works	3,943,600
„ on debt balanced by capital expenditure of a corresponding amount on Railways	3,189,200
„ on debt balanced by capital expenditure of a corresponding amount on great Irrigation Works	994,300
TOTAL	8,127,100

"These figures shew that, notwithstanding the fact that the fall in exchange has added largely to the burden of the interest charge on the gold debt of India, the charge for debt, which is uncovered by great Public Works, has been reduced since 1877-78 by £855,848."

70. It will in the next place be seen from the figures in the margin that since the commencement of the year 1877, when the Famine Insurance Scheme was introduced, there have been completed (apart from frontier lines, and from railways in Burma) either by the Imperial or Local Governments directly, or through the agency of construction and working Companies, 4,199¼ miles of State Railway, for the most part running through provinces exposed to famine. Of this mileage, 2,924¼ are under the control of the Central Government; 1,275¼ miles have been constructed in whole or in part from Imperial Funds and made over to the control of Provincial Governments, or have been constructed by the aid of Provincial balances. Besides this length actually completed, 1,254¼ are in course of active construction on behalf of the State by Companies, including 361 which will be opened within a few months. The total mileage, therefore, for construction of which, in one form or another, obligations have been incurred in pursuance of the policy of protection of the country against the risk or effects of famine since 1877, is 5,554. The years in which the Famine Insurance Grant has been employed in furthering the construction of Famine Railways, whether directly or indirectly, have contributed from that source the amount shewn in paragraph 69, *viz.*, £6,598,824 to the results above exhibited.

71. We are now in a position to approach the immediate question before us with adequate information as to the results achieved since 1877 with the aid of the Famine Insurance grant. The decision to which we have come has, from a purely Resource point of view, no importance whatever. Apart from peculiar considerations to which I will refer, it is admittedly a mere question of account. This is obvious on a moment's consideration. If for example, in 1886-87 we maintain the contribution from our revenues towards the construction of railways, our expenditure on account of administrative requirements exceeds our receipts by £1,049,400, and that is the deficit which we must provide from borrowed money. If, on the other hand we omit from the charges against Revenue this sum of £1,049,400 on account of railways, we have an equivalent sum available to meet administrative charges, and we have no deficit; but, in such case, we must debit an equivalent charge for construction of railways to loan. In either case it will be seen that the amount which we have to borrow is precisely the same; whether on the one hand we borrow on account of our railways, or, on the other hand, to make good the sum of a deficit. We have had to ask ourselves therefore—Is it more expedient to enter in our accounts under the head of Famine Insurance Grant the expenditure of late years customarily so shewn, and thereby to encounter the risk of exhibiting a deficit; or is it better to avoid or to lessen the amount of deficit, by debiting to loan the amounts hitherto debited to revenue under the head of Famine Insurance Grant? I do not think that, in ordinary circumstances, there could have been any hesitation in excluding grants for railway construction from charges against our revenues, when we have no surplus of revenue wherewith to meet them. But there are considerations connected in the present instance with this particular question, to which I have referred above, and which may lead some to think that, in following on the present occasion the more obvious course, we are evading obligations which were formerly undertaken, and are breaking faith with the public in a matter which preceding Governments have surrounded with certain pledges and guarantees. It is necessary that I should explain why the Government has come to the decision which I have stated, and the reasons for which it believes that any other would have been inconsistent with the public interests. *Nature of the question.*

72. No useful end would be gained for our present purpose by entering into a discussion of the views and objects with which the Famine Insurance Scheme was originally launched in 1877. During the nine years which have elapsed, experience has thrown its light on the merits of the scheme, which has passed through various phases. A variety of explanations have been given as to the modes in which it might be considered to be effective; but our immediate business is with that form alone in which we now find it, and in which, for the last five years, it has existed. The scheme aims at present (apart from the question of funds devoted to Irrigation, with which we do not propose to interfere) at providing from surplus revenues £500,000 annually for the construction of what are known as famine railways, and a further annual sum of £750,000 in reduction of the total sum which, under existing arrangements, we annually borrow for the completion of our famine railways. The scheme is therefore based on the assumption that we have a surplus. But a surplus cannot be used unless it exists; and if our current expenditure exceeds our revenue, the surplus is wanting. We have then before us the choice of three courses. We may impose fresh taxation or enforce retrenchments, in order to reproduce the required surplus; or we may put a stop altogether to the expenditure to which we have been devoting the surplus; or we may debit to Loan the expenditure which has been met from our surplus. So far as the first of these courses is concerned, it is well known that we have used and are likely for some considerable time to be engaged in every effort of which we are capable. What we have done in regard to Provincial finance has been explained in this Statement. A great body of enquiry and suggestion emanating from the Finance Committee and connected with expenditure in the Departments of the Government of India is before us, and will continue throughout at least the ensuing financial year to occupy our best attention. But whatever effort we may have made or may make in this direction will not produce the requisite surplus, either in 1886-87 or in 1887-88, and if it is considered necessary to provide the revenues required for the Famine Insurance Grant there is no way of providing them other than by increase of taxation. It is very desirable that we should have a surplus which we may employ in railway construction; but to raise fresh taxes, at present in order to create a *Present form of the Famine Insurance Grant alone to be dealt with.* *Surplus necessary to the assignment of the grant.*

surplus with the especial object of granting it to railway construction is a course to which there is obviously great objection. On whatever other points difference of opinion may exist, on the expediency of increasing taxation there is probably little or no disagreement. Whatever strength, moreover, there might be in the arguments for increase of taxation may be said to disappear before the consideration that loss of the requisite surplus does not arise from circumstances inherent in or inseparable from the condition of our finances themselves. We may, on the contrary, (with all necessary reserves as to the course of exchange,) hope that when the necessity ceases for making extraordinary provision for the operations in Upper Burma now on our hands, the surplus from which we desire to continue, directly or indirectly, to furnish funds in aid of railway construction will re-appear. In the circumstances inseparable from British rule in India, it will be probably admitted by all to be inexpedient to impose fresh taxation solely with the object of providing the surplus contemplated by the Famine Insurance scheme, during a period of deficit which may in great measure be traced to temporary war expenditure.

Provision of surplus by taxation inexpedient, and impracticable from retrenchment.

73. Assuming, therefore, that neither by retrenchment nor taxation is it practically possible to us to provide the desired surplus, there is the alternative of putting a stop altogether to expenditure to which that surplus has been applied. The expenditure, it is well known, is incurred in the construction of railways, having for their primary and special object the prevention of famine, or the mitigation of the disastrous consequences both to human life and to the public revenues arising from famine. To have checked the works in progress in 1886-87 and in 1887-88 because we could not furnish the necessary sums from revenue, and must in a corresponding measure have recourse to loan, would have been to subordinate our end to our means; and in the event of our being overtaken by a fresh famine such a decision would contribute to bring about, in greater measure, the evils which we are seeking to avoid. I have shewn that considerable progress has been of late years made in the construction, whether directly by Government or under guarantee, of famine railways. The necessity imposed, however, on the Government of vigorously pushing forward its scheme of frontier railways has in a measure interfered with the prosecution of famine lines; and it is the more important that the work now in course of execution on these lines should not be interrupted. There remains the third course, *viz.*, to debit temporarily to loan, until our surplus is reassured, the expenditure which, under the head of Famine Insurance, has been met from our surplus revenues. This is the alternative which the Government, on a careful review of all the circumstances of the case, has decided to adopt. Rejecting, for the reasons above given, the two former of the courses which have been indicated, the Government has decided to debit to loan, during the years 1886-87 and 1887-88, so much of the sums which, under the ordinary operation of the Famine Insurance scheme, would be provided from Revenue for purposes of railway expenditure as it required to meet charges of administration. But it is not on that account prepared to delay the execution of the projects in which it is at this time engaged. In 1886-87 we have taken £1,049,400 from the Famine Insurance Grant, and in 1887-88 £1,248,000, which amounts will practically be added to the annual borrowings otherwise necessary.

Discontinuance of railway construction to the amount furnished by the Famine Insurance grant—why unadvisable.

Course actually adopted, and reasons for adoption thereof.

74. There is a point of view from which it has been urged that the scheme of famine insurance continues to be in force, although we have no surplus, but a deficit. If we have not, for example, the surplus sum necessary for the direct operation of the scheme, we have at least the sums which, if they no longer provide surplus, diminish *pro tanto* our deficit, and therefore the amount which at the end of the year we should require to make good from loan. It may, in accordance with this line of reasoning, be contended that, although

Examination of argument for maintaining the Famine Insurance Grant in the Estimates, though there is no surplus.

financially considered it makes no difference what course we pursue, it would be desirable, although at the cost of a deficit, to continue to shew in our accounts the customary charges under the head of Famine Insurance Grant. The revenues especially raised in a state of surplus with the object of providing for the extinction of debt are, it may be said, although we are in deficit, still operating to diminish the increase of debt; by preserving, therefore, the entry in our accounts we obviate the charge of seeking to evade our engagements. If we examine carefully, however, this way of looking at the matter, we find that we gain no practical end by maintaining the Famine Insurance Grant on the grounds indicated, other than that of being in a position to affirm that because the Famine Insurance Grant, though not directly operative, operates indirectly in reduction of debt, it is retained in our Estimates. The question is whether, although no financial gain is to be got by so doing, it is desirable, under pain of shewing deficit, to prove that we may be considered as holding to the letter of what is believed to be our engagements. There are circumstances in which a bolder and more direct course of action, although it may at first sight expose us to misapprehension, is, in the interests of the tax-payer himself, preferable; among them, for example, the circumstances in which we now find ourselves. The more we become involved in deficit, the greater becomes the pressure on us for adopting means of putting an end to it; and it seems, to say the least, doubtful whether, in the absence of any financial gain, we shall be held by the tax-payer rigorously to that method of account which may be thought most consistent with our engagements, if the first result of our complying with his wishes is to bring him within appreciable distance of further taxation. The conclusion of the whole matter seems to be that when we have surplus revenues to devote to railway construction, we should so employ them; but that when we have no surplus revenues, and do not consider it desirable to adopt measures to procure them, we have, as a matter of fact, to fall back upon loan, for the construction of new railways, if we determine to proceed with them; and we shew the facts more accurately by removing the charge to the debt or capital part of our accounts, than by exhibiting it as actually met out of our revenue. The aim of the Government will be to obtain again as soon as possible the necessary surplus, or so much of it as may be available, and to devote it to the purposes to which, under the Famine Insurance scheme, it is assigned.

75. The Government of India, towards the close of 1885-86, when it was evident that a considerable deficit was impending in consequence of the war preparations which had been made in the course of that year, had occasion to consider the expediency of adopting the decision which it has since thought necessary to take. But it could not foresee, when the Revised Estimates of 1885-86 were framed, that the course of events would materially add, during two succeeding years, to our expenditure. Considerations, therefore, which apply to the circumstances of the present time were of less force when considered in connection with the situation as it appeared in 1885-86. It would have been inconvenient, because it would have exposed us to misconstruction, if we had hastened on the circumstances of a single exceptional year to make a change in our accounts. An important element in the treatment of this question has been the greater or less period during which we might expect to be in deficit. Arrangements, therefore, which it was decided not to adopt in the presence of what seemed the temporary difficulties in 1885-86, required to be reviewed and modified, when the strain upon our finances becomes, from circumstances at that time unforeseen, more prolonged. To have left matters alone for a succession of two or three years might have led, as has been explained, to misconception as to the true nature of our financial position, and to the probability of the extent and importance of its difficulties being exaggerated.

Reasons for not adopting in 1885-86 the decision now taken.

76. The following figures give the results, so far as the Revised Estimates shew, of the assessment of the Income Tax, to which I now turn:

	1885-86.	1886-87, Budget.	1886-87, Revised.	1887-88
	£	£	£	£
India	106	274,200	197,000	200,400
Central Provinces	23,207	38,400	38,400	40,000
Burma	...	...	...	
Assam	5	18,000	10,000	20,000
Bengal	153,385	360,000	361,400	370,600
North-Western Provinces	119,320	205,000	220,000	231,000
Punjab	37,090	90,000	93,900	99,000
Madras	43,368	130,000	123,400	126,000
Bombay	125,638	342,500	295,000	319,000
TOTAL	503,034	1,458,100	1,348,100	1,406,000

77. It will be seen that the receipts are £1,348,100 against an estimate of £1,458,100, the difference being mainly due to a decision of the Secretary of State by which Income Tax is assessed on the surplus profits of Guaranteed Railways and not on their net earnings. The Budget Estimate for 1886-87 included £185,600 under Assessed Taxes for Income Tax on net earnings of Guaranteed and other Railways, but in the Revised Estimates £14,800 only are taken as Income Tax on surplus profits of Guaranteed Railways, the difference, £170,800, may therefore be said to have been written off in 1886-87. As, however, the share of the Government in the Income Tax on the net earnings of the Guaranteed and State Railways is £131,980, the loss on account of Income Tax as the figures below shew is merely nominal to this extent; the real loss is merely the excess of £53,620, the share of Income Tax falling upon Companies over the £14,806 which they have had to pay.

	Government.	Company.	TOTAL.
	£	£	£
East Indian	63,200	15,800	79,000
Oudh and Rohilkhand	5,000	.....	5,000
Madras	8,500	.....	8,500
South Indian	4,000	.....	4,000
Great Indian Peninsula	23,500	23,500	47,000
Bombay, Baroda and Central India	10,000	10,000	20,000
Rajputana-Malwa	16,000	4,000	20,000
Patna and Gya	688	172	860
Sindia	528	132	660
Ghazipur-Dildarnagar	64	16	80
Southern Mahratta	500	.....	500
	131,980	53,620	185,600

78. No further particulars can be given at present as to the working of the Tax, but care will be taken to obtain full reports during the ensuing year. It will be seen that in Bombay and Madras the decrease is rather considerable, but in the case of Bombay it is due to the ruling about railways above referred to. There will be some reduction next year in the expenditure on account of the working of the Tax which is shewn in the Budget Estimate of 1887-88 at £19,100, the total estimated cost being £33,600 against £52,700.

79. In the following statement are shewn the net gain and loss on State and Guaranteed Railways from 1885-86 to 1887-88, and the expenditure on Railways on State responsibility during the same period:—

Net Gain and Loss on State and Guaranteed Railways, from 1885-86 to 1887-88.

	Actuals, 1885-86.	Budget Estimate, 1886-87.	Revised Estimate, 1886-87.	Budget Estimate, 1887-88.

Guaranteed Railways	1,67,25,362	59,61,000	1,66,97,000
Southern Mahratta Railway	1,22,43,684	1,65,09,000	78,23,500
Indian Midland Railway	80,98,585	1,63,27,000	2,32,42,500
Nagpur-Bengal Railway	.....	.....	75,00,000‡
Total	3,70,67,631	3,87,97,000	5,52,63,000
GRAND TOTAL	9,55,16,447	9,43,91,000	9,89,55,000

NOTE.—*This statement excludes the Mysore Railway.*

* The grant under this head has been suspended for 1887-88, a corresponding increase being allowed under the head "*Capital Expenditure on Railways not charged against Revenue.*"

† The final estimates of expenditure in England received from the India Office give the estimated outlay in a lump sum. An approximate distribution has been made here.

‡ This is a rough estimate of the outlay likely to be incurred by the Company during the year. It does not provide for the refund to the State of the outlay incurred to close of 1886-87, and it is not known on what terms the Company will take over the existing line.

Sterling has been converted at the rates used in the estimates in *all* the above figures.

80 The net loss of £485,600 in the Revised Estimates of 1886-87 has, in the Budget Estimate of 1887-88, increased to £658,400 on account of State Railways, the net loss on Guaranteed Railways being slightly increased also. As long as State Railways are being actively constructed net loss must be expected; this formed the subject of remarks in the Financial Statement of last year, which it is unnecessary to repeat. It may be hoped, however, that, with the opening of fresh railways and the gradual completion of those which it is desired to construct, each year will, in future, diminish the ratio of loss.

Army.

81. The Estimates for the Army Services in India are as follows:—

	Revised.	Budget.
Ordinary effective	12,047,930	12,423,607
Non-effective	860,770	866,303
	12,908,700	13,290,000
Add Burma	1,160,000	720,000
	14,068,700	14,010,000

The total Army Estimates, including English charges and exchange, are £19,197,000 against £19,070,600 in the Revised Estimates of 1886-87.

The Budget shews increase under the first head (effective) of £375,767, and under the second (non-effective) of £5,533. Of this increase the sum of £344,984 is part of the £656,900 mentioned in paragraph 36 of the Financial Statement for 1886-87 as being the sum then remaining to be provided for in connection with the increase to the Army.

Opium.

82. In respect to Opium there is little to be said beyond the fact that the crop this year, although apparently a good average, does not promise to be so exceptional as was the case last year, and the expenditure in India on account of opium has accordingly been reduced from £2,782,400 in the Revised Estimates to £2,504,000 in the Budget Estimate of the ensuing year. The reserve at the close of 1887 is expected to stand at 36,705 chests. The price during the ensuing year has been taken at R1,100 per chest. 4,750 chests will be sold each month during 1887; the amount to be sold in the first three months of 1888 will be notified hereafter.

Oscillations of exchange during 1886-87. Rate of exchange taken in 1887-88.

83. It is needless to dwell on the subject of silver. At the present time, a Royal Commission is appointed to inquire into the question, and, among other matters connected therewith, into the difficulties which the uncertainty in the ratio of silver to gold causes to the Indian Government. During the course of the year the instability of exchange was forcibly illustrated. From 1*s.* 6*d.*, the rate taken in the Budget, it had fallen five months later to 1*s.* 4¼*d.*, since when it rose to 1*s.* 6*d.*, and is now below 1*s.* 5¼*d.* It was estimated in the Budget of 1886-87 that £4,778,000 would be the net additional charge on account of exchange. It seemed probable shortly before the six months' estimates were prepared that little less than £1,750,000 would be added. The amount which has actually been charged is £5,252,600, an increase of £474,600. The rate of exchange taken for 1887-88 is 1*s.* 5½*d.*

84. The following passage from a memorandum on the loss to the Government of India from a fall in the rate of exchange, prepared last year at my request by Mr. Barbour, Secretary to the Government of India in the Financial Department, explains what would have been the direct effect upon the estimates of 1886-87 of a fall in exchange from 1*s.* 6*d.* to 1*s.* 5*d.* It will be seen that the conclusion is that the additional burden amounts to not less than R1,11,00,783. The calculation does not in any way whatever deal with the consideration of what may or may not be held to be the indirect advantage or disadvantage to the Indian Revenue of a fall in exchange, but confines itself to the direct effect upon the expenditure shewn in the estimates of a fall of from 1*s.* 6*d.* to 1*s.* 5*d.*

Direct effect on the Estimates of the fall of 1d. in Exchange.

"If the Government of India incurs an obligation to pay away every year a certain amount of gold, the extra number of rupees which it may have to give for this gold on any particular date as compared with the number of rupees it would have had to give if exchange had remained the same as when the obligation was incurred, appears to me to be the true measure of the loss by exchange. The Government of India contracts an obligation to find so much gold when that amount of gold can be procured for so many rupees. The relative value of gold and silver alters, and it finds that it takes a larger number of rupees to purchase the gold. The increase in the number of rupees required to meet an obligation contracted under different circumstances is the true measure of the real loss by exchange. To ascertain the total real loss in any year from the fall in exchange, it would be necessary to deal separately with each permanent gold obligation of the Government of India, and to ascertain the additional number of rupees required to meet it, as compared with the number of rupees required for that purpose when the obligation was first contracted. A calculation of this nature would be extremely elaborate and complicated, if not impossible; but we know that the loss by exchange must be very large, as the permanent gold obligations of the Government of India are of great magnitude, and the fall in the rate of exchange has been very great.

"There is, however, no special difficulty in calculating the additional burden imposed on the finances of India by any further fall in the rate of exchange, and if we know what the additional burden is when the rupee falls from (say) 1*s.* 6*d.* to 1*s.* 5*d.*, we shall have a sufficiently accurate means of determining the disturbing effect on Indian finance of fluctuations in the value of the rupee. For the purposes of the calculation in question it is only necessary to ascertain the total net amount of the permanent gold obligations of the Government of India on any date, and to calculate the extra number of rupees required to meet them when the rupee is worth 1*s.* 5*d.* as compared with the number required when exchange is at 1*s.* 6*d.* As the basis of the calculation, the Estimates of the current financial year 1886-87 may conveniently be taken, but in the first instance a few remarks may be made regarding the cost of stores purchased in England. When the rate of exchange is two shillings for the rupee, the Government of India can purchase stores for fewer rupees than it has to pay when the rate of exchange is 1*s.* 6*d.*, provided always that the price of stores does not vary with the rate of exchange. If it be the fact that the prices of English stores vary with the rate of exchange, the lower gold price of commodities in England is *pro tanto* a compensation for the fall in exchange. We know, as a fact, that the gold prices of commodities have fallen more than exchange has fallen, and that the Government of India now obtains English stores for fewer rupees than it used to pay when the rate of exchange was two shillings for the rupee. On the hypothesis that the same cause which has produced the fall in exchange has also produced the fall in gold prices, we may balance the gain from low gold prices against the loss by low exchange, and omit from our calculation the question of loss by exchange in the case of stores.

"The gold expenditure of the Government of India is shewn in the Estimates of 1886-87 at £14,512,900, and deducting the gold receipts (£178,900), we get a balance of £14,334,000 payable in gold. Before calculating the additional number of rupees that must be paid when a fall in the value of the rupee takes place, there should be deducted from this sum the amount payable on account of leave allowances and pensions fixed in rupees, as there is no increase to the number of rupees paid on account of them, no matter what the exchange value of the rupee may be. The cost of stores should also be deducted, if it be assumed that the fall in exchange is balanced by a fall in the gold price of stores. In some instances stores (*e.g.*, stamps) are provided under a contract extending over several years, and during the period of such contract there can be no reduction in the cost of these stores to Government. We will not, however,

include loss by exchange on these stores, because it may be held that, on the assumption as to gold prices already made, there will be a reduction in the gold payments under any new contract which may hereafter be made.

"The statement in the margin shews that, excluding the expenditure shewn under the Railway Revenue Account, the total sum to be deducted on these two accounts is £1,636,400, and the expenditure on which loss is incurred is thereby reduced to £12,697,600. Of this amount no less than £5,270,800 appears under the Railway Revenue Account, and the loss by exchange on it must, owing to the contract relations that exist between the Government and the different Railway Companies, be calculated separately. There remains the sum of £7,426,800 on which loss by exchange may be directly calculated. The loss on this amount due to a fall in the rate of exchange from 1*s.* 6*d.* to 1*s.* 5*d.* per rupee is ₹58,24,941. The loss on the Railway Revenue Account by this fall of 1*d.* in the rupee has been separately calculated; the details are given below.* The additional cost in rupees comes

STORES (EXCLUDING STORES PURCHASED ON ACCOUNT OF THE WORKING AND MAINTENANCE OF RAILWAYS).

	£
Land Revenue	200
Opium	1,600

GRAND TOTAL	1,630,400

* Taking the items first on the expenditure side of the Budget for the year 1886-87 *as framed*, and revising the figures in accordance with a supposed fall of 1*d.*, the consequent loss is shown as follows:

	Original Figures.	Revised Figures.	Loss.
State Railways, Working Expenses—			
Imperial	4,868,500	4,011,070	(*a*)43,120
Provincial	700,000	701,500	(*a*)11,200
State Railways—Interest—			
Imperial	2,019,400	2,022,223	(*b*)2,823
Exchange	172,600	213,253	(*c*)40,653
Annuities in purchase of Railways (Exchange)	575,300	710,624	135,324
Interest on Capital deposited by Companies (Exchange)	103,000	127,235	24,235
Guaranteed Companies, surplus profits, &c.	497,500	495,150	(*d*)—2,350
Guaranteed Companies, Interest (Exchange)	896,900	1,107,894	210,994
Subsidized Companies, Interest (Exchange)	9,100	11,324	(*e*)7,224
		Total Loss	458,523

Turning to the Receipts, the only alteration is in—

XXVII.—*Guaranteed Companies Net Traffic Receipts*, under which the figure, £3,133,500, become £3,107,200—Loss £26,300.

The loss is due to the increased rupee price of stores issued to revenue, but as it is calculated on the difference between the actual rate of exchange and the contract rate, and as the difference is paid into the Civil Department, the loss is nominal only.

The total loss caused by a fall of exchange of 1*d.* below 1*s.* 6*d.* is therefore £458,523.

But of this £44,620 under Working expenses represents increased loss by exchange on English stores consumed during the year.

This loss is to a certain extent compensated by the greater purchasing value of the £ sterling.

If we may assume that prices fall sufficiently in England to cover the fall in exchange, the real loss would be reduced to £413,903.

(*a*) The increase represents the increased rupee value of stores issued on Revenue Account.

(*b*) The loss of £2,823 is due to the larger rupee debit to the Capital Account during the year calculated on outlay in England.

(*c*) The loss of £40,653 is due to the larger remittances to cover interest on the debentures of the East Indian Railway, the Eastern Bengal Railway, and the Sind, Punjab and Delhi Railway.

(*d*) This gain is consequent on the increased charge to working expenses.

(*e*) This loss may eventually be recovered from the Companies.

to ₹41,39,030, or to ₹45,85,230 if English gold prices do not fall in proportion to the fall in exchange.

"The pay of the European troops serving in India is fixed in sterling by Royal Warrant, but is paid in rupees, the amount of each sterling payment being converted into rupees at, approximately, the current rate of exchange. The calculation below * shows that the loss on this account due to a fall in exchange from 1*s.* 6*d.* to 1*s.* 5*d.* amounts to ₹11,36,812.

"There will also be found in the Estimates of 1886-87 under the head '31, Exchange' an item of expenditure amounting to ₹13,77,000. This item represents the net result in connection with exchange transactions on account of (1) Capital of Guaranteed Railways; (2) Capital of the Southern Mahratta and Indian Midland Railways; (3) Remittance on account of Railway stores, and Civil and Military transactions; and (4) the 4 per cent. Loan of 1854. The gain by exchange under (1) and (2) arises from the fact that capital provided in sterling by the Companies concerned is brought to account in rupees at certain contract rates, instead of at the actual rate of the year. The capital has also to be repaid at, practically, the contract rates, and the gain on the capital when received may be balanced against the probable loss when repaid, and the item omitted altogether from the calculation.

"The same course may be followed as regards (3). The loss or gain is mainly due to the actual rate of the year differing from the rate taken at the beginning of the year, and in a series of years we may take the loss to balance the gain. The loss under (4) is of a special nature, and arises from the fact that a loan of ₹1,18,81,000 raised in 1854 was, under the conditions on which it was raised, repayable in England at a fixed rate of exchange. The loss by exchange on the repayment is increased by the fall in the rate of exchange that has occurred this year, but similar transactions will not recur in the future, and it might be misleading to show any loss on this account in a calculation which is intended to bring out the permanent yearly loss to the Government of India by a fall in the rate of exchange from 1*s.* 6*d.* to 1*s.* 5*d.* per rupee.

"Taking the sum of the items given in paragraphs 9 and 10, it will be seen that the additional burden imposed on the finances of India by the fall in

* The pay of British soldiers in India is now issued at the rate of exchange fixed annually by Her Majesty's Government for the payment of troops serving in the colonies. For the year 1884-85, this rate of exchange was fixed at 1*s.* 8*d.* the rupee, which involved an addition of 12½ per cent. to the soldiers' pay and an estimated increase of ₹18,43,000 per annum to the military expenditure in India.

The rate of exchange for the conversion of the pay of British soldiers in India for 1885-86 was fixed at, 1*s.* 7½*d.* the rupee. The expense thus caused [*i.e.*, by the fall of one halfpenny the rupee] amount to ₹4,00,000.

The continued fall in 1886-87 to 1*s.* 7*d.* the rupee, being the rate fixed for the conversion of the soldiers pay, resulted in a further increase of ₹5,15,000 to the military estimates in India, a portion of which, however, is due to an increase in the establishment of British troops.

The addition made to the military estimates in India in consequence of falling rates of exchange has been as follows:—

Year.	Rate of exchange fixed for issue of soldiers' pay. Per rupee.	Increase to military estimates.
	s. *d.*	Rs.
1874-75	1 10½	6,40,000
1884-85	1 8	18,43,000
1885-86	1 7½	4,00,000
1886-87	1 7	5,15,000
	Total	33,98,000

The rate of exchange for next year, 1887-88, is not yet known, but, judging from the present market rates of exchange, a further increase to the military estimates on this account must be anticipated.

The total amount to be converted into rupees in 1886-87 was £1,449,437 sterling which, at 1*s.* 7*d.* per rupee, came to ₹1,83,08,678. At 1*s.* 6*d.* the total rupee payment would have come to ₹1,93,25,826, and at 1*s.* 5*d.* to ₹2,04,62,638.

exchange from 1*s.* 6*d.* to 1*s.* 5*d.* in the present day amounts to ₹1,11,00,783. If the gold price of stores should not fall, as assumed in the above calculation, a further sum of ₹13,72,004 would have to be added to the loss by exchange. It may be mentioned that no account has been taken of any possible loss, from a fall in exchange, on the purchase of stores used on Railway Capital Account.

"A further fall in exchange from 1*s.* 5*d.* to 1*s.* 4*d.* per rupee would more than double the loss, as the loss due to a fall from 1*s.* 5*d.* to 1*s.* 4*d.* is about one-eighth more than the loss due to a fall from 1*s.* 6*d.* to 1*s.* 5*d.*"

85. Passing to Salt, we find that the consumption during the eleven months ending with 31st January 1887 compares as follows with the corresponding figures of the previous year :—

Salt. Increase in consumption in 1886-87.

	Consumption, March 1st 1885 to 31st January 1886.	Consumption, March 1st 1886 to 31st January 1887.	Increase+ Decrease—.
	Maunds.	Maunds.	Maunds.
Bengal . .	9,382,000	9,374,000	— 8,000
Northern India .	4,996,000	6,213,000	+1,217,000
Bombay . .	6,282,000	5,878,000	— 404,000
Sind . .	206,000	210,000	— 4,000
Madras . .	6,965,000	7,097,000	+ 132,000
TOTAL .	27,831,000	28,772,000	+ 941,000

The increase in the eleven months of the last four years has been—

Eleven months from 1st March 1882 to 31st January 1883 . .					1,603,000
Ditto	ditto	ditto	ditto	1883-84 .	973,000

Bombay . . .	4,695,000	+334,000	4,789,000	+94,000	4,810,000	+21,000	6,282,000	+1,472,000	5,878,000	−404,000
Sindh	166,000	+18,000	176,000	+10,000	189,000	+13,000	206,000	+17,000	210,000	+4,000
Madras . . .	6,405,000	+801,000	6,800,000	+395,000	6,789,000	−11,000	6,965,000	+176,000	7,097,000	+132,000
TOTAL .	25,101,000	+1,603,000	27,074,000	+973,000	27,767,000	+693,000	27,831,000	+64,000	28,772,000	+941,000

87. It will be seen that the check in the consumption of salt which was pointed out in the Financial Statement last year, has proved to be, as was at the time surmised, temporary. The total increase in the period of four years from the year 1882 when the salt duty was lowered has been for the eleven months from 1st March to 31st January from 26,101,000 in 1882-83 to 28,772,000 maunds in 1886-87; an increase of 2,671,000 maunds for the eleven months, or (at ₹2 per maund) of ₹53,42,000 or £534,200 conventional sterling, or, say, £583,000 for twelve months. The annual amount of Revenue abandoned when the Salt Tax was lowered was estimated, it will be remembered, at £1,400,000.

