3. गृह-मंत्रालय की अधिसूचना सं० 31/4/67-स्था० (ख) दिनांक 17 जून 1967 के उपबंधों के अनुसार उम्मीदवार परीक्षा की योजना में निर्धारित किसी एक या एक से अधिक सेवाओं के लिए परीक्षा में बैठने के लिए आवेदन कर सकता है। यदि वे उपर्युक्त अधिसूचना में दी गई पात्रता की शर्तों को पूरा करते हों, तो वे अपने आवेदन-पत्रों में उन सेवाओं का स्पष्ट उल्लेख करें जिन के लिए वे परीक्षा में बैठना चाहते हैं। उम्मीदवारों को चेतावनी दी जाती है कि एक बार आवेदन-पत्र भेजे जाने के बाद उम्मीदवार द्वारा उल्लिखित सेवाओं की सूची में सामान्यतः कोई अन्य नाम बढ़ाने की अनुमति नहीं दी जाएगी।

ध्यान दें : I—उम्मीदवारों को अपने आवेदन-पत्रों में यह स्पष्ट रूप से बतलाना होगा कि जिन सेवाओं के लिए वे परीक्षा में बैठना चाहते हैं, उनका अधिमान क्रम क्या है। उन्हें सलाह दी जाती है कि वे अपनी इच्छानुसार एक से अधिक अधिमानों का उल्लेख करें ताकि योग्यता-क्रम में उनके स्थान को ध्यान में रखते हुए, नियुक्ति करते समय उनके अधिमानों पर भली भांति विचार किया जा सके।

II—आवेदन-पत्र में उम्मीदवार द्वारा आरंभ में उल्लिखित सेवाओं के अधिमान-क्रम में परिवर्तन करने या अन्य नाम बढ़ाने के लिए किसी भी अनुरोध पर तब तक विचार नहीं किया जाएगा जब तक कि ऐसा करने का अनुरोध 31 दिसंबर 1967 को या इससे पूर्व संघ लोक सेवा आयोग के कार्यालय में न प्राप्त हो जाए।

4. परीक्षा में प्रवेश चाहने वाले उम्मीदवार को निर्धारित आवेदन-प्रपत्र पर सीधे अपनी यूनिट के अफसर कमांडिंग को आवेदन करना चाहिए, जो आवेदन-प्रपत्र के अंत में दिए गए पृष्ठांकन को पूरा करके सचिव, संघ लोक सेवा आयोग, धौलपुर हाउस, नई दिल्ली-11, को अग्रेषित कर देगा।

5. निर्धारित आवेदन-प्रपत्र तथा परीक्षा संबंधी पूर्ण विवरण एक रुपया भेज कर आयोग से डाक द्वारा प्राप्त किए जा सकते हैं। यह राशि सचिव, संघ लोक सेवा आयोग, धौलपुर हाउस, नई दिल्ली-11, को मनीआर्डर द्वारा भेजी जानी चाहिए और मनीआर्डर कूपन पर उस परीक्षा का नाम, जिसके लिए आवेदन-प्रपत्र मांगा जा रहा है, स्पष्ट रूप से लिखा होना चाहिए। मनीआर्डर के स्थान पर पोस्टल आर्डर या चेक या करेंसी नोट स्वीकार नहीं किए जाएंगे। ये आवेदन-प्रपत्र आयोग के काउंटर पर नकद भुगतान द्वारा भी प्राप्त

किए जा सकते हैं। **एक रुपए की यह राशि किसी भी हालत में वापस नहीं की जाएगी।**

आवेदन-प्रपत्र तथा सम्बद्ध पत्र आदि निम्नलिखित सेवा मुख्यालयों से भी निःशुल्क प्राप्त किए जा सकते हैं :—

(1) कमान मुख्यालय,

(2) कोर मुख्यालय,

(3) डिवीजन मुख्यालय,

(4) एरिया मुख्यालय,

(5) सब-एरिया मुख्यालय।

6. **भरा हुआ आवेदन-पत्र सचिव, संघ लोक सेवा आयोग,** धौलपुर हाउस, नई दिल्ली-11 के पास 17 जुलाई 1967 को या उसके पूर्व उपाबंध में उम्मीदवारों को दी गई हिदायतों के अनुसार आवश्यक प्रमाण-पत्र आदि के साथ **अवश्य** पहुंच जाना चाहिए। **उस तारीख के बाद मिलने वाले किसी भी आवेदन-पत्र पर विचार नहीं किया जाएगा।**

किन्तु विदेशों में/समुद्रपार रहने वाले उम्मीदवारों के आवेदन-पत्र **31 जुलाई,** 1967 तक लिए जाएंगे। (यह उन्हीं व्यक्तियों पर लागू होगा जो आवेदन-पत्र भेजते समय वास्तव में विदेश में/समुद्रपार रह रहे हों।)

नोट :—आवेदन-प्रपत्र की मांग अथवा आवेदन-पत्र देर से भेजने वाले उम्मीदवार अपने दायित्व पर ही ऐसा करेंगे।

7. आवेदन-पत्र से सम्बंधित सभी पत्र आदि सचिव, संघ लोक सेवा आयोग, धौलपुर हाउस, नई दिल्ली-11 को भेजे जाएं और उनमें निम्नलिखित ब्यौरा दिया जाए :—

(1) **परीक्षा का नाम**

(2) **परीक्षा का महीना और वर्ष**

(3) **रोल नंबर (यदि उम्मीदवार की सूचित किया गया हो)**

(4) **उम्मीदवार का नाम (बड़े अक्षरों में)**

(5) **आवेदन-पत्र में दिया गया पत्र-व्यवहार का पता।**

जिन पत्रों आदि में यह ब्योरा नहीं होगा, संभवतः उन पर ध्यान नहीं दिया जाएगा। संघ लोक सेवा आयोग को इस परीक्षा के विषय में लिखे जाने वाले प्रत्येक पत्र और उसके लिफाफे पर उम्मीदवारों को सबसे ऊपर अनिवार्यतः **"भारतीय प्रशासन सेवा आदि (निर्मुक्त आपात कालीन आयुक्त/अल्पकालीन सेवा आयुक्त अधिकारी) परीक्षा, 1967"** लिख देना चाहिये।

राजेन्द्रलाल, सचिव
संघ लोक सेवा आयोग

उपाबंध

उम्मीदवारों को हिदायतें

1. इस नोटिस के पैरा 5 के अनुसार इस परीक्षा से संबंधित नोटिस, नियमावली, आवेदन-प्रपत्र और अन्य विवरण संघ लोक सेवा आयोग के कार्यालय तथा अन्य प्राधिकरणों से प्राप्त किए जा सकते हैं। **उम्मीदवारों को चाहिए कि वे आवेदन-प्रपत्र भरने से पहले उन्हें ध्यान से पढ़ कर देख लें कि वे परीक्षा में बैठने के योग्य हैं या नहीं। निर्धारित शर्तों में छूट नहीं दी जा सकती है।**

आवेदन-पत्र भेजने से पहले उम्मीदवार को नोटिस के पैरा 1 में दिये गए केन्द्रों में से किसी एक को, जहां वह परीक्षा देने का इच्छुक है, अन्तिम रूप से चुन लेना चाहिए। सामान्यतः चुने हुए स्थान में परिवर्तन से संबधित किसी अनुरोध पर विचार नहीं किया जाएगा।

2. उम्मीदवार को आवेदन-प्रपत्र अपने हाथ से भरना चाहिए और सभी प्रश्नों के उत्तर शब्दों में देने चाहिए। सशस्त्र सेना में कार्य करने वाले उम्मीदवार को अपना आवेदन-पत्र सीधे अपनी यूनिट के अफसर कमांडिंग को भेजना चाहिए जो आवेदन-प्रपत्र के अंत में दिए गए प्रमाण-पत्र को पूरा करके सचिव, संघ लोक सेवा आयोग, धौलपुर हाउस, नई दिल्ली-11 को अग्रेषित कर देगा।

जो उम्मीदवार सरकारी सिविल नौकरी में हो उसे अपना आवेदन-पत्र संबंधित विभाग या कार्यालय के अध्यक्ष की मार्फ़त भेजना चाहिए जो आवेदन-पत्र के अन्त में दिए गए पृष्ठांकन को पूरा करके आयोग को भेज देगा।

गैर-सरकारी नौकरी में लगे या सरकारी औद्योगिक संगठनों या इसी प्रकार के अन्य संगठनों में काम करने वाले दूसरे सभी उम्मीदवारों के आवेदन-पत्र सीधे लिए जा सकते हैं। यदि कोई ऐसा उम्मीदवार अपना आवेदन-पत्र अपने नियोक्ता की मार्फ़त भेजता है और वह संघ लोक सेवा आयोग में देर से पहुंचता है तो उस पर विचार नहीं किया जाएगा, भले ही वह नियोक्ता को अंतिम तारीख से पहले प्रस्तुत किया गया हो।

नोटिस में निर्धारित तारीख के बाद आयोग को प्राप्त होने वाला कोई भी आवेदन-पत्र स्वीकार नहीं किया जाएगा।

3. (क) सशस्त्र सेना से पहले ही निर्मुक्त किए गए उम्मीदवार को अपने आवेदन-पत्र के साथ सेना/वायुसेना/नौ सेना मुख्यालय से इस आशय का एक प्रमाण-पत्र लेकर मूल रूप में, (उसकी एक प्रतिलिपि सहित) भेजना चाहिए कि वह सशस्त्र सेना में 1 नवंबर, 1962 के बाद कमीशन प्राप्त आपातकालीन आयुक्त/अल्पकालीन सेवा आयुक्त अधिकारी है और निर्धारित कार्यक्रम के अनुसार (आपातकालीन आयुक्त अधिकारी के मामले में)/अपने सेवा-काल की समाप्ति पर (अल्पकालीन सेवा सेवा आयुक्त अधिकारी के मामले में) निर्मुक्त हुआ है। प्रमाण-पत्र में सशस्त्र सेना से निर्मुक्त किए जाने की वास्तविक तारीख अवश्य लिखी होनी चाहिए।

(ख) सशस्त्र सेना से विकलांगता के कारण निर्मुक्त हुए उम्मीदवार को अपने आवेदन-पत्र के साथ सेना/वायुसेना/नौसेना मुख्यालय से इस आशय का एक प्रमाण-पत्र लेकर, मूल रूप में (उसकी एक प्रतिलिपि सहित) भेजना चाहिए कि वह सशस्त्र सेना में 1 नवंबर, 1962 के बाद कमीशन-प्राप्त आपातकालीन आयुक्त/अल्पकालीन सेवा आयुक्त अधिकारी है और वह सैन्य सेवा के कारण हुई या बढ़ गई विकलांगता के फलस्वरूप निर्मुक्त हुआ है। प्रमाण-पत्र में (1) सशस्त्र सेना से निर्मुक्त किए जाने की वास्तविक तारीख तथा (2) यदि वह विकलांगता के कारण सेवा मुक्त न हुआ होता हो, वह तारीख जिसको वह निर्धारित कार्यक्रम के अनुसार (आपातकालीन आयुक्त अधिकारी के मामले में)/अपने सेवा-काल की समाप्ति पर (अल्पकालीन सेवा आयुक्त अधिकारी के मामले में) निर्मुक्त हुआ होता, लिखी होनी चाहिए।

नोट :—यदि ऐसा उम्मीदवार 'ए० एम० सी०, ए० एम० सी० (गैर-तकनीकी), ए० डी० सी० या एम० एन० एस० का अधिकारी था तो उसे डी० जी०, ए० एफ०, एम० एस० से अपेक्षित प्रमाण-पत्र लेकर प्रस्तुत करना चाहिए।

4. उम्मीदवारों को चेतावनी दी जाती है कि वे आवेदन-प्रपत्र भरते समय कोई भी झूठा ब्यौरा न दें और न ही किसी तथ्य को छिपाएं।

5. उम्मीदवार को अपने आवेदन-पत्र के साथ ऊपर पैरा 2 और 3 में उल्लिखित प्रमाण-पत्रों के अतिरिक्त नीचे लिखे प्रमाण-पत्र आदि अवश्य भेजने चाहिए :—

(1) आयु का प्रमाण-पत्र

(2) शैक्षणिक योग्यता का प्रमाण-पत्र

(3) उम्मीदवार के हाल ही के पासपोर्ट-आकार (लगभग 5 सें० मी० × 7 सें० मी०) के फ़ोटो की दो प्रतियां।

ऊपर की मद (1), (2) और (3) में दिए गए प्रमाण-पत्र आदि का ब्यौरा इस प्रकार है :—

(1) **आयु का प्रमाण-पत्र** :—आयोग सामान्यतः जन्म की वह तारीख़ स्वीकार करता है जो मैट्रिकुलेशन के प्रमाण-पत्र या माध्यमिक विद्यालय छोड़ने के प्रमाण-पत्र (सैकण्डरी स्कूल लीविंग सर्टिफ़िकेट) या किसी भारतीय विश्वविद्यालय द्वारा मैट्रिकुलेशन के समकक्ष माने गए प्रमाण-पत्र या विश्वविद्यालय के समुचित प्राधिकारी द्वारा प्रमाणित विश्वविद्यालय के मैट्रिक-पास छात्रों के रजिस्ट्रर के उद्धरण (एक्सट्रैक्ट) में दर्ज की गई हो। हिदायतों के इस भाग में आए 'मैट्रिकुलेशन प्रमाण-पत्र' के अंतर्गत इन सभी वैकल्पिक प्रमाण-पत्रों को सम्मिलित समझा जाए।

इस प्रकार उम्मीदवारों को अच्छी तरह समझ लेना चाहिए कि आयु के प्रमाण के रूप में मैट्रिकुलेशन का प्रमाण-पत्र हर हालत में भेजना आवश्यक है और आवेदन-पत्र के साथ आयोग को अनिवार्यतः उसकी मूल प्रति, एक प्रतिलिपि के साथ, भेजी जानी चाहिए।

कभी-कभी मैट्रिकुलेशन या उसके समकक्ष प्रमाण-पत्र में जन्म की तारीख़ नहीं होती या आयु के केवल पूरे वर्ष या पूरे वर्ष और महीने ही दिए होते हैं। ऐसे मामलों में उम्मीदवार को मैट्रिकुलेशन या उसके समकक्ष प्रमाण-पत्र के अतिरिक्त उस संस्था के हैडमास्टर/प्रिंसिपल से लिए गए प्रमाण-पत्र की मूल प्रति, उसकी एक प्रतिलिपि के साथ, भेजनी चाहिए जहां से उसने मैट्रिकुलेशन या उसके समकक्ष परीक्षा उत्तीर्ण की हो। इस प्रमाण-पत्र में उसकी जन्म की तारीख़ या उस संस्था के दाखिला रजिस्टर में दर्ज की गई वास्तविक आयु लिखी होनी चाहिए।

उम्मीदवारों को चेतावनी दी जाती है कि यदि आवेदन-पत्र के साथ इन हिदायतों में निर्धारित आयु का पूरा प्रमाण नहीं भेजा गया तो उनका आवेदन-पत्र अस्वीकार किया जा सकता है। उन्हें यह भी चेतावनी दी जाती है कि यदि आवेदन-पत्र में लिखी जन्म की तारीख़ मैट्रिकुलेशन प्रमाण-पत्र में दी गई आयु से भिन्न हो और इसके लिए कोई कारण न दिया गया हो तो आवेदन-पत्र अस्वीकार किया जा सकता है।

नोट 1 :—जिस उम्मीदवार के पास पढ़ाई पूरी करके माध्यमिक विद्यालय छोड़ने का प्रमाण-पत्र (कम्प्लीटेड सैकण्डरी स्कूल लीविंग सर्टिफ़िकेट) हो, उसे इस प्रमाण-पत्र की मूल प्रति के साथ केवल आयु संबंधी प्रविष्टि वाले पृष्ठ की प्रतिलिपि भेजनी चाहिए।

नोट 2 :—उम्मीदवारों को ध्यान रखना चाहिए कि किसी परीक्षा में प्रवेश के लिए जन्म की तारीख़ एक बार लिख भेजने और आयोग द्वारा उसके स्वीकृत हो जाने के बाद किसी अगली परीक्षा में उसमें कोई परिवर्तन करने की अनुमति सामान्यतः नहीं दी जाएगी।

नोट 3 :—जिन विस्थापित लोगों के मैट्रिकुलेशन के प्रमाण-पत्र की मूल प्रति पाकिस्तान में खो गई हो, उन्हें संबंधित विश्वविद्यालय से उसकी नकल मंगवा लेनी चाहिए। यदि वे संबंधित विश्वविद्यालय से मैट्रिकुलेशन के प्रमाण-पत्र की नकल न मंगवा सकते हों तो उन्हें विश्वविद्यालय के उस गजट का उद्धरण भेजना चाहिए जिसमें उनके परीक्षा परिणाम प्रकाशित हुए हों। इस उद्धरण में जन्म की तारीख़ लिखी होनी चाहिए और यह रजिस्ट्रार या हेडमास्टर द्वारा प्रमाणित होनी चाहिए।

(ii) **शैक्षणिक योगता का प्रमाण-पत्र**—उम्मीदवार को अपने मूल प्रमाण-पत्र या डिप्लोमा को उसकी एक प्रतिलिपि के साथ भेजना चाहिए ताकि इस बात का प्रमाण मिल सके कि नियम 9 में निर्धारित योग्यताओं में से कोई एक योग्यता उसके पास है। भेजा गया प्रमाण-पत्र उस प्राधिकारी (अर्थात् विश्वविद्यालय या किसी अन्य परीक्षा-निकाय) का होना चाहिए जिसने उसे उस योग्यता विशेष का प्रमाण-पत्र दिया हो। यदि ऐसा प्रमाण-पत्र या डिप्लोमा न भेजा जाए तो उम्मीदवार को उसे न भेजने का कारण बताना चाहिए और अपेक्षित योग्यता के अपने दावे के प्रमाण में किसी अन्य प्रमाण-पत्र की मूल प्रति भेजनी चाहिए। आयोग इस दावे के औचित्य पर विचार करेगा, किन्तु वह उसे पर्याप्त मानने के लिए बाध्य नहीं होगा।

नोट :—यदि कोई उम्मीदवार ऐसी परीक्षा में बैठ चुका हो जिसे उत्तीर्ण कर लेने पर वह इस परीक्षा में बैठ सकता है पर अभी उसे परीक्षा के परिणाम की सूचना न मिली हो तो ऐसी स्थिति में वह इस परीक्षा के प्रवेश पाने के लिए आवेदन कर सकता है। जो उम्मीदवार इस प्रकार की अर्हक परीक्षा (क्वालिफ़ाइंग एक्जामिनेशन) में बैठना चाहता हो वह भी आवेदन कर सकता है, बशर्ते कि वह अर्हक परीक्षा इस परीक्षा के प्रारंभ होने से पहले समाप्त हो जाए। यदि ऐसे उम्मीदवार अन्य शर्तें पूरी करते हों तो उन्हें परीक्षा में बैठने दिया जाएगा। परंतु परीक्षा में बैठने की यह अनुमति अनंतिम मानी जाएगी और यदि वे अर्हक परीक्षा में उत्तीर्ण होने का प्रमाण जल्दी-से-जल्दी, और हर हालत में इस परीक्षा के प्रारंभ होने की तारीख़ से अधिक-से-अधिक दो महीने के भीतर प्रस्तुत नहीं करते तो यह अनुमति रद्द की जा सकती है।

(iii) **फोटो की दो प्रतियां** :—उम्मीदवार को अपने हाल ही के पासपोर्ट आकार (लगभग 5 सें० मी० × 7 सें० मी०) के फ़ोटो की दो प्रतियां भेजनी चाहिए। इनमें से एक तो आवेदन-पत्र के पहले पृष्ठ पर चिपका देनी चाहिए और दूसरी आवेदन-पत्र के साथ अच्छी तरह नत्थी कर देनी चाहिए। फ़ोटो की प्रत्येक प्रति के ऊपर उम्मीदवार को स्याही से हस्ताक्षर करने चाहिए।

6. उम्मीदवारों को चेतावनी दी जाती है कि यदि आवेदन-पत्र अधूरा या ग़लत भरा हुआ होगा या उसके साथ ऊपर पैरा 3 और 5 में लिखे प्रमाण-पत्र आदि में से कोई एक न लगा होगा तो यह आवेदन-पत्र अस्वीकार किया जा सकता है और इस अस्वीकृति के विरुद्ध कोई अपील नहीं सुनी जाएगी। यदि किन्हीं कारणों से कोई उम्मीदवार विवशतावश ऊपर पैरा 3 और 5 में लिखे किसी प्रमाण-पत्र को आवेदन-पत्र के साथ न भेज सके तो उसे अपना आवेदन-पत्र भेजते समय उन कारणों का स्पष्ट उल्लेख करना चाहिए। आयोग उनके औचित्य पर विचार करेगा। उसे शेष प्रमाण-पत्र अपना आवेदन-पत्र भेजने के तुरंत बाद भेज देने चाहिएं और उन्हें हर हालत में आवेदन-पत्र पहुंचने की निर्धारित अंतिम तारीख से एक महीने के भीतर आयोग के कार्यालय में पहुंच जाना चाहिए। उसे किसी भी हालत में आवेदन-पत्र भेजने में देरी नहीं करनी चाहिए और वह नोटिस के पैरा 6 में उल्लिखित तारीख से पहले आयोग के कार्यालय में अवश्य पहुंच जाना चाहिए।

उम्मीदवारों को यह भी चेतावनी दी जाती है कि जो भी प्रमाण-पत्र आदि वे प्रस्तुत करें, उनकी किसी भी प्रविष्टि में वे कभी भी कोई शुद्धि या परिवर्तन न करें, न उनमें किसी अन्य प्रकार का फेर-बदल करें, और न ही फेर-बदल किए गए प्रमाण-पत्र आदि प्रस्तुत करें। यदि ऐसे दो या अधिक प्रमाण-पत्रों आदि में कोई अशुद्धि या असंगति हो तो उस असंगति के बारे में अलग से स्पष्टीकरण देना चाहिए।

7. यदि कोई उम्मीदवार किसी अनुसूचित जाति या अनुसूचित आदिमजाति का होने का दावा करे तो उसे अपने दावे के समर्थन में उस ज़िले के, जिसमें उसके माता-पिता (या जीवित माता या पिता) आमतौर से रहते हों, ज़िला अधिकारी या उप-मण्डल अधिकारी (सब-डिवीज़नल आफिसर) या किसी अन्य ऐसे अधिकारी से, जिसे संबंधित राज्य सरकार ने यह प्रमाण-पत्र जारी करने के लिए सक्षम अधिकारी के रूप में नामित किया हो, नीचे दिए गए फ़ार्म में प्रमाण-पत्र लेकर उसकी एक प्रतिलिपि के साथ, प्रस्तुत करना चाहिए। यदि उम्मीदवार के माता और पिता दोनों की मृत्यु हो गई हो तो यह प्रमाण-पत्र उस ज़िले के अधिकारी से लिया जाना चाहिए जहां उम्मीदवार अपनी शिक्षा से भिन्न किसी अन्य प्रयोजन से आमतौर पर रहता हो।

दिल्ली संघ राज्य क्षेत्र का उम्मीदवार उक्त प्रमाण-पत्र अतिरिक्त ज़िला मैजिस्ट्रेट या प्रथम श्रेणी के वृत्तिक (स्टाइपेंड्री) मैजिस्ट्रेट या रेवेन्यू असिस्टेंट से भी लेकर प्रस्तुत कर सकता है।

भारत सरकार के पदों पर नियुक्ति के लिए आवेदन करने वाले अनुसूचित जाति और अनुसूचित आदिमजाति के उम्मीदवारों के द्वारा प्रस्तुत किए जाने वाले प्रमाण-पत्र का फ़ार्म :—

प्रमाणित किया जाता है कि श्री/श्रीमती/कुमारी*.....
.....सुपुत्र/सुपुत्री/श्री*.....
.....जो गांव/क़स्बा*.....
ज़िला/मण्डल*.....राज्य/संघ राज्य क्षेत्र*
.....के/की* निवासी है,.....
.....जाति/आदिमजाति* के/की* हैं जिसे निम्नलिखित के अधीन अनुसूचित जाति/अनुसूचित आदिमजाति* के रूप में मान्यता दी गई है :—

अनुसूचित जातियों और अनुसूचित आदिमजातियों की सूचियां (संशोधन) आदेश, 1956।*

संविधान (जम्मू और काश्मीर) अनुसूचित जातियां आदेश, 1956।*

नोट :—यहां "आमतौर से रहते/रहती हैं" का अर्थ वही होगा जो "रिप्रैज़ेण्टेशन आफ़ दि पीपुल ऐक्ट, 1950" की धारा 20 में हैं।

**अनुसूचित जाति/आदिमजाति प्रमाण-पत्र जारी करने के लिए सक्षम अधिकारी।

(i) ज़िला मैजिस्ट्रेट/अतिरिक्त ज़िला मैजिस्ट्रेट/कलैक्टर/डिप्टी कमिश्नर/ऐडीशनल डिप्टी कमिश्नर/डिप्टी कलैक्टर/प्रथम श्रेणी का स्टाइपेंड्री मैजिस्ट्रेट/सिटी मैजिस्ट्रेट†/सब-डिवीज़नल मैजिस्ट्रेट/तालुक मैजिस्ट्रेट/एक्ज़ीक्यूटिव मैजिस्ट्रेट/एक्स्ट्रा असिस्टेंट कमिश्नर। †(प्रथम श्रेणी के स्टाइपेंड्री मैजिस्ट्रेट से कम ओहदे का नहीं।)

(ii) चीफ़ प्रेसिडेन्सी मैजिस्ट्रेट/ऐडीशनल चीफ़ प्रेसिडेंसी मैजिस्ट्रेट/प्रेसिडेन्सी मैजिस्ट्रेट।

(iii) रेवेन्यू अफ़सर—जिनका ओहदा तहसीलदार से कम न हो।

(iv) उस इलाके का सब-डिवीज़नल अफ़सर जहां उम्मीदवार और या उसका परिवार आमतौर से रहता हो।

(v) ऐडमिनिस्ट्रेटर/ऐडमिनिस्ट्रेटर का सचिव/डेवलपमेन्ट अफ़सर (लकादीव, मिनिक्वाय और अमिनदिव द्वीप-समूह)।

8. (i) नियम 6 (ख) (ii) अथवा 6 (ख) (iii) के अंतर्गत आयु-सीमा में छूट चाहने वाले पूर्वी पाकिस्तान से विस्थापित व्यक्ति को दंडकारण्य परियोजना के ट्रांज़िट केन्द्रों के कैम्प कमांडेंट से, अथवा सहायता शिविरों के कैम्प कमांडेंट से, अथवा उस क्षेत्र के ज़िला मैजिस्ट्रेट से, जिसमें वह इस समय निवास कर रहा है, लिया गया मूल प्रमाण-पत्र उसकी एक प्रतिलिपि के साथ, यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह पूर्वी पाकिस्तान से वास्तविक विस्थापित व्यक्ति है और 1 जनवरी, 1964 को अथवा उसके बाद भारत आया है।

(ii) नियम 6 (ख) (iv) के अंतर्गत आयु-सीमा में छूट चाहने वाले पांडिचेरी के संघ राज्य क्षेत्र के उम्मीदवार को उस शिक्षा संस्था के प्रिंसिपल से, जिसमें उसने शिक्षा प्राप्त की है, लिया गया मूल प्रमाण-पत्र एक प्रतिलिपि के साथ, यह दिखलाने के लिए प्रस्तुत करना चाहिए कि उसने किसी स्तर पर फ्रेंच के माध्यम से शिक्षा प्राप्त की है।

(iii) नियम 6 (ख) (v) अथवा 6 (ख) (vi) के अंतर्गत आयु-सीमा में छूट चाहने वाले श्रीलंका से प्रत्यावर्तित मूलतः भारतीय उम्मीदवार को श्रीलंका में भारत के उच्च आयुक्त के कार्यालय से लिया गया मूल प्रमाण-पत्र एक प्रतिलिपि के साथ, यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह एक भारतीय नागरिक है जो अक्तूबर 1964 के भारत-श्रीलंका समझौते के अधीन 1 नवंबर, 1964 को या उसके बाद भारत आया है।

(iv) नियम 6 (ख) (vii) के अंतर्गत आयु-सीमा में छूट चाहने वाले गोआ, दमन और दियु के संघ राज्य क्षेत्र के उम्मीदवार को अपनी मांग की पुष्टि के लिए निम्नलिखित प्राधिकारियों में से किसी एक से लिया गया मूल प्रमाण-पत्र एक प्रतिलिपि के साथ प्रस्तुत करना चाहिए :—

(1) सिविल प्रशासन का निदेशक

(2) कोंसलहोस के प्रशासक

(v) नियम 6 (ख) (viii) के अंतर्गत आयु-सीमा में छट चाहने वाले कीनिया, उगांडा तथा संयुक्त गणराज्य टेंज़ानिया (भूतपूर्व टंगानिका तथा ज़ंज़ीबार) से आए हुए उम्मीदवार को, उस क्षेत्र के ज़िला मैजिस्ट्रेट से जहां वह इस समय निवास कर रहा है, लिया गया मूल प्रमाण-पत्र एक प्रतिलिपि के साथ यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह वास्तव में उपर्युक्त देशों से आया है।

(vi) नियम 6 (ख) (ix) अथवा 6 (ख) (x) के अंतर्गत आयु-सीमा में छूट चाहने वाले बर्मा से प्रत्यावर्तित मूलतः भारतीय उम्मीदवार को भारतीय राजदूतावास, रंगून द्वारा जारी किया गया मूल पहिचान प्रमाण-पत्र एक प्रतिलिपि के साथ यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह एक भारतीय नागरिक है जो कि 1 जून 1963 को या उसके बाद भारत आया है, अथवा उसे जिस क्षेत्र का वह निवासी है उसके ज़िला मैजिस्ट्रट से लिया गया एक प्रमाण-पत्र यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह बर्मा से प्रत्यावर्तित व्यक्ति हैं और 1 जून 1963 को या उसके बाद भारत आया है।

(vii) नियम 6 (ख) (xi) अथवा 6 (ख) (xii) के अंतर्गत आयु-सीमा में छूट चाहने वाले ऐसे उम्मीदवार को, जो रक्षा सेवा में कार्य करते हुए विकलांग हुआ है, महानिदेशक, पुनर्वासन, रक्षा मंत्रालय से इस आशय का एक प्रमाण-पत्र लेकर, उसकी एक प्रतिलिपि के साथ प्रस्तुत करना चाहिए कि वह रक्षा सेवा में कार्य करते हुए शत्रु देश के साथ संघर्ष में अथवा अशांतिग्रस्त क्षेत्रों में फौज़ी कार्रवाई के दौरान विकलांग हुआ और परिणामस्वरूप निर्मुक्त हुआ।

(viii) नियम 6 (ख) (xiii) अथवा 6 (ख) (xiv) के अंतर्गत आयु-सीमा में छूट चाहने वाले पाकिस्तान से विस्थापित व्यक्ति को अपना मूल "रिफ्यूजी रजिस्ट्रेशन कार्ड" अथवा उस क्षेत्र के ज़िला मैजिस्ट्रेट से, जिसमें वह इस समय निवास कर रहा है, लिया गया मूल प्रमाण-पत्र यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह वास्तविक विस्थापित व्यक्ति है।

(ix) नियम 6 (ख) (xv) के अंतर्गत आयु सीमा में छूट चाहने वाले अंडमान एवं निकोबार द्वीपसमूह के उम्मीदवार को निम्नलिखित प्राधिकारियों में से किसी एक से इस आशय का लिया गया एक मूल प्रमाण-पत्र, उसकी एक प्रतिलिपि के साथ प्रस्तुत करना चाहिए कि वह अंडमान एवं निकोबार द्वीपसमूह का वास्तविक निवासी है।

(1) मुख्य आयुक्त
(2) उप आयुक्त
(3) अतिरिक्त उप-आयुक्त
(4) अतिरिक्त ज़िला मैजिस्ट्रेट
(5) सहायक आयुक्त

(x) नियम 6 (ख) (xvi) के अंतर्गत श्रीलंका से प्रत्यावर्तित होने के नाते आयु सीमा में छूट चाहने वाले उम्मीदवार को श्रीलंका में भारतीय उच्च आयुक्त के कार्यालय से लिया गया इस आशय का मूल प्रमाण-पत्र, उसकी एक प्रतिलिपि के साथ, प्रस्तुत करना चाहिए कि वह एक भारतीय नागरिक है और श्रीलंका सरकार की प्रत्यावर्तन योजना के अंतर्गत भारत आया है।

(xi) जिस उम्मीदवार को आयोग द्वारा 1966 में ली गई परीक्षा में प्रवेश दे दिया गया था किन्तु जो सशस्त्र सेना में नौकरी की अपेक्षाओं के कारण परीक्षा में नहीं बैठ सका तथा जो नियम 8 के परंतुक (ग) के अनुसार पात्रता का दावा करता है, उसे रक्षा मंत्रालय से एक प्रमाण-पत्र लेकर, मूल रूप में, उसकी एक प्रतिलिपि के साथ, यह दिखलाने के लिए प्रस्तुत करना चाहिए कि वह 1966 में ली गई परीक्षा में सशस्त्र सेना में नौकरी की अपेक्षाओं के कारण नहीं बैठ सका था।

9. (क) यदि किसी व्यक्ति के लिए पात्रता प्रमाण-पत्र (एलिजिबिलिटी सर्टिफ़िकेट) आवश्यक हो तो उसे अभीष्ट पात्रता प्रमाण-पत्र प्राप्त करने के लिए भारत सरकार के गृह-मंत्रालय को आवेदन करना चाहिए।

(ख) यदि किसी व्यक्ति के लिए पात्रता प्रमाण-पत्र आवश्यक न हो तो उसे प्रथम श्रेणी मैजिस्ट्रेट के सामने नान-जुडीशल स्टाम्प

पेपर पर नीचे लिखे किसी भी रूप में (जो उस पर लागू होता हो) शपथ लेकर शपथ-पत्र (एफ़िडेविट) प्रस्तुत करना चाहिए :—

(1) "मैं घोषणा करता हूं कि मैं 19 जुलाई 1948 से पहले उन इलाकों से भारत आया था जो अब पाकिस्तान में हैं और मैं तब से आमतौर पर भारत में रह रहा हूं।"

(2) "मैं घोषणा करता हूं कि मैं 19 जुलाई 1948 को या उसके बाद उन इलाकों से भारत आया था जो अब पाकिस्तान में हैं और मैं तब से आमतौर पर भारत में रह रहा हूं और मैं यह भी घोषणा करता हूं कि मैंने संविधान के अनुच्छेद 6 के अधीन स्वयं को भारत के नागरिक के रूप में पंजीकृत करा लिया है।"

(3) "मैं घोषणा करता हूं कि मैं पात्रता-प्रमाण-पत्र के बिना ही संविधान के लागू होने की तारीख, अर्थात् 26 जनवरी 1950, से पहले संघ की सेवा में आ गया था और तब से मैं लगातार उसी सेवा में हूं और मेरे सेवा-काल का क्रम नहीं टूटा है।"

नोट :—यदि कोई उम्मीदवार ऊपर की मद (2) के अंतर्गत आता है तो वह ऊपर के सब-पैरा (ख) में अपेक्षित प्रथम श्रेणी के मैजिस्ट्रेट के सामने लिए गए शपथ-पत्र के स्थान पर भारत के नागरिक के रूप में पंजीकरण का मूल प्रमाणपत्र एक प्रतिलिपि के साथ प्रस्तुत कर सकता है।

10. ऊपर के पैरा 3, 5(i), 5(ii), 7, 8 और 9 (ख) में उल्लिखित मूल प्रमाण-पत्र प्रतिलिपियों के साथ अवश्य भेजे जाने चाहिएं। आयोग मूल प्रमाण-पत्रों के बिना इन प्रमाण-पत्रों की अभिप्रमाणित या किसी अन्य प्रकार की प्रतियां स्वीकार नहीं करता।

ऊपर के पैरा 3, 5(i), 5 (ii), 7, 8 और 9 (ख) के अनुसार भेजे गए सभी मूल प्रमाण-पत्र उम्मीदवार को आवेदन-पत्र के परिणाम की सूचना देते समय लौटा दिए जाएंगे। उम्मीदवारों को सलाह दी जाती है कि वे अपने प्रमाण-पत्रों को आयोग के पास भेजने से पहले उनकी अभिप्रमाणित प्रतियां अपने पास रख लें। आयोग आवेदन-पत्र के परिणाम की सूचना भेजने के पूर्व इन प्रमाण-पत्रों को न तो लौटा सकता है और न ही उनकी अभिप्रमाणित प्रतियां भेज सकता है, चाहे उम्मीदवार को उनकी आवश्यकता किसी भी काम के लिए क्यों न हो।

यदि उम्मीदवार ऊपर के पैरा 3, 5 (i), 5 (ii), 7, 8 और 9 (ख) में उल्लिखित प्रमाण-पत्रों को, संघ लोक-सेवा आयोग द्वारा ली गई किसी और परीक्षा के संबंध में पहले ही भेज चुका हो, और उन्हें अभी तक उसे लौटाया नहीं गया हो तो उसे अपना आवेदन-पत्र भेजते समय इस तथ्य का उल्लेख देना चाहिए और यदि हो सके तो प्रत्येक प्रमाण-पत्र की एक प्रति भी साथ भेजनी चाहिए। यदि प्रमाण-पत्र आयोग के पास न हों तो, चाहे उम्मीदवार इस आयोग द्वारा ली गई किसी अन्य परीक्षा में पहले बैठा हो या नहीं, उसे आवेदन-पत्र के साथ प्रमाण-पत्र भेजने चाहिएं।

11. आवेदन-पत्र देर से प्रस्तुत किए जाने पर देरी के कारण के रूप में यह तर्क स्वीकार नहीं किया जाएगा कि आवेदन-पत्र ही अमुक तारीख को भेजा गया था। आवेदन-पत्र का भेजा जाना ही स्वतः इस बात का सूचक न होगा कि प्रपत्र पाने वाला परीक्षा में बैठने का पात्र हो गया है।

12. यदि परीक्षा संबंधी आवेदन-पत्रों के पहुंच जाने की आखिरी तारीख से पंद्रह दिन के भीतर उम्मीदवार को अपने आवेदन-पत्र की पावती (एकनालिजमेंट) न मिले तो उसे पावती प्राप्त करने के लिए आयोग से तत्काल संपर्क करना चाहिए।

13. इस परीक्षा में प्रवेश चाहने वाले प्रत्येक उम्मीदवार को उसके आवेदन-पत्र के परिणाम की सूचना यथाशीघ्र दे दी जाएगी। किन्तु यह नहीं कहा जा सकता कि परिणाम कब सूचित किया जाएगा। परन्तु यदि परीक्षा के शुरू होने की तारीख से एक महीने पहले तक उम्मीदवार को अपने आवेदन-पत्र के परिणाम के बारे में संघ लोक-सेवा आयोग से कोई सूचना न मिले तो परिणाम की जानकारी के लिए उसे आयोग से तत्काल संपर्क स्थापित करना चाहिए। यदि उम्मीदवार ने ऐसा नहीं किया तो वह अपने मामले में विचार किए जाने के दावे से वंचित हो जाएगा।

14. जिन पुस्तिकाओं में अन्य ब्यौरों के साथ-साथ गत वर्षों में ली गई भारतीय प्रशासन सेवा आदि परीक्षाओं के प्रश्न पत्रों का ब्यौरा भी सम्मिलित होता है, उनकी बिक्री मैनेजर आफ पब्लिकेशन्स, सिविल लाइन्स, दिल्ली-6 के द्वारा की जाती है और उन्हें वहां से केवल मेल आर्डर द्वारा सीधे प्राप्त किया जा सकता है। उन्हें (i) किताब महल, थिएटर कम्यूनिकेशन बिल्डिंग, कनाट प्लेस, नई दिल्ली, और (ii) गवर्नमेंट आफ़ इंडिया बुक डिपो, 8-हेस्टिंग्स स्ट्रीट, कलकत्ता से भी नकद पैसा देकर खरीदा जा सकता है। ये पुस्तिकाएं विभिन्न मुफ़स्सिल नगरों में भारत सरकार के प्रकाशनों के एजेंटों से भी प्राप्त की जा सकती हैं।

15. **आवेदन-पत्र से सम्बन्धि पत्र-व्यवहार** :—आवेदन पत्र से संबंधित सभी पत्र आदि सचिव, संघ लोक-सेवा आयोग, धौलपुर हाउस, नई दिल्ली-11 को भेजे जाएं तथा उनमें नीचे लिखा ब्यौरा अनिवार्य रूप से दिया जाए :—

(1) परीक्षा का नाम

(2) परीक्षा का महीना और वर्ष

(3) रोल नंबर (यदि उम्मीदवार को सूचित कर दिया गया हो)

(4) उम्मीदवार का नाम (बड़े अक्षरों में)

(5) आवेदन-पत्र में दिया गया पत्र-व्यवहार का पता।

ध्यान दें :—जिन पत्रों आदि में यह ब्यौरा नहीं होगा संभवतः उन पर ध्यान नहीं दिया जाएगा।

16. **पते में परिवर्तन** :—उम्मीदवार को इस बात की व्यवस्था कर लेनी चाहिए कि उसके आवेदन-पत्र में उल्लिखित पते पर भेजे गए पत्र आदि, आवश्यक होने पर, उसको बदले हुए पते पर मिल जाया करें। पते में किसी भी प्रकार का परिवर्तन होने पर आयोग को उसकी सूचना, उपर्युक्त पैरा 15 में उल्लिखित ब्यौरे के साथ यथाशीघ्र दी जानी चाहिए। आयोग ऐसे परिवर्तनों पर ध्यान देने का पूरा-पूरा प्रयत्न करता है किन्तु इस विषय में वह कोई जिम्मेदारी स्वीकार नहीं कर सकता।

J. S. BHATNAGAR
Deputy Director (Administration)

MINISTRY OF STEEL, MINES AND METALS

(Deptt. of Iron and Steel)

Iron & Steel Control

Calcutta-1, the 1st June 1967

NOTICE

SUB :—*Import licensing policy for ferro-alloys and iron & steel items for the period April 1967-March 1968 for Actual Users.*

No. 25/IP(PN)/67.—Attention is invited to Public Notices Nos. 21/IP(PN)/67 and 22/IP(PN)/67 both dated 16th May, 1967 announcing import licensing policy for ferro-alloys and iron & steel for the financial year 1967-68 :

2. It has been decided that import of these items during 1967-68 will also be on liberal basis.

3. The list of items for which import licences will be granted has already been announced in the Public Notices referred to above. The list of priority industries has been published in Appendix 80 to the Import Trade Control Policy for the year April 1967—March 1968 (Red Book) issued by the Ministry of Commerce with their Public Notice No. 32-ITC(PN)/67, dated the 1st May, 1967.

4. The policy and procedure for the grant of all import licences for iron & steel and ferro-alloys to actual users will be the same as embodied in pages 4-11 of section "I" of the Import Trade Control Policy Book referred to above. It should, however, be noted that in respect of items licensable by the Iron & Steel Controller, indigenous clearance, where necessary, will be required to be obtained from his office at Calcutta (Industries "I" Section).

5. It will not be necessary to sponsor the applications for import of iron & steel and ferro-alloys in the case of S.S.I. units, whether they are in the priority list or not. The applications of newcomers, falling under S.S. Units, will, however, be required to be sponsored by the respective sponsoring authorities. Applications from DGTD Units, non-DGTD Units, non-S.S.I. Units, Public Sector undertakings, Government departments/projects, etc., will, also be required to be sponsored in accordance with the procedure laid down in the Import Trade Control Policy Book for the year April 1967-March 1968.

6. The procedure for submission of applications by different Units for import licences will be as follows :—

(a) *Priority industries under DGTD* : Applications will be considered on submission of proof that L.C. has been opened for 90% of the value in respect of previous set of licences, or 60% by way of actual imports. Every time an application is made it should cover 6 months' requirement of the unit.

(b) *Priority industries under S.S.I.* : Applications will be considered on submission of proof that L.C. has been opened for 90% of the value in respect of previous set of licences or 60% by way of actual imports. Every time an application for licence is made, it should cover 6 months' requirements of the unit. Licensing authority may grant licence up to 50% of the value of the initial licence issued for the period April1966-March 1967.

(c) *Non-priority industries under DGTD* : First application covering the requirements for 6 months should be made after utilising the previous set of licences issued for the period April 1966-March 1967 to the extent of 90% by way of opening L.C. or 60% by way of actual importation. The second application should be made after utilising the previous set of licences to the extent of 90% by way of opening L.C. or 60% by way of actual importation.

(d) *Non-priority Industries under small-scale sector* : Applications should be made for annual requirements of the applicant unit. Applications should be made after such units have utilised their licence for the period April 1966-March 1967 to the extent of 90% by way of opening L.C., or 60% by way of actual importation.

7. The procedure for submission of applications by other units (including public sector undertakings, Government Departments/Projects) will be as laid down in relevant paragraphs in Section I of the Import Trade Control Policy Book (Red Book) for the year April 1967-March 1968.

8. The procedure for canalisation of import of Skelp, Black Sheets, Hot Rolled and Cold Rolled (including P.C.R.C.A. Sheets, Deep Drawing quality Sheets, Extra Deep Drawing quality Sheets and Tin Mill Black Plate) and Galvanised Sheets through M/s. Minerals & Metals Trading Corporation of India Ltd., New Delhi, as laid down in paragraph 10 of our Public Notice No. 22/IP (PN)/67, dated 16-5-1967, will not apply in the case of actual users of following categories :—

(i) All priority industries other than priority industries in the Small Scale Sector.

(ii) Non-priority industries in the list of DGTD.

(iii) Licences issued by C.C.I. & E. in certain specific cases.

(iv) Direct imports where remittance of foreign exchange is not involved, such as, replacement licences, free samples, etc.

(v) Imports under the Export Promotion Schemes (Erstwhile as well as Registered Exporters Scheme).

(vi) Imports by the Indian Railways.

(vii) Imports against requirements of Defence.

9. All Actual Users, coming under the canalisation procedure as laid down in para 8 above, should submit separate import applications for canalised items. One copy of the application should be sent to the licensing authority as indicated in para 6 of Iron & Steel Controller's Public Notice No. 22/IP(PN)/67, dated 16-5-1967, two copies to the Sponsoring Authority and one copy to M/s. Minerals and Metals Trading Corporation of India Ltd., New Delhi. No Treasury Challan need be attached initially. If a Treasury Challan is required later, it will be called for by the licensing authority. This deems to modify the procedure laid down in paragraph 8 of the Public Notice dated 16-5-1967.

10. While forwarding copies of their import application to their Sponsoring authorities, as required in the preceding paragraph, the Actual Users should submit the original or photostat copy of the exchange control or Customs copy of the licence as evidence of the utilisation of previous licence(s) where direct licence(s) were issued in their favour. In cases where imports were arranged through M/s. Minerals & Metals Trading Corporation of India Ltd., New Delhi, the original allotment letter from the Sponsoring Authority or photostat copy thereof, should be submitted, as evidence.

11. In the cases, referred to in the preceding paragraph, the Sponsoring Authorities should scrutinise the applications and documents and issue their recommendations on the basis of the policy and procedure for the grant of import licences, as announced in Ministry of Commerce Public Notice No. 32/ITC(PN)/67, dated 1-5-1967, as incorporated in pages 4-11 of Section I of the Import Trade Control Policy (Red Book) for the year April 1967-March 1968. The recommendations should be sent to M/s. Minerals & Metals Trading Corporation of India Ltd., New Delhi direct except in the case of new SSI Units in which the recommendations should be sent through Development Commissioner (SSI).

12. Actual Users, other than SSI Units for whom canalised items were imported by M/s. Minerals & Metals Trading Corporation of India Ltd. during 1966-67 and who are now eligible to receive direct licences for canalised items, should apply for import licence, on the basis of the recommendation of their Sponsoring authorities. Along with each application the applicant should produce evidence showing release obtained by them from M/s. Minerals & Metals Trading Corporation of India Ltd. in the form of original or photostat copy of the allotment/recommendation of the sponsoring authority and release order of M/s. Minerals & Metals Trading Corporation of India Ltd. Applications should be submitted in duplicate to the Sponsoring authority along with a copy to the Licensing Authority concerned. The Sponsoring authority will scrutinise the documents and forward one copy of the application to the licensing authority along with their recommendations.

13. Convertibility of licences as provided in C.C.I. & E.'s Public Notice No. 41/ITC(PN)66, dated 30-3-1966, will also apply to licences issued by the Iron & Steel Controller subject to the proviso :—

(a) That import of Stainless Steel Sheets/Plates/Strips/Circles will not be allowed by conversion of licences for raw materials, components and spares issued by the C.C.I. & E., as indicated at item (16) in paragraph 1 of Public Notice No. 22/IP(PN)/67, dated 16-5-1967.

(b) That by conversion of licences for raw materials, component and spares issued by the C.C.I. & E., the licensee will import only those categories of iron and steel of which he is an Actual User.

(c) That against import licences for iron & steel materials the licensee will be authorised to import any item permissible under the policy, other than Stainless Steel Sheets/Plates/Strips/Circles and canalised items, provided they hold an actual user licence for that item.

(d) That against import licence for Stainless Steel Sheets/Plates/Strips/Circles, issued by the Iron & Steel Controller, the licensee will import only permissible item under the policy, other than canalised item, provided he holds an Actual User licence of that item.

14. Licensable items, names of licensing authorities and their respective jurisdiction, as indicated in Iron & Steel Controller's Public Notices No. 21/IP(PN)/67, and 22/IP(PN)/67, both dated 16-5-1967, will remain unaltered. In the case of Public Sector Industrial Undertakings and Iron & Steel Industry, the licensing jurisdiction will be as under :—

MINISTRY OF TOURISM AND CIVIL AVIATION

(India Meteorological Department)

Poona-5, the 9th June 1967

Memorandum regarding the probable amount of monsoon rainfall in 1967

No. SL 316/6476.—Previous weather conditions over certain parts of the world enable us to from an estimate, within somewhat wide limits, of the monsoon rainfall of India during the period June to September. These predictions aim to pass a statistical test of 80 per cent success, in other words aim at being correct four times out of five on the average over a long series of years.

The data used are given in section 2 below; these are followed by notes on the relevant inferences that may be drawn from them.

2. *Data*

Equatorial Pressure—Pressure was in defect by 0.6 mb. at Port Darwin in March to May and in defect by 1.0 mb. at Seychelles in February and March.

South Rhodesia—Rainfall from October 1966 to April 1967 was in defect by 19.8 mm.

South America—Pressure departures were as follows :—

	Buenos Aires	Cordoba	Santiago
April 1967	+0·9 mb.	+2·0 mb.	—0·3 mb.
May 1967	—	—	—0·3 mb.

Upper winds in m.p.s.—Bangalore, April, 6 km.—The northerly component was +1.2.

Calcuta, May—The easterly component was —8.6 at 4 km. and —4.1 at 2 km.

Gwalior, March, 2 km.—The easternly component was —7.5.

3. *Inferences from the information*

For the Peninsula—taken to consist of Maharashtra, Gujarat, Madhya Pradesh, Telangana, Interior Mysore North, Coastal Andhra Pradesh and Coastal Mysore (excluding South Kanara)—the available factors found to be of most importance are, in the order of decreasing reliability, Bangalore upper winds, South American pressure, Calcutta upper winds and South Rhodesia rain. Of the factors, South American pressure is very favourable, South Rhodesia rain and Bangalore upper winds are indifferent and Calcutta upper winds is moderately unfavourable. The statistical analysis indicates that there is a four to one chance that the monsoon rainfall in the Peninsula during June to September 1967 will be above 93 per cent of the normal rainfall.

For Northwest India—taken to consist of Jammu and Kashmir, West Uttar Pradesh, Haryana, the Punjab, Himachal Pradesh, Delhi, Chandigarh and Rajasthan—the factors used are, in the order of decreasing reliability, Equatorial pressure, South American pressure, Calcutta Upper winds, Gwalior upper winds and South Rhodesia rain. Of these Equatorial pressure is very favourable, Calcutta upper winds favourable, South American pressure moderately favourable, South Rhodesia rain indifferent and Gwalior upper winds unfavourable. The statistical analysis indicates that there is a four to one chance that the monsoon rainfall in Northwest India during June to September 1967 will be above 98 per cent of the normal rainfall.

4. *Summary of Forecast*

The monsoon rainfall during June to September 1967 is likely to be normal in the Peninsula and slightly above normal in Northwest India.

*To be announced later.

The above numbers are liable to alteration.

Reservations will be made for candidates belonging to the Scheduled Castes and the Scheduled Tribes in respect of vacancies as may be fixed by the Government of India.

3. A candidate may apply for admission to the examination in respect of any one or more of the Services covered by the scheme of the Examination in accordance with the provisions of the Ministry of Home Affairs Notification No. F.15/11/67-AIS(i) dated 17th June, 1967. Subject to their eligibility in terms of the aforesaid Notification, they may specify in their applications as many of these Services as they may wish to compete for. *Candidates are warned that once an application has been made no additions to the list of Services specified by a candidate will ordinarily be allowed.*

N.B. I Candidates are required to specify clearly in their applications the *order of preferences* for the Services for which they wish to compete. They are advised to indicate as many Services as they wish to, so that having regard to their ranks in the order of merit, due consideration can be given to their preferences when making appointments.

N.B. II No request for addition to or alteration in the order of preferences for the Services originally indicated by a candidate in his application will be considered unless such a request is received in the office of the Union Public Service Commission on or before 31st December, 1967.

4. A candidate seeking admission to the examination must apply on the prescribed form of application, direct to the Officer Commanding his Unit, who will complete the endorsement at the end of the application form and forward it to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11.

5. The prescribed forms of application and full particulars of the examination are obtainable from the Commission by post on payment of Re. 1.00, which should be remitted by Money Order, to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11, stating clearly the name of the examination in respect of which the application form is required. Postal Orders or cheques or currency notes will not be accepted in lieu of Money Orders. The forms can also be obtained on cash payment at the counter in the Commission's office. *This amount of Re. 1.00 will in no case be refunded.*

Application forms and connected papers can also be obtained without any payment from the following Army sources :—

(i) *Command Headquarters.*

(ii) *Corps Headquarters.*

(iii) *Division Headquarters.*

(iv) *Area Headquarters, and*

(v) *Sub Area Headquarters.*

6. The completed application form *must* reach the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11, on or before the 17th July, 1967 accompanied by necessary documents in accordance with the instructions to candidates contained in the Annexure. No application *received after that date will be considered.*

Applications from candidates who are abroad/overseas will, however, be accepted up to the 31st July, 1967. (This is applicable to persons actually residing abroad/overseas at the time of their applications).

NOTE :—Candidates who send their applications or requests for application forms at a late date will do so at their own risk.

7. All communications in respect of an application should be addressed to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11, and should contain the following particulars :—

(i) NAME OF EXAMINATION.

(ii) MONTH AND YEAR OF EXAMINATION.

(iii) ROLL NUMBER (IF COMMUNICATED TO CANDIDATE).

(iv) NAME OF CANDIDATE (IN BLOCK CAPITALS).

(v) POSTAL ADDRESS AS GIVEN IN APPLICATION.

Communications not giving these particulars may not be attended to. In all correspondence with the Union Public Service Commission concerning this examination, candidates should invariably superscribe their envelopes and correspondence with the words "INDIAN ADMINISTRATIVE SERVICE, ETC., (RELEASED EC/SSC OFFICERS) EXAMINATION, 1967".

RAJENDRA LAL
Secretary
Union Public Service Commission

ANNEXURE

INSTRUCTIONS TO CANDIDATES

1. A copy each of the Notice, the Rules, the Application form and other papers relating to the examination is obtainable from the office of the Union Public Service Commission and other authorities in accordance with para 5 of the Notice. *Candidates should consult them carefully to see if they are eligible before filling in the application form. The conditions prescribed cannot be relaxed.*

BEFORE SUBMITTING THE APPLICATION THE CANDIDATE MUST SELECT FINALLY FROM AMONG THE CENTRES GIVEN IN PARAGRAPH 1 OF THE NOTICE, THE PLACE AT WHICH HE WISHES TO APPEAR FOR THE EXAMINATION. ORDINARILY NO REQUEST FOR A CHANGE IN THE PLACE SELECTED WILL BE ENTERTAINED.

2. The application form must be completed in the candidate's own handwriting and all answers should be given in words. A candidate serving in the Armed Forces must submit his application direct to the Officer Commanding his Unit, who will complete the certificate at the end of the application form and forward it to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11.

A candidate in Civil employ of Government, must submit his application through the Head of his Department or office concerned who will complete the endorsement at the end of the application form and forward it to the Commission.

Applications from all other candidates, whether in private employment or in Government owned industrial undertakings or other similar organisations, can be entertained direct. If such a candidate forwards his application through his employer and it reaches the Union Public Service Commission late, the application, even if submitted to the employer before the closing date, will not be entertained.

No application received after the date prescribed in the Notice will be accepted.

3. (a) A candidate who has already been released from the Armed Forces should submit along with his application a certificate, in original (with a copy thereof) from the Army/Air Force/Naval Headquarters to show that he is an Emergency Commissioned/

Short Service Commissioned Officer Commissioned in the Armed Forces after 1st November, 1962, and released according to a phased programme (in the case of an Emergency Commissioned Officer)/at the end of the tenure of his service (in the case of a Short Service Commissioned Officer). The certificate must indicate the actual date of his release from the Armed forces.

(b) A candidate who has been released from the Armed Forces on invalidment should submit along with his application a certificate in original (with a copy thereof) from the Army/Air Force/Naval Headquarters to show that he is an Emergency Commissioned/Short Service Commissioned Officer commissioned in the Armed Forces after 1st November, 1962, and has been invalided owing to a disability attributable to or aggravated by military service. The certificate must indicate (i) the actual date of his release from the Armed Forces, and (ii) the date when he would have been released according to a phased programme (in the case of an Emergency Commissioned Officer)/at the end of the tenure of his service (in the case of a Short Service Commissioned Officer) if he had not been invalided.

NOTE :—In case, however, such a candidate was an officer of the AMC, AMC (non-technical), ADC or MNS, he should submit the required certificate from the DG, AFMS.

4. Candidates are warned that they should not furnish any particulars that are false or suppress any material information in filling in the application form.

5. In addition to the certificates mentioned in paras 2 and 3 above, a candidate must send the following documents with his application :—

(i) Certificate of Age.

(ii) Certificate of Educational Qualification.

(iii) Two copies of recent passport size (5 cm. × 7 cm. approx.) photograph of the candidate.

Details of the documents mentioned in items (i), (ii) and (iii), are given below :—

(i) *Certificate of Age.*—The date of birth ordinarily accepted by the Commission is that entered in the Matriculation Certificate or in the Secondary School Leaving Certificate, or in a certificate recognised by an Indian University as equivalent to Matriculation or in an extract from a Register of Matriculates maintained by a University, which extract must be certified by the proper authority of the University. The expression Matriculation Certificate in this part of the instructions must be understood as including these alternative certificates.

Candidates will thus understand that the Matriculation Certificate is required in all cases as evidence of age, and it must invariably be sent to the Commission, in original, with a copy thereof, together with the application.

Sometimes the Matriculation or equivalent certificate does not show the date of birth, or only shows the age by completed years or completed years and months. In such cases a candidate must send in addition to the Matriculation or equivalent certificate, an original certificate, together with a copy thereof, from the Headmaster/Principal of the institution from where he passed the Matriculation or equivalent examination, showing the date of his birth or his exact age as recorded in the Admission Register of the institution.

Candidates are warned that unless complete proof of age as laid down in these instructions is sent with an application, the application may be rejected. Further, they are warned that if the date of birth stated in the application is inconsistent with the age shown in the Matriculation Certificate and no explanation is offered the application may be rejected.

NOTE 1.—A candidate who holds a completed Secondary School Leaving Certificate need submit with the original a copy of only the page containing entries relating to age.

NOTE 2.—CANDIDATES SHOULD NOTE THAT ONCE A DATE OF BIRTH HAS BEEN CLAIMED AND ACCEPTED BY THE COMMISSION FOR THE PURPOSE OF ADMISSION TO AN EXAMINATION, NO CHANGE WILL ORDINARILY BE ALLOWED AT A SUBSEQUENT EXAMINATION.

NOTE 3.—Displaced persons, who have lost their original Matriculation Certificate in Pakistan, should obtain duplicate certificate from the University concerned. If they are unable to obtain the duplicate Matriculation certificate from the University, they should submit an extract from the University Gazette in which their results were published showing their date of birth and certified by the Registrar or the Headmaster.

(ii) *Certificate of Educational Qualification.*—A candidate must submit a certificate or diploma, in original, with a copy thereof, showing that he has one of the qualifications prescribed in Rule 9. The certificate submitted must be one issued by the authority (i.e. University or other examining body) awarding the particular qualification. If such a certificate or diploma is not submitted the candidate must explain its absence and submit such other evidence, in original, as he can to support his claim to the requisite qualifications. The Commission will consider this evidence on its merits but do not bind themselves to accept it as sufficient.

NOTE.—A candidate who has appeared at an examination the passing of which would render him eligible to appear at this examination but has not been informed of the result may apply for admission to the examination. A candidate who intends to appear at such a qualifying examination may also apply provided the qualifying examination is completed before the commencement of this examination. Such candidates will be admitted to the examination, if otherwise eligible, but admission would be deemed to be provisional and subject to cancellation if they do not produce proof of having passed the examination, as soon as possible and in any case not later than two months after the commencement of this examination.

(iii) *Two copies of Photograph.*—A candidate must submit two passport size (5 cm. × 7 cm. approximately) copies of his recent photograph, one of which should be pasted on the first page of the application form and the other copy should be firmly attached with the application form. Each copy of the photograph should be signed in ink on the front by the candidate.

6. Candidates are warned that if an application is incompletely or wrongly filled or is not accompanied with any of the documents mentioned under paras 3 and 5 above, it is liable to be rejected and no appeal against its rejection will be entertained. If for reasons beyond his control a candidate is not able to submit any of the documents mentioned in paras 3 and 5 above with the application, he should state the reasons while submitting the application, which will be considered by the Commission on merits. He should submit the remaining documents soon after the submission of the application, and in any case they must reach the Commission's office within one month after the last date prescribed for receipt of applications. He should in no case delay submission of application which must reach the Commission's office before the date specified in para 6 of the Notice.

Candidates are also warned that they should in no case correct or alter or otherwise tamper with any entry in the documents submitted by them nor should they submit a tampered document. If there is any inaccuracy or any discrepancy between two or more such documents, an explanation regarding the discrepancy may be submitted separately.

7. A candidate who claims to belong to one of the Scheduled Castes or the Scheduled Tribes should submit in support of his claim a certificate, in original, with a copy thereof in the form given below from the District Officer or the Sub-Divisional Officer or any other officer of the district in which his parents (or surviving parent) ordinarily reside, who has been designated by the State Government concerned as competent to issue such a certificate, if both his parents are dead, of the district in which he himself ordinarily resides otherwise than for the purpose of his own education.

A candidate from the Union Territory of Delhi may submit such a certificate also from the Additional District Magistrate or the First Class Stipendiary Magistrate or the Revenue Assistant.

The form of the certificate to be produced by Scheduled Castes and Scheduled Tribes candidates applying for appointment to posts under the Government of India :

This is to certify that Shri/Shrimati/Kumari*_____ _____son/daughter* of_____of village/town* _____in District/Division*_____of the State/Union Territory* of_____belongs to the_____ Caste/Tribe* which is recognised as a Scheduled Caste/Scheduled Tribe, under the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956*

(iv) A candidate from the Union Territory of Goa, Daman and Diu claiming age concession under Rule 6(b)(vii) should produce a certificate, in original, together with a copy thereof, from one of the following authorities in support of his claim :—

(1) Director of Civil Administration.

(2) Administrators of the Concelhos.

(v) A candidate who has migrated from Kenya, Uganda or the United Republic of Tanzania (formerly Tanganyika and Zanzibar) claiming age concession under Rule 6(b)(viii) should produce a certificate, in original, together with a copy thereof, from the District Magistrate of the area in which he may, for the time being, be resident to show that he is a *bona fide* migrant from the countries mentioned above.

(vi) A candidate claiming age concession as a repatriate of Indian origin from Burma under Rule 6(b)(ix) or 6(b)(x), should produce, in original, together with a copy thereof, the identity certificate issued to him by the Embassy of India, Rangoon, to show that he is an Indian citizen who has migrated to India on or after 1st June, 1963, or a certificate from the District Magistrate of the area in which he may be resident to show that he is a *bona fide* repatriate from Burma and has migrated to India on or after 1st June, 1963.

(vii) A candidate disabled while in the Defence Services claiming age concession under Rule 6(b)(xi) or 6(b)(xii) should produce in original, together with a copy thereof, a certificate from the Director General, Resettlement, Ministry of Defence, to show that he was disabled while in the Defence Services, in operations during hostilities with any foreign country or in disturbed areas and released as a consequence thereof.

(viii) A displaced person from Pakistan claiming age concession under Rule 6(b)(xiii) or 6(b)(xiv) should produce, in original, his Refugee Registration Card or a certificate from the District Magistrate of the area in which he may for the time being be resident to show that he is a *bona fide* displaced person.

(ix) A candidate from the Adnaman and Nicobar Islands claiming age concession under Rule 6(b)(xv) should produce, in original, together with a copy thereof, a certificate from one of the following authorities stating that he is a *bona fide* resident of the Andaman and Nicobar Islands :—

1. Chief Commissioner
2. Deputy Commissioner
3. Additional Deputy Commissioner
4. Additional District Magistrate
5. Any of the Assistant Commissioners.

(x) A candidate claiming age concession as a repatriate from Ceylon under Rule 6(b)(xvi) should produce, in original, together with a copy thereof, a

certificate from the High Commission for India in Ceylon stating that he is an Indian citizen who has come to India under the Repatriation Scheme of the Government of Ceylon.

(xi) A candidate who had been admitted by the Commission to the examination held in 1966, but who could not appear thereat owing to exigencies of service in the Armed Forces, and who claims eligibility in terms of proviso (c) to Rule 8 should produce in original, together with a copy thereof, a certificate from the Ministry of Defence to show that he could not appear at the examination held in 1966 owing to exigencies of service in the Armed Forces.

9. (a) A person in whose case a certificate of eligibility is required should apply to the Government of India, Ministry of Home Affairs, for issue of the required certificate of eligibility in his favour.

(b) If a certificate of eligibility is not necessary in the case of a person, he should produce an affidavit on non-judicial stamp paper sworn before a first class Magistrate in one of the following forms, whichever may be applicable to him :—

(1) "I declare that I migrated to India from areas which now form Pakistan before the nineteenth day of July, 1948, and have ordinarily been resident in India since then".

(2) "I declare that I migrated to India from areas which now form Pakistan on or after the nineteenth day of July, 1948, and have ordinarily been resident in India since then, and I further declare that I have got myself registered as a citizen of India under Article 6 of the Constitution".

(3) "I declare that I entered the Union Services without a certificate of eligibility before the comencement of the Constitution, i.e. 26th January, 1950, and am continuing in such service since then without a break."

NOTE.—A candidate whose case is covered by item (2) above may submit the certificate of Registration as citizen of India, in original, along with a copy thereof, in lieu of an Affidavit sworn before a First Class Magistrate as required under sub-para (b) above.

10. THE CERTIFICATES MENTIONED IN PARAGRAPHS 3, 5(i), 5(ii), 7, 8 and 9(b) ABOVE SHOULD INVARIABLY BE SENT IN ORIGINAL (WITH COPIES THEREOF). THE COMMISSION DO NOT ACCEPT ONLY COPIES OF THESE CERTIFICATES, WHETHER ATTESTED OR OTHERWISE.

THE ORIGINALS OF THE CERTIFICATES FORWARDED IN ACCORDANCE WITH PARAGRAPHS 3, 5(i), 5(ii), 7, 8 and 9(b) ABOVE WILL BE RETURNED WHEN THE RESULT OF THE APPLICATION IS COMMUNICATED. CANDIDATES ARE ADVISED TO KEEP ATTESTED COPIES OF THEIR CERTIFICATES BEFORE SUBMITTING THEM TO THE COMMISSION. THE COMMISSION CANNOT RETURN THE CERTIFICATES EARLIER THAN THE DATE OF COMMUNICATION OF THE RESULT OF THE APPLICATION FOR WHATEVER PURPOSE THEY MAY BE REQUIRED, NOR CAN THEY SUPPLY ATTESTED COPIES.

If a candidate has already submitted the certificates required in paragraphs 3, 5(i), 5(ii), 7, 8 and 9(b) above in connection with another examination conducted by the Union Public Service Commission and if they have not yet been returned to him, he should mention the fact when submitting his application, and if possible enclose a copy of each certificate. If the certificates are not with the Commission, they should be sent with the application, irrespective of whether the candidate appeared at a previous examination conducted by the Commission or not.

11. The fact that an application form has been supplied on a certain date, will not be accepted as an excuse for the late submission of an application. The supply of an application form does not *ipso facto* make the receiver eligible for admission to the examination.

12. If a candidate does not receive an acknowledgement of his application within a fortnight from the last date of receipt of applications for the examination, he should at once contact the Commission for the acknowledgement.

13. Every candidate for admission to this examination will be informed at the earliest possible date of the result of his application. It is not, however, possible to say when the result will be communicated. But if a candidate does not receive from the Union Public Service Commission a communication regarding the result of his application one month before the commencement of the examination, he should at once contact the Commission for the result. Failure to comply with this provision will deprive the candidate of any claim to consideration.

14. Copies of pamphlets containing *inter alia* the question papers of the I.A.S. etc. examinations held in the past are on sale with the Manager of Publications, Civil Lines, Delhi-6, and may be obtained from him direct by mail orders only. These can also be obtained against cash payment from (i) the Kitab Mahal, Theatre Communications Building, Connaught Place, New Delhi and (ii) the Government of India Book Depot, 8-Hastings Street, Calcutta. The pamphlets are also obtainable from the agents for the Government of India publications at various mofussil towns.

15. *Communications regarding Applications.*—ALL COMMUNICATIONS IN RESPECT OF AN APPLICATION SHOULD BE ADDRESSED TO THE SECRETARY, UNION PUBLIC SERVICE COMMISSION, DHOLPUR HOUSE, NEW DELHI-11, AND SHOULD INVARIABLY CONTAIN THE FOLLOWING PARTICULARS :—

1. NAME OF EXAMINATION.
2. MONTH AND YEAR OF EXAMINATION.
3. ROLL NUMBER (IF COMMUNICATED TO CANDIDATE).
4. NAME OF CANDIDATE (IN BLOCK CAPITALS).
5. POSTAL ADDRESS AS GIVEN IN APPLICATION.

N.B.—COMMUNICATIONS NOT CONTAINING THE ABOVE PARTICULARS MAY NOT BE ATTENDED TO.

16. *Change in Address.*—A CANDIDATE MUST SEE THAT COMMUNICATIONS SENT TO HIM AT THE ADDRESS STATED IN HIS APPLICATION ARE REDIRECTED, IF NECESSARY. CHANGE IN ADDRESS SHOULD BE COMMUNICATED TO THE COMMISSION AT THE EARLIEST OPPORTUNITY GIVING THE PARTICULARS MENTIONED IN PARAGRAPH 15 ABOVE. ALTHOUGH THE COMMISSION MAKE EVERY EFFORT TO TAKE ACCOUNT OF SUCH CHANGES THEY CANNOT ACCEPT ANY RESPONSIBILITY IN THE MATTER.

NOTICE

INDIAN NAVY EXAMINATION, DECEMBER, 1967.

New Delhi, the 17th June, 1967

No. F.11/1/67-E.I(B).—An examination for admission to the Indian Navy as Special Entry Cadets for the course commencing in July, 1968, will be held by the Union Public Service Commission at ALLAHABAD, BHOPAL, BOMBAY, CALCUTTA, DELHI, MADRAS, PATIALA, SHILLONG and TRIVANDRUM, commencing on 5th December, 1967, in accordance with the Notification No. 1685, dated 2nd May, 1967, published by the Ministry of Defence in the Gazette of India, dated 17th June, 1967.

THE CENTRES AND THE DATE OF COMMENCEMENT OF THE EXAMINATION AS MENTIONED ABOVE ARE LIABLE TO BE CHANGED AT THE DISCRETION OF THE COMMISSION.

Candidates accepted for admission to the examination will be informed of the venue, date and time of the examination.

2. The approximate number of vacancies to be filled on the results of this examination will be 10.

This number is liable to alteration.

3. A candidate must be an unmarried male and must have been born not earlier than 2nd July, 1948 and not later than 1st July, 1951. These age limits can in no case be relaxed.

4. A candidate must have passed the Intermediate or an equivalent examination.

NOTE.—A candidate who has appeared at an examination the passing of which would render him eligible to appear at this examination but has not been informed of the result may apply for admission to the examination. A candidate who intends to appear at such a qualifying examination may also apply. Such candidates will be admitted to this examination, if otherwise eligible, but the admission would be deemed to be provisional and subject to cancellation if they do not produce proof of having passed the examination as soon as possible, and in any case not later than 30th June, 1968.

5. A candidate seeking admission to the examination must apply to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11, on the prescribed form of application. The prescribed forms of application and full particulars of the examination are obtainable from the Commission by post on payment of Re. 1.00 which should be remitted by Money Order, to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11, stating clearly the name of the examination in respect of which the application form is required. Postal Orders or cheques or currency notes will not be accepted in lieu of Money Orders. The forms can also be obtained on cash payment at the counter in the Commission's office. *This amount of Re. 1.00 will in no case be refunded.*

Application forms and connected papers can also be obtained without any payment from any of the authorities noted below :—

(i) The Flag Officer, Bombay, Vithal House, Mint Road, Bombay.
(ii) The Commodore-in-Charge, Cochin.
(iii) The Commodore, East Coast, Visakhapatnam.
(iv) The Resident Naval Officer, Calcutta.
(v) The Resident Naval Officer, Madras.

6. The completed application form *must* reach the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11, on or before the 14th August, 1967, accompanied by necessary documents in accordance with the instructions to candidates contained in Annexure II. *No application received after that date will be considered.*

Applications from candidates residing abroad and those residing in the Andaman and Nicobar Islands will, however, be accepted up to the 29th August, 1967. (This is applicable to persons actually residing abroad or in the Andaman and Nicobar Islands at the time of submission of their applications).

NOTE.—Candidates who send their applications or requests for application forms at a late date will do so at their own risk.

7. THE PRESCRIBED FEE (SEE ANNEXURE I) SHOULD BE PAID BY INDIAN POSTAL ORDERS WITH THE APPLICATION.

AN APPLICATION NOT ACCOMPANIED BY CROSSED INDIAN POSTAL ORDERS FOR THE PRESCRIBED FEE WILL BE SUMMARILY REJECTED. THIS DOES NOT APPLY TO THE DISPLACED PERSONS FROM EAST PAKISTAN AND THE REPATRIATES OF INDIAN ORIGIN FROM BURMA AND CEYLON WHO HAVE MIGRATED TO INDIA ON OR AFTER 1ST JANUARY 1964, 1ST JUNE 1963 AND 1ST NOVEMBER, 1964 RESPECTIVELY AND ARE SEEKING REMISSION OF THE PRESCRIBED FEE *VIDE* PARAGRAPH 3 OF ANNEXURE I.

EACH POSTAL ORDER SHOULD INVARIABLY BE CROSSED AS SHOWS BELOW :

AND COMPLETED AS FOLLOWS :

"PAY TO THE SECRETARY, UNION PUBLIC SERVICE COMMISSION AT NEW DELHI GENERAL POST OFFICE".

CANDIDATES MUST NOTE THAT IT IS NOT SAFE TO SEND POSTAL ORDERS WHICH ARE NEITHER CROSSED NOR MADE PAYABLE TO THE SECRETARY, UNION PUBLIC SERVICE COMMISSION, AT NEW DELHI GENERAL POST OFFICE. FULL PARTICULARS OF POSTAL ORDERS SHOULD BE ENTERED AGAINST COLUMN 28 OF THE APPLICATION FORM.

8. If any candidate taking the examination to be held in July, 1967 for entry to the Indian Navy, wishes to apply for admission to the examination notified here he must submit his application by the prescribed date without waiting for the results or an offer of admission to the Indian Navy. If he joins the Academy on the results of July, 1967 Examination, his candidature for this examination will be cancelled on request, and the fee refunded to him, as in the case of a candidate not admitted to the examination, *vide* para 2 of Annexure I.

9. All communications in respect of an application should be addressed to the Secretary, Union Public Service Commission Dholpur House, New Delhi-11, and should contain the following particulars :—

(i) NAME OF EXAMINATION
(ii) MONTH AND YEAR OF EXAMINATION
(iii) ROLL NUMBER (IF COMMUNICATED TO CANDIDATE)
(iv) NAME OF CANDIDATE (IN BLOCK CAPITALS)
(v) POSTAL ADDRESS AS GIVEN IN APPLICATION.

Communications not giving these particulars may not be attended to. In all correspondence with the Union Public Service Commission concerning this examination, candidates should invariably superscribe their envelopes and correspondence with the words "INDIAN NAVY SPECIAL ENTRY EXAMINATION, DECEMBER, 1967".

N. C. TALUKDAR
Deputy Secretary
Union Public Service Commission

ANNEXURE I

FEE

Candidates seeking admission to the examination must pay the following fee to the Commission, with the completed application form :—

Rs. 28.00 (Rs. 7.00 in the case of candidates belonging to the Scheduled Castes and the Scheduled Tribes). This amount should be paid by means of CROSSED Indian Postal Orders payable to the Secretary, Union Public Service Commission. The Commission will not accept payment made otherwise.

2. Once an application has been considered by the Commission and their decision admitting a candidate to the examination communicated to him, no claim from the candidate for a refund of the fee paid by him to the Commission will be entertained, nor can the fee be held in reserve for any other examination or selection. If, however, a candidate is not admitted to the examination by the Commission, a refund of Rs. 15.00 (Rs. 4.00 in the case of candidates belonging to the Scheduled Castes and the Scheduled Tribes) will be made to him.

3. The Commission may at their discretion remit the prescribed fee where they are satisfied that the applicant is a *bona fide* displaced person from East Pakistan and has migrated to India on or after 1st January, 1964 or is a *bona fide* repatriate of Indian origin from Burma and has migrated to India on or after 1st June, 1963, or is a *bona fide* repatriate of Indian origin from Ceylon and has migrated to India on or after 1st November 1964, and is not in a position to pay the prescribed fee.

ANNEXURE II

INSTRUCTIONS TO CANDIDATES

1. A copy each of the Notice, the Rules, the Application Form and other papers relating to the Examination is obtainable from the office of the Union Public Service Commission and certain other authorities in accordance with para 5 of the Notice. *Candidates should consult them carefully to see if they are eligible before filling in the application form or paying the prescribed fee. The conditions prescribed cannot be relaxed.*

BEFORE SUBMITTING THE APPLICATION THE CANDIDATE MUST SELECT FINALLY FROM AMONG THE CENTRES GIVEN IN PARAGRAPH 1 OF THE NOTICE THE PLACE AT WHICH HE WISHES TO APPEAR FOR THE EXAMINATION. ORDINARILY NO REQUEST FOR A CHANGE IN THE PLACE SELECTED WILL BE ENTERTAINED.

2. The application form must be completed in the candidate's own hand-writing and all answers should be given in words. It should be submitted direct to the Secretary, Union Public Service Commission, Dholpur House, New Delhi-11.

No application received by the Commission after the date prescribed in the Notice will be accepted.

A candidate already in Government Service, whether in a permanent or temporary capacity, must submit his application through the Head of his Department or office concerned who will complete the endorsement (*vide* Section 'C' of the application form) and forward it to the Commission.

Applications from all other candidates, whether in private employment or in Government owned industrial undertakings or other similar organisations, can be entertained direct. If such a candidate forwards his application through his employer and it reaches the Union Public Service Commission late, the application, even if submitted to the employer before the closing date, will not be entertained.

A candidate employed in Army, Navy or Air Force must submit his application through his Commanding officer who will complete the endorsement (*vide* Section 'C' of the application form) and forward it to the Commission.

3. Candidates are warned that they should not furnish any particulars that are false or suppress any material information in filling in the application form.

4. A candidate must send the following documents with his application :—

(i) CROSSED Indian Postal Orders payable to the Secretary, Union Public Service Commission at New Delhi General Post Office, for Rs. 28.00 (Rs. 7.00 in the case of candidates belonging to the Scheduled Castes or the Scheduled Tribes).

(ii) Certificate of Age.

(iii) Certificate of Educational Qualification.

(iv) Two copies of recent passport size (5 cm. × 7 cm. approx.) photograph of the candidate.

(v) Certificate to be signed by the Parent/Guardian of a minor candidate.

Details of the documents mentioned in items (i), (ii), (iii), (iv) and (v) are given below :—

(i) *CROSSED Indian Postal Orders for the prescribed fee.*—All Postal Orders should bear the signature of the issuing Post Master and a clear stamp of the issuing Post Office. All Postal Orders should be CROSSED and filled in as follows :—

"Pay to the Secretary, Union Public Service Commission, at New Delhi General Post Office".

In no case will Postal Orders payable at any other Post Office be accepted. Defaced or mutilated Postal Orders will also not be accepted.

NOTE.—Candidates residing abroad at the time of submitting their applications should deposit the amount of the prescribed fee the equivalent of Rs. 28.00 (Rs. 7.00 in the case of candidates belonging to the Scheduled Castes and the Scheduled Tribes) in the Office of India's High Commissioner, Ambassador or Representative, as the case may be, in that country who should be asked to credit the amount to the account head "XXI—Miscellaneous Department Examination fee—Receipts of the Union Public Service Commission". The candidates should forward the receipt from that office with the application.

(ii) *Certificate of Age.*—The date of birth ordinarily accepted by the Commission is that entered in the Matriculation Certificate or in the Secondary School Leaving Certificate, or in a certificate recognised by an Indian University as equivalent to Matriculation or in an extract from a Register of Matriculates maintained by a University, which extract must be certified by the proper authority of the University. The expression 'Matriculation Certificate' in this part of the instructions must be understood as including these alternative certificates.

Candidates will thus understand that the Matriculation Certificate is required in all cases as evidence of age, and it must invariably be sent to the Commission, in original, with a copy thereof, together with the application.

Sometimes the Matriculation or equivalent Certificate does not show the date of birth, or only shows the age by completed years or completed years and months. In such cases a candidate must send, in addition to the Matriculation or equivalent certificate, an original certificate together with a copy thereof from the Headmaster/Principal of the institution from where he passed the Matriculation or equivalent examination, showing the date of his birth or his exact age as recorded in the Admission Register of the Institution.

Candidates are warned that unless complete proof of age as laid down in these instructions is sent with an application the application may be rejected. Further, they are warned that if the date of birth stated in the application is inconsistent with the age shown in the Matriculation Certificate and no explanation is offered, the application may be rejected.

NOTE 1.—A candidate who holds a completed Secondary School Leaving Certificate need submit with the original a copy of only the page containing entries relating to age.

NOTE 2.—CANDIDATES SHOULD NOTE THAT ONCE A DATE OF BIRTH HAS BEEN CLAIMED AND ACCEPTED BY THE COMMISSION FOR THE PURPOSE OF ADMISSION TO AN EXAMINATION, NO CHANGE WILL ORDINARILY BE ALLOWED AT A SUBSEQUENT EXAMINATION.

(iii) *Certificate of Educational Qualification.*—A candidate must submit a certificate or diploma, in original with a copy thereof, showing that he has one of the qualifications prescribed in paragraph 8 of the Notification. The certificate submitted must be one issued by the authority (i.e. University or other examining body) awarding the particular qualification. If such a certificate or diploma is not submitted, the candidate must explain its absence and submit such other evidence, in original, as he can to support his claim to the requisite qualifications. The Commission will consider this evidence on its merits but do not bind themselves to accept it as sufficient.

NOTE.—A candidate who has appeared at an examination the passing of which would render him eligible to appear at this examination but has not been informed of the result or who intends to appear at such a qualifying examination may apply for admission to this examination but he must submit a certificate in the form prescribed below, from the principal of the College/Institution concerned. Such candidates will be admitted to this examination, if otherwise eligible, but the admission would be deemed to be provisional and subject to cancellation if they do not produce proof of having passed the examination, as soon as possible, and in any case not later than 30th June, 1968. Such candidates are required to submit the proof of passing the qualifying examination by the above date, whether they qualify or not at the written part of this examination. If they fail to comply with this instruction, their candidature will be cancelled and they will not be entitled to know their result.

The form of certificate to be produced by the candidate.

This is to certify that Shri_____ son of Shri_____ is expected to appear/has appeared* at_____ Examination conducted by_____ in the month of _____ 19 .

(Signature of Principal)

*(Name of the College/Institution)**

Date_____
Place_____

*Strike out whichever is not applicable.

(iv) *Two copies of photographs.*—A candidate must submit two passport size (5 cm. × 7 cm. approx.) copies of his recent photograph, one of which should be pasted on the first page of the application form and the other copy should be firmly attached with the application form. Each copy of the photograph should be signed in ink on the front by the candidate.

(v) *Certificate to be signed by the parent/guardian of a minor candidate.*—A candidate who is minor should submit this certificate on the form enclosed with the application form, duly completed by his parent/guardian, along with the application. If such a candidate is unable to submit this certificate with his application, he must give a reasonable explanation for its absence with his application. In that case, he should detach the certificate from the application form and produce it at the time of his appearance before the Services Selection Board, in case he qualified on the result of the written part of the examination.

Minor candidates MUST note that they will not be admitted to the Services Selection Board interview without this certificate.

CANDIDATES ARE WARNED THAT THEY SHOULD IN NO CASE DELAY SUBMISSION OF THE APPLICATION FOR WANT OF THIS CERTIFICATE.

5. Cadidates are warned that if an application is incompletely or wrongly filled or is not accompanied with any one of the documents mentioned under paragraph 4(ii), 4(iii), 4(iv) and 4(v) above without a reasonable explanation for its absence having been given, the application is liable to be rejected and no appeal against its rejection will be entertained. The documents not submitted with the application should be sent soon after the submission of the application, and in any case they must reach the Commission's office [except as provided for in Note under paragraph 4(iii) and in para 4(v) above] within one month of the last date prescribed for receipt of applications. Otherwise, his application is liable to be rejected.

Candidates are also warned that they should in *no case* correct or alter or otherwise tamper with any entry in the documents submitted by them nor should they submit a tampered document. If there is any inaccuracy or any discrepancy between two or more such documents, an explanation regarding the discrepancy may be submitted separately.

6. Candidates may be required at the interview by the Services Selection Board to produce the original of any documents, copies of which have been submitted.

7. A candidate who claims to belong to one of the Scheduled Castes or the Scheduled Tribes should submit in support of his claim a certificate, in original, with a copy thereof, in the form given below from the District Officer or the Sub-Divisional Officer or any other officer of the district in which his parents (or surviving parent) ordinarily reside, who has been designated by the State Government as competent to issue such a certificate; if both his parents are dead, of the district in which he himself ordinarily resides otherwise than for the purpose of his own education.

A candidate from the Union Territory fo Delhi may submit such a certificate also from the Additional District Magistrate or the 1st Class Stipendiary Magistrate or the Revenue Assistant.

The form of the certificate to be produced by Scheduled Castes and Scheduled Tribes candidates applying for appointment to posts under the Government of India.

(v) Administrator/Secretary to Administrator/Development Officer (Laccadive, Minicoy and Amindivi Islands).

8. (i) A displaced person from East Pakistan seeking remission of the prescribed fee under paragraph 3 of Annexure I should produce a certificate, in original, together with a copy thereof from the Camp Commandant of the Transit Centres of the Dandakaranya Project, or the Camp Commandant of the Relief Camps or the District Magistrate of the area in which he may for the time being be resident, to show that he is a *bona fide* displaced person from East Pakistan and has migrated to India on or after 1st January, 1964. He should also produce a certificate in original from a District Officer or a Gazetted Officer of Government or a Member of the Parliament or State Legislature to show that he is not in a position to pay the prescribed fee.

(ii) A repatriate of Indian origin from Ceylon seeking remission of the prescribed fee under paragraph 3 of Annexure I should produce, in original, together with a copy thereof, a certificate from the High Commission for India in Ceylon to show that he is an Indian citizen who has migrated to India on or after 1st November, 1964 under the Indo-Ceylon Agreement of October, 1964. He should also produce a certificate in original, from a District Officer or a Gazetted Officer of Government or a Member of the Parliament or State Legislature to show that he is not in a position to pay the prescribed fee.

(iii) A repatriate of Indian origin from Burma, seeking remission of the prescribed fee under paragraph 3 of Annexure I, should produce, in original, together with a copy thereof, the identity certificate issued to him by the Embassy of India, Rangoon to show that he is an Indian citizen, who has migrated to India, on or after 1st June, 1963 or a certificate from the District Magistrate of the area, in which he may be resident to show that he is a *bona fide* repatriate from Burma and has migrated to India, on or after 1st June, 1963. He should also produce a certificate, in original, from a District Officer or a Gazetted Officer of Government or a Member of the Parliament or State Legislature, to show that he is not in a position to pay the prescribed fee.

9. (a) A person in whose case a certificate of eligibility is required *vide* para 4 of the Notification should apply to the Government of India, Ministry of Defence for issue of the required certificate of eligibility in his favour after he has been finally selected for training.

(b) If a certificate of eligibility is not necessary in the case of a person he should produce an affidavit on non-judicial stamp paper sworn before a first class Magistrate in one of the following forms, whichever may be applicable to him :—

(1) "I declare that I migrated to India from areas which now form Pakistan before the nineteenth day of July, 1948, and have ordinarily been resident in India since then."

(2) "I declare that I migrated to India from areas which now form Pakistan on or after the nineteenth day of July, 1948, and have ordinarily been resident in India since then and I further declare that I have got myself registered as a citizen of India under Article 6 of the Constitution."

NOTE.—A candidate whose case is covered by item (2) above may submit the certificate of Registration as citizen of India, in original along with a copy thereof, in lieu of an Affidavit sworn before a First Class Magistrate as required under sub-para (b) above.

10. THE CERTIFICATES MENTIONED IN PARAGRAPHS 4(ii), 4(iii), 7, 8 AND 9(b) ABOVE SHOULD INVARIABLY BE SENT IN ORIGINAL (WITH COPIES THEREOF). THE COMMISSION DO NOT ACCEPT ONLY COPIES OF THESE CERTIFICATES, WHETHER ATTESTED OR OTHERWISE.

THE ORIGINALS OF THE CERTIFICATES FORWARDED IN ACCORDANCE WITH PARAGRAPHS 4(ii), 4(iii), 7, 8 AND 9(b) ABOVE WILL BE RETURNED WHEN THE RESULT OF THE APPLICATION IS COMMUNICATED. CANDIDATES ARE ADVISED TO KEEP ATTESTED COPIES OF THEIR CERTIFICATES BEFORE SUBMITTING THEM TO THE COMMISSION. THE COMMISSION CANNOT RETURN THE CERTIFICATES EARLIER THAN THE DATE OF COMMUNICATION OF THE RESULT OF THE APPLICATION FOR WHATEVER PURPOSE THEY MAY BE REQUIRED. NOR CAN THEY SUPPLY ATTESTED COPIES.

If a candidate has already submitted the certificates required in paragraphs 4(ii), 4(iii), 7, 8 and 9(b) above in connection with another examination conducted by the Union Public Service Commission and if they have not yet been returned to him he should mention the fact when submitting his application and, if possible, enclose a copy of each certificate. If the certificates are not with the Commission, they should be sent with the application, irrespective of whether the candidate appeared at any previous examination conducted by the Commission or not. If a certificate cannot be submitted with the application, a reasonable explanation for its absence must be given with the application.

11. The fact that an application form has been supplied on a certain date, will not be accepted as an excuse for the late submission of an application. The supply of an application form does not *ipso facto* make the receiver eligible for admission to the examination.

12. If a candidate does not receive an acknowledgement of his application within a fortnight from the last date of receipt of applications for the examination he should at once contact the Commission for the acknowledgement.

13. Every candidate for admission to this examination will be informed at the earliest possible date of the result of his application. It is not, however, possible to say when the result will be communicated. But if a candidate does not receive from the Union Public Service Commission a communication regarding the result of his application one month before the commencement of the examination, he should at once contact the Commission for the result. Failure to comply with this provision will deprive the candidate of any claim to consideration.

14. Copies of pamphlets containing rules and question papers of the examinations held in previous years are on sale with the Manager of Publications, Civil Lines, Delhi-6, and may be obtained from him direct by mail orders only. These can also be obtained against cash payment from (i) the Kitab Mahal, Theatre Communications Building, Cannaught Place, New Delhi, and (ii) the Government of India Book Depot, 8, Hastings Street, Calcutta. The pamphlets are also obtainable from the agents for the Government of India publications at various moffussil towns.

15. *Communications regarding Applications.*—ALL COMMUNICATIONS IN RESPECT OF AN APPLICATION SHOULD BE ADDRESSED TO THE SECRETARY, UNION PUBLIC SERVICE COMMISSION, NEW DELHI-11, AND SHOULD INVARIABLY CONTAIN THE FOLLOWING PARTICULARS :—

(1) NAME OF EXAMINATION.
(2) MONTH AND YEAR OF EXAMINATION.
(3) ROLL NUMBER (IF COMMUNICATED TO CANDIDATE).
(4) NAME OF CANDIDATE (IN BLOCK CAPITALS).
(5) POSTAL ADDRESS AS GIVEN IN APPLICATION.

N.B.—COMMUNICATIONS NOT GIVING THE ABOVE PARTICULARS MAY NOT BE ATTENDED TO.

16. *Change in Address.*—A CANDIDATE MUST SEE THAT COMMUNICATIONS SENT TO HIM AT THE ADDRESS STATED IN HIS APPLICATION ARE REDIRECTED, IF NECESSARY. CHANGE IN ADDRESS SHOULD BE COMMUNICATED TO THE COMMISSION AT THE EARLIEST OPPORTUNITY GIVING THE PARTICULARS MENTIONED IN PARAGRAPH 15 ABOVE. IF A CANDIDATE, WHOSE NAME HAS BEEN RECOMMENDED FOR INTERVIEW BY THE SERVICES SELECTION BOARD, CHANGES HIS ADDRESS AFTER THE ANNOUNCEMENT OF THE RESULT OF THE WRITTEN EXAMINATION, HE SHOULD NOTIFY IT TO THE COMMISSION AND ALSO TO NAVAL HEADQUARTERS, NEW DELHI-11. ALTHOUGH THE AUTHORITIES MAKE EVERY EFFORT TO TAKE ACCOUNT OF SUCH CHANGES THEY CANNOT ACCEPT ANY RESPONSIBILITY IN THE MATTER.

17. Candidates whose names have been recommended for interview by the Services Selection Board should address enquiries or requests, if any, relating to their interview, direct to the Naval Headquarters, New Delhi-11.

Advertisement No. 24

Applications are invited for undermentioned posts. Age as on 1-1-1967 must be within the prescribed age limits but is relaxable for Government servants except where otherwise specified. Upper age limit relaxable up to 45 years for displaced persons from East Pakistan who migrated on or after 1-1-1964 and repatriates from Burma and Ceylon who migrated on or after 1-6-1963 and 1-11-1964 respectively. Upper age limit relaxable by 5 years for Scheduled Castes and Scheduled Tribes candidates. No relaxation for others save in exceptional circumstances and in no case beyond a limit of 3 years. Qualifications relaxable at Commission's discretion in case of candidates otherwise well qualified. Higher initial pay may be granted to specially qualified and experienced candidates except where otherwise specified.

Particulars and application forms obtainable from Secretary, Union Public Service Commission, Post Box No. 186, New Delhi. Request for forms must specify name of post, advertisement number and item number and should be accompanied by self addressed unstamped envelopes for each post at least of size 23 × 10 cms. indicating thereon name of post for which forms are required. Commission may remit fee in the case of genuinely indigent and *bona fide* displaced persons from East Pakistan who migrated on or after 1-1-1964. Separate application with separate fee required for each post. Candidates abroad may apply on plain paper if forms are not available and deposit fee with local Indian Embassy. If required candidates must appear for personal interview. Closing date for receipt of applications with crossed Indian Postal Order for Rs. 8.00 (Rs. 2.00 for Scheduled Castes and Scheduled Tribes), 17th July 1967 (31st July 1967 for applicants from abroad). Treasury receipts not acceptable.

Madras-1, the 29th May 1967

ORDER

No. Agar/XXXIV/26/49/65-66/SSI.1.—M/s. Vijayavardhan Enterprises, 15/115, Venkataramapuram, Nellore was granted an import licence No. P/SS/1546565/C/XX/23/C/M/21-22 dated 21-6-1966 for Rs. 768. They have applied for a duplicate Customs and Exchange Control copy of the licence on the ground that the original licence has been lost in postal transit. It is further stated that the original licence has not been utilised. In support of this contention the applicant has filed an affidavit. I am satisfied that the original Customs and Exchange Copy of the licence No. P SS/1546565/C/XX/23/C/M/21-22 dt. 21-6-1966 has been lost and direct that a duplicate Customs and Exchange Control copy of the licence should be issued to the applicant. The original licence is cancelled.

The 3rd June 1967

ORDER

No. Spl/863/NP/AM.67/SSI.—M/s. Vijayavardhan Enterprises, 15/115, Venkataramapuram, Nellore was granted an import licence No. P/SS/1594491/C/XX/23/C/M/23-24 dated 13-9-1966 for Rs. 6032. They have applied for a duplicate Customs and Exchange Control copy of the licence on the ground that the original licence has been lost in postal transit. It is further stated that the original licence has been utilised for Rs. 1612.15 leaving a balance of Rs. 4419.85. In support of this contention the applicant has filed an affidavit. I am satisfied that the original Customs and Exchange copy of the licence No. P/SS/1594491/C/XX/23/C/M/23-24 dated 13-9-1966 has been lost and direct that a duplicate Customs and Exchange Control copy of the licence should be issued to the applicant. The original licence is cancelled.

ORDER

SUB: *Cancellation of Customs purpose copy of licence No. P/SS/1507877/C/XX/24/C/X/23-24 dated 7-1-1967.*

No. 4/AAR/Bang/AM.68/SSI.—M/s. The B.B.D. Power Press, 43, Setty Muddanna Lane, Cottonpet, Bangalore-2 were granted an import licence No. P/SS/1507877/C/XX/24/C/X/23-24 dated 7-1-1967 for Rs. 2,495. They have applied for a duplicate copy of the customs purpose copy of the licence on the ground that the original customs purpose copy of the licence has been lost or misplaced. It is further stated that the original licence has not been registered with any customs authorities and not utilised.

In support of this contention, the applicants have filed an affidavit. I am satisfied that the original Customs purpose copy of the licence No. P/SS/1507877/C/XX/24/C/X/23-24 dated 7-1-1967 has been lost and direct that a duplicate customs purpose copy of the licence should be issued to the applicant. The original licence is cancelled.

H. C. BAHRI
Commissioner of Income-tax, Uttar Pradesh

Ernakulam-6, the 31st May 1967

INCOME-TAX

No. C1(9)G1/67-68.—In exercise of the powers conferred on him under sub-section (1) of Section 124 of the Income-tax Act, 1961 (Act 43 of 1961), the Commissioner of Income-tax, Kerala, Ernakulam, hereby directs that the following modifications shall be made to the schedule attached to his notification C. No. 204-Adm/66-67 dated the 27th July, 1966, as modified by the notifications C. No. 204-Adm/66-67 dated 23-8-1966, 31-10-1966, 23-12-1966 and 7-1-1967 and notification C. No. 1(9)G1/67-68 dated the 2nd May, 1967.

2. In Sl. No. 1 (Trivandrum Circle), against the entry I.T.O., B-Ward, Trivandrum, delete the following entry appearing at para 2 in column 4 and renumber paras 3 and 4 as paras 2 and 3 respectively :—

"Other salary earners whose salaries are subject to deduction under section 18 of the Indian Income-tax Act, 1922 or under section 192 of the Income-tax Act, 1961 and who are residing within the Revenue Taluks of Trivandrum and Quilon districts."

3. In Sl. No. 2 (Salary Circle, Trivandrum), delete the present entries appearing at paras 1 and 2 in column 4 and substitute the following :—

"1. All Government servants (Central and State Government employees) under the audit control of the Accountant General Kerala, Trivandrum, working within the territorial jurisdiction of the Income-tax Circle, Trivandrum, from time to time, excluding the employees covered by the notifications issued by the Central Board of Revenue under section 5(6) of the Indian Income-tax Act, 1922 or by the Central Board of Direct Taxes under section 126 of the Income-tax Act, 1961, from time to time.

2. All other salary earners whose salaries are subject to deduction under section 18 of the Indian Income-tax Act, 1922 or under section 192 of the Income-tax Act, 1961 and who are residing within the Revenue Districts of Trivandrum and Quilon."

4. In Sl. No. 2 (Salary Circle, Trivandrum), in para 3 of column 4, add the word "Trivandrum" after the words "I.T.Os., Companies Circle, Ernakulam" and before the words "and Calicut."

5. In Sl. No. 3 (Quilon Circle) against the entry, I.T.O., B-Ward, Quilon, add the following paragraph as para 3 in column 4 :

"All Government servants (Central and State Government employees) under the audit control of the Accountant General, Kerala, Trivandrum, working in the territorial jurisdiction of the Incometax Circle, Quilon from time to time excluding the employees covered by notifications issued by the Central Board of Revenue under section 5(6) of the Indian Income-tax Act, 1922 or by the Central Board of Direct Taxes under section 126 of the Income-tax Act, 1961, from time to time."

6. In Sl. No. 4 (Kottayam Circle) against the entry I.T.O., A-Ward, Kottayam, delete the entry in para 1 and substitute the following :

"1. All persons [except those assigned to the I.T.O., Salary Circle, Trivandrum, the I.T.O., Companies Circle, Trivandrum and to other I.T.Os under section 5(7A) of the Indian Income-tax Act, 1922, as well as under section 127(1) of the Income-tax Act, 1961] in the Revenue Taluks of Kottayam (including Municipal town of Kottayam), Peermade and Udumbanchola in Kottayam district whose total income as per the last completed assessment as on 1-4-1966 exceeds Rs. 20,000 and all such persons in the Revenue Taluks of Meenachil and Kanjirappally in Kottayam district whose total income as per the last completed assessment as on 1-4-1966 exceeds Rs. 50,000."

7. In Sl. No. 4 (Kottayam Circle), against the entry, I.T.O., B-Ward, Kottayam, delete the present entry in para 1 and substitute the following :—

"1. All persons [except those assigned to the I.T.O., Salary Circle, Trivandrum, I.T.O., Companies Circle, Trivandrum and to other I.T.Os u/s 5(7A) of the Indian Income-tax Act, 1922, as well as u/s 127(1) of the Income-tax Act, 1961] within the Revenue Taluks of Kottayam (excluding the Municipal town of Kottayam included in the jurisdiction of the I.T.O., C-Ward, Kottayam), Meenachil and Kanjirappally in Kottayam districts who are not assessable by the I.T.O., A-Ward, Kottayam."

8. In Sl. No. 4 (Kottayam Circle) against the entry, I.T.O., C-Ward, Kottayam, add the following paragraph as para 4 in column 4 :—

"All Government servants (Central and State Government employees) under the audit control of the Accountant General, Kerala, Trivandrum, working in the territorial jurisdiction of the I.T. Circle, Kottayam from time to time excluding the employees covered by notifications

issued by the Central Board of Revenue under section 5(6) of the Indian Income-tax Act, 1922 or by the Central Board of Direct Taxes under section 126 of the Income-tax Act, 1961" from time to time."

9. In Sl. No. 5 (Alleppey Circle), against the entry I.T.O., B-Ward, Alleppey, add the following paragraph as para 3 in column 4 :—

"All Government servants (Central and State Govt. employees) under the audit control of the Accountant General, Kerala, Trivandrum, working in the territorial jurisdiction of the I.T. Circle, Alleppey, from time to time excluding the employees covered by notifications issued by the Central Board of Revenue under section 5(6) of the Indian Income-tax Act, 1922 or by the Central Board of Direct Taxes under section 126 of the Income-tax Act, 1961 from time to time."

Pay.*—Rs. 350-25-500-30-590-EB-30-800-EB-30-830-35-900. *Age.*—35 years & below. *Qualifications.*—*Essential.*—(i) M.Sc. degree in Chemistry/Biochemistry/Food Technology of a recognised University or equivalent.

10. *One Director, National Centre for the Blind, Dehra Dun, Department of Social Welfare. Pay.*—Rs. 700-40-1100-50/2-1250. *Age.*—45 years & below. *Qualifications.*—*Essential.*—(i) Master's degree of a recognised University or equivalent. (ii) Diploma or Certificate in the Education of the Blind from a recognised University/Institution. (iii) About ten years' teaching and/or administrative experience in the education, training and rehabilitation of the blind.

11. *One Director, Regional Office, Tobacco Development, Madras, Ministry of Food, Agriculture, Community Development & Cooperation. Pay.*—Rs. 1100-50-1400. *Age.*—45 years & below. *Qualifications.*—*Essential.*—(i) M.Sc. degree in Botany or Agricultural Botany or Agriculture with specialisation in Agronomy/Plant Breeding and Genetics with particular reference to tobacco crop from a recognised University or equivalent. (ii) About seven years' experience in Agricultural Research/Development/Extension Work.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 7th January, 1967.

SPECIAL NOTICE

It is hereby notified for general information that the holidays specified below will be observed by The Patent Office, Calcutta during the year 1967.

Name of Festival	Day of the Week	Date
Idu'l Fitr	Friday	13th January
Netaji's Birthday	Monday	23rd January
Republic Day	Thursday	26th January
Sree Panchami	Tuesday	14th February
Good Friday	Friday	24th March
Bengali New Year's day	Saturday	15th April
Muharram	Friday	21st April
Independence Day	Tuesday	15th August
Mahatma Gandhi's Brith-day.	Monday	2nd October
Durgapuja	Tuesday	10th October
	Wednesday	11th October
	Thursday	12th October
	Friday	13th October
Lakshmi Puja	Tuesday	17th October
Kalipuja	Wednesday	1st November
Christmas Day	Monday	25th December

Application for Patents

The dates shown in crescent brackets are the dates claimed [under Section 78A of the Act.

17th December 1966

108481. R. Lakshmanaperumal. Molasses filter (working) process one.

108482. R. Lakshmanaperumal. Molasses Filter working process two.

108483. I. L. Mehta. Vacuum brick.

108484. Makewell Engineers. Improvements in or relating to domestic flour mill or the like.

108485. Veb Filmfabrik Wolfen. Photographic film and process for its manufacture. (14th October 1966).

108486. Ciba Limited. Process for the isolation of cephalosporin C.

108487. Tokai Loom Works Ltd. Device for automatically unwinding a weft from a bobbin for use in a loom, automatic bobbin changing device and an improved bobbin therefor.

108488. Murata Machinery Limited and Toyo Boseki Kabushiki Kaisha. An improved automatic winder. (17th December 1965).

108489. Research Institute for Medicine and Chemistry, Inc. Chemical compounds. (17th December 1965).

108490. Shell Internationale Research Maatschappij N. V. Process for the preparation of a polyurethane foam.

108491. The British Iron and Steel Research Association. Formation of aluminium coatings on steel substrates.

108492. Progil. Process for manufacturing carbon disulphide.

19th December 1966

108493. B. K. Sinha. Liver steam engine.

108494. P. R. Gupta. Improvements in device for ascertaining or maintaining constant the level or liquid electrolyte in wet storage batteries.

108495. Phillips Petroleum Company. Improved process for pelleting carbon black.

108496. Phillips Petroleum Company. Improvements in production of carbon black.

108497. Montecatini Edison S.p.A. A process for the production of catalysts containing, olybdenum and/or tungsten.

& below. *Qualifications.—Essential.*—Degree or diploma or equivalent qualification in Mining or in Mining Engineering of a recognised University/Institution.

8. *Reader in Medicine (Infectious Diseases) in Specialists Grade of C.H.S., Ministry of Health & Family Planning. Pay.*—Rs. 600-40-1000-EB-50-1300 plus non-practising allowance @ 50% of pay subject to a maximum of Rs. 600 p.m. and a special pay of Rs. 100 p.m. *Age.*—45 years & below. *Qualifications.—Essential.*—(i) Same as (i) in item 5 above. (ii) Post-graduate qualifications in Medicine i.e. M.D., M.R.C.P. or equivalent. (iii) At least 3 years' experience as a Lecturer in a Medical College/Teaching Institution after the requisite postgraduate qualifications.

9. *One Assistant Research Officer (Processing), Central Institute of Fisheries Technology, Ernakulam, Ministry of Food, Agriculture, Community Development & Cooperation. Pay.*—Rs. 350-25-500-30-590-EB-30-800-EB-30-830-35-900. *Age.*—35 years & below. *Qualifications.—Essential.*—(i) M.Sc. degree in Chemistry/Biochemistry/Food Technology of a recognised University or equivalent.

10. *One Director, National Centre for the Blind, Dehra Dun, Department of Social Welfare. Pay.*—Rs. 700-40-1100-50/2-1250. *Age.*—45 years & below. *Qualifications.—Essential.*—(i) Master's degree of a recognised University or equivalent. (ii) Diploma or Certificate in the Education of the Blind from a recognised University/Institution. (iii) About ten years' teaching and/or administrative experience in the education, training and rehabilitation of the blind.

11. *One Director, Regional Office, Tobacco Development, Madras, Ministry of Food, Agriculture, Community Development & Cooperation. Pay.*—Rs. 1100-50-1400. *Age.*—45 years & below. *Qualifications.—Essential.*—(i) M.Sc. degree in Botany or Agricultural Botany or Agriculture with specialisation in Agronomy/Plant Breeding and Genetics with particular reference to tobacco crop from a recognised University or equivalent. (ii) About seven years' experience in Agricultural Research/Development/Extension Work.

Application for Patents

The dates shown in crescent brackets are the dates claimed [under Section 78A of the Act.

17th December 1966

108481. R. Lakshmanaperumal. Molasses filter (working) process one.

108482. R. Lakshmanaperumal. Molasses Filter working process two.

108483. I. L. Mehta. Vacuum brick.

108484. Makewell Engineers. Improvements in or relating to domestic flour mill or the like.

108485. Veb Filmfabrik Wolfen. Photographic film and process for its manufacture. (14th October 1966).

108486. Ciba Limited. Process for the isolation of cephalosporin C.

108487. Tokai Loom Works Ltd. Device for automatically unwinding a weft from a bobbin for use in a loom, automatic bobbin changing device and an improved bobbin therefor.

108488. Murata Machinery Limited and Toyo Boseki Kabushiki Kaisha. An improved automatic winder. (17th December 1965).

108489. Research Institute for Medicine and Chemistry, Inc. Chemical compounds. (17th December 1965).

108490. Shell Internationale Research Maatschappij N. V. Process for the preparation of a polyurethane foam.

108491. The British Iron and Steel Research Association. Formation of aluminium coatings on steel substrates.

108492. Progil. Process for manufacturing carbon disulphide.

19th December 1966

108493. B. K. Sinha. Liver steam engine.

108494. P. R. Gupta. Improvements in device for ascertaining or maintaining constant the level or liquid electrolyte in wet storage batteries.

108495. Phillips Petroleum Company. Improved process for pelleting carbon black.

108496. Phillips Petroleum Company. Improvements in production of carbon black.

108497. Montecatini Edison S.p.A. A process for the production of catalysts containing, olybdenum and/or tungsten.

108498. General Dynamics Corporation. Measurement and control of rolled material thickness and quality.

108499. United Aircraft Corporation. Railway truck drive system.

108500. Artos Dr. Ing. Meier-Windhorst. A process for continuous dyeing of broadly carried lengths of textile materials with dispersion reactive or similar dyes.

108501. D. Varma. Plain power looms.

108502. The Tata Iron and Steel Company Limited. Composition for making floor tiles and process for making same.

108503. Rohm and Haas Company. Herbicides.

108504. Farbenfabriken Bayer Aktiengesellschaft. Phosphorus containing esters. (17th August 1966).

108505. Simon-Carves Limited. Improvements in or relating to cooling waste gases. (22nd December 1965).

108506. R.J. Geus, W. Kunz, H. Jacobi and C. Koch. Improvements in or relating to 1-*t* Butylamino-3—(Substituted phenoxy)-2-propanols.

108507. The Battelle Development Corporation. Improvements in or relating to radially lamping grips.

108508. Institut Francais Du Petrole Des Carburants Et Lubrifiants. Process for oxydation of paraxylene.

108509. Societa Farmaceutici Italia. Process for the preparation of carboxamidoalkyl--1, 3-benzoxazine.

108510. Tractel Tirfor Indian Private Limited. Improvements in or relating to safety catch.

108511. Franz Plasser Bahnbaumaschinen. Method and device for the improvement of the compactness of the foundation of rail road tracks.

108512. Y.G. Ghalsas, and S.R. Apte. An apparatus to be used with the battery chargers to switch the charger off when the battery reaches, its desired present voltage in the process of charging and also to switch the charger on when the battery runs down its desired voltage.

108513. A. P. Wagle,S.G. Shevade and Dr. C. Nanjundayya. A device to get oscillatory motion for the doffer comb of carding machine.

20th December 1966

108514. K.F. Sutaria. Improvements in or relating to atutomatically operated electrical safety geysers or the like.

108515. The Glacier Metal Company Limited. Improvements in or relating to continuous casting of metal. (21st December 1965).

108516. FMC Corporation. Conversion of allyl alcohol to glycerol.

108517. J. Martin. Improvements in vehicle ejection seats. (25th November 1966).

108518. FMC Corporation. Production of coal char and heavy tar.

108519. Parke, Davis & Company. New polymeric 4, 4'-sulfonyldianiline compounds and methods for their production.

108520. United States Rubber Company. Improvements in self feed ram for extrusion equipment.

108521. Kurashiki Rayon Co., Ltd. Process for gas phase synthesis of vinyl esters.

108522. Dr. D.E. Garrett. Production of potassium chloride, potassium sulfate and sodium sulfate from brines and the like containing potassium, chloride and sulfate.

108523. International Standard Electric Corporation. Axle counting device for track-bound vehicles.

108524. International Standard Electric Corporation. Method to transmit and evaluate signals produced by trains in the railway signalling system.

108525. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of benzodiazepine derivatives.

108526. Deckvale Limited. Improvements in or relating to adjustable supports.

108527. H.S. Pareek. Improvement in or relating to bobbin.

108528. H.S. Pareek. A tape drum pulley used for driving the spindles.

21st December 1966

108529. Ajanta Farm Machinery Company. Sara-cum-channel former.

108530. S. Saigal. Fountain pump.

108531. Phillips Petroleum Company. Improved method for production of carbon black.

108532. Montecatini Edison S.p.A. Process for the preparation of unsaturated nitriles and relative catalysts.

108533. Metalastik Limited. Improvements in or relating to suspension links. (23rd December 1965).

108534. G.K.N. Screws & Fasteners Limited. Improved method of tightening and locking nuts on bolts. (24th December 1965).

108535. Farbenfabriken Bayer Aktiengesellschaft. Anthraquinone dyes. (12th August 1966).

108536. Les Usines De Melle. Catalysts and manufacture thereof.

108537. E.B. Lopker. Improvements in the manufacture of phosphoric acid.

108538. E.B. Lopker. Improvements in the manufacture of phosphoric acid.

108539. FMC Corporation. Glycidol and glycerol process.

108540. The Lummus Company and Great Lakes Carbon Cork. Process for producing a deashed coal solution.

108541. International Paper Company. Production of cellulosic pulp.

108542. International Paper Company. Production of cellulosic pulp.

108543. Farbwerke Hoechst Aktiengesellshaft vormals Meister Lucium & Bruning. Process for preparing chlorine by electrolysis of aqueous hydrochloric acid.

108544. Farbweske Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Pennicillins and process for preparing them.

108545. Ciba Limited. Water-Insoluble Anthraquinone dyestaffs and processes for their manufacture.

108546. The Stanely Works. Fasteners and Fastener Assemblies for building panels and the like.

108547. N.V. Philip's Gloeilampenfabrieken. Improvements in or relating to semi-conductor devices. (22nd December 1965).

22nd *December* 1966

108548. Hyderabad Allwyn Metal Works Limited. A prefabricted structure.

108549. Sandoz Ltd. Improvements in or relating to organic compounds. (23rd December 1965).

108550. Fabriques De Produits Chimiques De Thann Et De Mulhouse. Process for the preparation of titanium dioxide pigment.

108551. J. R. Geigy A.G. Process for the production of new azepine derivatives.

108552. Aerpat A.G. Improvements in flush mounting latches. (31st December 1965).

108553. La Telemecanique Electrique. Electrical connection terminal.

108554. The Borden Chemical Company (UK) Ltd. (formerly Leicester, Lovell & Co. Limited). Improvements in or relating to adhesive compositions curing rapidly be polymerisation under anaerobic conditions. (3rd January 1966). [Addition to No. 94558].

108555. M & T Chemicals Inc. Purification of tin.

108556. M & T Chemicals Inc. Novel process.

108557. Rohm and Haas Company. Nitrogen-Containing monomers and polymers there of.

108558. Weyerhaeuser Company. Method of and apparatus for resurfacing anodes. (9th November 1966).

108559. B. Sethna. An automatic gramphone record cleaner called 'atuomatic reocord cleaner.'

108560. B.J. Raney. A device for hydraulic or pheumatic compression power utility augmentation and potential energy utility.

108561. Chemcell Limited. Polypropylene compositions and articles. (22nd December 1965).

23rd December 1966

108562. Jaharlal Bose. Oxidation catalyst.

108563. International Standard Electric Corporation. Semiconductor devices. (24th December 1965).

108564. P.J.J. Greyling. Improvements in tool bar hitches.

108565. Dunlop Rubber Company Limited. Method of reducing adhesion. (1st January 1966).

108566. British Insulated Callender's Cables Limited. Improvement in or relating to electric conductors and their manufacture.

108567. Universal Oil Products Company. Catalyst and process for the dehydrogenation of paraffin hydrocarbons.

108568. Chicago Penumatic Tool Company. Safety overspeed control mechanism for rotary tools.

108569. Debabrata Chatterjee. D knob and the coming of inspirational tones.

ALTERATION OF DATE

98375. The claim to priority date 10th March 1964 has been abandoned and the application dated as of 9th March 1965, the date of filing in India.

99967. The claim to priority date 8th June 1964 has been abandoned and the application dated as of 8th June 1965 the date of filing in India.

107727. Ante-dated to 20th March 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's office in the prescribed from No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specificationsas shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

98052. Texaco Development Corporation. Extraction of water from brine. Accepted on 22nd November 1966.

Comprising bringing into contact with one another in an extraction zone at an elevated pressure, thereby extracting water into organic liquid and forming complex decomposing complex into water phase and an organic liquid phase and separating the two phases.

98257. George Meredith Vibart. Rolling shutter for windows. Accepted on 3rd December 1966.

Comprising a number of slats, each slat being provided with an acute angled groove at one longitudinal edge and a slanting surface at the other longitudinal edge.

98297. Rohm & Haas Company. Process for coagulating an coalescing an acrylonitrile polymer to form shaped articles. Accepted on 5th December 1966.

Comprises' extruding the aqueous dispersion containing the polymer into an aqueous acid bath at a temperature of from about 70°C to about 90°C and containing a repidly diffusing acid and a solvating Agent.

98375. A Mirsky. A method of preparing warp for weaving or warp knitting by dividing sheet material longitudinally. Accepted on 9th December 1966.

Includes dividing sheet material into longitudinally extending filaments and winding many of them onto a rotary member without any winding operation.

98390. FMC Corporation. A process for the preparation of herbicidal compounds and mixtures thereof. Accepted on 12th December 1966.

Characterised by reacting aminophenol derivatives with carbamoyl halide compounds or phosgene followed by primary or secondary amines or isocyanate compounds in the presence of catayst.

98444. Dr.—Ing. Heinz Mahlo. An apparatus for detecting and tracking markers in webs of material. (7th December 1964). Accepted on 15th December 1966.

Comprises a stationary photo electric cell and optical/mechanical scanning means the motive power being supplied by motor.

98452. Boots Pure Drugs Company Limited. Pesticidal compositions. [Addition to No. 87782]. Accepted on 15th December 1966.

Pesticide adjuvant admixed with active ingredient ROCON R^2COR^1, R^2, being lower alkyl, R-phenyl or naphthyl and R^1 CO is phenoxyalkanoic acid acyl residue.

98461. Calmic Limited. Improvements in or relating to the maintenance of urinals, water closet basins and the like. Accepted on 15th December 1966.

Forming automatically during an interval between flushes a relatively concentrated aqueous disinfectant solution, diluting the solution during a flush and discharging it into the convenience at the end of the flush.

98468. G. C. Brumlik. Molecular model assembly. Accepted on 16th December 1966.

Comprising a plurality of coupling units and elongated cylindrical sections capable of being coupled together to form a framework model of a molecule.

98470. Georg Neidl. Comminuting separating and pumping machine. Accepted on 16th December 1966.

Comprising a stationary pump hosuing having a pump chamber an impeller rotating in the housing a drive shaft for the impeller a shell enclosing at least part of the housing to form a separate chamber, strainer passage connecting the pumping and the separate chambers, an inlet for the pump chamber and outlets for the said two chamber.

98476. Roussel-Uclaf. Improvements in moller scicidal compositions. Accepted on 16th December 1966.

Comprises cuprenes chloride as molluscicide and a wetting agent, an antioxidant and/or an aqueous solution containing a water soluble chloride.

98481. Universal Oil Products Company. Continuous chromatographic analysis of a mixture of fluid components. Accepted on 16th December 1966.

Comprising as packing material a mass of selective sorbent which is pretreated by contact with selectively sorbed component until the sorbent has been saturated with respect to the selectively sorbed component.

98489. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the preparation of acetaldehyde. Accepted on 16th December 1966.

Oxidizing ethylene with oxygen in the presence of water and a solid catalyst containing a metal of group VIII of the periodic table.

98491. Dr.-Ing. Heinz Mahlo. Apparatus for controlling the moisture content of moving material. (27th January 1965). Accepted on 16th December 1966.

Comprising means controlled member auxiliary controller member which have a predetermined respon characteristic main controlling unit.

98512. Doittau Produits Metallurgie. Novel exothermic composition and elements adapted to line molds used for the casting of metals incorporating such a composition. Accepted on 19th December 1966.

Characterized by the fact that it has an oxidizable component constituted by silico-calcium or silico-aluminium and an oxidising element constituted by a metal oxide such as manganese dioxide or iron oxide.

98513. Rexall Drug and Chemical Company. Process for conducting a continuous polymerization reaction. Accepted on 17th December 1966.

In a process for polymerising an alpha olefin monomer in a polymerisation zone, the improvement comprises for preventing contamination of the unreacted monomer with volatile components and for condensing and directly recycling said condensed unreacted monomer to said polymerisatin zone which comprises continuously withdrawing said alpha-olefin polymer from said separation zone.

98515. G. R. Gokale. Animal trolly cum operation table. Accepted on 13th December 1966.

Characterised in that the platform is provided with sliding mechanism and tiltable mechanism.

98535. Cummins Engine Company Inc. Fuel injector for internal combustion engines. Accepted on 19th December 1966.

Comprising an injector body with a plun ger bore and a nozzle opening at one end of said plunger bore said body having a fuel passage, said plunger and said body being formed to provide a restricted conduit of a size to prevent combustion products from entering the injector.

98545. Rohm & Haas Company. Herbicidal compositions containing tetrahydro-3-(substituted-phenyl)-5-alkyl-1, 3, 5-oxadiazin-4-ones. Accepted on 20th December 1966.

Comprises tetrahydro-3-(substituted-phenyl)-5 alkyl-1, 3-5 oxadiaxin-4-ones as the active material.

98628. The Goodyear Tire & Rubber Company. Improvements in method of making shaped film, said film, articles therefrom. Accepted on 19th December 1966.

Comprising coating the surface of a mould cavity having the desired design embossed therein with a liquid polyurathane reaction mixture, reacting the ingredientsof the mixture and removing the film from the mould.

98630. S.T.D. Services Ltd. Apparatus for deep drawng metal. Accepted on 20th December 1966.

Characterised by means for limiting relative approach movement between the outer punch and the smaller die, means applying force to the outer punch during the redrawing movement of the inner punch, forming an axially extending annular passage through which the work piece is drawn dy movement of the inner punch.

98664. Massey-Ferguson Inc. Vehicle transmission. Accepted on 19th December 1966.

Having a driven shaft selectively drivingly connectible to a driving shaft through alternative transmission paths, one of the including a two way clutch and the other a one-way overrunning clutch and having a locking means.

98826. The Babcock & Wilcox Company. A shaped article and a method for preparing the same. Accepted on 19th December 1966.

Comprising the steps of forming a raw batch, forming the article into a shape from the raw batch, and then firing the shape.

98893. Allied Chemical Corporation. Process for the production of cyclohexanone. Accepted on 17th December 1966.

A mixture comprising vaporous cyclohexanecarboxylic acid and moleculeroxygen is contacted with a copper-containing catalyst at a temperature of 250° C to 600° C.

98921. Imperial Chemical Industries Limited. Stabilisation of high polymers. (6th May 1964). Accepted on 20th December 1966.

The stability of polymers has been improved by the addition thereto at least one stabiliser compound.

98986. Imperial Chemical Industries Limited. Production of alkyl halides. Accepted on 17th December 1966.

Reacting monohydric alcohol or its ether or diether with a halogen acid in the presence of a catalyst comprising alumina and silica wherein the molar ratio of alumina to silica is 0·01 : 1 to 50 : 1.

99089. National Steel Corporation. Improvements in or relating to superheater structure. Accepted on 22nd December 1966.

A superheater structure having helical coil means for carrying fluid to be heated, the convolutions of the helical coil means defining a cylindrical shaped space, fuel burner means to discharges gases of combustion.

99117. Denver Equipment Company. Aerating assembly for froth flotation cells. Accepted on 17th December 1966.

Comprising (a) an impeller (b) a stationary cover member (c) a hollow stationary conduit for the supply of acrating gas (d) a restricted pulp intake.

99845. Continental Oil Company. Alkylation of hydrocarbons. Accepted on 1st December 1966.

Introducing benzene into three reaction zones, introducing a C_{10}-C_{18} olefin and an alkylation catalyst to each said zone, withdrawing reaction effluent and recovering alkylate fraction from the said effluent.

99879. Imperial Chemical Industries Limited. Stabilised solvent compositions containing 1, 1, 1-trichloroethane and an organic nitrate. (15th June 1964). Accepted on 20th December 1966.

Comprising 1, 1, 1-trichloroethane and an organic nitrate.

99942. Bowe Bohler & Weber Kg. and Robt. Schwarzenbach & Company Method and apparatus for finishing of fibrous material. Accepted on 7th December 1966

Identified by the fact that as the carrier for the chemicals which have to be deposited on the goods a non polar organic solvent is used.

99946. Associated Electrical Industries Limited. Improvements relating to automatic telephone exchange systems. (17th June 1964). Accepted on 8th December 1966.

The compound link circuit comprising in combination a plurality of dissimilar constituent link circuits and switching means.

99954. Harvey Kravitz and Norman Lettvin. A single stable dose vaccinator. Accepted on 8th December 1966.

Comprising in combination, multiple point scarifier consisting of at least two elongated scarifier needles projecting from a common support and defining a crotch space there between said scarifying needles tapering along their length towards their tips, so that space is of increasing dimension longitudinally of the needles the needles being closely clustered.

99967. Imperial Chemical Industries Limited. Process for mass-colouring polyesters with polycyclic dyestuffs containing carboxylic ester groups. Accepted on 8th December 1966.

Polymerising polyesters in presence of dyestuff like 1 : 5-bis (O-Carbomethoxy-aniline) authraquinone.

99968. Imperial Chemical Industries Limited. Process for the mass-coloration of polyesters with polycyclic dyestuffs containing carboxylic acid groups. (16th October 1964). Accepted on 8th December 1966.

Mixing polyester with dyestuff like 1, 5-bis (O-carboxyanilline) authroquinone acid, melting and spinning into filaments.

100008. Director of Indian Institute of Technology, Powai. Improved sintering process. Accepted on 12th December 1966.

Oxidising pure metallic powders individually or mixtures thereof to oxide film of thickness varying from 450 to 750 A units in a controlled atmosphere containing a mixture of air and a neutral or an inert gas at a temperature upto 500° C and then compacting under pressure.

100030. E. Krebs and P. Staib. Device for the electrolysis of saline solutions. Accepted on 12th December 1966.

A device for electrolysis where a cell comprises two electrodes, namely an anode and a cathode, constituted by two co-axial surfaces of revolution with a vertical axis.

100043. N. V. Maatschappij Voor Industriele Research en Ontwikkeling. Apparatus for cutting sheet material. Accepted on 14th December 1966.

Comprising a platform of flexible band for supporting the material to be cut, a cutting element, the flexible band being guided over two mutually parallel deflection element.

100058. Eastman Kodal Company. Chromatographic sheets. Accepted on 14th December 1966.

Comprising support bearing layer of chromatographically active absorbent at least 2% by weight of polymeric binder.

100077. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S.p.A. Process and apparatus for the production of synthetic yarns having an asymmetrical cross-sectional shape. Accepted on 15th December 1966.

Characterised by extruding polymer through two unequal orifices having passage lengths, polymer viscosity and orifice radius related to each other.

100087. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electric incandescent lamps. Accepted on 15th December 1966.

Comprising a tungsten filament in a bulb which contains, in addition to an inert gas, bromine as the reactive transport gas so that the bulb-wall during burning assumes a temperature of at least 300° C.

100089. N. V. Philips Gloeilampenfabrieken. Pesticidal compositions containing 3, 5-dimethyl-4-dimethylaminomethylphenyl-N-methylcarbamate. Accepted on 15th December 1966.

Contains 3, 5-dimethyl-4-dimethylaminomethlyphenyl-N-methylcarbamate and a carrier.

100095. Vsesojuzny Elektro tekhnichesky Institut im. VI. Lenina. Air circuit breaker arrc chute. Accepted on 16th December 1966.

Comprising a main butt contact having lamels arranged in a housing with a circular bead.

100099. Silo-Vac Holdings (U. K.) Limited. Improvements in or relating to containers for produce or merchandise and method of packaging or encapsulating such produce or merchandise. Accepted on 16th December 1966.

Comprising a member having a channel section, at least one flexible and gas impermeable sheet and a wedge member, one of the members being such that the sheet can be introduced between the lips into the channel with snap-action.

100108. Carlo Guido and Francesco Foglio Para. Davice for indicating broken threads in spinning machines. Accepted on 16th December 1966.

Has a movable carriage with a spring biased feeler adapted to take different operative positions depending on whether the thread is sound or broken and an electric circuit controlling current supply to carriage motor.

100120. Barmer Maschinenfabrik Aktiengesellschaft. Extruder headpiece. (15th April 1965). Accepted on 17th December 1966.

Characterised in that a replaceable insert is arranged in the prolongation of the screw channel.

100124. J. R. Geigy A. G. Process for the optical brightening of fibres made of cellulose, which may or may not be esterified, or of polyamide. Accepted on 17th December 1966.

Comprising treating cellulose or polyamide fibres with an aqueous solution containing a benzoxazole derivative as optical brightener and a fatty alcohol polyglycol ether or alkyl phenol polyglycol ether.

100126. ACF Industries, Incorporated. Apparatus and method for forming a bond between two surfaces. Accepted on 17th December 1966.

Comprising two coated surfaces to be bonded by heating under pressure for a certain period and afterward, releasing the pressure and cooling the bonded surfaces one of which is composed of halogenated olefin polymer to be bonded with halogenated carbon oil.

100132. Quinton Hazell Limited. Improvements relating to gauging apparatus for use with friction clutches. (20th June 1964). Accepted on 19th December 1966.

Comprising a combined gauge and clamping ring affording a gauging face spaced a predetermined distance axially of the ring from a clamping face and a gauge mens including a radially outer gauge face or faces capable of co-operating with the gauging face or faces capable of co-operating with the gauging face.

100152. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S. p. A. Process for the production of crimpable synthetic yarns and yarns produced thereby. Accepted on 19th December 1966.

Characterised by the formation of the strand by welding two monofilaments or streams of melted materials having similar constitutions in their peripheral portions and different characteristic in shrinkability and swellability in the inner portions of the cross section.

100182. Indian Oxygen Limited. Improvements in or relating to electrical control switches. (23rd June 1964). Accepted on 20th December 1966.

Comprising a central shaft one cam disc a cam-follower a pair of engageable member electrical contact, control dial.

100305. Alpine Chemische Aktiengesellschaft. Process for the production of copolyesters. Accepted on 20th December 1966.

Condensing aromatic dicarboxylic acids or their mixtures or their polyester forming derivatives with glycols with 2·5 dihydroxy terephthalic acid or of one of its low molecular esters or another polyester forming derivative aromatic dihydroxy compounds.

100358. Alain Louis Emile Foundry. Process and machine for cutting screw-threads on glass and products obtained by means of said process or machine. (26th February 1965). Accepted on 16th December 1966.

Causing the tube which is mounted on a moving carriage to be driven in rotation and axially displaced at a speed corresponding to pitich of screw-thread to be formed opposite to a tool.

100371. G. R. Thakre. Folding furniture. Accepted on 20th December 1966.

Comprising two pairs of legs, a board associated with each pair of legs, each leg having an ear piece having an upper and a lower lobels, each pair of legs preferably including at least one cross member a lever with a hook and pins, support under each board and means on the legs for resting the supports in different position.

100404. 4D Research and Development Co. Ltd. Improvements relating to the moulding of materials. (10th July 1964). Accepted on 17th December 1966.

Arranging over a mould form, a flexible, memberane which adheres to the contours of the mould form, placing mouldable material on the membrane in the mould form and allowing the material to set under negative pressure with drawing the negative pressure and applying a positive pressure to release the casting.

100421. Libbey-Owens-Ford Glass Company. Flat glass manufacture. Accepted on 16th December, 1966.

Diverting the ribbon of glass from normal path for a predetermined distance and for a predetermined length of time and then returning the ribbon to the normal path.

100422. Libbey-Owens-Ford Glass Company. A method of producing flat glass and an apparatus therefor. Accepted on 16th December 1966.

Deflecting the glass ribbon from first path which supporting the ribbon on a fluid cushion to lift the ribbon from the bath and to direct it into the second path.

100434. Toms River Chemical Corporation. Anthraquinone-2-carboxamides, process for their manufacture and polyester fibres dyed therewith Accepted on 17th December 1966.

Wherein an anthra quinone-2-carboxylic acid halide is reacted with an aminobenzene cyclohexylamine or napthylamine.

100436. Rheinstahl Henschel Aktiengesellschaft formerly known as Henschel-Werke Aktiengesellschaft. Improvements in or relating to cardan shaft drives in the bogies of driven rail vehicles. Accepted on 20th December 1966.

The input shaft and the output shaft of the distributor gear are disposed side by side in a horizontal plane or in a plane only slightly inclined to the horizontal.

100535. Polymer Corporation Limited. Elastomeric polymer, (23rd July 1964). Accepted on 21st December 1966.

Comprises contacting butadiene-1, 3 with a catalyst containing lithium and a halide of tetravalent titanium.

100829. Sigma Lutin, narodni podnik. Vertical pumps with removable rotor. Accepted on 19th December 1966.

Shaft is provided with a protecting tube and a lubricating tube fixed on the external side of said protecting tube and terminating in a lubricating channel of the bearing body.

100880. Indian Oxygen Limited. Improvements in electric arc welding. (6th August 1964). Accepted on 22nd December 1966.

An electric arc welding system in which primary power supply is of flat characteristic type and in which an inductance is provided in series with the tarc to provide a voltage transient sufficient to prevent the welding current fluctuation from reaching a valve at which the arc is unstable.

100914. Westinghouse Electric Corporation. Arc welding torch. Accepted on 19th December 1966.

Including a channel through which electrode is advanced contact means for transmitting current to the electrode, means connected to channel for compressing an electric potential on the contact means and means in portion of the channel for suppressing transmission of current through the electrode.

100915. Westinghouse Electric Corporation. ARC welding electrode. Accepted on 19th December 1966.

Comprising a core of ferrous wire having a coating of an alloy thereon, the alloy consisting predominantly of copper and including a small quantity of tin.

101070. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to arrangements for converting mechanical energy into caloric energy or conversely. Accepted on 17th December 1966.

Heat exchanger is formed as a recuperator and comprises at least two sets of ducts through first set of which working medium can flow to and fro and through the second of which another medium can flow the directions of flow being reversible.

101084. Indian Oxygen Limited. Combined compressor and expansion engine. (21st August 1964). Accepted on 16th December 1966.

Having a compression cylinder and an expansion cylinder arranged in opposition to one another, a piston in each cylinder and two pistons being connected together for movement in unison, and having value means operated by the piston movement.

101125. General Electric Company. Improvements in or relating multiple pressure control valve. (1st June 1965). Accepted on 17th December 1966.

Comprising at least two inlet chambers, a plurality of outlets, one control valve for each outlet and a common valve actuating mechanism.

101161. Council of Scientific and Industrial Research. Process for the preparation of day-light and pink-light emitting electro-luminiscent phosphors. Accepted on 19th December 1966.

Which consists in the creation of 'defects' or disorder in the lattice of pure and stoichiometric Zns by phosphor compositions comprising zinc sulphide, impurities or activators such as copper, lead and manganese, and a flux under N_2 or N_2+S vapour atmosphere at elevated temperature for 4—5 hours.

101198. Eastman Kodal Company. Thin-layer chromatographic chamber and support device. Accepted on 19th December 1966.

Comprising a tray for a solvent, a pair of support plates having inner surface layers for sealing the element means for supporting these plates with an open edge in the tray and means cooperating with the plates for supporting the element therebetween so that at least major portion of its absorbant surface does not engage the said layers.

101320. Glaverbel. Process and device for manufacturing sheet glass. Accepted on 21st December 1966.

Wherein molten glass formed in a glass melting tank furnace flows continuously to a drawing zone and glass is drawn upwardly in sheet form, and is then passed after folding of the sheet into a horizontal annealing lehr.

101418. The Dow Chemical Company. Method and apparatus for the production of foam plastic sheet. Accepted on 21st December 1966.

Of an alkenyl aromatic resinous material characterised by stretching the heat plastified cellular tube biaxially over a mandrel, maintaining a flow of gas between the foamed tube and the mandrel, cooling the foamed tube and if desired splitting the foamed tube and flattering the split tube to form a sheet.

102730. P. R. Gupta. Improvements in device for ascertaining or maintaining constant the level of liquid electrolyte in wet storage batteries accumulators and the like. Accepted on 19th December 1966.

Comprises a transparent container having a hollow bulb portion and a hollow elongated neck portion, and being provided with at least one opening in the vicinity of the lower end of said neck portion providing communication between said bulb and battery liquid electrolyte when the said container is fitted to the battery.

103427. J. T. Quintana. Improved actuator for multiple-loom weft inserters. Accepted on 14th December 1966.

Comprises a tri-articulated structure having three coplaner hearing points forming the vertices of a preferably scalene triangle one end of a rod is articulated to the third vertex and the other end receives the rotating movement of a crank which reciprocates the tri-articulated structure and which in turn forces the inserter to move reciprocatingly through the shed.

103955. J. Marx. Valve change over devices for compound meter systems. Accepted on 20th December 1966.

Primary float arranged to be reciprocally movable in the space between two valve seats serving as the valve member of a change over mechanism formed as a double-seat valve and an auxiliary float being provided for movement independently of said primary float.

103999. American Machine & Foundry Company. Welding of structural shapes. Accepted on 16th December, 1966.

Welding of structural shapes such as when a metal strip to form a web is to be welded on edge longitudinally of another metal strip which for example is to form flange thus providing a welded structure of T-shaped cross-section.

107727. Rohm and Haas Company. Preparation of herbicidal tetrahydro-3-(substituted-phenyl)-5-alkyl-1, 3, 5-oxadiazin-4-ones. [Divisional date 20th March 1965.] Accepted on 20th December 1966.

Comprises reacting corresponding urea with formaldehyde or a source thereof in the presence of an acid catalyst.

Printed Specification Published

A limited number of printed copies of the undernoted specifications are available for sale from the Officer-in-Charge, Government of India, Central Book Depot, 8, Hastings Street, Calcutta, at two rupees per copy :

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 48100—Goswami Gajanan Puri.

The patent ceased on the 20th September 1956, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 16th January 1960. Any person may give notice of opposition to the restoration by leaving an application of Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 18th February 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 80104—Sun Oil Company.

The Patent ceased on the 5th January 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 11th June 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 18th February 1966.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Desings Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 128547. (1) Harbans Lall, (2) Ved Prakash, (3) Rattan Chand, (4) Subhash Chander, all Indian Nationals of New Globe Engineering Works, M-6, Industrial Area, Jullundur City, Punjab. 'Wrench'. May 24, 1966.

Class 1. No. 128578. S. K. Ghose & Co., Indian Proprietary Concern, 7B, Ananda Palit Road, Calcutta-14. West Bengal, India, 'Seeling wire'. May 31, 1966.

Class 5. No. 128537. Suresh Gangadhar Ghate, Advocate, Indian Humpyard Road, Dhantoli, Nagpur, (Maharashtra State), 'Cigarette case with match box'. May 21, 1966.

Class 9. No. 127495. Hindustan Rayon & Woollen Textile Mills Pvt. Ltd., Narayan Garh, Chheharta (Near Amritsar). 'Woven Fita'. December 15, 1966.

Class 9. Nos. 128731 to 128388. Hindustan Embroidery Private Ltd. Chheharta (Amritsar), Indian Firm. 'Lace'. May 11, 1966.

Class 13. Nos. 128270 to 128273, 128275, to 128278, 128280, 128281, 128283 to 128285, 128287 to 128302, and 128304 to 188322. The Delhi Cloth & General Mills Co. Ltd., Indian Company, Post Box No. 1039. Bara Hindu Rao, Delhi-6, India. 'Textile piecegoods'. April 30, 1966.

Class 13. No. 128736. Shree Sajjan Mills Limited, a public Limited Company, incorporated under the Indian Companies Act of (Bombay Office) 28, Apollo Street Fort, Bombay-1, India and (Registered Office) Ratlam, Madhya Pradesh, India. 'Textile goods'. June 27, 1966.

Class 13. Nos. 128775 to 128778. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Bombay-1. 'Cotton textiles'. June 28, 1966.

Class 13. Nos. 128821 to 128829. The Khatau Makanji Spg. & Wvg. Co. Ltd. Laxmi Building :6, Ballard Road, Bombay-1. 'Textile piecegoods'. July 1, 1966.

Class 13. Nos. 128830 to 128844, and 128847 to 128853. The Shree Niwas Cotton Mills Ltd., an Indian Firm Situated at Delisle Road, Bombay-13. 'Cotton piecegoods'. July 2, 1966.

Copyright Extended for a Second period of Five Years

Nos. 111404 to 111409—Class 1
Nos. 111432 to 111435—Class 1
No. 112812—Class 3.
No. 111818—Class 5.
No. 113280—Class 13.
No. 113981—Class 13.
No. 114803—Class 13.
No. 116279—Class 13.

Copyright Extended for a Third period of Five Years

No. 90430 to 90432—Class 1.
No. 112812—Class 3.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 14th January 1967

CORRIGENDUM

In the Gazette of India, Part III, Section 2 dated the 19th November 1966 under the heading "Applications Accepted"—

In page 427, *column* 2

Delete "102004. N. V. Philips.....temperature range from 800 to 950°C."

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

24th December 1966

108570. The Barium Chemicals Limited. Manufacturing barium nitrate by direct reaction between barium sulphide liquor and nitric acid.

108571. Knapsack Aktiengesellschaft. Process for regenerating palladium carrier catalysts for use in the manufacture of vinyl acetate.

108572. Societa Farmaceutici Italia. Process for preparing cyano derivatives of steroids.

108573. Council of Scientific and Industrial Research. Improvements in or relating to the electrochemical preparation of para aminobenzoic acid.

108574. Council of Scientific and Industrial Research. A process for the manufacture of water insoluble methylol derivatives of fatty alkyl mono-carbamates and their application in textile treatment.

108575. Rexall Drug and Chemical Company. Improved suspension polymerisation process.

108576. Dorr-Oliver Incorporated. Sewage treatment including sludge disposal through digestion.

108577. Vitafoam Limited. Improvements in foamed materials (9th August 1966).

108578. Houilleres Du Bassin Du Nord & Du Pas De Calais. A process for the preparation of potassium.

108579. Imperial Chemical Industries Limited. New peroxyesters and uses thereof. (12th January 1966).

108580. Rotary Profile Anstalt. Profiling of annular workpieces.

108581. Herbert Joseph Lingley. Improvements in or relating to folded metal strips suitable for building and cladding of structural constructions.

26th December 1966

108582. Jayantilal Parmanandas Sanghrajka. Air control ring.

108583. Council of Scientific and Industrial Research. Chemically bonded forsterite refractories and methods of their preparation.

108584. Michael Ladney Jr., Improvements in article coating methods and apparatus.

108585. Caterpillar Tractor Co. Resilient link construction.

108586. Elisabeth Hochstrasser and Jurgen Hochstrasser. Method for broaching the end of bore holes drilled in the earth.

108587. Boehringer Ingelheim G.m.b.H. Chemical compounds.

108588. Boehringer Ingelheim G.m.b.H. Pharmaceutical compositions.

108589. Vithal Ram. 3", 4" and 6" size conical tungsten carbide rock bits for blast hole drilling in harder sedimentary formations.

108590. Marine Ancilliaries Private Ltd. Improvements in or relating to power take off devices for use in conjunction with trawler winches and the like.

108591. Chemical Construction Corporation. Method and apparatus for vaporizing liquids.

108592. The Cincinnati Milling Machine Co. Apparatus for the automatic operation of machine tools.

108593. Kuduva Nagaswamy Krishnan Inthera. Improvement of Deep well pump sets.

108594. Dr. A. Wander S. A. "11-Aminoalkylated Dibenz [b, f]-1, 4-oxazepines and direnzo [b, f]-1, 4-thiazepines.

108595. Foseco International Limited. Mould Linings.

108596. C. F. Boehringer & Soehne GmbH. Derivatives of helveticoside. (11th February 1966).

108597. The Steel Company of Wales Limited. Improvements in or relating to the production of electrical sheet or strip.

108598. Paul Fessel. Improved cutting and grinding devices.

108599. Robert Metivier. Improvements in or relating to generators of periodic fluid signals.

108600. Ciba Limited. A pharmaceutical preparation.

108601. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of coating substrates by evaporation-deposition.

108602. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of recovering an excess of fluorescent material.

108603. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to circuit arrangements for correcting the cushion like distortion in the deflection of the electron beam in a display tube.

108604. General Aniline & Film Corporation. Materials.

108605. General Aniline & Film Corporation. Materials.

27th December 1966

108606. Dilip Kumar Das. Clamping device.

108607. Suresh Ratilal Nanavati. A mechanised hoarding.

108608. Halcon International Inc. Chemical process.

108609. Dunlop Rubber Company Limited. Coating method and apparatus for use therein.

108610. Shell Internationale Research Maatschappij N.V. Process and apparatus for the catalytic cracking of hydrocarbon oils.

108611. American Flange & Manufacturing Co. Inc. Container closure assembly.

108612. Soletanche. Improvements in method and tool for jointing tubes.

108613. Badische Anilin-& soda-Fabrik Aktiengesellschaft. Thermoplastic materials for the production of self-extinguishing moldings.

108614. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Epoxy cellular plastics and process for making them.

108615. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Stabilized mixture of polyolefins and process for preparing it.

108616. Aktiebolaget Svenska Flaktfabriken. Centrifugal fan.

108617. Aktiebolaget Svenska Flaktfabriken. An apparatus for threading a web material.

108618. Aktiebolaget Svenska Flaktfabriken. A method of determining the particle size distribution of a dust and a device for carrying out the method.

108619. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to ovens.

28th December 1966

108620. S. Raghavan. Domestic wet grinder.

108621. J. H. Kowley and N. H. Kapadia. Use of organic thermoplastic powders for insulation/protection of double walled glass flasks for hot or cold containers.

108622. Radio Corporation. Intra-Uterine contraceptive device.

108623. Sterling Drug Inc. Partial wet air oxidation of sewage sludge.

108624. Owens-Illinois, Inc. Product and method of making a glass ceramic article.

108625. Elektro-Thermit G.m.b.H. Device for carrying out rail joint welding operations.

108626. Chemokomplex Vegyipari Gep-Es Berendezes Export Import Vallalat. Filtering Apparatus and method.

108627. Ciba Limited. Curable, filled unsaturated polyester resin mextures.

108628. Ciba Limited. Process for the manufacture of aminoanthraquinone derivatives.

108629. Allied Chemical Corporation. Adjustable heater bracket assembly.

108630. The English Electric Company Limited. Improvements in fuses. (7th January 1966).

108631. Rotary Profile Anstalt. Fabrication of articles by rolling.

108632. Herchell Smith. Synthetic gonenes.

108633. Solvay et Cie. Anode assembly for electrolytic cells.

29th December 1966

108634. Bimal Kumar Ghosh. Improvement on attachement of holding telephone receiver.

108635. Madhav Vishnu Shiddhaye and Shamala Madhav Shiddhaye. An improved can opener.

108636. Owens-Illinois, Inc. Glasses, ceramics and method of making same.

108637. Ing. A. Maurer S.A. Process for the continuous xanthating of alkali cellulose.

108638. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of benzodiazepine derivatives.

108639. The Chandler & Price Company. Web Roll stand.

108640. J. R. Geigy A. G. Process for the production of new tetrahydro-quinoline derivatives.

108641. Katsuragawa Denki Kabushiki Kaisha. Electrography and electrographic element.

108642. Snam Progetti S.p.A. Improved process for the preparation of pellets from substances whose conglomeration is difficult, and product obtained thereby.

108643. Lodge-Cottrell Limited. Improvements in or relating to electroprecipitation. (8th January 1966).

108644. Sentralinstitutt for Industriell Forskning. Process for production of olefines by dimerization, co-dimerization, polymerization and co-polymerization of olefines. (27th January 1966).

30th December 1966

108645. Phenolic Resin Products. A process for making emulsion paints using cashew nut shell liquid as the binder.

108646. Kumarish Chandra Das. Locks which can be opened and closed by magnet and key together or by magnet only.

108647. Wellworthy Limited. Improvements in or relating to piston rings. (7th January 1966).

108648. The Dow Chemical Company. Lubricant-coolant emulsion.

108649. Robert Boothe Miller. Sugarcane processing. [Divisional date 13th July 1965].

108650. Masheder Design Studies Limited. Improvements relating to pipe couplings.

108651. Lockspike Limited. Concrete railway sleepers and rail fastening arrangements employing them.

108652. Western Electric Company Incorporated. Intergrated circuit devices and methods of making them. (14th October 1964). [Divisional date 17th May 1965].

108653. Western Electric Company Incorporated. Cathodic sputtering. (14th October 1964). [Divisional date 17th May 1965].

Alteration of Date

98564. The claim to priority date 14th April 1964 has been abandoned and the application dated as of 22nd March 1965, the date of filing in India.

101138. The claim to priority date 17th September 1964 has been abandoned and the application dated as of 16th August 1965 the date of filing in India.

101139: The claim to priority date 17th September 1964 has been abondoned and the application dated as of 16th August 1965 the date of filing in India:

101459. The claim to priority date 7th September 1964 has been disallowed and the application dated as of 6th September 1965 the date of filing in India.

107151. Ante-dated to 29th March 1965 under Section 5 of the Act.

107654. Ante-dated to 29th April 1965 under Section 5 of the Act.

108158. Ante-dated to 2nd June 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents' office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specification should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

93999. Aktiebolaget Bofors. A device for controlling the angular position of a rotatable object. Accepted on 26th December 1966.

Comprising digital computer means, anolog-digital converter means, transfer means an electric resolver including a stator and rotor, feeding circuit means, means coupling rotor to rotatable object, servometer means coupled to object and circuit for feeding voltage to servometer means.

96698. Aktiebolaget Bofors. A cartridge ramming device for introducing cartridges into the cartridge-chamber of the barrel of a gun. Accepted on 23rd December 1966.

Comprising a rammer dent arranged to cooperate with the shell bottom of a cartridge, a cartridge guide means located rearwardly of the cartridge chamber of the gun barrel.

97951. E.I.Te.R. Societa per Azioni Elettrochimica Italiana Delle Terre Rare. Process for the production of free cutting steel through alloys or sinterized compounds of lead with rare earths and steels so made. Accepted on 16th November 1966.

Process for the production of free cutting steels characterised by the step of introducing rare earth metals into the molten steel.

98410. British Titan Products Company Limited. Oxidation process. (17th March 1964). Accepted on 12th December 1966.

Process for the production of titanium oxide by interaction of titanium halide vapour and oxidising gas.

98492. Sandoz Ltd. Process for dyeing or printing flat plastic materials. Accepted on 16th December 1966.

With aqueous preparation containing leather dye and water soluble salt of fatty acid of high mol. weight with 7-28 C-atoms.

98518. The Furukawa Electric Company Limited. A wave director for intensifying electro-magnetic field. Accepted on 19th December 1966.

Comprising a wave director consists of an annular curtain having a diamiter and width depending on the wave length of the electromagnetic signals.

98549. C. H. Hagel. Storage installation. Accepted on 20th December 1966.

Comprising a building having storage sites distributed helicably around centre of the building and lifting means movable about a horizontal axis along a helical track the lifting means including a rotatable platform and driving means.

98552. Polymer Processing Research Institute Ltd. Continuous fibrillation method of stretched thermoplastic films. Accepted on 6th December 1966.

Transporting the films in a tensionless state in an ejected pressurized gas flow stream, thereby providing a fluttering notions to the films.

98561. Aktiebolaget Bofors. A device for opening and closing a door of a port in a protection wall surrounding a liading and cartridge casing ejection mechanism of a gun, in particular automatic gun. Accepted on 27th December 1966.

Comprising in combination, an energy storing means linked to the door to execute a force thereon actuating the door to bring it from open to closed position, a member comprising first powl coupling means for moving the door and a second coupling means.

98564. Pinchin, Johnson & Associates Limited. Condensation polymers. Accepted on 22nd December 1966.

Condensing a glycidyl polyether of a oxyhydric phenol with a polybasic aliphatic fatty acid or an anhydride or ester of such acid.

98576. Mangayarkarssi Swaminathan. Kill-Volt-Ampere-Hour Meter. Accepted on 22nd December 1966.

Two fixed coils to carry direct current in main circuit to set up pulsating magnetic field, two moving coils regidly fixed at right angles to each other and pivoted at the centre.

98596. Dorr-Oliver Incorporated. Combustion apparatus for effecting the combustion of high moisture organic waste. Accepted on 26th December 1966.

Comprising a combustion unit devided by a transverse constriction plate into a combustion chamber and a wind box chamber for supporting an inventory of inert granular material, means for supplying combustion air to the wind box chamber and a device for compacting and extrusion feeding the waste through the combustion chamber wall.

98660. British Nylon Spinners Limited. Method and apparatus for winding yarn. (4th April 1964). Accepted on 23rd December 1966.

Includes programming means to control winding and cause an increase in numerical value of wind ratio at predetermined points to reduce enhanced patterning periods of the package.

98665. Tecalemit (Hind) Limited and H. E. Jackson. Injection moulding machines. (26th March 1964). Accepted on 26th December 1966.

Comprising fluid pressure operated platen assemblies, locking arm, means for applying fluid pressure to lock the platen assemblies.

98690. Becorit Grubenausbau GmbH. Improvements in or relating to monorail conveyors. (4th January 1965). Accepted on 26th December 1966.

Comprising a pair of first coupling components for attachment to the running flanges of the respective rails, a second pair of coupling components for attachment to the respectives rails one of said second components being a pin-like member and the other being an aperture for said pin-like member.

98693. Lansing Bagnall Limited. Improvements in or relatin to the manufacture of vehicle differential casings. (9th Aprll 1964). Accepted on 26th December 1966.

Forming at each end of the two slots two deep slits one on each side of the slot and at each side of each slot and intermediate the two end slits on that side of the slot atleast one deep notch.

98732. Itek Corporation. Electron beam recording apparatus and process for producing a visible image. Accepted on 30th December 1966.

Comprising projecting means a photo conductive recording medium disposed in the path of the beam pattern.

98749. Eduard Kusters Maschinenfabrik. Method of producting calender cylinders from synthetic substances by centrifuging. Accepted on 22nd December 1966.

Comprising the steler where the normal accelaration is more than 500 g so as to considerably exceed the shrinkage.

98768. Nauchno-Issledovatelsky Institute Teploenergeticheskogo Priborostroenia. Converting devices for converting nonelectrical quantities into electrical output signals. Accepted on 24th December 1966.

Incorporating an elastic vibrating element the natural frequency of oscillation of which varies depending on the strain thereof, means for varying the extension of the string vibrating element thereby enabling the initial frequency of osillation to be adjusted.

98792. The South India Textile Research Association. Super drafting system for cotton or synthetic yarns. Accepted on 26th December 1966.

Characterised by providing a greater member of rollers (five pairs), wherein first and second pair of rollers make an angle to the horizontal to deliver yarn at an angle.

98839. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to methods and devices for manufacturing metal, wires, particularly welding wires from powdery material and wires manufactured by said methods. Accepted on 26th December, 1966.

A device for manufacturing a wire of metal powder wherein of the gaps, the dimension measured in the direction of width of roollers is minimised.

98841. D. G. Kale. A cottage hank printing machine. Accepted on 29th December 1966.

A cottage hank printing machine, comprising two design rollers one resting on the other, a colour box below the said lower roller a carriage movable to and fro on the two rails fixed on the stand of the machine.

98851. ACF Industries, Incorporated. Carburetor, Accepted on 22nd December 1966.

Comprising a fuel inlet, valve structure, valve body, fuel passage, valve seat a valve needle a body portion of noncircular cross section, guide surface, neck portion tip portion and means for imparting movement of the needle.

98867. Westinghouse Electric Corporation. Method of preparing a semiconductor wafer having an oxide film on the surface thereof. Accepted on 21st December 1966.

Phosphorus-containing oxide film is grown on the wafer by anodization in the presence of an electrolyte comprising pyrophosphoric acid.

98868. Westinghouse Electric Corporation. Method of preparing a semiconductor wafer having an oxide film grown on the wafer surface. Accepted on 21st December 1966.

Bringing wafer surface to be oxidised in contact with an electrolyte capable of supplying oxygen, subjecting portion of wafer to controlled illumination and passing direct current through electrolyte and wafer.

98894 Massey-Ferguson Inc. Improvements in tractors. Accepted on 22nd December 1966.

Comprising draft links, a hydraulic actuater a source of hydraulic pressure fluid control valve means, a shiftable valve control linkage a manual control lever and means for selectively clutching to said lever to said linkage.

98918. Sperry Rand Corporation. Improvements in or relating to hydraulic motor drive systems. Accepted on 23rd December 1966.

A hydraulic motor drive system including means connected to the system and responsive to a pressure differential of hydraulic fluid flowing to a pair of hydraulic motors for restricting the flow to the motor.

98989. Aktiebolaget Bofors. Device for steering of tracklaying vehicles. Accepted on 26th December 1966.

Characterised in that gears are arranged in the shaft system which driven the driving wheel, to said gear, in addition to the input movement fed by ordinary drive shaft, a further input movement is fed, which through over riding increases or decreases the speed of the driving wheel.

98992. Allied Chemical Corporation. Light stabilised nylon. [Addition to No. 84687]. Accepted on 24th December 1966.

Polyamide composition containing a salt of divalent manganese, hypophosphorvs acid and a pigment or delustrant.

98995. Jyoti Limited. Threshing machine. [Addition to No. 94919]. Accepted on 26th December 1966.

Characterised by a blower within a casing which has open mouthed extended duct connected on one side to the outlet of the threshing machine and on the other side to a grain discharge chute.

99024. Rhone-Poulenc S.A. Herbicidal compositions containing pyridazine derivatives. Accepted on 29th December 1966.

Comprises a pyridazine derivative and a compatible diluent or carrier therefor.

99097. Dow Corning Corporation. Improvements in or relating to release agents and lubricants. Accepted on 20th December 1966.

A composition comprising a polymer obtained by reacting an appropriate alpha-olefine with a methyl hydrogen-polysiloxane in the presence of chloroplatinum aid and an organic solvent.

99686. Caterpillar Tractor Co. Tamping device. Accepted on 24th November 1966.

Comprising tamping fort a base member having a projecting portion cooperating surfaces, axially aligned bores and pin.

99780. Tecalemit (Engineering) Limited. Automatic lubricating apparatus for rollers of conveyors or for wheels of vehicles. (29th May, 1964). Accepted on 28th December 1966.

Comprising a lubricating gun movable trip means, a fluid actuating piston, lubricant ejecting means, means for controlling the flow of fluid and means associated with the gun for controlling the flow of fluid to and from the gun barret or cylinder.

99807. Dipl. Chem. Herbert Schwartz and Dr. Joseph Bjorn Skaptason. Novel herbicidal compositions. Accepted on 24th December 1966.

Comprises 3', 4'-dihalo-crotonanilide and a carrier.

99836. W. R. Grace & Co. Improvements relating to high temperature sealing compositions. Accepted on 29th December 1966.

Mixing an epoxy novolak resin and a liquid resinous polyamide and an amine which is a curing agent.

99922. American Machine & Foundry Company. Methods and apparatus for welding wide metal strips together. Accepted on 26th December 1966.

Method of welding sheet metal strips wherein strips are shaped to curved cross section while they advance towards the weld point surface pressure brings them in welded engagement and normal flat cross section is restored after welding.

99938. Turner Brothers Asbestos Company Limited. Manufacture of thermoplastic sheet. (15th June 1964.) Accepted on 7th December 1966.

Polymeric constituent, formed from monomers, in the form of a solution in a volatile organic solvent or in the form of a mixture of such a solution and dispersion and fibers, is converted into a substantially homogeneous dough-like mass another mass is formed into a rigid sheet.

99978. Libbey-Owens-Ford Glass Company. Process for treating silica refractory. Accepted on 9th December 1966.

Characterised by introducing a fluxing agent and a reducing gas to maintain reducing atmosphere in furnace adjacent refractory material until the scope is eliminated.

100039. Phillips Petroleum Company. An elastomeric blend. Accepted on 14th December 1966.

Consists of 25-85 parts by weight of a random rubbery copolymer of 1,3-butadiene and styrene and 75-15 parts by weight of natural rubber in a liquid solvent mixture.

100065. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Water-insoluble dyestuffs of the anthraquinone series, and process for preparing them. Accepted on 15th December 1966.

1-amino-2-chloro-4-hydroxy-anthraquinone is reacted with 4-hydroxy-di-phenylether in presence of potasium hydraoxide.

100082. Amsted Industries Incorporated. Mold and support therefor. Accepted on 15th December 1966.

Mold apparatus comprising a support, a pair of mold parts having mating concavities and means for swinging the said parts.

100137. Chemische Fabrik Pfersee G.m.b.H. Compositions for the impregnation of textiles. Accepted on 19th December 1966.

Consists of a water-insoluble condensation product of a methylol compound of amine triazine with an aliphatic monocarboxylic acid, a water-soluble salt of an amine.

100168. Ciba Limited. New monoazo pigments processes for their manufacture and organic materials pigmented therewith. Accepted on 21st December 1966.

Condensing carboxylic acid halide, obtained by coupling 2:5 dichloroamine compound with 2-hydroxy-napthoic acid with amine of type 2:5-dichloro-(4-chlorobenzoylamino)-aniline.

100169. Ciba Limited. Pigments of the 3-hydroxyquinophthalone series process for their manufacture and organic materials pigmented therewith. Accepted on 21st December 1966.

