Despatch from Her Majesty's Secretary of State for India, No. 45, dated the 24th March 1887.

RESOLUTION.

IN Home Department Resolution, dated the 12th February 1886, cited in the preamble, on the subject of the scheme for the establishment of six Government Scholarships tenable in England by Natives of India, it was provided that each scholar should be required to bind himself by a written engagement to submit to such regulations as may from time to time be framed by Her Majesty's Secretary of State for the guidance of the scholars during their stay in England.

With reference to this provision the Secretary of State was asked to lay down such regulations as may be deemed necessary, and the following rules have been prescribed by His Lordship :—

1. Every scholar shall, on reaching England, at once present himself at the India Office, and report his arrival in writing.

2. Every scholar shall, without any unnecessary delay, inform the Secretary of State to which University he intends to proceed, and shall at once take steps to enter himself at the College he has selected, or (with the special permission of the Secretary of State) as a non-collegiate student.

3. Every scholar shall, within four weeks of reaching England, submit for the approval of the Secretary of State a statement showing the general course of study he proposes to follow; and the course approved shall not be changed without the sanction of the Secretary of State.

4. Every scholar shall, at the end of each University term, submit to the Secretary of State a certificate from the proper College or University authority, showing that his residence, conduct, and progress in study have been satisfactory during the term.

5. Every scholar shall at all times obey such instructions as he may receive from the Secretary of State.

6. Subject to a due compliance with the above conditions, the allowance, at the rate of £200 a year for three years, will be paid monthly in advance by the India Office, commencing from the date of the scholar's reporting his arrival in England.

7. Every scholar will forfeit his scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete a residence of three years in England, or who is guilty of misconduct or disregard of the orders of the Secretary of State. If a scholarship be forfeited, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

The Governor General in Council requests that steps may be taken to cause a copy of these rules to be furnished to each selected scholar on his nomination.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Governments of Madras, Bombay and the Punjab for information and guidance.

Ordered also, that a copy be forwarded to the Governments of Bengal and the North-Western Provinces and Oudh, the Chief Commissioners of the Central Provinces, Burma, Assam and Coorg and the Resident at Hyderabad for information; and to the Registrar of the Calcutta University for information and guidance.

Ordered further that the Resolution be published in the Supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 25th Jan. 1888.

The weather of the past week has been very much more unsettled than that of several weeks past, and fairly heavy rain has fallen over nearly the whole of Northern and Central India.

On the 19th the distribution of pressure and the general circulation of the winds were fairly normal, a large area of high pressure, with its apex over the western desert, stretching from North-Western India across the central parts of the country south-eastward as far as Orissa. On the northern side of this high-pressure area the wind was north-westerly and westerly, on its southern side north-easterly and easterly; the weather was fine and dry except at Purneah and Sibsagar. On the 20th a rapid barometric fall was reported from Quetta and the Indus Valley, the wind had shifted to west and south-west in Lower Sind and to south-east at Jacobabad, Ajmere and Indore. Hence a depression appeared to be advancing on our western frontier from Baluchistan. At the same time the high-pressure area had retreated eastward and lay over the Central Provinces and Western Bengal. There was, however, as yet no rain beyond a few drops at Sibsagar. On the 21st a rapid barometric rise had taken place in the north-west of the Punjab, and the barometer had almost ceased to fall in Baluchistan and the Indus Valley. A large diffused depression existed over Sind, Guzerat, Central India and the Berars, and a south-easterly current of air was appearing over Central and a large part of Northern India. This current had occasioned slight rain at Multan, Peshawar and Rawalpindi and slight snow at Murree. On the following day, the 22nd, the depression had become much more distinctly marked, and had its centre over Rajputana. It occasioned a very well defined cyclonic circulation of the winds over a large part of India. Rain had extended to nearly all parts of the Punjab as well as to Sutna, Mt. Abu and Jhansi, and snow was falling at Murree and Simla. By the morning of the 23rd the depression which was rapidly filling up had reached Seoni. Its passage eastward had been accompanied by the extension eastward of the rainfall area, and rain was reported from the greater part of Bengal, from the N.-W. Provinces, the Punjab and several central stations. Snow had fallen over the whole of the North-West Himalaya. On the 24th the depression, which had still further filled up, lay between Raipur and Gopalpore, the barometer had risen over North-Western and Central India, and the weather, except in Bengal, had improved, while the wind directions had become fairly normal again over a large part of the country. At Quetta, however, the barometer had again fallen briskly, the wind shifted to S. S. W., and snow recommenced. On the 25th the barometer was again falling quickly over North-Western India and moderately over most other parts of the country. A fresh depression had appeared near Deesa and a south-easterly current of air was again being developed over Northern India. The sky was overcast over North-Western and part of Central India, and rain had fallen over the Indus Valley, the Punjab and at Roorkee. Snow was falling over the North-West Himalaya from Mussoorie to Murree.

Pressure.—The mean pressure of the week, compared with the normal average of the month, shows a slight excess in Burma, Bengal, the North-Western Provinces, Central India and the Peninsula, and a deficiency elsewhere. The defect was greatest at the hill stations in North-Western India, but was also large at Jacobabad. The excess was greatest in the Peninsula.

Temperature.—The mean temperature has been below the monthly average except in Burma, Ceylon and some places in the Peninsula. The defect was very large on the hills, but was considerable over the whole of North-Western and part of Central India.

Rain—Has fallen in all the provinces except Burma, Bombay and Malabar, though in Ceylon, the Central Provinces and Madras the week's fall was insignificant. Sialkote, Mussoorie and Simla received the largest amount of precipitation, but all over the Punjab and the hills the falls were fairly heavy.

The result of the week's rainfall has been to considerably reduce the deficiency previously existing over Northern India, and indeed at a few places in Western Bengal, the North-Western Provinces and the Punjab the total rainfall since the beginning of November is now in excess of the average.

The concluding table gives the rainfall of the week according to the different provinces.

Divisions.	Number of stations.	Total rainfall.

W. L. DALLAS,
for *Meteorological Reporter to the Govt. of India.*

Simla, 27th January 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 28th January 1888.*—No rain except a small quantity in Ganjam and Tinnevelly. Rainfall to date generally sufficient except in parts of Madura where wet crops in four taluks are withering from deficient supply of water in tanks. Agricultural operations progressing as usual. Crops good, but slightly damaged here and there by rain, disease or insects. Pasture generally sufficient but scanty in Malabar and parts of Madura and Anantapur and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 1st February 1888.*—Rain in parts of Sind, Ahmedabad, Kaira, Baroda and Kathiawar. Standing crops in parts of Shikarpur benefited by it; standing crops in parts of Satara and Baroda and cotton and wheat in Ahmedabad injured by rain or cloudy weather. *Jowari* in parts of Poona, wheat in parts of Porbandar, wheat and gram in parts of Belgaum and wheat and exotic cotton in parts of Dharwar suffering from blight. Harvesting of early crops in progress in parts of Hyderabad, Khandesh, Sholapur and Dharwar, and of late crops in parts of Poona, Ahmednagar, Sholapur, Bijapur and Kathiawar. Cotton-picking continues in parts of Ahmedabad, Broach, Surat and Kathiawar. Standing crops fair in Surat, Belgaum, Dharwar and Colaba, middling in Thana and Bijapur, good in other districts. Probable outturn of late crops from 10 to 14 annas in Ahmednagar. Agricultural stock good except in a few taluks of Hyderabad and in parts of Nasik.

Bengal.—*For week ending 31st January 1888.*—General rain fell during the week, and the weather was much colder than in the previous week. The winter rice has been harvested, the outturn being on the whole somewhat deficient. Rain has benefited the *rabi* and poppy crops which promise well, and has also facilitated ploughing for early rice, jute and indigo. Spring rice is doing well. Sugarcane is being pressed and is yielding a good outturn. Mustard and other early *rabi* crops have begun to be gathered. Mustard is an indifferent crop in Hazaribagh and Manbhoom.

N.-W. Provinces and Oudh.—*For week ending 1st February 1888.*—There has been general and good rain and the prospects of the *rabi* crops are everywhere satisfactory. The poppy crop is flourishing. Markets are amply supplied but prices remain high. The condition of cattle is good.

Punjab.—*For week ending 1st February 1888.*—Rain has fallen throughout the province. Prices are generally stationary though rising in a few districts. *Rabi* sowings completed; barley sowings commenced in the Sialkot district. *Rabi* prospects have improved by the recent fall of rain, but more rain is wanted in some districts. No damage done to crops. Stock cattle are generally healthy except at Shahpur. Fodder is scarce in most districts. Poppy sowings completed.

Central Provinces.—*For week ending 1st February 1888.*—Slight rain has fallen in places and hail in eastern districts which is reported to have caused some damage to crops in Raipur and Bilaspur. Linseed injured in Seoni, Hoshangabad and Raipur and gram and pulses in Saugor and Hoshangabad. Prospects otherwise favourable. Cattle in fair condition.

Burma.—*For week ending 28th January 1888.*—Wet season crops reaped in all districts of the Province except in Kyaukphyu. Ploughing and planting of dry weather crops progressing. Condition of agricultural stock good except in Bassein and Thayetmyo. Estimates of probable outturn of harvest remain unchanged since last report. Price of paddy has risen slightly in the Thayetmyo, Shwebo, Myingyan and Minbu districts and has fallen slightly in the Chindwin district. Slight rain has fallen in the Akyab, Prome and Amherst districts of Lower Burma and in the Bhamo, Myadaung, Shwebo, Chindwin, Myingyan, Minbu and Meiktila districts of Upper Burma.

Assam.—*For week ending 1st February 1888.*—Weather cold and windy. Slight rain fell in most districts doing good to tea seedlings and other crops. Harvesting of cold weather crops almost over. Land is being prepared for summer crops and potatoes are being sown in Hill districts.

Mysore and Coorg.—*For week ending 1st February 1888.*—No rain in Mysore during the week. Sugarcane is being milled and arecanut gathered in parts. Stock cattle in good condition.

No rain in Coorg during the week. Harvesting of rice completed in parts. Threshing has commenced. Prospects good. Prices stationary.

Berar and Hyderabad.—*For week ending 1st February 1888.*—No rain in Berar during the week. Rainfall up to date quite sufficient. Threshing of *jowari*, *tur* and *mung*, and picking of cotton completed in some parts of the province. *Rabi* crops generally promising. Condition of cattle good. Fodder getting scarce in some taluks. No marked changes in the prices of food grains.

Agricultural prospects in Hyderabad continue good. No rain.

Central India.—*For week ending 1st February 1888.*—Slight rain in Gwalior, Goona and Neemuch. Fall of rain in Central India reported sufficient. Agricultural operations completed except in Bhopal, Bundelkhand, and Western Malwa. Standing crops and outturn of harvest generally good, but below average in Western Malwa and Goona. Slight damage to crops in Sirsa by hailstorm.

Agricultural stock everywhere good. Pasturage and fodder good. Prices of food grains rising or high. Opium fairly good.

Rajputana.—*For week ending 1st February 1888.*—Rainfall good for season throughout Rajputana; agricultural operations satisfactory. Standing crops generally good. Harvests good on the whole. Agricultural stock generally good. Pasturage or fodder fairly sufficient. Prices still high in some places. Opium damaged in places.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 6.} CALCUTTA, SATURDAY, FEBRUARY 11, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 1st Feb. 1888.

The unsettled conditions which had characterised the weather for the period January 19th to January 25th continued into the week under review.

On the 26th the depression, which was reported from the neighbourhood of Deesa on the 25th, had reached Seoni, where the barometer had fallen $\frac{1}{6}$th of an inch. On the same day a second depression was shown over the north-west of the Panjab. The effect of these two depressions was to occasion a strongly marked easterly and south-easterly current of wind over the Gangetic plain, a westerly wind in the south of the Panjab, and a north-westerly wind over Rajputana and Guzerat. Both currents brought up much moisture. Rain was general over Northern India, Central India, and Rajputana, and snow fell on the hills. The heaviest rainfall was 2 inches at Patna, 1 inch at Roorkee and over $\frac{1}{2}$ an inch at Agra, Ludhiana, Lahore, Sialkot, Rawalpindi and Jeypore. The snow in the North-West Himalaya was exceptionally heavy, the undrifted snow at Mussooree and Simla measuring about 3 feet in depth. On the 27th the depression in the north-west had disappeared, but rain was reported from all parts of Bengal and the North-Western Provinces and from one or two stations in the central parts of the country and from Rawalpindi. Further snow had fallen on the hills, but the amounts were much less than on the preceding day. The depression from Seoni had reached Gopalpore, and the rainfall over Bengal and the head of the Bay was probably largely due to the ascensional movements taking place within the area of this depression. On the 28th the general barometric distribution had assumed a more normal form. A large area of high

pressure (30·10″ and above) had appeared over North-Western India, and the winds in that neighbourhood had returned to their usual north-westerly and westerly direction. Over the Bay readings were still abnormally low, and the depression, which had been shown near Gopalpore on the previous day, had apparently passed out to sea and was crossing the head of the Bay. In consequence, while fine weather was reported from most parts of Upper India, rain still continued over a large part of Bengal, Assam and the head of the Bay. The wind directions over Central India and the Peninsula were very irregular, westerly and north-westerly winds prevailing largely. By the morning of the 29th the depression over the Bay had reached the Arakan Coast, and rain was reported from Akyab, Thyetmio, Chittagong and Cuttack. With the exception of the head of the Bay where pressure was very deficient, the general distribution was fairly normal, a large high-pressure area overlying Northern India, with relatively low readings over the Malabar Coast and Ceylon. At Kurrachee the barometer was falling briskly with a rather strong easterly wind, and rain was reported from Sind and Dera Ismail Khan and snow from the North-West Himalaya. The wind circulation over Northern and Central India was fairly regular. On the 30th the chart showed a well-marked storm lying to the west of Kathiawar. It occasioned a cyclonic circulation of the winds in its neighbourhood and gave rain to Guzerat, the south of Rajputana and Lower Sind. On the opposite side of India, conditions had improved, the disturbance near Akyab having disappeared and the rain and cyclonic winds ceased. A large high-pressure area still overlay Northern India and except for the Kathiawar depression, conditions generally looked tolerably settled. On the 31st this depression had advanced eastward as far as Indore. It appeared to be slowly filling up, but was still surrounded by a well-marked cyclonic circulation of the winds. It was giving rain to all the Rajputana stations and to Deesa and Rajkote. The chart of February 1st showed that the barometer was rising slightly in the north-west but falling elsewhere. The depression near Indore had disappeared but another, though very slight depression, lay between Ratnagiri and Bombay, and conditions off the Sind Coast again looked very unsettled. Slight rain had fallen at Kurrachee and Jeypore.

Pressure.—The mean pressure of the week has been above the monthly average around the Gulf of Martaban, in Behar, the North-Western Provinces, the south-east of the Panjab, in the Peninsula (except the Circars) and in Rajputana and Central India; below it elsewhere. The greatest deficiency has been over the hills (where the barometer has been very low), the greatest excess on the Malabar Coast.

Temperature—Has been above the monthly average in Burma, Ceylon, Malabar, and Madras, but has been much below elsewhere. In Northern, North-Western and Central India the weather has been exceptionally cold—more particularly on the hills. The mean deficiency, as compared with the monthly average, has been 3° in the Central Provinces, 4° in Bengal and the Panjab, 6° in the North-Western Provinces, Guzerat and Central India, 8° in Sind and Rajputana and 9° at the hill stations. Sharp frost has prevailed on the hills during nearly the whole week.

Humidity.—The air has been damper than usual almost everywhere.

Rain.—The rainfall of the week over the greater part of the country has been exceptionally heavy. In Malabar and Bombay there has been no rain, and in Ceylon, the Berars and Central Provinces and Madras only an insignificant amount, but elsewhere the total has been everywhere high. The greatest average fall per station was in the hills.

This wet week has had the effect of considerably reducing the deficiency which previously prevailed over Northern India. At several places in Bengal, the North-Western Provinces, the Panjab, Sind and Rajputana, the seasonal rainfall is now in excess of the average and at nearly all stations in those Provinces the existing deficiency is generally slight.

The concluding table gives the total rainfall of the past week according to the different provinces.

Divisions.	Number of stations.	Total rainfall.
Burma	2	1·11
Bengal and Assam	16	17·05

W. L. DALLAS,
for *Meteorological Reporter to the Govt. of India.*

Simla, 4th February 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 4th February 1888.*—No rain, except a small quantity in Ganjam and Vizagapatam. Rainfall to date generally sufficient, except in parts of Vizagapatam, Madura, Tinnevelly and Salem. Water-supply for cultivation deficient in four talukas of Madura. Agricultural operations progressing as usual. Crops generally good, but slightly damaged here and there by rain, disease or insects. Pasture generally sufficient, but scanty in Malabar, and parts of Madura and Anantapur, and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 8th February 1888.*—Rain in most districts of Sind, Guzerat and Kathiawar, favourable to late crops in Karachi, but wheat and cotton in parts of Ahmedabad and Kathiawar, cotton in parts of Broach and Baroda and some other crops in parts of Kaira and Panch Mahals and Baroda damaged by it; *jowari* in parts of Poona, linseed and gram in parts of Sholapur and exotic cotton and wheat in parts of Dharwar blighted; wheat in one taluka of Kaira damaged by rust and standing crops in one taluka of Nasik by adverse winds. Harvesting of early crops in progress in parts of Hyderabad, Khandesh and Sholapur and of late crops in parts of Khandesh, Nasik, Dharwar, Ahmednagar, Poona, Bijapur, Sholapur, Belgaum and Rajkot. Cotton-picking continues in parts of Surat and Kathiawar. Standing crops fair in Surat, Colaba and Belgaum, middling in Thana and good in other districts. Prospects of cotton in Wadhwan from 8 to 10 annas.

Bengal.—*For week ending 7th February 1888.*—No rain, the weather was fine throughout the week. The *rabi* and poppy crops have been much benefited by the rain of the last week, and are now generally doing well. Mustard and pulses are being gathered. The outturn of mustard is below the average in Chota Nagpore and in the Bhagulpore and Purneah districts. Sugarcane harvest is proceeding, and is giving a good outturn generally. Prospects of tobacco are promising, also of *ganja* in the Rajshahye district. *Boro* paddy is being planted out, and is thriving well. Ploughing for early rice, jute and indigo is in progress. Price of rice remained almost stationary during the last fortnight.

N.-W. Provinces and Oudh.—*For week ending 8th February 1888.*—Slight rain fell in most districts during the week. Clear weather is now needed for the crops in Lucknow, Cawnpore and Jhansi. The prospects of *rabi* are good and the poppy crop is thriving. The markets are full, but prices are still high. Condition of agricultural stock generally good.

Punjab.—*For week ending 8th February 1888.*—Rain has fallen in almost every district. Prices are very unsettled; in two districts a rise is reported; in others prices are stationary or falling. *Rabi* prospects have been greatly improved by the recent fall of rain; in Delhi and Hissar more rain is wanted. Prospects are now good. No damage done to crops. Stock cattle are healthy, except at Shahpur. Fodder is scarce in most districts, but grass prospects have improved. Poppy sowings completed.

Central Provinces.—*For week ending 8th February 1888.*—Weather rather cloudy, with slight rain in Seoni. The winter crops are generally in good condition; but linseed has been injured in Raipur, and a very poor outturn is expected. Prices are rising in Jabalpur and Bilaspur. Cattle in good condition.

Burma.—*For week ending 4th February 1888.*—Slight rain has fallen in the Akyab and Sandoway districts of Lower Burma, and in the Bhamo, Sagaing, Chindwin, Kyaukse, Pagan and Yamethin districts of Upper Burma. Ploughing and planting of dry-weather crops progressing. Health of cattle is good in most districts. No change in estimates of probable outturn of harvest since last report. Price of paddy has risen largely in the Mergui and Chindwin districts, and slightly in Akyab, Thonegwa and Myadoung. Price of paddy has fallen slightly in Rangoon, Hanthawaddy and Shwegyin.

Assam.—*For week ending 8th February 1888.*—Weather cold and cloudy with a few showers during the week. Winter rice harvest over in most districts. Sugarcane is being crushed. Tea-pruning nearly finished. Ploughing for summer rice general.

Mysore and Coorg.—*For week ending 8th February 1888.*—No rain. Standing crops in good condition, except in one taluka of the Shimoga district, where the wheat crop is reported to be affected by disease. Outturn of harvest favourable. Cattle generally in good condition. Prices slightly fallen in the Bangalore district.

Coorg has also had no rain. The coffee crop has been mostly picked. Prices of coffee have been falling, but show inclination to rise again.

Berar and Hyderabad.—*For week ending 8th February 1888.*—No rain during the week. Rainfall good throughout the province. Threshing of *jowari*, *tur* and *moong* continues. Standing *rabi* crop in good condition. Cultivators are engaged in preparing soil for the next season. Cattle healthy. Fodder insufficient in the Amraoti district. No noticeable change in the prices of food grains.

No rain in Hyderabad during the week. Agricultural prospects continue good.

Central India.—*For week ending 8th February 1888.*—Slight rain; except in Bhopal and Bhopawar fall has been sufficient. No change in agricultural operations since last week. Standing crops generally good. Outturn expected good, except in Western Malwa and Goona. Slight damage to wheat by blight in Bhopawar and hail in Goona. Agricultural stock and pasturage and forage good. Stock reported to be indifferent in Goona. Prices of food grains rising or high. Opium crops fairly good.

Rajputana.—*For week ending 8th February 1888.*—Rainfall above the average. Agricultural operations satisfactory. Standing crops much improved by recent rain. Present prospects good. Agricultural stock generally good. Pasturage or fodder sufficient. Prices steady, but still high in some States.

SUPPLEMENT TO

The Gazette of India.

No. 7.} CALCUTTA, SATURDAY, FEBRUARY 18, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REGISTRATION REPORTS OF THE SEVERAL PROVINCES FOR THE YEAR 1886-87.

No. $\frac{11}{300-312}$.

Extract from the Proceedings of the Government of India in the Home Department (Public),—under date Calcutta, the 14th February 1888.

READ—

Home Department Resolution No. $\frac{20}{39-49}$, dated 29th April 1887.

Read also—

The Registration Reports of the several Local Governments and Administrations for the year 1886-87.

RESOLUTION.

OBSERVATIONS.—The reports of the year under review show that taken as a whole the operations* of the Department were almost stationary. The number of registrations advanced in Madras, Bombay, the Punjab, the Central Provinces, Assam, and Coorg, but fell off in the other Provinces. The total receipts of the Department increased by Rs. 77,338 and the expenditure by Rs. 44,375 leaving a net financial advantage of Rs. 32,963. The most noticeable points in each of the provincial reports are briefly alluded to in the following summary.

	Total number of registrations.
* 1885-86	1,752,622
1886-87	1,753,405

2. *Madras.*— The total number of registrations in the Madras Presidency in the year under report amounted to 608,942 against 584,224 in 1885-86 and 485,210 the average of the last five years. The number of documents registered increased in all districts except in Vizagapatam, Calicut, Nellore and Tanjore. The decline in Vizagapatam amounted to 8·7 per cent., and the special attention of the Inspector General has been called to the matter. In the other three districts the decrease was slight. Over the Presidency there was an increase of 2·7 per cent. in compulsory registrations, while in optional registrations the increase reached 5·6 per cent. The continued improvement in the ratio of optional to total registrations is satisfactory, and shows that advantage is readily taken of the facilities afforded for registration.

The financial results continued satisfactory. The total receipts were Rs. 8,56,242, the highest figure yet reached. The expenditure including Rs. 42,300 for Public Works charges amounted to Rs. 7,00,761, showing an increase of 6·2 per cent. over the figures of 1885-86. The increase in expenditure was due to the opening of 16 new offices, to larger payments in commission and to the erection of new buildings. The surplus revenue of the year amounted to Rs. 1,55,481, and, though smaller than that of the year 1885-86, is the largest recorded except in that year.

3. *Bombay.*—In the Bombay Presidency the number of registrations during the year amounted to 112,412. These figures are the highest yet recorded in the Presidency and show an advance of 4,056 transactions as compared with those for the year 1885-86. The increase was confined to compulsory registrations; in optional registrations there was a slight decrease. In the four Deccan Districts of Ahmednagar, Poona, Satara and Sholapur, the cause of increase in the number of registrations is said to be the change of law effected by Act XXIII of 1886, necessitating the registration by Sub-Registrars under Act III of 1877 of certain documents formerly registered by Village Registrars under the provisions of Chapter VIII of the Deccan Rayats Relief Act. This influence was at work during three months of the year with which the report deals, and had done much to swell the returns under the Registration Act in the four districts named. There was a slight increase in the receipts and expenditure of the Department over those of the previous year. The Inspector General of Registration has had under consideration the question of the application of a system of travelling Sub-Registrars in a specially developed form to the four Deccan Districts, and the Bombay Government has called upon him to submit a report upon this subject.

The report on the working of the registration provisions of the Deccan Agriculturists' Relief Act No. XVII of 1879 shows that such transactions declined from 101,082 to 89,893. This decrease was common to all four districts, and occurred in transactions relating to both immoveable and moveable property. The main cause of the decline is the alteration in the law above referred to; but the smaller number of Hindu marriages during the period under review had also an appreciable effect on the figures.

4. *Bengal.*—The total number of registrations in the Lower Provinces of Bengal decreased from 723,901 in the preceding year to 698,539 in the year under review. Compulsory registrations affecting immoveable property fell from 386,032 to 376,898, and optional registrations of the same class from 211,384 to 194,518. In other registrations of the optional class, there was a small increase from 126,485 to 127,123. The decline was chiefly under the heads of perpetual leases and of deeds affecting immoveable property of less than Rs. 100 in value. The decrease in perpetual leases is attributed to the operation of section 85(2) of the Bengal Tenancy Act which debars occupancy ryots from granting perpetual leases, while the falling off in the number of deeds of mortgage and of sale is said to be due to the increased solvency of the ryots and the additional expense entailed by the Tenancy Act on account of landlord's fees and process fees. The provisions of the Act which require registering officers to take landlord's fees from persons registering documents by which subtenures are transferred and to transmit them to District Collectors for the

zamindárs is said to have imposed a new and irksome duty upon the Department. The matter is under the consideration of the Revenue Department of the Local Government.

The operations under the Muhammadan Marriage Registration Act shew a falling off from 7,524 in 1885-86 to 7,252 in the year under review. The latter is the smallest number of ceremonies registered since the introduction of the Act. The Act is said to be unpopular, and the want of local influence on the part of persons who have been appointed to the office of Kázi is mentioned as one of the causes of unpopularity. The question of making the Act compulsory has recently been under the consideration of the Lieutenant-Governor, who has determined to adhere to the decision of Sir Rivers Thompson to give the revised rules a five years' trial and not to propose compulsory legislation unless a really unanimous call for it is found to exist among all sections of the Muhammadan community.

The total receipts of the Department fell from Rs. 10,88,177 to Rs. 10,31,485, and there was a small reduction in the expenditure from Rs. 5,68,365 to Rs. 5,64,274. Half the decrease in the receipts is said to have resulted from the order of the High Court cancelling from the 1st October 1886 its rules requiring a search to be made before an application is filed for the sale of immoveable property under attachment in execution of a decree with a view to ascertain whether the property is subject to any encumbrance.

5. *North-Western Provinces and Oudh.*—In the North-Western Provinces and Oudh there was a falling off of 7,238 transactions, or 3·8 per cent. The decline was at the rate of 4·3 per cent. in the North-Western Provinces and of 3 per cent. in Oudh. Voluntary registration of documents affecting both moveable and immoveable property fell off in both Provinces; and it was only in respect of documents affecting immoveable property, the registration of which is compulsory, that there was any increase and that only in Oudh. The enquiries instituted into the circumstances which gave rise to the increase in the numbers of sales and mortgages in 1885-86 in the Family Domains of the Maharaja of Benares show that the chief causes were a growing recognition of the value of registration and a desire on the part of the Maharaja to protect himself from the accrual of tenant right on his domains, rather than any sudden increase in the indebtedness of the tenants. With reference to the remark made in the review of the report for the year 1885-86 that the comparative rarity of execution sales in Oudh compared with the North-Western Provinces should continue to receive attention, it is explained by the Inspector General of Registration that the circumstance referred to is partly due to the existence in Oudh of large estates and wealthy owners; to some extent to the greater tenacity with which the Oudh land-owner clings to his land, and partly to the disinclination of the money-lender to acquire land outright. The Lieutenant-Governor and Chief Commissioner thinks that the absence of indebtedness among the proprietary classes in Oudh is the principal check on the transfer of land. There was a decline of Rs. 5,251 in the receipts of the Department, due to the falling off in the number of registrations. There was also a nominal decrease in the expenditure during the year.

6. *Punjab.*—The year's results show an increase of 3,241 transactions in the total number of registrations. The increase in the number of documents registered in the ordinary mode was entirely confined to deeds, the registration of which is compulsory under the law. The number of such registrations rose from 45,560 to 49,690, while the number of optionally registrable documents registered fell from 20,890 to 20,001. This decline is attributed to the working of the new rules for recording mutations of land in the Revenue registers by which transfers of land are carefully registered by the Revenue authorities on the spot, the parties to such transfers being saved the trouble of appearing before Sub-Registrars. The steady rise during the past few years in the number of compulsory registrations is believed to be mainly due to the transfers of land having become more numerous. His Honour has drawn the attention of District Officers to the point as one deserving of attention. The total receipts of the Department amounted to Rs. 1,91,656 and the expenditure to Rs. 1,04,610.

The figures under this head for the previous year were Rs. 1,77,664 and Rs. 1,00,842 respectively. The surplus of income over expenditure was Rs. 87,046, the largest yet attained.

7. *Central Provinces.*—The total number of documents registered rose from 24,605 to 25,695, or by 4·4 per cent. This increase of 1,090 transactions occurred mainly under the head of compulsory registrations, which rose from 15,236 to 16,197. Optional registrations increased from 9,205 to 9,330. The instruments registered in greatest numbers were mortgages of immoveable property which usually form about two-fifths of the total number of documents annually registered. The large decrease from 4,337 to 3,540 in the number of leases registered is attributed to the greater efficiency of the Patwari staff consequent upon its reorganization and the approach of settlement operations. The income of the Department rose from Rs. 72,525 to Rs. 78,166, and the expenditure fell from Rs. 41,530 to Rs. 40,791. The percentage of expenditure on receipts fell from 57·2 to 52·1.

8. *Lower Burma.*—The office of Inspector General, which was established at the commencement of 1885-86, was abolished from the 1st January 1887, and Commissioners of Divisions were re-appointed Inspectors of Registration for their several Divisions. There was a considerable decrease in the number of registrations, which fell from 8,919 to 7,630, or to the smallest figure since 1881-82, a result due to stagnation of trade and the disturbed condition of the country. The receipts of the Department, however, rose from Rs. 24,580 to Rs. 25,502 in consequence of the increase in the scale of registration fees introduced early in the year. There was a slight increase in expenditure. The Government of India trusts that, with the removal of the exceptional causes which operated to retard the progress of registration in Lower Burma, the working of the Department will now show better results.

9. *Assam.*—There was again an increase in the total number of registrations in Assam, which rose from 21,213 to 24,169. Of the documents registered, 21,015 were contributed by the districts of Cachar and Sylhet in the Surma Valley, and 3,095 by the districts in the Assam Valley. In the hill districts only 59 transactions were registered. The peculiarity in the tenure of landed property, owing to which transfers of rights in it are comparatively rare, is held to account for the small number of registrations in the Assam Valley Districts. The increase in the number of registrations chiefly occurred in respect of such instruments as were not required to be registered prior to the passing of the Transfer of Property Act and is ascribed to a better appreciation of the Transfer of Property Act consequent on the introduction of the Assam Land and Revenue Regulation and the necessity of producing registered proofs of title in mutation cases. A secondary cause which operated in the Surma Valley was the distress caused by the floods which led to more numerous transfers of property. There was a considerable falling off in the number of inspections of sub-offices by Registrars. The notice taken by the Chief Commissioner will, it is hoped, be productive of improvement in this respect in future. The receipts of the Department rose from Rs. 34,583 to Rs. 36,415, the highest figure yet attained, and the expenditure from Rs. 19,205 to Rs. 22,509. The surplus was Rs. 13,906 against Rs. 15,378 in the preceding year.

10. *Coorg.*—In Coorg there was an increase in the total number of registrations. In the office of the Registrar of Coorg, though the number of documents relating to moveable property exceeded those of last year by three, the value of the transactions fell off by Rs. 1,28,189 or Rs. 21,522 more than the aggregate amount of the decrease in all the offices in Coorg. Explanation on this point has been called for. The expenditure fell from Rs. 2,376 to Rs. 2,025. The decrease was due to the abolition of the office of the Registrar for South Coorg in January 1886. There was a slight increase of Rs. 39 in the income of the Department.

11. *Hyderabad Assigned Districts.*—In the Hyderabad Assigned Districts, where there had been a steady increase in registration business since the year 1875-76, the total number of transactions fell from 26,632 in the previous

year to 25,088 in the year under report, or by 5·8 per cent. The decrease was general over the province and occurred chiefly in instruments of mortgages, the registration of which is compulsory, and also to a less extent in instruments of the same kind when registration is optional. The general cause of the decline is said to be that the year under review followed a year of "sinhast," or entrance of Jupiter into Leo, which occurs once in every twelve years and which is considered unpropitious for marriages. Past experience among Hindus shows that there is good reason to believe that this period exercises in Berar a prejudicial effect on registration during the years immediately succeeding. The falling off in registrations led to a decline in the total receipts from Rs. 59,838 to Rs. 55,952. There was also a slight decrease in the expenditure of the Department from Rs. 36,788 to Rs. 36,318. The inspection work by District Registrars has been very unsatisfactory, and the Government of India trusts that the notice of this neglect of duty taken by the Resident will tend to an improvement in this respect.

In Secundrabad 690 documents were registered against 636 in the previous year. The receipts amounted to Rs. 2,076 and the expenditure to Rs. 931.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Local Governments and Administrations marginally noted, and to the Foreign and Revenue and Agricultural Departments for information, also that the Resolution be published in the *Gazette of India*.

READ—

Annual Report on the operations of the Post Office of India for the year 1886-87.

Resolution of the Government of India, in the Department of Finance and Commerce, No. 732, dated the 9th February, 1888.

ORDERED, that the Report and the Resolution be published in the *Gazette of India*.

C. J. WEIR,
Offg. Under-Secy. to the Govt. of India.

No. 732, dated Calcutta, the 9th February, 1888.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

The Annual Report on the operations of the Post Office of India for the year 1886-87.

RESOLUTION.—The Report of the operations of the Post Office of India for the year 1886-87 is a satisfactory record of progress and of the increased usefulness of the Department.

The principal events of the year are summarized in the first 16 paragraphs of the Director General's report. The most important of these, so far as the inland service is concerned, is the re-organization of the Railway Mail Service.

2. A new contract with the Peninsular and Oriental Steam Navigation Company for the conveyance of the mails between Europe and India was concluded, which will come into force on February 1st, 1888. The period of transit will be reduced by one day and the subsidy by £95,000.

3. The Revenue Money Order system has been extended to all the North-Western Provinces and Oudh, except Kumaon, and has also been successfully introduced into Lower Bengal. The Governor General in Council has also read with interest the remarks in paragraph 32 describing the arrangements made for enabling tenants to remit rent by Money Order. The Director General will, of course, take into consideration the question of the further development of the Money Order system in both directions.

4. The sale of Indian Postal Notes was discontinued as the scheme has not proved successful. The probable discontinuance of the sale of British Postal notes is also mentioned, but the Governor-General in Council desires that a further trial may be allowed before this concession is withdrawn.

It is desirable that the attention of the Public should be called to the remarks in paragraph 26 by the Post Master General of Bombay, showing the very large number of cases in which, on account of flimsy and insecure coverings, newspapers and other articles fail to reach the addressees.

5. The Revenue and Expenditure of the Post Office was as follows:—

	1885-86.	1886-87.
	₹	₹
Revenue	1,11,30,863	1,15,78,780
Expenditure	1,30,26,036	1,35,38,630
Deficit . .	18,95,173	19,59,850

To this deficit, however, should be added indirect expenditure connected with the Post Office which appears in the Finance and Revenue Accounts under other heads, while the charge of the District Post Establishments which is met from local cesses and contributions by Local Government has to be deducted. With these corrections the financial results of the working of the Department during the years 1885-86 and 1886-87 are as under—

	1885-86.	1886-87.
	₹	₹
Deficit according to Statement XI of the Report (purely postal transaction including exchange)	18,95,173	19,59,850
Add indirect expenditure . . .	7,06,925	6,52,417
	26,02,098	26,12,267
Deduct District Post Charges . .	10,87,120	11,09,172
Resulting deficit	15,14,978	15,03,095

As pointed out last year, this deficit includes the cost of keeping up the savings bank accounts and also the charges connected with postal arrangements in Beluchistan. The cost of these arrangements was ₹98,429 in 1885-86 and ₹90,388 in 1886-87.

6. The thanks of the Government are due to Mr. Hogg for the continued success of the administration, and also to the officers named in paragraph 80 of the report.

ORDERED, that a copy of the foregoing Resolution be communicated to the Director General of the Post Office of India.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

ANNUAL REPORT

ON THE

OPERATIONS OF THE POST OFFICE OF INDIA

FOR THE YEAR

1886-87.

No. 10750, dated 31st December, 1887.

From—F. R. HOGG, Esq., *Director General of the Post Office of India,*
To—*The Secretary to the Government of India, Department of Finance and Commerce.*

I have the honour to submit the Annual Report on the operations of the Post Office of India for the official year 1886-87.

2. Bolivia, in South America, joined the Universal Postal Union with effect from the 1st February 1887.

3. Although sea communication with Europe is a service distinct from the Indian inland post, to which this report relates, it is usual to enter some information relating to its cost. The subsidy paid to the Peninsular and Oriental Company is not nearly covered by the postage realized. All that India collects on account of sea postage is credited to Great Britain; and when this, as well as the British collections, have been deducted from the total cost of the sea service, the balance or net cost is made a charge in equal shares upon the United Kingdom and India. This country's share of the expense since the year 1869-70 is entered in the margin.

Communication by sea between India and Europe by means of the contract service of the Peninsular and Oriental Steam Navigation Company.

YEAR.	Net loss on the Foreign Mail Service charged against India.	REMARKS.
	£	
1869-70 . . .	73,110	The increase in 1876-77 and following years was caused by the reduction of postage carried out on 1st July 1876, when India entered the Union. The increase in 1879-80 is due to the reduction of postage introduced from 1st April 1879 under the Convention of Paris.
1870-71 . . .	69,150	
1871-72 . . .	68,110	
1872-73 . . .	61,072	
1873-74 . . .	54,770	
1874-75 . . .	57,170	
1875-76 . . .	53,125	
1876-77 . . .	66,685	
1877-78 . . .	70,749	
1878-79 . . .	71,051	
1879-80 . . .	88,160	
1880-81 . . .	71,051	
1881-82 . . .	70,000	
1882-83 . . .	70,000	
1883-84 . . .	70,000	
1884-85 . . .	70,000	
1885-86 . . .	68,000	
1886-87 . . .	68,000	

4. Below is given an extract from the report of the Post Master General of Bombay relating to the working results of this contract:—

"The contract steamers of the Peninsular and Oriental Company arrived in Bombay behind contract time on four occasions. On three of these occasions the delay was due to detention in the Suez Canal, or on account of quarantine; while on the fourth occasion the S. S. *Assam* arrived 7 hours and 7 minutes behind time on the 30th November 1886, owing to the constant head winds which the steamer encountered all the way from Suez. The extent of the delay in the arrival of the other steamers is shown in the margin. On the other hand, the mail steamers arrived in Bombay on 36 occasions on Monday, the day before the prescribed day of arrival, and on one occasion on Sunday. The average

	D.	H.	M.
The S. S. *Siam*, on 3rd November 1886	1	1	25
The S. S. *Assam*, on 15th June 1886	0	8	48
The S. S. *Assam*, on 7th September 1886	0	1	54

time occupied by the mails was 16 days 22 hours and 20 minutes from London to Bombay, and 16 days 20 hours and 54 minutes from Bombay to London."

5. In anticipation of the termination of the present Peninsular and Oriental contract, an inter-departmental Committee met at London in 1884 to investigate the subject of mail arrangements for the East. One of the recommendations offered by that Committee was that, when tenders for a new service were invited, an effort should be made to reduce from 18 to 16 days the time occupied in transit between London and Bombay: and the invitation for tenders issued in the following year was framed with the object of securing this reduction. But on receiving the tenders, Her Majesty's Post Master General expressed a decided preference for an offer from the Peninsular and Oriental Company to bring the mails from London to Bombay not in 16 but in 17 days, using the canal instead of the railway between Mediterranean and the Red Sea. This suggested substitution of the slower canal passage for the quicker land route across Egypt considerably neutralized the gain derived from increased speed in steaming and enhanced the risk of accidental delay. India, therefore, opposed the British proposal and pressed for the retention of the land route between Alexandria and Suez, looking upon a reduction to 16 days in the time taken for mail conveyance between London and Bombay as an imperative necessity. But the views of Her Majesty's Post Master General prevailed, and a new contract has been concluded with the Peninsular and Oriental Company in accordance with his views. From February 1888, therefore, the mails carried by this Company will pass through the canal, the period allowed for transit being nearly 17 days. But the annual subsidy to be paid for the Eastern mail service, which includes both China and India, will be reduced from £360,000 to £265,000, and the expense of transit by land across Egypt will also be saved.

6. Under contract with the India General Steam Navigation Company, a daily steamer service began to work on the 1st January 1887 from Narainganj on the Megna to Fenchuganj or Karimganj on the Surma: during the rainy season this service is extended to Silchar. A new four-weekly mail service was also established by the German Post Office, *viâ* the Suez Canal, between Bremen on the one side and Australasia, China, and Japan on the other. So far as Indian postal arrangements are concerned, this line is used only by the Aden Post Office for its own exchanges and for those of Zanzibar. A list is given below of the principal steam services for maintaining postal communications in Indian waters, with the Indian Post Offices in the Persian Gulf and Turkish Arabia with Ceylon, the Straits, China, and Australia:—

By the British India Steam Navigation Company.

(1) Weekly communication between Calcutta, Rangoon, and Moulmein. (2) Weekly communication between Calcutta and Rangoon, *viâ* Chittagong, Akyab, Kyouk-Phyo, and Sandoway. (3) Weekly communication between Rangoon and Mergui, *viâ* Tavoy. (4) Fortnightly communication between Madras and Rangoon, touching at certain intermediate ports on the north-east coast of Madras. (5) Weekly direct communication between Bombay and Karachi. (6) Weekly communication between Bombay and Karachi, *viâ* the coast ports. (7) Weekly communication between Karachi and Busrah, *viâ* the Persian Gulf ports.	Under contract with the Post Office for ten years, from 1st May 1884, on an annual subsidy of ₹4,39,000.
(8) Fortnightly communication between Madras and Bimlipatam, *viâ* Masulipatam, Coconada, and Vizagapatam. (9) Weekly communication between Tuticorin and Colombo.	Under supplementary contract with the Post Office, from 6th May 1886 to 30th April 1894, on an annual subsidy of ₹15,000.

(10) Weekly communication between Kyouk-Phyo, Ramree, and Cheduba.	Under contract for ten years, from November 1884, with the Local Administration, on a monthly subsidy of ₹1,500 for the first five years and ₹1,200 for the second period of five years, subject to other arrangements if intermediately made.

By the Asiatic Steam Navigation Company.

(11) Four-weekly communication between Calcutta and Port Blair, with extensions to Nancowry and Rangoon.	Under the control of the Military Department, the consideration given being not in the form of subsidy but of guaranteed rates for the transport of Government stores. Began to work from the 12th May 1882, and terminable by a notice of six months.

By the Irrawaddy Flotilla Company.

(12) Weekly communication between Rangoon and Mandalay and intermediate ports, with a monthly extension between Bhamo and Mandalay.	Under contract for five years from the 1st January 1886, the subsidy being ₹3,500 per month.
(13) Semi-weekly communication between Rangoon and Bassein, and Bassein and Henzada.	Under contract with the Local Administration for five years, from 1st July 1880, and to continue in force thereafter, unless determined by six months' notice. The monthly subsidy is ₹2,500, towards which the Post Office contributes ₹500 per mensem.

By the Euphrates and Tigris Steam Navigation Company.

(14) Weekly communication on the river Tigris between Busrah and Bagdad.	Under contract for ten years, from the 1st May 1884, with Her Majesty's Secretary of State for India. Subsidy ₹36,000 per annum: steamers run in connection with line No. 7.

By Messrs. Apcar and Co., Calcutta, and Jardine, Mathewson, and Co., Hong-Kong.

(15) Monthly communication between Calcutta and Straits and Hong-Kong, the dates of departure being regulated primarily with reference to the Calcutta opium sales.	No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

(16) Fortnightly communication between Calcutta and Colombo, touching at Madras. Fortnightly communication between Bombay and Colombo.	Non-contract lines maintained by the Company on its own account in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

(17) By the River Steam Navigation Company. Daily communication between Dhubri and Dibrugarh on the Brahmaputra river.	Under contract with the Local Administration from the 7th October 1883 to the 1st May 1893. Annual subsidy ₹1,00,000, towards which the Post Office contributes ₹30,000.
(18) By India General Steam Navigation Company. Daily communication between Narainganj and Silchar.	Under contract with the Local Administration, from 1st January 1887 to 31st December 1891. Annual subsidy ₹40,000 during the first two years, and ₹30,000 during the succeeding three years, towards which the Post Office contributes ₹10,000.
(19) By Shepherd and Company's Steamers. Daily communication between Bombay and Goa.	Under contract with the Local Government, from 1st October 1886 to 31st May 1887. The monthly subsidy is ₹2,880, towards which the Post Office contributes ₹780, the Portuguese Government ₹200.

(20) By Bengal Central Flotilla Company. Daily communication between Khulna and Barisal.	Under contract with the Post Office from 1st July 1884 to 30th June 1889. Monthly postal subsidy R350, of which the Imperial Post Office contributes R183, terminable by six months' notice.

NOTE.—A service by sea worked by native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankesanturai on the Ceylon side.

7. One of the most important events of the year was the introduction in the North-Western Provinces and Oudh of the rent money-order system, under which special facilities are furnished for the payment of rent by tenants to landlords through the agency of the Post Office. The revenue money-order system, which utilises the Post Office as a medium for transmitting land revenue from landlords to the Government, was extended throughout the Lower Provinces of Bengal and to nearly all the districts in the North-Western Provinces and Oudh.

8. All District Savings Banks were closed from the 1st April 1886, their business being transferred to the Post Office, and from June in that year the Postal Department undertook the duties previously discharged by the Savings Banks at District Treasuries managed by the Banks of Madras and Bombay.

9. The inland telegraphic money-order rules were simplified, and the rates of charge to the public considerably diminished.

10. A considerable reduction was made in the rates of postage fixed for correspondence exchanged with Ceylon, the charge to the public on articles sent by the principal routes passing through the south of India being now only the inland rates of the country of origin.

11. Stationary Examiners of Post Office Accounts were substituted for the previously existing system of travelling Examiners. Under this change the accounts are sent to the Examiner instead of that officer being required to visit the offices, and, besides increased efficiency, a great saving in travelling expenses has thus been effected. The duty of verifying balances at Post Offices, which formerly devolved on the Examiner, has been transferred to the Superintendent of the Division.

12. Postal conventions were concluded with the Native States of Chumba and Faridkot, providing for an exchange of correspondence, parcels, and money orders.

13. A special set of rules were framed by the Post Master General of Bengal for taking personal security from Post Masters, Sub-Post Masters, Village Postmen, and Post Office Clerks, and the rules were made applicable to these classes of officials in the Circles of Bengal, Madras, and Assam.

14. With the object of diminishing its yearly growing expenditure, the Railway Mail Service Branch of this Department has been subjected to a careful reorganisation. As the cost of sorting letters in a railway carriage is far more expensive than in a Post Office, stationary offices were established at large junction-railway stations where the intervals of time available between arrivals and departures of trains on main and branch lines are utilised for the sorting of correspondence. Similarly a large number of direct mail bags between large Post Offices have been introduced so as to curtail the sorting work done in the travelling Post Office. Direct mail bags also now pass between Post Offices and the main arterial lines of railway communication, which has rendered possible either a reduction in the number of sorting sections maintained on the side and less important railway lines, or a diminution in the space used by the Post Office on such lines. By the imposition of a late letter fee the abuse of posting letters in wholesale quantities in the vans provided for sorting operations has been checked, while offices maintained by this Department at railway stations for Railway Mail Service work have, to a large extent, been relieved of money order, registration, and other duties which properly belong to the local Post Office. With railway

extensions postal charges must increase, but through the measures above sketched, the Inspector General of the Railway Mail Service has been able not only to minimise the extra cost arising from additional establishments required, but also considerably to reduce the increased payments made by this Department to the several Guaranteed and State Railways.

15. After an existence of more than a century the dromedary post across the Syrian desert was closed in July 1886. Though controlled not by this Department but by the British Consulate, this line formed an important auxiliary to Indian postal arrangements in Turkish Arabia. By this route mails were exchanged between Bagdad and Europe, and Lord Nelson is said to have used it for conveying to the Government of India news as respects the battle of the Nile. Originally the line ran from Busreh at the mouth of the Tigris to Aleppo: but since 1843-44 the termini were Bagdad and Damascus, the time occupied in transit being about nine days. In 1881, a desert post over the same line having been established by the Ottoman Government, the income derived from the consular post fell off and, as its expenditure exceeded its receipts, the number of trips was first reduced from once a week to once a fortnight, and eventually this British desert post line was wholly discontinued.

16. The Jubilee of Her Majesty the Queen-Empress was celeberated in India on the 16th February last, and both the 16th and 17th of that month were observed as Post Office holidays. On the night of the 16th February, the Post Offices in the three Presidency towns were splendidly illuminated, and most of the larger offices in the interior were also illuminated.

Section I.—Post Offices, Letter Boxes, and Village Postmen.

17. Appendix I, of which an abstract is given in the margin, compares the number of Post Offices, Letter Boxes, and Village Postmen maintained on the last day of the year under review with the number which existed at the close of the previous year. There has been a reduction in the number of head offices from 330 to 326, and an increase in the number of sub-offices from 3,900 to 3,904, while the number of village offices has risen from 2,619 to 2,867: thus the total increase of 248 is wholly confined to the last named head. The largest increases are in Bombay (67), in Bengal (58), and in Madras (30). Most of these new offices are worked by schoolmasters and other extraneous means, the total number of these extra-departmental agencies being 2,214 on the 31st March 1887, as compared with 1,969 at the close of the year 1885-86.

	Number at the close of 1885-86.	Number at the close of 1886-87.	Increase.
Post Offices	6,849	7,097	248
Letter Boxes	9,056	9,386	330
Village Postmen	4,253	4,455	202

Section II.—Postal Lines.

18. Appendix II shows for each postal circle the mileage under the various means used for the conveyance of the mails during two years: the figures for the whole of India are exhibited on the margin. The sections which compose the total increase of 848 miles under the head of "Railway," are distributed over numerous lines

Year.	Railway.	Mail cart, horse and camel lines.	Runners or boats.	Steamer service, sea and river.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.
1885-86	11,862	4,227	35,281	11,117	62,487
1886-87	12,710	3,933	35,729	11,683	64,055
Increase	848	...	448	566	1,568
Decrease	...	294	...	...	...

in various parts of India, the provinces principally affected being Bombay, the North-Western Provinces and Oudh, Madras, Rajputana, Eastern Bengal, Behar and Baluchistan. Under the next heading, 826 horsed lines have been closed and 532 opened, the net decrease being 294 miles. Among the more important of the new lines opened are the following:—Giridih and Hazaribagh, 72 miles; Calicut and Cannanore, 57 miles; Jhansi and Gwalior, 65 miles; Chitor and Oodeypore, 72 miles; Toungoo and Pyinmana, 64 miles. The greater part of the additional mileage under the head of "Runners and Boats" has occurred in Assam, and was due to the extension of mail communication in the direction of Upper Burma, necessitated by military operations in that locality. Finally the increase in steamer mileage is explained by the opening of the river line between Narainganj and Silchar, to which reference has already been made.

Section III.—Correspondence.

19. Appendix III contains the general correspondence returns for each circle, the results for the whole of India being summarised on the margin. Compared with the figures for the previous year, each heading shows improvement, the increase on the total being nearly 16 millions of articles, or 6·63 per cent. This increase has, for the most part, been general throughout India, the principal exception being the Postal Circle of Central India, where the closure of certain Imperial Offices situated within Gwalior territory and the extension of postal operations undertaken by that Native State, has resulted in a fall of 10·77 per cent. in the correspondence given out for delivery through the Imperial post in that territory. It will be seen that the proportion of increase is lower in the case of newspapers than under the other headings. By the reduction of postage rates on the lighter Native papers in the year 1881, a stimulus was given to this class of correspondence, as the marginal figures will show, and the percentage in growth now recorded is smaller than that of any year since the reduction referred to took place. Parcels exhibit an increase of 7·02 per cent. Now that the Post Office has to compete in this kind of business with combinations of railway lines over the length and breadth of India, the retention of parcel traffic largely depends on the facilities furnished to the public by the value-payable and insurance systems, which already compose about one-third of the total number of parcels posted. Book and pattern packets again present the highest proportion of increase. Analysing the details of this business it is found that the number of registered book packets has fallen by nearly 18·24 per cent. but that this fall has been more than counterbalanced by an increase, exceeding 86 per cent., in the number of unregistered value-payable book packets.

Year.	Letters, including Post-cards.	Newspapers.	Parcels.	Book and Pattern Packets.	Total.
	No.	No.	No.	No.	No.
1885-86	211,982,718	20,341,814	1,476,271	5,119,335	238,920,138
1886-87	225,811,265	21,606,697	1,579,904	5,751,878	254,749,744
Increase	13,828,547	1,264,883	103,633	632,543	15,829,606
Percentage of Increase	6·52	6·22	7·02	12·36	6·63

Year.	Increase.
1881-82	4·89 per cent.
1882-83	12·36 ,,
1883-84	12·60 ,,
1884-85	10·47 ,,
1885-86	16·19 ,,
1886-87	6·22 ,,

20. Further details relating to letters and post-cards are entered on the margin. The number of post-cards has risen by rapid strides from 15 millions in 1880-81 to 68 millions in 1886-87. These figures include reply post-cards, the number of which has declined from 2,913,666 in 1885-86 to 2,479,341 during the year under review. When these cards first were introduced their size was somewhat larger than that of the ordinary card, and a practice began of separating the reply card into two portions and using each portion as a separate card, because of the extra space provided. But the size of the reply-card having now been reduced to the limits of the single card, the practice referred to has been discontinued, and a fall in the number of reply-cards is the natural result. Notwithstanding the competition of post-cards, a normal increase is to be found under the heading of Paid Letters. Unpaid Letters exhibit a decrease, which the Post Office always recognises as a healthy sign of increasing confidence on the part of the native public: but the sale of both post-cards and of the cheaper kinds of embossed envelopes free of charge for material and manufacture necessarily tends to encourage the prepayment of correspondence. Registered Letters have increased by 9·77 per cent.: this is the highest increase since 1881-82, the year following the reduction of the registration fee from 4 annas to 2 annas.

Year.	Post-cards.	Letters Paid.	Letters Unpaid.	Letters Registered.	Total.
	No.	No.	No.	No.	No.
1885-86	58,853,057	120,106,172	28,813,071	4,200,518	211,982,718
1886-87	67,756,058	125,87.,580	27,562,688	4,620,859	225,811,265

Decrease	...	...	1,250,383	...	...
Percentage of Increase	15·13	4·80	...	9·77	6·52
Percentage of Decrease	...	...	4·34	...	...

21. Foreign correspondence is included in the general returns already dealt with, but separate figures are given below. Last year's report exhibited an increase in the correspondence sent to the United Kingdom and a fall in the amount received from that country: while the statistics for 1886-87 shew an increase in both directions, the increase in the number of articles received from the United Kingdom (15·47 per cent.) being much higher than the increase (4·63 per cent.) in the number sent to that country:—

	Class.	Estimated Aggregate Number. 1885-86.	1886-87.	Percentage of Increase.	Remarks.
Despatched from India to the United Kingdom.	Letters, including Post cards	No. 3,012,359	No. 3,099,565	No. 2·89	These figures are based on the monthly accounts between India and the United Kingdom.
	Newspapers	384,608	394,232	2·50	
	Books, &c.	653,385	744,372	13·92	
Received in India from the United Kingdom.	Letters, including Post-cards	2,669,298	2,991,707	12·07	
	Newspapers	2,366,336	2,725,525	15·19	
	Books, &c.	2,103,184	2,526,043	20·10	
Grand Total of all Correspondence exchanged with the United Kingdom.	Letters, including Post-cards	5,681,657	6,091,272	7·20	
	Newspapers	2,750,944	3,120,157	13·42	
	Books, &c.	2,756,569	3,270,415	18·64	

	Class.	Estimated Aggregate Number. 1885-86.	1886-87.	Percentage of Increase.	Remarks.
Despatched from India to Foreign Countries other than United Kingdom.	Letters, including Post-cards .	No. 715,390	No. 715,390	No. ...	Under the system prescribed by the Universal Postal Union, statistics are taken once only in three years from which these figures are deduced. This explains the reason why the figures for 1885-86 have been repeated in the year 1886-87.
	Other articles .	293,867	293,867	...	
Received in India from Foreign Countries other than United Kingdom.	Letters, including Post-cards .	744,244	744,244	...	
	Other articles .	558,117	558,117	...	
Grand Total of Correspondence exchanged with Foreign Countries other than United Kingdom.	Letters, including Post-cards .	1,459,634	1,459,634	...	
	Other articles .	851,984	851,984	...	

22. *Foreign Parcel Post.*—Early in the year the limit of weight for parcels exchanged with the General Post Office in London was raised from 7lb to 11lb. A new exchange was introduced between Zanzibar on the one side and India and the United Kingdom on the other: the exchange with the West Indies through the medium of the United Kingdom was extended to the Leeward Islands and Barbadoes: the direct exchange between Aden and Gibraltar was discontinued: and the temporary exchange with Suakim ceased. The working results of the year are tabulated in the following statement:—

Parcel Exchanges.	Total Number of Parcels. 1885-86.	1886-87.	Average Weight of each Parcel. 1885-86.	1886-87.	Net Revenue derived by the Indian Post Office after deduction of Customs Duty and sums due to the Peninsular and Oriental Company and London Post Office. 1885-86.	1886-87.

* The exchange with Suakim was discontinued on the 8th May 1886.

23. Foreign parcel business is, for the most part, conducted through Bombay, and the following extract is taken from a report by the Post Master General of that Circle on the results attained in connection with the United Kingdom, which is the largest and most important of all these exchanges. Mr Fanshawe's observations exclude the small amount of traffic derived from Aden:—

"The total number of parcels sent as mails between the Indian and English Post Offices and carried by the P. and O. Company on account of their own agency in communication with the Indian Post Office, was 8,248 in excess of the number of last year. It has already been stated that the limit of weight of parcels exchanged with the London Post Office was raised in May 1886 from 7lb to 11lb, so that for 11 months of the year parcels of the greater weight could be sent and received. The year under report is further the first year, during the whole of which the parcel exchange with the London Post Office has been in force, and the way it has affected the parcel traffic and the revenue is very marked. In 1884-85, before the arrangement with the London Post Office was introduced, 70,467 parcels were received from the United Kingdom by the agency of the P. and O. Company. In 1885-86 the direct exchange of light parcels with the London Post Office was introduced from the 1st July 1885, and the number of parcels carried by the P. and O. Company to India on account of its agency, fell to 54,119, while 31,042 were sent out from the London Post Office, making a total of 85,161 parcels. During the year under report, 40,840 parcles were brought to India by the P. and O. Company on account of its own agency, and 47,047 on account of the London Post Office. It will be seen, therefore, that from the United Kingdom there is still a large traffic in heavy parcels, the greater number of which come from London tradesmen and co-operative societies. With regard to the parcels from India to the United Kingdom the case is different. In 1884-85 the total number sent was 29,729, all of which were carried by the P. and O. Company's special agency. In 1885-86 the total number rose to 34,499, of which 24,027, with a limit of 7lb weight, were for the London Post Office and 10,472 for the P. and O. agency. During the year under report the total number has risen to 39,495, but of this number no fewer than 37,580 were for the London Post Office, now that the limit of weight has been raised to 11lb, while 1,915 only were for the P. and O. agency. It will, therefore be seen that the parcels sent from India consists almost entirely of light parcels, and, it

may be added, are posted, as a rule, by private persons. This wholesale transfer of the parcel business from the P. and O. agency to the London Post Office mainly accounts for the decrease in parcel postage revenue, which in the year's returns accompanies a large increase in parcel traffic. The charge for parcels, whether exchanged with the P. and O. agency or the London Post Office, is the same, but the Indian Post Office receives ¾*d* less out of every shilling, or eight annas, in the case of the latter parcels, than in the case of former."

Year.	Number of Foreign Parcels.	Year.	Number of Foreign Parcels.
	No.		No.
1873-74	21,923	1880-81	80,257

24. Statistics exhibiting the yearly growth of the foreign parcel post traffic since this business was undertaken, in the year 1873-74, are given on the margin.

25. The following figures represent the disposal of the correspondence entered in the statement given on the margin of paragraph 19 of this report. These figures show that the proportion of articles delivered to the whole number sent out for delivery was 96·98 per cent.:—

	No.
Sent out for delivery (including 4,821,117 Money Orders)	259,570,861
Received back undelivered	7,847,240
Balance actually delivered	251,723,621
Sent to Dead Letter Offices	2,970,888
	254,694,509

26. *Dead Letter Office.*—Appendix IV, of which an abstract is given below, shows the number of articles received at, and disposed of by, the eleven Dead Letter Offices in India; 73·26 per cent. of the total number of articles received at these offices were disposed of either by redirection to their addressees or by return to their senders, leaving an undisposable balance of 26·74 per cent. The increasing use of post-cards tells against the work of Dead Letter Offices, inasmuch as the senders of this class of correspondence rarely insert their addresses, and often omit even their names in full, confining their signatures to initials. Below is given an interesting extract from the annual report by the Post Master General of Bombay:—

"Each Dead Letter Office has its own special difficulties to contend with, and it is found by experience that the proportion of letters disposed of to the total number received varies very considerably according to the languages in which they are written. Ninety per cent. of the English letters and 70 per cent. of the Marathi letters are disposed of, the reason being that the address of the sender is almost always given in English letters, and very commonly in Marathi letters. In the case of Gujarathi letters, however, the percentage of disposal is only 40 per cent. owing to the general absence of details as to the address of the sender, and in the case of letters in Portuguese or the bastard Portuguese written by the Goanese servants and others in this presidency, the percentage is only 25. These latter letters, of course, only enter to a small extent into the returns of the year, some 25,000 to 30,000 being received in the Dead Letter Office.

"During the year the Bombay Dead Letter Office had to deal with valuable securities and other property found in letters, which were opened in the course of its business, of the total value of ₹1,86,727-2-11. Of this amount cheques and hundies, generally contained in unregistered letters, accounted for a sum of ₹1,46,733-14-7, while the balance was made up as under:—

	₹	*a.*	*p.*
Bills of Exchange	36,617	13	9
Coins and other valuables	1,571	4	5
Currency notes	1,445	0	0
Transfer Receipts	270	0	0
Postage Stamps	89	2	2

"Property of the value of ₹1,75,160-7-11 was disposed of during the year, leaving a balance of ₹11,566-11 as undisposable, chiefly under the head of Hundies. In one instance a letter which was received from Bagdad without any address of any kind was found to contain twenty currency notes of the aggregate value of ₹505 and a hundi for ₹800. The contents were safely delivered to the person for whom they were intended—a Mahomedan merchant in Bombay. Year after year a large number of letters with blank faces appeal mutely to the Dead Letter Office to find for them a local habitation and a name. Not fewer than 300 such letters, on an average, reach the Bombay Dead Letter Office every month. Many book packets, chiefly received by foreign post, also reach the Dead Letter Office without addresses, but the absence of address in these cases is generally due not to neglect to write the address, but to neglect to fasten it properly on the packet. Further, by every P. and O. mail steamer are received a mass of newspapers without addresses, owing to the fact that the wrappers or covers have become detached in transit. These, as a rule, are the newspapers posted by private persons, as distinguished from agents and firms, with flimsy wrappers and insecure fastenings, from which they have parted company long before they reach the hands of the sorters between Suez and Bombay. Only lately a complaint of the loss of German newspapers led to the discovery that the same newspaper had for a succession of weeks regularly found its way into the Dead Letter Office owing to the inadequate way in which it was closed for posting in Austria. The same carelessness or obliviousness of what a transit in the mail bags for 5,500 miles by land and sea really means consigns hundreds of tokens of affection in the shape of Christmas and New-Year cards to a premature grave in the Bombay Dead Letter Office. Four years ago I introduced a system under which the Manager of the Dead Letter Office sends a regular form of enquiry to every person to whose address a detached wrapper or cover is received, asking for information as to what he expects, and in this way it has been found possible to mitigate, to some considerable extent, the results of this carelessness, specially in the case of newspapers. The public, as a rule, are tolerant of mistakes on the part of the Post Office, and disposed to give it ample credit for what it does; but if some of the lessons that are to be learnt in a Dead Letter Office could only be generally taken to heart, there would be much fewer complaints than now are made."

In Bengal the Post Master General reports as follows:—

"Cheques, currency notes, bills of exchange, transfer receipts, and other valuables to the amount of ₹51,428 were found in covers that had to be opened during the year in the Dead Letter Office, owing to incorrect or incomplete addresses, or no addresses at all being given by the senders; and all of the contents, except a few stamps and small coins to the total value of ten rupees, were satisfactorily disposed of by transmission to the addressees or by return to the senders. Among the articles that had to be opened in order to secure their delivery were bills of exchange for more than £2,200 sterling, cheques and hundies for more than ₹11,000, and currency notes for ₹2,680."

27. *Postage Stamps, &c.*—Appendices V and VI contain particulars relative to the sales of postage stamps, embossed envelopes and post-cards in each Circle; the results for the whole of India are given on the next page. These figures represent purchases made by Postmasters and other stamp-vendors for retail to the public. The sales of ordinary ½-anna post-cards show an increase of nearly 8 millions, 3¾ millions of which belong to the Bombay Circle and 1¼ million to the Bengal Circle, while the number of inland reply post-cards disposed of exhibits a fall of more than a million, the cause of which has already been explained. The number of ordinary ½-anna envelopes sold was 55,520,019, being a rise of 1,627,559; if to this be added the sales of the new ½-anna square envelopes, the increase is more than 2 millions. A fall of about 20,000 has taken place in the number of ordinary 1-anna envelopes disposed of; but this fall is more than counterbalanced by the sale of 108,716 of the new square envelopes of the same value. Notwithstanding the competition of the new 4½-anna labels, of which 419,354 were sold, the sales of the envelope embossed with this duty were about 30,000 in excess of the previous year. Increases occur under the heads of ½-anna, 9-pie, 6-anna, 8-anna, and 1-rupee labels, while the sales have diminished under the heads of 1 anna, 1½ anna, 2 annas, and 4 annas. The net result is an increase of nearly 3¾ lakhs of rupees in the gross value of the ordinary postage stamps sold of all denominations.

28. With effect from the 1st May a small-sized registration envelope, square envelopes of two kinds, embossed, respectively, with a ½-anna and a 1 anna stamp, and a 4½-anna adhesive stamp for foreign letters, were offered for sale to the public: and in November a large-sized registration envelope was also introduced. Besides the face value, a small charge is levied in the case of these envelopes to cover the cost of material and manufacture. It is as yet too early to draw conclusions as to the popularity of this new stationery: but the sales of the year shew that they have hitherto found most favour in Madras. From September the Post Office as a department undertook the sale of 1 anna revenue or receipt stamps and very nearly a million of these stamps were bought from Government during the year by Postmasters for retail to the public. The largest purchases made were in Bengal (285,095), in Madras (157,277), and in Bombay (119,624). From October Postmasters in Lower Burma were allowed also to sell general stamps, not exceeding ₹5 each in value, and the total value of these stamps purchased by Postmasters from the Government Treasuries amounted to ₹3,208. The special rules relating to the custody, supply and sale of postage stamps were amalgamated in a general set of rules applicable to stamps of all kinds and to stamped papers actually in use.

29. Below is added a table denoting the proportions of revenue yielded in money and in stamps:—

Proportion of Revenue derived from Postage Stamps and from Cash.

* A difference of R117 occurs between the gross value shewn in this statement and that exhibited in Appendix V. R98 of this difference is accounted for by the application of wholesale rates of sale in this statement, while the retail rates, at which the sales were in some cases effected, appear in Appendix V. The balance of the difference or R19 is due to a deficiency in the Minbu Treasury, which subsequently was adjusted in cash.

† The difference of one rupee between the figures in this statement and those given in Appendix VI is due to a short credit in the Pyinmana Treasury.

Section IV.—District Post.

30. The District Post provides postal communication in parts of the interior of British India to which the organisation of the Imperial Post has not yet been extended. Its control is vested in the local Postal authorities, subject to the orders of the local Governments: and its funds consist partly of local cesses and partly of grants from Imperial or from Provincial revenues. On the next page a detailed statement will be found comparing the operations of the District Post during the last two years. As explained in previous reports, the assets and charges shown in this statement do not correspond with those exhibited in the Finance and Revenue Accounts. While the road mileage has diminished the numbers of offices, letter-boxes, and postmen have all increased; the total sum yielded by local cesses rose by ₹33,467, while the grants from Imperial and Provincial revenue fell by ₹7,471, and the total amount spent on the District Post was ₹10,23,980, or an increase of ₹28,115. More than 15 millions of articles were received for delivery or posted for despatch—a great advance on the results of the previous year—while the percentage of articles returned as undeliverable fell from 5 per cent. to 4·81 per cent. In Lower Burma the development of the District Post was held in abeyance owing to the greater need for postal extension in the upper portion of that Province. As respects Coorg the Post Master General reports as follows:—

"The whole of the arrangements in this district were entirely recast during the year under review, some useless lines being closed and others opened in their place, while at the same time several offices were transferred to more favourable sites. There is reason to think that the great increase in the correspondence carried by the District Post in that district is due to the changes that were then made. There has been an increase of over 30 per cent. both in the number of articles collected for despatch and in the number received for delivery."

There is no part of India where the need for postal extension in the interior is more pressing than in the Presidency of Madras. On this subject the Post Master-General writes in the following terms:—

"For the last 15 years the District Post in this Circle has not been regarded as merely the means of keeping open communication for official purpose over lines which the Imperial Post could not afford to maintain, but rather as the pioneer of the Imperial Post. It extended the operations of the Post Office in the interest of the public generally beyond the limits within which the Imperial Department was bound by its rules to work. Its operations were thus experimental; and, after correspondence had developed and any particular experiment had become remunerative, a transfer to the Imperial Department was effected. In course of time, however, the Taluqwar system was introduced, whereby District Post establishments were arranged in groups; and the group was transferred, when, as a whole, its income satisfied the conditions prescribed by rule; but latterly the proposals for the transfer of these groups were rejected on financial grounds. Hence the process of absorption was checked, and the Imperial Department and the District Post Department have been growing each independently of the other; and an actual cleavage has been formed between the two. Immediate measures will be taken to remedy this; the details of the District Post establishment are being carefully scrutinised, and proposals will be made for the transfer of all establishments that are remunerative. Funds will thus be set free, and the District Post will then again be able to extend its operations to the great advantage of the public and ultimately of the Imperial Department."

(a) Includes contributions from Tributary Mehals, Chota Nagpur, Orissa, and Khond in 1886-87.
(b) Includes the amount of annual subsidy for the Dera Ismail Khan and Chichawatni hill cart line.
(c) These are dry season distances; during the rains these lines are increased in length.
(d) Includes contributions from Frontier Police Fund, ₹4,320 in 1885-86, and ₹3,936 in 1886-87, and contributions by the Maharajah of Agartala, ₹240 in 1885-86 and ₹288 in 1886-87.
(e) Includes lines paid from the revenues of Feudatory States, of 589 miles in length in 1885-86, and 642 miles in length in 1886-87.
(f) Grant made available from Bombay District Post Funds.

Section V.—Money Orders.

31. During the year the Revenue Money-order system, to which allusion has been made in the last two annual reports, was extended to the whole of the North-Western Provinces and Oudh, with the exception of the Kumaon Division. Meetings of Revenue officers were held in 25 districts, with the object of attracting interest in the scheme and anticipating future practical difficulties: cards were distributed showing the correct amount of revenue payable by each individual, and a great deal of pains taken to ensure success. This trouble was rewarded by the issue of 57,888 revenue money orders, aggregating in value ₹10,87,093, and yielding ₹15,284 as commission. Each order averaged in value ₹18-12-5. It is satisfactory to add that one case of misappropriation only occurred connected with this business, a sum of ₹63 having been devoted to his own use by a Branch Postmaster. In Bengal, too, great progress was made in the same direction. Below is given an interesting account by the Post Master General regarding the origin of the system and its recent extension to the whole of the Lower Provinces of Bengal:—

"Before the introduction of a special system for the remittance of land revenue by money order a certain number of small zemindars used occasionally to avail themselves of the money-order system and send their instalments of revenue to the Collector by money order. These remittances were not, however, legal tenders of revenue any more than remittances of rent by money order are legal tenders of rent, and it was always in the power and discretion of the Collector to refuse such remittances. As a matter of fact, they were frequently refused on the ground that the particulars required by the Land Revenue Department were not given by the remitters, or that the form in which they were given was inconvenient. For this reason, and possibly also because the exemption of small zemindars from personal attendance at the Collectorate was distasteful to and discouraged by the Collectorate Amlahs, the practice of remitting land revenue by the ordinary money order was very rarely resorted to. Representations were, however, from time to time made to both Government and the Postal Department that a recognized and authorized system for the remittance by money order of land revenue and the cesses ordinarily paid at the same time as land revenue would be warmly welcomed by the smaller revenue-payers who have no agents at the sudder station, and to whom the obligation of personal attendance at the Collectorate in order to pay each revenue kist was a grievous and repeated burden. The Lieutenant-Governor, therefore, sanctioned, as an experiment from the 1st October last, a system under which zemindars, whose annual revenue did not exceed 50 rupees, might remit their land revenue, road cess, and public works cess to the Collector by a special form of money order, in which provision was made for the entry in a special coupon or chalan of all particulars required by the different receiving offices. The system was so devised as to give the Land Revenue Department an opportunity of examining each money order and chalan before accepting the remittance, and any money order that is refused is at once returned to the remitter by the Post Office. The receipts for accepted remittances are returned to the remitters under a special system of registration, so that each zemindar who pays his revenue by money order receives, in the first instance, a receipt from the Post Office of issue and afterwards a formal receipt with the full particulars signed by the responsible Collectorate officers. The system was introduced as an experiment in only the ten districts of the Burdwan and Dacca Divisions, and the following statement shows the extent to which it was availed of in those districts during the six months in which it was in force in the year under report:—

Name of District.	Number of Revenue money orders issued.	Value of Revenue Money-orders issued.	Commission realized.	Revenue Money Orders received during the half year.		Revenue Money Orders paid by Treasury Vouchers during the half-year.		Finally treated as refused and returned to Offices of issue for repayment to Remitters.

* The District of Howrah is in the Revenue jurisdiction of the Collector of Hughli, so that remittances of revenue in Howrah are paid at Hughli.

† The excess of Revenue money orders received above the number issued is accounted for by remittances from Zamindars holding land in the district to which the system applied, but resident in other districts.

"It will be seen that the average value of each revenue money order was only slightly above ₹5, so that it would appear that the system was mainly, if not solely, availed of by those for whom it was designed, namely, very small revenue-payees who have ordinarily no occasion to visit the sudder station, and to whom the burden of a journey to and from the Collectorate to pay each instalment of revenue must have been almost greater than the payment itself. As the system worked with complete success in the districts in which it was experimentally introduced, His Honour the Lieutenant-Governor was pleased to authorize its extension to the whole of the Lower Provinces from the 1st May of the current year. The Local Government has also now under consideration the question whether special arrangements should be made to enable the public to use the money-order system more freely for the purpose of remitting income tax and other payments in favour of Government and district boards. Even without any special instructions having been issued on the subject, the money-order system has been largely made use of by the public for remitting income tax."

32. A further effort to render the postal money-order system still more useful to the poorer people of this country, was made in the North-Western Provinces and Oudh through the provision of a special form of order by which small sums due on account of rent can be remitted by tenants to land-owners. Headings are provided in this form for entries shewing the name of the village and estate and of the kist or particular period to which the payment relates. The object of entering this detailed information is to ensure that the payment for one kist shall be devoted to that particular kist and not applied, as is too often the case, to an arrear instalment of rent, the recovery of which has become barred by limitation. A means is thus provided under which, by resort to the Post office, tenants can rely on getting a valid receipt for sums paid as rent, which, in the event of litigation, must serve them in good stead. Both the revenue and rent money-order systems have a special value, the importance of which can hardly be overrated, as both tend to protect the people of the country from illegal exactions on the part of dishonest tax-collectors. In the one case the land-owner is saved from improper demands made by the subordinate revenue officials; in the other case, the tenant is protected from injustice arising out of illegal action taken by the landlord himself or by his employés. The rent money-order system was introduced only in March last, and during that month 1,213 rent money orders were issued, the gross value of which amounted to ₹12,358.

33. The plan of paying money orders at the doors of the payees, to which allusion was made in the last two annual reports, has continued to work satisfactorily, and to gain popularity especially with the Native public. This system now prevails at every Imperial Post Office, and is applicable to all orders paid within the ordinary beat of such offices. Experiments have also successfully been made towards the extension of this facility to small places in the interior of districts served by Village postmen. Throughout the Lower Provinces of Bengal and in Assam, every Village Postman is, subject to certain fixed limits, entrusted with the payment of money orders within British territory; but the extension of this convenience to villages situated in Native territory has as yet been held in abeyance. Not only does this measure adapt itself to native habits by avoiding the need for the personal attendance of women at the Post Office, but it tends also to lessen the accumulation of cash at Post Offices and accelerates both the payment of the order and the closure of the account. As the great majority of remittances to places in the interior of districts are for small sums not exceeding ₹10 in amount, the risk of loss to the Department by entrusting such payments to Village Postmen is not great. It is to Germany that India is indebted for this plan of paying money orders at the payee's residence: but the system is one which has not yet been adopted either in the United Kingdom or in most of the principal countries in the West.

34. One great difficulty with which the Post Office has to contend consists in the disposal of surplus balances which accumulate at Imperial Offices in certain Native States situated at a distance from Government treasuries. This difficulty is specially felt in Central India and in Southern Rajputana, where the

cash received is usually much in excess of the funds required to meet local demands. No safe means exist for sending this money to a Government treasury, while risks of loss attend both its retention in the local Post Office and its transmission with the mails to a place of security. During the year a convenient arrangement was concluded under which the Post Office hands the surplus cash accumulations of the Oodeypur Head Office and its subordinate Offices to the local Durbar, which takes it in payment of certain amounts yearly due to them by the Government of India. By this means the Post Office is able annually to pay away on the spot a sum of more than two lakhs of rupees, and, so far as the Meywar State is concerned, the trouble referred to has been overcome. Special arrangements have also been made in other cases; but the difficulty still continues a serious one, and now that money-order operations are so largely on the increase, the matter must receive closer attention.

35. An addition of 379 new money-order offices has been made, thus raising to 7,214 the total number of Imperial money-order offices which existed on the 31st March last.

36. On the margin is given a statement showing the yearly progress in this business since it was taken over by the Post Office in 1880. The result is very satisfactory, as the number of orders has increased by 15·81 per cent., their value by 13·88 per cent., and the commission by 14·95 per cent. Nearly 5 millions of these orders were issued during the year of an aggregate value exceeding 10½ crores of rupees, and the commission realised was about 13½ lakhs of rupees. Each money order averaged R22-2-7 in value; this average is yearly on the decline, as the marginal figures will show, thus proving that the Post Office deals more and more with remittances of trifling amounts. About 27½ per cent. of these orders were for sums not exceeding R5 in value: more than 57 per cent. were for amounts of R10 and under: nearly 82 per cent. were for remittances not above R25, while the sums not exceeding R50 each were more than 91 per cent. of the entire transactions. From a set of statistics, taken specially for one month, it was found that 90·96 per cent. of the money orders for amounts not exceeding R25 were sent by Natives and 9·04 by Europeans: and that, as respects orders above R25, the Native proportion fell to 83·29 per cent. Of the total transactions during the month selected, the percentage of orders issued by Natives and Europeans were respectively 89·83 and 10·17.

Faridkot	131	2,817	23	477
Total	32,496	9,66,209	23,263	7,41,566

Note.—These figures are included in the general statement of Inland Money Order.

38. A table is given on the margin showing the business transacted with the Native States and the Portuguese Settlements in India. New exchanges were introduced with the Native States of Chamba and Faridkot from the 1st January 1887. Although the exchange with Gwalior began to work only in July 1885, its money-order operations are already considerable. Compared with the previous year the transactions with Patiala have increased 20·40 per cent., those with the Portuguese Settlements, 18·77 per cent., and those with Mysore, 12·96 per cent.

39. Towards the close of the year the telegraphic Money Order Rules were simplified, and the rates charged to the public considerably reduced. It was found that the original charge of two rupees for the telegram of advice, coupled with an extra rate of 50 per cent. for postal commission, tended appreciably to restrict the growth of this business. So from January 1887 the Post Office relinquished altogether its commission on orders for sums not exceeding R10 in amount, the cost to the public on such transactions being limited to the telegraph charge of one rupee, and on orders above R10, only the usual rate of commission was taken, besides a telegraph charge of one rupee. By resort to a Code, the length of the telegraphic advice was considerably curtailed, and the privilege of adding a private message to this advice was withdrawn. Comparing the business done during the last quarter of the year under the new rates with the transactions

of the previous nine months under the old rates, it is found that the monthly average of orders issued has increased in number from 1,267 to 2,379, and in amount from ₹84,208 to ₹2,16,603, while the postal commission has risen from ₹1,428 to ₹2,223 per month. In other words, the number of orders have almost doubled, their value has nearly trebled, and the commission realised has improved by 55·67 per cent. In the following statement the transactions for each Circle during the year are represented. Adding issues and payments together, Bengal heads the list as respects the gross value of business done; but the heaviest issues occurred in Burma, while the payments in Madras nearly equalled those of Bengal:—

Telegraphic Money-Order Transactions.

Note.—These figures are included in the general statement of Inland Money Orders.

40. Eleven cases of fraud by false personation in connection with telegraphic money orders occurred during the year, of which seven related to the Bombay Circle. The following extract concerning these cases is taken from the report of the Post Master General of that Circle:—

"The experience of the year has again shown how readily the telegraphic money-order system can be used in this country for purposes of swindling. The common practice of travelling, especially to make pilgrimages, among the well-to-do classes, the readiness with which travellers confide particulars regarding their life and intentions to chance acquaintances, and the credulity with which new-comers at a place are accepted as being what they give themselves out, are favourable conditions for the commission of this kind of fraud, of which clever swindlers have not been slow to avail themselves. Three cases occurred in the Circle during the year, in which sums of money, amounting in all to ₹162, were paid to persons who had sent telegrams in false names asking for remittances, while there were four cases in which the friends of travellers, who had gone on pilgrimage to Upper India, sent sums of money, amounting in all to ₹875, from places in this Circle in reply to telegrams from false personators in other parts of India. Of the three cases in this Circle, one occurred at Ahmedabad and two on the Great Indian Peninsula line of Railway. In the first case a Banya of Hyderabad in Sind arrived at Ahmedabad under the assumed name of Sobharam Shamdas, a travelling cloth-merchant also belonging to Hyderabad, and was known under this name for some days before he sent a telegram to Sobharam's brother at Hyderabad, asking for ₹50. When the telegraphic money order was received, the false personator was identified as Sobharam without any hesitation by a resident Halwai of Ahmedabad, and was given payment of the amount. The real Sobharam was in Ahmedabad at the time, and the false personator was discovered almost

at once, and the case put in the hands of the police. The swindler was arrested before he had left the place, and at first maintained that he was the *simon pure*. He was sentenced to a year's rigorous imprisonment and a fine of ₹100 by the District Court of Ahmedabad. The two frauds at places on the Great Indian Peninsula Railway were believed to be the work of the same man. The first was committed at Manmad in June 1886. The false personator arrived there at the beginning of the month under the adopted name of Phadali. He obtained lodgings at the shop of a Halwai, known as Gungaram Hemraj, and succeeded in borrowing from the shopman a sum of ₹5. His story was that he had been robbed while travelling in the train, and that he was expecting a remittance from Jubbulpore. After some days he telegraphed to Girdhur Lal Halwai, who is the brother of the real Phadali at Jubbulpore, asking for a remittance of ₹20, and was actually allowed to leave Manmad before the telegraphic money order came, because he had asked it to be sent to the care of Gangaram Hemraj. A money oder for ₹12 arrived on the 18th June addressed to Phadali, in the care of Gangaram Hemraj, but as the supposed payee had left Manmad, the Postmaster refused to pay it without a written authority from Phadali. The swindler was, therefore, referred to at an address at Wadi, which he had left with Gangaram Hemraj, and the result was a telegram to the Postmaster in the name of Phadali, authorizing him to pay the ₹12 to Gangaram Hemraj, on which the Postmaster acted. Gangaram Hemraj kept ₹7 in payment of what was due to them, and sent the balance by money order to Phadali at the address at Wadi. Subsequently the remitter Girdhar Lal heard from the real Phadali that the money had never been asked for, or received, and this led to the discovery of the fraud. The swindler could not be traced, but Gangaram Hemraj, who was well known at Manmad and had acted with perfect good faith throughout, at once paid back the amount of the money order. As, however, the Postmaster had failed to exercise proper care in making the payment on a telegram which was no authority, after the very strict instructions that had been issued as to the necessity of the utmost caution in paying telegraphic money orders at places on the railway, he was required to make good the amount. The same swindler, as was subsequently discovered, shortly after leaving Manmad, successfully carried out another fraud. At the Wadi railway station, he appears to have met, about the 18th June, two travellers who had alighted there on their way from Calcutta to Hyderabad. He ingratiated himself with these men, who were well-to-do Banyas, and at the beginning of July travelled back with them from Wadi as far as Dhond. While in their company he was able to find out all about them and learnt the name and address in Calcutta of the father of the younger of the travellers, whose name was Chunilal. As soon as they had left Dhond, the swindler on the 2nd July telegraphed to the father asking for ₹100, on the ground that the travellers had been forced to break their journey at Dhond for want of funds. The money was sent by a telegraphic money order on the 4th July, and in the meanwhile the swindler had been staying at Dhond in the travellers' rest-house or dharmsala under the assumed name of Chunilal. When enquiries were made he was identified as Chunilal by a Halwai of the place, and as he could give full accounts of the person from whom the money had come he was paid the ₹100. The travellers reached Calcutta on the 7th July, and the fraud was then discovered, but the swindler had made good his escape. It will be noticed that in all these cases the sweetmeat-seller or halwai played a prominent part, the reason being that he is the ready-made refreshment seller to whom Hindu travellers on alighting from a long journey have immediate recourse for food."

41. No new direct exchanges were established during the year with India, but an arrangement was concluded under which money orders can be sent from the Straits Settlements to France and Mauritius through the medium of the Post Office at Bombay. Money-order exchanges with places outside India are divided into two classes, *viz.*, those with European countries, Australasia and North Borneo, in which remittances are made in sterling, and those with certain places in the East, in which remittances are made in rupees. A list of exchanges under the sterling system is given below, together with a summary of the business done with each country. It exhibits a fall of 18·34 per cent. in the value of orders issued from India, and a rise of 40·17 per cent. in the amount of orders paid in this country. By far the most important of these exchanges is that with the United Kingdom, the transactions of which are more than four times larger than those which relate to all the other exchanges put together: and the decline in the number and value of orders issued by India for payment in the United Kingdom is doubtless due to the low rate of exchange, which

averaged 1*s.* 5*d.* as compared with 1*s.* 6¼*d.* in the preceding year. The fall in the issues on New South Wales is attributed by the Presidency Post Master to "the exposure in the Indian newspapers of a Race Lottery organised in Sydney, which was shown to have been a swindle."

Note.—The figures relating to the United Kingdom include transactions with the following countries and places:—United States of America, Canada, Newfoundland, Bermudas, Falkland Island, British Colonies and Possessions in Africa and West Indies, Cyprus and North Borneo. The figures relating to North Borneo represent the transactions since the new exchange was opened with it on 1st October 1885.

The direct exchange with the Netherlands was abolished from January 1886, and the through exchange system extended to that country.

42. Turning now to the class of rupee money orders, the following table shows a decrease of 21·82 per cent. in the issues and an increase of 4·20 per cent. in the payments. If the exceptional transactions of the Field Post Office money-order operations in Egypt during 1885-86 be deducted, the percentages of increase in the value of payments would be raised to 19·80 per cent. With the exception of Mauritius all the exchanges exhibit improvement, and the remittances from China and Japan are progressing favourably. The commission charged on these orders averaged ₹1-1-1 per cent. An extract is added from a report by the Presidency Post Master of Bombay relative to the use made of the Post Office by natives of India in remitting money to their homes from places abroad :—

"It will probably be interesting to note that natives of India are either temporarily or permanently settled in almost every quarter of the globe; as remittances from them are constantly being received from Australia, the United Kingdom, the Cape Colonies, Egypt, Mauritius, China, Sandakan, and the Straits Settlements, and as an instance affording some idea of the success attending their enterprise, it may be mentioned that two of them, Punjabi Mussalmen, recently returned from Australia, where they had been practising as

eye and pile doctors. The former drew from the Bombay Post Office a sum of about ₹6,000, and the latter had also obtained money orders for almost the same amount payable from a station in the Punjab."