88. The net import of gold into India has continued to fall off very greatly in 1886-87; silver also shewing decrease, even compared with ordinary preceding years :—

Imports of gold and silver.

YEAR.	GOLD.		
	Imports.	Exports.	Net imports.
	₹	₹	₹
1881-82	4,85,63,920	1,24,078	4,84,39,842
1882-83	5,09,51,354	16,42,639	4,93,08,715
1883-84	5,46,94,568	69,517	5,46,25,051
1884-85	4,77,81,724	10,62,359	4,67,19,365
1885-86	3,09,15,409	32,86,062	2,76,29,347
1886-87 (10 months) . . .	1,99,48,131	63,63,771	1,35,84,360

YEAR.	SILVER.		
	Imports.	Exports.	Net imports.
	₹	₹	₹
1881-82	6,46,63,889	1,08,73,390	5,37,90,499
1882-83	8,35,80,218	87,77,949	7,48,02,269
1883-84	7,40,85,065	1,00,33,554	6,40,51,511
1884-85	9,11,00,254	1,86,43,941	7,24,56,313
1885-86	12,38,62,599	77,96,314	11,60,66,285
1886-87 (10 months) . . .	6,27,47,044	1,01,98,011	5,25,49,033

89. On the 31st March 1886, the number of depositors in District and Presidency Savings Banks was 80,718 with £2,471,180 at their credit. On the corresponding date of the previous year there were 95,366 depositors, the balance at whose credit was £3,058,998, or showing a decrease on 31st March 1886 of 14,648 depositors and £587,818 in the balance at their credit. The decrease in the number of depositors occurred as under—

Savings Banks.

	Europeans and Eurasians.	Natives.	Total.
31st March 1885	20,330	75,036	95,366
„ 1886	17,270	63,448	80,718
	−3,060	11,588	14,648

and was due to the abolition, under the orders of Government,* of the District Savings Banks at the close of the year 1885-86, with a view to their absorption in the Post Office Banks. To facilitate this measure it was arranged that from the date of the order no new accounts should be received in the District Savings Banks, and that depositors who had accounts therein should be encouraged to transfer their balances to the Post Office Banks as soon as possible. Many depositors availed themselves of this offer, and sums held in District Savings Banks were gradually made over to the Post Office Banks.

* Financial Department Resolution No. 33, dated 4th January 1886.

Post Office Savings Banks.

90. From the statement below it will be noticed that the number of accounts and the balance at credit of depositors rose from 122,599 accounts, and £1,344,200 on the 31st March 1885 to 155,009 accounts, and £2,254,590 on the same date of the following year, or more by 32,410 accounts and £910,390 at their credit. The proportion in which this increase occurred among Europeans and Eurasians and Natives of the country is shown below:—

	Number of Accounts.			Balance at Credit of Depositors.		
	Europeans and Eurasians.	Natives.	Total.	Europeans and Eurasians.	Natives.	Total.
	No.	No.	No.	£	£	£
On 31st March 1885 .	13,355	109,244	122,599	233,500	1,110,700	1,344,200
„ „ 1886 .	20,213	134,796	155,009	441,856	1,812,734	2,254,590
Increase .	6,858	25,552	32,410	208,356	702,034	910,390

The above improvement was due partly to the transfer from the District Banks, as explained previously, and to the Postal Department having begun to receive deposits at the rural Post Offices, thereby extending operations into parts of the country where heretofore the people had no facilities for investing their small earnings.

The balances in the Presidency Savings Banks have been declining for some years, in consequence probably of the greater convenience offered by the Post Office; and it has been decided that, while in the Presidency towns they may be continued, the Banks opened in the interior of Madras and Bombay should be superseded from June 1886 by those belonging to the Post Office.

The total balances in Savings Banks of all classes on the 31st March 1886 was £5,081,183.

Post Office Life Insurance.

91. The Director General of the Post Offices' report on the operations of the Postal Life Insurance scheme for the year 1885-86, which is the second complete year of its existence, shows that 170 new policies were issued, representing a total assured amount of ₹1,91,850, as compared with 398 policies, aggregating ₹5,63,225 taken out during the 14 months ending with the 31st March 1885.

The abstract below contrasts the progress of the scheme in the years 1884-85 and 1885-86:—

	To 31st March 1885.	To 31st March 1886.
Number of lives insured .	398	568
Amount of insurance .	₹ 5,63,225	7,55,075
„ received in premia .	„ 14,890	39,567
„ of claims met .	„ 1,500	5,773

The statement shows that the total number of policies effected up to 31st March 1886 was 568 of the total value of ₹7,55,075 or an average of ₹1,330 for each policy. Deducting lapses or policies surrendered or cancelled, the aggregate amount assured stood at ₹7,04,125. Of the total number of policies effected 56 were for Europeans and Eurasians and 512 for Natives of the country. The scheme continued to make progress in the Postal Circles of Bengal, Madras, Bombay, and Assam. The number of policies taken out in these circles during, and to the end of the year 1885-86 are as under:—

	Bengal.	Madras.	Bombay.	Assam.
In 1885-86 .	40	35	36	15
To end of 1885-86 .	131	108	88	58

The table in the margin shews the distribution of policies among the principal classes of postal officials since the scheme was introduced, with the percentage of lives insured in each class. Out of a total of 38,829 employees, 568, or a little less than 1½ per cent., have availed themselves of the advantages of State Life Insurance, and more than 26,000 of these employees belong to the poorly paid class of postmen, runners, and boatmen.

	No. on 31st March 1886.	Number of Life Insurance Policies taken out.			Percentage of lives insured.
		Up to 31st March 1885.	During 1885-86.	Total.	
Superintendents and Inspectors .	346	38	7	45	13·
Postmasters, Sub-Postmasters, and Village Postmasters . .	4,677	123	64	187	3·99
Schoolmasters and Extraneous Agents	1,969	...	1	1	·05
Clerks	5,086	177	65	242	4·75
Postmen and Village Postmen .	13,826	44	23	67	·48
Road Establishment . . .	12,271	11	6	17	·13
Signallers, &c., in Combined Offices	654	5	4	9	1·37
	38,829	398	170	568	1·46

From 1st April 1886 to 31st December 1886, 106 additional policies were issued of the aggregate value of ₹92,400.

92. The following explanations cover the main causes of increase or decrease in 1886-87 and in the ensuing year. In the former case the comparison is between the Budget Estimates and the Revised Estimates of 1886-87; in the latter between the Budget Estimates of 1887-88 and the Revised Estimates of 1886-87:—

Comparison of Revised with Budget Estimates of 1886-87.

Revenue.	Increase. £	Decrease. £	Expenditure.	Increase. £	Decrease. £
Land Revenue . . .	...	149,800	Opium	134,400	...
Opium	...	328,700	Police	233,600	...
Salt	146,100	...	Marine	159,300	...
Excise	130,800	...	State Railways (Working Expenses) . . .	...	291,100
Assessed Taxes . . .	...	110,090	Guaranteed Companies .	109,500	...
State Railways— Gross Earnings . .	...	127,100	Army	804,600	...
Guaranteed Companies— Net Traffic Receipts .	419,000	...			

Revenue.

93. *Land Revenue (I)—Decrease £149,800.*—In Upper Burma alone the decrease is £304,600, and is due partly to the defective information on which the first estimates were based, and partly to the unsettled state of the country. In other provinces, the Land Revenue was, as will be seen from the Provincial figures, better than the Estimate.

Opium (II)—Decrease £328,700.—There is a decrease of £522,100 in the receipts from Behgal opium, and an increase of £197,500 in those from Malwa opium; besides small differences in the receipts from excise opium in other provinces. The Budget Estimate provided for a sale of 55,500 chests of Bengal opium at ₹1,300 a chest—£6,660,000, plus excise opium and miscellaneous receipts, £70,000, or a total of £6,730,000. The total number of chests sold during the year was 54,750, which resulted in a decrease of £513,000, owing to an average rate of ₹1,122-11-9 a chest having been realised. There is, besides, a net decrease of £9,100 on account of excise opium and miscellaneous receipts. The increase in Bombay is due to the number of chests of Malwa opium exported during the year having been somewhat larger than was anticipated in the Budget.

Salt (III)—Increase £146,100.—This occurs chiefly in Bombay and the Central Provinces, and is due to the more extended sale of Baragora salt during the first three months of the year, during which a high price was maintained on the Sambhar salt, as explained in paragraph 47 of last year's Statement.

Excise Increase—£130,800.—The increase of Excise revenue is general.

Assessed Taxes.—Decrease £110,000.—The decrease of £110,000 is chiefly due to the decision to levy Income-tax upon the surplus profits, and not upon the net earnings of the Guaranteed Railways. As explained in paragraph 77 the effect on the Government account was more nominal than real.

Railways.—Under this head State Railways show a decrease of £127,100, and Guaranteed an increase of £419,000.

The main factors on the first of these figures are:—

	£
East Indian Railway—Decrease	55,000
North-Western Railway—ditto	164,500
Rajputana-Malwa Railway, Imperial portion—Increase	32,500
Southern Mahratta Railway—Increase	22,500
Provincial Railways—increase	44,400

The decrease in the East Indian Railway receipts is due to the grain traffic during the earlier months of the year having been below the expectations formed when the Budget Estimates for the year were framed. The large decrease in the North-Western Railway is due to the falling off in the receipts from the carriage of materials for frontier railways and to a great falling off in the usual export wheat traffic from the Punjab. In the Southern Mahratta Railway, the increase is due to an increase in the open mileage.

Under Provincial State Railways the principal contributors to the increase are Burma Railway £25,000, Northern Bengal £30,000, Tirhoot £17,500.

In the Burma Railway the increase is due to the country having become quieter and to movement of troops to Upper Burma, and in the Northern Bengal Railway to general increase of traffic. The increase in the Tirhoot line is the result of the reduction of third class fares, the benefit of which is being gradually appreciated, and of the opening for traffic of a portion of the Kosi extension.

The increases under Guaranteed Railways (Net Traffic Receipts) are as follow:—

	Increase. £
Madras Railway	55,000
South Indian Railway	6,500
Bombay, Baroda and Central India Railway	25,000
Great Indian Peninsula Railway	270,000
Oudh and Rohilkhand Railway	62,500
TOTAL	419,000

£84,500 of this is due to the exclusion from working expenses of the charge for payment of Income-tax; the rest arises from improved traffic.

94. On the Expenditure side, the first noteworthy difference is—

Opium (4)—Increase £134,800.—This increase occurs almost wholly in Bengal, and is due to the outturn of the Benares Agency for the season 1885-86 having proved larger than was anticipated when the Budget Estimate was framed.

Police (20) and Marine (21).—The principal items here included are £195,000 on account of increased Police charges in Upper Burma, £139,000 under Marine, on account of transport charges connected with operations in Upper Burma.

Famine Relief.—Decrease £1,049,000.—It has been explained in paragraph 73 that the absence of a surplus has prevented our carrying out the intention, provided for in the Budget, of setting apart £749,000 for reduction of debt; and that, for the same reason, of the original grant of £500,000 for the

construction of Protective Railways, we can afford to give only £200,000 from Revenue.

State Railway Working Expenses (38) £291,100, counterbalanced by an increase, £109,500, for payments of surplus profits to *Guaranteed Railway Companies*, the necessary accompaniment of increased earnings. The principal items of the first are—East Indian Railway, £185,000, and North-Western Railway, £54,000. Of the first of these decreases about £79,000 is in consequence of the decision to levy Income-tax on the surplus profits instead of basing it on the net earnings, and including the amount in working expenses; £50,000 is due to the write-back to Capital of the value of stores issued to Revenue, but not used; and the balance to renewals of way and stock not having been carried out to the extent anticipated.

The decrease on the North-Western Railway is accounted for by the reduced traffic during the year already noticed on the receipt side.

Against the foregoing decreases, there is a large increase of £34,000 in the working expenses of the Eastern Bengal Railway caused by extensive renewals of permanent-way and repairs to rolling stock, &c.

The provincial State Railways also shew a small decrease in working expenses which occurs mostly on the Nagpur-Chhatisgarh Railway. This is due to a large provision for ballast not being required, as the expenditure on this head has been charged to Capital, to less outlay in repairing culverts, and to the return of materials to store.

Army, Effective, (46).—Increase £673,700. Non-effective, increase £21,400=Total £780,300.—This increase arose in consequence of the necessity for adding, during the year, to the garrison to be maintained in Upper Burma, and to the movements of troops there. The other principal items which have contributed to this increase are (1) the raising of two additional Goorkha Battalions; (2) purchase of mules for the Artillery; (3) provision of a greater number of medical officers and subordinates; and (4) additional purchases of land to meet military requirements. On the other hand there have been savings due to the postponement of the arrival of a portion of the sanctioned additional number of British troops, and also to the instructions issued in the early part of the year to ensure the observance of strict economy in all branches of the army.

95. The principal items of difference between the Budget Estimates of 1887-88 and the Revised Estimate of 1886-87 are:—

Revenue.	Increase. £	Decrease. £
Land Revenue	327,000	...
State Railways (gross earnings)	604,400	...
Military Works	...	152,400

Expenditure.	Increase. £	Decrease. £
Land Revenue	153,200	...
Opium	...	279,200
Police	463,800	...
Political	...	120,200
Construction of Railways	...	112,900
Railways—		
State Railways (working expenses)	353,300	...
Military Works	170,000	...

96. *Land Revenue (1)—Increase £327,100.*—Of this increase a sum of £209,900 is anticipated from Upper Burma and the balance from Bombay. The increase in the latter case is due to a considerable extent to the postponement, till next year, of £50,000 due in 1886-87.

State Railways (Gross Earnings) (XXVI)—Increase £604,400.—This increase is general, and is due in many cases to increased open mileage. With the exception of the Northern Bengal Railway and a few other minor lines, all the railways are expected to earn more in 1887-88 than in the previous year.

The main increases are—

Rajputana-Malwa Railway	50,000
Umeria Colliery	21,500
Indian Midland Railway	23,100
Lucknow-Sitapur-Kheri Railway (Provincial)	26,200
Cuddapah-Nellore and Bellary-Kistna (new lines)	35,000
North-Western Railway	335,000
Southern Mahratta Railway	117,500
TOTAL	608,300

The largest of these—that on the North-Western Railway—is principally a recovery from the low figures of the current year, but is also partly due to the opening of the frontier lines.

It has already been explained that there is a considerable alteration in the distribution of the railways between Imperial and Provincial, and that the Provincial share of the increase under this head, which is £282,700, arises not from improvement of revenue upon Provincial Railways, but from the transfer to Provincial of the Eastern Bengal Railway, and the transfer to Imperial of some lines that have hitherto been Provincial.

The decrease of receipts under Military Works (XXXI) is due to the exceptional recovery in 1886-87 of £150,000 from His Highness the Maharaja Sindia on account of the Morar Cantonment and the Gwalior Fort.

Expenditure.

97. On the Expenditure side there is under *Land Revenue* (3) a net increase of expenditure of £153,600.

The chief increases occur in the following Provinces:—

	£
Central Provinces	21,600
Upper Burma	48,700
Punjab	13,200
Madras	43,700

In the Central Provinces and Punjab the increases are on account of extended settlement operations. In Madras, it is due to the proposed revision of subordinate revenue establishments. In Upper Burma the increase has been provided for in view of the anticipated realisation of revenue on the pacification of the province. As a good deal of expenditure under this head, which was formerly partly Imperial, has in the new Contracts been made wholly Provincial, the result on the whole is a diminution of Imperial expenditure, but an increase of Provincial by more than the whole £153,600.

Under *Opium* (4) we estimate for smaller expenditure by £270,200 than that of this year, as we do not anticipate the recurrence of the recent very favourable crops.

The changes in the expenditure under the remaining revenue heads are mostly transfers of expenditure between Imperial and Provincial.

Under *Civil Departments*, we have a gross increase of expenditure in India £407,400, which comes mainly under two heads—namely, Police (20), increase £463,800, almost entirely in Upper Burma (where the police is estimated to cost £737,000 altogether), and Political (25), decrease £116,300 owing to cessation of charges for the Afghan Boundary Commission and the Thibet Mission.

Under *Railway Revenue Aocount* we provide for a gross increase of £553,300 in State Railway working expenses (38) and £147,700 under State Railway interest account.

Of the former the principal increases are as follow:—East Indian Railway £70,000. (This apparent increase is explained by the write-back in 1886-87.)

North-Western Railway £380,000. (This is to provide for extensive renewals of permanent-way chiefly on the late Sind, Punjab and Delhi Railway and for working the Sind-Sagar State Railway and the Bolan and Sind-Pishin lines, which will be opened during the year.)

Southern Mahratta Railway £52,500. (In 1887-88 the line will probably be opened throughout.)

The increase, £170,000, on account of Military Works, is entirely on account of Upper Burma, where the expenditure is estimated at £300,000.

Ways and means.

98. In the Financial Statement for 1886-87, it was estimated that the year would open with a balance on the Indian Treasuries of £12,401,932, that the Secretary of State would draw (five sterling) £13,331,400 during the year, and that the balance of March 31st, 1887, would be £10,617,432. The actual opening balance was £12,754,478; Council Bills have fallen short considerably the total for the year being now put down at £12,000,000, and the closing balance at £13,016,578.

Commencing with this balance on 31st March 1887, we find that after providing for the contemplated amount of drawings £16,250,000, we are left at the end of the year with an estimated balance of only £5,604,678. This is due to the heavy expenditure on Capital outlay £3,953,800, and special defence works £130,300, not charged to Revenue, and to the heavy payments (net £1,673,200) we have to make to Railway Companies, against their payments into the Home Treasury.

We have been assisted in meeting the demands which will fall upon the Indian Treasuries next year by the circumstance that the Gwalior Council of State has intimated its desire, through the Agent to the Governor General, Sir Lepel Griffin, to invest three and a half crores of the late Maharaja's hoarded treasure in Government securities. We also propose to place in the market a loan of 200 lakhs; but it will be understood that according to the usual custom, no pledge is, or can be, given regarding the time or the amount of borrowing. It has been decided not to raise any sterling loan for Public Works during the year.

With these loans our balance at the end of the year is estimated at £11,104,678.

Of our other transactions, under the head of Ways and Means, it remains only to note that we expect to get £660,000 by Savings Banks' deposits, but about the same amount will be required on the disbursement side, for the advance promised to the Calcutta and Bombay Port Trusts, out of the last year's loan of £1,200,000.

99. The following is a summary of the chief points in the foregoing Statement.

The Accounts for 1885-86 shew the following:—

Recapitulation.

	£
Receipts	74,464,197
Expenditure	77,265,923
Deficit	2,801,726

The Revised Estimates of 1886-87 shew—

Revenue	76,071,700
Expenditure	76,071,200
Surplus	500

The Estimates for 1887-88 shew—

Revenue	77,460,200
Expenditure	77,443,500
Surplus	16,700

The deficit which would have otherwise occurred in the Revised Estimates of 1886-87 and the Estimates of 1887-88 has been met by transfer to loan charges against the Famine Insurance Grant the sum of £1,049,400 and £1,248,000 in those two years respectively.

The net charge in 1886-87, on account of Upper Burma Civil and Military Expenditure, is £1,741,400 and in 1887-88 £1,770,500.

The ultimate gain to the Imperial Government on the Provincial Contracts is £640,100, the gain on the estimates for the ensuing year, however, being £490,000 only. The recommendations of the Finance Committee in other directions cover a very wide field, and must for some considerable time continue to occupy the attention of the Government.

The Income Tax receipts in the Revised Estimates of 1886-87 are put at £1,348,100 against £1,458,100 in the Budget of that year; the difference being mainly due to a decision to assess the Income Tax on the surplus profits of Guaranteed Railways, and not on their net earnings. As the share of the Government in the Income Tax on the net earnings of the Guaranteed and State Railways is £131,980, the loss on account of Income Tax is merely nominal to this extent. The estimate for the next year on account of Income Tax is £1,406,000.

The net loss to the State on State and Guaranteed Railways in the Revised Estimates of 1886-87 is £1,177,900 and in the Budget Estimates of 1887-88 £1,383,700.

The Army Estimates for 1887-88, including Burma, amount to £19,197,000 against £19,070,600 in the Revised Estimates of the preceding year. £344,984 are included in the Estimates of 1887-88 as increased expenditure on account of additions to the strength of the Army.

The Opium prospects are good, but as they are not so exceptional as last year, the expenditure on account of opium has been reduced from £2,785,300 in the Revised Estimates to £2,506,100 in the Budget Estimates for next year. The reserve at the close of 1886-87 is expected to stand at 36,705 chests. The price during the ensuing year has been taken at R1,100 per chest. 4,750 chests will be sold each month during 1887-88; the amount to be sold in the first three months of 1887-88 will be notified hereafter.

The additional charge in the Revised Estimates of 1886-87 on account of Exchange is £474,600. Exchange for 1887-88 has been taken at 17½*d.*

The consumption of Salt has increased, in the eleven months ending with January 31, 1887, by 941,000 maunds.

The import, both of gold and silver, has decreased, the former having fallen to £135,84,360 for 10 months of 1886-87 from £27,629,347 in 1885-86 (12 months), £46,719,365 in 1884-85 (12 months), and £54,625,051 in 1883-84 (12 months).

The District and Post Office Savings Banks have been amalgamated. The total balances in Savings Banks of all classes on 31st March 1886 was £5,081,183.

The Post Office Life Insurance Scheme makes progress.

The opening balance of 1887-88 in India is expected to be £13,016,578 and the closing balance £11,104,678. Provision has been made for drawings by the Secretary of State to the amount of £16,250,000 (true sterling).

The annual loan for Public Works will amount to 5½ crores, and will be raised in India. Of this amount 3½ will be obtained by the investment in Government securities, at the desire of the Gwalior Council of Regency, of treasure hoarded by the late Maharaja Scindiah. No Public Works Sterling Loan will be raised this year.

A. COLVIN.

March 26, 1887.

J. WESTLAND,
Offg. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch*).

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 26th March 1887.

Except in the south of the Peninsula where the weather has been unsettled, the prevailing conditions have been on the whole similar to those of the preceding week.

High pressures in the Western Punjab, Sind and Rajputana, continued until the 23rd, when a rapid fall set in and increased during the next two days; resulting in the Punjab in a depression, at first slight, but afterwards developing to a well marked disturbance. This disturbance was accompanied by a cyclonic circulation of the winds throughout North-Western India, and slightly increased the amount of cloud, but brought no rain. In the Peninsula the barometric change was of the opposite character. On the 20th and 21st Deccan was the seat of the lowest pressure, but on the 22nd a brisk fall of the barometer accompanied by north-easterly winds and heavy rain took place in the extreme south. After the 22nd, the barometer rose briskly in the Peninsula and reached its highest about the same time that it reached its lowest in the Punjab. In Western Bengal and the Central Provinces there were indications at the close of the week of the formation of a small subsidiary barometric depression. Otherwise the barometric changes elsewhere call for little remark.

In the Karnatic the temperature was lower than in the preceding week, but with this exception, it has been everywhere higher. In the Western Punjab the rise amounted to 10° and in Sind to 7°. In general, and excepting a slight break on the 23rd, the temperature has steadily risen during the week and at its close the 10 A. M. readings exceeded that at the beginning—

At Mooltan	by 7°.	At Jeypore	by 5°.
„ Lahore	„ 8°.	„ Kurrachee	„ 1°.
„ Lucknow	„ 6°.	„ Secunderabad	„ 2°.
„ Allahabad	„ 8°.	„ Bellary	„ 3°.
„ Gaya	„ 12°.	„ Cuddapa	„ 1°.
„ Jubbulpore	„ 2°.	„ Madras	„ 0°.

The highest reading recorded during the week was 108° at Masulipatam, *viz.*, on the 26th. This was 1° higher than any recorded during the preceding seven days.

Notwithstanding the cyclonic circulation and rather cloudy weather, which prevailed at the close of the week in the North-West, the air all over Northern and Central India was much drier than usual. To the Peninsula, however, the storm, in the extreme south on the 22nd and 23rd, brought much moisture and the relative humidity of the Karnatic, Mysore, the Deccan and Konkan exceeded the normal.

There has been more rain in the past seven days than for many weeks past, but almost the whole fell in Southern India, to the south of a line running from Belgaum southeastward to Madras. South of that limit there was an average of two wet days at most stations. The largest total was $3\frac{3}{4}$ inches at Negapatam, the smallest 0·02 inch at Mercara.

The rainfall statement given below shows that the fall of the season is still deficient over Northern India except at one or two stations. At Peshawar, Rawalpindi, and Lahore it is serious.

Stations.	Actual rainfall since 1st November 1886.	Average rainfall since 1st November 1886.	Difference.
Multan	0·64	1·30	−0·66
Peshawar	1·79	5·30	−3·51
Murree	8·69	8·89	−0·20
Rawalpindi	4·79	7·96	−3·17
Lahore	0·61	3·00	−2·39
Simla	8·50	7·14	+1·36
Delhi	2·40	2·63	−0·23
Mussorie	8·78	9·04	−0·26
Roorkee	2·99	5·16	−2·17

Stations.	Actual rainfall since 1st November 1886.	Average rainfall since 1st November 1886.	Difference.
Meerut	2·68	3·17	—0·49
Bareilly	3·30	2·89	+0·41
Agra	1·06	1·44	—0·38
Lucknow	1·04	1·46	—0·42
Allahabad	4·31	1·55	+2·76
Darjeeling	3·40	3·35	+0·05
Calcutta	1·60	3·65	—2·05

The table of barometric, thermometric, and humidity anomalies shows that pressure has been below the average of the month throughout India. In the west of the Punjab, in Behar, the Berars, Sind, Guzerat and the Deccan, the deficiency is about a twentieth of an inch, and is less in some parts of the North-Western Provinces and Bengal. Temperature exceeds the general average of the month except in Northern Bengal and the Peninsula, where it is somewhat below the average. The humidity varies in the opposite direction, the means being above the average over the Peninsula and below it elsewhere.

Districts.	Difference of Barometer from mean, March 19th to 26th.	Difference of Temperature from mean, March 19th to 26th.	Difference of Humidity from mean, March 19th to 26th.	Total Rainfall in week, March 19th to, 26th.

W. L. DALLAS,
Simla, the 29th March 1887. for *Meteorological Reporter to the Govt. of India.*

The following extract from a letter of the Superintendent of the Kailang Observatory, Lahoul, shows that the winter snow-fall has so far been light, to the north of the Rotang Pass:—

"Since the 1st October 1886 up to this (7th March) we have had scarcely 5 feet of snow, while during the same period the year before (1st October 1885 to 7th March 1886) about 8½ feet had fallen. At present the southern hill slopes in the neighbourhood of Kailang to the height of about 12,500 feet are completely free of snow and so are most of the fields. The station diary shows that fifteen years ago the winter (from 1872-73) was almost exactly the same. Then March and April were nearly dry months, but in May and June heavy falls of snow occurred."

METEOROLOGICAL OFFICE, INDIA,
Calcutta, the 1st April 1887.

HENRY F. BLANFORD,
Meteorological Reporter to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEKS ENDING 24th AND 31st MARCH, 1887.

GENERAL REMARKS.—In the latter half of the fortnight under report rain fell in most parts of Madras, Bengal, and Assam. Slight falls have also occurred in a few districts in the North-Western Provinces and Oudh, the Punjab, and Burma. Elsewhere the country has been rainless during the period under report.

The *rabi* harvest continues in most parts of the country, and has been partly completed in Bombay, the Central Provinces, and Berar. Prospects are generally good, except in the Punjab, where the state of the crops is unfavourable, owing to the want of rain. In Rajputana harvesting has commenced in a few States.

The standing crops are generally fair in Madras, though in some districts blight and want of rain have caused slight damage to the crops.

In Mysore and Coorg the outlook is satisfactory.

The prospects of the spring rice are favourable in Bengal, and sowings for the early rice have commenced in Assam.

The collection of opium is in progress in Bengal and the North-Western Provinces, and a fair outturn is expected, except from Shahabad, where the crops were damaged by hail. The prospects of the crops in Central India and Rajputana are fair.

Cholera and small-pox are prevalent in parts of Madras, Bombay, Bengal, the North-Western Provinces, and Burma, but generally the public health is good.

Cattle-disease exists in some districts in Madras, Bombay, Bengal, and Assam.

Prices are still high in the Punjab, though they are falling in the Amritsar and Sialkot districts. Elsewhere they are steady.