Condensing diamine like hydrazine with mono carboxylic acid halide like of 2-methyl-3-hydroxy-5-chloroquinoline-4-carboxylic acid.

100175. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Telomers and process for preparing them. Accepted on 21st December 1966.

Reacting acitoacitic acid alkyl ester in the presence of at least one radical liberating agent with at least one comonomer containing one olefinic double bond in at least one chain transferring solvent.

100183. Indian Oxygen Limited. Improvements in or relating to metal cropping machines. (23rd June, 1964.) Accepted on 21st December 1966.

Comprising two metal cutting devices and means to move the boom bodily.

100193. Amar Dye-Chem Limited. New polymeric azo dyestuffs their manufacture and dyeing and printing textile meterials therewith. Accepted on 22nd December 1966.

Comprising polymerizing 2, 4-dihalogeno-1, 3, 5, triazinylamino azodyestuff or reacting a diamino azo dyestuff with cyanuric halide and gradually heating the resultant mixture.

100194. Amar-Dye-Chem Limited. New reactive azo dyestuffs their manufacture and dyeing and printing textile materials therewith. Accepted on 22nd December 1966.

Comprising coupling monodiazotised 1, 4-diaminobenzene-2-sulfonic acid or carboxylic acid with coupling components of benzene or naphthalene series or with ketomethylene compound and condensing the resulting azodyes with acylating agent or azinylating agent in the presence of acid building agents.

100203. Wickman Wimet Limited. Toolholders for use with detachable cutting inserts. (30th June 1964.) Accepted on 19th December 1966.

Comprising a shank a clamp movable transversely relative to said shank and means operable upon initial transverse movement of the clamp.

100204. Conch International Methane Limited. Improved cascade cycle for liquefaction of natural gas. Accepted on 22nd December 1966.

Liquifaction of gas using flash drum to flash of part of the gas as a vapour and further cool the residual liquid gas.

100205. Conch International Methane Limited. Gas liquefaction with vapour compression and gas expansion cycles. Accepted on 22nd December 1966.

Wherein second refrigerant is compressed as a gas, cooled by heat exchange with a portion of separate evaporating refrigerant expanded to a lower temperature and then heat exchanged with the feed gas.

100208. Pilkkngton Brothers Limited. Improvements in or relating to glass articles. (23rd June, 1964.) Accepted on 22nd December 1966.

A method of treating a glass article by treating at least a portion of the glass article containing a reducing agent with a metal, to introduce some of the said metal into the glass article.

100212. Debron Carpets Limited. Improvements in and relating to pile fabrics. (23rd June 1964). Accepted on 22nd December 1966.

Comprises pleating a sheet of parallel threads together with a flexible interliner and applying to the pleated sheet a backing which fixes the pleats while leaving the interliner free for removals.

100219. Potasse & Engrais Chimiques. High-analysis fertilizers. Accepted on 22nd December 1966.

Consisting of suspension of at least one fertilizing compound in an aqueous solution to which solution hydrophyllic gum is added.

100230. Luwa A.G. Apparatus for clearing the sides of doctor blades. (15th April 1965). Accepted on 23rd December 1966.

Characterised in that one resilient flap is secured on an elongated driven carrier member which is rotatable about a pivot the carrier member and the cylinder being driven in opposite direction and the flap in the zone of the intersection point being bent over rearwardly with resilient tension.

100241. Petrol Injection Limited formerly known as Tecalemit (Developments) Limited and H.E. Jackson. Fuel injection systems. (24th June, 1964). Accepted on 23rd December 1966.

Characterised in that the metering valve in the ring main includes an accelaration response map means.

100247. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to circuit arrangements for producing a sawtooth current across the vertical deflection coil of a television receiver. Accepted on 23rd December 1966.

Comprising reservoir capacitor, intigration net work intigrating capacitor, intigrating resistor charging capacitor.

100251. Johnson & Johnson. Apparatus and methods for removing fibrous webs from rotating surfaces. Accepted on 24th December 1966.

Comprises carrying a fibrous web on a rotating surface, removing the fibre web from the said surface passing it between a stationing blade member and a second rotating surface whereby the fibrous web is transferred to and carried by said second rotating surface.

100254. Dunlop Rubber Company Limited. Improvements relating to playballs. (9th July 1964). Accepted on 24th December 1966.

Comprises dispersing low density self reinforcing thermoplastics in a matrix of a vulcanizable natural and/or synthetic rubber composition and vulcanizing the rubber composition.

100256. Dunlop Rubber Company Limited. Improvements in and relating to playballs. (9th July 1964). Accepted on 24th December 1966.

Comprises a self supporting hollow sphere of rubber or rubber like composition in which is present a low density thermosetting synthetic resin of the phenolic type.

100257. Jean-Pierre Maupas. Water extraction device for paper machines. Accepted on 24th December 1966.

Device in which operations of pressure rollers and those of a suction box with rollers are combined in a single roller set.

100263. Standard Telephones and Cables Limited. Improvements in or relating to communication systems. (26th June 1964). Accepted on 26th December 1966.

Comprising two or more serially connected sections and intermediate sections and detecting means and means for transmitting signals.

100271. Commissariat A L'energie Atomique. Improvements in or relating to extrusion press. Accepted on 26th December 1966.

Consisting in an extrusion cylinder means for mounting die a closure device and a ram.

100288. Hindustan Lever Limited. Preparation of synthetic linalool oxide and perfumery composition containing the same. Accepted on 20th December 1966.

Reacting 2, 3-epoxy acylate of 2, 6-dimethyl 2, 6-octadien-8-ol. with acid catalyst in inert solvent.

100292. Emil Forster A.G. Weaving shuttles. Accepted on 24th December 1966.

Characterised firstly by a split carrier body is separated for cheeks of its two pants and has braking jaws and from which differently elastic intermediate members project and secondly by wear resisting thread guides for directing the thread laterally out of the shuttle.

100306. Tepar A.G. A method in or relating to aseptic packaging of sterile filling materials. Accepted on 26th December 1966.

Characterised by the fact that the packaging material is treated with a sterilizing agent whose effect in activated through the presence of microorganisms which may be present on the outside of the packaging material, said micro organism being selectively destroyed while the packaging material is inert towards the sterilizing agent.

100319. Ciba Limited. Process for the production of colored photographic images on photographic layers, and photographic materials therefor. Accepted on 26th December 1966.

Wherein exposed material is dyestuff bleached in presence of compound free from acid groups imparting solubility in water like acylaminoquinoxoline, as bleaching catalyst.

100334. Imperial Chemical Industries Limited. Improvements relating to making rigid hollow containers from plastic materials. (17th July 1964). Accepted on 26th December 1966.

Introducing into a hollow shell formed of lined with a fibre-filled thermosetting material, a thermoplastic power for paste, causing it to be distributed over the internal surface of the shell, heating the shell to melt the powder or gel the paste and cooling the shell to set the lining.

100339. Mitsubishi Kakoki Kaisha, Ltd. A method of making foreign papers by cylinder system. Accepted on 26th December 1966.

Using discal side plates of the cylinder mold suitably, Larger in diameters than with screen drum, fitting an endless belt thereon, allowing said belt to run in water tight manner in direction of the wire screen drum, with a space kept from the wire screen surface removing the water content by suction.

100353. M. Seldeen. Tobacco product. Accepted on 29th December 1966.

Mixing tobacco with a metallic zirconium of a zirconium compound.

100401. Dow Corning Corporation. Finishes for organic fibres. Accepted on 21st December 1966.

Comprises a polymeric sillxane consisting of $(-\overset{CH_3}{\underset{CH_3}{Si}}O)$ *units and at least one* $[(CH_3)\ \overset{R}{nSiO_{3-n}}{}_{2}]$ *unit per molecule, where R is analkyl radical and n is 1 or 2.*

100405. Aktiebolaget Svenska Flaktfabriken. An arrangement in a dryer for web-or sheet-like materials. Accepted on 28th December 1966.

Consisting a plurality of perforated distribution boxes arranged one after another in the conveying direction for the drying medium and adjustable members for shielding necessary parts of the perforations.

100411. Universal Oil Products Company. Production of jet and motor fuel. Accepted on 24th December 1966.

Contacting with sorbent selective for normal paraffinic components separating for sorbent raffinate stream consisting of branched and cyclic hydrocarbons subjecting same to catalytic reforming at above 455°C in presence of hydrogen.

100414. Dynamit Nobel Aktiengesellschaft. A process for preparing dyeable polyolefins and filaments produced therefrom. Accepted on 26th December 1966.

A silica-containing compound which in an ester of a silica and a silicol or an ester of a silicol is incorporated in to the polyolefin.

100416. Wah Chang Corporation. Beneficiation of ilmenite. Accepted on 26th December 1966.

By first subjecting it first to leaching action of acid solution and then subjecting so leached residue to leaching again.

100420. Libbey-Owens-Ford Glass Company Method and apparatus for producing flat glass. Accepted on 23rd December 1966.

Protecting the means for removing the ribbon along the path during periods when normal operation might injure or contaminate the said means which directs the ribbon out of said normal path and out of contact with said means.

100427. Stora Kopparbergs Bergslags Aktiebolag. Reduction of metal oxides with coked fuel. Accepted on 26th December 1966.

In a rotary furnace by supplying to furnace metal oxides and hot coking residue.

100482. Dunlop Rubber Company Limited. Production of flexible material permeable to water vapour. (22nd July 1964). Accepted on 23rd December 1966.

Forming a mixture of an emulsion of a silicone oil with a rubber latex and one or more vulcanizing agents for the rubber, gelling the mixture so obtained and heating the gilled mixture to effect vulcanisation of the rubber so that escape of water from the mixture is prevented.

100497. Indian Oxygen Limited. Liquid oxygen converter system for passenger aircraft. (17th July 1964,) Accepted on 21st December 1966.

Supplying gaseous oxygen to breathing equipment intended for use by persons abroad a passenger aircraft, from a storage vessel in which oxygen is stored in liquid form.

100501. J. S. Khanna. Improvements in or relating to asphalt mixing plant. Accepted on 26th December 1966.

Characterised by mixer blades of solid plates with a solid hole each at its centre.

100512. Spindelfabrik Sussen, Schurr, Stahlecker & Grill G.m.b.H., Spindles for textile machines. Accepted on 28th December 1966.

Characterized by the fact that the clutch is readially yieldable and pressed in the axial direction of the spindle shaft by one spring, whereby the clutch element clamps the loose wharve together with the fixed wharve by wedging action.

100521. Golovnoe Konstruktorskoe Bjuro Po Mekhanisatsii Ovoschevodstva. Planting machine. Accepted on 27th December 1966.

A conveyor with grabbing organs being installed in the hopper, the descending branch of said conveyor being positioned by the hopper wall.

100536. The Lubrizol Corporation. Fuel composition. Accepted on 29th December 1966.

A fuel composition comprising hydrocarbon fuel of the gasoline boiling range and an amine salt prepared by reacting an aliphatic secondary amine with a phosphoric acid.

100555. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. 2-chloro-4H-1, 3, 2-dioxaphosphorin-4-ones and process for preparing them. Accepted on 24th December 1966.

Reacting one mol of an isocyclic or heterocyclic or hydroxy conloxylic acid with at least one molecule of phosphorous trichloride at a temperature between 25° and 200°c.

100641. United States Rubber Company. Improvements in olefin polymerization process. Accepted on 27th December 1966.

The monomers are polymerized as solution in an inert organic solvent in presence of a catalyst of the type based or a principal catalyst component which is a transition metal compound such as vanadium salt along with a co-catalyst which is reducing agent or complexing agent, such as an organo-aluminium compound.

100701. Hajtomu Es Felvonogyar. General purpose apparatus for testing the sprayability and other characteristics of paints and varnishes. Accepted on 30th December 1966.

Comprising a high voltage direct current source, a measuring head a choke resistance through which measuring head receives voltage. slight optics opposite to which a scale division is provided and a vessel for testing the flash point.

100714. Gosudarstvenny Proektny Institut "Tyazhpromelektroproekt". Device for grid control of gas filled rectifiers. Accepted on 30th December 1966.

Comprising a switching capacitor, one ballast resistor end gas filled rectifiers.

100725. The Director, Indian Council of Medical Research. Improvements or in relating to the treatment of coal washing waste waters and like effluents. Accepted on 26th December 1966.

Consisting in treating the same with a coagulant and thereafter separating the flocculated material.

100754. Fisons Pharmaceuticals Limited. Aerosol applicators. (11th August 1964.) Accepted on 26th December 1966.

Comprising an aerosol container with an acrosol release valve operated by a spring loaded stem, mounted in a tubular housing one end of which is provided with spray means and the other and with manually operated means for urging the container towards the spray means.

100769. Ciba Limited. Curable mixtures of epoxy resins and tertiary amines. Accepted on 29th December 1966.

Heating a mixture of epoxy resin and a curing agent which agent is a tertiary amine belonging to a unsubstituted. phthalinide compound.

100807. Hein, Lehmann & Co. Ag. Centrifuge with a perforated drum. Accepted on 24th December 1966.

Comprising a bearing below the bottom part of the perforated drum, a distributor plate characterised by a centrifuge shaft consisting of the hollow shaft, the conical jacket and the solid shaft.

100810. The Gwalior Rayon Silk Mfg. (Wvg.) Co. Ltd. Improvements in or relating to the manufacture of dissolving grade pulps. Accepted on 24th December 1966.

Subjecting the cellulosic material to a preliminary treatment of alkaline cooking characterised in that the alkalines cooking carried is out in two stages, first by cooling with 1/3 to 2/3 of the weight of the alkali normally used and secondly the cooled product after separating from the spent liquor is cooled again with the remaining amount of alkali.

101019. Siemens-Schuckertwerke Aktiengesellschaft. A controllable semi-conductor rectifier device. Accepted on 26th December 1966.

Comprising a monocrystalline silicon body containing in series a first outer layer of one type of conductivity a first inner layer of other type of conductivity a second inner layer of said one type of conductivity and a second outer layer of said other type of conductivity the first outer and inner layers meeting in first p-n junction the two inner layers meeting in second p-n-junction, and second inner and outer layers meeting in third p-n junction.

101053. Koppers Company Inc. Improvements in or relating to high-chambered horizontal cooking retort ovens. Accepted on 26th December 1966.

Comprising coking chambers with heating walls, partition walls combustion flows, conduit means and passageway in walls.

101054. Koppers Company, Inc. Improvements in or relating to high chambered horizontal coking retort ovens. Accepted on 26th December 1966.

Comprising coking chambers, heating means a fuel gas supply passageway, and a combustion gas passageway.

101138. Svenska Aktienbolaget Bromsregulator. Automatic axially acting two-way slack adjuster for vehicle brake rigging. Accepted on 23rd December 1966.

The feeding nut and the housing being provided with teeth for the clutchable engagement and telescopically compressible means being arranged for limiting the elongation of compression spring.

101139. Svenska Aktiebolaget Bromsregulator. Automatic axially-acting two-way slack adjuster for vehicle brake rigging. Accepted on 23rd December 1966.

Spider sleeve being arranged to engage the lift ring by means which prevent relative rotation of the spider sleeve and the lift ring but do not transit axial forces between the spider sleeve and the lift ring.

101155. Thomas Marshall & Company (Loxley) Limited. An improvement in or relating to stoppers for the nozzles of molten metal pouring ladles. (28th August, 1964.) Accepted on 26th December 1966.

Comprising tubular refractory members metal carrier rod and stopper end of refractory material.

101177. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for improving the dyeability of drawn fibres and filaments of linear polyalkylene terephthalates. Accepted on 29th December 1966.

Wherein the filament is heated within the range of 180° to 280°C by means of a let of gas and arriving at the filament at a speed within the range of 20 to 40 meters per second and then the filament is cooled below the second order transition temperature.

101284. Shell Internationale Research Maatschappij N. V. Corrosion reduction of a metal or alloy containing nickel. Accepted on 28th December 1966.

By a process where the metal as alloy is in contact with a liquid characterised in adding metallic aluminium to the liquid.

101423. International Standard Electric Corporation. Electrical contact elements and contacts comprised of such elements. Accepted on 26th December 1966.

Formed from a material which is a good electrical conductor passing resilience the material being helicoidally coiled.

101456. General Refractories Company. Improvements in refractory roof construction. Accepted on 26th December 1966.

A refractory roof construction comprising a plurality of basic refractory bricks having hot and cold ends in combination with steel supporting structure with a plurality of steel beams and steel corset plates.

101459. Standard Telephones and Cables Limited. Apparatus and method for working conductive materials by electric spark discharges. Accepted on 28th December 1966.

Comprising a source for applying a potential difference between a resilient electrode and a work which is arranged for relative movement in at least one direction in a plane, and the electrode being capable of an oscillatory motion normal to the said plane.

101463. Caterpillar Tractor Co. Stainless steel alloys. Accepted on 26th December 1966.

Consisting of carbon, boron and chromium.

101507. Beteiligungs-Und Patentverwaltungsgesellschaft Mit Beschrankter Haftung. Method of pelletizing and pelletizing device for carrying out the method. Accepted on 28th December 1966.

Comprising substances to be pelletized, any binding agents and pelletizing fluid are brought on to a rising endless rubber belt which is adjustable in its inclination, speed and direction.

101646. Koppers Company Inc. Improvements in or relating to exhaust receiving hood. Accepted on 30th December 1966.

Consisting in a frame for the passage of gas and conduits thereon for a cooling liquid.

101655. Oak Electro/Netics Corp. Improvements in or relating to switching devices such as rotary switch. Accepted on 30th December 1966.

Comprising a stator a rotor mounted for rotational movement with respect to said stator.

101784. Koppers Company, Inc. Improvements in or relating to coupling. Accepted on 24th December 1966.

Comprising a resiliently compressible member disposed between first and second rotatable members and attached at first and second position of the rotatable members.

101806. Asahi Kasei Kogyo Kabushiki Kaisha. Apparatus for forming corrugations on cylindrical envelopes of paper or like material. Accepted on 29th December 1966.

Conveyor means for carrying the cylindrical envelope supplied in a flattened state squeeze roll means, envelope holding means disposed at a position adjacent the delivery end of said convey or means.

101822. Compagnie Generale D'Entreprises Electrique. Improvements in or relating to a terminal block provided with fastening means. Accepted on 30th December 1966

Comprising an insulating body made of flexible material and provided on either lateral sides of its base with lateral projections.

102264. Siemens & Halske (Aktiengesellschaft. Improvement in or relating to panel assemblies. (27th August 1965). Accepted on 30th December 1966.

Comprising a housing one printed circuit plate carrying electrical components.

102311. Sperry Rand Corporation. Record perforating device. Accepted 28th December 1966.

Comprising a drive means with a reciprocating bail supplying power to punching mechanisms which can be controlled by a selecting magnet and compriser a punch and an interposer bar which being actuable to be inserted between the punch and the reciprocating bar to effect perforating operation.

102333. I. L. Hall. Furneces. Accepted on 26th December, 1966.

Furnace for burning off insulation from cables and for recovery of metals therefrom comprising a hearth a roof and side walls, burners, a flue and an outlet for burnt gases.

102415. Siemens & Halske Aktiengeselischaft. Improvements in or relating to pulse correction circuits. (5th July 1965). Accepted on 30th December 1966.

Comprising means to vary the slope of the leading or trailing edge of an output pulse, callector circuit of a transistor.

102467. Rheinstahl Henschel Aktiengesellschaft. Improvements in or relating to internal combustion engine rail vehicles. Accepted on 30th December 1966.

Comprising a centrally disposed driver's cab, an internal combustion engine, a cooling plant for the engine and an exhaust system of the engine.

102787. VDO Tachometer Werke Adolf Schindling GmbH. Eddy-current tachometer with an odometer driven by the magnet shaft through a reducing gear. Accepted on 26th December 1966.

Reducing gear is driven by an eccentric connected to magnet shaft through a flat eccentric stepping mechanism, being of the nature of a crank slide oscillator

102801. Gosudarstvenny Sojuzny Institut Po Procktirovaniju Metallurgicheskikh Zavodov. Dummy bar for continuous casting plants. Accepted on 26th December 1966.

Characterised in that its head is provided with a smooth transition portion from the cross-section of the ingot to that of the body of said dummy bar.

102933. Mrs. Beryl Alice Enid DePenning. Circuit arrangement of switches the operation of which is initiated by track relay contacts. Accepted on 26th December 1966.

On the relays assigned to the individual points there are provided step on ontacts aimed at connecting to the control lead extending from the route contacts to the point relays a control lead extending to a further point.

103109. Snelatz & Regoni. Car cigarette lighter. Accepted on 28th December 1966.

Comprising a pressing hollowknob, a filament and when the knob is pressed an electrical circuit in completed and the filament coil is ignited.

103462. Dunlop Rubber Company Limited. The manufacture of sheet material. Accepted on 21st December 1966.

Comprising heating the sheet or a portion thereof by the application thereto of energy at micro wave frequency and further heating the said sheet or a portiont hereof by the application of heat by surface conduction.

103848. Dr. Ing. h.c. Jakob Dichter. Improvements in glass tube feeding devices. Accepted on 23rd December 1966.

For controlling the operations a control shaft is provided on which are mounted several cams the control shaft being capable of being coupled with a drive shaft by means of a mechanism.

103935. R. B. Golobart. Weft thread aspirating and cutting device for shuttless looms. Accepted on 24th December 1966.

Comprising two concentric sleeves inserted one into the other means imparting a rocking rotational movement to said outer sleeves saids sleves being provided with sharp edged U shaped cutonts whereby with ends caught between the sharp edges of the cut out of the outer and inner sleeves and removed by section.

103950. Molins Machine Company Limited. Improvements relating to packets for cigarettes or like articles. (19th February 1965). Accepted on 22nd December 1966.

Comprising a body and a lid and on insert having a hinge connection to the lid at one end and a projecting portion at the other end the said insert being folded and secure to the inner surface of the body by adhesive.

104104. Westland Aircraft Limited. Fluid flow sensor. (1st March 1965.) Accepted on 21st December 1966.

Comprising inlet and outlet means for connecting the sensor in a fluid flow line means for restricting the flow of fluid between the inlet and the outlet so as to produce a fluid pressure difference then between and means responsive to pressure differences for actuating electric switch means.

104271. Imperial Chemical Industries Limited. Coated polyester films. (11th March 1965.) Accepted on 28th December 1966.

Extruding amorphous film of linear polyester, drawing the film in the direction of extrusion applying a heat seal coating to said film and further drawing the film in a direction perpendicular to that of extrusion.

104281. Vereinigung Volkseigener Betriebe Lacke und Farben. Process for production of aqueous cellullse nitrate emulsions and the emulsions so produced. Accepted on 28th December 1966.

Emulsifying solutions of cellulose nitrate in organic solvents with an aqueous of ethoxylation product of castor oil above or in combination with a mixture G_2—G_8 alkyl-mono-sodium sulphonates and/or alkylaryl sulphonates and /or primary alkyl sulphates.

107151. Eaton Yale & Towne Inc. A change gear system. [Divisional date 29th March 1965.] Accepted on 21st December 1966.

Comprising an auxtelary transmission unit connected in series with a main transmission unit and having at least three speeds.

107654. J. R. Geigy A. G. Process for the production of isoindoline compounds. [Divisional date 29th April 1965.] Accepted on 24th December 1966.

1, 3, 3-trisubstituted-4, 5, 6, 7-tetrahclo-isonidoline is reacted with two equivalents of a non-ionogmically substituted or a condensed primary phenylamine.

108158. Aerpat A. G. Improvements in or relating to blind hole fasteners. [Addition to No. 99876.] [Divisional date 2nd June 1965.] Accepted on 30th December 1966.

Comprising a body portion which has around its free end a circumferential burr which together with said end constitutes in effect a very small countersink head.

Opposition Proceedings

An opposition has been entered by Tattamangalam Subramaniaiyer Raman to the grant of a patent on application No. 96033, made by Seaquist Valve Company.

Restoration Proceedings

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of the following patent:—

No. 78146.—Roche Ramchand Pardasani.

The patent ceased on the 21st August 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette dated the 31st December 1966. Any person may give notice of of India, opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 25th February 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The date shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 13—No. 128437 to 128440, 128442, 128444 to 128455, 128457, 128459 to 128461, 128463, 128465 to 128470. Kesoram Industries & Cotton Mills Limited, Indian Company, 42, Garden Reach Road, Calcutta-24. 'Textile goods'. May 16, 1966.

Class 13—Nos. 128673 to 128682. The Khatau Makanji Spg. & Wvg. Co. Ltd. Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company. 'Textile piecegoods.' June 15, 1966.

Class 13.—Nos. 128787 to 128793. Hindustan Embroidery Mills Private Ltd., Chheharta, near Amritsar (Nationality: Indian Firm). 'Textile goods.' June 29, 1966.

Class 14.—Nos. 128443, 128462 and 128464. Kesoram Industries & Cotton Mills Limited, Indian Company, 42, Garden Reach Road, Calcutta-24. 'Textile goods.' May 16, 1966.

CORRIGENDUM

In the Gazette of India, Part III, Section 2 dated the 3rd December 1966 under the heading "Applications accepted".

In page 445, Column 2—

Delete "98949. Clevite Corporation..... both cutters remove material".

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

31st December 1966

108654. M & T Chemicals Inc. Chemical process and product.

108655. M & T Chemicals Inc. Novel chemical process and product.

108656. M & T Chemicals Inc. Organotin sulfides.

108657. M & T Chemicals Inc. Organotin complexes.

108658. M & T Chemicals Inc. Organotin.

108659. M & T Chemicals Inc. Polyorganotins.

108660. M & T Chemicals Inc. Tetrakis (w—carboxypolymethylene)—tins.

108661. M & T Chemicals Inc. Organotin mercaptides.

108662. M & T Chemicals Inc. Tris (w -carboxypolymethylene) tin chloride.

108663. M & T Chemicals Inc. Organotin mercaptides and esters.

108664. M & T Chemicals Inc. Organotin esters.

108665. M & T Chemicals Inc. Organotin halides.

108666. M & T Chemicals Inc. Organotin Hydroxide.

108667. Imperial Chemical Industries Limited. Improvements in or relating to processes and apparatus for the spinning of synthetic fibreforming polymers. (3rd January 1966).

108668. Ciba Limited. Manufacture of 5-arylsulfamyl-anthranilic acids.

108669. Ciba Limited. Manufacture of 11-amino-6-morphanthridones.

108670. Ciba Limited. Manufacture of 6, 11-diamino-morphanthridines.

108671. Glen Overton. Drying cylinder.

108672. Ciba of India Limited. Toothpastes in unlacquered aluminium tubes.

108673. Prabhakar Purshottam Dahanukar. Improvements in or relating to an electronic device for ignition circuit of internal combustion engine.

108674. Ratilal Chakubhai Thakkar. Improvements in or relating to a means for obtaining movement and/or sound for figures or the like mounted within ornaments and like.

2nd January 1967

108675. (Mrs.) Shubha Sadanand Thatte. Cash call visual indicator.

108676. Mohanlal Purshottamdas Tank. An improved method of manufacturing compound fertilisers in pelletted form.

108677. Mohanlal Purshottamdas Tank. Improvement in or relating to screw conveyors.

108678. Pilkington Brothers Limited. Improvements in or relating to the production of glass (6th January 1966).

108679. Strachan & Henshaw Limited. Improvements in or relating to devices for moving or controlling the movement of rail wagons and the like. (3rd January 1966).

108680. Roberto Escursell Prat. Method of automatically threading yarn from a bobbin into the ring traveller of a continuous ring spinning machine and the like. (3rd January 1966).

108681. Merck & Co. Inc. Method of preparing methylene substituted compounds.

108682. Imperial Chemical Industries Limited. Non-woven filamentary structures. (6th January 1966).

198683. Simon-Carves Limited. Improvements in or relating to the removal of Ammonia from water condensate. (12th January 1966).

108684. Monsanto Company. Inhibiting premature vulcanization of rubber.

108685. Sadatomo Kuribayashi. Marine derrick boom.

108686. FMC Corporation. A pipe coupling.

108687. Pullman Incorporated. Production of high pressure hydrogen rich gas particularly for ammonia synthesis.

108688. General Electric Company. Discharge lamp ballasting.

108689. American Cyanamid Company. Production of oxazepines and thiazepines.

108690. Sumitomo Chemical Company Ltd. Nevel method for preparing 1-acyl-3-indolyl aliphatic acid derivatives.

108691. Sumitomo Chemical Company, Ltd. Indole derivatives. (13th April 1966).

108692. Kanegafuchi Boseki Kabushiki Kaisha and Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S.p.A. of Via Cernaia. Polyolefin-polyamide composite filaments having an improved adhering property and a method thereof.

108693. The Babcock & Wilcox Company. Chemical and heat absorbing apparatus.

108694. Spetsialnoe Konstruktrorskoe Bjuro "Uralchermetavtomatika". Hydraulic press plunger travel speed governing device.

108695. General Dynamics Corporation. System to automatically control gage and the like.

108696. Veb Chemiefaserwerk Schwarza "Wilhelm Pieck". Process for production of multi-component filaments and fibres from polymides.

108697. Veb Maschinen-Und Apparatebau Grimma. Heat transmission apparatus and method of its manufacture.

108698. Research Corporation. Ammonium Nitrate explosive compositions.

108699. Clevite Corporation. Bearing material and method for producing same.

108700. Ceskoslovenska Akademie Ved. A process for the preparation of novel dihydrochlorides of farnesylic acid ester.

108701. Institut Fur Lacke Und Farben. Process and device for carrying out continuous mixing operations (10th June 1966).

108702. Poudreries Runies De Belgique, Societe Anonyme. Erosion reducer.

3rd January 1967

108703. Council of Scientific and Industrial Research. Improvements in or relating to the manufacture of high alumina refractories.

108704. Council of Scientific and Industrial Research. A loom attachment beater device for beating up of yarns for evaluation of textile sizes.

108705. Varadacharya Shriniwas Acharya. Cam or tappet driven dobby with peg locking device.

108706. S. P. Manufacturing Company. Improvements in or relating to shuttles for looms.

108707. Koppers Company, Inc. Improvements in or relating to horizontal coke oven batteries.

108708. Rudolf Christian Buchmann. A multipart mould.

108709. Unitral (Union d'Etude des Techniques de Traction et de Levage). Self gripping cable clamps.

108710. Rexall Drug and Chemical Company. Process and product.

108711. Probir Kumar Banerjee. Utilization of the Bauxite sludge (red mud) for recovery of TiO_2 for commercial purposes.

108712. Ciba Limited. Manufacture of aldehydes of the pregnane series and derivatives thereof.

108713. Monsanto Company. α—chloroacetamides and phytotoxic compositions.

108714. Monsanto Company. Benzyl polyethyleneiminicarbothiolates.

108715. Aaronson Bros. Limited. Improvements in or relating to wood veneer. (4th March 1966).

108716. Hitachi Zosen Kabushiki Kaisha. A method of manufcturing molds.

108717. Ciba of India Limited. Process for the manufacture of azabicycloalkane derivatives.

108718. Ciba Limited. Thixotropic curable epoxy resin mixtures.

108719. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of benzodiazepine derivatives.

108720. L. Givaudan & Cie Societe Anonyme. Hydrindacenes and process for the manufacture thereof.

108721. The Chandler & Price Company. Web press.

108722. The Chandler & Price Company. Web cutter and folder.

4th January 1967

108723. Council of Scientific and Industrial Research. New tranquilo-sedatives a process for the preparation of 3-amino or substituted amino benzo (6, 7—)—quinazoline-4-ones.

108724. Jhaveri Brothers & Company Private Limited, and Kishor Shyamdas Jhaveri. Improvements in or relating to clothes hangers or devices for hanging clothes.

108725. Council of Scientific and Industrial Research. A novel method of amplitude modulation (power control) of carcinotrons, injected beam type crossed field backward-wave oscillators and amplifiers and injected beam type crossed field forward wave amplifiers.

108726. Council of Scientific and Industrial Research. A process for the preparation of 2, 3-diphenylacrylophenones of biological interest.

108727. Ravindrakumar Ramji Yadav. Authomatic closing doors, windows and flap doors.

108728. C. George. Automatic discharging brush.

108729. Autogen Trading Co. Improvements in or relating to lighting fixtures.

108730. Chemical Construction Corporation. Urea synthesis process.

108731. Chemical Construction Corporation. Process of synthesizing melamine.

108732. Emile Wodli. A method of sliding a stackable tray or drawer or the like.

108733. Imperial Chemical Industries Limited. Improvements in or relating to the production of compact multifilament yarns. (13th January 1966).

108734. E. R. Squibb & Sons, Inc. Synthesis of steroids.

108735. The Monotype Corporation Limited. Improvements in or relating to apparatus for composing print. (13th January 1966).

108736. Universal Oil Products Company. Catalyst and process for hydrorefining petroleum oils.

108737. The Wheelabrator Corporation. Flow valve for magnetic materials.

108738. American Gage & Machine Company. Digital Display device.

108739. International Standard Electric Corporation. Method and circuit arrangement for automatic fee announcement in direct distance dialling.

108740. Veb Transformatoren—Und Rontgenwerk Dresden. Winding for liquid-cooled transformers, choke coils and like devices.

108741. N. V. Phillips Gloeilampenfabrieken. Improvements in or relating to methods of applying a phosphor screen in a substantially rectangular cup-shapped window for a cathoderay tubes.

108742. N. V. Phillips Gloeilampenfabrieken. Improvements in or relating to devices for producing stimulated infrared emission, irasers.

5th January 1967

108743. Foly-Profile Corporation. Improvements in or relating to a trolley-cum-stand for drums or the like containers.

108744. Mohanlal Purshottamdas Tank. An improvement in or relating to double-cone mixing machines for mixing of dry materials.

108745. Imperial Chemical Industries Limited. Plastic tapes. (12th January 1966).

108746. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of nuclear-substituted α-aminoanthraquinones. (29th July 1966).

108747. Farbenfabriken Bayer Aktiengesellschaft. Organopolysilozane compositions convertible into elastomers. (8th August 1966). [Addition to No. 99474].

108748. Farbenfabriken Bayer Aktiengesellschaft. Halogen-amino-anthraquinones. (31st August 1966). [Addition to No. 88419].

108749. Herbert Alexander Lakin. Improved process and machine for continuous processing of tea leaves.

108750. International standard Electric Corporation. Block Joint free track circuit.

108751. Aktiebolaget Svenska Flaktfabriken. A device for governing the pressure or quantity of a flowing gaseous medium.

108752. Stabilimenti Chimico-Farmaceutici Dr. R. Ravasini & Cia S.p.A. Tetracycline derivatives, a process for their preparation and therapeutical use thereof.

108753. Utag Universal-Trocknungsanlagen Aktiengesellschaft. Spray drying tower with gas outlet through the top of the tower and with gas supply in the bottom zone of the tower preferably through a perforated intermediate bottom.

108754. Utag Universal-Trocknungsanlagen Aktiengesellschaft. Method and apparatus for dehumidifying the drying gas of a continuously running drying plant.

108755. Badische Anilin & Soda-Fabrik Aktiengesellschaft. Moulding compositions for the production of foam articles.

108756. Indo German Industries. Improved all purpose tillers.

108757. Ministerul Industriei Chimice. Process for obtaining certain anionic detergents.

108758. Spetsialnoe Konstruktorskoe Bjuro Po proektirovaniu Krasilno-Otde-Lonchnogo Oborudovania. Device for centering continously moving fabric.

108759. Kizhanathan Sundaraja Varadarajan (known as K.S.V. Rajan). A device for making loud reports to scare away birds and animals.

108760. Ajit Sankar Bhaduri, Abburi Ramamurthy and Manikrishna Kumar. Welding primers based on aluminium powder (Non-leafing).

6th January 1967

108761. Rangaswamy Servai Sivaswamy. Automatic shutter for closing opening and storing waters in rivers and other water courses.

108762. Uralita, S. A. Mould for the manufacture of asbestos-cement products.

108763. International Standard Electric Corporation. Improvements in or relating to electromagnetic contact-making relays. (7th January 1966). [Addition to No. 103430].

108764. Ciba Limited. Manufacture of 2-amino-1-benzazepines.

108765. Ciba Limited. Manufacture of acylamino compounds.

108766. Palitex Project-Company G.mb.H. Automatic bobbin exchange mechanism for two-for-one twisting machines.

108767. Ciba Limited. Manufacture of acylamino compounds.

108768. Inventa A. G. Fur Forschung Und Patentverwertung. Process for the continuous preparation of lactams.

108769. Farbenfabriken Bayer Aktiengesellschaft. Dispersing agents. (3rd August 1966).

108770. Farbenfabriken Bayer Aktiengesellschaft. Composition for selective weed control: (7th September 1966).

108771. Farbenfabriken Bayer Aktiengesellschaft. Phenylamine ammonium salts. (16th September 1966).

108772. Dieter Arlt. Substituted alkane sulphonic acids and derivatives thereof. (8th August 1966).

Alteration of Dates

98802. The claim to priority date 9th April 1964 has been abandoned and the application dated as of 2nd April 1965, the date of filing in India.

99505. The claim to priority date 14th May 1964 has been abandoned and the application dated as of 14th May 1965, the date of filing in India.

100264. The claim to priority date 26th June 1964 has been abandoned and the application dated as of 25th June 1965, the date of filing in India.

100479. The claim to priority date 10th July 1964 has been abandoned and the application dated as of 8th July 1965, the date of filing in India.

103601. The claim to priority date 15th February 1965 has been abandoned and the application dated as of 27th January 1966. the date of filing in India.

107161. Ante-dated to 26th March 1965 under Section 5 of the Act.

108337. Ante-dated to 30th March 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed from No. 6 of the Indian Patents and Designs Rules, 1922, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India, Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

98570. Mechanical Excavators, Inc. Self propelled wheel excavator. Accepted on 22nd December 1966.

Including a truck frame, a rotatable case on the frame an excavator wheel carried by the base, conveying means and self-contained power means.

98671. Monsanto Company. N-Halo—α—Haloacentanilides, a process for their preparation and herbicidal compositions containing them. Accepted on 26th December 1966.

Reacting the corresponding α—haloantanilide with an N-halogenating agent in the presence of an acid linding agent under weakly alkaline to neutral conditions.

98675. E. Merck A. G. Fungicidal compositions. Accepted on 26th Dec. 1966.

Comprises 1, 4 *dithia-anthraquinone-2,3-dicarboxamide and/or* 1, 4 *dithiaanthraquinone*, 2. 3-*dicarbosylic acid-imide as active ingredients.*

98694. M & T Chemicals Inc. Improved process for preparing organotin compounds. Accepted on 27th December 1966.

Reacting (C_6H_{11}) *Mg x and Sn x* 4 *in molar ratio of* 3 :1, *x being chloride, bromide agitating reactants to achieve uniform admixture.*

98695. Ranendra Dutta, Prof. Tarun Kumar Ghose and Registrar of Jadavpur University. Improvements in or relating to a process for the coating of aluminium and/or aluminium alloy on steel surfaces. Accepted on 27th December 1966.

Comprising applying a layer of a composition having an emulsifying aget and consisting of metal compounds on the surface, drying these surface and then applying aluminium on the same.

98721. Owens-Illinois Glass Company. Luminescence device. Accepted on 29th Decemger 1966.

Having a source of energizing rays and a target for conversion of them to luminescence brussion, being a glass of silica containning at least one oxide of a rare earth element.

98739. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius and Bruning. Water soluble, metal-containing azo-dyestuffs and process for preparing them. Accepted on 30th December 1966.

Comprises reacting a water soluble complex metal compound of azodyestuf with 1 *to* 5 *moles of corresponding fluoro carboxylic acid or fluorides or substituted fluoride at a pH between* 6·5 *to about* 10.

98754. Albright & Wilson (Mfg.) Limited. Method for preparing organotin compounds. (6th April 1964). Accepted on 30th December 1966.

Reacting a stannous halide with an organic halide wherein at least one atom of chlorine, bromine or iodine is attached directly to an aliphatic carbon atom in the presence of a catalyst.

98756. Indian Oxygen Limited. Direct current arc welding. Accepted on 30th December 1966.

Process in which an electric arc is established between an electrode and workpiece wherein the output voltage of the power source supplying current to the electrode is varied at predetermined frequency between an upper level and a lower level.

98759. Joseph Lucas (Industries) Limited. Stator assemblies for dynamo-electric machines. (28th April 1964). Accepted on 30th December 1966.

A stator for a dynamo-electric machine having each pole piece with one end thereof rounded and adjacent pole pieces having their rounded ends at the opposite axial ends of the yoke and a field coil extending around the inside of the yoke.

98765. Didier-Werke Ag. Process for preparation of SiC with a content of vanadium. Accepted on 30th December 1966.

For refractory purposes characterised in that the vanadium in introduced into the laltice of silicon carbide in form of vanadium carbide during electrothermal production of silicon carbide.

98766. Didier-Werke A.G. Improved refractory bricks. Accepted on 31st December 1966.

Comprising brick with airproof covering thereon.

98773. The Philip Carey Manufacturing Company. Fibrous mineral reinforcement for cement asbestos sheet products and process therefor. Accepted on 31st December 1966.

Consisting of asbestos fibers and harsh mineral glass fibers, the mineral glass fibers being in the range of about 5 microns to about 25 microns in diameter and constituting from about 2% to about 25% by weight of mineral fiber mixture.

98802. Imperial Chemical Industries Limited. Process for the production of N:N'—disubstituted—4:4'—Bipyridylium salts and salts thus produced. Accepted on 2nd January 1967.

Comprises treating an N:N'—dialkyl or N:N' dicarbonyl alkyl tetrahydro—4:4'—bipyridyl with an oxidising agent.

98844. Didier-Werke Ag. A process of making moisture proof and air proof refractory products. Accepted on 6th January 1967.

Process of making moisture proof and air proof refractory bricks comprising forming a coating of moisture proof and air proof material on the bricks made by known methods.

98849. Stamicarbon N.V. Melting device and process for melting solid substances which are less stable in the molten stage than in the solid stage. Accepted on 2nd January 1967.

Providing an apparatus comprising a radially symmetrical vessel with at least one inlet so disposed that a vortex can be established in the vessel, and at least one outlet which is disposed so that liquid material will continuously discharge from within the vessel.

98858. Shalimar Industries Private Ltd. Improved jute shuttles. Accepted on 3rd January 1967.

Comprises providing a covering of a more wear resistant material on the surface of internal side walls of shuttle provided with grooves teeth or serrations.

98875. Westland Aircraft Limited. Improvements in or relating to vehicles. (8th April 1964), Accepted on 3rd January 1967.

Includes a central barrier, which extends longitudinally with respect to the vehicle and which is the close proximity with the top of the central portion for minimising escape of air or gas from one side of said portion to the other.

98883. Textron Industries Inc. Improvements in or relating to a pulling head device for the stem of fasteners. (4th August 1964). Accepted on 3rd January 1967.

Comprises a sleeve, a nose on the sleeve for exerting pressure on the fastener a tubular drawbolt reciprocall towards the nose a stem gripping jaw device in the drawbolt jaw closing and relieving means.

98987. Shell Internationale Research Maatschappij N.V. Hydrocarbon fuel compositions resistant to deterioration caused by microorganisms and disinfecting solutions suitable for disinfecting tanks, lines and equipment. Accepted on 2nd January 1967.

Comprising a middle distillate fuel and an effective amount of an alpha-beta-unsaturated aldehyde.

99032. Deere & Company. Cotton harvester. Accepted on 30th December 1966.

Incorporating between the main frame of the harvester and the harvester basket vibrating machanism moving the basket generally in a vertical vibratory action.

99056. Farrel Corporation. Controlled continuous internal mixer. Accepted on 4th January 1967.

Comprises mixing chamber, means for forceably charging unmixed material therein, wherein variables;

time the material is subjected to mixing action, mixing energy applied by rotary mixing means, power consumption of said mixing means and heating the mixed material dependant on account of said mixing energy absorbed; means for measuring at least one of these variables an additional means and responsive to these measuring means to control at least one of said variables.

99186. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Optical brighreners. Accepted on 3rd January 1967.

Optical brighteneing of synthetic material can be carried out by treating the material with benzo oxazole compoudds.

99223. Beteiligungs-Und Patentverwaltungsgesellschaft Mit Beschrankter Haftung. Process for the production of low-sulphur iron sponge in rotary tubular kiln. Accepted on 4th January 1967.

Characterised by the charge being fed to the kiln in the presence of a hydrogenous atmosphere therein.

99249. Corning Glass Works. Method and apparatus for making sheets of thermoplastic material such as glass. Accepted on 4th January 1967.

Supplying molten material to trough having oppositely disposed vertically downwardly converging flat surfaces to flow downwardly to form single sheet.

99255. Indian Textile Accessories Company. A frame for weaving loom healds. Accepted on 4th January 1967.

Parallel heald staves are held within two vertical stands by expandible blocks inserted inside each hollow end of beam section and means for expanding said block is provided for firm connection of frame.

99350. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for reinforcing fleeces with cross linked copolymers. Accepted on 27th December 1966.

The cleeces are breaked with aqueous dispersions of copolymers obtained from (a) β—or γ—ketonic acid esters and (b) unsaturated copolymerizable compounds and of (c) cross linking agents which react with β—or γ—ketonic acid esters.

99436. The Drackett Company. Glass cleaning composition. Accepted on 5th January 1967.

A cleaning composition for glass consisting of lower aliphatic alcohol and one high boiling petar organic solvent compatible surface active agent. alkaly metal polyphosphate, balance soft water.

99448. Dunlop Semtex Limited. Improvements relating to the production of thermoplastic sheeting. (30th May 1964). Accepted on 3rd January 1967.

By a method comprising preparing by conventional means fragments of one or more thermoplastic compositions, feeding the fragments through a preheating apparatus, and converting the pre-heated materail into coherent sheeting.

99462. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucium & Bruning. Water-soluble disazo dyestuffs and their metal-complex compounds and process for preparing them and fibrous materials which have been dyed or printed using said dyestuffs. Accepted on 4th January]1967.

Coupling 2 *moles of aromatic diazo compounds containing at least one group—N—X—*CH_2*—*CH_2*—γ with* R_1*—O—AR—*$R_1$2*—CO—*CH_2*—*

(*R*) *n-l*

CO-CH3; R being hydrogen or aliphotic or aroliphalic; X is sulphonyl or carbonyl; Y hydrogen, polylosic radical orhydroxyl n is 1 *or* 2; *Ar is benzene or naphthalene radical with one sulfonicacid;* R_1 *hydrogen or acyl and* R_2 *is hydrogen or alkyl group.*

99505. Saunders Valve Company Limited. Pneumatic actuator. Accepted on 2nd January 1967.

Having the gas space in closed communication with an electrolytic cell having electrodes and an elostrolyte and means in the space to recombine the gases, said cell comprising ametallic pot, two electrodes and a cover in the upper part of the pot.

99517. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Fungicidal agents. Accepted on 31st December 1966.

Combination of tribhenyltin compound $[(C_6H_5)_3$ Sn]Xn *wherein X is inorganic or organic radical and n is whole number and substance for reducing phytotoxicity.*

99580. The English Electric Company Limited. Improvements in or relating to electric switchgear. (27th May 1964). Accepted on 3rd January 1967.

Includes a centre casing a pair of gas blast interruption units an exhaust valve and operating piston and cylinder means, the exhaust valve being annular and sarrounding the said piston and cylinder means or the operating rod.

99822. Pettibone Mulliken Corporation. Foundry Machine for simultaneous production of upper and lower sand mold sections. Accepted on 3rd January 1967.

Characterised by a framework establishing a working area, a lift table, a lower flask and an upper flask, means fixedly and removably securing the upper flask to the machine framework, and a pattern plate.

100165. E.I. du Pont de Nemours and Company. Novel uracil dimers and composition containing same. Accepted on 21st December 1966.

Comprising dimerizing 3-*alkyl or cyclo alkyl substituted—*5-*halo or alkyl or unsubstituted—*6-*methyl uracil in a known manner.*

100188. La Telemecahique Electrique. Circuit breaker apparatus. Accepted on 21st December 1966.

Comprising a pair of relatively movable contact member, an electrically conductive arm contact segment contact surface, two halves median slot, end part.

100200. Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S.p.A. Process for recovering terephthalic acid and ethylene glycol from polyethylene terephthalate wastes. Accepted on 22nd December 1966.

Polyethlene terephthale wastes are heated in an excess of ethylene glycol at such a temperature that they are dissolved and depolymerised until obtaining the formation of ethylene terephthalate dissolved in excess of ethylene glycol.

100252. Vokes Limited. Improvements in dust collectors for cigarette making machines. (24th June 1964). Accepted on 24th December 1966.

A tobacco dust collection system characterised by the provision of at least one atmospheric inlet valve arranged to be opened automatically on the stoppage of any one or more machines whereby the air flow conditions in the dust are maintained substantially constant.

100253. Textile & Chemical Research Company Limited. Reinforcing wires for pneumatic tyres. Accepted on 24th December 1966.

In which the beads being provided with glass re-inforcing wires.

100264. Alexander Poter Saramin. Flotation clarifier. Accepted on 26th December 1966.

Including a cell, upper scum removal means, lower trailings discharge means and a feed inlet.

100265. Takeda Chemical Industries, Limited. A method for the production of a flavour enhancer. Accepted on 26th December 1966.

Preparing a hot aqueous solution of alkali salt of flavourous 5'-mucleotide and monosodium glutamate adding a freely water miscible organic solvent gradually lowering the temperature of the mixture and collecting the resulting crystalline mass from the aqueous mixture.

100330. The English Electric Company Limited. Ferro-magnetic cores. (3rd July 1964). Accepted on 29th December 1966.

Comprising first and second set of laminations with first and second shaped holes, the holes overlapping one another so that relative movement of the lamination may be done with the help of a adjusting tools inserted in the holes.

100333. Marchon Products Limited. Manufacture of sodium metaphosphate. (14th July 1964). Accepted on 29th December 1966.

Comprises depositing a mixture of sodium chloride and w.p.a. with a Na : P ratio of substantially 1:1 on a moving bed of sodium metaphosphate particles at a temperature of above 250°C but nowhere exceeding the melting point of STMP, removing sodium metaphosphate from bed, dissolving STMP in water, removing the insoluble material and recovering STMP or converting to another sodium phosphate.

100349. Shinzo Kitamura. A long apron type draft apparatus used in textile machines. Accepted on 30th December 1966.

Has tension means provided in an endless region defined by long aprons entrained in an endless manner, said means applying tension to long aprons from inside by spring means.

100380. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Improvements in or relating to a process for preparing trioxane homo—and copolymers. Accepted on 3rd January 1967.

Comprises using boric acid ester as controlling agent.

100397. Stora Kopparbergs Bergslags Aktiebolag. A process of producing pig iron in the reduction of ore in a rotary furnace. Accepted on 5th January 1967.

Process of producing pig iron poor in phosphorous and sulphur in a rotary furrace wherein coke is introduced in molten basic slag and oxygen rich gas is introduced to burn is formed and maintaining iron oxide in slag layer.

100449. Esso Research and Engineering Company. Reduction of oxidic iron ores. Accepted on 5th January 1967.

Process producing sponge iron from oxidic ores wherein ore is fed into a fluidized reactor with stages of fluidization and reduced at temperatures from 1000°F to 1800°F comprising adding alkaline earth metal oxide and carbonaceous matter for inhibitting bogging.

100470. General Refractories Company. Supported refractory wall. Accepted on 3rd January 1967.

Comprising a supporting frame, a plurality of support shoes, a plurality of the bricks of mid wall being secured to said supporting frame.

100478. American Flange & Manufacturing Co. Inc. Plastic pouring spouts and combinations for containers. Accepted on 31st December 1966.

Providing a spout construction having two separate nozzle engaging sealing surfaces, one surface having an infinite number of sealing positions and the other having a single sealing position.

100479. Jacques Razimbaud. Device for the perfusion or transfusion of blood. Accepted on 31st December 1966.

Forming the dispensing receptacle and the needle as a unit which can be stored as such, free from contamination until required for use.

100503. Westland Aircraft Limited. Improvements in or relating to air cushion vehicles (28th July, 1964). Accepted on 2nd January 1967.

Means connected to the rigid base structure for selectively forming a supporting air cushion for rigid base structure of greater lateral area than the lateral area of the rigid base structure and for selectively retracting inwardly toward said structure.

100520. Permsky Gosudarstvenny Proektno-Konstruktorsky & Experimentalny Institut Gornogo Mashino-Stroeniya, Perm, ul. Lenina. A coal cutter with a loading ramp. Accepted on 2nd January 1967.

A flat curved jib, the chain of said jib having imparted motion from a vertical shaft of the cutting unit gearbox, the driving sprocket of the chain being accomodated in the inclined portion of the jib on an inclined shaft.

100526. Vereinigte Osterreichische Eisen-und Stahlwerke Aktiengesellschaft. Actuating device for the plug rod of ladles for molten metals. Accepted on 31st December 1966.

The plug rod being connected through a lever linkage with a hydraulic cylinder joined through conduits having control valves therein with an oil accumulator which is in connection with a gas pressure storage tank.

100532. Allied Chemical Corporation. Method of manufacture of a multifilament yarn. Accepted on 4th January 1967.

The body being characterized by having a temperature coefficient of resistance of at least about 1% per degree centigrade at 100°C.

100559. Allied Chemical Corporation. Cyclic ethers. Accepted on 5th January 1967.

Contacting vapours of N-(W-hydroxyalkyl) amide with a catalyst like silica, alumina, silica alumina and silica magnesia.

100560. Allied Chemical Corporation. Preparation of 2-fluoralkyl substituted cyclic iminoethers and compounds obtained thereby. Accepted on 5th January 1967.

Treating a fluorinated amide with a base.

100599. Marchon Products Limited. Improvements in the manufacture of phosphoric acid. (28th July 1964). Accepted on 5th January 1967.

Phospheric acid obtained by wet process from phosphate rock containing organic impurities soluble or phosphoric acid after main gypsum filtration is treated at elevated temperature with active carbon.

100690. Dunlop Rubber Company. Bonding Polyamide sheet surfaces. Accepted on 31st December 1966.

A bonding agent is applied or at least one of the surfaces to be bonded and the surfaces brought in to juxtaposition and the bonding agent having a melting point below the melting points of the polyamides and being a solvent for the polyamide when it is in the liquid form is melted and then solidified.

100710. The Eimco Corporation. Sand filter distributor nozzle. Accepted on 2nd January 1967.

Comprising a hollow inner body having a discharge outlet in its closed bottom portion, a cover apertures in the wall portions of the body and the cover, a flexible screen between the wall portion of the body and the cover and means to secure the body and the cover.

100738. Imperial Chemical Industries Limited. Improvements in or relating to the manufacture of trichloroethylene and perchlorsethylene. (28th July 1964). Accepted on 31st December 1966.

Chlorine is reacted with 1:2-dichloroethane and/or 1:1:2-trichloroethane in the vapour phase is the presence of a small proportion with respect to chlorine of a source of elemental oxygen.

100743. Establissements Merlin & Gerin, Societie Anonyme. Gas blast circuit breaker. Accepted on 4th January 1967.

A first chamber of variable volume having a movable wall such as piston and a second chamber of constant volume, the displacement of the said wall portion during the opening movement of the contact members causing a pressure drop within the first chamber and a gas blast issuing from the second chamber and directed on the extinction of arc drawn between the separating contact members.

100745. Linke-Hofmann-Busch Waggon-Fahrseug-Maschinen G.m.b.H. Automatic central buffer coupling of the willison type for rail vehicles. Accepted on 2nd January 1967.

Comprising a doubled armed lever slewably arranged on the coupling head casing which bears with its one lever arm aganist the uncoupling shaft and with its other lever arm against the slewed off strap.

100761. Montecatini Societa Generale per L' Industria Mineraria E. Chimica. A process for preparing high molecular weight unsaturated hydrocarbon homopolymers. Accepted on 5th January 1967.

Polymerizing cycloolefin containing 7-12 carbon atoms in presence of a catalyst obtained by mixing a salt of a transition metal with a metallorganic or metalhydride compound of an element of Gr.II and III at −80°C to +100°C.

100768. Ciba Limited. Curable mixtures of epoxy resins and ditertiary amines. Accepted on 2nd January 1967. *Heating a mixture of epoxy resin and a ditertiary cycloaliphatic amine as curing agent.*

100796. The Cotton Silk and Manmade Fibres Research Association. Continuous application of substances to travelling materials (27th July 1964). Accepted on 2nd January 1967.

Comprising supplying liquid at a prescribed rate, applicator system, detecting any change in the amount of liquid, utilising such change to alter some factor affecting the take-up of liquid by the material imposed by the machinery employed.

100837. Standard Telephones and Cables Limited Electrical leakage test equipment (8th September 1965). Accepted on 3rd January 1967.

Consists of a barrier of flexible electrodes suspended to extend into the path of a sheathed electrical conductor to be moved through said barrier.

100916. Alfa-Laval Ab. A valve of the type comprising a sleeve-shaped membrance which can be actuated by a valve plug. Accepted 31st December 1966.

At least one cam in the valve housing which is movable by plug bringing means in a direction substantially perpendicular to plane of the plug, and arranged when moved in said direction by said means, to move the plug in said plane.

100952. Vyzkumny ustav vinarsky. Non-woven decorative textile fabric. Accepted on 28th December 1966.

Characterised in that said fabric consists of a coherent base layer to which fibrous material arranged to form a planar art figure is attached by stick knitting fibre interlacing.

100957. Thermal Engineering & Design Company. Thermostats, motor protectors or the like having generally octagonal shaped sealing end. Accepted on 3rd January 1967.

Deformed end of casing being of a maximum width no greater than the original width of the casing and being smaller in area than undeformed sections of said casing.

101032. Farbenfabriken Bayer Aktiengesellschaft. A process for the production of solvent resistant textile coatings (18th May 1965). Accepted on 3rd January 1967.

Comprising applying to the textiles copolymers with monohydric alcohols to hydroxy propyl methacrylate and acrylic acid and or methacrylic acid in polymerised form and then reacting the polymers and cross linking agents with each other.

101037. Ciba Limited. New cinnamoylaminoanthraquinones, process for their manufacture and materials dyed or printed therewith. Accepted on 5th January 1967.

1 : 4-Diaminoanthra quinone is acylated with a reagent which introduces an acyl group of an acid of the formula HOOC-CH=CH—A in which A is an aryl radical.

101060. Om Prakash Tantia. Damping device for use in railway wagons. Accepted on 31st December 1966.

The side frame bolster construction using coiled spring for suspension comprising a cartridge having a single loaded spring provided therein.

101269. Institut Elektrosvarki im E.O. Patona, Kiev, ul Gorkogo. Electrode for welding and building up of metals and their alloys. Accepted on 2nd January 1967.

Comprising alloying and deoxidising materials, while the external one materials protecting the weld metal, electrode rolling up the ribbon its edges are bent inward in such a manner that they encircle the core.

101348. Chemical Construction Corporation. Production of nitrochalk. Accepted on 5th January 1967.

Mixing molten ammonium nitrate with a silicofluoride compound and then with powdered limestone and cooling the resulting fluid mixture to produce solid discreto particles.

101364. Mobil Oil Corporation, (formerly known as Socony Mobil Oil Company, Inc.). Aluminium chloride catalyzed reaction of aliphatic dibasic acid anhydrides with heterocyclic compounds. Accepted on 5th January 1967.

Pre-reacting anhydrous aluminium chloride with aliphatic dibasic acid anhydride to form complexes and reacting heterocyclic compounds with said complexes in a solvent like dibromomethane, dichloromethane, bromochloromethane etc.

101425. Petrocarbon Developments Limited. Improvements in or relating to oxidation process. (4th September 1964). Accepted on 5th January 1967.

Reacting in presence of a peroxidic material as an initiator and of an acid material, an olefin of at least 3 carbon atoms with a mixture of a secondary alcohol and oxygen.

101450. R-N Corporation. Improvements in or relating to briquettes of iron powder and the like. (17th June, 1965). Accepted on 3rd January 1967.

Wherein the briquette has incorporated throughout the body thereof, at least one oxidation inhibitar.

101597. Madhav Damodar Bhate. Improvements in or relating to pressure stoves. Accepted on 31st December 1966.

Fuel tank prefilled with liquified petroleum gas under pressure and constituting an independent, detachable and refillable cartridge type container, a burner assembly provided with needle-like arrangement and a utensil supporting assembly screwed upon threading provided over the burner assembly.

101672. Ciba Limited. Chlorinated α=aminoanthraquinones and process for their manufacture. Accepted on 5th January 1967.

Carrying out chlorination in presence of a carboxylic acid amide in which the amide nitrogen atom is derived from a secondary amine.

101692. Onkar Nath Goenka. Improvements in or relating to overhead travelling cranes. Accepted on 31st December 1966.

A single ginder of tubular section, carriages mounted at each end of said girder, said carriages being adapted to travel on gantries and a crab trolley adapted to traverse on said girder.

101757. Institut Francais du Petrole, Des Carburants et Lubrifiants. Process for the production of light hydrocarbon fractions and lubricating oil. Accepted on 5th January 1966.

Hydrogenating vacuum distillate fractionating the product into light hydrocarbons, a medium oil and a heavy oil and mixing the medium oil with a part of normally solid paraffins and the resulting mixture is hydrogenated the presence of a catalyst and a cracking support at 350°—450° under 50-150 Kgs/cm².

101935. Metallgesellschaft A.G. A process of reducing iron ore pellets. Accepted on 2nd January 1967.

By a process which comprises changing green iron ore pellets into a charge which comprises solid carbonaceous reducing agent and at a temperature below the melting point of solid pellets.

102045. Badische Anilin & Soda-Fabrik Aktiengesellschaft. Modified myrobalan extracts and a process for their production. Accepted on 5th January 1967.

Containing 5-20% by weight (on the weight of myrobalan solids) of a sulphonic acid of naphthalene or of a condensation product of naphthalene with formaldehyde.

102155. Miles Laboratories, Inc. Process for liquifaction of starch more particularly for converting starch to dextrose or dextrose containing products. Accepted on 5th January 1967.

Adding water-soluble calcium compound to an aqueous slurry of starch containing material, subjecting resulting slurry to the action of amylase to lequefy the starch and then subjecting liquefied starch to the action of anylogbecosidase.

102655. George Angus & Company Limited. Flexible hose and method of manufacturing the same. (1st December 1964). Accepted on 4th January 1967.

Comprising drawing a textile jacket through extrusion head and thereafter passing the jacket between spiked rollers which pierce small holes in the cover.

102861. Societe Generale de Constructións Electriques et Mecaniques (Alsthom). Contact locking device for automatic circuit breakers. Accepted on 2nd January 1967.

Comprising moving contact, raised portion restrained by balls, fixed sheath transisting co-centric slide, groove on registers balls.

103208. Chilton Electric Products Limited. Improvements in or relating to tripping mechanisms for electrical circuit breakers and the like. (27th January 1965). Accepted on 2nd January 1967.

Comprising an electromagnet, magnetic circuit movable armature, means biassing the armature to rotate about its pivotal mounting away from the region of low magnetic reluctance.

103512. The Goodyear Tire & Rubber Company. Improvements in method of producing isoprene. Accepted on 7th December 1966.

Comprises in condensing ethylene with at least one of the butenes by means of a catalyst comprising an alkali metal, alkali metal hydride and the like.

103601. Phillips Petroleum Company. Improvements in production of hollow plastic articles. Accepted on 31st December 1966.

Extruding the material, placing the extruded sheet in a plastic condition between a core member and a die member having portions hinged together moving said hinged portions to their folded positions to fold the sheet.

104105. Westland Aircraft Limited. A solenoid actuator and solenoid actuated fluid control valve. (3rd March 1965). Accepted on 30th December 1966.

Comprising a magnetic circuit including a movable magnetic element connected therein by two non-magnetic gaps the path being so disposed that the movement of the element controls a valve, the said movement in related to electric current and a biasing force.

104212. Geoffrey Woods and William Kenneth Peyto. Improvements in fan impellers. Accepted on 2nd January 1967.

In which the impeller is made of separate parts including the impellar blade, the impeller boss and an insert for the boss to fit a driving shaft some of which are moulded from plastic material, the parts being secured together by abonding resin.

107161. E. Merck Aktiengesellschaft. Process for the manufacture of 1, 4-dithia-anthroquinone-2, 3-dicarboxamide and 1, 4-dithia-anthraquinone-2, 3-dicarboxylic acid-amide. (Divisional date 26th March 1965). Accepted on 26th December 1966.

Characterizes in that 2, 3-dicyano-1, 4-dithia-anthraquinone is treated with concentrated sulfuric acid.

108377. Joseph Lucas (Industries) Limited. Method of manufacturing a stator winding for dynamo-electric machines. (Divisional date 30th March 1965). Accepted on 30th December, 1966.

Steps of forming a hleical coil being provided with two pairs of opposite rounded corners and deforming said coil in such a manner that one pair of rounded corners are bent in a direction opposite to that for the other pair.

Printed Specification Published

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 28th January 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

7th January 1967

108773. Ciba Limited. Manufacture of new oxindoles.

108774. C. A. V. Limited. Liquid fuel pumping. (31st January 1966).

108775. Universal Oil Products Company. Catalyst preparation and use.

108776. Dunlop Company Limited. Hardenable lacquers and coating means based on unsaturated copolymers.

108777. The Firestone Tire & Rubber Company. Article of manufacture.

9th January 1967

108778. R. B. Jain. Improvements in or relating to improved method of manufacturing two tone moulded article.

108779. Fibre Industries, Inc. Method and apparatus for texturing synthetic polymer filaments.

108780. N. N. A. K. Maliki. Improvement in or relating to the cigarette or cigar holder.

108781. Mrs. S. S. Thatte. Cash call dial indicator.

108782. Madhusudan Laxminarayan Rathi. Improvements in or relating to power transmitting coupling assembly.

108783. Sandoz Ltd. Improvements in or relating to organic compounds. (10th January 1966).

108784. Sandoz Ltd. Improvements in or relating to organic compounds. (10th January 1966).

108785. F. L. Smidth & Co. Methods of and apparatus for drying granular material. (10th January 1966).

108786. F. L. Smidth & Co. Methods of and plants for producing cement clinker. (10th January 1966).

108787. Muanyagipari Kutato Intezet. Process for preparing liquid epoxy oligomers.

108788. Foseco International Limited. Fibre-containing heat-insulating compositions. (10th January 1966).

108789. F. Hoffmann-la Roche & Co. Process for the manufacture of heterocyclic compounds.

108790. Birfield Engineering Limited. Improvements in or relating to drive shafts. (12th January 1966).

108791. Cornelis Jan Steketee. Improvements in and relating to spreading machines.

108792. General Electric Company. Improvements in or relating to electrolytic capacitor.

108793. American Cyanamid Company. Contact insecticides.

108794. Vychislitelny Tsentr A. N. Gruzinskoi Ssr. Method of generating random numbers for electronic digital computers and a device for its realization.

108795. Ceskoslovenska akademic ved. Carriers for biologically active substances.

108796. Knorr Bremse Gmbh. Compressed-air controlled driver's brake valve for vacuum brakes.

108797. A. S. Rao. Improvements in or relating to twisting and winding of natural and or man-made fibres.

108798. Shell Internationale Research Maatschappij N. V. Process for the production of a staple fibre.

108799. Imperial Chemical Industries Limited. New metal-complex azo dyestuffs. (31st January 1966).

108800. Colgate-Palmolive Company. Method of treating household articles.

10th January 1967

108801. N. L. Rangiah. Improvement in motor vehecal *number plates* for distinct and clear reading.

108802. M. P. Tank and U. Premises. An improved method of and device for manufacturing pelletted fertilizers.

108803. Raionnoe Energeticheskoe Upravlenie "Chelyabenergo". Relay responsive to limiting changes in the level and velocity of fluids.

108804. Snia Viscosa Societa' Nazionale Industria Applicazioni Vescosa S.p.A. Method and installation for the hydrogenation of benzoic acid to hexahydrobenzoic acid.

108805. J. R. Geigy A. G. Process for the production of monoazo dyestuffs which are difficultly soluble in water.

108806. United States Steel Corporation. Method of carbonate-bonding specular and resulting product.

108807. Lepetit S. p. A. New Steroids. (January 11 1966).

108808. Lepetit S. p. A. New steroids. (January 11 1966).

108809. Lepetit S. p. A. New steroids. (January 11 1966).

108810. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Isoquinoline compounds and process for the manufacture thereof.

108811. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the preparation of phenazine derivatives.

108812. Veb Filmfabrik Wolfen. Multilayer material for colour photography. (14th October 1966).

108813. Veb Chemiewerk Coswig. Process for the defluorisation of waste gypsum. (6th December 1966).

108814. Ciba Limited. Pesticides.

108815. Hercules Incorporated. Process for the manufacture of smokeless powder.

108816. Hercules Incorporated. Process for densifying nitrocellulose.

108817. Consolidated Engineers. Improvements in or relating to a voltage booster.

11th January 1967

108818. S. B. Lal. Shiva Process, plant, and accessories.

108819. Council of Scientific and Industrial Research. Improvements in or relating to the manufacture of carbon tracks for variable resistors.

108820. S. R. Sathe. Improved prefabricated removeable dam.

108821. McDowell-Wellman Engineering Company. System for producing carbonised and prereduced iron ore pellets.

108822. Westinghouse Electric Corporation. Pressure electrical contact assembly for a semiconductor device.

108823. Monsanto Chemicals Limited. Casting. (17th January 1966).

108824. Borg-Warner Corporation. Air-conditioning system.

108825. American Flange & Manufacturing Co. Inc. Method and apparatus for feeding articles.

108826. Farbenfabriken Bayer Aktiengesellschaft. Heat-sensitive synthetic latices.

108827. Vereinigte Osterreichische Eisen-und Stahlwerke Aktiengesellschaft. Plant comprising a stationary reaction vessel for converting charging materials into steel. (Addition to No. 104663.)

108828. The Whitney Blake Company. Communication cable quad and method of making same.

108829. Amphenol Corporation. Dry lubricat, method of application to surface of an article, and coated article obtained thereby.

108830. Amphenol Corporation. Dry alternate layer lubricant, method of application to a surface and article so obtained.

108831. Amphenol Corporation. Dry lubricant coating and method of making same.

108832. Union Carbide Corporation. Novel organic pesticides.

108833. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Production of phenol by the catalytic dehydrogenation of cyclohexanol and/or cyclohexanone.

108834. Fmc Corporation. Material transferring apparatus.

108835. Vsesojuzny Nauchno-Issledovatelsky I proektnokonstruktorsky Institut Metallurgicheskogo Mashinostroenia. Flying shears for cutting thin rolled sheet.

108836. Ljuberetsky Ordena Lenina I Ordena Trudovogo Krasnogo Znameni Zavod Selskokhozyaistvennogo Mashinostroenia Imeni Ukhtomskogo, Sugar cane harvester.

108837. Vsesojuzny ordena Lenina Elektrotekhnichesky Institut imeni V. I. Lenina, Symmetrical thyristor.

108838. K. Raghavendran. Coat-Hanger Stand.

12th January 1967

108839. Vsesojuzny Nauchno-Issledovatelsky Institut antibiotikov. Method of cultivating leishmania.

108840. Fisons Pest Control Limited. Biocidally active compositions. (13th January 1966).

108841. Fisons Pest Control Limited. Biocidally active compositions. (13th January 1966).

108842. Sealed Power Corporation. Improvements in and relating to piston rings.

108843. Centre De Recherches De Pont-A-Mousson. Centrifugal casting machine.

108844. Lasso Ropeways Limited. Aerial cableway system.

108845. Toyo Boseki Kabushiki Kaisha and Kanpaksu Kogyo Kabushiki Kaisha. An improved lap forming and doffing method and its apparatus.

108846. Ciba Limited. Process for the manufacture of a protein. (January 14 1966).

108847. Sandoz Ltd. Improvements in or relating to organic compounds. (13th January 1966).

108848. Sinclair Radionics Limited. Improvements in and relating to television receivers. (14th January 1966).

Alteration of Date

98975. Post dated to 11th February 1966 under Section 5 of the Act.

100783. The claim to priority date 27th July 1964 has been abandoned and the application dated as of 26th July 1965, the date of filing in India.

103293. Ante-dated to 10th August 1965 under Section 5 of the Act.

108047. Ante-dated to 2nd April 1965 under Section 5 of the Act.

107620. Ante-dated to 2nd April 1965 under Section 5 of the Act.

107733. Ante-dated to 2nd April 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents' office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specification should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown crescent brackets are the dates allowed under Section 78-A of the Act.

92081. Imperial Chemical Industries Limited. New Explosive compositions. (11th February, 1963). Accepted on 11th January 1967.

Comprising ammonium nitrate and a quantity of a solid phenol-aldehyde resin.

92340. Kurashiki Rayon Company Limited. Novel crystalline polyvinyl alcohol and method of manufacturing them. Accepted on 3rd January 1967.

Dissolving polyvinyl alcohol in polyhydried alcohol by heating to uniform solution and cooling.

96808. Military Training Device Co. Aktiebolag. Wear reduction additives Accepted on 11th January 1967.

Cartridge comprising propellant charge surrounded by additive for reducing barrel wear said additive consisting of a layer of material con aining carbon producing gas and dispersed therein finely divided material.

98741. Zavod "Gomselmash" Gomel. Method of and device for, manufacturing profile articles, preferably gear and star wheels. Accepted on 11th January 1967.

Method of manufacturing profile articles by piercing central datum hole, upsetting and pressing characterised in that the process of radial pressing of the blank, active forces applied in three directions.

98801. Imperial Chemical Industries Limited. Process for colouring cellulose textile material. (21st December 1964). Accepted on 2nd January 1967.

The textile material is padded or printed with a dyestuff having at least one sulphonic acid group.

98803. Eastman Kodak Company. Benzothiazole azo dyes and textile material dyed therewith. Accepted on 2nd January 1967.

By coupling a diazotised unsubstituted or substituted 2-aminobenzothiazole with a coupling component.

98804. Eastman Kodak Company. Methine compounds containing the cyanomethylidene group. Accepted on 2nd January 1967.

By condensing a nitrite containing an active methylene group with a formylated tetrahydro quinolene.

98810. Boyles Bros. Drilling Company Ltd. Wire line core barrell and by-pass assembly. (12th May 1964). Accepted on 3rd January 1967.

Comprising a sleeve, a spearhead, a tubular spring latch having spring fingers around the sleeve and means to cause the fingers to move outwardly into locking and unlocking positions respectively.

98835. Samuel Hirsch Levinson. Apparatus for weighing vehicles in motion. Accepted on 5th January 1967.

A weighing station, weighing means for weighing each load whilst being traversed through the weighing station, means for determining the speed of traverse of each said load to determine which loads traverse the weighing station at a speed which is excessive for accurate weighing by the weighing means and means for indicating which loads, if any, traverse at said excessive speed.

98845. Veb Chemiefaserwerk 'Friedrich Engles. Process for production of shaped articles from polyesters or co-polyesters of high molecular weight. Accepted on 6th January 1967.

Comprising subjecting, the still plastic shapes obtained from polyesters or copolyesters especially from polyethylene terephthalate by methods known per se, to the action of superheated steam or hydrophilic liquids in combination with swelling and/or dressing agent.

98847. Owens-Corning Fiberglas Corporation. Water dispersible resinous epoxy compositions and its application in sizing glass fibres. Accepted on 6th January 1967.

Characterised in that resinous epoxide compound is combined with at least 10% by weight of an acid salt of the reaction product of an epoxide compositions having at least two oxirane groups and a hydroxyl containing mono-amine.

98856. Eastman Kodak Company. Method of making anthraquinone compounds suitable for dyeing or colouring of polyesters. Accepted on 6th January 1967.

Reacting a N-(P-amino phenyl) pyrrolidone with Leuco-1, *4-dihydroxycnthraquinone or with a mixture of a* 1, *4-dihydroxyanthraquinone and leuco-1, 4-olihydroxy-anthraquinone.*

98975. Steel Fabricators. Improvement in or relating to vapour valves. Accepted on 10th January 1967.

The valve opening is provided with an annular flange and the sealing of the opening is effected by a spindle having a sliding member comprising an annular flange around a central comical protuberance.

98979. F. B. Mercer Limited. Improvements in or relating to the manufacture of non-woven fabrics. (22nd April 1964). Accepted on 5th January 1967.

Comprises forming a web or fleece comprising only synthetic fibre staple causing each fibre to coil and close on itself into a complete coil and thereafter to coil into progressively tightening helical coils to the final degree of coiling, all the fibres coiling at the same rate and to the same degree whereby the fibre interlock and form a coherent fabric and subjecting the web or fleece to activating treatment.

99070. Vasant Shridhar Vaidya. Improvements in or relating to cones or vibrating diaphragms of loudspeaker and or microphones. Accepted on 10th January 1967.

Comprising basic raw material which is suitably compounded with chemical ingradients for obtaining foaming property in order that when treated to a predetermined level it is capable of being formed into very low density globuler dry pulp.

99085. Veb Nahwirkmaschinenbau Malimo Karl-Marx-Stadt. Machine with eye-type needles for making of a plush fabric. Accepted on 7th January 1967.

A second warp is placed in hooks of the needles by a guide bar so that loops formed by second warp are carried by needless into the ground in opposited direction to pile-thread needle loops.

99134. Universal Oil Products Company. Catalyst and process for polymerizing ethylene. Accepted on 4th January 1967.

Comprises treating the anhydrous support with a salt and/or hydroxides of alkali metals and/or alkaline earth metals and then calcining the support and finally compositing an alkali metal with the support.

99195. Corning Glass Works. Strengthened glass ceramics articles and method of producing them. Accepted on 6th January 1967.

Characterised in that has inner portion containing parent crystalphase containing alkali metal ions and outer portion compressively stressed therewith and chemically differing in that portion of alkali ions are replaced by ions of lager ionic diameter

99196. Corning Glass Works. Strengthened glass ceramic cuticles and method of producing them. Accepted on 6th January 1967.

Characterised in having inner portion containing parent crystal phase and outer portion compressively stressed therewith and has different crystal phase and lower coefficient of expansion.

99213. J. R. Geigy A. G. Process for the production of monoazo pigments. Accepted on 5th January 1967.

By coupling the diazonium compound of 4-chloro-3-amino-benzoic acid-2', 5'-dichlorophenylamide with a 2-hydroxynaphthalene-3-carboxylic acid phenylamide.

99388. Montecatini Societa Generale Per L'Industrial Mineraria E Chimica. Stable concentrated aqueous formaldehyde solutions. Addition to No. 84587. Accepted on 7th January 1967.

Containing as stabiliser an alkyl gunamine derivative in which the alkyl group contains from 7 to 13 carbon atoms.

99391. Ethyl corporation. Improvements in or relating to antiknock compositions. Accepted on 12th January 1967.

An antiknock composition comprises, a mixture of tetrahydrocarbyl leads.

99452. Sperry Rand Corporation. Open shelf filing structures. Accepted on 9th January 1967.

Means are provided for suspending shelf unit from support members for pivotal movement to enable the outer end of the shelf unit upwardly displaced from the first position.

99523. Council of Scientific and Industrial Research. A solar heating device. Accepted on 4th January 1967.

Including a solar heat collector with primary fluid inlet and outlet a shell-and tube heat exchanger with a a number of tubes carrying a secondary fluid within a cylindrical shell and further tubes connecting the primary fluid inlet and outlet to the said cylindrical shell.

99552. Metalastik Limited. Improvements in or relating to cable spacers for multi-conductor electrical over head transmission lines. Accepted on 11th January 1967.

A cable spacer comprising two clamps, each to grip conductor and a spacing link to which the clamps are connected one rigidly and the other through a single flexible connection.

99556. Halcon International Inc. Method of making an article by joining flat plates to the external surface of thin-walled tubing. Accepted on 11th January 1967.

Method of uniting the external surface of a thin walled tube to the inside edge of a sheet comprises positioning tube in hole and freezing a liquid inside tube so that tube expands to get fitted.

99658. Kureha Kagaku Kogyo Kabushiki Kaisha. Horizontal mercury-cathode chlorine cell. Accepted on 9th January 1967.

Comprising electrolyzing cell rectangular steel bottom plate, mercury inlet channel., device by feeding mercury mercury outlet channel.

99745. Mannie Punch and Die Company Inc. Improvements in or relating to punch and die sets. Accepted on 9th January, 1967.

Comprising one punch, flat punch holder plate, die-die holder, holder plate, springs, guide pins, guide bushing, ram punch press.

99768. Council of Scientific and Industrial Research. A process for the manufacture of mangrove extract. Accepted on 12th January 1967.

By leaching mangrove barks or woods by counter current technique with water at 60° C and drying the final extract with the help of a spray drier with extracting the final dried product with a mixture of acetone and methanol.

99982. United Aircraft Corporation. Improvements in and relating to coatings for high-temperature alloys. Accepted on 11th January 1967.

An article comprises a substrate of an alloy of nickel a surface zone consisting of an alloy of nickel aluminium with atomic ratio 2: 3 to 3 : 1 and 1 to 10% tantalum.

100060. Sperry Rand Corporation. A system of writing in or storing binary information in a magnetizable thin film memory element. Accepted on 10th January, 1967.

Characterised in that during the application of drive magnetic field the element is subjected to a first information magnetic field of one polarity and other removal of first information magnetic field to a second information magnetic field of the opposite popularity the last applied information magnetic field steering the magnetization of the element into the desired rema nent stable state of the element along its 'easy' axis.

100072. National Polychemicals, Inc. Phosphorus containing polymers. Accepted on 15th December 1966.

Reacting an aromatic phosphite with an aldehyde wherein said phosphite is prepared by the reaction of a phenol and a trivalent phosphorus.

100115. Vinayak Raghunath Vispute. Automatic advance retard device for injection timing of auto diesel engines. Accepted on 10th January 1967.

The actuating unit comprising a set of fly weights mounted on the main driving shaft of the device over which there is mounted another hollow shaft, and the pump driving unit comprising an advancing sleeve mounted over the extended solid portion of the hollow shaft which bears a roller which in turn fits in a helical groove provided on the advancing sleeve.

100211. Pettibone Mulliken Corporation. Sand mulling apparatus. Accepted on 22nd December 1966.

Assembly comprises a hub, a plow secured to it, means for introducing air, introducing water into distribution chennel, plow elevaring sand.

100279. Valley Manufacturing Company. Method of and apparatus for welding tapered pipes. Accepted on 26th December 1966.

Apparatus welding pipes comprising frame means, welding means feed members with work engaging profiles, guide means engaging said pipe and means actuating and controlling movement of guide.

100361. Dow Corning Corporation. A method of bonding silicone rubber to plastics. Accepted on 2nd January 1967.

By wetting the substrate of polyester with an aqueous solution or dispersion of a silanol or siloxanol and drying the treated fabric and treating the coated fabric with a coating of a silicone rubber stock and there after curing the coating by a manner known per se.

100362. Dow Corning Corporation. Water impervious fabric and garments produced therefrom. Accepted on 2nd January 1967.

Characterises by having an unfilled silicone rubber on the threads and a continuous film of unfilled silicone rubber across the interstices in the fabric.

100381. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the preparation of 1,2-dischlorethane. Accepted on 3rd January 1967.

From ethylene hydrogen chloride and oxygen in the presence of a catalyst which contains, tellurium in an elementary and/or in a bound form.

100389. Jacques Leon Alexandre See. Gliding resilient cover, more particularly for achievement of skiing tracks. Accepted on 3rd January 1967.

Formed by hollow members made of material having limited flexibility, having at their top a crown-shaped part forming gliding area shouring some convex or concave projections the hollow members having rising side walls extending below the crown shaped part.

100412. The English Electric Company Limited. Improvements in or relating to electric circuitbreakers. Accepted on 5th January 1967.

Each of interrupter assemblies is skewed relative to the common plane through the support insulators of a phase.

100425. Arakawa Rinsan Kagaku Kogyo Kabushiki Kaisha. A process for the manufacture of hydrocarbon resins and their use as a sizing agent. Accepted on 5th January 1967.

Comprising mixing aromatic hydrocarbons having boiling point above 130°C and obtained as a by-product in petroleum cracking processes with a low boiling hydrocarbon and polymerizing the resultant mixture.

100456. Johnson & Johnson. Fibrous backed pressure sensitive adhesive tape and release coating. Accepted on 7th January 1967.

Formed by blending a minor proportion of a release agent copolymer consisting essentially of stearyl methacrylate and acrylonitrile and a major proportion of film forming composition.

100476. J. R. Geigy A.G. Process for the production of optical brighteners of the stilbene series and their use in cellulose or synthetic polyamide fibres and detergents. Accepted on 9th January 1967.

Coupling diazonium compound of 4-amino-2', 4'— or —3' 4'—dichlorostilbene—2— sulfonic acid with an unsulfonated 2-aminonaphthalene and oxidising the O-aminoazo dyestuff.

100489. Council of Scientific and Industrial Research. Friction prop. Accepted on 9th January 1967.

A friction prop consisting of two strut., upper one sliding inlower one and is held inlower one by four friction surface pressed against upper strut by four wedges each with a U shaped groove.

100494. Chemische Fabrik Pfersee G.m.b.H. An aqueous emulsion for making fibrous material water repellent. Accepted on 4th January 1967.

Aqueous emulsion comprising a parafin having a melting point from 45 to 90° with a salt of a quaternary nitrogen base having an aliphatic redical with at least 12 carbon atoms.

100503. Ubaldo Ranzi. An electric motor having a starting joing incorporated therein. Accepted on 9th January 1967.

Joint comprising a casing containing a rotor and a torque transmitting means interposed between casing and rotor wherein part of housing and/or rotor is integral with the resistant structure of motor-joint unit.

100506. Otto Keller. Venturi Gas Washers. Accepted on 9th January 1967.

The diffuser is mounted above the neck and is provided with an outlet aperture directed upwardly so that the flow of gas therethrough is from bottom to top.

100507. N. V. Phillips' Gloeilampenfabrieken. Improvements in and relating to methods of producing 2, 2, 6, 6-tetrachlorocyclohexanone. Accepted on 9th January 1967.

Reacting cyclohexanol with chlorine in presence of an amine.

100564. Dorr-Oliver Incorporated. Apparatus and process for the treatment of finely devided solids. Accepted on 9th January 1967.

According to the fluidized bed technique comprising a reacter shell, a horizontally extending construction plate means for supplying finally divided soids to said treatment compartment, means for supplying fluidizing gas to gas receiving chamber, and cyclone separation means below said gas receiving chamber.

100573. Edmund Quincy Sylvester. Mold or casting apparatus. Accepted on 9th January 1967.

Mold with opposed side blocks for movement, inner blocks including top, rear and front and bottom flocks positioned for engagement by other blocks and an ingate construction defining a passage from outside to said cavity.

100633. Universal Oil Products Company. A process for producing phosphorous containing reaction products and compositions containing said reaction products. Accepted on 10th January 1967.

Comprising reacting a phosphorous containing compound selected from phosphates, thiophosphates, phosphinates and phosphonates with the polymeric products formed by reacting a polyhalopolyhydropolycyclic dicarboxylic acid, its anhydride, its ester or diol corresponding to the acid with an alkanolamine having at least two hydroxyl groups or an alkanolamine having at least two amino groups.

100662. Allied Chemical Corporation. Improvements in or relating to the charging of coking chembers with hot coarsely comminuted coal. Accepted on 9th January 1967.

Method of changing coke ovens with coarsely comminuted hot coal particles comprises charging with hot particles and a carrier gas (steam or coke oven gas) to effect desired change in less than 5 minutes.

100682. Tsentralny Nauchno-Issledovatelsky i Proektno-Konstruktorsky Kotloturbinny Institut im. Horizontal cylindrical furnace for burning preferably a low-reaction pulverized fuel. Accepted on 12th January 1967.

Characterized in that it is provided with a gas exist port longitudinally arranged in relation to the cylinder, while the fuel-and air supplying nozzles are disposed at the gas-exist port.

100685. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Azo-dyestuffs containing metal process for their manufacture and fibrous textile material dyed or printed by a process using said azodyestuffs. Accepted on 6th January 1967.

By treating an azo dyestuff with agents yielding metal.

100740. Whiffen & Sons Limited. Process for the oxidation of hydrozoanides Accepted on 10th January 1967.

Comprising treating a hydrazoamide with a water soluble chlorate in an aqueous acidic medium having a pH-2·0 to —0·5 in the presence of bromine or a bromide.

100783. Secomastic Limited. Improvements relating to joint covering strips. Accepted on 10th January 1967.

The strip comprises of two arms and a leg, and the spring clips, for holding the leg each being U-shaped and having tow arms, at least one of the arms having a tongue.

100817. International Nickle Limited. Silicon steel. (7th August 1964). Accepted on 7th January 1967.

A method in which gross texture in produced in steel sheet containing 3·5% to 6·5% silicon, from 2 to 12% nickel from 0·02 to 0·06% carbon, and from 0·05 to 0·3% vanadium, the balance being iron, by subjection the steel to secondary recrystalisation on heating.

100842. Nippon Electric Company Limited. Heating filaments for electronic discharge device. Accepted on 6th January 1967.

Binding wires which support the heating filaments are fixed to heat resisting insulators, through or not through the medium of intermediate supporters fumed of binding wire holder of heat resisting metal.

100843. Lee-Norse Company. Continuous mining machine with oscillating rotary cutter heads. Accepted on 10th January 1967.

Including a hydraulically operated motor means connected to the boom and to each cutter for horizontally oscillating the cutters in opposition and means for causing said-motor means to horizontally oscillate the carriers during normal operation of the machine.

100878. Imperial Chemical Industries Limited. Improvements in or relating to apparatus for the treatment of particulate material. Accepted on 11th January 1967.

A vertical chamber with hoppers interposed in between top feed and bottom outlet members to retard and cascade the fall of solid material and a stream of gas is passed from bottom.

100928. Dunlop Rubber Company Limited. Spot-type disc brake. Accepted on 9th January 1967.

Comprising a caliper, pair of limbs, brake disc. friction element, a ball, ramps means to actuate actuating device.

100975. Anil Vithal Borkar. Superhetrodyne receiver with monitor switch. Accepted on 11th January 1967.

Comprising a control transistor supplied with rectified intermediate frequency voltage, a drive transistor fed from the out put of the control transistor.

100990. Dollinger Corporation. Filter. Accepted on 11th January 1967.

A filter comprising a porous member with a central bore, one end connected to a pump, other end closed, pressure differential between said bore and outside is below a predetermined level so that fluid passes through pores.

101003. AMP Incorporated. A method of and a connector for making an electrical connection to insulated wire. Accepted on 9th January 1967.

Comprising electrical wire, tongue, notch crimping operation, conductive core, ferrule forming portion, channel shaped channel side wall.

101006. Shell Internationale Research Maatschappij N. V. Improved process for the recovery of p-xylene. [Addition to No. 96515]. Accepted on 10th January 1967.

The improvement comprises in modifying the Purification scheme by the introductions of a second cystalization stage.

101040. Imperial Chemical Industries Limited. Means for the accurate control of the relative speed of at least two driven members. (27th August 1964). Accepted on 7th January 1967.

A speed sensing device operatively connected to a first driven member, is adapted to give an electrical signal which after amplification, and if necessary shaping, is used to control the speed of a synchronous motor or motors driving the second or other driven members at the required speed relative to the first members.

101075. Maschinenfabrik Fahr Aktiengesellschaft. Combine harvester, especially combine rice harvester. Accepted on 6th January 1967.

Where in the studs are attachable to the particular driving plates.

101233. Dinshaw Nanabhai Dastoor. Improvements in or relating to carding machines. (Addition to No. 84322). Accepted on 7th January 1967.

Curved lint picking bars are provided below the licker in, the top curved ends of the bars being directed opposite to the direction of licker-in wires.

101301. International business Machines Corporation. Improved method of epitaxially vapour depositing semiconductor material. Accepted on 7th January 1967.

Comprising, after a predetermined initial period of epitaxial deposition of the material, the deposition is temporarily halted for an intermediate period and than the deposition of the same semi conductor material is recommended for a further period.

101305. Esso Research and Engineering Company. Method of recovering coal or other minerals from acqueous slurries or suspensions. Accepted on 11th January 1967.

Method of recovering coal from aqueous slurries comprising adding water immiscible orgnic liquid, which has a higher surface affinity for coal than water so that coal float is the surface from ubere it is removed.

101307. Union Carbide Australia Limited. Improved thermoplastic resin compositions. Accepted on 7th January 1967.

Comprises a thermoplastic resin with a N-methyl carbamate insecticide and an acid compound.

101351. Vsesojuzny Elektrotekhnichesky Institute Im. Lenina. Air-blast switch. Accepted on 7th January 1967.

Having arc-arresting gapes between tubular electrodes contacts which are connected with atmosphere through exhaust valves, characterised in that said exhaust valves are mechanically interconnected.

101409. Fichtel & Sechs A. G. Piston-ported two-stroke cycle engine. Accepted on 10th January 1967.

Additional transfer port arranged in the cylinder wall opposite to exhaust port, characterised in that the transfer duct connected to the transfer port passes through the intake duct so that the lattex forks before entering the cylinder chamber.

101444. Kasi Saminatha Gopalan, Kasi Gopala Ramanathan and Kasi Gopala Mohandas. Improvements in or relating to winking light direction indicator systems for automobiles and the like. Accepted on 9th January 1967.

Circuit includes convertional winker relay a battery with panel indicating light, two relay attachment coils two pairs of spring loaded armatures two magnetic coils, a further pair of spring loaded armatures and two supply armatures characterized by the connection.

101448. Bruno Gimelli. Fruit and vegetable press. Accepted on 10th January 1967.

Comprising a first outlet for juice extracted by fruit or vegetable material being pressed by a rotor against a filter a second outlet for the resulting pulp and means for guiding the pulp in a centripetal direction.

101488. Outokumpu Osakeyhtio. A regulating device for the removal of solid materials from the reaction chamber of a fluidized bed furnace. Accepted on 11th January 1967.

Regulating device for removing solid material from the reaction area of a fluidized bed furnace by regulating outlet area.

101506. Vsesojuzny Nauchno-Issledovatelsky Tekhnologichesky Institut Priborostorenia. Vibratory electromagnetic drive. Accepted on 9th January 1967.

A vibratory electromagentic drive being characterised in that its resilient elements are made as at least two suspensions mounted one on the other, one of the suspension being connected to each other by a rigid member.

101559. British Visqueen Limited. Extrusion and injection moulding of polyolefines. (23rd September 1964). Accepted on 11th January 1967.

Comprises maintaining a non-oxidising atmosphere around the opening to said zone at high temperature when beginning or ending a shut-down.

101703. Farbenfabriken Bayer Aktiengesell schaft. Readily dispersible pulverous substances. (21st June 1965). Accepted on 5th January 1967.

The surface of the substance carries a non-ionic surface active triester of orthophospharic acid.

101719. The Metal Box Company Limited. Improvements in or relating to dispensing containers for flowable materials of cream-like consistency. (15th October 1964). Accepted on 9th January 1967.

Comprising a body and dispensing means movable relative to the body characterised in that a portion of the body is contract with the contents is resilient.

101770. Westland Aircraft Limited. Improvements in or relating to electrical position indicators. (1st October 1964). Accepted on 9th January 1967.

An electromagnetic transducer device attached to one part is arranged to sense the field strength of coil attached to the other part to generate a signal dependent upon its position in relation to the coil.

102002. N. V. Philip Gloeilampenfabrieken. Improvements in and relating to switching networks for use in atuomatic communication exchanges. Accepted on 7th January 1967.

Comprising a plurality of switching stages connected by each other by intermediate lines and composed of matrix switches.

102017. Steffan Klinghoffer. Improvements relating to descaling and phosphating the surfaces of metal objects. Accepted on 7th January 1967.

Comprising phosphonic acid, metal phosphate organic or inorganic acid other than phosphoric acid, wetting agent viscosity decreasing agent, graphite and an accelerating agent.

102024. Ckd Praha oborovy podnik, zavod Prerovske strojirny Prerov. Apparatus for heat treatment of pulverulous materials, particularly of cement raw materials. Accepted on 11th January 1967.

Apparatus for heat treatment of cement comprising preheating and calcining shaft for preheating material characterised in that gas conduits from cooler, to the calcining shaft and material conduit from calcining shaft terminate in inlet chamber.

102171. Grasso's Koninklijke Machinefabrieken N.V. Compressor with capacity control comprising a delayed action device. Accepted on 9th January 1967.

Delayed action control device comprises a piston accommodated in a cylinder, wherein movement of the piston under the influence of oil pressure against spring force is delayed by the oil flow being throttled.

102222. Societe Fives Lille-Cail. Feeding device for particulate solid material. Accepted on 11th January 1967.

A feeding device comprising a container for a body material vent means for admitting gas, a conduit and an actuating means moving said conduit.

102284. Tube Mill Holding Societe Anonyme. Production of seamless tubes. Accepted on 9th January 1967.

Includes rotary forging rolls wherein hollow body grips the mandrel prior to initial insertion, automatically withdrawn after its successive impacts and brought into the rolling position just before the impact points of the working part of the rolls face each other.

102336. Foseco International Limited. Production of metal ingots. (2nd November 1964). Accepted on 6th January 1967.

A slab of heat insulating composition for use in lining the head of a mold comprising cellulosic fibre, binder and remainder to make 100% of mixture with low melting silicate as one component.

102337. Foseco International Limited. Production of ingots. (2nd November 1964) Accepted on 5th January 1967.

Production of steel ingots and slab and billets of copper, neckel comprising locating a get composition containing 1) a carbocyclic compound 2) an inflammable liquid 3) a gelling agent.

102380. Emhart Corporation. Apparatus for moving newly formed glassware articles of unstable configuration onto a conveyor. Accepted on 9th January 1967.

An apparatus comprising a base oscillatable through a substantial angle between a first position facing the deadplate and a second position facing the conveyor, a reciprocating motor on said base having an element which extends and retracts and also having means for automatically extending the said element.

102391. Gloucester Railway Carriage and Wagon Company Limited. Improvements in or relating to bogie trucks for rail vehicles. (6th November 1964). Accepted on 10th January 1967.

A bogie truck wherein each brake head is mounted on the end of a corresponding brake beam in a manner which allows the brake head to be slid along the beam.

102407. Allied Filter Engineering Inc. Improvements relating to pleated filter elements and method of manufacturing such elements. Accepted on 11th January 1967.

A filter element comprising annular flexible pleats and in case of collapse of a pleat the other pleats get distorted to bring it lack to proper position.

102765. Podmore & Sons Limited and William Bolton Limited. Improvements relating to polishing, deburring, grinding and similar apparatus. (23rd April 1965). Accepted on 11th January 1967.

Polishing apparatus comprising a processing chamber having inner and outer cylindrical walls concentric about an axis, subjecting the chamber to compound vibration so that media tends to pack with high packing density.

102971. The Marconi Company Limited. Improvements in or relating to transistor amplifiers. (6th January 1965). Accepted on 6th January 1967.

Comprising two negative feedback loops of which one is current feed back loop and other is voltage feed back loop.

102989. The British Oxygen Company Limited. Gas shielded electric arc welding. (15th December 1964). Accepted on 9th January 1967.

The voltage applied between the electrode and workpiece is varied at a predetermined frequency between relatively low and relatively high valves, the high valve being applied at some time during the arcing period.

103024. Izhorsky zavod, Kolpino, Leningradskoi obl. Mechanism imparting efforts by means of flexible traction to the working unit in machine tools mostly in single-bucket excavators. Accepted on 10th January 1967.

A mechanism characterised in that between the flexible tie and the working unit there is installed a resilent damping member.

103293. Kashinath Savliram Kahirnar. Improvements in or relating to seed sowing implement. Accepted on 10th January 1967.

The seed being stored in two bowls having in each one fixed bottom plate with two large enough holes opening into the seed tubes below and over this fixed plate there being reciprocating plate having a suitable and corresponding set of holes.

103525. Armour Pharmaceutical Company Limited. Sterilizable container. (15th February 1965). Accepted on 10th January 1967.

Comprising small hole, aparture, two interengaging parts readily seperable by twisting one relative to the other to give free access to the interior of the container.

103958. The General Electric Co. of India Private Ltd. Improvements in electric induction motors. Accepted on 5th January 1967.

Comprising a rotor mounted on brackets the rotor is made up iron laminations with aluminium conductor bars and end connector rings formed as one piece with the said bracket.

104054. American Flange & Manufacturing Co. Inc. Method and apparatus for lining container closures. Accepted on 6th January 1967.

Apparatus comprising nozzle for metering and reservoir for storing the lining compound characterised in that the compound is kept at flowable state in reservoir and nozzle by heating elements.

104512. The Goodyear Tire & Rubber Company. Improvements in method and apparatus for one stage building of radial ply tires. Accepted on 9th January 1967.

Comprising the steps of assembling into cylindrical shape the carcass and the belt with its cord angle greater than usual, applying uncured tread over the assembly and then shaping into torroidal shape.

104703. International Nickel Limited. Welding steel. Accepted on 9th January 1967.

Welding filler containing from 16% to 19% nickel, 1% to 3% cobbalt, 2·4 to 3·5% molybdenum, 0·4 to 0·65% titanium 0 to 0·1% aluminium, 0 to 2% chromium, balance being iron except impurities.

104707. Gebruder Buhler. A flat-link conveyor chain. Accepted on 5th January 1967.

Comprising chain links, forked and straight heads, pivot pins, rounded driving projections inter connected heads.

107733. Imperial Chemical Industries Limited. Process for the manufacture of new dyestuffs suitable for the dyeing of cellulose textile materials. [Divisional date 2nd April 1965.] Accepted on 2nd January 1967.

By coupling a diazotised amine with a coupling component.

104851. Bernhard Ahl. Climbing apparatus for raising sliding moulds for the production of concrete structures. Accepted on 6th January 1967.

Climbing apparatus including grab-heads lying above and below one another, eccentrically set grabs in said-grab-heads for clamping the climbing pole, the upper and lower grab heads are connected to two independently pressure fluid actuators.

104993. Prolizens A. G. Improvements relating to forging machines. Accepted on 9th January 1967.

The forging jaws being attached to hydraulic pistons and extra hydraulic pressure being repeatedly developed in a pressure chamber at the end of each piston remote from the jaws to force the jaws together by a plunger driven by an eccentric.

107620. Imperial Chemical Industries Limited. Process for the manufacture of new dyestuffs suitable for the dyeing of cellulose textile materials. [Divisional date 2nd April 1965.] Accepted on 2nd January 1967.

By coupling a diazotised amine with a coupling component.

108047. Imperial Chemical Industries Limited. Manufacture of new dyestuffs suitable for the dyeing of cellulose textile materials. [Divisional date 2nd April 1965]. Accepted on 2nd January 1967.

By coupling a diazotised amine with a coupling component.

Opposition Proceedings

An opposition has been entered by Johnson & Johnson to the grant of a patent on application No. 93645 made by American Cyanamid Company.

Amendment Proceeding

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Institute Kibernetiki AN. Ukr. SSR., a National Institute of the USSR of Kiew, Lysogorsaja, 4, USSR, seek leave to amend the description in the specification in respect of patent application No. 98051, Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies hereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

The amendment proposed by Vickers-Armstrongs (Engineers) Limited in respect of patent application No. 85139 as advertised in the Gazette of India, Part III, Section 2 dated the 11th June 1966 has been allowed.

(3)

The amendment proposed by Phillips Petroleum Company, in respect of patent No. 92446 as advertised in the Gazette of India, Part III, Section 2, dated the 1st October, 1966 has been allowed.

(4)

The amendment proposed by Dunlop Rubber Company Limited in respect of patent application No. 95854 as advertised in the Gazette of India, Part III, Section 2, dated the 1st Octobr 1966 has been allowed.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 128525. Bhim Sen Dhamija, 47, Gandhi Road, Dehradun, Uttar Pradesh, India, Indian National. 'Thermometer case'. May 20, 1966.

Class 1. No. 128554. Kishor Raval of 18 Ganganivas, Azad Street, Andheri (West), Bombay-58, State of Maharashtra, India, Indian National. 'A perfume sprayer'. May 26, 1966.

Class 1. No. 128574. Mrs. Parvathy Raman, an Indian citizen, of Block No. 3, 'Rekha' Plot No. 17, Peston Sagar Scheme, Chembur, Bombay-71, Maharashtra, India. 'A valve for pressure packed container'. May 30, 1966.

Class 1. No. 128698. Qualitex Machinery (P) Ltd., (An Indian concern) at 6/13, Kirti Nagar, Industrial Area, New Delhi. 'Paddy dehusker'. June 18, 1966.

Class 1. No. 128728. Sohan Singh Samvi of Ram kishore Enterprises, 427-A, Defence Colony, New Delhi. 3 (An Indian National). 'Coffee machine'. June 24, 1966.

Class 1. No. 128745. New Ashoka Industries, Village P. O. Alipur, Delhi (An Indian Partnership firm). 'Hydraulic'. June 27, 1966.

Class 1. No. 128747. Santhya Thiyagarajan, 285, Railway Road, Aduthurai, Tanjur District, Madras State, An Indian subject. 'Rolling stone'. June 27, 1966.

Class 1. No. 128955. Morphy-Richards Limited, a British Company, of St. Mary Cray, Kent, England. 'An electric toaster'. January 25. 1966 (U.K.).

Class 1. Nos. 128998 and 128999. Auto Importing Co., (An Indian partnership concern) at Kashmeregate, Delhi. 'Lever grip', July 20 1966.

Class 1. No. 129823. Arun Chhotabhai Patel, An Indian Citizen, of A 5/5 & 5/6 Industrial Estate, Baroda-3, Gujarath, India, 'Constructional element'. November 29, 1966.

Class 3. No. 128555. Kishor Raval of 18 Ganganivas, Azad Street, Andheri (West), Bombay-58, State of Maharashtra, India, Indian National. 'An electric lamp'. May 26, 1966 .

Class 3. No. 128699. Qualitex Machinery (P) Ltd., (An Indian concern) at 6/13 Kirti Nagar, Industrial Area, New Delhi, 'Rice polisher', June 18, 1966.

Class 3. Nos. 128748 and 128749, The Bombay Pencils private Ltd., Indian Company, Kamer Building, 38, Cowasji Patel Street, Fort, Bombay-1, Maharashtra 'Pencils', June 28, 1966.

Class 3. No. 128815, Golden Plastics, an Indian Partnership Firm, of 67/69, Bazar Gate Street, Fort, Bombay-1, Maharashtra, 'Tubs' June 30, 1966 .

Class 3. Nos. 128956 and 128957. Amar Brushes, 7/58, Tilak Nagar, Kanpur (Uttar Pradesh), (An Indian Partnership firm). 'Paint brush' July 13, 1966.

Class 3. No. 128984. Bloomfeld Trading Co G.T. Road, Ghaziabad, (Uttar Pradesh), An Indian Partnership concern. 'An egg container'. July 16, 1966.

Class 3. No. 129199. Societa Italiana Tele communicazioni Siemens S.p.A. a joint stock company organized under the laws of Italy, of 12, Piazzale Zavattari, Milan, Italy. 'A casing for telephone bell'. August 16, 1966.

Class 3. No. 129258. C. J. Industries, of Show Room No. 6, Hampton Court, Wadehouse Road, Bombay-5, Maharashtra State, India, an Indian partnership firm. 'A name board block'. August 25, 1966.

Class 4. No. 128697. Dyer Meakin Breweries Limited, an Indian Company, of Solan Brewery, P. O. Simla Hills, Himachal Pradesh. 'Bottle'. June 18, 1966.

Class 4. No. 128991. Mulchandani Electrical and Radio Industries Limited. A company incorporated under the Companies Act, 1956 at Sukh Sagar, Sandhurst Bridge, Hughes Road, Bombay-7 in the State of Maharashtra, India. 'Radio and/or transistorised radio dials'. July 19, 1966.

Class 5. Nos. 128977 and 128978. (1) Nooruddin Abdulhusain, (2) Fakhruddin Nooruddin, (3) Abdulhusain Nooruddin (4) Juzarbhai Nooruddin, (5) Zoherbhai Nooruddin of Central Salsette Road, Kalina, Bombay 29, Maharashtra State, Indian subjects. 'Playing cards'. July 14, 1966.

Class 10. No. 128937. Carona Sahu Co. Private Ltd, an Indian Limited Company, registered under the Indian Companies' Act and at 221, Dadabhoy Naoroji Road, Fort, Bombay-1, Maharashtra, India.' 'Footwear'. July 11, 1966.

Class 10. No. 128954. Roy Plastic Industries, an Indian partnership firm of 112, Rabindra Sarani, Calcutta-6, West Bengal, India. 'slippers (Chappals)'. July 13, 1966.

Class 13. No. 128214. The Victoria Mills Limited, an Indian Company, at De Lisle Road, Parel, Bombay-13, 'Textile piecegoods'. April 25, 1966.

Class 13. Nos. 128628 to 128630. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Bombay-1. 'Cotton textiles'. June 7, 1966.

Class 13. Nos. 128632 and 128633. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian nationality. 'Textile goods.' June 7 1966.

Class 13. No. 128650. Premier Chemical Industries, Opp. Usha Talkies, Patelwadi, New Nagardas Cross Road, Andheri, Bombay-69. Maharashtra State, Indian sole proprietary concern, 'Textile goods'. June 13, 1966.

Class 13. Nos. 128739 and 128740. The Standard Mills Company Limited. Mafatlal House, Backbay Reclamation, Bombay-1, Indian. 'Textile goods'. June 27, 1966.

Class 13. Nos. 128750 to 128774. The Delhi Cloth & General Mills Co. Ltd., Indian Company, Post Box No. 1039 Bara Hindu Rao, Delhi1-6. Delhi, 'Textiles picegoods.' June 28, 1966.

Class 13. Nos. 128971 to 128976. The Svadeshi Mills Co. Ltd., an Indian Company of Bombay, Bombay House, Bruce Street, Fort, Bombay, (Maharashtra) 'Textile goods.' July 14, 1966.

Class 13. Nos. 128981 to 128983. The Standard Mills Company Limited, Mafatlal House, Backway Reclamation, Bombay-1, Indian. 'Textile goods'. July 14, 1966.

Class 13. Nos. 128985 to 128989. Hindustan Embroidery Mills Private Ltd., Chheharta (Near Amritsar), Nationality Indian Firm. 'Textile goods'. July 18, 1966.

Class 13. Nos. 128994 and 128995. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality. 'Textile goods'. July 20, 1966.

Class 13. Nos. 129075 to 129087. The Khatau Makanji Spg. & Mfg. Co. Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company. 'Textile piecegoods'. August 5, 1966.

Class 13. No. 129701. The Victoria Mills Limited. An Indian Company, of Delisle Road, Parel, Bombay-13. 'Textile piecegoods' November 3, 1966.

Class 14. No. 128951. The Victoria Mills Limited, an Indian Company, of Delisle Road, Parel, Bombay-13, 'Textile piecegoods'. July 13, 1966.

Class 14. No. 129697. The Victoria Mills Limited, an Indian Company, of De Lisle Road, Parel, Bombay-13. 'Textile piecegoods'. November 3, 1966.

Class 14. Nos. 129231 and 129233. The Crown Spg. & Mfg. Co. Ltd., Gokhale Road, (South) Parel, Bombay-13, (Maharashtra), Nationality: Indian Company. 'Textile goods. August 22, 1966.

Copyright Extended for a Second Period of Five Years

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 4th February 1967

SPECIAL NOTICE

Patent Office Handbook, 13th Edition, has been published and is available on sale with the Manager of Publications, Civil Lines, Delhi at a cost of Rs. 11/50 per copy.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

16th January 1967

108849. Amulya Mohan Dhar. Potter's wheel for heavy works.

108850. Amulya Mohan Dhar. Potter's wheel with mechanised handle (apruba chakra).

108851. Schloemann Aktiengesellschaft. Improvements in the production of shaped pieces, strips or sections from metal particles.

108852. S. M. Takle and R. Andrews. Improvements in or relating to a thresher cum winnower.

108853. Council of Scientific and Industrial Research. A process for the isolation of constituents of paspalum scorbiculatum which possess tranquilizing properties.

108854. Hindustan Lever Limited. Pressure conversion of green tea.

108855. Hindustan Lever Limited. Process for preparing tea extracts.

108856. Hindustan Lever Limited. Tea extraction process.

108857. Associated Electrical Industries Limited. Wire wiping device. (25th January 1966).

108858. Akhil Kumar Bhowani. Automatic mouth printer.

108859. T. S. Mohanraj. The purpose of advertising by paintings alone on are of 64 Sq. feet which can be attached according to the needs.

108860. R. L. Perumal. Signallar arrangement working process for railway bridges to avoid accidents due to unexpected flood.

108861. H. J. Sathe. An improved huller cum polisher for a common millet 'panicum miliaceum.

108862. Huck Manufacturing Company. structural unit. (11th November 1966).

108863. FMC Corporation. Fluid transferring apparatus.

108864. Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S.p.A. Improvements in the production of caprolactam by nitrosation.

108865. Rexall Drug and Chemical Company. Process and product.

108866. The English Electric Company Limited. Improvements in polyphase protective relays. (26th January 1966).

108867. Union Carbide Corporation. Tube wire electrode.

108868. Starch Conversions Limited. Enzymatic decomposition of cereal grain. (4th February 1966).

108869. Farbenfabriken Bayer Aktiengesellschaft. Process for the dyeing of textile materials.

108870. Thomas Walker Limited. Improvements relating to hook fastening devices for garment material.

108871. Tecalemit (Engineering) Limited. Trailer lubrication system. (17th January, 1966).

108872. Elektrokemisk A/S. Method of producing aluminium fluoride.

108873. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Use of polyene compounds as coloring agents.

108874. Amsted Industries Incorporated. Power-transmission chain.

108875. United Aircraft Corporation. Improvements in and relating to fuel cell system.

108876. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Thio-semicarbazones and process for their manufacture.

108877. Veb Filmfabrik Wolfen, Process for the manufacture of cyclic ester anhydrides of α-hydroxy-carboxylic acids. (10th October, 1966).

108878. Ciba Limited. New dioxazine dyestuffs and processes for their manufacture.

108879. Maschinenfabrik Rieter A.G. A process for the reduction of fibre bales. (3rd May, 1966).

108880. Maschinenfabrik Rieter A.G. Method relating to detection of combustion particles in a pneumatic conveyor. (21st September, 1966).

108881. Maschinenfabrik Rieter A.G. Apparatus for separating flock. (19; September, 1966).

108882. W. Staudenmaier. Improvements in or relating to carding machines.

108883. Gamniram Hindumal. Sieves (a vessel with meshed or wire netting bottom for sifting-generally finer than a riddle).

108884. K. P. Doshi. An improved domestic water heater cum cooker.

108885. T. C. Munirathnam. Improvements in or relating to steam turbines.

108886. K. R. Chokhani. Improvement in paper composite container.

108887. Dr. S. Venkataraman. A machine for drawing designs.

17th January 1967

108888. Mrs. Krishna Ray. Use as an improved brassiere.

108889. K. K. Mitra. Power factor meters and synchroscopes.

108890. Stirling Sintering Company. Process and apparatus for the reclamation of material.

108891. United States Pipe and Foundry Company. Improvements in or relating to method for making tubular metal castings.

108892. Chemical Construction Corporation. Methanol synthesis process.

108893. Ortho Pharmaceutical Corporation. Substituted 4 phenyl cyclohexenecarboxylic acids. (Addition to No. 104110).

108894. The Dow Chemical Company. Flocked fabrics and method of making.

108895. Tsentralny nauchno-Issledovatelsky Institut khlopkovoi promyshlennosti. Roller gin.

108896. Tsentralnoe Konstruktorskoe bjuro krupnykh electricheskikh mashin peremennogo toka. Device for cooling rotar winding of electric machine.

108897. The Dunlop Company Limited. Improvements in or relating to vehicle anti-skid braking systems. (21st January 1966).

108898. Caterpillar Tractor Co., Resilient suspension for track type tractors.

108899. Farbenfabriken Bayer Aktiengesellschaft. Antistatic thermoplastic copolymers.

108900. A. T. Orr. Method and product for curing and packaging fish. (4th February 1966).

108901. Oerlikon Buhrle Holding A.G. Quick service device on automatic compressed-air brake.

108902. Ciba Limited. Water-insoluble azo dyestuffs and processes for their manufacture and use.

108903. The Permutit Company Limited. Strainers for use in ionexchange apparatus. (3rd February 1966).

108904. Ganz Villamossagi Muvek. Device for supporting and direct cooling of turboalternator rotor end windings.

108905. Egyesult Izzolampa Es Villamossagi Reszvenytarsasag. Device for automatic sorting according to start period of starters of discharge lamps enclosed in a casing.

108906. Pilkington B others Limited. Improvements relating to the protection of instruments intended for use at high temperatures. (18th January, 1966).

108907. International Harvester Company. Improvements relating to topping mechanisms for cane harvesters. (19th January 1966).

108908. The British Petroleum Company Limited. Improvements in or relating to the cultivation of micro-organisms. (3rd February).

108909. The British Petroleum Company Limited. Solvent extraction process. (9th February 1966).

108910. Ciba Limited. Manufacture of new peptides having an acth-activity. (Addition to No. 95474).

108911. F. L. Smidth & Co. A/S. Electrostatic counter-current preheater. (19th January 1966).

108912. Dr. W. Schmitt. A metallurgical reverberatory furnace.

108913. Ciba Limited. Process for the manufacture of water-insoluble anthraquinone dyestuffs. (Addition to No. 101572).

108914. Lodzkie Zaklady Kinotechniczne Przedsiebiorstwo Panstwowe. Xerograph charging arrangement.

108915. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Isoprenoid compounds and process for the manufacture thereof.

108916. Montecatini Edison S.p.A. Process for the synthesis of urea from ammonia and carbon dioxide.

108917. Chinoin Gyogyszer Es Vegyeszeti Termekek Gyara Rt. Process for the preparation of nutriments.

18th January 1967

108918. The B. F. Goodrich Company. Cure system for ethylene-vinyl. chloride polymers. (1st August 1966).

108919. J. R. Geigy A. G. Tooth paste.

108920. Union Carbide Corporation. Gas flow control apparatus.

108921. Centre De Recherches De Pont—A—Mousson. Carriage for a centrifugal casting machine and machine including said carriage.

108922. Jervis B. Webb Company. Conveyor switch.

108923. C.A.V. Limited. Electric circuits. (20th January 1966). (Addition to No. 107211).

108924. FMC Corporation. Phosphoric acid purification.

108925. Sumitomo Chemical Company Ltd., Modification of organic isocyanates.

108926. Siemens Aktiengesellschaft. High-voltage cable.

108927. Ordena Trudovogo Krasnogo Znameni Srednеaziatsky Nauchno-Issledovatelsky Institut Irrigatsii im. V. D. Zhuriná Ministers-tva mellioratsii i Vodnogo Khozyaistva. A method of treating mineralised water.

108928. Mrs. P. C. Sawhney. A device for the unloading of materials, such as sugarcane.

108929. Mrs. P. C. Sawhney. A device for the unloading of materials, such as sugarcane.

19th January 1967

108930. K. G. Chudasama. Agriculture implements hathvavanio (dholera karfen) for agricultural purposes, worked by three men power or own bullocke.

108931. Director, Indian Institute of Technology Bombay and B. G. Desai. Single phase induction motor with asymmetrical end ring rotor.

108932. Director, Indian Institute of Technology, Bombay and B. G. Desai. Rotor positioning device for single phase induction motors.

108933. N. C. McCallum. Improved sealing unit for bearing assemblies.

108934. Schering Aktiengesellschaft. Pesticidal preparations.

108935. Parke, Davis & Company. New heterocyclic compounds and methods for their production.

108936. Imperial Chemical Industries Limited. Purification of esters. (24th January 1966).

108937. The British Iron and Steel Research Association. Improvements in or relating to alloy steels. (27th January 1966). [Addition to No. 98895].

108938. Farbenfabriken Bayer Aktiengesellschaft. A process for the homo-and copolymerisation of 1, 3-diolefins.

108939. Aktiebolaget Bofors. Method of producing methylalkanoyloxy ketals of prednisolone-derivatives with 3 to 5 carbon atoms in the alkanoyl group.

108940. E. I. Du Pont De Nemours and Company. Copolymers of bicyclo (1.1.0) butanes.

108941. Ciba Limited. Manufacture of new acylamino-compounds.

108942. K. A. Oesterheld. Chimney cooler for the cooling of liquids by means of atmospheric air.

20th January 1967

108943. A. Kumar Transistorized automatic line voltage booster.

108944. Swapan Kumar Basu. An infinitely variable combination lock.

108945. The B. F. Goodrich Company. 1, 2-dichloroethane process improvement. (12th April 1966).

108946. S. S. Singh, R. Singh and A. Singh. Leaver of cycle lock.

108947. S. G. Kombrabail. A roof mounted collapsible cover for an automobile.

108948. S. G. Kombrabail. Power consumption regulator for an electrical plate type water heater.

108949. Meche Consultation and Collaboration Private Limited. Improvements in or relating to screw drivers and the like.

108950. The Starit Engineering Company Private Limited. Improvements in or relating to a process for the manufacture of ion exchange resin or the like.

108951. Snam Progetti S.p.A. Process for continuous drying of solid materials and apparatus for carrying out said process.

108952. C. A. V. Limited. Means for retaining a plate like part upon a shaft or the like. (24th February 1966).

108953. Metalastik Limited. Improvements relating to vehicle suspension systems.

108954. The Dunlop Company Limited. Improvements in or relating to automatic adjusters for brakes. (29th January 1966).

108955. Ahmedabad Textile Industry's Research Association. Process for preparing modified starches and dextrins.

108956. Ahmedabad Textile Industry's Research Association. Process of finishing cotton goods with optical brightening agents.

108957. N. V. Koninklijke Pharmaceutische Fabrieken v/h Brocades—Stheeman & Pharmacia. Process for the preparation of new azadibenzocycloheptine derivatives. (27th January 1966).

108958. E. I. du Pont de Nemours and Company. Agents for increasing the sugar content of plants, compositions containing same and method of preparing said agents.

108959. Amsted Industries Incorporated. Shell molding.

108960. R. R. Robinson. Device for intrauterine use.

108961. M. K. Mehta. A washing apparatus. (12th May 1966).

108962. Nippon Kakoh Seishi K. K. Method for surface-treatment of high molecular substance film and paper-like article produced thereby.

108963. Knoll A. G., Chemische Fabriken' 2-Cyanoalkyl urethanes.

Alteration of dates

108041. Ante-dated to 8th June 1965 under Section 5 of the Act.

108041. The claim to priority date 17th June 1964 has been abandoned and the application dated as of 8th June 1965, the date of filing in India.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

96988. Aktiebolaget Bofors. Device for feeding cartridges of ammunition in a cartridge magazine of an automatic gun. Accepted on 17th January 1967.

Comprising in combination, a set of cartridge driving means the number of which corresponds to the number of cartridger shafts.

98830. Aerpat A. G. Improvements in or relating to fastening devices. (10th April 1964). Accepted on 5th January 1967.

Device including means for temporarily clamping together apertured members in superposed relationship.

98874. The Lummus Company. Pyrolysis of hydrocarbons. Accepted on 7th January 1967.

Introducing the hydrocarbon feed and dilution steam into a pyrolysis zone withdrawing an effluent including the hydrocarbons, separating water, stripping the impurities and vapourizing the water for use as dilution steam.

98904. Standard Telephones and Cables Limited. Communication system. Accepted on 9th January 1967.

Comprising a source of signals, first means coupled to said source, second means coupled to said first means, third means coupled to said second means and fourth means coupled to said third means.

98907. National Distillers and Chemical Corporation. High impact polystyrenes. Accepted on 9th January 1967.

Polymerising in the presence of analfin catalyst a composition consisting essentially of 50 to 100% (a) conjugated hydrocarbon diene and 0 to 50% of monovinyl aromatic hydrocarbons of the benzeneseries.

98944. Ahmedabad Textile Industry's Research Association. An improvement relating to machine for doffing of the web from the doffer in carding machines. Accepted on 12th January 1967.

Comprises a first roller covered with metallic fillets, second and third rollers of smooth surface positioned one above the other and in juxtaposition to the first roller, all three rollers being driven to enable the web to traverse round first roller until it is withdrawn between the space between second and thrird rollers.

98948. Ethicon, Inc. Surgical package. Accepted on 12th January 1967.

An interiorly sterilized package comprising a tube presenting a cylindrical neck defining an open mouth at one end of the package, sterile content inside the tube and a resilient cap closing the mouth of the tube.

98949. Clevite Corporation. Boring machine for semi-cylindrical bearings. [Addition to No. 90354]. Accepted on 6th January '67.

Finish boring in single operation a semi cylindrical bearing and two parting line, said bearing comprising holder a boring bar and two cutters, one of cutters extending from boring bar than the other, means rotating it and means mounting said bar with axis of rotation whereby both cutters remove material.

98958. Oerlikon-Buhrle Holding A. G. Improvements in or relating to method for resuming weaving of a fabric on a wave weaving loom after interruption of the weaving operation and improved apparatus for a wave weaving loom for the performance of the aforesaid method. Accepted on 11th January 1967.

Includes means bringing about a relative displacement between beat-up line and warp threads for bringing said beat-up line and last weft thread before the defect, into coincidence.

98961. Amphenol Corporation formerly known as Amphenol-Borg Electronics Corporation. A connector assembly for coaxial radio frequency transmission lines. Accepted on 12th January 1967.

Dielectric spacer and an internal contact are constructed to be slipped easily together in an operation which in itself is non critical, but which brings about precise and firm relative orientations between the parts with little tendency towards misalignment.

98969. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of forming juxtaposed metal layers separated by a narrow gap on a substrate and objects manufactured by the use of such methods. Accepted on 12th January 1967.

The two metal layers are first formed on the substrate and then covered with an etch resistant masking material, after which second metal layer is applied.

98985. James R. Crompton and Brothers Limited. Improvements in or relating to heat-sealable paper and process of manufacturing same. (15th April 1964). Accepted on 16th January 1967.

Comprising forming of a liquid dispersion of a mixture of non-toxic and non-testing thermoplastic fibres so that partial classification occurs between them within the suspending medium and then laying down a web.

99001. Oerlikon-Buhrle Holding A.G., Control device for apparatus such as looms with reciprocatory heddles typewriters, calculating machines or recording machines. Accepted on 16th January 1967.

One pole of the polarised magnet is connected to the lea spring and the other to a core around which the releasing winding is wound, and the leaf spring is under initial stress in its locking position and is movable by the reciprocatory member to its closed position against the core.

99013. Pavena A. G. Improvements relating to a draftable staple fibre band or sliver and a process for the manufactures thereof. (12th August 1964). Accepted on 16th January 1967.

A fixing agent surrounds the individual parallel fibres and binds the fibres so that breaking length of the sliver exceeds that of twisted roving.

99014. Dr. Carl Hahn Kg. Apparatus for shaping one end of a cylindrically shaped tampon. (17th April 1964). Accepted on 9th January 1967.

Apparatus in which a heated shaping tool having a smooth work surface at its end face is rotatable about an axis and adapted for reciprocating movement along this axis coaxially with respect to the tampon, and wherein a plurality of tampons are held in a moving feed device.

99020. Universal Moulded Fiber Glass Corp. Production of fibre reinforced resin articles in tubular form. Such as pipes and tubes. Accepted on 16th January 1967.

Helically winding reinforcement strip of random felted glass fibres on core, extending same into forming passage alongwith liquid impregnating resin material helicalls winding at least the glass fibre reinforcement roving thereon intermediated of strip edges a heating and pulling out—solidified articles from forming passage.

99021. Bialskie Zaklady Urzadzen Technicznych. Hanging of boom of hoisting installations especially of self-erecting tower cranes. Accepted on 16th January 1967.

Characterised in that the boom axis of rotation in the form of tower head bolt is inside the tower outline and the boom foot is provided with guides for its shifting in relation to tower head bolt.

99025. Ole-Bendt Rasmussen. Method and apparatus for pleating a continuous film material. (16th April 1964). Accepted on 6th January 1967.

Films being carried forward over a pair of relatively closely spaced rollers or bars, one of which being subjected to an axial reciprocating movement in relation to the other the film being frictionally engaged with the said rollers or bars.

99033. Council of Scientific and Industrial Research. Improvements in or relating to anode mounting for high performance cells. Accepted on 12th January 1967.

Amalgamated zinc powder of high purity as anode mounted on a substrate of conducting flexible metallic matrix serving as current collector.

99120. Babcock & Wilcox Limited. Improvements in furnace or the like chambers. (24th April 1964). Accepted on 16th January 1967.

Adjacent walls are tied together at least at one location through respective buckstays and hydraulic means connecting the buckstays resist rapid outward movements but permit gradual outward or inward movements of the buckstays.

99130. A. R. Sankaralingam. Improvements in starters for electric induction motors. Accepted on 19th January 1967.

Switching means that connects the line supply is kept in "on" position though the start push button is released either by a separate slow release relay circuit or by a self exciter circuit, in which the stop switch and trip switch arrangements are included.

99139. The English Electric Company Limited. Electrical protective relays. (28th April 1964). Accepted on 19th January 1967.

Comprising first and second comparators and a control device for producing a signal for effecting control wherein any portions of output signals of said comparators are coincident in time with one another at least one comparator being azymmetrical phase comparator.

99256. Biren De. Power transmission unit with stepless variable input-output speed ratio. Accepted on 17th January 1967.

Comprising an input or driving shaft, output shaft, friction discs, freely rotatable roller, load screw, a nut on load screw, a helical spring cap like washer, rigid link.

99302. Dunlop Rubber Company Limited. Improvements in or relating to textile machines particularly for processing fabrics, yarns or cords. Accepted on 17th January 1967.

Comprises at least two rollers for gripping the material inbetween, one of the rollers comprising an inflatable member and a gripping surface formed on said member by its external periphery.

99314. Velsicol Chemical Corporation. Process for preparing 2-methoxy-3, 6-dichlorobenzoic acid and herbicidal composition containing the same. Accepted on 12th January 1967.

Comprising reacting 3, 6-dichlorosalicylic acid with methylchloride.

99548. Western Electric Company. Incorporated. Semiconductor devices and method of making them. (14th October 1964). Accepted on 11th January 1957.

Comprising semiconductor body having a PN junction, a layor of dielectric oxide overlying the junction but having an opening therein, a layer of active metal in contact with exposed surface at the opening and a second metal layer overlying the active metal layer.

99551. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Condensed aluminium phosphates, process for their preparation and water glass cements containing the same. Accepted on 16th January 1967.

Comprises subjecting acid aluminium phosphates containing P_2O5 and Al_2O_3 in ratio 1·1 to 3 to a thermal treatment in the first stage of which the material is heated to 400°C until its weight remains constant and in second stage at which it is heated to 750°C until its weight remains constant.

99776. Imperial Chemical Industries Limited. Improvements in or relating to coating compositions. (4th June 1964). Accepted on 18th January 1967.

Comprises a thermoplastic resin dissolved in a solvent comprising a chlorinated hydrocarbon and/or a chlorofluorinated hydrocarbon, which boils at a temperature not exceeding 50°C.

100139. Henry Wallwork and Co. Ltd., and C. M. G. Wallwork. Foundry cores and moulds. (19th June 1964). Accepted on 18th December 1966.

Method of placing core in casting cavity of a foundry mould comprising forming core in a jig, transfering jig to the cavity, forcing core out of jig by power means into the mould and withdrawing the jig.

100280. United Merchants and Manufacturers, Inc., Process of finishing cellulosic fabrics with aldehyde-containing solutions and said solutions. Accepted on 26th December 1966.

Textiles are treated with an aqueous solutions containing an aldehyde and a synergistic catalyst mixture.

100281. United Merchants and Manufacturers, Inc. Process of imparting wash and wear properties to cellulosic textiles and finishing solutions for use in such process. Accepted on 26th December 1966.

Textiles are treated with acetals.

100289. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Water soluble mono and disazo dyestuffs and their metal complex compounds and process for preparing them and fibrous material dyed or printed by process using said dyestuffs. Accepted on 18th January 1967.

Process for the manufacture of mono and disazo dyestuffs comprises coupling aromatic diazo, tetrazo or azodiazo compounds with coupling compounds.

100391. T. Satake. A method for preventing adhesion of floury material to the surface of the other object. Accepted on 3rd January 1967.

Heating the surfaces of the parts of the apparatus in contact with floury material to a temperature higher than the dew point of the water contents of the said material.

100418. Veb Elektrochemisches Kombinat Bitterfeld. Building units for transfer channels of plate type heat exchangers. Accepted on 6th January 1967.

Plates are provided with or several holes and, on the one hand, form together channels through which the heat-exchange medium is distributed to the channels of the heat-exchanger block and on the other hand serve as bearing surfaces for blocking walls.

100447. Luwa AG. Air-conditioning plant for industrial spaces. Accepted on 6th January 1967.

Characterised in that, the water atomizer is in upstream of the air-wesher both being conected to the same water system and in that the water supply to the washer is controlled by a hygrostat and thermostat.

100469. EMC. Corporation. Curing of green briquettes. Accepted on 7th January 1967.

By a process characterised by the continuous steps of passing a bed of green briquettes downwardly through a reaction zone; supplying green briquettes to the upper portion of the bed; introducing a steam of air having heat transfer solid particles dispersed and flowing the stream of air and heat transfer particles upwardly through the reaction zone, continuously withdrawing heat transfer solids from an upper portion of the reaction zone, cooling the solids them withdrawn on continuously returning to the rection zone and removing cured briquettes from the exit end of the reaction zone.

100477. Metalastic Limited. Improvements in or relating to bushes. (9th July 1964). Accepted on 9th January 1967.

Characterised in that the rubber sleeve has a flange at one end and an outwardly facing radial projection on the other end.

100480. Muanyagipari Kutato Intezet. Process and equipment for the continuous production of flat or longitudinally profiled plates and figures from reinforced plastics. Accepted on 9th January 1967.

By continuously drawing a reinforcing material, impregnated with the synthetic resin and coated with separating films, between two parallel flat or longitudinally profiled shoping units.

100500. Ministerul Industriei Petrolului Si Chimiei. Installation for coke extraction by hydromechanical dislocation. Accepted on 9h January 1967.

Comprising a hydromechanical drilling device with turbines and cutting blades.

100513. The Flour Corporation Ltd. Cooling tower and a method of manufacturing same. Accepted on 12th January 1967.

Combination of a group of slots and a frame forming openings through which slots project, the frame having limits retaining slots in limited swinging movement relative thereto and between collapsed condition in which the slots are bundled together, and extended condition in which slots are mutually spaced apart.

100519. Moskovskoe Otdelenie Tsentrainogo Nauchno-Issledovatelskogo & proektno-Konstruktorskogo Kotlo-turbinnogo Instituta Im. Polzunova. A device for automatic control of the process for restoring the working capacity of a group of periodication filters in water purification systems or in systems for the treatment of solutions. Accepted on 12th January 1967.

Characterised in that to the programming instrument a common carrector is connected setting duration of each recovery operation of filter.

100522. Karl Peschke Kapitalverwaltungsgesellschaft Karl Peschke m.b.H. Axle arrangement for cross country vehicle. Accepted on 12th January 1967.

Characterised in that the pendulum system comprises a first pendulum and a second pendulum each one having a vigid arm extending at right angle therefrom and hydraulic means.

100524. Shell Internationale Research Maatschappij N. V. Preparation of polymer solutions from polymer latices. Accepted on 12th January 1967.

The polymer latices after freezing are brought into contact with an organic solvent after which the organic phase comprising said homo-and/or copolymers insolution is recovered.

100527. Dunlop Rubber Company Limited. Improvements in endless belting. Accepted on 11th January 1967.

Comprises reinforcement plies enbedded in a flexible material and being enclosed between the ends of a two ply fabrics.

100531. Allied Chemical Corporation. Process for producing porous, hollow the acyanurate pellets, and cyanuric acid therefiom. Accepted on 12th January 1967.

Bringing solid pellets of urea into contact with finely divided cyanuric acid at a temperature not above 160° C and subsequently heating pellets of urea cyanurates to 190° to 300° C.

100534. Universal Oil Products Company. Process for electrolytic oxidation of acidic compounds. Accepted on 12th January 1967.

Comprises passing direct current through the electrolyte in the presence of a phthalocyamine compound.

100554. R. B. Miller. Production of wax. Accepted on 16th January 1967.

Comprising brushing the sugarcane stalks to remove wax containing material, contacting the material with an organic liquid solvent wherein wax dissolved recovering the wax from the solution.

100576. Standard Telephones and Cables Limited. Improvements in or relating to transistor manufacture. (14th July 1964). Accepted on 13th January 1967.

Includes the steps of deffusing zinc into a body of N type gallium arsenic and deffusing silicon under arsenic pressure.

100578. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for preparing fiber-and film-forming polyesters. Accepted on 16th January 1967.

By poly condensing bis-hydroxyalkyl-dicarboxylic acid esters in presence of catalyst like sodium or calcium salts of benzylsilane-triol p-sulforic acid.

100582. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for preparing modified polyethylene terephthalate fibers. Accepted on 12th January 1967.

Comprises spinning of a mixture of polyethylene terephthalate and benzylsilane-triol-p-sulfonate.

100589. Leesona Corporation. Method and apparatus for processing glass yarn. Accepted on 16th January 1967.

Comprises, continuously drawing the glass yarn from a source of supply twisting the yarn drawn from supply, passing the yarn at a selected linear speed through a heat zone to heat the yarn to a temperature to yarn-set the same in the twisted formation, providing uniform tension on the yarn applying a lubricant to the yarn, cooling the yarn under uniform tension, untwisting the yarn and collecting the processed yarn.

100597. Shell Internationale Research Maatschappij N.V. An emulsion suitable for use as a hydraulic fluid. Accepted on 16th January 1967.

Comprises water-in-oil emulsion and 20-45% and 80-55% by weight of (A) hetercyclic compoud like alkenyl succinic anhydride or imide and (B) polyoxyalkylated part ester of polyol and monocarboxylic acid.

100600. Luwa AG. Stripping device for fibre-carrying rollers of textile machines. Accepted on 16th January 1967.

Comprising a hose-type stripper which is being bent inwards by the slot provided in the sleeves, two loop portions are formed of which one is located outside the sleeve and the other is located inside the sleeve and encloses a rod.

100609. W. G. Chalmers. Tandem axle suspension. (22nd July 1964). Accepted on 16th January, 1967.

The ends of equalizing or walking, beams being supported on the rear axles, and the walking beams are free to rock on the suspension spring means, all longitudinal and traverse axle loads being resisted by torque loads.

100611. Henry Allday & Son (1922) Limited. Electric switches. Accepted on 11th January 1967.

Comprising a contact piece and a pivot piece and a contact beam pivotaly mounted on the pivot piece to make contact between the contact and pivot piece.

100615. Halcon International, Inc. Preparation of ammonidation catalyst suitable for the production of aromatic nitriles. Accepted on 16th January 1967.

Dissolving a vanadium and antimony compound to form a solution, contacting the said solution with a catalyst support and drying said solution to form a supported catalyst.

100623. Flight Refuelling Limited. Improvements in or relating to a fluid tight seal between two members. Accepted on 16th January 1967.

Wherein one of the members is a tubular members and the other is a disc or plug provided with a longitudinal extending lip having surface which engages a surface on the said tubular member.

100629. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to devices comprising an inverter and an input filter for the said inverter. Accepted on 16th January 1967.

Comprising an inverter with at least one controlled rectifier, and input filter, series inductance and cross-capacitor having oscillatory series tuned circuit.

100630. Canada Iron Foundries Limited. Means for continually and simultaneously surveying and aligning railroad track. (21st July 1964). Accepted on 16th January 1967.

Comprising reference line establishing system including high frequency beam transmitting means, at least one receiver element and at least one shadow element therebetween all mounted for movement along track a detection system comprising high frequency beam receiving member and shadow member both movable along track, and track alignment jack means operable in response to signals from receiving member.

100663. Esso Research and Engineering Company. A method of preventing corrosion. Accepted on 16th January 1967.

Consists of admixing a base and ammonium carbonate with the petroleum being distilled in the apparatus.

100669. Roneo Limited. Improvements in or relating to filing systems. (31st July 1964). Accepted on 12th January 1967.

Characterised that each of the opposite edges of the pocket is formed as a loop in cross section, the loop of one pocket may be inserted within the loop of the other, and a support bar is passed through the loops to support the edges.

100683. Vsesojuzny Elektrotekhnichesky Institut im. V. I. Lenina. Exhaust device of air-blast switch. Accepted in 12th January 1967.

Comprising a valve return mechanism having a return spring the rod of the mechanism passes through a port in the wall of the exhaust air duct, while the mechanism is placed in a separate space.

100712. Erhardt & Leimer oHG. A support and guidance of the end of a movable and particularly slewable entrance. Accepted on 12th January 1967.

Characterised in that an intermediate member is arranged between the bearing element and the entrance bar and means being provided so that the end of the entrance bar can perform limited movement relating to the intermediate member and to the bearing element.

100733. Electric Reduction Company of Canada, Ltd. Production of chlorine dioxide and chlorine. (13th August 1964). Accepted on 17th January 1967.

Comprises adding an alkali metal chlorate, an alkali metal chloride, and a strong acid to a reaction vessel, maintaining the reaction mixture at a temperature high enough to ensure generation of chlorine dioxide and chlorine from reaction mixture but not to decompose chlorine dioxide and chlorine from reaction mixture but not to decompose chlorine dioxide and at a partial pressure of water to ensure evaporation of water to bring about crystallisation of an alkali metal salt of the acid within the vessel.

100734. Electric Reduction Company of Canada Ltd. Process for the production of chlorine dioxide and chlorine together with an hydrous sodium sulphate. (13th August, 1964). Accepted on 17th January 1967.

Comprises maintaining a reaction mixture of alkali metal chlorate, an alkali metal chloride, sulphuric acid and water, maintaining the reaction mixture at a temperature being above 30°C, maintaining the acidity of the mixture between 1.0 and 2.4 molar, withdrawing the water vapour so evaporated and periodically or continuously separating the crystallsed solid phase from reaction mixture.

100813. Shell Internationale Research Maatschappij N. V. Tray for contacting liquids and gases. Accepted on 11th January 1967.

Comprising two or more sections the section an connected to each other by means of tongues provided along one or more sides of section.

100815. Compagnie Francaise Thomson-Houston. A cooling device for cooling an assembly of pulleys. Accepted on 12th January 1967.

A cooling device for pulleys wherein device comprises means axially directly coolant flow to pulleys with grooves with side cooling surfaces defining between two adjacent pulleys small circular spaces forming passages.

100852. Worthington Corporation. Capacity control for absorption refrigeration. Accepted on 10th January 1967.

Comprising means for readily varying the cooling capacity of the refrigeration system in accordance with the load thereon.

100887. Kurashiki Rayon Co. Ltd. Cigarette filters using filter elements added with sugar esters. Accepted on 12th January 1967.

Cigar filter composed of paper or viscose rayon fibre as filter elements and sugar esters in an amount of 0.05 to 10% by weight of filter elements.

101152. Harry Edgar Pinkerton. Positive displacement piston pump. Accepted on 12th January 1967.

Piston having an end disposed exteriorly of the cylinder drive means having an output shaft for inducing rotation of the shaft coupling means for coupling the pin and the shaft to one another.

101202. Fakhruddin Taherbhai Khorakiwala. Improved spring board files and clamps for same. Accepted on 9th January 1967.

Board files, with single or double cover leaves or flaps, having and including spring loaded clamps for holding down the leaves.

101219. Shell Internationale Research Maatschappij N. V. Process for the hydrogenetion of unsaturated hydrocarbons by the use of catalysts. Accepted on 17th January 1967.

Catalyst containing one or more metals of platinum group supported on a carrier consisting of alumina which has bulk density lower than 0.78 gm./ml.

101310. Escher Wyss G.m.b.H. Fine-spreading and retarding device for the pulp suspension stream in a paper-making machine. Accepted on 10th January 1967.

Providing a fine-spreading and retarding device for a pulp stream which is hydrodynamically stable even using differently adjusted pulp flow velocities.

101313. The Kuljian Corporation (India) Private Limited. Improvements in or relating to the manufacture of articles, such as, paper, cement and the like. Accepted on 12th January 1967.

Materials to be cooled are caused to pass through a plurality of troughs arranged one below another, so that the materials travel a zigzag path during the transit.

101353. Worcester Valve Co., Inc. Ball valve. Accepted on 11th January 1967.

The ball and sealing means are integral, the sealing means being in the form of a flange demarked from the main body of the ball by an annular slot.

101411. Veb Pressen-Und Scherenbau Erfurt. Infinitely variable stroke setting gear at plate cutting and forming machines. Accepted on 12th January 1967.

Consisting a toggle-lever system which imparts swinging stroke to the tool, the said system consisting of an upper hinge pin mounted on levers which are continuously slewable by means of a flat threaded spindle.

101422. International Standard Electric Corporation. Frequency comparator. (4th September 1964). Accepted on 9th January 1967.

Comprises a mixer, means to indicate the magnitude of the frequency deviation, a phase modulater and a feed-back path.

101511. Edward Howard Green. Spray valve with protruding stem. Accepted on 16th January 1967.

Comprising a valve plunger portion normally engaging a gasket (under the influence of a spring by means of valve seat to prevent the discharge, the valve seat being unseated by a stem having one end free and an internal metering opening being arranged in the discharge path to predetermine the amount of material discharged per unit time.

101512. Recondo Private Limited. Improvements in or relating to devices for regulating the finished level of materials laid by machine. Accepted on 18th January 1967.

Wherein are provided (i) a shoe riding on the adjacent completed surface and drawn by a link attached to the machine and/or a sensor riding on a wire stretched parallel to the desired finished level or on a ski which slides on the existing ground; the link and the sensor being capable of angular movement on a pivot on the machine and (ii) means whereby changes in the angle of the link or the sensor are indicated to the operation of the machine by changes in colour and/or position of illuminated electric light bulbs.

101586. Ckd Praha Oborovy Podnik. Apparatus for floating zone melting of semiconductor materials. Accepted on 17th January 1967.

Comprising a high-frequency coil arranged inside an enclosed working space, an induction coil, a rigid lead and a condenser battery.

101800. Metalastik Limited. Resilient mountings and supports. (6th October 1964). Accepted on 16th January 1967.

Comprising a rigid base to stand upon and a rigid upper part to carry a machine, spring means between the upper part and the base to maintain them in spaced relation and screw jask mean on the upper part for raising and lowering the machine.

101801. Metalastik Limited. Resilient mountings and supports. (6th October 1964). Accepted on 16th January 1967.

Comprising a rigid base to stand upon a floor surface, a rigid upper part to carry a machine and a rubber spring means in between the base and the upper part to maintain them in spaced relation, the rubber spring means being arranged to be

101873. Dr.—Ing. August Schreiber. A method of and apparatus for aerating sewage in an aerating tank. Accepted on 17th January 1967.

Wherein sewage is mixed with activated sludge and a horizontally circulating flow is imparted thereto, and from the region of the tank floor the mixture is inspired with simultaneous aeration in the direction of flow of sewage and is introduced again into the sewage flow in same direction below liquid surface.

102265. Siemens & Halske Aktiengesellschaft. Improvements in or relating to frequency modulators. (24th August 1965). Accepted on 18th January 1967.

Comprising two amplifier stages, a stable multivibrator circuit to produce a carrier frequency oscillation, a charge transfer store and means being provided to apply a modulating signal.

102475. Jawa, narodni podnik. Clutch. Accepted on 12th January 1967.

Comprising one friction disc. between two pressure plates adapted to rotate with a driving shaft, one plate being axially movable by the action of main clutch spring and the other plate being axially movable either by centrifugal mechanism or by screw mechanism.

102547. Estrela Batteries Limited. Improvements in or relating to primary electric dry batteries. Accepted on 16th January 1967.

Battery cell is surrounded on all sides by a tube of heat shrinking material and thereafter the said tube is shrunk by heat treatment.

102721. Combustion Engineering Inc. Method of producing vapor and vapor generator therefor. Accepted on 12th January 1967.

Method of producing vapour in generator with a combustion zone where pulverized fuel is burned comprising sending secondary air to combustion zone and regulating minor flow in heat exchange relation with first portion of primary air flow.

102966. Societe Nationale Des Petroles D'Aquitaine. Improvements in or relating to analogue signal converters. Accepted on 17th January, 1967.

Comprising an integration capacitance fed with direct current from an analogue signal source to be converted, a circuit for discharging said capacitance, a trigger circuit means also connected in parallel with said capacitance.

104118. Sperry Rand Corporation. Electronic circuit units method and apparatus for preparing same. Accepted on 18th January, 1967.

Comprising a transparent substrate having a plurality of metallic conductor affixed to one surface thereof, and air integrated circuit chip having on one surface there on conductive portions corresponding in location for mating with conductors, integrated circuit chip being affixed to substrate with its conductive portions in juxtaposition and adherent to conductors.

104184. Chemische Werke Witten Gesellschaft mit beschrankter Haftung. Process for improving the thermal stability of dimethyl terephthalate. Accepted on 18th January, 1967.

Thermal stability of dimethyl terephthalate is improved by the addition of saturated aliphatic monohydric alcohols having 1 to 4 carbonatoms in amounts of 0·01—30% and by passing gas at 40-50° C.

104860. Standard Telephones and Cables Limited. Amplitude expandor. Accepted on 16th January 1967.

Comprising a non-linear network controlled in dependance upon the input signal amplitude and a transistor input stage.

105074. Pilkington Brothers Limited. Improvements in or relating to methods and apparatus for bending glass in sheet form. (30th April 1965). Accepted on 18th January 1967.

Creating a pneumatic pressure difference across the thickness of at least apart of the area of a heated glass sheet.

108041. Associated Electrical Industries Limited. Improvements relating to automatic telephone exchange systems. (Addition to No. 99946) (Divisional date, 18th June 1965). Accepted on 17th January 1967.

Comprising a constituent link circuit, a 'through' link circuit, positive-wire, negative-wire and private-wire.

Amendment Proceedings

The amendment proposed by Hercules Powder Company in respect of patent application No. 97226 as advertised in the Gazette of India Part III, Section 2, dated the 8th October 1966, has been allowed.

Registration of Assignments, Licences, etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

44922 Chief Engineer to Government of Maharashtra.

82261 B. Braun International GMBH.

85385, 85387, 85388 Allied Chemical Corporation.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 128812. Gurdit Singh & Sons, 20/4, Shakti Nagar, Delhi-7, a firm registered under the Indian Partnership Act, 1932, Indian Nationals, "Rotary blower", June 30, 1966.

Class 1. No. 128813. Gurdit Singh & Sons, 20/4, Shakti Nagar, Delhi-7, a firm registered under the Indian Partnership Act, 1932, Indian Nationals, "Blade for rotary blower," June 30, 1966.

Class 1. Nos. 128939 & 128940. Supreme Washerballs Private Limited, (An Indian Company, Registered under the Companies Act). Radia Building, Rampart Row, Bombay-1, Maharashtra, India, "Screw-driver", July 11, 1966.

Class 1. Nos. 128958 to 128969. 1. Pravin Laxmichand Doshi, 2. Jagdish Laxmichand Doshi and 3. Mukund Laxmichand Doshi, all Indian Nationals, near Vidya Vihar Railway Station, Cama Lane, Ghatkopar, Bombay-77, State of Maharashtra, "Hair pins, hair clips or hair grips", July 13, 1966.

Class 3. No. 128742. Raman Scientific Sales Corporation and Indian proprietory concern, 18/3, Shakti Nagar, Delhi (India), "Fractional weight box with sliding container", June 27, 1966.

Class 3. No. 128923. Vinis Products Indian Partnership firm, 54, Abdul Rehman Street, Bombay-3, Maharashtra, "Syphon pumps", July 7, 1966.

Class 3. No. 128938. Carona Sahu Co. Private Ltd., an Indian Limited Company, Registered under the Indian Companies' Act, 221, Dadabhoy Naoroji Road, and formerly 143, Mahatma Gandhi Road, Bombay-1, Fort, Bombay-1, Maharashtra, India, "A sole for footwear", July 11, 1966.

Class 4. No. 128924. The Kersons Mfg. Co. of India Limited, a Public Limited Company incorporated in India under the Indian Companies Act, Gopal Niwas, Lohar Chawl, Bombay-2, State of Maharashtra, India, "An electrical cut-out", July 8, 1966.

Class 8. Nos. 129482 to 129484. Kanshi Ram Amar Nath, Model Woollen Mills and Grovetex, partnership firm, registered in India, 4-C, Vulcan Insurance Building, Veer Nariman Road, Bombay-1, State of Maharashtra, India, "Travelling rugs", September 19, 1966.

Class 9. Nos. 128794 to 128803. Hindustan Embroidery Mills Private Ltd., Chheharta (Amritsar), Nationality, Indian Firm, "Lace", June 29, 1966.

Class 13. Nos. 128135 to 128137. The Khatau Makanji Spg. & Wvg. Co. Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, "Textile piecegoods", April 1, 1966.

Class 13. Nos. 128148 to 128151. The Crown Spg. & Mfg. Co. Ltd., Gokhale Road (South), Parel, Bombay-13, (Maharashtra), Nationality Indian Company, "Textile goods", April 1, 1966.

Class 13. Nos. 128364 to 128367. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Bombay-1, "Cotton textiles", May 10, 1966.

Class 13. Nos. 128406 to 128408. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13. "Textile piece-goods", May 13, 1966.

Class 13. Nos. 128581 to 128594. The Khatau Makanji Spg. & Wvg. Co. Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", June 1, 1966.

Class 13. Nos. 128624 to 128627. The Phoenix Mills Limited, an Indian Company, Tulsi Pipe Line Road, Lower Parel, Bombay-13, Maharashtra State, "Textile goods", June 7, 1966.

Class 13. Nos. 128683 to 128690. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods" June 17, 1966.

Class 13. Nos. 128694 to 128696. The Phoenix Mills Limited, an Indian Company, Tulsi Pipe Line Road, Lower Parel, Bombay-13, Maharashtra State, "Textile goods", June 18, 1966.

Class 13. Nos. 128701 to 128705. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods" June 20, 1966.

Class 13. Nos. 128708 to 128714. Weldon Cording Works, 139, Medows Street, Bombay-1, Nationality—Indian, "Textile goods," June 22, 1966.

Class 13. Nos. 128874 and 128875. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", July 2, 1966.

Class 13. Nos. 128876 to 128880. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Bellard Estate, Bombay-1, "Cotton Textiles", July 4, 1966.

Class 13. Nos. 128952 and 128953. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods", July 13, 1966.

Class 13. Nos. 129004 to 129006. The Khatau Makanji Spg. & Wvg. Co. Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", July 21, 1966.

Class 13. Nos. 129048. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", July 30, 1966.

Class 13. No. 129136. Jiyajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", August 6, 1966.

Class 13. Nos. 129662 and 129664. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", October 25, 1966.

Class 13. No. 129795. The Shree Niwas Cotton Mills Ltd., an Indian firm, Delisle Road, Bombay-13, "Cotton piecegoods", November 22, 1966.

Class 13. Nos. 129827 and 129828. The Crown Spg. & Mfg. Co. Ltd., Gokhale Road, (South) Parel, Bombay-13, (Maharashtra), Nationality—Indian Company, "Textile goods", November 29, 1966.

Class 14. Nos. 129035 to 129039. The Victoria Mills Limited, Indian Company, Delisle Road, Parel, Bombay-13,"Textile piecegoods", July 29, 1966.

Registration of Assignments, Licences, etc. (Designs)

Assignments, Licences or other transaction affecting the interest of the original proprietors have been registered in the following cases. The number of each case is followed by the names of the applicants for registration :

94260 Stanley Works (Great Britain) Limited.

107498, 107499, 107500, 107501 } David Brown Gear Industries Limited.

121091, 122133, 122134, 122293, 122294, 122343, 122344, 124225, 124226, 124332, 124333 } J. K. Helene Curtis Limited.

M. L. KAPOOR,
Controller-General of Patents, Designs and Trade Marks.

Notifications and Notes issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE
PATENTS AND DESIGNS
Calcutta, the 11th February 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under section 78-A of the Act.

21st January 1967

108964. Sri J. Panda. Shoe type power from for deriving power from the leg while walking.

108965. Sri J. Panda. Optical instrument for precise measurement of distance.

108966. Sri J. Panda. Bicycle out fit for deriving power from the revolving tyre.

108967. Franz Plasser Bahnbaumaschinen. Device for recording, indicating and/or correcting of an inclination especially the banking of tracks.

108968. Sandoz Ltd. Improvements in or relating to organic compounds. (24th January 1966).

108969. Sandoz Ltd. Improvements in or relating to organic compounds. (24th January 1966).

108970. Societe D'Etudes Scientifiques Et Industrielles De L' Ile-de-France. Process for the preparating of N-(substituted aminoalkyl)-2-alkoxy-5-halobenzamides.

108971. Celanese Coatings Company (formerly known as Devoe and Raynolds Company, Inc.). Epoxy resin composition.

108972. N. V. Philips Gloeilampenfabrieken. Method of manufacturing semiconductor devices embedded in a moulded insulating protective envelope.

108973. M. Ramalingam and Deivayanai. Stamping machine, E. G. for impressing date, month and year.

108974. The Dow Chemical Company. Fracturing of solid bodies.

108975. S. S. Pandya. Mechanised earth scoop for use in gardens and fields.

108976. J. Singh and K. Singh. A starter for electrical motors and particularly the locking device therein.

108977. The Dunlop Company Limited. Improvements in or relating to wheels for pneumatic tyres. (27th January 1966).

108978. The Dunlop Company Limited. Articles made of fibrillar material. (1st February 1966).

108979. The Dunlop Company Limited. Improvements relating to the bonding and dyeing of thermoplastic synthetic matrials. (1st February 1966).

108980. H. Holloway. Process for the preparation of steroid compounds.

108981. Osterreichische Stickstoffwerke Aktiengesellschaft. Ammonium nitrate-containing explosive of high detonation speed.

24th January 1967

108982. Council of Scientific and Industrial Research. A transistorised clock.

108983. Dynamit Noble Aktiengesellschaft. Process for the manufacture of hardenable synthetic resins.

108984. Siemens Aktiengesellschaft. Current converter comprising a transformer which supplies the rectifier branches.

108985. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Water-insoluble azo-dyestuffs and process for their manufacture.

108986. A. G. Nagarkar, G. N. Brahme, V. S. Karandikar, and M. B. Deodhar. Improvements in or relating to water filter.

108987. Ciba Limited. Di-(hydroxynaphthyl)-triazines and processes for their manufacture and use.

108988. Ciba Limited. New water-insoluble anthraquinone dyestuffs and process for their manufacture.

108989. Ciba Limited. Diacylamino-dihalogeno, 1, 4 benzoquinones and a process for their manufacture.

108990. Farbenfabriken Bayer Aktiengesellschaft. Elastic thermoplastic moulding compounds with high stablility to heat and light. (12th January 1967).

108991. The British Petroleum Company Limited. Improvements in or relating to the cultivation and recovery of microorganisms. (3rd February 1966).

108992. Zellweger Limited. Determining the count of textile material for spinning. (16th May 1966).

108993. National-Standard Company. Aluminum clad electric conductor wire and method of making such wire.

108994. E. Q. Sylvester. Mold apparatus and method of casting.

108995. Klockner-Werks A.G. Improvements in or relating to steel rails (30th September 1966).

108996. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Benzenesulfonylureas and process for preparing them.

108997. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Sulfonamide derivatives and process for the manufacture thereof.

108998. Egyesult Gyogyszer-Es Tapszergyar. A process for the preparation of basic ethers.

108999. Glaverbel, a Belgian Company. Improvements in or relating to light-transmitting materials.

109000. Indian Oxygen Limited. Tubular two-part couplings (1st February 1966).

109001. Dorr-Oliver Incorporated. Cyclonic reactor.

109002. J. R. Geigy A. G. Process for the production of new imidazole derivatives.

109003. Farbenfabriken Bayer Aktiengesellschaft. Reactive dyestuffs and process for their preparation. (4th January 1967).

109004. Carding Specialists (Canada) Limited. Improvements in or relating to carding machines. (27th January 1966).

109005. Indian Oxygen Limited. Improvements in and relating to furnace lances. (28th August 1964). (Divisional date 23rd June 1965).

25th January 1967

109006. Council of Scientific and Industrial Research. A modified process for the preparation of expandable thermoplastic beads. (Addition to No. 65976).

109007. St. Joseph Lead Company. Improvements in dispersion strengthened lead.

109008. The British Drug Houses Limited. Organic compounds. (3rd February 1966).

109009. D. S. Dahanukar. Improvements in or relating to safety razors.

109010. Rhone-Poulenc S.A. Fungicidal compositions.

109011. A.E.R. Arnot. Improvements in or relating to portable tools and accessories therefor. (28th January 1966).

109012. M & T Chemicals Inc. Method for treating chromium-containing baths.

109013. Thorium Limited. Improvements in separation procedures. (4th February 1966).

109014. Spectrum Diamonds (Proprietary) Limited. Improvements in and relating to holders for gem stones.

109015. Spectrum Diamonds (Proprietary) Limited. Improvements in and relating to holders for gem stones.

109016. General Time Corporation. Improvements in or relating to electronic clocks.

109017. C.W. Cheney & Son Limited. Improvements relating to luggage locks. (27th January 1966).

109018. C. W. Cheney & Son Limited. Improvements relating to locks. (27th January 1966).

109019. The Lamson & Sessions Co. Flanged lock nut.

109020. Union Carbide Corporation. Continuous processes for the production of ethylene polymers and catalysts suitable therefor.

109021. Mississippi Chemical Corporation. Stabilized ammonium nitrate compositions and their production.

109022. Micafil Ltd. Protective system for capacitive voltage transformers.

109023. Ciba Limited. Manufacture of 4-trifluoromethyl-anthranilic acids.

109024. Ciba Limited. Manufacture of 5-sulfamyl-anthranilic acids.

109025. Aktiebolaget Svenska Flaktfabriken. A device for directed air supply in rooms.

109026. Aktiebolaget Svenska Flaktfabriken. A method for advancing a filter mat in a rolling filter.

109027. Aktiebolaget Svenska Flaktfabriken. A valve for air supply in rooms.

109028. Societe De Produits Chimiques D'Auby, and Societe Anonyme Des Elablissements Brissonnequet Lotz. Improvements in the methods of preparing and conditioning proteincontaining foods, applicable notably to the fishing industry.

109029. Dalmine S.p.A. A process and device for drawing truncated-cone shaped bodies and the like.

109030. Whitefin Holding S.A. Process for the preparation of diarylcyclopropane derivatives. (26th January 1966).

109031. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing contact layers for semiconductor devices and products thus obtained.

109032. Combustion Engineering Inc. Method and generator for producing heat.

109033. FMC Corporation. Apparatus for handling liquid cargo.

109034. Eli Lilly and Company. Process for preparing benzimidazoles, products produced thereby, and herbicidal compositions comprising the benzimidazoles.

109035. The dow Chemical Company. New acrylonitrile butadiene styrene polymers and process for making them.

109036. General Electric Company. Improvements in or relating to high voltage fuel cell unit having unitary electrolyte means.

109037. E. Merck Aktiengesellschaft. 3, 4-cis-4-aryl-isoflavanes and preparation thereof.

109038. The Babcock & Wilcox Company. Manufacture of high temperature alumina silica fibers.

109039. Rayette-Faberge, Inc. Folding portable hair dryer.

109040. Ministerul Industriei Constructiilor. Method for obtaining ceramic products with ornamental relief.

109041. J. M. Voith GMBH. Pipe branch piece for pressure. pipelines of large diameter, especially for water power plants.

109042. Gosudarstvenny Nauchno-Issledovatelsky Institut Teploenergeticheskogo Priborostroeniya. Hydrostatic liquid density transducer.

109043. A. N. Zavolkov, G. N. Zinchenko and N. D. Levochkin. Small-size rotary precision potentiometer.

109044. Spetsialnoe Konstruktorskoe Bjuro. Screw pump.

109045. Podmoskovny Gosudarstvenny Proektnokonstruktrosky i experimentalny institut gornogo mashinostroeniya of Novomomoskask Tulskoi obl, ul Shahkhterov. Mechanized timbering for maintaining the cleared face joint with extraction drifts.