45. As stated in the last annual report, India Postal Notes have never commanded any real success, and, as the small extent of this business began to decline during 1885-86, the sale of these notes by the Post Office was discontinued from November 1886. The yearly sales since the notes were introduced in 1882 will be found on the margin. The Post Master General, Madras, reports that "an opinion seems to prevail in the Madras General Post Office that since the sales of these postal notes were discontinued, there have been fewer losses."

46. From the 1st October 1884 the Indian Post Office undertook to sell British postal orders, realising the usual poundage fee charged by the British Post Office, besides commission, on behalf of this Department. An abstract of the sales effected during the two complete years that this business has been conducted, is given on the margin. There has been a fall of 1,850 in the total number of these orders sold, a diminution in their gross value from £11,309 to £9,601, and a decrease in the total Indian commission from R838 to R453. Doubtless the high rate of exchange which prevailed during the year under report operated towards causing this decline; but, notwithstanding special efforts to encourage the sale of these notes, it is now clear that this form of remittance has not yet gained popularity; and, if better results are not soon obtained, the question of discontinuing the business will have to be considered. Of the fourteen denominations of these postal orders, the most popular are the 20-*s.* orders, 7,408 of which are sold; next in demand come the 10-*s.*, the 5-*s.*, and the 1-*s.* orders, the numbers sold of which were respectively 2,217, 1,260, and 581. As in the previous year the largest sales occurred in the Punjab, where 3,371 orders were disposed of, their gross value being £2,535; next in order comes Bombay with 2,000 orders worth £1,331, and then Madras with 1,992 orders, aggregating £1,317 in amount.

Section VI—Savings Bank.

47. As explained in the last Annual Report, all the District Savings Banks worked by the agency of the Treasury Department were closed with effect from the 1st April 1886, their business being transferred to the Post Office Savings Banks. From the 1st June 1886 the Department also undertook the duties previously discharged by the Savings Banks at District Treasuries managed by the Banks of Madras and Bombay. But the local Savings Banks at Calcutta, Madras, and Bombay still remain under the control of the Presidency Banks at those three places. An enormous amount of additional work and responsibility has thus been undertaken at little cost to the State, except as regards the central office of accounts, the extra expense consisting for the most part in the appointment of a few new clerks in special cases. But the amalgamation of District with Post Office Savings Banks has not generally been accompanied by any increase to the pay of the Postmasters on whom the ultimate responsibility devolves.

48. On the next page is given a statement marked A, which compares the transactions of 1886-87 with those of the previous year. Four Head Banks were closed and 219 additional Sub-Banks opened, the total number of both classes having thus been raised from 5,833 to 6,048. The year opened with a balance of 155,009 accounts, which was increased by the addition of 128,867 new accounts, and diminished by the closure of 64,866 old accounts, the net balance at the end of the year being raised to 219,010. Under the head of Deposits there is an aggregate sum of 444⅘ lacs compared with 243 lacs during the preceding year, the interest rose from 6⅘ lacs to 14⅐ lacs, while the withdrawals amounted to 258⅘ against 158¾ lacs: and the balance at credit of the depositors stood at 425⅕ lacs, which represents an increase of 88·59 per cent. This increase of nearly two crores of rupees in the deposit balance is mainly due of course to transfers of District Savings Bank accounts to the Post Office, as 31,699 accounts were thus transferred, representing a gross sum of R1,24,13,792: and the rest of the increase or R75,59,662 may be reckoned as actual expansion in Post Office Savings Bank business. Bombay shows both the greatest number of accounts open (48,778) and the largest deposit balance (138⅕ lacs), while the average balance at the credit of each depositor is highest in Sind (R310·91) and lowest in Bengal (R132·66).

50. Statement C. given below classifies the depositors according to their professions. By far the best customers of the Government Savings Banks are those belonging to the professional class with fixed incomes, which number 81,888 out of a total of 219,010. Next come the domestic class, of which there are 23,237, and then the professional class with variable incomes represented by a total of 17,385. Of all specific classes the worst represented is the agricultural, of whom there are only 2,427.

C

Statement showing the number of Depositors in each Postal Circle classified according to professions during 1886-87.

51. Prior to April 1886 any person, whether a Savings Bank depositor or not, could use the Post Office as an agency for the purchase and sale of Government securities. But from the beginning of the year under review this privilege was withdrawn from the public at large and restricted to *bonâ fide* depositors. From the same date a limit of ₹1,000 in the year or ₹3,000 in all was fixed to the gross value of Government securities which a depositor is allowed to tender at the Post Office for safe custody by the Comptroller General. Investments, aggregating a total sum of ₹4,40,600, were made through the Post Office during the year against ₹3,59,400 in 1885-86: and the balance of investments remaining with the Comptroller General at the close of the year under report rose from ₹2,82,300 to ₹3,78,800. Out of a total of 556 purchases and 28 sales of Government paper, or 584 transactions in all, no less than 525 related to sums not exceeding ₹1,000 in value: there were 41 transactions above ₹1,000 but not exceeding ₹2,000, and 18 for amounts between ₹2,000 and ₹7,100.

Section VII.—Insurance and Value-Payable system.

52. On the margin a table is given showing the yearly value of articles insured since the beginning of the insurance system. Under the head of Letters the figures are higher than those of any year since the measure was introduced, while the value of parcels, though exhibiting an increase of 10·25 per cent., is lower even than that of 1879-80, the second complete year of the existence of this scheme. Taking the combined value of letters and parcels it will be

Year.	Value Insured. Letters.	Value Insured. Parcels.	Value Insured. Total.	Insurance fees.
	₹	₹	₹	₹
1877-78, last quarter being the commencement of the system	6,66,320	18,60,191	25,26,511	13,230
1878-79	89,71,775	2,81,21,219	3,70,92,994	1,23,556
1879-80	1,63,35,058	5,34,34,161	6,97,69,219	1,97,790

1886-87	2,35,74,205	5,26,06,770	7,61,80,975	1,80,274
Percentage of increase as compared with 1885-86	6·29	10·52	9·18	6·08

Note.—The average value of insurance effected on each article was ₹315¼ in the case of letters and ₹354¼ in the case of parcels.

seen that the business grew yearly until 1882-83, when it declined, the year under report being the first year since that date in which the total again shows an increase. As explained in the last two Annual Reports, the stoppage of insurance to and from offices in the Persian Gulf and Turkish Arabia has materially diminished insurance business in this country, besides this the continually growing popularity of the money order and value-payable systems must compete appreciably with the transmission of valuables by post. As an explanation of the increase in the year under report the Postmaster General of Madras reports that "emigrants of the labouring class now go over to Burma in larger numbers from the Telugu country, and those whose homes are not situated in a Post Town find it more convenient to make small remittances of cash to their families by this means than by money orders, as the insured parcel is delivered at the house of the addressee, while village postmen as a rule are not authorized to pay money orders." Again, he adds, that "the practice which has been adopted by certain Gold Mining Companies of sending their gold to the Madras Agents by this means will probably account for the greater portion of this very large increase in value." Bombay shows the highest value, ₹2,08,45,590, in the total of articles insured, Madras comes next with an aggregate of ₹1,54,60,353, and then Bengal with a total of ₹1,33,36,446. A special set of statistics were got for one month from 24 selected offices, with the object of ascertaining the particular descriptions of articles which usually are sent under the insurance system, together with the relative value of each description: and the results obtained gave the following proportions of value to the total declared value of articles insured during the month at the offices chosen:—gold nearly 38 per cent., currency notes slightly in excess of 36 per cent., precious stones rather more than 14 per cent., silver about 9½ per cent.

53. Out of a total of 43 claims made in connection with insured articles, the liability of the department was accepted in 27 instances, and in 22 out of these 27 cases the loss occurred through fraud or neglect on the part of postal employés: in three instances the Post Office was broken into and the articles stolen by outside robbers: on one occasion strong suspicion attached itself against the proprietor of the house in which the Post Office was located, and one parcel was lost by a Railway Company, to which it had been entrusted for conveyance. A summary of the value of the losses under the usual heads is given on the margin. The sum paid as compensation amounted in all to ₹16 750 or 9·29 per cent. of the total amount realized as insurance fees, *viz.*, ₹1,80,274.

Losses under the Insurance system.	1885-86. ₹ a. p.	1886-87. ₹ a. p.
Losses by accident or by departmental neglect or fraud	11,882 9 0	20,608 0 0

	6,483 0 6	16,860 6 9
Claims not preferred or not entertained	...	110 0 0
	6,483 0 6	16,750 6 9

54. When the value-payable system began in December 1877, its application was restricted at the outset to parcels posted at disbursing offices. In 1879 its operation was extended to registered book packets, and a year later the area of posting was greatly enlarged so as to include all money order offices. Registered letters were added to the business in October 1882: while a further extension occurred in 1885, under which the system was rendered applicable to unregistered book packets, both paid and unpaid. And in April

1886 privileged publications were allowed to travel as value-payable unregistered packets. The usual statistics are given on the margin, which shew very marked growth, the increases being 36·73 per cent. in the number of articles sent, 29·68 per cent. or nearly 13½ lacs of rupees in the value declared, and 37·08 per cent. in the commission. Out of a gross total of 596,296 articles no less than 296,269 were posted in Calcutta, and out of an aggregate of 58¾ lacs of rupees recovered from the addressees of these articles more than 29½ lacs were paid to tradesmen in Calcutta. A description was given in the last Annual Report of efforts made to popularise the plan of transmitting railway receipt notes as value-payable articles. During the year under report a change was effected, under which the sender addresses the goods to himself, endorses the railway receipt to the individual for whom the consignment is intended, and then makes over the receipt to the Post Office for transmission to destination under the value-payable system. The object of this change was to free the Railway Company from the risk of incurring pecuniary responsibility by inadvertently delivering the goods in anticipation of the production of the receipt. Now that the packages are directed not to the real recipient but to the sender, this risk is reduced to a minimum and the sender can rely on his money being realised by the Post Office before the goods are parted with by the Railway Company. Marked success followed this alteration, the number of value-payable railway receipts having risen from 351 in Otober 18866 (the month prior to the introduction of the new method) to 1,048 in March 1887, and the amount specified for recovery from ₹9,124 to ₹27,594. As yet the conveyance by post of value-payable railway receipts is almost wholly confined to the East Indian Railway, and, though there is little present hope of any considerable development on other lines of railway, this business will probably prove eventually an important addition to postal duties and responsibilities.

Value-payable system year.	Number of articles sent under the value-payable system.	Value declared for realisation.	Commission.
		₹	₹
1877-78 (from the commencement of the system in December 1877,) 4 months .	413	6,721	195
1878-79	7,408	1,32,109	3,942
1879-80	25,589	3,49,857	11,498

1884-85	338,930	34,35,045	65,571
1885-86	436,115	45,32,803	85,530
1886-87 .	**596,296**	**58,78,016**	**1,17,247**

55. A comparison between the posting of the different classes of value-payable articles is given on the margin. One noticeable feature in these figures is the low average value of each article sent as an unregistered packet: while registration is usually resorted to for the more expensive classes of books, cheap publications, and pamphlets are generally sent as unregistered articles. The Postmaster General of Bombay reports that "there were 635 book packets posted at Bijapur, mainly consisting, as I ascertained when I inspected the office in February last, of the issue in parts of a Marathi novel written by a Native official, and I quote the fact to show how the value-payable system may help an author to command an audience."

Section VIII.—Miscellaneous.

56. A statement representing the position of the Post Office Security Fund is given below. As explained in the last Annual Report, all disbursements under this head are debited against the old fund, the balance of which is thus gradually disappearing: during the year the charges against that fund amounted to ₹33,164, which reduced the balance at credit from ₹1,59,324, at the close of 1885-86, to ₹1,26,160 on the 31st March last. The closing balance of the new fund has risen from ₹1,06,304 to ₹1,58,565:—

57. *Complaints by the Public.*—The number of complaints made by the public, which came to the knowledge of the heads of postal circles, was 8,476 against 7,684 in the previous year. Bengal is principally responsible for this increase, to which the Postmaster General refers in the following terms:—

"Considerably more than half the increase of 881 in the total number of complaints is accounted for by the great increase in the business of the various miscellaneous departments of the Post Office. Slight and even unavoidable delay in the delivery of a valuable article or money order is generally sufficient to produce a complaint, and as the Money Order, Savings Bank, and Value-Payable systems expand an increase of complaints must be expected. An increase of complaints regarding ordinary articles is also much to be desired, for it is upon the probability of complaint in cases of failure that every postal administration mainly depends. In countries and cities commercially advanced it is impos-

sible for a delivery to be delayed or a single clearance of a letter-box to be neglected without sufficient complaints being received to enable the administration to localize the fault and detect the offender. Of the most advanced provinces of India, and even of Calcutta itself, it will, I fear, be a long time before this can be said. Instances were given in your last report which showed the extraordinary ignorance of postal matters prevalent among the village population, and illustrated the still not uncommon belief that the letter-box itself is but a portion of a supernatural agency. This belief is, no doubt, confined to the most ignorant classes of backward districts, but it is no exaggeration to say that the postal system of India is so strange to the general population and so far in advance of their expectations that delays and failures which would not be tolerated in England or Germany do not in India call forth a single complaint. The comparative backwardness of the country, the apathy of its people, the result of satisfaction, and the enervating effect of the climate on foreign residents, all combine to deprive the administration of the aid derived in other countries from the numerous complaints that follow every omission or neglect. In this circle, while about seventy-five millions of ordinary articles were posted and delivered during the past year, only 1,089 complaints were made regarding the loss, delay, or overcharge of such articles."

58. An analysis of those cases which relate to the loss of articles transmitted under a system of registration is appended: the number of these cases has risen from 336 to 396:—

	1886-87.			Total.	
	Registered letters and ordinary parcels.	Insured letters and Insured parcels.	Value-payable parcel and Value-payable registered articles.	1885-86.	1886-87.
I.—Cases in which inquiry shewed either that no loss occurred or that the loss had not occurred through the fault of postal officials	156	29	16	173	201
II.—Cases in which the postal establishment was proved to be in fault or in which there was strong ground for believing it to be so	72	22	20	81	114
III.—Cases in which no definite conclusion was arrived at	61	9	11	82	81
Total	289	60	47	336	396

59. Commenting on a case in which a Branch Postmaster was criminally prosecuted and punished for abstracting a currency note of the value of ₹100 from a registered letter, the Postmaster General of Madras observes that "the Branch Postmaster in this case was apparently induced to commit the offence through having observed that the addressee of this registered letter had posted a post card in the Branch Office asking for a remittance." Another extract from the Annual Report of this Postmaster General is given below:—

"In another case an insured parcel was received from Burma for delivery in this Circle, the contents of which were declared to be rubies. This also was delivered in good condition and under a full acquittance; but a complaint was made because the addressee on opening the parcel found that it contained merely some pebbles of a red colour which were of no value. The weight of the parcel at the time of delivery corresponded with the weight observed in the office of posting; and thus this Department was able to repudiate all responsibility. An attempt had apparently been made by the sender to cheat the addressee. Cases of this kind are of somewhat frequent occurrence, and in every instance the Department is exposed to a fraudulent claim, as the sender is bound to demand compensation, otherwise he would be tacitly admitting that the declaration of contents contained false particulars. In one case, therefore, in which good evidence was obtained that a false declaration of contents had been furnished, it was considered expedient to prosecute the poster of the article under Section 417, I. P. C., and Section 43 of the Post Office Act. An insured letter was posted in the Madras Office which was declared to contain two Government Currency Notes of ₹100 each. It was delivered in perfect condition to the addressee from the Melapalayam Sub-office; but on opening it he found, instead of the two notes, a piece of thick brown paper. The weight of the letter at the time of delivery corresponded exactly with its weight when it was posted; and on the piece of

brown paper there was a distinct impression of the obliterator which had been used in the Madras Office for the purpose of defacing the postage labels on the cover. From this it was evident that this piece of brown paper had been in the cover when the letter was posted. The poster was the sender's son, and he was prosecuted and convicted under the sections abovenamed and sentenced to pay a fine of ₹250, or in default to undergo six months' rigorous imprisonment. A youth who abetted the offence was sentenced to pay a fine of ₹50 or to undergo two months' rigorous imprisonment in default. There is reason to hope that the result of this prosecution will have a salutary effect in checking attempted frauds of this nature."

60. *Offences punishable by Law.*—Appendix VIII, of which an abstract appears on the margin, is a statement showing the offences punishable by law committed by postal officials in each postal circle. It will be seen that the number of legal convictions has fallen by 27, and that the departmental punishments have risen by 18, the net result being a diminution in the total of 9 cases. The most serious of these cases is the one known as the "Bara Bazar" case, which is thus described by the Postmaster General of Bengal:—

	1885-86	1886-87.
Number of legal convictions	187	160
Number of cases punished departmentally.	67	85
Total	254	245

"Two registered bags made up by the Bara Bazar Town Sub-Office were abstracted while in transit through the General Post Office. The bags contained in all 122 ordinary registered letters and one insured letter, enclosing diamonds valued at ₹400. The sum just mentioned represented the loss to the Department, but the nominal value of the contents of the 122 ordinary registered letters was more than ₹70,000, the enclosures being chiefly hundis, cheques, whole currency notes, and half notes. Most of the stolen property was recovered, part being obtained from one of the two offenders, a cooly in the General Post Office, who was convicted and sentenced to five years' rigorous imprisonment, and a larger portion being found on the Calcutta maidan where the stolen bags appear to have been opened and searched. All the property recovered was returned to the owners, and, accepting the statement of the sender of each letter as to its contents, the actual loss to the public was reduced to ₹4,790. The second offender implicated in the case unfortunately threw himself from a boat while in the custody of the Police, and either escaped or was drowned. Had it not been for this accident, it might have been possible to recover even more of the stolen property."

Another grave instance of embezzlement covered by false accounts was committed by the Postmaster of Bushire, who, having been tried by the High Court in Bombay, was sentenced to six years' rigorous imprisonment.

61. In the Money Order Branch of this Department the instances of misappropriation numbered 97, and the total loss, after deducting recoveries, aggregated ₹5,898, of which ₹5,891 were charged to the Post Office Guarantee Fund, and the balance (₹7) written off as a loss to Government. Of these 97 cases, 34, representing a total sum of ₹1,329, were committed by postmen or village postmen who number 13,267; and 18 cases, involving the gross amount of ₹2,114, were due to dishonesty on the part of the extra departmental agents who number 2,841.

62. Connected with Savings Bank transactions, 14 cases of fraud were perpetrated by employés of this department, resulting in a loss of ₹2,646, the whole of which has been written off against the Post Office Guarantee Fund. In nine instances the offenders were punished by law, in one case the accused, though acquitted, was dismissed the department, and in four instances the suspected officials escaped justice by flight. On eleven occasions fraud against the Post Office Savings Banks was either committed or attempted by members of the public. In six of these occasions pass-books were presented, the possession of which had been dishonestly obtained, and in five of these six cases money was successfully withdrawn. Four instances occurred in which, by altering entries in pass-books, unsuccessful attempts were made to draw larger balances than

those actually at the credit of the accounts concerned: but in one of these cases the object of the depositor, in fraudulently enlarging the amount of her balance, appears to have been not to cheat the Post Office but to obtain a loan on the security of her pass-book. Prosecutions were instituted in nine cases, eight of which were successful.

63. *Highway Robberies.*—An abstract, comparing the highway robberies of the mail during the year with those of the preceding year, will be found on the margin. The rise in the total from 14 to 18 is more than explained by the seven instances of dacoity which occurred in Burma owing to the unsettled state of that province.

	1885-86. Number of Highway Robberies.			1886-87. Number of Highway Robberies.

	Total	16	2	...	2	1

65. Prosecutions were instituted in three out of these eighteen cases, and in two instances convictions were secured. No trace of the offenders could be found in the remaining cases. When considering the large proportion of these crimes which still remain unpunished, it should be borne in mind that on seven occasions the perpetrators were Burmese dacoits, and on two occasions the uncivilized tribes resident in the Naga Hills and in Manipur. One runner was shot dead while carrying the mail, notwithstanding the presence of an armed escort: this occurred during the Chital act of violence in the Bombay Circle. Besides this instance of loss of life, seven of these mail robberies were accompanied by the wounding or maltreatment of the postal runner. In one of the Burma cases the highway robbers, after pilfering the mail bags, proceeded to the outpost for which the runner was bound, and killed every one of the guard provided for the protection of that place. In another Burma case the road between Ningyan and Yemethen had been closed for some weeks when the accumulated mails were at last despatched under a strong escort consisting of a jemadar with 30 men. But this force, having been attacked by an overpowering number of dacoits, was compelled to retire leaving everything behind them. In the Manipur case a pretender to the throne of that country with his followers stopped the road between Silchar and Manipur, and the mails sent in both directions during six days were lost, though the contents of the bags were fortunately of small value. But a great deal of delay and inconvenience ensued, the mails having to travel for nearly a month by a very round-about route until order was restored.

66. Apart from highway robberies of the mail the history of the year is memorable for a series of acts of violence, sometimes accompanied by bloodshed, in which postal employés were generally the sufferers. At Pyindaye, in the Thongwa district, the Branch Postmaster was murdered and the property of the department destroyed by dacoits. Near Pyinmana, in Upper Burma, the escort which accompanied the mail was fired upon, two sepoys being killed and a policeman severely wounded, though the mails were untouched. In Baluchistan a village postman was stoned to death by certain Pathans, who were never apprehended: he managed to stagger towards the Post Office till he met a passer-by, to whom he entrusted his bag and badge for delivery to the Sub-Postmaster: and the dead body of this village postman was found on the spot where he parted with his bag and badge. A Branch Postmaster at Fazilpur, in the Dera-Ghazi-Khan district, had his throat cut with a razor, the Post Office being set fire to with the object of concealing evidence of the crime. On this occasion the murderer was a village postman, who received the sentence of death and was executed. At Tabayi, in the Toungoo district, the Branch Post Office was attacked and burnt by dacoits, and all communication with Toungoo cut off for several days. The small quantity of cash which the office contained had been placed for security in the Myook's Court: but that building also was sacked and burnt. The Demagiri Sub Post Office, in the Chittagong hill tracts, was broken into and robbed by Kookies. A runner in the Thana District, having been attacked on a lonely road, resisted and killed his assailant with a spiked staff. This runner was tried for manslaughter, but defended at the expense of the Department and acquitted, the Court being satisfied that he acted only in self-defence. Three departmental officials committed suicide, deficiencies being discovered in the cash balances of the offices entrusted to their charge. In April 1886 the Mandalay Post Office was destroyed by a fire which consumed a large portion of that town; and in August of that year the buildings occupied both by the Mandalay Head Office and by the shore Sub-office had to be abandoned on account of floods. Serious floods occurred also in

Behar and in Eastern Bengal, which necessitated the removal of several Post Offices, and in some instances in Eastern Bengal the use of boats for the purposes of a Post Office. Communication between Toungoo and Ningyan was stopped for eleven days owing to the insecurity of the road and the sinking of the launch in which the mail was conveyed; another launch sent to rescue the mail was fired upon by the rebels and had to abandon its flat which added to the detention of the post on this occasion.

67. Several instances also occurred in which mail communication was interrupted through the operation of floods on lines of Railway. On two separate occasions during July the North-Western Railway was breached by floods near Jagadri. Between Trichinopoly and Pondicherry the mail was detained for two days from the same cause. A bridge was carried away on the Eastern Bengal line and boats had to be provided for crossing the mail. Interruption occurred in the Madras line through excessive flooding, and the Oudh and Rohilkund line suffered in the same way.

68. Appendix IX contains the numerical strength of the establishment entertained by this Department in the several postal circles, while the marginal abstract includes all grades below that of Deputy Postmaster General.

Postal Officials.	1885-85.	1886-87.
Superintendents and Inspectors of Post Offices	346	352
Postmasters, Deputy and Sub-Postmasters, including Village Postmasters	4,677	4,901
Extraneous Agencies, such as School-masters, &c.	1,969	2,214
Clerks	5,086	5,342
Postmen and other servants	9,386	9,566
Road Establishment	12,271	12,098
Village Postmen	4,440	4,455
Signallers, clerks, and other servants employed in combined offices	654	642
TOTAL	38,829	39,570

69. The charges incurred on account of printing work done by private presses rose from R48,197 to R53,797. Most of the circles show decreases of expenditure under this head, but large increases have taken place in the North-Western Provinces and Railway Mail Service which raise the net charge by R5,600.

Section IX.—Non-Postal Branches of the Department.

Telegraphs.

70. During the year under review 57 combined Post and Telegraph Offices were opened and five closed, giving a net increase of 52 offices: 21 of these were situated at places where separate Telegraph Offices had previously existed. The total number of Telegraph Offices at the close of the year was 699, of which 440 were combined Offices or Telegraph Offices worked under the supervision of the local Postmaster. In seven places postal work is conducted in the Telegraph Office under the management of the Telegraph Master.

71. A table of traffic statistics is given below, in which the work done by each postal circle is exhibited. Compared with the figures of the previous year the total number of messages sent has increased by 34·56 per cent. and the revenue by 41·40 per cent., while the total realisations of the year exceed the charges by R3,73,368.

Traffic Statistics of combined Post and Telegraph Offices for the year 1886-87.

Postal Circles.	Number of combined offices on 31st March 1887.	Total cost of Postal Establishments debitable to the Telegraph Department for working combined offices during the year.	Number of Messages. Sent (Inland and Foreign).	Received.	Transit.	Revenue realized during the year on sent messages (Inland and Foreign).	Remarks.

Percentage of Increase	13·40	27·96	34·56	46·47	94·07	41·40	

72. Besides working combined offices the Post Office also receives telegrams at Post Offices and transmits them to the nearest Telegraph Office. 31,578 messages were thus sent during the year from 1,721 Post Offices, the revenue yielded being R32,942.

73. During the year 141 postal employés qualified as signallers, and at the close of March 1887 66 were still under training. In the previous year 253 employés passed in signalling, so that on the 1st April last 394 qualified postal signallers were available for employment in combined offices.

74. A further step in the direction of alliance between the postal and telegraph departments was taken by the extension to the Indo-European line in the Persian Gulf of the Indian plan under which the two departments mutually perform without charge the work done for the other.

75. *Government Carrying Agency and Passenger Service.*—The Government carrying agency is an agency for the conveyance of passengers and goods in vehicles drawn by bullocks: it consists of one main line between Umballa and Simla with branches to the hill stations of Kasauli, Dagshai, Solon, and Subathu. The passenger service is an agency for the conveyance of passengers in vehicles drawn by ponies: it consists of one line only, *viz.*, that between Umballa and Simla. No change under either of these heads occurred during the year.

Section X.—Financial Results.

76. Appendix X gives a detailed comparison between the receipts and charges of the year under review and those of the preceding year so far as the regular accounts of the department are concerned: and the following abstract contains the general financial results exhibited by that statement. The heading of "Purely Postal Service" includes the revenue and charges belonging to correspondence of all kinds and to money orders: it includes likewise the charges of the Savings Bank branch of this department which yields no income at all. This heading presents an improvement of R4,61,364 in the receipts, together

with an addition of R2,84,613 to the charges, the net result being a gain of R1,76,751 :—

	1885-86.	1886-87.
PURELY POSTAL SERVICE.	R	R
Receipts, including sale of service postage Stamps . .	1,07,26,955	1,11,88,319
,, excluding ,, ,, ,, ,, . .	90,07,187	94 39,167
Disbursements, including discount on sale of ordinary stamps	95,48,017	98,32,630
Net revenue, including sale of service postage stamps . .	11,78,938	13.55,689
NON-POSTAL BRANCH.		
Bullock Train.		
Receipts	1,44,795	1,37,343
Disbursements	1,48,231	1,50,881
Deficit .	3,436	13,538
Passenger Service on Mail Cart Lines.		
Receipts and disbursements	2,16,745	2,05,698
Contract subsidies paid through the Post Office but employed also largely on general and military considerations.		
Disbursements	5,45,154	5,38,143

These results may be summarised as follows :—	1885-86. R	1886-87. R
A net revenue in the Purely Postal Department of . .	11,78,938	13,55,689
A net deficit in the Bullock Train Department of . .	3,436	13,538

77. Appendix XI is a comparative abstract of the receipts and charges entered in Appendix X and contains also certain other items of revenue and expenditure detailed on the margin, which, though not shewn in the regular accounts of the department, are debited against the Post Office in the Finance and Revenue Accounts of the Empire. The figures in this appendix show a total revenue of R1,15,78,780 or an increase of R4,47,917 on the revenue of the previous year, and a total expenditure of R1,35,38,769 or an increase of R5,12,733 over the expenditure of 1885-86. Thus the deficit at which the department is worked, under the figures given in the civil accounts, has risen from R18,95,173 to R19,59,989. But, as explained in previous reports, though the district post charges are all debited against the Post Office, the great bulk of the receipts belonging to this branch of the service is credited not to this department but to another head in the accounts. Practically the charges of the district post cannot exceed its receipts. Omitting, therefore, both receipts and charges, over which no control is exercised by this office, the deficit referred to is reduced to R8,07,714. There are other sums also for which the Post Office can fairly claim credit. Throughout the year, for instance, service articles in Upper Burma have been carried free of cost under frank owing to the disturbed state of that province, the absence of treasuries and stamp depôts and the practical impossibility of furnishing flying columns with the needful stock of service stamps. Had these articles been sent under the official correspondence rules,

Items included in the Finance and Revenue Accounts, but not included in the regular accounts of the Postal Department.

REVENUE, 1886-87.	R	CHARGES, 1886-87.	R
District post collections, including zemindary dâk receipts in Bengal . .	47,420	District post establishment, including zemindary dâks in Bengal .	11,99,695
		Stores from England . . .	4,91,252
		Payments under postal arrangements with the Lords of the Treasury	6,80,000
		Exchange on charges in England .	4,40,470

the postal revenue would have benefited to the estimated extent of R47,495. Moreover, the Post Office was forced to maintain an unremunerative establishment in Upper Burma costing R50,000. Again, no credit is allowed to the department in the accounts of the Empire for the benefits bestowed on the country by the Savings Bank branch of its operations. If credit be claimed for the keeping of these accounts, at the rates allowed to Presidency Banks for the discharge of the same class of work, the revenue of the department would be increased by R1,62,051 as denoted on the margin. Furthermore, the conversion into a State Railway of the Sind, Punjab, and Delhi Guaranteed Railway, together with the application to the Bengal Central Railway Company of State Railway rates, has increased postal payments to State Railways by R54,000 with no corresponding benefit whatsoever in the shape of improved accommodation or in any other way. By claiming these credits the deficit of R8,07,714 would fall to R4,94,168 as contrasted with a deficit of R6,40,285 in the preceding year. But for the increase of R1,09,520 under the head of "Exchange charges in England," which this department is powerless to control, the result would have been still more favourable. When considering the profit and loss arising out of the operations of the Post Office, it is fair to bear in mind that, while the State Railway, the Telegraph and other departments of Government, make no difference between the rates charged to the Government and those levied from the public, the Post Office alone, on the ground of convenience, provides a special and extremely favourable scale of charge for the work it performs for the State: the Indian rate for official letters is one anna per ten tolas instead of one anna per tola, the rate taken from the public. In the United Kingdom no such privilege is accorded, but the charges levied for private and official correspondence are one and the same. If the practice followed by other departments in India be extended to the Post Office, and, as is done by Great Britain, the charges for official correspondence be reckoned at ordinary rates, the revenue derived from this source would, at a low computation, be doubled, and the postal department, instead of shewing a deficit in its accounts, would rank among the revenue yielding departments of the State. It remains to remark that the increase under the head of charges of R1,19,862 on English stores is accounted for by the supply of a large stock of new registration and square embossed envelopes, the introduction of which has already been adverted to; as this new class of stationery is disposed of by sale, the sum disbursed on their purchase will gradually be recovered from the public.

	R a.
¾ per cent. on a balance of R2,25,45,890	84.547 0
A charge of 8 annas on each of 1,55,009 active accounts . .	77,504 8
TOTAL	R1,62,051 8

78. Other items of charge also exist which find no place either in the departmental or in the civil accounts. These items are entered on the margin: but the Right Hon'ble the Secretary of State for India has been pleased to rule that there is no reason for adding them to the expenditure of the Post Office.

Items not included under charges in the Finance and Revenue Accounts.

79. A cheap scale of postage was first introduced in India during the year 1854. On the margin is given a table which indicates the yearly progress of the department as denoted by its correspondence, revenue, and expenditure.

Section XII.—Notices of Post Office Officials.

80. Rai Salig Ram Bahadur, Postmaster General of the North-Western Provinces, retired from the public service after a long and honourable connection with the postal department, extending over nearly 40 years. This distinguished officer is the first Native of India who has attained the high position of Postmaster General. Mr. J. DeCaster, Superintendent of the Postmaster General's Office in Madras, also retired on pension after a faithful service of more than 34 years, during which he enjoyed the confidence of many successive Postmasters General. My thanks are due to Mr. H. M. Kisch, C.S., Postmaster General of Bengal, for his labours as President of a Committee for the revision of the Post Office Manual: to Mr H. Farrer, Postmaster General of Madras, for the energy and patience with which he set himself to improve postal communication in the Northern Circars against great obstacles: and to Pundit Salig Ram for the introduction of the new Rent Money Order system. Among the officers whose names have been brought to my notice for good work done of a special character are those of Mr. J. Owens, in connection with the new Tonga line between Giridih and Hazaribagh, Rai Ramouter Sing for the revisions in the Railway Mail Service, resulting in large savings of expenditure, and to Mr. E. A. Doran for the care, industry, and ability with which he discharged his duties as Secretary to the Manual Committee.

Appendix No. I.

Statement showing the Number of Post Offices and Letter Boxes opened and Village Postmen entertained during the year 1886-87 and the Total Number that stood at the end of the official years 1885-86 and 1886-87.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters and newspapers, &c.), from that year on to 1872-73, after which a low privilege rate of 1 anna for each letter not exceeding 10 tolas (about 4 oz.) was conceded, thus reducing immensely the postage income.

Column 8.—The figures in this column are useful, as showing the revenue undisturbed by the changes of system in respect of official correspondence explained in the note referring to column 3.

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The comparison commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

(a) Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

* Including post-cards from 1879-80.

† 1,712 miles of lines under this head have in 1884-85 been included in column 19.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION BRANCH.

IRRIGATION OPERATIONS, NORTH-WESTERN PROVINCES, FOR THE "KHARIF" SEASON (1st APRIL TO 30th SEPTEMBER) 1887.

No. 2771, dated Allahabad, the 31st January, 1888.

RESOLUTION—By His Honour the Lieutenant-Governor, North-Western Provinces, and Chief Commissioner of Oudh.

READ—

Statements A22, B22, and C22, showing irrigation operations for kharif, 1887-88, of Canals in the North-Western Provinces.

OBSERVATIONS.—The area irrigated during kharif, 1887, was 650,597 acres, an increase, as compared with the previous year, of 60,689 acres, or 10·20 per cent.

This increase, as will be seen from the table below, is confined to the early kharif crops, *viz.*, sugarcane and indigo. There was no general fall of rain until the first week in July; during the latter part of the month and throughout August and September the rainfall was ample and well distributed, and, except for rice in a few localities, there was absolutely no demand for canal water.

The assessments on account of occupier's rate amounted to ₹19,95,753, as against ₹17,57,488 in 1886; an increase of ₹2,38,265, or 13·50 per cent.

2. Table I shows the areas of the principal crops for the past four years:—

TABLE I.

Crops.	1884.	1885.	1886.	1887.
	Acres.	Acres.	Acres.	Acres.
Sugarcane	153,544	175,638	169,123	197,604
Rice	92,687	95,986	151,232	134,822
Bajra and Jowar . . .	10,240	6,062	4,304	4,452
Maize	20,321	14,505	13,929	9,868
Other food-grains . . .	4,985	7,109	8,758	9,783
Fodder crops	14,483	5,878	6,415	7,753
Fibres (cotton) . . .	66,709	57,341	41,373	47,671
Dyes (indigo)	391,891	297,282	163,957	212,732
Miscellaneous	18,455	42,457	30,817	25,912
TOTAL .	773,315	702,258	589,908	650,597

Sugarcane shows an increase of 28,481 acres; and indigo, which showed such a marked decrease during the two previous years, now shows a tendency to recover, the area irrigated exceeding that of the previous year by 48,775 acres.

The decrease of 16,410 acres under rice is due to the late commencement of the rains, and is chiefly confined to the Tarái and Bhábar Canals.

The area of *irrigated* maize depends almost entirely on the nature of the rainfall, and the fluctuations in the crop are markedly shown in the statement below, comparing the areas for the last six years with the rainfall:—

Years.	Area of maize irrigated.	Rainfall. July.	Rainfall. August.	Rainfall. September.
	Acres.	Inches.	Inches.	Inches.
1882	37,152	13·2	5·7	2·4
1883	92,393	6·3	1·4	4·5
1884	20,321	5·7	11·5	12·5
1885	14,505	12·2	16·1	3·6
1886	13,929	10·0	10·0	3·0
1887	9,868	13·2	13·7	7·2

1887 was an exceptionally favourable year for maize, as there was continuous rain all through the *three* months. The consequence is the maize sown on the "*gauhan*" lands (which *always* take water) was only irrigated.

If only one of the three months is dry, in addition to the above, the outlying fields are also irrigated; and if there is an early fall of rain in July, followed by a break of six weeks, as in 1883, and exceptionally large area is watered from the canals.

3. Table II compares by canals the irrigated areas during the two years, 1886 and 1887:—

TABLE II.

CANALS.	1886.	1887.	More.	Less.
	Acres.	Acres.	Acres.	Acres.
Upper Ganges	237,497	259,992	22,495	...
Lower ,,	103,525	143,778	40,253	...
Agra	51,083	58,949	7,866	...
Eastern Jumna	91,313	90,754	...	559
Betwa	2,677	2,290	...	387
Dún	5,884	6,300	416	...
Rohilkhand	47,465	45,657	...	1,808
Bijnor	2,028	4,367	2,339	...
Hamírpur lakes	300	282	...	18
Jhánsi lakes	50	67	17	...
Tarái	22,494	13,000	...	9,494
Bhábar	25,592	25,161	...	431
TOTAL	589,908	650,597	60,689	...

The Lower Ganges Canal shows a satisfactory increase of 40,253 acres, followed by the Upper Ganges and Agra Canals with increases of 22,495 and 7,866 acres. The falling off of 9,494 acres on the Tarái Canals is due to the short rice crop.

4. Table III gives the assessments on account of occupier's rate for the last four years:—

TABLE III.

CANALS.	1884-85.	1885-86.	1886-87.	1887-88.
	₹	₹	₹	₹
Upper Ganges	11,16,995	10,04,071	8,64,057	9,54,667
Lower ,,	4,94,619	4,86,755	2,79,488	3,82,510
Agra	1,94,113	1,97,862	1,57,631	1,79,914
Eastern Jumna	3,87,423	3,87,910	3,87,572	3,95,953
Betwa	...	...	4,760	12,187
Dún	14,807	16,339	17,877	19,597
Rohilkhand	35,338	38,966	40,966	41,011
Bijnor	5,513	6,641	4,077	8,891
Bundelkhand lakes	269	815	1,060	1,023
TOTAL	22,49,077	21,39,359	17,57,488	19,95,753

The rate per acre irrigated is ₹3·26, against ₹3·24 in the previous year, the increase being due to the larger area of sugarcane irrigated.

ORDER.—Ordered, that copies of this Resolution be submitted to the Government of India; that it be circulated to other Governments and to local Departments, and that it be published in the *North-Western Provinces and Oudh Gazette*.

By order of the Hon'ble the Lieut.-Govr., N.-W. P., and Chief Commr. of Oudh.

J. G. FORBES, *Colonel, R.E.*,

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for January, 1888.

January is normally an unsettled month over Northern India. The high-pressure area which during November and December is a quasi-permanent feature in the pressure distribution of North-Western India, gives way frequently during January and is replaced by well-marked depressions which occasion clearly defined cyclonic winds, and often much rain and snow. The characteristics of these cyclonic vortices differ apparently according to the place of their origin. Those depressions which first show themselves over the north-west of the Panjab, though usually more or less deep, are ordinarily short-lived, and while occasioning unsettled weather over the Panjab and the west of the North-Western Provinces, both on the hills and plains, quickly fill up, so that their effects are limited almost entirely to the region over which they first make their appearance. Those depressions, on the contrary, which are first shown to the south of the Suliman range, and which are usually heralded by a brisk barometric fall all over Sind, Beluchistan and the Indus valley, are, though much shallower than those noticed above, much longer-lived and frequently traverse large tracts of country, travelling generally on an east-south-east course. Of these two classes of storms the past month has afforded one or two typical cases.

In addition to these storms, which are more or less characteristic of the season, the west coast has been visited by very unsettled weather occasioned by the passage northward of a series of disturbances travelling from the Malabar coast as far as the North Konkan or Guzerat coasts.

On the 1st, pressure was high all over Northern India and low on the Bombay coast. The general wind circulation was fairly normal, though in the North Konkan the direction was more northerly than is usually the case. Rain was falling in Khandesh, in the south of the Peninsula and in Ceylon. From this date until the 6th the principal feature in the weather was the passage northward of a depression along the west coast. This disturbance gave very unsettled weather to all the Bombay stations and to many in the Central Provinces. On the 4th and 5th the wind at Bombay had an average velocity of 17 miles per hour from north-east, and rainfalls varying from 0·5 inch to 2·7 inches were reported from the western and central stations. On the 6th the barometer was rising almost everywhere, and the general distribution approximating to the normal, though the depression previously reported from the west coast had left steep barometric gradients and rather cloudy and unsettled weather to Western and Central India. From the 7th to the 10th the weather over India calls for little remark. Pressure was throughout high over North-Western India, and relatively low over Burma, Ceylon, and the west coast. The wind circulation was fairly normal and the weather was fine. On the 11th a small depression appeared in Lower Sind, occasioning a south-westerly wind at Karachi and Hyderabad and a north-north-easterly wind at Jacobabad, and rain at Quetta and Karachi. On the following day the storm from Lower Sind lay between Indore and Deesa and rain had spread to Mooltan and the north-west of the Panjab. The barometer was rising fast in the Indus valley and falling briskly in the central parts of the country. From the 13th to 19th there again occurred a period during which the barometric distribution was fairly normal, the wind circulation on the whole regular, and the weather generally fine, though on the 16th, 17th, and 18th slight rain fell over Rajputana, the North-Western and Central Provinces, and at some stations in the North-West Himalaya. On the 20th the first sign of an extensive change showed itself. On this day a rapid barometric fall took place at Quetta and in the Indus valley, and a large low-pressure area appeared on the western frontier, the centre of disturbance lying apparently to the south of Quetta and west of Jacobabad. Cyclonic winds were reported from Sind and parts of Rajputana and the Panjab. On the 21st a large diffused depression was shown over Sind, Guzerat, Central India, and the south of Rajputana, and south-easterly winds had appeared

over nearly the whole of the North-West and Northern India and a northerly wind at Hyderabad (Sind). Rain was falling at Rawalpindi, Peshawar and Mooltan and snow at Murree. On the 22nd the depression had become much more clearly marked and somewhat deeper, and had its centre near Jeypur. Rather strong cyclonic winds circulated around the centre and rain had extended to most parts of the Panjab, as well as to Jhansi, Sutna and Mount Abu. Snow was falling at Murree and Simla. By the morning of the 23rd the depression had reached Seoni and almost filled up. Its movement eastward had, however, been accompanied by an extension in the same direction of the rainfall area, and rain on this day was reported from nearly all stations in Northern and Central India, from Bengal to the Indus. The rain at Rawalpindi, Sialkot and Gya and the melted snow on the hills of the North-West Himalaya exceeded 1 inch. On the 24th the depression lay between Raipur and Gopalpur. Rain still fell in Bengal but in Northern and North-Western India there had been considerable improvement in the weather. On the morning of the 25th a fresh depression was shown over Guzerat, and rain was falling over the whole of the Indus valley and the Panjab, and snow on the hills of the North-West Himalaya. This depression subsequently travelled east-south-eastward to the Central Provinces and developed very considerably. It occasioned a return of south-easterly winds and rain to the North-Western Provinces and gave north-westerly winds and rain to Rajputana and Guzerat.

At the same time, a local depression had appeared in the north-west of the Panjab, occasioning general rain and snow in its neighbourhood. About 3 feet of snow fell at Mussooree and Simla. By the morning of the 27th the Panjab depression had disappeared, while the Central Provinces depression had continued to travel south-eastward and lay near Gopalpur. Rain was reported from the whole of Bengal and the North-Western Provinces, but had ceased over the greater part of the Panjab and Rajputana. On the 28th the depression was crossing the Bay of Bengal and rain was still falling in Assam and around the head of the Bay, but in other parts of India the distribution of pressure and the circulation of the winds had become fairly normal, and except at a few places the weather had been fine. On the 29th the depression last seen near Gopalpur reappeared near Akyab, and rain was falling over Burma and Assam. In most other parts of India conditions appeared fairly quiet, but in Lower Sind rain and a falling barometer were reported. On the 31st a well-marked disturbance lay to the west of Rajkot, and strong easterly winds and rain were reported from Lower Sind. Elsewhere the weather called for no remark.

Pressure.—The mean pressure of the month has been above the average except at the hill stations where, alike at Darjeeling and on the North-West Himalaya, there has been a slight deficiency. The excess was greatest over the Peninsula and Ceylon, and least in Burma and the Panjab.

Temperature.—Except in Ceylon, the Circars, and part of Burma, the month has been cold almost everywhere. In Northern India the deficiency ranged from 1° to 5°; in the central parts of the country from 2° to 7°; in Rajputana from 4° to 6°; and in the Peninsula from 1° to 3°. On the hills between the 25th and the close of the month, sharp frost was experienced, the lowest temperature recorded being 21°·1 at Simla on the morning of the 27th.

Humidity—Has been generally below the mean in Northern, and above it in Central and Southern India.

Rain—Has fallen in all the Provinces, and the total amount has been slightly to largely in excess of the average, except in Malabar, Mysore, the Carnatic, Ceylon, and North Bengal. The greatest excess, both absolutely and relatively, is reported from the Konkan coast.

This wet month has done much to obliterate the seasonal deficiency which has hitherto existed over Northern India, and, at several stations in Bengal and the North-Western Provinces, and at a few in the Panjab, the total rainfall since November 1st is now in excess of the average. In Central and Western India there is a large excess.

The following table shows the amount of rain and the difference from the average, during the month of January, 1888, according to districts, as far as is indicated by the telegraphic reports :—

Districts.	Number of stations.	Average rainfall in January.	Difference from the average in January, 1888.
Punjab—West	7	1·39	+0·52
Do. East.	4	1·53	+0·20
North-Western Provinces—Trans-Gangetic	9	1·47	+0·55
Do. Do. Cis-Gangetic	3	0·62	+0·20
Behar	2	0·69	+1·52
Northern Bengal	2	0·60	—0·10
Assam—Cachar	3	0·71	+0·55
Lower Bengal—Chutia Nagpur	7	0·43	+0·70
Orissa—Northern Circars	6	0·30	+0·49
Central Provinces—South	7	0·50	+0·66
Perar—Khandesh	2	0·47	+0·99
Rajputana, Central India, Saugor and Nerbudda	8	0·43	+0·42
Sind—Cutch	3	0·37	+1·27
Guzerat	3	0·06	+0·42
Konkan	4	0·09	+2·12
Deccan—Hyderabad	5	0·13	+0·45
Malabar	4	0·37	—0·16
Mysore—Bellary	4	0·35	—0·18
Carnatic	6	0·70	—0·38

Simla, 10th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending Feb. 8th, 1888.

The weather of the past week has been on the whole less unsettled than that of the preceding seven days, but both pressure and temperature have undergone frequent and considerable oscillations, and the winds have been very unsteady. On two days, *viz.*, February 3rd and 4th, rain was general throughout Northern and Central India.

On the 2nd a large low-pressure area was shown over Sind and Guzerat, and rain was falling at Jacobabad, Hyderabad, Karachi and Ajmere. Relatively low pressures also existed along the foot of the hills, and rain was reported from Darjeeling, but elsewhere the barometer was high and the weather fair. On the 3rd a rapid barometric decrease was reported from the Panjab, a depression lay near Murree and Rawalpindi, and cyclonic winds were blowing over the whole of North-Western and Central India. Rain was general over that part of the country lying to the north-westward of a line running from Rajkot north-eastward to Allahabad. The largest amounts were 1½ inch at Murree and about 1 inch at Rawalpindi, Multan and Mount Abu. On the following day the barometer had risen fast in North-Western India and the depression had disappeared, but unsettled weather continued and, though it had ceased in Guzerat and Sind, rain continued to fall over the Panjab, the North-Western Provinces and part of Central India. The amounts were everywhere below

1 inch. On the 5th, a large area of high pressure overlay the north-western stations, and the weather had improved generally, though rain was still reported from Nowgong, Allahabad, Dhubri and Sibsagar. On the 6th there occurred little change of importance. On the 7th, the barometer was again falling in the North-West and over Baluchistan, and rain had recommenced in Sind and at Quetta. On the 8th, a low-pressure area was shown over the Panjab and the North-Western Provinces, and rain was falling at Quetta, Jacobabad, Jhansi and Mussoorie.

Pressure.—The mean pressure of the week, compared with the monthly average, was above the normal everywhere. The excess was considerable over the plains, but slight at the hill stations.

Temperature.—Was low almost everywhere. A part of this deficiency is undoubtedly due to the method of comparison, but in the Panjab and North-Western Provinces, Rajputana, Central India and Sind, the weather was very cold for the time of year.

Humidity.—The air was much damper than usual.

Rain—Has fallen in all provinces except Burma, Ceylon, Malabar, Bombay and Madras. The heaviest total fall occurred on the hills, but in the Panjab, Guzerat, Central India, Sind and Rajputana, the week's fall was everywhere large. In the Berars and Central Provinces, the total fall was insignificant.

The concluding table gives the total rainfall of the past week according to provinces :—

Divisions.	Number of stations.	Total rainfall.
Burma	0	0
Bengal and Assam	4	1·22
North-Western Provinces and Oudh	8	1·79
Panjab	9	6·01
Hill Stations	6	7·88
Ceylon	0	0
Malabar Coast	0	0
Bombay	0	0
Berars and Central Provinces	1	0·02
Guzerat and Central India	5	2·36
Sind—Rajputana	6	4·92
Madras	0	0

Simla, 11th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending the 11th February, 1888.*—No rain except a small quantity in Ganjam. Rainfall to date generally sufficient except in parts of Vizagapatam, Madura and Salem. Agricultural operations progressing as usual. Crops generally good but very slightly damaged here and there by rain, disease or insects. Wet crops under rain-fed tanks in parts of Madura withering

owing to deficient supply of water. Pasture generally sufficient but scanty in Malabar and parts of Madura and Anantapur and decreasing in Vizagapatam. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending the 15th February, 1888.*—Rain in parts of Sind; beneficial to late crops in Upper Sind Frontier. Wheat in parts of Nasik, Dharwar and Wadhwan and *jowari* in parts of Satara damaged; cotton in parts of Dharwar and Belgaum and linseed in parts of Nasik blighted. Standing crops fair in Colaba and Baroda; middling in Thana and Bijapur and good in other districts. Harvesting of early crops almost completed in Sholapur; that of late crops in progress in Surat, Kaira, Panch Mahals, Nasik, Poona, Ahmednagar, Sholapur, Bijapur, Belgaum, Dharwar and Kathiawar. Cotton-picking continues in Ahmedabad, Surat, Kathiawar and Bijapur. Preparations for sowing of next season's crops in progress in Nasik, Bijapur and Karachi. Probable outturn of opium in Baroda 12 annas; of wheat in Wadhwan from 9 to 10 annas, and of late crops in general 14 annas in Karachi and Hyderabad and 12 annas in Nasik and Ahmednagar. Fodder scarce in one taluka of Dharwar.

Bengal.—*For week ending the 14th February, 1888.*—Rain fell generally throughout Bengal Proper, Orissa and Chota Nagpur, but in Behar showers are reported only in parts of the Bhagulpore Division. The *rabi* crops have benefitted and the moisture has assisted ploughing for early rice and jute. *Boro* rice is doing well. Tobacco is in good condition. *Ganja* in the Rajshahye district promises well. Poppy is generally a good crop; the plants are in flower, and in some places the collection of opium has begun. Sugarcane harvest is yielding a good outturn.

N.-W. P. and Oudh.—*For week ending the 15th February, 1888.*—Slight rain fell in Cawnpore and some northern districts. The weather is generally cloudy. All crops are doing well and opium prospects are good. The supplies in markets are reported sufficient but prices continue high and have risen in Lucknow, Partabgarh, Moradabad, Agra and Kumaun. The condition of agricultural stock is satisfactory.

Panjab.—*For week ending the 15th February, 1888.*—Slight rain fell in some districts. Prices are reported to be stationary in eight districts and falling in four; the fall that has commenced may be expected to continue. Ploughings for *kharif* in progress throughout the province. *Rabi* prospects have improved by the recent fall of rain. Prospects are now reported good from every district but Hissar where more rain is needed. Late sown barley doing well. Crops slightly damaged by frost in Hissar. Stock cattle are generally healthy. Fodder scarce in most districts. Poppy crops average.

Central Provinces.—*For week ending the 15th February, 1888.*—Weather rather cloudy and unsettled with slight rain in eastern districts. Hail has done some damage to crops in a few villages in Saugor, Jabalpur, Hoshangabad and Bilaspur. Clear weather required. Linseed expected to yield only 4 annas in Raipur; prospects of other winter crops generally favourable. Prices rising in places. Cattle in fair condition.

Burma.—*For week ending the 11th February, 1888.*—Slight rain has fallen in the Kyaukphyu, Moulmein, Amherst and Shwegyin districts of Lower Burma, and in the Bhamo, Myadoung, Mandalay and Taungdwingyi districts of Upper Burma. Ploughing and planting of dry weather crops progressing. Condition of agricultural stock good. Estimates of probable outturn of harvest have risen slightly in Thonegwa and considerably in Mandalay. In other districts the estimates remain the same as last week. Price of paddy has risen in the Kyaukphyu, Tounghoo, Myadoung, Mandalay, Taungdwingyi and Yamethin districts and slightly in the Kyaukse and Myingyan districts. Price of paddy has fallen in the Bassein and Pagan districts.

Assam.—*For week ending the 15th February, 1888.*—Weather cool and windy. Light rains in most districts has done good to tea and helped ploughing for summer rice. Sugarcane crushing nearly over. Potatoe sowing going on in the Hill Districts.

Mysore and Coorg.—*For week ending the 15th February, 1888.*—No rain Crops in good condition. Sowing of paddy and planting of sugarcane commenced in parts. Condition of cattle generally good. Prices slightly risen in the Bangalore, Kolar and Kadur districts.

Coorg has also had no rain. Coffee prices have shown some improvement. Other prices stationary.

Berar and Hyderabad.—*For week ending the 15th February, 1888.*—In Berar the *kharif* harvest is nearly completed. Of the *rabi* crops, wheat in ear, gram and linseed in pod—all in good condition. Fodder getting insufficient in the Amraoti district. No marked change in the prices of food grain.

In Hyderabad agricultural prospects continue fair. Prices are stationary.

Central India.—*For week ending the 15th February, 1888.*—No rain. No change in agricultural operations or condition of standing crops since last report. Outturn of harvest expected good, except in Western Malwa and Goona. Irrigated wheat crop in Bhopawar slightly damaged. Agricultural stock in good condition except in Goona. Pasturage and fodder good. Prices of food grains steady in Bhopal and Baghelkhand, falling in Bhopawar and rising or high elsewhere. Opium crop good.

Rajputana.—*For week ending the 15th February, 1888.*—Agricultural operations satisfactory. Standing crops and prospects good. Agricultural stock in fairly good condition. Pasturage or fodder sufficient. Prices still high. Opium somewhat damaged in Meywar and Jeypore.

REVIEW OF MR. ROYLE'S REPORT ON THE INDIAN SECTION OF THE COLONIAL AND INDIAN EXHIBITION.

Cir. No. $\frac{15}{5-8}$ Ex.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department, dated 17th February 1888.

MUSEUMS and EXHIBITIONS.

READ—

Letter, dated 1st April 1887, from Sir Philip Cunliffe-Owen, K.C.M.G., C.B., C.I.E., Secretary to the Royal Commission for the Colonial and Indian Exhibition of 1886, to His Excellency the Viceroy and Governor General, communicating observations on the collections of exhibits contributed from India.

Despatch No. 86 (Statistics and Commerce), dated 25th August 1887, from Her Majesty's Secretary of State for India, transmitting the Report of Mr. J. R. Royle, C.I.E., on the Indian section of the Exhibition and his accounts of the sale of exhibits.

RESOLUTION.

The accounts of the Indian Courts at the Colonial and Indian Exhibition held in London in 1886 having been examined and disposed of, the Report on the Indian section, submitted by Mr. J. R. Royle, C.I.E., Official Agent to the Government of India at the Exhibition, together with the following account of the proceedings and action taken in India, is published for general information.

2. An invitation to take part in the Exhibition was received from His Royal Highness the Prince of Wales by the Indian Government in June 1884, but it was not till March 1885 that the orders of Her Majesty's Government were received laying down definitely the share in the project to be taken by the Government of India. These instructions limited the expenditure to be incurred in direct connection with the London Exhibition to one lakh of rupees exclusive of the cost of packing and freight, but permitted the contribution on loan of any articles which might be provided for the Exhibition which it was at that time intended to hold at Bombay in 1887-88. With the despatch of exhibits from the Indian ports the responsibility of the Government of India ceased. The management and control in England were unconditionally entrusted to the Royal Commissioners, who subsequently appointed Sir Philip Cunliffe-Owen, K.C.M.G., C.B., C.I.E., to be Executive Commissioner for India in their behalf, but the Government of India was permitted to send one European officer to arrange and explain the collection of economic products, and a few native officials and attendants, the cost of their deputation being met from the grant of one lakh. The Royal Commissioners, to whom a sum of £20,000 was guaranteed from Indian revenues in case of the expenses of the Exhibition exceeding the receipts, undertook to meet all charges connected with the fitting up of the Indian Courts and the display of exhibits, and also arranged to purchase specimens of the more expensive kinds of artware excluded from the scope of the collections which the Government of India was authorised to contribute. It was arranged that an officer directly responsible to the India Office should be appointed to protect the interests of Indian exhibitors, and for this purpose, the services of Mr. J. R. Royle, C.I.E.,

of the India Office, whose previous experience as Indian representative at the Amsterdam Exhibition of 1883 specially fitted him for the duty, were placed at the disposal of the Royal Commissioners as Assistant Secretary for India, and as Official Agent to the Government of India for the guardianship and eventual disposal of exhibits.

3. At an early stage in the arrangements the consent of the Government of Bombay was asked for and obtained to the loan, for previous display in London, of exhibits intended for the Bombay Exhibition, and His Excellency the Governor General in Council takes this opportunity of recording the obligation of the Supreme Government for the cordial manner in which the Local Government and the guarantors of the Bombay Exhibition acceded to an arrangement to which the success of the Indian section of the Colonial and Indian Exhibition was in great measure due. The Government of Bombay further agreed to contribute towards the purchase of exhibits for the two Exhibitions such sum not exceeding one lakh, as would suffice, together with the contributions of other Local Governments, to make up $1\frac{1}{2}$ lakhs. The contributions of Local Governments having amounted to ₹81,500, the sum which the Government of Bombay was actually called upon to subscribe was ₹68,500. To the $2\frac{1}{2}$ lakhs (*i.e.*, one lakh from the Imperial and one and a half from the Bombay and Provincial Governments) thus available for the equipment of the Indian Courts, the Royal Commissioners subsequently added a grant of ₹31,168 for the preparation, on their behalf, of a series of carved ornamental screens, to form a façade in the Court of Indian Artwares. These resources were largely supplemented by the liberality of many Native Chiefs and Nobles to whose liberal contributions some of the most attractive collections of exhibits were due. The entire cost of the representation of Hyderabad, Baroda, and Jeypore was borne by the Rulers of those States, and to them and to the Chiefs and Nobles and European and Native gentlemen who made donations and loans of economic and art exhibits His Excellency the Governor General in Council desires to express his acknowledgments for their public-spirited and generous co-operation.

4. In order to avoid as far as possible the risk and expense of returning loan exhibits to Bombay, it was resolved to restrict the sum of $1\frac{1}{2}$ lakhs subscribed by Local Governments, including Bombay, to the purchase of specimens of artware, ornamental fabrics, &c., of a saleable character, on the understanding that if disposed of in London, duplicates for the Bombay Exhibition would be purchased in India from the sale-proceeds realized. The separate grant of one lakh sanctioned by the Secretary of State was reserved by the Government of India for the preparation of collections illustrative of the economic products of the country and rough manufactures and of its administrative system, and for defraying incidental expenses connected with the European officer and native officials whose deputation to England was authorised by the Secretary of State. Following this division of funds the purchase and despatch of artware were entrusted to officers or committees nominated in each Province by the Local Governments, with permission to correspond direct with the Revenue and Agricultural Department, that Department, which had for some time past been developing an organization for the purpose, itself undertaking the collection of raw products and primary manufactures. The despatch of exhibits commenced in December 1885, and it is owing to the exertions of the Provincial officers and committees, to the excellent arrangements made for the shipment of exhibits by the agents at the ports, and to the activity with which their

efforts were seconded by Mr. Royle and Mr. C. Purdon Clarke, C.I.E., Honorary Architect to the Executive Staff in London, that the Indian Courts presented so satisfactory an appearance on the 4th of May 1886, when the Exhibition was opened by Her Majesty the Queen, as to obtain the special commendation of His Royal Highness the Prince of Wales and the Royal Commissioners in a congratulatory telegram to His Excellency the Viceroy. To the gentlemen whose names are appended to this Resolution, His Excellency the Governor General in Council wishes the thanks of the Government of India to be conveyed for the zeal and ability with which they accepted and carried out, in most cases as an addition to their regular duties, the share assigned to each in the onerous work of selecting, purchasing, ordering, collecting, and despatching the vast number of articles comprised in the Indian contribution to the Exhibition.

5. Of the Indian exhibits themselves a sufficient general description is contained in Mr. Royle's report, and it is here unnecessary to say more than that they formed a more adequate representation of the country and its natural and industrial products than had been attempted on any previous occasion. The system adopted for the arrangement of exhibits, however, deserves notice, as it differed in some respects from the classification adopted at previous Exhibitions. Exhibits of artware including fabrics were arranged primarily in Provincial Divisions or Courts according to localities of production, instead as heretofore being grouped according to a technical classification. Raw products and rough manufactures on the contrary followed a technical classification, irrespective of geographical distribution. In other words, the collections of products were national or imperial, while those of artware were local or provincial. In thus departing, in the case of artware, from the usual method of arrangement, the Government of India was influenced by a desire to illustrate and emphasize the essentially conservative nature of the artistic ideas of the country which, though beginning to yield to the influence of a new industrial development, are still distinguishable by peculiar local characteristics which lend them a special value and attractiveness, and which it is for many reasons desirable to foster and preserve as far as possible. It was obvious, however, that a similar arrangement in the case of raw materials, which are only to a limited extent the production of special localities and otherwise differ only so far as they are affected by soil and climate, would have resulted in an unnecessary reduplication of specimens, besides being productive of increased labour and expense. Hence it was resolved to display them under a technical classification based upon their nature and uses, and their arrangement was entrusted to Dr. G. Watt, C.I.E., who had already been charged by the Government of India with the compilation of a Dictionary of Indian Economic Products. The instructive character of the economic collection was enhanced by a valuable series of cartographic exhibits provided by the Survey Department. One exception to the general plan of arrangements originally laid down was subsequently permitted by which, at the instance of the Royal Commission, silk exhibits, both raw and manufactured, were placed in a separate Court under the management of Mr. T. Wardle, of Leek, who had for many years taken a personal interest in the subject. His disinterested labours in the cause of an important industry, though unhappily not at present a prosperous one, are gratefully recognised by the Government of India and will not be wasted.

6. It has been mentioned that the expenses of the packing and freight of exhibits were sanctioned as a separate charge, and in order to simplify accounts

the Government of India undertook to meet all such charges in the first instance on both Government exhibits and private exhibits sent through official agency and to recover them as far as possible by the addition of a percentage to the fixed sale prices of exhibits. It was, however, decided by the Secretary of State, in view of the great convenience of affixing sale prices to the goods as they were unpacked and the impossibility of calculating in advance the ultimate proportion of freight and other charges to be added to the price of each article, to allow the Official Agent discretion as to the actual prices to be charged. In the exercise of this discretion Mr. Royle fixed such prices as seemed best calculated to ensure a ready sale, and the abandonment of the project for an Exhibition at Bombay rendered it desirable that as many articles as possible should be disposed of in London in order to avoid charges for return freight. Better financial results were thus obtained on the whole than would probably have been forthcoming by a rigid adherence to original prices, and the Government of India is assured that every care was taken to avoid obscuring the true value of the goods to the injury of future trade. As shown in Mr. Royle's report, the total sum realized on exhibits of artware was £20,042, of which £2,297 went to meet expenses in England, including among other payments a deduction of 5 per cent. paid to the Royal Commission as a contribution towards the cost of establishment for the custody and sale of exhibits, leaving £17,745 for remittance to India as the net realization on articles sold valued at R2,29,823. It has been decided that private exhibitors shall receive in full the original sale prices of their exhibits, and it is understood that the sums which have been distributed to Local Governments, &c., after crediting R35,500 towards the cost of packing and freight, will suffice for this purpose, and in most instances leave a sufficient surplus to recoup the expenditure incurred from provincial revenues on artware exhibits. The Government of India is indebted for this satisfactory result to the unremitting care and labour of its Official Agent, Mr. J. R. Royle, and has much pleasure in recording its appreciation of the excellent services continuously rendered by him in that capacity.

7. The remaining collections, namely, those provided by the Government of India from the separate grant of one lakh of rupees, consisting of raw products and primary manufactures, ethnological models, &c., have been presented, as Mr. Royle explains, to various museums and institutions, including the Imperial Institute. The nature of these collections made it improbable that more than an inconsiderable portion of the outlay would be recovered by sale, while their distribution for permanent preservation and reference served to perpetuate the principal object of the exhibition itself. That object, as stated by His Royal Highness the President of the Royal Commission, was to demonstrate on the fullest scale to the people of the United Kingdom the unbounded industrial resources at their command within the limits of Her Majesty's Colonial and Indian Dominions, and has, the Government of India is assured, been as fully attained as circumstances admitted. Having regard to the long-established intercourse between India and the West, no direct and immediate commercial results, such as occasionally follow the exposition of the product of new regions, could reasonably be expected, but the Exhibition was successful in attracting attention to the necessity of systematic exploration in the field of Indian economic products as a promising source of fresh and important industries, and the possibility of utilizing under proper instruction the artistic taste and skill of native artizans in the production of wares suited to European requirements. The need for systematic enquiry

on practical lines was clearly established at a series of conferences we held twice or three times a week at the Indian Courts by the courteous permission of the Royal Commission, at which each class of products was in turn examined and discussed with commercial and scientific experts and manufacturers from London and from other important commercial centres. The general result of the careful examination to which Indian products were thus subjected was the conclusion that while there existed a variety of new or little known Indian substances which might be brought to important industrial uses, no decisive opinion could be formed as to their value and utility until fuller information was available in regard to the extent of their production and prices, and until the purposes for which they are suited had been sufficiently demonstrated by a careful series of experiments and by scientific analysis of a rigorous character. A considerable impulse has been given in recent years to the collection and publication of information regarding Indian products by the various exhibitions which preceded the Colonial and Indian Exhibition. To that Exhibition is due the effort made for the first time to bring all the economic products of India under a comprehensive survey, of which the basis is now being laid in the Dictionary under preparation by the Imperial Reporter on Economic Products, whose appointment for the purpose is itself a result of the Exhibition of 1886. In the Imperial Institute, founded in commemoration of the fiftieth year of the reign of Her Majesty the Queen-Empress, will, the Government of India hopes, be found, on the other hand, the organisation for bringing the properties of the products themselves under continuous scientific investigation and experiment. Thus in prominently drawing public attention to these objects the Exhibition may be regarded as an important and practical step in the policy advocated and developed by the Government of India for the investigation and exploitation of indigenous products and manufactures. The fact that a very large number of exhibits were sent by native workmen on their own account is an encouraging experience of the late Exhibition, and would seem to point to the conclusion that they are becoming more keenly alive to the advantages of advertisement and the demands of foreign customers.

8. In conclusion, His Excellency the Governor General desires to express, on behalf of the Government of India, its obligations to Sir Philip Cunliffe-Owen, on whom as the sole Executive Commissioner for India the entire responsibility rested of arranging the exhibits contributed by the Governments and Native States of the Indian Empire, and to whose personal efforts the successful appearance of the Indian Courts was greatly due, and at the same time to acknowledge the consideration and assistance accorded by the Royal Commissioners, which secured to the representation of India at the Colonial and Indian Exhibition of 1886, the position, prominence and distinctive character which were worthy of her place in the British Empire.

ORDER.—Ordered, that the foregoing Resolution be communicated to all Local Governments and Administrations and Agents to the Governor General and Residents in Native States noted on the margin, with the intimation that a copy of the Resolution has been sent to each of the gentlemen named in the list appended to the Resolution.

Madras.	Baroda.
Bombay.	Rajputana.
Bengal.	Central India.
North-Western Provinces and Oudh.	Baluchistan.
Punjab.	Hyderabad.
Central Provinces.	Mysore.
Burma.	Nepal.
Assam.	Kashmir.

ORDERED, also, that it be published, with the report submitted by Mr. J. R. Royle, in the Supplement to the *Gazette of India*.

[True Extract.]

E. C. BUCK,
Secretary to the Government of India.

APPENDIX.

Officers and Committees entrusted with the collection and despatch of Indian Exhibits for the Colonial and Indian Exhibition, 1886.

OFFICIAL collections in India were made under the general administration and direction of the Revenue and Agricultural Department of the Government of India:—

I.—ADMINISTRATION.

By the following Officers:—

Geology	H. B. Medlicott, Esq.
Meteorology	H. F. Blanford, Esq.
Survey of India	Lieutenant-Colonel J. Waterhouse. Major C. Strahan, R.E.
Salt, Excise, Opium, Mints, Post Office, Government Printing, Education, Police, Sanitary and Medical, Public Works, Military, &c., &c.	Collections were made under the orders of the Heads of the Departments concerned.

II.—ECONOMIC PRODUCTS.

By the following Officers:—

Raw Products and Rough Manufactures.	Dr. G. Watt, M.B., F.L.S., on special duty with the Government of India, Revenue and Agricultural Department. Babu T. N. Mukharji, Revenue and Agricultural Department, Government of India.	Assisted by the Exhibition Committees in Bombay and Bengal and the Chambers of Commerce at Calcutta and Bombay.
Timbers and Forest Produce.	B. Ribbentrop, Esq., Inspector-General of Forests. R. H. C. Whittall, Esq., Assistant Inspector-General of Forests. F. B. Manson, Esq., Deputy Conservator of Forests, Bengal, on special duty.	Assisted by the Executive Officers of the Forest Department working under the orders of the Inspector-General.

III.—ART-WARE AND FABRICS.

By the following Committees and Officers appointed by the Governments of the various Provinces in India, or the Rulers of Native States:—

MADRAS.

COMMITTEE	Colonel H. P. Hawkes, Deputy Commissary General, *President*.	C. Deane, Esq.
	Dr. G. Bidie, M.B., C.I.E.	G. G. Orr, Esq.
	E. B. Havell, Esq.	C. A. Lawson, Esq.
	J. C. Shaw, Esq.	C. Benson, Esq.
		Dr. E. Thurston.

BOMBAY.

COMMITTEE	The Hon'ble Forbes Adam, Member of the Bombay Legislative Council, *President*.	Haji Karim Mahomed Sulleman, Esq.
	E. C. K. Ollivant, Esq.	E. T. Leith, Esq.
	Major A. B. Portman.	Nanabhai Byramji Jijibhai, Esq.
	Dr. D. Macdonald.	Vrijbhukan Das Atmaram, Esq.
		J. Griffiths, Esq., *Secretary*.

BENGAL.

COMMITTEE.

- H. A. Cockerell, Esq., C.S.I., Member, Board of Revenue, *President*.
- D. Cruickshank, Esq., *Vice-President*.
- H. Berger, Esq.
- Surgeon-Major D.D. Cunningham.
- M. Finucane, Esq., B.C.S.
- J. Henderson, Esq.
- C. R. Hills, Esq.
- J. J. J. Keswick, Esq.
- Dr. G. King.
- R. Lyall, Esq.
- Hon'ble A. P. MacDonnell, B.C.S.
- J. D. Maxwell, Esq.
- R. Miller, Esq.
- J. Murdoch, Esq.
- A. Pedler, Esq.
- T. Ralli, Esq.
- H. H. Risley, Esq., B.C.S.
- A. Simson, Esq.
- Hon'ble Colonel S. T. Trevor, R.E.
- Lieutenant-Colonel J. Waterhouse, B.S.C.
- M. Jackson, Esq., Member and *Secretary*.

NORTH-WESTERN PROVINCES AND OUDH.

D. M. Smeaton, Esq., B.C.S., Director, Department of Agriculture and Commerce.

Lieutenant-Colonel D. G. Pitcher, Assistant Director, Department of Agriculture and Commerce.

F. S. Growse, Esq., C.I.E.

Dr. J. W. Tyler, Superintendent, Central Jail, Agra.

A. Constable, Esq., Personal Assistant to the Chief Engineer, Oudh and Rohilkhand Railway.

PUNJAB.

J. L. Kipling, Esq., Principal, Mayo School of Art, Lahore.

CENTRAL PROVINCES.

J. B. Fuller, Esq., B.C.S., Director, Department of Agriculture.

BURMA.

H. L. Tilly, Esq., Executive Engineer.

ASSAM.

H. Z. Darrah, Esq., B.C.S., Director, Department of Agriculture.
Colonel J. Johnstone, C.S.I., Political Agent, Manipur.
Major T. J. Willans, R.E., Executive Engineer, Shillong.

COORG.

Colonel T. G. Clarke, Commissioner of Coorg.
Colonel A. LeMessurier, Consulting Engineer, Bangalore.
W. McHutchin, Esq., Executive Engineer, Mysore State Railway.

HYDERABAD STATE.

Colonel C. J. O. Fitzgerald, Commanding 3rd Cavalry, Hyderabad Contingent, Hyderabad.

MYSORE STATE.

Colonel A. LeMessurier, Consulting Engineer, Mysore, Bangalore.
W. McHutchin, Esq., Executive Engineer, Mysore State Railway.

BARODA STATE.

COMMITTEE

- Captain J. Hayes Sadler, Assistant Agent to the Governor-General, *President*.
- Major F. H. Jackson.
- Rao Bahadur Laxman Jagganath.
- Rao Bahadur J. S. Gadgil.
- T. S. Tait, Esq.
- P. Reynolds, Esq.
- Abbas S. Tyabji.
- Rao Bahadur Raoji Vithal.
- Rao Saheb Har Govindas Dwarkadas.
- Ambalal Sakarlal Desai.
- Dinsha Ardeshir Talearkhan, *Honorary Secretary*.

KASHMIR STATE.

Colonel Sir O. St. John, K.C.S.I., R.E., B.S.C., Resident in Kashmir.

N.-W. FRONTIER.

Colonel Sir Robert Sandeman, K.C.S.I., Agent to the Governor General, Beluchistan.

NEPAL STATE.

Surgeon G. H. D. Gimlette, Residency Surgeon, Nepal, Katmandu.

CENTRAL INDIA STATES.

J. Johnstone, Esq., Principal of the Residency College, Indore.

AJMERE AND RAJPUTANA.

Colonel Sir E. R. C. Bradford, K.C.S.I., M.S.C., Agent to the Governor General, Rajputana.

- R. S. Whiteway, Esq., B.C.S., Settement Officer, Ajmere-Merwara.
- Surgeon-Major J. P. Stratton, M.D., Resident, Eastern Rajputana States.
- Surgeon-Major T. H. Hendley, in Medical charge, Eastern Rajputana States, and Honorary Secretary to the Museum Committee, Jaipur.
- Colonel P. W. Powlett, S.C., Resident, Western Rajputana States.
- Lieutenant-Colonel H. P. Peacock, Political Agent, Alwar.
- Captain W. H. C. Wyllie, C.I.E., Political Agent, Kotah.
- Captain A. C. Talbot, S.C., Political Agent, Bikanir.
- Lieutenant-Colonel W. J. W. Muir, S.C., Political Agent, Haraoti and Tonk.
- Colonel C. K. M. Walter, S.C., Resident in Meywar.
- Lieutenant-Colonel C. B. Euan-Smith, C.S.I., Political Agent, Bhartpur and Karauli.

The shipment of exhibits was entrusted to—

Calcutta—W. A. Dangerfield, Esq., R.N., Agent for Government Consignments.
Bombay—Messrs. King, King & Co.
Madras—Lieutenant J. H. Taylor, R.N.R., Master Attendant.

Report by Mr. J. R. Royle, C.I.E., on the Colonial and Indian Exhibition, 1886, Indian Section.

1. In submitting the following Report on the Indian Section of the late Colonial and Indian Exhibition, I have thought it advisable, before proceeding to show how the collections have been disposed of, to give a brief sketch of the part played by India in the Exhibition.

Conditions under which Government of India participated in Exhibition.

2. It was in the autumn of the year 1884 that H.R.H. the Prince of Wales first notified to the Secretary of State for India his assumption of the Presidency of the Royal Commission for the Colonial and Indian Exhibition, and explaind the general features of the scheme he proposed for the administration of the Indian Section. These arrangements were communicated to the Government of India by the Secretary of State, and, after some correspondence had passed, it was determined by Lord Kimberley that India's participation in the Exhibition should be limited as follows:—

(*a*) The Secretary of State to subscribe to the Guarantee Fund of the Exhibition the sum of £20,000.

(*b*) The Government of India to be permitted to incur an expenditure of £10,000, in addition to all charges for freight, for the purpose of covering the cost of a collection illustrating the raw produce and ordinary manufactures of the Indian Empire.

(*c*) The Royal Commission to provide a sum of £3,000 for the purchase of sumptuary art objects, and depute an officer to India to make a suitable selection.

(*d*) The Royal Commission also to pay all charges for the installation of the Indian collections, the Executive Administration being entrusted to the Secretary, Sir Philip Cunliffe-Owen: and to secure the interests of the Indian Government, and of Indian Exhibitors, Mr. J. R. Royle, of the India Office, was appointed Assistant Secretary, for the purpose of supervising the work of the Indian Section.

Mr. Royle was later on specially appointed Official Agent for the Government of India, and the Government of Madras also placed the charge of their collections in his hands.

3. It being soon found that the sums alluded to above would be quite inadequate to properly represent Indian produce and manufactures, they were supplemented by—

(*e*) Collections which the Native Princes and gentlemen of India agreed to contribute in response to the invitation of H.R.H. the Prince of Wales.

(*f*) By grants made by the various Local Governments in India from provincial funds, and

(*g*) By a sum of £6,850 originally granted for purchasing collections for an Exhibition which it was contemplated to hold in Bombay during 1886-87. This Exhibition being however subsequently abandoned, it was decided to allow the collections lent on its behalf to the London Exhibition to be sold there.

(*h*) By a later grant of £2,500 made by the Royal Commission for the purpose of providing ornamental carved screens to enclose the various provincial art-ware courts.

4. The funds available for providing collections from India thus consisted of:—

	£
Government of India Grant	10,000
Royal Commission Grant	3,000
Bombay Exhibition Grant	6,850
Royal Commission Screen Grant	2,500
TOTAL	22,350

To this sum must be added the cost of private contributions and certain grants which the various Local Governments were able to make from Provincial funds.

Arrangements made in India.

5. The whole of the arrangements for collecting and forwarding from India the goods intended for exhibition were made under the direction of the Revenue and Agricultural Department of the Government of India, the Secretary to which Department—Mr., now Sir Edward Buck—issued instructions to the various Committees appointed in all parts of India for the purpose of furthering the work connected with the Exhibition. These instructions were intended to ensure uniformity in the systems adopted by these Committees, and among other things included special forms and a scheme of classification, based on a series drawn up by Sir G. Birdwood, of the India Office, who had in many previous Exhibitions found the immense advantage of regularity in such details.

Mr. Clarke's visit to India.

6. The selection of the objects purchased from the Royal Commission grant of £3,000 was entrusted to Mr. C. Purdon Clarke, C.I.E., who visited India for that purpose, and, with the co-opertion of Sir Edward Buck's department, formed a collection, the value of which was afterwards proved by the readiness with which it sold in England.

Native contributors to the Exhibition.

7. The liberal manner in which the Native Princes and gentlemen of India responded to the invitation of the Executive President of the Royal Commission was especially remarkable, and it was this which mainly made the Indian Courts the most attractive rendezvous in the Exhibition.

Among the principal contributors the following may be mentioned:—

Their Highnesses:

BARODA, The Gaekwar of.
HYDERABAD, The Nizam of.
JODHPUR, (MARWAR), The Maharaja of.
MYSORE, The Maharaja of.
BHOPAL, The Begum of.
GWALIOR, The Maharaja (Sindhia) of.
INDORE, The Maharaja (Holkar) of.
JAIPUR, The Maharaja of.
JAMU AND KASHMIR, The Maharaja of.
UDAIPUR, (MEYWAR), The Maharana of.
TRAVANCORE, The Maharaja of.
BAHAWALPUR, The Nawab of.
BHARTPUR, The Maharaja of.
BIKANIR, The Maharaja of.
COCHIN, The Raja of.
KARAULI, The Maharaja of.
KOTAH, The Maharaja of.
KUTCH, The Rao of.
ORCHHA (Tehri), The Maharaja of.
PATIALA, The Maharaja of.
TONK, The Nawab of.
ALWAR, The Maharao Raja of.

BHAUNAGAR, The Thakur Sahib of.
DATIA, The Maharaja of.
DEWAS, The Raja of.
DHAR, The Maharaja of.
DHOLPUR, The Maharaj Rana of.
JHALAWAR, The Maharaj Rana of.
KUCH BEHAR, The Maharaja of.
RAMPUR, The Nawab of.
BIJAWAR, The Maharaja of.
CAMBAY, The Nawab of.
CHARKHARI, The Maharaja of.
DHRANGADRA, The Raja Sahib of.
JUNAGARH, The Nawab of.
MORVI, The Thakur Sahib of.
NAWANAGAR, The Jam of.
PALANPUR, The Diwan of.
PANNA, The Maharaja of.
GONDAL, The Thakur Sahib of.
HILL TIPPERAH, The Maharajá of.
PORBANDAR, The Rana of.

Also—

ALIPURA, The Rao of.
BALASINOR, The Nawab of.
BARAMBA, The State of.
BOLIHAR, Raja Kristendra Roy of.
DACCA, The Nawab Ahsanulla of.
DINAJPUR, The Maharaja of.
HATWA, The Maharaja of.
JATH, The Chief of.
LIMRI, The Thakur Sahib of.
LUNAVADA, The Rana of.
MANDASA, The Raja of.
MANIPUR, The Maharaja of.
MOHARBHANJ, The State of.

MURSHIDABAD, Nawab Ali Kadar Sayad Hasan Ali Bahadur, K.C.I.E., of.
MUTTEKOTHAM, The Zamindar of.
NIPAL, The Darbar.
PALITANA, The Thakur Sahib of.
PITTAPUR, The Raja of.
REWAH, Pandit Het Ram, C.I.E., Dewan of.
SANGAMULSA, Zamindar of.
SAWANTVADI, The Sir Desai of.
SUNTH, The Raja of.
SWARNAMAYI, The Maharani, C.I.
TAGORE, Raja Sir Sourendro Mohan, *Kt*, C.I.E.
TANJORE, The Ranees of.
VIZIANAGRAM, The Maharaja of.

Officers deputed from India.

8. It was originally intended that only one officer—Dr. G. Watt, C.I.E.—should be deputed by the Government of India to take charge of and explain the Imperial economic and ethnological collections; but it was found necessary to give him the assistance of Babu Trailokya Nath Mukharji and of Mr. U. C. Mukharji. Mr. B. A. Gupté was also sent by the Government of Bombay in special charge of their exhibits and I found his ready assistance invaluable in connection with the Bombay Court. Their Highnesses the Nizam of Hyderabad, the Maharaja of Mysore, and the Thakur Sahib of Bhaunagar expressed a wish to send Commissioners to London, and they were represented respectively by Major Nevill, C.I.E., Colonel A. Le Messurier, R.E., C.I.E., and Mr. M. M. Bhownuggree, C.I.E. At the opening of the Exhibition, Sir Edward Buck arrived, and acted as Commissioner for India.

9. The total area at the disposal of the Royal Commission was 388,582 superficial feet of floor space, and of this amount India occupied within the Exhibition buildings 103,000 superficial feet, in addition to 2,818 feet for additional buildings in the grounds; this area was enormously in excess of that occupied by India at any Exhibition held in Europe, the nearest approximation to it having been at the 1851 Exhibition, when she occupied about 24,000 superficial feet. In addition to filling so large a space, India occupied the place of honour as regards the position allotted to her in the buildings, as may be seen by the plans at the beginning of this Report.

Space occupied by India.

Arrangement of the space.

The 103,000 superficial feet were apportioned as follows, viz.:—

Provincial Art-Wares Courts	39,500
Imperial Economic Court	19,500
Private Exhibitors, Tea and Tobacco	12,550
Administration Courts	8,850
Indian Vestibule	2,600
Indian Palace, Courtyard and Shops	8,030
Silk Court	6,160
Tea Houses	5,810
TOTAL	103,000

10. The scheme of classification adopted differed from that which has generally prevailed at European Exhibitions in which India has officially taken part. The decision of the Royal Commission that there would be no juries, but that each exhibitor should receive a commemorative diploma, made it unnecessary to group the exhibits into classes, and it was thought that by adopting a geographical arrangement for the manufactured goods a clearer idea could be obtained as to the precise part of India in which any particular object was produced. Under this system the Provincial Art-Wares Gallery was divided into sections, each of which was allotted to one province or group of provinces, so that it was easy to study within a limited space the whole of the manufactures of any one part of India. The precise area to be devoted to each province was determined by the Revenue and Agricultural Department, and the space was at an early date marked out on the ground by the executive staff of the exhibition so that all goods as they arrived could be readily distributed to their proper positions.

Classification of exhibits.

11. It was not found possible to adopt any regular geographical sequence for the various provinces, but the following were the groups into which the Art-Wares Gallery was divided:—

Sub-division of Art-Wares Gallery.

RAJPUTANA STATES, including Jaipur, Karauli, Bhartpur, Dholpur, Kotah, Jodhpur, Alwar, Ajmere, and Bikanir.

CENTRAL INDIA STATES, including Bhopal, Gwalior, Indore, and Rewah.

BOMBAY AND BARODA, including Bhaunagar, Kutch and Sawantwari. BENGAL; NIPAL; NORTH-WEST PROVINCES AND OUDH; PUNJAB; KASHMIR; CENTRAL PROVINCES; ASSAM; BURMA; MADRAS; MYSORE AND COORG; HYDERABAD.

Each of these Provincial Art-Ware Courts was enclosed by a carved screen of wood, marble, or other material which in most cases illustrated the style of decorative work employed in the province from which it came. These screens contributed very much to the effective appearance of the art-wera collections, and their arrangement and erection was carried out under the able direction of Mr. C. Purdon Clarke. In every court maps of India, specially prepared for the Royal Commission by Mr. B. J. Rose, showing the relative position, area, and population of that part of the country, to which each section was assigned, were conspicuously displayed. An idea of the general appearance of this Gallery is given by the perspective view at the commencement of this Report.

Carved screens.

12. In the Imperial Economic Court the Government of India considered it advisable to depart from the geographical arrangement in order to avoid the unnecessary reduplication of similar specimens of raw produce from various parts of the country, and the system adopted was based on the economico-scientific classification followed by Dr. G. Watt, in his "Dictionary of the Economic Products of India."

Imperial Economic Court.

13. With this view the specimens sent by the Forest and other officers from all parts of India were examined by Dr. Watt and his assistant, Mr. T. N. Mukharji, and assigned their position in their proper economic groups. The Revenue and Agricultural Department laid great stress on the importance of bringing before commercial men the immense value of the natural products of India, and this aim was never lost sight of, the visitor being led on from the index collection of many thousands of named specimens in glazed tins to the bulkier samples of the more important products shown in a large commercial sample room, where merchants and others could handle and obtain specimens of the products which they wished to examine, while the interest of the public was sustained by the introduction of many features, which, while exhibiting the uses of special products, yet added greatly to the attractive appearance of the Court as a whole. Conspicuous among these, was a large bamboo bridge, constructed from no less than thirty varieties of bamboo, a grain trophy in partial imitation of the tomb of Itmad-ud-dowlah at Agra, in which the marble mosaics were replaced by a geometric arrangement of glass panels covering variously-coloured grains, and an archway or trophy of timbers, the ornamental details of which were worked out in geometrical patterns, composed of samples of many different kinds of timbers.

Arrangement of Raw Products.

14. The attractiveness of the Economic Court was further enhanced by combining the ethnological and agricultural collections with the raw produce, and by an arrangement of groups of life-sized coloured clay or plaster figures representing the different races of inhabitants of India, each figure having its appropriate clothing, ornaments and weapons, while close by were shown the peasant jewellery, domestic utensils, and rough arms used by each race, the mode of life of the village and agricultural population being moreover illustrated by means of several excellently made models. One of these groups is shown in the illustration given at the commencement of the Report. The idea which was first carried out at the Amsterdam Exhibition of 1883—of reproducing a small portion of a Native bazaar—was here worked out on a larger scale, several shops being completely stocked and fitted up with life-size figures of the shopkeepers, and proving a great source of attraction to the public.

Ethnological Collection.

15. Altogether, the economic and ethnological collections were of an importance and magnitude which have never been equalled at any previous Exhibition, and reflected the highest credit on Dr. George Watt, and the Revenue and Agricultural Department of the Government of India. The useful effect of the collections was, moreover, not permitted to cease with their arrangement, but a series of conferences on the more important products was arranged under the superintendence of Sir E. C. Buck and Dr. Watt, and these were attended by many of the leading merchants and brokers interested in the subjects under discussion. The proceedings have been printed and largely distributed among merchants and others who were unable to attend the conferences.