REPORTS FOR THE WEEK ENDING 24th MARCH, 1887.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Mar. 23rd).		
Bellary	*Nil*	Standing crops generally fair, but white *cholum* withered and cotton affected by disease, very bad in two taluks. Harvest: sugarcane and *cholum* near average; other crops below average. Fever in one and cattle-disease decreasing in five taluks.
Kurnool	*Nil*	Standing crops fair. Harvest almost over, outturn below average. Fever in two, small-pox in five, and cattle-disease decreasing in four taluks.
Ganjam	·02	Small-pox in three, fever and cattle-disease prevalent; latter decreasing in two taluks.
Kistna	*Nil*	Standing crops generally good. Harvest: late dry grains, outturn below average. River below anicut. Fever slight. Cholera in seven taluks. Cattle-disease decreasing in one taluk.
Chingleput (Madras)	*Nil*	Standing crops in parts withering for want of rain. Harvest: paddy, outturn below average. Fever and cholera in places. Cattle-disease severe in three taluks
Coimbatore	*Nil*	Standing crops generally good, but in parts suffering from want of rain. Harvest: paddy, *ragi*, and *cholum*, outturn generally above average. Fever in one and small-pox in four taluks.
Tanjore	*Nil*	Standing crops generally good, but in parts indifferent owing to want of rain. Harvest wet and dry grains, outturn up to average. Cattle-disease in one taluk.
Madura	·03	Standing crops in parts withering for want of rain. Outturn, where harvested, unsatisfactory. Small-pox and cattle-disease in parts.
Malabar	*Nil*	Third crop cultivation progressing in three taluks. Fever in two and small-pox in eight taluks.
Travancore	*Nil*	Harvest of second crop paddy over. Small-pox and fever in places.
		General Remarks.—General prospects tolerably fair.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—(Mar. 23rd)		
Karachi	*Nil*	River at Kotri on 19th, 5 feet 6 inches against 4 feet 9 inches on same date last year. *Rabi* harvesting going on in eleven talukas. Crops injured by *mahl* insect in Manjhand and Ghorabari talukas. Fever in six and cattle-disease in two talukas. Wheat, red rice, and *bajri* in Karachi, 23, 30 and 32 and in Sehwan, 28, 38 and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	Small-pox in one and fever in three talukas. River at Kotri on 21st, 5 feet 3 inches against 4 feet 8 inches on same date last year. Wheat 21, *bajri* 37½, *jowari* 40, white rice 18, and red rice 30 pounds per rupee.
Ahmedabad	*Nil*	Reaping of *rabi* crops continues. Public health good. Wheat 27 and *bajri* 30 pounds per rupee.
Baroda	*Nil*	Public health good. Harvesting of wheat and gram in progress. *Bajri* 31, wheat 19, and rice 24 pounds per rupee.
Surat	*Nil*	*Rabi* reaping continues. Fever and small-pox in Bardoli taluka. *Jowari* 39 and *nagli* 46 pounds per rupee.
Nasik	*Nil*	*Rabi* harvesting nearly completed. Threshing commenced in some places. Cattle-disease and small-pox in certain villages of Sinnar. A few cases of cholera at Yeola. Wheat 28¾, *bajri* 36¾, and rice 20¾ pounds per rupee. Public health generally good.
Colaba (Bombay)	*Nil*	Abnormal temperature 2° cool on 16th, 2° warm on 18th, 1° warm on 22nd, and *nil* on all other days. Vapour in air in defect of normal on 18th, and normal on all other days. Wind normal.
Poona	*Nil*	Wheat slightly injured in places in Sirur and Máwal talukas. Reaping almost completed and threshing in progress in Bhimthari talukas. Public health generally good. Slight cattle-disease in Indápur and Haveli talukas. *Bajri* 44 and *jowari* 58 pounds in the district, and *bajri* 34 and *jowari* 43 pounds per rupee in Poona City.
Ahmednagar	*Nil*	Reaping almost finished. Threshing commenced. Health good. *Bajri* 57 and *jowari* 73 pounds per rupee.
Sholapur	*Nil*	Reaping of *kharif* and *rabi* crops almost completed. Cattle-disease in parts of Sholapur taluka. Public health good. *Jowari* 65⅜ and *bajri* 55¼ pounds per rupee.
Dharwar	Hángal, ·40	Harvesting of wheat and gram nearly completed. Cotton-picking in progress. Scarcity of fodder in Nawalgund and of drinking water in Kod, Gadag, and Karajgi talukas. Public health generally good. Rice 25⅜ and *jowari* 58¾ pounds per rupee.
Kanara	*Nil*	Second rice crop harvest and sugarcane pressing in progress. Slight cattle-disease in Supa petha. Fever in two talukas. Public health good. Weather hot. Common rice in Karwar and in district average 13 seers per rupee.
Rajkot	*Nil*	Weather hot. Measles in Rajkot, Virpur, Godka, Gondal, Junagarh, Veráwal, Bagasra, and Mánakwára. Small-pox among cattle at Morvi and Kharva. Hoof-disease in cattle in the villages of Porbandar. Wheat 26, *bajri* 26, and *jowari* 33 pounds per rupee.
		General Remarks.—Slight rain in part of Dharwar. Reaping operations completed in eight and going on in other districts. Fever and cattle-disease in parts of ten, and small-pox in parts of six districts.
Bengal—(Mar. 22nd)		
Chittagong	*Nil*	Weather getting hot. Prospects fair. Lands being prepared for *aus*. Prices steady. Cholera and small-pox in north. Public health generally good.
Dacca	0·44	Prospects good. Pulses being gathered. Ploughing for *aus* and jute going on. Paddy being sown in lowlands. Public health good.
24-Pergunnahs	*Nil*	Prospects favourable. Almost all cold weather crops off the ground. Public health good.
Moorshedabad		Heavy rain. Weather cooler. Prospects good. Wheat being cut. Cholera in Jungypore sub-division. Public health good.
Rungpore	*Nil*	Sowing of *aus*, *chena*, and *kaon* in progress. Public health good.
Bhagulpore	*Nil*	Hail in Banka sub-division has damaged mango blossoms. *Rabi* harvest commencing. Outturn of linseed, *khesaree*, and peas good.
Purneah	*Nil*	Cold weather crops doing well. Agricultural operations slack at present. Health of people and cattle good. River low.
Patna	*Nil*	Reaping of *rabi* being pushed on. Castor seed and opium being gathered. Public health generally good.
Monghyr		Poppy prospects continue fair. Hailstorm of 13th has done some damage over a limited area.
Durbhanga	*Nil*	*Rabi* being harvested. Collection of opium in progress. Paddy, indigo, and *moong* being sown. Prices unchanged. Public health generally good.
Hazareebagh	*Nil*	Weather getting warm. *Rabi* being harvested, with fair outturn. All standing crops doing well. Public health good. Cattle-disease in some thanas.
Cuttack	0·38	Weather warm. *Dalua* rice in ear. Price of rice unchanged. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Midnapore	0·85	*Boro* rice doing well. Cultivation of land begun. Public health good.
Shahabad		Severe storm of wind, hail, and rain on 13th damaged opium.
Khoolna	*Nil*	Weather warm. Prospects of *boro* rice favourable. Rain wanted for ploughing. Public health fair.
Dinagepore	Slight rain at Nawabganj and Parsa, none at head-quarters.	Land being prepared for *bhadoi* crop. Cattle-disease reported from Nemtabad and cholera from Atoári. Public health fair.
Pubna	*Nil*	Weather getting warm; cool at night. Average winter crops expected. Public health good.
Gya	*Nil*	*Rabi* being harvested and opium extracted. Fever and cholera in some stations.
Mozufferpore		Report of poppy very favourable.
Chumparun	*Nil*	*Rabi* being harvested. Opium collecting and indigo sowing in progress. Prices stationary. Public health fair.
Burdwan	*Nil*	Prospects fair. Public health good.
Sarun		Opium prospects good. Weather favourable.
		General Remarks.—Rain in Dacca, Moorshedabad, Dinagepore, Midnapore, and Cuttack. General agricultural prospects favourable. Cultivation of early rice and jute progressing, and in some districts sowing of early rice has begun. *Boro* rice doing well. Indigo is being sown. *Rabi* harvest proceeding with good outturn. Collection of opium going on well, but in Shahabad and Monghyr some damage done by rain and hail on the 13th. Public health generally good.
N.-W. Provinces and Oudh—(Mar. 23rd)		
Benares (Mar. 22nd)	*Nil*	Weather cooler. Harvesting of *rabi* in progress. Average outturn. Supplies plentiful. Prices fluctuating slightly. Cholera still continues, but less in the city; otherwise the public health is good, and no cases of cattle-disease are reported.
Ballia („ 21st)	*Nil*	Weather clear. *Rabi* crops being cut. Sugarcane sowings in progress. Prices steady. Public health good.
Gorakhpore(„ „)	*Nil*	Weather clear. Harvesting in full progress. Prices stationary. Health fair.
Fyzabad („ 22nd)	*Nil*	Weather seasonable. Harvesting and opium collections progressing well. Supplies ample. Prices easier. General health good.
Lucknow („ 21st)	*Nil*	Strong west wind. *Rabi* crops being harvested. New grain coming into the market. Opium collection continues, yield small. Prices lowering. Public health and condition of cattle good.
Rai Barelli („ „)	*Nil*	Weather clear. Strong westerly wind. Slight injury to *rabi* crops and opium by hailstorm of the 13th instant. Harvesting of *rabi* crops and collection of opium going on. Markets well supplied. Prices stationary. Cases of cholera reported from tehsil Dalmau. Condition of cattle good.
Partabgarh („ 22nd)	*Nil*	The *rabi* crops are being harvested all round, and the market is well stocked with grains. Opium collection too is now in rapid progress. Prices almost stationary. Health of people and cattle good.
Allahabad („ „)	*Nil*	Weather hot during day, but mornings and evenings still cool. Crops being harvested. Prospects good. Markets well supplied. Prices stationary. Health generally good. Cholera reported in places.
Cawnpore („ „)	*Nil*	Weather seasonable. *Rabi* being cut. Opium collections going on in some villages. Poppy of second and third sowings is stunted. Sowing of sugarcane, indigo, and extra crops commenced. Prices steady.
Banda („ „)	*Nil*	*Rabi* harvest in progress. Prices fluctuating. Sporadic cholera continues about Karwi. Cattle-disease in four villages.
Farakhabad („ „)	*Nil*	High westerly breeze. Reaping in progress. Outturn expected to be below average, owing to injury from frost last month. Poppy being lanced. Prices steady. Slight sickness, but not of an epidemic nature.
Sitapur („ „)	*Nil*	High westerly winds have prevailed during the week. Harvesting in progress, but outturn expected to be below average owing to frost. Poppy prospects remain good.
Bareilly („ „)	*Nil*	Harvest promises well. Prices easy. Health of men and cattle good.
Kumaon („ „)	*Nil*	Weather fine. *Rabi* crops making progress. Barley coming into ear. Prices stationary. General health fair. Cholera in parts of Káli Kumaon.
Agra („ „)	*Nil*	*Rabi* being cut. Prices falling slightly. Health good.
Jhansi („ 21st)	*Nil*	Weather getting warm. Harvesting going on. Markets well stocked. Small-pox in places. Condition of cattle good.
Meerut („ 22nd)	*Nil*	Westerly wind prevails. Peas and barley being cut, and ploughings for indigo commenced. Prices a little easier. No sickness.
		General Remarks.—Weather seasonable. Harvesting of *rabi* continues, and prospects are generally favourable. Opium collections in progress. Markets well stocked and prices fairly steady. With the exception of some cases of cholera reported from a few districts, the public health is good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—(Mar. 23rd)		
Delhi (Mar. 22nd)	*Nil*	Health good. Prices fluctuating. *Rabi* unfavourable.
Hissar	*Nil*	Health good. Prices slightly fallen. *Rabi* crops drying up.
Umballa	*Nil*	Health good. Prices high. *Rabi* bad.
Jullundur	*Nil*	Health good. Prices high. *Rabi* crops suffering for want of rain.
Amritsar	*Nil*	Health good. Prices falling. *Rabi* crops suffering for want of rain.
Sialkot	·60	Health good. Prices falling. *Rabi* crops injured by prevailing wind.
Ferozepore	*Nil*	Health good. Prices stationary. *Rabi* unfavourable.
Lahore	Slight rain	Health good. Prices slightly fallen. Prospects of *rabi* bad.
Rawalpindi	Slight rain	Health good. Prices rising. *Rabi* prospects average.
Multan	*Nil*	Health good. Prices stationary. *Rabi* crops suffering for want of rain.
Shahpur	Slight rain	Health good. Prices high and stationary. *Rabi* unfavourable.
Peshawar		Health fair. Prices fluctuating. Prospects of *rabi* poor.
		General Remarks.—Slight rain has fallen in the Sialkot, Lahore, Rawalpindi, and Shahpur districts, but is still much needed throughout the Province. Hail fell in Umballa district. Health good. Prices falling in the Hissar, Amritsar, Sialkot, and Lahore districts, but otherwise high and stationary. Crop prospects unfavourable.
Central Provinces—(Mar. 23rd)		
Nagpur	*Nil*	Weather cloudy and hot. *Rabi* threshing nearly completed. Fever, small-pox, and cattle-disease in places. Prices steady.
Jubbulpore	*Nil*	Weather very warm. *Rabi* harvest in progress. Health good. Prices very high.
Saugor	*Nil*	Weather clear and warm. *Rabi* harvest commenced. Cattle-disease in Saugor tehsil. Prices slightly falling.
Seoni	*Nil*	Weather cloudy and hot. *Rabi* harvest in progress. Slight Small-pox. Prices steady.
Hoshangabad	*Nil*	Weather warm. *Rabi* being harvested. Fever in places. Prices stationary.
Khandwa	*Nil*	Weather seasonable. *Rabi* reaping completed. Small-pox continues. Prices steady.
Raipur	*Nil*	Weather clear. *Rabi* harvest in progress. Cattle-disease prevalent. Rice 18 and wheat 22 seers per rupee.
Bilaspur	*Nil*	Weather cloudy and warm. *Rabi* harvest continues. Prospects favourable. Cattle-disease prevalent. Prices stationary.
Sambalpur (Mar. 19th)	·02	Weather cloudy and warm. Sugarcane being planted. Cholera in places. Rice 20 seers per rupee.
		General Remarks.—Weather rather cloudy and hot. *Rabi* harvest continues. Fever, small-pox, and cattle-disease in parts. Prices generally steady.
Burma—(Mar. 23rd) (For week ending Mar. 19th).		
Akyab	*Nil*	Some cases of cholera in town and district. One case of small-pox in town; otherwise public health and health of cattle good.
Bassein	*Nil*	Public health and health of cattle good.
Rangoon	*Nil*	One case of cholera in town; otherwise public health and health of cattle good.
Amherst (Moulmein)	*Nil*	A few cases of cholera in town; otherwise public health and health of cattle good.
Tavoy	·03 (Total rainfall to date ·28).	Public health and health of cattle good.
Pegu		Slight cholera in one township; otherwise public health and health of cattle good.
Henzada		Public health and health of cattle good.
Prome		Public health and health of cattle good.
Toungoo	*Nil*	Public health and health of cattle good.
Thayetmayo	*Nil*	Public health and health of cattle good.
Shewbo	*Nil* (Total rainfall to date ·54).	Health good. Paddy scarce. Prices high. Transplanting of spring crops continues in parts.
Mandalay	*Nil* (Total rainfall to date ·74).	Public health and health of cattle good. Ploughing of spring crops nearly finished. Food-supply sufficient and prices normal.
Minbu	*Nil* (Total rainfall to date ·34).	Health good. Paddy being all housed. Food-supply sufficient and prices normal.
Yamethen	*Nil* (Total rainfall to date 1·14).	Health good. Spring paddy ploughing progressing.
		General Remarks.—One case of cholera in Rangoon and several in Moulmein and Akyab, and in two other districts. One case of small-pox in Akyab town; otherwise health of people good. Slight cattle-disease in two districts. Reports received from six Upper Burma districts. Paddy scarce, and prices high in Shewbo; elsewhere supply sufficient and prices normal. Spring crop operations progressing.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(Mar. 23rd)		
Gauhati	*Nil*	Weather seasonable, but getting warm during day. Cholera reported in Kamalpur. Pressing of sugarcane finished. Sowing of *ahu* paddy commenced.
Sylhet	1·20	State and prospects of the crops good. Cattle-disease reported from Sunamganj.
Cachar	1·10	Days warm; nights cool. Ploughing and sowing of *dumai* crops progresses. Common rice 14 seers $8\frac{11}{20}$ chittacks per rupee. General health good.
Dibrugarh	*Nil*	Weather fair. Crushing of sugarcane and sowing of *ahu* progressing. Prospects good. Public health good.
Mysore and Coorg—(Mar. 22nd)		
Bangalore		In parts of the Tumkur district wet crops are withering for want of water; elsewhere crops are reported to be in good condition. Prospects of season fair. Public health good. Small-pox and cattle-disease prevalent in parts. Prices slightly fallen in Mysore district, and risen in Kolar, Chitaldroog, and Hassan districts.
Mysore		
Mercara		Prospects continue good. Prices stationary. Small-pox prevalent in parts of Kiggatnad taluk.
Berar and Hyderabad—(Mar. 23rd)		
Amraoti		Weather warm, cloudy occasionally. Threshing of *rabi* crops in progress. Wheat 20 and *jowari* 28 seers per rupee.
Akola		Weather hot. *Rabi* harvest continues.
Hyderabad	*Nil*	Reaping of *rabi* crops continues. *Rabi* crops prospering. General health of talukas fair. Prices—wheat $11\frac{3}{4}$, coarse rice 12, white *juar* 19, yellow *juar* 21, and *tur* $15\frac{3}{4}$ seers per current sicca rupee.
Central India States—(Mar. 23rd)		
Indore		Weather clear. Health good.
Morar (Gwalior)		Health and prospects good.
Sutna		Weather cool. Cholera continues in Sohawal State and parts of Rewah and Nagode. Prospects of crops fair.
Neemuch		Weather warm during day, mornings cool; nights pleasant.
Goona		Health and prospects good.
Agar		Opium prospects fair. Health good.
Sehore		Weather clear and cool. Prospects of opium and cereal crops fair.
Nowgong		Weather seasonable. Health good. Prices steady.
Bhopawur		Prospects good. Weather hot. Health good. Prices stationary.
Rajputana—		
Abu (Mar. 23rd)		Weather seasonable, though heat less than usual at this time of year; nights cold.
Sirohi („ 20th)		Tanks nearly dry. Wells good. Health good. Crops fair. Cold in mornings. Weather fine.
Marwar („ 19th)		Tanks half full. Health good. Crops ripening. Weather slightly cloudy; nights cool. Prices stationary.
Harowti („ „)		Mornings cool; days getting warm. Health and prospects good. Prices steady.
Jhallawar („ 21st)		Weather cool; north-east wind. Gram harvested. Small-pox in three pergunnahs.
Ajmere („ 22nd)		Tanks and wells diminishing. Health good, excepting few cases small-pox in villages. Slight fall in prices.
Jeypore („ „)		Weather seasonable. Crops poor.
Bhurtpore („ „)		Weather clear. Crops ripening. Prices steady.
Ulwur („ „)		Health good. Harvesting in progress. Prices rising.
Kherwara („ 20th)		Tanks and wells sinking, especially the former. Harvesting commenced. Health good. Prices same as before. Weather seasonable and somewhat windy.
Pertabgarh („ 19th)		Tanks quarter full. Health good. Wheat 15, *makai* 25, and gram 25 seers per rupee.

SUPPLEMENT TO

The Gazette of India.

No. 15.} CALCUTTA, SATURDAY, APRIL 9, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 7th APRIL, 1887.

GENERAL REMARKS.—The rainfall has been general throughout Madras, Bengal, and Assam. Slight showers have also occurred in parts of the North-Western Provinces and Oudh, the Central Provinces, Central India, Mysore and Coorg. No rain fell in Bombay, the Punjab, and Berar during the week.

No report has been received from Burma for the week under notice.

The *rabi* harvest is in progress in Bombay, Bengal, the North-Western Provinces and Oudh, the Central Provinces, and in Rajputana and Central India. The crops have been injured by insects and frost in two districts of Bombay, and in the Punjab the crops throughout the Province have suffered for want of rain and the prospects are unfavourable. With these exceptions, the *rabi* harvest promises fairly.

In Madras, Mysore and Coorg the standing crops are good, but rain is wanted in some parts.

The rice harvest gives a yield below average in Madras. In Bengal the spring rice is being reaped, and the early rice, jute, and indigo are being sown. The sowing of the early rice in Assam is in progress.

Opium collection has been nearly completed in Bengal and the North-Western Provinces and Oudh, and is going on in Central India.

Cotton in one district in Madras has been affected by disease. The harvest yield is below average.

Small-pox and fever are still prevalent in Madras, Bombay, the Central Provinces, and Mysore and Coorg. Cholera exists in Bengal and the North-Western Provinces and Oudh. Generally the public health is good.

Cattle-disease is reported in Madras, Bombay and Mysore.

Prices are falling in two districts of the Punjab, fluctuating in the North-Western Provinces and Oudh, and rising in two districts of the Central Provinces; elsewhere they are stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April. 6th).		
Bellary . . .	Average ·05	Standing crops generally fair, but cotton affected by disease in one taluk. Harvest sugarcane, yield average; dry crops on the whole below average. Fever in one and cattle-disease increasing in four taluks.
Kurnool . . .	. . . . .	Standing crops good. Harvest cotton, yield below average. Small-pox in three and cattle-disease decreasing in four taluks.
Ganjam . . .	Average last week since revised, ·14; this week, ·47.	Small-pox in three and fever in five divisions, and cattle-disease in one.
Kistna . . .	Average ·01	Standing crops generally good. Cholera decreasing in five and cattle-disease increasing in three taluks.
Chingleput (Madras) .	Average ·09	Standing crops fair, but in parts withered to some extent for want of rain. Harvest paddy, outturn below average. Small-pox in one and cattle-disease decreasing in two taluks.
Coimbatore . . .	Average ·48	Standing crops generally good Harvest paddy, *cholum* and *ragi*, outturn above average. Fever in two and small-pox in three taluks.
Tanjore . . .	Average ·04	Standing crops generally good, but in parts of three taluks in want of rain. Harvest wet and dry grains, outturn up to average.
Madura . . .	Average last week since revised, 1·84; this week, ·09.	Outturn of crops, where harvested, below average. Small-pox in two taluks. Cattle-disease decreasing in one.
Malabar . . .	Average ·01	Third crop cultivation progressing in one taluk. Fever in two and slight small-pox in one taluk.
Travancore . . .	. . . . .	Preparation for next cultivation continuing. Small-pox and fever in places.
		General Remarks.—General prospects fair.
Bombay—(April 6th)		
Karachi . . .	*Nil*	River at Kotri on 4th, 4 feet 10 inches against 7 feet 11 inches on same date last year. *Rabi* harvesting completed in Sujawal taluka. *Rabi* crops injured by crickets in Mirpur Batoro and by *mahl* insect in Kotri taluka. Fever in six and cattle-disease in two talukas. A case of small-pox in Ghorabari taluka. Wheat, red rice, and *bajri* in Karachi 22, 23 and 32 and in Sehwan 28, 38 and 40 pounds per rupee, respectively.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Hyderabad	*Nil*	*Rabi* crops damaged by frost in Hyderabad, Bago Tando, and Kandiaro talukas. *Rabi* harvest continues in nine talukas. Fever in five, small-pox in one, and cattle-disease in two talukas. River at Kotri on 4th, 4 feet 10 inches against 7 feet 11 inches on same date last year. Wheat 22, *bajri* 38, *jowari* 40, white rice 20 and red rice 30 pounds per rupee.
Ahmedabad	*Nil*	Reaping of *rabi* crops continues. Public health good. Wheat 29 and *bajri* 30 pounds per rupee.
Baroda	*Nil*	Public health good. Crops in good condition. *Bajri* 29, wheat 19 and rice 23 pounds per rupee.
Surat	*Nil*	*Rabi* reaping continues. Fever and small-pox in Bardoli taluka. *Jowari* 30 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	Public health generally good. Small-pox in Igatpuri. Wheat 28¾, *bajri* 30¾, and rice 20¾ pounds per rupee.
Colaba (Bombay)	*Nil*	Abnormal temperature 1° cool on 30th, 2° cool on 31st, 1° cool on 1st, and *nil* from 2nd to 5th. Vapour in air excessive on 2nd and 3rd. Normal on all other days. Abnormal wind southerly on 30th, 2nd, and 3rd. Northerly on 5th. Wind normal on all other days.
Poona	*Nil*	Reaping completed. Threshing of *jowari* and wheat in progress in Indapur and Bhimthari talukas. Public health generally good. Slight cattle-disease in Indapur and Haveli talukas, *Bajri* 44 and *jowari* 56 pounds in the district, and *bajri* 37 and *jowari* 43 pounds per rupee in Poona city.
Ahmednagar	*Nil*	Health good. *Bajri* 56 and *jowari* 65 pounds per rupee.
Sholapur	*Nil*	Lands being prepared for *kharif* crops. Public health good. *Jowari* 63¾ and *bajri* 55¼ pounds per rupee.
Dharwar	*Nil*	Harvesting of wheat and gram completed and that of late *jowari* in progress. Scarcity of fodder in Nawalgund and of drinking-water in Gadag, Karajgi, and Kod talukas. Public health generally good. Rice 25 and *jowari* 59¾ pounds per rupee.
Kanara	*Nil*	Second rice crop harvest and sugarcane planting continue. Preparing and manuring ground for monsoon crop. Public health good. Slight cattle-disease in Siddapur. Weather hot. Common rice in Karwar and district average 13 seers per rupee.
Rajkot	*Nil*	Weather hot. Health generally good. Measles in Rajkot, Morvi, Virpur, Godka, Sagani, Padhra, Bagasra, Balkha, and Manakwara. Cattle-disease called *khavda* or hoof-disease in the villages of Porbandar and Vadia. Wheat 25, *bajri* 25, and *jowari* 30 pounds per rupee.
		General Remarks.—Reaping of *rabi* crops still progressing in some districts. Standing crops injured by insects in parts of Karachi and by frost in parts of Hyderabad. Fever in parts of eight, cattle-disease in parts of ten and small-pox in parts of five districts.
Bengal—(April 6th)		
Chittagong (April 5th)	0·76	Weather hot. Prospects of crops fair. Public health good, notwithstanding a few sporadic cases of cholera.
Dacca	1·80	Sowing of *aus* paddy going on. Prospects good. *Boro* paddy flowering. Chillies and tobacco doing well. Public health good.
24-Pergunnahs (Calcutta).	3·31	Prospects favourable. No crops on the ground, except sugarcane, which promises well. Lands being ploughed for cultivation of early crops. Public health generally good, but a few cases of cholera reported.
Khoolna	2·85	Weather getting warm. Ploughing continues. *Boro* paddy coming on well. Public health good.
Moorshedabad	3·51	Rain has kept the air cool, but has somewhat injured *rabi* crops still on the ground. Ploughing for *aus* rice commenced.
Pubna	1·88	Prospects of crops fair. Some isolated cases of cholera.
Dinagepore	2·04	Rain on one day almost all over the district. Cultivation for *bhadoi* crops going on. Cholera reported from some stations and cattle-disease from two.
Rungpore	1·82	Rain has done much good, and prospects of crops greatly improved. Tobacco being cut and *aus* and jute being sown. Sadr station sickly.
Midnapore	1·27	Rain general all over the district. Tillage in active progress. Prospects good. Public health good.
Burdwan	4·22	Prospects good. Public health fair.
Bhagulpore	0·72	*Rabi* harvest in progress. Wheat is the worst of the crops. Castor seed plant not doing well. Sporadic cholera in north.
Purneah	0·60	All crops doing well. Ploughing in progress. Rivers low. Health of people and cattle fair.
Durbhanga	0·15	*Rabi* harvest continues. Some cases of cholera reported from head-quarters; public health otherwise generally good.
Chumparun	0·22	*Rabi* crops being cut, good outturn expected. Opium collection and indigo sowing in progress. Prices stationary. Cholera reported from the interior of Bettiah sub-division.
Patna	0·42	*Rabi* crops still being reaped. New gram and barley being brought into the market. Castor seeds being gathered. Collection of opium finished, with favourable outturn. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Gya	0·38	*Rabi* being harvested. Fever reported.
Hazareebagh	*Nil*	Harvesting of *rabi* nearly completed, outturn fair. Opium all gathered. Mango prospects bad. *Mahua* dropping. Public health good.
Cuttack	0·14	*Dalua* rice being reaped. Ploughing commenced. Public health generally good.
		General Remarks.—Rain with high winds over the whole Province. Rain very heavy in Central and South-Western Bengal. Ploughing well forward, and sowings of early rice, jute and indigo are proceeding. *Boro* rice being reaped in places. *Rabi* harvest generally gives a good outturn. Opium nearly all gathered in. *Mahua* has begun to fall. General health continues fair.
N.-W. Provinces and Oudh—**(April 6th)**		
Benares (April 5th)	. . . .	Weather seasonable. *Rabi* crops nearly all cut, outturn fair. Supplies plentiful. Prices generally fallen, owing to imports of new grain. Rather fewer cases of cholera, otherwise public health good. There is no cattle-disease in the district.
Ballia („ 4th)	. . . .	Weather somewhat cloudy at times. Strong easterly wind. Harvesting operations progressing. Supplies sufficient. General health good.
Gorakhpore („ „)	. . . .	Weather clear. Harvesting in full progress. Slight rise in prices. Health fair.
Fyzabad („ 5th)	. . . .	Weather seasonable. Harvesting of *rabi* and opium collection completed. Supplies sufficient. Prices high. Health good.
Lucknow („ 4th)	Slight rain in two tahsils.	Weather hot during the day, but slightly cold at night. Threshing and winnowing in progress. Opium collection continues. Markets well supplied. Prices steady. No cattle-disease.
Rai Barelli („ „)	. . . .	Weather sometimes cloudy. Harvesting of *rabi* crops in progress. Supplies sufficient. Prices falling. Cholera and small-pox about two tahsils, but not in epidemic form.
Partabgarh („ 5th)	·10 to ·40 on the 30th	West winds. Clear weather. Harvesting of the *rabi* crops is completed, and the market appears to be well stocked with grains. Prices fluctuating. Health generally good
Allahabad („ „)	Slight rain in four tahsils.	A little hail in places, but not enough to do much harm. Weather unusually cool. Crops being harvested. Prospects good. Markets well supplied. Prices show a slight fall. Sporadic cholera still continues, otherwise health fair.
Cawnpore („ „)	Rain in three tahsils from ·20 to 1·00.	Sky cloudy at times. Slight hail reported in two tahsils, but injury very little. Harvesting operations in progress. Slight fall in prices.
Farakhabad („ „)	Slight rain and hail on 29th.	Little injury to standing crops in two tahsils. Reaping nearly completed. Threshing in progress. Health fair. No cattle-disease.
Sitapur („ „)	. . . .	The cutting of crops is in progress, the outturn is said to be slight. Collection of poppy drug is nearly over; the drug collected is reported of good quality, but light in amount.
Bareilly („ „)	. . . .	Harvest proceeding rapidly. Prices slightly lower. Health of cattle good.
Banda („ „)	Some hail on 29th	Weather warm during the day and cool at night. *Rabi* harvest in progress. Prices rising. Stray cases of cholera in two tahsils. General condition of people good. Cattle-disease in five villages.
Kumaon („ „)	. . . .	Weather fine. *Rabi* crops doing well, but require more rain. Prices stationary. Cholera still lingering in Kali Kumaon. Cattle-disease on decrease.
Agra („ 4th)	*Nil*	*Rabi* being harvested. Prices steady. Health good.
Jhansi („ „)	Slight rain at Sadr on 29th.	Harvesting and threshing in progress. Prices steady. A few cases of small-pox. Condition of cattle good.
Meerut („ 5th)	*Nil*	Hot west winds. Nights still cool. *Rabi* harvest in full progress. Prospects fair. Prices a little easier. Health good.
		General Remarks.—*Rabi* harvesting continues. Prospects good and markets well supplied. Slight rain and hail in a few districts. With the exception of cholera and small-pox in some places, the public health is good.
Punjab—**(April 6th)**		
Delhi (April 5th)	. . . .	Health good. Prices fluctuating. *Rabi* expected to yield below average.
Hissar	. . . .	Health good. Prices high, but stationary. *Rabi* yield a failure, except on irrigated land.
Umballa	. . . .	Health good. Prices stationary. *Rabi* yield bad and below average.
Jullundur	. . . .	Health good. Prices high. *Rabi* prospects indifferent.
Amritsar	. . . .	Health good. Prices stationary. *Rabi* average.
Sialkot	. . . .	Health good. Prices stationary. *Rabi* prospects unimproved.
Ferozepore	. . . .	Health good. Prices stationary. *Rabi* crops being reaped.
Lahore	. . . .	Health good. Prices stationary. *Rabi* prospects bad.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Rawalpindi	. . . .	Health good. Prices rising. *Rabi* below average.
Multan	. . . .	Health good. Prices falling. *Rabi* crops on land irrigated from wells and Sidhnai canal excellent, elsewhere withering.
Dera Ismail Khan	. . . .	Health good. Prices rising. *Rabi* crops suffering for want of rain.
Peshawar	. . . .	Health good. Prices rising. *Rabi* prospects very poor.
Shahpur	. . . .	Health good. Prices high, but falling. *Rabi* crops withering for want of rain.
		General Remarks.—No rain fell last week, and crop prospects are generally unfavourable throughout the Province Health good. Prices falling in the Multan and Shahpur districts, elsewhere high and stationary.
Central Provinces—(April 6th)		
Nagpur	. . . .	Weather cloudy; occasional dust-storms. Threshing almost completed. Fever, small-pox and cattle-disease in places. Prices steady.
Jubbulpore	. . . .	Weather cloudy. Harvesting progressing, outturn reported not good. Health good. Prices high.
Saugor	Sprinkling of rain	Early part of week cloudy, since clear and warm. *Rabi* harvest continues. Health good. Prices unchanged.
Seoni	·02	Weather cloudy and hot. *Rabi* threshing in progress. *Kharif* ploughing commenced. 32 cases of small-pox, 2 deaths. Prices falling.
Hoshangabad	. . . .	Weather warm. *Rabi* harvest almost completed. Fever in places. Prices stationary.
Khandwa	. . . .	Weather warm. Threshing continues. 127 cases of small-pox, 9 deaths. Prices steady.
Raipur	·34	Threshing continues. Small-pox and cattle-disease in places. Prices stationary. Occasional storms.
Bilaspur	. . . .	Weather cloudy. Prospects favourable. Harvesting continues. Sugarcane doing well. Cattle-disease prevalent. Prices stationary.
Sambalpur (April 2nd)	·09	Weather cloudy and warm. Sugarcane being planted. Health good. Prices rising.
		General Remarks.—The weather has been stormy and unsettled, and showers of rain have fallen in places. Prospects continue unchanged.
Assam—(April 6th)		
Gauhati	*Nil*	Weather seasonable. Public health good. No cholera reported. Sowing of *ahu* paddy in progress.
Sylhet	4·26	State and prospects of the crops good.
Cachar	·14	Weather warm. Ploughing and sowing of *dumahi* crops progressing. Common rice 16 seers per rupee. 8 deaths from cholera reported from Sadr, 7 from Katigara, and 5 from Lakhimpur. Cattle-disease not reported.
Dibrugarh	1·26	Weather seasonable. Pressing of sugarcane nearly over. Land being cleared for sugarcane. *Ahu* seedlings thriving. Public health good.
Mysore and Coorg—(April 6th)		
Bangalore	Slight rain in parts	Standing crops generally in good condition, except in parts of Tumkur. Harvesting almost finished in the Mysore district. Prospects of season favourable. Public health good. Small-pox and cattle-disease continue in affected parts. Prices slightly risen in Kolar and Tumkur districts and fallen in Kadur and Hassan districts.
Mysore	. . . .	
Mercara	·09	Good showers have fallen in West and South Coorg, which have been beneficial to the coffee blossoms. Small-pox in one taluk.
Berar and Hyderabad—(April 6th)		
Amraoti	. . . .	Weather warm. *Rabi* threshing continues. Fever in one taluk, otherwise public health and health of cattle good.
Akola	. . . .	Weather cloudy and hot. *Rabi* threshing nearly completed. Small-pox and cattle-disease in places. Ploughing commenced. Wheat 15 and *jowari* 26 seers per rupee.
Hyderabad	*Nil*	*Rabi* crops prospering. *Rabi* crops continue to be harvested. Cholera has broken out in some parts of city and suburbs of Hyderabad. Prices—wheat 13¾, coarse rice 12, white *juar* 17⅞, yellow *juar* 19¼, and *tur* 17¼ seers per current sicca rupee.
Central India States—(April 6th)		
Indore	*Nil*	Weather cloudy and hot.
Morar (Gwalior)	·15	Health good.
Sutna	·13	Weather unusually cool. Cholera diminishing nearly everywhere. Prospects of crops fair.
Neemuch	. . . .	Weather seasonable. Health good. Prices stationary.
Goona	·21	Health and prospects good.
Agar	. . . .	Health good. Prospects fair.
Sehore	. . . .	Weather getting warm. Crops and opium being gathered.
Nowgong	·03	Weather seasonable. Health fair. Prices steady.
Bhopawur	. . . .	Weather getting warm. Health good. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Rajputana—(April 7th)		
Abu (April 6th)	. . . .	Weather seasonable and occasionally cloudy and windy.
Sirohi („ 3rd)	. . . .	Tanks dry; wells good. Health good. Crops cut. Sky overcast. Weather warm.
Marwar („ 2nd)	. . . .	Tanks almost half full. Small-pox prevails to some extent. Crops being harvested. Weather somewhat cloudy. Nights less cool. Prices tending to rise.
Kherwara („ 3rd)	. . . .	Tanks and wells sinking. Crops nearly reaped. Threshing commenced, outturn doubtful. Health good. Prices same as before. Nights cool; days hot.
Harowti („ 2nd)	. . . .	Days hot; nights cool. Health good.
Jhallawar („ 4th)	. . . .	Harvest proceeding. Small-pox reported in three pergunnahs.
Ajmere („ 5th)	. . . .	Weather cloudy; east winds. Tanks and wells diminishing. Crops being reaped. Cattle-disease and small-pox reported in some villages of Merwara. Wheat 23½, barley 43, and gram 45 lbs. per rupee.
Jeypore („ „)	. . . .	Weather cloudy and warm.
Pertabgarh („ 2nd)	. . . .	Tanks and wells drying. Health good. Wheat 16, *máka* 25, and gram 24 seers per rupee Weather hot.
Dholepore („ „)	. . . .	Tanks and wells drying. Crop prospects fair. Health good. Prices stationary. Weather getting hot. A large meteor seen falling south-west on evening of 2nd instant followed by thundering noise.
Bhurtpore („ 5th)	·25	Reaping continues. Health good.
Ulwur („ „)	. . . .	Harvesting continues. Health good.
Kotah („ 2nd)	. . . .	Health good. Slight fall in prices of wheat. Weather cloudy.
Meywar („ „)	. . . .	Tanks and wells low. Crop prospects unchanged. Health good. Prices stationary. Weather fine and cool.
Bickanir („ „)	. . . .	Health good. Prices stationary. Weather seasonable.
Kerowlee („ „)	·03	Tanks and wells drying. Harvesting continues. Small-pox prevalent. Prices rising.
Nepal—(Mar. 31st)		
Katmandu (April 1st)	1·40	Weather seasonable. Prospects fair.