109046. J. E. Kopp. Improvements in or relating to bearing mountings for rollers in continuously variable ratio friction drives.

109047. Ministerul Petrolului. Steam generator aggregate by recovery of heat from side reflux of fractionators.

109048. Kumardhubi Engineering Works Limited. Mobile crane units.

109049. H. S. Pareek. Loom pickers.

109050. Ramachandran M. A sugar-cane unloading device.

109051. S. R. Vithaldas. Non sparking, low-voltage ignition process for petrol and other types of internal combustion engines.

27th January, 1967

109052. G. C. Westmacott. Improving the track wheels purchase reducing metal fatigue and the risk of telescoping railway trains in collision, economically. [Anti dated to 9th January 1967].

109053. S. Pai. An apparatus for playing a game of skill.

109054. Shri P. Pachisia. Atomizer pump.

190055. Franz Morat G.M.B.H. Method of and apparatus for scanning a pattern for the production of a control strip. (30th November 1966).

109056. D. K. Dhand. A Gravity neutraliser for ecstacy.

109057. M. Sehrai and B. R. Shah. Sun way shoe polish.

109058. Shri K. Dass The *radium-byc-Handle grip. Radium plastic ring.*

109059. Premier Plastics (P) Ltd. Oil filter.

109060. J. R. Geigy A.G. Process for the production of new amides of aliphatic carboxylic acids.

109061. J. R. Geigy A.G. Process for the production of new amides of aliphatic carboxylic acids.

109062. J. R. Geigy A.G. Process for the production of new amlides of aiphatic carboxylic acids.

109063. Abbott Laboratories. Cyclamate process.

109064. Caterpillar Tractor Co. Ejector mechanism for loader buckets.

109065. Warner-Lambert Pharmaceutical Company. Preparation of pyridines from olefins.

109066. Sherritt Gordon Mines Limited. Treatment of copper bearing complex sulphides. (2nd February 1966).

109067. British Industrial Plastics Limited. Treatment of oxymethylene polymers. (23rd November 1964). [Divisional date 12th August 1965]. [Addition to No. 101096].

109068. Knoll Aktiengesellschaft, Chemische Fabriken. Process for the preparation of basically substituted phenylacetonitriles. [Addition to No. 85380].

109069. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to indirectly heated cathodes of the kind having an emissive and face and methods of manufacturing such cathodes.

109070. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electric incandescent lamps.

109071. Molins Machine Company Limited. Improvements relating to a multi-tool lathe. (28th January 1966).

109072. W. S. Schenider and A. P. Corella. Packaging machine of the form-and-fill type.

109073. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Spinning box for melt spinning fibers and filaments of synthetic polymers.

109074. Pric-Patent Research (International) Corporation Inc. Improvements in or relating to pylons for overhead electric cables. (27th January 1966).

Alteration of Dates

99111. The priority date 22nd April 1964 has been altered to 21st October 1964.

99119. The claim to priority date 23rd April 1964 has been abandoned and the application dated as of 21st April 1965, the date of filing in India.

100816. The claim to priority date 31st July 1964 has been abandoned and the application dated as of 27th July 1965 the date of filing in India.

107408. Ante-dated to 9th April 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1922, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India, Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specification should be accompanied by the numbers of specifications as shown in the following list.

If required copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

98846. Moskovsky Khimiko-Tekhnologichesky Institute. Method of making crystallized glass. Accepted on 6th January 1967.

Comprising the steps of stirring of metalurgical liquid slag and upto 90% of its weight of silica or other acid substances in a converter.

98912. Rank Xerox Limited. Electrophotographic plate. Accepted on 9th January 1967.

Comprising a photoconductive layer containing a photoconductive layer containing a phthalocyanine and a oinder material.

98962. Standard Telephones and Cables Limited. An electrical control circuit for a radar system. Accepted on 12th January 1967.

Includes a first variable gain amplifier a second signal amplifier a stone and means for recording in the store.

99008. N. V. Philips Gloeilampenfabrieken. Improvement in and relating to devices for fastening a connection sleeve between a loudspeaker coil, a diaphragm with a centering member to a each other and a loudspeaker connected thereby. Accepted on 16th January 1967.

Comprising a central core with tubular upper and lower templets there being left a space between the upper and lower templates.

99029. Indian Oxygen Limited. Process and apparatus for the removal of one or more constituents from a gas mixture. Accepted on 16th January 1967.

A gas mixture is passed through at least three adsorbers arranged in series and operating in a cycle divided into a number of periods equal to the number of adsorbers during which cycle the gas mixture is always passed through each of the adsorbers in the same direction and wherein the adsorbers are switched from one period of the cycle to the next when a concentration plug of the constituent has been carried over from first adsorber into next adsorber in the series chain.

99040. Associated Chemical Companies Limited. Production of wood preservatives. (24th April 1964 Accepted on 17th January 1967.

Word preservative containing as the main constituent copper and chorium are taken in amounts equivalent to those present in copper dichromate, by forming reacting copper as cu†† salt and the chronium as chromic acid of an alkali vetal dichromate in the presence of water and removing all water, including water of crystallisation from reaction mixture.

99041. Leesona Limited formerly known as Leesona Holt Limited. Improvements in or relating to textile sizing machines. (16th April 1964). Accepted on 17th January 1967.

Characterised by provision of a clear space between the machines for an operative to walk and a single steam header between the machines to feed steam to inner ends of cylinders.

99044. Dynamic Instrument Corporation. Improved method and apparatus for charging battery. Accepted on 17th January 1967.

Method includes the steps of sensing the magnitude of gas pressure generated in the cell by the flow of electric current and modifying the magnitude of said current to maintain the gas pressure below a preselected maximum level.

99054. NGK Insulators, Ltd. Method for producing porcelain suitable for insulator. Accepted on 19th January 1967.

Containing 65 to 80% by weight of SiO_2, 2.0 to 4·0% of alkali oxide, 0·5 to 1·5% to Fe 203, 0·2 to 1·3% of TiO_2, less than 0·5%, of each of CaO and Mgo and less than 1% of thus impurities having SiO_2%, Al203 ratio of 2·8 to 4.5 and K_2O/Na_2O ratio of 0·0% to 1·5%.

99058. The Tata Iron & Steel Company Limited. Hydraulic surface grinding machines. Accepted on 19th January 1967.

Means for causing the grinding head to slide along the axis of the shaft carrying the grandling wheel, the grinding head having a continuous reciprocating motion or moving step by step, the whole means being principally hydraulically operated.

99069. S. D. Patel. A press. Accepted on 19th January 1967.

Comprising a fulcrum lever, a hammer fitted on the shorter arm of lever an oil tank connected to an oil cylinder and such that the lever responds to the pressure of the oil means for controlling the flow of oil into such tank, a piston in cylinder actuating the longer arm of the lever.

99075. Lurgan Boxmaking Company Limited. Improvements in or relating to egg trays. Accepted on 19th January 1967.

Egg trays being made square by having end projections along two opposed edges in the form of half projections and webs between said projections forming side walls along said two opposed edges.

99088. Sperry Rand Corporation. Improvements in rotary fluid pumps or motors. Accepted on 19th January 1967.

Rotary fluid pumps or motors of the kind having a rotor sandwiched between pressure responsive check plates or members and in particular to those of the reversible radial sliding vane type.

99101. Continental Oil Company. Method of consolidating incompetent subterranean formations adjaent a bore well. Accepted on 20th January 1967.

Comprises injecting into formation (a) coupling agent and (b) organic age-hardenable partially polymerised resinous composition insoluble in diesel oil and reacts with said coupling agent.

99110. Calmec (Manufacturing) Limited. Improvements in apparatus for moulding articles from plastics material, (22nd April 1964). Accepted on 21st January 1967.

Comprising tool means reciprocably mounted, means for driving material emerging from outlet, means for causing tool means to effect forming operation means for advancing engaged tool means, means for releasing the tool means and means for returning the tool means.

99111. Calmec (Manufacturing) Limited. Method of and apparatus for moulding articles from plastics material. (21st October 1964). Accepted on 21st January 1967.

Comprising two relatively movable platens respectively providing cooperating tool means, means for making shuch relative movement stop means, cutting means, and means for causing cutting means and facing parts of one platen to be urged together more strongly.

99119. Indian Oxygen Limited. Improvements in flame cutting machines and setting devices therefor. Accepted on 21st January 1967.

Including a base frame, one or more burner carrier assemblies each having a burner carrier, a first scale to the or each carrier assembly burner carrier adjusting means locking means for the carrier, registering means on the carrier complementary to corresponding means on a burner.

99132. Borg-Warner Corporation. Improvements in and relating to thermoelectric systems particularly adaptable to air-conditioning units. Accepted on 24th January 1967.

A thermoelectric system comprising a resistance connected across the modules to provide a closed circuit with said resistance and with said modules connected in series.

99133. Sherritt Gordon Mines Limited. Recovery of nickel and cobalt values from their oxidized ores. Accepted on 24th January 1967.

Comprising heating the ore at a temperature with in the range from 430°C to 820°C in contact with a reducing agent for selectively reducing nickel and cobalt oxides, dispersing the reduced ore in water, agitating the slurry so produced and reacting it with sulphur dionide and an oxygen hearing oxidizing gas to convert it to water rotable sulphates, separating undisolved rindue from the solution and treating said solution directly with a sulphidizing agent to convert disolved nickel and cobalt values to sulphides and recovering precipitated sulphide from said solution.

99156. Rohm and Haas Company. Herbicidal compositions containing lactams. (Addition to No. 85717) Accepted on 19th January 1967.

Comprising atleast one 1-[3, 4-disubstituted phenyl] -2 pyriolidinone and one or more of the following a solid diluent, an acaricide, a fungicide, a molluscicide another herbicide, a surface active agent an insecticide a fertilizer, a propellant.

99157. Rohm and Haas Company. Herbicidal compositions containing lactams. [Addition to No. 85717]. Accepted on 19th January 1967.

Comprising atleast one 1 [3, 4-disubstituted phenyl] -3-methyl-2-pyrrolidinone and one or more of the following : a solid diluent a surface active agent, an insecticide, a fertilizer, an acaricide, molluscicide another herbicide, a fungicide, a propellant.

99159. G. K. N. Group Services Limited. Improvements relating to apparatus for non-destructively testing metal billets of other work-pieces of elongated bar-like form. (30th April 1964). Accepted on 20th January 1967.

With the sets of rolling surfaces arranged collectively to form lateral boundaries of a guide channel adjacent to the feed path and each such set presents three zones of contact with a work piece in the feed path.

99303. Clupak, Inc. Improvements in a process and apparatus for producing a modified web material. Accepted on 21st January 1967.

Comprising the steps of moving a deformable surfaced blanket, moving a recolless blanket, feeding a web into engagement with the said surface blanket means to permit said defermable surface blanket means to shrik the web in the direction of contraction.

99707. Power Jets (Research & Development) Limited. Helicopter lift control mechanism. (29th May 1964). Accepted on 20th January 1967.

Comprising a non-rotating member a rotating member, means for leading fluid flow into the rotating member, the control mechanism.

99865. Beteiligungs-Und Patentverwaltungsgesellschaft Mit Beschrankter Haftung. Method of monitoring and regulating the oxygen blowing process. Accepted on 21st January 1967.

Characterised by controlling the distribution of oxygen over the reactions taking place in the reactor.

99897. ACF Industries, Incorporated. Carburettors for internal combustion engines. Accepted on 21st January 1967.

Mixture conduit having a downstream end portion which in use being connected to an engine intake manifold, a throttle valve in said downstream end portion of the mixture conduit, means forming an idle fuel system in said downstream end portion and including an idle port opening into said mixture conduit, an air passage way and air bleed valve means in said passage way.

100187. Dunlip Rubber Company Limited. Polyurethanes. (10th July 1964). Accepted on 21st January, 1967.

Comprises the reaction product of a polymer with one or more episulphides having two terminal reacting groups with an organic compound having at least two terminal-NCX groups where X is O or S.

107408. Rank Xerox Iimited. Method of preparing metal-free phthalocyanine in the X-form and metal-free phthalocyanine prepared by the method. (Divisional date 9th April 1965). Accepted on 9th January 1967.

Milling alpha metal free phthalocyanine in the presence of an inorganic salt for a time sufficient to convert said phthalocyanine to the "X" form.

100443. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to circuit arrangements for synchronizing a relaxation oscillator. Accepted on 24th January 1967.

Synchronising pulses have a polarity rendering the amplifying element conducting and in that in an insynchronisation state frequency increasing effect of the direct synchronisation is substantially mentralisad by the additional charge accumulated in the capacitor by the current to the control electrode.

100493. J. R. Geigy A. G. Process for the production of cationic azo dyestuffs and a process for dyeing polymeric copolymeric acrylnitrile fibres. Accepted on 9th January 1967.

Diazonium salt of 1-phenyl-3-methyl-5-aminopyrazole is reacted with N, N-dimethylaminobenzene and the azo dyestuff thus obtained is reacted with dimethyl sulphate in chlorobanzene.

100514. Libbey-Owens-Ford Glass Company. Method and apparatus for bending and tempering glass sheets. Accepted on 12th January 1967.

The method including the steps of moving the sheets through heating bending and chilling areas with air as cushion medium is characterised in that keeping the sheets stationary in the bending area to press them between complemental shaping surfaces.

100533. A. J. C. D. O. Barros. Improvements relating to stencil printing cylinders. (14th July 1964). Accepted on 12th January 1967.

Comprising a relatively fine mesh screen of little strength supported in a relative coarse mesh cylinder.

100596. Shell Internationale Research Maatschappij N. V. Process for the preparation of artificial latices from synthetic latices of homo-and/or copolymers. Accepted on 16th January 1967.

Contacting frozen synthetic latex with oxyganic solvent thawing cold mixture emulsifying polymer solution formed in water phase and removing solvent for in dispersion for used.

100603. Sperry Rand Corporation. Fluid sorter for punched record cards or the like. Accepted on 14th January 1967.

Comprises a plurality of card collecting channels having a first opening a second opening fluid amplifier and variable control fluid generating means.

100642. United States Rubber Company. Method of recovring water insoluble solid polymer. Accepted on 17th January 1967.

Comprising dispersing in water a solution of a water soluble olefin polymer rubber in an innert water immiscible solvent at a higher pressure and temperature above the boiling point of solvent and passing the solution into a low pressure zone while atomizing it with steam jet.

100644. The Gillette Company. Razor blade and method of making same. (26th January 1965). (Addition to No. 74625). Accepted on 17th January, 1967.

A safety razor blade having on its cutting edge an adherent coating consisting essentially of a fluoro carbon polymer melting between 310°C and 332°C, said coating being cured in situ and having a thickness from about 0·1 to about 0·3 micron.

100666. Shell Internationale Research Maatschappij N. V. Herbicidal compositions containing substituted imidazoles. Accepted on 19th January 1967.

Comprises substituted imidiazoles as active ingredients together with a carrier and/or surface active agent.

100698. Bristol Siddeley Engines Limited. Jet propulsion engines for aircraft. (21st July 1964). Accepted on 20th January 1967.

Comprising a duct projecting from a side, a propulsion nozzle connected to receive gas from the duct, a movable ramp arranged to guide the flow of gas rearwards from the nozzle and carrying an obturator which masks the nozzle outlet.

100703. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to a circuit arrangement for stabilizing against variations in temperature and supply voltage. Accepted on 20th January 1967.

The temperature dependent element is constituted by a stablising transistor having a voltage divider connected between the collecter and emitter.

100705. S. Prasad. Improvements in or relating to a sealing device for a meter, such as, gas meter or electric meter. Accepted on 21st January 1967.

Having a body part from one side of which is extended a movable link part, the free end and link being provided on its two opposite sides with external beads.

100711. Erhardt & Leimer Ohg. Apparatus for the guiding and/or lateral displacement of moving webs of materials for example webs of textiles. Accepted on 21st January 1967.

Shell sections are attached to annular members mounted for free rotation an axle bearing adjusted at an inclination to roller axle.

100719. Occidental Research & Engineering Limited. Improvements relating to burner arrangement for submerged combustion or like avaporator, and evaporator incorporating such arrangement. (21st July 1964). Accepted on 21st January 1967.

Comprising a combustion chamber, means for conducting fuel and oxidant to said combustion chamber, a diptube communicating with said combustion chamber an exhaust orifice, an annular surface surrounding said exhaust orifice.

100728. Montecatini Societa Generale Per L'industria Mineraria E Chimica. Impact resistant thermoplastic blends. Accepted on 21st January 1967.

Comprises blending (A) rigid resins obtained from vinyl aryl monomers and unsaturated nitrile and (B) a tetrapolymer obtained from conjugated diene monomer alkylacrylate, vinylacrylic monomer and unsaturated nitrile.

100729. J. R. Geigy A. G. Process for the dyeing of organic fibres. (Addition to No. 92153). Accepted on 21st January 1967.

Impregnating organic fibre material at a temperature below the drawing temperature of the dyestuffs and at a pH 2 to 7 with agueous dyestuff solution containing unsulphated amides of aliphatic monocarboxylic acids with primary or secondary amines having atleast one hydroxy-alkyl group and either (i) sulphated product of above amides or (ii) sulphated (alkyl phenyl)-(2, 3 dihydroxy propyl) ethers or a mixture of (i) and (ii) and finnishing by heat treatment.

100756. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of new anthraquinone dyestuff for wool. (23rd March 1965). Accepted on 24th January 1967.

Reacting 1, 4-dihydroxy-5, 8-dichloro-anthraquinone with tert-butylaniline in presence of an acid binding agent and disulphonating the product.

100759. C. O. Hoover. Process for sulfur reduction and sweetening of hydrocarbon oils. Accepted on 20th January 1967.

Admixing with a mercaptan containing hydrocarbon oil stock in the liguid phase concentrated sulphuric acid and an organic sulfonyl halide.

100785. International Standard Electric Corporation. A suitching arrangement. Accepted on 25th January 1967.

In which at each intersection between a switch controlling bar extending in one or second direction there is provided one or more movable contacts.

100805. Chemical Construction Corporation. Process and apparatus for steam reforming of hydrocarbons. Accepted on 24th January 1967.

Burnig hydro carbon fuel in compressed stream of air expanding hot gas stream through gas turbine, burning second fuild hydrocarbon fuel in said gas stream and passing same in contact with catalyst to form synthesisgas.

100816. British Industrial Plastics Limited. Process for polymerising cyclic ethers and cyclic acetals. Accepted on 27th January 1967.

Effecting polymerisation in presence of a salt containing hexafluoroantimonate anion.

100865. British-American tobacco company Limited. Improvements relating to tobacco-smoke filters. Accepted on 20th January 1967.

Comprises mixing a powdered or granular tobacco-smoke filter material with a low melting salt and heeting to bond the material with the salt.

100885. Chemical Construction Corporation. Hydro carbon reformer furnace. Accepted on 24th January, 1967.

A hydrocarbon reformer furnace comprising a heated container with vertical tubes filled with catalyst with hydrocarbon inlet at upper end to a preheat tube parallely mounted with steam inlet at lower end.

100960. Indian Oxygen Limited. Safety pressure disconnect device. (6th August 1964). Accepted on 25th January 1967.

With annular seating and retaining means comprising retaining member and interlocking means.

101039. The Dow Chemical Company. Purification of cyanoliphatic acids. Accepted on 21st January 1967.

Comprising forming an anhydrous solution of a mixture of a cyanoliphatic acid and corresponding dicarboxylic acid in an inert organic solvent, treating it with at least one mole of ammonia per mole of free dicarboxylic acid, adjusting the temperature to 35—110°C and removing the precipitated ammonium salt of dicarboxylic acid.

101115. Bruce Peebles Industries Limited formerly known as Bruce Peebles & Co. Limted. Improvements relating to electrical windings and in particular for submersible motors. (14th August 1964). Accepted on 24th January 1967.

Comprising a single length of coaxial cable including two conducting cores.

101180. Letraset Limited. Dry transfer materials. (18th August 1964). Accepted on 24th January 1967.

The adhesive comprising at least two components which are such that on treatment of transfered film by physical and/or chemical methods at least part of one component combines with at least part of the other components increasing the strength of adhesive bond and making the bond heat resistant.

101449. Corning Glass Works. Forced stream feeding of molten glass. Accepted on 21st January 1967.

Comprising ejecting a stream of it from a supply body puddling it in a patty and inhibiting additional flow momentarily.

101745. N. V. Philips' Gloeilampenfabrieken. Improvements in and relating to methods of coating eletrical components having connecting wires with a synthetic resin and components thus coated. Accepted on 24th January 1967.

Components are first coated with a layer of isoluted Liquid droplets and then with a powder of synthetic resin, after which they are heated until the liquid is evoporated and powder of synthetic resin coalesces.

101841. Westinghouse Electric Corporation. A transposing arrangement for electrical conductors and electrical coil comprising a plurality of turns of electrical conductors. Accepted on 20th January 1967.

A plurality of main electrical conductors disposed in symmetrical relation about a centre line. each of the conductors being bent in a predetermined manner to occupy a new position on the opposite side of the centre line.

102315. Standard Telephones and Cables Limited. Parallel-to-serial converter for a binary code generator. (30th October 1964). Accepted on 24th January 1967.

Comprising a blurality of distable devices, means for combining with the output wave forms of the bistable devices and means for producing an out put pulse.

102352. Tesla, narodni podnik. A current supply system for resistance welding machines. Accepted on 20th January 1967.

A current supply system where in two electronic switches consist of switching transistors having the bases connected to the secondary winding of the respective input transformers and having emitter collectors path included in the discharge circuit of one of two condensers.

102576. Rajiv Kumar Misra. Automatic machine for filling of road cracks with pitch. Accepted on 24th January 1967.

Comprising a toothed wheel means fitted to the lower end of a prong means means to keep the wheel means in contact with road surface and means to switch on an electronic circuit a relay coil to actuate a means for opening and closing a pipe means for pitch.

103231. Farbenfabriken Bayer Aktiengesellschaft. Preparation of polyamides. (28th October 1965). Accepted on 24th January 1967.

A process for the production of polyamides by polymerization of polyamide forming compounds in the presence of finely divided inert solids comprises admixing to the melt of the polyamied forming substance a dispersion of the solid.

103653. Dunlop Ruber Company Limited. Process for making carpets. Accepted on 24th January 1967.

Having a fibrouspile bonded to a sheet of resilient cellular materials said sheet being an agglomeration of foamed polymeric material.

104610. Hitachi Zosen Kabushiki Kaisha. A process of producing ethylene dichliride. Accepted on 20th January 1967.

Reacting chlorine with ethylene under 300 to 600 mmHg pressure in a reaction tube by utilizing heat of reaction generated while keeping the outlet of said tube at 60 to 150°C.

Opposition Proceedings

The opposition entered by The Dow Chemical Company to the grant of a patent on application No. 88083 made by Pittsburgh Plate Glass Company as notified in Part III, Section 2 of the Gazette of India dated the 16th April 1966 has been treated as withdrawn.

Correction of Clerical Errors

(1)

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical errors occurring in the specification & application for patent application No. 87561 were corrected on 17th January 1967.

(2)

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical error occurring in the specification in respect of patent application No. 97451 was corrected on 24th January 1967.

Patents Sealed

(1)

94236. 94919. 95158. 95163. 95315. 95495. 95736. 95808. 95857. 95870. 95885. 95940. 96034. 96279. 96436. 96677. 96791. 96912.

91134. 91232. 94066. 95391. 95464. 95467. 95572. 95574. 95651. 95661. 95664. 95741. 95745. 95761. 95773. 95918. 95919. 95920. 95964. 96172. 96224. 96254. 96255. 96401. 96495. 96515. 96562. 96595. 96675. 96716. 96730. 96743. 96776. 96781. 96787. 96804. 96815. 96840. 96937. 101130. 101220.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Sceony Mobil Oil Company, Inc., a Company organized and existing under the laws of the State of New York, of 150 East 42nd Street, New York 17, United States of America, seek leave to amend the name of the applicant in the application, specification and drawings in respect of patent application No. 88090. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the patent Office, on payment of the usual charges.

(2)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Improved Machinery Inc., a Corporation organized and existing under the laws of the State of Delaware, United States of America, located at Nashua, State of New Hampshire, United States of America, seek leave to amend the description in the specification in respect of patent application No. 95606. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The Proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(3)

The amendment proposed by Hercules Powder Company in respect of patent application No. 97056 in the Gazette of India Part III, Section 2, dated the 8th October 1966 has been allowed.

(4)

The amendment proposed by Hercules Powder Company in respect of patent application No. 97225 as advertised in Part III, Section 2, of the Gazette of India dated the 8th October 1966 has been allowed.

(5)

The amendment proposed by Hercules Powder Company in respect of patent application No. 97808 as advertised in Part III, Section 2 of the Gazette of India dated the 8th October 1966.

Registration of Assignments, licences etc. (Patents)

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

60655, 68442, 68443, 68444, 70062, 72560, 88549 } The Babcock and Wilcox Company.

63651 Matchwel Electricals (India) Ltd.

Renewal Fees Paid

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 54943—Permacel Tape Corporation.

The patent ceased on the 19th July 1963, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 16th November 1963. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 25th March 1967.

(2)

Notice is hereby given that an application has been made under Section 16, of the Indian Patents and Designs Act, 1911 for the restoration of following patent:—

No. 60319—Hikohisa Ueyama.

The patent ceased on the 26th April 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 21st January 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933, at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 25th March 1967.

(3)

An order has been made on the 10th January 1967, restoring the patent No. 76289 dated as of the 19th April 1961, granted to Ram Singh and others for "brass cylinder with fixed socket used in water handpumps".

Registration of Designs

The following designs has been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under section 78-A of the Act.

Class 1. No. 128558. Nanalal Dayalal Vadgama, C/o. Vadgama Engineering Works, Bedeshawar Road, Jamnagar-1, Gujarat State, India, an Indian citizen. "Internal Combustion Engine", May 28, 1966.

Class 1. No. 128811. Raj Kumar Bhasin, Trading as Arcaby & Company (India), 27, Rajendra Market, Tis Hazari, Delhi-6, Indian National, "Electrical Switch Gear", June 30, 1966.

Class 1. No. 129015. Elegant Industries Private Limited (A company registered under the Indian companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Bracelet", July 25, 1966.

Class 1. No. 129016. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Rakhi", July 25, 1966.

Class 1. Nos. 129017 to 129021. Elegant Industries Private Limited (A company registered under the Indian companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Rakhi", July 25, 1966.

Class 1. No. 129023. Auto Importing Co., (An Indian partnership concern), Kashmeregate, Delhi, "Rear View Mirror" July 27, 1966.

Class 3. No. 128411. Kathryn & Sherbrock also trading as Kay Cosmetics, an Indian Partnership Firm, 4, National House, Tulloch Road, Bombay-1 (Maharashtra), "container", May 16, 1966.

Class 3. No. 128700. Qualitex Machinery (P) Ltd., (An Indian concern) at 6/13, Kirti Nagar, Industrial Area, New Delhi, "Seed cleaner and grader", June 18, 1966.

Class 3. No. 128741. Raman Scientific & Sales Corporation an Indian proprietory concern of 18/3, Shakti Nagar, Delhi (India), "Waterpump", June 27, 1966.

Class 3. No. 129032. Jolly Plastics, an Indian registered partnership firm, Indian Nationals of Unit No. 28, Hind Rajasthan Industrial Estate, Naigam Road, City of Bombay, State of Maharashtra, India, "Combs", July 28, 1966.

Class 3. No. 129042. Synthetic Moulders Limited, a company registered under the Indian Companies Act 53, Netaji Subhas Road, Calcutta 1, West Bengal, Indian, "Baskets for cycle handles", July 29, 1966.

Class 3. No. 129194. Modi Mohammed Zaheeruddin, sole proprietor, 35, Acharappan St., Madras 1, South India, Subject of the Indian Republic, "Polythylene flower", August 16, 1966.

Class 4. No. 129014. Mohsinbhai Mulla Abdulrahim Hajoori, Salabatpura Road, P. O. Box No. 17, Surat, State of Gujarat Indian National, "A bottle", July 23, 1966.

Class 4. Nos. 129033 and 129034. The Red Club Products Corporation, 19/21, Shakti Nagar, Delhi-6, Indian Partnership firm, "Bottles", July 28, 1966.

Class 10. No. 129003. Maharashtra Plastics, a partnership firm, 37/2, Shankar Seth Road, Navyug Studio Compound, Poona-2, Maharashtra, "Footwear", July 21, 1966.

Class 13. Nos. 128142 to 12846. The Bombay Dyeing & Mfg. Co. Ltd., An Indian Company incorporated in India Neville House, Ballard Estate, Bombay 1, "Cotton", April 1, 1966.

Class 13. Nos. 128238 to 128246. Podar Textile Mills, P.O. Khalsa College, Amritsar (Punjab), Indian Nationals, "Textile piecegoods", April 28, 1966.

Class 13. Nos. 128331 to 128335. H. A. Shah & Co., Partnership Concern, Indian, of Vasant Vijay Mills, "Vasant Vijay", 470/471, Worli Road, Bombay-18, (India), "Textile Goods", May 4. 1966.

Class 13. Nos. 128346 to 128350. The Victoria Mills Limited, an Indian Company situated at De Lisle Road, Parel, Bombay-13, "Textile piecegoods", May 5, 1967.

Class 13. Nos. 128353 and 128355 to 128360. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", May 6, 1966.

Class 13. Nos. 128548 to 128551. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, "Textile piecegoods", May 25, 1966.

Class 13. Nos. 128730 and 128731. The Victoria Mills Limited, an Indian Company, situated at De Lisle Road, Parel, Bombay-13, "Textile piecegoods", November 15, 1966.

Class 13. Nos. 129027 to 129031. The Bombay Dyeing & Mfg. Co., Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Bombay-1, "Cotton Textiles", July 27, 1966.

Class 13. Nos. 129045 and 129046. The Phoenix Mills Limited, an Indian Company, Tulsi Pipe Line Road, Lower Parel, Bombay-13, Maharashtra State, "Textile Goods", July 29, 1966.

Class 13. No. 129058. Messrs. The Ahmedabad Kaiser-I-Hind Mills Co., Ltd., an Indian Company, its registered office at Outside Raipur Gate, Ahmedabad-17, Gujarat State, "Textile Piecegoods", August 2, 1966.

Class 13. Nos. 129061 to 129063. The Khatau Makanji Spg. & Wvg. Co., Ltd. Laxmi Building: 6, Ballard Road, Bombay-1, Indian Company, "Textile Piecegoods", August 3, 19666.

Class 13. Nos. 129138 to 129141, 129143 to 129145 and 129147 to 129155. The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", August 8, 1966.

M. L. KAPOOR,
Controller General of Patents, Designs and Trade Marks.

THE PATENT OFFICE

Patents and Designs

Calcutta, the 18th February 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

28th January 1967

109075. G. C. Westmacott. Non-skid, non-telescoping-in-collision, railway trains. (27th January 1966).

109076. The Polymer Corporation. Coating composition.

109077. Chas Pfizer & Co., Inc. Imidazoles. [Addition to No. 102233].

109078. M. & T. Chemicals Inc. Process for preparing polyurethanes.

109079. Imperial Chemical Industries Limited. Granulation of thermoplastic materials. (3rd February 1966).

109080. Ahmedabad Textile Industry's Research Association. Method of and means for reducing spinning tension and increasing twist flow in ring spinning.

109081. The Textile & Allied Industries Research Organisation. Improved spinning and testing machine.

30th January 1967

109082. Council of Scientific and Industrial Research. A process for the production of active carbon from coconut shell.

109083. Council of Scientific and Industrial Research. A process for imparting simultaneous improvements in flex abrasion resistance, tear strength and wet crease shedding properties to cellulosic textiles.

109084. Mrs. Kamala Murthy and Y. N. S. Murthy. Making blocks from cast iron boring scrap to make it fit for re-melting in cupola.

109085. V. P. Dusaj and V. S. Dusaj. Improvements in or relating to hand compression sprayer. [Addition to No. 106708].

109086. Ciba Limited. Partial chlorination of acetoacetic acid monoalkylamides.

109087. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Profess for the manufacture of 17-ethylidene steroids.

109088. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Novel propinyl ethers and process for the manufacture thereof.

109089. International Electricals. Difierential protection relay.

109090. Ciba Limited. Manufacture of new 3-amino-steroids.

109091. Ciba Limited. Manufacture of new amino-steroids.

109092. Ampex Corporation. Head-to-tape velocity error compensator for rotary head video tape recorders.

109093. Kyowa Denki Kagaku Kabushiki Kaisha and Mitsubishi Yuka Kabushiki Kaisha. Improvements in or relating to a box for carrying bottles.

109094. Societe D'Etudes Scientifiques Et Industrielles De L'ile-De-France. Process for preparing 2-alkanoyl-4-halo-5-acylaminophenols.

109095. Societe D'Etudes Scientifiques Et Industrielles De L'Ile-De-France. Process for preparing 5-halosalicylic acid derivatives.

109096. Societa Farmaceutici Italia. Process for the preparation of a topical anaesthetic.

109097. United States Rubber Company. Improvements in alkylbenzyl adducts of polyethyleneimine and products thereof. [Addition to No. 99973].

109098. Mefina S. A. Adjusting system for universal motors.

109099. Imperial Chemical Industries Limited. Improvements in or relating to winding apparatus for filaments or yarns. (7th February 1966).

109100. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S.p.A. Process and installation for the industrial production of spinnable acrylonitrile-based polymers.

109101. American Cyanamid Company. An improved means for splitting animal intestines. (4th February 1966).

109102. General Time Corporation. Improvements in or relating to electronic counters.

109103. Thakur Prasad Sao. Building structures made from corrugated asbestos sheets. [Divisional date 31st May 1965].

109104. P. Singh. Weighing balance scales.

31st January 1967

109105. E. C. Hahn. Automatic lathe. (20th December 1966).

109106. Archer Daniels Midland Company. Process for forming foundry cores [Divisional date 21st May 1965].

109107. The Dunlop Company Limited. Bonded articles.

109108. C. A. V. Limited. Liquid fuel injection pumps. (8th February 1966). [Addition to No. 78206].

109109. Richardson-Merrell Inc. Heterocyclic derivatives of triphenyle-thylenes, triphenylethanes and triphenylethanols including salts and derivatives thereof.

109110. Rohm and Haas Company. Emulsion polymers.

109111. Lansing Bagnall Limited. Improvements in or relating to power assisted vehicles. (7th February 1966).

109112. DSO "Pharmachim". Method and remedy for the treatment of neoplasms and method for obtaining it.

109113. United States Borax and Chemical Corporation. Herbicidal compounds and use thereof.

109114. Fisons Pest Control Limited. Process for the preparation of the substituted benzimidazoles. (27th May 1964). [Divisional date 17th May 1965].

109115. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of and devices for producing cold, more particularly at very low temperatures.

109116. N. V. Philips Gloeilampenfabrieken. Pharmaceutical compositions.

109117. Midland-Ross Corporation. Fixed jaw railway vehicle coupler.

109118. Mitsui Petrochemical Industries, Limited. Method of manufacture of terephthalic acid.

109119. Monsanto Company. α-chlloroacetamides and phytotoxic compositions.

109120. Dr. C. Otto & Comp. G.m.b.H. A door for horizontal coke ovens.

109121. Yoyo Koatsu Industries, Incorporated. Method of refining ethanol.

109122. H. Weiste. Method of sowing corn and/or spreading granular fertilizer, and devices for carrying out this method.

109123. Ciba Limited. Process for the manufacture of monohalogeno-N-alkyl-acetoacetamides.

109124. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Poultry feed.

109125. Politechnika Warszawska. Method for producing anticorrosive hot-dip strippable coating material.

1st February 1967

109126. Dana Corporation. Improvements in or relating to improved means for securing a pair of members against relative axial movement.

109127. Imperial Chemical Industries Limited. Apparatus for locating explosive charges. (7th February 1966).

109128. The Dunlop Company Limited. Improvements in and relating to bonding. (10th February 1966).

109129. Jervis B. Webb Company. Carrier transfer device for conveyors.

109130. Rohm and Haas Company. Heterocyclic esters.

109131. Standard Telephones and Cables Limited. Electric cables. (2nd February 1966).

109132. Pilkington Brothers Limited. Improvements in or relating to the manufacture of flat glass. (2nd February 1966).

109133. Kaiser Aluminum & Chemical Corporation. Method and apparatus for melting metal.

109134. Pirelli Societa Per Azioni. Replaceable tread pneumatic tyres. (24th January 1967).

109135. Pirelli Societa Per Azioni. Pneumatic tyres of the replaceable tread type. (24th January 1967).

109136. Kurashiki Rayon Co., Ltd. Method of producing polyvinyl alcohol fibre.

109137. N. V. Philips Gloeilampenfabricken. Compounds having a central depressive activity.

109138. N. V. Philips Gloeilampenfabricken. Improvements in or relating to light sources of the kind comprising a gas discharge tube.

2nd February 1967

109139. R. S. Tewari. Cheapest electric set.

109140. Fiat Societa Per Azioni. Fuel-injection pump for multi-cylinder internal combustion engines.

109141. G. Fronza. Kitchen pot having a thermal heat insulating and heat concentrating bell, especially meant for cooking foodstuffs, sterilisation and washing.

109142. Ciba of India Limited. Process for the manufacture of sulphur heterocyclic compounds.

109143. Joseph Lucas (Industries) Limited. Spark ignition apparatus for internal combustion engines. (16th February 1966).

109144. Maschinenfabrik Benninger A.G. An improved yarn tensioning device.

109145. The Dunlop Company Limited. Moulding apparatus.

190146. United States Steel Corporation. Method and apparatus for continuously electroplating a metallic strip.

3rd February 1967

109147. K. Watumull. Improvements in or relating to refil type ball point pencil or the like.

109148. P. G. Gogate. Improvements in or relating to a foot valve at the suction end of pumps.

109149. V. S. Palepu. Improvements in or relating to threshing machines and the like.

109150. McDowell-Wellman Engineering Company. Circular travelling grate machine.

109151. J. R. Chhabra. A device for improving the efficiency and performance of internal combustion engine and more particularly the mixture.

109152. Ciba Limited. Manufacture of new sugar derivatives.

109153. Carding Specialists (Canada) Limited. Improvements in or relating to textile sliver coiling means. (4th February 1966).

109154. Palitex Project-Company G.m.b.H. Protective cage for multiple spindles.

109155. The British Petroleum Company Limited. Composition comprising urea. (18th February 1966).

109156. Unique Products. Improvements in or relating to gadgets for self hair dresser. [Addition to No. 105878].

109157. Mead Johnson & Company. Process for the preparation of 1-aminoalykyl-1-arylindenes and 1-aminoalkyl-1-arylindanes and products produced thereby.

109158. Murgatroyd's Salt and Chemical Company Limited. Improvements in or relating to electrolytic diaphragm cells. (25th February 1966).

109159. Yarway Corporation. Pump.

109160. Halcon International Inc. Chemical process.

109161. Glaverbel. Improvements in or relating to the manufacture of flat glass.

109162. J. R. Geigy A. G. Process for the production of new aminocarboxylic acid esters.

109163. Lansing Bagnall Limited. Improvements in or relating to pedal control mechanisms. (9th February 1966).

109164. The Tata Iron and Steel Company Limited. Machine for facing the housings of rolling mills.

109165. R. K. Malhotra. A box for packing and dispensing safety razor blades.

109166. M. L. Kumria. Indoor game.

Alteration of Dates

100635. The claim to priority date 6th August 1964 has withdrawn and the application dated as of 16th July 1965, the date of filing in India.

100857. The claim to priority date 30th October 1964 has been disallowed and the application dated as of 29th July 1965, the date of filing in India.

108350. Ante-dated to 28th April 1965 under Section 5 of the Act.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notive to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

96699. Aktiebolaget Bofors. A cartridge hoisting device for an automatic gun. Accepted on 25th January 1967.

Hoisting apparatus for an automatic gun comprising a cartridge magazine having a comparatively substantial dimension in the vertical direction and having an outlet port located at the bottom thereof through which cartridges are fed forth one by one to be conveyed to the cartridge-guide.

99109. B. K. Sehgal. A hypodermic syringe. Accepted on 21st January 1967.

Being provided with a transfarent barrel mounted in an outer tube to hold the nozzle at one end and the cap at the other end, said outer tube being provided with slot/slots.

99116. Soletanche. An obturating device for the injection of cement into a hole for the purpose of strengthening the ground or a solid mass of masonry. Accepted on 21st January 1967.

Comprising an elastic hollow inflatable sealing element and a series of pipe means or tubes having a distributor provided with a closable outlet an alternative outlet being provided at the lower part of the sealing device and controlled by a valve.

99122. Crucible Steel Company of America. Alloy Steel. Accepted on 21st January 1967.

Having improved tool applicability containing in addition to iron and incidental impurities and minor optional ingradients in percentage by weight chromium 2·5 to 5·5%, molubdenum 2·0 to 5·0%, vanadium 0·75 to 2·0%, carbon 0·85 to 1·30%, tungsten 0·15 to 0·5%.

99124. R. Prasad. Improvements in or relating to bricks and walls, pillars, pavements and like structures built up with such bricks. Accepted on 25th October 1966.

Having a cavity catanding longitudinally in the lower half of its front face from one end to the other end thereof.

99141. The English Electric Company Limited. Protective relay apparatus. (28th April 1964). Accepted on 24th January 1967.

Comprising first means for developing two signals, second means for producing at least one signal, a phase sequence comperator for receiving all said signals causing relay to operate.

99160. M & T Chemicals Inc. Process of separating tetramethyltin from its solutions and production of tetramethyltin. Accepted on 24th January 1967.

Comprising contacting a solution containing tetramethyltin and at least one meterial selected from methyltin halides and separating the tetramethyltin phase from water phase.

99162. Smt. Ratna Sen. A cap or closure for bottles, containers and the like. Accepted on 24th January 1967.

Comprising two metallic shells one within the other end the inner one having means for engaging neck of a bottle, the free end portion of one of which shell is bent over to enclose and hold the free end portion of the other one, thereby securing both the shells together.

99170. Aluminium Laboratories Limited. Removal of dross from molten metal. Accepted on 24th January 1967.

By an apparatus comprising an enclosed vessel, means defining a pool located within said enclosed vessel, a passage bellow a predetermined level connecting said pool with a well means for propelling molten metal and supernatant dross said well being further connected with in said enclosed vessel.

99184. Nee & Mcnulty, Inc., and Mr. A. Mcilory. Wrapped conduit and method. Accepted on 25th January 1967.

Comprises affixing the free ends of a plurality of layers of protective material arranging the layers and thereafter spirally wrapping said conduit.

99185. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Water-soluble monoazo-dyestuffs and process for preparing them. Accepted on 27th January 1967.

Naphthylamine disulfonic acid are diazotised and coupled with a pyrazolone derivative and then esterified with concentrated sulphuric acid or an agent yielding sulphur troxide.

99189. Stora Kopparbergs Bergslags Aktiebolag. A method for the production of liquid iron carbon alloys. Accepted on 27th January 1967.

Wherein melting is carried out in an excess of carbonaceous material and oxygen-containg gass is introduced into the furnace space above the cover of carbon.

99224. Bladkstone Corporation. Cast ferrous material of high magnetic permeability and method of making same. Accepted on 27th January 1967.

By forming a mixture comprising 0·5% to 1·15% carbon 2·5% to 4·5% silicon, upto 0·05% chromium, upto 0·03% sulphur upto 0·05% phosphorus, upto 0·6% manganese and the balance iron, adding to said composition magnesium, cooling said composition and annealing by a malleable iron heat treating cycle to convert the carbon to temper carbon.

99253. Rohm & Haas Company. Novel N-alkylmorpholinone esters useful as additives in lubricants and liquid fuel compositions and method for the preparation of such esters. Accepted on 28th January 1967.

Reacting a olifeinic succinic anhydride with N (2-hydroxyethyl)-2-morpholinone.

99273. M & T Chemicals Inc. Process for the preparation of alkaline tin oxide sol and a method for tinplating. Accepted on 30th January 1967.

Comprises electrodepositing tin from an alkali metal stannate bath containing an insoluble anode and a cathode thereby depleting the tin content of said bath and replenishing the tin content of said bath by adding an alkaline tin oxide sol contaning crystallinecrystallite stannie oxide.

99274. M & T Chemicals Inc. Process for preparation of organotin compounds. Accepted on 30th January 1967.

Dicyclohexyltin dichloride and cyclohexyl magnesium chloride are reacted.

99275. M & T Chemicals Inc. Method of electrodepositing tin-bismuth alloy plate and novel bath therefor. Accepted on 30th January 1967.

Article to be plated is immersed in an aqueous plating bath containing alkali metal stannate, free alkali metal hydroxide and hydroxy alkyl bismuthate and electrodeposited as cathode in the said bath.

99276. M & T Chemicals Inc. Novel plating process and composition. Accepted on 30th January 1967.

The article is immersed in an aqueous tinning bath containing a stannate salt an alkali metal polyphosphate and at least one soluble organic compound selected from the group consisting of alkylene polyamines, aminocarboxylic acids and amino alcohols.

99277. M & T Chemicals Inc. Preparation of organotin compounds. Accepted on 30th January 1967.

Anhydrous stannous chloride and anhydrous normal butyl chloride are reacted in the presence of aniline catalyst.

99282. Imperial Chemical Industries Limited. Treatment of shaped articles composed of synthetic linear polyamides. (8th May 1964). Accepted on 30th January 1967.

Comprises heating the synthetic linear polyamide articles in contact with a polyalkyleneoxy compound and an antioxidant.

99286. The Plessey Company Limited. Improvements in or relating to thermoelectric devices. (1st May 1964). Accepted on 30th January 1967.

Includes at least a pair of elements having a common junction, said elements consisting essentially of germaniumsilicon alloy together with doping impurities.

99301. Esso Research and Engineering Company. An oil composition for improving the saccharose yield from sugar producing plants. Accepted on 30th January 1967.

Comprising an admixture of mineral oils of boiling range 300-5800° F. viseosity of 50-157 SUS at 100° CC, and specific gravity of 0·840-0·880 and aromatic content below 26% by weight.

99305. Bridgeport-Brass S.p.A. Valve in plastic material for inner tubes of car or bicycle tyres. Accepted on 27th January 1967.

Comprising a main body having a blange at one end and an extension of reduced diameter at other end over which an anti dust cap may be screwed.

99357. Liquid Controls Corporation. Liquid transmission system. Accepted on 3rd February 1967.

Comprising an air eliminator a meter connected to the downstream side of the air eliminator, a check valve and a cut-off valve connected downstream of said check valve.

99359. Albiswerk Zurich Aktiengesellschaft. Automatic frequency locking arrangement. (8th March 1965). Accepted on 3rd February 1967.

Provided with automatic frequency control means having sweep generator including a storage capacitor via a charging transistor.

99421. Siemens & Halske Aktiengesellschaft. Improvements in or relating to electromechanical transducers. (26th February 1965). Accepted on 3rd February 1967.

Includes a semiconductor body of first conductivity having a region of second conductivity between two ohmic connections.

99487. M. D. Bhate. Automatic indicator for indicating gas contents of gas bottles. Accepted on 3rd February 1967.

Comprises a platform link and ratchet mechanism an entended arm and a pointer.

99488. Polymer Corporation Limited. Elastic synthetic rubber composition, oil-resistant elastic films thereof and process for the preparation of elastic shaped products therefrom. (26th May 1964). Accepted on 27th January 1967.

An elastic synthetic rubber composition comprising a vulcanized mixture containing a rubbery copolymer of a 2-alkyl butadiene-1·3 and at least one nonionizable polar comonomer.

99590. Council of Scientific and Industrial Research. Process for the manufacture of a novel binding agent for core sand. Accepted in 27th January 1967.

Consisting in reacting sulphite lye with mineral acid or acidic substance followed by neutralization with triethanolamine with or without the addition of a corrosion inhibitar.

99661. Chas Pfizer & Co., Inc. A method of sizing polyolefin yarn and yarn so sized. Accepted on 1st February 1967.

The yarn is treated with a sizing agent comprising a polymeric material prepared by polymerizing itaconic acid with acrylic acid.

99724. D. R. Campbell. Conveying apparatus for conveying flowable materials. Accepted on 3rd February 1967.

Comprising a conduit having feed and discharge ends a conveyer belt trained through said conduit.

99728. J. R. Geigy A. G. Process for the production of pyrazoline compounds the compounds so prepared and washing agents, washing liquors and detergents containing then. Accepted on 1st February 1967.

3-chlorophenyl hydrazine hydrochloride is reacted with P-chlorophenyl-propenyl ketone.

99811. M. M. Lall. A device to prevent overboiling and spilling of liquid and paste. Accepted on 3rd February 1967.

Comprises an inclinably disposed disc of heat proof glass having an annular ridge, projecting from either face.

99812. Thakur Prasad Sao. Machine for the manufacture of asbestos cement sheets and like products. Accepted on 30th January 1967.

Wherein are employed a series of vats, each vat is independently provided with rollers or skates preferably mounted on rails for facilitating cleaning of sieve cylinder.

100129. Imperial Chemical Industries Limited. Process for the reductive dimerisation of olefinic nitriles. (2nd July 1964). Accepted on 17th December 1966.

αβ—olefinically unsaturated nitrile is treated with an alkali or alkaline earth metal amalgam in an aqueous medium containing a sulphonic acid or a soluble salt thereof.

100250. Ansor Corporation. Copper recovery process. Accepted on 30th January 1967.

Comprises taking aqueous solution of copper nitrate, treating at least a portion with ammonia to obtain cupric ammonium nitrate complex, treating the complex with sulphur dioxide to form a crystalline solid, whereafter the crystalline solid is treated with sulphuric acid or oxidizing agent to obtain metallic copper.

100495. Allied Chemical Corporation. Solubilised fumaric acid compositions. Accepted on 30th January 1967.

Comprising ultrafine fumaric acid and an anionic or non-ionic surfactant.

100622. Polymer Corporation Limited. Blends of elastomers and vulcanized compositions obtained therefrom. (29th July 1964). Accepted on 16th January 1967.

Comprises a polymeric product which has pendent unsaturation and a polymeric product selected from rubbery polydienes and the polymeric products obtainable by the polymerization of a mixture comprising isobutylene and a polyolefinically unsaturated hydrocarbon.

100635. Imperial Chemical Industries Limited. Manufecture of polyarylsulphones. Accepted on 16th January 1967.

Reacting an anomatic sulphonyl halide and/or a mixture of reagents of di-sulphonyl halide and aromatic sulfonyl halide at a temperature not excluding 160° C in solution in a introbenzene using lewis acid as a catalyst.

100657. Asahi Kasei Kogyo Kabushiki Kaisha. Method of and apparatus for automatically controlling scouring pressure in pressure scouring of cakes. Accepted on 19th January 1967.

Comprising the steps of detecting the pressure of the scouring liquid within cakes, program controlling the pressure of the scouring liquid within the cakes.

100687. Erba Maschinenbau Ag. Method and device for transferring stitches both laterally and transversely on hand knitting machines. Accepted on 20th January 1967.

Including at least one stitch transfer mechanism having spaced parallel stitch transfer elements.

100689. Dunlop Rubber Company Limited. Improvements in or relating to vulcanisation. Accepted on 20th January 1967.

Comprising treating a film of chlorosulfonated polyethylene composition with a solution comprising an aliphatic polyamine or polyamide having at least one free amine group in the chain as the vulcanising ingredient.

100723. Airace Limited. A machine for cutting or trimming the tops of hedges or closely planted bushes. (22nd July 1964). Accepted on 21st January 1967.

Comprising a body a cutter head pivotally connected to the body and means for propelling the body.

100724. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Process for the oxidation of hydrocarbons. Accepted on 21st January 1967.

The cyclic and acyclic saturated hydrocarbons are brought into contact with gas containing molecular oxygen in the liquid phase at a temperature of 100 to 200° C.

100726. Automation Industries, Inc. Apparatus for induction rail testing. Accepted on 21st January 1967.

Comprising an inspection car having flanged wheels, direct current generator means, first conductor means connected to first wheel second conductor means connected to second wheel for the return of current detection means positioned adjacent said rail and between first and second wheel to detect the variation in the magnetic field surround said rail.

100758. Chemcell (1963) Limited. Yarn manufacture. (24th July 1964). Accepted on 24th January 1967.

Comprising melt extruding a group of filaments and forming a curtain of cooling gas which surrounding the group of filaments whereby each filament is preferentially cooled.

100763. Aluminium Laboratories Limited. Apparatus for splashing liquids. Accepted on 24th January 1967.

Edges of the vanes lie on a common surface of revolution, the width of the vanes decreasing progressively from the axis of the impeller to the periphery of the base plate.

100770. Allis-Chalmers Manufacturing Company. A distributing device for a conveyor. Accepted on 24th January 1967.

Characterised by an impact plate and a vertical half frustrum of a right circular cone distributor, positioned above the conveyor.

100778. Hindustan Steel Limited. A jointing material for use in the recuperators in the soaking pits viz chromesil. Accepted on 27th January 1967.

Comprising of chromefines 98%, fenosilicon 30 B.S.S. 2% and sodium silicate of 1·3 Sp. gravity.

100782. The Pyrene Company Limited. Improvements in the coating of metals. (13th August 1964). Accepted on 27th January 1967.

By treating the surface with zinc phosphate coating solution to form a coating and then making the same cathode to get zinc deposited.

100788. The Emico Corporation. Horizontal vacuum filter. Accepted on 27th January 1967.

Comprising a frame, a pair of rollers, an endless flexible drainage deck on the said rollers, a filter web overlying the drainage deck, a vacuum source to draw filtrate through said web.

100794. United Shoe Machinery Corporation. Improvements in strong fibrous sheet material and method of making the same. [Addition to No. 86180]. Accepted on 27th January 1967.

Comprises penetrating intermeshed fibrous mat with aquous collogen suspension and removing swelling water from collagen to reaggregate into a larger collagen fiber structure reinforcing the intermeshed fibers.

100808. General Electric Company. An electrically conductive polymer composition and process thereof. Accepted on 27th January 1967.

7, 7, 8, 8-tetracyanoquinodimethan is added to a salt whose cation moiety is a soluble polymer having quaternary nitrogen cationic groups and whose anion moiety is the anion of 7, 7, 8, 8-tetracyanoquinodimethan.

100821. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Phosphoric acid alkyl amides and process for preparing them. Accepted on 27th January 1967.

Comprising reacting a primary or secondary fatty amine with 8 to 22 carbon atoms in the alkyl group with phosphorus pentoxide at 60°-220° C until a limpid melt is got.

100846. Kabushiki Kaisha Hitachi Seisakusho. Negative abruptly changing resistor in which vanadium oxide semiconductors are used. Accepted on 27th January 1967.

Comprising fine grains of vanadium dioxide crystals surrounded by a sintered oxide member and a material to cause in said crystal a solid solution, the electric resistance of the said crystal being abruptly variable within a certain temperature range.

100847. Farbenfabriken Bayer Aktiengesellschaft. Dyestuffs. (9th April 1965). Accepted on 28th January 1967.

Reactiong a cyclic lactam with an indole derinative.

100857. Cluett, Peabody & Co., Inc. Compressive shrinking of textile fabrics. Accepted on 30th January 1967.

Comprises subjecting the two-ply sheet formed of two webs plasticised by conditioning, to compressing length wise shrinking by confining it under pressure between a moving heated surface and a moving belt, separating the webs and drying.

100859. Dow Corning Corporation. Catheters. Accepted on 24th January 1967.

A cathelar made of organic rubber or like wherein the surface of the cathetar is coated and covered with a cured, elastomeric silicone.

100888. Kurashiki Rayon Co., Ltd. Process for continuous treatment of endless tows of fibres. Accepted on 31st January 1967.

Dropping a tow together with a treating solution on a bath, separating the filaments by impact on the liquid surface of the bath, effecting the reaction of the filament and paralleling the filaments to a low form.

100890. General Electric Company. Improvements in or relating to a composition comprising a nitrogen containing polymer, an electronically conductive fiber comprising said composition and process of making said fiber. Accepted on 28th January 1967.

Comprising a nitrogen containing polymer, a salt of 7, 7, 8, 8-tetracyano quinodimethan anion and 7, 7, 8, 8-tetracyanoquinodimethan.

100899. Canadian Industries Limited. Foamable compositions. (18th August 1964). Accepted on 24th January 1967.

Consists of at least one polymerisable vinyl ether containing dihydropyranyl groups linked by ester groups at least one polymerisable vinyl ether constituted by the aldol condensation product of a dihydropyran carboxaldehyde a foaming agent and a catalyst.

100903. The English Electric Company Limited. Speed reference signal producing apparatus for a closed loop control system. (5th August 1964). Accepted on 2nd February 1967.

Comprising a pulse generator for producing pulse representing travel of the load, counting means for counting the pulses, translating means for receiving the out put signal and for producing speed reference signal.

100909. Knapsack Aktiengesellschaft. Process and apparatus for cracking hydrocarbons with an electric arc. Accepted on 2nd February 1967.

Hydrogen is being introduced into an arc zone, heated therein and conveyed into a reaction zone to react with two streams of feed hydrocarbons in vapour form, cracked products results after quenching.

101091. M. Limited. Hydraulic control system for attachment to a machine tool. Accepted on 30th January 1967.

Control means for attachment to a machni tool, the relative movements of a tool and workpiece being connected to correspond to the relative movements of a pattern and tracer and wherein a sensing device usually a stylus forming part of said tracer controls such relative movement in two directions in accord with its deflection.

101095. Halcon International Inc. Method of dehydrating orthoboric acid. Accepted on 3rd February 1967.

Dehydrating a slurry of orthoboric acid in an organic liquid which is a hydrocarbon having 4 to 30 carbon atoms at temperature 110° to 160° C.

101120. Dominion Magnesium Limited. Purifying device for magnesium production retort. (26th October 1964). Accepted on 31st January 1967.

A purifying device for magnesium producing retorts comprises a cylindrical housing with perforated end walls having therein a body extending approximately having therein multiplicity of communicating passages.

101135. Allied Chemical Corporation. Fluorocarbon compositions. Accepted on 2nd February 1967.

A low boiling composition consists of a mixture of trichloromethane and monochloromethane the molar percentage of the former in the mixture being 20 to 75.

101174. F. T. Khorakiwala. Improved spring board files and lamps for same. Accepted on 27th January 1967.

The clamp comprising a base plate member, with an upwardly extending flange member, a clamp member two S-shaped lever, each rotatably held at the lower limb, one of the S-levers being spring loaded, a notch or like carrying member projecting from said base plate member, one of the end of the spring biasing the said S-lever forming a handle bar.

101369. Westinghouse Electric Corporation. Television multi-audio systems. Accepted on 30th January 1967.

Comprising a transmitter and at least one receiver said transmitter includes means for receiving at least two audio frequency signals, means for providing a carrier wave means for modulation, means for suppressing said carrier wave.

101402. Dunlop Rubber Company Limited. Adhesive compositions. (18th September 1964). Accepted on 28th January 1967.

Comprising fully cross linked reaction product of one or more polyols having at least three hydroxyl groups per molecule and an organic polyisocyanate.

101535. Asahi Kasei Kogyo Kabushiki Kaisha. Method for doffing the yarn being spun on rayon spinning machines. Accepted on 30th January 1967.

Comprising temporarily reducing the normal operating speeds of the spinning machine and pots to predetermined low values at equal rate.

101572. Ciba Limited. New water-insoluble anthraquinone dyestuffs, process for their manufacture, and polyester fibers dyed or printed therewith. Accepted on 30th January 1967.

By treating dihydroxydiaminoanthraquinone with hydroxyalkylating agent.

101587. The Indian Cardboard Industries Ltd. Reinforced tubular bodies of paper, board and the like. Accepted on 30th January 1967.

Comprises a plurality of laminated paper layers with a metal strip helically wound over at least one of the said layers.

101598. J. L. Mulvaney. Free end beans converted to prestressed end beams. Accepted on 28th January 1967.

Comprising precasting a T shaped beam having its top solid flange projecting beyond its web at each end of the beam to form lips at said ends, slipping the beam into position between two supports and driving a wedge in the gap formed at each said end between the vertical face of the support and the lip resting on said support.

101604. The British Cotton & Wool Dyers Association Limited. Improvements in process and apparatus for treating textile materials. (18th September 1964). Accepted on 1st February 1967.

Comprising moving the material through a treatment zone under the motion inducing influence of a flow of treating liquor.

101788. Ciba Limited. Herbicidal compositions containing substituted ureas and thioureas. Accepted on 30th January 1967.

Comprising urea of formula $C_6H_4(A)$-NH-C(X)-NR 1 R_2, admixed with carrier, X being oxygen or sulphur A is halogen R is hydrogen or as R_2 alkyl.

101798. International Business Machines Corporation. Improvements in or relating to data transmission systems. Accepted on 3rd February 1967.

Comprising means for selecting a first group of signal elements, means for selecting a second group and means for combining the signals.

101833. V. S. Vaidya. Improvements in collapsible shelter. Accepted on 3rd February 1967.

Characterised by reinforcing ribs passing through loops stitched to the outer surface of the fabric cordages each having one end fastened to the ribs and the other to a figure enclosed in the ground.

101896. The English Electric Company Limited. Direct Current electric motor equipments. (7th October 1964). Accepted on 28th January 1967.

Comprising a d.c. motor, armature supply transformer, current converter, field reversal controller first and second signal swamping signal speed error signal.

101990. Rhone-Poulenc S.A. Process for the preparation of unsaturated organosilicon compounds. Accepted on 28th January 1967.

Reacting organosilicon compound containing a chlorine atom attched to a silicon atom with an aldehyde or ketone contalning an enolisable carboxyl group in the presence of zinc chloride and an acid binding agent.

102132. M. Singh. Spring hangers or shock observers for pipelines. Accepted on 30th January 1967.

A vertically hung tubular body, a vertically disposed main load carrying rod passing through the said tubular body, a main helical spring disposed around the upper half of the main load carrying rod, a subsidiary small helical spring disposed around the lower half of the load carrying rod, and a second load carrying rod fitted to the lower end of the main load carrying rod.

102135. E.Q. Sylvester. Mold purging apparatus and method. Accepted on 27th January 1967.

Having a bottom pouring opening, means for introducing inert gas through said bottom pouring opening, and means for closing the bottom pouring opening.

102159. M. Singh. Spring hanger or shock absorber for pipelines. Accepted on 30th January 1967.

A vertically hung tubular body, a vertically disposed turn buckle inside the said tubular body, the said turn buckle being adapted to move vertically up and down under the influence of a helical spring coiled around it and two load carrying rod.

102618. Shell Internationale Research Maatschappij N. V. Morring buoy for loading and/or unloading ships. Accepted on 30th January 1967.

Central pipe swivel, an uppen part rotatable around a central vertial axis of the buoy and means for securing mooring lines of a ship there to comprising at least one mooring arm secured by one end to the buoy in such a way that it is rotatable around the central vertical axis.

102788. Vidor Limited. Dry galvanic batteries. Accepted on 30th January 1967.

Comprises a stack of layer type cells, in which open ends of sleeve are curled over edges of plates to urge electrical connections from terminals into electrical contact with the stack.

102937. Corning Glass Works. Injection molding ceramic articles. Accepted on 31st January 1967.

Making ceramic article comprises preparing an injection molding batch composition consisting of comminuted ceramic, organic binder colloidal ceramic heating, cooling to harden heating to drive organic binder, firing to sinter.

103117. Joseph Lucas (Industries) Limited. Full wave rectifiers. (23rd December 1964). Accepted on 28th January 1967.

Comprising seven electrically conductive plates which are separated by diode assemblies.

103224. Conzinc Riotinto of Australia Limited and Commonwealth Scientific and Industrial Research Organization. Production of aluminium and aluminium alloys from alluminium chloride. (30th December 1964). Accepted on 31st January 1967.

Electrolytic production of aluminium which comprises electrolysing a fused salts of alkali metal halide or alkaline earth metal halide or rare earth metal halide and chloride of a netallic reductant, cathode a molten metal or alloy.

108350. Rohm and Haas Company. Lubricant compositions [Divisional date 28h April, 1965]. Accepted on 28th January 1967.

Lubricating composition comprising one or more N-alkyl-morplolinone esters and a lubricant.

Opposition Proceedings

(1)

The application for patent No. 75949 made by Woods of Colchester Ltd., in respect of which an opposition was entered by Indian Tea Association, as advertised in Part III, Section 2 of the Gazette of India, dated the 1st June 1963, has been treated as abandoned.

(2)

An opposition has been entered by Lal Chand Khanna to the grant of a patent on application No. 98211 made by Chandramohan Rammohan.

Correction of Clerical Error

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical error occurring in the specification in respect of patent application No. 98919 was corrected on 31st January 1967.

Amendment Proceedings

The amendment proposed by Secony Mobil Oil Company, Inc., in respect of patent application 96159 as advertised in the Gazette of India Part III, Section 2, dated the 27th August 1966 has been allowed.

Registration of Assignments, Licences Etc. (Patents)

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

92063. M/s. Compagnie Francaise Thomson-Houston.

92867. M/s. Palitex Project-Company, G.m.b.H.

80507. M/s. Leesona Corporation.

83199. M/s. Prodorite Limited.

55595. M/s. Filtration & Water Softening Proprietary Limited.

45467., 52929 } M/s. Powder Couplings Limited.

60655., 68442., 68443, 68444, 70062, 72560, 88549 } Stewarts and Lloyds Limited (Licences)

82640., 90066. } Thor Power Tool Company.

69453. M/s. Ciba of India Limited.

58888. M/s. South African inventions Development Corporation.

81649. M/s. Gelenkwellenbau G.m.b.H.

57580. M/s. Grefco, Inc.

96540. M/s. American Factors Associates Limited.

83958., 83959., 93299. } M/s. Kaiser Aluminum & Chemical Corporation.

81819. M/s. Guest, Keen, Williams Limited.

89622. M/s. The Nash Engineering Company.

83528. M/s. Societe Des Accumulateurs Fixes Et De Traction.

85871. M/s. Toyo Koatsu Industries, Incorporated.

92357. M/s. A.T. Gooyee Metal Works, Private, Limited.

68540. M/s. Massey-Ferguson-Perkins Limited. C/o M/s. Remfry & Son, Calcutta.

Cessation of Patents

66687. 78069. 81022.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 57012—Dalmia Cement (Bharat) Limited.

The patent ceased on the 9th April 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 3rd September 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 1st April, 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 of the restoration of the following patent :—

No. 70531—Puran Chand Sawhney

The patent ceased on the 1st January 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 11th September 1965. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 1st April 1967.

(3)

An order has been made on the 30th January 1967, restoring the patent No. 70948 dated as of the 2nd March 1960, granted to Chemical Construction Corporation for "process for synthesizing urea".

(4)

An order has been made on the 24th January 1967 restoring the Patent No. 79206 dated as of the 28th November 1960 granted to The British Oxygen Company Limited for treatment of molten ferrous metal."

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. Nos. 129217 to 129220. Elegant Industries Private Limited. (A company registered under the Indian Companies Act), Udyog Bnawan, 250-D Worli, Bombay 18 (Maharashtra), "Ear top", August 18, 1966.

Class 1. Nos. 129221 to 129233. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Udyog Bhavan 250-D, Worli, Bombay 18 (Maharashtra), "Brooch" August 18, 1966.

Class 1. No. 129224. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Necklace", August 18, 1966.

Class 3. No. 129225. Asian Advertisers, an Indian partnership Firm, 191, Kalbadevi Road, Bombay 2, (Maharashtra), "Pen stand", August 18, 1966.

Class 3. No. 129287. Daulat Ram Om Prakash, 4191, Barna Street, Bara Tooti Chowk, Sadar Bazar, Delhi, An Indian Partnership concern, "Viewer", September 2, 1966.

Class 13. Nos. 129040. and 129041. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian "Textile goods", July 29, 1966.

Class 13. Nos. 129195 to 129198. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Bombay 1, "Cotton textiles", August 6, 1966.

Class 13. Nos. 129201 to 129204 and 129208 to 129215. The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile Goods", August 18, 1966.

Class 13. No. 129229. The Victoria Mills Limited, an Indian Company, at Delisle Road, Parel, Bombay-13, "Textile Piecegoods", August 19, 1966.

Class 13. Nos. 129382. and 129383. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile Goods", September 6, 1966.

Class 13. Nos. 129397 to 129407. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay 1, Indian Company, "Textile Piecegoods", September 12, 1966.

Class 14. No. 129207. The Sassoon Spg. & Wvg. Co. Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, 'Textile Goods", August 17, 1966.

Cancellation of the Registration of Designs'

'An application has been filed by Ladharam Kishandas and Lachmandas Kishandas for cancellation of the registration of designs No. 128369 in the name of M/s. Aurobrite (India) Private Limited."

CORRIGENDUM

In the Gazette of India, Part III, Section 2, dated the 7th May, 1966, page 170, column 2, under the heading "Applications for Patents" :—

Against :—

Application No. 104934, *add* Ante-dated to 11th March 1966.

Application No. 104935, *add* Ante-dated to 11th March 1966.

Application No. 104936, *add* Ante-dated to 11th March 1966.

Application No. 104937, *add* Ante-dated to 11th March 1966.

Application for Patents

The dates shown i n crescent vrackets are the date claimed under Section 78A of the Act.

4th February 1967

109167. S. C. Gupta, and N. A. Ramaiah. Improvement in the process of manufacture of active carbon from cellulosic materials like bagasse, paddy husk etc.

109168. S. M. Ebrahim. Improvements in or relating to photocophying apparatus.

109169. Ciba Limited. Manufacture of new peptides having acth-activity. (Addition to No. 95474).

109170. F. Hoffmann-la Roche & Co. Aktiengesellschaft. Heterocyclic compounds and process for the manufacture thereof.

109170. Davidson & Co. Limited. Improvements in or relating to Fan or Blowers. (6th December, 1966).

109172. Josef Streule, and Blasius Brot. Cigarette of cigar filter.

109173. Maschinenfabrik Augsburg-Nurnberg Aktiengeselischaft. Mixed cycle fuel-injection internal-combustion engine with combustion chamber arranged in the piston crown.

109174. The Dow Chemical Company. Process for manufacturing non-woven fibrous products from gel fibers.

109175. Mobil Oil Corporation. Growing increased yields of microorganisms.

109176. Ciba Limited. Process for the manufacture of acetylene compounds.

109177. Indian Oxygen Limited. Material subject to thermal shock and contraction stress at low temperatures and to articles made therefrom. (11th February 1966).

109178. Farbenfabriken Bayer Aktiengesellschaft. Antistatic thermoplastic copolymers.

109179. Farbenfabriken Bayer Aktiengesellchaft. Dyeing shaped articles of polycrylonitrile. (27th September 1966).

109180. Amsons Industries. Improvements in or relating to constructional elements

6th February 1967

109181. Mr. Nargis Sami Engineer. Improvements in or relating to a jet propulsion device.

109182. A. C. Patel. Improvements in or relating to constructional elements and method of manufacturing the same.

109183. Ruti Machinery Works Ltd. Device for producing a selvedge on a weaving machine.

109184. Council of Scientific and Industrial Research. Process for preparing coated fertilizers using lac as the primary coating material.

109185. Council of Scientific and Industrial Research. Improvements in or relating to fluid energy mills.

109186. Council of Scientific and Industrial Research. Electronic tachometer.

109187. Ciba Limited. New water-insoluble anthraquinone dyestuffs and process for their manufacture.

109188. Ciba Ltd. Process for the manufacture of new water-soluble n,n'-diglycidyl compounds.

109189. Knapsack Aktiengesellschaft. Process for the manufacture of vinyl chloride from 1,2-dichloroethane.

109190. Boots Pure Drug Company Limited. "17 acyloxy-steroids and their manufacture." (9th February 1966).

109191. Ciba Limited "1-Isopropylamino-2 -hydroxy-3 (ortho-lower alkoxymethyl-phenoxy)-propanes, process for their manufacture and pharmaceutical preparations containing the same." (Divisional date 16th July 1965).

109192. Catalysts and Chemicals, Inc. Low temperature shift reaction catalysts and method for preparation.

109193. Catalysts and Chemicals. Inc. Production of hydrogen and catalysts therefor.

109194. Catalysts and Chemicals, Inc. Steam-gas reforming.

109195. Catalysts and Chemicals, Inc. Dehydrogenation catalysts.

109196. Kawecki Chemical Company. High temperature oxidation resistant articles.

109197. American Cyanamic Company. Quinoline and thione derivatives.

109198. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Reactive azo dyes.

109199. Asahi Kasei Kogyo Kabushiki Kaisha. Method for producing acrylic man-made fibers.

109200. Chase Brass and Copper Co., Inc. Improvements in or relating to sheet guiding and tensioning apparatus.

109201. Ordena Lenina, Ordena Krasnogo Znameni I Ordena Trudovogo Krasnogo Znameni Zavod Tyazhelogo Mashinostroenia Im. S. Ordzhonikidze. A device for the extraction of an ingot, preferably of a rectangular cross section from a curved mould of a continuous casting plant.

109202. Vdo Tachometer Werke Adolf Schindling Gmbh. Submerged tube oscillator for electrical measurement of the contents of a tank in motor vehicles.

109203. Ministerstvo Tsvetnoi Metallurgii, A method of processing ores and concentrates containing rare matals, and unit for effecting said method.

109204. R. M. Bogomolov, M. M. Karpeev, G. M. Rodshtein, J. I. Chernov, I. D. Shakhov and A. S. Judin. Boring cutter rock bit.

109205. Zhdanovsky Zavod Tyazhelogo Mashinostroenia. Operating equipment of straight-shovel type for single-bucket excavation tors.

109206. Gosudarsyvenny Nauchno-issledovatelsky I proektny institut azotnoi promyschlennosti i produktov organicheskogo snteza, Method for production of ammonium nitrite.

109207. Nauchno-issledovatelsky Institut Legkogo Mashinostroenia. A device for pressng parts.

109208. Uralsky Nauchno-issledvatelsky I proektny Institut Stroitelnykh Materialov. Method of manufacturing pressure metal-silicate pipes.

109209. S. V. Iljushin, D. V. Leschiner, V. M. Sheinin and G.E. Dolgushev. Aircraft with rear-mounted fuselage engines.

109210. M. V. Desai. Electrowinning copper billets directly from sulphide or oxide ores.

109211. Tokyo Shibaura Electric Company Limited. Foil wound electrical windings.

109212. Tokyo Shibaura Electric Company Limited. Foil wound coils.

109213. Tokyo Shibaura Electric Company Limited. Electric induction apparatus with foil wound windings.

109214. Tokyo Shibaura Electric Company Limited. Method of securing lead conductors to foil wound windings.

7th February 1967

109215. Dr. Ing. Francesco Steffenini. Tubular bodies, particularly supporting bodies for wound threads and method for the manufacture thereof.

109216. Dr. Ing. Francesco Steffenini. Double-walled tubular tody and devices for making same.

109217. Farbenfabriken Bayer Aktiengesellschaft. Anthraquinone dyestuffs. (7th November 1966).

109218. Halcon International, Inc. Chemical process.

109219. Imperial Chemical Industries Limited. Ethylene copolymers and laminates made therewith. (14th February 1966).

109220. Albiswerk Zurich, A.-G. Improvements in or relating to wave-guide assemblies. (28th October 1966).

109221. Ciba Limited. Process for the temporary protection of amino groups in peptide syntheses.

109222. The British Petroleum Company Limited. Composition Comprising a solid petroleum hydrocarbon. (18th February, 1966).

109223. C. F. Boehringer & Soehne Gmbh. Diagnotic agents. (14th December 1966).

109224. The Lummus Company. Method of cooling a process stream.

109225. Montecatini Edisin S.P.A. Process for preparing textile fibers, on the basis of synthetic high polymers, having a particular receptivity to dyestuffs (Addition to No. 71890).

109226. N. V. Philips Gloeilampenfabriken. Assembly of Semiconductor circuit elements having a common semiconductor body.

109227. R. Lakshmanaperumal. Signalling and control device to prevent overfilling of tanks.

8th February 1967

109228. Dr. A. K. Varshneya. Four cycled motorised respirtor for use on human beings.

109229. Hindustan Lever Limited. Flavour Composition. (10th February 1966).

109230. Shri Ram Institute for Industrial Research. A process for the formulation of water thinable surface coating compositions.

109231. E. I. Du Pont De Nemours and Company. Process and product.

109232. New York University. Method for preserving limestone structures.

109233. Avisun Corporation. Processing of asbestos-polyolefin blends.

109234. Archer-Daniels.Midland Company. Phenolic compositions.

19235. Demag-Elektrometallurgie Gmbh. Control of discontinuous electric melting furnaces.

109236. Veb. Fotochemische Werke Berlin. Improvements in and relating to the preparation of auxiliary layers for photograhic materials prepared of anthetic polymers (4th November 1966).

109237. The Director, Power Research Institute, Central Water and Power-Commission (Power Wing) Government of India. Location of low-impedance faults in unarmoured or non-magnetically sheathed cables at exposed locations.

109238. Ceskoslovenska Akademie Ved. A methed of production of plastic lenses with aspherial surgaces.

109239. Vyzkumny Ustav Pletarsky. Intra-uterine contraceptive device.

109240. The Mining Engineering Company (Meco) Limited. Improvements relating to belt conveyors. (16th February, 1966).

109241. United States Rubber Company. Improvements in dye-bath treatment for polymeric articles.

109242. Emilio Arno Santos. Apparatus for shaping of corrugated building elements.

109243. Bata Shoe Company Private Limited. Improvements in or relating to footwear. (18th February 1966).

109244. Imperial Chemical Industries Limited. Coloration process. (17th February, 1966).

109245. Imperial Chemical Industries Limited. Polycyclic dyestuffs. (1st July, 1966).

109246. N. V. Philips Gloeilampenfabricken. Improvements in and relating to filters for analog signals.

109247. Amsted Industries Incorporated. Power-transmission chain links.

109248. R.A.P. Rollen Automobil Patent Anstalt. Apparatus for the exchanging of air of surroundings as bed-rooms of the like.

109249. Kawasaki Jukogyo Kabushiki Kaisha. A special pulsating blast system in a pneumatic mixer.

9th February 1967

109250. Council of Scientific and Industrial Research. Improvements in and relating to discharge characteristic and construction of axial piston pumps and motors.

109251. Associated Electrical Industries Limited. Improvements in and relating to refrigerators. (29th March 1966).

109252. O.P.S. Malhotra and V. Ram. 6" size, rock bit, i.e., conical bit with tungsten carbide tips set along helices for drilling sedimentary formations.

109253. Abbott Laboratories. Substituted benzoxazepines and benzothiazepines.

109254. United States Steel Corporation. Steel resistant to embrittlement by neutron radiation.

109255. United States Steel Corpration. Method of producing carburized steel.

109256. J. R. Geigy A.G. Process for the production of new n-substituted aminomethane sulphonic acids and their salts.

109257. Koninklijke Industrieele Maatscappij Noury & Van Der Lande N. V. Improvements in or relating to organic peroxydicarbonates. (28th February 1966).

109258. B. Garodia. Step voltage regulator.

109259. Dr. S. Dutt. Solder composition and a flux. [Divisional date 29th April 1966].

109260. Dr. S. Dutt. A composition which may be used in particular in the manufacture of electrodes. [Divisional date 29th April 1966].

10th February 1967

109261. D. B. Singh. Ink-stand for draughtsman and tracers in Civil & Mechanical Engineering Drawing Offices.

109262. B. Bysakh. Improvement in or relating to toothpicks.

109263. Tecalemit (Engineering) Limited. Fiters for gasses. (11th February, 1966).

109264. Frick Company. Drive mechanism for foraminous flexible metallic conveyor belts.

109265. Shell Internationale Research Maatschappij N. V. Process for agglomerating solids from a suspension thereof.

109266. The Mining Engineering Company (Meco) Limited. Improvements relating to belt conveyors. [Addition to No. 68950]. (16th February, 1966).

109267. Albiswerk Zurich A.-G. Improvements in or relating to D. C. voltage regultors. (22nd November, 1966).

109268. Indian Oxygen Limited. Electrical connectors. (15th February, 1966).

109269. Rotary Profile Anstalt. Profiling of workpieces.

109270. Birfield Engineering Limited. Improvements in or relating to load-balancing hoists. (31st December, 1966).

109271. Rhone-Poulenc S.A. Insecticidal compositions containing new diazole compounds.

109272. Osterreichische Stickstoffwerke Aktiengesellschaft. Preparation of melamine.

109273. Aktiebolaget Svenska Flaktfabriken. A damper for regulating and shutting-off a gaseous medium.

109274. Pactide Corporation. Distillation method and apparatus. [Addition to No. 102668].

109275. Ciba Limited. Preparations containing urea or thiourea derivatives for use as molluscicides.

109276. Ellenberger & Poensgen GmbH. Time Delay Relay.

109277. N. V. Philips Gloeilampenfabricken. Incandescent lamp for car lights.

Alteration of date

102101. The claim to priority date 20th October 1964 has been changed to 28th June 1965.

107720. Ante dated to 25th April 1965 under Section 5 of the Act.

107937. Antedated to 12th April 1965 under Section 5 of the Act.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's Office in the prescribed from No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the Supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99203. The Nash Engineering Company. Improved liquid ring compress or. Accepted on 27th January 1967.

Comprising a ring of liquid circulating therein and a recirculating seal liquid supply system, a casing on annular rotor having displacenent chambers and discharge passageways cooperative with the inside diameter of said rotor.

99240. Consolidation Coal Company. Process for the hydrocracking of hydrocarbonaceous materials. (29th April 1964). Accepted on 28th January 1967.

Comprising contacting a polynuclear aromatic hydrocarbonaceous feed stock in the presence of hydrogen with molten zinc chloride or molten zinc bromide or a mixture thereof as catalyst in a hydrocracking zone.

99283. Rexall Drug and Chemical Company. Flame retardant polymer compositions and process for improving the flame retardancy of polymers. Accepted on 30th January 1967.

Comprises polypropylene and at least 5 weight percent of a fluoborate.

99306. A. Szegvari. Apparatus for dispursing materials in liquids and its operation. (19th March 1965). Accepted on 1st February 1967.

Relating to dispersion of materials in a liquid, by means of balls or the like, kinetically activated by means attached to a vertical shaft, rotated at anywhere from about 250 to 1500 rpm, or thereabout.

99327. The Anil Starch Products Limited. Production of bacterial amylase and/or protease by submerged culture method and textile desizing preparations containing the same. Accepted on 3rd February 1967.

Comprises growing bacillus subtilis strain capable of producing anyalse and/or protease in sterlised aqueous medium using closed fermentor, filtering harvested cuture fluid of addition of sel forming chemical, subjecting filtrate to starch adsorption for amylase leaving protease in solution.

99346. E. I. Du Pont De Nemours and Company. Novel fibers of exceptionally high levels of work recovery and tensile recovery and process for making these fibers. Accepted on 4th February 1967.

Consisting of polypivalolactone having an inherent viscosity, r inh, at least about 0.75 and an orientation angle less than the valve of the expression in 15 r inh +17 is heated to a temperature of at least 150° C.

99364. Zaklady Cynkowe "Silesia" Przedsiebiorstwo Panstwowe. Process for the manufacture of zinc dust and apparatus for carrying out the process. Accepted on 4th February 1967.

Process for manufacture of zinc dust comprising introducing molten zinc in rectification column passing resulting vapour through a cooling system.

99377. M. & T. Chemicals Inc. Production of diorganioantimony compounds. Accepted on 6th February 1967.

Reacting diphenyl antimony halide with a compound M(OOCR') a where R' may be selected from alkyl aryl and alkenyl and a may be the valence of M in the presence of an inert solvent.

99378. M. & T. Chemicals Inc. Process for preparing N-2, 3-dibromopropenyl pyridinium salts and an aqueous acid electrolytic bath containing said salts. (Addition to No. 91995 . Accepted on 6th February 1967.

Mixing together propargyl bromide and a bromide and brominating the said product.

99379. Union Carbide Corporation. Improved silver oxide galvanic cell. Accepted on 6th February 1967.

Characterized by the presence in the cell of chromium bearing material in the range from ·0017 to ·34 per cent by weight.

99395. Halcon International, Inc. Production of epoxy compounds. (Additional to No. 91373). Accepted on 6th February 1967.

Contacting olefin with organic hydroperoxide in presence of catalytic amount of at least one soluble compound of a metal selected from the ground consisting of vanadium, molybdenum, tungsten and selenium.

99574. Standard Telephones and Cables Limited. Switching contact network in telephone systems. Accepted on 9th February 1967.

In which links are connected to contact panel and the said links include further links connected to different common contact pannel.

99588. Council of Scientific and Industrial Research. Improvements in or relating to primary wet cells, particularly, alkaline manganese dioxide cells, and to sac elements therefor. Accepted on 6th February 1967.

A sac element prepared by mixing manganese dioxide ore and carbon black, zinc chloride, amonium chloride and water.

99613. Chiyoda Kako Kensetsu Kabushiki Kaisha and Kureha Kagaku Kogyo Kabushiki Kaisha. Flameless radiant burner. Accepted on 9th February 1967.

Comprising in that the oxygen and air required are pre-mixed, fed in header of a unit burner, and led into plurality of conduits branched off fuel gasis caused to pass through said conduits sit a high speed sufficient to cause cooling.

99656. Council of Scientific and Industrial Research. Improvements in or relating to the production of copper powder from byproduct copper oxides obtained from the copper wire and tube drawing and sheet rolling industry. Accepted on 6th February 1967.

By a process comprising the electrochemical reduction of the solid copper oxide in a cell containing an aqueous alkaline electrolyte.

99723. Fiber Industries, Inc. Continuous polymerization. Accepted on 7th February 1967.

Comprises a method of maintaining constant equilibrium condition in the polymirisation stages by removing the excess polymethylene terepthalate polymer before extrusion and using the same by adding corresponding alkylene glycols to the polymerisation process.

99834. Borg-Warner Corporation. An air-conditioning system particularly an improved compressor capacity control system. Accepted on 4th February 1967.

Including a compressor, an evaporator, and condenser connected in a closed circuit, compressor being adapted to be driven by the internal combustion engine of an automobile having an intake manifold, a capacity control system including a value between evaporator and compressor, means for adjusting the setting of valve, conduit means connecting engine intake manifold.

99835. Borg-warner Corporation. Compressor with liquid, refrigerent injection means. Accepted on 4th February 1967.

Comprising a casing having a compression cavity therein, means defining suction discharge ports communicating with compression cavity a rotor operatively disposed within cavity and means for injecting liquid refrigerant into compression cavity, said means including temperature responsive flow control valve.

99850. Michelin & Cie (Compagnie Generale des Etablissements Michelin). Rubber patching compositions. Accepted on 8th February 1967.

Comprises as a first component a mixture of a vulcanizable depolymerised elastomer and a non volatile plasticizer and sulfur and as a second component a mixture of an vulcanising accelerator and a nonvulcanizable elastomer.

100013. Ckd Praha, Narodni Podnik. Device for measuring direct currents comprising partial and totalising transductors. Accepted on 6th February 1967.

A direct current measuring device in which at least one summation transductor is connected with at least one neutralising transductor, the operating a.c. windings both of the summation and neutralising transductors are connected to an alternating voltage of the same phase.

100226. J. Hourdiaux. Improvements in or relating to curved screens. (Addition to No. 92942). Accepted on 6th February 1967.

Characterised in that each diffusing element, occupying the entire height of a panel, consists of a plurality of rods disposed and to end and interconnected at their adjacent ends by means of connecting members.

100240. The Carborundum Company. Abrasive article. Accepted on 4th February 1967.

Made of a raw batch mixture comprising abrasive grains an organic bonding agent and a particulate, friable pore forming material.

100255. Dunlop Rubber Company Limited. Improvements in or relating to playballs. (9th July 1964). Accepted on 8th February 1967.

Comprises dispersion of low density cellulosic material in a self supporting hollow sphere of rubber or rubber-like composition.

100317. K. M. D. Thackersey, V. Merchant, U. M. D. Thackersey, P. M. D. Thackersey and P. M. D. Thackersey. Advertisement device. Accepted on 6th February 1967.

Comprising one or more signs, one or a plurality of pegs located on the sign and a disc or discs of any shape loosely held on the peg through a hole in the disc.

100356. M. N. Desai. Manufacture of copper from chalcopyrites. Accepted on 7th February 1967.

Characterised by roasting the same in a furnace below 600°C in the current of hydrated air when the concentrates of copper or ore is dropped while hot in the water for formation of solution of copper sulphate and copped is precipitated thereform by iron treated with acidulated water.

100670. Imitomo Metal Industries, Ltd. Friction snubber for damping the swing of a swing bolster of a freight car bogie truck. Accepted on 4th February 1967.

Comprising two bar shaped concentric friction shoes slidably fitted in a guide and a trapezoidal echelon fitted in the side frame.

100691. Carl Lindstrom Gesellschaft M. B. H. A record moulding press and a method of pressing gramaphone records. Accepted on 20th January, 1967.

Comprising a face plate, the front surface of which is so formed that a record pressing matrix can be mounted thereon, at least an air channel leading from a paint on said front surface covered by said matrix.

100780. The Molins Organisation Limited. (formerly known as Molins Machine Company Ltd.). Packets for cigarettes or the like. (27th July 1964). Accepted on 27th January 1967.

A one-piece packet characterised by a body having a projecting part and a lid being arranged to overlie the projecting part.

100863. Her Majesty's Postmaster General. Improvements in or relating to switching stages in telecommunication systems. (31st July 1964). Accepted on 30th January 1967.

Comprising a plurality of first rank switches, a plurality of second rank switches and a switching stage control circuit.

100864. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for preparing shaped structures made of polyalkylene terephthalates. Accepted on 30th January 1967.

Comprising conveying a continues stream of low molecular weight polyalkylene terephthalates to a melt of high molecular weight polyalkylene Hg and a temperature of 260°—310°C mixing the two portions by violent stirring and forcing continuously through nozzles.

100866. P. J. M. O. Sanchez. Improvements in folding tables. Accepted on 30th January 1967.

Comprising a fixed frame supporting structure, a foldiing frame engaged against the fixed frame, a lowerable table, top can be supported on the folding frame after it has been extended.

100897. Rhone-Poulenc S. A. Process for the preparation of oxadiazolone compounds and fungicidal compositions containing them. Accepted on 2nd February 1967.

Reacting isocyanate $C_6H_4R_1$- NCO with 1, 3, 4—oxadiazol-2-one, where R_1 is halogen, oralkyl cyano or dialkylamino groups.

100898. Imperial Chemical Industries Limited. Apparatus for conducting stirred continuous processes. Accepted on 2nd February 1967.

Apparatus for conducting continuous processes comprise a hollow vessel, and means for introducing the fluid substance into the one end of the vessel and means for removing the fluid substance from the other end of the vessel and a stirrer.

100902. The English Electric Company Limited. Electrical protective relays. (5th August 1964). Accepted on 2nd February 1967.

An electrical protective relay including a measuring circuit the impedance of which is matched with an impedor, over at least the operative part of the measuring range.

100918. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius and Bruning. Water-soluble azo dyestuffs and their metal complex compounds and process for preparing them. Accepted on 3rd February 1967.

Coupling an aromeatic diazo, tetrazo or azodiazo R compound with a coupling compound containing the group-N-SO_2-CH_2-CH_2-S-SO_3M wherein R represents an alkyl group and M represents a hydrogen or an alkali metal atom.

100933. Knapsack Aktiengesellschaft. Process and apparatus for cracking hydracarbons with an electric arc. Accepted on 3rd February 1967.

Comprises injecting feed hydrocarbon in vapour form co-currently to hot hydrogen travelling therethrough, causing reaction mixture to travel increasing velocity, thereafter introducing a further quantity of feed hydrocarbon in vapour form and ultimately quenching the reaction mixture.

100936. Boots Pure Drug Company Limited. Pesticidal Compositions containing new *N*-acylcarbomates. (Addition to No. 87782). Accepted on 3rd February 1967.

Comprising pesticidal adjuvant and R-O-CO-N (CH_3). COR' R being naphthyl or phenyl and R' alkoxy alkyl.

100937. Ciba Limited. Pesticidal preparations. Accepted on 3rd February 1967.

X_1
Comprising Y-CO-C-CN and carrier, X_1 stand-
X_2
ing for hydrogen or both X_1 and X_2 being halogens, Y being OR, where R is alkyl or chloroalkyl

R_1
or $-N$ where R_1 and R_2 may each be hydrogen,
R_2

alkyl alkoxyalkyl, dialkyl aminoalkyl or cyclo-hexyl, phenyl or $-CH-CCl_3$ or with nitrozen
OH

form morpholine, piperidine or piperizine ring.

100944. Charbonnages De France. Thermally stable co-polymers of formaldehyde and acetaldehyde and a method for their preparation. Accepted on 3rd February 1967.

A co-polymer of formaldehyde and acetaldehyde is submitted to a heat treatment.

100945. J. L. A. See. Chain grids for runways and mutual locking elements for forming the same. Accepted on 3rd February 1967.

The grid is formed by two identical rings placed in alternate rows and mutual locking each other by means of notches, being respectively bordered on either side by a small horizontal bar.

100967. Ram Krishna Mukherjee. Improvements in or relating to swash plate piston pumps or like swash plate operated appliances. Accepted on 4th February 1967.

Wherein a plurality of cylinders are arranged in a circle around a driving shaft and pistons reciprocating in said cylinders are operated by a swash plate or wobble plate.

100970. Inventa A. G. Fur Forschung Und Patentverwertung. Parahydroxy benzoic acid and process for manufacturing the same. Accepted on 4th February 1967.

Characterizes in that potassium phenolate is treated as granules or in the form of a briquette with preheated inert gas and then with dry carbon dioxide gas, phenol formed being removed by a cooling arrangement and cold gas mixture is used to remove the heat of reaction after the reaction has been completed.

100988. James Mackie & Sons Limited. A method of and apparatus for blending jute of different qualities. (7th August 1964). Accepted on 6th February 1967.

Comprising blending cut jute and jute cutting in a card, the cut jute being in an uncarded or incompletely carded condition and the cuttings being in a carded condition.

101004. Pressed Concrete Machinery Developments Limited. Manufacture of concrete articles. Accepted on 7th February 1967.

Supplying a charge of the material to the inlet end of the mould, compressing the charge, retracting at least one wall of the mould lying against one longitudinal face of the compressed charge and moving the compressed charge without extrusion towards the outlet end.

101007. British Nylon Spinners Limited. Improvements in or relating to processes for winding and doffing bobbins. (19th August 1964). (Addition to No. 84165). Accepted on 7th February 1967.

Wherein the radial projection from the surface of the bobbin comprise on outwardly directed outer portion of a clip which is fitted around the rim of the base end of the bobbin or of a sleeve portion thereof.

101024. E. I. Du Pont de Nemours and Company. Process for preparing polyamide and polyamide shaped articles. Accepted on 7th February 1967.

Reacting dodecane dioic acid with bis-P (amino-cyclohexyl) methane of at least 30 and less than 70% of trans-trans stereoisomer content.

101025. E. I. Du Pont de Nemours and Company. Polyamide fibers or filaments and process of preparing the same. Accepted on 7th February 1967.

Consisting of bis (4-aminocylohexyl) methane having a tran-trans steridisomer content of at least 70%, a molecular weight of at least 8,000 and the filaments having a binefringence.

101026. E. I. du Pont de Nemours and Company. Process for the preparation of new polyamide. Accepted on 7th February 1967.

Reacting dodecane dioic and with a diamine.

101028. Machinery Manufacturers Corporation Ltd. Electronic stop motion device. Accepted on 9th February 1967.

Comprising an input circuit connected to a valve and a sensor switch, a first circuit including a relay connected to the cathode of an amplifier and coupled to a last circuit.

101140. Glaverbel. Apparatus for the production of sheet of glass. Accepted on 7th February 1967.

Grooves are formed in the mobile support for molten metal, said support is a rolling endless table formed by at least one set of successive shoes which are driven by carriages which are rolling on guides.

101150. L. Givaudan & Cie Societe Anonyme. Odorants of the amber type and process for the manufacture thereof. Accepted on 9th February 1967.

Converting 8-methylidene group and 9-hydroxy-xyalkenyl group together with the carbon atoms to which they are attached, of a 4, 4, 10-trimethyl-decahydronaphthalene derivative by known methods into an odoriphoric group and then removing the ether group 6-position with concomitant introduction of a 5, 6,-double bond.

101159. J. M. Parekh. Improvement in or relating to cameras. Accepted on 6th February 1967.

In which more than one roll film can be loaded at a time, selective use of any one roll film so loaded being possible at any time, not waiting for exposing complete length of any one film so as to use another, and from which permitting unloading at any time any of the roll films or replacing the same permitting unloading at any time any of the roll films or replacing the same.

101175. Ciba Limited. New vat dyes of the anthraquinone-imidazole series, process for their manufacture, and materials dyed or printed therewith. Accepted on 4th February 1967.

Process for the manufacture of vat dyestuff of the anthraquinoneimidazole series comprises condensing a reactive derivative of a dicarboxylic acid with an aminoanthra quinone to form a carboxylic acid amide group and with a 1·2 diaminoanthraquinone with the formation of an imidazole ring.

101193. Minnie Punch and Die Company, Inc. Punching apparatus. Accepted on 8th February 1967.

Parallel plate punching die set having a movable member which disengages a workpiece portion from one of the punch and die members of the set when the movable member is acted against by an ejector means in response to the removal of the ram after a punching stroke.

101194. E. I. Du Pont De Numours and Company. Improved wrapped yarns, a process and apparatus therefor. Accepted on 7th February 1967.

Comprising a core composed of two continuous integral core elements of textile fibre and surface wrappings composed of discontinuous textile fibre.

101264. Gebr, Bohler & Co., Aktiengesellschaft. Improvements in or relating to apparatus for producing a D.C. or A.C. electric arc plasma flame and for focussing said flame. Accepted on 7th February 1967.

Having at least one additional charge carrier source which prevents a quasineutral state of the plasma and therefore helps to sustain the electric arc.

101288. Owens-Corning Fiberglas Corporation. Fibrous glass yarn. Accepted on 3rd February 1967.

Characterised by providing high humidity atmosphere while applying size, gathering and winding strand, then restricting water evaporation until strand is removed from packaging tube and finally facilitating evaporation while strand is converted into yarn.

101302. The Goodyear Tire & Rubber Company. Improvement in a method of making polyurethane and said polyurethane. Accepted on 8th February 1967.

Reacting an organic compound containing a reactive isocyanate or thioisocyanate group with a substance having reactive hydrogen in contact with a catalytic amount of a mercapto derivative of a thiazole, oxazole imidazole or imidazoline.

101330. N. V. Philips Gloeilampenfabrieken. A device comprising a magnetron with a tuning member and a transducer. Accepted on 7th February 1967.

Comprising a magnetion with a tuning member adapted to rotate in the vacuumspace and moved by magnetic drive a transducer and a hall generator.

101410. Fichtel & Sachs A. G. Bicycle with auxiliary motor. Accepted on 6th February 1967.

A petrol tank in the form of a front dashboard and a foot board which serves simultaneously as motor covering joined immediately to the lower end of the petrol tank.

101472. Imperial Chemical Industries Limited. Polyesters. (8th September 1964). Accepted on 8th February 1967.

Wherein polyethylene-1:2 diphenoxyethane-4:4'—dicarboxylate or a copolyester of it is extruded in the molten state in the form of spinneret, the extruded material is wound upto a fractage and the resultant yarn is cold-drown over a pin at a temperature within the range 60°-90°C.

101496. Compagnie Francaise Thomson-Houston. Multiple viewing system for educational television and the like. (12th February 1965). Acc epted on 8th February 1967.

Comprises at least one source of pictures including a screen and means for forming on the screen an image laterally inverted with respect to the original, means for supporting said picture source in overhead position above seating accommodation.

101501. Forschungsgemeinschaft Der Deutschen Filztuchindustrie. Process for production of textile sheets. Accepted on 8th February. 1967.

The composite fibre sheet having sheets oriented at right angles to one another, is fixed by a needling machine, stretched and then provided with a water proof elastic adhesive.

101502. Forschungsgemeinschaft Der Deutschen Filztuchindustrie. Method of fixing the fibres of felt clths, particularly of paper machine felts. Accepted on 8th February 1967.

A needled felt clth is provided with a water proof clastic adhesive on its underside, compressed and treated with air jet.

101526. D. G. Menon. Flexible union for high pressure pipes. Accepted on 9th February 1967.

Comprising hollow cone with extended pipe, a cone seat and gland chamber housing connected with a pipe piece metallic washer glan packing, glan bush, and gland adjusting cap nut.

101560. Tea Research Association. Vertical tea processing machine. Accepted on 7th February 1967.

A plurality of sets of vanes or the like protruding into annular space between the state or and the rotor, said vanes being inclined at an angle to the shaft to propel tea leaf upwards.

101968. The Dow Chemical Company. Method of producing collapsed expandable cellular synthetic polymers. Accepted on 7th February 1967.

Characterizes in using a chllrostyrene polymer and subjecting the expanded polymer to steam and pressure after which the product is cooled.

101992. Eastman Kodak Company. Apparatus and method for producing tobacco smoke filters. Accepted on 9th February 1967.

Comprises depositing a determined amount particulate additive on the upper surface heating the bonding agent, permitting the bonding agents to cool.

102037. Sperry Rand Corporation. Electrical connector assembly. Accepted on 9th February 1967.

Comprising an elctrically insulating connector block, a unitary socket connector, a tail portion and a insulating terminal member.

102101. Doucet S. A. Method for the filtration of a fluid and filtering installation for carrying out this method. (28th June 1965). Accepted on 8th February 1967.

Characterised by the fact that the wall is put into vibration so that the impurities which are eliminated from the fluid by this wall are detached therefrom, and that a part of fluid is let to flow through the wall, the rest of the fluid sweeping across the wall so as to strip it from the detached impurities.

102118. Veb Elektro-Apparate-Werke Berlin-Treptow. Double-track brake magnet assembly for electricity meters. Accepted on 6th February 1967.

Magnets are arranged in opposite relation to each other on one disc of the rotor in such a way that one magnet with its magnetically hard portion is located above the rotor disc with its transformer core portion below, whereas the other magnet is arranged in the opposite direction.

102121. British Nylon Spinners Limited. Improvements in or relating to yarn packages. (23rd October 1964). Accepted on 6th February 1967.

Consisting of continuous filament yarn wound on frusto conical former of small cone angle in a double taper build, successively wound layers of which decrease in length gradually from inside to outside of the build.

102181. British Visqueen Limited. Improvements in and relating to the heat sealing of plastics film and plastic bags sealed thus. (26th October 1964). Accepted on 6th February 1967.

Including subjecting contaminated surface of the plastics film to vibration by ultrazonic energy before the heat sealing step.

102208. N. F. Serov, L. E. Korchnoi, V. F. Martakov, I. N. Kersek, A. I. Trachun, G. A. Drobotko, M. Y. Kaplan and K. L. Shakhnovsky. Device for automatic diaphragm setting in cameras. Accepted on 6th February 1967.

Coaxially to the pointers of galvanometer, lever-indicators are pivotally mounted one ends of which are within the view finder and the other ends are connected to adjustable stops mounted on movable arrester of galvanometer pointers, arrester being locked with shutter release button, and galvanometer pointers are connected to diaphragm setting spring loaded ring by means of follow-up lever train.

102322. Wstinghouse Electric Corporation. A taut filament suspension instrument. Accepted on 7th February 1967.

Taut filament suspension instrument including at least one tower member mounted on the coil structure for guiding filamentary element.

102325. Vsesojuzny Nauchno-Issledovatelsky Institut Radiatsionnoi Tekniki. Radioisotope ice-warning indicator. Accepted on 6th February 1967.

Radiation detector is arranged in relation to ice-formation surface so that the radiation beam from the radiation source directed towards the radiation detector crosses the ice-formation surface at an acute angle.

102384. Mohta Brothers (Pvt.) Ltd. Improvements calculating indicating device. Accepted on 6th February 1967.

Comprising at least two relatively rotatable circular discs with a third circular disc in between the same one of the former having three adjacent openings and a cut-out window, and the other of the former also containing adjacent three openings and a cut-out window.

102431. Siemens & Halske Aktiengesellschaft. Improvements in or relating to D.C. voltage stabilising circuits. (31st August 1965). Accepted on 6th February 1967.

A d.c. voltage stabilising circuit having a switching transistor and a storage choke connected in series with the load circuit, the switching transistor being controlled by a control voltage of square wave form.

102432. Siemens & Halske Aktiengesellschaft. Improvements in or relating to electrical overload protection arrangements.

(31st August 1965). Accepted on 7th February 1967.

A series chain containing at least one temperature sensing positive temperature co-efficient resistor for each electrical conductor to be monitored forms one arm of a potential devider.

102492. Vasant Engineering Ltd. Box stitching machine. Accepted on 3rd February 1967.

Rotary cam head for a stitching machine by wire stapling, and means for drawing a plurality of wires, cutting the wire into size, formation of U-shaped staple, release of staple, hammering thereof into leaves for making box carton.

102578. R. K. Whitehead, Sr. R. K. Whitehead, Jr. A. C. Whitehead and H. C. Whitehead Bobbin holder wedge member. Accepted on 6th February 1967.

Characterised by wedge means movable axially of the shell for wedging the bobbin retaining means from the first position into the second position.

102640. General Dynamics Corporation. System for dynamically adjusting the working roll separation in rolling mills. Accepted on 7th February 1967.

A frame and first and second relatively movable rolls disposed within the frame comprising a wedge member having two surfaces disposed at an angle interposed between the frame and the first working roll and movable transversely therebetween, a first bearing member linked to the mill frame, a second bearing member linked to the first working roll, an antifriction layer including polytetrafluoroethylene disposed between each of the surfaces of the wedge member.

102738. W. A. Sheaffer Pen Company. Fountain pen. Accepted on 8th February 1967.

Barrel having a vacuum type ink reservoir therein, a point carried and extending forwardly from said barrel, capillary feed means and ink feed control means carried in said barrel and in the form of a porous matrix wettable by the ink.

102760. Imperial Chemical Industries Limited. Polymer process.

(21st December 1964). Accepted on 4th February 1967.

For shaping heat fusible polymers comprising extruding the polymers in the molten condition and thereafter cooling the indented polymer ribbon.

102942. Babcock & Wilcox Limited. Improvements in pulverising mills. (15th December 1964). Accepted on 8th February 1967.

Grinding element resiliently urged downwardly towards a lower, rotary, grinding ring and means co-acting with the lower ring to support the lower ring at an outer portion thereof adjacent the grinding elements.

102992. Prem Rattan Gupta. Device for indicating safe and/or conception period in woman's monthly cycle. Accepted on 6th February 1967.

Comprising a circular base disc having numerals marked thereon, and an adjustable and rotatable indicating means mounted concentric thereon, consisting of a disc for showing monthly cycle in the base disc and an adjustable member rotatably mounted and concentric thereto for indicating safe and conception periods in said cycle.

103009. S. Banwarilal. A hop stick or bounger to be used for games or physical exercise. Accepted on 3rd February 1967.

Consists of two hollow telescopically arranged steel tubes, the upper one freely sliding on the lower and having an upper washer assembly and a lower washer accommodating therebetween a metallic compression spring.

103120. Ersa Ernst Sachs Kg. Electric soldering iron. Accepted on 9th February 1967.

A heating element and soldering bit mounted on a tubular shank, characterised in that the tubular shank handleless and is situated in a joint block forming one part of a joint and receiving connecting terminals.

103122. Farbenfabriken Bayer Aktiengesellschaft. A process for the production of thermoplastic moulding compositions.

(30th September 1965). Accepted on 7th February 1967.

By polymerising (A) 5 to 50% of 1,3-butadiene and (B) 95 to 50% of (a) styrene, methyl styrene, methyl methacrylate and (b) acrylonitrile. Methyl acrylonitrile and methyl methacry-late.

103282. Experimentalny nauchno-issledovatelsky institut metallorezhuschikh stankov. Resilient anti-vibration support. Accepted on 6th February 1967.

An anti-vibration support characterised by a damping element having grooves made in its body and a support provided with a gap between the damping element and the bead of the cover.

103459. M. L. Mil, E. V. Yablonsky, A. E. Malakhovsky, L. N. Grodko, G. A. Levin, and O. P. Bakhov. Helicopter rotor hub. Accepted on 3rd February 1967.

Elastic members being coupled with a common ring capable free of rotation around the axis of the hub, said ring being rotated in a bearing mounted on the hub casing.

103467. Sperry Rand Corporation. Memory plane and method of fabricating same. Accepted on 7th February 1967.

Comprising an insulating material having a plurality of parallel channels formed therein and a flated magnetic wire positioned in each said channel.

103507. Ckd Praha, Oborovy Podnik. Single-phase bridge circuit with semiconductor cells and progressive voltage and current regulation. Accepted on 7th, February 1967.

Comprising four main branches, two of which are branched off into further two branches and are connected across groups of semiconductor cells to taps of a regulating transformer.

103868. Fichtel & Sachs AG. Clutch. Accepted on 8th February 1967.

A driven clutch housing, a shaft to be driven through the clutch, a clutch disc mounted exially movable but fast to rotation on the shaft, a pressure plate axtally movable in relation to the clutch housing, a cup spring abutting at a radially central point against the clutch housing, a wire ring having a form deviating from the circular before incorporation and receiving a circular form due to stress produced at the guide elements when it is incorporated.

103936. Nippon Rayon Co., Ltd. Apparatus for attaching the nozzle of the melt spinning of synthetic fibers ribbons and the like. Accepted on 8th February 1967.

Nozzle holder and the pack retaining tube, the nozzle and the filter interposed between them, all of them being tightened by the locking bolts, the support having the threaded holes for the thrusting bolts and a base to accomodate them and hold the support on its retaining projections.

103965. Redland Tiles Limited. Improvements in or relating to article propelling apparatus. (21st May 1965). Accepted on 8th February 1967.

A rotary member mounted above theguide way for rotation about a horizontal axis, a plurality of pawls mounted at circumferentially spaced locations on the member, fixed guide means extending partway circumferentially of the rotary member and means for operating each pawl to disengaging the article-engaging portion of each pawl.

103997. Domnick Hunter (Engineers) Limited. Improvements in or relating to filters for fluids. Accepted on 6th February 1967.

Comprizing fluid filter medium disposed between and supported by at least one pair of fluid permeable support members located one within the other having such a pore size as to prevent rupture of the filter medium, opposite ends of the support members and the filter medium being dip sealed together.

104045. Vsesojuzny Nauchno-Issledovatelsky Institut Stroitelnogo i Dorozhnogo Mashinostroeniya. Vibration roll. Accepted on 3rd February 1967.

Bearings together with the unbalance members being provided on hollow pivots inside a closed housing filled with liquid lubricant and rigidly installed inside the roll, the unbalanced member being rotated by a shaft installed inside the pivot coaxially with the roll.

104217. Tecalemit (Engineering) Limited. Improvements in lubricating apparatus and systems. (10th March 1965). Accepted on 4th February 1967.

Lubricator for supplying lubricant to a number of points on the vehicle or machine and a control unit for controlling the operation of the lubricator and adopted to be connected to the transmission system of the vehicle.

104334. S. R. Nanavati. An advertising apparatus. Accepted on 7th February 1967.

Running illuminated dot-advertisements in a single line upon a long narrow window panel of a transparent and translucent material in the centre of the front or both the front and the back along vertical faces of a long rectangular parallelopiped box housing an endless opaque tape with perforated legends running round guide cylinders,

104548 A. B. Amin Improvements in or relating to boilers and the like for heating water and like liquid. Accepted on 7th February 1967.

Comprising in combination a container forming the outer shell of the apparatus, a heat exchanger means, an inlet pipe led from any water reservoir, an outlet pipe and a heating means.

105405. J. Stanc & Company (Deptford) Limited. Improvements relating to battery-charging installations. 2nd June 1965. Accepted on 7th February 1967.

Includes a regulator arranged to control alternating current source and to be itself controlled with a dual characteristic.

107720. Consolidation Coal Company. Process for the hydrocracking of coal. [Addition to No. 99240]. [Divisional date 28th April 1965]. Accepted on 28th February 1967.

Comprising contacting coal with hydrogen in the presence of chloride or bromide of zinc or a mixture of both as catalyst in hydrocracking zone.

107937. Inpower Works (Proprietary) Limited. Fluid coupling. Divisional date 12th April 1965. Accepted on 12th January, 1967.

Comprising a carrier mounted for rotation about an axis and carrying a plurality of bucket wheels mounted for rotation on the carrier about axis spaced from the carrier axis and having a plurality of buckets of C-section arranged about said axis.

Opposition Proceedings

An opposition has been entered by Prakash Chand Jain & others to the grant of a patent on application No. 98072 made by Bhagwandas Purushottam Asar.

Correction of Clerical Error

Under Section 62 of the Indian Patents and Designs Act, 1911, certain clerical errors occurring in the application and specification in respect of patent application No. 89614 was corrected on 7th February 1967.

Patents Sealed

95056, 95395, 95539, 95609, 95752, 95754, 95755, 95769, 95801, 95829, 95874, 95889, 95900, 95927, 95949, 95967, 95973, 95978, 95982, 95987, 96007, 96017, 96037, 96043, 96113, 96198, 96227, 96278, 96305, 96406, 96411, 96457, 96519, 96527, 96585, 96658, 96667, 96697, 96835, 96891, 96925, 96951, 97010, 97113, 97115, 97178, 97199, 97216, 97229, 97254, 97260, 97267, 97282, 97303, 97360, 97392, 97433, 97546, 97549, 97720, 97902, 98404.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that General Electric Company, a Corporation of the State of New York, United States of America, of 1 River Road, Schenectady 5, New York, United States of America, seek leave to amend the description in the specification in respect of patent application No. 88814. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Esso Research And Engineering Company, a corporation of Delaware, United States of America, carrying on business as a company for the holding of patents and granting licenses thereunder, and technical development and research work at Elizabeth, New Jersey, United States of America, seek leave to amend the claims in the specification in respect of patent application No. 94362. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(3)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Dow Corning Corporation, of Midland, Michigan, United States of America, a Corporation organized under the laws of the State of Michigan, United States of America, Manufacturing chemists, seek leave to amend the description in the specification in respect of patent application No. 98131. Any person desirious of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(4)

The amendment proposed by Guy Olney Conner, in respect of patent application No. 91673 in the Gazette of India Part III, Section 2, dated the 1st October 1956 has been allowed.

Registration of Assignments, Licences Etc. (Patents).

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests:-

59413, 77593, 78032 } M/s. Eaton Yale & Towne Inc.
79753 M/s. International Aerosol Company Est.
98483 The Procter & Gamble Company.
90835 M/s. Technicolor Corporation of America.
61123, 60111, 60012, 59815, 57603, 52142 } M/s. Ascu Wood Products Private Limited.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent:-

No. 59383--N.C. Roy.

The patent ceased on the 16 January 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 3rd September 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patents Office, 214, Lower Circular Road, Calcutta-17, on or before the 1st April 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent:-

No. 60613—Srinivasa Ramanujam & another.

The Patent ceased on the 24th May 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 8th October 1966. Any person may give notice of opposition to the restoration by leaving an application on form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 1214, Lower Circular Road, Calcutta-17, on or before the 8th April 1967.

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent:

No. 60612--Srinivasa Ramanujam & another.

The Patent ceased on the 24th May 1966, owing to nonpayment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 8th October 1966. Any person may give notice of opposition to the restoration by leavig an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 8th April 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129252. Midco Private Limited, a company incorporated under the Indian Companies Act, at India House No. 2, Estate Office, Pedder Road, Bombay-26 WB, Maharashtra, "Multi-tiered campbeds", August 23, 1966.

Class 1. Nos. 129253 and 129254. Metrex Private Limited, an Indian Company, of India House, Kemps Corner, Bombay-26, Maharashtra, India, "Shelving Strips", August 23, 1966.

Class 1. No. 129542. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Necklace", September 26, 1966.

Class 3. No. 129237. Jayantilal K. Sayani, Indian National, trading as plastica, 94, Vithalwadi, Kalbadevi Road, Bombay-2, India, "Brush", August 22, 1966.

Class 3. No. 129280. Shubh Metal Works, Nemani Wadi, Thakurdwar Road, Bombay-2, Maharashtra, Indian Partnership firm, "Electric Bells", August 30, 1966.

Class 13. Nos. 129165 to 129182. The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", August 9, 1966.

Class 13. N0. 129200. The Phoenix Mills Limited, an Indian Company, Tulsi Pipe Line Road, Lower Parel, Bombay-13, Maharahstra State, "Textile goods", August 17, 1966.

Class 13. Nos. 129226 and 129227. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", August 18, 1966.

Class 13. No. 129239. The Svadeshi Mills Co., Ltd., an Indian Company of Bombay, Bombay House, Bruce Street, Fort, Bombay, Maharashtra, "Textile goods", August 22, 1966.

Class 13. Nos. 129241 to 129251. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", August 23, 1966.

Class 13. 129256 and 129257. The Victoria Mills Limited, an Indian Company, at Delisle Road, Parel, Bombay-13, "Textile piecegoods", August 24, 1966.

Class 13. Nos. 129260 to 129264. The Tata Mills Ltd., an Indian Company, of Bombay House, Bruce Street, Fort, Bombay, Maharashtra, "Textile goods", August 26, 1966.

Class 13. Nos. 129266 to 129269. The Bombay Dyeing & Mfg. Co., Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Bombay-1, "Cotton textiles", August 27, 1966.

Class 13. Nos. 129273 and 129274. The Victoria Mills Limited, an Indian Company, at Delisle Road, Prarel, Bombay-13, "Textile piecegoods", August 29, 1966.

Class 13. Nos. 129275 to 129278. The Svadeshi Mills Co., Ltd., an Indian Company of Bombay, Bombay House, Bruce Street, Fort, Bombay, Maharashtra, "Textile goods", August 29, 1966.

Class 13. No. 129281. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", August 30, 1966.

Class 13 Nos. 129290 to 129292. The Victoria Mills Limited, an Indian Company, at Delisle Road, Bombay-13, "Cotton piecegoods", September 5, 1966.

Class 13. Nos. 129552 to 129563. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", September 27, 1966.

Class 14. No. 129188. The Victoria Mills Limited, an Indian Company, at Delisle Road, Parel, Bombay-13, "Textile piecegoods", August 11, 1966.

Class 14. No. 129240. The Khatau Makanji Spg. & Wvg., Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", August 23, 1966.

Class 14. Nos. 129293 and 129294. The Victoria Mills Limited, an Indian Company, situated at Delisle Road, Bombay-13, "Textile piecegoods", September 5, 1966.

Registration of Assignments, Licences, etc.

(For Designs Assignments)

Assignments, licences or other transaction affecting the interest of the original proprietors have been registered in the following cases. The number of each case is followed by the names of the applicants for registration:—

90042, 90040, 90041 } Jekisondas Ranchhoddas, Esq., and 7 others.

Patents and Designs

Calcutta, the 4th March 1967

CORRIGENDUM

the Gozette of India, Part III, Section 2 dated the 4th February 1967 under the heading "Applications Accepted" :—

In page 51, *Column* 1.

Delete "100815. Compagnie Francaise..... small circular spaces forming passages".

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

13*th February* 1967

109278. N. R. Trivedi. Screw grip stopper for windows doors and the like.

109279. The Fertilisers and Chemicals, Travancore Limited, and K. V. Nair. A method for processing industrial waste liquors containing free sulphuric acid and or dissolved sulphates.

109280. Bristol-Myers Company. New synthetic compounds.

109281. R. S. Govil. Improvements in or relating to multipurpose polish and method of manufacturing and using the same.

109282. H. Singh. Improved method of preparing illuminated display sign and the sign so made.

109283. Catalysts and Chemicals, Inc. High temperature catalysts. (16th March 1966).

109284. Catalysts and Chemicals, Inc. Hydrocarbon reforming catalysts. (16th March 1966).

109285. Catalysts and Chemicals, Inc. Production of hydrogen. (16th March 1966).

109286. Catalysts and Chemicals, Inc. Production of hydrogen. (25th March 1966).

109287. Catalysts and Chemicals, Inc. Selective hydrogenation (23rd March 1966).

109288. Associated Engineering Limited. Positioning mechanisms. (18th February 1966).

109289. Associated Engineering Limited. Hydraulic motor arrangements. (18th February 1966).

109290. Associated Engineering Limited. Braking systems. (18th February 1966).

109291. Associated Engineering Limited. Electrical switch circuits. (18th February 1966).

109292. Associated Engineering Limited. Numercial control systems. (18th February 1966).

109293. Svenska Aktiebolaget Bromsregulator. A device for varying the leverage in a vehicle brake linkage. (14th February 1966).

109294. Danks of Netherton Limited. Boilers (18th February 1966).

199295. General Dynamics Corporation. Process for regenerating alkali metal citrates from spent aqueous citrate dispensions.

109296. Sumitomo Chemical Company Ltd. Method for synthesis of urea.

109297. Podmoskovny Gosudarstvenny Proektnokonstruktorsky I Experimentalny Institut Gornogo Mashinostroenia. Valve mechanism for hydraulic systems.

109298. Vsesojuzny Nauchno-Issledovatelsky i Proektnokonstruktorsky Institut Metallurgicheskogo Mashinostroeniya. Rotary flying shears.

109299. Ordena Trudovogo Krasnogo Znameni Institut Elektrosvarki imeni E. O. Patona, ul, Gorkogo. A device for controlling the drive of the mechanism for feeding electrode.

109300. Nauchno Issledovatelsky Institut po udobreniyam i insektofungitsidam im. prof Ya. V. Samoilova. Contact method of producing sulphuric acid.

109301. Moskovsky ordena Lenina i ordena Trudovogo Krasnogo Snameni institut inzhenerov Zheleznodorozhnogo trasporta. Improvements in or relating to brake rigging for a three-bogie composite railway car.

109302. Sandoz Ltd. Improvements in or relating to organic compounds.

109303. D. Weston. Material reduction mill. (25th February 1966).

109304. M. K. Mehta. Encapsulation of powders. (22nd February 1966).

109305. Lessona Corporation. Textile machine.

109306. Farbwerke Hoechst Aktingesellschaft Vormals Meister Lucius Bruning. Process for the manufacture of unsaturated lactones of the steroid series.

109307. G. S. Ahluwalia. Common wire communication system.

109308. Miss Jyoti Mahendrakumar. Itegral sliderless fastner for polyethylene bags.

109309. T. V. Cherian and T. V. M. Swamy. New process for improving the bond strength between steel and concrete in reinforced cement concrete. (Divisional date 11th May 1965).

15th February 1967

109310. Council of Scientific and Industrial Research. Improvements in or relating to paint removing jelly.

109311. F. W. Ruys. Apparatus for actuating a result unit of a calculating machine, cash register, weighing machine and the like.

109312. The B. F. Goodrich Company. Composition comprising blend of thermoplastic polyurethane elastomer and phenoxy resin. (30th March 1966).

109313. Kanegafuchi Boseki Kabushiki Kaisha, and Snia Viscosa societa Nazionale Industria Applicazioni Viscora SPA. A method of manufacturing stretchable knitted goods.

109314. Kanegafuchi Boseki Kabushiki Kaisha. A method for forming package of undrawn copolyamide yarn having an improved unwinding ability.

109315. Beecham Group Limited. Pharmaceutical compositions. (16th February 1966) (Addition to No. 87586).

109316. The Metal Box Company Limited. A container for medicinal tablets, pills or the like. (1st November 1966).

109317. Union Carbide Corporation. Modified asbestos.

109318. Foster Wheeler Limited. Improvements in welding apparatus.

109319. The National Cash Register Company. Treatment of minute capsules in liquid to inhibit clustering.

109320. Rhone-Poulenc S. A. Apparatus for the distribution of gases in a fluidised bed.

109321. Imperial Chemical Industries Limited. Process for the recovery of acrylic acid. (23rd February 1966).

109322. Rohm and Haas Company. Nitrogenous compounds.

109323. Mefina S. A. Regulating device for universal motors.

109324. Imperial Chemical Industries Limited. Process for the manufacture of pyridines. (3rd June 1965). [Divisional date 7th September 1965].

109325. Societe Nationale Des Petroles D'Aquitaine. New method of separating isotopic species and device for carrying out this method.

16th February 1967

109326. Schloemann Aktiengesellschaft. Improvements in apparatus for feeding of metal particles to the roll gap of a rolling mill (19th April 1966).

109327. Kaiser Aluminum & Chemical Corporation. Method of preparing a prebaked carbon anode.

109328. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Benzofuran derivatives and process for the manufacture thereof. (29th April 1966).

109329. E. Dropsy. Improvements in devices for modifying static electricity and its effects on the human body in automobile vehicles.

109330. F. L. Smidth & Co., A/S. A method of and a plant for the manufacture of corrugated building sheets. (17th February 1966).

109331. J. Asahina. A water-jet engine operated by the action of cavitation.

109332. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Molding compositions for the production of foamed articles.

109333. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to semiconductor devices. (18th February 1966).

109334. Montecatini Edison S. P. A. Process for preparing methyl 2, 5-hexadienoate and its derivatives.

109335. Combustion Engineering, Inc. Method and apparatus for minimizing air pollution.

109336. American Cynamid Company. Low temperature stable dodecylguanidine acid salt composition.

109337. American Cyanamid Company. Electro-optical devices.

109338. The Lubrizol Corporation. Composition & method.

109339. Metallgesellschaft A. G. Process of effecting catalytic conversion of SO_2-containing gases to produce SO_3 and sulphuric acid.

109340. A. Z. Richards and J. R. Palmer. Salt harvesting apparatus and method.

109341. J. R. Geigy A. G. Process for the dyeing and printing of synthetic fibre materials.

109342. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of 2-arylamino-4, 6-dichloro-s-triazines.

109343. Petrocarbon Developments Limited. Low temperature separation of gases. (22nd February 1966).

109344. Frick Company. Continuous once through material treatment apparatus.

109345. Shell Internationale Research Maatschappij N. V. Modification and control of plant growth.

109346. Halcon International, Inc. Preparation of oxirane compounds. [Divisional date 24th May 1966].

17th February 1967

109347. Tokyo Shibaura Electric Company Limited. A method of bonding parts together by means of a molten vitreous composition.

109348. Council of Scientific and Industrial Research. Electrolytic cell for the production of caustic soda and chlorine.

109349. S. D. Koondaja. An improved form of "one-touch" (glow-plug type) lighter for lighting cigarette, cigar or beedi.

109350. Laboratorios Ferrer. S. L. A method of obtaining compounds of antiacidotic action.

109351. Ceskoslovenska Akademie Ved. Method of final grinding and polishing of hydrophilic contact lenses.

109352. Imperial Chemical Industries Limited. Improvements in or relating to heterofilaments. (24th February 1966).

109353. Imperial Chemical Industries Limited. Improvements in or relating to heterofilaments from polyamides and polyesters. (24th February 1966).

109354. American Homo Products Corporation. Steroid nitrates. (2nd February 1967).

109355. George Angus & Company Limited. Improvements in and relating to shaft seals.

109356. Stamicarbon N. V. Process for increasing the optical purity of optically active lysinemonohydrochloride.

109357. Ciba Limited. Manufacture of aralkenyloxyguanidines.

109358. Ciba Limited. Manufacture of new pyrazino (1, 2-a) quinolines.

109359. Gebruder Honsberg. Automatic adjusting device for cutting tools.

109360. The Wellcome Foundation Limited. Chemical compounds and method. (19th February 1966).

109361. Societe Fives Lille-Cail. Cooling device for use in a continuous casting installation.

109362. G. D. Searle & Co., Process for the preparation of 21-trialkylsiloxypregna-3, 20-di one and congeners.

109363. H. S. Pareek. An electrically heated cushion.

Alteration of Dates

99394. The claim to priority date 12th May 1964 has been abandoned and the application dated as of 6th May 1965, the date of filing in India.

99734. The claim to priority date 1st June 1964 has been abandoned and the application dated as of 26th May 1965, the date of filing in India.

101168. The claim to priority date 28th August 1964 has been withdrawn and the application dated as of 17th August 1965, the date of filing in India.

108652. Ante-dated to 17th May 1965 under Section 5 of the Act.

108653. Ante-dated to 17th May 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99049. Cinerama, Inc. Photographic apparatus for producing undistorted images. Accepted on 17th January 1967.

Comprising a projector having a projection lens with a prescribed degree of pincushion distortion for producing sufficient vertical sag in projected image to compensate for image spill-over upon the screen, and a camera and a printer having a lens for introducing a prescribed degree of barrel distortion to compensate for a portion of said pincushion distortion.

99284. Joshi Engineers. Grabs. Accepted on 30th January 1967.

Comprising a piston with a piston rod in a cylinder J-sectioned jaws mounted on a plate bracket mounted on the piston, operating arms hingedly mounted on a cylindrical bracket at one of their ends and at the other end to the jaws means to move the piston rod upwardly and downwardly.

99321. M. & T. Chemicals Inc. Cyanoethylated compounds suitable for the electrodeposition of nickel. Accepted on 3rd February 1967.

The process for electro depositing nickel from an aqueous nickel electroplating bath coutaining a secondary brightener and as a pirmary brightener a cyanoethylated compound.

99326. The Anil Starch Products Limited. Production of bacterial amylase by tray culture method. Accepted on 3rd February 1967.

Growing Bacillus Subtilis *strain capable of producing anylase and/or protease on sterilised medium of* 40-60 *parts of wheat bran,* 20-35 *parts of corn meal,* 5-10 *parts of deoiled groundnut* 2-10 *parts of* $CaCo_3$ *and moisture content of* 50-60% *by weight in trays of thin aluminium sheet with droping cover and occupied by* ½-1/10 *department of tray.*

99353. Adamant Laboratories (Proprietary) Limited. Process for the manufacture of diamonds. Accepted on 4th February 1967.

Characterised in that the carbonaceous material is diamond.

99354. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S. p. A. Process for the preparation of caprolactam from cyclohexyl compounds. Accepted on 4th February 1967.

Characterised in that nitrosating agent is added through plurality of reaction zones to hexahydrobenzoic acid and so that the quantity of nitrosating agent added in single zone does not exceed 65% *of total at* 30-110°C.

99363. Zaklady Cynkowe "Silesia" Przedsiebiorstwo Panstwowe. Process for refining cadmium alloys and apparatus for carrying out the process. Accepted on 4th February 1967.

In which the metal in conducted from a melting furnace into a rectifying column to eliminate high boiling pointimpurities and the vapour from rectifying column is condensed in a condenser, wherein the metal is melted in a double chamber furnace provided with a charge feeding device and the condensate is refined with the help of a refining agent.

99394. Imperial Chemical Industries Limited. Surface-modifying treatment of shaped articles and polymer dispersions suitable for said modifying treatment. Accepted on 6th February 1967.

Shaped article made from oriented synthetic crystalline polyamide having a surface comprising active groups from the following: water solvatable polyoxy alkylene groups, acidic groups comprising sulphonic acid, phosphoric acid or carboxylic acid, groups which contain silicon or fluorine-based water repellent groups and polymeric groups containing alcoholic hydroxyl radicals.

99434. The British Petroleum Company Limited. Open gear lubricants and aerosol packs containing the same. (16th June 1964). [Addition to No. 86650]. Accepted on 8th February 1967.

Comprising petroleum bitument of penetration of 10-200 *mm*/10 *at* 20 *blended with* 0·5-5% *weight of creosote,* 1·0-5% *weight of wool grease and* 1.0-7·5% *weight of microcrystalline petroleumwax*

99449. Polymer Corporation Limited. Hydrocarbon dehydrogenation catalyst and process for dehydrogenation utilising the same. Accepted on 10th February 1967.

Comprises a bismuth compound on a support of which 60% *of the total pore volume is constituted by pores having a diameter in the range of* 1000 *to* 5000 *angstrom units.*

99456. Ford Motor Company, of Canada, Limited. Ignition system. Accepted on 10th February 1967.

Comprising an ignition coil a plurality of spark plugs, a distrinutor operated in timed synchronism with the engine a transistorised circuit coupled to source of electrical energy a starting circuit coupled to transisterized circuit & source of electrical emergy.

99470. Eastman Kodak Company. Azo dyes and textile materials dyed therewith. Accepted on 8th February 1967.

Coupling diazolized aniline with $H\text{-}R_1\text{-}N\text{-}R_3\text{-}Z$, R_1 being phenylene, R_2, hydrogen or alkyl, R alkylene a Z being phthalimido succinimido, maleimido or citraconimido groups.

99471. Eastman Kodak Company. Azo dyes and textile materials dyed therewith. Accepted on 8th February 1967.

Coupling diazolized 2-aminothiazole with $H\text{-}R_2\text{-}N\text{-}R_3\text{-}Z$, R_1 being phenylene, R_2 hydrogen or alkyl, R_3 alkylene and Z being phthalimido, succinimido, maleimido, and citraconimido groups.

99472. Eastman Kodak Company. Azo dyes and textile materials dyed therewith. Accepted on 8th February 1967.

Coupling diazotized 2-amino thiazole or like compounds with cyclic dicarboximidoalkyl tetrahydroquinoline components like N—β succinimidoethyl —1,2, 3, 4-tetrahydroquinoline.

99477. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Foam plastics and process for making them. Accepted on 13th February 1967.

Wherein a telomer is reacted in the presence of an inert expanding agent with a polyamine and an aldehyde.

99478. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Foam plastics and process for making them. Accepted on 13th February 1967.

Wherein a short chain polymer carrying CH acid radicals is reacted with an aldehyde and a reaction product of a polyamine and CO_2.

99512. Sir W. G. Armstrong Whitworth & Co. (Engineers) Limited. Improvements in or relating to turbocharged internal combustion engines. (15th May 1964). Accepted on 10th February 1967.

Characterised in that air pressure sensitive means is provided for controlling the pressure difference in the engine driven compresson in such a way that it will vary with the atmospheric pressure prevailing.

99645. Aktiebolaget Bofors. A cartridge supply case for loading the cartridge magazine of an automatic gun. Accepted on 15th February 1967.

Comprising suspension frame structure rear and front cartridge suspending means for suspending the cartridge and releasing means to release the suspending means thereby to allow the cartridge to fall into the magazine.

99689. West Point-Pepperell, Inc. Aldehyde fixation of polymeric materials to reduce the swelling, and products thus produced. Accepted on 15th February 1967.

Treating polymer with aqueous mixture of (1) aldehyde together with carbamate $R_1\ R_3\ N\ Coo\ R_2$ (2) aldehyde-carbamate condensation product and (3) aldehyde together with carbamate $H_2N.Coo\ R_3$ and heating same R_1 and R_3 being hydrozen, alkyl or carbocyclic aryl R_2 is alkyl or carbocyclic aryl.

99734. Imperial Chemical Industries Limited. Process for the copolymerisation of butene-1 with a branched 1-olefine, the product so obtained and shaped articles thereof. Accepted on 13th February 1967

Polymerising in presence of stereospecific catalyst to obtain solid crystalline copolymer with 5-50% by weight of monomer units of branched 1-olefine.

100185. Imperial Chemical Industries Limited. Process for the production of or elongated twisted article of a crystalline organic polymeric material. (1st July 1964). Accepted on 9th February 1967.

The extruded crystallisable organic polymeric material is elongated, this elongated material is fabrillated and an appropriate cross-section of the elongated material is twisted.

100207. Ciba Limited, Monoazopigments, process for their production, pigment preparations containing the same and organic materials pigmented therewith. Accepted on 10th February 1967.

Comprises coupling an arylamine with appropriate napthol or coupling a diazotised arylamine with 2:3 hydroxy napthoic acid then converting it into the acid chloride and finally condensed with an amine.

100242. Oy Tampella Ab. Carriage mounted gun. Accepted on 13th February 1967.

Charecterised in that an upper carriage carrying the barrel is mounted on a lower carriage and is rotable through at least 180°; with respect to the longitudinal axis of the gun.

100450. Imperial Chemical Industries Limited. Process for the preparation of butine-1 copolymers, and products of such process. (7th July 1964). Accepted on 15th February 1967.

Comprises polymerising a mixture of butene-1 and 1-olefine in the presence of stercospecific catalyst and recovering a solid crystalline copolymer.

100454. N. V. Appleton Pty. Ltd. Extension handle for louvre window actuating handle. (8th July 1964). Accepted on 16th February 1967.

Comprising a lever having at least ane prong.

100598. W. Dorst. Fatty acid ester resins and the use in binder compositions, dilutable with water. Accepted on 16th January 1967.

Reacting a polycarboxylic acid with a hydroxy containing fatty acid ester and an aromatic compound having a plurality of hydroxyl functions.

100634. Universal Oil Products Company. Continuous halogenation of aromatic hydrocarbons. Accepted on 10th February 1967.

Characterizes by passing both the excess and unreacted benzene and the monochloroBenzene product into the lower portion of the combination zone out of contact with the gaseous chlorine introduced into a mid portion of the combination zone and thus chlorine gas will be diluted with benzene vapour before its contact with the liquid benzene charged to the process.

100692. Imperial Chemical Industries Limited. Process for the preparation of film of fibre-forming mixtures from copolyesters and filaments or films prepared therefrom. (27th July 1964). Accepted on 20th January 1967.

Incorporating into a film or fibre-forming copolyester, a basic nitrogeneous organic compound.

100737. Shell Internationale Research Maatschappij N. V. Insecticidal compositions. (24th July 1964). Accepted on 24th January 1967.

Comprises at least one synergestic methylenedioxyphenyl compound and one insecticide.

100765. Columbian Carbon Company. Coagulation of dissolved elastomers. Accepted on 24th January 1967.

Comprising passing the elastomer solution and water to mechanical mixing zone and forming a microglobular emulsion by violent agitation and thereafter introducing the emulsion into agitated hot water contained in a coagulation zone.

100811. Leicester, Lovell & Co., Limited. Improvements in or relating to compositions curing rapidly under anaerobic conditions. (5th August 1964). [Addition to No. 94558]. Accepted on 27th January 1967.

Comprises an acrylic monomer with an organic peroxide and an acid or a salt capable of dissociating in water and water.

100886. Kurashiki Rayon Co., Ltd. Treatment of vinyl ester. Accepted on 2nd February 1967.

Vinly ester monomer is treated with a reagent chosen from dithizone, dimethyl glyoxime, p-benzo quinone and p quinone dioxime and the mixture distilled.

100891. The Eimco Corporation. Swinging flocculation. Accepted on 2nd February 1967.

Flocculating apparatus for treating liquids comprising a tank a paddle assembly, means above the liquid level in the tank for supporting said paddle assembly and means for oscillating said paddle assembly.

100907. Birfield Engineering Limited. Improvements in or relating to universal joints. (4th August 1964). Accepted on 2nd February 1967.

Comprising inner and outer members with crossing sinusoidal tracks 180° out of phase.

100910. Japan Gas-Chemical Company, Inc. Improvements in or relating to a process for producing vinyl chloride. Accepted on 2nd February 1967.

Characterizes by the removal of higher acetylenes from the cracked gas by absorving in a kerosene fraction and the isolation of vinyl chloride also by absorving in a kerosene fraction.

100917. Hindustan Lever Limited. Process for dyeing keratinous materials. Accepted on 3rd February 1967.

The material is dyed with a complex cation containing a five membered ring having a transition metal atom.

100922. Dunlop Rubber Company Limited. Process for the preparation of olefine interpolymer and a method for the preparation of cured latex therefrom. Accepted on 3rd February 1967.

The desired interpolymer is obtained by suitable preselection of the proportion of aliphatic and aromatic hydrocarbon in the solvent mixture.

100923. Dunlop Rubber Company Limited. Bonding textiles to rubbers. (20th August 1964). Accepted on 3rd February 1967.

Comprises treating the textile material with a composition comprising a mixture of an aqueous dispersion of an incompletely condensed phenolic resin and an aqueous polymer dispersion of a diene monomer and acrylonitrile, drying it and then coating with curable mono and/or diolefine rubber composition and heating.

100934. Veb Vereinigte Phosphatdungerwerke. Improvements in and relating to vacuum driers. Accepted on 3rd February 1967.

Wherein the tubes are disposed vertically one above the other, a uniform degree of filling for all the tubes being achieved through and overflow plate.

100980. Snam S. p. A. Process for the separation of ammonia. Accepted on 6th February 1967.

Characterised in that the separation is carried out by a two-stage absorption with aqueous ammonia solutions, the gases separated by absorption system being deprived of water and ammonia by condensation.

100991. M. Patay, L. Patay and P. Patay. Improvements in centrifugal pumps. (31st August 1964). Accepted on 6th February 1967.

Comprising an impeller, at the periphery thereof a plurality of similar impelling bodies, the rear end of each being in angular advancement of the forward end of the succeeding and an outlet path which is convergent and short viewed from the eye of the impeller.

101029. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Production of thermoplastics powders. Accepted on 9th February 1967.

Extruding molten thermoplastic through orifices as strands and breaking up same to powder by means of gas stream blown at more than 100 m/sec. velocity thereon in direction perpendicular to direction of extrusion.

101033. Westland Aircraft Limited. Improvements in or relating to air cushion vehicles. (28th August 1964). Accepted on 9th February 1967.

With at least one duct as a passage between jet nozzle and pressure generating means and priming means with in the duct.

101036. Laporte Titanium Limited. Improvements in and relating to the manufacture of titanium dioxide pigments. (21st August 1964). Accepted on 9th February 1967.

Titanium dioxide pigment particles are contacted with a polymeric organic titanium product consisting of a polymeric alkeylene glycol titanate.

101045. Shri R. R. Yadav. Ignition devices provided to hotplates operated by gas. Accepted on 9th February 1967.

Including a ring or strip having serrated surface and teeth slightly bent radially inwardly at the top fitted to the burner head.

101046. The Sarangpur Cotton Manufacturing Company Limited. A method for obtaining transparent and/or sculptured effects on textiles. Accepted on 9th February 1967.

Comprises the step of treating the fabric with inorganic acids and/or acidic salts to obtain localised effects.

101058. S. R. W. Kaule. A noise suppression device for preventing the recordal of noise signals. (23rd February 1965). Accepted on 10th February 1967.

Noise fields in the vicinity of ultrasonic detector are suppressed by picking up the noise fields, amplifying the noise pulses and using them to render the said detector insensitive for the duration of such noise pulses.

101062. E. K. Cole Limited. Improvements in or relating to inductance coil assemblies. (20th August 1964). (Addition to No. 840057. Accepted on 10th February 1967.

Comprising a block of magnetic material the block having longitudinal conductors, an apperture housing coils and a core on the longitudinal axis of the coils.

101088. The Carborundum Company. Production of refractory bodies. Accepted on 13th February 1967.

Comprises forming a mix containing 15% to 97% silicon carbide and finely divided silicious material selected from the group consisting of silica and clays, the mix having a silica content of about 1% to 30% forming the mix in a desired shape and heating it at temperature 1300°C to 1700°C in a nitrogenous atmosphere for sufficient time.

101089. The Dow Chemical Company. High density polyolefin foams. Accepted on 10th February 1967.

Characterizes homogenizing molten aliphatic olefin polymer and a foaming agent such as perfluorocyclobutane, perfluoro cyclopropane etc. under a pressure and subsequently releasing the composition to a zone of lower pressure.

101098. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of and devices for manufacturing a wire and wire manufactured by means of the said methods. Accepted on 10th February 1967.

Wire having a given diameter is rolled without intermediate treatment to a wire having a smaller diameter on the same rolling devices or a different set of rolling devices, having same large diameter with respect to wire.

101100. International Nickel Limited. Nickel-chromium alloys and castings made thereof. (Addition to No. 93383). Accepted on 13th February 1967.

An alloy contains less than 0·03% carbon, 0·01 to 0·1% boron, and 0·05 to 1·5% zirconium.

101112. Ciba Limited. New cinnamoylamino-isothiazolanthrones, process for their manufacture and polyester textile materials dyed or printed therewith. Accepted on 13th February 1967.

Comprises acylating 5-amind-1:9 isothiazolanthrone with a reagent which introduces acyl group of carboxylic acid of formula A-CH=CH-COOH where A is an aryl residue.

101119. Canada Iron Foundries Limited. Apparatus for continually and alternatingly surveying and aligning railroad track. (20th March 1965). Accepted on 13th February 1967.

Comprising a reference line establishing system, a detection system, and track aligning jackmeans operable in response to command signals from receiving member to correct track alignment.

101131. Inventa A. G. Fur Forschung Und Patentverwertung. Process for the manufacture of polylaurinclactam in powder form. Accepted on 8th February 1967.

Dissolving polylaurin lactam at 120-200°C in cycloaliphatic ketone with 5-7 ring members and precipitating same for solution obtained.

101151. Amphenol Corporation. Resistive element and variable resistor. Accepted on 16th February 1967.

An insulating base coated with an electrical resistance alloy consisting essentially of nickel, chromium and iron having a film coating thereon of a noble metal selected from the group consisting of platinum, rhodium and iridium.

101154. The British Petroleum Company Limited. Lubricating oil composition having extreme pressure lubrication properties. (8th September 1964). Accepted on 16th February 1967.

Comprising a lubricant base which contains dissolved therein 0·1 and 10% by weight based on the total composition of an allyl sulphoxide.

101168. Formica International Limited. Improvements in or relating to laminated metal plastics sheets. Accepted on 13th February 1967.

Comprising at least one resilient sheet material with a synthetic resin, said resilient sheet being adhesively bonded to at least one flexible metal sheet.

101189. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to amplifier circuit arrangements. Accepted on 16th February 1967.

The circuit also includes means for feeding in a second signal to the control grid, means for presenting a load and means for decoupling.

101218. Carrier Corporation. Automatically reversible gear pump. Accepted on 13th February 1967.

An internally toothed outer gear rotatable about a first axis, an externally toothed inner gear, a carrier member for rotatably journalling the inner gear in meshing engagement with the outer gear, means supporting the carrier member, suction port means in the support means communicable with the intake space and discharge port means in the support means communicable with the exhaust space.

101246. Tesla, Narodni Podnik. Improvements in and relating to multi-section internal packing of elongated fragile articles. Accepted on 13th February 1967.

Consist of two superposed moulded plastic plates having semicilndrical sections which gradually shape into semi hexagonal prism.

101247. Vyzkumny Ustav Matematickych Stroju. System for pictorial representation of a locus in three-dimensional space in cabinet projection, from data for three coordinates. Accepted on 16th February 1967.

Comprises means positioning the object, means transforming data comprising means controlling the position of the object, means multiplying said data and means adding the dates.

101283. Rohm & Haas Company. Water-Base paints. Accepted on 15th February 1967.

Comprising aqueous dispersion of one water-insoluble addition polymer like vinyl polymer, pigment dispersing agent and 1-3·5 lbs of propylene glycol.

101440. United Shoe Machinery Corporation. Improvements in or relating to self-locking fasteners. Accepted on 13th February 1967.

Comprising a member having a thread formed thereon, a plurality of recesses formed in the said member radially therein, a restlient deformable material when engaged by the threaded member restrains the lengthwise displacement of the said member.

101455. Siemens-Schuckertwerke Aktiengesellschaft. A position control apparatus. Accepted on 13th February 1967.

Having an electrical drive device, to de operated step-wise to take up each of a number of desired positions, and a circuit arrangement for controlling the derive device.

101471. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for preparing water-soluble dyestuffs. Accepted on 15th February 1967.

Comprising reacting an organic dyestuff molecule carrying af least one amino, alkylamino arylamino or hydroxy group with halogen substituted cyclobutane carboxylic acid chloride or sulfonic acid chloride or phosphonic acid dichloride or halogensubstituted cyclobutyl acrylic acid chloride.

101546. Sandoz Ltd. Process for the production of azo compounds. Accepted on 9th February 1967.

The coupling reaction is carried out in the presence of 2-amino-8-hydroxynaphthalene-6-sulphonic acid acid guanyl urea.

101550. The Metal Box Company Limited. Improvements in or relating to closures for containers and containers provided with such closures. (28th October 1964). Accepted on 10th February 1967.

Synthetic plastic closure including an annular skirt and a crown with dispensing apperture having a diaphragm integral therewith and a stud.

101574. Aktiebolaget Svenska Flaktfabriken. Air distributor. Accepted on 10th February 1967.

At least the external part of each of the annular vanes facing the plane of the front plate is formed by a hollow cylinder inclining to the plane of the hollow plate.

101599. Sir James Farmer Norton & Co. Limited. Improvements in or relating to wire drawing machines. (15th January 1965). Accepted on 10th February 1967.

Comprising one pulley on the control arm and one lead-in pulley between the control arm pulley and the succeeding die-box.

101637. Societe Rhodiaceta. Process for the production of poly (polymethylene terephthalates. Accepted on 10th February 1967.

By effecting polycondensation of a bis-(omega-hydroxy-n-alkyl terephthalate in the presence of bismuth amino-triethanolate as catalyst.

101695. Westinghouse Brake and Signal Company Limited. Vehicle braking systems having load-sensitive valves (8th October 1964). Accepted on 10th February 1967.

Having a low-sensitive valve the condition of which determines the degree of braking obtainable by the system and the condition of which is determined by the position of a cam follower.

1 1754. C. W. Cheney & Son Limited. Improvements in or relating to mounting plates for handles for suitcases and like articles of luggage. (14th October 1964). Accepted on 10th February 1967.

Comprising a plate proper provided with a unitary and integral projection therefrom which is slotted to receive the handle trunnion the slot extending into a recess or gap in the plate.

101783. Westinghouse Electric Corporation. Electrical inductive apparatus. Accepted on 15th February 1967.

Having a cast insulating means comprising thermosetting epoxy resin encapasulating the windings and having the same coefficient of thermal expansion as the windings.

101814. Lincoln Valves Limited. Improvements in valves. (5th October 1964). Accepted on 10th February 1967.

A valve closure member located within the valve body and consisting of two identical circular discs spaced apart in parallel co-axial relationship, sealing means consisting of two annular seats in said body.

101852. Westinghouse Brake and Signal Company Limited. Load-dependent braking apparatus. (27th October 1964). Accepted on 13th February 1967.

Comprisng plurality of elements the position of which is dependent upon the load and a member whose position determines the degree of the braking effort.

102016. B. D'Costa. A new artistic and/or decorative lamp shade. Accepted on 13th February 1967.

Comprising a member of units each consisting of a thin disc bent to form a geometrical shape said units being joined together by metal strips having tongues or projections corresponding to slits in said units, each said units also having an opening at the edge of which is punched out a tongue or projection.

102089. Allied Chemical Corporation. Improvements relating to the separation of carbon dioxide and amonia from mixtures with water vapour. Accepted on 15th February 1967.

Comprises introducing the mixture into a gas stripper and also injecting into it at a level below the lowest point of the stripper a mixture of carbon dioxide and oxygen containing 0.1 to 20% by weight of oxygen and allowing it to pass up the stripper.

102110. B. Tinnes. Intermediate ladle for the continuous casting of metal. Accepted on 15th February 1967.

Characterised by its construction as a vessel which can be filted from its operative position with displacement of the pivotal axis or can be swung about an axis coincident with the stream of molten metal from the ladle.

102127. Soletanche. Apparatus for measuring the speed of flow and throughput of liquid. Accepted on 9th February 1967.

Movable device pivotally carried under indifferent equilibrium conditions inside a casing and carrying at one end a blading adapted to be immersed in a stream of fluid a portion of said rod extending across the line connecting a source of light with a photo cell feeding the imput of a D.C. amplifier through an electric damping system.

102419. Hitachi, Ltd. Signal generating apparatus. Accepted on 16th February 1967.

Comprising a time constant circuit a compensating circuit and an output circuit having semi conductor switching means.

102449. Scovill Manufacturing Company. Mounting cap for an aerosol valve. Accepted on 13th February 1967.

Comprising an outer cup-shaped member and an inner cup-shaped member, the bottom wall of the former having a portion tapering downwardly and radially inwardly.

102657. The Firestone Tire & Rubber Company. Apparatus for applying elastomeric material to a vehicle tire carcass. Accepted on 13th February 1967.

Comprising rotating drum and frame mounted on wheels characterised by means on the frame to receive elastomeric material and by means for rotating the drum.

103032. Westinghouse Electric Corporation. Insulated electrical conductors and coils and method of making the same. Accepted on 13th February 1967.

Comprising an elongated strip of metal foil, on the opposing sides of which flexible resinons insulating film is bonded to form an unitary laminated structure in such a way so that a channel is formed in co-operation with the edge of the foil.

103103. General Electric Company. Improvements in or relating to cutting tool. Accepted on 13th February 1967.

Characterised by a disposable cutting insert having a hole, a shank having a recess and a hole portion of which is offset and a pin to retain the insert over the shank.

103179. Farbenfabriken Bayer Aktiengesellschaft. A process for the preparation of cross-linked polymers. (8th October 1965). Accepted on 13th February 1967.

Comprises polymerizing first monolifinically unsaturated polymerizable compoun ds containing cyanic acid groups and then crosslinking the polymers at temperature from 70 to 200°C and/or by alkalin reacting substances.

103464. S. N. Pissarides. Improvements in ships hatch covers and combined cargo-handling apparatus. (22nd January 1965). Accepted on 13th February 1967.

Comprising the hatch cover as one piece with jacks at its fore-and-aft ends and a moving cargo-operating trolley with load supporting means.

103609. Holding Intercito SA. Apparatus for loading transport bands or the like with rod-like elements, particularly welding electrodes. Accepted on 10th February 1967.

Comprising a supply magazine for welding electrodes, substantially vertical guide channel means dispased beneath said supply magazine for receiving welding electrodes, transport mechanism located between a lower discharge end and a conveyor means.

104113. Allied Chemical Corporation. Preparation of isocyanate compositions. Accepted on 10th February 1967.

Tolylene diamine phosgenation product is distilled until the distillate contained 80 ±2% by weight of 2,4-tolylene dilsocyanate and 20±2% by weight 2,6-diisocyanate and sufficient quantity of this distillates is returned to the distilland to bring the amine equivalent of the distilland to between 90 and 125.

104124. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Production of sodium bicarbonate. Accepted on 31st January 1967.

Characterises a process for the production of sodium bicarbonate by stepwise reaction of ammonia and carbondioxide in a recycled mother liquor containing sodium chloride.

104546. Shyamapada Mookerjee. Ticket perforating machine. Accepted on 13th February 1967.

Machine body of substantially 'C' shaped construction with a pressing lever hinged to the body head where the said body head houses a pressing stud fitted with a guiding rod, a punch carrier and a spring, and the machine being provided with a number of dies and punches.

104576. Rhone-Poulenc. S.A. Process for the preparation of 4-hydroxybenzonitrile. Accepted on 13th February 1967.

By heating anisic acid and a nitrile to form anisonitrile and demethylating it.

104749. V. N. Kapoor. Improvement in and relating to refractory or heat and or sound insulating materials. Accepted on 13th February 1967.

Consists in expanding or calcining vermiculite, mixing with clay, saw dust and water, moulding and then firing.

105889. The Dow Chemical Company. Process and apparatus for molding cellular plastic articles. Accepted on 15th February 1967.

Characterised in that steam is injected into the mould which produces a first predetermined pressure in the mold greater than the desired end product pressure and the steam injection is reduced to obtain a lower pressure equal to the end product pressure.

108652. Western Electric Company, Incorporated. Integrated circuit devices and methods of making them. (14th October 1964). [Divisional date 17th May 1965]. Accepted on 15th February 1967.

Comprising one or more substrate bodies each of which comprises one or more circuit elements and a pattern of matallic film interconnections between them film overlying a portion of the sorface of each body the thickness of portions of the film between the bodies being sufficient to support the bodies spacedly.

108653. Western Electric Company, Incorporated. Selective removal of material by cathodic sputtering, and apparatus therefor. (14th October 1964). [Divisional date 17th May 1965]. Accepted on 15th February 1967.

Producing in a chamber containing gas at low pressure a glow discharge region peropherally disposed around but not in contact with the body.

Amendment Proceedings

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Allied Chemical Coproration, a corporation organised and existing under the laws of the State of New York, United States of America, of 61, Broadway, New York, 6, New York, United States of America, seek leave to amend the description and claims in the specification in respect of the Patent Application No. 92283. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933), in the Patent Office, 214, Lower Circular Raod Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

Registration of Assignment, Licences etc. (Patents)

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests.

60655, 68442, 68443, 68444, 70062, 72560, 88549 } Stewartes and Lloyds Limited.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 83990—Mitsubishi Rayon Co., Ltd.

The Patent ceased on the 26th October, 1965, owing to non-payment of renewal fee wthin the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 13th August 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th April 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 the for restoration of following patent :—

No. 57255—Christopher George Beard; & others.

The patent ceased on the 4th May 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 24th December 1966. Any person may give notice of opposition to the restoration by leaving an applicaion on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th April 1967.

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 85599—Jyoti Limited.

The patent ceased on the 19th July 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 10th December 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th April 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129574. Govindachar Selvappullai, Quarters opposite department of electrical communication engineering, Indian Institute of Science, Bangalore 12, Mysore State, a Citizen of India, "Container-*cum*-basket", September 29, 1966.

Class 3. Nos. 128956 and 128957. Amar Brushes, 7/58, Tilak Nagar, Kanpur (Uttar Pradesh) (An Indian Partnership firm), "Paint brush", July 13, 1966.

Class 9. Nos. 129384. to 129388. Hindustan Embroidery Mills Private Ltd., Chheharta (Amritsar), "Lace", September 9, 1966.

Class 13. Nos. 129368 to 129372. The Sassoon Spg. & Wvg. Co. Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", September 6, 1966.

Class 13. Nos. 129376 to 129379. The Bombay Dyeing & Mfg. Co., Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton Textiles", September 6, 1966.

Class 13. Nos. 129409 to 129411. The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile Goods", September 12, 1966.

Class 13. Nos. 129412 and 129413. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality. "Textile Goods", September 12, 1966.

Class 13. No. 129414. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile Goods", September 12, 1966.

Class 13. Nos. 129415 to 129417. The Bombay Dyeing & Mfg. Co., Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Fort, Bombay 1, "Cotton Textiles", September 13, 1966.

Class 13. Nos. 129418 to 129423, 129425 to 129429 and 129431 to 129434. The Shree Niwas Cotton Mills Ltd., an Indian Firm, at Delisle Road, Bombay 13, "Cotton Piecegoods", September 13, 1966.

Class 13. No. 129444. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay 1, "Cotton Textiles", September 17, 1966.

Class 13. Nos. 129448 to 129462 and 129464 to 129477. Jiya Jeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", September, 19, 1966.

Class 14. Nos. 129373. The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods" September 6, 1966.

Copyright Extended for a second period of Five Years

Design Nos. 111712 and 111713, Class 5.

Cancellation of the Registration of Designs

The applications have been made by Dharam Dev Saigal, for cancellation of the registration of Design Nos. 128164, 128165 & 128166, in the name of Ugaggar Singh Trading as M/s. Loyal Safe Works.

M. L. KAPOOR,
Controller General of Patents, Designs and Trade Marks.

for No. 98338 *read* No. 98388

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

18th February 1967

109364. Council of Scientific and Industrial Research. Volume change measuring apparatus.

109365. Dr. Biraja Bilash Paul. Continuous cane juice sulphitor.

109366. Mohammed Y. Khan, Mohammed Ayubkhan and Mohammed I. Khan. Improvement in cine chairs titled as jubliant cine chair.

109367. Dr. P. N. Choudhry, and R. S. L. Srivastava. Improvement or relating to signalling systems or the like.

109368. Seelam R. C. Rao. Coffee grinding machine.

109369. Wilson & Longbottom Limited. Improvements in weft selecting mechanisms for looms for weaving.

109370. Babcock & Wilcox Limited. Improvements relating to liquid fuel burners. (22nd February 1966).

109371. Aluminium Laboratories Limited. Electrical resistance heater for a stream of gas.

109372. Aluminium Laboratories Limited. Distillation of metal chlorides.

109373. Wilmot Engineering Company. Dryer.

109374. The Commonwealth Trust Limited. Novel textile material.

109375. The Babcox and Wilcox Company. Cold working metal. [Divisional date 27th October 1966].

109376. P. Singh. A measuring rod for measuring the depth of the liquid in a tank.

109377. T. B. Shaw. Pest repelling device.

20th February 1967

109378. Lodzkie Zaklady Aparatury Elektrycznej "Elan". Alternating current control switch.

109379. R. K. Arora and M. L. Arora. Improvements in or relating to brush-*cum*-polishing material container.

109380. Vandervell Products Limited. Improvements in or relating to composite metal bearing strips. (23rd February 1966).

109381. Imperial Chemical Industries Limited. Transporting particulate polymers (28th February 1966).

109382. Rohm and Haas Company. Extrusion.

109383. Celfil Company Establishment. Tobacco smoke filter plugs made of paper and method for improving their taste qualities. (23rd February 1966).

109384. Sandvikens Jernverks Aktiebolag. Improvements in or relating to razor blades. (5th January 1967).

109385. Sandvikens Jernverks Aktiebolag. Improvements in or relating to razor blades. (5th January 1967).

109386. Midland-Ross Corporation. Railway coupler with reversible lock set.

109387. J. Binns. Anti-backlash carriage feed mechanism. (16th November 1966).

109388. The Upjohn Company. Process for the preparation of lincomycin-2-acylates.

109389. L. R. Khan. Hearing protection system not involving loss of hearing capability.

109390. Merck & Co., Inc. Phenylbenzoic acid compounds.

109391. Sandoz Ltd. Monoazo dyes and a process for their production.

109392. Sandoz Ltd. Monoazo dyes and a process for their production.

109393. Roussel Uclaf. Processes for the preparation of novel estrane derivatives, and compositions thereof. (16th March 1966).

109394. N. V. Philips Gloeilampenfabrieken. Photosensitive lacquer and the use of this lacquer in manufacturing picture screens for cathode-ray tubes.

109395. Dr. G. V. Ramanen. Three dimension motion picture with stereophonic sound system.

109396. C. A. Andritsos. Tooth brush gum massaging with nozzles and auxiliary accessories for tooth cleaning and gum massaging, with or without use of tooth paste, by supply of water, or of therapuetic solution, and manner and means of its construction.

109397. E. V. Kholodnov, B. I. Stavitsky, N. V. Lomov and J. A. Shevelev. Machine for spark discharge working of holes in workpieces made of current-conductive materials.

109398. Beteilingungs-Und Patentverwaltungsgesellschaft Mit Beschrankter Haftung. Adjustable throat-armour. [Addition to No. 95877].

109399. W. C. Heraeus GmbH. Compound materials for electrical contacts.

109400. Festo Elgi Private Ltd. An improved heater.

109401. Scovill Manufacturing Company. Improvements in or relating to a power operated blender. (11th May 1966).

21st February 1967

109402. Worthington Corporation. Multi-Chamber rotary vane compressor.

109403. The Cross Company. Mechanical Transfer.

109404. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the dyeing and printing of fibrous materials of linear polyesters.

109405. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the dyeing of cellulose fibers with reactive dyestuffs or of mixtures of cellullsic and polyester fibers with reactive and dispersion dyestuffs.

109406. E. B. Isserlin and J. A. Bystrov. Noncontact current-sensing device.

109407. V. I. Prikhodko and B. V. Pankov. Improvements in or relating to winch.

109408. A. P. Tomillv, S. L. Varshavsky, I. L. Knunyants, J. D. Smirnov, V. A. Klimov, N. T. Eskkn, and A. E. Preshov. Method for preparation of adiponitrile.

109409. Vsesojuzny Nauchno-Issledovatelsky Institut Chainoi Promyshlennosti. Collur derived from vegetable raw material and method of manufacturing the same.

109410. Gosudarstvenny Nauchno-Issledovatelsky Institut Teplienergetich-Eskogopriborostroenia. Electric motor.

109411. Vsesojuzny Nauchno-Issledovatelsky Institut Khlebopekarnoi Promyshlennosti. Method of making white bread.

109412. Vsesojuzny Naunchno-Issledovatelsky Institut Elektrotermicheskogo Oborudovania. A method of melting steel and an electric furnace for effecting same.