Conferences.

16. The Royal Commission, being very anxious to further the development of the Indian Silk Industry, resolved to set aside a large space for the purpose of an Indian Silk Court, and to place the arrangements for a suitable collection in the hands of Mr. Thomas Wardle, who paid a visit to the various silk-producing districts of India at the end of 1885, and, with the assistance of the Revenue and Agricultural Department of the Government of India, arranged for a thoroughly representative collection of the principal varieties of cocoons and of raw and manufactured silks. On his return to England, Mr. Wardle arranged this collection, and throughout the duration of the Exhibition devoted a large portion of his time to endeavouring to further the interests of Indian silk producers. An experienced silk-reeler from Lyons was employed under Mr. Wardle's direction by the Royal Commission, and showed by her work what superior silk can be reeled from Indian cocoons by the adoption of a proper system.

Silk Court.

17. The arrangements connected with the sale of tea, coffee, and tobacco, were placed in the hands of Messrs. H. S. King & Co., who, while responsible to the Royal Commission, were throughout guided by the advice of the special Committees appointed to represent the interests of the various Indian Tea and Coffee producing districts. These Committees took care that no undue prominence was allowed to be given to the produce of any one district or garden, but that all were treated impartially. Messrs. King & Co. report that 29,390 lbs. of tea and 5,563 lbs. of coffee from various districts, and about 366,000 Indian cigars were sold during the time the Exhibition was open. The management of the large space allotted to these exhibits, and of the staff employed therein, was most efficiently carried out on behalf of Messrs. H. S. King & Co. by their zealous and most able representative, Mr. F. B. Goodwin.

Tea, Coffee, and Tobacco.

18. Such private exhibitors of Indian goods as wished for an independent space where they could be represented by their own agents had space allotted to them in the private Exhibitors' Court adjoining the Tea and Coffee gallery, and some of them effected considerable sales of their exhibits.

Private exhibitors.

19. Owing to the construction of the galleries, which only allowed of a very limited wall space being allotted to each province, and on account of the inappropriateness of introducing pictures in the midst of carpets and show-cases, it was only in a very few instances possible to exhibit paintings, drawings, and photographs with the art-manufactures, although a few were shown in the Economic and Administration Courts. The remainder were exhibited, together with the bulk of the Colonial pictures in the gallery of the Royal Albert Hall. One of the principal features of the Indian collection being the portraits lent by Native Princes, in the midst of which were placed portraits of the Queen and of H.R.H. the late Prince Consort, lent by Her Majesty.

Picture Gallery.

20. His Highness the Maharaja of Kuch Behar, having intimated that he would exhibit a large sporting trophy consisting of a tiger hunt in an Indian jungle, and having contributed a sum of £540 for its installation, the Royal Commission determined to make this one of the prominent features of the Indian Section, and for this purpose made an additional grant of £500, and invoked the aid of the Revenue and Agricultural Department at Calcutta to supplement the trophy sent by the Maharaja so as to give as complete a representation as possible of the wild animals of India. The collections were most effectively arranged by Mr. Rowland Ward, and formed a never-ending source of attraction to the crowds of visitors by which it was constantly surrounded.

Jungle Trophy.

21. Although it was comparatively easy to get together collections illustrating the products and manufactures of the country, yet it was thought that something more was wanted in order to give the British public an idea of the manner in which the Native artisans performed their daily work in India in former times as dependents of the various princes and minor chieftains. Mr. C. Purdon Clarke therefore conceived the idea, which he most happily and skilfully carried out, of erecting a typical Indian Residence with its Durbar Hall and a forecourt, which was approached by a massive stone archway, designed by Major J. B. Keith, and presented by the late Maharaja Sindhia, to the South Kensington Museum and lent by the Museum to the Exhibition. The forecourt was surrounded by small shops, in which numerous artisans who were brought over from India at the expense of Messrs. H. S. King & Co., under the charge of Dr. J. W. Tyler, C.I.E., daily plied their trades under the eyes of the public. From a financial point of view this venture did not prove a success, not because the wares manufactured by the artisans were not appreciated, but because the recovery of the cost of the undertaking was throughout considered of less importance than the making of an attractive and picturesque display. A large quantity of the goods manufactured on the spot were readily sold, and orders for fresh goods were constantly received.

Indian Palace and Artisans.

22. To give some idea of the vast and complicated machinery required for the administration of the Indian Empire, a large space was allotted to the various departments of the Indian Governments, and here they showed reports, maps, photographs and models in illustration of the work carried on by each, and their collections were supplemented by a complete series of reports got together by Mr. F. C. Danvers, Registrar and Superindent of Records at the India Office. The whole collection was very attractively arranged by Mr. B. J. Rose of the India Office.

Administration Courts.

23. The series of maps, surveys, and photographs exhibited by the Survey of India Department attracted considerable attention, but the public were most pleased with the contributions of the Military Department, consisting of life-sized portrait-models of Native officers and soldiers, showing the uniforms and arms of twenty-four different regiments; these were grouped around the Indian vestibule and have now been deposited in the Museum of the Royal United Service Institution.

Survey of India and Military Departments.

24. The work connected with the Indian Section was commenced by me at the India Office early in 1885, and in March of that year I took up my quarters at South Kensington in the temporary offices there assigned to me, so that the work of allotting space, correspondence, and reception of goods could be performed on the spot without delay. It was not until early in 1886 that the permanent offices of the Indian Section were ready for occupation, the delay being caused by the fact of the Inventions Exhibition having been held on the same ground as was subsequently occupied by the Colonial and Indian Exhibition.

Commencement of work in London.

25. The arrangements for the transit of goods from the Docks and their delivery at the Exhibition were entrusted to Messrs. H. S. King & Co., who also arranged for the transit from Bombay of all goods shipped at that port; they succeeded in inducing the Peninsula and Oriental Steam Navigation Co. to fix the low rate of 30*s.* per ton for the goods from that port, and the large number of, 3,212, packages, some of them of great bulk—including all goods shipped by the

Delivery of goods.

Government officials from Calcutta and Madras—were delivered promptly and in good order at South Kensington. The only exception was one small case from Assam—further alluded to in its proper place in the accounts—which was stolen or dropped from a van on the way from the docks.

26. The cases of exhibits were all carefully marked and numbered by the local Committees in India, and in nearly every instance the rules laid down concerning the posting of advices and invoices to London were faithfully adhered to; wherever this was done the immense advantage of regularity and uniformity in all such details was perceived, and it was easy to send each package, on arrival, to its proper section, and there either unpack it, or else store it until required. Most of the goods arrived in excellent time, those from Madras and Central India being the very earliest on the ground, and this fact alone, joined to the energetic labours of the staff, enabled the Indian Section to be in a far more advanced state on the opening day than has ever been the case at any previous European Exhibition.

Marking and numbering of cases.

27. The rapid progress in the arrangement of the Indian Courts and their attractive appearence was especially commented on by the Press, and the very highest commendation is due to Sir Philip Cunliffe-Owen for the skill and administrative ability shown by him in so effectively and rapidly dealing with the mass of materials which came from all parts of India. He was fortunate in having the skilled assistance of Mr. Purdon Clarke for supervising the details of the decorative work; but had it not been for Sir Philip's own personal and unwearying attention to the minutest details of organization, it would have been impossible for so successful a result to have been attained.

Appearence of Indian Courts.

28. The utmost interest in the Indian Section was evinced by Her Majesty, by H.R.H. the Prince of Wales, and by the other members of the Royal Family, all of whom paid repeated visits and expressed their great satisfaction with the magnificence of the Indian exhibits and the admirable arrangements made for their display.

It may be mentioned that the Exhibition remained open 164 days, and was visited by the very large number of 5,550,745 persons.

29. The opinion that no general system of classification could be adopted suitable for all the Colonies and for India induced the Royal Commission to decide that each Colony should be allowed to use such a classification as was best suited to its own requirements, and as a consequence, that there should be no juries for awarding medals, but that each exhibitor should receive a commemorative medal and diploma. The number of medals and diplomas granted to India was 1,319.

Medals and diplomas.

30. While it is impossible to mention the names of all the officials in India who were instrumental in the preparation of the collections, or who in other ways contributed to the success of the Exhibition, yet it is most advisable to bring to the notice of the Government of India the names of a few those who in their respective provinces or departments, have had the largest share of the necessary hard work thrust on them, for had it not been for the earnest exertions of these gentlemen the efforts of those working in London must have been neutralised.

Services.

The following are especially deserving of thanks:

Sir Edward C. Buck (who was Secretary to the Government of India in the Revenue and Agricultural Department) assisted by Mr. C. S. Bayley and other officers of his department, organized the whole system under which collections were made, invoiced and forwarded, and planned the sub-division of the space allotted to India into the several provincial Courts. Sir E. C. Buck subsequently visited this country, and rendered invaluable services to the Royal Commission.

The Committees appointed in all parts of India to carry out the general programme drawn up by Sir Edward Buck's Department, must have devoted themselves with great energy to their task, but in each province the bulk of the work of necessity fell on one or two men, and those whose services in this respect appear to be most pre-eminently deserving of recognition are:—

As regards the Arts and Manufactures Collections.

In Madras	Colonel H. P. Hawkes; Dr. G. Bidie, C.I.E.; Dr. Edgar Thurston; Mr. E. B. Havell.
In Bombay	The Hon. F. Forbes Adam; Mr. J. Griffiths; Mr. B. A. Gupta.
In Sawantwadi	Col. G. K. C. Westropp.
In Bhaunagar	Mr. Proctor Sims, and Azam Vitaldas Samaldas (Dewan of Bhaunagar).
In Baroda	Capt. J. Hayes Sadler, and Mr. Dinsha Ardeshir Talyarkhan (Municipal Commissioner).

o

In Bengal	Mr. H. A. Cockerell, C.S.I.; Mr. M. H. Jackson; Mr. A. Pedler.
In the North-West Provinces and Oudh	Sir Alfred Lyall, K.C.B., K.C.I.E.; Mr. D. M. Smeaton; Lieut.-Col. D. G. Pitcher; Mr. F. S. Growse, C.I.E.
In the Punjab	Mr. J. L. Kipling, C.I.E., and the Deputy Commissioners of the various contributing districts.
For the N.-W. Frontier	Sir R. Sandeman, K.C.S.I.
In the Central Provinces	Mr. J. B. Fuller.
In Assam	Mr. H. Z. Darrah.
In Burma	Col. Sir E. B. Sladen; Mr. H. L. Tilly.
In Central India	Mr. J. W. D. Johnstone.
In Rajputana	Col. Sir E. R. C. Bradford, K.C.S.I.
In Jaipur	Surgeon-Major T. H. Hendley; Babu Kanti Chandra Mukharji (Member of Jaipur Council); Lieut.-Col. S. S. Jacob, R.A.
In Alwar	Lieut.-Col. H. P. Peacock (Political Agent).
In Kotah	Capt. W. H. C. Wyllie, C.I.E. (Political Agent).
In Jodhpur	Col. P. W. Powlett (Resident).
In Bikanir	Major A. C. Talbot, C.I.E. (Political Agent).
In Mysore	Col. A. Le Messurier, C.I.E.; Mr. W. McHutchin; K. Seshadri Iyer, C.S.I. (Dewan of Mysore).
In Coorg	Col. T. Clarke; Mr. J. B. Lyall, C.S.
In Hyderabad	Col. C. J. O. Fitzgerald; Sirdar Dilar Jang, C.I.E.
In Kashmir	Col. Sir Oliver, B. C. St. John, K.C.S.I.
In Nipal	Dr. G. H. D. Gimlette.

As mentioned in paragraph 12, the geographical arrangment adopted for the Art manufactures was not followed in the case of the Imperial Economic, Ethnographical, Administration of India, Silk Culture, Tea, Coffee, and Tobacco, and Picture Collections, each of which it was deemed better to treat as a whole rather than to unnecessarily repeat specimens, as would have been the case if a number of minor collections had been separately exhibited.

For the preparation of these collections in very many instances the officers named above were responsible, but in addition thanks are more particularly due to the following, among many others: Dr. G. Watt, C.I.E., of the Revenue and Agricultural Department, who, with the assistance of Babu Trailokya Nath Mukharji, arranged in India with the various Committees and Chambers of Commerce for the proper representation of the vast economic resources of the Empire.

Dr. Watt also rendered very great services, quite independently of his official duties at the Exhibition, in lecturing before various Public Institutions on the resources of India.

The success of the Economic and Administration Courts must, however, be, in a very great measure, attributed to the exertions of the various Departments of the Imperial and Provincial Governments and their assistants.

Among these must be mentioned:—

For Timbers, Forest and Agricultural Produce.

Mr. B. Ribbentrop, Inspector General of Forests.
Mr. R. H. C. Whittall, Assistant Inspector General of Forests.
Mr. F. B. Manson, Conservator of Forests, Bengal.
Lieut.-Col. J. Campbell Walker, Mr. J. S. Gamble } Conservators of Forests, Madras.
Mr. E. C. Ozanne, Director, Agricultural Department, Bombay.
Capt. J. A. L. Montgomery, Punjab.
Mr. W. H. Glenny, Madras.

For Geology and Meteorology.

Mr. H. B. Medlicott.
Mr. H. F. Blanford.

Survey of India, &c.

Lieut.-Col. J. Waterhouse; Major C. Strahan, R.E.; the late Col. De Prée; also the heads of the Departments concerned with the collections illustrating the Salt, Excise, Opium, Mints, Post Office, Government Printing, Education, Police, Sanitary and Medical, Public Works, Military and Marine, &c.

Official instructions as to Sale accounts.

31. In submitting a statement showing the mode in which the various collections sent from India have been disposed of, it is advisable to refer to the instructions I received. In the India Office letter of the 11th February 1885 (R. S. & C. 2384-84), the Secretary to the Royal Commission was informed that my services would be placed at the desposal of H.R.H. the President of the Royal Commission as an Assistant Secretary, and in this capacity it was further added that

I was to be responsible for the receipt of the Indian exhibits and for their due disposal at the close of the Exhibition. In the India Office letter of the 9th March 1886 (R. S. & C. 283-86), I was further informed that the Government of India held me responsible for the satisfactory custody and disposal or safe return of all objects exhibited, and I was instructed to render accounts showing how each article had been disposed of.

Sale accounts.

32. It is, therefore, in accordance with these official instructions that I now submit detailed sale accounts showing how every article in the Indian Section has been disposed of, and in so doing I would express my regret that they have occupied a somewhat longer time than I had at first hoped would be needed. But the preparation of these voluminous and complicated accounts, with the assistance only of the untrained and mixed staff placed at my disposal by the Royal Commission, has been a work of considerable magnitude and immense worry to myself; and when the enormous area occupied by India at the late Exhibition and the importance of the collections exhibited are taken into consideration, I feel confident it will be conceded that the date at which my accounts are rendered compares most favourably with that at which those of previous Exhibitions in which India has participated have been completed.

Minor accounts still to be rendered.

33. Before proceeding to make any remarks on the various collections and on the account connected therewith, I should state that although the present are complete accounts showing how everything has been disposed of, yet the Government of India have particularly asked me to prepare certain sub-accounts showing what sums are due to separate exhibitors, and as these will in no way affect the total sum realised, I have not thought it advisable to keep back the general accounts any longer, but have arranged to complete these minor accounts and send them out as quickly as possible. A good deal of correspondence and account work connected with collections of duplicates ordered fromIndia for various museums and firms will also still have to be attended to.

Correspondence.

34. The permission granted by the Secretary of State for the Official Agent to demi-officially correspond directly with the Revenue and Agricultural Department proved of the very greatest services in contributing to the expeditious despatch of the official business of the Indian Section, as may be seen by reference to the two volumes of correspondence circulated with this Report. In addition to the Indian correspondence, the general Home correspondence connected with the Indian Section has reached a total of about 4,000 letters.

Value of collections.

35. Passing now to the cost of the collections sent from India and the amount realised by their sale, it will be seen by the appended statement B., that the total value of the collections sent, as invoiced, was ₹4,55,818-10-1; but this sum by no means represents the full value of the collections, for many costly loans, such as the Bhaunagar Court jewellery, the Vizianagram *palkis*, *hawdahs*, and trappings, and others, having no invoice price entered against them, could not be included in the total. The same remark applies to most of the exhibits in the Economic Court, which, although individually not of much intrinsic value, yet cost in the aggregate a very considerable sum when the expenses of collecting the specimens are taken into account. Altogether, the collections sent from India may be estimated to have cost not less than ₹5,50,000.

Total amount realised by sales.

36. Deducting the cost of goods returned, or presented in accordance with instructions from India, it will be seen from the statement that the goods remaining to be disposed of were of the value of ₹2,29,823-2-4; and that these realised a total sum of £20,042-4-8, a result which, taking into consideration the fact that the collections were not chosen with the object of realising a profit from their sale, but as being representative of the various manufactures of India, will, I think, be considered satisfactory. A still more favourable result in proportion to the cost of the collections would have been shown by returning to India more of the property which was eventually disposed of by auction; but as my instructions were to strictly keep down the charges for return freight as much as possible, it was necessary to dispose of the goods even at a considerable sacrifice. Before this was decided on, however, every endeavour was made to induce private firms to tender for the undisposed-of goods; but, except for some of the choicer articles, they were all disinclined to offer any prices which I should have been justified in accepting.

Unequal result of the sales of various collections.

37. The various collections have sold very unequally in proportion to their cost, and this it will be seen, is caused solely by their suitability or unsuitability to the English market. As an instance of a collection which sold well, I may quote that from the Punjab, which, while priced at ₹34,860 (after deducting value of returned goods), sold for £4,028—a profit which would more than suffice to pay the freight and actual expenses on that collection.

38. It will rest with the Government of India to determine whether any considerable profit on individual articles should or should not be made over to the exhibitor; but as the paying to any exhibitor a higher price than he asked would inevitably have the effect of raising the price demanded on any future occasion, I would strongly advise that no more than the price originally fixed should be handed over, any surplus being retained towards payment of freight and other expenses, and towards making up the loss on other exhibits.

Profit on individual articles.

39. In order to explain how considerable profits were realised on certain articles, I must refer to the fact that I was instructed by the Government of India to add to all Indian prices an amount sufficient to recover as far as possible, the cost of freight and packing, which was estimated roughly to be about R73,000. The Secretary of State also instructed me to fix such sale prices as would suffice to cover cost, freight, and reasonable administration expenses, without interfering with the ready sale of the goods. The simplest way of doing this would, at first sight, appear to be by adding a uniform moderate percentage all round; but from previous experience of many Exhibition collections, I was aware that a very large proportion of the exhibits would be unsaleable at anything near their cost in India. I was, however, fortunately able to appeal to Sir George Birdwood's intimate knowledge of all such subjects; and it was his opinion that the best course to follow was to be guided by the average value of each exhibit according to London prices, and to fix sale prices, where possible, at a trifle less than the prevailing retail prices. In this manner it was found that while many exhibits were almost totally unsaleable, and could therefore bear no addition to their cost prices, others were able to bear a heavy percentage. The sale prices were consequently fixed by the exercise of judgment, and although in some instances it was found advisable to either raise or lower them, as a rule the prices first fixed held good throughout the Exhibition, and in most instances those articles to which the highest percentage had been added were greedily bought up, and would have been so even had they been still more highly priced. In connection with the above, I cannot sufficiently express my obligation to Sir G. Birdwood for his kind advice and help in this as well as in many other matters of difficulty. During my own severe illness in the spring of 1886 it would have been impossible to keep pace with this branch of work had it not been for his personally devoting himself to the troublesome duty of valuing each object as it was unpacked; in this he was most efficiently assisted by Mr. B. J. Rose, who was temporarily deputed for this purpose by the India Office.

Mode of fixing sale prices.

40. It will be observed by column 5 of Appendix B. and the marginal note attached thereto, that the money remitted to India through the Accountant-General, amounts to £17,565-17-9, and that this amount added to the sums specified in colums 6 and 7, makes up the total realised, *viz.*, £20,042-4-8, as shown in column 8.

Sum remitted to India.

41. As regards the payments specified in column 6, I was instructed by the Secretary of State to make a deduction of 5 per cent. from all sales effected in the Exhibition, and to pay the same to the Royal Commission as a contribution towards the salaries of sales-clerks, and general staff. The sales effected in the Exhibition during the time it was open to the public amounted to £16,700, and the 5 per cent. commission thereon to £835; the commission was not charged on such articles as were sold at reduced prices after the close of the Exhibition. Here I may remark that, with the exception of £1,150 allotted by the Government of India to meet sundry contingent expenses, this sum of £835 is the only amount which was paid out of Indian revenues towards the salary of the staff of 62 persons, in addition to workmen, employed by the Royal Commission in the Indian Section, and towards the cost of installation of the very large collections, and that the cost must of necessity have been immensely greater if the plan, so economical to India, of entrusting the management to the Royal Commission, under the energetic direction of Sir Philip Cunliffe-Owen, had not been followed.

Percentage paid to the Royal Commission.

42. The deductions specified in column 7 are made up of customs and auction charges, return freight, salaries advanced to Native officers, and sundry small items as specified in Appendix A. It will be for the Government of India to decide in what manner these sums are finally to be debited, but so far as possible I have endeavoured to allot to each provincial account such proportion of the charges as appears to be fairly debitable to that account. I will therefore only briefly allude to the principal items.

General deductions.

43. Customs duty was payable on all gold and silver plate, and also on tobacco and spirits; the amount paid on the latter was trifling, and was due to the fact that samples were distributed with a view to ascertaining the commercial value of the various specimens. As regards gold and silver plate, all such goods after being weighed by the Customs officer on arrival, were treated as being in bond for the period of the Exhibition, duty having to be paid on all pieces which were not forthcoming and packed for return under Customs sale at the close of the Exhibition.

Customs duty.

Personal ornaments and filigree work were exempted from duty; but the difficulty of disposing of the plate did not cease with the Customs officer's visit, for it was then necessary to take out a "License to deal in Plate," and also to obtain exemption from Hall-marking. This was only done by sending typical specimens of the different classes of silver goods to the Board of Customs for examination, and by claiming exemption from Hall-marking on the ground that the plate in question was of oriental pattern. This claim was admitted, except in a few instances where the specimens, being only of plain unornamented silver, were not considered by the Board as coming under the description of "oriental pattern." A small quantity of the silver goods remaining unsold at the close of the Exhibition were disposed of by auction, but the prices realised did not make it advisable to pay duty on the remainder and offer them for sale; they were therefore returned to India.

44. The sums advanced to Native officials on account of salaries and allowances amounted to £422-18-2, as shown by my account and vouchers forwarded to the Government of India in December 1886. This amount has been deducted from the sales proceeds under authority of the Secretary of State, and its final adjustment will be dealt with by the Government of India.

Advances to Native officials.

45. I had instructions from the Government of India to keep the charges for return freight as low as possible, and therefore only loans, private property, and a few of the more valuable exhibits were returned. The total charges for return freight were £288-19-2, which sum has been as far as possible apportioned to those places to which goods belonged. The cost of packing was defrayed by the Royal Commission.

Return freight of Exhibits.

46. The total auction charges amounted to £415-13-3, a sum which is rather heavy in proportion to the low prices realised, but it must be borne in mind that the goods disposed of by auction were to some extent the refuse of the collection, consisting of such articles as the public had not cared to buy during the Exhibition. It had been my wish to dispose of the whole surplus collection in one sale, but Messrs. Christie, Manson & Woods, to whom I first applied, could not spare a sufficient time unless we had waited until a much later date. They therefore disposed of the greater portion of the more valuable goods, the remainder being sold a little later by Messrs. Edmund Robins & Hine. It being impossible to move the carved screens, they were included in the sale of the building and materials held by order of the Royal Commission by Messrs. Horne, Son & Eversfield.

Auction charges.

I now proceed to make a few remarks on the collection sent from each province in the order in which they appear in the general statement, Appendix B.

Sales accounts.

47. The invoice value of the Madras collection after deduction of the value of returned and presented goods was R12,594-3-3, and it realised £1,260-5-3. The collection was very fairly representative of the less costly manufactures of the Madras Presidency, and arrived in excellent condition—a distinctive colour for the boxes, each of which was marked externally so as to show its contents, making it perfectly easy to single out and unpack the particular exhibits required, and remove them at once to their allotted position; a carefully and neatly prepared printed catalogue was also sent. This collection would have realised a much larger sum but for the fact that the Madras Government wished a large selection of articles representing the various classes of manufactures to be reserved for the Government Central Museum, and thus the collection for sale was much reduced.

Madras.

48. The value of the contributions from Vizianagram is not known; they consisted of arms, costly *palkis*, and *howdahs*, plated with silver gilt, lent by H. H. the Maharaja of Vizianagram. Some of them were not very carefully packed, and had therefore become broken and damaged *en route*. Instructions to present these to the Imperial Institute have just been received; but they had already, in January last, been returned through the Madras Committee.

Vizianagram.

49. The Bombay collection is treated for purposes of account as including Bhaunagar, Kutch, and Sawantwári, and its value, after deductions for goods returned and presented, was R36,967-13-5; it realised £3,618-3-6. But it must be observed that the gross value

Bombay, Bhaunagar, Kutch, Sawantwári.

was very much higher than is shown in the accounts, as no value is inserted in the invoices for the costly Bhaunagar Court jewellery and trappings lent by H. H. the Thakur Sahib, and returned to India. The collection arrived in good order, and the invoices were very carefully prepared, but the stock of silver goods sent was so large—supplemented as it was by the Antwerp Exhibition collection—that a great deal had to be returned, as it would have been necessary to pay the Customs duty of 1*s.* 6*d.* per oz., before it could have been sent to auction, and it did not appear probable that the prices realised at auction sale would be sufficient to justify this expenditure.

Antwerp Exhibition.

50. The remains of a collection sent from Bombay to the Antewerp Exhibition of 1885 were sent from thence to London for sale. It consisted mainly of arms, silver goods and agates which had proved unsaleable in Antwerp and had naturally lost a great deal of their original freshness. As the cost prices were inserted in francs on the labels which accompanied the exhibits, it is difficult to be certain of the original cost—especially as on comparing the prices with those of similar articles received direct from Bombay, the Antwerp prices appeared to be in most instances higher. I have been unable to make the list of these goods precisely tally with the list received from Antwerp, but for the sake of uniformity in the accounts I have converted the total into rupees at an assumed exchange of francs 1·80 per rupee; this, after deducting the value of returned goods, makes a value for sale of R6,968, and a price realised of £463-19-11.

Baroda.

51. The principal portion of the Baroda collection consisted of valuable carvings and silver goods, some of which were presented by H. H. the Gaekwar to the Imperial Institute and some returned; the invoice value of the remainder was R7,241-14-4, and the sum realised was £478-6-11. The oss was caused by the poor prices realised for many of the exhibits at the auction sales. Being in some doubt as to what portions of this collection ought to be returned, I consulted Major-General Sir John Watson, K.C.B., V.C., who recommended that in order to keep the return freight charges low, only the more valuable exhibits should be returned and the remainder disposed of.

Bengal.

52. Considerable difficulty has been experienced in arriving at the value of the Bengal collection, and in ascertaining whether everything is accounted for, owing to the fact that the invoices were not received from India in the regular rotation of the numbers, but each invoice contained many items in no numerical sequence. I have found it necessary to bring them as far as possible into rotation in the general account, from which, if desired, all articles belonging to one exhibitor an subsequently be extracted, and an account prepared showing what sum is due to each. I find that after deducting the value of returned and presented goods, the collection for sale was valued at R23,197-11-4 and sold for £1,209-3-11. The loss is principally accounted for by the unsaleable character of the two screens which, while invoiced as costing more than R10,000, only fetched £62 at the auction.

North-West Provinces and Oudh.

53. The same plan had been adopted with the North-West Provinces invoices as with those from Bengal; I have therefore similarly brought the entries as far as possible into numerical rotation, leaving the accounts of individual exhibitors to be prepared later. After deducting the value of returned and presented goods the cost of those sold was R16,114-12-0 and the amount realised £1,639-15-7. This shows a very fair result, owing to the fact that the collection contained a large proportion of saleable goods such as are in general demand in England.

Punjab.

54. The Punjab collection was in most respects particularly adapted to the requirements of the English market, consisting as it did in great part of ornamental pottery, *koftgari*, arms, carpets and carvings, all of which were suitable for use in ordinary houses, the result being that the greater part sold readily at a good profit. Thus while the invoice cost of the portion sold was R34,860-11, the sum realised was £4,028-0-3. The only goods found unsaleable and therefore returned, were the more expensive embroideries; of nearly all the other goods considerably larger quantities than were sent could readily have been sold.

North-West Frontier.

55. The small North-West Frontier collection cost R1,156 and realised £83-0-4; this account has been added at the end of the Punjab account.

Central Provinces.

56. The Central Provinces collection cost R5,687-3-9, and sold for £287-8-8; the loss was on the screen, the Government of India portion of which cost R2,254 and sold for £97, and on several expensive embroideries and textile fabrics which were quite unsuited for ordinary use and were sold by auction.

Burma.

57. The Burmese collection, after deducting the value of returned goods, cost R8,835-15-6 and realised £804-15-4. The exhibits in general sold well, but there was a loss on the carved wood-work and on some of the textile fabrics.

Assam.

58. The Assam collection cost R4,128-3-5 and realised £218-0-5; the loss was caused mainly by a large proportion of the goods having to be disposed of by auction. The only instance of a case having been lost or even seriously damaged during transit occurred in connection with this collection. The case in question, No. 58, appears to have been lost or stolen during transit from the Docks to South Kensington, and although all possible means were taken to trace it, they were unsuccessful. The case not having been specially insured, it was only possible to recover £10 from the carriers, that sum being the extent of their liability; the amount is credited in its proper place in the Assam accounts.

Rajputana States. Jaipur.

59. The most important and attractive of the collections from the Rajputana States was that from Jaipur, which was particularly suitable for sale in England; but as the screen and many of the most valuable models were presented to the Imperial Institute, and to different museums, in accordance with instructions, and as the majority of the goods remaining unsold at the close of the Exhibition were returned, the collection actually disposed of only cost R14,488-3-3 and realised £1,570-7-7. An important collection of models of vehicles, buildings and astronomical instruments was presented to various museums on condition that they offered some suitable return presents to the Jaipur Museum; a list of such presentations has been separately forwarded to India.

Bikanir.

60. Bikanir, in addition to some valuable loans, which were returned, sent a collection valued at R3,668-12-4, which realised £167-16-9; the loss was incurred on the screen and on goods sold by auction.

Kotah.

61. The Kotah collection, after deducting the value of the screen which was presented to the Imperial Institute, cost only R499-9 and sold for £30-1-11.

Jhallawar.

62. Jhallawar sent a few objects which, with one exception, were presented to the South Kensington Museum.

Western Rajputana States.

63. The Western Rajputana States, including Jodhpur, Sirohi and Jeysulmere, sent small collections, which, after deducting the value of the Jodhpur screen, which was presented to the Imperial Institute, cost R1,938 and realised £150-19-10.

Meywar.

64. The Meywar collection not being of a saleable description, was used in the Ethnological collection, which was eventually made over to the Imperial Institute.

Ajmere.

65. From Ajmere came a small but attractive collection, which cost R537-2 and realised £67-16-1.

Alwar.

66. The Alwar collection contained many loan objects which were returned, and the remainder for sale cost R3,916-8 and realised £143-11-5. As the proceeds of this collection were to be paid over to the Countess of Dufferin's Fund, special efforts were made to obtain a fair price for the ornamental marble screens, but they were not very suitable for use in houses and only realised at auction a sum of £76. After payment of the expenses, the balance of £116-10-5 has been paid to Messrs. Coutts & Co., to credit of the fund, as shown in the statement.

Harowti and Tonk.

67. From Harowti and Tonk came a small collection, valued at R251-5, which sold for £37-2.

Bhurtpur, Dholpur and Karauli.

68. Bhurtpur, Dholpur and Karauli sent a small collection which cost R2,821-7 and fetched £83-3, the loss being on the screen and on goods sold by auction.

Central India.

69. From the Central India States came a collection, which, after deducting the value of goods presented and returned, cost R4,540-10-1 and realised £255-12-11; the loss was entirely due to the unsuitability of most of the goods to the English market and to the poor prices realised at auction.

70. The Hyderabad collection was important and very attractive; several of the more valuable exhibits were presented on behalf of H. H. the Nizam to members of the Royal Family and others, by Major Nevill, and after deducting the value of these and of returned goods, the value for sale was R16,992-4-3, and the sum realised £911-13-11, the loss being principally on the screen. It was found necessary to return nearly all the Hyderabad carpets and rugs, as they were totally unsaleable owing to the prevalence of aniline dyes in all of them; the Bidri also did not find nearly so much favour as that from the North-West Provinces and Bengal, and a great deal of it was therefore returned.

Hyderabad.

71. From the Mysore collection also a good many articles were presented on behalf of the Maharaja to members of the Royal Family and others, by Colonel LeMessurier, some of the more costly unsold exhibits were returned, and the remainder, which were of a very saleable description, cost R6,488 and realised £621-9-9.

Mysore.

72. The Coorg collection, not being suitable for sale, was used in the Ethnological collection, and was afterwards presented to the Imperial Institute.

Coorg.

73. From Nipal the collection for sale cost R3,175-3-2 and realised £114-3-6, the loss being on costly dresses and head-ornaments, which were quite unsuitable for sale, and were disposed of by auction.

Nipal.

74. The Kashmir collection was small, but was very much admired and greedily bought up; the only unsaleable articles were some sapphires, said to be far too high in price, and one massive silver tray which it was found better to return rather than pay the Customs duty on it. The remainder of the collection cost R8,073-4 and sold for £1,069-2-11.

Kashmir.

75. Of the Silk Culture Court collections I am not able to render an account in precisely the same form as for the other exhibits, because the goods for this Court, in all instances, went direct to Mr. T. Wardle, were arranged by him, and the proceeds of sales paid to me by the clerk placed at his disposal by the Royal Commission. I therefore send in the account as rendered by the Silk Culture Court clerk with the addition of such goods as were sold by auction, from which it appears that the value of goods other than Royal Commission property in the Silk Culture Court was R4,670-6, and the sum realised was £293-2-3, of which sum £62-19-3 is still due by Mr. Wardle for goods purchased by him at the close of the Exhibition at his own valuation as marked in the account.

Silk Culture Court.

Respecting this account I understand from Mr. Wardle that he paid for the whole collection, and that he only received from the Government of India a sum of £150 towards it.

The following is the statement he sends me:—

	£	s.	d.
Cost of goods exhibited, R4,670-6 equivalent at 2s. per rupee, to	467	0	9
Payment to Wolland Pros.	1	9	4
Total	468	10	1
Deduct sum paid by the Government of India to Mr. Wardle	150	0	0
Balance due to Mr. Wardle	318	10	1
Less sum due by him for goods retained	62	19	3
Balance still claimed by Mr. Wardle	255	10	10

Mr. Wardle adds that the reason why he has charged 2s. per rupee is to cover considerable expenses of carriage, &c., which were incurred in bringing the goods from the interior of India.

I have not felt empowered to pay this sum to Mr. Wardle without the sanction of the Government of India, and can only recommend his claim for favourable consideration. There can be no doubt that Mr. Wardle has rendered most important services to the Indian silk industry, and apart from this, it appears only just that his personal outlay on the collection should be, as far as possible, reimbursed.

76. It is not possible to give with any approach to accuracy the cost of the collections exhibited in the Economic Court. The intrinsic value of most of the exhibits was not large, but the expenses incurred in getting together and preparing the specimens, and the interest for commercial and scientific purposes of so complete and magnificent a collection of natural products and ethnological illustrations, gave to them a value quite beyond comparison with their original cost. The

Imperial Economic Court.

sales in this Court of small exhibits, such as pottery, cheap rugs, durries, mats, baskets, &c., realised about £110; but all the items, excepting a very few, have been entered in their proper provincial accounts, the remainder being credited under the head of sundries.

77. As regards the mode in which the collections were dealt with, I received instructions to allow the Kew authorities to select samples of all such produce as they required to complete their collection, and also to make over to the Cooper's Hill College a considerable number of specimens. This was done under the direction of Dr. G. Watt, who also, before his return to India, prepared, and named collections of samples of produce for the following places, *viz.*, Agricultural College, Cirencester; Bradford Technical College; Harvard University; Edinburgh University; Owen's College, Manchester; Canterbury Museum, New Zealand; Botanical Garden, Ceylon; Edinburgh Economic Museum; Edinburgh New Veterinary College; the French Government the Stockholm Royal Academy of Sciences. These collections were despatched to their destinations, and sums, amounting in all to £55, were recovered from some of the recipients towards the expenses of preparing them. This amount is credited in the account of the disbursement of the sums received from the Government of India through the India Office for sundry expenses. The remainder of the collections in the Economic Court were offered to the Imperial Institute, but the Organising Committee were not prepared to find storage room for large quantities of inflammable materials, such as fibres, timbers, resins, and other raw produce, all of which, except the Index collection, were consequently made over to the London Chamber of Commerce for use in the proposed City of London Commercial Museum.

Distribution of Samples.

78. A sum of £434-0-9, for sundries appears at the end of the general statement (Appendix B.) among the receipts as per details shown in the margin. Several of the items, such as sales in Imperial Court, sale of packing-cases, materials of trophies, &c., require no remarks; but a sum of £207-1-10, is entered for miscellaneous sales not entered in other accounts, of which the following is the explanation. In going through the rough sales books a few items have been found entered with numbers and descriptions which were evidently wrong, and could not be posted to their proper places in the accounts. In the auction sales accounts such was the case with a good many items, but this was entirely caused by the auctioneers themselves, for the greatest care was taken to write down the number and description of every article sent to auction with the lot number against it. The auctioneers showed much opposition to this course from the commencement of the work, and could not be made to understand its importance, and after they had removed the various lots from the Exhibition, they re-arranged many of them without keeping any note of the alterations. It consequently became impossible after the sale to trace what had been realised for certain articles, although it was possible from memory to trace many of them; as regards the remainder, the only course open to me was to credit in a lump sum all proceeds which could not be referred to their proper accounts.

Sundries and Surplus.

Account of Sundry Sums Received for the Government of India.

	£	s.	d.
By Sale of Sundry Small Objects in the Imperial Court	3	10	0
By Sale of Packing Cases	71	10	7
„ of Materials used for Grain and Timber Trophies, &c.	63	15	0
By Sale of Andaman Timber	26	0	0
„ of Hand-books	16	8	4
Received from M. Bigex for freight of a Carpet	2	0	0
Received from Royal Commission for freight of Cocoons	2	10	2
Received from H. S. King & Co. refund of Silver Duty	12	2	0
Interest on Bank Deposits	31	10	10
By Surplus received for various articles sold with incorrect numbers	204	11	10
	434	0	9

79. It will be observed that a few articles in the various accounts are entered as missing, and I would suggest that, if the Government of India approve of such a course, this surplus sum, or a part of it, should be employed to compensate *pro ratâ* the owners of any exhibits not duly accounted for.

Missing articles.

80. A sum of £31-10-10, is credited for interest on Bank Deposits: this sum would have been larger but for the fact that I only retained at the Bank a sufficient amount to meet contingencies, paying all other receipts to the Accountant General at the India Office in sums of £1,000 each as often as the available balance exceeded that amount.

Interest on Deposits.

81. The total cost of the ornamental screens, including freight, appears to have been R1,05,481-12-6; of which sum the equivalent of R33,989-5-5 was paid by the Royal Commission. The amount realised for these screens was materially influenced by the uncertainty which prevailed up to the last as to whether a permanent Exhibition of any kind was to be retained at South Kensington, and as it was considered desirable that, in that event, the screens should be kept together, it was impossible to sell during the Exhibition any of the smaller screens which would have realised good prices. Eventually, when it was decided that only a few of the screens should be

Screens.

retained for the Imperial Institute, it was too late to sell most of the remainder to advantage, and the majority were sold by auction. The total realised was only £2,180-10, of which sum £1,362-10-10, was for portions bought out of the Royal Commission grant. The remainder, £817-19-2, is credtied in the various provincial accounts.

Catalogues and Hand-books.

82. The special catalogue of Indian exhibits was compiled by Mr. E. J. Wade, of the India Office Library, from materials supplied by the Government of India and the various provincial Committees, and was published at the expense of the Royal Commission, to whom the accounts connected with its sale have been rendered, but the following books, *viz.*, "Statistical Atlas of India," "Photographs of Madras and Burmese Art-ware," and a "Handbook of the Jaipur Courts," were sent from India for sale and were obtainable by the public at the book-stalls. The sale was, however, very limited, for as regards the two former works, both their large size and high price—10*s.* and 35*s.*, respectively, made them unsuited for purchase by the ordinary visitors to the Exhibition, while as regards the latter, people were disinclined to pay for hand-books to the minor Courts of the Exhibition, but contented themselves with buying one of the general catalogues. The small sum realised by sales of these books, £16-8- 4, is credited among the sundries, and the remaining stock of books has been handed over to the care of Mr. F. C. Danvers, Registrar and Superintendent of Records, India Office. A stock of Volume I of Dr. Watt's "Dictionary of the Economic Products of India," was also received from India, but the volume was subsequently withdrawn from sale until the completion of the work, and the stock is retained at the India Office.

Photographs.

83. A special series of numbers of the *Indian Art Journal*, in illustration of some of the more striking exhibits, was brought out by Mr. Griggs, under the patronage of the Government of India, during the course of the Exhibition. In consequence of an arrangement made with Sir E. C. Buck, in order to facilitate the ordering of duplicates of art manufactures, a series of photographs of such exhibits as were most in demand was taken by Mr. Griggs, and the invoice numbers of the objects inserted on each photograph. A set of these photographs is retained at the India Office; another set, by Mr. C. Purdon Clarke, C.I.E., at the India Museum, South Kensington, and a third set was forwarded to the Revenue and Agricultural Department of the Government of India. Several duplicate collections of art manufactures have been supplied to museums by aid of these photographs.

India Office Grants.

84. Although, as already mentioned, the expenses of the general administration of the Indian Section were met by the Royal Commission, yet two sums, *viz.*, one of £50 and one of £1,150, were granted by the Government of India and paid through the India Office for the purpose of defraying special charges. The former sum was devoted exclusively to the payment of the cost of scientific experiments connected with Indian vegetable fibres, the result of which will be published in the special report now being prepared by Dr. Watt and Mr. C. F. Cross, and the latter sum to meeting sundry charges connected with the Imperial Economic Court, cost of photographic work, and a few other matters as detailed in the account, with vouchers, for this expenditure submitted separately through the India Office.

85. The foregoing remarks will, I think, with the aid of the detailed MS. accounts, sufficiently explain how the various collections have been dealt with. But it may not perhaps be considered out of place if I here draw attention to one remarkable fact in connection with the Indian Section of the late Exhibition, namely, the liberal manner in which the Native Princes and private exhibitors throughout India contributed to its success. It can be said with truth that on this occasion it was the contributions of the Native Princes which were the making of the Exhibition; and if their services in this respect are suitably acknowledged, there can be no doubt that the example they have set will, on any future occasion, find many imitators; it would in that case be possible for the Government of India to follow the course adopted by European Governments, and to limit their action to merely directing the efforts of private exhibitors, securing reduced rates of freight, and providing an expert staff for carrying out the necessary arrangements in Europe. It has always been difficult to induce the manufacturers of India to take any part in Exhibitions, but it is to be hoped that the favourable terms on which the collections forwarded by private manufacturers were disposed of on this occasion will encourage them to contribute even more largely in future, and so relieve the Government of India from the necessity of incurring any large expenditure on International Exhibitions which may receive their countenance.

J. R. ROYLE,
Official Agent for the Government of India at the Colonial and Indian Exhibition, 1886.

CIVIL WORKS.

Irrigation.

ADMINISTRATION REPORT OF IRRIGATION WORKS IN THE MADRAS PRESIDENCY FOR 1886-87.

No. 39 I., dated Calcutta, the 22nd February 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1886-87.

OBSERVATIONS.—The Budget grant, Revised Estimate, and Direct Capital Outlay are shown in the following statement :—

	Number of works on which expenditure was incurred.	Budget grant.	Budget Estimate.	Direct expenditure of the year.	Total expenditure to end of year including indirect charges.
		Rs.	Rs.	Rs.	Rs.
MAJOR WORKS.					
Productive Public Works .	8	15,05,000	12,87,088	9,82,833	5,04,92,739
Protective Works (Rushikulya Project)	1	2,80,000	2,39,410	2,22,317	7,02,873
MINOR WORKS AND NAVIGATION.					
Ordinary Irrigation Works for which Capital and Revenue Accounts are kept .	12	5,27,000	4,88,827	4,65,579	1,13,75,968*

** Exclusive of expenditure on projects and on some works of which the capital accounts are not yet compiled.

The figures for Minor Works and Navigation include a grant-in-aid from Protective funds for the construction of the Buckingham Canal. The large lapses in the expenditure of the grants for Major Works occurred chiefly on the Godaveri and Kistna Delta Systems and on the Barur Tank Project. In the Godavari Delta the short outlay is said to be due to the attention of the establishment being fully taken up in repairing damages caused by floods; in the Barur Tank Project the construction of certain works was deferred. The lapse under the head of Major Works was Rs. 5,80,000, or 32 per cent. of the Budget grant.

2. The total of the direct and indirect Capital outlay on Productive Public Works amounted at the close of the year to Rs. 5,04,92,739, including the purchase money of the Kurnool Canal; the gross revenue, after deducting the portion due to old irrigation, was Rs. 43,28,358; the maintenance and collection charges amounted to Rs. 13,14,389; the net revenue was therefore Rs. 30,13,969, giving a return of 5·96 per cent. on the Capital outlay. In the previous year the similar return on outlay was 5·77 per cent. These figures include the Kurnool Canal, which is unremunerative, and the Barur Tank, which is not in operation. The Capital of the other Productive Public Works amounts to Rs. 2,85,55,316, and the net revenue derived from them in 1886-87 was Rs. 31,37,739, or 10·98 per cent. on the Capital invested.

3. In the following table are given the more important items of information for the Productive Irrigation Works in operation:—

Systems.	Capital outlay, direct and indirect.	Acres irrigated.	Revenue from all sources.	Charges including collection.	Net revenue.	Percentage of Net Revenue on Capital outlay.
	Rs.	Acres.	Rs.	Rs.	Rs.	
Godavari Delta .	1,23,30,479	598,286	19,81,163	6,10,712	13,70,451	11·11
Kistna . . .	79,21,264	337,419	12,34,407	4,00,223	8,34,184	10·53
Cauvery . .	17,75,829	1,006,626	7,38,212	41,453	6,96,759	39·23
Penner Anicut .	17,42,885	63,480	1,33,853	18,871	1,14,982	6·59
Srivaikuntham .	14,29,508	40,078	1,13,450	23,533	89,917	6·29
Kurnool Canal .	2,16,55,457	22,676	65,964	1,89,734	—1,23,770	...
Sangam Anicut .	33,55,351	47,421	61,309	29,863	31,446	0·93
Total .	5,02,10,773	2,115,936	43,28,358	13,14,389	30,13,969	...

The figures of money given in this statement refer only to the new works, but the area irrigated includes both the old irrigation that existed before these works were undertaken and the new irrigation, and is inclusive of both the first and second crops. The total area occupied for irrigation in the year was 2,002,195 acres, of which 1,960,610 acres were effectively irrigated in the first crop and 155,326 acres in the second, making the total of 2,115,936 acres shown above. In the previous year the total area irrigated by these same works was 2,098,223 acres, made up of 1,943,025 acres first crop and 155,198 acres second crop.

4. The following figures show the progress of irrigation from the above systems during the last three years:—

		Acres.	Irrigation Revenue. Rs.	Rate per acre.
1884-85	First crop .	1,666,865	52,54,870	3·15
	Second „ .	126,830	3,23,020	2·55
		1,793,695	55,77,890	
1885-86	First crop .	1,943,025	61,19,049	3·14
	Second „ .	155,198	3,89,877	2·51
		2,098,223	65,08,926	
1886-87	First crop .	1,960,610	62,00,974	3·16
	Second „ .	155,326	4,03,446	2·59
		2,115,936	66,04,420	

5. The following statement shows the principal facts connected with the Minor Irrigation Works for which Capital and Revenue Accounts are kept:—

Systems.	Capital outlay, direct and indirect.	Acres irrigated.	Revenue from all sources on new works.	Charges including collection.	Net Revenue.	Percentage of Net Revenue on Capital outlay.
	Rs.	Acres.	Rs.	Rs.	Rs.	
IMPERIAL.						
Chambrambakam Tank	7,36,589	19,402	41,263	5,368	35,895	4·87
Palar Anicut . .	17,88,379	89,763	1,29,199	50,321	78,878	4·41
Palandorai Anicut .	4,31,869	3,632	6,097	14,640	—8,543	...
PROVINCIAL.						
Madras Water-supply .	17,54,045	9,684	22,998	42,799	—19,801	...
Buckingham Canal .	66,65,086	*Nil*	60,949	1,12,901	—51,952	...
Total .	1,13,75,968	122,481	2,60,506	2,26,029	34,477	...

The total area irrigated by the Minor Works given in the above statement was made up of 89,571 acres of first and 32,910 acres of second crop, the area occupied for irrigation being 90,251 acres. The results obtained from this class of works was more favourable during the year under review than in the previous one. Both of the Provincial systems suffered considerably from the cyclone which occurred on the 9th November 1886.

6. The Minor Irrigation Works for which Capital and Revenue accounts are not kept, are sub-divided into three classes, as shown in the following statement:—

Classes.	Acres irrigated.	Irrigation revenue.
	Acres.	Rs.
Works for which a continuous record of expenditure is kept individually	477,522	17,53,745
Works for which a continuous record of expenditure is kept collectively	1,340,083	35,24,259
Minor Irrigation Works	1,667,621	37,40,003
Total .	3,485,226	90,18,007

the total area irrigated was made up of 2,688,228 acres of first and 796,998 acres of second crop.

7. The total area irrigated by all the works in Madras in 1886-87 may be thus stated:—

	First crop. Acres.	Second crop. Acres.	Total. Acres.
Major Works . . .	1,960,610	155,326	2,115,936
Minor Works (of which Capital and Revenue Accounts are kept)	89,571	32,910	122,481
Minor Work (of which Capital and Revenue Accounts are not kept)	2,688,228	796,998	3,485,226
Total .	4,738,409	985,234	5,723,643
Corresponding figures of 1885-86 .	4,621,430	964,877	5,586,307

The increase in the area of irrigation extended with fair uniformity over all the different works.

8. The River Godavari rose above the crest of the Dowlaishweram Anicut on the 7th June 1886, and remained above that level until the 22nd March 1887: the river remained above the crest a month longer than in the previous year. The highest flood on record occurred in the river in August 1886; the river commenced to rise rapidly on the morning of the 18th: by the 19th there was 11·9 feet of water passing over the crest of the Anicut: on the morning of the 21st it had reached its greatest height, 16·9 feet over the crest. This is 1·65 feet higher than the highest flood previously recorded, which occurred in 1861. The flood of 1886 remained for two days-and-a-half above the level of the flood of 1861 and then fell rapidly.

9. Considerable damage resulted from this extraordinary flood. The head lock at Dowlaishweram was destroyed. A breach 625 feet wide occurred in the river embankment, and considerable damage was done by the water, which flooded the country in the neighbourhood; the canal banks were breached in many places in all the three sections of the Delta. One lock weir was destroyed in the central section, and a large surplus sluice situated in the left embankment of the river some miles above the anicut, which had been constructed in 1885, at a cost of Rs. 34,910 was swept away. The water passing through the breach did damage to buildings in the neighbourhood of Rajahmundry. The great scouring sluices at Dumagudem, on the Upper Godavari works, which cost originally more than 1½ lakhs of rupees, were destroyed. Some 23,089 acres of crops were destroyed by the floods.

10. There was no unusual rise in the Kistna River; but very heavy rainfall in August and October 1886 damaged the Ellore and Commamur Canals of the Kistna Series. There was ample water both for irrigation and navigation in these canals, and the year, on the whole, was a favourable one.

11. The rivers which supply the other Major Works were subject to no unusual floods, which were in all cases considerably below the maximum levels. The Penner river failed for some days in September 1886 to give a sufficient supply to the Sangam Anicut System. The Kurnool Canal was breached in several places by excessive rainfall and by an overflow of the Kundari River. The closing of one of the largest breaches cost more than Rs. 10,000.

12. The Kurnool Canal continues to be extremely unpromising in its progress; the area irrigated by it remains practically the same. Concessions have been made which comprise provision of water free of charge for five years, then at half rates for five years, after which full rates will be charged. Considerable reduction in rates is also made in the case of dry lands which have not been irrigated for ten years back. Under these concessions, 3,348 acres of waste land in Kurnool and 1,705 acres in Cuddapah were brought into cultivation.

13. The following table shows the chief statistics of navigation on the canals in Madras:—

Canals.	Length of navigable channel.	Navigation Receipts.	Value of goods	Ton-mileage.
	Miles.	Rs.	Rs.	
Godavari Canals	456	86,893	1,25,33,511	6,345,757
Kistna „	281	24,045	1,17,39,140	8,663,014
Kurnool Canal	190	4,578	4,04,160	197,300
Buckingham „	262	56,895	1,13,76,892	16,353,348
Total .	1,189	1,72,411	3,60,53,703	31,559,419
Corresponding figures of 1885-86 .	1,182	1,75,348	3,72,93,656	35,669,897

There has been a falling off in the traffic on all the canals as compared with the previous year, although the receipts on the Buckingham Canal were slightly larger. The working expenses of all the navigable canals is considerably in excess of the receipts. The Buckingham Canal, which is purely a navigation canal, was worked at a net loss of Rs. 51,952; this result is, however, considerably better than that obtained in the previous, or from an average of the past three years.

14. The areas irrigated by the Chembrambakam Tank, the Palar Anicut System, and the Palandorai Anicut System shewed a slight increase in all cases. All these works shewed greatly improved financial results, owing to a considerable reduction in the cost of maintenance. The last system, however, is still worked at a loss.

15. The final grant for Minor Works and Navigation, for which neither Capital nor Revenue Accounts are kept, was Rs. 18,50,448, and the direct expenditure was Rs. 18,08,038. The total expenditure was Rs. 16,593 in excess of that of the previous year. Excluding the old maintenance charges of works for which Capital and Revenue Accounts are kept, the expenditure amounted to 16·19 per cent. on the irrigation receipts. This result shews an improvement in the corresponding figures of the previous year and a large improvement on that of the year 1884-85.

16. The direct outlay on agricultural works in 1886-87 was Rs. 3,71,884, and the allotment Rs. 3,77,008. The outlay in 1885-86 was Rs. 3,91,306.

17. The final grant for Protective Works amounted to Rs. 3,89,410. The expenditure on the Rushikulya Project was Rs. 2,22,317, and on the Buckingham Canal Rs. 1,42,822, and the total outlay during the year Rs. 3,65,139.

18. The designation of the work of investigating the requirements of the tanks in Madras has been altered from the "Tank Maintenance Scheme" to the "Tank Restoration Scheme." Estimates for improvements, aggregating Rs. 3,64,236, were prepared during the year, and Rs. 4,66,886 were actually expended against a grant of Rs. 4,79,700. The money was chiefly utilised on the reconstruction of old anicuts, and on the construction of minor weirs and sluices.

19. The average rainfall over the whole Presidency was 38·89 inches as against 34·42 inches in 1885-86. There were 14·27 inches in the north-east and 24·62 inches in the south-west monsoons. From May to October 1886 the rainfall was abundant and seasonable, but the north-east monsoon was generally deficient, except in the four northern districts and in Kurnool, where the fall was excessive. Considerable damage was done to various works in the districts of Vizagapatam, Godavari, and Kurnool. An unexpected freshet in the Vellaur River in March 1887 carried away three courses of the body wall of the Palandorai Anicut, which had been breached in December 1884 and was under repair.

ORDER.—Ordered that copies of this Resolution be forwarded to the Secretary of State for India, and of the Resolution and Report to the Departments of Finance and Commerce and Revenue and Agriculture, for information.

Also that copies of this Resolution be forwarded to the Government of Madras for information.

Also that a copy of the Resolution be forwarded to the Local Governments and Administrations marginally noted, for information.

The Governments of Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department.
The Chief Commissioner of the Central Provinces.
The Agent to the Governor General for Rajputana.

Also that a copy be forwarded to the Publisher of the *Gazette of India*, for publication in the Supplement to the Gazette.

Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending Feb. 15th, 1888.

During the past week the weather has been unsettled.

On the 9th the barometer was falling throughout India, and slight local depressions were visible near Khandwa and between Raipur and Cuttack. A south-easterly current prevailed in the North-Western Provinces, while around the depressions, the wind showed a feeble cyclonic circulation, and rain in small amounts was falling in parts of the Punjab, the west of the North-Western Provinces, and snow and rain on the hills of the North-West Himalaya. On the 10th the chart showed that the depression, which lay between Raipur and Cuttack yesterday, had either filled up or travelled into Bengal, where now existed a well-marked depression, with its centre near Dacca. At the same time fresh but slight depressions had appeared—one in Sind and one in Hyderabad. The skies became overcast in the Punjab, Bengal and at the hill stations, and a general and rather heavy rain was reported from Bengal. The largest amounts registered were 1½ inches at Saugor Island and Calcutta, and over 1 inch at Burdwan and Darjeeling. On the following day the depression over Bengal had disappeared, and the barometer risen quickly over that province and in Assam. A large low-pressure area, with its centre apparently near Kurrachee, was overlying Lower Sind, Guzerat and Central India, and occasioning a considerable fall of the barometer over that region and its neighbourhood. Besides, slight depressions were also shown along the foot of the North-West Himalaya, over the Bombay, Deccan and near Raipur. Except at Kurrachee, where a moderately strong easterly current was blowing, the winds were exceedingly variable in their directions and the weather showery in Bengal and Assam. On the 12th the chart showed that the low-pressure area had enlarged and was now overlying North-Western India, Guzerat and the Central Provinces. Winds, whilst remaining variable, being influenced by the low-pressure area, had strengthened at Goa and Belgaum; and sporadic showers of rain had occurred at Sibsagar, Darjeeling, Jeypur and Gopalpore. During the following 24 hours, the barometric depression assumed a definite though irregular shape, and extended from Sind eastward across the central parts of the country as far as Orissa. The winds, although blowing with a high force at a few stations, were still irregular in their directions. The skies were overcast in the Upper Assam Valley, at the head of the Bay, and in the Kumaon hills, and fairly general rain fell in Bengal, the North-Western Provinces, and the Central and North-Western Punjab, and snow on almost all the hills. The principal amount of rain (0·80 inch) was reported from Dacca, while the undrifted snow at Murree and Mussooree measured about five inches in depth. By 10 A. M. of the 14th, the low-pressure area had extended to the North-Western Provinces and Bengal, and now covered a well-defined tract represented by Northern India, Orissa, the central parts of the country and the Deccan, with its centre somewhere to the east of Seoni. The distribution of pressure was still abnormal over a large part of the country. A normal north-westerly current obtained in the Punjab, Rajputana, Guzerat and on the Malabar coast, and a north-easterly wind in Sind and the Upper Assam Valley. Over the remainder of the country, the circulation was being affected by the low-pressure area. The skies still remained densely clouded in the Kumaon hills, parts of Bengal and in Assam, and rather heavy rain fell at Sibsagar. At the same time, a south-westerly wind was blowing at Colombo and giving a few drops of rain to Ceylon. On the 15th, with some exceptions of but little importance, the barometer was giving way all over the country and the pressure becoming rather uniform over a large tract of the country, except in the extreme North-West, where the baro-

meter stood high; and also in Bengal, Orissa and the Deccan, where the readings remained low. The winds were returning to their normal directions and blowing strongly at Gopalpore and Thyetmio. Rather heavy rain fell at Saugor Island and showers at two or three stations elsewhere.

Pressure.—The mean pressure of the week has been above the monthly average in Burma and Ceylon; below it elsewhere. The deficiency per station has been greatest in Sind, as also has been the excess in Ceylon.

Temperature.—The temperature has been slightly in excess of the normal in Ceylon and the Madras Presidency; below it in all other parts of India. The greatest cold, relative to the average, was in the hills of Upper India.

Humidity.—The air has been damper than the average in all places except Ceylon.

Rain.—The precipitation has been general and heavy in Bengal and Assam and slight in the North-Western Provinces and the Punjab, except on the hills, where it has been fairly moderate. A few drops also fell in Ceylon and locally at Moulmien, Bombay, Seoni and Gopalpore. In the central and southern parts of the country, the weather was dry throughout the week.

The concluding table gives the total rainfall for the past week:—

Divisions.	Number of stations.	Total rainfall.
Burma	1	0·11
Bengal and Assam	14	14·44
North-Western Provinces and Oudh	5	0·39
Panjab	6	0·79
Hill Stations	5	2·83
Ceylon	2	0·04
Malabar Coast	0	0
Bombay	1	0·02
Berars and Central Provinces	1	0·06
Guzerat and Central India	0	0
Sind—Rajputana	1	0·02
Madras	1	0·15

HEM RAJ,
for *Offg. Meteorological Reporter to the Govt. of India.*

Simla, 17th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 18th February 1888.*—No rain except a small quantity in Ganjam, Vizagapatam and Malabar. Rainfall to date generally sufficient except in parts of Vizagapatam, Madura, Tinnevelly and Salem. Crops generally good, but very slightly damaged here and there by rain, disease or insects. Wet crops under rain-fed tanks in parts of Madura withering owing to deficient supply. Pasture generally sufficient, but scanty in Malabar and parts of Madura and Anantapur and decreasing in Vizagapatam. No great fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 22nd February 1888.*—Rain in parts of Sind and Sholapur; beneficial to standing crops in Shikarpur and Upper Sind Frontier and to pasturage in the latter district. Wheat, linseed, late *jowari* and exotic cotton blighted in Dharwar and wheat damaged by rust in parts of Kaira. Standing crops fair in Thana, Kolaba, Belgaum, and Broach and good in other districts. Cotton-picking in progress in Dharwar and in parts of Gujarat and Kathiawar. Harvesting of late crops in progress in Karachi, Ahmedabad, Kaira, Surat, Khandesh, Nasik, Ahmednagar, Sholapur, Bijapur, Belgaum, Dharwar, Kanara and Kathiawar. Preparation for sowing of next season's crops progressing in Karachi, Bijapur and Dharwar. Probable outturn of late crops 13 annas in Karachi, 12 annas in Hyderabad, 8 to 10 annas in Surat, 7 to 9 annas in Bijapur, 12 to 14 annas in Poona, and 7 annas on an average in Dharwar. Probable outturn of wheat 14, and of linseed 8 annas in Khandesh, and of wheat in three talukas of Kaira 10 annas on an average. Fodder scarce in three talukas of Karachi, one of Nasik and one of Dharwar.

Bengal.—*For week ending 21st February 1888.*—Cold season is almost over, and weather is becoming warm. Prospects of *rabi* crops are generally good, the recent rain having materially benefited them. Poppy is in excellent condition, the plants are in flower, and in some places opium is being extracted. Transplanting of spring rice is almost finished. Harvesting of mustard, pulses, tobacco and sugarcane goes on. Ploughing for early rice and jute is in progress. Price of rice has remained almost stationary during the last fortnight; it is lower than last year in Eastern Bengal, but is higher in most other parts of the Province.

N.-W. Provinces and Oudh.—*For week ending 22nd February 1888.*—Weather generally fine but cloudy in Kumaun and Meerut Divisions where sunshine is now needed. Heat is increasing. Wheat slightly injured by blight in Benares and Meerut, otherwise crops are ripening well. The poppy crop is thriving. Supplies are ample but high prices generally continue. Cattle are generally in satisfactory condition.

Punjab.—*For week ending 22nd February 1888.*—Slight rainfall in some districts. Prices are reported to be stationary in seven districts and falling in four. Ploughings for *kharif* in progress throughout the Province. *Rabi* prospects have improved by the recent fall of rain and are now reported good. More rain is wanted at Hissar. Crops slightly damaged by hail in Hissar. Stock cattle are healthy except in two tahsils of Shahpur. Fodder scarce in many districts but prospects are improving. Poppy crops average.

Central Provinces.—*For week ending 22nd February 1888.*—Weather cloudy, with slight rain in places. Prospects of wheat and other winter crops are generally favourable, but linseed has been damaged by cloudy weather. Condition of cattle is fair. Prices are high in Jubbulpore.

Burma.—*For week ending 18th February 1888.*—Slight rain has fallen in the Akyab district of Lower Burma and in the Bhamo, Myadoung, Sagaing, Kyaukse, Myingyan, Pagan and Yamethin districts of Upper Burma. Dry-weather crops progressing favourably. Slight cattle-disease reported in two townships of Thonegwa district, otherwise condition of agricultural stock is good. Estimate or outturn of harvest remains the same as last week. Price of paddy has risen in the Bassein, Henzada, Shwegyin, Mergui and Shwebo districts, and fallen somewhat in the Kyaukpyu, Lower Chindwin and Myingyan districts.

Assam.—*For week ending 22nd February 1888.*—Weather seasonable. Slight rain fell in some districts. Harvest of mustard going on, sugarcane is being crushed and land is being prepared for summer rice. Potato sowing going on in the Hill Districts.

Mysore and Coorg.—*For week ending 22nd February 1888.*—No rain. Standing crops in good condition. Outturn of harvests favourable. Condition of cattle generally good. Prices have fallen in the Bangalore district and have risen in the Chitaldroog district slightly.

Half an inch of rain in Coorg. Picking of coffee crop nearly completed. Threshing of rice continues. Prices are stationary.

Berar and Hyderabad.—*For week ending 22nd February 1888.*—Weather cloudy. The harvesting of *kharif* crops is almost completed. Standing *rabi* crops are in good condition, and in some places cutting of *rabi* crops is in progress. Agricultural stock generally in good condition. No marked fluctuations in prices of food-grains.

Some rain in Hyderabad during the week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 22nd February 1888.*—Slight rain at Indore, Gwalior and Goona. No change in agricultural operations, standing crops, or outturn of harvest, since last report. Agricultural stock indifferent in Western Malwa and bad in Goona. Pasturage and fodder good. Prices of food-grains are rising in Indore and Bundelkhand, high in Western Malwa, Goona and Neemuch, and elsewhere steady. Opium crops have been slightly damaged in Western Malwa. Reports from other parts not complete.

Rajputana.—*For week ending 22nd February 1888*—Agricultural operations satisfactory. Standing crops good. Agricultural stock generally in good condition. Pasturage or fodder sufficient. Prices still high, but tendency to fall in Marwar and Sirohi. Cotton below the average in some States.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 9.} CALCUTTA, SATURDAY, MARCH 3, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of the Week ending Feb. 22nd, 1888.

The meteorological history of the past week is, in fact, the history of the remarkably low pressures which prevailed over by far the greater part of the country during the first four or five days, and which were partly, if not wholly (leaving out of consideration the disturbances from *without*) due to the excessive heat, as well as to the increased charge of vapour.

On the 16th the barometer was giving way over North-Western India, the Eastern Peninsula and at the majority of the peninsular stations, and the depression which had appeared over Upper Sind on the last day of the previous week, had apparently travelled in a south-easterly direction and now lay over the area represented by the stations, Indore, Amraoti, Seoni and Saugor. At the same time, the large area of relatively low readings existing previously over Northern India, the Central Provinces, Orissa and the Deccan, had become diffused and the only parts where prevailed relatively high pressure were Guzerat, Khandeish, Rajputana, Central India, and parts of the Carnatic. The atmosphere was seemingly in a disturbed state along the foot of the North-West Himalaya; and a large depression was overlying the Deccan, the Circars and Orissa. Except in the neighbourhood of the depressions, the winds were fairly normal in all parts of the country, and slight rain was falling in Orissa and locally at Saugor Island and Silchar. On the following day the chart showed that the depressions had coalesced and were now existing as one diffused depression over Central India, the eastern districts of the Central Provinces, the trans-Gangetic portions of the North-Western Provinces, Behar and East and North Bengal. At the same time a slight but fresh depression had appeared near Kurnool, and the distribution of pressure remained still abnormal. The skies were overcast in the Upper Assam Valley and Sikkim; and nearly one inch rain fell at Gopalpore and showers at False Point and Akyab. On the 18th the barometer was rising

all over the country, except in Beluchistan and Sind, where there had occurred a fresh but significant fall. The depressions noticed over Northern India the day before was filling up, while the one near Kurnool had enlarged and was occupying a well-defined area represented by the stations, Kurnool, Secunderabad, Bellary and Belgaum. The general distribution was assuming a normal form and the readings were again becoming high in North-Western India. The wind had veered round to S.S.W. at Quetta and save in Orissa, at the head of the Bay and in parts of the Carnatic, where it blew from a south-westerly quarter, over the rest of the country the general circulation was either normal or variable. The skies had, in consequence of the fresh depression over Sind, become overcast in North-Western India and Beluchistan, and rain in small amounts fell at Quetta and at Sibsagar. During the next twenty-four hours the depression over Sind had apparently travelled to the neighbourhood of Indore and the pressure increased in its rear; while the one over the Deccan moved slowly in a north-westerly direction and invaded the Bombay Deccan. A north-easterly current swept over the Panjab and a rather strong south-easterly wind blew over the Panjab Himalaya, carrying large quantities of moisture to those regions. The skies became overcast on the hill stations in the Panjab, and rain in small amounts fell over a large part of the Panjab, and rain and snow on almost all the hills. By the 10 A. M. of the 20th, the depressions had coalesced and begun to exist as one large depression over Rajputana, Central India, the Berars, the Eastern Panjab, as well as over the Bombay Deccan, with its centre somewhere near Indore. The relative distribution of pressure was still irregular. The wind circulation over a large part of the country was under the influence of the low-pressure area, while on the Bombay coast and in the Kumaon hills the wind force was high. Rain in small amounts had fallen at the most northerly districts of the North-Western Provinces and snow and rain on all the hills. On the 21st the chart showed that the barometer was rising all over the country, and that the depression shown near Indore on the preceding day had since travelled in a north-easterly direction and almost filled up, the relics of it, however, still occupied the area represented by the stations, Calcutta, Hazaribagh, Jubbulpore and Saugor. The distribution of pressure had become more normal than hitherto and south to south-west winds prevailed over the Central Provinces, Central Bengal and along the Orissa and Bengal coasts; and a south-easterly current blew over the Deccan and along the Coromandel Coast as far north as Gopalpore. The skies were still overcast over a large tract of the country and rain fell in parts of the North-Western and Central Provinces, as well as on almost all the hills, and locally at a few stations elsewhere. The amounts, however, nowhere exceeded one inch. By the 10 A. M. of the 22nd, the distribution of pressure had become still more normal, though the pressure was everywhere (except in Burma, Assam and parts of Bengal where it was about the average) greatly above the February average, more especially so in the Panjab. The skies had cleared all over the country, except in the central parts, where they were still covered and rain in small amounts fell at Belgaum, Sholapur, Amraoti, Akola and Seoni.

Pressure.—Compared with the mean of the month, pressure has been low everywhere, except in Ceylon; the deficiency *per station* being greatest in Sind and Rajputana and least in Bombay.

Temperature.—On the contrary, temperature was high everywhere on the plains.

Humidity.—The air was damper in all parts, except Northern India and Ceylon.

Rain.—There has been hardly any rain in Burma, Behar, Guzerat, Central India and the Peninsula. Elsewhere, the amounts received are generally small, except on the hills, where they are comparatively large. The seasonal rainfall is everywhere in excess of the average, except in Burma, Upper India (the Panjab Himalaya excepted, where it is considerably above the average), Ceylon, Travancore and the Circars, where it is still below the normal.

The concluding table gives the total rainfall of the past week for the different provinces.

Divisions.	Number of stations.	Total rainfall.
Burma	1	0·54
Bengal and Assam	6	1·42
North-Western Provinces and Oudh	4	1·65
Panjab	6	0·95
Hill Stations	6	2·96
Ceylon	1	0·77
Malabar Coast	3	0·79
Bombay	2	0·18
Berars and Central Provinces	7	1·04
Guzerat and Central India	1	0·07
Sind—Rajputana	2	0·81
Madras	1	0·95

HEM RAJ,
for *Offg. Meteorological Reporter to the Govt. of India.*

Simla, 26th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 25th February 1888.*—No rain except a small quantity in Ganjam, Vizagapatam, Bellary, Salem, and Malabar. Rainfall to date generally sufficient except in parts of Vizagapatam, Madura, Tinnevelly and Salem. Crops generally good, but very slightly damaged here and there by rain, disease or insects. Wet crops under rain-fed tanks in parts of Madura have withered owing to deficient supply of water. Pasture generally sufficient, but scanty in Malabar and parts of Madura and Anantapur, and decreasing in Vizagapatam and parts of Cuddapah and Coimbatore. Prices slightly rising in some districts but stationary in others. General prospects favourable.

Bombay.—*For week ending 29th February 1888.*—Rain in parts of Sind, Gujarat, Kathiawar, Khandesh, Nasik, Poona, Sholapur, Bijapur, Belgaum, Dharwar and Kanara; beneficial to standing crops in Shikarpur. Standing crops in Dharwar and wheat in parts of Panch Mahals damaged by rain and standing crops in one taluka of Nasik by hailstorm; wheat, linseed, late *jowari* and exotic cotton blighted in Dharwar; standing crops fair in Thana, Kolaba and Belgaum and good in other districts. Cotton crops middling in Bijapur; cotton-picking in progress in Ahmedabad, Broach, Surat, Dharwar and Kathiawar. Harvesting of late crops in progress in parts of Karachi, Ahmedabad, Kaira, Surat, Nasik, Poona, Ahmednagar, Sholapur, Bijapur, Belgaum, Dharwar, Kanara and Kathiawar. Operations for cultivation of next season's crops continue in Karachi, Kaira, Bijapur, Belgaum and Kathiawar. Probable outturn of cotton in Broach 12 annas. Fodder scarce in one taluka of Dharwar and one of Hyderabad.

Bengal.—*For week ending 28th February 1888.*—No rain. Weather fine and becoming gradually warmer. *Rabi* crops are ripening, and prospects continue generally favourable. Mustard and tobacco are being gathered. Spring rice is doing well. Ploughing for autumn crops progresses; and in Behar sowing of indigo has begun. Opium is being collected, and is a good crop. In Rajshahye *ganja* promises to be a good crop. Sugarcane is being crushed, and is generally yielding well.

N.-W. P. and Oudh.—*For week ending 29th February 1888.*—Light rain fell in many districts during the week. The weather is generally cloudy and is rapidly getting warmer. *Rabi* crops are ripening and harvesting has begun. Agricultural prospects are excellent and the poppy crop is flourishing. Supplies are ample and prices are beginning to fall. Health of cattle is generally satisfactory.

Punjab.—*For week ending 29th February 1888.*—Rain has fallen in most districts. Prices are reported to be stationary in eight and falling in four districts but slightly rising in Delhi. Ploughings for *kharif* in progress throughout the Province. *Rabi* prospects are reported good. More rain is wanted at Peshawar. No damage done to crops. Stock cattle are generally healthy. Fodder scarce in some districts but prospects are improving. Poppy crops average.

Central Provinces.—*For week ending 29th February 1888.*—Weather cloudy and rainy, except in Chattisgarh. Hail has done some damage to the crops in Saugor and Seoni. Wheat, gram and linseed have been injured somewhat in Hosangabad by rust. Prospects are otherwise good. Prices high in Jabalpur and Saugor. Cattle in good condition.

Burma.—*For week ending 25th February 1888.*—No rain has fallen anywhere except a slight shower in Kyaukpyu. Prospects of dry-weather crops continue favourable. Condition of agricultural stock is generally good. Estimates of the probable outturn of harvest remain the same as last week. Price of paddy has risen in the Kyaukpyu, Bassein, Lower Chindwin, Kyaukse, Myingyan and Minbu districts.

Assam.—*For week ending 29th February 1888.*—Weather much warmer. Slight rain in Lakhimpore. Gathering of mustard over in most districts. Crushing of sugarcane nearly finished. Ploughing progressing and sowing of summer rice begun.

Mysore and Coorg.—*For week ending 29th February 1888.*—Slight rain reported in Shimoga, Kadur and Hassan districts. Standing crops in good condition. Sowing operations coming to a close, except in parts of the Kadur district. Outturn of harvests generally favourable. Condition of stock cattle good.

Coorg has had no rain. Coffee-picking for the most part completed. Prices stationary.

Berar and Hyderabad.—*For week ending 29th February 1888.*—Weather rather cloudy and warm in Berar. Slight rain during the week in some parts of the province. Harvesting of *rabi* crops in progress. Prospects of the *rabi* crops favourable. Prices of food grains stationary. Cattle in fair condition. Fodder sufficient.

There has been no rain in Hyderabad during the week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 29th February 1888.*—Heavy rain in Indore, Bhopal, Bhopawar and Goona, and fair amount in other Agencies. No change since last report in agricultural operations. Western Malwa, Bhopawar and Goona report that crops have been damaged by rain and hailstones. No change in the condition of agricultural stock. Condition of pasturage and fodder indifferent in Western Malwa, otherwise no change. Prices remain high, except in Bhopawar where they have fallen. Opium crops reported good in Bhopawar, Goona and Neemuch and fair in Western Malwa. No report from other Agencies.

Rajputana.—*For week ending 29th February 1888.*—Rainfall general throughout Rajputana. Agricultural operations satisfactory. Standing crops in good condition. Crop prospects and agricultural stock generally good. Pasturage or fodder sufficient except in some States. Prices as last reported. Opium crop somewhat injured by cloudy weather and rain in Meywar and Harowti.

E. C. BUCK,
Secretary to the Government of India.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE BOMBAY PRESIDENCY (EXCLUDING SIND) FOR 1886-87.

No. 46 I., dated Calcutta, the 2nd March 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, Public Works Department, No. 12 W. I., dated the 6th February 1888, forwarding the above Report, and the Resolution of the Local Government reviewing it.

OBSERVATIONS.—The Report of the Chief Engineer for Irrigation has been so carefully reviewed in the Resolution of the Government of Bombay, that the Government of India finds that very few additional remarks are required.

2. The Capital outlay, direct and indirect, incurred up to the end of

1886-87, is shown in the following statement for all works in the Deccan and Guzerat, for which Capital and Revenue accounts are kept:—

		Number of Works.	Expenditure during the year 1886-87.	Expenditure to end of the year 1886-87.	Sanctioned Estimate.
			Rs.	Rs.	Rs.
Productive Public Works	In operation	7	67,093	1,02,74,199	1,05,01,332
Protective Public Works	In operation	3	4,22,621	60,69,756	67,54,587
	In abeyance	2	3,658	99,322	17,42,810
Minor Works (of which Capital and Revenue Accounts are kept)	In operation	25	65,400	56,79,567	59,55,796
	Under construction	1	16,500	1,19,636	1,69,125
	In abeyance	1	8,889	1,82,647	2,08,080
	Total	...	5,84,161	2,24,25,127	2,53,31,730

There appears to be some discrepancy, which should be eliminated from future reports, in the number and nomenclature of the Minor Works for which Capital and Revenue Accounts are kept. The statement on page 1 of Part I of the Revenue Report mentions only 22 minor works as being in operation, but from other statements it would appear that there are 25 such works. The works at present in abeyance are the Chankapur and Maladevi Tanks under the head of Protective Works, and the second section of the Gokak canal under Minor Works.

3. The Revenue Accounts of the year showed the following actual results:—

	Gross Revenue.	Net Revenue.	Percentage of net Revenue on total Capital outlay to end of the year.
	Rs.	Rs.	
Productive Public Works	2,57,796	1,23,598	1·2
Protective „ „	18,461	—22,433	*Nil.*
Minor Works (of which Capital and Revenue Accounts are kept)	63,211	—6,114	*Nil.*
Total	3,34,468	95,051	0·42

There is a considerable improvement in the net Revenue from Productive Public Works, but none in the other classes, both of which continue to work at a loss to the State.

4. The Minor Works of which only Revenue Accounts are kept produced a gross revenue of Rs. 5,16,741 and a net revenue of Rs. 2,69,140 during the year. These results compare favourably with those of previous years.

5. The areas irrigated by the different classes of works are shown below:—

	1886-87.	1885-86.	1884-85.
	Acres.	Acres.	Acres.
Productive Public Works	21,187	26,107	21,609
Protective „ „	7,625	16,135	2,677
Minor Works—			
For which Capital and Revenue Accounts are kept	13,816	17,208	15,369
For which only Revenue Accounts are kept	141,856	124,221	140,635

The decrease in area in the case of the first three classes in the above table, as compared with the previous year, is due to the rainfall of the season having been very favourable for cultivation. The extension of the area under sugarcane was, however, very marked, and this is a very satisfactory feature in the operations of the year, and has resulted in a considerable increase in the average water-rate per acre irrigated. It seems now to be clearly proved that the reduction in the water-rates, which was determined upon in 1883-84, has failed to extend the area of irrigation and that a gradual return to the old rates should be contemplated.

6. There has been no material decrease in maintenance charges on canals in full operation; the present cost of maintenance cannot be considered otherwise than excessive. It is noticed that the recent amalgamation of the duties of the Public Works Department Establishment may be expected to effect some improvement under this head. The necessity for economy must be continually kept in view.

7. The diminution in the balance of demands unrealized at the end of the year is satisfactory.

8. In the concluding paragraphs of the Resolution of the Government of India on the Revenue Report of 1885-86 the delay in the submission of this Report was noticed. The report for 1886-87 was received on the 10th of February 1888, or one day earlier than that of the previous year. It is noticed that the Report of the Chief Engineer for Irrigation was submitted on the 22nd November 1887; it is not understood why the review of the Local Government with the report could not have been prepared and despatched from Bombay on an earlier date than the 6th of February 1888.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Department of Finance and Commerce, and to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance, and that copies of the Report and of the Resolution be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

The Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and Burma.
The Foreign Department for communication to the Resident at Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajputana.

Ordered further, that this Resolution and the Resolution by the Local Government be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State.

R. HOME, *Colonel, R.E.*,
Deputy Secy. to the Govt. of India.

No. 12 W. I.—269, dated 6th February, 1888.

RESOLUTION—By the Government of Bombay, Public Works Department.

Letter from the Chief Engineer for Irrigation and Superintending Engineer, Central Division, No. 3305, dated 22nd November 1887.

Forwards the Irrigation Revenue Report of the Bombay Presidency, excluding Sind, for 1886-87, Parts I and II.

RESOLUTION.—The Irrigation Works in the Deccan and Gujarat, to which this report refers, comprise in all thirty-four new schemes in operation, and a large number of old tanks and small canals (included in Part II), which are maintained by Government, but on which there has been no Capital expenditure.

2. The works of the former class, for which Capital Accounts are kept, include seven projects classified as Productive Public Works, three as Protective, and twenty-four as Minor Works. Statement 1 B. includes one more work (the Nilgund Tank) which does not appear in the list of works in operation in the first paragraph of the report, or in Statement 1 C. The omission should be explained.

3. The Capital outlay during the year amounted to Rs. 5,84,161, and at the end of the year stood at Rs. 2,24,25,127. This is inclusive of three works in progress, and one in abeyance.

4. The following is an abstract of the Capital Account :

	During year.	To end of year.
	Rs.	Rs.
Major Works—		
Productive Works	67,093	1,02,74,199
Protective Works	4,26,279	61,69,078
TOTAL, MAJOR WORKS .	4,93,372	1,64,43,277
Minor Works	90,789	59,81,850
GRAND TOTAL .	5,84,161	2,24,25,127

5. The following are the unexpended balances of the sanctioned estimates for the works of each class :—

	Rs.
Productive Works	2,27,133
Protective Works	23,28,319
Minor Works	3,51,151
	Rs. 29,06, 603

Of this amount, Rs. 16½ lákhs under head "Protective" is for the Chankápur and Maladevi Tanks, both of which are at present in abeyance.

6. The works in operation, excluding old works, comprise in all 560 miles of Main and Branch Canals, and 416 miles of distributaries. The reservoirs cover an area of 26,786 acres or 42 square miles.

7. The financial results of the year were as follows :—

	Area irrigated.	Revenue realized.		Total.	Working expenses.	Net Revenue.
		Direct receipts (water-rates), &c.	Share of land revenue.			
	Acres.	Rs.	Rs.	Rs.	Rs.	Rs.
Productive Works .	21,187	2,52,332	5,464	2,57,796	1,34,198	1,23,598
Protective Works .	7,625	13,461	...	13,461	35,894	—22,433
Minor Works for which Capital Accounts are kept	13,816	59,124	4,087	63,211	69,325	—6,114
TOTAL .	42,628	3,24,917	9,551	3,34,468	2,39,417	95,051
Minor Works for which only Revenue Accounts are kept. . .	141,856	6,029	5,10,712	5,16,741	2,47,601	2,69,140
GRAND TOTAL .	184,484	3,30,946	5,20,263	8,51,209	4,87,018	3,64,191

8. Taking all the works for which Capital Accounts are kept together, there was a decrease in area irrigated, as compared with the previous year, of 16,822 acres, which is ascribed to the exceptionally favorable rainfall throughout the season. The Revenue *Assessments* during the year show an increase of Rs. 20,243, and the realizations an increase of Rs. 54,591, as compared with the previous year, notwithstanding the falling off in area irrigated.

9. On the other hand, the figures of working expenses show an increase of Rs. 28,731.

10. The amount on account of assessments of direct receipts unrealized at the close of the year was Rs. 23,739, showing a satisfactory decrease on the amount outstanding at the close of the previous year, which was Rs. 50,730.

11. The interest charges on the Capital outlay on the Productive Works during the year amounted to Rs. 3,91,209, against which the net revenue realized from works of that class was Rs. 1,23,598, showing a loss of Rs. 2,67,611, whereby the interest account was increased to Rs. 56,02,838.

In the previous year the interest charges on Productive Works were Rs. 3,87,865, and the net revenue was Rs. 94,292, showing a loss of Rs. 2,93,573.

There was thus an improvement of Rs. 29,306 in net revenue, and an increase of Rs. 3,344 only in the interest charges during the year.

12. The assessments of the year compare with those of the previous year as follows :—

	Assessments.	
	1886-87.	1885-86.
	Rs.	Rs.
Major Works—		
Productive	2,34,523	2,18,408
Protective	12,741	7,544
Minor Works	56,211	57,280
TOTAL .	3,03,475	2,83,232

and taking the figures in detail :—

	1886-87.			1885-86.		
	Water-rates.	Other receipts.	Total.	Water-rates.	Other receipts.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Productive Works .	1,30,636	1,03,887	2,34,523	1,17,141	1,01,267	2,18,408
Protective Works .	10,251	2,490	12,741	6,553	991	7,544
Minor Works .	47,916	8,295	56,211	48,602	8,678	57,280
TOTAL .	1,88,803	1,14,672	3,03,475	1,72,296	1,10,936	2,83,232

13. The water-rates per acre irrigated were :—

	1886 87. Rs.	1885-86. Rs.
Productive Works	6·16	4·19
Protective Works	1·34	0·40
Minor Works	3·47	2·82
TOTAL .	4·43	2·89

The increase in average rate is due partly to the free grant of water in the previous year for fresh irrigation on the newly opened Nira Canal and Mhaswad Tank, and partly to the areas irrigated in 1885-86 having included a large area of inferior crops assessed at low rates, for which water was taken in consequence of the unfavorable rainfall in that year.

14. The following table shows the principal crops irrigated each year :—

	1886-87. Acres.	1885-86. Acres.
Gardens and Orchards	2,993	3,462
Sugar	5,239	4,100
Wheat	9,497	10,604
Rice	4,294	3,166
Jowar	3,827	13,347
Bajri	2,976	7,237
Gram	1,983	3,508
Ground-nut	5,418	5,604
Condiments	1,255	1,085

The principal decreases were thus in Jowar and Bajri.

15. In para. 8 of the report the matter of the effect of the general reduction of water-rates ordered in 1883-84 is referred to. It appears to be established that the reduction has not resulted in a large extension of the area irrigated, which is dependent chiefly on the amount and distribution of the rainfall. On the expiry of the current year the reduced rates will have been in force five years, and a detailed report should be made during next rains for submission to the Secretary of State, with a view to the subject being re-considered, as the reduction appears to have resulted only in a considerable loss of revenue to the State without a corresponding or proportionately larger benefit to the people.

16. The item "other receipts" comprises the following :—

	Rs.
Plantations	13,431
Miscellaneous	91,690
Share of Land Revenue	9,551
Rs.	1,14,672

The receipts under "Miscellaneous" are principally from water-supply of towns, of which Rs. 79,437 was for Poona. The amounts for Sholapur and Karad are not shown. The revenue from plantations shows considerable development, the figures for the last four years being—

	Rs.
1883 84	5,491
1884-85	8,807
1885-86	10,938
1886-87	13,431

17. The increase in working expenses has already been referred to. It is accounted for in part by the recent opening of the Nira Canal and Mhaswad Tank. It is hoped that with the recent amalgamation of duties there will be an improvement in future under this head, as the charges for Establishment will be less. The maintenance charges per acre irrigated amounted to Rs. 4·39, which is excessive.

18. A large number of the works show a loss on the working of the year. Only 16 out of 34 show a surplus of revenue over expenses. Of these the Mutha Canal heads the list with a net revenue of Rs. 1,07,329, and the Krishna Canal comes next with a net revenue of Rs. 8,965. The Khari Cut Works show satisfactory development. Of the 18 works on which there was a loss, the recently opened Nira Canal and Mhaswad Tank show the largest debit, but this will of course improve. The Mhaswad Tank Canal No. II, which commands the bulk of the land to be irrigated by that scheme, was only opened at the beginning of the year, and the prospects of the water being extensively utilized are encouraging. Of the rest, the Jamda Canals and the Ashti Tank give the worst results. The position, as a whole, would be very different, if each of the works on which there is now a loss could be made to pay its working expenses.