E. C. BUCK,

Secretary to the Government of India.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 2nd April, 1887.

During the first five days of the present week, a large part of Northern India was visited by very unsettled weather occasioned by two barometric depressions, one affecting the Punjab and neighbouring parts of North-Western India, the second lying over the Central Provinces and giving rise to unsettled weather in Bengal.

The cyclonic storm which had formed over the Punjab at the close of the preceding week and which, up to that time, had been comparatively slight and had but little affected the weather of that Province, developed during the next three days. On Sunday the centre lay apparently to the north-west of Sirsa, on Monday the lowest reading was reported from Lahore, and on Tuesday, from Sialkot. On Sunday, Monday, and Tuesday, duststorms accompanied by strong winds were experienced in most parts of the Punjab, but the only rainfall was in the hills, where a thunderstorm occurred on the afternoon of Tuesday.

The disturbance in the Central Provinces was slighter. It produced southerly winds in Lower Bengal and easterly winds in North Bengal and far up the Gangetic plain. The former brought up much moisture and heavy rain fell in Bengal Proper and snow on the Sikkim-Himalaya and slighter showers in Behar and the North-Western Provinces.

On Wednesday, March 30th, a rapid barometric rise occurred over the whole of Northern and Central India, and continued with a slight interruption until the close of the week.

In the Peninsula, except just at the close of the week, when a comparatively brisk rise took place, the barometer was fairly steady throughout, and the weather calls for little remark, north-westerly winds with clear or nearly clear skies prevailing on the western side and southerly to south-easterly winds with rather cloudy weather on the eastern side.

The temperature in the Karnatic was higher than in the preceding week, but was lower in all other places. In North-Western India, Behar, North Bengal, Assam, Lower Bengal and the Berars, the mean readings of the week are from 4° to 5° below those of the previous week. The lowest temperatures occurred generally on the 29th or 30th in Northern India, on which dates the following differences from the normal temperature of the month were recorded:—

Murree	— 5°	Silchar	— 9°
Lahore (29th)	— 8°	Patna	—10°
Simla	— 7°	Dacca	—14°
Lucknow (29th)	— 9°	Chittagong	—13°
Benares (29th)	—13°	Calcutta	—11°

In Sind, a warm period occurred at the beginning of the week and the highest recorded temperature was 107° at Jacobabad on the 27th.

The humidity means show that all over North-Western India the amount of moisture in the atmosphere was much below the average. The same, in a modified degree, was the case in Malabar and the Konkan owing to the north-west winds which prevailed there on most days, but in Bengal, Ganjam, and the Karnatic, owing to the southerly winds, the moisture was excessive.

The following figures show the difference of the present season's rainfall from the normal:—

Stations.	Actual rainfall since 1st November, 1886.	Average rainfall since 1st November, 1886.	Difference.
Multan	0·64	1·38	—0·74

The table of barometric, thermometric and humidity anomalies shows that pressure has been below the average of the month throughout the whole of India, the greatest deficiency being in the Punjab. Temperature has also been below the normal except in the Indus Valley, Gujerat, and the Karnatic, where there has been a slight excess. The humidity differences are less regular, but the principal variations are a deficiency

all over North-Western India, and an excess in the east and centre of the Peninsula and in Bengal. Elsewhere the variations are slight and unimportant.

Simla, the 4th April, 1887. for *Meteorological Reporter to the Govt. of India.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary of India for the Week ending the 9th April 1887.

Though local disturbances of barometric pressure have caused some sporadic rainfall, the general weather throughout the country has been quiet and settled.

The highest readings of the barometer have been chiefly in Assam and the Eastern Peninsula, and the pressure has been relatively low in the Deccan and some part of North-Western India. The only well marked disturbance during the week was formed between Sutna and Allahabad on the 6th. It caused a fall of the barometer of over one-tenth of an inch at Allahabad and a well defined cyclonic circulation of the wind around that station. There were dust-storms in the neighbourhood of the disturbance (slight rain falling at Sutna) and the sky became more cloudy with a brisk increase of moisture, but the disturbance was only temporary and the weather cleared on the 7th without any important fall of rain.

In the Panjab, and more particularly in the North-Western Himalaya, the weather has been slightly unsettled throughout the week. On the 3rd and 4th it was cloudy, but on the 5th rain fell at Murree, Simla, Chakrata and Mussorie; on the 7th these

showers of rain and hail were repeated and extended to several stations on the neighbouring plains, and by the 9th unsettled showery weather had spread eastward down the Gangetic plain as far as Behar.

Throughout the week the temperature has been changeable. The oscillations have been greatest in Northern and least in Southern India, but even in the latter there have been changes of as much as 5° in the 24 hours. At some stations in the North-West Himalaya, and in Northern and Central India the mean temperature of the week has been from 6° to 12° below the average of the month. The greater part of this deficiency is attributable to the cold and unsettled weather.

At Simla the total rainfall since November 1st is now 1·6 inches above the average. At Delhi, Mussorie, and Roorkee the deficiency has been reduced, but there is an average deficit of nearly 50 % of the total amount at the Panjab plains stations, and of 16 % at the North-West Provinces stations. At Peshawar, Rawalpindi and Lahore the total of the season is only 31, 52 and 20 % respectively of the normal rainfall.

Stations.	Actual rainfall since 1st November, 1886.	Average rainfall since 1st November, 1886.	Difference.
	Ins.	Ins.	Ins.
Mooltan	0·64	1·41	—0·77
Peshawar	1·79	5·85	—4·06
Murree	9·35	10·62	—1·27
Rawalpindi	4·85	9·25	—4·40
Lahore	0·62	3·14	—2·52
Simla	10·26	8·64	+1·62
Dehli	2·49	2·77	—0·28
Mussorie	8·88	10·73	—1·85
Roorkee	3·91	5·32	—1·41
Meerut	2·76	3·40	—0·64
Bareilly	3·54	3·16	+0·38
Agra	1·13	1·54	—0·41
Lucknow	1·28	1·58	—0·30
Allahabad	4·58	1·61	+2·97
Darjeeling	5·92	5·20	+0·72
Calcutta	4·74	4·22	+0·52

The following table of barometric, thermometric and humidity anomalies shows that pressure has been above the average throughout the whole of India and the Eastern Peninsula. The excess is least (about ·015 in to ·025 in.) in Sind and Guzerat on the one hand and the Malabar coast on the other. From these two regions the difference gradually increased and amounts to over one-tenth in Assam and Bengal. The temperature, on the contrary, has been everywhere below the general average. In the Western Panjab, Sind and Assam the depression is less than 1°, but in most other places it is more considerable, and, over the greater part of the North-West Provinces and Behar, exceeds 6°. In the amount of moisture in the atmosphere the variations from the average have been less uniform. In nearly all the peninsular districts and in Sind, Berar and the Central Provinces the mean humidity of the week is above the average, while in Northern India excepting Behar and part of the North-West Provinces the atmosphere has been drier than usual.

Districts.	Difference of Barometer from mean, April 3rd to 9th.	Difference of Temperature from mean, April 3rd to 9th.	Difference of Humidity from mean, April 3rd to 9th.	Total Rainfall in week, April 3rd to 9th.

METEOROLOGICAL OFFICE, INDIA,
Simla, 12th April, 1887.

W. L. DALLAS,
for *Meteorological Reporter to the Govt. of India.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Summary of the Weather Report for March 1887.

During a great part of last month, the distribution of pressure over a large part of India and the direction of the wind have been such as are usual at a somewhat later season. Throughout the country the pressure has been much below the normal; the greatest deficiency being in the Panjab; and this province, instead of forming as usual an area of high pressure, has been as a rule the seat of the lowest barometer.

From the 1st to the 4th pressure was lowest in the Panjab and highest over the Peninsula, so that while westerly (N.-W. to S.-W.) winds prevailed generally, the winds were easterly up the Gangetic plain and under the mountains. On the 5th, however, the seat of lowest pressure was transferred to Western Bengal and the usual north-westerly winds prevailed in North-Western India. This lasted two or three days; but on the 8th the previous conditions were restored and east winds blew right up to Peshawar. With some modifications this state of things continued to the 15th. On the 13th, the slight barometric depression in the Panjab became intensified and strong winds accompanied with rain blew at all the more northern stations of the Panjab on the 13th, 14th and 15th. On this last date the barometer rose quickly in the extreme north-west, and up to the 24th the pressure was highest in North-Western India, the normal north-westerly winds again took possession of the Gangetic plain, and easterly winds the central parts of the country On the 25th pressure again fell in the Panjab and by the 27th, 28th, and 29th a disturbance had developed giving rise to dust-storms and very unsettled weather in all parts of the Panjab and on the N.-W. Himalaya.

Meanwhile a depression was forming over the Central Provinces which induced strong southerly winds from the Bay to Bengal. These winds brought up much moisture, and rain fell in most parts of Bengal and the North-Western Provinces, heavily in some places. Both storms disappeared about the same time and the last days of the month were marked by a rapid rise of the barometer over the whole of Northern India.

In the Peninsula there has been little calling for remark. The barometer has been fairly steady and the weather generally fine with north-westerly and westerly winds on the west and south to south-east winds on the East Coast; but on the 22nd and 23rd the wind shifted to north-east in the south and rather heavy rain fell at several stations in the south of the Peninsula.

The temperature has been generally above the average in the Panjab, parts of the North-Western and Central Provinces and in Sind; but below it elsewhere. The hottest places, relatively to the average, were Rawalpindi and Jacobabad, where the temperature exceeded the normal by 4½°, the coolest places, Patna and Bombay, where there was an anomalous depression of 2·2°. On the first day readings of 100° and above were restricted to a few places in the interior of the Peninsula and to Nagpur, and at the close of the month they were not more numerous. On the 27th a reading of 101·9°. was recorded as far north as Sirsa, but the thermometer fell subsequently to below 95°.

The atmosphere has been dry throughout North-Western India but not in Assam, Bengal and a large part of the Peninsula. The distribution of rain has been similar, as will be seen from the following table. In Assam, Bengal and the south of the Peninsula the general average of the month has been exceeded, but in other provinces there has been a deficiency. Over the whole region extending eastward from Sind and Guzerat across Rajputana, the Berars, Khandesh, &c., as far as the south of the Central Provinces, there has been practically no rain. The greatest excess was in Lower Bengal where more than twice the normal amount fell.

The following table shows the amount of rain and the difference from the average during the month of March, 1887, according to districts, as far as is indicated by the telegraphic reports:—

Districts.	Number of Stations.	Average rainfall in March.	Difference from the average in March 1887.	Remarks.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch*).

J. WESTLAND,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 14th APRIL, 1887.

GENERAL REMARKS.—Rain in varying quantities has fallen generally throughout Madras, Bengal, the North-Western Provinces and Oudh, and Assam. Slight showers have also occurred in parts of Bombay, the Central Provinces, Rajputana, and Mysore and Coorg.

The rainfall was general in Lower Burma during the week ending 2nd April.

The *rabi* harvest is approaching completion in Bombay, Bengal, the North-Western Provinces and Oudh, Hyderabad, and Rajputana, and has been completed in the Central Provinces and Berar. The prospects of the harvest are, on the whole, favourable, except in the Punjab, where the yield is expected to be below the average.

Operations for the *kharif* harvest have commenced in parts of Bombay and the Central Provinces.

The standing crops are good in Madras, Mysore and Coorg, but rain is still wanted in some parts of Madras.

In Bengal the spring rice harvest has begun, and cultivation for the autumn crops is in progress. In Assam the early rice sowings are still going on.

Indigo and sugarcane promise well in Bengal, and sowings for these crops have also commenced in the North-Western Provinces and Oudh.

The public health in all Provinces is generally good.

Prices are rising in three districts of the Punjab and falling in three districts of the Central Provinces. Elsewhere they are steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April 13th)		
Bellary . . .	Average ·06	Standing crops generally fair. Harvest sugarcane, cotton, and castor oil seed, yield on the whole below average. Fever in one and cattle-disease increasing in three taluks.
Kurnool . . .	Average ·10	Standing crops good. Harvest cotton, outturn below average. Small-pox in three and cattle-disease increasing in four taluks.
Ganjam . . .	Average last week since revised, ·59.	Small-pox and fever in three taluks. Slight cholera. Cattle-disease decreasing in one.
Kistna . . .	Average last week since revised, ·03; this week, ·21.	Standing crops generally good. Slight fever. Cholera decreasing in four and cattle-disease in two taluks.
Chingleput (Madras) .	. . . .	Standing crops fair, but in parts withered to some extent for want of rain. Harvest paddy, outturn average. Cattle-disease increasing in two taluks.
Coimbatore . . .	Average ·43	Standing crops generally good. Harvest paddy and *ragi*, outturn generally above average. Fever in one, small-pox in two, and cattle-disease in one taluk.
Tanjore . . .	. . . .	Standing crops generally good, but in parts of two taluks not flourishing for want of rain. Harvest wet and dry crops, outturn up to average. Cattle-disease increasing in three taluks.
Madura . . .	Average ·21	Small-pox in two taluks and cattle-disease increasing in one.
Malabar . . .	Average ·43	Operations for third crop cultivation over in two taluks. Fever in two and small-pox in nine taluks.
Travancore . . .	1·91	Preparations for next cultivation progressing. Small-pox and fever in places.
		General Remarks.—General prospects fair.
Bombay—(April 13th)		
Karachi . . .	*Nil*	River at Kotri on 8th, 14 feet 10 inches against 12 feet 7 inches on same date last year. Fever in four and cattle-disease in one taluka. Wheat, red rice and *bajri* in Karachi 22, 30 and 32 and in Tatta 22, 40 and 40 pounds per rupee, respectively.
Hyderabad . .	*Nil*	*Rabi* harvested in nine talukas. River at Kotri on 10th, 4 feet 10 inches against 10 feet 10 inches on same date last year. Fever in two talukas. Prices steady.
Ahmedabad . .	*Nil*	Harvesting of *rabi* and cotton-picking in progress. Public health good. Wheat 29 and *bajri* 30 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda	*Nil*	Public health good. Cotton-picking and reaping of gram, wheat, tobacco, and castor oil seeds in progress. *Bajri* 27, wheat 18 and rice 23 pounds per rupee.
Surat	*Nil*	*Rabi* reaping almost completed. *Jowari* 39 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	Small-pox in two talukas—Igatpuri and Niphad; otherwise public health good. Prices stationary.
Colaba (Bombay)	*Nil*	Abnormal temperature *nil* on 6th and 12th and 1° cool from 7th to 11th. Vapour in air excessive from 9th to 11th. Normal on all other days. Abnormal wind northerly on 6th. Wind normal from 7th to 12th.
Poona	Rainfall ·04 in Sirur taluka and slight rain in Poona.	Reaping completed. Threshing of *jowari* and wheat in progress in Indapur and Bhimthari talukas. Public health generally good. Slight cattle-disease in Indapur and Haveli talukas. *Bajri* 44 and *jowari* 55 pounds in the district, and *bajri* 34 and *jowari* 43 pounds per rupee in Poona city.
Ahmednagar	*Nil*	Harvesting of *rabi* crops in progress. Health good. *Bajri* 57 and *jowari* 63 pounds per rupee.
Sholapur	Sholapur, ·01; Barsi, ·06; Karmala, ·04; Pandharpur, 2·88.	Lands being prepared for *kharif* crops. 10 cholera cases at Pandharpur, 2 fatal. *Jowari* 61 and *bajri* 53 5/16 pounds per rupee.
Dharwar	Mugud, ·03; Nadgund, ·30.	Harvesting of late *jowari* and cotton-picking in progress. Scarcity of fodder in Nawalgund and of drinking-water in Gadag, Karajgi, and Kod talukas. Public health generally good. Rice 24½ and *jowari* 60 pounds per rupee.
Kanara	*Nil*	Threshing and cleaning second crop paddy. Sugarcane planting in progress. Field operations continue for monsoon crop. Public health good. Weather hot. Slight cattle-disease in two talukas. Common rice in Karwar 13, and district average 14 seers per rupee.
Rajkot	*Nil*	Weather hot. Health generally good. Measles in some parts of Halar and Sorath. Small-pox among cattle in Morvi, Und, and Porbandar. Wheat 20, *bajri* 26, and *jowari* 33 pounds per rupee.
		General Remarks.—Rain in parts of Poona, Sholapur, Dharwar, Ratnagiri Bijapur, and Belgaum. Harvest operations still going on in some districts. Fever in parts of nine, cattle-disease in parts of ten, small-pox in parts of four, and cholera in parts of three districts.
Bengal—(April 13th)		
Chittagong (April 12th)	Drizzling rain on 11th	Weather hot. Prospects of spring crops good. Lands being got ready for *aus*. Prices steady. Cholera still reported. General health good.
Dacca	*Nil*	Prospects good. *Boro* paddy thriving. Public health good.
24-Pergunnahs (Calcutta).	*Nil*	No crops on the ground, except sugarcane, which promises well. Ploughing continues. Public health good, with the exception of a few sporadic cases of cholera.
Khoolna	0·02	Weather hot and dry. Ploughing continues. *Boro* harvest begun, outturn good. Short mango crop. Public health good.
Moorshedabad	0·4	Weather stormy and disturbed. *Rabi* harvested. *Bhadoi* being sown. Indigo and sugarcane doing well. Public health good.
Pubna	0·08	Weather seasonable. Prospects of crops good. Cholera in some places, but general health good.
Dinagepore	0·23	Weather fair. Rain in some stations. Cultivation for *bhadoi* continues. Cholera reported from seven thanas and cattle-disease from three
Rungpore	*Nil*	*Aus* paddy, jute, *chena*, and *kaon* above the ground. Wheat still being harvested. Health of Sadr station bad. Epidemic measles, dysentery, and sporadic cholera reported.
Midnapore	0·51	Cultivation in active progress. Prospects good. Public health good.
Burdwan	0·04	Prospects of crops fair. Public health generally good, but a few cases of cholera in Burdwan town
Bhagulpore	1·24	*Rabi* harvest in progress. Probable outturn all round 4 annas. *Moong* and paddy being sown in low lands. Indigo very promising. Cholera in some villages in north
Purneah	1·40	All crops doing well. *Bhadoi* rice and jute sowings begun. Wheat and oats being harvested. Health of people fair. Rivers low.
Durbhanga	0·49	*Rabi* harvest continues. Mango blossoms considerably injured by late rain. Prices stationary. Cholera reported from headquarters.
Chumparun	0·19	*Rabi* crops being gathered. Weighment of opium begun. Indigo plants coming on. Prices stationary. Public health fair.
Patna	·11	Harvesting of *rabi* crops nearly finished, outturn favourable. Public health good.
Gya	·30	*Rabi* being harvested. Fever, small-pox, and cholera to some extent reported.
Hazareebagh	*Nil*	Weather seasonable. Harvesting of *rabi* completed, outturn fair. Sugarcane promising. Mango prospects unsatisfactory. *Mahua* falling. General health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Cuttack	·14	Weather cloudy at times, with high winds. *Balua* rice being reaped. Ploughing begun. Price of rice unchanged. Public health generally good.
		General Remarks.—Some rain in most districts Ploughings and sowings in full progress. Indigo and sugarcane doing well. *Rabi* crops mostly gathered, with good outturn. *Boro* rice harvest has begun. *Mahua* crops moderate in Chota Nagpur, but plentiful in Santhal pergunnahs. Public health generally fair.
N.-W. Provinces and Oudh—(April 13th)		
Benares (April 12th)	. . . .	Heat increasing. Harvesting of *rabi* nearly completed. Supplies sufficient. Prices almost stationary. Cholera still lingers in the city and a few cases are also reported from the district; otherwise public health is good. No cattle-disease.
Ballia („ 11th)	A good shower of rain fell on the 8th, accompanied with a violent westerly wind and flashes of lightning.	Reaping of *rabi* completed and threshing operations in progress. Markets steady. Public health good.
Gorakhpore („ „)	3·20	Reaping completed. Threshing in progress. Prices tend to fall. Health fair.
Fyzabad („ 12th)	Slight rain at Sadr on 9th.	Weather now clear. Sowing of *sawan*, indigo, and sugarcane commenced. Health fair. Cattle-disease in one tahsil.
Lucknow („ 11th)	Strong east wind and slight rain on the 9th.	Threshing and winnowing in progress. Opium collection finished. Markets well supplied. Prices steady. Public health good. No cattle-disease.
Rai Barelli („ „)	Dust storm, with slight rain, at Sadr on the night of the 8th.	Weather sometimes cloudy. Prices stationary. Isolated cases of small-pox and cholera in tahsils Digbijaiganj and Dalmau. Condition of cattle good.
Partabgarh („ 12th)	. . . .	The *rabi* yield is generally below the average. Sugarcane being sown. Prices of wheat and barley show a tendency to rise. Complaints of slight cholera and small-pox reported.
Allahabad („ „)	A storm in Allahabad, but no rain in the district	Weather hotter. *Rabi* harvested. Markets full. Prices steady. Sporadic cholera still continues, principally in the trans-Ganges tract, otherwise health good.
Cawnpore („ „)	·50 at head-quarters	Weather cloudy at times. Harvesting in progress. Opium collection nearly completed, outturn will be poor compared with the average of the last five years. Prices stationary.
Farakhabad („ „)	*Nil*	Harvest nearly over, outturn below average. Sugarcane being sown. Complaints of fever, itch, diarrhœa, and small-pox. No cattle-disease.
Sitapur („ „)	There was a heavy storm of rain and hail at Sadr.	The storm was very local in character, and no damage is reported. Harvesting in progress.
Bareilly („ „)	. . . .	*Rabi* harvest nearly in. Prices easy. Health of men and cattle good.
Banda („ „)	Slight showers of rain on the 8th.	Prices rising. Cholera in the tahsils Kamasin and Karwi, nine attacks and four deaths. Cattle-disease in eight villages.
Kumaon („ „)	. . . .	Weather fine after rain, which is advantageous to standing crops. Prices stationary. Some cholera in Kali Kumaon and Bhabar; otherwise public health good. Cattle-disease on decrease.
Agra („ 11th)	Slight rain in two parganas on 7th and 8th.	*Rabi* harvesting continues. Prices steady. Health good.
Jhansi („ „)	. . . .	Weather warm in day and cool at night. Threshing and winnowing going on. Prices unchanged. Small-pox continues in pergunnahs Jhansi and Garotha. Condition of cattle fair.
Meerut („ 12th)	Slight rain in Meerut on the 6th and 9th.	Weather hot and seasonable. *Rabi* harvest in full progress. Supplies sufficient. Prices steady. No sickness.
		General Remarks.—Harvesting of *rabi* nearly completed. Rain has fallen in most districts. Supplies sufficient and prices steady. Cholera and small-pox still continue to be reported from a few districts; otherwise health is good.
Punjab—(April 13th)		
Delhi (April 12th)	·05	Health good. Prices almost stationary. *Rabi* below average.
Hissar	. . . .	Health good. Prices high, but stationary. *Rabi* below average.
Umballa	Slight rain	Health good. Prices stationary. *Rabi* below average.
Jullundur	. . . .	Health good. Prices high. *Rabi* indifferent.
Amritsar	. . . .	Health good. Prices stationary. *Rabi* average
Ferozepore	. . . .	Health good. Prices stationary. *Rabi* crops being reaped.
Lahore	. . . .	Health good. Prices almost stationary. *Rabi* crops on *barani* land below average.
Rawalpindi	. . . .	Health good. Prices rising. *Rabi* below average.
Multan	. . . .	Health good. Prices stationary. *Rabi* crops on land irrigated from wells and Sidhnai canal in good condition; elsewhere drying up.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Dera Ismail Khan	. . . . .	Health good. Prices rising. *Rabi* crops suffering for want of rain.
Shahpur . . .	. . . . .	Health good. Prices high and stationary. *Rabi* crops withering.
Peshawar . . .	. . . . .	Health good. Prices rising. *Rabi* prospects very poor.
		General Remarks.—Slight rain has fallen in the Delhi and Umballa districts. Health good. Prices rising in the Rawalpindi, Dera Ismail Khan, and Peshawar districts; elsewhere high but stationary. Expected *rabi* yield below average.
Central Provinces— (April 13th)		
Nagpur . . .	·02	Weather hot. Threshing in progress. Fever and small-pox prevalent. Cattle-disease in places. Prices steady.
Saugor . . .	. . . . .	Weather warm, with occasional clouds. *Rabi* harvest continues. Health good. Prices steady.
Seoni . . .	·03	Weather cloudy and hot. Threshing in progress. Fields being prepared for *kharif* sowings. Cattle-disease in places. Prices steady.
Hoshangabad . .	. . . . .	Weather warm. Threshing in progress. Fever in places. Prices rising.
Khandwa . . .	. . . . .	Weather warm. Threshing in progress. 168 cases of small-pox, 13 deaths. Prices stationary.
Raipur . . .	·21	Days hot; nights cool. *Rabi* threshing continues. Cattle-disease prevalent. Prices falling.
Bilaspur . . .	1·35	Harvest nearly over. Ploughing for *kharif* commenced. Health good. Cattle-disease abating. Wheat, linseed, and rice being exported.
Sambalpur (April 9th)	·58; occasional showers.	Weather cloudy. Sugarcane planting finished. Health good.
		General Remarks.—Cloudy weather has continued throughout the week, and rain has fallen in places. In the Bilaspur district a considerable fall of rain has occurred, which has enabled the people to push on ploughing for the *kharif*. Season prospects unchanged.
Burma—(April 6th)		
Akyab (April 2nd) .	. . . . .	A few cases of cholera in town and district; otherwise public health and health of cattle good.
Bassein . . .	·02 (Total rainfall to date 1·11).	Public health good. Slight cattle-disease in one township.
Rangoon . . .	·28 (Total rainfall to date ·38).	One case of cholera in town; otherwise public health and health of cattle good.
Rangoon (April 9th) .	·12 (Total rainfall to date ·50).	Public health and health of cattle good.
Amherst Moulmein) .	2·62 (Total rainfall to date 4·06).	Slight increase of cholera; otherwise public health and health of cattle good.
Tavoy	2·40 (Total rainfall to date 3·31).	Public health and health of cattle good.
Pegu	·22 (Total rainfall to date 1·46).	Slight cholera in one township; otherwise public health and health of cattle good.
Henzada . . .	. . . . .	Public health and health of cattle good.
Prome . . .	. . . . .	Public health good. Cattle-disease in one township.
Toungoo . . .	·04 (Total rainfall to date ·21).	Public health and health of cattle good.
Thayetmayo . . .	. . . . .	One case of cholera in town; otherwise public health and health of cattle good.
Shwebo . (Mar. 26th)	*Nil* (Total rainfall to date ·54).	Health good. Food-supply scarce. Prices ruling high. Spring crop commenced flowering.
Yamethen . . .	*Nil* (Total rainfall to date 1·14).	Health good. Spring paddy sowing commenced.
Minbu	*Nil* (Total rainfall to date ·34).	Health good. Paddy all taken in. Food-supply sufficient, and prices normal.
Mandalay . . .	·80. (Total rainfall to date ·90).	Public health and health of cattle good. Ploughing of spring crop finished. Food-supply sufficient, and prices normal.
		General Remarks.—Slight increase of cholera in Moulmein, one case each in Rangoon and Thayetmayo, a few cases in Akyab and Pegu; otherwise public health of Lower Burma good. Slight cattle-disease in four districts. Reports received from six districts of Upper Burma. Public health good. Food-supplies scarce in Shwebo, and prices high. Prices rising in Pyinmana, elsewhere supplies sufficient, and prices normal. Agricultural operations and prospects satisfactory.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(April 13th)		
Gauhati (April 12th)	1·34	Weather seasonable. Public health fair. Sowing of *ahu* paddy still in progress.
Sylhet	0·60	State of prospects favourable. Cattle-disease prevalent in Karimganj sub-division.
Cachar	1·58	Weather warm. Ploughing and sowing of *dumahi* crops progressing. Common rice 15¾ seers per rupee. 9 deaths from cholera from Kaligara, 4 from Silchar, and 1 from Lakhimpur reported.
Dibrugarh . . .	·77	Weather seasonable. Tea-plucking and manufacture commenced. *Ahu* seedlings thriving. Public health good.
Mysore and Coorg— (April 13th)		
Bangalore . . .	Slight rain reported in parts.	Standing crops in good condition. Prospects of season favourable. Water-supply and pasturage are diminishing in parts of the Kadur district. Public health good. Cattle-disease and small-pox prevalent in parts. Prices slightly risen in the Chittaldoog district and fallen in Bangalore, Tumkur, and Hassan districts.
Mercara (April 13th) .	1·40	Coffee plants have blossomed very generally. Prices stationary.
Berar and Hyderabad— (April 13th)		
Amraoti	. . . . .	Weather cloudy and warm. Theshing of *rabi* almost completed. Ploughing for *kharif* in progress. Slight sickness. Condition of cattle good.
Akola	. . . . .	Weather hot. Reaping and threshing almost finished. Fever, small-pox, and cattle-disease in parts. Wheat 16 and *jowari* 25 seers per rupee.