109413. E. I. Du Pont De Nemours and Company. Novel compounds and processes.

109414. The Dunlop Company Limited. Method for the manufacture of rubberized textile filamentary fabrics. (26th February 1966). [Addition to No. 93407].

109415. The Dunlop Company Limited. Bonding of dissimilar materials. (26th February 1966).

109416. The Dunlop Company Limited. Improvements in and relating to adhering dissimilar materials. (26th February 1966). [Addition to. No. 81762].

109417. B. H. Technical Developments Limited. Foamed polyurethane compositions. (28th February 1966).

109418. Farbenfabriken Bayer Aktiengesellschaft. Quarternary ammonium salts.

109419. Chemische Fabrik Pfersee G.m.b.H. The manufacture of water-soluble condensation products which can be hardened by heat.

109420. Lipha. New heterocyclic derivatives of guanidine and processes for the preparation thereof.

109421. N. V. Philips' Gloeilampenfabrieken. Device for modulating a beam of radiation.

109422. The Metal Box Company Limited. Improvements in boxes made of cardboard or similar material. (5th October 1966).

109423. *Sandvikens Jernverks Aktiebolag*. Method of and apparatus for forming tubes.

109424. J. Binns. Tool holder.

109425. Fram Filters Limited. Improvements in or relating to air filters. (23rd March 1966).

109426. Ciba Limited. Manufacture of new peptides having an acth activity. [Addition to No. 100327].

109427. Ciba Limited. Process for the temporary protection of amino groups in peptide syntheses.

109428. Merck & Co., Inc. Substituted indolyl acids and process for their manufacture. [Divisional date 14th January 1964].

109429. C. E. Hoing. Method and apparatus for dry sorting the constituents of a homogenous mixture.

109430. Veb Berliner Akkumulatoren und Elementefabric. Method for the manufacture of electorodes for lead accumulators.

22nd February 1967

109431. M. A. A. Khan. Moulds for preparing glass, globes and the like.

109432. Rohm and Haas Company. Laminate.

109433. Corn Products Company. Process for producing sweet non-crystallizing syrup.

109434. E. Y. Kamlet. Nirtogenous fertilizers and process for preparing same.

109435. Birfield Engineering Limited. An improved tool balancer. (2nd January 1967).

109436. Stone & Webster Engineering Corporation. Nuclear reactor direct pressure suppression containment.

109437. Metallgesellschaft A. G. Absorption apparatus.

109438. B. Garodia. Step voltage regulator. [Addition to No. 109258].

109439. United States Pipe and Foundry Company. Casting of ductile iron.

109440. Kureha Kagaku Kogyo Kabushikk Kaisha. A process for the manufacture of vinyl chloride.

109441. J. M. Leach. Improvements relating to material handling conveyors.

109442. M. S. Daswani. Improved carbonized or graphitized rayon.

109443. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Hallgenated steroids and process for the manufacture thereof.

23rd February 1967

109444. Phatic Chandra Das. Improvements in or relating to "Oral-contraceptive (long-acting)" bearing patent No. 89105. [Addition to No. 89105].

109445. M. V. Chitale. A portable epidiascope.

109446. Hindustan Lever Limited. Toilet bars. (25th February 1966).

109447. Yashwant Company. Improvements in or relating to pre-cast gutters or the like and method of fixing the same.

109448. Ciba Limited. Manufacture of new pyrazino [1, 2-1]-quinolines.

109449. Basic Incorporated. Process for dead burning dolomite. (3rd May 1966).

109450. Foseco International Limited. Compositions for the protection of metal surfaces at elevated temperatures. (24th February 1966).

109451. J. Boige. Process for the industrial manufacture of hydroxocobalamin.

109452. Fisons Industrial Chemicals Limited. Distillation. (12th March 1966).

109453. V. J. Emmanuel. Pneumatic tea-blender.

24th February 1967

109454. R. P. Tiwary. Phosphate glasses.

109455. V. G. Hange. Irrigation pump without any fuel.

109456. S. S. Ponkshe. An improved chemical compound as sealing wax in collapsible tube.

109457. M. D. Bhate. An improved chemical compound for sealing threads on screws.

109458. M. H. Desai. Mechanical seal.

109459. The British Drug Houses Limited. Organic compounds. (14th March 1966).

109460. J. R. Giegy A. G. Process for the production of dyestuffs of the anthraquinone series which are difficultly water soluble.

109461. Centre De Recherches De Pont-A-Mousson. Centrifugal casting machine.

109462. American Flange & Manufacturing Co., Inc. Plastic closures and method of manufacture.

109463. Pyrotector, Incorporated. Improvements in or relating to a particle detector.

109464. Progil. Apparatus for granulation and drying fluid products.

109465. E. I. Du Pont De Nemours & Company. Product. [Addition to No. 100340].

109466. Algemene Kunstzidje Unie N. V. Improvements in or relating to an apparatus for spinning a multifilament yarn and to yarn produced thereby.

109467. Giddings & Lewis-Fraser Limited. Improvements in or relating to traverse mechanisms. (2nd March 1966).

109468. Palitex Project-Company G.m.b.H. Belt drive.

109469. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Δ 14-pregnene-3, 21-diol-20-one-21 acylates and process for preparing them.

109470. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of tetrahydropyranylethers of steroids.

109471. Carl Freudenberg. Method of and device for the measuring of the radial forces exerted by sealing rings made of elastomeric materials of by annular springs for such sealing rings.

Alteration of Date

108071. Ante-dated to 24th May 1965 under Section 5 of the Act.

101133. Post-dated to 24th August 1965 under Section 5 of the Act.

99648. The claim to priority date 20th October 1964 has been disallowed and the application dated as of 21st May 1965, the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra., if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

96317. National Dairy Research Institute. Process for producing bacterial rennet-like enzymes. Accepted on 15th February 1967.

Culture medium prepared by adding a carbohydrate source to cheese whey and/or butter milk furmented with strains of spare forming bacteria.

98662. Aktiebolaget Bofors. Cartridge Magazine of a gun. Accepted on 18th February 1967.

A cartridge support means extending horizontally in the longitudinal direction of the cartridge compartment and located below the lower edge of the inlet port, said means being movable between a first position and a second position a releasable retaining means connected to said means.

98978. Dynamit Nobel Aktiengesellschaft. Improvements in or relating to blank ammunition projectiles. Accepted on 21st February 1967.

A projectile case for blank ammunition projectiles made of thermoplastics material comprising a nose portion, and a portion adjoining the same.

99092. Aktiebolaget Bofors. A magazine for cartridges of ammunition of an automatic gun. Accepted on 17th February 1967.

A cartridge retaining means which is pivotal about an axis located sideways of the path along which the catridges are to pass downwardly through the compartment.

99093. Aktiebolaget Bofors. A device relating to a cartridge magazine of an automatic gun. Accepted on 17th February 1967.

A cartridge retaining means comprising a first retaining member of a releasable catch, said first retaining member in a position in which the cartridge support member is located in the active position for preventing a cartridge moving downwardly through the compartment co-operating with a second retaining member of the releasable catch.

91149. Escorts Limited. Improvements in or relating to shock absorbers. Accepted on 24th January 1967.

Its valve which allows the filling of the fluid from the pressure or cylinder tube under the piston to the space above the piston in the said tube, is a half-ball-shaped piston valve having a piston valve seat correspondingly shaped.

99316. T. J. Karass. Strapping. (2nd July 1964). Accepted on 3rd February 1967.

Method of making strapping comprising melt-extruding polymeric material through a die heating ribbon uniformly drawing it away from orifice and heating again during which stretching it to orient the molecules and then annealing the ribbon.

99373. J. R. Geigy A. G. Process for the production of heterocyclic aromatic pigments. Accepted on 6th February 1967.

Reacting a naphth- [2,3,6-] indolizine-6, II dione-12 carboxylic acid halide with a phenyl amine.

99376. M & T Chemicals Inc. Method of protecting a medium from attack by micro-organisms, compositions resistant to micro-organisms and media, such as paper and plastic made resistant therewith. Accepted on 6th February 1967.

Applying to the material to be protected an effective amount of a compound Rn SbX_{3-n} wherein R is alkyl, alkenyl, alkynyl, aryl, cycloalky l or cycloa l-kenyl, X is halide, carboxylate, alkoxide, oxide, hydroxide, sulfide or mercaptide and n is an integer less than 4.

99447. Atmospheric Control Limited. Damper box for dust extraction. (3rd June 1964). Accepted on 10th February 1967.

Has a damper plate adapted to be moved to close and open an opening into a ducting of a dust extraction system and damper plate operating means.

99451. Vick International Ltd. Improvements in or relating to disinfectant compositions. (15th May 1964). Accepted on 10th February 1967.

Comprising an admixture of a trichloroisocyanuric acid or a dichlroisocyanuric acid or its salts thereof with a water soluble aryl N-chlorosulphonamide and a water soluble solid organic surface active agent.

99473. British Industrial Plastics Limited. Compositions having improved self-extinguishing properties and articles manufactured therefrom. Accepted on 13th February 1967.

Comprises an unsaturated polyester resin and lead sulphite or zinc sulphite.

99474. Farbenfabriken Bayer Aktiengesellschaft. Organopolysilixane composition vulcanisable at room temperature. (29th January 1965). Accepted on 13th February 1967.

Comprising an organo siloxane and a N-silyl-substituted carboxylic acid amides.

99493. The British Iron and Steel Research Association. Improvements in or relating to the formation of aluminium coatings. (15th May 1964). Accepted on 13th February 1967.

Comprising the steps of blacing the stack or coil in a gas tight enclosure, reducing the pressure in enclosure, and then filig it with oxygen.

99536. Rohm and Haas Company. Process for the preparation of esters of unsaturated carboxylic acids and addition polymers containing esters so prepared. Accepted on 15th February 1967.

Transestertifying a starting ester with an N-substituted morpholinone-2.

99544. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Dyeing preparations for the production of water-insoluble azo dyestuffs on the fiber. Accepted on 17th February 1967.

By reaction of diazotised 1-amino-2-methyl-3 chlorobenzene with cyanamide in the alkaline medium.

99581. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S.P.A. Improved process for the preparation of spinnable solutions of acrylonitrile polymers or copolymers having a high-acrylonitrile contents. Accepted on 13th February 1967.

Polymerising at least 50% of monomers containing acrylonitrile in dimethyl formamide and stopping the process where 30 to 40% has been converted.

99584. Dr. Otto A. Becker. Improvements in and relating to furniture. Accepted on 18th February 1967.

The angles embrace the inner body to enable plastic coated sheets to be used and the positioning may be secured by hidden means.

99591. Council of Scientific and Industrial Research. Improvements in/or relating to recovery of zinc values from by-product zinc compounds. Accepted on 20th February 1967.

Comprising electrolytic of suspension of powdered waste in sodium hydroxide solution.

99648. Defibrator Aktiebolag and Aktiebolaget Knutsilplatar. Sieve plate for manufacture of fibre board and similar board products. Accepted on 17th February 1967.

Characterised in that the slats in one row are formed to overlap the stats in an adjacent row.

99653. D. G. Kale. Cloth printing machine by drip process. Accepted on 22nd February 1967.

Comprises a wooden structure supporting thereon a design roller consisting of an axle with design discs and a handle a pressure roller located above and at least one colour box located below the design roller.

99683. Acf Industries. Valve. Accepted on 24th February 1967.

Comprising a valve body having a valve chamber and flow passages in communication with the chamber in which is disposed a valve member, means to move the valve member and a pair of seat assemblies position on opposite sides respectively of the valve member.

99685. Roussel-Uclaf. Preparation of aryl sulphones. Accepted on 16th February 1967.

Reacting under anhydrous conditions an aryl 3-methyl-2 butanyl sulfone with a senecioic acid derivative in the presense of a base and a solvent.

99735. Shell Internationale Research Maatschappij N. V. Process and apparatus for the automatic control of a continuous distillation process. Accepted on 23rd February 1967.

Wherein ratio between the vapour flow and the liquid flow remains entirely or substantially unchanged.

99824. Koratron Company, Inc. Creased and shaped washable garments and method of manufacture thereof. Accepted on 23rd February 1967.

The fabric impregnated with a thermosetting resin is partially dried, cut to garment size and sewn, then imparted with the desired crease and then finally cured.

99858. Allied Chemical Corporation. Purification of aluminium sulphate. [Addition to No. 90521]. Accepted on 17th February 1967.

Wherein chromium impurity is removed by (1) adding chlorine, (2) mixing with water insoluble amine anion exchanger, (3) separating purified aluminium sulphate, (4) reactivating amine exchanger (5) treating same to reduce its sulphate content, and (6) recycling thus reactivated exchanger in stold (2).

99870. Birfield Engineering Limited. Improvements in or relating to universal joints. (11th June 1964). Accepted on 21st February 1967.

A joint characterised by inner and outer member coupled by a series of torque transmitting balls engaging registering grooves in the member.

99913. Western Detail Manufacturers Limited. Process for the purification of argon and helium and apparatus therefor. (7th June 1964). Accepted on 23rd February 1967.

Passing the gas through a chamber containing depleted uranium so as to bring the gas into intimate content with uranium at temperature 200 to 1200°C.

99947. E. I. Du Pont De Nemours and Company. Synthetic film forming polymers in organic liquids, their method of preparation and coating compositions and their preparation using said polymers. Accepted on 18th February 1967.

A backbone polymer is reacted in a bulk reaction with a grafting monomer in the presence of an initiator.

99999. Allied Chemical Corporation. New colour compositions. Accepted on 21st February 1967.

Comprises a colour lake of an organic dyestuff and a lipophilic long chain monocarboxylic fatty acid partial ester of a hexitol anhydride.

100032. Muanyagipari Kutato Intezet. A process for preparing bright coatings being hardened quickly and without tackiness. Accepted on 23rd February 1967.

Comprising coating the surface with a mixture of unsaturated esters and/or unsatu rated (polyestors, phenyl-acetophenone or its alkyl or arly derivatives and if desired, vinyl or allyl comonomers and subjecting the coating to ultraviolet irraditation.

100133. Rohm and Haas Company. Improvements in or relating to lubricant or fuel compositions. Accepted on 23rd February 1967.

A lubricant or fuel composition comprises a natural or synthetic lubricant or a combustible fuel and as an essential ingredient, a compound selected from the group of polybutylene succinimide of amine ethyl and ethylene urea.

100451. Shell Internationale Research Maatschappij. N. V. Improvements in or relating to a grease. [Addition to No. 84571]. Accepted on 20th February 1967.

Comprising metal carbonate of group IA, IB, IIB, IVB, VIIA or VIII of periodic table lubricating oil and oleophilic clay.

100492. Agripat S.A. Process for the production of new s-triazine organo tin derivatives and biocidal agents containing them. Accepted on 16th February 1967.

2-mercapto-4, 6-bis-amino-s-triazine and bis-(bi-n-butyltin) oxide are reacted.

100604. United States Atomic Energy Commission. Improved multistage flash evaporator for desalination of water. Accepted on 22nd February 1967.

Comprises plurality of vertically stacked trays within concrete shell means for distributing heated brine to each tray plurality of condenser tubes in coils opposite thereof, means for pumping cooling sea water through there coils, bottom channel to shell to collect product liquid by gravity plurality of downwardly extending vertical baffles aligned to divide shell into series of compartments with decreasing temperature pressure plurality of upstanding vertical baffles carried by tray bottoms to form weirs for liquid between compartment and means to collect brine and product liquid from last compartments.

101012. Maschinenfabrik Augsburg-Nurnberg Aktiengesellschaft. Device for removing the lower bearing shell of the crankshaft bearing of an internal combustion engine. Accepted on 7th February 1967.

On the outer shell-surface of the bearing shell there are provided one or more grooves which extend over a part of the periphery and into which pressure-oil is introduced from a hydraulic, hand pump via the pressure pipe.

101031. Kaiser Aluminium & Chemical Corporation. Metal salts and process for preparing them. Accepted on 9th February 1967.

Comprises reacting the Chlorides solution with corresponding acid in presence of water immiscible organic liquid phase containing an alkylamine.

101043. Shell Internationale Research Maatschappij N. V. A Process and apparatus for the chromatographic separation of a fluid mixture. Accepted on 9th February 1967.

Comprising introducing a volume of fluid into a stream of a first carrier gas, passing the carrier gas and volume of fluid into a zone for chromatographic separation, terminating the flow of stream of carrier gas, passing a stream of second carrier gas and measuring the effluent with a chromatographic detector.

101061. Machinery Manufacturers' Corporation Limited. Means for stopping the rotation of the doffer cylinder and connected mechanism of carding engines. Accepted on 10th February 1967.

Where in there is provided a solenoid, a connecting rod, one or more sensor switches on actuation causes the armature to be operated to render the said device.

101073. The dow Chemical Company. Hollow fibers having improved per selectivety. Accepted on 10th February 1967.

Characterised in melt extending composition comprising thermoplastic polymer admixed with plasticizer and then extruding plasticizer from formed hollow fibre.

101074. Shell Internationale Research Maatschappij N. V. A grease. Accepted on 10th February 1967.

Comprises a metal carbonate and/or a metal sulphide, a lubricating oil, an oleophilic clay and an ester.

101078. Agripat S. A. New organic tin-boron compounds process for their production and biocidal agents containing them. Accepted on 13th February 1967.

Bis-(tri-n-buty-tin) oxide is reacted with boric acid or a reactive derivative thereof.

101082. Saunders Valve Company Limited. Fluid Controlling valves. (20th August 1964). Accepted on 13th February 1967.

Substantially straight through bore and a seating formed in part by an opening extending from one side of the valve casing of generally tapering form, the closure member being a diaphragm of shape corresponding to the seating and clamped at its margin to the valve casing in which the diaphragm is shaped so that there is substantially no stretching.

101126. General Electric Company. Improvements acceleration and speed control system. Accepted on 16th February 1967.

Characterised by first and second signals responsive to speed and acceleration respectively of a prime mover and gating connected to both the signals to supply only one of them to the servo means.

101133. Shell Internationale Research Maatschappij N. V. Process for the removal of sulphur dioxide from gas mixtures and acceptors to be used in this process. Accepted on 16th February 1967.

Oxygen containing gas mixture is contacted at a temperature above 300°C with an acceptor consisting of a solid carrier material containing copper oxide.

101136. Svenska Rotor Maskiner Aktiebolag. A screw rotor machine for elastic working fluid. (11th September 1964). Accepted on 16th February 1967.

Each female rotor land is provided with an addendum located outside the pitch circle of the rotor and having a radial extent, the length of which is 18-37·5% of the length of the chord to the pitch circle lying within the land.

101164. Westinghouse Electric Corporation. Liquid resinous-filler casting composition and method of encapsulating an electrical member in the same. Accepted on 17th February 1967.

Comprising for each 100 parts by weight of epoxy resin, epoxy novolac resin mixtures thereof, about 400-575 parts by weight or beryl, about 50-90 parts of anhydride curing agent and 0·5 to 2·0 parts of a resin curing accelerator.

101165. Ideal Industries Inc. Apparatus for feeding textile material. Accepted on 17th February 1967.

Comprises a pair of intermeshing feed rolls and means for permitting the first roll to change its meshing relation according to variations in density and thickness of passing material.

101166. Corn Products Company. Process for treating caramel color to increase its tinctorial power and stability. Accepted on 17th February 1967.

Treating with strong cation exchange resin or anion exchange resin having non-phenolic matrix or both.

101167. Textron Inc. A line tie and method of making the same. Accepted on 17th February 1967.

Assembling a plurality of preparmed helical resilient metal elements into a set of uniform helical pitch and diameter throughout its length and bending the set in an intermediate portion to provide bight portion.

101170. Imperial Chemical Industries Limited. Acetic acid and a process for producing it. (21st August 1964). Accepted on 17th February 1967.

Contacting ethylene with solution containing palladium salt and salt of iron, cobalt or manganese in presence of oxygen and aldehyde.

101176. Ciba Limited. Fibre-reactive azo dyestuffs, process for their manufacture and materials dyed or printed therewith. Accepted on 17th February 1967.

Process for the manufacture of fibre reactive dyestuffs comprises condensing dyestuff containing fibre reactive substituents with an organic compound containing exchangable halogen atoms or groupings.

101184. R. L. Somerville. Recovery of values from coke oven like gases. Accepted on 17th February 1967.

The worm liquor obtained by treating the coke oven gas with water is vacuum distilled to get phenol and the liquor is treated to get dihydroxybengene fraction.

101195. Sun-Oil Company. Microbial Oxidation of polynuclear aromatic hydrocarbons. Accepted on 18th February 1967.

Comprises oxidising the hydrocarbons in the presence of a carbohydrate co-substrate.

101205. Pilkington Brothers Limited. Improvements in or relating to methods and apparatus for operating on glass sheets. (19th August 1964). Accepted on 18th February 1967.

Advancing each glass sheet through a series of operating stations in a step by step motion so that the glass sheet remains at each station, precisely locating and maintaining the glass sheet and performing the allotted operation.

101206. Pilkington Brothers Limited. Improvements in or relating to a method of and apparatus for breaking out sheets of glass. (19th August 1964). Accepted on 18th February 1967.

Comprising a clamp having co-operating jaws between which a marginal portion of the glass may be received and actuating means for actuating the jaws to clamp the glass at said portion.

101216. The Lees-Bradner Company. Main drive means for a gear hobbing machine. Accepted on 20th February 1967.

Provided with a combination with an adjustable hole head and a driven hole spindle in the head of a variable speed main drive means carried on and movable with the hole head.

101223. Zjednoczenie Przemyslu Tabrru Kolejowego. A device for starting a locomotive direct-drive diesel engine. Accepted on 21st February 1967.

Means are provided for directing the excess air flow from an adjustable emergency valve into the air-receiver to be used for cylinder scavenging.

101236. M. V. Indulkar. Improvements in or relating to a method of making sheet metal table tops for canteen tables and the like. Accepted on 23rd February 1967.

Includes the steps of taking a peace of sheet metal, bending at right angles, spot welding curved sheet stamped from separate sheet further spot welding additional curved sheet.

101240. R. Fritzmeier. Spring suspension for seats. (Accepted on 2nd July 1965). Accepted on 18th February 1967.

Comprising a torsion bar, the torque being applied to the bar by a swing arm the deflectable end of which is slidably supported.

101241. R. Fritzmeier. Spring suspension for a seat. (2nd July 1965). Accepted on 17th February 1967.

Comprising beueath the seat rolling type belows with a diaphram and a coloumn of air movable against adjustable spring loaded piston by displacing the diaphram.

101243. Kurashiki Rayon Co., Ltd. Method for the manufacture of viscose rayon. Accepted on 23rd February 1967.

Which comprises taking out a certain volume of viscose proportional to the desired denier, introducing the viscose so taken out into a branch pipe mixing it throughly with the viscose-supplied from the main viscose pipe and circulating the mixed viscose.

101250. Rockwell-Standard Corporation. Power brake system. Accepted on 17th February 1967.

Plurality of sets of ground engaging wheels equipped with hydraulic brake units and a driveline shaft equipped with hydraulic brake unit, means for supplying hydraulic fluid, means for applying the torque reaction force.

101257. David and David, Inc. Textured yarn and method and apparatus for producing such yarn. Accepted on 23rd February 1967.

A yarn having a substantially helical configuration characterized in each turn of the halix having at least one sharp bend therein.

101260. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for dispersing solids. Accepted on 18th February 1967.

The solid is applied to or incorporated in an organic carrier which is soluble in the liquid or the melt and the carrier is dissolved in the liquid or melt or finely distributed by melting.

101271. The British Petroleum Company Limited. Lubricating compositions (18th September 1964). Accepted on 23rd February 1967.

Comprising lubricating base oil having dissolved therein each of an organic phosphite and an oil soluble organic phosphorus compound.

101317. British Nylon Spinners Limited. Tufted fabrics and methods of making them. (8th September 1964). Accepted on 23rd February 1967.

Comprises three superimposed fibrous layers, the central layer fibers being keyed in position by needled fibres from an outer layer to the opposite outer layer and projecting as crimped fibre tufts.

101328. Ciba Limited. New bisazoles, process for optically brightening organic materials therewith. Accepted on 21st February 1967.

A bisazole compound is incorporated into the organic material.

101357. Imperial Chemical Industries Limited. Improvements in and relating to compositions suitable for use as fertilizers. (3rd September 1964). Accepted on 16th February 1967.

A coating of oil containing at least one surfactant is appted to the granules of fertilizer, finely divided inert material is added to the coated granules and the whole is mixed.

101363. Willcox & Gibbs Sewing Machine Company, Limited. A doffing and donning device for a spinning machine. Accepted on 20th February 1967.

Comprising a carriage, a rotatable donning device mounted on the carriage and having a receiver for receiving empty bobbins and applying then to doffed spindles.

101398. Luwa A. G. Apparatus for the cleaning of travelling blower filters. Accepted on 17th February 1967.

The filter being arranged parallel to the direction of the travelling blower in a workshop air suction aperture through the agency of a stationary suction head, a movable closure member which co-operates with the travelling blower.

101416. Eastman Kodak Company. Tobacco smoke filters and solid additives therefor. Accepted on 23rd February 1967.

Method of making tobacco smoke filters comprising applying solid particles to the filaments and heating the filaments.

101430. Bird Machine Company. Centrifugal separator. Accepted on 23rd February 1967.

Comprising a rotatable bowl a helical conveyor coaxialy mounted for rotation within said bowl means for introducing slurry into the said bowl, and means for rotating the bowl and the conveyor.

101439. Imperial Chemical Industries Limited. Polyester yarns. (9th September 1964). Accepted on 17th February 1967.

Poly(ethylene-1, 2-diphenoxyethane-4:4'-dicarboxylate) or its-co-polyester is melt-spun and the resultant yarn is cold-drawn in two stages.

101452. Combustion Engineering, Inc. Vapor generator. Accepted on 20th February 1967.

Cells of combustion chamber are formed by partition means comprised of parallely arranged tubes extending between opposed walls of said combustion chamber.

101493. Shell Internationale Research Maatschappij N. V. Process for the catalytic reforming of hydrocarbon mixtures. Accepted on 21st February 1967.

Characterizing in that the whole fraction boiling upto 130 °C to 220 °C of a crude petroleum oil is reformed.

101536. Societa' Edition. Process for the production of unsaturated nitriles. Accepted on 21st February 1967.

Contacting a gaseous mixture of propylene, isobutene, ammonia and oxygen with a catalytic complex constituted of an element selected from tellurium and Bismuth and an element selected from Molibdenum and Tungsten.

101601. Vitafoam Limited. Improvements in the forming of foamed material. (22nd April 1965). Accepted on 21st February 1967.

The unformed blank of foamed material is pressed unevenly in different regions, then cut and the cut blank, if necessary subjected to above steps to provide a contoured shape.

101618. The Khatau Makanji Spg. & Wvg. Co., Ltd., Manufacture of fine count fabric from spun synthetic fibres. Accepted on 17th February 1967.

Which method consist of (1) preliminary step of blending the synthetic fibres with cellulosic fibres (ii) subsequent steps of preparing, from the blended fibres (iii) a final step of removing the cellulosic fibres.

101659. M. Krishnaswamy. Auto mobile engine starter composed of piston and cylinder working on compressed air. Accepted on 23rd February 1967.

In which they are connected to starter fly wheel through connecting rods and plunger valves operated by a link and lever through a studs fixed in the connecting rods.

101673. Ciba Limited. Process and apparatus for separating mixtures by multiple distribution between two immiscible liquids. Accepted on 20th February 1967.

Repeatedly distributing mixture between two immiscible liquids of different densities in series of interconnected chambers by feeding denses liquid into first chamber till it overflows from last feeding lighter liquid into first chamber so as to overflow from last, adding mixture into first one with further lighter liquid collecting overflowing liquid fractions.

101775. Allied Chemical Corporation. Process for drying of nylon particles. Accepted on 9th February 1967.

Passing wet nylon-6 particles downwardly through a drying zone containing a cylindrical body of nylon-6 particles at a velocity not above 30 feet/hour and continuously passing upwardly through said body are inert drying gas at 80—180 °C.

101796. The Dentline Manufacturing Co. Limited. Improvements in or relating to apparatus for checking the tracking of the front wheels of a motor vehicle. Accepted on 23rd February 1967.

Comprising a pair of assemblies each having a vertical post supporting upper and lower parallel horizontal beams the lower beam having means thereon for aligning the assembly with one front wheel of the vehicle.

101826. Westinghouse Brake and Signal Company Limited. Apparatus for indicating the passage of a body past a location. (22nd October 1964). Accepted on 21st February 1967.

Comprising first means secured to the body cooperable with means at the location to indicate the passage of the body and second means in the body, rendering the first means ineffective if the body is not the last body in a series of bodies.

101890. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of azodyestuffs. Accepted on 18th February 1967.

Adding to the coupling mixture a surface active aminoxide or phosphine oxide containing long chain aliphatic radical.

102020. Westinghouse Electric Corporation. Nonconsumable arc electrode for use in arc furnaces. Accepted on 21st February 1967.

A tubular structure composed at least partially of conductive material is supporting the magnetic field producing means and the electrode face means and making electrical connection with the electrode face means.

102032. Farbenfabriken Bayer Aktiengesellschaft. Anthraquinone dyestuffs. (9th July 1965). Accepted on 17th February 1967.

Reacting anthraquinone sulphonic acid chloride with a phenol.

102161. Radio Corporation of America. Electron beam deflection circuit for use in a television receiver. Accepted on 23rd February 1967.

Comprising a beam deflection winding means, a diode coupled between winding means and supply means a capacitor a inductor another capacitor and solid controlled rectifier.

102188. E. J. Longyear Company. Core drilling apparatus. Accepted on 18th February 1967.

Comprising a core receiving tube, a core lifter in a case connected to the said tube and means for limiting axial movement of the core lifter toward said tube.

102232. Rockwell-Standard Corporation. Hydraulic brake system. Accepted on 24th February 1967.

Hydraulic brake system characterised by a secondary brake in a secondary hydraulic circuit in which a value means is included for restricting the flow there through in both directions to reduce pressure variation in said secondary circuit.

102268. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of 1-amino-anthraquinone-2, 6-(or-2, 7-) disulphonic acid. (23rd July 1965). Accepted on 17th February 1967.

Reacting 1-nitro-anthraquinone-6-monosulfonic acid with an aqueous sodium sulphide solution and oxidising in the product the mercapto group into sulphonic acid group.

102359. Dunlop Rubber Company Limited. Filters. (14th November 1964). Accepted on 23rd February 1967.

A filter assembly comprising filter units each having inlet and outlet chamber separated from one another by a filter element.

102513. Ciba Limited. Silver dyestuff bleaching process. Accepted on 16th February 1967.

Silver dyestuff bleaching process comprising using as catalyst a compound which is free from acidic water solubilising groups and which contains at least one pyrazine ring with atleast one fused aromatic ring and at least one sulfonamide group.

102654. Westinghouse Electric Corporation. Workpiece shape control. Accepted on 21st February 1967.

By controlling of the rolls shape of a rolling mill comprising a first and second roll force sensing means producing a first and second control signals and a roll force control means responsive to a shape control signal produced by comparing the said first and second signals for applying a shape correction force to said rolls.

102709. Eaton Axles Limited. Improvements in or relating to multispeed drive axles. Accepted on 21st February 1967.

Comprising two drive axles, an inter-axle differential gear in between and characterised in that the gear ratio of each axle is shifted by individual fluid spring returned pressure actuated shift means.

102747. The Premier Lighting Industries Pvt. Ltd. Improvements in or relating to fluorescent tube light fixtures and method of assembling the same. Accepted on 18th February 1967.

Comprising a container, a cover detachably fitted to the same and a pair of tube light holders hingeably mounted on two ends of container and adapted to be folded to remain flat inside the container and to be unfolded to remain at right angles to the container for fixing two ends of a tube light.

102844. Farbenfabriken Bayer Aktiengesellschaft. Brightening agents. (6th August 1965). Accepted on 20th February 1967.

Diazotising 4-amino-napthalimides and reducing the diazomine salt formed into corresponding 4-hydrazinonaphthalimides and reacting those compounds with appropriate β-dicarboxyl compounds.

103262. General Electric Company. Improvements in or relating to steam turbine rotor cooling. Accepted on 17th February 1967.

Turbine wheel mounted on a rotatable shaft, said wheel having a plurality of turbine buckets on its periphery, a stationary annular diaphragm member having a plurality of nozzle partitions thereon.

103344. Scovill Manufacturing Company. Improvements in or relating to safety discharge means. Accepted on 21st February 1967.

For a pressure fluid container comprising a relief outlet communicating with the interior of the container and a frangible membrane covering the outlet and sealed around the opening.

103426. J. T. Quintana. Improved selvedge formation in looms for producing two fabrics simultaneously. Accepted on 18th February 1967.

Characterised in that a support member is disposed at a stationary part of the loom and comprises a first grid like and a second grid like frame for forming two selvedges simultaneously.

103491. Courtaulds Limited. Improvements in and relating to the production of polyacrylonitrile fibres. (18th January 1965). Accepted on 17th February 1967.

Polymerising acrylonitrile catalytically in aqueous solution of an inorganic salt in presence of soluble titanium salt dissolved in polymerisation solvent and spinning the solution.

103572. Tractel Tirfor India Private Limited. Traction apparatus for cable and wire. Accepted on 23rd February 1967.

Characterized by a lever connected by connecting rods to two gripping devices adopted to slide on a rod support, the connecting rods being articulated to lever and gripping devices.

103818. Technical Information Service. Fabrication process for non-woven textile products as well as the textile products thus fabricated. Accepted on 18th February 1967.

Characterised by the fact that it mainly consists of the fabrication of at least two fibre webs or fibre batts, needling of each fibre batts bringing together of the needled fibre batts and their permanent bonding together.

103914. Satish Chandra Gupta. A leak proof sealing ring for coupling pipes and the joint thereof. Accepted on 21st February 1967.

Having a bulging rounded projection near one terminal end of its outer periphery, the other terminal end being rounded and the plane of inner periphery of the ring tapering out wards the end having said projection.

104331. Scovill Manufacturing Company. Integrally woven slide fastener stringer. Accepted on 23rd February 1967.

Comprising a fastener coil along one edge of the tape and held to the tape by the portions of the filler thread, auxiliary warps disposed against the coil and a separate weft thread for tying the auxiliary warps to the coil.

106090. Japan Exlan Company Limited. Cross-linkable acrylonitrile copolymers and produotion thereof. Accepted on 20th February 1967.

Copolymerizing acrylomitrile with N-methylolacrylamide in presence of redox catalyst at a pH of 4 in presence of water soluble inorganic salt.

108071. Roussel-Uclaf. Process for the preparation of transchrysan-themic acid and derivatives thereof [Divisional date 24th May 1965.] Accepted on 18th February 1967.

Comprises cyclising a phenyl sulphone ester under anhydrous conditions in the presence of a base and of a solvent.

Amendment Proceedings

The amendments proposed by Aluminium Laboratories Ltd., in respect of patent application No. 97734 as advertised in the Gazette of India, Part III, Section 2, dated the 19th November 1966 have been allowed.

Registration of Assignments, Licences, Etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

Class 1. Nos. 129507 and 129508. Elegant Industries Private Limited (A company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18, (Maharashtra), "Necklace", September 19, 1966.

Class 1. No. 129510. Subhash Chand Jain S/o, Name Chand Jain (an Indian National), Khandelwal Metal & Surgical Industries, Station Road, Moradabad (U.P.), "Hospital food tray", September 19, 1966.

Class 1. Nos. 129534 to 129536. Elegant Industries Private Limited, (A company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18, (Maharashtra), "Brooch", September 26, 1966.

Class 1. Nos. 129537 and 129538. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Ear-Top", September 26, 1966.

Class 1. Nos. 129539. to 129541. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18, (Maharashtra), "Pendant", September 26, 1966.

Class 1. Nos. 129566 and 129567. Jugal Kishore Khurana, Indian, 20-W, D.M.C. Najafgarh Road, New Delhi, 15, "a spoon", September 27, 1966.

Class 1. No. 129568. Jugal Kishore Khurana, Indian, 20-W, D.M.C. Najafgarh Road, New Delhi-15, "A fork", September 27, 1966.

Class 1. No. 129569. Alibhai Kadarbhai (An Indian Citizen), C/o. The star metal pressing works, Umarjamal Tabela, No. 273-179, Opp. Best Bus Depot, Near Bombay Central, Belassis Rd., Byculla, Bombay-8, Maharashtra, India, "Lid for container", September, 29 1966.

Class 1. No. 129571. Kalia Brothers, 3014, Mohammed Ali Bazar, Mori Gate, Delhi-6, a Partnership firm, registered under the Indian Partnership Act, 1932, Indian Nationals "Steering tie rod", September 29, 1966.

Class 1. No. 129629. Inani Engineering and Development Company, Maharajgunj, Hyderabad (Andhra Pradesh) an Indian Partnership concern, "Taxi meter", October 15, 1966.

Class 1. No. 129694. Speedage Cycle Components, an Indian Registered proprietorship firm, 16, Industrial Estate, Kanpur, Uttar Pradesh; all Indian, "Cycle Chain wheel", November 3, 1966.

Class 1. No. 129855. Bharat Electronics Limited, Jalahalli P.O., Bangalore-13 Mysore, Indian concern, "Ultrasonic flaw detector", December 5, 1966.

Class 1. Nos. 129872 and 129873. Bakhshi Brothers (An Indian partnership concern), 17-Faiz Bazar, Darya Ganj, Delhi-6, India, "a hinge plate", December 6, 1966.

Class 3. No. 129265. Swastik Art Industries, Indian Partnership firm, Ram Baug, S. V. Road, Malad, Bombay-64 (NB), Maharashtra, "Photo frames", August 27, 1966.

Class 3. No. 129526. Gopalkrishna Singhania, of J. K. Building, Dougall Road, Bombay-2, State of Maharashtra, India, an Indian National, "The cap of a bottle", September 20, 1966.

Class 3. No. 129631. Jayantilal Kalidas Sayani, a Manufacturer, Plastica, at No. 94, Vithal Wadi, Bombay-2, Maharashtra, Hindu Indian by Nationality, "Soapboxes", October 17, 1966.

Class 3. No. 129728. Swan (India) Private Limited, Indian Company, Advani Chambers, Sir P. Mehta Road, Fort, Bombay-1, Maharashtra, "Ball pens", November 15, 1966.

Class 4. No. 129509. Cold Cola Co., of Station Road, Baruipur, 24-Parganas, West Bengal, an Indian Proprietorship concern, "Bottle", September 19, 1966.

Class 4. No. 129709. Jarnail Singh, 1853 Behind State Bank, Chandni Chowk, Delhi-6, and Areez Pirojshaw Khambatta, Aserva Bridge, North End, Ahmedabad-16, Gujarat, Indian Nationals, "Bottle", November 4, 1966.

Class 4. No. 129723. Hindustan National Glass Manufacturing Co. Ltd. (A Indian Company) C/o, Puran Chand Arora & Co., 2900-Bahadurgarh Road, Delhi, (India), "a bottle", November 14, 1966.

Class 11. No. 129572. Jyoti Swaroop Gaur, Trading as Boom Manufacturing Co., 3454, Arya Pura, Subzi Mandi, Delhi-7, Indian National, "Scarf", September 29, 1966.

Class 12. No. 129573. Darban Haider, Trading as Darban Haider & Co., 3832, Nai Basti, Bara Hindu Rao, Delhi-6, Indian National, "Mosquito Net for Babies", September 29, 1966.

Class 13. Nos. 129363 and 129364. Bombay Fancy Textile Company, Bharat House, 104, Apollo Street, Bombay-1, an Indian Partnership firm (Registered under the Indian Partnership Act), "Textile Piecegoods", September 6, 1966.

Class 13. Nos. 129389 to 129391. to 129393. The Crown Spg. & Mfg. Co., Ltd., Gokhale Road, (South) Parel, Bombay-13, (Maharashtra), Nationality—Indian Company, "Textile Goods" September 9,1966.

Class 13. Nos. 129610 to 129613. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1 Indian, "Textile goods", October 14, 1966.

Class 13. Nos. 128656 to 128667. The Delhi Cloth & General Mills Co. Ltd., Indian Company, Post Box No. 1039, Bara Hindu Rao, Delhi-6, Delhi, "Textile goods", June 12, 1966.

Class 13. Nos. 129889 to 129893. Bombay Fancy Textile Company, Bharat House, 104, Apollo Street, Bombay-1, and Indian Partnership firm (Registered under the Indian Partnership Act), "Textile piecepiece goods", December 8, 1966.

Class 13. Nos. 129919 to 129935. The Delhi Cloth & General Mills Co. Ltd., Indian Company, Post Box No. 1039, Bara Hindu Rao, Delhi-6, Delhi, "Textile "piecegoods", December 13, 1966.

Class 13. Nos. 129950 and 129951. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile Goods", December 17, 1966.

Class 14. No. 129390. The Crown Spf. & Mfg. Co. Ltd., Gokhale Road (South), Parel, Bombay-13, Maharashtra, Indian Company, "Textile goods", September 9, 1966.

A. JOGARAO,
Controller General of Patents Designs and Trade Marks.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

25th February 1967

109472. Y. G. Ghaisas and S. R. Apte. An apparatus to afford protection against the effects of phase failure in polyphase electrical installations.

109473. J. B. Ghare. An improved integrated compass.

109474. S. Kumar. An improved technique of playing games through use of multiple dices.

109475. The Upjohn Company. Kalamycin (U-19, 718) and process for the production thereof.

109476. O. Mory. Cooking appliance.

109477. The Magnavox Company. Improved fm demodulator system.

109478. Chevron Research Company. Method for producing fibrous web from polymer film.

109479. E. J. Longyear Company. Core drilling apparatus. [Divisional date 25th August 1965].

109480. Ciba Limited. New Monoazo pigments and processes for their manufacture.

109481. R. R. Juneja. Telescopic aerial. [Addition to No. 85274].

109482. Tokyo Shibaura Electric Company Limited. Foil wound electric windings.

109483. Ab Skanska Cementgiuteriet. Improvements in and relating to deep drills with eccentric bits.

109484. The Dunlip Company Limited. Improvements in life-rafts.

109485. Rohm and Haas Company. Catalyst.

109486. Rayonier Incorporated. Emulsion coating of cellulosic filmes. [Addition to No. 97609].

109487. Sorabji Nowroji & Co. Improvements in or relating to hose clamps and method of manufacturing the same.

27th February 1967

109488. Council of Scientific and Industrial Research. Improvements in or relating to vacuum valves.

109489. Council of Scientific and Industrial Research. Production of arylglycosides.

109490. Tokyo Shibaura Electric Company Limited. Method and apparatus for sealing with glass portions to be sealed.

109491. Shri R. L. Sheth. 12 lever cylinder lock.

109492. Elgi Equipments Private Ltd. A portable tyre inflator.

109493. Southern Industrial Corporation Ltd. Improvements in or relating to flexible shafts having a central core.

109494. Southern Industrial Corporation Ltd. A coupling for connecting tools and devices to a flexible shaft.

109495. Southern Industrial Corporation Ltd. A change speed gear.

109496. Fisons Industrial Chemicals Limited. Hydration. (31st March 1966).

109497. Norsk Hydro-Elektrisk Kvaelstofaktieselskab. Process for the production of urea.

109498. The Bendix Corporation. Vertical gyro erection control system and method for gyro erection loop cut off.

109499. Chas. Pfizer & Co., Inc. Cereal product. [A Divisional date 1st September 1964].

109500. Smith Kline & French Laboratories. Improvements in or relating to substituted 10-aminoalkyl-9, 10-dihydroanthracenes.

109501. Sandoz Ltd. Improvements in or relating to organic compounds. (28th February 1966).

109502. L. W. P. Vending Services Limited. Improvements in or relating to vending machines. (28th February 1966).

109503. Amsted Industries Incorporated. Casting apparatus.

109504. Sandoz Ltd. Dves of the anthraquinone series, their production and use.

109505. Ottermill Switchgear Limited. Improvements relating to electrical circuit interrupters. (22nd March 1966).

109506. Ciba Limited. Process for the manufacture of physiologically active peptides having a prolonged activity.

109507. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for pad dyeing and printing of mixtures of cellulose fibres and fibrous materials of linear polyesters.

109508. Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S.p.A. and Kanegafuchi Boseki Kabushika Kaisha. A method of treating composite filament yarn.

109509. Kanegafuchi Boseki Kabushiki Kaisha and Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa. A method of producing synthetic fibres having an improved lustre.

109510. Gebr. Saueressig K. G. A device comprising a shaft with a frictionally attached cylinder more particularly an impression cylinder for textile printing, copper plate printing and the like.

109511. Voith Getriebe KG. Vehicles having an electrical or a hydraulic brake.

109512. J. N. Sibal, R. P. Bambha and D. S. Uberoi. Machine vice.

109513. Institut Gaza Akademii Nauk UK. SSR. A gas flat-flame burner.

28th February 1967

109514. Gosudarstvenny Nauchno-Issledovatelsky I Proektny Institut Azotnoi Promyshlennosti I Produktov Organisheskogo Sinteza. Method for production of cyclohexanone, cyclohexanol and adipic acid and reaction vessel in unit for accomplishing the same.

109515. Podmoskovny Gosudarstvenny Proektnokonstruktorsky i Experimentalny Institut Gornogo Mashinostroenia. Mechanized hydraulic timbering.

109516. Textile Machinery Corporation Ltd. and J. C. Agrawal. Improvements in or relating to a copping lever in ring frame of a spinning machine.

109517. The Ranjan Motor Company (Private) Limited. An automatic variable-speed mechanism for light road vehicles.

109518. Ciba Limited. Antiprotozoal vaccine.

109519. B. D. Kulkarni. Improvements in or relating to dissolvers.

109520. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of shaped structures.

109521. Electric Construction (W'Ton) Limited. Improvements relating to electrical generators. (3rd March 1966).

109522. Takeda Chemical Industries, Limited. A composition and a method for the treatment and/or prevention of coccidiosis in poultry.

109523. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of cross-linked synthetic resins.

109524. Farbenfabriken Bayer Aktiengesellschaft. Cross-linkable copolymer dispersions.

109525. Defibrator Aktiebolag. Process of manufacturing semi-chemical and chemical-mechanical fibre pulp. (31st March 1966).

109526. Catalysts and Chemicals, Inc. Low temperature shift reaction catalysts and methods for their preparation.

109527. United States Rubber Company. Improvements in treatment of plants with carboxamidothiazoles.

109528. United States Rubber Company. Improvements in thiazole derivatives.

109529. Hi-Shear Corporation U.S.A. Coupling for joining two elements. [Divisional date 31st May 1965]

1st March 1967

109530. The Best Rubber Stamp Manufacturing Company. Improvement of automatic device for changing year, month and date for daily use of rubber stamp dater.

109531. Indian Overseas Export Traders Corporation. Spray can.

109532. Deere & Company. Cotton harvester.

109533. Sigma Lutin, Narodni podnik. A centrifugal pump.

109534. N. V. Organon. New biologically active derivatives of piperazine and process for the manufacture thereof.

109535. Biochemie Gesellschaft mit Beschrankter Haftung. Improvements in or relating to organic compounds. (2nd March 1966).

109536. The Dow Chemical Company. Suspension polymerization process for vinyl aryl monomers.

109537. C. E. Hoing. Method and means for conveying a granular product suspended in a gaseous current and separating the product at the end of the conveying operation.

109538. Palitex Project—Company G.m.b.H. Two-for-one twisting machine.

109539. Swift & Company. Improvements in or relating to manufactured protein food products and a method for making the same.

109540. Caterpillar Tractor Co. Means to provide temporary firm support for a resiliently supported earth-moving machine.

109541. E. R. Squibb & Sons., Inc. Therapeutically active compounds.

109542. The Monotype Corporation Limited. Improvements in or relating to motor control apparatus. (10th March 1966).

109543. M. Artusi. Method for the manufacture of a building material, plant for carrying out the method and the material obtained by this method.

2nd March 1967

109544. Siemens Aktiengesellschaft. Improvements in or relating to electric pulse-controlled shift registers and frequency filters. (13th December 1966).

109545. Deere & Company. Discharge structure for cotton.

109546. R. C. Mouliswar. Tube protectors.

109547. A. A. Khan. Improvements in or relating to electrostatic successive Inductive generator. [Addition to No. 93585].

109548. Sandoz Ltd. Improvements in or relating to organic Compounds. [Addition to No. 108847].

109549. Beecham Group Limited. Penicillins. (3rd March 1966).

109550. Ottermill Switchgear Limited. Improvements relating to arc chutes. (18th March 1966).

109551. Sir W. G. Armstrong Whitworth & Company (Engineers) Limited, and D. W. Tryhorn. Improved turbocharged internal combustion engine. (11th March 1966).

109552. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of branched polyethylene of high molecular weight.

109553. Parke, Davis & Company. Sciff base compounds and means for producing the same. [Divisional date 3rd February 1965].

109554. Parke Davis & Company. Methylamino compounds and means for producing the same. [Divisional date 3rd February 1965].

109555. The Goodyear Tire & Rubber Company. Improvements in process for polymerization of unsaturated alicyclic compounds and catalyst therefor.

109556. International Engineering & Construction Company. Improved vibrating earth rammer.

109557. I. K. Puri. Electric-pneumatic vigilance control system. [Addition to No. 95967].

109558. Council of Scientific and Industrial Research. Vertical shaft kiln.

109559. Allmanna Svenska Elektriska Aktiebolaget. Means for sidelay guiding of strip materials.

109560. Halcon International, Inc. Chemical process.

109561. United States Rubber Company. Improvements in improved rubber blends.

109562. The Board of the Rubber Research Institute of Malaya. Improvements in or relating to the preparation of lower grade natural rubbers and skim rubbers. (31st March 1966)

109563. N. S. Kapoor and H. S. Kapoor. Improvements in or relating to a cycle lock.

109564. Hindustan Steel Limited. Manufacture of lime-coke.

109565. Palitex Project-Company G.m.b.H. Two-for-one spindle.

109566. N. F. Tisdale and R. A. Tisdale. Pouring bozzle for continuous casting liquid metal or ordinary steel.

109567. Instytut Przemyslu Organicznego. Delayed action electric detonator series.

109568. Hydrocarbon Research, Inc. Air separation with a nitrogen refrigeration circuit.

109569. Ciba of India Limited. New azacycloaliphatic compounds and process for their manufacture.

109570. S. A. Des Etablissements Roure-Bertrand Fils and Justin Dupont. Process for the manufacture of unsaturated alcohols.

Alteration of Date

108434. Ante-dated to 19th May 1965 under Section 5 of the Act.

109114. Ante-dated to 17th May 1965 under Section 5 of the Aet.

100138. The claim to priority date 19th June 1964 has been abandoned and the application dated as of 18th June 1965, the date of filing in India.

101527. The claim to priority date 10th September 1964 has been disallowed and the application dated as of 10th September 1965, the date of filing in India.

101486. The claim to priority date 8th September 1964 has been disallowed and the application dated as of 7th September 1965, the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99411. Societe Metallurgique D' Imphy. Improvements in or relating to the direct reduction of oxides which are difficult to reduce. Accepted on 7th February 1967.

Reducing oxides difficult to reduce comprising a combination of rotary furnace with horizontal axis of rotation, being open at both ends and means discharging fumes at the other end.

99540. Bijoy Krishna Das and Bijoy Gopal Kumar. Pilot Punch for producing internal grooves. Accepted on 17th February 1967.

Having a fresh part and a tail or shank part and a body part in between the two parts said body part being provided with helical fludes or grooves having a helix angle varying within a range of 0° to 25°

99554. Fisons Pest Control Limited. Pesticidal compositions, (27th May 1964). Accepted on 17th February 1967.

Containing a substituted benzimidazole and a carrier excluding water and common organic solvents.

99555. Shell Internationale Research Maatschappij N. V. Apparatus for controlling the flow of a fluid solids mixture through a process system. Accepted on 17th February 1967.

Wherein is provided a conduit in which the mixture is flowing means for adding a diluting fluid, means for regulating the flow of diluted mixture and means for separating a more concentrated mixture and fluid from the diluted mixture.

99582. Esso Research and Engineering Company, Improved method of operating cupola furnace in the production of mettalic products. Accepted on 18th February 1967.

Characterised in that the rate of flow of air supplied to the furnace through the air blast tuyere is maintained at atleast 60% of the base flow rate.

99589. Council of Scientific and Industrial Research. A new process for the preparation of benzoyl chloride Accepted on 20th February 1967.

Benzotrichloride is heated with antimony trichloride or titanium tetrachloride.

99602. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S.p.A. Improved process for the preparation of spinnable solutions of polyacryllnitrile or of copolymers having a high acrylonitrile contents. Accepted on 20th February 1967.

Polymerising monomer in solvent in at least two sequential stages, firstly at 60—65°C and secondly at higher conversion rate solvent a catalyst being added in divided fractions equal to steps.

99631. J. N. Singh. Baby seats for water closets. Accepted on 21st February 1967.

Baby seat being provided with a central slot of a diameter smaller than that of the adult seat and a circular flange is provided on the under surface of the baby around its central slot so that this flange rests against the inner surface of the slot in the adult seat.

99665. Monsanto Company. Treated paper. Accepted on 22nd February 1967.

Paper coated with an aqueous solution of an alpha olefin maleic anhydride copolymer.

99673. Associated Lead Manufacturers Limited. Improvements in the manufacture of powdered lead. Accepted on 24th February 1967.

Characterised by heating molten lead between the orifice and the collecting chamber.

99706. Halcon International, Inc. Production of oxirane compounds. Accepted on 25th February 1967.

By contacting an olefinically unsaturated compound in liquid phase in an epoxidation zone with an organic hydroperoxide at epoxidizing conditions in the presence of a catalytic amount of epoxidation catalyst.

99713. Karl-Friedrich Still. Improvements in and relating to a process and apparatus for the decomposition of ammonia. (25th May 1964). Accepted on 25th February 1967.

Comprises directly or indirectly heating a gas containing ammonia so as to decompose the ammonia to form a gaseous mixture cooling the mixture to a temperature 150 to 200°C, incorporating an oxidising gas with the cooled gaseous mixture, and oxidising the hydrogen in the gaseous mixture to water.

99733. Imperial Chemical Industries Limited. Polymerisation process, polymeric compositions made by such process and shaped articles thereof. (15th April 1965). Accepted on 27th February 1967.

Sequentially polymerising in presence of steorespecific catalyst 4-methyl-pentene-1 with alidhatic 1-olefine.

99737. Shell Internationale Research Maatschappij N. V. A continuous distillation process for the separation of a feedstream and apparatus for carrying out such process. Accepted on 27th February 1967.

A continuous distillation process for the separation of feedstream into a top and a bottom product stream in a column using reflux and re-evaporation.

99750. Pittsburgh Plate Glass Company. Tempering of glass sheets. Accepted on 27th February 1967.

Comprising heating the sheet to its deformation temperature, and rapidly cooling the same.

99763. Bassani S.p.A. An electronic alarm tripping system. Accepted on 27th February 1967.

Comprising a magnetic core with two equal and opposed windings means for amplefying signals, means for feeding the amplefied signal.

99779. Halcon International, Inc. Production of epoxy compounds. Accepted on 28th February 1967.

Comprises treating an olefinic substrate with a catalyst and a hydroperoxide of an aralkane having at least one hydrogen on a carbon atom adjacent to the aromatic ring as the oxidising agent.

99782. Devoe & Raynolds Company, Inc. High molecular weight thermoplastic resin from the polymerization of diphenols and diepoxides. Accepted on 28th February 1967.

Heat aging a normally solid thermoplastic resinous composition containing reactive 1, 2-epoxy groups and phenolic hydroxy group in the presence of a basic catalyst.

99808. Walker-Neer Manufacturing Co., Inc. Method and apparatus for drilling wells. Accepted on 28th February 1967.

Comprising a series of dual passage pipe stands each including an inner pipe and an outer pipe, inner passages in the inner pipes of successive stands being in communication, an outer passage formed between the pipes of each stand, said outer passages of successive stands being in communication means securing the outer pipes of successive stands etc.

99820. Bethlehem Steel Corporation. Zinc-aluminum coated products and methods therefor. Accepted on 28th February 1967.

A coated ferrous metal product comprising a ferrous base with a coating including alumlnium, chromium, zinc and usual impurities.

99829. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for preparing mixtures of acetaldehyde, acetic acid and vinyl acetate. Accepted on 28th February 1967.

Oxidation of ethylene with molecular oxygen is carried out at a temperature range of 20 to 200°C and under pressure in the absence of mineral acid and in the presence of manganese and/or cobalt compound.

99882. Fisons Pest Control Limited. Pesticidal compositions. Accepted on 28th February 1967.

A pesticidal compositions comprises as active ingredient a benzofuranyl carbamate and at least one material selected from the group comprising wetting agents, solvents and diluents excepting water and common chemical solvents.

99937. The Pyrene Company Limited. Foam compositions. (15th June 1964). Accepted on 27th February 1967.

A foam stabilising comprises an aqueous solution of a cationic quaternary ammonium surfactant and an anionic Polyelectrolyte.

99972. Preload International Inc. Prestressed structure. Accepted on 24th February 1967.

Comprising an annular wall, tendons wrapped about the outer surface of the wall under tension, said tendons including a preformed flexible and scuff and abrasive resistant plastic coating enveloping each tendon.

99979. Libbey-Owens-Ford Glass Company. A process for treating silica refractory. Accepted on 1st March 1967.

A reducing gas is introduced to maintain reducing conditions adjacent to the refractory thereby to reduce vapours and promote a reaction between vapours and silica refractory resulting in a liquid glass operable to cement the scale on the surface of the refractory.

99984. Control Data Corporation. Digital computer central processor. Accepted on 27th February 1967.

Having a storage section, an input—output section, a control section, and a function section.

99995. E. Buhrer. Apparatus for conveying and assembling mould parts to form completed mould boxes. Accepted on 27th February 1967.

Comprising two conveyors a supporting frame and a lifting device.

100004. Marchon Products Limited. Improvements in the manufacture of alkali metal phosphates. (18th June 1964). Accepted on 1st March 1967.

Comprises neutralising defluorinated w.p.a. with an alkali wherein iron-sulphide is added to the w.p.a. after it leaves the gypsum filter but before it is neutralised.

100024. Odgers Drilling Inc. Retractable wire line core barrel. Accepted on 28th February 1967.

Comprising an outer drill tube an inner tube assembly a latch body radially movable latch means, biasing means and means to counteract the biasing means.

100034. Establishments Bauche (Coffres-Forts Bauche et Nicolle & Cie). Improvement in or relating to strong wall structures. Accepted on 27th February 1967.

A rubber material is provided between two plate members of the wall structure.

100135. G. K. N. Screws & Fasteners Limited. Improvements in selftapping screws. (24th April 1965). Accepted on 28th February 1967.

Comprising a head, a cylindrical sank a two-start thread extending over said cylindrical sank and a point of four sided pyramidal form.

100138. Henry Wallwork & Co., Ltd. and C. M. G. Wallwork Foundry cores. Accepted on 1st March 1967.

A method of setting cores in foundry mould wherein a core is formed in a core box and the core box is transferred adjacent to mould.

100184. The Goodyear Tire & Rubber Company. Improvements in method of making shaped articles. Accepted on 3rd March 1967.

Comprising a first part being moulded, a second part formed over the first part and by forming one of the parts inside out the article can be caused to obtain its utilizing form.

100209. Pilkington Brothers Limited. Improvements in or relating to glass articles. (23rd June 1964). Accepted on 3rd March 1967.

A method of treating a glass article by treating at least a part of its surface containing a reducing agent with the gaseous phase of a compound of a colouring metal to impart a desired colouring thereto.

100363. John Heathcoat & Company Limited. Crinkle yarn machine. Accepted on 24th February 1967.

Includes crimping head comprisin ga plurality of sinker blocks spaced from each other, movable sinker elements, yarn introducing means and means for sequentially opening sinker elements.

100465. G. K. N. Screws & Fasteners Limited. A tool for applying a self-piercing and self-threading screw to a workpiece. Accepted on 28th February 1967.

Comprising a main body in which a screw driver bit non-rotatably engaged with a screw is mounted, means within the main body to accelerate the bit so that the screw can pierce the workpiece and rotating means to cause the screw to thread into the workpiece.

100675. Council of Scientific and Industrial Research. An integrated process (oleo flotation) for upgrading and dewatering of small coal. Accepted on 21st February 1967.

Comprising making coke-slurry, mixing oils with it, aerating the oily pulp, removing oil floes, partially dewatering on static screen and finally dewatering by centrifuging.

100722. W. S. Schneider and A. P. Corella. Dispensing container and process of making the same. Accepted on 21st January 1967.

Package being made entirely from thin flexible film, using either one or two webs, having a definite base upon which the package can be made to stand up.

100826. Vsesoiuzny Nauchno-Issledovatelsky Institut Prirodnogo Gaza. Gas carburettor. Accepted on 25th February 1967.

Comprising a body housing an inlet branch a diffusor, an outlet branch and a controlling device characterised by the inside cavity of the body including two curvilinear channels.

100908. International Nickel Limited. Chill-cast die castings and alloys therefor. Accepted on 2nd February 1967.

Alloy containing 2% to 6.8% phosphorous, 20 to 40% zinc, 0 to 1% lead and 0 to 8% nickel, the balance being copper.

100976. Imperial Chemical Industries Limited. Process for the manufacture of new water insoluble azo dyestuffs valuable for colouring synthetic textile materials. (26th August 1964). Accepted on 6th February 1967.

Coupling a diasotised primary amine of the benzene series with a coupling component.

101000. S. K. Chaturvedi. Polythene ring for the fragrance of telephone-mouthpiece. Accepted on 7th February 1967.

Having two knobs to be fitted in the holes of mouthpiece and two hollow portions in the bottom thereof.

101021. Air Reduction Company, Incorporated. Method of polymerizing vinyl Chlorides with olefin. Accepted on 9th February 1967.

Adding vinyl chloride stepwise to a suspension polymerisation system of ethylene or propylene at pH of 3 to 11 and at 5 to 95°C.

101171. Amchem Products, Inc. Improvements in the production of phosphate coatings on ferriferous metal surfaces. Accepted on 17th February 1967.

Wherein the coating solution is replenished with nitrite-ion at a rate governed by measured potential.

101173. Lodge-Cottrell Limited. Improvements in or relating to electro-precipitation. (1st September 1964). Accepted on 17 February 1967.

Means to supply conditioning agent to gas comprises a device adapted so to control the rate of supply that a pre-set power input to the electrodes is obtained.

101199. Glaverbel. Process and device for applying to the surface of objects various materials in one or more coatings of a uniform thickness. Accepted on 18th February 1967.

A process of coating an object with liquid coating composition by dipping wherein the withdrawal of object from coating body is controlled automatically.

101201. Shinto Kogyo Kabushiki Kaisha. Aluminium cementation process. Accepted on 18th February 1967.

Comprising embedding an article to be treated in a penetrant and heating the penetrant with said article embedded therein.

101228. Rohm & Hass Company. A method of making solid, thermoplastic modifiers and thermoplastic compositions containing the same. Accepted on 21st February 1967.

Comprising (A) forming a latex of a rubbery copolymer by copolymerising a monomer mixture and then (B) emulsion polymerising in the presence of the preformed latex.

101229. Dunlop Rubber Company Limited. Improvements relating to inflatable life-rafts and the like. Accepted on 21st February 1967.

Comprising an apertured collapsible hollow body constructed of flexible sheet material to which is secured at least one piece of fold resisting flexible sheet material.

101251. Aluminium Laboratories Limited. Improvements in or relating to apparatus for containing molten material in contact with a gaseous atmosphere. Accepted on 23rd February 1967.

Apparatus with outer metallic and inner refractory shell wih an inner enclosed chamber connected to atmosphere, said apparatus incorporating a thin matallic web to form a barrier seal.

101256. Koninklijke Machinefabriek Gebr. Stork & Co. N. V. Sedimentation apparatus for crude sugar juice. Accepted on 23rd February 1967.

Including an elongate rectangular tank whose top being provided with a crude juice supply, the rear being provided with one or more outlets for pure juice and one or more outlets for dirty juice near the bottom with means to divide and control the flow of juice.

101259. The Lubrizol Corporation. Oil-soluble nitrogen containing lubricant additive concentrates and lubricating compositions containing the same. Accepted on 23rd February 1967.

Consisting of (I) from about 1 to 100 parts by weight of an acylated nitrogen containing composition and (II) either one or both of (a) from about 0.1 to about 20 parts by weight of phosphorus as a phosphorodithioate and (b) from about 0.5 to about 100 parts by weight of sulphate ash as an oil-soluble metal dispersant.

101268. Leningradsky Filial Gosudarstvennogo Issledovatelskogo Elektrokeramicheskogo Instituta. Valve-type lightning arrester. Accepted on 24th February 1967.

Comprising extinguishing chamber, spark gaps are open at the side towards which the follows current arc moves and closed by a wall of the opposite side.

101274. Sandoz Ltd. Process for the manufacture of azo dyestuffs. Accepted on 24th February 1967.

The coapling reaction between diazo compounds and coupling components is carried out in the presence of urea.

101276. Ved Elektroprojekt Berlin. Overhead conductor protection system. Accepted on 24th February 1967.

Comprising photo electric scanning device, a transistorised amplifying circuit arrangement and a relay.

101278. V. D. Kehr. Improvements in or relating to tube-wall strainers. Accepted on 24th February 1967.

Comprising a hollow cylindrical structure fabricated from a wire of trapezoidal cross-section and having a plurality of coils.

101286. Shell Internationale Research Maatschappij N. V. Diving apparatus for carrying out underwater operations. Accepted on 24th February 1967.

Comprising a living compartment, a decompression compartment, a water lock compartment, a working compartment, sealable manholes between said compartments means controlling gas pressure in working compartment means maintaining breathing gas mixture in living compartment means controlling gas pressure in decompression compartment and means supplying gas or water to and discharging same from water lock compartment.

101289. Ideal Industries, Inc. Apparatus and method for conditioning textile material being drafted. Accepted on 25th February 1967.

comprises passing successive portions of the material through a pneumatic circuit including a confined area while drafting and circulating an air stream and compensatively conditioning said air stream in response to condition variation.

101293. Palitex Project-Company G.m.b.H. An unwinding aid for double twist spindles. Accepted on 25th February 1967.

Comprising means winding and tapering towards the inlet end of the tube, for intersecting and guiding the yarn between the bobbin and said inlet end.

101295. Ciba Limited. Process for the manufacture of 6-phenylbenzabolyl derivatives and organic materials optically brightened therewith. Accepted on 25th February 1967.

Comprises incorporating and/or applying 6-phenyl-benzazolyl compound to the material to be optically brightened.

101312. Hojtomu Es Felvonogyar. Apparatus for measuring the flash point of liquids. Accepted on 27th February 1967.

Negative and positive pole being arranged at specified distance from each other above the surface of the liquid to be tested of which the negative being connected to the current source and the positive pole to the earthed pedestal of the apparatus.

101323. Westland Aircraft Limited. Improvements in or relating to flexible skirting assemblies for air cushion vehicles. (28th August 1964). Accepted on 27th February 1967.

Comprising one or more sheets of flexible, substantially air-impermeable material which extend(s) from a first point of suspension downwardly, then upwardly to a second point of suspension spaced apart from said first point to form a loop.

101325. Ved Elektroprojekt Berlin. D. C. switch unit with isolating transportation truck. Accepted on 25th February 1967.

A fixed cubicle portion sub-divided into quick break switch chamber into which are provided a truck supporting a quick break switch and an instrument panel.

101332. P. R. Hill. Improvements in nameplates. Accepted on 27th February 1967.

Assembled from a plurality of sections provided at the adjoining edges thereof with complementary inter engageable but disengageable formations.

101333. Mancar-Trust. A protective coating based on synthetic rubber for use on reinforced casting resins. Accepted on 25th February 1967.

Characterizes addition of accelerators and catalyst in a reaction mass containing polymers or copolymers of butadien and/or acrylonitrile, or butadiene or styrene with polyvinyl chloride and/or polyethylene which is being vulcanized and/or copolymirized, if desired silane derivatives are further added.

101339. Universal Oil Products Company. Process for the purification of phenol. Accepted on 28th February 1967.

Characterised in that at least a portion of the impurities comprising carbonyl compounds is separated from the phenol fraction by heating it in admixture with HO_2 in contact with a cation exchange resin, converting the carbonyl compounds having lower boiling points and separating them from phenol.

101340. Universal Oil Products Company. Process for purifying phenol. Accepted on 28th February 1967.

Characterised in that at least a portion of impurities comprising carbonyl compounds is separated from the phenol fraction by heating it in admixture with H_2O in contact with a catalytic composite thereby converting carbonyl compounds to compounds having lower boiling points, and then distilling them from phenol.

101341. Universal Oil Products Company. Production of phenols. Accepted on 28th February 1967.

Characterized in that contacting the deactivated resin before treatment with the alkaline solution with an aliphatic ketone thereby displacing sorbed residual phenol from the deactivated resin, and recovering by conventional means the resultant displaced residual phenol from admixture with the aliphatic ketone.

101345. The English Electric Company Limited. Electrical power supply circuit for energising monitoring means of an electrical protective relay. (16th September 1964). Accepted on 28th February 1967.

An input means for receiving input signal dependent on the condition to be monitored and for producing a direct current signal.

101350. Sumitomo Chemical Company Ltd. Method for producing vinyl chloride polymers. Accepted on 28th February 1967.

By conducting the emulsion polymerisation of vinyl chloride in presence of catalyst.

101360. Borg-Warner Corporation. Improvements in and relating to clutches. Accepted on 28th February 1967.

Comprising a driving member and a driven member positioned within a housing and adapted to rotate about an axis, lever means connected to the cover plate for engagement and disengagement of said driven member and driving member.

101362. Acme Backing Corporation. Peelable seal package. Accepted on 28th February 1967.

Comprising a pair of sheets for enclosing the contents to be packed, means for sealing end edges and means comprising a heat sealable layer.

101376. P. G. Rohland. Rope clamp with a cone end. Accepted on 28th February 1967.

Consisting of a tubular piece of oral cross-section at the end portion destined to be formed to an end cone, having the transeverse sides a thinner wall thickness and long sides a thicker wall thickness.

101383. Dunlop Rubber Company Limited. Improvements in or relating to elastic thread. Accepted on 28th February 1967.

Comprises a vulcanized composition of a polymer of propylene oxide containing at least 90 mole percent of groups derived from propylene oxide.

101399. C. A. V. Limited. Crankcases for multi-cylinder internal combustion enignes. Accepted on 1st March 1967.

Comprising in that pre-formed sheet metal plates are ambeded at their marginal edge within said parts and said portion of the body so as to form closures for the sides of the body between said parts.

101420. Ford Motor Company of Canada, Limited. Process and equipment for manufacture of flat glass. Accepted on 28th February 1967.

Process for manufacturing flat glass comprising forming continuous ribbon of glass in a refractory chamber with a protective atmosphere including carbon in contact with tin or the protective atmosphere.

101426. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for preparing polyolefins. Accepted on 3rd March 1967.

Polymerising ethylene a mixtures of ethylene with higher α-olefins containing upto 8 carbon atoms in the presence of an organo metallic mixed catalyst containing chlorine, titanium and aluminium in suspension or in the gaseous phase under atmospheric pressure.

101428. Rand Mines Limited. An improved stainless steel. Accepted on 3rd March 1967.

Having a constituent composition of iron, at least 6% of chromium, a minimum vanadium content of 0.3% and a carbon contents which is below a maximum 0.03%.

101431. Joseph Lucas (Industries) Limited. A method of manufacturing plates for use in electrical storage batteries. (30th September 1964). Accepted on 1st March 1967.

Comprising placing the metal in powder form on a grid treating the powder with an acid and they become united with the grid by cold welding for acid treatment the particle also swell.

101446. Davy and United Engineering Company Limited. Heat treatment of rod. Accepted on 28th February 1967.

Wherein hot rod is cooled by being continuously coiled in cooled bed.

101464. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Molding materials for the production of self-extinguishing cellular moldings based on a styrene polymer, and a process for their production. Accepted on 1st March 1967.

Comprises (a) a copolymer of at least 5% by weight of styrene and (b) 3 to 15% by weight of (a) of an expanding agent.

101466. Nippon Carbide Kogyo Kabushiki Kaisha. Dry Process acetylene generation method and equipment. Accepted on 27th February 1967.

Comprising feeding into acetylene generation zone having a screen carbide particles rotating the zone, supplying water onto the zone, constantly scrapping off the by product, letting it pass through screen and discharging the same.

101470. Worthington Corporation. Absorption refrigeration system control. Accepted on 27th February 1967.

Includes flow control means in the circuit for intermixing a stream of weak solution with concentrated solution in the heat exchanger to vary the concentration of solution passing to the absorber.

101474. Imperial Chemical Industries Limited. Process for the manufacture of pyridine or substituted pyridines. (10th September 1964). Accepted on 24th February 1967.

Reacting glutaraldehyde a substituted gluteraldehyde or a precursor thereof in the liquid phase with ammonium ions or ammonia in the presence of a quinone containing a 1.2-benzoquinone ring or a 1.4 benzoquinone ring.

101477. Sperry Rand Corporation. A multi-stable-state open flux patt memory film. Accepted on 18th February 1967.

Comprising of thin ferromagnetic material exhibiting single domain properties characterized in that the contours of film are formed such that in the case of straight sided film the angle between a straight film edge and the field induced easy axis is every where between 0° and 45°.

101486. The United Steel Companies Limited. Machines for continuously casting metal. Accepted on 28th February 1967.

Comprising a pair of withdrawal rolls.

101491. Contubind Societe Anonyme, and Lorraine Escant Societe Anonyme. Process, apparatus and mill for rolling seamless tubes. (9th September 1964). Accepted on 28th February 1967.

Consisting two wall-reducing rolls and a mandrel having duct means and lubricant opening through which lubricant is forced to fill an annular space and a hollow blank being rolled.

101520. Vokes Limited. Control system for pneumatic feeding of tobacco to cigarette making machines. (28th September 1964). Accepted on 28th February 1967.

Consisting of an electronic pulse generator and a selector circuit comprising mutually exclusive signal generators operative upon receipt of a cyclic pulse from the generator.

101527. Copolymer Rubber and Chemical Corporation. Inhibiting thermal polymerization and the growth of popcorn polymer in vinyl pyridine and ethylenically unsaturated hydrocarbons and esters by addition thereto of n-nitrosoorganohydroxylanines and salts thereof. Accepted on 1st March 1967.

Comprises admixing at least one substance selected from the group consisting of N-nitrosoorganohydroxylamines and salts thereof.

101570. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to circuit arrangements for converting a colour television signal built up according to the pal system into a signal built up according to the ntsc system, and conversely. Accepted on 28th February 1967.

Comprising in addition to the luminance signal, two colour components modulated in quadrature on a sub carrier wave and in which one of the colour components is shifted in phase from line to line through 180° and which device comprises a switch means for the line wise switching.

101603. United States Steel Corporation. Method of making ore briquettes. Accepted on 1st March 1967.

Comprising heating the fined under reducing conditions, mixing them with bituminous coal fines and compacting the mixture into briquettes.

101654. F. Stratton. Improved building block. Accepted on 27th February 1967.

The axis of symmetry of each key member and each recess is at an angle to the central vertical axis of the block.

101733. Vyzkumny Ustav Matematickych Stroju. Digital comparator. Accepted on 27th February 1967.

At least two undirectional counters are utilized, one functioning as reference counter and the other as deviation counter the output of both being applied as imputs to a flip-flop circuit the output of which controls the functional section of a servo mechanism.

101805. A. K. Bhagwati. Improvements in or relating to bobbin hangers. Accepted on 24th February 1967.

Comprises a pair of pivoted latches adapted to be projected outwardly or retracted into the main cylindrical body through slots, a cam and suspending means.

101847. C. A. Schroeder and Q. L. Clark. Method and apparatus for making an insulated duct. Accepted on 27th February 1967.

A tubular blanket of compressible insulating material encircling wire helix, and a tubular flexible substantially non-expansible sleeve encircling said blanket.

101864. Hercules Incorporated (formerly known as Hercules Powder Company). Improvements in or relating to a method for preparing an emulsifier and a process of polymerization using an emulsifier thus prepared. Accepted on 1st March 1967.

Distilling a stabilized rosin to produce an overhead fraction and a high boiling residue fraction and reacting the overhead fraction with sodium or potassium hydroxide on bicarbonate.

101868. J. A. Taraporevala. A self-stressing girder. Accepted on 25th February 1967.

Fitted at its two ends with links or like means, which by means of tendors or like means supported by said link or like means bring about stressing of the girder.

101983. Westinghouse Electric Corporation. Electric arc furnace and nonconsumable electrode suitable for use therein. Accepted on 9th February 1967.

Comprising means forming an arcing surface source of potential, the electrode is provided with magnetic field producing means constructed in such a way that the value of current in the arc causes no substantial deterioration of the arcing surface occurs.

102021. Dynamit Nobel Aktiengesellschaft. Process for purifying salt-impoverished brines in alkali-chloride electrolysis. Accepted on 25th February 1967.

Treating salt solution after partial removal of chlorine through vacuum distillation at 50-100°C with liquid or gaseous hydrocarbons.

102033. Farbenfabriken Bayer Aktiengesellschaft. Fungitoxic compositions. (12th July 1965). Accepted on 1st March 1967.

Comprising a phosphoric, thionophosphoric, phosphonic, thionophosphonic, phosphinic or thionophosphinic ester in admixture with a solid diluent or carrier or an organic solvent and an emulsifying agent.

102039. Leesona Corporation. Winding machine. Accepted on 24th Februarv 1967.

Comprising a mandrel adapted to support a core, a traverse roll, means for rotating said traverse roll, and driving means positioned on said traverse roll and operable to rotate said core in response to the rotation of the traverse roll.

102046. Bethlehem Steel Corporation. Coated ferrous products and the production thereof. Accepted on 28th February 1967.

Method of forming a coated product comprising passing a ferrous base through a molten bath consisting aluminium lead, silicon and zinc in restricted amounts.

102047. Bethlehem Steel Corporation. Coated ferrous products and the production thereof. Accepted on 28th February 1967.

Method of forming a coated product comprising passing a ferrous base member through a molten bath consisting aluminium lead, silicon and zinc in restricted amounts.

102082. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to cooling devices for use in an electric discharge tube having a metal wall serving simultaneously as an electrode. Accepted on 28th February 1967.

Comprising an electrode forming simultaneously part of the tube wall and having on the other side, a number of parallel grooves which are surrounded by a cylindrical jacket.

102108. The Dow Chemical Company. Process for polymerizing a polymerizable liquid comprising a vinylaryl compound. Accepted on 25th February 1967.

Characterizes in that the polymerizable liquid is heated in presence of a co-catalyst combination of tertiary butyl peroxy isopropyl carbonate and a peroxide.

102133. Ciba Limited. Dyestuff bleaching catalysts in photographic material for the silver dyestuff bleaching process. Accepted on 1st March 1967.

Containing on support at least two silver halide emulsion layers containing bleachable image dyestuffs and lever from thereof but containing dyestuff bleaching a catalyst, non-diffusable in neutral-alkaline medium but diffsable in acid medium.

102146. B. Tinnes. Equipment for uninterrupted continuous casting of metals. Accepted on 3rd March 1967.

Continuous casting of steel, pouring through intermediate ladle characterised by two pouring and two intermediate ladles in each line taking up operative pouring position.

102283. Associated Electrical Industries Limited. Improvements relating to length measurement of moving material. (9th November 1964). Accepted on 25th February 1967.

Equipment permitting the measurement of length of moving elongate material comprising means effective at a predetermined position for flashing a phosphorescent material on the moving material to produce a located mark and means for detecting such mark.

102616. Dunlop Rubber Company Limited. Improvements in apparatus for conveying lengths of sheet material. Accepted on 2nd March 1967.

Conveying lengths of sheet material comprising a first conveyor for sheet, two assembling platforms, transferring means for delivering lengths of sheet, said transferring means being adapted to deliver said length.

102748. Fiber Industries, Inc. Bobbin adapter. Accepted on 28th February 1967.

Comprises a head to be secured on a rotatable shaft and equally spaced lever arms attached within the periphery of said head.

102751. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Metal-containing disazo-dyestuffs and process for preparing them. Accepted on 1st March 1967.

Complex copper cobalt or chromium complex compounds of monoazo dyestuff is coupled with diazotized amines of the benzene or naphthalene series in weakly neutral or weakly acidic medium.

102915. English Electric-Leo-Marconi Computers Limited. Sequence detecting device. (15th December 1964). Accepted on 1st March 1967.

Comprising a magnetic core having three major apertures and a central minor aperture, separate winding associated with the core for receiving the the three signals.

103029. Fertilizer Corporation of India Limited. A process for preparation of sodium metaphosphate admixed with sodium sulphate for water treatment. Accepted on 24th February 1967.

Mixing sulphuric acid with tri-sodium phosphate, drying the mixed product, heating it in a furnance to a molten state and chilling the molten mass rapidly.

103030. Fertilizer Corporation of India Limited. A process for preparation of sodium polyphosphates from trisodium phosphate or disodium hydrogen phosphate. Accepted on 24th February 1967.

Heating a mixture of tri sodium phosphate or disodium hydrogen phosphate and ammonia and then quenching the hot fluid mass to a solid product.

103073. Cowlishaw, Walker & Co. Limited. Improvements in power presses or other machines. (21st December 1964. Accepted on 27th February 1967.

Positive but releaseable means for positively connecting the friction members in driving relation during inching the machine.

103225. The Singer Company. Controller for electric motors. Accepted on 27th February 1967.

One of circuit elements is an internally adjustable impedance device provided for compensating the combined effect of the tolerance variations in the circuit elements.

103246. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to semiconductor devices. Accepted on 28th February 1967.

Comprising a semiconductor body provided with two collecting electrodes for passing a current through the like part of the semiconductor body between the connecting electrodes exhibites a linearly increasing thickness.

103259. Hindustan Lever Limited. Improvements relating to shampoos. (4th January 1965). Accepted on 1st March 1967.

Containing dipropylene glycol in combination with methyl glycol or glycerine in combination with polyethylene glycol.

103369. International Nickel Limited. Electrodeposition of nickel. Accepted on 27th February 1967.

An alternating current of a frequency of not above 20 cycles per second is superimposed on the direct current in a current ratio of alternating current to direct current of at least 4 : 1.

103606. Textron Inc. Improvements in or relating to a line tie. Accepted on 3rd March 1967.

A line folded back upon itself to form a bight connected to a support, said bight comprising a loop and folded back portion being a tail portion, a tie for holding a part of the tail portion in contact with the main line comprising a performed resilient helical element.

103887. Gosudarstvenny Sojuzny Institut Po Proektirovaniju Mettalurgicheskokh Zavodov. Guiding device for ingots in secondary cooling zone in continuous casting plants. Accepted on 3rd March 1967.

Setting mechanism comprises synchronously rotating driving transmissions and nuts 6, threading on rods 2 of the hydraulic cylinders by sliding guides interacting with said transmission.

103931. Inventa A. G. Fur Forschung Und Patentverwertung. Device for spinning synthetic fibres. Accepted on 24th February 1967.

Characterised in that only two plastically deformable seals are compressed by the pressure of the spinning material inside the device.

103953. Ved Prakash Chawla. Bearing tester. Accepted on 27th February 1967.

Stethescope like hearing aid system fitted with polythene tubes attached by a chromium plated brass pipe to an acrylic sheet laminated handle with a hole in the centre, the other side of the handle being attached by means of aluminium caps fitting one into the other with chromium plated mild steel rod which in turn is attached to a diaphragm.

104089. Ishikawajima-Harima Jukogyo Kabushiki Kaisha. Improved method for manufacturing nitride-containing low-carbon structural steels. Accepted on 3rd March 1967.

Manufacturing nitride containing low carbon structural steels, comprising heating to 1300°C and cooling through 1250°C to 1050°C at 20°C/min, and through 750 to 600 at 13°C/min, heating to room temperature and heat treating above A_3 point.

104859. Mrs. Savita Chhabildas Shah. Improvements in or relating to pelmet-cum-curtain rail assembly. Accepted on 28th February 1967.

Consists of a combination of a rectangular shaped block having longitudinally extending slots slidably accommodating ball or head assemblies consisting of ball or bead having dowel like extension to suspend a bent wire.

105432. American Cyanamid Company. Crimp stable fibers and method of preparation. Accepted on 28th February 1967.

Comprises stretching the fibres at elevated temperatures and then compacting into a confined crimping zone.

105826. Thermo King Corporation. Control device for polyphase electrical system. Accepted on 28th February 1967.

The device is characterised by a phase sequence sensitive means being operatively associated with an open switch means such as to effect the closure thereof when sensing a positive phase sequence upon input terminals and opening of the switch means when sensing a negative phase sequence upon said input terminals.

108434. The Metal Box Company Limited. Improvements in or relating to a can end. (20th May 1964). [Divisional date 19th May 1965]. Accepted on 19th February 1967.

Securing a can end and a pull tub with hollow portion which is pressed out of overlying portion with resultant lessening of thickness.

109114. Fisons Pest Control Limited. Process for the preparation of the substituted benzimidazoles. (27th May 1964). [Divisional date 17th May 1965]. Accepted on 17th February 1967.

Reacting a corresponding benzimidizole with a chloroformate.

Restoration Proceedings

Notice is hereby given that applications have been made under Section 16 of the Indian Patents and Designs, Act, 1911 for the restoration of following patents :—

No. 79064 and its Patent of addition No. 88871—Miles Laboratories, Inc.

The Patents ceased on the 27th October 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in part III, Section 2 of the Gazette of India, dated the 4th February 1967. Any person may give notice of opposition to the restorations by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 29th April 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No 129587. Champion Electrical Industries, 2625, Teliwara, Delhi, Indian partnership concern, "a folding press for ironing", October 4, 1966.

Class 1. Nos. 129596 to 129598. Elegant Industries Private Limited. (A company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "necklace", October 7, 1966.

Class 1. No. 129601. Elegant Industries Private Limited. (A Company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Pendant", October 7, 1966.

Class 1. No. 129602. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18, (Maharashtra), "Bracelet", October 7, 1966.

Class 1. No. 129660. Visvanathan Vivekanandan, Sole Proprietor, trading as Siva Metal Works, 14/4, Ramakrishna Mutt Road, Madras 4, South India, Subject of the Indian Republic, "Flower vase", October 25, 1966.

Class 1. No. 129661. Visvanathan Vivekanandan, Sole Proprietor, trading as Siva Metal Works, 14/4, Ramakrishna Mutt Road, Madras 4, South India, Subject of the Indian Republic, "Rose water sprinkler", October 25, 1966.

Class 1. No. 129684. Suryadevara Nagendra Babu, Suryadevara Ramachandra Rao, Suryadevara Nagabhusayya and Katneni Kesava Rao, citizens of India, Partners of Swatantra Enterprises, Buckinghampet, Vijayawada-2, (Andhra Pradesh), "Telugu types fonts", October 31, 1966.

Class 3. No. 129442. Hilti Aktiengesellschaft of the Schaan, Liechtenstein, a company organised under the laws of the principality of liechtenstein, "Box", September 16, 1966.

Class 3. No. 129616. Nihal Chand (Indian Subject), Trading as Goodluck Chemical Works, Sadar Bazar, Delhi-6, "Lid for a container", October 14, 1966.

Class 3. No. 129630. Dennis Laurence Amore, of Jaitirth Mansion, Barrack Road, Bombay 1, Maharashtra, India, "Pouch", October 15, 1966.

Class 13. No. 129478. Jiyajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", September 19, 1966.

Class 13. Nos. 129511 to 129524. Bombay Fancy Textile Company, Bharat House, 104, Apollo Street, Bombay 1, an Indian Partnership firm, (Registered under the Indian Partnership Act), "Textile piece-goods", September 20, 1966.

Class 13. Nos. 129582 and 129583. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piece-goods", October 3, 1966.

Class 13. Nos. 129645 and 129646. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", October 17, 1966.

Class 13. Nos. 129632 to 129644. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", October 17, 1966.

Class 14. Nos. 129530 to 129532. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods", September 24, 1966.

A. JOGARAO,
Controller General of Patents, Designs and Trade Marks.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 25th March 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

The 4th March 1967

109571. B. N. Rawal. A contrivance for attaching a cop changing device, on any type of loom.

109572. G. R. Suryavanshi. Adaptable pulleys.

109573. Norbro Engineering Limited. Rotary Actuators. (5th March 1966).

109574. D. M. Shanbhag. Improved process and apparatus therefor for impregnating steel tools and parts with wear resistant material.

109575. Porous Plastics Limited. Improvements relating to water vapour permeable flexible sheet materials. (7th March 1966). [Addition to No. 101113].

109576. Joseph Sankey & Sons Limited. Improvements in or relating to piercing tools. (10th March 1966).

109577. Oerlikon—Buhrle Holding AG. Anti-skid device on a compressed-air brake, particularly for railways.

109578. Rohm & Haas Company. Pesticidal compositions. [Addition to No. 100983]. [Divisional date 30th August 1965].

109579. Seperic. Process for prepaing new pyridazone derivatives. (10th March 1966).

109580. Kanegafuchi Boseki Kabushiki Kaisha. An improved method and apparatus for exchanging bobbins in textile machine.

109581. E. R. Squibb & Sons Inc. N-oxides of phenothiazine compounds.

The 6th March 1967

109582. B. Sood. Sood, Automatic Traffic Road Signal (Elect.).

109583. B Sood. Kerosene Dhobi Press, Weight 8/10 kg. & Kerosene Domestic press. 5/6, Kg.

109584. V. Joseph. Drum and Roller thresher.

109585. S. R. Dalal and S. Ratilal. A luggage holder.

109586. Porous Plastics Limited. Improvements relating to water vapour permeable flexible sheet materials. (7th March 1966).

109587. E. R. Squibb & Sons, Inc. Derivatives of bis (p-hydroxyaryl) alkanoic acids.

109588. Imperial Chemical Industries Limited. Dyestuffs. (10th March 1966).

109589. Imperial Chemical Industries Limited. Production of coated film. (29th March 1966).

109590. Exquisite Form Industries, Inc. Torso-Encircling government.

109591. Eaton Yale & Towne Inc. Control linkage.

109592. Dr. Biswanath Sen. An improved on-machine paper and paper board coating process.

109593. Dr. Biswanath Sen. An improved on-machine paper and paper board coating process by a modified doctor blade.

109594. FMC Corporation. A process of making bearing race inserts.

109595. Eli Lilly and Company. Process for preparing 7-alpha-amino-benzyl-3-methyl cephalosporin analogues and the products obtained thereby.

109596. Chugai Seiyaku Kabushikk Kaisha and Kyowa Hakko Kogyo Co. Ltd. Method of treating streptococcus hemolyticus and the resultant preparation containing same.

109597. Mordovsky Nauchno-Issledovatelsky Elektrotekhnichesky Institut. Symmetrical thyristor.

109598. Tsentralny Nauchno-issledovatelsky institut Tekhnologii i Mashinostroenia, ul. Sharikopodshipnikovskaya. A method of mechanized electric are welding and building up of metals and alloys and a welding head for accomplishing same.

L497GI/66

109599. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the continuous manufacture of polyvethylene of high molecular weight.

109600. Etablishements Merlin & Gerin, Societe Anonyme. Magneto-optical voltage dividers.

109601. Etablissements Merlin & Gerin, Societe Anonyme. Electro-optical voltage divider.

109602. Algemene Kunstzijde Unie N. V. A method for the manufacture of a melting grid, and a melting grid so manufactured.

109603. Nailsea Engineering Company Limited. Means for cleaning particulate filters. (7th March, 1966).

The 7th March 1967

109604. Council of Scientific and Industrial Research. Improvements in or relating to gain control circuits for television receivers.

109605. S. I. S. Deshmukh. Safety short circuit.

109606. Fiber Industries, Inc. Polyethylene terephthalate esters.

109607. Cross and Jackson Limited. Skirt for plenum-type air cushion vehicle. (11th March 1966).

109608. J. R. Geigy A. G. Process for the production of new nitrofuryl derivatives. (8th March 1966).

109609. Rhone-Poulenc S. A. Process for removing bubbles from a gas or a vapour.

109610. Imperial Chemical Industries Limited. A dispersion of polymer solution in water suitable for the surface modifying treatment of shaped articles. [Divisional date 29th June 1965]

109611. H. Holloway. Process for preparing steroid compounds.

109612. Elektrokemisk A/S. Method of producing supersaturated solutions of aluminium fluoride.

109613. Badische Anilin & Soda-Fabrik Aktiengesellschaft. Molding compositions for the production of foam articles.

109614. Badische Anilin—& Soda-Fabrik Aktiengesellschaft. Coating and impregnating compounds.

109615. Central Glass Co. Ltd. A process for preparing gypsum hemihydrate.

109616. Ciba Limited. Water-Insoluble styryl dyestuffs and processes for their manufacture.

109617. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Tricyclic amines and process for the manufacture thereof.

109618. American Cyanamid Company. Novel pyridinium salts and methods for preparing same.

109619. Tri-Wall Containers, Inc. Fire-retardant coating.

109620. The Lubrizol Corporation. Improved resinous compositions and method; Non-newtonian metal substances. [Addition to No. 99385].

109621. Rizhsky Elektrolampovy Zavod. Method of application of diffusing-and reflecting coating on interior surface of incandescent lamp bulbs.

The 8th March 1967

109622. Council of Scientific & Industrial Research. A process for treating cellulosic textile materials for improving their resistance to abrasion and tear.

109623. Indian Plywood Manufacturing Company Limited. Improvements in or relating to new wood adhesive and plastic material from coconut pith and process for manufacturing of the same and products thereof.

109624. Ramlink Holdings (Proprietary) Limited. Improvements in or relating to electrical terminals.

109625. The English Electric Company Limited. Improvements in fuse fittings. (11th March, 1966).

109626. The English Electric Company Limited. Improvements in electrical fittings. (11th March 1966).

109627. United States Steel Corporation. Method of rolling slabs in planetary mill.

109628. Katsuragawa Denki Kabushikk Kaisha. Electrography and photosensitive element thereof.

109629. Ciba Limited. Manufacture of bis-piperidyl-alkanes.

109630. Yoshida Kogyo Kabushiki Kaisha. Improvements in and relating to slide fasteners.

109631. VEB Cheiefaserkombinat. Process and equipment for dust removal from granules of synthetic linear higher polymers especially of polymide chips.

109632. N. V. Appleton Pty. Ltd. Attachment of louvre clips to bearings.

The 9th March 1967.

109633. Unibilt Private Limited. Improvements in or relating to the manufacture of furniture & other light fixtures.

109634. The Dexter Corporation. Sheet material of improved tear strength.

109635. Aqua-Tec Corporation. Oral hygiene apparatus.

109636. Associated Electrical Industries Limited. Improvements in heat exchangers. (1st April 1966).

109637. J. L. Bedi. A process to make figures and shapes out of thermofoam sheet.

109638. J. L. Bedi. Non-pressure wickless safty stove.

109639. Office De La Recherche Scientifique et Technique outre-mer. Improvements in or relating to the production of a bactericidal and fungicidal product.

109640. C. A. V. Limited. Liquid Fuel Pumping Apparatus. (14th March 1966).

109641. The Bullard Company. Retractable tool support.

109642. American Home Products Corporation. Phenylaryl ketones. (26th May, 1964). [Divisional date 25th May 1965].

109643. Van Leer's Vatenfabrieken N. V. Sheet metal shipping container.

The 10th March 1967

109644. Council of Scientific and Industrial Research. Vertical shaft kiln.

109645. Matsushita, Electronics Corporation. Electrical apparatus having semiconductor devices therein.

109646. Matsushita Electronics Corporation. Manufacturing method of semi-conductor device.

109647. Ministerul Petrolului, Bucharest, Bd. Republicii. Gun perforator cell for casing perforation.

109648. S. R. Vithaldas. A self-regulating starting device to be used in starting of an automobile and similar engines.

109649. Maybach Mercedes-Benz, Motorenbau GmbH. Fottinger overdrive torque converter.

109650. Imperial Chemical Industries Limited. Electrolysis. (23rd March 1966). [Addition to No. 100636].

109651. Quenot & Cie. S.a.r.l. Improvements in linear tape measures. (19th April 1966).

109652. Farbenfabriken Bayer Aktiengesellschaft. Process for the preparation of cyclohexanone oxime.

109653. The Dunlop Company Limited. Tyre building apparatus.

109654. Fischer & Porter Company. Self-cleaning magnetic flowmeters.

109655. P. C. L. Mistry. Improvements in or relating to folding cradle. [Addition to No. 100415].

109656. Richardson, Tuer & Co. Limited. Improvements in or relating to looms. (21st March 1966).

109657. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electrostatic synchronous motors.

109658. N. V. Philips Gloeilampenfabrieken. Electrode system, particularly semiconductor electrode system and method of producing the same.

109659. N. V. Philips Gloeilampenfabrieken. Method of producing layers of grains, particularly monolayers of grains embedded in a filler.

109660. N. V. Philips Gloeilampenfabrieken. Method of preparing a photosensitive lacquer.

109661. G. R. Thakre. Folding furniture.

109662. G. R. Thakre. Bottle caps. f

Alteration of Date

99746. The claim to priority date 2nd June, 1964 has been abandoned and the application dated as of 27th May, 1965, the date of filing in India.

100732. The claim to priority date 28th July, 1964, has been abandoned and the application dated as of 21st July, 1965, the date of filing in India.

99920. Ante-dated to 4th June 1965 under Rule 3(1) of the Indian Patents and Designs Rules, 1933.

108277. Ante-dated to 3rd June 1965 under Section 5 of the Act.

109103. Ante-dated to 31st May, 1965 under Section 5 of the Act.

109106. Ante-dated to 21st May, 1965 under Section 5 of the Act.

109346. Ante-dated to 24th May, 1965 under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99612. The Metal Box Company Limited. Improvements in or relating to the securing of deformable sheet metal elements. (20th May 1964). Accepted on 5th January 1967.

Method securing two ductile metal sheep by clamping and forming frusto conical shape around it by impact extrusion so that the sheets are locked.

99619. Basic Carbon Corporation. Carbonizing cellulosic material. (21st May 1964). Accepted on 20th February 1967.

Heating the carbonisable material at above 150°C in inert atmosphere or vacuum.

99628. Archer Daniels Midland Company. Two package composition useful as a binder for foundry cores. Accepted on 21st February 1967.

Comprises (a) in a first package drying oil and (b) in a second package polyisocyanate.

99687. Halcon International Inc. Method of producing oxirane compounds. Accepted on 24th February 1967.

By contacting an olefinacally unsaturated compound in the liquid phase with an organic hydroperoxide at epoxidising conditions in the presence of an epoxidation catalyst and a basic compound.

99736. Shell Internationale Research Maatschappij N.V. Process and apparatus for the automatic control of a continuous distillation process. Accepted on 27th February 1967.

Characterised in that (a) quality of the bottom product is controlled by a controller which adjusts the feed stream, (b) the degree of re-evaporation the degree of preheating the feed, the top product flow, the bottom product flow, the degree of reflux or the degree of cooling in the condenser are adjusted.

99746. Monanto Chemicals Limited. Improvements relating to foamed products. Accepted on 27th February 1967.

Produced by a process in which a fomable polyvinyl aromatic resin composition is extruded through a die arfice, and there is produced a foamed product having a mass of substantially parallel elongated cells enclosed by a surface skin.

99785. Ciba Limited. New azo dyestuffs, processes for their manufacture and materials dyed or printed therewith. Accepted on 28th February 1967.

Coupling amino azo dyestuff with acylating agent to provide fibre-reacting grouping and paraphenylene disulfonic acid radical in azo dyestuff produced.

99797. The Commonwealth Trust Limited. Improvements in or relating to building blocks of terracotta. Accepted on 28th February 1967.

A multipurpose building block comprising hollow structure of square or oblong section and substantially of such cross sections wherein in outer face of one wall at least one channel is formed.

99813. Thakur Prasad Sao. Asbestos cement sheets and sheds made therefrom. Accepted on 28th February 1967.

Comprising three integral members, the two side members and the third, a central member wherein the angle between the central member and each side member is an obtuse angle.

99823. Hi-Shear Corporation. Fastener element. Accepted on 28th February 1967.

Fastener element having a longitudinal axis a plurality of projections, each projection being bounded by a pair of projection sidewalls which lie in planes substantially parallel to said longitudinal axis, and each pair of adjacent projections being separated by an intervening flute.

99828. International Nickel Limited. Improvements relating to Nematocides. Accepted on 28th February 1967.

Comprising a compound selected from sulphate, borate cyanide, phosphate, nitrate or a dialkyl thiocarbamate, of nickel in admixture with an inert solid or liquid carrier and containing up to 50% of the active ingredient if water or other usual chemical solvent is used as liquid carrier.

99849. Control Data Corporation. High speed divider for digital computers. Accepted on 1st March 1967.

Comprising means applying dividend bits stored by a register to each of difference networks means applying simultaneously each divisor multiples stored by another register to separate difference networks to perform trial subtractions whose signs are sampled by sampling means, logic means responsive to latter and means combining partial quotient bits.

99867. Fiber Industries, Inc. Process for producing fiber and film forming synthetic linear thermoplastic polymers. Accepted on 2nd March 1967.

Comprises admixing rectile into the precursor of synthetic linear polymer and polymerizing said precursor.

99869. Laporte Titanium Limited. Improvements in and relating to the manufacture of titanium dioxide and apparatus therefor. (3rd June 1964). [Addition to No. 84936]. Accepted on 2nd March 1967.

By reacting titanium tetrachloride with an oxidising gas in the vapour phase.

99881. Bakelite Xylonite Limited. Improvements in or relating to polyvinyl chloride fusion coating compositions. Accepted on 2nd March 1967.

Comprises (a) a homopolymer of vinyl chloride or a copolymer of vinyl chloride and not more than 20% by weight thereof of a copolymerisable vinyl monomer, and (b) triaminomelamine.

99886. The Cementation Company Limited. Improvements in anchorages for structural tensile members. (4th June 1964). Accepted on 1st March 1967.

Boring a hole to provide for an anchorage length of hole, attaching load transmitting elements to terminal lengths of the wires, introducing the cable end together with the elements into the hole and anchoring them in the hole by grouting.

99918. Bendix-Westinghouse Automotive Air Brake Company. Improvements in or relating to fluid pressure braking systems. Accepted on 3rd March 1967.

Including a source of fluid pressure, a brake actuator a pair of serially arranged fluid pressure responsive element, a manually operated brave valve fluid conduits means normally open valve means normally closed valve means and fluid pressure responsive control means.

99920. Tomlinsons (Rochdale) Limited. Improvements in or relating to wire card raising machine. (4th June 1964). Accepted on 4th March 1967.

Characterised in that the machine is provided with automatically operable means adapted to vary the degree of raising or felting when a predetermined length of fabric being rais or felted has passed over the machine.

99926. British Nylon Spinners Limited. Yarns of polymeric material and a process and apparatus for making same. (9th June 1964). Accepted on 3rd March 1967.

Comprises a compact core and a less compact peripheral region the core being formed of loops aligned in a generally axial direction twist being present in the aligned looks and the pheripheral region being formed of a multiplicity of loops.

99975. Metallgesellschaft Aktiengesellschaft. Process of producing so_3 and/or sulphuric acid by a catalytic reaction of gases which contain so_2. Accepted on 2nd March, 1967.

Characterised in that a conversion of 70—80% of the total So_2—content of the starting gas is effected in the first contacting stage preceding the intermediate absorption.

99983. Control Data Corporation. Data processing system. Accepted on 4th March 1967.

Having an input/output means for receiving and transmitting digital information to external sources, storage means for storing the digital information and data processing means for performing data processing operations on the digital information.

99992. J. R. Geigy A. G. Process for the optical brightening of cellulose fibres. Accepted on 3rd March 1967.

Treating fibres with aq. solution of optical brightener in presence of cation active agent.

99993. J. R. Geigy A. G. Process for the optical brightening of polymeric or copolymeric acrylonitrile fibres. Accepted on 3rd March 1967.

Treating fibres with aqueous solution of oxacyanine compound.

99994. J. R. Geigy A. G. Process for the production of polymeric or copolymeric acrylonitrile fibres of an improved white shade. Accepted on 3rd March 1967.

Incorporating into polymers before spinning 0.001—0.3% by weight of oxacyamine compound.

100062. K. Sundararajan. Safety trip off switch for body earth. Accepted on 6th March 1967.

Comprising a push button sliding over a plunger both push button and plunger being capable of moving up and down in a bracket with two mechanical latches or levers locking in two different grooves in the plunger and triggering arrangement.

100166. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Reactive optical brighteners. Accepted on 6th March 1967.

Comprises reacting cyanuric acid chloride with a derivative of the aminostilbene an amino-aryl-β-hydroxy ethyl sulfour, and a primary or secondary aliphatic amine, and the product is then reacted with a polybasic acid, or reacting cyanuric acid chloride with a derivative of aminostilbene and then further reacting the thirdhalogen atom with an esterefied and if desired substituted amino aryl-β-hydroxy ethyl sulfone or aminoaryl vinyl sulfone.

100225. Marine Construction & Design Co. Apparatus for transferring fish. Accepted on 4th March 1967.

Comprising elongated flexible conduit having big diameter to carry fish and water and having an inlet and out let end, a rotary impeller water pump-means adapting the same to be positioned, pump having a discharge outlet.

100266. English Clays Lovering Pochin & Company Limited. Improvements in or relating to the production of strontium carbonate. (26th June 1964). Accepted on 8th March 1967.

Comprises separating pure celestite from crnde celestite ore by grinding and subjecting the ground particles to a froth floatation process.

100346. J. R. Geigy S. A. Apparatus for the fractionnated distribution of a liquid product. Accepted on 6th March 1967.

The propelling agent reservoir is provided with a high pressure obturator rendered integral with a control push button.

100410. Rhone-Poulenc S. A. Process for the preparation of organosilicon compounds. Accepted on 3rd March 1967.

Reacting a hydrogeno-organosilicon compound with an organic compound having one or more hydroxyl groups in the presence of a catalyst.

100417. Metallgesellschaft A. G. An apparatus for screening hot solid particle size mixtures. Accepted on 4th March 1967.

Mixture is screened in entrance portion of a cooling zone to obtain fines and coarsesfines fed through cooling zone and coarses are fed out of said zone.

100515. Siemens-Schuckertwerke Aktiengesellschaft. An electric switching apparatus. Accepted on 6th March 1967.

A switching apparatus having an actuating lever which operates in the manner of a second order lever to displace the carriage to and away from the operative position and locking means which in their locking condition act upon the actuating lever to prevent its operation.

100549. General Electric Company. Improvements in or relating to a process for forming polyphenylene ether resins by an electrolytic oxidation. Accepted on 6th March 1967.

Comprising forming a solvent solution of a monomer, a copper salt catalyst a complexing agent and an ionic conductor placing the solution in the anode compartment of an electrode cell and applying an electric current for a period of time sufficient to cause the monomer to polymerise.

100656. Celanese Corporation of America. Process for producing olefin oxygen addition products. Accepted on 6th March 1967.

Comprising (I) bringing into reactive relationship (A) an olefin and (B) an oxidising compound and (II) recovering said oxidation product.

100678. Celanese Corporation of America. Process of making vinyl esters. Accepted on 8th March 1967.

Comprising I reacting, in a lower alkane carboxylic acid medium, (A) ethylene and (B) a lower acyloxy moiety in presence of (a) ahalide (b) noble metal of group VIII of the periodic table (c) a redox couple and at least 1 molar acyloxy concentration, II oxidising the reduced values of said redox couple and III recovering from the process a vinyl ester.

100732. Coal Industry (Patents) Limited. Improvements in or relating to monorail conveyors. Accepted on 3rd March 1967.

Comprising a trolley to be rope hauled along a monorail track, a two-part jaw clipping means, a first jaw attached to the trolley rigidly, and the second being movably mounted, actuating means with the second jaw part and locking means for locking second jaw part.

100925. United States Steel Corporation. A coating composition and a method of applying the same to a ferrous article for shielding from corrosion. Accepted on 8th March 1967.

Producing an ungalvanized portion on a ferrous article comprising coating said portion with said mixture and drying the coating prior to immersing the article in a molten spelter.

100992. Varta Aktiengesellschaft. Improvements in or relating to hermetically edging for porous plates. Accepted on 6th February 1967.

In which the pores of the plate being first impregnated with a liquid and thereafter the space between the inner edge of a holder and outer edge of the porous body being filled completely with a hardened sealing compound.

101081. Calmic Limited. Improvements in or relating to the maintenance of urinals, water closet basins and the like. (7th November 1964). [Addition to No. 98461]. Accepted on 13th February 1967.

Comprising an outer container within the cistern of a flushing system an inner container for a viscous slowly mobile disinfectant composition open at its lower end a reticulate or foraminous material closing the opening and a syphon tube whose outlet is outside the outer container and whose inlet is within the outer container.

101085. Indian Oxygen Limited. Combined oxygen probe and fuel burner for use in metallurgical treatment. (31st August 1964). Accepted on 13th February 1967.

A burner with at least three coaxial annular outlet passages of cylindrical or frusto conical, intermixing done outside wherein innermost and outermost outlet passages are adapted to be supplied with oxidising gas.

101104. Smith & Nephew Plastics Limited. Improvements in and relating to laminates and methods for their manufacture. (17th August 1964). Accepted on 4th March 1967.

Having at least two layers that comprises adhering together a sheet open network of a thermoplastic material arranged at uniform spacings, each of which masses is connected to the adjacent thick solid masses by strands and at least one backing sheet by utilising means for pressing said open network onto said backing sheets and other means to subject the spaced open network to sufficient heat to soften and fuse the thermoplastic material, are pressed on and firmly adhered to the surface of the backing sheet or sheets.

101141. N. V. Philips Gloeilampenfabrieken. Agents containing new chlorothiobenzamides. Accepted on 16th February 1967.

Comprises N-alkoxymethyl 1-2,6-dichlorothiobenzamide and a carrier therefor.

101285. Shell Internationale Research Maatschappij N. V. Herbicidal compositions comprising sulphur-containing phenylureas. Accepted on 24th February 1967.

Treating 4-(alkylthio)-3-haloaniline with phosgene and reacting the product with dialkylamine.

101300. Indian Oxygen Limited. Heat exchange unit particularly for vaporizing liquefied gas. (31st August 1964). Accepted on 25th February 1967.

Comprising an extruded section formed into a helical coil having contiguous turns, said sections comprising one or more tubes each having at least one external longitudinal fin, the adjacent turns of the said coil being joined by said fins.

101314. John Graham Macdonald. Improvements in hydro mechanical transmission systems. Accepted on 27th February 1967.

Second power unit member is operatively connected to the hydrostatic drive through a power transfer means so that in a first direction of rotation speed ratio between said unit and said drive is of a first predetermined value and in a second direction of rotation said ratio assumes a second predetermined value.

101342. Universal Oil Products Company. Process for reactivating solid phthalocyanine catalyst. Accepted on 25th February 1967.

Comprises washing deactivated phthalocyanine catalyst with alcohol.

101343. Universal Oil Products Company. Catalytic Hydrocracking process. Accepted on 28th February 1967.

Comprises reacting hydrocarbonaceous material with hydrogen at hydrogenation conditions thereby hydrogenating aromatic compounds, thereafter it is contacted with hydrogen at hydrocracking conditions and then recovering the hydrocracked product.

101381. Imperial Chemical Industries Limited. Improvements in the orientation of polypropylent film or ribbon. (7th September 1964). Accepted on 28th February 1967.

The film of polymeric composition comprising polypropylene is drawn at least six times its undrawn length at a rate of draw of at least 70,000% per minute.

101390. James Mackke & Sons Limited. Device for storing and transporting bobbins in textile machines. (2nd September 1964). Accepted on 1st March 1967.

Having on bobbin receivers to hold bobbins in an ordered position and when the device is full, to cause a bobbin or bobbins to be discharged without interlocking.

101391. Amsted Industries Incorporated. Railway car truck. Accepted on 1st March 1967.

Spaced side frames supported upon three wheels and axle assemblies each frame including two side frame sections having adjacent inner ends interconnected for relative pivotal movement.

101392. James Mackie & Sons Limited. Apparatus for donning and doffing bobbins in textile machines. (2nd September 1964). Accepted on 1st March 1967.

Comprises doffing means a bobbin storage device, means to insert bobbins doffing means into storage device and donning means for empty bobbins.

101397. Shell Internationale Research Maatschappij N. V. Pesticidal compositions. (3rd September 1964). Accepted on 1st March, 1967.

Pesticidal composition comprising a phenazine derivative and a carrier with or without the addition of a surface active agent.

101437. Corning Glass Works. Fused cast refractory. Accepted on 4th March 1967.

Refractory composition consisting of carbon, more than 5% of boron, more than 5% of metallic substance and 0 to 15% of a diluent selected from oxygen and nitrogen, a remainder 0 to 10%.

101438. Corning Glass Works. Fused refractory castings. Accepted on 4th March 1967.

A composition consisting of 5% free carbon with boron carbide crystal which essentially contains carbon, 15% boron and from 0 to 15% of diluent consisting either of oxygen or nitrogen, a remainder 5%.

101451. Mount Hope Machinery Limited. Disc brake for use in a web tensioning device. Accepted on 6th March 1967.

Comprises, in combination, disc means, a drum having a radial braking surface, mounting means and axially-extensible support means comprising track means with balls axially movable in track means.

101483. United Aircraft Corporation. Improvements in and relating to heat treatment of alloys. Accepted on 7th March 1967.

Characterised by heating the alloy holding it at high temperature and cooling the same in gas.

101557. Imperial Chemical Industries Limited. Preservation of polyolefins and polyamides. (1st October 1964). Accepted on 4th March 1967.

By incorporating into the polyolefins and polyamides of an acyl-p-phenylene diamine.

101626. Council of Scientific and Industrial Research. Improvements in or relating to the manufacture of soft ferrites. Accepted on 4th March 1967.

Manufacture of soft ferrites by mixing a compound of nickel which forms the oxide on heating and sintering with clay at elevated temperature wherein % of clay is beyond 4%.

101653. L'Air Liquide, Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude. Process for cooling a gaseous mixture at a low temperature. [Addition to No. 82531]. Accepted on 4th March 1967.

Characterised in that a first gaseous mixture is used as a frigerific fluid within a cooling cycle providing the condensation of a second gaseous mixture consisting of the same main components and from which the constituent to be recovered in the liquid state in recovered.

101674. Deutsche Gold-Und Silber-Scheideanstalt Vormals Roessler. Method of recovery of the precious metal evaporated during catalytic reactions. Accepted on 4th March 1967.

Characterized in that the platinum or metal of the platinum group is removed by gettering action from the gas stream leaving the catalyst, as long as it is still fully or virtually in vapour form.

101688. Continental Carbon Company. Manufacture of carbon black. Accepted on 1st March 1967.

Comprising imparting an electrical charge to the hydrocarbon feedstock immediately prior to the introduction thereof in the reaction zone in which pyrolysis conditions are continuously maintained.

101714. Council of Scientific and Industrial Research. Particle board, hard board, flooring tile, furniture board and moulded articles from wood and agricultural wastes. Accepted on 4th March 1967.

Subjecting sawdust, wood waste and other agricultural wastes to mix with optimum amount of water which is in between 10 to 30%, and then treating same under temperatures from 150°C to 190°C, and pressure from 60 kg/sq.cm. to 1000 kg./sq.cm.

101726. Aktiebolaget Bofors. Device for steering system of track laying vehicles. Accepted on 3rd March 1967.

Characterised in that a hydraulic piston arranged at each of two brakes is connected with a valve which allows the strongest of the pressure impulses for both steering and driving braking to pass to the piston.

101738. Rockwell-Standard Corporation. Tandem axle drive mechanism. Accepted on 3rd March 1967.

Comprising for ward and reward transversely extending drive axle units, said forward axle unit having a power input shaft assembly mounted on the forward portion.

101748. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to a method of manufacturing a heat reflecting filter. Accepted on 4th March 1967.

Characterized in that a mixture to be sprayed is heated at a temperature which is approximately equal to that of the support.

101767. Sandoz Ltd. Fungicidal mercury compounds, process for their production and compositions containing them. (20th November 1964). Accepted on 3rd March 1967.

Comprising reacting 1 mol of citric acid with one mol of the compound selected from alkyl mercury hydroxides or acetates and one mol of the compound selected from alkoxy ethyl mercury hydroxides or acetates.

101768. Sandoz Ltd. Pesticidal composition. (7th December 1964). Accepted on 1st March 1967.

Comprising at least one ester selected from phosphoric acid esters and thiophosphoric acid esters and about 1% to about 20% of the ester an aliphatic carboxylic acid anhydride having 4, 6 or 8 carbon atoms.

101874. The Molins Organisation Limited, (formerly known as Molins Machine Company Ltd.). Improvements in or relating to apparatus for feeding cigareties. (8th October 1964). Accepted on 28th February 1967.

Including detector means at the entrance of the reservoir having a moving part in contact with the cigarettes and arranged to move in the direction of movement of the cigarettes to urge them into the reservoir.

101875. Ultrasona AG. Process and apparatus for treating a continuous length of synthetic textile fabric for the purpose of making the material softer, less glossy and voluminous. Accepted on 3rd March 1967.

The textile fabric is passed through the shrinking bath then being subjected to ultrasonic waves and thereafter washed with a washing liquid.

101876. E. W. Bliss Company. Method for forming an attaching lug on the terminal end of a tape or flat band. Accepted on 28th February 1967.

Characterised in that it includes the following steps :—removing the transversely extending strands adjacent terminal end, applying a curable material onto longitudinally extending strands adjacent terminal end, providing a mold having opposite diverging side walls terminating at the converging ends placing tape into mold, curing material while tape is positioned in mold and then removing tape from mold.

101907. Westland Aircraft Limited. Improvements in or relating to vehicles. (15th October 1964). Accepted on 3rd March 1967.

Hull having a central keel member and a sponson extending therearound and a retractable skirt disposed around the outer periphery of the sponson.

101957. Dynamit Nobel Aktiengesellschaft. Process for the production of polyvinyl chloride suitable for plastisol preparation. Accepted on 1st March 1967.

Forming an emulsion from a stable polyvinyl chloride dispersion and a fatty acid having from 8 to 22 carbonatoms, an ammonium salt of such an acid, an aliphatic amine salt of such an acid, a fatty alcohol having from 8 to 22 carbon atoms and mixtures thereof.

101964. The Metal Box Company Limited. Improvements in or relating to the sealing of cartons. (27th November 1964). Accepted on 4th March 1967.

Moving the carton along a predetermined path, directing a flow of high temperature air on to the heat sealable material, folding and pressing the closure flap into engagement with the sides of the carton while said material is still soft.

101973. H. Holloway. Flux compositions for use in bronze brazing and welding. Accepted on 1st March 1967.

Flux composition being bonded by a carboxy methyl or methyl ethyl cellulose derivative.

101974. Acf Industries. Incorporated. Flexible diaphragm pump. Accepted on 3rd March 1967.

Comprising a hollow casing a flexible diaphragm inside in the casing and defining a pumping chamber therein, a passage in communication with said pumping chamber, a valve seat defined in the passage and an abutment member to limit the movement of the valve member.

101984. Westinghouse Electric Corporation. Apparatus for handling hot fluids. Accepted on 3rd March 1967.

Comprising a casing an operating mechanism disposed in said casing and support means supporting the casing the support means consist of a plurality of generally upright column structures.

101995. Joseph Lucas (Industries) Limited. Slip ring unit for attachments to the rotor shaft of a dynamo electric machine. (14th October 1964). Accepted on 1st March 1967.

Comprising a pair of cylindrical conductors embedded within a resin body and exposed on the outer surface thereof and a fan moulded with the body to draw air through the machine.

101997. Joseph Lucas (Industries) Limited. A method of manufacturing a slip ring unit for attachment to the rotor shaft of a dynamo-electric machine. (14th October 1964). Accepted on 1st March 1967.

Comprising pouring synthetic resin between a cylindrical metal consister and a former removing the former after resetting of the resin machining a groove in the consister to expose the resin and to leave two slip rings.

101998. Joseph Lucas (Industries) Limited. Full wave bridge rectifiers, (14th October 1964). Accepted on 1st March 1967.

Comprising a set of and also a pair of conductive members extending transversely to the set of members and a member of semi-conductor diodes being supported between the set and pair of member in such a way that when A.C. supply is connected to the set a rectified supply will appear across the pair of members.

101999. Joseph Lucas (Industries) Limited. Laminated stator assemblies for dynamo-electric machines. (14th October 1964). Accepted on 3rd March 1967.

In which each lamination consists of a number of identical arcuate parts arranged with the parts in successive laminations offset from each other.

102136. E. O. Sylvester. Mold apparatus and method of constructing a mold. Accepted on 4th March 1967.

Comprising forming at least one the blocks of mold, finishing a surface of that block and placing the block in the mold with said surface oriented to other surfaces of the mold to form a cavity there-between.

102221. Gloucester Railway Carriage & Wagon Company Limited. Improvements in or relating to bogie trucks for rail vehicles. (27th October 1964). Accepted on 4th March 1967.

Comprising a pair of rigid side frames, transverse member which is connected to the side frames through a suspension system, floating bolster supported by transverse member.

102316. C. Sandill. Improvements in or relating to valves for spray producers. Accepted on 4th March 1967.

A valve characterised by a metal cup having on its underside a central cavity for the valve housing having a cup shaped body and a tubular tail end.

102332. Shell Internationale Research Maatschappij N. V. Method and apparatus for producing steam. Accepted on 4th March 1967.

With an increased or reduced consumption of steam a smaller or larger part respectively of the heat supplied to the steam boiler is passed to the combustion air flowing to the industrial furnace.

102347. Vaessen-Schoemaker Holding N. V. Foam-sintering molding process and products. Accepted on 4th March 1967.

Characterized in that at least during part of the molding process an intimate mixture of thermoplastic material and blowing agent is introduced into the mold and the mold is heated from outside to a temperature to coalesce the said intimate mixture to a foamed fused mixture within the mold.

102364. Fichtel & Sachs A. G. Cable-pull starting device for internal combustion engines. Accepted on 4th March 1967.

Cable pull starting device characterised by an adjusting link movable at an angle to the direction of the cable pull.

102416. General Electric Company. Improvements in or relating to corrosion resistant coating. Accepted on 4th March 1967.

Method of forming a chromide coating on a Metal composition comprising forming and electric cell containing said metal composition as the cathode joined to a chromium anode and a fused salt electrolyte composed essentially of at least one metal fluoride and at least one metal chromous-fluoride and controlling the current flowing in the said electric cell and interrupting the flow electric current after the desired thickness of the chromide coating is formed on the metal object.

102511. United States Atomic Energy Commission. Process and apparatus for heating saline solutions. Accepted on 6th March 1967.

Heating solutions containing salts of inverted solubility curve comprising upwardly flowing the solution through walled heat exchange, heating the solution, contacting the walls of heat exchanger.

102534. Asahi Kasei Kogyo Kabushiki Kaisha. Binder compositions for granular substance containing paints. Accepted on 4th March 1967.

Consisting essentially of a resin and a solvent to enable said composition to form a continuous film at a temperature of O° to—2°C.

102551. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to assemblies of semiconductor circuit elements. Accepted on 6th March 1967.

Comprising a semiconductor body in which at least two semiconductor circuit elements are provided by means of diffused zones, the semiconductor body comprises a number of consecutive layers of alternating conductivity types.

102567. Standard Telephones and Cables Limited. Transmitter-receiver terminal equipment for intelligence signal communication. (27th November 1964). Accepted on 6th March 1967.

Comprising means for transmitting and receiving pilot frequency, means controlled by a difference frequency between the pilot frequency as transmitted and received.

102584. Compaignie Francaise Thomson Houston-Hotchkiss Brandt, formerly known as Compagnie Francaise Thomson-Houston. Industrial regulators. Accepted on 6th March 1967.

From the output of operational amplifier the feedback loop is formed by a capacitor connected in series with a resistor.

102639. General Electric Company. An electrical collector apparatus for electrically connecting a rotating and a stationary member. Accepted on 4th March 1967.

Comprising an electrically conducting annular cup having annular opening and connected to the rotating member, electrically conduction fluid held in the said cup by centrifugal force and rotating therewith, an electrically conductive blade is extended into the liquid.

102697. Corning Glass Works. Molding comminuted non-plastic inorganic material. (15th July 1965). Accepted on 6th March 1967.

Making sintered article from comminuted non-plastic inorganic material comprising preparing a molding batch, firing green body to sinter the non-plastic inorganic material into a coherent body.

103465. Aluminium Laboratories Limited. Method for discharging spent alloy from aluminium sub-halide distillation system. Accepted on 6th March 1967.

Comprising feeding spent alloy from the convertor into an enclosed passage and supplying substantially moisture free purge gas, to the upper end of said enclosed passage.

103550. The Director, Indian Agricultural Research Institute, New Delhi. A process for "Soil-Water-Plant Test Kit". Accepted on 4th March 1967.

The first arm of wheatstone bridge having a standard solution, the second arm having a tert solution, the bridge being worked on an alternating signal generated by a transistorised RC phase shift oscillator, the said bridge being coupled to the oscillator through a condenser.

103814. R. P. Sonneville. A hammer-head bolt. Accepted on 6th March 1967.

Having a screwthreaded shank of circular cross section shape comprising an auxiliary head and having at least one boss having two abutment faces.

105537. Rolls-Royce Limited. Gas turbine engine fuel system. (23rd June, 1965). Accepted on 1st March 1967.

A matering orifice, means for varying the size of the metering orifice in accordance with at least one engine variable, means for passing through the metering orifice a portion only of the full flow of fuel, a throttle valve arranged downstream of the metering orifice and means for passing through the throttle valve at least a part of both the said portion of the full flow of fuel and the remaining portion thereof.

108277. The Pleasey Company Limited. Circumferential seal for coupling two approximately aligned tubular elements. [Divisional date 3rd June 1965]. Accepted on 3rd March 1967.

Comprises a sealing ring in which a carbon ring is compressively prestressed in a tensionally prestressed metal ring or ferrule an inner surface of said ring being in pressure contact with a surface connected with one of said elements.

109103. Thakur Prasad Sao. Method of making a shed. [Divisional date 31st May 1965]. Accepted on 28th February 1967.

Wherein one of the side members of each of the two sides sheets is disposed vertically and the lower edge thereof is embedded in a base the central sheet overlapping the other side members of said two sheets.

109106. Archer Daniels Midland Company. Process for forming foundry cores and cores so produced. [Divisional date 21st May 1965]. Accepted on 21st February 1967.

Comprises preparing a foundry sand mix with a binder containing drying oil and polyisocyanate, forming a green core from it and then drying to form a hard cured core.

109346. Halcon International, Inc. Preparation of oxirane compounds. [Divisional date 24th May 1965]. Accepted on 24th February 1967.

Reacting an olefinically unsaterated compound with an organic hydroperoxide in the presence of a catalyst selected from the group consisting of Ti, Cr, Nb, Zr, Te, Ta, Re and V.

Opposition Proceedings

(1)

An opposition has been entered by Viswanath Dattatreya Hukerikar to the grant of a patent on application No. 95779, made by Westinghouse Brake and Signal Company Limited.

(2)

An opposition has been entered by Belpahar Refractories Limited to the grant of a patent on application No. 98726, made by Orissa Cement Limited & another.

(3)

The opposition entered by Bright Brothers Private Limited to the grant of a patent on application No. 87725 made by Ram Charan Sodhani & Balkishan Sodhani, as notified in Part III, Section 2 of the Gazette of India, dated the 31st July 1965, has been treated as withdrawn.

(4)

The opposition entered by Bright Brothers Private Limited to the grant of a patent on application No. 91058 made by Pritam Singh Gill, as advertised in Part III, Section 2 of the Gezette of India dated the 27th November 1965, has been treated as withdrawn.

Correction of Clerical Error

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical errors occurring in the specification of patent application No. 98938 was corrected on 6th March 1967.

Cessation of Patents

68144. 69273.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129024. Auto Importing Co., (An Indian partnership concern), Kashmeregate, Delhi, "The lock", July 27, 1966.

Class 1. No. 129059. G. S. Agricultural Engineering Works, V. & P.O. Nurpur, Pathankot Road, Jullundur District, Punjab State, an Indian Sole Proprietory concern, "Seed-*cum*-fertilizer drill", August 3, 1966.

Class 1. No. 129191. Bhim Sain Barry, 65/11, New Rohtak Road, Karol Bagh, New Delhi-5, Indian National, "Can closing machine", August 11, 1966.

Class 1. No. 129255. Ashok Metal Industries Ltd., an Indian Limited concern, 157, Netaji Subhas Road, Calcutta-1, West Bengal, India, "Pot", August 23, 1966.

Class 1. No. 129543. Elegant Industries Private Limited (A Company registered under the Indian Companies Act) Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Chappel Piece", September 26, 1966.

Class 1. No. 129586. Bright Steel Industries, 27-Pusa Road, Karol Bagh, Delhi-5, India, Indian Proprietory Concern, "A door handle", October 4, 1966.

Class 1. No. 129614. Jagan Nath Garh, Ramesh Trading Corporation, 3088, Dassan Street, Hauz Quazi, Delhi-6 An Indian National "Metal net", October 14, 1966.

Class 1. No. 129675. America Lock Company, 1, East Park Road, Karol Bagh, New Delhi-5, (Registered Partnership Concern) Indians (India), "A cycle lock", October 29, 1966.

Class 1. No. 129724. Rex Auto Products (India) Indian partnership concern, 3060, Bahadur Garh Road, Delhi, "Rear view mirror", November 14, 1966.

Class 1. No. 129747. Ram Gopal Bajaj, Indian National, P.O. Ratangarh, District Churu, Rajasthan, India, "Water taps (bib cock)", November 19, 1966.

Class 1. No. 129897. (1) Veeraswamy Ramaswamy Padayachi Dharmalingam, (2) Veeraswamy Ramaswamy Padayachi Mahalingam and (3) Veeraswamy Ramaswamy Padayachi Viswalingam, Kumbakonam, Madras State, India, Indian Nationals, "Pots", December 8, 1966.

Class 3. No. 128970. Gobindram Lalchand Gangaramani, an Indian, Zenith House, 11-Dhobi Street, Near Zakaria Masjid, Bombay-3, (Maharashtra), "Containers", July 14, 1966.

Class 3. No. 129026. Auto Importing Co., (An Indian partnership concern), Kashmeregate, Delhi, "The PVC grip", July 27, 966.

Class 3. No. 129184. New India Plastics, an Indian Partnership Firm, Khanna Construction House, Khan A. Gaffarkhan Road, Worli, Bombay 18 (WB), (Maharashtra), "Shopping reminder", August 10, 1966.

Class 3. No. 129615. Deputy Lal Grover, 56-A, Dilshad Gardens, G. T. Road, Shadra, Delhi-32. (Ind.an), "Goggles", October 14, 1966.

Class 3. No.129657. Mukund Ray Amritlal Sayani, No. 11/1, Heysham Road, Calcutta-20, In West Bengal, a Hindu, Indian by Nationality, "Tumblers", October 25, 1966.

Class 3. No. 129689. A. P. Products, an Indian Firm, 6, Duncan Road, 1st floor, Bombay-8, (Maharashtra), "Toy spectacles", November 2, 1966.

Class 3. No. 129746. Ram Gopal Bajaj, Indian National, P.O. Ratangarh, District Churu, Rajasthan, India, "Water taps (bib cock)", November 19, 1966.

Class 4. No. 129667. The Commonwealth Trust Limited, a public Limited Company incorporated in England and having its Head Office in India at Calicut, of Post Box No. 5, Calicut 1, Kerala State, India, "A tile", October 26, 1966.

Class 9. No. 129529. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", September 21, 1966.

Class 12. No. 129748. Ram Gopal Bajaj, Indian National, P.O. Ratangarh, District Churu, (Rajasthan), India, "Water taps (bib cocks)", November 19, 1966.

Class 13. No. 129375. The Sasson Spg. & Wvg. Co. Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", September 6, 1966.

Class 13. No. 129528. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", September 21, 1966.

Class 13. Nos. 129618 to 129620. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", October 14, 1966.

Class 13. Nos. 129650 to 129655. Shree Ram Mills Limited, Fergusson Road, Lower Parel, Bombay-13-BC, Nationality—Indian Company, "Textile goods", October 18, 1966.

Class 13. Nos. 129665 and 129666. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", October 25 1966.

Class 13. Nos. 129668 to 129673. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", October 27, 1966.

Class 13. Nos. 129676 and 129677. K. L. Bahri & Co., Ram Lila Ground, Banda (U.P.) India, Indian (Proprietory Concern), "Saries (textile piece goods)", October 29, 1966.

Class 13. Nos. 129686 to 129688. The Bombay Dyeing & Mfg. Co. Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", November 2, 1966.

Class 13. Nos. 129719 to 129721. The Standard Mills Company Limited Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", November 10, 1966.

Class 13. Nos. 129738 to 129744. Bombay Fancy Textile Co., 104, Apollo Street, Bharat House, Bombay 1 (Maharashtra) Nationality—Indian (a firm registered under the Indian Partnership Act), "(Textile piece-goods", November 17, 1966.

Class 13. Nos. 129915 and 129916. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", December 13, 1966.

Class 13. Nos. 129952 and 129953. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", December 17, 1966.

Class 13. Nos. 129963 to 129967. The Standard Mills Company Limited Mafatlal House, Backbay Reclamation, Bombay-1, Indian "Textile goods", December 19, 1966.

Copyright Extended for a second period of Five Years

Design Nos. 112101, 112799 and 114130. Class 1.

Design Nos. 111974, 112744, 112770, 112771 112769, 113148, 113393 113477 and 113558 Class 3.

Design Nos. 110543 and110548. Class 5.

Copyright Extended for a Third period of Five Years

Design Nos. 89337 and 89338. Class 1.
Design Nos. 84375 and 110543. Class 5.

THE PATENT OFFICE

Patents and Designs

Calcutta, the 1st April 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

13th March 1967

109663. J. J. Patel. Improvement in and relating to kerosine stove burner using wicks.

109664. Dr. D. Dasgupta. Improvements in and relating to the vim-sil-verman's biopsy needle.

109665. (Mrs.) S. S. Chippalkatti. Wireless message device.

109666. Hindustan Lever Limited. Improved toilet tablets. (15th March, 1966).

109667. Hindustan Lever Limited. Soap tablet. (16th March, 1966).

109668. Hindustan Lever Limited. Improved toilet bar. (18th March, 1966).

109669. Mundipharma AG. Improvements in novel quaternary compounds.

109670. R. & L. Molecular Research Ltd. Penicillins.

109671. Compagnie De Saini-Gobain. Process for making phenol-resin for foams. [Addition to No. 106036].

109672. American Cyanamid Company. Dyeable carpet and yarns therefor.

109673. Grove Manufacturing Co. Four-Section fully hydraulically operated boom.

109674. Matsushita Electronics Corporation. Manufacturing method of semiconductor devices.

109675. Matsushita Electronics Corporation. Insulated-gate field-effect transistor free from permanent breakdown.

109676. Matsushita Electronics Corporation. Insulated-gate field-effect transistor.

109677. Matsushita Electronics Corporation. A method for manufacturing semiconductor devices.

109678. Matsishita Electronics Corporation. A method for forming electrode in semiconductor devices.

109679. Donetsky Gosudarstvenny Mashinostroitelny Zavod Im. Control system of electric motor intended for turning the input shaft of winding plant control gear.

109680. Institut gornogo dela sibirskogo otdelenia. Percussion driving device.

109681. Maschinenfabrik Buckau R. Wolf A. G. Improvements in or relating to chamber for vacuum boilers of the sugar industry.

109682. Shri Ram Institute for industrial research. Fibre or flexible strip stress strain tester.

109683. B. P. Nowrangilal. Improvements in or relating to air-hydraulic power units.

109684. Shri Ram Institute for Industrial Research. A process relating to the wet treatment of cellulosic materials.

109685. Bendix-Westinghouse Automotive Air Brake Company. Clamp Type rotochamber.

109686. Eastman Kodak Company. Finely divided particles.

109687. Imperial Chemical Industries Limited. Oxidation process. (22nd March, 1966).

109688. Fuller Company. Material feed regulator.

109689. E. R. Squibb & Sons, Inc. 3-amino-5-(nitrofuryl)-1, 2, 4-oxadiazole derivatives. (14th March, 1966).

109690. E. R. Squibb & Sons, Inc. Nitrofuryl-oxadiazole derivatives. (14th March, 1966).

109691. E. R. Squibb & Sons, Inc. Derivatives of bis (p-hydroxyaryl) alkanoic acids.

109692. The Sherwin-williams Company. Monitoring and Controlling the characteristics of fluid mixtures.

109693. Ciba Limited. Process for the manufacture of pyridine-carboxylic acid esters.

109694. Lepetit S.p.A. Nitroso-hydroxylamino-alkanoic acid and derivatives thereof and process for preparing the same. (14th March, 1966).

109695. T. P. Engel. Improvements in or relating to apparatus and process for the preparation of polymeric materials. (14th March, 1966).

109696. N. V. Organon. Process for the preparation of erytrocytes suitable for immunochemical determinations and the manufacture of dosage unit forms therefrom.

109697. Sandoz Ltd. Process for the production of reactive dyes.

109698. The United Steel Companies Limited. Machines for continuously casting metal. (15th March, 1966).

109699. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for preparing polyolefins having a broad molecular-weight distribution.

109700. Institut National De Recherche Chimique Appliquee Improvements in or relating to methods of extracting nitrogenous organic substances from certain vegetable species.

109701. The Metal Box Company of India Limited. A package for tubes and method for packing the same.

109702. Cable Covers Limited. Looped wire, rope or cable. (23rd December, 1966).

109703. Henry Donald Gordon. Resilient units.

109704. Merck & Co., Inc. Method and composition for treatment of gout. [Addition to No. 94392].

109705. S. C. Shah. Burglar alarms particularly for motor vehicles.

109706. Dr. A. N. Dandge. Improvements relating to composition for use in internal combustion engines.

14th March 1967

109707. Council of Scientific and Industrial Research. An area measuring machine particularly suited for measuring leather area.

109708. Council of Scientific and Industrial Research. Improvement in respect of Indian patent nos. 56582 and 63685 on a process for the manufacture of light constructional material such as hard boards, laminates, blocks or the like.

109709. Council of Scientific and Industrial Research. Improvement in respect of patent no. 56581 for a process for the preparation of a resin from tar oil fractions.

109710. D. N. Rao. Conversion flange for willy's jeep.

109711. E.I.DU PONT De Nemours and Company. Herbicidal poly uracils.

109712. Air Reduction Company, Incorporated. Vinyl chloride copolymer compositions and molding thereof. [Divisional date 9th August 1965].

109713. Norton Company. Alumina abrasing and manufacture thereof.

109714. Velsicol Chemical Corporation. Improved process for preparing endrin.

109715. Scientific Adviser to the Defence Minister, Govt. of India. Method of producing ion exchange membrane and the membrane so produced.

109716. P. G. Bhide. Improvements relating to a coin box. [Addition to No. 77849].

109717. I. K. Belh. A device for controlling the volume of the sound of a horn.

109718. Ciba Limited. Azo dyestuffs and process for their manufacture. [Divisional date 15th October 1965].

109719. Glanzstoff A. G. Process for obtaining carbon disulphide from trithiane. (5th April 1966).

109720. Glanzstoff A. G. Process for obtaining carbon disulphide from trithiane. (31st October 1966). [Addition to No. 109719].

109721. Donald Everett Garrett. Potassium chloride, potassium sulphate, sodium sulphate and process of producing the same.

109722. H. Walker. Improvements in rotary internal combustion engines or the like. (15th March 1966).

109723. Linke-Hofmann-Busch Waggon-Fahrzeug-Maschinen G.m.b.H. Automatic mechanical coupling for rail vehicles.

109724. Palitex Project-Company GmbH. A doubling or double-twist spindle machine.

109725. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to communication systems.

109726. Farbenfabriken Bayer Aktiengesellschaft. 7-v-Triazolyl-(2)-coumarin compounds.

109727. Simonacco Limited. Improvements in or relating to filtration.

109728. The Gillette Company. Razor blades and manufacture thereof.

109729. Imperial Chemical Industries Limited. Copolymers of acrylonitrile. (24th March, 1966).

109730. R. Pyzel. Refractory grid and method of making same.

15th March 1967

109731. Siemens Aktiengesellschaft. Improvements in or relating to electric filter circuits. (13th December 1966).

109732. Siemens Aktiengesellschaft. Runthrough-proof step-by-step control with rotating field locking and with and without self-starting for electric drivers.

109733. Siemens Aktiengesellschaft. An electric machine having permanent magnet excitation, the rotor of which consists of laminated segments in which permanent magnets are mounted.

109734. Matsushita Electronics Corporation. Field-effect transistor having insulated gates.

109735. Astro Dye Works, Inc. Method of making random dyed yarns.

109736. Astro Works Inc. Method of dyeing textile material.

109737. Statni Vyzkumny Ustav Textilni. Mechanical intrauterine contraceptive devices.

109738. Gillet-Thaon. Process for dyeing textile materials. (18th January 1967).

109739. Diamond Alkali Company. A corrosion-inhibiting, bonding coating composition and method of applying the same on to metal surfaces.

109740. Dso Tejko I Obshto Mashinostroene. A device for automatic doffing on ring spinning and twisting frames.

109741. Kingfisher (Lubrication) Limited. Grease gun and similar nipples. (16th March 1966).

109742. Chevron Research Company. High-strength container and container blank having seamless bottom walls, and method of forming same.

109743. Hughes Tool Company. Shock absorbing and static load supporting drill string apparatus.

109744. Hercules Incorporated. Olefin polymerization catalyst pretreatment.

109745. Hercules Incorporated. Acid-stabilized, Base Reactivatable water-soluble wet-strength resins.

109746. M. Roy. Improvements in or relating to preservation of poultry eggs.

109747. J. R. Geigy A. G. Process for the production of new morpholine derivatives.

109748. Aktiebolaget Siefvert & Fornander. Substantially automatic and continuously operating machinery for the manufacture of match splints and the like.

109749. Fisons Pest Control Limited. Esters. (23rd March 1966).

109750. Rudolf Christian Buchmann. A method of and apparatus for filling moulds for the production of foamed mouldings from thermoplastic pre-expanded foamable particles.

109751. American Home Products Corporation. Benzonaphthyridine derivatives.

109752. Otis Elevator Company. Multiple zoned elevator control system.

109753. The International Nickel Company, Inc. Stainless steel having improved corrosion and fatigue resistance.

109754. Cutter Laboratories, Inc. Urethanes of triarylacrylonitriles.

16th March 1967

109755. Council of Scientific and Industrial Research. Improvements in or relating to the process for preparation of disinfectant grade creosote oil from primary tars.

109756. V. Ramachandran. Electronic tampur or basic notes emitter.

109757. Societe Fives Lille-Call. Improvements relating to hoists.

109758. N. V. Organon. "Δ^{1}-3, 3-Methylene-steroids of the oestrane series".

109759. J. R. Geigy A. G. Process for the production of new sulphanilamide derivatives.

109760. Imperial Chemical Industries Limited. Copolymers. (24th March, 1966).

109761. Imperial Chemical Industries Limited. Films and fibres. (24th March 1966).

109762. United States Steel Corporation. Method of rolling slabs in planetary mill.

109763. The Bullard Company. Multiple pressure responsive control apparatus.

109764. D. P. Ahuja. Process for the production of oxalic acid.

109765. Oerlikon—Buhrle Holding Ag. Automatic two-line compressed-air brake.

109766. Ebrahim Abdealy Zanzaria Decorative surfaced overlay papers.

17th March 1967

109767. V. Thiagarajan. Double filament lamp.

109768. J. S. Kang. Compact furniture box set.

109769. Phirozeshaw Muncherji Mehta. Improvements in or relating to immersion heaters.

109770. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing of semiconductor devices.

109771. Dr. A. Wander S. A. "5-methyl-10-(2'-dimethylamino-propyl-1') -10, 11-dihydro-11-oxo-5h-dibenzo [b, e] -1, 4-diazepine and its acid addition salts".

107772. International Nickel Limited. Electrodeposition of Nickel.

109773. Potasse & Engrais Chimiques Societe Anonyme organised under the laws of France. Improved method for the introduction of gaseous reagents into a mass of solid materials.

109774. Ugine Kuhlmann. Process for the preparation of derivatives of omegahydroxy dodecanoic acid. (20th September, 1966).

109775. Algemene Kunstzijde Unie N.V. A method of covering a substrate with a layer of bitumen based material reinforced with synthetic threads, and the products thus obtained.

109776. Velsicol Chemical Corporation. Processes for preparing new aryl-1, 2, 4-oxadiazolidine compounds having herbicidal activity and use of the new compounds as herbicides.

109777. Yoshio Shimizu. An automatic water flow apparatus.

109778. Gagliardi Research Corporation. Vapor phase treatment of fabrics.

109779. United States Rubber Company. Improvements in apparatus. [Addition to No. 99450].

109780. Atkins, Hatch & Associated, Ltd. Recovery of elemental sulphur from sulphide ores. (30th March, 1966).

109781. Philip Morris Incorporated. Apparatus for attaching covers by adhesive means.

109782. Philip Morris Incorporated. Hinged cover container.

109783. Farbenfabriken Bayer Aktiengesellschaft. Herbicidal agents.

Alteration of Date

101937. Ante-dated to 7th October 1965.

108452. Ante-dated to 14th June 1965 under Section 5 of the Act.

109529. Ante-dated to 31st May 1965 under Section 5 of the Act.

101529. The claim to priority date 21st September 1964 has been disallowed and the application dated as of 10th September 1965, the date of filing in India.

101473. The claim to priority date has been altered from 10th September 1964 to 7th April 1965.

104717. The claim to priority date 25th April 1965 has been disallowed and the application dated as of 5th April 1966, the date of filing in India.

100098. The claim to priority date 18th June 1964 has been abandoned and the application dated as of 16th June 1965, the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99675. Symington Wayne Corporation. A selective gearing device. Accepted on 24th February 1967.

A selective gearing device comprising a first cone gear, second cone gear, proportioning gear adapted to mesh, common means adjustable to shift the position of proportioning gear.

99682. Swiss Aluminium Ltd. Process for the purification of solutions containing soluble aluminates. Accepted on 24th February 1967.

Passing the soluble aluminates solution over an amion exchange resin.

99719. Orissa Cement Limited, Samarendra Lal Moitra and Dr. J. D. Panda. High Alumina Refractory Bricks. Accepted on 27th February 1967.

Characterised in that fireclay brick mixture is mixed with raw and unfired high alumina materials such as bauxite, diaspore or gibbsite in amount of 0.5 to 3% by weight of total mixture, thus obtained is moulded into bricks and shapes and thus are fired at temperature above 1200°C.

99871. Waterdrink, Inc. Process and apparatus for varying the concentration of a solid in a solvent. Accepted on 2nd March 1967.

Comprises a tubular apertured support, means for admitting liquid solution to the outerside of the osmotic divider, means for removing fluid from the inner wall of the support and osmotic divider and means for rotating the support, associated osmotic divider and the solution in contact therewith.

99891. Rohm & Haas Company. Production of pinene dimines, polymerisation mixtures thereof and polymers from such mixtures. Accepted on 3rd March 1967.

Comprises reacting α-pinene with ozone, reacting the ozonide with hydrogen and then with an amine.

99909. Celanese Corporation of America. Soft, pilling-resistant fabric and method of producing the same. Accepted on 6th March 1967.

Comprises restraining the fabric against shrinkage and heating it whereby polyester fibres shrink and migrate to the centre of the yarn.

99931. Best & Company Private Ltd. Improvements in or relating to floor selector devices for lifts and the like. Accepted on 7th March 1967.

Comprises a driving medium provided with pins or dogs, at least one geneva disc having slots, the member of slots being a multiple of the number of steps of actuation of necessary switches during travel a cam carriage and a spring loaded strip.

99976. Metallgesellschaft Aktienvesellschaft. Process of producing so_3 and/or sulphuric acid by a catalytic reaction of gases which contain so_2. [Addition to No. 99975]. Accepted on 9th March 1967.

Characterised in that sulphur combustion gases employed have so_2-content of 8-11% a conversion of 70-90% of the entire so_2-content of the starting gas is effected in the first contacting stage preceding the intermediate obsorption.

99977. Ceskoslovenska Akademie Ved. Method for manufacturing soft, flexible contact lenses. Accepted on 9th March 1967.

A mixture of monomers is copolymerized in a rotating mold washed, treated with a swelling agent the lense thus obtained is put in equilibrium in a physiologically solution which is isotonic with living human tissue.

99990. Pacific Coast Engineering Company. Ball Joint Coupling. Accepted on 9th March 1967.

Comprising a ball section a ring section with an undercut a circular edge channel around the ball section a removable retainer ring fitting into the channel and means for removably clamping the said ring.

100017. Tos Kurim narodni podnik. Apparatus for operating on a working surface. Accepted on 13th March 1967.

Comprising a tool mounted on a support and connected to a motor thorough a linkage such that the fool swings along curved path in operation.

100018. M/s. Ahmedabad Manufacturing and Calico Printing Company Limited. Improvements in or relating to the manufacture of fabrics consisting of synthetic or man-made fibres. Accepted on 13th March 1967.

A woven fabric is treated in at least one bath containing a solution comprising in combination or alone mineral acids for completely removing the natural fibre from the said fabric.

100020. Porous Plastics Limited. Improvements relating to conveyors for strip material. (12th June 1964). Accepted on 13th March 1967.

Companion conveyor comprising an endless band of sheet material, an endless band of brushes having soft bristles opposed to the band conveyor to hold the strip material in contact with the endless band conveyor and means for driving the two conveyors and means for driving the two conveyors.

100022. Licentia, Ekman & Brundin. Furnace for combustion of solid fuels. (12th June 1964). Accepted on 13th March 1967.

Wherein the fuel is burned as it advances from a primary to a secondary combustion zone, and a duct is provided to direct volatile matter, the primary and secondary combustion zones being interconnected via a restricted passage disposed generally above and at the intersection of two grate sections.

100037. Celanese Corporation of America. Cellular oxymethylene polymers and methods for making them. Accepted on 14th March 1967.

Comprises despersing a cavity producing material throughout at least a portion of the oxymethylene polymer and producing cavities in the structure.

100042. Ciba Limited. New 4,4'-disubstituted stilbenes and process for their preparation. Accepted on 14th March 1967.

Comprising reacting a 4 :4'-bis diacylhydrazine of stilbene with excess thionyl chloride.

100044. Cheney Bigelow Wire Works Inc. Woven wire cloth for fourdrinier machines. Accepted on 14th March 1967.

Comprising warp wires and shute wires, said warp wires having a stainless steel core a copper outer coating on said core and said shute wires being made of a material taken from the group consisting of brass and bronze.

100053. National Steel Corporation. Continuous-strip method and apparatus for producing iron-zinc aloly coated steel strip. Accepted on 14th March 1967.

Comprising heating steel strip to a temperature substantially above the melting temperature of the galvanizing spelter, introducing the heated strip into a molten galvanizing bath, farming an iron-zinc alloy coating on the steel strip, moving the heated strip through the molten galvanizing spelter delivering the steel strip from the molten galvanizing bath, and directing gas under pressure against the coated steel strip to remove molten galvanizing spelter coating from the iron-zinc alloy coated steel strip.

100054. National Steel Corporation. Continuous strip hot-dip molten metal coating apparatus and process. Accepted on 14th March 1967.

Comprising applying molten coating metal in excess of desired coating weight to continious metallic strip, passing the continious strip from the molten coating metal bath through a coating weight control zone, forming linearly extended narrow streams of heated gas, impinging a said stream of heated gas substantially perpendicularly against each of the opposite planar sides of the coated strip in the coating weight control zone and controlling the man of heated gas impinging against each side of the strip.

100098. Castrol Limited. Hydraulic fluids and hydraulic systems containing same. Accepted on 9th March 1967.

A hydraulic system containing a hydraulic fluid having a kinematic viscosity at -40°C of not more than 5000 CS and either consisting of or comprising atleast 50% by weight of atleast one ester selected from those formed from certain organic dicarboxylic acids such as sebacic, azelaic and succinic and certain glycol ethers such as methyl and ethyl mono -di-and tri-oxitols.

100488. Council of Scientific and Industrial Research. Improvements in or relating to mechanical strength and resistance of glass or glass-crystal composites to thermal shock and chemical attack of vapours, liquids and solids. Accepted on 8th March 1967.

Consists in heating clear or crystallised glass in contact with acid salts such as (a) alkali hydrogen sulphate, alkali persulphate, alkali hydrogen phosphate or (b) thermal decomposition products of (a) at 250°—800°C for 5 minutes or more.

100715. Alexei Alexandrovich Antushev. Theodolite. Accepted on 4th March 1967.

Circles are so installed that graduated surfaces thereof contact each other and portions of circles wherefrom readings are taken, are enclose proximity to each other, thereby being possible to transmit to the reading device images of scales divisions of both circles at a time by means of single optical system in the field of view of telescope eyepiece.

100815. Compagnie Francaise Thomson-Houston Hotchkiss Brandt, formerly known as Compagnie Francaise Thomson-Houston. A cooling device for cooling an assembly of pulleys. Accepted on 13th March 1967.

A cooling device for pulleys wherein device comprises means axially directly coolant flow to pulleys with grooves with side cooling surfaces defining between two adjacent pulleys small circular spaces forming passages.

101005. Dunlop Rubber Company Limited. Improvements in or relating to cured elastomeric article. (14th August 1964). Accepted on 16th March 1967.

Comprising a cured elastomer and a reinforcement of filamentary fabric.

101144. Western Electric Company, Incorporated. Data handling system. (13th October 1964). Accepted on 16th February 1967.

Comprising first and second control means which include clock circuit, plurality of independent memories plurality of independent transmission paths, processor arrangement, input out put system.

101148. Western Electric Company, Incorporated. Data handling system. (13th October 1964). Accepted on 16th February 1967.

Comprising a processor arrangement with a memory system a control arrangement comprising means for obtaining information from the memory system, for writing information into memory system for tiny executing the sequences of program order words, etc.

101188. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to circuit arrangements for contrast control in a television receiver whilst the black level is kept substantially constant. Accepted on 17th February 1967.

Cathode resistar of the vedeo output tube is formed by series combination of resistor and a fixed resistor provided with a variable tapping.

101191. G. B. Mehta. Improved gas fired coking range or stove. Accepted on 18th February 1967.

Means for automatically igniting burner or burners.

101207. Sandoz Ltd. Disperse Dyestuffs of the monoazo series, process for their manufacture and materials dyed or printed therewith. Accepted on 18th February 1967.

Comprising reacting a diazonium compound of an aromatic or heterocyclic amine with a coupling component of an aromatic amine and a vinyl pyridine.

101237. Phillips Petroleum Company. Production of polymers from AC_2 to C_8 hydrocarbon fraction. Accepted on 23rd February 1967.

Removing non-conjugated diolifin hydrocarbons and alkynes from the monomer and polymerising the conjugated alkaline in the presence of an organolithium catalyst.

101238. Phillips Petroleum Company. Hydrocarbon conversion. Accepted on 23rd February 1967.

Cracking a hydrocarbon, removing a C_4 hydrocarbon stream which is passed into a butadiene recovery zone, recovering butadine from which butane is removed and cracked.

101275. Nippon Carbide Kogyo Kabushiki Kaisha. Dry process dust collection method and equipment. Accepted on 24th February 1967.

Comprises introducing the by product gas into one cyclone dust collector is lowered by at least 100°C.

101308. Stauffer Chemical Company. Pesticidal compositions comprising new substituted alkyl sulfonamide phosphates and phosphonates. Accepted on 27th February 1967.

Comprises on N-O substituted phosphonodithioyl sulfonamide compound with a diluent or carrier.

101347. Kazuo Momoi. Fishing nets. Accepted on 28th February 1967.

Comprises a plurality of yarns arranged a parallel and twisted together each of yarn consisting a unit fibre of polyamide fibre and a unit fibre of polyvynyl synthetic fibre.

101401. W. R. Grace & Co. A movable vehicular mounted crop contacting hood. Accepted on 1st March 1967.

Comprising in combination a fore section joined to a body section an inert gas nozzle at an angle 35—50°.

101435. K. Grebe. Improvements in or relating to conveyors. Accepted on 4th March 1967.

Supporting members are linked together in the manner of a strap link chain and align to form a guiding ledge which has a bulbous rib.

101458. International Nickel Limited. Improvements in and relating to the coating of steel. [Addition to No. 94168]. Accepted on 6th March 1967.

comprises the resulting coating is densified by hot rolling.

101468. Kiran Office Equipment Co. Improvements in or relating to filing systems. Accepted on 6th March 1967.

Has a central portion two end portions wherein the each side of central portion being provided with an inner pocket.

101473. Imperial Chemical Industries Limited. Process for the manufacture of pyridines. (10th September 1964). Accepted on 6th March 1967.

Comprising reacting glutaraldehyde, a substituted glutaraldehyde or a precursor thereof in the liquid phase with ammonium ions or ammonia in the presence of molecular oxygen and cupric or ferric ions.

101482. Hydrocarbon Research, Inc. Recovery of high purity nitrogen by fractionation of liquid air. Accepted on 7th March 1967.

Comprises cooling, in reversing exchangers, a relatively high pressure air feed nearly to the liquefaction point, passing the cooled high pressure air without substantial pressure drop to a distillation zone and condensing therein in presence of reflux, a part of air to produce an oxygen rich liquid and a gaseous nitrogen stream.

101485. Veb Filmfabrik Wolfen. Process for the manufacture of shaped structures from polyglycollides. (5th April 1965). Accepted on 4th March 1967.

Cyclic glycollide is polymerised with the use of tin-II-stearate as catalyst and also before polymerisation mixed with highly dispersed silicic acid anhydride and the polymerised product is shaped in known manner.

101487. N. V. Onderzoekingsinstituut Research. Process for treating yarns and cords of cellulosic fibres. Accepted on 7th March 1967.

For reducing creep in yarns or cords of regenerated cellulose which comprises contacting yarns or cords with an aquous solution containing 93 to 3% by weight of borax which has been adjusted to a pH from 6.5 to 7.7 by the addition of a buffer.

101489. L. Givaudan & Cie S. A. Tricyclic compounds and process for the manufacture thereof. Accepted on 7th March 1967.

Reacting tricyclic compound like 2, 3, 5, 6, 7, 8-hexahydro-1, 1-dimethyl-1H-Benz (f) indene with acylating agent like acetyl chloride.

101490. L. Givaudan & Cie S. A. Indan compounds and process for the manufacture thereof. Accepted on 7th March 1967.

Reacting compound like 1, 1-dimethyl-4, 6-diisopropylindan with acylating agent like propionyl chloride.

101492. Shell Internationale Research Maatschappij N. V. A process for the polymerization and/or copolymerization of cyclic anhydrides of hydrocarboxylic acids, polymers and copolymers obtained thereby and fibres, films and moulded objects formed therefrom. Accepted on 8th March 1967.

Characterizes in that the cyclic anhydrides are contacted with a catalyst of the formula $R_4 - A - R_6$ (with R_5) *where A is an element gr. VA; R_4 is an alkyl radical and R_5 and R_6 represent either hydrogen or alkyl radical.*

101495. Borg-Warner Corporation. Drive lug wear plates. Accepted on 8th March 1967.

Clutch assembly of the axially engaging type and comprising a sheet metal cover plate housing a driven member and a pressur ring having peripheral driving lugs extending through slots in the wall of the cover plate in driving relation thereto characterised by the provision of wear plates located against the drive surfaces of said lugs.

101499. Universal Oil Products Company. Continuous process for producing gasoline hydrocarbons. Accepted on 8th March 1967.

Comprises producing gasoline hydrocarbons by the catalytic cracking of heavier hydrocarbon oils.

101510. Kleinewefers G.m.b.H. Double-layer winding apparatus. Accepted on 8th March 1967.

Comprises two alternately rotating winding rollers, the second winding roller being swing about the first by steps of 180° and the material is wound with the formation of a crease or twist by a blast pipe.

101521. Imperial Chemical Industries Limited. Improvements in or relating to the manufacture of aromatic amines of the benzene series. (18th September 1964). [Addition to No. 89884]. Accepted on 9th March 1967.

Hydrogenating aromatic nitro compounds in liquid phase in the presence of a metal catalyst modified by an alkanolamine base.

101524. Northern Natural Gas Company and W. S. Moore Co. Apparatus for forming a gas-solids suspension. Accepted on 4th March 1967.

Comprising a vertically disposed venturi throat zone, a tube having one end joining the flat side of the said zone and an opening in the said flat side.

101529. Ludlow Corporation. Process of manufacturing a polyolefin fibre-containing non-woven fabric. Accepted on 10th March 1967.

Comprising the step of forming a non-woven web, heating one surface of the web, distributing a thermo-responsive resin binder within the interstices of said web, heating the web to melt the resin binder, and cooled to solidify said resin binder.

101532. M. H. Detrick Company. Composite refractory furnace wall and component anchor brick. Accepted on 10th March 1967.

An anchor brick having alternate ribs and grooves on a first pair of opposed sides, the ribs on one side being aligned with those on the other one end face being in spaced relation with adjacent ribs on said sides and being adapted to be disposed on the inner surface of refractory material.

101540. Ciba Limited. Gas washing bottle. Accepted on 13th March 1967.

Comprising an inner vessel having a gas inlet at its upper end and communicating at its lower end with a middle vessel disposed around the inner vessel and spaced from the inner vessel to defines therewith a chamber for the washing liquid.

101544. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Foam plastics and process for making them. [Addition to No. 99433]. Accepted on 13th March 1967.

A branched or unbranched polyester compound is reacted with formaldehyde and a reaction product of polyamine and carbon dioxide in the presence of an ortho ester of titanium or zirconium or alcoholate of aluminium.

101547. Raytheon Company. A pulse train analyzer and a radar receiver in combination therewith. (1st September 1965). Accepted on 4th March 1967.

Comprises means for receiving a train of pulses, means for selecting pulses pulse stretching means and a spectrum analyzer.

101554. The English Electric Company Limited. Electrical circuits. (17th September 1964). Accepted on 13th February 1967.

Comprising a first signal translating device for receiving the input signal, a second signal translating device to receiving first control signal, a third signal translating device for receiving second control signal.

101556. Imperial Chemical Industries Limited. Polymerisation of ethylene. (18th September 1964). Accepted on 4th March 1967.

The ethylene is polymerised in the conventional manner in the presence of from 10% to 25% of nitrogen by moles of the total mixture.

101558. British Nylon Spinners Limited. Improvements in or relating to the manufacture of high molecular weight linear polyamides. (26th September 1964). Accepted on 13th March 1967.

Comprises heating the polyamides for a period from 10-60 minutes, during this period, the molten polyamide is maintained in the form of unsupported filament under a water vapor pressure for a number of seconds not less than the quotient obtained by dividing the surface of the filament in square decimeters by the volume of the filament in cubic centimeter.

101569. Sealed Power Corporation. Improvements in spacer-expanders for piston and oil ring assemblies. (26th May 1965). Accepted on 14th March 1967.

Comprising a parted ring at least one abutmens on said ring disposed adjacent one of the end tabs, said abutment projecting in a direction radially of said ring in the same radial directions as said adjacent one.

101571. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to semiconductor devices and circuits utilizing such devices. Accepted on 14th March 1967.

Comprising a transistor structure which includes an emitter region, a base region and a collector region.

101575. Algemene Kunstzijde Unie N. V. Improvements in or relating to the manufacture of twist-lively yarn. Accepted on 14th March 1967.

In which process a temporary high twist imparted to a running yarn of stripping back is heat seat, and the yarn, after it has been allowed to cool, loses its high twist and is collected.