19. The past history of the Jámda Canals and of the Pravara River Works (Lákh and Ojhar Canals) shows that, until the storage tanks at Chankápur and Maladevi, which have been commenced, but are at present in abeyance, are completed, they will continue to yield results altogether disproportionate with the expenditure incurred upon them, or with their capabilities with an improved supply, and it is feared they will continue to be a burden on the finances, though useful to a limited extent in mitigating the local effects of seasons of drought.

20. The debits to Capital Account for Establishment charges came to 39 per cent. on outlay, which is very high. The Revenue Accounts were debited with Establishment charges to the extent of 12·7 per cent. on direct receipts and 26·9 per cent. on the outlay for repairs. The charge to works for which only Revenue Accounts are kept (Part II) was Rs. 1,23,637, as compared with an outlay of Rs. 70,055 only: the charge amounts to 24 per cent. on the gross revenue derived from the works. It is anticipated that the recent amalgamation of Public Works and Irrigation duties in certain of the districts will improve these results in future years, but it will be the special duty of the Superintending Engineers to see that the maintenance of works of irrigation is as carefully supervised as formerly, and that there is no sacrifice of efficiency.

21. Copies of the report and of this Resolution should be forwarded, as usual, to the Government of India and the Secretary of State.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

REPORT ON POSTAL LIFE INSURANCE AND MONTHLY ALLOWANCE SCHEME FOR 1886-87.

No. 1306A., dated Calcutta, 8th March 1888.

ORDER—By the Government of India, Department of Finance and Commerce.

READ—

Letter from the Director General of the Post Office of India, No. 10771, dated the 30th December 1887, and enclosures.

Ordered, that the above letter and of its enclosures be published in the *Gazette of India* for general information.

CHARLES J. WEIR,
Officiating Under-Secretary to the Government of India.

From F. R. HOGG, Esq, Director General of the Post Office of India, to the Secretary to the Government of India, Department of Finance and Commerce,—No. 10771, dated 30th December 1887.

I have the honour to submit the Annual Report on the operations of the Postal Life Insurance and Monthly Allowance scheme during the official year 1886-87.

2. This scheme is restricted to postal employés and was introduced in February 1884, so that the year under report is the third complete year of its existence. The minimum sum for which a life can be insured is ₹50, the maximum ₹4,000, and the benefit can be secured either by an immediate lump payment or by monthly payments which continue during life or terminate at the age when officers usually expect to retire from the public service. A monthly allowance is either immediate or deferred while the annuity thus purchased must be for a sum of not less than eight annas or more than fifty rupees per month.

3. During the year, the rule under which one-half surrender value can be allowed when payments are discontinued, was modified so as to exclude policies and contracts on which three years' subscriptions have not been paid. Five applications for life insurance were refused because of unfavourable medical reports on the lives of the persons who applied for these insurances.

4. Statement No. I shows that, during the year under report, 141 persons insured their lives for sums which aggregated ₹1,36,650, and that the total realisations on account of premium, both on old and new policies, came to ₹29,283. Claims were met to the extent of ₹7,715, of which ₹7,600 represent the value of seven policies paid on six lives insured, and the remainder, the half surrender value, on five policies relinquished. Ten policies were surrendered for a gross assured sum of ₹5,050, and eleven policies lapsed for a total amount of ₹9,650.

LIFE INSURANCE.	Up to 31st March 1886.	Up to 31st March 1887.
Number of lives insured	568	709
	₹	₹
Amount received in premia	39,567	68,850
Amount of Insurance	7,55,075	8,91,725
Amount of claims met	5,773	13,488

On the margin is entered a summary which contrasts the principal results of the business for two years. None of the new policies were effected by a single payment: 102 policies, securing a total assurance of ₹1,00,550, were obtained under the system of paying the premium for a fixed period; and 39 policies, for a total sum of ₹36,100, were issued under the plan of life payments. Fifty-seven of the new policies were taken out in the Lower Provinces of Bengal: 20 in Madras, 19 in Bombay, and 18 in Assam. Burma is the only circle in which no advantage at all was taken of the scheme. Deducting 63 policies, for a total sum of ₹73,250, which were surrendered, cancelled, discharged, or allowed to lapse since the business began, 646 policies were in force on the 31st March 1887, representing an aggregate assurance of ₹8,18,475 as detailed below:—

1 for ₹700 effected by a payment of premium in one sum.
240 „ ₹3,00,775 effected by payment of premium up to the age of 50.
195 „ ₹2,54,750 effected by payment of premium up to the age of 55.
210 „ ₹2,62,250 effected by payment of premium during life.

5. A distribution of Life Insurance polices among the several grades of postal officials is given on the margin. Excluding the poorer paid classes, amongst whom the exercise of providence of this kind must be very exceptional, the percentage of lives insured on the total number of employés has risen from 3·80 per cent. in 1885-86 to 4·45 per cent. in 1886-87.

POSTAL OFFICIALS.	Number on 31st March 1887.	NUMBER OF LIFE INSURANCE POLICIES TAKEN OUT. Up to 31st March 1886.	During 1886-87.	TOTAL.	Percentage of lives insured.
Superintendents and Inspectors	352	45	12	57	16·19
Post-Masters, Sub-Post-Masters and Village Post-Masters	4,901	187	35	222	4·53
Schoolmasters and extraneous Agents	2,214	1	3	4	·18
Clerks	5,342	242	59	301	5·63
Postmen and Village Postmen	14,021	67	23	90	·64
Road Establishment	12,098	17	3	20	·16
Signallers, &c., in combined offices	642	9	6	15	2·33
TOTAL	39,570	568	141	709	1·79

6. Under the head of Monthly Allowance, no advance has taken place. One contract for a deferred allowance of ₹5 was concluded, and one contract for a like amount was surrendered, so that at the close of the year four contracts only existed for sums aggregating ₹24. The same results appeared in the last annual report.

7. The following figures exhibit the financial result of the business:—

	₹ a. p.	₹ a. p.	₹ a. p.
Life Insurance.

Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for India for the Week ending Feb. 29th, 1888.

Pressure over Northern India during the week under review has been in an unsettled state; considerable oscillations have taken place from day to day, and the general distribution has undergone large and important modifications. Over the Peninsula, on the contrary, the daily changes have been in general slight, and the distribution has been fairly steady throughout. In consequence, while the weather over Southern India has been settled and fine, conditions over Central and North-Western India have been the reverse, fine weather having alternated with overcast skies and more or less heavy showers.

On the 23rd pressure was highest within a band stretching from Jacobabad and Mooltan westward as far as Ajmere and Agra, while it was low off the west coast and over the east of the Bay. The wind directions were generally fairly normal, though some irregularity was introduced by the presence of small areas of slightly deficient pressure over the Central Provinces and the Konkan. The former of these depressions was occasioning slight rain in the west of the Central Provinces and at Indore. A local shower was also reported from Cochin, but elsewhere the weather was fine. On the 24th pressure had fallen rapidly over North-Western India, and the area of highest readings had been transferred to the central parts of the country. The showery weather over the more central stations continued, and the skies were also overcast in the North-West. The chart of the 25th showed an irregular distribution of pressure. In the North-West the barometer had risen fast and an area of high pressure was re-established over the Punjab, while that already existing over the Central Provinces held steadily. The winds were consequently very irregular in direction over North-Western and Central India. The weather remained showery in the Central Provinces, and the rainfall area had extended north-westward across Rajputana and as far as Mooltan. On the 26th the barometer was still rising over North-Western India, but the rainfall area had continued to extend, and on this day rain was reported from most of the Punjab stations and from several in the North-Western Provinces. Snow and sleet fell on the hills, while at Colombo a local fall of 2½ inches of rain was reported. On the 27th rain and snow were again reported from the hill stations and rain from Lucknow, Sialkot, and Jubbulpore, but the distribution of pressure and the winds were becoming more regular, and the weather appeared more settled. This improvement continued during the 28th, and by the morning of the 29th fine weather with light regular breezes prevailed generally. The only rainfall reported on this day was a few drops at Raipur.

Pressure.—The mean pressure of the week has been below the average of the month in Burma, Assam, East Bengal, and at some places in Western India, but has been above the average elsewhere. The excess was much greater in the upper than in the lower strata of the atmosphere, the stations of Murree, Simla, Darjeeling, and Pachmarhi all showing an excess of about 0·07."

Temperature.—Compared with the average of the month there has been a general excess of heat, but a considerable portion of this is probably attributable to the method of comparison. Over Northern and Central India a very marked increase of temperature occurred between the beginning and close of the week.

Humidity.—The air has been damper than usual over a large part of Central and North-Western India.

Rain.—No rain has fallen during the week in Burma, Bengal, Assam, and Madras and only insignificant amounts in Malabar and Bombay, but in all the other provinces the rainfall has been fairly heavy. The largest amount fell in Ceylon.

The report of the 29th shows that for the four months November to February the rainfall has been deficient over Burma, the greater part of Upper India, and in the Circars and the Deccan, but that elsewhere the total fall has been in excess of the average. In Upper India the deficiencies are in general comparatively small.

The concluding table gives the total rainfall of the past week according to provinces.

Divisions.	Number of stations.	Total rainfall.
Burma	0	0
Bengal and Assam	0	0
North-Western Provinces and Oudh	4	2·21
Punjab	6	1·82
Hill Stations	6	3·22
Ceylon	2	3·61
Malabar Coast	1	0·68
Bombay	1	0·26
Berars and Central Provinces	6	3·08
Guzerat and Central India	5	2·55
Sind—Rajputana	3	2·20
Madras	0	0

W. L. DALLAS,
for *Offg. Meteorological Reporter to the Govt. of India.*

Simla, 4th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd March 1888.*—No rain except a small quantity in Vizagapatam, Tinnevelly and Nilgiris. Rainfall to date generally sufficient, except in parts of Vizagapatam, Madura, Tinnevelly and Salem. Crops generally good, but very slightly damaged here and there by disease, insects or want of rain. Wet crops under rain-fed tanks in parts of Bellary and Madura have withered owing to deficient water supply. Pasture generally sufficient, but scanty in Malabar and parts of Madura and Anantapur, and decreasing in Vizagapatam and Salem. Prices of rice and *ragi* falling in many districts, of other grains rising or stationary. General prospects favourable.

Bombay.—*For week ending 7th March 1888.*—Rain in parts of Sind, Poona, and Sholapur. Oilseeds blighted in one taluka of Hyderabad and cotton damaged by clouds and blight in Broach. Standing crops fair in Nasik and Thana, middling in Kaira, and good in other districts. Cotton-picking in progress in Ahmedabad, Broach, Surat, Bijapur, Belgaum, Dharwar, Wadhwan and Baroda. Harvesting of late crops in progress in most districts of the Presidency Proper and Sind. Preparation for cultivation of next season's crops continue in Ratnagiri, Belgaum, Dharwar, Satara, Bijapur, and Kathiawar. Probable outturn of large crops from 7 to 11 annas in Kaira, 8 to 12 annas in Baroda, 10 annas on an average in Belgaum; and of cotton and wheat in Upper Sind Frontier from 13 to 14 annas. Prospects of cotton in Broach unfavourable. Probable outturn of opium in Baroda 12 annas. Fodder scarce in one taluka of Dharwar.

Bengal.—*For week ending 6th March 1888.*—Cold season is over and the weather has become warm, although the mornings and evenings are still cool. No rain during the week. *Rabi* crops are in good condition; the earlier sorts of them are being harvested. Tobacco is being cut, and also *ganja* in the Rajshahye district. Sugar manufacture is proceeding. Collection of opium is in full swing, the weather being very favourable. Spring rice is still being transplanted and is doing well. Lands are being ploughed for early rice and jute. In Behar indigo sowings are in progress. No marked change in the price of rice in the last fortnight, which is cheaper than last year in Eastern Bengal, but dearer in most other parts of the province.

North-Western Provinces and Oudh.—*For week ending 7th March 1888.*—Some rain fell at Jhansi where crops have been slightly injured by red rust, otherwise weather is clear. Heat increasing. The *rabi* crops are being harvested and a good outturn is expected. The opium crop is in good condition; collection has commenced. Prices are now generally falling. Condition of agricultural stock is satisfactory.

Punjab.—*For week ending 7th March 1888.*—No rain except a slight fall at Shahpur. Prices are generally falling, though stationary in some districts. Sowings of extra *rabi* and ploughing for *kharif* in progress throughout the province. *Rabi* prospects are reported good. More rain is wanted at Hissar and Shahpur. No damage done to crops. Stock cattle are reported healthy. Fodder scarce in some districts, though the supply is on the whole improving. Poppy crops average.

Central Provinces.—*For week ending 7th March 1888.*—Weather cloudy, with slight rain in places. Winter crops being cut. Wheat rusted in a few low-lying fields in Seoni, and linseed damaged by cloudy weather in Raipur and Bilaspur; prospects otherwise good. Prices falling in Saugor. Cattle in good condition.

Burma.—*For week ending 3rd March 1888.*—No rain. Progress of dry weather crops continues favourable. Estimates of outturn of harvest remain the same as last week except that in Bhamo, where no estimate had been given before, a 14-anna crop is now expected. The price of paddy has risen in Sandoway, Prome, Henzada, Toungoo and Shwebo districts and has fallen in Kyaukphyu and Minbu districts. Food supply is still reported to be insufficient in Myingyan district.

Assam.—*For week ending 7th March 1888.*—Slight rain in Lakhimpur. Weather seasonably warm. Nights still cool. Pressing of sugarcane and gathering of mustard nearly over. Outturn of latter below average. More rain wanted for early rice.

Mysore and Coorg.—*For week ending 7th March 1888.*—No rain. Standing crops in good condition, except in parts of one taluk in the Tumkur district, where the paddy crop is reported to be suffering from want of water. Outturn of harvests favourable. Prices have slightly risen in the Bangalore district.

Coorg has also had no rainfall. There are no crops on the ground. Prices are slightly rising.

Berar and Hyderabad.—*For week ending 7th March 1888.*—Weather cloudy, and slight rain has fallen all over the province. Harvesting of *kharif* crop has almost been completed, and that of the *rabi* crops in progress. Land is being prepared for the ensuing *kharif* crop. Fodder is getting insufficient in the Amraoti district. Prices are stationary.

There has been no rain in Hyderabad during week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 7th March 1888.*—Slight rain has fallen in Bhopawar and Indore. No change in agricultural operations and standing crops. Prospects of probable outturn not so good in Bhopawar. No change in other Agencies. No further damage to crops. Pasturage and fodder indifferent in Western Malwa, elsewhere good. Prices of food-grains rising in Bundelkhand and Bhopawar, high in Western Malwa, Goona, and Neemuch. Elsewhere steady. Opium crop damaged in Bhopawar by hail and rain, fair in Western Malwa, and not reported on from other Agencies.

Rajputana—*For week ending 7th March 1888.*—Rain in Ulwar and in Bikanir. Agricultural operations satisfactory. Standing crops slightly injured in parts of Jhallawar, Kotah, Harowtee, Ajmere and Jeypore, otherwise good. Crop prospects and agricultural stock good. Pasturage or fodder scarce in Dholepur and Ulwar, elsewhere sufficient. Prices have slightly risen in Partabgarh and Kotah, fallen in Kherwara, Meywar and Jeypore. Elsewhere high but steady. Opium has been slightly injured in Jhallawar.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for February 1888.

In February, pressure begins to fall generally throughout India. The steady increase which takes place during October, November, December and January reaches its maximum in the last-named month, and during February the decrease commences which lasts throughout the hot weather. In the present year the decrease between January and February has been unusually large, for whereas during January there was a general and rather large excess of pressure as compared with the average, there has during February been a slight to largish deficit. As a rule, the weather over Northern India is distinctly finer during February than during January. This has, however, hardly been the case in the present instance, as the unsettled weather, which prevailed in the north-west, west and centre of India during the latter part of January, continued during February. In Bengal and Assam also very unsettled conditions have at times prevailed.

On the 1st the general distribution of pressure was such as is characteristic of the cold season. A large area of high pressure (30·20″ and above) lay over Sind, the Punjab, Rajputana and part of the North-Western Provinces and the Central Provinces, while relatively low readings were reported from the west coast and from the south of the Bay. On the west coast the decrease of pressure occurred more rapidly than is normally the case, and a feeble depression apparently lay between Ratnagiri and Bombay. At both Bombay and Kurrachee the north-easterly wind was blowing rather freshly. The weather was generally fine, the only rainfall reported being at Kurrachee and Jeypore. On the 2nd the distribution was more complicated and less normal. A broad band of relatively high readings stretched across Northern India extending from the Western Punjab to Assam, while almost equally high pressures were reported from

the Carnatic and the west of the Bay. At the same time low-pressure areas prevailed over Burma, and over Guzerat and Sind. The depression which on the previous day had been shown near Bombay had apparently passed northward to the Gulf of Cambay, while a separate and larger storm lay near Kurrachee. With this distribution of pressure the winds were in general very irregular in direction, but well-marked cyclonic circulations were shown over Western India. At Kurrachee the wind was blowing with a velocity of 21 miles per hour from north-east. The weather was very cloudy all over the north-west and rain had fallen at Kurrachee, Hyderabad, Jacobabad, Quetta, and Ajmere, as well at Darjeeling. On the 3rd, pressure decreased rapidly in the north-west of the Punjab and a fresh depression appeared in that region. Accompanying this additional disturbance there occurred a large extension in the rainfall area which included the whole of North-Western India, part of Central India, Sind and Guzerat. On the 4th, pressure rose over Western and fell over Eastern India. Rain ceased in Sind and Guzerat, but in Northern India it continued and extended eastward as far as Benares. On the 5th the weather improved. Rain was reported from Sibsagar, Dhubri, Allahabad and Nowgong, but elsewhere the sky had cleared considerably and conditions appeared more settled. Fine weather continued during the 6th, but on the 7th rain recommenced in Sind and Baluchistan, and during the 8th and 9th extended to the hill and submontane stations in the Punjab and North-Western Provinces. On the 10th the unsettled conditions were transferred from North-Western to North-Eastern India, and rather heavy rain was reported from almost all stations in Bengal and Assam. On the 11th rain still fell at several places in Bengal and Assam, but elsewhere the weather was fine. This fine weather continued during the 12th, but on the 13th at all the hill and submontane stations and also at those in Lower Bengal and Assam further precipitation was reported. From the 14th to the 17th showers of rain, generally of small amount, were of daily occurrence around the head of the Bay and in parts of Eastern Bengal and Assam, but over the greater part of India conditions were fine and fairly settled. On the 18th a brisk barometric fall accompanied with rain and a southerly wind were reported from Quetta, and on the following day rain was falling at several of the Punjab stations and at Jacobabad. On the 20th the rainfall had extended into the North-Western Provinces, while it had almost ceased in the Punjab; but on the 21st rain was reported from the west and north of the Punjab, the west of the North-Western Provinces, Jeypore and the Central Provinces. From this date until the 28th, showers of rain continued to fall at intervals over the Central Provinces, the Punjab and the west of the North-Western Provinces, but the amounts were generally small and on the whole the weather was fair. On the 29th the distribution of pressure and the winds were fairly normal, and the only rainfall reported was a few drops at Raipur.

In Southern India the weather calls for little remark. No rain whatever fell in the Carnatic and hardly any in any other part of the Peninsula. In Burma also the weather, as is generally the case, was very settled.

Pressure—Has been below the monthly average almost everywhere. At the hill stations in North-West Himalaya, the deficit has been less marked than on the plains; and at Mount Abu, Pachmarhi and Wellington there has been an excess, trifling at Mount Abu, but considerable at Wellington. In Ceylon also there has been a slight excess. The deficiency has been on the whole greater over Northern and Central India than in the Peninsula.

Temperature.—Like January this was a generally cool month, though the relative coolness was less than in the preceding month. In Ceylon, the Carnatic, the Berars, in part of the Central Provinces and at a few places in Bengal and Upper India, there was indeed a slight excess of temperature. The greatest deficiency was 3°·4 at Dera Ismail Khan, but this amount was closely approached at Jacobabad and Jeypore. Frost occurred regularly at the hill stations during the first half of the month, the lowest minimum reported being 27°·1 on the 10th at Chakrata. Subsequent to the 15th, temperature rose fairly briskly, so that, while the highest maximum reported on the first was 92° at Salem, that on the 29th was 99° at Surat.

Humidity.—Except in Bengal the amount of moisture in the atmosphere has been generally in excess of the average.

Rain.—No rain has fallen during the month in Behar or the Carnatic, and very little in the Berars, the Deccan, Mysore or Burma. On the other hand, Sind, Cutch and Rajputana have received much more than the normal amount, and the Punjab, the cis-Gangetic portions of the North-Western Provinces, Bengal, Guzerat, the Konkan, and Malabar have all received a greater or less excess.

The following table shows the amount of rain and the difference from the average during the month of February 1888, according to districts, as far as is indicated by the telegraphic reports:—

Districts.	Number of stations.	Average rainfall in February.	Difference from the average in February, 1888.
Punjab—West	7	1·43	+0·58
Do. East	4	1·15	+0·13
North-Western Provinces—Trans-Gangetic	9	1·25	—0·13
Do. do. Cis-Gangetic	3	0·28	+0·51
Behar	2	0·49	—0·49
North Bengal	2	0 84	—0·05
Assam—Cachar	3	1·71	—0·32
Lower Bengal—Chutia Nagpur	7	1·13	+0·19
Orissa—Northern Circars	6	0·43	+0·11
Central Provinces—South	7	0·38	+0·09
Berar—Khandesh	2	0·17	—0·04
Rajputana, Central India, Saugor and Nerbudda	8	0·30	+0·86
Sind—Cutch	3	0 20	+1·04
Guzerat	3	0·09	+0·33
Konkan	4	0·05	+0·07
Deccan—Hyderabad	5	0·08	—0·04
Malabar	4	0·21	+0·13
Mysore—Bellary	4	0·15	—0·12
Carnatic	6	0·37	—0·37
Lower Burma	6	0·13	—0 02
Ceylon	2	2·59	—0·38

W. L. DALLAS,
for *Offg. Meteorological Reporter to the Govt. of India.*

Simla, 5th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending March 7th, 1888.

During the greater part of the week under review the weather over India has been very quiet, and principally remarkable for the general uniformity of pressure and the variability of the winds. At the close of the period, however, these conditions gave way and a depression appeared, as so many have done this season, over Guzerat, Rajputana and Central India, which was accompanied by very unsettled weather over the Central Provinces.

On March 1st a large area of relatively high pressure overlay Northern India stretching from north-west to south-east from Mooltan to Saugar Island, a second area overlay the Carnatic, and a third, the Upper Assam Valley, while relatively low readings were reported from the North Konkan, from Sind, and from Burma. The differences of pressure were, however, very slight, the range amounting to only 0·159″. The winds varied considerably in direction, but there was a fairly general westerly current down the Gangetic plain and a south-easterly to easterly current over the Peninsula and the south of the Central Provinces. Temperature had risen, and there had been no rain. On the 2nd the barometer had fallen, except in Sind and Guzerat. The distribution was generally similar to that reported on the previous day, but a slight depression had

appeared near Indore, and rain had fallen over the Berars and the south of the Central Provinces. The range of pressure was less than on the 1st. The chart of the 3rd showed very uniform pressures and light variable winds. The weather was very fine, with, on the whole, rising temperature, and no rain beyond an insignificant shower at Colombo. On the 4th the uniformity of pressure had increased and the total barometric difference for the whole of the Indian region was only 0·098″. The winds were exceedingly light and very variable in direction. The weather remained very fine, and the only rainfall reported was a few drops at Quetta. On the 5th the distribution of pressure was irregular, and such as has on several occasions prefaced the appearance of unsettled weather over Rajputana, Central India and the Central Provinces. A large area of high pressure overlay the Bay and a second area of high pressure the Punjab, while a shallow diffused depression lay over the western desert with an easterly wind at Quetta and a south-westerly wind in Sind. The sky was cloudy in Baluchistan, the North-Western Punjab, and Sind, and south-easterly winds prevailed at a large number of the central stations. Temperature had generally risen, and except at Quetta there was no rain. On the 6th the depression in the North-West had concentrated and become a well-marked disturbance with its centre near Indore. A cyclonic circulation of the winds was shown around it, and the sky had become more cloudy in the Punjab, Bombay and the Central Provinces, while rain had fallen at Jacobabad and Hyderabad (Sind), as well as at Belgaum. The high pressure over the Bay held steadily. On the 7th the barometric distribution was irregular; one area of high pressure was reported from the North-Western Provinces, the Central Provinces, and the Bay, and a second from the Punjab and Sind, while slight depressions were shown near Indore and over West Bengal. The wind direction was very variable, and rain had fallen at all the more central stations as well as at Belgaum, Ajmere and Jeypore.

Pressure.—The mean pressure of the week has been above the normal average of the month in all places. The excess has been greater in the North-West and Central Provinces and Bengal than elsewhere; but has been on the whole fairly uniform.

Temperature.—In Assam, the Punjab, and at the Hill Stations the weather has been very warm for the season, the mean temperature of the week in those regions having exceeded the monthly average. Elsewhere there has been a deficiency, but in several cases it was small and largely due to the method of comparison.

Humidity.—The air, except in the Central Provinces and on the west coast, has been rather drier than usual.

Rain.—No rain has fallen during the week in Burma, Bengal, the Punjab, or Madras, and in most other parts of the country such rain as has fallen has been light and generally confined to one station per province; but in the Berars, the Central Provinces, Sind and Rajputana, the fall has been more general though not very heavy.

The concluding table gives the total rainfall of the past week according to provinces:—

Divisions.	Number of stations.	Total rainfall.
Burma	0	0
Bengal and Assam	0	0
North-Western Provinces and Oudh	1	0·29
Punjab	0	0
Hill Stations	1	0·28
Ceylon	1	0·15
Malabar Coast	1	0 06
Bombay	1	0·61
Berars and Central Provinces	9	1·63
Guzerat and Central India	1	0·02
Sind—Rajputana	4	0·59
Madras	0	0

W. L. DALLAS,
Asstt. Meteorological Reporter to the Govt. of India.

Simla, 9th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 10th March 1888.*—Slight rain in nine districts. Rainfall to date generally sufficient, but more wanted in parts of Vizagapatam, Bellary, Madura, Coimbatore, Salem and South Canara. Crops generally good but very slightly damaged here and there by disease, insects or want of rain. Wet crops under rain-fed tanks and in parts of Bellary and Madura have withered owing to deficient supply of water. Pasture generally sufficient but scanty in Malabar and in parts of Anantapur and Madura and decreasing in Vizagapatam and Coimbatore. Prices of rice and *cholum* generally falling, of *ragi* and *cumbu* generally rising where not stationary. General prospects favourable.

Bombay.—*For week ending 14th March 1888.*—Rain in parts of Poona, Sholapur, Belgaum, Kanara, Hyderabad and Upper Sind Frontier. Standing crops in Shikarpur benefited by the late rains. Standing crops fair in Thana and Colaba and good in other districts. Cotton-picking in progress in parts of Guzerat, Kathiawar and Southern Mahratta Country. Harvesting of late crops in progress in most districts of the Presidency Proper and Sind. Ploughing operations for next season's crops continue in Ratnagiri, Satara, Bijapur, Dharwar, Kanara, Poona and Kathiawar. Probable outturn of late crops 15 annas in Hyderabad. Opium crop in Baroda attacked by a disease called *khakri* and its probable outturn estimated at 8 annas.

Bengal.—*For week ending 13th March 1888.*—Weather has been unsettled for the greater part of the week, and showers are reported in almost all districts of Bengal Proper and in Balasore. *Rabi* crops promise well and are beginning to be harvested. Sugarcane and tobacco are good crops and are being cut. Opium is being collected with good outturn. Spring rice is still being transplanted and is progressing favourably. Rain has been very useful for ploughing, which is well forward. Indigo sowings are in full swing throughout Behar.

North-Western Provinces and Oudh.—*For week ending 14th March 1888.*—Rain fell in a few districts during the week. The weather is generally hot, the harvest is in progress and a good yield is expected. Opium collection is satisfactory. Markets are well supplied and prices are falling.

Punjab.—*For week ending 14th March 1888.*—No rain except a slight fall at Sialkote. Prices are very unsettled; in two districts rise is reported; in others prices are stationary or falling. Sowings of extra *rabi* and ploughings for *kharif* in progress throughout the Province. *Rabi* prospects are reported good generally. Stock cattle are reported healthy. Fodder is scarce in some districts, but prospects are improving. Poppy crops average.

Central Provinces.—*For week ending 14th March 1888.*—Weather rather cloudy with slight rain in places. Prospects continue favourable. Hail has damaged the crops in a few places in Seoni.

Reaping and threshing of winter crops in progress.

Burma.—*For week ending 10th March 1888.*—Very slight rain has fallen in Akyab and Tavoy districts of Lower Burma and in the Bhamo, Myadaung, Mandalay, Shwebo, Kyaukse, Myingyan and Yamethen districts of Upper Burma. Progress of dry-weather crops continues favourable. Estimates of outturn of harvest remain the same as last week. Price of paddy has risen in Tharrawaddy, Shwegyin, Myadaung, Shwebo, Minbu and Toungdwingi districts; price of paddy has fallen in Akyab, Kyaukpyu, Thyetmyo, Mergui and Yamethen districts.

Assam.—*For week ending 14th March 1888.*— Weather cloudy and stormy during the week. Rain has done good. Gathering of mustard over; pressing of sugarcane still continues. Early rice is being sown and ploughing continues. A slight shock of earthquake.

Mysore and Coorg.—*For week ending 14th March 1888.*—Slight rain in the Kolar district. Standing crops in good condition. Sowing of paddy and planting of sugarcane almost completed throughout the station. Outturn of crops generally favourable. Condition of stock cattle good.

In Coorg there are no crops on the ground at present. Prices are stationary

Berar and Hyderabad.—*For week ending 14th March 1888.*—Slight rain during the week. Harvesting of wheat, linseed and gram nearly completed and threshing commenced. Land is being prepared for the ensuing *kharif* crops. Fodder continues to be insufficient in the Amraoti district. Prices are stationary.

Hyderabad has had no rain during the week. Agricultural prospects continue good. Prices are stationary.

Central India.—*For week ending 14th March 1888.*—There has been slight rain in all the Agencies except Gwalior and Neemuch. No change in agricultural operations and condition of standing crops since last report. Probable outturn below the average in Western Malwa, Bhopawar and Goona; in other places good. Crops slightly damaged by hailstone and blight in Western Malwa, Bhopawar and Goona. Condition of agricultural stock improved in Bhopawar. No change in other Agencies since last report. Pasturage and fodder continue the same. Prices of food grains are falling in Bundelkhand, no change in other Agencies. Opium crops are reported fair in Western Malwa, good in Goona and Neemuch, bad in Bhopawar, and not reported from other Agencies.

Rajputana.—*For week ending 14th March 1888.*—Some rain fell in Deoli, Tonk, Beawar, Todghur, Jeypore, Ulwar, and in Bikanir. Agricultural operations satisfactory. Standing crops good generally. Crop prospects and agricultural stock good. Damage, more or less, from hailstorms in the Kotah and Ajmere districts. Pasturage or fodder scarce in Dholepore and Ulwar. Prices are steady but tending to fall. Opium damaged at places by hailstorms.

E. C. BUCK,
Secretary to the Government of India.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending March 14th, 1888.

The unsettled weather, which prevailed at the close of last week over certain parts of the country, continued on the 8th when rain was reported from nearly all the stations in the Central Provinces as well as from Hazaribagh, Galle, Cochin, Belgaum, Sutna and Secunderabad. The barometer had fallen everywhere—rapidly over Northern India and moderately to briskly elsewhere. Barometric readings were uniform and relatively high over the Peninsula, Guzerat and Sind, but to the northward of those regions pressure decreased and reached its lowest point at Roorkee. The hottest part of the Indian region was the Eastern Peninsula, where Thyetmio reported a maximum temperature of 102°. The report of the 9th showed that pressure was still giving way, and that, consequent on the fall continuing greatest in the north, the barometric difference between the north and south had increased. The weather had improved over the Central Provinces, but had become more unsettled in Bengal and Assam, where rain had fallen at most stations. Rain had also occurred at Vizagapatam and Diamond Island. The Eastern Peninsula remained the hottest part of the Indian region, but the highest temperature recorded was only 99°. On the 10th a small but rather deep depression appeared over the west of the Punjab, with its centre near Dera Ismail Khan. At the same time a slight depression had also been developed in Western Bengal, with its centre near Hazaribagh. These two depressions had occasioned a further moderate to rapid fall of pressure over Northern India, while over Southern India, though the barometer there also was falling, the change had been relatively small, hence the barometric difference between north and south had still further increased and gradients over North-Western India were abnormally steep for the season. Around the Punjab depression, though

there was a strongly marked cyclonic circulation of the winds, there was fairly bright and fine weather, but in the neighbourhood of the much slighter Bengal depression, probably owing to the source from which the winds were derived, the skies were cloudy to overcast and rain had fallen. Temperature had decreased suddenly and largely in East Bengal and Assam, the change amounting to 12° at Dacca, to 7° at Silchar and to 5° at Thyetmio, Chittagong and Dhubri. In consequence of this fall in Eastern India, the Burmese Peninsula was no longer the seat of the highest temperature, which had been transferred to the opposite side of India to Sind, where Jacobabad reported a maximum of 102°, Hyderabad of 100°, and Deesa of 99°. On the 11th there was comparatively little change shown in the general distribution of pressure. The Bengal depression had developed slightly, while that in the Punjab had on the contrary become somewhat diffused. With these exceptions there was but little alteration. Rain had generally ceased in Bengal though strong southerly winds from the Bay still fed into the depression over Chutia Nagpur. Some rain had fallen at Murree and Ranikhet, but as was the case on the 10th the weather in the neighbourhood of the Punjab depression was generally fair. The Lower Indus Valley remained the hottest part of India, a maximum of 102°·5 being reported from Jacobabad and of 100°·2 from Hyderabad. The chart of the 12th showed that the depression over Chutia Nagpur had to a certain extent coalesced with the low-pressure area in the North-West, so that in addition to the depression near Lahore an arm of relatively low readings extended from Rajputana and the south-east of the Punjab south-eastward as far as Hazaribagh. To the south of this band the winds were generally westerly; to the east, southerly, and to the north easterly. One effect of this change in the distribution was that apparently the moist air from the Bay penetrated directly into Upper India and as a consequence the skies over Northern India were more cloudy and rain more general. From Assam and East Bengal rain was also reported, the amount received at Dacca being as much as 2¼ inches. At the head of the Bay the wind was very strong. With the advance of moister winds into Northern India and the increase of cloud, temperature fell briskly, and the hottest region deserted Sind and retreated southward to the Bombay Deccan where Sholapur reported a maximum of 101°. On the 13th an important change was shown; the band of low pressures had moved bodily southward and extended from Sind east-south-eastward almost as far as the Carnatic, while at the same time relatively high pressures were established along the line of the hills. In consequence the flow of moist air from the Bay into Upper India was encouraged and rain fell at the great majority of the stations lying to the northward of the band of low pressure. The heaviest fall was again at Dacca. The region of greatest heat had again moved southward and was shown over Madras, where Cuddapah reported a maximum of 101° and Kurnool a maximum of 100°. The chart of the 14th showed that the distribution of pressure had again changed, the area of lowest readings lying over West Bengal and the east of the Central Provinces, while a large high-pressure area overlay the west and south of the Peninsula and the south of the Bay. Accompanying the depression over Bengal were strong southerly winds which brought up much moisture from the Bay and as a consequence very cloudy weather prevailed over Bengal and rain had fallen very generally. Nearly 1 inch of rain fell at Berhampore and over half an inch at Dacca, Silchar and Purneah.

Pressure.—Compared with the normal of the month, the mean pressure of the past week has exceeded the average in Burma, the greater part of Bengal and Assam, Ceylon, Malabar, Bombay, the Central Provinces and Madras, but has been in defect over Upper India from Behar to Peshawar and over Central India, Sind and Rajputana. The greatest deficiency was in the west of the Punjab and was largely attributable to the rather deep depression which appeared near Dera-Ismail Khan on the 10th.

Temperature.—The weather has been warmer than usual on the plains of Upper India and in Sind, but elsewhere the mean temperature of the week has been below the monthly average. The deficiency was greatest in Bengal where the mean temperature of Dacca, Berhampore and Dhubri was about 6° below the normal.

Humidity.—The air was generally rather damp except in Burma, and in parts of the Punjab and the west coast.

Rain—Has fallen during the week in all Provinces except Sind and Rajputana, but, except in Northern India and the Central Provinces, the amounts were not large. In Bengal and Assam 12 out of the 16 reporting stations received rain, the amount averaging 1¼ inch to each station.

The concluding table gives the total rainfall of the past week according to provinces:—

Divisions.	Number of stations.	Total rainfall.
Burma	1	0·16
Bengal and Assam	12	15·01
North-Western Provinces and Oudh	7	3·18
Punjab	5	1·83
Hill Stations	6	4·34
Ceylon	1	0·53
Malabar Coast	3	1·13
Bombay	2	0·06
Berars and Central Provinces	8	1·78
Guzerat and Central India	1	0·08
Sind—Rajputana	0	0
Madras	3	0·45

W. L. DALLAS,
Asstt. Meteorological Reporter to the Govt. of India.

Simla, 16th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 17th March 1888.*—Slight rain in eight districts, Rainfall to date generally sufficient but more wanted in parts of Vizagapatam, Bellary, Madura, Tinnevelly, Coimbatore and Salem. Crops generally good but very slightly damaged here and there by disease or want of rain; wet crops under rain-fed tanks in parts of Bellary and Madura have withered owing to deficient water-supply. Pasture generally sufficient but scanty in Malabar and parts of Anantapur and Madura and decreasing in Vizagapatam and parts of Coimbatore and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 21st March 1888.*—Rain in parts of Sind and Poona, beneficial to late crops in Shikarpur; prospects of wheat crop in one taluka of Upper Sind Frontier injured by closing of the Sukkur Canal. Cotton crop in Broach damaged, standing crops otherwise good. Cotton picking continues in parts of Gujarat, Kathiawar, Bijapur and Dharwar. Harvesting of late crops in progress generally; land being prepared for next season's crops in Hyderabad, Shikarpur, Poona, Satara, Bijapur, Belgaum, Dharwar, Ratnagiri, Kanara and Kathiawar; probable outturn of cotton in Broach 8½ annas, of cotton and wheat in Kaira 10 annas and of late crops in general 9 annas on an average in Panch Mahals, 10 to 12 annas in Ratnagiri, and 8 to 10 annas in Baroda.

Bengal.—*For week ending 20th March 1888.*—Rain throughout North and East Bengal, in greater part of South-West Bengal and North Behar, and

in the Sonthal Pergunnahs and Cuttack districts. *Rabi* harvest in progress and yield on the whole promising. Opium collection satisfactory and almost completed. Sugarcane has been a good crop generally. Rain has been very favourable to the cultivation of early rice and jute. Spring rice doing well. Indigo prospects good throughout Behar and in Bankoora, Nuddea and Jessore. *Mahua* crop in Chota Nagpore and Sonthal Pergunnahs promises well. Abundant mango crop expected, though in some places the blossoms have been injured by rain and high wind. No material change in the price of rice during the last fortnight. The price of Indian-corn in Darjeeling has gone up considerably owing to demands for the Sikkim Field Force. Reports have been received from Pooree indicating the existence of some scarcity in parts of the Chilka Tract and Khoorda; relief works may be found necessary, but further information awaited.

N.-W. Provinces and Oudh.—*For week ending 21st March 1888.*—Slight rain and hail in several districts. Heat is increasing. *Rabi* harvest every where satisfactory. Opium collection good. Prices of grains are falling. The condition of cattle is generally good.

Punjab.—*For week ending 21st March 1888.*—Rain has fallen in some districts. Prices are generally stationary, though falling slightly in three districts. *Kharif* ploughings and sugarcane and cotton sowings in progress. *Rabi* prospects are generally reported good. The *barani* crops suffered slightly for want of rain in Amritsar. Crops seriously injured by hail in Daska and Sialkote tahsils; east wind has also slightly injured the gram crop in Umballa. Stock cattle are reported healthy. Prospects of fodder are improving, but it is still scarce in some districts. Poppy crops average, they are slightly injured by hail in Sialkote.

Central Provinces.—*For week ending 21st March 1888.*—Weather seasonable; slight rain in Seoni. Harvesting of winter crops continues. Prospects favourable. Sugarcane being planted. Prices falling.

Burma.—*For week ending 17th March 1888.*—Slight rain has fallen in Mergui, Bhamo, Shwebo, Sagaing, Pagan and Myadaung districts. Reports regarding dry weather crops continue satisfactory. Estimated outturn of crops remains unchanged except in Mandalay where it has risen from 12 to 16 annas. Price of paddy has risen in Rangoon, Hanthawaddy, Prome, Henzada, Thayetmyo, Moulmein and Amherst districts of Lower Burma, and in Shwebo, Myingyan, Minbu and lower Chindwin districts of Upper Burma; prices stationary elsewhere.

Assam.—*For the week ending 21st March 1888.*—Weather warm. Rain has done much good. Crushing of sugarcane still continues in parts. Early rice is being sown. Tea plucking begun.

Mysore and Coorg.—*For week ending 21st March 1888.*—Some rain in the civil and military station of Bangalore and in the Kolar District, elsewhere no rain. Standing crops in good condition except in one taluk of the Tumkur district where the paddy crop is suffering from want of water. Outturn of harvests fair. Condition of stock cattle generally good. Prices slightly risen in the Bangalore district and fallen in the Chittaldroog district.

In Coorg there is no crop.

Berar and Hyderabad.—*For week ending 21st March 1888.*—Weather hot and cloudy. Harvesting of *rabi* crops completed and threshing in progress. Outturn of *rabi* crops is expected to be good. Fields are being prepared for next *kharif* crop except in Amraoti district. Agricultural stock is in good condition and fodder sufficient. No noticeable change in the prices of food grains.

Hyderabad had no rain during the week. Agricultural prospects continue fair. Prices stationary.

Central India.—*For week ending 21st March 1888.*—Agricultural operations completed in Gwalior, started in Goona, and in progress elsewhere. Standing crops fairly good. No change in probable outturn of harvest and condition of

crops, agricultural stock, pasturage or fodder, or prices of food grains since last report. No change in prospects of opium crop.

Rajputana.—*For week ending 21st March 1888.*—Some rain fell in Shapura, Bhurtpore, Ulwar and Bikaneer. Agricultural operations satisfactory. Standing crops good. Crop prospects and agricultural stock good. Slight damage by hailstorm and blight in Merwara and Ulwar. Pasturage or fodder sufficient generally. Prices falling at places; steady at others. Opium slightly injured in a few places.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ARRANGEMENTS MADE BY MESSRS. THOMAS COOK AND SON FOR FACILITATING THE MOVEMENTS OF PILGRIMS FROM INDIA TO THE HEDJAZ AND BACK.

The following is published for general information :—

No. P.-277—2, dated Bombay, the 27th February 1888,

From—Messrs. THOMAS COOK AND SON,
To—The Secretary to the Government of India, Home Department.

I beg to inform you that after last season's experience we have decided that, in order to successfully carry out the requirements of the Government of India in the facilitating of the movement of pilgrims, it is necessary for us to charter steamers in order to have them as far as possible under our own control.

2. We have therefore arranged during the coming season to charter and despatch four steamers from Bombay to Jeddah and two from Jeddah to Bombay.

3. The departures from Bombay will take place on or about the following dates, *viz.* :—

April 15th, June 20th, July 3rdand 15th.

4. The steamer in April will enable those who wish to avoid the monsoon weather, and to spend the month of Ramzan in the Hedjaz.

Trusting that these arrangements will be satisfactory to the Government.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

RETAIL PRICES FOR THE 2nd HALF OF DECEMBER 1887 AND 1st HALF OF FEBRUARY 1888.

APPROPRIATION REPORT ON THE ACCOUNTS OF 1886-87.

GENERAL REVIEW.

1. Before proceeding to give the usual detailed explanations it seems desirable to state briefly the principal circumstances which influenced the financial proceedings of the Government of India during the year under review. In 1885-86 the complications on the North-Western Frontier had led the Government to decide upon a permanent increase in its military strength, and upon the construction of a system of strategic railways and military frontier works at a large outlay, which would not lead to additional revenue but rather add permanently to the expenditure of the country a considerable sum on account of interest. The rate of exchange, too, which had remained pretty steady for some years, had fallen more than a penny during 1885-86, and had enhanced the charges under that head by more than a million. Upper Burma had been annexed, and the work of restoring order in the country and administering its affairs was attended with considerable expense. The extra outlay on these accounts was estimated in the budget of 1886-87 at nearly 2 millions and a half, and in order to provide for this excess the Government decided (1) to impose the Income Tax, (2) to transfer the outlay on Frontier Railways from Revenue to Capital Expenditure, and (3) to enlarge the Imperial revenues by a special contribution of 400,0 from the Provincial Governments, the balance being expected from improvement in the other revenues of the Imperial Government. With these arrangements it was expected that the year 1886-87 would close with a surplus of 182,2. It was soon discovered, however, that these expectations were not likely to be realized, since the state of affairs in Upper Burma needed the maintenance of a larger force at a greater expenditure than had been anticipated, and the rate of exchange experienced a further fall of more than a half-penny. Accordingly the Revised Estimate of 1886-87 had to provide for an excess expenditure of 1,334,6 as compared with the budget, and in order to meet this new condition of affairs the Government decided, for the reasons stated in paragraphs 68 to 75 of the Financial Statement of 1887-88, to suspend the Famine Insurance grant temporarily. The assistance so obtained, together with various improvements which had developed chiefly under the Railway Revenue account, promised to bring in all the funds required and leave at the end of the year a small surplus of 5. The accounts now show a surplus of 178,4 owing to the revenue being greater than the revised estimate by 741,0 and the expenditure by 563,1. The excess in expenditure lies mainly in Army charges, and in special defence works now paid from revenue for the first time. Of the improvement in revenue 395,4 occurs in the principal heads of Revenue, 50,5 in Post Office Telegraph and Mint, 189,2 in the Railway account, 40,1 in Irrigation, and 74,7 in Army receipts.

2. During the year under Review some minor changes have been introduced in the classification of civil receipts and expenditure. In the Military Department the pensions to Europeans are separated from the pensions to Natives of India. In the Public Works Department, the special defence charges are for the first time debited to revenue, but under a special heading.

3. Little change has been made in the form of this review. Last year the civil revenue and expenditure were stated in detail of minor heads, and the arrangement was found to be satisfactory as it brought to light various points, which would probably have been overlooked in a less minute examination.

The same system has been followed this year, and in the army division a statement has been added of the additional expenditure incurred on account of Burma. In the Public Works section of the account the differences under each head have been tabulated.

4. The following Summary gives the results to be reviewed in this report, and the details will be found in the Statements on pages 126 to 137. Throughout the report the figures are tens of rupees (Rx. 1 = ₹10) with the last two figures cut off for the sake of shortness, thus, 149,7 reads one hundred and forty-nine thousand seven hundred tens of rupees :—

41,320,6	41,923,7		Grand Total .	41,320,6	41,923,7

5. The general remarks that I have to offer, before proceeding to details, are grouped under two heads, *viz.*, comparison between 1885-86 and 1886-87, and comparison between Budget Estimates and Accounts of the last-named year.

Comparison with the year 1885-86.

6. The comparison in respect of revenues is as follows :—

Revenues.	1885-86.	1886-87.	Difference, 1886-87 greater (+) or less (−).
Principal Heads of Revenue . .	52,442,3	54,482,1	+2,039,8
Interest	699,0	670,5	−28,5
Post Office, Telegraph and Mint . .	1,965,8	2,027,5	+61,7
Civil Departments	1,427,4	1,461,6	+34,2
Miscellaneous	1,077,8	848,3	−229,5
Railways	13,684,1	14,477,8	+793,7
Irrigation	1,588,3	1,656,7	+68,4
Buildings and Roads	615,6	727,6	+112,0
Army Services	963,9	985,0	+21,1
	74,464,2	77,337,1	+2,872,9

7. Under *Principal Heads of Revenue* the largest difference is in Assessed Taxes, which presents an excess of 851,7 accruing from the Income Tax. Next in order of amount is the Land Revenue which was better than 1885-86 by 463,3 owing mainly to improved collections in Lower Burma and the revision of assessments in some parts of India. Salt yielded 312,5 and Excise 223,1 more than the previous year. The excess in Salt has been produced by a larger demand for the produce of the Punjab mines on the opening of the broad gauge line of Railway from Mulukwal to Khewra, and to larger receipts at the Sambhar lake on the recommencement of work which had been stopped for a great part of the previous year. The improvement in *Post Office, Telegraph and Mint* may be attributed partly to the ordinary expansion of the Post Office and Telegraph Departments and especially to the increased revenue from Government messages in the latter from the anexation of Upper Burma. The decrease under *Miscellaneous* has arisen from the loss by exchange in the repayment of the Stock Receipt Loan of 1854. The larger revenue from *Railways* is due to the addition of new lines in the Southern Mahratta and Burma systems, to the development of traffic on the older ones and to the receipts of the S. P. and D. line being shown gross on its purchase by Government. The head *Buildings and Roads* includes 150,0 received in connection with the rendition of Gwalior Fort and Morar Cantonment to His Highness the Maharajah Scindia.

8. The comparison of the Expenditure side is as follows —

	1885-86.	1886-87.	Difference, 1886-87 greater (+) or less (−).
Principal Heads of Revenue . . .	9,805,3	9,746,2	−59,1
Interest	4,330,8	4,310,4	−20,4
Post Office, Telegraph and Mint . .	2,293,0	2,145,3	−147,7
Civil Departments	12,243,7	12,698,5	+454,8
Miscellaneous	4,634,6	4,701,1	+66,5
Famine	1,500,0	309,0	−1,191,0
Construction of Railways . . .	632,0	183,1	−448,9
Railways	14,415,8	15,666,4	+1,250,6
Irrigation	2,303,7	2,310,7	+7,0
Buildings and Roads	4,485,3	5,201,7	+716,4
Army Services	20,097,8	19,525,0	−572,8
Special Defence Work	...	325,6	+325,6
	76,742,0	77,123,0	+381,0

9. The principal differences in this group are savings under *Post Office, Telegraph and Mint,* and under *Famine, Construction of Railways* and *Army*

Services, while there has been excess expenditure in *Civil Departments, Railways, Buildings and Roads* and *Special Defence Works.* The saving in *Post Office, Telegraph and Mint* is due to diminished expenditure in the two last named departments, in *Famine* to reduced grants for Protective Works and to withdrawal of the assignment for reduction of debt, in *Construction of Railways* to withdrawal of allotment for Frontier Railways, and in *Army Services* to the special charges incurred in 1885-86 on the North-West Frontier. The excess expenditure under *Civil Departments* is connected with the operations in Burma, under *Miscellaneous* with the loss by exchange on repayment of the Transfer Loan of 1854, under *Railways* with increased charges for interest, annuities and working expenses consequent on the purchase of the Sind, Punjab and Delhi line by the Government, and the receipt of large sums from Railway Companies, in *Buildings and Roads* with the restriction of expenditure on Public Works in 1885-86 owing to the Financial pressure.

Comparison of Accounts with Budget Estimates, 1886-87.

10. The following figures exhibit the differences in the net accounts :—

	Better.	Worse.
A Principal Heads of Revenue . .	486,0	...
B Interest	...	33,8
C Post Office, Telegraph, and Mint .	195,6	...
D Civil Administration . . .	...	315,8
E Miscellaneous	232,7	...
F Famine	1,052,3	...
G Construction of Railways . . .	...	73,9
H Railways	533,1	...
J Irrigation	77,3	...
K Buildings and Roads . . .	295,1	...
L Army Services	...	1,115,7
L L Special Defence Works . .	...	325,6
	2,872,1	1,864,8
Combined Surplus, Imperial and Provincial .	1,007,3	...

11. There was a serious falling off in the price of the Bengal Opium, but the deficiency was to some extent made good by larger receipts from the duty on the Malwa drug. On the other hand there was a great improvement in Land Revenue, Salt and Excise. The special arrangement for famine insurance was revised as explained in paragraphs 68 to 75 of the Financial Statement for 1887-88, resulting in a saving of 1,052,3. The improvement under Railways was due to a development of traffic on some of the lines, especially the G. I. P. The cost of Special Defence Works was in the budget treated as expenditure not charged to Revenue, but is now paid from revenue. The last point requiring notice in this comparison is the army expenditure on account of Burma which has exceeded the Budget provision by 1,217,8.

12. The budget estimated for an excess expenditure of 793,2 on the whole account, but this included charges amounting to 975,4 out of past accumulations of Provincial and Local balances, thereby making a surplus in the Imperial account of 975,4—793,2 or 182,2. The accounts, however, show a surplus of 178,4 in the Imperial account, and an increase in the Provincial and Local balances of 35,7 instead of a decrease of 975,4 as estimated. The net Imperial expenditure has therefore exceeded the estimate by 182,2—178,4 or 3,8, while

the Provincial and Local balances show an improvement over the estimate of 975,4 + 35,7 or 1,011,1. The details of these differences are given below, the sign + meaning better and — worse than estimate.

	Revenue Side.			Expenditure Side.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Principal Heads of Revenue .	−132,1	+689,1	+557,0	+63,0	−134,0	−71,0

13. The improvement in the Provincial Section occurs chiefly in the Principal heads of revenue and in the expenditure of the Civil Departments and under Buildings and Roads. The notable items making up the difference in the Imperial section are as follows :—

Imperial.	Better.	Worse.
Opium Revenue (net) . . .	...	363,2
Salt Revenue (net) . . .	273,6	...
Telegraph (net)	175,3	...
Famine Insurance	1,052,3	...
Savings under Superannuation .	73,1	...
Loss by Exchange . . .	111,4	...
Burma—		
Police	...	219,0
Marine	...	144,4
Military	...	1,217,8
Other Military Expenditure (net) excluding exchange . . .	191,0	...
Guaranteed Railways (net) (excluding exchange on English expenditure shown below)	396,7	...
State Railways (net) do. do. .	265,7	...
Saving under Military Works . .	93,6	...
Special Defence Works . . .	...	270,3
Exchange on English expenditure .	...	551,7
Minor improvements under other heads	129,9	...
	2,762,6	2,766,4
Net worse	...	3,8

Section A.—PRINCIPAL HEADS OF REVENUE.

1885-86. Accounts.		1886-87. Budget.	Revised.	Accounts.
52,442,3	RECEIPTS	53,925,1	53,665,7	54,482,1

14. The principal features of this group may be summarised as follows. *Land Revenue* is better than 1885-86 and the Budget by 463,3 and 295,4, respectively, owing largely to increased collections in Lower Burma and to new and revised settlements in some parts of India. *Opium* is better than 1885-86 by 5 only notwithstanding the sale of 4,506 more chests in Bengal and is worse than Budget by 284,6. There was a serious fall in the price of Bengal opium, but the deficiency on this account was to some extent made good by larger receipts from the duty on the Malwa drug. *Salt* also shews an improvement of 312,5 and 265,1, produced by large demands on the Punjab mines, consequent on the completion of the broad-gauge Railway from Mulukwal to Khewra, to large receipts at Sambhar on the recommencement of works which had been stopped for a great part of the previous year, and to general activity in the salt trade. *Excise* shews 223,1 more than 1885-86 and 240,4 more than Budget, but part of this is nominal and arises from changes in the method of making up the account. There was increased consumption in Bengal and Bombay. Under *Assessed Taxes* a large excess occurs (851,7) over the previous year as the result of the Income Tax, but the actual realizations fell short of the Budget by 103,4. A full explanation of these and the other minor changes will be found in the following paragraphs.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

15. In the *ordinary land revenue* there was a shrinkage in India as compared with 1885-86, owing to the low rates prevailing in Quetta, where the revenue is mostly realised in kind, but the result is better than was expected in the estimate, which provided for large remissions on coffee lands in Coorg. The price of coffee, however, having improved, remissions were not required to the extent anticipated. The large collections in the Central Provinces are due to the revised settlements in the Raepur and Sambalpur Districts, and the recovery of arrears. In Lower Burma the revenue came in freely as the country began to quiet down after the disturbances of 1885-86. The improvement in Assam is attributed to extension of cultivation, progressive rates on waste lands, and greater punctuality in realising the demand. In Bengal and the North-Western Provinces a special effort was made towards the end of 1886-87 for the collection of all demands within the year. In the Punjab there is a difference of 4,8 only between the forecast and the actuals shewing that the former was carefully framed. In Madras the revenue in 1885-86 included a large amount of arrears. In 1886-87 the collections exceeded the estimate in consequence, partly of the augmented demand, and partly from the vigour with which the recoveries were pushed. Some of the Madras districts had an exceptionally favourable season, but this was counterbalanced in other parts of the presidency. In Tanjore, however, large remissions that were granted in the previous year, were disallowed and collected in 1886-87. The large receipts in Bombay have accrued from enhanced rates of assessments, from the extension of cultivation in two districts, from new settlements in Hyderabad, and from the unexpected recovery in Broach, at the end of March, of a large amount which was not expected to be realised until 1887-88. The increase would have been more prominent, but, owing to a change of classification, certain sums which were treated as ordinary revenue in the estimate have appeared as miscellaneous revenue in the accounts.

16. As regards the other headings, the difference between estimate and actuals in the Bombay revenue from *rent of resumed lands*, is due to the former being based on the old survey rates, while the collections proceeded on the new scale. The Burma estimate for the *capitation tax* was too sanguine. The Bengal receipts from *sales of waste lands*, &c., were augmented by large proceeds from leases in the Sunderbuns and from the redemption of land tax in the 24-Pergunnahs. The Bombay receipts include the sale-proceeds of a portion of the Imperial Mody Bay estate, which had accumulated with the Bombay Port Trust. It was not provided for in the budget. The improvement in *fisheries and other miscellaneous revenue* is due in India to the Quetta Assigned Revenue which is improving, in Burma to the restoration of order in the country, in Assam to the opening out of new fisheries and to the yield from elephants and coal royalties, in Madras to the inclusion of certain local fund revenue and of the chank fishery, and in Bombay to local receipts and to the change of classification noticed above in the last paragraph. On the other hand there was a decline in Bengal, owing to the order for the recovery of copying fees in stamps not having been taken into consideration when the budget was framed. The Punjab estimate was high. As regards *Upper Burma* receipts, the unsettled state of the country prevented cultivation, and the expected revenue was not received.

17. The principle on which the land revenue is divided between the Imperial and Provincial Governments has been explained in previous reports, and hence it will be sufficient on this occasion to give only the following statements, which show how the results in 1886-87 have been worked out. It should be noticed that owing to the Financial pressure the Imperial share of the revenue was increased, by special contributions of 120,0 20,0 60,0 and 200,0 from the Central Provinces, Assam, Madras and Bombay respectively.

A—Transactions affecting the distribution of Land Revenue in 1886-87.

(a) On account of Upper Burma Land Revenue.

II.—Opium.

1885-86, Accounts.		1886-87, Budget.	1886-87, Revised.	Accounts.
6,296,0	Bengal sale of Opium	6,660,0	6,147,0	6,147,0
2,449,0	Bombay Opium Pass fees	2,346,8	2,544,3	2,583,4
	Excise Opium—			
2	India	1	2	2
21,9	Central Provinces	22,0	21,9	21,5
27,6	Burma	27,6	32,0	33,3
42,0	Assam	43,1	42,5	42,0
53,9	Bengal	53·5	55,0	55,2
42,5	North-Western Provinces	43,2	44,0	43,7
...	Punjab	11,6	2,9	3,2
9,4	Miscellaneous	19,7	9,1	13,5
8,942,5	Total	9,227,6	8,898,9	8,943,0

18. The Bengal actuals with 54,750 chests sold at an average of 1,123 do not compare favourably with the Budget, which looked for 55,500 chests and an average of 1,200 per chest, but they come very close to the revised estimate, which was framed at a time when most of the circumstances affecting the actuals were ascertainable.

19. On the other hand the increased realization in Bombay, on account of pass fees, was brought about by a desire to anticipate the "likin" tax which the Chefoo Convention makes leviable with the import duty, and also by the reported failure of the China crop. It is chiefly due to this that the total opium revenue corresponds closely with the actual figures of 1885-86, in spite of the falling off in Bengal.

20. The excise opium in Burma shews an increase as compared with the original estimate in consequence of greater competition for the Licenses at Akyab and Mergui, and of increased sales of the drug owing to the influx of a large number of camp followers and others attending the Military Force in Burma. In Bengal and the North-Western Provinces the increased receipts are due to general larger consumption of the drug. In the Punjab the original estimate of 11,6 was calculated on a probable consumption of 400 mds. at 7-4 per seer, but the Revenue authorities subsequently reduced the figure to 100 mds. and the actuals bear out the revised estimate very closely. The following table shews the sales and produce in Bengal and the exports from Bombay:—

		Bengal.					Bombay.		
Year.		Balance in stock on 1st April. Chests.	Produce of season. Chests.	Chests sold.	Average price per chest. ₹	Total price.	Chests.	Rate.	Amount.
1876-77		50,504	68,051	47,240	1,270	6,000,0	49,136	600	2,948,2

21. The increase under this head as compared with last year's actuals shews a growing revenue, and India and Bengal are its chief contributors. In India, the completion of the broadgauge line of Railway from Mulukwal to Khewra, coupled with the lowering of the rates of Rail freight on Rock Salt, created a considerable demand on the Punjab mines for that commodity. The Kohat Salt also was in greater request, but these improvements were counterbalanced to some extent, by the unfavourable season at the Sultanpore Salt sources.

22. The large excess over estimates in the Central Provinces is due to increased sales of Baragora salt, and in Burma and Bengal to larger importations arising from a return of activity in the Salt trade. The large variations in Madras, both under "Sale of Government Salt," and "Excise on local manufacture" are attributable, in some measure, to the transfer from the Bengal accounts of the transactions in Orissa, but more particularly to the gradual substitution of the excise duty for the Government monopoly, which has the effect of decreasing both sides of the account by about three annas (the cost price) for every maund of the monopoly supply supplanted by the excise.

23. The decrease in Bombay, as compared with the actuals of 1885-86, is owing to the cessation of the extraordinary demand for the Baragora salt, which arose from the stoppage of Sambhar Lake produce in that year. On the other hand, the increased exports to the Madras Coasts and to Calcutta have led to the improvement over the Budget and Revised Estimates.

24. The increase under this head, as compared both with the estimates and the actuals of 1885-86, confirms the growing tendency of the revenue from this source.

25. The improvement in India is mainly due to larger sales of stamps in the newly settled districts of Beluchistan. In the Central Provinces the excess is attributed to the failure of the kharif crops resulting in the renewal of bonds from the ryots, as also to the progress of Railway works, leading to larger sales of Receipt Stamps.

26. The disturbed state of some of the districts in Lower Burma seriously interfered with business, and accounts for the falling off in that Province. The Upper Burma reports shew, that owing to unavoidable delay in establishing Civil Courts, the receipts provided for in the Budget and Revised, were not fully realized.

27. Assam also shews a falling off chiefly in the Sylhet district. It is attributed to the impoverished condition of the people consequent on the floods and three bad years in succession. There was also a decrease in the number of civil suits in some districts.

28. In Bengal increased litigation consequent upon the introduction of the Bengal Tenancy Act is still in operation, but the orders of Government to collect copying-fees in stamps accounts for the bulk of the excess in this Province. The improved receipts in the North-Western Provinces under "Court-fee Stamps" and "Commercial and other Stamps," are due to the ordinary expansion of the revenue and to increased litigation.

29. In the Punjab there was a general improvement under all the heads, but an unfavourable agricultural season led to renewal of bonds from the ryots to the money-lenders, followed by a special increase under Court-fee Stamps.

30. The falling off in Madras from the exceptional amount of last year was anticipated in the Budget and revised estimates, and is not attributable to any special cause. In Bombay the improvement is due partly to the extension of Railway lines leading to numerous conveyances from the owners of lands to the Railway authorities, and partly to the establishment of an additional Court in the Kaira and Panchmahal Districts, but more generally to the increasing prosperity of the people. Under Court-fee Stamps there is an exceptional receipt of 8,3, the value of stamp-duty on the probate in a single estate.

31. The receipts from "*License and Distillery fees and duties for the sale of liquors and drugs*" shew an increase in every province, over both the actuals of last year and the Budget Estimate, and Bengal, the North-Western Provinces and Madras have contributed the largest shares to the improvement. It is due in India to increased consumption of Arrack in the Mysore assigned tract, and to the payment by the Mysore Durbar of 3,0 towards share of toddy revenue of the assigned tract from 1884-85 to 1886-87, which was not anticipated in the Budget. There are also larger collections in the newly settled district of Beluchistan. In the Central Provinces and Assam better prices were obtained for licenses. In Burma certain changes were introduced in respect of the Excise revenue which is now credited in full to this head, the share due to excluded Local Funds being transferred to them by charge *per contra* under Refunds. There has also been a change in the system of granting licenses. The selling price of distillery liquors was also reduced, and this led to increased consumption of duty-paid liquor. In Bengal the improvement is due to increasing consumption, which was temporarily checked in 1885-86, owing to a bad agricultural season, and in the North-Western Provinces to general improvement and partly to the abolition of the excise monopoly at Cawnpore and Allahabad. In Madras the extension of the free supply system and other administrative changes, together with the transfer to this head of the duty on country spirits excised at import rates, from the head "Customs," caused the large receipts in that presidency, but these were partly counterbalanced by the transfer to "Customs" of the duty on Colombo arrack and by the abolition of the arrack monopoly. In Bombay the improvement is due to large removals of country liquors to supply the workmen employed on the construction of the Southern Mahratta Railway, to large consumption of Uran Mowra spirit and to an increase in tree-tapping license fees and still head duty recoverable on toddy spirit. Under *Opium*, Burma, Bengal and Bombay report increased sales, and Madras diminished imports from Indore in consequence of the large stock at the beginning of the year. The falling off under "*Other Receipts*" as compared with the actuals of last year occurs chiefly in Bombay, and is due to the fact that the contributions towards the cost of Abkari Police, included in the accounts of 1885-86, have this year been shewn under "Police." The unsettled state of the country accounts for the disparity between the actuals and the estimate in *Upper Burma*.

	Accounts .	9,2	73,3	102,8	51,3	803,6	668,6	373,7	649,7	267,6	2,999,8

32. The fluctuations in India, Assam and Bengal do not call for remark. The smaller receipts in the Central Provinces are due to advance collections having been made in 1885-86 as explained in last year's report. The rates in Burma have kept pace with the increased collections under "I, Land Revenue," during the pacification of the country. In the North-Western Provinces the larger yield from "Local Rate Fund" and "Acreage Cess Fund," is due to new assessments sanctioned by the Board of Revenue, chiefly in the district of Jaunpore. In the Punjab, the increase is due partly to realisation of arrears and partly to the establishment of Patwari Funds in connection with new

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

settlements. In Madras, there was a prosperous agricultural season, and the collections were larger than was expected in the Budget. The enhanced rates in Bombay are due to new settlements in Hyderabad and to extension of cultivation. In the Bombay Budget the Sind Village cess was entered under "Land Revenue".

VII.—Customs.

		Burma.	Bengal.	Madras.	Bombay.	Total.
Sea Customs.

	Accounts .	2,1	6,9	2,7	6,9	18,6
Upper Burma Receipts . .	Budget . . 1886-87 . .	2,5	...	...	...	2,5
Total .	Accounts . 1885-86 . .	575,3	325,9	93,4	205,4	1,200,0
	Budget . .	532,5	330,0	109,7	201,0	1,173,2
	Revised . . 1886-87 . .	560,8	304,7	128,4	218,0	1,211,9
	Accounts .	581,2	315,5	125,7	223,9	1,246,3

33. *Import duties.*—The increase in Burma is due to large collection of duty on arms imported by the missionaries for the protection of the Karens, as well as to large clearances of liquor from bond in anticipation of the new rates of duty introduced by the tariff of 1887. The improvement in Bengal is the result of a better import trade. In Madras, the transfer to this head of the duty realised on Colombo arrack, from the head "V Excise," explains the excess. The increase in Bombay is due partly to expansion of trade, and in a small measure to the change noticed above in the rates of duty on liquors.

34. *Export duties.*—The collections fell off both in Burma and Bengal in consequence of a decline in the shipments of rice, brought about by the prevalence of low prices in Europe, but the falling off was not so great as was provided for in the Budget. On the other hand a revival of the coast trade led to larger shipments of rice to Karikal, Ceylon and other places, and produced the improvement noticeable in Madras and Bombay.

VIII.—Assessed Taxes.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
1	India	274,2	197,0	124,2
23,2	Central Provinces	38,4	38,4	40,3
...	Assam	18,0	19,0	20,5
153,4	Bengal	360,0	361,4	364,5
119,3	N.-W. Provinces and Oudh	205,0	220,0	222,0
38,0	Punjab	90,0	93,9	112,4
43,4	Madras	130,0	123,4	154,3
125,6	Bombay	342,5	295,0	316,5
503,0	Total . .	1,458,1	1,348,1	1,354,7

35. This being the first year of the Income Tax it was difficult to frame a correct estimate of the proceeds. The result shews that the India and Bombay estimates were too high and the others too low. In Madras and Bombay the tax was realized on the surplus profits of the Guaranteed lines and not on the net traffic receipts as was anticipated in the budget.

36. The fluctuations in India and Assam are normal and do not require special notice. The reduced receipts in the Central Provinces are attributed to a smaller supply of sleepers to the Nagpur-Chattisgurh State Railway than was comtemplated in the Budget, and to increased activity in the working of private forests. Burma also compares very unfavourably with the Budget and the revised estimates for the year, and the decrease is chiefly in Upper Burma, where the disturbed state of the country interfered with work in the forests. Bengal reports that owing to reduced sales of depôt timber, the Budget was not reached, but the old stock of sleepers having been transferred to the State Railway department; and a good demand having arisen for firewood and charcoal, the collections exceeded last year's revenue. It may be added that the scarcity of sound timber near market centres in Darjeeling produced large arrivals from Nepal and Bhootan. The North-Western Provinces shew an improvement due to arrear collections on account of previous years, to large supplies of sleepers to the Rajputana-Malwa Railway, and to increased manufacture of catechu. The Punjab revenue was benefited by the extension of the sleeper trade, by stronger demand for depôt timber and fuel and by increased grazing dues. In Madras the estimates, both original and revised, were not reached, and the failure is due to abatement in the demand for sál sleepers in Ganjam, temporary depression of sales in Godavari, and to diminished transactions in teak and blackwood in the Nilgiris. Bombay actuals shew an increase over the original estimate, although they fall short of the figures of 1885-86, which was an exceptional year. The improvement as regards the Budget is due to increased demand for sleepers for the Southern Mahratta Railway and for fuel in Sind by the North-Western Railway. The difference from the figures of last year, on the other hand, is the result of lower prices for myrabolams, and of a decrease in grazing and grass fodder receipts consequent on the abolition of the grazing fee in some places.

	Accounts	1886-87	1,6	7,8	2,9	3,6	103,8	34,5	19,3	87,2	38,4	299,1

37. The figures under India, Central Provinces, Burma, and North-Western Provinces do not shew any great fluctuations that call for notice.

38. The registration fees in Bengal went up steadily till 1885-86 and the Budget was based upon the increase of that year. In 1886-87 it was noticed that the expansion had received a check and the revised estimate was accordingly lowered, but even this forecast has not been reached in the actuals. Punjab shews an advance, and it is stated to be due to an unfavourable agricultural season which led to a larger number of documents being presented for compulsory registration.

39. The increased revenue in Madras, as compared with the original Budget, is mainly due to the introduction of a revised scale of fees in May 1884, the effects of which upon the revenue are still in operation. The result, however, does not compare so favourably with the actuals of 1885-86, but those receipts were augmented by the registration of a large number of joint-stock companies.

40. Bombay follows the actuals of last year closely in spite of the reduced rate of copying fees introduced in September 1886, which was estimated to involve a loss of 1,5, but this was compensated by an increased number of registrations chiefly in the Deccan.

41. The realisations are satisfactory, and the actuals follow the estimates very closely except in Bombay, where there is a fall under "*Tributes and Contributions*" in consequence of the Junaghur tribute of 2,3 which was taken under this head in the Estimate, having been transferred to the Kathiawar Police Funds in connection with the scheme for the abolition of the Gaikwar's contingent. The Police funds are excluded local funds. The deficiency in Upper Burma is attributable to the expected tribute from the Shan States not having been finally determined or realised.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1885-86. Accounts.	Budget.	1886-87. Revised.	Accounts.
9,805,3	9,675,2	9,786,0	9,746,2

42. The following are the more important events which have influenced the payments comprised in this group. The rise in *Assignments and Compensations* is due to arrangements made with the Meywar State, to receive the Postal collections of the British Government in that territory as payment of its salt compensation, which has resulted in an advance payment in 1886-87. In Bombay the alienated revenue in certain districts is now adjusted at new survey rates, thus causing an excess charge in this head and a corresponding excess credit in Land Revenue. The saving in *Land Revenue* occurs in the estimate for Upper Burma and in a large over-estimate in Bengal. The difference under *opium* is caused by the crop in Bengal being much smaller than in 1885-86 though larger than anticipated in the Budget. The *salt* expenditure was largely increased in Bombay partly for arrear charges in consequence of demands for Baragora salt from the North-Western Provinces, owing to a temporary stoppage of the production at Sambhar Lake. Under *Provincial Rates* a change has been made in showing the cost of collecting the Public Works cess in Bengal. The augmented expenditure on account of *Assessed Taxes* is due to the introduction of the Income Tax.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

43. The fluctuating character of *Refunds* and its liability to be affected by changes in administrative measures have been explained in previous reports. The following are the chief features in the accounts of 1886-87. The Bombay actuals include 2,5 on account of an "Inam village" resumed in 1858-59 and now restored. Assessed Taxes shew an increase of 13,9, and it has occurred chiefly in Madras, where a refund of 8,3 had to be made to the Madras and South Indian Railway Companies on account of Income Tax, levied on the net profits, which the subsequent rulings of Government exempted from assessment, as they were not in excess of the guaranteed interest. "Other Revenue Refunds" shews a large increase in Burma, where the portion of "Excise Revenue" due to Local Funds was paid to them and charged to this head. The excess in Bombay is also due to large Excise refunds, not contemplated in the Budget.

44. The excess against Meywar is a payment in advance consequent upon an arrangement by which the collections of the British Post Offices in that State are taken over by the Durbar instead of being conveyed to the nearest British treasuries. The amounts payable to Joudhpore and Jeypore were not drawn during the year. The sum paid to Bhutan includes the subsidy for 1885-86 and 1886-87. The transfer of some pensions from Gwalior to the Agra Treasury explains the increase in the North-Western Provinces. In the Punjab the saving is ascribed to lapses of pensions.

45. In Bombay the distinction between the first two heads, "Pensions in lieu of resumed lands" and "Inamdars and other grantees," was not sufficiently observed, and hence the discrepancy in them between the estimate and accounts is partly nominal. Allowing for this, the real amount requiring explanation is a large excess under "Inamdars and other grantees" which arises from the alienated revenue in certain districts in Sind having been adjusted at new survey rates. This adjustment has caused an increase in the revenue head, 1—Land Revenue. Under the last two heads, there was a large saving chiefly in compensations payable in Portuguese India, but on the other hand there was an excess of 3,5 in the Excise compensations. The large difference under these heads between the actuals of 1885-86 and 1886-87 is due to an exceptional payment in the former year of three years' compensation allowed by the mixed commission to owners of salt pans in Portuguese India.

46. There has been an addition to the *charges of District Administration* in India, the Central Provinces and in the North-Western Provinces and Oudh in consequence of the transfer to this heading of Putwari expenditure which was entered in the India Estimates under 18, General Administration, and in the other provinces under Land Revenue, but in the minor head, allowances to district and village offices. Assam shews an excess over 1885-86, but this is met by a saving under commission on collections due to the gradual extension of the Tehsildari in place of the Mouzadari system. There is also an excess in Bengal owing to a change of classification by which certain charges of Wards' Estates are brought into this account from 18, General Administration. The Punjab estimate made too large a provision for the Kanungo scheme which is being gradually introduced into that Province. The savings in Madras and Bombay were effected by the absence of highly paid officers on leave out of India, and by short payments on account of travelling and other allowances. Under *Survey and Settlements* 2,5 provided for the Coorg Survey was not required, as the work is carried out by the Mysore Revenue Survey Party. In the Central Provinces and Burma, operations were not carried out to the extent intended, and in the last named province the office of Settlement Secretary was abolished. The Assam, Bengal, North-Western Provinces and Punjab Estimates were too high. The large expenditure in Madras is attributable to the Survey in Tanjore and Wynaad Taluk being accelerated and to the revised demarcation in South Arcot. The excess in Bombay is connected with the erection of boundary marks in Sind. The heading *Land Records and Agriculture* is the outcome of a change in classification, and includes items that formerly passed under various other heads, and the comparison with 1885-86, and the budget, cannot therefore be made this year. As regards *management of Government estates* the large expenditure in Bengal in 1886-87, as compared with the previous year, is due to charges for collecting the revenue, but on the other hand, the amount estimated for outlay on improvements was not all utilised within the year. *Commission on Collections* was high in Burma as the result of improved revenue collections. The head *Allowances to district and village officers* has been largely affected by the transfers to District Administration as noticed above, and to assignments and compensations where there has been a corresponding increase. The Punjab outlay was greater in 1886-87 than in 1885-86, principally because the Putwari fees were funded in several districts. The apparent saving in Bombay comes from the pay of village officers in Sind having been classified under Police. The differences under *Upper Burma* charges are due to the failure of revenue and consequent non-payment of commission. In England no fresh pa

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

ments were made for law charges in connection with appeals from India, but on the other hand, a claim that was expected to fall into the accounts of 1885-86 was not presented tile 1886-87.

4.—Opium.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
	BENGAL—			
51,8	Behar Agency Establishment and Contingencies	52,3	51,5	51,3

3,057,7	TOTAL	2,650,5	2,785,3	2,729,1

47. The expenditure on Opium depends mainly upon the quantity produced, as it consists chiefly of payments to culivators for the crude drug, and manufacturing charges. In the Behar Agency the crop was larger than in 1885-86 though it fell short of the Budget. The great increase has been in Benares, and hence in spite of savings in the grant for purchasing Malwa Opium, in establishments and other charges, the expenditure exceeded the estimate under "payments to cultivators and manufacturing charges" by 124,6. The Bombay figures do not call forn o tice.

48. In India the chief reduction is under "Establishment and Contingencies" at Sambhar where the commission was small in consequence of a falling off in collections, and under "Purchase and Freight," from the closing of the Lala Musa Depôt. A smaller quantity of salt was also manufactured at Sambhar and the Punjab mines, than anticipated. In Bengal

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

the transfer to Madras of the management of the Orissa Salt sources, as noticed under the revenue head, explains the decrease in establishment and contingencies. This transfer has added to the Expenditure in Madras, which, in 1886-87, included also a special payment of 10,1 to the Kundapur licensees for the suppression of salt manufacture. In Madras moreover the difference between the budget and accounts arises from a change in the treatment of the salt and excise establishments. The charge for Purchase and Freight is gradually decreasing as the excise system is substituted for the Government monopoly. The large increase in Bombay under "Purchase and Freight," includes arrears of 1885-86, to meet the increased demands of Baragora Salt from the North-Western Provinces, owing to a temporary stoppage of the production at Sambhar Lake.

3	Exchange	...	1	1
124,4	TOTAL	105,8	117,6	116,7

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

50. The saving in Burma is due to the abolition of the office of Commissioner of Excise during a portion of the year and to less payments for rewards and contingencies. In Assam also the saving is due to the abolition of the Excise Establishment in Sylhet. In Bengal the administrative changes resulting from the recommendations of the Excise Commission have cost less money than was estimated. The saving of 8,0 in the Punjab is due to the grant for the salary of a Commissioner of Excise, provided for in the Budget, not having been utilised. In Madras the Budget under Salt comprised the combined establishment of the Commissioner of Salt and Excise Revenues, as explained in last year's report, and hence the omission of the figures in the Budget column here. In accordance with subsequent orders, the excise portion has been deducted in the revised and actuals from the total of the Salt head and shewn under 7—Excise.

8.—Provincial Rates.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
	ESTABLISHMENT AND OTHER CHARGES—			
3,7	Burma	4,3	4,4	5,1
5	Assam	5	5	4
20,7	Bengal	19,0	19,0	22,6
6	N.-W. Provinces and Oudh	7	7	6
16,0	Punjab	16,6	16,8	17,2
5,6	Bombay	5,5	5,6	5,2
47,1	TOTAL	46,6	47,0	51,1

51. The increase in Burma and the Punjab is due to larger cost of collecting the increased revenue from Rates and Cesses. The small decrease in Assam is attributed to the extension of the Tehsildari system. The rise in Bengal is due to a change of system in dealing with the cost of collecting the Public Works Cess in sixteen districts of that Province. Previous to October 1886 the amount used to be charged to contributions from Provincial to Local, but these contributions having ceased, it is now debited to this head, and a separate adjustment made with the Local Funds concerned. In Bombay the apparent saving is due to the transfer of refunds (which were debited to this head in 1885-86), to the proper head of charge "Refunds and Drawbacks."

9.—Customs.

			Burma.	Bengal.	Madras.	Bombay.	Total.
Charges at the Principal Ports of Rangoon, Calcutta, Madras, Bombay.	Accounts	1885-86	9,9	45,0	6,4	30,8	92,1
	Budget	1886-87	10,2	45,7	6,2	32,1	94,2
	Revised	1886-87	10,3	46,9	5,9	31,3	94,4
	Accounts	1886-87	10,2	47,4	6,2	31,3	95,1
Charges at other Ports	Accounts	1885-86	7,3	4,0	10,1	17,2	38,6
	Budget	1886-87	7,1	4,1	10,6	17,4	39,2
	Revised	1886-87	7,0	4,1	10,5	17,4	39,0
	Accounts	1886-87	6,9	4,0	11,4	18,4	40,7
Total	Accounts	1885-86	17,2	49,0	16,5	48,0	130,7
	Budget	1886-87	17,3	49,8	16,8	49,5	133,4
	Revised	1886-87	17,3	51,0	16,4	48,7	133,4
	Accounts	1886-87	17,1	51,4	17,6	49,7	135,8

52. In Bengal the Budget was insufficient and was corrected in the Revised estimate. The increase over the actuals of 1885-86 is due to the construction of four new boats and to temporary establishments. The slight increase in Madras is caused by the transfer to this head, with effect from 1st April 1886, of the charges for Petty Construction and Repairs, which were shewn under "Buildings and Roads, Civil Works" in 1885-86. The results in Bombay closely approach the original Budget, the excess over the actuals of the preceding year being due to the enhanced salary drawn by the Collector, Presidency Division, who acted in a higher grade, and to the construction of a steam launch for the Collector of Customs, Karachi.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

10.—Assessed Taxes.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
...	India	..	1	1
...	Central Provinces	3	2	1
...	Assam	5	7	5
9,1	Bengal	36,5	28,0	27,0
6	N.-W. Provinces and Oudh	2,5	5,0	3,9
1	Punjab	2,5	3,5	3,4
7	Madras	8,0	6,8	6,2
2,0	Bombay	8,4	8,4	8,9
12,5	TOTAL .	58,7	52,7	50,1

53. The figures of 1885-86 represent charges on account of License Tax only, and they do not, therefore, bear any comparison with the results of the year under report. The estimates for 1886-87 were necessarily rough, as there was not sufficient information available at the time for a more accurate forecast of the expenditure needed to administer the Income Tax.

54. The increased expenditure in India as compared with the actuals of 1885-86 occurs in Coorg and Ajmere. In Coorg it is due to more active work in timber and extension of plantation, and in Ajmere to enhanced charges for protection of firewood and charcoal from fire.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

These charges were provided for in the estimates. The savings in the Central Provinces are the consequence of reduced charges for feed and keep of live stock. There are savings also in the salaries of gazetted officers. In Lower Burma (Pegu Circle) timber operations were limited, resulting in a saving of 6,0, and some survey work was postponed, for which 4,0 was provided in the Budget. The saving in the Upper country is mainly due to the unsettled state of affairs preventing the forests from being properly conserved, and thus leading to a curtailment of the expenditure. The Bengal Budget was rather high and savings have accrued in the pay of temporary establishments, feed and keep of cattle, and purchase of stores. Certain sanctioned works in Palamow and Singbhoom were not carried out, but for all that the actuals are in excess of the figures of 1885-86, partly by reason of a larger number of officers being on duty during the year, and in a larger measure to increased felling operations for supplying sleepers to the State Railways. The greater economy in the North-Western Provinces than was contemplated in the estimates, is due to the absence of the Conservator, Central Circle, whose *locum tenens* drew a smaller salary, as well as to the stoppage of scantling operations. Greater activity in the demand for sleepers led to the excess in the Punjab over the estimate, and the actual of the past year. In Madras considerable progress is being made in felling operations and the accounts of 1886-87 include a special payment of 7,5 on the revision of the Tekadi lease in South Coimbatore. The Bombay excess is mainly due to increase cuttings to meet the requirement of the Southern Mahratta Railway, and to large supplies of fuel to the North-Western Railway, as noticed under the revenue head.

55. The decrease in Bengal is due to the transfer of Land Registration charges, provided under this head in the Budget, to "3—Land Revenue." The saving under Superintendence in the North-Western Provinces and Oudh has accrued from the grant for office furniture having been used to a very small extent.

Section B.—INTEREST.

1885-86. Accounts.		1886-87. Budget.	Revised.	Accounts.
699,0	RECEIPTS	644,2	680,9	670,5

56. The receipts are less than 1885-86 owing mainly to the extinction of the debt connected with the Mysore Railway, and to postponement of the date on which interest is recoverable in respect of the Madras Harbour Works.

	Accounts .		41,4	15,5	56,9		670,5

57. The two prominent points here are the small amount of interest realised on loans to Native States and private individuals, as shown in the statement given below, and on the overdrawn capital of Guaranteed Railways. The decline under the former head occurs in Madras, where the arrangement with the Southern Mahratta Railway Company in respect of the Mysore Railway has extinguished the debt due by the State, and the passing of the Madras Act II of 1886 has made the interest due on the Madras Harbour works payable annually on the 1st April, instead of half-yearly as was the case before. The interest on overdrawn capital of Railway Companies is always an uncertain quantity, but this year the budget expectations have been realised fairly well. As regards the English figures, the issue of six millions stock during the year greatly increased the cash balance which was abnormally large during a great part of the year. This increases the investment on which interest was received, and the rate of interest obtainable in the latter part of the year was also unusually high.

58. The balances under Loans to Municipalities, &c., have in the last six years stood as follows:—

DESCRIPTION OF LOANS.	31st March 1882.	31st March 1883.	31st March 1884.	31st March 1885.	31st March 1886.	31st March 1887.

+4,579,9	NET IN ENGLAND .	+9,434,5	+10,504,8	+10,503,5
4,100,0	NET IN INDIA AND ENGLAND .	+9,415,4	+10,530,2	+10,520,1*

* The above amounts are exclusive of −82,0, comprising 74,9 charged to Railways on account of Sinking Funds of East Indian, Eastern Bengal and Sind, Punjab and Delhi Railways and 7,1 to Discount Sinking Fund.

60. The 1,208,9 entered under India as debt incurred includes the loan of 1,200,0 raised during the year for the construction of the Calcutta and Bombay docks, and 8,9 obtained by the sale of stock notes; of the debt discharged 1,145,3 belongs to the transfer loan of 1854, which was discharged during the year in England, but the payments have been brought to account in this country, as the loan is held in the Indian register; of the balance of 47,0, 36,6 consists of Nagpur-Raipur Railway Debentures discharged, 2,3 of Government Promissory Notes discharged under special orders, 1,8 payments on account of loans which have ceased to bear interest, and 6,3 of stock notes held by certain Postmasters for sale, but returned, as they could not be disposed of.

61. As regards the English figures, the debt at 3½ per cent. was incurred for the redemption of East Indian and Sind, Punjab and Delhi Railway annuities. Under the 3 per cent. debt the Budget provided the sum required to be raised during the year by issue of Stock. The Revised and Accounts show the nominal amount of the stock issued. This issue was made at an average price of £87 4*s.* 2*d.* per cent. and yielded 5,207,5. The arrangements for dealing with the discount were explained in para. 67 of last year's report. The debt discharged represents (409,7) debentures of the Eastern Bengal Railway due 12th July 1886 and (1,0) the East Indian Railway Debentures which had remained unclaimed since 1871.

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt.

62. The usual statement analysing this charge is as follows:—

1885-86. Accounts.	Rate.	DEBT IN INDIA ON 31ST MARCH 1886. Principal.	Interest.	Budget.	1886-87. Revised.	Accounts.
1,069,3	4½	23,290,8	1,048,0	1,049,9	1,041,0	1,044,9
2,726,0	4	67,759,3	2,710,4	2,755,6	2,704,3	2,725,0
1,5	3½	53,3	1,9	1,9	1,9	9
7,2	Provincial . . .	179,3	7,4	7,4	7,4	7,6
7,1	Stock Notes . . .	153,9	6,2	6,3	6,2	6,8
3,811,1	TOTAL .	91,436,6	3,773,9	3,821,1	3,760,8	3,785,2
6	Interest on Loans in course of discharge . .			1,2	5	7
− 1,3	Discount on new Loans and Miscellaneous . .			...	27,7	5,5
3,810,4	TOTAL INTEREST PAID IN INDIA .			3,822,3	3,789,0	3,791,4
2,795,1	England			3,120,9	3,163,2	3,163,0
879,8	Exchange			1,040,3	1,174,9	1,189,5
7,485,3	GRAND TOTAL, INTEREST .			7,983,5	8,127,1	8,143,9
	DIVIDED INTO—					
3,857,2	Interest on Ordinary Debt			3,886,1	3,943,6	3,949,0
3,628,1	Interest on Debt for Railways and Irrigation Works .			4,097,4	4,183,5	4,194,9

63. As regards India, a full year's interest appears to have been drawn, but the Budget provided also for an arrear payment of 30,0 which has not been claimed. The payments were greater in 1885-86 than in 1886-87, but this was caused partly by the large transfer from the London to the India registers and the settlement with the Madras Civil Fund, as explained in the last year's report. The 5,5 under discount on new loans is composed of the following amounts:—

Discount on the loan of 1,200,0 raised during the year		27,7
Deduct—Discount charged to the Calcutta and Bombay Port Trusts to whom advances were made on the condition that they received the money at the rate at which it was raised		24,6
		3,1
Expenses attending the discharge of the Nagpur-Raipur Railway debentures		2,4
Net charged under Discount .		5,5

64. In England the arrangements for exchanging portions of the Sind, Punjab and Delhi Railway annuity, for India 3½ per cent. stock, had not been completed when the Budget was framed, and the charges could not be accurately divided between this head and annuities. The result shews that the estimate for interest was short by 42,1, while that for "annuities" was 48,1 too high. The large payments in 1886-87, compared with the previous year, represent interest on the new stock issued mentioned above.