ALLAHABAD,
The 19th February, 1887.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 21st APRIL, 1887.

GENERAL REMARKS.—Slight rain has fallen generally in most parts of Madras, Bombay, Mysore, Bengal, and Assam, and showers are also reported from a few places in the North-Western Provinces and Oudh, the Punjab, Central Provinces, Central India, and Rajputana.

In Burma there was general rain during the week ending the 9th instant, but during the week ending the 10th idem the falls were confined to a few districts in Lower Burma only.

The *rabi* crops have been nearly gathered in all Provinces, and threshing operations are now in general progress. Prospects show no improvement in the Punjab, where the harvest, which is advancing, is anticipated to yield below the average.

Preparations for the *kharif* have begun in parts of Bombay, the Central Provinces, and Berar, where the land is being ploughed.

Except that the crops need rain in one or two districts, agricultural prospects in the Madras Presidency are fair. In Mysore and Coorg the outlook continues satisfactory.

The spring rice harvest is progressing in Bengal and Assam, and promises to yield excellently in Sylhet. Lowland paddy is being sown in Bengal, and the *ahu* paddy is coming up well in Assam.

Sugarcane is doing well in Bengal, the North-Western Provinces and Oudh, and the Central Provinces; it is being planted in Bombay and is being harvested in Madras.

Cotton-picking is in progress in Madras and Bombay.

Indigo-sowing has commenced in the North-Western Provinces and Oudh, and the crop promises favourably in Bengal.

The public health is generally satisfactory in all Provinces.

Cattle-disease is chiefly prevalent in Madras and Bombay.

Prices are fluctuating in the Punjab. Elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April 20th)		
Bellary . . .	Average last week since revised, ·21; this week, ·22.	Standing crops generally good. Harvest paddy, sugarcane and cotton, yield about average. Fever in one and cattle-disease increasing in four taluks.
Kurnool . . .	Average ·02	Standing crops good. Harvest cotton, outturn below average. Cattle-disease decreasing in five taluks.
Ganjam . . .	Average for week ending 2nd instant since revised, ·65; this week, ·15.	Small-pox in two and fever in four divisions. Cholera slightly increasing. Cattle-disease in one division.

SUPPLEMENT TO

The Gazette of India.

No. 18.} CALCUTTA, SATURDAY, APRIL 30, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending the 23rd April, 1887.

The most important feature in the meteorology of the past week has been the establishment of hot dry north-westerly and westerly winds (characteristic of the hot season) down the Gangetic plain. From the 20th until the close of the week they blew steadily over the south of the Panjab, the North-Western Provinces, Behar and as far east as Lower Bengal. They were attended with a rapid rise of temperature and great dryness.

The distribution of pressure has been comparatively stable. On most days the pressure was lowest in Western Bengal and Chutia Nagpur; and the pressure has been high in the Indus region and down the west coast.

In the earlier part of the week there were two minima, one lying over Rajputana, the second in Western Bengal. The general aerial circulation was also simple. North to north-west winds prevailed at most stations in Western India and southerly to south-westerly winds on the east coast, with north-west winds down the Gangetic Valley. In Central and North-Western India and the Deccan, the northing of the winds has been very striking.

Any rainfall has been restricted to three well defined areas, *viz.*, the North-West Himalaya and the neighbouring plains stations, where slight rain fell locally on five out of the seven days; second, Assam and parts of North and East Bengal where rain fell on the 17th, 18th and 19th, and again slightly on the 22nd and 23rd; and third, the south of the Peninsula and Ceylon where light sporadic rain occurred throughout the week.

Throughout Northern India, with the single exception of Roorkee, the rain has been even less than the average; and the following table shows, therefore, an increase of the

seasonal deficiency as compared with that of last week. At Darjeeling and Calcutta the rainfall of the seven days was half an inch less than the normal average :—

Stations.	Actual rainfall from 1st November, 1886, to 23rd April, 1887.	Average rainfall from 1st November, 1886, to 23rd April, 1887.	Difference.
	In.	In.	
Multan	0·64	1·69	—1·05
Peshawar	2·43	6·88	—4·45
Murree	10·24	13·65	—3·41
Rawalpindi	4·98	10·18	—5·20
Lahore	0·62	3·48	—2·86
Simla	10·83	10·67	+0·16
Delhi	2·49	2·96	—0·47
Roorkee	4·06	5·59	—1·53
Meerut	2·76	3·75	—0·99
Bareilly	3·54	3·36	+0·18
Agra	1·13	1·64	—0·51
Lucknow	1·28	1·70	—0·42
Allahabad	4·58	1·72	+2·86
Darjeeling	9·69	7·05	+2·64
Calcutta	5·24	5·14	+0·10

The temperature returns exhibit a general rise during the week, the increase being most marked in Northern India. The day temperatures especially rose considerably during the last few days, and readings between 109° and 110° were registered in the central parts of the country from the 21st to the 23rd.

The weather generally has been clear or nearly so; except in the north of the Panjab, during the first part of the week, when overcast skies were reported locally.

The final table shows that the mean pressure of the week was above the normal average in the Panjab, part of the North-Western Provinces and Sind, but below it elsewhere; the greatest deficiency within India being in Behar. The temperature was above the monthly average except along the west coast of the Peninsula, where there was a slight deficiency. The excess was considerable over the central parts of the country and in Assam. The amount of moisture in the atmosphere was generally below the average, but in Behar, North Bengal, Assam, Guzerat, Malabar and the Carnatic there was a slight excess.

Districts.	Difference of Barometer from mean, April 17th to April 23rd.	Difference of Temperature from mean, April 17th to April 23rd.	Difference of Humidity from mean, April 17th to April 23rd.	Total Rainfall in week, April 17th to April 23rd.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 28th APRIL, 1887.

GENERAL REMARKS.—Rain was heaviest during the past week in Assam. In Madras, Mysore, Bombay, and Burma there were showers in parts. Elsewhere the week has been practically rainless.

The *rabi* harvest has been completed in all the Provinces, with the exception of a few places in Bombay, the Central Provinces, and the Punjab, and threshing operations are now in general progress. Rain still holds off in the Punjab, where prospects show no improvement, and where the *rabi* harvest is yielding an outturn below the average in most districts.

Ploughing for the *kharif* is in progress in Bombay, the Central Provinces, and Berar, and sowings have begun in Bombay.

Agricultural prospects in Madras are fair, but rain is still wanted in one or two places. The outlook in Mysore and Coorg is satisfactory. The spring rice is promising and is being reaped in Bengal. The early rice sowings are in progress in Bengal and Assam.

Sugarcane is doing well in Bengal, the North-Western Provinces and Oudh, and the Central Provinces, and is being planted in Bombay and Assam.

Indigo is being irrigated in the North-Western Provinces and Oudh, and the crop is coming up well in Bengal. Cotton is being planted in Rajputana, and is being picked in Bombay and Madras.

The public health is generally good in all Provinces.

Cattle-disease is chiefly prevalent in Madras, Bombay, and the Central Provinces.

Prices are falling in four districts of the Punjab and in three districts of Mysore. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(April 27th)		
Bellary . . .	Average ·17	Standing crops generally good. Harvest sugarcane and cotton, yield average. Fever in one and cattle-disease increasing in five taluks.
Kurnool . . .	. . . . .	Standing crops good. Harvest cotton, outturn below average. Small-pox in three and cattle-disease increasing in five taluks.
Ganjam . . .	Average ·14	Small-pox in three, fever in five, and cattle-disease increasing in four divisions. Cholera decreasing.
Kistna . . .	. . . . .	Standing crops good. Slight fever. Cholera slightly increasing in three and cattle-disease decreasing in three taluks.
Chingleput (Madras) .	*Nil*	Standing crops fair, but in parts withered to some extent for want of rain. Harvest paddy and *ragi*, outturn below average. Fever in one, small-pox in two, and cattle-disease increasing in two taluks.
Tanjore . . .	Average ·10	Standing crops generally good, but in parts of two taluks not flourishing for want of rain. Harvest wet and dry crops, outturn up to average. Slight cattle-disease in one taluk.
Coimbatore . . .	Average ·27	Standing crops generally good. Harvest paddy, outturn above average. Fever in one, small-pox in three, and cattle-disease in one taluk.
Madura . . .	Average last week since revised, ·38; this week, ·22	Fever and small-pox in one taluk.
Malabar . . .	Average ·51	Third crop cultivation progressing. Fever in two, small-pox in nine, and cattle-disease in one taluk.
Travancore . . .	. . . . .	Harvest second crop paddy, yield average. Lands being ploughed and sown for next crop. Small-pox and fever in places.
		General Remarks.—General prospects fair.
Bombay—(April 27th)		
Karachi . . .	*Nil*	River at Kotri on 25th, 6 feet 9 inches against 8 feet 1 inch on same date last year. *Rabi* harvesting completed in Shahbandar division and Kotri and Salaru talukas. Crops injured by *mahl* insect in Kotri taluka. *Kharif* sowings commenced in Ghorabari and Shahbandar talukas. Fever in seven and cattle-disease in two talukas. Wheat, red rice, and *bajri* in Karachi 22, 30 and 32 and in Tatta 22, 42 and 40 pounds per rupee, respectively.
Hyderabad . . .	Sakrand, ·03	*Rabi* harvesting continues in ten talukas. Fever in two and small-pox in one taluka. River at Kotri on 25th, 6 feet 9 inches against 8 feet 1 inch on same date last year. Wheat 22, *bajri* 37½, *jowari* 40, white rice 20 and red rice 28 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad	*Nil*	*Rabi* reaping and cotton-picking nearly completed. Public health good. Small-pox among cattle in Dholka and Parantij. Wheat 20 and *bajri* 31 pounds per rupee.
Baroda		Public health good. Cotton-picking and wheat-reaping continued. *Bajri* 29, wheat 19 and rice 11 pounds per rupee.
Surat	*Nil*	Reaping of *rabi* completed. Cotton-picking continues. Cattle healthy. Fever and small-pox in Bardoli taluka. *Jowari* 30 and *wheat* 44 pounds per rupee.
Nasik		Weather hot. Threshing of *rabi* crops continues. Fever in three and small-pox in ten talukas. Cholera in one village each of Dindori and Sinnar talukas, 3 cases, 2 deaths. Wheat 25 and *bajri* 42 pounds per rupee.
Colaba (Bombay)		Abnormal temperature 8° warm on 5th and 21st, 2° warm on 22nd; *nil* from 23rd to 26th. Virgoos in air excessive. Abnormal wind northerly on 26th and 27th. Wind normal on all other days. Distant lightning on 22nd and 26th.
Poona	Slight rain (·09) in Petha Baramati.	Harvesting of crops completed in all talukas, except Bhimthari, where threshing is still in progress. Land being prepared for cultivation in Indapur and Purandhar talukas. Public health generally good. Slight cattle disease in Indapur taluka. *Bajri* 43 and *jowari* 50 pounds per rupee in Poona city.
Ahmednagar	*Nil*	Cholera in Kopargaon, 20 attacks, 5 deaths. *Bajri* 35 and *jowari* 61 pounds per rupee.
Sholapur	Barsi, ·03; Karmala, ·29.	Land being prepared for *kharif* crops. Cattle-disease in Sholapur and Pandharpur talukas. Cholera in Mudha and Pandharpur talukas, out of 10 cases, 6 fatal. *Jowari* 61 and *bajri* 54 pounds per rupee.
Dharwar	Rain in Hubli above 1·0; in Dharwar and Mugud nearly 1·0; and slight in five other talukas.	Harvesting of late *jowari* completed. Cotton-picking in progress. Ground being prepared for early crops. Scarcity of fodder in Nawalgund and of drinking-water in Gadag, Kanajgi, and Kod talukas. Public health generally good. Rice 25 and *jowari* 57 pounds per rupee.
Kanara	Sirsi, ·90; Yellapur, ·35; Haliyal, 1·10.	Sugarcane planting above Ghats. Ploughing and manuring ground. Slight fever in Sirsi and Haliyal. Weather hot. Common rice in Karwar and district average 13 seers per rupee.
Rajkot	*Nil*	Weather very warm and cloudy. Cholera in Jetpur and measles in Dhrol and some parts of Sorath. Small-pox among at ploughbullocks in parts of Gohelwad. Wheat 24, *bajri* 21 and *jowari* 30 pounds per rupee.
		General Remarks.—Rain in eight districts. Reaping operations nearly completed everywhere. Land being prepared for *kharif* sowings in five districts. Slight fever and small-pox in parts of ten, cattle-disease in parts of eleven, and cholera in parts of four districts.
Bengal—(April 27th)		
Chittagong (April 26th)	*Nil*	Weather hot. Early rice being sown. Prices steady. Cholera in several places, but public health fair.
Dacca		Prospect good. *Aus* and *aman* paddy being sown. *Boro* paddy harvest going on. Planting of sugarcane begun. Cases of cholera in the district.
24-Pergunnahs (Calcutta).		Prospects favourable. Sugarcane doing well. Ploughing for early rice in progress. Public health generally good, but cholera still reported.
Khoolna		Weather hot. *Boro* rice harvest continues. Rain wanted for ploughing and sowing. Some cholera in Bagirhat; otherwise public health good.
Moorshedabad	*Nil*	Weather very hot. Prospects good. *Boro* paddy promising. *Rizdoi* being sown. Cholera in Jungipore subdivision; otherwise public health good.
Pubna		Weather very hot, with strong winds. Rice sowing in progress. Cholera in some places.
Dinagepore	*Nil* at head quarters, partial rain in interior.	*Rizdoi* and jute being sown. Cholera in parts.
Rungpore	0·17	Weather cool. Crops doing well. Cholera prevalent.
Midnapore	0·12	Weather continues very cool. Much wind. Tillage going on. General health good.
Burdwan	*Nil*	Weather seasonable. Prospects good. Public health fair.
Bhagulpore		Weather hot. *Rabi* outturn 12 to 14 annas all round. Ploughing goes on lowland. Sowings and sugarcane doing well. Mango prospects poor. Cholera worse in two thanas in north.
Purneah	*Nil*	All crops doing well. Early rice and other sowings in progress. Rivers low. Public health fair.
Durbhanga		*Rabi* harvest over. All standing crops doing well. Cholera continues in Madhubani subdivision; no fresh cases for some days in the town.
Chumparun		Harvesting of *rabi* crops nearly finished. Opium being weighed. Indigo doing well. Prices stationary. Sporadic cholera reported from Bettiah; otherwise public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Patna		Threshing of *rabi* and opium weighments in progress. Sugarcane growing well. Castor seeds being gathered. Public health generally good.
Gya		Threshing of *rabi* nearly finished. Sugarcane coming on well. Cholera in Gya and Nalinagar. Fever and small-pox in other thanas.
Hazareebagh	*Nil*	Weather seasonable. Lands being ploughed. Sugarcane doing well. Mango very good. *Mahua* below average. Public health good.
Cuttack		Weather hot, with high winds. *Dalua* paddy being reaped. Ploughing in progress. Rain wanted. Price of rice unchanged. Public health good.
		General Remarks.—Weather hot and generally dry. Slight rain reported in Midnapore, Rungpore, and Dinapur. Ploughing and sowing progressing well. Sugarcane and indigo coming on well. *Boro* rice promising and is being reaped. *Rabi* harvest over and threshing is going on. *Mahua* still being gathered. Cholera prevalent in Rungpore and Backerganj; elsewhere public health generally fair.

SIMLA,
The 27th April, 1887.

R. GARDINER, *Captain, R.E.,*
Offg. Under-Secretary.

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 19.} CALCUTTA, SATURDAY, MAY 7, 1887.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REGISTRATION REPORTS OF THE SEVERAL PROVINCES FOR THE YEAR 1885-86.

No. $\frac{20}{937-40}$.

Extract from the Proceedings of the Government of India in the Home Department (Public),— under date Simla, the 29th April, 1887.

Read—

Home Department Resolution No. $\frac{13}{795-807}$, dated the 4th June 1886, reviewing the Registration Reports of the several Provinces for the year 1884-85.

Read also—

The Registration Reports of the several Local Governments and Administrations for the year 1885-86.

RESOLUTION.

OBSERVATIONS.—The Governor-General in Council is again glad to observe that the reports of the year under review testify to a satisfactory advance in the operations of the Department. The total number of registrations during the year, compared with the figures of the previous year, are shown in the margin. The increase as shown in the appended statement is general to all Provinces, with the exception of Punjab and Coorg, where the operations of the Department were of a stationary character, and of Burma, where they were slightly retrogade, owing to the disturbances during the year. The gross receipts of the Department increased in all Provinces, except in Coorg, where the decline was nominal. The expenditure rose in seven Provinces and declined in four. On the whole, the development of registration in the several Provinces is regarded by the Government of India as indicative of the increasing popularity of the Department. The following observations on the various Provincial reports will show the extent to which progress has been made, and its more salient features in each Province.

1884-85	...	...	1,627,650
1885-86	...	...	1,752,622

2. *Madras.*—Registrations which in the year 1876-77 amounted in the Madras Presidency to 251,405 have risen year by year until they numbered 584,224 in the year under report. The increase was common to all districts in the Presidency, except the Nilgiris, where there was a decline from 1,158 to 999, which is attributed to the collapse of speculations in gold-mining and to the failure of the coffee crops. The percentage of increase of compulsory registrations was 10·7, and of optional registrations 18·2. The percentage of optional to total registrations advanced from 51·8 to 53·3—a rise which is said to be largely due to the reduction in May 1884 of the fees for registering documents of small value.

The financial results [illegible] penditure of the Department were respectively Rs. 8,38,455 and Rs. 6,60,800, compared with Rs. 7,45,550 and Rs. 6,99,182 in the preceding year. The charges were less owing to a reduction in the expenditure on buildings from Rs. 1,27,284 to Rs. 40,318. The surplus revenue of the year, amounting to Rs. 1,78,605, was the largest net revenue hitherto realized.

3. *Bombay.*—In the Bombay Presidency the number of registrations increased by 1,380 transactions, or about 1·29 per cent., the increase being, it is said, mainly due to the large number of Hindu marriages and thread-ceremonies which took place. The decline which occurred in eleven districts is attributed to recent legislation exempting notices of relinquishment of land from registration;

717 transactions only of this class were registered as compared with 4,132 in the preceding year. The receipts of the Department were greater and the expenditure less than in the previous year. The system of registration by a peripatetic agency, which was in force in four districts, has been extended so as to include the jurisdiction of three more sub-registrars in the districts of Ahmedabad, Poona, and Belgaum. In the last two districts the experiment is said to have been attended with unqualified success. It has since been extended to one more office in the Thana district.

4. *Bengal.*—In the Lower Provinces of Bengal there has again been an increase in the number of registrations under all the principal heads. Compulsory registrations increased from 374,730 to 386,632, or by 3·01 per cent., and optional registrations from 313,650 to 337,869, or by 7·72 per cent. The percentage of optional to total registrations was 46·67, or 1·11 per cent. higher than in the year 1884-85. In the orders on the report for the year 1884-85 special attention was directed to the marked increase in registration of deeds of sale of petty holdings and leases of agricultural land. In the year under review deeds recording 120,381 such transactions were registered as compared with 115,540 in the previous year. The Lieutenant-Governor maintains the opinion that the increase is probably due to a greater appreciation of the benefits of registration rather than to pressing necessity or agricultural depression. The operations under the Muhammadan Marriage Registration Act were only slightly in excess of those in the previous year, being 7,524 against 7,410 in 1884-85—a fact which seems to show that the Act has not yet come to be greatly appreciated. Rules for the regulation of registration in connection with the Tenancy Act have been sanctioned since the close of the year, and the effect of the working of that Act upon the Registration Department will, as remarked by the Government of Bengal, require close attention.

5. *North-Western Provinces and Oudh.*—In the North-Western Provinces and Oudh there was a moderate increase under each class of document registered, the total increase amounting to 7,847 for the united Provinces. The increase in compulsory registrations was proportionally far greater (7·8 per cent.) in Oudh than (1·2 per cent.) in the North-Western Provinces; while, on the other hand, the increase in optional registrations affecting both movable and immovable property was most marked in the North-Western Provinces. The rise in optional registrations in the North-Western Provinces is satisfactory as indicative of some recovery from the downward tendency of past years. An examination of the statistics relating to the sale and mortgage of land shows that in respect to the number of mortgages, whether compulsory or optional, there is no material difference between the North-Western Provinces and Oudh; but execution sales are far more rare in Oudh than in the sister Province. The reasons ascribed by the Inspector General of Registration for this difference are, as noticed by the Lieutenant-Governor, inconclusive, and the matter should continue to receive attention. The large increase in the number of sales and mortgages, both of the optional and compulsory class, in the Family Domains of the Maharaja of Benares has attracted the notice of the Local Government, and the attention of the Board of Revenue has been drawn to the subject with a view to ascertaining whether the inference of the Deputy Superintendent of the Domains is in point of fact correct, that "an already heavily indebted body of cultivators are becoming still more hopelessly involved."

The gross receipts of the Department increased by Rs. 9,077, and the expenditure was less than in the previous year.

6. *Punjab.*—In the Punjab the results of the year under review did not differ materially from those of the preceding year. There was again a slight decline in the total number of registrations, due to a falling off in the number of registrations belonging to the optional class. This decline was, however, counterbalanced by an increase in the number of compulsory registrations. Special registrations under the provisions of Section 89 of the Registration Act fell off from 3,486 to 2,388, owing to a smaller amount having been advanced as *takavi* compared with the previous year. The income and expenditure of the year

were respectively Rs. 1,77,661 and Rs. 1,00,812 against Rs. 1,74,564 and Rs. 1,00,147 in the year 1884-85. The new Revenue Rules, whereby mutations of possession of land are recorded by tahsildars on the spot on the oral admission of the parties, together with the fact that the Transfer of Property Act is not in force in the Punjab, will, the Inspector-General of Registration considers, have the effect of gradually diminishing the registration of deeds relating to land. Sir Charles Aitchison does not share in this apprehension, and observes that there is nothing new in the principle of the new Revenue Rules, which are mainly intended to carry out more efficiently than has hitherto been done the arrangements for mutations of names in the Revenue record. The principle of replacing official by non-official agency was further extended during the year; but the Inspector General is not hopeful of the success of the measure unless the non-official sub-registrars are carefully selected and the work properly supervised. The Lieutenant-Governor has drawn the attention of district officers to this point, and has impressed upon them the necessity of sparing no effort in order to improve the efficiency of the offices of non-official sub-registrars. The system of employing tahsildars at district head-quarters as joint sub-registrars was continued throughout the year, but did not prove satisfactory, as sadr tahsildars have very little leisure to attend properly to registration duties. Measures are therefore being taken to gradually relieve them of such work.

7. *Central Provinces.*—The results of the operations in the Central Provinces indicate a satisfactory increase of business compared with the preceding year. The total number of documents registered was 24,605 against 22,289 in the previous year, showing an increase of 10 per cent.. Of this increase nearly one-half occurred in the registration of documents of the optional class, and was for the most part confined to the districts of Chhindwara, Nagpur, Nursinghpur, and Hoshangabad. The largest increase in the registration of such documents occurred in Chhindwara, where it amounted to 1,336, owing to the abnormally large number of leases presented for registration. Excluding Chhindwara, the districts in which the business of the Department was relatively large are those situated on the railway line, where there is a greater demand for document stamps, and where written contracts appear to be more popular than elsewhere. One of the most important reforms carried out during the year was the substitution of special for *ex-officio* sub-registrars in places where there is a considerable amount of business. Owing to the increase of expenditure due to reforms effected in the Department from 35,766 to 41,530, the net receipts of the Department (Rs. 30,995) are smaller than those in the preceding year (Rs. 32,288).

8. *Burma.*—In Lower Burma there was a slight falling off in the total number of registrations. The decline was due to slackness of trade and the disturbances consequent on the war in Upper Burma. The decrease occurred principally in compulsory registrations affecting immovable property. Optional registrations affecting immovable property and movable property increased from 17·9 per cent. in 1884-85 to 20·8 per cent. in the year under review. The proportion of compulsory registrations affecting immovable property was 78·9 per cent. compared with 81·6 in the preceding year. The receipts of the Department rose slightly, but were balanced by a corresponding rise in expenditure incurred in connexion with the establishment of 25 new sub-registration offices. Since the beginning of the year 1886-87, a revised table of fees has been brought into force, the effect of which is to lower the fees paid on documents of small value and to raise those on documents of high value. This change will, it is hoped, encourage optional registrations. The Chief Commissioner has rightly impressed upon district officers the necessity of inspecting the registration offices within their districts, and the Governor-General in Council trusts that the current year's report will show an improvement in this respect.

9. *Assam.*—There was an increase in the total number of registrations in Assam as compared with the previous year. This advance was due to the rise from 12,101 to 15,206 in the total number of documents registered in the Sylhet district. In all the other districts, except at Sibsagar, where

there was some increase, the number of registration remained almost the same as in the previous year. Of the total registrations (numbering 21,213), 18,188 were contributed by the Surma Valley districts of Cachar and Sylhet, and 2,948 by the Assam Valley districts. In the former registration operations has doubled in extent since the year 1881-82, while in the latter they have remained stationary for some years, the explanation for this being the difference in the tenures of land which prevail in the two valleys. The number of registrations affecting immovable property rose from 15,598 to 18,650. This rise is said to be due mainly to the effect of the Transfer of Property Act, 1882, the provisions of which are gradually becoming known, and partly to a growing appreciation of the advantages of registration. The Chief Commissioner considers that the land revenue registration proceedings to be taken under the Assam Land and Revenue Regulation, 1886, will probably lead to a further expansion of business under this head.

10. *Coorg.*—In Coorg there was a slight decrease in the total number of registrations, due to a falling off in the number of documents relating to immovable property registered in the Mercara taluk, which has suffered from the failure and abandonment of coffee gardens. A satisfactory feature of the report is the steady increase in the number of optional registrations, the percentage of which on total registrations amounted to 30·63 during the year.

11. *Hyderabad Assigned Districts.*—In the Hyderabad Assigned Districts the total number of registrations increased from 25,049 to 26,652, or by 6·3 per cent. Every district contributed to this increase, except Bassim, where there was a slight decline in optional registrations affecting both immovable and movable property. The provincial increase chiefly occurred under the head of "compulsory registrations," which advanced in every district. Optional registrations relating to immovable property increased in every district except Bassim, while registrations of the same class relating to movable property advanced in three and declined in the same number of districts. The Inspector-General of Registration is of opinion that the increase in the registration of documents affecting movable property will not keep pace with the growth of registration of documents affecting immovable property, as in his opinion, in which the Resident concurs, the advantages that registered documents of the former class have over unregistered documents of the same kind hardly afford sufficient inducement to registration. The receipts and expenditure of the Department amounted respectively to Rs. 59,838 and Rs. 36,788 compared with Rs. 56,836 and Rs. 35,466 in the year 1884-85.

In the cantonment of Secunderabad the number of documents registered was 636 against 516 in the previous year. The receipts amounted to Rs. 2,053 and the expenditure to Rs. 776.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations marginally noted, and to the Foreign and Revenue and Agricultural Departments for information. Ordered also, that the Resolution be published in the *Gazette of India*.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ARRANGEMENTS MADE WITH THE FIRM OF MESSRS. THOMAS COOK AND SON FOR THE CONVEYANCE OF PILGRIMS FROM INDIA TO THE HEDJAZ AND BACK.

No. $\frac{2}{102-114}$.

Extract from the Proceedings of the Government of India in the Home Department (Sanitary), —under date Simla, the 3rd May 1887.