101595. H. Henfield. Improvements in or relating to humidifiers'. Accepted on 14th March 1967.

Characterized in that the duct shaped housing of the fan blower to the humidifier blower has an additional open ducting which is provided with an opening at one end and a side opening leading to atmospheric air respectively, filter means for filtering the atmospheric air and to one side of the side opening of the additional open ducting is provided a hinged flap which is capable of completely closing or partially opening.

101600. Vitafoam Limited. Improvements in or relating to cushion supports. (16th September 1964). Accepted on 8th March 1967.

On the face of the support is provided a rib extending along one side of a central area of the support to receive and retain a portion of upholstry cover material and to form a location for material pad.

101622. Massey-Ferguson Services N. V. Improvements in or relating to tractor hitches. (25th September 1964). Accepted on 4th March 1967.

Support adapted to be mounted on the tractor draft links and a boom pivotally mounted on the support about an axis which is located in a fore-and-aft plane normal to the plane of the two draft links when the hitch is attached to the tractor.

101650. Shell Internationale Research Maatschappij N. V. Improvements in and relating to the manufacture of cellular polymeric material. (21st September 1964). [Addition to No. 85851]. Accepted on 8th March 1967.

Vaperisable expanding agent for cellular, polyvinyl compound comprises a mixture of n-pentane and isopentane.

101691. Lucian Bronicki, and Harry Javor. Power Generating units. Accepted on 2nd March 1967.

Bearings of any revolving part of the unit that require lubrication communicate with a container of liquid motive fluid, which fluid flows freely to the bearings when the boiler is heated.

101694. Warner-Lambert Pharmaceutical Company. Process for the production of pyriding and alkylpyridines. Accepted on 6th March 1967.

Passing a gaseous mixture of olefin and cuumovia over an oxidation—dehydration catalyst at a temperature of from 350° to 450°C in the presence of oxygen.

101710. Societe Francaise Des Produits Pour Catalyse. A catalyst, method for the production thereof and process of reforming hydrocarbon therewith. Accepted on 7th March 1967.

Treating alumina with an aqueous solution of fluoboric and chloroplatinic acids insular proportions of from 3.5, to 4.5 mols of fluoburic acid per mol of chloroplatemic acid.

101773. Polymer Corporation Limited. Rubbery copolymers. (10th October 1964). Accepted on 8th March 1967.

Comprises co-polymerizing isolefinic hydrocarbon and a non-conjugated diolefinic hydrocarbon in the presence of a friedel crafts' catalyst while dispersed in a non-reactive diluent.

101786. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to vehicle headlights with profiled cover glasses. Accepted on 7th March 1967.

In or in the proximity of and parallel to the axis of the uppermost mirror part a helical filament is arranged so that its axis is located between the focus of the said mirror part and the cover glass, and the lowermost mirror part extends towards the cover glass over a particular distance.

101844. J. L. Bedi. A refil type fountain pen and a refil. Accepted on 4th March 1967.

Comprising an ink cartridge comprising a barrel for housing an ink cartridge, an extension tube fitted on the cartridge to conceal a piercable diaphragm the cartridge with the extension tube being fitted on the nib holding plug.

101850. Lucien Bronicki, Stateless and the Prime Minister for the State of Israel. Power generating units. Accepted on 13th March 1967.

Comprising means for varying the inlet density of the vapour fed from the boiler to the turbine means for regulating this density of the turbine exhaust vapour in accordance with the variation of the inlet density.

101869. Allis-Chalmers Manufacturing Company. Means for regulating the speed of conveyers. Accepted on 6th March 1967.

Sensing means for determining the depth of material on the conveyor and any change therein, speed control means for gradually changing the conveyor speed in the event of gradual changes in depth to maintain the depth substantially constant.

101878. The Dow Chemical Company. Process for making styrene polymers. Accepted on 13th March 1967.

Initiating the polymerisation of a polymerisable composition which is suspended in water containing zinc oxide of the suspending agent while the aquous phase of said suspensions is at a pH of at least 9.3 and maintaining said pH above 7.0 throughout the polymerisation.

101885. Chicago Bridge & Iron Company. Apparatus for wrapping multiple layer vessels. Accepted on 8th March 1967.

Expandable and portable fluid pressure applying means to be placed about a tubular body and a body encircling metal backing means for wrapping around the body and supporting the fluid pressure means.

101913. Ciba Limited. New Pesticides containing carbamates. Accepted on 14th March 1967.

Comprising a carbamate and a carrier.

101914. S. Yamada. Portable device for carrying on poerator's back. Accepted on 8th March 1967.

A steel wire rope connected to the engine for transmitting drive to a working tool, which rope is covered by a flexible metallic pipe, part of said metallic pipe intermediate its ends being covered by two flexible metallic pipes.

101916. Veb Farbenfabrik Wolfen. Modified ketone-formaldehyde condensation products and process for their production. (18th August 1965). Accepted on 4th March 1967.

Reacting at least one compound containing primary hydroxyl groups with at least one methylol ketone in the presence of an alkaline material.

101917. Veb Farbenfabrik Wofen. Pesticidally-active compounds, process for their preparation and pesticidal compositions containing them. (16th August 1965). Accepted on 4th March 1967.

Process for the preparation of pesticidal compound comprises reacting 1 mol of a 1, 3, 5-tris-acryloyl-dexahydro-s-triazine with 3 mols of the same or different appropriate thiol or thionothiol-phosphoric acid 0.0 diester.

101932. Contubind Societe Anonyme, and Lorraine-Escaut Societe Anonyme. A rolling mill and a process for producing seamless tubes. (19th November 1964). Accepted on 13th March 1967.

Comprising at least one pair of rolls, and means for thrusting the hollow body into the rolls and controlling means for advancing the mandrel.

101937. James Howden & Company Limited. Improvements in or relating to gas rotary regenerative preheaters. (7th October 1964). Accepted on 6th March 1967.

Including a previous mass of metal provided with two parts or zones arranged so as successively to receive heat from flue gases by passage there through, a duct for the gases and between and connecting the parts or zone, means in duct for introducing ammonia into the gas stream, and an air duct adapted to direct air to be treated through at least one of parts or zones.

101972. N. V. Phillips' Gloeilampenfabrieken. Improvements in and relating to hydrogen replenisher. Accepted on 6th March 1967.

Characterized in that the holder consists of a ceramic material formed mainly by alumina, and is closed by means of one or more porous bodies.

101988. **The Western States Machine Company.** Continuous centrifugal with adjustable liquids separator. Accepted on 14th March 1967.

Adjustable separator for selectively separating liquids driven centrifugally through respective portions of the perforate wall of the basket.

101989. The Western States Machine Company. Feed-Straining Continuous centrifugal basket. Accepted on 14th March 1967.

Straining ring serving to strain oversize solids from the feed material before the material reaches the screen being fixed within the basket between the accelerating structure and the basket screen in position to be engaged by oversize solids in the flow of feed material.

102000. Montecatini Societa Generale per L'Industria Mineraria E Chimica. Apparatus for the parital combustion of a liquid fuel. (6th July 1965). Accepted on 4th March 1967.

Comprising means for introducing a gaseous oxidiser into the head of a combustion chamber and means for atomining the fuel.

102023. **Worcester Valve Co.** Inc. Actuator. Accepted on 9th March 1967.

A rotatable connecting member in the form of a lever having laterally facing force-receptive surfaces and a reciprocable member having parts between which the lever is received.

102034. **Caterpillar Tractor Co. Diagonal** bracing and bulldozer blade mounting. Accepted on 7th March 1967.

Comprising two push arms secured to opposite sides of a tractor a blade connected to the said arms, a tilt brace extending between the top of each arm and the back of the blade, and diagonal braces extending inwardly from each arm and centrally connected with each other.

102040. **International Standard Electric Corporation.** Arrangement for the application of liquid media to the surfaces of bodies. Accepted on 4th March 1967.

There is provided a body consisting porous material, immersed in the medium and around said body is included a guiding arrangement.

102072. **Jennings Radio Manufacturing Corporation.** High power switch. Accepted on 4th March 1967.

Comprising a hermetically sealed enveloped a seal assembly including a back up ring a flexible below and a shield structure.

102141. **International Nickel Limited.** Nickel Allovs. (20th October 1964). Accepted on 4th March 1967.

Containing from 0 to 4% chromium, 7 to 19.5% tungsten 0. to 7% molybdenum and 0 to 4% niobium, 0 to 22% cobolt, upto 0.5% carbon. 0. to 1.3% zirconium and 0 to 5% boron, the balance being nickel.

102162. **Phillips Petroleum Company.** High impact polymer compositions. Accepted on 13th March 1967.

Comprising polystyrene and a solution polymerised linear block copolymer or a solution polymerised linear random copolymer.

102163. **American Cyanamid Company.** Patterned stretch fabric and a process for producing the same. Accepted on 13th March 1967.

Comprising forming a textile fabric of synthetic fibers and applying to selected localized areas of such fabric a material capable of inhibiting the development of coily crimp and subjecting the fabric to elevated temperature.

102190. **Davidson & Co. Limited.** Improvements in or relating to sorting and grading tea. Accepted on 9th March 1967.

Comprising a horizontal pre-grading chamber means for charging the tea leaf, a distributing grid a vibrating screen and a series of hopper.

102245. Calmec (Manufacturing) Limited. Improvements relating to the formation of deep drawn hollow bodies of plastics material. (17th June 1965). Accepted on 9th March 1967.

Effecting cooling at predetermined locations of a heated sheet of plastics material, moving heated mole tool element means laterally effecting transfer of the heated sheet engaged on the mole tool element means from male to the female tool element means.

102292. The National Cash Register Company. Sensitized record member for use with normally colourless marking material. Accepted on 8th March 1967.

Comprising of a supporting sheet material carrying intimately mixed, finely powered particles of two kinds of colour reactant substances, the first consisting of at least one oil soluble acid-reactant polymer and the second of at least one oil—acid water insoluble acid reactant mineral.

102556. Sperry Rand Corporation. Pneumatic paper tape reader. Accepted on 13th March 1967.

Comprising a V-shaped body, tapering to a rounded and of small radius a chamber, a source of fluid an input duct connected between the said source of fluid and said chamber means transporting the tape to be read electrical signals.

102562. N. V. Onderzoekingsinstituut Research. Improvements in or relating to method of cutting strips and apparatus therefor. Accepted on 4th March 1967.

Comprising feeding the sheet over a side of a stationary knife, cutting clips off the sheet with at least one moving knife.

102602. Imperial Chemical Industries Limited. Spindles. (30th November 1964). Accepted on 7th March 1967.

Characterised in that the cylindrical part of the footstep bearing surrounding the spindle shaft is formed into a screw which in operation forces lubricant from the footstep bearings in the journal bearings.

102621. International Standard Electric Corporation. Generator arrangement for A.C. operated track apparatus in railway safety installations. Accepted on 8th March 1967.

Comprising a fed-back transistorised oscillating circuit operating on the blocking oscillator principle, in combination with a source of direct current, alternating fields are produced in the transmitting coil of the track apparatus.

102637. Hooker Chemical Corporation. Rejuvenation of diaphragms for chlor-alkali cells. Accepted on 9th March 1967.

The diaphragms is washed with an aqueous solution of a water-soluble acid having an ionization constant greater than 10-5 until aqueous when passed through said diaphragm is of a pH of less than about 8.

102643. The Dow Chemical Company. Method for preparing expansible thermoplastic polymer particles containing a volatile fluid foaming agent symmetrically encapsulated therein. [Addition to No. 91209]. Accepted on 8th March 1967.

By dispensing a polymerisable monomer containing the blowing agent in a non-solvent dispensing medium and polymerising the monomers to form spherical polymer shells.

102691. Foseco International Limited. Improvements in or relating to a heat insulating slab sleeve or the like and moulds lined therewith. (27th November 1964). Accepted on 4th March 1967.

Comprising a particulate heat insulating material the particles of which bonded together by the simultaneous presence of a clay and phosphonic acid.

102784. Dynamit Nobel Aktiengesellschaft. Process for the manufacture of acetals from polyhydroxy-methylenes or from copolymers containing hydroxymethylene groups and acetals produced. Accepted on 10th March 1967.

Comprises contacting polyhydroxymethylene polymer with an aldehyde in the presence of an acid catalyst.

102913. Dunlop Rubber Company Limited. Improvements in or relating to apparatus for cutting sheet material. Accepted on 7th March 1967.

Comprising a carrier morable across a framework, a cutting means mounted in the carrier and means for rotatably driving the cutting means.

102987. Ajit Sankar Bhaduri. Process for the preparation of speed recording paper. Accepted on 13th March 1967.

Comprises coating of offset quality paper with aluminium oxide or titanium oxide or zinc oxide or a mixture of two or more of these, followed by air or forced drying of the paper coated and finally polishing dried coated surface in a calendering machine.

103001. J. J. Keyser. Drafting mechanism for spinning machines. Accepted on 7th March 1967.

The axles of fluted roller, tape or apron roller and/or pressure roller pairs are arranged at right angles to the longitudinal axis of the machine and are seated in the machine frame by only one end.

103177. Decca Limited. Improvements in or relating to photoelectric detection control systems. (2nd February 1965). Accepted on 13th March 1967.

Comprising means for providing a beam of light, photoelectric detecting means, a timing circuit.

103189. Corning Glass Works. Improved method of molding an article and automatic temperature control system for use in the method. Accepted on 7th March 1967.

Comprising a plunger being pressed into a mold cavity containing hot molten vitreous material to form an article by the time predetermined temperature difference its maintained between mold and plunger so that when plunge is withdrawn the article stays with the plunger or mold whichever is the hotter.

103233. E. K. Cole Limited. Improvements in or relating to cabinets for electrical apparatus, e.g. record players. (1st January 1965). Accepted on 13th March 1967.

Comprising three walls, constituted by articulated panel sections enclosed in a flexible membrane of plastics, membrane being welded to bent at right angles, means for fixing the outer most edges.

103382. Service Steel & Engineering Limited. Loading ramps. (3rd February 1965). Accepted on 13th March 1967.

A loading ramp characterised by a helically wound torsion coil spring, and spring engaging means movable with connecting arm means and operative with a respective end portion of the spring upon downward movement of the ramp plate.

103394. Formica Corporation. Decorative laminate and process for preparing the same. Accepted on 7th March 1967.

Comprising application of heat and pressure to consolidate an assembly of thermosetting resin impregnated core sheets and decorative sheets, a release sheet and a stencil into a unitary structure and thereafter removing the release sheet and the stencil.

103415. Siemens-Schucker Twerke Aktiengesellschaft. Improvements in or relating to a method of producing silicon with a stabilised electrical conductivity. Accepted on 13th March 1967.

Comprising heating and/or cooling said silicon at a rate of temperature change of at least 50°C per minute whereby changes in the electrical conductivity of silicon prevented.

103416. Metallgesellschaft A.G. A process of producing sponge iron. Accepted on 10th March 1967.

Characterized in that a coal-air suspension is injected into the kiln through the care duct of a pair of coaxial tube disposed at the discharge end of said kiln and only air or another oxygen containing gas is injected into the kiln through the annular between the two tubes.

103476. Standard Telephones and Cables Limited. Method of fabricating a field-effect transistor. (29th January 1965). Accepted on 7th March 1967.

Including the step of depositing are impurity material of one conductivity type on a region or regions of a surface of a slice of semi-conductor material of the opposite conductivity type, growing epitaxially a layer of semi conductor material of opposite conductivity type on the surface containing region or regions, further depositing impurity material of one conductivity type on a region or regions exposed surface of epitaxially grown layer subjecting slice to a heating process wherein the deposited impurity material diffuses within the semi conductor slice, diffusing a further quantity of impurity material.

103610. Holding Intercito SA. Apparatus for counting and pre-sorting of rods. Accepted on 4th March 1967.

A counting and pre-sorting rods comprises transport mechanism for conveying, plurality of receiving containers, a deflecting member a contactless counter means and means operably coupling said contactless counter means.

104052. ICI Fibres Limited. Improvements in or relating to the collection of filaments or yarns. (4th March 1965). Accepted on 6th March 1967.

Having anxiliary drive means being driven by the sole motive device of the apparatus and the band drive is arranged to bring the empty bobbin up to speed.

104189. Joseph Lucas (Industries) Limited. Spark ignition systems. (10th March 1965). Accepted on 13th March 1967.

A semi conductor switch controlling the production of required sparks, and a pair of transformers providing signals to the control terminal of the switch for turning the switch off and on.

104238. Lurgan Boxmaking Company Limited. Improvements in or relating to egg packs. (10th March 1965). Accepted on 4th March 1967.

Wherein the lid is in two parts, each part being hinged to opposed sides of the face with means for locking two parts.

104249. Kuznetsky zavod Textilnogo Mashinostroenia. Kuznetsk Penzenskoi obl, ul. Belinskogo. A device for lap winding. Accepted on 13th March 1967.

Comprising mechanism for an automatic bringing of rods to the working position and the rod holder located on the racks of the lap tightener.

104395. Chevron Research Company. Complex fertilizer containing urea as a major nitrogen source. Accepted on 6th March 1967.

A process for the preparation of complex solid granular fertilizers containing urea as their major nitrogen source comprises spraying on to a rolling bed of urea pillo and fertilizer fines and aqueous sturry of mono and diammonium phosphate in the presence of ammonia vapour and then drying the granules and recycling a portion of the granules as fines.

104640. Mrs. Joyce Pereira. Improvements in or relating to fasteners for use in safety-belts and the like. Accepted on 7th March 1967.

A base with a spring loaded clasp and locking member and a locking tongue capable of being manually inserted in between the locking member and base.

104717. T.M.M. (Research) Limited. Improvements in means for driving and locating textile sliver containers in relation to slivercoiling apparatus. Accepted on 8th March 1967.

Comprising a driven turntable adapted to support a can on its castors and to impart a rotary motion thereto when in the sliver receiving position.

104976. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to colour television display tubes. of the kind comprising a ferro-magnetic screening hood. Accepted on 14th March 1967.

Having the screening hood consisting of two joined annular portions, the portion surrounding the window supporting the fastening members of the tube, whilst at least the space between this annular portion and side face of the window is filled at least partly round about with a hardening filling substance.

105454. Scovill Manufacturing Company. Improvements in or relating to power operated knife blades driving and retaining means. Accepted on 10th March 1967.

A knife handle housing a pair of reciprocated blade drivers each having an opening through its side wall, a blade retainer loosely mounted adjacent each driver and having a blade tang engaging portion, flexible means contacting the tang engaging portion of the retainer.

106001. Westinghouse Electric Corporation. Electrical Inductive apparatus. Accepted on 9th March 1967.

Enclosure having barrier means disposed between electrical inductive apparatus and sidewalls of the enclosure to form air spaces.

106452. Ciba Limited. Optically brightened organic material. [Divisional da.e 14th June 1965]. Accepted on 14th March 1967.

Organic materials such as synthetic organic high molecular materials such as cellulose esters and natural organic materials such as wool, cotton silk, strins etc. when optically brightened with 4.4'—disubstituted stilbene derivatives.

109529. Hi-Shear Corporation. Coupling for joining two elements. [Divisional date 31st May 1965]. Accepted on 28th February 1967.

A recess on one element and a convex surface on the other element, each of the elements having torque-transmitting surfaces which lie substantially parallel to the axis of the coupling.

Restoration Proceedings

(1)

An order has been made on the 27th February 1967, restoring the patent No. 64041, dated of the 12th May 1958, granted to Societe Anonyme Des Manufactures Des Glaces Et Produits Chimiques De Saint-Gobain, Chauny & Cirey for "a process for improving the mechanical properties of polyvinyl chloride and products obtained by the process".

(2)

An order has been made on the 27th February 1967, restoring the patent No. 66377, dated of the 10th January 1959, granted to Societe Anonyme Des Manufactures Des Glaces Et Produits Chimiques De Saint-Gobain, Chauny & Cirey for "a process for the manufacture of anhydrous hydrofluoric acid from its aqueous solutions".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129053. Thakar Dass, Indian National, resident of Malerkotla, Punjab, India, "Hangers", August 2, 1966.

Class 1. No. 129056. Gur Charan Saini, an Indian citizen of Electron Chambers, Katras Road, Matkuria, Dhanbad, Bihar, India, "Surface gauge" August 2, 1966.

Class 1. No. 129878. Elegant Industries Private Limited. (A company registered under the Indian Companies Act, also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18, (Maharashtra), "Ear-top", December 7, 1966.

Class 1. Nos. 129879 to 129882. Elegant Industries Private Limited. (A company registered under the Indian Companies Act, also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18, (Maharashtra), "Finger-ring", December 7, 1966.

Class 1. Nos. 129883 to 129888. Elegant Industries Private Limited. (A Company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18, (Maharashtra), "Brooch", December 7, 1966.

Class 3. No. 129713. Garware Plastics Private Limited. (A Company registered under the Indian Companies Act), 135, Dr. Anie Besant Road, Worli, Bombay 18, (Maharashtda), "Glass", November 7, 1966.

Class 3. No. 129717. Ramesh Kumar Arora and Manohar Lal Arora, both Indian citizens, trading as Ferroplast Industries, 2/53, Kamal Mansion, Arthur Bunder Road, Bombay-5, Maharashtra, India, "Brush" November 9, 1966.

Class 4. No. 129718. Montblang-Simplo GMBH, a Joint Stock Company organised under the laws of Federal Republic of Germany, of 2000, Hamburg 6, Schanzenstrasse 75/77, German Federal Republic, "Ink pot", November 9, 1966.

Class 5. No. 129854. Metro Playing Card Company, Central Salsette Road, Kalina, Bombay-29, Maharashtra, an Indian Partnership Concern, "Playing cards", December 5, 1966.

Class 13. Nos. 129576 to 129578. The Bombay Dyeing & Mfg. Co., Ltd., an Indian Company incorporated in India, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", October 1, 1966.

Class 13. Nos. 129603 and 129604. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", October 10, 1966.

Class 13. No. 129679. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", October 29, 1966.

Class 13. Nos. 129691 and 129692. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", November 2, 1966.

Class 13. Nos. 129813 to 129815. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", November 24, 1966.

Class 13. Nos. 129831 to 129843. The Khatau Makanji Spg. & Wvg. Co. Ltd., Laxmi Building; 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", November 30, 1966.

Class 13. Nos. 129844 to 129846. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton Textiles", November 30, 1966.

Class 13. Nos. 129848 and 129849. The Victoria Mills Limited, an Indian Company, at De Lisle Road, Parel, Bombay-13, "Textile piecegoods", December 1, 1966.

Class 13. Nos. 129860, 129862 and 129863. The Victoria Mills Limited, an Indian Company, at De Lisle Road, Parel, Bombay-13, "Textile piecegoods" December 6, 1966.

Class 13. Nos. 129870 and 129871. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", December 6, 1966.

Class 13. Nos. 129954 to 129960. The Crown Spg. & Mfg. Co. Ltd., Gokhale Road, (South) Parel, Bombay-13, (Maharashtra). Nationality—Indian Company, "Textile goods", December 17, 1966.

Class 13. Nos. 129990 to 130002. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1 Indian Company, "Textile piecegoods", December 21, 1966.

Class 14. No. 12986. The Victoria Mills Limited an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", December 6, 1966.

Cancellation of the Registration of Designs

Registration of Design No. 124330, dated the 19th December, 1964 was cancelled by order, dated the 2nd February, 1967 of Hon'ble Mr. Justice H. R. Khanna of Delhi High Court in suit C.O. No. 2-D/66.

Name Index for Applicants for Patents during February 1967

(*Nos.* 109126 *to* 109529)

Name and Application No.

A

Abbott Laboratories—109253.
Ab Skanska Cementgjuterict—109483.
Agarwal, J. C.—*109516.*
Ahlwalia, G. S.—109307.
Aktiebolaget Svenska Flanktfarbriken—109273.
Albiswerk Zurich, A. G.—109220 & 109267.
Algemene Kunstzijde Unie, N. V.—109466.

THE PATENT OFFICE

Patents and Designs

Calcutta, the 8th April 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

18th March 1967

109784. Council of Scientific and Industrial Research. Improvements in or relating to corrosion prevention in reinforced concrete and brick work constructions.

109785. Council of Scientific and Industrial Research. Improvements in or relating to corrosion inhibition in acid solution.

109786. R. G. Bajaj. Water taps (Bib & pillar taps).

109787. M. Roy. Improvements in or relating to teats or droppers.

109788. Franz Morat G. M. B. H. Circular knitting machines.

109789. Ajaji Ramabrahma and K. R. Ramachandran. Improvements in or relating to storage systems.

109790. Montecatini Edison S.p.A. Coated polyolefine films and a process for their preparation.

109791. Contraves A. G. A method for producing low specific gravity body and the bodies so produced.

109792. Air Reduction Company, Incorporated. Molding method and composition for use therein. [Divisional date 9th August, 1965].

109793. Imperial Chemical Industries Limited. New carboxylic acid derivatives. (31st March, 1966).

109794. Uniroyal, Inc. Reaction products comprising largely phenolic polyphosphites and use thereof as stabilizers.

109795. Herbert Joseph Langley, O.B.E. A device for checking the difference of ground or floor level of even or uneven surfaces.

109796. Simonacco Limited. Improvements in or relating to the treatment of slurries.

20th March 1967

109797. P. D. Sidhva. Improvements in or relating to telescopic single chamber hydraulic shock absorbers.

109798. P. D. Sidhva. Improvements in or relating to telescopic single chamber hydraulic shock absorbers.

109799. R. N. Gupta. Axle brake for cycle rickshaw.

109800. General Electric Company. Contact pin and manufacture thereof.

109801. American Cyanamid Company. Improved process for making veterinary injectable iron compositions.

109802. American Cyanamid Company. Improved process for making veterinary injectable iron compositions.

109803. Rex Asbestwerke Graf Von Rex Kg. An apparatus for producing fibrous strand.

109804. Metallgesellschaft A. G. Apparatus for preheating solids.

109805. Hooker Chemical Corporation. Anode Anchorage system for electrolytic cells.

109806. B. Giuseppe. Machine with self-centring rotating basket for washing dishes and utensils.

109807. Veb Mansfeld Kombinat Wilhelm Pieck Lutherstadt Eisleben. Apparatus for the automatic analysis of X-ray fluorescence.

109808. The Director, Indian Agricultural Research Institute, New Delhi. A multipurpose permeameter cell for the inventigation of soil moisture movement processes.

109809. R. S. Pillai. Improvements in or relating to machines for cooling, drying and boiling of various kinds of foodstuffs.

109810. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Heterocyclic compounds and process for the manufacture thereof.

109811. Monsanto Company. N-Formylcarbanilates.

109812. Technoimpex Magyar Gepipari Kulkereskedelmi Vallalat. High-capacity electrostatic liquid spraying apparatus.

109813. Amsted Industries Incorporated. Means for and method of controlling casting.

109814. Joy Manufacturing Company. Loading apparatus.

109815. Intermountain Research and Engineering Company, Inc. A slurry type blasting composition.

109816. The British Petroleum Company Limited. Improvements in or relating to the production of micro-organisms. (13th May, 1966).

109817. Bird And Company (Private) Limited. An improved method relating to suspension polymerization of vinyl monomers.

109818. Bird and Company (Private) Limited. Improvements in the sulphonation of vinyl co-polymers to obtain strongly acid cation exchange resins.

109819. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electrical parts, more particularly semiconductor devices.

109820. J. R. Geigy A. G. Process for the production of new sulphanilamide derivatives.

109821. The Dunlop Company Limited. Method for the manufacture of shaped articles. (22nd March, 1966).

109822. Farbenfabriken Bayer Aktiengesellschaft. Process for the dyeing of shaped articles made of polyesters or cellulose triacetate. (13th December, 1966).

109823. Mancar-Trust. A method of an apparatus for producing glass fibre-reinforced synthetic plastics pipes.

109824. Argus Chemical Corporation. Stabilization of vicinal epoxy compounds.

21st March 1967

109825. Ordena Trudovogo Krasnogo Znameni Zavod 'Tochelektropribor' Kiev. Pulse-position multistable device for radioelectronic systems.

109826. Krasnodarsky ordena Trudovogo Krasnogo Znameni Zavod Elektroizmeritelnykh priborov Krasnodar. Liquid damper for measuring instruments.

109827. V. F. Grazhdankin, B. T. Khainovsky, K. A. Polvak, B. M. Nozdrin, V. V. Chernvsh, M. P. Klimentieva, G. B. Serzhputovsky and V. M. Smushkovich. System for igniting capacitor discharge, for example, of jet engines.

109828. Ministerul Petrolului. Device for well casing perforation with abrasive fluid jet.

109829. Ministerul Petrolului. Hydraulic apparatus for measuring the cable stresses.

109830. C K D Praha. Rotary kiln for burning pulverulous materials.

109831. Allied Chemical Corporation. Process for producing high purity aluminium nitrate solutions from low grade aluminous ores of intermediate iron content. (20th September, 1966).

109832. W. K. H. Gregori. Concrete form. (22nd March, 1966).

109833. FMC Corporation. Coatings of microcrystalline collagen.

109834. Mefina S. A. Sewing machine.

109835. M & T Chemicals Inc. Novel process.

109836. Aktiebolaget Bofors. Sea-mine.

109837. Geoffrey Benjamin Hern. Building bricks or blocks and structures utilising the same.

109838. Ciba Limited. New growth promoting substances and process for their manufacture.

109839. The British Petroleum Company Limited. Improvements in solid lubricant dispersions. (22nd March, 1966).

109840. Foseco International Limited. Compositions for use in the lining of hot tops and the heads of ingot moulds. (22nd March, 1966).

109841. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Aminothiophene derivatives and process for their manufacture.

109842. The Upjohn Company. Novel 1, 2, 3, 4, 5, 6-hexahydroazepino [4, 5-b] Indoles, acid addition salts thereof, the intermediates thereof, and a process for the production therefor.

109843. Thomas Osmond Summers. Gyro stabilized vehicle.

109844. Oy Tampella Ab. Mortar shell.

109845. Daisaku Odawara. A rotary machine of the blade type. [Divisional date 21st June 1965].

109846. Daisaku Odawara. An internal combustion engine, especially a rotary engine. [Divisional date 21st June 1965].

109847. R. P. Choudhary. Foam cooling attachment for fans.

22nd March 1967

109848. P. J. Conlin. A muffler device.

109849. N. Patel. Improvements in or relating to upholstry spring and the device and method of manufacturing the same.

109850. N. Patel. Improvements in or relating to folding cot-*cum*-settee or the like.

109851. Mrs. N. S. Engineer. Improvements in or relating to container-*cum*-lifter for ice pieces.

109852. Council of Scientific and Industrial Research. Improvements in or relating to oxalate coatings on steel.

109853. Ucb (Union Chimique-Chemische Bedrijven) S. A. Process for the production of adiponitrile. (23rd March, 1966).

109854. Ford Motor Company of Canada, Limited. Manufacture of glass.

109855. Joseph Lucas (Industries) Limited. Electromagnetic horns. (28th March, 1966).

109856. The Dunlop Company Limited. Improvements in or relating to the curing of rubber of plastics articles. (24th March 1966).

109857. James Howden and Company Limited. Improvements in or relating to preheaters. (8th June, 1965). [Addition to No. 101566]. [Divisional date 14th September 1965].

109858. Aktiebolaget Siefvert & Fornander. Improvements in cutting rollers.

109859. Gosudarstvenny Institut Po Proektirovaniju I IssLedovaniju Vzryvobezopasnogo Elektrooborudovania "Giproniselektroshakt" Donetsk. Mobile distribution box for controlling electric motors or machines and mechanisms in explosion-hazardous premises.

109860. Ciba Limited. Process for the manufacture of acylamino-compounds.

109861. Mitsuit Kagaku Kogyo Kabushiki Kaisha (Mitsui Chemical Industry Co., Ltd.). Herbicidal composition and method.

109862. P. G. Bhide. A cigarette vending machine.

109863. D. C. Jain. Light folding chair.

23rd March 1967

109864. Wilhelm Stahlecker G.m.b.H. Device for mounting the bearing housing of a spindle of a [illegible] machine.

109865. Schering Aktiengesellschaft. 15, 16B-Methylene steroids of the 19-nor-androstane series and process for their manufacture.

109866. N. N. Bagewadikar. A device for reducing petrol consumption by means of mercury, mercury compound or amalgam.

109867. S. V. Krishnamurty and S. V. Ramaniah. Improvement in and relating to drafting machines.

109868. S. R. Nanavati. An advertising apparatus.

109869. Westinghouse Electric Corporation. Flat package encapsulation of electrical devices.

109870. Clevite Corporation. Method for eliminating tin sweat in aluminium tin alloys.

109871. Beecham Group Limited. Penicillins. (25th March, 1966). [Addition to No. 101413].

109872. Ciba Limited. Process for the hardening of galatine.

109873. Albert Eschenmoser. Method for preparing acetylenic compounds.

109874. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of polycondensation products containing halogenomethyl groups.

109875. D. S. Dahanukar. Improvements in or relating to one piece safety razor.

109876. J. R. Geigy A. G. Process for the production of new sulphanilamide derivatives.

109877. Pfizer Corporation. Anti-viral compounds.

109878. Velcro S. A. Separable fastening device.

109879. The Dunlop Company Limited. Working of polymeric materials. (24th March 1966).

109880. Dr. R. Altieri. A soap-like compact detergent, obtained by compacting powders and process therefor.

109881. O. S. Grop. Device for refilling the fuel container of cigarette lighters.

Alteration of Dates

100191. Post-dated to 21st April 1966 under Section 5 of the Act.

100130. The claim to priority date 26th June 1964 has been abandoned and the application dated as of 17th June 1965, the date of filing in India.

100154. The claim to priority date 4th September 1964 has been abandoned and the application dated as of 19th June 1965, the date of filing in India.

101638. The claim to priority date 1st October 1964 has been abandoned and the application dated as of 18th September 1965, the date of filing in India.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99067. M&T. Chemicals Inc. Process for preparing diorganoantimony compounds. Accepted on 15th March 1967.

Comprising reacting an organoantimony dehalide with a carboxylic acid salt or ammonium, alkali metals or alkaline earth metals.

99774. Rohm and Haas Company. Improvements in or relating to polymeric compositions and process for preparing shaped articles therefrom. Accepted on 28th February 1967.

Comprising a base elastomer one or more (C_6—C_8)—alkyl acrylates and 0.5 to 25% by weight of one or more $\alpha.\beta$ -mono-ethylenically unsaturated monomers and a reinforcing agent for the base elastomer.

99973. United States Rubber Company. Process for the production of dye-receptive shaped articles. Accepted on 8th March 1967.

Comprises blending a hydrocarbon high polymer with a highly polar amine or nitrogen containing basic polymer shaping the blend and treating the shaped article with an acidic reagent.

100011. B. K. Mehra. Holder for holding a flat or spherical surface. Accepted on 10th March 1967.

Comprising a cover, an inner ring, holding means, such as groove, the diameter of the groove being smaller than that of the surface to be held.

100015. Bijay Krishna Das and B. G. Kumar. A pneumatic gun particularly—of the reciprocating percussion tool type. Accepted on 13th March 1967.

A slidable valve means being provided for distributing the compressed air into the working cylinder which means is responsible for reciprocation of the piston and the throttle valve has a series of tapered grooves in its periphery to control the compressed air supply into the cylinder.

100019. Porous Plastics Limited. Improvements relating to the making of microporous sheet material. (12th June 1964). Accepted on 13th March 1967.

Mixing polymeric plastic material with surface-active agent and particulate pore-forming inorganic salt and a solvent to form a dough, converting the dough to a strip, heating the strip to drive off the solvent and drying.

100023. Odgers Drilling Inc. Drill Rig. Accepted on 13th March 1967.

Comprising a drill rod chucking and rotating apparatus disposed adjacent the rear ward mast legs first and second releasable pivot means and a self contained hoist.

100033. Synthetics and Chemicals Limited. Improvements in or relating to styrene butadine co-polymers. Accepted on 13th March 1967.

Characterises in that the charge of styrene and butadiene contains a modifier and the reaction is allowed to 60-70% conversion, and is then stopped by adding short stopping agent.

100041. R. B. Shah. Screen printing machine. Accepted on 14th March 1967.

Comprising a table having an endless belt mounted and travelling thereon, means being provided for causing an intermittent movement of said belt mechanical means being provided to cause a vertical and horizontal movement of squeege.

100049. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to arrangements for recording and reproducing video signals. Accepted on 14th March 1967.

Having recording means and means permitting the recording means to record Kn frames of every Kn^2 frames in n tracks and for preventing the recording means from recording the remaining frames, for and means for scanning the recorded tracks such that each of the tracks is scanned n times to give an output of uninterrupted sequence of Kn frames.

100052. National Steel Corporation. Improvements in continuous-strip molten metal coating operations. Accepted on 14th March 1967.

Comprising maintaining a higher than melting temperature in a major portion of the bath and lower temperature in remaining portion and moving the strip through the two portions.

100064. Celanese Corporation of America. Branched oxymethylene copolymers and method of preparation. Accepted on 15th March 1967.

Copylymerizing a source of receiving oxymethylene groups with an oxacyelic compound containing a single epoxide or oxetane ring and a single alkylol substituent on one carbon atom of the ring.

100079. M&T Chemicals Inc. Process for preparation of alkyltin compounds. Accepted on 15th March 1967.

Reacting alkyl halide, magnesium, ether catalyst with tin tetrahalide.

100097. M&T Chemicals Inc. Improvements in or relating to a novel process for preparing organotin compounds. Accepted on 16th March 1967.

Comprises reacting organo aluminium halide with stannous halide in the presence of compound selecting from the group of tetrahydrofuran, tetrahydropyran, dihydropyrans, N-methyl merpholine etc. and recovering organo tin compound from the reaction mixture.

100103. Aktiebolaget Bofors. Device for steering of tracklaying vehicles. Accepted on 18th March 1967.

In the shaft system gears being arranged to which, in addition to the input movement which is fed via the ordinary driving shaft system, a further input movement can be fed, characterised in that, clutches and brakes acting on each driving wheel arranged in the driving shaft system.

100111. Tbilissky Gosudarstvenny Nauchno-Issledo-Vatelsky Institut Stroitelnykh Materialov. Electrotechnical glass having high dielectric characteristics for the manufacture of high voltage insulators and method of production. Accepted on 17th March 1967.

Comprised of the oxides of silicon, aluminium, iron, calcium, magnesium, sulphur, and alkali metals in the proportions, parts by weight, si 0_2-44.5 to 55.0, Al_20_3-9.6 to 17.0, Fe_20_3-7 to 13.5, TI 0_2-0.4 to 0.7, Mno-0.7 to 18.0, Cao-7.0 to 17.0, Mgo-3.2 to 8.6, SO_3-0.1 to 0.3, with total amounts of alkali metals—1.78 to 4.0.

100127. Glaverbel. Process for protecting thin metallic films deposited on glass and vitrified ceramic. Accepted on 15th March 1967.

Wherein a metallic film on glass or vitrified ceramic, if treated with a dilute aqueous solution of a salt of a noble metal to improve abrasion resistance of the folm when dry.

100130. Canadian Industries Limited. Preparation of trimeric condensation products of dihydropyran carboxaldehydes and compositions thereof. Accepted on 16th March 1967.

Comprising contacting a dihydropyran carboxaldehyde with an alkaline catalyst at a temperature within the range of 10°C to 160°C under substantially anhydrous conditions thereby effecting a condensation reaction.

100136. British Nylon Spinners Limited. Continuous filament yarns and a process and apparatus for making them. (19th June 1964). Accepted on 18th March 1967.

Comprising a multiplicitting of interconnected loops arranged essentially parallel to the longitudinal axis of the yarn.

100154. D. P. Ahuja. A process for producing viscous emulsions. Accepted on 18th March 1967.

Comprises continuously introducing into an enclosure an enclosure separate streams of an at phase and an aqueous phase allowing the phases to mix in the enclosure and allowing the resulting emulsion to issue through an exit port of the enclosure as rapidly as it is formed therein.

100157. Centre De Recherches De Pont-A-Mousson. Improvements in or relating to joint between pipes. Accepted on 17th March 1967.

Comprising at ends socket in one pipe and male end in the other each being provided over the surface with thin sheet terminating at a distance from the end of the other and a sealing ring in between the socket and the male end.

100191. N. D. Hukeri. Improved pulley for belt for massaging abdominal muscles. Accepted on 22nd March 1967.

Characterised in that the pulley has a light metal base and a curved metal housing with its exposed edges outwardly bent to guide the cords to the freely rotating roller incorporated in the bent housing.

100202. Wickman Wimet Limited. Toolholders for use with detachable inserts. (26th November 1964). Accepted on 21st March 1967.

Comprising a shank defining a seating for the insert, a bore a clamping bar and means for pivoting the clamping bar.

100223. Siemens-Schuckertwerke Aktiengesellschaft Berlin und Erlangen. Apparatus for simultaneously moulding a number of distance discs consisting of a thermoplastic material. Accepted on 23rd March 1967.

Consisting a number of juxtaposed mould bars, between which guide members of plastic fix the level of the inner conductors during closing of the mould, and mesh in the manner of a comb with counter members during an injection moulding operation.

100248. K. Thiagarajan. An automatic instaneous water heater. Accepted on 20th March 1967.

A cylindrically shaped central electrode connected to the phase, neutral electrode being tubular in shape and concentric with the phase electrode, annular space being provided between the electrodes to enable water to beheated during its passage through cylindrical electrodes.

100268. Laporte Titanium Limited. Improvements in and relating to the treatment of pigments. (22nd July 1964). Accepted on 22nd March 1967.

By incorporating the particles of a pigment with an organic compound containing at least two hydroxy groups and at least one carboxylic acid ester group, all the carboxylic acid groups present in the compound being esterified.

100274. P. K. Kulkarni and J. R. Sheth. An electrically controlled device for varying the pitch of propeller blades used in boats and ships. Accepted on 15th March 1967.

An electric motor or motors mounted in the hub of the propeller driving through an electromagnetic coupling and a reduction gear connected to a screw rod.

100276. Tecalemit (Engineering) Limited. Improvements in vehicle lifts or hoists. (26th June 1964). Accepted on 14th March 1967.

Comprising a platform a means include a plurality of cables, a drive for raising and lowering the platform safety mechanism means responsive to operation of the actuating member a plurality of end members.

100290. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Pulverulent dyeing preparations showing reduced dust formation and process of their manufacture. Accepted on 18th March 1967.

Comprising mixing diazoamino compounds obtained by coupling diazolized aromatic amines with cyanamide or its alkali metal or alkaline earth metal salt with a mixture of aliphatic hydrocarbons and alkyl sulfamido-alkyl carboxylic acid salts.

100337. G. J. V. Elten. Building plate with reinforced lateral edges. Accepted on 21st March 1967.

The lateral parts along the long sides of the plate are thickened and are enclosed by the U-shaped steel strips and the flanges of the reinforcement consist of sheet metal folded a number of times to and fro.

100340. E. I. du Pont de Nemours and Company. Elastic filaments formed from segmented polymers. Accepted on 20th March 1967.

In a spandex fiber containing recussing soft segments and hard segments joined by polyurethane linkages, the improvement comprises at least 12 per cent by weight of the total hard segments are definite divalent radicals attached to NH.

100472. S. R. Modi. Roller used in carding or combing machines and staves therefor. Accepted on 10th March 1967.

Staves are made of hollow section pieces of light metal with its inner surface confirming with the outer surface of base cylinder and holes drilled on stave walls for securing pins.

100517. Institut Fur Chemieanlagen. Process for purification of raw vinyl chloride by distillation. Accepted on 15th March 1967.

Comprising passing raw vinyl chloride gas either after compressing to an intermediate pressure or without compressing, in to a residue-distilling column for separation of higher boiling components and comprising the vapours discharged from the top of the said column to a maximum pressure necessary for subsequent condensation and thereafter separating the lower boiling components in a degassing column.

100523. Allied Chemical Corporation. Improvements in or relating to pipelines for conveying solid particles mixed with carrier gas and a method of charging a coke oven battery using such pipelines. Accepted on 17th March 1967.

Pipeline for conveying solid particles mixed with carrier gas comprises corrier gas injectors and bleed off device.

100568. G. Herbuveaux. Improvements in or relating to a leader or spacer for cine film. Accepted on 10th March 1967.

Consisting of a translucent strip with perforations for driving, formed by dispersing an agent of translucency in the constituent material of the leader or spacer.

100572. W. Strasser. Equipment for cultivating useful and ornamental flower, fruit and the like plants. Accepted on 9th March 1967.

Comprising two cultivating chambers with useful areas of preferably equal size, the cultivating areas and cultivating chambers being removable relatively to one another.

100591. Kaiser Aluminum & Chemical Corporation. A furnace structure and refractory units therefor. Accepted on 16th March 1967.

Having an inner end an outer end and opposed side faces between said ends, inner expansion allowance means attached to one of the side faces adjacent the inner end outer expansion allowances means attached one of said side faces adjacent the outer end.

100614. Rhone-Poulenc S. A. Process for the preparation of organosilicon compounds. Accepted on 14th March 1967.

Comprises reacting a linear organosioxane with a glycol diether in the presence of a platinum catalyst.

100624. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Foamed and hardened epoxy resins and process for marking them. Accepted on 17th March 1967.

Comprising the steps of mixing an epoxy resin and a carbamate of a monoamine and/or a carbamate of a polyamine and if desired a monoamine and/or a polyamine and/or auxiliary agents and heating the mixture to a temperature of 20—200°C.

100680. Pakistan Council of Scientific and Industrial Research. A process for the production of a liquid coating composition based on alkali metal silicates. (29th October 1964). Accepted on 17th March 1967.

Comprises dispersing of magnesium oxide with an aqueous solution of alkali metal silicate.

100718. Occidental Research & Engineering Limited. Method of an apparatus for the production of phosphoric acids of high P_2O_5 content. (21st July 1964). Accepted on 21st January 1967.

Comprising continuously feeding a wet process phosphoric acid solution to a heating zone and continuously withdrawing a more concentrated product solution containing at least 68 per cent P_2O_5 w/w (IFB) from such zone while maintaining such product solution at its boiling point in the zone by releasing hot combustion products into the body of the solution.

100721. Occidental Research & Engineering Limited. Improvements relating to the production of phosphoric acids and apparatus therefor. (21st July 1964). Accepted on 21st January 1967.

Comprising concentrating phosphoric acid solution acid solution such that the gaseous effluent of the evaporator contains phosphoric acid vapour values and causing it to pass through at least one irrigated contacting device fed with water or a phosphoric acid irrigant solution.

100739. Imperial Chemical Industries Limited. Process for the preparation of explosives. (5th August 1964). [Addition to No. 92081]. Accepted on 17th March 1967.

Mixing ammonium nitrate with a phenol and a formaldehyde souree effecting condensation of the phenol and the formaldehyde and dying off the water produced in the condensation.

100919. Deere & Company. A seed matering device. Accepted on 23rd March 1967.

Comprising means to receive a relatively thick slow moving stream of seeds, means to progressively increase the vilocity of the stream of seeds and means to discharge the faster moving thin stream.

100948. The Sarangpur Cotton Manufacturing Company Limited. Improvement in or relating to wash and wear treatment for textiles. Accepted on 9th March 1967.

The step of impregnating the fabric with N-methylal type resin monomer salution or cross linking agent having a PH of 2.5 to 3.0.

100949. The Sarangpur Cotton Manufacturing Company Limited. A composition for use as an additive to a spent acid containing nitric acid. Accepted on 9th March 1967.

Comprising nitric acid of a concentration above 90 per cent and nitric acid of the same concentration as originally used in said spent acid and sulphuric acid.

101020. Werner & Pfleiderer and Veb Chemische Werke Buna. Process for preparation of alkali salts of terephthalic acid. Accepted on 15th March 1967.

Comprising carrying out thermal isomerization of alkali salts or benzene carboxylic acids in a screw apparatus with two or more closely meshing screws which run in the same direction.

101128. Gosudarstvenny Institute Po Proektirovaniu I Issledovaniu Vzryvobezopasnogo Elektrooborudovaniia. Switching device for arcless interrupting alternating current power circuits. Accepted on 17th March 1967.

In each phase, divided into two parallel circuits, electromagnet coils are connected for keeping power contacts closed during conductings half cycle of the diode which follows the de-energizing of the operating machanism.

101196. Hughes Tool Company. Improvements in or relating to a rotary Percussion bit. Accepted on 16th March 1967.

Having an upper shank portion adapted for engagement with a percusion tool and a lower body portion terminating in a blunt bottom surface and and having a circumferential gage surface intersecting the bottom surface and wear resistant inserts for providing cutting structure.

101230. Halcon International Inc. Process for the production of adipic acid from cyclohexanone-containing material. [Addition to No. 80856]. Accepted on 17th March 1967.

Cyclhexane is oxidised with molecular oxygen at a temperature of 65 to 80°C per 1-4 hours and the mixture of oxygenated products is again exidised at a temperature of 75 to 85°C to adipic acid molecular oxygen in the presence of a catalyst selected from the group consisting of manganese and manganese plus copper.

101479. The General Electric Company Limited. Improvements in or relating to the formation of coatings on germanium bodies. Accepted on 20th March 1967.

By a method in which during the formation of the coating part of the surface of the body is masked by a previously formed layer, said layed subsequently being removed by treatment with a reagent.

101537. Hermann Beichle. Mixer. Accepted on 9th March 1967.

Comprising a mixing drum with cover plate revolving about its axis and movable vertically in a cage characterised in that the drum is arranged in a revolving cage which along with the drum is driven by a driving shaft.

101551. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Process for the extraction of aromatic hydrocarbons from mixtures of liquid hydrocarbons containing them. Accepted on 13th March 1967.

Extracting the mixtures with a dialkyl sulphoxide in counter-flow to form an initial extract and initial raffinate, reextracting the aromatic hydrocarbons contained in the initial extract by auxiliary solvent in counterflow and fractionating by distillation the second extract.

101594. M. M. Shah. Improvements in or relating to a hinge like device for a furniture and a folding furniture made therefrom. Accepted on 15th March 1967.

Comprising three pipe sockets rotatably joined to one another so that their angular disposition in relation to one another may be varied.

101605. Imperial Chemical Industries Limited. Process for cleaning textile materials. (18th September 1964). Accepted on 16th March 1967.

Which comprises immersing the textile material in trichloro-trifluoroethenes removing surplus solvent, and then passing it into an aqueous bath maintained at such temperature as produces rapid evaporation of the trichloro-trifluoroethenes.

101608. Leesona Corporation. Method and means for readying supply bobbins. Accepted on 16th March 1967.

Comprising the step of applying a force to said bobbin to extend the outer yarn and therefrom providing severing means and directing a fluid stream in a path to move said outer end to said severing means for severing to produce a free yarn end connected to said bobbin.

101611. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to communication systems for transmitting signals between an initial station and a final station through a transmission line. Accepted on 17th March 1967.

Comprising for the level control of the repeater station preceding the final station the final station is provided with the control generator with a control circuit connected to the pilot receiver in the form of a marginal supervision device.

101616. Aryan Mining & Trading Corporation Private Limited. Prime mover for pulling a scraper or dumper. Accepted on 17th March 1967.

Comprising a front or four wheel drive truck chasis on which is mounted a hitching attachment and hydraulic or winch means.

101617. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Stabilized polyolefins and process for making them. Accepted on 17th March 1967.

Comprises adding to the polyolefine a mixture of (a) nickel phenolate of phenol sulfide, sulfoxide or sulfone (b) organic amide of phosphoric acid or polyphosphoric acid and (c) a condensation product of alkyl phenol with aldehydes, ketones or sulfur chlorides.

101625. Leesona Limited and George Lee. Improvements in or relating to yarn sizing machines. Accepted on 17th March 1967.

Wherein a motor is arranged, said motor serving the rotate a bar to cause the movement of a rocking plate and linkage and mere by vary the pressure which can be applied to a yarn sheet when if passes through the nip of the squeeze rollers.

101635. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Stabilized polyolefins and process for making them. Accepted on 18th March 1967.

Comprises adding to the polyolefins a mixture of (a) hydroxy benzophenone (b) organic amide of phosphoric acid or of a polyphosphoric acid and (c) a condensation product of alkyl phenols with aldehydes, ketons or sulfur chloride.

101636. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Stabilized polyolefins and process for making them. Accepted on 18th March 1967.

Comprises adding to the polyolefins a mixture of (a) a derivative of benzotri azole (b) an organic amide of phosphoric acid or of a polyphosphoric acid (c) a condensation product of alkyl phenols.

101638. Skandinaviska Apparat industri AB. An improvement in apparatuses for the cleaning of corn and the like, viz. so called aspirators. Accepted on 18th March 1967.

Consisting a conical spreader desk whose top is turned upwards to a tubular housing, a cyclone separator connected to the said housing and a means for producing a current of air above the said disk.

101647. Clevite Corporation. Self-lubricating urethane urea copolymer bearing. Accepted on 20th March 1967.

Comprising the steps of reacting at a temperature of 90-130°C (a) polyurethane (b) an amine and (c) a fatty acid.

101648. Gewerkschaft Eisenhutte Westfalia. Coal getting apparatus. Accepted on 20th March 1967.

Consisting of a conveyor having attached to it a scraper guiding mechanism which guids a coal scraper and pressure exerting elements which act on the gob side of the conveyor.

101651. Inland Steel Company. Process for making high strength steel sheet or strip. Accepted on 20th March 1967.

Comprising heating plain carbon steel having 0.03% to 0.25% by weight of carbon above critical point and then quenching the same.

101662. Combustion Engineering Inc. Pumping system. Accepted on 15th March 1967.

Includes a multiplicity of pumps having their inlet sides in communication with a source of fluid supply, the housing of said pumps are integral with the wall of a vessel and interior of said vessel is divided by separating means into suction space.

101677. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to circuit arrangements for image correction. Accepted on 20th March 1967.

Comprising a line output stage, output circuit of which includes line output transformer and means for correcting cushion-shaped distortion of image, the frequency or phase of the deflection being varied in dependence upon an A.C. correction voltage.

101693. United States Steel Corporation. Method of making stressed briquettes. Accepted on 18th March 1967.

Comprising compacting the fines in brequetting press around a steel wire.

101697. The Dow Chemical Company. Flexible cellular body and a process for the production thereof. Accepted on 16th March 1967.

Characterizes by forming a mixture of (a) a physical blend of olefin polymer and a monolefin elastomer and (b) a volatile organic foaming agent and subjecting it to high temperature and pressure and then passing the mixture to a fow of lower pressure.

101707. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Production of alcohols. Accepted on 15th March 1967.

Comprising commencing the oxidation reaction or saturated aliphatic or cyclic hydrocarbon with molecular oxygen in a solution containing a reaction product of boric acid and the alcohol to be produced from said organic compound.

101708. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Production of high purity isoprene. Accepted on 15th March 1967.

Comprising reacting an isobutene-containing C_4 cut with formaldehyde, hydrogenating the resultant crude 4,4-dimethyl-1, 3-dioxane and then catalytically cracking the resultant product.

101709. Institut Francais Du Petrole, Des Carburants et Lubrifiants. Purification of terephthalic acid. Accepted on 15th March 1967.

Comprising forming an aqueous solution of a dibasic salt of terephthalic acid, oxidizing the resulting aqueous solution, evaporating a volume of water from the aqueous solution to an extent of atleast 1% by volume and acidifying the resultant solution.

101711. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for rendering high molecular weight compounds resistant to electrostatic charge and antistatic compositions obtained thereby. Accepted on 16th March 1967.

Comprises incorporating at least one polymer of an N-alkyl substituted phosphoric acid amide.

101727. Combustion Engineering Inc. Method and apparatus for cleaning off ash. Accepted on 21st March 1967.

After formation of ash and slag on the wall, ash is removed from the wall in an area adjacent to the jet means, whereafter the jet of cleaning medium is directed across the wall so that it operates against the edge of the remaining ash layer.

101728. Combustion Engineering Inc. Method and apparatus for deslagging tube lined furnace walls. Accepted on 9th March 1967.

Permitting the slag to build up on the furnace wall to form a layer, introducing underneath said layer a slag cleaning medium.

101743. Allied Chemical Corporation. Process for the production of nitrocyclohexane. Accepted on 18th March 1967.

Reaction cyclohexane with a nitrating agent in vapour phase wherein the reaction mixture is maintained with agitation within a temperature range of 3°C.

101756. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. A device for carrying out underwater explosions. Accepted on 18th March 1967.

Comprising a floating surface installation, an immersed sphere perforated with orifices, means for supporting sphere having one immersed end integral with sphere and one unimmersed end integral with surface installation means for feeding sphere with explosive charges and means for firing same.

101772. C. W. Cheney & Son Limited. Improvements relating to key-operated locks for articles of luggage. Accepted on 21st March 1967.

Comprising a casing, linearly slidable bolt spring urged for engagement with a hasp past a locking plate provided with pivoted means, an aperture, a key engaging projection.

101797. International Business Machines Corporation. Improvements in or relating to data transmission systems. Accepted on 23rd March 1967.

Comprising a phase correcting circuit for shifting the phase of the component of the received signal at the carrier signal frequency and a demodulator for demodulating the received signal with the phase corrected carrier signal.

101815. Williams (Hounslow) Limited. Improvements in or relating to solutions of oil-soluble dyestuffs. (5th October 1964). Accepted on 15th March 1967.

Comprising an oil soluble dyestuff or mixture of oil soluble dyestuffs in a homogenous mixture of a liquid phenol and a hydrocarbon containing at least 30% by weight of hydrocarbon.

101823. Monsanto Company. Coating composition containing cross-linkable polyamides dissolved in phenolic solvents. Accepted on 15th March 1967.

Comprising dissolving a multi-ring aromatic carboxylic dianhydride having each anhydride group on different rings and a primary diamine in a solvent comprising a mixture of cresylic acid, phenol and containing a solution of a tertiary amine and stirring till the polyamide acid is formed.

101849. Koppers Company Inc., Foamable styrene polymer compositions. Accepted on 16th March 1967.

Homogeneously mixing a styrene polymer with a solid organic acid and a synergistic CO_2-liberating agent and simultaneously foaming and extruding the mixture into a foam structure.

101886. The Dow Chemical Company. Expandable thermoplastic resinous material and method for making same. Accepted on 13th March 1967.

Comprising a styrene polymer whose 10 weight per cent solution at 25°C has a viscosity of from 4-15 centipoise and a blowing agent which contains neopentane, isopentane or mixtures thereof.

101906. Ganz Villamossagi Muvek. Rotor for four pole synchronous machines. Accepted on 17th Mardh 1967.

Comprising sloth forming two groups and the slots of the two groups contain coils interconnected in a way as to ensure opposingly flowing current in them.

101908. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Esters, soluble or emulsifiable in water, of polymers containing hydroxyl-groups and a process for their manufacture. Accepted on 16th March 1967.

Reacting mixed unsymmetrical anhydride of carboxylic or sulfonic acid and monoalkyl ester of carbonic acid in inert solvent with polyvinylalcohol or copolymer of vinylalcohol.

101918. Veb Farbwnfabrik Wolfen. Process for the production of new xanthic acid esters and pesticidal compositions containing them (13th August 1965). Accepted on 16th March 1967.

Process for the preparation of xanthic acid esters comprises reacting a mercapto ethanol with carbon disulphide and an alkali metal hydroxide, the zanthate obtained is then alkylated with an appropriate alkylating agent.

101939. Corning Glass Works. Pressing articles of thermoplastic materials. Accepted on 21st March 1967.

By supplying a molten gob of the material to mold inserting stop between parts of mold, pressing gob reducing pressure and removing the stop.

101947. C. F. Boehringer & Soehne GMBH. Improvements in or relating to mounted test strips. (13th August 1965). Accepted on 22nd March 1967.

Comprising one or two synthetic resinfoils, at least one narrow edge thereof being welded to a narrow edge of at least one indicator test paper.

101976. British Nylon Spinners Limited. Improvements in and relating to yarn winding mechanisms. (21st October 1964). Accepted on 16th March 1967.

In which advancing yarn is guided onto a rotating member for winding thereon by a reciprocating yarn guide wherein the yarn guide is continuously reciprocated by means of compact can follower.

102001. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to methods of connecting the ends of the heating wire of an indirectly heated cathode to current supply conductors. Accepted on 20th March 1967.

Characterized in that a strip-shaped conductor, which has between its ends at least two bending points and which has an area of smaller cross-section between bending points, is connected to a current supply member taken through the tube wall, after which the ends of the heating wire are disposed each at a bending point whilst at least near bending points there is provided a quantity of soldering material.

102008. Oerlikon-Buhrle Holding AG. Method and apparatus for preventing the occurrence of warp-wise running irregularities in fabrics produced on a wave wearing loom. Accepted on 20th March 1967.

In which the portion of the fabric extending forwardly of the fell line in the region immediately adjacent to such fell line is guided over at least one stationary surface which is convexly curved in the warp direction of the fabric.

102057. Caterpillar Tractor Co. High pressure hydraulic hose coupling assembly. Accepted on 17th March 1967.

Comprising in combination a generally cylindrical, hollow, stem member a split collet secured to said stem member and coazial therewith, and a hollow cylindrical sleeve member having an inside member less than that of said collet and greater than that of said stem.

102081. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to circuit arrangements for correcting the pincushion distortion upon deflection of an electron bram in a display tube. Accepted on 16th March 1967.

Comprising a first deflection coil for deflecting in a first direction and a second deflecting coil for deflecting in a second direction, preferably in the vertical direction.

102167. Luk Lamellen und Kupplungshau GmbH. Clutch. Accepted on 17th March 1967.

Including an output shaft a flanged flywheel on the engine shaft cover plate connected to the free end of the flange oxilly selectively movable pressure plate within the flange circumferentially spaced plurality of pivot means supported by said cover plate and plurality of two arm leyer means pivotally supported by said pivot means.

102168. Armstrong Patents Co., Limited. Improvements in and relating to telescopic hydraulic shock absorbers. (20th October 1964). Accepted on 21st March 1967.

Comprising pressure cylinder the reservoir cylinder, rod guide through which piston rod passes, plug member annular disc valve closure member.

102169. Rhone-Poulenc S. A. Process for the preparation of alkonyloxy-silanes. Accepted on 17th March 1967.

Reacting a compound containing a silicon-hydrogen bond with an olefin and carbon monoxide in the presence of as catalyst, a metal carbonyl.

102170. La Nationale S. A. Spectacle frame. Accepted on 17th March 1967.

Comprising a frame having a hole and a mount comprising an anchor plate and hingemounting means engaging with the plate and fixing means for the plate.

102219. The Upjohn Company. Composition for promoting maturation of cotton plants. Accepted on 21st March 1967.

Comprising a carrier and a 2-halonitroaniline.

102251. General Electric Company. In a method for the manufacture of a conductor accommodating member the step of effecting a desired placement of electrical conductor means. Accepted on 22nd March 1967.

Comprising steps of positioning a pair of conductor means, in transformer relation, producing atleast a power pulse of pre-selected magnitude in one conductor means, to produce electromagnetic force to act on said other conductor means for effecting the desired placement thereof.

102252. General Electric Company. Methods for changing relative positions of movable conductors for use in electrical inductive devices. Accepted on 14th March 1967.

Comprising steps of transforming an electrical coil, coil turns are arranged proximate non-magnetic electrically conductive material, at least one surge of current having a pre-determined magnetude is passed through the coil which effect transformation.

102291. Ciba Limited. Photographic materials for the silver dye-stuffs bleaching process. Accepted on 18th March 1967.

Comprises on a support a layer containing at least one dyestuff prepared by reacting a dihalide of a thiophene 2.5 carboxylic acid an aminoazodyestuff.

102320. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to indirectly heated cathodes for use in electric discharge tubes. Accepted on 20th March 1967.

Characterized in that near one of the ends of the cathode sleeve there is provided at least one inwardly projecting extension which is located at the top between the limbs of one or more folded parts of the heating body.

102331. Shell Internationale Research Maatschappij N.V. A composition comprising a polymer of a cyclic ester from a hydroxycarboxylic acid and a stabilizer. Accepted on 17th March 1967.

Composition comprising polymer of cyclic ester from hydroxycarboxylic acid and substance having group $-C-(S)-C-$ *where n-1 to 10.*

$$\underset{S}{\overset{\|}{}} \quad \overset{n}{} \quad \underset{S,}{\overset{\|}{}}$$

102365. Vyzkumny ustav matematickych stroju Praha. A digital servomechanism for controlling the movements in opposite directions of an output element. Accepted on 14th March 1967.

Comprising pair of counters mean for minimizing dead zone comprising a coincidence circuit, first and second gate circuits means for applying the output of said coincidence circuit, a flip-flop, Switches.

102366. Vereingung Volkseigener Betriebe Lacke Und Farben. Process for preparation of iron oxides. Accepted on 23rd March 1967.

By treating metallic iron with oxygen or oxygen carrying gases in the presence of a watery, weakly acid iron salt solution characterized in that way that the reaction is carried out in the presence of aluminium.

102417. Johnson & Johnson. Sanitary napkin and a method of making the same. Accepted on 20th March 1967.

Comprising an absorbent core which includes a fibrous layer, and a thermoplastic film covering a surface of fibrous layer, the end portion of fibrous layer and film being compressed bonded together.

102418. Johnson & Johnson. A sanitary napkin. Accepted on 20th March 1967.

Absorbent core consisting essentially of comminuted cellulosic pulp fibers having a density of from about 14 to 24 grains per cubic inch.

102428. The Lummus Company. Process for preparing mixed oxide catalysts. Accepted on 16th March 1967.

Comprises adding (1) an aqueous solution of a water-soluble salt of a metal selected from the group consisting of iron or cobalt, to (2) an aqueous solution of a water-soluble salt whose anion contains a metal selected from the group consisting of molybdenum or tungsten thereby a mixture of oxides of metals (1) and (2) is formed and precipitates from resulting reaction mixture.

102453. Stamicarbon N. V. Process for preparing cyclohexane. Accepted on 18th March 1967.

Benzene containing organic sulphur compounds is partially hydrogenated and the hydrogen sulphide formed is removed and the said partially hydrogenated benzene is completely hydrogenated in a second hydrogination zone.

102466. Ciba Limited. Process for dyeing natural and regenerated cellulose with organic dioxazine compounds. Accepted on 10th March 1967.

A process for dyeing natural and regenerated cellulose comprises reducing an organic dioxanic dyestuff to the lenco form with a strong reducing agent and subsequently reoxidizing on the fibre.

102471. Shell Internationale Research Maatschappij N. V. A process for the preparation of aldehydes and/or alcohols. Accepted on 20th March 1967.

Characterised in that a catalyst is applied containing a tertiary 5-membered heterocyclic phosphine.

102494. Ciba Limited. Disazo pigments a process for their manufacture, and organic material pigmented therewith. Accepted on 17th March 1967.

Comprising reacting an acidic solution of a diazonium salt of an amino benzoic acid anilide with an alkaline solution of bisacetoacetil arylide of phenylene diamine, diamino diphenyl or naphthylene diamine.

102535. Vsesojuzny Nauchno-Issledoxatelsky Geofizicheskikh Metodox Razvedki. Gravimetrical instrument. Accepted on 20th March 1967.

Characterised in that main springs are parabolic in shapes, in order to provide a high sensitivity with minimum dimensions of the sensing system.

102600. Shell Internationale Research Maatschappij N. V. A process for the polymerization or copolymerization of cyclic anhydrides of hydrocarboxylic acids and threads, fibres tapes films and articles made therefrom. Accepted on 22nd March 1967.

Comprises contacting cyclic anhydride of a hydroxy carboxylic acid with one or more organic sulphides sulphoxides and/or sulphonium compounds as catalyst.

102614. Gestetner Limited. Improvements in or relating to electrographic sheets. (23rd November 1964). Accepted on 15th March 1967.

Comprising an electrically conductive sheet of impervious paper less than 0.005 inch thick carrying an electrically conductive layer on one side.

102661. Stamicarbon N. V. Process for the preparation of macromolecular formaldehyde polymers and shaped products made therefrom. Accepted on 20th March 1967.

Comprises containing formaldehyde containing at least 0.5% by weight of water with a liquid containing organic titanium catalyst.

102711. J. M. Shah. Novel electrolyte for storage cells. Accepted on 14th March 1967.

Comprising sulphuric acid of high purity, sulphate of a metal selected from the group of metals which precede lead in electro motive series.

102781. Dynamit Nobel Aktiengesellschaft. Improvements in or relating to pipe couplings. Accepted on 22nd March 1967.

Comprising a body formed from synthetic plastics material with an annular shoulder, a ring formed in one piece from rigid material and carrying projecting members for the attachment of means for clamping together two coupling elements.

102791. Westernthomson Controls Limited. A thermally-responsive fluid-flow control valve. Accepted on 18th March 1967.

Thermally responsive fluid-flow control valve incorporating a thermally-responsive actuator for operating it and a heat conducting casing disposed wholly at the opposite side of the valve seat.

102804. Tsentralny nachno-issledovatelsky institut chernoi metallurgii im. Bardina. Device for cutting moving ingots, preferably those obtained by the continuous casting method. Accepted on 15th March 1967.

Characterised in that the frame is mounted in such a manner as to be capable of moving in the process of cutting the ingot in the direction of the movement thereof.

102842. P. S. Rao. An improved fuel for domestic and industrial purposes and the like. Accepted on 22nd March 1967.

Comprises mixtures of at least one sodium compound and water such that the ion concentration of sodium, hydrogen and oxygen is in approximate proportion of 1:1:8 by weight, hydrozine being also added when less concentration is required.

102917. K. Purnaiya, Mrs. Hira Krishnamurthy Purnaiya and W. Scheuerle. Improvements in or relating to a steering mechanism for a trailer-or a semi-trailer-tractor combination. Accepted on 22nd March 1967.

Comprising a steering head each at the front and rear wheels of the trailer or the semitrailer and diagonally arranged links connecting the front and rear wheel steering heads by joints at their ends.

103000. Algemene Kunstzijde Unie N. V. An apparatus for interlacing filaments with the aid of a gas. Accepted on 22nd March 1967.

Comprises a nozzle and a thread guides to guide filaments to be interlaced along a path which intersects the centre line of the nozzle exit a blowing chamber is provided with a thread receiving slit.

103017. Calumet & Hecla, Inc. Method and apparatus for cutting tubes. Accepted on 17th March 1967.

Method comprising supporting the tubing, applying cutting and bending actions progressively arouned the tubing, terminating the cutting action before the depth of cut approaches the wall thickness and continuing bending till the tubing is severed.

103045. Midland-Ross Corporation. Railway Vehicle bogie. Accepted on 14th March 1967.

Bolster has vertically elongate lugs flanking each wedge and defining recesses into each of which a part of the associated wedge projects and the columns have guide surfaces.

103197. Ciba Limited. Process for the preparation of 4'-Nitrodiphenyl-4-carboxylic acid. Accepted on 17th March 1967.

By acetylating diphenyl in nitrating the aluminium chloride complex obtained and converting the nitro-4-halogenacetyldiphenyl into 4'-nitro diphenyl-4-carboxylic acid.

103290. The British Petroleum Company Limited. A lubricating composition containing esters. (22nd July 1965). Accepted on 20th March 1967.

A lubricating composition comprises of two ester oils viz. a liquid aliphatic ester and a liquid aromatic ester consisting of one or more diesters.

103292. The Metal Box Company of India Limited. Improvements in or relating to pilferproof closures for bottles, jars and like containers. Accepted on 23rd March 1967.

Having a cap portion integral with a sealing band, which is provided with one or more transverse weakening line characterized in that those lines consists of non-continuous slits which start from the lower edge of the said band.

103330. American Brake Shoe Company. Retarder control systems. Accepted on 18th March 1967.

Comprising a traffic rail a plurality of transducers, mounted on said rail each developing an initial electric signal by the velocity of the car wheel adding circuit means for addine the initial signals to develop a control signal a control means, responsive to the control signal for actuating the retarder.

103333. Ateliers De Constructions Electroques De Charleroi (ACEC). Improvements in safety circuits incorporating saturable reactors. Accepted on 20th March 1967.

Comprising saturable reactor, having two magnetic circuits, winding associated with each magnetic circuit, two winding being connected with each other in series, a D.C. saturation winding, means to indicated a fault in the saturable reactor.

103553. George Angus & Company Limited. Improvements in the manufacture of hose pipes (3rd February 1965). Accepted on 22nd March 1967.

Drawing the jacket with a tube of thin reinforcing cloth inside it and in frictional contact with its inner wall, through an extrusion head.

103591. P. B. Irany and A. A. Iofin. High voltage circuit breaker. Accepted on 15th March 1967.

Characterised in that a movable current carrying rod of the arc quenching circuit is embraced with a magnetic core.

103625. Dynamit Nobel Aktiengesellschaft. Process for the production of films, foils and fibres from polyhydroxy methylenes. Accepted on 22nd March 1967.

Reacting polyvinylene carbonate with amine a dissolving hydroxy urethanes formed in water making films and fibres and saponifying with basic substance.

103797. Veb Starkstrom-Anlagenbau Erfurt. Lead-in or duct for electric conductors. (15th September 1965). Accepted on 14th March 1967.

On an electric conductor a striking contact is arranged twisted through 90° in relation to a bus-bar connection and the insulating member with flange is of oval cross-section the axis of the oval being lying in the striking direction of the striking contact.

103850. Imperial Chemical Industries Limited. Improvements in or relating to laminates. (22nd February 1965). Accepted on 21st March 1967.

Before the or final stretching step one of both sides of the film is coated with the crystallisable thermoplastic polymer containing an additive.

104100. E. K. Cole Limited. Improvements in or relating to radio aerial assemblies. (25th March 1965). Accepted on 23rd March 1967.

Comprising a tube providing a housing for the part of the aerial the end of the tube remote from the body aperture housing a terminal which is electrically connected to the aerial and which is adapted to receive a connector carried by the electricable.

104141. FMC Corporation. Apparatus for making thick polymeric articles. Accepted on 15th March 1967.

Characterised by a stationary curved guide, means for pulling the article through a tank in a substantially horizontal direction and means slidably engaging the other face of the article and pressing the article against the guide.

104151. S. S. Ponkshe and M. D. Bhate. An attachment for delivering predetermined quantity of gasolene from gasolene pumps. Accepted on 20th March 1967.

Presetting mechanism which in turn being linked with the known mechanism for measuring the flow of gasolene, an electrical circuit energising an electromagnet on the trigger and another emergency switch on the delivery spout to break the circuit on the trigger and thus instantly stop the delivery of gasolene.

104199. Wright Rain Limited. Improvements in or relating to pipe couplings. (6th March 1965). Accepted on 17th March 1967.

Between pipe and socket comprising radial tongs on the walls of the one and complementary notches on that of the other with abutments between the notches.

104210. Scovill Manufacturing Company. Improvements in or relating to a device for mounting food mixer on standard Accepted on 17th March 1967.

Comprising a first latch on the standard a second latch on the mixer a bracket having a base and an arm connected to the mixer and means on the base and on the arm respectively engaged by first and second latches.

104248. Osoboe Konstruktorskoe Bjuro po proektirovaniju, issledovaniju i vnedreniju Besshtangovijkh nasosov. Pump valves. Accepted on 17th March 1967.

Comprising a sleeve mounted in the valve box, the interior of the sleeve communicating with the annular space through ports the discharge of the fluid through said ports being covered with a slide valve.

104262. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to electric discharge tubes of the kind comprising a cathode, the surface of which comprises portions of higher and portions of lower electron emission. Accepted on 18th March 1967.

Having a dispenser type cathode with a porous metallic surface whose active portions opposite the grid apertures are covered by a metal selected from the group of rhenium, iridium and osmium, the operational temperature of the cathode being at least 100°C lower than the conventional vane of 1050°C.

104273. Sperry Rand Corporation. Multipurpose matrix. Accepted on 18th March 1967.

Logical matrix for performing functions such as circular shift pattern location, coincidence detection and permutation.

104365. K. Gopalaswamy. An improved process for washing clothes and an apparatus therefor. Accepted on 15th March 1967.

Process including the steps filling a container with soapwater placing the cloths around a device in the container adapted to direct the connection currents set in the water into a narrow streams above the level of water and heating one container.

104516. Jaggy & Company. Improved comb. Accepted on 17th March 1967.

First series of substantially evenly spaced teeth with enlarged rounded ends and a second series of teeth interspaced between the teeth of the first series and terminating short of the said rounded ends.

104561. C. P. Shah. Improved pump device for drawing out liquids like oils chemicals or acids or the like from a container or the like. Accepted on 20th March 1967.

Consisting in combination (1 a Y-socket 2) flexible bulb attached to a formed integral with one side of said socket 3) a tubing attached to inlet of said socket and 4) the third side of said socket serving as an outlet and the volume of air in the said bulb being more than the volume of air in said tube.

104577. Allied Chemical Corporation. Process for the preparation of cyclohexanone. Accepted on 22nd March 1967.

Comprising passing superheated steam into a liquid mixture containing a caustic alkali, one or both of 2-cyclohexylidene cyclohexanone and 2(1-cyclohexen-1-yl) cyclohexanone and at most 5% by weight of water and recovering cyclohexanone from the distillate.

104657. S. R. Nanavati. An advertising apparatus. Accepted on 18th March 1967.

Vertically disposed rectangular parallelopiped box, the vertical panels being made of opaque or translucent material and running behind the said panels an endless tape containing plain or mono-coloured or multi-coloured transparent pattern on an opaque or translucent background and the tape being illuminated by a fluorescent tube light.

104660. Lansing Bagnall Limited. Improvements in or relating to industrial trucks. (12th April 1965). Accepted on 9th March 1967.

A detachable mast pivotally mounted on the chasis by means of releasable trunnion bearings located at some distance above bottom end of the mast and a tilt-jact mechanism below said bearings.

104679. A. Ehrenreich & Cie. Improvements in or relating to steel pipe tie rod used in motor cars. Accepted on 15th March 1967.

With a ball and socket joint characterised in that the end of the tie rod carrying internal screw threads for mounting the stud of the joint is provided with an enlarged contact area.

104951. Allied Chemical Corporation. Process for separating chlorine from phosgene. Accepted on 17th March 1967.

Comprises contacting liquid phosgene containing more than 25 ppm chlorine with activated carbon, and separating the purified phosgene.

105453. Neiveli Cerammics & Refractories Limited. An improved process for enhancing the plasticity of clays. Accepted on 17th March 1967.

Ground raw or dehydrated raw lignite in the form of a slurry with water is blended throughly in a blunger with the requisite quantity of water and the clay of which the plasticity is to be increased.

105529. Rhone-Poulence S. A., Process for the manufacture of epoxy compounds. Accepted on 21st March 1967.

Reacting olefinic compounds with organic hydro-peroxide in presence of a borate ester.

105690. Dunlop Rubber Company Limited. Improvements in and relating to tyre building apparatus. Accepted on 23rd March 1967.

Comprising a tyre building former about which a plurality of carcass plies and associated bead ring assemblies are locatable, and two annular inflatable ply turn up diaphragms located one at each axial end of the former.

106608. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to low-pressure mercury vapour discharge lamps. Accepted on 21st March 1967.

Characterised in that an amalgameble metal is present on a member close to at least one of the electorodes, and a portion of the wall of the lamp.

Printed specification Published

A limited number of printed copies of the undernoted specifications are available for sale from the Officer-in-Charge, Government of India, Central Book Depot, 8, Hastings Street, Calcutta, at two rupees per copy :—

Appeal Proceedings

(Section 5)

An appeal to the Central Government has been filed by Pilkington Brothers Limited under Section 5 of the Indian Patents and Designs Act, 1911 in respect of application for a patent numbered 89163.

Amendment Proceedings

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Monsanto Chemical Co., a Corporation of the State of Delaware of 800 North Lindbergh, Boulevard City of St. Louis-66, Missouri, U.S.A., seek leave to amend the name and address of the applicant in the application, specification and drawings in respect of patent application No. 83900. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 68144—Inventa A.G. Fur Forschung Und Patentverwertung.

The patent ceased on the 24th June 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazettle of India, dated the 25th March 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 20th May 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 69273—Henry Charles Rothery.

The patent ceased on the 6th October 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 25th March 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 20th May 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. Nos. 129064 to 129071. Union Carbide India Limited. 1, Middleton Street, Calcutta 16, West Bengal, India, an Indian Company, "a flash-light", August 3, 1966.

Class 1. No. 129710. Electronics Limited. (A company registered under the Indian companies Act), Connaught Place, New Delhi-1. (India), "Room airconditioner", November 5, 1966.

Class 1. No. 129711. Tractel Tirfor India Private Ltd., Hoare Miller House, 15, Ganesh Chandra Avenue, Calcutta-13, West Bengal, an Indian Private Limited Company, "Rail clamp", November 7, 1966.

Class 1. No. 129722. Hakamchand Ishwardas, a partnership firm registered in India, of 167 Guruwar Peth, Poona-2, and also of 21, Nagesh Peth, Poona-11, State of Maharashtra, India, "A geyser", November 14, 1966.

Class 1. No. 129745. Victor Radio & Electronics. 33/35, Damodar Bhuvan, Corner 1st Parsiwada, Vithalbhai Patel Road, Bombay-4 (BR), State of Maharashtra, India, an Indian Partnership firm, "A chassis of a transistorised ratio set". November 18, 1966.

Class 1. No. 129819. Ratilal Trikamji Mehta, An Indian Citizen, of Jay Mahal Building, 20/48, Lohar Chawl, Bombay-2, Maharashtra, India, "A tail lamp", November 25, 1966.

Class 1. No. 129858. Shankarrao Daji Kulkarni, an Indian Subject, S. Daji Building, Ichalkaranji, Dist. Kolhapur, Maharashtra State, "Diesel Engine monoblock pumping-set", December 5, 1966.

Class 1. No. 129876. Brij Mohan Sehgal, son of Shri Jamna Das Sehgal of N. A. 238, Krishanpura, Jullundur City, Punjab State, Indian by Nationality, "Knife sharpener", December 7, 1966.

Class 1. No. 129898. Miller & Co. (Cal.) Private Limited, Indian Company, 24, Netaji Subhas Road, Calcutta-1, West Bengal, India, "Horn", December 9, 1966.

Class 3. No. 129072. Union Carbide India Limited. 1, Middleton Street, Calcutta 16, West Bengal, India, an Indian Company, "a lens rings for flashlight", August 3, 1966.

Class 3. No. 129874. Alimahomed Chhaganbhai Padamsee, Indian National, C/o. Salemahomed Padamsee and Company, 141, Sheriff Devji (Chuckla) Stret, City of Bombay, State of Maharashtra, India, "Flasks", December 7, 1966.

Class 3. No. 129875. Alimahomed Chhaganbhai Padamsee, Indian national, C/o. Salemahomed Padamsee and Company, 141, Sheriff Devji (Chuckla) Street, City of Bombay, State of Maharashtra, India, "Cups", December 7, 1966.

Class 3. No. 129899. Miller & Co. (Cal.) Private Limited, Indian Company, 24, Netaji Subhas Road, Calcutta-1, West Bengal, India, "Horn", December 9, 1966.

Class 4. No. 129693. Khanna Beverages, an Indian Sole Proprietory Concern (whose Sole Proprietor is Shri Inder Mohan Khanna), 14, Khajua New Collney, Lucknow, Uttar Pradesh, "Botle", November 3, 1966.

Class 4. No. 129712. Bhagwan Das, An Indian National, proprietor of Art Advertisers, 8, Ludlow Castle, Delhi-6, "Revolving displayers". November 7, 1966.

Class 4. Nos. 129714 and 129715. Bombay Beverages & Cold Drinks Private Limited (A Company registered under the Indian Companies Act), 202, Khetwadi Back Road, Bombay-4, (Maharashtra), "Bottle", November 7, 1966.

Class 4. No. 129737. Cip Cola Corporation, 1484, Queens Road, Delhi-6. Indian Partnership firm, "Bottles", November 17, 1966.

Class 4. No. 129857. Pratap Krishna Ghosh, 209/B, Shree Arabinda Sarani, Calcutta-6, West Bengal, Nationality—Indian, "Coke ovens", December 5, 1966.

Class 4. Nos. 129917 and 129918. The All India Glass Works Private Ltd., Indian Company, 111, Bhandari Street, Bombay-3, Maharashtra, India, "Tumblers", December 13, 1966.

Class 12. No. 129900. Miller & Co., (Cal.) Private Limited, Indian Company, 24, Netaji Subhsa Road, Calcutta-1, West Bengal, India, "Beedies", December 9, 1966.

Class 13. Nos. 129546 to 129550. The Crown Spg. & Mfg. Co., (Public) Ltd., Gokhale Road, (South), Parel, Bombay-13, (Maharashtra), Nationality—Indian Company, "Textile goods", September 26, 1966.

Class 13. Nos. 129584 and 129585. The Victoria Mills Limited, an Indian Company, at Delisle Road, Parel, Bombay-13, "Textile piecegoods", October 3, 1966.

Class 13. Nos. 129695 and 129696. The Victoria Mills Limited, an Indian Company, at De Lisle Road, Parel, Bombay-13, "Textile piecegoods", November 3, 1966.

Class 13. Nos. 129698 to 129700. The Victoria Mills Limited, an Indian Company, at De Lisle Road, Parel, Bombay-13, "Textile piecegoods", November 3, 1966.

Class 13. Nos. 129701 to 129703. The Victoria Mills Limited, an Indian Company, at Delisle Road, Parel, Bombay 13, "Textile piecegoods", November 3, 1966.

Class 13. Nos. 129704 to 129708. The Khatau Makanji Spg.& Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", November 4, 1966.

Class 13. No. 129726. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", November 14, 1966.

Class 13. Nos. 129796 and 129797. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", november 27, 1966.

Class 13. Nos. 129894 to 129896. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1. "Cotton textiles", December 8, 1966.

Class 13. Nos. 129901 to 129903. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", December 12, 1966.

Class 14. No. 129697. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods". November 3, 1966.

Class 14. Nos. 130027 and 130028. The Victoria Mills Limited, an Indian Company, at Delisle Road, Parel, Bombay-13, "Textile piecegoods', December 28, 1966.

CANCELLATION OF THE REGISTRATION OF DESIGNS

An application has been made by Jeewanlal (1929) Limited, for cancellation of the registration of Design No. 128131 in class I in the name Ibrahim Gulam Hussain Currimbhoy & others trading as Currimbhoy Industries.

A. JOGARAO
Controller General of Patents, Designs and Trademarks.

THE PATENT OFFICE

Patents and Designs

Calcutta, the 15th April 1967.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

25th March 1967.

109882. Council of Scientific and Industrial Research. Production of writing and printing papers from waste papers free from mechanical pulp by the removal of the ink particles.

109883. Council of Scientific and Industrial Research. Improvements in or relating to deposition of photosensitive thin films of silver sulphide layers.

109884. K. Sundararajan. Instantaneous isolator for single phasing.

109885. S. R. Vithaldas. An electronic regulated network for throttle-control operation in an internal-combustion engine.

109886. P. K. Kulkarni. A device operated from deck of ship to remove marine growth from under water part of ship.

109887. M/s. Karamchand Premchand Private Limited. A plant growth regulator, its preparation and use.

109888. Uma Shashi (Mrs). An indoor television antenna system.

109889. I. Dharmani and C. Dharmani. Case for pressure measuring instruments and pointer thermometer instruments.

109890. Standard Telephones and Cables Limited. Method and means for reducing crosstalk between lines. (25th March 1966).

109891. M. R. M. Alstergren. A prosthetic device for animal teeth. (25th March 1966).

109892. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Basically substituted bis-benzimidazole derivatives and process for preparing them.

109893. United States Steel Corporation. Casting ferromanganese.

109894. Imperial Chemical Industries Limited. New organic compounds and compositions containing them. (31st March 1966).

109895. Imperial Chemical Industries Limited. Melt spinning process to produce filaments and fibres from crystalline stereoregular poly-α-olefines. (19th May 1965). [Divisional date 22nd December 1965].

109896. Georg Fischer Aktiengesellschaft. Device for storing control information.

27th March 1967.

109897. Council of Scientific and Industrial Research. Improvements in or relating to rust preventing compositions.

109898. George Salter India Limited. Suspended platform with back rest for all capacities of circular hanging spring operated weighing machines.

109899. S. K. Palnitkar (Sidhanth Kesheo). An improved seed and seed-*cum*-fertilizer drill.

109900. Sanmatha Nath Dutta. Novel indoor game.

109901. Hindustan Lever Limited. Conversion of green tea.

109902. Westinghouse Electric Corporation. Water conversion process and apparatus.

109903. Mundipharma A.G. Improvements in novel therapeutic salt.

109904. Council of Scientific and Industrial Research. Improvements in or relating to foster-seely type discriminator circuit.

109905. Council of Scientific and Industrial Research. Improvements in or relating to the wide-band double tuned transformers with reference to I.F. amplifier design in TV receivers.

109906. Council of Scientific and Industrial Research. Improvements in or relating to video amplifiers.

109907. Becorit (Research) Limited. Improvements in and relating to vehicles adapted to run on a track such as for example for use in underground transport systems.

109908. Imperial Chemical Industries Limited. Biologically active compounds and compositions containing them. (31st March 1966).

109909. Farbenfabriken Bayer Aktiengesellschaft. Anthraquinone dyestuffs. (13th December 1966).

109910. Shell Internationale Research Maatschappij N. V. Process for the stabilization of polymers of cyclic esters of hydroxycarboxylic acids.

109911. Stamicarbon N. V. Process for the preparation of an optically active α-aminolactam from a mixture of the D-and L-modifications of the α-aminolactam.

109912. Farnell Instruments Limited. Improvements in or relating to electrical power supply apparatus.

109913. Fuller Company. Gas-solids separator.

109914. Ciba Limited. New anthraquinone dyestuffs and processes for their manufacture and use.

109915. Farbenfabriken Bayer Aktiengesellschaft. A process for hydrogenating unsaturated compounds in C_4-hydrocarbon fractions. (9th May 1966).

109916. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Fire-resisting doors.

109917. Transelektro Magyar Villamossagi Kulkereskedelmi Vallalat. Continuous electric magnitude variable induction control device.

109918. The Polymer Corporation. Coating materials and methods for their application.

109919. Trico-Folberth Limited. Windscreen wipers. (4th April 1966).

109920. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Novel imidazole.

109921. Schenectady Chemicals, Inc. Polyester-polyimide wire enamel.

109922. Schenectady Chemicals, Inc. Dual coated electrical conductor.

109923. S. K. Karanjia. Improvements in or relating to the pilfer-proof and/or leak-proof sealing of containers.

109924. S. K. Karanjia. Improvements in or relating to collapsible containers.

109925. Algemene Kunstzijde Unie N.V. Apparatus and method for winding yarn.

109926. H. K. Rathore. An apparatus for recording pressure variations of the draught of ventilating fans.

109927. Algemene Kunstzijde Unie N. V. Improvements in or relating to a process and apparatus for twisting yarn, and to yarn twisted according to the process and apparatus.

109928. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electrical parts, more particularly semi-conductor devices.

109929. General Electric Company. Improvements in or relating to capacitor dielectric.

109930. Veb Fotochemische Werke Berlin. A process for pretreating film supports. (21st December 1966).

109931. Jyoti Limited. Threshing machine. [Addition to No. 94919].

28th March 1967

109932. Kanai Lal Mallik. Amperometric titration apparatus with stationary electrode.

109933. Associated Electrical Industries Limited. Improvements in heat exchangers. (1st April 1966).

109934. Alfa-Laval AB. A method for the introduction, without impacts, of a liquid into a centrifuge as well as a centrifuge adapted to this purpose.

109935. Ventron Corporation. Improvements in use of a alkali nickel cyanides as catalists in the reduction of vast dyes with boronates.

109936. Westinghouse Electric Corporation. Dynamoelectric machines using ceramic permanent magnets.

109937. Itek Corporation. Data storage systems.

109938. Fierro Esponja S. A. Ore treating apparatus.

109939. Ortho Pharmaceutical Corporation. Aza-steroids and method of preparation.

109940. General Electric Company. High pressure saturated vapor sodium lamp containing mercury.

109941. General Electric Company. Improvements in or relating to preparation of poly-(1, 4-phenylene ethers) by thermal means.

109942. Hooker Chemical Corporation. Cathodic protection of reinforcing metals in electrolytic cells.

109943. Hooker Chemical Corporation. Support system for electrolytic cells.

109944. E. I. du Pont de Nemours and Company. Substituted 2-aminobenzimidazoles.

109945. Sumitomo Chemical Company Ltd. Urea synthesis method.

109946. Hitachi Ltd. Controlling device for electric motors.

109947. Dolomitwerke GMBH. Process for the manufacture of fire proof moulded (or shaped) bodies from calcined dolomite.

109948. Allied Chemical Corporation. Process for moulding large hollow objects.

109949. M. & T. Chemicals Inc. Novel process.

109950. M. & T. Chemicals Inc. Process for the preparation of silicon (Compounds).

109951. Monsanto Company. Blends of N-alkyl-N'-aryl phenylene diamines and a carrier.

109952. Aktiebolaget Kamyr. Cellulose bleaching plant and method of bleaching cellulosic pulp.

109953. D. P. Ahuja. Preparation of synthetic penicillins.

109954. B. H. Gerde. A device at a foundation of in particular great buildings.

109955. M. Berghgracht. Process for the manufacture of paper or similar multi-ply bags, and bags obtained by the process.

109956. J. Weinberger. Silicate facings.

109957. H. J. Longley, O.B.E. Improvements in or relating to fabrication and/or erection of buildings or structures.

109958. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the manufacture of phenyl esters and phenol from benzene.

109959. Diosgyori Gepyar. Improvements in or relating to closed-circuit hydraulic remote-control devices.

109960. International Rectifier Corporation. Process for diffusion of contoured junction.

109961. Minerals & Chemicals Philipp Corporation. Grinding method.

109962. Southwest Patents, Inc. Method of and an apparatus for displacing materials.

109963. Chemical Separations Corporation. Process for treating crude mineral solutions.

109964. Chemical Separations Corporation. Hydrolyzer process for steel pickling liquors.

109965. Toyo Koatsu Industries, Inc. Process for producing granular compound fertilizer.

109966. Societe D' etudes Scientifiques Et Industrielles De L'Ile De France. Process for preparing derivatives of N-substituted benzamides.

109967. Ciba Limited. Process for the manufacture of new 2-amino-2-imidazolines.

109968. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to elongated incandescent lamps.

109969. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to elongated incandescent lamps.

29th March 1967.

109970. E. Q. Sylvester. Mold construction.

109971. Norris Filters Limited. Improvements in or relating to fluid filters. (30th March 1966).

109972. Weaving Research & Textile Commission Agents Limited. Improvements in and relating to looms. (30th March 1966).

109973. Weaving Research & Textile Commission Agents Limited. Improvements in and relating to looms. (30th March 1966).

109974. Bassani S. p. A. Fuse-Holder.

109975. Bassani S. p. A. Protecting means composed of a differential magnetothermic switch and fuse-holder of high interrupting capacity.

109976. Standard Telephones and Cables Limited. Taping machine.

109977. S. K. Karanjia. Improvements in or relating to letter blocks, picture blocks and like toys.

109978. Ciba Limited. Process for the manufacture of acylamino compounds.

109979. Central Glass Co., Ltd. A process for preparing phosphoric acid.

109980. J. R. Geigy A. G. Process for the production of new phenylacetic acid esters.

109981. J. R. Geigy A. G. Process for the production of monoazo pigments.

109982. Shell Internationale Research Maatschappij N.V. Molluscicides. (31st March 1966).

109983. Caterpillar Tractor Co. Belt ejector bucket and control linkage therefor.

109984. Esso Research and Engineering Company. Production of coke.

109985. Union Carbide Corporation. Method of and apparatus for wrapping layered composite thermal insulation.

109986. Imperial Chemical Industries Limited. Manufacture of plastics tubing. (31st March 1966).

109987. Biotest-Serum-Institut GmbH. Process for the production of stable hepatitis-free serum.

109988. Pfizer Corporation. Antiviral compounds. (23rd June 1966).

109989. Mead Johnson & Company. 1-(2-dimethylaminoethyl) -1-phenylindene-n-oxide and salts thereof and the products produced thereby.

109990. The Tata Oil Mills Company Limited. Synthetic detergents in bar and cake form.

109991. Kanegafuchi Boseki Kabushiki Kaisha, and Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S.p.A. Tufted carpet and a method for producing said carpet.

109992. Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S. p. A., and Kanegafuchi Boseki Kabushiki Kaisha. Process for preparing polyamide composite filaments having an improved latent crimpability.

109993. Ministerul Industriei Petrolului. Liquid-vapour contact bubble plate with hydrodynamic valves.

30th March 1967.

109994. Wilhelm Stahlecker G.m.b.H. Method of securing flanges of the like, for example, to the housings of spinning of twisting spindles, and housings or the like made according to this method.

109995. Wilhelm Stahlecker G.m.b.H. Locking device for spindles of spinning or twisting machines.

109996. D. K. Dhand. The gravity neutraliser for dancing or ecstacy or hip-bath.

109997. The Dunlop Company Limited. Method for the manufacture of flexible sheet materials. (6th April 1966).

109998. The Dunlop Company Limited. Flexible sheet material. (6th April 1966).

109999. The Dunlop Company Limited. Flexible sheet materials. (6th April 1966).

110000. The Dunlop Company Limited. Improvements in or relating to rubberized cord material. (6th April 1966).

110001. Rhone-Poulenc S. A. Process for the preparation of a new antibiotic, and pharmaceutical compositions containing the antibiotic and its urea complex.

110002. Centre De Recherches De Pont-A-Mousson. Machine for centrifugally casting pipes.

110003. Abbott Laboratories. Erythromycin derivatives.

110004. The Dow Chemical Company. Novel styrene compounds, their manufacture and use.

110005. Chemische Werke Witten Gesellschaft Mit Beschrankter Haftung. Process for the manufacture of fine-grain copolyamides from terephthalic and isophthalic acid and aliphatic dicarboxylic acids. [Addition to No. 96923].

110006. M. M. Industries. Tape for carrying visible markings.

110007. Chemcut Corporation. Improvements in or relating to methods of etching and apparatus therefor. (24th October 1966).

110008. Toyoda Automatic Loom Works, Ltd. Spinning method and apparatus utilizing airstream.

31st March 1967.

110009. Shri Krishan Dass. The Radium-Signs and Radium Signboards.

110010. Universal Oil Products Company. Improved process for the separtion of hydrocarbons.

110011. Universal Oil Products Company. Preparation and use of crystalline aluminosilicates.

110012. Glaverbel. Improvements in or relating to light-transmitting materials with heat-reflecting properties.

110013. Imperial Chemical Industries Limited. New organic compounds and compositions containing them. (31st March 1966).

110014. Verlinde S. A. Hoisting apparatus. (12th May 1966).

Alteration of Date

109309. Ante-dated to 11th May 1965 under Section 5 of the Act.

109005. Ante-dated to 23rd June 1965 under Section 5 of the Act.

109610. Ante-dated to 29th June 1965 under Section 5 of the Act.

109846. Ante-dated to 21st June 1965 under Section 5 of the Act.

109845. Ante-dated to 21st June 1965 under Section 5 of the Act.

103350. The claim to priority date 13th January 1965 has been abandoned and the application dated as of 7th January 1966, the date of filing in India.

101322. The claim to priority date 28th August 1964 has been abandoned and the application as of 27th August 1965 the date of filing in India.

101779. Ante-dated to 27th September 1965 under Rule 3.

101778. Ante-dated to 27th September 1965 under Rule 3.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra., if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

96875. Shell Internationale Research Maatschappij N.V. A method of preparing a mixture consisting essentially of solid particles distributed in a liquid suitable for transport through a pipeline. Accepted on 30th March 1967.

Comprising forming within the liquid a coherent, interlaced matrix of thin pieces of a solid material which is substantially insoluble in the liquid, the matrix having over 90% by volume of spaces which are filled with the liquid, and distributing the solid particles within the matrix.

99466. T. V. Cherian and T. V. M. Swamy. New process for improving the bond strength between steel and concrete in reinforced cement concrete. Accepted on 13th February 1967.

Cold twisting the member and thereafter tempering it.

100001. Clupak, Inc. Machine glazed extensible paper and manufacture thereof. (25th February 1965). Accepted on 10th March 1967.

The web having substantial extensibility in excess of the primitive extensibility of the web in at least one direction.

100021. Porous Plastics Limited. Improvements relating to microporous sheet material. (12th June 1964). Accepted on 13th March 1967.

The mixture containing synthetic polymeric plastics, a solvent and a removable pore forming material is mixed thoroughly to a cohesive dough and formed into a strip the strip is heated at such temperature and for such times that substantially all the solvent is driven off.

100163. General Electric Company. Improvements in or relating to emulsion process for preparing polyphenylene ethers and products obtained thereby. Accepted on 21st March 1967.

An emulsion is formed from (a) 2,6-dimethylphenol in an organic water immiscible solvent (b) water (c) an emulsfying agent and (d) an amine-basic copper salt and the emulsion is reacted oxygen.

100164. General Electric Company. Improvements in or relating to electrical control system for regulating the speed and/or steam pressure in a turbine under conditions of changing demand. Accepted on 21st March 1967.

Comprising means furnishing an electrical error signal representing a deviation from a desired condition means summing and supplying a resultant signal to a valve control means and means feeding back the signal to the summing means to adjust for the change in turbine operating condition.

100178. D. Odawara. Rotary machine of blade type. Accepted on 21st March 1967.

An airtight rotor with a side wall is rotatably mounted in an outer casing and concentric therewith, antifriction means is provided between said airtight rotor and said outer casing.

100181. Shell Internationale Research Maatschappij N.V. Polyolefin products and their manufacture. (23rd June 1964). Accepted on 21st March 1967.

Polymerising an olefin in a reaction mixture comprisnig a Ziegler catalyst in admixture with a compound of a metal of Group 4A, 5A, or 6A and an organometallic compound of a metal of group 1A, 5A or 6A.

100210. Pilkington Brothers Limited. Improvements in or relating to the manufacture of flat glass. (23rd June 1964). Accepted on 22nd March 1967.

Comprises treating the glass surface with an acid and then treating with a compound of an element other than tin.

100231. Indian Oxygen Limited. Improvements in and relating to furnace lances. (26th June 1964). Accepted on 23rd March 1967.

A furnace lance comprising a central duct and fluid cooling inlet and outlet ducts coaxial with it the outlet portion of central duct.

100261. Velsicol Chemical Corporation. Pesticidal compositions. Accepted on 25th March 1967.

Comprising 2-methoxy-3, 6-dichlorobenzyl alcohol or an acylated derivative thereof in admixture with inert solid carriers, wetting agents or emulsifiers.

100335. Imperial Chemical Industries Limited. Surface modifying treatment of shaped articles made from polyesters. [Addition to No. 93931]. Accepted on 28th March 1967.

Meating a shaped article of linear crystalline polyester in the presence of a swelling agent for the polyester.

100343. Pechiney, Compagnie De Produits Chimiques Et Electrometallurgiques. Process for the preparation of crystallised neutral aluminium sulphate with a low water content. Accepted on 30th March 1967.

Consisting in causing a solution of aluminium sulphate in dil sulphuric acid to crystallise between 105 and 140°C, the composition of the solution plotted on triangular diagram being represented by a point situated inside a quadrilateral.

100415. P. C. L. Mistry. Improvements in and relating to folding cradle. Accepted on 28th March 1967.

The cradle is foldable into a compact unit as the four side frames are hingedly fitted with the swinging bed.

100445. Rhone-Poulenc S. A. Process for the preparation of an organopolysiloxane. Accepted on 23rd March 1967.

Reacting an organopolysiloxane with a glycol ether.

100455. Johnson & Johnson. Non-porous film backed adhesive tape and release coating. Accepted on 30th March 1967.

By copolymerising stearyl methacrylate with acrylomitrile.

100468. United States Rubber Company. Insecticidal compositions containing organic esters of sulfurous acid. Accepted on 23rd March 1967.

Comprising R-o-R'-o-S-o-R" and surface active agent, R' R" being aliphatic or aromatic radicals and R', is divalent cycloaliphatic radical.

100550. Siemens-Schuckertwerke Aktiengesellschaft. Method of providing spacing discs on the inner conducts of a coaxial cable, and apparatus therefor. Accepted on 29th March 1967.

A method wherein from supply means the wire is drawn intermittently through an injection moulding machine.

100588. Bio-Tronics Research, Inc. Electrical signal impressing apparatus for nervous system. Accepted on 29th March 1967.

Apparatus comprising means to provide a carrier signal, a modulator to modulate the carrier signal with a desired electrical signal to provide a control signal.

100650. P. Clausse. Improved method of forming a catchment for underground waters. Accepted on 28th March 1967.

Inserting into the selected port provided around the bottom portions of the wall of the lined shaft, a hollow perforated desanding device and forcing it outwardly into the water bearing layer inserting into the hollow of the device a desanding tube, applying a thrust to the desanding tube to fore the tube and the device into the water bearing layer intermittently interrupting the thrusting operation and admitting compressed air or water through the tube into the surrounding soil, cutting off the pressure and permitting silt and sand-laden water from the layer to flow each into the shaft and withdrawing the tube into the shaft when inflowing water is clear.

100659. Phillips Petroleum Company. Hydrocracking of high boiling range hydrocarbons. Accepted on 25th March 1967.

Hydrocracked in presence of catalyst consisting essentially of an acidic support impregnated with a member of the group consisting of the oxides and sulphides of (1) nickel and tungsten (2) nickel and molybdenum and (3) mixtures of (1) and (2).

100699. Laporte Titanium Limited, Improvements in and relating to a process and apparatus for the manufacture of titanium dioxide. (29th July 1964). Accepted on 23rd March 1967.

By reacting titanium tetrachloride with an oxidising gas in the vapour phase.

100753. United States Rubber Company. Insecticidal compositions. Accepted on 23rd March 1967.

Comprises a mixed sulphite diester of a phenol and a glycol ether and an alcohol or a phenol.

100803. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Azophthalocyanine dyestuffs process for preparing them, and process for dyeing textile material using said dyestuff. Accepted on 30th March 1967.

Wherein (A) diazonium compound of an amine, is coupled with a coupling component of the benzene naphthalene, pyrazolone of -ketocarboxylic acid arylamide series or (B) a phthalocyamine β sulphonic acid chloride is condensed with aminoazodyestuff.

100806. Velsicol Chemical Corporation. Herbicidal compositions and process for preparing new herbicisally active compounds. Accepted on 25th March 1967.

Comprising O-ethyl-O-phenyl-S (N. methoxy-N-isopropylacetamido) dithiophosphate or O-alkyl-S(N-alkoxy-N-alkyl carbamyl methyl) phenylthiolothionophosphonate and a carrier.

100814. Aktiebolaget Bofore. Device for steering system of track laying vehicles. Accepted on 21st March 1967.

Both the additional input movement to the driving wheel gears and the steering clutches and steering brakes belonging to the steering system can be directed by one and the same control member.

101296. Mel Seymour Rosen. Cutting device with reciprocating blades. Accepted on 25th March 1967.

Comprising a pair of thin blades with cutting edges extending side by side relation, an electric motor driving a driving head on a shaft, a pair of linearly reciprocable connecting rods, pins securing the connecting rods to the blades.

101322. High Duty Alloys Limited. Improvements in or relating to aluminium alloys and articles made therefrom. Accepted on 27th February 1967.

An aluminium alloy comprising copper 5 to 7%, titanium 0.01 to 0.3%, manganese 0.01 to 0.3%, silicon 0.1 to 0.35, iron 0 to 0.4, magnesium 0.1% to 0.5%, silver 0 to 0.5%, aluminium remaind.

101433. Graviner (Colnbrook) Limited. Improvements in or relating to temperature responsive devices. (25th September 1964). Accepted on 3rd March 1967.

Comprising two elongated spaced conductors having dissimilar electro potentials and a temperature sensitive medium extending between the two conductors.

101478. The General Electric Company Limited. Improvements in or relating to the formation of coatings on germanium bodies. Accepted on 7th March 1967.

By a method in which the body is heated above 400°C while exposed to an oxidising atmosphere containing water vapour.

101541. L. Givaudan & Cie S. A. Indan compounds and process for the manufacture thereof. Accepted on 13th March 1967.

Nitrating 1, 1, 4, 6-tetraalkylindan to yield 5, 7-dinitro-1, 1, 4, 6-tetraalkylindan.

101542. L. Givaudan & Cie S. A. A composition for controlling weeds and a method for the preparation thereof. Accepted on 13th March 1967.

Comprises 1, 1, 4, 6-tetra alkyl-5-indanylakylketone dispersed or dissolved in an agricultural carrier.

101543. L. Givaudan & Cie S. A. A composition for controlling weeds and a method for the preparation thereof. Accepted on 13th March 1967.

Comprises 1, 1, 4, 5-tetra alkyl-7-isopropylindan dispersed or dissolved in an africultural carrier.

101643. C. S. Rao. Improvements in or relating to clothes hanger. Accepted on 20th March 1967.

Comprising a roller of wood suspended from a frame, the said frame consisting of two lower supporting members supporting the said roller and two upper suspending members holding the said supporting members.

101657. Chemokomplex Vegyipari Gep Es Berendezes Export-Import Vallalat. Mechanized Heavy duty filter presses. Accepted on 20th March 1967.

Having an inflatable bladers connectable to a pressure agent and disposed in a filter member, where in the outer surface of said bladder walls are covered with filter means unified therewith.

101675. Escher Wyas G.m.b.H. Improvements in rotary valves for batch-charging loose materials into pressure chambers. Accepted on 22nd March 1967.

Having a pressure seal in the form of a sealing bush bounding the inlet and carrying inside the space between housing and rotor an arcuate surface portion complementary to rotor and extending part circumferentially thereof the bush being movably mounted in the housing to adjustably press the arcuate surface into sliding contact with the rotor.

101689. E. I du Pont de Nemours and Company. A cellular polylactam article. Accepted on 23rd March 1967.

Comprising a solids content of 10 to 80% by volume, 5 to 50% by weight of such solids being short fibres of inert material wherein such fibres being dispersed in the walls of the cells of the article and long dimension being parallel to the surface of the cell.

101700. The British Petroleum Company Limited. Separation of straight chain hydrocarbons from mixtures. Accepted on 23rd March 1967.

Contacting the mixture with graphite having a surface area of at least 50 $m^2/gm.$, selectively to absorb the normal hydrocarbons.

101701. The British Petroleum Company Limited. Separation of straight chain hydrocarbons from mixtures. Accepted on 23rd March 1967.

Contacting the mixture with a suitable layered solid material selectively to adsorb the normal hydrocarbons.

101749. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to transistor receiving circuits. Accepted on 25th March 1967.

Comprising two intermediate frequency transistors connected in cascade and then followed by a detector stage from which an automatic gain control voltage is derived which is applied to the second of the said transistors.

101753. C. W. Cheney & Son Limited. Improvements relating to handles for articles of luggage. (7th October 1964). Accepted on 27th March 1967.

Comprising a relatively rigid handle proper provided with inturned co-axial trunnion portions spanned by a mounting plate which is substantially tubular so as to be captive to the handle.

101755. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Packing container for transporting valuable and/or fragile goods. Accepted on 21st March 1967.

Comprises two or more closed hollow bodies which complement each other to form the packing and which are provided on the inside with cavities for article to be packed.

101771. Rheinstahl Henschel Aktiengesellschaft formerly known as Henschel Werke Aktiengesellschaft. Improvements in or relating to water tube steam generator. Accepted on 25th March 1967.

Consisting an upper drum as steam collector and lower drum or distribution pipes for water distribution, heating surface is formed by at least one bank of water tubes in such a manner so that flue gasses can pass transversely to the tubes.

101778. Dunlop Rubber Company Limited. Material guiding device. (26th September 1964). Accepted on 27th March 1967.

Comprising a gauging means operably engagable with two guide members to adjust them equal to the width of the length of material to be conveyed.

101779. Dunlop Rubber Company Limited. Apparatus for supplying flexible sheet material. (26th September 1964). Accepted on 27th March 1967.

Comprising a storage unit for the sheet material whose one end being held by material holding means, the said means being operable to release the material from the storage unit to permit a supply of material.

101782. Ministerul Industriei Petrolului Si Chimiei. Process and apparatus for the continuous production of acetylene in wet state. Accepted on 23rd March 1967.

Process for the production of acetylene by the action of water or calcium carbide characterised in that it uses carbide powder and carbide of small granulation up to 4 mm resulting as a waste in the process of carbide production.

101787. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to heat reflection filters. Accepted on 21st March 1967.

On a support transparent to visible light is deposited a thin metal layer having a surface resistance lying between 2 and 20Ω per square and a conductivity of at least 5.10 Ω—1, cm—1 and a dielectric coating having refractive index between 1.6 and 3 on the metal layer.

101790. Palitex Project-company G.m.b.H. Yarn-ballooning multiple twist spindle. Accepted on 27th March 1967.

Having means for retaining the bobbin carrier and a protective pot therefor comprising a permanent magnet in a fixed position outside the balloon facing co-operating permanent magnet carried by the pot about half way of the pot.

101912. Ciba Limited. Photographic materials for the silver dyestuff bleaching process. Accepted on 21st March 1967.

Comprising in one layer at least one dyestuff obtained by coupling a diazo compound of the benzene series which contains an $-NH_2$ group with an aminohydroxy naphthalene sulphonic acid.

101977. Shell Internationale Research Maatschappij N. V. Liquid discharge device for gas-liquid contacting trays. Accepted on 28th March 1967.

Characterised in that each discharge device being sub-divided into two channels one of which is a slit shaped channel, near the discharge opening of the device the liquid, together with a plate located under that discharge opening forms a screen which acts as a barrier preventing gas from flowing through the discharge device.

102041. The Cementation Company Limited. Anchors for structural tensile members. (13th October 1964). Accepted on 28th March 1967.

A rigid load transmitting sleeve is secured by wedging around an uncovered length of the member to enclose the uncovered length and a small unstripped length and is sealed to the unstripped length by flexible sealing means.

102157. Imperial Chemical Industries Limited. Method of packaging articles. (27th October 1964). Accepted on 23rd March 1967.

Having at least one end that is of greater diameter in one direction than in a direction at right angles thereto that comprises encircling the article in a wrapper formed of heat shrinkable plastic film.

102200. M. W. Lalchandani. Improvements in or relating to quick action standard drilling jigs. Accepted on 21st March 1967.

Comprising a jig body on which a bottom plate is fixed and the jig being provided at the centre with guide bars and rack pillar freely movable inside the jig body, one horizontal pinion shaft fitted inside said body.

102205. General Electric Company. Improvements in or relating to electric lamp with integral fuse structure. Accepted on 30th March 1967.

An electric lamp including a sealed envelope having a pinch seal and a fuse wire member at the exterior of the pinch seal electrically connected at one end of contact member and its other end to lead-in-wire conductor.

102240. N. P. Philips Gloeilampenfabrieken. Improvements in and relating to small electric machines. Accepted on 27th March 1967.

Rotor is journalled on one side in one limb of a rectangular sliding member and the other side in a limb of a second rectangular sliding member, the other two limbs of said members being held by the stator.

102266. Siemens & Halske Aktiengesellschaft. Improvements in or relating to carrier terminal apparatus. (23rd August 1965). Accepted on 22nd March 1967.

Comprising channel modulators and channel filters.

102302. Associated Electrical Industries Limited. Improvements relating to speed measurement of moving material. (28th April 1965). (Addition to No. 102283). Accepted on 30th March 1967.

Equipment for the measurement of moving material including means for ascertaining the rate of occurance of marks as a measure of the speed of the moving material past the detecting position.

102414. American Cyanamid Company. Process for the preparation of a dichloropyrazine. Accepted on 29th March 1967.

Reacting chlorine with 2-chloropyrazine in 0.3 mole of polar organic solvent at 40°—120°C in presence of 0.02 mole percent of water and 0.05—4 moles of phosphorous oxychloride per mole of 2—chloropyrazine.

102441. Haddon Concrete Company Limited. Improvements in or relating to the cladding of structural steelwork with fire protective material. Accepted on 25th March 1967.

Comprising a series of blocks of at least two different sectional forms, one of said forms having a U-form shape and including a pair of arm portions, at least one of said arm portions including a projection, at least one other of said forms having a locating portion, one side of which bears against the member and the other side of which has a recessed region.

102558. Luwa AG. Broken-end collecting device for spinning machines. Accepted on 25th March 1967.

Characterised by the fact that the sleevesforms a cylindrical joint cavity which co-operates with a hallow cylindrical articular member which sealingly engages it and is firmly connected to the connecting tube defining a swivelling axis which is substantially parallel with the axis of the drawing roller.

102569. International Standard Electric Corporation. Shunting route lever system permitting a selective switching-in of the length of the track. Accepted on 27th March 1967.

A portion of network including several sections and their associated shunting signals is settable and/or lockable in a route by single operation of route selecting keys.

102585. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of anthraquinone dyestuffs. (5th August 1965). Accepted on 22nd March 1967.

Quinone-diamine sulphate is reacted with a mixture containing sodium benzene-sulphinate, anhydrous sodium acetate and glavial acetic acid.

102599. C. A. V. Limited. Liquid fuel pumping apparatus. (24th November 1964). Accepted on 31st March 1967.

An apparatus having a second resilient means which acts intermediate the first resilient means and an abutment.

102608. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for preparing a blue acid anthraquinone dyestuff. [Addition to No. 96220] Accepted on 22nd March 1967.

A compound having the β-hydroxyethyl sulfonyl groups is esterified at a temperature above room temperature with amidosulphonic acid in the presence of an inert organic solvent.

102749. Hewitt-Robins International S. A. Articulated cascade conveyor system and apparatus. Accepted on 23rd March 1967.

Comprising first and second units connected together providing relative pivotal movement the first unit being supported on wheels at one end and on the second unit at the other end.

102750. Hewitt-Robins International S. A. Extensible belt conveyors. Accepted on 23rd March 1967.

Including an intermediate section extending along a length of the belt a troughing roller assembly below the belt and movable upright standards with inclined arms supporting the said roler assembly.

102722. Fichtel & Sachs A. G. Hydro-pneumatic spring suspension element with automatic level-regulating device. Accepted on 21st March 1967.

In order to limit the pressure in the operating chamber to a certain pre-selected maximum permissible level a pressure sensing device in provided which is acted on by the pressure in said chamber.

102907. R. T. C. Engineering Works (P) Ltd. Liquid elevating jet device. Accepted on 21st March 1967.

Liquid elevating jet assembly connected to a centrifugal pump characterised in that the said jet assembly is movable in upward and downward direction inside wells, rivers or like with the fluctuation of water level.

102935. (Mrs.) Beryl Alice Enid DePenning. Circuit arrangement for control buttons in panel type control machines. Accepted on 27th March 1967.

A common test relay is energized by the action of contacts of individual buttons or button relays and upon being energized enables the initiation of the establishment of a route and renders the group button ineffective.

102945. Hartwell Corporation. Adjustable clamp for detachably securing cables. Accepted on 31st March 1967.

A clamp having a lock member, a strap member attached at one end of the lock member and an integral fastener.

103027. Institut Organicheskoi Khimii Akademii Nauk USSR. Apparatus for carrying out radiation-chemical and microbiological investigations. Accepted on 28th March 1967.

Comprises a split container with a collar and cylinder-shaped hollow irradiator as well as a working chamber having a lower and upper plugs making up a rod said working chamber being mounted in the irradiator by means of lifting machanism said rod being devided into two parts touching each other.

103076. Ciba Limited. A process for the production of new ureas and agents containing them. Accepted on 28th March 1967.

4-chloro-3trifluoro methylphenylisocyanate is reacted with 4-chlorobenzylamine.

103237. James Mackie & Sons Limited. Improvements relating to carding machines. (31st December 1964). Accepted on 27th March 1967.

The lag comprises a backing portion and a facing of alluminium or alluminium alloy, the latter serving to hold and support the pins.

103350. D. H. Spalding. Improvements in or relating to pressure exchangers. Accepted on 23rd March 1967.

Comprising a cellular structure and an endplate structure having ports communicating with the cells, surfaces on the structures having a clearance between them to permit relative movement between structures and providing a path for leakage of gas to a low-pressure zone.

103375. Standard Telephones and Cables Limited. Improvements in or relating to the packaging of a semiconductor device. Accepted on 29th March 1967.

Which includes the steps of placing the substrate of device within a web comprising of a frame larger than substrate and having inwardly extending electrically conducting strips each terminating over a different one of terminal arears, directly bonding one of terminal arear, providing a sealing enclosure wholly around substrate.

103499. Ciba Limited. New disazo pigments, processes for their manufacture and organic materials pigmented therewith. Accepted on 28th March 1967.

Wherein a Dehalide of a dicarboxylic acid is condensed wtih an aminobenzene or d diazo compound of an amine is coupled with diacetoacetylarylenediamine.

103503. Ruti Machinery Works Ltd. Selvedge-forming device on a weaving loom. Accepted on 30th March 1967.

Having a shed forming wheel, a crossing thread wheel which is coupled with the shed-forming wheel and both of them rotate in the same direction.

103510. Shell Internationale Research Maatschapij N.V. Process for the preparation of vinyl or vinylidene halide polymers-containing compositions suitable for being worked-up to impact resistant products. Accepted on 28th March 1967.

Comprising mixing compositions comprising homopolymers and/or one or more copolymers of vinyl and/or vinylidence halides with rubber like copolymers of one or more alienes and one or more esters of bivalent or multivalent propylene carboxylic acids or homologues thereof in which atleast one carboxyl group is attached to nonclously bond carbon and atleast one carboxyl group to a doubly bound carbon.

103621. Brown, Boveri & Company Limited. Gasblast circuit breaker with multiple interruption. Accepted on 27th March 1967.

When exhaust valve is open auxiliary switching points are closed and the ends of the auxiliary switching contacts extend into a space which when the exhaust valve is open is in communication with the atmosphere.

103648. Rolls-Royce Limited. Improvements in or relating to gas turbine engines. (30th January 1965). Accepted on 23rd March 1967.

A first compressor means first combustion equipment and a first turbine means drivingly connected to the first compressor means, a second compressor means, and second turbine means drivingly connected to a compressor means of the engine.

103661. Licencia Talalmanyokat Ertekesito Vallalat. Spark plugs. Accepted on 23rd March 1967.

A central electrode, a casing having a bore therein and having a further electrode spaced para the central electrode by a spark plug, and a hollow elongated insulator having a longitudinally extending wall one portion only of which being secured throughout its length in a gaslight manner in said bore.

103677. Stamicarbon N.V. The preparation of ε-caprolactone. Accepted on 28th March 1967.

Comprises feeding benzoldehyde to oxidation zone containing cyclohexanone to oxidise in liquid phase in presence of molecular oxygen.

103678. Stamicarbon N.V. The preparation of ε-caprolactone. Accepted on 28th March 1967.

Oxidising cyclohexanone in liquid phase containing molecular oxygen in presence of benzoldehyde a iron salt catalyst.

103682. Shell Internationale Research Maatschappij N.V. Process for the chlorination of acetophenones. Accepted on 30th March 1967.

Acetophenone halogenated or nitrated in the nucleus is reacted with chlorine in the presence of a solvent consisting of at least 50% by weight of formic acid.

103695. General Electric Company. Improvements in or relating to liquid metal switch. Accepted on 27th March 1967.

Comprises enclosure means providing a closed chamber having spaced electrode faces included therein, supply means communicating with said chamber adapted to selectively supply a conductive fluid thereto, and a discharge passageway.

103701. Georges Lesieur & Ses Fils. Improvements in or relating to methods of and devices for circularly sectioning plastic objects, notably for trimming bottles. Accepted on 29th March 1967.

Characterized in that simultaneous movements of translation and rotation are imparted to the object and the said object during combined movement is pressed against a cutting blade.

103769. P. C. L. Mistry. Improvements in or relating to hydraulic water pump. Accepted on 25th March 1967.

Comprising a water tank, a turbine and a plunger type pumping set, said tank is erected at a substantial height, said turbine being fitted at a level lower than the tank and said pumping set installed near the turbine comprises pumps fitted in the well.

103795. A. Ehrenreich & Cie. Elastic packing caps. Accepted on 23rd March 1967.

An elastic packing cap or bellows in the form of a bell, the bell being reduced towards the case from an inside diameter to the diameter which is to be surrounded.

103806. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to axial bearings. Accepted on 25th March 1967.

The member provided with grooves comprises two concentrically arranged patterns of grooves separated from each other and extending opposite each other which have a geometry such that in both directions of rotation of the pressure member the bearing has a relatively different load capacity.

103906. Ciba Limited. Photographic materials for the silver dyestuff bleaching process. Accepted on 30th March 1967.

Contains a dyestuff prepared by reacting pyridine 2,6-dicarboxylic acid dichlorids with an aminomonoazo dyestuff.

103907. Ciba Limited. Photographic Material for the silver dyestuff bleaching process and process for its manufacture. Accepted on 30th March 1967.

An emulsion that contains an aqueous emulsion of a solution of a hydrophilic resin and a dye bleaching catalyst in an organic solvent is dispersed in a photographic collord layer and the dispersion is used for coating a base and the layer is dried.

103934. Standard Telephones and Cables Limited Transistors and method of making same. (31st March 1965). Accepted on 27th March 1967.

Having source and drain regions of one conductivity type, the separation of which is defined by the thickness of an epitaxially grown layer of semiconductor materials of opposite conductivity type between them.

104009. Kaiser Aluminum & Chemical Corporation. Cementitious composition and refractory batch comprised thereof. Accepted on 25th March 1967.

Consisting essentially of finely divided magnesia, an amount of magnesium sulphate and a B_2O_3 yielding material in such amount that the weight ratio of $MgSO_4$ to B_2O_3 is less than 4 : 1.

104069. Nuquip Limited. Float-operated filling valve. (26th February 1965). Accepted on 31st March 1967.

A container having a replenishing means comprising inlet valve means communicating with an external supply of fresh liquid, a hollow float arranged within the container and an extracting means communicating with the interior of the float.

104097. W. K. Wasdell. Improvements in shock absorbers or vibration dampers (24th March 1965). Accepted on 30th March 1967.

Characterised by means permitting atmospheric pressure to act on at least the radially innermost portion of the seal element with provision for at least this innermost portion to slide axially within the working chamber under the resultant of the opposed atmospheric pressure and liquid pressure within the working chamber.

104154. Eaton Axles Limited. Mechanism for shifting a power transmitting gear element between power transmitting positions. Accepted on 27th March 1967.

Comprising a piston and cylinder mechanism including a piston member and a piston rod, and a rigid linkage connecting the piston rod to the gear element.

104186. Associated Electrical Industries Limited. Improvements in spark gap electrodes for use in electric arc extinguishing devices. (19th March 1965). Accepted on 22nd March 1967.

Comprising a composite electrode having a spark surface and an arc-run surface, said spark surface being provided by a tip of electrically conductive material.

104278. Wright Rain Limited. Improvements in or relating to pipe couplings (13th March 1965). Accepted on 27th March 1967.

Comprising a housing defining a socket for receiving an end of a pipe, a member pivotally mounted on the housing and movable between a first position in which the member will engage outer cylinder surface of a pipe and a second position in which said member is disengaged from said surface.

104318. Beclawat of India Limited. Improvements in or relating to a device for facilitating the raising and lowering of a sliding shutter, such as of a window or the like, & sliding shutters facilitated by the said device. Accepted on 27th March 1967.

Comprising a channel fixed to the sash of the shutter a spring casing rigidly fixed to said channel, a compression spring house within and a cam pivoted to one end of said casing.

104383. Lips N.V. A device for sealingly transmitting a liquid under pressure from a stationary structural part into a rotating shaft of the reverse. Accepted on 28th March 1967.

To one of the rotating parts a ring is connected, housing two end faces perpendicularly to the shaft, the ring being enclosed between annular bodies connected to the other of the mutually rotating parts and that the ring is perforated.

104400. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to projection lamps of the kind having a flattened light output window. Accepted on 27th March 1967.

Ratio between the maximum wall thickness of the domed extension and the minimum wall thickness of the light output window is greater than 2.5 and smaller than 10.

104501. D. V. Chitaley. Improvements in or relating to the method for preservation of specimens and preparation of transparencies therefrom. [Addition to No. 91410]. Accepted on 21st March 1967.

Characterised in that a colour less oil of mineral or organic origin is used for impregnating the specimen.

104506. Samco-Strong Limited. Improvements in or relating to knife assemblies. Accepted on 31st March 1967.

A reilient means for securing a plurality of knives on the base plate in such a manner that they are capable of transverse movement towards and away from one another.

104544. Ciba Limited. New monoazo pigments, processes for their manufasture and organic materials pigmented therewith. Accepted on 30th March 1967.

A process for the manufacture of monoazo pigments comprises condensing a carboxylic acid halide with a monoamine.

104598. Ceskoslovenska akademie ved. Hydrogel contact lens. Accepted on 23rd March 1967.

Wherein at least one hole is provided any where beyond the optical centre with a maximum diameter to mm and total cross-section surface about 0.02%—5% of the lens surface.

104667. Toyo Koatsu Industries, Incorporated. Method of synthesizing urea. Accepted on 25th March 1967.

Comprises passing an ammonia synthesis raw material gas to a water gas shift zone, cooling the gas obtained compressing and washing the compressed gas with liquid ammonia and a medium capable of dissolving ammonium carbamate to form an absorbate, maintaining the composition of the absorbate being maintained at 2.0 to 3.6 mols of ammonia per mol of carbon dioxide which is then converted to urea by conventional methods.

104805. British Insulated Callender'S Cables Limited. Improvements in electric cables. (14th April 1965). Accepted on 27th March 1967.

Filler comprising thin polyolefin film randomly crushed to form a body having a density of at least 65% of the density of the polyolefin from which the film is made.

104954. International Business Machines Corporation. Data processing system. Accepted on 27th March 1967.

Comprising a data processor, a main instruction storage device containing instructions for the control of processor when a natural program is supplied to processor and a supplementary instruction storage device containing instructions for the control of processor when an unnatural program is supplied to system.

105017. Algemene Kunstzijde Unie N. V. an improved mixing apparatus. Accepted on 23rd March 1967.

Plurality of containers each having their lower ends closably connected to a common outlet, an inlet leading into one of the containers and connections between the containers at different levels.

105235. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing electric in candescent lamps or flashlight lamps. Accepted on 27th March 1967.

Lamp vessel is severed in a zone lying between two light sources so that two separate closed lamp vessels are formed.

105290. S. B. Patel. Improvements in or relating to bridge construction. Accepted on 28th March 1967.

Applying kentledge to the hollow of the well section through the medium of a light steel dome or like lid by evacuation of air entrained between the dome and the well section.

105478. Western Electric Company, Incorporated. Production of protective films on solid substrates. (10th December 1965). Accepted on 21st March 1967.

Comprises providing a moderate density gas plasma of nitrogen or methane in contact with the substrate which forms the anode and a cathode formed of the element which is to be cation of the nitride or carbide, applying a direct current voltage of at least 125 volts between the anode and cathode and applying a radio frequency signal of at least 50 kilocycles per second and a voltage greater than the direct current voltage to interface between cathode and the plasma so that uniform deposition of nitride or carbide on the substrate takes place.

106068. M. Ladney Jr. Improvements in the flow coating of workpieces. Accepted on 21st March 1967.

A plurality of workpiece support members, means for rotating each of said work support members a nozzle support at the flow coating zone, a row of nozzles supported on said nozzle support means for oscillating nozzles.

106506. Cominco Ltd. Process for pre-conditioning lead or lead-alloy electrodes. Accepted on 31st March 1967.

Comprising an electrolyte containing fluoride ions, electrolyzing said electrolyte using a lead or lead alloy anode, and an inert gas, and thereafter recovering the preconditioned anode.

109005. Indian Oxygen Limited. Improvements in and relating to furnace lances. (28th August 1964). [Divisional date 23rd June 1965]. Accepted on 23rd March 1967.

Helical members and baffle are arranged and separate incoming cooling fluid from outgoing fluid and assist effective circulation of cooling fluid around the branch ducts and nozzle surfaces during operation.

109309. T. V. Cherian and T. V. M. Swamy. New process for improving the bond strength between steel and concrete in reinforced cement concrete. [Divisional date 11th May 1965]. Accepted on 13th February 1967.

Twisting and tempering simultaneously the member.

109610. Imperial Chemical Industries Limited. A dispersion of a polymer solution in water suitable for the surface modifying treatment of shaped articles. [Divisional date 29th June 1965]. Accepted on 28th March 1967.

Comprises a graft or block copolymer dispersed in a solvent having at least one swelling agent, said dispersion being stabilised by at least one dispersing or surface active agent.

109845. D. Odawara. A rotary machine of the blade type. [Divisional date 21st June 1965]. Accepted on 21st March 1967.

Each of the blades consists of more than two members one sliding into another radially.

109846. D. Odawara. An internal combustion engine, especially a rotary engine. [Divisional date 21st June 1965]. Accepted on 21st March 1967.

Wherein a blower having blades is provided in the fuel inlet passage between the engine and a fuel mixing device, the fuel vaporised in this device being arranged to pass through said blades.

Opposition Proceedings

(1)

An opposition has been entered by Johnson & Johnson of India Limited to the grant of a patent on application No. 98024, made by Depak Jayantilal Gandhi.

(2)

An opposition has been entered by Bhim Sain Ratta to the grant of a patent on application No. 98415, made by Indicators Manufacturing Company.

(3)

The opposition entered by Kores (India) Limited to the grant of a patent on application No. 91495, made by Kores Manufacturing Company Limited, as notified in Part III, Section 2 of the Gazette of India, dated the 18th December 1965 has been treated as withdrawn.

(4)

An opposition entered by Karamchand Premchand Private Ltd. to the grant of a patent on application No. 91584, made by Veb Arzneimittelwerk Dresden, has been treated as withdrawn.

Amendment Proceedings

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Council of Scientific And Industrial Research, Rafi Marg, New Delhi-1, India, an Indian Registered body incorporated under the Registration of Societies Act, (Act XXI of 1860) seek leave to amend the description and claims in the specification in respect of patent application No. 95305. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

Appeal Proceedings

(Section 9)

An Appeal to the Central Government filed by Council of Scientific and Industrial Research against the decision of Joint Controller of Patents and Designs on opposition to the grant of a patent on application No. 64716 which was notified in Part III, Section 2, of the Gazette of India, dated the 11th September, 1965 has been allowed and a patent will be sealed on the basis of the revised specification.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 74247.—J. T. Baker Chemical Company.

The patent ceased on the 25th November 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 4th March 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 27th May 1967.

(2)

An order has been made on the 28th February 1967, restoring the patent No. 68995, dated as of the 9th September 1959 granted to American Radiator & Standard Sanitary Corporation for "hermetic motor cooling by direct expansion of system refrigeran, into mo or".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. Nos. 129798, 129800 and 129801. Mistry Bros., 338, S. Vallabhbhai Patel Road, Munchharam Building, Bombay-4, State of Maharashtra, India an Indian Partnership Firm. "A chair", November 23, 1966.

Class 1. Nos. 129939 to 129941. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18, (Maharashtra), "Pendant", December 15, 1966.

Class 1. Nos. 129942 and 129943. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Ear-top", December 15, 1966.

Class 1. No. 129944. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Necklace", December 15, 1966.

Class 1. No. 129945. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Button", December 15, 1966.

Class 1. No. 129946. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Brooch", December 15, 1966.

Class 1. No. 130017. Poly-Profile Corporation, An Indian Partnership Firm, 94, Medows Street, Fort, Bombay-1, Maharashtra, India, "A cabinet", December 26, 1966.

Class 3. No. 129984. Dunlop Rubber Company Limited, a British Company, Fort Dunlop, Erdington, Birmingham 24, England, "a tyre for a vehicle wheel", August 24, 1966. (U.K.).

Class 3. No. 130003. Bright Brothers Private Limited, a company incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Chairs", December 22, 1966.

Class 3. No. 130029. Jaggy & Company, 12, Rampart Row, Fort, Bombay 1, Maharashtra State, India, an Indian Company, "Small torch", December 28, 1966.

Class 13. Nos. 129779, 129781, 129783, 129784, 129786 to 129790, 129792 and 129793. The Shree Niwas Cotton Mills Ltd., an Indian Firm, Delisle Road, Bombay 13, "Cotton Piecegoods", November 22, 1966.

Class 13. Nos. 129985 to 129987. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", December 21, 1966.

Class 13. Nos. 130021 to 130024. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay 1, "Cotton textiles", December 27, 1966.

Class 13. Nos. 130046 to 130062. Jivajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "textile goods", January 3, 1967.

Copyright Extended for a Second Period for Five Years.

Design No. 114879 Class 1.

Design No. 115569 Class 1.

Copyright Extended for a Third Period of Five Years

Design No. 93367 Class 3.
Design No. 93368 Class 3.
Design No. 93369 Class 3.
Design No. 93370 Class 3.

Patents and Designs

Calcutta, the 22nd April 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

1st April 1967

110015. M. D. Bhate. An automatic control for unbreached supply for 230 volts operation.

110016. Westinghouse Sethuramon Insulators of India Limited. Etal "Lightning arrester".

110017. Westinghouse Sethuramon Insulators of India Limited. "Innislightning arrester".

110018. Westinghouse Sethuramon Insulators of India Limited. "Opshal etalspark gap device'.

110019. Westinghouse Sethuramon Insulators of India Limited. "Beck etal-lightning arrester".

110020. Westinghouse Sethuramon Insulators of India Limited. "Lightning arrester."

110021. Westinghouse Sethuramon Insulators of India Limited. "Lightning arrester".

110022. Westinghouse Sethuramon Insulators of India Limited. "Spark gap device".

110023. Westinghouse Sethuramon Insulators of India Limited. "Beck-lightning arrester".

110024. Westinghouse Sethuramon Insulators of India Limited. "Moisture-resistant lightning arrester valve block".

110025. Westinghouse Sethuramon Insulators of India Limited. "Lightning arrester".

110026. Ciba Limited. Manufacture of cycloaliphatic pyrimidines.

110027. Turner & Newall Limited. Improvements in metal columns. (2nd April 1966).

110028. Turner & Newall Limited. Improvements in steel framed houses. (2nd April 1966).

110029. Allied Chemical Corporation. Process for decomposing aluminium nitrate nonahydrate. (15th July 1966).

110030. The Firestone Tire & Rubber Company. Article of manufacture.

110031. Forsvarets Fabriksverk. Device of inflaming large-bore propelling charge.

110032. I. M. Diller. Method and apparatus for the activation of an electrolytic cell.

110033. Schubert & Salzer Maschinenfabrik Aktiengesellschaft. Process and device for stopping and restarting of filament band spinning device.

110034. Tractel Tirfor India Private Ltd. Improvements in or relating to steel wire rope.

3rd April 1967

110035. Tarini Kumar Pal. Bimetallic offset printing plate having aluminium as base metal.

110036. P. T. Reddy and A. V. Rao. A device for preventing burning of three phase induction motor due to single phasing or low voltage.

110037. N. A. Chandrabhanu and K. S. P. M. Pillai. Extraction of tanning materials from cashew skin, viz., the testa covering the seed kernel of anacardium occidentale.

110038. H. B. Khimji. Improvements in or relating to pumps for handling fluids and more particularly mineral oils and corrosive fluids or the like.

110039. C. R. Oberoi. Auto-accident arrestor.

110040. U. N. Kashyap. An improved 3 point 5 amp plug. [Addition to No. 98333].

110041. U. N. Kashyab. An improved 2 point 5 amp plug. [Addition to No. 98332].

110042. U. N. Kashyap. An improved 3 point 15 amp plug. [Addition to No. 98334].

110043. Uralsky Nauchno-Issledovatelsky I Proektny Institut Stroitelnykh, Materialov. A method for manufacturing metal silicate pipes.

110044. Uralsky nauchno-issledovatelsky i proektny institut stroitelnykh materialov. A method for manufacturing metal silicate members of pipe-lines.

110045. General Electric Company. Lamp phosphor adherence.

110046. General Electric Company. Improvements in or relating to apparatus and process for purge gas consumption.

110047. American Cyanamid Company. Alkyleneindoles and method for their preparation.

110048. American Cyanamid company. Oxazepines and thiazepines.

110049. Combustion Engineering Inc. Method and apparatus for fabricating a resilient sheet metal duct.

110050. Vsesojuzny nauchno-issledovatelsky i konstruktorsky institut avtogennago maschinostroenia. A device for supplying powdered materials by the aid of a compressed gas current.

110051. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of 9β, 10α-steroids.

110052. The British Petroleum Company Limited. Improvements in solid lubricant dispersions. (4th April 1966).

110053. Estrela Batteries Limited. Improvements in or relating to primary electric dry cells.

110054. S. H. Levinson. Automatic scale calibration.

110055. Aktiebolaget Svenska Klaktfabriken. A vibration reducing support element.

110056. Aktiebolaget Svenska Flaktfabriken. A method in operating conditioning towers for furnace fumes containing dust to be recovered by means of electrostatic precipitators.

110057. Amphenol Corporation. Coaxial switch.

110058. Amphenol Corporation. Coaxial switch.

110059. Susil Kumar Ganguli. Improved method of jointing PVC insulated, PVC sheathed and thermoplastic insulated PVC sheathed cables.

110060. J. Weinberger. Silicate facings.

110061. Imperial Chemical Industries Limited. Film treatment. (15th April 1966).

110062. Rohm and Haas Company. Polymerization.

110063. Farbenfabriken Bayer Aktiengesellschaft. Brightening agents. (8th August 1966).

4th April 1967

110064. J. P. Thottam. Process and apparatus for the manufacture of match splints from soft wood like tapioca sticks.

110065. M/s. Micro Electronics (India). Improvements in or relating to electrical pulse generators and their application in detecting faults in various electrical and /or electronic apparatus, in a logical manner.

110066. Allied Chemical Corporation. Fibre-reinforced polyurethane materials.

110067. Allied Chemical Corporation. Fibre-reinforced polyurethane composition.

110068. Allied Chemical Corporation. Polyurethane materials.

110069. The Dunlop Company Limited. Methods for coating surfaces. (15th April 1966).

110070. Battery Corporation of America. Molded, self-supporting, electrically conductive green carbon cup and method of making same.

110071. *Western Mining Corporation Limited.* Wedge orientation device. (16th June 1966).

110072. Wood Conversion Company. Improved method of producing mineral fiberboard and the fiberboard product.

110073. Wood Conversion Company. Improvements in and relating to acoustic panels.

110074. The British Petroleum Company Limited. Improvements in or relating to the recovery of nitrogenous material from micro organisms. (15th April 1966).

110075. The British Petroleum Company Limited. Improvements in or relating to the production of micro-organisms. (13th May 1966).

110076. Veb Farbenfabrik Wolfen. Process for the preparation of a mercapto-thiophosphoric acid ester. (1st February 1967).

110077. Societe Generale Isothermos Societe Anonyme. Improvements in or relating to buffer, notably for railway vehicles.

110078. Union Carbide Corporation. Method and device for forming and sealing closures in thermoplastic bags.

110079. Union Carbide Corporation. Seal Barriers for thermoplastic bags.

110080. Avery-Hardoll Limited. and Beck & Co. (Meters) Limited. Improvements in and relating to liquid dispensing apparatus. (5th April 1966).

110081. Associated Chemical Companies Limited. Anti-corrosive coating compositions. (5th April 1966).

110082. Sandoz Ltd. Improvements in or relating to organic compounds. (5th April 1966).

110083. Sandoz Ltd. Improvements in or relating to organic compounds. (5th April 1966).

110084. Sandoz Ltd. Improvements in or relating to organic compounds. (5th April 1966).

110085. Letraset Limited. Apparatus for the application of dry transfer materials. [Divisional date 29th October 1965].

110086. Knapsack Aktiengesellschaft. Electrolytic cell.

110087. Mitsui Kagaku Kogyo Kabushiki Kaisha (Mitsui Chemical Industry Co., Ltd.) Herbicidal composition and method.

110088. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Urea derivatives and their use as herbicides.

110089. N. V. Philips 'Gloeilampenfabricken. Improvements in and relating to methods of manufacturing transistors. (7th April 1966).

5th April 1967

110090. Council of Scientific and Industrial Research. Improvements in or relating to the preparation of graft copolymers of acrylonitrile, butadiene and styrene.

110091. I. L. Mehta. Candle holder-cum-re-maker.

110092. Niehaus Engineering Societe Anonyme. Improvements in and relating to melting furnaces.

110093. Eli Lilly and Company. Antibiotics.

110094. Veb Elektro-Apparate-Werke Berlin-Treptow. Semi conductor rectifier assembly. (11th January 1967).

110095. Oronzio De Nora Impianti Elettrochimici. Chemical deposition formation of anodes.

110096. Metallgesellschaft A.G., The Steel Company of Canada Ltd. and Pickands Mather & Co. Peripheral charging of sponge iron.

110097. C. Brink. Improvements in containers.

110098. W. R. Grace & Co., Epoxy resin sealants.

110099. Union Carbide Corporation. Manufacture of carbon black.

110100. The Bendix Corporation. Automatic direction finder with frequency modulated servo control.

110101. Farbenfabriken Bayer Aktiengesellschaft. Thiaimidazolidines.

110102. Lodge-Cottrell Limited. Improvements in or relating to electroprecipitation. (12th April 1966).

6th April 1967.

110103. Delhi Cloth & General Mills Company Limited. Improvements in or relating to the suspension polymerisation process for the preparation of polyvinyl chloride.

110104. Delhi Cloth & General Mills Company Limited. Improvements in or relating to the preparation of peroxidicarbonates.

110105. Delhi Cloth & General Mills Company Limited. Improvements in or relating to the preparation of polyvinyl chloride.

110106. The Delhi Cloth & General Mills Company Limited. Manufacturing briguettes from hard coke, petroleum coke and charcoal dust of less than 3 mm. fines-ness.

110107. Venot-Pic Societe Anonyme. Rotary heat exchanging apparatus.

110108. Acf. Industries Incorporated. In-the-line fuel pump.

110109. The Goodyear Tire & Rubber Company. Improvements in chemical process.

110110. The Singer Company. Loop taker for sewing machines.

110111. Crucible Steel Company of America. Improved free-machining ferritic stainless steels.

110112. Sanol Arzneimittel Dr. Schwarz GMBH. 1-substituted-3-[N- α -methyl- β -hydroxy-phenethly)-N-methylamino]-2-propanols.

110113. American Home Products Corporation. Process for the production of steroid gonenes.

110114. Ciba Limited. Process for the manufacture of 11-amino-6-morphanthridones.

110115. Ciba Limited. Process for the manufacture of 6, 11-diamino-morphanthridines.

110116. The National Cash Register Company. A coated copy paper. (7th April 1966).

110117. Jaggy & Company. Improvements in or relating to combs and hair brushes.

7th April 1967.

110118. Schering Aktiengesellschaft. New 14α-hydroxy steroids and process for their manufacture.

110119. G. P. S. Ahluwalia. Electro mechanical automatic track circuit position indicator.

110120. B. R. Nagabhushana Gupta. Slide rule for design of R.C.C. beams and slabs in metric units.

110121. B. R. Nagabhushana Gupta. Disc for interconversion between metric and FPS, and other engineering units of 50 types.

110122. J. R. Patel. Improvements in or relating to containers for dispensing liquids in drops more particularly eye drops, nasal drops, ear drops and the like.

110123. Franz Morat G.M.B.H. Improvements relating to circular knitting machines. (3rd February 1967).

110124. Textile Mouldings Limited. Improvements relating to travellers for textile ring spinning, twisting or doubling machines. (14th April 1966).

110125. High Duty Alloys Limited. Improvements in or relating to the heat treatment of aluminium alloys. (7th April 1966).

110126. Sandoz Ltd. Novel N-arylcarbamic acid ester having herbicidal effect. (1st June 1966).

110127. N. V. Philips Gloeilampenfabrieken. Semiconductor device and circuit arrangement comprising a semiconductor device.

110128. Glaxo Laboratories Limited. Improvements in or relating to antibiotics. (7th April 1966).

110129. Glaxo Laboratories Limited. Improvements in or relating to antibiotics. [Addition to No. 110128].

110130. Distillers Chemicals and Plastics Limited. Improvements in or relating to the purification of acrylonitrile. (29th April 1966).

110131. Distillers Chemicals and Plastics Limited. Improvements in or relating to the purification of acrylonitrile. (22nd July 1966).

110132. Imperial Chemical Industries Limited. Chemical process. (20th April 1966). [Addition to No. 103873].

110133. Revere Corporation of America. Improved load cell.

Alteration of Date

101900. Ante-dated to 4th October, 1965 under rule 3.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the Supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

99065. M & T Chemicals Inc. Process for the preparation of organo-stilbene compounds. Accepted on 4th April 1967.

Comprising reacting a diorgano antimony carboxylate with a thiol or an organic carboxylic acid.

100088. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to methods of introducing metal into a discharge vessel. Accepted on 15th March 1967.

Characterised in that between the end of the exhaust tube connected with the discharge vessel and the metal to be provided a filter.

100243. Dr. Beck & Co., G.m.b.H. Polyesterimide resins, process for their preparation and electrical conductors having an insulated coating formed therewith. Accepted on 23rd March 1967.

Reacting polybasic carboxylic acid with polyhydric alcohol and polyvalent primary amine in presence of surplus of volatile glycol.

100293. Kureha Kagaku Kabushiki Kaisha. Organo-phosphorus compound especially suitable for insecticides and acaricides. Accepted on 29th March 1967.

A metallic salt of organo phosphoric acid is reacted with O,O-dialkyl-O-β-β-dichlorovinyl phosphate.

100302. A. Schule. Check valve. Accepted on 28th March 1967.

Comprising a tubular housing a fluid inlet a fluid outlet, a hollow valve seat an elastic valve member having an apertured mantle.

100307. B. F. Burner. Electrostatic shield for relieving electrostatically induced pain. Accepted on 28th March 1967.

Comprises a shielding means resistant to the passage of static electricity therethrough and providing an electric current conducting path from such means to the surface of the skin to remove static electricity from the area.

100341. Celanese Corporation of America and Fiber Industries, Inc. Process of producing a splittable crimped tow. Accepted on 30th March 1967.

Which comprises feeding atleast two separate subtows to a crimper, crimping the tows and with drawing a unitary splittable tow having crimps in registry.

100342. Fiber Industries, Inc. Improvements in process and apparatus for production of crimped tows. Accepted on 30th March 1967.

In which a bond of tow is continuously fed through a drawing zone from a feed means to a draw means pulling said bond at a speed higher than it is supplied by the feed means to stretch said bond to increase the tenacity of the filaments.

100347. Armco Steel Corporation. Suppression of visible spangle. Accepted on 30th March 1967.

Applying aquous solution of multitudes of solidification nuclei consisting of inorganic salt decomposable in 175 to 550°F to freshly coated strip for suppressing visible spangle in hot lip coating of metal strip.

100395. Central Glass Co., Ltd. Methods of preparing highly pure crystals of ammonium salts of phosphoric acid. Accepted on 5th April 1967.

Comprising preparation of solution of ammonium phosphate from phosphoric acid, separation of precipitates from said solution, addition of inorganic alkaline compounds to said solution gradual cooling of said solution and separation of crystals formed.

100471. M & T Chemicals Inc. Method of alloy plating. Accepted on 3rd April 1967.

Electrodepositing a tin bismuth alloy plate comprising immersing in a bath of alkali metal stannate, free alkali metal hydroxide, alkali metal bismuthate.

100529. United States Rubber Company. Improvements in adhering textile materials to rubber. Accepted on 5th April 1967.

Comprises a textile material and a vulcanised rubber composition which contains reaction product of N. N'/dimethylol urea with resorcinol.

100530. United States Rubber Company. Improvements in adhering textile materials to rubber. Accepted on 5th April 1967.

Comprises a textile material in a vulcanised rubber composition which is reaction product of trimethylol acetaldehyde with resorcinol.

100562. Allied Chemical Corporation. Carbon-nitrogen backbone chain polymers and their production. Accepted on 1st April 1967.

2-(n-perfluoroheptyl)-5, 6-dihydro-1, 3, 4-oxazine is heated at a temperature between 40 and 160°C in the presence of dimethylsulphate.

100587. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to circuit arrangements for use in a television receiver for maintaining a constant background brightness of the television picture produced by the display tube. Accepted on 5th April 1967.

Comprising a wehnelt cylinder and cathode one of the said electrodes is d.c. connected to the output electrode of the video output stage, said arrangement comprises a voltage and divider consisting of the series combination of a fixed resistor and a voltage dependent resistor.

100646. M & T Chemicals Inc. Process for electroplating microcrack chromium electroplate. Accepted on 6th April 1967.

Comprises containing an aqueous chromium-plating bath, immersing cathode in the bath, electroplating chromium on to the cathode at an initial current and an initial current density on areas of high current density lower than the burning current density, incrementally decreasing initial current and separating cathode from the bath.

100620. Standard Telephones and Cables Limited. Analogue to digital converters. (21st August 1964). [Addition to No. 94007]. Accepted on 3rd April 1967.

In which all the multi-stable devices are coupled to the input of a feed back circuit the output of which is connected in parallel with the step function impressed on the multi-stable devices.

100679. Plastic Textile Accessories Limited. Improvements in or relating to extruded plastic net. (31st July 1964). Accepted on 6th April 1967.

The traverse bands of meshes alternate and one type of band comprising meshes having connecting strands with a greater mesh angle than that of other type of band.

100752. Glaverbel. Process for the preparation of glass-batch composition suitable for the manufacture of glass. Accepted on 6th April 1967.

Comprising at least 20% of the total proportion of alkali metal is contacted with at least one gaseous acid.

100764. Bakelite Limited. Improvements in or relating to polyepoxide compositions. Accepted on 1st April 1967.

Comprises reacting a polyglycidyl ether with a carbocyclic diamine.

100812. Stamicarbon N. V. Process for preparing 3-nitro-azacycloheptane-2-one 1-carbochloride. Accepted on 1st April 1967.

Comprises reacting 2-chloro-azacyclo-2, 3-heptene 1-carbochloride with a nitrating agent in liquid sulfur dioxide at a temperature below 30°C and hydrolyzing the product.

101035. American Potash & Chemical Corporation. Improvements in and relating to the treatment of gaseous suspensions. Accepted on 6th April 1967.

Comprises contacting hot gaseous suspension, without any preliminary cooling step, with liquid water to form an aqueous slurry of titanium dioxide and a gas stream containing chlorine, oxygen and water vapour.

101065. Standard Telephones and Cables Limited. Improvements in or relating to electrolytic machining processes. (11th September 1964). Accepted on 1st April 1967.

Comprising passing a current between the workpiece and a rotating disc electrode through an electrolyte.

101249. Allied Chemical Corporation. Pesticidal compositions containing organic thiophosphates. (23rd September 1964). Accepted on 4th April 1967.

Consist of a carrier having dispersed or dissolved therein a pesticidally active organic thiophosphate.

101582. Owens Corning Fiberglas Corporation. A phenolic resin composition and fibres bonded together by said composition. Accepted on 15th March 1967.

Comprising from 97-3% by weight of a resole resin, from 3-97% by weight of a novolac resin and from 8-16% by weight of hexamethylene tetramine based upon the weight of the novolac resin.

101583. Owens-Corning Fiberglas Corporation. Glass fiber bundles and method and composition for treating same for use as a reinforcement in elastomeric products. Accepted on 15th March 1967.

Comprises an aqueous pystem the solids of which comprises 2 to 10 parts by weight of resorcinol formaldehyde resin 6 to 20 parts by weight of vinyl pyridine rubber 12.5 to 25 parts by weight of neoprene rubber 3 to 9 parts by weight of butadiene rubber with the solids content in the aqueous system being within the range of 10 to 50 percent and in which the vinyl pyridine rubber, neoprene rubber and butadiene rubber are embodied in the form of a latex.

101676. Institut De Recherches De La Siderurgie Francaise. A method and a device for the continuous refining of molten pig iron. Accepted on 22nd March 1967.

In which process the molten iron is introduced into a partially refined metal bath a refining gas is blown into the bath.

101737. Allied Chemical Corporation. Composition and process for the production of polyurethanes. Accepted on 27th March 1967.

Admixing an organic polyisocyanate with a polyalkylene ether polyol, an inert filler, a mercury salt catalyst and a basic metal compound.

101739. Halcon International Inc. Production of phthalic anhydride and alpha naphthol. Accepted on 27th March 1967.

Alpha tetrol obtained along with oxirane compound by the reaction between tetraline hydroperoxide and an olefinically unsaturated compound is oxidized when phthalic anhydride is required and hydrogenated when alpha naphthol is required.

101764. American Cyanamid Company. Stretch Fabric and process for manufacturing same. Accepted on 28th March 1967.

Which are unsized, possess 0 to about 200 turns per metre of twist and have coily crimps said coily crimps having been developed in situ after said fabric had been formed.

101765. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Optical brighteners and process for optical brightening of organic fibrous materials, foils and shaped articles. Accepted on 28th March 1967.

A process for the preparation of Δ_3 pyrozoline compounds comprises reacting a vinyl sulphoric compound with an excess of an aliphalic an araliphatic or an aromatic hydrolitic or mercapto compound.

101774. Allied Chemical Corporation. Rigid chlorinated polyvinyl chloride foam and its preparation. Accepted on 28th March 1967.

Subjecting chlorinated polyvinyl chloride having a chlorine content of at least 60% by weight and containing 5-50% of its weight of an absorbed halozinated hydrocarbon blowing agent to temperature and pressure conditions such that blowing agent expands to form a foam.

101776. E. Meyer and E. Singer. Method of producing fibre-reinforced plastics sections, particularly longitudinally tapering sections, with the aid of a mandrel, and apparatus for carrying cut this method. Accepted on 28th March 1967.

Comprising applying to the surface of a mandrelfilaments that have been or are to be impregnated with plastics and moving filaments together with advancing mandrel, winding further filaments, possibly applying additional longitudinal filaments and with drawing from the mandrel plastics tube formed by above steps possibly after plastics has set.

101785. Asahi kasei Kogyo Kabushiki Kaisha. Process and apparatus for producing stretchable high bulky yarns. Accepted on 29th March 1967.

Comprising subjecting thermoplastic filamentary articles to edge crimping with use of at least one blade placed in water at a temperature than 50°C.

101793. J. R. Geigy A. G. Process for the production of coper-containing disazo dyestuffs suitable for the dyeing of fibres containing cellulose. Accepted on 29th March 1967.

Comprising coupling a tetragotised 4, 4'-diamino diphenyl compound in any order desired with a hydroxy naphthalene sulfonic acid and 2-(4'-sulphophenyl ureido)-5-hydroxynaphthalene-7-sulphonic acid and then treating with a copper yielding agent.

101794. France Ecrans. Continuous motion projection device for two films. Accepted on 29th March 1967.

Gates are located opposite one another on either side of a common crown of projection lenses, each gate having its own lamp and condenser system.

101825. British Nylon Spinners Limited. Process for making variable denier yarn. (21st October 1964). Accepted on 30th March 1967.

Which method conprises subjecting a yarn formed of nylon or polythylene terepthalate to a first drawing operation in which a localised drawing point or neck is formed and then subjecting the yarn to a second drawing operation.

101851. The English Electric Company Limited. Electromagnetic devices. (6th October 1964). Accepted on 4th April 1967.

Including a coil between ferro-magnetic members and high reluctance means between the members and adjacent a permanent magnet so that when the coil is energised field opposite that of the magnet is diverted across the reluctance means to release an armature from its hold position.

101856. Stamicarbon N. V. Preparation of hydroxylamine salt solution. Accepted on 4th April 1967.

Characterised in supplying nitrite ester as such to acid reaction medium for reduction with molecular hydrogen in presence of hydrogenation catalyst.

101870. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for rendering compounds of high molecular weight resistant to electrostatic charge, anti-static compositions and shaped articles obtained therefrom. Accepted on 5th April 1967.

Comprises incorporating therein as an antistatic agent one or more schiff's bases of the formula R_1-CH-N-R_2 wherein R_1 and R_2 are alkyl groups.

101882. The Plessey Company Limited. Improvements in axial-piston pumps having an auxiliary pump. Accepted on 31st March 1967.

Comprising one of the bearings of the two bearing driving flange shaft of the axial piston pump and at least one auxiliary gear pump driven by the flange shaft being accommodated in a casing partition.

101888. Metallgesellschaft Aktiengesellschaft. Process of producing sponge iron lumps. Accepted on 3rd April 1967.

Producing sponge iron lumps comprising moistening fine grains, causing them to roll to from pellets and heat treating at 500 to 1200°C to harden said pellets.

101900. Weaving Developments Limited. Improvements in or relating to weaving looms. (3rd October 1964). Accepted on 4th April 1967.

Comprising a weft insertion means the said means will cause the weft yarn to be introduced in the shed in the form of a loop and cutter means adapted to cut the arm leading into the edge selvedge during the traverse of the shuttle.

101905. Robert Bosch GMBH. Improvements in sparking plugs. Accepted on 3rd April 1967.

In operation ignition spark jumping between a central and a side electrode creeps over part of a high tension creeping spark path and in that an additional spark path is provided.

101925. Council of Scientific and Industrial Research. Improvements in or relating to the chemical polishing of copper and its alloys. Accepted on 6th April 1967.

By a process consisting chemically treating copper or its alloys in an aqueous solution of alkali metal dichromate, mineral acid and an organic inhibitor.

102065. The Anil Starch Products Limited. Method for preventing denaturation of bacterial protease. Accepted on 1st April 1967.

Characterized by adding non-ionic surface active agent to the bacterial protease solution.

102130. Siemens & Halske Aktiengesellschaft. Improvements in or relating to electromechanical filters. (29th January 1965). Accepted on 4th April 1967.

An electromechanical filter in which two distinct mechanical bending oscillations in two distinct planes in the resonator can be produced by the application of electrical oscillation to a first piezoelectric conversion means and wherein a second piezoelectric coupling means is arranged to convert the two distinct mechanical oscillation in the resonator into electrical oscillations.

102138. Polymer Corporation Limited. Graft polymers. (6th November 1964). Accepted on 1st April 1967.

Comprises grafting by known methods a monomer onto latex of a homopolymer of an alkyl substituted conjugated diolefin or a copolymer of the diolefin with a compound copolymerizable therewith.

102160. Pavena Aktiengesellschaft. Process and apparatus for the continuous treatment of a staple fibre band or the like with liquid. (16th August 1965). Accepted on 1st April 1967.

Comprising the .steps of forming a tubular-shaped staple fibre passing it through a guide zone introducing liquid into it after passing the guide zone, allowing the excess of the liquid to flow off, consolidation the staple fibre layer into a compact sliver and subjecting the said sliver to a high specific surface compression.

102220. The Dow Chemical Company. Latices, process for their preparation and compositions containing the same. Accepted on 6th April 1967.

Comprises preparing an aquas dispersion of monomers consisting of a mixture of half ester of an aliphatic diol and an α-B ethylenically unsaturated aliphatic monocarboxylic acid, α-B ethylenically unsaturated aliphatic carboxylic acid or a salt thereof and a monovacylidine aromatic monomer and/or an aliphatic conjugated diene, and polymerised by emulsion polymerisation.

102314. Technoimpex Magyar Gepipari Kulkereskedelmi Vallalat. Improvements in internal combustion engines. Accepted on 4th April 1967.

Comprising a working cylinder a mixing chamber on the cylider having a fuel injection means in the direction of the air flow, and an ignition means for cold starting of the engine in the wall of the said chamber.

102330. The Goodyear Tire & Rubber Company. Method and apparatus for building a tire. Accepted on 3rd April 1967.

Characterised by means for effecting a radial expansion of the drum at least adjacent the ends thereof and for effecting an axial contraction of the drum.

102392. American Brake Shoe Company. A traffic retarder system for retarding the movement of rail road cars. Accepted on 4th April 1967.

Includes a traffic rail for supporting at least one wheel of rail road car passing through said system, a series of independent level means spaced along the traffic rail and on opposite sides for supporting said rail.