65. The interest on *Special Loans* is gradually diminishing, as the stipends payable in connection with the old Oudh Loans are commuted by the pensioners. The details of the interest on *Treasury Notes and Service Funds* are given below. The payments in 1885-86 were heavy in consequence of the Madras Civil Fund having been taken over by Government, which involved a settlement of accounts up to date. The charge for 1886-87 was well estimated, and the same may be said of the *Savings Bank Deposits*. The amount 2,3, which appears against Punjab under *Miscellaneous*, is the correction of a wrong credit under interest in 1883-84 and 1884-85.

Details of Interest on Treasury Notes and Service Funds.

+106,7	MINT (NET)	+87,5	+76,2	+99,9

66. The *Post Office* worked up to the Estimate of the year. The *Telegraph Department* did better than the Estimate, having shewn a deficit of 21,7 only instead of 204,0 as was expected. This was accomplished partly by increased receipts and partly by curtailment of expenditure. The *Mint* result is also satisfactory and has been obtained by reduced expenditure.

1,113,1	GRAND TOTAL	1,157,1	1,166,3	1,154,3

67. Taking the total revenue, the accounts work up closely to the budget and show a satisfactory improvement over the previous year. As regards details it became the rule in 1885-86 to use stamps instead of money for *parcel and other postage* and for commission on *money orders*. This rule is still maintained in respect of the former head and explains the deficiency in it as compared with 1885-86, but in the case of *money orders*, it was abrogated in March 1886 and hence the *money order receipts* in 1886-87 are larger than in 1885-86. These changes increased the *sale of postage stamps*, but it has since diminished to the extent in which the money order receipts that were formerly obtained in stamps are now realised in cash. The large *payments to English and other Post Offices* in 1885-86, included arrears that were liquidated in that year, while in 1886-87 they were specially small in consequence of credit having been given to India for

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

various sums due to her. The *mail cart* and *bullock train* collections depend upon the traffic and are subject to unavoidable fluctuations. The increase in *other receipts* as compared with the budget consists of a large number of small items.

Indian Telegraph Department.

68. Compared with the actuals of 1885-86 the improvement of 85,1 in the actuals of 1886-87 is due to an increase in the number of Government messages, chiefly in connection with Burma, and the general expansion of the Department. In 1886-87 the Secretariat offices of the Government of India ceased paying, by stamps, for their messages, thus reducing the revenue under Sale of Stamps, and increasing it under Receipts by book-transfer.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

69. The increase over the Budget Estimate of the year is owing to the estimate having been framed on the supposition that the Upper Burma revenue would diminish, whereas it greatly increased owing to the extraordinary amount of State messages.

70. The excess over the Revised Estimate is attributed mainly to the increased transmission of State messages connected with the settlement of Burma, and to the credit to Government of certain forfeited security deposits and other receipts previously held in suspense.

Indo-European Telegraph Department.

71. The receipts fell short of those in 1885-86 owing chiefly to the return of the Afghan Boundary Commission and to interruptions on the Persian line in January and February 1886 which reduced the realizations during 1886-87.

72. In the Budget Estimate the diminution of revenue expected to follow the return to India of the Boundary Commission was overestimated.

73. The improvement shown by a comparison of the actuals with the Revised Estimate is owing to a reduction in the tariff for messages to India and the Far East.

Exchange.

74. The exchange, which on this side of the accounts relates to the Indo-European Telegraph only, has been steadily increasing, partly on account of larger receipts and partly on account of the fall in the rate of exchange.

XV.—Mint.

1885-86. Accounts.		Budget.	1886-87, Revised.	Accounts.
202,6	Seignorage on silver	123,5	92,8	93,1
11,1	Gain on copper coinage	50,0	50,0	76,7
	Other Receipts—			
6,1	Calcutta	5,0	6,6	5,5
...	Madras	...	1	...
4,5	Bombay	2,6	6,9	5,0
224,3	TOTAL	181,1	156,4	180,3
...	England	...	...	1
224,3	GRAND TOTAL	181,1	156,4	180,4

75. The uncertain character of this head, consequent on itsdependence on the course of trade, has been explained in previous reports. The estimate of Seignorage duty on silver was based on an average importation which was not reached by the actuals, and hence the falling off in revenue. On the other hand, the absorption of 128,5 of copper coin as compared with 38,5 the quantity which passed into circulation in 1885-86—yielded a profit which was about sufficient to cover the loss on silver, and the net result of the year's operation shews a close approach to the Budget figures. The importation of silver in recent years has been as follows. The seignorage is 2,1 per cent. on bullion received from the Public :—

	Net Importation.	Silver Coinage.	Seignorage.
1879-80	7,869,7	10,257,0	212,0

76. There were small savings under *Chief Office, Calcutta*, but they were more than counterbalanced by an increase of 6 in the Comptroller's Establishment sanctioned during the year, and of 1,0 in Tour charges, due to the deputation to Simla of clerks from the Offices of the Comptroller and the Inspector General, Railway Mail Service. The charge for *Presidency and District Offices* shews a small increase in salaries consequent on the absence of officers on privilege leave, and in establishment consequent on new appointments sanctioned during the year, but on the other hand the amount reserved for expenditure under the Director General's orders was used to a small extent only. The increase in *other charges* occurs chiefly in travelling expenses. The charges for *coveyance of mails* is regulated largely by the traffic and the accounts have followed the budget closely so far as the totals are concerned, but there are differences in the component items. The head *road establishment* now includes amounts which were formerly taken as *mail cart establishment* and has caused the actuals of those heads to differ from the budget. The excess in Bullock Train charges has occurred in contingencies. In the mail cart charges, some reductions were effected amounting to 1,1 in the lines from Belgaum to Dharwar and Hublee to Haveri consequent no doubt on the further opening of the Southern Mahratta Railway. Under Railway charges a saving of 3,4 is reported in the conveyance of banghy parcels. The increase under *other charges* after Discount on Sale of Postage Stamps occurs in printing at private presses (1,7), construction and repair of Post offices (5), compensation for loss of insured parcels (4), awards against the Guarantee Fund (1,8) and Loss by Exchange on Continental money orders (2,9). This loss by exchange was not provided for in the estimate.

77. As regards *District Post Charges*, India reports that a considerable saving was effected during the year 1886-87 in the establishment of Postal Sowars in the Bolan. In Burma the subsidies for conveyance of mails on the Irrawaddy were reduced, and the district postal service was not extended so much as the budget anticipated. There has been nothing special in the other provinces.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

78. The excess over the budget in the English expenditure for stores is due to larger indents having been sent from this country than were expected when the budget was framed.

Indian Telegraphs—Imperial.

79. The actuals both in India and England fell short by 36,0 of the preceding year, owing chiefly to more than the average quantity of stores having been obtained in 1885-86 to

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*concluded.*

replenish articles used during the Afghan Expedition. The reduction due to this cause was 75,2, but there was an increase of 44,3 under maintenance and working, owing to heavy outlay in Burma, increase in salaries, and expansion in the number of offices.

80. On account of anticipated increase in the number of combined Post and Telegraph offices and provision for increased pay to certain classes of officers, the Budget Estimate was passed for 58,2 more than was actually spent.

81. The decrease brought out by a comparison with the Revised Estimate is attributed to works not having been advanced or new offices opened to the extent anticipated.

Provincial.

82. The differences and the amounts themselves are unimportant.

Indo-European Telegraph.

83. The decrease of 80,1 is almost entirely due to the figures of the preceding year including the cost of the third Bushire Cable.

84. The Budget provided for the normal outlay, but not for the maintenance of the Teheran-Meshed telegraph line, provision for which was made in the Revised Estimate. The actuals fell short of both Budget and Revised Estimates owing to an underestimate of the issues of stores.

Exchange.

85. The exchange was smaller than in 1885-86 owing to the abnormally heavy outlay in England in that year for the Jask-Bushire Cable. The decrease brought out by comparison with the Budget and Revised Estimates is owing to diminution in expenditure mainly in payments for stores.

17.—Mint.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.

7,0	„ Exchange	2,3	2,7	2,5
117,6	GRAND TOTAL	93,6	80,2	80,5

86. The saving under "Loss of weight in coinage" is due to a smaller outturn of work in silver, as explained under Revenue. The actuals in Bombay include a special payment of 1,2 to the Portuguese Government on account of seignorage duty, under the monetary convention sanctioned in the orders of Government No. 422, dated 27th January 1887. The budget for other charges in Calcutta included 6,2 on account of purchase of copper by the Mint Master, but the amount was subsequently transferred to its proper head and adjusted through the "Copper coinage account" subordinate to "Deposit and Advances."

88. The falling off in India is due to smaller receipts on account of "Sale proceeds of unclaimed and escheated property" from the Administrator General than expected in the Budget. The figures in the "Central Provinces" correspond closely with the Budget and do not call for explanation. Burma shews a small decrease under "General Fees, Fines, &c.," owing to interference with trade, caused by the unsettled state of some of the districts. The fluctuations in Assam and Bengal are made up of small differences which occur principally in the receipts on account of "Fines and Forfeitures" of the Magisterial

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

Courts. In the North-Western Provinces and Oudh, the decrease as compared with the actuals of 1885-86, under "Sale proceeds of unclaimed and escheated property," comes from inclusion in the last named year of a special escheat as noticed in last year's report. The receipts on account of "Court fees, Fines, &c.," on the other hand, shew an increase in consequence of larger collections of "Distrainers' Fees" and "Recoveries on account of pauper suits," while "other receipts" were augmented on account of the large number of candidates that were admitted during the year to the Pleadership Examination. Punjab shews an improvement, and it occurs chiefly under "General Fees, Fines, &c.," on account of larger receipts of Magisterial fines. In Madras the short receipts under "Sale proceeds of unclaimed and escheated property" were covered by the excess under "General Fees, Fines, &c.," from larger receipts on account of Magisterial fines. In Bombay the Budget estimate was low and the actuals bear out the revised figures, which were based on the actuals of ten months. The increase occurs chiefly under "General Fees, Fines, and Forfeitures."

89. "Convict receipts at Port Blair and Nicobars" in India were small as compared with revised estimate, which was raised in expectation of recoveries from Native States, that were not eventually realized. The increase in the Central Provinces, as compared with the Budget, is due to an extension of manufacturing operations during the year, and larger sales of jail produce. This improvement set in after the Budget was framed, but it was provided for in the Revised Estimate. In Burma the sale of rice husk was greater than usual, owing to the increased quantity of paddy purchased for the maintenance of the large number of prisoners. In Assam the receipts on account of "Sale proceeds of jail manufactures" and "Other jail receipts" are smaller than the Budget on account of the larger number of men employed on extra-mural labour, and consequent decline of the jail manufactures. Bengal does not call for notice, but in the North-Western Provinces and Oudh the actuals exceed the Budget by 8,5 under "Hire of convicts," owing to the concentration of prison labour, and the completion of the Benares and Fatehgarh Central Prison buildings. The falling off in the Punjab is attributed to decrease in the prison population on account of Jubilee releases, and to the increasing difficulty experienced in providing intra-mural work of a remunerative character for the prisoners. In Madras jail receipts shew a steady decrease in consequence of restrictions which have been placed on jail manufactures generally. The decrease in Bombay, as compared with the actuals of 1885-86, is due to smaller receipts from hire of convicts and recoveries from Native States, partially arising from the Jubilee release of prisoners in February 1887.

90. The increased receipts in India are on account of larger recoveries for Police supplied to Railways. In the Central Provinces, the contribution from the Great Indian Peninsula Railway has been deducted from expenditure, and hence the apparent falling off as compared with the Budget and Revised. A corresponding reduction (2,5) appears under the head "20 Police. Burma shews a large excess over the Budget as well as the actuals of the year 1885-86, and it is due to the introduction of Preventive Police in the disturbed districts and the recovery of the cost from the villagers. The receipts in Assam and Bengal closely follow the estimates and do not call for explanations. In the North-Western Provinces the recovery on account of Railway Police has been deducted from the expenditure as in Central Provinces: the actuals otherwise shew a better result, due to larger receipts on account of fines on stray cattle. In the Punjab, nothing was realised under "Police supplied to Railways" owing to the transfer of the Sindh-Punjab and Delhi Railway to the State. The falling off under "Other Receipts," as compared with the actuals of 1885-86, is due to a special item representing the balances of certain local Equipment Funds having been included in the accounts of that year. Madras shews an improvement as compared with the original estimate, and the increase would have been larger were it not for the decline under "Police supplied to Municipal, &c.," caused by the postponement of the Punitive Cess in Malabar. The increase under "Fees, Fines and Forfeitures" is due to a larger number of pounds and to the recovery during the year of certain arrears on account of 1885-86. "Other Receipts" also shew an excess over the Budget in consequence of the transfer to this head from "XXXII Civil Works" of the rents of "Policemen's huts," and of a specially large credit for the value of the unserviceable arms and accoutrements returned into the Military Store Depôt. The large falling off in Bombay is almost nominal as the various contributions are deducted from the expenditure as explained above.

91. The improvement in *Pilotage Receipts* is due to the transfer of the Chittagong and Balasore receipts in Bengal from the Port Funds to this head. The large proceeds of *Dockyard Services* come from more work having been performed for other Departments than was anticipated in the Budget. The *Sale-proceeds of Vessels and Stores* were also large owing to the sale of the "*May Frere*" and "*Czarevitch*," and of obsolete and surplus stores consequent on a reduction of stock in the Kidderpore Dockyard. The large difference in *Other Receipts* between 1885-86 and 1886-87 consists of special items connected with the expedition to Suakim, which passed into the accounts of the former year, as explained in the last report. In Burma, one of the steamers on the Arakan line having been under repair, earned no freight for the time, and this accounts for the Budget under this head not having been realised in that Province.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

92. Education shews an improvement of 7,6 as compared with the actuals of 1885-86, and it would have been larger were it not for the falling off in Burma, Madras and Bombay. In Burma the decline is noticeable under "Other Receipts," and is due to the abolition of the Government Book Depôt and the transfer of the Myoke and Thugyi examinations to the Educational Syndicate. The increase in the North-Western Provinces occurs chiefly under "Fees and Fines" in consequence of enhanced rates of fees introduced during the year, and under "Other Receipts" from a special credit for the sale proceeds and interest of Government Promissory Notes which were purchased many years ago out of public grants to the Muir College Fund. In the Punjab the short receipts under Fees and Fines, as compared with the Budget estimate, as also with the actuals of 1885-86, are due to the transfer of several schools to "Municipal" control and the consequent transfer of the fees to Municipal funds. The increase under "Other Receipts" covers a special item of 2,0 recovered for sale of Books; it was provided for in the Revised estimate. In Madras six high schools were transferred to Municipalities during the year and one was closed, and all the Government middle schools were made over to local bodies. Several primary schools were raised to the middle school standard, but the loss from this measure was counterbalanced by an improvement in the Local Section. The estimate of Fees Schools, Special, and Fees, Government Colleges, general, was rather low.

93. In Bombay the Budget was more than usually conjectural owing to the state of transition through which the department was passing from the transfer of certain schools to Municipalities, &c. The excess in the actuals is due to the postponement of these transfers and to a special credit given to the Book Depôt Fund in connection with the "Antwerp Exhibition."

95. In India the *Receipts on account of Public Exhibitions and Fairs* shew an apparent falling off, as the items entered under that head in the Revised Estimate were transferred to credit of "Civil Deposits" under orders of Government. The estimate under *Sale of Instruments and Stores*, &c.," was too high, as this year a change was made in the supply of maps and work done by the Surveyor General's Department, and the effect of this measure upon the accounts could not be accurately ascertained at the time.

96. In Bengal, the yield under *Cinchona Plantations* was again low, owing probably to the importation of cheap Quinine, which held the prices of the local manufacture in check. The increase under *Botanical and other Public Garden Receipts* in the North-Western Provinces and Oudh is connected with the Lucknow Horticultural, and Saharanpur Botanical Gardens, while the abatement under *Labour and Emigration* is due to a change in accounting, by which the portion of emigration fees due from Bengal is adjusted inter-pro-

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*concluded.*

vincially. The fluctuations in the Punjab are unimportant. The falling off in Madras is chiefly due to the low prices for Cinchona bark which ruled throughout the year. During the three years, 1884-85 to 1886-87, the quantity sold in Madras has been lb. 81,880, 110,800, and 85,000, respectively, and the average price 100·6, 86·2 and 77·4 per 100lb. In Bombay, the increase under *Receipts on account of Public Exhibitions*, &c., is due to large private contributions to the Horse Show at Shikarpore.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	1886-87. Accounts.
12,243,7	EXPENDITURE . . .	12,354,9	12,650,1	12,698,5

97. This expenditure has been influenced by various minor changes as explained in the corresponding revenue head Receipts by Civil Departments. In comparing the figures of 1885-86 and 1886-87, the important differences are an excess expenditure in the last-named year of 432,4 under *Police* and 323,4 under *Marine*, arising almost entirely out of demands in Burma. On the other hand, there is a saving of 395,9 under *Political* in connection with subsidies and the charges of the Afghan Delimitation Commission. As between the Budget and the Accounts of 1886-87, the former has been exceeded by 267,2 under *Police* and 189,2 under *Marine*, and here too the principal cause is Burma.

98. Under India the excess in the actuals over the estimate for *Staff and Household* and *Secretariats* is largely due to a change in classification and in a smaller measure to increased charges for service telegrams and other contingencies which however were not so high as in the previous year. The change in classification is that, hill journey charges. were formerly entered under Tour Charges and Rents, Rates and Taxes under 32 Miscellaneous, other items, whereas now they are charged against the various Departments with which they are connected. This accounts for the large saving under *Tour Charges*. The estimate under *Durbar Fund* was 5 too low. Originally the fund was fixed at 1,20 a year, but in 1884-85 the grant of 2,5, given under *Tour charges* was raised to 3,0 and transferred to the Fund. In 1886-87, 1,5, was added for furniture at Government House, thus raising the total estimate to 16,5 which was the amount spent. The head *Other Charges* in India includes in 1886-87 3,7 on account of the late Finance Committee. The wide discrepancy in the Central Provinces Budget under *General Establishment of Local Fund offices*, refers to the expenditure on account of the Putwari Fund which is now taken under Land Revenue. The amount of 26,3 for *Upper Burma* is the whole charge under this Major Head for which adequate provision could not be made at the time the Budget was framed. In Bengal and North-Western Provinces the saving in *Tour Charges* is nominal and comes from the transfer to *Secretariat* of items which belong to that minor head. The *Secretariat* charge in Madras includes the expenses of a special officer for six months to arrange the records of the Government Office. In Bombay the increase in the *Account offices* is owing to the presence of more officers than was contemplated in the Budget, to the privilege leave allowances of officers, and to a change in dealing with the charge for establishment employed on Local Fund Work. The reductions under *Allowances to Presidency Banks* are attributed mainly to the results of the new agreement; but in Madras and Bombay portions of the amounts due were not drawn in the year. The differences under *Local Fund Establishments* are due mainly to changes in accounting by which portions have been transferred to the Major Head "Land Revenue;" but in Madras and Bombay some additional establishments were entertained during the year.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

99. There is a net decrease of 8,4 in the English Expenditure, of which 3,9 is due to the transfer to the Inland Revenue Department of the manufacture of stamps for India, and to the fact that no payment to that department was made in 1886-87. There were also savings of 2,1 in telegrams, 1,0 in management of debt, 6 in Law charges and 8 in office contingencies.

100. The decrease under Bengal *High Court* occurs in the salary of Judges, and is due to two vacancies not being filled up and also to the new Judges drawing less pay than their predecessors. These changes were only partially allowed for in the Budget. In Madras a good deal of expenditure was incurred in printing and translation for the High Court, while in Bombay a temporary additional Judge was retained under sanction of the Secretary of State. In Burma an additional Recorder was appointed during the year.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

101. The increase under *Civil and Sessions Courts* in Burma and Bengal is caused by the appointment of Additional Judges. The Central Provinces estimated under this head for the full cost of the Reorganized Judicial staff, but some of the officers were deputed on settlement duty, while the charges for others were partly taken under Land Revenue.

102. The difference between the Budget and Accounts in the Central Provinces under *Criminal Courts* is partly explained by the fact that the duties of the Cantonment Magistrate at Jubbulpore are now performed by the Superintendent of Jails with an extra allowance. The excess in Burma arises from larger establishments and greater contingent expenditure. The savings under *Criminal Courts* in Bombay are attributed to a large number of absentees, while the deputation of some of the Judges of the *Small Cause Courts* on other duties, reduced the charges on that account.

103. In *Upper Burma* the variations from the Budget are ascribed to the full number of courts not having been opened in the country.

104. The English Budget provided 1,5 for the outfit allowance of three Judges, but a payment of 8 only was made to the Chief Justice. There was also a small saving under Stores.

105 The saving in *Convict charges at Port Blair* is in Commissariat stores. In the Central Provinces and Burma there was some increase to the Jail population, and consequently to the charges, counterbalanced to a certain extent by larger receipts, as explained under the head XVI.—B, Law and Justice—Jails. The estimate for *other Jail charges* in Assam was too high, while in Madras three district jails were closed during the year and the inmates transferred to Central Prisons. The Bengal estimate was excessive. In the North-Western Provinces the grant for the Meerut central prison was saved, and savings were also effected in the grant for *Raw materials*. The Punjab expenditure was affected chiefly by the release of prisoners on the occasion of Her Majesty's Jubilee, but still it was greater than the amount spent in the previous year, owing to the high prices prevailing in the province for food-grains. In Bombay, on the other hand, the price of provisions was low, and this, with various small economies, caused the saving in that presidency.

106. India shews an increase both under *District Executive Force* and *Railway Police*, on account of the entertainment of a larger force in Beluchistan. In the Central Provinces the fall under *Railway Police* is nominal, being due to the adjustment of about 2,5 recovered for Police supplied to the Great Indian Peninsula Railway Company, by deduction from the charge side instead of by a per contra credit. The great expenditure under Burma is due to the unsettled state of the country and the introduction of Police to take the place of troops. In Bengal the diminished charge for *District Police*, as compared with the Revised Estimate, is caused by transfer of the Orissa salt management to Madras. The North-Western Provinces saving of 8,2 under *District Force* has occurred partly in salaries and partly in clothing charges, and under Railway Police from the altered system of treating recoveries as noticed above. In the Punjab, the several actuals differ little from the previous year, but the estimates took under *Other charges*

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

amounts which should have been included under *District Executive Force*. Madras reports the opening of additional pounds which caused the excess under *Cattle Pounds*. The Bombay Estimate for *District Executive Force* included the grant for *Special Police* also, and hence the differences under those two heads. The increase in *Village Police* is due to the transfer of Village Cess Police in Sind from Land Revenue, and in *Railway Police* to arrear payments of the Government share of the cost of the Force employed on the Great Indian Peninsula line. The fall in *Presidency Police* is attributable to the Municipal contribution having been deducted from the gross charge.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

107. The saving in *Marine Survey and Establishments* consists of the pay of the Surgeon Naturalist, which was charged against the Gilgit Mission from March to August 1886, and of some other amounts accruing from absences on leave. The expenses connected with the *Dockyards* were also less than the Estimate owing to vacancies in the establishments, and to less labour having been employed on ordinary duty than was expected. On the other hand, the heads *Salaries and Allowances* and *Marine Stores and Coal* shew an excess over the Estimate owing to several vessels having been put in commission and supplied for service in Burma. The increase in *Pilotage and Pilot Establishments* is the result of entering in this account the charges in Chittagong and Balasore (Bengal) from the Local Port Funds. The large amount of *Other Charges* in 1886-87 is due to expenditure on account of Burma for hire of transports engaged for conveyance of troops from India, hire and purchase of steamers and launches employed on the rivers in Upper Burma, and provisions required for Marine establishments in that Province. The excess in the English expenditure is connected with the new Indian Government steamers "*Lawrence*," "*Dalhousie*," "*Muzbee*" and "*Tamil*," and with an unforeseen demand for two stern-wheel steamers for Burma.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

108. The charges under *Education* are largely affected by the general policy of Government to leave the management of schools and colleges to local bodies when possible, and by the extension of the *grant-in-aid* system and *payment by results*. In the Central Provinces the principal difference occurs under *Government Schools*, which now includes the schools maintained from district funds. The accounts of 1886-87, moreover, embrace expenditure postponed from the previous year. In Burma, the Rangoon College and High School were transferred to the Educational syndicate, and on this account there has been no charge under *Government Colleges* in that Province, and the expenditure on *Government Schools* has diminished. The syndicate receives a grant from the State, which is included in *Other Charges*, and explains the excess under that head. The syndicate was established in 1881 "for the purpose of directing and controlling the public examinations to be held under the grant-in-aid rules, and for the purpose of promoting the study of medicine, engineering, law, and the technical arts. It consists of officials, missionaries, merchants, and natives engaged or interested in educational matters." Assam reports several small savings. As regards Bengal the differences under *Government Colleges* and *Government Schools* arise from the transfer of the Bethune Girls' School in Calcutta from the latter to the former head. The other changes are not important, and the same may be said respecting the North-Western Provinces and Oudh, but there the estimate for *Government Schools* was too high. The expenditure in the Punjab was affected by a revision of certain salaries and establishments, by the cost of Putwaris Schools being defrayed from the Putwari Fund instead of as hitherto from Provincial Revenues, and by the transfer of some district schools to municipal management. The excess under *grants-in-aid* includes the Government grant to the Aitchison College Building Fund, and certain contributions made by District Boards for which the estimates did not provide. The Madras estimate for *Government Schools* was too low, while that for grants-in-aid was framed in expectation of considerable retrenchments that were not carried out. In Bombay the excess under *Government Schools* and saving under *grants-in-aid* are the result of a transfer from the latter to the former head of the contributions made to Municipalities. The provision for the Sind Arts College was not utilised, a grant-in-aid having been sanctioned instead, and some board schools were made over to Municipalities.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

110. The saving in Burma under *Medical Colleges and Schools* arises from charges having been paid in other Provinces and adjusted inter-provincially. In Bengal, owing to a change in classification, charges that were entered in the Budget under *Medical establishments* were taken in the accounts under *Hospitals and Dispensaries* and a similar alteration was made in Bombay as regards the heads *Hospitals and Dispensaries* and *Grants for Medical Purposes*. The saving in Madras has accrued largely from absences on leave and also from the employment of officers in Burma.

	Accounts	1886-87							754.8

111. There has been a saving in *Political Agents* since the rendition of Morar to His Highness the Maharajah Scindia. The *charges on the North-West Frontier* have been great this year, as compared with 1885-86 in consequence of increased expenditure in Biluchistan. The *Political Subsidies* paid in 1885-86 included a special grant of 200,0, and the heads *Entertainment of Envoys and Chiefs* and *Durbar Presents* were heavy by reason of expenditure connected with the Rawul Pindi Durbar. The *Afghan Delimitation Commission* in 1886-87 has cost more than was contemplated in the Budget. The excess under Refugees and State Prisoners in India is due to the allowance of Sirdar Ayub Khan having been increased from 8,0 to 12,0, in the Punjab to the stipend granted to Syed Mohamed Badsha, and in Bombay to the expenditure for the ex-King Theebaw. The charges in *Upper Burma* comprise payments to employés of the late Government. In 1885-86 the head *Other Charges* included in the Punjab 29,7 on account of the Rawul Pindi Durbar. Allowing for these special items the budget may be considered too low, but the charges are of an uncertain character and difficult to estimate. In England the grant for Secret Service was not used, but on the other hand expenses arose in connection with the Afghan Boundary Commission which were not anticipated. There was also some unexpected expenditure in connection with the intended mission to Thibet.

112. Under *Survey of India* there were general savings and retrenchments in the establishments, but against this must be set a larger supply of Mathematical Instruments to Survey Parties than was anticipated in the Budget. Practically the Budget has been maintained in the actuals. The cost of the *Geological Survey* was low partly in consequence of absentees on leave, and partly from the appointments of Palæontologist and Artist not having been filled up. The excess in *Other Scientific Departments* is composed of charges for the Petroleum operations in Beluchistan not provided for in the Budget. In 1885-86 the head *Public Exhibitions and Fairs* included charges for the Indo-Colonial Exhibition, but in 1886-87 India spent about 3,6 less than was expected for the International Exhibition. No charges have appeared in 1886-87 under *Agricultural Department* as they are now taken under 3, *Land Revenue*. Bengal provided 2,5 under *Other Agricultural Charges* for a veterinary college which was not started. In Assam and in the North-Western Provinces the items formerly classified as Provincial Statistics are now taken under 3, *Land Revenue*. The excess in Madras includes charges connected with Mr. Macleane's deputation on special duty and the preparation of the Madras Manual of Administration. The Central Provinces and Bombay estimates under *Miscellaneous* included charges for the management of Local Funds, but these are now shown under 18, *General Administration*, in accordance with recent changes in classification.

Section E.—MISCELLANEOUS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
1,077,8	RECEIPTS	763,1	831,4	848,3

113. Compared with 1885-86 the receipts of 1886-87 under this group show a falling off of 229,5 which is more than accounted for by the difference under the head *Exchange*. In 1885-86 there was a net gain by exchange of 264,4 while the accounts of 1886-87 show a loss of 26,3 entered on the charge side. This difference has been mainly due to the loss incurred on the repayment of the stock receipt loan of 1854. A part of the deficiency has, however, been made up by larger receipts under *Stationery and Printing*, owing to recoveries from State Railways of the value of stationery and forms supplied to them. As between the Budget and the Accounts of 1886-87, the latter shows an improvement of 85,2, of which 25,3 occurs under *Stationery and Printing*, owing to the aforesaid recoveries from Railways not having been sufficiently provided for in the Budget; 53,3 under *Miscellaneous*, chiefly owing to receipts in Upper Burma and to some recoveries in Bombay on account of Insurance and other charges on railway stores as explained under that head.

114. Considering the nature of the receipts that come into this head, the fluctuations in the Central Provinces, Burma, Assam, Bengal, and the Punjab are not greater than might have been expected. The North-West Provinces estimate was too low. The India estimate for *appropriation from the capital of the Military Orphan Fund* and for *contributions* was high, and this was also the case in Madras as regards the *subscriptions to the Military and Medical Retiring Funds. Subscriptions to the Madras Civil Fund* are shewn under this head for the first time, and the decrease as compared with the estimate is due to want of information when the estimate was framed. In Bombay the chief difference is under *Subscriptions to the Military Fund*, the estimate for which wrongly contained subscriptions of officers domiciled in Europe and whose contributions are realized in England. The increased receipts under *Contributions for pensions and gratuities* are attributed to the transfer to Municipalities of a number of Local Fund Schools, the teachers of which are allowed to pay contributions for their pensions. In the English figures the excess over the Budget consists of receipts on account of the Madras Civil Fund, not anticipated when the Budget was framed.

XXIII.—Stationery and Printing.

	Accounts		30,3	3,6	1,9	4	22,5	6,2	17,0	9,2	5,7	96,8

115. The receipts from *sale of Stationery* include credits now shewn for the first time for value of Stationery and Forms supplied to State Railways, arrangements for which were made after the Bengal and Punjab Budgets had been prepared. The Revised in India was based on probable receipts from the Rajputana-Malwa Railway, but owing to the transfer of management of that line to the Bombay-Baroda Railway, the actuals fell short of the forecast.

116. The items shown under this head are so fluctuating that the variations require little explanation. The *Gain by Exchange* in India arises chiefly in connection with the coins of native mintage circulating in Central India and the Persian coins used by the Afghan Boundary Commission. The Commission was withdrawn in 1886-87, when transactions in Persian coins ceased, and this explains the falling off as compared with 1885-86

Section E.—MISCELLANEOUS—*concluded.*

while a decline in the rate of exchange in Hyderabad accounts for the excess in the actuals over the Budget. Under *Premium on Bills* the actuals have exceeded the Budget in India owing to a much larger amount of bills and telegraphic transfers having been issued than was anticipated. The *Unclaimed Deposits* represent the net amounts credited after deducting refunds of former lapses, and hence there is great difficulty in making an estimate of these sums. The head *Miscellaneous Fees, &c.*, in India included in 1885-86 a fine of 2.2 levied on the Zhob Kakar tribe, and in Bengal, it embraced certain fees relating to cesses which are now taken under advances. The increase under *Contributions* in the North-Western Provinces and Oudh over the Budget and the Actuals of 1885-86 consists of an arrear collection of 2.3 from the Maharaja of Benares, and in Bombay some arrears of the same kind were realised though not anticipated in the Budget. The *rents* collected in Madras in 1885-86 were unusually large owing to the high price obtained for crops grown on choultry lands; but against this excess must be set a corresponding increase in the expenditure entered as Petty Establishments under *32, Miscellaneous.* The *Extraordinary items* credited in Bombay comprise the sale proceeds of Government Securities held by several Local Boards contrary to rule. Under *Other items* the decrease in India is due to the recoveries from Railway Companies for general supervision being no longer credited to this head, but deducted from the corresponding Railway expenditure for supervision. On the other hand, the actuals of 1886-87 include two special items of 2.0 and 2.8 respectively on account of sale proceeds of certain confiscated Government Promissory Notes, and credit taken for charges of the Afghan Boundary Commission transferred to the Military account. The excess in the Punjab arises partly from large collections of the Khybar tolls, and partly from certain district fund income not provided for in Budget. In Madras the accounts for 1886-87 include about 5.0 as income derived from service inams appertaining to vacant offices in Kurnool, which was not anticipated in the Budget, but the accounts of 1885-86 also comprised special items as explained in the report of that year. The Bombay credits comprise large recoveries on account of insurance and other charges on railway stores, and the revenue collected in Berbera, Bhular, and Zaila. Considering the circumstances of Upper Burma, it was not possible to make a close forecast of the receipts to be obtained in it. The improvement in the English receipts is derived from a recovery of 4,0 on account of Marine insurance not anticipated in Budget.

Section E.—MISCELLANEOUS.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	1886-87. Accounts.
4,634,6	EXPENDITURE	4,848,6	4,723,0	4,701,1

117. As explained under Receipts the charges of 1886-87 under this group include 26,3 on account of *loss by exchange*, whereas in the previous year there was a gain of 264,4. This accounts for a portion of the difference between the two years. The charges under *Stationery and Printing* and *Miscellaneous* also exceeded those of the previous year by 51,3 and 36,9 owing respectively to larger purchases of stationery in Bengal and England, and to the appointment of the Finance Committee and the Public Service Commission. Compared with the budget the accounts of 1886-87 show a saving of 114,4 under *Exchange* owing to large receipts of capital from Railway Companies. There were also small savings under *Territorial and Political Pensions* and *Furlough Allowances.*

118. The saving in Burma is due to a smaller expenditure than was expected in Upper Burma, and in Bengal to non-payment of 1,2 for the Rajah of Sikkim. The excess in the Punjab is due to new pensions, and in Madras to the payment of arrears to the son-in-law of the Rajah of Tanjore at an increased rate, and to large commutations sanctioned during the year. The reduction in Bombay and other provinces was produced by casualties among pensioners. The saving in England represents the undrawn portion of Maharajah Dhulip Singh's stipend, less 1,4 for his expenses to Aden and back.

Section E.—MISCELLANEOUS—*continued.*

119. As explained in former reports the charges under this section are not susceptible of a correct forecast. The decreases in the English Payments are due to the date of payment of certain allowances and pensions being changed from 25th March to 1st April thus postponing to the year 1887-88 payments which would otherwise have been made in 1886-87.

120. The difference between the two years 1885-86 and 1886-87 is mainly in Donations to Service Funds, these Institutions having been taken over by Government. Considering

Section E.—MISCELLANEOUS—*continued.*

the nature of the charges the Budget has been fairly well sustained, although, as was to be expected, there are considerable divergences from the amounts allotted to the several Provinces. The amount paid in 1886-87 as pensions of the Civil Funds includes 3,8 on account of the capitalised value of one pension. The decrease in England as compared with the budget is largely owing to the change in the date of payment of certain allowances and pensions from 25th March to 1st April, thus postponing to 1887-88 payments which otherwise would have been made in 1886-87.

121. The main difference here is in the *purchase of Stationery* in Bengal, the accounts of 1886-87 shewing a large excess over the Budget and the actuals of the previous year A special enquiry has been made into this matter, and it is hoped that the expenditure will be better regulated in future. The India saving in Government Presses has resulted from economies in the employment of temporary establishments and in the purchase of type Madras on the other hand spent more than was expected on type and other materials,

Section E.—MISCELLANEOUS—*continued.*

in order partly to complete the third volume of Macleane's Manual of Administration. The Stationery supplied from Central Stores is necessarily a fluctuating quantity and cannot be accurately estimated, but Madras reports that the saving in that Presidency is largely due to the paper having been purchased at favourable rates. The small amount under other charges in Madras is the result of savings effected in the cost of Printing for the Settlement Department. The English expenditure includes some arrear payments, but for all that, it did not reach the estimate, in consequence chiefly of small indents from Bombay, where the local purchases, it will be seen, were higher than in the estimate.

122. The nature of the items taken under this head was described fully in last year's report, and it is not necessary to repeat the explanation here. These items depend on two factors, the first being the sterling amount of the transactions and the second the rate of exchange, and it is difficult to make an accurate forecast of either. The greater portion of this year's difference is due to the Railway Companies having made a considerable change in their programme since the budget was framed, as well as to the rate of exchange, in which there was a fall of more than a halfpenny. In 1885-86 there was a net gain on the whole of 264,4, but the accounts of 1886-87 show a net loss of 26,3. This is mainly due to a loss in the latter year of 396,6 on the repayment of the Stock receipt Loan of 1854.

	Accounts	1886-87	30,4	11,4	41,8		Accounts		343,8

123. The actuals under the first three heads agree closely with the Budget and the actuals of 1885-86. The Budget Estimate of Rewards *for destruction of wild animals* in Madras proved too high, but it was so framed because in the two previous years the scale of rewards was enhanced in certain districts, and, with the sanction of Government, the full amount was usually granted. The charge for *Special Commissions of Enquiry* has been unusually heavy in 1886-87, owing to the appointment of the Finance Committee and the Public Service Commission in India, to the deputation of the first Member of the Madras Board of Revenue on special duty to Madura, and to the appointment of the Forest Commission in Bombay. These expenses were not fully estimated except in Bombay. The discrepancy between Budget and Actuals under *Rents, Rates and Taxes* is attributable to changes of classification ordered after the Budget was framed. In Bengal a good deal which was found to belong to this head was taken in the Budget to *Other items*. The charges on account of *Upper Burma* could not be reckoned when the Budget was prepared. The head *Other items* has been largely affected by the expenditure attending the Jubilee celebration. In addition to this the India Estimate was out by 30,0, being charges of the nature of miscellaneous refunds and entered on audit under that heading. The Bengal Estimate was also out by 11,5 as explained above. The Punjab Budget took under this head the Provincial reserve of 10,0, from which exhausted grants are supplemented by Government from time to time, and the charges so covered are classified against the various accounts to which they severally appertain. The Bombay actuals for 1886-87 include a new charge of 2,5 on account of the Provincial contribution towards the maintenance of the telegraph line between Kolhapur and Rutnagiri and Pen and Alibag, 8 being the charge of the year and 1,7 arrears. The increase in the English expenditure is due to the discharge of East India Stock unclaimed since April 1874

Section F.—FAMINE RELIEF AND INSURANCE.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
1,500,0	EXPENDITURE	1,361,3	311,9	309,0

124. It has been stated in previous reports that the amount usually provided for expenditure under this head is 1,500,0. In the year 1886-87, however, the estimate was limited to 1,361,3, the difference being due, as explained in para. 40 of the Financial Statement, to a deduction on account of "the interest payable during construction to the Company which has undertaken the construction of the Indian Midland Line." In the revised estimate the grant was still further reduced, the amount passed being 311,9 only, and this is closely approached in the actual expenditure. The difference between the Budget and Revised Estimates consists mainly in the provision for the reduction of debt (749,0) having been withdrawn in the latter, for the reasons stated in paras. 68 to 75 of the Financial Statement of 1887-88. These several changes are tabulated in the following statement:—

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
40,7	Famine Relief	1,0	6	1,0
589,0	Construction of Protective Railways . . .	500,0	200,0	200,0
186,8	Construction of Protective Irrigation Works . .	111,3	111,3	108,0
683,5	Reduction of Debt	749,0	*Nil.*	*Nil.*
1,500,0	TOTAL .	1,361,3	311,9	309,0

33.—Famine Relief.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
...	Central Provinces	...	...	5
12,4	Bengal	...	...	...
27,8	Madras	1,0	6	5
5	Bombay	...	...	...
40,7	TOTAL .	1,0	6	1,0

125. The amount spent in the Central Provinces represents expenditure from District Funds on relief works in the Chattisgarh Division not anticipated in the Budget. The Madras expenditure in 1885-86 was on account of the Hindupur Extension Railway Works, which were undertaken to afford employment for the destitute in the Bellary and Anantapur districts. The expenditure in 1886-87 represents a write-off on account of the irrecoverable balance of advances made during the great famine of 1876-78.

34.—Construction of Protective Railways.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
589,0	TOTAL . .	500,0	200,0	200,0

126. Charges against this head are debited in a lump sum by credit to the account 47—*State Railways—Construction*, under which head the outlay is in the first instance recorded. When dealing with the Revised Estimate of the Department for 1886-87, the Government of India decided that a sum of 200,0 should be charged to Revenue on account of Protective Railways, instead of 500,0 as provided in the Budget Estimate, and this sum was accordingly debited in the accounts of the year under review.

Actuals with Actuals of previous year	...	78,8
„ Budget Estimate	...	3,3
„ Revised Estimate	...	3,3

(*a*) Includes £285,400, outlay from funds not classed under this special head.

127. No outlay was incurred in England under this head.

128. The Expenditure is regulated by the grants available and the works which have been sanctioned as fit to be placed under this category. The ordinary allotment was formerly 250,0; but this was reduced in the Budget and Revised Estimates to 111,3, to provide for the interest on the Capital of the Indian Midland and Nagpore-Bengal Railways. This reduction of grant accounts for the actuals of 1886-87 being 78,8 below those of 1885-86.

129. During the year the grants for the Betwa, Swat river, and Gokak canals, the Rushikulya project and the Mhasvad tank were reduced, and increased outlay on the Nira canal and a grant-in-aid to the Orissa Coast canal were sanctioned; but the total of the Revised Estimate remained the same as the Budget.

130. The expenditure was 3,3 below the estimates, owing chiefly to scarcity of labour on the Swat river and Rushikulya projects.

Actuals with Actuals of previous year	...	449,0
„ Budget Estimate	73,9	...
„ Revised Estimate	...	4,8

132. In 1885-86 a sum of 500,0 was provided from revenue for expenditure on Frontier Railways, and that amount was charged in the accounts under this head, by deduction from the head *47.—State Railways—Construction.* During the year under review no allotment was provided out of revenue, the total outlay incurred on the Frontier lines being treated in the accounts as *Expenditure not charged to Revenue.* No comparison is possible between the expenditure during the two years on the other lines.

133. The excess over the Budget Estimate is due chiefly to the more extended prosecution of work on the Lucknow-Sitapur Railway in view to the early opening of the line.

Net Gain or Loss to the Government,					
1886-87 . .	—375,1	—675,6	—43,6	—94,4	—1,188,7
1885-86 . .	+394,9	—983,3	—44,0	—99,3	—731,7
1884-85 . .	+173,9	—1,043,3	—84,2	—97,6	—1,051,2
1883-84 . .	+647,5	—996,4	—85,5	+129,4	—305,0
1882-83 . .	+40,3	—1,053,9	—38,3	—254,0	—1,305,9

135. These figures shew that the *State Railways* did worse than last year by 770,0, and the *Guaranteed Railways* better by 307,7. These results are complicated by the transfer of the Sind, Punjab and Delhi line from the guaranteed to the State Railway head, as explained in the following paragraph, and the opening out of new lines, as in the Southern Maharatta and Burma systems. Allowing for these changes, the items which have contributed to the deficiency in State Railways are excess payments under interest and annuities in purchase of guaranteed Railways amounting to 589,3 and 353,7 respectively, and exchange 379,3. On the other hand, the gross earnings of State Railways amounted to 870,1 more than in 1885-86, the increase in working charges and surplus profits being 317,8. The other items do not call for special remark here.

Section H.—RAILWAYS EARNINGS.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
13,684,1	RECEIPTS .	13,975,0	14,266,9	14,477,8

136. The following sums are comprised in these receipts :—

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
9,958,9	State Railways (gross)	10,841,5	10,714,4	10,829,1
3,725,1	Guaranteed Railways (net)	3,133,5	3,552,5	3,647,1
1	Subsidized Companies	...	...	1,6
13,684,1		13,975,0	14,266,9	14,477,8

137. The *State Railways* show an increase of 870,1 as compared with 1885-86, but in that year credit was taken under this head for only three months' earnings of the Sind, Punjab and Delhi Railway, as it was a guaranteed line up to December 1885, when it was included in the North-Western State Railway. Allowing for this special cause of difference, there was still a substantial improvement in 1886-87, as explained in the following paragraphs, caused by the addition of new lines, as in the Southern Mahratta and Burma systems, and by development of traffic on the older ones. The transfer of the Sind, Punjab and Delhi Railway to the State lines, as noted above, has diminished the revenue from the *Guaranteed* lines, which have returned 451,0 less than in 1885-86; but in them also there has been a good development of traffic in 1886-87, as shown in paragraph .

Section H.—RAILWAYS EARNINGS—*continued.*

Section H.—RAILWAYS EARNINGS—*continued.*

138. The increase of 3,6 compared with the Actuals of the previous year is not large, considering the magnitude of the transactions, but the fluctuations leading up to this result are important and are detailed in the above table.

139. The falling-off of 43,0 compared with the Budget, was due chiefly to a fall in the quantity of railway materials, salt and wheat carried, against which there was an increase, to some extent, in the receipts realized from additional pilgrim traffic and exceptional activity in connection with native festivals.

140. The increase of 12,0 over the Revised is attributed principally to a reduction in outstanding earnings at the close of the year.

Eastern Bengal Railway.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.

RESULTS.

	Actuals. More.	Less.
Actuals with Actuals of previous year	81,5	...
,, Budget Estimate	...	12,9
,, Revised Estimate	...	4

141. The earnings of the year 1885-86 were abnormally low, owing to the interruption of traffic caused by the floods of September 1885, and to the active competition of the River Steamer Companies.

142. The decrease in actuals of 1886-87, as compared with the Budget Estimate, is attributed principally to the failure of a bridge near Goalundo, resulting in the loss, for a time, of freight over 43 miles of the line.

143. The Actuals agree so nearly with the Revised Estimate as to call for no remark.

,, Revised Estimate	5,8	...

144. The increase of 23,3 over the actuals of 1885-86 is attributed to development of passenger traffic generally throughout the entire system, and to a recovery on account of rolling-stock.

145. The increase of 38,3, compared with the Budget Estimate, was due to the general improvement in passenger traffic during the year.

146. The increase over the Revised Estimate is unimportant.

Section H.—RAILWAYS EARNINGS—*continued.*

147. The actuals of 1885-86 in the above table include the earnings of the Sind, Punjab and Delhi Railway for the nine months ended December 1885, amounting to 1,054,2. These earnings were credited under XXVII, Guaranteed Companies—in 1885-86, *vide* statement printed on the following page,—and have been included here in order that a fair comparison may be made of the revenue transactions of the combined undertaking for the two periods.

148. Compared with the actuals of the previous year, there is a decrease of 489,1, which is attributed to unusual traffic in 1885-86 in connection with the military preparations on the frontier and in the carriage of materials for the frontier railways, and in a great measure to the almost entire failure during 1886-87 of the usual grain export traffic from the Punjab *viâ* Karachi.

149. The falling off of 76,7 compared with the Budget Estimate is ascribed to high prices prevailing in the Punjab for wheat and seeds, especially in the latter part of the year, which restricted exports *viâ* Karachi. The decrease from this source was counterbalanced to some extent by an unexpected development of third class passenger traffic.

150. The increase of 58,3 compared with the Revised Estimate is attributed chiefly to a slight improvement in the goods traffic in the last few weeks of the year, and to a large and unexpected reduction in the balance of outstanding earnings.

Other State Railways—Imperial.

RESULTS.

	Actuals. More.	Less.
Actuals with Actuals of previous year	57,7	...
„ Budget Estimate	16,0	...
„ Revised Estimate	17,5	...

151. There is an increase of 57,7 compared with the actuals of 1885-86, due chiefly to the following railways:—

	More.	Less.
Southern Mahratta	+79,5	
Mysore	+37,4	
Indian Midland	+ 9,2	
Dhond and Manmad		—67,4

152. The increased receipts realized on the Southern Mahratta Railway arise from the increased open mileage in 1886-87. The transactions of the Mysore Railway were not included in the books of the Public Works Department prior to 1886-87, and the Indian Midland Railway was opened for traffic on the 1st April 1886. The decrease on the Dhond and Manmad Railway is simply due to the *net* earnings being exhibited in the table for 1886-87, whilst gross earnings were shown in the previous year.

153. The increase of 16,0 compared with the Budget Estimate is attributed principally to the following fluctuations:—

	More.	Less.
Mysore	+37,4	
Umaria Colliery		—18,1
Bellary-Kistna		—11,5
Indian Midland	+ 9,2	

154. No provision was made in the forecasts of the Department for transactions in connection with the Mysore Railway. It was decided very recently to include these in the books of the Public Works Department. The receipts from the Umaria Colliery fell short of expectations, owing to delay in opening the railway to the coal-fields. The Bellary-Kistna Railway was not opened for traffic in 1886-87 as anticipated, whilst no provision was made in the Budget Estimate for the short length of the Indian Midland Railway opened during the year from Cawnpore to Chowra.

155. The increase in the receipts of 17,5 compared with the Revised Estimate is attributed principally to the receipts of the Mysore Railway having been included in the Public Works accounts under recent orders. This was counterbalanced to some extent by short credits on the Bengal Central Railway.

Section H.—RAILWAYS EARNINGS—*continued.*

Other State Railways—Provincial.

RESULTS.

	Actuals. More.	Less.
Actuals with Actuals of previous year	138,9	...
„ Budget Estimate	65,9	...
„ Revised Estimate	21,5	...

156. The increase of 138,9 over the Actual receipts of 1885-86 is owing to improved traffic on various railways. The Burma Railway shews a considerable advance,—the result of the greater length of Railway open, and the more settled state of the country during the second half of the year under review. On the Northern Bengal Railway there was a considerable development in jute and grain traffic and an increase in the number of third class passengers. The Tirhoot line contributed a considerable increase, resulting from increased open mileage, interchange of traffic with the Bengal and North-Western Railway and enhanced rates for ferrying passengers. The Cawnpore-Achnera Railway Provincial receipts shewed a large increase, being the result chiefly of the adjustment of all outstandings in the accounts of the year on transfer of the line to the Bombay-Baroda Railway Company.

157. The increase of 65,7 over the Budget, is attributed chiefly to the following fluctuations:—

Burma	+31,7
Northern Bengal	+32,4
Tirhoot	+22,4
Cawnpore-Achnera	+26,6
Nagpur-Chhattisgarh	—18,2
Amritsar-Pathankot	—22,2
Dacca	— 7,0

158. The main cause of the increased traffic on the Burma, Northern Bengal, Tirhoot and Cawnpore-Achnera Railways has been explained in the preceding para. The decrease on the Nagpur-Chhattisgarh Railway is attributed to a fall in grain traffic for export, whilst that on the Dacca Railway is attributed to the goods traffic not having developed to the extent anticipated. The amount entered against the Amritsar-Pathankot Railway represents the *net receipts* of the line, which consists of a percentage on the capital cost of the line, credited by the North-Western Railway, which works the undertaking. The *gross* receipts and expenses now form a portion of the transactions of the North-Western Railway.

159. The chief cause of the increase of 21,5 over the Revised Estimate is explained as follows:—

160. On the Tirhoot Railway there was an increase in coaching traffic, owing to a rush of passengers on the occasion of a religious festival during the month of February, an extension of the open line to Nirmali, and through traffic with the adjoining Railway added to this traffic. On the Nagpur-Chhattisgarh Railway, there was an unforeseen revival of traffic in the last two months of the year, which contributed to the increased receipts. The improvement over estimate of the Burma Railway is due to movement of troops ordered to India from Upper Burma, and heavy consignments of paddy to Rangoon, not anticipated. On the Northern Bengal Railway the traffic at the close of the year was better than was expected.

WORKING EXPENSES—		
Actuals with Actuals of previous year	...	451,0
,, Budget Estimate	26,9	...
,, Revised Estimate	3,4	...

Gross Earnings.

161. The Sind, Punjab and Delhi Railway was purchased by Government with effect from 1st January 1886. The earnings of the line prior to that date are included under XXVI. The traffic on the other lines during 1886-87 was good, especially on the Great Indian Peninsula Railway, where an unexpected development took place under goods traffic. This explains the increased receipts compared with the Budget and Revised Estimates.

Working Expenses.

162. The decrease compared with the Actuals of the previous year is owing principally to the transfer of the Sind, Punjab and Delhi Railway to Government. Increased working expenses, due to extra traffic carried, accounts chiefly for the excess over the Budget Estimate, as also some abnormal charges incurred on the Madras Railway in connection with abandoned works on the Calicut Extension, and the value of new engines placed on the line. The excess over the Revised Estimate is small.

163. The Gross Receipts, Expenses and Net Earnings of these lines for the past six years are given in the following statement :—

GUARANTEED COMPANIES.	RECEIPTS.						EXPENSES.						NET RECEIPTS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
1		...	...	1,6

164. The receipts in the accounts of 1886-87 represent the difference between the net Revenue from, and the interest on the capital expended on, the Mysore Railway to be recovered from the Mysore State, and taken in reduction of advances of interest paid to the South Mahratta Railway Company, by whom the Mysore State Railway is worked. No provision was made in the estimates, as the incorporation of the transactions of this Railway in the Imperial account has only recently been ordered by the Secretary of State.

Section H.—RAILWAYS EXPENSES.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
14,415,8	EXPENDITURE . .	15,696,7	15,700,6	15,666,4

165. These figures comprise the expenditure under the following heads :—

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
4,902,1	State Railways—Working Expenses	5,569,1	5,278,0	5,219,9
2,663,3	Interest on Debt . .	3,099,6	3,189,2	3,202,4
1,740,8	Annuities . . .	2,301,1	2,300,8	2,308,6
257,8	Interest on Capital Deposits	412,4	471,7	473,2
476,7	Guaranteed Companies—Surplus Profit, &c.	497,5	607,0	600,8
4,231,7	Interest	3,590,9	3,709,7	3,721,9
44,1	Subsidized Companies, Land, &c. .	69,5	48,0	45,2
...	Advances of Interest .	36,6	...	...
99,3	Miscellaneous Railway Expenditure	120,0	96,2	94,4
14,415,8		15,696,7	15,700,6	15,666,4

166. Here there is a large excess over 1885-86, and nearly the whole of it is in *State Railways*. This is due to the purchase by Government of the Sind, Punjab and Delhi line in the last quarter of 1885-86, counterbalanced to some extent by reductions flowing out of the amalgamation of the Punjab Railways. The increase is spread over all the heads, and has been aggravated, in the case of interest and annuities, by the lower rate of exchange which prevailed in 1886-87 as compared with the previous year. The actuals of 1886-87 are less than the budget, owing to smaller renewals of permanent way on several railways, to more economical working, and to a provision of about 100,0 for Income Tax, which, under a later ruling, proved to be unnecessary. The conversion of the Sind, Punjab and Delhi, line into a State undertaking has affected the expenditure on *Guaranteed Railways* as compared with 1885-86.

38.—State Railways—Working Expenses.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
4,902,1	EXPENDITURE	5,569,1	5,278,0	5,219,9

167. The particulars of these charges, according to Railways, are given in page 74. The following remarks explain the discrepancies between Actuals and Estimates :—

Section H.—RAILWAYS EXPENSES—*continued.*

168. Compared with 1885-86, the expenditure during the year under review shows a decrease of 160,6, chiefly under the heads *Maintenance* and *Carriage and Wagon*. Under the former head the decrease is due to less renewals of permanent way, and to a special credit of 71,9 for stores issued to the Engineering Department, but not used and returned into stock. The decrease under *Carriage and Wagon* is chiefly due to less extensive renewals of Rolling Stock. The lapse of 233,3 on the Budget may be generally ascribed to the same causes, in addition to which there was no debit against a provision of 81,0 on account of Income Tax, in accordance with a late ruling. The lapse of 48,3 on the Revised Estimate is due chiefly to less renewals in the Engineering Department than anticipated and to the return to stock of a larger quantity of unused material than was anticipated.

„ Budget Estimate	43,3	...
„ Revised Estimate	9,3	...

169. The increase over the accounts of 1885-86 is owing principally to abnormal charges during the year under review, for re-laying a portion of the line with steel rails and for the removal of the Goalundo Station. Heavy locomotive repairs were also executed during the year. The excess over the Budget of 43,3 is due chiefly to heavy renewals of *Way and Works*, to relaying a portion of the line with steel rails, and to replacement of axles. The excess of 9,3 over the Revised is attributed in a measure to the heavy outlay on the removal of the Goalundo Station buildings, and to increased cost of stationery and forms, as also to enhanced charges by the Telegraph Department, in connection with the maintenance and supervision of the Railway telegraphs.

Rajputana-Malwa Railway.

Section H.—RAILWAYS EXPENSES—*continued.*

170. As regards working expenses, the decrease of 33,7 compared with the actuals of 1885-86 is owing to economical working during the year under review in the Locomotive Department. The increase against surplus profits is due to larger net receipts realized, on which surplus profits are declared.

171. The lapse of 66,0 on the Budget Estimate of working expenses is due chiefly to a provision in the Budget of 20,0 for *Income Tax*, which, under a late ruling, proved to be unnecessary to economy in the Locomotive Department, and to a decrease in renewals under *Maintenance of Way, Works and Stations*. The excess against surplus profits occurred for the reason explained in the preceding clause.

172. The lapse on the Revised Estimate is attributed to larger liabilities having remained unpaid at the close of the year than anticipated.

North-Western Railway.

RESULTS.

	Actuals. More.	Actuals. Less.
Actuals with Actuals of previous year	...	115,9
„ Budget Estimate	...	33,1
„ Revised Estimate	...	3,1

173. The actuals of 1885-86 include the working expenses, amounting to 587,1, of the Sind, Punjab and Delhi Railway for the nine months ended December 1885, for the reasons explained in connection with the earnings of the North-Western Railway for 1886-87.

174. The decrease compared with the actuals of 1885-86 is attributed to the smaller traffic worked, to decreased expenses consequent on the amalgamation of the several railways now forming the North-Western Railway, and to a special charge of 41,0 in 1885-86 on account of bonus granted to the staff of the Sind, Punjab and Delhi Railway Company.

175. The lapse of 33,1 on the Budget Estimate results from the smaller traffic worked.

176. Compared with the Revised Estimate the actuals show a lapse of 3,1, which is attributed to fluctuations in the suspense balances.

Other State Railways—Imperial.

RESULTS.

	Actuals. More.	Actuals. Less.
*Actuals with Actuals of previous year	5	...
„ Budget Estimate	1,1	...
„ Revised Estimate	...	...

177. The increase compared with the actuals of 1885-86 is 5 only, and requires no explanation, but some of the fluctuations are large, and are detailed by railways below:—

	More+ Less—
Dhond and Manmad	— 68,7
Southern Mahratta	+ 43,9
Mysore	+ 20,0

178 The decrease on the Dhond and Manmad Railway is due to the working expenses having been deducted from the gross receipts and the latter shown net in 1886-87. The increased expenditure on the Southern Mahratta Railway is attributed to the greater length of railway open for traffic during the year under review, whilst the Mysore Railway

Section H.—RAILWAYS EXPENSES—*continued.*

transactions have been brought on to the books of the Government of India for the first time in 1886-87, owing to the transfer of the line from the Mysore State to the Southern Mahratta Railway Company.

179. Compared with the Budget Estimate, there is an excess of 1,1, which is small. The principal fluctuations are as below :—

	Decrease— Increase+
Southern Mahratta	+5,1
Mysore	+20,0
Umaria Colliery	—13,3
Bellary-Kistna	—10,0

180. The increased expenses of the Southern Mahratta Railway follow generally the extra traffic hauled. The transactions of the Mysore line were brought on to the Public Works Department books for the first time in 1886-87, whilst the lapse on the Umaria Colliery is owing to the delay in opening the railway to Umaria, in consequence of which less work was done in raising coal than was expected. No portion of the Bellary-Kistna Railway was opened for traffic in 1886-87; hence the lapse of 10,0.

181. The actuals agree with the Revised Estimate.

Other State Railways—Provincial.

RESULTS.

	Actuals. More.	Less.
Actuals with Actuals of previous year	...	24,1
„ Budget Estimate	...	35,1
„ Revised Estimate	...	4,5

182. The decrease of 24,1, compared with the Actual *Working Expenses* of 1885-86, is attributed chiefly to the following fluctuations: The falling off of 14,3 on the Nagpur-Chhattisgarh Railway follows generally the decrease in receipts; but an important cause of the reduction is the transfer to Capital in 1886-87 of heavy charges for ballast, which had previously stood at the debit of *Maintenance of Way, Works and Stations*. The cause of the decrease of 26,4 on the Amritsar-Pathankot State Railway is owing to net receipts only, being now credited to the Punjab Government by the North-Western Railway, as explained in page 405, receipts. As a set-off against these reductions, there was an increase of 10,2 on the Dacca Railway owing to the extra cost of working the longer open mileage, and on the Tirhoot line there was an increase of 7,0 owing to renewals, and providing new works necessitated by the heavy floods during the year. The opening of the extension to Nirmali and the supply of stationery and forms, also entailed additional expense against Revenue.

183. The lapse of 35,1 on the Budget is explained as follows: The transfer of certain ballast charges from Revenue to Capital, and less outlay in working the smaller traffic brought to the line, accounts for a lapse of 23,6 on the Nagpur-Chhattisgarh Railway. The Amritsar-Pathankot line shows a decrease of 26,2, the reason for which has been explained above. On the Tirhoot Railway there was an increase of 8,6, due to outlay on flood works and opening of a portion of the Assam-Behar undertaking. On the Northern Bengal Railway there was a large excess over the Budget provision for *Maintenance of Way, &c.*, which accounts for the increased outlay against this line.

184. The lapse on the Revised Estimate was 4,5 only.

Interest on Capital.

185. As explained in former reports, the interest charge for State Railways depends upon the progress of construction during the year, and differs from the estimate and the actuals of other years according as the actual outlay differs from the estimated expenditure and the actuals booked in previous years, respectively.

186. The following statement shews how the interest charged in the accounts of 1886-87 has been calculated :—

	E. I. Ry.	E. B. Ry.	Other State Railways.	TOTAL.
CAPITAL EXPENDITURE.				
Capital Expenditure at end of 1885-86	1,936,1	1,513,6	50,163,1	53,612,8

Interest on debentures, &c., discharged	132,8	20,4	...	153,2
Half interest on Capital spent during the year	3,6	3,5	103,5	110,6
TOTAL	223,5	84,5	2,110,0	2,418,0
Add—½ per cent. on the Holkar Loan of a crore, which bears 4½ per cent. interest	...	...	5,0	5,0
TOTAL INTEREST CHARGED	223,5	84,5	2,115,0	2,423,0

Exchange.

187. The increase compared with the actuals of the previous year and the budget estimate is owing principally to increased payments in England on account of interest on debt created in redemption of a portion of the Sind, Punjab and Delhi Railway stock, and to a further fall in Exchange. The excess over the revised estimate is 2,7 only.

Annuities and Sinking Fund.

188. The increase over the Actuals of 1885-86 is owing mainly to the payments now rendered necessary on account of the Sind, Punjab and Delhi Railway having been purchased by the State. The accounts of 1886-87 show a decrease 48,1 compared with the Budget Estimate, but when the Budget was framed, the arrangements for the exchange of portions of the Sind, Punjab and Delhi Railway annuity for India 3½ per cent. stock were not completed. The actuals are in exact accord with the Revised Estimate.

Exchange.

189. The increased charges for exchange are owing principally to annuity payments in connection with the purchase of the Sind, Punjab and Delhi Railway, and to a further fall in exchange.

Interest.

190. The increase over the actuals of the previous year is owing principally to more capital deposited with the Secretary of State, on which interest has accrued to the Companies concerned. The excess over the Budget Estimate is due chiefly to the payment to the Bengal Central Railway having been provided for under the head *40.—Subsidized Companies*.

Exchange.

191. The increased charges for Exchange, compared with the actuals of the previous year and with the Budget Estimate, are due principally to the larger payments of interest on increased deposits of Capital, as well as to a further fall in the rate of Exchange.

The excess over the Revised Estimate is small.

Section H.—RAILWAYS EXPENSES—*continued.*

Surplus Profits.

192. As regards the difference betweent he accounts of 1885-86 and 1866-87 it may be mentioned that in the former year no payment was made to the Sind, Punjab and Delhi Railway. The increase over the Budget Estimate of the year occurs under the Bombay, Baroda and Central India, and Great Indian Peninsula Railways, and is due to increased earnings during the second-half of 1885 and the first-half of 1886. The decrease of 5, as compared with the Revised Estimate, is small and calls for no remark.

Land and Supervision.

193. In the accounts of 1885-86, the amount recovered from companies on account of Government supervision was deducted from the charges of each administration concerned, but in 1886-87, the charges are entered gross and the recoveries deducted as a distinct item. This change in procedure explains the differences in the details of actuals during the two years. The recoveries from Companies were larger in 1886-87 than in the previous year, which chiefly accounts for the decrease in the total expenditure. There have been small savings on the Budget provision in all provinces except Madras. The only saving of any importance appears in Bombay, which is due to delay in settling claims for compensation for land. In Madras there was an excess over Budget as it was found necessary to acquire additional land during the year.

194. The differences between actuals and the Revised estimate scarcely call for notice.

195. The large decrease in 1886-87, as compared with 1885-86, is due to the cessation of payments to the Sind, Punjab and Delhi Railway Company.

196. The excess of 13,7 over the Budget Estimate is due to no provision having been made for the interest on overdrawn capital in India, although the *per contrá* credit was taken under interest.

197. The small decrease on the Revised Estimate needs no explanation.

Exchange.

198. The provision for Exchange has been largely exceeded in all these cases in consequence of a fall in the rate.

199. The only difference calling for special notice is the lapse on the Budget Estimate of 24,3. This is owing chiefly to the estimated payments for land on the Bengal and North-Western Railway having been cast too high, and to a provision for land in connection with the proposed Nilgiri Railway not having been utilised.

201. The details given in the table above show the variations leading up to these net differences both under *Imperial* and *Provincial*. The only difference that appears to call for special notice is the lapse of 23,7 on the Budget Estimate under *Imperial*. This occurred chiefly because a reserve of 20,6 provided to meet unforeseen requirements was found to be in excess of the demands arising during the year, and the expenditure on the Benares-Puri Survey was over-estimated by 4,0.

J.—IRRIGATION.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	1886-87. Accounts.
1,588,3	REVENUE	1,621,6	1,594,8	1,656,7

202. These collections exceeded those of 1885-86 by 68,4 and the budget by 35,1. The increase of 68,4 is chiefly in the Punjab and arises from the opening of the Sirhind Canal and development of irrigation from the Bari Doab Canal, as well as to the collections of arrears of revenue in the Punjab. The improvement of 35,1 is due to the ordinary fluctuations which are inseparable from this revenue.

,, Revised Estimate	19,0	...	...	8,3	27,3	...

Imperial Works.

203. Except in the Punjab, the direct receipts from the irrigation works which still remain Imperial are inconsiderable. The net revenue in 1886-87 was larger than that of 1885-86 by 31,7, the increase being chiefly in the Punjab, and attributed to the opening of the Sirhind Canal and development of irrigation from the Bari Doab Canal. Madras and Bombay also show an improvement; but there has been a slight falling off in the North-Western Provinces owing to increased expenditure on maintenance and repairs of the newly opened Betwa Canal. In Bombay, the improvement was due to the recovery of balances outstanding at the end of the previous year, and in Madras, to reduction in the working expenses.

204. The Budget for 1886-87 was framed for a considerable increase in the amount of net revenue, as the Sirhind Canal had been opened, and it was expected that the Western Jumna Canal would earn the average revenue of earlier years. But heavy and timely rainfall reduced to some extent the necessity for extensive Irrigation, and the actuals fell short of the Estimate by 34,0.

205. The Revised Estimate of revenue proved an accurate forecast of the actual realizations, but the working expenses were over-estimated and the result was an increase upon the Estimate of 7,2 in the net revenue.

Provincial Works.

206. The net revenue in 1886-87 was 20,3 less than that of 1885-86, owing, not to a diminution in the total amount of gross revenue, but to an increase in the working expenses, caused by urgent repairs to the Mahanuddy weir of the Orissa canals which was damaged by a cyclone in 1886.

207. As explained in the Appropriation Report for 1885-86, the revenue of the Bengal works in that year was abnormally swelled by recovery of arrears of previous years, and the Budget Estimate for 1886-87 was therefore prepared for the normal amount of earnings. But abundant rainfall rendered canal irrigation to a great extent unnecessary, and continued repairs to the Mahanuddy weir raised the working expenses, so that the Revised Estimate of net revenue for Provincial Works was framed for a decrease of 19,9 below the Budget.

208. The actuals were, however, 27,3 better than the Revised Estimate, owing to recovery of arrears from the Sone Canals and to the Revised Estimate of the North-Western Provinces having been based on assessments which took into account possible, but as events proved, unnecessary remissions of some magnitude.

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	1886-87. Accounts.
87,2	N.-W. Provinces and Oudh	87,2	87,2	87,2
41,1	Punjab	44,0	46,0	68,2
380,5	Madras	356,6	356,7	390,2
53,8	Bombay	67,9	68,4	51,9
562,6	TOTAL	555,7	558,3	597,5

Section J.—IRRIGATION—RECEIPTS—*continued.*

209. The Actuals of 1886-87 exceeded those of the previous year by 34,9, owing to adjustment of arrears of land revenue in the Punjab, to more lands having been brought under irrigation in Madras, and to improvement under the Sangam Anicut works.

210. As the excessive rainfall in 1886 had damaged the crops and caused extensive breaches in the irrigation canals in Madras, the Budget was prepared for a diminished revenue, the reduction in some canals being fixed at about a lakh of rupees from the actuals of 1885-86. But the floods having subsided early, a large area was brought under irrigation and the revenue exceeded the Budget Estimate by 41,8.

211. The Revised Estimate made some slight provision for the increase referred to in the preceding para., but not sufficient to lead to an expectation of an excess of 39,2 over the Estimate.

212. The Actuals of 1886-87 were 11,5 below those of 1885-86, the decrease being due to the credit in the accounts of 1885-86 of recoveries in the Midnapore district on account of zemindari embankments under the contract system. The Budget and Revised Estimates were framed for normal earnings, and the Actuals were only slightly in excess of the Estimates, the increase being derived from various unimportant sources.

Imperial Works.

216. The outlay in 1886-87 exceeded that in 1885-86 by 20,1, owing to the commencement of works in two new Provinces—Beluchistan and Upper Burma—and to a special grant being necessary for a loop to the Kashmor *bund* in Sind.

217. The Budget for 1886-87 was prepared for the normal grant for ordinary works under this head, *plus* the extra addition for tank maintenance in Madras; but for reasons given in the following para. the actual outlay fell short of the estimate by 9,2.

218. During the year grants were assigned for expenditure in Beluchistan, Upper Burma, Punjab and Sind, which raised the Revised Estimate to 21,6 more than the Budget. The Actuals, however, fell short of the Estimate by 30,8, owing to the expenditure in Bengal having been overestimated, to engineering difficulties in Beluchistan and Rajputana, and to recoveries, which were treated as reductions of expenditure, having been made from cultivators on the Sidhnai Canal earlier than was expected.

Provincial and Local Works.

219. The expenditure indicates a considerable diminution, the outlay in 1886-87 being 74,5 less than that in 1885-86. In Bengal, the transfer of irrecoverable expenditure on the Midnapore takkavi embankments from the Civil to the Public Works Department in 1885-86, increased the expenditure in that year abnormally. The more pressing requirements of Civil Works in Lower Burma, led to the decrease in the irrigation outlay under that Administration, and the reduction in Madras is due to the completion of the Red Hills Tank Restoration Works.

220. The Budget of 1886-87 was based on the outlay of the previous year, less the expenditure on the Red Hills Tank Restoration and the adjustment in Bengal mentioned above; but owing to the pressing demands for jails and other Civil works in Burma, the irrigation grant for that Administration was drawn upon, for the necessary funds, and the outlay was consequently smaller.

221. The outlay fell short of the Revised Estimate by 37,4, the lapse occurring chiefly on the Calcutta and Eastern and the Orissa Coast Canals, and being caused by dredging operations not progressing rapidly, and by an additional grant to the latter canal included in the Revised Estimate having been assigned too late in the year to be utilised.

Section K.—BUILDINGS AND ROADS—RECEIPTS.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accoun ts
615,6	RECEIPTS.	680,1	690,8	727,6

222. The difference between 1885-86 and 1886-87is due to the receipt in the last named year of 150,0 in connection with the restoration of the Gwalior Fort and the Morar Cantonment to His Highness the Maharajah Sindia. The excess of actuals over estimate is spread through various accounts as set forth in the following paragraphs:—

XXXI.—Military Works.

RESULTS.

	Actuals. More.	Actuals. Less.
Actuals with Actuals of previous year	147,2	...
,, Budget Estimate	3	...
,, Revised Estimate	...	4

223. The Receipts under this head exceed those of 1885-86 by 147,2 which is due to the exceptional recovery in 1886-87, of 150,0 on account of the rendition of the Gwalior Fort and the Morar Cantonment to His Highness the Maharaja Sindia.

224. The Estimates have been borne out by the Actuals. The decrease under India is due to the recoveries from Military Officers on account of rents of quarters having been over-estimated in the Military Works Department.

Section K.—BUILDINGS AND ROADS—RECEIPTS—*continued.*

225. *Imperial.*—The small increase, in comparison with accounts of previous year, in the Imperial receipts, is mainly due to receipts under the head "Tolls and Ferries" in Upper Burma.

226. The actuals have exceeded the Budget by 1,7 owing to receipts from Public Works in charge of Civil Officers in Upper Burma.

227. The Revised Estimate has been closely approximated.

228. *Provincial.*—Important variations between the actuals of the year under review and the previous year have occurred in Bengal, North-Western Provinces and Oudh, Punjab and Bombay. In Bengal, the revenue realized by departmental officers exceeds that of 1885-86 by 15,7, owing principally to the adjustment in 1886-87 of the gross receipts derived from the Burrakur Iron Works during the years 1882-83 to 1886-87. The transactions of these works had previously been held in the deposit account. The falling off in the receipts by Civil Officers in Bengal, is due to the transfer of the management of ferries to District Boards. In the North-Western Provinces, the short receipts by departmental officers, is chiefly due to an exceptional adjustment in the accounts of 1885-86 of the value of the stock of Thomason College Press and Book Depôt and of the value of stores taken over from the Kumaon Iron Works by the Roorkee Workshops.

229. The falling off in the realizations by Civil Officers in the Punjab, is due to the transfer of ferries to Local Boards. In Bombay, the short realization by departmental officers is due to an exceptional recovery in the accounts of 1885-86, of the sale proceeds of the old Secretariat Buildings at Bombay. The short receipts in the accounts of Civil Officers is attributed to the realizations from ferry tolls having been exceptionally large in the previous year.

230. The original Estimate was reduced in preparing the Revised Estimate by 10,0, owing principally to the transfer of ferries to local management and to the unexpected recovery in 1885-86, of certain receipts which were provided for in the original estimate for 1886-87. Compared with the Revised Estimate, the actuals show an improvement of 17,6. In Bengal, the accounts exceed the Revised Estimate by 23,2, owing to the adjustment previously referred to, of the gross receipts of the Burrakur Iron Works, from 1882-83 to 1886-87. The decrease in the North-Western Provinces and Oudh, is due to the receipts from tolls and ferries under departmental officers having fallen short of expectation. In Madras, the decrease is due chiefly to a write-back to credit of Tools and Plant of an item of 4,9, representing workshop balances.

231. *Local.*—The increase of 27,5 in the actuals of 1886-87 over those of 1885-86, is due chiefly to the transfer of ferries to Local Boards in Bengal, Punjab and Bombay.

232. The Revised Estimate was placed at a higher figure than the Budget Estimate, owing to the transfer of the management of certain ferries to Local Boards. The accounts show an improvement of 19,0 over the Revised Estimate, which is mainly due to adjustments made by the Accountant General, Punjab, in consequence of Local Boards having made erroneous credits of tolls from ferries, to other heads. The increase in Madras is due to enhanced receipts from tolls and ferries.

233. *England.*—The improvement is due to an increase in the number of students of the Royal Indian Engineering College.

Section K.—BUILDINGS AND ROADS—EXPENDITURE.

1885-86. Accounts.		1886-87. Budget.	Revised.	Accounts.
4,485,3	EXPENDITURE:	5,449,3	5,342,5	5,201,7

234 The expenditure in 1885-86 was very low owing to the general curtailment of Public Works Expenditure on account of the Financial pressure. The Budget was placed too high especially in the local portion of the expenditure under *Civil Works*.

44.—Military Works.

,, Revised Estimate	...	1

235. The expenditure of 1885-86 was less than the average of previous years, owing to the general restriction of expenditure on Public Works in that year, hence the excess during the year under review.

236. The original Estimate of 1,155,4 was reduced to 1,130,7 owing to the following modifications :—

Re-allotment of lapse from Grant for 1885-86	+24,8
Deduct—Lapse from Grant for 1886-87	—49,5
NET	—24,7

237. Compared with the Revised Estimate the accounts show a decrease of 69,1. Under India the lapse of 26,0 is attributed to the postponement of works in Hyderabad, and to unavoidable delay in preparation of detailed estimates for works under the control of the Inspector General of Military Works. The short outlay in Upper Burma of 18,0 is due to the re-adjustment of charges by debit to other Major heads which were not foreseen when the Estimate was prepared. In Madras and Bombay, the lapses of 5,6 and 11,3, respectively, are attributed to late sanction of estimates and failure of contractors to execute work.

238. *Imperial.*—The accounts show an increase of 264,2 over those of 1885-86, which is due to the general restriction of expenditure on Public Works in the previous year, as well as to heavy expenditure on Frontier Roads in Biluchistan, and on roads and buildings in the newly annexed province of Upper Burma. In Bengal, the accounts of 1885-86 include an exceptional charge of 46,6 on account of the purchase of the Barakur Iron Works, and certain initial outlay in connection therewith, these sums being provided from Imperial Funds. The increase in the Punjab accounts for 1886-87 is due to larger progress on the Derajat and Dera-Ghazi-Khan-Peshin Frontier Roads. In Bombay, the increase is due to larger expenditure on Telegraph, Postal and Salt Buildings.

239. The Revised Estimate was less than the Budget Estimate by 21,4, owing principally to grants having been surrendered at the close of the year. On the Revised Estimate of 599,6 there has been an excess of 15,1, which is the result of the Upper Burma grant having been exceeded by 39,1, owing to the expenditure incurred by Civil Officers in Upper Burma having been transferred to the Public Works Department for adjustment, at the close of the year. The lapse of 15,0 on the Revised Estimate under India, is due chiefly to inability to utilize grants, owing to scarcity of labour, unexpected reduction in suspense balances, and to the grants for repairs in Biluchistan not having been fully utilized, owing to the year having been a dry one and little repair to the mud walls and roofs being required. In Bombay the lapse is due to the grant for the extension of the new Telegraph Office at the presidency not having been utilized, and to short outlay on maintenance of salt sidings at Gujarat.

240. *Provincial.*—Here again the expenditure exceeds that recorded in the accounts of 1885-86, owing to operations having been resumed on works postponed in the previous year for want of funds. In the Central Provinces, the increase is mainly due to larger outlay on the maintenance of roads. The increase in Bengal is partly due to restriction of expenditure in the previous year, and partly to the adjustment of the working expenses of the Barakur Iron Works from 1882-83 to 1886-87, which are provincial. In Madras, the increase is principally due to larger grants for expenditure on metalled and bridged roads.

Section K.—BUILDINGS AND ROADS—EXPENDITURE—*continued.*

241. The original estimate of 1,952,8 was increased in the Revised Estimate by 11,1, owing to additional grants having been made available during the course of the year, for expenditure on emergent works. The Revised Estimate has been exceeded by 18,6, owing principally to the final adjustment in the accounts of 1886-87, of the expenditure on the Barakur Iron Works from 1882-83 to 1886-87. The lapse of 5,5 in the Central Provinces, is due to the expenditure at the close of the year having been over-estimated. The excess of 1,3 over the grant for Lower Burma, is due to the allotment for the iron bridge over the Pegu River having been exceeded by 2,7. In Assam, the short outlay of 3,1 is due to the provision for establishment having been over-estimated. The lapses on the Revised Estimates of the North-Western Provinces and Oudh and Punjab, are attributed to inability to utilize grants, and to small savings on a number of completed works. In Bombay, the lapse on the departmental estimate, is due to difficulty in procuring labour and materials, and failure on the part of contractors to execute work. The lapse in Madras under Civil Officers, is due to the non-payment of an item of 3,5 provided for the Ootacamund Water supply project.

242. *Local.*—The restriction of expenditure in 1885-86, accounts for the increase in the accounts of 1886-87.

243. In preparing the Revised Estimate the original estimate was reduced by 88,4, principally under Civil Officers, owing to transfer of grants to other heads, and to the estimates having been generally reduced on a re-consideration of the progress of expenditure. The expenditure has fallen short of the Revised Estimate by 104,2, of which 69,1 is under Civil Officers and 35,1 under Public Works Officers.

244. The following are the principal differences:—

	Less than Revised.
Bengal (Civil Officers)	37,1
Madras (ditto)	17,2
Bombay (Departmental Officers)	13,2
Central Provinces (Civil Officers)	8,6
Punjab (Departmental Officers)	7,5
Lower Burma (ditto)	6,7
N.-W. P. and Oudh (ditto)	5,9

245. In Bengal, the short outlay is attributed to the expenditure having been over-estimated by the newly constituted District Boards. The expenditure was also over-estimated in Madras. The lapse in Bombay, is attributed to failure on the part of contractors to carry out work, want of plans and estimates, and non-payment of compensation for land. In the Central Provinces, it is due to the postponement of works by District Councils and Local Boards. The short outlay in the Punjab, is due to the abandonment of the Umballa-Pihewa Road on account of heavy charges for its maintenance, and delay in obtaining English Stores for other works. In Burma, it is chiefly due to the write-back to debit of Provincial, of expenditure on the Sattyogya Bridge. In the North-Western Provinces and Oudh, the short outlay represents unappropriated allotments by District Boards.

246. The increase of 14,2 in the English expenditure over that of the previous year is principally due to larger payments on account of furlough pay and allowances of officers of the Public Works Department. The difference of 9,9 between the Budget and Revised Estimates is attributed to increases in the payments to Military Officers on leave and in the payments on account of Assistant Engineers under training in England.

247. The actuals have closely approximated to the Revised Estimate.

L.—ARMY SERVICES.

1885-86. Accounts.		1886-87. Budget.	Revised.	Accounts.
963,9	RECEIPTS . . .	841,7	910,3	985,0
20,097,8	EXPENDITURE . . .	18,266,0	19,070,6	19,525,0
19,133,9	NET .	17,424,3	18,160,3	18,540,0

248. In comparing the figures of the two years, 1885-86 and 1886-87, it should be remembered that there were special circumstances in both periods which affected the receipts as well as the expenditure. In 1885-86 we had the military preparations on the North-West Frontier, the Expedition to Burma, the Camp of Exercise at Delhi, the concentration of troops and camp at Rawulpindi, and the augmentation of the strength of the British and Native Armies. In 1886-87, the operations in Burma continued longer and proved more costly than was anticipated, a sum of 300,0 only having been entered on this account in the Budget, whereas the actual expenditure amounted to 1,517,8. In the revised estimate 1,160,0 were entered for Burma, and it has been exceeded to the extent of 357,8.

249. Irrespective of the extra expenditure on account of Burma, the actuals exhibit a small increase in the ordinary expenditure of 114,3 and 194,0 over the Indian portion of the budget and revised estimates respectively, *viz.* :—

	1886-87. Budget Estimate.	Revised Estimate.	Accounts.
	₹	₹	₹
Including Burma . .	13,288,4	14,068,7	14,620,5
Deduct Burma . .	300,0	1,160,0	1,517,8
Excluding Burma . .	12,988,4	12,908,7	13,102,7
Excess actuals over budget and revised estimates excluding Burma . .	114,3	194,0	.....

250. The revised estimate made increased provision for two additional Goorkha battalions, for purchase of mules, for an augmented establishment of medical officers, British service, and for purchase of land. The excess expenditure over the revised estimate, apart from the Burma charges, is due to the adjustment of arrear expenditure connected with the late Camp of Exercise at Delhi and the Quetta Field Force, to increased good-conduct pay to the Native Army under more favourable rules, to higher rates for provisions for troops, especially in the Quetta district, and increased charges for barrack bedding in the Bengal Presidency.

251. The following paragraphs afford the detailed information which is usually given in these Appropriation Reports :—

18,7	Exchange	12,2	19,4	19,3
963,9	GRAND TOTAL .	841,7	910,3	985,0

252. The excess over estimate under III is due to large recoveries of hutting money advanced in Madras, to miscellaneous recoveries in Bengal and Madras, and to increased receipts from the purchase of discharge and refund of bounty money by British soldiers in the three presidencies. Under IV it is caused by larger sales than were anticipated of commissariat stores, malt liquor and rum, owing to the increased strength of troops in Burma, and by the sale of surplus cattle and gear originally purchased for the Quetta Field Force. The increases in VIII, IX, X, XIII, XIV, and XIX occur, respectively, in prison funds, medical stores for Burma, ordnance stores issued to non-military departments in Upper Burma, recoveries of table-money for messing, officers, &c., conveyed to Burma, sale-proceeds of captured property in that country, and in the receipts on account of the Indian service family pensions. The decline under V is due to small sales of cast horses and to the value of hay supplied to remount horses at the Hosar Depôt in Madras not having been credited to military receipts as before, owing to the amalgamation of the farm and the depôt accounts. The receipts under XVII, retired officers, were less than the Budget, as the full sum due from Berar for officers lent to that Province was not realized within the year.

253. As regards the English receipts, the increase occurs under the head of Indian Troop Service, and is mainly due to receipts from the Admiralty for the employment of the troop-ships on Imperial service.

14. Miscellaneous Services	5,3	298,3	5	304,1
17. Military Pensions, Europeans	...	9	...	9
TOTAL	156,5	1,323,3	38,0	1,517,8

255. It has been stated in paragraph 249 that, apart from the extra expenditure connected with Burma, there are various fluctuations in the Indian accounts of 1886-87 making a total of 194,0. The following is a summary of these fluctuations :—

256. The *Grant for Army and Garrison Staff* was partially saved on account of vacancies in certain appointments, including the Madras and Bombay Commands. Similar savings occurred in *Regimental Pay, &c.*, from the European and Native Army being short of the established strength. The *Commissariat* expenditure includes certain arrear charges connected with the late camp of exercise at Delhi and the Quetta Field Force, and some additional outlay on account of dearness of provisions. The cost of *Barrack Establishments and Supplies* was enhanced by the substitution of coir in place of straw for stuffing mattresses, and by the purchase of local supplies to a larger extent than was anticipated. The diminished charge for *Ordnance* is due to large supplies having been made to the Burma Police, credit for which has been taken by deduction from this head. The grant for *Education* was not all required owing to the abolition of the appointment of Superintendent, British Army Schools, and of the Normal School at Umballa. The head *Miscellaneous Services* includes the cost of land purchased in Bengal. The excess over estimate under *Military Pensions* to Europeans is due to larger payments than were expected to officers in India on account of the capitalised portions of their pensions.

257. As regards the expenditure in England, the budget for *Home Charges* and *Retired Pay* was too high, and for *Pay and Pension of non-effectives* too low. The decline under *Indian troop service* is mainly due to savings on the contract for new machinery for the *Malabar*, and to the postponement of some payments on that account to the year 1887-88. The head *Miscellaneous* includes a payment of 3,9 for gratuities on account of service in the expedition to Egypt in 1882, and 16,1 for the purchase of horses, the remainder of the increase having reference to allowances paid to officers studying the Russian language. The large saving of 101,8 under *Stores for India* is chiefly owing to the postponement of the purchase of new rifles provided for in the Budget under Ordnance Stores. A decrease of 12,2 for malt liquor and an increase of 60,2 for clothing form the minor variations.

Actuals with Budget Estimate	3,6	
„ „ Revised Estimate	7,9	

259. The original allotment was reduced in the Revised Estimate by 136,5 owing to surrender of grants at the close of the year in consequence of several large projects not having been sufficiently matured.

260. The accounts of Indian expenditure have fallen short of the Revised Estimate by 7,2 which is principally due to the non-receipt of English Stores for the Karachi Harbour Defence Works, and to the inability of the Military Works Department to utilize the full amount of the grants allotted.

Section M.—PROVINCIAL ADJUSTMENT.