Read—

Home Department Resolution No. $\frac{1}{21-31}$, dated the 21st January 1886, on the subject of the arrangements made with the firm of Messrs. Thomas Cook & Son for the conveyance of pilgrims from India to Jeddah and back.

RESOLUTION.

In paragraph 3 of the Resolution cited in the preamble, it was announced that the Government of India contemplated the appointment of Messrs. Thomas Cook & Son to be pilgrim agents for the whole of India, and the outlines of the scheme then adopted for the improvement of arrangements for the conveyance of pilgrims to and from the Hedjaz were sketched. The Government of India has recently been in personal communication with Mr. F. H. Cook, the representative of the firm of Messrs. Thomas Cook & Son, who has come to India with the object of carrying the proposed arrangements into effect. The Governor-General in Council is now pleased to notify, for the information of the public, the arrangements which have been completed with that firm for the better ordering of the pilgrim traffic.

2. The understanding upon which Messrs. Thomas Cook & Son have been appointed pilgrim agents is that the arrangements shall last for three years from the beginning of 1887, and shall be terminable at the end of that period at the option of either the Government or Messrs. Cook & Son. In the event of Government withdrawing after three years from the arrangement, Messrs. Cook & Son will be at liberty to continue it as a private enterprise. It is, of course, understood that, though Government gives its countenance and assistance to Messrs. Cook & Son's enterprise, it has no desire to constitute a monopoly in favour of the firm. As, however, the firm engages to convey pilgrims to Jeddah at a fair charge, to protect them while on the journey from extortion and ill-treatment, and to provide them with such comforts and facilities in the way of supplies of food and banking arrangements as may be found desirable and practicable, the Government is satisfied that pilgrims will do well to take advantage of the firm's arrangement. The charges to pilgrims will consist of (1) railway fare; (2) steamship fare; (3) landing charge at Jeddah. The railway fares will be fixed sums; and as they will follow the railway tariffs, the amount will depend upon the distance of the place of departure from Bombay. The steamship fare will also be a fixed sum, which has been settled for the current season by the Government of India on the representation of Mr. F. H. Cook and the advice of the Government of Bombay as follows:

	Rs.
Single tickets from Bombay to Jeddah, 1st class ...	60
Ditto ditto 2nd class ...	40
Ditto ditto 3rd class ...	30
Return tickets from Bombay to Jeddah and back, 1st class ...	90
Ditto ditto 2nd class ...	60
Ditto ditto 3rd class ...	45

Tickets, which will include the railway and steamer fares either to Jeddah or to Jeddah and back, and passports [which can be *viséd* by Messrs. Cook & Son at Bombay] will be kept for sale at the office of the Collector (or Deputy Commissioner) of every district in India, who will be supplied by the firm through the Local Governments and Administrations with a requisite supply of tickets and passports for issue. A register will be kept up in the office of issue in the form appended to this Resolution in order to facilitate the refund of the cost of tickets in cases in which they

are not availed of. A copy of the entries in the first three columns of this register will be sent monthly by each district officer to Messrs. Thomas Cook & Son at Bombay, and the amount realized by the sale of tickets, which may in the meantime be deposited in the Treasury, will at the same time be remitted to Messrs. Thomas Cook & Son by means of a transfer receipt issued at par.

3. It has been arranged with Messrs. Thomas Cook & Son that the cost of tickets shall be refunded to the purchasers, or in case of their death to their heirs, should the holders of them be unable to start on the pilgrimage owing to illness or any other cause. Should a pilgrim die on the pilgrimage while under the charge of Messrs. Cook & Son's agents, the unused portion of the steamer ticket held by him will be recovered by such agents, and its value refunded by the firm through the Treasury and the District Officer to the pilgrim's heirs. If a pilgrim does not wish to return to India, he may, by delivering the unused portion of his steamer ticket to Messrs. Cook & Son's agent at Jeddah, obtain a refund of the price of such unused portion. The question of refunding the value of the unused portion of tickets for the railway journey is still under discussion; but Messrs. Thomas Cook & Son hope to be able to establish a system by which refunds of the price of unused railway tickets may, in the circumstances alluded to above, be also introduced.

4. Messrs. Cook & Son have engaged to send a Muhammadan employé of the firm on each steamer to see that the pilgrims are properly taken care of; and a Muhammadan doctor will accompany each steamer. The firm will be prepared to send at ten days' notice from any district a Muhammadan to accompany any party of pilgrims to Bombay, provided that the party consists of at least 30 persons. Arrangements have been made to enable pilgrims to deposit cash at a small charge at Messrs. Cook & Son's agency at Bombay, and to draw it at the firm's agency at Jeddah; and it is in contemplation to make provision whereby pilgrims will be able with full regard to religious customs to purchase food on board steamer at moderate rates.

5. Messrs. Thomas Cook & Son have agreed to submit their accounts for audit during the years for which Government has granted to them a guarantee against actual loss in the execution of these arrangements up to £2,000 for the first year and £1,000 for each of the two following years. It has been arranged that the audit of accounts shall be undertaken in the office of the Accountant-General, Bombay; and the Government of Bombay is requested to issue the necessary instructions to that officer, who may, if necessary, decide under its instructions in what form the accounts of the firm should be kept. The result of the audit will be communicated through the Government of Bombay to the Government of India.

6. Messrs. Cook & Son have prepared a prospectus, which has been approved by the Government of India, regarding the arrangements which are summarized above. Copies of this prospectus are herewith forwarded in order that they may be circulated as widely as possible. Local Governments and Administrations are requested to notify to this office, with as little delay as practicable, the number of additional copies that may be required.

7. The Governor-General in Council now leaves it to the Local Governments and Administrations to issue the subsidiary orders necessary to ensure that every facility is afforded to pilgrims who wish to provide themselves with tickets and passports. He also desires that district officers should be instructed to give the widest possible publicity to the advantages which will be secured by the purchase of return tickets. In fine, no effort should be spared to make known and explain the objects which His Excellency in Council has in view, and to facilitate the issue of tickets and passports in order that a full and fair trial may be given to the scheme as now made public.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations and to the Foreign and Financial Departments for information and guidance, and for the issue of such subsidiary orders as may be necessary.

Ordered also, that a copy of this Resolution be published in the Supplement to the *Gazette of India*.

FORM OF REGISTER.

Date of issue of ticket.	Messrs. Cook & Son's Serial No. of ticket.	Price realized for ticket.	Whether the ticket is single or return.	Pilgrim's name and age, with name of the father.	Sect.	Village, pargana, thana, and district in which pilgrim resides.	Whether a passport was issued to pilgrim or not.	Remarks.
1	2	3	4	5	6	7	8	9

The Government of India being desirous of taking measures to alleviate the hardships and reduce the mortality during the pilgrimage to Mecca of its own Muhammadan subjects and of those of neighbouring countries who pass through India has experimentally, and on certain terms and subject to certain conditions, accepted the services of the firm of Messrs. Thomas Cook & Son as agents to secure the safety and comfort of pilgrims on the land journey and voyage.

It is to be clearly understood that pilgrims can make arrangements for the pilgrimage to Mecca in any manner that they please; those who employ the services of Messrs. T. Cook & Son will enjoy the advantages set forth in the following notification prepared by that firm, which is published for the information of all concerned:—

1. Tickets will be kept and sold at the office of the Collector or Deputy Commissioner of every district.
2. The price of these tickets will include railway and steamer fares of pilgrims from the place of departure to Jeddah.
3. The full fare will be charged on single tickets to Jeddah; but upon return tickets which are purchased before starting a reduction of one-fourth of the double fare between Bombay and Jeddah will be allowed. There will be no reduction on the railway fares.
4. By taking return tickets beforehand, pilgrims will not only save money, but will have to carry less cash with them, thus avoiding danger loss on the journey.
5. Each purchaser will receive a railway ticket to Bombay, a steamer ticket from Bombay to Jeddah, and a landing ticket for the small boats at Jeddah; and each of these tickets will be collected at each of these places separately by or under supervision of the agents of the firm.
6. Intending purchasers of tickets are recommended to apply for them about a month beforehand. No risk is run by purchasing tickets beforehand, as the cost of them will be refunded to the purchaser, or in case of his death to his heirs, if from illness or any other reason the holder is unable to start.
7. Should a pilgrim die on pilgrimage while under the charge of Messrs. Cook & Son's agents, the unused portion of the steamer ticket held by him will be recovered by such agents, and its value refunded by the firm through the district officer to the pilgrim's heirs. If a pilgrim does not wish to return to India, he may, by delivering the unused portion of his steamer ticket to Messrs. Cook & Son's agents at Jeddah, obtain a refund of the price of such unused portion.
8. The return ticket for one year's *haj* is available for a second year if pilgrims prefer to return after the second year's *haj*.
9. Arrangements for female attendants and for the privacy of *purdahnashin* women on the steamers will be made as far as practicable.
10. Dates of departure of pilgrim steamers will be fixed and notified beforehand at the office of the Collector or Deputy Commissioner of the district to save needless delay and expenditure to pilgrims at Bombay.
11. Seaworthy and properly found and equipped steamers will be employed with a view of ensuring the safety and comfort of the pilgrims.
12. The pilgrims will be allotted sufficient space to enable them to sleep and sit with comfort.
13. A Muhammadan employé of the firm will accompany each steamer to see that the pilgrims are properly taken care of and are not subjected to unnecessary hardships.
14. The firm will have agents at Jeddah and at Bombay to render every assistance possible to pilgrims.
15. Pilgrims will be at liberty to deposit cash at Messrs. Cook & Son's agency at Bombay, and draw it at the firm's agency at Jeddah at a small charge.
16. Pilgrims will also be able to deposit with Messrs. Cook & Son's agency at Jeddah cash or valuables until their return from Mecca on payment of a small charge.
17. A Muhammadan doctor (*hakim*), with medicines, will accompany each steamer.
18. Any alterations that may be made in the rate of fares for tickets will be ascertainable at the office of the Collector or Deputy Commissioner of the district.
19. By these arrangements pilgrims will escape the extortions which have been frequently practised on them in Bombay.
20. The firm will be prepared to send at ten days' notice from any district a Muhammadan to accompany any party of pilgrims to Bombay, provided that the party consists of at least 30 persons.
21. Hitherto passports issued by district officers had to be *viséd* at Bombay by the Commissioner of Police, whose office is at some distance from the place where pilgrims reside in Bombay. Under present arrangements passports issued at the office of the Collector or Deputy Commissioner of the district simultaneously with the tickets can be *viséd* at the office of Messrs. T. Cook & Son, which is close to the pilgrims' resting place. Passports issued by Messrs. T. Cook & Son can be obtained either at the office of the Collector or Deputy Commissioner of the district where the ticket is purchased, or at the office of the firm in Bombay.
22. The price of single tickets for the present season is as follows; but this is subject to revision in future seasons:

on payment of a small charge.

17. A Muhammadan doctor (*hakim*), with medicines, will accompany each steamer.

18. Any alterations that may be made in the rate of fares for tickets will be ascertainable at the office of the Collector or Deputy Commissioner of the district.

19. By these arrangements pilgrims will escape the extortions which have been frequently practised on them in Bombay.

20. The firm will be prepared to send at ten days' notice from any district a Muhammadan to accompany any party of pilgrims to Bombay, provided that the party consists of at least 30 persons.

21. Hitherto passports issued by district officers had to be *visé'd* at Bombay by the Commissioner of Police, whose office is at some distance from the place where pilgrims reside in Bombay. Under present arrangements passports issued at the office of the Collector or Deputy Commissioner of the district simultaneously with the tickets can be *visé'd* at the office of Messrs. T. Cook & Son, which is close to the pilgrims' resting place. Passports issued by Messrs. T. Cook & Son can be obtained either at the office of the Collector or Deputy Commissioner of the district where the ticket is purchased, or at the office of the firm in Bombay.

22. The price of single tickets for the present season is as follows; but this is subject to revision in future seasons:

	Rs.
1st Class	60
2nd Class	40
3rd Class	30

The above includes the steamer fare alone from Bombay to Jeddah. Railway fares and landing charges are not included in it.

23. The price of return tickets from Bombay to Jeddah and back is as follows:

	Rs.
1st Class	90
2nd Class	60
3rd Class	45

24. Arrangements for supplies of food and for cooking on the steamers are receiving the attention of the firm.

25. There will be no interference with the religious or social observances of the pilgrims. All persons employed in this part of the business of the firm will be Muhammadans of respectable character, and the wishes of the majority of the Muhammadans will, as far as possible, be carried out when practicable.

26. Tickets will be obtainable for the present year's *haj* at the office of the Collector or Deputy Commissioner of each district on or after this date.

27. The firm have appointed a Muhammadan Superintendent, who will travel constantly amongst the Muhammadan committees and explain all details connected with the arrangements, and will visit the various Mecca committees formed by the Muhammadan Gentlemen at each centre after the meetings held all over India by Messrs. F. H. Cook, R. F. Saunders, and Salamuloola Khan during the past cold weather.

A. P. MACDONNELL,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 30th April, 1887.

The general distribution of pressure over India during the present week has been very similar to that prevailing during the preceding seven days. During the whole period readings have been relatively low over the central parts of Northern India and relatively high over the Indus Valley, the Coasts of the Peninsula, Assam and Arakan. Within the central area of relative depression two distinct minima were shown on most days, one overlying the south of the Punjab, the second the Central Provinces and Western Bengal. The positions of these minima occasioned an important modification in the direction of the winds over the Gangetic plain, which changed from north-west and west to south-east and east at the majority of stations—more particularly at those in the eastern half of the plain. This alteration occasioned a brisk increase in the relative humidity which considerably exceeded the average in North Bengal, Behar, and the Trans-Gangetic divisions of the North-West Provinces. With this exception, the general aerial circulation was similar to that of the preceding week, north-westerly to westerly winds prevailing in Western India, south-south-easterly winds in the Carnatic, and southerly strong winds over the head of the Bay. During Thursday the 28th a southerly gale was blowing at Saugor Island with a very rough sea, and on the same day strong southerly winds and unsettled weather were reported from the neighbourhood of Ceylon.

The rainfall of the week was more or less confined to Assam and Lower Bengal on the one hand and the Peninsula on the other, within which limits the amount received was fully equal to the average. A slight shower fell at Murree and Bareilly on the 29th and a few drops at Amraoti on the 30th, but with these exceptions there was no rain throughout the week over the whole of Upper and Central India, Sind, Guzerat, Khandesh, and the greater part of the Deccan. At Darjeeling and the Assam stations rain fell on every day throughout the week—in Lower Bengal on the 29th and 30th; in some parts of Burma on every day except the 29th and 30th; and in the Peninsula and Ceylon on every day of the week. On the morning of the 28th as much as 6 inches of rain was reported from Colombo, and moderately heavy showers fell all over the south of the Peninsula on the succeeding day. On the 29th and 30th dusthaze and duststorms prevailed very generally throughout Northern India.

The table of seasonal rainfall shows a steady increase in the amount of deficiency over Northern India. At Peshawar, Lahore, Sirsa and Meerut the total rainfall received between the 1st of November 1886 and the 30th of April 1887 amounts to only 35, 17, 28, and 72 per cent. respectively of the average. The following table gives the actual and average rainfall up to date:

Stations.	Actual rainfall from 1st November 1886 to 30th April 1887.	Average rainfall from 1st November 1886 to 30th April 1887.	Difference.
Multan	0·64	1·75	—1·11
Peshawar	2·43	6·99	—4·56
Murree	10·37	13·92	—3·55
Rawalpindi	4·98	10·30	—5·32
Lahore	0·62	3·53	—2·91
Simla	10·83	11·04	—0·21
Delhi	2·49	3·08	—0·59
Roorkee	4·06	5·66	—1·60
Meerut	2·76	3·82	—1·06
Bareilly	3·62	3·43	+0·19
Agra	1·13	1·69	—0·56
Lucknow	1·28	1·76	—0·48
Allahabad	4·58	1·79	+2·79
Darjeeling	10·34	8·11	+2·23
Calcutta	5·42	5·97	—0·55

The final table shows that the mean pressure of the week was below the average of the month in all places except North Bengal, Assam and Ceylon, where there was a trifling excess. The deficiency was greater in Upper India, Sind and Rajputana than in the Peninsula, and was least in Burma. The variations of temperature from the normal average were, at least over Northern India, the reverse of those of pressure, there being a deficit in North Bengal and Assam and an excess elsewhere. In the south of the Peninsula, however, there was also a deficiency. The day temperatures during the week were high all over Northern India, the maximum being 114° at Agra on the 27th.

Districts.	Difference of Barometer from mean, April 24th to April 30th.	Difference of Temperature from mean, April 24th to April 30th.	Difference of Humidity from mean, April 24th to April 30th.	Total Rainfall in week, April 24th to April 30th.

W. L. DALLAS,

SIMLA, MAY 3RD, 1887. for *Meteorological Reporter to the Government of India.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the period May 1st to 4th.

The following summary refers to the four days May 1st to 4th. During that period pressure has undergone rapid changes. On the 1st pressure was increasing very generally, but by the next morning a rapid fall had set in, the change amounting to over two-tenths of an inch at Dera Ismail Khan and Peshawar and to over one-tenth throughout almost the whole of North-Western India. On the 3rd this fall had, to a great extent, slackened; and on the 4th a rapid recovery was in progress everywhere. Notwithstanding these rapid changes of pressure, the weather over India has undergone but little alteration. In Bengal and Assam the sky has been more or less cloudy on all days and numerous local thunderstorms or nor'-westers have occurred, giving rain and occasional hail to most stations. The Eastern Peninsula participated in a modified degree in these unsettled conditions, and rain fell at all the Burmese stations except Tounghoo. The south of the Peninsula also experienced rain on several days, but it was generally slight and apparently unaccompanied by thunder. In other parts of India the weather has been fine, and in the North-West exceptionally hot. In Upper India duststorms or dusthaze have been very common.

The final table shows that the mean pressure of the four days has been below the average in the Punjab, the North-Western Provinces, Orissa, the Central Provinces, Rajputana, Sind, the Deccan and Burma, but above elsewhere. Temperature has exceeded the May average in the Punjab, the Central Provinces, the Berars, Rajputana, Sind, Guzerat, the Konkan and Ceylon, but has been slightly below elsewhere. The greatest excess was in Sind and Cutch, the mean temperature of Jacobabad and Bhuj being as much as 9° above the May average. The highest temperature recorded was 119° at Jacobabad. The dryness of the air was generally in excess of the normal. Slight showers of rain are reported from Chakrata, Bareilly, Lucknow and Ratnagiri, but otherwise the rainfall has been confined to Bengal, Assam, the Circars, Burma, and the south of the Peninsula.

W. L. DALLAS,

SIMLA, MAY 6TH, 1887. for *Meteorological Reporter to the Government of India.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 5th MAY, 1887.

GENERAL REMARKS.—Rain has been heavy in Assam, and a fair amount has also fallen in most districts of Bengal. Slight showers have occurred in parts of the Deccan and Southern Mahratta Country and the North-Western Provinces and Oudh. Elsewhere the week has been rainless.

No reports have been received from Madras, Mysore and Coorg, Berar, and Burma for the week under notice.

The *rabi* harvest still continues in Hyderabad and a few places in Bombay, the Central Provinces, and the Punjab, and threshing operations are in active progress everywhere. The outlook is still unsatisfactory in the Punjab, where there was no rain again during the week under review.

Kharif operations have commenced in the North-Western Provinces and Oudh, and continue in Bombay and the Central Provinces. The spring rice harvest is being reaped in Bengal, and the sowings for the early rice are progressing in Bengal and Assam.

Sugarcane is in good condition in Bengal and the Central Provinces, and is being planted in Assam and the North-Western Provinces and Oudh.

Indigo prospects are favourable in Bengal, and the crop is being irrigated in the North-Western Provinces and Oudh. Cotton-picking is approaching completion in Bombay.

The public health is generally good, except in Bengal, where cholera is reported from several districts.

Cattle-disease exists chiefly in Bombay and the Central Provinces. In the Shahpur district of the Punjab the cattle are reported to be starving.

Prices are falling in four and rising in three districts of the Punjab, and are fluctuating in the North-Western Provinces and Oudh. Elsewhere they are generally steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—(May 4th)		
Karachi	*Nil*	River at Kotri on 2nd, 7 feet against 8 feet 4 inches on same date last year. *Kharif* sowings commenced in Sukro, Tatta and Sujawal talukas. Crops injured by salt-water freshets in Ghorabari taluka. Fever in seven and cattle-disease in one taluka. Wheat, red rice and *bajri* in Karachi 32, 30 and 32 and in Mirpur Bâtoro 20, 48 and 40 pounds per rupee, respectively.
Hyderabad	*Nil*	Weather warm. *Rabi* harvesting continues in five talukas. *Kharif* cultivation in progress. Fever in four, small-pox in three, and cattle-disease in two talukas. River at Kotri on 2nd, 7 feet against 8 feet 4 inches on same date last year. Wheat 22, *bajri* 37½, *jowari* 40, white rice 20 and red rice 28 pounds per rupee.
Ahmedabad	*Nil*	*Rabi* harvesting and cotton-picking nearly completed. Public health good. Small-pox among cattle in Dholka taluka. Wheat 29 and *bajri* 31 pounds per rupee.
Baroda	*Nil*	Public health good. Small-pox in Padra taluka and measles in Amreli. *Rabi* crops in fair condition. *Bajri* 27, wheat 18 and rice 21 pounds per rupee.
Surat	*Nil*	Cotton-picking continues. Other crops reaped. Fever in Bardoli taluka. *Jowari* 30 and *nagli* 44 pounds per rupee.
Nasik	*Nil*	*Rabi* threshing nearly completed. Land being prepared in most of the talukas for *kharif* sowing. Public health good, except in Igatpuri and Nandgaon, in parts of which small-pox continues. Slight fever in Peint. Prices stationary.
Colaba (Bombay)	*Nil.*	Abnormal temperature *nil* on 27th, 29th and 30th, 1° warm on 28th and 1st, and 2° warm on 2nd and 3rd. Vapour in air excessive, except on 29th, when it was normal. Wind normal from 27th to 30th. Abnormal wind southerly from 1st to 3rd.
Poona	Indapur, ·06; Baramati Petha, ·10.	Harvesting of *jowari*, wheat, &c., almost completed in Bhimthari taluka and Baramati Petha. In the latter reaping of *khapla* wheat in progress. Land being prepared for cultivation in Indapur and Purandhar talukas. Public health generally good. Slight cattle-disease in Indapur and small-pox in Haveli talukas. *Bajri* 44 and *jowari* 56 pounds in the district, and *bajri* 37 and *jowari* 43 pounds per rupee in Poona city.
Ahmednagar	*Nil*	Cattle-disease in Shrigonda. *Bajri* 57 and *jowari* 67 pounds per rupee.
Sholapur	Pandharpur, ·09	Lands being prepared for *kharif* crops. Cattle-disease in Sholapur and Pandharpur and cholera in Madha and Pandharpur talukas, 72 cases, 25 fatal. *Jowari* 63 and *bajri* 59 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Dharwar	Nawalgund, 2·5; Mugud, 1·70; Nargund, Gadag and Ranibennur, nearly 1·0; and slight in six other talukas.	Cotton-picking nearly completed. Ground being prepared for early crops. Sowing of rice commenced in Mugud. Scarcity of fodder in Nawalgund and of drinking-water in Gadag, Karajgi and Kod talukas. Public health generally good. Slight fever in Gadag and cattle-disease in Nawalgund. Rice 25 and *jowari* 50¾ pounds per rupee.
Kanara	Kanara, 20; Ankola, ·21; Honawar, ·09; Sirsi, ·11; Haliyal, ·34; Bhatkal, ·07; Mundgod, ·16; Yellapur, ·32.	Field operations continue. Slight fever above Ghats. Weather hot and cloudy. Wind southerly. Common rice in Karwar and district average 13 seers per rupee.
Rajkot	*Nil*	Weather hot. Measles in Godka, Manakwara, Manavadar, Mendarda, Bagasra and Bilkha. Fever in Rajkot, Porbandar, and Dedan. Wheat 25, *bajri* 25 and *jowari* 31 pounds per rupee. *General Remarks.*—Rain in parts of the Deccan and Southern Mahratta Country. Preparation for *kharif* sowing going on in ten districts. Scarcity of drinking-water and fodder continues in parts of Dharwar. Fever in parts of ten, cattle-disease in parts of eleven, small-pox in parts of seven, and cholera in parts of four districts.
Bengal—(May 4th)		
Chittagong (May 3rd)	0·14.	Weather sultry. More rain wanted. Prices steady. Cholera in Cox's bazaar, but general health good.
Dacca	*Nil*	*Boro* paddy being cut. Sowings being pushed on. Prospects good. Many cases of cholera in Munshiganj and Manickganj subdivisions.
24-Pergunnahs (Calcutta).	0·40	Ploughing continues. Sugarcane doing well. Isolated cases of cholera and fever. Public health generally good. An epidemic of anthrax among horses in Barrackpur Cantonment.
Khoolna	3·25	Rain and hail on night of 2nd. Weather hot. *Boro* rice harvest continues. Prospects good. Public health good.
Moorshedabad	*Nil*	Weather warm and cloudy occasionally. *Boro* rice being harvested. *Bhadoi* promising. Cholera prevailing in parts of Jangipore subdivision.
Pubna	0·23	Weather hot. Rain and hail on 29th. Rice sowing proceeding. Cholera reported.
Dinagepore	0·25	Rain throughout the district. Sowing of *bhadoi* and jute continues. Cholera reported from three and cattle-disease from one thana.
Rungpore	4·61	Weather cool. Violent storms with heavy rain and occasional hail. Crops promising. Cholera very prevalent.
Midnapore	0·35	Evening duststorms. Prospects of crops and public health good.
Burdwan	0·13	Weather seasonable. Prospects good. Public health fair.
Bhagulpore	*Nil*	Sugarcane doing well. Prospects of paddy and *moong* on lowlands good. Cholera still prevalent in north.
Purneah	0·32	All crops doing well. Early rice and jute cultivation in progress. Prices low. Public health fair.
Durbhanga	1·44	*Rabi* threshing in progress. Early rice, *cheena* and *moong* doing well. Fields being prepared for *bhadoi* sowings. Cholera abating.
Chumparun	*Nil*	Harvesting of *rabi* crops almost finished. Opium weighments going on. Indigo prospects favourable. *Bhadoi* and *aghani* sowings on lowlands commenced. Prices stationary. Cholera has appeared both in town and interior.
Patna	0·14	Atmosphere not clear, since last three days very strong east wind blowing. A storm of wind, followed by rain, on night of 1st. *Rabi* produce still in threshing floors. Opium weighment going on. Sugarcane growing well. Cholera prevails in Patna city.
Gya	Slight rain	*Rabi* being threshed. Sugarcane coming on well. Cholera, small-pox and fever reported.
Hazareebagh	*Nil*	Weather seasonable. Sugarcane doing well. Mango indifferent. *Mahua* below average. General health good.
Cuttack		Weather hot, but cloudy. Ploughing in progress, but requires rain. *Dalua* rice harvest nearly completed. Public health good. *General Remarks.*—Weather sultry with storms. Showers fell in many districts, but rain is wanted in Orissa and some of the eastern districts. Ploughing and *aus* and *bhadoi* sowings in full swing. Sugarcane in good condition. *Boro* rice harvest proceeding. *Rabi* threshing and opium weighment still going on. Public health indifferent. Cholera prevalent in several districts.
N.-W. Provinces and Oudh—(May 4th)		
Benares (May 3rd)		Weather seasonable. Harvest completed. Supplies ample. Prices steady. Some cholera in the district, otherwise health good. No cattle-disease.
Ballia („ 2nd)		Weather clear. Duststorm on the night of 30th April. *Rabi* operations progressing. Health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
N.-W. Provinces and Oudh—*contd.*		
Gorakhpore (May 2nd)	. . . .	Threshing nearly completed. Prices stationary. Epidemic cholera in some tahsils.
Fyzabad („ 3rd)	. . . .	Harvest completed. Sugarcane and indigo being irrigated. Markets well supplied. Cholera in three tahsils.
Lucknow („ 2nd)	A severe hurricane on the evening of 30th April, attended with slight fall of rain and hail.	The hail injured to some extent the melon crops. Markets well supplied. Prices steady. Health good. Condition of cattle fair.
Rai Barelli („ „)	. . . .	Weather seasonable. Prices slightly rising. Cholera prevailing. Some cases of cattle-disease reported from Sadr.
Partabgarh („ 3rd)	. . . .	East wind prevailing. Prices steady. Cholera in epidemic form. Small-pox continues.
Allahabad („ „)	. . . .	Strong hot winds blowing. *Rabi* harvest completed. Markets well supplied. Prices steady. Sporadic cholera reported, otherwise health good.
Cawnpore („ 2nd)	·20 in one tahsil	Winnowing in progress. Indigo and sugarcane being irrigated. Prices stationary. Fever in three and small-pox in one pergunnah.
Banda („ „)	. . . .	Heat increasing. Markets full. Prices slightly falling. Cholera in two tahsils, 11 attacks and 5 deaths. Cattle-disease in two villages.
Farakhabad („ 3rd)	Moderate fall of rain and hail in four tahsils on 30th April.	Fruit and vegetable crops somewhat injured. Threshing and irrigating continue. Markets well supplied. Prices steady. Itch and fever still linger. No cattle-disease.
Sitapur („ „)	. . . .	Weather stormy, with easterly winds. People engaged in threshing. Prices keep steady. A few cases of small-pox reported.
Bareilly („ „)	. . . .	Extra crops doing well. Markets steady. No sickness.
Kumaon („ „)	. . . .	Weather fair, with passing clouds. *Rabi* crops being cut. *Kharif* operations commenced. Prices stationary. Cholera still in district. Cattle-disease on the decrease.
Agra („ „)	*Nil*	Sugarcane being irrigated. Prices steady. Slight fever and small-pox in city and two tahsils, otherwise general health good.
Jhansi („ 2nd)	. . . .	Weather hot. *Rabi* operations nearly completed. Prices stationary. Small-pox continues. Condition of cattle good.
Meerut („ 3rd)	*Nil*	Wind westerly and easterly. Sugarcane and indigo being sown. Price of wheat falling, that of other grains rising or stationary. Supplies ample. Small-pox reported in Meerut and Baghpat, otherwise health good.
		General Remarks.—Weather somewhat unsettled. Storms accompanied by rain and hail reported from some places. Slight injury done to crops *Rabi* harvesting generally completed and prospects good Supplies ample. Prices fluctuating. Public health fair. Cases of cholera, small-pox and fever continue to be reported.
Punjab—(May 4th)		
Delhi (April 3rd) .	. . . . .	Health good. Prices fluctuating. *Rabi* reapings finished, yield below average.
Hissar	. . . . .	Fever still prevalent. Prices stationary. *Rabi* harvested.
Umballa	. . . . .	Health good. Prices rising. *Rabi* reapings completed. Threshing operations in progress, yield below average.
Jullundur	. . . . .	Health good, but small-pox and cattle-disease in some villages of Nawashahr and Phillour tahsils. Prices stationary. *Rabi* crops harvested and below average
Amritsar	. . . . .	Health good. Prices falling. *Rabi* produce satisfactory.
Sialkot	. . . . .	Health good. Prices stationary. *Rabi* harvest retarded by cloudy and windy weather.
Ferozepore . . .	. . . . .	Health good. Prices falling with incoming harvest.
Lahore	. . . . .	Health good. Prices slightly fallen. *Rabi* crops being garnered.
Rawalpindi . .	Slight rain	Health good. Prices rising. *Rabi* outturn below average
Shahpur	. . . . .	Health good. Prices high and almost stationary. *Rabi* being harvested, outturn much below average.
Multan	. . . . .	Health good. Prices falling. *Rabi* being threshed.
Dera Ismail Khan .	. . . . .	Health fair. Prices rising. *Rabi* harvest commenced, expected outturn below average.
Peshawar . . .	. . . . .	Health good. Prices almost stationary. *Rabi* harvest poor.
		General Remarks.—Slight rain has fallen in the Rawalpindi district. Fever still prevalent in the Hissar district. Small-pox and cattle-disease in some of the villages of the Nawashahr and Phillour tahsils, otherwise general health good. Prices falling in the Ferozepore, Amritsar, Lahore and Multan districts; rising in the Umballa, Rawalpindi and Dera Ismail Khan districts; fluctuating in the Delhi district; elsewhere stationary. Harvesting completed in most districts, crop outturn below averge. Cattle starving in the Shahpur district.
Central Provinces—(May 4th)		
Nagpur . . .	. . . . .	Weather hot. Threshing in progress. Small-pox and cattle-disease prevalent. Prices steady.
Jubbulpore . . .	. . . . .	Weather cloudy and hot. Winnowing continues. Small-pox prevalent. Prices unchanged.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Central Provinces—*contd.*		
Saugor . . .	. . . .	Weather hot and stormy. Harvest continues. General health good. Prices unchanged.
Seoni . . .	. . . .	Weather cloudy and hot. *Rabi* threshing in progress. *Kharif* ploughings continue. Slight small-pox. Prices steady.
Hoshangabad . .	. . . .	Weather hot and stormy. *Rabi* harvest in progress. Fever prevalent. Prices stationary.
Khandwa . . .	. . . .	Weather hot. Land being prepared for *kharif* sowings. Small-pox continues.
Raipur . . .	. . . .	Weather hot and cloudy. Threshing completed. Cattle-disease continues. Rice 18 and wheat 24 seers per rupee.
Bilaspur . . .	. . . .	Land being prepared for *kharif*. Cattle-disease in parts. Sugarcane doing well. Prices stationary.
Sambalpur (April 30th))	. . . .	Weather hot 4 deaths from cholera. Rice 21 seers per rupee.
		General Remarks.—Weather hot and windy. *Kharif* ploughings commenced. Fever and small-pox in places. Prices steady.
Assam—(May 4th)		
Gauhati (May 3rd) .	5·36	Weather rainy. Public health fair. Planting of sugarcane commenced. Prospects of crops good.
Sylhet	11·23	State of crops good. Prospects improved by the rains.
Cachar	3·91	Weather warm. Ploughing and sowing of *dumai* and *murali* crops progressing. Common rice 14¼ seers per rupee 13 deaths from cholera from Katigara and 4 from Lakhimpur reported. Cattle-disease reported.
Dibrugarh . . .	2·91	Weather seasonable. Surgarcane being planted Ploughing for *sail* progressing. Prospects of *arhar* good. Tea doing well. Some cholera cases reported from tea gardens.
Berar and Hyderabad—(May 4th)		
Hyderabad . . .	*Nil*	Reaping of *abi* crops concluded. *Rabi* crops being harvested. Cholera still prevalent. Prices—wheat 34, coarse rice 11¾, white *juar* 18¾, yellow *juar* 19¼ and *tur* 15 seers per current sicca rupee.
Central India States—(May 4th)		
Indore . . .	. . . .	Weather cooler, with strong west winds.
Morar (Gwalior) . .	. . . .	Small-pox in Lashkar, otherwise health good. Weather stormy. Heat increasing.
Neemuch . . .	. . . .	Weather very warm. High winds. Health good. Scarcity of water.
Goona . . .	. . . .	Small-pox continues, otherwise health good.
Sutna . . .	. . . .	Weather hot. Health good. Prospects fair.
Agar . . .	. . . .	Cholera at Rutlam. Prospects fair.
Sehore . . .	. . . .	Weather unusually hot. Health good.
Nowgong . . .	. . . .	Weather hot. Health fair. Prices falling.
Bhopawar . . .	. . . .	Prospects fair. Weather somewhat cooler, owing to high westerly winds. Health good. Prices steady.
Rajputana—(May 4th)		
Abu (May 4th)	*Nil*	Weather seasonable. High winds with dust.
Sirohi („ 1st)	. . . .	No water in tanks. Wells good. Health good. Weather fine and hot.
Marwar (April 30th)	. . . .	Tanks about half full. Weather good. Crops being harvested. Weather little cloudy, hot and dusty. Nights close. Markets light.
Meywar („ „)	. . . .	Tanks and wells low. Crops being reaped. Health good. Prices stationary. Heat increasing.
Harowti („ „)	. . . .	Heat increasing. Tanks dry, wells drying. Health good.
Jhallawar (May 2nd).	. . . .	Small-pox in Shahabad. Hot winds prevalent.
Kotah (April 30th)	. . . .	Heat increasing. Health good. Prices still rising, especially of gram.
Ajmere (May 3rd)	. . . .	Hot winds blowing. Great scarcity of drinking-water in Ajmere district. Cattle-disease in Todgarh not yet disappeared. Wheat 23, barley 40 and gram 40 pounds rupee.
Jeypore („ „)	. . . .	Weather seasonable.
Kerowlee (April 30th)	. . . .	Tanks and wells drying. Harvesting completed. Small-pox continues. Prices rising. Weather hot.
Dholepore („ „)	*Nil*	Wells drying; tanks almost dry. Threshing of crops nearly over. Health good. Prices stationary. Weather hotter.
Bhurtpore (May 3rd)	. . . .	Harvesting progressing. Health good. Prices lowering. Weather hot.
Ulwur („ „)	. . . .	Fever in four tahsils, otherwise health good. Weather hotter.
Kherwara („ 1st)	*Nil*	Tanks and wells lower. Crops gathered. Health good. Prices steady. Weather seasonable and hotter.
Pertabgurh(April 30th)	. . . .	Tanks and wells drying. Health good. Prices steady. Heat great.
Bickanir („ „)	Rain drops in four districts.	Fever in two districts. Prices stationary. Weather hot.
Nepal—(April 28th)		
Katmandu (April 29th)	·04	Weather seasonable. Prospects fair.