102408. Caterpillar Tractor Co. Method of producing case tempered threaded members. Accepted on 3rd April 1967.

Threaded member with high resistance to cracks and crack propagation comprises a core, a casing forming outer radial portion and threads formed into the outer casing.

102433. B. Milner. Improvements in and relating to paste-drying leather. Accepted on 4th April 1967.

Plate for paste drying leather comprising wood board having a surface treated with synthetic resin to which leather is pasted.

102448. Bhaskar Prem Mitra. Drawing ellipses to which I have given the name of "Elliptograph". Accepted on 1st April 1967.

A pair of guided sliding elements, one of the elements slidable in the horizontal direction and the other in the vertical direction first means for causing the elements to slide simultaneously second means regulating the extent of movement of the elements a pentograph, a connecting members connecting the junctions of the links of the arm of the pentograph to the elements and a drawing pen or pencil at the end of the arm.

102470. The Dow Chemical Company. Styrene polymers containing behenic acid and method of making the same. Accepted on 5th April 1967.

Comprises intimately incorporating styrene polymer with saturated aliphatic monocarboxylic acid consisting of at least 75 per cent by weight of an acid having from 22 to 25 carbon atoms in the molecule.

102500. E. I. Du Pont de Nemours and Company. A non-woven fibrous sheet and process of preparing the same. Accepted on 3rd April 1967.

Characterised by fibres so entangled that the impenetrability rating of highly entangled region is 0.5 and entangled frequency is 20 in.

102508. The International Synthetic Rubber Company Limited. A process for the prevention of shrinkage and felting of wood. (17th November 1964). Accepted on 29th March 1967.

Comprising impregnating wool with chlorosulphonated ethylene propylene copolymer rubber solution.

102523. The Anil Starch Products Limited. Improvements in or relating to the concentration of fungal saccharifying enzyme solutions. Accepted on 6th April 1967.

The solution is passed through a porous phenol formaldehyde polymer resign and then the resign is eluted by passing there-through an eluent such as 20-40% acetone or isopropanol containing ammonia.

102613. Phillips Petroleum Company. Shaped solid combustible compositions and method for preparation thereof. Accepted on 4th April 1967.

A shaped combustible composition comprises from 4-40 weight per cent of normally solid hydrocarbon polymer and 60-96 weight per cent of a normally liquid hydrocarbon boiling above 100°F.

102782. Dynamit Nobel Aktiengesellschaft. Process for the production of hardenable synthetic resins containing boron. Accepted on 6th April 1967.

Comprises dissolving arylborates in fusible formaldehyde yielding substances and then heating it with formaldehyde or formaldehyde yielding substances.

102800. Cousino Electronics Corporation. Tape recording apparatus and cartridge therefor. Accepted on 6th April 1967.

Comprising is combination a base member having a reces at one periphery, a tape disc mounted on said base member, a flat tape strip, a flat roll and a playing portion of intermediate said feed and return portions.

102901. Hughes Tool Company. Full journal bearing. [Addition to No. 96517]. Accepted on 3rd April 1967.

The relieved surface and said surface of revolution of the bearing pin intersect to leave said holding surface of the lip completely intact over an appreciable arc extending in both directions from the centre of the pressure side of the pin.

102978. The Cross Company. Feed and drive unit for a machine tool. Accepted on 1st April 1967.

Comprising a varied speed reciprocable machine tool carriage having a rotatable tool and a drive to inpart rapid and flow advance movement to the carriage with simultaneous tool rotation.

103006. Dr. M. R. Krishnamurthy and Mr. V. V. Sastry. Improvements in winding arrangements for three-speed, single-phase induction motor with the middle pole-number of eight. Accepted on 1st April 1967.

Comprising two identical phase windings with coils of span equal to 5 or 6 or 7 slot pitches in a 48 slot stator and wound for 8 poles each phase winding being divided into sections arranged to be connected to obtain pole numbers of 6 and 10 pole.

103007. Dr. M. R. Krishnamurthy and Mr. V. V. Sastry. Improvements in winding arrangements for three-speed, single-phase induction motor with a reduced number of terminals and with the middle pole-number of six Accepted on 1st April 1967.

Comprising two identical phase windings with coil span of 4 or 5 or 6 slot pitch in a 36 slot stator and wound for 6 poles each phase winding being divided into the halves and arranged to be connected to obtain pole numbers of 4 and 8.

103008. Dr. M. R. Krishnamurthy and Mr. V. V. Sastry. Improvements in winding arrangements for a three-speed single-winding single-phase induction motor with capacitor-start at any of the speeds. Accepted on 1st April 1967.

Comprising two identical phase windings with coil span of 5 or 6 or 7 slot pitches in a 48 slot stator and wound for 8 poles, each phase winding being divided into two halves and arranged to be connected to obtain pole numbers of 6 and 10.

103012. Farbenfabriken Bayer Aktiengesellschaft. Production of phthalocyanine dyestuffs, process of dyeing materials therewith and the dyed materials produced thereby. (12th August 1965). Accepted on 3rd April 1967.

A process for the production of phthalocyanine dyes comprises reacting a copper or nickel-phtalosulphonamide with a sulfonic acid halide.

103052. Polysius G.M.B.H. Method of agglomerating chromium ore containing serpentine. Accepted on 3rd April 1967.

Agglomerating chromium ore by thermal consolidation characterised in that the ore is pelletized and dried and held at 650 to 850 untill conversion of serpentine to forsterite takes place and then at 1450° to 1650°C.

103075. C. A. V. Limited. Electric starting motors for internal combustion engines. Accepted on 6th April 1967.

Comprising electro magnetic means for imparting axial movement to a sleeve on a spindle, the movement operating switches to energise the field windings in steps.

103118. C. A. V. Limited. Liquid fuel injection nozzle units. Accepted on 3rd April 1967.

Liquid fuel injection nozzle unit having a first member with sealing surface, tubular second, a cup shaped member, a cap adapted for engagement, passages in members through which gases may pass.

103125. Ciba Limited. Water-solube monoazo dyestuffs, process for their manufacture and process for dyeing or printing, polymers or copolymers or acrylonitrile or asymmetric dicyanoethylene therewith. Accepted on 1st April 1967.

Comprising reacting a diazocompound of 4-amino X-(N-chloro tertiary amino)-acetophenone with a hydroxy or an amino napththalene which contains a sulphonamide, sulphonic acid ester or sulphone group at one of the remaining positions (or) reacting a monazodyestuff obtained by coupling compound of an amino halogen acyl benzene with one of the abovementioned coupling components, with a territory amine.

103172. Ciba Limited. Disazo pigments and process for their manufacture. Accepted on 27th March 1967.

Comprises in condensing a dihelide of a dicarboxylic acid with an amino benzene or a diazo compound of an amine with a diacetoacetylarylene diamine.

103236. *Ateliers De Constructions Electriques De Charleroi (Acec).* A discriminator device for detecting the direction of traffic on a railway track. Accepted on 4th April 1967.

Comprising a system of four saturable transformers, distributed in two symmetrical groups, providing D.C. output signals corresponding to two traffic directions, each group comprising a first saturable transformer having a saturation winding and a desaturation winding and a second saturable transformer with a saturation winding.

103450. Inland Steel Company. Method and apparatus for continuously quenching metal strip. Accepted on 3rd April 1967.

Quenching a moving metal strip in quench liquid comprising passing strip and liquid through channel and additional quench liquids are directed in opposite direction.

103657. Textron Inc. Improvements in or relating to method and apparatus for securing lines such as telephone and power lines, to supports. Accepted on 4th April 1967.

Tie line is comprised of preformed helical ribbon, the convolutions of said ribbon being capable of being easily spread and uncoiled by hand and then to be held in a straightened position and capable of returning to their original state when released.

103700. Zakladv Budowy I Naprawy Maszyn Drogowych "Madro". Equipment for dedusting of driers for mineral materials. Accepted on 3rd April 1967.

Equipment for dedusting of driers for mineral materials consisting of a rotary drum and a set of cyclones by the drum provided with an ante chamber with strips, thrower and divided suction pipe with semicircular hood placed above it.

103744. Hickson's Timber Impregnation C. (G.B.) Limited. Improvements in compositions for use in imparting water repellent properties to wood (22nd February 1965). Accepted on 3rd April 1967.

Comprising an aqueous emulsion of a hydrophobic comprising a non ionic surface active agent containing one or more polyoxyethylene chains or a mixture of such agents together with one or more wood preservations and/or fire retardents.

103823. *Societe De Constructions Electromechaniques Jeumont-Schneider.* Improvements in pulse transmitters for railway track circuits. Accepted on 5th April 1967.

Comprising a signal transmitter which is connected to energize a plurality of track circuits by the transformers through adjustable resistors arranged in series with the primary windings of the transformers the capacitor is charged through a low current charging diode from a rectifier bridge which latter is supplied through a reactance either from a stabilized A.C voltage source or a transistorized static converter.

103856. The English Electric Company Limited. Improvements in dynamo electric machines. (25th February 1965). Accepted on 3rd April 1967.

Rotor having windings secured in winding slots by one or more bands of resin bonded glass fibre disposed about the outer periphery of the rotor.

103884. Dynamit Nobel Aktiengesellschaft. Process for the production of vinyl chloride polymers or copolymers. Accepted on 4th April 1967.

Comprises polymerising or copolymerising vinyl chloride by means of a water soluble redox system in the presence of an aliphatic alcohol and an ether and/or ketone.

103989. The Plessey Company Limited. Improvements in or relating to arrangements embodying flexible electric leads for electro-acoustic loudspeakers. Accepted on 5th April 1967.

Comprising a plurality of wires of highly pure copper and a plurality of wires of a resilient alloy braided together and a flexible electric lead which is connected to a terminal tag and passing through the bush and being held in position therein by means of a sleeve inserted in said bush.

104011. The Imperial Tobacco Company. Method and apparatus for threshing leaves e.g. tobacco leaves. (18th March 1965). Accepted on 3rd April 1967.

Threshing leaves to separate the stem and lamina comprising directing leaves to thresher with stems parallel to line of movement with tips of leaves foremost.

104101. Gullick Limited. Improvements in or relating to mine roof supports. (4th March 1965). Accepted on 3rd April 1967.

Mine roof support with a base means including an elevated forwardly extending cantilever and an extensible roof supporting prop or leg mounted on said cantilever.

104121. Chicago Bridge & Iron Company. Electrical arc welding method and apparatus. Accepted on 6th April 1967.

Comprising an electric arc welding head having a torch for depositing molten weld metal in a joint to be welded, transporting means for moving and welding head along a joint, power means for propelling first means, and a photo-electric cell to be activated from torch light.

104288. Aktiebolaget Kamyr. Apparatus for mixing of bleaching agents into cellulosic pulp. Accepted on 5th April 1967.

Characterized in that, a casing enclosing the vane wheel comprises a plane wall perpendicular to the axis of the wheel and having an orifice for bleaching agent inlet and the vane wheel is so arranged to move pulp with the full speed of the wheel along said wall.

104324. Amsted Industries Incorporated. Method for heat treating annular castings. Accepted 3rd April 1967.

Characterised by rotating articles applying coolant to outer portion and rotation made at a rate to prevent to coolant to flow into inner portion and current of air plows radially outwardly.

104498. Satvendra Nath Sett. Improvements in or relating to bricks and building-blocks. Accepted on 4th April 1967.

Having its upper surface sloping from one side to the opposite side and having at the end of the slope an angular groove formed by a projection above said upper surface while on the side opposite to this side is a groove complementary to the projection.

104515. Rolls-Royce Limited. Nickel-chromium-molybdenum-cobalt alloy. (7th April 1965). Accepted on 3rd April 1967.

Alloy containing chromium 18 to 22, molybdenum 7 to 9, cobalt 8 to 12, titanium 1.40 to 2.55, aluminium .7 to 1.70, carbon 0.02 to 0.10% manganese .2 to .6, silicon 0.1 to .5, calcium 0.015, iron 1.0, sulphur upto .005, etc.

104579. Corning Glass Works. Alignment and centering arrangement for movable machine parts. Accepted on 6th April 1967.

Comprising at least three pins angularly spaced apart with respect to the desired center line and rigidly mounted in one of the machine parts, and at least three corresponding bushings slidably mounted on the other machine part for radial movement with respect to said center line.

104927. Gautam Electric Motors Private Limited. A method of winding coils of an armature core. Accepted on 4th April 1967.

Groups of coils falling under one pole and belonging to same phase are formed as a continuous strand without soldering or jointing the ends of connections of between various groups.

104980. Rank Xerox Limited. Copy counting means and its use in a xerographic reproducing apparatus. Accepted on 7th April 1967.

Comprises a first counter for indicating cumulatively the total of a first predetermined number of copies of each reproducing run, a second counter for indicating cumulatively at least a second predetermined number of copies in excess of the first predetermined number of copies of each reproducing run, counter actuating means responsive to the production of each copy and switch means for causing the first counter to be actuated by actuated means.

105047. International Standard Electric Corporation. Improvements to identification systems for circuits or electric equipment. Accepted on 6th April 1967.

Comprising a request signal unit, a first identifier signal sending means for sending the code signal generated by the first identifier, a decoder means under control of the said decoder and a further identifier.

105093. Dynamit Nobel Aktiengesellschaft. Improvements in or relating to the descaling of metal surfaces. Accepted on 4th April 1967.

Comprises introducing the metal object into a melt of an alkali metal hydride dissolved in an alkali metal hydroxide.

105123. Dynamit Nobel Aktiengesellschaft. Process for the production of moulding masses from post-chlorinated polyvinyl chloride. Accepted on 3rd April 1967.

Characterised in incorporating 25-0.5 parts of post-chlorivated polythylene containing 20-26% of chlorine and 1.5-18 relative viscosity in 75-99.5 parts of post chlorinated polyvinyl chloride containing 58-71% of chlorine and 1.5-6.5 relative viscosity.

105139. Foster Grant Co., Inc. Process for preparing expandable plastic particles. Accepted on 3rd April 1967.

Polymerization is carriedout at a temperature of under 100°C until a polymer bead staze of at least 50% conversion of monomer to polymer has been reached, thereafter 3 to 10 weight percent of a volatile liquid blowing agent to said polymerization mixture within 2-30 minutes and the polymerization is completed at a temperature of at least 95°C.

105693. Westinghouse Brake and Signal Company Limited. Conveyors. (10th January 1966). Accepted on 4th April 1967.

Gearing mechanism has an oscillatably mounted member having engagement elements arranged one on each side of the axis about which the member is oscillatable.

105862. J. Kerschgens. Apparatus for the production of metal coatings by electrodeposition. Accepted on 3rd April 1967.

Characterised by a housing provided with a power supply, containers with contact terminal, housing having another terminal which is connected to the second pole.

106067. Sperry Rand Corporation. Improvements in hydraulic transmissions. (12th April 1966). Accepted on 3rd April 1967.

Comprising fluid motor, a pump hydraulically connected to motor and having a power operated displacement varying mechanism control means for latter, an input member coupled to control means and a movable pressure differential responsive feed back device connected to pump inlet and outlet and coupled to the control means.

106684. The United Steel Companies Limited. Continuous casting machines. (19th August 1965). Accepted on 5th April 1967.

Comprising mould, water jacket, return mainfolds and hollow pivots.

Opposition Proceedings

The application for patent No. 90379 made by Dr. R. D. Desai, Miss S. K. Dalal, A. R. Parikh and A. D. Shah in respect of which an opposition was entered by J. R. Geigy S. A. as advertised in Part III, Section 2 of the Gazette of India dated the 2nd October 1965, has been treated as withdrawn.

Patents Sealed

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Midland-Ross Corporation, Engineers, of 10,600 Quincy Avenue, Cleveland, Ohio 44106. United States of America, a corporation of Ohio, U.S.A., seek leave to amend the description and claims in the specification in respect of patent application No. 99935. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Robert Boothe Miller, a citizen of the Dominion of Canada, residing at 12540 126th Avenue Edmonton, Alberta, Canada, seek leave to amend the description and claims in the specification in respect of application for patent No. 100554. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(3)

The amendment proposed by G. R. Thakre in respect of patent application No. 83128 as advertised in the Gazette of India, Part III, Section 2 dated the 31st December 1966 has been allowed.

Registration of Assignments, Licences Etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

77728—Wilhelm Stahlecker G.m.b.H.

RESTORATION PROCEEDINGS.

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 71526—Continental Carbon Company.

The patent ceased on the 20th April 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 1st April 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 3rd June 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 76616—Continental Carbon Company.

The patent ceased on the 10th May 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 1st April 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indain Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 3rd June 1967.

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 76844—Continental Carbon Company.

The patent ceased on the 24th May 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 1st April 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 3rd June 1967.

(4)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 76960—Continental Carbon Company.

The patent ceased on the 1st June 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 1st April 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 3rd June 1967.

(5)

An order has been made on the 25th March 1967, restoring the patent No. 48100 dated as of the 20th September 1952 granted to Goswami Gajanan Puri for "portable auto-lift hydraulic hammer pressure operated pumps".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Claim 1. No. 129681. Abbasbhai Abdulhusein Tinwalla, an Indian citizen, Mustafa Building, Block 'A', 2nd Peerkhan Street, Bombay-8, Maharashtra, India, "Tooth paste dispenser-cum-tooth-brush, Rack", October 29, 1966.

Claim 1. No. 130075. Autogen Trading Co., A partnership firm organized and existing under the laws of Sudan, El Tawfiq Building, Monque Square, Omdurman (Sudan), "A end-clip for fluorescent fixture", January 4, 1967.

Claim 1. No. 130076. Autogen Trading Co., A partnership firm organized and existing under the laws of Sudan, El Tawfiq Building, Monque Square, Omdurman (Sudan), "A box-channel for fluorescent fixture", January 4, 1967.

Claim 1. No. 130077. Autogen Trading Co., A partnership firm organized and existing under the laws of Sudan, El Tawfiq Building, Monque Square, Omdurman (Sudan), "A clip for fluorescent fixture", January 4, 1967.

Claim 2. No. 129575. Shri Ram Agarwal Private Ltd., 12, Nirmal Chunder Street, Calcutta-12, State of West Bengal, India, a Company incorporated in India, "Dehumidifying container", September 29, 1966.

Claim 3. No. 129680. Carona Sahu Co., Private Ltd., an Indian Limited Company, Registered under the Indian Companies' Act, 221, Dadabhoy Naoroji Road, Fort, Bombay-1, Maharashtra, India, "An insole for footwear", October 29, 1966.

Claim 3. Nos. 129749 and 129750. Dunlop Rubber Company Limited, a British Company, Fort Dunlop, Erdington, Birmingham 24, England, "A tyre for a vehicle wheel", June 7, 1966 (United Kingdom).

Claim 3. No. 129754. Azad Brush Co., Indian firm, Indian, Madhavdas Pasta Road, Dadar, Bombay-14, Maharashtra, "Container", November 21, 1966.

Claim 3. No. 129755. Azad Brush Co., Indian firm, Indian, Madhavdas Pasta Road, Dadar, Bombay-14, Maharashtra, "Shaving brush", November 21, 1966.

Claim 3. No. 129817. Ajay Plastic, an Indian Partnership firm duly registered under the Indian Partnership Act, Pushpa Kunj, Amul Dairy Road, Anand, State of Gujarat, India, "A kerosine oil syphon pump", November 24, 1966.

Claim 3. No. 129818. Dunlop Rubber Company Limited, a British Company, Fort Dunlop, Erdington, Birmingham 24, England, "A tyre for a vehicle wheel", June 22, 1966, (United Kingdom).

Claim 3. No. 129829. Swastik Art Industries, Indian partnership firm Ram Baug, S. V. Road, Malad, Bombay-64 (N.B.), Maharashtra, "Photo frames", November 30, 1966.

Claim 3. Nos. 130009 to 130011. M. A. Rubber Stores, 1402, Hing-Ki-Mandi, Agra U.P., an Indian Partnership concern, "Soles for footwear"; December 24, 1966.

Claim 3. No. 130030. Jaggy & Company, 12, Rampart Row, Fort, Bombay-1, Maharashtra State, India, an Indian Company, "Tongs", December 28, 1966.

Claim 3. No. 130064. Jhaveri Brothers & Company Private Limited, incorporated in India, 348, Abdul Rehman Street, City of Bombay, State of Maharashtra, India, and Kishor Shyamdas Jhaveri, Indian National, Triveni, G. 12 66 Welkeshwar Road, City of Bombay, State of Maharashtra, India, "Clothes hangers", January 4, 1967.

Claim 3. No. 130065. Bright Brothers Private Limited, a Company Incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Beakers", January 4, 1967.

Claim 3. No. 130066. Bright Brothers Private Limited, a Company Incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Containers", January 4, 1967.

Claim 3. No. 130067. Bright Brothers Private Limited. A Company Incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Desk calendar stands", January 4, 1967.

Claim 3. No. 130068. Bright Brothers Private Limited, a Company Incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Choppers", January 4, 1967.

Claim 3. No. 130070. Bright Brothers Private Limited, a Company Incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Baby chairs", January 4, 1967.

Claim 3. No. 130071. Bright Brothers Private Limited, a Company Incorporated in India, 156A, Tardeo Road, City of Bombay, State of Maharashtra, India, "Egg containers", January 4, 1967.

Claim 5. No. 130031. Raja Toys Co., (an Indian Partnership concern), 33, Deputy Ganj, Sadar Bazar, Delhi, "Card board box", December 30, 1966.

Claim 9. Nos. 129757 to 129776. Hindustan Embroidery Mills Private Ltd., Chheharta (Nr. Amritsar), Indian Firm, Punjab, India, (A Private Limited Company incorporated under Indian Companies Act), "Lace", November 21, 1966.

Claim 13. No. 130012. H. A. Shah & Co., Partnership Concern, Indian Vasant Vijay Mills, "Vasant Vijay", 470/471, Warli Road, Bombay-18, (India), "Textile goods", December 26, 1966.

Claim 13. No. 130023. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", December 27, 1966.

Claim 13. Nos. 130032 and 130033. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", December 30, 1966.

Claim 13. Nos. 130081 to 130093. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", January 4, 1967.

Copyright Extended for the Second period of Five Years

112978 — Class 1.

112890, 113283 — Class 3.

112891 — Class 10.

Copyright Extended for the Third period of Five Years

90085, 90529 — Class 10.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 29th April 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

10th April 1967

110134. Council of Scientific and Industrial Research. Preparation of 3, 3-bis-chloromethyl oxacyclobutane polymers.

110135. Metallgesellschaft A. G. Process of extracting iron from oxidic ferrous ores.

110136. Rexall Drug and Chemical Company. Process for the production of polymer powder. (14th April 1966).

110137. American Flange and Manufacturing Co. Inc. Cap crimping apparatus.

110138. Aluminium Laboratories Limited. Removal of impurities from gaseous aluminium trichloride.

110139. Centre De Recherches De Pont-A-Mousson. Unit for cooling a movable machine having a rotating part and in particular a centrifugal casting machine.

110140. Farbenfabriken Bayer Aktiengesellschaft. O-Methyl-N - Iso-propylamido-O(2-Nitrophenyl)-Thionophosphoric Acid Ester. (1st December 1966).

110141. M. N. Desai. Furnace for roasting poor sulphide or oride copper ores.

110142. Union Carbide Corporation. Process and apparatus for shaping a shoe upper and bonding a shoe upper to an insole.

110143. Skelleftea Gummifabriks A.B. Improvements in sieve elements.

110144. Johnson & Johnson. Improved polypropylene Tape.

110145. Movielab Inc. Method and apparatus for printing multiple images on photographic raw stock.

110146. Libbey-Owens-Ford Glass Company. Apparatus for treating glass sheets.

110147. Libbey-Owens-Ford Glass Company. Apparatus for heat treating glass sheets.

110148. American Cyanamid Company. Novel phosphorylated 2-Imino-1, 3-Dithioles.

110149. American Cyanamid Company. Polymerization process.

110150. G. P. S. Ahluwalia. Electro mechanical cum photo cell driver automatic track position Indicator.

110151. D. V. Chitaley. Protection against mosquitoes, houseflies and similar other insects. The invention is called Improved mosquito net.

110152. Ghiassuddin, Riazudding and Mirajuddin. Pyrophoric lighters.

11th April 1967

110153. Council of Scientific and Industrial Research. Improvements in or relating to chemical beneficiation of ilmenite.

110154. Gebr. Bohler & Co. Aktiengesellschaft. Improvements in or relating to the manufacture of stretch formed products of high-melting metals.

110155. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Azo dyestuffs of the acridone series and methods of making the same.

110156. Siemens Aktiengesellschaft. System of electrical fuses of different rated current intensity.

110157. Siemens Aktiengesellschaft. System of electrical fuses of different rated current intensity.

110158. Krasnodarsky Ordena Trudovogo Krasnogo Znameni Zazod Elektroizmeritelnykh Priborov. Moving-Iron Ratiometer.

110159. Ciba Limited. Process for the manufacture of new thiazole compounds.

110160. Ciba Limited. Process for the manufacture of new 4-(Pentosidyl-Amino)-5-Nitro-Pyrimidines.

110161. Dr. E. Schenkel. Spinning or twisting device for textile materials. (4th April 1967).

110162. Kali-Chemie Aktiengesellschaft. A process for obtaining and isolating therapeutically valuable isovaleric acid esters from valerian and kentranthus extracts.

110163. F. Hoffman-La Roche & Co. Aktiengesellschaft. 19-Alkenylsteroids and process for the manufacture thereof.

110164. The Upjohn Company. Organic compounds and process.

110165. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electrostatic synchronous machines.

110166. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to low-pressure mercury-vapour discharge lamps.

110167. N. V. Philips Gloeilampenfabrieken. Transmission system for the transmission of information by means of pulse signals. [Addition to No. 107555]

110168. N. V. Philips Gloeilampenfabrieken. Integrated Circuits.

110169. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to low-pressure mercury-vapour discharge lamps.

110170. The English Electric Company Limited. Improvements in or relating to the measurement of a variable. (27th April 1966).

110171. Farbenfabriken Bayer Aktiengesellschaft. Oximecarbamates.

110172. United States Rubber Company. Improvements in plant growth regulants.

110173. Ford Motor Company of Canada, Limited. Manufacture of flat glass.

110174. American Velcro, Inc. Separable fastening device.

110175. Christoffel Kidson, Fumigating machines.

110176. The Singer Company. Sewing Machine Loop Taker.

12th April 1967

110177. Council of Scientific and Industrial Research. A process for treating cellulosic textile materials and products thereof.

110178. E. I. Du Pont De Nemours and Company. Analytical test pack and process for analysis.

110179. Libbey-Owens-Ford Glass Company. Method and apparatus for treating glass sheets.

110180. Ministerul Industriei Chimice. Process for the advantageous utilization of so_x and nb_x from the production of nitrogen and phosphatic fertilizers.

110181. E. Merck Aktiengesellschaft. Isothiazole derivatives and compositions containing them.

110182. Beteiligungs-Und Patentverwaltungsellschaft Mit Beschrankter Haftung. Demountable supporting structure for demountable bridges or similar things.

110183. J. R. Geigy A. G. Process for the production of new sulphanilamide derivatives.

110184. The Dunlop Company Limited. Improvements in or relating to moulds for pneumatic tyres. (19th April, 1966).

110185. Caterpillar Tractor Co. Means to prevent cavitation in fluid motors.

110186. Uniroyal Englebert France. Improvements in pneumaitc tires and breakers therefor.

110187. Fmc Corporation. Flame-retardant regenerated cellulose.

110188. Imperial Chemical Industries Limited. Improvements in textile stiffeners. [Divisional date 7th February 1966]

110189. Facit Ab. Improvements in power-operated printing calculators.

110190. Frick Company. Liquid refrigerant return system.

110191. Toyo Koatsu Industries, Inc. Two-step process for synthesizing urea.

110192. C. K. Sridhar. Folding and sliding cot.

110193. Thomas Osmond Summers. Gyro vehicle.

13th April 1967

110194. Sri B. Barthakur. Machine for polishing rice with paddy husks.

110195. Sri B. Barthakur. Machine for drying parboiled paddy and other grains.

110196. A. Bose. Improvements in or relating to cabinets for filing, storing or like.

110197. I. L. Mehta. W-shape wire-clip.

110198. J. L. Bedi. Swivel caster with shock absorber.

110199. Gosudarstvenny Institut Po Procktirovaniju Predpriaty Tsvetnoi Metallurgii. Device for charging shaft furnace.

110200. J. R. Geigy A. G. Composition for application to a fibre or fibre assembly. (14th April, 1966).

110201. P. R. Mallory & Co., Inc. Anodic bonding of liquid metals to insulators.

110202. Joseph Licas (Industries) Limited. Battery charging systems for use in road vehicles. (25th April, 1966).

110203. Abbott Laboratories. Improvements in purification process.

110204. Abbott Laboratories. Improvements in purification process.

110205. Ahmedabad Textile Industry's Research Association. Improvement in or relating to treatment of cellulosic materials for imparting wet and dry crease recovery properties thereto. [Addition to No. 104139].

110206. Dr. A. Wander S. A. 5h-dibenzo [a, d] cycloheptene derivatives.

110207. Dr. A. Wander S. A. 5h-dibenzo [a, d] cycloheptene derivatives.

110208. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to colour video recording with limited bandwidth.

14th April 1967

110209. Sri S. K. Mukherjee, Sri A. Bose and Sm. R. Banerjee. Improvements in or relating to dehydrater for dehydrating vegetables, fruits or the like materials.

110210. Simms Motor Units Limited. Improvements in or relating to starters for internal combustion engines.

110211. T. M. M. (Research) Limited. Improvements relating to textile cards. (22nd April 1966).

110212. Babcock & Wilcox Limited. Improvements in welding. (22nd April, 1966).

110213. Georg Fischer Aktiengesellschaft. Feeler lever for a hydraulic copying control.

110214. E. Breetvelt. Improved shearing machine for plates.

110215. Universal Oil Products Company. Improved solvent extraction process.

110216. Fisons Pest Control Limited. Acaricides. (23rd April, 1966) [Addition to No. 99554].

110217. Ciba Limited. Tricyclic Acids, process for their manufacture and pharmaceutical compositions comprising them.

110218. Ciba Limited. Basic 11-ethers of 6-morphanthridones, process for their manufacture and pharmaceutical compositions comprising them.

110219. Glanzstoff A. G. A process for the production of high-impact injection mouldings from polyethylene terephthalate. (25th October 1966).

110220. Glanzstoff A. G. Process for the production of a brushable polyurethane gel. (19th December 1966).

110221. Glanzstoff A. G. Method of spinning organic high polymers. (19th December 1966).

110222. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Indol compounds and process for the manufacture thereof.

110223. Teijin Limited. Process for producing bleaching and purified cellulose acetate.

110224. Ciba Limited. Heat-Curable mixture of epoxide resin, dicyandiamide and accelerator.

ALTERATION OF DATE

102745. Post-dated to 15th June 1966 under Section 5 of the Act.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

96638. Mefina S. A. Missile fuse. Accepted on 11th April 1967.

Characterised by the fact that toothed sector is provided with an arcuate edge having its centre on the pivotal axis of the sector and engaged by a collar rigid with the striker in that collar and striker are released by toothed sector only when the latter has executed a complete pivotal movement under the control of clock work.

99066. M & T Chemicals Inc. Organoantimony dithiocarbamates and process for preparing them. Accepted on 4th April 1967.

Comprising reacting an organo antimony halide with a salt of dithiocarbamic acid.

100359. Castrol Limited. Process for the preparation of additives for lubricating compositions and compositions containing the additives so prepared. Accepted on 1st April 1967.

Reacting reaction product (a) of dicyandiamide with alkylene polyamine containing $-NH-(C_1)A-NH_2$ A being 2 or 4 with (b) long chain monoalkenyl succinic anhydride.

100441. N. V. Philips' Gloeilampenfabrieken. Improvements in and relating to sodium vapour discharge lamps. Accepted on 6th April 1967.

The glass envelope is coated at least partly with a layer of conductive tix oxide, whose conductivity is greater than 1.10^4 Ohms.$^{-1}$ .cm^{-1} and lower than 3.10^8 Ohms^{-1} cm^{-1} whose thickness lies between 0.1 μ and 0.5 μ and whose square resistance lies between 10 ohms and 40 ohms.

100442. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to luminescent substances. Accepted on 6th April 1967.

Characterized in that it contains mixed borates of at least one of the alkali earth metals calcium, strntium, barium or magnesium and at least one of the alkaline metals lithium sodium or potassium and is activated with terbium or with terbium and gadolinium the ratio of the over all quantity of atoms of the alkali earth metals and the alkaline metals together to the quantity of boron trioxide lyeing between 4 : 1 and 1 : 2, whilst the over all quantity of activator is 0.02 to 0.4 gm. at/mol boron trioxide.

100458. Owens-Corning Fiberglas Corporation. Apparatus and method for making liquid materials. Accepted on 7th April 1967.

Comprising means for discharging a gaseous stream beneath the surface of the liquid, said means again comprising means for measuring the pressure differential between the pressure above the liquid and atmosphere to provide a signal and means to control the charging utilizing the said signal.

100474. Lal Behari Chatterjee. Textile printing machine. Accepted on 10th April 1967.

Comprises a base supporting a movable platform, a unit having pattern carrying blocks and pattern accommodating means over said platform.

100496. Imperial Chemical Industries Limited. Chemical apparatus and process for the decomposition of a metal amalgam. (29th July 1964). Accepted on 7th April 1967.

Comprising interstiсed layer of a metal wettable by amalgam, in combination with a layer amalgam decomposing material, apparatus being adapted to allow distribution of amalgam within interstiсed layer of metal and to provide electrical contact between amalgam and amalgam decomposing material.

100518. Nauchno-Issledovatelsky Institut Teploenergeticheskogo Priborostroeniya. Device for measuring parameters of fluidity conditions. Accepted on 7th April 1967.

Comprising measuring unit and converter unit, connected to each other and protected with covers and an intermediate element to which is connected one of the units, carrying arrangements for input of output of signals, the covers of the units being connected to the intermediate element.

100547. Veb Robliner Akkumulatoren-und Elementefabrik. Process for the manufacture of tubular plates for storage batteries. Accepted on 13th April 1967.

Comprising that the semi-cylindrical halves of microporous material, placed side by side are welded together to cylindrical tubular pockets and in the tubular pockets, lead electrodes are concentrically put.

100617. Compagnie De Saint-Gobain. Improvements in or relating to the manufacture of sheet glass. [Addition to No. 93290]. Accepted on 10th April 1967.

Provided fixed spacing members in the vicinity of the sides of a tank containing the liquid supporting the glass and causing the guides to travel between the sides of the tank and the respective spacing members.

100693. P. D. Moylan. A double chambered vial for injections. Accepted on 13th April 1967.

Consist of a double chambered vial in which the rubber cap of one chamber containing the solvent under increased atmospheric pressure is applied by sufficient pressure to the glass base of the other chamber containing the solute to sub-atmospheric pressure.

100775. Central Glass Co., Ltd. A method of manufacturing wet process phosphoric acid. Accepted on 13th April 1967.

Comprising a first process in which phosphoric acid slurry is separated into phosphoric acid and second process in which sulphuric acid or mixed acid of sulfuric acid and phosphoric acid is added to gypsum dihydride at 50° to 70° C in the presence of seed crystals of gypsum hemihydride.

100799. K. A. Moothan. Rotary compressor of air and gasses. Accepted on 13th April 1967.

Solid shell of cylindrical shape having an outer circle with centre at the centre of rotation an inner, an eccentric circle with centre some distant apart from the centre of rotation and a frame to which is attached conical plates by means of springs and the said conical plates being in between the blades and being supported by the said blades.

101030. P. Clausse. Improved method of catchment of underground waters. Accepted on 10th April 1967.

Sinking the lining providing a clear passage for discharge of material from the ground level into the water bearing layer surrounding the lower part of the lining driving through ports in the lining a drainage tube inserting into the tube a desending device to desand the water bearing layer surrounding the shaft, evacuating the sand and particles from the shaft replacing the same with gravel and removing the resanding device.

101108. Sandoz Ltd. Improvements in or relating to novel urea derivatives. (14th August 1964). Accepted on 7th April 1967.

Introducing a residue of carbonic acid into an amide of β-amino propionic acid containing in the molecule at least one alkyl radicdl with 8 to 22 carbon atoms.

101374. Fairbairn Lawson Limited. Cloth trimming device. Accepted on 11th April 1967.

Comprising a stationary cutter blade a movable cutter blade and means for rocking the movable blade relatively to the stationery blade.

101375. Fairbairn Lawson Limited. Improvements in or relating to warp let-off motions for weaving looms. Accepted on 11th April 1967.

Comprising a rod operatively connected to the break, the end of the rod at the front of the loom being operatively connected to cam mechanism mounted on the front of the loom.

101436. Corning Glass Works. Fused refractory castings. Accepted on 4th March 1967.

A fused cast refractory casting containing 5% free carbon, comprises essentially carbon, 20% metallic carbide former, 0 to 15% of diluent from group oxygen and nitrogen, remainder 0 to 5% of impurities.

101445. The Firestone Tire & Rubber Company. Process for purifying diolefins and purified diolefins so produced. Accepted on 7th April 1967.

Mixing impure diolefin with aqeous mercuric sulfate solution containing sulfuric acid agitating two liquid phases and separating diolefin in phase and removing carboxyl compound from said diolefin phase.

101620. Simon-Carves Limited. Improvements in or relating to gas purification. (29th September 1964). Accepted on 7th April 1967.

Reacting hydrogen cyanide ammonia, hydrogen sulphide, sulphur and water and autoclaving the reaction product with sulphuric acid under pressure.

101821. Dunlop Rubber Company Limited. Reinforced polymer emulsions and latices. (3rd October 1964). Accepted on 30th March 1967.

A reinforced polymer emulsion of a reinforced polymer composition in a medium comprising water emulsifying agent and a solvent for the polymer.

101827. Amar Dye-Chem Limited. Water soluble azo dyestuffs, their manufacture and use. Accepted on 6th April 1967.

Comprising reacting an amino dzo dyestuff with a halogeno alkanoic or halogeno alkenoic acid halide or anhydride in such a way that atleast one reactive halogen is present per molecule of the end product.

101828. Amar Dye-Chem Limited. Polymeric phthalocyanine reactive dyes, their manufacture and use. Accepted on 6th April 1967.

Comprising reacitng d phthalocyanine compound containing one acylate amino group for every dihalogenotriazinylamino group with an acid binding agent or reacting a phthalocyamine derivative containing two acylatable amino groups with cyanuric halide in the presence of acid binding agent.

101829. Amar-Dye-Chem Limited. Water soluble azo phthalocyanine dyestuffs, their manufacture and use. Accepted on 6th April 1967.

Comprising coupling a diazonium compound or an aromatic or heterocyclic amine with a phthalocyanine compound and reacting the resultant product if necessary with an acylating or azinylating agents.

101830. Amar Dye-Chem Limited. Reactive anthraquinon dyestuffs, their manufacture and use. Accepted on 6th April 1967.

Comprises condensing a water soluable anthraquinone dyestuff with an equimolecular proportion of a dihalogeno-1, 3, 5-triazine derivative.

101831. Amar Dye-Chem Limited. New monoazo dyestuffs, their manufacture and use. Accepted on 6th April 1967.

Comprising coupling a diazo compound obtained from a mono-acylated or azinylated aromatic diamine containing a reactive substituent with a naphthol.

101871. Oto Sahm. Tubular rope flip. (7th October 1964). Accepted on 6th April 1967.

Characterized in that the wall thickness of the parallel straight portions is uniformly layer than that of the semi circular portions.

101877. The Dow Chemical Company. Fabricating expandable thermoplastic resinous material. Accepted on 6th April 1967.

By subjecting the cellular thermoplastic resinous product at heat plastifying temperature to a pressure of from 0.001 to about 10 pounds per square inch absolute cooling the product below the heat plastifying temperature, subjecting the product to a pressure sufficient to cause it to collapse such that diffusion into the cells is substantially equal to diffusion out of the cells.

101891. Owens-Corning Fiberglas Corporation. A fluid nozzle and a method of fabricating the same. Accepted on 7th April 1967.

Comprising the step of fabricating an annular body including a yarn needle, machining the tip of said yarn needle machining the inner surface of a venturi cap positioning a restricted fluid orifice.

101930. Council of Scientific and Industrial Research. Improvements in or relating to nickel electrode position. Accepted on 10th April 1967.

Electrodeposition of nickel for electroforming or salvaging from watts baths wherein as used modulated current with suitable combination of DC/AC current as well as time cycle ratio.

101936. Calico Mills. Method of marking on slide rules. Accepted on 7th April 1967.

Comprises the step of preparing a master negative of the marking of the measurements, exposing negative on a copper coated plate for receiving the markings from negative, developing plats with a photographic developer and thereafter washing and etching developed plate.

101943. Concast AG. Apparatus for guiding a strand in a continuous casting machine. Accepted on 12th April 1967.

Guiding strand in a continuous casting machine, strand put in between mold and withdrawal rolls consisting of frames, each frame carries at least one pair of guiding elements.

101960. Siemens & Halske Aktiengesellschaft. Improvements in or relating to wide band amplifiers. (27th July 1965). Accepted on 7th April 1967.

A wide band amplifier in which a first transistor stage is transformer coupled to second transistor stage and a damped frequency selective shunt circuit is connected across a winding of the coupling transformer.

101962. V. K. Sankhala. Improvements in or relating to an automatic device for sealing of ampules and method of sealing the same. Accepted on 11th April 1967.

Table or frame carrying a vertically mounter bush bearing on one side and a spindle carrying a pulley and ending in a worm being mounted on a ball bearing, an endless belt fitted over said spindle and said bush bearing, a back plate, a pivotally mounted pressure plate mounted on a pivot at one end and a cam operated striker assembly pushing backwards said pressure plate and a pair of gas burners being mounted on a burner stand.

101963. V. K. Sankhala. Improvements in or relating to automatic device for autting ampules and the like and method of cutting the same. Accepted on 11th April 1967.

Consisting of a table or a frame carrying a vertically mounted bush bearing on one side and a spindle carrying a pulley and ending in a worm being mounted on ball bearing, an endless belt, a fixed back plate, a pressure plate, a cam operated striker essembly and a nichrome wire being fitted on insulators.

101969. International Standard Electric Corporation. Line searching network in multi-stage telecommunication, particularly telephone exchange systems. Accepted on 11th April 1967.

Comprises a first signal generating means a further signal generating means a set of magnetic elements forming lock out means.

101970. International Standard Electric Corporation. Satellite communication sychronising system. Accepted on 7th April 1967.

Having a satellite of known range carrying a radio repeater and a plurality of stations capable of multiplex communication a synchronizing system.

101975. Halcon International, Inc. Process for preparing glycidol and glycerine. Accepted on 10th April 1967.

Epoxidizing propylene by reaction with organic hydroperoxide in presence of catalyst like Ti or V, isomerising proplylene "oxide to ally alcohol and catalytically reacting with organic hydroperoxide to form glycidol".

101978. Aluminium Laboratories Limited. Apparatus for contacting a gas with a molten metal. Accepted on 11th April 1967.

Apparatus contacting gas with fine liquid droplets with a liquid space at bottom and passage of gas through apparatus.

101986. Siemens & Halske Aktiengesellschaft. A divital time-division multiplex communications systems. (9th August 1965). Accepted on 10th April 1967.

Comprising a transmitter and a receiver for transmitting and receiving synchronising signal respectively.

102029. Rhone-Poulenc S. A. Process for the preparation of polyvinyl alcohol. Accepted on 7th April 1967.

By polymerising at low temperature in an inert anhydrous organic solvent and in the presence of an ionic catalyst, a vinyloxysilance and then alcoholysing the poly (vinyloxy triorganosiloxane) produced with an alkanol.

102031. Farbenfabriken Bayer Aktiengesellschaft. Chromium complex azo dyestuffs production thereof, and textile materials dyed or printed therewith. (3rd June 1965). Accepted on 12th April 1967.

Reacting a 1 :2-chromium mixed complex with a bi-functional reactive component.

102066. The Anil Starch Products Limited. Stabilizing method of bacterial neutral protease. Accepted on 7th April 1967.

Characterized by adding protease inhibitor to the solution containing the enzyme.

102071. The Anil Starch Products Limited. A method for concentrating fungal catalase solutions. Accepted on 10th April 1967.

Characterized by adjusting the solution containing catalase on a porous cation exchange resin, dispersing the resin in neutral salt solution, adjusting the pH of the dispersion medium to 7-8 with aqueous ammonia, and eluting the catalase from the resin in known manner.

102091. Halcon International, Inc. Process for preparing high purity phthalonitriles and polyesters thereof. Accepted on 6th April 1967.

Process for the preparation of phthalonitriles comprises ammoxidising at a temperature between 300-500°C in the vapour phase in the presence of a catalyst and distilling the phthalonitrile formed.

102100. Council of Scientific and Industrial Research. Improvements in or relating to lacquers for corrosion prevention. Accepted on 7th April 1967.

Preparation of corrosion preventive lacquer by formation in situ of a vapour phase inhibitor such as amine salts of fatty acids in plasticised resins such as drying oil, modified alkyl short oil disolved in volatile solvents.

102116. Eli Lilly and Company. Hydroxythiodiazoles and process for preparing the same. Accepted on 12th April 1967.

By commingling and heating in inert reaction medium NH_2 O R—CH—C—NH_2 with thionyl chloride or thionyl aniline, R being C_1-C_6 alkyl 3-5 carbon ring cycloalkyl groups.

102134. Ciba Limited. Water-insoluble monoazo dyestuffs process for their manufacture and materials dyed or printed therewith. Accepted on 7th April 1967.

Diazo compound of an aminobenzene or a heterocyclic amine is coupled with an aniline compound in which the hydrogen atoms of the amino group are substituted.

102172. Shell International Research Maatschappij N. V. Improvements in or relating to elastomeric compositions. Accepted on 13th April 1967.

Comprises one or more rubber chemicals and an elastomeric block copolymer having two different blocks in the molecule.

102193. Elektrokemisk A/S. Improvements relating to furnace gas cleaning in the melt-electrolytic production of aluminium. Accepted on 11th April 1967.

Mixing ammonia with fluoride containing developed gas in the electrolytic furnace and separating ammonium fluoride for recovering fluoride in the melt electrolysis process for aluminium production.

102238. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to low-pressure mercury vapour discharge lamps. Accepted on 11th April 1967.

Having a glass wall the inner side of which is coated with two superimposed luminescent layers, one of which consists of manganese-activated magnesium germanate or magnesium arsenate and also contains in addition to luminescent material or substance strongly absorbing ultraviolet radiation between 300 and 400nm, and is highly permeable to radiation above 400 nm.

102329. The Procter & Gamble Company. Soft, bulky and absorbent paper sheet and process for its manufacture. Accepted on 10th April 1967.

Manufacture of a soft bulky and absorbent paper sheet comprising forming uncompacted paper, supporting it, thermally predrying said uncompacted paper web, imprinting the knuckle pattern, final drying.

102334. The Plessey Company Limited. Improvements in or relating to magnet assemblies for loudspeakers. Accepted on 11th April 1967.

Includes a hollow cylindrical magnetic yoke, a permanent magnet extending within the yoke provided with a skerted cap.

102361. Stamicarbon N. V. The preparation of ω—laurinolactam. Accepted on 7th April 1967.

Cyclododecanone oxime hydrochloride is reacted with hydrogen chloride in the presence of a polar organic solvent.

102382. Standard Telephones and Cables Limited. Improvements in or relating to carrier current communication systems incorporating repeaters. (9th November 1964). Accepted on 13th April 1967.

Comprising means at a repeater for extracting and reinserting into a two wire transmission line of supervisary signals amplifying and modulating the supervisory signals.

102434. Ciba Limited. Process for optically brightening, dyeing or printing fibrous materials. Accepted on 7th April 1967.

Treating fibrous materials in presence of alkaline reacting substance with fluorescent brightener or a dye containing one or more reactive hydrozen atoms and with a poly functional hydrazine compound.

102609. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. A water-soluble yellow monoazo-dyestuff and process for preparing it. Accepted on 10th April 1967.

Diazotising sulfuric acid ester of 1-aminobenzene-4-β-hydroxy-ethylsulfone and coupling with a pyrazolone.

102629. Casablancas Limited. Rotary suspension bobbin holders for textile spinning machines. (23rd November 1964). Accepted on 7th April 1967.

The catch means is in the form of a pair of longitudinally slidable and angularly displaceable legs liftable from a retained raised position.

102660. Pittsburgh Plate Glass Company. Apparatus for supporting glass sheets. Accepted on 13th April 1967.

Apparatus supporting glass sheet upon flow of a gas comprising gas support bed with plurality of outlet, individual exhaust passage ways, gas supply for outlet, gas amount varying means.

102671. Wirth, Gallo & Co. Measuring instrument. Accepted on 7th April 1967.

Characterised in that the two strings and two transmission elements respectively for the application to the strings of a pretensioning force and a force which depends upon the load that is to be measured are arranged in the form of a star so that the distribution of forces between the two strings is at least approximately determined by this directions.

102695. Berger, Jenson & Nicholson Limited. Process for the production of oil modified alkyd resins and tinting compositions containing the same. (2nd December 1964). Accepted on 7th April 1967.

Heating to esterifying temperature a reaction mixture comprising a polybasic acid, a polyhydric alcohol and a semidrying oil together with a polyoxyalkylene glycol.

102719. Phillips Petroleum Company. A process for making a rubbery polymer of conjugated dienes. Accepted on 7th April 1967.

Comprises polymerizing a conjugated diene or a mixture of conjugated diene and a vinyl-substituted aromatic compound in the presence of an organo alkali metal catalyst and a halogenated compound.

102735. L. Givaudan & Cie S. A. Ketones and process for the manufacture thereof. Accepted on 7th April 1967.

Reacting a unsaturated aldehyde with a ketone and cyclising the resulting hydroxy ketone.

102745. Krishan Chaudhry. Reverse bubble potometer. Accepted on 7th April 1967.

Comprising a stop cock which has two vertical straight holes working in one position and two oblique holes a plant holder, a water reservoir and a graduated capillary U-tube.

102763. Ciba Limited. Photographic materials for the silver dyestuff bleaching process. Accepted on 7th April 1967.

Containing on a support a dyestuff.

102847. Crucible Steel Company of America. Austenitic stainless steel useful in valves and valve parts of internal combustion engines. Accepted on 12th April 1967.

Steel consisting of chromium 15 to 25%, nickel O to 20%, manganese 3 to 10%, nickel and or manganese 7 to 20%, niobium 0.02 to 1.0, carbon .15 to .40, silicon O to O. 4, boron 0.00005 to 0.04, nitrogen 0 to 0.1, sulphur 0 to 0.3%.

102854. W. J. Myles, F. S. Moussalli, A. Bloom and P. L. Tobey. Composition of matter comprising a decomposable material and method of stabilishing the same. Accepted on 7th April 1967.

Comprising a decomposable material and a nitrozen substituted N-allylthiourea compound.

102870. Vickers Seerdrum Limited. Refuse treating apparatus. (7th December 1964). Accepted on 12th April 1967.

Comprising a drum mounted for rotation about its axis means for effecting such rotation said drum having at one end an inlet for refuse, an outlet opening at a position along the length of the drum.

103050. Loba-Chemie. Stabilised polymers containing halogens. (31st May 1965). Accepted on 11th April 1967.

Comprises a mixture of dibasic lead phosphite and dibasic lead sulphite, the p.c. of lead sulphite being 5-95 p.c. by weight on the weight of stabiliser.

103223. Shell Internationale Research Maatschappij N. V. Process for the separation of mixtures of organic compounds. Accepted on 7th April 1967.

The mixture is contacted with a solvent comprising furfural and at least one or more ketones which are inert towards the organic compounds toy. be separated.

103242. Standard Telephones and Cables Limited. Semiconductor devices. (1st February 1965). Accepted on 10th April 1967.

Includes the steps of depositing a substantially uniform layer of semiconductor material of one extrinsic conductivity on a surface of a wafer of semiconductivity material of opposite conductivity.

103411. Neiveli Ceramics & Refractories Limited. Improvements in or relating to sanitaryware. Accepted on 7th April 1967.

Characterized in that it comprises an extension of the rim of the basin structure all round to form a projecting ridge, a supervening sheet of porcelain or other material integrally formed with its adjacent surrounding covering each of the mouths of the number of extra holes provided for the purpose of anticipating a future need to install more faucets than are normally needed.

103463. Inland Steel Company. Improvements in or relating to the manufacture of steel. Accepted on 12th April 1967.

Characterised by the step of specially controlling the atmosphere within the furnace so as to limit the oxygen content of the furnace atmosphere to a valve below the customary valve in heating steel bodies prior to hot working.

103480. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for oxidizing metal salt solutions. Accepted on 7th April 1967.

Adding to the solution a surface-active non-foaming substance.

103552. Dynamit Nobel Aktiengesellschaft. A process for the production of articles from chlorinated polyvinyl chloride. Accepted on 11th April 1967.

Comprises in forming an article such as filaments, fibres etc. from chlorinated tactic P.V.C., produced by chlorinating P.V.C. containing from 55-80 p.c. syndiotactically arranged chlorine atom and mono or bi-axially stretching the same.

103732. Institut Francais Du Petrole, Des Carburants Et Lubrifiants, Floating structure dynamic positioning apparatus. Accepted on 7th April 1967.

Comprising a shaft equipped with two arms, control means for the shaft, said arms corporating with two drums respectively associated with the two propulsion units, a device in each drum to convert the axial displacement of the shaft into a vertical displacement of a sliding element associated with the drum.

103780. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process and device for the manufacture of unilaterally curved plastics sheetings having a permanent tendency to curl. Accepted on 12th April 1967.

Manufacture of unilaterally curved plastics sheetings having a permanent tendency to curl comprising deflecting the sheeting and then drawing below softening temperature.

104209. Council of Scientific and Industrial Research. Improvements in or relating to condenser microphones. Accepted on 10th April 1967.

Comprises a housing for the microphone, a diaphragm, a rear electrode and a clamping device consisting of a clamping ring made of soft insulating material on the plunger assembly.

104867. Amicon Corporation. Method of shaping polyelectrolyte polymer. Accepted on 7th April 1967.

A salt selected from the group consisting of calcium nitrate, calcium chloride, sodium bromide and mixture thereof is imbibed into the composition to be shaped and a portion of the solvent is evaporated and then the composition is shaped.

104525. Council of Scientific and Industrial Research. Leverroller extensometer. Accepted on 7th April 1967.

An extensometer in which the levers afford a manifold magnification to the actual displacement.

104545. Ciba Limited. Epoxy resin compositions. Accepted on 10th April 1967.

Comprising epoxide resin, a curing agent therefor and as flexibilising agent an adduct or mixture of adducts containing on average at least two mercaptan groups per molecule, of a monoepisulphide with a compound or a mixture of compounds, containing at least two hydrozen atoms directly attached to sulphur or to nitrozen.

104661. International Business Machines Corporation. Record card verifying machine. Accepted on 7th April 1967.

Including means for reading a record, means for advancing a detail record column by-column past record reading means, a register for selectively storing a pattern of databits corresponding to the data to be verified in the detail record, first control means responsive to the presence of a predetermined control indicium in the program record for effectively maintaining a chosen pattern of data bits in register and second control means responsive to disagreement between chosen data bit and data read by record means.

104708. Amsted Industries Incorporated. Mold and method of casting. Accepted on 11th April 1967.

Characterized by an adapter inter posed between pouring tube and mold means adapter having a bottom inlet, space leading upwardly from bottom opening terminating the top outlet opening.

104740. Landbouwwerktuigen-En Machinefabriek H. Vissers N. V. Improvements in and relating to harrow beams. Accepted on 7th April 1967.

A harrow beams consisting of two bars of U-shaped or angle shaped section and the flange of which are directed towards each other.

104742. Georges Lesieur & Ses Fils. Improvements in or relating to a device for positioning, on a mechanical conveyor, light objects moved by a pneumatic conveyor. Accepted on 10th April 1967.

Characterized in that it comprises a curved inlet duct connected to pneumatic conveyor in which the light objects are conveyed at high speed the inlet duct being progressively incurvated towards the top.

104961. Wilhelm Stablecker G. m. b. H. Case for the upper lower belts such as of a drawing mechanism for a spinning machine. Accepted on 7th April 1967.

Comprising undivided side walls, guide rails for the belts mounted between the side walls.

105048. Standard Telephones and Cables Limited. Improvements in or relating to telecommunication systems. Accepted on 6th April 1967.

In which the exchange includes a traffic unit to which all of that exchange's trunk are connected.

105054. Allied Chemical Corporation. Process for washing particulate materials. Accepted on 12th April 1967.

Washing particulate materials comprises passing a liquid which is solvent only for impurities, material and liquid flowing counter currently.

105088. Sterling Engineering Company Limited. Improvements in or relating to automatic firearms. (7th May 1965). Accepted on 7th April 1967.

The mechanism including a pivotal sear movable by operation of a spring-loaded trigger and a linkage means permitting longitudinal or substantially longitudinal movement of the sear.

105168. Dynamit nobel Aktiengesellschaft. Improvement in or relating to chlorinated polyvinylchloride protective coverings. Accepted on 12th April 1967.

Comprising chlorinated polyvinylchloride having a chlorine content of from 64 to 70% by weight and having from 50 to 90% of the chlorine atoms in 1.2, dichloroethylene units and usual processing auxilliaries.

105174. Aktiebolaget Bofors. Device for feeding of cartridges in one of two parts of a cartridge magazine, located on both sides of a reciprocating loading member in a gun, dependent upon the loading movement of the loading member. Accepted on 10th April 1967.

Characterised in that the reciprocating cartridge transfer means of said two magazine compartments are each connected to a common drive shaft at 180° phase difference.

105261. Leeds & Northrup Company. Low noise amplifiers. Accepted on 11th April 1967.

Comprising an input junction transistor of the low collector current, high gain type, the input signal being applied to the base of the input transistor, a source inpedence connected between the base and emitter of the input transistor, a field effect transistor, the collector of the input transistor being coupled to the gate of the field effect transistor, a collector resistor connected to the collector of the input transistor and a load coupled to the drain of the field effect transistor.

105339. Carlisle Chemical Works, Inc. Preparation of solid metal soaps. Accepted on 6th April 1967.

Comprises contacting droplets consisting of a molten water insoluble organic acid and a salt of the said acid with metal like mg. co. ba. etc. in an aqueous medium with the hydroxide of at least one other metal of the said group.

105414. Glaxo Laboratories Limited. Spray device. (4th June 1965). Accepted on 7th April 1967.

Producing particles of gelled aqueous colloid wherein colloid is sprayed and gelled while falling through gas phase, the liquid is caused to move centrifugally to the peripheries.

105732. Council of Scientific and Industrial Research. Improvement in the process for the preparation of desiccant from gypsum. Accepted on 11th April 1967.

Comprises heating powdered gypsum at 100—230° exposing to atmosphere treating with water soaking in aquous solution of potash alum, washing and heating at 100 to 300°C for dehydration.

105882. Koppers Company, Inc. Improvements in or relating to high chambered horizontal coking retort ovens. Accepted on 12th April 1967.

Horizontal coking retort oven comprising elongated heating chambers in alternation with coking chambers heating chambers, with vertical flues, regenerator compartments positioned beneath heating chambers.

106433. Webasto-Werk G.M.B.H. Improvements in and relating to heating furnaces operable with liquid fuel. Accepted on 13th April 1967.

Heating furnace with liquid fuel fed to a vaporiser, a thermal pick up located near to vaporiser wherein pick up is connected to valve which in turn is connected to feed line.

106486. Centre De Recherches De Pont-A-Mousson. Method and device for the centrifugal casting or iron, Accepted on 7th April 1967.

Method of centrifugally casting iron comprising incorporating in the liquid iron a graphitizing product.

107326. Carrier Corporation. Air conditioning units. Accepted on 10th April 1967.

Passage means including first portion having heat exchanger coil means for passage of air and having a face providing an inlet to passage means, a second portion of passage means having an outlet for flow of air in one direction from the coil means to outlet, the passage means including surface means, a plenum chamber adapted to receive primary air and nozzle means along surface means.

107387. Film Cooling Towers (1925) Limited. and P. D. Edmondson. Improvements in or relating to cooling towers. (7th October 1965). Accepted on 11th April 1967.

Providing a natural draught cooling tower with a horizontal decking dividing the inlet into two parts, and an irrigation stack above the decking for cooling water.

1

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Oronzio de Nora Impianti Elettrochimici, an Italian Corporation of Via Bistolfi 35, Milan, Italy, seek leave to amend the claims in the specification in respect of application for patent No. 89643. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

2

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Metallgesellschaft A. G. (16) Frankfurt A. M., Reuterweg 14, German Federal Republic, a Company organized under the laws of German Federal Republic, seek leave to amend the application in respect of patent application No. 90924. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

3

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that The Lummus Company, of 385 Madison Avenue, New York, New York 17, United States of America, a Corporation organized under the laws of the State of Delaware, U.S.A., seek leave to amend the claims in the specification in respect of patent application No. 94583. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs

Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

4

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Kurashiki Rayon Co., Ltd., of 1621, Sakazu, Kurashiki City, Japan, a Joint Stock Company duly organized under the laws of Japan, seek leave to amend the description and claims in the specification in respect of patent application No. 100886. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

5

The amendments proposed by Burgess Products Company Limited in respect of patent application No. 96076 as advertised in the Gazette of India, Part III, Section 2 dated the 19th November 1966 have been allowed.

Registration of Assignments, Licences, etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

Cessation Patents

Restoration Proceedings

1

An order has been made on the 31st March 1967 restoring the Patent No. 78772 dated as of the 6th October 1961, granted to Krishnan Rajagopalan for "stripping device for piles of loose material".

2

An order has been made on the 31st March 1967, restoring the patent No. 78787 dated as of the 7th October 1960 granted to Hewitt-Robins International S. A. for "improvements in or relating to idler rollers".

3

An order has been made on the 30th March 1967, restoring the patent No. 79743 dated as of the 11th December 1961 granted to Shavax Khurshadji Karanjia for "improvements in or relating to toys".

4

An order has been made on the 22nd February 1967 restoring the patent No. 81154 dated as of the 22nd December 1960, granted to Owens-Corning Fiberglas Corporation for "method for forming fiers from heat-softenable materials".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129439. Mohd. Rafiq Mohd. Shafiq & Co., 1697, Rodgarn, Lal Kuan, Delhi-6 (an Indian Partnership Firm). "Pulley of the burner", September 16, 1966.

Class 1. No. 130132. Elegant Industries Private Limited (A company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Brooch", January 16, 1967.

Class 3. No. 129621. Caltex Electric Industries, Silk Mill Compound, G. B. Road, Malad, Bombay-64, (Maharashtra), an Indian Partnership firm, "Night Lamp", October 15, 1966.

Class 3. No. 130100. Atlas Radio & Electronic Industries, a partnership firm registered in India, Ginwala Solicitor Compound, Khanpur Road, Ahmedabad-1, State of Gujarat, India, "Signal Generator", January 9, 1967.

Class 6. No. 129658. Smt. Geeta Sengupta, C/o. M/s. East India Leather Works, 14, Anandavelu Mudali Street, Perambur, Madras-11, India, Indian National, "leather purses and wallets", October 25, 1966.

Class 12. No. 130121. Ahsan Ali, 7832, Nai Basti, Bara Hindu Rao, Delhi—6, Indian National, "mosquito net for babies", January 10, 1967.

Class 13. Nos. 129157 to 129161 and 129163. The Crown Spg. & Mfg. Co., Ltd., Kokhale Road, (South), Parel, Bombay 13, Maharashtra, Nationality—Indian Company, "Textile goods", August 8, 1966.

Class 13. Nos. 130101 to 130103. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab) a registered firm Indian Nationality, "Textile goods", January 10, 1967.

Class 13. Nos. 130156 and 130157. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality. "Textile goods", January 18, 1967.

Class 13. Nos. 130176 to 130186. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company. "Textile piecegoods". January 20, 1967.

Class 13. Nos. 130242. to 130249. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay 1, Indian Company, "Textile piecegoods", January 31, 1967.

Class 14. No. 129162. The Crown Spg. & Mfg. Co., Ltd., Gokhale Road, (South), Parel, Bombay 13, Maharashtra, Nationality—Indian Company, "Textile goods", August 8, 1966.

Class 14. Nos. 130044 and 130045. Jiyajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", January 3, 1967.

Class 14. Nos. 130158 and 130159. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods", January 18, 1967.

The 6th May, 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78 A of the Act.

17th April 1967

110225. Anant Govind Joshi. Automatic air locking chamber for centrifugal pump.

110226. Ramnath Chandra Mouliswar. Steel wire mesh imbedded rubber foam or nylon cord rubber tube protector for puncture protection in all pneumatic tyres.

110227. R. C. Mouliswar. Steel wool or steel mesh undertread pneumatic tyres for perfect protection and longer life for universal use and application.

110228. Montecatini Edison S. P. A. Process for the production in continuous of unsaturated aldehydes or unsaturated nitriles from monoolefines and oxygen or ammonia and oxygen.

110229. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius and Bruning. New water-soluble monoazo-dyestuffs and process for their preparation.

110230. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Imidazole derivatives and process for the manufacture thereof.

110231. S. P. Kinney Engineers, Inc. Furnace gas cleaning and cooling apparatus.

110232. Union Carbide Corporation. Dehydrogenation of ethylbenzene to styrene.

110233. International Standard Electric Corporation. Mobile telephone system.

110234. International Standard Electric Corporation. Multivariable modulation and demodulation data communication systems.

110235. Centre De Recherches De Pont-A-Mousson. Liquid pouring installation.

110236. Glaverbel., Improvements in or relating to a process and apparatus for forming metal oxide surface coatings on glass and other materials.

110237. H. Holloway. A process for the polymerization of lactones.

110238. N. S. Kapoor and H. S. Kapoor. An improved cycle lock or the like.

110239. P. M. Deshpande B. E. improvement in or relating to rotary switch.

110240. Mr. J. H. Kowley and Mr. N. H. Kapadia. Production of polythene and/or flexible synthetic polymer bands for packaging.

110241. Messrs. Dr. D. S. Umrootkar and A. N. Dandge. For reduction in consumption of patrol or deisel (fuels) used in internal combustion engine *i.e.* increase in mileage per litre or per unit by use of potentised homoeopathic drug.

110242. G. V. Gogate (B. Sc.). Manufacture of boards & sheets from the fibrous part of a betel-nut tree leaf.

110243. Pearline Paris Private Limited. A diamond-cut glass bottle specially designed and invented by us for marketing our after-shave lotion, under the trade name "Icy-Kool" and also to be used as container for preserving any other toilet preparations etc. The said bottle has the emblem of a "Crown" accompanied by the word "Pearline" embossed at the bottom of the bottle. The bottle is fitted with urea cap, also bearing word "Pearline", and a symbol "Crown" at the top, with oblong flat surface on one side.,

110244. Pearline Paris Private Limited. An oblong vertically tapering, pear-shaped glass bottle, with square bottom, with a perfectly circular emblem touching the four sides of square, and a small concentric circle at the centre. An isosceles triangle based on each side of the square, tapers off into the corners of our rectangular smooth surfaces closing up into a perfect square at the top. The length of the side of the square at the top is half the length of the side of the suqare at the bottom of the bottle.

18th April 1967

110245. Buckman Laboratories, Inc. Pulping process.

110246. Dynamit Nobel Aktiengesellschaft. Improvements in or relating to corrosion resistant material.

110247. Westinghouse Electric Corporation. Vending machine gate mechanism.

110248. T. M. M. (Research) Limited. Improvements relating to chutes for feeding textile materials to cards. (22nd April 1966).

110249. Sumitomo Chemical Company, Ltd., Process for producing high purity β-methylmercaptopropionaldehyde.

110250. United Aircraft Corporation. Article for printing.

110251. United Aircraft Corporation. Improvement relating to an article for printing.

110252. United Aircraft Corporation. Method and article for printing and engraving.

110253. United Aircraft Corporation. Method for producing an article for printing.

110254. Ciba Limited. Process for the manufacture of new oxindoles.

110255. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Process for the manufacture of substituted cyclopent-2-enones.

110256. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Pharmaceutical composition.

110257. The Ganesh Flour Mills Company Limited. Improvements in or relating to proteinaceous food products.

110258. Ciba Limited. New anthraquinone dyestuff pigments and process for their manufacture.

110259. Ciba Limited. Process for the manufacture of aminoanthraquinones.

110260. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Production of expanded moldings of olefin polymers.

110261. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to arrangements including a transistor connected as an unstable relaxation generator.

110262. Automation Industries Inc. ultrasonic inspection. (Divisional date 21st July 1965).

110263. Shell Internationale Research Maatschappij N. V. Maleinization of synthetic rubber.

110264. Mastabar Mining Equipment Company Limited. Improved rotary fluid flow control valve assembly.

110265. C. A. V. Limited. Liquid fuel pumping apparatus. (25th April 1966).

110266. G. B. Hern. Improvements relating to building structures. (29th April 1966).

110267. H. Holloway. Process for the polymerization of β-lactones.

110268. Indian jute Industries' Research Association. Bleaching jute.

110269. Antonio Saenz de Tejada Y Orti and Manuel Camello Jordan. Improvements in cotton harvesting machines. (23rd April 1966).

110270. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. New water-soluble basic monoazo dyestuffs and process for preparing them.

110271. Phillips Petroleum Company. Method and apparatus for controlling the static pressure in a furnace carbon black reactor.

110272. American Cyanamid Company. Process for preparation of polymers.

110273. United Aircraft Corporation. Improvements in and relating to a composite reinforced plastic pipe and method for fabricating this pipe.

110274. United Aircraft Corporation. Method for producing a master printing plate.

110275. E. I. Du Pont De Nemours & Company. Stabilized compositions of 2-alkoxycarbonylaminobenzimidazolecarboxylic esters.

110276. E. I. Du Pont De Nemours & Company. Esters of benzimidazolecarbamic acid as mite ovicides.

110277. Brown & Williamson Tobacco Corporation. Improvements in or relating to pneumatic conveying system for cigarette-making machines.

110278. Matsusrita Electromics Corporation. Mos field effect transistor.

110279. F. K. Mogensen, Dr. Screening Device.

110280. De Vilieg Machine Company. Tool handling mechanism and tool for use therewith.

110281. Institut Dr. Ing. Reinhard Straumann A. G. Alloys with a small temperature coefficient of elasticity.

110282. Institut Dr. Ing. Reinhard Straumann A. G. Methods of making structural materials having a low temperature coefficient of the modulus of elasticity.

19th April 1967

110283. Westinghouse Electric Corporation. Chemical Constituent sampler.

110284. Hindustan Lever Limited. Sulphonates. (26th April 1966).

110285. United Shoe Machinery Corporation. Improvements in self locking threaded fasteners.

110286. Universal Oil Products Company. Stabilization of rubber.

110287. Metalastik Limited. Improvements in or relating to spring and bearing assemblies. (21st April 1966).

110288. The Dunlop Company Limited Method of bonding. (29th April 1966).

110289. Imperial Chemical Industries Limited. Protection of metal equipment for use in chemical plant. (2nd May 1966).

110290. Halcon International, Inc. Chemical process.

110291. M. & T. Chemicals Inc. Novel process.

110292. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Process for improving the nutritious property of microorganisms.

110293. Algonquin Shipping and Trading Limited. Design of general cargo and bulk cargo vessel. (2nd September 1966).

110294. The Marley Company. Fire proof concrete modular cross-flow natural draft cooling tower.

110295. R. G. DePenning. Magnesite refractory materials of the kind used for carrying out hot-repair to metallurgical or other high temperature furnaces.

110296. R. Singh. A timing switch.

110297. I. Chaliha. Vehicle for cultivation.

110298. E. I. Du Pont De Nemours & Company. Fungicidal compositions of 2-benzimidazolecarbamic acid, alkyl esters.

20th April 1967

110299. International Standard Electric Corporation. Diversity receiving system.

110300. Krka Tovarna Zdravil Novo Mesto. Process for producing new haloganated 5-nitroimidazole derivatives.

110301. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius and Brunning. Process for the manufacture of polyolefins having a broad molecular weight distribution.

110302. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius and Bruning. Process for the manufacture of polyolefins having a broad molecular weight distribution.

110303. J. R. Geigy A. G. Process for the production of heavy metalcontaining formazane azo dyestuffs.

110304. J. R. Geigy A. G. Process for the production of new aminocarboxylic acid esters.

110305. The British Iron and Steel Research Association. Improvements in and relating to the analysis of molten materials. (21st April 1966).

110306. Halcon International, Inc. Chemical process.

110307. Union Carbide Corporation. Apparatus for producing carbon blacks.

110308. Imperial Chemical Industries Limited. Polyester preparation. (22nd April 1966).

110309. Farbwnfabriken Bayer Aktiengesellschaft. Process for the dyeing and printing of synthetic textile materials. (2nd January 1967).

110310. M. L. de Guevara. Fluochlorozone and method of preparation.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933. of such oppositions.

A limited number of printed copies of the applications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

91271. Radonja Kemijska Industria. Process for the production of diamino-chloro-s-triazine and its alkyl and alkenyl derivatives respectively. Accepted on 20th April 1967.

Refluxing an alcoholic solution of dicyanamide and its N3-alkyl or alkenyl derivative in the presence of a basic catalyst.

99388. Aktiebolaget Bofors. Device for guiding round cases ejected by recoil action of anautomatic gun. Accepted on 6th April 1967.

Comprising guide means defining upwardly concave guide surface extending the direction of the barrel arranged in elevational system and suspention means attaching said guide means to the elevational system.

100428. Werzalit Pressholzwerk J. F. Werz Jr. Kg. Improvements in or relating to the manufacture of relatively thin walled mouldings. Accepted on 6th April 1967.

Comprises the steps of first producing a flexible pre-pressed mouldingin a first mould and subsequently subjecting the prestressed moulding to heat and pressure in a second mould.

100509. V. P. Kulkarni. Improvements in or relating to centrifugal switch used on single phase electric-motors for disconnecting starting winding. Accepted on 12th April 1967.

Comprising of a boss with radially sliding weights with slaping face, the weights moving a flange with similar sliding face longitudinally when motor attoms full speed.

100557. Vsesojuzny Nauchno-Issledovatelsky Institut Neftekhimicheskikh Processov. Process for production of liquid hydrocarbon mixture. Accepted on 13th April 1967.

Comprising separating from gasoline feed stock the fraction in the 60°—180° C boiling range, drying till the moisture content of the fractions is not greater than 0·05 per cent, subjecting the desiccated fractions to catalytic reforming and mixing the reformate with feed stock gasoline fraction boiling below the fraction subjcted to reforming.

100684. Owens-Corning Fiberglas Corporation. Glass composite underground storage tanks. Accepted on 20th April 1967.

Comprising a thin layer of synthetic resin, means holding said layer, a body layer containing chopped strand reinforcement and resin, mechanical stabilising interspersed within the body layer, a criss-cross layer of continuous reinforcement on the outside of the body layer said criss-cross layer holding a thin coating of resin on the outer surface of the composite body.

100731. Lodge-Cottrell Limited. Improvements in or relating to electro-precipitators. (29th July 1964), Accepted on 20th April 1967.

An electrode precipitator having a plurality of spaced collector electrode assemblies independently supported in the casing, each collector electrode comprising two, only spaced collector electrode and bracing means connecting together the two electrodes.

100879. Indian Oxygen Limited. Improvements in electric arc welding. (6th August 1964). Accepted on 18th April 1967.

An electric arc welding power supply system including a secondary power supply adapted to provide pulses of welding current.

101183. Leesona Corporation. Improvements in or relating to winding machines. Accepted on 14th April 1967.

Comprises a breaking device operative between the rotatable tubular guide and a fixed member to frictionally reduce the rate of rotation of said guide.

101212. Bristol Aeroplane Plastics Limited. Improvements relating to bore hole type wells. (21st August 1964). Accepted on 18th April 1967.

A pipe formed by windings of resin impregnated fibre with slots lying in parallel to some of the fibres of the layer of winding.

101318. Dunlop Rubber Company Limited. Improvements in or relating to apparatus for the manufacture of pneumatic tyres. (8th September 1964). Accepted on 17th April 1967.

Comprising a tyre building former having a pair of members each member having a plurality of circumferentially spaced a part axial projection.

101522. Imperial Chemical Industries Limited. Method of bonding carpets. (18th September 1964). (Addition to No. 85533). Accepted on 14th April 1967.

Comprises applying organic thermoplastics particles to the back of a tufted carpet web, treating the particles and pressing a thermoplastic film against the surface.

101523. A. G. Eickmeyer. Method and composition for removing acid gases. Accepted on 17th April 1967.

Comprising an aqueous solution containing at least 15% by weight of potassium carbonate or potassium borate or a mixture of both activated by ethylene polyamines, alkanolamines or alkanolamine borates or mixtures of any of those.

101865. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of producing a photosensitive lacquer. Accepted on 6th April 1967.

Characterised in that a lacquer is prepared with an organic and/or a chromate which is insoluble or substantially insoluble in water but is readily soluble in solvents in which the polyvinylbutyl resin is soluble.

101924. Council of Scientific and Industrial Research. Improvements in or relating to anti-corrosion packaging. Accepted on 8th April 1967.

Anticorrosion packaging consisting using packaging material like kraft paper, butter paper. coated with a mixture of nitro compounds and napthols such as nitro phenols, di-nitrobenzene alpha and beta napthol.

101944. Snam S. p. A. Process for extracting aromatic hydrocarbons from hydrocarbon mixtures containing same. Accepted on 10th April 1967.

Treating hydrocarbonaceous mixture with formylmorpholine and a non-aromatic refluxing agent and maintaining the phases in mutual contact at 20 to 90°C. discharging the non-aromatic stock, taking out the aromatic hydrocarbons and washing them in a heavy phase.

101943. Takeda Chemical Industries, Limited. Substituted carbamoylthio derivatives, process for their manufacture and pesticidal compositions containing, the same. Accepted on 10th April 1967.

Comprising reacting 1, 3-dithiocyanate-2-tertiary amino propane or 2, 3-dithiocyanate-1-tertiary amino propane with a mineral acid and if desired converting the resulting salt into free base.

101966. Mechema Limited. Insecticidal dusting powders. (12th October 1964). Accepted on 11th April 1967.

Comprising a thiophosphoric ester, a solvent oil of low volatility and iron free kieselguhr.

101967. Mechema Limited. Insecticidal powders. (6th April 1965). Accepted on 11th April 1967.

Comprising a thiophosphoric ester, a solvent oil or low volatility, iron-free kelselguhr and an inert wetting or dispersing agent or bath subagents.

101993. Whiting Corporation. Coupling means for railway traction vehicles. (Addition to No. 90346). Accepted on 12th April 1967.

Comprising a generally horizontally disposed U-shaped member having the distal ends thereof adapted for lifting and pushing engagement with one end of the railway car at locations spaced one on each side of the longitudinal centre line.

102061. The Anil Starch Products Limited. Improvements in or relating to the preparation of starch having improved adsorption capacity for amylase. Accepted on 14th April 1967.

Characterized by suspending starch in an aqueous solution of ammonium sulphate or polyalkyleneglycol and heating the starch suspension at a temperature 75—100°C.

102093. British Visqueen Limited. Tubular film manufacture. (20th October 1964). Accepted on 14th April 1967.

Comprising continuously extruding plastic material through a tube forming die and collapsing the tube to a lay-flat form by a means including V-shaped guide after expanding the tubing in heat-softened state by a bubble of air or other gas characterized in that while the tubing is collapsed by said guide those portions of the tubing which form the edge folds of the flattened film are cooled by contact with cooled surfaces.

102094. British Visqueen Limited. Improvements in and relating to tubular film of plastics material (20th October 1964). Accepted on 14th April 1967.

Comprising subjecting at least one surface of a flattened film of synthetic plastics material as it is advancing, to high voltage electric stress characterised in that the area or areas so treated stop short of the two side folds of the tubing and in that there is imparted to the tubing after treatment a controlled first such that atleast one of the side folds is brought to lie along a treated area of the flattened film.

102111. Przemyslowy Instytut Telekomunikacji. Stacking in layers or assemblable ferromagnetic core. (Addition No. 84431). Accepted on 17th April 1967.

Improvement over what is disclosed in Indian patent specification No. 84431 in that the individual laminations form a stack of layers instead of single piece of a strip.

102123. Imperial Chemical Industries Limited. Process for the manufacture of acrolein and acrylic acid by oxidation of propene. (26th October 1964). (Addition to No. 91541). Accepted on 17th April 1967.

Comprising interacting propene and oxygen in the vapour phase at 300° to 600° C in the presence of a catalyst.

102179. Massey-Ferguson S. A. Improvements in ploughs. (29th October 1964). Accepted on 14th April 1967.

A turning mechanism interconnecting the subframe and the plough assembly and operable to rotate the latter on release of latch means, main frame includes means for attaching same to a tractor "quick-hitch."

102231. Universal Oil Products Company. Production of 2,3-dimethylbutane. Accepted on 18th April 1967.

Isomerizing nephexane at 100—500°C. pressure from atmosphere to 150 atmospheres in presence of a catalyst comprising support, an acid acting halogen and a metal selected from the groups VI B and VIII of periodic table.

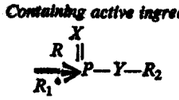
102237. Albiswerk Zurich A.G. A method for the tubular jointing of two hollow tube sections; joint between two hollow tubes as per this method and a fixture for the application of the method. Accepted on 20th April 1967.

Both the sections are centered on a mandrel, the joining places are jointed with an electrically conducting material by soft soldering, the jointed place is mechanically strengthened and then the mandrel is removed.

102254. Carrier Corporation. Absorption refrigeration machine. Accepted on 14th April 1967.

At least one of sections having a plurality of heat exchange tubes therein forming a tube bundle for passing a fluid medium.

102255. Carrier Corporation. Absorption refrigeration machines. Accepted on 14th April 1967.



Heat exchange tubes or other heating means are disposed adjacent refrigerant and absorbent sumps or at other desired locations in an absorption refrigeration machine in direct or indirect heat exchange relation with liquid adjacent the surface of the liquid in these sumps.

102289. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Selective herbicide. Accepted on 20th April 1967.

Composition comprising an acid anilide and a urea derivative in the ratio by weight anilide to urea-1:1 to 10:1.

102307. Farbenfabriken Bayer Aktiengesellschaft. Fungitoxic compositions. (3rd June 1965). Accepted on 20th April 1967.

Containing active ingredient

in admixture with solid carrier or emulsifying agent.

102376. Nisso Seiko Kabushiki Kaisha. Method of manufacturing a cast iron roll and a cast iron alloy manufactured thereby. Accepted on 24th April 1967.

Making cast iron roll with composition carbon 1·7 to 3·8%, silicon below 2·5% detriments below 020%, manganese 1·0%, chromium 2%, molybdenum 2%, vanadium 1%, tungsten 1%, heating below solidus, plastically defrom, finishing by machining after series of heat treatment.

102493. Kaiser Aluminium & Chemical Corporation. Refractory compositions. Accepted on 14th April 1967.

A refractory composition consisting of 1 to 5% by weight of potassium tripolyphosphate and 0 to 3% of plasticizer, balance being refractory oxide.

102519. Railroad Permanent Way Products Corporation. Track structure or railroads and the like. Accepted on 20th April 1967.

Comprising spaced rows of elongated precast reinforced concrete beams supported on road bed, a plurality of precast concrete cross beams, means for connecting each cross beam, and means for anchoring traction rail.

102754. Vyzkumny ustav strojirenske technologie a ekonomiky. In the manufacture of balls, particularly balls for the ball bearings, a method for controlling the movement of balls and an apparatus therefor. Accepted on 20th April 1967.

Position of contact point between the active surface of control roller and between the ball is changed in dependence upon the rotation of the ball in direction of axis of rotation of the control roller in a periodically variable manner.

102839. Dayco Corporation. Textile Fibre drafting apron. Accepted on 14th April 1967.

Has an inner rubber layer, an outer urethane elastomer layer and an intermediate layer of textile cord.

102859. Sigma Instruments, Inc. Condition-control galvanometer with photoelectric limit sensing. Accepted on 20th April 1967.

Comprising of a transducer connectible to be responsive to variations in condition, a pointer arm, photo switching means, mask means, and control switching means responsive to said photo switching means.

103020. Formica Corporation. Decorative laminate and process for preparing the same. Accepted on 14th April 1967.

Comprising preparing a stacked assembly of resin-impregnated core sheets, a decorative sheet with a resin having printed design, an embossing design, and a release sheet, thereafter heat and pressure consolidating the assembly and removing the release sheet.

103281. Vsesojuzny nauchno-issledvatelsky proektnokonstruktorsky institut metallurgicheskogo mashinostroeniya. Rolls of a mill for cross rolling. Accepted on 14th April 1967.

Rolls for cross rolling preferably a helical one characterised in that each roll is provided with a conical section disposed before pass for rolling bodies of rotation.

103438. Novetics (India). Permanent lighter. Accepted on 20th April 1967.

Comprising a body can fitted at its one edge with a flint of special composition, absorbent material inside the body case for accommodating fuel and a metal stik housed in the holding knob.

103475. International Standard Electric Corporation. A frequency-controlled multifrequency generator. Accepted on 19th April 1967.

A multifrequency generator including comparing means for cyclically comparing the output of oscillators with a predetermined one associated one of converted output signal.

103627. J.M. Huber Corporation. Method of improving the brigthness of kaolin clays. Accepted on 17th April 1967.

Treating clay slurry with a peptizing agent, allowing the impurities to settle and separating the resulting slurry from the settled impurities.

103636. The British Non-Ferrous Metals Research Association. Improvemens in or relating to foundry moulding sand compositions. (29th January 1965). Accepted on 14th April 1967.

Moulding sand composition comprising particulate refractory material in admixture with aquous solution of sodium silicate, glucose, mild oxidising agent inert toward said silicate.

103781. Imperial Chemical Industries Limited. Improved photosensitive films. (22nd February 1965). Accepted on 7th April 1967.

Comprising polyethylene terephthalate layer containing 0·25%—2·0% weight of inert particles bonded to a photosensitive gelatin layer.

103966. Shell Internationale Research Maatschappij, N.V. A process for the hydrogenative cracking of a hydrocarbon oil. Accepted on 19th April 1967.

Characterises in that the hydrocarbon oil is contacted in the presence of hydrogen in a first reaction zone with a catalyst and portions of hydrocarbon fractions having a F. B. P. of not more than 525°C are separated off and at least one portion of the remaining part of the reaction product is contacted in the presence of hydrogen in a second reaction zone with catalyst.

104067. Veb Hochvakuum Dresden. Improvements in and relating to devices for measuring low gas pressures. (13th September 1965). Accepted on 14th April 1967.

Comprising a cylindrical tubular cathode in which through the closed and a rod-shaped anode is inserted and a hollow cylindrical magnet insulation of anode being so extended that the free end of anode rod in discharge space within cathode is removed so far from the end of cathode cylinder.

104360. Forges Et Ateliers De La Nave, and Etudes Et Recherches Industrielles Et Scientifiques E.R.I.S. Improvements in or relating to supporting frame for mine galleries. Accepted on 14th April 1967.

Supporting frame for mine galleries formed of at least two members which after assembly take the form of a frustated cone, and is formed with a radius of curvature equal to the [illegible]

104666. Varta Pertrix-Union Gesellschaft Mit Beschrankter Haftung. Galvanic cell. (3rd August 1965). Accepted on 20th April 1967.

Seal consists of three concentric rings, in which the outer ring is extended in the upward direction, and the rings are interconnected by continuous bridges extending at substantially right angles to the rings.

105004. Westinghouse Electric Corporation. Circuit breaker. Accepted on 20th April 1967.

One magnet of the trip device is supported on means uneffected by flexture of tripping bimetal element occurring in response to an abnormal current below predetermined value.

105022. Ascu Wood Products Pvt. Ltd. Apparatus and process for impregnating material with a liquid under pressure. Accepted on 18th April 1967.

Characterised in that the charge carrier fully loaded, chamber provides a free space above, free space having a volume to hold the liquid impregnated.

105198. H. Holloway. Improvements in or relating to binding devices. Accepted on 18th April 1967.

Binding device for edge perforated sheets comprising a channel member with aperture being elongated in one direction in combination with headed locking stud with shank for entering plange, by turning the stud the shank projection engages the inner surface.

105205. Ludwig Engel Kg. Injection moulding machine. Accepted on 17th April 1967.

An injection moulding machine where a stop connected to the cylinder of a pressure pad and disposed in the longitudinal axle centre of the moulding machine is provided.

105345. Metallgesellschaft Aktiengesellschaft. A process of carrying out endothermic reactions involving solids having different particle sizes in a rotary kiln. Accepted on 14th April 1967.

Characterised in that fine solids are blown in rotary kiln in a manner that solids are distributed over 4 mitre of kiln length.

107209. Shell internationale Research Maatschappij N. V. Method of producing a laminate of thermoplastic film, and laminate thus produced. Accepted on 14th April 1967.

The extruded and blown tube is sealed by flattening it in non-plasticized condition, heating the film and fusing the opposite sections by pressure.

107219. F.L. Smidth & Co., A/S. Improvements relating to rotary kilns. (28th September 1965). Accepted on 7th April 1967.

A rotary kiln with a number of cylindrical cooler tubes mounted in a planetary fashion around the outlet end of the kiln.

Correction of Clerical Errors

Under Section 62 of the Indian Patents and Designs Act, 1911, certain clerical errors occuring in the specification in respect of patent application No. 100811 was corrected on 19th April 1967.

Amendment Proceedings

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Charles Henry Brunt, of 197, Chamber Road, Oldham, Lancashire, United Kingdom, a British Subject, seek leave to amend the description and figures of the drawings of the specification and drawings in respect of patent application No. 85611. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 21, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

Registration of Assignments, Licences, etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

61861 — Jekisondas Ranchhoddas and others.
91755 — Leicester Lovell & Co., Limited.
76340 — Sri Kalyani Varadarajan.
79439 — M/s. Fried. Krupp Huttenwerke Aktiengesellschaft.

87532 —, 78562 — M/s. Colgate-Palmolive Company.

96308 —, 61027 —, 61051 —, 66854 —, 66909 —, 66964 —, 68769 — M/s. Smith Kline & French (India) Limited.

Restoration Proceedings

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 77122—Tulsi Das Suri.

The patent ceased on the 13th June 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 11th February 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 17th June 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129756. Jack Enterprise, 1200 Bhadurgarh Road, Delhi, and Indian Sole Proprietory Concern and whose proprietor is J. C. Chawla, "Ventilating fan", November, 21, 1966.

Class I. No. 130004. Maruti Sadashiv Adsul, Indian National, Manufacturer and Trader, 39, Guruwar Peth, Poona City, Maharashtra, India, "Oil lamp", December 23, 1966.

Class 1. No. 130020. Kershi Framji Sutaria, C/o. R. H. Bharucha Esqr., 584-85, Wadia Building, Lady Jehangir Road, Matunga, Bombay-19, State of Maharashtra, India an Indian National, "An electrical geyser", December 26, 1966.

Class 1. Nos. 130173 and 130174. Ram Gopal Bajaj, Indian Nationa, and Proprietor of M/s. Hindustan Engineering Works, P. O. Ratangarh, District Churu (Rajasthan), India, "Water Taps (Pillar cocks)," January 19, 1967.

Class 1. No. 130251. Ramgopal Bajaj, Indian National, and Proprietor of M/s. Hindustan Engineering Works, P. O. Ratangarh, District Churu (Rajasthan), India, "Water Taps (Pillar Cocks)," January 31, 1967.

Class 1. Nos. 130252 to 130256. Ramgopal Bajaj, Indian National, and Proprietor of M/s. Hindustan Engineering Works, P. O. Ratangarh, District Churu (Rajasthan), India, "Water Taps (Bill Cocks)," January 31, 1967.

Class 3. No. 129656. Aurobrite (India) Private Ltd., of 108 Himalaya House, Palton Road, Bombay 1, Maharashtra State, India, an Indiah Company, "A bangle", October 19, 1966.

Class 3. No. 129948. Gemrich Industries, an Indian Partnership Firm, Rangoonwala Building, 91, Mohamadali Road, Bombay 3 (Maharashtra), "Sprayer", December 15, 1966.

Class 3. Nos. 130164 and 130167 to 130169. Bata Shoe Company, Private Limited, 30, Shakespeare Sarani in the town of Calcutta, West Bengal, "A sole for footwear", January 19, 1967.

Class 4. No. 130063. Jagatjit Distilling & Allied Industries Ltd., 54-Ring Road, Lajpat Nagar, New Delhi-14 (India) (A company incorporated under the Indian Company Act.) "A jar", January 4, 1967.

Class 5. No. 129674. Hathiramani Narain Asandas, Victor Villa, 5, Babulnath Road, Bombay-7, Maharashtra; Nationality-Indian, "Box", October 27. 1966.

Class 13. No. 130041. Sovrin Knit Works. Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", January 3, 1967.

Class 13. Nos. 130097 and 130098. H. A. Shah & Co., Partnership concern Indian, Vasant Vijay Mills, "Vasant Vijay", 470/471, Worli Road, Bombay-18, (India), "Textile goods", January 7, 1967.

Class 13. Nos. 130106 to 130109. The Standard Mills Company Limited. Mafatlal House, Backbay Reclamation, Bombay-1., Indian "Textile goods", January 10, 1967.

Class 13. Nos. 130118 and 130119. Orkay Knitting Industries Indian Partnership Firm, Kurla Andheri Road, Kurla, Bombay-72, Maharashtra, "Textile piecegoods", January 10, 1967.

Class 13. Nos. 130136 to 130139. The Bombay Dyeing & Mfg. Co., Ltd., A public limited company, an Indian Company incorporated in India under the Indian Companies Act, 1866. Neville House, Ballard Estate, Fort, Bombay-1, "Cotton Textiles", January 16, 1967.

Class 13. Nos. 130161 to 130163. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods" January 18, 1967.

Class 13. Nos. 130189 to 130192. 130194 and 130196 to 130198, 130201, 130203 and 130205. The Sessoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", January 20, 1967.

Class 13. Nos. 130211 and 130212. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian "Textile goods", January 24, 1967.

A. JOGARAO
Controller General of Patents, Designs and Trade Mark.

पेटेन्ट कार्यालय द्वारा जारी की गई पेटेंटों और डिजाइनों से सम्बन्धित अधिसूचनाएं और नोटिस
Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 13th May, 1967

CORRIGENDUM

In the Gazette of India, Part III, Section 2, dated the 15th April, 1967,

In page 173, Column 1, under the heading "Renewal Fees paid"—

delete entry No. "75747".

insert No. "67841", *after* No. "67793".

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

22nd April 1967

110311. R. C. Mouliswar. Shredded steel wool skin *tube protector* for puncture protection in all pneumatic tyres.

110312. C. L. T. Jain. Improved plastic sand watch.

110313. M. D. Patil. Manik's mechanical power generator.

110314. Merck & Co. Inc. Process for preparing thiadiazoles. [Divisional date 6th September 1965].

110315. Merck & Co., Inc. Process for the preparation of α—(3—indolyl)—aliphatic tertiary butyl esters. [Divisonal date 16th February 1965].

110316. Glanzstoff A.G. Process for the manufacture of base fleeces for artificial leather. (1st November 1966).

110317. Deutsche Gold-Und Silber-Scheideanstalt Vormals Roessler. Process for the manufacture of new substituted S-triazines. [Addition to No. 103933].

110318. C. R. Oberoi. Hydro-plastic weigh scale.

110319. M & T Chemicals Inc. Novel process.

110320. Compagnie Francaise De Television. Improvements to colour television transmitters and receivers. (28th July 1966).

110321. Fisons Pest Control Limited. Synthesis (4th May 1966).

110322. E. R. Squibb & Sons, Inc. Chemical compounds.

110323. Ayerst, McKenna & Harrison, Limited. Process for preparing 17α-methyl-20-ketosteroids and preparations containing such steroids. [Divisional date 10th September 1962].

110324. C. E. Taylor. Contraceptive device.

110325. D. N. Sondhi & Co. A paper welder or the like.

110326. P. Lal and Nasir-Uddin. An improved water tap for delivering hot and cold water simultaneously or separately.

110327. Shri G. V. Pendse. Dhoti and saree border designs by a positive tappet.

110328. D. K. Dhand. The gravity neutraliser for dancing.

110329. S. R. Nanavati. A magnetic modelling apparatus.

110330. M. V. Reddy. Automatic, self adjusting floating foundation for water pumping sets.

24th April 1967

110331. Council of Scientific & Industrial Research, Improvements in and relating to the preparation of ion-exchange membranes of the heterogeneous type.

110332. V. Kumar & C. R. Gupta. An improved vehicular cooler.

110333. K. Sundararajan. Rapid isolator to prevent single phasing.

110334. Dr. G. V. Ramanan. Improvements in or relating to panchromatic photography.

110335. Dr. G. V. Ramanan (Inventor-Technical Director). Improvements in or relating to colour movies.

110336. Kumar Brothers. A process for manufacture of potassium carbonate.

110337. Mastabar Mining Equipment Company Limited. Improvements in and relating to mine roof supports.

110338. Julius Schmid, Inc. Improvements in or relating to polyenic maceolide containing pharmaceutical compositions.

110339. Julius Schmid, Inc. Improvements in or relating to a process for preparing compositions for treatment of prostatic hypertrophy.

110340. Smith Kline & French Laboratories. Process for preparing anti-depressant N, N-dimethylcinnamamides.

110341. L. Brown, Extraneous matter removing device.

110342. Thermo King Corporation. Diesel fuel system.

110343. Sundstrand Corporation. Hydrostatic transmission.

110344. Siemens Aktiengesellschaft. Rectifier arrangement.

110345. Beteiligungs-Und Patentverwaltungsgesellschaft Mit Beschrankter Haftung. Method and device for regulating the discharge from a jig. (27th February 1967).

110346. American Cyanamid Company. Novel substituted 17-hydraz iyohimbanes.

110347. D. Bini. Method for erecting edifices. (Addition to No. 106551).

110348. Pilkington Brothers Limited. Improvements in or relating to the bending of glass sheets. (25th April 1966).

110349. Pilkington Brothers Limited. Improvements in or relating to the treatment of glass sheet. (25th April 1966).

110350. Pilkington Brothers Limited. Improvements in or relating to the treatment of glass sheets. (25th April 1966).

110351. Egyesult Gyogyszer-Es Tapszergyar. New formimino ethers.

110352. Hercules Incorporated. Polyolefin compositions containing a basic polyamine dye site additive.

110353. Koninklijke Nederlandsche Gist-En Spiritusfabriek N. V. Process for the preparation of 11 β—hydroxysteroids.

110354. Koninklijke Nederlandsche Gist—En Spiritusfabriek N. V. Process for the preparation of 17 α-acyloxy-21-hydroxy compounds of the pregnane series.

110355. J. Anthony. Lukes. Production of potassium chloride from schoenite and from brines containing potassium, magnesium, chloride and sulfate.

110356. The Upjohn Company. Process for producing lincomycin s.

110357. Amsted Industries Incorporated. Apparatus for manipulating railway wheels.

110358. Amsted Industries Incorporated. Apparatus for casting metal articles.

110359. The Associated Octel Company Limited. and Octel S. A. Method and apparatus for liquid transfer. (27th April 1966).

110360. Hughes Tool Company. Drilling methods and apparatus employing pressure variations in a drilling fluid.

110361. K. Fujiwara. A device for removing air-binding in a disk type steam trap.

110362. Trelleborgs Gummifabriks Aktiebolag. Improvements in linings for walls exposed to wear.

25th April 1967

110363. B. Sood. What crop cutting machine (Bullocks) and diesal engine.

110364. B. L. Sood. Sood exhibition coin or token gate (coin or token principal).

110365. Tractel Tirfor India (Private) Limited Improvements in or relating to load landling device.

110366. Mr. H. R. Mittal. Single phasing isolator.

110367. American Home Products Corporation. Steroidal dienes.

110368. Imperial Chemical Industries Limited. Extruded sheet. (25th May 1966).

110369. Uniroyal Englebert France. Improvements in sealing apparatus. (12th April 1967).

110370. United States Rubber Company. Improvements in transmission belt and method of making same.

110371. Teverama S. A. Film with improved perforations.

110372. Farbenfabriken Bayer Aktiengesellschaft. Thionosalicylic acid anilides, salts thereof, intermediates therefor and production processes.

110373. Simonacco Limited. Process for the production of a cavity filling composition.

110374. Osterreichische Stickstoffwerke Aktiengesellschaft. Process for the preparation of an ammoniacal ammonium carbonate solution.

110375. Compagnie De Saint-Gobain. Glass compositions.

110376. Sumitomo Chemical Company Ltd. Two stage production of -methylmercaptopropionaldehyde.

110377. G. M. Luft and A. L. Betian. Magnetic-type speed metering instrument to be employed mostly for transporting vehicles.

110378. Tsentralny Nauchno-Issledovatelsky Institut Chernoi Metallurgii Imeni I.P. Bardina. Method of producing refined ferrochromium.

110379. Vsesojuzny nauchno-issledovatelsky institut burovoi takhniki. Hydraulically operated packing cup for plugging wells.

110380. Kuntsevsky igolno-platinny zavod imeni Kim. Surgeon's needle.

110381. Kolomensky Zavod Tekstilnogo Mashinostroenia. A socket for spindles used in the textile industry.

110382. Beecham Group Limited. Penicillins. (26th April 1966).

110383. Koninklijke Nederlandsche Gist-En Spiritusfabriek N.V. Novel process for preparation of 6-aminopenicillanic acid.

110384. Brown, Boveri & Company Limited. Electrode in contact with a melt.

110385. Landeborg, S.T. Henriksson, and R. L. Muotka. A bogey for low-built railway carriages.

110386. Shionogi & Co. Ltd. Benzimidazole derivatives. (23rd March, 1967).

110387. Loma Industries Inc. Thermodynamic moulding machine.

110388. Ciba Limited. Manufacture of a new sulphonamide derivative.

110389. Ciba Limited. Water-soluble N,N'-diglycidyl compounds, processes for their manufacture and their use.

110390. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to semiconductor devices having a field effect transistor structure.

26th April 1967

110391. J. I. Fernando. Dehydrated powdered shrimp.

110392. Sandoz Ltd. Improvements in or relating to organic compounds. (27th April 1966).

110393. Merck & Co., Inc. Novel benzomorphan derivatives.

110394. Merck & Co., Inc. Novel benzomorphan derivatives.

110395. Merck & Co., Inc. Novel benzomorphan derivative.

110396. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Improved process for the culture of algae and apparatus therefor.

110397. Central Glass Co., Ltd. A method for pelletizing gypsum.

110398. S. Maewall and N. Maewall. Improvements in or relating to trouser hangers.

110399. D. Weston. Flotation of metallic oxides (iii).

110400. Ceskoslovenska Akademie Ved. Substitutes for tubular somatic organs.

110401. Imperial Chemical Industries Limited. Polythene compositions. (11th May 1966).

110402. Imperial Chemical Industries Limited. Manufacture of laminated tubing. (13th May 1966).

110403. Esso Research and Engineering Company. Process for preparing structural elements and product thereof.

110404. Dorr-Oliver Incorporated. Internal screen.

110405. Stamicarbon N. V. Process for the preparation of polymerization products of high molecular weight.

110406. Girling Limited. Improved automatic adjuster for vehicle brakes. (27th April 1966).

110407. Standard Oil Company. Method and apparatus for the continuous preparation of an aqueous ammoniated phosphate composition.

110408. Amicon Corporation. Premeable membrane and method of making and using the same. (26th April 1966).

27th April 1967

110409. Council of Scientific and Industrial Research. A new process for the preparation of hydrogen sulphide detector tubes.

110410. Tokyo Shibaura Electric Company Limited. Foil wound electric coils.

110411. Tokyo Shibaura Electric Company Limited. Foil wound electric winding.

110412. Dr. P. N. Choudhry and R. S. L. Srivastava. Improvement or relating to automatic telephone exchange or the like.

110413. Rotary Profile Anstalt. Manufacture of annular articles.

110414. Roto-Finish Limited. Improvements in or relating to the surface treatment of workpieces.

110415. Coventry Gauge & Tool Company Limited. Friction clutch operating mechanism. (29th April 1966).

110416. Societe Des Accumulateurs Fixes Et De Traction. Improvements in or relating to electrochemical cell of the cylindrical type. [Addition to No. 103345).

110417. Ciba Limited. Process for the manufacture of 1,4-oxido-3-aza-a-homosteroids.

110418. Ciba Limited. Process for preparation of new aromatic phosphoric or phosphonic acid esters. [Divisional date 15th November 1965].

110419. Scientific Mechanic Works. Bearing assembly for spindles.

110420. General Aniline & Film Corporation. Process.

28th April 1967

110421. Buckman Laboratories, Inc. Improvements in or relating to organic thiocyanates and their use in fungicidal compositions.

110422. Venot-Pic. Societe Anonyme. Process and device for discharging a ponderable matter in a rotary apparatus. [Addition to No. 110107].

110423. Orient Trading Company. A flexible pipe joint.

110424. Orient Trading Company. Improvements in or relating to pipe joint.

110425. Sri Gouri Sankar Bhattacharyya. Bhattacharyya's improved chulla.

110426. Fibreglass Limited. Improvements in and relating to hollow-finned bars. (2nd May 1966).

110427. Vijay Printed Sari Depot. Improvements in or relating to wearing apparels such as saris.

110428. Sumitomo Chemical Company Ltd. Process for producing B-methyl-mercaptopropionaldehyde.

110429. John Lysaght (Australia) Limited. Fixing strap for decking sheets. (6th May 1966).

110430. Commonwealth Scientific and Industrial Research Organization and Western Titanium N. L. Production of anosovite from titaniferous minerals. (25th April 1966).

110431. Godrej & Boyce Manufacturing Company Private Limited. Improved divan-*cum*-bed.

110432. F. Hoffmann. La Roche & Co., Aktiengesellschaft. Process for the manufacture of benzodiazepine derivatives.

110433. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Sulfonamide-potentiator compositions and process for the manufacture thereof.

110434. Colgate-Palmolive Company. Particulate detergent composition of low bulk density.

110435. American Home Products Corporation. Penicillanic acids.

110436. Farbenfabriken Bayer Aktiengesellschaft. 5-nitrofurfurylidene-(2)-imino derivatives. (5th January 1967).

110437. Farbenfabriken Bayer Aktiengesellschaft. 2-imidazolidone derivatives. (5th January 1967).

110438. Columbian Carbon Company. Votex reactor for carbon black manufacture.

110439. The English Company Limited. Improvements in or relating to insulating materials. (17th August 1964). [Divisional date 6th August 1965].

Alteration of Date

110085. Ante-dated to 29th October 1965 under Section 5 of the Act.

109718. Ante-dated to 15th October 1965 under Section 5 of the Act.

109271. Ante-dated to 26th July-1965 under Section 5 of the Act.

99211. Post-dated to 30th August 1965 under Section 5 of the Act.

101531. The claim to priority date 21st September 1964 has been disallowed and the application dated s of 10th September 1965, the date of filing in India.

100664. The claim to priority date, 22nd July 1964 has been abandoned and the application dated as of 19th July 1965, the date of filing in India.

102370. The claim to priority date 16th December 1964 has been abandoned and the application dated as of 3rd November 1965, the date of filing in India.

102122. The claim to priority date 24th October 1964 has been abandoned and the application dated as of 18th October 1965, the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patent's on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the Office.

The dates shown in crescent brackets are the dates allowed under Section 78A of the Act.

99063. M & T Chemicals Inc. Process for preparing organo antimony compounds. Accepted on 18th April 1967.

Comprising reacting bis (diorgano stibine) oxide with a mercaptan or a carboxylic acid and removing the water formed from the reaction site.

99211. Mrs. Nani Bai. Improvements in or relating to a device for testing hardness of rubber, plastic and the like material Accepted on 25th April 1967.

Comprising a tester body which carries a spring loaded vertically mounted slidable spindle, a needle assembly and an inverted U-shaped metal bar carrying a dial and outer cover).

99647. Aktiebolaget Bofors. Anti-aircraft sighting device Accepted on 27th April 1967.

Comprising a sight for determining direcion to target, a range measuring unit an automatic target tracking equipment, an electric computor supplied with target data and arranged to compute and produce signals which are led to servomotor laying the sight.

100544. Compania Industrial De Ayotla, S.A. Process for the manufacture of sugarcane bagasse cellulose. Accepted on 12th April 1967.

The fibres free from the work is treated with a liquor or with water and conveted into a pulp in a digester.

100561. Allied Chemical Corporation. Process for the preparation of fluorinated amides. Accepted on 13th April 1967.

N- (τ-hydroxypropyl) perfluorooctanomide is reacted with thionyl chloride.

100583. A R. Rausing. A container for fluid. Accepted on 13th April 1967.

Comprising an inner enclosure moulded from plastics material and formed with a cylindrical body having bulging or salient pads.

100647. M & T Chemicals Inc. Process for rehabilitating alkaline metal treating baths contaminated with hexavalent chromium and compcsition therefor. Accepted on 17th April 1967.

Comprises adding to alkaline bath an effective amount of at least one polyhydroxy aromatic compound or adding a composition comprising the said compound and an inert diluent therefor.

100664. Associated EngineeringLimited. Improvements in or relating to the manufacture of pistons. Accepted on 19th April 1967.

Locating the tubular casting for machining by a plurality of inside radial supports divided into two axially spaced groups.

100665. Lilliston Implement. Company. Improvements in a shanker-windrower. Accepted on 19th April 1967.

The rattler is pivotally mounted on a tubular means fixed to the main frame.

100708. Dr. Bimalendra Nath Mojumder. Single-bell charging and distributing device for blast furnace. Accepted on 22nd April 1967.

Charging device for blast furnace wherein is provided a single bell a gas seal and charging valves for skip cars, small bell rod and a deflector of rendering type attached to it, a gap between stopper and deflector for preventing rubbing.

100709. Dr . Bimalendra Nath Mojumder. A new device for blowing of hot blast unto a blast or shaft furnace through tuyere stocks with stuffing-box gland compensators. Accepted on 22nd April 1967.

Comprising two coaxial pipes, an external pipe and an internal pipe wherein an annular space is provided between said pipes.

100716. Vsesojuzny Nauchno-Issledovatelsky Institute Po Stroitelstvu Magistralnykh Trubcprovodov. Method of manufacturing an expanding binder. Accepted on 22nd April 1967.

Characterised in that the proportions of the components are as follows (percent of binder agent Portland cement—40 to 85; high alumina cement—3 to 30; calcium sulphate—3 to 15; ground granulated blast furnace slag—0 to 20; line 5 to 8.

100720. Occidental Research & Engineering Limited. Improvements relating to the production of phosphoric acids. (21st July 1964). Accepted on 22nd April 1967.

Comprising continuously feeding a wet process phosphoric acid solution to first heating zone and continuously with drawing therefrom a more concentrated acid as intermediate product having P_2O_5 content in the range 67-72% w/w.

100730. The Babcock & Wilcox Company. Improvements in or relating to pulverizers. Accepted on 22nd April 1967.

Pulverizer with a grinding ring and balls on ring, wherein ring is provided with a wall so that in any radial plane a line through upper edge of wall and ring makes an angle between 25° to 45°.

100751. Kjellberg Elektroden & Maschinen GmbH. Welding head guiding device. Accepted on 24th April 1967.

Comprising structural and driving elements, a driving wheel, connecting rod, a link, a turning lever, a thrust piece and an eccentric cam.

100793. Rhone-Poulenc S. A. Process for the preparation of dizole compounds. Accepted on 26th April 1967.

Comprises reacting a carbonol halide with a diazole.

100798. Denco A.G Vibration isolation support for machinery. Accepted on 24th April 1967.

Interposed in-between the machinery and the floor the support including two base members having upper bearing surfaces with curved portions oppositely sloping and two runners for transmitting the weight of the machinery to the base of members.

100849. Ministeriul Industria Petrolului Si Chimei. Improvements in and relating to mechanical device for raising and lowering folding derricks. Accepted on 25th April 1967.

Supporting legs are raised by sling line which is strung over a system of pulley blocks attached to the raising legs roller trolleys one or more turning back heaves attached to the respective mast columns tracks.

101022. Air Reduction Company, Incorporated. Method of forming copolymer of vinyl chloride and ethylene Accepted on 10th April 1967.

Vinyl chloride is polymerised with ethylene in a suspension polymerisation system having a pH of 3 to 11 and a temperature of 5° to 95°C. wherein ethylene content is of 2 to 10% by weight of coeplymer.

101023. Air Reduction Company, Incorporated. A method of forming a copolymer of vinyl chloride and propylene. Accepted on 10th April 1967.

Vinyl chloride is polymerised with propylene in a suspension polymerisation system having a pH of 5 to 8·5 and a temperature of 30 to 75°C wherein the propylene content is of 1 to 10% by weight of the copolymer.

101044. Telefunken Patentverwertungsgesellschaft m.b.H. Protector sleeve. Accepted on 26th April 1967.

Comprising two equally shaped half shell made of mechanically resistant and non-corrosive synthetic resin and two clamping collars made of mechanically resistant and non-corrosive synthetic resin.

101298. Armour and Company. Process for preparing secondary-alkyl primary amines from olefins and products thereof. Accepted on 28th April 1967.

Reacting olefin with nitrile and water in presence of hydrogen fluoride and reacting the product with hydrolysing agent.

101531. Ludlow Corporation. Web forming process for manufacturing non-woven fabrics containing thermoplastic fibres. Accepted on 25th April 1967.

Comprising forming two non-woven webs in an abutting, overlapping arrangement with the consecting edges being feathered, and then subsecting one surface of each of said webs to hot calendering thereby giving a unified web.

101680. Morgan Construction Company. Process for preparing steel for cold working. Accepted on 26th April 1967.

Comprising rolling said steel to rod diameter, at an elevated temperature above transformation temperature arranging said rod whilst still at a temperature near to but above transformation temperature in a series of rings, rapidly cooling the said rods through transformation immediately ofter so arranging the same and collect the said rod after said cooling step into a bundle.

102012. Technoimpex Magyar Gepipari Kulkereskedelmi Vallalat. A device for automatic tuning of a high frequency power generator. Accepted on 12th April 1967.

Comprising a derectional coupler for generating an output in one direction and an output in other direction as a comparative signal, means for generating a control signal, mean for amplifying and supplying control signal.

102027. J. R. Snell. Composting method and apparatus. Accepted on 13th April 1967.

A method of composting finely divided organic material by the action of aerobic thermophilic microorganisms comprising the steps of establishing and maintaining an everchanging treatment mass and effecting decomposition of organic material in such treatment mass, uniformally contacting the entire treatment mass with air and controlling the temperature of the treatment mass to be conductive to aerobic thermophilic microorganisms activity by regulating the quantity of air passed through the mass.

102044. Sigma Engineering Service, Inc. Process of making a resistor of high wattage. Accepted on 13th April 1967.

Cross-sectional area of resistance material is reduced by removing said material from the ridges of elongated body being made of resistance material and having a plurality of surfaces on its sides.

102056. Rockwell-Standard Corporation. Brake mechanisms. Accepted on 14th April 1967.

Comprising service and power cylinders both having a pair of opposed pistons, a pair of brake shoes having webs and means for connecting said webs to the respective pistons.

102058. Societa Italiana Telecomunicazioni Siemens s.p.a. Improvements in or relating to calling dials of the dead angle type. Accepted on 14th April 1967.

Comprising a unidirectional joint coupling the impulse wheel with the main driving spindle, corresponding to the dead angle of the finger plate.

102063. The Anil Starch Products Limited. Improvements in or relating to the deplication of animal raw hides. Accepted on 14th April 1967.

Characterized in that raw hides are treated with a solution containing protease produced by a microorganism belonging to a group of bacillus subtilis at pH 8·8 to 9·5 at temperature 20 to 40°C.

102087. Ciba Limited. Process for dyeing natural or regenerated cellulose materials with azodyestuffs. Accepted on 17th April 1967.

At least one stage of the process is carried out in an alkaline medium in the presence of a strong reducing agent that reduces at least one azo group to the hydrozo stage, and the dyestuff is subsequently re-oxidised on the fibre to the azo compound.

102090. The Bendix Corporation. Improvements in or relating to a coaster type brake for bicycles or the like. Accepted on 17th April 1967.

Comprising a screw shaft intermediate an axle and a hub and drivably connected to a sprocket a clutch and an actuating member threadably connected to the shaft characterised in that the clutch further comprises an anchor end expander.

102096. Standard Oil Company. Process for drying gases containing water vapor and acid forming constituents. Accepted on 17th April 1967.

Process for drying gas comprising introducing it into an adsorbent bed capable of adsorbing water and removing it, then passed into a second bed, contacting the effluent with alkaline solution wherein compound is removed and then condensing.

102097. Standard Oil Company. Process for the improvement of the quality of a petroleum lubricating oil. Accepted on 17th April 1967.

Comprising hydrotreating the lubricating oil and a hydrogen containing gas separating gaseous materials from the effluent and thereafter stripping the resulting liquid effluent.

102098. Standard Oil Company. Improvement in or relating to a process for the hydrotreating of a high-viscosity, petroleum lubricating oil. Accepted on 17th April 1967.

Hydrotreating the lubricating oil in the presence of a hydrogenation catalyst until the activity of said catalyst declines to an undesirable level is characterised in that the catalyst is employed to hydrotreat a low viscosity petroleum lubricating oil for a time sufficient to at least partially restore the hydrogenating activity of the catalyst.

102102. Dunlop Semtex Limited. Improvements relating to thermoplastic sheet material. [Addition to No. 94511]. Accepted on 16th April 1967.

Comprises cutting slices from an extrusion of thermoplastic material of variegated colour in a transverse direction to the direction of flow and subsequently assembling and moulding.

102105. Joseph Lucas (Industries) Limited. Permanent magnet windscreen wiper motors. (21st October 1964). Accepted on 17th April 1967.

A windscreen wiper motor having first, second and third brushes engaging a commutator so that when direct current is applied to first and second the motor will operate at one speed which is different from the speed obtained by feeding the supply to first and third brush.

102122. British Nylon Spinners Limited. Improvements in or relating to the dispersion of polyolefins in non-compatible synthetic polymers and to the products obtained thereby. Accepted on 18th April 1967.

Comprises either dispursion of polyolefine or non-compatible polymer in a matrix of the other wherein the particle size of the substance dispersed should not be greater than 30 microus in diameter.

102137. Polymer Corporation Limited. Process for preparing graft polymers. (6th November 1964). Accepted on 19th April 1967.

Comprises submitting latex particles to agglomeration prior to the addition of monomer system.

102144. Brown, Boveri & Company Limited. Device for replacing inserts in induction furnaces. Accepted on 19th April 1967.

Including means for removing the inserts, means for disconnecting the induction coil of the insert from the current supply source and means for connecting the cooling water system of the insert to a transportable cooling unit comprising a heat exchanger and a circulating that pump.

102152. Rockwell-Standard Corporation. Improvements in or relating to break assembly. Accepted on 19th April 1967.

Comprising means for rotatably adjusting the cam shaft about its longitudinal axis to compensatively reposition the cam for determining the returned positions of the brake shoes and means for indicating the relative rotation of said cam shaft.

102177. Caterpillar Tractor Co. Improvements in bonding. Accepted on 22nd April 1967.

Comprising storing a predetermined amount of energy in a rotating inertial mass coupled with one work piece subsequently pressing the ends of the work pieces together in rubbing contact until the entire stored energy is discharged as the rotation ends, and increasing the pressure of engagement after the rotation has ended and which the bond zone is still in a forgeable condition.

102180. Aeroquip A. G. Hose and fitting assembly. Accepted on 22nd April 1967.

Comprising a nipple between hose and end fitting means said nipple having a sealing portion of such diameter which when inserted into the hose increases its braid angle and socket means circumscribing the nipple.

102187. Algemene Kunstzijde Unie. N. V. Improvements in and relating to the preparation of polymer foams. Accepted on 22nd April 1967.

Comprises incorporating a blowing agent in poly (2,6-dimethyl-phenylene, 1, 4—) ether and subsequently heating the resultant mixture to 125°C to 200°C at which the blowing agent becomes active.

102189. Farymann Diesel, Farmy & Weidmann. A decompression device for an internal combustion engines. Accepted on 22nd April 1967.

Comprising a decompression cam being able to be furned into "decompression in" and "decompression off" position, a follower being able to engage one of the push rods and a lifting member being connected to said cam.

102194. Monsanto Chemicals Limited. Process for the production of novel textile yarn and yarn products prepared therefrom. [Addition to No. 100610]. Accepted on 20th April 1967.

Comprises drawing a foamed thermoplastic strand and subjecting it to forces to rapture the walls to convert into a three-dimensional interconnected fibrous structure.

102196. Zavod 12. Moulding mixtures and foundry moulds prepared therefrom. Accepted on 22nd April 1967.

A moulding mixture for preparing foundry moulds comprises moulding sand artificial foam particles.

102197. Dow Corning Corporation. Colloidal suspensions of silsesquioxanes and a process for making same. Accepted on 22nd April 1967.

Comprises adding of a silane to a water-surfactant mixture under acidic or basic conditions.

102206. N. F. Serov, I. S. Batjuta, L. E. Korchnoi, V. V. Kuzmin and A. F. Vinogradov. Camera lens mechanism. Accepted on 25th April 1967.

The mount of the lens is prevented from turning in relation to lens barrel by a key and outer cylindrical surface of front end portion of mount of lens and inner surface of lens barrel concentric therewith are privided with differential threads on which between mount and lens barrel an intermediate threaded ring is mounted.

102207. N. F. Serov, I. S. Batjuta and D. P. Sidorova. Viewfinders of single lens reflex cameras. Accepted on 25th April 1967.

Between the ocular II and inverting optical system, is disposed a movable light-proof blind connected to a spring holding the blind 8 corresponding to open, light window of ocular, the blind having a portion kinematically interacting with mirror for moving blind in a position corresponding to closed light window of ocular.

102213. Veb Muhlenbau Dresden. Apparatus for grain washing and conveying. (20th July 1965). Accepted on 25th April 1967.

Wherein a feed pipe with a maximum gradient of 30° connects the rinsing compartment with a centrifugal drier.

102217. W. R. Grace & Co. Process for preparing slurry fertilizers. Accepted on 20th April 1967.

Agitating an aqueous solution or orthophosphoric acid analysing upto 61% P_2O_5 substantially free of polyphosphates and containing an effective quantity of P_2O_5, ammoniating the solution adding the requisite quantity of K_2O as KCl and an effective quantity of a suspending agent.

102253. Allied Chemical Corporation. Method for purifying terephthalic acid. Accepted on 27th Aptil 1967.

Heating the terephthalic acid contaminated with impurities with an aliphatic ketone to 150°C, cooling the solution and then separating the crystalline terephthalic acid.

102256. Carrier Corporatiom. Compressor lubrication system. Accepted on 27th April 1967.

Comprising a housing having crank case compartment and a suction compartment with a passage in between them and a valve means to close the passage when the pressure in suction side exceeds the pressure in crank case side.

102260. Standard Telephones and Cables Limited. Method for making an epoxide resin seal. (6th November 1964). Accepted on 20th April 1967.

A method of bonding an epoxide putty containing fillers to a portion of a surface of a body comprising treating the portion to render its capable of chemically bonding to a primer, applying the putty to the primed surface portion and then, and only then, permitting said primer to be cured.

102270. The English Electric Company Limited. Method of securing a semi-conductor device to a heat sink and assemblies of so formed. (18th November 1964). Accepted on 26th April 1967.

Comprising the steps of tinning surfaces of the device and the heat sink, assembly said device and heat sink together in a jig placing a mass of solder and disposing in a high temperature.

102287. Letraset Limited. Process for the application of dry transfer materials. (30th October 1964). Accepted on 20th April 1967.

Comprises with drawing from a reel a transfer tape which consists essentially of a tape support carrying ink indicia successively printing along its length.

102288. H. N. K. Paton. Mechanism for unloading material from containers. Accepted on 26th April 1967.

Comprising a flexible cup-shaped membrane disposed in container-lining relationship with an end wall and with portions of the top, bottom and side walls of the container and having an end wall in upright position when in such said relationship and said walls are horizontal.

102304. Hickson & Welch Limited. Optical whitening agents. (5th November 1964). Accepted on 20th April 1967.

Comprises condensing an arylhydrazine with a compound $CH_2CH_2CO-C_6H_3(Z)-NH.CO R^1$, *where Z=halogen, substituted amino* R_1=*alkyl.*

102353. Tesla narodni podnik. Press for extruding masses in the plastic state. Accepted on 24th April 1967.

A press in which heating space is provided with at least two surfaces projecting into this space, the contour of any cross-section of this projecting surface led at right angles to the axis of the extruded material.

102370. M&T Chemicals Inc. Production of organotin Compounds. Accepted on 26th April 1967.

Comprises reacting diorganotin oxide with mixture containing marcaptocarboxylic acid thio bis carboxylic acid.

102387. Bakelite Xylonite Limited. Improvements in or relating to the bonding of metal to resinous materials and a printed circuit made therefrom. (11th November 1964). Accepted on 27th April 1967.

By a method comprising interposing between the metal component and the composition and adhesive comprising a cross-linkable nylon and a cross-linking agent for the nylon and consolidating the resulting assembly and curing the adhesive.

102444. British Nylon Spinners Limited. A method of making a nonwoven fabric and nonwoven fabric made thereby. (21st November 1964). Accepted on 27th April 1967.

Comprises subjecting a filamentary tow to a needle punching action in a needle loom.

102451. Allied Chemical Corporation. A process for preparing flexible polyurethane foams. Accepted on 24th April 1967.

Comprises reacting a diisocyanate, a mixture of polyether polyols and water.

102462. The Anil Starch Products Limited. A method for producing bacterial amylase and protease. Accepted on 24th April 1967.

Comprises adding indole in an amount of from about 0·2 gamma to 15 gamma per ml. of the culture medium thereby preventing lysis of bacterial cells.

102504. Veb Webstuhlbau Grossenhain. Method of weaving a fabric on a gripper-shuttle type weaving machine. Accepted on 25th April 1967.

With the firm lists being formed by the trailing ends of the weft threads which are tied up with list warp threads while the leading ends of the weft threads stand back from the edges of the fabric.

102505. Fichtel and Sachs A. G. Two-stroke internal combustion engine with an oil separator. Accepted on 24th April 1967.

Characterised in that a separating wall is provided in the lower circumferential region of the horizontal exhaust duct in between the cylinder and the muffler.

102520. Farbenfabriken Bayer Aktiengesellschaft. Hot sealing compositions for textiles. (30th September 1965). Accepted on 27th April 1967.

Partially or completely saponified ethylene/vinyl acetate copolymers are used as sealing composition.

102526. Phillips Petroleum Company. Process and apparatus for producing carbon black of adjusted modulus. Accepted on 28th April 1967.

Producing carbon black of adjusted modulus comprising inletting hydrocarbon in a furnace and pyrolyzing it in presence of free oxygen containing gas, quenching effluent smoke by spraying water and complete quenching at a spaced point.

102561. Dow Corning Corporation. A process for treating organic fibres. Accepted on 27th April 1967.

Comprising applying to an organic fibre a liquid organolsilicon polymer composition.

102619. The Singer Company Method and device for threading a sewing needle. [Addition to No. 95747]. Accepted on 27th April 1967.

Comprising draping that portion of a length of thread which is first to be introduced through the needle eye across a notch in a positioning finger.

102657. Joseph Lucas (Industries) Limited. Method of manufacturing an oxygen electrode. Accepted on 24th April 1967.

By a method comprising mixing with silver the salt of a metal which when alloyed with silver produces or catalyst, preparing a plate from the mixture and heating the plate to decompose the salt.

102708. W. R. Grace & Co. Novel process for the preparation of amic acid esters. Accepted on 24th April 1967.

Comprising reacting an amic acid with alcohol selected from cyclo alkanols, arylalkanols, and aliphatic alcohols in presence of phosphorus pentoxide and sulphuric acid.

102769. Ciba Limited. New disperse dyestuffs of the anthraquinone series, process for their manufacture and materials dyed or printed therewith. Accepted on 6th March 1967.

Comprises in reacting an α—amino anthraquinone with an alkyl cycloalkyl, aralkyl or aryl-isocyanate to produce the respective anthraquinone dyce.

102997. Proektno-Konstruktorskoe Bureau Gosudarstvennogo Soluznogo Proizvodstvenno-Tekhnicheskogo Trests "Elektrosetizoliatsia". Supporting clamping device for securing power line conductors. Accepted on 26th April 1967.

A suspension clamp for power line conductor provided with freely rotating profiled rollers mounted on the frame on both sides of the clamping member.

103002. E. Krebs and P. Staib. Aqueous electrolysis cell for saline solutions, especially of alkali chlorides. [Addition to No. 100030]. Accepted on 28th April 1967.

A device for electrolysis in which an amalgam decomposer is co-axially mounted with the main cell.

103132. Trumpf & Co. Bevelling apparatus for metal edges. Accepted on 20th April 1967.

Characterised in that the slotting tool is arranged at an angle to the guide surface of the bolster plate and that a press pad is provided opposite the guide surface.

103254. K. Raghavendran. Modified tripedal dividors of angles. Accepted on 25th April 1967.

Consisting of a flat strip having concentric circular slats or grooves, an axis attached below the strip, three radials attached to the axis, of which one is rigidly fixed and others rotatably fitted to the axis and small hooks attached to the movable radials, one of the hooks being slidable along the radial.

103514. C. A. V. Limited. Liquid fuel injection pumps for internal combustion engines. (20th January 1965) (Addition to No. 73618). Accepted on 25th April 1967.

A plurality of angularly spaced outlet ports formed in the body part and with which the delivery passage can register in turn as the distributor rotates and during the time when the inlet port is out of register with an inlet passage.

103519. Elektro-Thermit G. m. b. H. Method and apparatus for the elimination of welding beads or projections of welding material, occurring during the connection of rails by welding, in order to produce the correct profile. Accepted on 28th April 1967.

Removal is effected by a hydraulically operated cutting tool operated by release of a pressure fluid from a reservoir changed with stored pressure energy.

103770. Commonwealth Scientific and Industrial Research Organization. Twisted threads. (9th February 1965). Accepted on 25th April 1967.

Comprises separately twisting the strands to have alternating zones of opposite twist separated by twist change-over regions, converging the strands and then inserting unidirectional twist.

103875. Glaverbel. Process and device for preheating, charging and melting solid materials. Accepted on 25th April 1967.

Feeding loose solid material in preheated condition to a bath of molten material comprised passing hot gaseous medium through a chamber releasing material from bottom causing feed without appreciable free fall.

103876. Stamicarbon N. V. Preparation of 1, 5, 9—cyclododecatriene. Accepted on 24th April 1967.

Trimerisation of 1, 3-butadiene with catalyst combination of titanium tetrachloride aluminium chloride, alkyl aluminum compound characterised in ferric chloride is added to catalyst composition.

103877. Stamicarbon N. V. Preparation of 1, 5, 9—cyclododecatriene. Accepted on 24th April 1967.

Trinurisation of 1, 3—butadiene with catalyst combination of titanium tetrachloride aluminium trichloride, alkyl aluminium compound characterised in 3 moles water added to catalyst.

103988. H. E. Pinkerton. Improvements in or relating to a diaphragm metering pump. Accepted on 24th April 1967.

Comprising a piston assembly and a diaphrum in separate chambers, the diaphram being connected to the assembly on one side and to the pumping head on the other, the assembly including a piston and stator.

104013 Aktiebolaget Kamyr. Device for spreading of liquid in a container for cellulosic material. Accepted on 28th April 1967.

Consisting of tubular means, wherein liquid outlet orifices are connected to separate liquid supply conduits, and at least part of conduits have flow control means.

104014. Shell Internationale Research Maatschappij N.V. Roof composed of pyramidal sections. Accepted on 26th April 1967.

The rods are secured to cylindrical extensions of the tops of the pyramidal sections.

104046. Gebruder Giulini GMBH. Process for dressing titanium ores with hydro chloric acid. Accepted on 24th April 1967.

By a process characterized in that hot hydrochloric acid is passed through a loosely piled bed of titanium ore or through a stream of titanium ore.

104279. Birfield Engineering Limited Improvements in or relating to universal joints. (24th March 1965). Accepted on 26th April 1967.

Hollow outer member with a cylindrical bore formed with longitudinally extending grooves, an inner member having a part-spherical outer surface formed with grooves cooperating with grooves in the outer member, torque-transmitting balls engaging and moving along the grooves during joint articulation and flunge and a ball cage with apertures in which the balls are housed.

104329. International Business Machines Corporation. Card verifier. Accepted on 25th April 1967.

Including selectively operable left zero verification initiation means, selectively operable blank column verification initiation means, and further means jointly controlled by initiation means for verifying left zeros or blank columns in accordance with one of initiation means is operated.

104335. G. C. Saini. Improvements in or relating to junior saw frames. Accepted on 26th April 1967.

G-shaped handle formed by simple bending operations and being covered by a thick-walled tubing of flexible material.

104344. Rexall Drug and Chemical Company. Improvements in or relating to apparatus for solids blending. (1st October 1965). Accepted on 25th April 1967.

Container includes a plurality of conduits having inlet and outlet ports, common collection means being provided to collect together solids from container outlet and from the conduit outlet ports.

104441. Indian Plastics Limited. Battery operated lamp for cycles and other general purposes. Accepted on 25th April 1967.

Comprising a housing a removable lid connection plate fitted at the inside of said lid a pair of contact pillars projecting from the inside of base, and a switch operable from outside.

104665. Varta Pertrix-Union Gesellschaft Mit Beschrankter Haftung. Galvanic dry cell. (3rd August 1965). Accepted on 25th April 1967.

Negative electrode forming the cell container is enclosed, at least partially by an external layer containing an alkalizing substance.

104706. Nippon Rayon Co., Ltd. An additive for the improvement of polyamide fibres and polyamide fibres treated therewith. Accepted on 25th April 1967.

Comprises a copper salt, a magnesium salt and one member selected from a higher fatty acid and a higher fatty alcohol.

104729. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for printing textile materials of natural or regenerated cellulose with reactive dyestuffs. Accepted on 20th April 1967.

The reactive dyestuff is printed on the textile material in the first phase by means of a printing paste which contains water and a thickening agent and after drying the print is padded in the second phase with an aqueous liquor which contains an agent having an alkaline reaction and exposed to an air passage.

104803. Corning Glass Works. Cooling arrangement for glass forming equipment. Accepted on 25th April 1967.

Cooling arrangement including a single fluid coolant distributing and control plate positioned adjacent but spaced from the cooling surface of the mold element and positioned between the coolant inlet and outlet.

104949. Veb Leuna-Werke "Walter Ulbricht". A process for the separation of dimethylformamide from its reaction product. (22nd November 1965). Accepted on 27th April 1967.

Carbon monoxide is removed after expanding the products to normal pressure and the remaining portion is evaporated and the gaseous product is distilled.

104957. Brown, Boveri & Company Limited. Tilting device. Accepted on 24th April 1967.

Comprising a cylinder and a hollow piston characterised in that both are provided with segments and slots in between.

104981. J. Stone & Company (Deptford) Limited. Improvements relating to arrangement for the protection of semi-conductor apparatus against overvoltage and/or overload by short-circuiting its input. (26th April 1965). Accepted on 26th April 1967.

Comprising a thyristor or like controllable semiconductor device connected across the input, and at least one zener diode or like static voltage and/or current responsive device connected to the semiconductor apparatus for detecting overvoltage and/or over current arising therein and to the thyristor or like for applying a control signal.

105221. Esso Research and Engineering Company. Compositions useful as plant desiccants. Accepted on 18th April 1967.

Comprising a liquid carrier having incorporated therein a C_{10} carboxylic acid and an emulsifier.

105308. Koppers Company, Inc. Lance apparatus for treating molten metals. Accepted on 28th April 1967.

Comprising tubular envelope with a closure and fluid passages there through, conduits and means to flow oxygen and cooling fluid.

105422. Pirelli Societa Per Azioni. Radial cord carcass pneumatic tyre. (24th March 1966). Accepted on 25th April 1967.

Includes a reinforcing fabric strip extending to one fifth of the height of the tire section, the end of said strip farther from rotational axis being located off the bead toe at a distance twice that between the bead toe and the strip end nearer to said axis.

105461. Inventa A. G. fur Forschung und Patentverwertung. Process for the purification of lactams. Accepted on 24th April 1967.

Characterised in that to a melt of 50 to 90 parts by weight of lactam kept in an adiabatic state are added 50 to 10 parts by weight of a solid lactam and after melting equilibrium is reached, the crystal mass is separated from the melt.

105606. Council of Scientific and Industrial Research. An improved process for the manufacture of salicylanilide. Accepted on 27th April 1967.

Condensing salicylic acid and anillne in the presence of either orthophosphoric acid or pyrophosphoric acid.

105611. General Electric Company. Cutter bit. Accepted on 27th April 1967.

Characterized by a cylindrical shank adapted to engage cutting tips, the central portion of said shank containing radialy projecting collar.

105853. S. R. Ruia. Bobbins. Accepted on 25th April 1967.

Characterised by a metallic barrel tube, metallic upper flange and a lower flange covered with a flanged metal piece covering the upper face and rim of lower flange.

106681. Farbenfabriken Bayer Aktiengesellschaft. Process for the production of brightening agents of the bistriazinyl-aminostilbene series. (24th March 1966). Accepted on 28th April 1967.

Condensing cyanuric chloride with water soluble amine in aqueous medium free from organic solvents and thereafter reacting condensation product formed with 4, 4'-diamino-stilbene-2, 2'-disulphonic acid.

107068. Associated Electrical Industries Limited. Improvements relating to electrical switchgear. (15th September 1965). Accepted on 26th April 1967.

Provides a ring main unit which includes a switching device for selectively connecting a feeder to either of the cable sections independently of the switching device meant for connecting two adjacent sections of ring main cable.

107072. Franco Indian Pharmaceuticals Private Ltd. Improvements in or relating to atomising sprayers. Accepted on 26th April 1967.

Includes a spraying device, a screw cap, a U-shaped spring and plunger holder, a dip tube, and ball valves for regulating the flow of liquid.

107213. Mefina S. A. Sewing machine. Accepting on 22nd April 1967.

Comprising an upper thread capable of being fed by needle, and a lower thread capable of being fed by shuttle a looper being provided to cause the locking of the two threads to form a stitch.

107497. L. R. Zifferer. Method of grinding raw friable material and grinding mill for carrying out the method. Accepted on 25th April 1967.

Impelling portions of a stream of falling material against the interior of a cylindrical vertical wall and struck and abraded by further impelled portions of the material.

109271. Rhone-poulenc S. A. Insecticidal compositions containing new diazole compounds. [Divisional date 26th July 1965]. Accepted on 26th April 1967.

Comprises as an active ingredient at least one diazole compound in admixture with one or more diluents compatible with the diazole.

109718. Ciba Limited. Azo dyestuffs and process for their manufacture. (Divisional date 15th october 1965). Accepted on 17th April 1967.

An amino-azo-dyestuff containing 1 or 2 benzthiazole group is acylated with a reactive derivative.

110085. Letraset Limited. Apparatus for the application of dry transfer materials. (Divisional date 29th October 1965). Accepted on 20th April 1967.

Comprises means for holding a reel of transfer tape, means for withdrawing tape from the reel and means associated therewith comprising an edge or surface of small radius or a serrated surface so located that the tape or withdrawl is caused to pass over edge or surface of small radius making a substantial change of direction thereat or over serrated surface in pressure contact therewith.

Opposition Proceedings

An opposition has been entered by Orissa Cement Limited to the grant of a patent on application No. 100026 made by India Refractories Limited.

Correction of Clerical Errors

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical error occurring in the specification in respect of patent application No. 104951 was corrected on 25th April 1967.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Metallgesellschaft Aktiengesellschaft, Frankfurt/Main, Reuterweg 14, West Germany, a company organized under the laws of West Germany, seek leave to amend the claims in the specification of patent application No. 99976. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

The amendment Proposed by Indian Oxgen Limited in respect of patent application No. 96008 as advertised in the Gazette of India, Part III, Section 2, dated the 31st December 1966 has been allowed.

(3)

The amendments proposed by Carlisle Chemical Works, Inc., in respect of patent application No. 88582 as advertised in the Gazette of India, Part III, Section 2, dated the 28th May 1966 and 21st January 1967 have been allowed.

(4)

The amendment proposed by Bengal Ingot Company (Private) Limited and another in respect of patent application No. 97072 as advertised in the Gazette of India, Part III, Section 2, dated the 21st January 1967 has been allowed.

(5)

The amendment proposed by Hercules Powder Company in respect of patent application No. 98501 as advertised in the Gazette of India, Part III, Section 2, dated the 21st January 1967 has been allowed.

(6)

The amendment proposed by Becorit Grubenausbau GmbH in respect of patent application No. 98688 as advertised in the Gazette of India, Part III, Section 2, dated the 21st January 1967 has been allowed.

Renewal Fees Paid

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 75102—Amar Nath Puri.

The patent ceased on the 28th January 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 11th September 1965. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 24th June 1967.

(2)

An order has been made on the 3rd April 1967, restoring the patent No. 54943 dated as of the 19th July 1954, granted to Permacel Tape Corporation for "hand tape dispenser".

(3)

An order has been made on the 4th April 1967, restoring the patent No. 60319 dated as of the 26th April 1957, granted to Hikohisa Ueyama for "an apparatus for cutting belt-like joss-stick material and sliding it down in whirlpool joss-stick punching machine".

(4)

An order has been made on the 14th April 1967, restoring the patent No. 78146 dated as of the 21st August 1961, granted to Roche Ramchand Pardasani for "improvement in or relating to locks".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 3. No. 129649. Baroda General Industries, an Indian Firm, Ram Baug, Swami Vivekanand Road, Malad (West), Bombay-64 (Maharashtra), "Wool holder", October 18, 1966.

Class 3. No. 130042. Mahd. Ziaullah, Indian National, C/o Messrs A.C. Coondoo and Company, 42, Nizirabad, Lucknow, Uttar Pradesh, "Container" January 3, 1967.

Class 13. Nos. 129312 to 129352 and 129354 to 129362. Kesoram Industries & Cotton Mills Limited, Indian Company, 42, Garden Reach Road, Calcutta-24, "Textile goods", September 5, 1966.

Class 13. Nos. 129623 to 129626 and 129628. The Crown Spg. & Mfg. Co., Ltd., Gokhale Road (South), Parel, Bombay 13 (Maharashtra), Nationality—Indian Company, "Textile goods", October 15, 1966.

Class 13. Nos. 130034 to 130038. Sovirin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", January 2, 1967.

Class 13. Nos. 130110 to 130113 and 130116 and 130117. Crown Spg. & Mfg. Co., Ltd., Gokhale Road (South), Parel, Bombay 13, Maharashtra, Nationality—Indian Company, "Textile goods", January 10, 1967.

Class 13. No. 130125. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay 213, "Textile piecegoods", January 11, 1967.

Class 13. No. 130126. The Phoenix Mills Limited, an Indian Company, Tulsi Pipe Line Road, Lower Parel, Bombay-13, Maharashtra State, "Textile goods", January 11, 1967.

Class 13. Nos. 130144 to 130147, 130149 and 130152 to 130155 The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", January 17, 1967.

Class 13. No. 130160. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", January 18, 1967.

Class 13. No. 130241. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", January 31, 1967.

Class 13. No. 130257. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", February 2, 1967.

Class 14. No. 129353. Kesoram Industries & Cotton Mills Limited, Indian Company, 42, Garden Reach Road, Calcutta-24, "Textile goods", September 5, 1966.

Class 14. Nos. 130122 and 130123. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods", January 11, 1967.

Class 14. No. 130175. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay 213, "Textile piecegoods", January 19, 1967.

Copyright Extended for a Third Period of Five Years

Design Nos. 91206 and 91207 Class 4.

Design No. 91208 Class 3.

Cancellation of the Registration of Designs

(1)

Application for cancellation of the registration of Designs No. 92796 made by M/s. Partap Singh & Sons in the High Court for the States of Punjab and Haryana at Chandigarh being suit No. C. Misc. 1114 of 1962 has been dismissed as infructuous with no order as to costs by virtue of the order dated the 14th February 1967 of the Hon'ble Mr. Justice P. D. Sharma.

(2)

Application for cancellation of the registration of Design No. 92797 made by M/s. Partap Singh & Sons in the High Court for the States of Punjab and Haryana at Chandigarh being suit No. C. Misc. 1115 of 1962 has been dismissed as infructuous with no order as to costs by virtue of the order dated the 14th February 1967 of the Hon'ble Mr. Justice P. D. Sharma.

(3)

An application has been made by M. Ramaiah & Sons, for cancellation of the registration of design No. 128131 in Class I in the name of Ibrahim Gulam Hussain Currimbhoy & Others trading as Currimbhoy Industries.

A. JOGARAO,
Controller General of Patents, Designs and Trade Marks.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

29th April 1967

110440. Council of Scientific and Industrial Research. A new design for oxygen depolarised primary wet cells.

110441. Council of Scientific and Industrial Research. Process for the manufacture of high purity common salt by solar evaporation of brines.

110442. R. K. Choudhry of 31 Brabourn Road, Calcutta-1, C/o Kay Trading Syndicate, nationality Indian. Indicator for alarming determintal conditions for a running single phase induction run motor.

110443. Shri I. A. Rufus. Triple pass air flow ('tri-flo') direct fired air heater for use on tea dryers and other food processing machines.

110444. Joseph Pertot. Device for determining the fertile period of women.

110445. S. N. Tavaria. Improvements in or relating to electrical switched fuses or the like.

110446. Westinghouse Electric Corporation. Vending machine.

110447. Ciba Limited. Manufacture of new carbamyl compounds.

110448. Sandvikens Jernverks Aktiebolag. Compositions suitable for lining casting moulds and hot tops.

110449. Sinclair Research Inc. Apparatus for seismic prospecting.

110450. Allen Davies & Company Limited. Knapps Lane, St. George, Bristol-5 England, a British Company. "An improved package and method of making same". [Divisional date 12th October 1965].

110451. Canadian Industries Limited. Booster assembly. (2nd May, 1966).

110452. Imperial Chemical Industries Limited. New oriented films and tapes. (26th May, 1966).

110453. Babcock & Wilcox Limited. Improvements in pulverising mills. (5th May, 1966).

1st May 1967

110454. Ciba Limited. Manufacture of new imidazoline compounds.

110455. Ciba Limited. Manufacture of new dioxolane compounds.

110456. Surcot Industries Private Ltd. Improvements in or relating to sanitary towels and the like.

110457. Council of Scientific and Industrial Research. A process relating to the production of alpha-naphthaldehyde from alpha-methylnaphthalene, a constituent of tar oils obtained by both high and low temperature carbonization.

110458. Council of Scientific and Industrial Research. Vertical shaft kiln.

110459. Sri B. Barthakur. Machine for shelling paddy and other grains by belt and drum method.

110460. Sri B. Barthakur. Machine for parboiling of paddy under pressure.

110461. The Singer Company. Tufting mechanism, method stitches and article. (8th December, 1966).

110462. J. R. Geigy A. G. Compositions stabilized with alkylhydroxyphenylphosphates and phosphites.

110463. Clupak Inc. Newsprint paper and methods of making same. (7th March, 1967).

110464. Rockwell Manufacturing Company. Railway trucks.

110465. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Water-soluble moncazo dyestuffs and process for preparing them.

110466. Dana Corporation. Improvements in or relating to slip spline assembly.

110467. Asahi Kasei Kogyo Kabushiki Kalsha. Resin finishing of cellulose products.

110468. Sun Oil Company. Strippable coatings.

110469. S. Mustafa. Microptic binoculars.

2nd May 1967

110470. Nining and Allied Machinery Corporation Limited. Improvement in or relating to the system of discharge and distribution of the material from the main conveyor to the boom conveyor or conveyors and re-feeding to the main conveyor in swinging boom or fixed boom STACKERS.

110471. P. J. Chaugule. Improvements in or relating to shaving blade holders.

110472. P. J. Chaugule. Improvements in or relating to the leveling bases of levelling instruments and thedolites.

110473. N. N. A. K. Maliki. Improvement in or relating to Shoe Brush.

110474. C. R. Oberoi. Water Saver.

110475. B. R. Rao. Enclosure for medium tension electrical metering equipment.

110476. Gualdipex Sa. Bodies for burring rounding of edges, grinding and polishing.

110477. Phillips Petroleum Company. Method of controlling the surface area of furnace carbon black.

110478. The Dow Chemical Company. Aluminium plating process.

110479. Dana Corporation. Spring loaded clutch.

110480. Johnson & Johnson. An agglutinant composition.

110481. Tsentralny Nauchno-Issledovatelsky Institut Chernoi Metallurgii Imeni I. P. Bardina. A method of casting metals and alloys in a mould and a device for effecting same.

110482. Zavod Vibrator. Light spot electrical measuring instrument.

110483. Foseco International Limited. Bottom plate dressings.

110484. Roussel-Uclaf. Processes for the preparation of 11-substituted steroids, products thus obtained, and compositions incorporating them. (21st October 1966).

110485. Farbenfabriken Bayer Aktiengesellschaft. A process for the production of ion exchangers based on crosslinked acrylate polymers. (22nd December 1966).

110486. The Regents of the University of California. Control of mosquito larvae and pupae.

110487. The Wheelabrator Corporation. Method and means for continuous surface treatment.

110488. Molins Machine Company Limited. Improvements relating to the use of numerically controlled machine tools. (12th May 1966).

110489. Maschinenfabrik Augsburg-nurnberg Aktiengesellschaft. Improvements in or relating to rotor blades.

110490. Egyesult Izzolampa Es Villamossegi Reszvevtarsasag. Gas discharge tube.

110491. United States Steel Corporation. Apparatus and method for measuring temperatures.

110492. The English Electric Company Limited. Improvements in overcurrent relays. (13th May, 1966).

110493. E. R. Squibb & Sons. Inc. Nitrofuryl oxadiazolones.

110494. Textura AG. Method and apparatus for splicing yarn.

3rd May 1967

110495. Centre De Recherches De Pont-A-Mousson. Installation having a pouring ladle and a pouring ladle for said installation.

110496. Stamicarbon N. V. The preparation of Σ.'-bis (Σ-caprolactam) and the preparation of polyamide from this substance.

110497. International Business Machines Corporation. Apparatus for printing a recorded message.

110498. Halcon International Inc. Chemical process catalyst.

110499. Imperial Chemical Industries Limited. Improvements in or relating to elastomer non-elastomer staple fibre yarns. (7th June 1966).

110500. Metal Containers Limited. Ferrous metal articles having at least one surface coated with a sintered polyethylene.

110501. Farbenfabriken Bayer Aktiengesellschaft. Brightening agents of the bis-triazinyl-amino-stilbene series.

110502. Stamicarbon N. V. Process for the purification of L-aminolactam.

110503. M & T Chemicals Inc. Novel process.

110504. F. Hoffmann-La Roche & Co. Aktiengesellschaft. 9β, 10α—steroid and process for the manufacture thereof.

110505. Dr. A. Wander S. A. 10, 11-Dihydro-5h-dibenzo [a, d] cycloheptene derivatives.

110506. Krka Tovarna Zdravil. Process for preparing new 5-nitroimidazole ethers.

110507. L. E. Landeborg, S. T. Henriksson, and R. L. Huotka. A fork Truck.

110508. Knapsack Aktiengesellschaft. Electrode system for use in the electrolytic production of manganese dioxide.

110509. Algemene Kunstzijde Unie N. V. Improvements in or relating to a spinning assembly for the manufacture of synthetic threads.

110510. Sandoz Ltd. Improvements in or relating to organic compounds. (4th May 1966).

110511. N. V. Philips Gloeilampenfabrieken. Integrated circuit arrangement having groups of crossing connection.

110512. N. V. Philips Gloeilampenfabrieken. Method of preparing quaternary phosphonium compounds.

110513. N. V. Philips Gloeilampenfabrieken. Device for producing stimulated infrared emission, eraser.

110514. P. J. Chaugule. Shaving soap solution and shaving brush container.

4th May 1967

110515. Reliance Engineering Corporation. Improvements in or relating to filters for liquids used in industrial plants for various applications.

110516. Famatex G.m.b.H. Entering arrangement for fabric tentering machines.

110517. Foseco International Limited. Electroslag remelting and welding process. (5th May 1966).

110518. Caterpillar Tractor Co. Flywheel storage means for inertial bonding machines.

110519. Mrs. M. Devi. Novel process for making multicoloured article of marble and like substance.

110520. The Dunlop Company Limited. Improvements in expansible devices. (7th May 1966).

110521. Sterling Drug Inc. Chemical compounds and preparation thereof.

110522. Esso Research and Engineering Company. Fermentation process for the production of amino acids.

110523. Lester Raphael Wellman. Weaving machine system.

110524. Mcdowell-wellman Engineering Company. Mineral oil recovery process.

110525. Mead Johnson & Company. Process for preparing azaspiroalkanediones and the products thus prepared.

110526. R. K. Gupta. Manufacture of pine tar.

110527. Artos Dr. Ing. Meier Windhorst Kommanditgesellschaft. Process and arrangement for wet treatment of textile bands and similar applications.

5th May 1967

110528. P. K. Kulkarni. Improvement in or relating to sealing washer used in globe type valve, non-return valve and disc valve.

110529. Stella-Meta Filters Limited. Improvements in and relating to seals. (13th May 1966).

110530. G. S. Ahluwalia. Automatic Electro-mechanical, level crossing signal indicator and closer.

110531. J. R. Geigy A. G. Process for the production of heavy metal containing azo dyestuffs and their use.

110532. J. R. Geigy A. G. Process for the dyeing of organic fibre material.

110533. F. Eberhardt. Improvements in or relating to crane driving arrangements.

110534. Halcon International Inc. Chemical process.

110535. S. P. Kinney Engineers, Inc. Hot blast stove.

110536. The National Cash Register Company. Process for treating minute polymeric capsules.

110537. Ciba of India Limited. Water-insoluble azo dyestuffs and processes for their manufacture and use.

110538. Institut Francais Du Petrole Des Carburants et Lubrifiants. Process for manufacturing alcohols by oxidation of hydro-carbons.

110539. Xerox Corporation. A method of and apparatus for electro-phoretically forming image patterns.

110540. Marshall & Sons Co. (India) Ltd. A wheel hub for trailer assemblies.

110541. Marshall & Sons Co. (India) Ltd. Improvements in or relating to trailer assemblies.

110542. Marshall & Sons Co. (India) Ltd. Improvements in or relating to trailer assemblies.

110543. N. V. Philips Gloeilampenfabrieken. Method of producing compounds containing a double carbon-carbon bond.

110544. N. V. Philips Gloeilampenfabrieken. Methods of preparing new quaternary phosphonium compounds.

Alteration of Date

103492. The claim to priority date 20th January 1965 has been abandoned and the application dated as of 18th January 1966, the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

97874. Nitroglycerin Aktiebolaget. Improvements in or relating to low energy cord assemblies. Accepted on 29th April 1967.

The distance body is elongated and has an axial bore, the cross section of which is less than about 20 mm².

100543. Compania Industrial De Ayotla, S. A. Method of preparing paper pulp from cellular agricultural material. Accepted on 12th April 1967.

The cellular fibrous material is treated in a first zone with saturated steam and chemically defibred in a second zone and conveyed to a third zone for further pulping action.

100552. R. B. Miller. A process for obtaining fibre bundles from the rind of sugarcane and fibre bundles obtained thereby. Accepted on 13th April, 1967.

Comprising removing all the stalk and non-stalk material from the exterior of it, cutting the stalk of sugarcane and removing the pith from the interior of the stalk.

100586. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to injection radiation sources with zinc-doped gallium phosphide and methods of producing zinc-doped gallium phosphide. Accepted on 13th April 1967.

Comprising a body of gallium phosphide containing a solid solution of zinc and an electrode from where excess charge carriers can be injected into the zinc doped gallium phosphide body.

100593. R. B. Subramanian. Rotary internal combustion engine. Accepted on 14th April, 1967.

Rotor revolving on a fixed shaft in a casing, the casing having an inlet port, an outlet port and a sparkplug or fuel injector along its curved wall or in its vertical end plates and having two grooves cut in ITS end plates respectively for suction and compression pins.

100606. Jayer & Company. Improved air-borne folding stretcher for hospital and like use. Accepted on 17th April 1967.

Characterised in that side members are formed by cold rolling of steel sheet materials, pressworking same into rod-like member of rectangular cross section and seam joining its facing edges.

100804. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Dyestuffs process for their manufacture and synthetic materials dyed or printed by a process using said dyestuffs. Accepted on 27th April 1967.

Wherein the diazonium salts of 4-(2'-aminophenylmercapto)—naphthalic acids are heated in an aqueous medium in the presence of a copper salt or copper to temperatures ranging from 70° to 110°C and wherein the benzothioxanthene derivatives are condensed with amides.

100824. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to apparatus for recording image information. Accepted on 27th April 1967.

Rotating member is provided with magnetic marks by impressing same on a magnetisable layer thereon, corresponding to line and frame synchromisation pulses, to be scanned by at least one magnetic head.

100831. M. [illegible] Kumar Roy. [illegible] and the manufacture of ice in baked condition. Accepted on 28th April 1967.

Comprising an evaporator which is within or integrally formed with a channel and a cutter blades carried on a rotatable shaft for cutting ice from drum.

100844. Decca Limited. Improvements in or relating to drip feed apparatus. (5th August 1964). Accepted on 28th April 1967.

Wherein there is provided valve means for controlling the rate of occurrence of the drips in response to an electrical output signal.

100860. Nippon Electric Company, Limited. A temperature-compensated encoder. Accepted on 29th April 1967.

Having a holding circuit for holding samples of an input analogue signal and a temperature-compensation bias circuit connected to input circuit of holding circuit.

100861. Nippon Electric Company, Limited. A device for dealing with a fault in a two-way pulse communication system. Accepted on 29th April 1967.

With each station having a transmitter and a receiver, monitoring-time means responsive to the output of a frame-synchronism monitoring circuit in the receiver, and error-pulse discriminating means responsive to output of frame-synchronism monitoring circuit and monitoring-time means.

100874. Compagnie Generale De Geophysique and Institut Francais Du Petrole Des Carburants Et Lubrifiants. Device for securing a seismic vibrator to a vehicle. Accepted on 29th April 1967.

With two rods incorporating jacks, the rods having their upper ends secured to chassis of vehicle and a vibrator with shape of ball and provided with cylindrical bearing surfaces which carry lower ends of two forked members each of which associated with a jack.

100884. N. N. Ali Khan Maliki. Improvement in or relating to the shaving brush. Accepted on 1st May 1967.

From the bottom of the brush-head projects a vertical connecting rod of conical section which rests on the base of the latter collecting cup, the brush-head being emerging out of the latter detaining jacket.

101013. The Lubrizol Corporation. Metal sulfonates as smoke suppressants in fuel oils. Accepted on 1st May 1967.

A diesel fuel containing from about 0·1% to about 5% by weight of an oil soluble, basic alkaline earth metal salt of a bright stock sulfonic acid.

101281. Rohm and Haas Company. Acrylic monomers with hydroxyl and quaternary ammonium functionality and polymers thereof. Accepted on 29th April 1967.

Reacting alkali metal salt of acid of $CH_2=C(R)COOH$ with chlorohydroxy propyl quaternary ammonium salt CL $CH_2CH\,CH_2\,N^{\pm}R_1+R_2R_3$ where R is hydrogen or $C_1—C_3$ alkyl; $\mp R^1\,OH\,R^2\,X^{-}R_3$.

R each is $C_1—C_{18}$ alkyl, phenyl, aralkyl; X is anion.

101327. Deering Milliken Research Corporation. Process for modifying the characteristics of a structure containing keratin fibers and products obtained thereby. Accepted on 28th April 1967.

Comprising impregnating the structure with a polyfunctional isocyanate and a polyfunctional compound and curing said isocyanate and said polymeric polyfunctional compound on said fibers.

101563. Allied Chemical Corporation. A process for the preparation of polytetrafluoroethylene resin granules. Accepted on 29th April 1967.

Comprises subjecting ultra-fine polytetrafluoroethylene resin particles to agitation in an aqueous medium maintained at a temperature above about 19°C. until agglomeration of the resin particles occurs to give granules and separating granules from aqueous medium.

101630. Council of Scientific and Industrial Research. A process for the production of pure aromatics such as benzene, toluene, xylenes, naphthalene etc., from pure and mixed alkylaromatic feeds with or without saturates. Accepted on 1st May 1967.

Dealkylating toluene in presence of steam and hydrogen containing gases by thermal reaction at atmospheric pressure.

101670. S. Funakubo. A novel hand saw and the sawing device thereof. Accepted on 1st May 1967.

Having a saw blade with tooth projections on one edge and a supporting blade, these blades when mounted on wheels of band sawing device being in abutting contact with each other at the trailing edge of the saw blade and leading edge of supporting blade.

101706. Farbenfabriken Bayer Aktiengesellschaft. Readily dispersible inorganic pigments. (2nd July 1965). Accepted on 1st May 1967.

The surface of the pigment carries a non-ionic surface active cyclic acetal or ketal of a polyhydric alcohol.

101791. Farbenfabriken Bayer Aktiengesellschaft. Primary amines and a process for their preparation. (23rd July 1965). Accepted on 1st May 1967.

Reducing the corresponding nitro compound in sulfuric and medium with sulfur dioxide on a solution thereof in the presence of catalysts at temperatures between 30 and 250°C and separating the amino compound.

101898. United States Steel Corporation. Method of briquetting iron ore. Accepted on 7th April 1967.

Comprising pelletizing a mixture of iron oxide and bituminous coal particles, heating the pellets and compacting the same into briquettes.

101899. United States Steel Corporation. Improved method for the manufacture of tin plate. Accepted on 7th April 1967.

Wherein a fiber of oil in amounts between 1·0 and 5·0 gms. per base box is applied to tin coated strip prior to cold induction and the oiled surface is treated with aqueous chromate containing solution during cold reduction.

101994. Joseph Lucas (Industries), Limited, Alternators. (14th October 1964). Accepted on 12th April, 1967.

Comprising a main casing carrying all the generating equipment a body part secured to the casing and supporting a full wave rectifier a voltage regulator and brush box.

101996. Joseph Lucas (Industries) Limited. Dynamo-electric machines. (14th October, 1964). Accepted on 12th April, 1967.

Comprising a rotor shaft, a rotor, a slip ring unit comprising a body engaged as a push fit with the shaft and interengaging parts on the body and the rotor to drive the slip ring unit.

102062. The Anil Starch Products Limited. Improvements in or relating to the simultaneous purification and clarification of enzyme solutions obtained from microbial cultures. Accepted on 14th April 1967.

Characterized by introducing an electric current between metal aluminium anode and a metal aluminium or other metal cathode spaced apart wherein the enzyme solution comes into contact with anode and cathode in a turbulent flow.

102075. Microwave Instruments Limited, and William Charles Reed. Improvements relating to the measurement and/or control of moisture content of particulate materials. Accepted on 2nd May 1967.

Comprising a wave guide, means for feeding material into and for receiving material from respective spaced openings into the wave guide, means for injecting the flow of gas, a microwave generator and means for receiving microwaves.

102092. Halcon International Inc. Improvement in or relating to the production of oxirane compounds. Accepted on 17th April 1967.

Process for the production of oxirane compounds by the epoxidation of olefin with an organic hydroperoxide and with the separation and recovery of alcohol from the epoxidation reaction mixture comprises treating the epoxidation reaction mixture in order to reduce the acidic catalyst characteristics of the mixture before separation and recovery of said alcohol.

102113. Universal Moulded Fiber Glass Corp. Curved fiber reinforced resin articles and production thereof. Accepted on 18th April, 1967.

Comprising a device for shaping resin article and mechanism for pulling shaped article in curved feed path including a pair of crawler treads each having a series of tread linkes carrying gripping elements.