Provincial and Local Revenue as by Budget	Provincial Balances. April 1st, 1886.	March 31st, 1887.		Budget.	1886-87. Revised.	Accounts.
15,9	11,4	11,9	India	−1,7	−9	+5
771,2	381,2	261,7	Central Provinces	−185,3	−159,5	−119,5
1,296,5	18,9	114,6	Burma	−20,6	+ 2,1	+95,7
520,6	101,9	72,1	Assam	−50,0	−36,7	−29,8
4,699,0	365,0	417,5	Bengal	−73,7	−82,2	+52,5
3,790,3	460,2	450,0	North-Western Provinces . .	−200,3	−139,9	−10,2
1,892,4	332,7	356,5	Punjab	−70,0	−22,4	+23,8
3,263,1	824,9	969,0	Madras	−70,4	+52,7	+144,1
4,038,2	886,9	765,5	Bombay	−303·4	−190,5	−121,4
20,287,2	3,383,1	3,418,8	TOTAL .	−975,4	−577,3	+35,7

261. There is little to say regarding these figures, because full explanations have already been given in the earlier part of this report of the fluctuations of the various kinds of revenue and expenditure. These figures represent the surplus or deficit of each provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The net result to be gathered from them is, that whilei n the budget it was expected that this class of expenditure would exceed the revenue by 975,4, the accounts show that the revenue exceeded the expenditure by 35,7. Details explaining how these results have been produced are given below, and they show that in the Central Provinces, Assam, Punjab, and Madras, the improvement is due mainly to economy in expenditure, while in Burma, Bengal, the North-Western Provinces and Oudh, and Bombay, it has arisen from increased revenue. The provincial balance in the Central Provinces, Madras, and Bombay, is in excess of the minimum by 116,1, 233,7, and 349,0, respectively, while in Bengal, where it has been low, the amount has risen and is near the prescribed limit. In 1884-85 and 1885-86 the provincial expenditure in Burma largely exceeded the revenue, and special grants amounting to 66,6 and 77,1 were made from Imperial funds to cover the deficits. In 1886-87, however, a surplus of 71,8 has been obtained.

1885-86. Accounts.		1886-87. Budget.	1886-87. Revised.	Accounts.
6,361,3	EXPENDITURE	10,713,0	11,022,2	10,585,0

262. The expenditure has exceeded the actuals of the previous year by 4,223,7 and has fallen short of the Budget by 128,0, the deviations under the several heads comprised in this group being as follows :—

	Better + worse − than Accounts, 1885-86.	Better + worse − than Budget, 1886-87.
CAPITAL OUTLAY ON RAILWAYS AND IRRIGATION WORKS—		
48. State Railways	*−410,3*	*−396,0*
49. Irrigation Works	+15,1	+152,6
50 CAPITAL CHARGES INVOLVED IN REDEMPTION OF LIABILITIES	*−3,828,5*	*−70,3*

263. This group originally embraced the grant for Special Defence Works, which has now been transferred to a distinct group after L, Army Services. Another important change has been made by omitting exchange from the capital charge involved in the redemption of liabilities, as both receipts and payments occur in England, and this explains the discrepancy between the amount entered above as Budget and the corresponding figure in the Statements attached to the Financial Statement. The total outlay on State Railways in 1886-87 is actually 478,7 less than the previous year, but the actuals *under this head* show an increase of 410,3, as out of the total outlay incurred in 1885-86, 500,0 for Frontier Railways, 589,0 for Protective Railways, was provided from Revenue, whereas in 1886-87 only 200,0 have been so taken from the Protective Railway grant. In 1885-86 the expenditure was also reduced by a special refund of about 470,0 from the Indian Midland Company for outlay incurred by Government on certain lines taken over by them, but this may be set off against an increased expenditure in that year on stores which have been used only in 1886-87. The excess over the Budget under State Railways is due to outlay on the Burma and North-West Frontier Railways, including the Sutlej bridge. The saving in irrigation works has accrued from inability to spend the sanctioned grants. The large expenditure on capital charge in redemption of liabilities has reference to the Sind, Punjab and Delhi Railway annuity.

Section N.—EXPENDITURE NOT CHARGED TO REVENUE—*continued.*

264. For the first time this year the outlay on each line includes the exchange chargeable to it, and the total addition on this account in the actuals is 496,8. For the purposes of this report it will be convenient to divide the outlay into two parts comprising respectively the expenditure in India and in England. As regards the expenditure in India the increase over the actuals of 1885-86 is owing chiefly to the vigorous prosecution of works on the Frontier Railways, including the Sutlej Bridge at Ferozepore and the Sind-Sagar Railway in view to the early completion of the several projects. It should also be noted that in 1885-86, a sum of fifty lakhs was deducted from this head and charged off to Frontier Railways under 37.—*Construction of Railways (charged against Revenue in addition to that under Famine Insurance)*. During the year under review no such allowance was provided for. Again, the charge in the previous year to 34.—*Construction of Protective Railways* by reduction from this head, was nearly thirty-nine lakhs in excess of the similar transfer in 1886-87. Against these additions may be set off a refund of about forty-seven lakhs by the Indian Midland Railway Company, credited to this head in 1885-86 on account of the Cawnpore-Kalpi and Jhansi-Manikpur Railways transferred to that undertaking.

265. The whole of the grants and outlay under Protective Railways, Frontier Railways and State Railways Capital are, as explained in last year's report, dealt with together in the above statement in the first instance. During the year under review, the total cost of Frontier lines was finally borne by this head, but 200,0 on account of Protective Railways was deducted from the total expenditure of the year and transferred to the head 34.—*Construction of Protective Railways.*

266. The Budget Estimate of 1886-87 was prepared for a total outlay of 5,227,1, made up as follows:—

Amount approved by the Secretary of State, in Finance Despatch No. 367 of the 10th December 1885	...	4,467,5
Addition approved by Finance Department on account of proposed short outlay on Special Defence Works	...	150,0
Contribution by the Government of the N.-W. P. and Oudh from surplus provincial balances, towards outlay on Railways in those Provinces, classed as *Productive Public Works*	...	16,6
Exchange on English Stores	645,0	
Deduct—Estimated Exchange on English Stores paid for in previous years, likely to be issued to Revenue in 1886-87	*52,0*	593,0
Total	...	5,227,1

267. This included 500,0 shewn under *Construction of Protective Railways*, originally provided from ordinary revenues.

268. The detailed distribution of the sum of 5,227,1 is given in the last page, but these arrangements were modified during the year according to the exigencies of the various undertakings. At the time the Revised Estimate was prepared, the grant for outlay stood at 5,470,4, as under—

Amount approved by the Secretary of State, in Finance Despatch No. 367, dated 10th December 1885, as above	4,467,5
Addition approved by the Finance Department on account of Estimated short outlay on Defence Works, as above	150,0
Additional grant sanctioned by Finance Department in letter No. 2469 dated 10th August 1886 (less 30,0 subsequently surrendered by the Public Works Department) for capital outlay on the Sind-Pishin State Railway, Sibi-Quetta Section	142,5
Additional grant sanctioned by the Finance Department, in letter No. 3834 of 22nd October 1886, for outlay on the Sind-Sagar State Railway, Western Section	100,0
Additional grant sanctioned by the Finance Department for outlay on the Tounghoo-Mandalay Extension	200,0
	5,060,0
Less—Outlay likely to be incurred on the railway from Bezvada to the Hyderabad Frontier during 1886-87, from funds advanced by His Highness the Nizam's Guaranteed Railway, to be refunded to that Company in 1887-88. This amount was surrendered, as it was available for other purposes	*27,5*
Total grant from Imperial Funds excluding Exchange	5,032,5
Add—Estimated Exchange on English outlay during 1886-87	490,0
Carried over	5,522,5

Section N.—EXPENDITURE NOT CHARGED TO REVENUE—*continued.*

Brought forward .	5,522,5
Deduct—Estimated Exchange on English stores paid for in previous years, likely to be issued to Revenue in 1886-87	*34,3*
Total grant from Imperial Funds (including Exchange) . . .	5,488,2
Owing to transfer of Rolling stock and plant from the Cawnpore-Achnera Railway, the transactions of the State Railways, in the N.-W. P. and Oudh, it was estimated would result in a *net credit which would revert to Provincial Funds of*	*—17,8*
Leaving the balance of the Grant under this head at	5,470,4

269. The Revised Estimate was cast at 5,371,5 or 98,9 less than the grant available, as it was considered that the full amount could not be expended during the year. Of this amount, 200,0 was shewn under 34—*Construction of Protective Railways*, and the balance, 5,171,5, under the head 47—*State Railways, Construction.* The grant of 5,171,5 was distributed afresh in the Revised Estimate as will be seen from the figures in page 114, and it is necessary now to explain the difference between the Actuals and the Revised. This difference is a net saving of 25,5 in the Indian outlay is not large including exchange, and the following are more important variations comprised in it.

	Accounts, less than Revised Estimate. India.	England.	Total.	Accounts, more than Revised Estimate. India.	England.	Total.
Rajputana-Malwa	22,3	...	22,3	...	...	...
North-Western	...	...	...	32,9	*—32,8*	1
Sind-Pishin, Darwaza-Quetta . . .	...	...	...	14,2	7	14,9
Sind-Sagar, Eastern Section . . .	12,5	19,9	32,4	...	...	...
Bolan	28,2	...	28,2	...	...	...
Sind-Pishin, Bostan-Gulistan . . .	...	...	...	20,7	*—5,6*	15,1

270. The lapse on the Rajputana-Malwa Railway is owing chiefly to short expenditure on various sub-heads and works, owing to the progress of outlay having been overestimated. Under Rolling Stock there was a large lapse, due to the non-receipt from England of iron-work for Carriage and Wagon Stock, and to credits realized for transfer of stock to the Bolan and Tirhoot Railways, after the Revised Estimate had been passed. The excess on the North-Western Railway represents the value of Plant and Stores taken over from the Bolan Railway under orders of Government issued after the Revised Estimate had been disposed of, and larger payments for firewood than anticipated. The credits from Revenue for stores issued for renewals also fell short of expectations. The excess on the Darwaza-Quetta Section of the Sind-Pishin State Railway is owing to store charges brought to account, which were not foreseen when the Revised Estimate was framed, and to the rates for the carriage of permanent-way over the Bolan Railway having proved higher than anticipated. The lapse on the Sind-Sagar Railway, Eastern Section, is attributed to the charge for Exchange having fallen short of expectations, and to the provision for Land and Indian outlay on Rolling Stock not having been worked up. The lapse on the Bolan Railway is the result of a revision of allocation of expenditure between the Public Works and Military Departments, under which a considerable sum was credited to the former, and the transfer to the North-Western Railway of the stores and suspense balance under orders issued by Government after the Revised Estimate had been dealt with. The excess on the Bostan-Gulistan Section of the Sind-Pishin State Railway, is attributed chiefly to the higher rates charged for carriage of permanent-way over the Bolan Railway, and to a debit made against the grant, by credit to *Deposits*, of liabilities for work done by contractors. These liabilities are being cleared off during 1887-88 by cash payments to the contractors concerned and debit to *Deposits*.

171. The diminished outlay in England is due to the demands for Railway Stores being much smaller than was indicated when the estimate was framed.

275. See paragraph 59 under B Interest on debt. In that paragraph against the India 3 per cent., the sum of ₹6,000,0 was entered, that being the amount of stock issued. Here 5,207,5 are stated as that is the actual amount received, the stock having been issued at a discount.

Section P.—UNFUNDED DEBT.

	1886-87. Budget.	1886-87. Revised.	1886-87. Accounts.
Special Loans	...	—2	—2
Treasury Notes and Service Funds, India	+58,4	+50,6	+55,2
Savings Bank Deposits	+419,8	+660,2	+720,8
	+478,2	+710,6	+775,8

276. The—2 under Special Loans are the Capitalized values of certain small pensions under the 1st Oudh loan. There are now very few Treasury Notes, and the Service Fund Deposits refer mainly to the Bengal and Bombay Uncovenanted Funds, whose deposits during the year amounted to 51,0 and 5,4 respectively. The Estimate of *Savings Bank Deposits* was too low. During the year under review the net deposits in Railway Banks amounted to 7,1, in the Civil Engineer's Provident Fund to 19,9, in the Military Banks to 2,3, and in the Post Office Banks about 2,000,1 including transfers from the Presidency and the late District Savings Banks.

Section Q.—DEPOSITS AND ADVANCES.

	Budget.			1886-87. Revised.			Accounts.

Miscellaneous	35,5	−34,8=	+ 7	70,7	−43,5=	+27,2	63,6	−62,5=	+ 1,1
ENGLAND	3,0	−3,0=		16,6	−8,1=	+8,5	13,6	−6,3=	+ 7,3
TOTAL			+ 733,5			+628,2			+ 1,305,2

277. The first two items have been explained in para. 261. The *Excluded Local Funds* are banking accounts and are not susceptible of detailed explanation. The operations of the *Political, Railway and Military Prize Funds* have turned out very much as was anticipated in the budget. The heads *Deposit, Advances and Suspense Accounts and Miscellaneous* are uncertain quantities which it is difficult to forecast. In this year they do not present any special features requiring notice. The particulars of the net credit under *Exchange on Remittance Accounts* are given below. The amount 7,3 entered against England includes an exceptional receipt, being unclaimed interest repaid by the Eastern Bengal and Sind, Punjab and Delhi Railway Companies, and by the Madras Irrigation and Canal Company, consequent on the purchase of the several undertakings by the State.

Sterling Liabilities increased.	Sterling amount.	Exchange. Cr.	Dr.
Permanent debt	4,796,4	1,803,8	
Other debt heads	7,3	2,7	
Receipts from Railway Companies to be repaid hereafter.			
Guaranteed Railways	517,5	194,6	
Subsidized Railways	1,618,6	608,7	
Payments to Railway Companies for recovery hereafter —*Guaranteed Railways*	−34,9		13,1
Payments to Railway Companies against Receipts from them in previous years.			
Guaranteed Railways	−10,8		4,1
Subsidized Railways	−2,774,8		1,021,8
Increase in the English cash balance	−554,2		208,4
TOTAL		2,609,8	1,247,4
Net		1,362,4	

Section R.—LOANS TO MUNICIPALITIES, NATIVE STATES, &c.

	Budget.	1886-87. Revised.	Accounts.
India	484,4—1,382,0	1,085,2—1,012,7	1,136,1—1,053,3
	—897,6	72,5	82,8

278. These figures represent transactions of great magnitude which it is difficult to estimate. The loans made amounted to 328,7 less than the estimate, and this difference is spread over all the Provinces, but is greatest in Bengal where the Calcutta Port Trust did not draw the full amount sanctioned for it. The loans repaid amounted to 651,7 more than was anticipated, and here the excess is mainly in India, Bengal and Madras. In India it represents the amount repaid by the Gwalior Durbar after the death of His Highness the Maharajah, in Bengal, large instalments on account of the Hughly Bridge, and in Madras, the sum realised from the Southern Mahratta Railway Company in respect of the Mysore line, by which the debt of that State was liquidated:

	Amount advanced.	Amount repaid.
Loans to Native States	16,0	907,3
Advances for Ceylon Cable	...	1,8
Loans to Presidency Corporations and Port Trusts	915,4	92,7
Do. Mofussil Municipalities	13,8	19,7
Do. Port Fund	4	...
Do. District and other Local Committees	85,1	4,5
Do. Landholders and other Notabilities	22,6	110,1
TOTAL	1,053,3	1,136,1

Section S.—CAPITAL OF RAILWAY COMPANIES.

Section S.—CAPITAL OF RAILWAY COMPANIES—*continued.*

279. The whole of these are net amounts. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them chiefly on account of stores used. The English figures represent the capital deposited by the companies with the Secretary of State less payments made therefrom. These amounts are subject to large fluctuations, and in the present year the accounts have turned out better than the estimate by 2,477,6. Of this sum 279,6 is better in the Indian account of guaranteed companies, about half being due to smaller advances and the rest to larger credits for Revenue stores. The difference is spread over all the Companies and does not call for special notice. 358,0 is worse than the estimate in the Indian account of subsidized Companies, the Southern Mahratta Company having drawn 885,1 more than was anticipated largely on account of the Mysore line, while the Indian Midland took 524,2 less as the works were not carried out to the extent expected. The difference of 2,556,0 in the English account is made up of the following amounts. The arrangements with the Bengal-Nagpur Railway Company were only concluded in February 1887, while the diminished payments in discharge of debentures is attributable to the renewal of certain debentures of the Great Indian Peninsula Railway:—

Excess received on account of Subscribed Capital from—		
Bengal-Nagpur Railway Company		1,655,7
Indian Midland Railway Company		122,4
Southern Mahratta Railway Company		205,3
Great Indian Peninsula Railway Company		174,3
South Indian Railway Company		47,0
Rohilkund and Kumoon Railway Company		20,0
Excess received on account of transfer fees and miscellaneous refunds		4,4
Short payment on account of Debentures discharged		40,4
Short payment on account of stores, establishment charges, &c.		434,0
		2,703,5
Deduct short received on account of subscribed Capital from—		
Madras Railway Company	140,0	
Oudh and Rohilkhand Railway Company	7,5	
		147,5
Net as above		2,556,0

Section T.—REMITTANCES.

	Budget.	1886-87. Revised.	Accounts.
Money Order (net)	...	...	+19,8
Other Local Remittances (net)	...	+9,9	+11,2
Other Departmental Accounts (net)	—9,1	+5	—12,2
Accounts between Civil and other Departments (net)—			
Post Office	...	...	—14,8
Telegraph	...	...	+3
Marine	...	...	+4,6
Military	...	...	+95,3
Public Works	...	+1,045,3	+113,2
Remittance Account between England and India (net)	—126,3	+22,6	+19,1
TOTAL	—135,4	+1,078,3	+236,5

280. The use of money orders is steadily increasing as shewn by the figures entered below and the small credit under the head represents unpaid orders at the close of the year. The figures under Accounts between Civil and other Departments and under Remittance account between England and India are satisfactory and shew that the outstandings are well looked after.

		Issued.	Paid.
1883-84	Money order transactions	7,313,4	7,289,0
1884-85		8,192,8	8,197,0
1885-86		9,312,4	9,298,4
1886-87		10,538,9	10,519,1

Section U.—SECRETARY OF STATE'S BILLS.

	1886-87. Budget.	Revised.	Accounts
Drawings	13,331,4	12,000,0	12,136,3
Payments	13,331,4	11,948,1	12,177,7

281. The following bills were drawn during the year by the Secretary of State:—

	£	Rx.	Rate in Pence.
On account of allotments in April 1886	1,179,1	1,585,0	17·85
" " May "	158,8	217,0	17·81
" " June "	409,4	562,4	17·73
" " July "	471,9	671,4	17·54
" " August "	1,201,7	1,766,8	17·09
" " September "	1,274,0	1,811,2	17·03
" " October "	672,7	929,9	17·07
" " November "	786,2	1,060,1	17·16
" " December "	1,355,5	1,836,3	17·26
" " January 1887	1,761,4	2,347,7	17·39
" " February "	1,127,5	1,511,3	17·45
" " March "	1,738,1	2,401,2	17·44
	12,136,3	16,700,3	17·54

282. During the year the demand for bills and transfers was less than had been expected, and as money in excess of the estimate was obtained from the Railway Companies, the sale was not pressed.

283. The payment account of the year may be stated as follows:—

	£	Rx.
Bills of 1885-86 outstanding on 1st April 1886	312,7	418,0
Bills drawn in 1886-87 as entered above	12,136,3	16,700,3
Total bills for payment	12,449,0	17,118,3
Bills paid in 1886-87	12,177,7	16,738,3
Bills outstanding on 1st April 1887	271,3	380,0

Section V.—CASH BALANCE.

	Budget.	1886-87. Revised.	Accounts.
Balance on 1st April 1886	17,179,9	17,481,1	17,481,1
Balance on 31st March 1887	13,081,2	15,093,7	18,476,6
Increase (+) or decrease (—) of balance on 31st March 1887	—4,098,7	—2,387,4	+995,5

284. This difference between the estimate and the accounts is distributed between India and England in the following proportions:—

	Budget.	1886-87. Revised.	Accounts.
India	—1,784,5	+262,1	+441,3
England	—2,314,2	—2,649,5	+554·2
TOTAL	—4,098,7	—2,387,4	+995,5

* The columns headed "Exchange" show, under the several heads of Revenue and Expenditure which include transactions in England, the Exchange thereon calculated in accordance with the average rate obtained, or estimated to be obtained, for Bills and Telegraphic Transfers sold during the year.

Abstract B.—*Details of Expenditure.*

[Rx. 1 is recorded for every 10 Rupees in respect of Transactions in *India*, including those of "Exchange."]

The figures in thick type are those which appear in the General Account.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE THIRD QUARTER OF 1887.

No. 379 R. T., dated Calcutta, the 23rd March 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 270 R. T., dated the 15th March 1887.
Ditto ditto No. 1531 R. T., dated the 30th December 1887.

Read also—

Director General of Railways' No. 116 T., dated the 20th February 1888, forwarding the Abstract Returns of Accidents to trains, &c., on the open lines of Railways in India for the quarter ending 30th September 1887.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling stock, permanent way, &c., shows an increase of 31* or 4·57 per cent. against an increase of 1,424 miles or 11·58 per cent. in the mean mileage open, and a decrease of 522,149 miles, or 4·84 per cent. in the train mileage. The following are the Railways on which the more important fluctuations occurred :—

Railways.	Accidents.				Train mileage.	
	Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	Percentage of increase	Percentage of decrease
Rajputana-Malwa	...	33	...	32·35	...	28·81
Southern Mahratta	26	...	371·43	...	103·34	...
North Western	...	12	...	7·79	...	9·69
Great Indian Peninsula	...	12	...	34·28	...	4·89
Bombay, Baroda and Central India	14	..	58·33	...	...	9·41
Oudh and Rohilkhand	...	19	...	40·43	...	12 49
Dibru-Sadiya	48	...	150·00	...	16·69	...

2. The decrease on the Rajputana-Malwa Railway is due chiefly to a diminution in the number of cattle accidents (40 against 53) and to the total absence of accidents under "Goods trains or parts of goods trains, engines, &c., leaving the rails" against 12 accidents recorded under this head in the corresponding previous quarter.

3. On the Southern Mahratta Railway there is no noticeable increase under any head, except that of "Trains running over cattle on the line," which shows an increase of 9 accidents.

4. The largest variations on the North Western Railway were under "Trains running over cattle on the line" and "Failures of Machinery, Springs, &c., of Engines," the former showing an increase, and the latter a decrease, of 12 accidents. Under "Fire in trains" there was also a decrease of 10 accidents.

5. On the Great Indian Peninsula Railway there was no important difference under any head.

* The returns for the Cherra-Companyganj, Darjeeling-Himalayan and Mysore Railways for the 3rd quarter of 1886 were received too late for inclusion in the general returns. The numbers of accidents returned by these lines for the quarter under review are *nil*, 11 and 3 respectively.

6. On the Bombay, Baroda and Central India Railway the number of "Trains running over cattle on the line" increased from 1 to 11, and that of accidents classified as "Other accidents", from 17 to 24.

7. The decrease on the Oudh and Rohilkhand Railway was entirely under the head "Trains running over cattle on the line."

8. On the Dibru-Sadiya Railway the number of "Failures of couplings" exhibits an unusual increase, there being 55 cases against 6 in the corresponding quarter of 1886.

9. The casualties resulting from accidents to trains, &c., were among passengers and others, 3 killed and 9 injured, against 9 injured, and among servants 6 killed and 14 injured against 1 killed and 2 injured. Of the total casualties, 3 passengers were killed and 6 injured on the North Western Railway by the derailment, on the 19th September, of No. 4 Down Calcutta mail train at mileage 164 between Sarái Banjára and Rajpura stations owing to the settlement of the embankment from floods and heavy rain.

On the Rajputana-Malwa Railway there were 2 servants killed and 4 injured in the accident to the up goods on the 31st August. The train was passing over Bandi Bridge near Asalpur when it ran into a herd of cattle straying on the line, and the whole train, consisting of an Engine and forty-one vehicles, was precipitated into the river. The damage done to rolling stock by this accident is estimated at about Rs. 50,000.

10. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby :—

Class.	Number of accidents.	Number of passengers and others.		Number of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains or parts of passenger trains	1	...	...	...	...	...	...
Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line	9	...	1	1	3	1	4
Collisions between goods trains or parts of goods trains	6	...	...	...	...	...	...
Passenger trains, or parts of passenger trains leaving the rails	20	3	6	1	2	4	8
Goods trains, or parts of goods trains, Engines, &c., leaving the rails	83	...	...	...	2	...	2
Trains or Engines travelling in the wrong direction through points	16	...	...	...	...	...	...
Trains running into stations or sidings at too high a speed	1	...	...	...	...	...	...
Trains running over cattle on the line	249	...	...	2	4	2	4
Trains running over obstructions on the line	14	...	2	...	1	...	3
Trains running through gates at level-crossings	6	...	...	...	...	...	...
The bursting of tubes, &c., of Engines	24	...	...	...	1	...	1
The failure of machinery, springs, &c., of Engines	41	...	...	...	...	...	...
The failure of tyres	6	...	...	...	...	...	...
Do. of wheels	2	...	...	...	...	...	...
Do. of axles	4	...	...	...	...	...	...
Do. of couplings	86	...	...	1	...	1	...
Broken rails	11	...	...	...	...	...	...
The flooding of portions of permanent-way	41	...	...	...	...	...	...
Slips in cuttings or embankments	6	...	...	...	...	...	...
Fire in trains	21	...	...	...	...	...	...
Fire at stations or involving injury to bridges or viaducts	5	...	...	...	...	...	...
Other accidents	57	...	...	1	1	1	1
TOTAL	709	3	9	6	14	9	23

11. The number of "collisions between goods trains or parts of goods trains" shows a large decrease, being only 6 against 18.

12. The cattle accidents, which number 249 against 274, were most numerous on the Rajputana-Malwa, and North Western, Railways. The numbers returned by these lines were 49 and 37 respectively.

13. The cases of the "Bursting of tubes, &c., of Engines" chiefly occurred on the North Western and South Indian Railways. Out of a total of 24 accidents, 11 were on the former line and 9 on the latter.

14. The numbers of "Failures of machinery, springs, &c., of engines" were very large on the North Western Railway and Eastern Bengal State Railway system, being 19 and 10 respectively out of a total of 41. As compared with the corresponding previous period, there was, however, as already noticed in para. 4, a decrease on the former line of 12 accidents under this head.

15. Under "Failure of couplings" the number has risen from 36 to 86, owing to there being 55 cases against 6 on the Dibru-Sadiya Railway.

16. The number of cases of "Fire in trains" was very nearly the same as previously, *viz.*, 21 against 20. There were 9 accidents under this head on the South Indian Railway and 6 on the Madras Railway.

17. Out of 57 accidents classed as "Other accidents," 24 occurred on the Bombay, Baroda and Central India Railway.

18. The casualties to passengers from causes other than accidents to trains, &c., were—

Cause of accident.	Killed.	Injured.
From falling between carriages and platforms	...	1
Falling on to the platform, ballast, &c., when getting into or out of trains	...	3
Whilst crossing the line at stations	1	...
By closing of carriage doors	...	1
Falling out of carriages during the travelling of trains	7	6
Other accidents	2	5
Total	10	16

19. The accidents to servants in the employ of Railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were as follows:—

Cause of accident.	Killed.	Injured.
During shunting operations	7	9
Falling off engines, vans, wagons, &c.	2	12
Coming in contact with overbridges, &c., during the travelling of trains	1	1
Coming in contact, while shunting, with vehicles, &c, standing in adjoining lines	...	1
Getting on or off trains, engines, &c.	1	8
Whilst loading, unloading or sheeting	5	4
Whilst working on the permanent-way or in sidings	2	2
Whilst walking along the line on the way home or to work	...	1
Whilst walking, crossing or standing on the line	10	11
Whilst passing between vehicles	...	3
Whilst attending to gates at level-crossings	...	1
Falling or being caught between vehicles and platforms	...	3
Falling off ladders, scaffolds, platforms, &c.	2	3
By falling of lamps, wagon doors, timber, weights, &c.	1	9
Whilst coupling or uncoupling wagons	1	5
Miscellaneous	5	28
Total	37	101

20. Of other persons killed and injured by running trains, &c., 5 were killed and 1 injured whilst passing over the line at level-crossings; 43 were killed and 15 injured whilst trespassing on the line; 9 committed suicide; and 5 were killed and 1 injured from miscellaneous causes.

21. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1886:—

	3rd quarter, 1886.		3rd quarter, 1887.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	1	10	5	8
From misconduct or want of caution	7	36	8	17
Servants.				
From causes beyond their own control	3	18	8	20
From misconduct or want of caution	41	115	35	95
Others.				
Whilst passing at level-crossings	2	2	5	1
Trespassers, including suicides	55	17	52	15
Other persons	2	4	5	1
Total	111	202	118	157
Total open mileage	12,292½		13,716½	
Total train mileage	10,782,892		10,260,743	

22. In addition to the above, 13 persons are reported to have been killed and 38 injured in yards, workshops, &c., and 93 persons to have met death in carriages, and at stations from causes unconnected with the working of trains.

RESOLUTION.—The Government of India is pleased to notice the decrease in the number of accidents on the Rajputana-Malwa and the Oudh and Rohilkhand Railways, but requests that the attention of the officers concerned may be invited to the increased number of "trains running over cattle on the line" on the North Western, Southern Mahratta, and Bombay, Baroda and Central India Railways; and to the increased number of "Failures of couplings" on the Dibru-Sadiya Railway.

ORDER.—Ordered, that this Resolution, with the Abstract Returns, be communicated, for information, to the Local Governments, Administrations and Officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Assam, and Burma.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Central Division.

Ordered also that copies be forwarded for the information of Her Majesty's Government.

Ordered further that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

M. C. BRACKENBURY, *Major, R.E.*,
Under Secretary.

TABLE No. 1.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ACKNOWLEDGMENTS TO SIR W. HUNTER, K.C.S.I., C.I.E., IN CONNECTION WITH THE COMPLETION OF THE 2nd EDITION OF THE IMPERIAL GAZETTEER OF INDIA.

No. 753-54.

Extract from the Proceedings of the Government of India in the Home Department—(Public),—under date Calcutta, the 24th March 1888.

READ—

Letter No. 8264, dated the 26th March 1887, from Sir William Hunter, K.C.S.I., C.I.E., reporting the completion of the second edition of the Imperial Gazetteer of India.

RESOLUTION.

THE revision of the Imperial Gazetteer of India which was sanctioned by the Government of India in the beginning of the year 1882 has now been completed. The first edition of 9 volumes has been expanded into 14; of these eleven volumes were received and distributed some time ago, while the last three volumes have only recently been received and circulated.

2. The Governor General in Council now desires to place on record his cordial acknowledgments to Sir William Hunter for the great ability and industry which he has displayed in carrying through the important work which was entrusted to him. As a condensed epitome of the Statistical Survey of India, it appears to His Excellency in Council all that could be desired, and as a standard work of reference, it will be of the greatest use to those charged with the administration of the country.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Sir William Hunter for information, and that it be published in the *Gazette of India* for general information.

(True Extract.)

W. M. YOUNG,

Offg. Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WOKS IN BENGAL FOR 1836-87.

No. 65 I., dated Calcutta, the 27th March 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

The Revenue Report of Irrigation Works in Bengal for 1886-87 and the Resolution thereon by the Government of Bengal, No. 289 I. A., dated 20th February 1888.

OBSERVATIONS.—Capital accounts are kept for all canals in the province of Bengal, except for the system of navigable streams known as the Nuddea Rivers, and for the Eden and the Madhuban Canals. The capital expenditure during the year 1836-87 amounted to ₹8,98,393 including indirect charges, as follows:—

		Number of Works.	Expenditure	
			During the year 1886-87.	To end of the year 1886-87.
			₹	₹
Productive Public Works	Direct	4	5,76,359	5,75,63,328
	Indirect		12,880	16,27,981
			5,89,239	5,91,91,309
MINOR WORKS AND NAVIGATION (for which Capital and Revenue Accounts are kept)				
Imperial (in abeyance)	Direct	2	—1,200	6,84,966
	Indirect		...	90,889
			—1,200	7,75,855
Provincial (in operation)	Direct	3	3,02,370	95,67,613
	Indirect		7,984	1,76,797
			3,10,354	97,44,410
TOTAL		...	8,98,393	6,97,11,574

There are no Protective Public Works in Bengal: but the Orissa Coast Canal, which is a Provincial Minor Work, has received a total grant-in-aid of ₹8,66,000 from the fund for Famine Relief and Insurance, of which ₹84,000 was given during 1886-87. The two works which are in abeyance are the Tirhoot and Damoodah projects. The works in operation contemplate 897 miles of canals and 3,161 miles of distributaries, of which 837 miles and 2,133 miles respectively are completed. The balance of estimates unexpended is about 130 lakhs of rupees.

2. The actual financial results of the year on the works in operation, as shewn by the revenue accounts, are as follows:—

	Gross Revenue.	Net Revenue.	Percentage of net Revenue on Total Capital outlaly to end of the year.
	₹	₹	
Productive Public Works	(a) 13,69,679	—6,458	*Nil*
Minor Works and Navigation	5,25,569	2,43,220	2·5

(a) After deduction of ₹16,950, cash refunds of revenue.

These results compare unfavourably with those of recent years, but they are to some extent due to exceptional causes which will be presently mentioned. The net revenue of the previous year was ₹3,75,981 from Productive and ₹2,84,093 from Minor Works.

3. The amount payable for the year under review on account of interest on the Capital cost of Productive Public Works was ₹22,73,490; so the total charge for the year on account of these works was ₹22,79,948. The total difference between the net revenue and the gross charges for simple interest up to the end of 1886-87 was ₹3,02,88,425: this sum is the total loss incurred by the working of the canals.

4. The gross revenue assessed in 1886-87 on the systems classed as Productive is compared in the following table with the assessments of the four preceding years:—

Productive Public Works.	Assessments.				
	1886-87.	1885-86.	1884-85	1883-84.	1882-83.
	₹	₹	₹	₹	₹
Orissa	2,08,311	2,05,527	1,74,525	1,97,213	3,38,323
Midnapur	2,32,101	2,64,643	2,63,469	2,81,554	3,20,900
Hidgellee	54,404	52,455	43,507	63,590	45,032
Sone	7,87,054	8,92,025	12,07,514	8,61,909	6,20,354
TOTAL	12,81,870	14,14,650	16,89,015	14,04,266	13,24,609

This statement shows that the indifferent results referred to in para. 2 were to a certain extent due to an actual reduction in the earnings of the canals. The reduction in the revenue assessed on the Midnapur Canal was due almost entirely to a decrease in the navigation on that canal; the decrease on the Sone Canals was caused by reduction in the area irrigated under annual leases.

5. Of the gross revenue of ₹12,81,870 assessed on Productive Public Works the sum of ₹9,27,512 is due to water rates, based on the areas irrigated as shewn in the following statement where they are compared with the areas of the two previous years:—

	1886-87.	1885-86.	1884-85.
Productive Public Works—	Acres.	Acres.	Acres.
Orissa Canals	77,709	72,339	57,362
Midnapur Canals	69,762	70,604	69,294
Sone Canals	268,204	332,570	370,661
TOTAL	415,675	475,513	497,327
Minor Works—			
Sarun Canals	2,146	4,565	7,223
TOTAL AREA IRRIGATED	417,821	480,078	504,550

The decrease in irrigated area is practically confined to the Sone Canals, and is due to the rainfall both of the year under review and of the previous one being favourable to cultivation without the aid of canal water. The areas given in the above statement do not agree with those given in the last Resolution of the Government of India, as certain corrections have been made in order to make the figures for the Sone Canals more accurate. The system under which the area irrigated on these canals was formerly stated is explained in para. 65 of the Chief Engineer's note of 1885-86: it is satisfactory that an imperfect system has now been abandoned.

6. Although the decrease in irrigation on the Sone Canals is large, the circumstances are by no means so unsatisfactory as the actual decrease would appear to imply. The decrease is entirely under annual leases. Thus:—

	Areas Irrigated, Sone Canals.		
	1886-87.	1885-86.	1884-85.
Five-year leases	194,556	179,784	151,510
Annual leases	73,648	152,786	219,151
TOTAL	268,204	332,570	370,661

The steady increase in five-year leases indicates that the people are learning to appreciate the advantages of insuring the development of their crops by leases which afford them a first claim on the available supply. On the Orissa Canals, where the area irrigated is almost entirely under five-year leases, there is the same tendency to increase; and it would appear, from para. 39 of the Chief Engineer's note, that there is no reason to anticipate that the area held under these leases on the Midnapur Canal will decrease; on that canal 56 per cent. of the entire area irrigable is now leased on this system.

7. The working expenses of productive Public Works including indirect charges are detailed below:—

Canals.	Working Expenses.				
	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.
	₹	₹	₹	₹	₹
Orissa	5,20,543	3,56,672	3,29,288	3,05,530	3,55,280
Midnapur	2,35,038	2,18,127	2,31,803	2,23,586	2,46,502
Hidgellee	22,735	50,147	38,248	48,093	41,897
Sone	5,97,821	5,73,345	6,28,075	5,42,159	5,49,774
TOTAL	13,76,137	11,98,291	12,27,414	11,19,368	11,93,453

These figures shew an increase in all cases except the Hidgellee Tidal Canal. The decrease on that canal is only apparent: it is due to silt clearance having been postponed, pending consideration of the proposals for remodelling the canal.

The large increase in the working expenses of the Orissa Canals is due to a breach which occurred in the Mahanuddee weir on the first rise of the river at the end of June 1886: the repairs of this accident cost ₹1,70,278 in 1886-87, and there was still further expenditure in the following year. An accident also occurred to the Naraj weir which cost nearly ₹17,000 to repair, and there was additional expenditure on four other weirs for extensive repairs to the aprons. This abnormal expenditure raised the cost of repairs to weirs from ₹2·79, which was the rate last year, to ₹12·20 per foot run during the present year.

The increase in the maintenance charges of the Midnapur Canal was mainly due to exceptional repairs and alterations to tidal locks, on which an expenditure of ₹36,892 was incurred as compared with ₹13,694 in the preceding year.

On the Sone Canals considerable expenditure was incurred on special repairs to the sluice piers of the Sone weir, which had been severely damaged; there was also an increase in the cost of repairs on the Buxar Canal, said to be due to restriction of necessary expenditure in the previous year.

8. The Province of Bengal has always been greatly in arrears in the matter of the collection of water-rates. The arrears have been sensibly reduced during the last three years, but there is still room for improvement. In these years the sums outstanding have been—

	₹
On the first of April 1885	9,24,311
" " " 1886	5,49,089
" " " 1887	3,96,225

In 1885 special measures were adopted to check accumulation of arrears, and the results obtained must, on the whole, be regarded as satisfactory, although the decrease has been partly due to remissions of revenue which might have been collected had the demand been promptly enforced. It is satisfactory to notice that the remissions made during the year under review shew a considerable decrease. Thus, on the Sone Canals, the remissions of 1885-86 were 16·0 per cent. of the older demands and 7·2 in 1886-87.: in Orissa the corresponding figures were 9·1 per cent. and 5·3 per cent. respectively. On the Midnapur Canal, where the remissions in 1885-86 were actually 37·3 per cent. of the older demands, it is noticed that the percentage has considerably decreased, but the actual figure is not stated.

Commenting on the results of the year His Honour the Lieutenant-Governor remarks that "the arrears still amount, however, to a large proportion of the year's assessments, and Sir Steuart Bayley is hopeful that a continuance of the measures introduced will result in a further reduction of arrears, and allow of greater facilities for the prompt realization of the current demand." Nearly one-fourth of the current year's demand was outstanding at the close of the year. The Governor-General in Council trusts that the measures which have been introduced may be worked with persistent energy until the results obtained are more in consonance with those which are recorded in other provinces.

9. The receipts from navigation form an important item in the revenue derived from canals in Bengal. The following statement shews the revenue of the last three years from this source, exclusive of that received from Government transport services:—

	Navigation Revenue.		
	1886-87.	1885-86.	1884-85.
	₹	₹	₹
Works partly for Irrigation and partly for Navigation—			
Orissa Canals	58,664	64,093	52,784
Midnapur Canal	1,09,693	1,37,578	1,19,797
Sone Canals	49,719	41,712	37,335
Works for Navigation only—			
Hidgellee Tidal Canal	54,494	52,455	43,507
Calcutta and Eastern Canals	4,83,654	5,14,669*	5,34,541*
Orissa Coast Canal	29,488	13,718	...
TOTAL	7,85,622	8,24,225	7,87,964

* These are the corrected figures as given in para. 93, page 35 of the Chief Engineer's note.

In addition to the above works there is a system of navigable rivers—the Nuddea Rivers—which are maintained by the Public Works Department. The navigation revenue on these rivers has been—

	1886-87.	1885-86.	1884-85.
Nuddea Rivers	2,03,250	1,83,781	1,95,457

10. The decrease in navigation revenue on the Orissa Canals was due to the deficiency of water caused by the breach in the Mahanuddee weir. The decrease on the Midnapur Canal is ascribed to slackness in the export trade in grain due to low prices in the Calcutta market. The decrease on the Calcutta and Eastern Canals is partly due to the abolition of certain tolls and partly to dullness in the jute and rice trade; these canals, however, continue to be the most remunerative navigable system in India. They give a net return of more than five per cent. on their capital cost. There has been a steady decrease in the working expenses of the Nuddea Rivers during the last five years which is very satisfactory.

11. The quantity and value of goods carried on the canals were as follows—

	Tons.	Value. ₹
Orissa Canals	...	42,56,181
Midnapur Canals	115,127	97,25,587
Hidgellee Tidal Canal	53,587	31,48,826
Sone Canals	78,684	64,65 651
Orissa Coast Canal	27,656	11,91,892
Calcutta and Eastern Canals	860,934	5,30,42,670
TOTAL VALUE		7,78,30,807

The principal articles carried were 398,000 tons of grain, valued at 242 lakhs of rupees; 102,000 tons of salt, valued at 84 lakhs; 25,000 tons of oil-seeds, valued at 26 lakhs; 90,000 tons of jute, valued at 88 lakhs; and piece-goods, valued at 19 lakhs.

The value of the crops irrigated by the canals was rather more than 93 lakhs of rupees. The chief items were 30,204 acres of sugarcane, valued at 27 lakhs; 321,415 acres of rice, valued at 52 lakhs; and 1,276 acres of tobacco, valued at 5 lakhs. Nearly the whole of the sugarcane crop was on the Sone Canals.

12. Attention is drawn to the very late date on which this Report has been submitted: every effort should be made to submit future reports on the 15th November.

ORDER.—Ordered that copies of this Resolution and of the Report and its accompaniments be forwarded to the Secretary of State, and to the Finance and Commerce and the Revenue and Agricultural Departments for information.

Also that a copy of this Resolution be forwarded to the Government of Bengal for information and guidance.

Also that copies of this Resolution and of the Report be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

The Governments of Madras, Bombay, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and Burma.
The Resident at Hyderabad.
The Agents to the Governor General, Central India and Rajputana.

Also to the Foreign Department for communication to the Resident at Mysore and Chief Commissioner of Coorg.

Also that this Resolution and the Resolution of the Government of Bengal, with a few selected statements, be published in the Supplement to the *Gezette of India*.

R. C. B. PEMBERTON, *Colonel, R.E.*,
Secy. to the Govt. of India.

RESOLUTION—By the Government of Bengal, Public Works Department,—No. 289 I. A., dated Calcutta, the 20th February 1888.

Read—

The Canal Revenue Reports for 1886-87, and the Chief Engineer's note on the same.

The total outlay direct and indirect to the close of the year 1886-87, on canals in Bengal, of which capital accounts are kept, has been ₹6,97,11,574. Of this sum ₹8,66,000 have been contributed by the Imperial Government from Famine Relief and Insurance funds, ₹5,91,91,309 have been charged to loan funds, and ₹88,78,410 have been provided from Provincial revenues. In addition to the sums abovementioned, ₹7,75,855 have been expended on surveys, &c., for irrigation works which have not been carried out.

2. There are now in actual operation in Bengal 837½ miles of canal of which 608 miles are navigable. The total area commanded by irrigation canals is 2,698, 846 acres, of which 417,821 acres, producing crops of the estimated value of ₹93,34,374, were irrigated during the year. The total number of boats plying in the canals was 181,173, of which 27,314 were passenger boats. The total value of goods passing the canals in boats and rafts aggregated ₹7,78,30,811 approximately.

3. The receipts from, and expenditure on, the canals in operation for the last three years, are given in the statement below, the figures include indirect charges :—

Name of canal.	1886-87.		1885-86.		1884-85.	
	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.
Major Irrigation Works.	₹	₹	₹	₹	₹	₹
Orissa Canals	1,79,611	5,20,635	2,07,350	3,56,678	1,43,585	3,29,366
Midnapore Canal	2,34,185	2,35,249	2,62,484	2,18,127	2,57,955	2,31,915
Hidgellee Tidal Canal	54,404	23,045	52,455	50,147	43,507	38,248
Sone Canals	9,18,429	6,13,558	10,62,040	5,84,002	8,62,474	6,35,530
Total	13,86,629	13,93,087	15,84,935	12,08,954	13,07,521	12,35,059
Minor Works and Navigation. *Irrigation and Navigation Works.*						
Saran Canals	12,427	28,659	41,143	23,331	9,341	25,593
Calcutta and Eastern Canals	4,83,054	1,62,204	4,70,484	1,90,209	5,69,726	2,91,214
Orissa Coast Canal	29,488	61,426	1,3,718	30,712	...	...
Total	5,25,569	2,82,349	5,34,315	2,50,252	5,79,067	3,16,807
Grand Total	19,12,198	16,75,436	21,19,280	14,59,206	18,86,588	15,51,866

The net income for the year was therefore ₹2,36,762. Interest amounting to ₹22,91,006 was, however, payable to the Imperial Government, so that there was a deficit of ₹19,56,284, to be met from Provincial revenues. This result is unfavourable as compared with that of the previous year, and is owing as much to a decrease in the receipts, the cause of which is explained further on, as to an increase in the expenditure owing to the necessity for special heavy repairs.

4. On the Orissa canals, the occurrence of a large breach in the main weir of the system, that on the Mahandi river, on the 26th June 1886, necessitated a very large outlay, of which about one and a half lakhs were spent within the year, and the rest in the following year, the work being completed before the rains of 1887. Considerable damage was also caused by the floods of 1886 to nearly all the other weirs, the result being that, with scarcely an exception, the expenditure on them during 1886-87 was in excess of that of the previous year. On the Sone canals the repairs to the centre and Baroon shore sluices of the Sone weir, and the replacing of the old four feet thick piers by piers of six feet thickness, caused an increase in the expenditure. On the Midnapore canal the repairs to tidal locks and silt clearance of tidal reaches were heavier than usual. Lastly on the Orissa Coast Canal the repairs on account of the floods and cyclone of 1885, added about ₹40,000 to what would otherwise have probably been the cost of maintenance.

5. The revenue collected in the last three years on the works mentioned in the above statement is shown below :—

Head.	Revenue.		
	1886-87.	1885-86.	1884-85.
	₹	₹	₹
Water-rates	10,43,343	12,33,612	9,46,808
Navigation	7,88,685	8,34,780	8,22,187
Miscellaneous	80,170	50,888	1,17,593
Total	19,12,198	21,19,280	18,86,588

6. The assessments or earnings of the same year are as follows :—

Head.	Earnings.		
	1886-87.	1885-86.	1884-85.
	₹	₹	₹
Water-rates	9,49,260	10,45,339	13,41,655
Navigation	7,88,685	8,34,780	8,21,876
Miscellaneous	80,171	90,481	81,519
Total	18,18,116	19,70,600	22,45,050

The revenue shows a falling off under both heads of water-rates and navigation. As regards the water-rate, the decrease is due partly to the falling off in the area irrigated, and partly to the much smaller amount of arrears to be collected as compared with the balance at the beginning of the previous year. Allusion is made to the falling off in navigation further on.

The excess of revenue over the assessments is due largely to the collections of arrears of water-rates of former years.

7. The arrears of water-rates outstanding at the close of each of the last three years, are shown in the statement following :—

Name of Canal.	Arrears.		
	1st April 1887.	1st April 1886.	1st April 1885.
	₹	₹	₹
Orissa Canals	87,458	64,884	77,869
Midnapore Canal	50,749	69,972	1,11,212
Sone Canals	2,31,582	3,98,321	6,95,208
Sarun Canals	26,437	15,912	40,022
Total	3,96,226	5,49,089	9,24,311

The result for the year may be considered favourable, and shows a satisfactory reduction in the total amount of arrears. The remissions made amount to a comparatively small sum, and point to an improved system of working both as regards assessments and collections.

8. To understand more clearly the results of the working of the year, it is necessary to distinguish between the collections of arrears and those of the current demand. Of the former a sum of ₹4,10,658 or 77 per cent. of the outstandings of former years was adjusted. Of this amount 86·4 per cent. was collected, 5·5 written off as irrecoverable, and 8·1 per cent. remitted. Of the current year's demands (which include ₹43,645 not payable till after the expiry of the year) ₹2,37,196 or 25 per cent. only is left for recovery, 0·3 per cent. was remitted and the balance collected. On the Sone canals very good results were obtained, more especially in the Shahabad district. A considerable sum of arrears was,

however, written off as irrecoverable. In Gya an improvement in collections is apparent, and the remissions are unimportant. In Patna, although remissions are less than in the other districts, the collections were considerabely smaller. In Orissa remissions were merely nominal; but collections of the current demand cannot be considered satisfactory, and resulted in an increase in the arrear balance at the end at the year. The results in Midnapore are satisfactory both as regards collections and remissions. In Sarun the collections of the year, including arrears, amounted to less than one half of the total of the guarantee for the year, a result which must be considered far from satisfactory. On the whole the results of the year, with the exception noted above, show a considerable improvement in the working of the principal systems; and the Lieutenant-Governor notices with approval that the orders of the Local Government have received the careful attention of Civil officers. The arrears still amount, however, to a large proportion of the year's assessments, and Sir Steuart Bayley is hopeful that a continuance of the measures introduced will result in a further reduction of arrears, and allow of greater facilities for the prompt realization of the current demand.

9. The total number of certificates for the recovery of arrears issued during the year was 30,504 against 60,942 in the previous year in all districts. None were issued in the Gya District. The decrease is attributable chiefly to the large numbers previously issued under the stringent orders of Government for the recovery of arrears, but it is confidently expected that less recourse to this procedure will be necessary in future. The immediate effect of the increased exertion in collecting arrears has doubtless had its effects in bringing about the state of friction which subsequently rendered necessary the appointment of a Commission to enquire into the working of the Sone Revenue system.

10. Information regarding complaints is either non-existent or very meagre in the reports from Superintending Engineers and Revenue Authorities, so that it is impossible to say whether the canal administration worked smoothly or not. That it was not doing so formerly is clearly shown by the agitations of late years on the Orissa and Sone Canals; but, from what little can be gathered on this point in the reports, there appears to be no doubt that there was a decided improvement in this respect in the year under review. Further information should be afforded in future reports.

11. The areas irrigated (actuals) during the last three years are detailed in the following table:—

		1886-87.	1885-86.	1884-85.
		Acres.	Acres.	Acres.
Orissa	Kharif	75,269	70,563	54,181
	Rabi	2,440	1,605	2,994
	Perennial	...	171	197
	TOTAL	77,709	72,339	57,372
Midnapore	Kharif	69,762	70,604	69,294
Sone	Kharif	30,082	80,792	131,372
	Rabi	16,662	50,610	77,558
	Perennial	11,626	10,527	9,262
	Hot-weather	15,278	10,857	959
	Five-year leases	194,556	179,784	151,510
	TOTAL	268,204	332,570	370,661
	TOTAL MAJOR WORKS	415,675	475,513	497,327
Sarun	Kharif	566	888	1,916
	Rabi including hot-weater	1,580	3,677	5,307
	TOTAL MINOR WORKS	2,146	4,565	7,223
	GRAND TOTAL, MAJOR AND MINOR WORKS	417,821	480,078	504,550

NOTE.—The figures for the Sone canals for the years 1884-85 and 1885-86 do not agree with those given in last year's Resolution. The reason is that last year the areas "assessed" within the year were given as the areas "irrigated," the figures for 1884-85 not being then available. The figures now given have been obtained from the Superintending Engineer's report and show the areas actually irrigated within each year.

A still further decrease in the total area under irrigation has taken place, and the reason is not difficult to assign. The decline is entirely in annual leases, and chiefly on the Sone canals. The season was one of favourable rainfall, and the need for irrigation not pressing. On the other hand, the steady increase in the area under five-year leases on the Sone and in the area leased on the Orissa canals which is almost entirely under five-year leases, appears to be a satisfactory indication that the idea is gaining ground that it is advantageous to lease for a long term at a reduced rate as an insurance against failure in a bad year of rainfall; and the result will be probably a gradual extension of irrigation which cannot be expected under a system of short leases, the irrigation under which is subject to fluctuation with the amount and distribution of the rainfall.

12. The tollage collections from the various canals for the last three years are given in the table following:—

YEAR.	Orissa Canals.	Midnapore Canal.	Hidgellee Tidal Canal.	Orissa Coast Canal.	Sone Canals.	Calcutta and Eastern Canals.	TOTAL.
	₹	₹	₹	₹	₹	₹	₹
1884-85	52,784	1,19,797	41,382	...	37,335	5,08,466	7,59,764
1885-86	64,003	1,25,331	52,143	13,663	41,712	(a) 4,97,578	7,94,520
1886-87	58,664	1,09,693	51,904	26,587	49,665	4,73,193	7,71,706

(a) In last year's Resolution R10,025 on account of demurrage was omitted and R26,286, miscellaneous receipts, wrongly added. The figure has therefore been reduced by the difference, *viz.*, R16,261

There is a decrease in tollage collections on all canals except the Sone and Orissa Coast. On the latter the increase is due to a further length of 55 miles having been temporarily opened for traffic. The whole length has been opened out during the current year, and the canal route from Gewankally on the Hooghly through to Cuttack is now established.

13. The causes that have led to a diminution in the receipts are chiefly the depression in the rice and jute trade, and do not point to any permanent decline in the traffic. The receipts on the Calcutta and Eastern Canals were also affected by alterations in tolls. In Orissa the traffic was to some extent impeded by the low level of the water in the Kendrapara and High Level Canals, but is also due to the falling off in the exports of rice from the Central Provinces on account of absence of floods in the Mahanadi.

14. In the Nuddea Rivers the receipts are higher than those of the previous four years, the cause being attributed to the favourable state of the channels and to an increase in trade generally.

15. With the exception of the revenue report of the Superintending Engineer of the South-Western Circle, all the reports were received with fair punctuality. In the case of the South-Western Circle the report was delayed owing to the ill-health of the Superintending Engineer. There was an improvement in the date of receipt of the Examiner's Finance Accounts.

ORDER.—Ordered that a copy of this Resolution and of the note and its accompaniments be submitted to the Government of India, in the Public Works Department, for information; also that copies be forwarded to the Appointment, Revenue, and Financial Departments of this Government; the Board of Revenue Lower Provinces; the Commissioners of the Presidency, Burdwan, Patna and Orissa Divisions; the Collectors of the 24-Pergunnahs, Nuddea, Hooghly, Midnapore, Burdwan, Patna, Shahabad, Gya, Sarun, Cuttack and Balasore; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON, *Lieut.-Col., R.E.,*
Offg. Joint-Secretary to the Govt. of Bengal,
P. W. Dept.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 21st March 1888.

During the past week the weather, without being actually rainy or stormy, has yet been in an unsettled and changeable state—pressure has been unsteady and subject to considerable oscillations, while the distribution has undergone large changes from day to day. The wind on either side of the Peninsula has been strong, and squally, and the weather altogether has been less quiet than is usual during the middle of March.

On the 15th the chart showed a large high-pressure area over the west and south of the Peninsula, and a band of low pressure lying along the foot of the hills. At the same time relatively low pressures were reported from Bengal and the Central Provinces, with small centres of depression, one near Raipur and a second near Hazaribagh. The barometer was falling and the weather was cloudy at several stations in Northern India, though it was generally clear in the centre and south. Rain had fallen at some stations in Bengal, Assam and the north-west of the Punjab, as well as at Jacobabad, Quetta, and Jeypore. The thermometric readings from the Central Provinces, the Deccan, and the Eastern Peninsula, were about equally high—Thyetmio reporting a maximum of 102°, and Nagpur, Kurnool, and Bellary of 101°. On the 16th the barometer continued to fall very generally. The depression over Bengal had to a large extent filled up and that over the Central Provinces had moved southward towards the Deccan. At the same time a high-pressure area was appearing in the north-west of the Punjab. These were the only important changes in pressure. On the Bombay coast, owing to the southward movement of the Deccan depression, the north-westerly wind had increased in force, but at the head of the Bay its strength had decreased. Rain had fallen in Assam, the cis-Gangetic portions of the North-Western Provinces, and the north-west of the Punjab, but the amounts, except at Silchar and Sibsagar, were small. The hottest part of the Indian region was the centre of the Peninsula, where Kurnool and Cuddapah reported maxima of 102° and Secunderabad, Bellary and Salem of 100°. In Orissa also the temperature was high. The chart of the morning of the 17th showed that the depression over the Deccan had still further developed, and the north-westerly winds on the west coast were blowing very strongly. Some cloud accompanied this depression, but the only rainfall reported from its neighbourhood was a few drops at Seoni. At Saugor Island and in Assam rain still fell, the amount received at Silchar exceeding 1 inch. The inland portion of the Peninsula remained the hottest part of the Indian region, the maxima at Kurnool and Cuddapah being 103°. On the 18th the barometric depression over the Deccan had become slighter, and pressure generally more uniform throughout India. A large anticyclone overlay the Bay and its surrounding coasts, while readings were lowest along the foot of the hills. In consequence of this decrease in the intensity of the Deccan depression, the north-westerly winds on the west coast had become lighter, and the winds generally were more variable in direction. Over and around the Bay there was a well marked anticyclonic circulation. Slight rain had fallen at False Point, Silchar, and Sibsagar, and a few drops at Quetta. The weathet was very fine. There was no change in the position of the area of greatest hear which remained over the inland parts of the Peninsula. The maxima reported were about the same as those on the preceding day. Beyond a rapid rise of pressure and the appearance of a high-pressure area in the Punjab, there was little change in the barometer on the 19th. Rain was reported from Ceylon, False Point, Silchar, and the north-west of the Punjab. At False Point the rainfall exceeded 1½ inches, but elsewhere the amounts were small. There was no change in the position of the region of greatest heat, and the maxima within it were practically the same as those reported on the two previous days. On the 20th the barometric distribution was complicated and irregular, and the wind very variable in direction. The only stations reporting rainfall were Peshawar, Poona, Colombo and Galle, but the amount of cloud had on the whole increased. The region of greatest heat had apparently commenced its normal northward advance, and the maximum temperatures reported from the Central Provinces and the north of the Peninsula were nearly as high as those reported from the centre and south. On the 21st high-pressure areas were shown over the Punjab and the Carnatic

with, between them, a belt of relatively low pressures, stretching from the west coast, between Bombay and Mangalore, north-eastward across the central parts of the country to Bengal. The only rainfall reported was a few drops at Dera-Ismail Khan and Colombo, and the weather was less cloudy than on the preceding day. Temperature continued to increase over the north of the Peninsula and the central parts of the country. The absolute maximum for the whole of India was 104° at Surat.

Pressure.—The variations of pressure from the normal average were slightly irregular. In the Irrawaddy Valley, and at Berhampore, and the stations along the foot of the hills, there was a slight deficiency, but in all other parts of Northern India, alike on the hills and on the plains, there was an excess. In Central and Southern India there was a general excess, but at some stations in the inland parts of Madras there was a slight deficiency.

Temperature.—The mean temperature of the week has been above the average over by far the greater part of India, but in Eastern Bengal, part of Assam, and in the south of the Peninsula, there has been a slight deficiency. The excess exceeded 5° at Agra, Bareilly, Ludhiana, Raipur and Hyderabad.

The following table gives the mean temperatures for the 15th and the 21st :—

Stations.	15th.	21st.	Difference.	Stations.	15th.	21st.	Difference.
Rangoon	85°	86°	+ 1°	Mangalore	81°	84°	+ 3°
Calcutta	79°	82°	+ 3°	Bombay	79°	85°	+ 6°
Gya	80°	84°	+ 4°	Akola	83°	83°	0
Allahabad	78°	83°	+ 5°	Nagpur	87°	87°	0
Jhansi	83°	86°	+ 3°	Jeypore	78°	83°	+ 5°
Delhi	71°	85°	+ 14°	Kurnool	87°	88°	+ 1°
Lahore	67°	79°	+ 12°	Cuddapah	87°	88°	+ 1°
Colombo	83°	83°	0				

and shows that, while there has been a fairly general increase of temperature during the week, the change has been very much greater in Northern than in Southern and Central India.

Humidity.—The variations of humidity from the mean have been very irregular.

Rain.—There has been no rain in Burma, on the Malabar Coast, or in Madras. In all other parts of India rain has fallen, but, except in Bengal, Assam, the Punjab and in Ceylon, the amounts received were not large. In Bombay, the Berars, Sind, and Rajputana the total of the week's fall did not reach one-tenth of an inch per province, and in Guzerat and Central India the fall was only slightly heavier. In Bengal and Assam rain has been frequent, though as a rule not heavy.

The concluding table gives the total rainfall of the past week according to provinces :—

W. L. DALLAS,

Asst. Meteorological Reporter to the Govt. of India.

Simla, 23rd March 1888.

S

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 24th March 1888.*—No rain except in Ganjam and Vizagapatam; rainfall to date generally sufficient, except in parts of Vizagapatam, Bellary, North Arcot, Madura, Tinnevelly, Coimbatore, Salem, and South Canara. Crops generally good, but very slightly damaged here and there by disease or want of rain. Wet crops under rain-fed tanks in parts of Bellary and Madura have withered owing to deficient water supply. Pasture generally sufficient, but scanty in Malabar and parts of Anantapore, North Arcot, Trichinopoly, Madura, and Nilgiris, and decreasing in Vizagapatam and parts of Salem and Coimbatore. Prices falling where not stationary. General prospects favourable.

Bombay.—*For week ending 28th March 1888.*—Slight rain in Bombay City and in parts of Poona, Sholapur and Nasik. Crops slightly injured by it in Nasik. Standing crops otherwise good, except cotton in Broach which is damaged. Cotton-picking continues in parts of Gujarat and Southern Maratha Country. Harvesting of late crops continues in most districts. Ploughing operations for next season's crops in progress in Nasik, Poona, Satara, Bijapur, Dharwar, Ratnagiri, Kanara, Kathiawar and Shikarpur. Probable outturn of late crops 10 to 11 annas in Nasik and 7 annas on an average in Sholapur.

Bengal.—*For the week ending 27th March 1888.*—No rain during the week. General prospects continue favourable. *Rabi* crops are being harvested, good outturn is generally expected, except in parts of the Bhagulpore and Chota Nagpore Divisions where the crops are below the average. Opium collections are nearly over, the produce being everywhere satisfactory. Spring rice is doing well. Ploughing for early rice and jute is well forward. Indigo sowings are in full swing. Planting of sugarcane cuttings has begun. *Mohua* promises to be a good crop in Chota Nagpore and Sonthal Pergunnahs. No further information regarding reported scarcity in parts of Pooree received.

North-Western Provinces and Oudh.—*For week ending 28th March 1888.*—The weather is generally cloudy. Crops are being cut, and the yield is good. Operations for the autumn harvest have commenced in Kumaun. Opium collection is in progress. Supplies of food-grains are ample and prices are falling. The condition of agricultural stock continues satisfactory.

Punjab.—*For week ending 28th March 1888.*—Rain has fallen in some districts. Prices are generally stationary though falling in two districts, they are rising in Rawalpindi. *Kharif* ploughings and sugarcane and cotton sowings in progress. Harvesting of *rabi* crops commenced. *Rabi* prospects are generally reported good. Crops slightly injured by western winds in Jullundhur. Cattle are reported healthy. Prospects of fodder are improving, but fodder is still scarce in some districts. Poppy crops average, extraction of opium commenced in Ajnala tahsil.

Central Provinces.—*For week ending 28th March 1888.*—Weather cloudy in northern districts where harvest of winter crops continues. Under favourable circumstances crops in other districts have been cut. Outturn good. Cattle in fair condition.

Assam.—*For week ending 28th March 1888.*—Weather showery with high winds, which have done some damage. Early rice being sown. Prospects of tea good.

Mysore and Coorg.—*For week ending 28th March 1888.*—No rain. Standing crops in good condition. Paddy and sugarcane sown in parts of the Bangalore and Tumkur districts. Outturn of crops fair. Cattle generally in good condition.

Want of rain much felt in Coorg.

Berar and Hyderabad.—*For week ending 28th March 1888.*—Weather clear and warm. Threshing of *rabi* crops continues. Probable outturn of wheat and gram is expected to be between 14 and 16 annas. Land under preparation for the ensuing *kharif* crop as reported previously, except in the Amraoti district. Agricultural stock is in good condition and fodder is sufficient in the other districts of the Province.

No rain in Hyderabad during the week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 28th March 1888.*—Slight rain in Neemuch during the week. The only change since last report is in Baghelkhand and Neemuch where prices are reported to be fallen, otherwise conditions remain the same.

Rajputana.—*For week ending 28th March 1888.*—Slight rain in Bhurtpur, elsewhere nil. Agricultural operations satisfactory. Reaping in progress at places. Standing crops good. Crop prospects and agricultural stock generally good. Pasturage or fodder fairly sufficient. Prices falling generally. Opium being collected at places.

E. C. BUCK,
Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No. 14.} CALCUTTA, SATURDAY, APRIL 7, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

NEW YORK 07 APR 88 PUBLIC LIBRARY

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 28th March, 1888.

On the whole the weather of the past week has been fairly fine and settled, but pressure has been very unsteady; and about the middle of the week a depression appeared in the North-West, which occasioned very unsettled weather for a time in that neighbourhood.

On the 22nd a band of relatively low pressure extended from Bengal north-westwards along the foot of the hills as far as the Punjab, while a large area of high pressure overlay the Bay and the Carnatic.

Barometric readings were generally moderately uniform throughout India, and the winds in several parts of the country were unsteady and variable. Down the Gangetic plain, however, there was a well marked north-westerly current, such as usually precedes the appearance of the hot winds of Upper India, and over the head of the Bay there was a strong indraught of moist air from the Bay into Bengal. A moderate shower of rain had fallen at Quetta. Temperature had on the whole risen. The region of greatest heat was the north of the Peninsula and the Central parts of the country, but maxima exceeding 100° were reported from as far North as Benares, Gya, and Jhansi. On the 23rd, in addition to the low pressure band along the foot of the hills, a large shallow depression had been developed over the Western desert, and apparently under the influence of this depression rain was falling over the north-west of the Punjab. In other respects the general weather and pressure distribution was similar to that reported on the previous day. Westerly winds had, however, extended into Bengal, displacing the southerly winds previously existing. The region of greatest heat was similar in position and extent to that of the previous day. The highest maximum was 109° at Surat. The Chart of the 24th showed that the shallow depression over the Western desert had disappeared, but that the barometer had fallen quickly over the greater part of Northern India, while it had risen in the South. In consequence of these changes, a large and irregular area of low pressure, with minima over Bengal and in the neighbourhood of Roorkee, had been formed over Northern and Central India, around which gradients were moderately steep. The wind showed a fairly general and regular indraught towards this low pressure area. Rain was falling in Assam.

Temperature had changed irregularly, but the region within which the maximum thermometer exceeded 100° was daily increasing. The highest maximum was 106° at Sholapur. A sudden change was shown on the morning of the 25th, when a small but rather deep depression appeared over the Western desert. The barometer had fallen very rapidly over North-Western India, while it had risen elsewhere, and as a consequence gradients had largely increased. A cyclonic circulation of the winds was shown around the storm over Sind, while westerly and north-westerly winds were reported from the Gangetic plain and Western and Central India, and south-westerly and southerly winds from the Bay and Bengal. In many places the strength of the wind was considerable. Rain had again fallen in Assam, but around the depression, except for a slight shower at Quetta, the weather was fair, though cloudy. Temperature had changed irregularly, but the northward extension of the region of excessive heat had apparently been checked, and the maxima over North-Western India were much lower than on the 24th. The highest maximum reported was 106° at Amraoti, Raipur, and Secunderabad. The reports of the next day showed that the depression had travelled north-eastward, and that its centre lay between Mooltan and Lahore. With this northward movement rain had commenced in the north of the Punjab, and showers were reported from all stations from Simla to Peshawar. The wind directions were generally similar to those reported on the previous day, but the force was high and squally over the Punjab. Rain was still reported from Assam. A brisk fall of temperature had occurred over a large part of the country. The maxima reported from Upper and Central India were nowhere excessive, but in the Peninsula temperature remained high, Kurnool registering 108°.

On the 27th the Chart showed that the barometer had risen with great rapidity in the North-West, and that the depression had been replaced by a large high pressure area. Around this area a well marked anti-cyclonic circulation of the air prevailed with generally very fine weather. In Bengal the barometer remained rather low, and there was a steady flow of air from the Bay into Bengal. A further brisk and fairly general fall of temperature was recorded, and outside the Peninsula the heat was everywhere moderate. At the inland stations of the Peninsula, however, maxima of 105° to 107° were registered. On the 28th the barometer was falling over the greater part of the country,—rapidly in the Punjab,—but the high pressure area still held over the North-West, and the general conditions were the same as on the 27th. Rain continued to fall in Assam. Temperature had again decreased over a large part of the country, and, except in the Peninsula, the maxima remained relatively low.

Pressure was below the monthly average almost everywhere. The deficit was greater in Northern than in Southern India and greater on the plains than on the hills,—in fact at Wellington, Mount Abu and Pachmarhi there was a slight excess.

Temperature exceeded the monthly average, except in Rajputana, where there was a trifling deficit, and at Peshawar and Mangalore, where there was no departure from the mean. The excess was greatest in Bengal and the North-Western Provinces, where it exceeded 4°, and least (less than 2°) in Burma and Malabar.

Humidity.—The air, except in a few places, was drier than usual.

Rainfall.—No rain fell in Burma, the Berars, the Central Provinces, Guzerat, Central India, Sind, Rajputana or Madras; and in the North-Western Provinces, Ceylon, Malabar, and Bombay the total fall during the week was less than $\frac{1}{2}$ inch. Elsewhere the amounts were moderately heavy, the largest average per station being reported from Bengal and Assam.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burma ...	0	0
Bengal and Assam ...	4	8·10
North-Western Provinces and Oudh ...	2	0·04
Punjab ...	5	3·76
Hill stations ...	5	2·70
Ceylon ...	2	0·41
Malabar Coast ...	1	0·26
Bombay ...	2	0·11

SIMLA, *3rd April, 1888.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 31st March, 1888.*—No rain, except in Ganjam, Vizagapatam, Tinnevelly, and Malabar. Rainfall to date generally sufficient, except in parts of Vizagapatam, North Madura, Tinnevelly, Coimbatore, and Salem. Crops generally good, but very slightly damaged here and there by disease or want of rain. Water-supply for cultivation deficient in Madura and Salem and in parts of Tinnevelly and Coimbatore. Pasture generally sufficient, but scanty in Malabar, Nilgiris, and parts of Anantapur and Madura, and decreasing in Vizagapatam and parts of Cuddapah, North Arcot, Trichinopoly, Coimbatore, and Salem. No great variations in prices. General prospects favourable.

Bombay.—*For week ending 4th April, 1888.*—Slight rain in Dharwar. Wheat in one taluka of Upper Sind Frontier injured by stormy weather, and cotton in Broach damaged. Standing crops otherwise good. Cotton-picking in progress in parts of Guzerat and Southern Mahratta Country. Harvesting of late crops completed in Thana and in progress in other districts. Ploughing operations for next season's crops in progress in Nasik, Poona, Ratnagiri, Ahmednagar, Satara, Bijapur, Belgaum, Dharwar, and Kanara. Probable outturn of wheat in Broach 8 annas, of wheat and cotton in Baroda 8 and 10 annas respectively, and of late crops in Kolaba in general 12 annas. Outturn of opium in Baroda 8 annas.

Bengal.—*For week ending 3rd April, 1888.*—Light showers fell in some districts of East and North Bengal during the week. Rain is wanted in Bhagalpur Division. *Rabi* harvest is generally giving a good outturn, except in parts of the Bhagalpur and Chota Nagpur Divisions. Opium collection is over, and the yield is everywhere satisfactory. Spring rice is doing well. Cultivation for early rice and jute progresses favourably, and in some districts sowing has begun. Indigo sowings are germinating rapidly. Sugarcane is being planted, and irrigated *mahua* promises to be a good crop, except in Bhagalpur, where the yield will be poor. Some pressure reported in parts of Manbhoom, owing to failure of crops. No further information received regarding scarcity in Pooree.

North-Western Provinces and Oudh.—*For week ending 4th April, 1888.*—Weather seasonable. Crops have nearly all been cut, and the outturn is good. Sugarcane sowings are in progress. Opium collection is finished. Markets are full, and prices are falling. The condition of cattle is satisfactory.

Punjab.—*For week ending 4th April, 1888.*—Slight rain has fallen in some districts. Prices are somewhat unsettled; in two districts a rise is reported, and in others prices are falling or stationary. There has, however, been a marked fall since the early part of March. *Kharif* ploughings, and sugarcane and cotton sowings, are in progress. Harvesting of *rabi* crops commenced. *Rabi* prospects are reported good, except in Shahpur, where they are below average; in Peshawar, Rawalpindi, and Dera Ismail Khan, they are average. No damage done to crops. Stock cattle are reported healthy. Fodder still scarce in some districts. Poppy crops average.

Central Provinces.—*For week ending 4th April, 1888.*—Weather hot and occasionally cloudy. In some places the harvest of winter crops has been completed. In most districts the outturn is good. Sugarcane plants thriving. Cattle in fair condition.

Burma.—*For week ending 24th March, 1888.*—The prospects of dry weather crops continue to be satisfactory. Price of paddy has risen in the Thonegwa, Moulmein, Amherst, and Shwegyin districts of Lower Burma and in

Pyinmana, Lower Chindwin, and Mandalay districts of Upper Burma. Price of paddy has fallen in the Henzada district. Prices elsewhere are stationary. Rain fell during the week.

Burma.—*For week ending 31st March, 1888.*—The prospects of the dry weather crops continue to be satisfactory. The condition of agricultural stock is good. Price of paddy has risen in the Akyab, Rangoon, Pegu, Prome, and Shwegyin districts of Lower Burma and in the Kyaukse and Minbu districts of Upper Burma. The price of paddy has fallen in the Myingyan and Lower Chindwin districts. Prices elsewhere are stationary.

Assam.—*For week ending 4th April, 1888.*—Weather hot and windy. Tea plucking general, and prospects good. Land being ploughed and sown for early rice. No reports from Kamrup and Naga Hills.

Mysore and Coorg.—*For week ending 4th April, 1888.*—No rain. Standing crops in good condition, except in parts of the Tumkur district, where the paddy crop is withering for want of water. Outturn of harvest favourable. Condition of stock cattle good.

Slight rain in Coorg. No cultivation going on at present.

Berar and Hyderabad.—*For week ending 4th April, 1888.*—Weather clear and warm. Harvesting of *rabi* crops almost completed everywhere in the Province, and land is being prepared for the ensuing *kharif* crops. Condition of agricultural stock generally good. No marked change in the prices of food-grains.

Hyderabad has had no rain during the week. Agricultural prospects continue good. Prices are stationary.

Central India.—*For week ending 4th April, 1888.*—No change since the last report, except in Bhopawar, where the prospects of probable outturn are brighter, and Bhopal, where the opium crop is reported indifferent.

Rajputana.—*For week ending 4th April, 1888.*—Agricultural operations satisfactory. Standing crops good, and are cut, or being cut, at places. Crop prospects and agricultural stock good generally. Pasturage or fodder fairly sufficient. Prices are falling at most places. Opium is being collected or has been collected at places.

Nepal.—*For week ending 22nd March, 1888.*—A little rain. Weather cloudy at times. Cold season appears to have ceased. Prospects of wheat, garlic, and onion crops good.

Nepal.—*For week ending 29th March, 1888.*—No rain. Nights and mornings cool. The land is being prepared for Indian corn.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 4th April, 1888.

The general weather of the past week has been similar in character to that of the preceding week, but towards the close of the period became somewhat cooler over the Central and Northern parts of the country. The alternations of pressure have continued large, and the weather, without being actually disturbed, has been more or less unsettled.

On March 29th pressure was relatively high over Assam and over the Carnatic, and low along the foot of the hills, the minimum pressure being reported from Roorkee. The winds were variable over the Central parts of India and of the Peninsula, and numerous calms were reported from the Punjab; elsewhere the wind currents were fairly steady. North-westerly to westerly winds prevailed down the Gangetic plain, southerly winds over the Bay and Bengal, and westerly winds on the West Coast. The only rainfall was in Ceylon. Temperature changes were large. The maxima were high,—Amraoti registering 109°; Sholapur, Surat, and Kurnool 106°; and Cuddapah 105°. The Chart of the 30th showed considerable changes of pressure. A slight depression had appeared near Lahore, and the area of lowest pressure had been transferred from Roorkee to the centre of the Punjab. At the same time the high pressure over Assam had broken up. The winds over Northern India had in consequence become much more variable, but the westerly winds on the West Coast and the southerly winds over the Bay and Bengal held steadily. Slight rain was reported from Silchar, Colombo, and Madura. The maxima were about the same as those reported on the preceding day,—Sholapur, Jacobabad, Kurnool, and Cuddapah reporting readings of 106° and Deesa, Hyderabad, and Secunderabad of 105°. On the 31st the high pressure over Assam had reappeared.

The barometer had fallen everywhere, but the decrease having been much greater in the North than in the South, the barometric difference between the South and North had increased. Calms and variable airs continued to be reported from Northern and Central India, and elsewhere the air currents continued unchanged. The day temperatures were increasing, and the highest maxima were 108° at Sholapur; 107° at Nagpur, Bellary, and Cuddapah; and 106° at Jhansi, Amraoti, and Salem. On the 1st pressure became more uniform, but the strong southerly winds over the head of the Bay were carrying much moisture into Bengal and Assam, and rain continued to fall in Assam and Cachar.

Local showers were also reported from Murree and Colombo. Temperature showed signs of falling, but the maxima of the preceding day remained high,—Kurnool reporting 108°; Sholapur 107°; and Jhansi, Amraoti, Nagpur, and Secunderabad 106°.

On the 2nd the distribution of pressure was complicated, and the small local deficiencies of pressure had been accompanied by showers of rain, and the weather over Northern India was unsettled. The winds were generally variable, but strong southerly winds prevailed at the head of the Bay. Temperature had decreased generally, but the high maximum of 113° was reported from Khandwa. On the 3rd pressure was very uniform over Western India, but moderate gradients existed over the eastern half of the country, around a low pressure area lying over Bengal. Rain was falling in Assam, and local showers were reported from several other parts of the country. The maxima were generally lower,—the highest being 106° at Kurnool and 105° at Cuddapah and Bellary. On the 4th a well-marked low pressure area lay over Northern Bengal, and a brisk fall had appeared in the west of the Punjab.

The depression over Bengal had induced very strong winds from the head of the Bay into Bengal, and these had occasioned rain at Cuttack, Burdwan, and in

Assam. The maxima reported were about the same as on the preceding day,—the highest being 108° at Jeypore; 107° at Salem; and 105° at Burdwan, Amraoti, Nagpur, and Kurnool.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burma ...	0	0
Bengal and Assam ...	5	7·27
North-Western Provinces and Oudh ...	1	0·01
Punjab ...	3	0·37

DEPARTMENT OF FINANCE AND COMMERCE.

Accounts, &c.

REVISED RULES FOR THE GUIDANCE OF DEPOSITORS IN POST OFFICE SAVINGS BANKS.

No. 1729, dated Calcutta, the 9th April 1888.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

Resolution by the Government of India, Department of Finance and Commerce, No. 1199, dated 12th March 1886, prescribing revised rules for the guidance of depositors in Post Office Savings Banks.

RESOLUTION.—In supersession of all existing orders on the subject, the Governor General in Council is pleased to prescribe the following revised rules for the guidance of depositors in the Post Office Savings Banks :—

RULES FOR THE GUIDANCE OF DEPOSITORS IN POST OFFICE SAVINGS BANKS IN INDIA.

DEFINITIONS.

1. For the purposes of these rules—

Deposit means money paid into a Post Office Savings Bank by, or on behalf of, a depositor.

Depositor means the person by whom, or on whose behalf, money is deposited.

Account means the account of a depositor in a Post Office Savings Bank.

Balance means the balance at credit of an account.

Minor means a person who has not completed the age of 18 years.

Guardian includes a father, or, if the father be dead, a mother, or if both parents be dead, and no guardian of the minor has been appointed by will or deed or under any enactment for the time being in force in British India, any adult relation of the minor with or by whom the minor is residing or being maintained.

Postmaster-General means the chief postal authority in any province or place to which the system of Post Office Savings Banks is extended.

Object of Government in establishing Post Office Savings Banks.

2. The object of Government in establishing Post Office Savings Banks is to provide a ready means for the deposit of savings, and so to encourage thrift. Savings Banks are not to be used for the purpose of keeping a current account, and the Comptroller, Post Office, is empowered to close an account should he have reason to believe that the depositor has used the Savings Bank for a purpose for which it was not intended.

Business Hours.

3. Post Office Savings Banks will be open for the transaction of business between the hours of noon and 4 P.M. everyday, with the exception of Sundays, Christmas Day, New Year's Day, Good Friday, and the Queen's Birthday. These hours may, under the authority of the Postmaster-General, be altered to suit local circumstances.

Postal Officials bound to secrecy.

4. The officers of the Postal Department engaged in the receipt or payment of deposits, are not allowed to disclose the name of any depositor, or the amount deposited or withdrawn by him, except to the Postmaster-General or other officers of the Department engaged in carrying out the provisions of these rules.

Persons who may deposit Money.

5. Any person may deposit money in a Post Office Savings Bank (*a*) on his own behalf, or (*b*) on behalf of any minor relative, or (*c*) on behalf of any minor of whom he is the guardian.

Explanation.—Minors are allowed to deposit money in their own names, and women, whether married or single, are allowed to deposit money in their own names, but subject, in the case of married women, to the limitation laid down in Rule 6.

Limitations as to opening Accounts.

6. (i) Any person may open an account in his own name, but may not have more than one such account open.

(ii) In addition to the account which a person may open in his own name, he may open any number of separate accounts on behalf of any minors related to him or of whom he is the guardian, provided that he shall not open more than one account on behalf of each such minor.

(iii) The fact that an account has been opened on behalf of a minor shall not prevent such minor from opening an account in his own name; nor shall the fact that a married man has an account in his own name prevent his wife from opening a separate account in her own name, provided the money to be deposited by her is her own property or earning.

Note A.—This rule is not meant to prevent any one from opening more than one *ex-officio* or public account (*vide* rule 10).

Note B.—Warrant and Non-Commissioned Officers and men serving in British Regiments can open accounts in Post Office Savings Banks, even though already depositors in Military Savings Banks.

7. Deposits in trust are not allowed, and cannot be recognized.

8. Money cannot be deposited in the name of two or more persons jointly, provided that nothing in this rule shall prevent the deposit of money in the name of a known firm, or to the credit of a public account admissible under rule 10, including security deposit accounts.

9. The smallest sum of money that can be deposited at any time is four annas; and no sum can be deposited that is not a multiple of four annas. A depositor cannot deposit a larger sum than five hundred rupees in all between the 31st March of any year and the 1st April of the following year.

Note A.—The limit of ₹500 is to be reckoned irrespective of withdrawals, that is, withdrawals are not to be deducted in applying it.

Note B.—The limit of ₹500 may be exceeded—

(1) in the case of Public Accounts;
(2) in the case of Regimental and Police Accounts.

Note C.—When an account is transferred from one Savings Bank (whether Post Office or Presidency) to another, the amount so transferred shall not be included in calculating the limit of ₹500, save that portion of it deposited in the current year.

Note D.—Deposits made for the purpose of immediate investment in Government Securities are not reckoned in calculating the limit of ₹500.

Note E.—The limit of 4 annas as the minimum sum that can be deposited and the prohibition against depositing any sum that is not a multiple of 4 annas do not apply to Public Accounts and Regimental and Police Accounts.

Public Accounts.

10. The following conditions govern the opening of "Public Accounts":—

(*a*) Accounts may be opened by officers of Government who have charge of money, as Secretaries or Managers of Dispensary, Church, or other religious Institution, School, Orphanage, Asylum, or Library Funds, or any funds contributed for purposes other than the private advantage or amusement of the contributors. Race, Racquet, Billiard, Mess, and similar funds, whose objects are of a private or personal nature, are not within this definition, and such accounts may not be admitted. Band Funds may be admitted if there is no private bank in the place.

(*b*) Secretaries and Managers of Dispensary and similar funds (as above mentioned), if they are not officers of Government and the institution is not subject to Government control, can be allowed Savings Bank accounts only if there is no respectable private bank of deposit in the place.

(*c*) Secretaries and Managers of Benevolent Funds (that is, funds formed by mutual subscription as an insurance against domestic misfortune) may be allowed accounts.

(*d*) Officers of Government or of public institutions, such as Railway and Steamer Companies, and the like, who collect subscriptions, voluntary or departmental, from their subordinates for departmental purposes, may be allowed accounts.

(*e*) Government officials and others who are required by Government to deposit security may be allowed a separate account for the security deposit only. The depositor will be required to sign a letter (in the prescribed form) addressed to the Postmaster undertaking not to make any claim on the Post Office Savings Bank for the principal of the sum deposited except with the express written sanction of the person referred to in the letter to whom the security is pledged; not to object to the payment by the Bank of the principal to such person on his claiming it, and not to make any claim for interest after interest has ceased to accrue owing to the payment of the principal to such person. Interest on security deposits will be paid in the usual manner.

Note.—A person may open a security deposit account either on his own behalf or on behalf of another person. Security deposit accounts may be opened in the joint names of the persons undertaking the same work or contract. A person undertaking more than one work or contract at the same time may be allowed a separate account in respect of each. Security may be deposited in a single sum or in instalments.

(*f*) Public accounts of the kind specified above must be designated by a name indicating the object to which the money is devoted, as *A—pore Dispensary Fund, Workmen's Sick Fund, &c.* They are exempted from the rules fixing 4 annas as the smallest sum that can be deposited or withdrawn and prohibiting the deposit or withdrawal of any sum that is not a multiple of 4 annas, and also from the rule limiting the amount of deposit within one year to R500 (provided the deposit is the *bonâ fide* income of the fund), and interest will be paid upon their full balance, notwithstanding that it exceeds R9-6 a month. But a reduction of balance by more than R3,000 within twelve consecutive months will not be permitted, unless the Secretary or Manager gives six months' notice of his intention to make additional withdrawals, such notice to specify the precise amount to be withdrawn.

11. No account may be allowed for money—

(1) which is the property of Government, or

(2) which has been received for credit of Government, or

(3) which has been drawn from the treasury for expenditure on account of Government, or

(4) which is collected or received or held in trust by any public officer or court in accordance with any law, or

(5) which is raised by taxation, either local or municipal.

Regimental and Police Accounts.

12. The Commanding Officer of a native regiment may open a single account with the Post Office Savings Bank on account of the men of his regiment, making his own arrangements about the separate accounts of the individuals, and about the distribution to them of the interest credited upon the conjoint account. This account shall be subject to the usual rules, save that the limits of R500 for deposits and of R9-6 for monthly interest and the rules fixing 4 annas as the smallest sum that can be deposited or withdrawn and prohibiting the deposit or withdrawal of any sum that is not a multiple of 4 annas, shall not apply. But except with the special sanction of the Director General of the Post Office, a reduction of balance by more than R3,000 within twelve consecutive months will not be permitted unless the Commanding Officer gives one month's notice of his intention to make additional withdrawals, such notice to specify the precise amount to be withdrawn. The Commanding Officer must, in presenting any deposits, sign a certificate that, to the best of his belief, the money is the property of the men of the regiment. District Superintendents of Police may have accounts under this rule on account of men in the police force.

N.B.—This rule shall not be held to prevent any Native soldier, or any member of the police force, opening an account of his own in his individual capacity.

Powers to withdraw Money, and limitations as to withdrawal.

13. A depositor can withdraw money from his account once a week. By the term "week" is meant the period from Monday to Saturday, both days inclusive. A depositor can, therefore, withdraw money from his account on Saturday and again on the following Monday.

14. A minor can withdraw money deposited by him in his own name; but money deposited on behalf of a minor can only be withdrawn during his minority by his guardian.

15. Women, whether married or single, can withdraw money deposited by them in their own names; and married women can also withdraw money deposited by them as single women in their own names, their marriage notwithstanding. The fact that a female minor, on whose behalf money has been deposited, is married or becomes married after the account has been opened on her behalf, shall not prevent her from withdrawing the money so deposited on attaining majority.

16. A depositor cannot withdraw a smaller sum than four annas, and he cannot withdraw any sum which is not a multiple of four annas, unless it be to close his account, in which case he can withdraw the balance at his credit.

Note.—The above restrictions do not apply to Public Accounts or Regimental and Police Accounts.

How to open an Account.

17. Any person wishing to open an account should apply to the nearest Post Office that is a Savings Bank. Application need not necessarily be made in person; but the applicant must state his name, his occupation or profession, and his place of residence. If he be a native, he must also state his father's name and caste.

18. The intending depositor must sign a declaration, in the following form, that he has read and accepted the Post Office Savings Banks Rules. If he be unable to write, he must attend personally, and, in the presence of a witness, affix his mark or seal to the declaration, to be attested by the signature of the witness. If he should apply in person, a copy of these rules will be given to him to read, or they will be read and explained to him, should he be unable to read. If he should not apply in person, a copy of these rules with the form of declaration will be sent to him, and he must present the declaration, duly signed, with the first deposit.