E. C. BUCK,

Secretary to the Government of India.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN SIND FOR 1885-86.

No. 751., dated Simla, May 4, 1887.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, No. 28W.I.-56, dated 18th February 1887, submitting the Revenue Report of the Irrigation Department in Sind for 1885-86, and the Resolution of the Government of Bombay thereon.

The capital expenditure during 1885-86 was ₹4,53,803 from "Loan" and ₹2,567 from "Ordinary" funds. The total capital outlay up to the close of the year amounted to ₹1,10,87,784, of which ₹78,76,600 had been spent on Productive Public Works.

2. The gross revenue from all sources was by assessments ₹35,77,341 and by collections ₹36,32,014. The gross revenue assessed on works for which capital and revenue accounts are kept amounted to ₹14,51,029; the maintenance charges to ₹7,00,132; the net revenue by assessments was, therefore, ₹7,50,897, giving a return of 6·77 per cent. on the capital outlay: in the previous year the percentage of profit was 8·75.

3. The area cultivated by the aid of irrigation works during 1885-86 was 1,739,919 acres, of which 207,197 acres situated in jaghir estates are assessed at low rates. The total revenue from all sources assessed during the year amounted to ₹35,77,341, which is ₹1,95,825 less than the similar figure for the

previous year. There was a decrease in the total area as compared with the previous year of 43,254 acres; but with the single exception of the previous year, 1885-86, the year under review is the most successful year on record and the rabi area is the largest area measured. That the kharif did not show an equal advance was due to the set of the Indus on to the head of the Ghar canals. It is mentioned in paragraph 18 of the report that for years past the tendency of the river has been to eat away its right bank after passing the gorge at Sukkur, and in the year under review the Fordwah sluice was washed away and the upper length of the Ghar was blocked with silt. There was an early rise of the river, and the high level was maintained, with few variations, up to the 5th September. The policy of giving an increased grant for the maintenance of the Sind canals, which was instituted in 1881, has been most successful. The average increase in the outlay during the five years 1881 to 1886 has been ₹1,45,304, whilst the increase in revenue has averaged ₹4,86,716 per annum.

4. There had been a considerable reduction in the balance of water revenue due from the Khelat State at the date when the report was submitted, and there was a prospect that the balance still due might be realized at an early date.

5. The outlay on maintenance and collection charges for the year under review amounted to ₹13,95,887, which gives a percentage of 39·02 on the revenue and a rate of ₹0·80 on each acre irrigated.

In addition to the above figure, the outlay on extensions and improvements amounted to ₹1,63,241. As noted in paragraph 4 of the Resolution on the report of these canals for the year 1884-85, no comparison can fairly be made between the rates of revenue and expenditure on the Sind canals and those of inundation canals in the Punjab. In the Punjab each series of canals is administered on its own system, and on none of them is the system at all similar to that employed in Sind.

6. The irrigation duty of water in the canals varied from 51·55 acres per cubic foot on the Mithrau canal to 16·29 acres on Sherwah. In the previous year the duty on the Desert canal was 72·39 acres. In the former year, however, the crops were principally millets, whilst in the year under review rice was cultivated to the extent of 73 and 97 per cent., respectively, on the Mithrau and Sherwah canals.

7. The river embankments are reported to have given no trouble during the year, but, owing to the set of the river, it was found necessary to commence the construction of a loop in rear of a part of the Kashmor bund; and the Superintending Engineer mentions that, owing to the rise in the river-bed, it will be advisable to add to the height of the embankments to the south of Jerruck.

8. The Government of India again urges the necessity for an earlier submission of this report.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Government of Bombay, in the Public Works Department, for information.

Also, that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay be forwarded for information to the Governments noted in the margin, in the Public Works Department.

Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.

Also, that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay, be forwarded to the Department of Finance and Commerce and to the Revenue and Agricultural Department, for information.

Also, that a copy of this Resolution, the Resolution by the Local Government, and the memorandum by the Commissioner in Sind, together with the general abstract of financial results, be forwarded to the Publisher of the *Gazette of India* for publication in the Gazette Supplement.

Also, that a copy of this Resolution be forwarded to Her Majesty's Secretary of State.

R. HOME, *Colonel, R.E.*,
Deputy Secretary to the Government of India.

Enclosure to Public Works Department Resolution No. 75 I. of 1887.

No. 28W.I.—56, dated 18th February 1887.

RESOLUTION—By the Government of Bombay, Public Works Department.

Letter from the Superintending Engineer for Irrigation in Sind, No. 2603, dated 14th December 1886. Forwards the Annual Irrigation Revenue Report for 1885-86, with the usual tables, General Revenue Accounts, charts and index-map of Sind.

Memorandum from the Commissioner in Sind, No. 4928, dated 20th December 1886. Submits the Report with his remarks.

RESOLUTION.—The early and sudden rise of the river Indus in April and the fluctuations of its level later on in July caused some losses; but, taking it generally, the inundation was a most favourable one, and the consequent increase both of area irrigated and of revenue realised would have been far above the average had not an unfortunate failure of supply occurred in the Ghár system through the encroachments of the river.

2. The remark of the Commissioner in Sind regarding the causes of this failure in the Ghár's supply calls for further enquiry, and a letter has been addressed to the Superintending Engineer on the subject.

3. A new regulator has since been built across the Fordwah to replace that which was washed away, and the Superintending Engineer for Irrigation is sanguine that the river will now bear away from its right bank, and that next year will see a full restoration of revenue on all the canals.

4. The rainfall was small and had no appreciable effect on the cultivation.

5. The total area of cultivation for the year was 1,739,919 acres including 207,197 acres of jághir. The total canal revenue was ₹35,77,341. The increase under these two heads was, respectively, 121,529 acres and ₹2,35,574 on the averages for the previous five years.

6. The irrigation share of the net consolidated revenue was ₹34,33,190, giving a rate of 1·97 per acre on the average. This head shows a decrease of ₹1,83,180 on the previous year, which is explained by the loss on the Ghár canals.

7. The several items of Maintenance and Repairs, with the exception of Establishment, show a satisfactory decrease of expenditure. The excess of ₹34,807 on Establishment, however, reduces the total saving to ₹8,200 only.

8. The percentage of the Maintenance and Repair charges on the Revenue is 39·02, and the charge per acre of cultivation is 0·80, comparing favourably with the averages of past years.

9. The report as regards the recovery of outstandings is satisfactory.

10. Remissions given exceed the average by ₹54,049, but this is due to the losses on the Ghár; otherwise the amount remitted would have been comparatively small.

11. The percentage of expenditure on the revenue was 37·60, or almost the same as last year, being 2·68 below the average; but the establishment percentage was 5·88 higher than the previous year.

12. Efforts must be made to provide funds to render more secure the protective embankments in Lower Sind, the growing necessity for which is pointed out by the Superintending Engineer for Irrigation and emphasized by the Commissioner. The encroachment of the river at the 40th mile of the Kashmor bund, mentioned in the body of the report, has proved a serious matter and has necessitated an expenditure of nearly 1½ lakhs of rupees, a special grant for which has been asked and obtained from the Government of India.

13. Government concur with the Commissioner in Sind in regretting the approaching termination of Colonel LeMesurier's long and valuable services in connection with the Irrigation in Sind.

14. Copies of the report and the memorandum thereon by the Commissioner in Sind should be forwarded as usual, with the review of this Government, to the Government of India and Secretary of State for India.

No. 4928 OF 1886.

PUBLIC WORKS DEPARMENT.

Commissioner's Office,

Camp Jacobabad, 20th December 1886.

In forwarding this report to Government there is not much that calls for remark by the Commissioner. The facts are so clearly and concisely stated that detailed review would serve no useful purpose.

2. The inundation of 1885 was a favourable one, an "exceptionally good one" the Superintending Engineer for Irrigation terms it, but in spite of this the area under canal cultivation and share of Government revenue due to irrigation is less than in the year 1884-85. The principal cause for this decrease was the unfortunate failure of supply in the Ghar, one of the most important canals in the Province, a failure due partly to erosion by the river Indus at the mouth of the canal and partly also to the delay in selecting a site for the new regulating bridge on the Fordwah, a feeder of the Ghar, and in the erection of the regulator to control the supply. This delay undoubtedly resulted in a large loss of revenue and loss also to the cultivators. The falling off in the revenue from this cause was certainly over two lakhs of rupees, for the actual loss to Government exceeded the amount of revenue remitted as owing to the state of the canal a good deal of land along a part of its course was left uncultivated, which, had the supply been better, would have been brought under the plough. But for this loss the revenue of the year would have shown a satisfactory increase.

3. With regard to the water-rate levied on cultivation in Baluchistan it appears from the table in paragraph 4 that the collections are still very irregular. The water-rate on Khelat lands for the year amounted to R60,155, while the actual realizations were R48,000. Steps are, it is stated, being taken by the Khelat authorities to levy the outstanding balances. With regard to the hakaba or clearance rate levied on cultivation in jaghir lands there is nothing in the figures given that calls for remark.

4. It is unnecessary for the Commissioner to follow Colonel LeMesurier who gives details for the different groups of canals and districts, but he would draw attention to that officer's remarks in paragraph 28 in connection with the protective embankments in Lower Sind. The urgent need of improving these has more than once been brought to the notice of Government, and it is to be hoped that money may be granted for the purpose at an early date, as it is hardly too much to say that the prosperity of the agricultural classes in Lower Sind depends on this work being carried out.

5. The results for the year reported on are on the whole very satisfactory. Fluctuations in revenue there ever must be in dealing with canals fed by the Indus, which, as explained in Colonel LeMesurier's 18th paragraph, has, by the variations in its course, seriously affected the working of several of the canals, but there can be no question that if sufficient grants are given to enable the officers of the Irrigation Department to maintain the canals in good working order, the increased area brought under cultivation during the past few years will not only be maintained but a still very marked further increase both in area under cultivation and in revenue may confidently be expected.

6. It is with regret that the Commissioner has learnt that there is a probability that Sind may very shortly be deprived of the services of Colonel J. LeMesurier, the Superintending Engineer for Irrigation. Such an event will be a serious loss to the Province, as by his intimate acquaintance with the canals and their requirements Colonel LeMesurier has been able to do much to improve the efficiency of the Department he has so long and ably controlled.

H. N. B. ERSKINE,
Commissioner in Sindh.

TABLE I.

Cultivation and Water-share of Net Consolidated Revenue for 1885-86 and three previous years.

Canals and District.		1882-83.		1883-84.		1884-85.		Average.		1885-86.

HOME DEPARTMENT.

EXECUTION OF DEEDS, CONTRACTS, &C., ON BEHALF OF THE SECRETARY OF STATE.

No. 744.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Simla, the 9th May, 1887.

Read again—

The undermentioned papers relative to the execution of deeds, contracts, &c., on behalf of the Secretary of State :

Home Department Resolution No. 989, dated 23rd June 1877.

Home Department Resolution No. 1082, dated 26th July 1883.

Home Department Resolution No. 1167, dated 25th August 1885.

Read also—

Letter from the Government of the Punjab, No. 192, dated 17th March 1887, on the same subject.

RESOLUTION.

In exercise of the power conferred by the 33rd and 34th of Vic., Cap. 59, Section 2, the Governor-General in Council is pleased to declare that the undermentioned classes of deeds, contracts, and other instruments referred to in the 22nd and 23rd of Vic., Cap. 41, Section 2, may, in the territories under the administration of the Government of the Punjab, be executed as follows :

By the Secretary to Government and Deputy Commissioners.	(1) Instruments of free grant of proprietary right in land.
	(2) Instruments whereby property is mortgaged to the Government as security for a loan.
	(3) Instruments of exchange of land.

Nos. 745-746.

ORDER.—Ordered, that this Resolution be communicated to the Government of the Punjab and to the Revenue and Agricultural Department,* and that it be published in the Supplement to the *Gazette of India*.

* Papers returned.

A. P. MACDONNELL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 11th May, 1887.

During the past week the meteorological conditions prevailing over India have been practically constant. The area of high pressure has been shown steadily over the west of the Peninsula. On some days it was confined to Malabar, on others it extended up the west coast as far as Bombay, but throughout the whole week it occupied some portion of this region. At the same time the Punjab has been equally steadily the seat of the lowest pressures, though on several occasions relatively low readings were also shown over the east of the Central Provinces, Chutia Nagpur, South-West Bengal, and Orissa. The general wind circulation was in consequence equally steady. Westerly to north-westerly winds (the northing in the direction varying with the northward extension of the high pressure area on the west coast) have prevailed over the greater part of North-Western and Western India and a large portion of Central India, the Deccan, and the Karnatic, south-westerly to southerly winds over the head of the Bay and the coasts of Lower Bengal, and easterly winds in Central and Northern Bengal and Assam. In the Gangetic plain the winds were more unsteady. From the 5th to the 9th the prevailing movement was from south-east, but on the 10th and 11th there was, more particularly in the northern half, a large admixture of winds from north-west. Over Behar and as far west as Allahabad easterly winds were very steady throughout. On the 11th the weather became unsettled over the Bay and in Eastern Bengal; one small disturbance lying off the Circars Coast and, a second between Calcutta and Dacca. The former occasioned only north-easterly winds on the Circars Coasts, but the latter was accompanied with heavy showers over a large part of Bengal and Assam. This rainfall was the most important which fell within the period under discussion, but during the week showers occurred in parts of the Central Provinces, Central India, and at all stations in both Peninsulas. None fell in Upper India and, as will be seen by the following table, the seasonal deficiency in that region has undergone further increase:

Stations	Actual rainfall from 1st November 1886 to 11th May 1887.	Average rainfall from 1st November 1886 to 11th May 1887.	Difference.
Multan	0·64	1·98	—1·34
Peshawar	2·43	7·29	—4·86
Murree	10·37	14·74	—4·37
Rawalpindi	4·98	10·78	—5·80
Lahore	0·62	3·73	—3·11
Simla	10·23	12·50	—1·07
Delhi	2·49	3·45	—0·96
Roorkee	4·06	5·98	—1·92
Meerut	2·76	4·11	—1·35
Bareilly	3·60	3·07	+0·01
Agra	1·13	1·76	—0·63
Lucknow	1·40	1·97	—0·57
Allahabad	4·58	2·04	+2·54
Darjeeling	12·16	10·62	+1·54
Calcutta	7·38	7·86	—0·48

The final table shows that a considerable barometric depression prevailed over the Punjab and a relative depression over the east of the Central Provinces, Orissa, and Chutia Nagpur, but that in all other places pressure was above the average; in some places—more particularly in the west—considerably so. The temperature of the week has been below the average of the month in Behar,

Lower Bengal, Orissa, the central parts of the country, and the whole of the Peninsula, but above it in Upper India. In the Punjab West the excess exceeded 9°, and in the Punjab East and Assam 5°. The day temperatures were high in Upper India, the maximum being 122° at Jacobabad on the 6th. Humidity has been below the monthly average, except in Lower Bengal, the Central Provinces, Rajputana, Guzerat, the Konkan, Deccan, and Mysore.

Districts.	Difference of Barometer from mean, May 5th to May 11th.	Difference of Temperature from mean, May 5th to May 11th.	Difference of Humidity from mean, May 5th to May 11th.	Total rainfall in week, May 5th to May 11th.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 12th MAY, 1887.

GENERAL REMARKS.—Except in the North-Western Provinces and Oudh, the Punjab, Central Provinces, and Central India, and Rajputana, there has been a fair amount of rain throughout the country during the week under report. The falls were heaviest in Bengal, Assam, and Lower Burma.

The *rabi* harvest now only proceeds in Hyderabad and the Punjab.

Kharif operations are extending to most parts of the country, and are now in progress in Bombay, the Central Provinces, the Punjab, and Berar.

The outlook is generally satisfactory in Madras, Mysore and Coorg.

The spring rice has been nearly reaped in Bengal, and the early rice is doing well there and in Assam.

Sugarcane has yielded an average outturn in Madras, it is being planted in Assam and Rajputana, and the crop promises well in Bengal, the North-Western Provinces and Oudh and the Central Provinces.

The condition of indigo in Bengal and the North-Western Provinces and Oudh is favourable.

Cotton-picking is approaching completion in Bombay.

The public health is generally good everywhere except in Bengal, where it is but indifferent, owing to the prevalence of cholera in many places.

Prices are fluctuating in the North-Western Provinces and Oudh, and rising in three and falling in two districts of the Punjab. A slight rise has also occurred in three districts in Mysore.

Elsewhere prices are fairly steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 4th)		
Bellary . . .	Average ·14	Standing crops generally good. Harvest sugarcane, yield average. Fever in one taluk. Cholera slight. Cattle-disease increasing in five taluks.
Kurnool . .	Average ·07	Standing crops good. Harvest second crop paddy and cotton, outturn below average. Small-pox in four and cattle-disease decreasing in seven taluks.
Ganjam . . .	Average last week since revised, ·22.	Small-pox slight in three, fever in five, and cattle-disease decreasing in two divisions. Cholera slightly increasing.
Kistna . . .	*Nil*	Standing crops good. Fever slight. Cholera decreasing in four and cattle-disease increasing in three taluks.
Chingleput (Madras) .	*Nil*	Standing crops fair, but in parts withered to some extent for want of rain. Harvest paddy and *ragi*, outturn below average. Small-pox in two, and cattle-disease increasing in two taluks.
Coimbatore . . .	Average 1·69	Standing crops good. Harvest paddy, outturn generally above average. Fever in one, small-pox in two, and cattle-disease decreasing in one taluk.
Tanjore . . .	Average ·84	Standing crops generally good. Harvest paddy, *cholum* and gingelly, outturn up to average. Cattle-disease slight in one taluk.
Madura . . .	Average 2·27	Fever and small-pox in one taluk.
Malabar . . .	Average 1·42	Standing third crop paddy ripening. Fever in two and small-pox in nine taluks.
Travancore . . .	7·36	Harvest second crop paddy, yield average. Lands being ploughed and sown for next crop. Small-pox and fever in places.
		General Remarks.—General prospects fair.
Madras—(May 11th)		
Bellary . . .	Average ·62	Standing crops generally good. Harvest paddy and sugarcane, yield average. Fever in one taluk. Slight cholera. Cattle-disease increasing in five taluks.
Kurnool . . .	Average ·88	Standing crops good. Harvest second crop paddy, yield below average. Small-pox in five, and cattle-disease decreasing in four taluks.
Ganjam . . .	Average 1·06	Small-pox in three, fever in five, and cattle-disease increasing in two divisions. Cholera exists.
Kistna . . .	Average ·08	Standing crops good. Slight fever. Cholera decreasing in three and cattle-disease also decreasing in four taluks.
Chingleput (Madras) .	Average ·58	Standing crops fair, but in parts withered to some extent for want of rain. Harvest paddy, outturn below average. Fever in one taluk. Small-pox prevalent. Cattle-disease decreasing in two taluks.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—*contd.*		
Coimbatore . .	Average ·43	Standing crops good. Harvest paddy, outturn about average. Fever prevalent. Small-pox in two taluks.
Tanjore . . .	Average ·72	Standing crops generally good. Harvest wet and dry crops, outturn up to average.
Madura . . .	Average last week since revised, 2·94; this week, ·10	Health of people and cattle generally good.
Malabar . . .	Average ·32	Standing third crop paddy ripening. Fever in two and small-pox in all taluks.
Travancore . . .	. . . . .	Lands being ploughed and sown for next crop. Small-pox and fever in places.
		General Remarks.—General prospects good.
Bombay—(May 11th)		
Karachi . . .	*Nil*	River at Kotri on 9th, 7 feet 11 inches against 10 feet 5 inches on same date last year. Fever in eight and cattle-disease in one taluka; one fresh case of small-pox in Sujawal taluka. Wheat, red rice and *bajri* in Karachi 22, 30 and 32 and in Sehwan 28, 40 and 40 pounds per rupee, respectively.
Hyderabad . . .	*Nil*	*Rabi* harvesting continues in five talukas. *Kharif* cultivation in progress. Fever in three, small-pox and cattle-disease in one taluka. REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORT FOR APRIL, 1887.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Meteorology), No. 74 Met.—24-7, dated Simla, the 16th May, 1887.

Read the following:

Summary of the Weather Report for April, 1887.

During April Meteorological conditions throughout India have been comparatively settled. No serious depression has disturbed the weather, and though the distribution of pressure and the circulation of the winds in Northern India have been somewhat abnormal, the result has been that on the whole greater serenity than usual has been experienced. Pressure has ranged above the average, except at a few places in the Punjab, Sind, Guzerat, the Berars, the Malabar Coast, and Burma, where there has been a trifling deficiency. The average excess was greater in Northern than in Southern India and was greatest in Assam. As a rule, throughout the month the lowest pressures were found extending north-westward from Chutia Nagpur across the Central Indian plateau and the south of the Gangetic plain as far as the south of the Punjab, with slightly higher pressures over the plain to the north of the Ganges and the submontane districts of the Punjab. In consequence of this distribution, the prevailing wind was over Bengal from south, up the Gangetic valley from east and south-east, over Rajputana, Central India, Khandesh, and the Konkan from north-west, and over the central parts of the country from west. In the Peninsula the wind was variable between south-east and south-west, though on some occasions the north-westerly winds of the Konkan Coast extended southward into Malabar. The southerly winds over Bengal and the Peninsula occasioned rather cloudy skies in those regions and rain was not infrequent. In the Peninsula the showers were on some occasions rather heavy, and the total amount received in Malabar, Mysore, and the Carnatic was in excess of the average. In Bengal on the contrary they were light and scattered, and except to the north of the Ganges the month's fall was below the average. In the North-Western Provinces owing to rather heavy thunderstorms during the first half of the month there was a trifling excess of rain, but with these exceptions the general rainfall of India was deficient.

In Ceylon owing principally to heavy downpours on the 6th and 28th of April there was a large excess.

Temperature was subject to considerable oscillations during the month. In Bengal, the east of the Central Provinces, a large part of the North-Western Provinces, and in the south of the Peninsula the mean temperature, owing to the frequent showers mentioned above, was below the average, but in all other parts of the country, more particularly in the North-West, it was above. At Rawalpindi the mean was at 7°, at Peshawar 5°, and at Mooltan and Lahore 4° higher than usual.

The variations of relative humidity were irregular, but in the Punjab the amount of moisture in the atmosphere was much below the normal.

The following table shows the amount of rain and the difference from the average during the month of April, 1887, according to districts, as far as is indicated by the telegraphic reports :

Districts.	No. of Stations.	Average rainfall for April.	Difference from the average in April 1887.
Punjab, West	7	1·70	—1·28
„ East	4	1·13	—0·47

METEOROLOGICAL OFFICE,
Simla, 5th May, 1887.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

RESOLUTION.—Resolved, that the Summary be published in the Supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 18th May, 1887.

During the week under discussion, the weather over India has progressed steadily from a somewhat abnormal and unsettled state towards more normal and settled conditions. The principal abnormal feature was the relative depression of pressure which has existed throughout almost the whole week over Orissa, the eastern parts of the Central Provinces and Southern Behar. This depression has occasioned more or less strong southerly winds to blow from the head of the Bay across the Bengal coasts into Lower Bengal and an unusual amount of easting in the winds of Bengal generally and Assam. The highest pressures throughout the whole week have been shown over the west coast and the lowest over the Punjab. Within the low pressure area over the Punjab numerous duststorms have been formed, and as a consequence dusthaze has been reported almost uninterruptedly from the Punjab stations both on the hills and plains. Quite at the close of the week an alteration occurred in the position of the low pressure area, which was transferred to the foot of the hills from the Punjab to Behar. With this change the easterly (south-east to north-east) winds which had prevailed, to a large extent, over the Gangetic plain disappeared and were replaced by the north-westerly winds, characteristic of the hot season, under the influence of which temperature rose and the air became intensely dry all over Upper India.

During the earlier part of the week rain was fairly general and frequent in Lower Bengal and Assam. In Bengal the fall ceased on the 15th, but in Assam slowly diminishing showers lasted until quite the close of the period. In the west of the Peninsula slight sporadic rainfall has occurred throughout, but here also the amount of the rainfall diminished towards the close of the week. In Ceylon rain fell on the 12th and 13th and again on the 18th. On the last date the weather was overcast over that island, and south-westerly winds were strengthening, apparently indicating an advance of the south-west monsoon current in the extreme south of the Indian region. As there has been no rain in Upper India, the following table shows a still further increase in the seasonal deficiency. At Peshawar, Lahore, Sirsa, and Agra the total rainfall since November 1st, 1886, equals only 33, 15, 24, and 60 per cent. respectively of the normal amount.