102191. Allied Chemical Corporation. Process for the manufacture of coated synthetic board. Accepted on 22nd April 1967.

Comprises applying a moisture-cure polyurethane and a coating having free isocynanate groups or a composition comprising polyurethane and carrier to a synthetic board substrate which is exuding moisture and is at a temperature of at least 37·8°C.

102228. Knorr-Bremse GmbH. Control valve for compressed-air brakes of rail vehicles. Accepted on 26th April, 1967.

Comprising a piston controlled by the pressure in an air main against that in a control chamber characterised in that the said piston is a differential one.

102229. Knorr-Bremse GmbH. Indirectly acting compressed-air brake for rail vehicles. Accepted on 26th April, 1967.

Comprising a two-pressure control valve controlled by an air main and an auxiliary air chamber, brake, release and accelerating valves and a control piston assembly comprising two pistons.

102244. Calmec (Manufacturing) Limited. Improvements relating to the formation of deep drawn hollow bodies of plastics material. (27th October 1964). Accepted on 26th April 1967.

Securing a section of heated sheet plastics material relative to a frame, moving heated male tool element means laterally relatively to the section of heated sheet plastics material to form cavity means in the sheet reducing pressure within said means.

102267. Americal Flauge & Manufacturing Co. Inc. Plastic paint brushes. Accepted on 28th April, 1967.

Paint brushes of the type in which the handle and ferrule component parts are molded of a synthetic plastic material characterized in that said ferrule having adhesive receiving means formed on the interior surface thereof and an adhesive receiving beveled surface at the outer edge thereof.

102269. Imperial Chemical Industries Limited. Catalytic process for the oxidation of butene or butadiene. (15th March 1965). Accepted on 28th April 1967.

Comprises interacting n-butene or butadiene with oxygen in the vapour phase at temperature 250° C to 350° C in the presence of a catalyst.

102272. Aktiebolaget Bofors. Damping valve for yieldable suspension device. Accepted on 28th April 1967.

Characterised in that the damping fluid passing through the same is throttled more than passing in one direction.

102293. The English Electric Company Limited. Improvements in or relating to water turbines, pumps and reversible pump turbines. (30th October 1964). Accepted on 29th April 1967.

A bladed runner adapted to be rotatably mounted within wall means defining a water passage, a dynamo-electric machine including a stator and a rotor, the stator being adapted to be mounted so as to surround said water passage and the rotor being attached to the bladed runner.

102319. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to electric discharge tubes of the kind comprising a photocathode. Accepted on 28th April 1967.

Characterised in that the semiconductor consists of a strongly p-conducting AIII-BV compound or of mixed crystals of such compounds with an energy gap lying between 1·1 V and 1·6 V.

102323. General Electric Company. Method of introducing electrical conductors into conductor accommodating structure and apparatus for accomplishing same. Accepted on 1st May, 1967.

A method of placing electrical conductors in which a current surge generated in the conductors causes the conductors to move in a confined path.

102324. General Electric Company. Method for placing one or more electrical coils in desired spacial relationship with respect to a core. (Accepted on 1st May, 1967.

A method of placing windings in which an electro magnetic force caused by a current surge in the winding is utilised to move the conductors.

102328. V. R. Bhide. Vacuum flask. Accepted on 1st May, 1967.

Having clamping means comprising a channel, comprising a face plate a wall see used to the outer wall of cannister.

102338. Nederlandse Organisatie Voor Toegepast-Natuurweten-Schappelijk Onderzoek Ten Behoeve Van Nijverheid, Handel En Verkeer. Method of and device for feeding additional materials into a stream of molten metals and articles obtained thereby. Accepted on 1st May, 1967.

Characterized in that the outlet channel, upto its orifice, has gradually decreasing transverse cross-sections substantially without a cylindrical part and a cylindrical feeding chute is mounted concentrically in the said outlet channel, the lower rim of the chute projecting below the orifice of the outlet channel.

102351. Veb Chemiefaserwerk "Friedrich Engels" Premnitz/Kr. Rathenow. Process and apparatus for the continuous solution polymerization. Accepted on 2nd May, 1967.

Comprising polymerising reaction mixture in a shaft-like reaction vessel, conveying polymer solution characterized in reaction heat being eliminated by installed cooling elements.

102368. Ethyl Corporation. Treating alcohols remove odors causing components therefrom. Accepted on 3rd May, 1967.

First treating with cu—lr—o type catalyst in hydrogen and then hydrogenated in presence of Ni catalyst.

102385. Secretary of State for Defence in Her Britannic Majesty's Government of the United Kingdom of Great Britain and Northern Ireland. Improvements in or relating to multi-stage valve mechanisms. Accepted on 4th May, 1967.

A step by step actuating means comprising a rotatable plate for transmitting movement to the valve and two ratchets and associated pawls for rotating valve in opposite direction.

102439. Nomita Export Corporation. Improvements in or relating to display devices. Accepted on 2nd May 1967.

Comprising a metal plate or board on which are suspended bright and|or coloured discs by inserting them on supports provided or metal plate or board, the discs being free to cover the entire area constituting displayed matter and being free to vibrate.

102685. R. B. Golobart. A weft thread inserting device in weaving machines. Accepted on 29th April 1967.

Clamping member comprises a fixed jaw and a movable jaw, one of said jaws being provided with a throat to receive weft thread when gripped by clamping member.

102802. Tesla, narodni podnik. Improvements in and relating to a method of producing thoriated electrodes for electric discharge lamps. Accepted on 1st May 1967.

Filled with powdered thorium in an amount of minimum 0·1 mg. and with halogen or its compound of one or several metals of the 1st, 2nd, 3rd or 4th group, or the group of rare earths of the periodic system of elements, e.g. mercury, thallium, sodium, indium, scandium, or gallium in an amount of minimum 0·001 micromole per cubic centimeter of the discharge tube volume.

102820. The B. F. Goodrich Company. Method of preparing 1, 2-dichloroethane. (24th May 1965). Accepted on 3rd May 1967.

Passing vapours of ethylene, Hcl, and oxygen containing through fluidized copper catalyst at 190-250°C hot quenching reacted gases to 70—100°C cooling effluent from hot quench stage to 40°C all the steps being carried at a pressure of 10—50 p.s. i.g.

102821. The B. F. Goodrich Company. Method of preparing 1, 2-dichloroethane. (24th May 1965). Accepted on 3rd May 1967.

Passing vapours of ethylene, Hcl, and oxygen containing gas through a fluidized copper catalyst at 200—250°C hot quenching reacted gases to 70—100°C, cooling effluent from hot quench stage to 40°C and recovering 1, 2-dichloroethane.

102822. The B. F. Goodrich Company. Method of preparing 1, 2-dichloroethane and catalysts thereof. (24th May 1965). Accepted on 3rd May 1967.

Passing vapors of ethylene hydrozen chloride and an oxygen-containing gas through a fluidized bed of a copper containing catalyst at a pressure of 10—50 p.s.i. and at a temperature of 190 to 250°C.

102823. The B. F. Goodrich Company. Method of preparing 1, 2-dichloroethane. (24th May 1965). Accepted on 3rd May 1967.

Passing a mixture of gaseous hcl. an oxygen containing gas and ethylene through a reactor at 190—250°C over copper catalyst at pressure of 10—20 p.s.i.

102897. Aktiebolaget Bofors. Device for steering system of combat vehicles. Accepted on 1st May 1967.

Control member intended for the ordinary control of the steering system can rapidly be disengaged and at the same time a secondary control member can be engaged.

103025. I. S. Batjuta and D. P. Sidorova. Device for transporting film in cameras. Accepted on 1st May 1967.

Characterized in that between the winding lever and the take up reel a planetary gear mechanism is arranged having two coaxial sun gears, one of which is connected to the take up reel and the other is freely mounted, and a carrier mounting planet-gears and connected to the winding lever.

103314. Tepar A. G. A package having an oblique opening indication. Accepted on 2nd May 1967.

Characterised by tear-up indication which facilitating the tear-up portion of the fin running across the flap to form an emptying opening.

103272. Beteiligungs-Und Patentverwaltungsgesellschaft Mit Beschrankter Haftung. Method and apparatus for heat exchange between fine granular material and a gas. Accepted on 1st May 1967.

The step of heat exchange in cement production comprising causing the gas to flow in countercurrent to the raw produced cement.

103310. Borg-Warner Corporation. Thermoelectric assembly. Accepted on 2nd May, 1967.

Comprising means providing a plurality of thermoelectric couples being arranged in a bundle, and means at opposite ends of the said bundle to provide a plurality of electrical connections between certain pairs of strings.

103406. Badische Anilin & Soda-Fabrik Aktiengesellschaft. Production of particulate expandable styrene polymers. Accepted on 1st May 1967.

Polymerising styrene with or without one or more other aliphatically unsaturated monomeric polymerisable compounds in aqueous suspension in the presence of an expanding agent.

103431. Standard Telephone and Cables Limited. A fault registration system for use in switching installations. Accepted on 29th April 1967.

Comprising one or more temporary memories for registering information, a permanent registering device to which the information registered means to indicate one or more preselected fault conditions conditions means to compare registered information in said temporary memory.

103492. Smiths Industries Limited. Improvements in or relating to aircraft instruments. (20th January 1965). Accepted on 29th April 1967.

Comprising first means for providing a signal, second means for providing a signal dependent upon the incident of the aircraft and third means for providing in accordance with the signals provided by the first and second means.

103543. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S. p. A. Improvement in the processes for recovering dimethylformamide from coagulation baths utilized in wet-spinning of acrylonitrile polymers or copolymers. [Addition to No. 90209]. Accepted on 3rd May 1967.

Using in-exchange resin for purification of mixtures of dimethyl formamide and acrylonitrile.

103573. Fertilizer Corporation of India Limited. A process for preparation of carbon black forom carbon slurry produced during gasification of petroleum oils. Accepted on 29th April 1967.

Comprising heating the carbon pellets produced by agitating carbon slurry obtained during the gasification of petroleum oils, with petroleum oils.

103383. Shell Internationale Research Maatschappij N. V. Process for the separation of residual petroleum fractions into asphaltenes, resins and oil. Accepted on 1st May 1967.

Asphaltenes are precipitated out and the residual solution is treated with an extracting agent whereby the resinous material is extracted out.

103917. Vsesojuzny nauchno-Issledovatelsky i proektnotekhnologichesky institut ugolnogo mashinostroenia., Machine for manufacturing fiberglass plastic articles or fiberglass cords. Accepted on 29th April 1967.

Characterized in that the mandrel made rotatable and provided coaxial ring shaped comb inclined equally also a longitudinal spreading mechanism transferred along the mandrel comprising a plurality of members.

103930. S. Matteini. Solid repuse incinerator. Accepted on 1st May 1967.

Comprising rotary cylindrical casing means, passages for exhaust gases and valve means.

103949. Ici Fibres Limited. Production of filled polyamides. (4th March 1965). Accepted on 1st May 1967.

A composition comprising above 50% of a high molecular weight synthetic linear polyamide composition having in admixture a filler of a mineral hydrated aluminium silicate.

104084. Chemische Fabrik Pfersee G.m.b.H. The flameproofing of textile materials. Accepted on 3rd May 1967.

Treating textiles with an aqueous bath containing tris-(aziridinyl)-phosphine oxide and/or tri (aziridinyl)-phosphine sulfide, and a mixture of phosphoric acid and guanidine.

104200. Midland-Ross Corporation. Molding machine. Accepted on 1st May 1967.

Comprising a base, mold means, a guideway, a reciprocal mold number, a support member, and expansible and contractible means.

104221. Sandoz Ltd. Reactive dyes, coloring, dyeing or printing processes using the said dyes, and leather or fibrous materials whenever dyed, padded or printed therewith. Accepted on 3rd May 1967.

Reacting water soluble organic dye with an acid halide such as 2, 4-dichloro-6-methylpyrimidine-5-acetic acid chloride.

104224. Societe Fives Lille-Cail. Centrifugal separator. Accepted on 29th April 1967.

Centrifugal separator comprising a stationery container, basket, drive means rotating basket in container, basket having imperforate axial wall, spacer means holding a filler medium, axially spaced terminal walls.

104267. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to ultrasonic delay devices. Accepted on 29th April 1967.

Characterized in that the pentagonal ground face consists of two substantially parallel sides, a third side substantially at right angles thereto and two sides having the input and output transducers and being at an angle of substantially 45° to the third side whilst the length of the parallel sides is chosen so that the ultrasonic waves are reflected twice on each of the parallel sides.

104283. W. C. Heraeus Gesellschaft mit beschrankter Haftung. An alloy and material such as pen nibs made therefrom. Accepted on 2nd May 1967.

An alloy comprising not more than 50% of osmium, 20 to 50% iridium, 5 to 20% ruthenium, rest not exceeding 25% of platinum, palladium and/or rhodium as well as up to 15% of base metals.

104346. Flexnit Company. Inc. Foundation garment. Accepted on 2nd May 1967.

Comprising in combination a plurality of panels and at least one self adjustable panel.

104529. Zavody vseobecneho strojirenstvi oborovi reditelstis. Trigger mechanism of automatic guns. Accepted on 3rd May 1967.

A tripping lever is rotatably interposed between the trigger and the sear, a spring being interposed between the trigger and the tripping lever.

104540. Borg-Warner Corporation. Absorption refrigeration apparatus. Accepted on 1st May 1967.

Means for exhausting and venting non-condensable gases from the concentrated solution time to prevent there from collecting in the solution heat exchanger.

104631. Sperry Rand Corporation. Electric dry shaver. Accepted on 3rd May 1967.

Actuating means is operable to move inner casing between spaced limit positions within outer casing to place cutter head at selected elevated positions in the opening of outer casing.

104659. Painter Brothers Limited. Improvements in metal lattice structures. (14th January 1966). Accepted on 3rd May 1967.

Including two longitudinally extending members, and a number of flat plates bridging the gap between and mutually spaced along the length of the members.

104815. Fabrenfabriken Bayer Aktiengesellschaft. Thermosetting copolymers (22nd February 1966). Accepted on 1st May 1967.

Having incorporated therein (a)1—25% by weight of an N-alkoxymethyl acrylamide or methacryamide (b) 35—85% by weight of at least one alkyl of an acrylate (c) 5—40% by weight styrene, vinyl-toluene and/or a methyl styrene (d)—3—15% by weight of an α —bromo-ethylenically unsaturated carboxylic acid, (e) 3—30% by weight of a copolymerisable ethylenically unsaturated ether (f) 0—10% by weight acryl-or methacryl amide.

104874. Associated Electrical Industries Limited. A method of packing a space between members of a mechanical structure. (27th April 1965). Accepted on 3rd May 1967.

Comprising the steps of inserting into the space between members packing means comprising a tube of pliable material, filling the tube with a fluid under pressure, and causing the fluid to solidify.

105050. Jaggy & Company. Improvements in or relating to educational toys. Accepted on 1st May 1967.

Comprising a box with a lid containing information and being provided with apertures and means to automatically move one set of items when other set is being manipulated.

105154. D. D. Thakkar. Improvements in or relating to pneumatic horns. Accepted on 29th April 1967.

Comprising an air reservoir situated within an exterior casing, means provided on said casing in the form of plunger, a pressure plate provided at the lower end of the plunger intake and exit valve means and a resilient tube.

105348. G. B. Stillit. Improvements in or relating to apparatus for teaching knowledge. (19th May 1965). Accepted on 2nd May 1967.

Comprising in combination a printed sheet carrying a sequence of questions and a related group of a plurality of feasible answers to each question arranged in sapaced relation with each other electrical conducting means, a manipulatable electrical contact element including two pointed electrodes and an energising circuit containing an indicating device and the two electrodes.

105645. The Lubrizol Corporation. Method for the preparation of an oil-soluble basic alkaline earth metal salt of a phenol sulfide. Accepted on 29th April 1967.

Phenol sulfur and an alkalino earth base are reacted in the presence of a promotor comprising an alkaline earth metal carboxylate and an ethylene glycol monomethyl ether.

105852. Ceskoslovenska akademie ved. A process for the production of metallochromic and extractive chromotropic acid diamides. Accepted on 3rd May 1967.

Treating chromotropic acid diamides with a diazotized primary amine.

105969. Jawa, narodni podnik. Hand starting device for internal combustion engines. Accepted on 29th April 1967.

Carrier fixedly connected with the engine crankshaft being provided with a projection or projections against which is disposed in the direction of rotation an abutting edge or edges of a shoe or shoes.

106120. Amsted Industries Incorporated. Mold riser box and ingate construction. Accepted on 1st May 1967.

Permanent and reusable riser box construction comprising a unitary member having an upper portion of large dimension forming a reservoir space and small dimensioned lower stem passage communicating with reservoir space, member being provided with sand.

106133. Licentia Patent-Verwaltungs-GmbH. Method for assembly of the rotor of heavy electric machines with a vertical shaft. Accepted on 3rd May 1967.

Component parts of the pole-wheel spider are used as adjusting means for the pole wheel ring.

106355. Indian Plastics Limited. Improvements in or relating to cycle paddle. Accepted on 2nd May 1967.

A cycle paddle comprises a paddle body forming an internal bore and having a liner to embrace partially the spindle, housing moulded with paddle in sides of bore, paddle being held by spindle.

107505. Allen and Hanburys (Surgical Engineering) Limited. Improvements relating to obstetric instruments. Accepted on 28th April 1967.

Comprising plurality of overlapping sections which can be superimposed to form a closed position and can be rotated into an open position in form of cup by rotation of a handle.

107677. A. R. Russell. A new and improved apparatus for use in the treatment of bronchiectasis and other ailments. (28th October 1965). Accepted on 29th April 1967.

Apparatus for treating bronchiectasis including a frame, a table, mounted on that and means supporting a patient on that and moving platform on frame reciprocally so that foreign matter from lungs is ejected.

Printed Specification published

A limited number of printed copies of the undernoted specifications are available for sale from the Officer-in-charge, Government of India, Central Book Depot, 8, Hastings Street, Calcutta, at two rupees per copy:—

Class 13. Nos. 130213 to 130215. The Bombay Dyeing & Mfg. Co. Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton Textiles", January 24, 1967.

Class 13. Nos. 130217 to 130219 and 130221 to 130223. The Crown Spg. & Mfg. Co. Ltd., Gokhale Road (South), Parel, Bombay-13, Maharashtra, Nationality—Indian Company, "Textile goods," January 25, 1967.

Class 13. Nos. 130225 to 130233. Bombay Fancy Textile Company, Bharat House, 104, Apollo Street, Bombay-1, and Indian Partnership firm (Registered under the Indian Partnership Act), "Textile piecegoods", January 27, 1967.

Class 13. No. 130267. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", February 4, 1967.

Class 13. Nos. 130297 to 130308. Hindustan Embroidery Mills Private Ltd., Chheharta, (Nr. Amritsar), Punjab, India, Nationality : Indian Firm (A Private Limited Company incorporated under the I. C. Act) "Textile goods", February 6, 1967.

Class 13. Nos. 130317 to 130335. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building : 6, Ballard Road Bombay-1, Indian Company, "Textile piecegoods", February 9, 1967.

Class 13. Nos. 130336 to 130340. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods," February 10, 1967.

Class 14. Nos. 129864, 129866, 129867, and 129869. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods" December 6, 1966.

Class 14. No. 130266. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods," February 4, 1967.

Class 14. Nos. 130294 to 130296. The Delhi Cloth & General Mills Co., Ltd., Indian Company, Post Box No. 1039, Bara Hindu Rao, Delhi-6, Delhi, "Textile piecegoods," February 4, 1967.

Copyright extended for second period of five years

Design No. 111429 — Class I.

Design Nos. 106163, 106710, 111430, 112380, 112381, to 112388, 112625, 112658 to 112663, 113284, 113555, 114354, 114649, 114651, 113991, 114894, 115046, 115114. — Class 3.

Design Nos. 114764 and 113488 — Class 4.

Design Nos. 112184, 112187, 112193, 112207, 112194, 113132, 113135, 113138, 113144, 113145, 113494, 113496 and 114781. — Class 13.

Copyright extended for a Third period of Five Years

Design Nos. 84056, 88112 and 88113, 92410, 92448, 92981, 93056, 106582 and 106583. — Class 3.

Design No. 90406. — Class 4.

Cancellation proceedings (section 51 A) (Design).

An application has been made by Vishisht Kumar, trading as V. R. Industries Co., for cancellation of the registration of design No. 129010 in the name of Ram Chander trading as V. H. Manufacturing Company.

A. JOGARAO

Controller-General of Patents, Designs and Trade Marks.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE
Patents and Designs
Calcutta, the 27th May 1967
SPECIAL NOTICE

The undermentioned publications which have hitherto been sold by the In-charge, Govt. of India Book Depot, 8, Hastings Street, Calcutta-1 have been transferred to the Patent Office, 214, Lower Circular Road, Calcutta-17 and copies thereof will henceforth be sold by the Patent Office.

Printed patent specifications Nos. 75,001 to 80,000.

2. Copies of the specifications Nos. 1 to 75,000 would also continue to be sold by the Patent Office as before.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

6th May 1967

110545. Electrical Manufacturers & Suppliers Private Limited. A lighting equipment for mercury fluorescent lamps.

110546. The B. F. Goodrich Company. Catalyst and method of preparing unsaturated aldehydes and acids. (24th August 1966).

110547. B. K. Nevatia Stapleless stapling machine.

110548. R. D. Werner Co., Inc. Front Loading extension ladders.

110549. Western Electric Company, Incorporated. Electromagnetic wave apparatus.

110550. Ciba Limited. New azine dyestuffs and processes for their manufacture and use.

110551. P. A. M. Rao. Improved type of writing and drawing pencils.

110552. G. S. Agricultural Engineering Works. Improvements in or relating to a seed-*cum*-fertilizer drill.

110553. Allied Chemical Corporation. Process and apparatus for separating entrained liquid from a gas.

110554. Porous Plastics Limited. Improvements relating to surface treatments for porous plastics materials.

110555. Farbenfabriken Bayer Aktiengesellschaft. Thiolphosphoric (-phosphonic) acid esters.

110556. Japanese Consulting Institute. Improvement in the production process of phosphate-nitrogen fertilizer or phosphate-nitrogen-potash fertilizer.

8th May 1967

110557. Council of Scientific and Industrial Research. A process relating to the production of nicotinic acid and pyridine from quinoline, a constituent of coke-oven tars.

110558. Sumitomo Chemical Company Ltd. Indole derivatives.

110559. General Electric Company. Improvements in or relating to stereoscopic X-ray apparatus.

110560. General Electric Company. Improvements in or relating to process of developing electrical coils in inductive devices and apparatus for practising the process.

110561. Hooker Chemical Corporation. Cathode structure for electrolytic cell.

110562. Izhorsky Zavod im A. A. Zhdanova. Driving mechanism of double track vehicles.

110563. Becorit Grubenausbau Gmbh. Improvements relating to rail vehicles.

110564. Imperial Metal Industries (Kynoch) Limited. Improvements in or relating to gear train assemblies. (23rd May 1966).

110565. Imperial Chemical Industries Limited. Polyesters. (18th May 1966).

110566. Foseco International Limited. Production of metal ingots, slabs and billets. (9th May, 1966).

110567. Houdaille Industries, Inc. Machine tool construction.

110568. N. V. Philips Gloeilampenfabricken. New 9β, 10-steroids, method for the preparation thereof, pharmaceutical compositions which contain these compounds as active substances, and method of preparing said compositions.

110569. B. J. Shreedhara. Inter-communication Radio-both valve type and transistor type.

9th May 1967

110570. Celanese Corporation. Pillow manufacture. [Addition to No. 96578].

110571. American Cyanamid Company. Cyclohepten-6-ones and methods of preparing the same.

110572. Rexall Drug and Chemical Company. Preparation of free flowing foamable beads (23rd May, 1966).

110573. Farbenfabriken Bayer Aktiengesellschaft. Purification of enzyme inhibitors.

110574. Olin Mathieson Chemical Corporation. Process for obtaining composite article.

110575. Indian Oxygen Limited. Gas valve arrangements. (10th May, 1966).

110576. Stamicarbon N. V. The preparation of 7-amino-4-thia-oenanthic acid.

110577. Stamicarbon N. V. The preparation of 7-amino-4-thia-oenanthic acid.

110578. Scott Paper Company. Copolymerization of cellulose with ethylenically unsaturated compounds.

110579. International Business Machines Corporation. Ribbon package.

110580. P. Brown and P. H. James. Apparatus for producing patterned tufted material. (16th May, 1966).

110581. R. D. Werner Co., Inc. Ladder constructions.

10th May 1967

110582. (Mrs.) P. S. Deshmukh. Multiple liquid container-cum-mixer-cum-dispenser.

110583. H. K. Mhatre. Improved rheostat to control electric power.

110584. Ortho Pharmaceutical Corporation. Substituted cyclic carboxylic acids and preparation thereof.

110585. Ortho Pharmaceutical Corporation. Preparation of anti-rhglobulin.

110586. General Aniline & Film Corporation. Slide projector and magazine therefor.

110587. Carl Valentin Gmbh. Automatic weft bobbin changing device.

110588. Metallgesellschaft Aktiengesellschaft Ruhrgas Aktiengesellschaft. Process for the production of predominant carbon monoxide and resp or hydrogen containing gases out of solid fuels.

110589. A. Bhargova and N. Bhargova. Pumps for liquids. [Divisional date 2nd April 1966].

110590. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Pyridoindole derivatives and process for the manufacture thereof.

110591. L. E. Landeborg, S. T. Henriksson and R. L. Muotka. A method and a device for purifying the exhaust gases from motor-driven mining trucks.

110592. Central Glass Co., Ltd. A method for oxychlorinating lower olefinic hydrocarbons.

110594. Chas. Pfizer & Co., Inc. Animal feed composition.

110595. Air Reduction Company Incorporated. Liquid helium distribution system.

110596. British Insulated Callender's Cables Limited. Improvements in or relating to the manufacture of multi-conductor cables. (11th May, 1966).

110597. Carey Cushion Vehicle Corp. Ground effect machine. (1st June 1966).

110598. A. Reimbert. Improvements in or relating to methods of constructing silos or like containers, and structure thus obtained.

11th May 1967

110599. Sri A. Appalaswamy. and Sri G. A. Yadav. Improvements in or relating to combination locks.

110600. J. L. Bedi. Photo-viewer.

110601. D. S. Deodhar. Pipe made by interlocking band of thermoplastic material.

110602. B. D. Chaudhry. Rail track inspection trolley.

110603. Council of Scientific and Industrial Research. Epi-sun speed reducer.

110604. Council of Scientific and Industrial Research. A process relating to the disproportionation of toluene or coke-oven and petroleum fractions enriched in toluene into benzene and a mixture of ortho- Meta- and para-xylenes.

110605. Council of Scientific and Industrial Research. A process relating to the production of 4-cyanopyridine from gamma-picoline, a constituent of coke-oven by-products.

110606. M. H. Desai. Design of special motor.

110607. Mahle Komm.-Ges. Internal combustion engine piston.

110608. R. B. Golobart. Improvements in temples for shuttleless looms.

110609. Hindustan Lever Limited. Potato products. (18th May 1966).

110610. Hindustan Lever Limited. Potato products (16th August, 1966).

110611. Hindustan Lever Limited. Method and apparatus for frying. (18th May, 1966).

110612. Hindustan Lever Limited. Rolling of green tea leaf.

110613. Deere & Company. Cotton picker. [Divisional date 11th November, 1965]

110614. Deere & Company. Cotton picker. [Divisional date 11th November, 1965]

110615. May & Baker Limited. Heterocyclic compounds. (13th May, 1966).

110616. Joseph Lucas (Industries) Limited. Rear suspension systems for road vehicles. (20th May 1966).

110617. British Telecommunications Research Limited. Improvements in data transmisison systems. (17th May, 1966).

110618. Simon-Carves Limited. Improvements in or relating to desalination. (25th May, 1966).

110619. Soletanche. Shut-off device for the injection of cement in a bore hole. [Addition to No. 99116]

110620. C. Amratlal. Improvements in or relating to food carriers.

110621. M. H. Desai. Special electric motor.

12th May 1967

110622. C. B. Garware. Improvements in or relating to sleevings, tubes and pipes.

110623. C. B. Garware. Improvements in or relating to sleevings, tubes or pipes.

110624. C. B. Garware. Improvements in or relating to the manufacture of tapered nylon bristles for painting brushes, shaving brushes or the like.

110625. Rameswar Banerjee. Improvements in or relating to insecticides.

110626. J. R. Geigy A. G. Process for the production of a thermostable crystal form of a bis-triazinylamino-stilbene derivative.

110627. J. J. Kellum. Method and apparatus.

110628. Amicon Corporation. Plasticized polyelectrolyte gel and method of making same.

110629. Air Reduction Company Incorporated. Low temperature refrigeration and gas storage. (10th March 1967).

110630. Nyegaard & Co., A/S. Chemical compounds. (12th May 1966).

110631. The British Iron and Steel Research Association. Improvements in or relating to preheating and refining apparatus. (7th May 1965). [Divisional date 17th August. 1965]. [Addition to No. 101169].

110632. Mrs. Keya Kullar (nee Mukerji). Warning device particularly applicable to air-craft/aero space craft.

110633. Ceskoslovenska Akademie Ved. Mounting of filtration vessels of a sludge blanket clarifier combined with a solid filter.

110634. Koppers Company. Inc. Steelmaking process.

110635. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Polycyclic compounds and process for the manufacture thereof.

110636. James Mackie & Sons Limited. Improvements relating to textile machines. (18th May 1966).

110637. Textron Inc. Expansible linkage for use in making a watch band or similar article of jewellery.

110638. Ciba Limited. Process for hardening gelatine.

110639. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Process for the manufacture of 1, 2-dihydrobenzodiazepines.

110640. Beecham Group Limited. Aryl carbinols. (14th May 1966).

110641. Ciba Limited. Process for the manufacture of acth-active peptides having a prolonged action.

110642. Whitefin Holding S. A. Pyrrole derivatives, process for the preparation of the same and pharmaceutical compositions containing such derivatives.

Alteration of Dates

100904. The claim to priority date 25th August 1964 has been abandoned and the application dated as of 2nd August 1965, the date of filing in India.

100905. The claim to priority date 25th August 1964 has been abandoned and the application dated as of 2nd August 1965, the date of filing in India.

101297. The claim to priority date 25th August 1964 has been abandoned and the application dated as of 25th August 1965, the date of filing in India.

102406. The claim to priority date 7th November 1964 has been abandoned and the application dated as of 6th November 1965, the date of filing in India.

108649. Ante-dated to 13th July 1965 under Section 5 of the Act.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

96492. Aktiebolaget Bofors. A device for controlling a hydraulically or pneumatically driven cartridge ramming mechanism of an automatic gun. Accepted on 2nd May, 1967.

A reciprocating hydraulic or pneumatic motor and control means comprising a flow valve for controlling impelling medium for said motor.

99205. F. Stubbe. Ammunition boxes for housing fan-like assemblies of cartridges. Accepted on 4th May, 1967.

Comprising a hollow body having open ends and including top, bottom and opposed side walls, each side wall including portions converging inwardly from the opposite ends of the body.

99694. Dynamit Nobel Aktiengesellschaft. Improvements in or relating to cartridges. Accepted on 3rd May, 1967.

Comprising a case portion and a bullet portion said bullet portion being integrally formed with said case portion and being connected thereto by an integral portion of synthetic plastic material.

100850. Lonza Ltd. A process for the production of trimeric ruthenium tetracarbonyl. [Addition to No. 92008]. Accepted on 29th April, 1967.

Wherein a ruthenium compound of a carboxylic acid or of an phenol is treated with carbon mono-oxide at a temperature of from 100 to 250°C, and at a pressure of from 50 to 350 atms. in the absence of a hydrogen but in the presence of a solvent for the reactants.

100889. American Cyanamid Company. A method of producing a stable form of dimethyldithiophosphate. Accented on 2nd May 1967.

Comprises breaking up S-(1, 2-discarbethoxyethyl-0, 0-dimethyldithiophosphate by known methods in its substantially undiluted, adjuvant-free form into discrete droplets.

100904. The English Electric Company Limited. Improvements in or relating to electric switchgear. Accepted on 2nd May, 1967.

Comprising a structural member having electric connections through a pair of contacts with a circuit-breaker of the phase and operating mechanism for the breaker comprising a rotatable shaft and a plurality of plates embedded in said member.

100905. The English Electric Company Limited. Improvements in or relating to electric switchgear. Accepted on 2nd May, 1967.

Comprises an actuating mechanism including a rotatable shaft interconnecting means between shaft and a movable contact member and first and second releasable latching means to hold said shaft against rotation and to hold the contact member in a closed position.

100946. H. S. Aachen and W. W. Aachen. Process and plant for the reduction of iron ores using atomic heat. Accepted on 3rd May 1967.

The process characterised by transferring the heat generated by an atomic reactor directly or through a heat transferring auxiliary medium to the reaction charge.

100955. Nitroglycerin Aktiebolaget. A method for the manufacture of the fuse head element of electric fuses. Accepted on 4th May, 1967.

A strip of conductive material is stamped out along a portion of its width, is cut into large lengths and is rolled up, is fixed, priming material is applied.

100958. Chicago Pneumatic Tool Company. Pneumatic grinder with integral exhaust silencer. Accepted on 4th May, 1967.

Comprising a pneumatic motor with a housing which includes sound resonator cavities and passage means and vent means to guide the exhaust air from the motor to and away from the housing respectively.

100977. Frick Company. Refugeration apparatus. Accepted on 6th May 1967.

Comprising segregated precooling and freezing areas, insulated wall structure, a foraminous conveyor, structure for preventing excessive leakage through openings in walls through which conveyor extends, cooling coils, a floor a partition between the floor and conveyor, blower means and bottom structure inclined and with sump with discharge connection.

100978. T. J. Smith & Nephew Limited. Pressure sensitive adhesive compositions and pressure sensitive material including the same. (15th August 1964). Accepted on 6th May 1967.

Comprising a curable elastomer, a heat curing oil-soluble phenolic resin, tackifying resin and an aluminium alkoxide.

100979. Glaverbel. Process and apparatus for obtaining a transparent layer of metallic oxide on a glass surface. Accepted on 6th May, 1967.

Comprising in the first step in which a layer of the metal compound is condensed by methods known per se in presence of dry gas on the surface of the glass and a second step in which this layer is brought into contact with hydrolysing or oxidising fluid.

100994. Leesona Corporation. Winding machine. Accepted on 6th May, 1967.

Includes automatic mechanism for sequentially donning and supporting bobbins characterised by a holder for different yarns extending from corresponding supply packages and a selecting and delivering mechanism.

101057. Metallgesellschaft A. G. Process of automatically controlling the conveyor speed of sintering machines. Accepted on 8th May, 1967.

Continually measuring the waste gas temperature at a point which is disposed approximately midway of the distance travelled by the sintering conveyor, characterized in that a signal for effecting this control is generated in response to a trend of this waste gas temperature.

101059. Machinery Manufacturers Corporation Ltd. Electronic stop motion device. Accepted on 10th May, 1967.

Comprising an input circuit connected to a relay circuit through a rectifier circuit, an exciter circuit including a sensor or plurality of sensor switches connected to said relay circuit.

101092. Sherritt Gordon Mines Limited. Tin purification process. (22nd August 1964). Accepted on 11th May 1967.

By a method which comprises treating impure tin metal by leaching in an aqueous sulphuric acid solution to produce a solution containing dissolved in sulphate, separating the resulting solution from undissolved residue and hydrolyzing the dissolved tin sulphate to precipitate an oxidized tin compound substantially free from impurities from said solution and separating said compound from the solution.

101102. N. N. A. Khan Maliki. Improved self-soaping or self-watering shaving brush. Accepted on 6th May 1967.

Providing a shaving brush carrying with it some liquid soap or water in a container which being adapted to be mechanically passed on from the container to the bristles of the brush to moisten them for use.

101153. The British Petroleum Company Limited. Disproportionation of olefins. (8th September, 1964). Accepted on 4th May, 1967.

A catalyst suitable for use in the disproportionation of olefins comprises a mixture of rhenium heptoxide and alumina.

101200. Indian Oxygen Limited. Conveyor for carrying spaced articles. (27th August 1964). Accepted on 10th May 1967.

Article spacing members movable with the belt and arranged in pairs along the belt, a chain one member of each pair of spacing members is mounted and a further chain or like on which the other member is mounted.

101290. M. A. J. Legrain and A. F. Legourd. Improvements relating to apparatus intended particularly for feeding animals. Accepted on 5th May, 1967.

Comprising a mixer having an agitator motor and means for ensuring the supply of powder to the said mixer wherein said means for ensuring supply of powder being actuated independently by a motor and said means including a hopper, a scraper for the hopper and an Archimedian screw and a distributor having blades run by said motor.

101297. Edwin Danks & Co. (Oldbury) Ltd. Improvements in or relating to steam boilers. Accepted on 6th May 1967.

Comprising automatic control means whereby the firing rate is varied according to load demand and a low level and high level control device controlling the supply of feed water depending on the pressure in the boiler.

101384. Dunlop Rubber Company Limited. Improvements in or relating to methods of manufacturing pneumatic tyres. (15th September 1964). Accepted on 9th May, 1967.

Comprises building a tyre carcass having a crown portion of less diameter than that in finished tyre, locating therein a rubber thread portion comprising longitudinally compressed filaments and forming the carcass into its finished shape.

101469. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to high pressure mercury vapour halogen discharge lamps. Accepted on 6th May, 1967.

A mercury vapour halogen discharge lamp in which the discharge space comprises at least one electrode which is connected to a current supply wire and is heated by the discharge itself.

101612. Cigarette Components Limited. A method and apparatus for the formation of tobacco smoke filters. (18th September 1964). Accepted on 13th March 1967.

Characterised by the intermidated step of preheating the silver by direct contact with steam.

101681. J. S. Solanki. Clips for writing appliances such as fountainpen and like. Accepted on 3rd May, 1967.

Comprising a longitudinally extending metallic spring sheet of u-shape and housing a leaf spring therein, the top end of the spring projecting beyond the u-clip and adapted to enter into a recess in the upper section of the cap-body.

101723. Compagnie Francaise Thomson Houston-Hotchkiss Brandt, formerly known as Compagnie Francaise Thomson-Houston. Improvements in voltage frequency converters. Accepted on 25th March, 1967.

Comprising an input transistor, capacitor unijunction transistor, a first circuit and a second circuit, unijunction transistor simily to the previous one.

101845. Smt. Sulabha Shankar Panday. An electric pressure cooker. Accepted on 6th April, 1967.

Comprising a main cooker body, a food holding vessel, a bottom cover, a top cover for said main body.

101853. Westinghouse Brake and Signal Company Limited. Load-dependent braking apparatus. (27th October 1964). Accepted on 10th May, 1967.

Having a lever operatively connecting a brake cylinder and a brake block, a first fulcrum and a second fulcrum, the position of the later varying according to the load and said lever pivoting about the fulcurms.

101909. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Briuning. Process for rendering organic compounds of high molecular weight resistant to electrostatic charge, and antistatic compositions containing such compounds. Accepted on 5th May, 1967.

Incorporating alkyl imidazoline like butyl imidazoline.

102305. Dunlop Rubber Company Limited. Improvements in or relating to fluidisable bed apparatus. (6th November 1964). Accepted on 1st May, 1967.

Comprising a container for containing fluidisable particles, a lower portion of the container enclosing the particles having a smaller cross-sectional area than an upper portion.

102335. Sankyo Company Limited and Dainippon Ink & Chemicals Incorporated. Agricultural fungicidal compositions. (2nd November 1964). Accepted on 1st May, 1967.

Containing pentachlorobenzyl alcohol or aliphatic monocarboxylic acid esters thereof and a diluent or carrier.

102377. E. Bobkowicz. Manufacture of composite bulk yarn. (8th December 1964). Accepted on 3rd May, 1967.

Comprises filaments, of which some consist of properly oriented thermoplastic filaments and of fibres heat bonded to and interlocked with said filaments at contact points.

102378. E. Bobkowicz. A composite nonwoven fabric method and apparatus for making the same .(8th December 1964). Accepted on 3rd May 1967.

Consists of oriented thermoplastic warp filaments interlocked and superinposed with staple fibres.

102383. N. V. Onderzoekingsinstituut Research. Improvements in and relating to a method for oxidative polymerization of phenols. Accepted on 3rd May, 1967.

Comprises introducing into a vertical column a phenol solution an oxidation catalyst and stream of oxygen containing gas.

102388. Stamicarbon N. V. Preparation of ε-caprolactam. Accepted on 4th May, 1967.

Comprising reacting ε-caprolactone with ammonia at 200° to 475°C and under superatomes phuric pressure.

102394. Westland Aircraft Limited. Improvements in or relating to ground effect vehicles. (18th November 1964). Accepted on 4th May, 1967.

Having air cushion forming means, inflatable chambers depending from the base and transverse inflatable and retractable bow and stren chambers permitting the vehicle to operate as a displacement craft.

102396. G. Marchioli. Process and apparatus for hardening corrugated asbestos lumber and similar compositions. Accepted on 5th May, 1967.

In their "green" state, the lumbers are stacked one upon another between two vertical walls parallel to the corrugations of the lumbers and said walls having a width equal to the width of said lumbers.

102397. The Bendix Corporation. Improvements in or relating to pressure sensitive flight condition sensors. Accepted on 5th May, 1967.

Comprising a support, first means for producing a signal, a main shaft having the ends thereof disposed for rotation in said support, pressure responsive means mounted on said support, second means, for correcting the errors in sensed flight condition.

102398. Aktiebolaget Bofors. Improvements in or relating to a spring suspension device. Accepted on 5th May, 1967.

Comprising in combination a damping unit containing damping fluid shocks transmitting means, discharge conduit and safety valve means to open said conduit by fluid pressure above a predetermined value in said damping unit.

102399. Aktiebolaget Bofors. Improvements in or relating to a sterring device for track laying vehicle. Accepted on 5th May, 1967.

Comprising steering control having a pressure fluid inlet and outlet side and safety valve means connecting the two when the pressure is below a predetermined value.

102405. J. R. Geigy A. G. Production of heterocyclic aromatic pigments and dyeing or pigmenting of organic materials therewith. Accepted on 6th May, 1967.

Comprising reacting a benzo-[-g]-naphth-[2-3-b]-indolizine-8, 13-dione-14-carboxylic acid halide with a substituted or unsubstituted 2,-3, or 4-amino benzanilide or substituted or unsubstituted 2,-3-or 4-amino-N-(1 or 2 naphtyl) benzamide

102406. J. R. Geigy A.G. Production of heterocyclic aromatic pigments and pigmenting and dyeing of organic materials therewith. Accepted on 6th May, 1967.

Comprising reacting a benzo-[g-napth-[2,3-b] indolizine-8, 13-dione- 14-carboxylic acid, halide with a substituted or unsubstituted mono-N-benzoyl arylene diamine or mono-N-(1 or 2 naphthoyl) arylene diamine.

102426. Borg-Warner Corporation. Refrigerant distribution for absorption refrigeration systems. Accepted on 8th May, 1967.

Wherein distributor comprises a generally box like housing having imperforate top, side and end walls and a perforated bottom wall.

102427. Amsted Industries Incorporated. A lathe including a safety interlock arrangement. Accepted on 8th May, 1967.

The apron mechanism comprising first and second clutch means controlled by operating and cam shafts respectively, pin mean for selecting the shafts and reciprocating plunger in between selector gear and the cam.

102438. Perstorp Ab (Formerly known as Skanska Attikfabriken Ab). Processes for producing a catalyst for oxdiation of methanol to formaldehyde. Accepted on 4th May, 1967.

Iron-molybdate is fine ground and admixed with such an amount of water while stirring that the humidity of the mass becomes 37-39 per cent by weight.

102509. W. E. Stevens. Pipe joint. Accepted on 9th May 1967.

Comprising a pair of end abutting pipe sections with collers on the ends a slidable coupling sleeve on the collers, means for foreign the collers together and means for connecting the collers to the pipe section.

102522. N. V. Onderzoekingsinstituut Research. Improvements in or relating to the crimping of threads or yarns. Accepted on 6th May, 1967.

Comprises locally flattening the yarn between two elements having hard surface, one of said elements benig heated to a temperature greater than yarn softening temperature.

102528. Siemens & Haiske Aktiengesellschaft. Improvements in or relating to electromechanical bandpass filters (21st September, 1965). Accepted on 4th May, 1967.

The filter contains at least one element producing an attenuation pole in the filter stop band.

102545. Occidental Research & Engineering Limited. Process for reacting high strength wet process phosphoric acid with anhydrous ammonia, and reaction products thereof. (November 16, 1964). Accepted on 10th May, 1967.

Comprising continuously feeding phosphoric acid and anhydrous ammonia in closed reaction zone, stirring acid layer to expose acid surface to ammonia, removing the product.

102566. S. P. Joshi. Improvements in or relating to display-stands, book-shelves, racks, stands or like pieces of furniture. Accepted on 3rd May, 1967.

Consisting of a single shelf or a number of shelves arranged one above the other at predetermined spaced relationship between two or more frame members adapted to protrude forwards and/or backwards, wherein shorter sides of the non-protruding part of each end of said shelf is pivotally fixed to a frame members.

102597. Tractel S. A. A mechanical jack. Accepted on 9th May, 1967.

Comprising a hollen screw with opposite threads on the outer and inner surfaces, the later carrying a spindle characterised in that the spindle carires a removable bearing head.

102598. J. R. Young. Variable ratio friction transmission and control system therefor. Accepted on 6th May, 1967.

Including driving and driven discs rotatable about central axes and are frictionally engageable over an area and means for varying the distances between the centers of said discs and said area of contact.

102681. Rohm & Haas Company. Copolymers for tanning leather. Accepted on 8th May, 1967.

Comprises as tanning composition dn aqueous solution of a copolymer prepared by copolymerising a mixture of (A) about 80-90% by weight of acrylic acid, methacrylic acid and a mixture thereof and (B) about 20-10% by weight of an unsaturated sulfated oil.

102663. V. J. Espos to Jr. Integral snap-action clips. Accepted on 6th May, 1967.

Comprising a rigid section carrying opposite resilient arm sections each ending in a web portions, a pair of jaw sections, one extending from each web and connecting two by a third web, the jaw being retained in open and closed position by resilient arms.

102703. Srirangachary and C. S. Ramaratnam. Device for electro-magnetic regulation of brakes. Accepted on 6th May 1967.

Characterised in that a force on a movable pole of a D.C. operated solenoid magnet varies due to change in the current of an Electro-magnet, the pull being applied to a lever to operate a brake.

102715. M. W. Lalchandani. Improvements in or relating to device for automatic adjustment of lines that are marked in marking machine. Accepted on 6th May, 1967.

Having one stop guide screwed to slide and running against a can fitted to body of tool post, the cam having an integral ratchet, the cam being rotated by a ratchet-pawl and slide is stopped in marking stroke by a stop guide touching against set screws the cam, and means for lifting of toolpost.

102797. Societe De Constructions Electromecaniques Jeumontschneider. Improvements in slip detecting devices. Accepted on 6th May, 1967.

Comprises pick-ups supplying pulses whose frequency is proportional to the speeds of the reference motor and of the other motor respectively a cyclic counter, an adder subtractor circuit a cyclic control device, and electronic means for directing to the motor any slip indicating signal emitted by the adder subtractor circuit.

102843. Stamicarbon N V Device for the production of artificial filaments by the melt spinning method. Accepted on 6th May, 1967.

Comprising a quenching chamber and a plenum chamber separated from each other by one or more apertured screens.

102846. E. J. Treanor. Closures for containers. (9th December, 1964). Accepted on 4th May, 1967.

Retaining means for the closure is on the container and adapted to secure the latter, two sets of locking formations, one set on the closure and the other on said means, spring means operative when the spigot is in register with any socket to urge the spigot into that socket.

102848. Imperial Chemical Industries Limited. Improvements in or relating to coated films. (10th December, 1964). Accepted on 11th May, 1967.

Comprises coating the surface of a thermoplastic film with an aqueous dispersion of a heat sealable polymer and then drying the film.

102882. Mrs. Beryl Alic Enid DePenning. Fastening members for securing railway rails and to railway rail and fastening arrangements employing the fastening members. Accepted on 1st May, 1967.

Railway rail fastening member having a length of resilient metal rod with a characteristic bent.

102898. Aktiebolaget Karlstads Mekaniska Werkstad. Rotary suction filter drum. Accepted on 11th May, 1967

A rotary filter drum having a discharge duct extending from each opening of the inner casing, the ducts being devided into several groups axially disposed side by side in the drum.

102940. Imperial Chemical Industries Limited. Polymeric compositions. (23rd December, 1964). Accepted on 6th May, 1967.

Comprises powdered thermoplastic polymerics material and crystalline mica having a diameter of at least 0.002 inch.

103054. Capt. I. C. Boodrie. A container with means for discharging liquids, such as flushingcisterns. Accepted on 6th May, 1967.

Comprising an enclosed reservoir with a discharge opening at the bottom, a heavy valve body on top of the discharge opening .an inlet for liquid leading into such reservoir from or from near the top of the reservoir, means for automatically stopping entry of liquid into the reservoir.

103090. Shaparia Dock & Steel Co. Private Limited. Improvements in or relating to heaters for keeping warm the air in room, chamber, tent or the like. Accepted on 6th May, 1967.

Comprising a shell or body, a burner unit, a fuel tank, pipe connection/s between fuel tank and burner unit, an air inlet chimney fitted on a spigot at the lower end of shell, and an exhaust chimney fitted on a spigot at a level above the top level of the burner unit.

103180. International Harvester Company. Improvements relating to topping mechanisms for cane harvesters. (29th December, 1964). Accepted on 6th May, 1967.

Comprising a rotary cutter and a pair of gathering devices and a drive transmission permitting reversed of the rotation of the cutter independent of the direction of movement of the gathering devices.

103183. Goetzewerke Friedrich Goetze Aktiengesellschaft. Apparatus for the automatic, particularly electronic measurement of the thickness of layers. Accepted on 3rd May, 1967.

Characterized in that the slide carrying the testing probe and the centering strips is suspended from leaf springs from which the centering pressure is derived.

103213. Universal Moulded Fiber Glass Corp. Production of fiber reinforced resin articles. Accepted on 11th May, 1967.

Method of forming fiber reinforced article comprising the step of winding fiber reinforcement in the form of a cylinder advancing the reinforcement in the cylindrical form during which changing the cross sectional shape to the shape of article is made.

103230. Farbenfabriken Bayer Aktiengesellschaft. Preparation of polyamides. (29th October, 1965). Accepted on 3rd May, 1967.

Comprises adding a cross-linking agent to the melt of a linear polyamide leaving the melt to solidify and heating the resulting solid polyamide at a temperature below the melting point of the plyamide in an inert gas atmosphere containing water vapour.

103238. Santosh Kumar De. Improvements in or relating to liquid matering and distribution. Accepted on 11th May, 1967.

Metering and distribution of liquid from a source to a number of delivery stations comprising hydraulic motors each for one station and mechanically interlocked being driven by liquid metered and resistance to motion of motors exceeds the torque due to difference in liquid pressure to operate as a pump.

103247. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to coil winding machines. Accepted on 6th May 1967.

Characterised in that a cam body is rotatably journalled on a main shaft and controlling the wire guide and is also urged against a stop in the shaft by force of spring.

103257. Huyck Corporation. Apparatus for use in the press section of a papermaking machine and method of producing a supplemental belt for use in such apparatus. Accepted on 10th May 1967.

Comprising a supplemental belt movable in an endless path to transport a wet paper web through the nip, the belt being formed from substantially incompressible polymeric sheet material having the ends thereof joined and having plurality of perforations.

103258. Huyck Corporation. Supplemental belt for use in papermaking machines and method of making such belt. Accepted on 10th May 1967.

At least a portion of the belt being interposed between the forming screen and moisture removing means, the belt being formed from substantially incompressible polymeric sheet material having ends joined and having plurality of perforations.

103261. General Electric Company. Improvement in or relating to electrical apparatus and dielectric material therefor. Accepted on 6th May 1967.

Comprises a halogenated dielectric having dissolved therein an epoxy compound such as a dicyclo diepoxy carboxylate.

103348. C. A. V. Limited. Liquid fuel supply systems. (11th January 1965). Accepted on 6th May, 1967.

Device comprising in combination a valve member slidable in a cylinder, one end of said cylinder being in communication with the fuel pump and the other end of said cylinder being in communication with the nozzle through a restriction, resilient means urging the valve member towards said one end of the cylinder and a by pass passage arranged to be opened by the valve member.

103381. Dynamit Nobel Aktiengesellschaft. Moulding compositions containing vinyl chloride polymers and/or copolymers. Accepted on 10th May 1967.

Comprises admixing a cross linked ethylene/vinyl acetate copolymer with the vinyl chloride polymer or compolymer.

103432. Standard Telephones and Cables Limited. Voice-frequency key dialling method with repeated connection of a register at an established connection, without direct current key signals. Accepted on 4th May 1967.

Comprising voice frequency digit signals transmitting means, in which one or more registers are provided, one or more speech immune voice frequency receivers are provided with exchange with means for connecting one of the said receivers to an established connection.

103455. Scovill Manufacturing Company. Improvements in or relating to a power operated knife blade release and switch inactivating means. Accepted on 6th May, 1967.

Comprising a pivotal lever having a first arm engaged with a blade release button and a second arm with one of a pair of electric contacts, the depression of the button, causing movement of the arm engaged contact into open switch position.

103456. Scovill Manufacturing Company. Improvements in or relating to a motor driven food mixer. Accepted on 6th May, 1967.

Comprising separate lower and upper housings of non-metallic-material threaded bosses depending from the housings at each end, a tubular member between the bosses and two enlongated screws connecting the two housings together through apertures, with lower housing the bosses and the tubular members.

103496. L'Emballage Moderne. A method of and apparatus for forming a tubular component of a container, and container thus obtained and a method of forming a tubular container comprising two such components. (22nd November 1965). Accepted on 10th May, 1967.

Method comprising the steps of spirally winding sheet material over or mandrel, applying thermoplastic material between the layers, allowing solidification and sealing the whole length.

103548. W. Glamann. Improvements in transmission assemblies. Accepted on 3rd May 1967.

There is a single transmission path from the differential gear through the torque converter to the shift gearbox.

103603. Kurashiki Rayaon Co. Ltd., Method of manufacturing sheet materials. Accepted on 3rd May, 1967.

Comprising applying a layer of a solution containing at least 50% by weight of a polyurethane elastomer and a coagulating agent either inside or on the surface of a substratum; treating the said layer in a bath comprising a coagulating liquid for said polymer, removing first the solvent and then the coagulating liquid from the layer.

103659. Paillard S. A. Assisted control device for an operation in a typewriter. Accepted on 6th May, 1967.

Characterised in that it includes a locking mechanism controlled by a key to maintain a control lever in a working position so long as the key remains lowered.

103686. Sandoz Ltd. Anthraquinone dyes, their production and use. Accepted on 3rd May, 1967.

Reacting 1, 4-dihydroxyanthraquinone in leuco form with 4-tertanyl-2-benzylcyclohexylamine and oxidizing and sulphonating the condensation product.

103688. Chevron Research Company. O-methyl-s-methyl phosphoroamidothioates, process for their preparation and insecticidal compositions containing the same. Accepted on 6th May, 1967.

Reacting O-O-dimethyl chlorophosphorothioates with ammonia or alkylamine and heating reaction product with methylating agent.

103734. Institut Francais du Petrole, Des Carburants Et Lubrifiants. Apparatus for submarine core drilling. Accepted on 6th May, 1967.

Comprising a basic structure which is lowered into water by cables and the structure comprising a core drill driven by an under-water electric water and flexible conduit delivering pressurised water to drill.

103765. Nippon Rayon Co, Ltd. A process for the improvement in physical properties of polyamide yarns. Accepted on 6th May, 1967.

Which comprises the step of heating the yarn for about from 60 to 300 minutes at a temperature of about 150°C to not higher than 10°C below the melting point thereof under tension of from 0.05 to 2 grams per denier.

103768. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to methods of manufacturing indirectly heated cathodes. Accepted on 6th May, 1967.

Surface of filament wire and/or inner surface of cathode support are covered with a layer of ceramic suspension containing gas developing constituents, the filament wire being subsequently inserted into cathode support and ceramic substance filling out space inside cathode support, after which foam is sintered and degassed.

103775. Amsted Industries Incorporated. Rotary railway car coupler structure. Accepted on 10th May, 1967.

Comprising a yoke axially movable within a centre sill and a striker secured together a draft gear on the yoke with a follower of spherical front surface, a coupler shank having complementary surface and a key on the yoke.

103787. Commonwealth Scientific and Industrial Research Organization. Twisting apparatus. Accepted on 4th May, 1967.

Comprising a pair of forwardly moving surfaces arranged to form a nit between them characterised in that said surfaces are transversely reciprocated in opposite face.

103807. Nippon Rayon Co., Ltd. A process for improving the ahesion of fibrous material to rubber. Accepted on 11th May, 1967.

Comprising (a) immersing the fibrous material in a mixed liquid obtained by adding alkyl methlolamide disperzed by known nonionic or anionic activeagent to natural or synthetic rubber latex dispersed liquid containing resorcinolaldehyde resin or (b) immersing the fibrous material in a liquid obtained by dispersing alkylmethylolamide with water by known nonionic or anionic activeagent.

103808. Nippon Rayon Co., Ltd. A method for producing polycapramide filament. Accepted on 8th May, 1967.

Characterized in that an atmosphere of a region from a spinneret to the outlet of the spinning head is maintained at a coust temperature more than the melting point of polycapramide.

103864. Mantons (Bangalore) Private Limited. Improvements in or relating to current collectors for cranes and the like. Accepted on 6th May, 1967.

Comprising a pantograph provided with a brush consisting of trangular or polygonal section rotating about a pin passing through it.

104091. Bishu Das Gupta. Simple poolproof burglar alarm cum calling bell device. Accepted on 3rd May, 1967.

Comprising a perforated non-conducting box containing a non-conducting pivoted lever bent at right angle to have an end protruding out and having a contact termina, a lever elevating mechanism using a key, and an electric bell or buzzer, and another contact terminal fixed in the box or chasis.

104153. Westinghouse Electric Corporation. Method for evaporating a solvent from a solution and multistage flash evaporation apparatuss for the purpose. Accepted on 6th May, 1967.

The method comprises successively lowering the pressure of the solution heated to a predetermined temperature in the apparatus, withdrawing the evaporated solvent, blowing down a part of the enriched solution from the appartus where the lowermost pressure is maintained, adding make up solution at the lowest pressure area and withdrawing the remaining part of the said enriched solution and make up solution from the lowest pressure-area for circulation through the apparatus.

104187. Hindustan Lever Limited. Improvements in dentifrices. (8th March, 1965). Accepted on 6th May, 1967.

A process for the manufacture of dentifrices comprises dispersing a saturated hydrocarbon having 8 carbon atoms in an aqueous solution of a dentifrice detergent and subsequently mixing menthol or a menthol containing flavouring agent.

104269. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to methods of correcting stem mounts for electric incandescent lamps or discharge lamps. Accepted on 6th May, 1967.

Characterised in that the stem mount is heated for local deformation at the area of the pinch shaped portion and with reacting straightening members holding the tube is centered over at least an underformed part of the tube.

104280. S. Messerschmidt. Improvements in and relating to roller bearings. (9th February 1966). Accepted on 10th May, 1967.

Comprising convex rollers between the race rings thereof, the curved axial line having a radius at least twice the bearing radius and the rollers bearing on the rings with substantially equal areas.

104303 Brown, Boveri & Company Limited. Device for pouring molten metals in predetermined amounts. Accepted on 4th May 1967.

Characterised by a closed crucible connected to a transportation device by a pivot and having a spout-like filling and discharge opening and also a further opening for connecting to a protective gas supply pipe.

104341. Radio Corporation of America. Push-pull transistor emplifying system. Accepted on 5th May, 1967.

Comprises a push pull output stage employing a pair of transistor, coupling means a degenerative feed back path and a capacitor coupled between control electrodes.

104362. Aktieselskabet Niro Atomizer. An atomizer wheel for the atomization of suspensions of hard-wearing materials. Accepted on 11th May, 1967.

Characterized in that the lining consist of bushes having conical outer surface and that the discharge openings have a corresponding shape, the lining being of such length as to extend a distance into the bowl-shaped space.

104377. S. R. Nanavati. An advertising apparatus. Accepted on 6th May, 1967.

Comprising a box having a screen in which the advertisement portions are transparent and wherein rotates behind the screen a circular disc containing colouredpatterns.

104407. E. H. Yonkers. Vehicle chassis. Accepted on 6th May, 1967.

Front and rear frame structures, control means operatively associated with at least one of said structures, drive means operatively associated with at least one of said structures, front and rear wheel suspension means and longitudinal frame means including a tubular end portion.

104462. The J. B. Knight Co., Inc. A method of and device for removing dense granular particles from a stream of fluid flowing in a conduit. Accepted on 10th May, 1967.

The method comprising the steps of removing the particle laddened liquid from the conduit conducting through passageways of diameter many times larger than that of the conduit and discharging it.

104491. H. Vissers. A spading machine. Accepted on 6th May, 1967.

A spading machine having a plurality of spading units and a transmission means for connecting the spading units to a driven shaft and at least two of the spading units being liftably mounted on the sides of the tractor.

104504. Radio Corporation of America. Transistor deflection circuits. Accepted on 5th May, 1967.

Characterised by a transistor amplifier, a vertical deflection winding coupled to output terminal impedance means and means including a semi conductor device.

104543. Ciba Limited. New polymerisable carboxylic acid arylmethylamides, new polymerisation products, and process for the manufacture of these compounds. Accepted on 6th May, 1967.

Reacting N-methylolamide of ethylenically unsaturated polymerisable acid with optionally etherified hydroxyaryl compound.

104553. Knapsack Aktiengesellschaft. Process for the manufacture of vinyl acetate. Accepted on 6th May, 1967.

Contacting ethylene, acetic acid and molecular oxygen air with palladium carrier catalyst having 0.1-10% by not of palladium, obtained by reducing palladium salt gas phase in presence of carrier pretiented with air and/or nitrogen.

104582. International Business Machines Corporation. A storage cell and memory device incorporating the same. Accepted on 6th May, 1967.

Comprising a gating transistor which has one emitter, a collector and a base electrode, the base electrode being connected to a bistable device switchable between two stable states.

104609. Jaggy & Company. Improved flash-light. Accepted on 6th May, 1967.

Comprising a permanent magnet with pole pieces for attaching flash-light to a surface of ferro-magnetic material, to cost a steady light in the required direction.

104629. Allmanna Svenska Elektriska Aktiebolaget. Air blast circuit breaker. Accepted on 6th May, 1967.

Characterised in that only one of the resistor, damp or grading in a container, is supported by a insulator, while all the operating devices for the moving contacts of a power and the resistor breaks are electrically connected through the container wall.

104643. Metalastik Limited. Improvements in or relating to resilient devices. Accepted on 4th May, 1967.

Comprising radially directed formation on one of the rigid members extends in and at least partially across said gap, one or more differentially directed faces on the formation lie in spaced confronting relationship with a face or faces on the other rigid members to co-operate therewith to limit relative radial moment of the rigid members.

104656. D. L. Shah. Improvements in or relating to flush type fuseholder device. Accepted on 8th May, 1967.

Comprising a socket fitted with a pair of J. shaped contact strips and a detachable fuse holder member fitted with a pair of double J. shaped strips adapted to grip therebetween the first mentioned strips and a fuse wireconnected to the strips of plug member.

104727. The United States Time Corporation. Improvements in or relating to horological instrument. Accepted on 4th May, 1967.

Comprising a first vibrator member, a second vibrating member, means to oscillate the members simultaneously in opposite directions, and an auxiliary spring which is connected to both vibratory members.

104798. Hitachi Ltd. Controlling system for rectifier with control electrode. Accepted on 3rd May, 1967.

Comprising an alternating current supply source, a rectifying apparatus for effecting full-wave or half-wave rectification of supply source, a series circuit including a rectifier with control electrode and an inductive load.

104881. Asf Gleitverschluss GmbH. Flexible wrapper of plastics material. Accepted on 8th May, 1967.

Consisting of a tube section having two profiled fastener strips one consists of a unilateral hook shaped flange and the other comprises two flanges and disposed on opposite sides of the hook, and the strips can be hook into each other under pressure.

104886. Fisons Fertilizers Limited. Granulation of potassium salts. Accepted on 8th May, 1967.

By forming a mixture of potassium salts and ammonium nitrate or urea or both and agitating the mixture in a rotating drum at 30-170°C.

104915. Deere & Company. A grate arrangement for use in combination with an elevator. Accepted on 6th May, 1967.

Composed of a continuous row of grate and supported on the upper end of the elevator and means of the elevator for adjusting the angular inclination of at least part of the grates.

105270. Inventa A. G. Fur Forschung Und Patentverwertung. Process for the production of melamine. Accepted on 6th May, 1967.

By passing urea together with ammonia as carrier gas through liquid bismuth or a liquid bismuth alloy and then passing the produced product through an inorganic synthetic molecular sieve.

105346. Metallgesellschaft A. G. Process for the direct reduction of iron ore in a rotary kiln. Accepted on 10th May, 1967.

Characterized in that porous carrier substances impregnated with the liquid fuel oil are introduced into the rotary kiln at points where the kiln is at a temperature of at least 600°C.

105398. Imperial Chemical Industries Limited. Cellular polyolefine compositions. (2nd June 1965). Accepted on 6th May, 1967.

The polyolefine powder is mixed with a salt of a metal of group II of the periodic table with a higher fatty acid an ester of a higher fatty alcohol with a thiodialkanoic acid and the blowing agent all in powder form and than moulded.

105431. Itek Corporation. Data storage systems. Accepted on 6th May, 1967.

Comprising titanium dioxide which had an initial average particle diameter no greater than about 1 micron and an initial nitrogen surface area no greater than about 60 square meters per gram.

105543. Bethlehem Steel Corporation. Plastic coated cable. Accepted on 6th May, 1967.

Comprising an inner layer of glass chopped-strand mat surrounding the cable, an outer layer of woven reinforcement and acrylic resin in-between the layers, bonding them.

105884. Alfa-Laval Ab. Apparatus for evaporation of liquids. Accepted on 10th May, 1967.

Having a series of two kinds of conical plates with spacers at the largest pheriphery characterised in that when plate of one kind is threaded on to the other the spacer determines the mutual distance.

105937. Gosudarstvenny Vsesojuzny Institut Po Proektirovanuju Predpriyaty Koxokhimicheskoi Promyshlennosti. An underjet coke oven with an underjet system of lean gas and air volume control. Accepted on 4th May, 1967.

Characterized in that at the base of flame flues are likewise housed detachable vertical partitions that form in conjunction with stream breakers pits.

106002. Westinghouse Electric Corporation. Shallow optical system. Accepted on 6th May, 1967.

Comprising a light source positioned in housing opposite said or each opening a light transmitting lens mounted in each opening each light transmitting lens respectively having a light source and a flat light exit face inclined with respect to the direction of inclined parallel rays.

106016. S. R. Nanavati. An advertising apparatus. Accepted on 4th May, 1967.

Advertising apparatus of the shape of a rectangular parallelopiped box, the front panel of the apparatus being made of a sheet of translucent glass or plastic to serve as a screen for the projection of the advertisement.

106224. Glaverbel. Light screen. Accepted on 6th May, 1967.

Comprising one or more light transmitting sheets which bears or which inter se bear light-transmitting coatings having visible light reflectance curves which differ inter se in such a way that the screen transmits sunlight without colour modification.

106251. Universal Oil Products Company. Treatment of alkyl-substituted aromatic compounds. Accepted on 3rd May, 1967.

Reacting charge stock with hydrogen in a first reaction zone below 260°C, passing resultant substantially diolefin free effluent into a second reaction zone and further reacting said effluent with hydrozen in contact with a catalyst removing resulting ammonia and hydrozen sulfide from second reaction zone effluent and further reacting remainder of second reaction zone effluent with hydrogen in a third reaction zone in contact with a dehydrogenation catalyst.

106255. Badische Anilin-& Soda-Fabrik Aktiengesellschaft. Self-extinguishing thermoplastic compositions. Accepted on 10th May, 1967.

Comprises (a) a normally solid thermoplastic styrene polymer (b) an organic bromide having a plurality of bromine atoms attached to carbon (c) and a synergistic benzyl polymer.

106700. United States Steel Corporation. Apparatus for severing metal slabs. Accepted on 4th May, 1967.

Comprising a longitudinal carriage mounted on a stationary base for movement with said slab, clamp means for clamping said longitudinal carriage to the slab, rollers mounted on said longitudinal carriage, a lateral carriage mounted on said longitudinal carriage and a rotary saw blade mounted on said lateral carriage for severing the slab.

107479. Eastman Kodak Company. Polypropylene blends. (3rd August 1966). Accepted on 10th May, 1967.

Comprising polypropylene, polyethylene and ethylene propylene co-polymer.

107941. Rayonier Incorporated. Neutralizing hydroxyalkyl cellulose. Accepted on 10th May, 1967.

Treating moist hydroxyalkyl cellulose crumb containing residual sodium hydroxide catalyst with So_2 gas until sodium hydroxide is converted to sodium sulfite or bisulfite out of the crumb with water.

108649. R. B. Miller. A process for making boards, veneer, and the like from sugarcane and the products obtained thereby. [Divisional date 13th July 1965]. Accepted on 13th April, 1967.

Comprising cutting open the stalk without damaging the rind removing the pith and subjecting the rind strips to heat and pressure.

Extension of the term of Patent

The petition for extension of the term of Patent No. 42510 filed by Johannes Hinsch of Germany and notified in Part—III, Section 2 of the Gazette of India, dated the 14th August, 1965 has been rejected by the Central Government.

Cessation of Patents

80144. 84945. 85760.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 60933—Ramapati Ghosh.

The patent ceased on the 28th April 1964, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 24th October 1965. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 8th July 1967.

(2)

Notice is hereby given that applications have been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patents :—

No. 65651 and its additions numbered 66550 and 78365-Georg Neidl.

The patents ceased on the 30th October 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patents were notified in Part III, Section 2 of the Gazette of India, dated the 22nd April 1967. Any person may give notices of opposition to the restorations by leaving applications on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 8th July 1967.

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 75348—Shefali Ghosh.

The patent ceased on the 14th February 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 9th October 1965. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 8th July 1967.

(4)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 75350—Shefali Ghosh.

The patent ceased on the 14th February 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 9th October 1965. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 8th July 1967.

(5)

Notice is hereby given that the applications have been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patents :—

No. 75747 and its addition numbered 85044—Prem Prakash.

The patent ceased on the 14th March 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 17th September 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 8th July 1967.

(6)

An order has been made on the 1st May 1967 restoring the patent No. 60612, dated as of the 24th May 1957 granted to Srinivasa Ramanujam & another for "emulsions of cashew nut shell liquid resins and polymerised cashew nut shell liquid".

(7)

An order has been made on the 1st May 1967 restoring the patent No. 60613, dated as of the 24th May 1957 granted to Srinivasa Ramanujam and another for "casew nut shell liquid dispersion resins".

(8)

An order has been made on the 13th March 1967 restoring the patent No. 68574, dated as of the 30th July 1959 granted to Javanand Khira & Co. Private Limited for "an improved device for detachably joining together parts of wooden furniture and the like articles and methods for the same".

(9)

An order has been made on the 13th February 1967 restoring the patent No. 73494, dated as of the 24th September 1960 granted to Krishna Kamal Banerjee for "clamping device for use in reinforced concrete construction".

(10)

An order has been made on the 3rd February 1967 restoring the patent No. 80224, dated as of the 12th January 1962, granted to Siemens & Holske Aktiengesellschaft for "improvements in or relating ot communication cables".

(11)

An order has been made on the 3rd February 1967, restoring the patent No. 82622, dated as of the 5th June 1961 granted to American Radiator & Standard Sanitary Corporation for "cooling means for refrigerant compression motors".

(12)

An order has been made on the 29th April 1967, restoring the patent No. 85599, dated as of the 19th July 1962, granted to Jyoti Limited for "self printing centrifugal pump".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 130316. Surinder Singh, 6192-Pakki Gali, Bara Hindu Rao, Delhi-6 (India), Indian. "A stand for mirrors, framed articles or the like", February 8, 1967.

Class 1. No. 130344. Natvarlal Revashankar Trivedi, Indian Lake Road, Opp. Krishna Cinema, Agra Road, Bhandup, Bombay-78, Maharashtra, "Pelmets", February 10, 1967.

Class 1. Nos. 130364 and 130365. Elegant Industries Private Limited (A Company registered under the Indian Companies Act) Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Necklace". February 13, 1967.

Class 1. No. 130366. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Bracelet", February 13, 1967.

Class 1. Nos. 130368 and 130369. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Ear-top", February 13, 1967.

Class 1. Nos. 130431 to 130435. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Brooch", February 20, 1967.

Class 1. Nos. 130436 to 130439. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Pendant", February 20, 1967.

Class 1. Nos. 130440 to 130442. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Finger-ring", February 20, 1967.

Class 1. Nos. 130443 and 130444. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Ear-top", February 20, 1967.

Class 1. No. 130445. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Bangle", February 20, 1967.

Class 1. No. 130446. Elegant Industries Private Limited (A Company registered under the Indian Companies Act), Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Necklace", February 20, 1967.

Class 3. No. 130355. Bright Brothers Private Limited, A Company Incorporated in India, 156 A, Tardeo Road, City of Bombay, State of Maharashtra, India. "Shopping bags", February 13, 1967.

Class 13. Nos. 130079 and 130080. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", January 4, 1967.

Class 13. No. 130259. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", February 3, 1967.

Class 13. Nos. 130341 to 130343. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", February 10, 1967.

Class 13. Nos. 130345 to 130349. The Bombay Dyeing & Mfg. Co. Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", *February* 10, 1967.

Class 13. No. 130375. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", February 17, 1967.

Class 13. Nos. 130378 to 130380, 130383, 130385 to 130387 and 130389. Jiyajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", February 18, 1967.

Class 13. Nos. 130451 to 130453, 130455, 130456, 130465, and 130469 to 130474. Messrs. Leela Scottish Lace Private Limited, Leela Baugh, Andheri-Kurla Road, Bombay-59, "Preparation of lace used for furnishings wearing apparels, covers etc.", February 20, 1967.

Class 13. Nos. 130478 and 130479. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", February 20, 1967.

Class 13. No. 130488. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", February 23, 1967.

Class 13. Nos. 130498 to 130500. Crown Spg. & Mfg. Co. Ltd., Gokhale Road (south), Parel, Bombay-13, Maharashtra, Nationality—Indian Company, "Textile goods", February 27, 1967.

Class 13. Nos. 130503 to 130521. The Khatau Makanji Spg. & Wvg. Co. Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", February 27, 1967.

Class 13. No. 130539. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", March 13, 1967.

Class 13. No. 130557. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", March 18, 1967.

Class 13. No. 130559. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", March 20, 1967.

Class 14. Nos. 130382 and 130384. Jiyajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", February 18, 1967.

Class 14. No. 130524. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piece-goods", March 3, 1967.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 3rd June 1967

The Annual Report of the Patent Office for the year 1965 is now on sale with the Manager of Publications, Civil Lines, Delhi and also at the Government of India Book Depot, 8, Hastings Street, Calcutta (for local sale at the counter) at Rs. 1.10 or 2sh. 7d. or 40 cents per copy.

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act

15th May 1967

110643. Suresh Chandra Gupta and N. A. Ramaiah. Instol-additive agents for improving the performance of low grade massecuites in sugar factories.

110644. Dynamit Nobel Aktiengesellschaft. Processes for carrying out exothermic reactions in fluidised beds.

110645. S. G. Ekbote. Press for clay bricks.

110646. B. P. Pandey. A device for prevention of railway accidents.

110647. Westinghouse Electric Corporation. Disc-type semi-conductor device.

110648. Westinghouse Electric Corporation. High power, non-linear, gas tube resistor.

110649. Celanese Corporation. Method for preserving wood.

110650. Palitex Project-Company G. m. b. H. Protective cage for two-for-one spindles.

110651. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Molding materials for the production of foam articles.

110652. Sando Iron Works Co., Ltd. Washing of a contaminated guideroll and prevention of from contamination in cloth treatments.

110653. A. T. Johannessen. Improvements in or relating to arrangement for unloading of bulk cargo. (16th May 1966),

110654. American Cyanamid Company. Organo phosphorous compositions and their use in controlling arthropod parasites.

110655. The Green Cross Corporation. Process for producing the lactic acid bacteria drugs.

110656. C. L. Burdick. Intra-uterine device.

110657. Demag Ag. Metallurgical furnace.

110658. Fizichesky Institut Imeni P. N. Lebedeva. Electric incandescent lamp.

110659. Hewitt-Robins International S. A. Mobile Bridge conveyor steering system. [Addition to No. 97643].

110660. Rockwell-Standard Corporation. Parking and emergency brake system for vehicle. (8th July 1966).

110661. Rockwell-Standard Corporation. Brake actuator improvements. (8th July 1966).

110662. The English Electric Company Limited. Improvements relating to reversible pump turbines. (20th May 1966).

110663. Morgan Construction Company. Coil Handling apparatus.

110664. Cerberus Ag. Fire alarm system with monitoring device for fire alarms connected in groups to a central station.

110665. Imperial Chemical Industries Limited. New water-soluble reactive anthraquinone dyestuffs, their preparation and use. (27th May, 1966).

110666. Ritter Pfaudler Corporation. Baffle.

110667. A. R. Balsara. Improvements in or relating to filters for liquids for drinking purposes and the like.

16th May 1967

110668. G. W. Ruparel. Improvements in or relating to safety razors and the like.

110669. Hagen Dettmer G.M.B.H. Improvements in or relating to equipment for drying and burning of loose materials, especially of minerals.

110670. V. D. Roosa. Fuel injection nozzle with adjustable means therefor.

110671. Ministerul Industriei Constructiilor De Masini. Moulding machine with revolving and oscillating compressive head.

110672. Veb Arzneimittelwerke Dresden. Process and equipment for manufacture of non-abrasive non-discolourable granules of pharmaceutical substances.

110673. Elektrostalsky zavod tyazhelogo mashinostroenia, Elektrostal. Hydraulic motor speed governor.

110674. Ciba Limited. Pesticidal preparations.

110675. Sandoz Ltd. Improvements in or relating to organic compounds.

110676. Koninklijke Nederlandsche Gist-En Spiritusfabriek N. V. Process for the preparation of stable solutions of oxytetracycline in water, suitable for parenteral and peroral administration.

110677. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of carboxylic acid vinyl esters.

110678. N. V. Philips' Gloeilampenfabrieken. Improvements in and relating to semiconductor device headers. (19th May 1966).

110679. J. R. Geigy A. G. Process for the production of new tricyclic amines.

110680. J. R. Geigy A. G. Process for the production of difficultly water soluble anthraquinone dyestuff mixtures

110681. Girling Limited. Improvements in and relating to tubular housing structures. (19th May 1966).

110682. Joseph Lucas (Industries) Limited. Ignition distributors. (13th June 1966).

110683. Imperial Chemical Industries Limited. Rope structures. (20th May, 1966).

110684. Farnell Instruments Limited. Improvements in or relating to units for mounting electrical circuit components. (23rd May, 1966).

17th May 1967

110685. Shri Krishnapppa. Hydrodesignoscopy in textile.

110686. K. Sundararajan. Rewirable blown-out fuse indicator.

110687. P. S. Sawalka. Glass run channel.

110688. P. S. Sawalka. Door lace.

110689. P. S. Sawalka. Weather strip.

110690. Sandoz Ltd. Improvements in or relating to organic compounds. (18th May 1966).

110691. A. H. Robins Company, Incorporated. "5-[Aryl-dehydropiperidinyl-- and aryldehydropyrrolidinyl)-lower-alkyl]-2-oxazolidinones".

110692. Ciba Limited. "1, 3, 4-Benzoxadiazines".

110693. The Pillsbury Company. Spray drying method, apparatus and product.

110694. Colgate-Palmolive Company. Bleaching compositions.

110695. Colgate-Palmolive Company. Scouring cleansing composition.

110696. Colgate-Palmolive Company. Abrasive scouring cleanser.

110697. Colgate-Palmolive Company. Abrasive scouring cleanser.

110698. Firma Dr. J. Loebering K. G. and J. K. Synthetics Limited. Production of shaped articles from polyacrylonitrile.

110699. Firma Dr. J. Loebering K. G. and J. K. Synthetics Limited. Production of bows, fibres, films or filaments of polyacrylonitrile.

110700. Firma Dr. J. Loebering K. G. and J. K. Synthetics Limited. Production of shaped articles of polyacrylonitriles and copolymers.

18th May 1967

110701. T. N. Tandon and G. Lalwani. Coupler mechanism for railway rolling stock.

110702. Egyesult Gyogyszer-Es Tapszergyar. New naphthyland tetrahydronaphthyl formamidines.

110703. Central Glass Co., Ltd. A method for manufacturing highly pure gypsum.

110704. Globe-Union Inc. Ceramic composition for barrier layer capacitors.

110705. Ciba Limited. 1, 3-Benzodiazepines.

110706. Ciba Limited. 2,4-Benzodiazepines.

110707. Ciba Limited. 3-Quinolinecarboxylic acids.

110708. Veb Farbenfabrik Wolfen. Process for the production of liquid soluble condensation products. (3rd April 1967).

110709. Sando Iron Works Co., Ltd. A method and apparatus for treating cloth.

110710. Imperial Chemical Industries Limited. Improved magnetic recording tape. (27th May, 1967).

110711. Brog-Warner Corporation. Audio-visual apparatus.

110712. Rodi & Wienenberger Aktiengesellschaft. Improvements in or relating to decorative covers for wristwatch straps.

110713. Rockwell-Standard Corporation. Brake actuator assembly.

110714. Caterpillar Tractor Co. Hydraulic follow-up for vehicle steering systems.

110715. Heinrich Koppers Gesellschaft mil beschrankter Haftung. Cooler, particularly a circular cooler, for agglomerated materials.

19th May 1967

110716. Council of Scientific and Industrial Research. Improvements in or relating to corrosion protection of steel radiators.

110717. Hewitt-Robins International, S.A. Conveyor system.

110718. Ceskoslovenska akademic ved. Method for preparing soluble glycol methacrylate polymers and copolymers.

110719. David Brown Gear Industries Limited. Securing components together. (25th May 1966).

110720. Swiss Aluminium Ltd. Electrolytic process.

110721. Quigley Company, Inc. Furnace repair gun.

110722. C. F. Boehringer & Soehne GmbH. A process for the preparation of L-(—)-α-Methyl-β-(3, 4-Dihydroxy-Phenyl)-Alanine. (23rd March 1967).

110723. F. Hoffmann-La Roche & Co., Aktiengesellschaft. Benzodiazepine derivatives and process for their manufacture. [Division and date 31st August 1965].

110724. Karamchand Premchand Private Limited. A process for the preparation of alanine by submerged fermentation.

110725. American Home Products Corporation. Steroid compounds.

110726. Halcon International Inc. Chemical process.

110727. Aluminium Laboratories Limited. Heat-treatment of aluminium-manganese alloys. (29th July 1966).

110728. Rohm and Hass Company. Treatment of liquids.

110729. K. Gerlach and Dr. Ing. H. Gerlach. Telescopic props for mines.

110730. K. Gerlach and Dr. Ing. H. Gerlach. Extensible hydraulic telescopic pit prop clampable by means of friction lock.

110731. G. V. Sathe. Improvements in or relating to a device for water lifting by gravity.

110732. T. D. Rao. Improvements in or relating to an improved can opener device.

110733. J. Chhabildas. Improvements in or relating to garters and the like.

Alteration of Date

102712. The claim to priority date 1st December 1964 has been disallowed and the application dated as of 27th November, 1965, the date of filing in India.

102491. The claim to priority date 15th October 1965 has been disallowed and the application dated as of 12th November 1965, the date of filing in India.

107699. Ante-dated to 8th August 1966 under Section 5 of the Act.

110418. Ante-dated to 15th November 1965 under Section 5 of the Act.

110262. Ante-dated to 21st July 1965 under Section 5 of the Act.

100676. Post-dated to 16th April 1966 under Section 5 of the Act.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patent's on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the Office.

The dates shown in crescent brackets are [illegible]owed under Section 78A of the Act.

100676. Council of Scientific and Industrial Research. A pressure measuring device. Accepted on 10th May 1967.

Consisting of a thick diaphragm and a sensing system both being hermetically enclosed by the body of the cell a back plate and a cover.

100727. Automation Industries Inct. Ultrasonic inspection. Accepted on 22nd April 1967.

Comprising transducer means, scan means coupled to transducer means produce a scanning movement, means coupled to the transducer means for energizing the transducer means.

100827. Dr. Ing. Dr. Ing. E. h. H. Schenck. and Dr. Ing. W. Wenzel. Process of producing high-strength ore pellets. Accepted on 28th April 1967.

Wherein process prefired ore is added to the crude material be pelletized characterized by addition of such ore in amounts 10-50%, preferably 20-40% of dry weight of resulting mixture.

100900. Dunlop Robber Company Limited. Improvements in or relating to injection moulding apparatus. (8th August 1964). Accepted on 2nd May 1967.

Comprising a conveyor, a pair of movable platens, means for heating the platens and actuating means.

100924. Dunlop Rubber Company Limited. Improvements in or relating to tyre removal and fitting machine. (20th August 1964). Accepted on 3rd May 1967.

Comprising a substantially horizontally disposed wheel and tyre supporting plate, a plurality of releaseble wheel griping arms.

100956. Walker Sons & Co., Ltd., and D. P. Chandrasinghe. Improvements in or relating to power supply system. Accepted on 4th May 1967.

Comprising a generator/motor, which functions as an synchronous motor during normal period, is coupled with a prime mover during power shortage and acts as a stand-by alternator to continue supply of power to individual machines and said prime mover takes a part of the motor load.

100972. Veb Starkstrom-Anlagenbau Erfurt. A housing, particularly for electric installations or parts of thereof. (5th August 1964). Accepted on 5th May 1967.

Comprising corner connectors, profile members and plate members characterized by the fact that the corner connectors are quadrangularly shaped and comprises pegs and/or recesses in the possible connecting directions of the profile members.

101051. K. A. Moothan. A method for the production of aluminium oxide from aluminium Accepted on 10th May, 1967.

Comprising electrolytically amalgamating aluminium metal and then drying the amalgamated portion in open air.

101063. Farbenfabriken Bayer Aktiengesellschaft. A process for the production of organic acetates. (16th July 1965).

Comprising reacting an olefine (or) alkyl benzene at elevated temperature with oxygen and acetic acid in the presence of palladium metal catalyst deposited on aluminium oxide which is substantially or partly, in the form or spinel.

101094. Compagnie Francaise De Television. Improvement to colour television receiving tubes. (28th October 1964). Accepted on 12th May, 1967.

Comprising a rectangular screen with parallel phosphor strips, three successive strips of said screen having different colours, three guns and means for causing said beams.

101097. The Indian Sugar & General Engineering Corporation. Improvements in or relating to a new hydraulic accumulator, allied roller mill equipment. Accepted on 12th May 1967.

Cylinder provided with top and bottom covers a piston in said cylinder dividing the same into two portions or chambers, top of the piston being connected to a hollow piston rod which extends beyond said top cover when piston is at lower end and the open end of the said piston rod being hydraulically sealed.

101116. J. R. Geigy A. G. Process of treating metal or metal alloy surfaces with bis-benzotriazoles as corrosion inhibitors and metal deactivators. Accepted on 15th May 1967.

The metal surface is treated with at least one bisbenzotriazole like bis (benzotriazolyl-5), bis (benzotriazolyl-5)-methane, bis-(benzotriazolyl-5)-1 : 2-ethane, bis-(benzotriazolyl-5)1 : 1-cyclohexane, bis-(benzotriazolyl-5)-2 : 2-propane.

101118. M. & T. Chemicals Inc. Flame-resistant particle board and process for preparing the same. Accepted on 12th May 1967.

By coating wood particles with a thermally unstable chlorine containing material and with at least one antimony compound and separately coating said wood particles with a particle board adhesive, forming said wood particles into a particle board mat, compressing said mat and curing the said adhesive.

101146. Western Electric Company, Incorporated. Data handling system. (13th October 1964). Accepted on 16th May 1967.

Comprising a processor arrangement including a memory arrangement a control arrangement transmission circuit and an input output system.

101162. Council of Scientific and Industrial Research. Improvements in or relating to carbonisation of coal in narrow continuous vertical retort. Accepted on 17th May, 1967.

Characterised in that carbonisation is carried out at medium and/or high temperature (800—1000°C).

101182. E. N. Mason & Sons Limited. A method of printing or coating a polyester or polyolefin film material, and film materials printed or coated thereby. Accepted on 17th May 1967.

A liquid composition containing a curable thermoplastic material and a cross linking agent therefor is applied to the film and the film is subjected to curing treatment.

101224. Sandoz Ltd. Basic dyes process for their manufacture and materials dyed padded or printed therewith. Accepted on 19th May, 1967.

Comprises reacting a vinyl compound containing a cyclic radical with at least one quaternizable nitrogen atom with a compound containing a radical of a compound permitting the formation of a dye and then the product converted into a dye and if desired the product may also be quaternated.

101258. Ferodo Limited. Friction linings. Accepted on 17th May, 1967.

Having a partially impregnated yarn being in intimate contact throughout, with a fully, impregnated yarn, impregnation being done with at least a binder and the proportions of the yarns being such that there are not more than 70 parts by weight of one of the yarns for every 30 parts by weight of the other.

101352. N. G. Rusanovich, I. S. Dmitriev, J. V. Korobov, S. O. Volfenzon, B. J. Kostin, E. B. Zaichik and V. S. Emelyanov. Device for rigid fastening of cargo to aircraft particularly to helicopter-crane for transporting this cargo. Accepted on 11th May 1967.

Provided with hydraulically driven grippers successively interconnected in one hydraulic system, each of the rear grippers being fixed in a joint in which three rod hoisters converge, the front grippers being fixed on rod hoisters adjustable according to flight positions.

101403. J. R. Geigy A. G. Pigmented polymeric preparations. (7th November 1964). Accepted on the 11th May 1967.

Mixing paste of pigment with aqueous dispersion of emulsion co-polymer of styrene and alkyl acrylate coagulating the resulting mixture, removing aqueous phase from coagulum, drying and pulverising the solid.

101443. Gebr. Bohler & Co. Aktiengesellschaft. Improvements in or relating to processes and apparatus for surface-hardening hardenable steels. Accepted on 18th May, 1967.

Process of surface hardening hardenable comprises heating work piece to form austenitic layer and if desired, adding further energy to transform said layer into martensite wherein the heating and additional energy are given by a nozzleless plasma torch.

101613. Compagnie Royale Asturienne Des Mines. A process for the recovery of zinc from ferrites. Accepted on 17th March 1967.

Wherein leaching of residues from zinc plants is carried out with excess of sulphuric acid resulting residue being drawn out by decanting or filtering.

101685. Pullman Incorporated. Production of halogens. Accepted on 11th May 1967.

Reacting respectively hydrogen chloride or hydrogen bromide with oxygen or a mixture of oxygen, an inorganic oxygen containing compound of nitrogen and liquid sulfuric acid.

101730. Deere & Company. Cotton harvester. Accepted on 17th May, 1967.

Comprising a fore and aft extending anger conveyor in a housing and a blower having an air outlet opening into a duct extending from the housing to effect suction or ripe cotton bolls through unwardly opening right boll outlet the grem boll being discharged through a downwardly opening in the housing.

101735. Dolomitwerke GMBH. Bricks made from magnesite dolomite, lime and mixtures thereof and method for increasing the storage life of said bricks. Accepted on 27th March 1967.

Method for increasing storage life of highly refractory tarapped bricks characterized by tar bath containing finely dispersed substances inactive bricks.

101766. Veb Elektro-Apparate-Werke Berlin-Treptow. Iron core for voltage sysems of electric supply meters. Accepted on 17th May 1967.

Comprising m-shaped plate layers in which the lengths of the sides of the coil being made in the proportion of 4 : 3 whereby the longersides are parallel to the axis of the coil.

101820. Dunlop Rubber Company Limited. Improvements in or relating to items of furniture. Accepted on 17th May 1967.

Comprising a cured elastomeric sheet or strip provided with a reinforcement a filamentary fabric.

101848. Combustion Engineering, Inc. Air heating system. Accepted on 6th April 1967.

Comprising two air heaters a distribution chamber and duct means.

101927. Council of Scientific and Industrial Research. Continuous production of synthesis gas. Accepted on 10th April 1967.

Comprising introducing a mixture of steam and carbonaceous material in the reactor where hydrocarbons are being burnt with oxygen, air mixture of the two.

102183. [redacted] Chemical Industries Limited. Improvements relating to a process for the manufacture of [redacted]o-ethylene. Accepted on 22nd April 1967.

Comprising reacting hydrogen chloride and a source of elemental oxygen with a source of acetylene in vapour phase in the presence of a Deacon catalyst and in the presence of steam and/or vaporising liquid.

102249. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Water-soluble mono and disazo dyestuffs and process for preparing them. Accepted on 27th April 1967.

Aromatic diazo tetrazo or azo diazo compounds are coupled with azo components.

102276. Mobay Chemical Company. Method or making laminated foam plastic articles and products obtained thereby. (15th September 1965). Accepted on 28th April 1967.

Method of making a laminated structure comprising heat laminating an assembly of polyurethane foam and plastisol having resin, applying a further thermoplastic film to polyurethane film core and finally pressing the assembly to fuse along die surface.

102277. Mobay Chemical Company. Method and apparatus for coating polyurethane film with a self sustaining thermoplastic film. (15th September 1965). Accepted on 28th April 1967.

Method for heat sealing polyurethane foam comprising interposing a plastisol having a resin between foam and film (thermoplastic) and heating the assembly while avoiding distortion of film.

102348. N. Turati. Spectacle-frame with independently-acting pincenez fittings which are adjustable along the length of the nose. Accepted on 2nd May 1967.

Characterised by positioning each tongue along rim starting from bridge by means of a support mounted astride to grip around the rim and kept it desired gripping position by a spring to press against rim, supporting element is provided with an elbow-shaped pin movable and carrying tongue at its end.

102393. Associated Electrical Industries Limited. Anchoring arrangements suitable for pipe lines connected to steam vessels. (11th November 1964). Accepted on 4th May 1967.

Comprising first flexible bellows, first tubular member second tubular member, second flexible bellows, accurately bent pipe section, third tubular member, anchoring means, tie means.

102404. Ciba Limited. Water-soluble azo dyestuffs, processes for their manufacture and materials dyed or printed therewith. Accepted on 6th May 1967.

Wherein an azo-dyestuffs A-N=N-B is treated with an alkylating agent or a diazo amine is coupled with a naphthalene.

102435. N. V. Onderzoekingsinstituut Research. Apparatus for treating highly viscous substances. [Addition to No. 96786]. Accepted on 9th May 1967.

In which there is below the rollers a collecting vessel for the substance and there is attached to one end of one of the rollers a disc coaxial with that roller which disc extends to adjacent the bottom of the vessel, and means to scrape substance entrained by the disc off the disc onto the rollers.

102436. N. V. Onderzoekingsinstituut Research. An apparatus for treating highly viscous substances. [Addition to No. 96786]. Accepted on 9th May 1967.

In which the rollers are positioned side by side near the bottom of a vessel and the rotating means is operable to rotate the rollers in opposite directions with the rollers surfaces rotating away from one another at the upper bits.

102440. W. A. Sheaffer Pen Company. Marking of implement. Accepted on 9th May 1967.

Comprising separable parts, a capillary ink reservoir piller element in each end of barrel and a capillary marking tip in contact with both reservoir filler elements in the assembled storage condition of the barrel, the parts of the barrel being separable intermediate the reservoirs to expose one end of the capillary marking tip for marking.

102442. Allied Chemical Corporation. Process for preparing a segmented substantially linear polyether-urethane-urea copolymer. Accepted on 9th May 1967.

Comprising (a) heating a difunctional hydroxyl terminated polyether with less than the stoichiometric equivalent of an aromatic diisocyanate to produce a hydroxyl terminated polyether urethane (b) heating said produced urethane with at least mole of an aliphatic diisocyanate per equivalent of hydroxyl groups in the produced urethane to produce an isocyanate terminated intermediate and (c) mixing the said intermediate with p-menthane-1, 8-diamine to produce the copolymer.

102464. The B. F. Goodrich Company. Process for making heat-stable hydroxyl-containing vinyl polymers. Accepted on 11th May 1967.

Comprises (A) forming a suspension of a copolymer of vinyl chloride and vinyl acetate in a liquid reaction medium which comprises a lower aliphatic alcohol and an organic solvent that swells the copolymer and an iron salt, (B) adding a strongly basic material to the suspension (C) and then chlorinating the resulting hydroxyl containing polymer in said suspension and (D) separating the polymer from the reaction medium.

102478. Deere & Company. Rotatable doffing structure for a cotton picker. Accepted on 11th May 1967.

Comprising a plurality of vertically spaced doffing plates supported on a vertically disposed central shaft and adapted for operation with an upright rotatable spindle drum having a plurality of laterally extending spindles spaced vertically on the order of the plates.

102487. J. R. Geigy A. G. Process for the dyeing and printing of textile fibre-forming polyesters and synthetic polyamides. Accepted on 11th May 1967.

Dyeing with a dyestuff which dissociate acid in water.

102489. Desma-Werke GMBH. Improvements in or relating to an injection mould for the production of footwear. Accepted on 12th May 1967.

Comprising a last, a vertically displaceable bottom plunger and divided side frame in which one forward part of the side frame being continuous uniform and extended as far as the widest part of the last.

102491. The Goodyear Tire & Rubber Company. Synthetic rubber compositions and pneumatic tire treads prepared therefrom. Accepted on 12th May 1967.

Comprises mixing (a) a rubbery co-polymer of butadiene 1,3 and acrylonitrile (b) a rubbery copolymer of butadiene-1,3 and styrene and (c) a rubbery polymer of cis-1-4-polybutadiene.

102498. P. M. Phene. Improvements in or relating to chhappals or the like footwear and a method of manufacturing the same. Accepted on 15th May 1967.

Comprising mainly a sole, an insole which remains above and away from sole by a series of studs and like projections and upper bands.

102503. Ministerul Industriei Chimice. Procedure for the obtainment of copper phtalocyanine chloride. Accepted on 10th May 1967.

Halogenation of copper thalocyanine carried out by heating with stirring a mixture of aluminum chloride, sulphuryl chloride, and copper thalosyanine at 175—185°.

102507. The International Synthetic Rubber Company Limited. A process for preventing shrinkage and felting of wool. (17th November, 1964). Accepted on 15th May 1967.

Comprising depositing on the wool an acid chloride modified synthetic rubber.

102510. Girling Limited. Improvements in fluid pressure operated boosters or servo motors. (18th November 1964). [Addition to No. 92044]. Accepted on 15th May, 1967.

The input and output members are in axial alignment on the axis of the booster, and the lever is formed by a part of the movable wall and is adapted to move angularly about a fulcrum on another part of said wall the fulcrum is spaced from the axis of the booster.

102514. Ciba Limited. Pesticidal preparations containing aromatic phosphoric or phosphonic acid esters. Accepted on 15th May 1967.

Comprising 0.0005 to 50% of $R_1(R_2\ \overset{X}{\underset{\|}{Y}})\ P\text{-}o\text{-}C_6H_3Cl_2$ *in admixture with carrier or diluent, R_1 being alkoxy, alkylthio or alkyl, halgen alkyl or aryl; R is methyl or ethyl and X, Y is oxygen or sulphur.*

102537. Wiggins Teape Research & Development Limited. Improvements in or relating to photographic materials. (17th November 1964). Accepted on 16th May 1967.

Applying to the surface of a polyolefine coated paper, which surface has been treated electrically to improve its adhesiveness to photographic emulsions, a coating which retards deterioration of the adhesiveness of polyolefine surface to photosensitive materials.

102538. Bakelite Limited. Improvements in or relating to decorative laminates. [Addition to No. 90634]. Accepted on 16th May 1967.

Improvement comprises in the surface layer of the assembly which has an opacity of at least 10 and comprises a layer of paper containing a white pigment or a mixture of such pigments, said paper being inpregnated with an aminoformaldehyde or hardenable polyester resin.

102552. Dr. J. u. H. Krautkramer Gesellschaft Fur Elektrophysik. A system for testing materials and measuring wall thickness by the ultrasonic echo method. Accepted on 17th May, 1967.

Characterized by an auxiliary transmitter on the receiver side, coupled electrically with the transmitter or an auxiliary receiver on the transmitter side coupled with the receiver, such that the distance from the auxilidry oscillator to the contact surface between the specimen and the intermediate piece is less than the distance between the transmitter or receiver respectively and the surface, the reference echo signal produced by the auxiliary oscillator being situated before that produced by the surface echo.

102553. W. R. Grace & Co. Novel post-emergence herbicides. Accepted on 18th May 1967.

Comprising a benzanilide and a solvent.

102557. Wiggins Teape Research & Development Limited. Method of improving absorptive properties of polyolefine coated paper products. (18th November 1964). Accepted on 16th May 1967.

Comprises applying to the polyolefine surface of the coating an acidic composition comprising an aqueous silica sol, an organic polymeric film-forming material and an acid and then drying.

102568. International Standard Electric Corporation. A circuit arrangement of electronic devices for railway gang warning systems. Accepted on 15th May 1967.

Comprising two similar pulse discriminator circuits precede a pulse evaluating circuit including a storage device set and a further pulse discriminator cricuit is responsive to an overvoltage to reset said storage device.

102571. Goro S. A. Hinge-like belt connectors. Accepted on 18th May, 1967.

A hinge like connector for driving belts comprising a U-shaped hinge element having unequal arms a and b and a fixing means joining these arms to the belt.

102573. Imperial Chemical Industries Limited. Reductive dimerisation of α, β —olefinically unsaturated nitriles. (24th November, 1964). Accepted on 18th May 1967.

Wherein the nitrile is dissolved in an aqueous medium containing an organic sulphoxide or sulphone.

102595. Etablissements Merlin & Gerin, Societe Anonyme. Cellular electric installation comprising an unpluggable electric device mounted on a movable framework. Accepted on 16th May 1967.

Characterised in that the device being detachably supported by a support, means being provided for lifting the framework in relation to the said support and an independent truck for engagement under the framework.

102615. Westinghouse Air Brake Company. Improvements relating to circuit arrangements for detecting the presence of a vehicle on a route. Accepted on 17th May, 1967.

Comprising a shunting member movable along the route with a vehicle and in contact with the conductors extending along the route which shunts the signal to one receiver when disposed between that receiver and the source of a predetermined signal frequency and shunts the signal to another receiver when disposed between this receiver and the source.

102624. International Standard Electric Corporation. Route-releasing circuit for electrically interlocking railway signalling systems. Accepted on 16th May 1967.

Comprising two release checking relays, a track testing relay energisable via contacts, switching means for resetting a point locking relay and two pairs of output terminals.

102625. International Standard Electric Corporation. A route releasing circuit arrangement for interlocking signalling system controlling sections of a railway track. Accepted on 16th May 1967.

Comprising a circuit arrangement including two switching mean first responsive to the track relay means for detecting occupation of at least one track section and the second for detecting clearance of that section, and a route releasing means being operative only when second switching means operative after the first switching means.

102626. International Standard Electric Corporation. A proving circuit arrangement for interlocking railway signalling systems. Accepted on 16th May 1967.

Comprising track relays for supervising the occupancy of the associated track sections provided with one set of test contacts which being interconnected in a proving circuit.

102650. The Bendix Corporation. Improvement in or relating to fluid shut off valves and emergency fuel flow shut off valves. Accepted on 15th May 1967.

Comprising a valve for engagement with orifice being actuated by servo-mechanism and another valve for controlling flow in another orifice.

102666. General Dynamics Corporation. Tension control system. Accepted on 18th May, 1967.

Comprising tensioning means, actuator means to move the said tensioning means, control means for said actuator means, means to vary the effect of the said control means and speed control means for at least one electric drive motor.

102672. The Lubrizol Corporation. Basic mixture of alkaline earth metal salts and lubricating compositions containing the same. Accepted on 19th May, 1967.

The invention comprises of a basic mixture of alkaline earth metal salts of phosphorized aliphatic hydrocarbons where the metal ratio is greater than about 2.5 and comprises 40 to 90 parts by weight of the metal and 5 to 60 parts by weight of a metal having a metal ratio less than 2.

102712. Compagnie Des Freins Et Signaux Westinghouse. Vacuum brake arrangements for railway vehicles. Accepted on 15th May 1967.

Comprising at least one vacuum pump, at least one driver's brake valve, a train pipe controlling the vacuum brakes on the train and an electromagnetically operated double cut out.

102792. Imperial Chemical Industries Limited. Process and apparatus for the purification of a crystallisable substance. (2nd December, 1964). Accepted on 16th May 1967.

Comprises partly crystallising body of substance, displacing remaining liquid, remelting part of the crystals, displacing liquid in a opposite direction to previous movement.

102796. Associated Electrical Industries Limited. Improvements relating to controlled rectifier circuits. (2nd December 1964). Accepted on 17th May 1967.

Comprising a separate controlled rectifier control means to trigger the rectifier for a half cycle and means for controlling the phasing of the triggering.

102853. Koppers Company, Inc. Improvements in or relating to resin-Bonded wound filament shells and to a method of molding thereof. Accepted on 15th May 1967.

Comprising forming a nonplanar mold member having several different peripheral dimensions transverse its longitudinal axis at successive stations, forming a nonplanar mandrel member of circular cross-section transverse its longitudinal axis.

102887. Armour and Company. N-secondary alkyl diamine compounds and their process of preparation. Accepted on 11th May 1967.

Reacting a secondary alkyl primary amine and acrylonitrile in the presence of water to form N'. (β-cyanoethyl)-secondary-alkyl amine.

102943. Whiffen & Sons Limited. Process for preparing azines and the compounds so prepared. (22nd December, 1964). Accepted on 17th May 1967.

Comprises reacting gaseous chlorine with aqueous ammonia in presence of carbonyl compound and strong bse.

102998. General Dynamics Corporation. Bonding of teflon fabric. Accepted on 12th May 1967.

Applying an adhesive to a clean metal surface placing the polyhalocarbon resin containing cloth like member having one face thereof chemically etched, over the adhesive material with the etched face down and applying heat to bond the cloth like member to the metal.

103014. Compagnie Francaise Thomson-Houston Hotchkiss Brandt. Anisotherm Evaporation heat-transfer structure. Accepted on 12th May 1967.

Characterized in that the protubarances have adjoining bases and have sidewalls that are tapered over at least a substantial part of their length, and are so proportioned as to satisfy the relation

$$b = kc\,\frac{\theta}{\phi}$$

$$\frac{S_1}{S_a} = k\,\frac{\phi}{pq}$$

wherein b, s_a, s_1 are the length, base are and the total area of a protuberance, C is the heat conductivity of material, q is the cerifical flux density of heat transfer of the boiling liquid, θ is the specified temperature drop φ is the nominal maxium heat flux, k is a numerical safety factor within range from 1 to 2, p is a numerical efficiency factor within the range 0.8 to 1.6.

103051. Shell Internationale Research Maatschappij N. V. Process for the preparation of polyvinylaromatic compositions. Accepted on 18th May 1967.

Comprising continuous bulk polymerization of vinyl aromatic compound in precence of unvulcanized elastomer in several reactor, inert diluent being present in final reactor.

103091. Shaparia Dock & Steel Co Private Limited. Improvements in or relating to sanitary closets and the like latrines. Accepted on 17th May 1967.

Comprising a metal stand, a platform, an enamelled pan having sloping portion with an outlet for discharging urine; a urine and water tray, a main receptacle, a stirren, a box for collecting urine and water.

103121. Ckd Praha oborovi Podmik. A semiconductor device having planar semiconductor element. Accepted on 18th May, 1967.

Have a planar semiconductor element forced against contact plates of electrodes by a spring accomodated inside a cylindrical holder.

103134. Allied Chemical Corporation. Process for the preparation of malic acid. Accepted on 19th May, 1967.

By catalytic oxidation of organic compounds, dissolving the vapours in water, solid is removed from the solution and solution is heated in a closed system to convert maleic acid into maliec acid.

103166. Borg-Warner Corporation. A compressor. Accepted on 17th May, 1967.

Comprising a housing having a cavity, a rotor with hub, and a shaft extending from the hub, means for rotatably journaling said rotor and means for supplying lubricants to the injection port.

103244. Beloit Corporation. Food dryer. Accepted on 16th May, 1967.

Comprising a pair of drying drums forming a narrow nip, doctor blade, plurality of separately heated drying zones, heat transfer coefficient in the range of 40 to 60 btu/hr/ft.°F.

103256. Huyck Corporation. A corrugator combiner belt and method of making same. Accepted on 16th May 1967.

The belt is formed of material permitting the transmission of moisture there through from the web, the material comprising incompressible polymeric sheet material.

103270. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Aqueous solutions of anthraquinone pigments and process for dyeing spin dyeing, pad dyeing or printing fibrous materials, foils and shaped articles by methods using said pigments. Accepted on 12th May, 1967.

Comprises anthraquinone pigment containing at least one CONH group in the molecule and a quaternary cationic surface active agent.

103351. Ciba Limited. Epoxy resin moulding compositions. Accepted on 19th May, 1967.

Comprises reacting the epihalohydrin in an alkaline medium with a condensation product prepared from a phenol and a cyclic anhydride or a dibasic acid capable of forming such a cyclic anhydride under reaction conditions.

103374. International Standard Electric Corporation. A railway signalling circuit arrangement for the evaluation of an alternating track voltage. Accepted on 12th May, 1967.

Comprising a glow discharge valve provided with atleast three electrodes and coupled to a track current circuit and to two reference current circuit.

103470. Udec Ltd. Improvements in or relating to bottle capping apparatus. (18th January, 1965). Accepted on 19th May, 1967.

The apparatus being located in an air tight casing outside which sterilising liquid to be used to the caps being disposed means for deliverine the sterilised caps to the said casing and means for heating and drying the said caps.

103483. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Basic azo dyestuffs and process for preparing them, and textile materials which have been dyed or printed by a process using said dyestuffs. Accepted on 12th May 1967.

A process for the preparation of basic azo dyes comprises coupling a dizonium compound of a quarternary with a coupling component free from sulphonic acid and carboxylic acid groups.

103505. Phillips Petroleum Company. Polymerization of olefins and an improved catalvst for such polymerization. Accepted on 18th May 1967.

Polymerizing aliphatic 1-olefin in the presence of a catalyst which is formed on mixing (a) a preformed complex containing aluminium, halogen and organic radical, (b) a titanium chloride aluminium chloride complex, (c) and an organo metallic halide.

103517. St. Anne's Board Mill Company Limited. Dewatering watery pulp. Accepted on 12th May, 1967.

Comprising first and second bands adapted to move together over a portion of their travel around a static pressing element having an operative face which is convexly curved but non-circular, successive portions thereof being of progressively greater radius.

103580. Shell Internationale Research Maatschappij N. V. 2-(2, 6-dihalophenyl)-4-hydroxy-5-carboxymethylthiazole and alkylesters thereof as herebicides. (28th January 1965). Accepted on 12th May, 1967.

Reacting 2, 6-dihalothiobenzamide with maleic acid.

103588. Phillips Petroleum Company Process for polymerizing conjugated dienes. Accepted on 12th May, 1967.

In a process of polymersising a conjugated diene or a mixture of a conjugated diene and a vinyl substituted aromatic compound, the polymerization is terminated by adding an organo tin compound.

103615. *Ateliers De Constructions Electriques De Charleroi (Acec).* A circuit having two stable states. Accepted on 12th May 1967.

Comprising two magnetic elements each having a primary and a secondary winding and a direct current desaturation winding all wound on a pre-saturated core.

103632. Shell Internationale Research Maatschappij N. V. Tray for contacting liquids and gases. Accepted on 18th May, 1967.

Comprising one or more tubular contacting apparatus for liquid and gas, each apparatus being provided with means to impart a rotary motion to the gas the tubular chamber being provided with tangential openings for discharge of the liquid.

103635. Ethyl Corporation. Process for isomerizing terminal olefins. (31st August 1965). Accepted on 19th May, 1967.

By isomerizing a terminal olefin to an internal olefin which comprises contacting the terminal olefin with a group VIII metal as a catalyst.

103672. Zavod Tyazhelogo Mashinostroeniya im. Ord-Zhonikidze. Current collection device for movable hoisting—and transportation arrangements. Accepted on 12th May 1967.

A current collection device characterised in that the guide is made as a link member articulated to the hoisting and transportation arrangement and is connected to the trolley of collectors by means of universal joints.

103698. The Lubrizol Corporation. Process for preparing a homogeneous gel and lubricating composition comprising the same. Accepted on 19th May, 1967.

This invention relates to the process for preparing thickened mineral oil comprising homogeneous gel contacting with air or oxygen and a fluid mineral oil solution containing basic complex of an alkaline earth metal.

103724. Lindauer Dornier Gesellschaft m.b.H. A shuttleless loom of the type having a reciprocating gripper system. (5th January 1966). Accepted on 18th May, 1967.

A freely rotatable roller guide is provided on the distributor member of the gripper withdrawing the weft thread from a feed spool, to carry the weft after its removal from feed spool and to insert it into fabric.

103729. Standard Telephone and Cables Limited. Cable stranding machine. Accepted on 12th May 1967.

A cable stranding machine wherein the rotor and the drum are rotatable at individual rotational speeds about the common axis.

103822. Davidson of India Private Limited. Variable speed transmission gear. Accepted on 10th May, 1967.

Comprising driving and driven shafts each carrying coplanar discs, a pair of frictionally rimmed wheels in constant contact with the discs and movable in a plane parallel to that of the discs.

103895. Mefina S. A. Adjustable system for feeding an electric motor through a resistance of a variable value. Accepted on 18th May 1967.

Comprising adjustable resistance, diode is inserted in series with a fraction of resistance and is adapted to be shunted by other fraction of the resistance.

103923. Fmc Corporation. Preparation of water insoluble collagen composition capable of forming stable aqueous dispersions. Accepted on 18th May 1967.

Distributing hydrochloric acid solution a body of undenatured natural fibroous collagen and comminuting resultant wet mass until 10% of particles have been reduced to a particle size of a maximum dimension of less than one micron.

104107. A. R. Rausing. A lid-covered container. Accepted on 19th May, 1967.

Consisting of a tubular flexible body closed at one end and having an opening into which a resilient disk lid is introduced, and a tubular supporting sleeve on the cutside to oppose the bulging tendency of the said body.

104139. Ahmedabad Textile Industry's Research Association. Process for improving wet crease recovery and drip dry performance of cellulosic materials. accepted on 19th May, 1967.

By treatment of cellulosic material with formaldehyde in presence of polyhydroxy compound.

104158. Lee-Norse Company. Mining machines. Accepted on 19th May, 1967.

Characterized by comprising a shaft, a pair of links, eccentric means on the shaft, means to operatively engage eccentric means and means for rotating the shaft.

104179. Standard Pressed Steel Co. A metal fastening device and a method of production therefor. Accepted on 19th May, 1967.

Comprising a plastic element bonded to a bearing surface or to a surface that is to be engaged by a mating fastening device or by a workpiece.

104190. Joseph Lucas (Industries) Limited. Spark ignition systems. (10th March, 1965). Accepted on 19th May, 1967.

Comprising a pair of terminals for connection to the battery, a series circuit with an inductor, a diode and a capacitor, a first semi-conductor switch across the diode and capacitor, a second semi-conductor switch across the capacitor and means for turning the said first and second switch.

104191. Joseph Lucas (Industries) Limited. Spark ignition systems. (10th March 1965). Accepted on 19th May, 1967.

Comprising switch means in circuit with a capacitor for discharge so as to produce spark and means for stepping operation of said circuit before the next spark is required.

104237. Shell Internationale Research Maatschappij N. V. Process for the separation of a mixture containing hydrocarbons. Accepted on 18th May 1967.

By means of liquid-liquid extraction characterized in that solvent is removed from the used washing, medium by contacting with a hydrocarbon containing mixture.

104370. 'L' Eclairage Des Vehicules Sur Rail (E.V.R.) Device for protection against overvoltages. Accepted on 18th May 1967.

Comprising an auxiliary rectifier system having incomplete bridge connected to the electric installations to be protected, a cut-off device being provided between accumulator battery and apparatus.

104481. Corning glass works. Apparatus for positioning a skirted rectangular hollow vessel. Accepted on 11th May 1967.

Comprising plurality of pairs of associated rollers mounted on a platform bisymmetrically corresponding to the major and minor axes of the vessel and spring means.

104510. Societe Technique Pour L'Industrie Nouvelle S. A. "Stin". Railway signalling equipment. (2nd February 1966). Accepted on 15th May 1967.

Comprises first and second shackle-engaging attachment means, these attachment means being vertically spaced apart and the first attachment means being shaped to fit over the shackle when the shackle is already hooked into its own coupling hook.

104538. Hawke Cable Glands Limited. Improvements in or relating to electric cable glands. Accepted on 18th May, 1967.

Comprising sealing washer is grooved around its outer periphery and is constructed about the adjacent cable sheath by axial compression between two opposed annular surface which are mutually convergent in a direction radially inwards of the gland.

104564. K. C. Dhalla. Improvements in or relation to household or domestic furniture. Accepted on 12th May, 1967.

A domestic furniture wherein each leg assemblies are Y shaped so that when the leg assemblies are unfolded the height of the furniture is increased to its maximum.

104639. Ibcon Private Limited. A process for concentration of any liquor such as caustic, acid, juices, sea water, by a cycle of evaporation and condensation. Accepted on 18th May, 1967.

Comprising the steps of heating the liquor to near boiling point in heat exchangers and dropped as a fine spray through a cooling tower excess water goes out from liquor as vapours.

104663. Vereinigte Osterreichische Eisen-und Stahlwerke Aktiengesellschaft. Stationary, refractory-lined reaction vessel and steelmaking plant comprising such reaction vessel. Accepted on 19th May, 1967.

Stationary, refractory-line reaction vessel characterized by consisting of at least two horizontally displaceable parts with means in one part for the introduction of charging material lances and admixtures.

104714. J. M. Huber Corporation. Pigment and process of producing same. Accepted on 19th May, 1967.

Comprises forming an aqueous slurry containing metal compounds and finely divided reactive phylloidal silica, heating for a time sufficient to complete the reaction and recovering the product.

104760. Phillips Petroleum Company. Process and apparatus for producing either isaf or haf carbon black. Accepted on 17th May, 1967.

Comprising plurality of connected axially arranged reaction sections introducing means for make hydrocarbon and fuel, burning means of same, and quenching means of reaction effluent.

104767. International Standard Electric Corporation. Amplifier terminating network. (9th April 1965). Accepted on 12th May, 1967.

Comprising at least one bridge circuit having a first diagonal connected to a source of signals to be amplified or to a load circuit via a first reactance network and a second diagonal forming part of the feed back circuit.

104782. T. Kobayashi. Combination paper machine. Accepted on 12th May, 1967.

Having a horizontal row of web forming units, each comprising a horizontal cylinder with a flow box opening above it a feed role set a couch roll set on the cylinder opposite the feed roll across the cylinder and belt carried from over the feed roll along the lower side of the cylinder to the couch roll.

104785. Industriewerk Schaeffler O.H.G. Top roller for drafting mechanisms in spinning machines. Accepted on 18th May, 1967.

Characterised in the ball type rolling elements rolling directly on shaft race grooves, outer races made of sheet material having one rim for accepting axial forces and one rim of outer races forming a seal in confunction with shaft.

104811. G. Giori. Wiping system for removing ink from engraved surfaces of intaglio printing presses. Accepted on 11th May 1967.

Comprising at least one rotating wiping cylinder engaging the engrave surface and an aquous solvent bath between the 30°C and 80°C comprising a strong base, a detergent and a wetting agent.

104816. Chemische Werke Witten Gesellschaft Mit Beschrankter Haftung. Process for the manufacture of polyamide powders modified by finely divided fillers. Accepted on 16th May, 1967.

Comprises the reaction of diarylester of isophthalic acid and/or terephthalic acid, and/or aliphatic dicarboxylic acids with primary aliphatic and/or cycloaliphatic and/or araliphatic diamine in an inert solvent like benzene, wherein the filler is evenly dispersed in the said solvent by vigorous stirring prior to polycondensation.

104913. Ciba Limited. New Aryl-1, 3, 5-triazine derivatives, process for their manufacture and organic materials protected therewith. Accepted on 12th May 1967.

Introducing in a cyanuric halide, a six membered aromatic cyclic system containing a hydroxyl group, a heteroatom and alkyl, aralkyl or cyclo alkyl groups.

104970. Council of Scientific and Industrial Research. Dielectric-loaded waveguide type broadband e-plane ferrite resonance isolators for microwave frequencies. Accepted on 11th May, 1967.

Wherein the dielectric slab has a thickness within the limits determined by two equations.

104974. The Dow Chemical Company. Purification of aqueous caustic solutions. Accepted on 19th May, 1967.

By electrolysis of the solution in a cell having an anode and a mesh cathode ¼ to 4" thick fabricated of strands having cross sectional area equivalent to wire of 0.001 to 0.03" in dia. and a surface to volume ratio of 50 to 600 cu. ft. using a current density of 6 amps/sq. ft. of cathode surface.

105018. Societe De Constructions Electromechaniques Jeumontschneider. Track circuits without insulating joints. Accepted on 12th May, 1967.

Comprising a plurality of obliquely arranged short circuit connection between the rails of the track, a principal transmitter supplying disrupted pulses to the rails, additional pulse transmitters, pick ups located near the ends of each zone for receiving the pulses from the additional transmitters receiver means for independently determining the strength of the pulses.

105028. Pacific Research Laboratory. Writing ink. Accepted on 19th May, 1967.

Comprises an alkaline aqueous solution of a polyethyleneimine and a dyestuff.

105033. Jervis B. Webb Company. A movable track section for a carrier. Accepted on 16th May, 1967.

Comprising an elevator device including frame structure disposed to one side only of the path of carrier travel on the movable track section and a vertically movable carriage mounted on the frame structure.

105040. Daikin Kogyo Co. Ltd. Seedling planting machine. Accepted on 19th May, 1967.

Comprising means to convey a continuous band shaped, soil attached seedling to a cutting portion and cutting means to cut said seedling band by a blade operating at a constant cycle.

105099. Stamicharbon N. V. Spraying device. Accepted on 12th May, 1967.

Comprises a trough the bottom of it being formed of alternately positioned flat and corrugated plates successive corrugated plates forming an angle with the bottom of the trough which increases towards the end of the trough.

105224. Universal Oil Products Company. Radiation-type interface detector. Accepted on 19th May, 1967.

Comprising a vertical conduit in which exists a radiation source to emit radiation outwardly, a radiation detector to intercept radiation emitted from the said source, a drive means coupled to the said source and said detector and a read-out means electrically coupled to said detector.

105259. Societe Fives Lilie-Cail. Process and apparatus for drying a product suspended in a liquid. Accepted on 17th May, 1967.

Introducing plurality of liquid streams into axially rotating drier deflecting the streams radially away from said axis into engagement with inner surface of the wall means, through which liquid passes.

105424. M. D. Duran. Improvements in or relating to rapier looms. Accepted on 15th May 1967.

Having a flexible band type of rapier which is anchored at one end to a wheel which is movable with the sley, mechanism for rotating the wheel to project and retract the rapier.

105425. M. D. Duran. Improvements in or relating to looms with stationary weft supply. Accepted on 15th May, 1967.

Comprising a series of weft guides each of which is movable from an inoperative position where it holds its weft out of the path of the movement of the rapier to an operative position where it presents the weft to the rapier.

105689. Dunlop Rubber Company Limited. Method and apparatus for the assembly on a breaker element upon the carcass of a pneumatic tyre. Accepted on 16th May, 1967.

Comprising ring and an annular radially deformable transfer member having a radially-inner surface for gripping the breaker element which is of an internal diameter greater than the maximum external diameter of the carcass and applied breaker elements, securing means associated with said member.

105849. Rohm and Haas Company. Process of treating a fibre-forming syntheticliner polyamide. a light stabilized composition containing said linear polyamide and fibres of shaped articles made from said composition. Accepted on 12th May, 1967.

A light stabilized polyamide composition comprising a substantially colour-free fibre forming synthetic linear polyamide and manganous polyacrylate and/or polymethacrylate as a light stabilizer.

105960. Ciba Limited Process for hardening gelatine. Accepted on 19th May, 1967.

Comprises hardening gelatine by treatment with acylamino compound with α, β-ethylenically unsaturated α-halogen-carboxylic acid amide residues.

106011. Dynamit Novel Aktiengesellschaft. Process for the production of alkali metal hydrides in powder form. Accepted on 19th May, 1967.

The invention relates to the production of alkali metals hydride which comprises preparing pulverulent mixture of molten alkali metal and powdered alkali metal hydride and reacting this mixture with hydrogen to convert it to the corresponding alkali metal hydride.

106128. General Electric Company. Transformer core reinforcing plate. Accepted on 12th May, 1967.

Comprising plurality of by section a pair of yoke section a pair of elongated yoke clamps pair of elongated reinforced plates, a flat bar slotted longitudinally and clamping bolts.

106402. Siemens & Halske Aktiengesellschaft. Improvements in or relating to electric circuit arrangements. (21st April 1966). Accepted on 12th May, 1967.

Comprising a plurality of signal channels including a plurality of electronic sampling switches arranged in said signal channels a store which has a higher input impedance than each of the said channels and a further electronic switch by way of which the time division multiplexed signal is passed to said store.

106790. C. E. Bartens. Signal system for automobile. Accepted on 12th May, 1967.

First group of signal lamps visible from the left side and the front, a second group of signal lamps visible from the left side and from the rear, a third group of signal lamps visible from right side and from the rear, forth group of signal lamps visible from the right side and from the front, a direction indicator switch.

106911. K. K. Mehra. A car safety locking device. Accepted on 12th May, 1967.

Comprising an upper lock case for disconnecting the distributor said lock case being coupled with a lower casing which being housed with jet control system for disconnecting the flow of petrol to the carburator.

107095. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to hydrodynamic bearings. Accepted on 11th May, 1967.

Comprising a rotatable and stationary bearing members, a spiral groove in the cooperating surface of the bearing characterised in that the rotary bearing member provides a storage space for the lubricant.

107173. Lansing Bagnall Limited. Improvements in or relating to the mounting of electrical components. (27th September 1965). Accepted on 29th April, 1967.

At least a portion of the unit adjacent the edge having the contact is encapsulated in a body of insulating material which is arranged, when the contacts are in the sockets, to support the unit.

107699. Cheney Bigelow Wire Works Inc. Woven wire cloth for fourdrinier machines. [Addition to No. 100044]. [Divisonal date 8th August 1966]. Accepted on 12th May, 1967.

Comprising warp wires having hard inner core and an outer coating on said hard core the wires having a cross sectional area between 0.00001257 to 0.0002011 squar inches.

107856. Ringfeder G.m.b.H. Improvements in or relating to couplings. Accepted on 12th May 1967.

Device for supporting and centrally stabilising the coupling being arranged substantially parallel to a coupling arm and having more than two supporting point and being engaged on the one hand, directly on a bracket and on the other hand having an insert which is resistant to wear with a bearing block.

107923. Revnolds Metals Company. Heat exchanger construction and method for making the same. Accepted on 15th May 1967.

Drawing ironing and shaping the flange of the tubular member to form a fin having a surface area greater than the surface area of the flange from to which the fin is formed.

108120. James A. Jobling & Company Limited. Improvements in or relating to grinding machines. (29th November, 1965). Accepted on 16th May, 1967.

A grinding machine comprising a grinding member supported for swinging with its grinding face disposed in an upright plane.

110262. Automation Industries Inc. Ultrasonic inspection. [Divisional date 21st July 1965]. Accepted on 22nd April 1967.

Comprising a search unit for being coupled with workpiece, receiving means coupled to the search unit.

110418. Ciba Limited. Process for preparation of new aromatic phosphoric or phosphonic acid esters. [Divisional date 15th November 1965]. Accepted on 15th May, 1967.

Reacting R_1 (R_2Y)—$P^{III}X$—Hal with metal salt of 2, 5-dichloro-4-iodophenol, wherein R_1 is alkoxy, alkylthio, alkyl halogenalkyl or aryl; R_2 is methyl or ethly and X, Y represent oxygen or sulphur.

Correction of Clerical Error

(1)

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical error occurring in the application and Letters—Patent in respect of Patent No. 78602 was corrected on 18th May, 1967.

(2)

Under Section 62 of the Indian Patents and Designs Act, 1911 certain clerical errors occurring in the application, specification and Letters-Patent in respect of patent application No. 88587 was corrected on 19th May 1967.

(3)

Under Section 62 of the Indian Patents and Design Act 1911 certain clerical error occurring in the application specification and letters-patent of Patent No. 88653 was corrected on 18th May, 1967.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 61652—S. Ramanujam & another.

The patent ceased on the 6th September 1964, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 26th December 1964. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th July 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 80144—Sun Oil Company.

The patent ceased on the 8th January 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 27th May, 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th July 1967.

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 84945—Chandan Metal Products Private Limited.

The patent ceased on the 3rd November 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 27th May 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th July 1967.

(4)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 85760—Chandan Metal Products Private Limited.

The patent ceased on the 22nd December 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 27th May 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 15th July 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. Nos. 129824 and 129825. Lakhi Trading Company. An Indian Partnership Firm, Jai-Hind Estate, Bldg. No. 2, Shop No. 8 and 9, Bhuleshwar, Bombay-2, Maharashtra, India, "A container", November 29, 1966.

Class 1. No. 129826. Chuni Lal Savara, An Indian Citizen, 123, Mahatma Gandhi Road, Fort, Bombay-1, Maharashtra, India, "Peg Measure", November 29, 1966.

Class 1. Nos. 130127 and 130128. Krishnaiyer Raghavendran, 20 Peeran Line, Railway Station Road, Tiruppattur, North Acrot District, Madras State, India, Indian, "Coat-Hanger Stand", January 11, 1967.

Class 1. No. 130206. Flora Electrical Industries, an Indian Partnership Firm, 3 Malka Ganj Road, Delhi-7, India, "Electric Iron Clad Main Switch", January 20, 1967.

Class 1. No. 130210. Mandyam Annadhoray Sri Rama, Government Press, Bangalore-1, Mysore State, Indian, "Letter-Press Printing Types-full fount of different sizes", January 24, 1967.

Class 1. No. 130491. Virendra Kumar Jhamb, (An Indian Citizen), 211 (Frere Road, Bombay 1, Maharashtra, India, "Constructional Elements", February 24, 1967.

Class 1. Nos. 130606 to 130610. Elegant Industries Private Limited (A company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay 18 (Maharashtra), "Necklace", March 27, 1967.

Class 3. No. 129565. Simplex Industries, Sewaki Gali, Nagaur, (Rajasthan) an Indian Partnership concern, Indian, "Insulation Tube for Pliers", September 27, 1966.

Class 3. Nos. 129734 to 129736. Magaji Durgasa Ambaswamy, Indian Subject, Balepet, Bangalore-2, Mysore State (India), "Helmet", November 17, 1966.

Class 3. No. 129968. Unilever Limited, a Company registered under the laws of Great Britain, Port Sunlight, in the Country of Chester, England and also of Unilever House, Blackfriars, London, E.C. 4, England, "Bottle or like container", June 30, 1966. (United Kingdom).

Class 3. No. 130133. (Mrs). Ivy Wilson, a British Subject, 10 Kyd Street, Calcutta, West Bengal, India, "a device for turning over paper sheets", January 16, 1967.

Class 3. No. 130141. Winner Moulders, 10068 Street No. 1, Pahar Ganj (D. B. Road), New Delhi, an Indian registered partnership concern, Indian, "soap case", January 16, 1967.

Class 3. No. 130143. Bako-Plast Industries Private Limited New Delhi, An Indian Company, "Electric Wiring Bush", January 17, 1967.

Class 3. Nos. 130236. Colgate-Palmolive Company, 300 Park Avenue, New York, New York 10022, United States of America, "a bottle", January 28, 1967.

Class 4. No. 130238. Colgate-Palmolive Company, 300 Park Avenue New York, New York 10022. United States of America, "A bottle", January 28. 1967.

Class 5. Nos. 129937 and 129938. Metro Playing Card Company, Central Salsette Road, Kalina, Bombay-29, Maharashtra, an Indian partnerhsip concern. Metro Playing Card Company, Central Salsette Road, Kalina, Bombay-29, "playing cards", December 15, 1966.

Class 10. Nos. 130170 to 130172. Bata Shoe Company Private Limited, a private limited company incorporated under the Indian Companies Act, 30, Shakespeare Sarani in the town of Calcutta, West Bengal, "Footwear", January 19, 1967.

Class 12. No. 129820. Mr. E. R. Viccajee, Warden And Company Private Limited, Quay Street, Mazagaon, Bombay—10DD (Maharashtra State), Indian, "Polyethylene Drum tap with lock device" November 25, 1966.

Class 13. Nos. 130284 and 130287 to 130293. The Delhi Cloth & General Mills Co., Ltd., Indian Company, Post Box No. 1039, Bara Hindu Rao, Delhi-6, Delhi, "Textile piecegoods", February 4, 1967.

Class 13. Nos. 130376 and 130377. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", February 17, 1967.

Class 13. Nos. 130390 to 130418 and 130420 to 130429. Jiyajeerao Cotton Mills Ltd., Indian Company, Birlanagar (Gwalior), "Textile goods", February 18, 1967.

Class 13. No. 130530. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", March 6, 1967.

Class 13 Nos. 130569 and 130571 to 130573. The Crown Spg. & Mfg. Co., Ltd., Gokhale Road (South), Parel, Bombay 13, Maharashtra Nationality—Indian Company, "Textile goods", March 22, 1967.

Class 13. Nos. 130583 and 130584. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", March 25, 1967.

Class 13. Nos 130625 to 130643. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay-1, Indian Company, "Textile piecegoods", March 27, 1967.

Class 13. Nos. 130711 to 130722. The Khatau Makanji Spg. & Wvg. Co., Ltd., Laxmi Building, 6, Ballard Road, Bombay 1, Indian Company, "Textile piecegoods", April 18, 1967.

Class 14. Nos. 130495 and 130496. The Victoria Mills Limited, an Indian Company, De Lisle Road, Parel, Bombay-13, "Textile piecegoods", February 27, 1967.

THE PATENT OFFICE

Patents and Designs

Calcutta, the 10th June 1967

CORRIGENDUM

In the Gazette of India Part III, Section 2 dated the 1st April 1967.

In page 139 column 2 under the heading "Applications Accepted".

Against No. 101473—

for "(10th September 1964)"

read "(7th April 1965)".

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

20th May 1967

110734. Hindustan Lever Limited. Detergent composition. (27th May 1966).

110735. B. L. Sood. Sood automatic postage defacer.

110736. M. Narayanaswamy. Improvements in or relating to emergency lighting apparatus.

110737. T. Satake. Combination of grinding and friction-type rice polishing machine.

110738. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to push-pull amplifiers including transistors.

110739. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing crystalline bodies consisting of one or more chalcogenides of elements from the group IIIB of the periodic system or of mixed crystals thereof and to bodies obtained by these methods.

110740. Societe Civile D'etudes De Centrifugation. Improvements in or relating to the uninterrupted feed of a continuous rotary casting device.

110741. Girling Limited. Improvements in or relating to disc brakes. (30th June 1966).

110742. Caterpillar Tractor Co. Face drive mechanism for friction welders.

110743. Sri B. Barthakur. Machine for shelling paddy by emery and rubber drum method.

110744. Sri B. Barthakur. Machine for grading of paddy and similar grains by means of screw conveyor and its rotating casing.

22nd May 1967

110745. Shri V. Almeida. Semi-self indicating weighing scales.

110746. V. S. Menon. Induction type automatic power factor regulator.

110747. The British Iron and Steel Research Association. Spray refining. (23rd May 1966).

110748. The British Iron and Steel Research Association. Spray refining. (23rd May 1966).

110749. Steatite and Porcelain Products Limited. Improvements in and relating to electrical high voltage insulators. (26th May 1966).

110750. The P. & M. Co. (England) Limited. Improvements in or relating to apparatus for applying liquid to the rails of railway tracks. (25th May 1966).

110751. The Babcock & Wilcox Company. Apparatus for making fibres.

110752. L. Greenberg. Improvement in bogies for railway cars.

110753. Asahi Kasei Kogyo Kabushiki Kaisha. A process for preparing charcoal from sawdust moldings and an apparatus therefor.

110754. Rikagaku Kenkyusho. Novel antibiotics polyoxins D, E, F, G and H and process for preparing the same.

110755. General Electric Company. Improvements in or relating to: method and apparatus for developing coils in inductive devices.

110756. American Cynamid Company. Novel ruminant feed supplement.

110757. E. Merck Aktiengesellschaft. Mucous membrane constricting agents for local application.

110758. Owen Clifford Stean and Fumigators (India) Private Limited. Fumigator.

110759. J. Rawlings. New composition having insecticidal, pesticidal and rodenticidal properties.

110760. Rank Xerox Limited. Automatic toner dispensing control.

110761. Foseco International Limited. Fibre-containing heat-insulating compositions.

110762. The Dow Chemical Company. Process for making polymer beads of vinyl aryl monomers.

110763. Estrela Batteries Limited. Improvements in or relating to metal clad construction for primary electric dry cells.

110764. Palitex Project-Company G.m.b.H. Double twist spinning machine.

23rd May 1967

110765. T. R. Kirad and G. V. Sathe. An improved process for reducing wastage in Engg. industry and rejection of mechanical castings.

110766. T. R. Nayak. A new method for raising to higher level of matter, i.e. solids, liquids & gases.

110767. Asta Werke Aktiengesellschaft. New basic esters and process for the production thereof.

110768. Ciba Limited. Process for rendering cellulosic fibers flame-resistant.

110769. Sandoz Ltd. Improvements in or relating to organic compounds. (24th May 1966).

110770. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Benzenesulfonyl ureas and process for their manufacture.

110771. The Babcock & Wilcox Company. Metal treating.

110772. The Standard Oil Company. Oxydehydrogenation process. (2nd June 1966).

110773. Beecham Group Limited. Naphthylene derivatives. (24th May 1966).

110774. R. G. DePenning. Pouring nozzle for continuous casting of liquid metal or ordinary steel.

110775. Egyesult Gyogyszer Es Tapszergyar. New derivatives of aminoalkyl pyridines and process for their preparation.

110776. C. Pasquale and A. C. Pasquale. Improvement in suction head lifting devices for the plants manufacturing asbestos cement slabs.

110777. C. Pasquale and A. C. Pasquale. Improvements in suction head devices for lifting and displacing plastic fibrocement slabs and for forming corrugations therein.

110778. C. Pasquale and A. C. Pasquale. Improvement in processes and plants for manufacturing asbestos cement slabs, more particularly corrugated fibrocement slabs.

110779. N. V. Philips Gloeiampenfabrieken. Improvements in or relating to radio transmission system and transmitters and receivers for transmission of stereophonic signals to be used in these systems.

110780. Joseph Lucas (Industries) Limited. Stator assemblies for dynamo electric machines. (27th June 1966).

110781. Ugine Kuhlmann. Improvements to the purification of nitriles.

110782. Shell Internationale Research Maatschappij N. V. A process for the preparation of 2-exo-4, 5, 6, 7, 8, 8-heptachloro-4, 7 methano-3a, 4, 7, 7a-tetrahydroindane. [Addition to No. 91031].

110783. Luwa AG. Pneumatic cleaner for roving frames, fly frames, and the like.

110784. Farbenfabriken Bayer Aktiengesellschaft. N-substituted phthalimides. (27th May 1966).

24th May 1967

110785. Marshall's Tea Machinery Company Limited. Improvements in and relating to tea-drying machines. (24th May 1966).

110786. Libbey-Owens-Ford Glass Company. Bending mold.

110787. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Water-soluble monoazo-dyestuff and process for its preparation.

110788. Siemens Aktiengesellschaft. Improvements in or relating to rack and tray assemblies for electrical equipment. (1st February 1967).

110789. Gosudarstvenny Vsesojuzny ordena Krasnogo Znameni proektny i nauchno-issledovatelsky institut tsementnoi promyshlennosti. Device for processing fine-grained materials in gas flow, particularly for preheating cement raw mix.

110790. Gosudarstvenny proektny institut Tyazhpromelektroproekt. Method of continuous longitudinal uneven gauge of metal strips rolled on continuous hot hills and apparatus for realization of said method.

110791. C. K. D. Praha, Oborovy Podnik. Stuffing box seal of stems particularly for internal combustion engines.

110792. Bristol-Myers Company. Process for the preparation of antibacterial agents.

110793. Zinser Textilmaschinen G.m.b.H. Apparatus for removing rods from tubes [Divisional date 13th June 1965].

110794. Beecham Group Limited. Antibiotic. (25th May 1966).

110795. The Electric Furnace Company. Furnace heating control.

110796. Ciba Limited. Process for the manufacture of acylamino compounds.

110797. J. R. Geigy A. G. Chemical products and processes. (25th May 1966).

110798. Shell Internationale Research Maatschappij N. V. Emulsifying agents. (26th May 1966).

110799. The Dunlop Company Limited. Wash pad blanket (26th May 1966).

110800. J. K. Smit & Sons, Diamond Tools Limited. Improved diamond drill bit.

110801. Rohm and Hass Company. Unsaturated acids and aldehydes.

110802. A. G. Eickmeyer. Method for prevention of corrosion in carbon dioxide removal systems. (24th June 1966).

25th May 1967

110803. Council of Scientific and Industrial Research. Epi-arm speed reducer.

110804. Council of Scientific and Industrial Research. Epi-annulus speed reducer.

110805. Council of Scientific & Industrial Research. A process for treating cellulosic textile materials and products therefrom.

110806. Veb Deutsches Hydrierwerk Rodleben. Process for the production of basically substituted phthalazone.

110807. Carter-Wallace, Inc. Xerosin Fractions and method of preparation.

110808. Ciba Limited. 4-trifluoromethyl-anthranilic acids.

110809. Dr. A. Wander S. A. 6-basic substituted morphanthridines and process for the preparation thereof.

110810. Aziende Chimiche Riunite Angelini Francesco. Indazole-3-yl-oxyalkanoic acids and process for the preparation thereof.

110811. C. F. Boehringer & Soehne GmbH. A process and diagnostic agents for the detection of hepatitis (23rd March 1967).

110812. M. R. Surendranath, T. Lakshminarayana, R. K. Viswanadham and S. T. Rao. Improvements in or relating, to decuticling of sesame seed.

110813. Rhone-Poulenc S. A. Gas-liquid contact apparatus.

110814. The Dunlop Company Limited. Improvements in mechanical belting. (27th May 1966).

110815. C. A. V. Limited. Liquid fuel pumping apparatus. (31st May 1966).

110816. Rockwell-Standard Corporation. Brake camshaft mounting.

110817. Caterpillar Tractor Co. Earthmoving Scraper Bowl suspension with safety features.

26th May 1967

110818. J. E. Das. A transparent self-filler fountainpen. [Addition to No. 81157].

110819. Shri R. Y. Kulshrestha. Improved temperature compensated clock pendulum.

110820. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Dyeing process.

110821. Carlisle Chemical Works, Inc. New organotin compositions.

110822. Ciba Limited. Process for the manufacture of physiologically active peptides having a prolonged action.

110823. Ciba Limited. New coloured fatty substances and process for their manufacture.

110824. Krka Tovarna Zdravil. Process for preparation of 1-(2'-hydroxyethyl)-2-methyl-5-nitroimidazole.

110825. Knapsack Aktiengesellschaft. Process for impregnating red phosphorus.

110826. Ciba Limited. Manufacture of new sugar derivatives.

110827. Ciba Limited. New 3-oxo-a-nor-b-homo-pregnadienes and process for their manufacture.

110828. Ciba Limited. New 6-oxo-a-nor-b-homo-pregnadienes and process for their manufacture.

110829. Scherico Ltd. Process for the preparation of 9 α-halogeno-11β-substituted steroids.

110830. Svenska Aktiebolaget Bromsregulator. Automatic slack adjusters for vehicle brake linkages. (27th May 1966).

110831. Imperial Chemical Industries Limited. Pyrimidine derivatives. (17th June 1966).

110832. Farbenfabriken Bayer Aktiengesellschaft. Kallikrein Inactivator. (15th February 1967).

110833. Dr. A. Szegvari. Agitator for use in producing liquid dispersion. [Divisional date 29th October 1965].

Alteration of date

99929. Post-dated to 10th August 1965 under Section 5 of the Act.

109067. Ante-dated to 12th August 1965 under Section 5 of the Act.

110439. Ante-dated to 6th August 1965 under Section 5 of the Act.

109792. Ante-dated to 9th August 1965 under Section 5 of the Act.

109712. Ante-dated to 9th August 1965 under Section 5 of the Act.

106986. Ante-dated to 15th December 1965 under Section 5 of the Act.

109895. Ante-dated to 22nd December 1965 under Section 5 of the Act.

102673. The claim to priority date 24th November 1964 has been disallowed and the application dated as of 24th November 1965, the date of filing in India.

101766. The claim to priority date 23rd September 1964 has been abandoned and the application dated as of 23rd September 1965, the date of filing in India.

103140. The claim to priority date has been altered from 19th May 1965 to 24th December 1964.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patent's office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in cresment brackets are the dates allowed under Section 78-A of the Act.

99929. Scientific Mechanic Works. A bearing unit for spindles of spinning or twisting frames. Accepted on 10th May 1967.

The damping coil is held at upper end in a seat in the housing and lower end by a retaining lodge and rounded lower end of foot step bearing is seated on a supporting disc.

100981. The English Electric Company Limited. Improvements in or relating to insulating materials and to processes for production thereof. (17th August 1964). Accepted on 6th May 1967.

Comprising a backing material in suspension between anode and cathode on which when a d.c. potential is applied causes insulating flakes or fibres which are in the liquid to deposite on said backing material.

101083. Indian Oxygen Limited. Improvements in electric arc welding. (19th August 1964). Accepted on 11th May 1967.

Comprising a primary power source, secondary power source, transformer connected to rectifier output leads, controlled rectifier trigger circuit.

101096. British Industrial Plastic Limited. Treatment of oxymethylene polymers. (23rd November 1964). Accepted on 12th May 1967.

The polymeric treated with ethylene imine.

101113. Porous Plastics Limited. Improvements relating to the production of microporous polymeric plastics materials. (13th August 1964). Accepted on 15th May 1967.

Comprises forming a mixture containing at least one natural or synthetic polymeric working material a removable particulate solid filler and a solvent for the working material, shaping the mixture, coagulating the working material and then removing the solvent and also the filler by exposing the shaped mixture to a backing agent which is not solvent for the working material.

101114. Porous Plastics Limited. Improvements relating to the production of flexible vapour permeable sheet materials. (13th August 1964). Accepted on 15th May 1967.

Comprises impregnating fibrous sheet material with a solution of working material containing removable solid particulate finely divided filler, insoluble in the solvent and which is removed after the removal of the solvent by backing with a liquid which is non-solvent for the working material and the fibrous sheet material.

101145. Western Electric Company, Incorporated. Data handling system. (13th October 1964). Accepted on 16th May 1967.

Comprising a processor arrangement including a memory arrangement, a control arrangement transmission circuits an input system and an output system.

101149. Western Electric Company, Incorporated. Communication switching system. (13th October 1964). Accepted on 16th May 1967.

Comprising a plurality of communication path circuits, a switching network, a programme controlled processor comprising a memory system and a control arrangement for obtaining information.

101158. G. S. K. M. Rao. Improvements in or relating to electric and/or electro-magnetic motive power sources. Accepted on 16th May 1967.

Comprising two member which co-act with each other, member may be charged with like of unlike charges, or magnetised with like as unlike polies to get motion chamber means, ship's structure jet discharge opening.

101232. T. L. Chudiwala. A process for production of a mixture of monocyclic terpenes from turpentine. Accepted on 21st May 1967.

Comprises treating the turpentine oil with an acid catalyst.

101266. Veb. Elektro-Apparate-Werke Berlin-Treptow. Brake magnet assembly for electricity meters. Accepted on 24th May 1967.

A double track brake magnet assembly where the pole surfaces of the magnet are unsymumetrically arranged with reference to their centre of rotation.

101356. Rohm & Hass Company. Preparation of phosphorimidic triamide salts. [Addition to No. 91697]. Accepted on 19th May 1967.

N, N', N", N"'-tetrakis (1, 1, 3, 3-tetramethylbutyl) phosphorimidic triamide hydrochloride is reacted with an alcoholic solution of sodium ethoxide.

101424. Standard Telephones and Cables Limited. Wire wrapping bit. (4th September 1964). Accepted on 20th May 1967.

Includes a hole at its front end which can receive a terminal a first cutter formed by a slot in a disc like; portion surrounding said hole.

101497. Inland Steel Company. Method of protecting ferrous metal surface. Accepted on 24th May 1967.

Method of protecting ferrous metal surface by zinc coating wherein zinc also contains 1 to 4% of magnesium and at least 0.05% of aluminium for effective protection.

101584. Ministerul Petrolului. Collapsible derrick for drilling. Accepted on 24th May 1967.

Upper elements of the derrick columns are together joined by a crown water table by means of articulations, crown block being mounted on said water table a movement equalizing mechanism is provided between said articulations.

101644. C. S. Rao. Improvements in or relating to steam cookers. Accepted on 22nd May 1967.

Comprising an outer vessel of four or six panels or sides and a flap or door for slipping into the channels.

101702. F. R. Reston. Electric generator. Accepted on 19th May 1967.

Comprising magnets and armature cores associated with it and through them magnetic flux can be passed, said cores being encircled by tubes of magnetic material and means for diverting the flux paths, and for controlling the effect of the flux decay in direction of the flux path so as to assist the flux diversion.

101839. Fiber Industries, Inc. Annular melt spinning apparatus for spinning synthetic fibres. Accepted on 20th May 1967.

Including a spinneret containing a plurality of orifices for shaping filament forming material as molten polymer is extruded there through wherein the spinning pack is confined in an annular shape, a granular bed of finely divided inert material, inlet and outlet means for the polymer.

102156. Imperial Chemical Industries Limited. Stabilisation of polymeric materials containing ester groups. (21st October 1964). Accepted on 23rd May 1967.

Comprises incorporating into the polymeric material a mono-carbodimide.

102248. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the manufacture of paraffin sulfonic acids. Accepted on 27th April 1967.

Reacting under exposure to photo-active rays and in the presence of water by simultaneous action of sulfar dioxide and oxygen on paraffin hydrocarbons separated from petrolium fractions.

102455. J. A. Eastwood. A device for pre drying tea leaf for feeding to for example a tea processing machine. Accepted on 10th May 1967.

Comprising a casing enclosing a continuous chain conveyor for a plurality of trays with perforated bottoms of tea leaf to be dried, an inlet for hot air/gas, an inlet for feeding tea-leaf and an outlet for discharge of tea leaf.

102496. Scientific Adviser to the Defence Minister. A composition for the removal of cured epoxy resin on a metal surface. Accepted on 12th May 1967.

A comprising aldehydes such as furfuraldehyde, formaldehyde hydroquinone and a solvent e.g. rectified spirit.

102539. W. R. Grace & Co. Novel herbicidal compositions. Accepted on 16th May 1967.

Comprises as least one benzyl cyanide such as 2-chlorobenzyl cyanide and a carrier.

102542. Lindauer Dornier Gesellschaft m.b.H. Improvements in or relating to a shuttleless weaving machine. (28th September 1965). Accepted on 16th May 1967.

Wherein each gripper bar has a hollow profile and is driven by a pinion which engages a rack mounted inside the profile through a slot.

102550. United Aircraft Corporation. Improvements in and relating to cathode structures, and apparatus for generating an electron beam including the same. Accepted on 16th May 1967.

Comprising a substantially annular hollow metallic element containnig an elongated aperature along at least a portion of its surface and extending about the centre of the element.

102563. Abg-Werke Gesellschaft Mit Beschrankter Haftung. Self-propelling paving machine. Accepted on 17th May 1967.

Comprising a beam vibrating to have a horizontal component and a compacting blade acting normal to the surface of the paving material.

102572. Jervis B. Webb Company. Wheeled vehicle conveyor apparatus. Accepted on 18th May 1967.

Comprising an endless overhead conveyor above in surface over which the vehicle can roll, said conveyor including carriers having load supporting structure including a depending portion and means on said structure for suspending the vehicle.

102593. J. Meimberb. Process and apparatus for spinning staple fibres. (7th January 1965). Accepted on 20th May 1967.

Comprising delivering a sliver to a separation roller, separating individual fibres, accelarating the individual fibres, deltvering the individual fibres to a hollow body member forming thereat a fibre ring and withdrawing a yarn out of the fibre ring.

102601. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S. p. A. Method for purifying dimethylformanide recovered from acrylonitrile polymerigation processes in the commercial production of polyacrylonitrile fibres and yarns. Accepted on 20th May 1967.

By the treatment of impure dimethyl formamide by contact with ion-exchange resins.

102646. Joseph Lucas (Industries) Limited. Oxygen electrodes. Accepted on 22nd May 1967.

Consisting of a porous plate formed from a mixture of silver and an alloy of silver and cadmium.

102648. Joseph Lucas (Industries) Limited. Method of manufacturing oxygen electrodes. Accepted on 22nd May 1967.

Comprising grinding an alloy of silver to form a powder, mixing the powder with powder silver, pressing the mixture to form a plate, and sintering the plate to form the electrode.

102656. Rexall Drug and Chemical Company. Polymerization of 1-olefinic monomers and catalyst therefor. Accepted on 24th May 1967.

Comprises in the process of polymerization of 1-olefinic compound under a pressure of at least 1 atmosphere using $3TiCl_3$ $AlCl_3$ catalyst in conjunction with al-alkyl halide an improvement which characterized in adding substantially dry calcium oxide to the catalyst components before charging to the polymerization reactor.

102673. The British Petroleum Company Limited. Plant growth regulant material. Accepted on 24th May 1967.

Comprises an aromatic containing petrolium fraction containing in chemically bound form at least one of the essential plant nutritive elements selected from nitrogen, phosphorus, sulphur or potassium and/or atleast one of the ionic group selected from amino, nitro, hydroxylamino etc.

102713. Shell Internationale Research Maatschappij N.V. Process for the separation of a wax-containing mixture. Accepted on 22nd May 1967.

Separating wax-containing mixture in hydrocycloric zone into underflow stream and overflow stream, part of the underflow stream from a secondary hydrocyclonic zone combined with that from the overflow stream, combined stream fed into adjacent secondary zone.

102752. Artos Dr. Ing. Meier-Windhorst K. G. Device for guiding lengths of textile materials. Accepted on 24th May 1967.

Wherein vertical screening walls are arranged above and advantageously also below narrow horizontal holding elements for pin bars and the screening walls forms gaps with the holding elements.

102756. Allied Chemical Corporation. Process for the purification of crude aqueous malic acid liquors. Accepted on 19th May 1967.

Comprising contacting crude aqueous malic acid liquor with a weakly basic anion exchange resin.

102793. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing polepiece units for magnetic heads. Accepted on 20th May 1967.

Comprises a stock of at least three plates made sintered oxidic feromagnetic material provided with at least one accurately processed surface.

102936. International Standard Electric Corporation. Automatic telecommunication switching system. Accepted on 20th May 1967.

Comprising a source of selection information a group of first circuits a group of second circuits comprising registering means.

103005. J. P. Singh. Rotary-hoe. Accepted on 23rd May 1967.

Comprising a gear box, a variable pitch pulley driving the input shaft of the gear box, the output shaft of said box operating the differential of the tractor rear wheels, the pitch of said pulley being controlled by a linkage assembly operated by a lever.

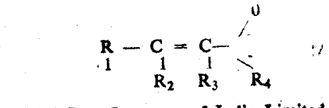
103074. Pickands Mather & Co. Pelletizing relative coarse iron minerals. Accepted on 25th May 1967.

Comprising drying and dry grinding the material, moistening the same feeding of together with moistened earthy material through a balling device, screening out undersized balls in the discharge moistening there surface with water returning them for repeated feed until balls of predetermined size are obtained and subjecting the balled product to thermal induration treatment.

103140. Imperial Chemical Industries Limited. Melt spinning process to produce polyester filaments and fibres. (24th December 1964). Accepted on 19th May 1967.

Extruding through spinneret with 0.2-12 sq. mm. range orifices, attenuating each polymer stream with length wise force at 0.1-4.0 g the flow rate and treating solidified polymer with quenching fluid at 45-180 metre/mt. speed.

103181. International Harvester Company. Base cutter height indicator for cane harvesters. (29th December 1964). Accepted on 22nd May 1967.



Comprising a ground engaging skid, suspended from the harvester frame, an indicator scale mounted on the frame and a pointer connected to the skid plate for registering the movement thereof on the said scale which shows the height of the cutter above the ground.

103182. International Harvester Company. Improved topping mechanism for cane harvesters. (29th December 1964). Accepted on 22nd May 1967.

Comprising a cutter, a pair of gathering members on either side of the cutter, fingers being projected outwardly from the periphery of each gathering member and drive means coupled to said cutter and gathering members.

103199. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to acid eletroplating baths for depositing tin. Accepted on 23rd May 1967.

Containing tin ions, sulphate, sulphonate fluoborate ions, reducing agent and brightening agent of formula

103212. The Metal Box Company of India Limited. Improved thermoplastic neck and cap assembly of a container. Accepted on 24th May 1967.

Comprising the cap assembly being in slidable engagement with neck assembly characterised in that the said neck being provided with a weakening line, so that when fitted onto a container the neck and cap assembly can not be removed therefrom without rapture.

103264. General Dynamics Corporation. Fabrication of large flat bearings. Accepted on 23rd May 1967.

Bearing comprising at least two flat bearing segments having a flat bearing surface and means for retaining the segments in assembled relation.

103377. Ateliers De Constructions Electriques De Charleroi (Acec.). Device for verifying that signal lights are operating correctly. Accepted on 22nd May 1967.

Includes a saturable transformer having primary, secondary and a pair of saturating windings being would in opposetion.

103378. **Dana Corporation.** Improvements in or relating to a torque transmitting slip connection. Accepted on 20th May 1967.

Comprising inner and outer members with relative axial movement characterised in that plastics material is interposed in between the members.

103447. **Acf Industries, Incorporated.** Fuel pump. Accepted on 20th May 1967.

Including a pumping chamber of variable volume having inlet and outlet with checkvalves located therein each valve including a seatmember and a closure member urged against the former by resilient means.

103474. **Dow Corning Corporation.** Bearing structures. Accepted on 18th May 1967.

Consisting of (a) 5 to 25 weight % of a cured siliconeresin, (b) 70 to 90 weight % of a dry lubricant, (c) 0 to 15 weight % of thermosetting organic resin and (d) 0 to 7 weight % of finely divided aluminium.

103607. **Union Carbide Corporation.** Hermetically sealed evacuated thermal insulating structure. Accepted on 23rd May 1967.

Characterised in that one of the wall enclosing the space is formed of a three layer laminate consisting of layers of polyethylene terepthulate or polyethylene, lead or tin foil and polyethylene terepthalate.

103655. **Vereinigte Osterreichische Eisen-und Stahlwerke Aktiengesellschaft.** Process for the production of steel and plant for carrying out this process. Accepted on 22nd May 1967.

Process for the production of steel comprising refining the melt in two furnace vessels with a communicating duct, by top blowing oxygen wherein the waste gas is burnt to preheat charging materials.

103675. **Veb Chemiefaserwerk Schwarza "Wilhelm Pieck".** Method of production of curled spun filaments and fibres. Accepted on 22nd May 1967.

Using polymers of at least two components, component with lower D.p. being uniform in its polymolecularity and the components with higher D.p. being much less uniform.

103703. **M & T Chemicals Inc.** Production of organot in compounds, particularly triorganotin sulfates and sulfites. Accepted on 19th May 1967.

Reacting triorganotin oxide with alkali metal hydrogen sulfate or sulfite inpresence of water.

103803. **N. V. Philips Gloeilampenfabrieken.** Improvements in or relating to amplifiers. Accepted on 20th May 1967.

The winding of the in put transformer connected to the control electrode is shunted by series combination of at least one inductor and a resistor.

103821. **Sandoz Ltd.** Water-soluble cupriferous disazo dyes, process for their manufacture, process for dyeing materials and materials dyed or padded therewith. Accepted on 19th May 1967.

Comprising coupling a diazo compound of aniline or naphthylamine carrying a hydroxy or alkoxy group in the O-position to the amino group with cupriferous monazodyestuff of =1-hydroxy-5-amino naphthalene-3-sulphonic acid and converting the resulting dye into copper complex.

103870. **Shell Internationale Research Maatschappii N. V.** Lubricating oil compositions with improved high-pressure performance. Accepted on 22nd May 1967.

Comprising lubricating oil as base oils and basic metal salts of organic acids as high pressure component.

104034. **Fmc. Corporation.** Method of producing absorbent fibrous mats and absorbent fibrous mats so produced. Accepted on 22nd May 1967.

By freezing aqueous acidic disperson of collagen in a mold, collagen being microcrystalline and 10% consisting of aggregate bundles of tropocallagen units of particle size not exceeding one micron.

104081. **F. Urbanek. and A. K. Mullick.** Improved hoist. Accepted on 24th May 1967.

Having a winding drum for raising and lowering a load, the said drum being motor driven through a worm and gear wheel combination and in which the worm shaft being provided with unidirectional brake means

104083. **Chemische Werke Witten Gesellschaft Mit Beschrankter Hoftung.** Process for the production of polyamides reinforced with inorganic fibres. Accepted on 24th May 1967.

Characterizes in uniformly distributing the inorganic fibre material in the inert solvent prior to the polyamide condensation and thereafter the reaction is carried out in their presence.

104088. **Farbenfabriken Bayer Aktiengesellschaft.** Acaricidal Compositions. (25th November 1965). Accepted on 19th May 1967.

Comprises at least one 3, 5-dihalo aniline such as 3, 5-dichloro-4-methyl mercapto aniline and a solid diluent or carrier.

104109. **V. D. Hukerikar.** Improved rickshaw or like vehicle. Accepted on 23rd May 1967.

Prime mover driving a shaft to whose ends two pulleys being rigidly jitted, the pulleys transmitting the power of the prime-mover through the shaft by direct or flexible coupling and with fixed reduction gearing to drive two free wheels which in turn drive the sheels of the vehicle.

104197. **Farbenfabriken Bayer Aktiengesellschaft.** Process for the preparation of polymers or copolymers capable of being cross-linked and polymers obtained by said process. (30th December 1965). Accepted on 23rd May 1967.

Comprises polymerizing of an unsaturated polymerizable monomer containing at least one N-alkoxy—methyl urethane or N-alkoxy methyl urea group with at least one other unsaturated polymerizable monomer.

104223. **R. Bind.** Means for holding a shallow work piece on a lathe headstock. Accepted on 23rd May 1967.

Comprising a roller contactable with, and rotatable by contact with, an area of the outer surface of the work piece away from its centre.

104308. **Reckitt & Colman (Overseas) Limited.** Improvements in or relating to disposable one-shot applicators for liquids, pastes or other flowable substances. (18th March 1965). Accepted on 24th May 1967.

Comprising a reservoir, forming a handle and being compressible to dispense a substances contained therein out of a mouth into a permeable applicator-pad second over the mouth.

104348. **Chemical Construction Corporation.** Process for crystallizing urea. Accepted on 23rd May 1967.

A process of urea crystallization from high biuret solution followed by electriation of the resulting crystal slurry employing make up aqueous urea solution in a counter current crystal wash step.

104398. **N. V. Philips Gloeilampenfabrieken.** Improvements in or relating to transmitting device for the transmission of amplitude modulated oscillations. [Addition to No. 799761. Accepted on 20th May 1967.