Form of Declaration to be signed by Depositor on making first deposit.

I hereby declare that the Post Office Savings Bank Rules have been read {by me / to me}, and that I accept them as binding upon me.

I further declare that I have no account in my own name at any Post Office or Presidency Savings Bank.

19. Women may open accounts in their own names through their agents, or if they are married women, through their husbands or agents. The agent or husband will be required to sign the declaration that the depositor understands and accepts the rules.

20. When the declaration is presented, duly signed, with the amount of the first deposit, or when it has been signed by a depositor attending in person to make a deposit, the amount of the deposit will be entered in a Pass-book, which will be supplied to the depositor, and the entry will be initialed by the Postmaster, and stamped with the office stamp. The depositor will be required to sign a receipt for the Pass-book, and to give a specimen of his signature in a book which will be kept in the Post Office. If the depositor does not attend in person he must send a specimen of his signature on a slip of paper to the Post Office.

21. If the account be opened at a Sub-Post Office, the Pass-book for the depositor will have to be obtained from the Head Office. A preliminary receipt for the amount of the first deposit will, therefore, be given to the depositor, who will be informed of the date on which he should call to receive the Pass-book. When the Pass-book is handed over to the depositor, he will be required to return this preliminary receipt, and to sign a receipt for the Pass-book in addition to leaving a specimen of his signature on record in the Post Office. The amount of the original deposit will be entered in the Pass-book at the Head Office, and the depositor will therefore have a guarantee that the sum has been received in that office. He should be careful to see that the entry in the Pass-book corresponds with the amount entered in the preliminary receipt before giving up the latter.

Pass-book and its importance.

22. The Pass-book will show, in the vernacular of the district or in English, as the depositor may wish, the number of his account, with the name of the office from which the book is issued, his own name, occupation or profession, and address. No deposit can be made, and no money can be withdrawn, from an account without its production, and the Post Office will not be responsible for any sum not acknowledged in the Pass-book. Depositors should carefully examine their books before leaving the offices, and ascertain that the

entries are correct. They should also be careful to keep their Pass-books in their own possession as the Post Office will not be responsible for any loss caused to a depositor, if any person shall obtain possession of the book, and fraudulently obtain the payment of any sum belonging to the depositor.

NOTE.—In the case of an account opened at a Sub-Post Office the Pass-book will be sent to the Head Office twice in each year, firstly as soon as possible after the 15th June when the Pass-book is presented for entry of interest under Rule 31; and secondly on the first occasion on which the account is operated upon during the quarter ending 31st December. The depositor will obtain a receipt in exchange for his pass-book and he must give up this receipt when his pass-book is returned to him.

LOSS OF PASS-BOOK.

23. No charge will be made for the book at first supplied to a depositor, or for any book issued to him in continuation of the original book which will be retained by the Post Office. But if a book be lost or spoiled (except under circumstances over which the depositor has no control), or if any account be re-opened with the permission of the Comptroller, Post Office, before the expiration of three months from the date of closure (under rule 35), the depositor will have to pay one rupee for a fresh book.

MODE OF DEPOSITING MONEY AFTER AN ACCOUNT HAS BEEN OPENED.

24. A depositor may deposit money at the Post Office at which his account stands as often as he wishes, so long as the prescribed yearly limit is not exceeded. All that he is required to do is to take or send the amount to be deposited with his Pass-book to the Post Office. The amount of his deposit will be entered in the Pass-book, and the balance struck as shown below. The entry will then be initialed by the Postmaster, and stamped with the dated stamp of the office, and the Pass-book returned :—

Date.	Dated stamp of the Post Office.	Amount of each deposit or withdrawal (to be entered in words).	Amount deposited.	Amount withdrawn.	Balance at credit of the Depositor.	Initials of the Postmaster.
1883.			₹ a. p.	₹ a. p.	₹ a. p.	
3rd April . .	...	Deposited ten rupees . .	10 0 0	...	10 0 0	A.B.C.
15th „ .	...	Deposited twenty-five rupees .	25 0 0	...	35 0 0	A.B.C.
12th May . .	...	Withdrawn three rupees .	...	3 0 0	32 0 0	A.B.C.

25. If the amount be deposited at a Sub-Post Office, the depositor will receive, in addition to the receipt in his Pass-book, an acknowledgment from the Head Office, which will generally be the office at the head-quarters station of the district. This acknowledgment will be delivered to him in ordinary course through the Post Office. If it should not reach the depositor in proper time, or if, when it reaches him, it should show any signs of erasure, or should not agree with the entry in the Pass-book, the depositor should immediately apply to the Postmaster of the Head Office, the name of which is in the Pass-book, and renew his application again and again until he receives a satisfactory reply.

MODE OF WITHDRAWING MONEY.

26. When a depositor wishes to withdraw money, he must present his Pass-book personally or by agent (whose name must be entered in the application for withdrawal) at the Post Office at which his account stands, with a printed form of application for withdrawal, which can be obtained at the Post Office, signed by himself, and showing the balance at his credit and the amount which he wishes to withdraw. If he is unable to write, he must attend personally and affix his mark or seal to the application, to be attested by the signature of a witness. Should he be absolutely unable to attend personally, he must have his mark or seal affixed to the application, and attested by some respectable witness, and the Postmaster will make payment to the person presenting this application with the Pass-book, after satisfying himself, by such inquiry as he may think proper, of the inability of the depositor to attend, and of the genuine character of the application.

27. Should any person other than the father, or if the father is dead, the mother, wish to withdraw money from an account opened on behalf of a minor and claim to do so as guardian of such minor, he will be required to fill in, on a prescribed form, answers to the following questions and will only be allowed to withdraw money on the order of the Postmaster-General in accordance with rule 40 :—

(*a*) What is your relationship to the minor ?

(*b*) Is the father or mother of the minor dead, or are both parents dead ? What near relatives of the minor are alive ?

(*c*) Have you been appointed guardian of the minor by will or deed or under any enactment in force in British India? (If the reply to this question is in the affirmative the applicant should produce the documents on which he relies to support his claim.)

(*d*) Are you an adult relative of the minor, and does he reside with you or is he maintained by you ?

NOTE.—In the case of withdrawals made from accounts opened on behalf of minors, the father or other guardian of the minor must sign the following certificate on the application for withdrawal :—

"Certified that the amount sought to be withdrawn is required for the use of the minor."

28. The amount to be withdrawn will be entered in the Pass-book and a fresh balance struck, as in the case of a deposit, under the initials of the Postmaster and the dated stamp of the office. The amount will then be paid to the depositor or to the person presenting the Pass-book and application, and his receipt taken, in all cases without a receipt stamp, on the Warrant of Payment.

29. If the amount be withdrawn at a Sub-Post Office, payment cannot be made until a Warrant of Payment is received from the Head Office.* The depositor, therefore, or other person presenting the Pass-book and application, will be informed of the date on which he should come to the Post Office to receive payment, and will have the Pass-book returned to him. On presentation of the Pass-book on that date or any subsequent date after the arrival of the Warrant of Payment, the amount will be paid to the depositor, or other person presenting the Pass-book, and his receipt taken, in all cases without a receipt stamp, upon the Warrant. The necessary entries will then be made in the Pass-book, under the initials of the Sub-Postmaster and attested by the stamp of the office.

INTEREST.

30. Interest will be allowed at the rate of $3\frac{3}{4}$ per cent. per annum, until further orders, on all deposits, subject to the conditions of this rule. This interest will be allowed for each calendar month on the lowest balance at credit of an account between the close of the fourth day and the end of the month: provided that interest shall only be calculated at the rate of three pies a month on every complete sum of five rupees: provided also that no higher monthly interest than R9-6 shall be allowed on the balance of any account, except as provided for under Rules 9, 10, and 12.

31. The interest calculated as above for each month will be added to the balance of each account after the 15th of June of each year. Depositors will be called upon to present their Pass-books in order that the necessary entries may be made in them. If the Pass-book be not presented for this purpose, in response to the notice sent by the Post Office to the depositor, the entry will be made on the next occasion when a deposit is made or when money is withdrawn.

NOTE.—Pass-books of depositors in Sub-Post Offices will be sent to the Head Office for the purpose of adding interest under this rule.

TRANSFER OF ACCOUNTS.

32. A depositor may have his account transferred free of charge to any Post Office that is a Savings Bank, *provided that the account shall have been in existence for three months previous to the transfer*. If he should wish to

* NOTE.—Except in the case of certain selected Sub-Offices which are authorized to grant Warrants of Payment.

transfer his account, he must present his Pass-book at the Post Office personally, or send it with a written application for transfer. The Pass-book will be returned to the depositor who should present it as soon as possible at the Post Office to which his account has been transferred. A depositor in a Presidency Savings Bank may, by application to the Presidency Savings Bank, have his account transferred, free of charge, to any Post Office Savings Bank.

Closing an Account.

33. When a depositor wishes to close his account, he must present his Pass-book with a form of application for withdrawal of the net amount at his credit. The amount of interest due on his account up to the end of the calendar month preceding the date of presentation, will be entered in the Pass-book, and a final balance struck. The amount will then be paid to the depositor, and his receipt taken on the Warrant of Payment. The Pass-book will be retained in the Post Office. If the application for closing an account be presented at a Sub-Office, the same procedure will be followed as in the case of an ordinary withdrawal, except that the Pass-book will be retained.

34. If an account be closed under the orders of the Comptroller, Post Office, notice in writing will be sent to the depositor, requiring him to present his Pass-book and receive payment of his balance at his credit as soon as convenient. After the date of such notice, no deposit will be accepted on the account so closed, and no interest will be allowed upon the balance after the end of the calendar month preceding such date.

Re-opening an Account.

35. A depositor who has once closed an account cannot open another account until after the expiration of three months from the date of closure, without the permission of the Comptroller, Post Office; and a depositor whose account has been closed by order cannot open a fresh account in any case without the permission of the Comptroller, Post Office.

Dead Accounts.

36. Accounts in respect of which no transactions have taken place for the periods specified below will be treated as "dead" and no subsequent deposit or withdrawal will be allowed in the case of such accounts without the previous orders of the Comptroller, Post Office.

When the balance of the account is	And when no sum has been deposited or withdrawn and no interest added for
Under ₹ 10	3 complete years.
„ „ 100	6 „ „
Over „ 100	12 „ „

Note.—By "transaction" in this rule is meant not only a deposit or withdrawal but also the entry of interest which has accrued on an account, which entry is made annually on presentation of the Pass-book for the purpose.

Procedure to be followed in cases of succession and guardianship.

37. If a depositor should die, leaving in a Post Office Savings Bank a sum of money not exceeding one thousand rupees, and if probate of his will or letter of administration of his estate, or a certificate granted under Act No. XXVII of 1860 be not produced to the Postmaster-General within three months of the death of the said depositor, the Postmaster-General may pay the said sum of money to any person appearing to him to be entitled to receive it, or to administer the estate of the deceased.

38. Balances in excess of ₹1,000 may be paid on production of probate, letters of administration or a certificate under Act XXVII of 1860, unless otherwise ordered by the Director General of the Post Office, who has discretionary power to dispense with such evidence in cases where he is of opinion that to require it would cause hardship, and that to dispense with it would involve no appreciable risk.

39. If any depositor become insane or otherwise incapable of managing his affairs, and if such insanity or incapacity be proved to the satisfaction of the Postmaster-General, then the Postmaster-General may, from time to time, make payment out of the deposits to any proper person.

40. When any person other than the father, or if the father is dead, the mother, claims to withdraw money from an account opened on behalf of a minor as being the guardian of such minor, the Postmaster-General may authorize the applicant to withdraw money from the account for the minor's use in accordance with the following rules:—

(*a*) Where the applicant claims as guardian duly appointed by will or deed on production of the documents supporting the claim.

(*b*) Where the amount of the account does not exceed ₹250 and the applicant does not claim to have been appointed by will or deed, upon his giving evidence to the satisfaction of the Postmaster-General that he (the applicant) is the guardian of the minor.

(*c*) Where the amount of the account exceeds ₹250 and the applicant does not claim to have been appointed guardian by will or deed, upon the applicant producing a certificate of administration granted under Act XL of 1858 or Act XX of 1864.

(*d*) In any case of doubt the applicant (not being the father or mother of the minor) may be required to produce a certificate of administration under Act XL of 1858 or Act XX of 1864 before payment is made to him.

Note.—An authority given by the Postmaster-General under (*b*) will not hold good for a subsequent withdrawal if the balance of the account then exceeds ₹250.

Purchase, Sale, and Custody of Government Securities.

Purchase of Government Securities.

41. Any *bonâ fide* depositor, whose account has been in existence for not less than three months, may invest the amount of his balance or a portion of it in Government Securities through the Post Office. Any such depositor may also purchase, through the Post Office, Government Securities not exceeding in nominal value ₹1,000 in one year and ₹3,000 in all, by tendering in cash the amount necessary to complete the purchase. A written application should be presented, together with his Pass-book, by a depositor desiring to make an investment under this rule. The application will then be forwarded to the Comptroller, Post Office, who will take the necessary steps for making the purchase through the Comptroller-General.

(*a*) The paper purchased will be of the 4 per cent. loans, unless $4\frac{1}{2}$ per cent. paper is specially applied for.

(*b*) The investor may also specially apply that the paper remain in the custody of the Comptroller-General. In this case the Comptroller-General will, if necessary, transfer the paper to the 4 per cent. loan of 1865. The investor may at any time apply through the local Post Office for the delivery to him of paper thus held by the Comptroller-General. If application is not made under this clause, the paper purchased by the Comptroller-General will be enfaced for payment of interest at the local treasury, and forwarded to the Post Office for delivery to the investor.

Sale of Government Securities.

42. Any depositor may apply for the sale through the Post Office of Government Securities which have been purchased for him through the Post Office, whether held by himself or held for him by the Comptroller-General. If the securities are presented with the application, they must be endorsed in favour of the Comptroller-General.

Safe Custody of Government Securities.

43. A depositor may tender at a Post Office Savings Bank, for safe custody by the Comptroller-General, Government Securities which have been purchased for him through the Post Office. The amount so tendered must not exceed in nominal value ₹1,000 in any year, or ₹3,000 in all. The Securities so tendered must be endorsed to the Comptroller-General.

Interest on Government Securities.

44. So long as the Government Securities remain in the custody of the Comptroller-General, interest, when due, will be drawn and advised to the local Post Office Savings Bank through the Comptroller, Post Office, for credit to the depositor's account.

Fees.

45. The following fees will be charged :—

On purchase : 4 annas per cent.

On realization and remittance of interest : 4 annas per cent. on the amount of the interest.

On delivery out of custody : 4 annas per cent. unless the application for delivery is made within a year of the purchase.

On sales : 4 annas per cent., and any actual outlay upon brokerage.

Power of Government to alter Rules.

46. The Governor General in Council reserves the right to alter or add to these rules at any time.

Ordered, that this Resolution be communicated to the Director General of the Post Office, with reference to his communication No. 280, dated 19th March 1888.

Ordered also, that this Resolution be communicated to the Comptroller and Auditor General for information.

Ordered further, that the Resolution be published in the *Gazette of India* for general information.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

WEATHER SUMMARY FOR MARCH 1888.

During March pressure falls everywhere throughout the Indian region, but to a much less extent over the Bay than over the land surface; hence over the Bay there is in normal years a region where pressure is higher not only than it is in any part of India, but also over the Equatorial Sea to the South. Pressure is ordinarily lowest over the east of the Central Provinces and Chutia Nagpur. During the past month there has been some considerable departure from these normal conditions. Relatively high pressures have, indeed, been shown over the Carnatic and the Bay, but on the West Coast pressure has been almost equally high. The greatest departure from the normal distribution has, however, been shown in respect to the position of the area of minimum pressure, which during nearly the whole month has been found either over North-Western or North-Eastern India. The wind directions have been fairly normal, though the southerly wind from the Bay into Bengal has been stronger and steadier than usual, while cyclonic circulations have at times disturbed the wind movements of Upper India.

The rainfall of March is usually light, and is generally attributable in the North-West to the appearance of a late cyclonic storm, and in Bengal and Assam to the early commencement of what is called the spring rainfall. In the past month the rainfall has been even lighter than usual, except in Assam and Cachar, where probably owing to the low pressures over North Bengal, noticed above, there has been a strong indraught of moist southerly winds from the Bay.

From the 1st to the 5th of March pressure was generally uniform throughout India, the winds light and variable, and the weather, except for a few light showers in the Berars and Central Provinces on the 2nd, was fine with a generally rising thermometer. On the 6th, however, the Chart showed a small cyclonic storm lying between Neemuch and Indore, and on that day or during the following night rain fell in Sind and all over the Central parts of the country. This rainfall gradually spread eastward, being reported from Hazaribagh and Raipur on the 8th and from Bengal, Assam, and Arrakan on the 9th and 10th. In the meantime the Chart of the 9th showed a brisk barometric fall all over North-Western India, and on the 10th a small but well marked depression lay near Dera Ismail Khan, where the barometer had fallen to 29·65″. This depression travelled eastward from Dera Ismail Khan towards Lahore, and appeared on the 11th to be filling up, but on the 12th it underwent redevelopment, and the south-easterly winds on its northern and eastern side brought up slight rain to the north and east of the Punjab. At the same time moderate rain was falling over Assam and East Bengal. On the 13th the distribution was very complicated; a band of low pressure, with its minimum between Hyderabad and Jacobabad, stretched right across India from Sind to the Circars. To the south of this band the wind was westerly, to the east southerly, and to the north south-easterly and easterly. The two last currents apparently brought up much moisture, and rain was reported from nearly every station in Northern India from Assam to the Punjab. On the 14th the distribution of pressure had completely changed, the band of low pressure having disappeared, and readings being lowest over Western Bengal. The winds had at

the same time become more variable, and rain was confined to Bengal and Assam. On the 15th, 16th and 17th local showers were reported from several parts of North-Western and North-Eastern India, but beyond this the weather called for no remark.

Between the 19th and 21st the distribution was complicated, but the weather was generally fine. On the 22nd the barometer began to fall fast over North-Western India, with southerly winds in the Indus Valley and rain at Quetta; and on the 23rd a large shallow depression was shown over the Western desert, and rain had extended to the north-west of the Punjab. On the 24th pressure had fallen quickly over the whole of Northern India, over which region a large low pressure area had been formed, while, owing to the barometer remaining steady in the South, rather steep gradients prevailed over India. In consequence the winds were strong—especially at the head of the Bay—and rain was falling in Assam. The Chart of the 25th showed that in addition to the low pressure area which still held over Northern Bengal, a small but rather deep depression lay over Upper Sind. The winds were strong in the neighbourhood of both disturbances. Rain continued in Assam, and was also falling at Quetta and Belgaum. By the morning of the 26th the depression from Upper Sind had advanced north-eastward to Multan. Round the disturbance there was a very complete cyclonic circulation of the winds, and rain was falling all over the north of the Punjab. Showers continued in Assam. By the following day, the 27th, the depression had disappeared, and a large high pressure area had been formed over North-Western India, while the lowest barometric readings were again shown over Bengal. This disturbance continued during the 28th; but on the 29th a brisk barometric fall occurred in the North-West, and on the 30th another depression was shown over the Punjab. This disturbance was however slight, and no rain accompanied it. On the 31st the weather was fine, except in Assam, where showers still continued.

Pressure.—The mean pressure of the month has been generally above the normal average over the Peninsula and the Central parts of the country, and below it over Northern India. The defect was generally small, except in the Punjab.

Temperature.—The mean temperature of the month has been in defect of the average over East Bengal, and at one or two places in the Peninsula, but has been in excess in all other parts of the country. The greatest excess, 5°, was at Rawalpindi, but at Agra, Ludhiana, Lahore, Chakrata, and Quetta it amounted to 4°. The area of maximum heat has, on the whole, advanced steadily northward. In the earlier days of the month Salem reported the absolute maximum for the Indian region. After the first week the Bombay Deccan became on the average the hottest district in India. About the 10th and 11th a sudden accession of heat was reported from Sind, but on the 12th the absolute maximum was again reported from Sholapur. On the 14th the hottest district was the Central Provinces and from that date till the close of the month the area of greatest heat oscillated northward and southward over the inland parts of the Peninsula, the Central Provinces, and the Berars. Quite at the close of the month a sudden rise of temperature occurred over Upper India, and maxima exceeding 100° were reported as far north as Sirsa and Delhi on the 30th and 31st; but previous to that date there had been a spell of unusually cool weather all over North-Western India.

Humidity variations were irregular.

Rain.—Notwithstanding the disturbed condition of the atmosphere, as evinced by the numerous depressions reported during the month, the rainfall generally was short of the average. In Assam and Cachar there was an excess of 1¼ inch, and in Bengal, the Berars, Khandesh, and the Konkan a trifling excess over the small amount usually received; but in all other parts of India the rainfall has been short.

The following table shows the amount of rain and the difference from the average, during the month of March 1888, according to Districts, as far as is indicated by the telegraphic reports:

Districts.	Number of stations.	Average rainfall in March.	Difference from the average in March, 1888.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 7th April, 1888.*—No rain, except a small quantity in Ganjam, Vizagapatam, Bellary, Tinnevelly, and Malabar. Rainfall to date generally sufficient, except in parts of Vizagapatam, North Arcot, Trichinopoly, Madura, Tinnevelly, Coimbatore, Nilgiris, and Salem. Crops generally good, but very slightly damaged by insects in Trichinopoly, and withering in parts of Madura, Tinnevelly, and Coimbatore. Pasture generally sufficient, but scanty in Malabar, Nilgiris, and parts of Madura and Anantapur, and decreasing in Vizagapatam, North Arcot, Trichinopoly, Coimbatore, and Salem. Prices rising where not stationary. General prospects favourable.

Bombay.—*For week ending 11th April, 1888.*—Slight rain in parts of Dharwar and Sholapur. Standing crops in good condition. Cotton-picking continues in parts of Guzerat and Southern Mahratta Country. Harvesting of late crops completed in Kolaba and Baroda, and in progress in other districts. Ploughing operations for next season's crops in progress in Kurrachee, Hyderabad, Broach, Nasik, Thana, Ratnagiri, Poona, Ahmednagar, Sholapur, Satara, Bijapur, Belgaum, Kanara, and Wadhwan. Probable outturn of late crops from 10 to 14 annas in Poona and from 6 to 10 annas in Baroda.

Bengal.—*For week ending 10th April, 1888.*—A few light showers are reported in South-West and East Bengal and in the Balasore and Singbhoom districts. Rain is wanted throughout the Bhagalpur division, and in parts of the Orissa, Burdwan, Presidency, and Rajshahye divisions. Ploughing and sowing of autumn crops are proceeding on. Prospects of spring rice continue favourable. Indigo seedlings are doing well. Sugarcane is being planted. *Mahua* is expected to be a good crop, except in Bhagalpur. *Rabi* harvest is nearly over. The outturn is generally good, but is below the average in parts of the Bhagalpur and Chota Nagpur divisions. No marked fluctuation in the price of common rice during the past fortnight.

North-Western Provinces and Oudh.—*For week ending 11th April, 1888.*—Weather seasonable. Crops nearly all harvested, outturn good. Sugarcane is being sown and irrigated. Indigo sowing has commenced. Opium collection is nearly finished. Markets are well stocked, and prices are steady. The condition of stock cattle is generally good.

Punjab.—*For week ending 11th April, 1888.*—Slight rain in Ferozepore. Prices are somewhat unsettled; in two districts a rise is reported, and in others prices are falling or stationary. *Kharif* ploughings and sugarcane and cotton sowings in progress. Harvesting of *rabi* crops and collection of gram and barley commenced. *Rabi* prospects are reported good, except in Shahpur, where they are below average, and in Rawalpindi and Peshawar, where they are average. Slight damage done to *rabi* crops in Sirsa tahsil on account of hail, and also in Jullundur for want of rain. Stock cattle are generally healthy. Poppy crop average.

Central Provinces.—*For week ending 11th April, 1888.*—Weather hot. Threshing of winter crops continues, outturn good. Fields are being manured in Bilaspur for rain weather sowings. Sugarcane thriving. Cattle in fair condition.

Burma.—*For week ending 7th April, 1888.*—Prospects of dry weather crops continue to be satisfactory. Condition of agricultural stock generally good. Price of paddy has risen in the Bassein and Thonegwa districts of Lower Burma and in the Yamethin district of Upper Burma, and has fallen in the Prome and

Shwegyin districts of Lower Burma and in the Sagaing, Kyaukse, Myingyan, Minbu, Pyinmana, and Lower Chindwin districts of Upper Burma. A large supply of rice has lately passed up the Irrawaddy from Lower Burma into Upper Burma.

Assam.—*For week ending 11th April, 1888.*—Weather hot, with high winds; dry in Lower Assam and Hill Districts. Good rain in Upper Assam. Hail-storms have done some damage in the Surma Valley. Sowing of early rice and tea plucking commenced.

Mysore and Coorg.—*For week ending 11th April, 1888.*—No rain. The paddy crop in parts of the Tumkur district is suffering from want of water. Elsewhere the crops are reported to be in good condition. Outturn of harvests fair. Condition of cattle generally good. Prices have fallen in the Bangalore district slightly.

Coorg has also had no rainfall. The continued want of rain is injurious to the coffee blossom.

Berar and Hyderabad.—*For week ending 11th April, 1888.*—Weather clear and warm. Harvesting of *rabi* crops almost completed. Land is being prepared for the ensuing *kharif* crop. Agricultural stock in good condition. Fodder insufficient in the Amraoti district. No marked change in the prices of foodgrains.

Hyderabad has had no rain. Agricultural prospects continue good. Prices are stationary.

Central India.—*For week ending 11th April, 1888.*—The only changes, since the last report, are in Bhopal and Western Malwa, where the standing crops are reported fair and indifferent; and probable outturn in Bhopal below the average, the crop having been damaged by hail. In Bhopal agricultural stock indifferent, and prices of food grains falling. Agricultural stock and opium reported indifferent in Western Malwa. Prices are falling in Bhopawar.

Rajputana.—*For week ending 11th April, 1888.*—Agricultural operations satisfactory. Standing crops good, and are cut, or being cut, at places. Crop prospects and agricultural stock good generally. Pasturage or fodder fairly sufficient. Prices steady, and falling at places. Opium collected, or being collected, at places.

Nepal.—*For week ending 5th April, 1888.*—No rain. Atmosphere dusty. Prospects of wheat crop good. Harvesting of peas commenced in the valley.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 11th April, 1888.

During the past week pressure over the Peninsula has been comparatively steady, and the weather, though rather cloudy, has been fairly settled; but over Northern India the barometer has been subject to considerable oscillations from day to day, and the distribution of pressure has undergone sudden and large changes. Notwithstanding these large atmospheric changes, the weather has been generally dry, except in Assam and Cachar, where rain has fallen steadily. In Ceylon the rainfall has been heavy, but has apparently been attributable to influences outside the area of the Chart.

On the 5th a band of low pressure lay along the foot of the hills extending from Ludhiana to Dhubri, but the distinct depression which was reported from Northern Bengal on the concluding day of the previous week had disappeared; the minimum pressure within the band was reported from Roorkee. High pressures were shown over the north-west of the Punjab and the south of the Peninsula. There was a strong indraught of southerly winds from the Bay into Bengal, and there was the normal westerly current down the Gangetic plain; but elsewhere the wind currents were rather irregular. Rain had fallen at Silchar and Colombo. Temperature changes, though in many cases large, were rather irregular, though, except in Bengal, Assam, and the south of the Peninsula, the tendency was to fall. The Central Provinces and the Berars reported the highest maxima. The Chart of the 6th showed a small but well marked depression between Lahore and Sialkote, and the barometer has fallen fast over North-Western India. Elsewhere pressure had generally risen, and, with the exception of the above noticed depression, the general distribution of pressure and the general circulation of the winds were the same as on the 5th. In North-Western India the winds were cyclonic. Rain was reported from Sibsagar, Silchar, and Colombo, and a few drops at Murree. Temperature changes comprised a fall over North-Eastern and Central India and the Bombay Presidency, and a rise everywhere. Over the Central parts of India and of the Peninsula the maxima ranged between 100° and 105°, but the absolute maximum was 106° at Thyetmio. By the morning of the 7th the depression over the Punjab had filled up, and a high pressure area had appeared over that Province. The lowest pressures were reported from North Bengal, and relatively high pressures from the Western Punjab and the south of the Peninsula. A general northerly to north-westerly current prevailed over North-Western and Central India, an easterly current on the West Coast, and a southerly to south-westerly current, blowing strongly at the head of the Bay, over the east of the Peninsula, Bengal, &c. During the day a tornado passed over Dacca, but, beyond the bare record of the fact, the observer at that station gives no information regarding it. Temperature had generally risen, except in the North-West and the Carnatic. The highest maximum was 107·2° at Sholapur, and maxima exceeding 100° were reported from the great majority of the inland stations, except those in the Punjab, Rajputana, Assam, and Lower Bengal. Rain had fallen in Cachar and Ceylon. On the 8th the general distribution of pressure was similar to that reported on the 7th, but the depression over Bengal was more marked. Rain was reported from Dacca, Silchar, and Sibsagar. The wind currents were practically unchanged. Temperature had generally decreased—more particularly over North-Western India, where also the humidity was low. The Chart of the following day showed, in addition to the depression over North Bengal, that a large but shallow disturbance was appearing over Sind and Beluchistan. In consequence the northerly current of wind over North-Western India was less marked than on the 8th, though elsewhere there was very little change in the general circulation. Rain was again reported from Assam. Temperature changes were somewhat irregular, but on the whole the maxima were moderate for the season in the North-West. The highest temperature reported was 108° at Cuttack. On the 10th the depression over Bengal had become much less distinct, while that over Beluchistan had, on the contrary,

developed. The wind had backed to south-west in Sind, and there was a general but irregular indraught towards the depression from a large part of North-Western India. Elsewhere there was little change. Temperature had risen in Upper India, but the maxima in that part of the country were nowhere excessive. Rain had fallen at Chittagong, Silchar, and Colombo,—heavily at the last station. The Chart of the 11th showed a still further development of the Sind depression, which was apparently travelling north-eastward across the Punjab. The cyclonic movement in the North-West was now very distinct, and the winds were strong at the mouth of the Indus. Temperature had again risen over Upper and Central India, and maxima of 100° and over were reported from a large part of the North-Western Provinces and from the south-east of the Punjab. The highest maximum throughout India was 108° at Nagpur. Rain had fallen at Silchar, Colombo, and Quetta.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burma ...	0	0
Bengal and Assam ...	4	7·83
North-Western Provinces and Oudh ...	0	0
Punjab ...	0	0
Hill Stations ...	2	0·15
Ceylon ...	2	10·50
Malabar Coast ...	0	0
Bombay ...	0	0
Berars and Central Provinces ...	0	0
Guzerat and Central India ...	0	0
Sind—Rajputana ...	0	0
Madras ...	1	0·01

SUPPLEMENT TO

The Gazette of India.

No. 16.} CALCUTTA, SATURDAY, APRIL 21, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 19th April, 1888.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 14th April, 1888.*—Slight rain in most districts. Rain wanted in Vizagapatam, Cuddapah, North Arcot, Trichinopoly, Madura, Tinnevelly, Coimbatore, Nilgiris, Salem, and South Canara. Crops generally good, but withering in parts of Anantapur and Madura. Pasture generally sufficient, but scanty in parts of Anantapur, North Arcot, Trichinopoly, Mudura, Coimbatore, and Nilgiris, and decreasing in Vizagapatam and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 18th April, 1888.*—Slight rain in parts of Kurrachee and Dharwar. Standing crops in good condition. Cotton picking completed in Ahmedabad,—in progress in other parts in Guzerat and Southern Mahratta Country. Harvesting of late crops completed in Ahmedabad, Broach, and Belgaum,—still progressing in other districts. Ploughing operations for next season's crops in progress in Hyderabad, Upper Sind Frontier, Nasik, Thana, Kolaba, Ratnagiri, Poona, Ahmednagar, Sholapur, Satara, Bijapur, Belgaum, and Kathiawar. Probable outturn of cotton 7 annas, of wheat 9 annas in Surat. Cotton crops in Broach generally very poor.

Bengal.—*For week ending 17th April, 1888.*—No rain. Weather very hot and dry. Rain generally wanted. Cultivation of *autumn* crops and sowing of early rice and jute in progress. Spring rice is promising, and is being harvested in Orissa. Sugarcane is still being planted and irrigated, and is doing well. Indigo prospects favourable. *Mahua* crop yielding well throughout Chota Nagpur, except in parts; but the outturn is not good in the Sonthal Parganas. *Rabi* harvest is over, and threshing is going on. Opium weighments proceeding. A severe tornado passed through Dacca city on the 7th instant, causing considerable loss of life and property. Pressure in some parts of Manbhoom and Pooree, owing to partial failure of crops.

North-Western Provinces and Oudh.—*For week ending 18th April, 1888.*—Weather seasonable. Crops nearly all garnered. Markets well stocked. Prices generally steady. Condition of cattle generally good.

Punjab.—*For week ending 18th April, 1888.*—Slight rain has fallen at Rawalpindi and Peshawar. Prices are reported to be stationary in nine, and falling in three districts. *Kharif* ploughings, sugarcane weedings, and cotton sowings in progress. Harvesting of *rabi* crops commenced. *Rabi* prospects are reported good, except in Ferozepur and Peshawar, where they are average; no damage done to crops. Stock cattle are healthy. Fodder still scarce in some districts. Poppy crop reaped in Amritsar, and extraction of opium nearly completed in Sialkote.

Central Provinces.—*For week ending 18th April, 1888.*—Weather hot. Harvesting of winter crops continues in northern districts,—completed elsewhere. Threshing in progress, outturn good. Sugarcane flourishing.

Burma.—*For week ending 14th April, 1888.*—The prospects of the dry weather crops continue to be generally satisfactory, except in Myadaung, in some townships of which district the crop is said to be indifferent. The condition of agricultural stock is generally good. The price of paddy has risen in the Hanthawaddy, Bassein and Henzada districts of Lower Burma and in the Saigain and Meiktila of Upper Burma, and has fallen in Tharrawaddy and Prome districts of Lower Burma. The supply of grain is said to be somewhat short in Myadaung district.

Assam.—*For week ending 18th April, 1888.*—Weather hot and windy, and almost rainless in Lower Assam and the western hill districts. Seasonable rain in Upper Assam; much rain in Surma Valley. Tea operations progressing favourably. General prospects of crops good.

Mysore and Coorg.—*For week ending 18th April, 1888.*—Slight fall of rain in parts of Mysore, and smart showers at Bangalore on 17th. Standing crops reported to be in good condition. Outturn of harvests fair, and condition of cattle generally good.

Some rain in parts of North and West Coorg. More rain wanted to prove beneficial to coffee blossom.

Berar and Hyderabad.—*For week ending 18th April, 1888.*—In Berar weather warm and cloudy. Harvesting of *rabi* crops almost completed. Land is being prepared for the ensuing *kharif* crop. Agricultural stock generally in good condition. Fodder insufficient in Amraoti district. Prices stationary.

No rain in Hyderabad during week. Agricultural prospects continue fair. Prices are stationary.

Central India.—*For week ending 18th April, 1888.*—No changes since last week, except in Western Malwa, where agricultural operations are completed, and the condition of standing crops improved in Bhopawar.

Rajputana.—*For week ending 18th April, 1888.*—Agricultural operations satisfactory. Standing crops good and almost cut. Crop prospects and agricultural stock generally good. Pasturage or fodder fairly sufficient. Prices steady, and falling at many places. Opium almost collected.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 18th April, 1888.

The unsteady pressures and the slightly unsettled weather which have characterised the two past weeks have continued during that under review. The distribution of pressure and to a large extent the circulation of the wind have been more like that normally existing in the middle of May than that of the middle of April, gradients have been unusually steep, and the main low pressure area has been shown on most days over North-Western India instead of over Chutia Nagpur and the Central Provinces.

On the 12th the barometric depression over Sind, noticed at the close of the preceding Summary, was very strongly marked, and gradients on its southern side were steep. The depression was apparently spreading north-eastward over the Punjab, and the barometer was falling at the stations of Rawalpindi, Peshawar, and Murree, while it was rising elsewhere. A clearly defined cyclonic circulation of the winds existed over North-Western India—the force being considerable at the mouth of the Indus. Over the Central parts of the country and the northern parts of the Peninsula the wind was north-westerly to westerly, over the south of the Peninsula very variable, and over the Bay and Bengal southerly to south-westerly. The rainfall was slight, and was confined to Peshawar, Dhubri, Silchar, and the south of the Peninsula. Dusthaze and dust-storms were reported from a large part of North-Western India, and cloudy weather, with strong winds, from the head of the Bay, Eastern Bengal, and Arakan. Temperature had changed rather irregularly, but had risen generally over Upper and Central India and the south of the Peninsula. In the North-West Provinces and the east of the Punjab the rise had been large. Maxima exceeding 100° were reported from the great majority of inland stations, the highest being 110° at Nagpur and 108° at Raipur and Amraoti. On the 13th the depression over Sind was slowly filling up, and the cyclonic circulation of the winds in the North-West had almost disappeared. At the mouth of the Indus however the force of the wind continued high. The general directions of the wind in other parts of India were similar to those reported on the previous day. Rain was again reported from the extreme north of the Punjab and from Assam, but except at Kurnool the fall had ceased in the Peninsula. The thermometer, except in Bombay and Bengal, had generally decreased, and the maxima were rather lower than on the preceding day. By the morning of the 14th the depression over Sind had entirely disappeared, and the lowest pressures were shown over North Bengal and Behar, but a slight depression had appeared over the south-west of the Bay and was affecting the winds and weather over Ceylon and the south of the Peninsula. At Trichinopoly and Colombo rain had fallen heavily, and at Madras, Negapatam and Cochin lightly. The sky was cloudy to overcast over Madras, and there had been a brisk fall of temperature. The highest maximum reported was 108° at Cuttack, Amraoti, Hoshangabad, Nagpur, and Raipur. The Chart of the 14th showed that the depression over the south-west of the Bay was dispersing, but was giving showery weather to the whole of Southern India. Rain was also falling in Assam. The general distribution of pressure on this day was fairly normal and the wind circulation fairly regular. Temperature, except in the North-West, had generally decreased, and the maxima over the Peninsula were low compared with those of a few days previously. On the 16th the most important change in pressure was the appearance of a low pressure area over Sind and Baluchistan. Elsewhere the relative distribution was similar to that of the 15th. Rain still fell both in Assam and in the south of the Peninsula. Temperature had risen—more especially the maxima over North-Western India. The Chart of the 17th showed that the depression, over Sind had developed, and the wind at the mouth of the Indus increased in force. A large high pressure area overlay the Peninsula with a band of low pressures along the foot of the hills. Rain had fallen along the Arakan Coast, as well at Sibsagar and several Peninsula stations. Temperature had continued to rise—more particularly in the North-West, where

the mean temperature was a good deal above the average. The highest maximum reported was 113° at Jacobabad. On the 18th the depression over Sind had concentrated, and steep gradients accompanied with strong westerly winds prevailed between Kurrachee and Jacobabad. Slightly unsettled conditions still prevailed in the Peninsula, and rain was reported from the South Konkan Coast and from Wellington, Bangalore, and Cuddapah. In Arakan and Assam also rain continued. In Assam, Eastern Bengal, and at the head of the Bay the force of the wind was unusually high, but over the greater part of the country the general circulation was fairly normal. Over North-Western India there had been a further brisk rise of temperature, and the maxima were high generally for the season. Jacobabad reported a maximum of 113·7° and Nagpur of 111·2°.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burma ...	4	0·71
Bengal and Assam ...	5	16·23
North-Western Provinces and Oudh ...	0	0
Punjab ...	2	1·56
Hill Stations ...	2	0·33
Ceylon ...	2	16·41
Malabar Coast ...	5	3·35
Bombay ...	4	1·22
Berars and Central Provinces ...	0	0
Guzerat and Central India ...	0	0
Sind—Rajputana ...	0	0
Madras ...	7	3·96

(*i*) Return not received.
(*j*) Total receipts from 1st April, 1886, to 19th March, 1887.
(*k*) Total receipts from 1st April, 1887, to 17th March, 1888.
(*l*) Total receipts for six days, from 21st to 26th March, 1887.

SIMLA, *19th April, 1888.*

M. C. BRACKENBURY, *Major, R.E.,*
Under-Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 17.} CALCUTTA, SATURDAY, APRIL 28, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 25th April, 1888.

During the past week the distribution of pressure, the winds, and weather have been fairly constant throughout. Pressure has been high over the west and south of the Peninsula, relatively low over Western Bengal, and lowest along the foot of the North-West Himalaya. This distribution has been accompanied by the usual circulation of the air, but the south-westerly winds from the Bay into Bengal has been somewhat unusually strong, and the spring rainfall in East Bengal and Assam has been more than normally copious. In Ceylon the rainfall during the week has been so heavy and continuous as to lead to the supposition that it may be the *chota barsat*. If so, it is somewhat in advance of its usual date.

On the 19th the barometer was falling, except over North-Western and Central India. It was highest on the North Konkan Coast and relatively high in the north-west of the Punjab, lowest in the neighbourhood of Ludhiana and relatively low over Western Bengal. The weather was in a slightly unsettled state. Four stations in the Peninsula reported light showers, and general, though on the whole light, rain had fallen in Assam and Eastern Bengal. In the Punjab duststorms without rain occurred at several stations; and Murree had a light thundershower. On the 20th the only important change was over the Peninsula, where the weather had become much more unsettled, and showers were reported from the majority of stations. Probably largely due to this rainfall was the brisk fall of temperature which was shown over the Central Provinces, the Deccan, and Central India. In the Berars the fall exceeded 12° and at several stations amounted to more than 5°. Maxima exceeding 100° were numerous, the highest reported being 108°-8″ at Raipur. The reports of the 21st showed that rain had almost ceased in the Peninsula, but in Assam and East and Central Bengal moderate showers had fallen generally. Temperature changes were somewhat irregular, except in Bengal and Behar, where there was a fall. The highest maxima recorded were 108°-4″ at Jacobabad and 107°-6″ at Allahabad.

On the 22nd thunderstorms were again reported from several places in the Peninsula, and thundershowers and nor'-westers from Assam and Bengal. The amounts were nowhere very large, but the occurrence of the storms indicated a slightly disturbed condition of the atmosphere over a largish area. The Chart of the 23rd showed a small depression overlying the central districts of the Punjab, to the north of which slight rain was falling, while showers continued to fall both in Assam and in the Peninsula. On the 24th the lowest pressures were transferred from Upper India to the east of the North-Western Provinces. Rain still fell at the majority of stations in the Punjab, as well as over Assam and East and North Bengal. On the 25th rain had almost ceased in Upper India, but in North-Eastern India both the amount and area of the rainfall had increased. During the whole week strong southerly winds were experienced at the head of the Bay. On the last few days of the week temperature generally decreased in Northern India and increased in the Peninsula, the

changes on some occasions being large, the final results being that at the close of the week the maxima over the greater part of the country were generally lower than they had been at the beginning.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burma ...	2	0·21
Bengal and Assam ...	11	2·45
North-Western Provinces and Oudh ...	3	0·56
Punjab ...	4	0·23

W. L. DALLAS,

SIMLA, *27th April, 1888.* for *Offg. Meteorological Reporter to the Government of India.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 21st April, 1888.*—Moderate rain in all districts, except Madras and Chingleput. More rain wanted in Ganjam, Vizagapatam, Cuddapah, North Arcot, Madura, Tinnevelly, Coimbatore, and Salem. Crops generally good, but withering in parts of Anantapur and Madura. Paddy damaged by hailstones in Anantapur. Pasture generally sufficient, but scanty in Malabar and in parts of Cuddapah, Anantapur, North Arcot, Trichinopoly, Madura, Coimbatore, and Nilgiris, and decreasing in Vizagapatam and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 25th April, 1888.*—Rain in parts of Ratnagiri, Poona, Ahmednagar, Sholapur, Belgaum, Dharwar, and Kanara,—beneficial to agricultural operations in Belgaum, but injurious to cotton in Dharwar. Standing crops in good condition. Cotton picking in progress in parts of Kaira, Bijapur, Belgaum, and Dharwar. Harvesting of late crops completed in Surat and Bijapur,—still progressing in some districts. Ploughing operations for next season's crop in progress in Hyderabad, Upper Sind Frontier, Broach, Nasik, Thana, Kolaba, Ratnagiri, Poona, Sholapur, Satara, Bijapur, and Kathiawar, and sowing commenced in Kurrachee. Probable outturn of late crops 13 annas in Shikarpur.

Bengal.—*For week ending 24th April, 1888.*—Considerable rain throughout Eastern and Central Bengal and in parts of Northern Bengal; light showers in Western Bengal; a heavy shower in Purneah on the 23rd; no rain throughout the remainder of the Province. Rain very beneficial to cultivation of early rice and jute. Rain wanted in Burdwan, Rajshahye, Bhagalpur, and Orissa Divisions. Spring rice harvest begun, good outturn expected. Sugarcane and indigo doing well. *Rabi* threshing and opium weighments still proceeding. *Mahua* is a good crop in Chota Nagpur, except in parts; but a bad crop in Sonthal Parganas. No material change in price of rice during last fortnight. Common rice cheaper than last year in Eastern Bengal and Orissa, but dearer almost elsewhere. Distress in Pooree no longer apprehended.

North-Western Provinces and Oudh.—*For week ending 24th April, 1888.*—The weather is hot and in some districts cloudy, with easterly winds. The harvest is almost over, and the outturn is good. Tobacco, indigo, and sugarcane are being irrigated. The supply of foodgrains is sufficient. Prices are steady, with slight fluctuations. The condition of cattle is generally good.

Punjab.—*For week ending 25th April, 1888.*—Slight rain at Peshawar. In most districts prices are stationary and in a few falling. *Kharif* ploughings and sugarcane and cotton weedings in progress. Harvesting and threshing of *rabi* crops also in progress. *Rabi* prospects are reported good, except in Jullundur, Rawalpindi, and Peshawar, where they are average. No damage done to crops. Stock cattle are reported healthy. Fodder still scarce in some districts. Poppy crops reaped in Jullundur and Amritsar. Extraction of opium progressing in Sialkote. Produce is reported small from Rawalpindi.

Central Provinces.—*For week ending 25th April, 1888.*—Weather hot, with little rain in Seoni, Hoshangabad, and Nagpur. Threshing and winnowing of wheat in progress and other winter crops continue good. Ploughing for autumn crops commenced in places. Sugarcane thriving. Cattle in fair condition, but grass is becoming scarce.

Burma.—*For week ending 21st April, 1888.*—The prospects of the dry weather crops continue to be generally satisfactory, except that the rice in the

south-west of the Shwebo district of Upper Burma has been damaged by the gale and hail. There was a considerable fall of rain in the Mandalay, Shwebo, Yeu, Sagaing, Pagan, Minbu, and Myadaung districts, and a slight fall in four other districts in Upper Burma and in five districts of Lower Burma. Except in Shwebo crops are not affected by this rain, so far as is yet known. The price of paddy has risen in Pegu, Tharrawaddy, Henzada, Amherst, Kyaukse, Meiktila, and Taungdwingyi districts, and has fallen in the Myingyan district.

Assam.—*For week ending 25th April, 1888.*—Favourable rain all over Province, except in the Garo Hills, where fall has been insufficient, and in Sylhet, where it was excessive. Drought has done harm in former district, and floods are feared in latter. Sugarcane planting continues. Prospects of crops good. Tea doing well.

Mysore and Coorg.—*For week ending 25th April, 1888.*—Rainfall good throughout the State. Standing crops reported to be in good condition. Out-turn of harvests fair. Condition of cattle generally good.

There has been a little rain in Coorg, but in South Coorg it has been insufficient for the coffee blossoms.

Berar and Hyderabad.—*For week ending 25th April, 1888.*—Weather warm and sometimes cloudy. Cultivators busily engaged in preparation of the land for ensuing season. Agricultural stock in good condition. Fodder is sufficient in Amraoti and Basim districts. No marked change in prices.

Some rain has fallen at Hyderabad during the week. Agricultural prospects continue fair. Prices stationary.

Central India.—*For week ending 25th April, 1888.*—Few showers during the week in Gwalior. No other changes since the last report, except in Bhopal and Bhopawar, where prices of foodgrains are reported to be rising.

Rajputana.—*For week ending 25th April, 1888.*—Some rain at Jeypore. Agricultural operations satisfactory. Standing crops almost harvested. Crop prospects and agricultural stock generally good. Pasturage or fodder fairly sufficient. Prices steady, and falling at places. Opium collected.

Nepal.—*For week ending 19th April, 1888.*—No rain; but it is needed. Harvesting of potatoes commenced in the Valley.

E. C. BUCK,
Secretary to the Government of India.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 2nd May, 1888.

All over Northern India during the past week the weather has been in an unsettled state. The principal foci of disturbance have been Assam and Bengal on the one hand, and the Punjab and Rajputana on the other, but the intermediate region comprising the North-Western Provinces, Oudh, Rohilkhand and part of Central India, though less constantly disturbed than the districts to the East and West, has been by no means settled; and on the evening of the 30th April a storm, apparently a severe example of the nor-'wester type, crossed the upper part of the North-Western Provinces. It gave rain to Bareilly, Meerut, Roorkee, and the whole of that part of the North-Western Provinces; but as the direct course of the storm did not cross any of the meteorological stations, there is no indication in the Report of winds of the force of those experienced at Moradabad.

On the 26th pressure was lowest over Sind, the Central Punjab, and the upper part of the North-Western Provinces; relatively low over the east of the Central Provinces, Chutia-Nagpur, the Circars, and Orissa. It was high both on the West Coast and in Upper Assam; and gradients were unusually steep over Guzerat and Sind. Strongish winds prevailed over the head of the Bay and poured much moisture into North-Eastern India, so that overcast skies and rain were reported from Arakan, Assam, and Bengal. Strong westerly to north-westerly winds prevailed over the whole of Western India. Temperature had decreased, except in the Punjab and Rajputana and at some stations in the South. In Bengal and the Central Provinces the fall was large. The maxima were nowhere excessive, the highest being 110° at Jacobabad and 107° at Nagpur. The Chart of the 27th showed little or no alteration in the general features of the weather, but a considerable increase of heat had occurred over a large part of India. Cloud and rain continued over Arakan, Assam, and Bengal, but elsewhere the weather was fine. The maximum

temperatures were higher than those of the previous day, Jacobabad registering 113°, Cuddapah 110°, and Kurnool 109°. On the 28th the barometer was falling briskly in the Punjab, and a low pressure area had been formed along the foot of the hills, extending from Roorkee to Sialkot. There was a good deal of irregular wind movement about this centre of depression. Elsewhere the wind directions were unchanged. Much cloud prevailed over North-Eastern India and the Eastern Peninsula, and moderate showers and thunderstorms were reported from that region. Temperature changes were generally moderate or small, but the maxima had fallen again. On the 29th pressure was giving way everywhere, and the Punjab depression had intensified and extended southward. A strong westerly to north-westerly wind prevailed over Western and Central India, and temperature had very generally increased. Slight rain had fallen at Delhi, and the sky was clouding over in Upper India. In Eastern India the area of rainfall had contracted. On the following day, the 30th, pressure had again fallen—most in the Punjab and Sind—and the range between the Peninsula and the Punjab was unusually large for the time of year. Strong westerly to north-westerly winds continued over Western and Central India, while the southerly winds from the Bay remaining strong gave general rain and cloud to Bengal, Assam, and Arakan. Temperature showed a general inclination to fall. The Chart of the 1st showed that, while the barometer had risen over the greater part of the country, it had fallen over the Punjab, and that consequently the depression over the Punjab had considerably intensified. Gradients were exceptionally steep for the season over India, and the winds very strong in nearly all parts of the country. Over North-Western India there was a general indraught towards the Punjab depression. Temperature had fallen, and the sky was overcast over a large part of Northern India. Rain was reported from Murree, Sialkot, and Simla, and a line of rainfall extending from Mussoorie to Delhi and Bareilly probably marked out the region affected by the storm noticed above. A few showers were reported from Bengal. On the 2nd the barometer was rising, except in Assam and Burmah. In the Punjab the rise had been very rapid, and the depression over that Province had almost filled up. There was, however, a strong indraught of wind towards the depression, and rain had fallen on its eastern and northern sides. Strong north-westerly and westerly winds had set in at the Indus Valley stations, indicating a strong flow of air from Afghanistan into the Punjab, Sind, &c. Accompanying this inflow of air from Afghanistan was a brisk fall of temperature and a great decrease of humidity. Numerous duststorms and thunderstorms had occurred over Northern India, and some local showers in the extreme south of the Peninsula.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.		No. of Stations.	Total Rainfall.
Burmah	...	4	5·37
Bengal and Assam	...	14	27·00
North-Western Provinces and Oudh	...	4	2·38
Punjab	...	3	2·54
Hill Stations	...	5	4·79
Ceylon	...	1	0·03

W. L. DALLAS,

SIMLA, *4th May, 1888.* for *Offg. Meteorological Reporter to the Government of India.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 28th April, 1888.*—Moderate rain in all districts, except Madras, Chingleput, South Arcot, and Travancore. Crops generally good. Pasture generally sufficient, but scanty in Malabar and in parts of Anantapur, North Arcot, Trichinopoly, Madura, and Coimbatore, and decreasing in Vizagapatam and Salem. Prices of paddy and *cholum* slightly rising where not stationary. General prospects favourable.

Bombay.—*For week ending 2nd May, 1888.*—Rain in parts of Kurrachee, Sholapur, Belgaum, and Dharwar. Standing crops in good condition. Cotton picking in progress in parts of Kaira, Bijapur, Belgaum, and Dharwar. Harvesting of late crops completed in Ratnagiri,—still progressing in Shikarpur, Hyderabad, Upper Sind Frontier, Poona, Nasik, and Khandesh. Ploughing operations for next season's crops in progress generally throughout the Presidency.

Bengal.—*For week ending 1st May, 1888.*—Good general rain fell in Bengal and North Behar, while showers are reported in Sonthal Parganas, Balasore, and Manbhum districts. Weather still unsettled, and more rain expected. Ploughing and early sowings are proceeding; but in Orissa, Chota Nagpur, and South Behar rain is wanted. Prospects of indigo, *cheena*, and sugarcane are favourable. Sugarcane planting still in progress in some districts. Spring rice harvesting has begun, and promises to yield a good outturn. *Rabi* threshing is almost over, with a fair outturn generally. A severe tornado visited Bhudressur and adjacent villages in Hooghly district on the 27th April, causing much damage to property and some loss of life.

North-Western Provinces and Oudh.—*For week ending 2nd May, 1888.*—The weather is generally hot and cloudy, with easterly winds. Storms have occurred at Moradabad and Meerut, and in Jhansi and Kumaon the rain which is falling is said to have injured ungathered crops. Summer crops are being irrigated. Markets are well supplied, and prices of foodgrains are steady. The condition of cattle is generally good.

Punjab.—*For week ending 2nd May, 1888.*—Slight rain has fallen at Delhi, Ferozepore, and Rawalpindi; weather threatening, and heavy duststorm on 1st May at Lahore. Prices are falling in five and stationary in eight districts. Harvesting and threshing of *rabi* crops going on. *Kharif* ploughings and sugarcane and cotton weedings in progress. *Rabi* prospects are reported good to average. No damage done to crops. Stock cattle are reported healthy. Fodder still scarce in some districts. Poppy crops reaped in Jullundur. Produce small in Rawalpindi.

Central Provinces.—*For week ending 2nd May, 1888.*—Weather hot and windy. Threshing and winnowing of winter crops nearly completed, outturn good. Land is being prepared for autumn sowings. Sugarcane thriving.

Burma.—No report received.

Assam.—*For week ending 2nd May, 1888.*—Rainfall seasonable in Brahmaputra Valley and Hill districts. Fall somewhat excessive in Surma Valley, where some harm has been done. Land being ploughed for late rice. Potatoes doing well in Khasia Hills. Prospects of standing crops good.

Mysore and Coorg.—*For week ending 2nd May, 1888.*—Rainfall good in Shimoga and Kadur districts, and slight in other parts in Kolar district.

Crops are suffering from want of water; elsewhere they are reported to be in good condition. Sugarcane planted in parts of the Bangalore districts. Outturn of harvests favourable.

Rainfall slight in Coorg. Want of more rain for coffee blossoms much felt.

Berar and Hyderabad.—*For week ending 2nd May, 1888.*—In Berar the weather is warm. Cultivators busily engaged in preparation of crops. Agricultural stock in good condition. Fodder insufficient in Amraoti and some districts. No marked change in prices.

In Hyderabad there was slight rain during the week. Agricultural prospects continue fair. Prices stationary.

Central India.—*For week ending 2nd May, 1888.*—Rain in Bhopawar and in Neemuch. Agricultural operations completed, except in Goona. Condition of agricultural stock in Bhopawar reported fair this week. Prices of food-grains are rising in Baghelkand, and are steady in Goona. No other changes since the last report.

Rajputana.—*For week ending 2nd May, 1888.*—Agricultural operations satisfactory. Standing crops almost harvested. Crop prospects and agricultural stock good generally. Fodder fairly sufficient. Prices steady generally.

Nepal.—*For week ending 26th April, 1888.*—Some rain, with hailstorm. Indian corn is being sown.

E. C. BUCK,
Secretary to the Government of India.

Under-Secretar

SIMLA, *3rd May, 1888.*

SUPPLEMENT TO

The Gazette of India.

No. 19.} CALCUTTA, SATURDAY, MAY 12, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRESS, *Simla.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 9th May, 1888.

The unsettled weather, which prevailed over Northern India during the previous week, continued for some days into the week under review, but after the 5th the distribution of pressure changed and conditions became more normal. With this change of conditions the cold wave which had affected a large part of India gradually diminished in intensity, and temperature increased, though the weather was at no time hot for the time of year over Central and Northern India. The mean temperature of the whole of India was 4° higher at the close of the present week than it was at the close of the preceding.

On the 3rd pressure was giving way rapidly over the whole of the Himalayan region—more especially in the Punjab, where a well marked depression was shown. The lowest pressure on the plains was reported from Sialkot, but the disturbance appears to have been most intense in the hills; and strong gales were reported from Murree and Simla and strong winds from the other hill stations. The outflow of air from Afghanistan, &c., noticed in the preceding week, continued, and hence relatively cool and very dry weather prevailed over a large part of Northern and Central India. The region of highest temperature was the Deccan and Central Provinces, where Cuddapah registered a maximum of 110·8° and Nagpur of 110·2°. The rainfall was less extensive and less heavy than for some days past. Duststorms were common throughout the Punjab and thunderstorms and slight rain in Burma and Assam. The Chart of the following day, the 4th, showed a brisk barometric rise on the Punjab plains and that the depression, noticed on the previous day, had almost disappeared, but, as pressure was still giving way in the hills, it appeared as though the weather was still disturbed in the interior. Slight rain had also fallen at Mussoorie, Chakrata, and Simla. The weather generally had improved, the air had become drier and temperature had fallen. The Deccan remained the hottest part of the Indian region. On the 5th pressure was increasing, except in parts of the Peninsula. The distribution was assuming a fairly normal form, the differences becoming much slighter. The depression in Upper India had completely filled up, and pressure was lowest at the foot of the Sikkim Himalayas. Temperature had again fallen over a large part of North-Western and Central India, and the maximum readings over the Punjab were from 20° to 30° lower than they were on the same date last year. The Chart of the 6th showed very uniform pressures over India. It was slightly higher in the Gulf of Martaban than elsewhere and slightly lower over Chutia Nagpur and adjacent districts. With this increase of uniformity came considerably diminished wind movement, and hence a fairly general increase of temperature, though readings were still below the average of the time of year. The Deccan remained the hottest part of the Indian region. On the following day, the 7th, pressure had become even more uniform, and the winds were consequently exceedingly light and variable. In Upper India there was a further increase of temperature. Thundershowers were reported from several stations in Bengal and Assam. There was no change on the 8th in the general distribution of pressure; the winds remained light and unsteady, and there had occurred a further rise of temperature in Upper India, so that the mean temperature of all parts of India had become fairly uniform, though the Deccan and Central Provinces continued to report the highest day temperatures. Moderate or slight showers of rain were reported from Assam, Central Bengal, Lower Pegu, and Southern India, and a sharp gale of wind was reported from Dacca. Notwithstanding a general barometric fall on the 9th, the general character of the pressure distribution remained unchanged. The winds remained very light and unsteady, and temperature continued to increase steadily over Upper and Central India. The weather was cloudy with some rain in parts of Southern India, but was fine and dry, and still relatively cool elsewhere.

No rain occurred during the week in the North-Western Provinces, Bombay, the Central parts of the country, Sind or Rajputana, and in the Punjab the total

fall was insignificant. In Bengal and Assam and in Ceylon, on the contrary, the rainfall was rather heavy.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burmah ...	4	1·07
Bengal and Assam ...	7	10·15
North-Western Provinces and Oudh ...	0	0
Punjab ...	2	0·14
Hill Stations ...	5	0·26
Ceylon ...	2	4·67
Malabar Coast ...	3	1·90
Bombay ...	0	0
Berars and Central Provinces ...	0	0
Guzerat and Central India ...	0	0
Sind—Rajputana ...	0	0
Madras ...	5	2·04

W. L. DALLAS,

SIMLA, *10th May, 1888.* for *Offg. Meteorological Reporter to the Government of India.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 5th May, 1888.*—Slight rain in thirteen districts. Rainfall slight, and more wanted in Vizagapatam, Cuddapah, South Arcot, Trichinopoly, Tinnevelly, Nilgiris, and Salem. Crops generally good, but black paddy damaged from want of rain in Vizagapatam. Pasture generally sufficient, but scanty in Malabar and in parts of Cuddapah, Anantapur, North Arcot, Trichinopoly, and Madura, and decreasing in Vizagapatam and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 9th May, 1888.*—Condition of standing crops good. Cotton picking progressing in parts of Kaira and Dharwar. Harvesting of late crops completed in Poona,—continues in Shikarpur, Hyderabad, Upper Sind Frontier, Khandesh, Nasik, and Dharwar. Ploughing for next season's crops progressing in most districts. Scarcity of fodder in parts of Dharwar, Ratnagiri, Surat, and Kathiawar.

Bengal.—*For week ending 8th May, 1888.*—Light showers reported throughout Bengal Proper and in parts of Chota Nagpur, while Behar and Orissa had no rain. Ploughing and sowing are well forward; but in Orissa and in places in the Bhagalpur Division rain is much wanted. Indigo and sugarcane are doing well. Spring rice is being harvested, and has suffered from previous week's excessive rain in Dacca and Mymensingh. No marked fluctuation in the price of common rice during the past fortnight.

North-Western Provinces and Oudh.—*For week ending 9th May, 1888.*—There were severe storms in the Sitapur and Saharanpur districts on the 1st. The weather now is exceptionally cool. The *rabi* harvest is nearly over. Some loss of crops has resulted from the recent storms in Bareilly, Moradabad, and Kumaon. Foodstocks are sufficient. Prices are slightly fluctuating. General condition of agricultural stock is satisfactory.

Punjab.—*For week ending 9th May, 1888.*—Slight rain has fallen in some districts. Heavy duststorm, followed by hail, on 1st and 2nd May at Delhi and Sialkot. Prices are somewhat unsettled; a rise is reported from two districts only; the general tendency is towards a slow fall. Harvesting and threshing of *rabi* crops going on. *Kharif* ploughings and sugarcane and cotton weedings in progress. *Rabi* prospects are reported good to average. Wheat slightly injured by recent storms at Sialkot and Ferozepore. Stock cattle are reported healthy. Fodder still scarce in some districts, but generally sufficient. Opium produce small in Rawalpindi. Poppy not ripe yet at Peshawar.

Central Provinces.—*For week ending 9th May, 1888.*—Weather hot. Threshing and winnowing of winter crops nearly completed. Ground being prepared for autumn sowings. Sugarcane thriving. Cattle generally in good condition. There is a scarcity of water in the northern parts of Sambalpur.

Burma.—*For week ending 28th April, 1888.*—The dry weather crops seem to continue doing well. Slight rain has fallen in most districts of Upper Burma and in several districts of Lower Burma. No damage to crops reported. Price of paddy has risen in Henzada, Thayetmyo, Tounghoo, Bhamo, Kyaukse, and Myingyan districts, and has fallen in Bassein district.

For week ending 5th May, 1888.—The dry weather crops are reported to be suffering from want of rain. In Bhamo a twelve-anna crop is still expected, and also in Kyaukse, where the crop has in parts been damaged, owing to want of water. Elsewhere crops are generally doing well. Ploughing for wet

weather crops has already commenced. Rain fell in several districts in Lower Burma, but in Upper Burma only in three districts, and there the fall was very slight. The price of paddy has not risen in any district of Upper Burma, and has fallen in Myadaung and Pyinmana in Lower Burma.

The price of paddy has risen in Pegu, Prome, and Thongwa, and has fallen at Henzada and Thayetmyo.

Assam.—*For week ending 9th May, 1888.*—In Lower Assam, Hill Districts, and Cachar weather seasonable, and prospects of crops good. In Upper Assam and Sylhet excessive rainfall has done harm. Tea suffering from blight in Lakhimpore.

Mysore and Coorg.—*For week ending 9th May, 1888.*—Rainfall slight in the civil and military station. Standing crops in good condition, except in parts of the Mysore, Tumkur, and Kolar districts, where they are reported to be suffering from want of water. Sowing operations in progress throughout the State. Outturn of harvests fair. Condition of cattle generally good. Supply of water and fodder diminishing in parts of Mysore and Hassan districts.

No rain in Coorg. Coffee crop seriously affected owing to want of rain.

Berar and Hyderabad.—*For week ending 9th May, 1888.*—Weather clear and warm. Land is being prepared for *kharif* crop. Agricultural stock in good condition. Fodder insufficient in Amraoti and Woon districts. No marked change in prices.

No rain in Hyderabad during week. Agricultural prospects good. Prices stationary.

Central India.—*For week ending 9th May, 1888.*—The only changes since last report are in Baghelkand and Bhopawar, where prices of foodgrains are reported steady.

Rajputana.—*For week ending 9th May, 1888.*—Slight rain at Bickaneer. Agricultural operations satisfactory. Standing crops almost harvested. Crop prospects and agricultural stock generally good. Pasturage or fodder sufficient. Prices steady generally; fluctuating at places.

Nepal.—*For week ending 3rd May, 1888.*—Some rain and thunderstorm during week. Prospects fair.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

Calcutta, 16th May, 1888.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Memorandum on the Snow-fall in the mountain districts bordering Northern India, and the abnormal features of the weather in India during the preceding five months.

The following preliminary note and forecast has been prepared earlier than usual, at the request of the Government of India, with the object of stating the chief indications of the character of the approaching monsoon so far as they can be inferred from the observations recorded up to date. It will be followed in the beginning of June by a final forecast based on the information of snowfall on the Himalayas during the months of April and May and the meteorological observations of the month of May.

It may be premised that the strength and extension of the south-west monsoon current in India appear to depend mainly upon three factors :—

1st—The amount of snowfall and the period of its occurrence in the northern mountain districts of India.

2nd—The local peculiarities of the weather in India itself immediately antecedent to the rains, and mainly impressed upon it during the preceding hot weather. These are chiefly measured by the local variations of pressure from the mean.

3rd—Local peculiarities in the Bay of Bengal and Arabian Sea over which the monsoon current passes before it reaches India.

The first factor appears to be mainly influential in determining the northward limits of the monsoon rains, heavy and prolonged snowfall in the Himalayas either delaying or preventing the extension of the monsoon current over Upper India during the rainy season. Several examples have occurred in recent years as in 1877 and 1878.

The second factor appears to determine those large local, district and provincial variations of rainfall during the monsoon, which are evidently due to local conditions and peculiarities and not to general causes such as heavy snowfall over the whole Himalayan area or variations in the number of sun-spots. The excessive rainfall in the Central Provinces, and at Delhi, Agra, Jhansi and Jeypore last year are examples.

The third and last factor is of equal importance with the preceding, but it is that on which information is least in amount and is longest in being received. For example, last year the conditions in Upper India were favourable to a strong monsoon current from the Bay. It, however, proved to be somewhat weaker than usual in Bengal and Northern India; but from the opinions of captains of steamers navigating the Bay, and the commanders of the Light vessels at the head of the Bay, the monsoon was almost certainly stronger in the Bay itself, with more rainfall at sea and in the south of the Bay, than usual.

In the present note it is only possible to state the snowfall conditions in the mountain districts of Northern India and the abnormal features (chiefly of pressure) in India itself, up to the end of April.

Summary of snowfall information.—The information, although scanty, appears sufficient to give a fairly correct view of the snowfall of the past winter.

Over the greater part of the Afghan Highlands the snowfall appears to have been either normal or less in amount than usual, except in the Spinghar and Safed Koh mountain districts, where very heavy snow seems to have fallen at the end of January and in February; and the snowfall in that area is said to have been much heavier than that of last year. Both March and April were not dry months and the snow rapidly melted, but there was a large accumulation still on the Safed Koh at the end of April. There was, however, a marked absence of north-west winds in Upper India, which was almost certainly due to the general small snowfall of the past winter.

The snowfall over the Western Himalayas was unusually small in amount previous to the last week of March; much snow fell between that date and the 1st of May in some parts, as, for example, Kailang and Leh. It was probably more or less local, as the latest accounts appear to establish that the amount of snow lying on the higher elevations is smaller than usual. The passes in Kulu and Plach (if the reported depths be assumed to be approximately correct) had much less snow at the end of March 1888 than last year at the same date. It is almost certain that less snow has fallen than usual during the past winter over the North-Western Himalayas; and hence the thickness of snow on the higher elevations has almost certainly diminished during the past two mild winters.

The accounts of the snowfall on the Eastern Himalayas proves that to the north of Assam smaller amounts have fallen than last year, so far as can be judged. The total snowfall was nevertheless either normal or slightly in excess of the average.

To sum up. The snowfall on the Eastern Himalayas was normal, and on the North-Western Himalayas and the Afghan mountains very considerably below the average, except locally in the Safed Koh and Shutargardan. It thus agrees most closely with the snowfall distribution of the winter of 1885-86 and to a less extent with that of last year. It differs considerably from that of 1883-84 (for which the reports were first received) and of 1884-85.

The preceding statement is based on the snowfall reports which have been received up to the present date, and are summarized for reference in the following paragraphs:

I.—AFGHAN HIGHLANDS.

(a) Hills west of Dera Ismail Khan.

The Deputy Commissioner, Dera Ismail Khan, thus describes the snowfall in the ranges to the west of the Indus in that district:

"The season was dry up to the end of January, and there was no snow in the ranges west of the district. The temperature was higher than in January 1887. The season was marked by a total absence of the high and cold winds from the North-West which were so prevalent in the preceding year.

"Towards the end of January a heavy fall of snow took place on the hills of the Mahsud country and on the Suleiman Range. This snow remained on the ranges until about the middle of February, when it rapidly disappeared. Notwithstanding this fall, the cold was less than usual, owing to the absence of wind."

(b) Hills west of Kohat.

The Assistant Commissioner, Thall outpost, has sent the following important information through the Deputy Commissioner, Kohat District, respecting the snowfall on the Safed Koh and neighbouring mountains:

December 1887.—The first snow of the season fell on the Spinghar and the adjacent country, including Paiwar, Shalozan, Zeran, &c. The depth of the snowfall was about 2 feet.

January.—Good snow fell on the Zawa or Zaimusht Hills, the Samana Range and other high mountains on the 11th, 21st and 22nd, and the 25th and 26th.

February.—Snow fell on the 3rd and 4th, the 12th and 20th on the Samana and other Terah Mountains. About 2 feet fell on the 3rd on the Samana Range.

March.—No snowfall occurred on the Spinghar, &c., during the month. Information was received during the month that there was plenty of snow on the Safed Koh. It was lying from 15 to 20 feet deep on the highest ranges and extended low down to the Peiwar Kotal and close to Malana and other villages lying along the foot of the range. The snowfall in these mountain districts has been a good deal heavier than that of last year. No snow fell on the Terah hills during the month.

April.—No snow fell on the Spinghar or neighbouring mountains during the month. The snow was melting fast at the end of the month, but shewed no appreciable change of appearance on the higher elevated districts, which were still well covered. No snow fell on the Terah hills.

(c) Hill district west of Peshawar:

The Political Officer, Khyber Pass, contributes the following information respecting the snowfall in the mountain district to the west of Peshawar:

January.—Heavy rain fell in the Khyber and Terah hills at different intervals. Four inches of snow fell at Landi Kotal. The Torsappar, Lakka and surrounding hills were covered with snow, and the fall was stated to be about 2 feet. In Terah it was reported to be about 3 feet.

February.—Rain fell in the Khyber and Tartarra hills, but very little snow. In Terah the fall was about 4 feet and more. The total snowfall on the hills adjacent to the Yusafzai sub-division for the months of January and February varied between 2 and 3 feet.

March.—No snow is reported from these districts in March.

II.—THE HIMALAYAS.

I.—The Punjab and Cashmere Himalayas.

(a) *Leh.*—The information of the snowfall in this district was furnished by the Reverend Mr. Redslob, Missionary and Superintendent of the Meteorological Observatory. He states that the weather has been throughout more wet than usual. Snow fell in the latter part of February and in March, but it did not exceed the average, and was not sufficient in amount to prevent Mr. Dalgleish crossing the Nubra range on the 20th March. Beyond the Nubra range the snow is much less compared with what it is in the lower part of the Indus Valley.

(b) *Murree.*—The following gives the monthly snowfall at Murree and on the hills adjacent to Kahuta during the past winter:

	Murree. Inches.	Kahuta. Inches.	Days on which snow fell.
January	55	42	... 12th, 21st, 22nd, 23rd, 25th, 26th and 27th.
February	22	30	... 8th, 12th, 13th, 19th and 26th.
March	*Nil*	*Nil*	
April	*Nil*	*Nil*	

(c) *Lahoul.*—The Reverend A. W. Heyde sends the following interesting notes of the weather and snowfall last winter at Kailang and on the adjacent hills:

January.—From the beginning of October to the 23rd of January hardly any snow fell. Six inches were recorded on the 23rd, 25th and 26th. Hence the season has been very mild hitherto.

February.—A total of 2 feet fell in the valley during this month. It fell on the 3rd, 5th and the 9th, 19th, 21st, 26th and 27th, but on no occasion was the fall heavy. There is hence much less snow on the high hills than was the case last February.

There are no snow bridges over the river at Koksar and elsewhere which at this time of the year are scarcely ever wanting. This is proof of the absence of avalanches and therefore of the smallness of the snowfall in the higher regions.

March.—A foot of snow fell on the 12th and 13th, but the weather was fine and mild until the 24th, when it became unsettled.

April has been remarkable for much snow and rain. From the 26th March to the 1st of May about 5 feet of snow have fallen in the valley. On the higher hills surrounding Kailang at least 10 feet and probably 15 feet have fallen. The natives say that when one foot falls in the valley three usually

fall on the passes. The weather is still quite unsettled and wet. The hill men had commenced to plough their fields, but have had to give up for the present on account of the rain and snow which is almost incessantly falling.

(*d*) *Kangra and Kulu.*—The Assistant Commissioner, Kulu, gives the following as the reported depths of the snow at the end of each month on the chief passes in the Kulu and Plach districts:

Kulu District.

Name of Pass.	Height.	Depth of snow at end of		
		January.	February.	March.
Rotang	13,000 ft.	12	19	12
Hamta	14,500 ft.	12	17	9½

The Assistant Commissioner also contributes the following interesting notes on the snowfall and weather.

January.—The first important fall of the season occurred on 30th December, and extended down to an elevation of 4,000 feet. No snow had fallen below 10,000 feet previously. The Rotang and Hamta passes were closed by this fall

for the winter. Below 6,500 feet the snow rapidly melted. Fine clear weather followed until the, 22nd of January. An unusually heavy fall commenced which lasted almost without intermission for four days and filled the valley. The Bubu, Jalori and Basleo passes were closed by this fall. At the end of the month the snow had melted up to a height of about 5,000 feet.

February.—The Rotang, Hamta and Bubu passes were closed during the month and the Jalori and Basleo were only passable occasionally to hill men without luggage. There were several falls during the month on the higher ranges, but only three below 6,000 feet. Towards the end of the month heavy rain fell, melting all the snow below 6,000 feet; and the weather became mild and comparatively warm.

March.—The weather was mild and clear throughout the month up to the 26th, when snow fell down to 6,000 feet and rain below. The snow speedily melted. At the beginning of April there was little snow below 10,000 feet.

II.—North-Western Provinces Himalayas.

The accounts from this area are very brief and scanty.

Gurhwal.—A few inches of snow fell in the Himalayan districts on the 25th and 26th of January.

Naini Tal.—Two feet fell in five days in January, *viz.*, the 22nd, 23rd and 25th, 26th and 29th.

Mussooree.—About 16 inches fell during the winter, of which 15 inches fell on the 26th January.

III.—Assam Himalayas.

The Deputy Commissioner of the Kamrup District states that, from enquiries made while at Dewangiri, it was ascertained that the fall of snow was somewhat less than that of the previous year, although it was above the average of former years.

The Deputy Commissioner reports that Mr. Needham, Political Officer, Sadiya, is of opinion that less snow fell in the cold weather of 1887-88 than in the preceding winter. He also points out the difficulty in obtaining exact and reliable information from the hill men, but adds that he is inclined to believe that less snow has fallen, as the snow-clad ranges seen from Dibrugarh and elsewhere in the district appear to be of smaller extent than last year.

The Deputy Commissioner, Darrang District, states, as the result of his enquiries from the different hill tribes and the sub-divisional officers, that the snowfall was less this winter than last. The Chardwar Bhutia Sub Rajahs were hence enabled to come down earlier in consequence.

Abnormal features of pressure in India during the past four months.—During the cold weather months of January and February the pressure variations were small and did not exceed ·02″ in any part of India. Pressure was above the average in both Northern and Southern India; a belt of low pressure ran across the Peninsula, corresponding with the tracks of the majority of the cold weather storms.

The commencement of the hot weather speedily altered the pressure variations. Temperature increased very rapidly, and at the end of April it was from 2° to 6° above the average. The following are the pressure variations caused by the temperature conditions of March and April:

(*a*) Pressure fell rapidly in Northern India, and at the end of April was below the average over the whole of Northern India to the north of a line joining Kurrachee to Akyab. The variations for the month of April increased from —·015″ in East Bengal to —·045″ in the Central Punjab.

This, it may be noted, is the distribution of pressure which ordinarily accompanies unusually dry hot weather in March and April and follows deficient snowfall in the Himalayas.

(*b*) Pressure was above the normal over the rest of India. The increase is small and probably unimportant in Burmah, North Madras and the Central Provinces. It exceeds ·025″ over the western half of the Peninsula and is unusually large over a belt of country to the east of the Western Ghâts stretching from Malegaon to Bellary. The anomalies for the month of April at all stations in this belt exceed ·05″. They are largest for Poona (·07″) and Belgaum (·09″).

(*c*) It is probable that the pressure relations established in March and April are unaltered in character at the present time (16th May). The prolonged heat of March and April was followed by stormy weather in the first week of May in Northern India. Snow fell over some parts of the North-West Himalayas, but it was probably local and not unusually large in amount, for the north-west winds which always set in over the Punjab after snowfall in the adjacent hills only lasted for two days. Temperature, too, was reduced, but this lasted only for a short period, and increased steadily and rapidly until the 16th May, on which day the maximum temperature in the Punjab was from 4° to 7° above that of the same day last year—an unusually dry and hot year.

Hence the larger conditions, *viz.*, deficient pressure in Northern and especially Upper India, and excessive pressure in the West Deccan are similar to those of last year, but are more strongly marked. The chief difference is in the Central Provinces and adjacent districts, where the deficient pressure of last year is replaced by pressure slightly in excess.

Probable character of the approaching monsoon.—The following are the probable indications based on these conditions:

1st.—The low pressure which at present obtains over Northern India from East Bengal to the Punjab and increases in amount westwards favours the early establishment of the Bengal current over Bengal and the Gangetic Valley, to which it will probably give normal or abundant rain.

2nd.—The distribution of pressure in Southern India (more especially in the West Deccan) is such as is usually associated with delay in the establishment of the monsoon on the Bombay Coast, and with diminished rainfall in the Bombay Deccan.

3rd.—The unfavourable conditions in Southern India accompany favourable conditions in North-West India as was the case last year. It is hence not probable that the monsoon rainfall in the Deccan will be largely reduced below its normal amount.

It will thus be seen that, with the exception of the high pressure conditions in the West Deccan, indications are favourable for a strong and early monsoon. It should, however, be remembered that these inferences may be to some extent modified by pressure changes at present in progress, or, by what is even of greater importance; by unknown pressure conditions in the Bay of Bengal or Arabian Sea.

REVENUE AND AGRICULTURAL DEPARTMENT.

WEATHER SUMMARY FOR APRIL 1888.

Over the greater part of India April was a hot and dry month. The thunderstorms, nor'-westers, and duststorms which in normal years are so frequent over a large part of the country, were during the past month much less numerous than usual, and the rainfall in the great majority of districts was much below the normal average. But the few storms which did occur were unusually violent, as though the energy which is ordinarily distributed through numerous small storms was, in the case of the present month, collected in the one or two storms which did occur. The tornado at Dacca on the 7th, and the violent nor'-wester in the Moradabad neighbourhood at the close of the month, are examples of this concentration of energy. The earlier part of the month was much more settled generally than the latter. Between the 1st and the 16th any rain which occurred was light and fell in the form of scattered showers, but about the 17th unusually strong winds set in around the head of the Bay, and poured an abnormally large amount of moisture into Bengal and Assam, and from that date onward to the close of the month rain fell daily, and at times heavily, over the whole of North-Eastern India.

In the Peninsula thunderstorms generally occasioning only slight rain occurred frequently between the 12th and the end of the month, the most unsettled days being the 15th and 20th, when rain fell over a very large area.

On the 1st the Chart showed a large area of relatively low pressure overlying the Gangetic plain and the Central parts of the country. From this area pressure increased in all directions, and was relatively high in Upper Assam, in Arakan, in Mysore, and in the extreme north-west of the Punjab. The differences were not however large, and the wind movement was generally light. Temperature had fallen since the preceding day, and the maxima reported, though high, were not abnormally so for the season. The highest maxima were 108° at Kurnool, and 107° at Sholapur and Cuddapah. Rain was falling in Assam. On the 2nd there was apparently unsettled weather over the North-West Himalayas, under the influence of which slight rain had fallen at the sub-montane stations of the Punjab. Barometric gradients had increased and the winds were somewhat stronger, but the general weather showed but little alteration. Temperature had continued to fall very generally, but the day temperatures were higher than on the 1st, Khandwa reporting a maximum of 113°, and Amraoti and Allahabad of 107°. On the 3rd the area of lowest pressure was transferred to North and Central Bengal, and the barometer had risen over the greater part of North-Western India. Beyond local showers, there was no rain of importance, and the weather was of the normal hot weather character. The Deccan remained the hottest part of the Indian region. During the 4th and 5th the lowest barometer continued to be reported from North Bengal, and unsettled weather prevailed in Assam, and probably on the Sikkim Himalayas. The distribution of temperature and the maxima were generally unchanged. On the 6th a well defined depression appeared over the Punjab, and was accompanied by strong winds and duststorms in its immediate neighbourhood. It, however, occasioned no permanent change in the general conditions, as on the following day, the 7th, pressure was again lowest over North Bengal. The weather at 8 A.M. was generally fine and bright, and hardly any rain was reported. In the evening of this day a tornado passed over Dacca, the particulars of which, so far as they are known, will be found at the end of the Summary. On the 8th, the barometer was low all along the line of the hills and highest in Mysore. North-westerly and westerly winds prevailed over the greater part of India, and southerly winds over the Bay and Bengal. Cloudy weather was reported from Burma, Assam, and the south of the Peninsula. Between the 9th and the 13th there was practically no change in the weather. Temperature slowly rose, and the indraught of southerly winds from the Bay into Bengal and Assam steadily continued. On the 14th a low barometer or depression appeared off the South Carnatic Coast, and caused the wind to shift to the northward at Madras, Negapatam, Salem, and Trichinopoly. It gave rain to several stations in south Madras, and this rainfall subsequently extended to all parts of the South of the Peninsula. The depression did not, however, develop,

and during the 16th and 17th, the distribution of pressure was the same as that prevailing before the appearance of the disturbance, *viz.*, high in the South and South-West and low over Northern India, more particularly along the foot of the hills and in Bengal. On the 18th rain began to fall in the South, Colombo receiving as much as 6 inches, and on the following days, the 19th and 20th, rain was very general throughout the Peninsula. Colombo on the 20th again reported 6 inches. On the 21st rain almost ceased in the Peninsula, but began to fall generally in Assam and Bengal, and this rainfall continued in North-Eastern India until the close of the month. On the 23rd and 24th considerable disturbance occurred over North-Western India, and a large number of duststorms, in some places accompanied with rain, were reported from the Punjab, North-Western Provinces, Rajputana, and Central India. After this burst of unsettled weather there occurred a period of low relative temperature followed by conditions, such as are usually characteristic of the hot weather, and temperature rose steadily. At the close of the month dust and thunderstorms again occurred, and on the evening of the 30th a storm apparently descended from the hills in the neighbourhood of Mussoorie, and travelled across the western part of the North-Western Provinces. The particulars of this storm will appear in the May Summary.

The mean temperature of the month has been below the normal average over Ceylon, the south of the Peninsula, Lower Bengal, and Assam, and above it elsewhere. The greatest excess was in Sind, but all over Upper India, including the North-Western Provinces, Punjab, Rajputana, and Guzerat, the mean temperature was considerably higher than usual. The changes of temperature during the month were large and important; rapid falls over large areas taking place after the occurrence of duststorms, to be succeeded by equally rapid recoveries as the weather settled down to its normal condition. The rise of temperature during the month was by no means excessive as the following table of maxima will show:

Stations.	Maximum on 1st.	Maximum on 15th.	Maximum on 30th.	Stations.	Maximum on 1st.	Maximum on 15th.	Maximum on 30th.
Rangoon ...	?°	100°·5	99°·0	Colombo ...	90°·0	86°·0	89·5
Calcutta ...	91°·5	98°·0	91°·0	Mangalore ...	89·3	90·3	90·3
Cuttuck ...	103·9	102·9	106·9	Sholapur ...	106·7	108·2	108·7
Patna ...	100·0	104·5	97·0	Bombay ...	87·4	90·4	88·4
Allahabad ...	104·6	104·6	105·1	Akola ...	104·7	107·7	106·7
Jhansi ...	105·5	103·5	109·5	Nagpur ...	106·2	107·7	109·7
Roorkee ...	97·1	98·1	103·6	Deesa ...	104·4	104·4	108·9
Delhi ...	99·0	100·0	105·0	Hyderabad ...	98·7	102·2	106·7
Lahore ...	91·1	97·6	101·6	Jeypore ...	100·6	98·6	106·6
Multan ...	94·6	98·6	104·6	Secunderabad	105·7	98·7	107·8
Simla ...	65·7	72·5	72·5	Madras ...	90·5	89·0	92·0
Quetta ...	58·6	77·9	77·4	Madura ...	103·5	87·3	106·0

and the maximum readings over a large part of the country were about the average.

Rainfall.—The comparatively constant rain which fell over North-Eastern India during the latter part of the month occasioned an excess of rain in the Provinces of Bengal and Assam. A slight excess was also reported from Rajputana and Central India, from the Konkan and from the Deccan, and a large excess from Ceylon. No rain fell in Sind, Cutch, or Guzerat, and generally outside those regions reporting an excess the rainfall of the whole month was very trifling.

The Dacca Tornado.—The following remarks are compiled from the reports furnished by Dr. Crombie and Mr. Hare, who were both in Dacca during the tornado. At about 7 o'clock on the evening of Saturday, the 7th April, the tornado struck the western extremity of the town of Dacca. Even in its first manifestations the storm was of great violence, and the rotatory movement of the wind within the storm area was evidenced by the directions in which plantain and other trees were found lying, after the storm had passed. The appearances before the storm burst were only such as usually accompany the approach of an ordinary nor'-wester.

The vortex travelled at first on a south-east course along the old river bed, destroying every kutcha hut within its area, and it was hoped that the storm would continue to travel in this direction and so pass out into the open Maidan to the south of Nawabgunge, and the destruction due to it be thus reduced to a minimum. Suddenly, however, the centre moved to the northward and subsequently reached the Maidan to the south of Lalbagh. Here, freed from such obstacles as buildings, &c., the storm rapidly increased in energy, and after this short incursion into the open country the tornado, having gained such additional force as enabled it to destroy even the strongest houses, returned to the river. From Lalbagh the vortex crossed the river, and it was after this that the largest amount of damage was done, everything, including the strongest masonry houses, being destroyed. The tornado apparently subsequently rose from the ground and passed high into the air.

It travelled altogether about 3½ miles at an estimated rate of 16 miles per hour. Its breadth varied between 200 and 180 paces, and the uprush of air within the centre must have been tremendous, as large beams blown from the falling houses were suspended in mid-air for distinct intervals by the violent uprush. The tornado did not pass over the observatory, so that there was no record of the lateral wind force.

The storm was so partial that those outside its path were hardly aware of anything unusual.

Very shortly after the tornado visited Dacca, a path of the Munshigung Sub-Division was visited by a tornado, either the same or another. The damage done by this was very severe, and it is at present reported that 66 deaths occurred, and that 128 persons were wounded. This tornado passed for a great part through open country, and did comparatively little harm to property, though, where it did strike houses, it carried them away more completely than in the crowded city of Dacca.

The following table shows the amount of rain and the difference from the average, during the month of April, 1888, according to districts, as far as is indicated by the telegraphic reports:

Districts.	Number of stations.	Average rainfall in April.	Difference from the average in April, 1888.
Punjab, West ...	7	1·64	—1·23
„ East ...	4	1·12	—0·81
North-Western Provinces; Trans-Gangetic ...	9	0·69	—0·47
„ „ Cis-Gangetic ...	3	0·14	—0·04
Behar ...	2	0·31	—0·30
Northern Bengal ...	2	2·62	+0·10
Assam—Cachar ...	3	9·28	+4·77
Lower Bengal—Chutia Nagpur ...	7	2·55	+0·95

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 16th May, 1888.