Stations.	Actual rainfall from 1st November, 1886, to 18th May, 1887.	Average rainfall from 1st November, 1886, to 18th May, 1887.	Difference.
Multan	0·64	2·02	—1·38
Peshawar	2·43	7·41	—4·98
Murree	10·37	15·78	—5·41
Rawalpindi	4·99	11·17	—6·18
Lahore	0·62	4·02	—3·40
Simla	10·92	13·97	—3·05
Delhi	2·49	3·72	—1·23
Roorkee	4·06	6·25	—2·19
Meerut	2·76	4·29	—1·53
Bareilly	3·06	3·86	—0·20
Agra	1·13	1·86	—0·73
Lucknow	1·40	2·12	—0·72
Allahabad	4·58	2·19	+2·39
Darjeeling	12·48	12·02	+0·46
Calcutta	8·64	8·95	—0·31

The temperatures of the past week call for little remark. The mean temperature of Northern India has been decidedly above the normal and that of the Peninsula equally decidedly below, but the extremes during the day have been generally about the average. Both Rajahmundry and Masulipatam have experienced very high day temperatures. The highest reading recorded during the week was 115° at Agra on the 12th.

The final table shows that pressure was below the average in the Punjab, North-West Provinces, Bengal, Assam, the Central Provinces, Rajputana, Sind, the Karnatic, and Burma, and above it in the Berars, Guzerat, and over the west and centre of the Peninsula. Temperature was 5° above the normal in the Punjab, North-West Provinces, and Behar, and 2° or 3° above in other parts of Bengal, Assam, and the Circars. Elsewhere the mean was below the normal. The air was very dry over Upper India, but elsewhere the departures from the normal were small.

Districts.	Difference of Barometer from mean, May 12th to May 18th.	Difference of Temperature from mean, May 12th to May 18th.	Difference of Humidity from mean, May 12th to May 18th.	Total Rainfall in week, May 12th to May 18th.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 15th MAY, 1887.

GENERAL REMARKS.—The rainfall has been general throughout Madras, Bengal, Burma, and Assam; and a fair amount of rain has also fallen in parts of Bombay. Elsewhere the week has been practically rainless.

Kharif operations are in general progress in Bombay, the Central Provinces, and Berar, and have commenced in the North-Western Provinces and Oudh and the Punjab. Sowings have begun in parts of Bombay and the Punjab.

The prospects of the standing crops in Madras and Mysore continue satisfactory; but in Coorg coffee has been damaged by rain and hail.

The early rice is coming up well in Bengal and Assam.

Sugarcane is doing well in Bengal, the North-Western Provinces and Oudh, and the Central Provinces.

Indigo is thriving in Bengal and the North-Western Provinces and Oudh.

Cotton-picking has been completed in Bombay; and the land is being prepared for the sowing of the crop in Rajputana.

Except in Bengal, where cholera is still prevalent in several districts, the public health is generally satisfactory.

Cattle-disease chiefly prevails in Madras and Bombay.

Prices show a tendency to rise in the North-Western Provinces and Oudh, and are rising in three districts of the Punjab. Elsewhere they are fairly steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 18th)		
Bellary . . .	Average ·11	Standing crops generally good. Harvest sugarcane, yield average. Fever in one taluk. Cholera increasing and cattle-disease decreasing in two taluks.
Kurnool . . .	Average last week since revised, ·90; this week, ·07.	Standing crops good. Harvest second crop paddy, outturn below average. Small-pox in four, and cattle-disease increasing in six taluks.
Ganjam . . .	Average last week since revised, 1·21; this week, ·19	Small-pox and fever in four, and cattle-disease increasing in two divisions. Cholera decreasing.
Kistna . . .	Average ·12	Standing crops good. Slight fever prevalent. Cholera increasing and cattle-disease also increasing in three taluks.
Chingleput (Madras) .	Average ·01	Standing crops fair, but withered to some extent for want of rain. Harvest paddy and *ragi*, outturn below average. Small-pox in one, and cattle-disease increasing.
Coimbatore . . .	Average ·24	Standing crops generally good, but second crop paddy withering in one taluk. Harvest paddy, outturn above average. Fever, small-pox, and cattle-disease increasing in two taluks.
Tanjore . . .	Average ·13	Standing crops generally good. Harvest dry crops, outturn up to average. Cattle-disease in two taluks.
Madura . . .	Average since revised for week ending 30th April, 2·58; last week, ·13; this week, ·06.	Cattle-disease in one taluk.
Malabar . . .	Average ·68	Standing third crop paddy ripening. Fever in two and small-pox in nine taluks.
Travancore . . .	·75	Harvest second crop paddy, yield average. Lands being ploughed and sown for next crop. Small-pox and fever in places.
		General Remarks.—General prospects good.
Bombay—(May 18th)		
Karachi . . .	*Nil*	Strong monsoonish winds. River at Kotri on 16th, 9 feet 5 inches against 14 feet 9 inches on same date last year. *Kharif* transplanting commenced in Ghorabari and Shahbandar talukas. *Rabi* crop (*moong* and pulse) injured by dews in Sakro taluka. Fever in seven and cattle-disease in one taluka. Wheat, red rice and *bajri* in Karachi 22, 30 and 32 and in Tatta 22, 42 and 40 pounds per rupee, respectively.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Hyderabad	·33	*Rabi* harvesting continued in six talukas. *Kharif* cultivation in progress. Rain accompanied by hailstones in Hala. Fever in three and small-pox in one taluka. River at Kotri on 16th, 9 feet 3 inches against 14 feet 9 inches on same date last year. Wheat 22, *bajri* 37⅝, *jowari* 40, white rice 20, and red rice 30 pounds per rupee.
Ahmedabad	*Nil*	*Rabi* harvesting and cotton-picking completed. Land being manured in two talukas. Public health good. Wheat 28 and *bajri* 31 pounds per rupee.
Baroda	*Nil*	Public health good. Measles in Amreli. Land under preparation for cultivation. *Bajri* 28, wheat 18 and rice 18 pounds per rupee.
Surat	*Nil*	Land being prepared for *kharif*. Fever and small-pox in Bardoli taluka. *Jowari* 36 and *nagli* 44 pounds per rupee.
Nasik	Rain in six talukas; maximum in Niphad, 1·47 and minimum in Sinnar, ·26.	*Rabi* threshing nearly completed. Land being prepared for *kharif* sowings. Rain has slightly damaged unthreshed crops. Small-pox at Yeola, otherwise public health good. Prices stationary.
Colaba (Bombay)	*Nil*	Abnormal temperature 1° warm from 11th to 14th, afterwards *nil*. Vapour in air normal. Wind normal from 11th to 15th. Abnormal wind northerly on 16th and 17th.
Poona	Indapur, 1·06	Land under preparation for cultivation in Indapur, Purandhar, and Bhimthari talukas. Public health generally good. Cattle-disease in a village in Purandhar taluka. *Bajri* 44 and *jowari* 56 pounds in the district, and *bajri* 37 and *jowari* 43 pounds per rupee in Poona city.
Ahmednagar	Slight rain in Newasa	*Bajri* 56 and *jowari* 65 pounds per rupee.
Sholapur	Sholapur, 1·65; Barsi, ·60; Karmala, ·26; Sangola, ·25.	Lands being prepared for *kharif* crops. Cattle-disease in Sholapur and Pandharpur talukas. Cholera in Sholapur, Barsi, Madha, Pandharpur, and Sangola talukas, 152 cases, 63 fatal. *Jowari* 62¼ and *bajri* 53⅛ pounds per rupee.
Dharwar	Mundargi, 1·12; Nargund, ·84; and slight rain in two talukas.	Ground being prepared for early crops. Sowing of rice commenced in Mugud and retarded in some places for want of rain. Scarcity of fodder in Nawalgund and of drinking-water in Gadag, Karajgi and Kod talukas. Public health generally good. Slight fever in Gadag and small-pox in Nawalgund. Rice 24 and *jowari* 56⅛ pounds per rupee.
Kanara	Honawar, ·46; Karwar, 2·44; Kumpta, 1·26.	Sowing continues in Honawar, Siddapur and Supa talukas. Slight fever in Sirsi and Haliyal. Common rice in Karwar and district average 13 seers per rupee.
Rajkot	*Nil*	Weather warm and cloudy. Measles in Dhrol, Dhrapha and Gadka. Small-pox in Dhrapha. Wheat 25, *bajri* 24 and *jowari* 30 pounds per rupee.
		General Remarks.—More or less rain in parts of thirteen districts. Lands being prepared for *kharif* cultivation everywhere, and early *kharif* sowings commenced in parts of five districts. Fever and cattle-disease in parts of ten, small-pox in parts of eight, and cholera in parts of four districts.
Bengal—(May 18th)		
Chittagong (May 17th)	3·14	Weather hot. Prospects of crops fair. Prices steady. Cholera continues.
Dacca	3·73	*Aman*, *aus* and jute being sown. Prospects good. Harvesting of *boro* rice nearly finished. Public health good.
24-Pergunnahs (Calcutta)	1·46	Sugarcane promises well. Ploughing in progress. Public health fair.
Khoolna	0·27	Weather very hot. Yield of *boro* rice fair. Ploughing and sowing of *aus* continue. Mango scarce. Public health good.
Moorshedabad	1·13	Weather very hot. *Aus* largely sown. Harvesting of *boro* still going on. Indigo thriving well. Public health good.
Pubna	0·34	Weather hot. Crops coming on well. Cholera abating. General health good.
Dinagepore	0·47	About 12 annas of jute and 10 annas of *bhadoi* sown. Cholera in three thanas and cattle-disease in two.
Rungpore	1·54	Cholera prevalent.
Midnapore	0·8	Ploughing just commenced. Public health good.
Burdwan	0·73	Intense heat. Prospects of crops good. Fever has appeared.
Bhagulpore	*Nil*	*Bhadoi* sowings begun. Rain wanted in north. Sugarcane doing well. Cholera spreading slightly.
Purneah	*Nil*	All crops doing well. Rain would do good. Early rice and jute sowings and sugarcane planting in progress. Rivers low. Public health fair.
Durbhanga	1·65	Early rice, *moong* and indigo greatly benefited by rain. Mango considerably injured by hail. Lands being prepared for *bhadoi* sowings. Cholera has abated.
Chumparun	0·07	Early rice, *moong* and *cheena* doing well. Sowing of *bhadoi* and *aghani* progressing in Balliah subdivision. Prices stationary. Cholera very prevalent in every part of the district.
Patna	*Nil*	Prospects of crops favourable. Cholera prevalent in different parts of the district.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Gya	*Nil*	Weather intensely hot. Sugarcane and *cheena* doing well. Cholera in all parts of the district, except Nowada subdivision, where fever and small-pox reported.
Hazareebagh	*Nil*	Weather very hot. Sugarcane doing well. Ploughing going on. General health good. Cholera and small-pox in some villages.
Cuttack	*Nil*	Weather extremely hot. Ploughing in progress. Sowing commenced in many places, but requires rain. Price of rice unchanged. Public health generally good.
		General Remarks.—Weather hot and sultry. Rain fell in all the Bengal districts, but in Behar scanty showers fell only in the districts north of the Ganges, and in Orissa and Chutia Nagpur the fall was also scanty. General prospects are favourable. Ploughing and sowing are in good progress, but more rain is wanted in parts of the Burdwan, Rajshayi, and Bhagulpore division, and in Cuttack *boro* rice harvest is still going on. General health has improved, but cholera is prevalent in several districts.
N.-W. Provinces and Oudh—(May 18th)		
Benares (May 17th)		Weather very hot. Markets well supplied and prices steady. Some cholera in the district, otherwise public health good.
Ballia („ 16th)		Weather clear. Heat increasing. *Rabi* harvest nearly over. Supplies ample. Public health good
Gorakhpore („ „)		Harvest garnered, outturn below average. Prices stationary. Epidemic cholera in one tahsil.
Fyzabad („ 17th)		Weather clear and hot. Wind chiefly from east. Markets well supplied. Sporadic cholera in three tahsils and small-pox in one.
Lucknow („ 16th)		Hot west winds since 13th. *Sawan* being cut. Sugarcane being watered. Supplies ample Prices almost stationary. Public health and condition of cattle good.
Rai Barelli („ „)		Intense heat. Westerly wind. Supplies abundant. Prices steady. Cholera continues. Some cases of cattle-disease reported from tahsil Rai Barelli.
Partabgarh („ 17th)		Prices steady. Cholera in epidemic form in district. Small-pox continues to be reported. Condition of cattle good.
Allahabad („ „)		Strong hot winds blowing. Sugarcane being irrigated. Markets full. Prices show a tendency to rise. Cholera has increased somewhat, otherwise health good.
Cawnpore („ „)		Weather seasonable. Indigo and sugarcane being irrigated. Extra crops in good condition. Prices stationary. Small-pox in one and fever in two tahsils. Cattle-disease in seven villages.
Farakhabad („ „)		Weather hot, but seasonable Threshing and winnowing continue. Sugarcane and indigo thriving. Supplies ample. Prices rising. Health fair.
Sitapur („ „)		Hot westerly winds prevail. Threshing floors for the most part cleared. Prices remain steady. Public health good.
Bareilly („ „)		Heat great. Prices still slightly rising. Health of men and cattle good.
Banda		No report received.
Kumaon (May 17th)		Weather dry and hot. High westerly winds occasionally. *Rabi* crops being harvested. *Kharif* operations in progress. Prices rising. Cholera in Kumaon and Bhabar. Cattle-disease continues.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 25th May, 1887.

Throughout India the general conditions prevailing have remained unchanged during the present week, but over the Bay the weather has undergone a gradual but steady change towards unsettled conditions.

Over India the barometer has been continuously high along the west coast of the Peninsula, while areas of relatively low pressure have occupied the Punjab and the east of the Central Provinces. As a consequence of the positions occupied by these two low pressure areas there has been formed a shoulder of relatively high pressure over Guzerat, Rajputana, and Central India, while, owing to the relation between the high pressure area in the west and the low pressure area over the Central Provinces, the isobars running over the Peninsula have preserved a steady north and south direction. This distribution of pressure has been accompanied with strongly marked north-westerly winds all over North-Western, Central, and Western India, which have occasioned high temperatures and low humidities throughout the whole of that region. For several days in the first part of the week many stations in North-Western India recorded humidities of less than 10 per cent.

The temperature has been considerably above the average over nearly the whole of Central and Northern India during the week, the greatest excess having been in the Punjab and North-West Provinces, but on most days the maximum temperature throughout India was recorded at Jacobabad, where 117° was registered on the 21st. Maximum temperatures of 112° and upwards have, however, been frequently recorded over Upper India during the week, the hottest places having apparently been Agra and Jhansi.

Over the Bay the weather began to show signs of disturbance on the 21st, when there occurred a rapid fall of the barometer at Diamond Island, accompanied with an increase in the force of the south-easterly wind at that station and general rain over Burma. On the 22nd, beyond apparently a slight northward movement of the storm, there was very little change in the weather over the Bay. The same may be said of the 23rd, except that a further increase of wind had occurred at Diamond Island and Akyab. On the 24th, though the storm had not apparently increased in intensity, its influence had enlarged, and there was a general cyclonic circulation of the wind around the upper part of the Bay. By the morning of the 25th a largish barometric fall had occurred on the Orissa and South-West Bengal coasts, and the centre of the storm was approaching those coasts. Rather heavy rain was falling around the head of the Bay, and the winds were increasing in force and the sea rising. It is with small cyclonic storms such as the above that the rains are usually ushered up the Gangetic plain; and though it is at present almost too early in the season to anticipate the regular rains, it is by no means improbable that the present disturbance will occasion rain to some considerable distance up the Gangetic plain and mitigate the heat over the greater part of Northern India.

In Ceylon there has been all the week a moderately strong south-westerly wind, accompanied with rain and an overcast sky; but there has been little or no extension of the south-westerly current towards the Travancore coast.

A

There has been hardly any rain in North-Western India, so that the seasonal deficiency, as the following table shows, has still further increased:

Stations.	Actual rainfall from 1st November, 1886, to 25th May, 1887.	Average rainfall from 1st November to 25th May.	Difference.
Multan	0·67	2·08	—1·41
Peshawar	2·48	7·69	—5·21
Murree	10·44	16·73	—6·29
Rawalpindi	5·00	11·58	—6·58
Lahore	0·76	4·11	—3·35
Simla	10·94	14·79	—3·85
Delhi	2·49	3·85	—1·36
Roorkee	4·06	6·52	—2·46
Meerut	2·76	4·49	—1·73
Bareilly	3·66	4·08	—0·42
Agra	1·13	2·03	—0·90
Lucknow	1·40	2·32	—0·92
Allahabad	4·58	2·20	+2·38
Darjeeling	12·81	14·09	—1·28
Calcutta	8·64	10·04	—1·40

The final table shows that pressure has been below the average of the month in all districts, except Mysore and along the west coast of the Peninsula, where there has been a trifling excess. Temperature has been much above the monthly average over Northern India and slightly above in the Central districts; but in both Peninsulas it has been deficient. The humidity has been very low in Northern India.

Districts.	Difference of Barometer from mean, May 19th to May 25th.	Difference of Temperature from mean, May 19th to May 25th.	Difference of Humidity from mean, May 19th to May 25th.	Total Rainfall in week, May 19th to May 25th.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 26th MAY, 1887.

GENERAL REMARKS.—Slight rain has fallen in parts of Madras, Mysore, Bengal, and Assam, and showers are reported from a few places in Bombay, the Punjab, and the Central Provinces.

No report has been received from Burma for the week under notice.

Kharif operations are in active progress throughout Bombay, the Central Provinces, and Berar, and have commenced in some districts in the North-West Provinces and Oudh and the Punjab. Sowings have begun in parts of Bombay and the Punjab.

Agricultural prospects in Madras and Mysore and Coorg continue satisfactory.

The early rice is coming up well in Bengal and Assam, but rain is generally wanted in the former Province.

Sugarcane is under cultivation in Bengal, Assam, the North-West Provinces and Oudh, the Central Provinces, and Rajputana.

Indigo in Bengal needs rain; in the North-West Provinces and Oudh the crop is being irrigated.

Cholera has diminished in Bengal, but is prevalent in a sporadic type in several districts of the North-West Provinces and Oudh. Elsewhere the public health is generally good.

Cattle-disease is increasing in Madras and prevails in Bombay.

Prices are rising in three districts of the Punjab, and have slightly risen in Mysore and Coorg. Elsewhere they are steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(May 25th)		
Bellary . . .	. . . .	Standing crops generally good. Harvest paddy and sugarcane, yield about average. Cholera increasing in two and cattle-disease also increasing in five taluks.
Kurnool . .	. . . .	Harvest second crop paddy, yield below average. Small-pox in four and cattle-disease decreasing in six taluks.
Ganjam . . .	Average ·11	Small-pox in four and fever in seven divisions. Cholera and cattle-disease increasing.
Kistna . . .	Average ·07	Standing crops good. Slight fever in three and cattle-disease increasing in five taluks.
Chingleput (Madras) .	Average ·01	Standing crops fair, but withered to some extent for want of rain. Harvest paddy and *ragi*, outturn below average. Small-pox in one and cattle-disease decreasing in three taluks.
Coimbatore . . .	Average 1·39	Standing crops good. Harvest paddy, outturn above average. Fever in one, small-pox in two, and cattle-disease in one taluk.

REVENUE REPORT OF IRRIGATION WORKS IN RAJPUTANA FOR THE YEAR 1885-86.

No. 83-I., dated Simla, the 19th May 1887.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Letter No. 333 S., dated 18th February 1887, from the Secretary to the Agent to the Governor-General and Chief Commissioner, Rajputana, and its enclosures, the Revenue Report, and the memorandum thereon by the Chief Commissioner.

OBSERVATIONS.—The Rajputana Irrigation Works, which consist entirely of large and small tanks, are classed for purposes of account under the head of Minor Works and Navigation for which Capital and Revenue Accounts are kept. Under recent orders from the Government of India, the works in each Sub-Collectorate have been formed into a separate group and are so treated in the Examiner's figured statements and in the Chief Commissioner's memorandum, but not in the Settlement Officer's report.

2. The direct and indirect expenditure on the Irrigation Works in Rajputana up to the close of the year under review amounted to ₹15,46,365. The revenue by actual receipts was ₹1,23,139 and by assessments, including ₹4,005 not brought to book during the year under review, ₹1,25,198; the working expenses amounted to ₹35,644 and the net revenue was therefore by collections ₹87,495, and by assessments ₹89,554, giving percentages of profit on capital outlay of 5·66 and 5·80 respectively.

3. There was a decrease of ₹2,594 in the outlay on maintenance whilst the area irrigated is given as 34,737 acres, an increase of 2,606 acres over that recorded in the previous year.

4. The estimated value of the crops dependent on irrigation was ₹5,71,811, which is more than five times the water revenue assessed upon them.

5. The rainfall for the year compares unfavourably with that of 1884-85. In 1885-86, 18·41 inches were recorded at selected stations in Ajmere and 19·32 inches in Merwara, the corresponding figures for the previous year being 24·37 and 28·57 inches respectively. This deficiency of rainfall will probably diminish the supply available for the rabi of 1886-87, and a falling off in the area may be anticipated.

6. The improvement that has taken place in the financial results of the Irrigation Works in Rajputana during the last two years is partly due to the increased credits that have been given to water revenue under the new settlement, which came into force in the year 1884-85, but mainly due to improvements in administration, to careful distribution of water, and to economy in maintenance.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Agent, Governor-General, and Chief Commissioner, Rajputana, for information and guidance.

Also, that a copy of the Resolution and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department, for information.

Also, that a copy of the Resolution and of the Report be forwarded to the Revenue and Agricultural Department and to the Department of Finance and Commerce for information.

Also, that the Resolution and the memorandum by the Agent, Governor-General, together with the statement of general financial results compiled by the Examiner of Public Works Accounts, be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of this Resolution and of the Report be forwarded to Her Majesty's Secretary of State for India for information.

R. HOME, *Colonel, R.E.*,
Deputy Secretary to the Government of India.

Memorandum by SIR EDWARD BRADFORD, *K.C.S.I., Chief Commissioner of Ajmere and Merwara, on the Revenue Report on the Irrigation Works of Ajmere and Merwara, for the official year 1885-86,—dated Camp Ajmere, 18th February 1887.*

FINANCIAL RESULTS.

General Remarks.—The Government of India, in the Public Works Department, having in their letter No. 79A.—I. of 4th November 1885, decided to abolish the distinction hitherto maintained between the "Old" and "New" tanks, and having directed that in future all the tanks in each Sub-Collectorate should be dealt with under one head, this system has been brought into operation with effect from the year under report, and the transactions for the year accordingly exhibit the tanks under the three groups of Ajmere, Beawar, and Todgurh Sub-Collectorates only.

2. *Capital Outlay.*—On the commencement of the year 1885-86, this account stood at ₹15,45,174, as detailed below :—

	₹
1. Ajmere Sub-Collectorate	8,32,880
2. Beawar ,,	5,99,798
3. Todgurh ,,	1,12,496
	15,45,174

The expenditure during the year was ₹1,191, being merely the result of an increase in the suspense balances charged to Makrera tank in the Ajmere Sub-Collectorate. No other Capital expenditure was incurred during the year. This outlay of ₹1,191 raised the total Capital outlay at the end of the year 1885-86 to ₹15,46,365, inclusive of the indirect charges amounting to ₹58,923, as follows :—

	₹
I.—Capitalization of Land Revenue	19,992
II.—Loss by Exchange	167
III.—Leave and Pension Allowances	38,764
	58,923

3. The total Capital outlay of ₹15,46,365 to end of 1885-86 has been distributed in the table given below, on each group of tanks and on each project of tank :—

Names of Groups and Projects of Tanks.		Capital outlay, inclusive of indirect charges.		
		To end of 1884-85.	During 1885-86.	To end of 1885-86.
		₹	₹	₹
Ajmere Sub-Collectorate	Old and small new tanks	4,28,140	...	4,28,140
	Bheer tank	2,11,336	...	2,11,336
	Ladpura ,,	62,134	...	62,134
	Makrera ,,	91,230	1,191	92,421
	Rajaosi ,,	40,040	...	40,040
	TOTAL	8,32,880	1,191	8,34,071
Beawar Sub-Collectorate	Old and small new tanks	1,73,247	...	1,73,247
	Balad tank	1,03,080	...	1,03,080
	Jalia ,,	2,97,918	...	2,97,918
	Chitar ,,	25,553	...	25,553
	TOTAL	5,99,798	...	5,99,798
Todgurh Sub-Collectorate	Old and small new tanks	1,12,496	...	1,12,496
	GRAND TOTAL	15,45,174	1,191	15,46,365

4. The number of tanks assessed with water rates was 366, the same as reported for the previous year, 1884-85.

5. The gross working expenses of the year were ₹35,644 or ₹2,594 less than in the year preceding it—the percentage of less expenditure being 6·78.

6. The total assessment of the year was ₹1,21,193 and the collections (including previous balances and ₹704 realized by the Public Works Department) amounted to ₹1,27,144, *viz.* :—

	₹
Ajmere	54,787
Merwara	72,357
	1,27,144

The Examiner of Public Works Accounts, Rajputana, in his General Statement No. 1 shows the total receipts during the year at ₹1,23,139, leaving a difference of ₹4,005 to be accounted for. This difference is explained below :—

	₹
1. On account of the difference between dry and wet rates of Merwara, omitted by mistake from the statement submitted by the Commissioner of Ajmere and Merwara to the Examiner of Public Works Accounts, Rajputana	3,890
2. Amount excluded by the Examiner of Public Works Accounts, Rajputana, from under the head "Indirect" which was credited to "Direct" after close of the financial year	115
	4,005

The omission of the sum of ₹3,890, on being brought to the notice of the Examiner, formed the subject of a reference from him to the Accountant General, Public Works Department, and it has been decided by the latter officer to carry out the necessary adjustment in the accounts of the Public Works Department during the current year 1886-87.

7. After deducting the working charges, *viz.*, ₹35,644, from the actual revenue realizations of ₹1,27,144 of the year, the net receipts obtained during the year from the Irrigation Works was ₹91,500.

These figures no doubt represent better results and give a more favourable comparison than those of the preceding years as given in the table at paragraph 7 of the Chief Commissioner's memo. on the Revenue Report for 1884-85.

8. The remissions amounted to ₹483. The balance outstanding at the close of the year was ₹281. The rabi harvest assessment, which did not fall due till June 1886, amounted to ₹37,182.

9. The total area assessed was 34,737 acres, being 2,606 acres more than in the year previous. The increase is due to a sufficiency of water after the spring crop of 1885 for extensive cotton sowings.

10. The rainfall of the year in the whole district averaged 18·41 inches in Ajmere and 19·30 in Merwara. A break in August rendered irrigation necessary from our tanks, and this also is a cause for the increase in the area assessed.

11. The double cropped area was 4,901 acres, showing a decrease of 4,171 acres as compared with the preceding year.

12. The total estimated value of crops dependent on the Irrigation Works was ₹5,71,811, and the percentage of water revenue on the value of crops was 21·19, or under one-fifth of the gross produce.

13. The prescribed comparative statement of the rainfall registered at the principal centres of irrigation in Ajmere and Merwara is appended hereto.

14. In conclusion, the reasons which have led to the exclusion of the different statistical statements prescribed by the Government of India to accompany the Revenue Reports of Irrigation Works, in their Public Works Department letter No. 167 I. of 11th July 1885, may be briefly noticed. In that letter the Government of India, whilst suggesting the adoption of these uniform statements, state that, although these forms "are not obligatory in Rajputana in their entirety, they should be used so far as they are applicable to the Irrigation Works of the Province."

These statements consist of 13 forms in number, and the Commissioner of Ajmere and Merwara was consulted as to the suitability of these statements for Ajmere and Merwara. After some correspondence and a reference to the Settlement Officer, it has been decided to omit these statements from the Revenue Reports on Irrigation Works in Ajmere and Merwara, the reasons which have led to this decision being that (I) most of the forms being intended for canals and for the larger systems of Irrigation Works, and as such, pertaining more to other provinces than to these districts, are not applicable to the latter; (II) that some of the forms, though likely to afford useful information, were that information available in these districts in the form required, could not be made use of in consequence of the different mode of accounting and of the different system prevailing in these districts in collecting the information, which therefore is not of the nature intended to be given in these statements; and that (III) it is considered that the statements, as at present furnished by the Examiner of Public Works Accounts, Rajputana, contain all the information that is required. The Chief Commissioner trusts that in arriving at this decision, he has not in any way materially lessened the value of these Irrigation Revenue Reports.

Statement showing the Rainfall registered by the Public Works Department in Ajmere and Merwara, from 1st April 1885 to 31st March 1886, to accompany the Chief Commissioner's review of the Irrigation Revenue Report for 1885-86.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE NORTH-WESTERN PROVINCES FOR 1885-86.

No. 891., Simla, May 25, 1887.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Letter from the Secretary to the Government of the North-Western Provinces and Oudh, No. 266I., dated 21st February 1887, and enclosures, being the Revenue Report of Irrigation Works in the North-Western Provinces for 1885-86 and a Resolution by His Honour the Lieutenant-Governor reviewing the Report.

OBSERVATIONS.—The Report on the canals in the North-Western Provinces for the year 1885-86 records an increase both in the area irrigated and in net revenue over the previous year, but owing to favourable and well-distributed rainfall, the returns are still below the average of the years immediately preceding.

2. The principal figures for the year under review are—total capital outlay ₹7,51,49,595, assessed revenue ₹60,33,016, working expenses ₹24,88,393; and net revenue ₹35,44,623, giving a return of 4·72 per cent. on the total capital invested. The area irrigated was 1,709,676 acres, of which 1,007,417 acres were watered for the spring crop. At the close of the year the net revenue had exceeded the interest charges by ₹4,78,345.

3. Details of the above results and a comparison with those of previous years will be found in the review of the year's operations by his Honour the Lieutenant-Governor of the North-Western Provinces, a copy of which is appended to this Resolution.

4. Careful records are now kept of the variation of spring level in the tracts through which the various canals pass, and as might have been expected from the unprecedented rainfall that occurred in July 1885, the diagrams show a considerable rise during the present year. There is no doubt that, with the complete system of drainage that now exists, the springs will, as has been the case in previous years, soon regain their normal level. The record for this year shows, if any doubt still remained on the subject, that the variation in spring level is dependent on the rainfall, and is little, if at all, affected by irrigation in tracts where the natural drainages are not obstructed.

5. Three successive days of heavy rain in the Bulandshahr, Aligarh, and Etah districts completed the destruction of the Nadrai aqueduct which carried the Lower Ganges Canal over the Kali Nadi. The flood in the Nadi was entirely unprecedented, and the aqueduct, which had been severely strained and partly destroyed by the much smaller flood of the previous year, was completely carried away on the 17th July 1885. The irrigation of the Lower Ganges Canal has since the accident been satisfactorily served from the Upper Canal, except in the case of the Bewar Branch, which has been closed.

6. The opening of the Betwa Canal on the 24th September 1885 is noticed in paragraph 21 of the Review by the Lieutenant-Governor. The Government of India congratulates His Honour the Lieutenant-Governor on the completion of this important work, and endorses his encomium on the industry, experience and talent brought to bear by the officers who have been connected with the design and construction of the Canal.

7. The skill and ability displayed by Colonel J. G. Forbes and the officers under his control in the management of the important system of irrigation in the North-Western Provinces is fully recognised by the Supreme Government.