Characterized in that the input of the limiter has connected to it an additional correcting device.

104409. **Ahmedabad Textile Industry's Research Association.** Improved device for producing durable creases in textile fabrics. Accepted on 23rd May 1967.

Comprising two metal tubes for applying pressure locally in the immediate neighbourhood of a fold in said fabric where the crease is desired.

104427. **Standard Telephones and Cables Limited.** Improvements in or relating to signal translating apparatus. (22nd March 1965). Accepted on 20th May 1967.

Includes a bistable element, switching means and an energy dissipating element coupled to the bistable element.

104431. **S. M. Zandmer.** Well completion apparatus. Accepted on 24th May 1967.

Comprising a bore-hole casing and a duct-forming device of acid resistant metal being secured to the casing, the said device includes a terminal sleeve which is blocked by an acid soluble metal plug and a safety cap secured to the duct forming device having valve controlled narrow passage permitting fluid-flow.

104590. **Sir Robert McAlpine & Sons Limited.** A pressure vessel. (14th April 1965). [Additional to No. 827101. Accepted on 23rd May 1967.

Concrete monolith is formed with an annular extension of the wall of the cylinder projecting axially beyond the periphery or adjacent part of outer end surface of the adjacent end slab.

104736. **S. M. Junaiah.** Pivot hinge fixtures. Accepted on 20th May 1967.

For panels of door or the like comprising a fixing member secured to the panel and a pin secured to the fixing member at right angles and disposed in a bore of the sill.

104794. **Radio Corporation of America.** Interstage coupling circuit for transistor amplifiers. Accepted on 20th May 1967.

Comprising a first and second transistor a capacitor an inductor and a resistor all serially connected to form three junctions.

104973. **Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning.** Water-soluble metal-containing disazo dyestuffs, process for preparing them and textile fibrous materials dyed or printed by a process using said dyestuffs. Accepted on 24th May 1967.

Coupling a complex copper, chromium or cobalt compound of a monoazo dyes, with a diazotised amine in a weakly acid medium.

105021. **Ascu Wood Products Pvt. Ltd.** Apparatus for operating a damper of a flue or chimney. Accepted on 22nd May 1967.

Comprising a fluid motor, an electrically operated valve and a thermostat.

105142. **Aug. Gundlach GmbH.** Method and apparatus for producing shaped members from a mouldable refractory material. Accepted on 23rd May 1967.

Method of producing a shaped member of refractory material wherein a solid core is placed in a mold and annular space is filled with refractories and then solid core is replaced by elastic pressing core.

105150. **The Dow Chemical Company.** Preparation of sulfo esters of α-methylene carboxylic acids. Accepted on 19th May 1967.

Comprising reacting 3 to 10 moles of α-methylene carboxylic acid with one mole of hydroxyalkane sulfonic acid and removing the water present or formed by azeotropic distillation with unreacted α-methylene carboxylic acid.

105220. **Rohm and Haas Company.** The preparation of acrylic acid. Accepted on 19th May 1967.

Propylene, oxygen and water are reacted in the presence of a catalyst composition comprising cobalt molybdate and copper telluride.

105292. **Westinghouse Electric Corporation.** Improved orifice construction for gas-blast circuit interrupter. Accepted on 23rd May 1967.

Comprising a metallic ring disposed adjacent the throat portion of the orifice to minimize breakdown action of a restriking streamer.

105328. **K. G. Nayar.** Shielded radio inductance. Accepted on 18th May 1967.

Formed by winding an inductance coil on a former, in two sections separated by a space between them but connected in series, and two shield coils wound on the former in the space between the sections of the inductance coil with the ends of shield coils interconnected and further connected to one end of the inductance coil.

105351. **Aktiebolaget Svenska Flaktfabriken.** Cyclonic separator. Accepted on 24th May 1967.

Comprising a cylindrical casing, provided with an inlet portion including two inlets for crude gas, a central tube for the discharge of clean gas and an outlet for separated dust.

105395. **Paillard S. A.** Control mechanism for the type bars of a typewriter. Accepted on 18th May 1967.

Comprising a movable basket, type bars pivoted on said basket control means for shefting said basket from a first position into a second position and vice versa, very levers and movable rake.

105798. **N. V. Philips' Gloeilampenfabrieken.** Improvements in and relating to manufacture of insulated gate field effect transistors. (22nd June 1965). Accepted on 23rd May 1967.

Comprising a cavity on a semi conductor body of one conductivity type, cavity is filled by other semiconductor material, drain region patterned conductive layer is provided on an insulating layer gate electrodes.

105809. **United States Steel Corporation.** Roll seal for vacuum strip-treating chamber. Accepted on 20th May 1967.

Sealing the entrance and exit of a vacuum strip-treating chamber comprising a box with entry and exit slot and a roll housing inside with closely adjacent parallel rolls so that clearance for strip is afforded by gap between rolls.

106417. **Ampex Corporation.** Electronic editing system for video tape recordings. Accepted on 20th May 1967.

Comprising tachometer means coupled to, said drum means, servo control means, an editing system responsive to an initiating signal and comprising a counter means, means responsive to the initiating signal, means responsive to a predetermined number of tachometer pulses.

106523. **Pradip Plastic Moulders.** Improved loose leaf filing clip. Accepted on 24th May 1967.

Comprising a base plate means and a slidable upper plate with at least one pair of half-round rings on each said plate means and slidable arrangement between the said two plate means.

106606. **Pechiney—Compagnie De Produits Chimiques Et Electrometallurgiques.** A process for the production of purified aluminium nitride from impure aluminous materials. Accepted on 22nd May 1967.

Producing aluminium nitride freed from iron, silicon and titanium by treating with carbon at elevated temperature in a stream of nitrogen in presence of sulphur where silicon is transformed into silicon monosulphide, carbon dioxide, monoxide and other elements as higher sulphides.

106650. August Thyssen-Hutte Aktiengesellschaft. Process for making steel with a carbon content of less than 0.05%. Accepted on 24th May 1967.

Making steel containing carbon substantially below 0.05% wherein firstly oxygen is top blown to bring carbon to 0.05 and then a mixture of oxygen and carbon free gas is blown from beneath.

106986. J. P. Singh. A cooling device for internal combustion engine. [Divisional date 15th December 1965]. Accepted on 23rd May 1967.

Comprising a water chamber, an inverted cup-shaped piece lined with the fine mesh a spreader disc within said piece and a pipe depending from said spreader and forming a rotor, said pipe being disposed within hot water inlet pipe communicating cooling system.

109067. British Industrial Plastics Limited. Treatment of oxymethylene polymers. (23rd November 1964). [Addition to No. 101096]. [Divisional date 12th August 1965]. Accepted on 12th May 1967.

The polymer is reacted with an N-substituted ethyleneimine.

109712. Air Reduction Company, Incorporated. Vinyl chloride copolymer compositions and molding thereof [Divisional date 9th August 1965]. Accepted on 9th May 1967.

Comprising thermomoulding a copolymer composition comprising from 0.1 to 10 per cent by weight of a stabilizer/lubricant material and a rigid vinyl chloride-propylene copolymer which has a propylene content of from 1 to 10 per cent by weight.

109792. Air Reduction Company, Incorporated. Molding method and composition for use therein. [Divisional date 9th August 1965]. Accepted on 9th May 1967.

Comprising thermomoulding a composition comprising from 0.1 to 10 per cent by weight of a stabilizer/lubricant material and a rigid vinyl chloride—ethylene copolymer which has an ethylene content of from 2 to 10 per cent by weight.

109895. Imperial Chemical Industries Limited. Melt spinning process to produce filaments and fibres from crystalline stereoregular poly-α-olefines. (19th May 1965). [Divisional date 22nd December 1965]. Accepted on 19th May 1967.

Extending through spinneret with orifice of 0.2-12 sq. mm. range, attenuating each polymer stream with lengthwise force at 0.1-4.0 g/mt. flowrate and treating solidified polymer with quenching fluid at 45-180 net sheed.

110439. The English Electric Company Limited. Improvements in or relating to insulating materials. (17th August 1964). [Divisional date 6th August 1965]. Accepted on 6th May 1967.

An insulating material in tape form including an open-weave reinforcing material, the interstices of the weave containing flakes or fibres of an insulating material.

Opposition Proceedings

An opposition has been entered by Toyo Koatsu Industries Incorporated to the grant of a patent on application No. 99704, made by Stamicarbon N. V.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 55773—George Fletcher & Co., Ltd. & another.

The patent ceased on the 10th November 1965, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 24th December 1966. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 22nd July 1967.

(2)

An order has been made on the 15th May 1967 restoring the patent No. 50168 dated as of the 29th August 1953 granted to Amdad Husein Fidaali Lala for "improvements in or relating to cash counter".

(3)

An order has been made on the 17th May 1967 restoring the patent No. 66687 dated as of the 10th February 1959, granted to Inventa A. G. Fur Forschung Und Patentverwertung for "improvements relating to the manufacture of hydroxylamine sulphate solution".

(4)

Notice is hereby given that an order was made on the 12th May 1967, restoring the original patent numbered 79064 dated as of the 27th October 1961, alongwith the Patent of addition to the said patent, numbered 88871 and dated as of the 19th September 1962 granted to Miles Laboratories, Inc., for "immunological indicator, composition for use in the detection of chorionic gonadotrapin in human urine".

(5)

An order has been made on the 10th May 1967 restoring the patent No. 83990 dated as of the 26th October 1961 granted to Mitsubishi Rayon Co., Ltd., for "viscose regenerated cellulose fiber and process for making same".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 130235. Colgate-Palmolive Company, a corporation organised and existing under the laws of the state of Delaware, U.S.A. 300 Park Avenue, New York, New York 10022, United States of America. "a cap for a bottle", January 28, 1967.

Class 1. No. 130313. Mangal Sain, Delhi Gate, P.O. Aligarh (U.P.), Nationality—Indian. "The lock", February 8, 1967.

Class 1. Nos. 130358 and 130359. Arun Chhotabhai Patel, an Indian Citizen A 5/5 & 5/6 Industrial Estate, Baroda-3, Gujarath, India. "A shoe for constructional element", February 13, 1967.

Class 1. No. 130484. Dewan Chand Jain (Indian National), 40, Gandhi Gali, Delhi-6. "Chair", February 23, 1967.

Class 1. No. 130492. Sorabji Nowroji & Co., (An Indian Partnership Firm), 16, Norniman Circle, Bombay-1, Maharashtra, India, Indian, "Hose clamp", February 24, 1967.

Class 1. No. 130497. Tractel Tirfor India Private Ltd., Hoare Miller House, 15, Ganesh Chandra Avenue, Calcutta-1,13 West Bengal, an Indian Private Limited Company, "Choker Hook", February 27, 1967.

Class 1. No. 130533. America Lock Company, 3-East Park Road, Karol Bagh, New Delhi, Indian Partnership Concern Registered, "a cycle lock", March 7, 1967.

Class 1. No. 130542. Cureecatt Philip Philip, of Cheriamparai, Pizhaku P.O. Palai, Kerala State, India, Indian National, "table lamps", March 13, 1967.

Class 1. No. 130577. Gur Charan Saini, an Indian citizen of Electron Chambers, Katras Road, Matkuria, Dhanbad, Bihar, "The base of vernier height gauge", March 23, 1967.

Class 3. No. 130074. Memon Automobiles, an Indian Partnership Firm, 581, Nana Peth, Poona 2 (Maharashtra), "Hose". January 4, 1967.

Class 3. No. 130135. Veena Electric Industries, Indian Partnership Firm, 1, Burrow's Lane, Chira Bazar, Bombay-2, Maharashtra, "cigarette lighters". January 16, 1967.

Class 3. No. 130237. Colgate-Palmolive Company, a corporation organised and existing under the laws of the State of Delaware, U.S.A. 300, Park Avenue, New York, New York 10022, United States of America, "A cap for a bottle", January 28, 1967.

Class 3 No. 130263. Jayantilal Kalidas Sayani, 94, Vithal Wadi, Bombay-2, Maharashtra, Hindu Indian by Nationality, "Soap-Boxes". February 3rd, 1967.

Class 3. Nos. 130276 to 130279. Naushad Ismail Padamsee, Indian National, 141, Sheriff Devji Street, City of Bombay, State of Maharashtra, India. "Chairs". February 4, 1967.

Class 3. Nos. 130309 and 130310. Deputy Lal Graver, an Indian National, 56-A, Dilshad Gardens, G. T. Shahdra, Delhi-32, "Goggle frame". February 6, 1967.

Class 3. No. 130314. Agra Rubber Industries, an Indian Registered Partnership Firm, Loha Mandi, Shahgani Road, Agra-2, Uttar Pradesh, "Rubber sole", February 8, 1967.

Class 3. No. 130351. Telerad Private Ltd., Indian Company, Atlas Mills Reay Road, Bombay-10, Maharashtra, "Radio sets", February 13, 1967.

Class 3. No. 130360. Nandlal Lakhmichand Asrani, Near Dhobi Talao Market, off Cowasji Hormusji Street, Bombay-2(BR), State of Maharashtra India, an Indian National, "an electric switch", February 13, 1967.

Class 3. No. 130371. Ram Lal Gulati (an Indian National) 2392, Kali Masjid, Bazar Sita Ram, Delhi-6, "P.V.C. Spacer". February 15, 1967.

Class 3. No. 130448. Montana Sports (India) Private Ltd., Indian Company. National Insurance Bldg., 204, Dr. Dadabhoy Naoroji Road, Bombay-1, Maharashtra, "Tumblers", February 20, 1967.

Class 3. No. 130585. The Goodyear Tire & Rubber Company, a corporation organised and existing under the laws of the State of Ohio, U.S.A. 1144 East Market Street, Akron, Ohio United States of America, "a tyre for a vehicle wheel". March 25, 1967.

Class 3. No. 130568. Jaggy & Company, 12, Rampart Row, Fort, Bombay-1. Maharashtra State, India, an Indian Company, "a flashlight". March 22, 1967.

Class 13. No. 129716. Messrs Vadilal Embroidery Unit, 177-179, Kalbadevi Road Bombay-2. Maharashtra, India, Indian Partnership Concern, "cotton textiles", silks, art-silks, and woollen goods, November 9 1966.

Class 13. Nos. 130525 to 130528. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1. "Cotton textiles", **March 4, 1967.**

Class 13. No. 130540. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", March 13, 1967.

Class 13. Nos. 130564 to 130567. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", March 21, 1967.

Class 13. No. 130646. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", April 3, 1967.

Class 13. No. 130669. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile goods", April 6, 1967.

Class 13. No. 130747. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", April 29, 1967.

Class 14. No. 130538. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods", March 13, 1967.

Class 14. Nos. 130725 and 130726. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", April 22, 1967.

Class 14. Nos. 130728 and 130738. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", April 22, 1967.

Copyright Extended for a Second Period for Five Years

Design No. 114396 Class 13.

Copyright Extended for a Third Period for Five Years

Design No. 114396 Class 13.

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 17th June 1967

Application for Patents

The Dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

27th May 1967

110834. Council of Scientific and Industrial Research. Improvements in or relating to the production of fluoboric acids.

110835. Council of Scientific and Industrial Research. New corrosion-inhibiting pigment (1).

110836. Shri S. I. S. Deshmukh. Attraction well.

110837. E. Schaumburg. Actuating mechanism for valves and like devices.

110838. B. P. Barua. Chaser die.

110839. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Phenylalanine derivatives and process for the manufacture thereof.

110840. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of 3, 3-alkylenedioxy- or 3, 3 dialkoxyalkyl halides.

110841. G. Ruud. Method and apparatus for mechanical aeration of stacks of cardboard, paper or other sheet material.

110842. Burlington Industries, Inc. Pneumatic spinning frame dsive regulator.

110843. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Iminodibenzyl derivatives, process for the manufacture thereof and pharmaceutical compositions containing the same. [Divisional date 1st June 1965].

110844. Ciba Limited. New 6-oxo-a-nor-b-homo-pregnadienes and process for their manufacture.

110845. Atlas Copco Aktiebolag. Air line lubricator. (20th June 1966).

110846. T. M. M. (Research) Limited. Improvements in or relating to apparatus for supplying empty cans to and discharging full cans from silver coiling apparatus. (3rd June 1966).

110847. Joseph Lucas (Industries) Limited. Warning lamp circuits for battery charging systems. (27th May, 1966).

110848. Farbenfabriken Bayer Aktiengesellschaft. Indanyl-n-methylcarbamic acid esters.

110849. Imperial Chemical Industries Limited. New colouration process. (3rd June, 1966).

110850. (Imperial Chemical Industries Limited. Alkene derivatives. (20th June, 1966).

110851. P. R. Krishnan. Automatic water tap.

29th May 1967

110852. Council of Scientific and Industrial Research. Improvements in or relating to the electrolytic reduction of 3-nitro-p-crosel to 3-amino-p-cresol.

110853. Council of Scientific and Industrial Research. 1-(3-aryloxy-2-substituted propyl)-4-phenylpiperazines.

110854. Council of Scientific and Industrial Research. New corrosion-inhibiting pigment (2).

110855. M. J. Khurana and A. J. Chawla. Playing game of cricket by means of two dice.

110856. Council of Scientific and Industrial Research. Improvements in or relating to deposition of photosensitive thin films of thallium sulphide layers.

110857. M. L. Kodali. Improvement in and relating to motor-car and its self-moving manner or like mechanism of motor car for the purpose of conveyance.

110858. Eaton Yale & Towne Inc. Meshing assisting means for jaw clutches.

110859. American Cyanamid Company. Preparation of d-2-amino-1-butanol.

110860. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Copper-containing monoazo dyestuff and process for its preparation.

110861. Seimens Aktiengesellschaft. Component unit operating with pressure contacts.

110862. Moskovsky ordena Lenina i ordena Trudovogo Krasnogo Znameni institut inzhenerov zheleznodorozhnogo transporta of ulitsa Obraztsova. Device for connecting rolling-stock adjacent sections with common bogie.

110863. F. Hoffmann-La Roche & Co. Aktiengesellschaft. 9β, 10α-steroids and process for the manufacture thereof.

110864. Continental Can Company, Inc. High current square wave power source.

110865. International Rectifier Corporation. Compression bonded semiconductor device assembly.

110866. Aktiebolage Syenska Flaktfabriken. A device for the exhaust of flue gases from arc melting furnaces.

110867. Charbonnage De France. Production of concentratable solutions and concentrated solutions of organic peroxides.

110868. Palitex Project-Company G.m.b.H. Means for braking drag links on multiple twisting spindles.

110869. Caterpillar Tractor Co. Baffle apparatus for self-loading scrapers.

110870. Shell International Research Maalschappij N.V. Pesticidal composition. [Addition to No. 101553]. [Divisional date 13th September 1965].

110871. Vandervell Products Limited. A method and apparatus for making thin wall bearing liners. (3rd June, 1966).

110872. Mrs. Nargis Sami Engineer. Improvements in or relating to pilferproof closures for bottles or the like containers.

110873. Poly-Profile Corporation. Improvements in or relating to ventilator device for flush doors, panelled partitions and the like.

30th May 1967

110874. Council of Scientific and Industrial Research. An electrolytic process for the preparation of copper oxychloride.

110875. Council of Scientific and Industrial Research. A new anode design for use in primary wet cells.

110876. Council of Scientific and Industrial Research. Improvement in or relating to a process of depositing pyrolytic carbon film on ceramics.

110877. Council of Scientific and Industrial Research. Improvements in or relating to chemical deposition of thin films of lead selenide layers.

110878. Council of Scientific and Industrial Research. A process for the manufacture of coarse aggregates, particularly suitable for use in cement concrete.

110879. Ortho Pharmaceutical Corporation. Antifertility agent.

110880. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the manufacture of pigment preparations suitable to printing surfaces of synthetic materials and of aluminium.

110881. Deutsche Gold Und Silber Scheideanstalt Vormals Roessler. Process for preparation of new substituted amino pyridines. [Addition to No. 100951].

110882. Kjellberg Elektroden & Maschinen Gesellschaft mit beschrankter Haftung. Improvements in or relating to a method of plasma arc cutting or welding. (13th July 1966).

110883. Kjellberg & Elektroden & Maschinen Gesellschaft mit beschrankter Haftung. Improvements in or relating to a method of plasma arc cutting or welding. (13th July 1966).

110884. Kjellberg Elektroden & Maschinen Gesellschaft mit beschrankter Haftung. Improvements in or relating to an arrangement for the automatic lifting of a plasma arc torch. (13th July 1966).

110885. J. R. Geigy A. G. Process for the production of new indole derivatives

110886. Imperial Chemical Industries Limited. Biaxially oriented sheet. (17th June 1966).

110887. Moteurs Drouard. Electromagnetic rotary machine.

110888. United States Steel Corporation. Method of applying a protective metal coating to a steel base.

110889. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Imidazole derivatives and process for the manufacture thereof.

110890. Sir W. G. Armstrong Whitworth & Company (Engineers) Limited. Improved two-stroke cycle internal combustion engine. (13th June, 1966).

110891. Wiggins Teape Research & Development Limited. Method of producing a thixotropic liquid suspending medium particularly for the forming of non-woven fibrous webs. (31st May 1966).

110892. Ciba Limited. New 3-oxo-a-nor-b-homo-pregnatrienes and a process for their manufacture.

110893. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Benzenesulfonyl-ureas and process for preparing them.

110894. Sandoz Ltd. Improvements in or relating to organic compounds. (31st May 1966).

110895. Sandoz Ltd. Improvements in or relating to organic compounds. (31st May 1966).

110896. Sandoz Ltd. Improvements in or relating to organic compounds. (31st May 1966).

110897. Sandoz Ltd. Improvements in or relating to organic compounds. (31st May 1966).

110898. Ciba Limited. New 3-oxo-a-nor-b-homo-pregnatrienes and a process for their manufacture.

110899. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Production of shaped continuous structures.

110900. T. Satake. A drying apparatus for cereals.

110901. G. L. Rotshtan and K. R. Pai. Improvements in or relating to electric torches.

110902. N. V. Philips Gloeilampenfabricken. Pick-up comprising pressure sensitive transistors.

110903. N. V. Philips' Gloeilampenfabrieken. Series flash unit employing flashlight lamps to be fired successively.

110904. N. V. Philips Gloeilampenfabrieken. Dispenser cathode comprising a compressed mixture of tungsten powder and bariumaluminate-containing powder.

110905. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to permanent magnets built up of M_6R''.

110906. N. V. Philips Gloeilampenfabrieken. Semiconductor device for producing and amplifying electrical signals of very high frequencies.

31st May 1967

110907. M. Joshi. Improvements in or relating to a device for holding and gripping wearing apparel.

110908. Shri Ram Institute for Industrial Research. Improvements in or relating to wet treatment of cellulosic materials. [Addition to No. 109684].

110909. Rhone-Poulenc S. A. Process for the preparation of polyvinyl formals, polyvinyl formals produced thereby, varnish composition comprising them and a process for the protection of a support.

110910. Forsvarets Fabriksyark. Delay device is a detonator safety arrangement.

110911. Wellworthy Limited. Soluble cores. (6th June, 1966).

110912. Uniroyal, Inc. Improvements in vulcanization of EPT rubber.

110913. A. C. Potter. A cover for reducing the evaporation of liquids.

110914. Astra Nutrition Ab. A process for recovering nutritional elements from organic material.

110915. Toyo Koatsu Industries, Incorporated. Herbicidal composition and method.

110916. Merck & Co., Inc. Process of preparing [4-(2-methylenealkanoyl)-phenoxy] alkanoic acids. [Divisional date 4th November, 1964].

110917. Ciba Limited. Preparations for combating pests containing new amidines. [Addition to No. 86760]. [Divisional date 17th December, 1965].

1st June 1967

110918. T. S. V. Pillay. Puncture proof tyres.

110919. Sumitomo Electric Industries, Ltd. Method of and apparatus for crosslinking in curable rubber or plastics electric wire and cable.

110920. Otis Elevator Company. Governor. (28th October, 1966).

110921. Universal Oil Products Company. Improved dehydrogenation process.

110922. Halcon International, Inc. Chemical process.

110923. Halcon International Inc. Chemical process.

110924. Dilip Kumar Banerjee. Strainers or filters for tube wells.

110925. Societa Farmaceutici Italia. Process for preparing pyrazine derivatives.

110926. Merck & Co., Inc. Pyrazinamide compounds.

110927. Merck & Co., Inc. Preparation of pyrazinoylguanidines and pyrazinamidoguanidines.

110928. Merck & Co., Inc. Preparation of pyrazinoylguanidines and pyrazinamidoguanidines.

110929. Merck & Co., Inc. Preparation of pyrazinoylguanidines and pyrazinamidoguanidines and novel intermediates therefor.

110930. Merck & Co., Inc. Preparation of pyrazinoylguanidines and pyrazinamidoguanidines.

110931. Merck & Co., Inc. Preparation of pyrazinoylguanidines and pyrazinamidoguanidines and novel intermediates therefor.

110932. Merck & Co., Inc. Preparation of 6-chloropyrazinoylguanidines.

110933. Merck & Co., Inc. Preparation of pyrazinoylguanidines and pyrazinamidoguanidines.

110934. Ciba of India Limited. Process for the treatment of depressive conditions with diamino compounds.

2nd June 1967

110935. Council of Scientific & Industrial Research. Development of flux and solder for joining aluminium-aluminium and aluminium copper.

110936. S. P. Joshi. Improvements in or relating to display-stands, book-shelves, racks, stands or like pieces of furniture. [Addition to No. 102566].

110937. P. S. Rao. A novel internal combustion engine.

110938. The Eimco Corporation. Material handling device.

110939. The Eimco Corporation. Front end loading clam shell bucket.

110940. The Distillers Company (Carbon Dioxide) Limited. Production of carbon dioxide and argon. (23rd June, 1966).

110941. Bata Shoe Company of Canada Limited. Valve. (7th June, 1966).

110942. Fmc Corporation. Insecticides and synergists.

110943. Fmc Corporation. Insecticides and synergists.

110944. Fmc Corporation. Insecticidal compositions.

110945. Harish Engineering Works. Drying apparatus for lengths of cloth and other sheet materials.

110946. Sandoz Ltd. Azo dyes of low water solubility, their production and use.

110947. Ciba Limited. Process for the manufacture of glycidyl ethers of polyphenols with a high content of epoxide oxygen.

110948. Ciba Limited. N, N'-diglycidyl compounds, processes for their manufacture, and their use.

110949. Chimetron S. A. R. L. New pesticides.

110950. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to planer transistors and circuits including such transistors.

110951. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of manufacturing fine homedisperse fe 2°3 powders.

110952. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to pesticide granules and methods of preparing such granules.

110953. Fabriques Reunies De Lampes Electriques. Electric incandescent lamp having a regenerative cycle for use in car head lights.

Alteration of Date

109578. Ante-dated to 30th August 1965 under Section 5 of the Act.

110631. Ante-dated to 17th August 1965 under Section 5 of the Act.

110593. Ante-dated to 24th November 1965 under Section 5 of the Act.

109857. Ante-dated to 14th September 1965 under Section 5 of the Act.

109479. Ante-dated to 25th August 1965 under Section 5 of the Act.

102743. Post-dated to 31st March 1967 under Section 5 of the Act.

102744. Post-dated to 18th April 1967 under Section 5 of the Act.

102829. The claim to priority date has been altered from 7th December 1964 to 4th October 1965.

102761. The claim to priority date has been altered from 3rd December 1964 to 15th October 1965.

101530. The claim to priority date 21st September 1964 has been disallowed and the application dated as of 10th September 1965, the date of filing in India.

102768. The claim to priority date 1st December 1964 has been abandoned and the application dated as of 30th November 1965 the date of filing in India.

101565. The claim to priority date 29th September 1964 has been abandoned and the application dated as of 14th September 1965 the date of filing in India.

101335. The claim to priority date 2nd October 1964 has been abandoned and the application dated as of 28th August 1965 the date of filing in India.

101589. The claim to priority date 16th September 1964 has been abandoned and the application dated as of 15th September 1965 the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patent's on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the Office.

The dates shown in crescent brackets are the dates allowed under Section 78A of the Act.

100457. Tsentralny Nauchno-Issledovatelsky Institute Tekhnologii I Mashinostroenia. Method of preparing fluid self-curing mixture for making foundry cores and moulds. Accepted on 7th April 1967.

A fluid self curing mixture wherein foaming agent consists of sulphonates or sulphates and the self curing additive is of highly basic metallurgical slag.

101017. L Arputharaj. Accident preventor radium button. Accepted on 9th May 1967.

Comprising a circuit bright light terminal, dipper switch, spring into, horn, dim light terminal, earth with, battery control rod, a star hole, star plate.

101027. Veb Elektro-Apparate-Werke Berlin-Treptow. Device for resetting maximum pointers of electric supply meters. Accepted on 9th May 1967.

Comprising catch pawl, catch wheel with sliding surface, striking surface, stationary lever, additional sliding surface, stationary neck piece, sliding pin, dragged and indicator in its zero position.

101117. Allied Chemical Corporation. Process for the production of iron free aluminium nitrate solutions. iron-free aluminium nitrate produced thereby and cele-grade alumina produced therefrom. Accepted on 15th May 1967.

Comprises heating an iron contaminated solution of aluminium nitrate and separating the iron containing precepitate thus produced from the aluminium nitrate solution.

101147. Western Electric Company, Incorporated. Apparatus for detecting changes in supervisory states of paths of a communication system. (13th October 1964). Accepted on 16th May 1967.

Comprising an arrangement for scanning a group of communication path circuits means for registering a memory system and means for storing.

101169. The British Iron and Steel Research Association. Preheating and refining apparatus, and process for preheating furnace charge. (21st August 1964). Accepted on 17th May 1967.

Comprising a furnace and a preheating vessel far preheating a furnace charge by contacting it with hot gases.

101181. R. G. DePenning. Improvements in and relating to translucent display elements. Accepted on 17th May 1967.

Comprising an image-bearing film-base and a light-scattering screen constructed and arranged to produce a sharp contrasting back ground for the image.

101239. American Cyanamid Company. Methods for controlling micro-organisms. Accepted on 23rd May 1967.

The materials are treated with dicyanobenzylbenzoate.

101245. Kennecott Copper Corporation. Improvements in or relating to process of making sheet metal. Accepted on 23rd May 1967.

Comprising forming a layer of a slurry of powdered metal or alloy and liquid solution of plastic binder and treating the layer.

101267. Vsesojuzny Nauchno-Issledovatelsky I Proektny Institut Sinteticheskikh Zhirozamenitelei. Method of preparing surface-active derivatives of mono-esters of succinylsulphonic acid. Accepted on 24th May 1967.

Characterised in reacting aliphatic alcohols in admixture with parafin hydrocarbons and maleic anhydride with gas mixture of air water vapour and Co_2 and treating reaction product with salts of sulphurous acid.

101282. Rohm and Haas Company. Addition copolymers and composition containing the same. Accepted on 24th May 1967.

Polymerising mixture of ethylemically unsaturated monomers having 0.5—95% by weight of units of phenyl ester

$$CH_2 = C\text{-}(CH_2)_{n-1} - H - COO - C_6H_3 - (R')_{x-1}^{(QR)_m}$$

m being 1 or 2, x-1, 2 or 3 n-1 or 2; R' is alkyl group and R is alkyl with 1-4 C-atoms.

101294. E. J. Longyear Company. Wire line core barrel improvements. Accepted on 25th May 1967.

An axially elongated member of a transverse cross section to be received in the drill stem to form a fluid by pass channel.

101306. Multi Minerals Limited. Process for the preparation of acids from their salts, particularly of phosphoric acid. (1st April 1965). Accepted on 26th May 1967.

Characterizes in dissolving the salt of the acid soluble in the acid, separating the insolubles from it, followed by crystallisation and contacting the crystallized at material with a cationic exchange-resin,

101335. A. C. Pittas. Improvements in or relating to demountable cabin structures. Accepted on 29th May 1967.

A cabin structure including floor, roof and side members which can be erected to form a close container and can be dismantled and folded when necessary.

101372. Raytheon Company. Glass encapsulated semiconductor device and process of manufacture therefor. (26th August 1965). Accepted on 31st May 1967.

Comprising a hollow glass body the internal surface of which is coated with borosilicate glass.

101377. Veb Filmfabrik Wolfen. Acyl-bis-acetic acid anilides, process for their manufacture and process and multilayer material containing the same for the production of yellow photographic images. (1st October 1964). Accepted on 27th May 1967.

Wherein a 3-aminobenzene sulphonic acid -(3' : 5'-dicarbomethoxyanilide) is condensed with a 5-alkyloxy-isophthaloyl-bis-ethyl acetate in which the alkoxy radical contains 12 to 18 carbon atoms.

101380. The Bushing Company Limited. Improvements relating to resin-bonded laminated paper electrical insulation. (2nd September 1964). [Addition to No. 99114]. Accepted on 27th May 1967.

Comprises introducing resin adhesive tape between paper tapes and bonding them by heat and pressure.

101385. Dunlop Rubber Company Limited. Tow-forming apparatus. (10th September 1964). Accepted on 26th May 1967.

Comprises a pair of parallel base rods attached at each end to a rotatable circular carriage arranged perpendicular to the plane of the yarn sheet.

101432. Joseph Lucas (Industries) Limited. A method of manufacturing grids for the plates of electric storage batteries. (30th September 1964). Accepted on 31st May 1967.

Comprising rolling material from which the grid is formed between rollers, raised portions, holes to be formed on the grid, recesses corresponding to ribs which extend in a diamond shaped pattern.

101441. Societe Civile D'Etudes De Centrifugation. Rough or round casts of metal, process and apparatus for the continuous casting thereof and articles produced therefrom. Accepted on 27th May 1967.

Process for continuous casting or rough casts of metal wherein cooled mould is rotated while molten metal jet is impinged on a fixed point eccentric to the axis of mould.

101453. Continental Oil Company. System for minimizing the phase variations between a signal as received and said signals subsequentially transmitted. Accepted on 2nd June 1967.

Comprising a reference signal, a transmitting means phase shifting means, phase comparator means, and pick up means.

101505. Owens-Corning Fiberglas Corporation. Glass fiber reinforced elastomers. Accepted on 30th May 1967.

The glass fibres in the bundle are coated or impregnated with the combination of a solubilised neoprene powdered magnesium oxide powdered zinc oxide and carbon black.

101518. Fisons Fertilizers Limited. Process for the preparation of liquid melts of ammonium phosphate nitrate. (23rd September 1964). Accepted on 1st June 1967.

Comprises treating an acid mixture containing nitrate ions, phosphate ions, ammonium ions and 0-2% by weight of water with gaseous ammonia at a temperature of 120° C to 200°C.

101530. Ludlow Corporation. Non-woven fabric based on synthetic fibers. Accepted on 30th May 1967.

The fibre content of which consists of at least 25 weight percent of a thermoplastic polymer fibre the fibres of said web being randomly bonded with discrate particles of a resin binder.

101566. Imperial Chemical Industries Limited. Fibre-forming synthetic linear polyamide compositions and process for preparing the same. Accepted on 2nd June 1967.

Comprises a fibre-forming synthetic linear polyamide and a triazine.

101566. James Howden & Company Limited. Improvements in or relating to rotary regenerative preheaters in combination with fire detection apparatus. (21st September 1964). Accepted on 27th May 1967.

Including temperature sensitive means for sensing temperature within the preheater, and a signalling device connected to the former to signal when a temperature within the preheater changes at a rate of change in excess of a predeterminaed rate of change.

101589. The Cementation Company Limited. Improvements in rotary ground boring apparatus. Accepted on 29th May 1967.

Comprising boring means adjustably connected to a driver supported on a frame provided with ground bearing members and releasable gripping means adjusting the position of a bucket in the boring means.

101619. Simon-Carves Limited. Improvements in or relating to the aeration of liquids. (25th September 1964). Accepted on 30th May 1967.

Rotatable surface aeration device comprising a converging shell providing support web and a plurality of planar blades extending along outer surface of shell, depth of blades converging inwardly.

101819. Dunlop Rubber Company Limited. Improvements relating to settees. Accepted on 22nd May 1967.

Which has a pivotally mounted back rest whose pivotal axis is parallel to the longer side of the mattress base.

101835. P. V. Type. Acqua carbon process. Accepted on 29th May 1967.

A micture of water and carbon in any proportion and a conducting chemical for producing gas vapour and steam by the application of heat and or electricity.

101950. Parker-Hanifin Corporation. Solenoid operated valve assembly. Accepted on 2nd June 1967.

Comprising a housing having a cavity therein, a first member mounted in one end of the cavity, a solenoid surrounded by a flux sleeve and mounted in the cavity adjacent to second seal member, a metallic flux plate and a first resilient seal.

102131. K. S. Iyer Narayan. A safety device for automatically controlling the rearing angle of agricultural and industrial tractors or like vehicles. Accepted on 29th May 1967.

A plate forming the base, an electromagnetic solenoid operating on battery voltage of the tractor a spring loaded attachment pivoted to the spring loaded lever plate slidably mounted on the base plate, a holder on the base plate carrying an enclosed vacuum filled glass tube or capsule.

102212. Veb Muhlenbau Dresden. Device for cleaning the screen of screen separators. (14th January 1965). Accepted on 1st June 1967.

Comprises multi blade brushes, the screens being subjected to a vibratory movement and the pivotal guide of the brush is an oscillating bearing.

102350. McCord International Limited. Removal of carcinogens from gas streams. Accepted on 2nd May 1967.

Composition for removing carcinogenic substances from tobacoo smoke comprises tobacoo and a compound consisting of a tetravalent metal salt and a hydroxy substituted aliphatic acid, a hydrate and a carbonated hydrate of said metal.

102367. E. Merck Aktiengesellschaft. Fluorene-9-carboxylic acid derivatives, process for their preparation and plant morpholosy regulating agents containing the same. Accepted on 3rd May 1967.

Comprising reacting a fluorene-9-carboxylic acid of the ester, metallic salt or halide thereof with hydrazine or salt thereof, or with aniline or a primary, secondary or tertiary amine or with an alkenyl or alkinyl compound mono or polysubstituted by OH and/or a halogen.

102454. United States Rubber Company. Apparatus and method for forming and curing individual endless rubber belts. Accepted on 10th May 1967.

Apparatus for forming and curing endless belts comprises a building drum, mold ribs, means for forming rubber into rib grooves, means for rotating drum, means for curing belts and tension pulley.

102472. Rohm & Haas Company. Water treatment process. Accepted on 11th May 1967.

Comprising treating water containing anionic water soluble material with a water soluble polymer and optionally with negatively charged solid inorganic material.

102518. Roussel-Uclaf. Processes for the production of preparation for the treatment of hair and the preparations when thus produced. (3rd December 1964). Accepted on 15th May 1967.

The fruit juices of a plant of the genus cucmis melo linne (cucurbitaceae) are subjected to distillation to yield a clear liquid extract.

102549. Harpener Bergbau-Aktiengesellschaft. Process for the removal of ammonia, hydrogen sulfide and hydrocyanic acid from gases containing the same. Accepted on 16th May 1967.

Comprising washing the gas with an aqueous solution of pickling solution salt, followed by conducting the gas over a gas purification mass.

102555. Albright & Wilson (Mfg) Limited. Preparation of organotin halides. (2nd December 1964). Accepted on 17th May 1967.

By reacting an aliphatic halide with metallic tin, or an alloy thereof, in the presence as catalyst of a salt having an inorganic cation and a halostannite anion or a halostannate anion.

102582. J. R. Geigy A. G. Production of optical brightners of stilbene series detergents containing same and optically brightening of cellulose material with same. Accepted on 19th May 1967.

2-mols of 2, 4, 6-trihalogen-1, 3, 5-triazine is reacted with 1 mol of 4, 4'-diaminostelbene-2, 2'-disulphonic acid.

102583. J. R. Geigy A. G. Production of optical brightening agents of the stilbene series and their use for the brightening of cellulose and polyamide materials Accepted on 19th May 1967.

2 mols of 2, 4, 6-trihalogen-1, 3, 5-triazine is reacted with 1 mol of 4, 4'-diaminostilbene-2, 2'-disulphonic acid.

102611. Borg Holding A. G. and Siemens-Schuckertwerke Aktiengesellschaft. Process for the pickling and cleaning of articles and installations consisting of iron and/or steel, more particularly pipe systems and boiler installations. Accepted on 22nd May 1967.

Characterised in that the pickling solution consists of organic acid containing hydroxyl groups.

102612. General Electric Company. Improvements in or relating to signalling systems. Accepted on 22nd May 1967.

Comprising separator station means for selecting and transmitting distinctive function command signals and remote station means, said function command signals and remote station means, said function command signals are each composed of a safity tone signal and a given number of successive control tone signals.

102620. The United Steel Companies Limited. Methods of and apparatus for use in the continuous casting of steel. (24th November 1964). Accepted on 22nd May 1967.

Comprising pouring the steel from a tundish into a reciprocating mould through a closed chamber, purging the closed chamber with a reducing as inert gas before the start of the east, permitting metal to flow through the chamber to the mould while the same or another reducing or inert gas or mixture flows through the chamber and maintaining the pressure in the chamber substantially constant.

102622. International Standard Electric Corporation. An arrangement for avoiding mutual disturbing influences along several electro-magnetic treadles in railway signalling installations. Accepted on 22nd May 1967.

Comprising transmitting and receiving devices arranged on mutually opposite sides of the two rails so that currents induced by the magnetic fluxes in the transmitting devices in the short-circuited turn are cancelled out.

102631. Amphenol Corporation. Ceramic molding composition and process. Accepted on 22nd May 1967.

Comprising mixing a ceramic material with a second ceramic material and with a silicone resin and a plasticizer, forming the mixed material into a shaped article and heating for a time and temperature to thermoset the silicone resin and then firing the shaped product to a temperature sufficient to vitrify the second ceramic material without vitrifying the first ceramic material.

102632. Veb Farbenfabrik Wolfen. Process for the production of zeolites. Accepted on 22nd May 1967.

Wherein a water containing sodium-potassium alumino-silicate mixture in heated at 50-100°C and crystals obtained are isolated.

102633. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Process for preparing alkyl esters of 0, 0-dialkyldithiophosphoryl alpha-phenylacetic esters. Accepted on 22nd May 1967.

Reacting alkaline salt of 0, 0-alkyldithiophosphoric acid with alpha-halo-phenylacetic acid, and esterifying the reaction product.

102638. Hooker Chemical Corporation. Fire retardant compositions. Accepted on 23rd May 1967.

Comprises (1) a normally combustible polymer (2) a constant fire retardant agent and (3) an organometal stabilizer for the fire retardant.

102642. Elektrostalsky zavod tyazhelogo mashinostroeniya. Billet switch for multi-strand rolling mill. Accepted on 23rd May 1967.

Comprises atleast one movable guide trough the side walls of it, diminishing towards its narrow portion in its direction of rolling and a multi-strand guide behind it, whose bottom rises to a level adequate for further travelling of the billets.

102658. Imperial Chemical Industries Limited. Process for the production of potentially crimped synthetic filaments. Accepted on 24th May 1967.

Comprises continuously passing a filament bundle across a heater having a narrow surface to heat filaments on one side with a temperature gradient imparted across the cross-section.

102665. Deutsche Advance Produktion GMBH. Stabilization of halogenated vinyl resins. Accepted on 24th May 1967.

Reacting beta-keto carboxylic acid ester containing thioether group with ammonia under a pressure of about 0.5 to 3 atmospheres above atmosperic pressure at a temperature of about 60 to 70°C in presence of water or water miscible solvent or also as a melt reaction in the absence of solvents.

102668. Pactide Corporation. Distillation apparatus and method of distillation. Accepted on 24th May 1967.

Distillation apparatus comprising means providing a first liquid at predetermined pressure (hydrostatic), means transfering heat to first liquid to vaporize, means forming second liquid, providing space between liquids containing gas.

102669. Ferodo Limited. Friction material and method of making the same. (30th November 1964). Accepted on 24th May 1967.

Where the friction material comprises asbestos as other inorganic fibres and a binder in which the binder is wholly or substantially wholly composed of copper sulphide and is formed in situ by reaction of sulphur with copper powder of cuprous sulphide.

102670. Wirth, Gallo & Co. A vibrating string for measurement purposes. Accepted on 24th May 1967.

In which the cross-section of at least part of the string is non-circular and is such that the distance across the stip in one direction is substantially fron the distance across the strip in another direction a right angles to the first direction.

102674. Gulf Research & Development Company. Process for preparing diarylketones. Accepted on 24th May 1967.

Comprises the preparation of 1, 1-diarylketone by the oxidation of 1, 1-diarylalkane with the aqueous solution of nitric acid, whereby the solid so produced is subjected to further oxidation with nitric acid and the said diaryl ketone is separated from the aqueous phase.

102680. Protocol Engineering Limited. Improvements in or relating to graphic reproduction processes. Accepted on 25th May 1967.

Comprises initially registering the components of each set with respect to atleast carrier sheet, by forming at least two spaced, registration holes through at least one set of components and at least one carrier sheet in the same relative positions, and positioning the atleast one set and the atleast one carrier sheet in register one with the other by locating register holes over register pins.

102683. American Flange & Manufacturing Co., Inc. Method and apparatus for securing closure caps to containers. Accepted on 25th May 1967.

Method of securing a closure cap characterised by the application of pressure through a plurality of separate path portions with each path portion having a part overlaping a part of the adjacent path portion horizontally.

102686. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to envelopes of gas discharge tubes. Accepted on 25th May 1967.

On the inner side of the envelope has a layer of porous material, the pores opening out at the surface and preferably communicating with each other.

102689. Ministerul Industriei Chimice. Apparatus for obtaining elements of high purity in the shape of rods. Accepted on 26th May 1967.

Characterized by having an automatic device for stretching the said filaments and also a single cooling chamber.

102696. Esso Research and Engineering Company. Improvements in water conservation. (11th December 1964). Accepted on 26th May 1967.

Method of providing a seepage barrier in a water course comprising planing upon water surface a water impervious flexible material, and causing it to sink.

102698. Shell Internationale Research Maatschappij N. V. Process for removing water from finely divided solids. Accepted on 26th May 1967.

Characterized in contacting said solids with an organic water solvent and nonthermally separating a substantial portion of the resulting water containing solvent from the solids.

102706. Dow Corning Corporation. Greases. Accepted on 27th May 1967.

A grease consisting essentially of (a) 100 parts by weight of an organo polysiloxane liquid (b) from 5 to 25 parts by weight of a powdered silica filler (c) from 2 to 35 weight per cent calculated on the weight of (b) of a cyclic siloxane (d) from 5 to 100 weight per cent calculated on the weight of (b) of a hydroxylated organo polysiloxane.

102720. Combustion Engineering, Inc. Liquid-Gas contacting apparatus and method. Accepted on 29th May 1967.

Comprising distributing liquid in a uniform thin layer in a passageway and causing the liquid to flow in uninterrupted stream and passing gas over passageways in countercurrent direction, continuously removing liquid from passageways.

102727. Dunlop Rubber Company Limited. Improvements in games bats and sticks. (9th December 1964). Accepted on 29th May 1965.

Having a coating of natural or synthetic rubber base adhesive composition adherent to a covering of a different material.

102737. Enthone, Incorporated. Cast iron product and process of preparing same. Accepted on 27th May 1967.

A cast iron product comprising a pre-plate phosphete-containing film and a metal plate.

102739. P. Bret. Fluid-dispensing systems. Accepted on 27th May 1967.

Comprising at least an auxiliary chamber of variable volume and having a fixed maximum volume, said auxiliary chamber being bounded by at least one movable wall which is urged by resilient means, means for connecting said auxiliary chamber to a source of said liquid under pressure, means for connecting said auxiliary chamber to an outlet.

102758. Caterpillar Tractor Co., Improvements in bonding. [Addition to No. 84737]. Accepted on 30th May 1967.

Engaging the surfaces in rotational rubbing contact under pressure and at a speed above a critical speed at which the bond can form to heat the interface to a bondable temperature, and decreasing the speed below the critical speed.

102761. J. H. W. Ratzer, and Reads Limited. Improvements in containers. (15th October 1965). Accepted on 27th May 1967.

Forming the end with a stepped countersink of maximum diameter to fit within the body and with a flange inclined at an acute angle to the wall of the countersink and terminating in an inturned peripheral tongue substantially perpendicular to the flange.

102768. Frederick Braby & Company Limited. Structural element for retaining purposes such as a retaining wall or beam. Accepted on 30th May 1967.

A sheet formed with corrugations on which has been superposed a secondary wave formation of different amplitude, two wave formation having a common crest.

102790. Ahmedabad Textile Industry's Research Association. A twisting head for ring spinning frames and method of imparting substantially full twist to drafted roving. Accepted on 1st June 1967.

Comprising a tubular or substantially tubular element with two arms extending from two diametrically opposed points in the lower end portion of said element each said arm having a yarn guide.

102829. Imperial Chemical Industries Limited. Reductive dimerisation of α, β olefinic amides. (4th October 1965). Accepted on 3rd June 1967.

Comprises admixing alkali metal amalgam with amide at PH 6 to 11.

102830. Imperial Chemical Industries Limited. A process for the reduction of organic compounds. (7th December 1964). Accepted on 30th May 1967.

Comprises reacting organic compound with alkali metal amalgam, separating products from aqueous medium electrolysing the latter removing same for reduction.

102894. The Goodyear Tire & Rubber Company. A method of adhering a reinforcing element to rubber. Accepted on 31st May 1967.

By applying a vulcanisable rubber coating to a reinforcing element and heating the assembly to vulcanize rubber.

102902. Monsanto Company. Process for preparing dichloroanilides. Accepted on 31st May 1967.

Reacting dichloroaniline with excess carboxylic acid at temperature that distils azeotrope of said acid, cooling adding acid anhydride to convert all dichloroaniline.

102906. R. T. C. Engineering Works (P) Ltd. Centrifugal pump. Accepted on 27th May 1967.

The volute path being set at an angle offset from the shaft of the impeller which is being provided with vanes formed in curvi-rectilinear-fashion.

102914. Borg-Warner Corporation. Improved resilient shaft mounting. Accepted on 22nd May 1967.

Comprising an annular body, annular groove a plurality of columns annular fixed bracket extending neck wings.

102918. D. P. Ahuja. Closure arrangement for a container. Accepted on 30th May 1967.

Having an orifice surrounded by an orifice defining portion on the one part and a closure member for orifice on the other part or both being formed with a circumferential groove in the outer surface of one part or other part.

102969. Shell Internationale Research Maatschappij N. V. Thermoplastic elastomeric composition. Accepted on 27th May 1967.

Comprises a block copolymer and a polyvinyl substituted aromatic hydrocarbon.

102974. Phillips Petroleum Company. Sponge rubber compositions from conjugated diene copolymers. Accepted on 30th May 1967.

Comprising blending a solution polymerized random or block copolymer of a conjugated diene with vinyl substituted aromatic monomer and a blowing agent.

102893. The Goodyear Tire & Rubber Company. Improvements in polyester cord-to-rubber adhesion. Accepted on 30th May 1967.

By adding to the rubber a methylene donor and a methylene acceptor.

103011. Farbenfabriken Bayer Aktiengesellschaft. Moulding compositions of pre-polymerised monomer-free unsaturated polyesters and process for the production of moulded articles therefrom. (8th August 1965). Accepted on 27th May 1967.

Comprises pre-polymerised monomer-free unsaturated polyesters and a polymerisation catalyst.

103059. Produits Chimiques Pechiney-Saint-Gobain. A process for the bulk preparation of vinyl chloride polymers and copolymers in two stages. Accepted on 27th May 1967.

Characterizes in that, the first stage is carried out in the presence of a rapid decomposition catalyst which the second stage is carried out in the presence of a slow decomposition catalyst.

103088. S. K. Chimanlal Hansoti. B. J. Bhatt, D. R. Patel B. C. Patel and R. S. Trivedi. Manufacture of nicotine sulphate from tobacco. Accepted on 2nd June 1967.

Characterized in that proportion of calcium carbonate and sodium carbonate are 9.5 and 12.5 percent by weight respectively for every hundred part by weight of tobacco or tobacco dust, gradually adding water and staing the aqueous mixture for about 8 hours then percolating kerosene through the mixture, removing it and reacting the nicotine solution formed by sulfuric acid.

103092. Calor-Emag Elektrizitats-Aktiengesellschaft. High tension switch gear installation. Accepted on 30th May 1967.

Comprising fixed part, incoming and out going conductor, first contact member, connected to incoming and out going contractors second contact member projecting from the casing for insertion through opening.

103098. Rohm & Haas Company. Herbicidal compositions. Accepted on 30th May 1967.

Comprising herbicide like arsenic-containing, chlorinated oliphatic caid or inorganic chlorate, hydrotrope like alkyl phenoxy polyethoxy ethanol and surfactant in volume ratio of 10 : 1 to 1 : 10.

103170. Rhone-Poulenc S.A. Process for the preparation of new phosphoric esters and pesticidal compositions containing them. Accepted on 30th May 1967.

Comprises the preparation of phosphoric ester of the formula $(RO)_2\overset{P_{11}}{S}\text{-}S\text{-}CH_2\text{-}CooC(CH_3)_3$ *where R represents a methyl or ethyl group and the pesticidal composition containing the said ester with diluent competible with phosphoric ester.*

103269. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Basic azo dyestuffs process for preparing them and textile fibrous material dyed or printed by a process using said dyestuffs. Accepted on 31st May 1967.

A diazonium compound is coupled with a coupling component or an azo dyestuff is quarternised with a quarternising agent.

103274. Beteiligungs-und Patentverwaltungsgesellschaft mit beschrankter Haftung. Improved method of refining pig iron by oxygen top blowing process. [Addition to No. 98471]. Accepted on 26th May 1967.

Wherein conductivity is determined by known methods between metal bath and a probe insulated electrically.

103358. American Flange & Manufacturing Co. Inc. Plastic container closure combinations and method for forming the combination. Accepted on 29th May 1967.

The combination of the container wall assembled with a plastic closure flange having internally threaded cylindrical neck and a metal ring surrounding the neck.

103600. Koppers Company, Inc. Improvements in or relating to the manufacture of coke. Accepted on 26th May 1967.

Comprising oxidising free swelling coal, heat treating the oxidised coal, briquetting and then oxidising, carbonising and cooling the briquettes.

103602. Siemens & Halske Aktiengesellschaft. Improvements in or relating to apparatus for monitoring gas-pressurised cables. Accepted on 27th May 1967.

An apparatus for monitoring gas pessweised cable, including a valve assembly and controlled by an adjusting element responsive to gas pressure and a contact assembly arranged to provide an electrical signal at a monitering centre.

103611. Holding Intercito SA., Apparatus for jarring rods. Accepted on 30th May 1967.

Jarring rods to compact stack comprising guide channel wherein rods are situated, with a floor corresponding to the floor of stack desired, an opening at floor a displaceable jarring plunger piercingly extending through said opening and a resiliently mounted packer ram.

103619. Stauffer Chemical Company. Pestifidal compositions for controlling mites. Accepted on 23rd May 1967.

Comprising an alkyl (2, 4-dinitrophenyl) carbonate in admixture with a carrier or diluent.

103687. Chevron Research Company. Non-sludging organic phosphate insecticide—fuel oil compositions. Accepted on 1st June 1967.

Comprising a fuel oil from about 0.5 to 5 volume percent organic phosphate insecticide and from 0.25 to 2.5 volume percent of a salt of the reaction product obtained by reacting at a temperature between 300-415°F an aliphatic monocarboxylic acid.

103689. Elektro-Thermit G.m.b.H. Method and apparatus for removing excess welding material from rail welds. Accepted on 30th May 1967.

A method for removing welding materials true to profile in which the removal is effected by a chisel hammer which is guided on the rail.

103731. T. J. Brennan and W. A. Baumstark. Toilet tank fill valve. Accepted on 26th May 1967.

Comprising water inlet and outlet means in a base plate with a cover thereon defining there with a chamber sorrounding said means and including a diaphram and diaphram and bleed passage in said base plate.

103742. Esso Research and Engineering Company. Process for the production of sponge iron. Accepted on 29th May 1967.

Characterized in that additive compounds selected from oxides, carbonates and mixtures thereof of the group II, III-A, IV-B and VI-B metals of the periodic chart of the elements are dispersed in liquid and are admixed to the ore in sufficient quantity to provide an additive concentration.

103776. Etablissements Merlin & Gerin. Societe Anonyme. Pressure-gas circuit-breaker with two breaks in series. Accepted on 30th May 1967.

Comprising two pairs of contacts connected in series, one of which is intended to effect a break under load in an extinction chamber formed by a cartridge filled with gas under pressure a fixed rod issuing from one end of the cartridge and constituting a current input terminal into the cartridge, a mobile rod issuing from the opposite end of the cartridge and constituting the current output terminal from the cartridge.

103852. Textron Inc. Line suspension. Accepted on 1st June 1967.

Comprising the combination of a hanger and a pair of line gripping elements each of the element being comprised of resilent rods formed into an open helix, the elements extending in opposite directions from the hange and engaging the line by wrapping around it.

103384. Sunbeam Corporation. Hair dryer. Accepted on 30th May 1967.

Comprising a portable casing an electric motor, fan and heater assembly in said casing, including switch means, an air inlet and air outlet and a flexible hose.

103387. Solar Thomson Engineering Company Limited. Improvements in or relating to conveyor belts. (12th January 1965). Accepted on 25th May 1967.

Characterised in that the projections forming guide ways for cables associated with each face of the belt are laterally off-set relative to those associated with the opposite face of the belt.

103911. Aryan Plastics. Improvements in and relating to device for moulding thermoplastic materials. Accepted on 31st May 1967.

Consisting of an electric drier for preheating the material to be moulded, a first hydraulic press having its upper and lower platens fitted with electric heating arrangement, a second hydraulic press having its upper and lower platens fitted with water-cooling arrangement.

104032. Stamicarbon N. V. Process for the preparation of oil-extended rubbery polymers. Accepted on 29th May 1967.

Comprises incorporating 05% water in the polymer used and blending oil into the water-containing polymer.

104042. Toyo Rayon Kabushiki Kaisha. Process for continuously preparing drawn polyamide filaments. Accepted on 29th May 1967.

Characterised by predrawing the undrawn filaments at a draw ratio from 1.25 to 2.90 while the birefringence of the melt spun rendrawn filaments is not more than 0.001.

104115. Imperial Chemical Industries Limited. Production of phthalocyanine dyestuffs and colouring textile materials therewith. (18th March 1965). Accepted on 1st June 1967.

Comprises treating a phthalocyanine compound with a salt of sulphurous acid.

104148. The Metal Box Company Limited. Improvements in or relating to bottles made of synthetic thermoplastic material. (10th March 1965). Accepted on 30th May 1967.

A bottle made of resilient synthetic thermoplastic material, having a body of uniform thickness opposite end portions of which have a cross section greater than that of the intermediate portion extending therebetween.

104339. Worthington Corporation. Oil lubrication system for refrigeration apparatus. Accepted on 2nd June 1967.

Comprising an oil reservoir an oil pump compressor and motive means pressure equilization line means oil pressure equilization means and a flow inducing means.

104467. Amsted Industries Incorporated. Composite pouring tube. Accepted on 26th May 1967.

Comprising a wall of an inner layer and an outer layer of refractory material and a steel shell embedded in the wall.

104557. Caterpillar Tractor Co. Improvements in bonding machines. Accepted on 2nd June 1967.

Comprising a rotary spindle for rotating one part, attaching means for attaching a selected number of inertial weights to the rotary spindle and storage means encircling the rotary spindle.

104604. Ciba Limited. Process for the manufacture of inorganic chlorides. Accepted on 29th May 1967.

Introducing mixture of alloy and sodium chloride into liquid sodium chloride and ferric chloride removing vapur form chloride and condensing.

104605. Vickers Seerdrum Limited. Improved feeding device and its use in an apparatus for pulverisation of refuse. (30th March 1965). Accepted on 26th May 1967.

A device for feeding material into a rotatable drum comprises within the drum, a shroud and a conveyor means.

104891. J. Stone & Company (Deptford) Limited. Improvements relating to washing and like treatments of textile fabrics and materials. (22nd April 1965). Accepted on 29th May 1967.

The material is acted by a surface-active washing agent at one stage and separately acted by a washing liquor applied energetically.

104922. Glaverbel. A process and machine for drawing a sheet glass. Accepted on 29th May 1967.

A sheet glass drawing machine comprises a drawing chamber, main and auxiliary coolers, and deflecting surfaces.

104963. Raytheon Company. Travelling-wave tubes. (20th December 1965). Accepted on 30th May 1967.

Comprising a slow wave structure, means for electron beam, means for magnetic field positive ion drainnig electrode.

104972. General Electric Company. Compound control system for a turbine. Accepted on 1st June 1967.

A primary valve connected to control flow of motive fluid from pressure source to the turbine, an additional valve connected to control motive fluid from said source so as to adjust any unbalance between motive fluid flow generated by the pressure source and that required by the turbine.

105052. Farbenfabriken Bayer Aktiengesellschaft. Process for the preparation of olefine oxides. (3rd March 1966). Accepted on 27th May 1967.

Electrochemical process in which the diaphragm which separates the anode chamber from the cathode chamber is made of a fabric of acrylonitrile fibres.

105075. Badische Anilin—& Soda-Fabrik Aktiengesellschaft. Catalytic cracking of hydrocarbons containing two to thirty carbon atoms. Accepted on 2nd June 1967.

By catalytic cracking of vaporizable hydrocarbon mixtures using steam at temperatures ranging from 350 to 950°C and at atmospheric or super atmospheric pressure.

105182. Brig. P. Singh. Implement for digging earth. Accepted on 19th May 1967.

Shovel blade and a pickaxe member together forming a single unit, the two implements being oppositely disposed to each other.

105185. M. H. Detrick Company, Ltd. Improvements in furnance walls. (11th May 1965). Accepted on 26th May 1967.

Comprising a casing member and an inner wall wherein an insulating layer is provided on the outer face of inner wall.

105195. Caterpillar Tractor Co. A system for controlling vibrations between articulately connected vehicle components. Accepted on 31st May 1967.

Comprising at least two links each independently pivotally connected at one end to one component and at the other end to the other component to permit relative limited vertical motion in response to such vibrations.

105329. R. M. Deshmukh and Industrial & Engineering Combine. Spring-action vice with a slot-actuating clamping device. Accepted on 1st June 1967.

Tension shaft with an E-type circlip mounted on it at its one end and with a slot in it, an internally threaded locking head, a halical-positioning spring, a helical-positioning spring and a helical-clamping spring, a nut washer and a screwed, a positioning-spring bush, a spacer bush, a welded bush and a stop constituted by a sleeve having a flange for helical clamping spring.

105370. Industriewerk Schaeffler O. H. G. Window-type cage for cylindrical rolling elements. Accepted on 29th May 1967.

End faces of the bars are set back relatively to the end faces which bound the cage in the axial sense.

105638. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to filtering apparatus. (11th June 1965). Accepted on 30th May 1967.

Comprises liquid pervious means for supporting a portion of a filter medium strip, movale means to replace said portion with a fresh portion and means to operate said movable means when liquid weight exceeds a predetermined value.

105642. Dolomitwerke G.M.B.H. Process for production of refractory shapes particularly for steel melting furnaces. Accepted on 30th May 1967.

Characterized in that the shapes are heated to temperatures between 200°C and 450°C before being laid in steel melting furnace and heating time is a function of lamp and lies within the A & C.

105674. Westinghouse Brake and Signal Company Limited. Conveyors. (12th July 1965). Accepted on 30th May 1967.

Restraining speed of a body passing along conveyor comprising an element rotatable at a rate dependent on speed of body and causing braking effect on it, and an inertial mass accelerated upon its rotation and viewing means.

105741. Calumet & Hecla, Inc. A method of making a dry fungicidal bordeaux composition. Accepted on 31st May 1967.

Comprises forming a dispersion in water containing a water soluble dispersing—stabilising agent, followed by spray drying.

105820. Leeds & Northrup Company. Power amplifier systems. Accepted on 26th May 1967.

Comprising a pulse generator, an AND gate and a power amplifier.

105828. Siemens-Schuckertwerke Aktiengesellschaft. Semiconductor component. Accepted on 27th May 1967.

Including a pressure-contact junction which incorporates a sintered porous disc of good electrical and thermal conductivity as an intermediate or junction body.

105911. F. H. Lloyd & Co., Limited. Railway buffling and/or drawgear. (23rd July 1965). Accepted on 29th May 1967.

Including a spring container consisting of a first and second groups of mutually pdrallel arms having inner and outer abutment means arranged such that inner abutment means of each group is between said means of the other group.

105922. St. Anne's Board Mill Company Limited. Apparatus for dewatering watery pulp. Accepted on 26th May 1967.

Comprising first and second bands adapted to move together over a portion of their travel around a static pressing element having an operative face which is convexly curved but non-circular, successive portions thereof being of progressively greater radius.

105900. Veb Stickstoffwerk Piesteritz. Process for the treatment of phosphorous slime especially for the treatment of aged or mechanically soiled slime. Accepted on 31st May 1967.

Characterised in prosphorus slime is stirred in inert gas atmosphere with soda lye in Na : P= 1.5 : 1 at 80°C.

106004. Vickers Limited. Improvements in apparatus for malting grain. (2nd July 1965). Accepted on 29th May 1967.

A perforated false floor difining the bottom of the charge space, means for supplying and draining steeping liquor to and from said charge space means connecting air conditioning plant grain stirring means mounted in the vessel.

106027. Dana Corporation. Universal Joint. Accepted on 31st May 1967.

Having a yoke member with a pair of opposed lugs with crossholes, each of the lugs surrounding the opening therein and radially outwardly of the snap ring groove are deformed radially inwardly.

106107. Associated Lead Manufacturers Limited. Method of joining a piece of dispersion strengthened lead to a piece of the same material or of another metal. Accepted on 30th May 1967.

Comprising making a burnt joint by introducing between them a molten lead antimony alloy.

106138. Frick Company. Heat exchanger. Accepted on 1st June 1967.

A plurality of tube means for conducting a first floid, said tube means being in communication with the fluid chamber and the manifold, fluid delivery conduit means including passageway means in the tube sheet removably secured to one end of the shell.

106185. Shyamapada Mookerjee. Ticket perforating machine. [Addition to No. 10459]. Accepted on 31st May 1967.

Composing box for housing dies and being fitted inside a holding device provided with the machine and a punch carrier combined with a device for attaching itself to the guiding rod of the machine.

106278. Dr. C. Otto & Comp. G.m.b.H. Method and device for hardening pellets. Accepted on 29th May 1967.

Pellets are dried and prehardened in a first stage on a conveyor or moving through a continuous furnace, heated almost up to the finish hardening temperature by hot gases.

106396. The Metal Box Company Limited. Improvements in can ends. (2nd March 1966). Accepted on 26th May 1967.

A can end of tinplate comprises and panel and a metal closure member, provided with score lines.

106585. Libbey-Owens-Ford Glass Company. Apparatus for heating target material in a high vacuum electron furnace. Accepted on 2nd June 1967.

Comprising electromagnetic means and means is coupled to the electromagnetic means for varying the orientation of the magnetic field characterized in that a circuit is connected to the orientation varying means for varying the orientation of the magnetic field.

106611. James A. Jobling & Company Limited. Improvements in or relating to equipment for heat-treating the ends of elongated glass articles. (12th August 1965). Accepted on 31st May 1967.

Comprising a pair of elongated ovens open along one side, support means associated with each oven far supporting on elongated article and advancing means for moving an article.

107114. Brown, Boveri & Company Limited. Resilient post insulator. Accepted on 29th May 1967.

Characterised in that asymmetrically arranged spring bodies being disposed between two flanges arranged between the lower end of the insulator and the base for absorbing shearing forces.

107169. Veb Warnowwerft Warnemunde. Supplementary loading device, in particular for long cargo hatchways on ships. Accepted on 27th May 1967.

There are mounted fast on a portable beam or a hatchway cover which is connected firmly but releasably to the hatchway side-coaming, kingposts or frame works having derricks and winches or cranes.

107227. Castings & Forgings Pty. Limited. Inspection hole closure assembly. (8th March 1966). Accepted on 1st June 1967.

Manhole cover comprising a base secured into a surface, an internally open support member engaging base means adjusting height of support and a manhole covel.

107579. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to sodium vapour discharge lamps. Accepted on 30th May 1967.

Characterized in that the layer consists substantially of doped indium oxide (In_2O_3).

108289. Maschinenfabrik und Giesserei Netstal A. G. Method and equipment for the injection moulding of shaped articles from synthetic materials. Accepted on 1st June 1967.

Method for injection moulding wherein the raw material to be injected is continuously plasticised and alternatively conveyed to a measuring or controlling chamber and to a feeding chamber.

108309. Aktiebolaget Svenska Flaktfabriken. A channel for spray-painting intermittently or continuously advanced objects. Accepted on 1st June 1967.

Comprising an intermediate bottom is provided between the channel and chamber, which bottom comprises a number of stepped elements located one after the other.

109479. E. J. Longyear Company. Core drilling apparatus. [Divisional date 25th August 1965]. Accepted on 25th May 1967.

A core barrel inner tube assembly comprising means for collecting sample and detent means being positioned to move to a retracted position.

109578. Rohm and Haas Company. Pesticidal compositions. [Addition to No. 100983]. [Divisional date 30th August 1965]. Accepted on 30th May 1967.

Contains phosphorimidie triamide salts such as N, N', N'', N'''—tetralies (1, 1, 3, 3-tetramethyl butylamino) phosphonium fluoborate.

109857. James Howden and Company Limited. Improvements in or relating to rotary regenerative preheaters in combination with fire detection apparatus. (8th June 1965). [Addition to No. 101566]. [Divisional date 14th September 1965]. Accepted on 27th May 1967.

With the first and second temperature sensitive elements being first and second thermocouples of which negative terminals are common, the first thermocouple being fast response one and second thermocouple being slow response one.

110593. Pactide Corporation. A plural membrane assembly for use in distillation apparatus. [Divisional date 24th November 1965]. Accepted on 24th May 1967.

Plural membrane assembly wherein vapour is transferred from an evaporating liquid film to a condensing liquid film, comprising a porous membrane permeable to said liquid and a barrier membrane.

110631. The British Iron and Steel Research Association. Improvements in or relating to preheating and refining apparatus. (7th May 1967). [Addition to No. 101169]. [Divisional date 17th August 1965]. Accepted on 17th May 1967.

Characterized in which the pre-heating vesssel has an annular space between it and the vessel wall with means for conducting the hot effluent gases from the furnace down through the annular space and thence through the charge.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that Smith & Nephew Plastics Limited, a British Company, of Neptune Street, Hull, Yorkshire, England, seek leave to amend the description and claims in the specification in respect of application for patent No. 101104. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

The amendment proposed by Dow Corning Corporation in respect of patent application No. 98131 as advertised in the Gazette of India, Part III, Section 2 dated he 25th February 1967 has been allowed.

Registration of Assignments, Licences, etc. (*Patents*)

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests :—

70991—Mr. G. A. Suryabhattanavar and others.

Restoration Proceedings

(1)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 80826—William Gray Horton.

The patent ceased on the 19th February 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 3rd June 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 22nd July 1967.

(2)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following Patent :—

No. 81796—Jayantilal Parmananddas Sanghrajka.

The patent ceased on the 17th April 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 3rd June 1967. Any person may give notice of opposition to the restoration by leaving in application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 29th July 1967.

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of following patent :—

No. 83158—Dr. Saradindu Mohan Ghosal.

The patent ceased on the 9th July 1966, owing to non-payment of renewal fee within the prescribed time and cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 3rd June 1967. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents & Designs Rules, 1933 at the Patent Office, 214, Lower Circular Road, Calcutta-17, on or before the 29th July 1967.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 13. Nos. 130661 and 130662. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13. "Textile piecegoods", April 4, 1967.

Class 13. Nos. 130671 and 130672. The Bombay Dyeing & Mfg. Co. Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", April 6, 1967.

Class 13. Nos. 130700 to 130702. The Standard Mills Company Limited, Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", April 13, 1967.

Class 13. Nos. 130708 to 130710. The Bombay Dyeing & Mfg. Co., Ltd., a Public Limited Company, an Indian Company incorporated in India under the Indian Companies Act, 1866, Neville House, Ballard Estate, Fort, Bombay-1, "Cotton textiles", April 18, 1967.

Class 13. No. 130727. Sovrin Knit Works, Fatehgarh Road, Amritsar (Punjab), a registered firm of Indian Nationality, "Textile goods", April 22, 1967.

Class 13. Nos. 130729 and 130730. The Standard Mills Company Limited. Mafatlal House, Backbay Reclamation, Bombay-1, Indian, "Textile goods", April 22, 1967.

Class 14. No. 130697. The Victoria Mills Limited, an Indian Company Delisle Road, Parel, Bombay-13, "Textile piecegoods", April 12, 1967.

Class 14. No. 130734. The Crown Spg. & Ftg. Co., Ltd., Gokhale Road (South), Parel, Bombay 13, Maharashtra, Nationality—Indian Comapny, "Textile goods", April 22, 1967.

THE PATENT OFFICE

Patents and Designs

Calcutta, the 24th June 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

3rd June 1967

110954. Ciba of India Limited. Process for the manufacture of a new azabicycloaliphatic compound. [Divisional date 3rd August 1966].

110955. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. New food composition.

110956. Institut Francais De Petrole, Des Carburants Et Lubrifiants. Process for cultivating algae in a synthetic medium.

110957. Dowty Mining Equipment Limited. Track-mounted devices for influencing the speed of railway vehicles. (15th June 1966).

110958. U. Sato. Improvements in or relating to the production of plastic sheet. (27th April 1967).

110959. Mecano-Bundy GMBH. Improvements in or relating to heat exchanger tubes.

110960. Atlas Copco Aktiebolag. Improvements in screw rotor machines and profiles.

110961. Engineers (Overseas) Corporation Private Limited. Continuous production of diacetone alcohol.

110962. Pechiney—Compagnie De Produits Chimiques Eet Electrometallurgiques. A process for the purification of sodium aluminate liquors.

110963. Miles Laboratories, Inc. Fermentation process. (25th July 1966).

110964. Massey-Ferguson (Australia) Limited. Improvements in machines for harvesting tall crops. (10th June 1966).

110965. Luwa AG. Monitoring device for textile machines for determining interruptions at moving fibre strands or the like.

5th June 1967

110966. Bata Shoe Company Private Limited. Injection molding apparatus.

110967. Wellworthy Limited. Improvements in or relating to piston rings. (6th June 1966).

110968. N. V. Koninklijke Pharmaceutische Fabrieken V/H Brocades-Stheeman & Pharmacia. New process for the preparation of N-alkyl-hydantion derivatives. [Addition to No. 103613].

110969. Sandoz Ltd. Improvements in or relating to organic compounds. (6th June 1966).

110970. Pilkington Brothers Limited. Improvements in or relating to apparatus for supporting a glass sheet and a method of treating the glass sheet using such apparatus. (6th June 1966).

110971. Roussel-Uclaf. Processes for preparing novel aminothiazolo steroids. (22nd July 1966).

110972. Lodzkie Zaklady Kinotechniczne Przedsiebiorstwo Panstwowe. Device for developing images in xerographic apparatus.

110973. Lodzkie Zaklady Kinotechniczne Przedsiebiorstwo Panstwowe. Reproduction camera with vertical optical axis.

110974. Dana Corporation. Improvements in or relating to hub clutch.

110975. V. M. Dujodwala, R. M. Dujodwala, S. V. Dujodwala and O. R. Dujodwala. Improvements in/or relating to the preparation of terpene alcohols from turpentine oil.

110976. Deutsche Gold Und Silber Scheideanstalt Vormals Roessler. Dicarbonic acid derivatives of substituted S-triazines and a process for the preparation thereof.

6th June 1967

110977. S. G. Karandikar. Water seal.

110978. Atlas Copco Aktiebolag. Improvements in thrust balancing in rotary machines

110979. T. M. M. (Research) Limited. Improvements in or relating to card clothing for textile carding machines. (22nd June 1966).

110980. Koppers Company Inc. Novel rubber compositions.

110981. Vsesojuzny Nauchno-Issledovatelsky Institut Antibiotikov. Actinomyces (Streptomyces) rimosus strain 1st-416 for the production of oxytetracycline.

110982. Leningradsky dvazhdy ordena Lenina Metallurgichesky zavod imeni XXII sjezda Kpss. Hydraulic turbine runner.

110984. Kanegafuchi Boseki Kabushiki Kaisha and Snia Viscosa Societa Nazionale Industria Applicazioni Viscosa S.p.A. A method and a device for developing crimps on composite filament yarn.

110985. Matsushita Electronics Corporation. Deposition method of refractory metal.

110986. Asahi Kasei Kogyo Kabushiki Kaisha. Method of and apparatus for crimping synthetic fibres.

110987. The Wellcome Foundation Limited. Biologically active amidines and their preparation. (21st June 1966).

10988. Farbwerke Hoechst Aktiengesellechaft vormals Meister Lucius & Bruning. Heated godet for stretching synthetic filaments and films.

10989. Glanzstoff A. G. Method of improving the purity and homogeneity of threads or filaments in melt-spinning. (7th April 1967).

110990. Palitex Project-Company G.m.b.H. A double twist spindle.

110991. National Lead Company. Continuous method and apparatus for producing magnesium metal from magnesium chloride.

110992. Spanform Limited. Improvements in floorings and roofings for buildings.

110993. U. Sato. Method for production of thermoplastic synthetic resin foams.

110994. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Self-extinguishing thermoplastic molding compositions.

110995. Diosgyori Gepgyar. Pneumatic control device, especially for the servo-control of counter-stroke hammers.

110996. Egyesult Gyogyszer-Es Tapszergyar. New derivatives of alkylbenzazol and process for their preparation.

110997. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to camera tubes of the vidicon type.

110998. Isgec John Thomson Ltd. Containers suitable for storage or transport of liquefied gases.

110999. Shell Internationale Research Maatschappij N. V. Novel herbicides, their preparation and use. (8th June 1966).

111000. The North Western Gas Board. Hydrocarbon desulphiding process. (16th June 1966). [Addition to No. 98593].

111001. The North Western Gas Board. Desulphiding catalyst. (16th June 1966). [Addition to No. 98593].

7th June 1967

111002. Dr. G. P. Palnitkar. A novel self-lighting cigarette, bidi, cigar and the like.

111003. The Upjohn Company. Process of preparing trimethylsilyl ethers.

111004. The Upjohn Company. Process of preparing silyl ethers of chloramphenicol.

111005. The Wheelabrator Corporation. Machine and method for surface treatment of large articles.

111006. J. Ulderup. Improvements in and relating to ball and socket joints.

111007. Nippon Shokubai Kagaku Kogyo Co., Ltd., Process for the manufacture of piperazine and N-aminoethyl piperazine.

111008. F. K. Nabiullin, Z. M. Buzova, B. V. Marfin, V. A. Rabinovich, I. I. Koval, E. M. and Gertsik. Method for manufacture of galvanic cells and arrangement for accomplishing same.

111009. Deere & Company. Cotton picker. [Divisional date 11th November 1965].

111010. Celfil Company Establishment. Method and apparatus for making filter material for cigarettes.

111011. G. K. N. Group Services Limited. Improvements relating to apparatus for the detection of flaws.

111012. Imperial Chemical Industries Limited. Light-stable polyesters. (16th June 1966).

111013. M & T Chemicals Inc. Control circuit for electrodeposition system using silicon controlling rectifier.

111014. Universal Oil Products Company. Method and apparatus for multiple stage contact of reactants.

8th June 1967

111015. G. K. Trivedi. A Sari-folder for keeping saris.

111016. Ciba Limited. Dihydroquinolines, process for their manufacture and compositions containing them.

111017. Continental Can Company, Inc. Resistance welding apparatus.

111018. Lemforder Metallwaren AG. Improvements in or relating to sealing arrangements for joints which are movable in all directions, particularly ball joints.

111019. Ciba Limited. 2-amino-quinolines, process for their manufacture and compositions containing them.

111020. Ethyl Corporation. Chemical process. [Divisional date 16th November 1965].

111021. Ethyl Corporation. Chemical process. [Divisional date 16th November 1965].

111022. Caterpillar Tracktor Co. Hydraulic actuating means for tractor steering clutches.

111023. Rohm and Haas Company. Iron oxide.

111024. Farbenfabriken Bayer Aktiengesellchaft. Polycyclic anti-ozonants, and polychloroprene-based rubber containing same.

9th June 1967

111025. Iype P. V. Scorflex for making foot wear, bed, cushion, seat etc.

111026. Ibcon Private Limited. A flushing cistern.

111027. Westinghouse Electric Corporation. Fluid-blast circuit interrupter with piston assembly and electromagneic driving means.

111028. American Home Products Corporation. Synthesis of steroids. [Addition to No. 109354].

111029. Uniroyal, Inc. Improvements in silicone surfactants as latex sensitizers.

111030. Fuchs-Letschert Sohn. Packing element.

111031. B. N. Basack. Pilfer proof capsule

111032. Sandoz Ltd. Improvements in or relating to organic compounds. (10th June 1966).

111033. The Power-Gas Corporation Limited. Improvements in the manufacture of phosphonitrogenous fertilisers. (10th June 1966).

111034. The Power-Gas Corporation Limited. Improvements in the manufacture of phosphonitrogenous fertilizers. (16th June 1966).

111035. I. C. Jennings. Vacuum pump.

111036. Automachs. Improvements in or relating to cigarette cases.

111037. N. V. Organon. New process for the preparation of $\Delta^{5(10)}$-3-keto-19-nor-steroids.

Alteration of Dates

102831. The claim to priority date 7th December 1964 has been disallowed and the application dated as of 3rd December 1965, the date of filing in India.

102699. The claim to priority date 21st December 1964 has been disallowed and the application dated as of 26th November 1965, the date of filing in India.

Application Accepted

Notice is hereby given that all persons interested in opposing the grant of patent's on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed Form No. 6 of the Indian Patents and Designs Rules, 1933, of such oppositions.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India book Depot, 8, Hastinge Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specification as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the Office.

The dates shown in crescent brackets are the dates allowed under Section 78A of the Act.

101417. Acf Industries. A float value needle method of making same and a carburator containing such needle. Accepted on 2nd June 1967.

Comprising a needle body having a neck portion a resilient tip having a cylindrical portion moulded at the neck portion, a frustro-conical sealing portion formed with the said cylindrical portion.

101629. Council of Scientific and Industrial Research. A direct indicating load cell. Accepted on 5th June 1967.

Consists of a cylinder wherein a system of two levers—first and second levers is provided inside the clinder wherein the cylinder is fitted with a top end plate and a bottom end plate which end plates move closer when the load is applied on the load cell.

101652. S. Nishi. The lance pipe for the injected oxygen in steel making. Accepted on 5th June 1967.

Comprising an uninpregnated steel, iron-aluminium alloy layers, a thin film consistng of refractory materials applied on the interior alloy layer, and a film consisting of refractory materials having a high melting point, applied as a coating on the exterior alloy layer.

102699. M & T Chemicals Inc. Process of preparing oxyomegasulfohydrocarbon-di-yl, coumarin compounds and electroplating of nickel with a solution containing said coumarin compounds. Accepted on 26th May 1967.

A mixture containing methanol potassium hydroxide and 7-hydroxy coumarin is mixed with 1, 3-propane sultone and heated.

102757. Universal Oil Products Company. Process for the polymerization of unsymmetrical conjugated diolefinic hydrocarbons. Accepted on 30th May 1967.

By stereoselective polymerisation of an unsymmetrical conjugated diolefinic hydrocarbon at a temperature from 0° to 100°C and pressure from atmospheric to 100 atmospheres and in the presence of a catalytic composite comprising an alkali metal composited with a precalcined adsorptive solid support.

102814. W. R. Grace & Co. Compositions containing amic acid esters, for regulating the growth of plants. Accepted on 2nd June 1967.

Comprising amic acid ester and an inert carrier.

102818. Girling Limited. Improvements relating to vehicle brakes. Accepted on 2nd June 1967.

Comprising a piston separating a first and second chambers connected respectively to master and slave cylinders, a flow responsive valve and throttle in series connecting the chambers and a passage by-passing the valve and the throttle.

102819. Girling Limited. Improvements relating to vehicle brakes. Accepted on 2nd June 1967.

Comprising first and second chambers connected respectively to master and slave cylinders, a plunger displaceable against spring pressure having faces of equal areas exposed to said chambers and a deceleration responsive valve connecting the chambers.

102831. Imperial Chemical Industries Limited. Improvements in the preparation of block copolymers and the treatment of shaped articles therewith. Accepted on 3rd June 1967.

Comprises melt blending a homopolyester of a sulfur free dicarboxylic acid with a homopolyester of an unsaturated dicarboxylic acid followed by reacting the unsaturated groups with either sulphur dioxide or sulphurous acid or salts of sulphurous acid.

102834. Chemische Werke Witten Gesellschaft Mit Beschrankter Haftung. Process for the fusion coating of metals with polyamides in powder form. Accepted on 3rd June 1967.

Fusion coating of metals with polyamide powder at temperatures from 100 to 170°C up to a molecular weight which corresponds to a specific gravity factor 0.5 to 1.0.

102840. Oerlikon-Buhrle Holding A. G. Improvements in a method for filling loom shuttles with cut-to-length pieces of weft thread and apparatus for the performance of the aforesaid method. Accepted on 5th June 1967.

Comprising the step of continuously delivering a thread along a predetermined thread path and past a reference point at said thread path into the inlet opening of the shuttle.

102852. Hugo Patersen. A process of removing so_2 from an so_2-containing gas flow and apparatus therefor. Accepted on 5th June 1967.

Comprises adding ammonia to gas flow, injecting ammonium sulfite, bisulfite, or sulfate, contacting the above two in separating zone.

102885. United States Steel Corporation. Method and apparatus for reducing width of metal slabs. Accepted on 7th June 1967.

Method of reducing width of casting comprising reducing the width in first and second stands edge-rolls and increasing the tension in the second stan.

102892. The Goodyear Tire & Rubber Company. Tire building bladder and apparatus. Accepted on 8th June 1967.

Comprising a first fluid retaining member of elastomeric material having a generally cylindrical configuration that terminates at both ends with a bead ring, a second member positioned concentrically and interiorly of said first member and joined to the latter intermediate its end.

102896. The British Iron and Steel Research Association. A workpiece manipulator for a forging press. Accepted on 7th June 1967.

A workpiece manipulator for gorging press including means for positioning automatically the peel to locate the workpiece in the upper position when the tools are open and means to permit the workpiece to sink from upper position on to the lower press tool.

102975. The Babcock & Wilcox Company. Steam generators. Accepted on 2nd June 1967.

Characterized by means for mixing combustion air and liquid fuel in combustion chamber including means for tangentially introducing air from windox into combustion chamber, and means for introducing liquid fuel into combustion chamber.

103004. N. V. Philips Gloeilampenfabrieken. Improvements in resonant cavity magnetrons. Accepted on 8th June 1967.

Characterized in that in the proximity of aperture the wall is deformed with respect to the other resonant cavities so that the electric and thermal properties of the resonant cavities are mutually equal.

103010. Allied Chemical Corporation. Process of and apparatus for the heat treatment of yarn. Accepted on 5th June 1967.

Includes a draw roll, a heater with triangular cross-section, separator and draw rolls, the heating surfaces and one end of draw roll having low-friction matte surface.

103039. British Ropes Limited. Manufacture of wire strands. Accepted on 5th June 1967.

The method is characterised by the steps of supporting a plurality of supply packages on means in stationary attitudes, by restraining rotation of each wire at a first point between the respective packages and the plying point.

103116. J. R. Geigy A. G. Process for the production of acid anthraquinone dyestuffs. Accepted on 8th June 1967.

Comprises in reacting an anthraquinone compound with an aralkylamine to form the corresponding 1-Sec. alkylamino-4 aralkylamino-anthraquinone compound and sulphonating this to form a dyestuff.

103157. Imperial Chemical Industries Limited. Improved textile treatment process. (24th December 1964). Accepted on 9th June 1967.

By impregnating the textile with caustic alkali and storing the same in a wet state in an atmosphere freed from acidic gases.

103422. Imperial Chemical Industries Limited. Improvements in or relating to the production of carpets and the like. (14th January 1965). Accepted on 7th June 1967.

Comprising a laminate having a plurality of uniaxially oriented firms formed from crystallisable polymer bonded together to provide strength in the laminate.

103430. Standard Telephones and Cables Limited. Improvements in or relating to electromagnetic contact-making relays. (12th March 1965). Accepted on 7th June 1967.

Comprising a resilient diaphram secured to an outer magnetic member and spaced normally from an inner magnetic member, the diaphram and the inner member constituting the contacts of the relay and being brought into contact with each other by energization of a magnetic circuit.

103439. Dynamit Nobel Aktiengesellschaft. Hardenable born-containing synthetic resigns and moulding composition containing said resins. Accepted on 8th June 1967.

Comprises condensing formaldehyde or a substance capable of liberating formaldehyde with a cyclic aryl borate.

103487. Allied Chemical Corporation. Process for the production of polyamide-polyester blend and fibres produced therefrom. Accepted on 3rd June 1967.

Comprises forming molten mixtures of synthetic linear fibre forming polyester and polyamide with at least 40% end of primary amino groups, and 0.5-3 equivalents of amino end groups of viscosity stabilizer reactive with primary amines an applying shearing forces to disperse one polymer in the other.

103647. Ciba Limited. Process for the preparation of finely divided, insoluble melamine-formaldehyde condensation products. Accepted on 5th June 1967.

Reacting aqueous solution of melamine and formaldehyde in presence of protective colloid at pH of 6.0—8.0.

103664. N. L. Rangiah. An improved device for running a cycle dynamo Accepted on 3rd June 1967.

Comprising of a metal circular disc having a central hole for fixing over the hub and provided with a circular rubber band of substantially U-shaped cross-section fitted over the periphery of said circular metal disc.

103956. A. Ostermann. Electro-mechanical register counter. Accepted on 3rd June 1967.

Contact device is associated with that one of the registers which includes the index value corresponding to the state of the counting mechanism chosen for pulse transmission.

103987. The Dow Chemical Company. High Impact styrene polymer compositions and shaped articles made therefrom. Accepted on 8th June 1967.

Incorporating 0.5—10 *parts of copolymer of more than* 50% *by weight of ethylene and less than* 50% *of vinyl compound* $H_2C{=}CHZ$ *being* $CH_3{-}OOC{-}C_nH_{2n+1}$ *when n is =1 or 2, COOR, R being alkyl group, in* 100 *parts of solid resinous thermoplastic styrene polymer.*

104126. Ciba Limited. New diepoxy compounds, process for their manufacture and curable mixtures containing the same. Accepted on 8th June 1967.

Comprises the reaction between a cycls hexane derivative containing a halohydrin group with a dehydrohalogenating agent such as strong alkalia, to form a 1 :2 *epoxide compounds followed by the epoxidation of c-c bond in cyclohexene ring or, the reaction between a cyclohexene derivative containing a* $CH_2{-}CH_2$ *residues or a epoxide group with an epoxidising agent.*

104198. Borg Holding Aktiengesellschaft and Farbenfabriken Bayar Aktiengesellschaft. A process for the production of protective layers in water-containing and/or steam containing plants. (31st December 1965). Accepted on 8th June 1967.

Comprises (a) cleaning plant with organic acids forming soluble complexes with iron at pH 2—9 *and* 50—200°*C treating with (b) oxidizing agent at pH* 6 *and* 20—100°*C to convert iron (II) to (III) and (c) with hydrazine at pH* 6—10 *and* 20—100° *in presence of accelerators.*

104206. Veb Werkzeugmaschinenfabrik Magdeburg. Arrangement for feeding decimalbinary path information. Accepted on 6th June 1967.

Having information carrier for programming of integral measurement units e.g. whole millimetres, and selector switches groups for programming the fractions of respective measuring unit.

104257. Koppers-Wistra-Ofenbau Gesellschaft mit beschrankter Haftung. Slide rails for tunnel furnaces. [Addition to No. 97707]. Accepted on 8th June 1967.

Including a bearer tabe and metal skids wherein the terminal saddles are releasably secured the bearer tube.

104266. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to devices for producing an electron current. Accepted on 3rd June 1967.

Comprising a semiconductor body, at least part of the semi-conductor body having p-type conductivity and being provided with at least two electrical connections at least one of which is an injecting connection.

104289. H. W. Kearns & Co., Limited. Improvements in horizontal boring machine tools. (15th March 1965). Accepted on 5th June 1967.

Headstock on a rigid mounting comprising columns supporting the headstock and interconnected above the headstock by a bridge and an electric motor being mounted on the bridge and provided with transmission means.

104315. N. L. Asrani. A multi-purpose electric holder. Accepted on 3rd June 1967.

Having sockets for fitting pin plugs integral with the electric lamp holder and bayonet type contact pin eccentric in its construction.

104485. Fuller Company. Horizontal heat exchanger. Accepted on 6th June 1967.

Improvement comprising means positioned between casing and transporting means for confining a quantity of material to form a flexible material wall thereabove.

104486. E. I. Valyi. Method and apparatus for making plastic tubes. (10th August 1965). Accepted on 5th June 1967.

Method of making a hollow articles including the steps of moulding a parison with one open end and a neck portion at its other end, removing the parison to a blow mould

104492. Potasse & Engrais Chimiques. Improvement to the manufacture of complex fertilizers. Accepted on 3rd June 1967.

Adding phthalic anhydride to the fertilizer mixture at any step before granulation.

104531. Zavody vseobecneho strojirenstvi Oborove Reditelstvi. Ejection opening cover of automatic guns. Accepted on 5th June 1967.

Cover being in engagement with or control projection fixedly associated with a trigger.

104555. The Goodyear Tire & Rubber Company. Improvements in improved apparatus for breaking pick cords used in pneumatic tyre manufacture. Accepted on 5th June 1967.

Comprising a pair of parallel rolls, the flanges of each of the said roll extending into the space between the flanges of the other of said rolls.

104556. Calumet & Hecla, Inc. Method of and structure for pressurizing tube sections with gas. Accepted on 5th June 1967.

Structure for pressurizing tube sections with gas comprising tube purging apparatus, and a separate plug for insertion in each end of the tube.

104621. Sperry Rand Corporation. Electric dry shaver. Accepted on 5th June 1967.

Cutter drive member has at least a second movable surface connected in driging relationship with cutter operating means and movable thereby in a direction opposite to that of first surface.

104674. United States Rubber Company. Improvements in rubber composite, method and composition of matter. Accepted on 7th June 1967.

Comprises an unvalcanised sulphur vulcanisable terpolymer, a vulcaniser, a resin.

104702. Joseph Lucas (Industries) Limited. Flasher units for operating direction indicator lamps on road vehicles. (29th April 1965). Accepted on 5th June 1967.

Includes a third terminal which in use is connected through a direction indicator switch, a normally open pilot contact, a main contact resilient means, and a combined actuating wire and ballast resistor.

104822. Sheth & Sheth Industries. Intermittingly rotating display device. Accepted on 8th June 1967.

An intermittently rotating display device consisting one or more equilateral triangular prism mounted horizontally and respective shafts and vertical shafts connected to each horizontal shafts through bevel gears.

104896. AB Tetra Pak. A device for removing liquid in an aseptic way from a web-shaped packaging materterial. Accepted on 8th June 1967.

Characterised by a closed system including a nozzle in the form of a slot opening, a member for producing an over pressure in said slot opening so that the liquid in the form of droplets might be wiped off.

105006. Ceskoslovenska akademie ved. Method of manufacturing articles from hydrogels by polymerization casting. Accepted on 8th June 1967.

By polymerisation casting of a monomer mixture consisting of a mono-olefinic hydrophilic monomeric material, a crosslinking agent and an inert liquid miscible with water the inert liquid used in excess of 40% *of said monomer mixture.*

105023. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of joining in a vacuum-tight manner parts of a vacuum vessel. Accepted on 7th June 1967.

Characterized in that the surface to be joined are placed against each other with the interposition of a layer of indium where upon the indium is melted by gradually increasing heating in a reducing atmosphere at a temperature beyond 350°*C and is alloyed with copper of at least one of the surfaces to be joined until the melting temperature of the alloy eceeds the heating temperature and the soldering layer solidifies at this temperature.*

105130. J. R. Geigy A. G. Method of stabilization or organic materials with carbon-bonded phosphorus derivatives and compositions stabilized thereby. Accepted on 3rd June 1967.

Comprises in mixing from 0.01% *to* 10% *of a substituted carbon bonded phosphorus derivative to the organic material normally subjected to detoriation such as polypropylene.*

105156. B. R. Nandrajag. Bi-metalic electric connectors. Accepted on 5th June 1967.

Comprising a first and second block of different metals, at least one groove being provided in said blocks, an insulating means, and a spring plate.

105163. Farbwerke Hoechst Aktiengesellschaft Vormals Meister Lucius & Bruning. Process for the dyeing and printing of cellulose textile materials with oxidation dyestuffs. Accepted on 8th June 1967.

Padding with padding liquors or printing pastes which contains in addition to oxidation dyes oxidizing agents and other usual adjuvants alkali metal salts or alkaline earth metal salts of carboxylic acids which upon heating yield carbonates, and steaming textile material as usual.

105177. Fabriques Reunies De Lampes Electriques. Improvements in or relating to electric incandescent lamps or discharge lamps. Accepted on 5th June 1967.

Each current supply member is clamped, by means of an approximately U-shaped profile, on one of the preferably thickened peripheral parts of the pinch and extends substantially at the side of the pinch.

105226. Aluminium Laboratories Limited. Improvements in or relating to subhalide distillation process for the recovery of aluminium. Accepted on 8th June 1967.

Comprising coating a flow of aluminium monohalide gas to produce substantially complete decomposition of aluminium monohalide conducting the decomposer exit gas to a second locality and removing liquid aluminium fog droplets at such second locality by coalescing droplets at a temperature above the melting points of aluminium.

105252. Shri C. Lal. A machine for the production of stampers for printing gramophone discs. Accepted on 3rd June 1967.

Comprising a plating bath tank, a spindle carrying a nickel plated stamper, means for rotating the said stamper disposed in horizontal plane, copper anode suspended from bas-bars, said spindle being adapted to pick up current during its rotation.

105326. Kalle Aktiengesellschaft. Process and material for the preparation of planographic printing plates. Accepted on 6th June 1967.

An aluminium sheet, coated on at least one side with at least one compound selected from the group consisting of an organic phosphoric acid and a derivative thereof, to a water treatment and applying a second coating of a light-sensitive material.

105391. Joseph Lucas (Industries) Limited. Stator assemblies for dynamo-electric machines. (31st May 1965). Accepted on 5th June 1967.

Cylindrical yoke is formed in two inter connected parts wherein each pole piece is having one end thereof rounded, and adjacent pole pieces are having their rounded ends at opposite axial ends of the yoke.

105441. Vsesojuzny Nauchno-Issledovatelsky i Proektno-Konstruktorsky Institut Metallurgicheskogo Mashinostroenya. Continuous coiler for wire and similar flexible rolled stock. Accepted on 5th June 1967.

The severing device and the device for gripping the front end of the wire being combined in one mechanism comprising lever mounted on the stationary part of the reel and provided with a knife gripper.'

105561. Mount Hope Machinery Limited. Expander roll. Accepted on 5th June 1967.

Comprising an axle having a curvature lying in an axial plane a plurality of bearings received on said axle in axially-spaced freely slidable relation.

105596. Standard Telephones and Cables Limited. Improvements in or relating to seam welding of tubes. (25th June 1965). Accepted on 6th June 1967.

Comprises causing a displacement in a direction between the tube and an welding electrode interposing an auxillary electrode between them, initiating flow of current removing the auxillary electrode and causing a second displacement equal and opposite to the first.

105648. International Standard Electric Corporation. Improvements in or relating to a wire stripping tool. (3rd August 1965). Accepted on 5th June 1967.

Includes a first sleeve-like member closely fitting within a second sleeve like member, a notch at one end of said second member, a groove in the first member, and a widened portion to said groove.

105666. *Davidson & Co., Limited.* Improvements in or relating to apparatus for drying tea leaf or other vegetable material. Accepted on 9th June 1967.

The apparatus comprises of a casing within which two or more endless conveyor are disposed and are spaced apart vertically so as to form a superimposed horizontal chamber within the casing.

105735. J. Voevodsky. Deceleration warning system for use on motor vehicles. Accepted on 5th June 1967.

An electrical switching circuit adapted to operate at a controlled switching rate serving to actuate control means to cause flashing of the light at the switching rate.

105825. Dipak Kumar Ghose. Improvements in cycles, bicycles or the like tube valves. Accepted on 5th June 1967.

Outer tubular body member having external threads for rings or nuts to be screwed thereonto, a valve member being insertable into said body member and means for locking the said outer tubular member and the said valve member.

105936. Westinghouse Electric Corporation. Termination of insulators. Accepted on 5th June 1967.

Portion of the insulator having conducting material in intimate contact therewith is connected with the conductor by means of a slot such that dielectric flux diverges to the walls of the slot.

105956. Mohammed Sirajuddin. Pneumatic blender for and process of blending materials. Accepted on 7th June 1967.

Comprising a primary mixing zone a secondary mixing zone comprising a centrifugal exhauster, a final mixing zone comprising a cyclone separator and filter bags associated therewith.

106039. Betts & Company Limited. Improvements in collapsible tubes. (6th July 1965). Accepted on 5th June 1967.

The interengaging surfaces of the nozzle and the sleeve being shaped to define two spaced-apart circumferential regions of substantially line contact between the interengaging surfaces.

106052. Provat Kumar De. Improvements in or relating to door closures. Accepted on 5th June 1967.

Springs provided with a piston acting within a closed cylinder enclosed within an oil chamber, the piston rod being connected to a movable oil adjuster bracket on which is rigidly secured one end of a pair of springs, the other end of the springs being held to another guard plate fixed to the casing.

106065. Bulpit & Sons Limited. Electrically heated appliances having thermal cut-outs. (6th July 1965). Accepted on 5th June 1967.

Cut-out device comprising a rachet assembly including two or more rachets, each secured by fusible metal to a fixed part and each engaged by an associated pawl on or coupled to a common plunger.

106108. K. Sundararajan. Instantaneous relay for earth leakage. Accepted on 7th June 1967.

Comprising a plunger which can move up and down and thereby to close or open an electric circuit and a locking arrangement to lock in either of the said position.

106117. Aktiebolaget Svenska Flaktfabriken. A device for the supply of ventilating air in rooms. Accepted on 5th June 1967.

Comprising a rectangular box open at the top, at the first side wall of which a movable damper is arranged along the edge facing said open top.

106137. Centre De Recherches De Pont-A-Mousson. Core support for a centrifugal casting mould for casting pipes having a socket, and mould provided with said support. Accepted on 6th June 1967.

A socket core support comprising in combination a cup for supporting and centering core, a locking ring, compressed air blowing means blowing air between locking ring and face of recess, a handling stirrup, handling arm on whose end stirrup is mounted.

106290. Farbenfabriken Bayer Aktiengesellschaft. Isolation of trisazo dyestuffs. (16th March 1966). Accepted on 3rd June 1967.

Dyestuff solution or suspension obtained in the preparation of triazo dyes is immediately subjected to spray-drying without previous isolation of dyestuff.

106577. The English Electric Company Limited. Improvements in circuits for controlling stock-material cutters. (13th August 1965). Accepted on 7th June 1967.

Comprising a detecting means, first and a second counting means, and control means for initiating first operation of the device after a movement of the work material beyond the operating position corresponding to the sum of two count differences.

106586. The Cincinnati Milling Machine Co. Optical positioning device for parts of a machine. Accepted on 3rd June 1967.

Comprising a member on one section of the machine having a slot extending transverseiy of the direction of relative movement of the sections, projecting means on the other section directing a beam of light toward member of a width substantially equal to the width of the slot.

106589. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to vehicle headlights. Accepted on 7th June 1967.

Light rays emanating from the incandescent body after being reflected on the second part of the reflctor and/or refracted by the closure glass can leave the headlight only in directions located below the boundary determined by peripheral part of the screen arranged in the first part of the reflector.

106666. J. Stone & Company (Deptford) Limited. Improvements relating to electrical-supply systems on vehicles. (18th August 1965). Accepted on 7th June 1967.

Voltage/current characteristic of the charging current which reaches the battery is caused to droop with increase of the said current.

106841. General Electric Company. Improvements in or relating to wire coating apparatus. Accepted on 3rd June 1967.

Comprising a wire coating oven inciuding a housing a solvent removal zone, a heating means in said housing for producing a heated air-flow, a curing zone in said housing.

107036. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to vehicle headlights. Accepted on 2nd June 1967.

Characterized in that in the operating position of the headlight at least the terminal wires and the end wires of the first filament and preferably also of further available filaments are located substantially entirely above a plane which is substanitally horizontal in this position and which contains at least one point of the first filament.

107159. Siemens & Halske Aktiengesellschaft. Improvements in or relating to astable multivibrators. (22nd July 1966). Accepted on 5th June 1967.

Comprising a gate circuit, connected to the out put electrode of at least one of the two amplifier stages in the stable multivibrator to drive a control signal which is applied to one input electrode to change the state of one of said amplifier stages.

107168. Unilever Limited. Thermoplastic containers. Accepted on 9th June 1967.

Hollow article manufacturing method comprising the steps of closing both ends of a tubular preform and heating it to a softened to give shape the preform by deformation.

107236. Inpower Works (Proprietary) Limited. Fluid torque transmitter. Accepted on 5th June 1967.

Includes a carrier adapted for receiving a rotary power input, at least one planet wheel mounted rotatably on the carrier, a driven wheel co-axial with said carrier and driving by connected to the planet wheel and adapted for connection to a power output, liquid-entrapping means and a reservoir around said means.

107431. T. Yamaoka. Automatic noncompression starting device for internal combustion engine. Accepted on 8th June 1967.

Comprises means for normally maintaining the engine in a non-compressive state hydraulic pressure means for automatically releasing said non-compressive state and means for adjusting a variation of the operating fluid pressure.

107694. The Metal Box Company Limited. Improvements in or relating to dispensing closures for containers. (28th October 1965). Accepted on 5th June 1967.

Comprising a cap with a pouring spout hingedly connected thereto and extending through an aperture in the cap to communicate with interior of cap, the spout in one position closes the aperture and in another position co-operates with the aperture to form therewith a pour opening.

108035. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucious & Bruning. Improvement in the manufacture of linear fiber-forming polyesters. Accepted on 6th June 1967.

Carrying out melt condensation of di-glycol ester in presence of a germanium compound containing oxygen and phosphorus.

Opposition Proceedings

(1)

The opposition entered by Didier-Werke A. G. to the grant of a patent on application No. 71657 originally made by Russell Pearce Heuer, as notified in Part III, Section 2 of the Gazette of India, dated the 2nd December 1961, has been partly allowed. A patent will be sealed on the application, subject to amendment of the specification.

(2)

An opposition filed by Shalimar Industries Private Ltd. to the grant of a patent on application No. 94508, made by Bimal Kumar Ghosh has been treated as abandoned.

Patents Sealed

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that E.I. Du Pont De Nemours & Co., a corporation organized and existing under the laws of the state of Delaware, United States of America, located at Wilmington, Delaware, U.S.A., seek leave to amend the name, description and claims in the specification in respect of patent application No. 95021. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911 that the Cleveland Crane & Engineering Company, a corporation organized under the laws of the State of Ohio, United States of America, of Wickliffe, State of Ohio, United States of America, seek leave to amend the description and claims in the specification in respect of application for patent No. 9505. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the patent Office or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(3)

The amendment proposed by General Electric Company in respect of patent application No. 88814 as advertised in the Gazette of India, Part III, Section 2 dated the 25th February 1967 has been allowed.

Cessation of Patents

53210. 55576.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 129877. Himala Industries (India), 5, Asian Chemical Compound, Subhash Nagar, Caves Road, Jogeshwari (East), Bombay 60, (Maharashtra) (Indian Proprietorship Concern), "Tablet making machine", December 7, 1966.

Class 1. No. 130140. Madan Engineering Works, Cycle Market, Esplanade Road, Plot No. 5, Opposite Fire Brigade, Delhi-6, India, an Indian Partnership concern, "A gas regulator", January 16, 1967.

Class 1. Nos. 130361 to 130363. Geep Flashlight Industries Limited, of 28 South Road, Allahabad-1, U. P. India, an Indian Company, "A torch", February 13, 1967.

Class 1. No. 130265. Gurbachan Singh, Indian National, of P.O. Nawanshahr Doaba, Distt. Jullundur, Punjab, "A sewing machine", February 4, 1967.

Class 1. No. 130561. Mole-Richardson (England) Limited, a British Company, of 111, Wardour Street, London, W. 1., England, "A spot lamp", March 20, 1967.

Class 1. No. 130562. Mole-Richardson (England) Limited, a British Company, of 111, Wardour Street, London, W. 1., England, "A combined spot and flood lamp", March 20, 1967.

Class 1. No. 130315. Kuduva Nagaswamy Krishnan Inthera, B-3 & 4, Industrial Estate, Madurai-7, Madras State, Subject of the Indian Republic, "The deep-well pumpset", February 8, 1967.

Class 1. No. 130271. Natvarlal Revashankar Trivedi, Indian, C/o. Zacony Products, Lake Road, Opp. Krishna Cinema, Agra Road, Bhandup, Bombay-78, Maharashtra, "Door stopper", February 4, 1967.

Class 1. No. 130531. J. J. Industries, an Indian Partnership Company, Janata Industries Compound, Tulsi Pipe Road, South, City of Bombay, State of Maharashtra, India, "Containers", March 6, 1967.

Class 1. No. 130535. Sewa Singh of Pioneer Electricals & Toys Manufacturers, Sultanwind Road, Amritsar, Punjab, being an Indian National, "Room-Heater", March 8, 1967.

Class 1. Nos. 130590 to 130605. Elegant Industries Private Limited (A company registered under the Indian Companies Act), also trading as Sunshine Industries, Udyog Bhavan, 250-D, Worli, Bombay-18 (Maharashtra), "Brooch", March 27, 1967.

Class 1. No. 130693. Mefina S. A. a corporation organized under the laws of Switzerland, of 5, route de Beaumont, Fribourg, Switzerland, "A sewing machine", April 10, 1967.

Class 3. No. 129851. Carona Sahu Co., Private Limited, an Indian Company Registered under the Indian Companies' Act and having its Registered Office at 221, Dr. D. N. Road, Bombay-1. Maharashtra, India, (formerly of 143, Mahatma Gandhi Road, Bombay-1), "A strap for footwear", December 3, 1966.

Class 3. No. 130131. G. A. Electrical Industries, an Indian Partnership Firm 32, Dimtimkar Road, Bombay-8, (Maharashtra), "Iron Connector-cum-switch", January 16, 1967.

Class 3. No. 130216. The Dunlop Company Limited, formerly known as Dunlop Rubber Company Limited, Manufacturers, a British Company, of Fort Dunlop, Erdington, Birmingham 24, England, "A tyre for a vehicle wheel", September 21, 1966. (United Kingdom).

Class 3. No. 130483. Shivalik Chemical Industries, Indian Partnership Concern, C/o, Imperial Products, Khetwadi, 12th Cross Lane, Bombay-4, Maharash "Hand gloves", February 22, 1967.

Class 3. No. 130532. Swan (India) Private Limited, Indian Company, Advani Chambers, Sir P. Mehta Road, Fort, Bombay-1, Maharashtra, "Ball point pens", March 7, 1967.

Class 3. No. 130534. Bengal Rubber Mills, 10/174, Galla Mandi, Taj Ganj, Agra, U.P. an Indian Partnership concern, "soles for footwear", March 8, 1967.

Class 3. No. 130665. Jaggy & Company, of 12, Rampart Row, Fort, Bombay-1, Maharashtra State, India, an Indian Company, "A comb-*cum*-brush", April 4, 1967.

Class 3. No. 130674. The Dunlop Company Limited, formerly known as Dunlop Rubber Company Limited, a British Company, of Fort Dunlop, Erdington, Birmingham 24, England, "A tyre for a vehicle wheel", December 3, 1966. (United Kingdom).

Class 3. No. 130695. Deputy Lal Grover, an Indian National of Grover Sons, 56-A Dilshad Gardens, G. T. Road, Shahdra, Delhi-32, "Goggle frames", April 10, 1967.

Class 11. No. 130556. Jagjit Singh, Proprietor of the firm Marwah Stores, also as J. J. Pet, 13-Rai Market, P. B. No. 44, Ambala Cantt., Punjab (India) Indian, "a net for beard", March 17, 1967.

Class 13. Nos. 130648 to 130650 and 130652 to 130659. The Sassoon Spg. & Wvg. Co., Ltd., Indian Company, Mafatlal House, Backbay Reclamation, Bombay-1, "Textile Goods", April 4, 1967.

Class 13. Nos. 130737. The Crown Spg. & Mfg. Co., Ltd., Gokhale Road (South), Parel, Bombay 13, Maharashtra, Nationality—Indian Company, "Textile goods", April 22, 1967.

Class 14. No. 130663. The Victoria Mills Limited, an Indian Company, Delisle Road, Parel, Bombay-13, "Textile piecegoods", April 4, 1967.

Copyright extended for a second period for five years.

REGISTRAR OF CO-OPERATIVE SOCIETIES

CERTIFICATE OF REGISTRATION

***Silvassa, the 10th January* 1967**

No. COOP/IND/12/1967/252—This is to certify that the Dadra and Nagar Haveli Sangh Pradesh, Majoor Kamdar Sahkari Mandli Ltd., Silvassa has been registered on 10-1-67 under Section 9(1) of the Gujarat Cooperative Societies Act, 1961 as extended to the Union Territory of Dadra and Nagar Haveli under Notification No. ADM/LAW/6, dt. 1-4-65, of the Administrator Dadra and Nagar Haveli, Silvassa.

N. M. KAMDAR

Registrar

Cooperative Societies,

Dadra and Nagar Haveli,

Silvassa

Silvassa, the 10th January 1967

No. ADM/EST/7(67)—In exercise of the powers vested in him under Government of India, Ministry of Home Affairs Notification No. 3(4)/65-GP, dated 27th February, 1965 the Administrator Dadra and Nagar Haveli hereby makes the following rules namely :—

PART—I

(1) *SHORT TITLE AND COMMENCEMENT*

(a) These Rules may be called "the Recruitment Rules for Class III and Class IV services of the Administration of Union Territory of Dadra and Nagar Haveli, 1966.

(b) They shall come into force on the first day of December 1966.

(ii) *Application*—These Rules shall apply to the posts specified in column 2 of the Appendix 'A' of the schedule.

(iii) *Number, Classification and Scale of pay*— The number of posts, classification of the said posts and the scales of pay attached thereto shall be as specified in column 3 to 5 of Appendix 'A' of the said schedule.

(2) *DEFINITIONS*

(a) "Government" means the Government of the Union Territory of Dadra and Nagar Haveli.

(b) "Administrator" means the Administrator of the Union Territory of Dadra and Nagar Haveli."

(c) "Administration" means the Administration of the "Union Territory of Dadra and Nagar Haveli."

(d) "Scheduled Castes" and "Scheduled Tribes" will have the same meaning as stated in clauses 24 and 25 of article 366 of the constitution.

(e) "Service" means and includes all the details of service attached to the posts shown under rule 3.

(f) "Category" means a group of posts carrying the same scale of pay."

(g) "Cadre" will have the same meaning as defined in F.Rs. and S.Rs.

(h) "Direct Recruit" means a person recruited a fresh on the basis of competitive examination/test or by other suitable method of selection as deemed fit by the Appointing Authority, but not a person appointed to a post by promotion or transfer.

(i) "Long term appointment" means appointment for an indefinite period.

(j) "Probationer" means a person appointed on probation in or against a substantive or a temporary vacancy.

(k) "Permanent employee" in relation to any grade means a person who has been substantively appointed to a substantive vacancy in that grade.

(l) "Select list" in relation to a grade means a list of selected candidates for a grade prepared in accordance with the regulations made under the relevant rule for that grade.

(m) "Appointing Authority" means the Collector Dadra and Nagar Haveli or any other officer to whom the powers are delegated by the Administrator.

(n) "Service" means the services of the Union Territory of Dadra and Nagar Haveli.

(o) "Interview Committee" means and includes a body of one or more members constituted as such by the Administrator from time to time for the purpose of conducting the interview to recruit the candidates for the post or posts to be filled in.

PART—II

(3) *COMPOSITION OF CADRE* :—

(a) The service shall consist of persons recruited to the service before the commencement of these rules., and those recruited to it in accordance with the provisions of these rules.

(b) The Classification, the scale of pay, the method of recruitment, age limit, qualification and other matters relating to recruitment in a particular cadre shall be as specified in Appendix "A". Provided that the upper age limit prescribed for initial recruitment may be relaxed in the case of candidates belonging to Scheduled Tribes and other special categories of persons in accordance with the general orders of the Central Government issued from time to time.

(c) Notwithstanding anything contained in these Rules, if suitable persons are not available, posts will be filled in by deputationists from Central /States employees.

(4) *FORMATION OF PERMANENT AND/OR TEMPORARY CADRES* :—

(a) The permanent and temporary strength of service shall be as may be decided by the Administrator from time to time.

(b) The Administrator may make temporary additions to the service.

(c) The Administrator may interchange any post of higher grade to a lower grade as deemed necessary from time to time.

(5) *INITIAL APPOINTMENTS TO CADRES* :—

(a) The Administration will examine the case of all the existing employees of the Administration and prepare a list for their appointments to the various cadres indicated above in Rules 3, taking into consideration, the previous service of the employee, duties and responsibilities discharged by such employee and their qualifications.

(b) The Collector shall appoint the employee to the post in each cadre for which he is found fit on the basis of the seniority. Those employees who may not be absorbed in a cadre at the initial constitution of such cadre shall be absorbed at the time of the vacancies caused thereafter in that cadre

PART—III

(6) *PROBATION AND TRAINING* :—

(a) Every incumbent to a post shall initially be appointed on a temporary basis on probation for a period as shown in column No. 10 of Appendix A.

(b) Any member of the service may be required to undergo such training, and/or to pass such examinations as the Administrator, Dadra and Nagar Haveli may from time to time prescribe and will be liable to reversion/ discharge if he fails to pass the prescribed examination within the prescribed period without valid reason to the satisfaction of the Appointing Authority. Unless exemption or time limit for passing such examination is extended by the Administrator.

PART—IV

(7) *GENERAL PROVISIONS—FIXATION OF SENIORITY* :—

(a) The inter-se-seniority of employees appointed to various cadres or to a general cadre will be fixed by the Collector Dadra and Nagar Haveli. For the purpose of fixing the seniority of the services at its initial constitution, the Collector may take into consideration the length of service, grade and post held by the officials pay drawn, duties performed and such other consideration as may deem necessary for that purpose.

(b) Persons appointed to the various cadre at its initial constitution will be senior to persons appointed to that grade subsequently. Persons appointed on promotion will have their seniority according to the date of select list. Persons in the same select list will have seniority according to the order in which their names appear therein.

(c) The seniority inter-se of persons appointed will be determined on the basis of the respective ranks obtained by them in such examination provided that the persons appointed as a result of an earlier examination will be senior to those appointed as a result of a subsequent examination.

(d) Where persons appointed/promoted initially on a temporary basis are confirmed subsequently in an order different from the order of merit indicated at the time of appointment/promotion, seniority shall follow the order of confirmation and not the original order of appointment.

(e) Where persons are appointed to a grade by promotion from two grades, they will have inter-se-seniority as determined by the Appointing Authority.

(f) On the orders of appointing authority an appeal may lie to the Administrator whose orders shall be final.

PART—V

MISCELLANEOUS

(8)(1) A candidate for an appointment to a service or post shall be :

(a) a citizen of India, or

(b) a subject of Sikkim, or

(c) a subject of Nepal, or

(d) a subject of Bhutan, or

(e) a Tibetan refugee who came over to India before the 1st January, 1962 with the intention of permanently settling in India, or

(f) a person of Indian origin who has migrated from Pakistan, Burma, Ceylone and East African countries of Kenya, Uganda, and the United Republic of Tanzania (formerly Tanganyika and Zanzibar) with the intention of permanently settling in India.

Provided that candidate belonging to category/ Categories (c) (d) (e) and (f) shall be a person in whose favour of certificate of eligibility has been given by the Government of India and if he belongs to category (f), the certificate of eligibility will be issued for a period of one year, after which such a candidate will be retained in service subject to his having acquired Indian Citizenship.

(2) A candidate in whose case a certificate of eligibility is necessary, may be admitted to the examination or Interview by the interview committee or other recruitment authority and he may also be provisionally appointed subject to the necessary certificate being given to him by the Government.

(3) No person who has more than one wife living or who having spouse living, marries another woman which render that marriage void by reasons of its having took place during the life time of his previous wife, shall be eligible for appointment to service.

(4) No woman whose marriage is void by reason of her husband having a wife living at the time of her marriage to him or who has married a person who has wife living at the time of her marriage to him, shall be eligible to the service.

(5) The Government may, if satisfied that there are special grounds for so ordering, exempt any person from the operation of rule 9(3) and 9(4).

(9) *INTERCHANGEABILITY*

The posts having identical scales of pay and similar duties and qualifications may be declared as interchangeable by the Administrator.

(10) *DEPUTATION OF MEMBERS OF THE SERVICE*

The Collector may at any time depute a member of the service to a post equivalent to or higher than that held by him in service in any other service.

Provided that the period of deputation shall not exceed three years which may be extended under the orders of the Administrator.

(11) *POSTING OF A CADRE OFFICER*

Every cadre officer shall unless he is on leave or otherwise not available for holding a duty post, be posted against a duty post of the appropriate service in the cadre.

(12) *DUTY POST TO BE HELD BY CADRE OFFICERS*

Every duty in service shall, unless declared to be excluded from the service or held in abeyance for any reasons be held by a service officer of the appropriate class.

(13) *SUBSTANTIVE APPOINTMENTS IN THE SERVICE*

All substantive appointments in the service shall be made to the appropriate service and not against any specific duty post in that service.

(14) *OTHER CONDITION OF SERVICE*

(a) The condition of service of the member of the service in respect of matters for no provision exists in these rules or for which no specific rules have been made separately, shall be the same as are applicable from time to time to the officers of the Central Civil Service.

(b) Appointments made to the service otherwise than by promotion shall be subject to orders regarding special representation in the service for Schedule Castes and Scheduled Tribes issued by the Government of India from time to time.

(15) Any endeavour direct and indirect on the part of a candidate or his relations for the first appointment to the Government Service or for promotion to higher appointments therein shall be held to disqualify him for the appointment or promotion.

(16) The Collector may prescribe such other conditions such as to enter into an agreement etc. as are considered necessary in the interest of Public Service not in consistence with these rules and Central Civil Service Rules in general.

(17) Merit shall be the primary consideration in determining the persons fitness for promotion confirmation and no officer shall have any claim under these rules as a matter of right.

(18) Appointment, otherwise than by promotion shall be subject to the production of such evidence of good character as the appointing authority may require.

(19) Graduate Medical Officers recruited under these rules shall be liable to serve for a minimum period of four years (including the period spent in training) in the Armed Forces, or on works relating to defence efforts anywhere in India or abroad, if so required. The liability to serve in the Armed Forces will be limited to the first ten years of service and will not ordinarily apply to graduate doctors above 40 (fourty) years of age.

(20) *REMOVAL OF DIFFICULTIES*

The Administration may from time to time issue such general or special orders and directions as may be necessary to remove difficulties in the operation of any of the provisions of the Rules.

K. R. DAMLE
Administrator,
Dadra and Nagar Haveli,
Silvassa.

UNION TERRITORY OF DADRA AND NAGAR HAVELI

Silvassa, the 18th January 1967

ORDER

No. ADM/SUP/52/67—In exercise of the powers conferred by section 3 of the Essential Commodities Act, 1955 (10 of 1955) read with the order of the Government of India, in the Ministry of Food, Agriculture, Community Development and Co-operation, (Department of Food) No. GSR 906, dated the 9th June 1966, and with the prior concurrence of the Central Government, the Administrator, Dadra and Nagar Haveli hereby makes the following Order namely :—

1. *Short title; extent and commencement.*—(1) This order may be called the Dadra and Nagar Haveli Foodgrains (Export Control) Order, 1966;

(2) It extends to whole of the Union Territory of Dadra and Nagar Haveli;

(3) It shall come into force at once.

2. *Definitions.*—In this order, unless the context otherwise requires,—

(a) "foodgrains" include any of the following foodgrains including products of such foodgrains other than husk and bran :—

1. Paddy (Rice in husk)
2. Rice (husked)
3. Nagli.

(b) "export" means to take or cause to be taken by any means whatsoever, from any place of the Union Territory of Dadra and Nagar Haveli to any place outside the Union Territory of Dadra and Nagar Haveli.

3. *Restriction on export of foodgrains from the Union Territory of Dadra and Nagar Haveli.*—No person shall export or attempt to export or abet the export of any foodgrains except under and in accordance with a permit issued by the Collector, Dadra and Nagar Haveli, or by the Purchase and Supply Officer of Dadra and Nagar Haveli or by any other officer authorised by the Administrator in this behalf, from any place of the Union Territory of Dadra and Nagar Haveli :

Provided that nothing contained herein shall apply to the export of any foodgrains,—

(i) not exceeding one kilogram in weight in the aggregate by a bonafide traveller as part of his luggage;

(ii) on Government account;

(iii) under and in accordance with Military Credit notes; or

(iv) by or under the authority of the Food Corporation of India established under the Food Corporation Act, 1964.

4. *Powers of entry, search, seizure etc.*—(1) Any Police Officer not below the rank of a Head Constable or any officer of the Civil Supplies Department not below the rank of Supply Inspector or any Revenue Officer not below the rank of an Avalkarkun or any other person authorised in this behalf by the Administrator, may with a view to securing compliance with this order or to satisfy himself that this Order has been complied with;

(a) stop and search or authorise any person to stop and search any person or any vessel, boat, motor vehicle or other vehicle or any receptacle used or intended to be used for the export of foodgrains;

(b) enter and search or authorise any person to enter and search any place;

(c) seize or authorise the seizure of any foodgrains in respect of which he suspects that any provision of this Order has been or is being or is about to be contravened, along with the packages, coverings, or receptacles in which such foodgrain is found, or the animals, vehicles, vessels, boats or other conveyances used in carrying such foodgrains;

Provided that in exercising the powers of entry and search under this clause due regard shall be paid by such Officers to the social and religious customs of occupants of the place., vehicles, vessel, or boat as the case may be;

(2) The provisions of section 102 and 103 of the Code of Criminal Procedure, 1898 relating to search and seizure shall, so far as may be, apply to searches and seizures under this clause.

K. R. DAMLE
Administrator,
Dadra & Nagar Haveli, Silvassa

ORDER

Silvassa, the 18th January 1967

No. ADM/SUP/EXT/53/67—In exercise of the powers conferred by rule 125 of the Defence of India Rules, 1962., and with the prior concurrence of the Central Government, the Collector, Dadra and Nagar Haveli hereby rescinds,—

1. The Dadra and Nagar Haveli Nagli (Ban on export) Order, 1965.
2. The Dadra and Nagar Haveli foodgrains (Export Control) Order, 1964.

Provided that any liability incurred under the said orders before its rescissions, or any investigation, legal proceeding or remedy in respect of such liability shall not be affected and any such investigation, legal proceeding or remedy may be instituted, continued or enforced as if the said Orders had not been rescinded.

Dadra and Nagar Haveli,
Silvassa

Silvassa, dated the 15th February 1967

SUBJECT :— *Extension of activities of the Gujarat State Financial Corporation—to the Union Territory of Dadra and Nagar Haveli.*

AGREEMENT

No. ADM/LAW/156(79).—This agreement made this nineteenth day of January One thousand nine hundred and sixty-seven, between the Governor of Gujarat of the one part and the President of India acting through the Administrator, Dadra and Nagar Haveli, of the other part;

Whereas the Gujarat State Financial Corporation (hereinafter referred to as "the said Corporation") has been established for the Gujarat State under section 3 of the State Financial Corporations Act, 1951 (63 of 1951) (hereinafter referred to as "the said Act") *And whereas* section 46A of the said Act enables any State other than the one for which a Financial Corporation has been established to enter into an agreement with the State for which a Financial Corporation has been established if such other State desires that the Financial Corporation already established should also serve its needs; *And whereas* the expression "the State" in the said Section includes a Union Territory; *And hereas* the parties hereto have after consultation with the Reserve Bank of India agreed that the State of Gujarat and the Union Territory of Dadra and Nagar Haveli (hereinafter called "the said Union Territory") should participate in the said Corporation.

NOW THIS AGREEMENT WITNESSETH AS follows :—

(1) The authorised capital of the said Corporation already fixed at Rupees two crores and its subscribed and paid-up capital of Rupees one crore divided into one lakh fully paid-up shares of the value of Rs. 100 (One hundred) each shall remain unaltered for the present.

(2) The Administration of Union Territory of Dadra and Nagar Haveli shall not participate in share capital of the Corporation. The Capital structure of the said Corporation shall for the present remain as it was before the agreement was executed. In the event of disposal of shares subscribed under sub section (5) of section 4 of the said Act by the participating Government, the Administration of Union Territory of Dadra and Nagar Haveli shall have no claim on shares subscribed by Government of Gujarat.

(3) The said Corporation shall in due course raise additional capital to meet the requirements of the said Union Territory as and when necessary.

(4) The number of directors on the Board of Directors of the said Corporation (hereinafter referred to as the Board) shall remain ten as heretofore. All the Directors required to be nominated by the State Government under section 10(a) of the Act shall be nominated by the Government of Gujarat.

(5) The Administration of Union Territory of Dadra and Nagar Haveli shall have no right on the surplus in the net profits after declaring a dividend at the rate specified; such surplus shall be paid to the Government of Gujarat as provided in sub-section (3) of section 35 of State Financial Corporations Act, 1951. The amount of subvention so far paid by the Gujarat Government to the Corporation will be repayable to that Government only and the said Union Territory will not have any claim on that amount.

(6) Except as herein otherwise expressly provided, the several functions of the State Government under the said Act, shall be exercised by the Government of Gujarat and the references in the said Act to the State Government shall be construed accordingly.

(7) The circumstances and conditions prevailing in the said Union Territory and the requirements thereof shall be essentially taken into consideration when the said Corporation exercises its power under section 21 of the said Act in the matter of appointing one or more Advisory Committee or Committees for the purpose of assisting it in the efficient discharge of its functions. However when at a meeting of the Board or Advisory Committee any loan proposal relating to said Union Territory or any other matter concerning the said Territory is to be considered at such a meeting or Committee a representative of the said Union Territory duly authorised by the Administrator shall be invited by the said Corporation and the views of the above said representative shall be given full weightage.

(8) Without prejudice to the provisions hereinabove contained for exercise of the several functions of the State Government under the said Act by the Government of Gujarat the parties shall act according to the Act and the rules framed thereunder and it will not be necessary for Government of Gujarat to consult the Administration of Union Territory except where for special reasons the Government of Gujarat finds it necessary to consult the Administration of Union Territory in any matter. The consultation hereinabove contemplated will ordinarily be by correspondence between the parties hereto but in matters considered by the Board to be of vital importance, consultation may take place at a meeting of two representatives of the Government of Gujarat and one representative of the Administrator of the said Union Territory.

(9) The Corporation shall open a branch office at Udhna or Surat and this branch office will serve the said Union Territory from there.

(10) Copies of all reports of inspection and various returns as are required to be furnished to the State Government under sections 37A and 38 of the said Act shall also be furnished by the said Corporation to the Administrator of the said Union Territory.

(11) The Managing Director shall visit and stay at Silvassa for such number of days as may be necessary in view of the work requiring his presence there, as and when found necessary on request of the Administration.

(12) In the event of any dispute or difference between parties hereto arising out of this agreement, the same shall be referred to the Secretary, Ministry of Finance (Department of Economic Affairs(Government of India whose decision shall be final and binding on the parties hereto.

In WITNESS WHEREOF this agreement is executed by the respective authorised representatives of the parties in the 17th year of the Republic of India on 19th day of January, 1967.

Signed, sealed and delivered by Shri K. T. Satarawala, Secretary to Government Industries, Mines and Power Department for and on behalf of the Governor of Gujarat in the Presence of :—

(1) Sd/- (B. V. Antani), Under Secretary to the Government of Gujarat, Industries, Mines and Power Department.

(2) Sd/- (A. S. Bukhari), Under Secretary to the Government of Gujarat, Industries, Mines and Power Department.

SEAL

Signed, sealed and delivered by Shri K. R. Damle, Administrator for the Union Territory of Dadra and Nagar Haveli acting for the President of India, in the presence of :—

(1) Sd/- (J. Silveira), Private Secretary to the Lieutenant Governor Goa, Daman and Diu.

SEAL

(2) Sd/- (V. Ramamurthi), Accounts Officer, Dadra and Nagar Haveli Administration.

Notifications relating to Minor Administrations

ELECTION COMMISSION OF INDIA

New Delih, the 1st December 1966

No. 56/66.—In exercise of the powers conferred by sub-rule (1) of rule 5 of the Conduct of Elections Rules, 1961, and in supersession of its notification No. 56/65, dated the 2nd September, 1965 (S.O. 2787), the Election Commission notifies as follows :—

1. In this Notification,—

(a) 'recognised party' means any political party for which a symbol is reserved in one or more State according to the Table below;

(b) 'multi-State party' means any of the following recognised parties, namely, (i) the Indian National Congress, (ii) the Swatantra Party, (iii) the Communist Party of India, (iv) the Communist Party of India (Marxist), (v) the Bharatiya Jana Sangh, (vi) the Praja Socialist Party; and (vii) the Samyukta Socialist Party.

(c) 'reserved symbol' means in relation to any recognised party specified in column 4 of the Table below, the symbol specified against that party in column 3 thereof.

2. The choice of symbols to be made by candidate at any election in a Parliamentary or Assembly constituency in a State specified in column 1 of the Table shall be made from the free symbols specified in column 2, or from the reserved symbols specified in column 3, of the Table against that State :

Provided that any such candidate sponsored by a recognised party specified against that State in column 4 of the Table shall choose, and shall be allotted, the reserved symbol of that party and no other symbol :

Provided further that any such candidate sponsored by a multi-State party not specified against that State in column 4 of the Table may choose, and may be allotted, the reserved symbol of the party.

3. Any other candidate shall choose, and shall be allotted one of the free symbols specified against the State in column of the Table, and no other symbol;

Provided that if two or more of such candidates have indicated their first preference for the same free symbol, the Returning Officer shall,—

(a) if one of them is a sitting member of the House of the People or of the State Legislative Assembly, as the case may be, and was allotted that symbol at the previous election when he was chosen as such member, allot the symbol to that candidate, and

(b) in any other case, decided by lot to which of the candidates the symbol shall be allotted.

4. For the purposes of paragraph 2 of this notification, a candidate shall be deemed to be sponsored by a particular recognised party if, and only if,—

(a) the candidate has made a declaration to that effect in his nomination paper,

(b) a notice in writing to that effect has, not later than 3 p.m. on the last date of withdrawal of candidatures has been delivered to the Returning Officer of the constituency, and

(c) the said notice is signed by the president, secretary or other office-bearer of the party who is authorised by the party to send such notices as and whose name and specimen signature have been communicated in advance to the said Returning Officer and to the chief electoral officer of the State.

H. K. KHAN
Collector,
Dadra and Nagar Haveli
Silvassa

No. ADM/LAW/112-M.U.—In exercise of the powers conferred by sections 21, 41, 65, 67, 68, 70 and 91 of the Motor Vehicles Act, 1939, as extended to the Union Territory of Dadra and Nagar Haveli, and all other powers enabling him in that behalf, the Administrator of Dadra and Nagar Haveli hereby makes the following Rules, namely :—

The Dadra and Nagar Haveli Motor Vehicles Rules, 1966
(*Made under Sections* 21, 41, 65, 67, 68, 70 *and* 91 *of the Motor Vehicles Act,* 1939)

CHAPTER I

PRELIMINARY

1.1. (i) These rules may be cited as the Dadra and Nagar Haveli Motor Vehicles Rules, 1966.

(ii) They shall come into force from 1-12-1966.

1.2. *Definition.*—(i) In these rules, unless there is anything repugnant in the subject or context—

(a) "The Act" means the Motor Vehicles Act, 1939;

(b) "Articulated Vehicle" means a Motor Vehicle to which a trailor is attached in such a manner that the part of the trailor is superimposed on, and part of the weight of the trailor is borne by the principle vehicle;

(c) "Appellate Authority" means the Appellate Authority appointed as such under these rules;

(d) "Licencing Authority" means the Authority empowered under rule 2.1;

(e) "Passenger" means any person travelling in a public service vehicle other than the driver or the conductor of an employee of the permit holder while on duty;

(f) "Section" means Section of the Act.

(g) "Secretary" means Secretary to Administrator, Dadra and Nagar Haveli;

(h) "State Government" means the Government of Dadra and Nagar Haveli.

(i) "State" means the Union Territory of Dadra and Nagar Haveli;

(j) "Stand" means a place duly appointed as a stand under these rules;

(k) "Urban area" means the area of a Municipality, small town or cantonment, or other local area which may be specially notified by the Administration as an Urban area;

(ii) Where a Form is designated in these rules by a single letter of the alphabet, the reference is to the Form so designated in the First Schedule of the Act; with this exception the Forms prescribed in these rules shall be those set out in the Fourth Schedule annexed hereto.

1.3. The fees prescribed in these rules may be paid in cash or by money order or a treasury challan.

CHAPTER II

LICENCING OF DRIVERS

2.1. *Licencing Authority.*—The Authority empowered to issue licences under the Act and the Rules (hereinafter referred to as the Licencing Authority) shall be—

(i) The Chief of Police, Dadra and Nagar Haveli, Silvassa.

2.2.(i) Every application for the grant of a Licence shall be made to the Licencing Authority;

(ii) On receiving the application the Licencing Authority may make such inquiries as may seem to him necessary to verify the particulars therein and to ascertain that the applicant is not disqualified or liable to be disqualified for holding a licence;

(iii) No licence shall entitle the holder to drive a public service vehicle unless it contains an authorisation as set forth in Form D granted or countersigned by the Licencing Authority.

(iv) No such authorisation shall be granted by the Licensing Authority unless it is satisfied that the applicant for authorisation to drive a public service vehicle has had at least one year's experience of driving a transport vehicle and has not been convicted of any offence indicating incapacity as a driver of such vehicle.

(v) Application for grant or countersignature of an authorisation as aforesaid shall be made in the Form L.P.S.A.;

(vi) The Licensing Authority may require the applicant to pass the test described in the third Schedule to the Act, notwithstanding that the applicant had previously passed the same test;

(vii) Where the authorisation is granted or countersigned by an authority other than that which issued the licence, intimation shall be sent by the counter-signing authority in the Form L.P.S. to the authority which originally issued the licence;

(viii) The fee for the test for grant of authorisation to drive a public service vehicle shall be two rupees;

(ix) Any order by the Licensing Authority refusing to grant or countersign an authorisation shall be appealable in the same way as an order of Licensing Authority refusing to issue or renew a licence, and the provisions of Section 13 shall apply to such appeals.

2.3. *Testing Officer.*—(i) The test of competence to drive as set forth in the third schedule to the Act shall be conducted by an Inspector of Motor Vehicles, or any other authority prescribed by the Administrator.

Provided that it shall be competent for the Licencing Authority or for any person nominated by him in that behalf to require a driver to undergo more than one test of competence;

(ii) Subject to sub-section (7) of section 7 the applicant shall furnish a serviceable vehicle of the class to which the application refers and present himself for the test at such time and place as may be specified by the Licencing Authority or the testing officer;

(iii) The fee payable for the test of competence to driver shall be five rupees for each test, to be paid before the test is commenced. The fee shall not be refunded in any circumstances.

2.4. *Appellate Authority.*—(i) The authority empowered under sub-section (2) of section 13 and sub-section (3) of section 15 to hear appeals against the decision of a Licencing Authority shall be the Secretary to the Administrator, D. and N.H., Silvassa.

2.5. *Conduct and hearing of appeals.*—(1) Every appeal shall be preferred in duplicate in the form of a Memorandum, one copy of which shall bear a Court fee Stamp of one rupee, setting forth concisely the grounds of objections to the order of Licenoing Authority or the State Transport Authority as the case may be, and shall be accompanied by a certified copy of that order.

(ii) When an appeal is lodged, a notice shall be issued to the authority against whose order the appeal is preferred in such form as the Appellate Authority may direct.

(iii) The Appellate Authority, after giving an opportunity to the parties to be heard, and after such further inquiry, if any, as it may deem necessary, may confirm, vary or set aside the order from which the appeal is preferred and shall make an order accordingly.

(iv) Any person preferring an appeal shall be entitled to obtain a copy of any document filed with the Licencing Authority in connection with the order appealed against on payment of fee calculated at the rate of 50 paise per page of about 200 words.

2.6. *Photograph to be affixed to the Mediacl certificate.*—(i) A photograph shall be affixed to the Medical certificate of fitness in Form C and it shall be firmly affixed to the Form and the medical practitioner shall affix his signature or seal to the photograph in addition to signing the Form.

(ii) The Licencing Authority may decline to accept a Medical certificate of fitness granted more than one month before the date of application for the grant or renewal of a licence as the case may be.

2.7. *Requirement as to photograph.*—(i) The copies of the photographs required by sub-section (4) of section 7 shall be not more than fifty millimetres by sixty-five millimetres in size.

(ii) The photograph of the holder when affixed to the licence shall be sealed with the seal of the Licencing Authority in such a manner that part of the impression of the seal is upon the photograph and part on the margin.

(iii) If at any time it appears to the Licencing Authority that the photograph affixed to a licence has ceased to be a clear likeness of the holder, the Licencing Authority may require the holder to surrender the licence forthwith and to furnish two clear copies of recent photograph of himself, and the holder shall within such time as the Licencing Authority may specify appear in a person before the Licencing Authority and present the photograph accordingly.

(iv) Upon receipt of the copies of the photograph as provided in the preceding sub-rule, the Licencing Authority shall remove the old photograph from the licence and affix thereto one copy of the new photograph and return the licence to the applicant, and shall, if he is not the Licencing Authority by whom the licence was issued, forward the second copy of the photograph to that authority;

Provided that if the holder of the licence so desires the Licencing Authority shall issue a duplicate licence with the new photograph affixed thereto and shall destroy the original licence.

(v) When a new photograph is affixed to a licence, a note shall be made upon the photograph of the date of affixture.

(vi) The fee for a duplicate licence issued under the proviso to sub-rule (iv) shall be five rupees.

2.8. *Licence lost or destroyed.*—(i) If at any time the licnce is lost by the holder or is destroyed, the holder shall forthwith intimate the fact in writing in Form L.L.D. or in a letter seting out the particulars required by Form L.L.D. to the Licensing Authority in whose area he has his place of residence at the time.

(ii) Upon the receipt of intimation as aforesaid, the Licencing Authority shall, if he is not the authority by whom the licence was issued, apply to that authority for particulars of the licence and of any endorsement thereon, and after making such inquiries as he thinks fit, shall if he is satisfied that a duplicate may properly be issued, issue a duplicate licence.

(iii) Where a photograph is required to be affixed to a duplicate licence issued under the provisions of these rules the holder of this licence shall furnish the Licencing Authority with two clear copies of a recent photograph of himself, one of each shall be affixed to the duplicate licence.

(iv) Fee for a duplicate licence issued under this rule shall be five rupees :

Provided that if the licence is lost while in custody of a Court or an authority to which it has been submitted or surrendered in pursuance of the provisions of the Act or these rules duplicate copy shall be issued free of charge.

(v) When a duplicate licence has been issued upon representation that a licence has been lost and the original licence is afterwards found by the holder, he shall deliver it forthwith to the Licencing Authority.

(vi) Any other person finding a driving licence shall deliver it to the holder of the licence or to the nearest Police Station.

2.9. *Defaced or Torn licences.*—(i) If at any time it appears to a Licensing Authority that a licence held by any person is so torn or defaced that it has ceased to be reasonably legible or that any important part of the original licence has been detached or is missing or that any unauthorised alterations have been made, the Licencing Authority may impound the licence and issue a duplicate.

(ii) If any of the entries are still illegible or are missing or it appears that they have been detached or altered without authority, the Licencing Authority shall, if he is not the authority by whom the licence was issued, apply to that authority for particulars of that licence and of any endorsement thereon, and after making such inquiry as he thinks fit shall, if he is satisfied that a duplicate may properly be issued, issue a duplicate licence.

(iii) If a licence impounded as aforesaid is required to have a photograph of the holder affixed thereto then—

(a) if the photograph on the impounded licence is in the opinion of the Licencing Authority satisfactory and conveniently transferable to the duplicate licence, the Licensing Authority may so transfer, affix and seal the photograph to the duplicate licence; but

(b) If the photograph affixed to the licence impounded is not in the opinion of the Licencing Authority such as can be transferred to the duplicate licence, the holder of the licence shall, on demand of the Licencing Authority furnish two clear copies of a recent photograph of himself, one of which shall be affixed to the duplicate licence and sealed.

(iv) The fee for a duplicate licence isued under this rule shall be five rupees.

2.10. *Issue of duplicate licences.*—When a duplicate licence is issued under rule 2.7, rule 2.8 or rule 2.9, it shall be clearly stamped "duplicate" in red and shall be marked with the date of issue of the duplicate and the seal of the licencing Authority.

2.11. *Temporary authorisation in lieu of a licence.*—(i) When the holder of a licence has surrendered it to a Licencing Authority or other authority for renewal or for obtaining an endorsement to drive a public service vehicle or for any other purpose under the Act or these rules, and has deposited the prescribed fee, and the licence has not been suspended or cancelled, the Licencing Authority or other authority shall furnish him with a receipt for the licence in Form L-Tem or in Form L-Tem (police) and during such time as the receipt shall be specified to remain in force, it may be produced in place of the licence under sub-section (1) of section 86.

(ii) The granting authority in the case of a receipt in Form L-Tem or a Magistrate of the First class in the case of a receipt in Form L-Tem (Police), may at his discretion extend the term of the receipt issued under the preceding sub-rule by order endorsed thereon;

Provided that a Magistrate shall not extend the term of a receipt if the holder of the licence is present before him and the licence is available in Court.

(iii) No fee shal be payable in respect of a receipt given under this rule.

2.12. *Procedure when licence is forwarded to a Court.*—(i) Notwithstanding anything contained in the proviso to sub-section (3) of section 86, in cases where

a driver driving as a paid employee or the driver of a transport vehicle has forwarded his licence to a Cour under sub-section (2) of section 130 it shall, subject to the condition in sub-rule (ii) of this rule be a sufficient compliance with section 86 if he produces the licence within 10 days (or in the case of any driver, who does not receive the licence back from the Court within 10 days, within four days of its receipt) at a Police station or such other place in the region as may be specified by the Police Officer or other authority making the demand.

(ii) No driver shall be entitled to the benefit of sub-rule (i) unless he exhibits to the Police Officer or authority who has demanded the production of his licence—

(a) the summons received by him from the court being a summons requiring him to attend on a date not more than 14 days before or after the date on which the demand is made, and

(b) the postal receipt for the registered letter under which the licence has been forwarded to the Court.

2.13. *Driving permit for learners.*—(i) Sub-section (1) of section 3 shall not apply to any person driving a motor vehicle in a public place during the course of receiving instruction or of gaining experience in driving with the object of presenting himself for the test required by clause (a) of sub-section (6) of section 7 so long as—

(a) The driver has obtained and carried a learners driving permit in Form L. Lr. entitling him to drive the vehicle;

(b) There is beside the driver in the vehicle as instructor a person duly licenced to drive the vehicle and sitting in such a position as to be able readily to stop the vehicle;

(c) There is affixed both to the front and rear of of the vehicle a White plate or card 180 millimetres square, bearing the letter "L" in red 100 millimetres high and 90 millimetres wide;

(d) No fare paying passengers are carried in the vehicle :

Provided that clause (b) shall not apply to to a person driving a two wheeled motor cycle with or without sign card attached.

(ii) An application for a permit to drive as a learner shall be made in Form L. Lr. A. to the Licencing Authority having jurisdiction in the area in which the applicant ordinarily resides and shall be accompanied by a fee of three rupees.

(iii) A learner's driving permit shall be valid for a period of three months and may be renewed for a further period of three months on payment of a fee of three rupees for each renewal.

(iv) A Licencing Authority may for any reason which he thinks fit, refuse to issue or to renew a learner's driving permit or may revoke such a permit issued by it.

(v) Any person aggrieved by an order passed under sub-rule (iv) may appeal within 30 days to the Secretary, to the Administrator, whose decision shall be final.

(vi) A person driving as a learner shall produce a learner's driving permit for examination on the demand of any Police Officer in uniform.

2.14. *Disqualification under sections 15 and 16.*—A Licencing Authority taking possession of a licence under sub-section 2 of section 15, shall, if the licence was issued under the Act and was granted by another Licencing Authority, intimate the fact to that authority,

2.15. *Intimation to original authority of endorsement and renewal.*—(i) The Court making or causing to be made an endorsement on a licence under section 19, shall send intimation in Form LE to the Licencing Authority by whom the licence was issued.

(ii) The Licencing Authority renewing a licence under the provision of sub-section (4) of section 11, shall intimate the fact to the licencing authority by whom the licence was issued in Form LR.

(iii) A Licencing Authority acting under sub-section 3 of section 6. to add to the classes of the motor vehicles which a licence authorises the holder to drive shall, if it is not the authority by whom the licence was issued, intimate the addition to that authority in Form LAd.

2.16. *Refusal to renew.—The* Licencing Authority may require an applicant to undergo a driving test if a period exceeding 3 years has elapsed since the date of last renewal and if the applicant fails to pass the test shall refuse to renew the licence.

Provided that no fee shall be payable by any holder of a driving licence under sub-section (8) of section 7 who is or has been serving in any arm forces whether employed on driving a vehicle or otherwise, if he applies for the licence while in service or within three months from his return from service and satisfies the Licencing Authority that he was serving in arm forces when the three years period elapsed.

2.17. *Change of address of licence holder.*—The holder of a licence entitling him to drive as a paid employee or to drive a public service vehicle shall, except in the case of a temporary absence not involving a change of residence for a period exceeding three months, report any change of his temporary or permanent address as notified on the licence to the Licencing Authority by whom the licence was issued and to the Licencing Authority by whom it was last renewed.

2.18. A sum of rupees eleven only shall be charged as fee for the grant of a licence under sub-section (8) of section 7, and nine rupees for the renewal of a licence under sub-section (3) of section 11 from the holder of a driving licence issued under sub-section (8) of section 7 :—

(a) if such person is or has been serving in any arm force whether employed or driving motor vehicles or otherwise; and

(b) if the application for the grant of renewal of the licence is made within three months of his return from service.

Such persons shall be exempt from payment of the remaining portion of the fee, if any, payable under the said section.

(c) Validity of a licence issued under sub-section (8) of section 7 shall be three years from the date of issue.

CHAPTER III

Registration of Motor Vehicles

3.1. *Entry of laden weight in the certificates of Registration of old vehicles.*—(i) No owner shall permit any goods vehicle to be driven in any public place, being a goods vehicle deemed to be registered under the Act by virtue of the provisions of sub-section (2) of section 23, unless the registered laden weight is stated in the certificate of registration and exhibited on the vehicle in the manner specified in rule 3.8 .

Provided that if the certificate of registration being a certificate issued before the date when these rules come into force, includes particulars of the unladen weight and the permissible load or carrying capacity, the sum of the unladen weight and the permissible load, or the sum of the unladen weight and the carrying capacity as the case may be, shall until other entries are made be deemed to be the registered laden weight of the vehicle.

(ii) The owner of a goods vehicle the certificate of which does not contain the particulars required by the preceding sub-rule shall apply in Form R.L.W. to the Registering Authority of the area in which the goods vehicle is normally kept, for the assignment of a registered laden weight to the vehicle, within two months from the date of coming into force of these rules.

(iii) Upon receipt of an application under sub-rule (2) the Registering Authority may call upon the applicant to produce the vehicle at such time and place and before such person as the Registering Authority may appoint.

(iv) After causing the vehicle to be inspected and making such enquiries as he may deem to be necessary, the Registering Authority shall assign a registered laden weight to the vehicle and call upon the registered owner to produce the certificate of registration and enter the same therein.

(v) If the Registering Authority assigning the registered laden weight in accordance with this rule is not the authority by whom the records of the registration are kept, he shall inform that authority.

3.2. *Registering Authority.*—The Functions of the Registering Authority shall be performed by the Licensing Authority, in the absence of any other person appointed as such.

3.3. *Appellate authority.*—The authority to hear appeals under section 35 shall be the Secretary to the Administrator.

3.4. *Conduct and hearing of appeals.*—(1) An appeal under rule 3.3 shall be preferred in duplicate in the form of a memorandum, one copy of which shall bear court fee stamp of one rupee, setting forth concisely the grounds of objection to the order of the Registering Authority, and shall be accompanied by a certified copy of that order.

(2) When an appeal is lodged, a notice shall issue to the Registering Authority. in such form as the appellate authority may direct.

(3) The appellate authority, after giving an opportunity to the parties to be heard and after such further enquiry if any as it may deem necessary, may confirm, vary, or set aside the order of the Registering Authority, and shall make an order accordingly.

(4) Any person preferring an appeal under the provisions of the Act and of this rule shall be entitled to obtain a copy of any document filed with the Registering Authority in connection with any order against which he is preferring an appeal on the payment of a fee calculated at the rate of fifty paise per page of about 200 words.

3.5. *Assignment of registered weights.*—In assigning any weight other than the unladen weight to a transport vehicle under section 37, the Registering Authority may, if the owner so desires, assign a weight less than the maximum permitted by the provisions of that section as the registered laden weight or the registered axle weight of any axle.

3.6. *Assignment and exhibition of registration marks.*—(1) The registration marks to be assigned under sub-section (3) of section 24 will be as set forth in the Second Schedule to these rules.

(2) The registration marks shall be clearly and legibly exhibited on a plane surface on a plate or part of the vehicle both at front and rear facing direct to the front or rear (as the case may be), in the manner hereinafter specified.

(3) Motor vehicles owned by the Administration shall carry the distinctive registration plate in the form illustrated in the First Schedule of these rules. The name of the Department to which the vehicle belongs shall be shown on this plate and the letters and numerals of the registration mark and the name of the Department shall be in English.

(4) The registration mark shall be in English letters and numerals :—

(a) Save in the case of a motor cycle or an invalid carriage the letters shall be not less than 65 millimetres high and fifteen millimetres thick at any part; the numerals shall not be less than ninety millimetres high and twenty millimetres thick at any part, and there shall be a space between any letter and any numeral, and between any letter or numeral and the edge of the plane surface of not less than thirteen millimetres and a space between any two letters and between any two numerals of not less than ten millimetres.

(b) In the case of a motor cycle or an invalid carriage, the letters shall be not less than 42 millimetres high and ten millimetres thick at any part. The numeral shall be not less than 59 millimetres high and thirteen millimetres thick at any part, and there shall be a space between any letter, and any numeral, and between any letter or numeral and the edge of the plane surface of not less than 8 millimetres and a space between any two letters and between any two numerals of not less than six millimetres.

(5) The plane surface aforesaid shall not be inclined from the vertical by more than thirty degrees. The letters and numerals shall be exhibited in the following manner :—

(a) In the case of a transport vehicle other than a motor cab, both registration marks assigned to the vehicle under sub-section (3) of section 24, shall exhibit the letters and numerals in two separate horizontal lines, the letters above and the numerals below.

(b) In all other cases, the registration marks may exhibit the letters and numerals either in two horizontal lines as aforesaid or in one horizontal line.

(6) Notwithstanding anything contained in sub-rule (2), the registration mark exhibited at the front of a motor cycle or of an invalid carriage may be displayed on a plate in a line with the axis of the vehicle and shall in such case be displayed on both sides of roof plate.

(7) If the registration mark exhibited at the front or rear of a public service vehicle other than a motor cab is affixed to the vehicle at a distance of 914 millimetres or less from the ground a second registration mark shall be exhibited at roof level.

(8) If the letters and numerals are exhibited in any polished metallic surface they shall have plane and not rounded surfaces.

3.7. *The registration mark on a trailer.*—(1) The registration mark of a trailer shall be exhibited on a plane plate or surface on the left hand side of the trailer. The letters, figures, space and margin shall be of dimensions not less than those prescribed in clause (b) of sub-rule (4) of rule 3.6.

(2) The registration mark of the drawing motor vehicle required by the Act to be affixed to the rear of a trailer shall be in conformity with all the provisions of these rules applicable to the registration mark affixed to the rear of a motor vehicle.

3.8. *Particulars to be painted on transport vehicles.*—(1) Save in the case of motor cabs, delivery vans or trailers, of the nature specified in clause (i) in sub-section (3) of section 42, the particulars set forth below shall be exhibited in a fixed frame inside the vehicle, in the driver's cab, in English letters and numerals :—

Signature and name of authority issuing the original certificate of registration.

Place .....

Date .....

(2) The full name of the company, society, firm or person owing the vehicle as set forth in its registration certificate shall be exhibited on both sides of every transport vehicle other than motor cabs, delivery vans and trailers, in English block letters measuring 100 millimetres in height and 20 millimetres in thickness :

Provided that with the approval of State transport authority, the abbreviation of names may be used.

(3) This rule shall not apply to any vehicle registered under section 39.

3.9. The authority prescribed to grant or renew a certificate of fitness and to perform all the functions which are to be discharged by a prescribed Authority under section 39, shall be an Inspector of Motor Vehicles, or any other authority appointed by the Administrator.

3.10. *Applications for certificates of fitness.*—(1) For the grant or renewal of a certificate of fitness a transport vehicle shall be presented to the Inspector of Motor Vehicles whose functional area includes the major portion of the route or area to which the permit of the vehicle extends :

Provided that in the case of an original application for a certificate of fitness the vehicle may be produced before any Inspector of Motor Vehicles.

(2) If owing to mechanical breakdown or other cause a motor vehicle is at the time when the certificate expires, outside the functional area of the Inspector of Motor Vehicles by whom the certificate is to be renewed, any Inspector of Motor Vehicles may, without prejudice to any penalty to which the owner may have become liable, if the vehicle is in the opinion of the Inspector fit for use, by endorsement in Form C.F. Sub and subject to such conditions as the Inspector may specify, authorise its use for such time as may be reasonable.

(3) Every application for the grant or renewal of a certificate of fitness shall be made with an inspection fee of two rupees.

3.11. *Procedure of Inspection.*—(1) The Inspector of Motor Vehicles before whom vehicle is produced for the issue or renewal of a certificate of fitness may :—

(a) issue a certificate or renew the former certificate in respect of the vehicle;

(b) defer a decision regarding the issue or renewal of a certificate of fitness pending the rectification of certain defects; or

(c) refuse to issue a certificate or renew the former certificate.

If the course described at (b) is followed, the Inspector of Motor Vehicles shall supply the owner of the vehicle or his agent with a list of the defects requiring correction in Form C.F.X. and pending the carrying out of the repairs shall suspend and impound any certificate of fitness previously in force in respect of the vehicle. In completing Form C.F.X. the Inspector of Motor Vehicles shall note the conditions under which it shall be permissible for the vehicle to be used pending the grant or renewal of the certificate. These conditions shall in no case permit the use of the vehicle for the conveyance of passengers for hire or reward or for the carriage of goods other than goods carried in connection with the repairing of the vehicle.

(2) If the Inspector of Motor Vehicles defers its decision under clause (b) in the preceding sub-rule and supplies the owner of the vehicle or his agent with a list of defects in Form C.F.X. and if thereafter the vehicle is not produced for further examination within a period of two months (or such longer period as may have been specified by the Inspector of Motor Vehicles in the Form C.F.X.) the certificate of fitness if it has already expired, shall be deemed to be cancelled with effect from the date when it was suspended.

(3) In issuing or renewing a certificate of fitness the Inspector of Motor Vehicles shall endorse thereon the period for which the certificate shall remain effective and the date, time and place appointed for the next inspection of the vehicle.

(4) Fees for the grant or renewal or duplicate of a certificate of fitness shall be ten rupees.

3.12. *Cancellation and suspension of certificates of fitness.*—(1) The Inspector of Motor Vehicles may cancel the certificate of fitness of a transport vehicle under sub-section (3) of section 38 or may suspend the certificate for a period not exceeding two months if in the opinion of the Inspector of Motor Vehicles it does not comply with the provisions of Chapter V of the Act or with these rules.

(2) When a certificate of fitness has been suspended under the preceding sub-rule, the owner of the vehicle may at any time within the period of suspension, after making the necessary repairs, produce it for further examination before the Inspector of Motor Vehicle (or any other Inspector of Motor Vehicles) the Inspector of Motor Vehicles shall thereupon proceed in accordance with sub-rule (1) of rule 3.11. If the vehicle is not so produced for further inspection within the period of suspension the certificate of fitness shall on expiry of the period be deemed to have been cancelled.

(3) The Inspector of Motor Vehicles cancelling or suspending a certificate of fitness under sub-rule (1) of this rule shall give the owner or other person incharge of the vehicle a receipt therefor and a statement in writing of the reasons for such cancellation or suspension.

3.13. *Report to be made when a certificate of fitness is cancelled or renewal is refused.*—(1) In every case in which a certificate of fitness is cancelled or renewal of a certificate of fitness is refused or in which a certificate of fitness is deemed to have been cancelled under sub-rule (2) of rule 3.11 or sub-rule (2) of rule 3.12 in consequence of the failure of the owner to produce a vehicle for further examination, a report shall be made by the Inspector of Motor Vehicles to the authority, which has registered the vehicle.

(2) In every case in which a certificate of fitness is cancelled, the authority making the order shall impound the certificate.

(3) Nothing in this rule or in rules, 3.9, 3.10, 3.11 and 3.12 shall apply to any transport vehicle registered under section 39.

3.14. *Temporary registration of newly sold vehicles.*—(1) When for any reason it is impracticable for the purchaser of a newly sold vehicle to obtain a registration certificate in the ordinary course, owing to a temporary closure of the office of the Registering Authority or for other similar reason, or where the purchaser of a newly sold vehicle intends to export it at once beyond the limits of the Union Territory of Dadra and Nagar Haveli or to take it immediately to the district where he has his permanent residence or place of business, a temporary certificate of registration in the Form C R Tem and a temporary registration mark may be issued under this rule, and the temporary certificate and registration mark shall for the time being serve all the purposes of a regular certificate and registration mark. The fee for the issue of temporary certificate of registration shall be five rupees.

(2) A temporary certificate of registration or a temporary registration mark shall not be issued except in respect of a vehicle which has not previously been registered under the Act.

(3) Every application for a temporary certificate of registration shall be in writing and shall indicate the district or place where the vehicle is intended to be produced for permanent registration. It shall be supported by a certificate from the person or firm from whom the vehicle has been purchased to the effect that it has been sold to the applicant on the day when the certificate is signed.

(4) A temporary certificate of registration shall not be valid for more than thirty days and shall not be capable of renewal.

(5) An authority issuing a temporary certificate of registration shall at the same time assign to the vehicle a distinguishing mark to be displayed thereon in the manner prescribed for distinguishing marks assigned under sub-section (3) of section 24 the letters and figures composing the marks being in red on a yellow ground.

3.15. *Loss or destruction of certificate of registration of a vehicle other than transport vehicle.*—(1) If at any time the certificate of registration of a vehicle other than a transport vehicle is lost or destroyed, the owner shall forthwith intimate the facts in writing to the Registering Authority by whom the certificate was issued or by whom the registration mark of the vehicle was assigned under section 29 and shall apply in Form C.R.L.D. to the said authority for the issue of a duplicate certificate.

(2) Upon the receipt of an application in Form C.R.L.D. together with a fee of five rupees the Registering Authority may after making such inquiries as appear necessary issue a duplicate certificate of registration in Form G. clearly stamped "Duplicate" in red ink.