The most important features of the weather of the past week have been the steady but considerable increase of temperature which has taken place over Northern India, and the large increase in the pressure difference between the North and South. The almost continuous fall which has occurred in the barometer over Northern India, combined with the rise which has taken place over the Peninsula, has produced a distribution of pressure which resembles the conditions prevailing during the rains rather than that which obtains during the hot weather. In the Peninsula the weather has been wet and unsettled, and a feeble cyclonic disturbance passed across, from the Coromandel to the Malabar Coasts.

On the 10th the barometric changes were unimportant, except in Ceylon and the south of the Peninsula, where pressure had fallen. Rain was reported from several of the Peninsula stations, as well as from those in Lower Burmah. The winds were generally light, and were irregular in direction over the south of the Peninsula. Temperature had increased. North Sind and West Rajputana were the hottest parts of the Indian region, the maxima there generally exceeding 110°. The Chart of the following day, the 11th, showed a small and feeble, but distinctly marked, cyclonic storm off the Madras Coast. A cyclonic circulation of the winds was reported from Southern India, and rain was falling at the majority of the southern stations, as well as in Burmah. At Colombo the fall amounted to 7 inches. Temperature had again increased in Northern and Central India, the area of maximum heat holding over Sind. On the 12th the disturbance noticed on the preceding day was advancing inland between Madras and Negapatam, but was quickly filling up. Rain was falling over the whole of Southern India, but the amounts were smaller than on the preceding day. A further increase of temperature was reported, and the maxima at Jhansi and Deesa were 112°·5. Between the 12th and 13th the depression passed quickly across the Peninsula, but almost entirely filled up. Temperature had fallen quickly in Southern India, but had continued to rise in the North and centre. The highest maxima reported were 114° at Deesa and 113°·5 at Jhansi. Rain had again fallen generally in the Peninsula, and thundershowers had occurred in Assam and Lower Burmah. On the 14th pressure was rising in the Peninsula, and falling briskly over Northern India, and in consequence the barometric difference between the North and South had considerably increased. The winds had risen in force over a large part of the country, but more particularly at the head of the Bay, where they approached the force of a gale. Temperature had again risen, though only very slightly, in Northern India, and had generally fallen elsewhere. The highest maximum was 114°·7 at Jacobabad. On the 15th the changes which were in progress on the previous day were intensified. The barometer continued to fall in the North and to rise in the South, hence the barometric difference was still further increased, and the general distribution closely resembled that which usually obtains during the rains. The winds, except along the foot of the hills, blew freshly, and at the head of the Bay were exceptionally strong. Rain fell at several stations in the Peninsula and at nearly all stations in Burmah and Assam. At Moulmein over 6 inches was recorded. Temperature continued to rise in the Punjab and Upper Sind. The maximum at Jacobabad was 116°·6 and at Hyderabad 113°·2. On the 16th pressure was falling almost everywhere. A small centre of disturbance was shown over the south-east of the Punjab and the adjacent hill districts, but generally the distribution was similar to that reported on the previous day. The general conditions of pressure during the last three days of the week were such as usually precede an advance of the south-west monsoon current into the Indian region. The winds had increased in force all along the West Coast region, but had decreased over the Bay of Bengal. The directions were generally unchanged. A further brisk rise of temperature was reported from North-Western and Central India, and a maximum of 116°·6 was reported from Jacobabad, of 115°·9 at Sirsa, of

115°·4 at Deesa, and 114°·8 at Ludhiana. The great increase of heat which has occurred during the past week is plainly shown in the following table, which gives the maxima at the beginning and close of the week for several stations in Upper and Central India:

Stations.	Maximum temperature on 10th.	Maximum temperature on 16th.	Increase.
Jhansi ...	107°·5	114°·0	6°·5
Lahore ...	103·6	113·1	9·5
Multan ...	104·1	111·6	7·5
Simla ...	74·1	82·7	8·6
Deesa ...	108·9	115·4	6·5
Jacobabad ...	111·3	116·6	5·3
Jeypore ...	104·6	110·8	6·2

The rainfall has been heavy in Burmah, Bengal, Assam, Ceylon, and Madras, and moderately heavy in Bombay, but has been light elsewhere. In the North-Western Provinces, Oudh, Sind, and Rajputana, the weather has been dry throughout.

The concluding table gives the total rainfall of the past week according to Provinces:

Divisions.	No. of Stations.	Total Rainfall.
Burmah ...	7	25·69
Bengal and Assam ...	7	17·34
North-Western Provinces and Oudh ...	0	0
Punjab ...	1	0·05
Hill Stations ...	2	0·07
Ceylon ...	2	13·33
Malabar Coast ...	5	10·16
Bombay ...	6	6·43
Berars and Central Provinces ...	3	0·82
Guzerat and Central India ...	1	0·01
Sind—Rajputana ...	0	0
Madras ...	14	34·81

SIMLA, *17th May, 1888.*

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 12th May, 1888.*—Good rain in most districts, but more wanted in Vizagapatam, Trichinopoly, Madura, Tinnevelly, and Salem. Crops generally good, but black paddy considerably damaged from want of rain in parts of Vizagapatam, and *cholum* by insects in parts of Coimbatore. Pasture generally sufficient, but scanty in Malabar and insufficient in parts of Cuddapah, Anantapur, and Madura, and decreasing in Vizagapatam and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 16th May, 1888.*—Rain in parts of Nasik, Poona, Ahmednagar, Sholapur, Satara, Bijapur, Belgaum, Dharwar, Kanara, and Baroda. Cotton-picking progressing in parts of Kaira. Harvesting of late crops completed in Shikarpur, Upper Sind Frontier, Nasik, and Dharwar, —continues in Hyderabad and Khandesh. Ploughing for next season progressing in most districts. Fodder scarce in parts of Surat, Thana, Ratnagiri, Dharwar, and Kathiawar.

Bengal.—*For week ending 15th May, 1888.*—Weather hot and close. Showers reported in almost all the Bengal districts, and also in places in the Bhagalpur and Chota Nagpur Divisions. Rain still holds off in Orissa, where it is much needed. Ploughing and early sowings are in progress, except in Cuttack and Puri. Early rice and jute have come up in some places and are doing well. Sugarcane, indigo, and *cheena* are generally in good condition. Spring rice harvest proceeding, good outturn generally expected. Cattle suffering for want of pasture in the Khurda subdivision of Puri.

North-Western Provinces and Oudh.—*For week ending 16th May, 1888.*—No rain. Weather hot and dry. *Rabi* nearly all cut, outturn good. Summer crops being irrigated. Markets are well supplied, but prices still fluctuate. General condition of agricultural stock good.

Punjab.—*For week ending 16th May, 1888.*—No rain has fallen during the week. Prices are on the whole still falling; a rise is reported from two districts; in others the prices are falling or stationary. Harvesting and threshing of *rabi* crops going on. *Kharif* ploughings, sugarcane weedings, and cotton sowings in progress. *Rabi* prospects and outturn are reported good to average. Extra *rabi* and fruit slightly damaged by storms at Amritsar. Stock cattle are reported healthy. Fodder generally sufficient.

Central Provinces.—*For week ending 16th May, 1888.*—Weather hot and cloudy, slight rain in Chanda. Threshing and winnowing of wheat and other winter crops completed. Land being prepared for autumn sowings. Cattle generally in good condition.

Burma.—*For week ending 12th May, 1888.*—The dry weather crops are, with the exceptions noticed last week, doing well. The dry weather rice crops are being reaped. Rain fell in all districts in Lower Burma. In Upper Burma a little rain fell in Yeu, Sagaing, Myingyan, Minbu, and Yemethen districts. The price of paddy has risen in Bassein, Thayetmyo, Amherst, Shwegyin, and Mergui districts of Lower Burma, and in Yemethen, Kyaukse, Myingyan, and Upper Chindwin districts of Upper Burma, and has fallen in Hanthawaddy in Lower Burma and in Shwebo in Upper Burma.

Assam.—*For week ending 16th May, 1888.*—Weather seasonable everywhere and prospects of crops generally good. Tea suffering from want of sun in Sibsagar and from green fly in Darrang. Condition of potatoes in Khasi

Hills continues good. Decrease of rain in Sylhet has improved circumstances of crops.

Mysore and Coorg.—*For week ending 16th May, 1888.*—Rainfall general throughout the State, and good in civil and military station and Chittaldroog and Bangalore districts. Standing crops in good condition. Outturn of harvests fair. Condition of agricultural stock good. Supply of water and fodder scanty in parts of the Hassan district.

Some rain fell in Coorg during the week. No crops on the ground.

Berar and Hyderabad.—*For week ending 16th May, 1888.*—Weather hot, with westerly winds. Cultivators busily engaged in preparing the soil for *kharif* crop. Fodder insufficient in Amraoti district. Agricultural stock generally in good condition. No marked changes in prices.

There has been a little rain at Hyderabad during the week. Prospects fair. Prices stationary.

Central India.—*For week ending 16th May, 1888.*—The following changes have occurred since the last report, *viz.*, agricultural operations have been started in Western Malwa and Bhopawar. Probable outturn of harvest in Goona is reported below average. Prices of foodgrains are rising in Baghelkhand, Western Malwa, Bhopawar, and Goona.

Rajputana.—*For week ending 16th May, 1888.*—Some rain at Dholepore. Agricultural operations satisfactory. Standing crops none at present. Harvests and agricultural stock good. Pasturage or fodder sufficient. Prices steady generally,—fluctuating at places.

Nepal.—*For week ending 10th May, 1888.*—No rain. Weather warm and dry. Prospects good.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE NORTH-WESTERN PROVINCES FOR 1886-87.

No. 891., dated Simla, the 11th May 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 855I., dated the 3rd April 1888, from the Government of the North-Western Provinces, forwarding the Revenue Report of Irrigation Works in the North-Western Provinces for 1886-87, and the Resolution of that Government reviewing the Report.

OBSERVATIONS.—Capital and Revenue Accounts are kept of all canals and irrigation systems in the North-Western Provinces. The Capital expenditure of the year, including indirect charges, amounted to R19,09,628 as follows :—

		Number of Works.	Expenditure.	
			During the year 1886-87.	To end of the year 1886-87.
			R	R
Productive Public Works	Direct	4	17,07,986	6,56,30,769
	Indirect		54,051	46,61,524
	TOTAL	...	17,62,037	7,02,92,293
Protective Public Works	Direct	1	1,19,696	38,17,285
	Indirect		21,010	1,99,001
	TOTAL	...	1,40,706	40,16,286

A

		Number of Works.	Expenditure. During the year 1886-87.	Expenditure. To end of the year 1886-87.
			₹	₹
Minor Works and Navigation (for which Capital and Revenue Accounts are kept)—				
In Operation	Direct	4	6,780	22,79,316
	Indirect		55	1,91,175
	TOTAL	...	6,835	24,70,491
Surveys	Direct	3	50	2,49,126
	Indirect		...	31,027
	TOTAL	...	50	2,80,153
TOTAL MINOR WORKS		...	6,885	27,50,644
GRAND TOTAL		...	19,09,628	7,70,59,223

Of the outlay during the year on Productive Public Works, about ₹13,00,000 were spent on the construction of the new Nadrai Aqueduct on the Lower Ganges Canal. Capital expenditure on the Betwa Canal, a Protective Public Work, is now confined to the completion of the distributary system.

2. The actual financial results of the year on the works in operation were as follows:—

		Gross Revenue.	Charges against Revenue.	Net Revenue.	Percentage of net Revenue on total Capital Outlay to end of the year.
		₹	₹	₹	
Productive Public Works	Direct	45,77,942	22,78,350	31,71,968	4·51
	Indirect	8,72,376			
Protective Public Works	Direct	20,700	76,348	—55,648	*Nil*
	Indirect	*Nil*			
Minor Works	Direct	1,61,311	2,09,398	36,692	1·48
	Indirect	84,779			
	TOTAL	57,17,108	25,64,096	31,53,012	4·10

The productive and protective works taken together shew up to the end of 1886-87 a surplus profit of ₹56,10,242; that is, this sum is the difference between the net revenue of the works and simple interest at 4 per cent. on the capital invested. The corresponding figure for the productive works alone is ₹62,38,573. This surplus is mainly due to the returns from the Eastern Jumna Canal, which give a clear profit of nearly 120 lakhs. On the Upper Ganges and Agra Canals, the charges for interest are still in excess of the net revenue; but the net revenue of the Lower Ganges Canal has slightly exceeded the interest charges.

3. The following table shews the *assessed* revenue of the year, including share of land revenue, compared with that of the three previous years:—

	1886-87.	1885-86.	1884-85.	1883-84.
	₹	₹	₹	₹
PRODUCTIVE WORKS—				
Upper Ganges Canal	23,27,859	27,48,129	25,47,564	32,83,032
Lower Ganges Canal	11,89,623	14,55,152	16,12,685	18,89,255
Agra Canal	4,76,057	6,63,655	4,51,040	8,13,712
Eastern Jumna Canal	9,08,163	9,26,041	8,24,345	10,42,622
	49,01,702	57,92,977	54,35,634	70,28,621
PROTECTIVE WORKS—				
Betwa Canal	23,157	13,794	...	...
MINOR WORKS	2,16,111	2,26,245	2,21,243	2,22,115
TOTAL	51,40,970	60,33,016	56,56,877	72,50,736

The assessed revenue is considerably below the average of the preceding years, and is the smallest which has been recorded since 1879-80 when it amounted to ₹46,92,483. The direct assessment (excluding the portion of the Land Revenue due to irrigation) was ₹37,26,528 in that year, against ₹41,83,815 now. At that time the capital expenditure on the works was about three-fourths of its present amount, and irrigation was less developed than at present. The abnormally small revenue of the year under review is due to the fact that the irrigated area was largely reduced, both in the kharif and rabi seasons, by the very favourable rainfall of the year.

4. The irrigated area which formed the basis of the above assessments is given in the first column of the following statement:—

	1886-87.	1885-86.	1884-85.	1883-84.
	Acres.	Acres.	Acres.	Acres.
PRODUCTIVE WORKS—				
Upper Ganges Canal	574,440	741,636	683,939	1,011,990
Lower Ganges Canal	359,003	462,302	534,833	653,820
Agra Canal	122,096	176,721	128,002	245,300
Eastern Jumna Canal	203,429	215,356	166,407	277,358
	1,258,968	1,596,015	1,513,181	2,188,468
PROTECTIVE WORKS—				
Betwa Canal	8,608	12 356	...	...
MINOR WORKS	96,239	101,305	104,124	109,206
TOTAL	1,363,815	1,709,676	1,617,305	2,297,674

The year 1883-84 was an exceptional one owing to deficient rainfall, but the area irrigated in the year under review is smaller than that of any year since 1876-77, when 1,239,884 acres were watered; at that time the Lower Ganges Canal was not in operation, and the Agra Canal had only been opened one year. The area irrigated on the Upper Ganges Canal, 574,440 acres, is less than that of any year since 1867 68, when 533,456 acres only were irrigated; it is more than thirty-five per cent. below the average of the previous ten years. The percentage of double-cropped area decreased from 18·24 in 1885-86 to 14·31 in 1886-87.

5. Wheat is the most important crop in the North-Western Provinces as it is in the Punjab. The proportion of the irrigated area under wheat is almost the same in both provinces, being rather more than one-third of the total. The area irrigated in the North-Western Provinces in 1886-87 was 495,370 acres valued at 183 lakhs of rupees; the next most important crop, both in area and in value, is the sugarcane, of which 168,452 acres valued at 111 lakhs were irrigated. The gross value of the irrigated crops of the year was estimated at 444 lakhs of rupees.

6. The duty of the water entering the canals was lower than in previous years, a result which might be anticipated in a year of favourable rainfall. The highest duties were those obtained on the Eastern Jumna Canal, 92 acres per cubic foot in the kharif and 125 acres in the rabi.

7. The working expenses of the year are the largest that have been recorded in the North-Western Provinces; under the head of Major Works they shew an increase over those of the previous year of about three-quarters of a lakh of rupees. This increase is mainly due to the cost of maintaining the Betwa Canal which appears for the first time in any magnitude in the accounts. The following

statement compares the working expenses of the year under review with that of the three previous years :—

	1886-87.	1885-86.	1884-85.	1883-84.
PRODUCTIVE WORKS—	₹	₹	₹	₹
Upper Ganges Canal	9,16,624	9,24,892	9,91,626	9,22,644
Lower Ganges Canal	8,40,995	8,76,536	8,76,939	6,96,601
Agra Canal	2,99,834	2,79,453	2,81,226	2,52,287
Eastern Jumna Canal	2,20,897	1,96,160	2,06,996	2,10,315
	22,78,350	22,77,041	23,56,787	20,81,847
PROTECTIVE WORKS—				
Betwa Canal	76,348	2,136	...	...
MINOR WORKS	2,09,398	2,09,216	1,71,321	1,45,734
TOTAL	25,64,096	24,88,393	25,28,108	22,27,581
Per acre irrigated	1·88	1·45	1·56	0·97

The increase in the working expenses of the Minor Works during the last two years is due to extensions and improvements in connection with the Kicha Weir and River training works of the Rohilkhand canals : it is said that these extensions are completed, and there will be a large decrease of expenditure under this head in future.

8. The navigable canals in the North-Western Provinces consist of portions of the Upper and Lower Ganges Canal and of the Agra Canal : the gross receipts during the year were 31,555 and the working expenses 41,450. Both receipts and expenses are slightly higher than those of the previous year. No explanation is given of the heavy charges under the head of Establishment ; it is hoped that one result of the reorganization alluded to in paragraph 95 of the Chief Engineer's review will be a reduction in the cost of special supervising establishment, the necessity for which is not apparent. There is a considerable increase in profits on the Agra Canal due in a great measure to the opening of through traffic with Delhi and the Western Jumna Canal.

9. The revenue realised from water-power on all the canals was ₹89,361 : this is nearly thirty per cent. in excess of the average of the previous three years ; the increase is due to enhancement of rates obtained for the use of the water. The assessments had, however, fallen off in the year under review. There was a satisfactory increase in the revenue from plantations.

10. The outstanding balances of uncollected revenue at the end of the year were ₹14,475 for occupier's rate and ₹1,104 for owner's rate.

11. The year was, on the whole, an unfavourable one for the Irrigation systems of the North-Western Provinces. The increasing capital expenditure led to increased charges for interest ; the Betwa Canal caused a considerable increase in the working expenses, whilst the revenue was reduced by a large falling off in irrigation which was only compensated to a small extent by an increase in the other sub-heads of revenue. It is not surprising that, under these circumstances, the net profits of the year, as gauged on the basis of assessments, were the smallest for the last ten years.

ORDER.—Ordered, that a copy of this Resolution and of the Report and Resolution by the Local Government be forwarded to the Secretary of State and to the Finance and Commerce and Revenue and Agricultural Departments of the Government of India, for information.

Also, that a copy of this Resolution be forwarded to the Government of the North-Western Provinces and Oudh, Public Works Department, for information and guidance ; and to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information ; and to the Foreign Department, for communication to the Government of Mysore.

The Governments of Madras, Bombay, Bengal, and the Punjab.
The Chief Commissioners, Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Agents to the Governor-General, Central India and Rajputana.

Also, that this Resolution and the Resolution of the Local Government be published in the Supplement to the *Gazette of India*.

R. HOME, *Colonel, R.E.*,
Deputy Secretary to the Government of India.

NORTH-WESTERN PROVINCES.

Irrigation Revenue Report for the year ending 31st March 1887.

GOVERNMENT N.-W. P. AND OUDH.

PUBLIC WORKS DEPARTMENT,

Irrigation Branch.

No. 736½ I., dated Allahabad, the 22nd March 1888.

RESOLUTION—By His Honour the Lieutenant-Governor, North-Western Provinces, and Chief Commissioner, Oudh.

Read—

Irrigation Revenue Report of the North-Western Provinces for the year ending 31st March 1887, by the Chief Engineer, Irrigation Works, North-Western Provinces and Oudh.

CAPITAL OUTLAY.

RESOLUTION.—The total outlay on the Capital account of Canals in the North-Western Provinces and Oudh for and to the end of 1886-87 is shewn below :—

	Canal.	Outlay on construction under all Heads

	Cawnpore Branch Extension Survey	...	56,746
	TOTAL OUTLAY ON MINOR WORKS AND NAVIGATION	6,885	27,50,644
Famine relief and insurance, 35—Construction of Protective Irrigation Works	Betwa Canal	1,40,706	40,16,286
	GRAND TOTAL	19,09,628	7,70,59,223

The total Capital expenditure of ₹19,09,628 was ₹3,31,191 more than in 1885-86. Owing to the construction of the new Nadrai Aqueduct, the Lower Ganges Canal shews an increased expenditure of ₹6,99,994; but on the Betwa Canal there was a decrease of ₹4,27,534, due to the completion of works. On the Agra Canal there was an increase of ₹71,930, of which the greater part was incurred in extending and completing the distributary system.

ASSESSMENTS.

2. The gross assessments of the year amounted to ₹51,40,970, and the working expenses were ₹25,64,096. The net revenue was, therefore, ₹25,76,874, or 3·34 per cent. on the total direct and indirect capital of ₹7,70,59,223. Excluding, however, the Betwa Canal, a "Protective work," the return is 3·60 per cent., as against 4·95 per cent. in the previous year.

The interest charge on the capital amounted to ₹27,41,369, deducting which amount from the net revenue, the assessments shew a deficit of ₹1,64,495 against a profit of ₹8,69,419 in the previous year; but excluding the Betwa Canal, the net revenue amounts to ₹26,30,065, the interest charge to ₹25,91,072, and there is a surplus of ₹38,993.

INTEREST CHARGES.

3. The total interest charges on "Productive" and "Protective" works to the end of the year amounted to ₹5,03,53,465, and the total net revenue realized to ₹5,70,70,896; thus leaving a clear surplus of ₹67,17,431, or ₹72,87,978 if the interest charges on the Betwa Canal be excluded.

REALIZATIONS.

4. The actual income realized from all sources during the year was ₹57,17,108. After paying all expenses, including all interest charges, the *net* revenue was ₹4,11,643 against ₹2,97,071 in 1885-86. Excluding the Betwa Canal, the gross income was ₹56,96,408, the total charges ₹50,78,820, and the net revenue ₹6,17,588.

WORKING EXPENSES.

5. The working expenses under all heads, direct and indirect, amounted to ₹25,64,096, or ₹75,703 more than in the previous year. The increase is due to the revenue charges on the Betwa Canal, ₹74,212, appearing in the accounts fot the first time; also to an increase of ₹60,000 in the amount of the write-back on account of the old Nadrai Aqueduct. Under Establishment there is a decrease of ₹75,238, due partly to the increased capital expenditure of the year and partly to a reduction in the actual number of Engineers and Subordinates employed.

The percentage of working expenses to assessments on the four Productive Works is shewn in the statement below:—

Year.	Upper Ganges Canal.		Lower Ganges Canal.		Agra Canal.		Eastern Jumna Canal.	
	Assessment.	Percentage.	Assessment.	Percentage.	Assessment.	Percentage.	Assessment.	Percentage.
	₹		₹		₹		₹	
1882-83	24,42,835	36·03	15,36,089	43·73	5,82,424	39·38	8,16,577	25·89
1883-84	28,40,019	32·48	16,81,420	41·42	8,13,712	31·00	8,21,088	25·61
1884-85	21,04,551	47·11	14,04,856	62·42	4,51,040	62·35	6,02,811	34·33
1885-86	23,05,116	40·12	12,47,323	70·28	6,63,655	42·11	7,04,507	27·84
1886-87	18,84,846	48·63	9,81,794	85·66	4,76,057	62·98	6,80,629	32·17

Owing to the falling off in receipts, the percentages naturally shew an increase in every case; and for the same reason the cost of measuring irrigation and preparing demand statements rose during the year from ₹2·06 to ₹2·58 per 100 acres.

The cost incurred by the Civil Department in collecting the water-rate was ₹1,20,915, or 3·00 per cent. on the gross collections, as against 3·13 per cent. in 1885-86.

MILEAGE OF CANALS, &c.

6. The subjoined statement shews that 9,684 miles of channels were maintained:—

Canal.	Main canal and branches.	Navigation channels.	Escapes and mill channels.	Distributaries.	Drainage cuts.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.
Upper Ganges	438	19	62	2,559	895	3,973
Lower Ganges	564	...	68	2,014	317	2,963
Agra	109	25	10	561	34	739
Eastern Jumna	130	...	31	640	308	1,109
Betwa	167	...	8	177	11	363
Dún	...	...	...	74	3	77
Rohilkhand	20	...	...	331	3	354
Bijnor	...	...	...	36	...	36
Jhansi Lakes	...	...	...	45	...	45
Hamírpur Lakes	...	...	...	25	...	25
Total	1,428	44	179	6,462	1,571	9,684

There was an increase during the year of 219 miles of distributaries and 13 miles of drainage cuts.

IRRIGATED AREA.

7. The following table gives the area of "kharif" and "rabi" crops for 1886-87 and the previous five years:—

	Kharif.	Rabi.	Total.	Percentage.	
	April to September.	October to March.	Acres.	Kharif.	Rabi.
1881-82	706,025	1,209,924	1,915,949	36·85	63·15
1882-83	740,390	1,233,785	1,974,175	37·50	62·50
1883-84	825,747	1,471,927	2,297,674	35·94	64·06
1884-85	773,603	843,701	1,617,304	47·83	52·16
1885-86	702,259	1,007,417	1,709,676	41·08	58·92
1886-87	541,821	821,994	1,363,815	39·73	60·27

During the "kharif" season the rainfall was again above the average, and was most favourable and well-distributed. The area irrigated therefore decreased and was 160,438 acres less than in the previous "kharif."

The rabi season was also an exceptionally favourable one. General rain in October admitted of the crops being sown without the aid of canal water. A demand sprung up in December, but it ceased entirely with the copious and general rainfall of January, and the result was a decrease in the irrigated area of 185,523 acres.

DOUBLE-CROPPED AREA.

8. The double-cropped area decreased by 116,733 acres, and the percentage has fallen from 18·24 to 14·31. The decrease is due chiefly to the smaller area of indigo that was sown.

9. The statement below compares the acreage of the principal crops during the last six years :—

Crop.		1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
		Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Kharif	Sugarcane	165,019	198,322	155,147	153,652	175,944	168,452
	Rice	107,963	104,046	111,512	92,687	100,706	109,513
	Indigo	319,627	316,145	294,429	392,302	297,314	164,013
	Cotton	64,161	52,493	93,545	66,791	60,580	41,835
Rabi	Wheat	727,428	728,385	824,982	512,324	550,891	495,370
	Barley	261,688	266,651	286,073	108,267	118,569	70,881
	Gram	49,851	48,400	61,123	16,954	42,087	27,793
	Poppy	17,140	16,233	16,370	10,762	15,629	14,679

Indigo shows a falling off of 133,301 acres, due to the contraction of sowing operations which followed the serious losses incurred during the bad seasons of the previous two years.

The decreases in the other crops are owing to the nature of the season. Wheat, however, forms 60·3 per cent. of the whole rabi area, as against 54·7 per cent. in the previous year.

VILLAGES AND OUTLETS.

10. During the year 7,928 villages received water from 34,241 outlets in the distributaries of the five main canals.

VALUE OF CROPS.

11. The total value of crops raised with canal water was ₹4,44,17,015, as shewn in table below :—

Year.	Area irrigated.	Value of crop.	Occupier's rate.	Value of crop per acre.	Occupier's rate per acre.	Percentage on value of crops.
	Acres.	₹	₹	₹	₹	
1884-85	1,617,304	4,49,52,406	40,03,058	27·80	2·47	8·85
1885-86	1,709,676	4,97,91,920	43,21,185	29·12	2·53	8·68
1886-87	1,363,815	4,44,17,015	35,31,976	32·56	2·58	7·95

RAINFALL.

12. The rainfall, although not so excessive as in the previous year, was considerably above the average and was very evenly distributed. In only four months of the year, *viz.*, April, November, February, and March, was there no general fall recorded.

RIVER SUPPLIES.

13. The supplies in all rivers were more than sufficient to meet requirements.

IRRIGATING DUTY.

14. The irrigating duty and the value of each cubic foot of water are detailed in the accompanying table :—

Canal.	Area irrigated per cubic foot of water at head.					Value of each cubic foot of water at occupier's rate.				
	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
	Acres.	Acres.	Acres.	Acres.	Acres.	₹	₹	₹	₹	₹
Upper Ganges	232	264	201	216	198	602	644	532	578	555
Lower Ganges	180	187	167	138	111	407	415	377	320	256
Agra	155	266	164	170	101	451	683	444	493	294
Eastern Jumna	243	284	274	208	215	717	789	897	622	659

MAINTENANCE CHARGES PER ACRE.

15. The maintenance charges per acre irrigated are given below :—

Canal.	Rupees.				
	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Upper Ganges	1·03	0·91	1·45	1·25	1·60
Lower Ganges	1·11	1·06	1·64	1·89	2·34
Agra	1·47	1·02	2·20	1·58	2·46
Eastern Jumna	0·83	0·76	1·24	0·91	1·09

The small area irrigated accounts for the apparent increased charge per acre. The actual expenses on the Upper and Lower Ganges Canals were, respectively, ₹8,268 and ₹35,541 less than in the previous year; but on the Agra Canal there was an increase of ₹20,381, and on the Eastern Jumna Canal of ₹24,737.

NAVIGATION OPERATIONS.

16. The results of the year's operations under navigation are shewn below :—

Canal.	1886-87.			1885-86.			1884-85.		
	Gross revenue (receipts).	Working expenses.	Deficit.	Gross revenue (receipts).	Working expenses.	Deficit.	Gross revenue (receipts).	Working expenses.	Deficit.
	₹	₹	₹	₹	₹	₹	₹	₹	₹
Upper and Lower Ganges	19,821	35,119	15,298	20,026	31,924	11,898	18,698	30,845	12,147
Agra	11,734	6,331	—5,403	5,674	5,321	—353	5,783	6,293	510
Total	31,555	41,450	9,895	25,700	37,245	11,545	24,481	37,138	12,657

On the Upper and Lower Ganges Canals there was a loss of ₹15,298, against a loss of ₹11,898 in the previous year. No material improvement can be expected until the new Nadrai Aqueduct is completed and constant running introduced on the Cawnpore Branch.

The Agra Canal shews a profit of ₹5,403 against a profit of ₹350 in 1885-86.

MINOR RECEIPTS.

17. The actual receipts realized from minor sources of income are exhibited below :—

	1883-84.	1884-85.	1885-86.	1886-87.
	₹	₹	₹	₹
Plantations	1,47,040	1,49,502	1,60,657	1,75,542
Water-power	72,765	60,668	73,761	89,361
Miscellaneous	54,263	50,917	50,404	48,540

The increase under water-power is chiefly due to higher rates being obtained on account of mill leases.

SPRING-LEVEL OBSERVATIONS.

18. Spring-level observations continue to be carefully recorded. The results shew that, with some few exceptions the spring-level on the Upper and Lower Ganges Canals was, on the whole, lower than in the previous year, and there can be little doubt that a few years of average rainfall will bring it down to the level at which it stood before the exceptionally wet years of 1884 and 1885.

On the Agra Canal the diagrams shew that, on the average, there has been a slight rise. The rainfall along this canal, however, especially in the Agra district, has been very heavy during the last three years, and this in itself is quite sufficient to account for the rise which has taken place.

DRAINAGE WORKS.

19. The drainage works were not so severely strained as in the previous year, and acted well and efficiently.

PROFITS OF PRODUCTIVE WORKS.

20. The following statement summarizes and compares the net profits and the percentage on capital of the four productive works:—

Year.	Upper Ganges.		Lower Ganges.		Agra.		Eastern Jumna.	
	Net profit.	Percentage on capital.	Net profit.	Percentage on capital.	Net profit.	Percentage on capital.	Net profit.	Percentage on capital.
	₹		₹		₹		₹	
1882-83 . . .	20,05,684	7·24	10,72,107	4·14	3,53,028	4·15	8,26,665	28·42
1883-84 . . .	23,60,388	8·45	11,92,654	4·45	5,91,425	6·47	8,32,307	27·06
1884-85 . . .	15,55,938	5·54	7,35,740	2·67	1,60,814	1·91	6,17,349	20·14
1885-86 . . .	18,23,237	6·48	5,78,616	2·04	3,84,202	4·32	7,29,881	23·51
1886-87 . . .	14,11,235	5·01	3,48,628	1·16	1,70,223	1·96	6,87,266	22·05

PROTECTIVE WORKS.

21. The year under review was the first in which irrigation was done during both seasons from the Betwa Canal.

The maintenance charges amounted to ₹76,348, whilst the income was ₹23,157, thus showing a deficit of ₹53,191.

The seasons were exceptionally favourable, as the monsoon commenced early and continued late. Good winter rain also fell over the whole country commanded by the canal, and the demand for irrigation was consequently very slack throughout the year.

MINOR WORKS.

22. On the Rohilkhand Canals there was a loss of ₹41,435 as compared with a loss of ₹35,929 in 1885-86.

On the Bijnor Canals the net profits were ₹11,454, against ₹15,478 in the previous year.

On the Dún Canals there was a net profit of ₹41,012, against ₹44,056 in 1885-86.

On the Bundelkhand Lakes there was a loss of ₹4,318, against a loss of ₹6,578 in 1885-86.

23. The net profits and the percentage on the total capital outlay from all the canals in the North-Western Provinces is compared with the results of the ten previous years in the following statement:—

Year.	Capital at end of each year.	Net profits.	Percentage on capital.
	₹	₹	
1876-77	4,20,12,822	25,76,406	6·13
1877-78	4,34,66,488	31,55,858	7·26
1878-79	4,46,21,616	38,28,437	8·57
1879-80	4,60,35,380	28,06,249	6·09
1880-81	6,45,61,716	35,38,941	5·48
1881-82	6,62,06,214	40,82,750	6·17
1882-83	6,76,33,960	43,01,052	6·36
1883-84	6,90,92,987	50,69,145	7·33
1884-85	7,02,83,698	31,28,710	4·45
1885-86	*7,51,49,595	35,44,623	4·72
1886-87	*7,70,59,223	25,76,874	3·34

* Including the Betwa Canal.

ORDER.—Ordered, that the above Resolution be submitted to the Government of India, and that it be published in the *North-Western Provinces and Oudh Gazette*.

Ordered, also, that it be circulated to other Governments and Departments, as usual.

J. G. FORBES, *Colonel, R.E.*,
Secretary, P. W. D., N.-W. P. and Oudh.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

English duties on Indian silverware.

The Governor-General in Council directs that the subjoined correspondence be published for general information.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

No. 350, dated 26th October, 1886.

From—The Government of India,
To—The Secretary of State for India.

We desire to call Your Lordship's attention to the correspondence on the subject of the import duties on Indian manufactured silver in England ending with our Despatch No. 46, dated the 1st August, 1884.

2. The question discussed in that correspondence has no direct bearing on the problems connected with the present condition of silver, which have been referred to a Royal Commission. Any measure, however, which results in a more extended demand for silver cannot fail at any time to have importance from the point of view of this country. We stated in paragraph 3 of our Despatch No. 19 (Separate Revenue), dated 14th March, 1884, that we were unable to admit the sufficiency of the arguments employed by the Lords of the Treasury; and we think that the present may be a favourable opportunity, in view of the attention which is now directed very generally to questions connected with the more extended use of silver, of again urging upon their attention the expediency of adopting the measures in regard to the English duties on manufactured Indian silver and to compulsory hall-marking which were indicated in our previous despatches. Should Your Lordship concur with us, we trust therefore that steps may be taken with the view of again, at the present time, bringing the matter before Her Majesty's Government.

No. 33 (Statistics and Commerce), dated 3rd March, 1887.

From—The Secretary of State for India,
To—The Government of India.

With reference to your letter dated 26th October, 1886, No. 350 (Finance and Commerce), I forward herewith a copy of correspondence with the Treasury which has taken place in consequence of that letter on the subject of the English plate duties and the system of compulsory hall-marking.

2. I may observe that it appears from the United Kingdom Trade Accounts for 1885 that of a total of 97,685 oz. of silver plate imported during that year from all sources, 24,972 oz. came from British India; and, allowing for the re-exportation of a portion of the latter, the amount of customs duty realised on importations of Indian plate is estimated approximately to have been £1,715 out of the total amount of £6,708.

Dated 15th December, 1886.

From—J. A. GODLEY, Esq., C. B., Under-Secretary of State for India,
To—The Secretary to Her Majesty's Treasury, London.

With reference to previous correspondence on the subject of import duties on Indian plate and compulsory hall-marking, and with reference also to the

statement made by the Under-Secretary of State for India in the House of Commons on 21st September last in answer to a question by Sir G. Balfour, I am directed by the Secretary of State for India in Council to forward herewith, for the consideration of the Lords of the Treasury, a copy of a letter received from the Government of India, dated 26th October 1886, on the above mentioned subject.

I am to add that His Lordship entirely concurs in the views of the Government of India with regard to the laws affecting the admission to this country of silver articles manufactured in India.

Dated 9th February, 1887.

From—Sir R. E. Welby, Secretary to Her Majesty's Treasury, London,
To—The Under-Secretary of State for India.

I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, for the information of the Secretary of State for India in Council, that they have considered your letter of the 15th December last, covering a despatch from the Government of India urging upon Her Majesty's Government the expediency of repealing the English duties on manufactured Indian silver, and the regulations which subject such silver to compulsory hall-marking.

My Lords, without expressing any opinion upon the merits of the duties in themselves, fear that they cannot hold out hopes that the state of finance will enable the Chancellor of the Exchequer to take these duties into consideration.

No. 174, dated 2nd July, 1887.

From—The Government of India,
To—The Secretary of State for India.

We have the honour to acknowledge the receipt of Your Lordship's Despatch No. 33 (Statistics and Commerce), dated 3rd March, 1887, forwarding copy of correspondence with the Treasury on the subject of the English plate duties and the system of compulsory hall-marking, from which it appears that the Treasury could not at that time hold out any expectation that the state of the finances would enable the Chancellor of the Exchequer to take these duties into consideration.

2. The language held, however, by the Chancellor of the Exchequer on the occasion of the introduction of the Budget on the 21st April last, in reply to a question from Sir R. Temple, leads us to think the matter may again with advantage be pressed upon the attention of Her Majesty's Government. We forward to that end a summary of the correspondence which has hitherto taken place on this subject, and we desire to submit, for Your Lordship's consideration, the expediency of again bringing the matter forward.

The English duties on Silver and compulsory hall-marking.

For a long time past, the Government of India has been endeavouring to induce the English Government to relieve Indian silverware from the import duties, which, combined with the practical effect of the system of compulsory hall-marking, prevent any real development of what might otherwise become a trade of some importance. The official discussion of the question extends over a period of more than six years. Before Sir Evelyn Baring joined his office of Financial Member of the Council, he wrote to Mr. Gladstone on the subject, and, in a note written in January 1881, he said that Mr. Gladstone in reply expressed the opinion that the desire for the repeal of the duties well deserved consideration, and that he should be very happy if he could comply with it "in the very next financial arrangements." Mr. Gladstone

afterwards requested to be furnished with further facts bearing on the question. These facts were collected and furnished to Sir E. Baring, and the Government awaited the action of the English Government.

The facts are these: On silver plate manufactured in England and imported from abroad a duty of 1*s.* 6*d.* an ounce is levied. The duty is collected at the Assay Office, where all articles of silver plate, certain small wares excepted, because of the difficulty of testing and marking them, are tested, and, if found equal to the English standard, are hall-marked. If not equal to the standard, they were down to 1883 immediately destroyed. In that year however, in consequence of a report from a Select Committee of the House of Commons and complaints from India, a modification was made; and now if imported silverware is not equal to the standard, the importer may re-ship it out of England. Hall-marking is compulsory under a penalty of £10 for each piece of plate exposed for sale without the hall-mark, and confiscation of the plate. The ordinary standard in England being fixed at ·925 fine, it is impossible for Indian silver-plate made from rupee silver to pass the test, for rupee silver is a little below the standard.

An important point in connection with the working of these regulations, which has hitherto, curiously enough, escaped the attention of those interested in the trade, is that the English manufacturer only nominally pays 1*s.* 6*d.* an ounce on his plate, his actual payment being not more than 1*s.* 3*d.*, for he receives an allowance of one-sixth "in consideration of the unfinished state of "the wares when they are produced for the assay, at which time the duty is "assessed. This allowance is much in excess of the average difference between "the finished and unfinished article." (*28th Report of the Commissioners of Inland Revenue, page 56.*) The English manufacturer, in fact, removes the articles from his workshop before they are burnished and finished off, has them assayed and marked, gets the rebate of 3*d.* out of the 18*d.* fixed by law, and then takes the articles away to be finished. The Indian manufacturer cannot do this: he must send his wares to England in a condition fit for sale, and consequently is charged the full 18*d.*, provided that the metal is up to the standard. If it is not, the wares must be removed out of England. Therefore, as the law and regulations operate in practice, an Indian manufacturer is prohibited from selling his goods in England if they are made of rupee silver, the only silver current in India; and if he goes to the trouble and expense of procuring finer silver of the standard required in England, he still finds the English manufacturer protected against him to the extend of one-sixth, or 16·6 per cent., of the duty supposed to be levied alike on English and foreign wares.

In his Budget speech on the 4th April, 1881, Mr. Gladstone held out hopes that the silver duty might be repealed for the following reasons: (1) the general advantage attending the removal of excise duties upon products of British industry; and (2) that "there is every reason to believe that India is well qualified to supply us with silverware in a manner advantageous to herself and the trade and the people of this country were it not for the operation of this tax." Unfortunately, there were weighty reasons against the immediate removal of the duty in the ordinary manner, the chief of which was that it would give rise to a series of claims for drawbacks which Mr. Gladstone estimated at £170,000, or three and a half year's revenue, and might possibly give rise to fraudulent claims. Instead of an immediate removal of the tax, Mr. Gladstone intimated his intention of introducing a resolution proposing that, in order not to disturb sensibly the course of trade, the duty should be reduced annually by threepence an ounce until it expired. No interference was proposed with regard to the gold duties. Subsequently, Mr. Gladstone announced in Parliament that, in addition to the difficulties likely to arise from claims to drawback, further enquiries showed that objections also existed to the gradual abolition of the duty. Accordingly, in Committee, Mr. Gladstone informed the House that the measure had been abandoned.

The Government of India waited until the following year, and in March 1882, after the removal of the Indian cotton duties, telegraphed to the Secretary of State: "We desire very earnestly to press upon Her Majesty's Government the importance of repealing the silver duty this year if possible. We believe

that this would be a very gracious act at a time when we have repealed our Customs duties; it would give much satisfaction to the public here, and would be highly politic."

Lord Hartington replied: "I caused the substance of your telegram of the 17th March last, relative to the importance of repealing the silver duty, to be communicated to the Lords Commissioners of Her Majesty's Treasury. The Chancellor of the Exchequer, in his Financial Statement delivered in Parliament on the 24th of April, remarked that he is not prepared to make any proposals for the repeal of the duty at the present time, although he recognised that there were two reasons which recommended its abolition, the first and special one being the strong opinion expressed by your Government in favour of its early removal; and the second, the embarrassment to the market and hinderance to trade caused by its maintenance."

Despatch No. 137, dated 4th May, 1882.

The question now began to be pressed upon the attention of the Government of India by the mercantile and trading bodies of the country. The Madras Trades Association in December 1882, in a memorial addressed to the Local Government, complained of the serious obstacles to the trade in silverware—namely, the heavy duty and the compulsory assay by the Goldsmiths' Company, as virtually amounting to prohibition, and as being, moreover, a protective duty in the interests of the English silver trade. The Association complained of the law which required that all manufactured silver for sale must be equal in fineness to English standard silver, and that articles under that standard must be "smashed and battered" and confiscated, and the owner held liable to a penalty of £10 for each article. The method of the assay was also objected to, the process being so "clumsily and ruthlessly" performed that English manufacturers were compelled to send their wares to the Hall in an unfinished state, unpolished and unburnished—a course not open to the Indian manufacturer, who had to run the risk of his finished goods being damaged, if not injured beyond recovery.

Following this representation, the Calcutta Trades Association in January 1883 addressed the Government of India on the subject, representing the difficulty of introducing the fine silver work of Cashmere, Cutch, the Punjab, and Southern India into England, not only because of the duties, but also because the work was liable to be broken up and rendered fit only for the melting-pot by the Assay Office, if it "fails by one-fourth of a grain to come up to the English standard of fineness, which differs considerably from the Indian standard of the rupee." Such a small deviation from the English standard could not make any real difference in the intrinsic value of the silverware to the purchaser. Moreover, the highly chased and elaborate work of the Indian silversmith could not be made in soft pure silver, and required a little alloy to give it some degree of hardness; nor could Indian manufacturers submit their work in a rough unfinished state, as English manufacturers did, in order to avoid the defacing operations of assaying and marking.

As an instance of the complicated and elaborate method of working the tax, the Association mentioned a case in which a firm in Calcutta, having an elaborate and artistic piece of silver work made in London to order, were compelled to forego a claim of £20 to which they were entitled as drawback on export, because the English Custom-house insisted upon the work being taken to pieces and the different pieces of silver weighed, which could not be effected without much difficulty and delay.

These two memorials were sent to the Secretary of State. The Government of India again strongly urged the repeal of the duty, representing the hardships involved by the rigorous application to all Indian silverware (which it is not practicable in all cases to work in soft pure silver) of the English standard of fineness; the consequence of falling below this in the slightest degree being that Indian work was not merely forbidden sale in England, but was broken up and rendered valueless as a work of art. It was also pointed out that the system under which duty was levied placed the English silversmith

Despatch No. 26, dated 23rd January, 1883.

at an advantage over his foreign competitor—a system not in harmony with the general policy of He Majesty's Government; that the repeal of the duties would act beneficially on the general financial position of the Government of India; and that any measure tending to increase Indian exports, and thus draw some portion of the population, however small, away from agriculture to manufactures, would be very desirable. It was also urged that there were political considerations in favour of repeal. After the large sacrifices India had made to give complete freedom to trade by the abolition of her import duties (a sacrifice regarded by a considerable section of the Indian community as having been dictated in the interests of England), it seemed not unreasonable to expect that a small fiscal reform of this nature which would benefit India should be made by Her Majesty's Government in England.

On the subject of drawbacks, it was observed that in all customs reforms carried out in India no drawbacks were allowed.

This despatch having been sent to the Treasury by the India Office, the Secretary to the Treasury replied* to the effect that the primary consideration with the Treasury was the financial equilibrium of the Home budget, and that the question of repeal of the duties was complicated by the large sum which would be claimed as drawbacks. The Indian cotton duties were "purely and avowedly protective," while the silver duties were "only framed to countervail the excise duty imposed upon the Home manufacture."

* 13th March, 1883.

The India Office, in its reply to this letter, called attention to the statement of the Government of India that no drawbacks were allowed in India in cases of customs reforms, and also showed that the statement that the Indian cotton duties were "purely and avowedly protective" was inaccurate. "These duties were originally imposed purely for fiscal purposes, and at a time when no Indian manufactures existed which they could operate to protect; they were subsequently modified at different times in order to remove the protection which it was found that they were alleged to afford to certain classes of Indian-made goods, and they have recently been entirely abolished, in common with import duties, upon many other articles."

This correspondence having been sent to the Government of India, it requested† that the matter might again be pressed upon the consideration of Her Majesty's Government, and expressed the hope that, in view of the smallness of the amount of revenue involved, it would be possible at some early date to preserve fiscal equilibrium without the maintenance of these highly objectionable duties.

† Despatch No. 39, dated 22nd June, 1883.

The answer of the Treasury was as follows:—

"It would not be seemly for my Lords to controvert the views expressed by the Government of India on the objects of their fiscal arrangements. But, on the other hand, with reference to the last paragraph of the letter from the Government of India, to which Lord Kimberley calls their Lordships' attention, they must remark that it is for them to judge whether, and when, Parliament can be asked to charge on the tax-payers large sums (under the name of drawback) to be paid to the holders of silver goods, in order to relieve the purchasers of silver who generally belong to the wealthier part of the community, from the present tax on plate."

The Secretary of State sent this answer to the Government of India, with the remark‡ that he did not think it advisable to continue the discussion with the Treasury.

‡ No. 186, dated 18th October, 1883.

The discussion then ceased, but the papers having been published, it was revived in February 1884 by another representation from the Calcutta Trades Association, who expressed their inability to understand why in the case of silver more than in that of any other goods the payment of drawbacks should be allowed to stand in the way of the abolition of a highly objectionable duty.

The Association represented also that although many Indian firms suffered heavy pecuniary losses on the abolition of the cotton import duties, no drawback was allowed them. It added that the English silver duties restricted trade even in India. Travellers in India would doubtless purchase more freely than they did the beautiful chased silver work of this country were it not for the difficulties they have to encounter with such articles on their arrival in England. There they were placed in bond and weighed in order to determine the duty. The owner had next to make a statutory declaration that the articles were not intended for sale or exchange. If at any subsequent time he should sell or exchange the articles in an unmarked condition from any unforeseen cause whatever, he incurred the risk of a penalty of £10 for each article, and furthermore their entire confiscation. Should silverwares imported for sale be found to assay one-fourth of a grain under the English standard, though not now broken up immediately as formerly, they were returned to bond and required to be re-exported within three months, failing which they were broken up.

The Bengal Chamber of Commerce also* urged that the duty was a "practically prohibitive imposition," and described the hall-marking system as "so oppressive that the manufacturers of Indian silver ware are deterred from entering the English market, and offering for sale the beautiful and highly ornamental work which they can produce."

* Letter dated 7th March, 1881.

The Madras Trades Association also again wrote with reference to a complaint made by Messrs. Orr & Co., of Madras, of the treatment of certain Indian plate imported into England. The grievance complained of consisted of the breaking up by the Assay authorities of a quantity of embossed "Swami" jewellery which that firm had sent to England in 1881 as a trial consignment to introduce these wares into the United Kingdom. The articles were made of rupee silver, and this being fractionally below the English standard, the whole consignment was broken up, notwithstanding that every effort was made to avert its destruction, and although Messrs. Orr agreed to re-export the plate.

These three representations were sent to the Secretary of State, and the propriety of repealing the duty was again pressed upon the consideration of Her Majesty's Government. The Government of India added that there were grounds for believing that the amount of drawback likely to be payable on the repeal of the duties would not be by any means so considerable as represented. It was believed that English stocks were in a great measure old in workmanship and out of date, and such as could not claim heavy drawbacks. Moreover, the agitation for the repeal of the duties and the abolition of hall-marking having continued so many years, manufacturers had largely reduced their stocks and were working principally for orders only.

No. 19, dated 11th March, 1881.

Subsequently, a memorial from the Bombay Chamber of Commerce and a resolution passed by a meeting of the Karachi Chamber of Commerce, in support of the abolition of the silver duties and compulsory hall-marks, were sent to the Secretary of State.

Meanwhile the subject was being discussed in England. In November 1883, the Secretary to the Peninsular and Oriental Steam Navigation Company addressed the Secretary of State with reference to the Indian parcels post service, which it carried between India and the United Kingdom under an arrangement with the Director-General of Post Offices in India. Many of the homeward-bound parcels carried by the Company contained small articles of silver plate sent by persons in India to friends and relatives in England, and were formerly cleared through the Customs without any difficulty upon payment of the import duty of 1*s.* 6*d.* an ounce. By a change in the law effected by the Revenue Act of 1883, plate could not be passed through the Customs, nor duty paid thereon, as previously, until assayed, stamped, and marked, an exception being made in the case of articles imported for private use and not for sale, which were passed through the Customs upon the receipt of a declaration made by the addressee before a Magistrate that it was intended solely for private use. The Directors suggested to the Secretary of State that a representation might be made to the Lords of the Treasury, requesting that articles

of silver plate shipped from India by the Indian parcels post by P. & O. steamers should be exempt from the conditions of the Revenue Act of 1883, or that, instead of requiring a declaration to be made by the addressees, the same should be accepted if made by the P. & O. Company to the effect that, to the best of their knowledge and belief, the plate was imported for private use and not for sale.

In November 1883, Messrs. C. B. Pare & Co. wrote to the Secretary of State with a complaint somewhat similar to that of Messrs. Orr. They stated that, with a view of opening out a trade with India in art manufactures, they had ordered as an experiment a variety of silver articles from Cashmere, but that these had been stopped by the Customs as being made of rupee silver, and under the British standard. The goods were ordered to be re-exported at once under penalty of being broken up. Messrs. Pare & Co. submitted that the restrictions imposed—the heavy duty, the necessity of taking out a plate license before offering for sale, and the enforced hall-marking—were prejudicial to the best interests of English silversmiths. Without such obstructions, a large trade might spring up with India, such as had been opened out with Japan, the introduction of whose manufactures had proved most beneficial to English art metal and porcelain manufacturers.

In forwarding these two letters for the consideration of the Lords of the Treasury, the Secretary of State strongly urged the case of the P. & O. Company regarding the exemption of Indian parcel post packages from the provisions of the Revenue Act of 1883 for favourable consideration. With regard to Messrs. Pare's complaint of the stoppage at the Custom-house of a quantity of art silver work from Cashmere as an "illegal importation," and the orders for its re-exportation within 28 days under penalty of being broken up because it was made of rupee silver, that is to say, because it did not contain 222 dwts. of pure silver (English standard), but 220 dwts. (rupee standard) to the pound of 240 dwts., Lord Kimberley said that he could not characterise such a proceeding as other than barbarous in the case of works of art. His Lordship stated that it was unnecessary for him "to point out the extreme hardship, and indeed absurdity, of requiring manufacturers in India to work in silver of a higher standard of fineness than that of the rupee coined and circulated by the British Government, or to dwell upon the injury suffered by the United Kingdom in consequence of the virtual exclusion from it of articles of Indian plate in universal demand for their artistic merit and the perfection of their workmanship." In the Secretary of State's view, the grievance complained of by Messrs. Pare and other importers of Indian silver goods might be removed by providing either "(*a*) that hall-marking be established in India, in which case it should be enacted that goods bearing the Indian hall-mark be passed at the Custom-house, on payment of duty, without any assay; or (*b*) that goods from India be assayed as now, and, if found to be up to the Indian standard (that is, of the rupee), be marked with a special and clearly distinctive mark, and then allowed, on payment of duty, to pass into use in this country." The distinction between British and foreign plate might be maintained by requiring the latter to be marked F. In the case of plan (*a*) meeting with approval, Lord Kimberley pointed out that it would be necessary to consult the Government of India. He himself, however, preferred the second course (*b*), and earnestly recommended it for favourable consideration, as it appeared to him that "the present state of things is wholly indefensible, and indeed a discredit to this country."

The Treasury admitted that the P. & O. Company's complaint was reasonable, and said that in future a declaration by the Agent of the Company, such as that proposed, would be deemed sufficient, subject to reasonable limits as to size and weight, and with necessary safeguards to prevent the privilege being abused.

As regards Messrs. Pare's case, the Treasury would not admit that any hardship existed. The law which laid down that silver goods below the English standard could not be exposed for sale had been long in force, and was well known to the trade; and by the Revenue Act of 1883, the old law, that if such

plate on assay was found below standard it was broken up, had been modified so as to allow the alternative of re-exportation.

The Treasury declined to entertain the proposal that either an Indian assay hall-mark should be established or recognised in England, or that a special assay and mark should be established in England for silver of the rupee standard, because "the adoption of either suggestion would involve a serious disturbance of the present system." It was thought, however, that a solution might be found which would be practically sufficient for the purposes of the Government of India. The class of goods whose exclusion was complained of were of a peculiar character as regards workmanship, and were highly ornamental. If some proper definition of them could be obtained, legislative powers might be sought so as to exclude them from compulsory assay, and they could thus be imported and sold freely upon payment of the customs duty. It was said that the legal advisers of Government would be consulted as to the preparation of a Bill to this effect.

Nothing further has been heard on this part of the subject, and the whole question was dropped until October 1886, when the Government of India wrote to the Secretary of State,* suggesting that the appointment of a Royal Commission to enquire into the present condition of silver afforded a favourable opportunity of again urging the expediency of adopting the measures in regard to the English duties on manufactured Indian silver and to compulsory hall-marking, which were indicated in previous despatches.

* No. 350, dated 30th October, 1886.

The Secretary of State wrote to the Treasury, entirely concurring in the views of the Government of India. The Treasury† answered, simply, that without expressing any opinion upon the merits of the duties in themselves, it was feared that the state of the finances would not enable the Chancellor of the Exchequer to take the duties into consideration.

† Letter of 9th February, 1887.

In view of the large surplus shown by the Chancellor of the Exchequer in the Budget presented to Parliament last April, and of the disposal of that surplus by extensive remission of taxation, it was hoped that these duties might have been taken up and dealt with. Nothing has been done however. It would appear from a reply to a question put in the House of Commons (by Sir Richard Temple on 21st April) that the Chancellor had intended to deal with the matter in his Budget, but that difficulties had arisen. The nature of the difficulties was not stated. The question and answer are quoted below from Hansard:

Sir Richard Temple.—In deference to the interests of the people of India, I have to ask the Chancellor of the Exchequer whether he will be pleased to consider favourably the remission of the duty on the silver work imported from India to England? I am aware that this matter has been, in former discussions, mixed up with the question of hall-marking. But I do not wish so to mix it up. Personally, I am in favour of the system of hall-marking, as insuring public confidence in the articles so marked. But if this process is found to be too rough for the delicate silver fabrics of India, then some other mechanism can be found for assaying the purity and quality of these fabrics. Sir, the remission of this duty was proposed by a Committee of this House in 1879. It was mentioned in the Budget speech of 1881. A more recent discussion took place in this House in May 1884. On that occasion the Honourable and learned Member for Chatham (Sir John Gorst) spoke as follows:—

"He wished to bring a little friendly pressure to bear upon the Chancellor of the Exchequer with regard to this subject [illegible] it was admitted on all hands that this tax ought to be abolished. The Government them[illegible] had in three successive years proposed to abolish it. The only reason that it existed appeared to be the difficulty of dealing with the question of drawback. If, as the Honourable gentleman (Mr. Slagg) stated, £100,000 could settle this matter, the Chancellor of the Exchequer would, be thought, be delighted to settle it on those terms."

Now, Sir, the Honourable and learned gentleman has become Under-Secretary of State for India. I hope he will exercise his benign influence in the direction indicated by him in 1884. I know that £100,000 may not cover, perhaps, the whole amount of drawback that would have to be allowed. This drawback is, in fact, a refund of the duty which would have to be allowed in the event of the duty being remitted. Otherwise, the unsold silver which had paid duty would be placed at a disadvantage in competition with the silver which, by the remission of duty, would be excused from payment. Still, the drawback would not be allowed to every

holder, nor to all silver; but only to silver duty-paid and unsold at the time in the stores of the silver merchants. On this point, in May 1884, the Honourable Member for Bodmin (Mr. Courtney), of whom I desire to speak with special respect in your presence, and who was then Secretary to the Treasury, made a useful suggestion, which I will quote, to the effect—

"That some understanding should be arrived at with the big dealers in gold and silver plate as to the terms on which their claims for drawback could reasonably be met."

Sir, I am sure that in that way the question may be arranged with great satisfaction to the importers, and with justice to the claims of India, for which four main reasons may, in brief, be adduced. First, this silver work is a manufacture of extraordinary beauty, which, if unfettered, may attain great popularity in England. Secondly, the trade between India and England has, on the one hand, stimulated the exportation of raw produce, but has extinguished many of the ancient Indian manufactures. I cannot complain of this process of trade and industry; but I urge it as a reason why we should maintain, so far as we fairly can, those characteristic and interesting manufactures which still remain. Thirdly, India has been generous to British interests in remitting all duties on the importation of British manufactures. And, fourthly, this Indian silver work does not compete with any articles manufactured in England; but if allowed a fair field, without any fiscal burden, it will make its way in England, and hold its own there.

Mr. Goschen.—In reply to my Honourable friend behind me (Sir Richard Temple), I may say that two days ago, if he had raised this question, I should have told him that I was going to deal with the matter in my Budget, and that I was going to make a proposal which I thought was favourable to the introduction of Indian silver into this country. At the last moment, however, a difficulty arose which prevented me from doing so. If I should see my way to deal with the subject, I will certainly do so.

The case therefore now stands, with two modifications, where it stood at the end of 1880. These two modifications are—

(1) that when small silver articles are sent as presents by private persons in India to their relations and friends in England through the overland parcels post, it is no longer necessary that the addressee should make a formal declaration before a magistrate, a declaration from the Agent of the P. & O. Company being accepted;

(2) that when silver articles are sent for sale in England, they may be returned to India if found below English standard, whereas before 1883 they were destroyed.

It is obvious that these modifications have not had the least effect in permitting free trade in silverware between India and England: the trade is practically prohibited.

It has only to be added that at the present price of silver the duty on imported silverware represents a tax of about *40 per centum ad valorem* on the metal employed in the wares; that the whole revenue from the gold and silver duties was last year only £67,313; and that it appears from the reports of the Commissioners of Inland Revenue that these duties show a declining tendency.

No. 11 (Statistics and Commerce), dated 9th February, 1888.

From—The Secretary of State for India,

To—The Government of India.

With reference to your letter dated 2nd July, 1887, No. 174 (Finance and Commerce), I forward herewith a copy of a letter to the Treasury, dated 19th August, 1887, and of the reply thereto, on the subject of the English duties on Indian plate.

2. I shall be glad to hear what view Your Excellency takes of the several points brought forward in the letter of the Clerk to the Goldsmiths' Company.

Dated 19th August, 1887.

From—J. A. Godley, Esq., C.B., Under-Secretary of State for India,

To—The Secretary to Her Majesty's Treasury.

With reference to your letter dated 9th February, 1887, and previous correspondence, I am directed by the Secretary of State for India in Council to

forward herewith a copy of a letter from the Government of India, and enclosure, urging again the abolition of the English duties on plate and of the system of compulsory hall-marking.

I am to add that Lord Cross entirely agrees with the views entertained, and now again so forcibly stated, by the Government of India; and that he trusts that this question will now be taken into the serious consideration of the Lords of the Treasury.

Dated 7th January, 1888.

From—G. L. RYDER, Esq., Her Majesty's Treasury,
To—The Under-Secretary of State for India.

The Lords Commissioners of Her Majesty's Treasury have given their best attention to your letter of the 19th August last, with its enclosures, relative to the English duties on plate and the system of compulsory hall-marking in connection with the importation of Indian silver plate into this country, and they have been furnished with an expression of the views of the Clerk to the Goldsmiths' Company on the third paragraph of the memorandum of the Indian Government.

A copy of Mr. Prideaux's letter is herewith enclosed for the information of the Secretary of State for India in Council. He will observe from that letter that the authorities on hall-marking in this country dispute the accuracy of the contention of the Indian Government as to the disadvantage at which the Indian silversmith is placed as compared with the British silversmith.

On the general question of the plate duties, I am to request you to inform Lord Cross that my Lords have further and carefully considered it; and that, though the views of the Indian Government, in which the Secretary of State concurs, will continue to be borne in mind by this Board, the Chancellor of the Exchequer, as at present advised, is not prepared to commit himself to a proposal for altering the duties.

Dated 23rd September, 1887.

From—WALTER S. PRIDEAUX, Esq.,
To—T. N. CRAFER, Esq.

I have your letter of the 21st instant, with the accompanying papers, and I have, as you requested, directed my attention to paragraph 3 of the letter from the Government of India.

In the first place, I would remark that the statement that the point particularly referred to in this paragraph has hitherto escaped the attention of those interested "in the trade" is inaccurate, for there was a good deal of evidence upon this point given before the Select Committee on Gold and Silver Hall-marking in 1878.

It is not the case that the English manufacturer is protected to the extent of the whole allowance of one-sixth. The amount of profit which the manufacturer makes varies, no doubt, in the case of different articles, but I think that I cannot do better than refer you to the answer given by Mr. Garrard to questions 886 and 887 in the evidence given before the Select Committee above mentioned.

In the first answer, Mr. Garrard shows, as I think, conclusively that in the case of certain articles which he mentions, the profit is less than a penny per ounce; and in the second answer, he gives one good reason why it has always been understood and intended that the British manufacturer should make a small profit.

In point of fact, while the English manufacturer has to pay duty upon the unfinished article, which duty he may very possibly not be recouped for several years, the Indian importer is not asked to pay the duty until his wares are ready for marking, and presumably on the point of being sold.

I may also point out that the Indian importer is protected against the English manufacturer in two particulars: (1) If his work is found to be below the standard, he may have his packet sent back to him without damage, while the work of the English manufacturer would be at once broken up; and (2) in the case of wares falling within the definition laid down in the Revenue Act, 1884, such wares may be exempted from the necessity of being marked.

Although it is telling a thrice told tale, I may perhaps remark that we have had plate from both India and Burma which has easily passed the British standard, and that in the case of Indian work which we have been obliged to condemn, such work has not approached even the rupee standard. This cuts the ground from the statement contained in the last two lines of paragraph 2.

The memoranda and letters which passed between the Chancellor of the Exchequer and myself in 1884 are, of course, within the recollection of, and accessible to, the Government.

I return you the papers, and shall be very glad to give you any further information or help in my power.

No. 108, dated 24th April, 1888.

From—The Government of India,
To—The Secretary of State for India.

We have the honour to acknowledge the receipt of Your Lordship's Despatch of the 9th February, 1888, No. 11 (Statistics and Commerce), from which we learn with regret that the Treasury does not propose to take any action in the matter of the English duties on Indian silver goods.

2. Your Lordship desires to know our views on the remarks made by the Clerk to the Goldsmiths' Company in his letter enclosed in the despatch.

These remarks are in substance as follows:—

(1) It is not accurate to say that the question of rebate has escaped the attention of those interested in the trade.

(2) It is not the case that the English manufacturer is protected to the whole extent of the rebate; on some articles his profit is less than a penny an ounce; and it has always been understood and intended that he should have a profit, because he pays duty on an unfinished article on which the duty may possibly not be recouped for "several years;" the Indian importer, on the other hand, does not pay duty until his goods are ready for marking, and "presumably on the point of being sold."

(3) The Indian importer is protected against the English manufacturer in two ways:—(*a*) his work, if below standard, is sent back, while that of the English maker is broken up; and (*b*) some of his wares are exempted from the necessity of being marked.

(4) Some work from India has easily passed the standard, while other work which has been condemned was below even the rupee standard.

3. As regards the first of these remarks, we beg to point out that we have treated this case all through on behalf of Indian traders alone, and it was to them that reference was made, when it was stated that the matter seemed to have escaped attention, for in none of the memorials and letters addressed to us has it been noticed. The evidence before the Select Committee on the subject has no bearing on the effect of the rebate on competition between the Indian and English manufacturer.

4. As regards the second, we are aware that the whole sum of 3*d.* is not claimed as clear profit in all cases. The remarks of Her Majesty's Commissioners of Inland Revenue on this point were quoted from their 28th Report.

But if it is implied that because on some articles the profit is less than a penny an ounce, that profit is what is ordinarily derived from the rebate, we desire to point out that the articles in question belong to what is known as "flat" ware, that is, waiters, trays, and plates; that such articles were admitted in the evidence referred to to be falling out of use in England; and that, as a fact, such articles are not now made to any extent in India, any more than in England, of silver. Indian artware of that description is made of brass, copper, and other metals, not of silver. Our silver plate is of the kind in which the English manufacturer finds a large profit by reason of the rebate.

The remark that there is a good reason why the English manufacturer should get a large rebate which should not be given to the Indian importer rests on an assumption for which there is no ground. There is no reason to suppose that when Indian ware is imported, it is "on the point of being sold." It is in fact, except when made to order, in no better a position than English silver. The English maker sends his silver to be marked, and pays the duty just before he proposes to finish it off and expose it for sale. The Indian manufacturer sends his goods to England for the same purpose of exhibition for sale, and there is no reason of which we are aware why an Indian article should be sold sooner after arrival than an English article after it has paid the duty.

5. As regards the third point, there seems to be in the first clause a misconception of the effect of the treatment of Indian silver. So far as the English manufacturer is concerned, the protection to him is precisely the same, whether Indian wares are broken up or whether they are merely returned to the place whence they came. In either case they cannot be sold at all in England, and the English manufacturer retains his monopoly while he makes his wares of silver of the English standard, for the Indian manufacturer of wares made of silver of the Indian standard is not allowed to compete.

As regards the second clause, we desire to say that we are aware of the concession which allows the exemption from marking of certain imported goods; but, though the goods need not be marked, they are liable to the full duty of 18*d.*, while the English manufacturer gets a rebate on the same class.

6. As regards the fourth remark, we have to say that it is irrelevant. We are aware that some Indian ware imported into England has been stated to be of silver below the rupee standard, and we have made no representation in regard to such silver. We have stated that our case applies to silver of rupee standard and English standard. If of the former, it is not allowed admission into the English market at all; if of the latter, it has to pay the full 18*d.*, while English competing goods get the rebate. No answer is given to these statements except to say that the whole of the rebate is not clear profit. The rebate is not defensible even when only one-third of it is clear profit, but it is certain that in nearly all cases two-thirds of it, and perhaps more, are clear profit, and English silver is protected against Indian to the extent at least of 2*d.* in the ounce.

7. We regret greatly to learn that the Treasury does not propose to take any action on our representations. In the earlier stages of this correspondence, we were informed that there was a difficulty in connection with drawbacks. When we pointed out that such a consideration should not interfere with the proper treatment of the case, we were informed that financial difficulties stood in the way. When the financial difficulties had disappeared, we were told that a legal difficulty (the nature of which has not been mentioned) had arisen. In the enclosure of Your Lordship's present letter, we are informed, without any reason being assigned, that the Chancellor of the Exchequer is not prepared to alter the duties. We venture to represent to Your Lordship that the tone of the letter from the Goldsmiths' Company and the decision thereon of the Treasury cannot but create an impression that the present system is maintained solely in the interests of that Company and those whom it represents; and we would urge that India,* which has given up nearly a million of cotton duties on the ground that they protected native industry against English, has some claim upon England for reciprocity on its part in permitting free competition between foreign and native manufacturers.

* *Vide* House of Commons Resolution, dated 11th July, 1877.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending the 21st May, 1888.

The usual Meteorological summary is this week supplemented by a statement of the district rainfall throughout India.

This statement will appear weekly during the monsoon of 1888.

Perhaps the principal feature of the Meteorology of the past week has been the large pressure differences existing over India, and the results which have flowed from this distribution.

On the 15th the barometer was highest over the south of the Bay and lowest over the Upper Indus Valley, but the pressure was rising briskly on the West Coast and in Ceylon; and on the 16th the area of greatest pressure was transferred to that neighbourhood. At the same time the lowest barometer was reported from the Central Punjab, and this distribution, with an average difference of 0·460 inch, lasted until the 20th. On the 21st the barometer rose briskly over Northern India and fell over the Peninsula, so that the barometric differences decreased quickly, though the general distribution did not change much. In addition to the low pressure area over the Punjab, there has been a continuous depression of the barometer over Chutia Nagpur and part of Bengal and the North-Western Provinces. The influence of this secondary depression was chiefly manifested in drawing the winds over the head of the Bay and over Bengal more towards south-east, and in occasioning some increase to their strength. There has been during the whole week a strong indraught of air from the seas adjacent to India into the Indian region. Both on the east and west sides of India the wind has blown strongly. On the West Coast the direction was generally from between west and west-south-west, and at the head of the Bay from south and south-south-east. Over Rajputana, Central India, the Central Provinces, the Deccan, and Guzerat unusually strong and hot westerly winds have prevailed, but in Upper India calms and light variable airs have been very frequently reported.

Temperature rose generally between the 15th and 17th, fell on the 18th, and rose again between the 19th and the close of the week. The maxima have been high on all days of the week, except the 18th, when only two stations reported temperatures exceeding 110°. On the other days the following were the highest maxima according to date:

15th	...	...	116° at Jacobabad.
16th	...	...	117° at Jacobabad.
17th	...	...	116° at Ludhiana and Jacobabad.
19th	...	...	112° at Cuttack.
20th	...	...	113° at Cuttack.
21st	...	...	116° at Jacobabad.

In nearly all parts of North-Western India the maxima as a rule exceeded 110°.

The winds on the morning of the 15th showed no particular features. On the 16th they were increasing both at Colombo and Diamond Island, and south-west winds were probably prevailing over the whole of the south of the Bay. The Chart of the following day showed no further increase of strength, but on the 18th there occurred a rise on the Bombay Coast, which penetrated far inland. These strong winds continued on the 19th and 20th. On the 21st the strength of the wind rose in Ceylon, and reached normal monsoon force. These pulsations in the force of the wind in the Bay and on the West Coast are probably attributable to intermittent advances of the south-west monsoon current. This assumption is borne out by the rainfall of the past week, all the more southern parts of the Indian region having received heavy, in some places exceptionally heavy, rain.

At Moulmein and Amherst the week's fall exceeded 16 inches; and though the amount of rain decreased rapidly inland, yet over the greater part of Burmah there were fair rains. In Assam there was general excess, the only important exception being the Sylhet district, where the fall was deficient. Chittagong and East Bengal, like Assam and Burmah, received abundant rain, but in other parts of Bengal the normal weekly amount was not received. The Orissa rainfall, though on the whole deficient, was not largely so; but in Chutia Nagpur and Behar, except at Monghyr, Bhagulpur, Darbhanga, and Mozufferpore, any rain which fell was very slight.

In the North-Western Provinces the rainfall at this season is always slight, but during the week under review even this small average was not reached, and in very many districts no rain whatever fell. At Sidhauli in the Sitapur district, however, there occurred a heavy shower. In the Punjab about the normal, or indeed rather more than the normal, amount of rain fell in the south-eastern districts and at Amritsar and Gurdaspur; but elsewhere throughout the Province the week was practically rainless. The Bombay Presidency had less than the usual amount of rain, and over the Surat, Broach, and Ahmedabad districts, and from that region northward to Cutch and Kattiawar, there was no rain.

The Central Provinces had only slight and scattered showers of little importance, and the Berars, Rajputana, Central India, and Sind were rainless. Madras received general rain, and on the whole more than the average, though there was slight deficiency at some eastern and southern districts. Heavy falls of rain occurred in parts of the Vizagapatam, Kistna, Anantapur, and several of the southern districts.

Simla, *21st May, 1888.*

W. L. DALLAS,
for *Offg. Meteorological Reporter to the Government of India.*

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 19th May, 1888.*—Good rain everywhere, but more wanted in Ganjam, Vizagapatam, Chingleput, Trichinopoly, Madura, Tinnevelly, Coimbatore, and Salem. Crops generally good; affected by want of rain or by blight in a very few places. Pasture generally sufficient, but scanty in Vizagapatam and in parts of Anantapur and Madura, and insufficient in parts of Cuddapah and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 23rd May, 1888.*—Rain in parts of Hyderabad, Nasik, Ratnagiri, Sholapur, Bijapur, Belgaum, Dharwar, and Kanara. Cotton-picking progressing in parts of Kaira. Harvesting of late crops continues in Hyderabad. Ploughing for next season progressing generally. Fodder scarce in parts of Thana, Surat, Ratnagiri, Dharwar, and Kathiawar.

Bengal.—*For week ending 22nd May, 1888.*—Fairly general rain has fallen in Bengal, Orissa, and parts of Behar, while Chota Nagpur has been practically rainless. More rain is wanted throughout Orissa and Chota Nagpur and in some of the West Bengal districts. Ploughing is in progress. Early rice and jute are being sown, and are coming up well. Prospects of sugarcane, indigo, and *cheena* are favourable. Spring rice harvest is almost complete, with good results. No material fluctuation in the price of common rice during the past fortnight.

North-Western Provinces and Oudh.—*For week ending 23rd May, 1888.*—Weather hot and cloudy, with slight falls of rain in a few districts. Sugarcane and extra crops being irrigated. Markets well supplied. The general condition of cattle is satisfactory.

Punjab.—*For week ending 23rd May, 1888.*—Rain has fallen at Hissar, Delhi, Ferozepore, and Rawalpindi. The fall in prices is beginning to slacken,—a fall is reported from two districts only; in others the prices are stationary. Harvesting and threshing of *rabi* crops in progress. *Kharif* ploughings, sugarcane weedings, and cotton sowings are going on. *Rabi* prospects and outturn are reported good. No damage done to crops. Stock cattle are reported generally healthy. Fodder generally sufficient. Opium produce small in Rawalpindi. Poppy crops reaped at Peshawar.

Central Provinces.—*For week ending 23rd May, 1888.*—Weather hot and cloudy. Land being prepared for autumn sowings.

Burma.—*For week ending 19th May, 1888.*—The dry weather rice crop has generally been reaped in several districts. Ploughing for wet weather rice has commenced. Rain fell in all districts, but in Mandalay, Kyaukse, Yamethin, and Taungdwingyi districts of Upper Burma the rainfall was very slight. Grain is scarce in parts of Sandoway and Thayetmyo districts of Lower Burma. The price of grain had risen considerably in Sandoway district, and slightly in Moulmein, Upper Chindwin, and Shwebo districts, and has fallen in Rangoon, Pegu, Bassein, Taungdwingyi districts. Elsewhere the price of foodgrain is stationary.

Assam.—*For week ending 23rd May, 1888.*—Weather seasonable and prospects of crops good everywhere in the Province, except in Sibsagar, where somewhat unfavourable for tea. Potatoes being gathered in Khassia Hills.

Mysore and Coorg.—*For week ending 23rd May, 1888.*—There has been some rain in the civil and military station. Rainfall general and good in the Tumkur district. Standing crops in good condition, except in parts of the Mysore district, where they need more rain. Outturn of harvests favourable. Condition of cattle generally good.

There has been a good rainfall in South Coorg.

Berar and Hyderabad.—*For week ending 23rd May, 1888.*—Weather hot and cloudy. Threshing and winnowing of *rabi* crops completed. Land being prepared for *kharif* sowings. Scarcity of fodder in the Amraoti district. Prices stationary.

Some rain during the week in Hyderabad. Prospects fair. Prices stationary.

Central India.—*For week ending 23rd May, 1888.*—No change has taken place since the last report, except in the prices of foodgrains which are reported stationary in Baghelkand, Western Malwa, Bhopawar, and Neemuch.

Rajputana.—*For week ending 23rd May, 1888.*—Agricultural operations about to commence. No crops standing at present. Harvests and agricultural stock good generally. Pasturage or fodder sufficient. Prices steady generally, and rising slightly at places.

Nepal.—*For week ending 17th May, 1888.*—Slight rain. Weather cloudy. Harvesting of wheat commenced in the valley.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

ACCOUNTS AND FINANCE.

OBSERVATIONS ON AN ARTICLE IN THE "ECONOMIST" OF THE 21st APRIL ON THE INDIAN FINANCE ACCOUNTS.

No. 140, dated 26th May, 1888.

From—The Government of India,

To—The Secretary of State for India.

Our attention has been directed to an article in the *Economist* of April 21st, which, we observe, was specially brought to the notice of the House of Commons, and which challenges the correctness of the estimates and accounts which we submit to that House. The main part of this article is as follows:

> Is the Indian Government capable of rendering accurate accounts of its income and expenditure? This may seem an absurd question, but no one can watch the series of transformations through which the accounts for the year 1886-87 have been made to pass without feeling that it is a question that ought to be put and answered..... It is too much to expect that a Government should possess the gift of prophecy, but surely not too much to ask that it shall keep and render an accurate account of its financial operations. This, however, is what the Indian Government appears unable to do. Take, for instance, the accounts for the year 1886-87. Towards the end of March 1887, that Government rendered a statement of the revenue and expenditure of the year then closing. In the following July, it issued, through the Home Government, a different statement. A few months later—in the month of September—this revised account was, in its turn, superseded by another set of figures, bringing out quite a different result; and now we are given what is called a definitive account, which differs from all the others that have preceded it. That the character of these successive changes may be the better understood, we set them out in tabular form:

Income and Expenditure in the year 1886-87.

	As stated by Sir A. Colvin on March 26th, 1887.	As stated by Sir John Gorst — On July 29th, 1887.	As stated by Sir John Gorst — On September 10th, 1887.	As shown in Definitive Accounts, March 1888.
	£	£	£	£
Revenue ...	76,071,700	76,081,200	76,761,200	77,337,000
Expenditure	76,071,200	76,021,200	76,119,200	77,159,000
Surplus...	500	60,000	642,000	178,000

* * * * * * * *

> How is it that five months after that date they submit to Parliament accounts which understate revenue and expenditure by half-a-million and a million respectively? There is obviously something very far wrong with a system which produces such results as these, and, until it is altered, it is evident that all Indian Budgets must be received with very considerable reserve.....What has still to be explained is, how, six months after the close of the financial year, the Indian Government cannot state within many hundred thousand pounds what its receipts and outgoings have amounted to. This is a point of vital importance, upon which light has still to be thrown, and we trust some inquiry will be made in the House with regard to it.

2. It will be seen that the whole of these conclusions are based upon the four comparative statements of account with which the writer of the article starts, and mainly upon the third one.

3. The Under-Secretary of State correctly explained to the House of Commons on April 27th that the allegations of the writer were founded upon misapprehensions of his own; but at the risk of repeating facts already familiar to Your Lordship, we consider it desirable that the subject should be explained at

greater length than is suitable to a reply given to a question in the House, as the attention of the public press both in India and elsewhere has not unnaturally been called to an attack upon our account system emanating from an authority which is distinguished for the ability and justice of its criticism on financial matters other than those relating to India.

4. The first of the writer's four statements of figures is correct—that is, the figures correctly represent the "Revised Estimates" attached to the Financial Statement of March 26th, 1887.

5. The second statement is completely misunderstood by the writer. The figures in question have no immediate connection with July 29th, except that Sir John Gorst on that date printed certain explanations relating to them. They are the figures of the "*latest estimate of receipts and disbursements at home and abroad for the last financial year*" presented to Parliament every year in accordance with Section 53 of 21 & 22 Vic., Cap. 106. They are accordingly the figures of the House of Commons Return No. 179 of 1887, bearing date June 7th, 1887.

The Secretary of State, when giving to the Government of India the Home figures for our Revised Estimates (which he does annually about March 8th or 9th), has necessarily still to estimate the outgoings of March. Being bound by statute to give to Parliament in May the "*latest* estimate," he has to correct the figures already sent out to India by examining the actual transactions at the India Office during March. Accordingly the "latest estimate" given to Parliament *always* differs on this account to some small extent from the Revised Estimates published with the Financial Statement in India.

The difference of £60,000 in the year 1886-87 was due for the most part to the change, from March 25th to April 1st, of the date of certain quarterly payments at the India Office.

6. For the third set of figures, on which chiefly the conclusions of the article are based, the entire responsibility rests with the writer, who has unfortunately committed two serious mistakes in making them up. The figures agree with nothing that has been published either by the Government of India or by the Secretary of State.

Sir John Gorst stated that since the date of our figures (since March 26th, 1887), the following changes had been made:

(1) The revenue was better by Rx. 1,100,000 (of which Rx. 680,000 was Imperial and the rest Provincial).

(2) The surplus was now estimated at Rx. 642,000, against which, however, he would charge the Special Defence Works Rx. 295,000, reducing the amount therefore to Rx. 347,000.

(The passages were quoted on pages 4 and 6 of the last Financial Statement.)

This would accordingly give as the new estimate—

	Rx.
Revenue, Rx. 76,081,200, *plus* Rx. 1,100,000 ...	77,181,200
Expenditure	76,834,200
Surplus as above	347,000

The writer of the article, being apparently unaware that our accounts contain both Imperial and Provincial Revenues, added to the Rx. 76,081,200 only the additional Imperial Revenue of Rx. 680,000, and worked up to a surplus of Rx. 642,000 instead of Rx. 347,000.

Moreover, it was shewn in the last Financial Statement that, though the House of Commons did not reach its annual Indian debate till September 10th, the state of the accounts then officially announced to it was practically known to the Government in India in the month of April, and published in the *Gazette of India* of April 30th.

7. The fourth set of figures published by the writer is correctly taken from the statements attached to the last Financial Statement.

8. The following, therefore, are the four sets of figures as they would be set forth by a person conversant with the facts:

	Revised Estimates.		Final Outturn.	
	India, 26th March 1887.	House of Commons, 7th June 1887.	According to information mainly published in India in April 1887.	As by the accounts finally made up.
	Rx.	Rx.	Rx.	Rx.
Revenue	76,071,700	76,081,200	77,181,200	77,337,000
Expenditure ...	76,071,200	76,021,200	76,834,200	77,159,000
Surplus ...	500	60,000	347,000	178,000

9. It is obvious that the conclusion to be drawn from these figures is not that "six months after the close of the financial year, the Indian Government cannot state within many hundred thousand pounds what its receipts and outgoings have amounted to"; but that, within a few weeks of the close of the year, the Government of India knows its receipts and outgoings within about $\frac{2}{1,000}$ ths on one side, and about $\frac{4}{1,000}$ ths on the other. The reason for our not being able to state them with greater accuracy before the close of the year was fully explained in the last Financial Statement.

10. It no doubt takes a long time to finally make up our accounts for the year, as, before doing so, we have to collect, examine, and settle accounts collected over 53° of longitude and 27° of latitude from about—

200 Treasuries and 800 Sub-treasuries,
300 Public Works Disbursing Officers,
200 Military Disbursing Officers,
40 Railways,
200 District Boards,
and some others.

These accounts contain all sorts of cross transactions and debt and remittance and advance and store accounts, the settlement and adjustment of which is the main part of the operation of closing the year's accounts. But the fact that we are able to state the probable outturn of the year with such accuracy, within a month or six weeks of its close, is a wonderful testimony to the perfectness of the methods which we now employ in collecting early information. That we cannot further improve these methods we are far from saying, and we act on no such theory; but we can at all events claim that our account officers have succeeded in performing a feat of accounting to which no other account department in the world can shew a parallel.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

E. J. SINKINSON,
Offg. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE,
(*Statistical Branch*).

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending 8 a.m. on the 28th May, 1888.

The district rainfall return for the present week is much more complete than that issued in the last Gazette, when the return was issued for the first time and the system was not in complete working order.

The table shows first the rainfall for each day of the week under review at the district officer's head-quarters and the total rainfall for the seven days. It also shows the average rainfall of the whole district of which the head-quarters office is the centre. This average is derived from the returns sent in by the subdivisional officers. The normal average of the district is also given approximately. These figures are not absolutely correct, as daily returns from all the districts are not available, and hence the normal average has been estimated by comparing the monthly averages of the various districts with the monthly averages of neighbouring districts, where the daily fall is known, and estimating the weekly fall accordingly. The final columns give the total rainfall in the various districts since the 14th of May up to the date of the return, the normal fall for the same period and the variation of the rainfall of the season under review from that normal.

During the present week the large pressure differences, which were so noticeable last week, have been considerably reduced, though the actual distribution of pressure as regards the relative positions of the areas of high and low pressure has not materially changed. On the 21st the barometer was rising briskly in the North and falling in the South. Pressure was high on the West Coast and over the south of the Bay, and low over Northern India. Within this low pressure area three barometric minima were shown:—one near Jacobabad, a second between Ludhiana and Sialkote, and a third over Chutia Nagpur, Orissa, and Behar. There was a good deal of indraught towards the depression over Chutia Nagpur, strong south-east winds blowing at the head of the Bay. In other parts of Northern India there was much irregular movement. Over Western and Central India strong westerly (north-west and south-west) winds were reported, and at Galle the wind was of average monsoon force. On the 22nd the barometer continued to rise in the North and to fall in the South, and hence gradients were still further diminished, and the winds less strong. The prevailing directions were the same as on the preceding day. On the 23rd the barometric changes were small, and beyond a further diminution in the pressure differences there was no important change. The winds were generally light. A brisk fall of the barometer was reported from Sind on the 24th, but elsewhere the changes were again slight. The wind force remained low, except at the head of the Bay, where the wind had veered and increased. On the 25th there occurred a rapid decrease of pressure all over Northern India, and a slight fall over the greater part of the Peninsula. Consequently pressure differences were increasing, and the force of the wind rising over a large part of the country. By the morning of the 26th gradients were again steep over a large part of India. A gale of wind was blowing at the head of the Bay and very strong winds on the Cutch and Guzerat coasts, while the hot westerly winds of Rajputana and Central India were also rising. On the 27th the distribution of pressure was similar to that prevailing during the preceding week, *viz.*, a large low pressure area over the Indus Valley, and high pressures over the centre and south of the Bay, with steep barometric gradients over the intervening region. The winds continued to blow strongly.

During the whole week pressure has been considerably below the average over North-Western India, and slightly below the average in Southern India on several occasions. The depression in Northern India has probably been in part due to the excessive temperatures which have prevailed during the past few days.

The maxima have been even higher than during the preceding week. The hottest station was Jacobabad, where the extreme readings on each day of the week were as follows:

On the	21st	116°
„	22nd	118°
„	23rd	117°
„	24th	117°
„	25th	119°
„	26th	120°
„	27th	122°

In the Punjab and North-West Provinces the mean of the maxima of all stations were as follows:

On the	21st	108·5°	with a maximum of	112·4° at Sirsa.
„	22nd	111·1°	„	114·2° at Allahabad.
„	23rd	112·3°	„	116·0° at Agra and Sialkote.
„	24th	109·9°	„	116·0° at Agra and Jhansi.
„	25th	111·4°	„	116·5° at Agra and Jhansi.
„	26th	111·2°	„	117·4° at Sirsa.
„	27th	112·4°	„	117·6° at Multan.

The deficiency of pressure over Southern India and Ceylon is probably attributable to some other cause. It is important, as it is one of the conditions which usually precede the first large advance of south-west monsoon winds. So far this deficiency of pressure has been the only sign of this advance, the heavy rain in Ceylon which was noticed last week not having been followed up by any important extension of rain into the Indian region.
